To ensure that each Medicaid-enrolled birthing hospital in Michigan utilizes elective delivery EBGs, each hospital must have a completed Medicaid Enrolled Birthing Hospital Agreement for Elective, Non-Medically Indicated Delivery Prior to 39 Weeks Completed Gestation (MSA-1755) on file with MDHHS. A copy of the form is provided in the Forms Appendix and is also available on the MDHHS website. (Refer to the Directory Appendix for website information.)

Providers are expected to report the appropriate NUBC condition codes for gestational age on the mother’s hospital claim when the delivery is related to cesarean sections or inductions.

### 3.20 LABORATORY [CHANGE MADE 7/1/18]

MDHHS follows Medicare’s current OPPS coverage policies as closely as possible and appropriate. In those instances where program differences require coverage disparity, the differences will be reflected through the application of the MDHHS specific status indicator. Procedure codes associated with the identified services will appear on the MDHHS OPPS Wraparound Code List available on the MDHHS website. (Refer to the Directory Appendix for website information.)

MDHHS policy covers hospitals for medically necessary laboratory tests when:

- Performed in a laboratory certified by the Clinical Laboratory Improvement Amendments (CLIA);
- Needed to diagnose a specific condition, illness, or injury; and
- Ordered by physicians (MD or DO), [physician assistants, (added 7/1/18) podiatrists, dentists, nurse practitioners, or nurse-midwives).

MDHHS requires medical record documentation of medical necessity. An explanation of the laboratory testing method or the results of diagnostic tests, whether normal or abnormal, is not considered documentation of medical necessity. For approval of payment, the laboratory procedure(s) must be specific and appropriate to the beneficiary’s documented condition and diagnosis.

Reimbursement to the inpatient hospital is through the DRG payment.

Reimbursement for outpatient services is billed using the appropriate HCPCS code and includes the collection of the specimen(s), the analysis, and the lab test results. MDHHS performs pre- and/or post-payment reviews to monitor laboratory procedures for medical necessity and appropriate practitioner orders. Outpatient hospitals are subject to corrective action, including the recovery of funds, for laboratory services not specifically ordered by a practitioner.
MDHHS does not cover:

- Screening or routine laboratory testing, except as specified for EPSDT Program or by Medicaid policy;
- "Profiles", "batteries" or "panels" of tests that include tests not necessary for the diagnosis or treatment of the beneficiary's specific condition; or
- Multiple laboratory tests performed as a part of the beneficiary evaluation if the history and physical examination do not suggest the need for the tests.

Services performed by an outpatient hospital laboratory or its employees may not be billed to, or by, the ordering practitioner.

### 3.20.A. PREGNANCY-RELATED LABORATORY SERVICES

The obstetric profile must be ordered by the attending practitioner and billed as an all-inclusive panel of tests for required prenatal laboratory services. It must include the following:

- Blood count, complete (CBC), automated and automated differential WBC count, or Blood count, complete (CBC), automated and appropriate manual differential WBC count
- Hepatitis B surface antigen (HBaAg)
- Antibody, rubella
- Syphilis test, qualitative (e.g., VDRL, RPR, ART)
- Antibody screen, RBC, each serum technique
- Blood typing, ABO
- Blood typing, Rh(D)

Only AMA-approved organ- or disease-oriented panels may be billed. All tests within the panel must be medically necessary. Unless the complete panel is ordered and performed, bill as individual tests.

Testing for HIV is covered separately when determined to be medically necessary and ordered by the practitioner.

Only practitioners should order the serum or urine HCG qualitative method when the beneficiary requires preliminary pregnancy testing.

Nurse-midwives may order only the laboratory tests listed below. Hospitals are not reimbursed for any other tests ordered by a nurse-midwife.

- Acetone and diabetic acid (ketone bodies); qualitative; semi-quantitative
- Albumin; qualitative, semi-quantitative, quantitative (such as Esbach)
- Antibody titer Rh system; albumin, saline and/or AHG technique
- Blood count; RBC, WBC, Hemoglobin, Hematocrit, indices (MCV, MCH, MCHC)
- Blood typing; ABO, Rh(D), RBC antibody screening
- Culture, presumptive (screening), for Neisseria gonorrhea, Candida, Hemophilus, or beta hemolytic Streptococcus group A, etc.
- Culture, urine, definitive; with or without colony count
- Cytopathology, vaginal and/or cervical smears (e.g., Papanicolaou type) screening (cytopathological examination for malignancy, microbial flora, inflammatory features and hormonal evaluation)
- Glucose; qualitative, quantitative, timed specimen, tolerance
- Hemoglobin, electrophoretic separation; qualitative
- Hepatitis B test
- Human immunodeficiency virus detection
- Pregnancy test
- Prenatal laboratory services; routine (Obstetric panel)
- Quantitative sediment analysis and quantitative protein (Addis count); 12- or 24-hour specimen Reticulocyte count, manual
- Rubella test; titer
- Sickle cell slide test
- Skin test, tuberculosis, tine test
- Susceptibility (sensitivity) for aerobes by Kirby-Bauer procedure for specific pathogens, using 10-12 discs per pathogen; also for susceptibility (sensitivity) for anaerobes by generally accepted standard techniques using 5-12 discs per pathogen (specify number of pathogens)
- Syphilis testing, flocculation or precipitin (VDRL, RPR, etc.); qualitative
- Treponema antibodies, fluorescent, absorbed (FTA-abs)
- Urinalysis, complete (physical appearance, pH, specific gravity, microscopic examination, qualitative chemistry with or without semi-quantitative confirmation)
- Wet mount, smear, tissue; direct microscopic examination

3.20.B. BLOOD HANDLING

MDHHS reimburses for blood handling only when a beneficiary is referred to an outpatient hospital for the sole purpose of drawing, packaging and mailing a blood sample to MDHHS for HIV-1 viral load analysis and/or CD4/CD8 enumeration. The State provides specimen containers and mailing kits for the analysis. (Requests for supplies and samples for analysis should be sent to the MDHHS Blood Lead Laboratory. Refer to the Directory Appendix for contact information.)
3.20.C. HEMATOLOGY STUDIES

A complete blood count (CBC) with white blood cell (WBC) differential includes the RBC and WBC count, Hgb, Hct, MCH, MCHC, MCV, RBC morphology, platelet estimate, and WBC differential only. If automated instrumentation yields additional test parameters, the results are not reimbursable unless medically necessary and specifically ordered by a practitioner.

3.20.D. MICROBIOLOGY STUDIES

MDHHS coverage and reimbursement for gram fluorescent/acid fast is included in the reimbursement for microbiology when performed on the same DOS for the same beneficiary.

3.20.E. PAP SMEAR

Pap smear screening by a technologist under the supervision of a pathologist is a covered service. If a suspect smear requires additional interpretation by a pathologist, this service is also covered. Only one Papanicolaou test within a 12-month period is covered for each beneficiary, unless medical necessity or history of abnormal findings requires additional studies.

3.20.F. SUBSTANCE ABUSE

For direct-billed laboratory services ordered by a PIHP, the referring provider NPI number must be appropriately reported on the appropriate paper or electronic claim format.

3.20.G. CREATININE BLOOD TESTS

Calculate and report the Glomerular Filtration Rate (eGFR) for tests processed for beneficiaries in outpatient settings and for beneficiaries 18 years of age and older. The eGFR test results must report two values on the lab report for beneficiaries: one for African-American and one for non-African-American, or one value if race is available and able to be used in calculating the value.

3.21 MENTAL HEALTH AND SUBSTANCE ABUSE SERVICES

Most mental health services provided to Medicaid beneficiaries are covered through the local PIHP/CMHSP. PIHPs/CMHSPs are responsible for direct payment for inpatient psychiatric or partial hospitalization services, related physician services, and specialized community mental health clinical and rehabilitation services that the PIHP/CMHSP has prior authorized. Providers should not bill MDHHS for these services.

Medical/physical health care services (beyond the admission history and physical) and/or physician-ordered medical (nonpsychiatric) consultations required for Medicaid beneficiaries while they are receiving psychiatric inpatient or partial hospitalization services are not the responsibility of the PIHP/CMHSP. For FFS beneficiaries, these services are billed directly to MDHHS. For beneficiaries enrolled in a MHP, the services must be billed directly to the MHP. These services may require PA.
Michigan Department of Health and Human Services

Medicaid Provider Manual

(Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter of this manual for additional information.)

3.21.A. Acute Inpatient Medical Detoxification

Medically necessary inpatient detoxification services are covered only in a life-threatening situation. Medicaid does not cover inpatient detoxification if the beneficiary is simply incapacitated and not in a life-threatening situation. Acute medical detoxification services may be provided by a Medicaid-enrolled hospital without authorization from a PIHP. Acute detoxification services are reimbursed directly by MDHHS for both MHP enrollees and FFS beneficiaries.

For additional substance abuse services, hospitals must refer beneficiaries seeking inpatient acute detox services to the regional PIHP.

3.21.B. Inpatient Psychiatric Services

Inpatient stays in a psychiatric unit of a general hospital are covered for beneficiaries of any age. Coverage for inpatient treatment, including related psychiatric visits, in a freestanding psychiatric hospital, both private and state-owned, is limited to eligible beneficiaries under age 21 and age 65 and older. If the beneficiary was an inpatient immediately prior to attaining age 21, he would be eligible to continue as an inpatient until age 22. If the beneficiary is discharged at some time following his 21st birthday, coverage terminates on the discharge date.

All psychiatric admissions and continued stays must be authorized by the local PIHP/CMHSP. (Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter of this manual for specific coverages and authorization requirements.)

3.21.C. Psychiatric Partial Hospitalization

Psychiatric coverage includes partial hospitalization on a day-care or night-care plan for all beneficiaries, regardless of age. To be eligible for partial hospitalization, the beneficiary must be receiving active psychiatric treatment provided under the direction of a psychiatrist.

All partial hospitalization admissions and continued stays must be authorized by the local PIHP/CMHSP. (Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter of this manual for specific coverages and authorization requirements.)

3.21.D. Substance Abuse Services

Medicaid covers acute care detoxification in the inpatient hospital as a FFS benefit. Reimbursement is made directly by MDHHS for both FFS beneficiaries and MHP enrollees.
Admission to the acute care setting for a diagnosis of substance abuse must meet at least one of the following criteria as reflected in the physician’s orders and patient care plan:

- Vital signs, extreme and unstable.
- Uncontrolled hypertension, extreme and unstable.
- Delirium tremens, (e.g., confusion, hallucinations, seizures) or a documented history of delirium tremens requiring treatment.
- Convulsions or multiple convulsions within the last 72 hours.
- Unconsciousness.
- Occurrence of substance abuse with pregnancy and monitoring the fetus is vital to the continued health of the fetus.
- Insulin-treated diabetes complicated by diabetic ketoacidosis.
- Suspected diagnosis of closed head injury based on trauma injury.
- Congestive heart disease, ischemic heart disease, or significant arrhythmia as examples of active symptomatic heart disease.
- Suicidal ideation and gestures necessitating suicidal precautions as part of treatment.
- Blood alcohol level 350 mg/dl with a diagnosis of alcohol abuse.
- Blood alcohol level 400 mg/dl with diagnosis of alcohol dependence.
- Active presentation of psychotic symptoms reflecting an emergent/urgent condition.

3.21.E. OTHER SUBSTANCE ABUSE SERVICES

Medicaid covers other substance abuse services provided to beneficiaries. These services are covered under capitation payments to the PIHPs/CMHSPs. (Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter of this manual for specific coverages and authorization requirements.)

3.21.F. SUBSTANCE USE DISORDER SERVICES THROUGH PREPAID INPATIENT HEALTH PLANS

The regional PIHP may authorize the following specialized services:

- Outpatient Substance Abuse Treatment
- Assessment, Diagnosis, Beneficiary Placement and Referral
- Intensive Outpatient Counseling
- Approved Pharmacological Supports (Methadone)

Questions regarding substance abuse services should be directed to the regional PIHP.
3.22 ORGAN TRANSPLANTS

MDHHS requires PA from the Office of Medical Affairs (OMA) for organ transplants for all beneficiaries, donors, and potential donor services related to organ transplants except for cornea and kidney. (Refer to the General Information for Providers Chapter of this manual for additional information on prior authorization [PA].) PA is required if additional organ(s) transplantation is to occur during the same operative session, such as a cornea or kidney.

PA is not required if Medicare makes payment and Medicaid liability is limited to coinsurance and deductible. If a Medicare application is pending, the provider must indicate that on the PA request and notify MDHHS when the determination is made. All other insurance resources must be exhausted before Medicaid is billed. The denial notice(s) must be submitted with the claim.

MDHHS reimbursement for the following transplants is at the hospital’s Medicaid cost to charge ratio:

- Heart
- Liver
- Simultaneous pancreas/kidney
- Bone marrow
- Lung
- Pancreas transplants
- Liver
- Lung
- Simultaneous pancreas/kidney
- Pancreas transplants

Organ acquisition costs are reimbursed at 100% of charges when billed using the appropriate revenue code. (Refer to the Transplants subsection of the Billing & Reimbursement for Institutional Providers Chapter for revenue code information.) This applies to:

- Heart
- Liver
- Simultaneous pancreas/kidney
- Kidney
- Lung
- Pancreas transplants

All bone marrow transplant charges are reimbursed at the hospital’s cost to charge ratio.

For other organ transplant services not described by a specific DRG, the hospital must provide a note/remark on the claim of the type of transplant (i.e., small bowel transplant) performed. All organ transplant claims suspend for manual review of documentation. A copy of the PA letter must be submitted with the claims. Providers must note “PA Letter submitted” in the Remarks section of the claim.

For those transplants requiring PA, MDHHS requires a beneficiary to be evaluated at an accepted transplant center approved by the OMA to determine if he is a good transplant candidate. If the transplant is to take place at a Medicaid-enrolled, in-state hospital, then only the transplant needs PA. If the transplant is to be performed at an out-of-state hospital, then both the evaluation and the transplant must be separately prior authorized. Results from the evaluation must be submitted to the OMA when requesting PA for the transplant.

If the beneficiary is Medicaid-eligible and the donor is not Medicaid-eligible, providers must bill all services under the beneficiary’s ID Number and provide complete documentation. If the donor and beneficiary are both Medicaid-enrolled, providers must bill the services under their respective Medicaid ID numbers.
3.22.A. DONOR SEARCH

When the donor search does not result in an organ acquisition and transplant, MDHHS reimburses for a donor search and related charges. These services must be billed as outpatient services, and providers are required to submit a copy of the PA letter for transplant with the claim. Providers must make reference or remark on the claim format that the donor search failed at the time of claim submission.

3.22.B. TRANSPORTATION AND LODGING

MDHHS reimburses for transportation and lodging expenses associated with the evaluation and the transplant for the beneficiary and one accompanying individual (e.g., spouse, parent, guardian). If the beneficiary has CSHCS-only coverage, they must contact the CSHCS office in the LHD of the county where they reside to make travel arrangements. The beneficiary’s local MDHHS office should be contacted to make travel arrangements if the beneficiary has Medicaid-only coverage or they are dually enrolled in CSHCS and Medicaid. If the beneficiary is enrolled in an MHP, contact the MHP regarding transportation arrangements.

3.23 OUTPATIENT OBSERVATION SERVICES

Observation is a defined set of clinically appropriate specific services that include ongoing short-term treatment, assessment and reassessment before deciding whether a beneficiary requires further treatment as a hospital inpatient or discharge from the outpatient hospital. Observation services must also be reasonable and necessary to be covered.

MDHHS follows Medicare’s coverage and reimbursement policies related to observation services.

3.24 PERSONAL ITEMS

Personal comfort and convenience items (e.g., toiletries, slippers, hospitality kits, etc.) cannot be billed to MDHHS.

3.25 PREADMISSION DIAGNOSTIC SERVICES

MDHHS follows Medicare policy for all preadmission diagnostic services and other preadmission services (outpatient services treated as inpatient) with a few exceptions in compliance with the law.

All non-diagnostic services rendered in the three-day window prior to the inpatient hospital admission may not be billed separately and must be bundled into the inpatient stay, unless the hospital can document they are unrelated services. MDHHS aligns with Medicare billing guidelines.

3.26 RADIOLOGY

MDHHS covers Medicaid enrolled hospitals for the following medically-necessary radiology services, including diagnostic and therapeutic radiology, nuclear medicine, CT scan procedures, magnetic resonance imaging services, ultrasound, and other imaging procedures:

- Necessitated by injury or disease, including benign or malignant conditions;
- Needed to diagnose a specific condition, illness, or injury; and
- Ordered by physicians (MD or DO), podiatrists, dentists, nurse practitioners, or nurse-midwives.

The medical record must contain documentation of medical necessity to support all radiology services billed.

Reimbursement to the inpatient hospital is through the DRG payment.

Reimbursement for outpatient services is billed using the appropriate HCPCS code and includes the use of the facility, equipment, supplies, and attendant personnel required to provide the service.

MDHHS reimburses for diagnostic and therapeutic x-rays and nuclear medical services, including:

<table>
<thead>
<tr>
<th>Procedure</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Computerized Axial Tomography (CT) Scanning</td>
<td>CT scanning is not covered for routine screening, nonspecific diagnoses, or in situations where less costly diagnostic methods are appropriate. CT scanning procedures must be provided on equipment that has an approved Certificate of Need (CON) on file with MDHHS.</td>
</tr>
<tr>
<td>Percutaneous Transluminal Coronary Angioplasty (PTCA)</td>
<td>PTCA is covered for those beneficiaries who meet the following criteria: failed maximum medical treatment, intractable angina, and single vessel disease with left ventricular function.</td>
</tr>
<tr>
<td>Ultrasonography</td>
<td>Ultrasound procedures are reimbursed when there is clinical evidence in the beneficiary's record to substantiate the medical need for such services. Ultrasound procedures are not covered when used as screening procedures or on a routine basis. When billing two ultrasound codes, the diagnosis must reflect the medical need for two procedures. Claims for diagnostic ultrasound procedures that are performed more than once must be documented for medical necessity. Documentation with the claim should clearly state the reason for the repeat procedure. Claims are rejected if the documentation does not support the need for the repeat diagnostic procedure.</td>
</tr>
</tbody>
</table>

3.27 REHABILITATION SERVICES

MDHHS follows Medicare's coverage and reimbursement policies related to Cardiac Rehabilitation (CR), Intensive Cardiac Rehabilitation (ICR), and Pulmonary Rehabilitation (PR).

MDHHS reimburses covered services for CR and ICR services for beneficiaries with chronic and specific medical (diagnosis code specific) conditions, respectively. Hospitals and physicians, any combination of services, may provide the rehabilitation sessions. ICR programs must be approved and certified.

MDHHS reimburses covered services for PR for beneficiaries with obstructive pulmonary disease and other specific medical diagnosis.

3.28 STERILIZATION

MDHHS covers sterilization procedures when specific requirements are met. A sterilization procedure is defined as any medical procedure, treatment, or operation for the sole purpose of rendering an individual...
(male or female) permanently incapable of reproducing. Surgical procedures performed solely to treat an injury or pathology are not considered sterilizations under Medicaid's definition of sterilization, even though the procedure may result in sterilization (e.g., oophorectomy). The physician is responsible for obtaining the signed Consent for Sterilization (MSA-1959/HHS-687). (Refer to the Forms Appendix for a sample form and to the Directory Appendix for website information.)

Sterilizations are reimbursed only if:

- The beneficiary is at least 21 years of age at time of informed consent.
- The beneficiary is not legally declared to be mentally incompetent.
- The beneficiary is not institutionalized in a corrective, penal, or mental rehabilitation facility.
- Informed consent is obtained.
- Informed consent is not obtained while the beneficiary is in labor or childbirth; seeking to obtain or obtaining an abortion; or under the influence of alcohol or other substances that affect the beneficiary's state of awareness.
- Informed consent must be obtained not less than 30 days nor more than 180 days prior to sterilization.

The only exception is in the case of premature delivery or emergency abdominal surgery. If the premature delivery or emergency abdominal surgery occurred before the 30-day waiting period is over, at least 72 hours must have passed between the time of obtaining informed consent and the sterilization procedure.

- In some cases of premature delivery, informed consent must have been given at least 30 days before the expected delivery date. The consent form must indicate the expected date of delivery.
- In cases of abdominal surgery, the emergency nature of the surgery must be clearly identified, e.g., diagnosis, physician's statement, or hospital summary. The nature of the emergency must be included on the consent form.

Federal regulations require that the completed MSA-1959/HHS-687 must be submitted to MDHHS before reimbursement can be made for any sterilization procedure. A copy must be attached to the claim form unless submitted via fax prior to filing the claim. MDHHS allows for submission of MSA-1959/HHS-687 forms via fax to encourage electronic billing and reduce administrative burden. This process can also pre-confirm the acceptability of the completed consent form and reduce costly claim rejections. (Refer to the Billing & Reimbursement for Professionals Chapter of this manual for information regarding the completion and submission of the MSA-1959/HHS-687.

3.29 SURGERY

MDHHS reimburses for surgeries performed in an inpatient hospital through the DRG payment.
When an ambulatory surgery is performed in the inpatient hospital setting, the physician/dentist must provide exception rationale justifying the need for an inpatient setting. Acceptable rationale includes:

- A medical condition that requires prolonged postoperative observation by skilled medical personnel (e.g., heart disease, severe diabetes);
- A pre-existing condition that significantly increases the risk of using anesthesia;
- The beneficiary has been admitted to a hospital for another procedure or condition, and the surgeon determines that additional surgical procedures are necessary;
- An unrelated procedure is being done simultaneously which, by itself, requires hospitalization;
- Another surgical procedure is expected to follow the initial procedure (e.g., gynecological laparoscopy followed by an oophorectomy);
- Technical difficulties, as documented by admission or operative notes; or
- Adequate outpatient facilities are not available within a reasonable distance (i.e., 40 miles) requiring the surgery to be rendered on an inpatient basis. In this case, MDHHS allows a one-day inpatient hospital stay, unless a longer stay is medically necessary.

If the physician planned to perform the surgery on an outpatient basis, but more extensive surgery was needed or complications developed and the beneficiary had to be admitted, a Prior Authorization Certification Evaluation Review (PACER) number is not needed for the admission. This type of admission is considered urgent or emergent. The need for the admission is, however, subject to retrospective review by the ACRC.

MDHHS follows Medicare’s Inpatient Only policy for outpatient surgeries.

MDHHS covers a second surgical opinion if the beneficiary or the physician/dentist requests one.

3.29.A. OPERATING ROOM

Inpatient coverage and reimbursement is through the DRG payment.

Outpatient providers must bill the appropriate HCPCS/CPT support code(s) operating room services and surgical supplies. The main payment methodology for the OPPS is the APC which is used by Medicare. Per Federal Regulations, the MDHHS OPPS uses Medicaid NCCI and Medically Unlikely Edit (MUE) values for OPH claims processing. Medicaid NCCI and MUE values are reviewed with the quarterly file updates.

3.29.B. RECOVERY ROOM

MDHHS policy covers routine supplies, anesthesia, and recovery room use. Most drugs are considered to be an integral part of a surgical procedure. Payment for these items is packaged into the APC payment for the surgical procedure.

Inpatient coverage and reimbursement is through the DRG payment.

Outpatient providers must bill appropriately for the Recovery Room. MDHHS follows Medicare’s coverage and reimbursement policies for outpatient providers.
3.29.C. COSMETIC SURGERY

Hospital charges related to cosmetic surgery are not reimbursable without PA for the surgery. The physician/dentist must furnish the hospital with a copy of the PA letter for the surgery, as well as the PACER number for the admission.

3.30 OCCUPATIONAL THERAPY

Occupational Therapy services provided during an inpatient stay do not require PA for reimbursement. Refer to the Standards of Coverage and Service Limitations Section of the Outpatient Therapy Chapter for criteria.

Refer to the Standards of Coverage and Service Limitations Section of the Outpatient Therapy Chapter for therapy provided in the outpatient hospital setting. The MDHHS OPPS aligns as closely as possible with Medicare’s billing and coverage guidelines for "sometimes therapy" services that may be reimbursed as non-therapy services for hospital outpatients. Refer to the therapy codes and their respective designations used for therapy services (i.e., "always therapy" and "sometimes therapy") found on the CMS website. (Refer to the Directory Appendix for website information.)

3.31 PHYSICAL THERAPY

Inpatient hospital physical therapy does not require PA for reimbursement. Refer to the Outpatient Therapy Chapter of this manual for standards of coverage and service limitations for therapy provided in the outpatient hospital setting.

The MDHHS OPPS aligns as closely as possible with Medicare’s billing and coverage guidelines for "sometimes therapy" services that may be reimbursed as non-therapy services for hospital outpatients. Refer to the therapy codes and their respective designations used for therapy services (i.e., "always therapy" and "sometimes therapy") found on the CMS website. (Refer to the Directory Appendix for website information.)

3.32 THERAPY, SPEECH-LANGUAGE PATHOLOGY

Speech-language pathology services provided during an inpatient admission do not require PA. Refer to the Outpatient Therapy Chapter of this manual for standards of coverage and service limitations for therapy provided in the outpatient hospital setting. The MDHHS OPPS aligns as closely as possible with Medicare’s billing and coverage guidelines for "sometimes therapy" services that may be reimbursed as non-therapy services for hospital outpatients. Refer to the therapy codes and their respective designations used for therapy services (i.e., "always therapy" and "sometimes therapy") found on the CMS website. (Refer to the Directory Appendix for website information.)

3.33 TELEMEDICINE

A hospital can be either an originating or distant site for telemedicine services. Refer to the Billing & Reimbursement for Institutional Providers Chapter for specific billing instructions. Refer to the Telemedicine Section of the Practitioner Chapter for additional information regarding telemedicine services.
Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.

3.34 WEIGHT REDUCTION

MDHHS policy covers obesity treatment when done for the purpose of controlling life-endangering complications such as hypertension and diabetes. This does not include treatment specifically for obesity, weight reduction and maintenance alone. The physician must request PA and document that other weight reduction efforts and/or additional treatment of conservative measures to control weight and manage the complications have failed.

The request for PA must include:

- The medical history;
- Past and current treatment and results;
- Complications encountered;
- All weight control methods that have been tried and failed; and
- Expected benefits or prognosis for the method being requested.

If surgical intervention is desired, a psychiatric evaluation of the beneficiary’s willingness/ability to alter their lifestyle following surgical intervention must be included.

Mail requests to Office of Medical Affairs (OMA). (Refer to the Directory Appendix for contact information.)

If the request is approved, the provider receives an authorization letter for the service, including billing instructions. A copy of the authorization letter must be attached to all claims submitted to MDHHS for weight reduction services.
4.1 NONCOVERED ADMISSIONS

For Medicaid reimbursement, all inpatient admissions must be medically necessary and appropriate. MDHHS does not cover inpatient hospital admissions for the sole purpose of:

- Cosmetic surgery (unless prior authorized)
- Custodial or protective care of abused children
- Diagnostic procedures that can be performed on an outpatient basis
- Laboratory work, electrocardiograms (ECGs), electroencephalograms (EEGs), diagnostic x-rays
- Observation
- Occupational therapy (OT)
- Patient education
- Physical therapy (PT)
- Routine dental care
- Routine physical examinations not related to a specific illness, symptom, complaint, or injury
- Speech pathology
- Weight reduction; weight control (unless prior authorized)

Inpatient claims with discharge date prior to October 1, 2014 where that stay has been denied as inappropriate or unnecessary may not be resubmitted to MDHHS as outpatient charges. Charges resubmitted as outpatient charges are monitored, and any payment made may be recovered during a post-payment audit. Any accommodations or ancillary services provided during nonallowable admissions or parts of stays will not be reimbursed.

Medically inappropriate or unnecessary admissions claims with dates of discharge on or after October 1, 2014 may be resubmitted as outpatient claims (Type of Bill 013x) for all outpatient services and any inpatient ancillary services performed during the inpatient stay.

Hospitals may not bill beneficiaries for any medical charges for goods and services provided during a nonallowable admission. The beneficiary is assumed to be following the physician's advice.

4.2 INPATIENT AND OUTPATIENT POST-PAYMENT REVIEWS

MDHHS and/or its audit contractor will perform automated reviews and medical record reviews on inpatient and outpatient services that have been paid. An automated review is a re-examination of a claim payment at the system level. These reviews will focus on errors in pricing, coverage, coding determinations and payment of duplicate claims. A medical record review is a more comprehensive comparison of a hospital's Medicaid claims against the hospital's medical records.

The objective of the MDHHS post-payment review process is to ensure that MDHHS reimbursement is for medically necessary care provided in the appropriate setting, that diagnostic and procedural information is valid, and that the care rendered meets current clinical and quality standards of practice. Cases are
reviewed using Medicaid-approved Severity of Illness/Intensity of Services (SI/IS) criteria, clinical judgment and generic quality screens.

All reviews include consideration of medical necessity, appropriateness of setting, coding validity/accuracy, and the quality and intensity of care provided to the beneficiary. The audit will also ensure that the quality and intensity of hospital services conform to current and acceptable standards of medical practice and Medicaid policies, procedures, and coding guidelines.

4.3 CONFIDENTIALITY

As an agent of the State, the MDHHS audit contractor may access all records related to care provided to Medicaid beneficiaries and is subject to the same state and federal confidentiality requirements as Medicaid staff. The failure of a hospital to make all records available to the contractor will result in denial of that case and subjects that hospital to Medicaid participation sanctions.

(Refer to the Directory Appendix for MDHHS hospital audit contractor contact information.)
SECTION 5 – DISCHARGE PLANNING

As part of utilization review, the hospital should consider various alternatives for care of the beneficiary through discharge planning. The medical and social services personnel of the hospital should assist in this effort. If so requested by the hospital, the local MDHHS office assists in relocating the beneficiary. The following subsections explain possible alternatives for care.

5.1 HOME HELP

The beneficiary is able to remain in his own home. Home Help providers perform unskilled household and personal care tasks that the beneficiary cannot do himself. Home Help, Home Health, Home for the Aged, Adult Foster Care, and MI Choice Waiver services may be provided singly or in combination (excluding the combination of Home Help and MI Choice Waiver services) as defined in Medicaid policy.

5.2 HOME HEALTH

The beneficiary resides in his own home or other place of residence (e.g., foster care, home for the aged), is under a physician's (MD, DO) care, and requires intermittent nursing care for a specified period of time. Home Help, Home Health, Home for the Aged, Adult Foster Care, and MI Choice Waiver services may be provided singly or in combination as defined in Medicaid policy.

5.3 HOME FOR THE AGED

The beneficiary (age 62 or older) receives supervision and non-nursing care in a licensed home. Home Help, Home Health, Home for the Aged, Adult Foster Care, and MI Choice Waiver services may be provided singly or in combination, as defined in Medicaid policy.

5.4 ADULT FOSTER CARE HOME

The beneficiary is in a licensed home that provides supervision, assistance, protection, and personal care, in addition to room and board. This type of home does not provide continuous medical care. Home Help, Home Health, Home for the Aged, Adult Foster Care, and MI Choice Waiver services may be provided singly or in combination, as defined in Medicaid policy.

5.5 HOME AND COMMUNITY BASED WAIVER FOR THE ELDERLY AND DISABLED (MI CHOICE WAIVER PROGRAM)

The beneficiary must meet the eligibility criteria in the Michigan Medicaid Nursing Facility Level of Care Determination and require two waiver services, one of which must be Supports Coordination. Referrals are made to regional waiver providers who are responsible for screening and assessing the beneficiary for waiver eligibility. Once determined eligible, services are provided in the beneficiary’s home to help the beneficiary remain as independent as possible. These services may include skilled nursing, respite care, counseling, etc.

Home Help, Home Health, Home for the Aged, Adult Foster Care, and MI Choice Waiver services may be provided singly or in combination, as defined in Medicaid policy.
Michigan Medicaid Nursing Facility Level of Care Determination

The Michigan Medicaid Nursing Facility Level of Care Determination form must be completed for every Medicaid beneficiary prior to admission to the MI Choice Waiver. The MI Choice Waiver program agent must verify beneficiary appropriateness for services by completing the electronic web-based version of the form. Beneficiaries who do not demonstrate functional/medical eligibility through the electronic web-based tool are not eligible for the MI Choice Waiver Program.

Information regarding the Michigan Medicaid Nursing Facility Level of Care Determination process, the form, and the Field Definition Guidelines are on the MDHHS website. (Refer to the Directory Appendix for website information.)

While the MI Choice Waiver agent is the actual entity that must complete and submit the form, hospitals are encouraged to assess a beneficiary’s functional/medical eligibility for the MI Choice Waiver using a copy of the form. A hospital may also use the Telephone Intake Guidelines to conduct an initial assessment of potential eligibility for the program. The Guidelines are also available on the MDHHS website.

5.6 PROGRAM OF ALL-INCLUSIVE CARE FOR THE ELDERLY (PACE)

The Michigan Medicaid Nursing Facility Level of Care Determination (LOCD) must be completed for every Medicaid beneficiary prior to admission to the PACE. The PACE agent must verify beneficiary appropriateness for services by completing the online version of the LOCD. Beneficiaries who do not demonstrate functional/medical eligibility through the online LOCD are not eligible for PACE.

Information regarding the LOCD process, the LOCD assessment, and the LOCD Field Definition Guidelines is on the MDHHS website. (Refer to the Directory Appendix for website information.)

While the PACE agency is the actual entity that must complete and conduct the online LOCD, hospitals are encouraged to assess a beneficiary’s functional/medical eligibility for PACE using a copy of the LOCD. A hospital may also use the Telephone Intake Guidelines. The Guidelines are also available on the MDHHS website.

5.7 PRIVATE DUTY NURSING

The beneficiary requires more individualized and continuous care than is available from a visiting nurse or routinely provided by the nursing staff of a hospital or skilled nursing facility. Private duty nursing (PDN) enables the beneficiary to remain in their home. This service is a benefit for beneficiaries under age 21.

If the beneficiary is enrolled in or receiving case management services from one of the following programs, the applicable program authorizes the PDN:

- Habilitation Supports Waiver (the Community Mental Health Services Program) and over age 21
- Home and Community-Based Services Waiver for the Elderly and Disabled (the MI Choice Waiver)

For a Medicaid beneficiary who is not receiving services from one of the above programs, the Program Review Division reviews the request for authorization and authorizes the services if the medical criteria and general eligibility requirements are met.
The Private Duty Nursing Prior Authorization – Request for Services form (MSA-0732) must be submitted when requesting PDN services for persons with Medicaid coverage. A copy of the form is provided in the Forms Appendix and is also available on the MDHHS website. (Refer to the Directory Appendix for website information.) This form is not to be used for beneficiaries enrolled in, or receiving case management services from, the Children's Waiver, Habilitation Supports Waiver, or MI Choice Waiver. Private Duty Nursing is not a benefit under CSHCS. Individuals with CSHCS coverage may be eligible for PDN under Medicaid.

For beneficiaries age 21 and older, this service is a waiver service that may be covered for qualifying individuals enrolled in the Mi Choice Waiver or the Habilitation Supports Waiver.

5.8 NURSING FACILITY [CHANGE MADE 7/1/18]

If the beneficiary requires less than acute, continuous medical care, a nursing facility (NF) may be appropriate. This includes a nursing home, medical care facility, or hospital long-term care unit. The Beneficiary Eligibility Chapter of this manual contains information about the facility admission and discharge process. (revised per bulletin MSA 17-46) (Any other alternatives for care (e.g., Home Help) may not be provided to the beneficiary while he is in the nursing facility.)

Medicaid's reimbursement (per diem rate) to a nursing facility includes non-emergency transport of beneficiaries being admitted to a nursing facility from the hospital setting.

There are necessary components for determining eligibility for Medicaid nursing facility reimbursement.

- A physician-written order for nursing facility admission is required. By renewing orders, the physician certifies the need for continuous nursing facility care. The order must be signed and dated by the physician. A stamped signature is not acceptable.
- With the exception of beneficiaries 21 years of age or under residing in a psychiatric facility, a physician (MD or DO) must approve a beneficiary's need for long-term care not more than 30 calendar days prior to the beneficiary's admission to a nursing facility.
- Verification of Medicaid financial eligibility for nursing facility care as determined by MDHHS.
- A Pre-admission Screening/Annual Resident Review (PASARR) process must be performed prior to admission to a nursing facility. The purpose of the screening is to prevent placement of beneficiaries with mental illness or intellectual disability or having a related condition into a nursing facility unless their medical needs clearly indicate that they require the level of care provided by a nursing facility. Level I screening is documented on the Preadmission Screening (PAS)/Annual Resident Review (ARR) (Mental Illness/Intellectual Disability/Related Conditions Identification) form (DCH-3877). The Level I screening is part of the hospital discharge planning process and must be completed by a registered nurse, licensed Bachelor’s or Master's Social Worker, licensed professional counselor, psychologist, physician's assistant, nurse practitioner or physician.

The PASARR process is not required when:
- An individual is admitted to an Intermediate Care Facility for Individuals with Intellectual Disabilities (ICF/IID).
An individual is admitted to, and residing in, a hospital swing bed. However, the PASARR process must be completed prior to admission if the individual transfers to a nursing facility.

A resident is readmitted to a nursing facility after a hospital stay. If the Annual Resident Review date occurs during a period of hospitalization, the screening must be completed within 30 days of admission or readmission to the nursing facility.

All individuals identified by Level I screening as possibly having a mental illness or intellectual disability or having a related condition (a "yes" response to any question on the DCH-3877) must receive a Level II evaluation, unless it is documented that they meet one of the exemption criteria outlined on the Mental Illness/Intellectual Disability/Related Condition Exemption Criteria Certification form (DCH-3878) or MDHHS/CMHSP finds that the individual does not meet the criteria for a serious mental illness under the PASARR provisions.

(Refer to the Forms Appendix for a copy of the forms.)

- A Michigan Medicaid Nursing Facility Level of Care Determination (LOCD) must be completed for every Medicaid beneficiary prior to admission to a nursing facility. The nursing facility must verify beneficiary appropriateness for nursing facility care by completing the online version of the LOCD. Beneficiaries who do not demonstrate functional/medical eligibility through the online LOCD are not eligible for nursing facility care. Refer to the Coverages portion of the Nursing Facility Chapter for additional information regarding the LOCD.

While the nursing facility is the actual entity that must complete and submit the LOCD, hospitals are encouraged to assess a beneficiary’s functional/medical eligibility for nursing facility care using a hard copy of the LOCD. A hospital may also use the Telephone Intake Guidelines. The Guidelines are also available on the MDHHS website.

5.9 SPECIAL NURSING FACILITY PLACEMENT

5.9.A. MEDICAID VENTILATOR-DEPENDENT CARE

There may be occasions when a beneficiary no longer requires acute hospital care but requires specialized care in a Ventilator Dependent Care Unit (VDCU). Medicaid authorizes admission of ventilator dependent Medicaid beneficiaries to hospital and nursing facility ventilator units with which it has agreements to provide VDCU services.

A request for placement must show that:

- The beneficiary is dependent on life-supporting mechanical ventilating equipment for at least six hours per day.
- The beneficiary stay normally meets or exceeds the hospital high-day outlier threshold for DRG 207.

Approval for admission to a VDCU will not be given for a beneficiary who is only on CPAP or BIPAP.
If a beneficiary has weaning potential or requires other rehabilitative services (in addition to the respiratory care) and is enrolled in a Medicaid Health Plan (MHP), the MHP is responsible for the first 45 days reimbursement in the post-acute setting. If there is no weaning potential and the beneficiary does not require rehabilitative services, disenrollment from the MHP may occur at the time the beneficiary is discharged from the hospital.

In situations where a beneficiary cannot immediately be placed in a nursing facility or hospital VDCU, Medicaid will cover nursing days in the inpatient hospital. The hospital cannot charge a beneficiary the difference between the hospital's charge and the MDHHS payment for nursing days.

When the beneficiary is in the hospital setting because a nursing facility placement is not available, Medicaid will cover the ancillary services provided by the hospital.

If a beneficiary refuses an appropriate placement to a VDCU, the beneficiary is responsible for all hospital charges incurred after the date of referral.

To begin the prior authorization process once a VDCU has agreed to accept the beneficiary, the hospital discharge planner must provide the following documentation to the VDCU:

- History and physical from the current hospital admission;
- All consults from the current hospital admission;
- Any labs, diagnostic testing or procedures pertaining to or impacting the beneficiary's respiratory status; and
- Two to three days of current ventilator flow sheets.

For status of the authorization, the hospital discharge planner should contact the VDCU. The VDCU will initiate the actual prior authorization with Medicaid.

5.9.B. COMPLEX CARE

The Complex Care Prior Approval-Request/Authorization for Nursing Facilities form (MSA-1576) is used to request prior approval (PA) for the placement of a Medicaid beneficiary for whom placement from a hospital has been, or could be, hindered due to the cost and/or complexity of nursing care or special needs. Prior authorization covers an individually negotiated reimbursement rate for the placement. Special individualized placement requests and payment arrangements are based on medical necessity and/or service/supply needs exceeding those covered by Medicaid reimbursement for routine nursing facility care.
Examples include, but are not limited to:

- Ventilator dependent care (for nursing facilities not contracted with MDHHS to provide ventilator dependent care)
- Multiple skin decubiti utilizing several treatment modalities
- Tracheostomy with frequent suctioning needs
- Beneficiaries who require intensive nursing care or treatment

Program requirements:

- Referrals must come from the nursing facility.
- Hospitals must document that at least ten (10) Medicaid certified nursing facilities within a 50 mile radius of the hospital refused to admit the beneficiary due to the complexity of the patient’s care needs.

If it appears that a beneficiary, upon discharge, will require intensive nursing care, the hospital's discharge planning coordinator should initiate nursing facility contact as early in the beneficiary's hospital stay as possible to ensure a smooth transition to the nursing facility.

5.10 DIAPERS FOR HOME USE

The hospital should contact the Volume Purchase Contract vendor to determine if the beneficiary is currently receiving diapers through the Volume Purchase Contract. (Refer to the Directory Appendix for contact information.) If so, then no further action is required.

For beneficiaries who are not currently receiving diapers, the hospital must obtain a complete physician prescription. The hospital must fax the complete prescription to the contract vendor no later than 72 hours prior to discharge. A complete prescription must include:

- Medical diagnosis of condition causing incontinence (primary and secondary diagnosis)
- Specific type of diaper to be dispensed
- Duration of need
- Quantity of diapers needed for the first 30 days after discharge
- Required beneficiary information:
  - Full name
  - Medicaid and Medicare identification numbers
  - Full home address, including city, state and zip code
  - Home phone number
  - Name and phone number of contact person other than beneficiary to ensure delivery if beneficiary is not present
Diapers are covered for individuals age three and older if the following criteria are both met:

- Beneficiary has a medical condition resulting in incontinence and has failed to respond to a bowel/bladder training program; and
- The medical condition being treated results in incontinence, and the beneficiary would not benefit from a bowel/bladder training program.
HOSPITAL REIMBURSEMENT APPENDIX

SECTION 1 - OUTPATIENT

Reimbursement to outpatient hospitals, including off-campus satellite clinics, hospital-owned ambulance services, freestanding dialysis centers (ESRDs), comprehensive outpatient rehabilitation facilities (CORFs), and rehabilitation agencies for outpatient services is made in accordance with Medicaid’s Outpatient Prospective Payment System (OPPS). No facilities (i.e. critical access or children’s hospitals) are excluded from Medicaid’s Ambulatory Payment Classification reimbursement methodology. Payment made under OPPS is calculated utilizing current Medicare rates, with a MDHHS reduction factor applied, unless otherwise noted in this section.

Reimbursement for outpatient hospital services will be monitored and adjustments will be made to the MDHHS reduction factor, as necessary, to ensure spending limits fall within the MDHHS appropriation. A wage index of 1.0 is applied for all hospitals. Medicare’s APC weights are utilized. Services reimbursed at a percent of charges are paid a percentage of the individual hospital’s charges for the service (i.e., pass-through payments). Updates of hospitals’ cost-to-charge ratios are done in conjunction with updates to the inpatient operating ratios. The default cost-to-charge ratio is the average statewide outpatient cost-to-charge ratio for out-of-state ratios.

1.1 AMBULATORY PAYMENT CLASSIFICATION REIMBURSEMENT METHODOLOGY

The main payment methodology for the OPPS is the APC which is used by Medicare.

1.2 OUTPATIENT CODE EDITOR WITH AMBULATORY PAYMENT CLASSIFICATION

MDHHS uses Medicare’s Outpatient Code Editor (OCE), including Medicaid National Correct Coding Initiative (NCCI), editing. Per Federal Regulations, the MDHHS OPPS uses Medicaid NCCI and MUE values for OPH claims processing. Medicaid NCCI and MUE values are reviewed with the quarterly file updates. The OCE is updated quarterly. The two main functions of the OCE are to identify errors and to assign APCs. In addition, the software performs the following functions when processing a claim:

- Edits a claim for accuracy of the submitted date;
- Assigns payment indicators;
- Determines if packaging is applicable;
- Determines the disposition of a claim based on generated edits;
- Computes discounts and outliers, if applicable;
- Determines payment adjustment, if applicable.

MDHHS uses proprietary edits that are not duplicated by the OCE to review beneficiary and provider eligibility, third party liability, quantity/frequency of services, diagnosis, and other information normally reviewed by the fiscal intermediary under the Medicare OPPS.
1.3 STATUS INDICATORS

MDHHS follows Medicare's single character status indicator assigned to each individual CPT or HCPCS code to identify if a code will be paid and how it will be paid.

For categories of codes that MDHHS covers differently than Medicare under its OPPS (wraparound codes), the following alpha-numeric status indicators are used.

**MDHHS Specific Status Indicators**

<table>
<thead>
<tr>
<th>Status Indicator</th>
<th>Description</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>A1</td>
<td>MDHHS covered</td>
<td></td>
</tr>
<tr>
<td>A2</td>
<td>Series-billed dialysis service (revenue codes 82x, 83x, 84x, 85x)</td>
<td>Paid based on associated MDHHS fee schedule</td>
</tr>
<tr>
<td>A3</td>
<td>Hospital-owned ambulance services</td>
<td>Paid based on associated MDHHS fee schedule</td>
</tr>
<tr>
<td>A4</td>
<td>Non-Medicare covered services (e.g., family planning, dental, sterilization, abortion, etc.)</td>
<td>Paid based on associated MDHHS fee schedule</td>
</tr>
<tr>
<td>A5</td>
<td>Non-Medicare covered adult vaccines</td>
<td>Paid based on associated MDHHS fee schedule</td>
</tr>
<tr>
<td>A6</td>
<td>Vaccines For Children</td>
<td>Zero payment; Vaccines For Children (VFC) program</td>
</tr>
<tr>

<td>R1</td>
<td>MDHHS non-allowed item or service (e.g., aquatic therapy, infertility services, etc.)</td>
<td>Items, codes, and services that are not covered by MDHHS</td>
</tr>
</tbody>
</table>

1.4 PACKAGED/ BUNDLED SERVICES

MDHHS follows Medicare guidelines for packaged/bundled service costs. Services having a status indicator of "N" are considered packaged or bundled into other services. The costs of these services are allocated to the APC but are not paid separately.

Reimbursement to hospitals for outpatient services is made in accordance with Medicaid's maximum fee screens, the hospital's usual and customary (U&C) charges, or Medicare's reasonable costs, whichever is less.
1.5 PAYMENT CALCULATION

Payments made under the MDHHS OPPS methodology are calculated utilizing the current Medicare conversion factors/rates with an MDHHS reduction factor (RF) applied to the calculated payment (Medicare fee x RF = Medicaid fee).

The MDHHS payment is the lesser of:

- the Medicaid fee screen/allowable amount, minus any Medicare or other insurance payments, and any applicable Medicaid copayment, patient-pay, and/or deductible; or
- (for fee schedule items) the provider’s charge, reduced by any contractual adjustments, minus any Medicare or other insurance payments, and any applicable Medicaid copayment, patient-pay, or deductible amount; or
- the beneficiary’s liability for coinsurance, copayments, and/or deductibles.

For claims when a provider bills charges less than the OPPS/APC amount for non-fee schedule items, the MDHHS payment liability is the APC amount minus any Medicare or other insurance payments up to the coinsurance, copayment, and/or deductible amount reported.

Additional billing and reimbursement information is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

1.6 DISCOUNTED PROCEDURES

MDHHS follows Medicare rules for discounting payment for multiple, bilateral or discontinued procedures (OPPS status indicator “T”).

1.7 OUTLIER PAYMENTS

MDHHS follows Medicare’s APC outlier payment policy. The MDHHS reduction factor is not applied to outlier payments.

1.8 SERVICES PAID A PERCENT OF CHARGES

Services that are paid a percent of charges are paid at a percentage of the hospital’s charges for that service (e.g., pass-through payments). Each hospital’s current Medicaid outpatient cost-to-charge ratio is used for the initial OPPS implementation. Updates of the outpatient cost-to-charge ratios are done in step with inpatient operating ratio updates. For out-of-state hospitals, the default cost-to-charge ratio is the average statewide outpatient cost-to-charge ratio. The MDHHS reduction factor is not applied to services paid a percent of charge.

1.9 PASS-THROUGH PAYMENTS

Pass-through payments are generally for new drugs, biologicals, radiopharmaceutical agents, and medical devices. Drugs and devices having a status indicator of “G” or “H” receive a pass-through payment. In some instances, the procedure code may have an APC code assigned. The MDHHS reduction factor is not applied to drugs or devices with a status indicator of “H”.
1.10 Fee Schedules

MDHHS utilizes Medicare fee schedules with the MDHHS reduction factor applied, except as described above.
SECTION 2 - INPATIENT

2.1 SERVICES INCLUDED IN THE INPATIENT PAYMENT

The following services are included in the inpatient payment:

- All routine services (e.g., room and board, nursing).
- All diagnostic/ancillary services (e.g., radiology, pharmacy, therapists, supplies, pathology).
- While a patient is in the inpatient setting, the facility charges for any services performed by persons or entities other than the patient's hospital (e.g., an independent lab, a second hospital where no transfer occurs) are covered in the payment to the patient's hospital and must not be billed separately. All charges must be included on the inpatient claim of the patient's hospital. Any payments due to the second party are the responsibility of the patient's hospital.
- All pathology services that are performed by the pathologist but do not directly relate to the specific patient's care.
- All emergency room services provided by the hospital that result in an inpatient admission to that hospital. All charges must be included on the inpatient claim.
- An orthosis or prosthesis that is required for inpatient treatment, a surgical postoperative procedure or as a routine service of the hospital should be included as a supply on the inpatient claim and is reimbursed under the appropriate DRG.

Examples of items that are included in the inpatient payment are:

- Pacemakers
- Hip replacements
- Made-to-measure braces for compression fractures
- Compression stockings (TED, Jobst)
- Halos
- Immediate post-surgical or early fitting of prosthetic devices, etc.

2.2 SERVICES EXCLUDED FROM THE INPATIENT PAYMENT

The following services are excluded in the inpatient payment:

- An orthosis or prosthesis that is required for rehabilitation and will be utilized after discharge, and/or is required to address a long term, lifetime, permanent need. An orthotist/prosthetist must bill these items separately to Medicaid. Prior authorization (PA) must first be obtained for appropriate procedure codes.
- Except as noted above, outpatient services may not be separately billed while a beneficiary is in the inpatient setting. All charges must be included on the inpatient claim.
Any services that are covered by Medicaid and excluded from the inpatient payment may be separately billed if the provider of the service is properly enrolled in the program and a claim is submitted appropriately.

The following are examples of services excluded from the inpatient payment. This list may not be all-inclusive:

- Anatomic pathology services provided directly by a pathologist.
- Orthoses/prostheses required for rehabilitation that will be utilized after discharge, and/or are required to address a long term, lifetime, permanent need. Additional examples of items that are excluded from the inpatient payment are a knee-ankle-foot orthosis or an ankle-foot orthosis.
- Professional services (e.g., practitioner, dental, podiatric, optometric).
- Services provided by a certified nurse midwife (CNM).
- Services provided by a certified registered nurse anesthetist (CRNA).
- Ambulance services.

2.3 All Patient Refined Diagnosis Related Grouper System

Effective for inpatient discharges on or after October 1, 2015, the Medicaid diagnosis related grouper (DRG) reimbursement system uses the All Patient Refined Diagnosis Related Grouper (APR-DRG) system. The following sections apply to the APR-DRG reimbursement system.

2.3.A. Reimbursement for Medical and Surgical Hospitals

2.3.A.1. Description of Medical/Surgical Episode File

The episode file is comprised of the underlying data used to calculate the statewide rate, relative weights, and alternate weights. The costs associated with episodes from the episode file are standardized as described below. The episode file is comprised of two years of Medicaid and Children's Special Health Care Services fee for service (FFS) paid claims and managed care encounters.

Each claim or encounter from the episode file is assigned a DRG value using the APR-DRG Grouper in effect nationally on October 1 of the applicable rate year. The data are adjusted to:

- Eliminate episodes for dual Medicare/Medicaid eligible beneficiaries, unless paid a full Medicaid DRG.
- Eliminate certain transplants and low day outlier episodes assigned to DRGs reimbursed by multiplying a hospital's operating cost-to-charge ratio by charges.
- Eliminate episodes without any charges or days.
- Assign alternate weights for neonatal services. Two sets of weights are calculated for the DRG classifications representing neonatal services (DRGs 580x-640x). These alternate weights are calculated based on episodes that are assigned to one of these DRGs and include charges for services in a Neonatal Intensive Care Unit (NICU). The
remaining claims assigned to these DRGs are used for the base weights. No other alternate weights are assigned.

- Limit episodes to those from Michigan hospitals, including hospitals that are no longer in operation (provided that hospital cost report data is available).
- Limit episodes to those with a valid discharge status.
- Eliminate episodes with a zero dollar Medicaid liability.
- Eliminate episodes that qualify for the Short Hospital Stay rate.
- Determine the low day trim point and average length of stay. (Refer to the Relative Weights section of the Reimbursement for Medical/Surgical Hospitals section of the State Plan for additional information.)
- Limit episodes ending in a transfer to another acute setting to those whose length of stay was at least equal to the published average length of stay for the DRG. (Since DRGs 580x and 581x are transfer DRGs, all transfer costs are included within those DRGs).
- Inflate the first year of episodes to the second year through application of an inflation factor derived from IHS Global Insight.
- Recognize area cost differences by dividing the charges for each hospital by an area wage index. (Refer to the Area Wage Index section of the Reimbursement for Medical/Surgical Hospitals section of the State Plan for additional information regarding the area wage index.)
- Adjust charges for high cost outliers to remove the amount paid as an outlier. (Refer to the High Cost Outlier section of the Reimbursement for Medical/Surgical Hospitals section of the State Plan for additional information regarding cost outliers.)
- The adjusted cost for each episode is calculated by multiplying the adjusted charges for the episode by the inpatient operating cost-to-charge ratio. (Refer to the Cost-to-Charge Ratio section of the Reimbursement for Medical/Surgical Hospitals section of the State Plan for additional information regarding cost-to-charge ratios.)

### 2.3.A.2. STATEWIDE DRG RATES

Two statewide medical/surgical hospital DRG rates are developed by the state using the Episode File. For hospital DRG rate setting purposes, the medical/surgical Episode File is limited to those hospitals enrolled with the state as of October 1 of the applicable rate year. Two separate statewide rates are developed: one rate is developed for prospective payment system (PPS) hospitals and another rate is developed for hospitals designated as critical access by CMS as of October 1 of the applicable rate year. In the event a hospital status changes from PPS to critical access hospital (CAH), the state recognizes the hospital under CAH status as of the CMS effective date. The reverse is also true. If a hospital status changes from CAH to PPS, the state recognizes the hospital under PPS status as of the CMS effective date. Statewide rates are updated annually on October 1.

A budget neutrality factor is included in the hospital price calculation. Hospital prices are reduced by the percentage necessary so that total aggregate hospital payments using the new hospital prices and DRG relative weights do not exceed the total aggregate...
hospital payments made using the prior hospital base period data and DRG Grouper relative weights. The estimate is based on one year’s paid claims, including MHP encounter data with FFS rates applied. The calculated DRG prices are deflated by the percentage necessary for the total payments to equate to the amount paid prior to the change. Budget neutrality for CAHs is determined as a group, independent of PPS.

Hospitals' final DRG rates are calculated as follows:

- The case mix is calculated using the sum of all relative weights assigned to each hospital’s claims during the base period, divided by the total number of episodes for the hospital during the same period.
- The case mix index adjusted cost for each hospital is summed.
- A hospital-specific standardized cost per discharge is computed.
  - Divide total adjusted costs by the total number of episodes.
  - Divide average costs by the case mix.
  - Multiply the result by the applicable inflation factor to bring costs to a common point in time. Costs are inflated through the rate period. For example, for FY 2015 rates, costs are inflated through September 30, 2016. Inflation factors are obtained from IHS Global Insight.
- The statewide rate per discharge is the weighted mean of all hospital-specific standardized costs.
- The statewide rate is adjusted by an Area Wage Index and Budget Neutrality Factor to determine the hospital’s final DRG rate.

In developing the statewide DRG rate, the following data and calculations are used for each hospital:

1) Hospital's adjusted charges;
2) Inpatient cost-to-charge ratio;
3) Hospital's adjusted costs (line 1 x line 2);
4) Hospital's episodes;
5) Cost per discharge (line 3/line 4);
6) Hospital's case mix;
7) Standardized cost per discharge (line 5/line 6);
8) Establish statewide rate as weighted standardized cost per discharge ((∑line 7 x line 4)/∑ line 4);
9) Hospital's Area Wage Index;
10) Apply budget neutrality factor; and
11) Hospital's final DRG rate (line 8 x line 9 x line 10). The DRG rate is rounded to the nearest whole dollar amount.
The statewide rates are listed on the MDHHS website. (Refer to the Directory Appendix for website information.)

2.3.A.3. APR-DRG RELATIVE WEIGHTS

Michigan-specific relative weights are developed utilizing the adjusted costs from the Episode File. The average cost for episodes within each DRG is calculated by dividing the sum of the costs for the episodes by the number of episodes within the DRG. The relative weight for each DRG is calculated by dividing the average cost for episodes within each DRG by the average cost per episode for all episodes. A table showing the relative weights, average lengths of stay, and low day outlier threshold for each DRG is available on the MDHHS website. (Refer to the Directory Appendix for website information.) Relative weights are updated annually on October 1.

The state establishes alternate weights for neonatal services from episodes that are assigned to one of the DRGs in the following range: 580x-640x. These weights are utilized for services rendered in a NICU. The remaining claims assigned to these DRGs are used for the base weights (non-alternate weights). No other alternate weights are assigned.

To ensure each relative weight adequately reflects resource utilization for a particular DRG in the state, the state requires that each DRG have a minimum of 10 episodes. If a DRG does not have at least 10 episodes, an alternative solution is applied as follows:

State-Specific Relative Weight Methodology:

- If the episode count for a DRG is 10 or more, use the relative weight setting methodology outlined. Otherwise:
  - For severity levels 1 through 3 where the targeted severity level is equal to n:
    - If the episode count for the next greater severity level is 10 or more, the following calculation is completed: \((\text{MI DRG Severity}_{n+1} \text{ Relative Weight}) \times (\text{National DRG Severity}_n \text{ Relative Weight}) / (\text{National DRG Severity}_{n+1} \text{ Relative Weight}) = (\text{MI Relative Weight Factor}_n)\)
    - Otherwise, \((\text{National DRG Severity}_n \text{ Relative Weight}) \times (\text{MI Case Mix Factor}_n)\)
  - For severity level 4:
    - If the episode count for the prior severity level is 10 or more, the following calculation is completed: \((\text{MI DRG Severity}_{n-1} \text{ Relative Weight}) \times (\text{National DRG Severity}_n \text{ Relative Weight}) / (\text{National DRG Severity}_{n-1} \text{ Relative Weight}) = (\text{MI Relative Weight Factor}_n)\)
    - Otherwise, \((\text{National DRG Severity}_n \text{ Relative Weight}) \times (\text{MI Case Mix Factor}_n)\)
  - Where:
    - \((\text{MI Case Mix Factor}_n) = \text{sum of Michigan specific relative weights multiplied by the number of episodes if the number of episodes is 10 or more divided by the sum of National relative weights multiplied by the number of episodes if the number of episodes is 10 or more.}\)
(MI Alternate Weight Case Mix Factor) = Average of (MI Alternate Weight DRG Severity) / (MI DRG Severity Relative Weight) for DRGs with an episode count of 10 or more.

- Further adjustments are necessary if the resulting adjustment described above is inconsistent with Michigan or National trends and data.
  - Example 1: If an episode count is between 10 and 20 and the alternate weight would be less than the standard relative weight, but other severity levels are not consistent with this, then apply the next severity level imputing method.
  - Example 2: If the episode count is between 10 and 20, the state may consider using the Alternate Weight Case Mix Factor applied to the National Alternate Weight if the alternate weight is not consistent with other severity levels of the same DRG.
  - All relative weights are subject to reasonableness testing.

Relative Weight Trim Points:

The following trim points are established for the relative weighting system.

- The low day trim point is used to determine whether an episode qualifies for a low day outlier and is established as follows.
  - If the episode count for a DRG is 10 or more, the low day trim point is set to the 3rd percentile of the length of stay for the DRG.
  - If the episode count for a DRG is less than 10, the low day trim point is set to the lesser of national low day trim point or 3rd percentile of length of stay for the DRG.
  - If the episode count for a DRG is zero, the low day threshold is set to the national low day trim point for the DRG.

- The average length of stay (ALOS) is used to price claims episodes involving a transfer from a hospital and is established as follows.
  - If the episode count for a DRG is 10 or more, set the ALOS to the simple average length of stay for the DRG.
  - If the episode count for a DRG is less than 10, set the ALOS to the lesser of national ALOS or the simple average length of stay for the DRG.
  - If the episode count for a DRG is zero, set the ALOS to the national ALOS.

2.3.A.4. AREA WAGE INDEX

The area wage index described in this section is used to determine adjusted hospital costs as described in the Episode File section. In addition, it is used to adjust the statewide rate to recognize variances in area labor costs.

To calculate each hospital’s area wage index, two years of Medicare-audited wage data, as published in the Medicare Inpatient Prospective Payment System (IPPS) Final Rule, are obtained for the most recent available hospital fiscal years. Contract labor costs, as defined by Medicare, are included in determining a hospital's wage costs. Hospitals are
grouped by U.S. Census Core Based Statistical Areas (CBSAs) as determined by CMS for the Medicare program. Consistent with CMS, the cost report references are obtained from the Medicare Provider Manual, Worksheet S3, Part 3, Line 6 for wages and hours.

The following calculations are completed:

- Each hospital's wage costs are brought to a common point in time by multiplying the hospital's fiscal year end costs by inflation factors derived from IHS Global Insight and weighting factors.
- For hospitals with cost reporting periods ending other than the end of a quarter, the inflation update for the quarter in which the hospital's fiscal year ends is used.
- The cost reports do not differentiate salaries/hours by unit type.
- The wage adjustor is based on a two-year moving average with the most recent year weighted at 60 percent and the second year weighted at 40 percent.
- If two or more hospitals merge and are operating as a single hospital, salary and wages are computed using the combined cost report data from all hospitals involved in the merger. Salary data is inflated to a common point in time.
- The average wage for each CBSA is calculated with and without hospital reclassifications:
  a) The average wage for each CBSA without reclassifications is determined. The statewide average wage for all hospitals in the state is calculated. Using these data, CBSA-specific area wage indices are calculated by dividing the average wage for the CBSA by the statewide average wage. This quotient is area wage index A.
  b) The average wage for each CBSA with reclassifications is determined. Using these data and the statewide average wage for all hospitals in the state, CBSA-specific area wage indices are calculated by dividing the average wage for the CBSA by the statewide average wage. This quotient is area wage index B.
- For hospitals that did not reclassify:
  - If area wage index A is greater than one percent variation from its area wage index B, area wage index A will be used. Otherwise, area wage index B will be used.
- For hospitals that reclassified, area wage index B will be used.
- The state will apply a rural floor whereby no hospital will have an area wage index less than the rural index.

Only the labor share of the statewide rate is adjusted by the area wage index using the following formula:

\[
\text{Medical/Surgical Area Wage Index Adjusted Rate} = 0.70 \times \text{Area Wage Index} + 0.30
\]

2.3.A.5. COST-TO-CHARGE RATIO

The operating cost-to-charge ratios described in this section are used to determine adjusted hospital costs as described in the Episode File section. In addition, they are used to reimburse hospitals for transplant services, cost outliers and low-day outliers.
The operating cost-to-charge ratios are updated annually on October 1 by rolling the data forward by one year.

The most recent two years of cost report data for hospitals are used to calculate hospital-specific operating cost-to-charge ratios. For example, for the one year rate that begins on October 1, 2015, data from cost reports with fiscal years ending between October 1, 2011 and September 30, 2013 are used. Data for the most recent year are weighted at 60 percent while data for the second previous year are weighted at 40 percent. Costs and charges for both FFS and managed care are combined so that a weighted operating cost-to-charge ratio is developed. Cost and charge data are inflated to a common point in time using inflation factors from IHS Global Insight. The cost-to-charge ratio will not exceed 1.0.

If two or more hospitals merge and are operating as a single hospital, a cost-to-charge ratio for the period is computed using the combined cost report data from all hospitals involved in the merger.

The operating cost-to-charge ratios are published on the MDHHS website. (Refer to the Directory Appendix for website information.)

2.3.A.6. SPECIAL CIRCUMSTANCES

Normal reimbursement for a medical/surgical inpatient hospital stay is equal to the applicable statewide rate multiplied by the DRG weight. However, for the following special circumstances, different reimbursement methodologies apply.

| High Cost Outliers | For unusually high cost stays, the State will use a special reimbursement methodology. 
An episode is a high cost outlier when costs (charges X the hospital’s operating cost-to-charge ratio) exceed the computed cost threshold. Transplant claims cannot qualify as a high cost outlier.
Reimbursement for cost outliers is dependent upon the cost threshold.
The cost threshold is the greater of:
- 2 x Hospital DRG Rate x Relative Weight (twice the regular payment for a transfer paid on a per day basis for episodes getting less than a full DRG);
or
- $35,000.
Cost outliers are reimbursed according to the following formula:
(Hospital DRG Rate x Relative Weight) + [(Charges x Operating Cost-to-Charge Ratio) - (Cost Threshold)] x 85 percent) = Reimbursement for Cost Outlier Claim |
| Low Day Outliers | For services where the length of stay is less than the published low day threshold, reimbursement is charges multiplied by the individual hospital’s operating cost-to-charge ratio, not to exceed the full DRG payment. The specific low day outlier threshold for each DRG is listed on the MDHHS website. (Refer to the Directory Appendix for website information.) |
### Transfers

Payment to a hospital that receives a patient as a transfer from another inpatient hospital differs depending on whether the patient is discharged or is subsequently transferred again.

- **Payment to the Transferring Hospital**
  
  Except in the cases where the DRG is defined as a transfer of a patient (for which a full DRG payment is made, plus an outlier payment, if appropriate) the transferring hospital is paid a DRG daily rate for each day of the patient's stay, not to exceed the appropriate full DRG payment, plus an outlier payment, if appropriate.

- **Payment to the Receiving Hospital**
  
  If the patient is discharged, the receiving hospital is paid the full DRG payment, plus an outlier payment if appropriate.

  Reimbursement is based on discharge in the following situations. If the patient:
  
  - Is formally released from the hospital, or
  - Is transferred to home health services, or
  - Dies while hospitalized, or
  - Leaves the hospital against medical advice, or
  - Is transferred to a long-term care facility.

If the patient is transferred again, the hospital is paid as a transferring hospital.

### Readmissions

Readmissions within 15 days for a related condition, whether to the same or a different hospital, are considered a part of a single episode for payment purposes.

If the readmission is to a different hospital, full payment is made to the second hospital. The first hospital's payment is reduced by the amount paid to the second hospital. The first hospital's payment is never less than zero for the episode.

Readmissions for an unrelated condition, whether to the same or a different hospital, are considered separate episodes for payment purposes.
Transplant Services are paid using the following formula:

\[
\text{Hospital Charges} \times \text{Hospital Operating Cost-to-Charge Ratio} = \text{Hospital Payment}
\]

Transplant services are defined as claims which fall under the following DRGs:

<table>
<thead>
<tr>
<th>DRG</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>001x</td>
<td>Liver Transplant and/or Intestinal Transplant</td>
</tr>
<tr>
<td>002x</td>
<td>Heart and/or Lung Transplant</td>
</tr>
<tr>
<td>006x</td>
<td>Pancreas Transplant</td>
</tr>
<tr>
<td>440x</td>
<td>Kidney Transplant</td>
</tr>
</tbody>
</table>

Organ acquisition within these DRGs is billed at acquisition cost and is reimbursed at 100% of acquisition cost.

Hospitals Outside Michigan

Medical/surgical hospitals not located in Michigan are reimbursed under the DRG system. The DRG price is the statewide rate multiplied by an area wage index of 1.0. All other reimbursement policies apply.

Hospitals that have charges that exceed $250,000 during a single fiscal year (using the State of Michigan fiscal year – October 1st through September 30th) may be reimbursed the hospital’s inpatient operating cost to charge ratio for those Michigan Medicaid DRGs reimbursed by percentage of charge. The hospital’s chief financial officer must submit, and the MSA must accept, documentation stating the hospital’s Medicaid cost to charge ratio in the state that the hospital is located. Once accepted, the hospital’s actual cost to charge ratio is applied prospectively to those DRGs and claims subject to percentage of charge reimbursement using the Michigan DRG payment system.

New Hospitals

A new medical/surgical hospital is one for which no Michigan Medicaid program cost or paid claims data exists during the period used to establish hospital rates or one which was not enrolled in the Medicaid program when hospital rates were last established. Hospitals that experience a change of ownership or that are created as the result of a merger are not considered new hospitals.

The DRG rate for new general hospitals is the statewide rate multiplied by the applicable area wage index.

2.3.B. Reimbursement for Long Term Acute Care Hospitals (LTACHs) and Freestanding Rehabilitation Hospitals/Distinct Part Rehabilitation Units

Episodes of care for LTACHs and Freestanding Rehabilitation Hospitals/Distinct Part Rehabilitation Units will be reimbursed using a statewide per diem rate.
2.3.B.1. DESCRIPTION OF LTACH AND FREESTANDING REHABILITATION HOSPITALS/ DISTINCT PART REHABILITATION UNITS EPISODE FILE

The episode file is comprised of the underlying data used to calculate the statewide per diem rates. The costs associated with episodes from the episode file are standardized as described below. The episode file is comprised of two years of Medicaid and Children’s Special Health Care Services FFS paid claims and managed care encounters.

The data is adjusted to:

- Eliminate episodes with any Medicare charges. (For dual Medicare/Medicaid eligible beneficiaries, only claims paid a full Medicaid payment are included.)
- Eliminate episodes without any charges or days.
- Eliminate episodes with a zero dollar Medicaid liability.
- Limit episodes to those from Michigan hospitals (provided that hospital cost report data is available).
- Limit episodes to those with a valid discharge status.

Total charges and days paid are summed by hospital.

The cost for each hospital is calculated by multiplying the charges for the hospital by the operating cost-to-charge ratio for the hospital. (Refer to the Cost-to-Charge section of the Reimbursement for Medical/Surgical Hospitals section of the State Plan for additional information.)

The cost per day by hospital is calculated by dividing the sum of the costs by the number of days for the hospital. To determine a statewide per diem base rate:

- Multiply the result by the applicable inflation factor to bring costs to a common point in time. Costs are inflated through the rate period. For example, for FY 2015 rates, costs are inflated through September 30, 2016. Inflation factors are obtained from IHS Global Insight.
- Recognize area cost differences by dividing the costs for each hospital by an area wage index. (Refer to the Area Wage Index section of the Reimbursement for Medical/Surgical Hospitals section of the State Plan for additional information.)
- Calculate the statewide operating rate (by provider type). A separate operating rate will be calculated for LTACHs and for Freestanding Rehabilitation Hospitals/Distinct Part Rehabilitation Units. This is a weighted mean of all hospitals’ individual rates.
- The per diem rate for each provider type is the weighted mean adjusted by the area wage index specific to the hospital.
2.3.B.2. LTACH AND FREESTANDING REHABILITATION HOSPITALS/ DISTINCT PART REHABILITATION UNITS OUTSIDE OF MICHIGAN

LTACHS, freestanding rehabilitation hospitals, and distinct part rehabilitation units not located in Michigan are reimbursed using the per diem rate applicable to their provider type.

2.3.B.3. NEW LTACHS, FREESTANDING REHABILITATION HOSPITALS, AND DISTINCT PART REHABILITATION UNITS

If a hospital at least doubles the number of licensed beds in its distinct part unit and the number of licensed beds in the units increases by at least 20, the entire unit is treated as a new distinct part unit for determining the per diem rate. In order for this provision to apply, the hospital must request, in writing, that the unit is treated as a new unit. The new unit rate will become effective on the date that the number of licensed beds doubles and the increase is at least 20 beds, or the date on which the request is received by MSA, whichever is later.

New LTACHs, freestanding hospitals, and distinct part units are reimbursed using the per diem rate applicable to their provider type.

2.3.C. FREQUENCY OF UPDATES

The State will update area wage index, cost to charge ratio, relative weights, APR-DRG grouper, DRG rates, and per diem rates on an annual basis.

2.3.D. MERGERS

2.3.D.1. GENERAL HOSPITALS

In the event of a merger between two or more hospitals, the DRG rate for the surviving hospital will be computed as follows:

- The statewide rate will be adjusted by applicable area wage index.
- The cost to charge ratios of the hospitals will be combined to create a new cost to charge ratio.

2.3.D.2. LTACHS, FREESTANDING PSYCHIATRIC AND REHABILITATION HOSPITALS/ DISTINCT PART PSYCHIATRIC AND REHABILITATION UNITS

In the event of a merger between two or more hospitals, the resulting per diem rate for the surviving hospital will be computed as follows:

- The statewide rate will be adjusted by applicable area wage index.
- The cost to charge ratio of the hospitals will be combined to create a new cost to charge ratio.
2.4 Medicare Severity Diagnosis Related Grouper Assignment

For inpatient discharges before October 1, 2015, the Medicaid diagnosis related grouper reimbursement system uses the same Grouper logic that the Medicare Program uses to assign DRGs to claims. However, because Michigan Medicaid develops its own weights and prices based on its own paid claims, Medicaid may not use the same version of the Grouper program as Medicare is currently using. The following sections contain information that applies to the MS-DRG reimbursement system.

Michigan Medicaid includes alternate weights for DRGs 789 through 794. These weights are used for neonatal intensive care services provided in hospitals with specially designated units approved for the alternate weight payments by MDHHS. In order to receive the alternate weights, a hospital must have a Certificate of Need (CON) to operate a NICU or a special newborn nursery unit (SNNU), or the hospital must have previously received alternate weight reimbursement by Medicaid for its SNNU.

Michigan Medicaid will adjust DRGs that were age categorized prior to Grouper 25.0 by including alternate weights using the following criteria to establish consistency.

Criteria for Creating a Pediatric Alternate Weight:

- A significant difference in average cost exists between the pediatric and the adult populations; and
- A significant difference in average cost exists between the pediatric population and the DRG average; and
- A significant volume of data are available; and
- A significant change in weight occurs due to the application of alternate weight status; and
- The conditions above hold true for all severity levels of DRG.

Additional consideration is applied to DRGs meeting four of the five criteria above that contained a prior division for the pediatric population.

The following base DRGs and corresponding severity levels will have an alternate weight assignment for patients age 0-17 upon admission based on the above criteria.

<table>

A Grouper implementation schedule appears on the MDHHS website. (Refer to the Directory Appendix for website information.) The schedule indicates the current Grouper and recent past Groupers that are used to assign DRGs to claims. There is also a spreadsheet posted on the MDHHS website for each DRG Grouper that includes all DRGs included within the Grouper, a description of each DRG, the DRG's relative weight, its average length of stay, and low- and high-day outlier thresholds.

Inpatient services are reimbursed based on the rates and Grouper Version in effect on the patient’s date of discharge.

**2.4.A. INFLATION**

Unless otherwise indicated, inflation rates are computed from the Global Insight PPS-Type Hospital Market Basket Index. Wage adjustor inflation rates are derived from the employee cost component of the Global Insight PPS-Type Hospital Market Basket Index. Updates are quarterly for the base year and annually for nonbase years. For hospitals with base year cost reporting periods ending other than the end of the quarter, the inflation update for the quarter in which the hospital’s fiscal year ends is used.

**2.4.B. MS-DRG RELATIVE WEIGHTS**

<table>
<thead>
<tr>
<th>Statewide Relative Weights</th>
<th>A statewide relative weight is assigned to each DRG representing covered services.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Basis for DRG Assignment</td>
<td>DRG assignment is based on the diagnosis and surgical procedure codes included on the inpatient claim. Hospitals should use as many diagnosis and surgical procedure codes as necessary to accurately reflect the patient's condition during the hospitalization.</td>
</tr>
<tr>
<td>Calculation of the Average Cost Per Episode</td>
<td>The average cost for episodes within each DRG is calculated by dividing the sum of the costs of the episodes by the number of episodes within the DRG.</td>
</tr>
<tr>
<td>Calculation of Relative Weights</td>
<td>The relative weight for each DRG is calculated by dividing the average cost for episodes within each DRG by the average cost per episode for all episodes.</td>
</tr>
</tbody>
</table>
The statewide relative weights calculated for the Michigan system utilize Medicaid and Children’s Special Health Care Services (CSHCS) FFS and MHP encounter inpatient claims for admissions during two consecutive state fiscal years and hospital specific cost report data drawn from two consecutive cost report years used to establish the relative weights.

2.4.C. EPISODE FILE

The episode file is assigned DRG values using the appropriate Grouper and is adjusted to:

- Combine multiple billings for the same episode of service including:
  - Invoices for a single episode of service billed as a transfer from a hospital and an admission to the same hospital caused by a change of ownership and issuance of a different NPI number; and
  - Invoices for a single episode of service billed as a transfer from a hospital and an admission to a new hospital created by the merger of two or more hospitals and the assignment of patient bills from multiple hospitals to a single NPI number.

- Eliminate episodes with any Medicare charges. (For dual Medicare/Medicaid eligible beneficiaries, only claims paid a full Medicaid DRG are included.)

- Eliminate episodes assigned to DRGs reimbursed by multiplying a hospital's operating cost to charge ratio by charges.

- Eliminate episodes without any charges or days.

- Assign alternate weights for neonatal services. Two sets of weights are calculated for the six DRG classifications representing neonatal services (789-794). One set of weights is identified as alternate weights (789.1, 790.1, 791.1, 792.1, 793.1, and 794.1). These alternate weights are calculated from episodes that are assigned to one of these DRGs and include charges for services in an intensive care unit of one of the hospitals designated as having a NICU. The remaining claims assigned to these DRGs are used for the other set of weights.

- Assign alternate weights to specific pediatric services. Two sets of weights are calculated for DRGs representing specific services for pediatric and adult populations. One set of weights is identified as "alternate weights" and is calculated from episodes that are assigned to specific DRGs and demonstrate a significant difference in average cost between pediatric (age 0-17) and the adult population (age 18+).

- Limit episodes to those from Michigan hospitals, including hospitals that are no longer in operation (provided that hospital cost report data is available).

- Limit episodes to those with a valid patient status (incomplete episodes are excluded as are additional pages of a multiple page bill where there is no initial claim containing a valid patient status).

- Eliminate episodes with a zero dollar Medicaid liability.

- Determine the 3rd and 97th percentile length of stays by DRG, the average length of stay, and the maximum length of stay.
Set the low day outlier threshold at the greater of one day or the 3rd percentile length of stay.

Set the high day outlier threshold at the lesser of the average length of stay plus 30 days or the 97th percentile length of stay.

If the DRG has less than an adequate number of episodes (currently 32), the low day threshold is set at one day. The high day threshold is set at the lesser of the average length of stay plus 30 days, the maximum length of stay, or the Medicare DRG 90th percentile length of stay (from the corresponding Grouper as published in the Federal Register). If the Medicare DRG also has an inadequate number of claims, then the threshold is set based upon the expert advice of the MDHHS medical staff.

- Eliminate low day outliers. (Low day outliers are those episodes whose length of stay is less than the published low day threshold for each DRG. Since low day outliers are paid under a percent of charge method using the hospital's cost to charge ratio times charges and do not receive a DRG payment, they are excluded from the weight calculations.)

- Calculate the arithmetic mean length of stay for each DRG with each episode's length of stay limited to the high day threshold set above. This serves as the final published average length of stay.

- Limit episodes ending in a transfer to another acute setting to those whose length of stay was at least equal to the published average length of stay for the DRG (for DRGs 789 and 789.1, all transfers are included).

- Bring all charges for admissions in the first year of the base period up to the second year charges through application of inflation and weighting factors.

- Recognize area cost differences by dividing the charges for each hospital by an area cost adjustor. Hospitals are grouped by U.S. Census Core Based Statistical Areas (CBSAs) as determined by the Centers for Medicare & Medicaid Services for the Medicare program for wage data. MDHHS will not use hospital geographic reclassifications made under Section 508 of the Medicare Prescription Drug Improvement and Modernization Act of 2003 to calculate the Medicaid area wage index. Each area cost adjustor is calculated as follows:

\[
\text{Cost Adjustor} = 0.71066 \times \text{Wage Adjustor} + 0.28934
\]

- The cost adjustor formula reflects Medicare estimate of labor-related costs as a portion of total hospital costs as published in the Federal Register.

- Each area wage adjustor is wage per FTE divided by the statewide average hospital wage per FTE. Wage data is collected using the Medicare-audited wage data as published on the Centers for Medicare & Medicaid Services (CMS) website. Contract labor costs, as defined by Medicare, are included in determining a hospital's wage costs. Physician Medicare Part B labor costs are excluded.

- Each hospital's wage costs are adjusted for different fiscal year ends by multiplying the hospital's costs by inflation and weighting factors. All wages are brought to a common point in time.
For hospitals with cost reporting periods ending other than the end of a quarter, the inflation update for the quarter in which the hospital's fiscal year ends is used.

The wage adjustor is based on a two-year moving average, with the most recent year weighted 60 percent and the second year weighted 40 percent.

If two or more hospitals merge and are operating as a single hospital, salary and wages are computed using the combined cost report data from all hospitals involved in the merger. Salary data is inflated to a common point in time.

- Indirect medical education (IME) charges are removed by dividing each hospital's adjusted charges by an IME adjustor. Each hospital's IME adjustor is calculated as follows:

  \[ 1 + \left( \frac{FTEs}{\text{Beds}} \right) \times 0.3575 \]

- The number of beds for each hospital is the average number of available beds for the hospital. Available licensed beds are limited to beds in the medical/surgical portion of the hospital. Interns and residents are only those allocated to the medical/surgical portion of the hospital.

- Data taken from the hospital's cost report for the two fiscal years is weighted as follows: 60 percent for the most recent year and 40 percent for the second year.

- If two or more hospitals merge and are operating as a single hospital, indirect medical education data is computed using the combined cost report data from all hospitals involved in the merger.

- Adjust charges for high day and/or cost outliers to approximate the charges for the nonoutlier portion of the stay.

- An episode is a cost outlier if its costs (i.e., charges times hospital's operating cost to charge ratio) are greater than the cost threshold for that DRG (the threshold is set at the larger of twice the DRG payment or $35,000).
  - The cost to charge ratio is each hospital's inpatient operating cost to charge ratio, not to exceed 1.0.
  - The adjusted charges for cost outliers use a cost threshold estimate the greater of:
    \[ \text{Cost Threshold} = 2 \times \text{Avg. Cost for DRG or } \$35,000 \]

- Adjusted charges are calculated as follows:

  \[ \text{Adj Chrg} = \text{Chrgs} - \left( \frac{\text{Chrgs} \times \text{Cost Ratio} - \text{Cost Threshold}}{\text{Cost Ratio}} \right) \times 0.85 \]
If an episode is both a high day and a cost outlier, the lesser of the two adjusted charges is used in computing the relative weights and DRG prices.

- The adjusted cost for each episode is calculated by multiplying the adjusted charges for the episode by the inpatient operating cost to charge ratio.
  - Each hospital's Title XIX inpatient hospital cost to charge ratio is obtained from the hospital's filed cost report for the fiscal year ending in the second year of the base period. If the cost to charge ratio is greater than 1.0, then 1.0 is used.
  - If two or more hospitals merge and are operating as a single hospital, a cost to charge ratio for the period is computed using the combined cost report data from all hospitals involved in the merger. Cost and charge data is inflated to a common point in time.
- The average cost for episodes within each DRG is calculated by dividing the sum of the costs for the episodes by the number of episodes within the DRG.
- The relative weight for each DRG is calculated by dividing the average cost for episodes within each DRG by the average cost per episode for all episodes. A table showing the relative weights, average lengths of stay, and outlier thresholds for each DRG is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

2.4.D. DRG PRICE

The episode file used for DRG price calculations is the same as the file used to set relative weights with the following exceptions:

- The episode file is limited to those hospitals enrolled as of a specified date.

  Note: Hospitals identified with Medicare Critical Access Hospital (CAH) status as of July 1, 2011 are grouped and paid a single DRG price. The DRG price is the truncated mean of the hospital-specific base prices of all CAHs, adjusted by the rural cost adjustor and budget neutrality. This is the sum of the product of the hospitals’ specific base price times discharges divided by the sum of all group discharges. In the event a hospital status changes from prospective payment system (PPS) to CAH status, MDHHS recognizes the hospital under CAH status as of the CMS effective date.

- The case mix is calculated using the sum of all relative weights assigned to each hospital’s claims during the base period, divided by the total number of episodes for the hospital during the same period.

- The adjusted cost for each hospital is summed.

- The hospital specific base price (cost per discharge for a case mix of 1.00) is computed.
  - Divide total adjusted costs by the total number of episodes.
  - Divide average costs by the case mix.
  - Multiply the result by the applicable inflation factor. Costs are inflated through the rate period. Inflation factors are obtained from the Global Insight PPS-Type Hospital Market Basket Index.
Determine the DRG base price by:

- Calculating each hospital's limited base price. This is the lesser of the hospital specific base price or the mean of all base prices, plus one standard deviation.
- Calculating the statewide operating cost limit. This is a truncated, weighted mean of all hospitals' limited base prices divided by base period discharges.
- The lesser of the truncated mean or the hospital specific base price then becomes the DRG base price (before the cost adjustor and incentives are added) for each hospital.

### 2.4.D.1. INCENTIVE CALCULATIONS

For hospitals with base DRG prices below the operating limit (truncated mean), the hospital's base DRG price is increased by adding 10 percent of the difference between the hospital specific base price and the limit.

### 2.4.D.2. UPDATED COST ADJUSTER

Adjust each hospital's DRG base price, plus any incentive, by the updated cost adjustor. The updated cost adjustor is calculated to reflect the most current data available in the same manner as the base cost adjustor, except that:

- Wage data is collected using the Medicare-audited wage data as published on the Centers for Medicare & Medicaid Services (CMS) website.
- The wage and benefit inflation factors are derived from the employee cost component of the Global Insight PPS-Type Hospital Market Basket Index relative to the period.
- In the event that changes in federal regulations result in incompatible data between the base and update periods, adjustments are made either to the base or the update period to render the data comparable.

### 2.4.D.3. BUDGET NEUTRALITY FACTOR

A budget neutrality factor is included in the hospital price calculation. Hospital prices are reduced by the percentage necessary so that total aggregate hospital payments using the new hospital prices and DRG relative weights do not exceed the total aggregate hospital payments made using the prior hospital base period data and DRG Grouper relative weights. The estimate is based on one year's paid claims, including MHP encounter data with FFS rates applied. The calculated DRG prices are deflated by the percentage necessary for the total payments to equate to the amount currently paid.

Budget neutrality for CAHs is determined as a group, independent of non-CAHs.

As of July 2011, there was a one-time $2 million adjustment to overall budget neutrality for non-CAH hospitals to adjust for the adoption of the three-day payment rule. The one-time increase is carried forward into future budget neutrality adjustments.
2.4.D.4. COST-TO-CHARGE RATIO

For payment purposes, a single cost-to-charge ratio is published on the MDHHS website. The single cost-to-charge ratio is used for calculating payments paid a percent of charge, cost outliers, and low-day outliers. The ratio is calculated from the averages of FFS and MHP ratios, net of IME.

2.4.D.5. SUMMARY OF DRG PRICE CALCULATIONS

To summarize the above, the DRG price for each hospital is calculated using the following steps:

1. Hospital's adjusted charges.
2. Inpatient cost to charge ratio.
3. Hospital's adjusted costs (line 1 * line 2).
4. Hospital's episodes.
5. Cost per discharge (line 3/line 4).
6. Hospital's case mix.
7. Weighted inflation.
8. Hospital's base price (line 5 * line 7/line 6)
9. Establish the statewide base limit (mean plus one standard deviation).
10. Hospital's limited base price (lesser of lines 8 or 9).
11. Establish the statewide operating cost limit (truncated, weighted mean of line 10).
12. Hospital's DRG base price (lesser of lines 8 or 11).
13. Calculate the hospital's incentive (if line 12 < line 11, 10 percent of line 12 - line 11; otherwise 0).
14. Hospital's DRG base price plus any incentive (line 12 + line 13).
15. Hospital's Area Cost Adjustor.
16. Apply budget neutrality factor.
17. Hospital's final DRG price (line 14 x line 15 x line 16). The DRG price is rounded to the nearest whole dollar amount.

2.4.E. SPECIAL CIRCUMSTANCES UNDER DRG REIMBURSEMENT

In some special circumstances, reimbursement for operating costs uses a DRG daily rate. The DRG daily rate is:

\[
\frac{\text{(DRG Price x Relative Weight)}}{\text{Avg LOS for the DRG}}
\]

The average length of stay for each DRG is listed in the DRG Grouper on the MDHHS website. (Refer to the Directory Appendix for website information.)
2.4.E.1. HIGH DAY OUTLIERS

The high day outlier threshold for each DRG is set at the lesser of the average length of stay plus 30 days or the 97th percentile length of stay; or 50 days, whichever is greater.

Reimbursement for high day outliers is:

\[ \text{DRG Price} \times \text{Rel Wt} + (\text{Outlier Days} \times \left(\frac{\text{DRG Price} \times \text{Rel Wt}}{\text{Avg LOS for the DRG}}\right) \times 60\%) \]

The multiplier for the daily rate is 60 percent for all services, including those provided in children’s hospitals and children’s distinct part units of at least 150 beds.

If an episode is both a high day and a cost outlier, reimbursement is the greater of the two amounts.

2.4.E.2. LOW DAY OUTLIERS

For services where the length of stay is less than the published low day threshold, reimbursement is actual charges multiplied by the individual hospital's cost to charge ratio net of IME, not to exceed the full DRG payment rate. The specific low day outlier thresholds for each DRG are listed in the DRG Grouper on the MDHHS website. (Refer to the Directory Appendix for website information.)

2.4.E.3. LESS THAN ACUTE CARE

If a claim is a high day outlier and review shows that the beneficiary required less than acute continuous medical care during the outlier day period, Medicaid payment is made at the statewide nursing facility (NF) per diem rate for the continuous subacute outlier days if nursing care was medically necessary.

2.4.E.4. COST OUTLIERS

An episode is a cost outlier when costs (charges x the hospital's operating ratio excluding IME) exceed the computed cost threshold. Claims paid a percent of charge cannot be cost outliers.

Reimbursement for cost outliers is dependent upon the cost threshold.

The cost threshold is the larger of:

- \[ 2 \times \text{DRG Price} \times \text{Rel Wt} \] (twice the regular payment for a transfer paid on a per day basis for episodes getting less than a full DRG); or
- \$35,000

Cost outliers will be reimbursed according to the following formula:

\[ (\text{DRG Price} \times \text{Rel Wt}) + (\left(\text{Charges} \times \text{Operating Cost to Charge Ratio}\right) - (\text{Cost Threshold})) \times 85\% \]

If an episode is both a high day and a cost outlier, reimbursement is the greater of the two amounts.
2.4.E.5. TRANSFERS TO AN ACUTE CARE INPATIENT HOSPITAL

Payment to an acute care inpatient hospital that receives a patient as a transfer from another acute care inpatient hospital differs depending on whether the patient is discharged or is subsequently transferred again.

If the patient is subsequently discharged, the receiving acute care inpatient hospital is paid the full DRG payment, plus an outlier payment if appropriate.

Reimbursement is based on discharge in the following situations. If the patient:

- Is formally released from the hospital;
- Is transferred to home health services;
- Dies while hospitalized;
- Leaves the hospital against medical advice; or
- Is transferred to a nursing facility.

If the beneficiary is subsequently transferred again, the acute care inpatient hospital is paid a DRG daily rate for each day of the beneficiary's stay. The payment does not exceed the appropriate full DRG payment plus an outlier payment if appropriate.

2.4.E.6. TRANSFERS FROM A HOSPITAL

Except in cases where the DRG is defined as a transfer of a patient (for which a full DRG payment is made, plus an outlier payment, if appropriate), the transferring acute care inpatient hospital is paid a DRG daily rate for each day of the beneficiary's stay, not to exceed the appropriate full DRG payment, plus an outlier payment if appropriate.

2.4.E.7. READMISSIONS

Readmissions within 15 days for a related condition, whether to the same or a different hospital, are considered a part of a single case/episode for payment purposes.

If the readmission is to a different hospital, full payment is made to the second hospital. The first hospital's payment is reduced by the amount paid to the second hospital. The first hospital's payment is never less than zero for the episode.

Readmissions within 15 days for unrelated conditions, whether to the same or a different hospital, are considered new admissions for payment purposes.

Examples of reimbursement for readmissions within 15 days to a second hospital for a related condition are available on the MDHHS website. (Refer to the Directory Appendix for website information.)

MDHHS-developed guidelines for use by hospitals and Medicaid Health Plans in determining whether a 15-day readmission should be treated as a separate admission or a combined admission for payment purposes are also available on the MDHHS website.
For additional information about the guidelines, refer to the Hospital 15-Day Readmissions subsection of the Medicaid Health Plan Chapter.

2.4.E.8. PERCENT OF CHARGE REIMBURSEMENT

The payment amount for claims that fall into DRGs 1, 2, 5, 6, 7, 8, 10, 14, 16, and 17 is hospital charges times the hospital’s cost to charge ratio, excluding IME.

2.4.E.9. HOSPITALS OUTSIDE OF MICHIGAN

Medical/surgical hospitals not located in Michigan are reimbursed under the DRG system. The DRG price is the statewide operating cost limit (truncated mean of base prices for hospitals located in Michigan).

Hospitals that have charges that exceed $250,000 during a single fiscal year (using the State of Michigan fiscal year October 1 through September 30) may be reimbursed the hospital’s cost to charge ratio for those Michigan Medicaid DRGs reimbursed by percent of charge. The hospital’s chief financial officer must submit, and MDHHS must accept, documentation stating the hospital’s Medicaid cost to charge ratio in the state that the hospital is located. Once accepted, the hospital’s actual cost to charge ratio is applied prospectively to those DRGs and claims subject to percent of charge reimbursement using the Michigan DRG payment system.

2.4.E.10. NEW DRG HOSPITALS

A new hospital or unit is one for which no Michigan Medicaid Program cost or paid claims data exists during the period used to establish hospital specific base rates or one which was not enrolled in Medicaid when hospital specific base prices/rates were last established. Hospitals that experience a change of ownership or that are created as the result of a merger are not considered new hospitals.

The DRG base price for new general hospitals is the statewide operating limit until new DRG base prices are calculated for all hospitals using data from time periods during which the new hospital provided services to Medicaid patients.

2.4.F. HOSPITALS AND UNITS EXEMPT FROM DRG REIMBURSEMENT

2.4.F.1. FREESTANDING REHABILITATION HOSPITALS/ DISTINCT PART REHABILITATION UNITS

The per diem prices calculated for the Michigan Medicaid system utilize Medicaid and CSHCS FFS and MHP encounter inpatient claims for admissions during two consecutive state fiscal years. Hospital specific cost report data is drawn from two consecutive cost report years.

The claim file is limited to those hospitals enrolled as of the specified date.
The claim file is adjusted to:

- Eliminate episodes with any Medicare charges. (For dual Medicare/Medicaid eligible beneficiaries, only claims paid a full Medicaid payment are included.)
- Eliminate episodes without any charges or days.
- Limit episodes to those from Michigan hospitals (provided that hospital cost report data is available for three consecutive fiscal years used for the base period, including hospitals that are no longer in operation).
- Limit episodes to those with a valid patient status (incomplete episodes are excluded as are additional pages of multiple page bills where there is no initial claim containing a valid patient status).
- Eliminate episodes with a zero dollar Medicaid liability.

Total charges and days paid are summed by hospital.

The cost for each hospital is calculated by multiplying the charges for the hospital by the cost to charge ratio for the hospital.

- Each hospital's operating cost to total charge ratio is obtained from weighted filed cost reports for fiscal years ending in the second year of the base period. If the cost to charge ratio is greater than 1.00, then 1.00 is used. For distinct part rehabilitation units, this ratio is unique to the unit.
- If two or more hospitals merge and are operating as a single hospital, a cost to charge ratio for the period is computed using the combined cost report data from all hospitals involved in the merger. Cost and charge data is inflated to a common point in time.

The cost per day by hospital is calculated by dividing the sum of the costs by the number of days for the hospital.

To determine a hospital specific per diem base rate:

- Multiply the cost per day by the applicable inflation factor. Each hospital's costs are inflated to a common point in time. Inflation factors are obtained from the Global Insight PPS-Type Hospital Market Basket Index. The inflation update for the quarter in which the hospital's fiscal year ends is used.
- Recognize area cost differences by dividing the cost per day for each hospital by an area cost adjustor factor. Hospitals are grouped by U.S. Census Core Based Statistical Areas (CBSAs) as determined by the Centers for Medicare & Medicaid Services for the Medicare program for wage data. MDHHS will not use hospital geographic reclassifications made under Section 508 of the Medicare Prescription Drug Improvement and Modernization Act of 2003 to calculate the Medicaid area wage index. Each area cost adjustor is calculated as follows:

\[
\text{Cost Adjustor} = 0.71066 \times \text{Wage Adjustor} + 0.28934
\]

- The cost adjustor formula reflects Medicare estimate of labor-related costs as a portion of total hospital costs as published in the Federal Register.
Each area wage adjustor is wage per full-time equivalent (FTE) divided by the statewide average hospital wage per FTE. Contract labor costs, as defined by Medicare, are included in determining a hospital's wage costs.

Each hospital's wage costs are adjusted for different fiscal year end dates by multiplying the hospital's wage costs by inflation and weighting factors. All wages are brought to a common point in time.

For hospitals with cost reporting periods ending other than the end of a quarter, the inflation update for the quarter in which the hospital's fiscal year ends is used.

The wage data for distinct part rehabilitation units is the same as for the inpatient medical/surgical area of the hospital. The cost reports do not differentiate salaries/hours by unit type.

If two or more hospitals merge and are operating as a single hospital, salary and wages are computed using the combined cost report data from all hospitals involved in the merger. Salary data is inflated to a common point in time.

Remove indirect medical education (IME) costs by dividing by an adjustor for indirect education. Each hospital's IME adjustor is calculated as follows:

\[ 1 + [(1 + [\text{FTEs} / \text{Beds}] \times 0.5795) - 1] \times 0.3575 \]

Distinct part rehabilitation units report this data separately. The IME adjustor is unique to the unit.

Data taken from the hospital's cost report for the two fiscal years is weighted as follows: 60 percent for the first year and 40 percent for the second year.

If two or more hospitals merge and are operating as a single hospital, indirect medical education data is computed using the combined cost report data from all hospitals involved in the merger.

To determine the per diem rate:

- Calculate the statewide operating cost limit (by provider type). This is a weighted mean of all hospitals' specific base prices weighted by base period days (truncated mean), multiplied by the appropriate percentage.

  For freestanding rehabilitation hospitals, the percentage is 150 percent.

  The 50th percentile is determined by calculating a standardized rate for each unit. The standardized rate for all enrolled Michigan units are sorted in ascending order. The standardized rate of the first unit after the 50 percent of the units listed becomes the statewide 50th percentile.

  For distinct part rehabilitation units, the percentage is 200 percent.

- Calculate the statewide operating cost minimum (by provider type). This is a truncated, weighted mean of all hospitals' specific base prices divided by base period days multiplied by 70 percent.
• The per diem base rate is the lesser of:
  ▶ The greater of the hospital specific base price or the statewide operating cost minimum; or
  ▶ The statewide operating cost limit.

Adjust each hospital's per diem base rate by the updated cost adjustor (to reflect a hospital specific per diem rate). The updated cost adjustor is calculated to reflect the most current data available in the same manner as the base cost adjustor, except that:

• The updated year data is the most recent completed Medicare audited wage data.
• The wage and benefit inflation factors are derived from the employee cost component of the Global Insight PPS-Type Hospital Market Basket Index.
• In the event that changes in federal regulations result in incompatible data between the base and update periods, adjustments are made either to the base or the update period ( whichever is more practical) to render the data comparable.

Calculate the final per diem rate by rounding to the nearest whole dollar.

2.4.F.2. HOSPITALS OUTSIDE OF MICHIGAN

Freestanding rehabilitation hospitals and distinct part rehabilitation units are reimbursed using a per diem rate. The per diem rate is the statewide weighted average per diem (truncated mean) for this provider type.

2.4.F.3. NEW FREESTANDING HOSPITALS AND DISTINCT PART UNITS

If a hospital at least doubles the number of licensed beds in its distinct part unit and the number of licensed beds in the unit increases by at least 20, the entire unit is treated as a new distinct part unit for determining the per diem rate. In order for this provision to apply, the hospital must request, in writing, that the unit is treated as a new unit. The new unit per diem rate becomes effective on the date that the number of licensed beds doubles and the increase is at least 20 beds, or the date on which the request is received by MDHHS, whichever is later.

New freestanding hospitals and distinct part units are reimbursed using the statewide average (weighted by days during the base period) per diem rate for the provider type.

A hospital/unit specific per diem rate is established when new rates are calculated using data from time periods during which the new hospital/unit provided services to Medicaid patients.

2.4.G. FREQUENCY OF RECALIBRATIONS

MDHHS normally recalibrates hospital prices and ratios according to the following schedule. However, MDHHS reserves the right to alter the schedule at any time without further notice to hospitals.

• Relative weights are recalibrated annually.
- DRG prices are rebased every three years and updated annually.
- Per diem rates are rebased every two years and updated annually.
- Cost to charge operating ratios are recalculated with each DRG/Per Diem rebasing.

2.4.H. Mergers

2.4.H.1. General Hospitals

In the event of a merger between two or more hospitals between DRG rebasing periods, the DRG price for the surviving hospital is computed as follows:

- Cost to charge ratio, IME, and wage data are inflated to a common point in time (for the surviving entity).
- No changes are made to the relative weights.
- The DRG price is computed with the same methodology as described in the section covering the computation of the DRG price, with the following exceptions:
  - No change is made to the statewide operating cost limitation.
  - No change is made to the statewide average used to compute the update base wage adjustor.
  - No change is made with respect to the statewide average used to compute the update wage adjustor.
- As part of recalibration or rebasing, all data is combined prior to adjusting the invoice file.

2.4.H.2. Freestanding Rehabilitation Hospitals/ Distinct Part Rehabilitation Units

In the event of a merger between two or more hospitals between per diem rebasing periods, the resulting per diem rate for the surviving hospital is computed as follows:

- Cost to charge ratio, IME, and wage data are inflated to a common point in time (for the surviving entity).
- The per diem rate is computed using the same methodology as described in the section covering the computation of the DRG rates, with the following exceptions:
  - No change is made to the statewide operating cost limit.
  - No change is made to the statewide average used to compute the base wage adjustor.
  - No change is made to the statewide average used to compute the update wage adjustor.
- As part of recalibration or rebasing, all data is combined prior to adjusting the invoice file.
SECTION 3 - SPECIAL INPATIENT SITUATIONS

3.1 MEDICARE/ MEDICAID CLAIMS

For patients treated in the inpatient setting with either Medicare Part A coverage or Medicare Part B coverage, no reimbursement is made for capital.

**Exception:** Where a patient is dually eligible for Medicare/ Medicaid and his Medicare Part A benefits have exhausted, Medicaid reimburses the hospital for capital.

Prior to final settlement, hospitals must identify claims eligible to receive capital costs as a result of the patient’s Medicare Part A benefits being exhausted. A copy of the Medicaid invoice and the Medicaid Remittance Advice (RA) page showing approval must be provided for these claims. The hospital must also provide a copy of the Medicare Explanation of Benefits (EOB) showing that the patient’s Part A benefits have been exhausted. Failure by the hospital to provide this information results in these claims being excluded from its final settlement.

For patients with Medicare Part B coverage and no Medicare Part A coverage, the Medicaid payment amount is determined by subtracting the Medicare Part B payment from the Medicaid inpatient amount that would otherwise be approved (either under DRG or per diem).

For patients with Medicare Part A coverage, the Medicare payment is compared to the Medicaid inpatient amount that would otherwise be approved (either under DRG or per diem).

- If the Medicare amount is greater, no additional payment is made, even though a coinsurance or deductible amount may be due.
- If the Medicaid amount is greater, the difference is paid, up to a maximum of the Medicare coinsurance and deductible amounts due for the claim. If a beneficiary is in a Medicare Advantage Plan, Medicaid’s liability never exceeds that of the beneficiary. In addition, if the provider accepts the payment from the Medicare Advantage Plan as payment in full, Medicaid has no further liability.

3.2 SUBACUTE VENTILATOR-DEPENDENT CARE

Payment for services provided to patients in Subacute Ventilator-Dependent Care Units (SVDCU) is made using a negotiated prospective per diem rate that includes capital and direct medical education costs. The per diem rate is based on cost estimates for the upcoming year. The negotiated per diem rate is not to exceed the average outlier per diem rate that would be paid for outlier days between DRG 004X and DRG 005X. The payment rate for patients in subacute ventilator-dependent care units is an all-inclusive facility rate. No additional reimbursement is made for capital or direct medical education costs. These units are not eligible for indigent volume adjustor or indirect medical education adjustor payments.
The provider agrees to maintain separate accounting records for all costs associated with the dedicated ventilator-dependent unit using special procedures and instructions provided by MDHHS.

- Providers must maintain a separate cost center consistent with the requirements of MDHHS for all costs directly associated with the SVDCU, such as salaries, ancillary costs and others. The capital costs and other indirect costs are to be allocated to SVDCU using the method in accordance with Medicaid Long Term Care Cost Reporting requirements.
- SVDCU patient days and discharges must be reported separately under an inpatient cost center identified as SVDCU patient care on the cost report.
- Cost reporting for this separate SVDCU must be consistent for Medicaid and Medicare cost reporting.

3.3 MICHIGAN STATE-OWNED HOSPITALS

Michigan state-owned hospitals are reimbursed for their services using a prospective per diem rate. Each facility, in aggregate, will not receive payments in excess of the costs it incurs providing services to its Medicaid patients. Reimbursement for Michigan state-owned hospitals is subject to Federal upper payment limits.
SECTION 4 - HOSPITAL REIMBURSEMENT BY MEDICAID HEALTH PLANS

4.1 MEDICAID HEALTH PLAN PAYMENTS TO OUT OF NETWORK HOSPITALS

Medicaid Health Plans are to reimburse out of network medical/surgical hospitals at Medicaid FFS DRG hospital prices. MHPs are to reimburse out of network freestanding rehabilitation hospitals and distinct-part rehabilitation units at Medicaid per diem rates. MHPs are to use the DRG Grouper in use by Medicaid for the date of service to process out of network inpatient hospital claims and assign DRGs to determine relative weights, outliers, and average lengths of stay.

The hospital’s Medicaid operating cost to charge ratios in effect for the date of service are to be used in the calculation of low day outliers, cost outliers, and organ transplants (with the exception of kidney transplants which are paid under relative weights). Organ acquisition costs are reimbursed at 100% of charges. This applies to heart, kidney, liver, lung, simultaneous pancreas/kidney, or pancreas transplants. This does not apply to bone marrow transplants. All bone marrow transplant charges are reimbursed at the hospital’s cost-to-charge ratio.

In addition to the DRG or per diem payment, a separate capital payment must be made for each out of network medical/surgical admission at the per discharge rate. A separate capital payment must also be made for each day a patient receives care in an out of network freestanding rehabilitation hospital and distinct-part rehabilitation unit. Capital payments for acute care and rehabilitation units and for freestanding hospitals will be updated annually.

4.2 TERMS OF SERVICE AND PAYMENT BETWEEN NONCONTRACTING HOSPITALS AND MHPs

To assure that all Medicaid beneficiaries have universal access to medically necessary covered hospital services, MDHHS, in cooperation with Medicaid enrolled hospitals and MHPs, developed a set of mutually identified obligations and a process to assure these obligations are met.

To acknowledge the responsibilities of hospitals and MHPs in noncontracting circumstances, a Hospital Access Agreement and MHP Obligations document were developed. Each Hospital is encouraged to execute the Hospital Access Agreement. Although execution of this Agreement is voluntary on the part of each Hospital, MDHHS expects that substantially all Hospitals will sign and return the Agreement. Signed copies of the Hospital Access Agreement are to be submitted by hospitals to MDHHS. The Hospital Access Agreement is not a contract with a MHP.

Refer to the Medicaid Health Plans Chapter of this manual for additional information about noncontracting hospitals and MHPs.

4.2.A. DEFINITIONS

The definitions of terms used in this section and in the Hospital Access Agreement, MHP Obligations, and Rapid Dispute Resolution Process (RDRP) are as follows:

<table>
<thead>
<tr>
<th>Authorization or Prior Authorization (PA)</th>
<th>Documented approval by a MHP for the medical services rendered to an enrollee by a hospital based on clinical information provided to the MHP and pursuant to the terms set forth in this chapter.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Beneficiary</td>
<td>An individual who has been determined eligible for Medicaid.</td>
</tr>
</tbody>
</table>
Michigan Department of Health and Human Services

Medicaid Provider Manual
Certificate of
Coverage

Certificate of Coverage means the written document approved by the Department of
Insurance and Financial Services (DIFS) which explains the scope of benefits,
limitations of coverage, and exclusions governing the enrollee’s health care benefit
coverage pursuant to the MHP's Medicaid Contract with the State of Michigan.

Clean Claims

Clean Claims as defined in PA 187 OF 2000, being MCL 400.111i and OFIR bulletin
2000/09.

Covered Services

All required services for Medicaid enrollees as defined by:

Emergency Medical
Condition



Section 400.105 of the Michigan Compiled Laws,



Title XIX of the federal Social Security Act, 42 USC 1395 et. seq.,



MDHHS Program Manuals and Bulletins,



The contract between MHPs and the Michigan Department of Technology,
Management & Budget for services rendered to enrollees, and



The Certificate of Coverage.

Emergency Medical Condition means a medical condition manifesting itself by acute
symptoms of sufficient severity (including severe pain) such that a prudent layperson,
with an average knowledge of health and medicine, could reasonably expect the
absence of immediate medical attention to result in:


Serious jeopardy to the health of the individual or, in the case of a pregnant
woman, the health of the woman or her unborn child;



Serious impairment to bodily functions; or



Serious dysfunction of any bodily organ or part.

EMTALA

The Emergency Medical Treatment and Active Labor Act, 42 USC 1395dd that
requires a hospital to perform a medical screening examination of any individual
presenting in its emergency department (ED) to determine if an emergency medical
condition exists and to stabilize the individual’s medical condition.

Enrollee

A Medicaid-eligible beneficiary who is enrolled in a MHP and who is either eligible at
the time of service or determined retroactively eligible.

Hospital

The licensed entity that executed the Hospital Access Agreement included below and
which has the inpatient capacity that is necessary to provide covered services.

Medicaid Health Plan

A Medicaid managed care plan that provides medical assistance through the delivery
of covered services to beneficiaries and that holds a Medicaid Contract with the State
of Michigan.

Medicaid Rates

The entire amount payable by MDHHS to hospitals for covered medical services
provided to Medicaid beneficiaries who are not enrolled in MHPs. It includes, without
limitation, DRG payments, per diem payments for exempt units, outpatient fee screen
payments and applicable pass-through payments. Any other available resources,
such as Medicare or other insurances, reduce the amount payable.

Version
Date: July 1, 2018

Hospital Reimbursement Appendix

Page A35


Noncovered Service: A medical or health care service that is:

- Not covered by Medicaid,
- Not medically necessary;
- Not described in a MHP’s Certificate of Coverage,
- Provided before or after a beneficiary is an enrollee in a MHP, or
- A non-emergency service for which the Hospital did not secure PA.

Rapid Dispute Resolution Process: The process implemented by MDHHS to administer and resolve claim disputes according to the terms set forth in the Rapid Dispute Resolution Process (RDRP).

4.2.B. HOSPITAL ACCESS AGREEMENT

The Hospital Access Agreement (HAA) is between MDHHS and the hospital, and applies when a hospital provides services to Medicaid beneficiaries who are enrolled in a MHP with which the hospital does not have a contract. Where a hospital and MHP have a contract, the terms of that contract govern each relationship, and the HAA does not apply. When a hospital and a MHP have a limited services contract, the HAA applies for all covered services outside the scope of the limited services contract. Since the HAA is not a contract between a hospital and MHP, it is expected that health plans will continue to use network-contracted providers where appropriate.

The HAA is based on the following principles:

- It is intended to provide access for all covered services that are available at a hospital for all Medicaid enrolled beneficiaries, and to provide for the payment and billing policies and procedures for those services where the hospital and the enrollee’s MHP have not entered into a contract.
- MDHHS, hospitals, and MHPs believe that it is essential to encourage contracting as the preferred relationship between health plans and hospitals, and to preserve the freedom of contract between hospitals and MHPs.
- The hospital will be entitled to payment by a health plan for all covered services provided in accordance with the HAA at Medicaid rates.
- In the event a MHP does not make the payment to a hospital as required under the HAA, MDHHS will deduct the unpaid amount from future health plan capitation payments and make such payment to the hospital in accordance with the HAA.
- MDHHS requires that the contracts between the State and each MHP include a provision that each MHP will comply with the terms of the HAA.

The agreement covers:

- Provision of Covered Services
- Health Plan Payment
- MDHHS Payment
Authorization Requests - Post Stabilization
Prior Authorization - Elective Admissions and Services
Data Coordination
Quality, Utilization and Risk Management (Q/U/RM)
Orderly Transfer
Claims
Disputed Claims
Payment
Enrollee Hold Harmless
Termination of the Agreement
Parties to This Agreement
Governing Law
Notice of Change

A copy of the Hospital Access Agreement is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

4.3 MHP Obligations

The MDHHS contract with each MHP contains an amendment regarding the MHP's obligation to a hospital when the MHP does not have a contract with the hospital to provide services to the MHP's Medicaid beneficiaries and where the hospital has signed a Hospital Access Agreement with MDHHS.

The MHP makes efforts to utilize network-contracted services where appropriate.

The contract amendment specifies MHP requirements for:

- Timely processing of claims
- Authorization requests - post stabilization
- Disputed claims
- Claim payment
- Claims data coordination
- Quality, Utilization and Risk Management (Q/U/RM)
- Orderly transfers
- Dispute Resolution

A copy of the MHP contract and the Health Plan Obligation Amendment are available on the MDHHS website.
4.4 DISPUTED CLAIMS

A Rapid Dispute Resolution Process (RDRP) was developed to provide a method for hospitals and MHPs to resolve disputed claims when the parties cannot reach an agreement. The process is included with the Hospital Access Agreement.
SECTION 5 – CAPITAL

Effective January 1, 2015, MDHHS will reimburse inpatient capital using a hospital-specific prospective rate. A prospective per-discharge amount will be calculated for medical/surgical hospitals, including critical access hospitals and children’s hospitals. Freestanding rehabilitation hospitals and distinct part rehabilitation units will be reimbursed a prospective per diem capital rate. Transfer claims will not receive a prospective capital payment.

When calculating the prospective capital rates, data from the second previous state fiscal year will be used. For example, to calculate January 1, 2015 capital rates, data from cost reports with fiscal years that end between October 1, 2012 and September 30, 2013 will be used. Fee-for-Service (FFS) data will be used to calculate capital amounts.

The capital amount for the medical/surgical component of the hospital is established using the following lines (or comparable lines from succeeding cost reports) from the hospital’s cost report. The data for routine capital costs is obtained from the CMS 2552-10, Worksheet D, Part I, Title XIX, Column 7, Lines 30-35 and 43. The ancillary capital costs are obtained from the CMS 2552-10, Worksheet D, Part II, Title XIX, Column 5, Lines 50-77 and 90-92. The sum of routine and ancillary cost for FFS is then divided by the medical/surgical FFS discharges for the same period to calculate the hospital-specific prospective per discharge rate for Managed Care Organizations (MCOs) and FFS.

The capital amount for freestanding rehabilitation hospitals or distinct part rehabilitation units is established using the following lines from the hospital’s cost report. The data for routine capital costs is obtained from the CMS 2552-10, Worksheet D, Part I, Title XIX, Line 41. The ancillary capital costs are obtained from the CMS 2552-10, Worksheet D, Part II, Title XIX, Column 5, Lines 50-76.99 and 90-92. The sum of the routine and ancillary cost for FFS is then divided by the FFS rehabilitation Medicaid days for the same period to calculate the hospital-specific prospective per diem rate for MCOs and FFS.

Current occupancy limits will remain when the hospital specific prospective capital rates are developed. Capital amounts will be set annually. Capital amounts may be adjusted due to significant changes in capital costs that are not reflected in the cost report utilized to set the rate. Hospitals may request a capital rate adjustment by submitting a written request to the MDHHS Hospital and Clinic Reimbursement Division (HCRD). (Refer to the Directory Appendix for contact information.)

Hospitals may continue to receive capital interim payments, but only if they receive Medicaid interim payments. Otherwise, the hospital will receive its prospective rate when the inpatient claim is adjudicated. If the hospital receives capital interim payments, amounts will be reconciled 15 months after the hospital’s fiscal year ends, and again at final settlement 27 months after the hospital’s fiscal year ends.

5.1 DISTINCT PART REHABILITATION UNITS AND FREESTANDING REHABILITATION HOSPITALS

For distinct part rehabilitation units and freestanding rehabilitation hospitals, a separate inpatient capital rate will be calculated. The sum of the Medicaid fee-for-service (FFS) and managed care organization (MCO) routine and ancillary costs are divided by the FFS and MCO rehabilitation Medicaid days to calculate the hospital-specific prospective per diem rate.
5.2 MEDICAL/SURGICAL HOSPITALS

For medical/surgical hospitals, a separate inpatient capital rate will be calculated. The sum of the Medicaid FFS and MCO routine and ancillary costs are divided by the medical/surgical FFS and MCO discharges to calculate the hospital-specific prospective per discharge rate.

5.3 LIMITS ON CAPITAL

The limits on capital described in this section apply for fiscal years beginning on and after October 1, 1990.

5.4 NET LICENSED BEDS

Net licensed beds are used to determine net licensed bed days for capital reimbursement and include all beds temporarily delicensed, except for rural banked beds, with rural as defined below. Net licensed bed days are:

\[
\text{Total Licensed Bed Days} - \text{Rural Banked Bed Days}
\]

A hospital may apply for a reduction in net licensed bed days to subtract bed days unavailable due to construction or renovation. Such a reduction is only available for beds which are taken out of service for construction or renovation for a limited period of time and which are returned to active inpatient service at the end of the construction or renovation project. Documentation of the construction or renovation project is required.

Occupancy is:

\[
\frac{\text{Total Inpatient Days (Including Nursery Days)}}{\text{Net Licensed Bed Days}}
\]

5.4.A. SOLE COMMUNITY PROVIDER ELIGIBLE HOSPITALS

If the hospital is eligible for sole community provider status (as defined by Medicare standards), the Medicaid share of allowable capital costs is reimbursed in full.

5.4.B. RURAL HOSPITALS

If a hospital is located in a rural area, as defined below, capital reimbursement is limited if occupancy in the hospital is less than 60 percent during the hospital's fiscal year. A hospital is considered a rural hospital if it is located outside a city of 40,000 or more people by a distance of 10 miles or more (U.S. Census Bureau population data is used). For hospitals with occupancy less than 60 percent, the Medicaid reimbursement for capital is:

\[
(\text{Occupancy}/0.6) \times \text{Medicaid Share of Capital}
\]

If occupancy is at least 60 percent, the Medicaid reimbursement for capital is 100 percent of the Medicaid share of capital.
5.4.C. OTHER HOSPITALS

If a hospital is not eligible to be a sole community provider and is not located in a rural area, capital reimbursement is limited if occupancy in the hospital is less than 75 percent during the hospital's fiscal year. For hospitals with occupancy less than 75 percent, the Medicaid reimbursement for capital is:

\[(\text{Occupancy}/.75) \times \text{Medicaid Share of Capital}\]

If occupancy is at least 75 percent, the Medicaid reimbursement for capital is 100 percent of the Medicaid share of capital.

5.4.D. HOSPITALS OUTSIDE OF MICHIGAN

Medical/surgical hospitals not located in Michigan receive a per case add-on amount to cover capital cost.

Freestanding rehabilitation hospitals and distinct part rehabilitation units of hospitals not located in Michigan receive a per diem add-on amount to cover capital cost.

The add-on amounts are an estimate of the statewide average paid to hospitals located in Michigan. Capital payments to out-of-state hospitals are not cost settled.
SECTION 6 - MEDICAID INTERIM PAYMENTS AND CAPITAL INTERIM PAYMENTS

Medicaid Interim Payments (MIPs) and Capital Interim Payments (CIPs) are available on a voluntary basis to all inpatient hospitals. MIPs and CIPs are paid on a monthly schedule (12 payments per year). Only hospitals that elect to receive MIPs are eligible to receive CIPs.

For hospitals electing MIP, at the beginning of each hospital’s fiscal year, annual program liabilities are set for Title XIX and Title V. Separate amounts are computed for each of a hospital’s inpatient units (e.g., acute care and rehabilitation).

CIP amounts are set using the most recent available cost data and an estimated impact of any applicable limits on capital. CIP amounts are set annually at the beginning of the hospital’s fiscal year. CIPs may be adjusted due to significant changes of at least 10% in capital costs that are not reflected in the most recent cost report. Hospitals wishing to request a CIP adjustment must submit a written request to the MDHHS Hospital and Clinic Reimbursement Division (HCRD). (Refer to the Directory Appendix for contact information.)

Medicare’s Principles of Reimbursement are used to determine Medicaid’s share of allowable capital costs. MDHHS policy is used to determine capital reimbursement.

6.1 DRG

If DRG reimbursed, calculation of gross program liability is as follows:

- \((\text{DRG Price} \times \text{Discharges} \times \text{Case Mix}) + \text{Other Payments}\).
- Discharges are from the most recent filed cost report.
- Case mix is hospital specific and drawn from MDHHS paid claims files.
- Other payments are an MDHHS estimate of the additional amount that is paid to the hospital for high day outliers, percent of charge reimbursed claims, and a deduction for estimated other insurance and patient-pay amounts.

6.2 PER DIEM

If per diem reimbursed, calculation of gross program liability is as follows:

- \((\text{Per Diem} \times \text{Days}) - (\text{Other Insurance} + \text{Patient-Pay})\).
- Days are from the most recent filed cost report.

6.3 LIMITS

For both DRG and per diem reimbursed hospitals/units, the MIP amount is based on a percentage of inpatient charges approved to inpatient charges filed from the prior year. Further, the MIP amount is limited based on application of a charge ceiling.
6.4 RECONCILIATION

An initial MIP reconciliation is done for operating costs only, and an initial CIP reconciliation is done for capital costs only. Fifteen months after a hospital's fiscal year ends, reconciliation is done to compare the amount paid by MDHHS to the claims approved for the fiscal year reviewed.

For capital cost settlements for hospitals with fiscal years ending on and after January 1, 2002, filed cost reports, instead of audited cost reports, are used to complete a hospital desk review and settlement prior to issuing a Notice of Program Reimbursement. Medicaid does not wait for Medicare to complete its audit of a hospital's cost report before Medicaid does its cost settlement. In order to capture the maximum paid claims data, Medicaid final settlements and corresponding final reconciliations are not calculated earlier than 27 months after the end of a hospital's fiscal year end.

6.5 DATA CORRECTIONS

MIP is an estimate of the amount due a provider in the interim. There is no appeal process. If there is a calculation mistake, the hospital must contact the MDHHS HCRD in writing explaining the situation. (Refer to the Directory Appendix for contact information.)

6.6 MONITORING

Hospitals that wish to receive MIPs must file quarterly utilization reports. MDHHS specifies the format and time frames for the filing of these reports.

MIP is monitored based on the quarterly reports submitted by the provider. These reports are due 30 calendar days after the end of the quarter.

Hospitals may elect to be removed from MIP and receive payments for claims processed weekly. Hospitals removed from MIP are not allowed to reenter the MIP process.

If the MIP payment significantly exceeds the amount approved for two consecutive years, the hospital may be removed from MIP.

Hospitals under bankruptcy are automatically removed from MIP and are reimbursed for claims processed through CHAMPS.

CIPs are monitored based on quarterly reports submitted by the provider. These reports are due 30 days after the end of the quarter. Adjustments to CIPs are made quarterly where significant changes in utilization are shown.
SECTION 7 – SPECIAL PAYMENTS

7.1 DISPROPORTIONATE SHARE HOSPITAL PAYMENTS

Indigent volume data is taken from each hospital's cost report and from supplemental forms that each hospital must file with its cost report. Data from the most recent available filed cost report are used to calculate a disproportionate share adjustor. New adjustors are calculated and become effective concurrently with annual inflation updates. Separate indigent volume data is collected for and separate adjustors are applied to distinct part psychiatric units and distinct part rehabilitation units.

Indigent volume is measured as the percentage of inpatient indigent charges to a hospital's net hospital charges as reported on the Medicaid cost report. Indigent charges are the annual charges for services rendered to patients eligible for payments under Medicaid, CSHCS, MiChild, MOMS, and Healthy Michigan Plan, plus uncompensated care charges. Uncompensated care is limited by Medicare standards and is offset by any recoveries.

No Medicare charges and no Medicaid obligation to cover premiums, copayments, coinsurance and/or deductibles for beneficiaries who are dually eligible for both Medicaid and Medicare are to be included as a Medicaid charge for the purpose of calculating the amount of indigent volume to be reported on any line of a hospital’s Indigent Volume Report. Also excluded are charges for Medicaid patients who have other insurance coverage and for whom the full payment, except for copayment, coinsurance and/or deductible, comes from the insurance payer.

Uncompensated care, bad debt recovery, and/or Hill-Burton offset may be apportioned using the ratio of total inpatient medical-surgical charges to total charges, the ratio of total distinct part rehabilitation unit charges to total charges, the ratio of total distinct part psychiatric unit charges to total charges, and the total of outpatient charges to total charges.

7.1.A. INDIGENT VOLUME REPORT AND DISPROPORTIONATE SHARE HOSPITAL ELIGIBILITY FORM

Each hospital must complete the Indigent Volume (IV) Report and the Disproportionate Share Hospital (DSH) Eligibility status verification form to be eligible for Disproportionate Share Hospital (DSH) funds.

The Indigent Volume (IV) Report is to be completed as part of the hospital’s annual cost report package and returned to MDHHS. The cost report will not be accepted without the IV Report.

In order to receive a disproportionate share adjustor other than 1.00, hospitals must also meet at least one of the four criteria on the Disproportionate Share Hospital (DSH) Eligibility status verification form.

The Disproportionate Share Hospital (DSH) Eligibility status verification form is to be completed annually and is reported separately from the cost report package.
An example of the form follows.

7.1.B. MEDICAID UTILIZATION RATE

In addition to the minimum requirements specified in the form, each hospital must have a Medicaid utilization rate of at least one percent. Medicaid utilization is measured as:

\[
\frac{\text{Medicaid Inpatient Days (Whole Hospital, including Subproviders)}}{\text{Total Hospital Days (Whole Hospital, including Subproviders)}} \times 100\%
\]

Days are taken from filed hospital cost reports for fiscal years ending during the second previous state fiscal year. All charge, cost and payment data must be on an accrual basis for each hospital’s cost reporting period ending during the second previous state fiscal year (i.e., DSH payments for state FY 1998 are calculated using data collected in state FY 1996).
7.2 REGULAR DSH PAYMENTS

7.2.A. $45 MILLION POOL

Medicaid inpatient DSH payments are made annually in a single distribution, based on charges converted to cost, using the hospital’s cost to charge ratio. The payment will be made at the end of the state fiscal year.

Each hospital’s indigent volume is taken from hospital cost reporting periods ending during the second previous state fiscal year.

Title XIX charges used for computing DSH payments are the sum of Title XIX charges and Title XIX MCO charges from hospital IV Reports for cost periods ending during the second previous state fiscal year. Data for cost periods of more or less than one year is proportionately adjusted to one year.

Hospital total cost ratios are taken from hospital cost reporting periods ending during the second previous state fiscal year. If a hospital has more than one cost reporting period ending within this range, data from the two periods are added together and a single ratio is computed. If the ratio is greater than 1.00, a ratio of 1.00 is used.

1. DRG Reimbursed Hospitals ($37,500,000 allocated)

The DSH payments for DRG reimbursed hospitals are split into two pools.

A. Hospitals with at least 50 percent IV ($7,300,000). The share of the DSH payment for hospitals with at least 50 percent IV is based on a DSH share computed as follows:

\[ \text{Title XIX Charges} \times \text{Operating Ratio} \times (\text{IV} - 0.5) \]

B. Hospitals with at least 20 percent IV ($30,200,000). The share of the DSH payment paid to hospitals with at least 20 percent IV is based on the following DSH share amount. This is in addition to the amount from A. above.

\[ \text{Title XIX Charges} \times \text{Operating Ratio} \times (\text{IV} - 0.2) \]

2. Per Diem Reimbursed Hospitals and Units ($7,000,000 allocated)

The share of the DSH payment paid to hospitals with IV of at least 20 percent is based on a DSH share based on the following:

\[ \text{Title XIX Charges} \times \text{Operating Ratio} \times (\text{IV} - 0.2) \]
3. Distinct-Part Rehabilitation Units ($500,000 allocated).

The share of the DSH payment paid to hospitals with IV of at least 20 percent is based on a DSH share of the following:

\[
\text{Title XIX Charges} \times \text{Operating Ratio} \times (\text{IV} - 0.2)
\]

4. For items 1 through 3 above, the determination of the share of the allocated DSH pool is made using the DSH share of the following:

\[
(\text{Hospital's DSH Share} / \sum \text{DSH Shares for the Group}) \times \text{Allocated DSH Pool}
\]

5. The regular DSH payment amount for each hospital is determined by comparing the results of the pool’s payment allocation formula at each component of the regular DSH Pool — Diagnosis Related Group (DRG) Reimbursed Hospitals, Per Diem Reimbursed Hospitals and Units and Distinct-Part Rehabilitation Units — to the individual hospital DSH ceiling. Any amount not paid to a hospital because of its DSH ceiling is returned to the pool and redistributed using the same formula as the initial distribution, with hospitals over the ceiling removed from the calculation. This process continues until the entire pool is distributed. For the DRG Reimbursed Hospitals component, any funds not exhausted from the 50 percent IV sub pool will be placed into the 20 percent IV sub pool.

7.3 SPECIAL DSH PAYMENTS

7.3.A. GOVERNMENT PROVIDER DSH POOL

A special pool for non-state government-owned or -operated hospitals will be established and renewed annually. The purpose of the pool is to assure funding for costs incurred by public facilities providing inpatient hospital services which serve a disproportionate number of low-income patients with special needs. A historical list of Government Provider pool sizes is maintained on the MDHHS website. (Refer to the Directory Appendix for website information.) Allocations will be determined based upon non-reimbursed costs certified as public expenditures in accordance with 42 CFR 433.51.

To be eligible for the Government Provider DSH Pool, hospitals must:

- Meet minimum federal requirements for Medicaid DSH payments; and
- Be non-state government-owned or -operated.

Medicare 2552 cost reports, supplemented by Michigan Medicaid Forms (MMFs), will be used to determine each hospital’s allowable DSH costs eligible for federal financial participation.

An interim payment and reconciliation process will be employed when making allocations from this pool. Allowable DSH costs will be determined based on information obtained from the cost report periods ending during the second previous state fiscal year. Costs will be obtained from the most recently filed Medicare 2552 cost report and Michigan Medicaid Forms for that period. These costs will be trended to the current state fiscal
year using an inflation factor taken from Health-Care Cost Review published quarterly by Global Insight. Interim payments will then be made.

Interim payments will be reconciled twice. First, an interim reconciliation of the original payments will be conducted based on updated allowable DSH costs. Information needed to reconcile initial payments will be obtained from hospital Medicare 2552 cost reports filed with the fiscal intermediary and Michigan Medicaid Forms for the applicable reporting period. Second, payments will be adjusted for a final time based on Medicare 2552 cost reports finalized with the fiscal intermediary and Michigan Medicaid Forms for the applicable reporting period.

Aggregate DSH expenditures will be made in accordance with Section 1923(g)(1)(A) of the Social Security Act. Prior to computing the amount of payment each individual hospital is eligible to receive from this pool, all other DSH and Medicaid payments that the hospital is scheduled to receive will be counted against the hospital’s DSH limit.

7.3.B. UNIVERSITY WITH BOTH A COLLEGE OF ALLOPATHIC MEDICINE AND A COLLEGE OF OSTEOPATHIC MEDICINE

A separate pool will be created annually in the following amounts: $2,772,003 in fiscal year 2005, $2,764,340 for fiscal years 2006 – 2012, and $3,500,000 for each subsequent fiscal year. The purpose of the pool is to:

- Assure continued access to medical care for indigents; and
- Increase the efficiency and effectiveness of medical practitioners providing services to Medicaid beneficiaries under managed care.

Only one agreement per year is approved by MDHHS for this purpose. To be eligible for the pool, a hospital must meet the following criteria:

- Meet minimum federal requirements for Medicaid DSH payments; and
- Have in place an approved agreement between itself and a university with both a college of allopathic medicine and a college of osteopathic medicine that specifies all services and activities to be conducted.

This agreement shall not require the hospital to donate money or service to the other party in the agreement.

7.3.C. OUTPATIENT UNCOMPENSATED CARE DSH POOL

A special pool will be created annually for the purpose of reimbursing hospitals for a portion of their uncompensated care. The Outpatient Uncompensated Care DSH Pool will be split into Small and Rural and Large-Urban components. A historical record of the pool amounts can be found on the MDHHS website. (Refer to the Directory Appendix for website information.) Payments from the pool will be made annually.

Funds will be distributed from the Outpatient Uncompensated Care DSH Pool to all qualifying Privately-Owned or -Operated and Non-State Government-Owned or -Operated DSH eligible hospitals in Michigan. DSH eligibility criteria are specified in the
Disproportionate Share Hospital Payments, the Indigent Volume Report and Disproportionate Share Hospital Eligibility Form, and the Medicaid Utilization Rate subsections of this chapter. These criteria must be met for a hospital to receive an allocation from any component of the Outpatient Uncompensated Care DSH Pool.

For purposes of distributions from this pool, any DSH hospital located in Michigan with less than 100 acute care beds will be considered a small hospital. Also for purposes of distributions from this pool, any DSH hospital located in a Michigan rural or Micropolitan County will be considered a rural hospital. All hospitals meeting either of these criteria will be eligible to receive a proportional share of the small and rural components of the pool.

For purposes of distributions from this pool, any DSH hospital with 100 or more acute care beds located in an urban Michigan county will be considered a large-urban hospital. Only hospitals meeting both of these criteria will be eligible to receive a proportional share of the large-urban components of the pool. Hospitals meeting only one of these criteria are by definition eligible to receive a proportional share of the small and rural components of the pool. No hospital is eligible to receive allocations from both the small and rural and the large-urban components of the Outpatient Uncompensated Care DSH Pool.

The determination of the number of acute care beds for a hospital will be based on data reported on hospital cost reports for hospital fiscal years ending during the second previous state fiscal year. Specifically, data reported on Worksheet S-3, Part 1, Column 2, Line 14 (or comparable lines from succeeding cost reports) will be assessed to determine the number of total hospital beds. The determination will apply to all components of the Outpatient Uncompensated Care DSH Pool regardless of the state fiscal year from which the DSH funds are drawn.

The distribution of funding from the Outpatient Uncompensated Care DSH Pool will be based on each hospital’s proportion of outpatient uncompensated care relative to other hospitals in each component of the pool. The process will be repeated for each component of the pool until the entire pool has been distributed. The process to accomplish this is detailed below.

Beginning in FY 2015, $5,000,000 of the Large-Urban Component of the pool will be distributed to reward and incentivize hospitals providing low cost and high quality Medicaid services. The Medicare Value Based Purchasing (VBP) Adjustment Factor will be obtained annually from the Federal Register. Each hospital’s respective payment from the $5,000,000 pool component will be calculated as follows:

\[(\text{Hospital's Outpatient Uncompensated DSH Hospital Pool Factor}) \times (\text{Hospital's VBP Adjustment Factor}) = (\text{Hospital's Outpatient Uncompensated DSH Value Adjustment Factor})\]

\[
\frac{(\text{Hospital Outpatient Uncompensated DSH Value Adjustment Factor})}{(\sum \text{All Hospital Outpatient Uncompensated DSH Value Adjustment Factors})} \times (\text{Total Pool Amount}) = (\text{Outpatient Uncompensated DSH Value Payment})
\]
1. A Medicaid outpatient payment to charge ratio will be calculated for each hospital as follows:

\[
\frac{\text{Hospital Title XIX Outpatient FFS Payments}}{\text{Hospital Title XIX Outpatient FFS Charges}} = \text{Hospital Title XIX Outpatient Payment to Charge Ratio}
\]

2. Net uncompensated outpatient charges will then be computed for each hospital as follows:

\[
(\text{Hospital Uncompensated Outpatient Charges}) - (\text{Hospital Uncompensated Outpatient Payments}) = \text{Net Hospital Uncompensated Outpatient Charges}
\]

3. The computed net hospital uncompensated outpatient charges will be standardized by converting them to a Medicaid fee-for-service payment equivalent. This will be done by multiplying the results of Step 1 by the results of Step 2 as follows:

\[
(\text{Hospital Title XIX Outpatient Payment to Charge Ratio}) \times (\text{Net Hospital Uncompensated Outpatient Charges}) = (\text{Net Hospital Outpatient Uncompensated Title XIX Equivalent Payments})
\]

4. Each hospital’s proportion of the pool component being calculated (or hospital pool factor) is determined by dividing their Medicaid fee-for-service payment equivalent by the total of all Medicaid fee-for-service payment equivalents of hospitals in the pool component. This step is expressed as follows:

\[
\frac{(\text{Net Hospital Outpatient Uncompensated Title XIX Equivalent Payments})}{\sum \text{of all Net Hospital Outpatient Uncompensated Title XIX Equivalent Payments}} = \text{Outpatient Uncompensated DSH Hospital Pool Factor}
\]

5. Each hospital’s respective pool component payment is determined by multiplying their hospital pool factor from Step 4 by the total pool component amount being calculated as follows:

\[
(\text{Outpatient Uncompensated DSH Hospital Pool Factor}) \times (\text{Outpatient Uncompensated DSH Pool Component Amount}) = (\text{Outpatient Uncompensated DSH Hospital Pool Component Payment})
\]

Pool component payments calculated for individual hospitals that are in excess of an individual hospital DSH ceiling will be placed back into that component of the pool. These payments will then be reallocated to the remaining hospitals in that component of the pool which have not exceeded the room available under their individual hospital DSH ceiling. The reallocation will be based on the original five step funding formula specified above. Only hospitals with available DSH ceiling capacity will be included in the relevant portions of the formula. This reallocation process will be repeated as many times as necessary to expend all funds in each component of the pool.
7.4 CALCULATION OF DSH CEILING [CHANGE MADE 4/1/18]

Hospital data utilized to calculate hospital-specific DSH ceilings includes inpatient and outpatient data. All charge, cost and payment data must be on an accrual basis for each hospital’s cost reporting period ending during the second previous state fiscal year. Data should be separated by subprovider.

1. **DSH Ceiling Financial Elements**
   - **Title XIX Charges** – Base year Title XIX charges include Title XIX charges for those beneficiaries enrolled in MHPs and beneficiaries dually enrolled in Title V and Title XIX.
   - **Title XIX Costs** – Multiply total base year Title XIX charges times the hospital’s Title XIX cost to charge ratio for the cost reporting period to determine Title XIX Costs. (The cost to charge ratio should be inclusive of capital and medical education costs.)
   - **Uninsured Charges** – Uninsured charges are charges for services provided to beneficiaries who do not have any insurance coverage or for services not covered by the patient’s insurance coverage. (Services covered by Medicare and/or Medicaid are not included as uninsured charges.)
   - **Uninsured Costs** – Multiply total base year uninsured charges times the hospital’s cost to charge ratio to determine uninsured costs. (The cost to charge ratio should be inclusive of capital and medical education costs.)
   - **Title XIX Payments** – Title XIX Payments made by MDHHS or MHPs for services are included in computing the base year Title XIX payments. (Payments must include capital and medical education payments.)
   - **Uninsured Payments** – Uninsured payments are those made by or on behalf of an individual beneficiary for the services included in computing base year uninsured payments.

The DSH ceiling calculation is:

\[
\text{Title XIX charges} \times \text{Title XIX cost to charge ratio} = \text{Title XIX costs} \\
\text{Uninsured charges} \times \text{uninsured cost to charge ratio} = \text{uninsured costs} \\
\text{Title XIX payments} + \text{uninsured payments} + \text{pool payments} = \text{total payments} \\
\text{Title XIX costs} + \text{uninsured costs} - \text{total payments} = \text{DSH ceiling}
\]

The following trend factors will be applied to the financial elements used to calculate hospital DSH ceilings only during the Initial DSH Calculation for each year. These trend factors will not be applied during the Interim DSH Settlement calculations.

- **Base Year Cost Inflation** – Inflation of base year costs (inpatient and outpatient) is computed using the Global Insight index of inflation for the entire hospital. Hospital costs are inflated from the hospital FYE to the current state FYE. Inflation of payments is computed from the hospital’s rate change over time.
- **Base Year Utilization Trend** – Hospital costs and payments are also adjusted from the state base year to the state current year end by the percentage change in the projected annual average Medicaid enrollment between the two periods.
During the Interim DSH Settlement calculation, an upward historical adjustment to the calculated DSH ceiling will be applied to those hospitals that meet certain requirements. To qualify, a hospital would need to be DSH eligible and have a higher audited ceiling calculation compared to the Interim ceiling calculation for each of the last three years of available DSH audits. An increase (revised 4/1/18) based on the difference between the audited ceiling and Interim ceiling from the most recent available year will then be applied to the current Interim DSH ceiling calculation. Hospitals may decline this upward adjustment by reducing their ceiling during the Interim DSH Settlement review period.

7.5 DISPROPORTIONATE SHARE HOSPITAL (DSH) PROCESS

The DSH process is designed to mitigate DSH audit-related recoveries. It is a multiple-step process that allows hospitals to provide input into the DSH calculations, decline DSH funds, and reduce their DSH ceiling. The multiple-step DSH process is as follows.

Step 1: Initial DSH Calculation

MDHHS will calculate hospital-specific DSH ceilings, DSH payment allocations and Medicaid utilization rates as part of its Initial DSH Calculation. Inpatient and outpatient data from the hospital’s cost reporting period ending during the second previous state FY will be used for the DSH ceiling, DSH payment and Medicaid utilization rate calculations. The data will be trended to the current FY for DSH ceiling calculation purposes. For example, data from hospital cost reports with FYs ending between October 1, 2009 and September 30, 2010 will be used to complete the FY 2012 Initial DSH Calculation.

MDHHS will share Initial DSH Calculations with hospitals. Hospitals will be able to decline DSH funds following the Initial DSH Calculation findings. If a hospital declines DSH funds during the Initial DSH Calculation step, the decision is irrevocable and the hospital is not eligible for any DSH funds for that state FY. Hospitals may also request a downward adjustment to their DSH ceiling during the Initial DSH Calculation step. Upon receipt of this feedback from hospitals, each hospital’s calculated DSH ceiling will be reduced to the requested amount. No hospital will receive a DSH payment in excess of its initial DSH ceiling.

DSH payments will be applied against a hospital’s DSH ceiling in the following order:

1. $45 Million Pool
2. Outpatient Uncompensated Care DSH Pool
3. University with Both a College of Allopathic Medicine and a College of Osteopathic Medicine Pool (University Pool)
4. Indigent Care Agreements Pool (ICA Pool)
5. Government Provider DSH Pool (GP DSH Pool)

Step 2: Interim DSH Settlement

DSH ceilings, DSH payments and Medicaid utilization rates are recalculated using new cost report data during the Interim DSH Settlement step to mitigate final DSH audit-related DSH recoveries. This may
result in DSH recoveries for some hospitals during this step. DSH funds will be reallocated in a manner that maintains the pool order outlined in the Initial DSH Calculation step.

As part of the Interim DSH Settlement, MDHHS will recalculate hospital-specific DSH ceilings, DSH payment allocations and Medicaid utilization rates during the year following the applicable DSH year. Inpatient and outpatient data from cost reports with hospital FYs ending during the previous calendar year will be utilized for ceiling, payment, and Medicaid utilization rate recalculations. The data will not be trended. For example, during 2013, data from hospital cost reports with FYs ending between January 1, 2012 and December 31, 2012 will be used to complete the FY 2012 Interim DSH Settlement calculations.

MDHHS will share Interim DSH Settlement results with hospitals. Hospitals are able to decline DSH funds following the Interim DSH Settlement. If a hospital declines DSH funds during the Interim DSH Settlement step, the decision is irrevocable and the hospital is not eligible for any DSH funds for that state FY. Hospitals may also request a downward adjustment to their DSH ceiling during the Interim DSH Settlement step. Upon receipt of this feedback from hospitals, each hospital's calculated DSH ceiling will be reduced to the requested amount and Interim DSH Settlement payments will be issued.

Funds recovered from the $45 Million Pool and Outpatient Uncompensated Care DSH Pool are reallocated to other qualifying hospitals within that pool based on the original formula used to allocate funding from the pool. Funds recovered from the ICA Pool will be reallocated to other qualifying hospitals within that pool.

No hospital will receive a DSH payment in excess of its Interim DSH Settlement ceiling.

**Step 3: Final DSH Audit-Related DSH Redistribution**

If the Final DSH Audit determines that a hospital has been paid in excess of its hospital-specific DSH ceiling, funds will be recovered from hospitals in the following order:

1. Funds from pools allocated exclusively to state government-owned or -operated or non-state government-owned or -operated public hospitals
2. All other DSH pools

MDHHS will recoup all payments that exceed audited hospital-specific DSH ceilings in the order stated above and then apply the following redistribution process. Only funds that exceed the audited hospital-specific DSH ceiling will be recovered and redistributed:

1. Funds recovered from pools allocated exclusively to state government-owned or -operated, or non-state government-owned or -operated public hospitals are reallocated to other like hospitals up to the lesser of the audited hospital-specific ceilings or other federal limits. No hospital is to receive a DSH payment that exceeds its audited hospital-specific DSH ceiling. Unspent DSH funds will be added to the "All Other DSH Pools" described in Step 2 below. The formulas to redistribute these recouped funds are as follows:
   a. \( \frac{\text{Eligible Hospital’s Remaining Audited DSH Ceiling Capacity}}{\Sigma \text{of all Eligible Hospitals’ Audited Remaining DSH Ceiling Capacity}} = \text{Hospital Pool Factor} \)
   b. \( \text{Hospital Pool Factor} \times \text{Pool Amount} = \text{Pool Payment} \)
2. Funds recovered from the other DSH pools, plus any unspent DSH funds recouped from pools allocated exclusively to state government-owned or -operated, or non-state government-owned
or -operated public hospitals, are reallocated to all remaining eligible hospitals proportionately based on their share of remaining audited hospital-specific DSH ceiling capacity adjusted to exclude the DSH payment amounts hospitals received from the ICA, University and GP DSH Pools during the Initial DSH Calculation and Interim DSH Settlement steps. No hospital will receive an allocation in excess of its remaining audited hospital-specific DSH ceiling capacity. The formulas to redistribute these recouped funds are as follows:

a. \[
    \frac{\text{Eligible Hospital’s Remaining Audited DSH Ceiling Capacity} + \text{ICA DSH Payment Amount} + \text{University DSH Payment Amount} + \text{GP DSH Payment Amount}}{\sum \text{Eligible Hospitals’ Audited Remaining DSH Ceiling Capacity} + \text{ICA DSH Payment Amount} + \text{University DSH Payment Amount} + \text{GP DSH Payment Amount}} = \text{Hospital Pool Factor}
\]

b. \[
    \text{Hospital Pool Factor} \times \text{Pool Amount} = \text{Pool Payment}
\]

Pool payments calculated for individual hospitals that are in excess of a hospital’s audited DSH ceiling will be placed back into that pool. These payments will then be reallocated to the remaining hospitals in that component of the pool which have not exceeded their audited hospital-specific DSH ceiling capacity. The reallocation will be based on the funding formula specified above. Only hospitals with available audited DSH ceiling capacity will be included.

In addition, any unspent federal DSH allotment will be distributed using the formula outlined in Step 3: Final DSH Audit-Related DSH Redistribution through a new pool. Funds from this pool will first be allocated to state government-owned or -operated hospitals up to applicable federal DSH limits. Any remaining unspent DSH allotment will be allocated proportionally to all other hospitals based on remaining DSH limit capacity.

### 7.5.A Distribution of DSH Payments for Merged Hospitals

When two or more hospitals merge, eligibility for DSH payments after the merger is based on the combined cost report data of the merged hospitals.

### 7.6 Medicaid Access to Care Initiative

To ensure continued access for Medicaid patients to high quality hospital care, MDHHS established special funding pools. The pool dollar amounts are renewed annually and posted on the MDHHS website.

To keep payments within the Medicare upper payment limits, separate pools are established for privately owned or operated hospitals and nonstate government-owned or operated hospitals for both inpatient and outpatient hospital services. Only hospitals located within Michigan, enrolled in Medicaid, open, treating, and admitting Medicaid FFS and MHP patients 10 days prior to a scheduled payment are eligible to receive distributions from these pools.

### 7.6.A Pool Descriptions

#### 7.6.A.1 Privately-Owned or Operated Inpatient Hospital Pool

This inpatient pool is computed based upon the total number of privately owned DRG reimbursed hospitals and distinct part rehabilitation units. Privately owned freestanding rehabilitation hospitals with Medicaid FFS payments also participate in this pool.
Hospitals with Medicaid inpatient FFS payments share proportionately in this pool based on each hospital’s total Medicaid FFS inpatient payments divided by the total Medicaid FFS inpatient payments for all privately owned or operated hospitals and units.

7.6.A.2. Privately-Owned or Operated Outpatient Hospital Pool

This outpatient pool is computed based upon the total number of privately owned outpatient units of DRG reimbursed hospitals and privately owned outpatient hospital rehabilitation units.

Hospitals with Medicaid outpatient FFS payments share proportionately in this pool based on each hospital’s total Medicaid FFS outpatient payments divided by the total Medicaid FFS outpatient payments for all privately-owned or operated hospitals and units.

7.6.A.3. Nonstate Government-Owned or Operated Inpatient Hospital Pool

This inpatient pool is computed based upon the total number of nonstate government-owned DRG reimbursed hospitals and distinct part rehabilitation units. Nonstate government-owned freestanding rehabilitation hospitals with Medicaid FFS payments participate in this pool also.

Hospitals with Medicaid inpatient FFS payments share proportionately in this pool based on each hospital’s total Medicaid FFS inpatient payments divided by the total Medicaid FFS inpatient payments for all nonstate government-owned or operated hospitals and units.

7.6.A.4. Nonstate Government-Owned or Operated Outpatient Hospital Pool

This outpatient pool is computed based upon the total number of nonstate government-owned outpatient units of DRG reimbursed hospitals and outpatient hospital rehabilitation units.

Hospitals with Medicaid outpatient FFS payments share proportionately in this pool based on each hospital’s total Medicaid FFS outpatient payments divided by the total Medicaid FFS outpatient payments for all nonstate government-owned or operated hospitals and units.

7.6.B. Pool Sizes

A historical list of MACI pool sizes is maintained on the MDHHS website. (Refer to the Directory Appendix for website information.)

7.6.C. Distributions

The distribution from these pools will supplement hospitals’ regular DRG and per diem payments (for rehabilitation units and hospitals) and is not considered part of a hospital’s FFS reimbursement. Medicaid payers that normally match MDHHS FFS payments to
medical providers are not required to match the distribution payments from these pools as part of their FFS payments.

The MACI pool dollar amounts will be renewed annually. The dollar amounts of the new pools will be based on the calculated gap between the Medicare Upper Payment Limit and Medicaid fee-for-service payments.

7.6.D. PAYMENT SHARE

The inpatient and outpatient hospital files used to distribute MACI payments will include FFS payments made on behalf of both Medicaid and CSHCS eligible beneficiaries.

7.6.D.1. INPATIENT PAID CLAIMS FILE

To determine each hospital’s share of a pool, MDHHS will use paid claims for the fiscal year ending two years prior to the current fiscal year. Claims will be restricted to those paid by June 30th of the following year (e.g., paid claims from FY 2004 paid by June 30, 2005 will be used to calculate the FY 2006 MACI payments). The paid claims file will include all FFS payments made through CHAMPS, including DRG and per diem payments, DRG outlier payments, and claims paid based on a percent of charge. Paid claims will include those with other insurance and patient-pay amounts. Inpatient services will include both acute and rehabilitation services provided through distinct part rehabilitation units, freestanding rehabilitation hospitals, and subacute ventilator-dependent care units. Services paid to LTC providers will not be included, with the exception of services paid to subacute ventilator-dependent care units with beds licensed as hospital beds. Revenue from licensed hospital beds utilized at less than an acute or rehabilitation level of care will be excluded from the paid claims file, with the exception of revenue from subacute ventilator-dependent care beds licensed as hospital beds. Payments made outside CHAMPS, such as capital, graduate medical education (GME), and disproportionate share hospital (DSH), will not be included in the paid claims file used to distribute the MACI hospital pools.

7.6.D.2. OUTPATIENT DISTRIBUTION DATA

To determine each hospital’s share of a pool, MDHHS will use paid claims for the fiscal year ending two years prior to the current fiscal year. Claims will be restricted to those paid by June 30 of the following fiscal year (e.g., paid claims from FY 2014 will be used to calculate payments in FY 2016 with claims limited to those paid by June 30, 2015). The paid claims file will include all Medicaid FFS payments made for both Medicaid and dual CSHCS eligible beneficiaries through the CHAMPS System. Outpatient services will include both acute and rehabilitation services. Payments made outside CHAMPS, such as capital, graduate medical education (GME), or disproportionate share hospital (DSH), will not be included in the payments used to distribute the MACI pools.

7.6.E. ALLOCATION OF POOLS

MACI distributions are made prospectively based on historical data. Eligible hospitals will share proportionately from each pool based upon a hospital’s total paid claims (inpatient)/MMF payments (outpatient), divided by the total Medicaid paid claims/MMS
payments for all eligible hospitals, times the dollar amount of the individual pool. If a hospital closes or is determined ineligible to receive distributions from a pool, its MACI distribution will be redistributed to the remaining eligible hospitals based on the original distribution formula. In the event the MACI distributions would result in aggregate Medicaid payments exceeding the UPL, the size of the pool(s) will be reduced to bring the aggregate Medicaid payments within the UPL.

7.6.F. LIMITS TO INDIVIDUAL HOSPITALS

Total Medicaid payments are limited by federal regulation to a hospital’s charges for inpatient services and by state policy to the lower of charges or costs for outpatient services. These limits apply by hospital fiscal year for FFS reimbursed services. Hospitals may elect to receive less (but not more) than their calculated quarterly MACI payment. The amount by which a hospital elects to reduce its payment will be redistributed to the remaining eligible hospitals based on the original distribution formula until the respective MACI pools are empty. All MACI payments are final. If charge/cost limits are exceeded, the amounts in excess of the limits will be recovered from hospitals at the time of final settlement. Any funds recovered from hospitals at final settlement will not be redistributed.

Prior to the first quarterly MACI payment for each state fiscal year, each hospital will be notified of the amount of its calculated quarterly MACI payments. A hospital electing to reduce a portion of any MACI payment to avoid exceeding charge/cost limits must inform the state of the amount to be reduced by no later than two weeks prior to the scheduled payment date.

7.6.G. PAYMENT SCHEDULE

MACI payments are made within 45 days of the beginning of each quarter. Quarterly payments are made in four equal installments based on the annual amount each hospital is eligible to receive. However, if a hospital elects to reduce a portion of any MACI payment to avoid exceeding charge/cost limits, then that payment is reduced to the amount specified by the hospital.

7.7 SPECIAL PAYMENT ADJUSTMENTS

Effective August 1, 2007 and each subsequent fiscal year, MDHHS is directed to reduce hospital payments in each respective fiscal year. These reductions are pursuant to the budgetary savings included in the MDHHS annual appropriations act. The amount of the reductions and the distribution by hospital are posted on the MDHHS website. (Refer to the Directory Appendix for website information.) The calculation of the reductions by hospital is described below.

A calculated share of the total annual reductions will be assessed to all hospitals and units operating and enrolled in the Medicaid program on the date the reductions are processed. A hospital's annual reduction will be based on its inpatient hospital paid claims for hospital admissions from October 1 to September 30 of the second previous fiscal year. (The same paid claims file will be used to calculate the hospital MACI payments and the reductions for the fiscal year.) Paid claims include Title V, Title XIX, and Title V/XIX inpatient hospital claims. A hospital's share of the annual reductions is calculated by dividing the total of
its paid claims by the total of the paid claims for all affected hospitals times the total amount of funds to be recovered.

Merged hospitals will have their reductions combined. Reductions will be taken from the surviving hospital. Should a hospital or distinct part unit close prior to the end of the fiscal year, its reduction will become part of the hospital's final settlement.

Each hospital's share of the reductions will be made by gross adjustments to the hospital's inpatient provider NPI number. Recoveries will be taken from the hospital's payments until the reductions are complete.

### 7.8 Rural Access Pool

The Rural Access Pool (RAP) is a pool for hospitals that provide Medicaid services to low-income rural residents and will be created and renewed annually. To be eligible for this pool, hospitals must be categorized by CMS as a sole community hospital, or meet both of the following criteria:

- A hospital must have 50 or fewer staffed beds. MDHHS will calculate staffed beds by dividing the total hospital days reported by the hospital on its Medicaid cost report with a FY ending between October 1, 2010 and September 30, 2011 by the number of days covered in the cost report; and
- A hospital must be located in a county with a population of not more than 165,000 and within a city, village, or township with a population of not more than 12,000. The population threshold will be measured against population counts from the 2000 federal decennial census.

Each hospital's allocation from this pool will be calculated as the unreimbursed cost the hospital incurred providing inpatient and outpatient services to Michigan Medicaid beneficiaries during its cost period that ended during the second previous FY. (Example: To calculate the FY 2014 pool, hospital cost reports with FYs ending between 10/1/2011 and 9/30/2012 will be used.) The following gross Medicaid payments from this cost report period will be applied against cost to determine unreimbursed costs: operating, capital, graduate medical education (GME), executive order reductions, and Medicaid Access to Care Initiative (MACI). Payments from this pool will be issued quarterly in four equal installments based on the total amount the hospital is eligible to receive.

In the aggregate, MDHHS will reimburse hospitals up to the maximum allowable under the federal upper payment limits for inpatient and outpatient services provided to Medicaid beneficiaries. To keep total Medicaid Fee-For-Service payments to hospitals within the federal upper payment limits, MDHHS will reduce the size of the corresponding FY MACI pool each year by the amount of the RAP.

Payments made from the RAP will be applied against hospitals' inpatient and outpatient settlement limits. Funds paid in excess of these limits will be recovered during settlement, and the federal share returned to the federal government.
SECTION 8 - GRADUATE MEDICAL EDUCATION

8.1 SERVICE OF TEACHING PHYSICIANS

Medicaid uses the Medicare Principles of Reimbursement to determine Medicaid allowable costs in the hospital setting. The administrative costs associated with teaching physician services as well as payment for direct patient care services provided by an intern, resident, or fellow in a teaching setting and supervised by a teaching physician, are subject to guidelines and conditions developed and published by Medicare.

Teaching institutions and teaching physicians within those institutions must abide by the CMS physician guidelines which explain when services provided in a teaching setting can be billed to Medicaid on a FFS basis or must be reported as allowable medical education costs on the hospital’s cost report. The most recent guidelines for when the program may be billed directly are found in 42 CFR §415.

The guidelines require the presence of the teaching physician during the key portion of the performance of a service in which a resident is involved for which payment is sought by the teaching physician (or the hospital on behalf of the physician). The medical record must fully support the physician presence and participation in the service provided. There are exceptions and other considerations that may apply. Consult the full text of the guidelines to be sure you are in compliance for both Medicare and Medicaid.

Medicaid covers preventative medicine services that Medicare does not cover. For Medicaid, preventative medicine evaluation and management services are identified by procedure codes 99381 through 99397. These preventative medicine services may be provided without the presence of the teaching physician as long as all other requirements for the “presence” exception for E/M services furnished in certain primary care centers are met. Follow-up for any abnormal findings during a preventative medicine visit is subject to the teaching physician guidelines for all E/M services.

8.2 FORMULA PAYMENTS TO HOSPITALS FOR HEALTH PROFESSIONS EDUCATION

Payments are made directly to hospitals by formula from three pools of funds. Payments are fixed, prospective payments, made in full, and are not subject to future cost settlement or appeal. Payments are made only to hospitals that provide requested information by the dates required.

8.3 DISTRIBUTION OF GME FUNDS

Distribution of graduate medical education funds is calculated annually for three formula pools: the Dental and Podiatry, the GME Funds and the Primary Care. In order to receive funds for GME, a hospital must have operated a nationally accredited medical education program(s) in the fiscal year that data is drawn from the hospital cost reports used to calculate the GME payments. Payments are fixed, prospective payments, made in full and are not subject to future cost settlement or appeal. Payments are made only to hospitals that provide requested information by the dates required.

Only intern and resident full time equivalents (FTEs) in approved programs as specified in Federal Regulations (see 42 CFR §413.75-83) are eligible for inclusion in the data used to calculate the distribution of the Dental and Podiatry, the GME Funds and the Primary Care Pools.

- To obtain an average FTE payment for dental and podiatry residents, the GME liability for hospitals operating dental and podiatry residency programs only are summed. Hospital GME
liability data is drawn from calendar year 1995 filed hospital cost reports used to calculate GME payments made to hospitals between July 1, 1997 and December 31, 2001. The summed total of these liabilities is divided by the total number of dental and podiatry FTEs as reported by the same hospitals and from the same filed cost reports that the GME liability data is drawn. The product is an average dental and podiatry FTE payment that is made to all hospitals reporting these FTEs.

- Annually, each hospital reporting dental and podiatry FTEs is reimbursed the average dental and podiatry FTE payment, as calculated above, for each dental and podiatry FTE it reports. Data for each hospital’s dental and podiatry FTE count is drawn from the hospital cost report (Worksheet E-4, Title XVIII, Line 10, Column 2). If the cost report is changed, equivalent data is used. Dental and podiatry FTEs are drawn from hospital cost reports for the same state fiscal year that FTEs are drawn to distribute the GME Funds and the Primary Care Pools.

- The dental and podiatry FTE payments made to all hospitals are summed and the total is deducted from the GME Funds Pool before any other distributions are made from this pool.

- Once the dental and podiatry FTE payments have been deducted, the remaining funds in the GME Funds Pool are distributed as described later in this section.

- Each hospital’s dental and podiatry FTE count and the total dollar amount allocated to pay hospitals for dental and podiatry FTEs is updated annually. The average dental and podiatry FTE dollar payment is not. The average dental and podiatry FTE dollar payment is adjusted only when the GME Funds and the Primary Care Pools are adjusted. Any adjustment to the average dental and podiatry FTE dollar payment is proportional to the changes in these two pools.

To distribute funds from the GME Funds and the Primary Care Pools, data is drawn from accepted hospital cost reports for the most recent fiscal year that data is available. For the GME Funds Pool, the unweighted FTE count is used (Worksheet E-4, Title XVIII, Line 6). For the Primary Care Pool, the weighted FTE count for primary care physicians is used (Worksheet E-4, Title XVIII, Line 8, Column 3). If the cost report is changed, equivalent data is used.

Both the hospital and its residency programs must be operating during the funding period in order to receive GME funds. Hospitals must notify MDHHS in writing at least 30 days prior to the termination date of any of its residency programs. Funds distributed to ineligible hospitals are subject to recovery.

GME payments to hospitals that merge are combined, provided that the surviving hospital continues to operate all residency programs that the pre-merger hospitals operated. The surviving hospital must notify MDHHS within 30 calendar days after the merger is completed of any reductions or terminations to its residency programs. The GME payments to the surviving hospital are reduced proportionately to the reduction in its GME programs. Overpayments to surviving hospitals based on reductions in GME programs are subject to recovery.

8.4 GME FUNDS POOL

Adjustments made to the amount of the GME Funds Pool due to legislative action or executive order are posted on the MDHHS website. (Refer to the Directory Appendix for website information.)
The dollar amount of this pool is appropriated annually by the legislature. To calculate each eligible hospital’s share of the GME Funds Pool, the following formulas are used:

\[
\text{FTEs} \times \text{Case Mix} \times \left( \frac{\text{Hospital's Title V & Title XIX Days}}{\text{Hospital's Total Days}} \right) = \text{Adjusted FTEs}
\]

\[
\text{Pool Size}^* \times \left( \frac{\text{Adjusted FTEs}}{\sum \text{Adjusted FTEs}} \right) = \text{Hospital's Distribution}
\]

* GME Funds Pool size: $52,565,600

8.5 PRIMARY CARE POOL

Adjustments made to the amount of the Primary Care Pool due to legislative action or executive order are posted on the MDHHS website. (Refer to the Directory Appendix for website information.)

The dollar amount of this pool is appropriated annually by the legislature. To calculate each hospital’s share of the Primary Care Pool, the following formula is used:

\[
\text{FTEs} \times \left( \frac{\text{Hospital's Title V & Title XIX Outpatient Charges}}{\text{Hospital's Total Charges}} \right) = \text{Adjusted FTEs}
\]

\[
\text{Pool Size}^* \times \left( \frac{\text{Adjusted FTEs}}{\sum \text{Adjusted FTEs}} \right) = \text{Hospital's Distribution}
\]

* Primary Care Pool size: $10,322,700

8.6 DEFINITIONS/NOTES

<table>
<thead>
<tr>
<th>Title V &amp; Title XIX Days</th>
<th>Includes FFS days. Days include those from distinct-part psychiatric and distinct-part rehabilitation units.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Title V &amp; Title XIX Outpatient Charges</td>
<td>Includes FFS outpatient charges. Charges include those from distinct-part psychiatric units.</td>

<tr>
<td># of Hospital Eligible Resident FTEs</td>
<td>Number of Hospital Eligible Resident FTEs for the GME Funds and the Primary Care Pools FTE data is drawn from hospital cost reports as indicated above.</td>
</tr>
<tr>
<td>Hospital’s Non-Traditional Case Mix</td>
<td>The sum of the hospital's payments for all Medicaid admissions divided by the number of Medicaid admissions during the period covered. This figure is then divided by the hospital's price or rate.</td>
</tr>
</tbody>
</table>

8.7 PAYMENT SCHEDULE

Payments from the GME Funds and the Primary Care Pools will be made quarterly in four equal payments. Payments from the Dental and Podiatry Pool will be made once annually.

8.8 GME INNOVATIONS AGREEMENTS

8.8.A. GME INNOVATIONS HOSPITAL PROGRAM

GME Innovations Agreements support innovative GME programs that emphasize the importance of coordinated care, health promotions and psychiatric care in integrated systems. The purpose of this training is to develop the skills and experience necessary to provide psychiatric services utilized by Michigan Medicaid patient groups. Current single state agency agreements with innovative hospital GME programs include:
Detroit Receiving Hospital for $8,929,800 annually;
Edward W. Sparrow Hospital for $2,018,078 annually;
Pine Rest Christian Mental Health Services for $3,960,000 in FY17, $6,336,000 in FY 18, and $7,603,200 in FY 19 and future years.

MDHHS will approve three agreements statewide each fiscal year. To be eligible for the pool, a hospital must meet the following criteria:

- Be a Michigan Medicaid enrolled provider.
- Have in place an approved agreement between itself, a university psychiatric residency training program, and one or more community mental health services programs to provide accredited psychiatric residency training.
- Provide assurances that all training will take place in Michigan and prepare health care professionals to provide care to populations with the special characteristics of Michigan Medicaid patient groups.

### 8.8.B. GME Innovations Sponsoring Institution Program

The GME Innovations Sponsoring Institution Program supports limited non-hospital affiliated GME Programs that emphasize the importance of coordinated care, health promotions and psychiatric care in integrated systems. The purpose of this training is to develop the skills and experience necessary to provide psychiatric services utilized by Michigan Medicaid patient groups.

The GME Innovations Sponsoring Institution Program supports limited non-hospital affiliated GME programs that meet the requirements below. This includes sponsoring institutions whose primary purpose is to provide educational programs and/or health care services. A sponsoring institution assumes the financial and academic responsibility for a GME program.

The single state agency will approve one (1) agreement statewide each Fiscal Year (FY). This agreement will be with Authority Health for $2.8 million for FY 2017 and $3.1 million for FY 2018 and subsequent years. If GME distributions exceed the expenses incurred by the sponsoring institution in residency training, the size of the agreement will be reduced to bring these elements into alignment. To be eligible for the GME Innovations Program without a hospital partner, an organization must meet the following criteria:

- The organization must possess appropriate accreditation credentials.
- The organization must meet the requirements associated with receiving Medicaid payments.
- The organization must have an approved agreement with a sponsoring institution, a university psychiatric residency training program, and one or more community mental health services programs to provide accredited psychiatric residency training.
- The organization must provide assurances that all training will take place in Michigan and prepare health care professionals to provide care to populations with the special characteristics of Michigan Medicaid patient groups.
SECTION 9 - COST REPORTING REQUIREMENTS

Each hospital, unless specifically exempt, is required to submit a MDHHS Cost Report package to the MDHHS HCRD on or before the last day of the fifth month following the close of its cost reporting period. The HCRD grants extensions only when a hospital’s operation is adversely affected due to circumstances beyond its control (e.g., staffing turnovers are considered within the control of the hospital, whereas fires and floods would be considered beyond its control). If a hospital fails to submit a completed cost report package on time and has not been granted an extension of the time limit, a notice of delinquency is issued. If the cost report package is not submitted within 30 calendar days from the date of the notice of delinquency, the hospital’s payments are terminated until the cost report package is received and accepted by MDHHS. Payments withheld due to late submission are paid upon acceptance of the cost report package.

The cost report package covers a 12-month cost reporting period unless the Medicare and Medicaid Programs have granted prior approval. Approval for filing a cost package for a period less than 12 months may be granted when a hospital changes the end date of its cost reporting period. In such case, the hospital is required to file a cost report package for the period between the end of the original cost reporting period and the beginning of the new cost reporting period.

Hospitals with subacute ventilator dependent care units must obtain MDHHS approval to file cost report packages treating the unit as a subprovider in accordance with the HIM-15 2336, 2336.1, 2336.2, and 2336.3. MDHHS approval must be requested in writing from the HCRD and must be obtained prior to the start of the first hospital fiscal year during which the exemption applies.

Each hospital's cost report data must include an itemized list of all expenses recorded from the formal and permanent accounting records of the facility. The accrual method of accounting is mandated for all facilities not owned by government. Generally accepted accounting principles must be followed. All of the hospital's accounting and related records, including the general ledger, books of original entry, and statistical data, must be maintained for at least three years after receipt of final settlement (42 CFR §413.20 and Provider Reimbursement Manual §2304; 42 CFR §405.1885). These records must be made available for verification during onsite visits by state or federal audit staff. All cost report packages are retained by MDHHS for at least three years following the date of settlement.

MDHHS electronically notifies all providers of the specific information needed to file an acceptable MDHHS cost report package. The cost report package must be sent to MDHHS HCRD. The cost report package must include:

- The CMS 2552 Medicare standardized electronic cost report (ECR) filed in the manner required by MDHHS for MDHHS programs reporting.
- MDHHS specific filed cost report with worksheets including, but not limited to: General Hospital Information, Settlement Summary Page, Capital Cost, GME, Rehab Unit Settlement, Outpatient Education Settlement, the Indigent Volume Report form for Title V and Title XIX, Healthy Michigan Plan, and Managed Care Organization (MCO).
- A signed Provider Certification page produced by the MDHHS filed Cost Report Application for Title V, Title XIX and Healthy Michigan Plan.
- The hospital’s audited Financial Statements.
The cost report package is accepted only if all of the following conditions are met:

- All submitted documents are in a usable format.
- MDHHS can generate a full CMS 2552 cost report from the electronic cost report file. MDHHS uses the KPMG/CompuMax system to generate viewable cost reports.
- The signed, error-free Provider Certification page.
- Data is provided for all authorized MDHHS units and programs (Medical/Surgical, Rehabilitation, Outpatient, Psychiatric, Clinic, Title V, Title XIX and Healthy Michigan Plan).
- Data meet a set of reasonableness checks, or variances are explained.
SECTION 10 – AUDITS

The audit and settlement process determines the amount of reimbursement to which an individual hospital is entitled. Cost settlements are made to assure payment of the MDHHS share of reimbursable cost. The audit and settlement process begins with the receipt of the hospital’s annual cost report and ends with the electronic issuance of the Notice of Amount of Program Reimbursement that conveys the results of the audit.

10.1 DESK AUDIT

The audit process includes desk audit procedures and audit scope determinations for both MDHHS program(s) audit verification purposes and, under the Common-Audit Agreement with the Medicare fiscal intermediary, determination of allowable costs. All cost reports are examined to:

- Verify the completeness and arithmetic accuracy of all schedules in the report;
- Reconcile reported hospital program data with MDHHS approved data; and
- Identify the need for supporting documentation and arrange to receive same.
SECTION 11 – SETTLEMENTS

11.1 INITIAL SETTLEMENT(S)

Settlement is based upon processed non-zero dollar MDHHS programs liability invoices for services rendered to MDHHS beneficiaries during the cost report period and remitted prior to the paid claim report run date.

Initial settlements may be calculated using the cost information determined from the cost report and from charges for services to MDHHS beneficiaries as accumulated by MDHHS.

Inpatient MDHHS applicable programs upper payments limit is allowable inpatient charges. Outpatient MDHHS applicable programs upper payments limit is allowable outpatient costs.

Total payments for inpatient services are limited to the lesser of operating amount approved (DRG, per diem, and the operating portion of any percent of charge payments), plus capital less any limits that apply, or full charges. This limitation is applied separately by program against the aggregate operating payment amounts approved and capital payments.

Final reimbursement is limited to the lesser of outpatient payment amounts approved, allowable outpatient charges, or allowable outpatient costs.

11.2 HOSPITAL UNDERPAYMENTS AND OVERPAYMENTS

11.2.A. UNDERPAYMENTS TO A HOSPITAL

MDHHS pays a determined amount of an initial settlement due a hospital after notice has been furnished to the hospital. However, MDHHS retains the right to withhold a portion of an initial payment based on individual circumstances.

11.2.B. OVERPAYMENTS TO A HOSPITAL

Once a determination of overpayment has been made, the amount so determined is a debt owed to the State of Michigan and is recovered by MDHHS after notice has been furnished to the hospital.

11.3 FINAL SETTLEMENT(S)

Settlement is based upon processed non-zero dollar MDHHS liability claims for services rendered to MDHHS beneficiaries during the cost report period and remitted prior to the paid claim report run date.

MDHHS calculates the final settlement amount to be reimbursed 27 months after the period covered by the cost report and sends the hospital MDHHS programs audit adjustment reports. Once the final settlement MDHHS audit adjustment reports are transmitted to the hospital, the Medicare/Medicaid CMS 2552 report and/or the Michigan Medicaid Forms (MMF) will not be amended unless specific cost report changes are approved by MDHHS.

The total amount paid for inpatient capital is settled 27 months after the hospital’s fiscal year ends.
For testing against the Medicare upper payment limits, inpatient payments are limited by allowable inpatient charges and outpatient payments are limited by allowable outpatient costs.

Total payments for inpatient services are limited to the lesser of operating amount approved (DRG, per diem, and the operating portion of any percent of charge payments), plus capital less any limits that apply, or full charges. This limitation is applied separately by program against the aggregate operating payment amounts approved and capital payments.

Final reimbursement is limited to the lesser of outpatient payment amounts approved, allowable outpatient charges, or allowable outpatient costs. Separate settlements are made for each program and each unique outpatient NPI.

11.4 RESPONSES TO THE AUDIT ADJUSTMENT REPORT(S)

The Audit Adjustment Report contains a descriptive list of all program data adjustments made to a cost report by the MDHHS HCRD audit staff. The Notice of Amount of Program Reimbursement is the notice of final determination and is considered the offer of settlement for all reimbursement issues for the cost reporting period under consideration.

The process is initiated by the hospital after the receipt of the Audit Adjustment Report. The MDHHS HCRD concludes the process on the day the Notice of Amount of Program Reimbursement is electronically transmitted to the hospital.

The Audit Adjustment Report must be accepted or rejected by the hospital within 30 calendar days of the Notice of Amount of Program Reimbursement is electronically transmitted to the hospital.

The hospital may take the following actions:

- **Hospital Accepts the Notice of Amount of Program Reimbursement Report**
  
  If the hospital accepts the findings contained in the Audit Adjustment Report, an appropriate officer of the hospital must sign the Audit Adjustment Report and transmit it to the MDHHS HCRD. (Refer to the Directory Appendix for contact information.) MDHHS programs Notice of Amount of Program Reimbursement will be electronically transmitted to the hospital. No further administrative appeal rights will be available for the adjustments contained in the Audit Adjustment Report.

- **Hospital Does Not Respond to the Notice of Amount of Program Reimbursement Report**
  
  If the hospital does not respond within this time period, MDHHS shall electronically transmit a Notice of Amount of Program Reimbursement, which is the final determination of an adverse action. No further administrative appeal rights are available.

- **Hospital Rejects the Notice of Amount of Program Reimbursement Report**
  
  If the hospital rejects any or all of the findings contained in the Audit Adjustment Report within 30 calendar days of the transmit date of the Notice of Amount of Program Reimbursement, then an informal appeal can be requested. An informal appeal process involves the audit staff and the hospital working to resolve differences prior to a formal appeal. The hospital may request a formal appeal hearing which must be filed within 180 calendar days after the Notice of Amount of
Program Reimbursement is electronically transmitted by MDHHS to the hospital. Upon the timely receipt by MDHHS of an Application to Appeal Amount of Program Reimbursement, rules R400.3408 through R400.3424 shall be invoked.

11.5 REOPENING OF SETTLEMENTS

For all MDHHS final settlement reopenings, MDHHS has adopted and follows all applicable provisions of the Medicare Provider Reimbursement Manual (HIM-15), Part 1, Sections 2931 and 2932, as well as all applicable provisions of 42 CFR Section 405.1885 et. seq.

For all reopenings, there is a three-year statute of limitations that begins on the date of the original MDHHS Notice of Amount of Program Reimbursement. The three-year time period ends on the third anniversary of that date.

A separate Notice of Reopening will be required for each provider and each cost year.

If MDHHS electronically notifies a provider of its Notice of Reopening before the expiration of the three-year period, the three-year requirement will be considered met. After this point, the reopened settlement should be completed in a timely fashion.

Neither the existence of a Common Audit Agreement between MDHHS and the Medicare Intermediary nor whether the Medicare Intermediary provides timely notice of a Medicare settlement reopening will affect the application of the three-year time limit on MDHHS settlement reopenings.

Once the final settlement has been calculated and the MDHHS audit adjustment report has been sent to the hospital, the Medicare/Medicaid CMS 2552 report will not be amended without specific CMS 2552 changes being approved by MDHHS.

New laws, regulations, policy directives, or the interpretation of such issued subsequent to a settlement will not serve as basis to reopen a settlement. Nor can any of the above be introduced as part of a reopened settlement. The sole exception is when MDHHS is directed to do so by court order.
SECTION 12 - APPEALS

12.1 DATA CORRECTIONS

Once a hospital report (e.g., cost, indigent volume, and/or data) has been reviewed and provisionally accepted by MDHHS, the hospital is notified in writing of MDHHS acceptance of the report. The hospital then has 30 calendar days in which to notify MDHHS of any errors or corrections to the report/data. After the 30-day notification period, the report is deemed accepted by MDHHS and will be used to rebase or update the hospital's pricing components as appropriate.

Only those reports on file and accepted nine months prior to the beginning of a new rate period are used for rebasing.

12.2 PRICE APPEALS

MDHHS considers appeal requests received within 30 calendar days from the date of notice to the hospital advising it of a change in its pricing components. Appeal requests must be submitted in writing to MDHHS. Requests must clearly state the item(s) being appealed, the remedy being sought, and must include all necessary documentation to support the hospital’s position. Appeal requests received after 30 calendar days are not accepted. Appeal requests may not be used as a means to delay submission or fail to produce cost reports in the format and within the time frame required. Failure to include all necessary documentation to support the hospital’s position may result in a hospital’s appeal request being rejected.

<td>• Nonprogram related issues.</td>
</tr>
</tbody>
</table>

Appeal requests must be sent to the Michigan Administrative Hearing System (MAHS). (Refer to the Directory Appendix for contact information.)

12.3 APPEAL PROCESS

Upon receipt of an appeal request, a conference is scheduled and conducted by MDHHS staff from the Michigan Administrative Hearing System (MAHS). During this conference, the MDHHS staff and hospital representatives discuss the issues related to the appeal.
Failure to appear at a scheduled conference without good cause and reasonable advance written or telephone notification to the MDHHS staff person assigned to the appeal is considered an abandonment of the appeal.

After the conference, a final determination notice is sent to the hospital outlining the MDHHS position on the item(s) appealed.

A price appeal decision may include a correction to the data used to set rates. If so, the corrected data is used beginning with the rate period for which the appeal was filed. Data corrections and any resultant price component changes that are accepted through pre-hearing conference or prevail at hearing are made for the current base period only for the hospital filing the appeal. MDHHS may make changes to price components that affect all providers in subsequent rebasing periods.

Hospitals wishing to proceed to the next level of the appeal process have two options:

- The hospital may elect to appeal through an administrative hearing as provided in MDHHS Administrative Rules, R400.3406 through R400.3424. Administrative appeal requests must be sent to the MAHS. (Refer to the Directory Appendix for contact information.)

- The hospital may waive its right to appeal through the administrative rules, R400.3406 through R400.3424, and instead elect to request a hearing before the State Hospital Appeals Panel. A waiver statement, signed by a duly authorized representative of the hospital, must accompany the appeal request. Appeals to this panel must be sent to MDHHS State Hospital Appeals Panel Coordinator. (Refer to the Directory Appendix for contact information.)

Only issues raised at the conference are accepted for review at either of the two hearing processes. Appeal requests must be received by MDHHS within 30 calendar days from the date of the final determination notice sent to the hospital subsequent to the conference. Failure to submit an appeal request within 30 calendar days shall be deemed an abandonment by the hospital of all further administrative appeal rights.

12.4 Administrative Hearings

Hearings conducted by the Michigan Administrative Hearing System (MAHS) follow the MDHHS Provider Reviews and Hearings Rules found at R400.3406 through R400.3424.
SECTION 13 - ELECTRONIC HEALTH RECORD (EHR) INCENTIVE PROGRAM FOR HOSPITALS

The Health Information Technology for Economic and Clinical Health (HITECH) Act, enacted as part of the American Recovery and Reinvestment Act of 2009, authorized incentive payments through Medicare and Medicaid to eligible hospitals as they adopt, implement, and/or upgrade, or demonstrate meaningful use of certified Electronic Health Record (EHR) technology. The hospital incentive program is designed to support hospitals in a period of health information technology transition and instill the use of EHRs in meaningful ways to help improve the quality, safety, and efficiency of patient health care.

The purpose of EHRs and meaningful use is to:

- Improve quality, safety, efficiency, and reduction of health disparities;
- Engage patients and families in their health care;
- Improve care coordination;
- Improve public health; and
- Ensure adequate privacy and security protections for personal health information.

13.1 REGISTRATION AND INTERFACES WITH THE NATIONAL LEVEL REPOSITORY

All hospitals seeking an EHR incentive payment are required to register with the National Level Repository (NLR). The NLR is the federal database which verifies basic provider information prior to notifying State Medicaid programs of a provider's intent to participate in the Medicare and Medicaid EHR Incentive Program. To register with the NLR, all Eligible Hospitals (EHs) must have a National Provider Identifier (NPI) and be enrolled in the CMS Provider Enrollment, Chain, and Ownership System (PECOS). Registration requires an active user account in the National Plan and Provider Enumeration System (NPPES). Note that any revisions to information provided in the NLR must be modified at the NLR level.

MDHHS is notified upon successful registration with the NLR. EHs are directed to the Michigan Medicaid Community Health Automated Medicaid Processing System (CHAMPS) to begin the Michigan Medicaid EHR registration process. The EHR Incentive Program module was created within the CHAMPS system to collect and record EH data. All providers have up to 30 days from MDHHS receipt of the NLR file to submit completed registration information in the CHAMPS EHR module. Failure to do so in the allotted timeframe could require hospitals to re-register at the NLR level. Providers must be an enrolled Michigan Medicaid provider and have an active Payee-Tax Identification on record within SIGMA Vendor Self Service (VSS). EHs are only required to register once for the Medicare and Medicaid EHR Incentive Programs. However, they must successfully demonstrate that they have adopted, implemented and/or upgraded (first participation year for Medicaid) or meaningfully used certified EHR technology each year in order to receive an incentive payment for that year. Additionally, providers seeking the Medicaid incentive must annually re-attest to other program requirements, such as meeting the required patient volume thresholds.

Following EH data collection in the NLR and Medicaid EHR CHAMPS module, EH eligibility determinations are calculated.

Following a successful eligibility determination, EH payments are calculated. A final report is filed with the NLR following a processed EHR incentive payment.
13.2 REQUIREMENTS FOR PARTICIPATION

In order to participate in the Michigan Medicaid EHR Incentive Program, hospitals must be a Medicaid enrolled provider and have a completed Medicaid Quarterly Report, Medicaid Cost Report (MMF) and CMS 2552 Cost Report on file with MDHHS that correlates with the specified timeframe from which data are pulled. In an effort to have the most complete and accurate information for program calculations, all revisions, amendments, and modifications to data sources used in eligibility and payment calculations must be complete prior to hospital registration in the EHR Incentive Program. Incomplete data sources or data that is under revision are not utilized; therefore, hospital eligibility determinations and payment calculations could be delayed as a result.

Hospitals must review and agree to the attestation requirements outlined in the Michigan Medicaid EHR CHAMPS module. EHS select their EHR status (e.g., Adopt, Implement, and/or Upgrade or Meaningful Use) and provide their EHR certification number. EHS attest that the information they are providing is true, accurate, and complete.

EHS may participate in both the Medicare EHR Incentive Program and the Medicaid EHR Incentive Program. Hospitals must choose only one state from which to register and receive a Medicaid EHR incentive payment.

13.3 ELIGIBLE HOSPITALS DEFINED

Per CMS, eligible hospitals are defined as follows:

- Acute care hospitals (includes critical access hospitals [CAH]) and cancer hospitals meeting the following requirements:
  - A health care facility where the average length of patient stay is 25 days or fewer,
  - CMS Certification Number (CCN) ending between 0001 and 0879 or 1300-1399, and
  - Meet a Medicaid patient volume threshold of at least 10%; or
- Children’s hospitals (does not include children’s wings of larger hospitals) which are separately certified children’s hospitals with CCN ending between 3300 and 3399.

Children’s hospitals do not have to meet a minimum Medicaid patient volume threshold.

13.4 ELIGIBILITY VERIFICATION

To verify hospital eligibility, data reported on the CMS 2552, Medicaid Quarterly Report, and the MMF are utilized. Eligibility requirements are calculated annually upon registration in the Medicaid EHR Incentive Program. Hospitals should confirm that all necessary data elements are complete and reported for EHR incentive calculation purposes.
13.4.A. **Average Length of Stay (LOS)**

Average LOS is calculated by reviewing the current CMS 2552 Cost Report and MMF report on file with MDHHS. The following calculation is used:

\[
\frac{\text{Total Inpatient Days}}{\text{Total Inpatient Discharges}} = \text{Hospital Average LOS}
\]

13.4.B. **Medicaid Eligible Patient Volume**

A hospital's Medicaid eligible patient volume is calculated using the Medicaid Quarterly Report. Acute care hospitals must annually meet a 10% Medicaid eligible patient volume threshold to participate in the EHR Incentive Program. EH Medicaid eligible patient volumes are verified each year of a hospital's participation in the EHR Incentive Program. (Children's hospitals are exempt from the volume threshold requirement.) MDHHS will select the hospital quarter with the highest Medicaid eligible patient volume (90-day continuous period) from the applicable calendar year's Medicaid Quarterly Report to derive program eligibility. For purposes of measuring Medicaid eligible patient volume, an inpatient hospital day or hospital discharge with a Medicaid-enrolled patient, including those with no Medicaid payment liability, is considered an encounter. One of two calculation methods is utilized to determine Medicaid eligible patient volume. The quarter of the prior calendar year and calculation method that yields greater Medicaid eligible patient volume is utilized to determine hospital eligibility. Patient encounters include both Fee-for-Service (FFS) and Managed Care Organization (MCO) data.

One of the following calculations will be utilized to determine Medicaid Patient Volume:

\[
\frac{\text{Total Medicaid Hospital Days}}{\text{Total Hospital Days}} \times 100 = \text{Medicaid Patient Volume}
\]

OR

\[
\frac{\text{Total Medicaid Hospital Discharges}}{\text{Total Hospital Discharges}} \times 100 = \text{Medicaid Patient Volume}
\]

13.5 **Incentive Payment Calculation**

EHR Incentive Program payments are calculated in accordance with the formula outlined in the HITECH under Section 495.310. Payments are made over a total of three years and are paid 50% of the aggregate calculation in the first year, 40% in the second year, and 10% in the third year.
13.5.A. TIMING

EHs that adopt, implement, and/or upgrade a certified EHR system or are meaningful users can begin receiving incentive payments in any year from 2011 to 2016. The Medicaid EHR Incentive Program operates on a calendar year (CY) reporting period (January 1 through December 31). While the statute defines a payment year in terms of a CY, a hospital does not have to begin receiving incentive payments in CY 2011. However, the last year a hospital can first receive an initial Medicaid incentive program payment is CY 2016.

EHs are paid up to 100% of the calculated aggregate EHR hospital incentive payment amount over a three-year period. Data utilized to calculate the aggregate EHR hospital incentive amount is derived from filed hospital cost reports (CMS 2552 and MMF) from the hospital CY that ends during the CY prior to the hospital CY that serves as the first payment year.

All revisions, amendments, and modifications to data sources must be completed prior to a hospital’s registration for the EHR Incentive Program. This includes revisions to the filed cost reports (CMS 2552 and MMF) used to calculate the aggregate EHR incentive amount. Incomplete hospital data sources will result in delays in eligibility determinations and payment calculations.

13.5.B. PAYMENT FORMULA

The aggregate EHR incentive amount is a one-time calculation based upon the sum of a theoretical four-year calculation period where the amount of each year is the product of the following factors:

- the overall EHR amount; and
- the Medicaid Share.

The overall EHR amount is also based upon the sum over a theoretical four-year calculation period where the amount of each year is the product of two factors:

- an Initial Amount; and
- the Transition Factor applicable to each of the four years.

(All data used in the payment calculation is derived from the same 12 month cost report period, other than discharge data used to calculate the annual growth rate.)

Initial Amount and Theoretical Four-Year Calculation Period

The Initial Amount is the sum of a base amount and a discharge-related amount. The base amount is $2,000,000, and the discharge-related amount provides an additional $200 for estimated discharges between 1,150 and 23,000. No discharge-related amount is made for discharges prior to the 1,150th discharge or for discharges after the 23,000th discharge.
For the first calculation year, data on hospital discharges from the hospital fiscal year that ends during the FFY prior to the hospital fiscal year that serves as the first payment year is used as the basis for determining the discharge-related amount. To determine the discharge-related amount for the three subsequent theoretical calculation years, the number of discharges is based on the average annual growth rate for the hospital over the most recent three years of available data. The growth rate is based on a three-year average of total discharges, beginning with the initial calculation year and including data from the three prior years. The annual growth rate is applied to the base year’s discharges to arrive at the three subsequent year discharge amounts. If an EH’s average annual rate of growth is negative over the three-year period, the rate is applied as such.

**Transition Factor**

For each of the four years of the calculation, a different transition factor applies. The aggregate Medicaid EHR Incentive Payment is calculated once and is then distributed over three actual payment years. The transition factors listed below are used to calculate the aggregate EHR amount but do not indicate that hospital payments will be recalculated on a yearly basis.

<table>

</tr>
<tr>
<td>Year 3</td>
<td>0.50</td>
</tr>
<tr>
<td>Year 4</td>
<td>0.25</td>
</tr>
</tbody>
</table>

**Medicaid Share**

The Medicaid Share is the percentage of a hospital’s inpatient, non-charity care days that are attributable to Medicaid inpatients.

The numerator of the Medicaid Share is the sum of:

- The estimated number of Medicaid inpatient-bed-days; and
- The estimated number of Medicaid managed care inpatient-bed-days.

The denominator of the Medicaid Share is the product of:

- The estimated total number of inpatient-bed-days for the eligible hospital during that period; and
- The estimated total number of the eligible hospital’s charges during that period, not including any charges that are attributable to charity care, divided by the estimated total amount of the hospital’s charges during that period.
For the purposes of the EHR incentive payment calculation, charity care is calculated using data from the MMF Indigent Volume Form as follows:

\[(\text{Total Uncompensated Charges} - \text{Third Party Bad Debts} - \text{Uninsured Payments from Charges} - \text{Recoveries for Uninsured Bad Debt}) = \text{Charity Care}\]

The removal of charges attributable to charity care in the formula, in effect, increases the Medicaid Share resulting in higher incentive payments for hospitals that provide a greater proportion of charity care.

Payment Calculation Summary

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
</table>
| 1. **Calculate initial amount** | \$2 million base amount + ((discharge bonus)\*200) = initial amount  
\$200 per total discharge between 1,150 and 23,000 |
| 2. **Calculate four theoretical years** | Year 1: 100% of initial amount  
Year 2: 75% of initial amount ( + or - any change in discharge level based on annual growth rate)  
Year 3: 50% of initial amount ( + or - any change in discharge level based on annual growth rate)  
Year 4: 25% of initial amount ( + or - any change in discharge level based on annual growth rate) |
| 3. **Sum four theoretical year calculations** | Year 1 + Year 2 + Year 3 + Year 4 = Aggregate Hospital EHR Incentive Amount |
| 4. **Calculate Medicaid Share** | Medicaid inpatient days / (total inpatient days * ((gross revenue - charity) / gross revenue)) |
| 5. **Multiply Aggregate Hospital EHR Incentive Amount by Medicaid Share** | Aggregate Hospital EHR Amount * Medicaid Share = Total Hospital EHR Incentive Amount |
| 6. **Paid over three payment years** | Payment Year 1 = 50% of Total Hospital EHR Incentive Amount  
Payment Year 2 = 40% of Total Hospital EHR Incentive Amount  
Payment Year 3 = 10% of Total Hospital EHR Incentive Amount |

13.6 **PAYMENT NOTIFICATION AND GROSS ADJUSTMENTS**

EH Medicaid Incentive payments are made annually via gross adjustment. EHs cannot receive more than one incentive payment in each State CY.

Following the verification of hospital eligibility, an incentive payment is calculated and the EH is notified of the final amount. EHs have up to 30 days from receiving their payment notice to dispute payment calculations. If no communication is received or the EH agrees with the payment notice, the incentive payment is processed via gross adjustment in the CHAMPS system.
13.7 ADOPT, IMPLEMENT, AND/OR UPGRADE OR MEANINGFUL USE

To receive a first year’s incentive payment, EHs must attest to adopting, implementing, and/or upgrading (AIU) a certified EHR system. EHs are required to provide the certification number of their EHR system within the EHR CHAMPS module during registration as part of AIU attestation. Eligible Medicaid hospitals can receive their first year’s payment for AIU attestation and not meaningful use, but must meet the meaningful use requirement in all subsequent participation years.

If an EH is eligible for both Medicare and Medicaid EHR Incentive Programs and has achieved meaningful use standards under Medicare, they are recognized as a meaningful user for Medicaid purposes.

In order to continue to receive incentive payments after the first payment year, providers must achieve and maintain a set of meaningful use measures as defined by CMS. Meaningful use employs a three-stage approach, with each stage building on the preceding stage:

- Stage 1 – Data capture and sharing
- Stage 2 – Expand on Stage 1 criteria to encourage the use of health information technology for continuous quality improvement
- Stage 3 – Expand on Stage 2 with a focus on promoting outcomes in quality, safety, and efficiency

To demonstrate Stage 1 of meaningful use, an EH must comply with a set of “core” requirements and a selection of “menu” requirements. MDHHS has adopted the same requirements outlined by CMS without modification.
SECTION 14 – SHORT-STAY HOSPITAL REIMBURSEMENT

The State utilizes a Short Hospital Stay (SHS) rate of reimbursement for certain outpatient and inpatient hospital stays. The SHS encompasses funding for both operating and capital costs. The SHS rate will be identical for inpatient and outpatient services, and will apply to all services billed on the claim. The SHS rate is published on the MDHHS website. (Refer to the Directory Appendix for website information.)

The SHS rate of reimbursement does not modify billing requirements for hospitals. If the patient meets criteria for an inpatient admission, the claim must be submitted as an inpatient claim. Conversely, if the patient does not meet criteria for an inpatient admission, the claim must be submitted as an outpatient claim. In either case, if the criteria for the SHS rate are met, the hospital will receive the same reimbursement for services rendered. The SHS rate only applies to discharges from a facility, and does not apply to transfers, leaving against medical advice (AMA), or other discharge statuses.

The SHS logic will apply to both emergent and elective claims. For purposes of this reimbursement structure, SHSs will be defined using the following criteria.

14.1 DIAGNOSES

In order to qualify for a SHS rate, a claim must include one of the primary diagnosis codes listed. This list is maintained on the MDHHS website. (Refer to the Directory Appendix for website information.) The list of eligible codes will be evaluated annually and updated as necessary.

For outpatient dates of service and inpatient dates of discharge on or after July 1, 2015 and before October 1, 2015, ICD-9 diagnosis codes will be used. For outpatient dates of service and inpatient dates of discharge on or after October 1, 2015, ICD-10 diagnosis codes will be used.

14.2 OUTPATIENT HOSPITAL CLAIMS QUALIFICATION

An outpatient hospital claim will qualify for the SHS reimbursement if all of the following criteria are met:

- The primary diagnosis code billed on the outpatient claim is listed on the primary diagnosis codes list referenced above.
- The claim does not include a surgical revenue code (36x) billed on any line of the outpatient claim.
- The claim does not include cardiac catheterization lab revenue code 481.
- The claim includes observation revenue code 762.

14.3 INPATIENT HOSPITAL CLAIMS QUALIFICATION

An inpatient hospital claim will qualify for the SHS reimbursement if all of the following criteria are met:

- The primary diagnosis code billed on the inpatient claim is listed on the primary diagnosis codes list referenced above.
- The claim does not include a surgical revenue code (36x) billed on any line of the inpatient claim.
- The claim has a date of discharge equal to or one day greater than the date of admission.
The claim does not include cardiac catheterization lab revenue code 481.

14.4 Exclusions

The SHS logic will not apply to inpatient or outpatient claims with the following conditions:

- Claims where Medicaid is the secondary payer. MDHHS will follow the rules of the primary payer, and MDHHS will be responsible for payment up to co-insurance and/or deductible.
- Hospital discharges with discharge status codes other than 1, 6, 9, 21, 30, 50, or 51.
- Claims for patients who leave the hospital AMA.
- Claims for deceased patients.
- Claims that include primary diagnoses that are not on the diagnosis list referenced above, including claims for births and deliveries, for example.

14.5 Short Hospital Stay Rate and Methodology

A single SHS rate will be developed for certain outpatient and inpatient hospital stays. This rate will encompass funding for both operating and capital costs, will be identical for inpatient and outpatient services, and will encompass all services billed on the claim.

The rate will be established using Medicaid hospital Fee-for-Service paid claims and managed care encounters that meet the SHS criteria. To calculate the rate, the following process will be employed:

- Aggregate Fee-for-Service operating payments on qualifying claims with dates of service during the second previous fiscal year will be identified.
- Aggregate Fee-for-Service capital payments will be calculated by multiplying the Fee-for-Service inpatient claims count for qualifying claims with dates of service during the second previous fiscal year by the current year statewide capital rate.
- Aggregate managed care operating and capital payments on qualifying encounters with dates of service during the second previous fiscal year will be identified.
- Fee-for-Service and managed care operating and capital payments will be aggregated and divided by the number of claims and encounters that meet the SHS criteria. The resulting quotient will be the SHS rate.

MDHHS will monitor the diagnosis code sets and reimbursement to ensure budget neutrality is maintained or to maintain consistency with future reimbursement changes.

SECTION 1 - GENERAL INFORMATION

This chapter applies to Independent Clinical Labs.

Medicaid reimburses laboratories only for those services it is certified by the Clinical Laboratory Improvement Amendments (CLIA) to perform and for those services ordered by physicians (MD or DO), physician assistants (PAs), certified nurse practitioners (CNPs), certified nurse midwives (CNM), podiatrists (DPMs), or dentists. The ordering practitioner must document the medical necessity of laboratory tests in the beneficiary’s medical record, regardless of where the test(s) is performed. Medicaid covers only those medically necessary laboratory tests needed to diagnose a specific condition, illness, or injury. Medicaid does not cover any laboratory tests ordered by a chiropractor.

The ordering practitioner is held responsible if they order excessive or unnecessary laboratory tests, regardless of who actually renders the laboratory services. The ordering practitioner is also held responsible for the medical necessity of every laboratory test that is ordered as part of a custom- or laboratory-designed profile. The ordering practitioner may be subject to corrective action related to these services, including recoupment of funds. The laboratory also may be subject to corrective action, including the recoupment of funds, if it submits a claim for laboratory services not specifically ordered by a practitioner.

Screening or routine laboratory testing, except as specified for the Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) Program, or by Medicaid policy, is not a benefit. Ordering or rendering of "profiles", "batteries" or "panels" of tests that include tests not necessary for the diagnosis or treatment of the beneficiary’s specific condition are considered random screening and are not covered. Multiple laboratory tests carried out as a part of the evaluation of the beneficiary, when the results of the history and physical examination do not suggest the need for the tests, are considered screening and are not covered.

Laboratory services performed by a laboratory or its employees may not be billed to the ordering practitioner.
SECTION 2 - BILLING INFORMATION

Refer to the Billing & Reimbursement for Professionals Chapter of this manual for additional information about billing.

2.1 MEDICAL NECESSITY

The medical record and claims (with applicable attachments) must contain documentation of medical necessity describing the beneficiary’s symptoms and other findings that led the practitioner to order the laboratory test(s). An explanation of the laboratory testing method or the results of the diagnostic tests, whether normal or abnormal, is not documentation of medical necessity. For approval of payment, the laboratory procedure(s) must be specific and appropriate to the beneficiary’s documented condition and diagnosis.

2.2 PHYSICIAN SELF-REFERRAL

Stark Legislation or Physician Self-Referral Legislation, 42 USC 1395nn, limits certain physician referrals made to entities where the physician has a financial relationship. A physician should make no referrals of laboratory tests to a laboratory in which the physician (or the physician's immediate family members) has a financial relationship unless the referral falls under the "in-office ancillary services" exception.

Michigan Department of Health and Human Services (MDHHS) defines the following terms as they relate to the Physician Self-Referral portion of the Stark Legislation:

2.2.A. PHYSICIAN’S OFFICE LABORATORY

A Physician’s Office Laboratory (POL) meets the following parameters:

- A physician or a group practice owns the laboratory.
- The laboratory performs testing only on specimens generated by the physician owner.

The laboratory is subject to the following policies:

- Laboratory claims must be billed using the physician's provider NPI number.
- Laboratory claims are subject to the practitioner laboratory daily reimbursement limit.
- The laboratory must not accept referrals from physicians outside of the physician's practice or group practice.

2.2.B. DUAL PHYSICIAN'S OFFICE/INDEPENDENT LABORATORY

A dual physician's office/independent laboratory meets the following parameters:

- A physician or a group practice owns the laboratory.
- The laboratory is a physician's office laboratory for those specimens generated by the physician owner.
The laboratory is an independent laboratory for those specimens that are referred by physicians outside of the physician's practice or group practice.

Dual physician's office/independent laboratories are subject to the following policies:

- Laboratory claims generated by the physician owner must be billed using the physician's provider NPI number. These claims are subject to the practitioner laboratory daily reimbursement limit.
- Laboratory claims generated by physicians outside of the physician's practice or group practice must be billed using the independent laboratory NPI number. These claims are subject to the independent laboratory daily reimbursement limit.
- The laboratory must not accept referrals from immediate family members.

2.2.C. INDEPENDENT LABORATORY

An independent laboratory meets the following parameters:

- It may be owned by:
  - A physician or a group practice.
  - A non-physician.

The physician-owned independent laboratory is subject to the following policies:

- The laboratory must not accept referrals from the physician owner or his immediate family members.
- Laboratory claims are billed using the independent laboratory NPI number.
- Laboratory claims are subject to the independent laboratory daily reimbursement limit.

The non-physician owned independent laboratory is subject to the following policies:

- The laboratory must not accept referrals from the owner or his immediate family members.
- Laboratory claims are billed using the independent laboratory NPI number.
- Laboratory claims are subject to the independent laboratory daily reimbursement limit.

2.3 CLINICAL LABORATORY IMPROVEMENT AMENDMENTS CERTIFICATION

All providers that submit claims must have Clinical Laboratory Improvement Amendments (CLIA) certification and the CLIA number must be present on the claims. Providers are limited to billing the lab services that they are CLIA-certified to perform. This includes the specialties as listed under their CLIA certificate.

When billing Medicaid for services rendered, providers performing tests that use waived methodologies must enter the QW modifier with the appropriate Current Procedural Terminology (CPT) code to denote the waived test.
Questions regarding CLIA certification should be addressed to the state-licensing agency. (Refer to the Directory Appendix for contact information.)

2.4 PROCEDURE CODES

Laboratories should refer to the current edition of the CPT manual published by the American Medical Association (AMA) for the appropriate procedure code to use when billing Medicaid. The laboratory is also subject to the pathology and laboratory guidelines that provide definitions and/or instructions for specific sections in the manual.

2.5 COMPONENT BILLING

Most pathology procedures are billed together as a total service, and a single charge is made for both professional and technical components. Some pathology procedures are composed of professional and technical components that are billed separately by the facility and the provider. In these instances, the procedure code requires the use of a two-character modifier to accurately identify the service provided. Do not bill for component services when the entire procedure is performed.

Payment for the technical component to the laboratory includes personnel, materials, space, equipment, report of test results, and other items.

The professional component represents the professional services of a pathologist/hematologist. Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters. These are limited to certain services as noted on the Practitioner and Medical Clinic Fee Schedule located on the MDHHS website. (Refer to the Directory Appendix for website information.) Payment for this component includes:

- Examination of the beneficiary, when indicated.
- Performance and supervision of the procedure.
- Reading, interpretation, and written report of the findings.
- Consultation with the referring physician.

When the laboratory performs services for hospital inpatients, only the pathologist can bill the professional component (the pathologist’s services) directly to Medicaid. The technical component is included in the reimbursement to the hospital for the inpatient services.

2.6 MEDICARE RELATED BILLING

Medicaid reimburses laboratories for the coinsurance and deductible amounts subject to Medicaid's reimbursement limitations on all Medicare-approved claims even if Medicaid does not normally cover the service.

2.7 BILLING FOR SERVICES PERFORMED BY REFERENCE LABORATORIES UNDER ARRANGEMENT WITH ENROLLED HOSPITAL LABORATORIES

Following Medicare guidelines and applicable state and federal laws in situations where an enrolled hospital laboratory must refer a specimen to a reference laboratory, the enrolled laboratory will be
allowed to bill Medicaid for the services provided by the reference laboratory under the following conditions:

- The reference laboratory holds the required Clinical Laboratory Improvement Amendments (CLIA) certification and state licensure, if required, to perform the test;

- The enrolled hospital laboratory and the reference laboratory have a contractual agreement (termed "Under Arrangements" by Medicare) to provide such services, with the hospital laboratory responsible for reimbursing the reference laboratory for the services; and

- If the service requires prior authorization, the enrolled hospital laboratory must request and receive prior authorization approval for the service to be performed by the reference laboratory. The prior authorization number must be included on the claim.

The definitions of reference laboratory and referring laboratory may be found in the Glossary Appendix.
SECTION 3 - REIMBURSEMENT LIMITATIONS

Reimbursement for laboratory services includes the collection of the specimen(s), the analysis, and the lab test results. Medicaid performs pre- and/or post-payment reviews to monitor laboratory procedures for medical necessity and appropriate practitioner orders.

A beneficiary cannot be charged for any covered laboratory procedures, including those that are determined to be non-medically necessary.

When billing Medicaid for services rendered, the DOS indicated on the claim must be the date the specimen is collected.
SECTION 4 - SPECIAL COVERAGE

4.1 CHILDREN’S SPECIAL HEALTH CARE SERVICES COVERAGE

The coverage limits do not apply to beneficiaries with Children’s Special Health Care Services (CSHCS) only eligibility.

The coverage limits do apply to beneficiaries with dual Medicaid and CSHCS eligibility if the laboratory procedures are not related to the beneficiary’s CSHCS qualifying diagnosis.

4.2 BLOOD HANDLING

The fee for blood handling is usually included in the reimbursement for the blood test. Situations in which the drawing, packaging, and mailing of a blood specimen are the only services provided are rare and include:

- A beneficiary that is referred to a laboratory for the sole purpose of drawing, packaging, and mailing a blood sample to MDHHS for blood lead analysis. The State provides lead-free vacutainers for the analysis. Requests for vacutainers and the samples for analysis should be sent to the MDHHS Bureau of Laboratories – Trace Metals Section. (Refer to the Directory Appendix for contact information.)

- A beneficiary occasionally requires blood tests that are not performed in conjunction with other reimbursable services. Whenever possible, the beneficiary should be sent to the laboratory that is to perform the test(s). If this is not practical (i.e., the laboratory is not a local facility) and the sole purpose of a visit is to draw, package, and mail the sample to a laboratory, the blood-handling fee may be billed by the practitioner. The blood-handling fee is not a benefit when any other service is reimbursable on the same date of service.

- A beneficiary may be referred to a laboratory for the sole purpose of drawing, packaging, and mailing a blood sample to MDHHS for HIV-1 viral load analysis and/or CD4/CD8 enumeration. The State provides specimen containers and mailing kits for the analysis. Requests for supplies and samples for analysis should be sent to the MDHHS Bureau of Laboratories – Trace Metals Section. (Refer to the Directory Appendix for contact information.)

When billing Medicaid for services rendered, blood handling may be billed if the drawing, packaging, and mailing of a blood sample are the only services provided as described above. Procedure Code 36415 (routine venipuncture for collection of specimen[s]) and the U&C charge for the service must be used.
SECTION 5 - PROCEDURE GUIDELINES

5.1 HEMATOLOGY STUDIES

A practitioner's order for a complete blood count (CBC) with white blood cell (WBC) differential includes the red blood cell (RBC) and WBC count, Hgb, Hct, MCH, MCHC, MCV, RBC morphology, platelet estimate, and WBC differential only. If three or more of the component tests are performed on a single blood sample, the code that most closely represents the entire procedure must be reported. If automated instrumentation yields additional test parameters, the results are not reimbursable unless medically necessary and specifically ordered by a practitioner.

Any payment for a differential includes payment for routine cell morphology and platelet estimation.

5.2 MICROBIOLOGY STUDIES

Isolation and presumptive ID procedure codes are meant to cover the usual methods recommended for the culture set up, isolation of suspected pathogens and the presumptive ID of any pathogens.

Definitive culture procedure codes may not be billed in combination with other microbiology codes that duplicate the ID of a microbe. Any reported organisms must be identified as to group, genus and species according to procedures recommended by the American Society for Microbiology (ASM), the College of American Pathologists (CAP) or the Centers for Disease Control and Prevention (CDC).

Anaerobic culture procedure codes should only be reported for methods recommended by the ASM, CAP, CDC or the Virginia Polytechnic Institute (VPI) using special anaerobic media.

Microbiology smear procedure codes are to be reported only for microscopic examination of the original specimen and are not to be reported when inoculum from a culture or subculture is examined as part of the ID of an organism.

Special attention should be given to the antimicrobial susceptibility procedure code definitions when reporting the quantity. Depending on the code, the quantity is determined by the number of agents, number of plates or number of enzymes tested.

5.3 TEST REPORTS

<table>
<thead>
<tr>
<th><strong>Anatomic Pathology</strong></th>
<th>Cryopreservation (frozen cell storage and thawing) is a covered service for bone marrow transplants only.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Arsenic Testing</strong></td>
<td>This testing is not covered for hair and nail sources.</td>
</tr>
<tr>
<td><strong>Calculated Results</strong></td>
<td>The mathematical calculation of two or more results to produce an index or ratio or any other result may not be billed as a separate independent test.</td>
</tr>
</tbody>
</table>
Complete Procedures and Unbundling
In some instances, a procedure is listed both in its entirety and also with component services specified. If the entire procedure is performed, the code for the entire procedure must be reported. Do not bill for component services when the entire procedure is performed.

Creatinine Blood Tests
Calculate and report the Glomerular Filtration Rate (eGFR) for tests processed for beneficiaries in outpatient settings and for beneficiaries 18 years of age and older. The eGFR test results must report two values on the lab report for beneficiaries: one for African-American and one for non-African-American, or one value if race is available and able to be used in calculating the value.

Evocative/Suppression Testing
Medicaid does not cover these codes. Report the individual tests.

Panel Tests
Only AMA-approved organ- or disease-oriented panels may be billed. All tests within the panel must be medically necessary. Unless the complete panel is ordered and performed, bill as individual tests.

Specimen Source
The tested entity may be from any source, unless the source is specified in the procedure code description.

Test Results
Reimbursement is made for tests performed using a method that yields quantitative results unless the nomenclature specifies a different method.

Urinalysis
In the event a single urine specimen is tested for the same entity (chemical, element, compound, substance) by more than one method, the procedure code used to denote the entity may be reported only once.

5.4 PATHOLOGY CONSULTATION
Clinical pathology consultation may be billed by a hematologist/pathologist for the review of abnormal laboratory test results, but cannot be billed for routine quality control review. (Refer to the current CPT manual for the guidelines for the provision of this service.)

5.5 GENETIC AND MOLECULAR TESTING
The following standards of coverage and prior authorization and documentation requirements apply to beneficiaries served by Fee-for-Service Medicaid. For beneficiaries enrolled in a Medicaid Health Plan, the provider must check with the beneficiary’s plan for coverage and prior authorization requirements.

5.5.A. STANDARDS OF COVERAGE
Whenever possible, Michigan Medicaid follows Medicare guidelines. Medicare does not cover a genetic test for a clinically affected individual for purposes of medical research, family planning, disease risk assessment of other family members or when the treatment
and surveillance of the beneficiary will not be affected, or in any other circumstance that
does not directly affect the diagnosis or treatment of the beneficiary.

Genetic testing **is** considered a covered benefit when it is medically necessary to
establish a molecular diagnosis and treatment of a genetic disease and all of the
following are met:

- The testing must be ordered by a physician (MD or DO) who is an enrolled provider.
- The beneficiary has documented clinical features symptomatic of a condition or disease,
or is at risk of inheriting the disease based upon personal history, family history,
documentation of a genetic mutation and/or ethnic background.
- Following history, physical examination, pedigree analysis, and completion of
  conventional diagnostic testing, a definitive diagnosis remains uncertain and a genetic
diagnosis is suspected.
- The test results will be used to significantly alter the management or treatment of the
disease.
- If applicable, the testing method is an FDA-approved method for the identification of a
  specific genetically-linked inheritable disease as evidenced by the following measures:
  - The genotypes to be detected by a genetic test must be shown, by scientifically valid
    methods, to be associated with the occurrence of the disease;
  - The analytical and clinical validity of the test must be established;
  - The observations must be independently replicated and subject to peer review; and
  - The clinical testing laboratory must be an enrolled provider who is properly certified
    by CLIA.

Testing is allowed once during the beneficiary's lifetime per disease for diagnostic
purposes. If medically necessary, and on a case-by-case basis, prior authorization may
be requested to allow for exceptions to this restriction.

Providers must follow state law (Public Act 368 of 1978, Section 333.17020 Genetic test;
informed consent) regarding informed consent for predictive genetic testing. This
includes any statutory requirements for pre- or post-testing genetic counseling. There
must be made available, upon request, documentation of pre-testing informed consent
provided before testing. This documentation must include the limitations of the test,
possible outcomes, and methods for communicating and maintaining confidentiality of
results.

Genetic testing **is not** considered a covered benefit for:

- Criteria other than those outlined above.
- Testing to confirm a diagnosis or disorder that can be diagnosed by conventional
diagnostic methods.
- Testing for conditions or purposes where the test results would not directly influence the
  management or treatment of the disease or condition (e.g., a disease without known
treatment).
5.5.B. PRIOR AUTHORIZATION REQUIREMENTS AND DOCUMENTATION

For genetic testing that requires prior authorization, the following documentation must be submitted prior to the testing being performed:

- Indication for the test.
- Clinical notes that clearly detail the beneficiary’s related signs and symptoms, including relevant family history. A family pedigree analysis must be made available upon request.
- Other related testing or clinical findings of the beneficiary or family member.
- Documentation supporting that the test results will be used to significantly alter the management or treatment of the disease.
- The name and NPI number of the laboratory performing the test.
SECTION 6 - FACILITY SERVICES

6.1 DIALYSIS RELATED LAB SERVICES

Payment for laboratory services related to maintenance dialysis is included in the composite rate regardless of whether the tests are performed in the facility or an independent laboratory. The following tests are considered to be a routine part of maintenance dialysis and may not be billed separately unless it is medically necessary to perform them in excess of the frequencies indicated.

Laboratory tests for Hemodialysis, Peritoneal Dialysis, and Continuous Cycling Peritoneal Dialysis (CCPD) that are included in the composite rate:

<table>
<thead>
<tr>
<th>Per Treatment:</th>
<th>Weekly:</th>
<th>Monthly:</th>
</tr>
</thead>
<tbody>
<tr>
<td>All hematocrit or hemoglobin tests and clotting time tests</td>

<td></td>
<td>LDH</td>
</tr>
</tbody>
</table>

Laboratory tests for Continuous Ambulatory Peritoneal Dialysis (CAPD) that are included in the monthly composite rate include:

- Albumin
- Alkaline Phosphatase
- AST, SGOT
- BUN
- Calcium Magnesium
- CO2
- Creatinine
- Dialysate Protein
- HCT
- Hgb
- LDH
- Phosphate
- Potassium
- Sodium
- Total Protein

Laboratory tests not listed above may be separately billed by the dialysis facility or CLIA-certified lab performing the test.
6.2 ICF/IID Facilities

Reimbursement for laboratory services provided to patients in intermediate care facilities for individuals with intellectual disabilities (ICF/IID) is included in the per diem rate paid to the ICF/IID. Laboratories may not bill MDHHS for these services.

6.6 Accounting and Record Keeping .................................................. 20
Section 7 - Interim Payments, Settlements and Appeals .................. 21
  7.1 Settlement(s) of Local Health Departments ................................ 21
  7.2 Audit Adjustment Report .............................................................. 21
  7.3 Medicaid Provider Appeals .......................................................... 21
SECTION 1 – GENERAL INFORMATION

This chapter applies to all Local Health Departments (LHDs).

1.1 REGULATORY AUTHORITY

A public facility is defined in the following Sections of the Michigan Public Health Code (PA 368 of 1978, as amended):

- Section 333.2413
- Section 333.2415
- Section 333.2421

Local health departments (LHDs) may participate as providers in the Medicaid Program as Public Clinics. Statutory basis for their participation is pursuant to 42 CFR 431.615 (Relations with State Health and Vocational Rehabilitation Agencies and Title V Grantees), thereby implementing Section 1902(a)(11) and (22)(C) of the Social Security Act.

A Title V grantee means an agency, institution, or organization that receives federal payments for part or all of the cost of any service program or project authorized by Title V of the Social Security Act, including:

- Children and youth projects;
- Children’s Special Health Care Services (CSHCS);
- Maternal and child health services;
- Maternal and infant care projects; and
- Projects for the dental health of children.

1.2 PROVIDER ENROLLMENT

Michigan Department of Health and Human Services (MDHHS) requires all LHDs to have a Group (Type 2 - Organization) National Provider Identification (NPI) number in order to receive the enhanced LHD reimbursement. For LHDs with multiple locations and multiple rates, an NPI number for each location may be necessary so that the proper reimbursement rate of all encounters can be determined. If the LHD fails to obtain and/or use the correct NPI number, the LHD reimbursement will be determined under fee for service rules. The NPI number must be reported to MDHHS via the on-line CHAMPS Provider Enrollment (PE) subsystem before billing Medicaid services.

Individual providers (doctors, dentists, optometrists, etc.) are required to obtain a Provider (Type 1 - Individual) NPI number and report the number to MDHHS.
SECTION 2 - BENEFITS

Covered services provided by LHDs include preventive, diagnostic, therapeutic, rehabilitative, or palliative services that are furnished by a public facility that is not part of a hospital but is organized and operated to provide medical care to outpatients.

2.1 COVERED SERVICES

LHDs receive full cost reimbursement for the following services:

- Breast and Cervical Cancer Control Program Services
- Child Health and Primary Care Services
- Communicable Disease Services (e.g., Tuberculosis [TB])
- Early and Periodic Screening, Diagnosis and Treatment (EPSDT) Services (including blood lead testing and follow-up services)
- Family Planning Clinic Services
- Hearing and Vision Screening
- Home Health (HH) Care Services
- Immunizations *
- Maternal and Child Health Lab Services
- Maternal Infant Health Program (MIHP) Services
- Prenatal Care Clinic Services
- Sexually Transmitted Disease Services

2.2 ADDITIONAL INFORMATION ON BLOOD LEAD TESTING

2.2.A. INITIAL BLOOD LEAD TESTING

LHDs are not required to obtain a referral or receive PA to obtain a blood lead sample from Medicaid-covered children through six years of age, whether they are enrolled in a MHP or are FFS beneficiaries. To prevent duplication of services, the LHD must make reasonable effort to assure that a blood lead test has not been obtained by the child’s primary care provider (PCP).

All blood lead draws must be provided in compliance with Medicaid policy. Refer to the Early and Periodic Screening, Diagnosis and Treatment Chapter for additional information regarding guidelines for age-appropriate blood lead testing intervals.

* An immunization administered for travel to a foreign country is not a covered benefit.
The LHD must instruct the laboratory completing the blood lead analysis to send all blood test results to the child’s PCP and health plan, if enrolled in managed care. Should a positive test be found, the LHD must collaborate with the PCP to assure the appropriate follow-up care is provided. The PCP is responsible for any additional blood lead testing.

If a capillary blood specimen is obtained, the LHD may bill MDHHS using procedure code 36416 for both MHP enrolled and FFS beneficiaries.

The LHD may send the sample to the State Laboratory for analysis or to any clinical laboratory that is CLIA-certified to perform blood lead analysis. The information accompanying the sample to the laboratory must include the name of the PCP, if known, and the name of the health plan for those children enrolled in managed care.

The LHD may complete the blood lead analysis if they are CLIA-certified to do so. If the LHD completes the blood lead analysis, procedure code 83655 should be billed. The reimbursement includes payment for the capillary or venipuncture blood lead draw.

2.2.B. BLOOD LEAD POISONING FOLLOW-UP SERVICES

LHDs may provide blood lead poisoning follow-up services which consist of environmental investigations and nursing assessment visits.

LHDs may provide blood lead poisoning follow-up services provided to any Medicaid-covered child, regardless if the child is enrolled with an MHP or is in the FFS program. Authorization for these services is not required by the MHP; however, LHDs must notify the plan of the service(s) provided and provide the plan with a summary of each.

Documentation of the child’s blood lead poisoning level that initiated service must be maintained, as well as documentation of all environmental investigations and nursing assessment visits.

2.2.B.1. BLOOD LEAD NURSING ASSESSMENT VISITS

Blood lead nursing assessment visits for children with blood lead levels of 5 mcg/dL or greater are covered under the Children’s Special Health Care Services (CSHCS) case management benefit. Beneficiaries are eligible for a maximum of six billing units per year. (Refer to the Children’s Special Health Care Services Chapter, Case Management Benefit for more information.)

2.2.B.2. ENVIRONMENTAL INVESTIGATIONS

An environmental investigation of a beneficiary's home or primary residence is covered for the LHD. A beneficiary's home is defined as their legal address. The beneficiary’s primary residence is a place other than their legal address where the beneficiary spends a significant amount of time. To be eligible for the service, the beneficiary must be under 21 years of age and have a confirmed elevated blood lead level of 5 mcg/dL or greater.

If more than one child in the home has blood lead poisoning, the LHD must select one child's Medicaid ID number and report a single environmental investigation visit. An
environmental investigation visit can be billed directly to Medicaid FFS regardless if the beneficiary is enrolled in a MHP. Reimbursement is limited to the time and activities provided by certified assessors during the on-site investigation.

Environmental investigations must be performed by assessors certified by the Michigan Department of Health and Human Services (MDHHS) Healthy Homes Program. The home or primary residence to be investigated must meet one of the following criteria:

- The home or primary residence was built before 1978.
- A home or primary residence built after 1978 when identification of other possible sources of lead exposure such as a job, hobby, environmental, home remedies, or cultural practices that use lead are associated with the property in question.

The investigation must follow the Protocol for Environmental Investigations for Children with Elevated Blood Lead Levels and risk assessment activities per the Lead Abatement Act of 1998. The investigation must include testing of appropriate potential sources of paint, house dust, soil, water, and other household risk factors such as pottery and home remedies. Education must be provided regarding known and potential sources of lead poisoning, reduction of future exposures, and suggestions for specialized cleaning techniques.

Risk assessors must prepare a risk assessment report per rule R325.9916 promulgated pursuant to the Lead Abatement Act that includes lead hazard control recommendations and the potential relocation of the child depending upon the severity of the lead hazards found.

Discussion with the family must include agencies that may be able to provide assistance with lead hazard control recommendations provided in the risk assessment report.

An episode includes a venous blood sample indicating the child is at risk according to recommendations by the Centers for Disease Control and Prevention (CDC), and also includes resulting treatment and follow-up services.

When an environmental investigation of the home finds no sources of lead or insufficient evidence to justify the beneficiary’s elevated blood lead level, a second site may be investigated (e.g., home of a family member, relative, or other informal child care where a child often visits). When billing for the second site, local health departments must report the TS modifier with the procedure code on the claim. A maximum of two sites may be investigated.

2.2.C. BLOOD LEAD RESOURCE DOCUMENTS

Providers may obtain the Protocol for Environmental Investigations for Children with Elevated Blood Lead Levels, a list of certified risk assessors, applications for training and certification, and education materials from the MDHHS Lead Hazard Remediation Program. (Refer to the Directory Appendix for contact information.)

Refer to the Early and Periodic Screening, Diagnosis and Treatment Chapter for additional information on blood lead.
2.3 ADDITIONAL INFORMATION ON OBJECTIVE HEARING & VISION SCREENING [CHANGE MADE 7/1/18]

To be eligible to provide and bill for services, all LHD screening staff must be qualified to administer preschool objective hearing and objective vision screening by the MDHHS Public Health Administration. This service coverage is limited to LHD providers when performed either on-site or in the community setting.

Objective hearing screening and objective vision screening may be performed on eligible Medicaid preschool-aged children from age three through six years of age by qualified LHD staff. LHDs may provide objective hearing and/or vision screening services and accept referrals for screening from physicians and from Head Start agencies. The objective hearing and/or vision screening results must be reported to the child’s primary care provider (PCP). If the LHD is unable to report the results to the child’s PCP, the LHD must clearly document why this could not be accomplished. Providers are strongly encouraged to share the results with the Head Start agency if that agency was the referral source, and if the provider receives authorization. (revised 7/1/18)

2.4 ADMINISTRATIVE SERVICES

Full cost reimbursement is not allowed for Medicaid administrative services and should not be included on the Medicaid Cost Report.

LHDs providing Medicaid administrative services should report costs for these services on their quarterly Financial Status Report in accordance with federal regulation to qualify for Federal matching funds. These reports must be submitted to the MDHHS Bureau of Purchasing, Grants Division/Electronic Grants Section. Questions regarding reimbursement of administrative services should be directed to the MDHHS Bureau of Purchasing, Grants Division/Electronic Grants Section. (Refer to the Directory Appendix for contact information.)

Refer to the Medicaid Outreach Activities section for reporting requirements, and billing and reimbursement information related to outreach activities.

2.5 MEDICAID HEALTH PLAN SERVICES

LHDs must obtain PA from a Medicaid Health Plan (MHP) for any Medicaid covered service provided to a Medicaid beneficiary enrolled in a health plan except for the following services:

- Immunizations
- Sexually Transmitted Disease (STD) services
- TB Diagnosis and Treatment
- Family Planning Services
- Blood lead draws for children through six years of age
- Hearing and vision screening

Except for blood lead draws, payment for covered services is based on the terms of the contract between the LHD and health plan if the LHD and a MHP have entered into a contract. In the absence of a contract, payment is based on the Medicaid fee-for-service (FFS) rates in effect on the date of service (DOS). Medicaid encourages contractual relationships between these entities.
LHDs must bill the MHP directly for immunizations provided to beneficiaries enrolled in managed care. Any claims billed to the Community Health Automated Medicaid Processing System (CHAMPS) for MHP members will be denied.

The following out-of-plan services performed by the LHD can be billed directly to Medicaid FFS regardless if the beneficiary is enrolled in a MHP:

- Blood lead draws
- Lead investigations and follow-up services
- Hearing and vision screenings
SECTION 3 - MEDICAID OUTREACH ACTIVITIES

3.1 ALLOWABLE ACTIVITY CATEGORIES

Local Health Departments may perform the following Medicaid outreach activities and receive reimbursement through their Comprehensive Planning, Budgeting and Contracting (CPBC) Grant Agreement with MDHHS.

All outreach activities must be specific to the Medicaid program. In addition, activities that are part of a direct service are not claimable as an administrative service.

3.1.A. MEDICAID OUTREACH AND PUBLIC AWARENESS

Activity Category Description

This category is when staff performs activities that inform eligible or potentially eligible individuals about Medicaid and how to access Medicaid programs. This category is also used for describing the services covered under Medicaid and how to obtain Medicaid preventive services.

It includes related paperwork, clerical activities, or staff travel required to perform these activities:

- Informing families and distributing literature about the services and availability of the Early and Periodic Screening, Diagnosis and Treatment (EPSDT) program and the many different Michigan Medicaid programs.
- Informing and encouraging families to access Medicaid managed care systems, i.e., Medicaid Health Plans.
- Informing families about the EPSDT and Medicaid health-related programs and the value of preventive health services and periodic exams.
- Assisting the Medicaid agency to fulfill outreach objectives of the Medicaid program by informing individuals and their families about health resources available through the Medicaid program.
- Conducting Medicaid outreach campaigns and activities (such as health fairs) that provide information about services provided by entities such as the Community Mental Health Services providers, Medicaid Health Plans, Local Health Departments, etc.
- Conducting a family planning health education outreach program or campaign if it is targeted specifically to Medicaid-covered family planning services.
- Contacting pregnant and parenting women about the availability of Medicaid services, including referral to family planning and well baby care programs and services.
- Providing referral assistance to families with information about the Medicaid program.
- Providing information about Medicaid screenings that will help improve the identification of medical conditions that can be corrected or ameliorated through Medicaid services, such as the Breast and Cervical Cancer Control Program.

- Notifying families of EPSDT program initiatives, such as Medicaid screenings.

- Coordinating with the local media (newspaper, TV, radio, video) to inform the public about EPSDT screenings, health fairs and other health related services, programs and activities organized by the LHD.

- Coordinating or attending health fairs that emphasize preventive health care, and promoting Medicaid services by presenting Medicaid material in locations with the likelihood of high Medicaid eligibility.

- Presenting and informing families about the availability of Medicaid providers, specific covered services, and how to effectively utilize services and maintain participation in the Medicaid program.

**Supplemental Description of Activity**

This category includes activities staff or contractors perform to inform families, parents and community members about the Medicaid program, Medicaid covered services, how to obtain Medicaid preventive services, as well as assisting an individual or family to become eligible for Medicaid.

Examples of these activities include explaining the Medicaid program to families, giving a family a Medicaid application form, helping an individual complete a Medicaid application form, making a referral to a local or county MDHHS office, or helping someone gather and collect documentation to support a Medicaid application.

*These outreach and application assistance activities are allowable ONLY with respect to Medicaid and Medicaid-covered services.*

### 3.1.B. FACILITATING MEDICAID ELIGIBILITY DETERMINATION

**Activity Category Description**

This category is for assisting an individual to become eligible for Medicaid. This category does not include the actual determination of Medicaid eligibility.

It includes related paperwork, clerical activities, or staff travel required to perform these activities:

- Verifying an individual’s current Medicaid eligibility status.

- Facilitating eligibility determination for Medicaid by planning and implementing a Medicaid information program.
- Participating as a provider of Medicaid eligibility outreach information.
- Explaining Medicaid eligibility rules and the Medicaid eligibility process to prospective applicants.
- Referring an individual or family to the local MDHHS or other appropriate sources to make application for Medicaid benefits.
- Assisting individuals or families to complete the Michigan Medicaid eligibility application.
- Assisting the individual or family in collecting/gathering information related to the application and eligibility determination for an individual, including resource information and third party liability (TPL) information, as a prelude to submitting a formal Medicaid application.
- Providing necessary forms and packaging all forms in preparation for the Medicaid eligibility determination.

**Supplemental Description of Activity**

This category includes activities staff perform to inform individuals, families, parents and community members about the Medicaid program, Medicaid covered services, how to obtain Medicaid preventive services, as well as assisting an individual or family in becoming eligible for Medicaid.

Examples of these activities include explaining the Medicaid program to individuals or families visiting the LHD for other services, giving a family a Medicaid application form, helping an individual complete a Medicaid application form, making a referral to a local or county MDHHS office, or helping someone gather and collect documentation to support a Medicaid application.

These outreach and application assistance activities are allowable ONLY with respect to Medicaid and Medicaid-covered services.

3.1.C. PROGRAM PLANNING, POLICY DEVELOPMENT, AND INTERAGENCY COORDINATION RELATED TO MEDICAL SERVICES

**Activity Category Description**

This category is used for performing activities associated with the collaborative development of programs with other agencies that assure the delivery of Medicaid-covered medical/dental/mental health services to Medicaid beneficiaries. It applies only to employees whose position descriptions include program planning, policy development and interagency coordination, and/or those staff specifically appointed to appropriate committees/programs performing required activities.
It includes related paperwork, clerical activities or staff travel required to perform these activities:

- Defining the scope of each agency’s Medicaid services in relation to the other, and identifying gaps or duplication of medical/dental/mental health programs.
- Analyzing Medicaid data related to a specific program, population, or geographic area and working with Medicaid resources, such as the Medicaid Health Plans, to locate and develop EPSDT health services referral relationships to populations of need.
- Creating a collaborative of health professionals (medical and dental) to provide consultation and advice on the delivery of health care services to the Medicaid population and developing methods to improve the referral and service delivery process by Medicaid providers.
- Containing Medicaid costs by reducing overlap and duplication of Medicaid services through collaborative efforts with Medicaid Health Plans, local Community Mental Health Services providers and Local Health Departments.
- Monitoring and evaluating policies and criteria for performance standards of medical/dental/mental health delivery systems in LHDs and designing strategies for improvements.
- Overseeing the organization and outcomes of the coordinated medical/mental health services provision with Medicaid Health Plans.
- Developing internal referral policies and procedures for use by staff so that appropriate coordination of health care services occurs between the various Medicaid providers and entities, such as Community Mental Health Services providers, Medicaid Health Plans, and the respective LHDs.
- Designing and implementing strategies to: identify individuals who may be at high risk for poor outcomes because of poverty, dysfunctional families, and/or inappropriate referrals, and who need medical/dental/mental health interventions; identify pregnant beneficiaries who may be at high risk of poor health outcomes because of drug usage, lack of appropriate prenatal care, and/or abuse or neglect; and assuring individuals with any significant health problems are diagnosed and treated early.
- Presenting specific provider information about Medicaid EPSDT screening that will help identify medical and dental conditions that can be corrected or ameliorated by services covered through Medicaid.
- Developing procedures for tracking and resolving family requests for assistance with Medicaid services and providers. This does not include the actual tracking of requests for Medicaid services.
- Developing new health programs with local community health agencies for the Medicaid population, as determined by a needs assessment and geographic mapping.

These activities relate to the program and not for a specific individual.
Supplemental Description of Activity

This category includes activities staff performs in collaboration with agencies or organizations outside of the LHD to assure the delivery of Medicaid covered medical/dental/mental health services to Medicaid beneficiaries.

The focus of these activities is to enhance, improve or streamline health care service delivery systems in the community.

In order to perform these activities, staff may be representing the LHD by sitting on a committee or task force such as a Multi-Purpose Collaborative Body.

3.1.D. REFERRAL, COORDINATION AND MONITORING OF MEDICAID SERVICES

Activity Category Description

This category is for developing appropriate referral sources for program-specific services for LHDS and monitoring the delivery of Medicaid services within the health department. It also is used for coordinating programs and services at the LHD level.

It includes related paperwork, clerical activities or staff travel necessary to perform these activities:

- Making referrals for, and coordinating access to, medical and dental services covered by Medicaid.
- Identifying and referring individuals who may be in need of Medicaid family planning services.
- Making referrals for and/or scheduling appropriate Medicaid-covered immunizations, vision and hearing testing, but not to include the child health screenings (vision, hearing and scoliosis) and immunizations that are required for all children.
- Providing information about Medicaid EPSDT screening (e.g., dental, vision, hearing) that will help identify medical conditions that can be corrected or improved by services through Medicaid.
- Contacting Medicaid providers of pediatric services in lower income areas to determine the scope of EPSDT services available.
- Reviewing clinical notes of staff by a designated clinician to identify medical referral and follow-up practices, and making recommendations to supervisors for improvements as needed.
- Conducting quality assurance reviews of specific Medicaid-related program objectives.
- Providing both oral and written instructions about the referral policies and procedures between the LHDS and other Medicaid provider entities for appropriate coordination of health services.
- Coordinating medical/mental health services with managed care plans as appropriate.
- Developing professional relationships for the purposes of referral of Medicaid-eligible individuals for EPSDT and other Medicaid related services.
Developing strategies for containing healthcare costs and improving services to children as part of the goals of the EPSDT program.

Working with agencies providing Medicaid services to improve the coordination and delivery of clinical health care services, to expand access to specific populations of Medicaid eligibles, and to improve collaboration around early identification of medical/dental problems. Activities include the development, implementation, and amending of Interagency Agreements related to Medicaid services.

Activities that are part of a direct service are not claimable as an administrative service.

Supplemental Description of Activity

- **Health-Related Referral Activities**
  - This category includes activities that LHD staff or contractors perform during the referral process for a potential health-related issue.
    
    Examples of these activities include locating individuals with potential health-related needs.
  
  - This category also includes activities LHD staff perform in order to develop referral sources for the health department, such as a list or brochure of the physicians, dentists or HMOs in the area who accept Medicaid patients for evaluation or treatment, or a list of other health agencies providing Medicaid services to whom families may be referred.

- **Programmatic Monitoring and Coordination of Medical Services**
  - This category includes activities that LHD staff or contractors perform to coordinate programs and services at the LHD. It also could include activities such as monitoring, or follow-up on the systematic delivery of health-related services within the health department.
  
  - This category includes program- or system-wide monitoring and coordination of services; it does NOT include beneficiary-specific activities such as individual service coordination or monitoring of services of a particular individual. These activities are often completed by a coordinator or supervisor of quality assurance activities or others with a broader scope related to health-related services provided within the health department.

**3.1.E. Medicaid-Specific Training on Outreach Eligibility and Services**

*Activity Category Description*

This category is for coordinating, conducting, or participating in training events and seminars for staff who provide outreach services regarding the benefits of the Medicaid program, including how to assist families to access Medicaid services, and how to more effectively refer individuals for services.
It includes related paperwork, clerical activities or staff travel required to perform these activities:

- Participating in or coordinating training that improves the delivery of Medicaid services.
- Participating in or coordinating training that enhances early identification, intervention, screening and referral of children with health needs for EPSDT services.
- Coordinating training to assist families to access Medicaid services.
- Participating in or presenting training that improves the quality of identification, referral, treatment and care of children, e.g., talking to staff about the EPSDT referral process, available EPSDT and health-related services.
- Disseminating information on training sessions and conducting all related administrative tasks.
- Conducting seminars and presentations to staff related to Medicaid-covered services; providing information on where and how to seek assistance through the Medicaid program.
- Developing and preparing information about Medicaid-covered services, specific health standards and criteria associated with identification/detection of certain illnesses required by the Medicaid program.
- Developing, participating in, or presenting training that addresses the clinical importance of pediatric or other clinical standards for preventive care offered through the Medicaid program.

**Supplemental Description of Activity**

This category includes activities such as conducting or participating in training events and seminars for staff or contractors regarding general Medicaid information, including the benefits of the Medicaid program, how to assist families in accessing Medicaid eligibility and services, and how to more effectively refer individuals for services.

Allowable training activities must be associated in some way with connecting individuals and families to the Medicaid program or to Medicaid services.

**3.1.F. ARRANGING FOR MEDICAID-RELATED TRANSPORTATION**

**Activity Category Description**

This category is for assisting an individual to obtain transportation for Medicaid-covered services. This does not include the provision of the actual transportation service, but rather the administrative activities involved in providing transportation. This activity also does not include activities that contribute to the actual billing of transportation as a medical or dental service, nor does it include accompanying the Medicaid-eligible individual to Medicaid services as an administrative activity.
It includes related paperwork, clerical activities or staff travel required to perform these activities:

- Scheduling or arranging transportation for Medicaid-covered services.
- Assisting or arranging for transportation for the family in support of the referral and evaluation activities.

**Supplemental Description of Activity**

This category includes activities staff perform in assisting an individual to obtain transportation in order to access Medicaid health-related services.

**3.1.G. ARRANGING FOR PROVISION OF MEDICAID-RELATED TRANSLATION SERVICES**

**Activity Category Description**

This category is for LHD employees who provide translation services related to Medicaid-covered services as an activity. Translation may be allowable as an administrative activity if it is not included and paid for as part of a medical assistance service.

It includes related paperwork, clerical activities or staff travel required to perform these activities:

- Arranging for or providing translation services that assist the individual to access transportation and medical/dental/mental health services.
- Arranging for or providing translation services that assist the individual to "communicate" with service providers about medical/dental services being provided.
- Arranging for or providing translation services that assist the individual to understand necessary care or treatment.
- Assisting the individual to define/explain their symptoms to the physician/dentist.
- Arranging for or providing signing services that assist family members to understand how to provide necessary medical support and care to an individual.

**Supplemental Description of Activity**

This category also includes the arranging for or providing of translation/interpretation services to enable an individual to access Medicaid health-related services.

**3.2 REPORTING REQUIREMENTS**

LHDs that bill for Medicaid Outreach Activities must provide a quarterly summary report of Medicaid outreach activities. Guidelines and reporting requirements are described in the CPBC Grant Agreement.
3.3 BILLING AND REIMBURSEMENT

3.3.A. GRANT AGREEMENT

The CPBC Grant Agreement includes the Medicaid Outreach Activities provision. This provision is part of the standard CPBC Grant Agreement language.

Each fiscal year, MDHHS will identify Medicaid outreach priorities. LHDs that bill for Medicaid outreach activities must focus, at a minimum, on one of the identified outreach priorities.

3.3.B. BILLING

The LHDs bill for these outreach activities on a quarterly basis in a single column on a Financial Status Report (FSR). The column should be titled Medicaid Outreach Activities. The FSR is part of the LHDs quarterly CPBC FSR submission to MDHHS. MDHHS aggregates all of the quarterly amounts billed for LHD Medicaid outreach activities and submits a claim for the federal portion of the costs. MDHHS reimburses the LHDs after MDHHS receives the reimbursement of the federal claim.

These Medicaid Outreach Activities are claimed at the 50% administrative match rate.

Full cost reimbursement is not allowed for Medicaid administrative services and should not be included on the Medicaid Cost Report.

3.3.C. COST ALLOCATION PLANS

MDHHS requires LHDs to certify that their existing cost allocation plan is in compliance with OMB Title 2 CFR Part 200 and that the plan identifies Medicaid outreach activities as a specific element of the plan. The certification is accepted by MDHHS as documentation to continue this administrative claiming. Each cost allocation plan is subject to MDHHS review for compliance with OMB Title 2 CFR Part 200.

3.3.D. CERTIFICATIONS

The LHD Cost Allocation Plan certifications are kept on file and should be submitted to the MDHHS Bureau of Purchasing, Grants Division/Electronic Grants Section. (Refer to the Directory Appendix for contact information.)

New certifications are required if a modification occurs in the LHD’s cost allocation plan that impacts the Medicaid Outreach Activities element or upon a Department review that results in a finding of non-compliance. If neither of these conditions exist, the certification remains valid in subsequent fiscal years.
SECTION 4 – ENCOUNTERS

Encounters are counted and reported by LHDs on the Michigan Medicaid Local Health Department (LHD) Cost Report in order to receive full cost reimbursement. The reported encounters include the health department’s total facility encounters, minus dental encounters and, as a subset of total encounters, the total Medicaid encounters at the LHD clinic.

In order to determine a rate per encounter, the total costs of facility services are divided by the total encounters, resulting in a rate per encounter. The rate per encounter is multiplied by the number of Medicaid encounters to determine the total Medicaid costs to be reimbursed.

4.1 DEFINITION OF ENCOUNTER

An encounter is a face-to-face contact between a patient and the provider of health care services who exercises independent judgment in the provision of health care services. For a health service to be defined as an encounter, the health service must be recorded in the patient's record.

The following examples help to understand and define an encounter:

- To meet the encounter criterion for independent judgment, the provider must be practicing within the scope of practice defined in the Michigan Public Health Code. The provider must be acting independently and not be assisting another provider. For example, a nurse assisting a physician during a physical examination by taking vital signs, taking a history or drawing a blood sample is not credited with a separate encounter.

- Services such as drawing blood, collecting urine specimens, performing laboratory tests, taking x-rays, filling and/or dispensing prescriptions, in and of themselves, do not constitute encounters. However, these procedures may accompany professional services performed by medical or other health providers which do constitute encounters.

- A provider may be credited with no more than one encounter with a given patient during a single day, except when the patient, after the first encounter, suffers illness or injury requiring additional diagnosis or treatment. For example, when a patient sees a physician for flu symptoms early in the day and then later the same day sees the same physician for a broken leg, then visits may be classified as two encounters.

The encounter criteria are not met in the following circumstances:

- When a provider participates in a community meeting or group session that is not designed to provide health services.

- When the only service provided is part of a large-scale effort, such as a mass immunization program, screening program, or community-wide service program.
The following services are not classified as encounters:

- Allergy injection(s)
- Collecting urine specimens
- Dispensing prescriptions
- Drawing a blood sample
- Filling out insurance forms, etc.
- Performing laboratory tests
- Refilling prescriptions
- Taking a history
- Taking vital signs
- Taking x-rays

4.2 MEDICARE/ MEDICAID ENCOUNTERS

Services for Medicare and Medicaid dual beneficiaries are eligible for full cost reimbursement, and these encounters are considered Medicaid encounters.

4.3 OTHER INSURANCE ENCOUNTERS

Medicaid services provided to beneficiaries with other commercial health insurance carriers are eligible for full cost, and the encounters are considered Medicaid encounters. Medicaid requires beneficiaries’ other insurance resources and their network providers to be utilized for all services covered under the private coverage before billing Medicaid. Even if the other insurance payment for a specific service exceeds the amount Medicaid would pay, providers must still bill the procedure code and enter the other insurance payment on the claim. The claim showing other insurance reimbursement or zero payment must be processed through the claim system in order to be counted as a Medicaid encounter. (Refer to the Billing & Reimbursement for Professionals and the Coordination of Benefits Chapters of this manual for additional information.)
SECTION 5 – PUBLIC DENTAL CLINIC ENHANCED REIMBURSEMENT RATE

5.1 GENERAL INFORMATION

Public Dental Clinics are paid at the average commercial rate for Medicaid dental services. Qualifying providers include any Public Dental Clinic as identified in one of the following sections of the Michigan Public Health Code (PA 368 of 1978 as amended): 333.2413, 333.2415, or 333.2421.

5.2 RATE DETERMINATION

The average commercial rate is determined by MDHHS staff through information supplied by the commercial dental insurers and paid to providers eligible for this supplemental payment. If this information is not available from the commercial carriers, MDHHS may determine the rate from other sources.

5.3 PAYMENT METHODOLOGY

Public dental clinics submit claims and receive payment based on MDHHS fee-for-service (FFS) rates throughout the year. MDHHS identifies services and payments from Medicaid paid claims records at the end of the public dental clinic's fiscal year. An annual settlement calculation is performed to determine the difference between the Medicaid fee screen payments and the average commercial rate.

This calculation and a notice are sent to the public dental clinic indicating the amount of local share that must be received from the public dental clinic. The local share must be received prior to the submission of the federal claim. The local share is sent from the public dental clinic to MDHHS via the Intergovernmental Transfer process. After receipt of the local share, MDHHS will process a payment to the public dental clinic for the entire amount of difference between the FFS payments and the average commercial rate. The settlements are performed each public dental clinic and for each fiscal year ending after March 31, 2005.

MDHHS may pay interim payments for the estimated difference between Medicaid FFS payments and the average commercial rate. Interim payments will be reconciled at the time of annual settlement.

Settlements do not apply to services for which primary reimbursement is the responsibility of Delta Dental Plan through the Healthy Kids Dental contract or any other third party payer.

The enhanced reimbursement rate process is in place of the cost-settlement process for dental encounters.
SECTION 6 – COST REPORTING REQUIREMENTS

6.1 FULL COST METHODOLOGY

The term full cost reimbursement, as used in this chapter, means the cost of providing Medicaid services as determined by information provided on the Michigan Medicaid Cost Report for LHDs. Full cost is derived from the amounts the LHD receives from Medicaid Fee-for-Service and Medicaid Health Plan payments, other third party insurers, quarterly payments from MDHHS, and initial and final settlements. A combination of local and state general funds provides the basis for full cost reimbursement and is used for claiming federal financial participation. MDHHS will reimburse the LHD for its services, other than dental services, at reasonable and allowable actual incurred costs according to 42 CFR § 431.615(c)(4).

To receive full cost reimbursement, qualified providers must supply the MDHHS Hospital and Clinic Reimbursement Division (HCRD) with a Michigan Medicaid cost report.

6.2 COST SETTLEMENTS

Cost settlements are performed annually to ensure that the payments were made at reasonable and allowable full cost. As necessitated by the cost settlement process, any financial adjustments are made with the LHD. Settlements are performed for each LHD for each fiscal year.

6.3 REASONABLE AND ALLOWABLE COSTS

Reasonable and allowable costs are determined using the applicable Medicare cost reimbursement principles detailed in 42 CFR, Part 413.

6.4 FILING COST REPORTS

LHDs must file a Michigan Medicaid cost report with the MDHHS HCRD annually. The authorized individual must sign the cost report and related Medicaid supplemental documents. The LHD cost report is due five months after the end of the normal fiscal period.

- A 30-day extension of the due date may, for good cause, be granted if a written request is received by the HCRD prior to the expiration of the original five months.
- The LHD cost report may be filed for more or less than an annual period only when necessitated by facilities terminating their agreement with MDHHS, by a change in ownership, or by a change in fiscal period.

Improperly completed or incomplete filings are returned to the LHD for proper completion and must be resubmitted to MDHHS within 30 days of receipt of the cost report.

If the required cost report and supplemental documents are not submitted within the required time limit (including approved extensions), no cost settlement for full cost reimbursement occurs for that fiscal period. By not submitting a cost report, it is understood that the LHDs are withdrawing from the full cost program. This action remains in effect until proper submission of all the required documents in a subsequent fiscal period.
If LHDs do not file a cost report, any interim payments are recovered for the year in which the LHD did not participate in the full cost reimbursement program.

6.5 AMENDING COST REPORTS

LHDs may amend a cost report by requesting the amendment in writing and submitting a revised cost report to the MDHHS HCRD. The revised cost report must be submitted no later than one year from the original filing date. The letter must explain why the cost report requires revision, and how it was changed.

6.6 ACCOUNTING AND RECORD KEEPING

Each LHD operating a clinic in the State of Michigan and seeking payment under the LHD provisions must complete LHD cost reports.

Medicaid supplemental documents must be filed using the modified accrual method of accounting. These documents must be forwarded to MDHHS Bureau of Purchasing, Grants Division/Electronic Grants Section. (Refer to the Directory Appendix for contact information.)

The LHD must maintain, for a period of not less than seven years from the end of the fiscal year of the LHD cost report, financial and clinical records for the period covered by the cost report which are accurate and in sufficient detail to substantiate the cost data reported. If there are unresolved issues at the end of this seven-year period, the records must be maintained until these issues are resolved. Expenses reported as reasonable costs must be adequately documented in the financial records of the LHD or they are disallowed.

The MDHHS HCRD maintains each required LHD cost report and supplemental documents submitted by the provider for seven years following the date of submission of the report. In the event there are unresolved issues at the end of this seven-year period, the cost report is maintained until such issues are resolved.

Financial and clinical records of the LHD must be available for review by authorized personnel of MDHHS, the Health Care Fraud Division of the Michigan Department of Attorney General, or the U.S. Department of Health & Human Services (HHS) in conformity with the provisions of the Social Security Act.
SECTION 7 – INTERIM PAYMENTS, SETTLEMENTS AND APPEALS

7.1 SETTLEMENT(S) OF LOCAL HEALTH DEPARTMENTS

An initial settlement is calculated annually from the cost of providing Medicaid covered services to Medicaid beneficiaries enrolled in the FFS program and MHPs. Calculations are determined from the filed Medicaid LHD cost report.

FFS encounters are verified for the cost settlement from the MDHHS paid claims data. Encounters for MHP or private HMO enrollees are recorded in the cost report. An initial settlement generally is completed within three months of the receipt of a complete and acceptable cost report. MDHHS retains the right to withhold a portion of an initial payment based on individual circumstances.

Final settlements for LHDs generally are completed within one year of the fiscal year end using updated Medicaid data for the period covered by the LHD cost report. This allows sufficient time for all claims to clear the MDHHS payment system. Medicaid data is updated using MDHHS approved claims payment data, all other payments for Medicaid services, and Medicaid visits.

Settlements with amounts due to the LHD are paid with a payment voucher. Settlements showing an overpayment to the LHDs must be repaid to the State of Michigan as noted in the settlement letter.

7.2 AUDIT ADJUSTMENT REPORT

An Audit Adjustment Report showing adjustments to the filed cost report is sent with the final settlement. If the LHD accepts the findings contained in the Audit Adjustment Report, an appropriate officer of the LHD signs the report and mails the report to the MDHHS HCRD. (Refer to the Directory Appendix for contact information.)

7.3 MEDICAID PROVIDER APPEALS

Medicaid providers have the right to appeal any adverse action taken by MDHHS unless that adverse action resulted from an action over which MDHHS had no control (e.g., Medicare termination, license revocation). Appeals must be submitted in writing and mailed to the Michigan Administrative Hearing System (MAHS). (Refer to the Directory Appendix for contact information.)

The appeals process is outlined in the MDHHS Medicaid Provider Reviews and Hearings rules, Michigan Administrative Code R400.3402 through R400.3425, amended. Any questions regarding the appeal process should be directed to the MAHS.

SECTION 1 - GENERAL INFORMATION

This chapter applies to certified Maternal Infant Health Program (MIHP) providers servicing Medicaid and Maternity Outpatient Medical Services (MOMS) beneficiaries. The purpose of MIHP is to reduce infant mortality and morbidity. This is an objective of both the State of Michigan and the federal government who fund this program. The goal of the MIHP is to promote healthy pregnancies, positive birth outcomes, and healthy infant growth and development.

Accordingly, MIHP services are intended to help pregnant Medicaid beneficiaries who are most likely to experience serious psychosocial or nutritional issues. Services are intended to supplement regular prenatal/infant care and to assist the following providers in managing the beneficiary’s health and well-being:

- Physicians (MD, DO)
- Certified Nurse Midwives
- Pediatric Nurse Practitioners
- Family Nurse Practitioners
- Medicaid Health Plans
- Physician Assistants

This chapter is designed to work with the Maternal Infant Health Program Operations Guide, developed and maintained by the MDHHS Division of Family & Community Health. The Guide is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

1.1 PROGRAM SERVICES

MIHP services are preventive health services provided by an agency that is certified by the Michigan Department of Health and Human Services (MDHHS). MIHP services are provided by a licensed social worker and a licensed registered nurse. Licensed social workers and licensed registered nurses who are certified as an Internationally Board Certified Lactation Consultant (IBCLC) may provide services. An infant mental health specialist with an Infant Mental Health endorsement may be included. A registered dietitian may also provide services with a physician order. All physician orders for MIHP services must be in compliance with state and federal laws prohibiting self-referral. All physician orders for MIHP services must be in compliance with state and federal laws prohibiting self-referral.

Program services include social work, nursing services (including health education and nutrition education), breast feeding support, nutritional counseling, and beneficiary advocacy services. MIHP services include:

- Psychosocial and nutritional assessment
- Plan of care development
- Professional intervention services
Maternal and infant health and nutrition education  
Arranging transportation as needed for health care, substance abuse treatment, support services, and/or pregnancy-related appointments  
Referral to community services (e.g., mental health, substance abuse)  
Coordination with other medical care providers and Medicaid Health Plans (MHPs)  
Family Planning education and referral  
Coordinating or providing childbirth or parenting education classes

### 1.2 STAFF CREDENTIALS [CHANGE MADE 4/1/18]

MIHP staff consists of registered nurses and licensed social workers with the following qualifications:

<table>
<thead>
<tr>
<th>Nurses</th>
<th>All nurses must possess:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>- current Michigan licensure as a registered nurse by the Michigan Department of Licensing and Regulatory Affairs; and</td>
</tr>
<tr>
<td></td>
<td>- at least one year of experience providing community health, pediatric or maternal/infant nursing services.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Social Workers</th>
<th>All social workers must possess:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>- current Michigan licensure as a licensed social worker by the Michigan Department of Licensing and Regulatory Affairs; and</td>
</tr>
<tr>
<td></td>
<td>- at least one year of experience providing Social Work services to families.</td>
</tr>
</tbody>
</table>

Other professionals who may provide services must have the following qualifications:

<table>
<thead>
<tr>
<th>Infant Mental Health Specialist</th>
<th>Current Michigan licensure as a psychologist, master social worker, or professional counselor by the Michigan Department of Licensing and Regulatory Affairs;</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Infant Mental Health Endorsement by the Michigan Association for Infant Mental Health (MI-AIMH), demonstrating competency at the Infant Mental Health Specialist level; and (revised 4/1/18)</td>
</tr>
<tr>
<td></td>
<td>At least one year of experience in an infant health program.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Internationally Board Certified Lactation Consultant (IBCLC)</th>
<th>All IBCLCs must possess:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>- current Michigan licensure as a registered nurse or licensed social worker by the Michigan Department of Licensing and Regulatory Affairs; and</td>
</tr>

Registered Dietitian

- A Master's Degree in Public Health with emphasis in nutrition or a Master's Degree in human nutrition; or
- a Bachelor's Degree and registration as a dietitian (RD); or
- a Bachelor's Degree and RD-eligible with examination pending in six months or less; and
- at least one year of experience providing community health, pediatric, and/or maternal/infant nutrition services.

A physician order is needed before the dietitian may provide services.

A physician order must be obtained before a registered dietitian may visit with the beneficiary. The physician order must be included in the beneficiary record. If community resources are available, such as a hospital dietitian, the MIHP may coordinate with the physician to refer the beneficiary to the hospital dietitian. The MIHP may also coordinate nutrition services with the MHP. When nutrition counseling is needed, the documentation must indicate how services were provided. All physician orders for MIHP services must be in compliance with state and federal laws prohibiting self-referral.

1.3 Eligibility

**Maternal Services**

Pregnant Medicaid beneficiaries qualify for MIHP services at any time during the pregnancy. After delivery, a new maternal MIHP case cannot be opened. For purposes of closing a case, services may be provided for up to 60 days after the pregnancy ends or the end of the month in which the 60th day falls.

**Infant Services**

MIHP services for an infant begin after the infant’s birth and hospital discharge. Infant services are exclusively for the benefit of the infant on Medicaid, primarily by working with the infant’s family. It is expected that a minimum 90% of Infant Risk Identifier visits and 80% of professional visits will be provided in the home.

**Both Maternal and Infant Services**

An infant case and a maternal case can both be open at the same time in some incidences. If the MIHP is seeing an infant and the mother becomes pregnant, a maternal risk identifier assessment visit can be completed and billed as such. After this initial risk identifier assessment visit is completed, all subsequent professional visits for that family should be blended visits and billed under one Medicaid ID. The program is based on the family dyad, and both the infant and parent are to be assessed at each visit and billed as “blended visits” under either the parent’s or the infant’s Medicaid ID.

1.4 Medicaid Health Plans (MHP)

MIHP services provided to individuals enrolled in a MHP are administered by the MHP in adherence to the program components as outlined in this chapter. All MIHP services provided to MHP enrollees are coordinated and reimbursed by the MHPs.
1.4.A. **Contractual Agreements**

MIHP providers must establish and maintain provider contractual agreements with the MHPs in their service area to receive payment for in-network services provided to MHP enrollees unless the MHP indicates otherwise. MIHP providers are encouraged to contract with the MHPs in their service area.

1.4.B. **Care Coordination Agreements**

MIHP providers are encouraged to establish Care Coordination Agreements (CCAs) with all MHPs in their service area. MIHP providers and MHPs must also establish and maintain a CCA for in-network and out-of-network services. The intent of the CCA is to explicitly describe the services to be coordinated and essential aspects of collaboration between the MHP and the MIHP provider. (Refer to the Forms Appendix for an example of a Care Coordination Agreement.)

1.4.C. **Freedom of Choice**

MIHP services are voluntary and participants must be allowed the freedom of choice of MIHP providers, including the opportunity to: select an in-network provider; maintain a current service relationship which extends services to the infant by the same provider who rendered maternal services; change providers within the MHP network of providers; or decline services.

1.4.D. **Referral to an MIHP**

Within one month of when the MHP determines a pregnant or infant enrollee is eligible for MIHP services, the MHP must refer the enrollee to an MIHP provider. MHPs are not required to refer enrollees to an MIHP provider if the enrollee is already participating in an MDHHS approved equivalent evidence-based home visiting program that provides pregnancy-related or infant support services. This may be evidenced by enrollee self-attestation. MHPs may be required to present MDHHS evidence of MIHP referral and care coordination, evidence of participation in an equivalent evidence-based home visiting program, or refusal of MIHP services upon request.

1.4.E. **Prior Authorization of Services**

MHPs may not require prior authorization for the Initial Risk Assessment visit, professional visits, drug-exposed infant visits, MIHP lactation support visits, childbirth education classes, or parenting education classes when provided within the criteria and limits established in policy. MIHP services in excess of limits established in policy may be subject to MHP prior authorization requirements.
1.4.F. OUT-OF-NETWORK MIHP SERVICES

It is incumbent upon MIHP providers to check eligibility and MHP enrollment at every visit. Relationships established during previous pregnancies with out-of-network MIHP providers are not required to be covered by the MHP. Non-contracted MIHP providers, including those who have a current MIHP relationship with a pregnant woman or infant, are required to contact the enrollee's MHP to discuss operational details before providing out-of-network services.
SECTION 2 - PROGRAM COMPONENTS [CHANGE MADE 4/1/18]

The assessment visit is the initial visit with the beneficiary. It is conducted in person with the beneficiary and either a registered nurse or licensed social worker. The assessment visit should be billed using the appropriate place of service code.

The Risk Identifier is a mandatory tool utilized during the assessment visit. The Risk Identifier assures all appropriate services are identified prior to initiation of professional visits, child birth education, parenting education or transportation services. If a Risk Identifier indicates a need for MIHP services, an appropriate Plan of Care (POC) must be developed that clearly outlines the beneficiary's problems/needs, objectives/outcomes, and the intervention(s) to address the problem(s). The Risk Identifier and the POC must be completed and the Risk Identifier entered into the MIHP database before further MIHP services are initiated.

If the Risk Identifier does not indicate the need for MIHP services or when, after completion of the Risk Identifier the beneficiary refuses services, then the POC is not developed and the Discharge Summary is completed accordingly. No follow-up services should be provided; however, the beneficiary should receive the informational packet. (Refer to the Maternal Infant Health Program Operations Guide for additional information.)

(Paragraph deleted 4/1/18 per bulletin MSA 17-41.)

2.1 MATERNAL RISK IDENTIFIER

The Maternal Risk Identifier covers multiple domains, including basic care, drug and alcohol use, smoking, shelter, depression, transportation needs, intent to breast feed, and support systems. The Maternal Risk Identifier can be found in the Maternal Infant Health Program Operations Guide. It must be completed for each pregnant woman to determine the services needed through the MIHP. Either the licensed social worker or the registered nurse must work face-to-face with the beneficiary to complete the form. MIHP services will be provided based on the beneficiary's responses to the various questions on the Maternal Risk Identifier. The Maternal Risk Identifier must be completed to assure all appropriate services are identified. Reimbursement for the Maternal Risk Identifier is limited to one Maternal Risk Identifier for each eligible Medicaid beneficiary for each pregnancy.

The Maternal Risk Identifier results must be entered into the MIHP database. (Refer to the Maternal Infant Health Program Operations Guide for additional information.) The MIHP database will score each risk as high, medium, low, or no risk. Based on the risks identified and professional observation, the registered nurse and the licensed social worker, working together, must write a plan of care to determine appropriate interventions. The initial assessment visit and up to nine professional visits per woman per pregnancy are billable. The MIHP provider must respond to all referrals promptly to identify the beneficiary's needs. Documentation must indicate attempts to visit or contact the pregnant woman within 14 calendar days after the referral is received.

MIHP serves the maternal/infant dyad. When infant services are initiated, an Infant Risk Identifier must be completed.
2.2 INFANT RISK IDENTIFIER [CHANGE MADE 4/1/18]

The Infant Risk Identifier, as found in the Maternal Infant Health Program Operations Guide, must be completed for each infant entering the MIHP to determine the services needed. Either the licensed social worker or the registered nurse must work face-to-face with the beneficiary and primary caregiver to complete the form. The Infant Risk Identifier is made up of many domains, including health and safety, feeding and nutrition, family support, child care, and general growth and development. MIHP services will be provided based on the responses to the various questions on the Infant Risk Identifier.

The MIHP provider must respond to all referrals promptly to identify the beneficiary’s needs. Documentation must indicate attempts to visit or contact the beneficiary within a maximum of seven calendar days for the infant. For referrals received prior to the infant’s discharge from the inpatient setting, the Risk Identifier should be conducted within two (2) business days following the hospital discharge. If the MIHP provider is unable to visit the beneficiary within the stated time frame, documentation must clearly support all attempts to contact or visit the infant beneficiary.

When infant services are initiated, an Infant Risk Identifier may be billed as a separate visit from a maternal postpartum professional visit when these services are performed on the same date of service. Documentation must substantiate why it was necessary to perform both visits on the same date of service. Servicing the maternal/infant dyad, all subsequent visits for that family should be “blended visits” and billed as “blended visits” under either the mother’s or the infant’s Medicaid ID.

The Infant Risk Identifier must be entered into the MIHP database. The system will score each risk as high, medium, low, or no risk. Based on the risks identified and professional observation, the registered nurse and the licensed social worker, working together, must write a plan of care for each beneficiary.

(Paragraph deleted 4/1/18 per bulletin MSA 17-41.)

The initial assessment visit and up to nine professional visits per infant/family are billable. An additional nine infant visits may be provided when requested in writing by the medical care provider. All visits beyond the original nine visits must have a written physician order. The reason for and purpose of additional visits must be well documented in the medical record.

2.3 MULTIPLE BIRTHS

In cases of multiple births, each infant should have a separate risk identifier visit completed. This also applies to infants in foster care where there are two infants in the same home. These separate risk identifier visits can be billed separately under each individual infant Medicaid identification number. Subsequent professional visits should be billed under each infant ID if the infants are from different families, such as with foster care families. If the infants are siblings, the visits should be “blended visits” and billed under one Medicaid ID only. The risk identifier visit and up to nine professional visits can be made to the family. A physician order is needed if more than nine infant visits are needed per family.

2.4 PSYCHOSOCIAL AND NUTRITIONAL ASSESSMENT-RISK IDENTIFIER

The MIHP consists of many interventions in multiple domains designed to educate and inform the beneficiary, both as a pregnant woman and as the parent of an infant. Domains include basic care, physical abuse, substance abuse, social behavior and health history. The Risk Identifiers are designed to determine if there is high, medium, low, or no risk for each domain. Based on the Risk Identifier and professional observation, the MIHP provider will determine interventions specific to each beneficiary.
Refer to the Maternal Infant Health Program Operations Guide for more information and interventions related to the domains.

If the Risk Identifier does not indicate the need for MIHP services, then no follow-up services should be provided; however, the beneficiary should receive the informational packet. (Refer to the Maternal Infant Health Program Operations Guide for additional information.) If a need is indicated, an appropriate POC must be developed that clearly outlines the beneficiary's problems/needs, objectives/outcomes, and the intervention(s) to address the problem(s). If a MIHP prenatal case subsequently becomes an MIHP infant case, the Infant Risk Identifier must be completed to determine eligibility for the infant before professional visits are made.

The beneficiary must be assessed (Risk Identifier completed) for the need for transportation assistance, childbirth/parenting education classes, health education, breast feeding support, and family planning services. The completion of the Risk Identifier must precede any professional or IBCLC visits. The Risk Identifier must be completed by the licensed registered nurse or the licensed social worker.

2.5 PLAN OF CARE

The registered nurse and the licensed social worker, working together, must develop a comprehensive POC to provide identified services to the beneficiary and/or referrals to community agencies. The POC must indicate the specific domains at risk, the specific objectives, specific intervention(s) to be implemented, and the number of visits that are required for actualizing the plan. The POC must be updated whenever a significant change occurs. Documentation must support the changes made. The MIHP provider must determine how best to involve the registered nurse and the licensed social worker in implementing the POC based on the needs identified.

The POC must identify if a beneficiary would benefit from a visit with a registered dietitian based on the needs identified. If the services of a registered dietitian are needed, the necessary physician order must be obtained. The beneficiary may be referred to their MHP or local hospital for nutritional counseling.

The beneficiary's exit from the program is expected to occur when the objectives of the POC are complete, or when the MIHP provider determines that continued interventions are no longer needed.

2.6 CARE COORDINATOR

A specific registered nurse or licensed social worker will be identified as the care coordinator assigned to monitor and coordinate all MIHP care, referrals, and follow-up services for the beneficiary. The care coordinator must assure the family is appropriately followed and referred for needed services. The name of the care coordinator must be documented in the beneficiary's record. The care coordinator must refer all beneficiaries to the Women, Infants and Children (WIC) Program if they are not receiving WIC.

For the infant, MIHP providers are encouraged to participate in local Children's Protective Services (CPS) Interdisciplinary Team meetings, Part C/Early On Interagency Coordinating Council meetings, and in similar efforts to coordinate the infant's care. This assures the use of and coordination with other community resources to avoid duplication of services, identify gaps, and to assure ongoing support when the MIHP case is closed. When appropriate, MIHP referrals to CPS must be made. Appropriate family planning education and referrals must be made and documented.
2.7 PROFESSIONAL VISITS

A professional visit is a face-to-face encounter with a beneficiary conducted by a licensed professional (i.e., licensed social worker, registered nurse, or infant mental health specialist) for the specific purpose of implementing the beneficiary's plan of care. A registered dietitian may conduct a visit when ordered by a physician.

The professional visit is a one-on-one visit that must be scheduled to accommodate the beneficiary's situation and be appropriate to the beneficiary's level of understanding. Visits lasting less than 30 minutes or provided in a group setting are not billable.

Medicaid reimbursement for a professional visit includes related care coordination activities. MIHP providers are eligible for Medicaid reimbursement for one professional visit per beneficiary on the same date of service, regardless of the place of service. When beneficiary needs arise, the MIHP provider must coordinate all necessary MIHP related services with the appropriate community agencies. Visits beyond the established limit cannot be billed to the beneficiary or Medicaid.

All professional visit records must include the place of service, time the visit began and ended, risk factors discussed, and actions taken. Coordination of agency and community services and arranging transportation for the beneficiary are part of each professional visit. The MIHP provider must assure the beneficiary has been referred to the WIC program.

Family planning options must be discussed throughout the course of care, giving the woman time to consider her options.

The MIHP must provide directly or arrange bilingual services and/or services for the visually impaired and/or hearing impaired when needed so all beneficiaries may fully participate in the MIHP.

2.8 DRUG-EXPOSED INFANT

A drug-exposed infant is an infant born with the presence of an illegal drug(s) and/or alcohol in his circulatory system, or who is living in an environment where substance abuse and/or alcohol is a danger or is suspected. Due to the complex nature of these cases, additional visits may be required. A separate drug-exposed procedure code is assigned for additional visits. The beneficiary's record must contain documentation to support the use of the drug-exposed procedure code.

The initial assessment and up to nine professional visits for a drug-exposed infant are billable by the MIHP. An additional nine infant visits may be provided when requested in writing by the medical care provider. In these cases, the reason for and purpose of additional visits must be well documented in the beneficiary record.

The maximum of 36 professional visits and the initial assessment visit may be reimbursed for a drug-exposed infant. The provider must use the professional visit code for the first 18 visits; the drug-exposed procedure code may then be billed for up to an additional 18 visits. Refer to the MDHHS website for additional code information. (Refer to the Directory Appendix for website information.)
2.9 PLACE OF SERVICE

Reimbursement for professional visits is based on the place of service. A clinic/office visit and a home visit pay different amounts; therefore, the place of service must be documented in each professional visit note.

Typically, all visits are performed at the beneficiary's home or at the MIHP provider's office. On rare occasions when a visit cannot be completed in the beneficiary's home or in the provider's office, the provider may work with the beneficiary to identify a mutually agreeable site to conduct a visit. These types of visits are referenced as visits occurring in the community setting.

For a community visit to be reimbursable, the beneficiary record must clearly identify the reason(s) why the beneficiary could not be seen in her home or in the MIHP office setting. This documentation must be completed for each visit occurring in the community setting. Visits occurring in buildings contiguous with the provider’s office, in the provider’s satellite office, or rooms arranged or rented for the purpose of seeing beneficiaries are considered to be in an office setting rather than in a community setting. Visits should never be conducted in the MIHP provider's home.

2.9.A. MATERNAL SERVICES

- Professional visits may be provided in a clinic/office setting or in the beneficiary's home/place of residence, including homeless shelter, or at a mutually agreed upon community location.
- Professional visits may not be provided in the inpatient hospital setting.
- Efforts must be made to visit the beneficiary in the home. MDHHS requires one visit be made to the beneficiary's home during the prenatal period to better understand the beneficiary's background.
- A second home visit must be made after the birth of the infant to observe bonding, infant care and nutrition, and discuss family planning. An MIHP provider may complete and bill an infant risk identifier visit separate from a maternal postpartum professional visit. A maternal postpartum professional visit may be made on the same date of service as the infant risk identifier visit. Providers must document why both visits need to be done on the same date of service. The maternal visit must be a minimum of 30 minutes and be reflected in the professional note. After the risk identifier assessment visit has been completed, all subsequent professional visits should be blended visits.

2.9.B. INFANT SERVICES

- MIHP is a home-visiting program.
- The initial assessment visit, when the Infant Risk Identifier is completed, must be completed in the beneficiary's home at least 90% of the time.
- On average, 80% of all professional interventions must be done in the beneficiary's home.
- If a home visit is not feasible, services may be provided any place other than an inpatient hospital setting.
- The infant and primary caregiver must be present at all visits.
2.10 TRANSPORTATION

Transportation services are available to help MIHP-enrolled pregnant and infant beneficiaries access their health care and pregnancy-related appointments and for a mother to visit her hospitalized infant. Pregnancy-related appointments include those for oral health services, WIC services, behavioral or substance use disorder treatment services, and childbirth and parenting education classes. Through the completion of the Risk Identifier, the MIHP provider must assess each MIHP beneficiary’s need for transportation services.

Beneficiaries in the Nurse Family Partnership (NFP) do not need a Risk Identifier completed to receive transportation services. Transportation is the only MIHP service available to NFP beneficiaries.

2.10.A. TRANSPORTATION FOR MIHP MEDICAID HEALTH PLAN ENROLLEES

MHPs are responsible for providing transportation for pregnancy-related appointments for MHP enrolled MIHP and NFP participants. MIHPs are subject to the MHP’s internal processes for the coordination of transportation services for MHP enrollees.

2.10.B. TRANSPORTATION FOR MIHP FEE FOR SERVICE BENEFICIARIES [CHANGE MADE 7/1/18]

The MIHP may provide transportation to MIHP Fee-for-Service (FFS) beneficiaries for medical/health care services and pregnancy related appointments when no other means of transportation are available, including transportation from the local MDHHS office. Transportation services provided to the pregnant beneficiary should be billed utilizing the Medicaid ID number of the pregnant woman, and transportation services provided for infant services should be billed utilizing the infant’s Medicaid ID number.

Reimbursement for transportation services provided to Medicaid FFS beneficiaries is made according to the allowable amount established by MDHHS and aligns with rates established for Non-Emergency Medical Transportation (NEMT) services. Refer to the MDHHS Non-Emergency Transportation Database located on the MDHHS website. (Refer to the Directory Appendix for website information.)

MDHHS reimburses the MIHP provider an administrative fee equal to six percent of the cost of transportation provided to MIHP FFS beneficiaries. When billing, the six percent fee should be calculated and included in the amount charged, not to exceed the maximum amount allowed. The MIHP provider must determine the most appropriate and cost effective method of transportation. MDHHS reimburses transportation costs at the lesser of actual cost or the maximum/upper limit for:

- Bus
- Mileage (personal, including beneficiary, relative or friend).
- Taxi

If other methods of transportation are not available or appropriate, the MIHP provider may make arrangements with local cab companies to provide taxi service for MIHP beneficiaries. Since this is a more expensive service, MDHHS reimburses a maximum of 20 trips per beneficiary through the MIHP.
The MIHP provider must maintain documentation of transportation for each beneficiary for each trip billed. The record must specify:

- The name and address of the beneficiary;
- The date of service (DOS);
- The trip’s starting point and destination (address, city);
- The purpose of the trip;
- The number of tokens or miles required for the trip;
- The amount that the beneficiary or transportation vendor was reimbursed;
- The provider identification information for the individual or business providing transportation; and
- Verification of transportation provider enrollment in CHAMPS. (text added per bulletin MSA 17-49)

The MIHP provider must ensure the beneficiary kept the appointments for which transportation tokens or funds were provided. Medicaid does not pay for transportation not provided.

The MIHP provider may give transportation tokens or funds to the pregnant woman or to the caregiver of the infant. In situations where funds are provided, it is recommended that the pregnant woman or the caregiver sign a receipt and that the receipt be retained in the case records. The MIHP may also contract for transportation services. Transportation services should be billed for each date of service it was provided. MDHHS contracts with a transportation brokerage company to arrange and provide NEMT for beneficiaries residing in Wayne, Oakland and Macomb counties. Transportation may be provided when the beneficiary qualifies for service and has no other means of transportation. (Refer to the Directory Appendix for contractor contact information.)

### 2.11 Childbirth Education

Childbirth education is a series of group classes intended to help:

- Understand the changes in the body during pregnancy;
- Understand the delivery process, including information regarding pre-term labor;
- Understand the postpartum period;
- Care for the infant (classes may include information on developing positive parenting skills);
- Interact with other pregnant women; and
- Build a support network.

First-time mothers must be encouraged to complete the course.

The medical care provider or the MIHP provider may make a referral for childbirth education classes. MIHP providers may provide this service directly or have a contract with a local hospital’s outpatient clinic. An outpatient hospital clinic that provides this service may bill Medicaid directly for FFS.
beneficiaries. The contract must indicate which provider is to bill and receive payment. These services are provided to a group in a classroom situation.

MIHP childbirth education includes, but is not limited to, the following topics:

- Pregnancy,
- Labor and delivery,
- Infant care and feeding,
- Postpartum care, and
- Family planning.

In unusual circumstances (e.g., beneficiary entered prenatal care late or is homebound due to a medical condition), childbirth education may be provided in the beneficiary's home as a separately billable service. Case records must document the need for one-on-one childbirth education and where services were provided. (Refer to the Education Reimbursement subsection of this chapter for additional billing information.)

2.12 PARENTING EDUCATION

Parenting education is intended to develop positive parenting skills and attitudes, provide interaction with other parents, and possibly build a support network. Parenting education may be billed once per infant or, in the case of multiple births, once per family.

The infant’s medical care provider or the MIHP provider may make a referral for parenting education classes. The services may be provided by the MIHP provider or by contract with an outpatient hospital or community-based organization. The contract must indicate which provider is to bill and receive payment. These services are provided to a group in a classroom situation.

Parenting education classes should include, but are not limited to,:

- General feeding recommendations throughout the first year of life,
- Normal and abnormal patterns of elimination,
- Common signs and symptoms of infant illness,
- Common childhood injuries and how to care for them,
- Normal range of sleep, rest, activity and crying patterns,
- General hygiene needs of infants,
- Normal developmental milestones of infants throughout the first year,
- Basic emotional needs,
- Basic protection from toxic and/or hazardous waste,
- Basic immunizations and health maintenance, and
- General day-to-day living with children.

(Refer to the Education Reimbursement subsection of this chapter for additional billing information.)
2.13 LACTATION SUPPORT AND COUNSELING SERVICES

Medicaid will reimburse for evidence-based lactation support services provided to post-partum women in the outpatient setting up to and through 60 days post-delivery when services are provided by a qualified licensed MIHP registered nurse or licensed social worker in possession of a valid and current IBCLC certification. A maximum of two visits per pregnancy will be reimbursed for either a single or multiple gestation pregnancy. One visit is reimbursable per date of service.

Before initiating MIHP IBCLC services, the initial assessment visit, appropriate Risk Identifier (infant or maternal), and Plan of Care (infant or maternal) must be completed and the Risk Identifier entered into the MIHP database.

Although MIHP serves the mother-infant dyad, a distinction is made between maternal and infant services for billing purposes. IBCLC services are considered a component of pregnancy related services. Claims for IBCLC services are to be submitted utilizing the mother’s Medicaid beneficiary identification number. Documentation must include the need for maternal lactation support, a begin time and end time of services provided, and a comprehensive description of the professional interventions provided.

For all IBCLC rendered services, a copy of the current, valid IBCLC certification is to be maintained by the MIHP organization in accordance with the record keeping requirements of the Medicaid program.

Refer to the Billing & Reimbursement for Professionals Chapter of this manual for additional billing information. Refer to the Practitioner Chapter of this manual for additional information related to the service component requirements.

2.14 TRANSFER OF CARE/RECORDS

During the course of care, the beneficiary may require services from a different provider due to a move to another area or otherwise request a change of MIHP providers. When an MIHP provider is aware of a planned change in provider, information about the MIHP provider at the new location should be provided to the beneficiary. The referring provider must consult with the new provider about the case and transfer necessary information or records in compliance with the privacy and security requirements of Health Insurance Portability and Accountability Act of 1996 (HIPAA) regulations. A copy of the completed Risk Identifier, POC, and visit notes must be shared with the new provider. Close coordination between providers should avoid duplication of services. A release of information from the beneficiary is necessary.

2.15 IMMUNIZATIONS

Immunization status must be discussed throughout the course of care. Providers must determine the status of the MIHP beneficiary’s (i.e., mother and/or child) immunizations. The parent(s) should be encouraged to obtain immunizations and be assisted with appointments and transportation as needed. Before closing an MIHP case, the provider must have assessed immunization status, provided immunization education, and documented accordingly in the case record.

2.16 SPECIAL ARRANGEMENTS FOR CHILD PROTECTIVE SERVICES

Because of the serious nature of MIHP cases, some beneficiaries need the assistance of the MDHHS Children’s Protective Services (CPS) program. The MIHP provider must work cooperatively and continuously with the local CPS office. Contact persons for MIHP and CPS must be identified. Referral
protocol and a working relationship must be developed and maintained. MIHP is a valuable resource for the CPS program. The MIHP provider must seek CPS assistance in a timely manner. MIHP and CPS work concurrently on at least some referred cases. CPS is not to be viewed as a resource of last resort for the agency to call when all else fails.

The Michigan Child Protection Law (Act No. 238, Public Acts of 1975) requires health care professionals and others to report cases of suspected child abuse/neglect to CPS. When and how the MIHP provider must refer can best be determined by discussions with the local CPS agency. MIHP activity does not replace the need for required CPS referrals.

2.17 COMMUNICATIONS WITH THE MEDICAL CARE PROVIDER

When an MIHP case is opened without the medical care provider’s involvement, the MIHP provider must notify the medical care provider within 14 calendar days. When an MIHP case is opened for a pregnant woman with no medical care provider, the MIHP must assist the woman in finding a medical care provider.

The MIHP provider must keep the medical care provider informed of services provided as directed by the medical care provider or when a significant change occurs. The initial assessment visit is the first visit when the Risk Identifier is completed. The communication identifying risks must be sent to the medical care provider within 14 calendar days after the initial assessment visit is completed. The discharge summary, including the services provided, outcomes, current status, and ongoing needs of the beneficiary, must be completed and forwarded to the medical care provider when the MIHP case is closed.

2.18 AUTHORIZATION FOR PROGRAM EXCEPTIONS [Subsection Added 4/1/18]

In limited situations, when beneficiary needs surpass outlined MIHP program parameters, MIHP consultants may recommend additional visits for MIHP services, as required, in the following circumstances:

- Initiation of services for a child over 12 months of age;
- Continuation of services beyond 18 months of age; and
- Professional observation indicating that a beneficiary will benefit from MIHP services after being assessed with no risks using the appropriate program assessment tool (Risk Identifier).

MIHP providers seeking program exceptions for all beneficiaries must submit documentation to their assigned MIHP consultant that supports any identified risks and how the beneficiary may benefit from services. As a reminder, program screening tools and educational materials utilized by the MIHP are designed for maternal and infant use only.

MIHP consultants will be responsible for direct authorization of program exceptions for FFS beneficiaries. For beneficiaries enrolled in MHPs, the MIHP consultants will recommend exception visits to the MHPs. MHPs will be responsible for the review and processing of the prior authorization request for the services in accordance with their utilization management processes. All approved written authorizations are to be kept in the beneficiary’s MIHP provider file and must be available upon request. Additionally, as applicable, the MIHP provider is required to note any granted authorizations in the program approved communication tool for a beneficiary enrolled in a Medicaid Health Plan. (text added per bulletin MSA 17-41)
SECTION 3 – REIMBURSEMENT

To receive reimbursement for services, the MIHP billing National Provider Identifier (NPI) must be a facility, agency, or organization. A MIHP specialty must be indicated when enrolling as a MIHP provider through CHAMPS. The MIHP provider must bill only the procedure codes listed in the MDHHS Maternal Infant Health Program Database located on the MDHHS website. (Refer to the Directory Appendix for website information.)

All services provided by MIHP providers to MHP enrollees should be billed directly to the MHP. All services provided by MIHP providers to Fee-for-Service beneficiaries should be billed directly to MDHHS. MIHP services are a Medicaid only benefit. MIHP providers are not required to secure other insurance adjudication response(s) for claims for MIHP services prior to billing Medicaid FFS or MHPs, as the parameters of other carriers would never cover MIHP services. (Refer to the Billing & Reimbursement for Professionals Chapter of this manual for additional billing information.)

The Risk Identifier is required to be completed and entered into the MIHP database before the service is billed. (Refer to the Maternal Infant Health Program Operations Guide for additional information.) MIHP providers receive separate reimbursement for each Risk Identifier form completed and entered into the MIHP database even if it is determined the beneficiary does not need MIHP services. The Risk Identifier is billed and reimbursed based on place of service. As with all Medicaid services, documentation must support the services billed and paid.

Reimbursement is limited to one Maternal Risk Identifier per pregnant woman during her pregnancy and one Infant Risk Identifier per infant. Due to factors such as premature termination of a pregnancy or a subsequent pregnancy in the same year, an MIHP provider may do a Risk Identifier on a pregnant woman and receive reimbursement twice in the same year. In such instances, the provider must indicate "second pregnancy" in the remarks section of the claim when billing for the service.

Reimbursement for a professional visit is based on the place of service. The place of service must be documented in each professional visit note and billed accordingly. Medicaid reimbursement for a professional visit includes related care coordination and monitoring of activities.

Services scheduled but not provided to the beneficiary are not billable. This includes all MIHP services. The beneficiary must not be billed for visits provided beyond the established limit.

3.1 EDUCATION REIMBURSEMENT

Reimbursement for MIHP childbirth education classes and/or parenting education classes are for the complete course, regardless of the number of classes needed to complete the course. At a minimum, the course outline found in the Maternal Infant Health Program Operations Guide must be covered. Additional items may be added at the discretion of the provider. The pregnant woman or caregiver must attend at least one-half of the classes or cover at least one-half of the curriculum for the service to be billed. Dates of attendance must be documented in the beneficiary’s record. If the class is offered in the community, but not all items on the outline are covered, the missed items should be covered during a professional visit and not billed separately as education.

- MIHP childbirth education may be billed one time per beneficiary per pregnancy.
- MIHP parenting education may be billed one time per infant. In the case of twins or other multiple births, parenting education may be billed only once for the family.
If the MIHP provider refers the beneficiary to a local hospital to provide the classes, the hospital must bill the appropriate MHP to receive payment. If the MIHP provider contracts with an outpatient hospital or community based organization for childbirth education, the contract must indicate which provider is to bill and receive payment. If the classes are available at no charge to the public from a community-based organization, the MIHP cannot bill the Medicaid Fee-for-Service program or the beneficiary for the service.
SECTION 4 - FORMS

MIHP providers must use standardized forms developed by MDHHS. Copies of the forms are located in the Maternal Infant Health Program Operations Guide and/or on the MDHHS website. (Refer to the Directory Appendix for website information.) At a minimum, the data elements included in these forms must be maintained. If additional data elements are needed, it is suggested the agency develop a separate form to accommodate their needs, to be used in addition to the state forms. The goal is to have standardized forms statewide.
SECTION 5 - OPERATIONS AND CERTIFICATION

MDHHS certifies MIHP providers. To become an MIHP provider, the criteria in the Michigan Medicaid Provider Manual and the Maternal Infant Health Program Operations Guide must be met. Provider participation criteria includes, but is not limited to, required staffing and the capacity to provide services, including outreach, and weekend and after-hours coverage. MIHP providers must follow all policies and procedures in the Michigan Medicaid Provider Manual in addition to the Maternal Infant Health Program Operations Guide.

5.1 CRITERIA

Providers must meet the following participation criteria.

- The provider must meet program requirements to qualify for enrollment in Medicaid.
- In cases where services are provided through a contract with another agency, the contract or letter of agreement must be on file for review by MDHHS. It must specify the time period of the agreement, the names of the individuals providing services, and where the billing responsibility lies.
- The provider's physical facilities for seeing beneficiaries must be comfortable, safe, clean, and meet legal requirements.
- The provider must have experience in the delivery of services to the target population and demonstrate understanding of the concept and delivery of maternal and infant services.
- The provider must demonstrate linkages to relevant services and health care organizations in the area to be served.
- The organization must demonstrate a capacity to conduct outreach activities to the target population and to medical providers in the geographic area to be served.

5.2 STAFFING

Required staff for the MIHP is comprised of licensed registered nurses and licensed social workers. Optional staff may include a registered dietitian, infant mental health specialist, or an IBCLC. All staff must meet the qualifications as stated in the Staff Credentials subsection of this chapter.

5.3 OPERATIONS AND CERTIFICATION REQUIREMENTS

Providers must demonstrate their ability to validate the need for, and delivery of, MIHP services appropriate to each beneficiary's individual need. The MIHP must:

- Deliver services appropriate to the beneficiary's level of understanding.
- Schedule services to accommodate the beneficiary's situation.
- Complete appropriate Risk Identifier by a licensed social worker or a registered nurse.
- Develop the plan of care by a licensed social worker and a registered nurse (jointly).
- Complete the Risk Identifier based on a home visit as required for the infant and, if possible, for the pregnant woman.
- Demonstrate a system for handling beneficiary grievances.
- Provide for weekend and after-hours emergencies.
- Provide directly or arrange for bilingual services, and services for the visually impaired and/or hearing impaired, as indicated.
- Maintain all physician orders in the medical record.
- Coordinate agency and community services for the beneficiary.
- Arrange transportation services when appropriate.
- Respond to referrals promptly to identify the beneficiary's needs (within a maximum of 7 calendar days for the infant and 14 calendar days for the pregnant woman).
- Respond to referrals received prior to the infant's discharge from the inpatient setting within two business days of hospital discharge.
- Notify the medical care provider of the beneficiary's enrollment within 14 days.
- Document and report disposition of the referral (i.e., initiation of services, inability to locate, or refusal of services) to the referring source.
- Provide ongoing communication with the beneficiary's medical care provider.
- Provide, directly, the services of at least a registered nurse or licensed social worker. Infant mental health specialist and/or registered dietitian services may be provided through a subcontractor or services may be accessed in other ways.
- Not bill for services provided by community resources.
- Provide services in a clinic, an office, a home setting and/or community setting, as appropriate.
- Maintain a current list of local Public Health programs such as WIC Nutrition, Early and Periodic Screening, Diagnosis, and Treatment (EPSDT), Community Mental Health (CMH), Children's Special Health Care Services (CSHCS), and other agencies that may have appropriate services to offer the beneficiary, and agree to work cooperatively with these agencies.
- Have written protocols that comply with the reporting requirements mandated by the Michigan Child Protection Law (Act No. 238, Public Acts of 1975). Include protocols on coordination with the CPS unit of the local MDHHS office that specify how the MIHP provider will make CPS referrals, initiate follow-up contacts with CPS, and participate in local CPS multidisciplinary team meetings involving infants served by the MIHP.
- Maintain an adequate and confidential beneficiary records system, including services provided under a subcontractor. (HIPAA standards must be met.)
- Have written internal protocols to include all aspects of the program.
- Be actively linked to or a member of the Great Start Collaborative. When providing infant services, in addition to the Great Start Collaborative, providers must also be actively linked to or be a member of the local Part C/Early On Interagency Coordinating Council.
- Report all new MHP enrollees to the appropriate MHP on a monthly basis or as agreed to in the Care Coordination Agreement.
- Follow all procedures as written in the Maternal Infant Health Program Operations Guide.

5.4 ISSUANCE OF CERTIFICATION

Based upon satisfactory application, MDHHS provides a provisional MIHP certification. After an agency is provisionally certified and providing services, MDHHS conducts a provider site visit. The site visit must occur within six months of the provisional certification. The site visit is to observe how the program is being implemented and to assist in resolving any problems experienced in the implementation of the program. Based upon the site visit, MDHHS grants the agency either a six-month certification, a three-year certification, or discontinues certification. MDHHS makes a formal certification visit every three years, with informal site visits at more frequent intervals.

If at any time after receiving certification the provider becomes deficient in any of the qualifying criteria, including staffing, the provider must notify the MDHHS Division of Family & Community Health immediately. (Refer to the Directory Appendix for contact information.) MDHHS then determines whether the agency may continue providing services given the deficiency(ies). The MDHHS decision is based on the evaluation of many factors, including the number of deficiencies, the specific deficiency(ies) involved, the availability of other providers in the area, impact on caseload, etc.

If at any time the MIHP provider fails to meet the program policies or certification requirements, Medicaid reimbursement can be jeopardized. The MIHP provider is subject to audit by Medicaid and if any discrepancy(ies) is found, appropriate follow-up action may be taken, such as recoupment of payments, holding reimbursement on claims, or termination of Medicaid enrollment. If a negative action is imposed, the MIHP provider is given an opportunity for appeal.

Agencies wishing to become a MIHP provider may contact the MDHHS Division of Family & Community Health. (Refer to the Directory Appendix for contact information.)
MATERNITY OUTPATIENT MEDICAL SERVICES PROGRAM

TABLE OF CONTENTS

Section 1 – General............................................................................................................................. 1

  3.2 Submitting Pharmacy Claims ........................................................................................................ 4
  3.3 Remittance Advice ..................................................................................................................... 4
SECTION 1 – GENERAL

The Maternity Outpatient Medical Services (MOMS) program covers outpatient pregnancy-related services for the unborn child of an undocumented pregnant woman during the prenatal and postpartum period as well as inpatient delivery-related services. MOMS will also cover family planning services for the mother during the postpartum period.

1.1 ELIGIBILITY DETERMINATION

Women who are pregnant and meet the following criteria may apply for MOMS coverage:

- Income at or below 195 percent of the Federal Poverty Level.
- Covered by the Medicaid Emergency Services Only (ESO) program.

Women who are incarcerated in any institution where residents are precluded from using their Medicaid coverage are not eligible for this program.

1.2 PERIOD OF COVERAGE

The MOMS enrollment period is from the date of application, once eligibility is determined, through 60 days after the pregnancy ends. The maximum period of retroactive eligibility for MOMS is 90 days from date of application.

1.3 VERIFYING ELIGIBILITY

MOMS enrollees are given a Guarantee of Payment for Pregnancy Related Services (DCH-1164) letter. The letter is intended to assure providers that MDHHS will reimburse for pregnancy-related services provided to the beneficiary. The letter includes information on eligibility, covered services, billing instructions, etc. (A sample of the letter is included in the Forms Appendix.)

Once a woman is determined eligible for the MOMS program, a MOMS Eligibility Letter is issued. The letter contains the beneficiary's identification (ID) number.

MOMS beneficiaries are identified in the eligibility response with the Benefit Plan ID of MOMS. (Refer to the Beneficiary Eligibility chapter for additional information.)
SECTION 2 – SERVICES

2.1 COVERED SERVICES

The following services are covered consistent with current MOMS policy:

- Prenatal period services, including:
  - Prenatal care and pregnancy-related care
  - Condoms (covered in the prenatal period for sexually transmitted infection [STI] prevention)
  - Pharmaceuticals and prescription vitamins
  - Laboratory services
  - Radiology and ultrasound
  - Maternal Infant Health Program (MIHP) - for prenatal services only
  - Childbirth education
  - Outpatient hospital care

- Labor and delivery services (including all professional and inpatient hospital services) are covered.

- Postpartum care is limited to medically necessary ambulatory postpartum services.

- Family planning services, including:
  - Office visits for family planning related services, including preventive evaluation and management office visits and other outpatient visits for family planning services.
  - Contraceptives, including oral contraceptives and injectables.
  - Contraceptive supplies and devices for voluntarily preventing or delaying pregnancy.
  - Diagnostic evaluation and pharmaceuticals related to contraceptive management or the initial treatment of sexually transmitted infections.
  - Sterilizations completed in accordance with current Medicaid policy.
  - Counseling for family planning services, including sterilization, as a part of the family planning visit.

2.2 NONCOVERED SERVICES

Postpartum outpatient lactation support and counseling services provided by an IBCLC are not covered. MIHP coverage is limited to the prenatal period only.
2.3 PRIOR AUTHORIZATION

If a service does not meet the definition of the pregnancy-related services noted above or if the service normally requires prior authorization (PA) by the Medicaid program, a PA request must be submitted to MDHHS. Requests of authorization of pharmaceuticals must be made to the MDHHS Pharmacy Benefits Manager (PBM). (Refer to the Directory Appendix for contact information.)
SECTION 3 – BILLING & REIMBURSEMENT

Billing and coordination of benefits policies and procedures, as well as reimbursement rates, parallel Medicaid. (Refer to the Billing & Reimbursement and the Coordination of Benefits Chapters of this manual for additional information.)

3.1 SUBMITTING MEDICAL CLAIMS

Providers should not bill Medicaid without a valid MOMs ID number. MOMs claims should be held until the beneficiary’s MOMs ID number can be obtained from the eligibility response, the MOMs Eligibility Letter, or the beneficiary’s mihealth card. (Refer to the Beneficiary Eligibility Chapter for additional information.) The "M" or "I" number that may appear in the upper right-hand corner of the Guarantee of Payment for Pregnancy Related Services (DCH-1164) letter cannot be used to identify MOMs beneficiaries on claims submitted to MDHHS.

If a provider is unable to obtain the MOMs ID number in a reasonable period of time, a copy of the DCH-1164 may be faxed to the MDHHS Customer Services Division and a beneficiary ID number requested. (Refer to the Directory Appendix for contact information.) The name and phone number of a contact person should be included with the fax request. MDHHS then provides the beneficiary’s ID number to the requester.

Providers must use the appropriate Z30 International Classification of Diseases (ICD) diagnosis code as the primary diagnosis on claims for family planning services.

3.2 SUBMITTING PHARMACY CLAIMS

Pharmacy services provided to MOMs beneficiaries must be billed to the MDHHS Pharmacy Benefits Manager (PBM). (Refer to the Directory Appendix for contact information.) Pharmacies have the option of billing the PBM in one of two ways:

- Hold the claim until the beneficiary ID number is available in the eligibility response and then bill via the PBM’s online system; or
- Submit a claim, along with a copy of the DCH-1164, to the PBM per the instructions in the PBM manual.

Family planning supplies not furnished by the practitioner as part of the medical services must be prescribed by a Medicaid enrolled practitioner and dispensed by a pharmacy. Exceptions include condoms and similar supplies that do not require a prescription.

3.3 REMITTANCE ADVICE

MOMs claim adjudication information is included in the weekly Remittance Advice (RA), merged alphabetically with Medicaid and other MDHHS-administered programs. (Refer to the Billing & Reimbursement Chapters for additional information.)

SECTION 1 – GENERAL INFORMATION

The Michigan Department of Health and Human Services (MDHHS) contracts with Medicaid Health Plans (MHPs), selected through a competitive bid process, to provide services to Medicaid beneficiaries. The selection process is described in a Request for Proposal (RFP) released by the Office of Purchasing, Michigan Department of Technology, Management & Budget. The MHP contract, referred to in this chapter as the Contract, specifies the beneficiaries to be served, scope of the benefits, and contract provisions with which the MHP must comply. Nothing in this chapter should be construed as requiring MHPs to cover services that are not included in the Contract. A copy of the MHP contract is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

MHPs must operate consistently with all applicable published Medicaid coverage and limitation policies. (Refer to the General Information for Providers and the Beneficiary Eligibility chapters of this manual for additional information.) Although MHPs must provide the full range of covered services listed below, MHPs may also choose to provide services over and above those specified. MHPs are allowed to develop prior authorization requirements and utilization management and review criteria that differ from Medicaid requirements. The following subsections describe covered services, excluded services, and prohibited services as set forth in the Contract.

1.1 SERVICES COVERED BY MEDICAID HEALTH PLANS (MHPs) [CHANGE MADE 7/1/18]

The following services must be covered by MHPs:

- Ambulance and other emergency medical transportation
- Blood lead services for individuals under age 21
- Certified nurse-midwife services
- Certified pediatric and family nurse practitioner services
- Childbirth and parenting classes
- Chiropractic services
- Diagnostic lab, x-ray and other imaging services
- Durable medical equipment and medical supplies
- Emergency services
- End Stage Renal Disease (ESRD) services
- Family planning services
- Health education
- Hearing and speech services
- Hearing aids
- Home health services
- Hospice services (if requested by enrollee)
- Immunizations
- Inpatient and outpatient hospital services
- Intermittent or short-term restorative or rehabilitative nursing care (in or out of a facility) for up to 45 days
- Maternal Infant Health Program (MIHP)
- Medically necessary transportation for enrollees without other transportation options
- Medically necessary weight reduction services
- Mental health care (text deleted per bulletin MSA 17-27)
- Out-of-state services authorized by the MHP
- Outreach for included services, especially pregnancy-related and well-child care
- Pharmacy services
- Podiatry services
- Practitioner services (such as those provided by physicians, optometrists, or oral-maxillofacial surgeons)
- Prosthetics and orthotics
- Therapies (speech, language, physical, occupational)
- Tobacco cessation treatments, including pharmaceutical and behavior support
- Transplant services
- Transportation for medically necessary covered services
- Treatment for sexually transmitted disease (STD)
- Vision services
- Well child/EPSDT for individuals under age 21

The covered services provided to Healthy Michigan Plan enrollees under the contract include all those listed above and the following additional services:

- Additional preventive services required under the Patient Protection and Affordable Care Act as outlined by MDHHS
- Habilitative services
- Dental services
- Hearing aids for persons 21 and over

1.2 SERVICES EXCLUDED FROM MHP COVERAGE BUT COVERED BY MEDICAID [CHANGE MADE 7/1/18]

The following Medicaid services are not covered by MHPs:

- Custodial care in a licensed nursing facility; restorative or rehabilitative nursing care in a licensed nursing care facility beyond 45 days
- Certain dental services (Refer to the Dental chapter of this manual for additional information.)
MDHHS also maintains a list of specific Medicaid program-covered physician-administered drugs and biological products that are not covered by MHPs. This list of physician-administered drugs and biological products, carved out from MHP coverage, will be reimbursed as a Fee-for-Service (FFS) benefit for all beneficiaries in FFS and for those enrolled in an MHP. (Refer to the Physician-Administered Drugs and Biological Products Not Covered by Medicaid Health Plans subsection of the Practitioner chapter of this manual for additional information. Refer to the Directory Appendix for website information for the physician-administered drugs and biological products list.)

1.3 SERVICES THAT MHPS ARE PROHIBITED FROM COVERING

- Elective therapeutic abortions and related services. Abortions and related services are covered when medically necessary to save the life of the mother or if the pregnancy is a result of rape or incest;
- Experimental/Investigational drugs, procedures or equipment;
- Elective cosmetic surgery; and
- Services for treatment of infertility.
SECTION 2 - SPECIAL COVERAGE PROVISIONS

This section provides general information regarding MHP coverage requirements for certain services. Additional information regarding the MHP requirements related to these services is contained in the MHP contract. A copy of the contract is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

2.1 COMMUNICABLE DISEASE SERVICES

MHPs must allow enrollees to receive treatment services for communicable diseases from local health departments without prior authorization. For purposes of this section, communicable diseases are HIV/AIDS, STDs, tuberculosis, and vaccine-preventable communicable diseases.

2.2 EMERGENCY SERVICES

MHPs are responsible for emergency services, including the medical screening exams, consistent with the Emergency Medical Treatment and Active Labor Act (EMTALA) (41 USCS 1395 dd (a)) and the Federal Balanced Budget Act of 1997. MHPs may not require prior authorization for emergency screening and stabilization services provided to enrollees.

MHPs are not responsible for paying for non-emergency treatment services beyond screening that are not authorized by the MHP. Coverage for emergency services includes emergency transportation, hospital emergency room services, and professional services.

2.3 FAMILY PLANNING SERVICES

MHP enrollees have full freedom of choice of family planning providers, both in-plan and out-of-plan. MHPs may not require prior authorization for family planning services, including the detection and treatment of STDs. MHPs may advise out-of-network family planning providers, including public providers, to communicate with primary care providers (PCPs) once any form of medical treatment is undertaken.

2.4 FEDERALLY QUALIFIED HEALTH CENTERS (FQHCs)

MHP enrollees may access services provided through a Federally Qualified Health Center (FQHC).

FQHC providers must obtain prior authorization from the MHP. However, the MHP may not refuse to authorize medically necessary services if the MHP does not have a FQHC in the network in the county. The MHP may require FQHC providers to share information and data with the MHP and to provide appropriate referrals to providers in the MHP’s network.

2.5 MATERNAL INFANT HEALTH PROGRAM (MIHP)

Effective for dates of service on or after January 1, 2017, MIHP services provided to individuals enrolled in an MHP are administered by the MHP as outlined in the Maternal Infant Health Program Chapter of this manual. All MIHP services provided to MHP enrollees are coordinated and reimbursed by the MHPs. Only MDHHS certified providers may deliver MIHP services to MHP enrollees.
To maintain fidelity of the program and to facilitate compliance with the reporting requirements of Public Act 291 of 2012, it is the expectation that MIHP providers and MHPs will adhere to program components, including but not limited to: MDHHS program certification, the required professional qualifications of staff, and the use of MDHHS MIHP forms. MHPs must establish and maintain a Care Coordination Agreement (CCA) with MIHP providers for both in-network and out-of-network services.

Within one month of when the MHP determines a pregnant or infant enrollee is eligible for MIHP services, the MHP must refer the enrollee to an MIHP provider. MHPs are not required to refer enrollees to an MIHP provider if the enrollee is already participating in an MDHHS approved equivalent evidence-based home visiting program that provides pregnancy-related or infant support services.

MHPs work cooperatively with the local MDHHS office to maintain a referral protocol for those enrollees who need the assistance of MDHHS Children's Protective Services. MIHP providers must work with the MHP and MDHHS Children's Protective Services to ensure appropriate care for MHP enrollees. (Refer to the Maternal Infant Health Program Chapter of this manual for additional information.)

2.6 OUT-OF-NETWORK SERVICES

2.6.A. PROFESSIONAL SERVICES

With the exception of the following services, MHPs may require out-of-network providers to obtain plan authorization prior to providing services to plan enrollees:

- Emergency services (screening and stabilization);
- Family planning services;
- Immunizations;
- Communicable disease detection and treatment at local health departments;
- Child and Adolescent Health Centers and Programs (CAHCP) services;
- Tuberculosis services; and
- Certain MIHP services (refer to the Maternal Infant Health Program Chapter for additional information).

MHPs reimburse out-of-network (non-contracted) providers at the Medicaid fee-for-service (FFS) rates in effect on the date of service.

2.6.B. HOSPITAL SERVICES

MHPs reimburse hospitals according to the terms of the contract between the MHP and the hospital. If a hospital does not have a contract with an MHP but has signed a hospital access agreement with MDHHS, the following conditions apply:

- The hospital agrees to provide emergent services and elective admission services, arranged by a physician who has admitting privileges at the hospital, to Medicaid beneficiaries enrolled in MHPs with which the hospital does not have a contract.
- MHPs agree to continue to use network-contracted providers when available and appropriate.
The hospital will be entitled to payment by MHPs for all covered and authorized (if required) services provided in accordance with their obligations under the agreement.

A rapid dispute resolution process will be available for hospitals and MHPs who are unable to achieve reconciliation solutions for outstanding accounts through usual means.

MHPs reimburse out-of-network (non-contracted) hospital providers at the Medicaid fee-for-service (FFS) rates in effect on the date of service. The payment for inpatient stays includes the relevant DRG and capital costs.

Copies of the Hospital Access Agreement, Health Plan Obligations, and Rapid Dispute Resolution are available on the MDHHS website. (Refer to the Directory Appendix for website information.) Hospitals that have signed the Hospital Access Agreement and the MHPs are required to abide by the terms and conditions of the Agreement.

2.6.C. POST-STABILIZATION AUTHORIZATION DETERMINATIONS

Non-contracted hospitals are required to obtain a patient post-stabilization authorization determination from the beneficiary’s MHP prior to any treatment and after stabilization. A post-stabilization authorization determination refers to the process in which inpatient hospital admission or admission to observation status is authorized by the MHP after the beneficiary has been stabilized. (Note: This applies only to MHP beneficiaries who are not dually Medicare and Medicaid eligible. MHPs may not utilize prior authorization (PA) requirements for hospital services for dual Medicare and Medicaid eligible beneficiaries enrolled in an MHP and Medicare fee-for-service.)

Hospitals are required to make and document all post-stabilization authorization requests by telephone call to the beneficiary’s MHP prior to providing any treatment after stabilization. Hospitals must provide the MHP with all requested, necessary and current information, including the clinical status upon initial presentation, the clinical status after stabilization, and the initial treatment plan. This information must be provided in accordance with the Emergency Medical Treatment & Active Labor Act (EMTALA). The MHP is required to respond to post-stabilization requests within one hour of receipt of the telephone call and may not require hospitals to make additional phone calls if the initial phone call included all necessary and current clinical information. If the MHP does not respond within one hour, authorization for inpatient admission, payment and additional services is automatic.

Within one hour of the phone call in which the hospital provides the required clinical information noted above, the MHP must make an authorization decision which specifies the service authorized. The decision must be based on the information presented by the hospital at the time of the request rather than a list of pre-determined diagnoses that automatically authorize the patient for admission to observation status and not admission to the inpatient hospital. The MHP may not indicate that observation or admission will be authorized depending upon the clinical outcomes, and the MHP may not subsequently reverse an authorization decision based upon the clinical outcomes or length of time the patient remains in inpatient status. If the hospital and MHP are unable to reach agreement on an authorization decision at the time of the request, the hospital and the MHP must arrange a discussion between physicians in order to resolve the dispute.
The MHP contract requires MHPs to provide twenty-four (24) hour, seven (7) days-a-week availability for post-stabilization authorization requests. Hospitals may not wait until the next business day after stabilization to call for authorization. If the hospital does not call for authorization after stabilization prior to providing additional services, the MHP may review the clinical record at the time of request for authorization or payment to determine if inpatient hospital admission or admission to observation status was clinically appropriate.

2.7 MENTAL HEALTH

MHPs are required to provide behavioral health services under the Mental Health Outpatient benefit, consistent with the policies and procedures established by Medicaid. Services may be provided through contracts with Prepaid Inpatient Health Plans (PIHP) and/or Community Mental Health Services Programs (CMHSP) or through contracts with other appropriate providers within the service area. For mental health needs that do not meet Medicaid’s established criteria, MHPs must coordinate with the appropriate PIHP/CMHSP to ensure that medically necessary mental health services are provided. The Behavioral Health and Intellectual and Developmental Disability Supports and Services chapter provides coverage policies for PIHPs/CMHSPs.

2.8 CHILD AND ADOLESCENT HEALTH CENTERS AND PROGRAMS (CAHCP)

2.8.A. REQUIREMENTS

MHPs must allow enrollees to obtain services from a CAHCP without prior authorization from the MHP. In order to receive payment for covered services, CAHCPs must follow the MHP’s billing policies and procedures.

If the CAHCP is in the MHP’s provider network, the following conditions apply:

- Covered services must be administered or arranged by a designated primary care physician (PCP).
- The CAHCP must meet the MHP’s written credentialing and re-credentialing policies and procedures.
- The CAHCP must meet the MHP’s criteria for ensuring quality of care and ensuring that all providers are licensed by the State of Michigan and practice within their scope of practice as defined in Michigan’s Public Health Code.

2.8.B. OUTREACH SERVICES

MHPs contract with CAHCPs to provide outreach services to school-aged children on behalf of the respective plans. The following represent categories of outreach activities that CAHCPs must provide under the contracts:

- Medicaid outreach and public awareness
- Facilitating Medicaid eligibility determination
- Program planning, policy development, and interagency coordination related to Medicaid services
• Referral, coordination, and monitoring of Medicaid services
• Medicaid-specific training on outreach eligibility and services

2.9 SUBSTANCE ABUSE, INPATIENT AND OUTPATIENT

MHPs are not responsible for either inpatient or outpatient substance abuse services. Acute medical detoxification services for Medicaid beneficiaries are reimbursed directly by MDHHS. (Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services chapter of this manual for information on substance abuse services provided through PIHPs/CMHSPs.)

2.9.A. INPATIENT

**FFS** covers an inpatient hospitalization designed for the purpose of detoxification in an inpatient setting. The primary diagnosis on the claim must document that the hospitalization was for the sole purpose of providing an inpatient setting for detoxification. Inpatient detoxification is only allowed under Medicaid policy under limited conditions described in the Acute Inpatient Medical Detoxification subsection of the Hospital Chapter of this manual.

**MHPs** cover inpatient hospitalization if the beneficiary is hospitalized for medical complications due to substance abuse. In these cases, the primary diagnosis will reflect the medical problem for which the beneficiary was admitted; substance abuse may be a secondary diagnosis. The existence of substance abuse as a secondary diagnosis does not render the admission payable by FFS under the inpatient acute detoxification exception; the MHP is responsible for the claim.

2.9.B. EMERGENCY SERVICES

If the beneficiary is subsequently admitted to an inpatient facility, the emergency services are covered as part of the DRG payment.

If the beneficiary is not admitted, payment for screening and stabilization is covered by the MHP. Hospitals must comply with authorization requirements for services beyond screening and stabilization.

If the beneficiary is not admitted and the services provided in the emergency room (beyond screening and stabilization) are for the sole purpose of treating the substance abuse, e.g., conducting an intake interview for substance abuse treatment, the regional PIHP is responsible for those services. The PIHP is not responsible for the screening and stabilization or other medical treatment provided in the emergency room even if a beneficiary's substance abuse is the underlying cause of the medical problem.

2.9.C. CO-OCCURRING MENTAL HEALTH AND SUBSTANCE USE DISORDERS

For beneficiaries eligible for mental health services under the MHP contract, MHPs may not deny mental health treatment due to the existence of a co-occurring substance use disorder. MHPs must provide the medically necessary mental health services whether the substance abuse diagnosis is the beneficiary's primary diagnosis or a secondary diagnosis.
While MHPs are not required to provide substance abuse treatment, the MHP should direct the plan’s mental health providers to identify potential substance abuse issues. If a substance abuse issue is identified, the MHP must provide the medically necessary mental health treatment and coordinate with the appropriate Pre-Paid Inpatient Health Plan (PIHP) regarding the member’s substance abuse treatment. MHPs must provide medically necessary mental health services without consideration of the member’s decision to seek, or not seek, substance abuse services or on the success or failure of substance abuse treatment.

MHPs must educate providers regarding screening and referral for substance abuse issues. A document that lists the MHP and PIHP available in each county to facilitate coordination among the PIHP and MHP, as well as a listing of available telephone numbers, is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

2.10 TUBERCULOSIS SERVICES

MHP enrollees may obtain testing for tuberculosis from Local Health Departments (LHDs) without MHP prior authorization. Treatment may also be provided by the LHD without prior MHP authorization and regardless of whether a contractual or coordinating relationship exists between the MHP and the LHD. In the absence of a contract or other coordinating agreement, MHPs will reimburse the LHD at Medicaid fee-for-service (FFS) rates in effect on the date of service.

2.11 HOSPITAL 15-DAY READMISSIONS

MDHHS developed a set of readmission guidelines for hospitals and Medicaid Health Plans to utilize in determining whether a 15-day readmission should be treated as a separate admission or a combined admission for payment purposes. The guidelines and suggested discharge documentation elements provide clarification of the policy specified in this manual. The guidelines do not replace or revise the 15-day readmission policy detailed in the Hospital Chapter.

Accurate and complete documentation and discharge planning is vital to successfully implementing the readmission grid which enables the hospital and MHP to agree on whether a readmission should be separate or combined for payment purposes. The guidelines are available on the MDHHS website. (Refer to the Directory Appendix for website information.)

Hospitals and MHPs are encouraged to work together to develop discharge documentation and planning processes that are mutually agreeable. If a hospital system utilizes discharge documentation and planning processes that provide all necessary information, MHPs should not require the hospital system to replace the existing processes with a specific documentation template developed by the MHP.

Alternatively, if a hospital system’s discharge documentation and planning processes do not provide all necessary information, the hospital system should revise their existing documentation processes to include the necessary information. If the hospital system does not have a discharge documentation and planning process, the MHP and hospital should work together to develop mutually agreeable documentation processes.
SECTION 3 – CLAIMS, COPAYMENTS AND REIMBURSEMENT

MHP claim completion requirements must be consistent with MDHHS claim completion requirements as detailed in the Billing and Reimbursement chapters of this manual.

3.1 BLOOD LEAD TESTING

MHPs are encouraged to establish contractual or other coordinating relationships with local health departments (LHDs) that provide blood lead testing services. LHDs must conduct blood lead testing consistent with Medicaid policy. Similarly, MHPs must reimburse LHDs for blood lead testing as directed by Medicaid policy.

3.2 COPAYMENTS

Beneficiaries enrolled in an MHP may have different copayment requirements through the MHP than through FFS. The MHP copayment amount must be less than or equal to the Medicaid FFS copayment amount for the same service. Beneficiaries excluded from Medicaid FFS copayments are also excluded from MHP copayment requirements. A list of current copayments is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

3.3 PAYMENT RESPONSIBILITY WHEN ENROLLMENT STATUS CHANGES

MHPs should refer providers to the Billing and Reimbursement chapters of this manual for clarification of payment responsibility if a Medicaid or CSHCS beneficiary changes enrollment status during a course of treatment.

3.4 REIMBURSEMENT FOR NONCONTRACTED PROVIDERS

Reimbursement for providers who are contracted with the MHP is governed by the terms of the contract. MHPs are required to pay noncontracted providers at Medicaid FFS rates for all properly authorized, medically necessary services for which a clean claim is submitted. Noncontracted providers must comply with all applicable authorization requirements of the MHP and uniform billing requirements.
 SECTION 4 - MEDICAID HEALTH PLAN RATES

4.1 GENERAL INFORMATION

Federal regulations (42 CFR 438.6) require rates paid by the State of Michigan to MHPs to be actuarially sound. The State of Michigan contracts with a certified actuary to develop actuarially sound rates for the MHPs. Rates are not included in the MHPs competitive bid process and, therefore, the MHPs are not required to certify rates as actuarially sound. Under this methodology, the State's Actuary establishes a rate range for each rate cell covered under the Comprehensive Health Care Program. As mandated by the federal requirement, the State's Actuary certifies these rates are actuarially sound. There is no federal requirement that rates be actuarially sound for a particular MHP.

Actuarially sound rates for MHPs are capitation rates that meet the following requirements:

- Developed in accordance with generally accepted actuarial principles and practices.
- Appropriate for the populations included and services covered under the State's contract with the MHPs.
- Certified as meeting all requirements for actuarial soundness by actuaries who meet the qualification standards established by the American Academy of Actuaries and who follow the practice standards established by the Actuarial Standards Board.

4.2 RATE CATEGORIES

In order to establish actuarially sound rates, MDHHS establishes separate rate cells based on the following classifications:

- Aid program category
- Age
- Gender
- Region
- Maternity case rate

For enrollees in the Blind and Disabled program category, Michigan utilizes the Chronic Illness and Disability Payment System (CDPS) to adjust the MHP capitation rates. Under CDPS, diagnosis coding (as reported on claim and encounter transactions) is used to compute a score for each individual. Individuals with inadequate eligibility history are excluded from these calculations. For qualifying individuals, these scores are aggregated into an average case-mix value for each contractor based on its enrolled population. The regional rate for the Blind and Disabled program category is multiplied by the average case mix value to produce a unique case mix adjusted rate for each MHP. The aggregate impact is budget or rate neutral. MDHHS fully re-bases the risk adjustment system annually.
4.3 DATA METHODOLOGY

MDHHS has a generally consistent approach to the rate development and certification methodology. The approach incorporates the factors recommended by the American Academy of Actuaries, including the following criteria:

- Base utilization and cost data are derived from the population covered under the MHP contract to the extent that adequate accurate information on this population is available to the State's Actuary at the time of rate development and certification.
- Base utilization and cost data are derived from the population comparable to the population covered under the MHP contract.
- Base utilization and cost data are derived from the set of covered services under the MHP contract.
- Adjustments may be made to smooth data and account for factors such as incomplete data.
- Assumptions may be made related to medical trend inflation, MHP administration, and projected utilization.
- Rate cells are specific to the enrolled population.
- Assumptions may be made related to payment mechanism, utilization, and cost appropriate for individuals with chronic illness, disability, risk adjustment or other appropriate cost-neutral methods.
- Assumptions are based on the State Actuary's professional judgment regarding the appropriateness of adjustments to the base year data.

4.4 DATA SOURCES

The annual rate development methodology for the establishment of actuarially sound rates utilizes some or all of the following data sources:

- Fee for service (FFS) data for individuals eligible for Medicaid.
- FFS data for the 12 months preceding the individual's enrollment into the MHP.
- Aggregate MHP financial and/or encounter data.
- MHP annual financial filings reported to the Department of Insurance and Financial Services (DIFS) up to 36 months preceding the date that the proposed rates were established by MDHHS.
- Other data available to MDHHS that is for the covered population and which is identified in the report produced by MDHHS.

MDHHS utilizes the data source deemed most appropriate by the State's Actuary dependent upon data availability and data accuracy.
4.5 **PUBLIC REVIEW OF DATA METHODOLOGY**

MDHHS shall produce for public review a report that includes the proposed MHP rates, documentation of the rate development, and actuarial certification prior to formal submission to the federal government. As recommended by the American Academy of Actuaries, the report shall include a description of the relevant data, sources of data, material assumptions, and methodology by which the rates were developed.

SECTION 1 – PROGRAM OVERVIEW

This chapter applies to Medical Suppliers/Durable Medical Equipment and Orthotists/Prosthetists.

Providers of Durable Medical Equipment, Prosthetics, Orthotics and Supplies (DMEPOS) must be enrolled as a Medicare provider effective September 30, 2009. (Refer to the General Information for Providers chapter for additional information.)

The primary objective of the Medicaid Program is to ensure that medically necessary services are made available to those who would not otherwise have the financial resources to purchase them.

The primary objective of the Children's Special Health Care Services (CSHCS) Program is to ensure that CSHCS beneficiaries receive medically necessary services that relate to the CSHCS qualifying diagnosis.

This chapter describes policy coverage for the Medicaid Fee-for-Service (FFS) population and the CSHCS population. Throughout the chapter, use of the terms Medicaid and Michigan Department of Health and Human Services (MDHHS) includes both the Medicaid and CSHCS Programs unless otherwise noted.

Medicaid covers the least costly alternative that meets the beneficiary's medical need for medical supplies, durable medical equipment or orthotics/prosthetics.

Below are common terms used throughout this chapter:

| Medical Supplies | Medical supplies are those items that are required for medical management of the beneficiary, are disposable or have a limited life expectancy, and can be used in the beneficiary's home. Examples are: hypodermic syringes/needles, ostomy supplies, and dressings necessary for the medical management of the beneficiary. Medical supplies are items covered that:
|                  | ▪ Treat a medical condition.
|                  | ▪ Prevent unnecessary hospitalization or institutionalization.
|                  | ▪ Support Durable Medical Equipment (DME) used by the beneficiary in the home. |
| Durable Medical Equipment (DME) | DME are those items that are registered with the Food and Drug Administration (FDA), can stand repeated use, are primarily and customarily used to serve a medical purpose, are not useful to a person in the absence of illness or injury, and can be used in the beneficiary's home. Examples are: hospital beds, wheelchairs, and ventilators. DME is a benefit for beneficiaries when:
|                  | ▪ It is medically and functionally necessary to meet the needs of the beneficiary.
|                  | ▪ It may prevent frequent hospitalization or institutionalization.
|                  | ▪ It is life sustaining. |
| Mobility Related Activities of Daily Living (MRADL) | Daily activities (e.g., grooming, dressing, toileting, etc.) the beneficiary is able to perform with the aid of mobility equipment. |
Orthotics

Orthotics assist in correcting or strengthening a congenital or acquired physical anomaly or malfunctioning portion of the body. Orthotics are a benefit to:

- Improve and/or restore the beneficiary's functional level.
- Prevent or reduce contractures.
- Facilitate healing or prevent further injury.

Prosthetics

Prosthetics artificially replace a portion of the body to prevent or correct a physical anomaly or malfunctioning portion of the body. Prosthetics are a benefit to:

- Improve and/or restore the beneficiary's functional level.
- Enable a beneficiary to ambulate or transfer.

1.1 PROVIDER TYPES

Services provided must be appropriate for the specified provider types according to the CHAMPS Provider Enrollment (PE) on-line application. The provider types and the services they may provide are as follows:

| Orthotist and Prosthetist | Prefabricated, custom-fitted and custom-fabricated orthoses and prostheses
|                          | Medical supplies related to orthotics and prosthetics (e.g., stump socks, etc.)
|                          | Shoes
| Medical Supplier         | Durable medical equipment (including oxygen)
|                          | Medical supplies
|                          | Prefabricated and specific custom-fitted orthoses (custom-fitting may only include simple or minor intervention)
|                          | Shoes
| Shoe Store               | Shoes, selected shoe inserts and additions

1.2 MDHHS MEDICAL SUPPLIER/ DME/ PROSTHETICS AND ORTHOTICS DATABASE

For specifics regarding the Healthcare Common Procedure Coding System (HCPCS) codes used to denote covered services, refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter or the Medicaid Code and Rate Reference tool for more information. (Refer to the Directory Appendix for website information.) Information includes the HCPCS codes, short description, designated modifiers, quantity limits, prior authorization (PA) indicator, fee screens, ICD diagnosis codes, and whether the item may be billed by a medical supplier if the beneficiary resides in a nursing facility. If there is no established procedure code that adequately describes the item, use the appropriate Not Otherwise Classified (NOC) HCPCS procedure code.

1.2.A. HEALTHCARE COMMON PROCEDURE CODING SYSTEM (HCPCS) CODES

The Health Insurance Portability and Accountability Act of 1996 (HIPAA) requirement, as defined by the Code of Federal Regulations (CFR) under 45 CFR 162.10002 for standardized coding systems, established HCPCS level II codes as the standardized coding system for describing and identifying health care equipment and supplies in...
health care transactions that are not identified by HCPCS level I or Current Procedural Terminology (CPT) codes.

HCPCS is a system for identifying items and services. It is not a system for making coverage or payment determinations, and the existence of a code does not determine coverage or non-coverage of an item or service. Decisions regarding the addition, deletion, or revision of HCPCS codes are made independent of the process for determination of coverage and payment.

National permanent codes are maintained by the Centers for Medicare & Medicaid Services (CMS) HCPCS Workgroup. The Workgroup is responsible for making decisions about additions, revisions, and deletions to the permanent national alpha-numeric codes. The permanent national codes serve the function of providing a standardized coding system that is managed jointly by private and public insurers.

National codes also include miscellaneous/not otherwise classified (NOC) codes. These codes are used when a medical supplier submits a bill or request for an item or service where there is no existing national code that adequately describes the item or service. Before using a miscellaneous/NOC code, the medical supplier should check with the Medicare Pricing, Data Analysis and Coding (PDAC) contractor to determine whether there is a specific code that should be used. (Refer to the Directory Appendix for contact and website information.)

When submitting a bill or request, medical suppliers are required to use HCPCS codes to identify items. The descriptor assigned to a code represents the definition of the item/service that can be billed using that code. MDHHS reserves the right to determine and apply correct HCPCS codes used for the purpose of reimbursement.

1.3 PLACE OF SERVICE [CHANGE MADE 7/1/18]

Medicaid covers medical supplies, durable medical equipment (DME), orthotics, and prosthetics for use in the beneficiary's place of residence except for skilled nursing or nursing facilities.

For residents in a skilled nursing or nursing facility, most medical supplies and/or DME are considered as part of the facility's per diem rate. Wheelchair requests for the primary purpose of meeting resident nursing care needs that are the responsibility of the nursing facility are not covered. Wheelchairs for social or recreational purposes are the responsibility of the nursing facility. The Nursing Facility Chapter further describes coverage policy in the nursing facility. The following items are exempt from the per diem rate and must be billed by the medical supplier:

- Air-fluidized beds
- Bariatric beds
- Custom-fabricated seating systems may be covered outside of the nursing facility per diem rate when a standard item will not meet the medical and functional needs of the user and standards of coverage are met.
- Gaseous oxygen and equipment if required by the beneficiary for frequent or prolonged use (eight or more hours of use on a daily basis)
- Orthotics and Prosthetics
- Parenteral nutrition, including all supplies, equipment, and solutions
- Powered air flotation bed (low air loss therapy)
- Selected surgical dressings
- Shoes and Additional Components

To determine the acceptable place of service (POS) codes allowed for billing purposes, refer to the Billing & Reimbursement for Professionals Chapter of this manual.

In an outpatient facility, all equipment and services required for treatment during an emergency room or clinic visit are included in the reimbursement to the hospital (e.g., cervical collar, air cast).

In an inpatient hospital setting, services provided as part of the hospital care and treatment would be part of the DRG payment to the hospital (e.g., cervical collar or cast). Services provided to be used after discharge and delivered to the hospital to facilitate discharge may be reimbursed to the medical supplier (e.g., oxygen, walker, wheelchair).

MDHHS does not separately reimburse DMEPOS providers for services related to the beneficiary’s terminal illness when the beneficiary is enrolled in a hospice program. All DMEPOS services related to the beneficiary’s terminal illness are either arranged for (via contract agreement) and reimbursed by, or provided by, the hospice program. Refer to the Hospice chapter for additional information about hospice services.  *(text added 7/1/18)*

### 1.4 AGE FACTORS  *(TITLE REVISED AND CHANGE MADE 7/1/18)*

Coverage of durable medical equipment, prosthetics, orthotics and supplies (DMEPOS) may differ based on the beneficiary's age. When age factors exist, the DMEPOS provider can submit a prior authorization request for consideration of coverage beyond the policy standards of coverage. For specifics of HCPCS codes and age parameters, refer to the Coverage Conditions and Requirements section and the Healthcare Common Procedure Coding System (HCPCS) Codes subsection of this chapter and to the Medicaid Code and Rate Reference tool. *(revised per bulletin MSA 18-03)* *(Refer to the Directory Appendix for website information.)*

### 1.5 MEDICAL NECESSITY *(CHANGES MADE 7/1/18)*

Medicaid covers medically necessary durable medical equipment, prosthetics, orthotics and supplies (DMEPOS) for beneficiaries of all ages. DMEPOS are covered if they are the least costly alternative that meets the beneficiary’s medical/functional need and meet the Standards of Coverage stated in the Coverage Conditions and Requirements Section of this chapter.

The medical record must contain sufficient documentation of the beneficiary's medical condition to substantiate the necessity for the type and quantity of items ordered and for the frequency of use or replacement. The information should include the beneficiary's diagnosis, medical condition, and other pertinent information including, but not limited to, duration of the condition, clinical course, prognosis, nature and extent of functional limitations, other therapeutic interventions and results, and past experience with related items. Neither a physician, nurse practitioner (NP) or physician assistant (PA) order nor a certificate of medical necessity by itself provides sufficient documentation of medical necessity, even though it is signed by the treating/ordering physician, NP or PA. Information in the
Medical equipment may be determined to be medically necessary when all of the following apply:

- The service/device meets applicable federal and state laws, rules, regulations, and MDHHS promulgated policies.
- It is medically appropriate and necessary to treat a specific medical diagnosis, medical condition, or functional need, and is an integral part of the nursing facility daily plan of care or is required for the community residential setting.
- The safety and effectiveness of the product for age-appropriate treatment has been substantiated by current evidence-based national, state and peer-review medical guidelines. (added per bulletin MSA 18-03)
- The function of the service/device:
  - meets accepted medical standards, practices and guidelines related to:
    - type,
    - frequency, and
    - duration of treatment; and
  - is within scope of current medical practice. (revised per bulletin MSA 18-03)
- It is inappropriate to use a nonmedical item.
- It is the most cost effective treatment available.
- The service/device is ordered by the treating physician, NP or PA (for CSHCS beneficiaries, the order must be from the pediatric subspecialist) and clinical documentation from the medical record supports the medical necessity for the request (as described above) and substantiates the practitioner's order.
- The service/device meets the standards of coverage published by MDHHS.
- It meets the definition of Durable Medical Equipment (DME) as defined in the Program Overview section of this chapter.
- Its use meets FDA and manufacturer indications.

MDHHS does not cover the service when Medicare determines that the service is not medically necessary.

Medicaid will not authorize coverage of items because the item(s) is the most recent advancement in technology when the beneficiary's current equipment can meet the beneficiary's basic medical/functional needs.

Medicaid does not cover equipment and supplies that are considered investigational, experimental or have unproven medical indications for treatment. (added per bulletin MSA 18-03)

Refer to the Prior Authorization subsection of this chapter for medical need of an item beyond the MDHHS Standards of Coverage.
NOTE: Federal EPSDT regulations require coverage of medically necessary treatment for children under 21 years of age, including medically necessary habilitative services. Refer to the Early and Periodic Screening, Diagnosis and Treatment Chapter for additional information.

The Healthy Michigan Plan (HMP) covers habilitative services for all ages. Refer to the Healthy Michigan Plan Chapter for additional information.

1.5.A. PRESCRIPTION REQUIREMENTS

A prescription must contain all of the following:

- Beneficiary's name;
- Beneficiary's date of birth (DOB);
- Beneficiary ID number or Social Security Number (SSN) (if known);
- Prescribing physician's, NP's or PA's name, address, and telephone number;
- Prescribing physician's, NP's or PA's signature (a stamped or co-signature will not be accepted);
- The date the prescription was written;
- The specific item prescribed;
- The amount and length of time that the service is needed; and
- Start date of order if different from the physician's, NP's or PA's signature date.

The prescription must meet the following timeframes:

- For medical supplies, refills may be allowed up to one year from the original physician's signature date on the prescription.
- For oxygen, ventilators, and other long-term use, up to one year from the original physician signature date.
- For purchase of DME, the original physician signature date must be within the last 180 days.
- For orthotics and prosthetics, the original physician signature date for an initial service must be within the last 60 days. For replacement of an orthosis or prosthesis, the physician signature date must be within the last 180 days.

A new prescription will be required when there is a change in the beneficiary's condition causing a change in the item or the frequency of its use.

The provider may complete a detailed description of the item with applicable HCPCS procedure codes, but the treating physician must review this description and personally sign and date the order to indicate agreement. The provider may not change or modify a prescription, certificate of medical necessity (CMN), or any other physician or healthcare practitioner's signed documentation.
For beneficiaries eligible for CSHCS coverage only, the following additional requirements apply:

- The prescription must be related to the CSHCS qualifying diagnosis. (Providers must verify this information by referring to the beneficiary's eligibility letter received from CSHCS.)
- A physician subspecialist must sign the prescription if it is stated as required by the CSHCS Program in the Coverage Conditions and Requirements Section of this chapter.

**MDHHS reserves the right to request additional documentation from a specialist for any beneficiary and related service on a case-by-case basis if necessary to determine coverage of the service.**

1.5.B. AUTOMATIC REFILLS

Automatically issuing refills of medical supplies to beneficiaries results in unnecessary expenditures and/or unused products.

The standard physician order for medical supplies is written for monthly refills. The beneficiary or his/her representative must verify that the refill is necessary and confirm any changes/modifications at the time the monthly refill is ordered.

Automatic refills of medical supplies without receiving prior customer approval or a request for a refill is considered program abuse. Subsequent refills should not be confirmed or issued any earlier than five to seven days prior to the end of the last monthly order.

For audit purposes, provider records should document this contact for products shipped to the beneficiary's home.

1.5.C. DOCUMENTATION

The Coverage Conditions and Requirements Section of this chapter specifies the documentation requirements for individual service areas. Additional information other than what is required on the prescription may be required. To provide this information, Medicaid accepts a certificate of medical necessity (CMNs will be mandatory for electronic PA), a letter or a copy of applicable medical record. The prescribing physician must sign all documentation and the documentation (if a letter or applicable medical records) must state the beneficiary's name, DOB and ID number (if known) or SSN (if known).
1.5.D. Certificate of Medical Necessity Requirements

A CMN must contain all of the following:

- Beneficiary's name and address;
- Beneficiary's date of birth (DOB);
- Beneficiary ID number (if initiated by the provider) or SSN;
- Prescribing physician's signature, date of signature, telephone number;
- The suppliers' name and address;
- The expected start date of the service (if different from the prescription date);
- A complete description of the item;
- The amount and length of time the item is needed;
- Beneficiary's diagnosis; and
- The medical necessity of the item.

For specifics, refer to the Coverage Conditions and Requirements Section of this chapter.

MDHHS will accept a CMN initiated by a medical supplier, orthotist or prosthetist. However, only the beneficiary identifier fields and the areas detailing the description of the item with applicable HCPCS procedure codes are to be completed by the provider. The physician must complete the CMN by writing the medical reason or necessity for the specific item being requested. A medical supplier, orthotist, or prosthetist may not alter or write the medical reason or necessity for the item requested.

Additional documentation (including the CMN) must be current and within the timeframe stated in the Coverage Conditions and Requirements Section of this chapter, under Documentation for each item.

1.6 Documentation in Beneﬁciary File

The medical supplier must maintain clean, reproducible copies of all required documentation for the specific medical device, including the physician's order, the MSA-1656 (and Addendum A and/or Addendum B, as applicable), the MSA-1653-B, and the MSA-1653-D in the beneficiary's file for seven years. For audit purposes, the supplier's records or beneficiary's medical record must contain the prescription and required documentation that substantiates the medical necessity of the item supplied. In addition to the prescription and any applicable documentation required, the provider must maintain on file:

- Equipment use logs or other provider required documentation as stated in the Coverage Conditions and Requirements Section of this chapter under Documentation for the item.
- For items purchased, proof of purchase (e.g., delivery slips, sales slips, vouchers).
- For items rented, set-up slips and pick-up slips with signature of beneficiary or legal representative, and maintenance records.
For items shipped directly to the beneficiary, the date of delivery must be maintained in the records with delivery slip. It is the provider's responsibility to replace a service for which the beneficiary was not received without additional cost to MDHHS or the beneficiary.

Proof of education and instruction to beneficiary and/or caregiver regarding the proper usage of equipment and/or supplies when applicable (e.g., delivery slip signed by beneficiary).

### 1.7 PRIOR AUTHORIZATION [CHANGE MADE 7/1/18]

Prior authorization (PA) is required for certain items before the item is provided to the beneficiary or, in the case of custom-fabricated DME or prosthetic/orthotic appliances, before the item is ordered. To determine if a specific service requires PA, refer to the Coverage Conditions and Requirements Section of this chapter and the Medicaid Code and Rate Reference tool. (Refer to the Directory Appendix for website information.)

PA will be required in the following situations:

- Services that exceed quantity/frequency limits or established fee screens.
- Medical need for an item beyond the MDHHS Standards of Coverage.
- Use of a Not Otherwise Classified (NOC) code.
- More costly service for which a less costly alternative may exist.
- Procedures indicating PA is required as noted in the Medicaid Code and Rate Reference tool.

Prior authorization coverage determinations are based on the evaluation of the documentation received and all of the following:

- The beneficiary's benefit plan scope and coverages (e.g., Emergency Services Only);
- Food and Drug Administration (FDA) and manufacturer product intended usage(s);
- Healthcare Common Procedure Coding System (HCPCS) Level II code definitions as deemed by the American Medical Association; and
- The safety and effectiveness of the product for age-appropriate treatment as substantiated by current evidence-based national, state and peer-review medical guidelines.

MDHHS reserves the right to a final determination of whether the practitioner's submitted medical documentation sufficiently demonstrates the medical necessity for the services requested.

Beneficiaries may request a fair hearing in accordance with 42 CFR Part 431 Subpart E for any MDHHS coverage denials. (Refer to the General Information for Providers chapter for additional information.) *(added per bulletin MSDA 18-03)*
1.7.A. PRIOR AUTHORIZATION FORM

Requests for PA must be submitted on the Special Services Prior Approval-Request/Authorization form (MSA-1653-B) or, for mobility and custom seating items, submit the Complex Seating and Mobility Device Prior Approval-Request/Authorization form (MSA-1653-D). (Refer to the Forms Appendix for a copy of the PA form and completion instructions.) In addition, the medical documentation specific to each type of device requested must accompany the form. The information on the PA request form must be:

- Typed – All information must be clearly typed in the designated boxes of the form.
- Complete – The provider must use the specific HCPCS code and the code description. A NOC code may not be used unless the use of a NOC code for the item has been approved by the PDAC. The brand, model, product or part number must be stated on MSA-1653-B or MSA-1653-D with the appropriate HCPCS code and description. The prescription and medical documentation must be submitted with the request. (Refer to the Coverage Conditions and Requirements section of this chapter for additional information regarding standards of coverage and payment rule requirements.)

PA request forms and attached documentation may be mailed or faxed to the MDHHS Program Review Division. (Refer to Directory Appendix for contact information.)

Instructions for the electronic submission of PA requests and the HIPAA 278 transaction code set are available on the MDHHS website. (Refer to the Directory Appendix for website information.)

1.7.B. EVALUATION AND MEDICAL JUSTIFICATION FOR COMPLEX SEATING SYSTEMS AND MOBILITY DEVICES FORM

The Evaluation and Medical Justification for Complex Seating Systems and Mobility Devices form (MSA-1656) provides a standard assessment tool for a licensed medical professional to use when performing assessments for wheelchairs, seating systems, and pediatric standing systems. The form is required for all ages and covered settings. (Refer to the Forms Appendix for a copy of the form and form completion instructions.)

The MSA-1656 serves as a baseline evaluation for the beneficiary and is a clinical assessment that also includes an assessment of current technology options available to meet the beneficiary's medical and functional goals. The evaluation process assists the evaluator in determining the most appropriate level of equipment that will aid the beneficiary in completing mobility related activities of daily living (MRADL). Once problems and goals are determined, the process includes a patient simulation trial using comparable loaner or demonstration technology. The patient simulation is performed jointly by the clinician and a qualified assistive technology practitioner.

The initial MSA-1656 is retained on file by MDHHS. A new MSA-1656 is not required for additions or revisions to a seating system or mobility item unless there is a change in the beneficiary's functional status.
Addendum A: Mobility/Seating – This form must be completed and submitted with MSA-1656 and MSA-1653-D when requesting complex seating, a manual wheelchair with accessory add-ons, power wheelchairs, scooters, and power accessories. The evaluator must complete only the sections that apply to the requested equipment and accessories.

Addendum B: Strollers, Gait Trainers, Standers, Car Seats, and Children’s Positioning Chairs – This form must be completed and submitted with MSA-1656 and MSA-1653-D when requesting these items. The evaluator must complete only the sections that apply to the requested equipment and accessories.

Form completion instructions describe the responsibilities of the treating physician, the physical and occupational therapist, the medical supplier, and the nursing facility staff (when appropriate).

The MSA-1656 must be submitted within 90 days of the date the evaluation was completed. Completion/submission of the MSA-1656 without supporting documentation from the medical record is not acceptable. The use of medical supplier-created mobility forms or “canned” documentation statements are not acceptable and may not be used as a substitute for information from the medical record or for completion of required MDHHS forms.

The outpatient therapy provider or the nursing facility may bill for the mobility and seating assessment performed by the licensed medical professional using HCPCS code 97542.

1.7.C. EMERGENCY PRIOR AUTHORIZATION

A provider may contact MDHHS to obtain a verbal PA when the prescribing physician has indicated that it is medically necessary to provide the service within a 24-hour time period.

To obtain a verbal PA, the provider may call the Program Review Division or fax a request. (Refer to the Directory Appendix for contact information. Refer to the Forms Appendix for copies of forms MSA-1653-B and MSA-1653-D and completion instructions.)

If an emergency service is required during nonworking hours (i.e., after 4:00 p.m., weekends, and State of Michigan holidays), the provider must contact the Program Review Division on the next available working day.

The following steps must still be completed before an actual PA number is issued for billing purposes:

- Submission of the PA request to MDHHS within 30 days of the verbal authorization. (Refer to the Forms Appendix for copies of forms MSA-1653-B and MSA-1653-D and completion instructions.)
- Submission of the supporting documentation (e.g., prescription and CMN, physician letter, or applicable medical record).
The PA number will not be given for billing MDHHS and the provider will not be reimbursed if:

- The beneficiary was not eligible when the service was provided.
- A completed PA request (MSA-1653-B) is not received within 30 days of the verbal authorization.
- Required prescription and documentation is not received.
- The prescription and/or documentation are not signed within 30 days of the effective date.
- The prescription and/or documentation are not received within 30 days of the date of service (DOS).
- The medical need for the service is different than what was verbally given and does not fall within the Standards of Coverage.

**Verbal authorization does not guarantee payment or eligibility.**

### 1.7.D. RETROACTIVE PRIOR AUTHORIZATION

Services provided before PA is requested will not be covered unless the beneficiary was not eligible on the DOS and the eligibility was made retroactive. If the MDHHS record does not show that retroactive eligibility was provided, then the request for retroactive PA will be denied.

### 1.7.E. BENEFICIARY ELIGIBILITY

Approval of a service on MSA-1653-B or MSA-1653-D confirms that the service is authorized for the beneficiary. The approval does not guarantee that the beneficiary is eligible for Medicaid. If the beneficiary is not eligible on the DOS or is enrolled in a Medicaid Health Plan (MHP) and the provider orders or delivers the service, MDHHS will not reimburse the provider. To assure payment, the provider must verify eligibility prior to ordering or delivering the service. (Refer to the Beneficiary Eligibility Chapter of this manual for additional information.)

When equipment is prior authorized (if required) and ordered but not delivered before the loss of eligibility, MDHHS will pay for the service if the product is delivered within 30 days after the loss of eligibility.
1.7.F. CHANGES IN ENROLLMENT (FFS/MHP)

When beneficiaries change enrollment status (e.g., from managed care to FFS or FFS to managed care), the following applies:

- When custom-fabricated equipment (prosthetic or orthotic) is ordered for a beneficiary during a hospital stay but not delivered until discharge and enrollment changes, the payment must be made by the party responsible for the hospital stay.
- When a custom-fabricated, -fit, or -modified service is prior authorized and ordered by the provider before a change of enrollment, the party that authorized the service is responsible for payment. This responsibility only applies if the service is delivered within 30 days of the change of eligibility.

This policy does not apply to prefabricated, mass-produced, or ready-made items that can be used by a person other than for whom it is ordered. It also excludes rental items, all expendable/disposable medical supplies, or any item that does not require a length of time (days or weeks) to special order for a specific person.

(Subsection 1.7.G. Age Parameters was deleted per bulletin MSA 18-03.)

1.7.G. REIMBURSEMENT AMOUNTS [RE-NUMBERED 7/1/18]

Most items have established fee screens that are published in the MDHHS Medical Supplier/DME/Prosthetics and Orthotics Fee Schedule. The approved reimbursement amount of the fees for NOC codes and all codes without established fee screens will be indicated on the authorized PA request. For items that do not have established fee screens or are custom fabricated, refer to the Medicaid Code and Rate Reference tool for payment rules. (Refer to the Directory Appendix for website information.) The provider must provide a manufacturer’s invoice that states the acquisition cost for the service on the PA request form. Manufacturer quotes or dealer list prices are not accepted as documentation of cost. Modified manufacturer invoices will not be accepted. If the manufacturer’s actual invoice is not included, medical review will assign a penny screen to the code until the actual invoice is received. If the provider is requesting reimbursement for labor, the specific time must be stated on the request form. MDHHS reserves the right to set a dollar limit on how much MDHHS will reimburse for a NOC code or any manually priced procedure code for a specific range of products.

Medicaid payment rates may not exceed those paid by Medicare. MDHHS will adjust its Medicaid fee schedule when Medicare rate changes result in noncompliance with this requirement. The changes will be reflected on the MDHHS Medical Supplier/DME/Prosthetics and Orthotics Fee Schedule and in the Medicaid Code and Rate Reference tool. No notice will be issued directly to providers.
1.7.H. BILLING AUTHORIZED SERVICES [RE-NUMBERED 7/1/18]

After an authorization is issued, the information (e.g., PA number, procedure code, modifier, and quantity) that was approved on the authorization must match the information on the invoice. (Refer to the Billing & Reimbursement for Professionals Chapter of this manual for complete billing instructions.)

1.7.I. HOSPITAL DISCHARGE WAIVER SERVICES [RE-NUMBERED 7/1/18]

Hospital Discharge Waiver Services are DME items rented for the beneficiary in which the PA requirement is waived for up to the first three months after hospital discharge. If the beneficiary still requires these items after three months from hospital discharge, the PA requirement would still apply.

These items are as follows: HCPCS codes E0163, E0165, E0181, E0255, E0256, E0260, E0292, E0293, E0565, E0619, E0910, and E0940

1.8 DURABLE MEDICAL EQUIPMENT

1.8.A. STANDARD EQUIPMENT AND CUSTOM-FABRICATED SEATING

Standard equipment and custom-fabricated seating must be medically necessary and meet the medical and/or functional needs of the beneficiary.

- Standard equipment and accessories are products ordered from manufacturer stock. Measuring and custom-fitting a medical device to a beneficiary or custom-assembling a medical device to fit a beneficiary's needs using manufactured stock pieces is not considered to be custom-fabricated.

- Custom-fabricated seating is made from clinically derived, rectified castings, tracings, and other images (such as x-rays) of the beneficiary's body part.

It also includes computer-aided design/computer-aided manufacturing (CAD/CAM) technology used for the seating system. Computer-aided design/manufacturing must be performed by an experienced clinician along with a Certified Rehabilitation Technology Supplier (CRTS) or Assistive Technology Professional (ATP) who has completed the training course offered by the manufacturer. The outcome should be created jointly by the clinician and the CRTS/ATP. The cost for performing these activities is included in the Medicaid payment rate for the custom-fabricated seating system.

MDHHS will only consider coverage of custom-fabricated seating when a standard item will not meet the medical or functional needs of the beneficiary. All custom-fabricated equipment requires prior authorization. Once the custom-fabricated equipment is purchased, it becomes the property of the beneficiary. To be covered as custom-fabricated, the item must meet the MDHHS definition of custom-fabricated. A manufacturer's use of the term custom-fabricated for an item that does not meet the MDHHS definition will not be reimbursed as custom-fabricated. MDHHS reserves the right to determine and apply HCPCS codes used for the purpose of reimbursement.
1.8.B. PAYMENT RULES: RENTAL AND/ OR PURCHASE

Generally, equipment will be purchased when a beneficiary requires the equipment for an extended period of time. For prior authorized services, the PA consultant may change the authorization request from a rental to a purchase or a purchase to a rental based on the documentation submitted. If DME items are purchased, the provider must indicate whether the DME item provided is new or used, as appropriate. The provider should refer to the Payment Rules described in the Coverage Conditions and Requirements Section of this chapter for MDHHS policy on specific services.

<table>
<thead>
<tr>
<th>Purchase (New or Used) - Items may be purchased if they are inexpensive accessories for other DME equipment or the equipment itself will be used for an extended period of time.</th>
<th>To be reimbursed for <strong>new</strong> equipment, the provider must:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>▪ Adhere to all aspects of the manufacturer’s warranty, including all routine servicing;</td>
</tr>
<tr>
<td></td>
<td>▪ Deliver, set-up and install the equipment in the home, if applicable;</td>
</tr>
<tr>
<td></td>
<td>▪ Instruct the beneficiary or caregiver in the use and general care of the item; and</td>
</tr>
<tr>
<td></td>
<td>▪ Complete all adjustments and/or modifications needed to make the item functional.</td>
</tr>
<tr>
<td>Rental - The rental payment includes routine servicing and all necessary repairs or replacements to make the rented item functional.</td>
<td>To be reimbursed for <strong>used</strong> equipment, the provider must:</td>
</tr>
<tr>
<td>---</td>
<td>---</td>
</tr>
<tr>
<td></td>
<td>▪ Ensure that the used equipment is fully serviced and in good operating condition;</td>
</tr>
<tr>
<td></td>
<td>▪ Include all routine servicing for the equipment into the purchase price of the item for a minimum of one year;</td>
</tr>
<tr>
<td></td>
<td>▪ Instruct the beneficiary or caregiver in the use and general care of the item; and</td>
</tr>
<tr>
<td></td>
<td>▪ Not allow the cost of its maintenance to exceed the cost of new equipment.</td>
</tr>
</tbody>
</table>

**Rental Only** - Items that require regular and ongoing servicing/maintenance would be rented for the duration indicated by the physician’s order. Examples are oxygen, apnea monitors, and volume ventilators.

**Capped Rental** - Items rented until purchase price is reached. For Medicaid, items may be rented for a maximum period of 10 months. If the provider has been reimbursed for 10 months of rental, the item is considered purchased. (If used equipment is issued to the beneficiary, the usual and customary charge reported to Medicaid must accurately reflect that the item is used.)

**Converting Rental to Purchase** - The majority of DME items can be rented as a capped rental for up to a maximum of 10 months. If the purchase of an item is requested after an initial rental period has occurred, the provider must subtract the amount already paid for the rental item from the total purchase price.
1.8.C. REPAIRS AND REPLACEMENT PARTS

Repairs and the replacement of component parts for DME owned by the beneficiary are reimbursable if MDHHS purchased the item. If MDHHS did not purchase the original item, it must be medically necessary, meet the Standards of Coverage detailed in this chapter, and include the required supporting documentation.

For purchased items, all conditions of the warranty must be followed prior to requesting any repairs or replacement parts. Routine periodic servicing, such as cleaning, testing, regulating, and checking of equipment, is also included in the cost of the equipment. If equipment is found to be defective or not operating properly, it must be removed from service and cannot be placed into use again until it is brought up to manufacturer’s operating standards and specifications. It is the responsibility of the provider to supply loaner equipment while the beneficiary-owned item is being serviced at no charge to MDHHS. For audit purposes, all suppliers must maintain protocols and records defining how the maintenance of equipment is to be achieved.

MDHHS will consider reimbursement for a replacement when it is more costly to repair than replace. When submitting a PA request for a replacement, the provider must provide a statement regarding the cost to repair the service versus replacement.

Modifiers to be used when requesting replacements/repairs are as follows:

<table>
<thead>
<tr>
<th>Modifier</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>RA</td>
<td>Replacement of a DME, orthotic or prosthetic item</td>
</tr>
<tr>
<td>RB</td>
<td>Replacement of a part of a DME, orthotic or prosthetic item furnished as part of a repair</td>
</tr>
</tbody>
</table>

Repair of DME involving the replacement of a component part includes the cost of the part and the labor associated with its removal, replacement and finishing. The RB modifier is required.

For a repair in which no specific HCPCS code is appropriate, report HCPCS code K0739 (for the labor charge) and HCPCS code E1399 (for the replacement part). For wheelchairs, HCPCS code K0108 is to be used in place of HCPCS code E1399. The RB modifier is reported for the replacement part of the DME furnished as part of the repair. PA is required. The provider must provide a manufacturer’s invoice that states the acquisition cost for the service with the PA request form. If the provider is requesting reimbursement for labor, the specific time must be stated on the request form.
The replacement of a DME item will be considered when a significant change in the patient’s condition has occurred or the cost of the equipment repair is greater than replacement. If the DME item cannot be restored to a serviceable condition and there has been no change in the medical condition of the beneficiary, MDHHS will consider replacement if the existing equipment meets coverage criteria or was purchased by the program. In these cases, a current prescription will meet documentation requirements for the equipment. If there has been a change in the medical condition that would reflect a change in equipment need, then all documentation requirements in the Coverage Conditions and Requirements Section of this chapter apply. Replacement of DME for youth will be evaluated on an individual basis due to the expected growth pattern.

The RA modifier should be reported with the appropriate HCPCS code of the DME to be replaced and should be reported when replacing a DME item with an identical or nearly identical item.

MDHHS will not replace an item due to damage to the item as a result of misuse or abuse by the beneficiary or the caregiver. If damage to an item is the result of theft or car accident, attempts should be made to collect the full or partial payment from the third party’s insurance company, if applicable. A copy of the police or fire report must be submitted with the PA request form.

The provider may not provide or substitute a service of lesser quality or provide a different brand or type than what was authorized through prior authorization.

The provider may not add additional component HCPCS codes or bill for a more complex code (e.g., custom versus prefabricated) to increase the amount of reimbursement. The provider may not bill for a HCPCS code describing a custom-fabricated service in lieu of the availability of a code to cover a prefabricated item.

### 1.8.D. USED EQUIPMENT

<table>
<thead>
<tr>
<th>Definition</th>
<th>Used durable medical equipment is defined as non-customized equipment previously purchased or rented by one or more users, or equipment utilized as floor models, demonstration equipment or loaner equipment prior to current purchase or rental.</th>
</tr>
</thead>
</table>
| Standards of Coverage | Used equipment may be covered when all of the following are met:  
  • The provider determines the item to be the least costly alternative that meets the beneficiary's medical/functional needs; and  
  • The equipment and components are non-customized items; and  
  • The equipment is not intended or labeled as a single user item; and  
  • The equipment is in good working condition and comparable to new equipment quality standards; and  
  • The equipment has been sanitized, repaired and reconditioned between each user.  
Prior to the provision of used equipment, the beneficiary/parent/legal guardian must be given a choice to accept or refuse used equipment. If the beneficiary chooses to not accept the used equipment, the provider must provide new equipment following the standards of coverage and payment rules indicated in policy. |
MDHHS suggests that used equipment be identified by affixing a tag to the item with the equipment age and make/model/serial number or other identifying information.

Providers offering used equipment are responsible to clean, repair and recondition used items between users to assure the equipment is safe and in good working condition. The provider must remove used items from service when such items no longer meet quality standards.

### Documentation

In addition to documentation requirements listed in the this chapter, documentation for used equipment must include:

- **Equipment service log**
  - Confirmation that the equipment has been fully serviced and is in good working condition;
  - Repair(s) and sanitization dates, with signature(s) of person(s) performing these functions;
  - Age of item (if known);
  - Serial number/make/model (or other identifying information); and
  - Warranty information.

The above information must be incorporated into the beneficiary's file upon rental/purchase of the item.

- **Beneficiary file**
  - Signed and dated agreement from the beneficiary/parent/legal guardian stating he/she understands the equipment is used;
  - Indication that a manufacturer's owner's manual was provided to the beneficiary; and
  - Provider attestation that the used equipment is durable enough to meet Medicaid minimum frequency limits for replacement equipment.

Documentation must be available upon MDHHS request.

Refer to the specific policy standards of coverage and documentation requirements listed in this chapter.

### PA Requirements

Prior authorization is not required for used equipment if PA is not required for a new item with the same HCPCS code assignment.

PA is required for coverage beyond the standards of coverage, repair/replacement rules, and frequency limits indicated for the specified equipment.
Payment Rules

Used equipment may be purchased or rented (up to specified rental periods listed in policy).

Repairs/reconditioning/sanitizing and labor costs are included in the initial purchase and rental period per each beneficiary.

All warranties must be exhausted prior to requesting prior authorization for repair or replacement of the equipment per beneficiary.

MDHHS has identified specific items that must have either the NU or UE modifier appended to the HCPCS code when requesting PA or submitting a claim. Failure to append the correct modifier(s) may result in denied claims or inaccurate payment.

- NU - New Equipment
- UE - Used Equipment

Refer to the Medical Supplier database and/or the Medicaid Code and Rate Reference tool for HCPCS codes requiring the NU or UE modifier.

1.9 PROSTHETICS AND ORTHOTICS

For custom-fabricated prosthetics and orthotics (P&O), MDHHS reserves the right to request a recommendation from an appropriate physician subspecialist, physical therapist (PT) or occupational therapist (OT) evaluation when necessary to determine the functional and/or medical need for the item requested.

1.9.A. NONCUSTOM VERSUS CUSTOM-FABRICATED

Noncustom orthotics are prefabricated, available off the shelf for use, require basic measurements, and could include simple or minor custom fitting if necessary. Any delivery or service charges, fitting and preparatory procedures are considered part of the total purchase charge. Custom-fabricated P&O require measurements, fitting, casting or recasting, or molding to allow the appliance to meet the specific functional needs of the beneficiary. It may involve the incorporation of some prefabricated components. Adding prefabricated components to a prefabricated item is not considered custom-fabricated. Selection of the procedure code should be based on the service provided. Custom codes should not be used for prefabricated services.

All orthotist and prosthetist providers must have facility accreditation through the American Board for Certification in Orthotics, Prosthetics and Pedorthics, Inc. (ABC) in order to furnish and bill for custom-fabricated P&O appliances. Providers must maintain their ABC accreditation and be able to provide proof upon request. Orthotic and prosthetic providers must only bill specific prefabricated and custom-fitted orthotics that may include simple or minor intervention.

Medicaid will consider coverage of these services when provided by other types of practitioners in which the service is within their scope of current medical practice.
1.9.B. HCPCS MODIFIERS - LEFT AND RIGHT SIDE OF THE BODY

The LT or RT modifier must be reported for orthoses and prostheses to designate either the left or right side of the body, if applicable. The frequency limits are based on the individual item being replaced. If the same code is used bilaterally on the same date of service, the modifiers LT and RT must be entered on the same line of the claim listing the appropriate combined quantities. To determine whether a procedure code requires the LT or RT modifier, refer to the Medicaid Code and Rate Reference tool. (Refer to the Directory Appendix for website information.)

The provider may not provide or substitute a service of lesser quality or provide a different brand or type than what was authorized through prior authorization.

The provider may not add additional component HCPCS codes or bill for a more complex code (e.g., custom versus prefabricated) to increase the amount of reimbursement. The provider may not bill for a HCPCS code describing a custom-fabricated service in lieu of the availability of a code to cover a prefabricated item.

1.9.C. ADJUSTMENTS, REPLACEMENTS AND REPAIRS

Adjustments related to the delivery of orthoses are considered as part of the purchase price and are not separately reimbursable up to 90 days following placement. Providers are still responsible for the replacement, modification, and adjustment of any orthotic or prosthetic item that they placed but was not fitted properly. It is expected that the provider will adjust the device if possible before billing the program for modifications or replacements when there is unexpected growth spurt, substantial weight loss or gain, or post surgery.

Replacement of a component part of an orthosis includes the cost of the part and the labor associated with its removal, replacement and finishing.

For a repair in which no specific HCPCS code is appropriate, bill for the actual time it takes to repair or adjust the device and for the minor materials used. Report the labor charge by using HCPCS code L4205 (for orthoses) or HCPCS code L7520 (for prostheses). For minor materials used in repairing the item, report HCPCS code L4210 (for orthoses) or HCPCS code L7510 (for prostheses). MDHHS will cover the acquisition cost of material, not the provider’s charge.

1.10 NONCOVERED ITEMS [CHANGE MADE 7/1/18]

Items that are not covered by Medicaid include, but are not limited to:

- Adaptive equipment (e.g., rocker knife, swivel spoon, etc.)
- Air conditioner
- Air purifier
- Custom seating for secondary and/or transport chairs
- Devices used for play, pre-mobility development, or exercise are not considered pediatric mobility devices for the purpose of reimbursement and are not covered (e.g., jet mobile, ready racer, creepster crawler)
- Enteral formula to accommodate psychological or behavioral conditions, food preferences, allergies, loss of appetite, or noncompliance with a specialized diet
- Environmental Control Units
- Equipment not used or not used properly by the beneficiary
- Equipment for social or recreational purposes
- Exam tables/massage tables
- Exercise equipment (e.g., tricycles, exercise bikes, weights, mat/mat tables, etc.)
- Generators
- Hand/body wash
- Heating pads
- Home modifications
- Hot tubs
- House/room humidifier
- Ice packs
- Items for a beneficiary who is non-compliant with a physician's plan of care (or) items ordered for the purpose of solving problems related to noncompliance (e.g., insulin pump)
- Items used solely for the purpose of restraining the beneficiary for behavioral or other reasons
- Lift chairs, reclining chairs, vibrating chairs
- More than one pair of shoes on the same date of service
- New equipment when current equipment can be modified to accommodate growth
- Nutritional formula representing only a liquid form of food
- Nutritional puddings/bars
- Over-the-counter shoe inserts
- Padded footplates
- Peri-wash
- Portable oxygen, when oxygen is ordered to be used at night only
- Power tilt-in-space or reclining wheelchairs for a long-term care resident because there is limited staffing
- Pressure gradient garments for maternity-related edema
- Prosthetic appliances for a beneficiary with a potential functional level of K0
- Regular or dietetic foods (e.g., Slimfast, Carnation instant breakfast, etc.)
- Room dehumidifiers
- School Items (e.g., computers, writing aids, book holder, mouse emulator, etc.)
- Second units for school use
- Second wheelchair for beneficiary preference or convenience
- Sensory Devices (e.g., games, toys, etc.)
- Sports drinks/juices
- Stair lifts
- Standard infant/toddler formula
- Therapy modalities (bolsters, physio-rolls, therapy balls, jett mobile)
- Toothettes
- Transcutaneous Nerve Stimulator when prescribed for headaches, visceral abdominal pain, pelvic pain, or temporal mandibular joint (TMJ) pain
- **(text deleted 7/1/18)**
- UV lighting for Seasonal Affective Disorder
- Vacu-brush toothbrushes
- Weight loss or "light" products
- Wheelchair lifts or ramps for home or vehicle (all types)
- Wheelchair accessories (e.g., horns, lights, bags, special colors, etc.)
- Wigs for hair loss

For specific procedure codes that are not covered, refer to the Coverage Conditions and Requirements Section of this chapter or the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information.

### 1.11 Charging the Beneficiary

The provider may not charge the beneficiary for failure to provide sufficient documentation to support coverage or failure to obtain PA. The provider may charge the beneficiary if the beneficiary waives his right to PA. The provider must maintain on file a document that demonstrates that the beneficiary knew and understood that the waiver of PA would result in the beneficiary's responsibility for payment. In addition, the provider may not charge the beneficiary any copayments (unless permitted by Medicaid) or charges above the Medicaid allowable amount.

### 1.12 Uniform Reporting of Services

MDHHS follows the American Medical Association’s manual and guidelines for Current Procedural Terminology (CPT) numeric codes, and the Healthcare Common Procedure Coding System (HCPCS). In conjunction with the CPT/HCPCS coding systems to describe services rendered, MDHHS utilizes the Medicaid National Correct Coding Initiative (NCCI) coding policies and edits as developed by the Centers for Medicare & Medicaid Services (CMS) to promote national correct coding methodologies.
### SECTION 2 - COVERAGE CONDITIONS AND REQUIREMENTS

#### 2.1 APNEA MONITOR

<table>
<thead>
<tr>
<th>Definition</th>
<th>An apnea monitor measures both heart rate and respirations and meets all of the Equipment Control Regulatory Industry (ECRI) Standards for home monitors.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Standards of Coverage</strong></td>
<td><strong>A Newborn Infant Following Hospital Discharge</strong> - Units are covered for a newborn infant up to three months following hospital discharge if one of the following diagnoses or medical conditions applies:</td>
</tr>
<tr>
<td></td>
<td>▪ Apnea of newborn</td>
</tr>
<tr>
<td></td>
<td>▪ Apnea of prematurity</td>
</tr>
<tr>
<td></td>
<td>▪ Apparent life threatening event (ALTE)</td>
</tr>
<tr>
<td></td>
<td>▪ Sibling of Sudden Infant Death Syndrome (SIDS)</td>
</tr>
<tr>
<td></td>
<td>▪ Bronchopulmonary Dysplasia</td>
</tr>
<tr>
<td></td>
<td><strong>A Sibling of Sudden Infant Death Syndrome (SIDS) Following Hospital Discharge</strong> -</td>
</tr>
<tr>
<td></td>
<td>▪ Units are covered for up to one month past the age of the sibling who died from SIDS; or</td>
</tr>
<tr>
<td></td>
<td>▪ Up to three months past the age of the sibling who died if the child was a twin of the beneficiary being monitored.</td>
</tr>
<tr>
<td></td>
<td><strong>An Acute Respiratory Illness</strong> - Short-term coverage of a unit (up to two months) is a benefit when the beneficiary has a respiratory illness/diagnosis such as Pertussis, Respiratory Syncytial Virus (RSV), or Pneumonia.</td>
</tr>
<tr>
<td></td>
<td><strong>As a Diagnostic Tool</strong> - Short-term coverage of a unit (up to three months) used as a diagnostic tool is a benefit if the infant is under three months of age at set-up, and the parent and/or guardian reports suspected events.</td>
</tr>
<tr>
<td></td>
<td><strong>Beneficiaries with Tracheostomy</strong> - Units are generally not covered for beneficiaries who have a tracheostomy. Units may be considered for coverage only if, after careful evaluation of current treatment plan and equipment already in the home, the beneficiary's medical needs are still not met. Documentation explaining the medical need must be submitted with a detailed plan of management.</td>
</tr>
<tr>
<td></td>
<td><strong>Beneficiaries who are Ventilator Dependent</strong> - Units are considered to be included in the ventilator reimbursement to function as a backup alarm for the ventilator low-pressure alarm.</td>
</tr>
</tbody>
</table>
### Noncovered Conditions

Units are not covered for the following diagnoses/medical conditions unless documentation justifies medical necessity and usage meets the established Standards of Coverage above:

- Chromosomal abnormalities
- Congenital heart defects with or without arrhythmias
- Cerebral palsy
- Asymptomatic prematurity
- Developmental delay/intellectual disability
- Seizure disorder
- Hydrocephaly with or without Arnold-Chiari Syndrome
- Irreversible terminal conditions
- Distant family history of SIDS (other than immediate sibling)

### Documentation

The documentation must be less than 30 days old and include all of the following:

- A statement from an appropriate subspecialist trained in the treatment of apnea (i.e., apnea clinic, neonatalogist, pediatric intensivist, pediatric pulmonologist, or neurologist) medically substantiating the continued need for the unit.
- Download interpretation of the monitor data documenting continued apnea or bradycardia events.
- For a sibling of SIDS, the age of the sibling at death.

### PA Requirements

PA is not required for any of the following if the Standards of Coverage are met:

- Up to three months usage for newborn infants following a hospital discharge.
- Up to three months usage for siblings of SIDS following a hospital discharge.
- Used up to two months due to a respiratory illness (e.g., Pertussis, Respiratory Syncytial Virus (RSV), or Pneumonia).
- Used up to three months as a diagnostic tool for the following diagnoses or medical conditions:
  - Apnea of newborn
  - Apnea of prematurity
  - Apparent life threatening event (ALTE)
  - Sibling of Sudden Infant Death Syndrome (SIDS)
  - Bronchopulmonary Dysplasia

PA is required for the following:

- Continuation of the monitor beyond the initial two or three months.
- Other diagnoses/medical conditions or applications not indicated in the Standards of Coverage.
### Payment Rules
An Apnea Monitor is considered a **rental only** item and includes all of the following:

- All accessories needed to use the unit (e.g., electrodes, lead wires, belts, cables, etc.).
- Education on the proper use and care of the equipment.
- Routine servicing and all necessary repairs or replacements to make the unit functional.
- Periodic downloading/interpretation of recorded data.

### 2.2 Bi-Level Positive Airway Pressure Device

#### Definition
The bi-level positive airway pressure (BIPAP) device delivers a noninvasive positive air pressure into the upper airway to assist spontaneous respiratory efforts. The device has two pressure levels (one for breathing in and one for breathing out).

#### Standards of Coverage
A BIPAP device **without the backup rate feature** may be covered for the following conditions for up to four months:

- For Obstructive Sleep Apnea (OSA), if the sleep study (polysomnogram) performed in an accredited Sleep Center or Sleep Laboratory documents the following:
  - Continuous airway pressure of 13-15 cm water does not adequately control/eliminate obstructive/hypopneic events; or
  - The beneficiary cannot tolerate continuous positive airway pressures of greater than or equal to 12 cm water, in addition to evidence that the sleep lab has worked with the beneficiary to try different application devices, ramp times, relaxation techniques, etc.
- For respiratory failure if there are lab values (i.e., arterial blood gas [ABG], venous blood gas [VBG] or capillary blood gas) indicating respiratory failure and follow-up lab values documenting improvement with the use of a BIPAP.
- For a diagnosis/medical condition for which a CPAP is inappropriate for use (e.g., cardiomyopathy, cor pulmonale, primary pulmonary hypertension, left ventricular hypertrophy, etc.).

A BIPAP device **with the backup rate feature** may be covered if the beneficiary requires the backup feature due to insufficient spontaneous respiratory efforts (e.g., inadequate negative respiratory force due to central apnea, neuromuscular diseases such as muscular dystrophy, etc.).

#### Documentation
Documentation must be less than 90 days old and include:

- Diagnosis related to the need for BIPAP.
- BIPAP settings and number of hours per day used.
- Other medical conditions ruling out the appropriate use of a CPAP if present (e.g., cardiomegaly, left ventricular hypertrophy, primary pulmonary hypertension, etc.).
- For diagnosis of OSA, results of a sleep study (polysomnogram) including CPAP/BIPAP titration.
- For diagnosis of respiratory failure, test results substantiating the condition (e.g., ABG, VBG, or capillary blood gas) as well as test results showing improvement on BIPAP.
Michigan Department of Health and Human Services

Medicaid Provider Manual

- Negative inspiratory force measurement, if appropriate.
- For continued coverage beyond the initial four months, the following additional information must be provided:
  - Medical statement indicating beneficiary is stable and the BIPAP device settings are adequate.
  - Documentation of beneficiary compliance through the review of equipment use logs.

<table>
<thead>
<tr>
<th>PA Requirements</th>
<th>PA is required for all BIPAP requests.</th>
</tr>
</thead>
</table>
| Payment Rules   | BIPAP units are considered a **capped rental** item and are inclusive of all of the following:
  - All accessories needed to use the unit (e.g., tubing, application devices, chinstrap, headgear, etc.).
  - Education on the proper use and care of the equipment.
  - Routine servicing and all necessary repairs or replacements to make the unit functional. |

### 2.3 Blood Glucose Monitoring Equipment and Supplies

<table>
<thead>
<tr>
<th>Definition</th>
<th>Blood glucose monitoring supplies and equipment are defined as those items necessary to monitor blood glucose levels. The equipment and supplies include, but are not limited to, blood glucose monitors, testing strips, lancets, and calibrator solution/chips.</th>
</tr>
</thead>
</table>
| Standards of Coverage | A home blood glucose monitor and related supplies are covered when a beneficiary has been diagnosed with diabetes and it is medically necessary to monitor fluctuations of blood glucose levels on a daily basis. Diabetes includes:  
  - Gestational diabetes  
  - Insulin-treated diabetes  
  - Non-insulin treated diabetes  
  
  Diabetes medications (i.e., metformin, Januvia, etc.) do not qualify as insulin treatment.  
  
  Quantity limits for lancets, blood glucose test strips/reagent test strips, and urine test/reagent strips/tablets are based upon insulin-treated or non-insulin-treated diabetes. Refer to the Medicaid Code and Rate Reference tool in CHAMPS for quantity and frequency information. (Refer to the Directory Appendix for website information.) |
<table>
<thead>
<tr>
<th>Documentation</th>
<th>Documentation must be less than 90 days old and include all of the following:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>- Diagnosis/condition related to the need for the blood glucose monitoring.</td>
</tr>
<tr>
<td></td>
<td>- Items to be dispensed.</td>
</tr>
<tr>
<td></td>
<td>- Quantity of items to be dispensed for 30 days usage.</td>
</tr>
<tr>
<td></td>
<td>- Frequency of testing.</td>
</tr>
<tr>
<td></td>
<td>- For beneficiaries under 21, treatment plan for treating abnormal blood glucose</td>
</tr>
<tr>
<td></td>
<td>levels (if pediatric endocrinologist did not order the monitor/supplies).</td>
</tr>
<tr>
<td></td>
<td>- <strong>For CSHCS beneficiaries</strong>, a prescription from a Pediatric Endocrinologist is</td>
</tr>
<tr>
<td></td>
<td>required.</td>
</tr>
</tbody>
</table>

For beneficiaries 21 years of age and older with medical need to test blood glucose more frequently than established quantity limits, the physician must indicate the medical need and duration ("PRN" or "as needed" is not sufficient documentation to support medical need) for the additional quantities.

<table>
<thead>
<tr>
<th>PA Requirements</th>
<th>PA is not required when the Standards of Coverage are met and the beneficiary has one of following diagnoses:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>- Diabetes Mellitus Without Mention of Complications</td>
</tr>
<tr>
<td></td>
<td>- Diabetes with Ketoacidosis</td>
</tr>
<tr>
<td></td>
<td>- Diabetes with Hyperosmolarity</td>
</tr>
<tr>
<td></td>
<td>- Diabetes with Other Coma</td>
</tr>
<tr>
<td></td>
<td>- Diabetes with Renal Manifestations</td>
</tr>
<tr>
<td></td>
<td>- Diabetes with Ophthalmic Manifestations</td>
</tr>
<tr>
<td></td>
<td>- Diabetes with Neurological Manifestations</td>
</tr>
<tr>
<td></td>
<td>- Diabetes with Peripheral Circulatory Disorders</td>
</tr>
<tr>
<td></td>
<td>- Diabetes with Other Specified Manifestations</td>
</tr>
<tr>
<td></td>
<td>- Diabetes with Unspecified Complications</td>
</tr>
<tr>
<td></td>
<td>- Diabetes Mellitus Complicating Pregnancy</td>
</tr>
<tr>
<td></td>
<td>- Abnormal Glucose Tolerance (Gestational Diabetes Only)</td>
</tr>
</tbody>
</table>

In addition to the above, PA will not be required if physician documentation substantiates the medical need for an adult (insulin or non-insulin treated) to test more frequently than standardized MDHHS limits. For such circumstances, the provider must append the KX modifier to the A4253 and to the A4259 on the claim. (Refer to the Medicaid Code and Rate Reference tool for quantity limits when using modifier KX with lancets and test strips).

<table>
<thead>
<tr>
<th>PA is required for:</th>
<th>Home blood glucose monitors with special features such as voice synthesis.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Medical need not within the Standards of Coverage if it exceeds quantity limits and/or a diagnosis that has not been removed from PA.</td>
</tr>
<tr>
<td></td>
<td>Replacement within three years.</td>
</tr>
</tbody>
</table>
Payment Rules

<table>
<thead>
<tr>
<th>Payment Rules</th>
</tr>
</thead>
<tbody>
<tr>
<td>All items (including the monitor) are considered <strong>purchase only</strong> items.</td>
</tr>
<tr>
<td>To report date of service (DOS) for blood glucose test or reagent strips, lancets, and normal, low and high calibrator solution, use a span date in the &quot;From&quot; and &quot;To&quot; fields, not to exceed 90 days.</td>
</tr>
</tbody>
</table>

### 2.4 BLOOD PRESSURE MONITORING

<table>
<thead>
<tr>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Blood pressure monitoring includes manual and automatic blood pressure units.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Standards of Coverage</th>
</tr>
</thead>
<tbody>
<tr>
<td>A manual blood pressure unit may be covered for a beneficiary under the age of 21 when:</td>
</tr>
<tr>
<td>- Daily titration of medications is required for renal disease.</td>
</tr>
<tr>
<td>- A cardiovascular condition is present that affects blood pressure (e.g., congenital heart disease).</td>
</tr>
<tr>
<td>- A brain lesion or cancer tumor is present that affects blood pressure.</td>
</tr>
<tr>
<td>- A medication regimen is present that affects blood pressure.</td>
</tr>
</tbody>
</table>

Coverage for beneficiaries age 21 and over with uncontrolled blood pressures when one of the following is present:
- Fluctuation in blood pressure as a result of renal disease.
- Medications are titrated based on daily blood pressure readings.

An automatic blood pressure monitor is covered when:
- Standards of coverage for a manual unit have been met.
- Beneficiary is age 11 or over.
- Economic alternatives (such as a manual blood pressure unit) have either been tried or ruled out prior to requesting authorization of an automatic blood pressure monitor.

<table>
<thead>
<tr>
<th>Documentation</th>
</tr>
</thead>
<tbody>
<tr>
<td>The documentation must be less than 30 days old and include:</td>
</tr>
<tr>
<td>- Diagnosis/medical condition pertaining to the need for the blood pressure monitor.</td>
</tr>
<tr>
<td>- Complete physician's treatment plan, including current blood pressure medications, frequency of checks, and specific patient protocol in case of an abnormal reading.</td>
</tr>
<tr>
<td>- The medical reason a manual blood pressure unit cannot be used (for beneficiaries over the age of ten years).</td>
</tr>
<tr>
<td>- Prescription from a pediatric nephrologist when daily titration of medications is required for renal disease (<strong>required for coverage under CSHCS</strong>).</td>
</tr>
</tbody>
</table>

<table>
<thead>

</thead>
<tbody>
<tr>
<td>A blood pressure monitor is considered a <strong>purchase only</strong> item.</td>
</tr>
</tbody>
</table>
2.5 BREAST PUMPS

Medicaid covers hospital-grade electric, personal use double electric, and manual breast pumps.

2.5.A. HOSPITAL-GRADE ELECTRIC BREAST PUMP

<table>
<thead>
<tr>
<th>Definition</th>
<th>A hospital grade electric breast pump is heavy duty, piston operated, and is capable of being used frequently on a daily basis.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Standards of Coverage</td>
<td>A hospital grade electric breast pump may only be covered for a beneficiary with a Neonatal Intensive Care Unit (NICU) infant, up to three months of age, when one of the following applies:</td>
</tr>
<tr>
<td></td>
<td>- The infant has a severe feeding problem secondary to cleft lip and/or palate.</td>
</tr>
<tr>
<td></td>
<td>- The infant has a severe feeding problem due to oral motor dysfunction, secondary to prematurity.</td>
</tr>
<tr>
<td></td>
<td>- The infant is hospitalized resulting in a physical separation of the mother and infant.</td>
</tr>
<tr>
<td></td>
<td>- The infant or mother is hospitalized, resulting in a physical separation of the mother and infant; and all of the following applies:</td>
</tr>
<tr>
<td></td>
<td>- The pump has an adjustable suction pressure at the breast shield during use between 30 mm Hg and 250 mm Hg (suction just at the low or high end is not acceptable);</td>
</tr>
<tr>
<td></td>
<td>- The pump has a mechanism to prevent suction beyond 250 mm Hg to prevent nipple trauma;</td>
</tr>
<tr>
<td></td>
<td>- The pump has an adjustable/varying pumping speed no less than 30 cycles per minute and capable of reaching up to a maximum of 60 cycles per minute;</td>
</tr>
<tr>
<td></td>
<td>- The pump must be able to operate on a 110-volt household current and be UL listed;</td>
</tr>
<tr>
<td></td>
<td>- The pump must not weigh over 12 pounds; and</td>
</tr>
<tr>
<td></td>
<td>- The pump is registered and cleared with the FDA.</td>
</tr>
</tbody>
</table>

For continued coverage beyond the initial three months, additional documentation must be provided.

<table>
<thead>
<tr>
<th>Documentation</th>
<th>Documentation must be less than 30 days old and include:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>- Diagnosis/medical condition of the infant relating to the need for a breast pump.</td>
</tr>
<tr>
<td></td>
<td>- Infant's age (gestational age, if premature).</td>
</tr>
<tr>
<td></td>
<td>- Mother's discharge date.</td>
</tr>
<tr>
<td></td>
<td>- Anticipated duration of need.</td>
</tr>
<tr>
<td></td>
<td>- An order signed by the treating physician or non-physician practitioner.</td>
</tr>
<tr>
<td></td>
<td>- The International Classification of Diseases (ICD) diagnosis code(s) related to birth or pregnancy.</td>
</tr>
<tr>
<td></td>
<td>- Documentation of mother's intent to breastfeed.</td>
</tr>
</tbody>
</table>

Documentation must be kept in the beneficiary's file and made available upon request.
### PA Requirements

| PA Requirements | PA is not required when the Standards of Coverage are met. PA is required for coverage beyond three months. |

### Payment Rules

<table>
<thead>
<tr>
<th>Payment Rules</th>
<th>A breast pump is considered a <strong>rental only</strong> item and is inclusive of the following:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>- All related accessories necessary to use the equipment. (To obtain additional reimbursement for the initial breast pump kit, report the &quot;KH&quot; modifier with HCPCS code E0604 for the first month of rental only.)</td>
</tr>
<tr>
<td></td>
<td>- Education on the proper use and care of the equipment.</td>
</tr>
<tr>
<td></td>
<td>- Routine servicing and all necessary repairs or replacements to make the unit functional.</td>
</tr>
<tr>
<td></td>
<td>The rental pump may be billed using the infant's Medicaid ID number if the need for the hospital grade pump meets the standards of coverage and the mother loses Medicaid eligibility.</td>
</tr>
<tr>
<td></td>
<td>Rental of the hospital-grade electric breast pump will not be made if a personal use double electric breast pump or a manual breast pump was purchased for the beneficiary within the Standards of Coverage frequency limitations.</td>
</tr>
</tbody>
</table>

### 2.5.B. PERSONAL USE DOUBLE ELECTRIC BREAST PUMP

#### Definition

A personal use double electric breast pump is defined as a double electric (AC and/or DC) pump, intended for a single user, capable of being used frequently on a daily basis.

#### Standards of Coverage

A personal use double electric breast pump may be covered once per five years for a beneficiary when all of the following criteria are met:

- The mother expresses the desire to breastfeed;
- The pump has been registered and cleared by the FDA;
- The pump has a minimum of a one-year manufacturer's warranty;
- The pump has an adjustable suction pressure at the breast shield during use between 30 mm Hg and 250 mm Hg (suction just at the low or high end is not acceptable);
- The pump has a mechanism to prevent suction beyond 250 mm Hg to prevent nipple trauma;
- The pump has an adjustable/varying pumping speed no less than 30 cycles per minute and capable of reaching up to a maximum of 60 cycles per minute;
- The pump must be able to operate on a 110-volt household current and be UL listed;
- The pump must not weigh over 12 pounds; and
- The pump collection bottle must be bisphenol-A (BPA) and DHEP-free.
**Documentation**

- Must be less than 30 days old and include all of the following:
  - An order signed by the treating physician or non-physician practitioner.
  - The International Classification of Diseases (ICD) diagnosis code(s) related to birth or pregnancy.
  - Infant’s age (gestational age, if premature).
  - Mother’s hospital discharge date or infant’s hospital discharge date.
  - Documentation of mother’s intent to breastfeed.

Documentation must be kept in the beneficiary's file and made available upon request.

**PA Requirements**

- PA is not required when the Standards of Coverage are met. PA is required for circumstances beyond the Standards of Coverage and Payment Rules.

**Payment Rules**

- All personal use double electric breast pumps are purchase only. Payment includes:
  - Education for the proper use, care of the equipment, and storage of breast milk.
  - Supplies necessary for operation of the pump (pump, adapter/charger, breast shields, bottles, lids, tubing, locking ring, connectors, valves, filters and membranes.

The pump may be billed using the infant’s Medicaid ID number if the need for the pump meets the Standards of Coverage and the mother loses Medicaid eligibility. Medicaid will not purchase a personal use double electric breast pump during the rental period of a hospital-grade electric breast pump or if a manual breast pump was purchased within the Standards of Coverage frequency limitations.

Replacement parts are covered after the manufacturer’s warranty has expired for included parts. Refer to the Medical Supplier database and the Medicaid Code and Rate Reference tool for covered replacement parts, code descriptions, coverage limitations and reimbursement.

### 2.5.C. MANUAL BREAST PUMP

**Definition**

A manual breast pump typically consists of a single breast shield, a collection device, and a hand-controlled lever to create suction and express milk. Manual breast pumps are intended for a single user.

**Standards of Coverage**

A manual breast pump may be covered once per birth. For a beneficiary who has had a multiple birth delivery, only one pump is covered. Coverage of a manual breast pump may be provided when all of the following criteria have been met:

- The mother expresses the desire to breastfeed.
- The pump has been registered with the FDA.
- The pump has a minimum of a one year manufacturer’s warranty.
- The pump has a mechanism to prevent suction beyond 250 mm Hg to prevent nipple trauma.
- The pump collection bottle must be bisphenol-A (BPA) and DHEP-free.
### Documentation

Documentation must be less than 30 days old and include all of the following:

- An order signed by the treating physician or non-physician practitioner.
- The International Classification of Diseases (ICD) diagnosis code(s) related to birth or pregnancy.
- Infant’s age (gestational age, if premature).
- Mother’s hospital discharge date or infant’s hospital discharge date.
- Documentation of mother’s intent to breastfeed.

Documentation must be kept in the beneficiary’s file and made available upon request.

### PA Requirements

PA is not required when the Standards of Coverage are met. PA is required for circumstances beyond the Standards of Coverage and Payment Rules.

### Payment Rules

All manual breast pumps are purchase only. Purchase includes:

- Education for the proper use, care of the equipment, and storage of breast milk.
- Supplies necessary for the operation of the pump (pump, breast shields, bottles, lids, tubing, locking ring, connectors, valves, filters and membranes).

The pump may be billed using the infant’s Medicaid ID number if the need for the pump meets the Standards of Coverage and the mother loses Medicaid eligibility. Medicaid will not purchase a manual breast pump during the rental period of a hospital-grade electric breast pump or if a personal use double electric breast pump was purchased within the Standards of Coverage frequency limitations.

Replacement parts are covered after the manufacturer’s warranty has expired for included parts. Refer to the Medical Supplier database and the Medicaid Code and Rate Reference tool for covered replacement parts, code descriptions, coverage limitations and reimbursement.

### 2.5.D. NON-COVERED BREASTFEEDING ITEMS

Non-covered breastfeeding items:

- Personal use single electric breast pumps
- Breastfeeding pillows
- Breastfeeding comfort items and clothing
- Accessories not necessary for the operation of the breast pump

### 2.6 CANES AND CRUTCHES

#### Definition

Canes or crutches include, but are not limited to, adjustable or fixed canes, quad or three prong canes, forearm crutches and underarm crutches.

#### Standards of Coverage

Canes or crutches are covered if:

- The diagnosis/medical condition results in instability in ambulation or inability to ambulate.
- The beneficiary requires the stability of a cane or crutch to ambulate.
## Documentation

Documentation must be less than 180 days old and include the following:

- Diagnosis/medical condition related to instability or inability to ambulate.
- Type of item requested.
- Medical reason for replacement (when appropriate).

## PA Requirements

PA is not required when Standards of Coverage are met.

PA is required when:

- The beneficiary is over the age of 21, and replacement is required within five years.
- The beneficiary is under the age of 21, and replacement is required within one year.

For replacement of pads, handgrips or tips, the provider may call for a verbal authorization. The provider must provide acquisition cost supported by a manufacturer’s invoice. A prescription is not required if the program has covered the cane and/or crutch. The original prescription for the item must be kept on file.

## Payment Rules

Canes and crutches are considered **purchase only** items.

### 2.7 Children’s Products

#### Definition

Children's products that may be considered for coverage include, but are not limited to, equipment that is used in the home or vehicle by children under age 21 for the purposes of positioning, safety during activities of daily living, or assisted mobility. Examples of these items include: bath supports, specialized car seats, corner chairs, dynamic standers, feeder seats, gait trainers, pediatric walkers, positioning commodes, side lies, standers, and toileting supports.

#### Standards of Coverage

Children's products are covered if one or more of the following applies:

- Beneficiary is unable to independently maintain a seated position.
- Beneficiary cannot stand and/or ambulate without the aid of an assistive device.
- Beneficiary has physical anomalies that require support to allow a functional position or prevent further disability.

#### Documentation

Documentation must be less than 180 days old and include **all** of the following:

- Diagnosis appropriate for the equipment requested.
- Any adaptive or assistive devices currently used in the home.
- Reason economic alternatives cannot be used, if applicable.
- Statement of functional need from an appropriate pediatric subspecialist, occupational or physical therapist.

#### PA Requirements

PA is required for all requests.

#### Payment Rules

All children's products are considered **purchase only** items.
## 2.8 COMMODES

<table>
<thead>
<tr>
<th>Definition</th>
<th>A commode is a chair with an enclosed pan or pail that may be stationary or mobile, with fixed or removable arms, a seat lift, and footrest.</th>
</tr>
</thead>
</table>
| Standards of Coverage | **A standard commode** may be covered if the beneficiary is unable to safely use home toileting facilities, is confined to a single room, or is confined to one level of the home in which no toileting facilities are available.  
**A heavy-duty commode** may be covered for a beneficiary weighing 300 pounds or greater and the beneficiary is unable to safely use home toileting facilities, is confined to a single room, or is confined to one level of the home in which no toileting facilities are available.  
**A shower commode chair** may be covered if required to enable the beneficiary to shower independently or with assistance in the home setting and there are no cost effective alternatives. |
| Documentation | Documentation must be less than 180 days old and include:  
- Diagnosis appropriate for the equipment requested.  
- Functional limitations requiring the equipment.  
- Weight (if a heavy-duty commode is required).  
- Discharge date from hospital, if applicable. |
| PA Requirements | PA is not required for any of the following if the Standards of Coverage are met:  
- Up to Three Months Following Hospital Discharge - rental of a stationary commode chair with fixed arms (or) stationary commode chair with detachable arms for a diagnosis not already removed from PA.  
- Purchase or rental of a stationary, mobile, extra wide, or heavy duty commode chair with fixed or detachable arms for the following diagnoses:  
  - Amyotrophic Lateral Sclerosis  
  - Multiple Sclerosis  
  - Cerebral Palsy, Unspecified  
  - Congenital and Progressive Hereditary Muscular Dystrophy  
  - Fracture of Vertebral Column With Spinal Cord Injury (cervical and dorsal)  
- Replacement of pail or pan for use with commode chair.  
PA is required for the following:  
- Medical need beyond the Standards of Coverage.  
- Commodes with footrests and/or seat mechanisms.  
- Continued coverage after the three-month rental following hospital discharge for a diagnosis not removed from PA.  
- Replacement is required within five years if the beneficiary is over 21.  
- Replacement is required within two years if the beneficiary is under 21. |
Payment Rules

A commode may be considered a capped rental or purchase item. Reimbursement for all commodes includes pail/pan and accessories (except footrest).

If unit is billed as a capped rental, the rental payment would be inclusive of the following:

- Education on the proper use and care of the equipment.
- Routine servicing and all necessary repairs or replacement to make the unit functional.

2.9 COMPRESSOR (LARGE VOLUME)

**Definition**

A compressor is an electrical device that provides humidity to a tracheostomy and is capable of continuous operation.

**Standards of Coverage**

A compressor is covered to provide humidity for a tracheostomy.

**Documentation**

Documentation must be less than 90 days old and include all of the following:

- Diagnosis/medical condition related to the need for the equipment.
- Specific unit requested.

**PA Requirements**

PA is not required for rental of a large volume compressor if the Standards of Coverage are met and documentation details one of the following diagnoses:

- Artificial Opening Status – Tracheostomy
- Attention to Artificial Openings – Tracheostomy

PA is required for:

- Purchase of a large volume compressor (if not rented for 10 months).
- Medical need beyond the Standards of Coverage.
- Replacement within five years.

**Payment Rules**

A unit may be considered a capped rental item or purchased item. If unit is billed as a capped rental, the rental payment would be inclusive of the following:

- All accessories needed to use the equipment.
- Education on the proper use and care of the equipment.
- Routine servicing and all necessary repairs or replacements to make the unit functional.

2.10 CONTINUOUS POSITIVE AIRWAY PRESSURE DEVICE

**Definition**

The continuous positive airway pressure (CPAP) device delivers a noninvasive positive air pressure into the upper airway to assist spontaneous respiratory efforts.
**Standards of Coverage**

A CPAP device may be covered for Obstructive Sleep Apnea (OSA) if a sleep study (polysomnogram) performed in an accredited Sleep Center or Sleep Laboratory documents the following:

- Apnea-Hypopnea Index (AHI) documents a minimum of 15 events per hour, or
- AHI documents 5 to 14 events per hour with related symptoms such as:
  - Excessive daytime sleepiness, impaired cognition, mood disorders; and/or
  - Hypertension, ischemic heart disease, or history of stroke, or morbid obesity.

For beneficiaries under the age of 21 only, tracheomalacia, tracheostomy complications or other anomalies of larynx, trachea, and bronchus may be covered when a particular CPAP setting improved and maintained airway patency and oxygenation.

**Documentation**

Documentation must be less than 90 days old and include:

- Diagnosis and/or medical condition related to the need for the CPAP device.
- A copy of the sleep study (polysomnogram) for a diagnosis of OSA. The recorded sleep study must contain at least two hours of recorded sleep and the AHI must be calculated using actual recorded hours of sleep.
- For continued coverage beyond the initial four months, documentation must substantiate that the beneficiary has been compliant with the use of the CPAP and the device continues to be effective in treating the condition. If a unit log is maintained, the information must be submitted.
- Prescription from an appropriate pediatric subspecialist is required for coverage under the CSHCS Program.

**PA Requirements**

PA is not required if the Standards of Coverage are met and:

- The beneficiary is over the age of 21 and has one of the following diagnoses:
  - Obstructive Sleep Apnea (Adults)
  - Tracheostomy Complications
  - Tracheomalacia
  - Other Anomalies of Larynx, Trachea, and Bronchus
  - Insomnia with Sleep Apnea
  - Hypersomnia with Sleep Apnea
  - Other and Unspecified Sleep Apnea
- For unobstructive sleep apnea, use diagnosis description of other and unspecified sleep apnea.
- The beneficiary is under the age of 21, has one of the above diagnoses, and the device is prescribed by the appropriate pediatric subspecialist.

PA is required for:

- Medical need beyond the Standards of Coverage.
- Replacement within five years.
PA is given for the initial four months and then for the final six months.
### Payment Rules

A CPAP device is considered a **capped rental** item and is inclusive of the following:

- All accessories needed to use the unit (e.g., tubing, application devices, filters, chinstrap, headgear, etc.).
- Education on the proper use and care of the equipment.
- Routine servicing and all necessary repairs or replacements to make the unit functional.

After the first 10 months of use, necessary repairs and/or replacements of accessories are separately reimbursable. (Replacement parts for the full CPAP mask should be considered prior to replacement of the entire mask.)

---

### 2.11 Diabetic Shoes and Inserts

<table>
<thead>
<tr>
<th>Definition</th>
<th>Diabetic shoes, inserts and related modifications include, but are not limited to, depth inlay shoes, multi-density inserts, roller or rocker bottoms, wedges, metatarsal bar, and offset heel.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Standards of Coverage</td>
<td>Diabetic shoes, inserts, and/or modifications may be covered for individuals who have, due to complications with diabetes mellitus, one of the following conditions:</td>
</tr>
<tr>
<td></td>
<td>- History of previous foot ulcerations or pre-ulcerative calluses.</td>
</tr>
<tr>
<td></td>
<td>- Established peripheral neuropathy or sensory impairment.</td>
</tr>
<tr>
<td></td>
<td>- Peripheral Vascular Disease with an ankle brachial index at rest of 0.5 or less following exercise.</td>
</tr>
<tr>
<td></td>
<td>- Loss of a toe or portion of the foot due to amputation arising from diabetes.</td>
</tr>
<tr>
<td></td>
<td>A <strong>custom-molded diabetic shoe</strong> is covered only if the depth shoe cannot accommodate a foot anomaly.</td>
</tr>
<tr>
<td></td>
<td><strong>Inserts</strong> are covered if the beneficiary requires a depth shoe or custom-molded diabetic shoe. For a depth shoe, three inserts would be separately reimbursable in addition to the non-customized one included with the shoe. For a custom-molded shoe, two inserts would be separately reimbursable. Modifications to a custom-molded or depth shoe may be covered rather than an additional insert.</td>
</tr>
<tr>
<td>Documentation</td>
<td>Documentation must be less than 30 days old and include all of the following:</td>
</tr>
<tr>
<td></td>
<td>- Diagnosis/medical condition related to the service requested.</td>
</tr>
<tr>
<td></td>
<td>- Medical reasons for specific shoe type and/or modification.</td>
</tr>
<tr>
<td>PA Requirements</td>
<td>PA is not required for the following inserts if the Standards of Coverage are met:</td>
</tr>
<tr>
<td></td>
<td>- Multiple density insert, direct formed, molded to foot with external heat source.</td>
</tr>
<tr>
<td></td>
<td>- Multiple density insert, direct formed, compression molded to patient’s foot without external heat source.</td>
</tr>
<tr>
<td></td>
<td>- Multiple density insert, custom fabricated and custom-molded from model of patient's foot.</td>
</tr>
<tr>
<td></td>
<td>- Depth inlay shoes.</td>
</tr>
<tr>
<td></td>
<td>- Modifications if an additional insert is not provided.</td>
</tr>
</tbody>
</table>
PA is required for:
- Medical need beyond the Standards of Coverage.
- Replacement within one year.
- Quantity beyond established limits.
- Custom-fabricated shoes and other inserts not included above.

### Payment Rules
All items are considered purchase only.

### 2.12 Enclosed Bed Systems

<table>
<thead>
<tr>
<th>Definition</th>
<th>An Enclosed Bed System includes the mattress, bed frame, and enclosure as one unit.</th>
</tr>
</thead>
</table>
| Standards of Coverage | An Enclosed Bed System may be covered if the following applies:  
- There is a diagnosis/medical condition (e.g., seizure activity) which could result in injury in a standard bed, crib, or hospital bed; and  
- There are no economic alternatives to adequately meet the beneficiary's needs. |
| Documentation | The documentation must be less than six months old and include:  
- Diagnosis/medical condition requiring use of the bed and any special features (if applicable).  
- Safety issues resulting from the medical condition and related to the need for an Enclosed Bed System.  
- Other products or safety methods already tried without success (e.g., bumper pads/rails).  
- Type of bed requested.  
- Type of special features requested, if applicable. |
| Noncovered Conditions | Enclosed Bed Systems are not covered when the purpose is to restrain the beneficiary due to behavioral conditions, caregiver need or convenience, etc. |
| PA Requirements | PA is required for all Enclosed Bed Systems. |
| Payment Rules | The Enclosed Bed System is considered a purchase only item.  
For Youth Beds, refer to the Hospital Beds subsection of this chapter. |

### 2.13 Enteral Nutrition

Enteral nutrition is nutrition administered by tube or orally into the gastrointestinal tract. Enteral nutrition is classified into categories that possess similar characteristics. Categories for enteral nutrition are listed by HCPCS codes on the MDHHS Medical Supplier/DME/Prosthetics and Orthotics Fee Schedule on the MDHHS website. For the appropriate HCPCS code, products are listed on the enteral nutrition product classification list on the website for the Medicare Pricing, Data Analysis and Coding (PDAC) contractor. If the formula is not listed in the covered HCPCS codes, the provider must contact the PDAC contractor for a coding determination. (Refer to the Directory Appendix for website and contact information.)
### 2.13.A. **ENTERAL NUTRITION (ADMINISTERED ORALLY)**

| Standards of Coverage | Enteral nutrition (administered orally) may be covered for beneficiaries **under the age of 21** when:
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• A chronic medical condition exists resulting in nutritional deficiencies, and a three-month trial is required to prevent gastric tube placement; or</td>
</tr>
<tr>
<td></td>
<td>• Supplementation to regular diet or meal replacement is required, and the beneficiary's weight-to-height ratio has fallen below the fifth percentile on standard growth grids; or</td>
</tr>
<tr>
<td></td>
<td>• Physician documentation details low percentage increase in growth pattern or trend directly related to the nutritional intake and associated diagnosis/medical condition.</td>
</tr>
</tbody>
</table>

**For CSHCS coverage,** a nutritionist or appropriate pediatric subspecialist must indicate that long-term enteral supplementation is required to eliminate serious impact on growth and development.

For Healthcare Common Procedure Coding System (HCPCS) code B4162, the beneficiary must have a specified inherited disease of metabolism identified by the International Classification of Diseases (ICD).

For beneficiaries **age 21 and over:**

- The beneficiary must have a medical condition that requires the unique composition of the formula nutrients that the beneficiary is unable to obtain from food; or
- The nutritional composition of the formula represents an integral part of treatment of the specified diagnosis/medical condition; or
- The beneficiary has experienced significant weight loss.

For Healthcare Common Procedure Coding System (HCPCS) code B4157, the beneficiary must have a specified inherited disease of metabolism identified by the International Classification of Diseases (ICD).

<table>
<thead>
<tr>
<th>Documentation</th>
<th>Documentation must be less than 30 days old and include:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• Specific diagnosis/medical condition related to the beneficiary's inability to take or eat food.</td>
</tr>
<tr>
<td></td>
<td>• Duration of need.</td>
</tr>
<tr>
<td></td>
<td>• Amount of calories needed per day.</td>
</tr>
<tr>
<td></td>
<td>• Current height and weight, as well as change over time. (For beneficiaries under 21, weight-to-height ratio.)</td>
</tr>
<tr>
<td></td>
<td>• Specific prescription identifying levels of individual nutrient(s) that is required in increased or restricted amounts.</td>
</tr>
<tr>
<td></td>
<td>• List of economic alternatives that have been tried.</td>
</tr>
</tbody>
</table>

For continued use beyond 3-6 months, **the CSHCS Program requires** a report from a nutritionist or appropriate pediatric subspecialist.
PA Requirements

PA is required for all enteral formula for oral administration.

The following HCPCS codes require authorization via a telephone authorization process:

<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>B4034</td>
<td>B4035</td>
<td>B4036</td>
<td>B4081</td>
<td>B4082</td>
<td>B4083</td>
</tr>
<tr>
<td>B4087</td>
<td>B4088</td>
<td>B4102</td>
<td>B4149</td>
<td>B4150</td>
<td>B4152</td>
</tr>
<tr>
<td>B4153</td>
<td>B4154</td>
<td>B4155</td>
<td>B4157</td>
<td>B4158</td>
<td>B4159</td>
</tr>
<tr>
<td>B4160</td>
<td>B4161</td>
<td>B4162</td>
<td>B9002</td>
<td>B9998</td>
<td></td>
</tr>
</tbody>
</table>

Refer to the Directory Appendix for Telephone Prior Authorization Contractor information.

2.13.B. ENTERAL NUTRITION (ADMINISTERED BY TUBE)

Standards of Coverage

Enteral formula are covered when the diagnosis/medical condition requires placement of a gastric tube and nutrition is administered by syringe, gravity, or pump.

Documentation

Documentation must be less than 30 days old and include:

- Specific diagnosis/medical condition requiring tube feeding.
- Duration of treatment.
- Amount needed per day.
- If a pump is required, the medical reason why syringe or gravity method could not be used.

PA Requirements

PA is not required for standard formula for enteral tube feedings provided up to the program's established quantity limits per month. (Applies only to specific enteral formula and related supplies and equipment. Refer to the Medicaid Code and Rate Reference tool for additional information.)

PA is required for the following:

- All specialized enteral formula requests for tube feedings.
- Over-quantity requests for standard formula enteral tube feedings.
- Medical need beyond Standards of Coverage.

The following HCPCS codes require authorization via a telephone authorization process:

<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>B4034</td>
<td>B4035</td>
<td>B4036</td>
<td>B4081</td>
<td>B4082</td>
<td>B4083</td>
</tr>
<tr>
<td>B4087</td>
<td>B4088</td>
<td>B4102</td>
<td>B4149</td>
<td>B4150</td>
<td>B4152</td>
</tr>
<tr>
<td>B4153</td>
<td>B4154</td>
<td>B4155</td>
<td>B4157</td>
<td>B4158</td>
<td>B4159</td>
</tr>
<tr>
<td>B4160</td>
<td>B4161</td>
<td>B4162</td>
<td>B9002</td>
<td>B9998</td>
<td></td>
</tr>
</tbody>
</table>

Refer to the Directory Appendix for Telephone Prior Authorization Contractor information.
2.13.C. ENTERAL NUTRITION PAYMENT RULES

When billing for enteral formula (administered orally or by tube), the appropriate formula HCPCS code should be billed on a monthly basis with total calories used (divided by 100) as the unit amount. (To calculate the appropriate number of caloric units, combine total calories of all cans to be used and divide by 100.) Medicaid will reimburse for a maximum quantity of up to 900 units for any combination of approved formula.

Providers should refer to the following chart for additional assistance:

<table>
<thead>
<tr>
<th>Formula</th>
<th>100 calories = 1 unit (u)</th>
<th>6 (8 oz) cans a day</th>
<th>1 month = 30 days</th>
<th>6 months = 180 days</th>
<th>$5.00 cost/ 8 oz liquid or packet or can</th>
</tr>
</thead>
<tbody>
<tr>
<td>Standard @ 250 calories/8 oz</td>
<td>250 cals/100 = 2.5 units</td>
<td>2.5 u x 6 = 15 units a day</td>
<td>15 u x 30 = 450 units a month</td>
<td>15 u x 180 = 2700 units for 6 months</td>
<td>$5.00 ÷ 2.5 u = $2.00 per unit</td>
</tr>
<tr>
<td>Caloric Dense @ 355 calories/8 oz</td>
<td>355 cals/100 = 3.55 units</td>
<td>3.55 u x 6 = 21 units a day</td>
<td>21 u x 30 = 630 units a month</td>
<td>21 u x 180 = 3780 units for 6 months</td>
<td>$5.00 ÷ 3.55 u = $1.41 per unit</td>
</tr>
<tr>
<td>Powder, 1 package = 150 calories</td>
<td>150 cals/100 = 1.5 units</td>
<td>1.5 u x 6 = 9 units a day</td>
<td>9 u x 30 = 270 units a month</td>
<td>9 u x 180 = 1620 units for 6 months</td>
<td>$5.00 ÷ 1.5 u = $3.33 per unit</td>
</tr>
<tr>
<td>Powder, 1# can = 112 oz when mixed @ 20 calories/oz* = 2240 calories for the entire can (*can vary with physician orders)</td>
<td>2240 cals/100 = 22.4 units</td>
<td>6 cans per month = 22.4 u x 6 = 134 units a month</td>
<td>134 u x 6 months = 804 units for 6 months</td>
<td>$5.00 ÷ 22.4 u = $0.30 per unit</td>
<td></td>
</tr>
</tbody>
</table>

The necessary equipment and supply code for enteral tube feedings should be billed up to specified quantity limits. Feeding bags, anchoring devices, syringes, drain sponges, cotton tip applicators, tape, adaptors, and connectors used in conjunction with a gastrostomy or enterostomy tube are included in the supply kit codes and should not be billed separately.

Dietary formula for oral feedings may be obtained from either a medical supplier or a pharmacy.

Dietary formula for tube feedings are covered only through the medical supplier.
### 2.14 EXTERNAL INFUSION (INSULIN) PUMP AND RELATED SUPPLIES

<table>
<thead>
<tr>
<th><strong>Definition</strong></th>
<th>Insulin pumps deliver a constant and continuous infusion of insulin, driven by mechanical force, into the subcutaneous space via a needle or soft cannula.</th>
</tr>
</thead>
</table>
| **Standards of Coverage** | Insulin pumps are covered when other methods to control blood glucose levels have been ineffective and one of the following applies:  
  ▪ Blood glucose levels demonstrate poor glycemic control despite monitoring at least four times per day and multiple daily insulin injections with a persistently elevated glycosylated hemoglobin level greater than seven percent.  
  ▪ There is a history of severe glycemic excursions, brittle diabetes, hypoglycemic/hyperglycemic reaction, nocturnal hypoglycemia, any extreme insulin sensitivity, and/or very low insulin requirements.  
  ▪ There is evidence of the "dawn" phenomenon where fasting blood glucose level often exceeds 200 mg/dl. |
| **Documentation** | Documentation must be less than 90 days old and include:  
  ▪ Diagnosis/medical condition pertaining to the need for the pump.  
  ▪ Lab values of blood glucose levels.  
  ▪ Medical history documenting the need for the pump.  
  ▪ Any medical complications experienced by the beneficiary related to the need for blood glucose monitoring.  
  
  **CSHCS requires** a prescription from an appropriate pediatric subspecialist. |
| **PA Requirements** | PA is not required if the Standards of Coverage are met, and:  
  ▪ The beneficiary is over the age of 16 and has one of the diagnoses indicated below:  
    ▪ Diabetes Mellitus without Complication  
    ▪ Diabetes with Ketoacidosis  
    ▪ Diabetes with Hyperosmolarity  
    ▪ Diabetes with Other Coma  
    ▪ Diabetes with Renal Manifestations  
    ▪ Diabetes with Ophthalmic Manifestations  
    ▪ Diabetes with Neurological Manifestations  
    ▪ Diabetes with Peripheral Circulatory Disorders  
    ▪ Diabetes with Other Specified Manifestations  
    ▪ Diabetes with Unspecified Complication  
    ▪ Diabetes Mellitus Complicating Pregnancy  
  ▪ The beneficiary is under the age of 16, has one of the diagnoses above, and the pump is ordered by a pediatric endocrinologist. |
2.15 HIGH FREQUENCY CHEST WALL OSCILLATION DEVICE

**Definition**
A high frequency chest wall oscillation (HFCWO) system is an airway clearance device consisting of an inflatable vest connected by two tubes to a small air-pulse generator that is easy to transport. The air-pulse generator rapidly inflates and deflates the vest, gently compressing and releasing the chest wall to create mini-coughs that dislodge mucus from the bronchial walls, increase mobilization, and facilitates it along toward central airways.

**Standards of Coverage**
A HFCWO system may be covered up to four months if both of the following apply:
- Diagnosis of Cystic Fibrosis, and
- All other treatment modalities have not been effective.

**Documentation**
Documentation must be less than 180 days old and include:
- Diagnosis pertaining to the need for this unit.
- Severity of condition (e.g., frequency of hospitalizations, pulmonary function tests, etc.).
- Current treatment modalities and others already tried.
- Plan of care by the attending Cystic Fibrosis (CF) Center specialist substantiating need for the device is **required under the CSHCS Program**.
- For continuation beyond the initial four months, the following information must be provided:
  - Documentation of client compliance through the review of equipment use logs; and
  - Medical statement from a CF Center Specialist substantiating the continued effectiveness of the vest is **required under the CSHCS program**.

**PA Requirements**
PA is required for all requests.
### Payment Rules

The HFCWO system chest compression generator system is considered a **capped rental** item and is inclusive of the following:

- All accessories necessary to use the equipment except for the vest itself. This may be separately reimbursed during the initial rental period.
- Education on the proper use and care of the equipment.
- Routine servicing and all necessary repairs and replacements to make the equipment functional.

### 2.16 Home Intravenous Infusion Therapy

#### Definition

Intravenous infusion therapy, administered in the home, is medicine injected directly into a vein.

#### Standards of Coverage

Coverage of home infusion therapy, its expected course, and duration of treatment is based on the plan of care prescribed by the physician. Only the days involving active infusion will be considered for payment. The medical supplier facilitating the administration of home infusion therapy must:

- Be accredited through The Joint Commission or other appropriate accrediting body.
- Maintain logs detailing proper equipment maintenance consistent with manufacturer’s requirements.
- Provide education and training to the beneficiary or caregiver related to proper care techniques.
- Provide comprehensive care coordination involving the pharmacist, nurses, physician or any other infusion therapy professional.

#### Documentation

Documentation must be less than 30 days old and include the following:

- Diagnosis appropriate for specified therapy
- Dosage, frequency, route and duration of medication(s) being infused
Documentation for **antibiotic, antiviral and/or antifungal therapies** must include at least one of the following tests results to support the diagnosis:

- Positive culture from appropriate site (e.g., a blood culture for diagnosis of sepsis, wound culture for diagnosis osteomyelitis, etc.)
- Bone scan showing osteomyelitis
- X-ray showing osteomyelitis or abscess ECHO/ultrasound showing endocarditis
- Vegetations or abscess
- CT or MRI scan showing osteomyelitis or abscess
- Minimum of three of the following:
  - Fever of 101°F or more, pain, warmth, redness, edema in affected area
  - Elevated C-reactive protein
  - Elevated white blood cell count
  - Elevated erythrocyte sedimentation rate (ESR)
  - A trial course of oral antibiotic therapy with no improvement or worsening of symptoms
- For the diagnoses of cellulitis, pneumonia, urinary tract infection, and otitis media, documentation must indicate a failure of oral antibiotic therapy, unless a culture shows bacteria that is not sensitive to oral antibiotic medications available. This does not apply to cystic fibrosis pneumonia; PA is not needed with a positive sputum culture or a history of positive sputum cultures.

Documentation for **electrolyte replacement therapy (condition unrelated to hydration status)** must include a copy of the appropriate abnormal laboratory level (e.g., low potassium level for diagnosis hypokalemia, etc.).

Documentation for **steroid therapy** must indicate exacerbation of multiple sclerosis or diagnosis related to transplant rejections.

Documentation for **chemotherapy and pain management therapy** must include a cancer diagnosis and a copy of the treatment protocol to which the beneficiary has been assigned.

Documentation for **hydration therapy for hyperemesis gravidarium** must include laboratory results indicating current dehydration level, estimated delivery date, and must address a trial of anti-emetics.

Documentation for **gammaglobulin therapy** must include abnormal IGG, IGM, IGA or IGE levels prior to the beneficiary receiving an IVIG. If beneficiary has been receiving IVIG infusion therapy in an outpatient or physician office setting, these laboratory tests may not be current.

Documentation for **iron overload therapy** must indicate a diagnosis of Sickle Cell Anemia and support the need for the requested therapy.

Documentation for **factor products** must indicate a clotting disorder diagnosis and support the need for requested therapy.

Documentation for **anti-emetic infusion** must indicate a diagnosis of cancer or hyperemesis gravidarum and include a trial of oral anti-emetics.
The provider must keep verification of equipment maintenance on file that includes:

- Name of the manufacturer.
- Dates the equipment was checked for proper use, care and function according to the manufacturer's requirements.

### PA Requirements

PA is not required for specific HCPCS "S" codes if all of the following apply:

- Standards of Coverage are met
- Beneficiary is age five or older (for factor products, beneficiaries of all ages)
- Medical need for the therapy is related to one of the diagnoses/conditions that do not require PA. (For details regarding covered HCPCS "S" codes, PA requirements and related ICD diagnosis exception code ranges, and quantity limits, refer to the Medicaid Code and Rate Reference tool.

PA is required for the following:

- Medical need beyond the Standards of Coverage.
- The beneficiary is under the age of five.
- Infusion days exceed the established Medicaid limits.

When PA is required, the following HCPCS codes are authorized via a telephone authorization process:

<table>
<thead>
<tr>
<th>S5498</th>
<th>S5501</th>
<th>S5502</th>
<th>S5520</th>
</tr>
</thead>
<tbody>
<tr>
<td>S5521</td>
<td>S9326</td>
<td>S9327</td>
<td>S9330</td>
</tr>
<tr>
<td>S9331</td>
<td>S9338</td>
<td>S9345</td>
<td>S9346</td>
</tr>
<tr>
<td>S9348</td>
<td>S9351</td>
<td>S9355</td>
<td>S9374</td>
</tr>
<tr>
<td>S9375</td>
<td>S9376</td>
<td>S9377</td>
<td>S9379</td>
</tr>
<tr>
<td>S9490</td>
<td>S9497</td>
<td>S9500</td>
<td>S9501</td>
</tr>
<tr>
<td>S9502</td>
<td>S9503</td>
<td>S9504</td>
<td>S9537</td>
</tr>
</tbody>
</table>

Refer to the Directory Appendix for Telephone Prior Authorization Contractor information.
Payment Rules

Reimbursement for the HCPCS "S" codes related to home intravenous infusion therapy is calculated on a per diem basis as defined by the code descriptions.

Costs included within the per diem rate:

- All infusion related supplies and equipment, such as the infusion pump, needles, syringes, gauze, sterile tubing, catheters, etc. (For pump-related infusion, the per diem rate payment includes routine servicing and all necessary repairs or replacements to make the rented DME functional.)
- The compounding of medications compliant with standards of pharmaceutical practice, including a medication profile set-up with recommendations of dosage or medication changes if needed.
- Patient educational activities related to receiving home infusion therapy and the coordination of care with physicians, nurses and other caregivers.

Costs not associated with the per diem rate:

- Medications (drugs) must be billed as pharmacy services.
- Nursing visits are covered through a Home Health Agency.
- PICC and Midline insertion procedures and associated supplies may be billed separately.

HCPCS "S" codes must be reported as a daily rate by reporting the total number of days used as units unless otherwise noted. Routine catheter care is included within the daily rate for the active infusion. For interim maintenance of an infusion line not currently in use, report the appropriate catheter care code and bill as a daily rate by reporting the total number of days used as units. For catheter maintenance of an implanted port, bill the appropriate HCPCS code with modifier "22". Details regarding the type and frequency of catheter maintenance completed must be reported in the Remarks area of the claim.

If multiple drugs are being administered concurrently for the same therapy, report modifier "SH" for two drugs or "SJ" for three or more drugs. If multiple therapies are needed, more than one therapy code may be reported.

For chemotherapy and pain management, the specific HCPCS code will designate either continuous or intermittent administration. If the therapy is provided without interruption for 24 hours or more, report the continuous therapy code. For less than 24 hours of therapy, use the intermittent code.

For antibiotic, antiviral, or antifungal therapy, report the code that best describes the frequency of administration. Only one therapy code of this series may be reported on the same date of service. If multiple drugs are administered, report modifier "SH" or "SJ".

With the administration of Medicare Part D drug(s) to dual eligibles (Medicaid/Medicare), report the appropriate HCPCS "S" code for medical supplies and/or equipment (e.g., IV poles, tubing) associated with home intravenous infusion therapy. For dual eligibles residing in a nursing facility, the equipment and supplies are part of the facility's per diem rate.
### 2.17 HOME UTERINE ACTIVITY MONITOR

<table>
<thead>
<tr>
<th><strong>Definition</strong></th>
<th>A home uterine activity monitor (HUAM) is used to record the frequency of uterine contractions for the purpose of predicting pre-term delivery. The monitor is worn on a belt and records the uterine contractions that are transmitted across modem lines to a central monitoring office that contacts the physician’s office for interpretation.</th>
</tr>
</thead>
</table>
| **Standards of Coverage** | A HUAM may be covered for up to 90 days in the home setting for a beneficiary at high risk for pre-term delivery during the 24th through the 36th gestational week, and one of the following medical conditions applies:  
- Pre-term labor on tocolytics.  
- History of pre-term labor or delivery in previous pregnancies.  
- Incompetent cervix (cerclage). |
| **Documentation** | Documentation must be less than 90 days old and include:  
- Diagnosis and/or medical condition pertaining to the need for the monitor.  
- Expected date of birth.  
- Last day of the 36th week of gestation.  
- Involvement with a regional perinatal center. |
| **PA Requirements** | PA is required for all monitors.  
HCPCS code S9001 requires authorization via a telephone prior authorization process. (Refer to the Directory Appendix for Telephone Prior Authorization Contractor information.) |
| **Payment Rules** | A HUAM is a **rental only** item and is inclusive of the following:  
- The monitor and other related supplies required to use the equipment properly.  
- Education on proper use and care of the equipment.  
- Routine servicing and all necessary repairs or replacements to make the unit functional.  
- Periodic downloading and interpretation of the data.  
- Perinatal nursing services related to oversight of the use of the monitor.  
To provide a HUAM, the medical supplier must complete the CHAMPS Provider Enrollment (PE) on-line application process, selecting a subspecialty of Home Uterine Monitor. (Refer to the Directory Appendix for CHAMPS PE information.) |
### 2.18 Hospital Beds

<table>
<thead>
<tr>
<th>Definition</th>
<th>A hospital bed has a special construction, consisting of a frame and an innerspring mattress, with a head and/or leg elevation adjustment mechanism for the purpose of repositioning.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Standards of Coverage</td>
<td>A standard hospital bed may be covered if:</td>
</tr>
<tr>
<td></td>
<td>- The diagnosis/medical condition requires a specific elevation or positioning of the body not possible with a standard bed (elevation of 30 degrees or greater).</td>
</tr>
<tr>
<td></td>
<td>- The body requires positioning in a hospital bed to alleviate pain.</td>
</tr>
<tr>
<td></td>
<td>For other beds, the above Standards of Coverage must be met, and one of the following applies:</td>
</tr>
<tr>
<td></td>
<td>- <strong>Variable height hospital bed</strong> may be covered if different heights are medically necessary for assisting beneficiary transfers from the chair, wheelchair or standing position.</td>
</tr>
<tr>
<td></td>
<td>- <strong>Heavy-duty extra-wide hospital bed</strong> may be covered if a beneficiary weighs more than 350 pounds but does not exceed 600 pounds.</td>
</tr>
<tr>
<td></td>
<td>- <strong>Extra heavy-duty bed</strong> may be covered if a beneficiary weighs more than 600 pounds.</td>
</tr>
<tr>
<td></td>
<td>- A <strong>fully electric hospital bed</strong> may be covered when frequent and/or immediate changes in body position are required and there is no caregiver.</td>
</tr>
<tr>
<td></td>
<td>- A <strong>Youth bed</strong> may be covered if the beneficiary is under the age of 21 and the bed is required to have crib style side rails.</td>
</tr>
</tbody>
</table>

### Hospital Bed Accessories

- The **trapeze bar** may be covered when required by the beneficiary to assist with transfers or frequent changes in body position.
- **Side rails** are covered when required for safety.
- A **replacement innerspring** mattress or foam rubber mattress may be covered when the beneficiary owns the bed.

### Noncovered Condition

Youth beds are not covered for the sole purpose of age appropriateness.

### Documentation

Documentation must be less than 90 days old and include the following:

- Diagnosis/medical condition related to the service requested.
- Medical and/or functional reasons for the specific type of hospital bed and/or accessory.
- Any alternatives tried or ruled out.
### PA Requirements

PA is not required if the Standards of Coverage are met and the following applies:

- For fixed height, variable height, semi-electric beds, side rail, and trapeze for one of the following diagnoses/medical conditions:
  - Multiple Sclerosis
  - Infantile Cerebral Palsy
  - Congenital or Hereditary Progressive Muscular Dystrophy
  - Fracture of the Cervical or Dorsal Areas (open or closed)
- Procedure codes E0255, E0256, E0260, E0292, E0293, E0910, E0940 up to three months for hospital discharge when required for diagnoses not removed from PA.

PA is required for:

- Medical need beyond the Standards of Coverage.
- Full electric beds or any other hospital beds and/or accessories requiring PA as specified in the Medicaid Code and Rate Reference tool.
- Replacement of a fixed height, variable height, or semi-electric bed and/or accessory within five years.

### Payment Rules

A bed may be a **capped rental** or **purchase** item.

If unit is billed as a capped rental, the rental payment would be inclusive of the following:

- All accessories needed to use the equipment except for trapezes, side rails, and mattresses where appropriate.
- Education on the proper use and care of the equipment.
- Routine servicing and all necessary repairs or replacements to make the unit functional.

### 2.19 INCONTINENT SUPPLIES

#### Definition

Incontinent supplies are items used to assist individuals with the inability to control excretory functions.

The type of coverage for incontinent supplies may be dependent on the success or failure of a bowel/bladder training program. A bowel/bladder training program is defined as instruction offered to the beneficiary to facilitate:

- Independent care of bodily functions through proper toilet training.
- Appropriate self-catheter care to decrease risk of urinary infections and/or avoid bladder distention.
- Proper techniques related to routine bowel evacuation.
Standards of Coverage (Not Applicable to CSHCS Only Beneficiaries)

**Diapers, incontinent pants, liners, and belted/unbelted undergarments without sides** are covered for individuals age three or older if both of the following applies:

- A medical condition resulting in incontinence and there is no response to a bowel/bladder training program.
- The medical condition being treated results in incontinence, and beneficiary would not benefit from or has failed a bowel/bladder training program.

**Pull-on Briefs** are primarily considered a short-term transitional product for beneficiaries with a medical condition causing incontinence of bowel and/or bladder.

**Pull-on brief coverage for ages 3 through 20:**

Pull-on briefs are covered when there is the presence of a medical condition causing bowel/bladder incontinence and one of the following applies:

- **For short term use:** The beneficiary is actively participating in a bowel/bladder training plan and is demonstrating consistent measurable progress in the plan (i.e., consistent reduction in the amount of pull-on briefs used, successful completion of the bowel/bladder training in three years or less, etc.); or
- **For long term use:** The beneficiary has a permanent medical condition (such as Muscular Dystrophy, Spina Bifida, etc.) that will prevent the beneficiary from ever achieving bowel and bladder continence; however, the beneficiary has the cognitive and physical ability to care for his/her toileting needs independently or with minimal assistance.

**Bowel/Bladder Training Plan**

A bowel/bladder training plan must be designed and implemented within the school and home environments in order to achieve optimum success.

**Initial Nursing Assessment and Reassessment**

The use of pull-on briefs requires an initial nursing assessment and reassessment every six months thereafter or a time determined by the Michigan Department of Health and Human Services (MDHHS). Reassessments must detail measurable progress the beneficiary has made in the training plan since the last assessment. Long-term use requires an initial nursing assessment and reassessment every 24 months thereafter or a time determined by MDHHS. Documentation of the initial nursing assessment and reassessment(s) must be kept in the beneficiary file.

If the beneficiary no longer has a medical condition causing bowel/bladder incontinence and he/she has not achieved continence within three years of the start of the bowel/bladder training program, the pull-on briefs will no longer be a covered benefit.

**Pull-on brief coverage for ages 21 and older:**

Pull-on briefs are covered when there is the presence of a medical condition causing bowel/bladder incontinence and the beneficiary is able to care for his/her toileting needs independently or with minimal assistance from a caregiver and one of the following applies:

- **For short term use:** The beneficiary has a temporary medical condition (including recent discharge from a nursing home or hospital) causing bowel/bladder incontinence; or
For long term use: The beneficiary has a permanent medical condition (such as Muscular Dystrophy, Spina Bifida, etc.) that will prevent the beneficiary from ever achieving bowel and bladder continence.

Initial Nursing Assessment and Reassessment

The use of pull-on briefs requires an initial nursing assessment. Reassessment is required whenever there is a prior authorization request for a change in quantity or a medical condition resulting in continued need beyond established policy timelines. Recent discharge from a nursing home or hospital is considered a qualifying condition for short-term use of pull-on briefs. Beneficiaries with medical conditions which result in permanent incontinence or who have product needs over established policy quantities must be re-assessed every 12 months or a time determined by MDHHS. Documentation of the initial nursing assessment and reassessment(s) must be kept in the beneficiary file.

Pull-on briefs are not covered for the following:

- Beneficiaries under 3 years of age.
- A medical condition causing incontinence of bowel/bladder is not present.
- For children who have an occasional bowel or bladder accident.
- Night time incontinence of bowel or bladder.

Incontinent wipes are covered when necessary to maintain cleanliness outside of the home.

Disposable underpads are covered for beneficiaries of all ages with a medical condition resulting in incontinence.

Standards of Coverage (Applicable to All Programs)

Intermittent catheters are covered when catheterization is required due to severe bladder dysfunction. Hydrophilic-coated intermittent catheters are considered for individuals that have Mitrofanoff stomas, partial stricture or small, tortuous urethras.

Intermittent catheters with insertion supplies are covered for beneficiaries who have a chronic urinary dysfunction for which sterile technique is clinically required.

Documentation

Documentation must be less than 30 days old, kept in the beneficiary file, and include the following:

- Diagnosis of condition causing incontinence (primary and secondary diagnosis).
- Item to be dispensed.
- Duration of need.
- Quantity of item and anticipated frequency the item requires replacement.

In addition to the above documentation requirements, pull-on briefs require the following:

- An initial nursing assessment for all ages, regardless of whether the pull-on briefs will be used short or long term.
- A six-month reassessment is required for under 21 years of age or a time determined by MDHHS.
If the beneficiary has a medical condition that results in permanent incontinence, reassessment is required annually or a time determined by MDHHS.

For under age 21 and attending school, a copy of the teacher's continence report or a letter from the school detailing the bowel/bladder plan. The reassessment must have a copy of the teacher's plan or school letter detailing any changes to the plan and progress made since the last assessment.

**PA Requirements**

PA is required for:
- Hydrophilic type urinary catheters.
- Usage over the established quantities.

PA is not required for all other incontinent items unless usage exceeds established quantity limitations.

**Payment Rules**

**Volume Purchase Agreement** - Through a competitive bid process, the State of Michigan has contracted with a volume purchase contractor for selected incontinent supplies for beneficiaries enrolled in Medicaid FFS and CSHCS.

**Beneficiaries Exempt from the MDHHS Volume Purchase Contract** - Based on dual eligibility, specific beneficiaries may be exempt from obtaining services from the MDHHS Volume Purchase Contractor as described below:
- Beneficiaries dually enrolled in Medicaid and Medicare are not required to obtain Medicare-covered incontinence items from the contractor but may choose to if preferred.
- Beneficiaries enrolled in a MHP will receive coverage of these products through the medical supplier contracted by the health plan. This medical supplier could be the Contractor if negotiated by the MHP.
- Beneficiaries enrolled in either a commercial FFS plan or HMO if its coverage includes incontinence supplies are expected to follow the primary payer's rules first. If these products are not covered by the plan, the beneficiary must obtain these items through the MDHHS Volume Purchase Contractor.

**Services Covered Through the Contract**

The following list details the selected incontinent supply items that must be obtained from the MDHHS Volume Purchase Contractor for Medicaid and CSHCS Programs. Beneficiaries dually eligible for Medicaid and Medicare are required to obtain the contracted incontinent items (designated with an X) from the MDHHS Volume Purchase Contractor.

### 2.20 Lifts (Hydraulic and Electric)

<table>
<thead>
<tr>
<th><strong>Definition</strong></th>
<th>Lifts include, but are not limited to, hydraulic and electric, and accessories include slings and/or seats.</th>
</tr>
</thead>
</table>

| **Standards of Coverage** | A standard hydraulic lift may be covered when the beneficiary requires assistance in transfers, provision of the lift will allow the beneficiary to be transferred safely, and one of the two conditions stated below are met:  
• The beneficiary requires a one-person assist but the weight or size of the beneficiary prohibits safe transfers or could cause harm to the caregiver.  
• The beneficiary requires a two-person assist and there are not two caregivers in the home.  
An electric lift may be covered when the above Standards of Coverage are met and the hydraulic lift cannot be used safely or when the beneficiary's medical condition results in increased tone (e.g., spasticity). |
|--------------------------|--------------------------------------------------------------------------------------------------|

| **Documentation** | Documentation must be less than 90 days old and include the following:  
• Diagnosis/condition requiring use of the lift.  
• Functional level of assistance required to complete activities of daily living (ADLs).  
• Type of transfer required.  
• Weight and height of the beneficiary.  
• Type of lift requested.  
• An occupational or physical therapy evaluation and recommendation.  
• Number of caregivers in the home and number of hours during the 24-hour period that each caregiver is present. |
|-------------------|--------------------------------------------------------------------------------------------------|

| **PA Requirements** | PA is not required if Standards of Coverage are met for:  
• Hydraulic lifts  
• Replacement slings or seats  
PA is required for:  
• Electric lifts  
• Replacement within ten years |
|--------------------|--------------------------------------------------------------------------------------------------|

| **Payment Rules** | A lift may be a **capped rental** or **purchase** item.  
If unit is billed as a capped rental, the rental payment would be inclusive of the following:  
• All accessories needed to use the equipment.  
• Education on the proper use and care of the equipment.  
• Routine servicing and all necessary repairs or replacements to make the unit functional. |
|-------------------|--------------------------------------------------------------------------------------------------|
### 2.21 Mechanical In-Exsufflation Device

<table>
<thead>
<tr>
<th>Definition</th>
<th>A mechanical in-exsufflation device is a portable electric device that utilizes a blower and a valve to alternately apply a positive and then a rapid negative pressure to an individual’s airway to assist the person to cough more effectively.</th>
</tr>
</thead>
</table>
| Standards of Coverage | A mechanical in-exsufflation device may be covered for up to four months if the following applies:  
- Diagnosis of respiratory failure due to neuromuscular deficits.  
- Beneficiary is unable to cough or clear secretions effectively due to reduced peak expiratory force.  
- Other treatment modalities have not been effective (e.g., inhalers, PEP mask therapy, or flutter devices).  
For coverage beyond four months, continued use of a mechanical in-exsufflation device may be covered when there is continued effectiveness. |
| Documentation | Documentation must be less than 180 days old and include the following:  
- Diagnosis/medical condition related to the service requested.  
- Current treatment modalities and any others already tried.  
- Documentation of beneficiary’s ability to use.  
- Plan of care from a pulmonologist substantiating need for this device is **required under the CSHCS program**.  
- For coverage beyond the first four months, medical statement substantiating continued effectiveness. |
| PA Requirements | PA is required for all requests. |
| Payment Rules | A mechanical in-exsufflation device is a **capped rental** item and is inclusive of the following:  
- All accessories needed to use the unit (e.g., circuits, filters etc.).  
- Education on the proper use and care of the equipment.  
- Routine servicing and all necessary repairs or replacements to make the unit functional. |

### 2.22 Nebulizer

| Definition | A nebulizer is a powered device that allows a medication to be changed from a liquid to a mist so it may be effectively inhaled into the lungs. Types of nebulizers include, but are not limited to, standard and ultrasonic. |
### Standards of Coverage

A **standard nebulizer** device may be covered if:

- The beneficiary has a diagnosis related to an obstructive airway disease (e.g., asthma, bronchopulmonary dysplasia, chronic obstructive pulmonary disease [COPD], etc.).
- The physician has already considered use of a metered dose inhaler and it was insufficient to meet the needs of the beneficiary.

An **ultrasonic nebulizer** is covered when a standard nebulizer is ineffective.

### Documentation

Documentation must be less than 90 days old and include the following:

- Diagnosis/condition requiring use of the nebulizer.
- Medications prescribed.
- Frequency of administration.
- Medical reason economic alternatives are ineffective.
- For an ultrasonic nebulizer, pulmonary function testing done after use of a standard nebulizer and after use of an ultrasonic nebulizer showing the ultrasonic is more efficacious.

### PA Requirements

PA is not required if Standards of Coverage are met for standard nebulizer and associated accessories up to established quantity limits.

PA is required for:

- Ultrasonic nebulizer.
- Replacement of standard nebulizer within five years.
- When the Standards of Coverage are not met.

### Payment Rules

A nebulizer is considered either a **capped rental** or **purchase** item. Accessories are separately reimbursable.

If the unit is billed as a capped rental, the rental payment would be inclusive of the following:

- Education on the proper use and care of the equipment.
- Routine servicing and all necessary repairs or replacements to make the unit functional.

---

### 2.23 Negative Pressure Wound Therapy (Pump and Accessories)

#### Definition

Negative pressure wound therapy (NPWT) utilizes a sub-atmospheric (negative) pressure technique to reduce edema, increase localized blood flow and granulation tissue formation, and remove exudates from the wound. The NPWT pump must be able to apply pressure intermittently or continuously in a range from 25 - 125 mm HG and accommodate multiple wounds.
| **Standards of Coverage** | Negative pressure wound therapy is covered for short-term therapy (7 to 14 days) if one of the following conditions applies and failure of several less expensive treatment modalities has occurred:  
- Stage III or IV pressure ulcer(s) -  
  - Beneficiary has been part of a comprehensive ulcer management program (e.g., appropriately turned and positioned, appropriately managed for either moisture or incontinence, received adequate nutritional support, etc.) for at least the last 30 days.  
  - Beneficiary has used either a Group 2 or 3 Support Surface for at least the last 30 days.  
- Diabetic Ulcers - Beneficiary has been on a comprehensive diabetic management program.  
- Venous stasis ulcers -  
  - Compression bandages have been applied consistently.  
  - Mobility and leg elevation have been encouraged.  
- Dehisced incisions or traumatic wounds - Wound care clinical protocols have been ineffective. |
| **Documentation** | All documentation, except wound measurements, must be less than 30 days old. Documentation of wound measurements must be less than seven days old and include the following:  
- Evaluation, care and wound measurements by a licensed medical professional.  
- All previous dressings tried.  
- Debridement of necrotic tissue, if applicable.  
- Evaluation and provision of adequate nutritional status.  
- Appropriate turning/repositioning schedule.  
- Incontinence management, if applicable.  
- Appropriate pressure reduction addressed if wound is pressure related. |
| **Continued Coverage** | For continued coverage beyond the initial 7 to 14 days, documentation must be submitted detailing updated wound measurements and substantiate continued effectiveness. |
| **PA Requirements** | PA is required for all requests.  
HCPCS codes A6550, A7000 and E2402 require authorization via a telephone prior authorization process. (Refer to the Directory Appendix for Telephone Prior Authorization Contractor information.) |
| **Payment Rules** | A negative pressure wound therapy pump is a rental only service. Payment for the pump is considered as a daily rental rate by reporting total number of days used as units.  
The canister and dressing set are considered purchase items and may be separately reimbursed from the pump code. |
### 2.24 Orthopedic Footwear

<table>
<thead>
<tr>
<th>Definition</th>
<th>Orthopedic footwear may include, but are not limited to, orthopedic shoes, surgical boots, removable inserts, Thomas heels, and lifts.</th>
</tr>
</thead>
</table>
| Standards of Coverage | **Orthopedic shoes and inserts** may be covered if any of the following applies:  
- Required to accommodate a leg length discrepancy of ¼ inch or greater or a size discrepancy between both feet of one size or greater.  
- Required to accommodate needs related to a partial foot prosthesis, clubfoot, or plantar fascitis.  
- Required to accommodate a brace (extra depth only are covered).  
**Surgical Boots or Shoes** may be covered to facilitate healing following foot surgery, trauma or a fracture. |
| Noncovered Items | Shoes and inserts are noncovered for the conditions of:  
- Pes Planus or Talipes Planus (flat foot)  
- Adductus metatarsus  
- Calcaneus Valgus  
- Hallux Valgus  
Standard shoes are also noncovered. |
| Documentation | Documentation must be less than 60 days old and include the following:  
- Diagnosis/medical condition related to the service requested.  
- Medical reasons for specific shoe type and/or modification.  
- Functional need of the beneficiary.  
- Reason for replacement, such as growth or medical change.  
**CSHCS requires** a prescription from an appropriate pediatric subspecialist. |
PA Requirements

PA is not required for the following items if the Standards of Coverage are met:

- Surgical boots or shoes.
- Shoe modifications, such as lifts, heel wedges, or metatarsal bar wedges up to established quantity limits.
- Orthopedic shoe to accommodate a brace.
- Orthopedic shoes and inserts when the following medical conditions are present:
  - Plantar Fascial Fibromatosis
  - Unequal Leg Length (Acquired)
  - Talipes Equinovarus (Clubfoot)
  - Longitudinal Deficiency of Lower Limb, Not Elsewhere Classified
  - Unilateral, without Mention of Complication (Partial Foot Amputation)
  - Unilateral, Complicated (Partial Foot Amputation)
  - Bilateral, without Mention of Complication (Partial Foot Amputation)
  - Bilateral, Complicated (Partial Foot Amputation)

PA is required for:

- All other medical conditions related to the need for orthopedic shoes and inserts not listed above.
- All orthopedic shoes and inserts if established quantity limits are exceeded.
- Medical need beyond the Standards of Care.
- Beneficiaries under the age of 21, replacement within six months.
- Beneficiaries over the age of 21, replacement within one year.

Payment Rules

These are purchase only items.

2.25 Orthotics (Cervical)

Definition

Cervical orthotics include, but are not limited to, cervical collars and cranial helmets.

Standards of Coverage

**Cervical collars** may be covered to facilitate healing and/or restrict mobility for the following indications:

- Pre- and post-surgery
- Pre- and post-cervical fusion
- Cervical trauma
- Post fractures
Cervical helmets may be covered to prevent head injury for beneficiaries with medical conditions affecting balance that predisposes them to fall. For the medical condition of plagiocephaly, a custom fabricated cranial remodeling orthosis is covered and must include the following:

- Proper measurements including topography, casting, etc.
- The use of a FDA registered helmet.
- All necessary follow-up visits, including fitting and adjustments, for 18 months after placement.

### Documentation

Documentation must be less than 60 days old and include the following:

- Diagnosis/medical condition related to the service requested.
- Medical reasons for appliance requested.
- Functional needs of the beneficiary.
- Reason for replacement, such as growth or medical change.
- Prescription from an appropriate pediatric subspecialist is required under the CSHCS program.

For repairs, a copy of the physician's prescription at the time of original placement and itemization of materials used to repair appliance or rationale for related labor costs must be documented.

### PA Requirements

PA is not required when the Standards of Coverage are met for:

- Cervical collars.
- Nonmolded cranial helmets.
- Molded cranial helmets for a beneficiary under the age of one year with diagnosis of plagiocephaly when prescribed by an appropriate pediatric subspecialist.
- Repairs as follows:
  - The total repair cost equals one hour of labor or less
  - The cost of minor parts equals $50 or less

PA is required for:

- Custom molded cranial helmets for conditions other than plagiocephaly.
- Replacement of a cranial nonmolded helmet or cervical collar within one year.
- Repair costs exceed the maximum limits as stated above.

### Payment Rules

These are covered as purchase only items.

## 2.26 Orthotics (Lower Extremity)

### Definition

Lower extremity orthotics includes, but is not limited to, hip, below knee, above knee, knee, ankle, and foot orthoses, etc.
<table>
<thead>
<tr>
<th>Standards of Coverage</th>
<th>Lower extremity orthotics are covered to:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• Facilitate healing following surgery of a lower extremity.</td>
</tr>
<tr>
<td></td>
<td>• Support weak muscles due to neurological conditions.</td>
</tr>
<tr>
<td></td>
<td>• Improve function due to a congenital paralytic syndrome (i.e., Muscular Dystrophy).</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Documentation</th>
<th>Documentation must be less than 60 days old and include the following:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• Diagnosis/medical condition related to the service requested.</td>
</tr>
<tr>
<td></td>
<td>• Medical reasons for appliance requested including current functional level.</td>
</tr>
<tr>
<td></td>
<td>• A physical therapy evaluation may be required on a case-by-case basis when PA is required.</td>
</tr>
<tr>
<td></td>
<td>• Reason for replacement, such as growth or medical change.</td>
</tr>
<tr>
<td></td>
<td>• Prescription from an appropriate pediatric subspecialist is <strong>required under the CSHCS program</strong>.</td>
</tr>
<tr>
<td></td>
<td>• Medical justification for each additional component required.</td>
</tr>
</tbody>
</table>

For repairs, a new prescription is not required if the original orthotic was covered by MDHHS. A copy of the original prescription for the orthotic and itemization of materials used to repair appliance and rationale for related labor costs must be documented.
### PA Requirements

<table>

</tr>
<tr>
<td>Hip orthosis for Legg Perthes.</td>
<td>PA is not required.</td>
</tr>
<tr>
<td>Prefabricated knee appliances.</td>
<td>PA is not required.</td>
</tr>
<tr>
<td>Custom-fabricated knee orthosis for Old Disruption of Anterior Cruciate Ligament.</td>
<td>PA is not required.</td>
</tr>
<tr>
<td>Prefabricated ankle foot orthosis (AFO) and knee ankle foot orthosis (KAFO).</td>
<td>PA is not required.</td>
</tr>
<tr>
<td>Custom-fabricated plastic AFOs if up to four additional components with the base code as indicated in the Medicaid Code and Rate Reference tool (add-ons include double action joints, t-strap or malleolar pad, varus/valgus modification and soft interface).</td>
<td>PA is not required.</td>
</tr>
<tr>
<td>Custom-fabricated metal AFOs if up to six additional components with the base code as indicated in the Medicaid Code and Rate Reference tool (add-ons include double action joints, noncorrosive finish, t-strap or malleolar pad, extended steel shank, long tongue stirrup and growth extensions). Shoes are not considered an add-on and would be considered in addition to the other items.</td>
<td>PA is not required.</td>
</tr>
<tr>
<td>Custom-fabricated plastic KAFOs if up to eight additional components with the base code as indicated in the Medicaid Code and Rate Reference tool (add-ons include double action joints, t-strap or malleolus pad, drop lock, varus/valgus modification, noncorrosive finish, knee cap, soft interface and growth extensions).</td>
<td>PA is not required.</td>
</tr>
<tr>
<td>Custom-fabricated metal KAFOs if up to eight additional components with the base code as indicated in the Medicaid Code and Rate Reference tool (add-ons include double action joints, t-strap or malleolus pad, drop lock, growth extensions, noncorrosive finish, knee cap, extended steel shank and long tongue stirrup). Shoes are not considered an add-on and would be considered in addition to the other items.</td>
<td>PA is not required.</td>
</tr>
</tbody>
</table>

If other add-on items not listed above or a greater number of components are medically necessary, PA is required for the entire appliance. Additional components are not covered simply to add reimbursement value to the appliance.

For repairs, up to two episodes per year, as follows:

- The total repair cost equals one hour of labor or less.
- The cost of minor parts equals $50 or less.

PA is required for:

- Custom fabricated knee orthoses for all other diagnoses/medical conditions.
- Hip Knee Ankle Foot Orthosis (HKAFO) for all other diagnoses/medical conditions.
- Fracture orthosis for all other diagnoses/medical conditions.
- Other base codes or additional codes indicated as requiring PA in the Medicaid Code and Rate Reference tool.
- Repair costs exceed the maximum limits as stated above.
- Replacement within six months for a beneficiary under the age of 21, from the original service date.
- Replacement within two years for a beneficiary over the age of 21, from the original service date.
### Payment Rules

These are covered as **purchase only** items.

---

#### 2.27 Orthotics (Spinal)

<table>
<thead>
<tr>
<th><strong>Definition</strong></th>
<th>Spinal orthotics include, but are not limited to, cervical, thoracic, lumbar, sacral, spinal, thoracic mid belt lumbar sacral, and sacroiliac orthotics.</th>
</tr>
</thead>
</table>
| **Standards of Coverage** | Spinal orthotics are covered to:  
  - Facilitate healing following a spinal injury.  
  - Arrest or correct the curvature of the spine or spondylolisthesis greater than grade 1.  
  - Support weak spinal muscles due to atrophy and/or a deformed spine.  
  - Facilitate healing following spinal surgery. |
| **Documentation** | Documentation must be less than 60 days old and include the following:  
  - Diagnosis/medical condition related to the service requested.  
  - Medical reasons for appliance.  
  - Functional needs of the beneficiary.  
  - Reason for replacement, such as growth or medical change.  
  - Prescription from an appropriate pediatric subspecialist is **required under the CSHCS program.**  
  For **repairs**, a new prescription is not required if the original orthotic was covered by MDHHS. A copy of the original prescription for the orthotic, itemization of materials used to repair the appliance, and rationale for related labor costs must be documented. |
### PA Requirements

PA is not required for the following if the Standards of Coverage are met:

- Prefabricated thoracic-lumbar-sacral orthosis (TLSO)
- Prefabricated lumbar sacral orthosis (LSO)
- Prefabricated sacroiliac supports
- Cervical-Thoracic-Lumbar -Sacral Orthosis (CTLSO) for the treatment of curvature of the spine
- Custom-fabricated TLSOs, LSOs, and sacroiliac supports for the base code and up to three additional components indicated in the Medicaid Code and Rate Reference tool and with one of the following diagnoses:
  - Neurofibromatosis, Type 1
  - Scoliosis (and Kyphoscoliosis), Idiopathic
  - Progressive Infantile Idiopathic Scoliosis
  - Curvature of Spine (Scoliosis) **
  - Certain Congenital Musculoskeletal Deformities of the Spine
  - Spondylolisthesis

**Curvature of the spine (scoliosis) must be listed in conjunction with the other conditions of Charcot-Marie-Tooth Disease or Neurofibromatosis to not require PA.

For **repairs**, up to two episodes per year, as follows:

- The total repair cost equals one hour of labor or less.
- The cost of minor parts equals $50 or less.

### PA is required for:

- Diagnoses/medical conditions not removed from PA.
- Repair costs exceed the maximum limits as stated above.
- Replacement within one year, for a beneficiary under the age of 21, from the original service date.
- Replacement within two years, for a beneficiary over the age of 21, from the original service date.

### Payment Rules

These are covered as **purchase only** items.
### 2.28 Orthotics (Upper Extremity)

<table>
<thead>
<tr>
<th>Definition</th>
<th>Upper extremity orthotics include, but are not limited to, shoulder, elbow, wrist, and hand orthotics.</th>
</tr>
</thead>
</table>
| Standards of Coverage | Upper extremity orthoses are covered:  
- Following an acute cerebral vascular accident.  
- To support weak muscles due to a neuromuscular condition.  
- Facilitate healing immediately following surgery.  
- Improve function due to a congenital paralytic syndrome (e.g., Muscular Dystrophy). |
| Documentation | Documentation must be less than 60 days old and include the following:  
- Diagnosis/medical condition related to the service requested.  
- Medical reasons for appliance requested.  
- Functional needs of the beneficiary.  
- Reason for replacement such as growth or medical change.  
- Prescription from an appropriate pediatric subspecialist is **required under the CSHCS program**.  
For **repairs**, a new prescription is not required if the original orthotic was covered by MDHHS. A copy of the original prescription for the orthotic and itemization of materials used to repair appliance and rationale for related labor costs must be documented. |
| PA Requirements | PA is not required for the following if the Standards of Coverage are met:  
- Prefabricated shoulder orthosis (SO), elbow orthosis (EO) and shoulder-elbow-wrist-hand orthosis (SEWHO).  
- Custom fabricated SOs, EOs and SEWHOs if the base code and up to two additional components are needed.  
- Prefabricated upper extremity fracture orthosis if the treatment is related to a fracture related condition.  
- Custom fabricated upper extremity fracture orthosis if the base code and up to two additional components are needed.  
- Prefabricated wrist-hand-finger orthosis (WHFO) and hand-finger orthosis (HFO).  
- For **repairs** as follows:  
  - The total repair cost equals one hour of labor or less.  
  - The cost of minor parts equals $50 or less. |
PA is required for:
- Custom fabricated WHFOs and HFOs.
- Repair costs that exceed the maximum limits as stated above.
- Replacement within one year, for a beneficiary under the age of 21, from the original service date.
- Replacement within two years, for a beneficiary over the age of 21, from the original service date.

### Payment Rules
These are covered as **purchase only** items.

### 2.29 OSTEOMORPHOSTIMULATORS

#### Definition
An Osteomorphostimulator is a device that provides electrical or ultrasonic signal stimulation to augment bone repair. Osteomorphostimulators include:
- Noninvasive electrical stimulator characterized by an external power source which is attached to a coil or electrodes placed on the skin or on a cast or brace over a fracture or fusion site; or
- Noninvasive electrical multi-level spinal stimulator which involves three or more vertebrae (e.g., L3-L5, L4-S1, etc.); or
- Noninvasive low intensity ultrasound stimulator which produces pulsed ultrasonic signals rather than electricity to stimulate bone repair by applying the signal to the skin surface at the fracture site.

A long bone is limited to the clavicle, humerus, radius, ulna, femur, tibia, fibula, metacarpal, or metatarsal.

The FDA classifies osteomorphostimulators as Class III devices.

#### Standards of Coverage
A noninvasive, nonspinal electrical or low intensity ultrasonic osteomorphostimulator may be covered when other treatment methods have been ineffective and when one of the following applies:
- There is a nonunion of a long bone fracture with radiographic evidence which indicates that the fracture healing has ceased for three or more months prior to starting treatment with the osteomorphostimulator.
- There is a nonunion of a nondisplaced scaphoid fracture.
- If there is failed fusion of a joint, other than in the spine, where a minimum of nine months has elapsed since the surgery.
- Congenital Pseudoarthrosis not due to lack of skeletal maturity.
- The fracture gap is \( \leq 1 \) cm.
- A nonunion of a long bone fracture as described by the appropriate ICD code.

Treatment using the above stimulators may not be provided concurrently.
A spinal electrical osteogenesis stimulator may be covered when other treatment methods have been ineffective and when one of the following applies:

- There is a failed spinal fusion where a minimum of nine months has elapsed since the last surgery.
- Following multi-level (three or more vertebrae) spinal fusion surgery without instrumentation.
- Clinical indication in cervical spine fusions with instrumentation (reviewed on case by case basis).
- Following spinal fusion surgery where there is a history of a previously failed spinal fusion at the same level(s). How long ago was the failure?
- May also be indicated as an adjunct to high-risk fusion; cases that meet one or more of the following criteria:
  - Smoking (cessation attempts)
  - Diabetes
  - Metabolic disease where bone healing is likely to be compromised
  - Grade III or greater spondylolisthesis

Treatment using the above stimulator may not be provided concurrently with nonspinal osteogenesis stimulators.

### Covered Conditions

The current International Classification of Diseases (ICD) code related to the type and location of the fracture must be reported by the physician on the prescription/order and in the medical documentation.

<table>
<thead>
<tr>
<th>Long Bone Fractures</th>
<th>Other Fractures</th>

<td></td>
</tr>
<tr>
<td>One or more tarsal and metatarsal* bones</td>
<td></td>
</tr>
</tbody>
</table>

*Coverage of fresh fractures is limited to tibia, radius, scaphoid, and fifth metatarsal.
## Non-Covered Conditions
Medicaid does not cover the use of a bone growth stimulator for any of the following indications as it is considered experimental, investigational, or unproven (not all inclusive):

- Fresh fractures (other than when using ultrasound bone stimulation for the tibia or radius)
- Toe fractures
- Sesamoid fractures
- Avulsion fractures
- Osteochondral lesions
- Stress fractures
- Displaced fractures with malalignment
- Synovial pseudoarthrosis
- Fractures related to malignancy
- The bone gap is either > 1 cm or > one-half the diameter of the bone
- Primary surgeries with current internal fixation techniques (i.e., pedical screw fixation and variants)
- Lack of skeletal maturity (refer to congenital pseudoarthrosis)

## Documentation
Documentation must be less than 90 days old and include all of the following:

- Diagnosis/medical condition related to the need for the device.
- Alternative treatment methods tried and results.
- For a diagnosis of fracture nonunion, reports of sequential x-ray results for a period of no less than 90 days and office records, including previous treatments and operative procedures (if any).
- For a spinal fusion procedure, pertinent office and/or hospital records as well as a legible, complete description of indications for electrical stimulation. A copy of the operative report(s) may be required.
- Other modalities still to be used (include type and location).

## PA Requirements
PA is required and evaluated on a case by case basis.

## Payment Rules
Osteogenesis stimulators are **rental only** items (up to three months) and are inclusive of the following:

- All accessories needed to use the unit (e.g., electrodes, wires, cables, coupling gel, etc.).
- Education on the proper use and care of the equipment.
- Routine servicing and all necessary repairs or replacements to make the unit functional based on manufacturer warranty.

For consideration of rental beyond the initial three months, a new MSA-1653-B must be submitted, along with physician documentation establishing medical reason(s) for continued need.
## 2.30 Ostomy Supplies

<table>
<thead>
<tr>
<th>Definition</th>
<th>Ostomy supplies are those products necessary to maintain and care for a temporary or permanent stoma and include, but are not limited to, belts, barriers, adhesive remover, filters and pouches.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Standards of Coverage</td>
<td><strong>Standard wear ostomy products</strong> are changed daily and are covered for specified quantities when the beneficiary has an ostomy. <strong>Extended wear ostomy products</strong> may be covered when change is not required on a daily basis. The quantities must match manufacturers' recommendations for use.</td>
</tr>
</tbody>
</table>
| Documentation | Documentation must be less than 90 days old and include the following:  
  - Diagnosis/medical condition.  
  - Appliance required.  
  - Quantity of item.  
  - Frequency of change.  
  - Type and location of ostomy.  
  - Condition of the skin surface surrounding the stoma. |
| PA Requirements | PA is not required for ostomy supplies up to established quantity limits.  
PA is required for quantities above established program limits. |
| Payment Rules | These are **purchase only** items. |

## 2.31 Oxygen, Oxygen Equipment and Accessories

<table>
<thead>
<tr>
<th>Definition</th>
<th>Oxygen therapy includes, but is not limited to, stationary compressed systems, portable gaseous systems, stationary liquid systems, portable liquid systems, and concentrators.</th>
</tr>
</thead>
</table>
| Standards of Coverage | Stationary oxygen equipment and accessories may be covered in the home setting for either short-term (less than six months) or long-term (six months or greater) use.  
For beneficiaries under age 21, oxygen therapy may be covered when oxygen is required during a variety of activities (e.g., sleeping, feeding, resting) and there is an oxygen saturation rate of 93 percent or below or PO2 level of 65 mm HG or below. |
For beneficiaries age 21 and older, when the beneficiary requires oxygen for continuous use (test taken while the beneficiary is at rest, breathing room air), nocturnal use (test taken while sleeping), or exercise use (test taken during exercise) and the oxygen saturation rate is 88 percent or below or the PO2 level is 55 mm HG or below.

Once the Standards of Coverage are met, the type of equipment covered is determined by the following:

- Medical diagnosis and/or condition related to the need for oxygen.
- Activity level.
- Amount of liter flow needed.

The three main types of oxygen systems are:

- **Compressed Oxygen System** - Used primarily for intermittent use or low liter flow requirements (less than one liter per minute). A portable unit may be authorized if activities cannot be accomplished by the use of a stationary unit alone.

- **Concentrators** - Used for higher liter flows, usually one liter or more. A portable compressed oxygen unit may be authorized if activities cannot be accomplished by the use of a concentrator alone.

- **Liquid Oxygen System** - Used for high liter flow requirements. Liter flow must be ordered at more than four liters per minute. In cases where liquid oxygen is inappropriate, a compressed gas or concentrator system could be covered if criteria for that unit are met.

**Documentation**

Documentation must be less than 30 days old and include the following:

- Diagnosis/medical condition appropriate for the need of oxygen.
- Required liter flow (e.g., two liters per minute). An order for “Oxygen PRN” or “Oxygen as Needed” does not meet this requirement.
- Hours used per day (e.g., eight hours a day). For intermittent use (less than eight hours per day), indicate activity or time of day. An order for “Oxygen PRN” or “Oxygen as Needed” does not meet this requirement.
- Duration of need (e.g., three months, six months or lifetime).
- Delivery system to be used (e.g., concentrator, compressed gas, liquid).
- Current oxygen saturation level or pO2 level.
- For liquid oxygen, total number of pounds required per month.
- A prescription from a pediatric pulmonologist, a neonatologist, a pediatrician intensivist, and/or pediatric cardiologist is **required under the CSHCS program**.

**After the initial prescription for home oxygen**, a six-month follow-up prescription and/or CMN must be obtained. At this time, a new oximetry or ABG test result must be obtained to substantiate the continued need for treatment. Thereafter, a prescription is only required on an annual basis. An updated lab test is required only when there is a change in equipment need or level of oxygen usage.
<table>
<thead>
<tr>
<th><strong>Equipment Maintenance</strong> - Verification of the proper use, care and function (e.g., verification that the equipment delivers the proper percentage of liter flow) must be performed according to the manufacturer's requirements. The following information must also be maintained in the patient's file:</th>
</tr>
</thead>
<tbody>
<tr>
<td>• The name of the manufacturer.</td>
</tr>
<tr>
<td>• The manufacturer's requirements for verification of proper use, care and function of the equipment.</td>
</tr>
<tr>
<td>• The date that each equipment verification was performed.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th><strong>PA Requirements</strong></th>
<th>PA is not required for gaseous stationary, concentrators, and portable oxygen systems if the Standards of Coverage are met and the beneficiary has one of the following diagnoses descriptions:</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Bronchiectasis</td>
<td></td>
</tr>
<tr>
<td>• Bronchopulmonary Disease</td>
<td></td>
</tr>
<tr>
<td>• Chronic Airway Obstruction</td>
<td></td>
</tr>
<tr>
<td>• Chronic Bronchitis</td>
<td></td>
</tr>
<tr>
<td>• Chronic Pulmonary Heart Disease</td>
<td></td>
</tr>
<tr>
<td>• Coccidioidomycosis</td>
<td></td>
</tr>
<tr>
<td>• Congenital Central Alveolar Hypoventilation Syndrome</td>
<td></td>
</tr>
<tr>
<td>• Congenital Heart Disease</td>
<td></td>
</tr>
<tr>
<td>• Heart Failure</td>
<td></td>
</tr>
<tr>
<td>• Idiopathic Sleep Related Nonobstructive Alveolar Hypoventilation</td>
<td></td>
</tr>
<tr>
<td>• Malignant Neoplasm of Trachea, Bronchus, and Lung</td>
<td></td>
</tr>
<tr>
<td>• Muscular Dystrophies and other Myopathies</td>
<td></td>
</tr>
<tr>
<td>• Myoneural Disorders</td>
<td></td>
</tr>
<tr>
<td>• Obstructive Sleep Apnea (adult) (pediatric)</td>
<td></td>
</tr>
<tr>
<td>• Other Alveolar and Parietalveolar Pneumonopathy</td>
<td></td>
</tr>
<tr>
<td>• Other and Unspecified Disorders of Metabolism (Cystic Fibrosis)</td>
<td></td>
</tr>
<tr>
<td>• Other Diseases of Blood and Blood-Forming Organs (Secondary Polycythemia, Familial Polycythemia)</td>
<td></td>
</tr>
<tr>
<td>• Other Emphysema</td>
<td></td>
</tr>
<tr>
<td>• Pneumoconioses and other Lung Diseases due to External Agents</td>
<td></td>
</tr>
<tr>
<td>• Postinflammatory Pulmonary Fibrosis</td>
<td></td>
</tr>
<tr>
<td>• Primary Central Sleep Apnea</td>
<td></td>
</tr>
<tr>
<td>• Pulmonary Eosinophilia</td>
<td></td>
</tr>
</tbody>
</table>
- Pulmonary Tuberculosis
- Secondary Malignant Neoplasm of Respiratory and Digestive Systems
- Sleep Related Hypoventilation Hypoxemia in Conditions Classified Elsewhere
- Tracheomalacia

PA is not required for gaseous stationary or concentrators for the condition of obstructive sleep apnea.

PA is required for:
- Oxygen required for short-term use only.
- Liquid oxygen systems.
- Liquid oxygen contents only.
- Medical need for long-term oxygen use does not meet Standards of Coverage.

### Payment Rules

All oxygen equipment is a **rental only** and is inclusive of the following:

- All necessary accessories (e.g., regulator, tubing, mask or cannula, contents base, etc.). Stationary gaseous or liquid oxygen contents are separately payable only when the patient owns the equipment and the coverage criteria has been met.
- The rental payment includes routine servicing and all necessary repairs or replacements to make the rented DME functional. The equipment should be checked according to manufacturer's specifications.

### Combination of Equipment Covered:

- Only one delivery method is covered per month (i.e., gaseous, gaseous/concentrator or liquid).
- A portable compressed gaseous system or liquid system will only be provided in addition to an existing stationary system, unless oxygen is needed for ambulation only.
- A backup cylinder is considered part of the inclusive reimbursement for the oxygen system.

### Nursing Facility Residents:

- For a nursing facility resident, the DME provider may bill for oxygen gas, equipment, and supplies only when used for prolonged daily use. Intermittent or infrequent use of these items is included in the nursing facility per-diem rate. Based on this site of service, the monthly rental payment issued to the DME provider for the oxygen concentrator will be reduced compared to the payment for equipment used in the home.
- For a County Medical Care Facility or Hospital Long Term Care Unit, the DME provider cannot bill for oxygen gas, equipment and supplies for any resident.

**NOTE:** The rental of a concentrator is billable by a Medical Supplier.

Frequent or prolonged use is defined as:
- Long-term daily basis.
- At least eight hours duration or more per day.
2.32 **PARENTERAL NUTRITION**

<table>
<thead>
<tr>
<th>Definition</th>
<th>Parenteral nutrition is the provision of nutrition intravenously.</th>
</tr>
</thead>
</table>
| Standards of Coverage | Parenteral nutrition may be covered when:  
  ▪ There is an impairment or disease of the gastrointestinal tract that impairs the ability of nutrients to be digested and absorbed.  
  ▪ Post-surgical nonabsorption from a recent massive small bowel resection leaving less than five feet of small bowel remaining beyond the ligament of Treitz or short bowel syndrome with severity that involves a net gastrointestinal fluid and electrolyte malabsorption in which the enteral losses exceed 50 percent of oral/enteral intake. |
| Documentation | Documentation must be less than 30 days old and include the following:  
  ▪ Specific diagnosis related to the beneficiary’s inability to take or eat regular food.  
  ▪ Amount of nutrients needed per day.  
  ▪ Duration of treatment.  
  ▪ Current height, weight, and recent weight loss.  
  ▪ Identification of levels of individual nutrient(s) that are required in increased or restricted amounts. |
| PA Requirements | PA is not required for parenteral equipment, supplies, and solutions when the Standards of Coverage have been met and one of the following diagnoses exists:  
  ▪ Noninfectious Enteritis of the Small Intestine  
  ▪ Noninfectious Enteritis of the Large Intestine  
  ▪ Unspecified Intestinal Obstruction  
  ▪ Fistula of Intestine, Excluding Rectum and Anus  
  ▪ Acute Pancreatitis  
  ▪ Chronic Pancreatitis  
  ▪ Cyst and Pseudocyst of Pancreas  
  ▪ Other and Unspecified Post-Surgical NonAbsorption  
When PA is required, the following HCPCS codes are authorized via a telephone authorization process:  
  B4185  B4189  B4193  B4197  B4199  
  B4220  B4224  B9004  B9006  B9999 |
## Payment Rules

Parenteral nutrition must be billed as a daily rate by reporting total number of days used as units. The parenteral lipids, the parenteral pre-mix solution, the infusion pump, supply kit, and the administration kit may be billed in combination with each other. If reporting parenteral lipids without one of the parenteral pre-mix solutions, only the pump code is separately reimbursable. The administration kit includes all items necessary for the administration of the solution (e.g., the extension sets, pump cassettes, clamps, containers, and connectors). The supply kit includes all necessary medical supplies such as dressings, tape, alcohol wipes, filters, syringes, needles, and injection caps.

For Medicaid beneficiaries residing in a nursing facility, the parenteral solution, equipment and supplies may be billed by the medical supplier.

### 2.33 Peak Flow Meter

<table>
<thead>
<tr>
<th>Definition</th>
<th>A peak flow meter is a small device used to measure the airflow out of the lungs.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Standards of Coverage</td>
<td>A peak flow meter may be covered if the beneficiary has a diagnosis related to an obstructive airway disease (e.g., asthma, COPD).</td>
</tr>
</tbody>
</table>
| Documentation | Documentation must be less than 90 days old and include the following:  
  - Diagnosis/condition related to the need for the meter.  
  - Frequency of use. |
| PA Requirements | PA is not required if the Standards of Coverage have been met.  
  PA is required when:  
  - Medical need is beyond Standards of Coverage.  
  - Replacement is required within one year. |
| Payment Rules | This is a **purchase only** item. |

### 2.34 Phototherapy (Bilirubin) Light with Photometer

<table>
<thead>
<tr>
<th>Definition</th>
<th>A phototherapy light with photometer is an ultraviolet light source used to reduce bilirubin levels.</th>
</tr>
</thead>
</table>
| Standards of Coverage | A phototherapy light may be covered if:  
  - The beneficiary is being treated for the diagnosis of neonatal jaundice.  
  - The treatment is limited to seven consecutive days and occurs during the first 30 days of life. |
| Documentation | Documentation must be less than 24 hours old and include:  
  - Diagnosis/condition related to the need for the device.  
  - Duration of need. |
### PA Requirements

PA is not required if the Standards of Coverage are met and there is one of the following diagnoses:

- Optic Papillitis
- Hemolytic Disease due to Other and Unspecified Isoimmunization
- Perinatal Jaundice from Other Excessive Hemolysis
- Neonatal Jaundice Associated with Pre-term Delivery
- Neonatal Jaundice due to Delayed Conjugation from Other Cases
- Unspecified Fetal and Neonatal Jaundice
- Kernicterus not due to Isoimmunization

PA is required for:

- Diagnosis/medical condition other than those listed above.
- Medical need is beyond the Standards of Coverage.

### Payment Rules

A phototherapy light with photometer is a **rental only** item, and is inclusive of the following:

- All accessories needed to use the unit (e.g., ultraviolet light source, a fiberoptic system with fiberoptic blanket if needed, etc.).
- Education on the proper use and care of the equipment.
- Routine servicing and all necessary repairs or replacements to make the unit functional.

### 2.35 Pneumatic Compressors and Appliances (Lymphedema Pump)

#### Definition

Pneumatic compressors and appliances may be either nonsegmented or segmented, with or without calibrated gradient pressure. An integral part of treatment, along with the pneumatic compression device, is leg or arm elevation and the use of custom fabricated gradient pressure stockings or sleeves, compression bandaging, etc.
## Standards of Coverage

A pneumatic compression device may be covered only as a treatment of last resort (e.g., other less intensive treatment has not been effective).

A **nonsegmented device or segmented device without manual control** of the pressure in each chamber may be covered for up to 90 days for any of the following:

- Radical surgical procedures with removal of regional groups of lymph nodes (e.g., radical mastectomy)
- Post-radiation fibrosis
- Metastasis of malignant tumors to regional lymph nodes with lymphatic obstruction
- Scarring of lymphatic channels if:
  - There is significant ulceration of the lower extremity(ies); and
  - The beneficiary has received repeated, standard treatments from a physician using such methods as a compression bandage system or its equivalent.
- Treatment of chronic venous insufficiency with edema and/or venous ulcers
- Milroy's Disease
- Congenital anomalies
- Refractory lymphedema related to venous insufficiency complicated by recurrent cellulitis (scarring of the lymphatic channels)

A **segmented device with calibrated gradient pressure** may be covered when there is a painful focal lesion (e.g., significant sensitive skin scar or contracture) of the extremity that requires a reduction in pressure over the affected segment.

## Documentation

The documentation must be less than 30 days old and include the following:

- Diagnosis/condition appropriate for the equipment requested
- Location and size of the painful focal lesion(s) which necessitates the use of the device, if applicable
- Length of time each lesion has been continuously present
- Plan of treatment, including the frequency and duration of each treatment episode, and anticipated prognosis
- Type of unit to be used, the necessary pressure in each chamber, and why the specific features of the equipment are needed
- Description of other treatments that have been tried

## Continued Use After the Initial 90 Days

For continued coverage beyond the initial 90 days, the following additional information must be provided:

- Bilateral limb measurements before and after the approved treatment
- Results of the treatment provided

## PA Requirements

PA is required for all requests.

## Payment Rules

A unit may be a **capped rental** or **purchase** item. If unit is billed as a capped rental, the rental payment would be inclusive of the following:

- All accessories needed to use the equipment
- Education on the proper use and care of the equipment
### 2.36 Pressure Gradient Products

**Definition**

Pressure gradient products include, but are not limited to, sleeves, wrist gauntlets, vests, legs, etc.

**Standards of Coverage**

Pressure gradient products may be covered to reduce edema, promote circulation, reduce scarring or reduce retention of fluid in the extremities due to the following conditions:

- Lymphedema
- Chronic venous insufficiency
- Thrombophlebitis
- Burns

Up to two garments may be covered when the items must be worn for 24 hours.

Gradient compression stockings are custom-fabricated or custom-measured support and are covered when ordered by a physician to treat one of the above conditions and deliver at least 18 mm HG or greater compression. For custom burn garments, refer to HCPCS codes A6501- A6512.

Surgical stockings, such as heavy elastic or anti-embolism stockings, are covered when ordered by a physician as a short-term treatment (up to three months) after a surgical event (e.g., prevent blood clots for non-ambulatory individuals after hospital discharge). If required for treatment during an inpatient hospital stay or outpatient hospital visit, the service will not be reimbursed to the medical supplier.

**Documentation**

Documentation must be less than 60 days old and include the following:

- Diagnosis of condition being treated
- Item to be dispensed
- Number of hours to be worn
- Location and number of extremities involved

**PA Requirements**

PA is not required for ready-made pressure gradient products up to established quantity limits.

PA is required for:

- All custom-measured products and special features such as a zipper, enclosed toe, open pubis, etc.
- Replacement within three months

**Payment Rules**

All pressure gradient products are considered a **purchase only** item.
2.37 PROSTHETICS (LOWER EXTREMITIES)

**Definition**

Lower extremity prosthetics include, but are not limited to, partial foot, below knee, above knee, hip and hemi-pelvectomy prostheses.

**Standards of Coverage**

A *lower extremity prosthesis* may be covered to restore mobility for a beneficiary who demonstrates the ability to transfer and/or ambulate, and the beneficiary’s potential functional level is between the ranges of K1 through K4.

**Documentation**

Documentation must be less than 60 days old and include the following:

- Diagnosis/medical condition related to the service requested.
- Current functional “K” level.
- An occupational or physical therapy evaluation may be required on a case-by-case basis when PA is required.

**PA Requirements**

- **Below Knee Prosthesis**
  
  Preparatory prosthesis - PA is not required for a BK preparatory prosthesis when the Standards of Coverage are met and it consists of a base procedure code (e.g., L5510, L5520, or L5530) and the following add-ons:
  
  - one test socket
  - insert
  - suspension system (e.g., L5666 or L5670)
  - total contact
  - distal cushion

  The SACH foot is included with the BK preparatory base code. If any prosthetic foot other than a SACH foot is placed on a preparatory prosthesis, it will require prior authorization and must be transferred to the definitive prosthesis.
- Definitive Exoskeletal BK prosthesis – PA is not required for a BK definitive exoskeletal prosthesis when the Standards of Coverage are met and it consists of a base procedure code (e.g., L5100, L5105, L5050) and the following add-ons:
  - up to two test sockets
  - socket material
  - total contact
  - distal cushion
  - foot
  - suspension locking system
  - insert
  - gel liner

- Definitive Endoskeletal BK Prosthesis - PA is not required for a BK definitive endoskeletal prosthesis when the Standards of Coverage are met and it consists of a base procedure code (e.g., L5301) and the following add-ons:
  - up to two test sockets
  - socket material
  - total contact
  - distal cushion
  - foot
  - suspension locking system
  - insert
  - gel liner
  - cover

Socks and sheaths are not considered as add-ons and would be considered in addition to the other add-on items for either the preparatory or definitive prosthesis.

**Above Knee Prosthesis**

PA is not required for:

- an above knee preparatory prosthesis when the Standards of Coverage are met and it consists of a base code and the following add-ons: one test socket, foot, knee, socket design and/or suspension system. Socks and sheaths are not considered as add-ons and would be considered in addition to the other items.

- an exoskeletal above knee definitive prosthesis when the Standards of Coverage are met and it consists of a base code and the following add-ons: up to two test sockets, foot, knee, insert, socket material, socket design, and/or suspension system. Socks and sheaths are not considered as add-ons and would be considered in addition to the other items.
• an endoskeletal above knee definitive prosthesis when the Standards of Coverage are met and it consists of a base code and the following add-ons: up to two test sockets, foot, insert, socket material, socket design, and/or suspension system. Socks and sheaths are not considered as add-ons and would be considered in addition to the other others.

Refer to the Medicaid Code and Rate Reference tool for the specific codes removed from PA.

For repairs, up to two episodes per year, as follows:
• The total repair cost equals one hour of labor or less.
• The cost of minor parts equals $50 or less.

PA is required for either a below knee or above knee prosthesis when:
• The standards of coverage are not met.
• Any component part of the prosthesis requires PA.
• The beneficiary is over the age of 21 and replacement is required within five years.
• The beneficiary is under the age of 21 and replacement is required within two years.

Payment Rules
These are purchase only items.

<table>
<thead>
<tr>
<th>2.38 PULSE OXIMETER</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Definition</strong></td>
</tr>
</tbody>
</table>
| **Standards of Coverage** | Pulse oximeter may be covered:  
  • **For beneficiaries 21 or over** as a diagnostic tool for short-term rental (one month) if ordered for oxygen or ventilator weaning in the home.  
  • **For beneficiaries under 21:**  
    ☐ As a diagnostic tool for short-term rental (one month) when there are suspected desaturations during sleep, stress, or feeding.  
    ☐ Up to six months with a diagnosis requiring oxygen use.  
    ☐ Up to six months for beneficiaries with a tracheostomy. |
| **Documentation** | Documentation must be less than 90 days old and include the following:  
  • Diagnosis/medical condition related to the need for the unit.  
  • Treatment plan addressing what is to be done for abnormal readings.  
  • Current oxygen orders, if applicable.  
  • For coverage beyond the initial six-month period, an evaluation by an appropriate pediatric subspecialist (e.g., pediatric pulmonologist, pediatric cardiologist, neurologist, ENT, or pediatric internist) is required under the CSHCS program. |
PA Requirements

PA is not required when the Standards of Coverage are met, the beneficiary is under 21, and has one of the following diagnoses:

- Tracheostomy (Artificial Opening Status)
- Tracheostomy (Attention to Artificial Openings)

PA is required:

- For all beneficiaries over the age of 21.
- When the Standards of Coverage are not met.

Payment Rules

A pulse oximeter is a capped rental item and is inclusive of the following:

- All accessories needed to use the unit (e.g., nondisposable infant or adult oximeter probes, cables, etc.).
- Education on the proper use and care of the equipment.
- Routine servicing and all necessary repairs or replacements to make the unit functional.
- Periodic downloading of recorded data.

If needed for continuous use beyond the 10 months of rental, the item is considered purchased and necessary repairs and/or replacements of accessories are separately reimbursable if not covered under the manufacturer warranty. Replacement of one non-disposable probe annually is separately reimbursable without prior authorization.

2.39 SPEECH GENERATING DEVICES

Definition

Speech generating devices (SGD) are defined as durable medical equipment (electric or nonelectric) that provide an individual with a severe speech impairment, who is unable to communicate using natural means (e.g., spoken, written, gestures, sign language), the ability to meet his or her daily communication needs.

Other terms used interchangeably with SGD include augmentative and alternative communication (AAC) device or augmentative communication device (ACD).

Standards of Coverage

To be considered for coverage, documentation must substantiate medical need for beneficiaries whose needs cannot be met using natural communication methods and demonstrate the comprehension and physical skills necessary to communicate using the requested device. An SGD will be considered medically necessary when supporting documentation demonstrates all of the following:

- The prognosis for developing and using oral speech as a primary method of communication is considered guarded;
- The requested SGD is an integral part of the communication plan of care; and
- The beneficiary will be able to use the device in all environments he/she frequents (e.g., home, school, job, etc.).

Software intended for augmentative communication purposes may be considered upon review of documentation supporting medical necessity. If the beneficiary intends to download augmentative communication software onto his/her personal laptop, computer, or iPad, it is the responsibility of the beneficiary and/or his/her legal guardian to check with the vendor of the personal device for licensing, compatibility, repair, warranty and proprietary information.
### Standards of Coverage - Eye Control

An eye control is a type of mechanism that helps the beneficiary access the SGD. The eye control may or may not be integrated within the speech generating device. Eye control mechanisms will be covered when all of the following apply:

- All other methods to operate the SGD have been evaluated and ruled out and the eye control is the most appropriate method that provides a functional level of communication (speed, accuracy, etc.);
- Documentation specifies medical, functional and physical necessity that supports the need for the eye control; and
- The evaluation(s) has documented evidence of the beneficiary’s ability to physically activate the system and demonstrate meaningful use of the device with minimal assistance from others.

### Non-covered

The following are non-covered:

- Items that do not meet the definition of durable medical equipment and are not dedicated speech devices.
- Software to play games, create spreadsheets or documents or is not specific to augmentative communication.
- Environmental control units.
- More than one SGD per beneficiary.
- Registering the device.
- Extended warranties.
- SGDs used solely for education, vocational or recreational purposes. It is expected that the beneficiary will be able to use the device in all environments he/she frequents (e.g., home, school, job, etc.).
- Replacements based on manufacturer recommended replacement schedules.
- SGD requests for devices that do not match the beneficiary's current and reasonably foreseeable communication abilities and needs.
- Separate billing for interfaces, cables, adapters or interconnects and switches (with the exception of accessing switches) necessary to interface with the SGD.
- Requests for replacement due to new technology when the beneficiary’s current SGD continues to meet his/her medical and functional needs.
- Items that are not defined by the American Medical Association, the Food and Drug Administration, and the Pricing, Data Analysis, and Coding (PDAC) contractor as medical devices or dedicated durable medical equipment (e.g., personal tablets, computers, iPads, iPhones, etc.).
**Evaluation Components**

A speech-language pathologist, in conjunction with other disciplines such as occupational therapists, physical therapists, psychologists, and seating specialists as needed, must provide a thorough and systematic evaluation of the beneficiary’s receptive and expressive communication abilities.

Ancillary professionals must possess proper credentials (certification, license and registration, etc.) as appropriate.

SGD vendors (manufacturers, distributors) may not submit assessment information or justification for any requested SGD.

An objective evaluation (using objective functional baseline measures and/or standardized testing) of the beneficiary's receptive and expressive communication abilities by a speech-language pathologist (SLP), in conjunction with other applicable disciplines (e.g., occupational therapist, physical therapist, psychologists, and seating specialists, etc.) as needed, has been performed and the SLP has documented the following:

- The beneficiary's functional ability to use the device throughout their daily activities.
- The consideration of alternative access and positioning devices, as appropriate.
- The device is appropriate to the beneficiary's current comprehension, abilities and skills.
- The beneficiary demonstrates the cognitive, physical, visual and hearing skills necessary to communicate using the requested device.
- The SGD is the least costly device that meets the beneficiary's basic communication needs (in the home and in their community). Include in the evaluation supporting documentation substantiating the requested device as the least costly alternative that meets the beneficiary's current functional needs.
- Assessment of the beneficiary on more than one device, by more than one manufacturer, and documenting why the requested device is more appropriate than the other device(s). Include the following in the evaluation:
  - Device(s) evaluated;
  - The beneficiary's performance on each device evaluated;
  - The device requested (brand, make/model and type); and
  - Reasons why other evaluated devices did not meet the beneficiary's needs.
- A trial period using the requested device must be provided for initial device authorization requests. The trial period must be a least one month in length (the SLP may submit a prior authorization request for up to three months). The SLP must document a description of the trial period with the requested device, including length of trial, settings, outcome, and additional training needs identified.
Documentation must be within 180 days and include:

- the physician’s order with the diagnosis directly related to the beneficiary’s communication deficit. The order must be based on the SLP’s evaluation of the beneficiary's communication abilities and medical needs.
- the date of onset, progress made and a comprehensive summary of the beneficiary’s communication goals. (Refer to criteria outlined in the Outpatient Therapy Chapter, Speech Therapy section.)
- the assessment by a physical therapist (PT) or occupational therapist (OT) to address functional mobility and postural control.
- the SLP's documentation of hearing and vision status.
- a copy, if available, of the hearing (audiologist) or vision (ophthalmologist or optometrist) test if the beneficiary has had a hearing or vision test within the past 12 months.
- a plan of care (POC) identifying other disciplines involved in the care and goals for therapy and training. For beneficiaries under the age of 21 attending school, the POC must include other disciplines and parents/legal guardian as appropriate (i.e., OT, PT, psychologist, school therapist, etc.).
- specifications for the SGD. (Refer to the Outpatient Therapy Chapter)
- necessary therapy and training to allow the beneficiary to meet functional needs.
- the speech and language evaluation results.

All SGD evaluation documentation must be submitted following the established criteria stated within the Evaluations and Follow-up for Speech Generating Devices subsection of the Outpatient Therapy Chapter.

Documentation for modifications/upgrades must describe the changes in the beneficiary's physical, medical, cognitive, vision or hearing status that necessitates the need for the requested modifications/upgrades for the system or parts.

A video of the beneficiary using the SGD and/or eye control is a useful tool in establishing the beneficiary's ability to use either item, but is not required. The SLP may submit a video with the prior authorization request if all of the following are met:

- The beneficiary or beneficiary’s legal guardian has dated and signed an authorization for the video documentation as additional documentation of the beneficiary’s ability to use the device;
- The video is current (within the past 12 months); and
- The provider encrypts the video prior to sending it in with the prior authorization request (following HIPAA compliance regulations).
### PA Requirements

The speech-language pathologist performs the functional communication assessment and SGD evaluation and initiates the prior authorization request with a medical supplier that has a specialty enrollment with MDHHS to provide SGDs. To improve beneficiary access to low-end devices, a medical supplier without a SGD specialty enrollment with MDHHS may provide SGDs with eight minutes or less of speech capability, basic SGD accessories such as switches, buttons, etc., or SGD wheelchair mounting systems. A SGD vendor must enroll through the MDHHS CHAMPS PE on-line system as a medical supplier with a subspecialty of Speech Generating Devices in order to provide the full range of SGDs. (Refer to the Directory Appendix for contact information.)

PA is required for all SGDs, eye control mechanisms, upgrades, modifications, accessories, repairs, replacements and device trials. Required documentation must accompany the Special Services Prior Approval—Request/Authorization (MSA-1653-B) when requesting authorization for all original and replacement/upgrade SGD requests.

A copy of the physician prescription must be submitted with the request for an SGD. The prescription must be based on the evaluation of an individual’s communication abilities and medical needs made by a speech-language pathologist and other evaluation team members (as appropriate).

### Modifications/Upgrades

- Indicate the procedure code that defines the modification(s) or upgrades.

Providers have six months from the prior authorization approval date to provide all approved items, including the SGD, mount and accessories. After six months, a new prior authorization request must be submitted.

### Repairs

- For a repair, report HCPCS code K0739 (for the labor charge) and HCPCS code E1399 (for the replacement part). PA is required for all repairs. If repair charges exceed $150, a speech-language pathologist, occupational therapist, or physical therapist must conduct an evaluation. A statement must be included in the evaluation indicating whether the current SGD continues to meet the beneficiary's functional needs. If the beneficiary's needs are being met with the current system, PA may be granted.

Each repair must consist of a thorough assessment of the general working condition of the entire system so that frequent repairs may be avoided. If additional repairs to the system are needed, PA for those additional services must be obtained.

In some cases, it may be more costly to repair the SGD than to replace it. When requesting PA for a repair, provide the cost of the repair and the cost of the replacement so that determination can be made by MDHHS whether to repair or replace the device.

### Replacements

- All replacements (identical, upgrades, downgrades) of an SGD require PA.

### Follow-Up Services

The provision of speech therapy services for training following the purchase of an SGD is expected to occur within the 12 months following the beneficiary's receipt of the device. (Refer to the Outpatient Therapy Chapter and the Medicaid Code and Rate Reference tool for PA and coverage parameters.) During this time, the SLP and SGD provider are required to ensure that a support team is in place to assist the beneficiary and/or their family with all follow-up SGD needs and therapy.
| **Frequency** | The program will purchase new equipment only. Only one SGD will be purchased within a three-year period for beneficiaries under age 21. Only one SGD will be purchased within five years for beneficiaries age 21 and older. Exceptions may be considered in situations where there has been a recent and significant change in the beneficiary's medical or functional status relative to the beneficiary's communication skills. |
| **Warranty** | The warranty period begins at the point when the device is in the beneficiary's home and the beneficiary has received adequate training to use the system for functional communication. |
| **Repairs** | Repairs for speech generating devices (SGD) are covered after the warranty expires for no more than one SGD per beneficiary. Additionally, repair of an SGD not purchased by MDHHS is covered only if the SGD is determined to be necessary to meet basic functional communication needs in accordance with the criteria for SGD coverage. For a repair, report HCPCS code K0739 (for the labor charge) and HCPCS code E1399 (for the replacement part). PA is required for all repairs. If repair charges exceed $150, a speech-language pathologist, occupational therapist, or physical therapist must conduct an evaluation. A statement must be included in the evaluation indicating whether the current SGD continues to meet the beneficiary's functional needs. If the beneficiary's needs are being met with the current system, PA may be granted. Each repair must consist of a thorough assessment of the general working condition of the entire system so that frequent repairs may be avoided. If additional repairs to the system are needed, PA for those additional services must be obtained. In some cases, it may be more costly to repair the SGD than to replace it. When requesting PA for a repair, provide the cost of the repair and the cost of the replacement so that determination can be made by MDHHS whether to repair or replace the device. Technological improvements and upgrades are not considered repairs and must not be requested as such. The prior authorization request for repair must include:   - Documentation from the SLP (or if not currently receiving speech services, a physician, a PT or OT, or teacher) confirming the current device is used by the beneficiary on a regular basis and continues to meet the beneficiary's needs;   - Part number(s), description(s), manufacturer name, Healthcare Common Procedure Coding System (HCPCS) codes; and   - Warranty information and catalog number(s) for the part number(s) to be used for the repair. Repairs must extend the useful lifetime of the SGD by at least one year from the date of the repair request. |
### Replacements

All replacements (identical, different, upgrades, downgrades) of an SGD require PA. Replacements may be covered when there has been a significant medical/functional change in the beneficiary’s ability to use the SGD, the device is no longer repairable, or the cost of repairs exceeds the cost of replacement. Limits for replacement are based on medical/functional need and the operating condition of the beneficiary’s current device.

Manufacturer suggested replacement schedules are not considered a reason for replacement.

When a current SGD needs replacement and the replacement is **identical** to the SGD previously purchased by MDHHS, the documentation required to be submitted with the prior authorization request is:

- Clinical confirmation by the speech-language pathologist the device continues to be suitable for the beneficiary’s needs;
- The SLP, OT or PT confirmation of the beneficiary’s functional ability to use the SGD; and
- Cost to repair and cost to replace.

If an identical SGD is no longer available, a new unit that is equivalent to the original in function, utility and user adaptability will be furnished.

When a current SGD needs replacement with an SGD that is **different** than the SGD previously purchased by the program, the documentation to be submitted with the prior authorization is:

- A new speech and language evaluation; and
- A statement (to be included with the evaluation) indicating why and how the current SGD no longer meets the beneficiary’s functional communication needs.

All other standards of coverage requirements must be met for coverage consideration. Replacement requests due to loss, damage or theft must include the policy or fire marshal report, as applicable, and a plan to prevent recurrence. MDHHS does not cover replacement of SGDs due to misuse or abuse.

### Payment Rules

**Purchase** - MDHHS will purchase new equipment only. The serial number of the device purchased must be maintained on file by the vendor for audit purposes.

Shipping and handling fees relating to the SGD equipment are not separately reimbursed.

Reimbursement includes the charges for the SGD and all approved components.

The provider’s charge for an SGD must be based on the usual and customary charge. Reimbursement will be the lesser of the provider’s charge and/or the Medicaid fee screen.
### Rental

Equipment will not be rented for a period of less than 30 days and may be rented for a maximum period of 90 days. The monthly rental reimbursement rate will be 1/10 of the maximum purchase reimbursement. The amount reimbursed for rental will be deducted from the total purchase price.

MDHHS will apply the trial period rental to the purchase of the SGD. For an SGD device(s) approved for a trial period and ruled out (by the SLP, the beneficiary and/or legal guardian, DME provider, etc.) at some point during the trial period (first, second or third month), MDHHS will reimburse the SGD provider for the period of time the device was trialed. (Refer to the Medical Supplier Database and the Medicaid Code and Rate Reference tool for specific HCPCS codes and rental rates.)

### 2.40 Support Surfaces - Group 1

<table>
<thead>
<tr>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pressure Reducing Support Surfaces - Group 1 includes, but is not limited to, alternating pressure pad and pump; water, air, or dry pressure mattresses; or gel or gel-like pressure pads. A Group 1 support surface must provide both a waterproof cover and adequate support to prevent the beneficiary from &quot;bottoming out&quot; with the use of the item.</td>
</tr>
</tbody>

</tbody>
</table>
- Appropriate wound care (for a Stage II, III, or IV ulcer).
- Appropriate management of moisture/incontinence.
- Wound size, stage and location (for a Stage II, III, or IV ulcer).
- Nutritional assessment and intervention consistent with the overall plan of care.

**PA Requirements**

PA is not required for HCPCS codes A4640, E0184, E0185, E0186, E0187 or E0197 if the Standards of Coverage are met and one of the following diagnoses is present:

- Alteration of Consciousness, Coma or Transient Alteration of Awareness
- Anoxic Brain Damage
- Anterior Horn Cell Disease
- Cerebral Degenerations Usually Manifested in Childhood
- Cerebral Edema
- Compression of Brain
- Congenital or Hereditary Progressive Muscular Dystrophy, Myotonic Disorders, Familial Periodic Paralysis
- Decubitus Ulcer
- Encephalopathy, Unspecified
- Fracture of the Cervical or Dorsal Areas (open or closed)
- Hemiplegia and Hemiparesis
- Huntington's Chorea
- Infantile Cerebral Palsy
- Multiple Sclerosis
- Neurofibromatosis
- Other Congenital Anomalies of Nervous System
- Other Demyelinating Disease of Central Nervous System
- Other Paralytic Syndromes
- Parkinson's Disease
- Spina Bifida
- Spinocerebellar Disease

PA is required for:

- Medical need beyond the Standards of Coverage.
- All other diagnoses.
- Replacement in less than three years.
Payment Rules

A Group 1 support surface may be a **capped rental** or **purchase** depending on the specific HCPCS code. Only a single Group 1 support surface will be considered for a purchase/rental at any given time.

If unit is billed as a capped rental, the rental payment would be inclusive of the following:

- All accessories needed to use the equipment (e.g., pump, pad, cards etc.).
- Education on the proper use and care of the equipment.
- Routine servicing and all necessary repairs or replacement to make the unit functional.

### 2.41 SUPPORT SURFACES – GROUP 2

#### Definition

Pressure Reducing Support Surfaces - Group 2 includes, but is not limited to, powered air flotation beds; powered pressure-reducing air mattresses; powered air overlay for mattress; or nonpowered advance pressure reducing mattress. A Group 2 support surface must provide both a waterproof cover and adequate support to prevent the beneficiary from "bottoming out" with the use of the item.

#### Standards of Coverage

A Group 2 mattress support may be covered up to three months when one of the following applies:

- Multiple Stage II pressure ulcers are located on the trunk or pelvis and the beneficiary has participated with a comprehensive ulcer treatment program for at least the past month which has included the use of an appropriate Group 1 support surface, and the wound has worsened or had no change.
- Large or multiple Stage III or IV pressure ulcer(s) on the trunk or pelvis.
- Recent myocutaneous flap or skin graft for a pressure ulcer on the trunk or pelvis (surgery within the past 60 days) and the beneficiary has been on a Group 2 or 3 surface immediately after a recent discharge from a hospital or nursing facility (discharge within the past 30 days).

#### Continued Use

Of a Group 2 support surface - Continued use of a Group 2 support surface on a monthly basis may be covered for restorative purposes only when healing continues to progress.

Continued use of a Group 2 support surface on a monthly basis will not be reauthorized for coverage if:

- The beneficiary is noncompliant with care plan; or
- The documentation in the medical record demonstrates that other aspects of the plan of care are not being modified to promote healing.

#### Documentation

Documentation must be less than 14 days old and include the following:

- Diagnosis/medical condition related to need for item.
- Size, stage and location of the ulcer.
- Other treatment modalities/surfaces already tried.
- Education of the beneficiary and caregiver on the prevention and/or management of pressure ulcers.
- Regular assessment by a nurse, physician, or other licensed healthcare practitioner.
- Appropriate turning and positioning.
- Current appropriate wound care (for a Stage II, III, or IV ulcer).
- Appropriate management of moisture/incontinence.
- Nutritional assessment and intervention consistent with the overall plan of care.

**PA Requirements**

PA is required for all Group 2 support surfaces.

**Payment Rules**

A Group 2 support surface may be a **capped rental** or **purchase** depending on the specific HCPCS procedure code. A powered air flotation bed is a **rental only** and must be billed as a daily rate by reporting total number of days used as units. If the unit is billed as a capped rental, the rental payment would be inclusive of the following:

- All accessories needed to use the equipment.
- Education on the proper use and care of the equipment.
- Routine servicing and all necessary repairs or replacements to make the unit functional.

For a powered air flotation bed, if use exceeds a ten-month time frame, report the "MS" modifier after six months of continued maintenance and servicing of the item. (MS - six-month maintenance and servicing fee for reasonable and necessary parts and labor that are not covered under any manufacturer or supplier warranty).

### 2.42 SUPPORT SURFACES - GROUP 3

#### Definition

Pressure Reducing Support Surfaces - Group 3 are fully integrated air fluidized beds for the purpose of alleviating pressure. The surface uses the circulation of filtered air through silicone coated ceramic beads that creates the characteristics of fluid.

#### Standards of Coverage

A Group 3 air-fluidized bed is covered for up to 90 days if all of the following applies:

- The beneficiary has a Stage III (full thickness tissue loss) or Stage IV (deep tissue destruction) pressure ulcer.
- The beneficiary is bedridden or chairbound as a result of severely limited mobility.
- The beneficiary’s attending physician orders in writing an air-fluidized bed based on a comprehensive assessment and evaluation of the beneficiary after conservative treatment has been tried without success.
- A trained adult caregiver is available to assist the beneficiary with ADLs, fluid balance, dry skin care, repositioning, recognition and management of altered mental status, dietary needs, prescribed treatments and management of the air-fluidized bed.
- A physician directs the home treatment regimen, and re-evaluates the need for the air-fluidized bed on a monthly basis.
- All other conservative treatment methods have been tried without success (e.g., Group 1 or Group 2 support surfaces).
| **Continued Use** of a Group 3 support surface | - Continued use of a Group 3 support surface may be covered for restorative purposes only when healing continues to progress.  
  - Continued use of a Group 3 support surface will not be reauthorized for coverage if:  
    - Beneficiary is noncompliant with care plan; or  
    - Documentation in the medical record demonstrates that other aspects of the plan of care are not being modified to promote healing. |
|---|---|
| **Noncovered Support Services** | - Group 3 support surfaces are noncovered if:  
  - Beneficiary requires treatment with wet soaks or moist wound dressings that are not protected with an impervious covering such as plastic wrap or other occlusive material.  
  - Caregiver is unwilling or unable to provide the type of care required by the beneficiary on a air-fluidized bed.  
  - Structural support is inadequate to support the weight of the air-fluidized bed system.  
  - Electrical system is inadequate for the anticipated increase in energy consumption.  
  - Other known contraindications exist. |
| **Documentation** | - Documentation must be less than 14 days old and include the following:  
  - Diagnosis/medical condition related to the need for the bed.  
  - Size, stage and location of the ulcer.  
  - Other treatment modalities already tried.  
  - Education of the beneficiary and/or caregiver on the prevention and/or management of pressure ulcers.  
  - Monthly assessment by a nurse, physician, or other licensed healthcare practitioner.  
  - Appropriate turning and positioning.  
  - Current appropriate wound care (for a Stage II, III, or IV ulcer).  
  - Appropriate management of moisture/incontinence.  
  - Nutritional assessment and intervention consistent with the overall plan of care. |
| **PA Requirements** | - PA is required for all Group 3 support surface requests. |
| **Payment Rules** | - A Group 3 support surface or air fluidized bed is a **rental only** item and must be billed as a daily rate by reporting total number of days used as units. The rental payment is considered to include the following:  
  - All accessories needed to use the equipment.  
  - Education on the proper use and care of the equipment.  
  - Routine servicing and all necessary repairs or replacements to make the unit functional.  
  - If use exceeds a 10-month timeframe, report the "MS" modifier after six months of continued maintenance and servicing of the item. |
# 2.43 Surgical Dressings

## Definition
Surgical dressings include a primary dressing (used as a protective covering applied directly to the wound or lesion) and/or a secondary dressing (used to secure a primary dressing in place). Many of the primary dressings covered by MDHHS are self-adhesive and would not require a secondary dressing to be placed as well. Examples of surgical dressing are adhesive tape, roll gauze, and elastic bandages.

## Standards of Coverage
Surgical dressings are covered for one or more of the following:
- To treat a wound or opening in the skin.
- To debride a wound or lesion.
- To treat pressure ulcers.

Coverage of the quantity or type of dressing is based on:
- Size, stage, location and current status of the wound/lesions being treated.
- Number of wounds/lesions.
- Number of body locations involved.
- Frequency of dressing change.

## Documentation
Documentation must be less than 30 days old and include the following:
- Diagnosis/medical condition related to the need for the items(s).
- Item to be dispensed.
- Quantity of item needed per dressing change.
- Anticipated frequency of dressing change.
- Size, stage, location, and number of wounds/lesions.

For dressing requests of quantities over established limits, documentation to substantiate medical need is required.

## PA Requirements
PA is required for:
- Collagen dressings or wound fillers.
- Silicone gel sheets.
- Composite dressings.
- Quantities beyond Medicaid's established limits.

PA is not required for all other types of surgical dressings unless usage exceeds established quantity limitations.

## Payment Rules
All items are considered a purchase up to the allowable quantities. Modifiers A1 through A9 must be reported in addition to the HCPCS code to report the appropriate number of wounds being treated. The modifiers are as follows:
- A1 - Dressing for one wound
- A2 - Dressing for two wounds
- A3 - Dressing for three wounds
A4 – Dressing for four wounds
A5 – Dressing for five wounds
A6 – Dressing for six wounds
A7 – Dressing for seven wounds
A8 – Dressing for eight wounds
A9 – Dressing for nine or more wounds

Dressings related to infusion pumps, parenteral/enteral nutrition, tracheostomy, or gastrostomy are included in either the daily rate or in established all-inclusive kit codes and are not separately reimbursable.

2.44 TRACHEOSTOMY CARE SUPPLIES

Definition
Tracheostomy care supplies include, but are not limited to, tracheostomy filters, tubes, masks, care kits, cleaning brushes, shower protectors and suction catheters.

Standards of Coverage
Tracheostomy care supplies are covered to support the care of a beneficiary with a tracheostomy.

A tracheostomy starter kit may be covered for the four weeks following the initial tracheostomy surgery. The kit code includes the following items: Plastic tray, basin, sterile gloves, tube brush, pipe cleaners, a pre-cut tracheostomy dressing, a roll of gauze, drain sponges, cotton tip applicators, tracheostomy tube ties, or twill tape.

After the initial four weeks, the established tracheostomy kit may be covered. The kit code includes the following items: Tube brush, pipe cleaners, cotton tip applicators, tracheostomy tube ties or twill tape, and drain sponges.

Documentation
Documentation must be less than 90 days old and include the following:
- Diagnosis/medical condition.
- Specific items required.

PA Requirements
PA is not required when the Standards of Coverage are met and established quantity limits are not exceeded.

PA is required when:
- Standards of Coverage are not met.
- Quantities requested exceed the established limits.
- Other items not part of one of the kit codes may be considered for separate reimbursement. (Refer to the Medicaid Code and Rate Reference tool for additional information.)

Payment Rules
Payment is purchase only. All quantities reported should reflect a 30-day supply.

2.45 TRANSCUTANEOUS ELECTRICAL NERVE STIMULATOR

Definition
A Transcutaneous Electrical Nerve Stimulator (TENS) is a device that utilizes electrical current delivered through electrodes placed on the surface of the skin to decrease the beneficiary's perception of pain by inhibiting the transmission of afferent pain nerve impulses and/or stimulating the release of endorphins.
| Standards of Coverage | A TENS unit is covered for reduction of pain for beneficiaries with either chronic, intractable pain of at least three months duration, or acute post-operative pain limited to 30 days from the date of surgery, or pain related to cancer, when:  
• The beneficiary is able to use the TENS device.  
• There is effective control of pain.  
• Other treatment modalities have been ineffective. |
|-----------------------|---------------------------------------------------------------------------------------------------------------|
| Documentation         | Documentation must be less than 30 days old and must include all of the following:  
• Diagnosis/medical condition related to the need for a TENS (including type and location of pain).  
• Alternative treatments for pain tried and the results.  
• Other modalities of treatment still being used (type and duration must be detailed).  
For coverage beyond 90 days, include documentation addressing continued effective pain control. |
| PA Requirements       | PA is required for all requests. |
| Payment Rules         | A TENS unit may be considered as a capped rental. The rental payment is inclusive of the following:  
• All accessories needed to use the equipment (e.g., electrodes, lead wires, cables, etc.).  
• Education on the proper use and care of the equipment.  
• Routine servicing and all necessary repairs or replacements to make the unit functional. |
### 2.46 WALKERS

<table>
<thead>
<tr>
<th>Definition</th>
<th>Walkers include, but are not limited to, rigid, wheeled, heavy duty, and folding.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Standards of Coverage</td>
<td>Walkers may be covered when the beneficiary has impaired ambulation and requires a walker for safe and independent ambulation.</td>
</tr>
<tr>
<td>Documentation</td>
<td>Documentation must be less than six months old and include:</td>
</tr>
<tr>

<td>Walkers may be a <strong>capped rental</strong> or <strong>purchase</strong> item. After the first ten months of rental, necessary repairs and/or replacements of accessories are separately reimbursable.</td>
</tr>
</tbody>
</table>
## Wearable Cardioverter-Defibrillators

### Definition
A wearable cardioverter-defibrillator (WCD) is an external device intended to perform the same tasks as an implantable cardioverter-defibrillator (ICD) without requiring an invasive procedure. It is considered a bridge to permanent ICD placement.

The WCD consists of a vest, worn continuously underneath clothing, and contains cardiac monitoring electrodes that deliver a counter shock. The vest is connected to a monitor with a battery pack and alarm module that interprets the cardiac rhythm and determines when a counter shock is necessary. An alarm module alerts the patient to certain conditions by lights or voice messages.

### Standards of Coverage
The WCD may be considered medically necessary only as an interim treatment for patients at high risk of sudden cardiac arrest who:

- Have a left ventricular ejection fraction of 35% or less;
- Have a temporary contraindication to receiving an ICD (i.e., a systemic infection) at the current time; and
- Have experienced a documented episode of ventricular fibrillation or sustained (lasting 30 seconds or longer) ventricular tachyarrhythmia that was not due to a transient or reversible cause and did not occur during the first 48 hours of an acute myocardial infarction; and
- Are tentatively scheduled for an ICD placement procedure based on one of the following:
  - Received treatment with the goal of an ICD placement and have been scheduled for the ICD placement within three months; or
  - Had an ICD removed and have been scheduled for placement of another ICD once the contraindication has been treated.

WCDs will not be covered for investigational procedures or patient preference.

### Documentation
Documentation must include the following and be made available upon request unless otherwise noted in the Standards of Coverage and PA Requirements sections of this policy:

- Diagnosis/medical condition related to the need for the item.
- Specific item(s) required.
- Medical reason why receiving an ICD is not currently plausible.
- Current treatment plan and updated recommendations.
- Tentative scheduled date for ICD placement and/or date other ICD removed.

### PA Requirements
Food and Drug Administration (FDA)-registered WCDs are covered under the Medicaid and CSHCS programs with prior authorization (PA). Requests for PA (form MSA-1653-B) may only be submitted by the beneficiary's managing cardiologist and must include a current treatment plan and updated recommendations.

PAs are approved for 30 days at a time for a maximum of three months. For continued medical need beyond 30 days, a new PA request must be submitted documenting all of the following:

- The beneficiary’s response to and continued need for the WCD;
- The anticipated date of the ICD procedure; and
• Documentation of the beneficiary's compliance with wearing the WCD. The compliance report should demonstrate a compliance rate of at least 92% for the previous 30-day period. Requests for continued PA beyond the maximum of three months will be considered on a case-by-case basis.

Payment Rules
WCDs are rental only items. The rental fee includes the vest, monitoring electrodes, therapy electrodes and batteries. The batteries, garments and electrodes may be replaced due to normal use and wear of the WCD and require PA.

2.48 WHEELCHAIRS, PEDIATRIC MOBILITY AND POSITIONING MEDICAL DEVICES, AND SEATING SYSTEMS

2.48.A. DEFINITIONS

<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Wheelchair</td>
<td>A wheelchair has special construction consisting of a frame and wheels with many different options and includes, but is not limited to, standard, light-weight, high-strength, powered, etc.</td>
</tr>
<tr>
<td>Pediatric Mobility Product</td>
<td>Pediatric mobility products are pediatric-sized mobility and positioning medical devices (as defined by PDAC) that have a special light-weight construction consisting of a frame and wheels/base with many different options. Pediatric mobility devices include pediatric wheelchairs, transport chairs, hi/low chairs with outdoor/indoor bases, and standing systems designed specifically for children with special needs. These products must meet the definition of Durable Medical Equipment (DME) (refer to the Program Overview section of this chapter) and are not available as a commercial product or for which a commercial product can be used as an economic alternative.</td>
</tr>
<tr>
<td>Licensed Medical Professional</td>
<td>A licensed medical professional is defined as an occupational or physical therapist or a rehabilitation RN who has at least two years' experience in rehabilitation seating and is not an employee of the medical supplier. Medicaid policy requires that assessments must be performed by a licensed medical professional. A physical therapy assistant (PTA) or a licensed occupational therapy assistant (OTA) may not perform any part of the assessment or evaluation and may not complete or sign the MSA-1656.</td>
</tr>
<tr>
<td>Pediatric Subspecialist</td>
<td>A pediatric subspecialist is a physician who is board-certified in a pediatric subspecialty (such as a physiatrist, neurologist, or orthopedist). A pediatrician is not considered a pediatric subspecialist relative to this policy.</td>
</tr>
<tr>
<td>Institutional Residential Setting</td>
<td>An institutional residential setting refers to a nursing facility, hospital long-term care unit, or county medical care facility.</td>
</tr>
<tr>
<td>Community Residential Setting</td>
<td>A community residential setting is defined as a non-institutional setting in the community, i.e., beneficiary's own home, Adult Foster Care (AFC), Assisted Living or Group Home.</td>
</tr>
</tbody>
</table>
2.48.B. STANDARDS OF COVERAGE

### Manual Wheelchair in Community Residential Setting

May be covered if all of the following are met:

- Has a diagnosis/medical condition that indicates a lack of functional ambulatory status and ambulates less than 150 feet within one minute with or without an assistive medical device.
- Must be able to regularly use the wheelchair throughout the day.
- Must be able to be positioned in the chair safely and without aggravating any medical condition or causing injury.
- Purchase of a wheelchair is required for long-term use (greater than 10 months).
- Must be able to use the wheelchair in the home environment (e.g., wheelchair must be able to fit through doorways and cross thresholds)
- Must identify other economic alternatives considered.
- Must have a method to propel wheelchair, which may include:
  - Ability to self-propel for at least 60 feet over hard, smooth, or carpeted surfaces.
  - The beneficiary has a willing and able caregiver to push the chair if needed.

In addition:

- A **standard hemi-wheelchair** may be covered when a lower seat to the floor is required.

- A **standard light-weight wheelchair** may be covered when the beneficiary is unable to propel a standard wheelchair due to decreased upper extremity strength or secondary to a medical condition that affects endurance.

- A **heavy-duty standard wheelchair** may be covered if the beneficiary’s weight is more than 250 pounds but does not exceed 300 pounds. (Include patient’s weight in the beneficiary’s file.)

- An **extra heavy-duty standard wheelchair** is covered if the beneficiary's weight exceeds 300 pounds. (Include patient’s weight in the beneficiary’s file.)

- A **high-strength light-weight or ultra-light standard wheelchair** may be covered when required for a specific functional need.

- A **back-up or secondary standard manual wheelchair** may be considered when:
  - The beneficiary is primarily a power wheelchair user but needs a manual wheelchair to have access to the community or independent living.
  - The beneficiary’s medical condition requires a power wheelchair that cannot accommodate public transportation and, therefore, requires another transport device.

### Manual Wheelchair in Institutional Residential Setting

Coverage and reimbursement for all standard manual wheelchairs for an institutional residential setting is included in the per diem rate.
| Manual Wheelchair with Custom-Fabricated Seating System in both Community Residential and Institutional Residential Settings | May be covered if all of the following are met, in addition to the Standards of Coverage listed under Manual Wheelchair in Community Residential Setting:

- Medical documentation provides a clinical assessment of the specific functional/clinical need for a custom-fabricated seating system. Documentation must specifically rule out other standard seating systems. The seating system must also meet standards of coverage.
- Must accommodate growth and adjustments for custom-fabricated seating systems a minimum of 3” in depth and 2” in width.
- Is an integral part of the care regimen in the community residential setting or the daily nursing plan of care in an institutional residential setting. |
| --- |
| Power Wheelchair or Power-Operated Vehicle (POV) in Both Community Residential and Institutional Residential Settings | May be covered if the beneficiary meets all of the following:

- Lacks ability to propel a manual wheelchair, or has a medical condition that would be compromised by propelling a manual wheelchair, for at least 60 feet over hard, smooth, or carpeted surfaces with or without rest intervals.
- Requires use of a wheelchair for at least four hours throughout the day.
- Is able to safely operate, control and maneuver the wheelchair in their environmental setting, including through doorways and over thresholds up to 1½”, as appropriate.
- Has a cognitive, functional level that permits safe operation of a power mobility device with or without training.
- Has visual acuity that permits safe operation of a power mobility device.
- For a three-wheeled power mobility device, has sufficient trunk control and balance. |
| Pediatric Mobility Devices and Wheelchairs | May be covered if all of the following are met for each type of device. For CSHCS beneficiaries, a medical referral from an appropriate board-certified pediatric subspecialist or an Office of Medical Affairs (OMA)-approved physician is required. MDHHS also reserves the right to require a medical referral from an appropriate board-certified pediatric subspecialist for Medicaid beneficiaries.

**For manual pediatric wheelchairs:**

- Has a diagnosis/medical condition that indicates a lack of functional ambulatory status with or without an assistive medical device or has a willing and able caregiver to push the chair and the wheelchair is required in a community residential setting.
- Is required for long-term use (greater than 10 months).
- Must accommodate growth and adjustments for seating systems a minimum of 3” in depth and 2” in width.
- Is designed to be transportable.
- Is the most economical alternative available to meet the beneficiary’s mobility needs.

**For power wheelchairs:**

- Lacks ability to propel a manual wheelchair, or has a medical condition that would be compromised by propelling a manual wheelchair, for at least 60 feet over hard, smooth, or carpeted surfaces (this includes the need to rest at intervals). |
- Is able to safely control the wheelchair through doorways and over thresholds up to 1½”.
- Has a cognitive, functional level that is adequate for power wheelchair mobility.
- Has visual acuity that permits safe operation of a power mobility device.
- Must accommodate growth and adjustments for custom-fabricated seating systems a minimum of 3” in depth and 2” in width.
- For a three-wheeled power mobility device, has sufficient trunk control and balance.

**For transport mobility medical devices (e.g., strollers):**
- Is over three years of age or has a medical condition that cannot be accommodated by commercial products.
- Will be the primary mobility device due to inability to self-propel a manual wheelchair or operate a power wheelchair.
- Is required as a transport device when the primary wheelchair cannot be designed to be transportable.
- Must accommodate growth and adjustments for seating systems a minimum of 3” in depth and 2” in width.
- Is the most economical alternative available to meet the beneficiary’s mobility needs.
- Is required for use in the community residential setting.

**For pediatric standing systems with or without wheels:**
- Is able to utilize the product without being compromised medically or functionally.
- Has a plan of care that documents how the standing system will be used in the community residential setting.
- Documentation addresses economic alternatives, including dynamic vs. non-dynamic factors.
- Other economic alternatives have been ineffective.
- Must accommodate growth and adjustments for seating systems a minimum of 3” in depth and 2” in width.

For CSHCS beneficiaries, a medical referral from an appropriate board-certified pediatric subspecialist or an Office of Medical Affairs (OMA)-approved physician is required. MDHHS also reserves the right to require a medical referral from an appropriate board-certified pediatric subspecialist for Medicaid beneficiaries.

**For pediatric hi/low chairs:**
- Positioning cannot be accommodated by use of other mobility devices or commercial products.
- Is required for independent transfers.
- All mobility products with interchangeable bases and seating systems have been ruled out as economic alternatives.
- Must accommodate growth and adjustments for seating systems a minimum of 3” in depth and 2” in width.
### Standard Seating System in Community Residential Setting
May be covered when required to assure safe mobility and functional positioning when the beneficiary has postural deformities, contractions, tonal abnormalities, functional impairments, muscle weakness, pressure points, and seating balance difficulties.

May be covered if all of the following are met:
- Two or more of the above clinical indications are documented in the medical record and in the mobility assessment.
- Must accommodate growth and adjustments a minimum of 3” in depth and 2” in width.
- Must document the reason for the selection when the system cannot be used in more than one mobility device.
- Is the most economical alternative available to meet the beneficiary's mobility needs.

For CSHCS pediatric beneficiaries, a written order from an appropriate board-certified pediatric subspecialist or an Office of Medical Affairs (OMA)-approved physician is required. MDHHS also reserves the right to require a written order from an appropriate board-certified pediatric subspecialist for Medicaid beneficiaries.

### Custom-Fabricated Seating Systems
May be covered when required to assure safe mobility and functional positioning when the beneficiary has postural deformities, contractions, tonal abnormalities, functional impairments, muscle weakness, pressure points, and seating balance difficulties. May be covered if all of the following are met:
- Two or more of the above clinical indications are documented in the medical record and in the mobility assessment, and the severity of the clinical indications cannot be accommodated by a standard seating system.
- Must accommodate growth and adjustments a minimum of 3” in depth and 2” in width.
- Must document the reason for the selection when the system cannot be used in more than one mobility device.
- Is the most economical alternative available to meet the beneficiary's mobility needs.

For CSHCS pediatric beneficiaries, a written order from an appropriate board-certified pediatric subspecialist or an Office of Medical Affairs (OMA)-approved physician is required. MDHHS also reserves the right to require a written order from an appropriate board-certified pediatric subspecialist for Medicaid beneficiaries.

### Manual or Power Recline Feature
May be covered when needed for relief of pressure on the seat and/or back, and one of the following applies:
- History of skin breakdown or current indication of imminent skin breakdown that cannot be controlled (or has not in the past) by less costly modalities (such as pressure relief cushions or manual pressure relief techniques).
- Has ability to tolerate a 90-135 degree range of motion at the hip, needed for reclining without triggering excessive abnormal tone.
- Is unable to tolerate an upright position in a wheelchair for long periods of time due to fatigue, shortness of breath, increased tone, or discomfort related to pressure that cannot be manually relieved.
A low shear recline back is covered when the beneficiary does not have the ability to reposition themselves in the wheelchair following reclining and the shearing would result in skin breakdown.

<table>
<thead>
<tr>
<th><strong>Manual Tilt-in-Space or Recline Function in Community Residential Setting</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Manual tilt-in-space</strong> function allows the seat and back of the wheelchair to move as a unit, such that the angle of the back to the floor changes from approximately 90 degrees to 45 degrees or less. This change in position does not affect the hip-to-knee angle. The seat may be tilted manually.</td>
</tr>
</tbody>
</table>

The **tilt-in-space** function for a wheelchair may be covered if **one or more** of the following apply:

- History of skin breakdown or current indication of imminent skin breakdown that cannot be controlled (or has not in the past) by less costly modalities (such as pressure relief cushions or manual pressure relief techniques).
- Excessive extensor or flexor muscle tone that is exacerbated by change in hip angle and makes positioning in any upright chair ineffective. State reason why changing angles of position is medically necessary.
- Very low muscle tone that cannot maintain upright positioning against gravity, causing spinal anomalies.
- Beneficiary has knee contractures and a custom-molded seating system.

Coverage of both a **manual tilt-in-space and recline function** for a wheelchair requires medical need (such as high probability of the development of hip contractures) if only a tilt-in-space without recline is used. Also, there is a medical contraindication to using recline-only without the tilt-in-space function.

<table>
<thead>
<tr>
<th><strong>Power Tilt-in-Space or Recline Function in Both Community Residential and Institutional Residential Settings</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Power tilt-in-space or recline</strong> function may be covered if <strong>all</strong> of the following exist:</td>
</tr>
<tr>
<td>- An existing medical condition results in the inability to reposition self without the use of a power tilt or recline mechanism.</td>
</tr>
<tr>
<td>- The frequency of repositioning is clinically indicated and is an integral part of the nursing facility plan of care.</td>
</tr>
<tr>
<td>- Beneficiary requires assistance to use a manual tilt-in-space or recline system, and there are regular periods of time that the beneficiary is without assistance.</td>
</tr>
<tr>
<td>- Beneficiary requires assistance to use a manual tilt-in-space or recline system, and is able to independently care for himself when provided a power tilt-in-space or recline modification.</td>
</tr>
</tbody>
</table>

For CSHCS pediatric beneficiaries, a written order from an appropriate board-certified pediatric subspecialist or an Office of Medical Affairs (OMA)-approved physician is required. MDHHS also reserves the right to require a written order from an appropriate board-certified pediatric subspecialist for Medicaid beneficiaries.

<table>
<thead>
<tr>
<th><strong>Wheelchair Accessories</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Reimbursement may be made for separate wheelchair accessories that have designated HCPCS codes. Separate reimbursement may be considered for specific wheelchair accessory codes when provided in conjunction with the purchase of a manual wheelchair, power wheelchair, or an addition to an existing wheelchair if:</td>
</tr>
<tr>
<td>- It is required to provide safety.</td>
</tr>
<tr>
<td>- It is required for appropriate positioning.</td>
</tr>
<tr>
<td>- It is the most economical alternative.</td>
</tr>
</tbody>
</table>
For additions to an existing wheelchair, the physician or the occupational or physical therapist must address the status/condition of the current wheelchair and include the brand, model, serial number, and age of the current wheelchair. If MDHHS did not purchase the wheelchair being modified, all documentation requirements must be provided as if the request is for a new or initial wheelchair. Refer to the Non-Covered Items section of this chapter for information on accessories that are not covered.

2.48.C. PRIOR AUTHORIZATION FOR PURCHASE, RENTALS, REPAIRS, AND/OR REPLACEMENT OF MOBILITY DEVICES

| Prior Authorization | The Medicaid Utilization Analyst (Program Review Division) is the authorized Medicaid representative who determines if the service requested falls within the standards of coverage. A prior authorization request may be returned or denied if the documentation is incomplete and not specific to the beneficiary and device requested. MDHHS reserves the right to request additional documentation to determine medical necessity. For CSHCS beneficiaries, a medical referral from an appropriate board-certified pediatric subspecialist or an Office of Medical Affairs (OMA)-approved physician is required. MDHHS also reserves the right to require a medical referral from an appropriate board-certified pediatric subspecialist for Medicaid beneficiaries. For beneficiaries in the community residential setting, the decision notice is sent to the medical supplier with a copy to the beneficiary. For beneficiaries in the institutional residential setting, the decision notice is sent to the institutional residence with a copy to the beneficiary. Prior authorization is required for:

- Power wheelchairs, power-operated vehicles, seating, and accessories.
- New and replacement custom-fabricated seating systems, and the addition of functions for tilt-in-space and/or recline (power or manual).
- Diagnosis/medical conditions that are not listed as approved to bypass prior authorization for pediatric mobility items.
- Replacement of standard wheelchairs beyond established timeframes. Standard wheelchairs with specified accessories/add-ons do not require prior authorization if the Standards of Coverage and Documentation requirements are met. Consult the Medicaid Code and Rate Reference tool and the Wheelchair/Power-Operated Mobility Accessory Reimbursement document on the MDHHS website for accessories/add-on items that require prior authorization and/or are included in the wheelchair base. (Refer to the Directory Appendix for website information.) |

| Clinical Documentation | The evaluation and clinical documentation (MSA-1656) must be submitted within 90 days of the date the evaluation was completed. Clinical documentation must include how the requested seating or mobility device is the most appropriate to assist in performing MRADL. For CSHCS beneficiaries, a medical referral from an appropriate board-certified pediatric subspecialist or an Office of Medical Affairs (OMA)-approved physician is required. MDHHS also reserves the right to require a medical referral from an appropriate board-certified pediatric subspecialist for Medicaid beneficiaries. |
## Prior Authorization Exceptions

Prior authorization is **not** required for the following if standards of coverage are met:

- Specific accessory codes and/or repair codes.
- Specific pediatric mobility devices that do not include any accessories if the related diagnosis/condition is one of the following:
  - Spinal Muscular Atrophy
  - Motor Neuron Disease
  - Anterior Horn Cell Disease, Unspecified
  - Other Anterior Horn Cell Disease
  - Hemiplegia and Hemiparesis
  - Infantile Cerebral Palsy
  - Myoneural Disorders, Unspecified
  - Other Specified Myoneural Disorders
  - Spina Bifida with Hydrocephalus
  - Spina Bifida without Mention of Hydrocephalus
  - Spina Bifida (Other Congenital Anomalies of Nervous System)
  - Microcephalus
  - Reduction Deformities of Brain
  - Congenital Hydrocephalus
  - Muscular Dystrophies and Other Myopathies

**NOTE:** If prior authorization is required for any component of the mobility device (including accessories), then PA is required for the device as well. For example, if a custom-fabricated seating system is required, then prior authorization for the pediatric mobility device is also required.

## Rentals, Repairs and Replacement

A wheelchair can be considered a **capped rental** or a **purchase** item.

**Repairs** for beneficiary-owned mobility devices are covered only after the manufacturer's warranty has been exhausted. It is the responsibility of the provider to supply loaner equipment while the original item is being serviced. If repair of a wheelchair not purchased by MDHHS is requested, the item must be medically necessary and meet the basic standards of coverage. The repair of a second (older) manual or power wheelchair used as a back-up wheelchair is not covered. Repair of a wheelchair involving the replacement of a component part includes the cost of the part and the labor associated with its removal, replacement, and finishing.

**Replacement** of a mobility device is subject to the manufacturer's warranty and/or cost of repairs. The replacement may also be considered when a significant change in the beneficiary's condition has occurred or the item cannot be restored to a serviceable condition. Replacement of wheelchairs for youth will be evaluated on an individual basis due to the expected growth pattern. Based on these conditions, a wheelchair may be considered for replacement every five years for adults and every two years for children.
Medicaid will not authorize coverage of replacement of any DME item or accessory that is requested solely because new technology is available. Replacement or modifications must be medically necessary and required as a result of a change in the medical condition that makes the covered service unusable or contraindicated.

Prior Authorization Process for Beneficiaries in the Community Residential Setting

The prior authorization process for beneficiaries in the community residential setting is initiated by the treating physician's written order for a seating/mobility evaluation that includes the reason for the referral. The evaluation must be completed by a licensed medical professional using the Evaluation and Medical Justification for Complex Seating Systems and Mobility Devices form (MSA-1656).

(Refer to the Prior Authorization Form subsection and the Evaluation and Medical Justification for Complex Seating Systems and Mobility Devices Form subsection of this chapter for additional information.)

Prior Authorization Process for Beneficiaries in the Institutional Residential Setting

Prior authorization is required for Medicaid coverage and separate reimbursement for medically necessary power-operated vehicles and power or manual wheelchairs with custom-fabricated seating systems. The request for a resident assessment must be initiated by the treating physician with the stated medical reason for the referral. Facility clinicians who are responsible for the overall nursing plan of care and treatment of the resident will prepare and submit prior authorization requests and medical documentation directly to the MDHHS Program Review Division.

Refer to the Nursing Facility Coverages chapter for additional information regarding prior authorization of wheelchairs and custom-fabricated seating systems for beneficiaries in an institutional residential setting.

(Refer to the Prior Authorization Form subsection and the Evaluation and Medical Justification for Complex Seating Systems and Mobility Devices Form subsection of this chapter for additional information.)

2.49 Ventilators

Definition

A ventilator is a device designed to intermittently or continuously assist or control pulmonary ventilation.

- A negative pressure ventilator exerts negative (subatmospheric) pressure on the exterior chest wall.
- A positive pressure ventilator ventilates the lungs as the result of a positive pressure applied to the airway.

Standards of Coverage

Negative and positive pressure ventilators may be covered when there is a respiratory related diagnosis (e.g., neuromuscular disease, thoracic restrictive disease, chronic respiratory failure) and the beneficiary requires ventilator assistance.

Documentation

Documentation must be less than 90 days old and include the following:

- Respiratory diagnosis/medical condition related to the need for the ventilator.
- Type of ventilator ordered.
- Ventilator settings.
- Number of hours beneficiary is required to use the ventilator.

PA Requirements

PA is required for all ventilators.
<table>
<thead>
<tr>
<th>Payment Rules</th>
<th>All ventilators are a <strong>rental only</strong> item and are inclusive of the following:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>- All accessories needed to use the unit (e.g., circuits, water feed sets, adaptors,</td>
</tr>
<tr>
<td></td>
<td>temperature probes, filters, heated or nonheated humidifier, oxygen analyzer,</td>
</tr>
<tr>
<td></td>
<td>water or saline for humidifier, etc.).</td>
</tr>
<tr>
<td></td>
<td>- Education on the proper use and care of the equipment.</td>
</tr>
<tr>
<td></td>
<td>- Routine servicing and all necessary repairs or replacements to make the unit</td>
</tr>
<tr>
<td></td>
<td>functional.</td>
</tr>
</tbody>
</table>

An additional ventilator may only be covered to allow a beneficiary access to the community. When billing more than one vent, the additional vent must be reported using a NOC code. A backup ventilator in case of a power failure is not separately reimbursable.
**MI CHOICE WAIVER**

**SECTION 1 - GENERAL INFORMATION**

MI Choice is a waiver program operated by the Michigan Department of Health and Human Services (MDHHS) to deliver home and community-based services to elderly persons and persons with physical disabilities who meet the Michigan nursing facility level of care criteria that supports required long-term care (as opposed to rehabilitative or limited term stay) provided in a nursing facility. The waiver is approved by the Centers for Medicare & Medicaid Services (CMS) under section 1915(c) and section 1915(b) of the Social Security Act. MDHHS carries out its waiver obligations through a network of enrolled providers that operate as Prepaid Ambulatory Health Plans (PAHPs). These entities are commonly referred to as waiver agencies. MDHHS and its waiver agencies must abide by the terms and conditions set forth in the waiver.

MI Choice services are available to qualified participants throughout the state, and all provisions of the program are available to each qualified participant unless otherwise noted in this policy and approved by CMS. MDHHS will not enact any provision to the MI Choice program that prohibits or inhibits a participant's access to a person-centered plan of service, discourages participant direction of services, interferes with a participant's right to have grievances and complaints heard, or endangers the health and welfare of a participant. The program must monitor and actively seek to improve the quality of services delivered to participants. Safeguards are utilized to ensure the integrity of payments for waiver services and the adequacy of systems to maintain compliance with federal requirements.

Waiver agencies are required to provide oral and written assistance to all Limited English Proficient applicants and participants. Agencies must arrange for translated materials to be accessible or make such information available orally through bi-lingual staff or through the use of interpreters.
SECTION 2 – ELIGIBILITY

The MI Choice program is available to persons 18 years of age or older who meet each of three eligibility criteria:

- An applicant must establish their financial eligibility for Medicaid services as described in the Financial Eligibility subsection of this chapter.
- The applicant must meet functional eligibility requirements through the online version of the Michigan Medicaid Nursing Facility Level of Care Determination (LOCD).
- It must be established that the applicant requires at least two waiver services, one of which must be Supports Coordination, and that the service needs of the applicant cannot be fully met by existing State Plan or other services.

All criteria must be met in order to establish eligibility for the MI Choice program. MI Choice participants must continue to meet these eligibility requirements on an ongoing basis to remain enrolled in the program.

2.1 FINANCIAL ELIGIBILITY [CHANGE MADE 7/1/18]

Medicaid reimbursement for MI Choice services requires a determination of Medicaid financial eligibility for the applicant by MDHHS. As a provision of the waiver, MI Choice applicants benefit from an enhanced financial eligibility standard compared to basic Medicaid eligibility. Specifically, MI Choice is furnished to participants in the special home and community-based group under 42 CFR §435.217 with a special income level equal to 300% of the SSI Federal Benefit Rate. Medicaid eligibility rules stipulate that participants are not allowed to spend-down to the income limit to become financially eligible for MI Choice.

To initiate financial eligibility determination, waiver agencies must enter enrollment notifications electronically in CHAMPS. Once the electronic enrollment is completed in CHAMPS, the participant will be assigned an associated MI Choice Program Enrollment Type (PET) code. Waiver agencies must enter disenrollment notifications electronically in CHAMPS to notify MDHHS of participants who are no longer enrolled in MI Choice. Once an electronic disenrollment is completed in CHAMPS, the participant’s PET code will end date to reflect a disenrollment date. Proper recordkeeping requirements must be followed and reflected in the applicant’s or participant’s case record. (revised per bulletin MSA 17-46)

2.2 FUNCTIONAL ELIGIBILITY

The MI Choice waiver agency must verify an applicant’s medical/functional eligibility for program enrollment by inputting a valid Michigan Medicaid Nursing Facility Level of Care Determination (LOCD) into the online LOCD application. A valid LOCD is defined as an LOCD that was completed in-person with the applicant according to MDHHS policy and put in the online LOCD application within 14 calendar days after the date of enrollment into the MI Choice program. (Refer to the Directory Appendix for website information.) The LOCD is discussed in the Michigan Medicaid Nursing Facility Level of Care Determination subsection of this chapter. Additional information can be found in the Nursing Facility Coverages Chapter and is applicable to MI Choice applicants and participants.

The applicant must also demonstrate a continuing need for and use of at least two covered MI Choice services, one of which must be Supports Coordination. This need is originally established through the
Initial Assessment using the process outlined in the Need for MI Choice Services subsection of this chapter.

2.2.A. MICHIGAN MEDICAID NURSING FACILITY LEVEL OF CARE DETERMINATION

MI Choice applicants are evaluated for functional eligibility via the Michigan Medicaid Nursing Facility Level of Care Determination. The LOCD is available online through MI Login in CHAMPS. (Refer to the Directory Appendix for website information.)

Applicants must qualify for functional eligibility through one of seven doors. These doors are:

- Door 1: Activities of Daily Living Dependency
- Door 2: Cognitive Performance
- Door 3: Physician Involvement
- Door 4: Treatments and Conditions
- Door 5: Skilled Rehabilitation Therapies
- Door 6: Behavioral Challenges
- Door 7: Service Dependency

The LOCD must be completed in person by a health care professional (physician, registered nurse (RN), licensed practical nurse (LPN), licensed social worker (BSW or MSW), or a physician assistant) or be completed by staff that have direct oversight by a health care professional. The person completing the LOCD must either be waiver agency staff or in the waiver agency's provider network.

The online version of the LOCD must be completed within 14 calendar days after the date of enrollment in MI Choice for the following:

- All new Medicaid-eligible enrollees
- Non-emergency transfers of Medicaid-eligible participants from their current MI Choice waiver agency to another MI Choice waiver agency
- Non-emergency transfers of Medicaid-eligible residents from a nursing facility that is undergoing a voluntary program closure and who are enrolling in MI Choice

Annual online LOCDs are not required, however, subsequent redeterminations, progress notes, or participant monitoring notes must demonstrate that the participant continues to meet the level of care criteria on a continuing basis. If waiver agency staff determines that the participant no longer meets the functional level of care criteria for participation (e.g., demonstrates a significant change in condition), another face-to-face online version of the LOCD must be conducted reflecting the change in functional status. This subsequent redetermination must be noted in the case record and signed by the individual conducting the determination.

Copies of the LOCD for participants must be retained by the waiver agency for a minimum period of six years. This information is also retained in the MDHHS LOCD
database. For individuals who do not meet the LOCD criteria, a paper copy of the LOCD must be retained in the applicant’s record for no less than three years.

2.2.B. FREEDOM OF CHOICE

Applicants or their legal representatives must be given information regarding all long-term care service options for which they qualify through the nursing facility LOCD, including MI Choice, Nursing Facility and the Program of All-Inclusive Care for the Elderly (PACE). Qualified applicants may only enroll in one of these long-term care programs at any given time. Nursing facility, PACE, MI Choice, and Adult Home Help services cannot be chosen in combination with each other. Applicants must indicate their choice, subject to the provisions of the Need for MI Choice Services subsection of this chapter, and document via their signature and date that they have been informed of their options via the Freedom of Choice (FOC) form that is provided to an applicant at the conclusion of any LOCD process. Applicants must also be informed of other service options that do not require Nursing Facility Level of Care, including Home Health and Home Help State Plan services, as well as other local public and private service entities. The FOC form must be signed and dated by the supports coordinator and the applicant (or their legal representative) seeking services and is to be maintained in the applicant’s case record.

2.2.C. RETROSPECTIVE REVIEW AND MEDICAID RECOVERY

MDHHS or its designee will perform retrospective reviews to validate the LOCD as performed by waiver agencies. The waiver agency must submit all supporting medical documentation requested by MDHHS or its designee. If the participant is found to be ineligible for MI Choice, MDHHS will recover all Medicaid payments made for the services rendered during the period of ineligibility. The Retrospective Review process (defined in the Beneficiary Eligibility and Admission Process Section of the Nursing Facility Coverages Chapter) is applicable to MI Choice providers.

Determinations resulting from such retrospective reviews may be appealed by the waiver agency through procedures established by MDHHS.

2.3 NEED FOR MI CHOICE SERVICES

In addition to meeting financial and functional eligibility requirements and to be enrolled in the program, MI Choice applicants must demonstrate the need for a minimum of two covered services, one of which must be Supports Coordination, as determined through an in-person assessment and the person-centered planning process. Applicants must also agree to accept to receive MI Choice services on a regular basis, at least every 30 days.

An applicant cannot be enrolled in MI Choice if their service and support needs can be fully met through the intervention of State Plan or other available services. State Plan and MI Choice services are not interchangeable. MI Choice services differ in nature and scope from similar State Plan services and often have more stringent provider qualifications.
2.3.A. INITIAL ASSESSMENT OF PARTICIPANTS

The MI Choice program has established the Resident Assessment Instrument – Home Care (iHC) as the approved assessment instrument for assessing the functional status of participants. The MI Choice Intake Guidelines, LOCD, and the iHC are not interchangeable tools. (Documents are available on the MDHHS website. Refer to the Directory Appendix for website information.)

Initial assessments are conducted by teams consisting of a minimum of a registered nurse and a social worker, both of whom are properly licensed by the State of Michigan.

2.3.B. REASSESSMENT OF PARTICIPANTS

Reassessments are conducted by either a properly licensed registered nurse or a social worker, whichever is most appropriate to address the circumstances of the participant. A team approach that includes both disciplines is encouraged whenever feasible or necessary. Reassessments are done in person with the participant at the participant’s home.

The supports coordinator documents that the participant continues to meet the nursing facility level of care within the case record, specifying the appropriate “door” through which the participant meets level of care criteria. Reassessments are conducted in person 90 days after the initial assessment, with a reassessment every subsequent 180 days, or sooner upon a significant change in the participant’s condition. Supports coordinators track reassessment dates within the waiver agency’s information systems. If a supports coordinator determines the participant no longer meets the nursing facility level of care, the supports coordinator initiates program discharge procedures and provides the participant with advance notice and information on appeal rights. A refusal which prevents a redetermination within the 180-day window is cause for termination from the program.
SECTION 3 – ENROLLMENT

MI Choice waiver agencies determine the enrollment dates upon MDHHS financial eligibility verification, and termination dates for each participant for whom they provide waiver services. No applicant shall be granted enrollment status without fully meeting all eligibility requirements. MI Choice applicants require at least two waiver services on a continual basis, one of which must be Supports Coordination, in order to be enrolled in MI Choice. When a potentially eligible applicant cannot be enrolled due to the agency being at capacity, the applicant is placed on a waiting list. Refer to the Waiting Lists subsection for additional information. MDHHS reviews and provides final approval for determinations that result in enrollment, denials or terminations for MI Choice.

3.1 GENERAL PROVISIONS OF PARTICIPATION

There are a number of circumstances that play a role in the eligibility status of MI Choice participants. The following subsections define these impacts.

3.1.A. ENROLLMENT IN MEDICAID HEALTH PLANS AND OTHER PROGRAMS

A program participant cannot be simultaneously enrolled in both MI Choice and a Medicaid Health Plan, PACE program, or any other §1915(c) waiver. Applicants must choose one program in which they wish to enroll. It is not necessary to either delay MI Choice enrollment or withhold MI Choice services pending the disenrollment process from any of the Medicaid Health Plans.

3.1.B. INSTITUTIONAL STAYS

There are occasions when a MI Choice participant requires a short-term admission to an institutional setting for treatment. The impact of such an institutional stay is dependent on the type of admission and the length of the stay.

A short-term hospital admission does not necessarily impact a participant’s MI Choice enrollment status. The participant’s supports coordinator must temporarily suspend the delivery of waiver services during the hospital stay to avoid unnecessary or redundant service delivery from the hospital or MI Choice, however, the supports coordinator is not required to remove the participant from MI Choice. A participant who is hospitalized for more than 30 days must have their enrollment terminated.

A participant admitted to a nursing facility for rehabilitation services or for any reason must be removed from MI Choice on the date prior to the nursing facility admission. The individual may be re-enrolled into MI Choice upon discharge from the nursing facility as long as the individual meets eligibility criteria as described in the Eligibility section.
3.2 MI CHOICE INTAKE GUIDELINES

The MI Choice Intake Guidelines is a list of questions designed to screen applicants for eligibility and further assessment. Additional probative questions are permissible when needed to clarify eligibility. The MI Choice Intake Guidelines does not, in itself, establish program eligibility. A properly completed MI Choice Intake Guidelines is mandatory for MI Choice waiver agencies prior to placing applicants on a MI Choice waiting list when the agency is operating at its capacity. Individuals who score as Level C, Level D, Level D1 or Level E are those applicants determined potentially eligible for program enrollment and will be placed on the MI Choice waiting list. The date of the MI Choice Intake Guidelines contact establishes the chronological placement of the applicant on the waiting list. The MI Choice Intake Guidelines may be found on the MDHHS website. (Refer to the Directory Appendix for website information.)

When the waiver agency is at capacity, applicants requesting enrollment in MI Choice must either be screened by telephone or in person using the MI Choice Intake Guidelines at the time of their request for proper placement on the waiting list. If a caller is seeking services for another individual, the waiver agency shall either contact the applicant for whom services are being requested or complete the MI Choice Intake Guidelines to the extent possible using information known to the caller. For applicants who are deaf, hearing impaired, or otherwise unable to participate in a telephone interview, it is acceptable to use an interpreter, a third-party in the interview, or assistive technology to facilitate the exchange of information.

As a rule, nursing facility residents who are seeking to transition into MI Choice are not contacted by telephone but rather are interviewed in the nursing facility. For the purposes of establishing a point of reference for the waiting list, the date of the initial nursing facility visit (introductory interview) shall be considered the same as conducting a MI Choice Intake Guidelines, so long as the functional objectives of the MI Choice Intake Guidelines are met. (Refer to the Waiting Lists subsection for additional information.) Specifically, the introductory meeting must establish a reasonable expectation that the applicant will meet the functional and financial eligibility requirements of the MI Choice program within the next 60 days.

Applicants who are expected to be ineligible based on MI Choice Intake Guidelines information may request a face-to-face evaluation using the Michigan Medicaid Nursing Facility Level of Care Determination and financial eligibility criteria. Such evaluations should be conducted as soon as possible, but must be done within 10 business days of the date the MI Choice Intake Guidelines was administered. MI Choice waiver agencies must issue an adverse action notice advising applicants of any and all appeal rights when the applicant appears ineligible either through the MI Choice Intake Guidelines or a face-to-face evaluation.

When an applicant appears to be functionally eligible based on the MI Choice Intake Guidelines but is not expected to meet the financial eligibility requirements, the MI Choice waiver agency must place the applicant on the agency's waiting list if it is anticipated that the applicant will become financially eligible within 60 days. Individuals may be placed on the waiting lists of multiple waiver agencies.

The MI Choice Intake Guidelines is the only recognized tool accepted for telephonic screening of MI Choice applicants and is only accessible to MI Choice waiver agencies. It is not intended to be used for any other purpose within the MI Choice program, nor any other Medicaid program. MI Choice waiver agencies must collect MI Choice Intake Guidelines data electronically using software through the MDHHS contracted vendor.
3.3 Enrollment Capacity

MI Choice capacity is limited to the number of participants who can be adequately served under the annual legislative appropriation for the program. Enrollment capacity for each individual waiver agency is at the agency's discretion based on available funding and the expected costs of maintaining services to enrolled participants.

Waiver agencies are allocated a specific number of slots each fiscal year based upon legislative appropriation and must manage enrollments within that allocation.

3.4 Waiting Lists

Whenever the number of participants receiving services through MI Choice exceeds the existing program capacity, any screened applicant must be placed on the waiver agency’s waiting list. Waiting lists must be actively maintained and managed by each MI Choice waiver agency. The enrollment process for the MI Choice program is not ever actually or constructively closed. The applicant’s place on the waiting list is determined by priority category in the order described below. Within each category, an applicant is placed on the list in chronological order based on the date of their request for services. This is the only approved method of accessing waiver services when the waiver program is at capacity.

Each waiver agency must follow these waiting list removal guidelines when removing an applicant from the MI Choice waiting list. A MI Choice waiver agency may remove an applicant from the MI Choice waiting list if the applicant:

- Enrolled in MI Choice;
- Enrolled in another community-based service or program;
- Was admitted to a nursing facility and is no longer interested in MI Choice;
- Died;
- Moved out of state;
- Was not eligible for MI Choice;
- Was no longer interested in or refused MI Choice enrollment; or
- Was unable to be contacted by the waiver agency using all of the following methods:
  - The waiver agency called at least three times with a varied day of week and time of day.
  - If the waiver agency was able to leave a message, the applicant did not return the call within 10 business days.
  - The waiver agency sent a letter to the applicant with a deadline to contact the waiver agency within 12 business days, and the applicant either did not respond or mail was returned.

An Adequate Action Notice must be sent to the applicant no later than the date of removal from the MI Choice waiting list. MI Choice waiver agencies can obtain a template for the Adequate Action Notice on the MDHHS website. (Refer to the Directory Appendix for website information.)
3.4.A. PRIORITY CATEGORIES

Applicants will be placed on a waiting list by priority category and then chronologically by date of request of services. Enrollment in MI Choice is assigned on a first-come/first-served basis using the following categories, listed in order of priority given.

Waiver agencies are required to conduct follow-up phone calls to all applicants on their waiting list. The calls are to determine the applicant’s status, offer assistance in accessing alternative services, identify applicants who should be removed from the list, and identify applicants who might be in crisis or at imminent risk of admission to a nursing facility. Each applicant on the waiting list is to be contacted at least once every 90 days. Applicants in crisis or at risk require more frequent contacts. Each waiver agency is required to maintain a record of these follow-up contacts.

3.4.A.1. CHILDREN’S SPECIAL HEALTH CARE SERVICES (CSHCS) AGE EXPIRATIONS

This category includes only those applicants who continue to require Private Duty Nursing services at the time such coverage ends due to age restrictions under CSHCS.

3.4.A.2. NURSING FACILITY TRANSITIONS

Nursing facility residents who desire to transition to the community and will otherwise meet enrollment requirements for MI Choice qualify for this priority status and are eligible to receive assistance with supports coordination, transition activities, and transition costs. Priority status is not given to applicants whose service and support needs can be fully met by existing State Plan services.

3.4.A.3. ADULT PROTECTIVE SERVICES (APS) AND DIVERSIONS

An applicant with an active Adult Protective Services (APS) case is given priority when critical needs can be addressed by MI Choice services. It is not expected that MI Choice waiver agencies solicit APS cases, but priority is given when necessary.

An applicant is eligible for diversion priority if they are living in the community or are being released from an acute care setting and are found to be at imminent risk of nursing facility admission. Imminent risk of placement in a nursing facility is determined using the Imminent Risk Assessment (IRA), an evaluation developed by MDHHS. Use of the IRA is essential in providing an objective differentiation between those applicants at risk of a nursing facility placement and those at imminent risk of such a placement. Only applicants found to meet the standard of imminent risk are given priority status on the waiting list. Applicants may request that a subsequent IRA be performed upon a change of condition or circumstance.

Supports coordinators must administer the IRA in person. The design of the tool makes telephone contact insufficient to make a valid determination. Waiver agencies must submit a request for diversion status for an applicant to MDHHS. A final approval of a diversion request is made by MDHHS.
3.4.A.4. CHRONOLOGICAL ORDER BY SERVICE REQUEST DATE

This category includes applicants who do not meet any of the above priority categories or for whom prioritizing information is not known. As stated, applicants will be placed on the waiting list in the chronological order that they requested services as documented by the date of MI Choice Intake Guidelines completion or initial nursing facility introductory meeting.

3.5 ENROLLMENT SLOTS

CMS approves a given number of enrollment slots for the MI Choice program in the waiver application process. A slot consists of the enrollment of a participant for the duration of the fiscal year or, in other words, the total number of slots used is an unduplicated count of participants for the fiscal year. Therefore, a participant who might be enrolled and disenrolled from MI Choice numerous times throughout a given fiscal year utilizes only a single slot. Similarly, a participant might be disenrolled from the program at any given time, yet continues to occupy a slot until the conclusion of the fiscal year. It is an important distinction between that which constitutes enrollment and what is counted as a slot. Having a slot does not infer current enrollment.
**SECTION 4 – SERVICES**

The array of services provided by the MI Choice program is subject to the prior approval of CMS. Waiver agencies are required to provide any waiver service from the federally approved array that a participant needs to live successfully in the community, that is:

- indicated by the current assessment;
- detailed in the plan of service; and
- provided in accordance with the provisions of the approved waiver.

Services must not be provided unless they are defined in the plan of service and must not precede the establishment of a plan of service. Waiver agencies cannot limit in aggregate the number of participants receiving a given service or the number of services available to any given participant. Participants have the right to receive services from any willing and qualified provider.

MDHHS and waiver agencies do not impose a copayment or any similar charge upon participants for waiver services. MDHHS and waiver agencies do not impose a premium, enrollment fee, or similar cost-sharing arrangement on waiver participants.

Although MI Choice participants must have services approved by the waiver agency, participants have the option to select any participating provider in the waiver agency’s provider network, thereby assuring freedom of choice.

Where applicable, the participant must use Medicaid State Plan, Medicare, or other available payers first. The participant’s preference for a certain provider or agency is not grounds for declining another payer in order to access waiver services.

**4.1 COVERED WAIVER SERVICES**

In addition to regular State Plan coverage, MI Choice participants may receive services outlined in the following subsections.

**4.1.A. ADULT DAY HEALTH**

Adult Day Health services are furnished four or more hours per day on a regularly scheduled basis, for one or more days per week, or as specified in the service plan, in a non-institutional, community-based setting, encompassing both health and social services needed to ensure the optimal functioning of the participant. Meals provided as part of these services shall not constitute a “full nutritional regimen,” i.e., three meals per day. Physical, occupational and speech therapies may be furnished as component parts of this service.

Transportation between the participant’s residence and the Adult Day Health center is provided when it is a standard component of the service. Not all Adult Day Health centers offer transportation to and from their facility. Additionally, some of those that offer transportation only offer this service in a specified area. When the center offers transportation, it is a component part of the Adult Day Health service. If the center does
not offer transportation or does not offer it to the participant’s residence, then MI Choice would pay for the transportation to and from the Adult Day Health center separately.

Participants cannot receive Community Living Supports while at the Adult Day Health center. Payment for Adult Day Health services includes all services provided while at the center. Community Living Supports may be used in conjunction with Adult Day Health services, but cannot be provided at the exact same time.

4.1.B. RESpite

Respite services are provided to participants unable to care for themselves and are furnished on a short-term basis due to the absence of, or need of relief for, those individuals normally providing services and supports for the participant. Services may be provided in the participant’s home, in the home of another, or in a Medicaid-certified hospital or a licensed Adult Foster Care facility. Respite does not include the cost of room and board, except when provided as part of respite furnished in a facility approved by MDHHS that is not a private residence.

Services include:

- Attendant Care (participant is not bed-bound), such as companionship, supervision, and assistance with toileting, eating, and ambulation.
- Basic Care (participant may or may not be bed-bound), such as assistance with Activities of Daily Living (ADL), a routine exercise regimen, and self-medication.

There is a 30-days-per-calendar-year limit on respite services provided outside the home. The costs of room and board are not included except when respite is provided in a facility approved by the State that is not a private residence. Respite services cannot be scheduled on a daily basis, except for longer-term stays at an out-of-home respite facility. Respite should be used on an intermittent basis to provide scheduled relief of informal caregivers.

4.1.C. SUPPORTS COORDINATION

Supports Coordination is provided to assure the provision of supports and services required to meet the participant’s health and welfare needs in a home and community-based setting. Without these supports and services, the participant would otherwise require institutionalization. The supports coordination functions to be performed and the frequency of face-to-face and other contacts are specified in the participant’s plan of service. The frequency and scope of supports coordination contacts must take into consideration health and safety needs of the participant. Supports Coordination does not include the direct provision of other Medicaid services.

Supports coordinators perform the following functions:

- Conduct the initial and subsequent Nursing Facility Level of Care Determinations per state policy. Refer to the Functional Eligibility subsection for additional information.
- Conduct the initial Resident Assessment Instrument – Home Care assessment and periodic reassessments.
Facilitate a person-centered planning process that is focused on the participant’s preferences; includes family and other allies as determined by the participant; identifies the participant’s goals, preferences and needs; provides information about options; and engages the participant in monitoring and evaluating services and supports.

Assist the participant with developing a plan of service using the person-centered planning process, including revisions to the plan of service at the participant’s initiation or as changes in the participant’s circumstances may warrant.

Referral to, and coordinate with, providers of services and supports, including non-Medicaid services and informal supports. This may include providing assistance with access to entitlements or access to legal representation.

Monitor MI Choice waiver services and other services and supports necessary for achievement of the participants goals. Monitoring includes opportunities for the participant to evaluate the quality of services received and whether those services achieved desired outcomes. This activity includes the participant and other key sources of information as determined by the participant.

Provide social and emotional support to the participant and allies to facilitate life adjustments and reinforce the participant’s sources of support. This may include arranging services to meet those needs.

Provide advocacy in support of the participant’s access to benefits, assuring the participant’s rights as a program beneficiary, and supporting the participant’s decisions.

Maintain documentation of the above-listed activities to ensure successful support of the participant, comply with Medicaid and other applicable policies, and meet the performance requirements delineated in the waiver agency’s contract with MDHHS.

Additional guidance for Supports Coordination is located in the contract between MDHHS and MI Choice waiver agencies which is available online. (Refer to the Directory Appendix for website information.) In addition to requiring and accepting Supports Coordination services, applicants must also require and agree to accept one additional MI Choice service which is needed by the applicant every 30 calendar days in order to qualify for the program.

4.1.D. SPECIALIZED MEDICAL EQUIPMENT AND SUPPLIES

Specialized Medical Equipment and Supplies includes devices, controls, or appliances which enable participants to increase their abilities to perform activities of daily living, or to perceive, control, or communicate with the environment in which they live. This service also includes items necessary for life support or to address physical conditions, along with ancillary supplies and equipment necessary to the proper functioning of such items.

This service excludes those items that are not of direct medical or remedial benefit to the participant. Durable and non-durable medical equipment and medical supplies not available under the State Plan that are necessary to address the participant’s functional limitations may be covered by this service. Medical equipment and supplies furnished under the State Plan must be procured and reimbursed through that mechanism and not through MI Choice. All items must be specified in the participant’s plan of service.
All items shall meet applicable standards of manufacture, design and installation. Coverage includes training the participant or caregiver(s) in the operation and maintenance of the equipment or the use of a supply when initially purchased. Waiver funds may also be used to cover the maintenance costs of equipment.

Items reimbursed with waiver funds shall be in addition to any medical equipment and supplies furnished under the State Plan and shall exclude those items that are not of direct medical or remedial benefit to the participant.

4.1.E. Fiscal Intermediary

Fiscal Intermediary Services assist participants who choose the self-determination option in acquiring and maintaining services defined in the participant’s plan of service, controlling a participant’s budget, and choosing staff authorized by the waiver agency. The Fiscal Intermediary helps a participant manage and distribute funds contained in an individual budget. Funds are used to purchase waiver goods and services authorized in the participant’s plan of service. Fiscal Intermediary services include, but are not limited to, the facilitation of the employment of MI Choice service providers by the participant (including federal, state, and local tax withholding or payments, unemployment compensation fees, wage settlements), fiscal accounting, tracking and monitoring participant-directed budget expenditures and identifying potential over- and under-expenditures, and assuring compliance with documentation requirements related to management of public funds. The Fiscal Intermediary may also perform other supportive functions that enable the participant to self-direct needed services and supports. These functions may include verification of provider qualifications, including reference and criminal history reviews, and assisting the participant to understand billing and documentation requirements.

Fiscal Intermediary Services are available only to participants choosing the self-determination option.

4.1.F. Goods and Services

Goods and Services are services, equipment or supplies not otherwise provided through either MI Choice or the Medicaid State Plan that address an identified need in the individual plan of services (including improving and maintaining the participant’s opportunities for full membership in the community) and meet the following requirements. The item or service would:

- decrease the need for other Medicaid services,
- promote inclusion in the community, and
- increase the participant’s safety in the home environment.

These goods and services are only available if the participant does not have the funds to purchase the item or service or the item or service is not available through another source.
Goods and Services are only approved by CMS for participants choosing the self-determination option. Experimental or prohibited treatments are excluded. Goods and Services must be documented in the individual plan of services.

4.1.G. CHORE SERVICES

Chore Services are needed to maintain the home in a clean, sanitary and safe environment. This service includes heavy household chores such as washing floors, windows and walls, tacking down loose rugs and tiles, and moving heavy items of furniture in order to provide safe access and egress. Other covered services might include yard maintenance (mowing, raking and clearing hazardous debris such as fallen branches and trees) and snow plowing to provide safe access and egress outside the home. These types of services are allowed only in cases when neither the participant nor anyone else in the household is capable of performing or financially paying for them, and where no other relative, caregiver, landlord, community or volunteer agency, or third party payer is capable of, or responsible for, their provision. In the case of rental property, the responsibility of the landlord, pursuant to the lease agreement, will be examined prior to any authorization of service.

4.1.H. COMMUNITY LIVING SUPPORTS

Community Living Supports (CLS) facilitate an individual’s independence and promote participation in the community. CLS can be provided in the participant’s residence or in community settings. CLS include assistance to enable participants to accomplish tasks that they would normally do for themselves if able. The services may be provided on an episodic or a continuing basis. The participant oversees and supervises individual providers on an ongoing basis when participating in self-determination options. Tasks related to ensuring safe access and egress to the residence are authorized only in cases when neither the participant nor anyone else in the household is capable of performing or financially paying for them, and where no other relative, caregiver, landlord, community/volunteer agency, or third party payer is capable of or responsible for their provision. When transportation incidental to the provision of CLS is included, it shall not also be authorized as a separate waiver service for the participant. Transportation to medical appointments is covered by Medicaid through MDHHS.

CLS includes:

- Assisting, reminding, cueing, observing, guiding and/or training in household activities, ADL, or routine household care and maintenance.
- Reminding, cueing, observing and/or monitoring of medication administration.
- Assistance, support and/or guidance with such activities as:
  - Non-medical care (not requiring nurse or physician intervention) – assistance with eating, bathing, dressing, personal hygiene, and ADL;
  - Meal preparation, but does not include the cost of the meals themselves;
  - Money management;
  - Shopping for food and other necessities of daily living;
Social participation, relationship maintenance, and building community connections to reduce personal isolation;
Training and/or assistance on activities that promote community participation such as using public transportation, using libraries, or volunteer work;
Transportation (excluding to and from medical appointments) from the participant’s residence to community activities, among community activities, and from the community activities back to the participant’s residence; and
Routine household cleaning and maintenance.

- Dementia care including, but not limited to, redirection, reminding, modeling, socialization activities, and activities that assist the participant as identified in the individual’s person-centered plan.
- Staff assistance with preserving the health and safety of the individual in order that he/she may reside and be supported in the most integrated independent community setting.
- Observing and reporting any change in the participant’s condition and the home environment to the supports coordinator.

These service needs differ in scope, nature, supervision arrangements, or provider type (including provider training and qualifications) from services available in the State Plan. The differences between the waiver coverage and the State Plan are that the provider qualifications and training requirements are more stringent for CLS tasks as provided under the waiver than the requirements for these types of services under the State Plan.

CLS services cannot be provided in circumstances where they would be a duplication of services available under the State Plan or elsewhere. The distinction must be apparent by unique hours and units in the approved service plan.

4.1.1. COMMUNITY TRANSITION SERVICES

Community Transition Services (CTS) are non-recurrent expenses for participants transitioning from a nursing facility to a community setting. Allowable transition costs include the following:

<table>
<thead>
<tr>
<th>Housing or Security Deposits</th>
<th>A one-time expense to secure housing or obtain a lease.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Utility Hook-ups and Deposits</td>
<td>A one-time expense to initiate and secure utilities (television and internet are not included).</td>
</tr>
<tr>
<td>Furniture, Appliances, and Moving Expenses</td>
<td>One-time expenses necessary to occupy and safely reside in a community residence (diversion or recreational devices are not included).</td>
</tr>
<tr>
<td>Cleaning</td>
<td>A one-time cleaning expense to assure a clean environment, including pest eradication, allergen control, and over-all cleaning.</td>
</tr>
<tr>
<td>Coordination and Support Services</td>
<td>To facilitate transitioning of participant to a community setting.</td>
</tr>
</tbody>
</table>
CTS do not include monthly housing rental or mortgage expense, regular utility charges, or items that are intended for purely diversional and recreational purposes. Additional limitations on the amount, frequency, or duration of services are identified in the contract between the waiver agencies and MDHHS.

4.1.J. COUNSELING

Counseling services seek to improve the participant's emotional and social well-being through the resolution of personal problems or through changes in a participant's social situation.

Counseling services must be directed to participants who are experiencing emotional distress or a diminished ability to function. Family members, including children, spouses or other responsible relatives, may participate in the counseling session to address and resolve the problems experienced by the participant and to prevent future issues from arising. Counseling services are typically provided on a short-term basis to address issues such as adjusting to a disability, adjusting to community living, and maintaining or building family support for community living. Counseling services are not intended to address long-term behavioral health needs.

4.1.K. ENVIRONMENTAL ACCESSIBILITY ADAPTATIONS

Environmental Accessibility Adaptations (EAA) includes physical adaptations to the home required by the participant’s plan of service that are necessary to ensure the health and welfare of the participant or that enable the participant to function with greater independence in the home, without which the participant would require institutionalization.

Adaptations may include:

- Installation of ramps and grab bars
- Widening of doorways
- Modification of bathroom facilities
- Modification of kitchen facilities
- Installation of specialized electric and plumbing systems that are necessary to accommodate the medical equipment and supplies necessary for the welfare of the participant
- Environmental control devices that replace the need for paid staff and increase the participant's ability to live independently, such as automatic door openers

Assessments and specialized training needed in conjunction with the use of such environmental adaptations are included as a part of the cost of the service.
The case record must contain documented evidence that the adaptation is the most cost-effective and reasonable alternative to meet the participant’s need. An example of a reasonable alternative, based on the results of a review of all options, may include changing the purpose, use or function of a room within the home or finding alternative housing.

Environmental adaptations required to support proper functioning of medical equipment, such as electrical upgrades, are limited to the requirements for safe operation of the specified equipment and are not intended to correct existing code violations in a participant’s home.

The waiver agency must assure there is a signed contract or bid proposal with the builder or contractor prior to the start of an environmental adaptation. It is the responsibility of the waiver agency to work with the participant and builder or contractor to ensure the work is completed as outlined in the contract or bid proposal. All services must be provided in accordance with applicable state or local building codes.

The existing structure must have the capability to accept and support the proposed changes.

The environmental adaptation must incorporate reasonable and necessary construction standards, excluding cosmetic improvements. The adaptation cannot result in valuation of the structure significantly above comparable neighborhood real estate values.

The participant, with the direct assistance of the waiver agency’s supports coordinator when necessary, must make a reasonable effort to access all available funding sources, such as housing commission grants, Michigan State Housing Development Authority (MSHDA), and community development block grants. The participant’s case record must include evidence of efforts to apply for alternative funding sources and the acceptances or denials of these funding sources. The MI Choice program is a funding source of last resort.

Adaptations may be made to rental properties when the lease or rental agreement does not indicate the landowner is responsible for such adaptations and the landowner agrees to the adaptation in writing. A written agreement between the landowner, the participant, and the waiver agency must specify any requirements for restoration of the property to its original condition if the occupant moves.

Excluded are those adaptations or improvements to the home that:

- Are of general utility
- Are considered to be standard housing obligations of the participant or homeowner
- Are not of direct medical or remedial benefit

Examples of exclusions include, but are not limited to:

- Carpeting
- Roof repair
• Sidewalks and driveways
• Heating
• Central air conditioning (except under exceptions noted in the service definition)
• Garages and raised garage doors
• Storage and organizers
• Hot tubs, whirlpool tubs, and swimming pools
• Landscaping
• General home repairs

MI Choice does not cover general construction costs in a new home or additions to a home purchased after the participant is enrolled in the waiver. If a participant or the participant’s family purchases or builds a home while receiving waiver services, it is the participant’s or family’s responsibility to assure the home will meet basic needs, such as having a ground floor bath or bedroom if the participant has mobility limitations. MI Choice funds may be authorized to assist with the adaptations noted above (e.g., ramps, grab bars, widening doorways, bathroom modifications, etc.) for a home recently purchased. If modifications are needed to a home under construction that require special adaptation to the plan (e.g., roll-in shower), the MI Choice program may be used to fund the difference between the standard fixture and the modification required to accommodate the participant’s need.

The infrastructure of the home involved in the funded adaptations (e.g., electrical system, plumbing, well or septic, foundation, heating and cooling, smoke detector systems, or roof) must be in compliance with any applicable local codes. Environmental adaptations shall exclude costs for improvements exclusively required to meet applicable state or local building codes.

4.1.L. HOME DELIVERED MEALS

Home Delivered Meals (HDM) is the provision of one to two nutritionally sound meals per day to a participant who is unable to care for their own nutritional needs. The unit of service is one meal delivered to the participant’s home or to the participant’s selected congregate meal site that provides a minimum of one-third of the current recommended dietary allowance (RDA) for the age group as established by the Food and Nutritional Board of the National Research Council of the National Academy of Sciences. Allowances shall be made in HDMs for specialized or therapeutic diets as indicated in the participant’s plan of service. A Home Delivered Meal cannot constitute a full nutritional regimen.

Limitations on who can get a meal include:

• The participant must be unable to obtain food or prepare complete meals.
• The participant does not have an adult living at the same residence or in the vicinity who is able and willing to prepare all meals.
The participant does not have a paid caregiver who is able and willing to prepare meals for the participant.

The provider can appropriately meet the participant’s special dietary needs, and the meals available will not jeopardize the participant’s health.

The participant must be able to feed himself/herself.

The participant must agree to be home when meals are delivered, or contact the program when an absence is unavoidable.

4.1.M. NON-Emergency Medical Transportation

NEMT is defined in 42 CFR 431.53 and 42 CFR 440.170 and includes expenses for transportation and other related travel expenses determined necessary to secure medical examinations, documentation, or treatment for a MI Choice participant.

Waiver agencies will ensure MI Choice participants have access to NEMT as needed to obtain medical services. Utilization of family, friends, or community agencies who provide transportation services without charge must be explored before MI Choice will authorize NEMT. Additionally, delivery services for medical items, such as medical supplies or prescriptions, should be utilized before authorizing NEMT through the MI Choice program.

NEMT includes, but is not limited to, transportation to obtain the following medical services:

- Chronic and ongoing treatment,
- Prescriptions,
- Medical supplies and devices,
- One time, occasional and ongoing visits for medical care, and
- Services received at a Veterans Affairs hospital.

Travel expenses related to the provision of NEMT include:

- The cost of transportation for the MI Choice participant by wheelchair vans, taxis, bus passes and tickets, secured transportation containing an occupant protection system that addresses safety needs of disabled or special needs individuals, and other forms of transportation;
- Mileage reimbursement for individuals or volunteers with a valid driver’s license utilizing personal vehicles to transport the MI Choice participant;
- The cost of meals and lodging en route to and from medical care, and while receiving medical care;
- The cost of an attendant to accompany the MI Choice participant, if necessary;
- The cost of the attendant’s transportation, meals, and lodging; and
The attendant’s salary, if the attendant is not a volunteer or a member of the MI Choice participant’s family.

NEMT provider standards differ from other waiver service provider standards and will be outlined in the contract between MDHHS and waiver agencies.

4.1.N. NON-MEDICAL TRANSPORTATION

Non-Medical Transportation services are offered to enable waiver participants to access waiver and other community services, activities, and resources as specified in the individual plan of services. Whenever possible, family, neighbors, friends, or community agencies who can provide transportation services without charge must be utilized before MI Choice provides transportation services.

When the costs of transportation are included in the provider rate for another waiver service (e.g., Adult Day Health), there must be mechanisms to prevent the duplicative billing of Non-Medical Transportation services.

4.1.0. NURSING SERVICES

Nursing Services are covered on an intermittent (separated intervals of time) basis for a participant who requires nursing services for the management of a chronic illness or physical disorder in the participant’s home. These services are provided by a registered nurse (RN) or a licensed practical nurse (LPN) under the direct supervision of an RN. Nursing Services are for participants who require more periodic or intermittent nursing than available through the Medicaid State Plan or third party payer resources for the purpose of preventive interventions to reduce the occurrence of adverse outcomes for the participant, such as hospitalizations and nursing facility admissions. MI Choice Nursing Services shall not duplicate services available through the Medicaid State Plan or third party resources.

When the participant’s condition is unstable, could easily deteriorate, or significantly changes, MI Choice covers nurse visits for observation and evaluation. The purpose of the observation and evaluation is to monitor the participant’s condition and report findings to the participant’s physician or other appropriate health care professional to prevent additional decline, illness, or injury to the participant. The supports coordinator shall communicate with both the nurse providing this service and the participant’s health care professional to assure the nursing needs of the participant are being addressed.

Participants must meet at least one of the following criteria to qualify for this service:

- Be at high risk of developing skin ulcers, or have a history of resolved skin ulcers that could easily redevelop.
- Require professional monitoring of vital signs when changes may indicate the need for modifications to the medication regimen.
- Require professional monitoring or oversight of blood sugar levels, including participant-recorded blood sugar levels, to assist with effective pre-diabetes or diabetes management.
require professional assessment of the participant’s cognitive status or alertness and orientation to encourage optimal cognitive status and mental function or identify the need for modifications to the medication regimen.

- Require professional evaluation of the participant’s success with a prescribed exercise routine to assure its effectiveness and identify the need for additional instruction or modifications when necessary.

- Require professional evaluation of the participant’s physical status to encourage optimal functioning and discourage adverse outcomes.

- Have a condition that is unstable, could easily deteriorate, or experience significant changes AND a lack of competent informal supports able to readily report life-threatening changes to the participant’s physician or other health care professional.

In addition to the observation and evaluation, a nursing visit may also include, but is not limited to, one or more of the following nursing services:

- Administering prescribed medications that cannot be self-administered (as defined under Michigan Compiled Law (MCL) 333.7103(1)).

- Setting up medications according to physician orders.

- Monitoring participant’s adherence to their medication regimen.

- Applying dressings that require prescribed medications and aseptic techniques.

- Providing refresher training to the participant or informal caregivers to assure the use of proper techniques for health-related tasks such as diet, exercise regimens, body positioning, taking medications according to physician’s orders, proper use of medical equipment, performing ADL, or safe ambulation within the home.

This service is limited to no more than two hours per visit. Participants receiving Private Duty Nursing services are not eligible to receive MI Choice Nursing Services.

### 4.1.P. PERSONAL EMERGENCY RESPONSE SYSTEM

A Personal Emergency Response System (PERS) is an electronic device that enables a participant to summon help in an emergency. The participant may also wear a portable “help” button to allow for mobility. The system is often connected to the participant’s phone and programmed to signal a response center once a “help” button is activated. Installation, upkeep and maintenance of devices and systems are also provided. PERS does not cover monthly telephone charges associated with phone service.

The provider may offer this service for cellular or mobile phones and devices. The device must meet industry standards. The participant must reside in an area where the cellular or mobile coverage is reliable. When the participant uses the device to signal and otherwise communicate with the PERS provider, the technology for the response system must meet all other service standards.
4.1.Q. PRIVATE DUTY NURSING

Private Duty Nursing (PDN) services are skilled nursing interventions provided to a participant age 21 and older on an individual and continuous basis to meet health needs directly related to the participant’s physical disorder. PDN includes the provision of nursing assessment, treatment, and observation provided by licensed nurses within the scope of the State’s Nurse Practice Act, consistent with physician’s orders and in accordance with the participant’s plan of service. To be eligible for PDN services, the waiver agency must find the participant meets either Medical Criteria I or Medical Criteria II, and Medical Criteria III. Regardless of whether the participant meets Medical Criteria I or II, the participant must also meet Medical Criteria III.

The participant’s plan of service must provide reasonable assurance of participant safety. This includes a strategy for effective back-up in the event of an absence of providers. The back-up strategy must include informal supports or the participant’s capacity to manage his/her care and summon assistance.

PDN for a participant between the ages of 18-21 is covered under the Medicaid State Plan.

Medical Criteria I - The participant is dependent daily on technology-based medical equipment to sustain life. “Dependent daily on technology-based medical equipment” means:

- Mechanical rate-dependent ventilation (four or more hours per day) or assisted rate-dependent respiration (e.g., some models of bi-level positive airway pressure); or
- Deep oral (past the tonsils) or tracheostomy suctioning eight or more times in a 24-hour period; or
- Nasogastric tube feedings or medications when removal and insertion of the nasogastric tube is required, associated with complex medical problems or medical fragility; or
- Total parenteral nutrition delivered via a central line, associated with complex medical problems or medical fragility; or
- Continuous oxygen administration (eight or more hours per day), in combination with a pulse oximeter and a documented need for skilled nursing assessment, judgment, and intervention in the rate of oxygen administration. This would not be met if oxygen adjustment is done only according to a written protocol with no skilled assessment, judgment or intervention required. Continuous use of oxygen therapy is a covered Medicaid benefit for beneficiaries age 21 and older when tested at rest while breathing room air and the oxygen saturation rate is 88 percent or below, or the P02 level is 55 mm HG or below.

Medical Criteria II - Frequent episodes of medical instability within the past three to six months requiring skilled nursing assessments, judgments, or interventions (as described in III below) as a result of a substantiated medical condition directly related to the physical disorder.
Definitions of Medical Criteria II:

- “Frequent” means at least 12 episodes of medical instability related to the progressively debilitating physical disorder within the past six months, or at least six episodes of medical instability related to the progressively debilitating physical disorder within the past three months.
- “Medical instability” means emergency medical treatment in a hospital emergency room or inpatient hospitalization related to the underlying progressively debilitating physical disorder.
- “Emergency medical treatment” means covered inpatient and outpatient services that are furnished by a provider who is qualified to furnish such services and that are needed to evaluate or stabilize an emergency medical condition.
- “Emergency medical condition” means a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain) such that a prudent layperson who possesses an average knowledge of health and medicine could reasonably expect the absence of immediate medical attention would result in placing the health of the individual in serious jeopardy, serious impairment to bodily functions, or serious dysfunction of any bodily organ or part.
- “Directly related to the physical disorder” means an illness, diagnosis, physical impairment, or syndrome that is likely to continue indefinitely, and results in significant functional limitations in three or more ADL.
- “Substantiated” means documented in the clinical or medical record, including the nursing notes.

Medical Criteria III – The participant requires continuous skilled nursing care on a daily basis during the time when a licensed nurse is paid to provide services.

Definitions of Medical Criteria III:

- “Continuous” means at least once every three hours throughout a 24-hour period, and when delayed interventions may result in further deterioration of health status, in loss of function or death, in acceleration of the chronic condition, or in a preventable acute episode.
- Equipment needs alone do not create the need for skilled nursing services.
- “Skilled nursing” means assessments, judgments, interventions, and evaluations of interventions requiring the education, training, and experience of a licensed nurse. Skilled nursing care includes, but is not limited to:
  - Performing assessments to determine the basis for acting or a need for action, and documentation to support the frequency and scope of those decisions or actions.
  - Managing mechanical rate-dependent ventilation or assisted rate-dependent respiration (e.g., some models of Bi-PAP) that is required by the participant four or more hours per day.
  - Deep oral (past the tonsils) or tracheostomy suctioning.
- Injections when there is a regular or predicted schedule, or prn injections that are required at least once per month (insulin administration is not considered a skilled nursing intervention).
- Nasogastric tube feedings or medications when removal and insertion of the nasogastric tube is required, associated with complex medical problems or medical fragility.
- Total parenteral nutrition delivered via a central line and care of the central line.
- Continuous oxygen administration (eight or more hours per day), in combination with a pulse oximeter, and a documented need for adjustments in the rate of oxygen administration requiring skilled nursing assessments, judgments and interventions. This would not be met if oxygen adjustment is done only according to a written protocol with no skilled assessment, judgment or intervention required. Continuous use of oxygen therapy is a covered Medicaid benefit for beneficiaries age 21 and older when tested at rest while breathing room air and the oxygen saturation rate is 88 percent or below, or the PO2 level is 55 mm Hg or below.
- Monitoring fluid and electrolyte balances where imbalances may occur rapidly due to complex medical problems or medical fragility. Monitoring by a skilled nurse would include maintaining strict intake and output, monitoring skin for edema or dehydration, and watching for cardiac and respiratory signs and symptoms. Taking routine blood pressure and pulse once per shift that does not require any skilled assessment, judgment or intervention at least once every three hours during a 24-hour period, as documented in the nursing notes, would not be considered skilled nursing.

- Participants receiving MI Choice Nursing Services are not eligible to receive Private Duty Nursing services.
  - Where applicable, the participant must use Medicaid State Plan, Medicare, or third party payers first.
  - The participant’s preference for a certain provider or agency is not grounds for declining another payer in order to access waiver services.
  - It is not the intent of the MI Choice program to provide PDN services on a continual 24-hours-per-day/7-days-per-week basis. MI Choice services are intended to supplement informal support services available to the participant. Only under extreme circumstances should 24/7 PDN be authorized for a participant. These circumstances must be clearly described in the participant’s case record and approved by MDHHS.
  - 24/7 PDN services cannot be authorized for participants who cannot direct their own services and supports, make informed decisions for themselves, or engage their emergency back-up plan without assistance. These participants must have informal caregivers actively involved in providing some level of direct services to them on a routine basis.
  - All PDN services authorized must be medically necessary as indicated through the MI Choice assessment and meet the medical criteria set forth in this chapter.
  - The participant’s physician, physician’s assistant, or nurse practitioner must order PDN services and work in conjunction with the waiver agency and provider agency to assure services are delivered according to that order.
4.1.R. TRAINING

Training services consist of instruction provided to a MI Choice participant or caregiver(s) in either a one-to-one situation or a group basis to teach a variety of independent living skills, including the use of specialized or adaptive equipment or medically-related procedures required to maintain the participant in a community-based setting. The training needs must be identified in the comprehensive assessment or in a professional evaluation and included in the participant’s plan of service. Training is covered for areas such as activities of daily living, adjustment to home or community living, adjustment to mobility impairment, adjustment to serious impairment, management of personal care needs, the development of skills to deal with service providers and attendants, and effective use of adaptive equipment. For participants self-directing services, Training services may also include the training of independent supports brokers, developing and managing individual budgets, staff hiring and supervision, or other areas related to self-direction.

4.2 STATE PLAN SERVICES

MI Choice services are designed to address the unique needs and circumstances of program participants. Some waiver services appear to be the same as services offered in the State Plan; however, they differ in terms of key elements, such as scope of coverage or provider qualifications. Inasmuch as waiver services are designed to meet the specific demands of participants, it is expected that a waiver service will be more appropriate for a participant than a similar State Plan service. Under no circumstances shall the participant receive both services. Waiver agencies cannot authorize payment for services that are offered under the State Plan.

4.3 HOSPICE

MI Choice participants may receive State Plan-covered hospice services while participating in MI Choice. Participants must meet all hospice eligibility requirements outlined in the Hospice Chapter. If the beneficiary is receiving hospice and becomes eligible to receive waiver services, the waiver agency contacts the hospice to establish the first date of service for the waiver services.

State Plan Hospice services must be used to the fullest extent before similar MI Choice services are authorized. Inappropriate services (e.g., duplicative, non-covered) are subject to MDHHS recovery of the amounts paid for those services from the waiver agency.

A joint plan of service for Hospice and MI Choice must be developed and maintained by both the waiver agency and the hospice provider. It is important that the waiver agency understand the hospice philosophy so the two entities work for a common goal and avoid redundant services. Ongoing communication and coordination must occur between the MI Choice supports coordinator and the hospice provider during the time they are serving the participant. Written documentation of this communication and coordination must be kept in the participant's record at each agency.

4.4 MEDICATION ADMINISTRATION

Medication administration in MI Choice is established through the provision of Nursing Services.
4.5 OPERATING STANDARDS

MDHHS maintains and publishes the "Minimum Operating Standards for MI Choice Waiver Program Services" (known as the Minimum Operating Standards) document. This document defines both general and specific operating criteria for the program. All waiver agencies and service providers are subject to the standards, definitions, limits, and procedures described therein.

For each service offered in MI Choice, the Minimum Operating Standards are used to set the minimum qualifications for all direct service providers, including required certifications, training, experience, supervision, and applicable service requirements. Billing codes and units are also defined in the document.

4.6 SERVICES IN LICENSED SETTINGS

Licensing rules for residential setting providers reflect an attempt to make residing in these settings much like it would be in a home. Providers of licensed residential settings must meet the standard of providing a non-institutional setting licensed by the State of Michigan. For further details on what constitutes a home and community-based setting, refer to 42 CFR §441.530.
SECTION 5 - NURSING FACILITY TRANSITIONS

The process of transitioning nursing facility residents to a home or a community-based setting is a priority of MI Choice. The tenet of rebalancing the spectrum of long-term care services in Michigan was given impetus by the 1999 United States Supreme Court decision in Olmstead v. L. C.. MDHHS provides mechanisms to ensure an individual resides in the most independent setting.

5.1 TRANSITION CANDIDATES

Initial transition work begins prior to enrollment into the MI Choice program and often occurs before the verification of Medicaid eligibility. Candidates for Community Transition Services are nursing facility residents who have expressed a preference to live at home or in a community-based setting and who have barriers to transitioning that cannot be addressed through standard discharge procedures available to nursing facility staff. Nursing facilities are not relieved of their required discharge planning activities.

5.2 TRANSITION SERVICES

Transition services are one-time expenses necessary to assist a nursing facility resident in moving to a home or similar community setting. Examples of transition services that the waiver agency could provide are in the Services section of this chapter.

Community Transition Services are not intended to provide assistance in relocating from communal settings such as, but not limited to, adult foster care (AFC) homes, Homes for the Aged (HFAs), assisted living arrangements, or apartments to another home or home-like setting.

The MI Choice waiver agency must work with the nursing facility resident to develop a transition plan that includes all projected transition costs. The plan must be based on individual goals and needs and must be included in the nursing facility resident’s MI Choice record. It must be updated to reflect any changes.

For the contract period, MDHHS will reimburse the waiver agency for prudent and allowable transition expenses and supports coordination costs in accordance with Nursing Facility Transition Guidelines. As specified in the contract between MDHHS and the waiver agency, the waiver agency must notify MDHHS of its intention to transition a nursing facility resident to the MI Choice program when initiating a nursing facility transition plan. Procedures for notification are obtained from the MI Choice program contract manager. (Refer to the Directory Appendix for additional information.) The waiver agency must demonstrate the nursing facility resident has a Medicaid application pending with MDHHS or has been approved for Medicaid and meets MI Choice program criteria. Once the participant is enrolled in the MI Choice program, MDHHS will issue payment to the waiver agency for CTS. Non-waiver nursing facility transition funding is available for those who do not enroll in the MI Choice program upon transition or do not transition.
SECTION 6 - SUPPORTS COORDINATION

Supports coordination facilitates access to, and arrangement of, services and support needed and chosen by MI Choice participants. These are detailed and documented in the participant’s plan of service. Refer to the Supports Coordination service description in the Services section of this chapter for additional information.

Supports coordinators use a person-centered approach in working with a participant to determine how their needs will be met. Supports coordinators also monitor the quality of services received and explore other funding options and service opportunities when personal goals exceed the scope of available MI Choice services. For participants choosing the self-determination option for service delivery, the supports coordinator assists in the selection, coordination, and management of those services and providers.

MDHHS includes a Supports Coordination Service Performance Standards document as an attachment to all waiver agency provider contracts. The document prescribes acceptable standards and protocols for the provision of supports coordination services. It is reviewed and amended as necessary.

6.1 PERSON-CENTERED PLANNING

Person-centered planning (PCP) is a process for planning and supporting a participant receiving services that builds on the participant’s desire to engage in lawful activities that promote community life and that honor the participant’s preferences, choices, and abilities. The person-centered planning process involves families, friends, and professionals as the participant desires or requires. Waiver agencies and direct service providers must utilize a PCP process, informing the participant of service options in ways that are meaningful. This includes assessing the needs and desires of the participant, developing service and support plans, and continuously updating and revising those plans as needs and desires change. The participant and their chosen representative(s) must be provided with written information from the waiver agency detailing the right to participate in the PCP process. Waiver agencies and direct service providers implement PCP in accordance with the MDHHS Person-Centered Planning Guideline document that is an attachment to the waiver agency provider contract.

PCP meetings are conducted when the participant is not in crisis and at a time of the participant’s choice. The participant has authority to determine who will be involved in the PCP process as well as a time and location that meets the needs of all individuals involved in the process. An interim plan of service may be developed by the supports coordinator when the participant is experiencing a crisis situation that requires immediate services and the participant is not ready to fully participate in PCP. Interim care plans are authorized for no more than 30 days without a follow-up visit (or planning meeting) to determine the participant's status.

6.2 PLAN OF SERVICE

The participant’s plan of service is an individualized, comprehensive document developed by the participant, their chosen representative(s), and the supports coordinator prior to the provision of services. Using a person-centered process, waiver agencies must establish a written plan of service for each participant that identifies the participant’s strengths, weaknesses, needs, goals, expected outcomes, and planned interventions. This document includes all services provided to, or needed by, the participant regardless of funding source. The plan of service is developed before MI Choice services are provided. The participant must approve all services and interventions before implementation and the waiver agency
must document participant approval. MI Choice services must be stipulated in the PCP planning process and the participant assessment.

The participant’s plan of service contains at a minimum:

- Issues, problems and concerns identified during participant (re)assessment
- Goals for each issue, problem and concern or reason for omission from the plan
- Planned interventions for each goal
- Desired outcome for each intervention
- Participant’s agreement to the plan
- A process for reviewing progress toward meeting goals and outcomes of the interventions in place
- The type of service(s) to be provided, including both MI Choice services and from other sources
- The frequency and duration of each service
- The type of provider to furnish each service

6.3 Self-Determination

Self-Determination provides MI Choice participants the option to direct and control their own waiver services. Not all MI Choice participants choose to participate in self-determination. For those that do, the participant (or chosen representative(s)) has decision-making authority over staff who provide waiver services, including:

- Recruiting staff
- Referring staff to an agency for hiring (co-employer)
- Selecting staff from worker registry
- Hiring staff (common law employer)
- Verifying staff qualifications
- Obtaining criminal history review of staff
- Specifying additional service or staff qualifications based on the participant’s needs and preferences so long as such qualifications are consistent with the qualifications specified in the approved waiver application and the Minimum Operating Standards
- Specifying how services are to be provided and determining staff duties consistent with the service specifications in the approved waiver application and the Minimum Operating Standards
- Determining staff wages and benefits, subject to State limits (if any)
- Scheduling staff and the provision of services
- Orienting and instructing staff in duties
- Supervising staff
- Evaluating staff performance
- Verifying time worked by staff and approving timesheets
- Discharging staff (common law employer)
- Discharging staff from providing services (co-employer)
- Reallocating funds among services included in the participant’s budget
- Identifying service providers and referring for provider enrollment
- Substituting service providers
- Reviewing and approving provider invoices for services rendered

Participant budget development for participants in self-direction occurs during the person-centered planning process and is intended to involve individuals the participant chooses. Planning for the participant’s plan of service precedes the development of the participant’s budget so that needs and preferences can be accounted for without arbitrarily restricting options and preferences due to cost considerations. A participant’s budget is not authorized until both the participant and the waiver agency have agreed to the amount and its use. In the event that the participant is not satisfied with the authorized budget, he/she may reconvene the person-centered planning process. The waiver services of Fiscal Intermediary and Goods and Services are available specifically to self-determination participants to enhance their abilities to more fully exercise control over their services.

The participant may, at any time, modify or terminate the arrangements that support self-determination. The most effective method for making changes is the person-centered planning process in which individuals chosen by the participant work with the participant and the supports coordinator to identify challenges and address problems that may be interfering with the success of a self-determination arrangement. The decision of a participant to terminate participation in self-determination does not alter the services and supports identified in the participant’s plan of service. When the participant terminates self-determination, the waiver agency has an obligation to assume responsibility for assuring the provision of those services through its network of contracted provider agencies.

A waiver agency may terminate self-determination for a participant when problems arise due to the participant’s inability to effectively direct services and supports. Prior to terminating a self-determination agreement (unless it is not feasible), the waiver agency informs the participant in writing of the issues that have led to the decision to terminate the arrangement. The waiver agency will continue efforts to resolve the issues that led to the termination.
SECTION 7 - ADMINISTRATION

MDHHS serves as the single state agency in the operation of the MI Choice program. MDHHS contracts with entities to administer the program throughout the state. Certain administrative functions are assigned to the local agencies as defined in the Medicaid waiver application to CMS, as renewed and amended. To assist MDHHS in operating MI Choice, agencies are required to submit periodic reports as detailed in this section.

7.1 WAIVER AGENCIES AS PREPAID AMBULATORY HEALTH PLANS

MDHHS contracts with waiver agencies that operate as Prepaid Ambulatory Health Plans (PAHPs) to perform administrative functions. They are responsible for disseminating waiver information to applicants, assisting applicants with waiver enrollment (which includes assisting applicants with completion of the Medicaid Assistance Application (DHS-1171) to secure financial eligibility), managing waiver enrollment against approved limits, monitoring expenditures against approved limits, conducting assessments and LOCD evaluations, reviewing participant plans of service to ensure that waiver requirements are met, conducting utilization reviews and quality management reviews, recruiting providers, and executing Medicaid provider agreements.

Each waiver agency must sign a provider contract with MDHHS assuring that it meets all program requirements.

Waiver agencies are responsible for securing qualified service providers to deliver services. Eligible provider applicants include public, private non-profit or for-profit organizations that provide services meeting established service standards, certifications or licensure requirements. Participants may only use providers in the waiver agency’s provider network.

7.2 WAITING LIST REPORTING

Waiting list data is collected and maintained on a secure, web-based application. Waiver agencies must complete all required fields for each qualified MI Choice applicant. Waiting list data must be entered online within one business day after completion of the MI Choice Intake Guidelines. If an applicant is removed from the MI Choice waiting list, the data must be completed online within five business days and include the reason for removal.

7.3 HEALTH INSURANCE PORTABILITY AND ACCOUNTABILITY ACT (HIPAA)

All MI Choice waiver agencies and providers are required to comply with the provisions of the Health Insurance Portability and Accountability Act of 1996 (HIPAA) and any subsequent revisions. Compliance is required in areas that include privacy and security rules, data sharing, and disclosure.
SECTION 8 - FINANCING AND REIMBURSEMENT

Annual funding levels for MI Choice are subject to appropriation allocations made by the Michigan Legislature. MDHHS contracts annually with waiver agencies to operate the MI Choice program and all waiver agency budget and reimbursement requirements and considerations must be defined in the contract, as amended. Any additional consideration or compensation to the waiver agency must also be included in the annual contract, as amended. Waiver agencies are paid through capitation payments and are required to submit all encounter data to MDHHS as outlined in the Encounter Reporting subsection of this chapter. Encounter data is processed through the Community Health Automated Medicaid Processing System (CHAMPS). Waiver agencies are required to submit all financial reports as detailed in the annual contract. Each agency is subject to review or audit by MDHHS, the State of Michigan, or their designee.

8.1 REIMBURSEMENT SCHEDULE

At the end of each month, MDHHS will run the 834 Enrollment file for each waiver agency. This file contains an electronic listing of individuals who are enrolled in the MI Choice program with each provider. The Medicaid Management Information System (MMIS) then performs quality checks, including:

- Verification of current Medicaid eligibility;
- A valid LOCD indicating the participant meets nursing facility level of care; and
- The participant is not enrolled in any other long-term care program.

On the fourth pay cycle of each month, the 820 premium payment will run and will electronically transfer the appropriate per member per month capitation payment for each participant enrolled with each waiver agency.

8.2 SPECIAL SERVICES

MDHHS may arrange special service structures that extend beyond the standard contract language to address special circumstances that arise.

8.2.A. GAP-FILLING SERVICES

Waiver agencies may authorize services for waiver participants to address situations that require immediate attention to alleviate barriers crucial to the participant’s independence when no other resources, including waiver services, are available to address such needs. These are referred to as gap-filling services and are to be included in the participant’s plan of service. Gap-filling services must also be included in encounter data submitted to MDHHS.

8.2.B. TEMPORARILY INELIGIBLE PARTICIPANT (TIP) SERVICES

Waiver agencies may authorize services for temporarily ineligible participants (TIP). TIP services are necessary to sustain a participant though a temporary period of ineligibility. TIP services are included in the participant’s plan of service and the reason such services are necessary must be documented by the waiver agencies. TIP services must be included in encounter data submitted to MDHHS. TIP services for any given participant
are limited to a cumulative total of no more than three months per calendar year unless prior approval is obtained from MDHHS.

8.3 ENCOUNTER DATA REPORTING

Medicaid is established as the payer of last resort. Waiver agencies must pursue and secure all third party liability (TPL) sources possible. Agencies must make every effort to enroll and utilize dually certified (Medicare and Medicaid) providers. Agencies cannot use waiver funds for services that are covered through another payment source.

Each waiver agency must submit all encounter data to MDHHS within 180 calendar days of the date that services were rendered. Waiver agencies must resolve issues related to encounters that are rejected by CHAMPS within 30 calendar days of notification by MDHHS or its designee. Agencies have 10 calendar days after the expiration of the 30-day resolution window to report on issues that cannot be resolved.

8.4 ADMINISTRATIVE EXPENSE AND OTHER FINANCIAL REPORTING

Each waiver agency shall submit an Administrative Expense Report (AER) to MDHHS as specified in the contract. The expenses reported must be actual expenses incurred by the waiver agency. Each AER shall cover one calendar month and is due within 30 calendar days after the conclusion of that month. Waiver agencies must submit additional financial reports and information as requested by MDHHS. MDHHS must communicate requirements for such additional information to the waiver agency in writing and allow sufficient time for a response.

8.5 FINANCIAL AUDIT REQUIREMENTS

MI Choice waiver agencies are contractually obligated to comply with, and assure compliance by, its subcontractors with all requirements of the Single Audit Act and any amendments to this act. Waiver agencies must submit to MDHHS a Single Audit, Financial Statement Audit, or Audit Status Notification Letter. If submitting a Single Audit or Financial Statement Audit, waiver agencies must also submit a Corrective Action Plan for any audit findings that impact MDHHS-funded programs and a management letter (if issued) with a response.

Waiver agencies that expend $500,000 or more in federal awards during the agency’s fiscal year must submit to MDHHS a Single Audit that is consistent with the Single Audit Act Amendments of 1996 and Office of Management and Budget (OMB) Title 2 CFR Part 200 titled Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards Subparts A, B, and F.

Waiver agencies exempt from the Single Audit requirements that receive $500,000 or more in total funding from MDHHS in state and federal grant funding must submit to MDHHS a Financial Statement Audit prepared in accordance with Generally Accepted Auditing Standards (GAAS). Waiver agencies exempt from the Single Audit requirements that receive less than $500,000 of total MDHHS grant funding must submit to MDHHS a Financial Statement Audit prepared in accordance with GAAS if the audit includes disclosures that negatively impact MDHHS-funded programs including, but not limited to, fraud, financial statement misstatements, and violations of contract and grant provisions.

Waiver agencies exempt from both the Single Audit and Financial Statement Audit requirements (sections a and b) must submit an Audit Status Notification Letter that certifies these exemptions. The template
for the Audit Status Notification Letter and further instructions are available on the MDHHS website. (Refer to MI Choice Waiver Resources in the Directory Appendix for additional information.)

The required audit and any other required submissions (i.e., Corrective Action Plan and management letter with a response, or Audit Status Notification Letter) must be submitted within nine months following the end of the contractor’s fiscal year to the MDHHS Office of Audit, Quality Assurance and Review Section. (Refer to the Directory Appendix for contact information.)

Waiver agencies and each of their contractors are subject to the provisions of, and must comply with, the cost principles set forth in OMB Title 2 CFR Part 200 titled Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards Subparts A, B, and E.
SECTION 9 – PROVIDERS

Authorization for provision of services is the responsibility of the waiver agencies. They determine the status of the qualifications and certifications (if applicable) for all direct service providers, negotiate and enter into contracts with the providers, and reimburse providers.

9.1 ENROLLMENT OF SERVICE PROVIDERS

Waiver agencies must use written contracts meeting the requirements of 42 CFR 434.6 to purchase services. Entities or individuals under subcontract with the waiver agencies must meet provider standards defined in the Minimum Operating Standards for MI Choice Waiver Program Services which is maintained by MDHHS and attached to each annual waiver agency contract. Only providers meeting the requisite waiver requirements are permitted to participate in the waiver program.

To assure network capacity, as well as choice of providers, each waiver agency must have a provider network with capacity to service at least 125% of their monthly slot utilization for each MI Choice service and at least two providers for each MI Choice service. When waiver agencies cannot assure this choice within 30 miles or 30 minutes travel time for each enrollee, they may request a rural area exception from MDHHS.

9.2 FAMILY MEMBERS AS SERVICE PROVIDERS

Waiver agencies may pay relatives of MI Choice participants to furnish services. This authorization excludes legally responsible individuals and legal guardians. The MI Choice participant must specify his/her preference for a relative to render services. The relative must meet the same provider standards as established for non-related caregivers. All waiver services furnished shall be included in the plan of service and authorized by the supports coordinator. The supports coordinator must periodically evaluate the effectiveness of the relative in rendering the needed service. If the supports coordinator finds that the relative fails to meet established goals and outcomes or fails to render services as specified in the plan of service, the supports coordinator must rescind the authorization of that relative to provide waiver services to the participant. When the supports coordinator finds the relative has failed to render services, payments must not be authorized.

9.3 REIMBURSEMENT RATES FOR PROVIDERS

Each waiver agency is responsible for sub-contracting with provider entities and for assuring access to services. The process of rate determination for providers resides in the contract negotiation between the waiver agency and the provider. MDHHS does not play a role in this process.

Rates paid for services provided through the waiver must be adequate to assure access to services needed by participants.

MDHHS does not make payment to legally responsible individuals for furnishing Community Living Supports or similar services.
9.4 CRIMINAL HISTORY REVIEWS

Each waiver agency and direct provider of home-based services must conduct a criminal history review through the Michigan State Police for each paid staff or volunteer who will be entering a participant’s residence. The waiver agency and direct provider shall have completed reference and criminal history checks before authorizing an employee or volunteer to furnish services in a participant’s residence. The scope of the investigation is statewide.

Both waiver agencies and MDHHS conduct administrative monitoring reviews of providers annually to verify that mandatory criminal history checks have been conducted in compliance with operating standards. Waiver agencies must comply with additional criminal history reviews mandated by the State for home and community-based services providers.

9.5 USE OF RESTRAINTS, SECLUSION OR RESTRICTIVE INTERVENTIONS

Providers are prohibited from using seclusion or restrictive interventions in addition to using restraints. Qualified reviewers conduct Clinical Quality Assurance Reviews and home visits which include a discovery process to examine the use of restraints, seclusion or restrictive interventions by family or caregivers. Supports coordinators have the primary responsibility for identifying and addressing the use of restraints, seclusion or restrictive interventions.
SECTION 10 - PROGRAM QUALITY

The process of ensuring the highest quality program involves a continuous cycle of discovery, intervention, and evaluation. MDHHS is resolute about assuring and improving the quality of services and protections it provides. To assure that level of service, MDHHS operates a comprehensive quality management system that incorporates reviews of the administrative operations of the waiver agencies, clinical reviews of participant records, home reviews with participants, continuous quality management and planning, and timely and effective responses to critical incidents.

10.1 ADMINISTRATIVE QUALITY ASSURANCE REVIEWS

MDHHS conducts periodic on-site Administrative Quality Assurance Reviews (AQAR) of each waiver agency on a biennial schedule, assuring MDHHS reviews each waiver agency at least once every two years. MDHHS seeks evidence of compliance to the AQAR standards during the on-site review through examination of waiver agency policies and procedures, provider contracts, financial systems, encounter accuracy, and quality management plans.

Each waiver agency shall adhere to the MDHHS MI Choice Waiver Program Provider Monitoring Plan (known as the Monitoring Plan). The document defines the procedures and standards used by the waiver agency in reviewing providers included in the waiver agency’s provider network. It includes the required protocols used to identify provider deficiencies and identifies timelines for remediation. (Refer to the Directory Appendix for additional information.) MDHHS will review each waiver agency’s process in detail during the AQAR.

MDHHS notifies each waiver agency in writing of deficiencies requiring corrective action and provides a date for the waiver agency to provide a corrective action plan to MDHHS. In the event of a continued deficiency, MDHHS has the authority to take action toward the waiver agency, including suspending new enrollments, adjusting capitation payments, or mandating further corrective action. MDHHS has the option to suspend or terminate the contract of any waiver agency that fails to correct stated deficiencies identified on a second review.

10.2 QUALITY MANAGEMENT PLANS

Each waiver agency shall have a written quality management plan that meets requirements specified in the MDHHS Quality Management Plan. The Quality Management Plan addresses quality assurance and improvement using measurable goals and quality performance indicators.

MDHHS reviews quality management plans annually. Waiver agencies are required to submit an annual report to MDHHS highlighting its quality management plan activities and improvements. (Refer to MI Choice Waiver Resources in the Directory Appendix for additional information.)

10.3 CLINICAL QUALITY ASSURANCE REVIEWS

MDHHS conducts an annual Clinical Quality Assurance Review (CQAR) of each waiver agency. The review is to determine whether the authorized services in the plan of service are sufficient to protect the health and welfare of the participant.

Randomly selected records are reviewed. Samples are derived using federally-approved sampling techniques with a minimum of 10 records reviewed at each agency. In addition, a minimum of five home
visits are conducted to verify information in the records. The review is conducted by a team of trained MDHHS reviewers.

10.4 CRITICAL INCIDENT RESPONSE AND REPORTING

MI Choice is required to track and to report certain events that might indicate exceptional risk to the participant. Not only are these requirements defined in regulation, but in law as well.

10.4.A. TYPES OF CRITICAL INCIDENTS AND SERIOUS EVENTS

The following are specific critical incidents or events that must be reported to MDHHS:

- Exploitation
- Illegal activity in the home with potential to cause a serious or major negative event
- Neglect
- Physical abuse
- Provider no-shows, particularly when the participant is bed-bound all day or there is a critical need for the service to be provided
- Sexual abuse
- Theft
- Verbal abuse
- Worker consuming drugs/alcohol on the job
- Suspicious or Unexpected Death that is related to providing services, supports, or care
- Medication errors
- Restraints, seclusion or restrictive interventions

10.4.B. CRITICAL INCIDENT RESPONSE

MI Choice waiver agencies have the initial responsibility for identifying, investigating, evaluating and responding to critical incidents that occur with participants as listed above. All suspected incidents of abuse, neglect and exploitation require reporting to MDHHS Adult Protective Services (APS) for investigation and follow-up. Agencies shall begin investigating and evaluating critical incidents within two business days of the date that it was noted that an incident occurred. Suspicious or unexpected death that is also reported to law enforcement agencies must be reported to MDHHS within two business days.

Each waiver agency is required to maintain written policy and procedures defining appropriate action to take upon suspicion or determination of abuse, neglect or exploitation. The policies and procedures must include procedures for follow-up activities with MDHHS-APS to determine the result of the reported incident and the steps to be taken if the results are unsatisfactory. All reports to MDHHS-APS must be maintained in the participant’s case record.
10.4.C. CRITICAL INCIDENT REPORTING

Waiver agencies are responsible under contract for tracking and responding to individual critical incidents using the Critical Incident Reporting web-based system. Waiver agencies are required to report the type of critical incidents, the responses to those incidents, and the outcome and resolution of each event within 30 days of the date of knowledge of the incident. The online system allows MDHHS to review the reports in real time and ask questions or address concerns with the waiver agencies. MDHHS must receive notification from waiver agencies of suspicious deaths within two business days.
SECTION 11 – APPEALS

MDHHS has established participant and provider appeal processes that are applicable to MI Choice. The participant appeals process conforms to the Medicaid fair hearing requirements found at 42 CFR Part 431, Subpart E of the Code of Federal Regulations. Provider appeal rights conform to the requirements of the Michigan Compiled Laws, MCL 400.1 et seq., and the administrative rules found at Michigan Administrative Code R 400.3402 through R 400.3425, amended.

11.1 PARTICIPANT APPEALS

MDHHS has established notice and appeals requirements to which waiver agencies must adhere when adverse action has been taken for program applicants or participants. According to 42 CFR 431.201 "Action" means a termination, suspension, or reduction of Medicaid eligibility or of covered services. This also includes determinations by the waiver agency that the applicant or participant does not meet the nursing facility level of care criteria and other denials of Medicaid eligibility or of covered services.

11.1.A. ADEQUATE ACTION NOTICES

MI Choice waiver agencies must send an Adequate Action Notice to applicants or participants informing them of adverse actions and determinations taken under the following circumstances:

- when the waiver agency is at operating capacity and unable to enroll MI Choice applicants who request a Michigan Medicaid Nursing Facility Level of Care Determination (LOCD).
- when the waiver agency determines applicants to be functionally ineligible for MI Choice services based on the results of a LOCD.
- when a participant requests additional services or additional amounts of services and the waiver agency denies the request.
- when an existing benefit is reduced, suspended or terminated, and meets the requirements for an exception from an Advance Action Notice as specified in 42 CFR 431.213.

11.1.B. ADVANCE ACTION NOTICES

An Advance Action Notice must be sent to MI Choice participants when action is being taken to reduce, suspend, or terminate service(s) a participant currently receives. This notice must be provided at least 12 days in advance of the intended action.

An Advance Action Notice is also issued if it is determined that a reduction in level or number of services is warranted based on the participant’s current assessment. The notice must inform the participant that services will not be reduced until a formal decision has been rendered through the Medicaid Fair Hearings process if the participant formally requests a hearing before the specified date of the intended action.
11.1.C. NOTICES

Advance Action Notices and Adequate Action Notices that relate to the LOCD process are posted on the MDHHS website. (Refer to the Directory Appendix for website information.)

Waiver agencies may use additional notices for actions not related to the LOCD process. These notices must be approved by MDHHS prior to use to assure compliance with 42 CFR 431.210. Waiver agencies must supply a copy of the Request for Hearing form (DCH-0092) and a return envelope with each notice sent to an applicant or participant, or any time an applicant or participant requests such material. Waiver agencies are required to assist applicants or participants who request help in filing an LOCD exception review through the Michigan Peer Review Organization (MPRO), or a formal appeal for any reason through the Medicaid fair hearings process.

11.2 PROVIDER AND WAIVER AGENCY APPEALS

Medicaid providers, including waiver agencies, are afforded appeal rights under the Michigan Social Welfare Act (Public Act 280 of 1939, as amended) and the Michigan Administrative Code. Adverse actions that may be appealed by providers include, but are not limited to, the suspension or termination of participation in the Medicaid program, or a reduction, suspension, or adjustment of provider payments.

A Retrospective Review of the Michigan Medicaid Nursing Facility Level of Care Determination that results in a denial is an Adverse Action for the MI Choice Waiver agency when MDHHS proposes to recover payments made for services rendered to the beneficiary for whom the Retrospective Review was conducted. If the waiver agency disagrees with the MDHHS Adverse Action Notice, the agency may appeal if their written request is received by the MDHHS Michigan Administrative Hearing System within 30 calendar days from the date of the MDHHS Adverse Action Notice.

Information regarding the MDHHS appeal process is available in the General Information for Providers Chapter and on the MDHHS website. (Refer to the Directory Appendix for website information.)

SECTION 1 - GENERAL INFORMATION

Effective March 1, 2015, the Michigan Department of Health and Human Services (MDHHS), in partnership with the Centers for Medicare & Medicaid Services (CMS), implemented a new managed care program called MI Health Link. This program integrates into a single coordinated delivery system all physical health care, pharmacy, long term supports and services, and behavioral health care for individuals who are dually eligible for full Medicare and full Medicaid. The goals of the program are to improve coordination of supports and services offered through Medicare and Medicaid, enhance quality of life, improve quality of care, and align financial incentives.

MDHHS and CMS have signed a three-way contract with managed care entities called Integrated Care Organizations (ICOs) to provide Medicare and Medicaid covered acute and primary health care, pharmacy, dental, and long term supports and services (nursing facility and home and community based services). The MI Health Link program also includes a home and community-based services (HCBS) waiver for MI Health Link enrollees who meet nursing facility level of care, choose to live in the community rather than an institution, and have a need for at least one of the waiver services as described in this chapter. This waiver is called the MI Health Link HCBS Waiver.

The Michigan Prepaid Inpatient Health Plans (PIHPs) in the four demonstration regions are responsible for providing all Medicare and Medicaid behavioral health services for individuals who have mental illness, intellectual/developmental disabilities, and/or substance use disorders. The Eligibility and Service Areas section provides a list of the regions and related counties.
**SECTION 2 – ELIGIBILITY AND SERVICE AREAS**

Individuals who are eligible to participate are those who are age 21 or older, eligible for Medicare and Medicaid, and reside in one of the four demonstration regions:

<table>
<thead>
<tr>
<th>Region</th>
<th>Counties in the Region</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Alger, Baraga, Chippewa, Delta, Dickinson, Gogebic, Houghton, Iron, Keweenaw, Luce, Mackinac, Marquette, Menominee, Ontonagon, and Schoolcraft</td>
</tr>
<tr>
<td>4</td>

</tr>
<tr>
<td>7</td>
<td>Wayne</td>
</tr>
<tr>
<td>9</td>
<td>Macomb</td>
</tr>
</tbody>
</table>

Excluded populations:

- Individuals under age 21
- Individuals previously disenrolled due to special disenrollment from Medicaid managed care as defined in 42 CFR 438.56
- Individuals not living in one of the four demonstration regions
- Individuals with Additional Low Income Medicare Beneficiary/Qualified Individual (ALMB/QI) program coverage
- Individuals without full Medicaid coverage (they have spenddowns or deductibles)
- Individuals with Medicaid who reside in a state psychiatric hospital
- Individuals with commercial Health Maintenance Organization (HMO) coverage
- Individuals with elected hospice services prior to MI Health Link program enrollment
SECTION 3 – ENROLLMENT PROCESS

Enrollment in the MI Health Link program occurs in two ways: 1) voluntary enrollment, and 2) passive enrollment. For voluntary enrollment, the eligible individual must call the enrollment broker contracted by the state for Medicaid managed care programs. The individual selects the ICO in which they wish to enroll, using the ICO provider networks and drug formularies to assist in making choices.

Eligible individuals who do not voluntarily enroll in the program will receive a notification letter at least 60 days prior to the enrollment effective date informing them they will be passively enrolled. Eligible individuals will have a period of 60 days to opt out of the program if they choose to do so prior to the enrollment effective date. Individuals may opt out by calling the entities as indicated in the notification letter. Individuals who do not opt out of the program prior to the effective date will be passively enrolled and an ICO will be assigned to them. Prior to the enrollment effective date, and at any time thereafter, individuals will have the opportunity to select a different ICO than the one assigned to them if there is another ICO option in the region.

After enrollment, individuals are issued an identification (ID) card that is specific to the MI Health Link program. This ID card is used instead of the traditional Medicare and Medicaid ID cards, and identifies the name of the ICO responsible for coverage along with the MI Health Link logo. Individuals will be enrolled in the benefit plan called ICO-MC, which is a benefit plan specific to the MI Health Link program. (Refer to the Beneficiary Eligibility Chapter for additional information.)

Individuals who are enrolled in the MI Choice waiver or the Program of All-Inclusive Care for the Elderly (PACE) are not passively enrolled into MI Health Link. These individuals may enroll in MI Health Link voluntarily, but must disenroll from MI Choice or PACE before the MI Health Link enrollment is effective. MDHHS will assist in this process to ensure a smooth transition between programs. Individuals who are enrolled in MI Choice or PACE and wish to enroll in MI Health Link must call the enrollment broker to start the enrollment process. The enrollment broker will send a message to MDHHS notifying MDHHS that the individual has chosen to enroll in MI Health Link. MDHHS staff will contact the appropriate MI Choice waiver agency or PACE organization to obtain current information and assessments for the individual. MDHHS will review the information received to determine if the individual’s needs can be met through MI Health Link. MDHHS will contact the individual to discuss whether his/her needs can be met in MI Health Link. If the individual still chooses to join MI Health Link at that time, MDHHS will initiate the formal enrollment in the program and will notify the ICO accordingly.

Individuals may choose to disenroll from MI Health Link at any time. Disenrollment is effective on the first day of the following month.
**SECTION 4 – PROGRAM ENROLLMENT TYPES [TITLE REVISED & OTHER CHANGES MADE 7/1/18]**

For individuals enrolled with an ICO and who are residing in a NF or County Medical Care Facility (CMCF), the ICO-NFAC or ICO-CMCF PET codes will be updated in CHAMPS when the NF or CMCF completes the Nursing Facility Admission in CHAMPS. The ICO-NFAC or ICO-CMCF PET code will be removed upon the facility completing the NF discharge information in CHAMPS when the individual is discharged from the facility.

Similarly, when a MI Health Link enrollee elects hospice services, the ICO-HOSC, ICO-HOSW, ICO-HOSN, ICO-HOSR or ICO-HOSH PET codes will be updated in CHAMPS when the hospice provider completes the Hospice Admission in CHAMPS. When the individual expires or otherwise is discharged from hospice services, the hospice provider must complete the Hospice Discharge in CHAMPS, which then removes the hospice-related PET codes.

When the MI Health Link enrollee receives hospice services while residing in a NF or CMCF, the hospice provider must indicate the facility of residence on the Hospice Admission in CHAMPS so the ICO can receive the appropriate capitation rate. *(revised per bulletin MSA 17-46)*
**SECTION 5 – COVERED SERVICES**

MI Health Link offers the following services:

- Medicare covered services, including pharmacy
- Medicaid State Plan services, including personal care services
- Dental services
  - Equivalent to the Medicaid adult dental benefit as described in the Dental Chapter of this manual.
- Long Term Supports and Services (LTSS)
  - Nursing facility services
  - State Plan personal care services
  - Supplemental Services for individuals who live in the community and do not meet nursing facility level of care as determined by the LOCD.
  - MI Health Link HCBS Waiver services for individuals who live in the community and meet nursing facility level of care as determined by the LOCD
- Services provided through PIHPs for individuals’ needs related to behavioral health (BH), intellectual/developmental disability (I/DD) and substance use disorders (SUD)

The MI Health Link program waives the requirement for a three-day hospital stay prior to receiving rehabilitation or skilled care in a Michigan licensed nursing facility. Admission requirements include a physician-written order for nursing facility services, a completed LOCD, and a completed Pre-Admission Screening and Resident Review (PASRR).

**5.1 STATE PLAN PERSONAL CARE SERVICES**

For individuals enrolled in the MI Health Link program, State Plan personal care services will be provided and paid for by the ICO and will no longer be provided through the Medicaid Home Help program. Personal care services are available to individuals who require hands-on assistance in activities of daily living (ADLs) (i.e., eating, toileting, bathing, grooming, dressing, mobility, and transferring) as well as hands-on assistance in instrumental activities of daily living (IADLs) (i.e., personal laundry, light housekeeping, shopping, meal preparation and cleanup, and medication administration).

Personal care services are available to individuals living in their own homes or the home of another. Services may also be provided outside the home for the specific purpose of enabling an individual to be employed.

Providers shall be qualified individuals who work independently, contract with, or are employed by an agency. The ICO may directly hold provider agreements or contracts with independent care providers of the individual’s choice, if the provider meets MDHHS qualification requirements, to provide personal care services. Individuals who currently receive personal care services from an independent care provider may elect to continue to use that provider. The individual may also select a new provider if that provider meets State qualifications. Paid family caregivers will be permitted to serve as a personal care provider in accordance with the state’s requirements for Medicaid State Plan personal care services.
5.1.A. PROVIDER QUALIFICATIONS

A criminal history screen must be conducted for all personal care providers. In addition, the provider must meet the following qualifications:

- Be 18 years of age or older;
- Be able to follow instructions, personal care procedures, perform the services required and handle emergencies;
- Be physically able to perform the needed services;
- Be knowledgeable about when to seek assistance from appropriate sources in the event of an emergency;
- Be dependable and able to meet job demands; and
- Be willing to participate in available training programs if necessary.

5.1.B. ASSESSMENT REQUIREMENTS

During the Level I Assessment, ICO Care Coordinators (or designee who meets the qualifications for an ICO Care Coordinator) must consider if the individual may need personal care services. If the ICO Care Coordinator believes the individual may be eligible for MI Health Link personal care services, the ICO Care Coordinator will conduct the Personal Care Assessment. The face-to-face, comprehensive assessment is the basis for determining and authorizing the amount, scope and duration, and payment of services. The individual needs to be reassessed at least quarterly or with a change of functional and/or health status to determine and authorize the amount, scope and duration, and payment of services. The reassessment must be face-to-face.

ADLs and IADLs are ranked by the ICO Care Coordinator during the Personal Care Assessment. Through the assessment, ADLs and IADLs are assessed according to the following five point scale, where 1 is totally independent and 5 requires total assistance.

<table>
<thead>
<tr>
<th>ADL Level</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Independent</td>
<td>The individual performs the activity with no human assistance.</td>
</tr>
<tr>
<td>Verbal assistance</td>
<td>The individual performs the activity with verbal assistance such as reminding, guiding or encouraging.</td>
</tr>
<tr>
<td>Minimal human assistance</td>
<td>The individual performs the activity with some direct physical assistance and/or assistive technology.</td>
</tr>
<tr>
<td>Moderate human assistance</td>
<td>The individual performs the activity with a great deal of human assistance and/or assistive technology.</td>
</tr>
<tr>
<td>Dependent</td>
<td>The individual does not perform the activity even with human assistance and/or assistive technology.</td>
</tr>
</tbody>
</table>

An individual must be assessed with need for assistance with at least one ADL to be eligible to receive personal care services. Payment for personal care services may only be authorized for needs assessed at the level three (3) ranking or greater. In addition, the individual must have an ADL functional ranking of three (3) or greater to be eligible.
for IADL services. Once an individual is determined eligible for personal care services, his/her authorized ADL and IADL services and the amount, scope and duration must be included in the Individual Integrated Care and Supports Plan (IICSP).

### 5.1.C. PERSONAL CARE SERVICES AND THE MI HEALTH LINK HCBS WAIVER

If an individual ranks at a level 1 or 2, he/she will not be eligible for State Plan Personal Care Services through MI Health Link. If an individual ranks at a level 2, he/she may be eligible for ADL assistance through the MI Health Link HCBS waiver Expanded Community Living Supports (ECLS) benefit if the individual requires prompting, cueing, guiding, teaching, observing, or reminding to complete ADLs. Through the MI Health Link HCBS waiver, an individual may receive IADL assistance if he/she receives prompting, cueing, guiding, etc. to complete ADLs.

ECLS may be provided in addition to State Plan Personal Care Services if the individual requires hands-on assistance with some ADLs, as covered under Personal Care Services, but requires prompting, cueing, guiding, teaching, observing, reminding, or other support (not hands-on) to complete other ADLs and IADLs independently to ensure safety, health, and welfare of the individual.

### 5.1.D. REASONABLE TIME AND TASK

When a task (activity) is assigned to a specific provider, the rank of the activity is used against a Reasonable Time Schedule (RTS) table to determine the recommended time that activity should be assigned. Providers should use the RTS table provided by MDHHS to record and report minutes spent delivering services. The maximum amount is across all assigned providers for an individual, so these are case maximums. When an individual’s needs exceed the hours recommended by the RTS, a rationale must be provided and maintained in the individual’s record.

### 5.1.E. COMPLEX CARE NEEDS

Complex care refers to conditions requiring intervention with special techniques and/or knowledge. These complex care tasks are performed for individuals whose diagnoses or conditions require more management. The conditions may also require special treatment and equipment for which specific instructions by a health professional or individual may be required in order to perform.

- Eating and feeding
- Catheters or legs bags
- Colostomy care
- Bowel program
- Suctioning
- Specialized skin care
- Range of motion exercises
- Peritoneal dialysis
- Wound care
- Respiratory treatment
- Ventilators
- Injections

The ICO Care Coordinator will allocate time for each task assessed a rank of 3 or greater based on interviews with the individual and provider, observation of the individual’s abilities, and use of the RTS as a guide. When hours exceed the RTS, a rationale must be provided and maintained in the individual’s record.

An assessment of need at a ranking of 3 or greater does not automatically guarantee the maximum allotted time allowed by the RTS. The ICO Care Coordinator must assess each task according to the actual time required for its completion.

5.1.F. REIMBURSEMENT AND RATES

After enrollment and according to the requirements of the three-way contract, the ICO must maintain the individual’s current personal care providers and amount, scope and duration of services until the IICSP is reviewed and updated and providers are secured with individual approval. An ICO should use the Medicaid Home Help Payment Schedule to continue paying providers as scheduled. (Refer to the Directory Appendix for additional information.) An ICO should follow this schedule until the ICO and personal care provider agree upon a new payment schedule, which should be defined in the contract between the ICO and the personal care provider. The ICO must publish a pay cycle and must pay these claims on the next available pay cycle date.

Furthermore, an ICO should use the Individual and Agency County Rates to determine payment rates for the transition period until the ICO and personal care provider agree upon a rate that is defined in the ICO and personal care provider contract. (Refer to the Directory Appendix for additional information.)

After the transition period, payment rates for personal care services are established by the ICO. Tasks are assigned minute values which are converted to hours and billed as a total at the end of the ICO’s preferred pay period. Reimbursement is subject to any state or federal laws that may be applicable in the future.

A request for higher or lower hours than shown on the RTS is permissible. A textual rationale is required if the amount of services needed is different than the RTS. Possible reasons for using higher hours include incontinence, severely impaired speech, paralysis and obesity. Possible reasons for lower hours include shared living arrangements (specifically for IADLs, except for administering medications) and responsible relatives able and available to assist.

If the individual does not require the maximum allowable hours for IADLs, only the amount of time needed for each task shall be authorized. Assessed hours for IADLs (except medication administration) must be **prorated by one half** in shared living arrangements where other adults reside in the home as personal care services are only for the benefit of the individual. This does not include situations where others live in
adjoined apartments, flats or in a separate home on shared property and there is no shared common living area. In shared living arrangements where it can be clearly documented that IADLs for the enrolled individual are completed separately from others in the home, hours for IADLs do not need to be prorated.

5.1.G. RESPONSIBLE RELATIVES AND GUARDIANS

Adult children (18 years of age or older) may provide personal care services to a parent. An individual’s spouse cannot be paid to provide personal care services to the individual as they are considered responsible relatives. Couples who are separated must provide verification that they are no longer residing in the same home. Verification may include a driver’s license, rent receipt or utility bill reflecting their separate mailing address. A spouse who is legally separated from a spouse cannot be paid to provide personal care services. ADLs may be approved when an individual’s spouse is unavailable or unable to provide these services. “Unavailable” means absence from the home for an extended period due to employment, school or other legitimate reasons. The responsible relative must provide a work or school schedule to verify they are unavailable to provide care. “Unable” means the responsible person has disabilities of their own which prevent them from providing care.

Shopping, laundry, or light housecleaning shall not be approved when a responsible relative of the individual resides in the home unless they are unavailable or unable to provide these services. These findings must be documented.

5.1.H. INDIVIDUALS IN ADULT FOSTER CARE FACILITIES AND HOME FOR THE AGED

For individuals in adult foster care facilities or home for the aged, a flat monthly supplement rate is established annually by the state legislature for those Medicaid beneficiaries who, according to a standardized assessment, have a documented need for personal care services. The supplement rate is included in the ICO rates, and the ICOs must pay this rate to adult foster care homes and homes for the aged providers for individuals enrolled in MI Health Link. ICOs and Adult Foster Care facilities and Homes for the Aged must use the billing invoice provided by MDHHS.

5.2 SUPPLEMENTAL SERVICES

MI Health Link supplemental services are available for any individuals who live in the community, wish to move from a nursing facility to the community, do not meet LOCD and are not enrolled in the MI Health Link HCBS waiver. The four supplemental services are Adaptive Medical Equipment and Supplies, Community Transition Services, Personal Emergency Response System, and Respite.

5.2.A. ADAPTIVE MEDICAL EQUIPMENT AND SUPPLIES

This service includes devices, controls, or appliances specified in the IICSP that enable individuals to increase their abilities to perform activities of daily living, or to perceive, control, or communicate with the environment in which they live. Also included are items necessary for life support or to address physical conditions, along with ancillary supplies and equipment necessary to the proper functioning of such items, and durable and non-durable medical equipment and medical supplies not available under the Medicaid State
Plan and Medicare that are necessary to address individual functional limitations. This will also cover the costs of equipment maintenance. The coverage includes training the individual and/or caregivers in the operation and/or maintenance of the equipment and the use of a supply when initially purchased. The ICO shall not authorize payment for herbal remedies, nutraceuticals, and/or other over-the-counter medications for uses not approved by the United States Food and Drug Administration (FDA).

All items shall meet applicable standards of manufacture, design, and installation. Each direct service provider must enroll in Medicare and/or Medicaid as a Durable Medical Equipment (DME) provider, pharmacy, etc., as appropriate. This must be verified at the beginning of service delivery and annually thereafter. The ICO may obtain some items directly from a retail store that offers the item to the general public. When utilizing retail stores, the ICO must ensure the item purchased meets the service standards. The ICO may choose to open a business account with a retail store for such purchases. The ICO must maintain the original receipts and maintain accurate systems of accounting to verify the specific individual who received the purchased item. Items must be of direct medical or remedial benefit to the individual, and this benefit must be documented in the individual’s record.

It must be documented on the IICSP or Care Bridge Record that the item is the most cost-effective alternative to meeting the individual’s needs. There must be documentation on the IICSP or Care Bridge record that the best value in warranty coverage was obtained at the time of purchase. Liquid nutritional supplement orders must be renewed every six months by a physician, physician’s assistant, or nurse practitioner (in accordance with Michigan Scope of Practice laws). Where feasible, the ICO and/or direct service provider shall seek confirmation of the need for the item from the individual’s physician.

5.2.B. COMMUNITY TRANSITION SERVICES

Community Transition Services (CTS) include non-reoccurring expenses for individuals transitioning from a nursing facility to another residence where the individual is responsible for his/her own living arrangement. Person-centered planning must be used throughout the entire community transition process. The ICO shall begin CTS no more than six months before the expected discharge from the nursing facility. Allowable transition costs include the following:

- Housing or security deposit: A one-time expense to secure housing or obtain a lease.
- Utility hook-ups and deposits: A one-time expense to initiate and secure utilities (television service and internet are excluded).
- Furniture, appliances, and moving expenses: One-time expenses necessary to occupy and safely reside in a community residence (diversion or recreational devices are excluded).
- Cleaning: A one-time cleaning expense to ensure a clean environment, including pest eradication, allergen control, and over-all cleaning.
- Coordination and support services: To facilitate transitioning of an individual to a community setting.
Other services deemed necessary and documented within the individual's plan of service to accomplish the transition into a community setting.

Ongoing monthly rental or mortgage expense, ongoing utility charges, or items that are intended for purely diversional or recreational purposes are excluded under this service.

5.2.C. PERSONAL EMERGENCY RESPONSE SYSTEM

A Personal Emergency Response System (PERS) is an electronic device that enables individuals to secure help in an emergency. The individual may also wear a portable “help” button to allow for mobility. The system is connected to the individual’s phone and programmed to signal a response center once the “help” button is activated. The PERS provider may offer this service for cellular or mobile phones and devices. The device must meet industry standards. The individual must reside in an area where cellular or mobile coverage is reliable. When the individual uses the device to signal and otherwise communicate with the PERS provider, the technology for the response system must meet all other service standards. The PERS provider must ensure at least monthly testing of each PERS unit to maintain proper functioning.

PERS does not cover monthly telephone charges associated with phone service. This service is limited to persons who either live alone or who are left alone for significant periods of time on a routine basis and who could not summon help in an emergency without this device. The ICO may authorize PERS units for individuals who do not live alone if both the waiver individual and the person with whom they reside would require extensive routine supervision without a PERS unit in the home. An example of this is two individuals who live together and both are physically and/or cognitively unable to assist the other individual in the event of an emergency.

The Federal Communication Commission (FCC) must approve the equipment used for the response system. The equipment must meet UL® safety standards 1637 specifications for Home Health Signaling Equipment.

The provider must staff the response center with trained personnel 24 hours per day, 365 days per year. The response center will provide accommodations for persons with limited English proficiency. The response center must maintain the monitoring capacity to respond to all incoming emergency signals. The response center must have the ability to accept multiple signals simultaneously. The response center must not disconnect calls for a return call or put on a first call, first serve basis. The provider will furnish each responder with written instructions and provide training, as appropriate.

5.2.D. RESPITE

Respite services may be provided at the individual’s home, in the home of another person, or at another setting outside the individual’s home. Respite service criteria are different depending on the setting. Respite services are limited to a total of 14 overnight stays per 365 days regardless of the setting. The ICO may provide more respite services as an optional benefit. For individuals receiving respite services through the PIHP, they
must first exhaust the respite benefit through the PIHP before using this respite service as an ICO supplemental service.

5.2.D.1. RESPITE PROVIDED AT THE INDIVIDUAL’S HOME OR IN THE HOME OF ANOTHER PERSON

Respite care services are provided on a short-term, intermittent basis to relieve the individual’s family or other primary caregiver(s) from daily stress and care demands during times when they are providing unpaid care. Relief needs of hourly or shift staff workers should be accommodated by staffing substitutions, plan adjustments, or location changes and not by respite care.

Respite services include:

- Attendant care (individual is not bed-bound), such as companionship, supervision, and/or assistance with toileting, eating, and ambulation.
- Basic care (individual may or may not be bed-bound), such as assistance with ADLs, a routine exercise regimen, and self-medication.

Members of an individual’s family who are not the individual’s regular caregiver may provide respite for the regular caregiver. However, the ICO shall not authorize funds to pay for services furnished to an individual by that person’s spouse. Family members who provide respite services must meet the same standards as providers who are unrelated to the individual.

Respite services cannot be scheduled on a long term daily basis. Respite should be used on an intermittent basis to provide scheduled relief of informal caregivers. Respite is not intended to be provided on a continuous, long-term basis where it is a part of daily services that would enable an unpaid caregiver to work elsewhere full time. The costs of room and board are not included in the payment for respite services.

5.2.D.2. RESPITE PROVIDED OUTSIDE THE HOME

Respite care services are provided on a short-term, intermittent basis to relieve the individual’s family or other primary caregiver(s) from daily stress and care demands during times when they are providing unpaid care. Relief needs of hourly or shift staff workers should be accommodated by staffing substitutions, plan adjustments, or location changes and not by respite care.

Each out of home respite service provider must be a licensed group home as defined in Michigan Compiled Law (MCL) 400.701ff, which includes adult foster care homes and homes for the aged. Respite may include the cost of room and board if the service is provided in a licensed Adult Foster Care home or licensed Home for the Aged.

Respite services include:

- Attendant care (individual is not bed-bound) such as companionship, supervision and/or assistance with toileting, eating, and ambulation.
Basic care (individual may or may not be bed-bound) such as assistance with ADLs, a routine exercise regimen, and self-medication.

Out-of-home respite may be scheduled for several days in a row depending upon the needs of the individual and the individual’s caregivers.

5.3 MI Health Link HCBS Waiver Services

These services are intended for individuals who meet all of the following criteria:

- are enrolled in the MI Health Link program,
- meet nursing facility level of care as determined by the Michigan Medicaid Nursing Facility Level of Care Determination (LOCD) tool,
- demonstrate a need for one or more of the services listed below, which must be identified in the IICSP.

Individuals must receive at least one waiver service each month to remain on the waiver. The ICO and direct service providers must adhere to the service definition and operating standards to be eligible to receive payment of waiver expenses.

5.3.A. Adaptive Medical Equipment and Supplies

For the definition of the Adaptive Medical Equipment and Supplies service, refer to the Supplemental Services section, Adaptive Medical Equipment and Supplies.

5.3.B. Adult Day Program

Adult Day Program services are furnished four or more hours per day on a regularly scheduled basis, for one or more days per week, or as specified in the IICSP, in a non-institutional, community-based setting, encompassing both health and social services needed to ensure the optimal functioning of the individual. Meals provided as part of these services shall not constitute a “full nutritional regimen,” i.e., three meals per day. Physical, occupational and speech therapies may be furnished as component parts of this service.

Transportation between the individual’s residence and the Adult Day Program center is provided when it is a standard component of the service. Not all Adult Day Program centers offer transportation to and from their location. Adult Day Program centers that do offer transportation may only offer it in a specified area. When the Adult Day Program center offers transportation, it is a component part of the Adult Day Program service. If the center does not offer transportation, then the ICO will pay for the transportation to and from the Adult Day Program center separately.

Individuals cannot receive personal care services or Expanded Community Living Supports during the time spent at the Adult Day Program facility. Payment for Adult Day Program includes all services provided while at the facility. Personal care services and Expanded Community Living Supports may be used in conjunction with Adult Day Program services, but cannot be provided at the same time unless the specific
component of the service includes laundry, housecleaning, etc., that does not require the individual to be present.

Adult Day Program may be authorized only if the individual meets at least one of the following criteria:

- Requires regular supervision to live in his/her own home or the home of a relative.
- If he/she has a caregiver, the individual must require a substitute caregiver while his/her regular caregiver is unavailable.
- Has difficulty or is unable to perform ADLs without assistance.
- Capable of leaving the residence with assistance to receive services.
- In need of intervention in the form of enrichment and opportunities for social activities to prevent and/or postpone deterioration that may lead to institutionalization.

A referral from an ICO for a waiver individual shall replace any screening or assessment activities performed for other Adult Day Program individuals at the setting. The direct Adult Day Program service provider shall accept copies of the ICO’s assessments and IICSP to eliminate duplicate assessment and service planning activities.

Each program shall provide directly, or coordinate with the ICO to arrange for the provision of the following services:

- Transportation
- Personal Care
- Nutrition: one hot meal per eight-hour day which provides one-third of the recommended daily allowances and follows the meal pattern specified in the home delivered meals service standard. Individuals in attendance from eight to fourteen hours per day shall receive an additional meal to meet a combined two-thirds of the recommended daily allowances. Modified diet menus should be provided where feasible and appropriate. Such modifications shall take into consideration individual choice, health, religious and ethnic diet preferences.
- Recreation: consisting of planned activities suited to the needs of the individual and designed to encourage physical exercise, to maintain or restore abilities and skill, to prevent deterioration, and to stimulate social interaction.

If the program arranges for provision of any service at a place other than program-operated facilities, a written agreement specifying supervision requirements and responsibilities shall be in place. The ICO shall provide care coordination.

Each program shall keep all individuals’ files confidential in controlled access files. Each program shall use a standard release of information form that is time limited and specific as to the released information.

Each provider shall employ a full-time program director with a minimum of a bachelor’s degree in a health or human services field or be a qualified health professional. The provider shall continually provide support staff at a ratio of no less than one staff person.
for every ten participants. The provider may only provide health support services under the supervision of a Registered Nurse (RN). If the program acquires either required or optional services from other individuals or organizations, the provider shall maintain a written agreement that clearly specifies the terms of the arrangement between the provider and other individual or organization.

Each program shall establish written procedures (reviewed and approved by a consulting pharmacist, physician, or RN) that govern the assistance given by staff to individuals taking their own medications while participating in the program. The policies and procedures must minimally address:

- Written consent from the individual or individual’s representative to assist with medications.
- Verifications of the individual’s medication regimen, including prescriptions and dosages.
- The training and authority of staff to assist individuals with taking their own prescribed or non-prescription medications and under what conditions such assistance may take place.
- Procedures for medication set up.
- Secure storage of individuals’ medications. Medications must be returned to the individual.
- Instructions for entering medication information in individual files, including times and frequency of assistance.

Program staff shall have basic first-aid training and any other training as required by MDHHS and the ICO.

If the provider operates its own vehicles for transporting individuals to and from the program site, the provider shall meet the following transportation minimum standards:

- The Secretary of State shall appropriately license all drivers and vehicles and all vehicles shall be appropriately insured.
- All paid drivers shall be physically capable and willing to assist persons requiring help to get in and out of vehicles. The provider shall make such assistance available unless expressly prohibited by either a labor contract or an insurance policy.
- All paid drivers shall be trained to cope with medical emergencies unless expressly prohibited by a labor contract.
- Each program shall operate in compliance with P.A. 1 of 1985 regarding seat belt usage.

The provider shall maintain all equipment and furnishings used during program activities or by program participants in safe and functional condition. Each Adult Day Program center must have the following furnishings:

- At least one straight back or sturdy folding chair for each individual and staff person.
- Lounge chairs and/or day beds as needed for naps and rest periods.
- Storage space for individuals’ personal belongings.
- Tables for both ambulatory and non-ambulatory individuals.
- A telephone accessible to all individuals.
- Special equipment as needed to assist persons with disabilities.

Each provider shall post emergency procedures (fire, severe weather, etc.) in each room of the program site. Practice drills of emergency procedures must occur once every six months. The program shall maintain a record of all practice drills.

Each Adult Day Program center must document that it is in compliance with:

- Barrier-free design specification of Michigan and local building codes.
- Fire safety standards.
- Applicable Michigan and local public health codes.

Adult Day Program settings must be compliant with the HCBS Final Rule as indicated in the Home and Community-Based Residential and Non-Residential Settings subsection.

5.3.C. ASSISTIVE TECHNOLOGY

The Assistive Technology service includes technology items used to increase, maintain, or improve an individual's functioning and promote independence. The service may include assisting the individual in the selection, design, purchase, lease, acquisition, application, or use of the technology item. This service also includes vehicle modifications to the vehicle that is the individual's primary method of transportation. This service includes repairs and maintenance of assistive technology devices. Vehicle modifications must be of direct medical or remedial benefit to the individual and specified under the IICSP. Some examples of assistive technology include, but are not limited to, van lifts, hand controls, computerized voice system, communication boards, voice activated door locks, power door mechanisms, adaptive or specialized communication devices, assistive dialing device, adaptive door opener and specialized alarm or intercom.

Cost limits for this service are as follows:

- $15,000 maximum for van lifts, including tie-downs, for the duration of the 5-year waiver period
- $5,000 yearly (waiver year) maximum for all other assistive technology devices

Items must be of direct medical or physical benefit to the individual. Where feasible, the ICO and/or direct service provider must seek confirmation of the need for the item from the individual's physician. It must be documented in the IICSP that the item is the most cost-effective alternative to meeting the individual's needs. Items must meet applicable standards of manufacture, design, and installation. There must be documentation that the best value in warranty coverage was obtained at the time of purchase.

Modifications will only be made to vehicles with proper insurance coverage, with the exception of new vehicles coming directly from an automotive factory to the entity performing the modification.
Direct service providers must enroll in Medicare and Medicaid as a Durable Medical Equipment, Prosthetics, Orthotics and Supplies (DMEPOS) provider, pharmacy, etc., as appropriate. Verification of provider qualifications must be conducted prior to service delivery and annually thereafter. Other contracted or subcontracted providers must have written policies and procedures compatible with requirements as specified in the contract between MDHHS and the ICO and/or the three-way contract. Contracted/subcontracted providers must have appropriate state licensure or certification required to complete or provide the service or item. Verification of provider qualifications must be conducted prior to service delivery and annually thereafter.

Items like cell phones, internet service, and full-home wiring systems are excluded from this benefit. This service also does not include paying for or leasing vehicles, vehicle insurance and vehicle repairs.

5.3.D. CHORE SERVICES

Chore Services include those duties needed to maintain the home in a clean, sanitary, and safe environment to provide safe access inside the home, and yard maintenance and snow plowing to provide access to and egress outside of the home. This service includes tasks such as heavy household chores (washing floors, windows, and walls), tacking loose rugs and tiles, moving heavy items of furniture, mowing, raking, cleaning hazardous debris such as fallen branches and trees, weatherization, and pest control. The service may include materials and disposable supplies used to complete chore tasks. The ICO may also use waiver funds to purchase or rent the equipment or tools used to perform chore tasks for waiver individuals.

Chore services are covered only in cases when neither the individual nor anyone else in the household is capable of performing or financially paying for them, and where no other relative, caregiver, landlord, community or volunteer agency, or third party payer is capable of, or responsible for, their provision. In the case of rental property, the responsibility of the landlord, pursuant to the lease agreement, will be examined prior to any authorization of service.

Verification of provider qualifications must be conducted prior to service delivery and annually thereafter. Providers must have previous relevant experience and/or training for the tasks specified and authorized in the IICSP. The ICO must deem the chosen provider capable of performing the required tasks. Pest control suppliers must be properly licensed.

5.3.E. COMMUNITY TRANSITION SERVICES

For the definition of Community Transition Services (CTS), refer to Community Transition Services in the Supplemental Services subsection.

For persons expected to enroll in the MI Health Link HCBS waiver, when a transitioning individual requires a home modification (ramp, widened doorways, etc.) before the transition can take place, the ICO shall authorize only those modifications immediately necessary for community transition as CTS. The ICO shall authorize all other needed
modifications as Environmental Modifications services or Chore services through the waiver, as appropriate.

5.3.F. ENVIRONMENTAL MODIFICATIONS

The Environmental Modifications service covers physical adaptations to the home, required in the individual’s IICSP, that are necessary to ensure the health and welfare of the individual or that enable the individual to function with greater independence in the home. Such adaptations include the installation of ramps and grab bars, widening of doorways, modification of bathroom facilities, or installation of specialized electric and plumbing systems that are necessary to accommodate the medical equipment and supplies necessary for the welfare of the individual. Complex kitchen and bathroom modifications may be completed if medically necessary for the individual. Environmental modifications are those which are installed in the residence versus enhanced equipment or assistive technology which are portable from residence to residence. A ramp or lift will be covered for only one exterior door or other entrance.

The modification/adaptation must be for a primary residence, but may include additional residences subject to prior authorization by the ICO. Examples of additional residences might be a family member’s cottage or the individual’s second home or cottage so the individual can go there to be with family.

The modification/adaptation must be the most cost-effective and reasonable alternative. Any modifications/adaptations shall only be used to modify existing spaces or structures. The existing structure must have the capability to accept and support the proposed changes. Repairs, modifications, or adaptations shall not be performed on a condemned structure. Modifications must comply with local building codes. The infrastructure of the home involved in the funded adaptations (e.g., electrical system, plumbing, well or septic, foundation, heating and cooling, smoke detector systems, or roof) must be in compliance with any applicable local codes.

Environmental modifications/adaptations required to support proper functioning of medical equipment, such as electrical upgrades, are limited to the requirements for safe operation of the specified equipment and are not intended to correct existing code violations in an individual’s home.

The ICO may use MI Health Link funds for labor costs and to purchase materials used to complete the modification to prevent or remedy a safety hazard. The direct service provider shall provide the equipment or tools needed to perform the tasks unless another source can provide the equipment or tools at a lower cost or free of charge and the provider agrees to use those tools.

Prior to the start of the modification of a rental property or unit, the landlord must approve the modification plan. A written agreement between the landlord, the individual, and the ICO must specify that the ICO and individual are not responsible for any costs to restore the property to the original condition.

Excluded from this service are those adaptations or improvements to the home that:

- Are of general utility.
- Are considered to be standard housing obligations of the individual or homeowner.
- Are not of direct medical or remedial benefit to the individual. For example, kitchen modifications must be required for the individual to prepare his/her own meals.
- Modifications to rental properties if the rental agreement states that it is the responsibility of the landlord to provide such modifications.
- Are used for upgrades to the home or for additions to homes (adding square footage, etc.).
- Are improvements exclusively required to meet local building codes and not directly related to an individual's medical or physical condition.

Some examples of exclusions include, but are not limited to, carpeting, roof repair, sidewalks, driveways, heating, central air conditioning (unless it is the most cost effective and reasonable alternative), garages, raised garage doors, storage and organizers, hot tubs, whirlpool tubs, swimming pools, landscaping and general home repairs.

The ICO shall not cover general construction costs in a new home or additions to a home purchased after the individual is enrolled in the waiver. If an individual or the individual’s family purchases or builds a home while receiving waiver services, it is the individual’s or family’s responsibility to ensure the home will meet basic needs, such as having a ground floor bath or bedroom if the individual has mobility limitations. However, MI Health Link funds may be authorized to assist with the adaptations noted above (e.g. ramps, grab bars, widening of doorways, bathroom modifications, etc.) for a home recently purchased. If modifications are needed to a home under construction that require special adaptation to the plan (e.g. roll-in shower), the ICO may fund the difference between the standard fixture and the modification required to accommodate the individual’s need.

Contracted providers (such as licensed building contractors) must have appropriate certification or licensure under Michigan regulations and law such as MCL 339.601(1), MCL 339.601.2401, or MCL 339.601.2403(3). Verification of certification, licensure, or other provider qualifications must be done prior to execution of the contract related to the modification project to be done.

**5.3.G. EXPANDED COMMUNITY LIVING SUPPORTS**

To receive ECLS, individuals MUST need prompting, cueing, observing, guiding, teaching, and/or reminding to independently complete ADLs. ECLS does not include hands on assistance for ADLs unless something occurs incidental to this service. ECLS includes social/community participation, relationship maintenance, and attendance at medical appointments.

ECLS includes:

- Assisting, reminding, cueing, observing, guiding and/or training in the following activities:
  - Meal preparation
  - Laundry
  - Routine, seasonal, and heavy household care and maintenance
- ADLs such as bathing, eating, dressing, and personal hygiene
- Shopping for food and other necessities of daily living

- Assistance, support, and/or guidance with activities such as:
  - Money management
  - Non-medical care (not requiring nursing or physician intervention)
  - Social participation, relationship maintenance, and building community connections to reduce personal isolation
  - Transportation (excluding to and from medical appointments) from the individual’s residence to community activities, among community activities, and from the community activities back to the individual’s residence
  - Participation in regular community activities incidental to meeting the individual's community living preferences
  - Attendance at medical appointments
  - Acquiring or procuring goods and services necessary for home and community living

- Reminding, cueing, observing, and/or monitoring of medication administration
- Staff assistance with preserving the health and safety of the individual in order that he/she may reside and be supported in the most integrated independent community setting.
- Training or assistance on activities that promote community participation, such as using public transportation, using libraries, or volunteer work.
- Dementia support, including but not limited to redirection, reminding, modeling, socialization activities, and activities that assist the individual as identified in the individual’s IICSP.
- Observing and reporting to the ICO Care Coordinator any changes in the individual’s condition and the home environment.

Individual providers chosen by the individual must meet the following provider qualifications (qualifications must be verified prior to initial service delivery and annually thereafter):

- Providers must be at least 18 years of age, have ability to communicate effectively both orally and in writing and follow instructions, be trained in first aid and cardiopulmonary resuscitation, be able to prevent transmission of communicable disease and be in good standing with the law as validated by a criminal history review. If providing transportation related to this service, the provider must possess a valid Michigan driver’s license.

- Providers of ECLS must have previous relevant experience or training and skills in housekeeping, household management, good health practices, observation, reporting, recording information, and reporting and identifying abuse and neglect. The individual(s) must also be trained on the individual’s specific needs as identified in the IICSP. Additionally, skills, knowledge, and experience with food preparation, safe food handling procedures are highly desirable.
Previous relevant experience and training to meet MDHHS operating standards. Refer to the Three-Way Contract, supporting documentation, and agreements within the provider’s contract with the ICO.

A RN licensed to practice nursing in the State shall furnish supervision of ECLS providers. At the State's discretion, other qualified individuals may supervise ECLS providers. The direct care worker’s supervisor shall be available to the worker at all times the worker is furnishing ECLS services.

The ICO and/or provider agency must train each worker to properly perform each task required for each individual the worker serves before delivering the service to that individual. The supervisor must ensure that each worker can competently and confidently perform every task assigned for each individual served. MDHHS strongly recommends each worker delivering ECLS services complete a certified nursing assistance training course.

ECLS providers may prompt, cue, or supervise the individual to perform higher-level, non-invasive tasks such as maintenance of catheters and feeding tubes, minor dressing changes, and wound care if the direct care worker has been individually trained and supervised by an RN for each individual who requires such care. The supervising RN must ensure each worker’s confidence and competence in the performance of each task required.

ECLS service providers must have previous relevant experience or training and skills in housekeeping, household management, good health practices, observation, reporting, and recording information. Additionally, skills, knowledge, and/or experience with food preparation, safe food handling procedures, and reporting and identifying abuse and neglect are highly desirable.

Previous relevant experience and training to meet MDHHS operating standards. Refer to the Three-Way Contract, supporting documentation, and agreements within the provider’s contract with the ICO.

When the ECLS services include transportation, the following standards apply:

- The ICO may not use MI Health Link funds to purchase or lease vehicles for providing transportation services to waiver individuals.
- The Secretary of State must appropriately license all drivers and register all vehicles used for transportation supported all or in part by MI Health Link funds. The provider must cover all vehicles used with liability insurance.
▪ All paid drivers for transportation providers supported entirely or in part by MI Health Link funds shall be physically capable and willing to assist persons requiring help to and from and to get in and out of vehicles. The provider shall offer such assistance unless expressly prohibited by either a labor contract or insurance policy.

▪ The provider shall train all paid drivers for transportation programs supported entirely or in part by MI Health Link funds to cope with medical emergencies, unless expressly prohibited by a labor contract or insurance policy.

▪ Each provider shall operate in compliance with P.A. 1 of 1985 regarding seat belt usage.

Each direct service provider who chooses to allow staff to assist individuals with self-medication shall establish written procedures that govern the assistance given by staff. These procedures shall be reviewed by a consulting pharmacist, physician, or RN and shall include, at a minimum:

▪ The provider staff authorized to assist individuals with taking their own prescription or over-the-counter medications and under what conditions such assistance may take place. This must include a review of the type of medication the individual takes and its impact upon the individual.

▪ Verification of prescription medications and their dosages. The individual shall maintain all medications in their original, labeled containers.

▪ Instructions for entering medication information in individual files.

▪ A clear statement of the individual’s and his/her legal representative’s responsibility regarding medications taken by the individual and the provision for informing the individual and his/her legal representative of the provider’s procedures and responsibilities regarding assisted self-administration of medications.

ECLS providers may only administer medications in compliance with Michigan Administrative Rule 330.7158:

▪ A provider shall only administer medication at the order of a physician and in compliance with the provisions of section 719 of the act, if applicable.

▪ A provider shall ensure that medication use conforms to federal standards and the standards of the medical community.

▪ A provider shall not use medication as punishment, for the convenience of the staff, or as a substitute for other appropriate treatment.

▪ A provider shall review the administration of a psychotropic medication periodically as set forth in the individual’s IICSP and based upon the individual’s clinical status.

▪ If an individual cannot administer his/her own medication, a provider shall ensure that medication is administered by or under the supervision of personnel who are qualified and trained.

▪ A provider shall record the administration of all medication in the individual’s record. The ICO may do this electronically or via paper format, but the records must be readily available if requested by MDHHS.
• A provider shall ensure that medication errors and adverse drug reactions are immediately and properly reported to a physician and recorded in the individual’s record.

ECLS cannot be provided in circumstances where they would be a duplication of services available through MI Health Link. The distinction must be apparent by unique hours and units in the approved IICSP.

ECLS may be furnished outside the individual’s home.

The individual oversees and supervises individual providers on an on-going basis when participating in arrangements that support self-determination. This may also include transportation to allow people to get out into the community when it is incidental to the IICSP. When transportation incidental to the provision of ECLS is included, the ICO shall not also authorize transportation as a separate waiver service for the individual.

Members of an individual’s family may provide ECLS to the individual. However, the ICO shall not directly authorize funds to pay for services furnished to an individual by that person’s spouse or legal guardian or other financially responsible person. Family members who provide this service must meet the same standards as providers who are unrelated to the individual. Roommates or other individuals who live with the individual may provide ECLS services, but payment for services must be pro-rated by one-half if the service will also benefit the person performing the service (i.e., meal preparation, laundry, housecleaning, etc.). Paid ECLS services are only for the benefit of the individual receiving the services.

In shared living arrangements where there is more than one person in the home receiving the service by the same caregiver, payment for services must be based on a pro-rated percentage/fraction relative to the care each person receives. When services can be clearly documented separately from other individuals in the home, payment need not be pro-rated. Providers must be trained to perform each required task prior to service delivery. The supervisor must ensure the provider can competently and confidently perform each assigned task.

With the assistance of the individual and/or individual’s caregiver, the ICO or direct service provider shall determine an emergency notification plan for each individual, pursuant to each visit for emergencies and provider no-shows or late arrivals.

ECLS does not include the cost associated with room and board. ECLS also excludes nursing and skilled therapy services.

ECLS provided in a licensed setting includes only those supports and services that are in addition to, and shall not replace, usual and customary care furnished to residents in the licensed setting. Documentation in the individual’s record must clearly identify the individual’s need for additional supports and services not covered by licensure. The IICSP must clearly identify the portion of the individual’s supports and services covered by ECLS. The setting must comply with the requirements of the Home and Community-Based Services (HCBS) Final Rule as described in the Home and Community-Based Residential and Non-Residential Settings subsection.
5.3.H. FISCAL INTERMEDIARY

Fiscal Intermediary (FI) services assist the individual to live independently in the community while controlling his/her individual budget and choosing the staff to work with him/her. The FI helps the individual to manage and distribute funds contained in the individual budget. The individual uses funds to purchase home and community based services authorized in the IICSP. FI services include, but are not limited to, the facilitation of the employment of service workers by the individual, including federal, state, and local tax withholding/payments, unemployment compensation fees, wage settlements; fiscal accounting; tracking and monitoring individual-directed budget expenditures and identify potential over and under expenditures; ensuring compliance with documentation requirements related to management of public funds. The FI helps the individual manage and distribute funds contained in the individual budget. The FI also assists with training the individual and providers, as necessary, in tasks related to the duties of the FI including, but not limited to, billing processes and documentation requirements.

FI services are available only to individuals participating in arrangements that support self-determination. Additionally, FI services may not be provided by the individual's family, guardian, or providers of other services for the same individual. The ICO and fiscal intermediary must abide by the Self-Determination Implementation Technical Advisory and any other requirements provided by MDHHS. FI services through the MI Health Link HCBS waiver must only be used for MI Health Link HCBS services as identified in the CMS-approved 1915(c) waiver application.

Each FI must:

- Be bonded and insured. The insured amount must exceed the total budgetary amount the FI is responsible for administering.
- Demonstrate the ability to manage budgets and perform all functions of the FI including all activities related to employment taxation, worker’s compensation, and state, local, and federal regulations.
- Demonstrate competence in managing budgets and performing other functions and responsibilities of a fiscal intermediary.
- Provide four basic areas of performance:
  - Function as the employer agency for individuals directly employing workers to ensure compliance with payroll tax and insurance requirements;
  - Ensure compliance with requirements related to management of public funds, the direct employment of workers by individuals, and contracting for other authorized supports and services;
  - Facilitate successful implementation of the self-determination arrangements by monitoring the use of the budget and providing monthly budget status reports to each individual and ICO; and
  - Offer supportive services to enable individuals to self-determine and direct the supports and services they need.
5.3.I. HOME DELIVERED MEALS

This service is the provision of one to two nutritious meals per day to individuals who are unable to care for their nutritional needs. This service must include and prioritize healthy meal choices that meet any established criteria under state or federal law. Meal options must meet individual preferences in relation to specific food items, portion size, dietary needs, and cultural and/or religious preferences. ICOs must follow the minimum operating standards for this service as provided by MDHHS.

Each ICO must have written eligibility criteria for persons receiving home delivered meals through the waiver which include, at a minimum:

- The individual must be unable to obtain food or prepare complete meals.
- The individual does not have an adult living at the same residence or in the vicinity that is able and willing to prepare all meals.
- The individual does not have a paid caregiver that is able and willing to prepare meals for the individual.
- The provider can appropriately meet the individual’s special dietary needs, and the meals available would not jeopardize the health of the individual.
- The individual must agree to be home when meals are delivered. For any unavoidable absence, the provider or ICO must be contacted. If the ICO is contacted, they must contact the provider.

5.3.J. NON-MEDICAL TRANSPORTATION

This service is offered to enable individuals to gain access to waiver and other community services, activities, and resources, specified by the Individual Integrated Care and Supports Plan (IICSP). Whenever possible, the ICO shall utilize family, neighbors, friends, or community agencies that can provide this service free of charge. Need for this service and details as to whom and how it will be provided should be discussed in the person-centered planning meeting and documented in the IICSP.

Direct service providers shall be a centrally organized transportation company or agency. Transportation may be provided by any of the following methods:

- **Demand/Response**: Characterized by scheduling of small vehicles to provide door-to-door or curb-to-curb service on demand. The provider may include a passenger assistance component and either or both of the following variations:
  - **Route Deviation Variation**: A normally fixed-route vehicle leaves the scheduled route upon request to pick up the individual.
  - **Flexible Routing Variation**: Providers constantly modify routes to accommodate service requests.
- **Public Transit**: Characterized by partial or full payment of the cost for an individual to use an available public transit system. (This can be either a fixed route or demand/response). The provider may include a passenger assistance component.
- **Volunteer**: Characterized by reimbursement of out-of-pocket expenses for individuals who transport individuals in their private vehicles. The provider may include a passenger assistance component.

- **Ambu-cab**: Characterized by a wheelchair-equipped van to provide door-to-door service on demand. The provider shall include a passenger assistance component.

Transportation vehicles must be properly licensed and registered by the State and must be covered with liability insurance. MI Health Link funds may not be used to purchase or lease vehicles for providing transportation services to waiver individuals. All paid drivers for transportation providers supported entirely or in part by MI Health Link funds shall be physically capable and willing to assist persons requiring help to and from and to get in and out of vehicles. The provider shall offer such assistance unless expressly prohibited by either a labor contract or insurance policy. The provider shall train all paid drivers for transportation programs supported entirely or in part by waiver funds to cope with medical emergencies, unless expressly prohibited by a labor contract or insurance policy. Each provider shall operate in compliance with P.A. 1 of 1985 regarding seat belt usage.

MI Health Link funds shall not be used to reimburse caregivers (paid or informal) to run errands for individuals when the individual does not accompany the driver of the vehicle.

**5.3.K. PERSONAL EMERGENCY RESPONSE SYSTEM**

For the definition of the Personal Emergency Response System (PERS) definition, refer to Personal Emergency Response System in the Supplemental Services subsection.

**5.3.L. PREVENTIVE NURSING SERVICES**

Preventive Nursing Services are covered on a part-time, intermittent (separated intervals of time) basis for an individual who generally requires nursing services for the management of a chronic illness or physical disorder in the individual’s home and are provided by a RN or a licensed practical nurse (LPN) under the supervision of a RN. Nursing services are for individuals who require more periodic or intermittent nursing than otherwise available for the purpose of preventive interventions to reduce the occurrence of adverse outcomes for the individual such as hospitalizations and nursing facility admissions. An individual using this service must demonstrate a need for observation and evaluation.

When the individual’s condition is unstable, could easily deteriorate, or when significant changes occur, the ICO covers nurse visits for observation and evaluation. The purpose of the observation and evaluation is to monitor the individual’s condition and report findings to the individual’s physician or other appropriate health care professional such as the ICO Care Coordinator to prevent additional decline, illness, or injury to the individual. The ICO Care Coordinator shall communicate with both the nurse providing this service and the individual's health care professional to ensure the nursing needs of the individual are being addressed.
Individuals must meet at least one of the following criteria to qualify for this service:

- Be at high risk of developing skin ulcers, or have a history of resolved skin ulcers that could easily redevelop.
- Require professional monitoring of vital signs when changes may indicate the need for modifications to the medication regimen.
- Require professional monitoring or oversight of blood sugar levels, including individual-recorded blood sugar levels, to assist with effective pre-diabetes or diabetes management.
- Require professional assessment of the individual’s cognitive status or alertness and orientation to encourage optimal cognitive status and mental function or identify the need for modifications to the medication regimen.
- Require professional evaluation of the individual’s success with a prescribed exercise routine to ensure its effectiveness and identify the need for additional instruction or modifications when necessary.
- Require professional evaluation of the individual’s physical status to encourage optimal functioning and discourage adverse outcomes.
- Have a condition that is unstable, could easily deteriorate, or experience significant changes AND a lack of competent informal supports able to readily report life-threatening changes to the individual’s physician or other health care professional.

In addition to observation and evaluation, a nursing visit may also include, but is not limited to, one or more of the following nursing services:

- Administering prescribed medications that cannot be self-administered (as defined under Michigan Complied Law (MCL) 333.7103(1)).
- Setting up medications according to physician orders.
- Monitoring individual adherence to his/her medication regimen.
- Applying dressings that require prescribed medications and aseptic techniques.
- Providing refresher training to the individual or informal caregivers to ensure the use of proper techniques for health-related tasks such as diet, exercise regimens, body positioning, taking medications according to physician’s orders, proper use of medical equipment, performing ADL, or safe ambulation within the home.

This service is limited to no more than two hours per visit.

Individuals receiving Private Duty Nursing services are not eligible to receive Preventive Nursing Services.

All providers must be licensed in the State of Michigan as a RN or LPN.

5.3.M. PRIVATE DUTY NURSING

Private Duty Nursing (PDN) services are skilled nursing interventions provided to an individual age 21 or older on an individual and continuous basis, up to a maximum of
16 hours per day, to meet the individual’s health needs directly related to the individual’s physical disability.

Medical Criteria

To be eligible for PDN services, the ICO must find the individual meets either Medical Criteria I or Medical Criteria II, and Medical Criteria III (see criteria below). Regardless of whether the individual meets Medical Criteria I or II, the individual must also meet Medical Criteria III.

- Medical Criteria I - The individual is dependent daily on technology-based medical equipment to sustain life. “Dependent daily on technology-based medical equipment” means:
  - Mechanical rate-dependent ventilation (four or more hours per day), or assisted rate dependent respiration (e.g., some models of Bi-PAP); or
  - Deep oral (past the tonsils) or tracheostomy suctioning eight or more times in a 24-hour period; or
  - Nasogastric tube feedings or medications when removal and insertion of the nasogastric tube is required, associated with complex medical problems or medical fragility; or
  - Total parenteral nutrition (TPN) delivered via a central line, associated with complex medical problems or medical fragility; or
  - Continuous oxygen administration (eight or more hours per day), in combination with a pulse oximeter and a documented need for skilled nursing assessment, judgment, and intervention in the rate of oxygen administration. This would not be met if oxygen adjustment is done only according to a written protocol with no skilled assessment, judgment or intervention required. Continuous use of oxygen therapy is a covered Medicaid benefit for individuals 21 years of age or older when tested at rest while breathing room air and the oxygen saturation rate is 88 percent or below, or the PO2 level is 55 mm HG or below.

- Medical Criteria II - Frequent episodes of medical instability within the past three to six months, requiring skilled nursing assessments, judgments, or interventions (as described in III below) as a result of a substantiated medical condition directly related to the physical disorder. Definitions:
  - “Frequent” means at least 12 episodes of medical instability related to the progressively debilitating physical disorder within the past six months, or at least six episodes of medical instability related to the progressively debilitating physical disorder within the past three months.
  - “Medical instability” means emergency medical treatment in a hospital emergency room or inpatient hospitalization related to the underlying progressively debilitating physical disorder.
  - “Emergency medical treatment” means covered inpatient and outpatient services that are furnished by a provider that is qualified to furnish such services and are needed to evaluate or stabilize an emergency medical condition.
“Emergency medical condition” means a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain) such that a prudent layperson who possesses an average knowledge of health and medicine could reasonably expect the absence of immediate medical attention would result in placing the health of the individual in serious jeopardy, serious impairment to bodily functions, or serious dysfunction of any bodily organ or part.

“Directly related to the physical disorder” means an illness, diagnosis, physical impairment, or syndrome that is likely to continue indefinitely, and results in significant functional limitations in three or more ADL.

“Substantiated” means documented in the clinical or medical record, including the nursing notes.

**Medical Criteria III** - The individual requires continuous skilled nursing care on a daily basis during the time when a licensed nurse is paid to provide services. Definitions:

"Continuous" means at least once every three hours throughout a 24-hour period, and when delayed interventions may result in further deterioration of health status, in loss of function or death, in acceleration of the chronic condition, or in a preventable acute episode. Equipment needs alone do not create the need for skilled nursing services.

"Skilled nursing" means assessments, judgments, interventions, and evaluations of interventions requiring the education, training, and experience of a licensed nurse. Skilled nursing care includes, but is not limited to:

- Performing assessments to determine the basis for acting or a need for action, and documentation to support the frequency and scope of those decisions or actions;
- Managing mechanical rate-dependent ventilation or assisted rate-dependent respiration (e.g., some models of Bi-PAP) that is required by the individual four or more hours per day;
- Deep oral (past the tonsils) or tracheostomy suctioning;
- Injections when there is a regular or predicted schedule, or injections that are required as the situation demands (pm), but at least once per month (insulin administration is not considered a skilled nursing intervention);
- Nasogastric tube feedings or medications when removal and insertion of the nasogastric tube is required, or is associated with complex medical problems or medical fragility;
- TPN delivered via a central line and care of the central line;
- Continuous oxygen administration (eight or more hours per day), in combination with a pulse oximeter, and a documented need for adjustments in the rate of oxygen administration requiring skilled nursing assessments, judgments and interventions. This would not be met if oxygen adjustment is done only according to a written protocol with no skilled assessment, judgment or intervention required. Continuous use of oxygen therapy is a covered Medicaid benefit for beneficiaries age 21 or older when tested at rest while breathing...
room air and the oxygen saturation rate is 88 percent or below, or the PO2 level is 55 mm HG or below;  
- Monitoring fluid and electrolyte balances where imbalances may occur rapidly due to complex medical problems or medical fragility. Monitoring by a skilled nurse would include maintaining strict intake and output, monitoring skin for edema or dehydration, and watching for cardiac and respiratory signs and symptoms. Taking routine blood pressure and pulse once per shift that does not require any skilled assessment, judgment or intervention at least once every three hours during a 24-hour period, as documented in the nursing notes, would not be considered skilled nursing.

All nurses providing PDN to waiver individuals must maintain a current State of Michigan nursing license, and meet licensure requirements and standards according to Michigan laws found under MCL 333.17201-17242. PDN may include medication administration according to MCL 333.7103(1).

This service must be ordered by a physician, physician's assistant, or nurse practitioner. The ICO is responsible for ensuring there is a physician order for the PDN services authorized. The physician may issue this order directly to the provider furnishing PDN services. However, the ICO is responsible for ensuring the PDN provider has a copy of these orders and delivers PDN services according to the orders. The ICO shall maintain a copy of the physician orders in the Care Bridge Record. The individual's physician, physician's assistant, or nurse practitioner must order PDN services and work in conjunction with the ICO and provider agency to ensure services are delivered according to that order.

Through a person-centered planning process, the ICO shall determine the amount, scope and duration of services provided. The direct service provider shall maintain close contact with the authorizing ICO to promptly report changes in each individual’s condition and/or treatment needs upon observation of such changes. The direct service provider shall send case notes to the care coordinator on a regular basis, preferably monthly, but no less than quarterly, to update the care coordinator on the condition of the individual.

Individuals receiving Preventive Nursing Services are not eligible to receive PDN services. All PDN services authorized must be medically necessary as indicated through the assessment and meet the medical criteria described above.

### 5.3.N. RESPITE

#### 5.3.N.1. RESPITE PROVIDED AT THE INDIVIDUAL’S HOME OR IN THE HOME OF ANOTHER PERSON

Respite services are provided on a short-term, intermittent basis to relieve the individual’s family or other primary caregiver(s) from daily stress and care demands during times when they are providing unpaid care. Relief needs of hourly or shift staff workers should be accommodated by staffing substitutions, plan adjustments, or location changes and not by respite care.
Respite services include:

- Attendant care (individual is not bed-bound), such as companionship, supervision, and/or assistance with toileting, eating, and ambulation.
- Basic care (individual may or may not be bed-bound), such as assistance with ADLs, a routine exercise regimen, and self-medication.

Members of an individual’s family who are not the individual’s regular caregiver may provide respite for the regular caregiver. However, the ICO shall not authorize funds to pay for services furnished to an individual by that person’s spouse. Family members who provide respite services must meet the same standards as providers who are unrelated to the individual.

Respite services cannot be scheduled on a long term daily basis. Respite should be used on an intermittent basis to provide scheduled relief of informal caregivers. Respite is not intended to be provided on a continuous, long-term basis where it is a part of daily services that would enable an unpaid caregiver to work elsewhere full time. The costs of room and board are not included in payment for respite services.

### 5.3.N.2. RESPITE PROVIDED OUTSIDE OF THE HOME

Respite care services are provided on a short-term, intermittent basis to relieve the individual’s family or other primary caregiver(s) from daily stress and care demands during times when they are providing unpaid care. Relief needs of hourly or shift staff workers should be accommodated by staffing substitutions, plan adjustments, or location changes and not by respite care.

Each out of home respite service provider must be a licensed group home as defined in MCL 400.701ff, which includes AFC homes and HFA. Respite may include the cost of room and board if the service is provided in a licensed AFC or licensed HFA.

Respite services include:

- Attendant care (individual is not bed-bound), such as companionship, supervision and/or assistance with toileting, eating, and ambulation.
- Basic care (individual may or may not be bed-bound), such as assistance with ADLs, a routine exercise regimen, and self-medication.

Out of home respite may be scheduled for several days in a row, depending upon the needs of the individual and the individual’s caregivers.

### 5.4 HOSPICE [CHANGE MADE 7/1/18]

Effective November 1, 2016, individuals enrolled in the MI Health Link program who elect hospice services may remain enrolled in the MI Health Link program if they choose.

When a MI Health Link beneficiary elects hospice services, the hospice agency must notify the beneficiary’s Integrated Care Organization (ICO) for initiation of care management and authorization of nursing facility room and board, if indicated. The hospice agency will bill Medicare for hospice services.
and other Medicare Part A and Part B services not related to the terminal illness and bill the ICO for room
and board when hospice is rendered in a nursing home setting.

(text deleted per bulletin MSA 17-46)

A beneficiary has the option of disenrolling from MI Health Link at any time by contacting Michigan's
contracted enrollment broker. During the month when disenrollment occurs, the beneficiary will remain
with MI Health Link until the first day of the following month, at which time Fee-for-Service (FFS)
Medicaid will become effective. Hospice agencies will need to monitor MI Health Link beneficiary
enrollment status. (text deleted per bulletin MSA 17-46)
SECTION 6 – CONTINUITY OF CARE

Individuals enrolled in the MI Health Link program must maintain their current Medicare and Medicaid providers, supports and services for the following timeframes after enrollment: Individuals have the right to continue to see providers who are not in the ICO’s network during the Continuity of Care period. Communication between the individual, providers, and the ICO is essential to ensure providers are identified so services can be provided and covered by the ICO. The ICO must work to bring individuals’ current providers into the plan’s network.

</tr>
</tbody>
</table>

The ICO is required to review Medicare and Medicaid utilization data provided by CMS and MDHHS to determine which providers have existing relationships with individuals. Continuity of care protection is automatic for providers which are verified through utilization data to meet the prior relationship requirement.
The individual must have a relationship with a provider to establish continuity of care. A relationship is deemed to exist in the following circumstances:

**Specialists:** The individual must have seen the specialist at least once within the 12 months prior to enrollment into a ICO for a nonemergency visit.

**Primary Care Provider:** The individual must have seen the primary care provider at least twice within the 12 months prior to enrollment into a ICO for a non-emergency visit.

**Other Covered Providers:** The individual must have received services from other providers within the past 12 months prior to enrollment into a ICO.

If the ICO cannot determine if a relationship exists based on the available data, the ICO shall ask the provider and individual to provide documentation of the visit from the medical record or proof of payment to establish the relationship. An attestation that a relationship exists is not sufficient.

The ICO must ask the individual about any upcoming appointments to ensure agreements are in place with out-of-network providers. If data is not available to establish relationship with the individual’s provider, the individual or his/her appointed/legal representative may request continuity of care. The individual’s out-of-network provider may also request continuity of care on behalf of the individual. Requests for continuity of care should be made by contacting the ICO’s member services department or the individual’s ICO Care Coordinator. Requests can be made verbally or in writing. When requesting continuity of care, the name of the provider, contact person, phone number, service type and appointment date, if applicable, should be shared with the ICO.

Generally, ICOs must start processing a request for continuity of care within five working days after the request is received. The ICO has a maximum of 30 days to complete the request. However, if the individual’s medical condition requires more immediate attention (e.g., an upcoming appointment); the ICO must complete the request within 15 days. If there is a risk of harm to the individual or rescheduling of the appointment would be required, the request must be completed within three days of the request. The ICO may verbally convey Continuity of Care approval with the requester and record such approval in the individual’s record.

If the criteria for the prior relationship as outlined above are satisfied, an out-of-network provider can be reimbursed retroactively for services provided without an approved continuity of care request as long as the provider submits the request for payment within 30 days of the first date of service.

The ICO must cover services during the continuity of care period for providers that do not have documented quality of care concerns that would cause the ICO to exclude the provider based on state or federal requirements.

**Pharmacy**

ICOs are required to maintain current prescriptions for medications for 180 days if medications are not on the ICO’s formulary unless directed otherwise by CMS and MDHHS. The individual can ask the ICO to make an exception to cover a drug that is not on the ICO’s formulary.
**Nursing Facilities**

Out-of-network nursing facilities must be offered Single Case Agreements by the ICO to continue to care for the individual through the life of the program if the nursing facility does not participate in the ICO’s network and the individual: 1) resides in the nursing facility at the time of enrollment; 2) has a family member or spouse that resides in the nursing facility; or 3) requires nursing facility care and resides in a retirement community that includes a nursing facility. This continuity of care protection is available as long as the individual resides in the nursing facility. Continuity of care in a nursing facility is automatic. The individual does not have to make a request for continuity of care. The ICO must refill prescriptions for individuals in a nursing facility for a minimum of 91 days and the ICO must refill the drug multiple times during the first 90 days of enrollment, as needed. This allows the prescriber time to change the drugs to those on the drug list or ask for an exception.

**Personal Care Providers**

The ICO must allow choice of personal care service providers, including non-financially responsible family members or friends, to provide the service if they meet the criteria to enroll in the ICO’s network.

The ICO may enter into an agreement for non-agency personal care providers when a permissible exclusion is identified through a background check. The ICO may allow for this exclusion if the individual is informed of the details of the permissible exclusion and agrees, in writing, to allow the person to provide personal care to the individual during the continuity of care period. During this time period, the individual can seek alternatives to receiving personal care services if the ICO does not continue the agreement beyond the required continuity of care period.

Under no circumstance must the ICO enter into an agreement if it is discovered the personal care services provider falls under the policy for mandatory exclusion from providing personal care services.

**Other Providers**

Continuity of care does not extend to DME providers or ancillary service providers (e.g. suppliers of medical supplies or laboratories). Although continuity of care does not extend to these types of providers, the ICO must still provide continuity of care for services and the ICO is responsible for finding an in-network provider to deliver services without disruption.
SECTION 7 – CARE COORDINATION, ASSESSMENT AND PERSON-CENTERED PLANNING

The MI Health Link program requires coordination of services for all individuals to ensure effective integration and coordination between providers of medical services and supplies, BH, SUD and/or I/DD, pharmacy, and LTSS. This requires coordination between the ICO and the Pre-paid Inpatient Health Plan (PIHP) or the LTSS entities, where applicable. The ICO shall contract with the PIHP to deliver Medicare BH, SUD and/or I/DD services to individuals. This contract and any other downstream contracts related to care coordination activities will be monitored by the CMS and MDHHS contract management team to ensure all delivery system requirements of MI Health Link are met and all individuals receive the appropriate care coordination services. To accomplish this, the ICO must:

- Develop and implement a strategy that uses a combination of initial screenings, assessments, referrals, administrative claims data, and other available information to help prioritize and determine the care coordination needs of each individual.
- Focus on providing services in the most integrated and least restrictive setting.
- Maintain flexibility to use innovative care delivery models and to provide a range of community-based services as a way to promote independent living and alternatives to high-cost institutionally based services.
- Exhaust the use of community-based services before utilizing institutional settings for LTSS.
- Wherever possible, include a person familiar with the needs, circumstances and preferences of the individual when the individual is unable to participate fully in or report accurately to the Integrated Care Team (ICT).
- Ensure that the individual has a primary care provider (PCP) appropriate to meet his or her needs and assist the individual in accessing services.

7.1 THE CARE BRIDGE

The care coordination model for MI Health Link is the Care Bridge, which includes both technology and people through the person-centered planning process. The ICO is required to utilize a care coordination platform supported by web-based technology that is discussed in this section and referred to as the Care Bridge.

The Care Bridge allows secure access to information and enables all individuals and members of the ICT to use and (where appropriate) update information. Through the electronic Care Bridge, the members of the individual’s ICT facilitate access to formal and informal supports and services identified in the individual’s Individual Integrated Care and Supports Plan (IICSP) developed through a Person-Centered Planning process.

The Care Bridge includes an electronic care coordination platform which will support an Integrated Care Bridge Record (ICBR) to facilitate timely and effective information flow between the members of the ICT. The electronic Care Coordination platform will include a mechanism to alert ICT members of emergency department use or inpatient admissions. The ICBR will allow ICO Care Coordinators, PIHP and LTSS coordinators, where applicable, and providers to post key updates and notify ICT members of changes.

This platform will be compliant with the Health Insurance Portability and Accountability Act of 1996 (HIPAA) and other relevant laws, and provide for the exchange of data in a standard format.
The approved electronic care coordination platform will generate and maintain an individualized individual record referred to as ICBR including:

- Current integrated condition list;
- Contact information for the ICO Care Coordinator and ICT members;
- Current medications list;
- The date of service and the name of the provider for the most recently provided services;
- Historical and current utilization and claims information;
- Historic Medicaid and Medicare utilization data: MDHHS will provide the ICO with access to the CareConnect360 (CC360) system to view and extract historic utilization data.
- MDHHS will initially provide the ICO with extract files containing historical data for all individuals for the previous 24 months. Updates thereafter are available on a monthly basis or by the frequency identified by the ICO.
- Initial screening, Assessments (Level I and Level II), nursing facility LOCD and Personal Care Assessment results;
- Service outcomes, including specialty provider reports, lab results, and emergency room visits;
- IICSP; and
- Notes and correspondence across provider settings.

### 7.2 HEALTH PROMOTION AND WELLNESS ACTIVITIES

The ICO must provide a range of health promotion and wellness informational activities for individuals, their family members, and other informal caregivers. The focus and content of this information must be relevant to the specific health status needs and high-risk behavior in the Medicare-Medicaid population. Interpreter services must be available for individuals who are not proficient in English. Examples of health promotion and wellness topics include, but are not limited to, the following:

- Chronic condition self-management;
- Smoking cessation;
- Nutrition; and,
- Prevention and treatment of alcohol and substance abuse.

### 7.3 INTEGRATED CARE TEAM (ICT)

Every individual shall have access to and input in the development of an ICT to ensure the integration of all the individual's supports and services, including medical, behavioral, psychosocial, and LTSS. The ICT will be person-centered, respecting and incorporating the individual's specific preferences and needs. The ICT will deliver services with transparency, individualization, accessibility, respect, linguistic and cultural competence, and dignity. The ICT will honor the individual's choice about his/her level of participation and interaction with the ICT. This choice will be periodically revisited with the individual by the ICO Care Coordinator.
7.3.A. INTEGRATED CARE TEAM MEMBERS

The ICO Care Coordinator will lead the ICT. It will be the responsibility of the ICO Care Coordinator to set and lead ICT meetings as well as facilitate communication among ICT members. LTSS and PIHP Supports Coordinators will be members of ICTs (as applicable) to encourage communication and collaboration between ICOs, PIHPs and other providers. While the ICO Care Coordinator will be the ICT lead, the individual may request the LTSS or PIHP Supports Coordinator remain his/her main point of contact regarding the ICT.

ICT membership will include the individual and the individual’s chosen allies, ICO Care Coordinator, primary care physician, and LTSS Supports Coordinator or PIHP Supports Coordinator (as applicable). Additional membership on the ICT may vary depending on the changing needs of the individual. The ICT may also include the following persons as needed and available:

- Family caregivers and natural supports
- Primary care nurse care manager
- Specialty providers
- Personal care providers
- Hospital discharge planner
- Nursing facility representative
- Others as appropriate

7.3.B. INTEGRATED CARE TEAM RESPONSIBILITIES

The role of ICT is to work collaboratively with the individual to meet goals identified in the IICSP and ensure the best possible health care outcomes. The ICO Care Coordinator is responsible to ensure the completion of tasks listed below for the ICT. ICT members will:

- Ensure the IICSP is developed, implemented, and revised according to the person-centered planning process and the individual’s stated goals, including making whatever accommodations are appropriate for individuals whose disabilities create obstacles to full participation with the ICT.
- Participate in the Person-Centered Planning process at the individual’s discretion to develop the IICSP;
- Collaborate with other ICT members to ensure the Person-Centered Planning process is maintained;
- Assist the individual in meeting his/her goals;
- Monitor and ensure that their part of the IICSP is implemented in order to meet the individual’s goals;
- Update the ICBR as needed pertinent to the ICT member’s role on the ICT;
Review assessment, test results and other pertinent information in the ICBR;  
Address transitions of care when a change between care settings occur;  
Ensure continuity of care requirements are met; and  
Monitor for issues related to quality of care and quality of life.

The operations of ICTs will vary depending on the needs and preferences of the individual. An individual with extensive service needs may warrant periodic meetings with all ICT members. An individual with less intense needs may warrant fewer meetings with selected members of the ICT. Communication among the ICT members will be maintained by the ICO Care Coordinator and other direct communication with ICT members.

The ICT will adhere to an individual's determination about the appropriate involvement of his/her medical providers and caregivers, according to HIPAA and other laws, and for individuals in SUD treatment, 42 C.F.R. Part 2.

### 7.4 ICO CARE COORDINATOR

ICO Care Coordinators must have the experience, qualifications and training including MDHHS required training appropriate to the needs of the individual, and the ICO must establish policies for appropriate assignment of ICO Care Coordinators.

ICO Care Coordinators must have knowledge of physical health, aging and loss, appropriate support services in the community, frequently used medications and their potential negative side-effects, depression, challenging behaviors, Alzheimer's disease and other disease-related dementias, behavioral health, substance use disorder, physical and developmental disabilities, issues related to accessing and using durable medical equipment as appropriate, available community services and public benefits, quality ratings and information about available options such as nursing facilities, applicable legal non-discrimination requirements such as the ADA, person-centered planning, cultural competency, and elder abuse and neglect.

The ICO Care Coordinator must be a Michigan:

- Licensed registered nurse;
- Licensed nurse practitioner;
- Licensed physician's assistant;
- Licensed Bachelor's prepared social worker;
- Limited license Master's prepared social worker; or
- Licensed Master's prepared social worker.

**ICO Care Coordinator Training**

The ICO Care Coordinator will participate in train-the-trainer Person-Centered Planning and Self-Determination educational opportunities offered by MDHHS. The ICO will be responsible for training any new ICO Care Coordinator staff. The ICO will report participation of its ICO Care Coordinators in the MDHHS and ICO trainings as required.
The ICO will participate, train and report on any other training required or offered by MDHHS or its
designee.

ICO Care Coordinator Responsibilities

The ICO Care Coordinator will be responsible for care coordination for each individual. The ICO Care
Coordinator will conduct the Level I Assessment, ensure the person-centered planning process is
complete, prepare the IICSP, coordinate care transitions, and lead the ICT.

The ICO Care Coordinator will be responsible to:

- Support an on-going person-centered planning process;
- Assess clinical risk and needs by conducting an assessment process that includes an Initial
  Screening, a Level I Assessment, and completion of or referral for a Level II Assessment (as
  appropriate);
- Facilitate timely access to primary care, specialty care, LTSS, BH, SUD, and I/DD services,
  medications, and other health services needed by the individual, including referrals to address
  any physical or cognitive barriers or referrals to the PIHP;
- Create and maintain an ICBR for each individual to manage communication and information
  regarding referrals, transitions, and care delivery;
- Facilitate communication among the individual’s providers through the use of the care
  coordination platform and other methods of communication including secure e-mail, fax,
  telephone, and written correspondence;
- Notify the ICT of the individual’s hospitalization (psychiatric or acute), and coordinate a discharge
  plan if applicable;
- Facilitate face-to-face meetings, conference calls, and other activities of the ICT as needed or
  requested by the individual;
- Facilitate direct communication between the provider and the individual or the individual’s
  authorized representative and/or family or informal supports as appropriate;
- Facilitate individual and family education;
- Coordinate and communicate, as applicable, with the PIHP Supports Coordinator and/or the LTSS
  Supports Coordinator to ensure timely, non-duplicative supports and services are provided;
- Develop, with the individual and ICT, following the person-centered planning process, an IICSP
  specific to individual needs and preferences, and monitor and update the IICSP at least annually
  or following a significant change in needs or other factors;
- Coordinate and make referrals to community resources (e.g., housing, home delivered meals,
  energy assistance programs) to meet IICSP goals;
- Perform ongoing care coordination;
- Monitor the implementation of the IICSP with the individual, including facilitating the individual’s
  evaluation of the process, progress and outcomes and identifying barriers and facilitate problem
  resolution and follow-up;
Advocate with or on behalf of the individual, as needed, to ensure successful implementation of the IICSP;

Support transitions in care when the individual moves between care settings including:

- The ICO Care Coordinator will contact the individual once notified of an emergency room visit to review discharge orders, schedule follow-up appointments, review any medication changes, and evaluate the need for revising the IICSP to include additional supports and services to remain in or return to the community;

- The ICO Care Coordinator will ensure immediate and continuous discharge planning, including electronic and verbal communication, with the individual and ICT members following an individual’s admission to a hospital or nursing facility. Discharge planning will ensure that necessary care, supports and services are in place in the community for the individual when discharged. This includes scheduling an outpatient appointment, ensuring the individual has all necessary medications or prescriptions upon discharge, and conducting follow-up with the individual and/or caregiver.

- The Care Coordinator shall make every effort to ensure that home and community based services are in place upon hospital discharge to avoid unnecessary nursing facility placements. The ICO Care Coordinator shall be able to arrange for expedited assessments and other mechanisms to ensure prompt initiation of appropriate HCBS. If the individual is being discharged from a nursing facility or hospital, the Care Coordinator shall coordinate efforts with the nursing facility social worker, discharge planner, or other staff to ensure a smooth transition.

- Evaluating Section Q of the Minimum Data Set (MDS) for individuals currently in a nursing facility and discussing options for returning to the community, revising the IICSP, and transitioning the individual to the most integrated setting.

- The ICO Care Coordinator will inform the individual of his/her right to live in the most integrated setting, inform the individual of the availability of services necessary to support his/her choices, and record the home and community-based options and settings considered by the individual.

- Engage in other activities or services needed to assist the individual in optimizing his/her health status, including assisting with self-management skills or techniques; health education; referrals to support groups, services, and advocacy agencies, as appropriate; and other modalities to improve health status;

- Ensure the Medicaid eligibility redetermination process is completed timely to prevent the loss of benefits; and

- If the individual is receiving services that require meeting the Michigan Medicaid Nursing Facility Level of Care Determination (LOCD) standards, ensure through required Level I and/or Level II assessments that the individual continues to meet the criteria or transitions to services that do not require LOCD standards. The ICO Care Coordinator is required to conduct the LOCD assessment for individuals with identified long term care needs, and MDHHS will make final eligibility determinations, unless otherwise directed by the State and CMS.
Individual ICO Care Coordinator Assignments and Change Requests

- The ICO shall allow the individual or his/her authorized representative choice in ICO Care Coordinator.
- The ICO shall ensure every individual has an ICO Care Coordinator with the appropriate experience and qualifications based on the individual’s assigned risk level and individual needs (e.g., communication, cognitive, or other barriers).
- The ICO must have a process to ensure that an individual or his/her authorized representative is able to request a change in his/her ICO Care Coordinator at any time including a process for the transition from one ICO Care Coordinator to another.
- The ICO must establish policies for appropriate assignment of ICO Care Coordinators to align with the individual’s known or expressed cultural, religious and ethnic preferences by considering the knowledge and experience of the ICO Care Coordinator.

7.5 Coordination with PIHP and LTSS Supports Coordinators

The ICO Care Coordinator must collaborate with the applicable PIHP Supports Coordinator or identified behavioral health representative as defined in the contract between the ICO and the PIHP when:

- The individual has received services through a PIHP within the last 12 months, or
- A new individual requests, or is identified as having potential need for, BH, I/DD, or SUD services.

If the individual has need of LTSS, the ICO Care Coordinator will collaborate with the individual’s chosen LTSS Supports Coordinator when:

- The individual has received LTSS within the last 12 months, or
- A new individual requests or is identified as having potential need for LTSS.

7.5.A. LTSS Supports Coordinator

LTSS Supports Coordinator will be offered to all individuals who have needs for long term supports and services. The LTSS Supports Coordinator must be a Michigan:

- Licensed registered nurse;
- Licensed nurse practitioner;
- Licensed physician’s assistant;
- Licensed Bachelor’s prepared social worker;
- Limited license Master’s prepared social worker; or
- Licensed Master’s prepared social worker.

The LTSS Supports Coordinator must:

- Have knowledge of HCBS;
- Have completed a person-centered planning and person-centered direction training;
- Be culturally competent;
- Be able to provide information regarding the quality ratings and licensure status, if applicable, of available options;
- Be knowledgeable about risk factors and indicators of, and resources to respond to, abuse and neglect;
- Be familiar with applicable long term care facility licensing requirements and resources such as the long term care ombudsman program; and
- Have experience conducting LTSS needs assessments.

**LTSS Supports Coordinator Responsibilities**

The ICO will be responsible to provide, directly or contractually, the following LTSS Supports Coordination services:

- Support an on-going person-centered planning process;
- Assist the individual to take a lead role in the person-centered planning process;
- Provide information to the individual and ICT;
- Communicate and collaborate with the PIHP when BH, SUD, or I/DD needs are identified in the Level I Assessment;
- Participate in the assessment process as needed, including conducting the Level II Assessment specific to the individual’s needs;
- Participate on the individual’s ICT;
- Develop, with the individual and the ICT, an IICSP;
- Ensure optimal utilization of information and community supports;
- Arrange services as identified in the IICSP;
- Update the ICBR with current individual status information to manage communication and information flow regarding referrals, transitions, and care delivery;
- Monitor service implementation, service outcomes, and the individual’s satisfaction;
- Collaborate with the ICO Care Coordinator to assist the individual during transitions between care settings, including full consideration of all community options; and
- Advocate for the individual and support self-advocacy by the individual.

The ICO Care Coordinator may serve as the LTSS Supports Coordinator and complete the required functions of both roles.
7.6 ASSESSMENT TOOLS AND PROCESS

7.6.A. INDIVIDUAL STRATIFICATION

The ICO will develop and implement a strategy that uses a combination of initial screenings, assessments, assessment tools, functional assessments, referrals, administrative claims data, etc. to help prioritize and determine the level of care coordination needed by each individual.

The ICO must review program level data through CHAMPS and CareConnect360 or through file exacts provided by MDHHS as part of the initial screening process. CareConnect360 contains past Medicare and Medicaid utilization data from the MDHHS Data Warehouse. The ICO must review program level data and utilization data within 15 calendar days of enrollment.

Levels of stratification should be based on:

- Individual demographics, medical conditions, functional status, care patterns, resource utilization data; and
- The individual’s risk for long term care institutionalization or avoidable hospitalization.
- Individuals receiving services in the Habilitation Supports Waiver (HSW) or an individual transitioning to MI Health Link from the MI Choice waiver are automatically stratified as high risk.
- The ICO will determine the parameters and definitions for other individuals defined as high risk as well as definitions for low or moderate risk individuals.

The ICO may also choose to use existing predictive modeling software to support the screening and assessment requirements are not be required to do so.

7.6.B. INITIAL SCREENING

The purpose of the initial screening is to identify individuals with immediate needs in order to prioritize in-person Level I Assessments. The initial screening is a series of individual reported yes/no questions related to historical and current service usage. This screening is conducted via telephone when individuals call the enrollment broker to enroll in MI Health Link.

For those individuals passively enrolled into the ICO or those not completing the screen during the enrollment call, the ICO must make its best efforts to administer the initial screening within 15 calendar days of enrollment.

The ICO must document attempts in the ICBR to contact the individual for the purpose of scheduling or conducting the initial screening on different days of the week and at different times during the day, including times outside of standard work hours. If the initial contact is not made within 15 calendar days of enrollment, the ICO must continue efforts to contact the individual and document such in the ICBR.
The ICO will review the individual’s responses to the initial screening questions to identify current utilization of PHHP services, nursing facility care, community-based supports and services, and hospital care (inpatient or emergency room treatment).

The ICO must document the individual’s responses to the initial screening questions in the ICBR.

7.6.C. LEVEL I ASSESSMENTS

Each individual must receive, and be an active participant in (to the extent they desire), a timely Level I Assessment of medical, behavioral health, psychosocial, and LTSS needs completed by the ICO Care Coordinator unless one of the following circumstances applies:

- An individual declines an assessment. Should that occur, the ICO will honor the individual’s decision and will only contact the individual regarding an assessment if the individual requests one or a new assessment is needed according to the reassessment requirements.

- An individual is not reachable through the contact information provided by MDHHS or CMS. The ICO must document its attempts to reach the individual and what means of communication were used.
  - The ICO shall attempt to contact the individual at least five times within the first 45 days of enrollment. Attempts must be on different days of the week and at different times during the day, including times outside of standard work hours.
  - ICO shall use community resources where possible to identify and engage individuals.

- The ICO Care Coordinator will identify, through the Level I Assessment, individuals who may require institutional level of care or personal care services.

- The ICO will perform the Level I Assessment using its tool approved by MDHHS to assess each individual’s current health, welfare, functional needs and risks.

- The ICO will use the DSM V screening tool as part of or in addition to its Level I Assessment tool to identify Individuals with BH, SUD, and/or I/DD needs.

The ICO Care Coordinator may complete the Level I Assessment in lieu of the initial screening if the Level I Assessment is completed within 15 calendar days of enrollment.

Level I Domains

Level I Assessment domains must include, but not be limited to, the following:

- Individual preferences, strengths, and goals including Self-Determination arrangements;

- Natural supports, including family and community caregiver capacity, and social strengths and needs;

- Communication needs, including hearing, vision, cultural and linguistic needs and preferences, and individual health literacy;
Current services, including those covered by Medicare and Medicaid, community supports, and care transition needs;

Medical health risk, status, and history, including but not limited to medications (prescription, over-the-counter, and herbal supplements), frequent falls, and treatment for recurring urinary tract infections;

BH and SUD risk status; BH, SUD, and I/DD history and needs, including medications;

Nutritional strengths and needs;

ADL and IADL, including any assistive technology used or needed and immediate environmental or housing needs;

Cognitive strengths and needs;

LTSS;

Quality of life including physical, mental, and psycho-social well-being;

Discussion and education related to abuse, neglect, and exploitation; and

Advance Directives

The ICO may include State-approved domains as appropriate. Additional domains should be included in the ICO’s Level I Assessment tool when submitting the tool for approval by MDHHS.

Involvement in the Level I Assessment

The Level I Assessment will be completed by the ICO Care Coordinator (see qualifications above) employed or contracted with the ICO who is accountable for providing Care Coordination services. The ICO may delegate through contract with entities or individuals meeting the Care Coordinator qualifications for performance of Initial Screenings, Level I Assessments and LTSS Level II Assessments, as well as Care Coordination functions. The ICO retains responsibility and accountability for utilization management functions, appeals, and approval of services. The Care Coordinator role cannot be delegated through contract or other means to Long Term Supports and Services providers who are otherwise responsible for providing services to individuals, such as nursing facilities.

The ICO will include the appropriate PIHP or LTSS Supports Coordinator or nursing facility staff in conducting the Level I Assessment if the individual has been active in the PIHP or LTSS system during the previous 12 months or is currently residing in a nursing facility.

Family members or other individuals may also be included in the Level I Assessment process to the extent desired by the individual.

Level I Results and Referral

The ICO will use the results of the Level I Assessment to confirm the appropriate acuity or risk stratification level for individual Care Coordinator assignments. The Level I Assessment and the DSM-V screening tool for BH, SUD, I/DD, will be used to determine need for a Level II Assessment, referral for PIHP services, or development of the IICSP.
The ICO will make referrals according to the process identified in ICO/PIHP contract to the PIHP/BH system for individuals identified as having BH, SUD, and/or I/DD needs.

The PIHP will conduct in person or adopt current Level II Assessments for individuals identified as receiving services from the Habilitation Supports Waiver and/or the Specialty Services and Supports Program. The PIHP will conduct a telephonic screen using the MDHHS approved tool to determine:

- If the individual has mild to moderate needs that can be met through referral for additional services; or
- If the individual has needs that require the Level II Assessment.

The PIHP will coordinate service referrals to ICO or PIHP network providers or conduct further assessment as needed. The PIHP will document the results from the telephonic screen and referral in the ICBR.

The ICO Care Coordinator is responsible for ensuring completion of further assessment for individuals with medically complex conditions. The ICO will coordinate with the primary care provider to ensure that further follow-up relevant to these needs is provided to the individual.

The individual will continue to receive any services in any existing care plan prior to the Level I Assessment. The ICO will adhere to all transition requirements for services, as outlined in the Continuity of Care section and any other documentation provided by CMS or MDHHS.

Level I Assessments will be documented in the ICBR and results will be used in the development of the IICSP.

Timing of Level I Assessments

Level I Assessments will be completed within 45 calendar days of enrollment. ICOs approved by CMS and MDHHS to conduct early Level I Assessment may start the assessment no earlier than 20 days before the enrollment effective date. Early assessment does not impact the time frames for completing other assessments. Other Assessments cannot be completed before the enrollment effective date. Individuals identified with immediate needs or as having high risk should have Level I Assessments completed earlier than 45 calendar days from enrollment, as appropriate.

In-person Level I Assessments

The ICO Care Coordinator is encouraged to conduct the Level I Assessment in person. Individuals identified with immediate needs or as having high risk will have assessments completed in person.

Locating Individuals

The ICO shall identify individuals through referrals, transition information, service authorizations, alerts, memos, assessment results, and from families, caregivers, providers, community organizations and ICO personnel. The ICO shall notify the primary
care provider (PCP) of an individual who has not completed a Level I Assessment within the time period set forth above and whom the ICO has been unable to contact. The ICO shall encourage the PCPs to conduct outreach to these individuals and to schedule visits. The ICO shall collaborate with clinics, hospitals, or urgent care centers to identify individual contact information for individuals the ICO has not been able to contact.

7.6.D. TRIGGERS FROM THE LEVEL I ASSESSMENT

Michigan Medicaid Nursing Facility Level of Care Determination (LOCD)

The Michigan Medicaid Nursing Facility Level of Care Determination tool must be conducted for all individuals according to the Michigan Medicaid Nursing Facility Level of Care Determination requirements in the Medicaid policy and additional guidance provided by MDHHS. For the MI Health Link program only, the Nursing Facility Level of Care Exception Review criteria will be applied at the time the LOCD is conducted for the individual if the individual does not meet LOCD criteria under Doors one through seven.

PIHP Telephonic Screen

The ICO shall refer individuals identified in the Level I screen as having BH, SUD or I/DD needs to the PIHP for additional assessment. Of this population, those individuals without a known history of PIHP services will receive a telephonic screen to determine service needs. The PIHP will determine if the individual has mild to moderate needs which can be addressed through additional assessment or referral to providers (PIHP or ICO). For all other individuals, the PIHP will complete the appropriate Level II assessment. The PIHP has flexibility to perform the telephonic screening function within the current intake system as long as identification of needs is completed using the prescribed tool.

7.6.E. LEVEL II ASSESSMENT

The ICO Care Coordinator will collaborate with the PIHP to ensure that the Level II Assessment is conducted for individuals identified through the telephonic screen as needing referral to the PIHP for Level II Assessment. The ICO Care Coordinator will ensure that the Level II Assessment is conducted for individuals demonstrating LTSS needs identified in the Level I Assessment.

Level II assessments must be completed using the tools approved by MDHHS.

Qualifications for Completing Level II Assessment

Level II Assessments will be conducted by professionally knowledgeable and trained LTSS Supports Coordinators or PIHP Supports Coordinators or behavioral health case managers, who have experience working with the population. Each Level II Assessment tool has specific qualifications for the person completing the tool.

Timing of Level II Assessments

Any Level II Assessment completed prior to enrollment by the PIHP Supports Coordinator, a trained LTSS Supports Coordinator or a behavioral health case manager
may be adopted if it is not past the reassessment date. The Level II Assessment should be reviewed to determine if it is complete, accurate and appropriate for the individual’s current status. Level II Assessments will be conducted in person within 15 calendar days of completion of the Level I Assessment. Level II Assessments will be documented in the ICBR and results will be used in the development of the IICSP.

7.6.F. REASSESSMENTS

7.6.F.1. LEVEL I REASSESSMENTS

The ICO is responsible to ensure that an annual Level I reassessment for each individual (including analysis of medical, LTSS, BH, and I/DD utilization data) is completed within 12 months of the last Level I Assessment. If prior to the annual reassessment, the individual experiences a major change impacting health status, the ICO is required to reassess the individual and review and revise the IICSP with members of the ICT as needed. The ICO must ensure that a reassessment and an IICSP update are performed:

- As warranted by the individual’s condition but at least every 12 months after the Level I Assessment completion date;
- When there is a change in the individual’s health status or needs;
- As requested by the individual, his/her caregiver or authorized representative, or his/her provider; and
- Upon any of the following trigger events:
  - A hospital admission;
  - Transition between care settings;
  - Change in functional status;
  - Loss or change in circumstances of a caregiver so that the individual supports or services are affected;
  - Change in diagnosis; and
  - As requested by a member of the ICT who observes a change that requires further investigation.

The ICO will analyze utilization data of all individuals monthly to identify acuity and risk level changes. As acuity and risk levels change, reassessments will be completed as necessary and IICSP and interventions updated and documented in the ICBR.

The ICO is responsible to complete a reassessment as often as desired by the individual and update the IICSP with members of the ICT as needed. The ICO is encouraged to conduct reassessments in person.

7.6.F.2. LEVEL II REASSESSMENTS

Level II reassessments will be completed according to the reassessment timeframe of each assessment tool utilized. For assessments adopted at the time of enrollment, the next assessment date with follow the annual scheduled described above for each tool.
unless the individual has a significant change of conditioning requiring a new assessment.

For individuals receiving nursing facility level of care services, the reassessment must confirm that the individual continues to meet the Michigan Medicaid Nursing Facility LOCD standards. If the standards are not met, a new LOCD tool must be completed to allow the individual rights to an appeal. The ICO will initiate planning for transitioning the individual to more appropriate supports and services. Reassessments will be documented in the ICBR and results will be used in the development of the IICSP.

### 7.7 CARE PLANNING

**Individual Integrated Care and Supports Plan (IICSP)**

The ICO Care Coordinator, individual, providers, and other ICT members develop a comprehensive, person-centered, written IICSP for each individual. The person-centered planning process must be conducted in-person unless the individual chooses otherwise. The individual may choose to participate in person-centered planning to the extent he/she desires.

Every individual must have an IICSP. The IICSP should be developed based on the outcome of the person-centered planning meeting unless the individual chooses not to participate and the refusal to participate is documented in the IICSP and ICBR. At a minimum the ICO Care Coordinator or Supports Coordinator must provide his/her contact information to the individual and re-visit the opportunity to participate in person-centered planning and development of the IICSP at the time of reassessment, a change of condition, or upon the individual’s request.

The ICO must complete the initial IICSP within 90 calendar days of enrollment. Existing person-centered service plans or plans of care may be incorporated into the IICSP. The ICO must review the adopted plan with the individual to determine if revisions are necessary to address the individual's goals and meet the individual’s needs. The IICSP must be contained in the ICBR and shared with the individual and the ICT.

The ICO must discuss advance directives with the individual including the choice to execute a directive, its incorporation in the IICSP, and assurance of provider knowledge of the individual's directive.

The IICSP must:

- Focus on supporting the individual to achieve personally defined goals in the most integrated setting;
- Be developed following MDHHS principles for person-centered planning;
- Include the individual’s preferences for care, services, and supports;
- Include the individual's prioritized list of concerns, goals and objectives, and strengths;
- Include specific providers, supports and services including amount, scope, and duration;
- Include a summary of the individual’s health status;
- Include the plan for addressing concerns or goals and measures for achieving the goals;
- Include person(s) responsible for specific interventions, monitoring, and reassessment; and
Include the due date for the interventions and reassessment.

**IICSP Monitoring**

The ICO will review the individual’s IICSP to ensure the IICSP continues to meet the individual’s needs and is updated accordingly.

- The ICO must review IICSPs of high-risk individuals least every 30 calendar days.
- The ICO must review IICSPs of moderate-risk individuals at least every 90 calendar days.
- The ICO must review IICSPs of low-risk individuals at least every 180 calendar days.

The ICO will make contact with the individual to inquire if the IICSP continues to meet the individual’s needs. This contact may be telephonic, unless in-person contact is requested by the individual. The ICO must update the individual’s IICSP at least annually and more frequently if conditions warrant, or if an individual requests a change.
SECTION 8 – CRITICAL INCIDENT REPORTING

The ICO must report critical incidents to MDHHS and other authorities as required by CMS and the State.

8.1 TYPES OF CRITICAL INCIDENTS THAT NEED TO BE REPORTED

ICOs must report the following:

- Exploitation
- Illegal activity in the home
- Medication Errors
- Neglect
- Physical Abuse
- Provider no shows
- Restraints, Seclusion, or restrictive interventions
- Sexual Abuse
- Suspicious or Unexpected Death
- Theft
- Verbal Abuse
- Worker consuming drugs or alcohol on the job
SECTION 9 – MI HEALTH LINK HCBS WAIVER

The MI Health Link HCBS waiver offers home and community-based services to allow MI Health Link individuals to remain in the community instead of an institution. MI Health Link individuals who require services through this waiver must apply to MDHHS and be approved for enrollment. ICOs or their subcontractors, according to a contractual agreement, must submit an application to MDHHS for review and approval. Waiver eligibility must be re-determined on an annual basis.

Waiver enrollment is limited to a certain number of individuals that has been approved by CMS.

9.1 APPLICATION PROCESS

When a MI Health Link individual is interested in participating in the MI Health Link HCBS waiver, the ICO must submit an application packet to MDHHS for review and approval prior to an individual participating in the waiver. Applications may be submitted to MDHHS electronically via the Waiver Support Application system or via hard copy paper format using U.S. Mail, United Postal Service, FedEx, or fax as directed by MDHHS.

The ICO will be notified by MDHHS of the outcome of the application review, approval, or rejection via telephone, email, U.S. Mail, or the electronic Waiver Support Application system.

9.2 PERSON-CENTERED PLANNING

The person-centered planning process and IICSP for MI Health Link HCBS waiver individuals must be compliant with the Home and Community-Based Services (HCBS) Final Rule (CMS-2249F; CMS-2296-F) that was released by CMS on January 16, 2014. At a minimum, the IICSP must include the following components:

- The ICO must develop the IICSP before providing services.
- The individual must approve of all services in the service plan.
- The ICO must document individual approval and participation on the IICSP, including:
  - Individual’s preferences for care, services, supports, residential settings, and non-residential settings.
  - Supports and services options that were discussed with the individual, and his/her (or legal representative’s) choice of those services and providers.
  - When the individual selects controlled residential settings such as licensed AFC or HFA, the following must be included in the IICSP:
    - The chosen setting.
    - The individual’s resources.
    - Whether or not the individual chooses to have a roommate as well as any specific preferences for roommates, bathroom schedules, etc.
    - Preference for engaging in community activities outside the home, and whether or not the individual needs assistance with arranging transportation, finding work, or otherwise getting involved in the community outside the home and how to make that happen.
♦ Personal safety risks and any interventions that may affect the individual’s ability to engage in community activities outside the home without supervision.

♦ Any modifications to existing policy and procedure and home and community-based setting requirements (including HCBS Final Rule) at the home to accommodate an individual’s assessed needs; indicate established timeframes for periodic review of these modifications.

- Individual’s health and safety risks.
- Individual’s prioritized list of concerns, goals and objectives, strengths.
- Summary of the individual’s health status.
- The plan for addressing concerns or goals, actions for achieving the goals, and specific providers, supports and services, including amount, scope and duration.

- The individual’s (or legal representative’s) rights and choices of specific providers (and alternative providers, if necessary).
- A contingency (backup) plan for providers in the event of unscheduled absence of a caregiver, severe weather, or other emergencies.
  - Person(s) responsible for specific monitoring, reassessment, and evaluation of health and well-being outcomes.
  - Individual’s informed consent.
  - Due date for interventions and reassessment.

The IICSP clearly identifies the types of services needed from both paid and non-paid providers of supports and services. The amount (units), frequency, and duration of each waiver service to be provided are included in the IICSP. The individual chooses the supports and services that best meet his/her needs and whether to use the option to self-direct applicable services or rely on an ICO Care Coordinator and/or LTSS Supports Coordinator to ensure the services are implemented and provided according to the IICSP. When an individual chooses to participate in arrangements that support self-determination, information, support and training are provided by the ICO Care Coordinator and/or LTSS Supports Coordinator and others identified in the IICSP and according to the Self-Determination Implementation Technical Advisory. When an individual chooses not to participate in self-determination, the ICO Care Coordinator or LTSS Supports Coordinator ensures that supports and services are implemented as planned. The ICO Care Coordinator and/or LTSS Supports Coordinators, as applicable, oversee the coordination of State Plan and waiver services included in the IICSP. This oversight ensures that waiver services in the IICSP are not duplicative of similar State Plan services available to or received by the individual.

9.3 HOME AND COMMUNITY-BASED RESIDENTIAL AND NON-RESIDENTIAL SETTINGS

The HCBS Final Rule (CMS-2249F; CMS-2296-F) applies to 1915(c) waiver programs. The ICO has been provided with the HCBS Final Rule Federal Register, CMS webinars, and other information regarding the rule. The ICO, and its subcontractors as appropriate, must be familiar with all aspects of the HCBS Final Rule as it applies to the MI Health Link HCBS waiver. All residential settings in which MI Health Link HCBS waiver individuals live must comply with the requirements of the HCBS Final Rule. Similarly, non-residential settings, such as Adult Day Program settings, must comply with the HCBS Final Rule. Residential and non-residential settings must be immediately compliant with the HCBS Final Rule for the
MI Health Link program. This compliance will be assessed prior to the individual’s enrollment in the waiver. The ICO must utilize the standard statewide Provider Survey tool produced by MDHHS, and this survey must be conducted in-person with the provider and as directed otherwise by MDHHS. Licensed settings used for the Respite service do not need to be assessed unless the individual stays in the setting for more than 30 days.

9.4 SELF-DETERMINATION

Self-Determination provides MI Health Link HCBS waiver individuals the option to direct and control their own waiver services. For those MI Health Link HCBS waiver individuals who choose to participate in arrangements that support self-determination, the individual (or chosen representative(s)) has decision-making authority over providers of waiver services, including:

- Recruiting staff
- Referring staff to an agency for hiring
- Hiring staff
- Verifying staff qualifications
- Obtaining criminal history review of staff
- Specifying additional service or staff qualifications based on the individual’s needs and preferences so long as such qualifications comply with those described in the 1915(c) waiver application approved by CMS, and any additional guidance provided by MDHHS
- Specifying how services are to be provided and determining staff duties consistent with the service guidelines as indicated in the CMS-approved waiver application and additional guidance provided by MDHHS
- Determining staff wages and benefits, subject to State and federal limits if applicable
- Scheduling staff and the provision of services
- Orienting and instructing staff in duties
- Supervising staff
- Evaluating staff performance
- Verifying time worked by staff and approving timesheets
- Discharging staff from providing services
- Reallocating funds among services included in the individual’s budget
- Identifying service providers and referring for provider enrollment
- Substituting service providers
- Reviewing and approving provider invoices for services rendered

Budget development for individuals using arrangements that support self-determination occurs during the person-centered planning process and is intended to involve any persons chosen by the individual. Planning for the individual’s IICSP precedes the development of the individual’s budget so that needs and preferences can be accounted for without arbitrarily restricting options and preferences due to cost considerations. An individual’s budget is not authorized until the individual and the ICO have agreed to

Version MI Health Link
Date: July 1, 2018
Page 56
the amount and its use. In the event that the individual is not satisfied with the authorized budget, he/she may reconvene the person-centered planning process. Fiscal Intermediary services are available through the waiver to help individuals more fully exercise control over their services.

At any time, the individual may modify or terminate the arrangements that support self-determination.

The individual, his/her chosen allies, the ICO Care Coordinator and LTSS Supports Coordinator must all work together to identify challenges and address problems that may be a barrier to a successful self-determination arrangement. The decision of an individual to terminate participation in self-determination does not alter the supports and services identified in the IICSP. When the individual no longer wishes to participate in self-determination, the ICO must assume responsibility for ensuring the provision of those services through its network of contracted provider agencies while still maintaining and honoring the individual’s choice of providers to extent possible.

An ICO may terminate self-determination for an individual when problems arise due to the individual’s inability to effectively direct supports and services. Prior to terminating a self-determination agreement (unless it is not feasible), the ICO informs the individual in writing of the issues that have led to the decision to terminate the arrangement. The ICO will continue efforts to resolve the issues that led to the termination.

**9.5 Waiver Support Application System**

The ICO must utilize the waiver management database in the Waiver Support Application (WSA) system for anything related to MI Health Link HCBS Waiver enrollments, application submission, slot management, and disenrollments. The ICO is required to submit a list of users for this system, and the ICO must keep the list updated on a regular basis as staff come onboard or leave. When approved users leave the organization, the organization must notify the appropriate person as directed by MDHHS.
SECTION 10 – CRIMINAL HISTORY REVIEWS

Each ICO and direct provider of home-based services must conduct a criminal history review through the Michigan State Police (ICHAT), at a minimum, for any paid or volunteer individuals who will be entering the individual’s residence. The ICO and direct provider must have completed reference and criminal history reviews before authorizing the person providing services in an individual’s residence. At a minimum, the scope of the reference and criminal history investigation is statewide.

ICOs and MDHHS will conduct annual reviews to ensure mandatory criminal history reviews have been conducted in compliance with direction given by MDHHS or otherwise required by federal and state law, policy or operating standards.
SECTION 11 – USE OF RESTRAINTS, SECLUSION, AND RESTRICTIVE INTERVENTIONS

Providers are prohibited from using methods of seclusion, restraint, and/or other restrictive interventions. MDHHS will conduct site reviews to ensure these methods are not used. ICO Care Coordinators and LTSS Supports Coordinators, as applicable, have the primary responsibility for identifying and addressing the use of seclusion, restraints, and/or restrictive interventions.
SECTION 12 – PROVIDER PARTICIPATION

Providers have the opportunity to participate in MI Health Link by joining the provider networks of the ICOs. ICOs are encouraged to contract with existing service providers for individuals eligible for and enrolling in the program to ensure continuity of care. Likewise, service providers are encouraged to participate in ICO networks to provide choice, continuity of care and high quality service. The ICO will be responsible for authorizing and paying for Medicare and Medicaid services. Additional information regarding how providers may participate in MI Health Link can be found on the MI Health Link website. (Refer to the Directory Appendix for website information.)
SECTION 13 - MEDICAID POLICY

Current and future Medicaid policies are applicable to the Medicaid portion of the MI Health Link benefit package unless otherwise specified in this chapter or other policies or guidance.
SECTION 14 – QUALITY ASSURANCE

ICOs and PIHPs, as applicable, must comply with requirements set forth in the three-way contract, MI Health Link waiver applications approved by CMS, any other supporting documentation, and the contracts between the ICOs and PIHPs.
SECTION 15 – APPEALS

The three-way contract establishes individual notice and appeal rights that must be adhered to when any grievable or adverse action is taken by the ICO or contracted entities that would fall under the grievance or appeals processes available to individuals through Medicare and Medicaid guidelines.
SECTION 16 – OMBUDSMAN

ICOs and providers must work with the MI Health Link Ombudsman to resolve enrollment and service issues. ICOs must provide the Ombudsman contact information in their member materials.

SECTION 1 – INTRODUCTION

This chapter applies to non-emergency medical transportation (NEMT) providers and authorizing parties. The Medicaid NEMT benefit is covered for Medicaid, MI Child, and Healthy Michigan Plan (HMP) beneficiaries, and for Children’s Special Health Care Services (CSHCS) beneficiaries who also have Medicaid coverage.

Federal law at 42 CFR 431.53 requires Medicaid to ensure necessary transportation for beneficiaries to and from services that Medicaid covers. The NEMT benefit must be administered to beneficiaries in an equitable and consistent manner.

Beneficiaries are assured free choice in selecting a Medicaid medical provider to render services. A beneficiary’s free choice of medical provider selection does not require the Medicaid program to cover transportation beyond the standards of coverage described in this policy in order to meet a beneficiary’s personal choice of medical provider.

Forms referenced in this chapter are accessed via the beneficiary’s case worker and are maintained on MI Bridges. The Medical Transportation Statement (MSA-4674) is also available on the Michigan Department of Health and Human Services (MDHHS) website. (Refer to the Directory Appendix for website information.)
### SECTION 2 - COMMON TERMS [CHANGE MADE 4/1/18]

<table>
<thead>
<tr>
<th>Term</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Authorizing Party</td>
<td>An affiliated entity of the Medicaid program (e.g., local MDHHS office or Medicaid-contracted transportation broker) responsible for verifying Medicaid eligibility, maintaining a network of transportation subcontractors, and scheduling the least-costly mode of appropriate transportation to medical appointments/services.</td>
</tr>
<tr>
<td>Commercial Provider</td>
<td>A transportation provider who uses a motor vehicle that belongs to a company or corporation to provide transportation services to a beneficiary.</td>
</tr>
<tr>
<td>Daily Long Distance Trip</td>
<td>A daily trip that exceeds 50 miles one-way from the beneficiary’s home.</td>
</tr>
</tbody>
</table>
| Demand Response (Dial A Ride) Public Transportation | Public transportation characterized by the following:  
  - The vehicles do not operate over a fixed route or on a fixed schedule except, perhaps on a temporary basis, to satisfy a special need, and  
  - Typically, the vehicle may be dispatched to pick up several passengers at different pick-up points before taking them to their respective destinations and may even be interrupted en route to these destinations to pick up other passengers. |
<p>| Fixed Route Public Transportation | Services provided on a repetitive, fixed schedule basis along a specific route with vehicles stopping to pick up and deliver passengers to specific locations. |
| Individual With a Vested Interest | A transportation provider who is a relative or friend of a beneficiary and who has a personal stake or interest in the livelihood of a beneficiary. |
| Long-Term Care Resident | A beneficiary who resides in a Medicaid-certified nursing facility, county medical care facility, or hospital long-term care unit. |
| Medi-Van | A vehicle owned by a commercial or nonprofit provider used to transport a beneficiary who is able to ambulate and transfer into and out of the vehicle, but requires door-to-door or curb-to-curb service due to their medical condition. Drivers of these vehicles are expected to assist and escort the beneficiary. This definition also includes demand response paratransit transportation services. |
| Medically Necessary Attendant | An individual, other than the driver of the vehicle or an individual with a vested interest, who assists a beneficiary due to their physical, mental, or developmental status on trips to and from a service or appointment that Medicaid covers. |
| Nonprofit Provider | A transportation provider who utilizes a motor vehicle that belongs to an entity that has been organized to carry out a charitable, educational, religious, or scientific purpose, and meets specific tax-exempt purposes to provide transportation services to a beneficiary. |
| Paratransit Transportation | Wheelchair-accessible, demand response services provided by public transportation agencies. |
| Prolonged Treatment | Medical treatment that is required to treat a medical condition which lasts more than 12 weeks. |</p>
<table>
<thead>
<tr>
<th><strong>Public Transportation Provider</strong></th>
<th>An individual employed by a public entity that provides regular or special continuing transportation available for use by the general public. This does not include school bus, charter, or intercity bus or passenger rail transportation.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Round Trip</strong></td>
<td>When a beneficiary is transported from their residence, or another location, to a Medicaid-covered service and then returned to their original point of origin. <em>(text added 4/1/18)</em></td>
</tr>
<tr>
<td><strong>Transportation Provider</strong></td>
<td>An individual (e.g., an employee of a public, commercial, or nonprofit transportation entity, volunteer driver, individual with a vested interest, or medically necessary attendant) who provides transportation services to beneficiaries.</td>
</tr>
<tr>
<td><strong>Trip</strong></td>
<td>One-way transportation of a beneficiary from their residence, or another location, to a Medicaid-covered service. <em>(text added 4/1/18)</em></td>
</tr>
<tr>
<td><strong>Unloaded Mileage</strong></td>
<td>Mileage traveled when the beneficiary is not in the vehicle.</td>
</tr>
<tr>
<td><strong>Volunteer Driver</strong></td>
<td>A transportation provider who utilizes their personal motor vehicle to provide NEMT services to a beneficiary. Volunteer drivers do not have a personal stake or interest in the livelihood of the beneficiary.</td>
</tr>
<tr>
<td><strong>Waiting Time</strong></td>
<td>The time that a vehicle is waiting at a Medicaid-enrolled provider’s facility in order to transport the beneficiary to another location during the same trip.</td>
</tr>
<tr>
<td><strong>Wheelchair Lift Equipped Vehicle</strong></td>
<td>A vehicle owned by a commercial or nonprofit provider that is equipped for a beneficiary who requires a wheelchair and that provides door-to-door service due to their inability to ambulate. Drivers of these vehicles are expected to assist and escort the beneficiary. This definition also includes demand response paratransit transportation services.</td>
</tr>
</tbody>
</table>
SECTION 3 - TRANSPORTATION AUTHORIZATION

Medicaid authorizes fee-for-service (FFS) NEMT services via local MDHHS offices, except in Wayne, Oakland, and Macomb counties. FFS transportation services in Wayne, Oakland, and Macomb counties are administered through a contracted transportation broker. (Refer to the Directory Appendix for transportation broker information.)

The Medicaid program contracts with Medicaid Health Plans (MHPs), selected through a competitive bid process, to provide services to Medicaid beneficiaries. MHPs are responsible for providing NEMT services to their enrollees for all services covered under the managed care contract. (For additional information, refer to the Medicaid Health Plans chapter of this manual.)

MHPs may have different prior authorization and documentation requirements from those described in this chapter. Providers, beneficiaries or authorizing parties should contact the specific health plan for further information regarding NEMT. Transportation services for managed care enrollees may vary depending on the beneficiary’s benefit plan. For additional information regarding benefit plans, refer to the Beneficiary Eligibility chapter of this manual.

Reimbursement for medical transportation requires an initial verification of medical need by the beneficiary’s primary care physician (PCP). An original, completed DHS-5330 (Medical Verification for Transportation) signed by the beneficiary's PCP, or a physician's assistant or nurse practitioner working under the supervision of the PCP, serves as documentation of medical need and must be retained in the beneficiary's file. The DHS-5330 must be completed annually. Verification of medical need is not required when the transportation is to obtain medical evidence (i.e., employability, incapacity, or disability) or to meet the needs of children for protective services.

The authorizing party is responsible for verifying Medicaid eligibility, maintaining a network of transportation subcontractors, and scheduling the least-costly mode of appropriate transportation to medical appointments/services.

The beneficiary's need for NEMT must be evaluated before services are authorized. This includes assessing all of the following:

- The beneficiary’s eligibility;
- The transportation requested is for a service Medicaid covers; and
- The beneficiary has no other means of transportation available. Availability is not dependent on whether the beneficiary previously provided their own transportation.
SECTION 4 - TRANSPORTATION PROVIDER QUALIFICATIONS [CHANGE MADE 7/1/18]

Procedures must be in place to document and verify that vehicles used by providers meet the safety needs of the beneficiary including, but not limited to:

- Seatbelts and child safety seat requirements, if appropriate; and
- Functional heating and air conditioning.

NEMT individual and agency providers must consent to required screenings to determine eligibility in order to receive Medicaid reimbursement for providing NEMT services. Individual providers are those persons who provide transportation to a Medicaid beneficiary they are not related to and include, but may not be limited to, volunteer drivers or friends, colleagues, or neighbors of a Medicaid beneficiary. Provider screening is conducted through the CHAMPS provider enrollment process. (Refer to the General Information for Providers chapter of this manual for additional information.)

Beneficiaries who transport themselves or individuals providing NEMT services to a Medicaid-enrolled family member will not be required to enroll in CHAMPS and will be exempt from mandated provider screening requirements. Self-attestation is sufficient when determining the familial relationship between the driver and the Medicaid beneficiary. Foster parents who transport their foster children are not required to enroll in CHAMPS and are exempt from mandated provider screening requirements. Demand-responsive public transit services and commercially hailed or street taxicabs are also exempt from CHAMPS enrollment and screening requirements. (added per bulletin MSA 17-49)

4.1 VOLUNTEER DRIVERS

The minimum volunteer driver requirements are:

- 18 years of age and older;
- Cannot physically reside in the same household as the beneficiary they are transporting;
- Must be able to read and communicate effectively in English;
- Valid driver’s license appropriate to the class of vehicle being operated;
- Compliant with Sections 304 and 319 of the Michigan Vehicle Code related to restricted driver’s licenses as issued by the Michigan Secretary of State (MDHHS reserves the right to deny or revoke enrollment of a provider due to a restricted or suspended license);
- Motor vehicle insurance;
- Adherence to all public laws, ordinances, and regulations applicable to drivers and the vehicles that are used;
- Compliant with all applicable confidentiality laws as required by the Medicaid program; and
- Compliant with all provider enrollment background and screening requirements as required by the Medicaid program. (Refer to the General Information for Providers Chapter of this manual for additional information.)
4.2 INDIVIDUALS WITH A VESTED INTEREST

The minimum requirements for individuals with a vested interest are:

- Valid driver's license appropriate to the class of vehicle being operated;
- Compliant with Sections 304 and 319 of the Michigan Vehicle Code related to restricted driver’s licenses as issued by the Michigan Secretary of State (MDHHS reserves the right to deny or revoke enrollment of a provider due to a restricted or suspended license);
- Motor vehicle insurance;
- Adherence to all public laws, ordinances, and regulations applicable to drivers and the vehicles that are used;
- Compliant with all applicable confidentiality laws as required by the Medicaid program; and
- Compliant with all provider enrollment background and screening requirements as required by the Medicaid program. (Refer to the General Information for Providers Chapter of this manual for additional information.)

4.3 COMMERCIAL AND NONPROFIT PROVIDERS

The minimum requirements for commercial and nonprofit providers are:

- 18 years of age and older;
- Must be able to read and communicate effectively in English;
- Valid driver's license appropriate to the class of vehicle being operated;
- Compliant with Sections 304 and 319 of the Michigan Vehicle Code related to restricted drivers licenses as issued by the Michigan Secretary of State (MDHHS reserves the right to deny or revoke enrollment of a provider due to a restricted or suspended license);
- Maintenance of all necessary licensure and certification required by all transportation public laws, ordinances, and regulations applicable to the transportation provider, including any that may require liability insurance;
- Compliant with the Americans with Disabilities Act (ADA) of 1990, as amended;
- Operation of vehicles that meet the safety and medical needs of the beneficiary;
- Compliant with any state or federal statutes applicable to commercial and nonprofit transportation providers;
- Compliant with all applicable confidentiality laws as required by the Medicaid program; and
- Compliant with all provider enrollment background and screening requirements as required by the Medicaid program. (Refer to the General Information for Providers Chapter of this manual for additional information.)
4.4 Public Transportation Providers

The minimum requirements for public transportation providers are:

- 18 years of age and older;
- Must be able to read and communicate effectively in English;
- Commercial Driver’s License (CDL) if operating a vehicle having a gross vehicle weight of 26,001 pounds or more, or designed to transport 16 or more people (including driver);
- Compliant with the Americans with Disabilities Act (ADA) of 1990, as amended;
- Operation of vehicles that meet the safety and medical needs of the beneficiary;
- Compliant with all applicable confidentiality laws as required by the Medicaid program; and
- Compliant with all provider enrollment background and screening requirements as required by the Medicaid program. (Refer to the General Information for Providers Chapter of this manual for additional information.)
SECTION 5 – COVERED SERVICES [CHANGE MADE 7/1/18]

NEMT expenses, regardless of whether there is a corresponding medical claim on the date of service, may be covered for trips to and from:

- Treatment Medicaid covers (one-time or ongoing);
- Ancillary service providers (e.g., pharmacies, durable medical equipment, prosthetics, orthotics, and supplies [DMEPOS] providers) to obtain a service or item Medicaid covers;
- Medical care, treatment or services that have been prior authorized;
- Appointments to obtain medical evidence (for eligibility verification purposes only); and
- Facilities providing services Medicaid covers that do not charge for care.

Transportation from a service Medicaid covers is only covered when it is from the provider’s location to the beneficiary’s residence or to another service Medicaid covers. The least costly mode of transportation appropriate for the beneficiary’s medical needs must be used.

Medicaid authorizes and reimburses transportation providers directly for the following NEMT services:

- Long-term lodging for approved transplant hospitals.
- Transportation to and from pregnancy-related services for Medicaid beneficiaries enrolled in the Maternity Outpatient Medical Services (MOMS) program.
- Transportation to and from day treatment provided by a Community Mental Health Services Program (CMHSP) (as part of its treatment package) for children enrolled in the Children’s Waiver Program (CWP).

Transportation providers and beneficiaries may be reimbursed for mileage, tolls, parking fees, approved meals and lodging expenses, Medi-Van and wheelchair lift equipped transportation, and medically necessary attendants. The transportation provider or beneficiary must submit a complete, original MSA-4674 (Medical Transportation Statement) for all trip-associated costs to the authorizing party to receive reimbursement. NEMT reimbursement must reflect the total incurred cost to the transportation provider(s) and to the beneficiary, and must be verified with original, itemized, unaltered receipts. All receipts must be legible and attached to the MSA-4674. Transportation providers must be enrolled in CHAMPS on the date of service to receive Medicaid NEMT reimbursement unless the provider is exempt from enrollment. (added per bulletin MSA 17-49)

In order to assure appropriate reimbursement for NEMT, MDHHS maintains a database of provider rates which is available on the MDHHS website. The database is reviewed and updated as applicable. (Refer to the Directory Appendix for website information.) NEMT providers must bill MDHHS the usual and customary fee charged to the public. If the provider renders a covered service to a beneficiary that the provider offers for free or for a reduced fee to the general public, the provider may only bill Medicaid up to that customary charge as long as all other Medicaid requirements are met.
5.1 Mileage

The Medicaid program covers the least-costly available mode of transportation suitable to the beneficiary's medical condition. The following modes of transportation are commonly utilized:

- Commercial and nonprofit transportation
- Fixed route, demand response and deviated route public transportation
- Volunteer drivers
- Individuals with a vested interest
- Beneficiaries providing their own NEMT in their personal vehicle

Volunteer drivers will not be reimbursed for driving a vehicle owned by the beneficiary or a member of the beneficiary's family.

When available, medical providers or entities that offer transportation or medical delivery services at no charge (e.g., prescription delivery services offered by the beneficiary’s pharmacy) should be utilized.

Mileage is reimbursed according to transportation provider type at the appropriate rate as indicated on the MDHHS NEMT Database. Total round-trip mileage must be rounded up to the nearest mile and must be verifiable using an online mapping service or a Global Positioning System device.

As applicable, NEMT mileage reimbursement will align with standard mileage rates maintained by the Internal Revenue Service (IRS). Individuals with a vested interest or Medicaid beneficiaries providing their own NEMT will be reimbursed at the IRS rate for “medical or moving purposes”, while volunteer drivers and foster care parents will be reimbursed at the IRS rate for “business miles driven”.

5.2 Meals

Authorized meals for beneficiaries, volunteer drivers, or individuals with a vested interest are reimbursed at cost or at the maximum allowable amount, whichever is less. To be entitled to meal reimbursement, one of the following must be met:

- For breakfast: The vehicle with the beneficiary must depart at, or before, 6:00 AM and must return at, or after, 8:30 AM.
- For lunch: The vehicle with the beneficiary must depart at, or before, 11:30 AM and must return at, or after, 2:00 PM.
- For dinner: The vehicle with the beneficiary must depart at, or before, 6:30 PM and must return at, or after, 8:00 PM.

Meal reimbursement requires original, itemized, unaltered receipts which must include the business name, address, date, time, itemized list of items purchased with cost of each item. Bulk purchases of groceries and shared meals are not reimbursable. Meals must be purchased and consumed on the day and within the time of travel. Reimbursement for alcoholic beverages is not permitted. If a lodging reservation or other travel includes a complimentary breakfast or other meals, Medicaid does not provide any additional reimbursement for that meal.
5.3 FEES AND TOLLS

Travel-related fees and tolls (e.g., parking, toll road, and bridge fare) are reimbursed at actual cost and require original, unaltered receipts.

5.4 LODGING

Medically necessary overnight stays which include meals and lodging may be authorized for a beneficiary, a transportation provider, and if documented by the beneficiary’s PCP on the DHS-5330, one medically necessary attendant (or individual with a vested interest) for no more than five consecutive nights. Medically necessary overnight stays beyond five nights require prior authorization (PA) from the MDHHS Program Review Division (PRD). (Refer to the Directory Appendix for contact information.)

Medically necessary overnight stays which include meals and lodging at a Level IV Neonatal Intensive Care Unit (NICU) may be authorized for a beneficiary, a transportation provider, and if documented by the beneficiary’s PCP on the DHS-5330, one medically necessary attendant (or individual with a vested interest) for no more than 14 nights. Necessary overnight stays at a Level IV NICU beyond 14 nights require PA from PRD.

Overnight stays which include meals and lodging ordered by a physician or required due to travel distance may be authorized for a beneficiary, a transportation provider, and if documented by the beneficiary’s PCP on the DHS-5330, one medically necessary attendant (or individual with a vested interest). The least expensive, sufficiently maintained lodging available must be utilized. The availability of nonprofit accommodations (i.e., Ronald McDonald House or accommodations available through the visiting medical facility) must be explored before commercial lodging is considered. Lodging expenses are reimbursed at cost or the maximum allowable amount, whichever is less. Original, itemized, unaltered receipts are required. Reimbursement beyond an accommodation’s suggested donation amount or per night rate as charged to the public will not be made.

5.5 SPECIAL ALLOWANCES

Special allowances (i.e., wheelchair lift-equipped or Medi-Van vehicles, or medically necessary attendants) are reimbursed at the rate listed on the MDHHS NEMT Database. The beneficiary’s physician must document the medical necessity of all special allowances on the DHS-5330.

5.5.A. WHEELCHAIR LIFT-EQUIPPED VEHICLES

Beneficiaries may be eligible for specialized NEMT provided by wheelchair lift equipped vehicles when at least one of the following conditions is met:

- Beneficiary is wheelchair dependent; or
- Beneficiary is medically dependent on life sustaining equipment which cannot be accommodated by standard transportation.

Drivers of wheelchair lift equipped vehicles are expected to assist and escort the beneficiary.
5.5.B. **MEDI-VAN VEHICLES**

Beneficiaries may be eligible for specialized NEMT provided by Medi-Van vehicles when they require door-to-door or curb-to-curb assistance. Drivers of Medi-Van vehicles are expected to assist and escort the beneficiary.

5.5.C. **MEDICALLY NECESSARY ATTENDANTS**

Beneficiaries may be eligible to receive assistance from one attendant in addition to the driver of a wheelchair lift equipped or Medi-Van vehicle. The attendant must be medically necessary due to the beneficiary’s physical, mental, or developmental status. If more than one attendant is needed, prior authorization is required. For additional information, refer to the Prior Authorization (PA) section of this chapter.
**SECTION 6 – MANAGED CARE PROGRAMS**

The Medicaid program contracts with Medicaid Health Plans (MHPs) and Integrated Care Organizations (ICOs), selected through a competitive bid process, to provide services to beneficiaries. These entities are responsible for providing NEMT services to their enrollees for all services covered under their contract. (For additional information, refer to the Medicaid Health Plans and the MI Health Link chapters of this manual.)

For services provided to managed care enrollees in an FQHC, the MHP covers NEMT when:

- the service is covered under the MHP contract and the FQHC is in the MHP’s provider network; or
- the MHP has prior authorized the FQHC for the service.

MHPs and ICOs may have different prior authorization and documentation requirements from those described in this chapter. Providers, beneficiaries or authorizing parties should contact the specific MHP or ICO for further information regarding NEMT for their beneficiary. Transportation services for these enrollees may vary depending on the beneficiary’s benefit plan. For additional information regarding benefit plans, refer to the Beneficiary Eligibility chapter of this manual.

If a beneficiary was admitted to an inpatient hospital setting prior to the date of enrollment into an MHP or ICO, that entity will not be responsible for the inpatient stay or any travel-related expenses (e.g., miles, meals, or lodging) incurred by the beneficiary or transportation provider until the beneficiary’s date of discharge. This includes transportation expenses incurred as a result of the beneficiary’s return trip from the hospital to their residence or other outpatient setting. The MHP or ICO will be responsible for all care, including travel expenses, from the date of discharge forward (excluding expenses incurred as result of the beneficiary’s return trip to their residence).

For beneficiaries whose MHP or ICO enrollment status has changed, transportation may be authorized and reimbursed retroactively in the following situations:

- The beneficiary’s Medicaid eligibility was made retroactive, and the beneficiary received NEMT during the retroactive eligibility time period; or
- Transportation was authorized while enrolled in an MHP or ICO, and then the beneficiary was disenrolled retroactively by the program and enrolled into FFS.
SECTION 7 – PRIOR AUTHORIZATION (PA)

Transportation may require PA in certain situations. The PA request must be submitted in writing before the service is provided unless an urgent situation exists and the circumstances are documented. Payment authorization will not be given for PA requests submitted more than 30 days after the service is provided. The PA request, along with the DHS-5330, must be submitted to the PRD for review. (Refer to the Directory Appendix for contact information.) Prior authorization may be requested for up to six months for prolonged treatment requiring multiple transports.

Reimbursement for travel expenses related to the following situations requires PA:

- All travel to and from out-of-state/beyond borderland medical providers. (Refer to the Out of State/Beyond Borderland Providers subsection of the General Information for Providers chapter of this manual for additional information.);
- Transportation reimbursement requests for medical care outside a beneficiary’s community when comparable care is available locally;
- Meals and lodging for overnight stays if the medical facility is within 50 miles of the beneficiary’s residence;
- Meals and lodging for overnight stays beyond five nights unless the beneficiary is admitted to an approved children’s hospital. (Refer to the MDHHS NEMT Database for additional information.);
- Necessary meals and lodging for overnight stays beyond 14 nights for a beneficiary who is admitted to an approved children’s hospital;
- Requests for advance payment of travel costs; and
- Travel expenses for two or more individuals with a vested interest or medically necessary attendants.

The PA request must include:

- Beneficiary name and Medicaid identification number
- Case number
- Beneficiary address
- Explanation of medical necessity of the services requiring PA
- Travel origin and destination
- Effective travel date(s)
- Diagnosis
- Name and telephone number of the individual requesting PA
- Documentation supporting the request
Based on the documentation submitted, the PA request is either approved, denied, or returned for more information. Authorizing parties are informed of the decision in writing, and a copy of the decision must be retained in the beneficiary's file. The authorizing party must then immediately inform the transportation provider and beneficiary of the approval or denial of the PA request. Approval of a PA does not guarantee beneficiary eligibility or payment. It is the authorizing party’s responsibility to verify beneficiary eligibility for the date of service prior to NEMT services being rendered.
SECTION 8 – SPECIAL SITUATIONS

8.1 UNLOADED MILEAGE

Unloaded mileage incurred by commercial and nonprofit providers is not reimbursable by the Medicaid program.

8.2 MINORS TRAVELING ALONE

The following travel circumstances apply for minor (under 18 years of age) beneficiaries:

- Children under 12 years of age must be escorted to medically necessary appointments by a parent, foster parent, caregiver or legal guardian.
- For children between the ages of 12 and 18 years, a consent letter signed by a parent, foster parent, caregiver or legal guardian is required for a child to be transported without accompaniment unless access to the service does not require parental consent by the Medicaid program.

The above policy is waived for beneficiaries who have been emancipated or are seeking transportation for health care services for which a minor is legally able to consent (i.e., pregnancy-related, sexually transmitted/venereal disease, HIV/AIDS, substance use disorder, or outpatient CMHSP care).

8.3 MEDICAL REVIEW TEAM APPOINTMENTS

Transportation is a Medicaid-covered benefit and may be authorized for beneficiaries seeking financial or medical assistance due to a disability or blindness. Transportation is limited to one trip for examination and one trip per Disability Determination Services recommendation. A completed DHS-49-F (Medical – Social Questionnaire) serves as documentation and must be retained in the beneficiary’s file.
**SECTION 9 – REFERRALS**

An NEMT referral is not considered a denial of transportation and, as such, a DHS-301 (Medical Transportation Notice) must not be issued when an NEMT referral is made.

The following circumstances are considered referrals:

- Referring a beneficiary to their MHP (for additional information, refer to the Managed Care Programs section of this chapter);
- Referring a beneficiary to the CMHSP; and
- Referring a beneficiary to medical providers who bill Medicaid directly for services (for additional information, refer to the Covered Services section of this chapter).
SECTION 10 – DENIALS AND BENEFICIARY APPEALS

Beneficiaries who have Medicaid coverage have a right to an administrative hearing when services have been denied, reduced, changed or terminated. When a request for NEMT is denied, a beneficiary will be notified with a written denial notice (DHS-301), provided by the authorizing party, which explains the reason for the negative action and informs the beneficiary of their right to appeal. The following requirements must also be met when a beneficiary is denied transportation services:

- The DHS-301 and postage-paid return envelope must be mailed to the beneficiary within one business day of the service being denied;
- A copy of the DHS-301 must be kept in the beneficiary’s file and made available upon request; and
- An employee with knowledge of the denial must be available to testify at an administrative hearing, if required.

The beneficiary or beneficiary’s authorized representative may request an administrative hearing. The Michigan Administrative Hearing System (MAHS) arranges and conducts the appeal process. Any questions regarding the appeal process should be directed to MAHS. (Refer to the Directory Appendix for contact information.)
SECTION 11 – NON-COVERED SERVICES

The following transportation services are not reimbursable:

- Waiting time;
- Trips that were provided prior to approval from the authorizing party;
- Multiple trips for a single Medicaid service;
- When a beneficiary failed to keep their appointment;
- Trips to and from services that are not covered (e.g., grocery store, non-Medicaid covered medical services);
- Routine medical care outside a beneficiary's community when comparable care is available locally, unless prior authorized;
- Transportation to and from services for individuals who have not met their spend-down;
- Expenses for services that have already occurred;
- Services for long-term care beneficiaries. Routine, non-emergency medical transportation provided for long-term care residents in a van or other non-emergency vehicle is included in the facility's per diem rate. This includes transportation for medical appointments, dialysis, therapies, or other treatments not available in the facility. (Refer to the Nursing Facility Coverages chapter of this manual for additional information regarding NEMT for long-term care beneficiaries);
- Transportation for managed care program enrollees for services covered under the program contract (refer to the Managed Care Programs section of this chapter for additional information);

and

- Transportation for services provided in FQHCs.
NURSING FACILITY

This chapter is comprised of three parts:

The **COVERAGES** portion of the chapter outlines nursing facility requirements for beneficiary eligibility and admission, for providing services, and for informing beneficiaries of their rights and responsibilities.

The **CERTIFICATION, SURVEY, & ENFORCEMENT APPENDIX** includes information regarding Medicaid certification of nursing facilities, staff certification, the survey process, and enforcement remedies.

The **COST REPORTING & REIMBURSEMENT APPENDIX** contains Medicaid policy pertaining to nursing facility ownership, reimbursement, costs, and financial reporting.

SECTION 1 – GENERAL INFORMATION

This chapter discusses Medicaid nursing facility coverage which is intended to assist beneficiaries in attaining or maintaining the highest practical physical, mental, and psychosocial well-being and maximize independence and decision-making. The chapter outlines nursing facility requirements for beneficiary eligibility and admission, for providing services, and for informing beneficiaries of their rights and responsibilities.

Nursing facilities provide services to many of the state’s most vulnerable citizens. Medicaid, as the primary payer for beneficiaries who reside in nursing facilities, adheres to all State and Federal regulations that govern care provided in these facilities. Governing regulations include, but are not limited to:

- Americans with Disabilities Act (ADA)
- 42 CFR §431, §438, §440, §441, §448, §483, §485, §488
- State Medicaid Operations Manual
- Medicare Catastrophic Coverage Act of 1988, Public Law 100-360
- Certificate of Need Commission Act 368 of 1978, as amended – Part 222
- Social Security Act
- Michigan Medicaid State Plan

Only those services covered by the Medicaid Program, as outlined in this chapter, are reimbursable. Included is a full description of:

- Covered Services:
  - Services covered by the facility’s per diem rate; and
  - Ancillary services that must be billed separately by the service provider.
- Non-Covered Services that the beneficiary may purchase with their patient-pay amount.

A Medicaid-certified nursing facility is defined as a nursing home, county medical care facility, or hospital long-term care unit with Medicaid certification. Also included are swing beds as defined in the Federal State Operations Manual (SOM) and/or State Medicaid Policy.

Beneficiary is defined as a Medicaid beneficiary, or a person legally sanctioned to make medical decisions on his behalf (i.e., guardian, conservator, activated Durable Power of Attorney).

Resident is defined as a nursing facility resident (irrespective of payer source) or a person legally sanctioned to make medical decisions on his behalf (i.e., guardian, conservator, activated Durable Power of Attorney).

Individual, as used in this chapter, means any person.
SECTION 2 – MEDICAID HEALTH PLAN [CHANGE MADE 7/1/18]

The Medicaid Health Plan (MHP) is responsible for restorative or rehabilitative care in a nursing facility up to 45 days in a rolling 12-month period. If nursing facility services will exceed this coverage, the health plan may initiate the disenrollment process by submitting the Request for Disenrollment Long Term Care form (MSA-2007). The nursing facility may bill Medicaid after the disenrollment is processed.

Beneficiaries who reside in a nursing facility are excluded from subsequent enrollment in a MHP. If a beneficiary is in a facility prior to enrollment in a health plan and the nursing facility does the admission record in CHAMPS correctly, CHAMPS will automatically remove the health plan and set the NH benefit plan. **(revised per bulletin MSA 17-46)**

*(text deleted per bulletin MSA 17-46)*
SECTION 3 - QUALITY

MDHHS is committed to a quality long-term care system that supports people with long-term care needs, regardless of the setting in which the individual receives those services, including nursing facilities, supported living settings, and their own home. Medicaid supports a system that moves away from the traditional medical model for care to one of enhanced beneficiary participation. Nursing facilities with Medicaid certification are expected to assess and plan care with resident participation and to provide services in ways that promote and support person-centered planning and quality service delivery.

3.1 QUALITY INDICATORS

Quality is indicated by the following components:

- Regular, ongoing, and systematic monitoring and revision of individualized plans of care, progress and outcomes by the beneficiary and his support system. In order to participate, beneficiaries may require support, such as regular opportunities and assistance in reviewing key considerations. Planning results should be documented in ways that are meaningful to the beneficiary and useful to people with responsibilities for implementing the plan.
- Risk and safety concerns are considered and plans developed to minimize risk of harm while promoting independence and safety.
- Behavioral interventions and medication management are used only when necessary, and are appropriately managed and monitored.
- Care coordination must support the individual’s participation in his care.
- Support for personal responsibility and community relationships that avoid the unintended and detrimental consequences of organizational involvement. Facilities should minimize the disempowerment of beneficiaries or displacement of family members by professional decision-makers and/or service providers, assume the beneficiary is competent and capable of participating in his relationships and the community, and provide assistance and support only when there are unmet needs.
- Individual freedom to exercise civic rights and decision-making authority exists to the maximum extent possible.
- Individuals are free to exercise their due process and grievance rights, and are provided the information necessary to do so.
- Individuals and their support system express satisfaction and the care leads to positive outcomes.
- Diverse cultural and ethnic backgrounds are supported.
- A system of continuous quality improvement that includes input from residents and families.

Current models that utilize person-centered planning and introduce the systems/culture change to support ongoing quality in nursing facilities include, among others, The Eden Alternative™, Wellspring™, and Gentlecare™.
3.2 Quality of Life

Nursing facilities must provide services for residents in a manner and in an environment that promotes maintenance or enhancement of the resident’s quality of life. Elements of quality of life include dignity, self-determination, participation in community life and in other activities, participation in resident and family groups, and accommodation of needs through the end of life. Quality of life is defined, measured, and evaluated by residents and their support systems, and may include quality of care outcomes.

3.3 Quality of Care

Nursing facilities must meet the needs of residents in compliance with State and Federal laws, rules, codes, and established clinical guidelines and practices.

Complaints regarding the quality of care in any Michigan nursing facility can be made to the Health Facility Complaint Line. (Refer to the Nursing Facility Section of the Directory Appendix for contact information.)
SECTION 4 – BENEFICIARY RIGHTS

All nursing facility residents have the right to:

- A dignified existence;
- Self-determination; and
- Communication with, and access to, persons and services inside and outside the facility.

In accordance with Federal and State rules and regulations, nursing facilities are required to protect and promote beneficiary rights. These rights include, but are not limited to:

- The right to exercise their rights as citizens of the United States;
- The right to be free of interference, coercion, discrimination, and reprisal from the facility in exercising their rights;
- The right to receive notice of their rights, rules and regulations, both orally and in writing, in a language that the resident understands;
- Access to their medical records and information;

(In accordance with Federal regulations, a beneficiary [or his representative] must be allowed to inspect his records within 24 hours [excluding weekends and holidays] of such request. Also, in accordance with Michigan Public Health Code, a beneficiary [or his representative] is entitled to receive and examine an explanation of his bill or an itemized statement setting forth services paid for and services rendered, regardless of the source of payment.)

- The right to be informed about their health status;
- The right to refuse treatment;
- The right to non-discrimination, including non-discrimination based on payment source;
- Notification of covered and noncovered services, and any additional costs;
- Notification of any changes in room, policies, physician, health status, and treatment;
- Protection and appropriate management of resident funds;
- The right to covered services;
- Notification of transfer or relocation;
- The right to pain and symptom management at the end of life; and
- The right to re-admission to the nursing facility and to have their bed held during an emergency hospital stay, as defined in the Holding a Bed subsection of this chapter.

In general, beneficiaries cannot be charged for Medicaid-covered services, except for patient-pay amounts, copays or deductibles. This applies to whether they are enrolled as a fee-for-service beneficiary, MDHHS is paying their Health Maintenance Organization (HMO) premium to a contracted health plan, or services are provided under Community Mental Health Services Program (CMHSP) or Pre-paid Inpatient Health Plan (PIHP) capitation. However, beneficiaries may be charged if they choose to obtain a service from an out-of-network or non-participating provider, as long as they have prior
knowledge they will be obligated to pay the entire charge and, with that knowledge, they request the
service.

Medicaid beneficiaries may not be charged the difference between the provider’s charge and the Medicaid
payment for a service, nor can they be charged for missed appointments.

Medicaid beneficiaries cannot be charged for the copying of medical records for the purpose of providing
them to another health care provider.
SECTION 5 – BENEFICIARY ELIGIBILITY AND ADMISSION PROCESS

5.1 NURSING FACILITY ELIGIBILITY

There are five components that determine beneficiary eligibility and Medicaid nursing facility reimbursement:

- Verification of financial Medicaid eligibility
- PASARR Level I screening
- Physician-written order for nursing facility services
- A determination of medical/functional eligibility based upon a web-based version of the Michigan Medicaid Nursing Facility Level of Care Determination (LOCD) that was conducted online at the time the resident was either Medicaid eligible or Medicaid pending and conducted within the timeframes specified in the Michigan Medicaid Nursing Facility Level of Care Determination subsection of this chapter.
- Computer-generated Freedom of Choice (FOC) form signed and dated by the beneficiary or the beneficiary's representative.

These components are defined below.

5.1.A. VERIFICATION OF MEDICAID FINANCIAL ELIGIBILITY [TITLE REVISED AND CHANGES MADE 7/1/18]

Medicaid reimbursement for nursing facility services for an individual requires a determination of Medicaid financial eligibility for that individual by MDHHS. When a nursing facility enters admission information for an individual who does not have active or pending Medicaid eligibility, a Medicaid Application for Health Care Coverage Patient of Nursing Facility (DHS-4574) will be automatically mailed to the individual.

The online Michigan Medicaid Nursing Facility Level of Care Determination must be conducted within the required timeframe for Medicaid or Medicaid-pending beneficiaries. (revised per bulletin MSA 17-46)

Federal regulations require annual recertification that residents meet Medicaid financial eligibility requirements. The annual recertification process is performed by MDHHS.

In order for Medicaid to reimburse for nursing facility services from the date of admission of a Medicaid-eligible beneficiary, the Medicaid beneficiary must be in a Medicaid-certified bed, and the LOCD must be conducted online ONLY for Medicaid eligible or Medicaid pending beneficiaries and within the timeframes outlined in the Michigan Medicaid Nursing Facility Level of Care Determination subsection of this chapter.
5.1.B. CORRECT/ TIMELY PREADMISSION SCREENING/ ANNUAL RESIDENT REVIEW (PASARR)

The Level I Preadmission Screening/Annual Resident Review (PASARR) must be performed prior to admission as described in the PASARR Process Section of this chapter.

A Level I Preadmission Screen must be performed for all individuals admitted to a Medicaid-certified nursing facility regardless of payer source. The Level I screening form (Preadmission Screening [PAS]/Annual Resident Review [ARR] (Mental Illness/Intellectual Disability/Related Conditions Identification); DCH-3877) is available on the MDHHS website. (Refer to the Directory Appendix for website information.) The nursing facility is required to ensure that the PASARR Level I screening has been completed and passed (does not trigger a PASARR Level II) by the individual prior to admission.

Placement options for beneficiaries who were determined through Level II Preadmission screening to have either (1) a mental illness or (2) an intellectual disability (or a related condition) are determined through the federal PASARR screening process requirements as to whether or not they need nursing facility services, specialized services, and/or mental health services.

MDHHS performs retrospective reviews, randomly and when indicated, to determine that the nursing facility has complied with federal PASARR requirements. MDHHS reviews retrospectively to determine that the Level I screening was performed, and that the Level II evaluation was performed when indicated.

MDHHS is required to recover any payments made to nursing facilities for the period that a participant may have been admitted to a nursing facility when the PASARR screening process was not completed.

5.1.C. PHYSICIAN ORDER FOR NURSING FACILITY SERVICES

A physician-written order for nursing facility admission is required. By renewing orders, the physician certifies the need for continuous nursing facility care. The order must be signed and dated by the physician. The physician's degree must appear with the signature. A stamped signature is not acceptable.

With the exception of beneficiaries 21 years of age or under residing in a psychiatric facility, a physician (MD or DO) must approve a beneficiary's need for long-term care not more than 30 calendar days prior to the beneficiary's admission to a nursing facility.

For an individual who applies for Medicaid financial eligibility while a resident in a nursing facility, the physician must reaffirm the need for long-term care not more than 30 calendar days prior to the submission of the application for Medicaid financial eligibility.
5.1.D. APPROPRIATE PLACEMENT BASED ON MICHIGAN MEDICAID NURSING FACILITY LEVEL OF CARE DETERMINATION

5.1.D.1. MICHIGAN MEDICAID NURSING FACILITY LEVEL OF CARE DETERMINATION

Financially eligible Medicaid residents must meet medical/functional eligibility for Medicaid reimbursed nursing facility services. To verify medical/functional eligibility, the nursing facility (i.e., hospital long term care unit, county medical care facility, ventilator dependent unit, hospital swing bed) must complete the online LOCD under the provider’s NPI prior to the start of Medicaid reimbursable services. The nursing facility must submit the information from any hard-copy LOCD into the LOCD’s web-based version only for Medicaid eligible and Medicaid pending beneficiaries, and within the timeframes specified in the Michigan Medicaid Nursing Facility Level of Care Determination subsection of this chapter under ONLINE LOCD.

Ventilator-Dependent Care Units (VDCUs) and Medicare/ Medicaid Crossover Claims: Medicaid-enrolled VDCUs have a distinct National Provider Identifier (NPI) number for Medicaid billing. The number is separate from the “regular” facility NPI number. An LOCD must be completed under the “regular” NPI number for days 1 to 100. For days 101 and forward, the facility must complete an LOCD under the VDCU’s distinct NPI number.

Change of Ownership

If a new National Provider Identification (NPI) will be issued to a provider who is going through a change of ownership, the provider must conduct the hard copy version of the LOCD and Freedom of Choice (FOC). The hard copy LOCD must be conducted according to policy outlined in this chapter. The FOC must be signed and dated, and completed according to policy outlined in this chapter. Once the provider is given full access to CHAMPS under their new NPI, the provider must enter all of the information on the hard copy LOCD into the online version of the LOCD in CHAMPS under their new NPI. The provider must then submit to Provider Support all hard copy FOCs. The online LOCD will be backdated to the date on a signed and dated FOC that corresponds to the beneficiary’s online LOCD.

If the new owner will not be issued a new NPI, the new owner must continue to conduct online LOCDs according to policy outlined in this chapter.

The nursing facility may bill for services based upon a valid LOCD. A valid LOCD is an LOCD that was conducted within policy guidelines for a Medicaid-eligible or Medicaid-pending beneficiary. Policy guidelines are further defined in the Nursing Facility Eligibility subsection and the Verification of Financial Medicaid Eligibility subsection of this chapter. Additionally, the Medicaid-eligible or Medicaid-pending beneficiary must be determined medically/functionally eligible through the web-based version of the LOCD or the Nursing Facility LOC Exception Process criteria.
A determination of Medicaid medical/functional eligibility via the hard copy or online LOCD conducted at any time in which the resident was a private pay resident is an invalid LOCD. An LOCD that was conducted online but not within policy’s specified timeframes is an invalid LOCD. The nursing facility may not bill for services rendered based upon an invalid LOCD. Refer to the Michigan Medicaid Nursing Facility Level of Care Determination subsection of this chapter (under ONLINE LOCD) for timeframes in which an online LOCD must be conducted for Medicaid-eligible or Medicaid-pending beneficiaries. The nursing facility may not bill the beneficiary unless the beneficiary has been advised of the denial and elects, in advance, to pay privately for services.

A copy of the Michigan Medicaid Nursing Facility LOC Determination, Field Definition Guidelines, Nursing Facility LOC Exception Process criteria and other information referenced in this section are available on the MDHHS website. (Refer to the Directory Appendix for website information.) The website also contains contact information for technical support to:

- register to access the web-based assessment.
- complete the web-based assessment.
- complete the exception process.
- complete the immediate review process.
- transition beneficiaries.

The Michigan Medicaid Nursing Facility LOC Determination must be applied by a health professional (physician, registered nurse, licensed practical nurse, licensed clinical social worker [BSW or MSW], or licensed physician's assistant) representing the proposed provider. Non-clinical staff may perform the evaluation with clinical oversight by a licensed professional. The nursing facility must bill Medicaid only for beneficiaries who meet the web-based Michigan Medicaid Nursing Facility LOC Determination criteria or the Nursing Facility LOC Exception Process criteria.

**ONLINE LOCD:** The web-based LOCD must be completed as follows:

- Within 14 calendar days from the date of a new admission of a Medicaid-eligible applicant, regardless of primary payer source.
- Within 14 calendar days from the date of a non-emergency transfer of a Medicaid-eligible resident to another nursing facility, including transfers originating from a nursing facility that is undergoing a voluntary facility closure.
- Within 14 calendar days from the date of disenrollment of a beneficiary from a Medicaid Health Plan which has been paying for nursing facility services.
- Within 14 calendar days from the date a Medicaid financial application was registered with MDHHS (i.e., date-stamped by MDHHS on the date the application is received) by a current private-pay nursing facility resident requesting Medicaid as the payer for nursing facility services.
Within 14 calendar days from the date a dually eligible beneficiary chooses to return to their Medicaid nursing facility bed, refusing their Medicare SNF benefit following a qualified Medicare hospital stay.

Within 14 calendar days from the date of a Medicaid-eligible resident's transfer into a new nursing facility from a nursing facility that is undergoing an involuntary facility closure due to federal or state regulatory enforcement action.

Nursing facilities do not need to complete the entire Michigan Medicaid Nursing Facility LOC Determination criteria, but must submit the information requested on the web-based Emergency/Involuntary Transfer form by selecting "Emergency/Involuntary Transfer" from the bottom of the LOC Determination welcome screen.

Once admitted into the facility, however, the resident must meet the medical/functional eligibility criteria on an ongoing basis, as with all other residents covered under Medicaid fee-for-service as the primary payer. A proactive discharge plan must be provided to beneficiaries who fail to qualify, and an adverse action notice must be issued if appropriate. Retrospective review of transferred residents will still apply.

Within 14 calendar days from the date of a Medicaid-eligible resident's emergency transfer into a new nursing facility from a nursing facility experiencing a hazardous condition (e.g., fire, flood, loss of heat) that could cause harm to residents when such transfers have been approved by the Department of Licensing and Regulatory Affairs (LARA), State Survey Agency.

Nursing facilities do not need to complete the entire Michigan Medicaid Nursing Facility LOC Determination criteria, but must submit the information requested on the web-based Emergency/Involuntary Transfer form by selecting "Emergency/Involuntary Transfer" from the bottom of the LOC Determination welcome screen.

Once admitted into the new facility, however, the resident must meet the medical/functional eligibility criteria on an ongoing basis, as with all other residents covered under Medicaid fee-for-service as the primary payer. A proactive discharge plan must be provided to beneficiaries who fail to qualify, and an adverse action notice must be issued if appropriate. Retrospective review of transferred residents will still apply.

Completion of the Michigan Medicaid Nursing Facility LOC Determination is not required for:

- Hospice beneficiaries who are being admitted to the nursing facility for any services.
- Nursing facility readmissions where a web-based Michigan Medicaid Nursing Facility LOC Determination was previously completed for the original admission and the beneficiary met the nursing facility criteria, and the beneficiary's level of care code determined by MDHHS has not changed.

The Michigan Medicaid Nursing Facility LOC Determination's medical/functional criteria include seven domains of need:

- Activities of Daily Living
- Cognitive Performance
- Physician Involvement
- Treatments and Conditions
- Skilled Rehabilitation Therapies
- Behavior
- Service Dependency

For beneficiaries who qualify under Physician Involvement, Treatments and Conditions, or Skilled Rehabilitation Therapies, specific restorative nursing plans and assertive discharge planning must be evident and documented within the medical record (except for end-of-life care). These requirements are specified in the Process Guidelines.

The admitting provider must complete the web-based Michigan Medicaid Nursing Facility LOC Determination only one time for each Medicaid or Medicaid-pending beneficiary. However, if the beneficiary has a significant change in condition as noted in the provider’s nursing notes or Minimum Data Set and that significant change in condition may affect the beneficiary’s current medical/functional eligibility status, the provider must conduct a subsequent web-based Michigan Medicaid Nursing Facility LOC Determination. If the resident is discharged and admitted to another provider, the new provider must complete the web-based Michigan Medicaid Nursing Facility Level of Care Determination within 14 days of admission, even if the new provider is owned by the same corporation as the previous provider. The Michigan Medicaid Nursing Facility Level of Care Determination is not conducted on a routine quarterly or annual basis.

5.1.D.2. NURSING FACILITY LEVEL OF CARE EXCEPTION PROCESS

The Nursing Facility Level of Care (LOC) Exception Review is available for Medicaid financially pending or Medicaid financially eligible beneficiaries who do not meet medical/functional eligibility based on a valid online Michigan Medicaid Nursing Facility LOC Determination (LOCD), but demonstrate a significant level of long term care need. The Nursing Facility LOC Exception Review process is not available to private pay individuals. The Nursing Facility LOC Exception Review may be initiated only when the provider telephones the MDHHS designee on the date the provider conducted a valid online LOCD and requests the LOC Exception Review on behalf of the LOCD ineligible beneficiary. The Nursing Facility LOC Exception Criteria is available on the MDHHS website. A beneficiary needs to trigger only one of the LOC Exception criteria to be considered as eligible under the Exception Review.

5.1.D.3. TELEPHONE INTAKE GUIDELINES

The Telephone Intake Guidelines are questions that identify potential medically/ functionally eligible beneficiaries. The Telephone Intake Guidelines do not determine program eligibility. Use of the Telephone Intake Guidelines is at the discretion of the nursing facility. This document is available on the MDHHS website.
5.1.D.4. ONGOING ASSESSMENTS

The nursing facility must ensure that residents continue to meet the Michigan Medicaid Nursing Facility LOC Determination criteria on an ongoing basis in order for services to be reimbursed by Medicaid. Quarterly and annual Minimum Data Set (MDS) assessments and progress notes must demonstrate that the resident has met the criteria on an ongoing basis.

5.1.D.5. RETROSPECTIVE REVIEW AND MEDICAID RECOVERY

At random and whenever indicated, the MDHHS designee will perform retrospective reviews to validate the Michigan Medicaid Nursing Facility LOC Determination and the quality of Medicaid MDS data overall. The provider must submit all medical documentation requested by the MDHHS designee. If the resident is found to be ineligible for nursing facility services, MDHHS will recover all Medicaid payments made for nursing facility services rendered during the period of ineligibility.

If a provider, upon receipt of an adverse LOCD retrospective review notice from the MDHHS designee, conducts a subsequent LOCD to redetermine the beneficiary's LOCD eligibility for the purpose of re-establishing Medicaid reimbursement, the provider may request the subsequent LOCD be audited through the MDHHS retrospective review process. This additional audit applies only to an LOCD conducted subsequent to receipt of an adverse retrospective review notice of LOCD ineligibility from a given date forward (in continuance) for the same beneficiary, during the same stay, with the same provider.

5.1.D.6. ADVERSE ACTION NOTICE

When the provider determines that the beneficiary does not qualify for services based on the Michigan Medicaid Nursing Facility LOC Determination, and the provider does not contact the MDHHS designee to request the Nursing Facility LOC Exception process on behalf of the beneficiary, the provider must immediately issue an adverse action notice to the beneficiary or his authorized representative. The provider must also offer the beneficiary referral information about services that may help meet his needs. The action notice must include all of the language of the sample letters for long term care. These letters are available on the MDHHS website.

The Medicaid financially eligible beneficiary or the Medicaid financially pending beneficiary may request an administrative hearing for a Medicaid benefit denial. The Michigan Administrative Hearing System (MAHS) Policy and Procedures Manual explains the process by which each different case is brought to completion. The manual is available for review on the MDHHS website. (Refer to the Directory Appendix for contact information for MAHS.)

When a beneficiary appeals an adverse action notice to MAHS, the facility must notify MDHHS LTC Services of the hearing. (Refer to the Directory Appendix for contact information.) Both a facility representative and an MDHHS LTC Services representative must be present at the hearing.
Immediate Review-Adverse Action Notices

The MDHHS designee may conduct an Immediate Review only for a Medicaid pending or a Medicaid eligible beneficiary who was determined medically/functionally ineligible based on a valid web-based Michigan Medicaid Nursing Facility LOC Determination. The MDHHS designee may not conduct an Immediate Review for private pay residents. The MDHHS designee will conduct an Immediate Review of preadmission or continued stay adverse action notices upon request by a Medicaid pending or Medicaid eligible beneficiary or their representative only when the beneficiary or their representative requests an Immediate Review before noon of the first business day after the date of receipt of the notice as follows:

- The MDHHS designee will request that the nursing facility provide medical documentation by close of business of the first business day after the date the beneficiary or their representative requests an Immediate Review.
- The MDHHS designee will review the medical documentation, obtain information from the Medicaid-eligible/Medicaid-pending beneficiary and/or their representative and notify the beneficiary or their representative and the provider of the determination within three business days of receipt of the medical documentation.
- Only a Medicaid pending or Medicaid eligible beneficiary or their representative may request an MDHHS hearing based on a LOCD denial.
- Medicaid pending or Medicaid eligible beneficiaries may contact the MDHHS designee to request an Immediate Review. (Refer to the Directory Appendix for contact information.)

5.1.E. FREEDOM OF CHOICE

When a Medicaid-pending or Medicaid-eligible beneficiary has qualified for services under the LOCD criteria, the computer-generated FOC form lists LTC service options. The computer-generated form must be printed hard copy, and the beneficiary must choose and note on the form the services they choose to receive. This election must take place prior to initiating nursing facility services under Medicaid.

The applicant (or representative) must be informed of services available through:

- Medicaid-reimbursed nursing facilities
- The MI Choice program
- The Program of All-Inclusive Care for the Elderly (PACE) program, where available.

If applicants are interested in community-based care, the nursing facility must provide appropriate referral information as identified in the Access Guidelines to Medicaid Services for Persons with Long Term Care Needs. The guidelines are available on the MDHHS website. Applicants who prefer a community long term care option, but are admitted to a nursing facility because of unavailable slots or other considerations, must also have an active discharge plan documented for at least the first year of care.

Applicants must acknowledge that they have been informed of their program options in writing by signing the computer-generated Freedom of Choice form. If the applicant has
a legal representative, the legal representative must sign the computer-generated Freedom of Choice form. The health professional conducting the Michigan Medicaid Nursing Facility LOC Determination must also sign and date the form. The completed form (i.e., signed and dated) must be kept in the medical record if the applicant chooses to receive nursing facility services. A copy of the completed form for non-admissions must be retained for a period of three years. A copy of a non-computer generated Freedom of Choice form is available on the MDHHS website.

5.2 Appeals

5.2.A. Individual Appeals

5.2.A.1. Financial Eligibility

A determination by MDHHS that a Medicaid financially pending beneficiary is not financially eligible for Medicaid is an adverse action. The Medicaid financially ineligible beneficiary may appeal a determination of Medicaid financial ineligibility to MDHHS.

5.2.A.2. Medical/Functional Eligibility

A determination by the web-based Michigan Medicaid Nursing Facility LOC Determination that a Medicaid financially pending or Medicaid financially eligible beneficiary is not medically/functionally eligible for nursing facility services is an adverse action. If the Medicaid financially pending or Medicaid financially eligible beneficiary or their representative disagrees with the determination, he has the right to request an administrative hearing before an administrative law judge. Information regarding the appeal process is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

5.2.B. Provider Appeals

A Retrospective Review of the Michigan Medicaid Nursing Facility Level of Care Determination that results in a denial is an Adverse Action for the nursing facility when MDHHS proposes to recover payments made for services rendered to the beneficiary for whom the Retrospective Review was conducted. If the facility disagrees with the MDHHS Adverse Action Notice, the facility may appeal if their written request is date-stamped as ‘RECEIVED’ by the MDHHS Michigan Administrative Hearing System office or the MDHHS Appeals Section office within 30 calendar days from the date of the MDHHS Adverse Action Notice.

Information regarding the MDHHS appeal process is available in the General Information for Providers Chapter and on the MDHHS website. (Refer to the Directory Appendix for website information.)

5.3 Admission Process

Prior to or upon admission, the nursing facility must provide beneficiaries and their representatives the following information. The information must be provided both orally and in a written language that the beneficiary understands. Beneficiaries must be provided copies of those items noted with an asterisk (*).
• Rights as identified in federal regulations;
• All rules and regulations governing beneficiary conduct and responsibilities during their stay in the facility; *
• Rights as a Medicaid beneficiary and a list of Medicaid-covered services (services for which the resident may not be charged) as published in the Medicaid "Know Your Rights" booklet; *
• Noncovered items and services, as well as the costs, for which the beneficiary may be charged (admission to a facility cannot be denied because the beneficiary is unable to pay in advance for noncovered items/services); *
• Facility policies regarding protection and maintenance of personal funds; *
• A description of the facility’s policies to implement advance directives; *
• Facility policies regarding the availability of hospice care; *
• The name, specialty and contact information of the physician responsible for their care;
• Information about how to apply for Medicare and Medicaid; * and
• How to file a complaint.

Facilities must notify residents and their representatives (both orally and in a written language that the beneficiary understands) of any changes to the information listed above.

Receipt of the above information and any amendments must be acknowledged, in writing, by the beneficiary or his representative. Individual facilities may develop their own documentation for this process.

5.4 PREADMISSION CONTRACTS

Nursing facilities must abide by all state and federal regulations regarding preadmission contracts.

Nursing facilities are prohibited from requiring a Medicaid-eligible person or a Medicaid beneficiary, his family, or his representative to pay the private-pay rate for a specified time before accepting Medicaid payment as payment in full. Nursing facilities violating this prohibition are subject to the appropriate penalties (i.e., revocation of their Medicaid provider agreement).
**SECTION 6 – MEDICAL RECORDS**

Nursing facilities are required to maintain a medical record for all residents as outlined in State and Federal statutes and regulations.

Nursing facilities are required to comply with all State and Federal requirements regarding medical record confidentiality, including compliance with all Health Insurance Portability and Accountability Act (HIPAA) requirements regarding privacy.

Nursing facilities must maintain all resident assessments completed within the previous 15 months in the resident’s active record. Facilities with a “paperless” system in which clinical records are electronically maintained must be able to produce a paper copy if requested for record review by State surveyors.

Nursing facilities must respect the resident’s access to their medical records as required by State and Federal laws and regulations.
SECTION 7 – CARE PLANNING PROCESS

Nursing facility care planning is a continuous and ongoing process of assessment, planning, evaluation, and revision. The purpose of the care planning process is to gather information from a variety of sources, and develop a written strategy to insure that the resident receives services and supports necessary to attain or maintain the highest practical physical, mental, and psychosocial well-being.

Sources of information to support care planning include the resident, his family and friends, physicians, specialists, nurses, nurse aides, dietitians, therapists and assessment tools (including the Minimum Data Set [MDS] for Nursing Facility Resident Assessment and Care Screening). A comprehensive plan identifies and addresses all aspects of the resident's health and well-being (physical/medical, emotional, mental, spiritual), not just those services that will be provided by the facility or covered by insurance.

Using the principles and essential elements of person-centered planning, facilities are expected to involve residents and their designated support system throughout the entire process.

7.1 PERSON-CENTERED PLANNING

Person-centered planning is an ongoing process that recognizes the worth and dignity of each individual and his ability to choose how supports, services and/or treatment may be used to improve his life. The following principles apply:

- **Participation in planning** - Each individual has unique strengths, abilities and preferences and is able to express preferences and make choices. Each individual can participate in planning his life, with appropriate support if needed.

- **Support for planning** - People trusted by the individual and committed to supporting the individual’s choices must be involved in planning for long-term care. The process is dependent on the participation of supportive relationships, such as family members and friends, and encourages their involvement, to the extent that the choices of the individual are reflected. These relationships support the individual's right to choose, even the right to take risks.

- **Outcome orientation** - Person-centered planning is outcome-oriented. The planning should lead to positive outcomes in the individual’s life, i.e., helping to attain or maintain the highest practicable physical, mental, and psychosocial well-being. The individual determines what constitutes a positive outcome. For a younger adult with a disability, this may include building a career. For an older person near the end of life, the positive outcomes may include deciding where one dies and who is present.

Evidence of person-centered planning includes:

- An assessment process that offers the opportunity for gathering information concerning each resident’s preferences, personal goals, needs and abilities, health status, and other available supports. This information should be used in developing an individualized plan of care. The individual's life plans should give direction to plans with service providers, such as discharge planning from nursing facilities into community-based settings. Nursing facilities should not exclude residents in the care planning process in order to meet facility requirements for writing care plans, obtaining signatures, and so forth.

- An assessment process that includes input from professionals and others chosen by the individual. In addition to the professionals required to participate in care planning, individuals should have support for making informed choices about the additional people and professionals...
they invite to their person-centered planning meetings. For example, federal guidelines require an interdisciplinary team that includes a registered nurse who has responsibility for caring for the resident and prepares care plans. In addition, the resident may choose to invite a favorite nurse aide and a former neighbor/caregiver to participate in care planning.

- A plan of care that comprehensively addresses each individual’s need for health care and other services in accordance with the individual’s preferences and goals.
- Services delivered in accordance with the individualized plan of care.
- Informed choice, which includes, but is not limited to, choosing among covered services and enrolled service providers, decisions about the planning process, and evaluation of the planning and its outcomes. Informed choice means knowing the options in ways that are meaningful to the individual and having information when it is useful, not only at admission, but throughout the care process.
- Support for informed choice, which requires an organizational commitment to provide information and/or experiences that sufficiently inform an individual of their options. This commitment should be met through multiple and flexible means of providing information. These might include alternative forms of communication (e.g., Braille, sign language, audio-recorded documents), hands-on experiences with options, peer support from experienced participants, and so forth.

7.2 ASSESSMENT

In collaboration with the resident and individuals identified by the resident, appropriate facility staff must assess residents regularly and as needed to identify their preferences, wishes, goals, outcomes, capabilities, and medical and psychosocial needs. Nursing facilities should use assessment tools that are accessible (e.g., large print, verbal, appropriate language, etc.) to residents and individuals identified by the resident.

Assessment tools must include, but are not limited to, the Minimum Data Set (MDS) for Nursing Facility Resident Assessment and Care Screening. Nursing facilities are expected to use assessment tools and methods that accommodate the needs and preferences of individuals (e.g., mental health assessment tools, self-assessment tools in large print, etc.).

7.3 MINIMUM DATA SET (MDS)

Nursing facilities must conduct a comprehensive, accurate, standardized, and reproducible assessment of each resident’s functional capacity. The use of the current federally specified Resident Assessment Instrument (RAI), which includes the MDS, Care Area Assessment (CAA) process, and utilization guidelines, is mandatory. Michigan has made a determination not to have a state-specific Section-S, but reserves the right to develop and require its data collection as need arises.

The MDS assessment must be conducted:

- Promptly upon admission, but no later than 14 days of admission;
- Promptly after a significant change in the resident’s physical or mental condition or within two weeks, whichever is sooner; and
- Not less than once every twelve months.
The facility must examine each resident once every three months, revising the assessment as appropriate to ensure its continuing accuracy.

Results of the MDS assessment must be used, in addition to other information gathered and in collaboration with the resident, for developing, reviewing, and revising the resident’s plan of care. The assessment must be maintained in the resident’s medical record and kept confidential.

**NOTE:** The Michigan Medicaid MI Choice Waiver Agencies are the designated Local Contact Agency (LCA) relative to Section Q of the MDS. (Refer to the Directory Appendix for contact information.)

Each MDS assessment must be conducted or coordinated (with the appropriate participation of other health professionals) by a licensed, registered nurse who signs and certifies the completion of the assessment. Each person who completes a portion of the assessment must sign and certify the accuracy of that portion. Data accuracy resides with the nursing facility as the source of the data.

A facility must electronically transmit to the State, at least monthly, encoded, accurate, complete MDS data for all assessments conducted since the previous transmission. A facility that fails to transmit electronic RAI data to the State is considered out of compliance and, therefore, subject to enforcement actions. (Refer to the Nursing Facility Certification, Survey and Enforcement Appendix of this chapter.)

An individual who willfully and knowingly certifies a material and false statement, or causes another individual to do so, is subject to a civil money penalty.

Questions about the Resident Assessment Instrument should be directed to the Department of Licensing and Regulatory Affairs, Bureau of Community and Health Systems (BCHS), RAI Coordinator. (Refer to the Directory Appendix for contact information.)

Federal regulations require that facilities coordinate the PASARR process and MDS. MDHHS recommends that nursing facility administrators establish mechanisms to track completion dates of PAS and ARR evaluations so that, to the maximum extent practicable, they are coordinated with resident assessments and completion of the MDS.

### 7.4 Preadmission Screening/Annual Resident Review (PASARR)

The Preadmission Screening and Annual Resident Review (PASARR) must be completed for all individuals seeking to enter a nursing facility regardless of payer source. Although not federally mandated, Michigan has elected to require the Annual Resident Review (ARR) for all residents in Medicaid-certified nursing facilities regardless of payer source.

The purpose of the PASARR process is to encourage community care by supporting the placement of individuals with Mental Illness (MI) or Intellectual Disability (ID) or having a related condition in a nursing facility only when their medical needs clearly indicate that they require the level of care provided by a nursing facility. For individuals with mental illness or an intellectual disability or having a related condition, the PASARR process ensures the appropriate determination of the need for nursing facility services and the need for specialized services. The PASARR process also includes an appeals system for individuals who wish to dispute a PASARR determination.
Screening and evaluations performed under PASARR and all PASARR notices must be adapted to the cultural background, language, ethnic origin, and means of communication used by the individual being evaluated.

(Refer to the PASARR Process section of this chapter for additional information.)

7.5 PLAN OF CARE

Nursing facilities are required to provide services and activities to attain or maintain the highest practicable physical, mental, and psychosocial well being of each resident. A written individualized plan of care must be developed in the context of a person-centered planning process in order to specify services and activities, and to accommodate individual needs and preferences. The plan outlines the goals, strengths and needs of the resident and how these will be addressed. A comprehensive plan identifies and addresses all aspects of the resident’s health and well being (physical/medical, emotional, mental, spiritual), not just those services that will be provided by the facility or covered by insurance. The plan also identifies the resident’s wishes and capabilities regarding the potential of relocation to a lesser level of care and includes discharge planning.

The comprehensive plan of care must be developed with direct involvement of:

- The beneficiary, family and/or his/her representative;
- The attending physician;
- An RN who has assessed the beneficiary, or who is familiar with the assessment;
- Other appropriate staff disciplines; and
- Any other trusted individuals that the beneficiary might wish to include.

Medicaid requires that a nursing facility ensure that a licensed physician supervises a beneficiary’s medical care. The physician must review the entire individualized plan of care on an on-going basis. The entire plan of care may include sections for:

- Nursing care;
- Rehabilitative services (if required);
- Medication;
- Treatment;
- Restorative services;
- Diet;
- Activities;
- Special plans for health and safety;
- Continuing care, measurable objectives and timetables;
- Discharge (as appropriate); and
- Mental health services.

All services rendered must be documented and consistent with the written individualized plan of care.
7.6 Evaluation/Re-assessment/Plan Revision

Care planning is a continuous and ongoing process that requires regular re-assessment and revision of the plan of care. Federal guidelines require that the facility examine each resident not less than once every three months, and revise the resident’s assessment as appropriate to ensure its continuing accuracy. Re-assessment should also occur with significant changes in the resident’s condition and at the request of the resident or his representative. Once the re-assessment is completed, the current plan should be evaluated and revised to meet current goals and needs.
SECTION 8 – PASARR PROCESS

Pre-admission Screening/Annual Resident Review (PASARR) in Michigan is a two-level screening and evaluation process. The Level I screening and Level II evaluation procedures and forms are the same for Pre-admission Screening (PAS) and Annual Resident Review (ARR). The forms may be obtained from the MDHHS website.

The PASARR process must be completed:

- Prior to admission to a nursing facility;
- Promptly after a significant change in a resident’s physical or mental condition; and
- Not less than annually.

The PASARR process is not required in the following situations:

- When an individual is admitted to an Intermediate Care Facility for Individuals with Intellectual Disabilities (ICF/IID).
- When an individual is admitted to and resides in a hospital swing bed. However, the PASARR process must be completed prior to admission if the individual transfers to a nursing facility.
- When an individual is readmitted to a nursing facility after a hospital stay. If the Annual Resident Review date occurs during a period of hospitalization, the screening must be completed within 30 days of admission or readmission to the nursing facility.
- For an individual transferring from one nursing facility to another, with or without an intervening hospital stay, unless a Level I screen has not been performed previously. If a Level I screening or Level II evaluation has been completed, the screening evaluation should accompany the beneficiary to the receiving nursing facility.
- For an individual returning to the nursing facility from therapeutic leave, unless the resident’s condition has changed. Therapeutic leave does not change the due date for Annual Resident Review. Advance planning may be necessary to ensure timeliness of review.
- A beneficiary receiving Medicaid hospice services (Benefit Plan ID of Hospice) entering a nursing facility for the five-day hospice respite benefit. A Level I screening must be completed if the beneficiary enters the facility for a length of time beyond the five-day respite period.

The purpose of the Level I screening is to identify individuals who may have a mental illness or intellectual disability or have a related condition. If the patient is on antipsychotic or antidepressant medications for purposes of pain control/symptom relief for end of life, note that information on the DCH-3877. This allows the Community Mental Health Services Program (CMHSP) to better evaluate the need for Level II screening. If the patient is on any of the above mentioned psychotropic medication groups for a related mental illness, the CMHSP will determine the need for Level II screening.

- An individual assessed by adult protective services, requiring protective services, may be granted provisional admission to a nursing facility pending further assessment due to this emergent situation. Placement in a nursing facility is not to exceed seven (7) days.
The following table outlines screening requirements.

<table>
<thead>
<tr>
<th>Screening Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Pre-Admission Screening (PAS)</strong></td>
<td>A Level I screening is required for all individuals seeking to enter a nursing facility regardless of payer source, except as noted above. The Level I screening, and the Level II evaluation when indicated, must be completed prior to admission to a nursing facility.</td>
</tr>
<tr>
<td><strong>Annual Resident Review (ARR)</strong></td>
<td>All residents in Medicaid-certified nursing facilities must be reviewed at least annually to determine if the resident is in need of mental health services and/or continued nursing care. Annually means within every fourth quarter after the previous Level I screening or Level II evaluation, whether it was completed for admission, condition change, or annual review. The Level I screening must be completed for all residents, and a Level II evaluation must be performed if indicated. If a resident was hospitalized when an ARR was due, the Level I screening must be completed within 30 days of readmission, and any subsequent Level II evaluation must be completed within the quarter following readmission to the nursing facility.</td>
</tr>
<tr>
<td><strong>Change in Condition</strong></td>
<td>A Level I screening must be completed immediately or, at most, within 14 days when there is a significant change in the resident's mental health, or a physical change that may impact the resident's mental health needs. Federal regulations define a &quot;significant change&quot; as a major decline or improvement in the resident's status that will not normally resolve itself without further intervention by staff or by implementing standard disease-related clinical interventions, that has an impact on more than one area of the resident's health status, and requires interdisciplinary review or revision of the care plan or both. Changes to the Minimum Data Set (MDS), Section E (indicators of depression, anxiety, mood) would indicate a significant change for PASARR purposes. The nursing facility must notify their local CMHSP via a DCH-3877 for a Level II evaluation.</td>
</tr>
<tr>
<td><strong>30-Month Rule</strong></td>
<td>During the PASARR process, a nursing facility resident may be identified as no longer in need of nursing services but in need of specialized services. In this situation, if the resident has lived in a nursing facility for 30 continuous months, the CMHSP must advise the individual of their options, which may include community placement with specialized services or continued residence in the nursing facility with specialized services. Under these circumstances, no appeal needs to be filed in order to maintain nursing facility residency. The individual's status as a long-term resident must be evident in their nursing facility medical record. Individuals determined to need specialized services, who have resided in a nursing facility for less than 30 months, and who are found to no longer need nursing services must be assisted to transition to a more appropriate setting.</td>
</tr>
<tr>
<td><strong>Borton vs. Califono Transfer Trauma</strong></td>
<td>Transfer trauma protections apply to individuals with mental illness or intellectual disability who were determined during a PASARR Level II evaluation to not need nursing facility services.</td>
</tr>
</tbody>
</table>

### 8.1 Level I Screening

The purpose of the Level I Screening is to identify individuals who may have a mental illness or intellectual disability or have a related condition. Level I Screening is documented on the "Preadmission Screening (PAS)/Annual Resident Review (ARR) (Mental Illness/Intellectual Disability/Related Conditions Identification)" form (DCH-3877). (Refer to the Forms Appendix for a sample form.) The DCH-3877 must be completed and signed by a registered nurse, licensed Bachelor's or Master's Social Worker, licensed professional counselor, psychologist, physician's assistant, nurse practitioner or physician.
The professional who completes the Level I Screening must provide a copy of the DCH-3877 to the prospective nursing facility resident or their legal representative. Notification must also be adapted to the cultural background, language, ethnic origin and means of communication of the person being evaluated. (For the distribution of forms and documentation, refer to the Distribution of PASARR Documentation subsection later in this section.)

The following table contains a list of psychopharmacological drugs that may indicate the presence of a mental illness. Included are examples of anti-depressant and anti-psychotic medications. The list is not meant to be all-inclusive.

8.2 LEVEL II EVALUATION

The purpose of the Level II Evaluation is to assess individuals who are identified as having a mental illness or intellectual disability or as having a related condition to determine the need for nursing facility services, specialized services, and/or mental health services. All individuals identified by Level I screening as possibly having a mental illness or intellectual disability or having a related condition (a “yes” response to any question on the Level I screening form, DCH-3877) must receive a Level II evaluation, unless it is
documented that they meet one of the exemption criteria outlined in the next subsection, or the MDHHS/CMHSP finds that the individual does not meet the criteria for a serious mental illness under the PASARR provisions. The CMHSP is responsible for providing the nursing facility and the individual and/or legal representative with written documentation that the individual does not meet the PASARR criteria for a serious mental illness. If the individual is seeking admission to a nursing facility, the Level II evaluation, when indicated, must be completed prior to admission.

8.3 LEVEL II EVALUATION EXEMPTION

If the individual qualifies for an exemption to the Level II evaluation based on the criteria outlined below, the DCH-3878, "Mental Illness/Intellectual Disability/Related Condition Exemption Criteria Certification" form must be completed. (Refer to the Forms Appendix for a sample form.) The DCH-3878 may be completed by a registered nurse, licensed Bachelor's or Master's Social Worker, licensed professional counselor, psychologist, physician's assistant, nurse practitioner, or physician and must be signed by a physician's assistant, nurse practitioner, or a physician.

Exemptions to the Level II evaluation may be requested based on the following criteria:

- The individual is in a coma. If the individual is in a coma at the time the Level II evaluation is to be performed, the individual may be exempted from the Level II evaluation process. A physician must certify that the individual is in a coma. The individual may then be admitted to the nursing facility without a Level II evaluation. When the individual is no longer in a coma, the nursing facility must complete a Level I screening and refer for a Level II evaluation, if indicated.

- The individual has a primary diagnosis of dementia (such as Alzheimer's disease or another dementing illness). An exemption due to dementia cannot be claimed for any individual who is also identified as having an intellectual disability or having a related condition, or for any individual with another primary psychiatric diagnosis. For example, an individual diagnosed with dementia and a primary diagnosis of depression may not be exempted. A physician's assistant, nurse practitioner or physician must certify that the individual meets the clinical criteria for dementia and does not have another primary psychiatric diagnosis, intellectual disability, or a related condition.

- The individual is convalescing after hospitalization for an acute illness and meets all of the following conditions:
  - The individual will be admitted to a nursing facility directly from a hospital after receiving acute inpatient care at the hospital. Treatment in an emergency room is not considered a hospital stay. An individual who received inpatient treatment in a psychiatric facility cannot be admitted to a nursing facility claiming this exemption, nor can an individual who comes directly from home or any other community placement.
  - The individual requires nursing facility services for the condition for which they received care in the hospital.
  - The attending physician, physician's assistant, or nurse practitioner has certified before admission to the nursing facility that the individual is likely to require less than 30 days nursing facility services.

Medicaid approves payment for a hospital discharge/convalescent care stay up to 30 days only. If the individual needs nursing care beyond 30 days, the nursing facility must notify the local CMHSP at least...
five working days before the end of the 30-day stay that a Level II evaluation is needed. The local CMHSP completes the Level II evaluation within 14 days of the date of notification and forwards the evaluation to MDHHS. The entire determination process must be completed within 40 days of the individual’s admission from the hospital. If MDHHS determines that the individual no longer requires nursing facility services, Medicaid reimburses up to five days beyond the date of the determination to allow for appropriate discharge planning. It is expected that a nursing facility will begin discharge planning for residents at the time of admission from the hospital and discontinue this planning only when a determination is made that the resident will not be discharged from the nursing facility.

The person completing the Level II evaluation exemption must provide a copy of the DCH-3877 to the prospective nursing facility resident or their legal representative. Notification must also be adapted to the cultural background, language, ethnic origin and means of communication of the person being evaluated. (Refer to the Distribution of PASARR Documentation subsection of this chapter for additional information.)

8.4 LEVEL II EVALUATION COMPLETION

Individuals who are identified at the Level I screening as having a mental illness or intellectual disability or having a related condition, and who do not meet exemption criteria outlined previously, must be referred to the local CMHSP for a Level II evaluation. Level II evaluations are conducted by mental health professionals through the local CMHSP under contract with MDHHS. The evaluation involves an interview with the individual, review of medical records, and consultation with nursing facility and/or hospital staff. The mental health professional must conduct the Level II evaluation in accordance with the MDHHS OBRA Operations Manual. A copy of this manual may be requested from the MDHHS OBRA Office or the local CMHSP.

When a Level II Evaluation is required, it must be completed prior to nursing facility admission.

When a Level II evaluation is indicated for an Annual Resident Review (ARR), the nursing facility must notify the local CMHSP of the need for the Level II evaluation at least 30 days prior to the due date of the ARR by sending them a new DCH-3877 (Level I screening form). For example, if the initial Level II evaluation was completed on April 15, 2004, the ARR is due April 15, 2005, and the facility must notify the local CMHSP that a new Level II is due by March 15, 2005. The local CMHSP is responsible for timely completion of Level II evaluations and for providing facilities with written documentation of PASARR determinations in a timely manner.

Once completed, the CMHSP forwards all documentation of the Level II evaluation to MDHHS. Based on this documentation, MDHHS determines whether the individual requires nursing facility services or can be served in an alternate setting. MDHHS also determines whether specialized services or other mental health services are needed to treat the individual’s mental illness or intellectual disability.

The MDHHS decision regarding the need for nursing facility services and the need for specialized services is forwarded to the referring CMHSP. It is the responsibility of the CMHSP to explain the evaluation and determination to the individual and his legal representative. The CMHSP must provide a copy of the evaluation and the MDHHS determination letter to the individual and his legal representative, and explain the appeal rights to the individual and their legal representative. This information must also be adapted to the cultural background, language, ethnic origin and means of communication of the individual being evaluated.
The local CMHSP notifies the attending physician, nursing facility, and discharging hospital of the results of the evaluation and the MDHHS determination in writing within five (5) days of the review. A copy of this notification must be retained in the individual’s record. (Refer to the Distribution of PASARR Documentation subsection of this chapter for additional information.)

Given that all other admission criteria outlined in this chapter are met, a nursing facility may admit an individual on the basis of a verbal Pre-admission Screening determination from MDHHS. This determination may be communicated to the nursing facility by the CMHSP.

If the facility does not receive a written determination as follow-up to a verbal determination within 30 days of an admission, the facility must send a written reminder to the CMHSP and the MDHHS OBRA Office within 45 days of the admission. (Refer to the Directory Appendix for contact information.)

The nursing facility is responsible for verifying that required PAS and ARR processes are completed and documented in the resident’s record. The nursing facility medical record must include the determinations of the level of care, the need for specialized services, the original DCH-3877 and DCH-3878 forms, and the Level II evaluation report and supporting documents.

8.5 DISTRIBUTION OF PASARR DOCUMENTATION

The following chart shows the correct distribution of copies of PASARR forms (DCH-3877, DCH-3878) and Level II evaluation documentation. All originals must be fully completed and signed.

8.6 COMPLIANCE

Failure of a nursing facility to comply with OBRA PASARR requirements will result in the loss of Medicaid reimbursement to the facility for services provided for that resident for any period during which a correct and timely screening or review was not completed for that resident. A claim should not be submitted for dates of services provided during periods for which required Pre-admission Screening or Annual Resident Review has not been completed.

The resident or parties responsible for the resident cannot be charged for the loss of reimbursement caused by the facility's failure to meet PASARR requirements.

The Level I screening is considered completed when the DCH-3877 has been filled out, signed, and distributed or, if exemption criteria are met, both the DCH-3877 and DCH-3878 have been filled out, signed, and distributed. The Level II evaluation process is completed when the CMHSP has completed the evaluation and the individual has been notified of the MDHHS determination.

For a screening or evaluation to be correct, the completed forms must contain information consistent with documentation in the resident’s nursing facility medical record.

Compliance is monitored through the survey process, complaint investigations, and audits. Retrospective payment adjustments through interim gross adjustments and/or final settlements are made to recover funds as necessary. A nursing facility is not penalized for failures to meet PASARR provisions for which it is not responsible and/or could not prevent.

8.7 APPEALS OF PASARR DETERMINATIONS

Individuals adversely affected by PASARR determinations may appeal the determination or another person may appeal the determination on their behalf. Examples may include the determination that the individual no longer requires specialized services when they have received those services in the past and wish to continue. An individual may decline nursing facility admission or specialized services without appeal.

Information regarding the MDHHS administrative hearing (appeal) process is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

8.8 COMPLAINTS

Complaints or concerns regarding a nursing facility's implementation of the PASARR regulations should be directed to the Health Facility Complaint Line. (Refer to the Directory Appendix for contact information.)

Complaints or concerns about local CMHSP implementation of PASARR policy should be sent to the MDHHS OBRA Office. (Refer to the Directory Appendix for contact information.)
SECTION 9 – MEDICAID COVERED AND NON-COVERED SERVICES

Determination of medical necessity and appropriateness of Medicaid services is the responsibility of the attending physician (MD or DO) and is subject to MDHHS review. Services must be within the scope of currently accepted medical practice, limitations of the Medicaid Program, and State and Federal requirements.

9.1 MEDICARE-COVERED SERVICES

For Medicare Part B covered services, MDHHS only pays up to a Medicare-enrolled beneficiary's obligation to pay (i.e., coinsurance and deductibles) or the Medicaid fee screen, whichever is less. In addition, Medicaid covers the coinsurance and deductible amounts on any Medicare-covered service not normally covered by Medicaid.

Medicaid co-insurance payments for Part A are the lower of the co-insurance charge or the current maximum co-insurance rate established under the formula stated in the Social Security Act. The facility's total payments from Medicare, Medicaid and other insurance may be up to, but cannot exceed, the amount established by Medicare as reasonable (i.e., the amount allowed by Medicare).

If the beneficiary has a Medicare benefit available, that benefit must be utilized before Medicaid pays any portion of the claim. If a beneficiary who has Medicare coverage is receiving services under CMHSP or PIHP capitation, the PIHP/CMHSP assumes the MDHHS payment liability described in this section.

For Medicare coinsurance days billed to Medicaid, the beneficiary may be in either a Medicare certified or Medicare/Medicaid dually certified bed.

Prior authorization is not required for billing the Medicare deductible and coinsurance amounts, even if the service would require prior authorization if Medicaid were the payer. However, if the facility is uncertain of Medicare coverage, prior authorization from Medicaid should still be obtained. This allows the facility to render the service, bill Medicare and then, if appropriate, bill Medicaid for its share of the service. If Medicare Part B covers an item or service that is included in the Medicaid per diem, the nursing facility is responsible for any coinsurance or deductible, even when billed by an ancillary provider.

Services for which Medicare has made a payment may not be used to offset the patient-pay amount.

If a beneficiary has Medicare Part B coverage, and Medicare does not cover a service, Medicaid considers the service to be included in the Medicaid reimbursement for routine nursing care.

9.2 MEDICARE DENIAL OF BASIC CARE

Medicare covers only skilled care. Medicaid covers both basic and skilled care. In the event a dually eligible Medicare/Medicaid beneficiary requires basic care, Medicaid will cover the service if all other admission criteria are met (e.g., physician order for nursing facility care and beneficiary meets the Medicaid Nursing Facility LOC Determination for NF care).
9.3 MEDICAID REIMBURSEMENT FOR A NURSING FACILITY BED FOLLOWING A QUALIFYING MEDICARE HOSPITAL STAY

A dually eligible beneficiary who resides in a Medicaid-only certified bed and is admitted to a hospital for acute care services may be eligible for Medicare-reimbursed Skilled Nursing Facility (SNF) benefits at the time of hospital discharge. If that beneficiary wants to return to the Medicaid NF bed he originally occupied, he may refuse his Medicare SNF benefit and Medicaid will reimburse for all medically necessary nursing facility days and other medically necessary services. The days billed to Medicaid must be included in the Medicaid census statistics.

The nursing facility must advise beneficiaries of their right to refuse their Medicare SNF benefit in order to return to their Medicaid NF bed. This notice must be in a manner that the beneficiary, family member, or beneficiary’s legal representative can understand or have clearly explained to them as needed.

9.3.A. REQUIRED DOCUMENTATION

The facility must maintain, in the beneficiary’s clinical and fiscal record, documentation that supports the beneficiary made the choice to forego Medicare-reimbursed services and return to his Medicaid-only certified bed. This documentation must be signed and dated by the beneficiary (or his authorized representative) and a nursing facility representative.

9.3.B. MEDICARE PART B

Required outpatient physical or occupational therapy, or outpatient speech pathology for NF beneficiaries must be provided and billed under Medicare Part B where applicable, even if no payments are made under Medicare Part A for the nursing facility stay.

9.4 OTHER INSURANCE

Many Medicaid beneficiaries have insurance coverage (either traditional health insurance or an HMO) through private and/or employer-based commercial policies. That insurance is always primary, and the rules of that insurer must be followed. This includes, but is not limited to, prior authorization requirements, qualifications of providers, and providing services through the insurer's provider network. MDHHS does not pay for services denied by the primary insurer because the primary insurer's rules were not followed.

MDHHS pays appropriate copays and deductibles up to the beneficiary's financial obligation to pay or the Medicaid fee screen, whichever is less. If the primary insurer has negotiated a rate for a service that is lower than the Medicaid fee screen, MDHHS cannot be billed more than the negotiated rate. Medicaid-covered services not included in the primary insurer's plan are reimbursed by MDHHS up to the Medicaid fee screen if all MDHHS coverage rules are followed. If a beneficiary with other insurance coverage is enrolled in a MHP or is receiving services under CMHSP or PIHP capitation, the MHP/PIHP/CMHSP assumes the MDHHS payment liabilities described in this section.
9.5 Payment for Non-Covered Services

For necessary medical or remedial care recognized under State law but not covered by the Medicaid Program, the Medicare Catastrophic Coverage Act of 1988, Public Law 100-360, allows nursing facility beneficiaries to access their patient-pay amount to pay for these services. The services would include services rendered by providers not enrolled in the Medicaid program. The offset to the patient-pay amount must be reported for the month that services were provided. If Medicare covers the medical service, then Medicaid will continue to cover the Medicare deductible and coinsurance in the event it does not exceed the Medicaid fee screen.
**SECTION 10 - MEDICAID SERVICE DESCRIPTIONS**

The following table outlines those services that are included in the facility’s per diem rate or are an ancillary service that may be provided to beneficiaries in a nursing facility. Following the table is a more detailed description of each service.

The nursing facility should contact the ancillary provider or Medicaid Provider Inquiry Line to confirm Medicaid coverage of ancillary services.

All services required as a condition of licensure/certification are included in the per diem rate.

### 10.1 Administrative Services

Nursing facilities must be administered in a manner that effectively and efficiently uses its resources to attain or maintain the highest practicable physical, mental and psychosocial well-being of each resident in compliance with all applicable State and Federal licensure and certification laws, codes and regulations. Services rendered in the general administration of the facility are included in the facility’s per diem rate. Services include, but are not limited to:

- Arranging appointments;
- Building, equipment, and grounds maintenance;
- Development, adoption, and posting of patient rights;
- Development of disaster plans;
- Development of patient councils;
- Infection control;
- Insect and vermin control;
- Management of patient trust funds;
- Nursing care determinations;
- Quality control;
- Record keeping; and
- Utilization control.
10.2 ADMISSION KITS

Routine personal hygiene items in an admission kit are included in the per diem rate. Nonroutine personal hygiene items in an admission kit are not reimbursable and are not allowable costs.

10.3 ANCILLARY SERVICES

Ancillary services (i.e., services other than daily care services), excluding physician services, must be ordered and documented, in writing, by the beneficiary's attending physician, and the documentation must be retained in the beneficiary's medical record. The physician's signature on prior authorization forms, treatment plans, etc., certifies the necessity of ancillary services. The physician must review the beneficiary's progress resulting from the ancillary service not less than every 60 days and summarize the progress resulting from the ancillary service provided.

The orders must be for a specific beneficiary (no blanket orders) and prior to the service being rendered. Orders may be received by telephone but must be written in the beneficiary's medical record. Such services must be provided and billed by the appropriate enrolled provider. It is suggested that the facility contact the ancillary provider or the Medicaid Provider Inquiry Line to ascertain whether the service is covered prior to arranging for the provision of the service. (Refer to the Directory Appendix for contact information.)

The facility is responsible for arranging all ancillary and non-covered medical services. Arranging appointments and transportation for these services is included in the per diem rate.

The beneficiary or beneficiary's representative may choose to purchase non-covered services directly from an ancillary provider. The beneficiary pays the ancillary provider directly for the services provided. The nursing facility must retain, in the beneficiary's fiscal record, receipts showing that the beneficiary paid for the particular non-covered service. Medicaid post-payment reviews will be conducted to assure that the beneficiary's fiscal record contains the receipts.

Nursing facilities may not bill Medicaid for ancillary services except for therapies, oxygen, and the Medicare coinsurance or deductible for ancillary services. Otherwise, the ancillary provider must bill for the service. The Billing & Reimbursement for Institutional Providers Chapter contains the allowable nursing facility provider types that can bill for ancillary services.

Therapies may be billed by the facility regardless of coverage by Medicare. However, Medicaid remains the payer of last resort.

Ancillary services (e.g., physical therapy) provided to a beneficiary on the day of discharge may be billed to Medicaid, even if the beneficiary was admitted and discharged on the same date.

10.4 BEAUTY AND BARBER SERVICES

Services of a professional beautician or barber are not included in the per diem rate and are not covered by the Medicaid Program. The beneficiary may purchase such services from personal funds. A beneficiary's patient-pay amount may not be used to cover these costs.
10.5 CHIROPRACTIC SERVICES (MEDICALLY-NECESSARY)

Chiropractic services, such as x-rays and treatment, are an ancillary service and are not included in the facility’s per diem rate.

10.6 DENTAL SERVICES

The facility’s per diem rate includes providing assistance with, and supplies for, daily oral hygiene. Dental supplies include, but are not limited to:

- Dental floss
- Mouthwash
- Mouthwash cups
- Denture adhesive
- Denture cleaner
- Denture cups
- Toothbrushes
- Toothpaste

Routine and emergency dental services are an ancillary service and are not included in the facility’s per diem rate.

10.7 DIETARY SERVICES AND FOOD

Residents must be provided nourishing, palatable, well-balanced meals that meet their daily nutrition and special dietary needs. Dietary services must also meet the preferences of residents and offer substitutes of similar nutritional value.

Nutrition appropriate for each resident’s condition is included in the facility’s per diem rate. This includes, but is not limited to:

- Daily nutritious meals and snacks
- Reasonable food substitutes of a similar nutritive value
- Dietary supplements
- Enteral formulas, supplies, equipment, and associated nursing services
- Infant formulas
- Nursing services associated with total parenteral nutrition (TPN) *
- Special diets
- Therapeutic diets
- Water solutions

Medicaid reimburses non-profit nursing facilities that incur costs resulting from the purchase of raw food and food preparation associated with special dietary needs for religious reasons. (Refer to the Cost Reporting and Reimbursement Appendix of this chapter for more information.)

* The formula, equipment, and supplies required for the TPN feedings are an ancillary service and are not included in the facility’s per diem rate.
10.8 DURABLE MEDICAL EQUIPMENT

10.8.A. STANDARD EQUIPMENT

Standard durable medical equipment is included in the facility’s per diem rate. The durable medical equipment supplier and the nursing facility must make arrangements for purchasing or renting required equipment. Standard durable medical equipment includes, but is not limited to:

- Adaptive Activities of Daily Living (ADL) equipment
- Air mattresses
- Autoclaves
- Bed boards
- Bed cradles
- Bed pans
- Bed rails
- Beds (including hospital beds)
- Bedside safety rails
- Bedside stands
- Blood pressure apparatus
- Canes
- Comfortable cushioned chair
- Commodes
- Crutches
- Emesis basins
- Food pumps
- Footboards
- Footrails
- Footstools
- Freestanding trays for meals
- Geriatric chairs
- Infrared lamps
- Lap and half-lap trays
- Lifts
- Oxygen equipment and supplies
- Pads, water-circulating devices to apply heat or cold therapy (e.g., hot/cold packs, heating pads)
- Positioning pillows
- Pressure-relief positioning cushions
- Reading lights
- Sitz baths
- Splints
- Standard manual wheelchairs
- Suction machines
- Traction equipment
- Trapeze equipment
- Tub lifts
- Urinals
- Walkers
- Wash basins
- Wheelchairs for transport in or out of the facility

Such equipment must be available for all the residents demonstrating need. Previously acquired equipment should be adapted to meet the beneficiary’s needs, if appropriate.
The facility is required to repair/maintain standard equipment, and this expense is included in the per diem rate. This may not be billed separately to Medicaid, the beneficiary, his family, or representative.

Replacement, repair and maintenance of standard equipment owned or rented by the beneficiary is not a Medicaid-covered benefit.

Medicaid policy has historically established that standard wheelchairs and other specified durable medical equipment are included in the Medicaid facility per diem rate in accordance with federal standards and state licensure requirements. The following describes what is meant by standard wheelchairs relative to current types of wheelchair products that are routinely prescribed and commonly available in the marketplace, and routinely prescribed and required for patient use in the long-term care environment.

In addition, nursing services include positioning and body alignment and preventive skin care. The nursing facility is responsible for proper pressure relief and positioning. The use of medical equipment as a substitute for responsible patient care is inappropriate and not covered.

Standard manual wheelchairs are included in the facility's Medicaid per diem rate. A standard manual wheelchair is any wheelchair that is routinely prescribed and required for patient use in the long-term care environment. Standard manual wheelchairs that must be available to meet health and care standards include wheelchairs and accessories that are manufactured stock items, including heavy-duty, light- or ultra-light-weight and/or -strength; hemi chairs; wheelchairs with adjustable or reclining backs; manual tilt-in-space; removable/adjustable arms; variable seat height, width or depth; anti-thrust seats; laterals, abductors, and adductors; or other non-custom positioning options. In addition, pressure-relief positioning cushions, positioning pillows, trochanter rolls, etc. required for proper beneficiary use of the wheelchair or the provision of nursing services are the responsibility of the facility.

10.8.B. CUSTOM-FABRICATED SEATING AND/OR POWER WHEELCHAIRS

Custom-fabricated seating and/or power wheelchairs for nursing facility residents may be covered when the established standards of coverage are met and the severity and intensity of the disease process requires custom-fabricated seating or a power-operated wheelchair as medically necessary and is an integral part of the facility's daily nursing plan of care.

Repairs to custom-fabricated equipment by the durable medical equipment provider are covered only when it is necessary to make the equipment serviceable. Extensive repairs and maintenance by authorized technicians are covered if the warranty has expired. The durable medical equipment provider may bill for authorized repairs. Routine periodic servicing, such as cleaning, testing, regulating, and checking of the equipment, is not separately reimbursable.
### 10.8.B.1. Medical Necessity

A physician's order by itself is not sufficient documentation of medical necessity, even when it is signed by the treating physician. Clinical documentation from the medical record must support the medical necessity for the request and substantiate the physician's order. In addition, Medicaid coverage is not based solely on a physician's order; the request must also meet the standards of coverage published by MDHHS. (Refer to the Medical Necessity subsection of the Medical Supplier chapter for a complete description of medical necessity requirements.)

The nursing facility's responsibility for each resident's health care needs and other services, including patient care, transfers, safety, skin care, equipment, medical supplies, etc., are described in federal regulations and state licensure requirements. The use of medical equipment as a substitute for responsible patient care is inappropriate and not covered.

Refer to the Medical Supplier chapter for additional information regarding Medicaid definitions and standards of coverage for mobility and custom-fabricated seating systems.

### 10.8.B.2. Noncovered

Power wheelchairs and custom-fabricated seating systems, including add-on components, are not covered outside the facility per diem rate when:

- There is an appropriate economic alternative.
- The devices are not related to, or an integral part of, the nursing facility daily plan of care.
- The accessory or add-on component is deemed to be standard under the definition of a standard manual wheelchair.
- The wheelchair is used as a restraint or for the purpose of treating aberrant behaviors.
- The need for the wheelchair is a substitute for appropriate clinical nursing services, as defined in federal regulations.
- The wheelchair is inappropriate for the beneficiary's cognitive level or behavioral level.
- The beneficiary is unable to safely operate the wheelchair.
- A standard wheelchair meets functional need or outcome as defined in the plan of care.
- The device is ordered for nonstandard use (e.g., therapeutic modality or exercise).
- The device is ordered to increase sitting tolerance that exceeds acceptable medical guidelines for skin care and pressure.

### 10.8.C. Prior Authorization

Prior authorization is required for Medicaid coverage of medically-necessary power wheelchairs, custom-fabricated seating, and manual wheelchairs with custom-fabricated seating systems outside of the facility per diem rate. The treating physician must initiate
the referral for custom-fabricated seating or a power-operated vehicle (POV) based on an identified medical need in the plan of care. Facility clinicians who are responsible for the overall nursing plan of care for, and treatment of, the resident prepare and submit prior authorization requests, medical documentation, and the Evaluation and Medical Justification for Complex Seating Systems and Mobility Devices form (MSA-1656) within 90 days of the date the evaluation was completed. (Refer to the Prior Authorization subsection of the Medical Supplier chapter for additional information, and to the Forms Appendix for a copy of the form and form completion instructions.)

10.9 END OF LIFE CARE

Facilities are expected to have systems and policies in place to address appropriate advance care planning and end of life care. Facilities must notify residents at admission of their policies regarding the implementation of advance directives and the availability of hospice care. Residents are entitled to adequate and appropriate pain and symptom management as a basic and essential part of their medical treatment.

10.10 ENRICHMENT PROGRAMS

Facilities are required to provide or arrange for an ongoing program of activities designed to meet the interests and physical, mental and social well-being of each resident. An individualized program may be developed as part of the person-centered care planning process. Programs designed to maintain the resident's quality of life are included in the facility's per diem rate. Such services include, but are not limited to:

- Social services;
- Books;
- Current periodicals (e.g., newspapers, magazines) [If the beneficiary personally subscribes to a periodical (e.g., newspaper, magazine) for his own use, he is responsible for payment of that subscription.];
- Diversional programs;
- Motivational programs;
- Reality-oriented programs; and
- Recreational programs.

10.11 FAMILY PLANNING SERVICES

Family planning services are an ancillary service and are not included in the facility's per diem rate.

10.12 HEARING SERVICES

Hearing evaluations are an ancillary service and are not included in the facility's per diem rate.

A Medicaid copayment is not required for nursing facility beneficiaries.
10.13 Hospice Services

Upon admission to a nursing facility, residents must be advised of the facility’s policies regarding the availability of hospice care.

Nursing facility beneficiaries (including Medicaid-approved complex care cases) are eligible for Medicaid hospice services if determined by a hospice provider to meet hospice level of care. Additionally, in certain situations (such as lack of a caregiver in the home), a hospice beneficiary, in consultation with the hospice provider, may elect to enter a nursing facility to receive end of life care. Medicare beneficiaries receiving or eligible for the 100-day skilled nursing benefit have the right to choose hospice instead. This decision should not be influenced by differences between hospice and Medicare skilled nursing facility reimbursement rates.

If the beneficiary is enrolled in a MHP and is admitted to the nursing facility with the hospice benefit, the MHP is responsible for reimbursement of hospice services.

For nursing facilities that elect to contract with hospice providers, a written contract is required between the hospice provider and the nursing facility that specifically outlines the responsibilities of each. Additionally, the contract must specify how the hospice provider will reimburse the nursing facility for room and board.

Nursing facilities cannot bill Medicaid directly for room and board or any other services for hospice beneficiaries. A hospice is responsible for all costs for a person receiving hospice care. The hospice bills Medicaid for room and board, then reimburses the nursing facility at the rate specified in the contract between the providers.

MDHHS reimburses the hospice for its daily rate, for room and board, and QAS for beneficiaries in Medicaid or Medicaid/Medicare dually certified beds. The room and board rate is 95% of the facility’s Medicaid per diem rate, plus 100% of the QAS amount. Although the rate paid to the hospice by Medicaid is set, it is not necessarily the rate that the hospice must pay the facility. It is expected that some services may be purchased or traded between the facility and the hospice, so the negotiated room and board rate must be stipulated in the contract.

Hospice services are reimbursable for day of discharge if services were rendered, regardless of the setting in which the services were provided. This includes the transfer of the beneficiary from one hospice provider to another as long as services were provided by both agencies. (This will be randomly verified by post payment audit and as indicated.) If the beneficiary has hospice as of 12:01 a.m., the hospice is responsible for the payment of services provided to the beneficiary until midnight. The hospice will continue, for payment purposes, as the primary provider for the full day of discharge.

Room and board for a hospice/nursing facility (NF) resident is reimbursable on the day of discharge only if the discharge is due to resident death. Room and board reimbursement for the day of discharge from the NF for any other reason is not covered as the resident is not there at the midnight census to be counted as a resident.

Because Medicaid is making a payment for room and board (even though it is paid to the hospice), beneficiaries must be treated as all other Medicaid beneficiaries. For example, the facility cannot seek or accept additional or supplemental payment from the beneficiary, his family, or representative in addition to the amount paid for the covered service, even when a beneficiary has signed an agreement to do so.
10.13.A. NURSING FACILITY RESPONSIBILITIES [CHANGE MADE 7/1/18]

Nursing facilities must adhere to all State licensure requirements, even though some of the components of care are provided by the hospice rather than the nursing facility. An example of a licensure component completed by the hospice is that, upon admission, the hospice provides the facility with copies of the beneficiary’s history and physical, interdisciplinary assessment, and plan of care. For purposes of licensure, these copies are accepted as appropriate.

If a beneficiary is already receiving hospice services and elects admission to a nursing facility, it is the responsibility of the hospice provider to update the beneficiary’s location of service in CHAMPS. To update the beneficiary’s location of service in CHAMPS, the hospice provider must discharge the beneficiary and complete an admission with the updated location of service in CHAMPS. (Refer to the Beneficiary Admission and the Beneficiary Discharge sections of the Hospice chapter for additional information.) The new admission will result in real-time changes to the beneficiary’s Program Enrollment Type (e.g., HOS-NFAC) and the National Provider Identification (NPI). (revised per bulletin MSA 17-46)

Hospice staff cannot be utilized to meet staffing patterns required for licensure (i.e., the facility cannot include hospice staff on staffing reports).

Although the hospice is responsible for developing the coordinated plan of care, the nursing facility, as well as the beneficiary, must be an active participant in its development.

If the hospice beneficiary in a nursing facility has a patient-pay amount, it is the hospice’s responsibility to collect that amount from the beneficiary. The nursing facility cannot collect the patient-pay amount from a hospice beneficiary unless the contract with the hospice specifically delegates that responsibility to the facility.

Services that must be provided by the nursing facility include:

- Room and board;
- Laundry (including facility items as well as personal items); and
- All other non-terminal illness-related services afforded other Medicaid beneficiaries (e.g., services included in the per diem rate).

Hospice covered beneficiaries residing in the nursing facility must not experience any lack of nursing facility services or personal care due to their status as a hospice beneficiary. Facilities must offer the same drugs, services, medical supplies and equipment to all beneficiaries who have elected the hospice benefit in the same manner that services are provided to other beneficiaries in the facility who have not elected hospice care. If a service is normally furnished as part of the facility’s per diem rate, the service must also be provided to hospice beneficiaries. If services are provided for needs associated with a non-terminal illness and are normally furnished and billed by another provider, that practice would continue.
10.13.B. HOSPICE RESPONSIBILITIES [CHANGE MADE 7/1/18]

Hospice must certify/re-certify the beneficiary’s need for hospice care.

If a beneficiary already living in a nursing facility elects the hospice benefit, it is the responsibility of the hospice to admit the beneficiary for hospice services, indicating the nursing facility NPI in the Admission Information Section in CHAMPS. A completed admission will result in real-time changes to the National Provider Identification (NPI) and the beneficiary’s PET code. (Refer to the Beneficiary Eligibility chapter for additional information.) (revised per bulletin MSA 17-46)

The hospice, in collaboration with the beneficiary and/or family and nursing facility, will establish a coordinated plan of care for the beneficiary. The plan must specify the overall care to be provided and indicate, in detail, which services will be provided by the hospice and which will be provided by the facility.

If the hospice beneficiary has a patient-pay amount, it is the hospice’s responsibility to collect that amount from the beneficiary. The nursing facility cannot collect the patient-pay amount from a hospice beneficiary unless the contract with the hospice specifically delegates that responsibility to the facility.

10.13.C. SERVICE PROVISION

The following is intended for use as a guideline only. It identifies services for which the hospice is responsible, services that the hospice may arrange, and services that are "negotiable."

10.13.C.1. SERVICES THAT HOSPICE MUST PROVIDE (RELATED TO THE TERMINAL ILLNESS)

- A coordinated plan of care outlining the responsibilities of each provider;
- Intermittent (i.e., less than eight hours per day) nursing care of the hospice beneficiary;
- Counseling (defined as bereavement, nutritional, and spiritual); and
- Social work services.

10.13.C.2. SERVICES THAT HOSPICE MAY ARRANGE (RELATED TO THE TERMINAL ILLNESS)

- Spiritual care; and
- Home health aide/homemaker services. This applies only for services not provided during the facility’s normal provision of care. For example, if the facility normally provides baths five times a week but the hospice plan of care calls for a bath each day, the hospice aide would provide baths on the days the facility does not.
10.13.C.3. NEGOTIABLE SERVICES

Services that must be available for hospice beneficiaries but appropriate contracted providers may render, as related to the terminal illness and as included in the patient plan of care, include the following. These services are the responsibility of the hospice, and cannot be billed to Medicaid by the contracted provider.

- Inpatient care for acute episodes of pain and symptom control;
- Inpatient respite care (not available for beneficiaries residing in a nursing facility);
- Laboratory;
- Pharmacy;
- Durable medical equipment, medical devices, and supplies;
- Radiology;
- Medical;
- Up to 24 hours of continuous care (at least eight hours of which must be nursing care) during periods of crisis;
- Physical therapy;
- Occupational therapy;
- Speech/language pathology; and
- Emergency ambulance transportation (if the service is included as part of the hospice plan of care).

10.14 HOSPITAL SERVICES

A nursing facility must have in effect a transfer agreement with one or more hospitals.

10.14.A. PLANNED INPATIENT HOSPITAL ADMISSION

When a hospital admission is planned, the beneficiary must be discharged from the nursing facility. The nursing facility must not count the day of discharge as reimbursable by Medicaid. This day is included on the hospital’s claim when billing. The facility may not bill Medicaid for hospital leave days for a planned admission. (Refer to Holding a Bed [Hospital Leave and Therapeutic Leave] subsection of this chapter for more information.)

10.14.B. EMERGENCY INPATIENT HOSPITAL ADMISSION

When a resident is admitted to the hospital on an emergency basis, the nursing facility may receive Medicaid reimbursement for holding their bed. (Refer to Holding a Bed [Hospital Leave and Therapeutic Leave] subsection of this chapter for more information.)

10.14.C. OUTPATIENT AND EMERGENCY ROOM

Outpatient and emergency room services are an ancillary service and are not included in the facility’s per diem rate.
A beneficiary who goes to the hospital for outpatient or emergency room services is not discharged from the nursing facility because the beneficiary is not admitted to the inpatient hospital. The beneficiary should be included in the census of the nursing facility, and this day may be billed to Medicaid even if the beneficiary was being treated at midnight in the hospital outpatient or emergency room.

10.15 HOUSEKEEPING AND MAINTENANCE

Facility and room/bed maintenance necessary to maintain a sanitary, orderly, and comfortable environment are a required service and included in the nursing facility’s per diem rate.

10.16 INTRAVENOUS THERAPY

Intravenous therapy nursing services, supplies and equipment (including all pumps) are included in the facility’s per diem rate.

Pharmaceuticals used in IV therapy are an ancillary service and are not included in the facility’s per diem rate.

10.17 LABORATORY SERVICES

Any nursing facility that performs laboratory services must be certified/accredited under the Clinical Laboratory Improvement Amendments (CLIA).

Laboratory tests that are listed as waived tests under CLIA are included in the facility’s per diem rate (e.g., Testrip). A list of these tests and the instrumentation needed to perform them can be found on the FDA website. (Refer to the Directory Appendix for website information.)

Laboratory services that can only be performed with special laboratory equipment by professional laboratory staff may be provided and billed by the appropriate enrolled ancillary provider (e.g., independent laboratory, outpatient hospital). Such services are not included in the facility’s per diem rate.

Drawing, collecting and delivery of laboratory specimens are routine nursing services. As such, they are included in the facility’s per diem rate regardless of who actually performs the service (i.e., nursing facility or ancillary provider).

10.18 LAUNDRY SERVICES

Facilities are responsible for general laundry services (e.g., bedding) and the beneficiary’s personal laundry (e.g., clothing). Such services are included in the facility’s per diem rate.

Dry cleaning services may be billed to the beneficiary if the beneficiary requests the service in writing, he has prior knowledge that the service is not covered by Medicaid, and he agrees to accept the cost. A beneficiary’s patient-pay amount may not be used to cover these costs.
10.19 **MEDICALLY-RELATED SOCIAL SERVICES**

Nursing facilities must provide medically related social services to attain or maintain the highest practicable physical, mental and psychosocial well-being of each resident. These services may include, for example, information and referral, resident and family support, discharge planning, and are included in the facility's per diem rate.

10.20 **MENTAL HEALTH SERVICES**

Nursing facilities are required to have a written agreement with the local CMHSP outlining their working relationship to provide screening, evaluation and specialized services to nursing facility residents. The agreement must include a description of the process to be used to ensure the annual review of residents previously identified as having a mental illness or intellectual disability. The agreement must also specify the means through which the facility and the CMHSP will deliver mental health services for nursing facility residents.

Completion of required Pre-admission Screening and Annual Resident Review is included in the facility’s per diem rate. Prior to admission to a nursing facility, all individuals, regardless of payment source, must receive the Level I Pre-admission Screening (PAS) to identify the need for mental health and specialized services. Additional screening for mental health and specialized services is done as an Annual Resident Review (ARR), or more frequently in response to a change in a beneficiary’s condition. (Refer to PASARR Process section of this chapter for more information.)

Mental health services provided by the nursing facility staff, as specified in the resident’s plan of care, are included in the facility’s per diem rate. Nursing facilities must provide mental health and/or intellectual disability services that are of lesser intensity than specialized services to all residents who need such services.

10.20.A. **SPECIALIZED SERVICES**

Specialized services are those identified by the PASARR Level II and are provided or arranged by the CMHSP. These services must be available to nursing facility individuals regardless of whether they are identified and required by the PASARR process, or whether the individual is determined to require additional services to be provided or arranged for by the State as specialized services. Individuals with a primary diagnosis of dementia are also covered by this requirement, even though the PASARR process exempts individuals with a primary diagnosis of dementia.

The PASARR Level II evaluation may provide recommendations regarding the specialized services and programs needed by the resident. Recommendations are based on evaluation of the resident’s impairment in functional skills and the severity of those deficits. Nursing facilities must meet the responsibilities as outlined in this section for providing specialized services.

“Specialized Services” are defined as those mental health services for residents who have a mental illness or intellectual disability which are:

- Of greater intensity than those normally required from a nursing facility;
- Provided in conjunction with usual nursing facility services;
Specialized services for residents with mental illness may include, for example, individual, group and family psychotherapy, crisis intervention services, and formal behavior modification programs.

Specialized services for residents with intellectual disability include specialized professional involvement because the service need is related to the resident’s intellectual disability. Evaluators must carefully distinguish between those service needs that require the involvement of an intellectual disability professional, and those which are “generic” and do not require specifically-trained professionals. For example, administering medication is a “generic” service, while teaching a resident to self-administer may be a “specialized service” because it requires the involvement of an intellectual disability professional to design and monitor the program.

For residents with multiple diagnoses, such as intellectual disability and mental illness or intellectual disability and dementia, evaluators may recommend either specialized services or other mental health services, depending on the interrelationship of the two diagnoses.

10.20.B. NURSING FACILITY RESPONSIBILITIES

Responsibilities of the nursing facility include:

- Providing all of the usual and customary services (refer to the Medicaid Covered Services subsection) and as required by licensing and certification. This includes specialized mental health rehabilitation services as defined in 42 CFR 483.120.
- Monitoring the need for PASARR evaluations and ensuring that they are completed on time (refer to the PASARR Process section). The nursing facility must notify the CMHSP when a Level II evaluation is indicated.
- Collaborating with the resident or his legal representative and the CMHSP to develop an individualized plan of care for specialized services based on the needs identified during the PASARR Level II evaluation. The plan of care must outline the responsibilities of each provider for the specialized services.
- Coordinating the identified services (which may be obtained from the local CMHSP) and implementing and monitoring the services recommended in the individualized plan of care. Nursing facilities must also provide interventions which complement, reinforce and are consistent with any specialized services the individual is receiving or is required to receive by the State through the CMHSP. The individualized plan of care must specify how the facility will integrate relevant activities throughout all hours of the day at the facility to achieve consistency and enhancement of the goals identified in the individualized plan of care.
10.20.C. CMHSP RESPONSIBILITIES

Responsibilities of the CMHSP include:

- Performing the comprehensive evaluation (Level II evaluation) when required by the PASARR Screening.
- Collaborating with the resident or his legal representative and the nursing facility to develop an individualized plan of care for specialized services based on the needs identified during the PASARR Level II evaluation. The plan of care must outline the responsibilities of each provider for the specialized services.
- Providing specialized services to nursing facility residents who have been determined to need them through the PASARR process. MDHHS has allocated funds to local CMHSPs for this purpose.
- Providing training to nursing facility direct care staff to implement and monitor the programs as designed, and participating in the evaluation and modification of the plan of care as needed.
- Providing services to nursing facility residents on the same basis as to all other persons in the region. A nursing facility may use the local CMHSP as a mental health service provider in order to fulfill the nursing facility's obligation to provide specialized mental health rehabilitation services. Services for residents with a primary diagnosis of dementia are also available from a local CMHSP on the same basis.

In 1991, funds were made available to local CMHSPs to provide specialized services and other mental health services to individuals residing in nursing facilities. Priority for use of these funds is for individuals with the most severe mental health problems who need specialized services. To the extent there are funds remaining after this priority group is served, MDHHS has given local CMHSPs authorization to serve individuals who need mental health services other than specialized services.

Ancillary providers of mental health services may bill Medicaid directly.

10.21 NURSING CARE

Nursing facilities must have nursing staff sufficient to provide nursing and other related services to attain or maintain the highest practicable physical, mental, and psychosocial well-being of each resident.

Nursing care includes the responsibility for development, implementation and oversight of a plan of care that remains consistent with on-going observation, assessment and intervention by licensed nurses. The following are examples of custodial and rehabilitative nursing care that may be performed by, or under the supervision of, licensed nurses and are included in the per diem rate. Nursing services include, but are not limited to:

- Observing vital signs and recording the findings in the beneficiary's medical record
- Administration of topical, oral, or injectable medications, including monitoring for proper dosage, frequency, or method of administration, including observation for adverse reactions
• Treatment of skin irritations or small superficial or deep skin lesions requiring application of medication, irrigation, or sterile dressings

• Routine changing of dressings in chronic, non-infected skin conditions and uncomplicated postoperative incisions

• Nursing observation and care of beneficiaries with unstable or complex medical conditions which can only be provided by, or under the immediate direction of, licensed nursing personnel

• Proper positioning in bed, wheelchair, or other accommodation to prevent deformity and pressure sores

• Provision of bed baths

• Routine prophylactic and palliative skin care (e.g., application of creams and lotions) for the prevention of skin irritation and pressure sores

• Administration of intravenous solutions on a regular and continuing basis

• Administration of tube feedings

• Nasopharyngeal aspiration required for maintenance of a clear airway

• Care of a colostomy or iliostomy during early postoperative period, on an on-going basis, and conducting colostomy training

• Use of protective restraints, bed rails, binders, and supports (if ordered by a physician and in compliance with state and federal regulations) provided in accordance with written patient-care policies and procedures

• Use of intermittent positive pressure breathing equipment and nebulizers

• Care of catheters

• Care of tracheostomies, gastrostomies, and other indwelling tubes

• Administration of oxygen or other medicinal gases on a regular and continuing basis in the presence of an unstable medical condition or when nursing assessment is required to determine frequency and necessity of administration

• Identifying the need for, and insuring arrangements for, prompt and convenient clinical, laboratory, x-ray, and other diagnostic services

• Use of heat as a palliative and comfort measure, such as whirlpool and hydrocolator

• Training and assistance in transfer techniques (bed to wheelchair, wheelchair to commode, etc.)

• Training, assistance, and encouragement of self-care as required for feeding, grooming, toileting activities (including toilet routine to encourage continence), and other activities of daily living

• Normal range-of-motion exercises as part of routine maintenance nursing care

• Pain assessment and management

10.22 ORTHOTICS

Orthotics are an ancillary service and are not included in the facility’s per diem rate.
10.23 **OXYGEN**

The administration of oxygen and the related nursing services are included in the per diem rate.

Oxygen gas, equipment, and supplies for intermittent and infrequent use are included in the facility’s per diem rate.

If a beneficiary requires frequent or prolonged oxygen on a daily basis (i.e., at least 8 hours per day):

- As a resident in the Nursing Facility, the oxygen gas, equipment, and supplies must be billed by an enrolled medical supplier, not the nursing facility.
- As a resident in a County Medical Care Facility or a Hospital Long Term Care Unit, the oxygen gas, equipment, and supplies must be billed by the facility. A DME provider cannot bill for oxygen gas, equipment, and supplies for these residents.

NOTE: The rental of a concentrator is billable by a Medical Supplier and should not be confused as needing to be billed by the facility.

(Refer to the Billing & Reimbursement for Institutional Providers Chapter in this manual for billing instructions.)

Oxygen services (i.e., gas, equipment, and supplies) are not covered by Medicaid if Medicare is paying for the stay. Medicare’s per diem reimbursement rate includes the oxygen services.

10.24 **PERSONAL COMFORT ITEMS**

Medicaid does not cover individual personal comfort items (e.g., telephone, television, radio, guest trays). Such services are not included in the facility’s per diem rate. Beneficiaries may purchase individualized services with personal funds. A beneficiary’s patient-pay amount may not be used to cover these services.

If the facility provides personal comfort items to all its beneficiaries (e.g., a television in the recreation room), the service is included in the facility’s per diem rate.

10.25 **PERSONAL HYGIENE ITEMS**

Items needed for personal hygiene are included in the facility’s per diem rate. Such items include, but are not limited to, the following:

- Bacteriostatic soaps
- Body lotions
- Combs and brushes
- Cotton swabs
- Deodorant/ antiperspirant
- Facial tissues
- Hair conditioners (as appropriate)
- Incontinence supplies
- Medicine cups
- Oral hygiene supplies
- Patient gowns
- Personal hygiene preparations
- Safety razors
- Sanitary napkins
- Shampoo
- Shaving
- Shaving cream
- Soaps
10.26 PHARMACY

Nursing facilities must provide pharmaceutical services to meet the needs of each resident.

Prescriptions must be ordered and documented, in writing, in the beneficiary's medical record by the attending physician. These prescriptions comply with the federally mandated tamper resistant prescription pad policy as long as the beneficiary does not have the opportunity to handle the medical record. Additional information on the tamper resistant prescription pad policy can be found in the Pharmacy Chapter of this manual.

A Medicaid copayment is not required for prescription pharmaceuticals for nursing facility beneficiaries.

The Michigan Pharmaceutical Product List (MPPL) contains the over-the-counter and prescription pharmaceutical products covered by Medicaid and any restrictions placed on those products, including when prior authorization is required. The prior authorization process is outlined in the MPPL and may be obtained by the physician or their designee. The Michigan Pharmaceutical Products List is available online. (Refer to the Directory Appendix for website information.)

Pharmaceuticals dispensed in nursing facilities must be billed through a pharmacy (unless pharmacy is included in the per diem rate, i.e., ICF/IID).

10.26.A. OVER-THE-COUNTER PRODUCTS (OTC’s)

- The MPPL designates when an OTC drug is included in the facility's per diem rate. It is the responsibility of the facility to provide these products. Examples of OTCs in the per diem include mouthwash, topical antiseptics, analgesics, cough and cold preparations, ointments (both generic and brand name [e.g., Vaseline, Gold Bond]), and vitamins and minerals. The pharmacy or supplier must make arrangements with the nursing facility for reimbursement.

- OTCs not included in the per diem rate that may be billed to Medicaid, as outlined in the MPPL, are reimbursable to the pharmacy for nursing facility beneficiaries. Examples include Diphenhydramine and Insulin.

10.26.B. MEDICATION REVIEWS

Medication reviews, as required by federal regulations, are the responsibility of the facility and are included in the per diem rate. The pharmacist must make arrangements with the facility for reimbursement of such services.

10.26.C. RETURN OF UNUSED DRUGS

Nursing facilities must, with a few exceptions for drugs such as controlled substances that are prohibited from being reused, properly credit Medicaid by returning unused prescription medications to the pharmacy. This policy applies to Medicaid beneficiaries where Medicaid is paying for the prescription medication. This does not apply to residents who have Medicare Part D.
The nursing facility must maintain documentation of:

- The quantity of medications dispensed and consumed by a beneficiary; and
- The return of all unused medications to the pharmacy so the pharmacy can credit Medicaid.

The nursing facility is required to return all prescription drugs that can be appropriately returned to the pharmacy due to the following reasons:

- Discontinuation in use by the prescriber
- Transfer to another facility (e.g., hospital or nursing facility)
- Discharge from nursing facility
- Death of beneficiary

The nursing facility and pharmacy may be subject to post-payment review to ensure the unused prescription drugs (as allowed by Federal and State law) are being returned by the nursing facility, and Michigan Medicaid is properly credited for the returned unused prescription drugs.

The nursing facility provider must not return prescription drugs to the pharmacy which are unsuitable for return according to State and Federal law.

The returned prescription drugs must:

- Have been properly stored
- Be returned unopened
- Not be a compounded product
- Be dispensed in the original packaging
- Be a non-controlled substance

The nursing facility should contact its contracted pharmacist consultant for assistance regarding which prescription drugs are not appropriate for return.

10.26.D. **Beneficiary Pharmacy Insurance Deductible, Coinsurance, Copays and Premiums**

Beneficiaries who are enrolled in Medicaid and Medicare are considered dual eligibles. Dual eligibles who reside in nursing facilities do not have to pay premiums, coinsurance, deductibles and copays for prescription drugs if they are enrolled in a Medicare Part D plan. However, the Medicare Part D benefit requires that Medicaid make a payment(s) for nursing facility care for one full calendar month before the dual eligible is exempt from prescription drug copays.
Under either Medicare or Medicaid, a nursing facility is not responsible for paying the pharmacy for a beneficiary's liability (copays, deductibles, and/or coinsurance) unless the facility has assumed this obligation by contract or such payment is required by state law.

10.26.D.2. COORDINATION WITH MEDICARE PART D

Medicaid does not coordinate benefits with the Medicare Part D benefit. Medicaid does not reimburse a pharmacy for the beneficiary's liability for prescription drugs if the beneficiary is:

- Enrolled in a Medicare Part D plan and the prescription drugs are covered under the Medicare Part D benefit.
- Eligible to join a Medicare Part D plan but chooses to retain his commercial insurance in place of joining a Medicare Part D plan.

If a beneficiary joins a Medicare Part D plan that has a premium more than the Medicare standard premium established for Michigan, the beneficiary must pay the difference in the cost that Medicare does not pay.

The following table gives conditions on when a nursing facility can offset the patient-pay amount for the beneficiary's liability for prescription drugs.

<table>
<thead>
<tr>
<th>If</th>
<th>Then</th>
</tr>
</thead>
<tbody>
<tr>
<td>Beneficiary recently enters a nursing facility and his liability is not exempt under the Medicare Part D benefit until Medicaid has made a payment for one month, and it is established that the beneficiary will reside in the nursing facility for one month or more.</td>
<td>Nursing facility can offset the patient-pay amount for the beneficiary's liability during the initial month of the nursing facility stay.</td>
</tr>
<tr>
<td>Beneficiary is retroactively enrolled in Medicaid and his liability exemption under the Medicare Part D benefit has not yet taken effect.</td>
<td>The offsetting of the patient-pay amount for the beneficiary's liability can only occur for the first month if the retroactive enrollment in Medicaid is more than one month. The beneficiary's liability for subsequent months must be billed to the Medicare Part D plan by the pharmacy.</td>
</tr>
<tr>
<td>Beneficiary is prescribed drugs not covered by Medicare Part D, Medicaid or commercial insurance.</td>
<td>Nursing facility can offset the patient-pay amount.</td>
</tr>
<tr>
<td>Beneficiary has pharmacy copays, coinsurance, and deductibles from his commercial/private insurance.</td>
<td>Nursing facility can offset the patient-pay amount.</td>
</tr>
</tbody>
</table>

**Nursing facilities cannot offset the patient-pay amount for insurance premiums.**
Instructions for offsetting the patient-pay amount are contained in the Offset to Patient-Pay Amount for Noncovered Services section in the Billing & Reimbursement for Institutional Providers chapter.

If a beneficiary becomes retroactively enrolled in Medicaid and a Medicare Part D plan, a pharmacy can bill the Medicare Part D plan for the beneficiary's liability during the retroactive period in which the drugs were dispensed. However, in order for the pharmacy to bill Medicare Part D retroactively, the pharmacy must receive proof that Medicare Part D was made retroactive. The nursing facility can assist in getting the appropriate information to the pharmacy by obtaining the proof of retroactive eligibility from the beneficiary or the beneficiary's representative (this could be the facility). The pharmacy cannot make the decision of retroactive eligibility on its own. Hence, it is important that the nursing facility communicate with the pharmacy about the retroactive information so that the pharmacy can bill the Medicare Part D plan.

**10.26.D.5. BENEFICIARIES INELIGIBLE FOR MEDICARE PART D**

For beneficiaries who are not eligible for the Medicare Part D benefit, Medicaid will continue to coordinate benefits with their commercial/private insurance.

**10.26.D.6. QUESTIONS ON MEDICARE PART D**

Questions regarding a beneficiary's eligibility for Medicare Part D, specific Medicare Part D drug coverage, or retroactive enrollment in Medicare Part D must be directed to Medicare. Also, the Michigan Medicare/Medicaid Assistance Program (MMAP) provides free education and personalized assistance to people with Medicare and Medicaid, their families, and caregivers (including the nursing facility). (Refer to the Directory Appendix for contact information.)

Beneficiaries must contact their/spouse's employer human resources department for questions concerning the coordination of their commercial/private insurance and Medicare Part D.

**10.27 PHYSICIAN SERVICES**

Physician services must be provided and are an ancillary service. Such services are not included in the facility's per diem rate. In accordance with federal requirements, residents have the right to choose an attending physician.

A physician must initially examine a resident within 48 hours of admission to the nursing facility, unless the resident has been examined by a licensed physician within five days before admission and a copy of that examination is available in the facility at the time of the resident's admission. If the admission occurs on a Friday, the exam must be completed within 72 hours.

A physician must evaluate a beneficiary every 30 days for the first 90 days after admission. The resident must then be evaluated every 60 days unless otherwise justified and documented by the physician. At a minimum, the resident must be evaluated at least once every 90 days on an ongoing basis.
A physician visit is considered timely if it occurs no later than ten days after the required visit. After the initial visit, the physician may alternate personal visits between the physician and a physician assistant or nurse practitioner.

10.28 Podiatry Services

Palliative treatment and routine foot care (e.g., trimming of the nails, removal of corns and calluses) are included in the facility’s per diem rate.

Medically necessary podiatry physician services are an ancillary service and are not included in the facility’s per diem rate.

10.29 Private Duty Nursing

Private duty nurses are not covered in a nursing facility by the Medicaid Program nor are they included in the facility’s per diem rate. The beneficiary may use personal funds to purchase private duty nursing services. A beneficiary’s patient-pay amount may not be used to cover the cost of private duty nursing.

10.30 Private Room

When a Medicaid beneficiary requires a private room due to medical necessity, the nursing facility is reimbursed at the usual per diem rate. Private rooms required for medical necessity are included in the facility’s per diem rate. Written documentation of medical necessity must be part of the beneficiary’s medical record.

Medical necessity is defined as a documented medical condition that creates the need to isolate the resident for his safety and/or the safety of others (i.e., infection control). This also includes behavioral conditions related to a medical condition (i.e., aggression related to dementia). The medical necessity must be documented, as well as addressed, in care planning and treatment.

If a beneficiary requests a private room and there is no medical necessity, the beneficiary may elect to pay privately. The nursing facility must advise the beneficiary that a private room is not a Medicaid-covered service unless it is medically necessary, and that the beneficiary or family is responsible for paying the difference between the cost of a semi-private and private room. The facility may only charge the difference between what it would normally charge a private-pay resident for a semi-private and a private room. Facilities may not charge beneficiaries the difference between the Medicaid per diem rate and the rate charged a private-pay resident for a private room. For example, if the facility charges $98.00/day for a semi-private room and $112.00/day for a standard private room, the charge is $14.00/day. The beneficiary’s patient-pay amount may not be used for this purpose.

If the beneficiary agrees to pay the difference between the semi-private and private room rate, the beneficiary or family member must request permission, in writing, from MDHHS. The Request for Authorization of Private Room Supplemental Payment for Nursing Facility form (MSA-1580) is used to obtain the permission. The MSA-1580 is completed by the beneficiary or family member. (Refer to the Forms Appendix for a copy of MSA-1580.) Requests to supplement the cost of a private room are reviewed for cost and reason for request on a case-by-case basis. A response will be sent to the requestor, the beneficiary (if different), and the facility within ten working days.
This response must be retained as part of the beneficiary’s medical record. Subsequently, these charges are subject to audit by MDHHS, CMS or designated representatives of either of those entities. These charges must be reported by the nursing facility as revenue received. This response, however, does not guarantee that the beneficiary will be provided a private room. The agreement to provide a private room is given by the nursing facility.

If a Medicaid beneficiary is in a private room (either Medicaid-certified or dually-certified) because the private room is the only bed available, the facility cannot request the beneficiary or beneficiary’s family pay the difference between the semi-private and the private room rate, nor can the facility transfer or discharge the beneficiary due to non-payment of the difference.

10.31 PROSTHETICS

Prosthetic services are an ancillary service and are not included in the facility’s per diem rate.

10.32 RADIOLOGY

Radiology services are an ancillary service and are not included in the facility’s per diem rate.

10.33 SUBSTANCE ABUSE SERVICES AND TREATMENT

Services rendered for the treatment of alcohol and drug abuse are an ancillary service and are not included in the facility's per diem rate.

10.34 SUPPLIES, ACCESSORIES AND EQUIPMENT

Supplies, accessories, and equipment necessary to achieve the goals of the beneficiary’s plan of care are included in the facility’s per diem rate and must be available to the beneficiary. Medical supplies, accessories, and equipment include, but are not limited to:

- Atomizers
- Bandage products
- Bed linens
- Bib or protective cover
- Catheters/accessories and irrigation solution
- Cloth diapers
- Cotton balls
- Cotton swabs
- Deodorizers
- Diagnostic agents (e.g., Testape, Kyotest)
- Disposable diapers
- Disposable gloves
Dressings (e.g., surgical pads, cellulose wadding, tape)

Note: Some supplies for complex wound care are not included in the per diem rate and must be obtained through a medical supplier or pharmacy. Supplies that must be billed by a medical supplier, including information for interpreting the list of supplies, are on the MDHHS website. (Refer to the Directory Appendix for additional information.)

- Elastic hose
- Enema kits
- Finger cots
- First aid trays
- Flameproof cubicle curtains
- Foot soaks
- Hot water bottles
- Hypodermic needles/syringes
- Ice bags
- Incontinence pads, pants, and liners
- IV supplies and equipment; related supplies (including IV infusion pump)
- Minor medical/surgical supplies
- Miscellaneous applicators
- Nebulizers (hand-held or used with a compressor)
- Ostomy supplies
- Plastic waste bags
- Recreational/therapeutic equipment and supplies to conduct ongoing activities
- Safety pins
- Sheepskin, devices and solutions for preventing/treating decubiti
- Slings
- Stethoscopes
- Straws
- Syringes/needles
- Thermometers
- Tongue blades (depressors)
- Towels/washcloths
- Tracheostomy care kits and cleaning supplies
- Trochanter rolls
- Water carafes/glasses
**Note:** This list is not complete. Generic equivalents and products in the same family (i.e., same general use) are also included in the facility’s per diem rate.

### 10.35 Telemedicine

A nursing facility can be either an originating or distant site for telemedicine. Refer to the Billing & Reimbursement for Institutional Providers Chapter for information regarding billing the originating site facility fee. Refer to the Telemedicine Section of the Practitioner Chapter for additional information regarding telemedicine services.

Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.

### 10.36 Therapies

Nursing facilities must provide or obtain specialized rehabilitative services if required by the beneficiary’s plan of care.

Routine maintenance therapy consists of the repetitive services required to maintain function. The development of the therapy and treatment are included in the per diem rate. Such therapy does not require the therapist to perform the service, nor does it require complex and sophisticated procedures.

Non-routine occupational therapy (OT), physical therapy (PT) and speech/language/pathology (ST) are ancillary services that are covered if prior authorization is obtained and the following conditions are met:

- The therapy must be billed by the facility;
- There must be a written order by the attending physician/licensed physician’s assistant for each calendar month of therapy; and
- The written orders must be signed by the attending physician/licensed physician’s assistant and retained in the beneficiary’s medical record.

Non-routine ancillary therapy is therapy that requires the skills of qualified technical or professional health personnel such as physical therapists, occupational therapists, speech pathologists or audiologists, and is directly provided by or under the general supervision of these skilled personnel to assure the safety of the beneficiary and achieve the medically desired results as ordered by the beneficiary’s physician.

Federal regulations require the facility to have a valid contract with the OT, PT, or ST provider. A valid contract allows the facility to retain professional and administrative control over the services provided. Therefore, an agreement that stipulates only the use of facility space does not constitute a valid contract.

If Medicaid funds have inappropriately been paid to a facility for OT, PT, or ST services when a facility did not possess a valid contract, the funds may be recovered by gross adjustment or at the time of cost settlement, as appropriate.

The following clarifies the professional responsibilities of the nursing facility, the physician, and the therapist in the provision of OT, PT or ST services for Medicaid beneficiaries.

- The facility has administrative and professional responsibility for the management of the total health care needs of the beneficiary as outlined in the plan of care. The facility must assure that
appropriate OT, PT, or ST services are available to the beneficiary as needed. In situations where the therapist is not an employee of the facility, the facility must establish a valid contract with a therapist/speech pathologist who meets applicable licensure/certification/accreditation requirements.

- The attending physician is responsible for determining the medical necessity and appropriateness for services and preparing the written orders for OT, PT or ST evaluation and treatment. These are reviewed and approved/disapproved by the MDHHS Program Review Division.

- The therapists are responsible for evaluating the beneficiary’s needs; developing a written plan of treatment, including goals and objectives; and providing or overseeing the appropriate services. A copy of the treatment plan must be retained in the beneficiary’s medical record.

The facility’s responsibilities, as described above, are not meant to conflict in any way with the professional responsibilities of OTs, PTs or STs in the evaluation and treatment of the beneficiary.

The cost of supplies and equipment (e.g., plate guards) used as part of the therapy program is included in the reimbursement for the therapy/speech pathology.

Therapies provided to nursing facility beneficiaries outside the nursing facility premises must be provided in the outpatient department of a general hospital or medical care facility.

Therapies provided to county medical care facility, hospital long term care unit or hospital swing bed beneficiaries outside their respective facilities must be provided in the outpatient department of a general hospital. ST may also be provided by a hearing center. Prior authorization must be obtained by the facility regardless of where the service is to be provided.

**Note:** Therapy provided by a physician (MD or DO) is not a covered benefit for beneficiaries in a nursing facility.

### 10.36.A. OCCUPATIONAL THERAPY (OT)

Occupational therapy (OT) must be active and restorative. A licensed occupational therapist or a licensed occupational therapy assistant must render the services. If the assistant renders the service, the assistant must be under the supervision of the therapist.

The following are examples of occupational therapy services that may be covered by Medicaid:

- Training in activities of daily living;
- Fabrication of adaptive equipment;
- Perceptual motor training;
- Splinting;
- Testing;
- Therapeutic exercises; and
- Prosthetic and orthotic training.

OT services that are provided and billed simultaneous with PT are not covered. Also, diversional OT, reality orientation, and restorative nursing functions are considered part of the per diem rate, and are not separately reimbursable.
10.36.B. PHYSICAL THERAPY (PT)

Active, restorative, or specialized maintenance physical therapy (PT) programs, as explained below, are benefits of the Medicaid Program. There must be the expectation that the beneficiary's condition will improve significantly in a reasonable and generally predictable period of time.

A licensed physical therapist (temporary permit is acceptable), physical therapy assistant, or physical therapy aide must provide the services. If the assistant or aide renders the service, they must be under the supervision of the therapist.

The following are examples of restorative PT services which may be covered by Medicaid:

- Hot pack, ice pack, infrared treatment, or whirlpool bath is covered when provided as a prerequisite to a skilled physical therapy procedure;
- Gait training is covered when provided to a beneficiary whose ability to walk has been impaired by neurological, muscular, or skeletal abnormality;
- Prosthetic and orthotic training is covered when instructing the beneficiary in using the prosthetic or orthotic device; and
- Range of motion exercises are covered when provided as part of the treatment of a specific disability which has resulted in a loss or restriction of mobility.

For specialized maintenance physical therapy, the therapist's initial evaluation of the beneficiary's needs and designing of the program are covered. The program must be appropriate to the beneficiary's capacity, tolerance, and treatment objectives. The instructions to the beneficiary or to other members of the health team (e.g., nursing personnel) in carrying out such an individualized treatment plan and infrequent re-evaluations, as may be required, are also covered.

10.36.C. SPEECH PATHOLOGY/THERAPY (ST)

The services must be for active, restorative treatment and must be rendered by a licensed speech pathologist. For speech pathology evaluations, a copy of the speech pathologist's license must accompany the first prior authorization request for that pathologist.

The following are examples of conditions that may warrant speech pathology services:

- Cerebral vascular accident (CVA) or trauma
- Neurological disease, such as Parkinsonism or multiple sclerosis
- Laryngectomy
- Voice disorders caused by conditions such as nodules, polyps, papilloma, ulcers, cysts, or cord damage (the exact diagnosis must be included in the physician's order)
- Maxillofacial abnormalities with traumatic or surgical excision of the tongue, lips, or hard or soft palate
When properly documented, other diagnoses and conditions may be covered if they meet the above requirements and are prior authorized.

Since the purpose of speech pathology services is restorative rather than habilitative, these services are not covered for:

- Speech problems due to symptoms of organic brain syndrome or chronic brain syndrome; or
- Speech problems due to intellectual disability.

Medicaid does not cover ST when another public agency (e.g., local or intermediate school district special education program) can assume the responsibility of services for the beneficiary.

10.36.D. PRIOR APPROVAL FOR THERAPIES

If a beneficiary is approved for ventilator care and also requires therapy, prior authorization for the therapy must be obtained under the VDCU NPI.

The Occupational Therapy - Physical Therapy – Speech Pathology Prior Approval Request/Authorization (MSA-115) is used to request prior authorization. The MSA-115 must be reviewed and signed by the attending physician. Refer to the Forms Appendix or MDHHS website for a copy of, and instructions for, the MSA-115.

The initial evaluation does not require prior authorization and cannot be provided more often than twice in a 12-month period (and at least six months apart).

Exception: Evaluation of oral pharyngeal swallowing cannot be provided more than four times in a 12-month period.

Prior authorization may be requested for up to two calendar months per request.

The therapist or speech pathologist must keep appropriate notes that include the date of treatment, the name of the therapist, the type and length of treatment, and the resident’s response to treatment. These notes must be maintained in the beneficiary’s medical record.

Prior authorization requests for group therapy require documentation that group therapy is in the best interest of the beneficiary’s treatment.
10.36.D.1. INITIAL REQUEST

When making the initial request for prior authorization of therapy, the facility must attach a copy of the initial evaluation and the written treatment plan. The initial evaluation and treatment plan must include the following information:

- Statement of the problem (i.e., the specific physical entity and functional incapacity involved or the specific speech and/or language diagnosis based upon results of formal/informal testing);
- Baseline condition at initial evaluation, measured in units appropriate to the problem (for speech pathology, this would include the baseline description of clinical and functional performance in all language modalities);
- Short-term goals appropriate to the beneficiary’s diagnosis, level of severity, prognosis, and functional needs;
- Proposed technique for reaching goals, including the planned progression from the baseline condition to the goal; and
- Method by which progress will be measured.

10.36.D.2. CONTINUED REQUEST

Authorization of the initial service does not guarantee authorization of continued service. The therapist must submit the MSA-115 for continued therapy with documentation of the most recent progress. The progress summary must be concise and refer to the baseline established in the initial evaluation. Progress must be objective and measurable.

10.36.D.3. PROCESS

The MDHHS consultant will make a determination and return to the provider a letter indicating approved, denied, insufficient data, no action, or approved as amended. If approved, the approval letter will contain a PA number with start and end dates. If a portion of the request is denied, Medicaid will only reimburse for the authorized services. The prior authorization number must be entered on the claim when billing. The facility must retain a copy of the approved request as part of the beneficiary’s medical record.

Approval of the request confirms that a beneficiary is in need of services that can be covered by the Program. It does not verify beneficiary eligibility, level of care, nor guarantee the fee charged. The facility is responsible for verifying the beneficiary’s Medicaid eligibility prior to providing the service.

Whenever a beneficiary is admitted to the facility directly from a general hospital or from another nursing facility where the beneficiary was receiving reimbursable therapy services, the name of that facility and the date of discharge from that facility should be included on the prior authorization request. In order to assure continuity of the treatment regimen in such instances, retroactive authorization may be requested if the request is filed within ten days following admission. Retroactive authorization may be granted when the service is rendered within Program guidelines for coverage (e.g., is restorative in nature).
Facilities participating in Medicare are not required to obtain prior authorization for the deductible and/or coinsurance amounts when Medicare approves the services.

10.36.D.4. BILLING

CHAMPS is programmed to match the services authorized with the services billed. The facility must not bill until authorization is received and the services are rendered. Services billed must not exceed the services authorized.

10.36.D.5. PROGRESS NOTES

The therapist/speech pathologist must keep progress notes. Such notes include the:

- date of treatment
- name of the individual who rendered treatment
- type and length of treatment
- beneficiary’s response to the treatment

The progress notes must be included in the beneficiary’s medical record.

10.37 TRANSPORTATION

10.37.A. NON-EMERGENCY NON-AMBULANCE TRANSPORTATION

The nursing facility is responsible for non-emergency non-ambulance transportation for all Medicaid beneficiaries, including Medicare/Medicaid beneficiaries when Medicare is covering the cost of the care. This transportation includes transport to medical appointments/treatment not available in the facility (e.g., dialysis treatment), as well as when the facility arranges for services to be provided at the facility (e.g., hearing aid dealer; transportation costs of portable x-ray equipment and personnel). The facility must either arrange or provide transportation. Reimbursement for non-emergency non-ambulance transportation, whether the beneficiary is transported to the appointment or the services are provided at the facility, is included in the facility per diem rate. The per diem rate also includes transportation for newly-admitted beneficiaries from a hospital or another residence.

Travel to out-of-state medical providers (other than Michigan Medicaid-enrolled "borderland" providers as defined in the General Information for Providers chapter of this manual) is not the responsibility of the facility and must be prior authorized by MDHHS.

The facility must select the most appropriate, cost-effective mode of transportation. Whenever possible, a facility-owned vehicle should be used. This vehicle must comply with the Americans with Disabilities Act (ADA).

In rare situations, the condition of a beneficiary needing non-emergency transport requires an attendant in addition to the driver. In such cases, it is appropriate for a nurse aide to accompany the beneficiary and this cost should be reflected in the annual cost report as “staffing costs associated with providing needed medical care.” Sending a
nurse aide or other staff member with the beneficiary being transported must not negatively impact the care of residents remaining in the facility.

The need for a nurse aide to accompany a beneficiary must not be confused with the responsibility of the family or legal guardian "to attend the beneficiary if escort is needed to sign consent forms, decide treatment options, sign insurance forms, provide histories, etc." A nurse aide is not to be responsible for these legal and medical decisions and knowledge.

10.37.B. EMERGENCY AMBULANCE

Nursing facilities must have contractual arrangements for ambulance services for emergencies. When there is an emergency, an ambulance provider renders the service and bills Medicaid.

10.37.C. NON-EMERGENCY AMBULANCE

When a physician issues a written order for non-emergency ambulance transportation, usually due to the need for a stretcher or other emergency equipment, the ambulance provider may only bill Medicaid directly and must maintain the physician's order as documentation of medical necessity. The written order must contain, at a minimum, the following information:

- Beneficiary's name and Medicaid identification (ID) number;
- Attending physician's NPI number and attending physician or provider signature;
- Type of transport necessary;
- Explanation of the medical necessity for ambulance transport (i.e., why other means of transport could not be used);
- Origin and destination;
- Diagnosis;
- Frequency of needed transports (required for ongoing, planned treatment); and
- Type of ongoing treatment (required for ongoing, planned treatment).

A separate physician's order is required for each individual transport, unless a beneficiary has a chronic medical condition that requires planned treatment. For chronic conditions, a physician may order non-emergency transportation for a maximum time period of up to 60 days in a single order. The physician's order for ongoing treatment must state the frequency of the transport and the type of ongoing treatment necessary. If non-emergency ambulance transport is not ordered by the beneficiary's physician, arrangements for payment must be between the facility and the ambulance provider, and cannot be charged to the beneficiary, beneficiary's family or used to offset the patient-pay amount. The cost of non-emergency ambulance transports not ordered by the beneficiary's physician must be identified and removed on Worksheet 1-B by the nursing facility.
10.38 VACCINES

Reimbursement for any vaccination ordered by the attending physician and administered in the nursing facility is included in the per diem rate. The invoiced purchase cost of the vaccine should be included as an allowable medical supply expense on the facility’s cost report.

10.39 VISION

Vision services (examinations and glasses) are ancillary services and are not included in the facility’s per diem.

A Medicaid copayment is not required for nursing facility beneficiaries.
SECTION 11 – SPECIAL PLACEMENTS AND AGREEMENTS

11.1 DEMENTIA UNITS

A nursing facility may elect to designate beds or units to address the special needs of beneficiaries with Alzheimer’s disease or other dementing illnesses. Care for Medicaid beneficiaries in dementia specialty beds is reimbursed as defined for any other nursing facility bed.

11.2 HOLDING A BED (HOSPITAL LEAVE AND THERAPEUTIC LEAVE)

Medicaid reimburses the nursing facility for holding a bed while the beneficiary is admitted to a hospital for emergency medical treatment (hospital leave) or takes a therapeutic leave from the facility for non-medical reasons.

Prior to therapeutic leave or transfer to a hospital, providers must give written notice of the facility’s bed hold and readmission policy to the beneficiary and a family member or legal representative. This must include information about Medicaid coverage for therapeutic and hospital leave. In an emergency, notice must be given to the beneficiary and family or legal representative within 24 hours. If the beneficiary refuses to have a family member notified, this must be documented in the beneficiary’s record.

The hospital leave portion of this policy only applies when Medicaid is the primary payer for room and board for the nursing facility stay at the time of the emergency hospital admission. For beneficiaries who are dually eligible for Medicare/Medicaid or have other insurance, Medicaid will not reimburse for holding a bed if Medicare or the other insurance is the primary payer for room and board for the nursing facility stay at the time of hospital admission. Medicaid will reimburse for the bed, however, if the resident who was Medicaid at the time of the hospitalization returns to the facility within the ten-day period with Medicare or other insurance coverage for the subsequent stay.

The written notice must specify:

- The Medicaid bed hold policy under which the beneficiary is permitted to return and resume residence in the facility; and
- The facility’s written policy under which a beneficiary is readmitted to the facility when their absence is in excess of the Medicaid-reimbursed leave days.

The beneficiary must be readmitted immediately to the first available bed if the beneficiary still requires nursing facility services and is still Medicaid eligible.

NOTE: This readmission policy also applies to Medicaid residents admitted before the effective date of the Denial of Payment for New Admissions (DPNA) who take temporary leave before, on, or after the effective date of the DPNA and are not considered new admissions upon return and, therefore, are not subject to the denial of payment.
11.2.A. HOSPITAL LEAVE DAYS

Medicaid reimburses a nursing facility to hold a bed for up to ten days during a beneficiary's temporary absence from the facility due to admission to the hospital for emergency medical treatment only when the facility's total available bed occupancy* is at 98 percent or more on the day the beneficiary leaves the facility. "On the day" is defined as the facility's census at midnight (i.e., 12:01 a.m. - the first minute of the day).

Facilities at 97.50 percent occupancy or more may round up to 98 percent. Facilities may not round up 97.45 percent – 97.49 percent to 98 percent.

Occupancy includes all licensed beds (e.g., Medicaid-certified, dual Medicare/Medicaid certified, licensed only). The 98 percent or more occupancy does not include beds held open for hospital or therapeutic leave day(s).

In cases where a facility's available bed occupancy is below 98 percent on the day the beneficiary leaves for an emergency admission to the hospital, but rises to 98 percent or more during his hospital stay, no hospital leave days can be billed for the beneficiary. Hospital leave days are only billable for a beneficiary if the occupancy rate is 98 percent or more on the day the beneficiary leaves the hospital.

In cases where the available bed occupancy is at 98 percent on the day the beneficiary leaves and drops below 98 percent during his hospital stay, the facility may bill up to 10 hospital leave days.

In instances where a facility is enrolled with Medicaid and has more than one provider NPI number, the available bed occupancy must be calculated separately for each provider NPI number.

* Calculation of available bed occupancy for purposes of Medicaid reimbursement for hospital leave days is different than calculation of occupancy for cost reporting purposes.

Version: July 1, 2018  Nursing Facility Coverages  Page 68
Facilities billing for Hospital Leave Days, must document in the beneficiary’s medical (clinical) record what the facility’s census was at the time the beneficiary left the facility for a hospital leave.

The facility must hold the bed and may bill Medicaid if there is reasonable expectation by the attending physician at the point of admission to the hospital that the beneficiary will return to the nursing facility by the end of the tenth day. The hospital admission must be for emergency medical treatment, as documented by the attending physician in the beneficiary’s medical record.

An "emergency medical condition" is defined as a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain) such that the absence of immediate medical attention could reasonably be expected to result in placing the health of the beneficiary (or, with respect to pregnant women, the health of the woman or her unborn child) in serious jeopardy, serious impairment to bodily functions, or serious dysfunction of any bodily organ or part.

The beneficiary must return to the nursing facility in ten or fewer days in order for the nursing facility to bill Medicaid for hospital leave days.

If the beneficiary is in the hospital for more than ten days, the nursing facility is released from its obligation to hold the bed and cannot bill Medicaid for any hospital leave days. The resident may be charged to hold the bed for those days if they agree in advance. (See Medicaid Non-Covered Leave Days subsection.) The facility is encouraged to monitor the resident during the hospital stay to determine the likely length of hospitalization.

If the resident is expected to be in the hospital for ten days or fewer and dies while in the hospital, the nursing facility may bill Medicaid for the hospital leave days up to the day before the resident died.

If the resident returns to the nursing facility under Medicare coverage, and was Medicaid eligible prior to the emergency admission, the facility may bill Medicaid for the hospital leave days if the emergency hospitalization was for ten days or fewer.

A resident is counted in the facility census if they are in the facility at midnight. If the resident is out of the facility on hospital leave at midnight, that day must be counted as a hospital leave day. If the resident returns to the nursing facility from the hospital, then is re-admitted to the hospital for the same condition that they were hospitalized for previously, the 10-day period of Medicaid reimbursed hospital leave days continues if the

</tr>
</tbody>
</table>
resident was not counted in the facility census for that day. If, given the circumstances above, the resident was counted in the facility census, a new 10-day period of Medicaid reimbursed hospital leave days may begin.

The resident need not be shown on the Medicaid claim as discharged from the nursing facility unless the hospital admission was a planned admission (not an emergency) or was longer than 10 days. NOTE: If the claim does show discharged, the facility is reminded of Medicaid's readmission policy. The beneficiary must be readmitted immediately to the first available bed if the beneficiary still requires nursing facility services and is still Medicaid eligible. This readmission policy also applies to Medicaid residents admitted before the effective date of the Denial of Payment for New Admissions (DPNA) who take temporary leave before, on, or after the effective date of the DPNA and are not considered new admissions upon return and, therefore, are not subject to the denial of payment.

Patient-pay amounts and billing methods are not affected by this hospital leave day policy. The nursing facility should continue to collect any patient-pay amount, typically on the first day of the month, and indicate the amount collected on the Medicaid claim. CHAMPS automatically deducts the patient-pay amount and reimburses the provider for the balance. If the facility bills Medicaid for hospital leave days that occur at the beginning of the month, then the nursing home should collect the patient-pay amounts as usual. The facility should charge the amount against the patient-pay that Medicaid will pay for that day. For example, if a resident has a patient-pay of $200 and is in the hospital for an emergency condition for the first five days of the month (the stay is 10 days or fewer), the nursing facility should collect the patient-pay amount from the resident, then submit a Medicaid claim. Medicaid would reimburse the facility the hospital leave day per diem rate, minus the patient-pay amount. Using 2002 figures, the facility reimbursement would be $150.30 [($70.06 x 5)-$200].

There is no limit to the number of hospital leave days per resident that may be billed to Medicaid annually as long as there are no more than 10 consecutive leave days per hospital stay.

Medicaid hospital leave days are not included in the Medicaid census statistics. Leave days reimbursed by other payer sources must be included in the census statistics.

11.2.B. THERAPEUTIC LEAVE DAYS

If the beneficiary has a temporary absence from the nursing facility for therapeutic reasons as approved by a physician, Medicaid reimburses the facility to hold the bed open for up to a total of 18 days during a 365-day period. Therapeutic leave is for non-medical reasons, such as overnight stays with friends or relatives. A resident is counted in the facility census if they are in the facility at midnight. If the beneficiary is out of the facility on therapeutic leave at midnight, that day must be counted as a therapeutic leave day.
The Medicaid Program covers up to 18 therapeutic leave days in a 365-day period for each beneficiary if:

- The facility reserves the bed for the beneficiary during his absence; and
- The beneficiary’s written plan of care provides for out-of-facility visits; and
- The beneficiary returns to the facility.

There is no limit to the number of therapeutic leave days that may be reimbursed at one time as long as the total does not exceed 18 days in a 365-day period (not the calendar year). For example, if a resident goes on a 5-day family vacation beginning April 10, 2003, that resident has 13 therapeutic leave days remaining until April 9, 2004.

If a beneficiary does not return from a therapeutic leave, the beneficiary must be discharged on the date he left the facility. The date of admission and the date of discharge may not be billed as therapeutic leave days.

**Therapeutic leave days must be included in the Medicaid census statistics if the therapeutic leave day is being paid by the beneficiary or Medicaid.**

### 11.2.C. MEDICAID NON-COVERED LEAVE DAYS

Medicaid does not reimburse providers to hold a bed for reasons other than emergency transfer to a hospital (10-day maximum per hospital admission), or therapeutic leave (18-day maximum per 365-day period). However, the facility may hold the beneficiary’s bed for other reasons and for leave days not covered by Medicaid, and bill the beneficiary if the beneficiary:

- Has prior knowledge that the service is not a Medicaid benefit; and
- Desires to have the bed reserved; and
- Agrees, in writing, to pay the facility to hold the bed at a specified rate. (The beneficiary’s patient-pay amount may not be used for this purpose.)

If the beneficiary elects to not pay privately, the beneficiary has the option to return to the next available, equivalent bed. A beneficiary cannot be involuntarily transferred/discharged after a temporary absence, including discharge to obtain acute care in an inpatient hospital, unless the appropriate criteria are met and the appropriate regulations, policies, and procedures are followed.
Except for Medicaid-covered leave days and when beneficiaries have paid to hold a bed, the beneficiary must be discharged from the facility and then readmitted upon return to the first available bed.

All paid bed hold days (excluding Medicaid hospital leave days) must be included in the Medicaid cost report census statistics.

### 11.3 INVOLUNTARY TRANSFER OR DISCHARGE

#### 11.3.A. CONDITIONS

A nursing facility must not involuntarily transfer or discharge a beneficiary unless:

- It is necessary for the welfare of the beneficiary, and the beneficiary's needs cannot be met in the facility; *
- The beneficiary's health has improved sufficiently so the beneficiary no longer needs the services provided by the facility; *
- It is necessary to protect the safety of individuals in the facility;
- It is necessary to protect the health of individuals in the facility; *
- The beneficiary has failed, after reasonable and appropriate notice, to pay (or to initiate payment under Medicaid) for a stay at the facility; or
- The facility ceases to operate.

The facility must include documentation in the beneficiary's clinical record for any of the above circumstances.

#### 11.3.B. TRANSFER TRAUMA

For certain residents (defined below), transfer trauma must be considered when that resident may be moved due to a change in the level of nursing need.

Transfer trauma is defined as "any adverse psychological and/or physical effects occasioned by the transfer of a nursing home patient that would be materially detrimental to the physical or mental health of the patient."

Residents for whom transfer trauma must be considered include all those who have resided in the current nursing facility for at least one year, or who have been involuntarily transferred within the previous year. (A discharge to obtain acute care in an inpatient hospital, followed by an immediate readmission within three weeks to the same nursing facility, does not interrupt the continuity of a resident's stay.)

The SSA evaluates transfer trauma. This evaluation considers the social, mental and emotional adjustment of the resident, including the length of time that the resident has

* Items require documentation of medical necessity by the attending physician.
been in the nursing facility and the relationships that the resident has formed in the facility. This evaluation may also consider the resident’s age, history and success of previous placements, and history of adapting to change. Consideration must also be given to the opinion of the attending physician regarding the resident’s social and emotional adjustment and the physical effects of the proposed transfer.

Transfer trauma must be considered before the resident is notified of a nursing level of care change. When Medicaid is the payer source, Medicaid payment at the current level continues while transfer trauma is being considered.

If Medicaid was not the payer source immediately prior to the transfer trauma issue being raised, then Medicaid payment is not made until a decision is reached.

If the transfer trauma decision upholds the beneficiary’s medical need to remain in a bed not certified for his present level of care, then the beneficiary's prior level of care will be retained to provide for continued Medicaid coverage.

If it is determined that there is no issue of transfer trauma, the beneficiary must be transferred to a bed or setting appropriate for the new level of care. MDHHS will change the Benefit Plan Assignment, which can be appealed by the beneficiary or their designated representative.

Concerns about involuntary transfer and/or transfer trauma should be reported to the Health Facility Complaint Line. (Refer to the Directory Appendix for contact information.)

**11.3.C. BENEFICIARY NOTIFICATION**

Nursing facilities must give beneficiaries a 30-day written notice regarding transfer unless:

- The transfer or discharge is a health care emergency;
- The safety or health of beneficiaries or staff is endangered;
- The beneficiary agrees to the transfer/discharge;
- The beneficiary’s health has improved sufficiently so the beneficiary no longer needs the services provided by the facility; or
- The facility ceases to operate.

The notice must include:

- The reason for the transfer or discharge;
- The effective date of the transfer or discharge;
- The location to which the beneficiary will be transferred or discharged;
- The name, address, and (toll-free) telephone number of the State Long Term Care Ombudsman;
- For beneficiaries with developmental disabilities (DD), the mailing address and telephone number of the agency responsible for the protection and advocacy of DD individuals, established under the Developmental Disabilities Assistance and Bill of Rights Act;

- For nursing facility beneficiaries with mental illness (MI), the mailing address and telephone number of the agency responsible for the protection and advocacy of MI individuals, established under the Protection and Advocacy for Mentally Ill Individuals Act; and

- Appeal rights.

The facility must also provide:

- Sufficient preparation and orientation to beneficiaries to ensure safe and orderly transfer or discharge from the facility, as required by state and federal regulations; and

- Notice of the facility's bed-hold and re-admission policy, including the Medicaid bed-hold policy.

If a nursing facility elects to discontinue operations (voluntary closure) or withdraw from the Medicaid program, the facility must provide notice to the beneficiary as outlined above not less than 30 days before the closure or withdrawal. The notice must be sufficient to allow for suitable relocation arrangements.

11.4 MARRIED COUPLES

When married beneficiaries or blood relatives live in the same Medicaid nursing facility, they may share a room if both spouses or their relatives consent. (This policy applies only to beneficiaries who both require nursing facility services. It does not apply when one beneficiary does not require nursing facility services. For example, if both spouses wish to share a room in a nursing facility, in order for Medicaid to cover both of them in the facility, they must both require nursing facility services. If only one of them requires nursing facility services, Medicaid only covers services for that person.)

11.5 COMPLEX CARE

The Complex Care Prior Approval-Request/Authorization for Nursing Facilities form (MSA-1576) is used to request prior approval (PA) for the placement of a Medicaid beneficiary for whom placement from a hospital has been, or could be, hindered due to the cost and/or complexity of nursing care or special needs. The authorization covers an individually negotiated reimbursement rate for the placement. Special individualized placement requests and payment arrangements are based on medical necessity and/or service/supply needs exceeding those covered by Medicaid reimbursement for routine nursing facility care.

Examples include, but are not limited to:

- Ventilator dependent care (for nursing facilities not contracted with MDHHS to provide ventilator dependent care)

- Multiple skin decubiti utilizing several treatment modalities
Tracheostomy with frequent suctioning needs
Beneficiaries who require intensive nursing care or treatment.

Program requirements:
- Referrals must come from the nursing facility.
- Hospitals must document that at least ten (10) Medicaid certified nursing facilities within a 50 mile radius of the hospital refused to admit the beneficiary due to the complexity of the patient’s care needs.
- Nursing facilities may request approval after admitting a beneficiary if the hospital failed to accurately document the beneficiary’s condition and needs prior to transfer to the nursing facility. The nursing facility must request approval within 30 days from the date of admission to the nursing facility.

The following information must be submitted:
- A completed MSA-1576, including any requests for additional nursing, CENA, supplies or equipment. **NOTE:** The only supplies or equipment that will be considered are those not included in the facility’s per diem rate or not separately billable by a Medicaid-enrolled medical supplier. An electronic copy of the form is available on the MDHHS website. (Refer to the Directory Appendix for website information.) (Refer to the Medicaid Service Descriptions Section of this chapter for information regarding what services are to be provided by the NF as part of the daily per diem reimbursement.)
- The beneficiary’s medical background, including:
  - current medical status;
  - admitting history and physical;
  - a copy of all consultations;
  - most recent three-day physician progress notes;
  - treatment/nursing care plan; and
  - justification for any additional nursing hours and/or special equipment requested.
  (This information should be included on the MSA-1576.)
- Recent (within the past 30 days) lab, x-ray, and diagnostic or therapeutic test results or reports.
- A list of 10 nursing facilities (as documented by the hospital) within a 50-mile radius that have denied admission, including:
  - Name, address, and telephone number of the nursing facility
  - Contact person’s name and title
  - Date of contact
  - Reason for denial
- Documentation of the financial resources available to the beneficiary, including:
  - Medicaid coverage
- Medicare Parts A and B
- Other commercial insurance coverage.

- Name and telephone number of a contact person at the nursing facility seeking the additional reimbursement for complex care.

It may take up to 15 business days for the MSA-1576 to be processed. If it appears that a beneficiary, upon discharge, will require intensive nursing care, the hospital's discharge planning coordinator should initiate the MSA-1576 as early in the beneficiary's hospital stay as possible to ensure a smooth transition to the nursing facility.

MDHHS will make a determination and return to the provider a letter indicating approved, denied, insufficient data, no action, or approved as amended. If approved, the approval letter will contain a PA number with start and end dates. To renew a request, the facility must submit another MSA-1576 at least 15 business days prior to the expiration/end date.

A beneficiary residing in a nursing facility with an active complex care prior authorization for vent care for two consecutive years must receive a pulmonary evaluation at the beginning of the third year and annually thereafter. A beneficiary may be exempt from the annual pulmonary evaluation if, at the time the scheduled evaluation is due, the beneficiary elects not to have the evaluation, the physician documents a medical reason to not perform it, or the beneficiary received a pulmonary evaluation within the current year, such as during a hospital stay. If the beneficiary chooses not to have the evaluation, the nursing facility must notify the beneficiary's physician of that decision. Documentation of the decision to decline the evaluation by either the beneficiary or the physician must be in the beneficiary's medical record.

11.6 ONE-DAY STAY

A nursing facility is reimbursed for a one-day stay if a Medicaid beneficiary is admitted to the facility and, the same day, is discharged from the facility due to death, return home, or transfer to another institution that is not a Medicaid-enrolled provider. The one-day stay does not apply to a beneficiary admitted to a nursing facility if, later that day, the beneficiary is discharged and transferred to another nursing facility or an inpatient hospital and, at midnight, the second facility or hospital claims the beneficiary in its daily census.

A one-day stay must be included in the Medicaid census statistics.
11.7 **Religious Non-medical Health Care Center**

Religious Non-medical Health Care Centers may be licensed as nursing facilities and certified for Medicaid. Beneficiaries in Medicaid-certified facilities, under the care of a practitioner, may be determined to be in need of nursing care and, therefore, covered by Medicaid.
SECTION 12 - SPECIAL PROVIDER TYPE COVERAGE AND LIMITATIONS

12.1 HOSPITAL SWING BEDS

In order to address the shortage of rural nursing facility beds, federal requirements allow rural hospitals to provide post-hospital extended care services. Such a hospital, known as a swing bed hospital, can "swing" beds between hospital and nursing facility levels of care on an as-needed basis. In order to receive Medicaid reimbursement, hospital swing beds must meet all applicable state and federal requirements and provide all required services.

Providers of hospital swing bed services may bill Medicaid for hospital swing bed days only when the combined length of stay in the acute care bed and swing bed exceeds the average length of stay for the Medicaid inpatient diagnosis related group (DRG) of the admission. Hospitals that are exempt from the DRG reimbursement system may bill for Medicaid-covered swing bed days beginning the day of admission to the swing bed.

The total number of Medicaid-reimbursed hospital swing bed days is limited to 100 days per beneficiary per calendar year.

A hospital swing bed provider must not provide extended care services if the hospital owns or operates a hospital long-term care unit that has beds available at the time a patient requires admission for extended care services.

Medicaid does not require the MDS for clinical assessment purposes or reimbursement for beneficiaries in hospital swing beds. The PASARR process must be completed, as outlined earlier in this chapter, prior to placement in a nursing facility.

(Refer to the Billing & Reimbursement for Institutional Providers Chapter of this manual for additional swing bed billing instructions.)

12.2 VENTILATOR-DEPENDENT CARE UNITS

There may be occasions when a beneficiary no longer requires acute hospital care but requires specialized care in a Ventilator Dependent Care Unit (VDCU). Medicaid authorizes admission of ventilator dependent Medicaid beneficiaries to hospital and nursing facility ventilator units with which it has agreements to provide VDCU services, and for which there is an enhanced Medicaid reimbursement.

12.2.A. PLACEMENT CRITERIA

A request for placement must show that the:

- Beneficiary is dependent on life-supporting mechanical ventilating equipment for at least six hours per day.
- Beneficiary stay normally meets or exceeds the hospital high-day outlier threshold for DRG 207.
Approval for admission to a VDCU will not be given for a beneficiary who is only on CPAP or BiPAP. If a beneficiary has weaning potential or requires other rehabilitative services (in addition to the respiratory care) and is enrolled in a Medicaid Health Plan (MHP), the MHP is responsible for the first 45 days reimbursement in the post-acute setting. If there is no weaning potential and the beneficiary does not require rehabilitative services, disenrollment from the MHP may occur at the time the beneficiary is discharged from the hospital.

The MHP is responsible for initiating disenrollment of a beneficiary by submitting the Request for Disenrollment Long Term Care form (MSA-2007) to MDHHS.

In situations where a beneficiary cannot immediately be placed in a nursing facility or hospital VDCU, Medicaid will cover nursing days in the inpatient hospital. When the beneficiary is in a hospital setting because a nursing facility placement is not available, Medicaid will cover the ancillary services provided by the hospital.

The hospital cannot charge a beneficiary the difference between the hospital’s charge and the MDHHS payment for nursing days.

If a beneficiary refuses an appropriate placement to a VDCU, the beneficiary is responsible for all hospital charges incurred after the date of referral.

12.2.B. AUTHORIZATION FOR VDCU PLACEMENT

To begin the prior authorization process once a VDCU has agreed to accept the beneficiary, the VDCU must contact (by telephone) the MDHHS Medicaid Prior Authorization Contractor for authorization. The MDHHS Medicaid Prior Authorization Contractor will consider the request for ventilator-dependent unit care based on current Medicaid policy. The request will be approved or denied immediately during the telephone call. (Refer to the Directory Appendix for contact information.)

Note: If the PA request is approved, the MDHHS Medicaid Prior Authorization Contractor will:

- request the VDCU’s National Provider Identifier (NPI) for inclusion in the prior authorization record; and
- provide the VDCU with a prior authorization number for billing purposes.

The nursing facility must report any change of condition, such as weans from ventilators, transfers, discharges, re-hospitalizations and deaths of these complex care residents to the MDHHS Medicaid Prior Authorization Contractor.

Residents who are weaned from their ventilators will be allowed a 14-day stay in the VDCU from the date they are removed from the ventilator, at the allotted VDCU reimbursement rate, in order to assure complete wean is maintained. Once the 14 days of successful wean has been maintained, it is then the responsibility of the VDCU to
transfer the resident to a Medicaid LTC bed within the facility, transfer the resident to
another nursing facility, or discharge the resident home with appropriate care planning
involving family, responsible party, and community resources. Once successful wean has
been maintained, the PA number will be retired.

If a beneficiary is in need of therapy, prior authorization for the therapy must be
obtained under the VDCU’s NPI. (Refer to the Nursing Facility Claim Completion
section of the Billing & Reimbursement for Institutional Providers chapter for
additional information.)

12.2.C. NON-AUTHORIZATION OF NEW ADMISSIONS TO A MEDICAID APPROVED VDCU IF FACILITY
HAS A SURVEY CITATION OF ACTUAL HARM

New admissions to a VDCU will not be approved from the date a nursing facility receives
the CMS-2567 (written survey report) containing the survey citation at a level of actual
harm or higher on the scope and severity grid (G, H, I, J, K or L) pertaining to a resident
or residents of the VDCU. Authorizations of new admissions will resume when the
Department of Licensing and Regulatory Affairs, State Survey Agency notifies the State
Medicaid Agency that all deficiencies have been corrected and the facility has been found
to be in substantial compliance. This policy does not apply to the renewal of
authorizations for Medicaid beneficiaries residing in a VDCU prior to the survey citation of
actual harm.

SECTION 1 – INTRODUCTION

Michigan Department of Health and Human Services (MDHHS), under an approved State Plan as required by the Social Security Act, is responsible for annual Medicaid certification of all nursing facilities (other than State-owned facilities). Michigan Department of Licensing and Regulatory Affairs (LARA) is responsible for ensuring all Medicaid-certified nursing facilities are in compliance with Health Survey and Life Safety Code Survey requirements.

As required by federal law, the State Medicaid Agency (MDHHS, Medical Services Administration) has entered into an interagency agreement with the State Survey Agency (Michigan Department of Licensing and Regulatory Affairs [LARA], Bureau of Community and Health Systems [BCHS]) to conduct surveys of Medicaid providers and applicants. The State Medicaid Agency (SMA) accepts State Survey Agency (SSA) certification decisions as final, but exercises its own determination whether to enter into agreements with providers.

For the purposes of this appendix, a Medicaid-certified nursing facility (NF) is defined as a non-state-owned nursing home, county medical care facility, or hospital long term care unit with Medicaid certification. This appendix includes information regarding Medicaid certification of nursing facilities, staff certification, the survey process, and enforcement remedies when facilities are not in compliance with applicable requirements.
SECTION 2 - MEDICAID CERTIFICATION AND DE-CERTIFICATION OF NURSING FACILITY BEDS AND MEDICAID PROVIDER ENROLLMENT

This Section describes Medicaid certification requirements for nursing facilities, certification and de-certification of nursing facility beds, and how nursing facility providers enroll in Medicaid.

The SMA is responsible for initial certification and annual certification of beds for nursing facilities seeking Medicaid reimbursement. In order for a provider to receive Medicaid reimbursement for nursing care, the nursing facility beds must be Medicaid certified by the SMA and the provider must be enrolled with Medicaid. The SSA is responsible for conducting any required certification surveys for the SMA.

2.1 DUAL CERTIFICATION

MDHHS requires all new Medicaid-certified nursing facility beds to also be certified for Medicare. Requests for certification of new Medicaid beds that are not Medicare-certified will be denied. Requests for initial Medicare certification may be made to the provider’s SSA Licensing Officer. Facilities must meet state and federal regulations for certification.

Providers may seek annual certification of nursing facility beds currently certified as Medicaid-only. Beds that were certified as Medicaid-only as of August 1, 2004 are not required to become Medicare-certified. This exception also applies to Medicaid-only certified beds that were designated as unavailable for occupancy on August 1, 2004. However, MDHHS strongly encourages Medicare and Medicaid (dual) certification of all nursing facility beds in order to maximize access for beneficiaries.

A nursing facility that has certified beds that were granted an exception under this policy, and that is subsequently involved in circumstances that would require it to enroll with Medicaid (such as a change in ownership), must secure Medicare certification for Medicaid beds within one year. A provider’s failure to secure dual certification for all Medicaid-certified beds will result in denial of Medicaid certification and termination of Medicaid enrollment.

A provider that requests new Medicaid certification for some beds in a nursing facility must dually certify all Medicaid beds in the facility before any new Medicaid bed certifications will be approved for the facility, even if the existing Medicaid-certified beds were granted an exception under this policy. For example, a nursing facility has a distinct part or unit that is certified as Medicaid-only and is granted an exception under this policy. The provider adds a new wing and requests Medicaid certification for the new beds. The new beds will be approved for Medicaid certification only if all Medicaid beds in the nursing facility are also certified for Medicare, including the beds in the historically Medicaid-only unit.

A licensed nursing facility entity that becomes a provider as a result of the purchase of a previously closed or currently operating Medicaid-only nursing facility must receive Medicare certification for all Medicaid-certified beds in that nursing facility within one year from the date of purchase of an operating nursing facility or the date of reopening of a previously closed nursing facility. The provider will receive a provisional Medicaid provider agreement while pursuing Medicare certification of the Medicaid-certified beds. This provisional agreement is time limited and holds the provider to the loss of Medicaid certification and disenrollment without appeal if Medicare certification is denied. If warranted, the SMA may grant an additional grace period contingent upon evidence that substantial progress has been made toward Medicare certification. Failure to meet this requirement will result in de-certification of the Medicaid beds and termination of Medicaid enrollment.
A nursing facility that currently has Medicare certification of its Medicaid beds must maintain the dual certification. A nursing facility that voluntarily disenrolls or decertifies beds from Medicare will lose Medicaid certification of those beds. A nursing facility that loses its Medicare certification through the Centers for Medicare & Medicaid Services (CMS) regulatory enforcement actions will automatically lose its Medicaid certification. An exception or exemption to this dual certification may be made pursuant to the provisions contained in Section 21718 of P.A. 368 of 1978 (MCLA 333.21718). Any exception or exemption granted to a nursing facility under Section 21718 of P.A. 368 of 1978 prior to August 1, 2004 will be recognized.

Facilities granted a Certificate of Need (CON) for special population beds, as defined in the Certificate of Need Review Standards for Nursing Home and Hospital Long-Term Care Unit Beds, are also required to dually certify some types of special population beds (e.g., ventilator dependent care beds). ICF/IID or MI beds need not be dually certified.

A provider must request and receive dual Medicaid and Medicare certification for new Medicaid beds acquired through the CON process, e.g. new construction or the redistribution of certified beds.

### 2.2 Medicaid Bed Certification Limits

Individual facilities seeking to enroll in the Medicaid program or seeking to increase the number of Medicaid-certified beds must apply as outlined in the Medicaid Nursing Facility Bed Certification Process subsection of this appendix. Requests to the SMA will be reviewed in date order and must be received 45 days before the first of the month beginning the next quarter of the provider’s cost reporting year. MDHHS will authorize Medicaid-certified beds, limited by the aggregate Upper Bed Limit (set in 1996 at 47,542), based on the criteria outlined in the Criteria for Evaluation of Medicaid Bed Certification Requests subsection. Preference will be given to facilities that are requesting Medicaid certification in order to dually certify beds, to facilities that are creating innovative living environments for beneficiaries who choose nursing facility care, and to facilities in geographic areas with limited Medicaid accessibility. Changes in bed certifications will take place after approval is granted effective on the first of the month beginning the next quarter of the provider’s cost reporting year. Changes in bed certifications will not be approved on a retroactive basis.

### 2.3 Criteria for Evaluation of Medicaid Bed Certification Requests

The SMA will collaborate with the SSA when making a determination regarding the approval or denial of any application for Medicaid bed certification and provider enrollment. Approval or denial of an application to MDHHS for Medicaid bed certifications will be based on the following criteria:

- Verification from the SSA that the beds are also Medicare-certified.
- The nursing facility’s historical and current survey performance demonstrates no regulatory deficiencies or only deficiencies with minimal impact on residents. The nursing facility has not been subject to one of the following actions or concerns within two years (or as noted) of the filing of an application for Medicaid bed certification:
  - A state enforcement action involving license revocation, a limited or total Ban on Admissions, reduced license capacity, selective transfer of residents, receivership, or appointment of a clinical/administrative advisor or temporary manager.
  - Termination of Medicaid enrollment initiated by MDHHS.
A state rule violation showing failure to comply with state minimum staffing requirements and/or a federal citation documenting potentially harmful resident care deficits resulting from insufficient staff.

A state or federal finding of Immediate Jeopardy.

Repeat citations at the harm or substandard quality of care level. "Repeat citation" is defined as two citations of the same federal deficiency, or two or more citations within the same regulatory grouping, at the substandard quality of care, harm, or Immediate Jeopardy levels, issued within the last two years or two standard survey cycles.

A number of citations at Level Two or above on the scope and severity grid on two consecutive standard surveys that exceeds twice the statewide average number of citations. (The time frame for this criterion may exceed two years.)

A number of citations resulting from abbreviated surveys at Level Two or above on the scope and severity grid during any calendar year that exceeds twice the statewide average of abbreviated survey citations.

A federal or state termination or decertification action.

A federal or state action to deny payment for new or all admissions.

A filing of bankruptcy or failure to meet financial obligations that threatens the ability of the nursing facility to achieve or maintain compliance with state and federal requirements.

An outstanding debt to MDHHS (i.e., cost settlement, civil money penalty [CMP] fine, provider Quality Assurance Assessment Program (QAAP) tax, licensing fees). This does not include financial issues that are in the appeal process.

NOTE: When a provider sells a nursing facility, the provider is responsible for all QAAP assessments billed and incurred prior to the date of the sale. The purchaser(s) must assure escrow of any outstanding QAAP amounts owed, or the purchaser(s) becomes responsible for payment of the QAAP and penalty amounts owed before Medicaid participation is granted.

Failure to comply with a state correction notice order.

Enforcement action against the administrator's license in current or previously administered nursing facilities.

Any other concerns reasonably related to the ability of the nursing facility to maintain compliance with Medicare and Medicaid Requirements for Long Term Care Facilities or to provide appropriate care to residents.

If currently enrolled as a Medicaid provider, in addition to the criteria above, must be a provider in good standing, defined as:

- The nursing facility, owner(s), administrator, or other staff are not sanctioned or excluded by Medicare or Medicaid;
- The nursing facility is in compliance with the Medicare and Medicaid Requirements for Long Term Care Facilities.
Medicaid may enter into a provisional enrollment with a provider (or the owner or management company) that does not meet the above criteria if:

- The applicant and the owner or management company take actions acceptable to MDHHS to correct, improve or remedy any conditions or concerns that would result in denial of the application; and
- The applicant and the owner or management company attains and maintains compliance with the criteria above during the period of the provisional Medicaid enrollment. Failure of the provider to comply with the terms of the conditional agreement will result in termination without appeal of the provisional Medicaid enrollment.

### 2.4 Medicaid Nursing Facility Bed Certification Process

Current providers who wish to change their Medicaid-certified beds (increase, decrease, relocate) and providers who wish to enroll in the Medicaid Program may do so as outlined in this subsection. A written request to change Medicaid-certified beds must contain the following:

- Number and location of facility beds.
- Current certification designation of all facility beds by unit or wing.
- Requested number and proposed location of increased, decreased, or relocated Medicaid beds, with an attached layout of the facility showing the current and proposed distribution of beds.

A provider may request a change in Medicaid bed certifications at the time of annual survey and any time throughout the year up to once per quarter.

The change in bed certifications will take place after approval is granted effective on the first of the month beginning the next quarter of the provider’s cost reporting year. Changes in bed certifications will not be approved on a retroactive basis.

In addition to the process outlined below, nursing facilities must abide by the procedures outlined in the State Operations Manual, Section 3202.

MDHHS will respond to Medicaid bed certification requests with a determination within 45 days of receipt of all requested information.

### 2.4.A. Bed Certification Process for Medicaid Enrolled Providers

Nursing facilities that are currently enrolled with Medicaid and want to change their number of Medicaid-certified beds must file a written request with their SSA Licensing Officer and with the SMA. The SMA and the SSA will coordinate regarding the consideration and disposition of requests for additional Medicaid beds. The SSA will conduct surveys as needed. Medicaid approval or denial of the application will be based on the considerations outlined in the Criteria for Evaluation of Medicaid Bed Certification Requests and the Dual Certification subsections of this appendix.

Once the SMA makes a determination regarding the request for additional Medicaid bed certifications, the provider, the SSA, MDHHS Provider Enrollment, and the MDHHS LTC Reimbursement and Rate Setting Section (RARSS) will be notified, in writing, by the SMA.
If the request is denied, the provider will be notified of their appeal rights in writing. If the request is approved, the SSA will be notified by the SMA of the change. The SSA will also notify the provider of the change.

2.4.B. BED CERTIFICATION PROCESS FOR NURSING FACILITIES NOT ENROLLED IN MEDICAID

This subsection applies to providers operating existing facilities that have not previously participated in the Medicaid Program, or providers seeking to certify Medicaid beds following the loss of certification due to a regulatory action.

Non-Medicaid providers seeking to receive Medicaid certification for nursing facility beds and receive Medicaid payment must file a written request with their SSA Licensing Officer and with the SMA. The SMA and the SSA will coordinate regarding the consideration and disposition of the request for Medicaid bed certifications. The SSA will conduct surveys as needed. Medicaid approval or denial of the application will be based on the considerations outlined in the Criteria for Evaluation of Medicaid Bed Certification Requests subsection of this appendix.

Once the SMA makes a determination regarding the request for additional Medicaid bed certifications, the provider, the SSA, MDHHS Provider Enrollment, and RARSS will be notified, in writing, by the SMA. If the request is denied, the SMA will notify the provider of their appeal rights in writing. If the request is approved, the SMA will notify the provider or SSA of the change. The SSA will also notify the provider of the change.

The provider must also enroll in Medicaid as outlined in the Medicaid Provider Enrollment subsection of this appendix.

2.4.C. BED CERTIFICATION PROCESS DURING A CHANGE IN OWNERSHIP (CHOW) [CHANGE MADE 7/1/18]

A provider seeking a change in ownership of a nursing facility must first receive approval through the CON process within MDHHS. The new provider can avoid a delay in payment and address any potential certification issues by submitting a written 90-day advance notice, plus a copy of the sale and/or lease agreement, to the SSA Licensing Officer, the SMA/LTC Services Section and RARSS. (Refer to the Directory Appendix for contact information.)

The following are changes in ownership that must be reported to the SMA and SSA, regardless of whether a CON is required:

- A change from sole proprietorship to partnership or corporation,
- A change from partnership to sole proprietorship or corporation,
- A change from corporation to sole proprietorship, partnership or corporation,
- Sale or lease of a nursing facility,
- Transfer or sale of stock resulting in a change of the controlling interest in a privately held company,
Consolidation or merger of two or more corporations that results in the creation of a new corporation.

If the new owner does not want to make any changes in bed certifications, no additional action regarding certifications is required and the certifications continue as they were under the previous owner. However, if the facility has beds designated as Medicaid-only, the new owner must dually certify all Medicaid beds within one year as outlined in the Dual Certification subsection. As part of the CHOW approval process, the SMA may deny bed certifications and recommend against Medicaid enrollment based on the criteria in the Criteria for Evaluation of Medicaid Bed Certification Requests subsection. In addition, dual certification requirements apply as outlined in the Dual Certification subsection.

If the new owner wants to change the bed certifications, a written request must be filed with the SSA Licensing Officer and with the SMA Long Term Care Services Section. The SMA and the SSA will coordinate regarding the consideration and disposition of the request for additional Medicaid bed certifications. The SSA will conduct surveys as needed. Medicaid approval or denial of the application will be based on the considerations outlined in the Criteria for Evaluation of Medicaid Bed Certification Requests subsection.

Once the SMA makes a determination regarding the request for additional Medicaid bed certifications, the provider, the SSA, MDHHS Provider Enrollment, and the RARSS will be notified, in writing, by the SMA. If the request is denied, the SMA will notify the provider of appeal rights in writing. If the request is approved, the SMA will notify the SSA of the change. The SSA will also notify the provider of the change.

A new owner is considered a new provider and must enroll in Medicaid as outlined in the Medicaid Provider Enrollment subsection, regardless of whether any bed certification changes are made.

Under a change of ownership (CHOW), a nursing facility must not notify the local MDHHS office if there is a change in the facility’s NPI/Medicaid Provider ID number. Rather, the change of ownership submission completed by the facility in the CHAMPS Provider Enrollment subsystem will automatically update the admission or discharge data for these beneficiaries in CHAMPS by moving them to the new NPI once the change of ownership is approved by MDHHS staff. Nursing facilities will not be required to update the admission or discharge data in CHAMPS for these beneficiaries when a change in ownership occurs. (added per bulletin MSA 17-46)

2.4.D. BED CERTIFICATION PROCESS FOR A NEW NURSING FACILITY OR NEWLY LICENSED NURSING FACILITY BEDS

A provider seeking to build a new nursing facility, build a new section of a nursing facility, significantly remodel, or newly license nursing facility beds must first receive approval through the CON process within MDHHS.
Providers seeking to receive Medicaid certification for the new nursing facility beds and receive Medicaid payment must file written requests with the SSA Licensing Officer and with the SMA. The SMA and the SSA will coordinate regarding the consideration and disposition of the request for Medicaid bed certifications. Medicaid approval or denial of the application will be based on the Criteria for Evaluation of Medicaid Bed Certification Requests.

Once the SMA makes a determination regarding the request for additional Medicaid bed certifications, the provider, the SSA, MDHHS Provider Enrollment, and RARSS will be notified in writing. If the request is denied, the SMA will notify the provider of appeal rights in writing. If the request is approved, the SMA will notify the SSA of the change. The SSA will also notify the provider of the change.

If not already enrolled, the provider must enroll in Medicaid as outlined in the Medicaid Provider Enrollment subsection.

2.5 Medicaid Enrollment as a Ventilator Dependent Care Unit (VDCU) and Additional VDCU Beds

Medicaid approval or denial of Medicaid enrollment as a VDCU and requests to increase the number of VDCU beds is based on Medicaid policies in the Dual Certification and the Criteria for Evaluation of Medicaid Bed Certification Requests sections of this appendix. In addition, VDCU requests will be coordinated with the facility’s Licensing Officer in the LARA Bureau of Community and Health Systems (BCHS) Long-Term Care Division and the Health Facilities Division, Health Facilities Engineering Section.

2.6 Medicaid Provider Enrollment

To enroll with Medicaid, a nursing facility must:

- Receive CON approval of the beds (new providers and CHOW)
- Receive written notice from the SMA approving the Medicaid bed certifications.
- Complete a New Provider Information Packet to establish data with the RARSS. (A New Provider Information Packet may be obtained from RARSS or the MDHHS website. Refer to the Directory Appendix for contact and website information.)
- Complete the on-line CHAMPS Provider Enrollment application process. Refer to the Provider Enrollment Section of the General Information for Providers Chapter for additional information.

A provider will not be enrolled with Medicaid until all of the above requirements are met.

NOTE: The provider’s employer identification or tax identification number (EIN/TIN) registered with the Vendor Registration System must agree with the EIN/TIN on file with the RARSS and in the nursing facility enrollment information in the CHAMPS Provider Enrollment system.

2.7 Notification Process for Regulatory Actions

MDHHS or CMS may make decisions that result in the loss or reduction of a provider’s Medicaid-certified beds. Loss of certification, or de-certification, means that Medicaid will no longer pay for any service in the nursing facility related to the de-certified beds.
MDHHS or its designee notifies the following entities, in writing, of the loss of Medicaid certification at least 30 days prior to the effective date of payment termination:

- The affected nursing facility,
- The local MDHHS office, and
- The public by means of public notice in a local newspaper.

This notification of the nursing facility’s loss of certification will state that residents must either:

- Make other arrangements for payment to the nursing facility; or
- Relocate to a setting that is Medicaid certified.

The provider may request assistance from MDHHS to coordinate relocation for those beneficiaries who wish to transfer. MDHHS may choose to apply the Nursing Facility Closure Protocol described in the Nursing Facility Closure Protocol subsection to protect the best interests of residents faced with transfer.

### 2.8 Nursing Facility Closure Protocol

An interagency agreement exists, including the SMA, the Aging and Adult Services Agency (AASA), the SSA, and MDHHS, to delineate the roles and responsibilities of the respective agencies when residents of licensed/certified nursing facilities must be relocated due to nursing facility involuntary or voluntary closure. The agreement applies to all nursing facilities, including those that are county medical care facilities or hospital long-term care units. At the time of a closure, the nursing facility will be provided with a copy of this agreement and contact information for the agency representatives who will be involved in the closure.

### 2.9 Voluntary Withdrawal From Participation in the Medicaid Program or Voluntary Nursing Facility Closure

A provider may choose to close voluntarily, not as a result of regulatory action. A provider may also choose to continue operating as a nursing facility, but withdraw from participation in the Medicaid Program. In both situations, the nursing facility must follow established guidelines to assure safe and appropriate care of residents.

When a provider decides to close voluntarily, the administrator of the nursing facility must provide written notification prior to the impending closure to the:

- State Survey Agency (SSA),
- State Medicaid Agency (SMA) /Long Term Care (LTC) Services Section,
- LTC Ombudsman,
- Residents of the nursing facility, and
- Legal representatives of such residents or other responsible parties.

Written notice must be provided at least 60 days before the date of closure. Note: In cases where the Secretary of the U.S. Department of Health & Human Services (HHS) terminates the facility’s participation in either the Medicare and/or Medicaid programs, notice must be provided no later than the date that the...
Secretary of the U.S. Department of Health & Human Services (HHS) determines appropriate for such notification.

This 60-day notice requirement begins before any attempt to transfer a resident out of the facility in anticipation of a facility closure/withdrawal. The provider must ensure that no new residents are admitted on or after the date on which such written notification is submitted.

The written notice of a voluntary closure must include the plan for closure. The plan must be approved by the SSA and the SMA/LTC Services Section prior to notification of residents of the closure. The plan must outline the transfer and adequate relocation of residents that assures placement in the most appropriate facility or other setting in terms of quality, services, and location, taking into consideration the needs, choice, and best interests of each resident.

Upon approval of the plan by the SSA and the SMA/LTC Services Section, actual notice of closure must be given, which means that the notice must be given to the resident and a family member or legal representative in a form that they can understand and must be explained to them as needed. The notice must include the plan as approved by the State for the transfer and adequate relocation of the residents by the date specified by the State prior to closure. It must also include assurances that the residents would be transferred to the most appropriate facility or other setting in terms of quality, services, and location, including home or community-based settings, taking into consideration the needs, choice, and best interests of each resident. The notice must include contact information for the LTC Ombudsman and the Area Agency on Aging.

In the event of a voluntary closure, the nursing facility remains Medicaid-certified until all residents are relocated.

If the nursing facility chooses to withdraw from Medicaid but remain open as a licensed nursing facility, residents who are Medicaid eligible at the time of facility disenrollment may remain in the facility and receive Medicaid payment. The nursing facility’s Medicaid enrollment will continue for purposes of payment for state plan services as long as Medicaid residents remain in the facility.

The interagency agreement referenced in the Nursing Facility Closure Protocol subsection of this appendix addresses voluntary closures as well as regulatory closures, and outlines the responsibilities of the state agencies involved. The SSA monitors the withdrawal or closure of a nursing facility. The provider may request MDHHS assistance with resident relocation if needed.

If the provider does not fulfill their responsibilities for the safe and appropriate relocation of residents, as reported by the SSA, the State Closure Team may change the closure into a regulatory action. At that point, the closure becomes non-voluntary and the State Closure Team may request the assistance of a closure agent or take other measures to insure a safe and orderly transfer of residents. The interagency agreement referenced in the Nursing Facility Closure Protocol subsection of this appendix would apply.

2.10 NURSING FACILITY FILING OF BANKRUPTCY

Medicaid-enrolled providers are required to notify the MDHHS Long Term Care Services Section Manager and the RARSS Manager immediately upon filing for bankruptcy. (Refer to the Directory Appendix for contact information.)
2.11 RE-ENTRY AFTER DE-CERTIFICATION

A nursing facility may re-enter the Medicaid Program after decertification (whether voluntary or involuntary) if the following conditions are met:

- Submission of a request to the SSA for re-entry, including documentation indicating that the factors leading to a regulatory termination no longer exist.
- Evidence that all of the applicable statutory and regulatory requirements have been met.
- There is reasonable assurance that the deficiencies that caused the regulatory termination will not reoccur.
- The facility is concurrently pursuing Medicare certification.
- The facility meets all enrollment criteria outlined in this section.

Upon re-entry into the Medicaid Program, all Medicaid beds must also be Medicare certified.

The process for re-entering the Medicaid Program includes:

<table>
<thead>
<tr>
<th>ACTION</th>
<th>DESCRIPTION OF PROCESS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Application</td>
<td>The nursing facility must make application for program re-entry to the SSA. The SSA forwards the completed application and evidentiary confirmation to CMS and the SMA for review and processing. A nursing facility may apply for re-certification at any time; however, the Criteria for Evaluation of Medicaid Bed Certification Requests apply as outlined in this section.</td>
</tr>
<tr>
<td>Departmental Review</td>
<td>The SMA makes a formal review of the nursing facility's financial status and requests confirmation of compliance with all civil rights requirements from the Office of Civil Rights (OCR). If financial responsibility and compliance with the civil rights requirements are confirmed, a reasonable assurance period (not subject to appeal) is set and the SSA is asked to conduct an initial survey.</td>
</tr>
<tr>
<td>ACTION</td>
<td>DESCRIPTION OF PROCESS</td>
</tr>
<tr>
<td>----------------</td>
<td>-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
</tbody>
</table>
| Survey Activity| There will be at least two surveys during the reasonable assurance period.  
|                |   - **Initial Survey** - A survey is conducted at the beginning of the reasonable assurance period to document compliance with previously cited deficiencies. The initial survey may be a partial or full survey at the discretion of LARA. A finding of substantial compliance at this survey will allow the nursing facility to begin the reasonable assurance period. If the nursing facility is found to not be in substantial compliance, then it must re-apply.  
|                |   - **Second Survey** - A full survey must be conducted and the nursing facility must be in substantial compliance in order for the reasonable assurance period to end. The SSA will schedule the survey to coincide with the end of the established reasonable assurance period. If the nursing facility has maintained compliance during the reasonable assurance period, it may be approved for Medicaid enrollment. If the nursing facility is not in substantial compliance at the second survey, it must enter another reasonable assurance period if it continues to seek re-entry into Medicaid.  
<p>|                |   - <strong>General Survey Protocol</strong> - Facilities are afforded the same rights for challenging survey results as in the standard certification process, which is through the administrative review process within the SSA. During the reasonable assurance period, the SSA may conduct as many surveys as approved by Medicaid to document compliance with state and federal requirements. Surveys are unannounced; therefore, the nursing facility will only receive acknowledgement of receipt of the approved application and that Medicaid enrollment is based on the outcomes of the surveys conducted. All survey reports (CMS-2567L) are forwarded to the SMA within 10 working days to determine the significance of any findings and the resultant action plan. The results of each survey are evaluated to ensure that the reasons for the termination no longer exist or are at the level of substantial compliance (Level One – Cells A, B or C). Facilities are notified of the determination, in writing, by the SMA. If the SSA determines that the conditions for re-entry are met, Medicaid enrollment will be approved. If the SSA determines that the conditions for re-entry have not been met, the SSA will send the provider a denial letter. The nursing facility may correct the deficiencies and re-apply for certification, resulting in another reasonable assurance period.  |</p>
<table>
<thead>
<tr>
<th>ACTION</th>
<th>DESCRIPTION OF PROCESS</th>
</tr>
</thead>
</table>
| Reasonable Assurance Period   | The reasonable assurance period is designed to assure that a nursing facility can operate for a certain period of time without the re-occurrence of the deficiencies that led to termination from participation in the program(s). The SMA contacts the SSA to conduct surveys during the reasonable assurance period. The reasonable assurance period begins when the initial survey is completed, which assures LARA that the nursing facility is complying with requirements for which they were originally de-certified. The SMA will establish a reasonable assurance period, typically from one to six months duration. The length of the reasonable assurance period is not subject to appeal. The time frame for reasonable assurance is based upon criteria, which may include:  
  ▪ A history of maintaining compliance  
  ▪ Absence of a pattern of repeat citations  
  ▪ Timely submission of plans of correction and implementation of approved plans of correction when needed  
  ▪ Number of adverse actions initiated in the past three years  
  ▪ History of termination and re-admission to the program  
  ▪ Current compliance status  
  ▪ Existence of other factors that may affect compliance, e.g., staffing concerns, turnover of key personnel, pay scale  
  
  The SMA will not approve Medicaid enrollment until the reasonable assurance period has been satisfied. During the reasonable assurance period, the nursing facility must:  
  ▪ Employ adequate management and care staff to provide care in accordance with all applicable federal, state and local regulations.  
  ▪ Limit admissions to two residents per day or four residents in a seven-day period, regardless of payment source.  
  ▪ Develop an admissions informed consent document that is acceptable to the SMA and that explains the re-entry process. The document should further explain to the resident (or authorized representative) that his residency in the nursing facility could be temporary and a transfer to another setting may be necessary if the nursing facility fails to meet all of the requirements for certification. This notice must be explained to, and signed by, the resident or his authorized representative. A signed copy of this document must be placed in the resident's record. |
<p>| Appeals Procedure             | An applicant may appeal a denial of Medicaid enrollment by submitting a written request within 60 days of the date of the denial decision. The appeal should be addressed to the Michigan Administrative Hearing System (MAHS). (Refer to the Directory Appendix for contact information.) The written appeal must include documentation to support the appeal. If the applicant fails to submit documentation within the 60 days, then the denial decision remains in effect. |</p>
<table>
<thead>
<tr>
<th>ACTION</th>
<th>DESCRIPTION OF PROCESS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Payment</td>
<td>Providers are eligible for Medicaid reimbursement when the nursing facility has been found to meet the conditions for re-entry and is an enrolled Medicaid provider. Under extraordinary circumstances, the SMA may elect to enter into a provisional Medicaid provider agreement during the reasonable assurance period. In most cases, Medicaid reimbursement is not available until the facility has met all required conditions.</td>
</tr>
</tbody>
</table>

2.12 **NON-AVAILABLE BEDS**

Any nursing facility bed is considered available for occupancy if the bed is licensed and Medicaid certified, unless it is removed from service due to a regulatory ban on admissions or removed voluntarily using the SMA's non-available bed policy.

The SMA allows nursing facilities to designate beds as non-available, thereby removing them from the occupancy and rate setting calculations. For more information on this policy, refer to the Cost Reporting & Reimbursement Appendix of this chapter.
**SECTION 3 - STAFF CERTIFICATION**

All health care professionals performing duties within Medicaid-certified nursing facilities must possess the licensure and certification credentials required for their individual disciplines.

**3.1 NURSE AIDE CERTIFICATION AND TRAINING**

A nurse aide employed in a Medicaid-certified nursing facility must be a Certified Nurse Aide (CNA). Medicaid reimburses facilities through the annual cost settlement process for the Medicaid share of documented costs directly related to meeting the nurse aide training and testing requirements. Training programs and testing sites must be approved by the SSA in order for those costs to be reimbursed by Medicaid. A nursing facility may not charge its employed aides for training, testing, and registry costs related to meeting these requirements. (Refer to the Cost Reporting & Reimbursement Appendix of this chapter for additional information.)

The SSA is responsible for approval of programs that train and certify nurse aides for employment in all Medicaid-certified nursing facilities.

- For information about training requirements, programs or facilities, or concerns regarding the testing program or information placed on the Nurse Aide Registry, contact the LARA Bureau of Professional Licensing.
- For testing registration information or assistance, or test site concerns, contact the Michigan Nurse Aide Customer Service.
- To inquire about a nurse aide’s listing on the Registry, name and good standing, contact the Michigan Nurse Aide Registry.

(Refer to the Directory Appendix for contact information.)

**3.2 EMPLOYEE SCREENING (CRIMINAL BACKGROUND CHECKS)**

Nursing facilities are prohibited from employing, independently contracting with, or granting clinical privileges to any individual making application or being offered privileges who has been convicted of certain crimes. Public Act 303 of 2002 requires nursing facilities to facilitate and bear the cost of criminal background checks, either through the Michigan State Police or the Federal Bureau of Investigation (depending on defined criteria), on all individuals seeking to perform direct services to residents. The law also provides for the sharing of criminal background information with other member agencies of the provider community for the purpose of applicant screening.

An overview of Public Act 303 of 2002 and template forms for use by nursing facilities conducting criminal history checks on applicants are available on the MDHHS website. (Refer to the Directory Appendix for website information.)
SECTION 4 - NURSING FACILITY SURVEY

The purpose of surveying nursing facilities in the State of Michigan is to ensure quality of life and quality of care for residents. In order to fully comply with the applicable federal and state statutes, the SMA has contracted with the SSA to conduct nursing facility certification surveys. This contract represents the intent and purpose of both agencies to promote high quality health care and services for beneficiaries under the Medicaid Program to:

- comply with state and federal statutes, regulations and guidelines requiring the proper expenditure of public funds for the administration of the Medicaid Program and certification of health care providers;
- assure that the services provided under Title XIX and Title V of the Social Security Act are consistent with the needs of beneficiaries and the programs’ objectives and requirements.

Reports generated as a function of this process are used by MDHHS to assure proper payment of claims submitted, to facilitate enforcement actions, and to assess continued certification under the current Medicaid enrollment.

4.1 SURVEY PROCESS

The basic survey protocol, including criteria and procedures, is the same for participation in both the Medicaid and Medicare Programs. The SSA:

- At appropriate intervals as prescribed by federal and state regulations, conducts on-site surveys, re-surveys and other necessary monitoring of the providers applying to or already participating in the Medicaid Program to determine compliance with program requirements.
- Recommends to the SMA certification of those providers that meet applicable federal and state statutes and regulations. The methodology of survey, evaluation and certification complies with applicable statutes, regulations, the provisions of the intra-agency agreement and is subject to review and comment by the SMA.
- Notifies the SMA and the individual provider within five working days of a certification determination and 30 calendar days prior to the expiration or automatic cancellation date of a time limited certification. Such notifications shall be made by a document process mutually agreed upon by both agencies and shall include information sufficient in detail to allow Medicaid to carry out appropriate provider agreement action. This document process shall also allow for extensions of existing certifications as provided for in federal regulations.
- Annually provides to Medicaid a complete listing of all certifications in effect on January 1st of that year.
- Determines and authorizes any waiver of provider requirements granted, the conditions of the waiver, and the time period such waiver will be in effect.
4.2 SURVEY REVIEW

The SSA sends all survey reports with enforcement recommendations to the SMA for review. Reports and subsequent enforcement recommendations include information sufficient in detail to allow the SMA to carry out appropriate provider agreement action. Following review and authorization by the SMA, the SSA may be designated to generate any or all of the necessary certification and enforcement documentation pertaining to a participating provider.
SECTION 5 - NURSING FACILITY ENFORCEMENT

This enforcement policy applies when the State Survey Agency (SSA) or the Centers for Medicare & Medicaid Services (CMS) determines, on the basis of a standard, abbreviated, extended, or partial extended survey, that a provider is or was out of compliance with the federal certification requirements as stated in 42 CFR Part 488, Survey, Certification and Enforcement Procedures. In Michigan, the LARA Bureau of Community and Health Systems (BCHS) functions as the SSA.

5.1 AUTHORITY

The Omnibus Budget Reconciliation Act (OBRA) of 1987, as amended, incorporated specific provisions for nursing home reform into the Social Security Act, including revised requirements for survey, certification, and enforcement of providers participating in the Medicare and Medicaid programs. Applicable regulations are found at 42 CFR Part 488.

5.2 GUIDING PRINCIPLES OF ENFORCEMENT

5.2.A. PHILOSOPHY

- All long term care providers have the responsibility to provide person-centered quality care and services appropriate to the needs of the residents they serve.
- Long term care providers are an essential resource for communities, providing health care services, education, and employment.
- LARA, as the licensing and certification authority, must insure that all Michigan long term care providers fulfill their responsibility to provide quality services.

5.2.B. PURPOSE

To develop, implement, and support an enforcement system that:

- Promotes continuous provision of quality care and the highest practicable physical, mental and psychosocial functioning of each resident.
- Protects the health, welfare, rights, and choices of long term care residents, as defined by law and regulation, without infringing upon the rights of the resident.
- Promptly corrects noncompliance through effective application of appropriate regulatory remedies.

5.3 ENFORCEMENT PRINCIPLES

- The enforcement system must reflect a philosophy of serving resident needs by providing quality care.
The SSA and the SMA must both strive for consistency in identifying deficiencies and in decision-making for selection and application of remedies. This enforcement principle is consistent with the intent of federal enforcement regulations, the State Operations Manual, and the CMS evaluation process for SSA performance.

The SMA’s enforcement plan contains a range of remedies. This allows an appropriate remedy scheme tailored to the facility and the cited deficiencies.

Repeat noncompliance or failure to obtain compliance will result in the application of progressively stronger remedies.

Remedies that displace residents from their homes will only be used as a last resort; such remedies include facility closure, termination of Medicaid or Medicare provider agreements, or transfer of residents. These remedies will not be used unless the health, safety and/or welfare of the residents is seriously affected, other remedies have not resulted in the facility’s ability to achieve and maintain substantial compliance, and/or the physical plant is not a viable setting for quality care and services.

State enforcement remedies for nursing facilities must include, at a minimum, statutorily specified remedies for skilled nursing facilities and may include additional or alternative remedies approved by CMS.

5.4 Facility Compliance and Deficient Practice

The SSA or CMS, on the basis of a standard, abbreviated, extended or partial extended survey, will determine whether a participating provider is in compliance with the federal regulations governing Medicaid certification. Based on this determination, one or more remedies (corrective actions) may be selected based on the seriousness of the deficiency, facility history, welfare of the residents, and the likelihood that the remedy will promote prompt and sustained compliance. Enforcement remedies include both federal and state enforcement options. Criteria have been designed to minimize the time between identification of the deficiencies and application of remedies. Repeated or uncorrected deficiencies will be assessed progressively stronger remedies. If the SSA finds that a provider currently meets the requirements, but previously was noncompliant, the SSA may impose a remedy for the days it finds that the facility was not in compliance. Nothing in this paragraph shall be construed as restricting the remedies available to the LARA to address a nursing facility’s deficiencies.

5.5 Determining the Seriousness of Deficiencies

To determine the seriousness of deficiencies for the purpose of selecting enforcement remedies, LARA will consider the factors of scope and severity. Scope represents how much of the facility, or how many residents, are or may be affected by a specific deficient practice. Severity represents the potential for harm, or the level of harm that has occurred. Scope and severity are assigned an alphabetic and numeric level on the remedy determination grid. The most serious deficiency cited (based on level of scope and severity) determines the category or categories of remedies to be applied. Other factors in the selection of remedies include:

- whether the deficiencies immediately jeopardize the health, safety, or welfare of the facility’s residents
- the relationship of one deficiency to other deficiencies
- the facility’s compliance history
the likelihood that the selected remedy will promote correction and continued compliance
- the provider's culpability, i.e., whether noncompliance is the result of neglect, indifference or disregard
- the relationship of one remedy to other remedies

5.5.A. SEVERITY

<table>
<thead>
<tr>
<th>LEVEL OF SEVERITY</th>
<th>DEFINITION</th>
</tr>
</thead>
<tbody>
<tr>
<td>No actual harm with a potential for minimal harm</td>
<td>The deficiency has the potential for causing no more than a minor negative impact on the resident(s).</td>
</tr>
<tr>
<td>No actual harm with a potential for more than minimal harm, but not Immediate Jeopardy</td>
<td>Noncompliance that results in minimal physical, mental, and/or psychosocial discomfort to the resident and/or has the potential (not yet realized) to compromise the resident's ability to maintain and/or reach his highest practicable physical, mental and psychosocial well being as defined by an accurate and comprehensive resident assessment, plan of care, and provision of services.</td>
</tr>
<tr>
<td>Actual harm that is not Immediate Jeopardy</td>
<td>Noncompliance that results in a negative outcome that has compromised the resident's ability to maintain and/or reach his highest practicable physical, mental, and psychosocial well being as defined by an accurate and comprehensive resident assessment, plan of care, and provision of services.</td>
</tr>
<tr>
<td>Immediate jeopardy to resident health or safety</td>
<td>A situation in which immediate corrective action is necessary because the provider's noncompliance with one or more requirements of participation has caused, or is likely to cause, serious injury, serious harm, impairment, or death to a resident receiving care in the facility.</td>
</tr>
</tbody>
</table>

5.5.B. SCOPE

<table>
<thead>
<tr>
<th>SCOPE OF IMPACT</th>
<th>DEFINITION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Isolated</td>
<td>Scope is isolated when one or a very limited number of residents are affected and/or one or a very limited number of staff are involved, and/or the situation has occurred only occasionally in a very limited number of locations.</td>
</tr>
<tr>
<td>Pattern</td>
<td>Scope is a pattern when more than a very limited number of residents are affected, and/or more than a very limited number of staff are involved, and/or the situation has occurred in several locations, and/or the same resident(s) has been affected by repeated occurrences of the same deficient practice. The effect of the deficient practice is not found to be pervasive throughout the facility.</td>
</tr>
<tr>
<td>Widespread</td>
<td>Scope is widespread when the problems causing the deficiencies are pervasive in the facility or represent systemic failure.</td>
</tr>
</tbody>
</table>

5.6 ENFORCEMENT REMEDIES

A remedy is a corrective action. Remedies available to LARA are specified in federal and state law. When the scope and severity increase, the deficiencies repeat, or the facility fails to maintain substantial compliance, selected remedies may also increase.
5.6.A. FEDERAL ENFORCEMENT REMEDIES

Each federal remedy listed below is described in rules as stated in 42 CFR Part 488 et. seq., and further discussed in the CMS State Operations Manual for Medicaid and/or Medicare certified facilities. Federal remedies available to LARA or CMS include, but are not limited to:

- Denial of payment for new Medicare and/or Medicaid admissions
- State monitoring
- Temporary management
- Directed plan of correction
- Directed inservice training
- Civil money penalties
- Transfer of residents
- Closure of facility with transfer of residents
- Termination of Medicaid enrollment
- Denial of payment for all Medicare and/or Medicaid residents imposed by CMS
- Alternative or specified state remedies approved by CMS
- Administrative/Clinical Advisor

5.6.B. STATE ENFORCEMENT REMEDIES

The SSA has the option of imposing any state or federal remedy based on the facility’s failure to maintain compliance, deficiencies cited within the same regulatory grouping that repeat within the last 24 months (or two standard survey cycles), and the degree of culpability of the facility. In addition to federal remedies, the SMA may accept one or more of the following enforcement actions taken by the SSA under state licensure authority. Also see Michigan Enforcement Rules for Long Term Care Facilities at R 330.11001-330.11017.

- Emergency Order Limiting, Suspending or Revoking a License
- Notice of Intent to Revoke Licensure
- Correction Notice to Ban Admissions or Readmissions
- Transfer Selected Patients; Reduce Licensed Capacity; or Comply with Specific Requirements
- Appointment of a Temporary Manager or Clinical/Administrative Advisor
- State Patient Rights Penalties, if applicable
5.7 DENIAL OF PAYMENT FOR NEW ADMISSIONS (DPNA)

Denial of payment for new admissions may be imposed at any time a provider is not in substantial compliance and must be imposed when a provider is not in substantial compliance within three months of being found out of compliance.

The DPNA enforcement remedy stops Medicaid payment for any new residents admitted to the facility after the effective date of the DPNA. The resident's status on the effective date of the denial of payment is the controlling factor in determining whether readmitted residents are subject to the denial of payment.

Guidelines for the definition of new admission are:

- Medicaid residents admitted to the facility on or after the effective date of the denial of payment for new admissions are considered new admissions. If Medicaid residents are discharged and readmitted to the facility, they continue to be considered new admissions, and are subject to the denial of payment.
- Medicaid residents admitted to the facility and discharged before the effective date of the DPNA are considered new admissions if they are readmitted to the facility on or after the effective date of the DPNA. Therefore, they are subject to the denial of payment.
- Medicaid residents admitted before the DPNA and discharged on or after the effective date of the DPNA are not considered new admissions if subsequently readmitted. Therefore, they are not subject to the denial of payment.
- Medicaid residents admitted before the effective date of the DPNA who take temporary leave before, on, or after the effective date of the DPNA are not considered new admissions upon return and, therefore, are not subject to the denial of payment.
- Medicaid residents admitted on or after the effective date of the DPNA who take temporary leave (e.g., hospital or therapeutic leave) are not considered new admissions when they return. If they were subject to the DPNA before their leave, they continue to be subject to it after their return.
- Private pay residents admitted to the facility after the effective date of the DPNA who then become eligible for Medicaid are subject to the denial of payment.
- Private pay residents in the facility prior to the effective date of the DPNA who then become eligible for Medicaid after the effective date of the DPNA are not subject to the denial of payment.

5.8 RECOVERY OF MEDICAID FUNDS FOR ADMISSIONS DURING DPNA

Under federal regulations, no federal funds will be paid to a nursing facility or to a state for any resident admitted when the facility is under a Denial of Payment for New Admissions sanction. Nursing facilities will be subject to Medicaid post-payment review to determine if any new residents were admitted during a period of time when the facility was under a DPNA sanction and, if so, Medicaid funds will be recovered from the facility. Facilities will be notified in advance of any recovery action and given the opportunity to produce documentation indicating that the admission was not a new resident and/or to appeal the MDHHS determination.
5.9 MINIMUM DATA SET - RESIDENT ASSESSMENT INSTRUMENT

A nursing facility is required to submit resident assessments to the QIES ASAP system using the Medicare Data Communication Network (MDCN). Comprehensive assessments must be transmitted electronically within 14 days of the Care Plan Completion Date (V0200C2). All other MDS assessments must be submitted within 14 days of the MDS Completion Date (Z0500B). Failure to comply will result in citations and imposition of remedies, including requirement of a plan of correction. Continued failure to comply will result in increasingly severe remedies up to and including termination of Medicaid enrollment.

An individual who willfully and knowingly certifies a material and false statement in a resident assessment will be subject to civil money penalty fines as outlined in 42 CFR § 483.20(f)(5)(j)(1).

5.10 TERMINATION

This remedy may be imposed at any time when appropriate, but must be imposed when a provider has been out of substantial compliance for six months.

5.11 PURPOSE OF REMEDIES

<table>
<thead>
<tr>
<th>TYPE OF REMEDY</th>
<th>PURPOSE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Directed Plan of Correction</td>
<td>The purpose of the directed plan of correction is to achieve correction and continued compliance with federal requirements. It is used when specific corrective action is required or the corrective action must be accomplished within a specified time, e.g., when a facility’s heating system fails and specific repairs or replacement must be made within a specific period of time; when a provider has had difficulty attaining compliance after a revisit; or when assistance with a plan of correction is needed to ensure an effective revisit prior to imposition of a denial of payment or termination of provider status.</td>
</tr>
<tr>
<td>Directed In-Service Training</td>
<td>The purpose of directed in-service training is to provide basic knowledge to achieve compliance and remain in compliance with federal requirements. Directed in-service training is used when education is likely to correct deficiencies and help the provider achieve substantial compliance.</td>
</tr>
<tr>
<td>State Monitoring</td>
<td>The purpose of state monitoring is to oversee correction of cited deficiencies as a safeguard against further harm to residents when harm or a situation with a potential for harm has occurred. State monitoring is appropriate if the provider has had three consecutive standard surveys with substandard quality of care; poor compliance history, pattern of poor quality of care, and/or many complaints; immediate jeopardy without a temporary manager appointment; concern that conditions in a facility have potential to worsen; the provider refuses to accept appointment of a temporary manager; the provider is unwilling or unable to take corrective action for cited substandard quality of care. LARA may impose state monitoring without notice.</td>
</tr>
<tr>
<td>Denial of Payment for New Admissions</td>
<td>The purpose of Denial of Payment for New Admissions (DPNA) is to encourage prompt and sustained compliance. DPNA may be imposed any time the provider is found out of substantial compliance and must be imposed when a provider is out of compliance three months after a determination of noncompliance. DPNA may be imposed alone or in combination with other remedies.</td>
</tr>
<tr>
<td>TYPE OF REMEDY</td>
<td>PURPOSE</td>
</tr>
<tr>
<td>---------------------------------------------------------</td>
<td>--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Denial of Payment for All Medicare and Medicaid Residents</td>
<td>The purpose of Denial of Payment for All Medicare and Medicaid Residents is to encourage prompt and sustained compliance. This remedy may be imposed any time the provider is out of substantial compliance, but only by CMS. Factors considered in imposing this remedy include the seriousness of current survey findings, noncompliance history of the facility, and failure of other remedies to achieve or sustain compliance.</td>
</tr>
<tr>
<td>Temporary Management</td>
<td>The purpose of a temporary manager is to oversee correction of deficiencies and ensure the health and safety of the facility's residents while corrections are being made. A temporary manager may be imposed as a federal remedy any time a provider is not in substantial compliance; when a facility's deficiencies constitute immediate jeopardy or widespread actual harm and is imposed as an alternative to termination; or to oversee the orderly closure of a facility. The authority and qualifications of the temporary manager are described in the State Operations Manual at Section 7550.</td>
</tr>
<tr>
<td>Temporary Administrative and/or Clinical Advisor</td>
<td>The purpose of a Temporary Administrative and/or Clinical Advisor is to monitor and mentor the facility administrative and/or clinical staff through the period of corrective action. This is an additional federal Category 2 enforcement remedy defined in the State Plan and MDHHS Rule 330.11007(6). Authority for this remedy is found at §488.303(e) and §488.406(a)(8)&amp;(9).</td>
</tr>
</tbody>
</table>

5.12 REVISIT POLICY

Revisits are not assured and, depending on the circumstances of any given situation, termination can occur any time for any level of facility noncompliance without regard to revisits. Facilities have the responsibility to correct their deficiencies and notify the SSA when corrections will be completed. It is expected that revisit requests will be made prudently so that the likelihood of additional revisits is reduced. If correction is not achieved at the expected time, the facility should notify the SSA that correction has been delayed so that the revisit can be delayed. LARA’s expectation is that the facility has achieved compliance status as alleged in the Plan of Correction. Revisits may be conducted for any level of noncompliance. Remedies may be imposed for any level of noncompliance. Revisits are not assured before imposition of denial of payment for new admissions or termination.

The SSA is authorized, at its discretion, to perform up to three revisits to verify compliance. A fourth revisit may be conducted by the SSA only with the authorization of the SMA. An approved Plan of Correction must be received by the SSA with each revisit request. A fourth revisit requires justification.

5.13 CHOOSING THE COMPLIANCE DATE

LARA follows CMS policy related to revisits. On a first revisit, the compliance date is the accepted Plan of Correction completion date if it is determined at the time of the revisit that the deficiencies were corrected and the facility is in substantial compliance. If a revisit survey identifies that the facility had a deficiency after the completion date that was corrected before the revisit date, the actual correction date is used.

On the second revisit, the compliance date is the revisit date, unless there is specific evidence of earlier compliance. In this case, observation of compliance is relevant, as is evidence indicating a specific date of correction.
On third or subsequent revisits, the compliance date is the revisit date, without exception.

5.14 Evidence of Compliance in Lieu of a Revisit

Revisits may be conducted at any time for any level of noncompliance. Revisits are required whenever a survey finds noncompliance at Level F (Substandard Quality of Care), Harm, or Immediate Jeopardy (IJ) and must continue for all citations at that level until compliance is achieved with F (SQC), Harm, or IJ citations. In other cases, appropriate to the type of deficiency, acceptable evidence of compliance may be allowed in lieu of a revisit at the SSA's discretion. Evidence of compliance is not acceptable after a second revisit has been conducted within an enforcement cycle. When a facility is allowed to present acceptable evidence in lieu of a revisit, the compliance date is the date the evidence indicates the facility was in substantial compliance.

5.15 Setting the Mandatory Three- and Six-Month Remedy Time Frames

The three-month mandatory denial of payment for new admissions and the six-month mandatory termination dates will be set based on full months rather than on a number of days. With few exceptions, these dates will coincide with the same numerical date of the month of survey exit that identified the noncompliance. For example, if a survey ended on 1/15, the three-month effective date for mandatory denial of payment for new admissions is 4/15, and the six-month termination date is 7/15. Exceptions involve those cases for which a three-month or six-month numerical date is not on the calendar. In these cases, the effective date of the remedy will be the next calendar day.

Immediate Jeopardy situations generally have 23-day termination cycles.

5.16 Failure to Readmit a Qualified Medicaid Resident

A daily civil money penalty (CMP) of $400 will be imposed when an enrolled Medicaid facility refuses to readmit a qualified Medicaid resident (as defined by CMS) following hospitalization. An opportunity to correct will not be provided. This daily CMP will start on the date validated by LARA that nursing home readmission should have occurred. The daily $400 CMP continues until the resident is offered the next qualifying available Medicaid bed at the refusing facility, or the resident is placed in another suitable facility. The refusing facility will be notified by the SSA when an allegation of failure to readmit a qualified Medicaid resident is being investigated.

5.17 Definitions

<table>
<thead>
<tr>
<th>TERM</th>
<th>DEFINITION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Administrative and/ or Clinical Advisor</td>
<td>An alternative federal Category 2 remedy imposed upon a facility for the purpose of mentoring facility administrative and/or clinical staff through the period of corrective action.</td>
</tr>
<tr>
<td>Ban on Admissions</td>
<td>Admissions to the facility are suspended on the date specified in the LARA Correction Notice Order. Includes readmissions if stated in the order.</td>
</tr>
<tr>
<td>CMS</td>
<td>The Centers for Medicare &amp; Medicaid Services.</td>
</tr>
<tr>
<td>TERM</td>
<td>DEFINITION</td>
</tr>
<tr>
<td>-----------------------------</td>
<td>------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Culpability</td>
<td>The extent to which the facility is responsible for the cited deficient practice. This is often related to occasions when the noncompliance is determined by the SSA to be intentional, or a product of neglect, indifference, or disregard.</td>
</tr>
<tr>
<td>Deficiency</td>
<td>A facility’s failure to meet any participation requirement specified in the Social Security Act or in 42 CFR, Subpart B, 483.5 - 485.75.</td>
</tr>
<tr>
<td>Failure to Maintain Compliance</td>
<td>Inability of the facility to maintain substantial compliance for at least three months, or a facility having three or more survey cycles in a 12-consecutive month period.</td>
</tr>
<tr>
<td>Immediate Jeopardy</td>
<td>Immediate Jeopardy to resident health or safety means a situation in which immediate corrective action is necessary because the nursing facility’s noncompliance with one or more requirements of participation has caused, or is likely to cause, serious injury, serious harm, impairment, or death to a resident receiving care in the facility. Such a finding is made in accordance with the criteria and definitions in the CMS State Operations Manual Appendix Q - Guidelines For Determining Immediate Jeopardy.</td>
</tr>
<tr>
<td>Noncompliance</td>
<td>Any deficiency that causes a facility to not be in substantial compliance.</td>
</tr>
<tr>
<td>No Opportunity to Correct</td>
<td>The facility will have remedies imposed immediately after a determination of noncompliance has been made.</td>
</tr>
<tr>
<td>Opportunity to Correct</td>
<td>The facility is allowed an opportunity to correct identified deficiencies before remedies are imposed.</td>
</tr>
<tr>
<td>Past Noncompliance</td>
<td>Past noncompliance is noncompliance that occurred between two certifications of compliance, against which a civil money penalty is imposed. If past noncompliance is cited, a civil money penalty must be imposed.</td>
</tr>
<tr>
<td>Plan of Correction (POC)</td>
<td>Mandatory for all deficiencies of scope and severity levels B through L on the remedy determination grid. A POC must be provided to the SSA within 10 days of the receipt of the survey report (CMS-2567). The POC must be approved by the SSA; if disapproved, remedies may be imposed immediately.</td>
</tr>
<tr>
<td>Remedy</td>
<td>A corrective action. Some remedies are specified in federal law; others are specified in state law.</td>
</tr>
<tr>
<td>Repeat Deficiency</td>
<td>When deficiencies in the same regulatory grouping of requirements are found more than once within 24 months or two standard survey cycles.</td>
</tr>
<tr>
<td>Repeated Noncompliance</td>
<td>For purposes of enforcement action, this term refers to findings of Substandard Quality of Care on three (3) consecutive standard surveys, but does not refer to citations in which the substance of a deficiency or the exact tag number of a deficiency is repeated.</td>
</tr>
<tr>
<td>Substandard Quality of Care</td>
<td>Deficiencies at 42 CFR 483.13 (Resident Behavior and Facility Practices, F tags 221-226); 483.15 (Quality of Life, F tags 240-258); or 483.25 (Quality of Care, F tags 309-333) on the remedy determination grid in cells F, H, I, J, K, or L.</td>
</tr>
<tr>
<td>Substantial Compliance</td>
<td>Survey findings or acceptable evidence of compliance in lieu of revisit indicate that no actual harm has occurred and there is a potential for no more than minimal harm.</td>
</tr>
</tbody>
</table>
5.18 **SUBSTANDARD QUALITY OF CARE (SQC)**

When a standard or abbreviated survey identifies substandard quality of care (SQC), an extended or partial extended survey is conducted. In addition to the imposition of remedies, the SSA takes the following actions:

- Notifies the attending physicians of residents identified during the survey process as having been affected by the substandard quality of care.
- Notifies the state licensure board responsible for licensing the facility’s administrator of all findings of substandard quality of care.
- Prohibits the facility from providing nurse aide training and competency evaluation programs for two years.

If a facility has been found to have provided SQC on the last three (3) consecutive standard surveys, along with other remedies, LARA will impose:

- Mandatory denial of payment for new admissions;
- State monitoring.

5.19 **IMMEDIATE JEOPARDY**

When the SSA identifies that Immediate Jeopardy to resident health or safety exists, the provider is notified and directed to submit as soon as possible an allegation that the Immediate Jeopardy has been removed. Within two calendar days of the last day of the survey during which Immediate Jeopardy was identified, the SSA will notify the provider that the SMA must terminate Medicaid enrollment within 23 calendar days of the last day of survey if the Immediate Jeopardy has not been removed. At its discretion, the SMA may appoint a temporary manager who must remove the Immediate Jeopardy within 23 days to avoid termination.

In order for a 23-day termination timeclock to be stopped, the provider must submit an acceptable Plan of Correction to the SSA. A subsequent revisit must then be conducted to verify removal of the Immediate Jeopardy, even if the underlying deficiencies have not been fully corrected.

Civil Money Penalties (CMP) of $3,050 to $10,000 per day will be imposed for each day an Immediate Jeopardy was identified before removal. Following removal of the Immediate Jeopardy, CMPs will continue until the facility is found to be in substantial compliance, but will be selected from a lower fine range of $50 to $3,000 per day. The upper range of CMPs will apply for a minimum of one day, even if the Immediate Jeopardy is removed immediately after identification and notification. No CMP will apply on the day the facility is determined to be in substantial compliance.

The SSA may consider using a Per Instance Civil Money Penalty of $1,000 to $10,000 when the beginning date of the deficiency cannot be determined, or when a Civil Money Penalty is combined with other enforcement actions, e.g., a discretionary denial of payment for new admissions, directed plan of correction, or directed in-service training.
5.20 NO OPPORTUNITY TO CORRECT

Providers will not be given an opportunity to correct deficiencies before remedies are imposed when they have deficiencies of actual harm (or higher) on the current survey event, as well as on the previous standard survey or any intervening survey. The previous harm (or higher) level deficiency must have been in a completed survey cycle with compliance verified. LARA will impose either a Civil Money Penalty or Denial of Payment for New Admissions, or both. LARA may impose other optional federal remedies.

5.21 OPPORTUNITY TO CORRECT

An opportunity to correct deficiencies before remedies are imposed is not assured. The SSA has no obligation to give a provider an opportunity to correct deficiencies prior to imposing remedies and must only meet the minimum notice requirements that are applicable to the imposition of remedies. At the SSA’s discretion, it may provide facilities an opportunity to correct deficiencies before remedies are imposed when they do not meet the criteria for "No Opportunity to Correct."

When an opportunity to correct deficiencies before remedies are imposed is offered, the SSA will request an acceptable plan of correction, provide initial notice of possible enforcement action, conduct a revisit (if applicable), and provide formal notice of other remedies if noncompliance continues at revisit. While formal notice of denial of payment for new admissions is generally provided in the first revisit letter, the SSA may provide it to the facility in the initial deficiency notice.

LARA must impose DPNA no later than three months after the last day of the survey that identified the noncompliance if substantial compliance is not achieved.

LARA may impose either a per day or per instance Civil Money Penalty for past noncompliance, for days of noncompliance after the finding is made, or a combination thereof. Amounts will be determined by LARA based on facility history, repeating deficiencies, high numbers of deficiencies, culpability of the provider, failure to achieve or maintain substantial compliance, and for increasing noncompliance.

5.22 PROHIBITION OF APPROVAL OF NURSE AIDE TRAINING AND COMPETENCY EVALUATION PROGRAMS

Federal law, as specified in the Social Security Act at Sections 1819(f)(2)(B) and 1919(f)(2)(B), prohibits approval of nurse aide training and competency evaluation programs and nurse aide competency evaluation programs offered by, or in, a facility which, within the previous two years, has operated under a Section 1819(b)(4)(C)(ii)(I) or Section 1919(b)(4)(C)(ii) waiver; has been subject to an extended or partial extended survey as a result of a finding of substandard quality of care; has been assessed a total civil money penalty of not less than $5,000; has been subject to a denial of payment, the appointment of a temporary manager or termination; or, in the case of an emergency, has been closed and/or had its residents transferred to other facilities. Exceptions to this, as specified in Public Law 105-15, Permitting Waiver of Prohibition of Offering Nurse Aide Training and Competency Evaluation Programs in Certain Facilities, will apply.

5.23 NEW OWNER

A new owner may apply to the SSA to have approval of the facility’s nurse aide training and competency evaluation program restored before a two-year lockout period has expired.
5.24 NOTICE OF CMP ASSESSMENT

Prior notice is not required before the imposition of CMPs. A penalty equivalent to a one-day penalty will apply in all circumstances even if the violation(s) is immediately corrected. The daily penalty will end on the day prior to the determination of substantial compliance, or on the day prior to the determination that a civil money penalty is no longer warranted. The SSA determines compliance. CMP amounts may be increased to reflect changes in levels of noncompliance at revisit. CMP amounts may increase for repeat deficiencies.

The SSA has developed a CMP schedule for Immediate Jeopardy and Harm or Potential Harm occurrences to promote a consistent application of penalties. The CMP schedule conforms to 42 CFR 488.408 and is intended to cover the majority of cases of CMP imposition. Situations may occur that justify exception to the guidelines. The CMP schedule is subject to change without notice. For further information, contact LARA Bureau of Community and Health Systems (BCHS). (Refer to the Directory Appendix for contact information.)

Accrual of CMPs ceases when one of the following situations occurs:

- the facility is determined by the SSA to have achieved substantial compliance
- the appointment of a receiver by a circuit court
- closure of a facility
- appointment of a temporary manager for the purpose of overseeing the orderly closure of the facility
- termination of a provider agreement

5.25 USE OF CMP FUNDS

Money collected by the SMA as a result of civil money penalties is held in a special fund to be applied to the protection of the health or property of residents of any nursing facility that LARA finds deficient. Money recovered by the SMA from funds due a facility (because of lack of payment of civil money penalties by the facility) is also deposited into this fund.

5.26 COST REPORTING FOR REMEDIATION EXPENSES

Temporary manager and (limited) other remediation expenses incurred by the provider as a result of an enforcement action are a Medicaid allowable routine nursing care cost as part of the owner/administrator cost classification. Total owner/administrator compensation is subject to established program cost limitations and allowable cost principles. Civil money penalties are not allowable Medicaid costs. (Refer to the Cost Reporting & Reimbursement Appendix of this chapter for additional information.)

5.27 APPEAL RIGHTS

The provider is notified of appeal rights at the time of remedy imposition. Providers may only appeal the existence of a deficiency and/or the number of days considered in violation. The established daily amount of the CMP is not subject to appeal. Appeals are through MDHHS. (Refer to the Directory Appendix for contact information.)
MDHHS has developed an informal review process for resolution of disputes regarding deficiencies cited by surveyors. Information regarding this process can be found on the MDHHS website. (Refer to the Directory Appendix for website information.)

The provider is also notified of waiver rights at the time of remedy imposition. Within 60 calendar days of the notice of appeal rights, the provider may elect to waive the right to appeal. The waiver must be in writing and be received by the SSA Enforcement Unit and by the Michigan Administrative Hearing System (MAHS) within 60 days of the notice of appeal rights. Waiver of the right to appeal will reduce the total CMP amount by 35%.

5.28 PENALTY COLLECTION

Collection of civil money penalties will be made by voluntary transmittal, in a check payable to the State of Michigan, within 30 calendar days of notice of penalty amount due or within 15 days of issuance of appeal results. If voluntary transmittal does not occur, the CMP will be recovered by gross adjustment against the next available Medicaid warrant or as a component of final cost settlement in a change of ownership. No repayment schedules will be allowed for any penalty assessments. Civil money penalties are not allowable Medicaid costs.

SECTION 1 – INTRODUCTION

This appendix outlines Medicaid policy pertaining to nursing facility ownership, nursing facility reimbursement, nursing facility costs, and nursing facility financial reporting. Cost reporting, rate determination, financial settlement, audit, and appeal processes are addressed in this appendix. Costs classifications (such as plant, variable, allowable and non-allowable, add-ons) used to determine nursing facility reimbursement are defined.

Throughout the appendix references will be made to the State Medicaid Agency (SMA) and the State Survey Agency (SSA). The Michigan Department of Health and Human Services (MDHHS), Medical Services Administration, is the designated SMA, and is responsible for administration of the Medicaid program. The Michigan Department of Licensing and Regulatory Affairs (LARA), Bureau of Community and Health Systems (BCHS) is the designated SSA.

1.1 REIMBURSEMENT RATE METHODOLOGY – GENERAL

The Medicaid nursing facility reimbursement rate is prospectively determined based on the nursing facility's historical or acquisition costs, which are subject to limitations put forth in policy. Participating Medicaid providers' nursing facility resident days and cost information are reported to the SMA on an annual cost report submitted by the nursing facility. The nursing facility industry aggregate cost data is used to analyze and determine facility class reimbursement limits and related cost levels necessary for calculating nursing facility per diem rates and other analysis. The facility's routine nursing care per diem rate includes plant and variable cost based on the facility's audited allowable costs, measured against class wide rate limitations. Additional reimbursement for specific services outside of the routine nursing care per diem rate are also analyzed and determined from the facility's annual cost report and included in the Medicaid annual reimbursement settlement.

The intent of the Medicaid nursing facility reimbursement system is to:

- Assure high quality services at reasonable costs.
- Encourage the efficient use of nursing care resources.
- Provide reimbursement for allowable costs incurred by prudent, cost-conscious facility managers.
- Provide a review and appeal mechanism to assure that nursing facility providers receive fair and equitable treatment.

Reductions may be implemented to the variable cost portion of the NF rate due to Executive Order, legislative mandate, or cost savings initiatives. Notice of a reduction, or continuation of a reduction, will be issued via a policy bulletin. A record of recent NF variable rate reductions will be maintained on the MDHHS website. (Refer to the Directory Appendix for website information.)

1.2 MEDICARE PRINCIPLES OF REIMBURSEMENT

Unless stated otherwise in this appendix, Medicaid reimbursement rates are determined for nursing facilities in accordance with the federal Principles of Reimbursement established for the Medicare Program. Nursing facility providers are expected to comply with applicable provisions in these Principles, with policies published by the SMA, and with all relevant federal and state statutes, rules and regulations.
When reviewing the Principles of Reimbursement, any references to "intermediary" should be interpreted as referring to the SMA.

Medicare Principles of Reimbursement appear in the Code of Federal Regulations (CFR), at Title 42, Part 413, and in manuals published by the federal Centers for Medicare & Medicaid Services (CMS). The Provider Reimbursement Manual, also referred to as PRM-15 and Pub. 15, may be obtained from CMS electronically or by contacting CMS. (Refer to the Directory Appendix for website and contact information.)
SECTION 2 - OWNERSHIP CHANGES AND MEDICAID TERMINATION

2.1 PREREQUISITE

When an ownership change is anticipated, the Certificate of Need (CON) requirement must be satisfied before Medicaid enrollment can occur. MDHHS administers the CON Program. Contact information and subject matters pertaining to the CON may be found on-line on the MDHHS website. (Refer to the Directory Appendix for website information.)

2.2 OWNERSHIP CHANGES

When an ownership change is anticipated, the proposed Seller(s) and the proposed Purchaser(s) must provide written notice to both the State Medicaid Agency (SMA) and the State Survey Agency (SSA) at least 90 calendar days prior to the anticipated ownership change. The written notice to the SMA must be sent to the MDHHS LTC Reimbursement and Rate Setting Section (RARSS) and to the Provider Enrollment Unit. (Refer to the Directory Appendix for contact information.) The written notice to the SSA must be sent to the nursing facility’s licensing officer. Failure to provide written notice to either agency could result in payment and settlement delays.

Prior to the ownership change date, the new ownership must complete a New Provider Information Packet to provide RARSS with the necessary information for the rate setting and reimbursement process. Failure to provide this information prior to or immediately upon completion of the purchase will delay the rate setting and reimbursement processing for the new ownership. For New Facility/Owner Requirements, refer to the Cost Reporting Section of this appendix.

If a facility changes ownership, the facility must register the NPI for the new owner through the on-line CHAMPS Provider Enrollment (PE) subsystem. If the provider tax identification number (TIN) did not change, the NPI can be reported through the CHAMPS PE maintenance function. If the change involves a new TIN, the provider must complete a new enrollment application. The new owner must not use the prior owner’s NPI for reporting and billing Medicaid services. Failure of the new ownership to register the new provider NPI number for billing subjects the new owner to financial responsibility for the prior owner’s claim liability. Refer to the Provider Enrollment Section of the General Information for Providers Chapter for additional information.

The Seller(s) and the Purchaser(s) will be notified by RARSS and advised of any requirements related to cost reporting and rate setting, including final settlement for the former owner. For information regarding reimbursement settlement, refer to the Cost Report Reimbursement Settlement Section of this appendix.

2.3 NURSING FACILITY SALE BETWEEN FAMILY MEMBERS

The sale of a family owned nursing facility between family members is allowable and recognized as a transfer of ownership and a recognized sale transaction for Medicaid reimbursement within allowable cost and reimbursement limits if all of the following requirements are met. However, if it is subsequently determined control is not relinquished by the prior entity or interested parties, asset values will revert back to the values prior to the recognized sale and any additional reimbursement paid will be recovered.
A purchase contract or agreement must be present. The transaction must terminate the seller’s interest in the business. The seller must not have any recourse or ownership protection to retain or have a security interest in obtaining future ownership of that nursing facility in the event of the termination of the new ownership (purchaser) at a later date.

Borrowing or financing for the sale transaction must be between the purchaser and a non-related third party (i.e., a financial institution). Financial loans from the family-related seller individual or entity to the family-related purchaser are not allowable for reimbursement. The finance instrument must not be a land contract from the seller.

Total dollar amount of allowable borrowings cannot exceed the purchase price (allowable asset value). The Capital Asset Value (CAV) limit applicable to the nursing facility immediately prior to the sale, appropriately adjusted for nursing facility asset items that are excluded from the sale transaction, is the maximum reimbursable borrowing balance applicable to the asset transaction.

The nursing facility property appraisal must be obtained. The facility appraisal value must support the purchase price negotiated between the sales parties. Refer to the Appraisal Guidelines Section of this appendix for additional information.

The new ownership operation must be a different legal entity in which the family-related seller is not an officer or board member exercising control over the new operation. The nursing facility entity may remain as an ongoing business entity in a situation where the real estate sale does not involve the licensed nursing facility operator. This occurs where a related party lease exists between the nursing facility entity prior to the real estate transaction, and the real estate transaction of the leased nursing facility is between the family-related parties. The requirement that the family-related lessor/seller cannot exercise active interest or control in the management of the nursing facility after the sale must be met.

The following will be applied to a change in ownership as a result of a sale between family members:

The allowable asset value to the purchaser is limited to the allowable historical capital asset cost of the seller party (or nursing facility entity owned by the family member) minus the dollar amount of depreciation expense allowed and reimbursed under the Medicaid Program. There is no increase in nursing facility asset values. MDHHS considers Medicaid reimbursement to the nursing facility for depreciation expense was zero dollars during the time period that the seller provider was reimbursed by Medicaid for plant cost based upon capital asset value tenure reimbursement rate.

The tenure factor for the nursing facility following the sale will revert to zero due to the capital asset transaction affecting a plant cost increase.

The Medicaid program plant cost reimbursement limitations of the Deficit Reduction Act (DEFRA) of 1984 will not apply to the transaction as a result of the purchase limitation to the historical asset cost base of the seller.

The seller may be subject to depreciation recapture dependent on the sale price of the assets and the depreciation reimbursement made to the seller during the time period in which the seller was reimbursed a plant cost component under the depreciation cost method. The reimbursement period of depreciation recapture is limited to Medicaid services reimbursed during the time period from October 1, 1984 through the date in which the nursing facility transferred to the tenure plant cost component reimbursement. The dollar amount of depreciation recapture may impact the asset acquisition allowable dollar amount for the purchaser.
2.4 Facility Asset Change of Ownership

In the event of a binding agreement and/or sale occurring on or after July 18, 1984, the Plant Cost Component for the nursing facility, attributable to the agreement and/or sale, is limited to the Medicaid Program policy provisions applying federal reimbursement limits of the DEFRA. Refer to the plant cost component rate determination provisions in the Rate Determination Section of this appendix for additional information.

At the time of the facility asset ownership change, the Provider must complete a Plant Cost Certification and submit a copy of the purchase and/or lease agreement, along with plant cost information, to the MDHHS LTC Reimbursement and Rate Setting Section (RARSS). The information is necessary to establish the reimbursement rate for the Plant Cost Component due to the asset ownership change. For Plant Cost Certification requirements and timeframes for filing the data, refer to the Plant Cost Certification Section of this appendix.

For an explanation of the effect of the sale of assets on the Tenure Factor, refer to the Rate Determination Section of this appendix.

In the event of a sale after March 31, 1985, Medicaid will recapture from the selling provider any reimbursement received in the form of depreciation expense, through the date of either the sale and transfer of assets or, for a Class I facility, that provider's conversion to a "Return on Current Asset Value Component" reimbursement, whichever is earlier. This reimbursement provision does not apply to Class I nursing facility providers whose ownership began after March 31, 1985. For information regarding depreciation reimbursement adjustment, refer to the Cost Report Reimbursement Settlements Section of this appendix.

2.5 Termination of Medicaid Participation

A nursing facility that loses its Medicaid certification as a result of regulatory action, irrespective of whether that action requires facility closure, or a nursing facility that chooses to terminate its participation in the Medicaid program without closing must comply with notice and cost reporting requirements. Refer to the Cost Reporting Section in this appendix and to the Notification Process for Regulatory Actions, Nursing Facility Closure Protocol, or Voluntary Withdrawal From Participation in the Medicaid Program or Voluntary Nursing Facility Closure subsections in the Certification, Survey & Enforcement Appendix of this chapter for relevant information.

When Medicaid participation is terminated voluntarily or involuntarily, payment for at least one month of services rendered is retained for Final Settlement.
## SECTION 3 – DEFINITIONS

General definitions are provided in this section. More detailed explanations are provided in relevant sections related to cost, audit or rate setting.

<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Abuse</strong></td>
<td>Provider practices that are inconsistent with sound fiscal, business, or medical practices and result in an unnecessary cost to the Medicaid program or in reimbursement for services that are not medically necessary or that fail to meet professionally recognized standards for health care.</td>
</tr>
<tr>
<td><strong>Acceptable Cost Report</strong></td>
<td>A complete and accurate accounting of the financial and statistical activities of a nursing facility provider prepared in accordance with Medicaid policy and cost reporting instructions on the electronic format required by the SMA. The cost report must include the certification statement signed by an authorized representative of the nursing facility certifying the cost report as a true, correct and complete statement of facility financial and statistical activities prepared from the nursing facility provider’s books and records.</td>
</tr>
<tr>
<td><strong>Administrator</strong></td>
<td>A nursing facility administrator is a person(s) who is on site and responsible for the professional administration, supervision and management of the nursing facility and operations as they relate to resident care. The nursing facility administrator must be licensed in accordance with the law in Michigan.</td>
</tr>
<tr>
<td><strong>Allowable Costs</strong></td>
<td>Costs incurred in the provision of nursing facility services subject to guidelines and limitations set forth in Medicare Principles of Reimbursement, as they appear in federal regulations and in manuals published by the federal Centers for Medicare &amp; Medicaid Services, unless stated to the contrary in policies and procedures issued by the SMA.</td>
</tr>
<tr>
<td><strong>Ancillary Services</strong></td>
<td>Services for which charges are customarily made in addition to routine service charges. Services are defined in the Coverages portion of this chapter.</td>
</tr>
</tbody>
</table>
| **Asset Acquisition Cost**    | The cost or value for a nursing facility asset determined in accordance with Medicare Principles of Reimbursement. Medicaid further defines acquisition cost as the cost incurred by the present owner in acquiring the asset.  

For Class I, II, III and IV Nursing Facilities  
For depreciable assets acquired after July 31, 1970, the historical cost may not exceed the lower of current reproduction cost adjusted for straight-line depreciation over the life of the asset to the time of purchase, or the fair market value of the asset at the time of its purchase.  

For Class III and IV Nursing Facilities  
For depreciable assets acquired on or after December 1, 1997, the allowable historical cost of the asset may not exceed the historical cost less depreciation allowed to the owner of record as of August 5, 1997 or, if the asset did not exist as of August 5, 1997, the first owner of record after August 5, 1997. |
| **Authorized Representative** | An individual who has legal authority to obligate the nursing facility entity. The individual may be an officer, senior or majority partner, possess controlling ownership interest or an appropriate management employee of the licensed nursing home business entity. For purpose of signatures required for cost reporting and reimbursement request actions, individuals not included in these positions must have designated legal right to act on behalf of the subject business entity. |
| **Available Bed** | A bed considered available for occupancy. Beds are considered available except in the following situations:  
- Unoccupied beds when the facility is under a regulatory Ban on Admissions (does not include beds unoccupied when the facility is under a Denial of Payment for New Admissions action).  
- Beds covered under a SMA-approved Non-Available Bed Plan.  
- Beds temporarily unoccupied due to renovation or construction where the SSA has deemed the beds unacceptable for occupancy, for example beds which are a part of a Building Program Agreement. |
| **Available Bed Days** | The number of available bed days for a facility is the number of available beds in the facility multiplied by the number of days in the cost reporting period that they are available. |
| **Average of Variable Costs** | See Class Average of Variable Costs. |
| **Ban on Admissions** | A regulatory/enforcement sanction, imposed by the SSA, prohibiting the admission of any new resident(s) into the nursing facility, regardless of payment type, while the prohibition is in effect. Readmissions are allowed during this period on an individual case basis at the discretion of the SSA. A modified ban on admissions is a regulatory/enforcement sanction, imposed by the SSA, which may be imposed for a period of time after a ban on admissions has ended. The length of the modified ban on admissions is at the discretion of the SSA and may limit the number of new admissions for a designated period of time.  
Note: A Ban on Admissions is different from a Denial of Payment for New Admissions. |
| **Base Costs** | Costs that cover activities associated with direct patient care. Major items under these categories are payroll and payroll-related costs (salaries, wages, related payroll taxes, fringe benefits) for departments of nursing, nursing administration, dietary, laundry, diversional therapy, and social services; food; linen (does not include mattress and mattress support unit); workers compensation; utility costs; consultant costs from related party organizations for services relating to base cost activity, nursing pool agency contract service for direct patient care nursing staff, and medical and nursing supply costs included in the base cost departments. With the exception of nursing pool services, purchased services and contract labor from unrelated parties or from related organizations, incurred in lieu of base costs as previously defined, are separated into base and support costs using the industry-wide average base-to-variable cost ratio. |
| **Base Costs Per Day** | Facility base costs divided by the total number of resident days for the same period. |
| **Base Cost Component, Indexed** | See Indexed Base Cost Component. |
| **Base Period** | An interval of time for which cost data is obtained and used in the calculation of a prospective reimbursement rate. |
| **Capital Expenditure** | Expenditure not limited to cost of construction, engineering, and equipment, which, under Generally Accepted Accounting Principles, is not properly chargeable as an expense of operation. |
| **Census** | See Resident Days/Occupancy. |
### Census Day

A census day is counted when a resident is occupying a nursing facility bed at midnight. A census day is counted if:

- the resident is away from the facility for therapeutic leave and the facility is paid by any payer source to hold the bed;
- the resident is on a one-day stay and the nursing facility is paid for the day;
- the resident is discharged due to death and the nursing facility is paid for the day;
- the leave days (bed holds) are paid for by non-Medicaid sources; or
- it is a resident’s day of discharge that qualifies as a late discharge by the Medicare program.

A resident is counted for census purposes if the resident is admitted to the hospital, except when the facility may be reimbursed by Medicaid to hold the bed or when a Medicaid beneficiary is hospitalized and the facility is ineligible for reimbursement because it is not at 98% occupancy (unless the facility is reimbursed by another payer source to hold the bed). If a resident is hospitalized and the facility is not paid by any source to hold the bed, the day is not included in the census. A resident is counted for census purposes on the day of admission, but not on the day of discharge except as noted above.

### Chain Organization

A group of two or more nursing care facilities, or at least one nursing care facility and another business or entity, that is owned, leased, or through any other device controlled or operated by one organization. Chain nursing facility organizations include, but are not limited to proprietary organizations and various religious, charitable, and governmental organizations, any of which may be engaged in other activities not directly related to health care.

### Change of Ownership

The exchange of real property, e.g., a sale of stock or real estate, including a sale of a building housing a nursing facility provider as a lessee; a change in corporate structure for a nursing facility, e.g., a change from a sole proprietorship to a corporation; or any other ownership change that affects the provider/licensed operator of a nursing facility.

### Class I Facilities

Proprietary and nonprofit nursing facilities that do not fall under the Class II, Class III, Class IV or Class V definitions.

### Class II Facilities

Proprietary nursing facilities for the mentally ill or developmentally disabled (intellectual disability), with a different variable cost limit than Class I facilities.

### Class III Facilities

Proprietary nursing facilities, hospital long term care units, and nonprofit nursing facilities that are county-operated medical care facilities.

### Class IV Facilities

State-owned and operated institutions for individuals with intellectual disabilities (developmentally disabled), Intermediate Care Facilities for Individuals with Intellectual Disabilities (ICF/IID), and nonprofit nursing facilities for individuals with intellectual disabilities.

### Class V Facilities

A distinct part of a special nursing facility for the care of ventilator-dependent residents.

### Class VI Facilities

Hospitals that provide a program of short-term nursing care (Swing Beds) not exceeding 100 days per stay.
| **Class Average of Variable Costs (AVC)** | The total indexed variable costs for all facilities in a class divided by the total resident days for all facilities in the class. An AVC is calculated for each nursing facility class. For example, the AVC for October 1, 2017, which is used for rate year October 1, 2017 to September 30, 2018, is based on variable costs reported in cost reports for facility fiscal years ending in 2016, indexed to October 1, 2016. |
| **Class Variable Cost Limit (VCL)** | A limit set at the 80th percentile of the Indexed Variable Costs (IVC) for facilities in a particular class during the current calendar year. The 80th percentile is determined by rank ordering facilities from the lowest to the highest IVC, then accumulating Medicaid resident days of the rank-ordered facilities, beginning with the lowest, until 80% of the total Medicaid resident days for the class are reached. The Variable Cost Limit for the class of facilities equals the IVC of the nursing facility in which the 80th percentile of accumulated Medicaid resident days occurs. A VCL is calculated for Class I and Class III nursing facilities. For example, the VCL for October 1, 2017, which is used for rate year October 1, 2017 through September 30, 2018, is based on variable costs reported in cost reports for facility fiscal years ending in 2016, indexed to October 1, 2016. |
| **Common Ownership** | A situation in which more than one individual possesses significant (5% or greater) ownership or equity in a nursing facility or an organization serving the nursing facility provider. |
| **Compensation** | The total monetary, fringe, and/or benefits received by an employee or owner for services rendered to the nursing facility. |
| **Control** | A situation where an individual or organization has the power, directly or indirectly, to significantly influence and/or direct the actions or policies of a nursing facility or an organization serving the nursing facility provider. |
| **Corporate Official or Employee** | An individual representing an organization with the authority to exercise control over a nursing facility. |
| **Cost Center** | A division, department, or subdivision thereof; a group of services; or any other unit or type of activity into which functions of an organization or nursing facility are divided for purposes of cost assignment and allocation. |
| **Cost Index** | An indicator used to adjust nursing facility cost levels. The cost index used by Medicaid is Global Insight’s Skilled Nursing Facility Market Basket Without Capital Index, which is published quarterly in the Global Insight DRI-WEFA Health Care Cost Review. The cost index is used to adjust reported costs from the facility’s cost report period end date to October 1 of the year that is one year prior to the rate year being calculated. For example, cost report data used to set rates for the October 1, 2017 to September 30, 2018 nursing facility rate year are indexed to October 1, 2016. |
| **Cost Report** | A formal compilation of the nursing facility ownership, financial and statistical data in MDHHS prescribed format, and required on an annual basis for the reporting period generally extending over a 12-month period based on the nursing facility's fiscal year. Each nursing facility provider's cost report must include an itemized list of all expenses as recorded in the formal and permanent accounting records of the facility. |
| **Current Provider** | The provider that operated the nursing facility during the time period of the last cost report on which normal rate setting would occur. Also see Provider. |
| **DEFRA** | Deficit Reduction Act of 1984 |
**Denial of Payment for New Admissions (DPNA)**

A regulatory/enforcement action, imposed by the CMS or the SMA, prohibiting payment for new Medicare and/or Medicaid admissions. Medicaid will not pay for services provided to a resident admitted during a DPNA.

Note: A Denial of Payment for New Admissions is different from a Ban on Admissions.

**Economic Inflation Rate**

The annual economic inflation percentage for Class I and Class III nursing facilities established by the state legislature through the appropriations process.

**Economic Inflation Update**

The Economic Inflation Rate (EIR) for the facility class applied to the lesser of the Variable Rate Base for the facility or the class Variable Cost Limit.

**Facility**

An entire nursing facility or a distinct part thereof being considered for rate setting. The entire building may be considered a distinct part unit for rate setting purposes. A unit smaller than the entire building may also be considered a distinct part unit for rate setting purposes if the identified facility space area meets required certification requirements.

**Fair Market Value**

The price that an asset would bring by bona fide bargaining between well-informed buyers and sellers at the date of acquisition, generally comparable to the price at which other sales have been consummated for assets of like type, quality and quantity in a particular market at the time of acquisition.

**Fiscal Year - Facility**

For purposes of cost reporting, a nursing facility provider's financial reporting year for tax purposes, normally a 12-month period unless approved for exception due to change in provider ownership or fiscal period end date change.

**Fiscal Year - State**

October 1 through September 30.

**Fixed Equipment (Major)**

Equipment that is affixed to or constitutes a structural component of the nursing facility as defined by the current version of the American Hospital Association Chart of Accounts.

**Hold A Bed Day**

See Leave Day.

**Home Office**

The central office of a chain organization. (see Chain Organization)

**Hospital-Attached Long Term Care Unit (HLTCU)**

A distinct part of a general hospital licensed as a nursing facility.

**Hospital Leave Day**

See Leave Day - Hospital.

**Indexed Base Cost Component**

A facility's total per resident day allowable base costs indexed to October 1 of the year that is one year prior to the rate year being calculated.

**Indexed Support Cost Component**

A facility's indexed base cost component multiplied by the lesser of the facility's support-to-base ratio or the support-to-base ratio limit for that facility's bed-size group.

**Indexed Variable Costs**

The sum of a facility's allowable base and support costs per resident day indexed to October 1 of the year that is one year prior to the rate year being calculated.

**Leave Day - Hospital**

A day for which a facility may be reimbursed by Medicaid to hold a resident's bed for his/her return. (Medicaid policy pertaining to reimbursement is contained in the Coverages portion of this chapter.) Leave days reimbursed by other payer sources must be included in the facility census for cost reporting purposes.
<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Leave Day – Therapeutic</td>
<td>A day where a facility may be reimbursed by any payer source to hold a resident's bed for his/her return. Medicaid policy pertaining to reimbursement is contained in the Coverages portion of this chapter. The day is counted as a census day of care for resident occupancy on the nursing facility's cost report.</td>
</tr>
<tr>
<td>Management Company</td>
<td>An entity contracted by a licensed and Medicaid-enrolled nursing facility provider to manage one or more of the daily operations of the facility.</td>
</tr>
<tr>
<td>Medical Care Facility (MCF)</td>
<td>A county-operated nursing facility.</td>
</tr>
<tr>
<td>Net Quality Assurance Supplement (Net QAS)</td>
<td>The Quality Assurance Supplement minus the Medicaid share of the assessment, based on non-Medicare nursing facility days.</td>
</tr>
<tr>
<td>New Facility (for rate-setting purposes)</td>
<td>A nursing facility provider that does not have a current Medicaid historical cost, including a newly constructed facility or an existing facility that has never before participated in the Medicaid program, or a facility that has participated in Medicaid in a different provider class, or an existing facility that qualified as a &quot;No Medicaid&quot; or &quot;Low Medicaid&quot; activity cost reporting provider for two consecutive fiscal years. A nursing facility that has made physical plant additions and/or renovations, including a total replacement or a facility that has been sold or resold is not considered a new facility.</td>
</tr>
<tr>
<td>New Provider in a Medicaid-Enrolled Facility</td>
<td>A person or business entity that has purchased or is purchasing a nursing facility that previously had Medicaid participation and whose new ownership individual(s) or business entity are not related through family or business ties to the owner's business entity of the previous owner. Under certain circumstances, a sale between family members may be approved by the SMA and the new owner may be considered a new provider.</td>
</tr>
<tr>
<td>Non-Medicare Nursing Facility Days</td>
<td>Nursing Facility days for which Medicare (Part A [Fee for Service] and Part C [Medicare Advantage, including MI Health Link days where Medicare is the primary payer]) is not the primary source of reimbursement.</td>
</tr>
<tr>
<td>Nursing Facility or Nursing Home</td>
<td>A facility (or distinct part of a facility) that is licensed by the State of Michigan to provide nursing care and related medical services for residents who require such care above the level of room and board.</td>
</tr>
<tr>
<td>OBRA</td>
<td>The federal Omnibus Budget Reconciliation Act, initially passed in 1987 as Public Law 100-203, with amendments in 1988, 1989, 1990 and 1994. This law incorporated specific provisions for nursing facility reform, including revised requirements for the survey and certification process and for the enforcement process.</td>
</tr>
<tr>
<td>Occupancy</td>
<td>See Resident Days/Occupancy.</td>
</tr>
<tr>
<td>Occupancy Rate</td>
<td>The total number of resident days in a given time period divided by the number of available bed days in the facility for the same time period.</td>
</tr>
<tr>
<td>Owner/Administrator</td>
<td>A person who is employed and functions as the administrator, assistant administrator, business manager, or in any other administrative capacity in the nursing facility, and who is also part or full owner of the nursing facility operating entity, i.e., the provider and/or the nursing facility's real property. If a Director of Nursing is an owner and acts occasionally in an administrator capacity, the time acting in an administrative capacity is allocated to the owner/administrator salary.</td>
</tr>
</tbody>
</table>
### Ownership/Corporate Interest

A person, partnership, or corporation that:

- Has ownership interest totaling 5% or more in a nursing facility, i.e., in the disclosing entity, or in the corporate entity owning the facility; or
- Has an indirect ownership interest equal to 5% or more in a nursing facility, i.e., in the disclosing entity, or in the corporate entity owning the facility; or
- Has a combination of direct and indirect ownership interests equal to 5% or more in a nursing facility, i.e., in the disclosing entity, or in the corporate entity owning the facility; or
- Owns an interest of 5% or more in any mortgage, deed of trust, note, or other obligation secured by a nursing facility, i.e., in the disclosing entity, or in the corporate entity owning the facility, if that interest equals at least 5% of the value of the property or assets of the facility/disclosing entity; or
- Is an officer or director of a nursing facility, i.e., in the disclosing entity, that is organized as a corporation; or
- Is a partner in a nursing facility, i.e., in the disclosing entity, which is organized as a partnership.

**Examples:**

- If Ms. C owns 10% of a note secured by 60% of the nursing facility provider's assets, Ms. C's interest in the provider's assets equates to 6% and must be reported. Conversely, if Mr. S owns 40% of a note secured by 10% of the provider's assets, Mr. S's interest in the provider's assets equates to 4% and need not be reported.
- If Mr. F owns 10% of the stock in a corporation that owns 80% of the nursing facility, Mr. F's interest equates to an 8% indirect ownership interest and must be reported. Conversely, if Ms. N owns 80% of the stock of a corporation that owns 5% of the stock of the nursing facility, Ms. N's interest equates to 4% indirect ownership interest and need not be reported.

### Patient

See Resident.

### Per Resident Day Cost

The total cost for a cost component divided by the total number of resident days. The number of resident days used is the greater of the number of resident days listed in the facility's cost report or 85% of the total number of available bed days for the cost reporting period.

### Plant Costs

Plant costs include depreciation, interest expense (incurred for either working capital or capital indebtedness, mortgage discount points), property taxes, amortization costs associated with loan financing costs (e.g., letters of credit), letter of credit application or commitment fees, amortization of legal fees pertaining to acquisition, recording fees or other fees relating to the capital asset acquisition, and specific lease expenses.

### Property Owner

A person, partnership, corporation, organization, or entity, other than the nursing facility provider, having the property rights to the building in which a nursing facility operates or to the land on which a nursing facility sits.

### Proprietary Provider

A provider or organization that is organized and operated with the expectation of earning profit for its owner[s], as distinguished from providers organized and operated on a nonprofit basis. Proprietary providers may be sole proprietorships, partnerships, or corporations.
Provider
A legal entity (person, partnership, corporation, or organization) that has been approved to participate in the Michigan Medicaid Program. Some conditions of provider participation continue after enrollment in Medicaid has ended, e.g., record retention.

Purchase Allowance
A deduction granted for damage, delay, shortage, imperfection, or other causes, excluding discount and return.

Purchase Discount
A reduction (off the original price for property, goods or services) granted for the settlement of debts (e.g., 5/10 days which means a 5% discount if paid within 10 days).

Purchase Price
The total price agreed upon between a buyer and a seller for property, goods or services.

Quality Assurance Assessment Factor (QAAF)
The percentage increase determined and implemented by Medicaid for a class of nursing facilities.

Quality Assurance Supplement (QAS)
The product of the QAAF for the class times the lesser of the Variable Rate Base for the facility or the class Variable Cost Limit. Class III publicly-owned facilities basis is the lesser of the Class III VCC or the Class I VCL.

Related Entity or Organization
An entity having a business relationship with a nursing facility provider that has 5% or greater beneficial interest or common ownership in or has control of the facility or the facility owner, whether such control has legal standing or is utilized. Also see Chain Organization and Ownership/Corporate Interest.

Related Party
An individual, group of individuals, or business entity that meets criteria similar to that defining a related entity or organization.

Resident
An individual who has been admitted to the provider’s facility and has not been discharged.

Resident Days/Occupancy
Resident days or occupancy for nursing facility Medicaid cost reporting is the sum of the census days in a specified period of time. To calculate the resident days for a particular day, total the census days for that day. (Medicaid residents who are hospitalized are not counted in the census).

Example:

<table>
<thead>
<tr>
<th>Description</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Residents occupying beds in facility</td>
<td>100</td>
</tr>
<tr>
<td>Residents on therapeutic leave</td>
<td>5</td>
</tr>
<tr>
<td>Hospitalized Medicaid residents</td>
<td>3</td>
</tr>
<tr>
<td>Paid bed hold days</td>
<td>1</td>
</tr>
<tr>
<td>Total resident days</td>
<td>106</td>
</tr>
</tbody>
</table>

Restricted Revenue
Revenue that is designated or earmarked, by law, to finance some specific activity or group of related activities.

Routine Nursing Costs
Costs including, but not limited to, necessary medical, nursing, and mental health services, and all items of expense that nursing facility providers incur in the provision of routine nursing services. Costs must be included in the nursing facility provider’s Medicaid cost reporting in accordance with established cost classifications.

Routine Nursing Services
Organized nursing care and activities for the resident, under the observation and assessment of licensed nurses, who enable the resident to attain or to maintain the highest practicable physical, mental, and psychosocial well being in accordance with a written plan of care.
<table>
<thead>
<tr>
<th><strong>State Medicaid Agency (SMA)</strong></th>
<th>The Michigan Department of Health and Human Services (MDHHS). The work unit within MDHHS with administrative responsibility for the Medical Assistance (Medicaid) Program is the Medical Services Administration.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>State Survey Agency (SSA)</strong></td>
<td>The Michigan Department of Licensing and Regulatory Affairs (LARA). The work unit within LARA with administrative responsibility for nursing facility survey and certification is the Bureau of Community and Health Systems (BCHS).</td>
</tr>
<tr>
<td><strong>Support Costs</strong></td>
<td>Costs that are payroll and benefit-related (salaries, wages, related payroll taxes, fringe benefits) for the departments of housekeeping, maintenance of plant operations, medical records, medical director, and administration; administrative costs; all consultant costs not specifically identified as base; all equipment maintenance and repair costs; purchased services; and contract labor not specified as base costs.</td>
</tr>
<tr>
<td><strong>Support Costs Per Day</strong></td>
<td>A facility's support costs divided by the total number of resident days for the same period.</td>
</tr>
<tr>
<td><strong>Support Cost Component, Indexed</strong></td>
<td>See Indexed Support Cost Component.</td>
</tr>
<tr>
<td><strong>Support-to-Base Ratio</strong></td>
<td>A facility's allowable support costs divided by allowable base costs. A facility's support-to-base ratio is limited to the 80th percentile support-to-base ratio for the facility's bed-size group. The bed-size groups are defined as 0-50, 51-100, 101-150, and 151+ nursing care beds in the facility. Group bed size is based on the number of licensed beds in a facility regardless of bed type or whether the bed is available. This includes all types of licensed nursing beds, Home for the Aged beds, or any other type of licensed bed where nursing care is provided. A facility's support-to-base ratio is rebased annually from the most recent audited base period, regardless of ownership.</td>
</tr>
<tr>
<td><strong>Support-to-Base Ratio Limit for Bed Size Group</strong></td>
<td>The support-to-base ratio limit for a bed-size group is set at the 80th percentile of the support-to-base ratios for facilities in the same bed-size group. The bed-size groups are defined as 0-50, 51-100, 101-150, and 151+ nursing care beds in the facility. The 80th percentile is determined by rank-ordering facilities within the same bed-size group from the lowest to the highest support-to-base ratio, then accumulating Medicaid resident days of the rank-ordered facilities, beginning with the lowest, until 80% of the total Medicaid resident days for the group are reached. The support-to-base ratio limit for the bed-size group equals the support-to-base ratio of the nursing facility in which the 80th percentile of accumulated Medicaid resident days occurs.</td>
</tr>
<tr>
<td><strong>Swing Beds</strong></td>
<td>A program of short-term nursing care not exceeding 100 days, provided to patients in a hospital as defined in federal law and Michigan statute.</td>
</tr>
<tr>
<td><strong>Therapeutic Leave Day</strong></td>
<td>See Leave Day – Therapeutic.</td>
</tr>
<tr>
<td><strong>Variable Costs</strong></td>
<td>A facility's total allowable base and support costs for providing routine nursing services to residents, as determined in the Allowable Costs Section of this appendix. Also see definitions for Base Costs and Support Costs.</td>
</tr>
<tr>
<td><strong>Variable Cost Component</strong></td>
<td>The lesser of a facility's Variable Rate Base or the Class Variable Cost Limit, plus the Economic Inflation Update.</td>
</tr>
<tr>
<td><strong>Variable Cost Limit</strong></td>
<td>See Class Variable Cost Limit.</td>
</tr>
<tr>
<td><strong>Variable Costs Per Day</strong></td>
<td>A facility's variable costs (total base and support costs) divided by the total number of resident days for the same period.</td>
</tr>
<tr>
<td>Variable Costs, Indexed</td>
<td>See Indexed Variable Costs.</td>
</tr>

SECTION 4 - COST REPORTING

A nursing facility participating in the Medicaid program must submit a Medicaid cost report to MDHHS annually as a condition of participation. An electronic copy of the cost report, the cost report completion instructions, completion and submission checklists, and related information are available on the MDHHS website. (Refer to the Directory Appendix for website information.)

4.1 EXCEPTIONS

4.1.A. EXCEPTION FOR HOSPICE PROVIDER OWNED NURSING FACILITY

A hospice provider that owns and operates a nursing facility is not required to file an annual cost report to Medicaid. The nursing facility industry aggregate cost data is used in place of individual facility cost data to establish a Medicaid reimbursement rate for this type of nursing facility. Rate determination procedures are addressed in the Rate Determination Section of this appendix.

4.1.B. EXCEPTION FOR SWING BEDS

Hospitals providing short term nursing services (swing beds) are not required to submit a Medicaid nursing facility cost report. Costs associated with swing beds are combined with those of the hospital and submitted on the hospital cost report. Refer to the Hospital Chapter of this manual for information regarding cost reporting requirements related to swing beds.

4.2 NURSING FACILITY COST REPORT

An annual cost report is required for the cost reporting period which is based on the nursing facility's fiscal reporting year end. Each cost report must include an itemized list of all expenses as recorded in the formal and permanent accounting records of the facility. These records must be maintained in a manner consistent with the Medicare Principles of Reimbursement, except where modified by Medicaid policy. Records must also be kept in a manner consistent with previous cost reporting periods. The accrual method of accounting is mandated for all providers. For any cost situation that is not covered by the Medicare Principles of Reimbursement guidelines or Medicaid policy, Generally Accepted Accounting Principles (GAAP) should be applied.

Related organizations and costs to related organizations, as defined in federal policies and regulations, must be disclosed on the nursing facility cost report. Related organization costs claimed for Medicaid reimbursement through the nursing facility's rate determination process must be documented to RARSS on a completed home office cost report or on alternative cost reporting schedules as defined in the Home Office, Chain Organization, or Related Party Cost Reporting subsection of this appendix.

RARSS retains the filed nursing facility cost reports for a minimum of three years from the date of receipt. Nursing facilities are required to retain documentation supporting filed cost reports for a minimum of seven years from the end of the applicable cost reporting period, or beyond the seven year period if audit determinations have not been resolved.
4.3 COST REPORT REQUIREMENTS

The RARSS will send a notice electronically through the File Transfer application to the facility or business office as designated by the provider soon after the end date of the nursing facility's cost reporting period on record. The notice specifies the nursing facility's county and license number coding, fiscal reporting period end date, cost report due date, and other pertinent data necessary for the completion of the cost report. The provider will have access to the specific information required to file an acceptable Medicaid Cost Report package in File Transfer. File Transfer has the applicable electronic cost report template, completion instructions, construction cost index for asset acquisitions, and other pertinent information in downloadable form.

The completed cost report package submitted to RARSS must include:

- The standardized electronic cost report (ECR) data in accordance with specified formatting and software.
- An electronic copy of the Certification Statement (Worksheet A), which has been prepared and printed from the completed ECR file, and physically signed by an authorized representative of the nursing facility certifying to the accuracy of the prepared cost report.
- A copy of the nursing facility's detailed general ledger and complete (no grouping or summary) trial balance of revenues and expenses.

The completed cost report package must be delivered electronically through File Transfer to RARSS as indicated in the notice.

4.4 COST REPORT ACCEPTANCE

Each cost report submitted to RARSS is verified prior to its acceptance. The cost report package will only be accepted if all of the following conditions are met:

- The package is complete.
- The cost report calculations are mathematically accurate, reasonable and consistent.
- The completed electronic cost report (ECR) data uses the required software and specified format.
- MDHHS audit staff can generate a full cost report applicable to the cost year from the ECR file.
- An electronic copy of the Certification Statement is completed and signed, and agrees with the submitted ECR file.
- The data meets a set of validation checks contained within the ECR plus the appropriate bed size and certification reporting requirements.
- The submitted ECR file includes proper reporting of costs and related cost report allocations in accordance with prior year(s) audit adjustment determinations for like costs or cost reporting issues.
- The cost report preparation complies with Medicaid policy and cost reporting instructions.
A cost report is considered not filed until it is accepted by RARSS. If the submitted cost report is determined to be unacceptable, RARSS will return the cost report to the nursing facility for correction and provide notice of the date the corrected cost report is due. The returned cost report will include information that indicates the reason(s) for the unacceptable report.

A corrected cost report – a revision of the most recently submitted cost report – may be submitted to RARSS for acceptance upon approval by RARSS. The provider should contact RARSS to obtain the acceptance status of that reporting period’s most recent cost report ECR file prior to submission of a corrected cost report. A corrected cost report that is accepted by RARSS defaults as the original cost report.

4.5 LESS THAN COMPLETE COST REPORT

With written approval from the RARSS, a nursing facility may submit a less than complete cost report.

4.5.A. NO MEDICAID UTILIZATION

A nursing facility that has not furnished any services to Medicaid beneficiaries during the entire cost reporting period does not need to submit a cost report to comply with Medicaid’s cost reporting requirements. The nursing facility may replace the cost report with a letter signed by an authorized representative that identifies the cost reporting period to which the statement applies (includes the facility name and provider NPI number), and states that:

- No covered services were furnished during the reporting period.
- No claims for Medicaid reimbursement will be filed for this reporting period.

The signed statement must be submitted to the RARSS within 30 calendar days following the date of the nursing facility cost report filing notice.

4.5.B. LOW MEDICAID UTILIZATION

RARSS may authorize a less than complete cost report for a nursing facility with low utilization of Medicaid services in a reporting period. “Low utilization” is defined as an average of five or fewer Medicaid residents per day in the facility for the cost year, i.e., fewer than 1,825 Medicaid nursing days. The nursing facility must submit a written request to RARSS for approval to file a less than complete cost report for the specific cost reporting period. The request must be signed by an authorized representative of the nursing facility, identify the reporting period the request applies to, include the facility's name and provider NPI number, and:

- Indicate the reason(s) for the request.
- Indicate Medicaid utilization and the approximate Medicaid dollar amount of payments received for the year.

The written request must be submitted to the RARSS within 30 calendar days following the date of the nursing facility cost report filing notice.
After RARSS reviews the filed utilization and payment information, RARSS will send a written response to approve or deny the facility's request to submit a less than complete cost report. If approved, the facility will be required to furnish the following information using the required formats (ECR file worksheets):

- Information and Certification page.
- Statistical and Fiscal Data page.
- Ownership Information and Questionnaire.

In addition, the facility must prepare and submit the following information for the cost reporting period:

- Balance Sheet, and
- Prepared Financial Statements.

The nursing facility must submit the data within the same time period required for complete cost reports. Medicaid reserves the right to require the facility to file a complete cost report.

4.6 COST REPORT DUE DATE

The RARSS will notify the nursing facility of the cost report due date by letter mailed to the nursing facility or designated business office. An acceptable cost report must be received by RARSS within five months following the nursing facility's cost reporting period end date. Subsequent notice of the cost report due date is addressed in the Cost Report Delinquency subsection of this appendix.

A cost report is considered filed timely if the acceptable cost report is submitted to the RARSS on or before the last day of the fifth month following the cost report period end date. Late submission of an acceptable cost report may cause a delay in determination of the provider's annual reimbursement rate and the rate notice to the provider. Refer to the Rate Determination subsection of this appendix for additional information.

4.6.A. CORRECTED COST REPORT DUE DATE

If the cost report is returned to the provider unaccepted, the provider is given 15 calendar days from the date that RARSS returned the cost report to resubmit a corrected cost report. A written request for an extension may be made to RARSS for additional days (not to exceed 30 calendar days from the return date). The RARSS will notify the provider in writing of the extension decision. If a corrected cost report is not received by the correction due date, the nursing facility is subject to cost report delinquency and payment termination notification. Refer to the Cost Report Delinquency subsection of this appendix for additional information.

4.6.B. COST REPORT FOR FACILITY CLOSURE OR CHANGE OF OWNERSHIP

A nursing facility that has terminated its Medicaid program participation, either voluntarily or as the result of regulatory action, is required to submit a final cost report within five months following termination date.
The former owner of a nursing facility that has undergone a change of ownership is required to submit a final cost report within five months following the effective date of the ownership change.

4.7 NEW FACILITY/OWNER REQUIREMENTS [CHANGE MADE 7/1/18]

A new Medicaid provider (either a new owner or a new Medicaid participating provider) must notify RARSS of its fiscal year, cost reporting period, and other pertinent information regarding the nursing facility. In order for RARSS to establish the facility's Medicaid reimbursement rate, this notice must be submitted to MDHHS at least 30 calendar days prior to the begin date of Medicaid participation. Untimely submission of the data will result in delaying Medicaid payment to the nursing facility.

The new provider information packet is available by request to the RARSS. An electronic copy of the packet may also be accessed on the MDHHS website. (Refer to the Directory Appendix for contact and website information.)

The new provider information data must include the following items:

- Medicaid operations (revised 7/1/18) begin date.
- Fiscal year reporting period.
- Federal employer identification number.
- Facility business name.
- Corporate name (if different from business name).
- Facility address.
- Business mail address (if different from facility address).
- Affiliation to a home office chain or related nursing facility group, including corporate organization, address, fiscal reporting time period, federal employer identification number and contact person information.
- Nursing facility Medicare Program status.

The new provider information data packet must be signed and submitted by an authorized representative of the nursing facility.

4.8 CHANGING A COST REPORTING PERIOD

An annual cost report is required for the reporting period based on the nursing facility's fiscal reporting year. A nursing facility must file an annual cost report in accordance with the cost reporting period established with RARSS. However, under certain circumstances, RARSS may authorize a change in the nursing facility cost reporting period. The new cost reporting period must concur with the time period of the nursing facility financial reporting year.

4.8.A. NEW FACILITY/NEW OWNERSHIP INITIAL COST REPORT

A new Medicaid provider (either a new owner or a new Medicaid participating provider) must notify RARSS of its fiscal year and cost reporting period, and other pertinent
information regarding the nursing facility. The initial cost report must cover a period of at least two months but may not exceed 13 months.

4.8.B. WRITTEN REQUEST FOR COST REPORTING PERIOD CHANGE

A nursing facility owner interested in changing a cost reporting period must submit a written request to RARSS. The request for such a change must be filed at least two months prior to the first day of the new fiscal reporting period being requested. The request must include documentation supporting the change, such as a copy of an approval of Medicare Program reporting change or Internal Revenue Service reporting year change notice. If the reporting year change is not yet approved by these agencies, a copy of notice to Internal Revenue Service reporting or application for Medicare Program reporting change may be submitted. The request must also include a copy of the nursing facility director or governing board approval resolution or minutes adopting the fiscal reporting revision.

RARSS will notify the provider in writing of the approval or denial of the request and cost report time period requirements resulting from the request.

4.8.C. APPROVAL FOR TRANSITION PERIOD COST REPORTING

If the change is approved, the nursing facility will be required to file a cost report for the period between the end date of the original cost reporting period and the beginning date of the new cost reporting period. This cost report must cover a time period not less than two months and not more than 13 months. Cost report periods that cover a period less than seven months may be used for Medicaid reimbursement for retrospective cost settlement determination for specific cost items, but are not used for prospective rate setting determinations affecting a subsequent rate setting year.

4.8.D. EXTENDED PERIOD COST REPORT

A provider may submit a request for a cost reporting period of more than 12 months but not greater than 13 months if:

- the provider is terminating Medicaid Program participation; or
- the facility is closing.

Written request must be made to the RARSS and must outline the exceptional circumstances. The provider will be notified in writing of approval or denial.

The RARSS may approve such requests if the Medicaid program or the nursing facility is not significantly adversely affected. Examples include requests in which:

- the request is not made for purpose to gain access to higher ceiling rates or economic inflation adjustors;
- the cost report data will have limited use for reimbursement determinations, i.e., not used for annual rate setting;
the report is not used for subsequent time period rate determination; and
it is used solely for retrospective settlement items.

4.9 COST REPORT DELINQUENCY

The nursing facility cost report is considered delinquent if:

- An accepted cost report has not been received by RARSS by the cost report due date and the cost report remains not filed with RARSS.
- A corrected cost report has not been received by RARSS by the cost report due date or correction period due date and the cost report remains not filed with RARSS.

If the nursing facility cost report is delinquent, RARSS will share a delinquency and Medicaid payment termination notice with the nursing facility or the provider’s designated business office through File Transfer. The notice will indicate the date (not less than ten business days from the notice date) on which Medicaid payment will be terminated unless a cost report is received by the RARSS.

If an acceptable cost report is received after payment termination, payments will be reinstated through the normal pay cycle(s) process. Medicaid will remove the payment termination entry pertaining to the cost report delinquency action allowing the release of all payments withheld for the cost report delinquency action.

4.10 AMENDED COST REPORT

An amended cost report to adjust a previously accepted cost report may be permitted or required by Medicaid.

An amended cost report is accepted by Medicaid to:

- Correct material errors detected subsequent to the filing of the original cost report.
- Comply with health insurance policies or regulations.
- Reflect the settlement of a contested liability.

Before completing and submitting an amended cost report, the nursing facility should contact the RARSS by verbal or written communication to determine the appropriate mode for making the necessary amendment(s). Amended cost report data will be effective for reimbursement rate determination and payment for nursing facility services rendered beginning in the month following the receipt of the provider’s notice to RARSS of the need to amend the cost report.

The provider must include a disclosure letter with the amended cost report identifying the reason for the amended report and citing the cost report Worksheet(s) and the data input cell(s) within the Worksheet(s) that have been revised.
The provider cannot amend an audited cost report. Amended cost reports will not be accepted by RARSS after the completion of an audit except in cases where the filed and audited cost report continues to be the basis for the nursing facility's current reimbursement rate. An amended cost report must properly reflect any audit adjustments made to the original cost report. Amended data will be used, as appropriate, to compute future rates but will not be used to retroactively change a previously paid prospective rate. Use of amended cost report data for retroactive application to prior services will only be made in cases related to fraud or failure to disclose required information in the cost reporting. Situations where retroactive changes are permissible are described in the Cost Report Reimbursement Settlements Section of this appendix.

4.11 HOME OFFICE, CHAIN ORGANIZATION, OR RELATED PARTY COST REPORTING [CHANGE MADE 7/1/18]

Nursing facilities that have costs applicable to services, facilities, and supplies furnished to the provider by organizations or entities related to the nursing facility by common ownership or control may include the costs in the nursing facility cost report. These costs may arise from arrangements involving a home office of a chain organization or services provided to the nursing facility or purchased by the nursing facility from related party businesses.

For facilities that are operated as part of a chain organization, home office costs claimed on the individual nursing facility's cost report must be reported using the Medicaid Nursing Facility Home Office Cost Statement (MSA-1578).

For nursing facilities reporting costs of services provided by a related party organization, the MSA-1578 must be used for reporting costs. An electronic copy of MSA-1578 will be available to providers in File Transfer. Alternative cost reporting worksheets or accounting schedules may be substituted for the Home Office Cost Statement if RARSS agrees that the alternative format provides supporting documentation to adequately identify expenses and the allocation of costs to the nursing facility. RARSS will approve the format as submitted, require additional data or revisions to the reporting format, or disapprove the alternative reporting.

When the fiscal year for the home office or related organization coincides with the nursing facility's fiscal year, the due date for the home office or related party organization cost report must coincide with the nursing facility's annual cost report due date. In cases where the fiscal years do not coincide, the nursing facility must submit the cost report of the home office or related party organization for the most recently completed fiscal year of that entity. If the report was previously submitted to RARSS, it must be resubmitted by the same due date as the nursing facility's cost report. Exception: Participation in the cost allocation option (as outlined in the Related or Chain Organization Cost Allocation subsection of this chapter) supersedes this requirement. (Refer to the Related or Chain Organization Cost Allocation subsection in this appendix for additional information.)

(text deleted per bulletin MSA 17-20)

4.11.A. HOME OFFICE COSTS - CHAIN ORGANIZATION

For Medicaid purposes, a chain organization consists of a group of two or more nursing facilities, or at least one nursing facility and any other business or entity owned or operated and controlled by one organization.

For Medicaid policy regarding allowable costs, refer to the Cost Classification and Cost Finding Section of this appendix.
4.11.B. RELATED PARTY BUSINESS TRANSACTIONS [CHANGE MADE 7/1/18]

The operating costs of a related ownership organization are allocated to the individual nursing facility as a purchased service. This cost must be identified within the appropriate cost center in the Medicaid cost report. Identification of the type of service determines if the costs qualify to be apportioned between base and support cost using the industry-wide base and support cost percentages. If the service does not qualify to be apportioned by this method, the allocated costs are classified as support costs in the individual nursing facility.

The related party organization cost reporting is required for the specific related party organization business entity in the following cases:

- If the dollar amount of routine nursing care costs to the individual nursing facility exceeds $25,000 in aggregate, regardless of the number or type of services provided.
- If the sum (total dollar amount) of routine nursing care costs to multiple nursing facilities exceeds $125,000 in aggregate, regardless of the number or type of services provided and number of nursing facilities served.

These dollar limits apply to related party business transactions whether they are routine or ancillary nursing services. The dollar thresholds will only apply to costs allocated to a Medicaid routine care unit, either directly or through the stepdown process (i.e., if $25,000 in costs are allocated to a nursing facility from a related party, but none of the costs are allocated to the Medicaid routine care unit, then no home office cost report would be required). Beginning October 1, 2018 and biennially thereafter, these amounts will be updated based on the Centers for Medicare & Medicaid Services (CMS) Skilled Nursing Facility (SNF) Market Basket. The updated amounts will be posted to the Long-Term Care Reimbursement and Rate Setting Section (RARSS) website. (Refer to the Directory Appendix for website information.) (revised per bulletin MSA 17-20)

Facility lease arrangements between related parties must be separately reported in the cost report as described in the Allowable and Non-Allowable Cost Section of this appendix.

Related party expenses must remain on the individual nursing facility cost report for the proper allocation of overhead costs regardless of whether they are ancillary or routine. This provision applies even if a home office cost report is not required. (added per bulletin MSA 17-20)

4.11.B.1. EXCEPTION PROCESS [SUBSECTION ADDED 7/1/18]

An exception to the related party home office cost reporting requirements may be granted if all or part of the expenses are directly allocated to the nursing facility or facilities. If only part of the expenses are directly allocated, the sum of all other expenses allocated to a facility or facilities must be less than the dollar thresholds established in policy. Exceptions must be approved by RARSS prior to or on the due date of the home office cost report. Examples of expenses that would qualify for an exception include, but are not limited to, health insurance benefits, administrator and other staff salaries, retirement benefits, payroll taxes, other fringe benefits, contracted health
4.12 COST REPORT FILED UNDER PROTEST

As part of the cost settlement and cost report audit process, a nursing facility provider may dispute a Medicaid regulatory or policy interpretation. (Refer to the Appeal Process Section of this appendix for additional information.) If the provider has a dispute regarding the annual cost report, the nursing facility must submit a separate cost report, referred to as a "protest cost report" to establish their reporting of the dispute issue. In order to preserve the nursing facility cost report claim, this separate cost report must be identified as under protest for the disputed issues that remain under appeal or are subject to an appeal. The protest cost report filing must include an accompanying letter, signed by the nursing facility authorized representative, listing the disputed issue(s) and respective dollar amount(s) for the basis of the protest cost report filing. Protest cost reporting issues will be addressed in the cost report audit process dependent upon resolution of the disputed issues. The cost report filed under protest will not be used for rate determination, but will provide information for audit consideration relative to disputed issues. The auditor will address necessary audit adjustments to the accepted cost report to reflect the appeal resolution.

Protest cost report filing is not for general disagreement with promulgated Medicaid policy. The RARSS will not accept protest cost reports filings that include items considered as disagreement or dissatisfaction with promulgated policy.
SECTION 5 - PLANT COST CERTIFICATION

Medicaid reimburses nursing facilities for costs associated with capital asset ownership. The costs are referred to as plant costs and are reimbursed as the Plant Cost Component of the per diem reimbursement rate. The Plant Cost Component is based on the cost report data submitted by the nursing facility for the previous calendar year. The Plant Cost Component includes costs associated with capital asset acquisition, depreciation, interest expense (either working capital or capital indebtedness), property taxes, amortization costs associated with loan financing costs (letters of credit, asset acquisition legal fees) and specific lease expenses. The Plant Cost Component of the reimbursement rate determined for a nursing facility remains consistent throughout the State's fiscal year period (October through September), unless the facility qualifies for an interim reimbursement rate.

Example: Plant cost data from cost report year-end December 31, 2016 is the basis for the Plant Cost Component for the October 2017 through September 2018 rate period. Refer to the Cost Classification and Cost Finding, and the Rate Determination sections of this appendix for additional information.

The process used to determine if a facility qualifies for an interim reimbursement rate is called Plant Cost Certification. Special rate setting provisions qualify facilities to use current year costs associated with capital ownership instead of the prior year's cost report data to determine the Plant Cost Component of the reimbursement rate. Rate setting provisions are available for facilities incurring exceptional changes in the facility's plant costs during the current year. Qualifying situations such as new construction or renovation, new asset acquisition, new ownership, or changes in the nursing facility's bed size or the type of resident services are considered to determine eligibility for Plant Cost Certification.

5.1 PLANT COST CERTIFICATION ELIGIBILITY CRITERIA

A facility may plant cost certify when there is no plant cost data available or when the plant cost data inadequately reflects the current rate period plant costs. Plant Cost Certification is available in the following situations:

- The nursing facility provider is constructing a new building or incurring physical plant improvements with Certificate of Need (CON) approval, or the asset costs are, on average, $1500 or more per licensed bed in capital expenditures in a single cost reporting period.
- There is an approved CON ownership change for an existing facility, or the nursing facility assets have changed ownership in a manner that requires CON review.
- The SSA has changed the class level of the facility, change in Medicaid certified beds, or the type of nursing or resident care services provided in the nursing facility.
- The nursing facility has an approved non-available bed plan in the cost report period.
- The nursing facility is in the first full cost report year following the termination of an approved non-available bed plan.

5.2 PLANT COST CERTIFICATION SUBMISSION

The provider must complete the Plant Cost Certification process and qualify in order to receive an interim reimbursement rate. The RARSS must receive a compilation of the nursing facility's expected allowable plant costs and a statement signed by the nursing facility's authorized representative attesting to the
data’s accuracy and adherence to the Plant Cost Certification policy. The provider must use the MDHHS required format for document preparation. A provider having a nursing facility license and leasing the facility must report facility costs of the lessor in accordance with Medicaid’s reimbursement policy. Refer to the Allowable Cost and Non-Allowable Cost, and Cost Classification and Cost Finding sections in this appendix for additional information.

A provider requesting an interim reimbursement rate must provide the information in the Medicaid Long Term Care Plant Cost Certification format and submit copies of supporting documentation. A copy of the format is available on the MDHHS website. (Refer to the Directory Appendix for website information.) The Plant Cost Certification packet of accepted sample formats is available by request to RARSS. An electronic copy of the packet can also be accessed on the MDHHS website.

Supporting documentation must include the following items for a transfer of ownership of a license, acquisition, or lease that requires CON approval:

- CON Approval Letter
- Purchase Agreement
- Mortgage and Loan Agreements
- At least 36 months of Interest Amortization Schedules for Financing prepared by the lender
- Property Tax Statements
- Capital Asset Cost Appraisal
- Purchase Closing Statement or Recording

Supporting documentation must include the following items, where applicable, for a renovation, addition, or new construction:

- CON Approval Letter (if CON approval is required)
- Licensed Bed Notice issued by the State Survey Agency (SSA)
- Mortgage and Loan Agreements, if applicable
- At least 36 months of Interest Amortization Schedules for Financing prepared by the lender
- Property Tax Statements
- Construction Contract Statement or Summary

The completed information and supporting documentation may be sent to RARSS by mail, delivery, or File Transfer. Inquiries relating to the submission of the data should be directed to the RARSS office. (Refer to the Directory Appendix for contact information.)

If RARSS determines that the plant certification eligibility criteria are met, the submitted cost data will be desk reviewed, adjusted if necessary, and used to calculate the nursing facility’s Plant Cost Component. If the fiscal year cost report filing and subsequent cost report audit determine the data used to calculate the reimbursement for the Plant Cost Component resulted in an overpayment or underpayment to the provider, the Medicaid recovery or additional reimbursement due the provider is included in the cost report reimbursement settlement. (Refer to the Cost Report Reimbursement Settlement section of this appendix for additional information.)
5.2.A. Plant Cost Certification Requirement for Reimbursement – Building and Equipment Changes

A new or existing provider or business entity operating a nursing facility that is incurring a change involving the nursing facility's building and equipment must complete a Plant Cost Certification. A provider that obtains ownership of the nursing facility building and equipment or enters a lease agreement for the facility must submit a completed Plant Cost Certification. In the instance that a lease change is the result of a facility ownership change where the provider has a different landlord, a plant cost certification is required if any terms of the lease agreement changes, such as lease amount, duration, etc.

The Plant Cost Component of the reimbursement rate will be zero until the Plant Cost Certification is received by the RARSS. In order to be eligible for retroactive reimbursement, the provider must submit a completed Plant Cost Certification on or before the date of the initial filing of cost report for the year in which the ownership change or asset transaction occurred. The effective date of the Plant Cost Certification will be the month that new ownership becomes the licensed entity or the asset transaction. Plant Cost Certification requests received by RARSS subsequent to the cost report filing will not be eligible for retroactive reimbursement, and future plant cost reimbursement rates will be effective as outlined under the effective time period policy.

5.2.B. Plant Cost Certification Submission Waiver

If the provider qualifies for Plant Cost Certification under the approved non-available bed plan or because it is the first cost report year after the non-available bed plan termination, the data submission requirement is waived. The provider has the option to file during the rate year or to defer the plant cost rate revision until the cost report reimbursement settlement. Settlement adjustments for plant costs for the cost reporting period will automatically apply to non-available bed plan periods. If a Plant Cost Certification is not filed, the nursing facility's interim Plant Cost Component will continue to be based on the previous year's cost report, and the cost report reimbursement settlement will be adjusted to the allowable plant cost level for the cost report time period. Refer to the Cost Report Reimbursement Settlement section of this appendix for additional information.

5.3 Plant Cost Certification Effective Time Period

The effective time period of the plant cost certification will be determined by the RARSS. A completed Medicaid Long Term Care Plant Cost Certification request in required format, with documentation, received by the RARSS prior to the 16th of the month is effective and included in the reimbursement rate as of the first day of the following month (e.g., a request received between September 16 and October 16 will be reflected for days of care beginning November 1).

The effective date of the plant cost certification cannot be prior to the month in which the facility experienced the change of ownership or the qualifying asset change. The rate is not revised for partial months. For interim rate setting, the revised reimbursement rate due to the Plant Cost Certification will not be applied to prior service dates except in instances where a provider meets certification eligibility under the nursing facility ownership change or lease provisions. If a plant cost certification is filed prior to the provider's cost report year end, an interim reimbursement rate is effective on a prospective basis.
for service dates after filing date. Retroactive reimbursement due to the plant cost change for that cost report year services will be addressed in the initial and final settlement determination of the cost report. Refer to the Cost Report Reimbursement Section of this appendix for additional information.

If a Plant Cost Certification is filed after the provider's cost report year end, the plant cost reimbursement rate change is only effective on a prospective basis in accordance with the time period established by the Plant Cost Certification request receipt date.

The Plant Cost Certification interim reimbursement ends when the nursing facility's prospective Plant Cost Component is based on the first complete cost report year that reflects the plant costs which qualified the nursing facility for Plant Cost Certification.

**Example:** A nursing facility with a cost report period of January 1, 2018 through December 31, 2018 completes an eligible renovation project in June 2018, and submits a Plant Cost Certification before June 16, 2018 to be effective July 1, 2018. (Note: Rate Year refers to a time period coinciding with the state fiscal year rate period. The time periods listed below the Rate Year identify the period during which the rate will be paid and the cost report year on which the rate is based.)

5.4 PLANT COST CERTIFICATION UPDATES AND REVISIONS

The nursing facility's initial Plant Cost Certification will continue to be used for the interim Plant Cost Component unless the nursing facility submits a revision to the Plant Cost Certification.

Following the initial submission of the Plant Cost Certification, the nursing facility is responsible to submit an updated or revised Plant Cost Certification to assure the interim Plant Cost Component reimbursement is representative of the current rate period plant costs.

The nursing facility provider may revise its submitted Plant Cost Certification at the beginning of subsequent fiscal year rate periods or the beginning of a calendar quarter, but not more than two times per year. The effective timeframes for payment based on the updated information are the same as noted above.

The overpayment penalty provisions, if applicable, remain in effect regardless of payment based on initial submission or revised data.

5.5 PLANT COST CERTIFICATION OVERPAYMENT PENALTY

At the time of the MDHHS audit of the provider's fiscal year cost report, if the interim reimbursement payments resulting from Plant Cost Certification exceed cost report settlement plant cost reimbursement, all excess funds paid as a result of the Plant Cost Certification request will be recovered by Medicaid. The provider will be assessed a penalty for overpayments resulting from Plant Cost Certification. The penalty will be 10 percent of the aggregate dollar amount difference between the interim reimbursement payments resulting from the Plant Cost Certification and the cost report settlement plant cost reimbursement. The penalty will be waived if the aggregate dollar amount difference is equal to or less than 10 percent of the provider's aggregate Plant Cost Component reimbursement amount for the cost settlement period. Overpayment recovery and penalty determination are included in the Cost Report Reimbursement Settlements Section.
SECTION 6 – AUDIT

The goal of the cost report audit is to provide the MDHHS assurances that the cost report information is accurate for the determination of Medicaid reimbursement rates, and includes the following objectives:

- To review, analyze, and test the nursing facility’s Statement of Reimbursable Cost and underlying financial records to confirm that only reasonable and allowable costs have been included.
- To confirm that the methods used to calculate the required statistical information are adequate and that the statistical data is recorded accurately.
- To confirm that the cost finding and cost apportionment have been accurately and fairly computed.
- To confirm the accuracy of the costs allocated to Medicaid by independently applying the method approved for the provider’s use in computing reimbursable cost.
- To confirm that, in all material aspects, the nursing facility provider is in compliance with the reimbursement policies and regulations.
- To review, analyze and test the nursing facility’s revenue and billings to determine the propriety of billing practices and identify potential errors and financial risk to Medicaid.
- To identify the underlying causes of significant errors or problems noted during the audit and to suggest improvements.
- To follow up on significant problem areas identified in previous audits.
- To confirm consistent and uniform application of federal and state laws, rules, and regulations for reimbursable costs.

6.1 AUDIT PROCESS

The annual audit process may include a desk audit/review, a computer check, and/or an onsite audit. This process may be performed by MDHHS audit staff or by a qualified designee.

Onsite audits will be conducted no less than once every four years. An audit of either limited or full scope will be performed on the records of each participating nursing facility provider to ensure that the expenses attributable to allowable cost items are accurately reported in accordance with established principles and guidelines.

A Preliminary Summary of Audit Adjustments Notice is issued to the facility upon completion of the audit.

6.1.A. REQUIRED INFORMATION

Each provider must allow access or arrange for access by MDHHS staff, or their designees, to required financial records and statistical data including:

- Records required by the Medicare Principles of Reimbursement
- Complete financial records of related organizations
Complete records of lessors necessary to determine underlying costs of leasing facilities and items of equipment

These records include, but are not limited to, the following:

- Census records and numbers and types of leave days for each Medicaid beneficiary/resident (i.e., hospital, therapeutic)
- Resident medical records, with details of medical services received by each resident
- Resident service charge schedules
- Resident trust fund account records, with evidence of quarterly reporting to each resident
- Medicaid Cost Report with supporting documentation for cost finding statistics utilized on the report
- Supporting documentation for Nurse Aide Training and Competency Evaluation Program activity and cost data
- Documentation to support the cost and activity level for special Medicaid reimbursement provisions beyond the scope of services included in routine nursing care
- Total and Medicaid ancillary charge summaries and logs
- Medicare Cost Report, if applicable
- Medicare and other health insurance billing and payment records for each resident
- Books of original entry, including standard/special journals, payroll journals, disbursement journals, etc.
- Employee records, including detailed payroll records, personnel files, employee wage scales, shift schedules, union contracts, agreements, fringe benefits (e.g., deferred compensation, pension plans, insurance, personal use of assets, special allowances), individual accounts of leave days, job descriptions, and payroll tax returns.
- Facility policy and procedure manuals and related materials
- Plans for internal control
- Minutes of meetings of the governing body
- General and subsidiary ledgers, including stock ledgers, cash receipts, etc.
- Purchase requisitions and orders
- Vouchers and invoices in detail to support services and goods purchased
- Records related to management fees, executive services or personal services contracts, and contracts for services under arrangement
- Charts of accounts
- Checking account registers, canceled checks, and bank statements
- Vehicle mileage and use logs
- Fixed asset records
- Capital expenditure records and depreciation lapse schedules
6.1. B. AVAILABILITY OF INFORMATION

The nursing facility must have an accounting and records maintenance system to provide accurate cost, revenue and statistical data, and other information that can be verified by Medicaid auditors. MDHHS audit staff or their designees will not complete an audit if the nursing facility does not make required information available. If the required information is not released within 15 business days of a written request by an auditor during an audit, MDHHS may assess a financial penalty to the provider until the requested records are made available to the auditor. MDHHS will issue prior notice to the provider that they will assess the penalty equal to 20 percent of the facility's monthly Medicaid payments, effective in the first month following the expiration of the 15-day notice period. Waiver of the penalty assessment is only allowed by approval of the Medicaid Director following the provider's request for waiver consideration, including justification for the request and additional time to provide the records.

NOTE: A nursing facility provider that has been assessed a penalty is prohibited from collecting additional funds from Medicaid beneficiaries to compensate for the penalty.

If, after the 15-day period, the records become available for auditor review, an authorized representative of the nursing facility must give written notice of record availability to the MDHHS Office of Audit. This acknowledgement to release the requested records must designate the contact person and record location. The payment penalty will be discontinued effective for the month following the date the auditor determines that the required records have been released and the dollar amount of penalty assessments will be refunded to the nursing facility provider. The auditor's determination that the requested records have been provided will be made within 60 calendar days of such written agreement to release the requested records.
The auditor may determine that records necessary to verify specific cost report expenses are required to complete the audit. Failure to release the requested records within 15 business days of a written request will result in a disallowance of costs associated with the item in question. If the nursing facility disagrees with the disallowance, this disallowance can be appealed at the completion of the audit. (Refer to the Appeal Process Section of this appendix for additional information.)

6.1.C. RETROACTIVE RATE CHANGES

A retroactive change in a nursing facility's rate and reimbursement may be made after completion of an audit in the following situations:

- For those providers that are retrospectively settled.
- For those providers that had an interim rate set prior to completion of the cost report audit.
- For those providers that were retrospectively settled because they were granted Rate Relief.
- For audit adjustments required as a result of a hearing decision.

Refer to the Reimbursement Rate Determination section of this appendix for detailed information regarding retroactive effective time periods for rate determination and reimbursement actions.

6.1.D. REOPENING AUDIT DETERMINATIONS

MDHHS may elect to reopen an audit determination following completion and closing of the audit of a nursing facility cost report. MDHHS will provide notice to the nursing facility of the audit reopening and the issues for which the audit is under review. Results of the audit reopening will be submitted to the provider, who will be given the opportunity to review the findings and appeal in accordance with Medicaid policy. If it is determined that the audit cost report contains incorrect data, MDHHS will use corrected data to compute future rates. The audit revisions will be effective for reimbursement rate determination and payment for nursing facility services rendered beginning the month following notice to the provider that the subject audit is being reopened.

The results of audit reopening actions will only be effective for retroactive reimbursement revision in cases of fraud or when the provider's failure to disclose required information was pertinent to the determination of allowable cost.

MDHHS will not reopen an audit determination for any reason other than fraud beyond three years following the date of final settlement.

6.1.E. RECORD RETENTION

Each nursing facility’s accounting and related records must be kept for a period of not less than seven years. This obligation does not end if a provider closes or sells a facility. All records, source documents, contractual agreements, and corporate minutes must be available onsite, or at a readily accessible location, for verification and inspection by
MDHHS staff or their designees. When accounting personnel, books and records are located out of state, the provider is required to pay auditor travel expenses if MDHHS staff or their designees deem it necessary to access documentation during the course of an audit.

6.2 FINANCIAL FRAUD AND ABUSE

Federal Medicaid law and regulations require the Medicaid program to establish and maintain methods and criteria for the identification, investigation, and referral of potential fraud and abuse. In accordance with federal and state requirements, MDHHS will authorize the suspension of Medicaid payments (in whole or in part) to a nursing facility provider on receipt of reliable evidence that the provider committed fraud or willful misrepresentation while enrolled as a Medicaid provider. The provider will receive written notice of such suspension and may request an administrative review. (Refer to the Appeal Process Section of this appendix for additional information.)

A MDHHS auditor or designee who observes potential fraud or financial abuse will prepare a separate report of observations. Observations of potential fraud or abuse include, but are not limited to, the following:

- Recording of personal expenses
- Overutilization of services to inflate charges
- Unauthorized use of resident trust funds
- Payroll entries of personnel who provide no services
- Concealment of business activities
- Falsifying records
- Charging Medicaid for costs not incurred
- Duplicate billing
- Billing beneficiaries inappropriately for Medicaid services
- Soliciting, offering, or receiving a kickback, bribe, or rebate
- Knowingly failing to disclose required information in the Medicaid cost report

Reports of observations will be reviewed by MDHHS staff and appropriate actions taken. This may include forwarding a copy of the report and supporting documentation to the state Attorney General’s Health Care Fraud Division.
SECTION 7 - COST REPORT REIMBURSEMENT SETTLEMENTS

The nursing facility reimbursement rate is determined in accordance with the policy provisions outlined in the Rate Determination Section of this appendix. The reimbursement rate may include routine nursing care services and various rate add-on amounts depending on the Medicaid reimbursement policy effective at the time. The facility rate is a per diem amount. Rate determination may be based on filed cost report data, audited cost report data, cost data submissions and projections for specific reimbursement activity, or interim reimbursement provisions in accordance with Medicaid policies. The reimbursement rate is determined at the beginning of the rate year and the nursing facility is provided notice of the rate determination prior to implementation of the rate. The reimbursement rate may be revised any time during the rate year in accordance with rate determination policies. Rate revisions can result from the following actions as detailed in the Rate Determination Section:

- More recent Fiscal Year filed cost report
- Audited cost report
- Plant Cost Certification
- Nurse Aide Training and Competency Evaluation Program
- Special Dietary Cost Allowance
- Special Reimbursement policy actions

Reimbursement for ancillary services provided to Medicaid-eligible residents will be made in accordance with policies identified in the Coverage portion of this chapter and in the Billing & Reimbursement for Institutional Providers Chapter.

7.1 INTERIM REIMBURSEMENT AND RATE REVISIONS

The Rate Determination Section in this appendix outlines the process for determining the nursing facility's annual reimbursement rate. If RARSS determines that a reimbursement rate must be revised, the rate change may affect payment for future and/or previous dates of service. RARSS will notify the provider of the rate change and the rate's applicable time period.

If a rate revision applies to future dates of service, RARSS will send written notice to the provider's designated address specifying the revised rate and the applicable time period for the rate.

If a rate revision must be applied to previous dates of service in the current cost report year, RARSS will notify the provider of the applicable time period and the reimbursement rate. If the rate revision applies to previous dates of service in the current cost report year, RARSS will make the determination of an underpayment or overpayment amount, and RARSS will notify the provider of the process for implementing the payment adjustment(s).

If the rate revision applies to a prior cost report year's dates of service, the payment adjustment process is addressed in the Initial Settlement Section of this appendix.
7.2 INITIAL SETTLEMENT

The SMA may determine that a retroactive adjustment to the nursing facility reimbursement rate and payments is needed after the end of the provider's rate year. The retroactive adjustment may be due to a previous interim rate revision or to implement a rate based on actual cost report data. After the filing and acceptance of the cost report, the RARSS will determine if an Initial Settlement adjustment is necessary to make a retroactive payment adjustment for the rate period covered by the cost report. The Initial Settlement uses the most recent accepted cost report data to calculate the retroactive reimbursement and paid Medicaid claims and other payment data. (Refer to the Rate Determination Section of this appendix for additional information.)

The RARSS will consider provider requests for Initial Settlements on an exception basis in the following situations:

- The provider anticipates a significant amount due them by Medicaid and requests an Initial Settlement in writing. The provider may make the request with the filing of the cost report.
- A payment adjustment is necessary for several months of the cost report period, and the current date is beyond the cost report period end date.
- The review of a filed cost report identifies that the interim rate add-on amount, plant cost certification amount, or other special reimbursement interim amount included in the interim rate exceeds the amounts filed in the cost report.
- The provider has terminated Medicaid participation and has failed to file an acceptable cost report. An overpayment determination will be made for the payments to the provider during the time period that cost report data is required for determining final reimbursement.

If the RARSS determines that the Initial Settlement is an underpayment amount to the nursing facility, additional payment will be made to the provider for not less than 70 percent and not more than 80 percent of the determined settlement amount due the provider based on a review of the provider’s financial situation and the effect of the filed cost report data on the reimbursement settlement determination. Although the provider may request a review of the Initial Settlement amount, the Initial Settlement payment level percentage is not subject to appeal.

If RARSS determines there is an overpayment to the nursing facility, the SMA will recover the overpayment amount as outlined in the Medicaid Recovery of Overpayments subsection.

Before making any payment adjustment, the RARSS will notify the provider in advance using a Notice of Program Reimbursement letter. The provider is given 15 calendar days for review of the settlement determination. After the time period afforded the provider to review the Notice of Program Reimbursement, a notice stating the payment adjustment date(s) is shared with the provider through File Transfer. A provider may request up to an additional 30 days to review an Initial Settlement. The provider must submit a written request stating the reason and the amount of the additional time needed (up to 30 days) for review. RARSS will review the request and notify the provider in writing of the approval or denial for additional time.

If the settlement action requires correction following the review, a new notification and review time period will apply to the corrected settlement. After the time period afforded the provider to review the Notice of Program Reimbursement, a notice stating the recovery payment date(s) is shared with the provider through File Transfer.
The RARSS may process a Revised Initial Settlement for the cost report period if it determines that additional payment adjustment is necessary after processing an original Initial Settlement and before completing a final settlement. A Revised Initial Settlement will be completed when there are significantly more approved claims, rate revisions or errors in the prior determination and a final settlement action cannot yet be completed. The notification and payment processing actions identified with the original Initial Settlement procedures also apply to the Revised Initial Settlement process. The payment criteria will be applicable to the aggregate dollar amount of the Initial and Revised Settlements for the reimbursement time period.

7.3 Final Settlement

The RARSS may determine that withholding of payment is necessary or that a retroactive adjustment to the nursing facility reimbursement rate and payments is needed after the end of the provider's rate year. A retroactive adjustment may be due to a previous interim rate revision or to implement a rate based on actual cost report data. After a cost report is audited, RARSS will determine if a Final Settlement adjustment is necessary to make a retroactive payment adjustment for the rate period covered by the cost report. The Final Settlement uses the audited cost report data to calculate the retroactive reimbursement and paid Medicaid claims and other payment data. Final Settlements determine if additional payment is due to the nursing facility or Medicaid.

When Medicaid participation is terminated voluntarily or involuntarily, payment for at least one month of services rendered is retained for Final Settlement.

RARSS shares a Notice of Program Reimbursement with the provider through File Transfer. The notice explains the:

- Settlement adjustment(s) and the process prior to RARSS taking the payment action.
- Provider’s appeal rights.

The provider is allowed 15 calendar days for review of the settlement determination. After the time period afforded the provider to review the Notice of Program Reimbursement, a notice stating the payment adjustment date(s) is shared with the provider through File Transfer.

To obtain an extension, RARSS will review written requests from the provider stating the exceptional reason and the amount of additional time needed for the review (up to 30 calendar days). RARSS will review the exceptional circumstances stated in the request and notify the provider in writing of the approval or denial for additional time. If approved, an extended time period of up to an additional 30 calendar days may be granted to the provider for review. After the time period afforded the provider to review the Notice of Program Reimbursement, a notice stating the recovery payment date(s) is shared with the provider through File Transfer.

If the settlement action is corrected following a review, a new notification and review time period will apply to the revised determination. After the time period afforded the provider to review the Notice of Program Reimbursement, a notice stating the payment adjustment date(s) is shared with the provider through File Transfer.
RARSS may process a Revised Final Settlement for the cost report period if RARSS determines that additional adjustments are necessary subsequent to processing the Final Settlement. The adjustment(s) will be processed if significant adjustments or errors exist in the prior settlement calculation. Notification and payment processes outlined in the Final Settlement process also apply to the Revised Final Settlement process.

7.4 Depreciation Recapture Reimbursement Adjustment

If a provider has been reimbursed for asset depreciation expense in the Plant Cost Component and has sold the nursing facility assets, the sold assets may be subject to a depreciation recapture reimbursement adjustment in the reimbursement settlement for the cost report period in which the nursing facility assets are sold. The depreciation reimbursement adjustment uses reimbursement rates paid for services between October 1, 1984 and the date the facility was sold, or the date the Plant Cost Component of the per diem rate was converted to the tenure plant cost reimbursement method. (Refer to the Rate Determination Section of this appendix for additional information.)

The depreciation recapture adjustment is only applicable to the reimbursement rate time periods the provider was paid a rate that specifically included depreciation expense in the Plant Cost Component of the Medicaid per diem rate. If the provider has never received Plant Cost Component reimbursement that specifically includes depreciation expense as a cost element of the rate calculations, the provider is not subject to the depreciation recapture reimbursement adjustment and is not required to complete the Medicaid Program Depreciation Recapture reporting.

A nursing facility provider that was reimbursed for depreciation in the Plant Cost Component and sells the nursing facility’s assets must complete the Medicaid Program Depreciation Recapture reporting schedules for each applicable cost reporting year where depreciation was reimbursed. The Medicaid Program Depreciation Recapture schedule must be submitted with the cost report for the year that the asset sale occurs. Reporting schedules and instructions will be provided to the provider with the final period cost reporting request or may be requested from RARSS. The reporting schedules (Excel file) and completion instructions (Word file) are available in electronic format or hard copy format.

If the Medicaid Program Depreciation Recapture is not applicable, the schedules must indicate N/A (not applicable) and be submitted with the cost report filing. If RARSS does not receive completed reporting schedules, RARSS will apply a 100 percent depreciation expense reduction rate to calculations for each cost report period used to calculate the settlement.

The net depreciation reimbursement adjustment for each cost report year the provider was reimbursed by Medicaid will be included in the settlement calculation. The depreciation adjustment will be limited to the amount Medicaid reimbursed for depreciation expense in each cost report year. Plant cost reimbursement allowances will be included in the calculation of the depreciation adjustment, and may result in reducing the net depreciation adjustment if the provider had not previously qualified for the incentive allowances prior to the depreciation reduction. The cost report reimbursement settlement notice will include the determination of depreciation recapture reimbursement adjustment.
7.5 MEDICAID RECOVERY OF OVERPAYMENTS

Overpayment(s) due from a participating provider will first be offset against other settlements, payment adjustments, claims processing or any amounts due to the provider through lump sum or sequential installments until the overpayment amount is satisfied. If the provider is not participating in Medicaid, the overpayment amount must be paid to the State of Michigan for the Medicaid program immediately upon notification.

7.5.A. REQUEST FOR SETTLEMENT EXTENDED PAYMENT OF SCHEDULE

If a participating provider alleges inability to repay the total overpayment amount in a lump sum or in sequential offset(s), the provider may request consideration for an extended repayment schedule. Extension requests for Settlement repayments must be received by RARSS within 15 calendar days of the Notice of Program Reimbursement date sent to the provider from RARSS. RARSS will notify the provider in writing of the decision. Requests received after 15 calendar days will be considered at the discretion of RARSS.

7.5.B. CRITERIA FOR DETERMINING EXTENDED PAYMENT ARRANGEMENTS

Extended settlement repayment schedules will only be considered if the net dollar amount of the current settlement notice reflects an overpayment amount of more than 10 percent of the provider's normal monthly Medicaid reimbursement payment(s). The provider’s request must demonstrate that lump-sum recovery will create extraordinary financial hardship on the provider, and that the cash flow need of the nursing facility prevents the immediate repayment of the overpayment amount. Other factors that must not be present in creating financial hardship to the provider are significant expenditures for unallowable costs, ownership and management compensation exceeding Medicaid allowable cost limits, or significant dollar amounts for unallowable related party business transactions.

RARSS will share the notification of the provider's repayment schedule and the repayment recovery dates and dollar amounts through File Transfer. Requests for longer than three months will only be considered under exceptional circumstances, e.g., the monthly recovery schedule amount would be greater than 50 percent of the provider's normal monthly Medicaid reimbursement payment.
SECTION 8 - ALLOWABLE AND NON-ALLOWABLE COSTS

Unless stated to the contrary in this section, Medicaid allowable costs for nursing facilities are determined in accordance with provisions in the federal Principles of Reimbursement established for the Medicare program. This section does not propose to set reimbursement standards or reimbursement methodology. The focus here is the determination of allowable costs. Reasonable costs associated with nursing facility services included in the provider's per diem rate, as identified in the Coverages portion of this chapter, are allowable costs within the parameters of the Principles.

NOTE: Definitions for the principal terms used in this section may be found in the Definitions Section of this appendix. A copy of the cost report referenced in this section, completion instructions for the report and related information are available on the MDHHS website. (Refer to the Directory Appendix for website information.)

8.1 ADVERTISING

Allowable advertising costs are considered those costs incurred by the nursing facility for an informational objective to inform the public about its services. Costs incurred for a promotional objective in an attempt to increase patient utilization are not properly related to patient care and are not allowable. Advertising in the Yellow Pages is an allowable cost, except that Medicaid limits the cost to that associated with a black ink Yellow Pages ad listing not to exceed 2" x 2" in size.

8.2 APPRAISALS

Appraisal expenses incurred by providers may be allowable costs (administrative and general) if the appraisal is of assets related to resident care and if it meets the Medicaid Appraisal Guidelines. Expense for an appraisal of assets not related to resident care is not an allowable expense. Refer to the Appraisal Guidelines Section of this appendix for additional information.

8.3 ATTORNEY AND LEGAL FEES

The provider must maintain documentation and evidence of expenses incurred for legal fees and related costs as being related to the nursing facility's furnishing of patient care in order for such expenses to be allowable costs. Attorney fees are considered allowable costs incurred in the course of providing patient care, except as noted below.

Where MDHHS or the Centers for Medicare & Medicaid Services (CMS) takes action against the provider by initiating an enforcement action or issuing an audit finding, then the legal costs of responding to the action are allowable only in the following circumstances.

8.3.A. AUDIT FINDINGS AND RATE ACTIONS

- The provider prevails and the action is reversed.
  Example: The audit finding is not upheld and the audit adjustment or rate action is reversed.
- The provider prevails as defined by reduction of the contested audit finding by 50 percent or more.
  Example: An audit finding for an adjustment of $50,000 is reduced to $25,000.
8.3.B. ENFORCEMENT ACTIONS

- The provider prevails and the action is reversed.  
  **Example:** A Denial of Payment for New Admissions is rescinded and does not go into effect, or when a provider is not in compliance before the effective date of the DPNA but succeeds in disputing the imposition and the DPNA is rescinded with no interruption in payment for the covered service.

- The time period of imposition of a DPNA is reduced by 50 percent or more due to a change in the date that a nursing facility is determined to have been in compliance.  
  **Example:** The length of a DPNA is reduced from 20 days to 10 days.

- The provider prevails as defined by reduction of a fine by 50 percent or more.  
  **Example:** A Civil Money Penalty fine is reduced from $5,000 to $2,500.

- A federal enforcement action (F tag) is reduced in scope or severity.  
  **Example:** An H-level citation reduced to a G-level citation, an F (SQOC)-level citation reduced to an E-level citation, or an Informal Dispute Resolution decision results in a reduction from an E-level citation to a D-level citation. Abatement of an Immediate Jeopardy or correction of a deficiency does not constitute a reduction.

- A state enforcement action is eliminated.

- A settlement agreement is reached between the provider and the state and federal government prior to a Hearing.

8.3.C. GENERAL ADMINISTRATION OF THE FACILITY

- Attorney fees incurred in connection with facility acquisition, mortgage or finance transactions are allowable if Medicaid determines the fees reasonable. The fees must be reported under plant cost and capital asset cost reporting. Legal expenses incurred relative to a nursing facility or capital asset acquisition are considered allowable if they are capitalized and amortized over the loan for up to a five-year period.

- Legal fees incurred in the process of securing financing or refinancing of facility loans must be amortized over the life of the mortgage.

- Attorney fees relating to employer activities, labor negotiation, or in response to employment related issues or allegations, to the extent that the engaged services or actions are not prohibited under federal principles of allowable cost.

8.4 BAD DEBTS, CHARITY AND COURTESY ALLOWANCES

Bad debts, charity, and courtesy allowances, as defined in the Medicare Principles, are deductions from revenue and are not allowable costs.

Bad debts are amounts considered to be uncollectable from accounts and notes receivable that were created or acquired in providing services. Charity allowances are reductions in charges made by the nursing facility provider due to the indigence of a resident. Courtesy allowances indicate a reduction in charges in the form of an allowance to physicians, clergy, members of religious orders, and others as approved by the governing body of the nursing facility, for services received by the provider.
Uncollected revenue for Medicare coinsurance and deductible billing amounts and patient payments for Medicaid eligible residents, and for non-covered services for Medicaid are not allowable costs.

8.5 Civil Money Penalties

Costs incurred for fines or money penalties for violation of federal, state, or local laws are not allowable.

8.6 Educational Activities and In-service Training

Medicaid has established credentials/requirements for educational activities to be recognized as allowable costs. Educational activities outside the continental United States are not allowable.

Approved educational activities are formally organized or planned programs of study engaged in by nursing facility providers in order to enhance the quality of resident care in a facility. These activities must be licensed where required by state law. Where licensing is not required, those presenting the educational activity must be recognized as a professional for the particular activity. Examples of allowable educational activities costs are:

- Part-time education for a facility’s employee at properly accredited academic or technical institutions (including other providers) devoted to undergraduate or graduate work to enhance the quality of medical care or the operating efficiency of the nursing facility.
- Costs, including associated travel expense within the continental United States, for employees to participate in educational seminars and workshops to enhance the quality of medical care or the operating efficiency of the nursing facility that does not lead to the ability to practice and begin employment in a nursing or allied health specialty.

The costs of the following in-service training activities are recognized as routine nursing care costs and are allowable costs:

- Orientation and on-the-job-training.
- Mandatory in-service education for Medicaid and Medicare certification.
- Maintenance of a medical library.
- Training of a resident or resident’s family in the use of medical appliances.

Costs incurred for activities related to an approved Nurse Aide Training and Competency Evaluation Program (NATCEP) are not allowed under routine nursing care, except as provided in the Medicaid allowable cost and reimbursement policy outlined in the Cost Classifications and Cost Finding Section of this appendix.

8.7 Facility Vehicles and Travel

The cost of operating a facility-owned or leased vehicle must be adequately documented and differentiated between resident care use, business use or personal use. Only the costs for resident care and costs related to the conducting of facility business are allowable vehicle and travel costs. Use of a facility vehicle by facility personnel to commute from home to the facility and to return home at the end of the daily work period or other personal travel activity is considered personal use. Cost related to personal use travel activity is not allowable. Vehicle personal use is only allowable if the costs are
reported employee compensation and satisfies Internal Revenue Service individual compensation tax reporting requirements.

The minimum documentation that must be retained and be available to auditors for all vehicles is:

- A Mileage log for each vehicle.
  - The log must contain at least the date, total miles for business use, name of driver, origination and destination, and the reason(s) for the vehicle use.
  - The log must report the monthly beginning and ending odometer reading.
- Business mileage and total mileage use of the vehicle to support the dollar allocation for determining allowable cost.
- Charge slips or invoices for fuel, maintenance, and other similar items.

If the reason for a trip is to transport a resident for medical care or treatment, the medical condition necessitating the trip must be documented. If the reason is to attend a seminar, convention, or meeting is related to nursing facility operation, invoices must document proof of attendance and mileage logs must be documented to identify the reason for the trip. Vehicle use for general business travel or other activity must include the reason in the mileage log.

Medicaid considers mileage that is not logged as not related to resident care or facility operation. The cost relating to unrecorded or non-supported as business use mileage is not allowable.

Travel by nursing facility personnel via personal vehicle use is an allowable expense if the travel is consistent with the aforementioned purpose criteria. Medicaid will allow such documented mileage at the State of Michigan, Department of Technology, Management & Budget (DTMB), approved private vehicle rate. The mileage rate includes all vehicle costs and is treated as a variable support cost. The approved private vehicle mileage rate information can be accessed on the DTMB website. (Refer to the Directory Appendix for website information.)

8.8 INTEREST

Interest is the cost incurred for the use of borrowed funds. Necessary and proper interest on both current and capital indebtedness is an allowable cost in accordance with Medicare Principles of Reimbursement. The allowance for interest expense is determined using one of the following principles:

- Allowable interest expense is determined in accordance with current Medicare Principles. Medicaid applies the following guidelines, although not fully inclusive, in determining allowable interest expense. Interest expense must be reduced by all investment income, except where such income is from:
  - Gifts, grants, and endowments held separately or pooled with other funds.
  - Qualifying deferred compensation and/or self-insurance trust funds.
  - Income from a provider's qualified pension fund.
- The rate of interest on a loan must not be in excess of what a prudent borrower would have had to pay in the market place at the time the loan was made.
Interest expense, to be allowable, must be paid to a lender not related through control, ownership, or personal relationship to the borrowing organization. Interest paid by the provider to partners, stockholders, or related organizations of the provider is, therefore, not allowable.

**Exception:** A nursing facility operated by a religious order is allowed to borrow funds from the order and claim necessary interest expense for those funds.

- Interest on loans in excess of asset value acquisitions (after July 1970) is not an allowable cost. In a situation where the purchase price exceeds the historical cost or the cost basis, the interest expense on that portion of the loan used to finance the excess is not allowable.

- Interest expense applicable to borrowings principle balance for a nursing facility acquisition must be separately identified and reported from interest expense applicable to working capital or miscellaneous capital asset acquisitions (assets that are not part of or related to a facility acquisition). See Cost Finding and Cost Classifications for borrowing principle balance descriptions.

- Working capital borrowings are considered funds borrowed for a relatively short time period of 12 months or less to meet current normal operating expenses. For lines of credit, the borrowing shall be compliant with the 12 month requirement if the provider repays the entire amount withdrawn within 12 months of the date of the first draw.

  - The loan must meet allowable cost principles. The rules on working capital borrowings do not apply to loans on capitalized assets. Interest on current indebtedness meeting the 12 month requirement and other program working capital criteria is allowable, whereas interest expense for long-term working capital indebtedness is not considered allowable.

  - The nursing facility must document the need and due date for the working capital loan. The need must be to meet normal operating expenses and must be supported by an application of funds analysis demonstrating the use of loan proceeds for nursing facility expenses.

  - For the application of funds analysis, the provider must show that current cash receipts are not sufficient to meet the accounts payable, payroll, and other financial obligations. The provider must also demonstrate that the loan proceeds went directly into the appropriate cash account. The provider must document when each withdrawal was used, how each withdrawal was used, and how the funds are being applied to a purpose related to patient care. If the Home Office is the recipient of funds and intends to transfer funds to a provider under the Home Office, the provider must demonstrate the financial need for the funds, how the money was used, and how the use is related to patient care.

  - The loan must include/require repayment of the principal balance within a prescribed time period, including regular scheduled repayment amounts applying to the principal borrowings amount. The provider may repay the principal balance of the loan on a monthly, quarterly, or annual basis. If the provider repays the entire principal balance before the expiration of the loan term, the interest expense on that loan is considered allowable. If the provider has a line of credit, the provider must repay the entire amount withdrawn within 12 months of the date of the first draw for the interest expense to be considered allowable.
Interest income is applied first as a reduction to mortgage related borrowing allowable interest expense, and then to other borrowings allowable interest expense.

Interest expense is distinguished from penalty or finance late fees by the existence of a lender and borrower relationship pertaining to the financed amount. Penalty and finance fee assessments relating to late payment of liabilities are not considered borrowing costs and are not allowable.

Interest expense includes the cost of finance charges associated with borrowed funds. If the interest expense on borrowed funds is allowable or unallowable, this would include any applicable finance charges. Finance charges include, but are not limited to, expenses related to the maintenance of records, account maintenance fees, related transaction fees, administration, etc.

8.8.A INTEREST CLASS I AND CLASS II NURSING FACILITIES

For the Class I and Class II facility, interest on borrowed funds related to the facility acquisition allowable interest expense is determined in accordance with the Principles in effect on July 17, 1984, prior to the changes associated with the mandates of the DEFRA of 1984 and its limitations on the revaluation of assets.

- The dollar amount of facility acquisition financing is limited to the lesser of:
  - the purchase price of the nursing facility,
  - the current reproduction cost adjusted for straight-line depreciation over the life of the asset to the time of purchase, or
  - fair market value at the time of purchase; minus the purchase down payment.

- Interest expense on the dollar amount of a facility acquisition loan principle in excess of the financing limit is not allowable.

- Depreciated replacement cost is defined as the current reproduction cost adjusted for straight-line depreciation over the life of the asset.

- Depreciated replacement cost must be determined by an independent appraiser, chosen and paid for by the nursing facility provider, in accordance with the "Appraisal Guidelines" in the Principles.

Note: For Class I and Class II facilities that choose to forego increased reimbursement for interest expense, they must adopt the prior owner's financing and acquisition costs, interest expense schedule of borrowings, principal amortization, and interest expense recognized for reimbursement by the Medicaid program prior to the sale. Annual cost reporting must continue to be based on the prior owners.

8.9 LEASE COSTS

The Medicaid allowable cost provisions for asset lease transactions depend on the type of asset. Generally, asset lease transactions require that the lease expense be removed from cost and replaced by the underlying ownership cost of the property owner. Lease or long-term rental agreement (more than twelve months duration) transactions must be reported in the Medicaid cost report Statement of Leased Capital Assets. Cost reporting disclosure of lease costs is required to properly classify ownership costs for determining Medicaid reimbursement. There are also specific asset lease transactions that must be
reported in the cost report statement, but are an exception to the underlying ownership disclosure requirement. Specific types of lease expenses are discussed in the following sections.

Maintenance costs for leased capital assets, other than lease situations qualifying under "pass-through lease" criteria, are classified as variable costs. The nursing facility must determine and report these costs in the appropriate cost center or department. This requirement may necessitate the breakout of the maintenance costs for the lease contract.

Lease costs are differentiated from incidental or non-recurring rental expenses incurred to address a limited need of the facility. Rental expense incurred for incidental or limited time rental items, or non-recurring rental transactions, are allowable operating costs in the applicable cost center or department requiring the rental action. Limited time rental is considered as not longer than twelve months, non-recurring, and prohibits several/numerous sequential transactions for the same or similar rental items.

**Exception:** An extended period up to 24 months may be approved by RARSS in instances related to construction or renovation. The provider must submit an extension request to RARSS in writing at least 45 calendar days prior to the effective date of the extension. The request requires disclosure of item, duration, and action that precipitated the need to extend the project. RARSS will respond in writing.

### 8.9.A. FACILITY LEASE

Cost reporting and reimbursement for capital assets relating to the nursing facility premises are under the same methods whether the items are owned or leased. For items to be considered allowable costs, the acquisition dates and asset costs, interest expense and other applicable ownership costs must be reported. Allowable lease costs are determined using one of the following principles:

- A nursing facility provider that entered into an acceptable, arm's-length lease prior to September 1, 1973, where the lessor has refused to open its books, is allowed an actual lease cost up to a maximum of $2.50 per resident day. This limit was developed from the average lease/rental costs for facilities leased prior to September 1, 1973, at which time the current method of calculation was effected. The pre-September 1, 1973, lessee has the right of appeal of an acceptable, arm's-length lease agreement for costs that exceed the $2.50 limit.

- A nursing facility provider that entered into, or amended, an acceptable, arm's-length lease agreement on or after September 1, 1973, is allowed a plant cost component determined in accordance with the Rate Determination section of this appendix, as applicable to an owner-provider, if the lessee discloses the allowable cost information required for rate setting. Leased assets are treated as though the lessor and the lessee are one and the same. Without full disclosure, lease expenses are not an allowable cost.

Interest expense allowed in the case of the lessor is also limited by Medicare Principles of Reimbursement. Further, interest income of the provider (lessee) is offset against all interest expense, including interest expense allowed on rental properties.
8.9.B. PLANT COST LEASE OTHER THAN FACILITY SPACE

Lease expense for nursing facility equipment or other activity that does not qualify for pass through lease expense is not allowable and must be reported utilizing the ownership underlying cost reporting requirement. If a lease is a virtual purchase and the lessee becomes the property owner at the termination of the lease, or for a nominal buyout amount, ownership cost reporting must be applied. The definition criteria of a virtual purchase are addressed in the federal Principles of Reimbursement.

Office space costs incurred in a home office or related party administrative service transaction are allowable under application of allowable depreciation, interest and property tax underlying ownership cost principles. Reasonable and necessary lease expenses incurred by a home office or related party for administrative services office space are allowable. Ownership underlying cost reporting is not required for leased business office space or similar leased space except in rental transactions involving a related party landlord. Related party transactions for office space are limited to ownership underlying costs applicable to allowable depreciation cost principles. The cost of office space is included in the cost of the home office or related party administrative services space cost and must be reported in accordance with Medicaid policy identified in the Cost Classification and Cost Finding Section of this appendix.

8.9.C. PLANT COST PASS THROUGH LEASES

A select group of rental and lease situations are exceptions to the requirement for disclosure of the underlying ownership costs. The lease or rental cost of qualifying items is allowed as plant cost in the lease rental cost classification to the extent that the asset use and cost is related to patient care. The pass through lease allowance applies to the following:

- Vehicle lease to a maximum of $425/month or $5,100/year, per vehicle
- Photocopiers
- Postage meters
- Telecommunications systems (including fax machines)
- Desktop or notebook computers and printers
- Parking lots and off-site record storage for rental from an unrelated party ownership and arm's length transaction

8.10 LIFE INSURANCE PREMIUMS

Life insurance premiums are allowable when the premium is a fringe benefit for the insured employee when the beneficiary of the employee’s insurance is not the provider. The cost of life insurance premiums for insurance on the lives of officers and employees, including provider-based physicians, is an allowable cost only within the provisions of Medicare Principles of Reimbursement.
8.11 LIQUIDATION OF SHORT-TERM LIABILITIES

A short-term liability must be liquidated within one year after the end of the cost reporting period in which the liability is incurred. The liquidation of liabilities requirement for Medicaid applies the federal Principles of Reimbursement for the determination of allowable costs. In instances where a nursing facility provider does not liquidate a short-term liability within the period specified in the federal requirements, the costs for the related goods and services are not allowed in the cost reporting period in which the liability was incurred, but are allowable in the cost report period when the liability is paid.

Exception to the one-year time limit to liquidate a short-term liability will be considered in accordance with the federal Principles of Reimbursement. A provider may request an extension for good cause to liquidate short-term liability. The provider must submit a written request at the time of submission of the Medicaid cost report to RARSS identifying the liability amount(s) and an explanation for the nonpayment of the liabilities and expected payments to liquidate the liability. RARSS will review the request and notify the Provider of the approval of an extension, not to exceed three years after the end of the cost report period that the request is filed, or of the denial of the request.

8.12 LOBBYING AND POLITICAL ACTIVITY COSTS

A provider's costs incurred to support or oppose decisions of the federal Congress or state Legislature, costs related to campaigns for particular candidates or issues, and contributions to political action committees involving partisan elections are not allowable. Costs incurred, whether directly or indirectly through organization membership dues, fees or assessments, for these activities or to influence legislation are not allowable. Contacts with federal or state agencies in the course of business operations of the nursing facility and general comment on proposed policies are not considered lobbying activity.

8.13 MAINTENANCE OF EFFORT CONTRIBUTIONS BY COUNTY GOVERNMENT

In accordance with Public Act 408 of 1984, as amended, county governments that own and operate a nursing facility are responsible for maintenance of effort funding levels for the operation of that facility. The county government contributions to the nursing facility operations specifically due to the provisions of the Act, as amended, are not allowable costs of the county medical care facility Medicaid cost reporting.

8.14 MEDICAL SUPPLIES, DURABLE MEDICAL EQUIPMENT (DME), ORTHOTICS, AND PROSTHETICS

The cost of medical supplies or DME are generally considered an allowable cost. However, the following items are not allowable and must be billed by the medical supplier:

- Air-fluidized beds
- Bariatric beds
- Bilevel positive airway pressure (BiPAP) device
- Continuous positive airway pressure (CPAP) device
- Custom-fabricated seating systems may be covered outside of the nursing facility per diem rate when a standard item will not meet the medical and functional needs of the user and standards of coverage are met.
- Negative pressure wound therapy pump and accessories (wound VAC)
Medicaid Provider Manual

- Orthotics and Prosthetics
- Parenteral nutrition, including all supplies, equipment, and solutions
- Powered air flotation bed (low air loss therapy)
- Selected surgical dressings
- Shoes and additional components

The Nursing Facility Coverages chapter further describes the services included in the Medicaid per diem rate.

8.15 Membership Fees

Reasonable costs of memberships in professional, technical, or business-related organizations are allowable if the organization's mission or objectives are primarily related to resident care and/or long term care services activities. Costs of memberships in civic organizations for the purpose of implementing civic objectives are also allowable for Medicaid purposes (e.g., Chamber of Commerce). Any portion of membership fees used for lobbying, supporting political candidates and campaigning, or in social, fraternal, and other such organizations are not allowable. Awareness of an organization's ongoing lobbying and political activities requires identification of the portion of the organization's fees, dues, assessments or other allocations of costs to members or associated nursing facility providers. If an amount of non-allowable cost is not identified relating to this purpose, all costs associated with the fees or dues are non-allowable, unless the provider can document the appropriate unallowable portion.

8.16 Medical Director/Physician Services

The nursing facility must have a designated medical director that maintains responsibility for the implementation of resident care policies, for coordinating medical care, and is directly accountable to nursing facility management. The cost(s) applicable to the provision of the duties and responsibilities of the medical director is allowable routine nursing care. The nursing facility must maintain adequate records to document the level and type of services rendered by the medical director as a facility employee, or under a service contract or some other designated capacity. The cost(s) relating to the medical director duties and responsibilities must be distinguished from physician services activities that are not allowable routine nursing care. Refer to the Practitioner Chapter for discussion regarding physician services.

8.17 Non-Paid Workers/Volunteers

The value of services of non-paid workers is an allowable cost. The services must be performed on a regular, scheduled basis. The services must be of the type customarily performed by full-time employees and necessary to enable the nursing facility provider to carry out the functions of normal resident care and the operation of the facility. The value of services of a type for which providers generally do not remunerate individuals performing such services is not an allowable cost.

Example: Donated services of individuals in distributing books and magazines to residents, administering a provider canteen or cafeteria or a provider gift shop are not allowable/reimbursable.
8.18 Owner and Administrator Compensation

The cost for compensation to nursing facility owners is determined in accordance with Medicare Principles of Reimbursement, except the compensation to administrators, owner/administrators, or owners who function as administrators or assistant administrators, and corporate office executive management compensation is subject to specific dollar amount cost limits. Allowable cost limits are applied to nursing facilities based upon the bed size of the facility. Allowable cost limits are applied to individuals based upon the aggregate number of beds in nursing facilities being served or within the corporate organization. Compensation is remuneration to the individual for job performance and includes the costs of salary and wages, fringe benefits, director fees, and costs of services or items provided to the individual.

The compensation limit schedule is available on the MDHHS website. MDHHS annually adjusts the Owner/Administrator Compensation Limits to include cost-of-living changes as reflected by the United States Department of Labor Consumer Price Index for the metropolitan Detroit area. (Refer to the Directory Appendix for the website address.) Owner/Administrator Compensation Limits are expressed as facility annual compensation amounts and must be pro-rated on a monthly basis in situations where the cost reporting time period is not 12 months.

8.18.A. Compensation Limit for Individual Nursing Facility

The allowable cost limit for compensation to nursing facility administrators, owner/administrators, or owners who function as administrators or assistant administrators is determined according to the following criteria.

- Facility bed size includes licensed beds for nursing home, home for the aged and hospital services beds. Other categories of resident beds or housing arrangement beds are not included in determining the facility bed size for determining the appropriate compensation limit.
- The owner/administrator compensation limit used must coincide with the number of beds available for occupancy. The measurement criteria for determining the facility bed size is the number of beds available for resident or patient care at the beginning of the cost reporting period.
- Each nursing facility having 50 licensed beds or more must have a full-time licensed facility administrator. As required under State law, this individual is expected to be in the facility directing, conducting, or participating in activities directly related to the nursing facility during the normal 40-hour business week. A current position description that adequately defines the duties and responsibilities for the administrator position must be retained at the facility.
- The total compensation amount claimed for allowable costs for the facility administrator and related positions must not exceed amounts established by the SMA. These amounts are established by facility bed size: 1-49 beds, 50-99 beds, 100-149 beds and 150 beds or more.
The owner/administrator compensation limits apply to the costs for the positions of administrator, assistant administrator, and/or other administrative employees performing functions or having work responsibilities normally considered nursing facility administrator work activity. If an individual is functioning in a position that requires a nursing facility administrator's license, that person's compensation must be subjected to the limit. However, if a person does not have a license, but is performing the job functions and work activity of an administrator, that individual's compensation must also be included in the amount subjected to the limit. Inclusion of an individual's compensation in the total amount subjected to the limit is not only based on the individual having a license, it is also based on the job functions and work activity. Compensation paid by a related party or central office and charged directly to the nursing facility for individuals performing these activities must be included in the individual nursing facility compensation amount subject to the limit.

The compensation limit schedule does not apply to the salary of owners employed in capacities other than administration of the nursing facility provider's operation. The allowable salary level of an owner employed in a non-administration position cannot exceed the market value salary for that position, e.g., director of nursing, social services director. The allowable salary level must be commensurate with the amount of time the owner spends working in the non-administration position. If the owner also participates in facility administration, the portion of the payroll costs attributed to the administrative work must be included in the owner/administrator salary compensation and subject to the appropriate salary limits. The individual's administrative work must be appropriately documented with a position description and job responsibilities, and the allowable salary level for the administrative work must not exceed salary levels for similar administrative positions.

8.18.B. COMPENSATION LIMIT FOR OWNER AND/OR ADMINISTRATOR SERVING MULTIPLE NURSING FACILITIES

Where an individual is involved in the administration of more than one nursing facility, the maximum compensation allowed for allocation per facility and the allowable facility compensation is computed as follows:

- Total the number of beds, as defined in the individual nursing facility section, in all facilities served by the owner and/or administrator.
- Determine the appropriate compensation limit from the published schedule for the total number of beds.
- Compare the appropriate compensation limit with the actual allowable total salary and fringe benefits paid to the individual. The compensation limit is expressed as an annual amount (12-month time period) and applicable to a full time position defined as a minimum of 40 hours per week committed to nursing home related management and administrative activity. Adequate work activity records must be available for verification of time expended for nursing facility related activity. Time commitment for less than full time requires the compensation limit be prorated to reflect the portion of time committed to this activity. Example, if 30 hours per week during an annual period is attributed to this activity, the adjusted limit for the individual is 75 percent of the appropriate compensation limit.
The lesser of total allowable compensation or the compensation limit per the schedule is then allocated to all the facilities served by the owner and/or administrator based on a ratio of the number of beds in the individual facility to the total number of beds in all facilities served. The hours directly devoted to individual homes may be used as the allocation basis if verified by auditable records.

Combine the allocated owner and/or administrator compensation with the allowable compensation of the facility’s administrator/assistant administrator/co-administrator.

Compare the combined compensation amount to the compensation limit schedule maximum allowable for the number of beds for that particular sized facility. The lesser of the facility’s combined compensation or the facility’s compensation limit is the allowable compensation to be used in the determination of allowable cost related to resident care.

The following illustrates an example of the allowable owner/administration compensation limit application for a group of four facilities of varying sizes with a total of 400 beds, and the allowable facility compensation. The owner and/or administrator total compensation is $250,000 for full time nursing facility related activity for a cost reporting period ending December 31, 2016. The compensation is $38,795 greater than the limit ($250,000 minus $211,205 equals $38,795).

</tbody>
</table>

¹ The percentage of the facility's beds of the total across all four facilities is multiplied by the compensation limit, e.g., 40/400 x $211,205.

² Total compensation equals the sum of the allocation amount and the individual nursing facility administrator compensation.

### 8.18.C. COMPENSATION LIMITATION FOR HOME OFFICE EXECUTIVE/ MANAGEMENT

Salary and wages, fringe benefits and other related compensation costs for home office executive and management staff are included in the provider's home office cost report, and costs are allocated to the individual nursing homes and other business activities conducted by the organization. The allocation of the compensation costs is made to the operating entities of the corporation through the home office cost statement, and these costs are not included in the limit imposed on the individual nursing facility owner/administrator compensation.

The compensation limit for high-level management employees at the corporate home office level is enhanced to acknowledge increased scope of the business activity and corporate responsibility. The enhanced compensation limit is applicable in chain organization or related party management services situations where home office cost statement reporting exists, and full management oversight and administrative services are being provided to the nursing facilities and other business activities of the organization. Compensation costs for corporate office individuals under the enhanced compensation limit must be documented by a current position description, employment contract or other verifiable documentation that adequately defines the position, duties and responsibilities for the individual, and demonstrates the presence of services provided to the organization. Compensation to an individual employee of the corporate or central office, regardless of employment position or job activity function, is subject to the enhanced compensation limit to determine allowable cost. The enhanced
compensation limit is expressed as an annual amount (12-month time period) and is applicable to a full time position.

Employees paid by the corporate or central office but charged directly to the individual nursing facility for administrator or assistant administrator work functions at that facility are not eligible for the enhanced compensation limit. Allowable cost limits for such employees are addressed under individual nursing facility compensation limit.

The enhanced Medicaid allowable compensation for individual corporate office official and executive management employee personnel is applicable only to organizations greater than 150 beds. The enhanced compensation limit is based on the total number of beds owned and operated by and under full management control of the corporate organization and determined in accordance with the following schedule:

<table>
<thead>
<tr>
<th>Number of Beds in the Chain Organization</th>
<th>Enhanced Compensation Limit</th>
</tr>
</thead>
<tbody>
<tr>
<td>151 to 500 beds</td>
<td>100% of the 150+ bed facility limit</td>
</tr>
<tr>
<td>501 to 1,000 beds</td>
<td>120% of the 150+ bed facility limit</td>
</tr>
<tr>
<td>1,001 to 2,000 beds</td>
<td>130% of the 150+ bed facility limit</td>
</tr>
<tr>
<td>Over 2,000 beds</td>
<td>150% of the 150+ bed facility limit</td>
</tr>
</tbody>
</table>

The total number of beds includes all types of nursing home, home for the aged, hospital services, resident and other housing arrangement beds. If the business activity for the beds is not included in the allocation of the home office costs, the beds must not be counted for determining the number of beds in the chain organization. The 150+ bed facility limit used to determine the enhanced compensation limit amount is the MDHHS published limit for the year end corresponding to the reporting time period end date of the home office cost statement.

8.19 OXYGEN

Medicaid coverage of oxygen services for residents in nursing facilities is addressed in the Medicaid Services Descriptions Section of the Coverages portion of this chapter. The costs of oxygen gas, equipment, and supplies for intermittent and infrequent use are allowable in the routine nursing care cost and are included in the per diem reimbursement rate. Oxygen equipment rental costs for a limited time period for purposes of providing this service are allowable in accordance with the incidental rental cost provisions addressed in the Lease Cost subsection of this appendix.

The costs of oxygen related services for frequent or prolonged use on a daily basis (i.e., at least 8 hours per day), regardless of payer source, is an ancillary services cost and is not an allowable routine nursing care cost. For residents requiring frequent and prolonged oxygen use who are in a nursing facility, the oxygen gas, equipment, and supplies must be billed by an enrolled medical supplier, not the nursing facility. For residents requiring frequent and prolonged oxygen use in a County Medical Care Facility or a Hospital Long Term Care Unit, the oxygen gas, equipment, and supplies must be billed by the nursing facility, not the medical supplier. These costs must be separately identified in the facility's accounting records or adequately compiled and verifiable for audit, and excluded from Medicaid cost report routine nursing care unit cost.
8.20 PATIENT TRANSPORTATION

The Transportation Section of the Coverages portion of this chapter addresses the nursing facility's responsibility to arrange or provide for non-emergency patient transportation. The cost for this transportation is a routine nursing care cost included in the nursing facility's annual cost report, and any reimbursement for the services is included in the routine nursing care per diem rate. Patient transportation costs are classified as support costs for Medicaid cost reporting.

The nursing facility must select the most efficient and cost effective mode of transportation for resident care which may include utilizing a facility owned vehicle or contracted outside service. Whenever possible, a facility-owned vehicle should be used. Costs relating to the nursing facility vehicle operation are addressed under the Facility Vehicles and Capital Asset Cost subsections of this appendix.

Costs incurred for contracted outside service for patient transportation must be included in the Medicaid cost reporting under the following reporting procedures:

- Administration and General Transportation – when the expense is not directly identified for specific residents or the care unit in which the resident resides in the facility; or
- Routine Nursing Care, Miscellaneous Support Cost
  - when there is only one routine nursing care unit in the facility and all resident transportation is for residents in that unit, or
  - when there are multiple nursing or residential care units in the facility, and the expense is directly identified by individual resident and location unit where the individual resides in the facility. Costs must be allocated to the corresponding nursing unit cost center identified in the Medicaid cost report.

8.20.A. NON-EMERGENCY AMBULANCE

When a physician issues a written order for non-emergency ambulance transportation, usually due to the need for a stretcher or other emergency equipment, the ambulance provider may bill Medicaid directly and must maintain the physician's order as documentation of medical necessity. If non-emergency ambulance transport is not ordered by the beneficiary's physician, arrangements for payment must be between the facility and the ambulance provider and cannot be charged to the beneficiary, beneficiary's family, or used to offset the patient-pay amount. The cost of non-emergency ambulance transports not ordered by the beneficiary's physician must be identified and removed on Worksheet 1-B by the nursing facility.

8.21 PERSONAL COMFORT ITEMS

The costs of services and items that do not contribute primarily to the resident's treatment of an illness or the resident's ability to function are not allowable. Direct costs, and the appropriate share of indirect costs, relating to such items as telephones, televisions and/or radios that are located in the patient's accommodations and furnished solely for the personal comfort of the resident, are not allowable. The cost of television and radio services furnished to residents generally is allowable if furnished in common use areas of the facility such as day rooms, recreation rooms or similar purpose area of the facility for the common benefit of facility residents. The cost of nurse-patient communications system that has no capability other than nurse and patient communication is allowable.
The costs of systems, including nurse-patient communications, television and telephone services, and similar items, may have the capability of providing residents with outside entertainment and providing nurse-patient communications. Only the cost of the component for nurse-patient communication is allowable routine nursing care. Direct distinction of cost related to the nurse-patient communication must be made for proper cost reporting, or an appropriate allocation must be established for Medicaid approval for the purpose of identifying the patient related and personal comfort related cost portions of combined systems.

8.22 PRIVATE DUTY NURSES

Costs for nursing staff services provided by or under the supervision of a registered professional nurse are allowable; however, the costs of services of a private-duty nurse or other private-duty attendant are not allowable routine nursing care. Private-duty nurses or private-duty attendants are registered professional nurses, licensed practical nurses, or any other trained attendant whose services ordinarily are rendered to, and restricted to, a particular patient under arrangement between the patient and the private-duty nurse or attendant.

A patient, or someone acting on their behalf, may arrange and pay for a private-duty nurse, or the nursing facility that initially incurs the requested costs may look to the patient for payment of the non-covered nursing facility service. Where the nursing facility acts on behalf of the resident, the services of the private-duty nurse or other attendant(s) under this arrangement are not allowable routine nursing care services regardless of the payment process to the private duty or other personnel or the control which the nursing facility may exercise with respect to the services rendered by the private-duty nurse or attendant.

8.23 PROVIDER DONATIONS FOR OUTSTATIONED STATE STAFF

Provider donations and administrative costs and incidental costs (workspace and telephone), incurred by the provider for outstationed staff are allowable costs. Costs are allowable to the amount contractually determined with the State.

8.24 PURCHASE DISCOUNTS

All discounts, allowances, and refunds of expenses are reductions in the cost of goods or services purchased and are not income. When they are received in the same accounting period in which the purchases were made or expenses were incurred, they will reduce the purchases or expenses of that period. However, when they are received in a later accounting period, they will reduce the comparable purchases or expenses in the period in which they are received.

Purchase discounts have been classified as cash, trade, or quantity. Cash discounts are reductions granted for the settlement of debts before they are due. Trade discounts are reductions from list prices granted to a class of customers before consideration of credit terms. Quantity discounts are reductions from list prices granted because of the size of individual or aggregate purchase transactions. Whatever the classification of purchase discounts, like treatment in reducing allowable costs is required.

As with discounts, allowances and rebates received from purchases of goods or services and refunds of previous expense payments are clearly reductions in costs and must be reflected in the determination of allowable costs. In addition, late charges on purchases are not an allowable expense. These would be in addition to regular costs authorized.
8.25 Rebates Larger Than One Year’s Expense and Extraordinary Expense

Normal refund or rebate amounts are reported as a reduction offset to current operating costs in accordance with federal Principles of Reimbursement. A refund or rebate amount of previous years’ allowable expenses must not be reported in total in the current fiscal year-end cost report where the refund or rebate amount pertains to more than one prior year reported expense. Likewise, extraordinary expense pertaining to more than one prior year must not be reported in total in the current fiscal year-end cost report. Refund or rebate and the extraordinary expense amounts pertaining to more than one prior year must be equally spread over as many subsequent years as the number of years represented by the refund or rebate or the extraordinary expense amount not to exceed three years. In the instance of a sale, the selling provider must include 100 percent of the remaining rebate balance in the final cost report. The apportionment will start in the cost-reporting year in which the refund amount is received or the extraordinary expense is discovered. These provisions are limited to Medicaid cost reporting requirements and do not change the applicable accounting principles for financial reporting.

8.26 Research Activities

The cost of research activities is allowable in accordance with Medicare Principles. If research is conducted in conjunction with, and as a part of, the care of residents, the costs of usual resident care are allowable to the extent that such costs are not met by funds provided for the research.

8.27 Routine Nursing Services

A provider’s costs associated with the provision of necessary medical, nursing and mental health services, within the provisions of Medicare Principles of Reimbursement and requirements specified in the Coverages portion of this chapter, are allowable expenses. This includes costs incurred for meeting state federal requirements associated with specialized mental health rehabilitation services, e.g., monitoring the necessity for Annual Resident Reviews and coordinating or providing required services. The medical supply costs associated with routine nursing services and reimbursed by Medicare Part B are not allowable routine costs for Medicaid if the provider is reimbursed by Medicare.

8.28 Sick Leave

The reasonable cost of sick leave taken (or payment in lieu of sick leave taken) by an employee is recognized as a fringe benefit and is included in allowable costs in the cost reporting period when paid. If the sick leave is vested and refunded, contributions to the fund are allowed under applicable provisions of the Medicare Principles. However, where the nursing facility provider’s sick pay plan grants employees the right to demand cash payment for unused sick leave at the end of each year, the pertinent accruals are includable, without funding, in the cost reporting period when earned.

8.29 Taxes and Fees

Taxes, including employee payroll taxes, sales taxes, and state imposed sales and use taxes, are allowable variable costs. The Michigan Business Tax and the Michigan Corporate Income Tax are allowable variable support costs.
8.29.A. GENERAL TAXES

Real and personal property taxes are allowable plant costs.

8.29.B. QUALITY ASSURANCE ASSESSMENT TAX

A nursing facility's Quality Assurance Assessment Tax is an allowable cost and must be reported in the nursing facility Medicaid annual cost report. The tax must be reported on the provider's cost report as assessed and accounted for on the accrual basis. The Quality Assurance Assessment Tax cost is adjusted through the cost reporting process to be segregated from use in rate setting.

8.29.C. FEES AND ASSESSMENTS

Costs incurred for late payments, or for violation of federal, state, or local laws, are not allowable.

8.29.D. PENALTY TAXES UNDER THE PATIENT PROTECTION AND AFFORDABLE CARE ACT

Penalty taxes that may be assessed on employers under the employer-shared responsibility provisions in the Patient Protection and Affordable Care Act (PPACA) are not allowable costs used to calculate the Medicaid room and board rate. As such, the facility must remove these penalty taxes from allowable costs via a Worksheet 1-B adjustment.

8.30 THERAPY AND PATHOLOGY SERVICES

A nursing facility provider must establish accounting procedures to reflect individual cost centers for reimbursable ancillary services, including physical therapy, occupational therapy, speech pathology and other services not classified as routine nursing care. Whether the therapist/pathologist is salaried, under contract, or an independent provider, a nursing facility provider must record Medicaid program payments as income and all expenditures for therapist/pathologist supportive personnel, equipment and its maintenance, supplies, and other costs directly attributable to rendering services in these cost centers.

The service is considered ancillary if the complexity of the service prescribed for the resident is such that it can be performed safely and/or effectively only under the general supervision of skilled rehabilitation personnel. Ancillary therapy services are evidenced by the presence of the following conditions:

- A written physician order.
- The skills of qualified technical or professional health personnel, such as physical therapists, occupational therapists, speech pathologists or audiologists, are required.
- Services are provided directly by, or under the general supervision of, the skilled personnel to assure the safety of the patient and to achieve medically desired results. General supervision requires that initial direction and periodic inspection of the actual activity is necessary.
- Services are rendered as part of an active treatment for a specific condition that has resulted in a loss or restriction of mobility or function.
Therapy services considered routine nursing care are services rendered under circumstances where the general supervision of exercises, which have been taught to the patient, can be performed repetitiously without skilled rehabilitation personnel. This includes maintenance programs where the performances of repetitive exercises, which may be required to maintain functions, do not require the involvement and services of skilled rehabilitation personnel, but may require the assistance of a trained nurse aide. Routine nursing care may include repetitive exercises to improve gait, maintain strength or endurance, passive exercises to maintain range of motion in paralyzed extremities, and assistive walking.

The cost of the development of the maintenance plan when prepared by a licensed therapist is allowable. A provider must maintain documentation, which includes the amount of time required by the therapist to develop the maintenance plan. Medicaid considers maintenance plan development as routine nursing care included in the per diem rate.

The cost of the MDS assessment is allowable. A provider must maintain documentation, which includes the amount of time required by the therapist to complete the MDS assessment. Medicaid considers the MDS assessment as routine nursing care included in the per diem rate.

Depreciation for equipment and facility space assigned to these services must be included as an expense in the ancillary cost centers and computed in accordance with Medicaid guidelines for allowable depreciation. A uniform charge structure must be applied to the entire facility population receiving the services.
SECTION 9 - COST CLASSIFICATIONS AND COST FINDING

Medicaid-enrolled providers must develop and adopt a uniform Chart of Accounts that meets the minimum requirements established by Medicaid for classifying and reporting costs incurred in providing care to nursing facility residents. A nursing facility's accounting system will normally include more detailed accounts for recording facility costs. However, for cost reporting purposes, the detailed accounts are compiled into aggregate cost classification centers in accordance with program policies.

The following cost descriptions are guidelines to provide consistency in nursing facility provider cost reporting. Reimbursement classifications are identified for individual cost elements in examples available on the MDHHS website. (Refer to the Directory Appendix for website information.) More detailed discussions of cost categories are in the Allowable and Non-Allowable Costs section of this appendix.

9.1 NURSING FACILITY BED DAYS AND RESIDENT OCCUPANCY

A provider must report nursing facility bed days and resident occupancy statistics in the annual cost report. Policy related to facility census is presented in the Definitions section of this appendix. Specific attention should be directed to the following definitions: available bed, available bed days, ban on admissions, census, census day, denial of payment for new admissions, hold a bed day, leave day – hospital, leave day – therapeutic, occupancy, occupancy rate, per resident day cost, resident, resident days/occupancy, therapeutic leave day.

The nursing facility's resident occupancy statistics and cost reporting requirements will be significantly affected in cases where the provider requests, and is granted, approval for designating non-available beds as outlined in the Non-Available Beds subsection of this appendix.

9.2 VARIABLE COSTS – BASE AND SUPPORT

Variable costs include the total allowable base and support costs in a facility’s routine nursing service units. A provider must allocate variable costs (support or base) depending on the activity for which the cost was incurred. The provider must also report direct costs for ancillary service costs and other non-reimbursable service costs. The direct costs incurred or attributed to these activities will not specifically be identified as base or support costs, however, the cost report cost finding process will allocate general services cost activities as base or support costs depending on the activity for which the cost was incurred.

9.2.A. BASE COSTS

Base costs cover activities associated with direct patient care. Major activities under these categories are payroll and payroll-related costs for departments of nursing, nursing administration, dietary, laundry, diversional therapy and social services, food, linen (excluding mattress and mattress support unit), workers compensation, utility costs, consultant costs from related party organizations for services relating to base cost activity, nursing pool agency contract service for direct patient care nursing staff, and medical and nursing supply costs included in the base cost departments.
9.2.B. SUPPORT COSTS

Support costs cover allowable activities not associated with direct patient care. Major items under these categories are payroll and payroll-related costs for the departments of housekeeping, maintenance of plant operations, medical records, medical director, and administration, administrative costs, all consultant costs not specifically identified as base, all equipment maintenance and repair costs, purchased services, and contract labor not specified as base costs. Contract services costs for these departments are also support costs.

9.2.C. BASE/SUPPORT COSTS – PAYROLL RELATED

Nursing facility expenses related to payroll taxes and employee health and welfare are classified as base/support costs. These costs include fringe benefits such as employer contributions to FICA, FUTA, MESC, employee life and health insurance, retirement, physicals and all other insurance provided to employees as fringe benefits. If a nursing facility's accounting records do not separately reflect the payroll taxes and employee health and welfare expenses for "base" and "support" personnel by cost center identification, the total amount of these costs must be reported in the appropriate "base/support" cost category. Workers compensation is a base cost and not divided between base and support.

If the nursing facility's accounting system allows the allocation of costs to specific personnel or activities, the specified costs must be used on the cost report. If the nursing facility accounting system does not allow for this specificity, then a reclassification of costs must be made to the appropriate service areas. In these cases, it will be necessary to reclassify such costs on the basis of salary and wage costs distribution.

9.2.D. BASE/SUPPORT COSTS – CONTRACT SERVICES FOR DIRECT PATIENT CARE

A provider that purchases direct care services as an alternative to employing personnel may apportion the contract services costs between base and support cost by applying the industry-wide average base-to-variable cost ratio. The nursing facility must appropriately report these costs in the annual cost report. Medicaid reviews the industry-wide average base-to-variable cost ratio annually and revises it if a difference of two percent or greater exists between the current calendar year cost report aggregate average industry data and the previously promulgated industry-wide base-to-variable cost ratio. If a revision is applicable, the revised cost ratio will be effective for subsequent year cost reporting.

9.3 PLANT COSTS

Plant costs include depreciation, interest expense (either working capital or capital indebtedness), real estate and personal property taxes, amortization costs associated with loan financing costs (amortization of legal fees, recording fees or other fees relating to the capital asset acquisition points, letters of credit), and specific lease expenses.
9.4 CAPITAL ASSET EXPENDITURE

Medicaid limitations on capital expenditure costs are determined in accordance with Medicare Principles except as modified by Medicaid policy.

A nursing facility provider anticipating capital expenditures should contact the CON Evaluation Section to make application for a CON. (Refer to the Directory Appendix for contact information.)

If a CON is approved, the provider may be eligible for increased reimbursement, subject to Plant Cost Component limits. If a new capital expenditure required CON review and was denied, the provider's reimbursement rate must exclude the costs of the denied capital expenditure. The provider's cost report must identify capital expenditures approved and denied by CON.

The nursing facility must have written policies and procedures that establish dollar level thresholds beyond which an asset acquisition is considered a capital asset. Medicaid sets the thresholds at having an estimated useful life of at least two years and a historical cost of at least $5,000. The nursing facility capital asset policy may have lower dollar level threshold than the Medicaid limit, but may not have a higher limit. The provider must follow its established policy for cost reporting when its capitalization policy sets lower thresholds than Medicaid.

Assets that are acquired as part of an integrated system must be considered as a single asset for capitalization purposes. Assets that have a stand-alone functional capability may be considered on a single item basis. Individual asset items that do not meet the dollar and useful life threshold are classified as minor equipment and will be reported as minor equipment expense in the cost report of the year of acquisition.

Example: An office workspace with connecting portions dependent upon other portions for support and stability; a communication system installed in the facility and in resident rooms to allow the full functioning of two-way communication system.

Repair and improvement costs related to assets that result in extending useful life or increased productivity must be capitalized for Medicaid if they are capitalized under Generally Accepted Accounting Principles. Providers must demonstrate consistency in financial reporting.

Providers must follow Generally Accepted Accounting Principles (GAAP) in reporting repairs to capital assets. Repairs that should be capitalized under GAAP must not be an expense item on the cost report.

9.4.A. CAPITAL ASSET COST DATA FOR CLASS I FACILITIES

9.4.A.1. CAPITALIZED ASSET ACQUISITION COSTS

Capitalized asset acquisition costs are used to determine the Current Asset Value for the Plant Cost Component in the Class I nursing facility reimbursement rate. The Medicare Principles of Reimbursement are used to determine the acquisition costs allowable to the original provider/owner of the asset. The SMA uses only the acquisition cost incurred by the original owner to determine the capital asset value cost data. Asset acquisition costs are allowed for related party transactions in accordance with Medicare's interpretation for costs to related organizations.
The cost basis for capital assets is the CAV value determination of the original owner’s audited historical acquisition cost. It is the responsibility of the current owner to provide the audited historical cost and purchase year of the original owner; otherwise, the assets are assumed obsolete for payment determination purposes, i.e., of no current asset value. The current provider must annually report the cost and the applicable year's depreciation for newly purchased assets and value changes to previously acquired assets. Cost reporting for asset acquisition costs related to a capital asset that is traded-in for a new replacement item must also report the value of the capital assets.

Capital costs related to assets that are no longer used in the facility operation and assets that are not necessary for resident care, e.g., excessive land not allowed under the Principles, are not allowable in the nursing facility capital asset value cost data.

To ensure that Medicaid does not pay for assets that are no longer being used to provide resident care, the original acquisition costs, or an estimate thereof, are removed from the current capital asset cost data. The costs of retirement or replacement of buildings, building improvements, building additions, fixed building equipment, land improvements, or movable equipment are removed from the capital asset cost data for the corresponding year of the original acquisition of that retired or replaced asset.

When the original value can be ascertained through such methods as component part depreciation records, the provider must remove the original costs of the retired or replaced assets from the year of the original acquisition, and report the new asset item cost for the year purchased.

Building components, building services equipment or other fixed equipment assets or land improvements may have historically been included within the asset price of the building to which they are attached and, as a result, are not separable for purposes of calculating depreciation or the capital asset cost data. However, in the determination of the Current Asset Value, an asset must exist in the nursing facility for it to have a value. Therefore, if a fixed asset has been retired or replaced and the asset cost cannot be determined from the provider's Medicaid/Medicare asset cost schedule, construction records, or tax records, the provider must determine and report the original asset cost based on the cost of a similar asset.

If a nursing facility provider is unable to report the original asset cost by either individual asset cost or component basis, the new asset will be assumed as a replacement of a similar asset for determining the necessary revisions to the capital asset cost data using the asset trade-in provisions.

When a capital asset is traded-in for a new replacement item, either the original owner's cost or a derived value of the item traded in is removed from the capital asset cost data. The purchase price of the new asset, prior to consideration of the value of any trade-in, is added into the capital asset cost data for the current year of purchase. If the original cost of the item is unknown, the provider must derive a value by backdating the purchase price amount for the new replacement asset. If the asset being replaced is of a different quality or type than the new asset, the amount to be backdated may be based on the expected current cost of a similar asset of like quality and type. The derived value calculation is made by applying a construction cost index (exclusive of the annual obsolescence adjustment) to the value of the new asset item cost, then subtracting the
derived value from the previous capital asset cost data historical cost for that original acquisition year. An electronic copy of the annual economic index compilation and the derived application process used for nursing facility cost reporting can be accessed on the MDHHS website. (Refer to the Directory Appendix for website information.)

Capital assets that are leased or rented are treated as obsolete assets for rate determination purposes when the underlying historical acquisition cost to the original owner has not been disclosed, or when the underlying information cannot be verified through audit.

Capital assets recorded in the central office, home office, or related organization financial records that are identifiable to a specific nursing facility are included in that facility's capital asset cost data determination process. The asset values, interest, and property taxes identified with these assets must be charged directly to the nursing facility and will be reimbursed in accordance with the applicable policy.

Costs of capital assets associated with the operation of related organizations are not included in the capital asset cost data determination for a specific nursing facility. The plant and variable costs of such organizations are treated as purchased services. (Refer to the Variable Costs – Base and Support subsections for discussion regarding purchase and contract services.)

9.4.A.2. EXCEPTIONS TO ASSET ACQUISITION COST CAPITALIZATION

Exceptions to the acquisition cost basis for assets may be allowed in the following situations:

- For the occasional purchase of used, movable equipment for ongoing nursing facility operations when the purchase is not related to a change in facility ownership. For the purchase of used replacement equipment, e.g., re-manufactured beds, a used lawn tractor, or used vehicles, the asset acquisition is treated as if new items were purchased. The allowable cost of acquisition is included in the year the asset is put into service by the current purchaser.

- For the nursing facility land value. The land value to be included in the Current Asset Value is based on the current owner's allowable acquisition cost determined in accordance with Medicare Principles, and not to exceed the amount reported to the Internal Revenue Service for federal tax purposes. The cost of the prior owner's land improvement asset, which is an integral part of the nursing facility land component, and is included in the new or current owner's land acquisition cost, must be excluded from the historical capital asset cost data. The current facility ownership capital asset cost data cannot include both the land purchase price and the original owner's land improvement cost data.

- When equipment is purchased as "used" equipment as part of a facility change of ownership, or only a change of ownership of the facility equipment has occurred, the prior owner's (seller) computation of value at the time of sale is continued to the new owner.
9.4.B. CAPITAL ASSET CATEGORIES (FIXED ASSETS)

Capital asset classifications and asset useful life for depreciation purposes are determined in accordance with the American Hospital Association (AHA) guidelines in effect at the time of the asset acquisition.

General descriptions of the asset cost categories for cost reporting are:

**Land** - includes the land owned and used in the provider operations and includes off-site sewer and water lines, public utility costs necessary to service the land, government assessments for street paving and sewers, cost of permanent roadways and grading of a non-depreciable nature, cost of curbs and sidewalks where the replacement is not the responsibility of the nursing facility, and other land expenditure of a non-depreciable nature.

**Land Improvement** - improvements of a depreciable nature including paving, tunnels, underpasses, on-site sewer and water lines, parking lots, shrubbery, fences, walls, etc. where replacement is the responsibility of the nursing facility.

**Building** - includes the basic building structure, shell or frame, and additions thereto, building components, exterior walls, interior framing, walls, floors and ceiling, architectural, consulting, and interest expense associated with new construction or acquisition.

**Building Improvement** - includes building equipment attachments to buildings, such as wiring, electrical fixtures, plumbing, elevators, heating and air conditioning systems, etc. The general characteristics of fixed equipment are: (a) attached to or installed in the building structure, and (b) fairly long life but may be less than the building.

**Leasehold Improvement** - includes betterments and additions made by the lessee to the leased property, whereby the improvements become the property of the lessor after expiration of the lease. These items generally meet the requirements of building improvement assets.

**Department Equipment** - includes assets generally assigned to a specific department within the nursing facility with relatively fixed location but capable of being moved; as distinguished from building equipment. (Refer to Building Improvement.)

**Furniture and Fixtures** - includes assets similar in characteristic to department equipment, however, normally with no fixed location or used by various departments within the facility.

**Transportation Equipment** - includes vehicles used in conducting nursing facility operations relative to resident transportation, plant operations and maintenance, or general means of transport.

Capital asset costs incurred by a landlord who is leasing facility assets to a provider must be disclosed and reported in the provider's annual cost report. Capital asset cost reporting and allowable cost policies are applicable to the reporting of the leased assets in the same manner as if the assets were owned by the provider.
9.4.C. DEPRECIATION

Class I and Class II nursing facilities are under the tenure plant cost reimbursement methodology, and potential reimbursement is not based on depreciation expense for the nursing facility capital assets. The costs of services provided from home office or related party transactions, other than for capital assets related to the nursing facility physical plant, may include depreciation expense for asset costs applicable to the operations of the home office or related party business. Allowable depreciation costs for the home office or related party will be determined in accordance with Medicare Principles. These costs will be included in the home office or related party administrative services space costs and must be reported in accordance with Medicaid policy identified in the Related or Chain Organization Cost Allocation subsection of this appendix. Class III and Class IV nursing facilities reimbursed under the depreciation plant cost reimbursement methodology will have depreciation costs determined in accordance with allowable cost principles defined in this policy. The allowance for depreciation is determined in accordance with Medicare Principles except that only the straight-line method of depreciation may be used. The historical asset cost basis and the depreciation basis for nursing facility sales is subject to the limitation on the valuation of assets mandated by the Medicare Principles.

In addition to the depreciation standards in the Medicare Principles, Medicaid also requires adherence to the following standards:

- Consistent use of either component or composite asset depreciation schedules. Component depreciation is permitted in the case of a newly constructed facility and for recognized building improvements where the costs can be separated and acceptable useful lives determined. Composite depreciation must be used in the case of a newly purchased, existing facility.
- All abandonment losses are considered as a depreciation expense item.

9.4.D. DISPOSAL OF DEPRECIABLE ASSETS

9.4.D.1. CLASS I NURSING FACILITIES

Class I nursing facilities will account for asset acquisition and disposal in accordance with the Capital Asset Cost Data for Class I Facilities subsection of this appendix.

A Class I nursing facility purchased on or after March 31, 1985 is not subject to depreciation adjustment. In the event of a sale, the assets of Class I facilities whose ownership began prior to March 31, 1985, amounts included in the Medicaid per diem rate as an explicit depreciation expense item are subject to recapture in the event of a gain on the disposal of assets. The selling Provider must complete Medicaid Program Depreciation Recapture reporting schedules along with the applicable fiscal year cost report. Refer to the Cost Report Reimbursement Settlement, Depreciation Recapture Reimbursement Adjustment subsection of this appendix for additional information.
9.4.D.2. CLASS III NURSING FACILITIES

Class III providers whose Medicaid rate includes depreciation expense must adhere to the Medicare Principles of Reimbursement to account for the disposal of depreciable assets. If the disposal of depreciable assets in the reporting year results in a gain or aggregate loss below $5,000, the adjustment will be made in the nursing facility provider's current year cost reporting allowable cost. The allowable gain is limited to the amount of depreciation previously included in the provider's allowable costs for the disposed assets.

In the event of a sale of the entire nursing facility and the termination of Provider participation in the Medicaid program, the terminating Provider must complete Medicaid Program Depreciation Recapture reporting schedules along with the applicable fiscal period cost report. Refer to the Cost Report Reimbursement Settlement, Depreciation Recapture Reimbursement Adjustment section of this appendix for additional information.

9.5 LOANS/BORROWINGS BALANCE REPORTING

Necessary and proper interest on current and capital debt is a Medicaid allowable cost. All interest expense, whether on current or long term debt, is classified as a plant cost. Determination of allowable interest expense will be in accordance with Medicare allowable cost principles. However, there are reimbursement limits for determining the Plant Cost Component specific to Medicaid which are addressed in the Rate Determination section of this appendix.

Medicaid requires nursing facilities to report the loans and borrowings balance in the annual cost report. The cost report instructions identify the schedules that must be used to report borrowing principle balances. The nursing facility must report the beginning balance and monthly end balance of outstanding allowable loans and borrowings for the time period corresponding to the cost report year. The loans and borrowings in the borrowing balance report must only include the outstanding loans or other liability obligations for which the nursing facility is claiming interest expense related to that borrowing principle. If the nursing facility is filing a cost report claim for interest expense as an allowable cost, the nursing facility must document the corresponding borrowing obligation related to the interest expense. The outstanding borrowing balance is defined as the allowable borrowing principle amount on which the interest rate, normally expressed as an “interest rate percentage”, is applied for the purpose of calculating the interest expense applicable to the specific cost report time period.

Loans from related parties or unallowable borrowings must be excluded from the cost report borrowing balance schedule. The interest incurred on excluded borrowings must be removed from incurred interest costs in a like manner. Interest income or investment income which is required to be offset to interest expense in the cost report period must not be considered a reduction in the outstanding borrowing balance principle.

Mortgage principle balances or similar finance arrangements for the purpose of nursing facility or business acquisition must be separately identified from other loan balances in the cost report borrowing balance schedule. Examples of other loan balances include working capital and miscellaneous asset acquisition purpose loans. In the event of refinancing and co-mingling of separate loan balances into a single finance arrangement, the nursing facility must identify the appropriate portions of the combined financed amount used for different purposes, and maintain the separation for cost reporting. Likewise, multiple loans for the same purpose must be combined for the appropriate category for cost reporting.
Borrowing principle obligations incurred by a home office must be reported on the individual nursing facility cost report borrowing balance worksheet only for loans directly associated with financing the individual nursing facility asset purchases or facility acquisition costs. The interest expense applicable to such loans must also be identified, directly charged to the individual nursing facility, and reported as interest expense for the nursing facility. Working capital and other loans incurred directly under the home office operation and not related to nursing facility acquisition are considered general administrative costs and are included, to the extent determined necessary and reasonable, in the home office cost allocation to the individual nursing facilities and other business operations of the corporate chain.

Allowable outstanding loan balances of landlord entities that are leasing nursing home facility assets to a provider must be disclosed and reported in the provider's annual cost report. Borrowings balance cost reporting and allowable cost policies are applicable to the reporting of the underlying cost of the landlord entity in the same manner had the borrowings been recorded on the financial records of the provider.

9.6 COST FINDING

Cost finding is the process of recasting the data from the accounts kept by a provider to determine the cost of services rendered, allocating direct costs, and prorating indirect costs in accordance with Medicare Principles of Reimbursement, except where modified by Medicaid policy. Medicaid determines reimbursement rates for nursing facility providers based on specific categories of cost, as addressed in other sections of this appendix.

9.6.A. COST ALLOCATION BASIS

The Medicaid cost reporting process establishes the cost finding process. Indirect and non-revenue producing cost centers are allocated using a statistical basis that reflects an equitable measurement of the services provided to, or benefits derived by, a revenue producing or non-reimbursable activity. The nursing facility must develop and maintain adequate statistical data to corroborate the basis of the cost allocation. Adequacy requires that the data be accurate and include sufficient detail to accomplish the purpose for which it is intended. When completing the allocation of the general service cost centers, the nursing facility provider should first allocate those cost centers that render the most services to, and receive the least services from, other cost centers.

9.6.A.1. FACILITY SQUARE FOOTAGE AND SPACE REPORTING

A facility space cost allocation is based on square footage identified with specific service areas or activities occupying and using that space. Square footage is an allocation base that may be applicable for multiple indirect cost center activities. However, for cost centers where the basis is the same (e.g., square feet), the total statistical basis over which the costs are to be allocated will differ because of the prior elimination of cost centers that have been allocated.

A consistent and uniform process must be used by the nursing facility for compiling and charging the square footage to each service activity that is primarily benefiting from or using that space. Facility space that is used for multiple activities must be documented and connected to each applicable activity based upon current data that reflects actual use and is available for audit verification. Hallway space located within a specific department or service area is considered usable space for that department. Areas of the
facility for general use, such as connecting hallways, reception areas, lobby, and elevator, used or benefiting all service activities are considered common space. Identifying and counting common space must be consistent for all service areas of the facility.

For example, common space in one service department cannot be excluded from space allocated to that service activity, while similar common space located in other service departments is included in the space allocation of other service activities. The allocation basis must apply either the gross method, where all common area is included and charged to the specific services activity, or the net method, where common space located within the identified service area is not charged to the service activity. The nursing facility’s handling of common space area in the cost report allocation must result in equitable distribution of costs associated with the common space to appropriate activities. A change in the process or methodology that the nursing facility uses for allocating space is a change in allocation basis, so appropriate notice and a request must be made to the SMA.

9.6.A.2. ANCILLARY/ THERAPY SERVICES SPACE REPORTING

Facility space used for ancillary services delivery must be identified and charged to the appropriate ancillary services cost center. For example, space used for skilled rehabilitation services provided based on a physician’s order must be allocated to the appropriate ancillary cost center.

Accounting procedures must be established and implemented to reflect individual cost centers for reimbursable therapy and pathology services. Irrespective of the therapist or pathologist’s status as an employee, contractor or independent provider, the nursing facility must record all charges as income and all expenditures for supportive personnel, equipment and its maintenance, supplies and other costs directly attributable to reimbursable expenses in these cost centers.

9.6.A.3. ANCILLARY/ THERAPY SERVICES ADMINISTRATIVE OVERHEAD

Medicaid requires that administrative overhead associated with ancillary services be allocated to the ancillary services cost center. The required basis for distribution of administrative costs to the benefiting activities of the nursing facility is accumulated costs. The accumulated costs base generally includes all service activities of the nursing facility.

In specific situations, the nursing facility may request exclusion of certain ancillary service groups from the administrative cost overhead allocation in the Medicaid cost report. The determination applies only to those service items where the billing to the third party only allows for the recovery of the direct cost of the service. The provider must demonstrate considerable inequity of the overhead cost allocation to these service activities that have been identified as excluded groups under the Medicare Principles of Reimbursement and that it is not incurring additional costs beyond the activity for arranging for the services. The incidental costs for inclusion of the ancillary service bill preparation must be as follows:
• The facility representatives arrange for the services to be performed by an agency or entity that is not part of the nursing facility operation.

• The nursing facility is not directly involved in providing the ancillary service.

• The nursing facility does not incur any costs for supplies and equipment necessary to perform the service.

• The ancillary service is being recorded through the accounting records and billing system of the nursing facility for the consolidated billing of the services provided to the nursing facility resident.

• The nursing facility does not have physical space dedicated for the purpose of delivery or rendering of the ancillary service. Dedicated space is considered space that is used predominantly for the purpose of the ancillary service delivery.

• The nursing facility is not charging a mark-up related to the billing of the service.

If the nursing facility is allowed to bill for, or recover revenue in excess of, the direct cost of the services, the statistical and fiscal worksheet of the cost report may be adjusted to reflect the revenue received. The amount of revenue exceeding the direct cost will be considered the overhead amount that must be reflected as an adjustment to the "miscellaneous expense" in the Administrative and General cost center, in addition to the direct cost adjustment to exclude the ancillary service cost from the cost allocation step-down. The nursing facility must demonstrate that the excess revenue is a fair representation of the overhead cost or activity associated with providing the service. If this requirement is not met, the ancillary services activity must be included in the administrative cost allocation basis for the apportionment of overhead to the activity.

A provider may request an ancillary group exclusion. The exclusion request must be approved by RARSS. The request must include the parameters under which the exception is requested. If the request is approved by RARSS and it is later determined non-applicable, the exclusion is void for that entire cost report period.

If a CHOW occurs, the prior owner's ancillary group exclusion is no longer applicable. The new owner may submit an ancillary group exclusion request to RARSS for approval. The exclusion process is outlined in the Ancillary Group Exclusion subsection of this appendix.

9.6.B. Change in Cost Allocation Basis

A provider who wishes to change the allocation basis for a particular cost center, or the order in which the cost centers are allocated, must submit a written request to the RARSS. (Refer to the Directory Appendix for contact information.) The request must include reasonable justification and supporting documentation that the new basis is more accurate and appropriate for allocation of the cost activity for Medicaid reimbursement determination. The request must be made prior to the beginning of the cost-reporting period in which the change is to apply. The effective date of the change will be the
beginning of the cost-reporting period for which the request has been made. Failure to submit a timely written request will result in an audit adjustment. The nursing facility provider must maintain both prior and proposed statistics base data until the change is approved.

Medicaid may reject a submitted cost report if a request to change the allocation basis has not been submitted and approved by RARSS. If the previous allocation basis methodology has not been maintained for the current year, Medicaid may accept previous year’s statistics for the current year cost reporting.

9.6.C. RELATED OR CHAIN ORGANIZATION COST ALLOCATION

The Medicare Principles of Reimbursement define a related organization as an organization linked to a nursing facility provider by common ownership or control, including a chain organization. Medicaid extends an option for cost allocation for related or chain organizations. An immediate family relationship establishes an irrefutable presumption of relatedness.

For Medicaid purposes, a chain organization consists of a group of two or more nursing facilities, or at least one nursing facility and any other business or entity owned or operated and controlled by one organization. To the extent that the home office furnishes services related to patient care to the nursing facility, the reasonable costs of the services are included in the nursing facility’s cost report. Medicaid policy for related organization costs is determined in accordance with provisions in the federal Provider Reimbursement Manual for related organization costs. Exceptions to the application of federal provisions are addressed in the Cost Classifications and Cost Finding and the Allowable and Non-Allowable Costs sections of this appendix.

Home office costs apportioned to individual nursing facilities through the Home Office Cost Statement are classified as support costs. Cost report requirements for home office are addressed in the Cost Reporting section of this appendix.

Costs incurred by a nursing facility for services furnished by a related organization are allowable. The cost allocated to the nursing facility cannot exceed the price of comparable services, facilities, or supplies that could be purchased in competitive market conditions. The principles of reimbursement applied for the determination of allowable cost to the nursing facility are also applicable to the related organization. If a cost would be unallowable to the nursing facility, it would be unallowable to the related organization.

The operating costs of a related ownership organization are allocated to an individual nursing facility as a “purchased service” and must be identified within the appropriate cost center for Medicaid cost reporting. The type of service determines if the costs qualify to be apportioned between base and support cost using the industry-wide base and support cost percentages. If the service does not qualify to be apportioned by this method, the allocated costs are classified as support costs in the individual nursing facility. Refer to the Cost Classifications and Cost Finding section of this appendix for additional information.
If the home office accounting period differs from the cost reporting period of the nursing facility, the allowable home office costs in the facility cost report must only include the costs allocated to the facility for the time period in which the completed home office cost statement coincides with the facility's cost report period. There may be a portion of the year where home office costs have not yet been determined or finalized. The facility must submit to RARSS a disclosure letter with it's cost report data stating that the cost report includes partial year home office costs. After the home office reporting period is completed, the nursing facility must amend it's cost report submitted to RARSS to include complete home office cost data. The cost report filed originally will be used for program reimbursement actions until an amended cost report is filed. An accepted, amended cost report will be used for reimbursement determination actions for the same time period as the initial cost report. The nursing facility amended cost report must be submitted to RARSS within three months after the end of the home office or related party cost report year. Amended cost reports submitted after the three-month filing requirement will be effective only on a prospective basis for the routine nursing care per diem rate determination. The Medicaid audit of the home office cost statement and related allocation to the nursing facility will be made in accordance with the final cost report filing data.

**Example:** The home office has an accounting year ending August 31; Nursing Facility A has a cost report year ending December 31; Nursing Facility B has a cost report year ending March 31.

**Year 1**

</tr>
<tr>
<td>Facility B</td>
<td>$80,000 (8 months)</td>
<td>$35,000 (5 months)</td>
</tr>
</tbody>
</table>

Amount reported in facility cost report initially filed for: FYE 12/31/2018
- Home office cost year 8/31/2018: $80,000 (8 months)
- Home office cost year 8/31/2019: $44,000 (4 months)
- Total home office costs in cost report: $124,000

Amount reported in facility cost report amended for: FYE 12/31/2018
- Home office cost year 8/31/2018: $80,000 (8 months)
- Home office cost year 8/31/2019: $44,000 (4 months)
- Total home office costs in cost report: $124,000

Amount reported in facility cost report initially filed for: FYE 12/31/2019
- Home office cost year 8/31/2019: $88,000 (8 months)

Amount reported in facility cost report amended for: FYE 12/31/2019
- Home office cost year 8/31/2019: $88,000 (8 months)
- Home office cost year 8/31/2020: $42,000 (4 months)
- Total home office costs in cost report: $130,000

Amount reported in facility cost report initially filed for: FYE 12/31/2020
- Home office cost year 8/31/2020: $84,000 (8 months)

Individual nursing facility cost reports for 12/31/2020 and 3/31/2021 must be amended following completion of the home office cost reporting year 8/31/2021 to include the portion of that year costs in the nursing facility cost report.

**Option**

For cost reports where the home office and the individual nursing facility’s fiscal year ends are different, a provider may elect to forego the inclusion of an allocation of the current year’s home office costs in the current year’s individual provider cost report. A written request must be submitted annually to RARSS, with the individual provider’s cost report signed by the appropriate corporate official acknowledging that the cost report is being submitted with the prior fiscal year’s home office costs. The written request must also indicate that the corporation is waiving the right to inclusion of any allocation of the current year’s home office costs in the current year’s individual provider cost report.

For example, a home office fiscal year end (FYE) is 12/31 and the individual facility’s FYEs are 05/31, 08/31, 09/30 and 12/31. For individual facility cost reporting for fiscal year 2017 ending in May, August, September and October, the individual facility may elect to report only the home office costs from the FYE 12/31/2016 home office cost report. The home office allocation of costs from FYE 12/31/2016 to the individual facility would be reported and audited. During the audit of the individual facility cost report, adjustments to allocate actual FYE 12/31/2017 home office costs would not be made.
For individual facilities with FYE 12/31/2017, the home office costs from FYE 12/31/2017 cost report would be reported.

9.7 DISTINCT PART UNIT REPORTING

For reimbursement purposes, the Nursing Facility is defined as the unit that is certified for participation in the Medicaid program, whether that unit comprises all of, or a distinct part of, a larger institution.

Certification regulations require that a distinct part be physically distinguishable from the larger institution and fiscally separate for cost reporting purposes. The provider must demonstrate to Medicaid that the system used for recording the hours of nursing services can be audited and equitably allocates the nursing services costs between the distinct part and other parts of the facility. The nursing services costs are only the gross salaries and wages of nursing and related personnel, such as RNs, LPNs, and CNAs. Costs applicable to general services areas of the institution must be allocated in accordance with the Cost Finding section of this appendix.

Nursing services costs allocated to that distinct part of the facility must relate only to services provided to those residents. While a provider may choose the record keeping method used to allocate these costs, the system must be capable of accurately reflecting the hours of nursing service applicable to the distinct part and other parts of the institution. Various systems may be employed to record and accumulate the hours of nursing services such as actual time spent taken from payroll records, assignment schedules, sign-in sheets, etc. Providers wishing to use any other method that does not identify actual time must obtain written approval from the RARSS prior to changing its cost allocation method. The request must identify the reason for the change and must demonstrate that the proposed method is representative of actual nursing staffing within the facility and results in an equitable and accurate allocation of nursing services costs.

A nursing services cost allocation alternative may be applied only with the prior written permission from RARSS.

An institution may have more than one Medicaid distinct unit in specific cases where Medicaid has certified beds as special use for specialized nursing care. The specialized nursing care beds must be physically distinguishable, within a designated area, and identified as a separate nursing bed class for Medicaid reimbursement. Requirements for reporting nursing services costs also apply to nursing services for residents in specialized nursing care beds. The nursing facility must have prior approval from Medicaid for participation in a program for specialized nursing care.

9.8 DAY CARE SERVICES PROVIDED IN THE NURSING FACILITY

According to federal principles, day care services provided to an employee’s dependent are not a fringe benefit when furnished for the convenience of the provider. Medicaid considers day care services provided to an employee’s dependent a convenience to the provider due to potential support of staff recruitment and retention.

9.8.A. EMPLOYEE DEPENDENTS

According to federal principles, the costs of operating a day care center for the children of a facility’s or related facility’s employees must not be reported as an employee fringe benefit. The costs are allowable to the extent that the amount is reasonable.
“Reasonableness” means that the services are provided in accordance with the policies and regulations established for the provision of such services, and must take into account both direct and indirect costs. The provision of services must also be considered reasonable in that the costs of operating a facility demonstrate sufficient benefits. For example, the number of children participating justifies the provision of services.

Total cost must not exceed what a prudent and cost conscious buyer pays for like services. If costs are determined to exceed such level and the nursing facility cannot provide clear evidence that the higher costs were unavoidable, the excess costs are not allowable. The day care center operations must be provided in accordance with, and satisfy applicable regulatory requirements governing the operations of, such activities. The nursing facility must maintain accounting records and documentation to demonstrate the total cost and utilization of day care services.

The following costs are non-allowable:

- diapers
- towelettes
- lotions
- oils
- similarly used hygiene products

9.8.B. SERVICES PROVIDED TO NON-EMPLOYEE DEPENDENTS

If a provider renders services to non-employee dependents, the day care center must be established as a separate entity even if services are also provided to employee dependents. Medicaid will allow costs relative to intergenerational activities as an offset when the day care center suffers a financial loss, which is limited to the lesser of total documented intergenerational activities or the amount of the loss. Intergenerational activities must be documented, organized activities between the children attending the day care and the nursing facility residents.

The nursing facility must maintain accounting records and documentation to demonstrate the total cost and utilization of day care services.

9.9 NURSE AIDE TRAINING AND COMPETENCY EVALUATION PROGRAM (NATCEP) AND COMPETENCY EVALUATION PROGRAM (CEP)

The Omnibus Budget Reconciliation Act (OBRA) of 1987 and 1990 requires that any nurse aide employed in a nursing facility complete a competency evaluation program. Medicaid will reimburse a Medicaid certified nursing facility for the Medicaid share of allowable costs directly related to meeting the nurse aide training and competency evaluation requirements. Reimbursement includes only costs incurred with a NATCEP or CEP approved by the SSA. Medicaid reimbursement applies only to Certified Nurse Aides (CNA) working in a Medicaid certified nursing facility and are not available to CNAs in other residential or patient care settings.

A nurse aide who is employed by a nursing facility or who has received an offer of employment from a nursing facility on the date on which the nurse aide begins a NATCEP may not be charged for any portion of the cost of the program. The nursing facility must reimburse newly employed CNAs who have personally paid for NATCEP or CEP costs prior to employment in the facility, in accordance with criteria.
identified in the Nurse Aide Reimbursement section of this appendix. Medicaid in turn reimburses the nursing facility.

Providers may obtain reimbursement from Medicaid for CNA costs. The reimbursement process and necessary forms are available on the MDHHS website. (Refer to the Directory Appendix for website information.)

9.9.A. NURSE AIDE COMPETENCY EVALUATION PROGRAM AND NURSE AIDE REGISTRY

Nurse aide candidates must pass both a clinical skills test and a knowledge test in order to become certified. Fees for the individual nurse aide to take the tests, and retake each test up to three times, are allowable costs for nursing facility reimbursement. Refer to the Nursing Facility Reimbursement and Nurse Aide Reimbursement subsections of this appendix.

When a nurse aide has successfully passed the CEP, their name is placed on the Michigan Nurse Aide Registry. Fees relating to initial registration and biennial registry renewal are allowable costs for nursing facility reimbursement. For currently employed nurse aides, the nursing facility is responsible for the direct payment of biennial registry renewal fees. Refer to the Nursing Facility Reimbursement and Nurse Aide Reimbursement subsections of this appendix.

Information about training requirements, competency evaluation program and registry data is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

9.9.B. NURSING FACILITY REIMBURSEMENT

Reimbursement to the nursing facility for NATCEP related costs is calculated as an add-on to the routine per diem rate. The Nurse Aide Training and Testing Program Interim Reimbursement Request (MSA-1324) and instructions are available on the MDHHS website. The total NATCEP add-on amount will be adjusted through the annual cost report settlement process. The Medicaid share of the costs is computed based on the ratio of Medicaid resident days to total resident days for all nursing care provided in the facility during the cost report period. Refer to the Cost Report Reimbursement Settlement section and the Rate Determination section of this appendix for additional information.

The NATCEP cost center on the Medicaid cost report must be used to report the following:

- Costs of conducting a nursing facility based NATCEP.
- Costs of having employees participate in an approved NATCEP outside the nursing facility.
- Costs of employee competency testing by a regional testing facility.

The costs and staffing levels relating to and charged to the NATCEP cost center must not be included in the nursing facility determination of routine nursing care costs.
The determination of allowable NATCEP costs is made in accordance with provisions in the federal Principles of Reimbursement established for the Medicare Program, and cost limitations in Medicaid policy. Training and evaluation program costs claimed for services and supplies furnished to or purchased by the facility from related organizations must adhere to related party allowable cost principles. The cost of such transactions must not exceed the cost of like items or services in an arms-length transaction with a non-related organization, or the actual cost to the related organization, whichever is lower.

The following are not NATCEP costs and must be classified as routine nursing care costs on the cost report:

- Administrative overhead in a facility-based training program.
- Space costs in a facility-based training program.
- Uniform allowance costs.
- Required in-service training.

NATCEP and CEP allowable cost must only include the costs of activities or items that are directly related to providing approved training and the competency evaluation process. The following table contains eligible training and evaluation activities.

| Training Staff | Salaries and wages, employee benefits and payroll taxes for conducting training and evaluation activities, including supervised practical training, and direct time devoted to development and preparation for conducting the NATCEP. Payroll costs allowed for NATCEP do not include the cost of time that the training staff devote to routine in-service training activities, general nursing administration or direct patient care, except for supervised practical training. These costs must be classified as routine nursing care cost for consideration in the routine per diem rate. |
| Training Consultants | Costs incurred for non-facility staff to assist in developing and conducting the facility's NATCEP. |
| Student Staff | Salaries and wages, employee benefits and payroll taxes incurred for the time the student is enrolled in the approved training program, i.e., classroom and required supervised practical training. A reasonable time allowance for student employees traveling to and from the off-site training location or competency evaluation, in accordance with a nursing facility's established and documented travel policy, is allowable as NATCEP cost. Payroll costs allowed for NATCEP do not include the cost of staff time for patient care activities that the nurse aide is performing during the time period the student is completing the training program. These costs must be classified as routine nursing care cost for consideration in the routine per diem rate. |
| Training Program Supplies | Costs of supplies and materials used in conducting an approved NATCEP. |
### Training Program Transportation

Travel or transportation costs incurred by facility staff in conducting the NATCEP activity, and for transportation or travel reimbursement to student staff for off-site NATCEP or CEP attendance. Refer to the Facility Vehicle and Transportation, Allowable and Non-Allowable Cost section of this appendix for mileage allowance provisions.

Use of a facility owned vehicle for staff transportation for training is not charged to NATCEP. Facility vehicle operation cost must be classified as administrative overhead and is considered in the routine per diem rate.

### Outside Contracted NATCEP Paid Directly by the Facility

Cost to obtain approved nurse aide training of facility employees by an outside entity approved NATCEP. The nursing facility is responsible to ensure that the contractor is an approved NATCEP.

### Outside Contracted NATCEP Costs Reimbursed to Employee

Cost for reimbursement to an employed CNA who had personally paid for an approved NATCEP participation and completion prior to being employed in the facility. Refer to the Nurse Aide Reimbursement subsection of this appendix for additional information.

### Competency Evaluation Fees Paid Directly by the Facility

Fees paid by the nursing facility to a State-approved competency evaluator. This includes testing and retesting fees, rescheduling fees, and nurse aide registry.

### Competency Evaluation Fees Reimbursed to Employee

Cost for reimbursement to an employed CNA who had personally paid for State-approved competency evaluation and registration fee prior to being employed in the facility. Refer to the Nurse Aide Reimbursement subsection of this appendix for additional information.

### Miscellaneous Costs

Allowable costs that are not specifically identified in another category include, but are not limited to, the following items:

- Rental costs for space located out of the facility are allowable only if the space is used solely for the training and competency evaluation program. Space costs not meeting this requirement are reimbursable with the Plant Cost Component of the routine per diem.
- Reasonable rental expense for training equipment necessary for conducting an approved training program.
- Nurse aide biennial Registry Document renewal fees for current employees.

### Equipment Purchased

Equipment purchased and used specifically for the nursing facility based NATCEP are reported as NATCEP cost center costs for Medicaid cost reporting and reimbursement purposes. NATCEP equipment costing less than $5,000 may be expensed in the year of acquisition and reported in the NATCEP cost center. Equipment acquired as part of an integrated system costing greater than $5,000 must be amortized at an annual rate of 15% for each cost reporting year the equipment is used in the NATCEP, up to a maximum of seven years. Instructions for NATCEP equipment reporting are included in the annual cost reporting instructions.

---

**9.9.C. Nurse Aide Reimbursement**

A nursing facility must reimburse a newly hired CNA if the CNA paid for nurse aide training, competency evaluation and registry, and completed the approved training program within 12 months prior to employment in that facility. The nursing facility is not required to reimburse the CNA in cases where the expenses were paid by an employment or education training program, or were reimbursed by the CNA's previous employer. The
nurse aide should not be reimbursed for more than 100 percent of the NATCEP or CEP costs they paid.

The nursing facility is responsible to ensure that a newly hired CNA who requests reimbursement of training and testing expenses has not already received payment for these costs. An aide who paid for any of these eligible costs and received payment of a portion of the expenses from prior facility employment is eligible for only the remaining balance from the new employer.

The CNA must request reimbursement by submitting to the nursing facility the Nurse Aide Training and Competency Evaluation Program, Certified Nurse Aide Training Reimbursement form (MSA-1326), available in the Forms Appendix and on the MDHHS website. The reimbursement should be requested within the first six months of employment or work as a certified CNA.

NATCEP costs that are eligible for reimbursement to the individual nurse aide include:

- Training program cost including fees for textbooks and required course material up to a maximum of $650. Medicaid will update the maximum allowable reimbursement limit effective October 1, 2006 and biennial thereafter, based on the Global Insight's Skilled Nursing Facility Market Basket Without Capital Index corresponding to that update period. The training program maximum reimbursement amount will be updated biennially on the RARSS website.
- Competency Evaluation Program testing fees, including retesting fees; CEP testing required due to the nurse aide registry document expiration; and rescheduling fees.
- Registry or Registry Renewal Document fees that the CNA personally paid within 24 months prior to being employed in the nursing facility.

For cost reporting and audit purposes, the nursing facility must maintain a copy of the MSA-1326 signed by the employee and documentation reflecting reimbursement to the employee. This documentation must include a copy of a receipt for cash payment, a copy of a cancelled check, or a credit card receipt showing the amount paid by the nurse aide and the date of payment, as well as copies of the nursing facility's cancelled checks disclosing reimbursement to the employee.

The nursing facility has the option to reimburse the individual via a one-time payment or payment installments. The reimbursement to the individual, regardless of full-time or part-time employee status, must be fully paid within six months of the individual's date of employment, or must be prorated based on their dates of employment in the facility if employed for less than six months. If the nursing facility fails to reimburse a CNA employed in the facility within this timeframe, the unpaid balance will not be an allowable NATCEP or routine nursing care cost. This determination does not relieve the nursing facility of its obligation to reimburse the nurse aide. Wages may not be reduced to offset the facility's obligation to pay the nurse aide for training, competency evaluation, and registry costs.

The nursing facility is not obligated to pay the remaining balance of nurse aide training costs at the time an employee who has worked less than six months leaves facility employment. The CNA has the opportunity to recoup the non-reimbursed costs through
subsequent employment at other nursing facilities. The facility should properly record payments so that the unpaid amount is not carried as a payment obligation.

9.9.D. NURSING FACILITY LOCKOUT AND LOSS OF NATCEP APPROVAL

A provider with a facility-based training CNA program is not eligible for Medicaid reimbursement of training costs when it has been issued a final notice from CMS or the SSA of the withdrawal of NATCEP approval, or of a NAT prohibition (lockout). For Medicaid reimbursement purposes, the lockout effective time period coincides with the SSA time period notice to the nursing facility. The nursing facility must not claim Medicaid reimbursement for costs associated with any facility-based training class beginning after the withdrawal or lockout effective date identified in the final notice. Nurse aide students beginning training prior to the withdrawal effective date are allowed to complete training, and the related costs to complete that training class are eligible for NATCEP reimbursement. Nurse aide training costs incurred for that facility-based program subsequent to completion of that student class are not allowable NATCEP costs. This disallowed cost is also not allowable under routine nursing care cost.

Although the nursing facility experiencing approval withdrawal or lockout status cannot conduct its own training, the nursing facility must provide and reimburse for training and competency evaluation of its new nurse aide employees at approved sites. Such costs are eligible for Medicaid cost reporting and reimbursement in the annual cost report under the appropriate NATCEP cost categories. Nurse aide reimbursement for eligible training and competency evaluation personally paid expenses are allowable to be reported as NATCEP cost in the nursing facility annual cost report.

In the event that the nursing facility has been granted a waiver for a NAT program prohibition or lockout by the SSA, the nursing facility must comply with the provisions of the nursing facility waiver request and the requirements set forth by the SSA in the waiver approval. The facility-based NATCEP operating under a waiver is subject to audit by Medicaid for compliance with these requirements. If the nursing facility fails to conduct the program in accordance with these requirements, the training program expenses are not allowable costs for NATCEP or routine nursing cost reimbursement by Medicaid.

9.10 BEAUTY AND BARBER SERVICE COST CENTER

Personal services for residents, such as simple barber and beautician services (e.g., shaves, haircuts, shampoos, and simple hair sets), that residents need are considered routine patient care. The provision of such services is reimbursed in the routine per diem rate when provided routinely without charge to the resident in the nursing facility.

If the nursing facility designates an area for providing non-routine personal hygiene services, such as professional manicures, or hair styling, costs must be separately reported and accounted for in the cost report. Direct and overhead costs related to these services must be separately accounted for in this special services cost center and should not be included in the cost of providing routine nursing care.
9.11 SPECIAL DIETARY COST CENTER

Medicaid provides for reimbursement outside the per diem rate to non-profit nursing facilities for the cost of meeting residents' special dietary needs for religious reasons. Nursing facilities requesting reimbursement must report these costs as a separate cost center in the Medicaid annual cost report. Direct costs may include food purchase, salary and wages for the extra staff time for preparation, supplies and kitchen utensils necessary for preparation and service. The costs applicable to plant operations costs related to the special dietary needs will be determined through the Medicaid cost finding process.

9.12 HOSPITAL LEAVE DAYS

A separate accounting of costs incurred due to hospital leave days is not necessary.

9.13 NON-AVAILABLE BEDS

In special circumstances, nursing facility beds may be designated "non-available for occupancy" for Medicaid cost reporting when the patient care rooms in which the beds are located are not used for resident care. Beds with a "non-available" designation remain licensed or certified; the designation is for Medicaid cost reporting and reimbursement determinations only. An approved non-available bed plan reduces the total number of beds used for calculating available bed days for the annual cost report period coinciding with the time period of the non-available bed plan. Non-available beds must be located in a discrete area and readily identified for statistical cost reporting. During the time period the area is designated non-available for patient care, Medicaid does not reimburse for variable and plant costs attributed to the area designated as having non-available beds.

9.13.A. QUALIFYING CRITERIA

A non-available bed plan must include all of the licensed beds in a patient care room. The rooms must be a discrete area and primarily consist of a contiguous physical arrangement of rooms. Rooms may not be a random collection of individual rooms or beds located throughout the nursing facility.

Common physical space located adjacent to or within the designated rooms area will normally be included in the designated non-available bed area. Planned use of any common areas within the designated non-available bed area must be disclosed in the written notice to the RARSS.

Rooms with non-available beds may not be used for resident care service regardless of payer source nor can the space be used for any other normally reimbursable purpose.

Resident rooms that are not used for resident care do not qualify for non-available bed designation. Although the rooms may be used for alternative services, the beds located within the room area must continue to be counted as available for resident care. Physical plant area used for alternative use must appropriately be charged to the applicable alternative services cost center if the services activity results in ancillary care services or other revenue services.
The written request must be submitted within 30 calendar days of the date that the provider removes the beds from service.

**9.13.B. WRITTEN NOTICE AND REQUEST FOR PLAN APPROVAL**

The provider must submit a written request for a non-available bed plan to RARSS. The RARSS must receive the request within 30 calendar days of the date that the beds are to be removed from resident care service. Non-available bed plan requests will not be approved on a retroactive basis. (Refer to the Directory Appendix for contact information.)

The written notice from the provider to RARSS must:

- Indicate the date that the beds will be removed from resident care service and the expected duration of the non-available plan.
- Indicate the reason for the request.
- Include a floor plan of the facility that marks the beds to be designated as non-available.

The RARSS will review the request and provide a written response of approval, denial or a request for additional information. If approved, the RARSS will notify the SSA of the non-available bed designated rooms and effective time period.

**9.13.C. LIFE OF AN APPROVED PLAN**

Beds must remain non-available for not less than the balance of the provider's fiscal cost reporting year in which the beds are deemed non-available plus the entire following fiscal year. An exception is when the non-available bed plan is effective on the first day of the provider's fiscal year. The cost report year may qualify as the entire time period of the non-available bed plan if the cost report period is not less than twelve months.

Non-available bed designations will be effective on the first day of the month. If the notice is not received within the required 30 calendar day period, the plan will become effective on the first of the month in which RARSS received the notice if the beds have not been utilized during that month.

The initial period of the non-available bed plan expires upon completion of the minimum required time period.

The nursing facility may request up to two extensions of 12 months each following this minimum time period. The agreement may be extended on the basis of the provider's fiscal year. A request for extension must be submitted in writing to the RARSS 30 calendar days prior to expiration of the initial plan. The request for a second extension must be submitted to RARSS 30 calendar days prior to expiration of the first extension. The requests must include at least one of the following items:

- The same rooms and bed area.
- A revision to bring some, but not all, of the beds back into service (if applicable).
A revision to increase the number of non-available beds that includes all of the beds already designated as non-available.

A change in the room and bed designation area that is equal to the number of beds designated as non-available in the initial plan.

Requests for a revision to bring some, but not all, beds back into service must include:

- The same rooms and the same bed area.
- If applicable, the change in room and bed designation area that is equal to the number of beds designated as non-available in the initial plan.

The extensions must meet the elements of the qualifying criteria, notice requirements and related policy for initial non-available bed requests.

Non-available bed plans expiring on or after April 1, 2005 are limited to two 12-month extensions. When a provider’s initial or extended non-available bed plan ends, the nursing facility must return the beds to service or decertify the beds from Medicaid participation. Medicaid will not approve a non-available bed plan that substitutes beds elsewhere in the facility for the formerly non-available beds.

The nursing facility will not be eligible to submit a new non-available bed plan for 24 months following the expiration of the previously approved plan.

A provider may only request a grace period after the final extension period if the provider can demonstrate progress to place the non-available beds into resident care service. The request for a grace period must be made to LTC Services 30 calendar days prior to the expiration of the final extension period. (Refer to the Directory Appendix for contact information.) The request for a grace period must be submitted before expiration of the final extension period, and must meet the elements of the qualifying criteria, notice requirements and related policy for initial non-available bed requests. The request must specify the date that the beds will be available for occupancy and may not exceed 12 months. An example for such action is gradual facility renovation involving periodic non-available beds in a nursing unit and replacement with non-available beds in another unit as renovation plans progress.

Nursing facilities holding a written agreement with an accredited medical school instructing students in providing geriatric care may request consideration for an exception to policy in this subsection (Life of an Approved Plan). Requests must be submitted in writing to the MDHHS LTC Reimbursement and Rate Setting Section (RARSS) and should outline the provisions of the agreement, stating that the medical school staff determines admissions into the program and facility. The request must establish an area in the facility that is a distinct unit for the purpose of conducting the educational program, and the area must continue to meet all other non-available bed plan requirements. A copy of the agreement or contract between the facility and the medical school must be provided to RARSS with the exception request. If the agreement or contract undergoes change, a copy of the new terms of agreement must be submitted for approval prior to implementation.
All requests for an exception to policy will include a review of the facility’s historical and current survey performance. Criteria regarding survey history (found in the Criteria for Evaluation of Medicaid Bed Certification Requests subsection of the Nursing Facility Certification, Survey & Enforcement Appendix of this manual) are also applicable to this exception request.

The provider must meet all appropriate certification requirements for distinct part units for the remaining Medicaid beds. Additional beds may have to be decertified in order to meet the distinct nursing unit requirements. The nursing facility may request re-certification of these beds for Medicaid participation after a 24-month time period. A request to re-certify must meet all current Medicaid certification requirements.

9.13.D. CHANGE OF OWNERSHIP (CHOW)

The non-available bed plan approval expires with a change of ownership of the nursing facility. If the new owner wishes to continue the non-available bed plan, they must submit a written request to the RARSS within 90 calendar days of the CHOW. A non-available bed plan submitted after the 90-day period will be considered a new request and must satisfy the qualifying criteria and related policy requirements. If the new owner does not request continuation of the existing plan, the beds will be deemed available for occupancy effective with the date of ownership change.

The new owner may apply to extend the plan to coincide with its cost reporting period by following the extension request policy outlined in the Life of an Approved Plan subsection. The nursing facility change of ownership does not relieve the nursing facility from the restrictions for non-available bed designation limitations for plan extensions other than allow for coinciding with the cost report year of the new ownership.

9.13.E. AMENDING A PLAN

The nursing facility may amend an approved non-available beds designation by submitting a written request to the RARSS. (Refer to the Directory Appendix for contact information.) A non-available bed plan may be amended only one time during the life of the non-available bed plan. A request for an amendment must include the same information as an initial request and will be reviewed using the same criteria. A plan amendment increasing the number of non-available beds is subject to the minimum time period requirement and the designation of all the beds must be effective for the time period of not less than the balance of the provider’s current fiscal cost reporting year in which the beds are deemed non-available plus the following fiscal cost report year.

A nursing facility holding a written agreement with an accredited medical school that instructs students in providing geriatric care may be permitted to amend a non-available plan more than once in the plan’s approved period. Requests to amend a plan under these circumstances must adhere to the requirements outlined in the Life of an Approved Plan subsection of this appendix. As noted, all requests will include a review of the facility’s historical and current survey performance consistent with the Criteria for Evaluation of Medicaid Bed Certification Requests subsection of the Nursing Facility Certification, Survey & Enforcement Appendix of this manual.
9.13.F. PENALTY FOR USE OF NON-AVAILABLE BEDS

Admitting residents to any beds in the area designated non-available for occupancy, regardless of payer source, before the end of the plan negates the non-available bed agreement. All beds covered by a non-available bed agreement that is negated during the initial period of the plan will be considered available for patient care for the plan’s entire initial period.

All beds covered by a non-available bed agreement that is negated during a plan’s extension period will be considered available for patient care beginning with the first day of that cost reporting period of the extension.

9.13.G. RETURNING BEDS TO SERVICE

All of the beds in the non-available bed plan will be considered returned to service and available for occupancy when the non-available bed plan expires.

In special circumstances, such as a sudden increase in demand due to closure of a nearby facility, non-available beds may be returned to service before the end of the approved plan with prior approval of the RARSS. A nursing facility with an approved non-available beds plan may submit a written request to return beds to nursing care if the individual nursing facility experiences the need for the beds due to the exception circumstances. The request must identify the reason for the need and the specific beds and room designations being made available. RARSS will provide immediate review and response to the nursing facility request.

9.13.H. PLANT COST CERTIFICATION

A provider with an approved non-available beds plan has the option to submit to a Plant Cost Certification for the cost report fiscal period in which the beds are approved as non-available for occupancy or the termination of the plan. Refer to the Plant Cost Certification Section in this appendix for additional information.

9.13.I. COST REPORTING

The variable and plant costs attributed to the area designated as non-available and the related capital asset cost are not Medicaid reimbursable costs. The non-available rooms and bed numbers must be reported as a Non-Available Beds cost center on the provider’s Medicaid cost report.

Each general service cost center must be evaluated separately to determine if the non-available bed area benefits from the service. The nursing facility may charge specific costs to the Non-Available Beds cost center only when the dollar amount is identifiable. Costs that cannot be specifically identified must be apportioned to the non-available beds cost center using the Medicaid cost report allocation methodology. The statistic or measure used for the general services cost center must also be used to allocate costs to the non-available bed cost center.
Example: If square feet are used to allocate costs to the housekeeping activity, the general services cost center, then square feet must also be used to allocate costs to the non-available bed area. The allocation to the non-available bed cost center is zero when the non-available bed area receives no benefit from the general service.

Example: If a wing is designated as non-available and does not receive any housekeeping services, then the allocation to the non-available cost center is zero.

The reduction in available beds is included in the provider’s cost report effective for the fiscal period in which the non-available bed plan is approved by the RARSS. For Medicaid reimbursement determination of tenure and allowable average borrowings, the percentage of the total plant asset costs applicable to available beds must equal the percentage of the facility remaining available for resident nursing care.

9.14 COMPLEX CARE

Medicaid-approved complex care cases provide an enhanced reimbursement rate to the facility due to the cost and/or complexity of nursing care or special needs of the beneficiary. Separate cost records are not required for identifying these costs. The Program has designated the special care revenue amount equal to cost. Providers with an approved complex care case must adjust the annual Medicaid cost report by removing the dollar amount of the total difference between reimbursement at the complex care rate and the established routine Medicaid rate from the appropriate nursing care costs. The approved complex care rate is identified on the Complex Care Prior Approval-Request/Authorization for Nursing Facilities form (MSA-1576) issued to the facility for the specific beneficiary.
SECTION 10 - RATE DETERMINATION

There are six classes of nursing care facilities for which there are specific reimbursement methods. For a definition of the six classes, refer to the Definitions section in this appendix. Providers reimbursed for care using a special reimbursement calculation or method are addressed at the end of this section.

The determination of a nursing facility's class is made by the SSA. If a nursing facility changes ownership or the services it provides such that a change in class is appropriate, the facility will be reimbursed according to the respective facility class to which it has been changed. The effective date of the reimbursement change is the effective date of the SSA's determination. Nursing facility providers other than Class IV are reimbursed under a methodology that pays the lower of the customary charge to the general public or a prospective payment rate determined by Medicaid.

Payment rates described in this section refer to the provider's prospective per resident per diems and are generally set 30 calendar days in advance of the State's fiscal year, which is October 1 through September 30. (Rate determination timing is dependent on legislative approval of the MDHHS budget.)

NOTE: An illustration of the timeline and calculations for per diem rate setting is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

Prospective payment rates are calculated using the facility's cost report ending in the previous calendar year. If this cost report covers a time period that is less than seven months, the cost report used for rate setting is the most recent cost report available prior to the previous calendar year that covers a period of at least seven months.

The reimbursement rate determination process uses a provider's most recent fiscal period audited cost data to calculate the routine nursing care per diem rate. If audited data is not available, an interim prospective rate is calculated using the filed cost report, if the cost report was acceptable and was filed with Medicaid within five months from the end date of the cost reporting period. If an acceptable cost report was not filed within this time frame, Medicaid is not required to set the prospective payment rate in advance of the State's fiscal year. If the nursing facility did not file within the five month time period, or has amended an original cost report subsequent to the five month period, Medicaid will calculate the prospective rate for an effective date for services no later than the beginning of the fourth month (January 1) of the State fiscal year. Nursing facilities that are required to file an amended cost report in order to include home office costs that were not included in the original cost report due to the difference in cost reporting period from the home office are exempt from this provision. The amended cost report, if filed timely following the completion of the home office cost statement, will be considered filed timely if the original cost report had met the five month filing requirement. Refer to the Cost Classification and Cost Finding section of this appendix for home office cost statement and nursing facility amended cost reports.

10.1 RATE DETERMINATION PROCESS

The per diem reimbursement rate for Class I and Class III nursing facility providers is made up of three components: a plant cost component, a variable cost component, and add-ons.

- For Class I facilities, the plant cost component is made up of the Property Tax/Interest Expense/Lease Component plus the Return on Current Asset Value Component.
For Class III facilities, the Plant Cost Component is the lesser of the Facility Per Patient Day Plant Cost or the Facility Plant Cost Limit. The Facility Plant Cost Component is the depreciation, interest and lease expenses calculated on a per patient day basis.

For Class I and Class III facilities, the Variable Cost Component is made up of the facility's Variable Rate Base plus the Economic Inflationary Update.

Class II facilities, being proprietary nursing facilities for individuals with mental illness or intellectual disability, are reimbursed an all-inclusive prospective payment rate negotiated with the MDHHS State Mental Health Agency on an annual basis. Final reimbursement is a retrospective cost settlement, not to exceed a ceiling limit. The provider may be eligible for a reimbursement efficiency allowance in the final rate if total allowable costs do not exceed the prospectively established ceiling limit.

Class IV facilities, being state-owned and -operated institutions, Intermediate Care Facilities for Individuals with Intellectual Disabilities (Developmentally Disabled), and non-profit nursing facilities for individuals with intellectual disabilities, are reimbursed allowable costs determined in accordance with Medicare Principles of Reimbursement and are retrospectively cost settled.

Per diem rates for Class V facilities, Ventilator Dependent Care Units, are set prospectively. Services included in the per diem rate are outlined by contract with Medicaid.

Payment rates for Class VI Hospital Swing Beds are set prospectively as a flat per resident day rate determined by Medicaid.

10.2 RETROACTIVE RATE CHANGES

A retroactive change may be made for facilities that have interim prospective rates based on filed cost reports. A retroactive change may be made for:

- audit adjustments to a filed cost report that was used for setting an interim rate.
- facilities that were approved for Plant Cost Certification due to capital cost changes, an approved non-available bed plan, or a plant rate affected by a DEFRA rate limitation for the cost report time period.
- audit adjustments that are required as a result of an appeal.
- audit adjustments that are required as a result of fraud or facility failure to disclose required financial information.
- Class I nursing facilities approved for Rate Relief for the rate year period.

The Plant Cost Component of a rate for the nursing facility that experiences a change of ownership will be retroactively adjusted under the Plant Cost Certification process. The DEFRA Reimbursement Limit application will continue to apply to each rate year until a fiscal year retrospective rate change results in zero DEFRA limit. The nursing facility Plant Cost Component will be calculated on a prospective basis for the year following the zero DEFRA limit rate year.
10.3 PLANT COST COMPONENT CLASS I NURSING FACILITIES

The prospectively established Plant Cost Component for each Class I nursing facility provider is the sum of the facility Net Property Tax/Interest Expense/Lease Component and Return on Current Asset Value Component. The Plant Cost Component is expressed as a per patient day amount.

10.3.A. NET PROPERTY TAX/INTEREST EXPENSE/LEASE COMPONENT PER PATIENT DAY

The Net Property Tax/Interest Expense/Lease Component per patient day is calculated under the following formula:

\[
\text{Net Property Tax/Interest Expense/Lease Plant Cost} = \text{Property Tax/Interest Expense/Lease Plant Cost} - \text{CAV Excess Borrowings Limit} + \text{DEFRA Reimbursement Limit (not to exceed zero)}
\]

\[
\text{Net Property Tax/Interest Expense/Lease Plant Cost Per Patient Day} = \frac{\text{Net Property Tax/Interest Expense/Lease Plant Cost} + \text{Nursing Facility Resident Days}}{\text{Nursing Facility Resident Days}}
\]

10.3.A.1. PROPERTY TAX/INTEREST EXPENSE/LEASE PLANT COSTS

These plant costs consist of allowable costs for real estate and personal property taxes, interest expense, and lease expense defined under the Allowable and Non-Allowable Cost section and the Cost Classification section of this appendix. The aggregate dollar amount for these plant costs is obtained from the nursing facility cost report. The time period of the cost report will correspond with the cost basis period identified for the respective State rate year.

10.3.A.2. CAV EXCESS BORROWINGS LIMIT

The CAV excess borrowings limit is unreimbursable interest due to excess borrowings. An example of the calculation is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

The dollar amount of allowable interest expense included in the reimbursable plant cost will be reduced if the nursing facility loan balance applicable to the nursing care unit exceeds the facility reimbursement limit. The nursing facility's average allowable borrowing balance cannot exceed the lesser of the "Nursing Facility Current Asset Value" or the "Nursing Facility Capital Asset Value Limit." If the nursing facility borrowing balance exceeds the limit, a reduction is made to the allowable plant cost for the portion of the excess borrowing. The amount of the reduction is based on the ratio of the limit amount to the average borrowings balance times the dollar amount of allowable interest expense. The following formula is applied to calculate the reduction:
A nursing facility that has undergone a change of ownership and is incurring interest costs relating to the acquisition financing will be subject to a DEFRA Reimbursement Limit disallowance. The DEFRA Reimbursement Limit calculation will determine if the nursing facility acquisition and financing costs exceed the Medicaid allowable reimbursement increase limit. Reductions to the facility total borrowing balance are made to avoid including the borrowings balance in the reimbursable interest, and to avoid including the total allowable interest expense amount in both the DEFRA limit and the CAV excess borrowing limit.

If the nursing facility has a DEFRA Reimbursement Limit due to the nursing facility acquisition, the nursing facility's total average borrowing balance used in the calculation for CAV excess borrowings limit will be reduced by a calculated dollar amount of borrowings corresponding with the DEFRA Reimbursement Limit. The borrowing amount corresponding with the DEFRA Reimbursement Limit is calculated under the following formula:

\[
\text{Reduction to NF Average Borrowing Balance} = \frac{\text{Dollar Amount of DEFRA Reimbursement Limit}}{\text{Nursing Facility Total Allowable Interest Expense}} \times \text{Nursing Facility Total Borrowing Balance}
\]

### 10.3.A.3. DEFRA Reimbursement Limit

Increases in reimbursement for tenure and interest expense subsequent to a sale or resale (after July 18, 1984) are limited under provisions of the Deficit Reduction Act (DEFRA) of 1984 as defined in federal Medicaid law. The Medicaid application of DEFRA provisions is a limit on the dollar amount of plant cost component reimbursement increase to the provider due to the nursing facility change of ownership. An established formula calculation is used to determine the new ownership's eligible increase reimbursement for tenure and interest (DEFRA Application Limit). If the new ownership tenure and interest increase before application of the DEFRA Reimbursement Limit does not exceed the DEFRA Application Limit, the DEFRA Reimbursement Limit is not applicable. If the new ownership tenure and interest increase before application of the DEFRA Reimbursement Limit exceeds the DEFRA Application Limit allowable increase, the DEFRA Reimbursement Limit reduction will be made to the allowable plant costs.
The calculation is made as follows:

\[
\text{DEFRA Application Limit} - \left( \text{Increase in tenure and interest for new ownership prior to DEFRA Limit} \right) = \text{DEFRA Reimbursement Limit (not applicable if greater than zero)}
\]

DEFRA Application Limit is determined as:

\[
\text{Allowable historical capital asset cost to the asset original owner (excluding land) for assets in the NF at the time of sale} \times 3.33\% + \text{Allowable land value to the seller} + \text{Historical capital asset cost of the asset's original owner for assets in the nursing facility at the time of sale} - \text{Purchaser down payment} \times \text{Purchase Mortgage interest rate} - \text{Allowable interest expense of the seller for the rate period prior to the sale} = \text{DEFRA Application Limit}
\]

For purposes of the DEFRA Reimbursement Limit calculation, allowable acquisition cost is the cost to the original owner of the asset. An example of this calculation is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

Increase in tenure and interest for the new ownership prior to DEFRA Limit is determined as:

\[
\text{Purchaser tenure and allowable interest after acquisition} - \text{Seller tenure and allowable interest in the Medicaid rate prior to the sale} = \text{Increase in tenure and interest for new ownership prior to DEFRA Limit}
\]

The calculation formula is defined for application when using annualized cost data (reflective of 12-month time period). Tenure refers to the purchaser's initial ownership year. Allowable interest refers to interest associated with a facility acquisition. If all of the data elements needed in the calculation do not include data for a 12-month period,
the data elements must be adjusted to reflect a time period of equal duration to the cost report base period used in determining the "purchaser tenure and allowable interest after the sale."

The DEFRA Reimbursement Limit continues to apply to the new ownership annual Property Tax/Interest Expense/Lease Component rate using the Plant Cost Certification reimbursement settlement procedure until the limit amount is zero.

10.3.B. RETURN ON CURRENT ASSET VALUE (CAV) COMPONENT

The Return on Current Asset Value Component is a per resident day amount representing a use allowance on facility assets. The return amount is determined by multiplying the "tenure factor" times a CAV calculated for the nursing facility. A nursing facility’s CAV is determined by a formula using historical costs of the nursing facility’s capital assets, as identified in the Allowable and Non-Allowable Costs section in this appendix, times the difference between an asset value update factor and an obsolescence factor. Assets purchased prior to 1960 are treated as assets brought into service in 1960. A nursing facility’s CAV for rate reimbursement calculation cannot exceed the "current asset value upper limit" and will not be less than the "current asset value floor."

The calculation for the return on current asset value component is:

\[
\text{Lesser of NF CAV or NF CAV Limit} \times \text{Tenure Factor} = \text{Total NF Return on CAV}
\]

\[
\frac{\text{Total NF Return on CAV}}{\text{NF Resident Days}} = \text{Return on CAV Component Per Resident Days}
\]

10.3.B.1. ASSET VALUE UPDATE FACTOR

The asset value update factor used to calculate CAV depends on the type of capital asset. Land improvements, buildings, building improvements, and fixed building equipment are updated using a construction cost index for steel frame buildings in the central United States from the fiscal year the asset was brought into service until the most recent period for which cost report data is available for the respective rate year calculation. The asset value update factor is not applied to land and other assets not specifically listed above.

10.3.B.2. ASSET VALUE OBSOLESCENCE FACTOR

The obsolescence factor is applied based on the classification category of the capital asset. Land has an obsolescence factor of zero. Land improvements, buildings, building improvements, and fixed building equipment have an obsolescence factor of .03 for each year the asset has been in service. Movable equipment and other capital assets have an obsolescence factor of .10 for each year the asset has been in service up to a maximum of 10 years. The number of years that the asset has been in service is determined by
subtracting the year the asset was put into service from the most recent fiscal year for which data is available under the standard rate setting timeframe.

10.3.B.3. CURRENT ASSET VALUE FORMULA

A nursing facility's CAV is determined by a formula using historical costs of capital assets. The current asset value for each asset is the historical cost of that asset times the difference between its Asset Value Update Factor and its Asset Value Obsolescence Factor. Assets purchased prior to 1960 are recorded as assets brought into service in 1960. Current asset values are updated annually based on the most recent audited or reviewed cost report. A nursing facility's current asset value is the sum of current asset values for the various asset types.

Example: Building assets with historical cost of $100,000 in service for 10 years through the cost report year used in the rate calculation; the update factor for the 10 years is 1.50; the obsolescence factor is .30 (10 years times .03); the amount included in the CAV compilation for the nursing facility for these assets is $120,000 ($100,000 times (1.50 minus .30)).

If the nursing facility Plant Cost Component is calculated based on Plant Cost Certification data, the new capital assets acquired in the current cost report year and the immediate prior cost report year will be included in the nursing facility historical asset costs for compiling the CAV. The update factor for these assets will be 1.0, and the obsolescence factor will be zero.

10.3.B.4. NURSING FACILITY CURRENT ASSET VALUE

The current asset value calculation process determines the CAV for the entire nursing facility since capital assets are used for all types of service delivery in that facility. Only the portion of the nursing facility assets having a use related to routine nursing resident care are included for reimbursement under the return on current asset value component. The reference to Nursing Facility CAV is defined as the nursing unit portion of the nursing facility's total current asset value applicable to routine nursing care. The apportionment, expressed as a percentage, of a total facility that is applicable to the routine nursing care unit is determined by means of the facility's annual cost report. The SMA cost reporting process apportions the nursing facility asset costs into the appropriate cost centers for reimbursement purposes.

The Nursing Facility CAV is calculated as:

\[
\text{Total CAV for the NF} \times \frac{\text{Percentage representing the nursing unit apportionment}}{\text{NF CAV}}
\]
10.3.B.5. CLASS I NURSING FACILITY CURRENT ASSET VALUE LIMIT PER BED

The current asset value upper limit is a maximum per bed dollar amount that will be used for calculating the individual Nursing Facility CAV. The per bed value of the upper limit is based on the historical costs of construction and other asset acquisition costs for nursing facilities opened on or after January 1, 1975. The historical costs are updated through 1983 using the U.S. Department of Commerce Composite Construction Index, and annual updates after 1983 are made using a construction cost index for steel frame buildings. The update index does not apply an obsolescence factor. The current asset value limit is the sum of the updated historical costs for the facilities included in this calculation divided by the total number of beds in those facilities. The current asset value limit is recalculated annually to include construction costs of new facilities reported on the most recent calendar year filed cost report and the construction index update. The per bed upper limit is effective for the time period corresponding to the State rate year.

The current asset value floor is 30 percent of the current asset value upper limit.

Class I nursing facility current asset value limits per bed for each rate year are available on the MDHHS website. Refer to the Directory Appendix for website information.

10.3.B.6. NURSING FACILITY CURRENT ASSET VALUE LIMIT

A current asset value limit is determined by the individual nursing facility and is dependent on the number of beds in the Medicaid nursing unit for the time period corresponding with the respective rate effective date. The current asset value upper limit is a maximum dollar amount for the individual Nursing Facility CAV that will be used for calculating the return on current asset value. The Nursing Facility CAV Limit is the number of available beds in the nursing unit times the Class Current Asset Value Limit Per Bed.

The current asset value floor limit is a minimum dollar amount for CAV that will be used for calculating the return on current asset value for that nursing facility. The individual Nursing Facility CAV floor is the Nursing Facility CAV Limit times 30 percent.

10.3.B.7. TENURE FACTOR

The tenure factor is dependent on the nursing facility provider's number of full years of continued licensure as of the beginning of the Medicaid rate year, i.e., months of continuous licensure divided by 12 and ignoring fractions.

Continued licensure is based on the number of full years that have elapsed from the effective date of a nursing facility provider's license (issued by the SSA) to the beginning of the Medicaid rate year. For example, a provider that has been licensed for 42 continuous months has, for purposes of the tenure factor, been licensed for three full years. The provider's years of ownership are translated into a tenure rate, and applicable rates are identified in the following table.
The rate of return on current asset value is expressed as an annual return rate. Qualification for the total return rate requires that the time period included in the nursing facility cost report used as the basis for the facility plant cost rate include twelve calendar months. In cases where the nursing facility cost report does not include twelve calendar months, the following formula is used to calculate the return rate:

\[
\frac{\text{Number of calendar days in the cost report period}}{365} \times \text{Rate of return on CAV (for the respective years of ownership)} = \text{Return Rate}
\]

**Example:** A nursing facility has seven years of ownership and the cost report period used for plant costs in the rate calculation is for a nine-month time period (275 days). The adjusted return rate is .030 (275/365 times .0400).

If a nursing facility is sold or totally replaced (regardless of facility ownership), years of ownership return to zero. If a facility is remodeled or expanded and facility ownership remains unchanged, the years of ownership remain continuous.

When licensure has changed but there has been no effective change in operator/provider, and there has been no transaction that would affect Medicaid reimbursement other than the tenure factor, the provider may request that Medicaid recognize the continuous tenure such that the licensure tenure schedule would not revert to zero years at the time of the licensure change. The provider’s written request must be submitted at the time licensure is changed.
Exception: Where licensure does not change after a sale of nursing facility assets, the nursing facility provider (new owner) must choose either to retain the original licensure tenure schedule and forego increased reimbursement for interest expense, or to receive increased reimbursement for interest expense, subject to the DEFRA Reimbursement Limit, and allow the licensure tenure schedule to revert to zero years and a tenure factor of .0250. Should the provider elect to retain the previous licensure tenure schedule, Medicaid will not recognize, for allowable cost and per diem rate determination purposes, any interest expense beyond the schedule of borrowings, principal amortization, and interest expenses that would have been incurred were the former owner's loans maintained or assumed by the new owner. This provision applies to all property transactions between lessors, lessees, and/or operators.

10.4 PLANT COST COMPONENT CLASS III NURSING FACILITIES

The prospectively established plant cost component for each county medical care facility provider and hospital long term care unit provider is the lesser of the allowable per resident day facility plant cost or the per resident day facility plant cost limit. Proprietary providers are permitted to retain, as part of the plant cost component, up to $.50 of the difference between allowable per resident day plant costs and the per resident day plant costs in effect on March 31, 1985 ($5.66 per resident day).

10.4.A. FACILITY PLANT COST PER RESIDENT DAY

The allowable per resident day plant cost is the sum of depreciation expense, interest expense, property taxes, and allowable lease costs divided by total resident days as determined from the provider's cost report. A facility with a change in facility asset costs may qualify for plant cost limit updates.

10.4.B. FACILITY PLANT COST LIMIT PER RESIDENT DAY [CHANGE MADE 7/1/18]

The individual provider facility Plant Cost Limit is dependent upon when facility beds were constructed and brought into service for Medicaid residents. Nursing facilities existing prior to July 1, 1978 were initially assigned the facility Class Plant Cost Limit for new construction as of that date. A nursing facility constructed after that date is initially assigned the facility Class Plant Cost Limit effective in the year facility beds are constructed and brought into service for Medicaid.

A facility's Plant Cost Limit, expressed as per resident day, is the sum of the per resident day component limits for depreciation expense, interest expense, financing fees and property taxes. The individual nursing facility Plant Cost Limit is updated for a nursing facility that undergoes a significant change in facility asset costs. The nursing facility must complete the Plant Cost Certification process to qualify for consideration of the update to the individual facility Plant Cost Limit. The provider must meet the qualifying provisions for Plant Cost Certification eligibility, other than non-available bed designation or returning non-available beds to service, to be eligible for a revised plant cost limit. The non-available bed plan designation criteria does not qualify the nursing facility for an update to the facility plant cost limit. An existing provider with a change of facility class, major addition, renovation or new construction may be eligible for a Plant Cost Limit update to reflect the change in facility asset costs. An existing facility that chooses to become a Medicaid-participating provider may also qualify for an updated plant cost limit.
The updated plant cost limit is applicable to a nursing facility dependent upon the facility's capital asset project. A nursing facility that is a total new construction, a facility that incurs major capital asset renovation and/or addition, a facility newly participating in the Medicaid program, or a facility that experiences a change in facility class are eligible for updated depreciation, interest, finance fees and property tax components for the facility Plant Cost Limit. The update in the limit is based on a compilation of the facility limit prior to the capital asset change and the Class Plant Cost Limit.

The individual facility updated Plant Cost Limit effective with the completion of the capital asset project is a weighted average of the historic individual facility Plant Cost Limit for the portion of the facility prior to the new construction, addition or renovation project and the current Class Plant Cost Limit applicable to the new capital asset project. The weighting factors used are the respective ratios of the allowable historic asset costs of the facility prior to the new construction addition or renovation project, and the allowable asset costs of the new capital asset project, to the combined allowable old and new asset costs of the nursing facility after completion of the capital asset project. (revised 7/1/18)

The current Class Plant Cost Limit used in the weighted calculation applicable to the new capital cost portion will be the class limit in effect for the year corresponding to the new asset acquisitions being placed into service.

Nursing facility providers that incur a capital asset change resulting from a facility sale of assets will use, as a plant cost basis, only those allowable costs identified in the Allowable and Non-Allowable Costs section in this appendix. The individual nursing facility updated Plant Cost Limit after the sale is only eligible for an update for the interest expense component limit to reflect changes in interest rates.

10.4.C. FACILITY CLASS PLANT COST LIMIT PER RESIDENT DAY

The Class Plant Cost Limit is the maximum reimbursement rate, expressed as per resident day amount, for a nursing facility's new construction. The Class Plant Cost Limit is applicable to new construction nursing facilities dependent upon when facility beds were constructed and brought into service for Medicaid residents. The Class Plant Cost Limit is the sum of the per resident day component limits for depreciation expense, interest expense, financing fees and property taxes. The Class Plant Cost Limit components are updated annually to reflect changes in industry construction cost, interest rates and corresponding effect on financing fees and real estate taxes due to changes in capital costs. The new construction limit is used in determining the individual nursing facility limit in cases where the nursing facility is an entire new construction or an existing nursing facility has completed a significant capital improvement.

The per resident day Class Plant Cost Limit is the amount that would be paid for a recently constructed and prudently financed facility. Calculation of the plant cost limit is based on a survey of nursing facilities constructed between January 1, 1975 and December 31, 1977, and initially updated to June 30, 1978. The original Class Plant Cost limit individual components are updated annually using published economic indicators identified in the subsections addressing the specific component of the limit. The Class Plant Cost Limit annual updates are available on the MDHHS website. (Refer to the Directory Appendix for website information.)
10.4.C.1. FACILITY CLASS PLANT COST LIMIT DEPRECIATION EXPENSE COMPONENT

The value for the depreciation expense component is a sum based on the mean of the surveyed values of depreciable assets (referenced above) and the mean depreciation rate for assets of similar type using straight-line depreciation with useful lives determined in accordance with Medicare Principles of Reimbursement. The per resident day depreciation expense component is updated each calendar quarter to reflect the change in costs of construction and changes in standards and regulations which have a direct impact on plant costs. The depreciation component is updated using the economic index release as published under U.S. Department of Commerce, Bureau of Economic Analysis, National Income and Product Accounts Tables for Nonresidential Structures.

10.4.C.2. FACILITY CLASS PLANT COST LIMIT INTEREST EXPENSE COMPONENT

The value for interest expense is based on the surveyed mean of interest rates paid (referenced above) and the mean asset values for facilities constructed during the initial three-year survey time period. The per resident day interest component is updated annually based on the changes in interest rates. The interest rate data used to calculate the interest component limit is updated by applying an index of change in interest rates for home mortgage loans (reflected in conventional new home mortgage rates, as published by the Federal Housing Finance Board for Newly Built Homes) to the interest rate used to calculate the original interest component limit.

A nursing facility that undergoes a change of ownership is eligible for an update to the individual facility Plant Cost Limit. The update will only include an adjustment to the interest component of the individual facility Plant Cost Limit in effect prior to the sale. The adjustment will be made to the interest component of that prior limit to reflect the change in the interest rate index between the time period reflected in the prior limit calculation and the date of the facility sale.

10.4.C.3. FACILITY CLASS PLANT COST LIMIT FINANCING FEES COMPONENT

The value for financing fees is based on the mean of financing fees of the surveyed construction (referenced above). The per resident day financing fees component limit is updated using the same update factor used for the depreciation expense component limit update. The update factor is applied to the original financing fees component limit.

10.4.C.4. FACILITY CLASS PLANT COST LIMIT TAX EXPENSE COMPONENT

The value for property taxes is based on the mean of property taxes of the surveyed taxable properties (referenced above). The per resident day property tax component limit is updated using the same update factor used for the depreciation expense component limit update. The update factor is applied to the original property tax component limit.
10.5 VARIABLE COST COMPONENT (VCC) – CLASS I AND CLASS III FACILITIES [CHANGE MADE 4/1/18]

The variable cost component of the nursing facility per resident day rate reflects the Medicaid determination for reimbursement for the nursing facility base and support costs incurred for routine nursing care. Base and support cost classifications are discussed in detail in the Cost Classifications and Cost Finding subsection of this appendix. The calculation of the component uses nursing facility historical costs and economic index application to adjust cost levels to coincide with the State rate year time periods. The support costs and total variable (base plus support) costs are separately subjected to rate ceiling reimbursement limits dependent on individual facility bed size and facility class.

For Class I and Class III nursing facility rate setting periods beginning on or after October 1, 2003, (revised 4/1/18) the Variable Cost Component is a per resident day rate and is equal to the lesser of the facility’s Variable Rate Base (VRB) or the Class Variable Cost Limit (VCL), plus the Economic Inflationary Update (EIU).

\[ VCC = \text{(lesser of VRB or Class VCL)} + EIU \]

10.5.A. VARIABLE RATE BASE (VRB)

The facility Variable Rate Base is the sum of the facility's indexed base cost component and the facility's indexed support cost component. For rate setting purposes, the per resident day amount used for the provider's Variable Rate Base is the lesser of the calculated Variable Rate Base or the Class Variable Cost Limit.

\[ VRB = \text{Base Cost Component} + \text{Support Cost Component} \]

10.5.A.1. BASE COST COMPONENT (BCC)

A facility's BCC is the facility per patient day allowable base costs indexed to October 1 of the year that is one year prior to the rate year being calculated.

\[ BCC = \frac{\text{base costs}}{\text{total number of resident days}} \times \text{Cost Index} \]

- Facility's base cost per day - the facility base costs divided by the total number of resident days for the cost reporting period.

10.5.A.2. SUPPORT COST COMPONENT (SCC)

A facility's support cost component is the facility's BCC multiplied by the lesser of the facility's support-to-base ratio or the support-to-base ratio limit for that nursing facility bed-size group.

\[ SCC = BCC \times \text{applicable S/B ratio (Facility or Bed-Size Group Limit)} \]

- Facility's support cost per day - the facility support costs divided by the total number of resident days for the cost reporting period.

- Facility Support-to-Base Ratio (S/B-Facility) - the nursing facility's allowable support costs divided by the allowable base costs for the cost reporting period. The individual provider's S/B ratio for rate calculation is limited to the Support-to-Base Ratio Bed Size Group Limit for the provider's bed-size group. The individual nursing facility bed-size
group classification is based on the number of nursing home licensed beds, Home for the Aged beds, or any other type of licensed beds where nursing care is provided. The provider's S/B ratio is rebased annually from the most recent audited cost period, regardless of ownership.

- Support-to-Base Ratio – Bed Size Group Limit (S/B-Group) – the 80th percentile of the support-to-base ratios for nursing facilities in the same bed-size group for a cost reporting year. The bed-size groups are defined as 0-50, 51-100, 101-150, and 151+ nursing care beds in the nursing facility. The nursing facility bed-size group classification is based on the number of nursing home licensed beds, Home for the Aged beds, or any other type of licensed beds where nursing care is provided. The 80th percentile is determined by rank ordering the provider nursing facilities within the same bed-size group from the lowest to highest S/B ratio, then accumulating nursing facility Medicaid resident days of the rank ordered providers, beginning with the lowest, until 80 percent of the total Medicaid resident days for this group of providers is reached. The S/B ratio limit for the bed-size group equals the support-to-base ratio of the nursing facility in which the 80th percentile of accumulated Medicaid days occurs.

10.5.B. COST INDEX (CI)

A facility cost index is the Global Insight's Skilled Nursing Facility Market Basket Without Capital Index, which is published quarterly in the Global Insight DRI-WEFA Health Care Cost Review. The cost index will be used to index reported costs from the end of the facility's cost report period to October 1 of the year that is one year prior to the rate year being calculated.

Example: Cost report data used to set reimbursement rates for the October 1, 2017 to September 30, 2018 rate year will be indexed to October 1, 2016.

10.5.C. CLASS AVERAGE VARIABLE COSTS (AVC)

The Class Average Variable Cost is defined as the total indexed variable costs for all facilities in the Class divided by the total resident days for all facilities in the class for a cost reporting year. An AVC is calculated for Class I and Class III nursing facilities. The Class AVC is used for rate calculations for nursing facilities that meet the qualifying criteria as a new provider for Medicaid participation and determining provider eligibility for Class I nursing facility rate relief.

\[
AVC = \frac{\text{total Indexed Variable Costs for all NF's in the class}}{\text{total resident days for all NF's in the class}}
\]

- Facility's Variable Costs (VC) - the total allowable base and support costs for a facility to provide routine nursing care services to residents, as determined in accordance with Medicaid allowable costs and reporting requirements.
- Indexed Variable Costs (IVC) – the facility's total VC indexed to October 1 of the year that is one year prior to the rate year being calculated.

Example: The AVC for October 1, 2017, which is used for the rate year October 1, 2017 to September 30, 2018, is based on variable costs reported in cost reports ending in calendar year 2016 indexed to October 1, 2016.
10.5.D. CLASS VARIABLE COST LIMIT (VCL)

The Variable Cost Limit for a class of nursing facilities is set at the 80th percentile of the Indexed Variable Costs (IVC) per resident day for facilities in the class during the current calendar year. The 80th percentile is determined by rank ordering providers from the lowest to the highest IVC per resident day, then accumulating nursing facility Medicaid resident days of the rank ordered providers, beginning with the lowest, until 80 percent of the total Medicaid resident days for the facility class of providers is reached. The VCL for the class of providers equals the IVC per resident day of the nursing facility in which the 80th percentile of accumulated Medicaid resident days occurs. A VCL is calculated for Class I and Class III nursing facilities.

- Facility’s Variable Cost per resident day (VC/pd) - the facility VC divided by the total number of resident days for the cost reporting period.
- Indexed Variable Costs Per Resident Day (IVC/pd) – the facility's VC/pd indexed to October 1 of the year that is one year prior to the rate year being calculated.

Example: The VCL for October 1, 2017, which is used for the rate year October 1, 2017 to September 30, 2018, is based on variable costs per resident day reported in cost reports ending in calendar year 2016 indexed to October 1, 2016.

10.5.D.1. CLASS I NURSING FACILITY VCL EXCEPTION - NEW PROVIDER RATE RELIEF

A Class I nursing facility that qualifies for rate relief as a new provider, as defined for rate relief, in a Medicaid enrolled nursing facility with a VRB less than or equal to 80 percent of the class AVC will have an exception VCL in the rebasing rate year. The rate Variable Cost Component for the initial rate year of accelerated rebasing is limited to the Class I Average of Variable Costs. Refer to the Rate Relief for Class I Nursing Facilities subsection in this appendix for additional information.

10.5.D.2. CLASS III NURSING FACILITY VCL EXCEPTION – NEW HOSPITAL LONG TERM CARE UNITS AFTER JULY 1, 1990

Class III nursing facilities that are new long term care units of a hospital, and have a Certificate of Need (CON) approval from the Michigan Department of Health and Human Services (MDHHS) [formerly Michigan Department of Community Health (MDCH) and Michigan Department of Public Health] dated on or after July 1, 1990, are reimbursed according to the method for Class III facilities except that the facility Variable Cost Component is determined as the lesser of the facility Variable Rate Base or the Class I Variable Cost Limit (VCL).

10.5.E. ECONOMIC INFLATIONARY UPDATE (EIU)

The economic inflationary update for a facility is the Economic Inflation Rate (EIR) for the class applied to the lesser of the Variable Rate Base or the Class Variable Cost Limit.

\[ EIU = EIR \times (\text{lesser of VRB or Class VCL}) \]
10.6 CLASS V NURSING FACILITIES - VENTILATOR DEPENDENT CARE (VDC) UNITS [CHANGE MADE 7/1/18]

The reimbursement rate for special nursing facilities caring for ventilator-dependent residents (Class V) is set prospectively by Medicaid as an individual nursing unit rate per resident day and is based on actual occupancy.

Reimbursement is made for prior authorized ventilator-dependent services/care for residents who have been transferred to a Medicaid contracted facility. The prospective rate covers all ventilator care requirements of the residents, including all the costs of benefits associated with Medicare Parts A and B while the resident resides in the special nursing facility. This includes, but is not limited to, all routine, ancillary, physician, and other services.

Factors used in the determination of the per diem rate include audited costs of facilities providing similar services, the inflationary factor for the effective period of the prospective rate, the supply response of providers, and the number of residents for whom beds are needed. The prospective rate does not exceed 85 percent, nor fall below 15 percent, of an estimated average inpatient hospital rate for currently placed acute care Medicaid residents who are ventilator-dependent. The prospective rate is periodically re-evaluated to ensure reasonableness of supply and demand for special care. A new VDC nursing unit that has not previously participated in Medicaid for VDC services will have a reimbursement rate in the initial two years (24 months) of Medicaid operations based upon the statewide average VDC unit reimbursement rate for the current year. The reimbursement rate period beginning on the October 1 after the initial two years of Medicaid operations will utilize the most recent Medicaid cost report ending in the prior calendar year. (revised 7/1/18)

10.7 NURSING FACILITY QUALITY ASSURANCE ASSESSMENT PROGRAM (QAAP)

The Quality Assurance Assessment Program (QAAP) was implemented by Medicaid in compliance with Michigan law. The QAAP provides a Quality Assurance Supplement to nursing facility reimbursement rates incorporating funds from the quality assurance assessment tax. When a provider sells a nursing facility, the provider is responsible for all QAAP assessments billed and incurred prior to the date of the sale. The purchaser(s) must assure escrow of any outstanding QAAP amounts owed, or the purchaser(s) becomes responsible for payment of the QAAP and penalty amounts owed before Medicaid participation is granted. If the provider quits the business, the provider is responsible for all QAAP assessments billed and prorated as of the date MDHHS determines the facility closed. The QAAP applies to Class I, Class III and Class V nursing facilities.

10.7.A. CLASS I AND CLASS III NURSING FACILITIES

The nursing facility will receive a Quality Assurance Supplement (QAS) payment as a monthly gross adjustment. The monthly gross adjustment for an individual nursing facility will be determined based on one-twelfth of the facility's annual historical Medicaid utilization (resident days) multiplied by the facility's QAS per resident day. The facility's historical Medicaid utilization will include all routine nursing care and therapeutic leave days billed to Medicaid by the facility. A nursing facility that is experiencing a significant increase or decrease in its Medicaid utilization for the current rate year resulting in a
difference of greater than five percent in the nursing facility's total QAS payments for the year must contact the SMA for consideration of adjustment to the facility's monthly QAS payment. Current year Medicaid resident census data must be provided to MDHHS to document the change in order to revise the monthly QAS payment amounts. It is the desired intent of MDHHS to assure accuracy of total QAS monthly payments and to approximate the annual reimbursement due the facility. MDHHS reserves the right to adjust the individual nursing facility monthly QAS payment to reflect the current year Medicaid activity to achieve this goal.

A facility's QAS is equal to the lesser of the facility's Variable Rate Base or Class Variable Cost Limit times the Quality Assurance Assessment Factor (QAAF) determined by MDHHS, except for Class III publicly owned facilities, in which the QAAF is multiplied by the lesser of the facility's Variable Cost Component or the Class I Variable Cost Limit. A provider's QAS will be reconciled at the end of the fiscal year to accommodate the actual Medicaid utilization, changes to the variable rate from filed to audited cost report data, and to adjust the increase initially estimated to accommodate the fixed pool of funds established by the QAAP and any legislative offsets to that pool.

The QAAF is determined based on the estimated pool of funds created by the quality assurance assessment tax as well as the projected number of Medicaid nursing facility days for the fiscal year. In aggregate, the quality assurance assessment fee may not exceed 6 percent of total industry revenue for the fiscal year.

QAS payments to Class I, III and V providers will be reduced by the amount of restricted funding revenue written off during the current fiscal year. This reduction will be allocated across Class I, III and V providers participating in the QAAP program that receive QAS payments. QAS payments will be reduced by both the state and federal share of the uncollected restricted revenue. Any restricted revenue that is subsequently collected after being included in a QAS reduction will be restored to providers. The QAS reduction will be equal to the total QAAP shortage divided by the total number of Medicaid days used in the QAS payment calculation multiplied by the number of Medicaid days in each facility.

It is the intent of MDHHS that nursing facilities that provide hospice care for residents by contracting with a hospice provider also benefit from this quality program. Medicaid will reimburse hospice providers 100 percent of a nursing facility's Quality Assurance Supplement (QAS) rate add-on for Medicaid beneficiaries provided hospice care in Medicaid participating nursing facilities. It is the responsibility of the hospice provider to pay the room and board rate to the nursing facility as specified in their contract for services.

10.7.B. CLASS V NURSING FACILITIES - VENTILATOR DEPENDENT CARE (VDC) UNITS

Qualifying VDC units will receive a QAAP payment as a monthly gross adjustment. The monthly gross adjustment for an individual unit will be determined based on one-twelfth of the VDC unit's annual historical Medicaid utilization (resident days) multiplied by the unit's Quality Assurance Supplement (QAS) per resident day basis. The unit's Medicaid utilization will include all days billed to Medicaid by the VDC unit. A nursing unit that is experiencing a significant increase or decrease in its current rate year Medicaid utilization...
which will cause a difference of greater than five percent in the nursing unit's total QAS payments for the year must contact MDHHS for consideration of adjustment to the unit's monthly QAS payment. Current year Medicaid resident census data must be provided to the SMA to document the change in order to make revision to the monthly QAS payment amounts. It is the desired intent of MDHHS to assure accuracy of total QAS monthly payments to approximate the annual reimbursement due the VDC unit. MDHHS reserves the right to adjust the individual VDC unit monthly QAS payment to reflect the current year Medicaid activity to achieve this goal.

The VDC unit QAS is equal to the Class I Variable Cost Limit times the Quality Assurance Assessment Factor (QAAF) determined by MDHHS. A provider's QAS will be reconciled at the end of the fiscal year to accommodate the actual Medicaid utilization and to adjust the total increase initially estimated to accommodate the fixed pool of funds established by the QAAP and any legislative offsets to that pool.

The QAAF is determined based on the estimated pool of funds created by collection of the quality assurance assessment tax and the projected number of Medicaid nursing facility days for the fiscal year. In aggregate, the quality assurance assessment tax may not exceed six (6) percent of total industry revenue for the fiscal year.

10.7.C. ANNUAL RECONCILIATION

The reconciliation of approved Medicaid days, changes to the variable rate from filed to audited cost report data, and QAS payments is completed on an annual basis within 90 calendar days after the end of the State's fiscal year.

The Reimbursement and Rate Setting Section (RARSS) will reconcile the QAS payments to the provider against the provider's approved Medicaid days and filed and audited cost report data. If RARSS determines that an underpayment has been made, the provider will receive a gross adjustment payment. If RARSS determines that an overpayment has been made, recovery will be made by gross adjustment recovery against future payments. The gross adjustment process follows the Initial Settlement and Final Settlement practices described in the Cost Report Reimbursement Settlements section of this chapter. A provider may submit a written request to RARSS for an extended repayment schedule to repay the Program. The request must include a written justification of the need for extended payment.

The provider will be given advance notice of the actions taken on QAS payments and has 30 calendar days from the date of the advance notice to request a review of the determination with RARSS. The provider's request for a review must cite specific concerns with the determination.

10.8 CLASS II NURSING FACILITIES – PROPRIETARY NURSING FACILITY FOR INDIVIDUALS WITH MENTAL ILLNESS OR INTELLECTUAL DISABILITIES

The Class II proprietary nursing facilities for individuals with mental illness or intellectual disabilities are reimbursed an all-inclusive prospective payment rate negotiated with the MDHHS State Mental Health Agency on an annual basis. Rate ceiling limits are prospectively set for allowable costs and resident occupancy for determining final reimbursement for the annual services. Final reimbursement is
retrospective cost settlement, not to exceed the ceiling limit. Nursing facility allowable costs included for reimbursement are determined in accordance with Medicaid cost reporting requirements and allowable and non-allowable cost policies, including plant cost based on allowable depreciation expense. The provider is paid a reimbursement efficiency allowance equal to the lesser of $2.50 per resident day or the difference between the prospective ceiling limit and the nursing facility actual allowable cost.

10.9 CLASS IV NURSING FACILITIES - INSTITUTIONS FOR INDIVIDUALS WITH DEVELOPMENTAL DISABILITIES

State-owned and -operated institutions, Intermediate Care Facilities for Individuals with Intellectual Disabilities (ICF/IID), and non-profit nursing facilities for individuals with intellectual disabilities are retrospectively cost settled.

The State Mental Health Agency must submit rate information regarding the facility's expected costs for the prospective year in an Interim Rate Request letter to Medicaid at the beginning of the Medicaid rate year. Subsequent requests may be submitted during the rate year if rate adjustments are necessary. The reimbursement rate for the new Medicaid rate year will not be updated until the State Mental Health Agency submits the Interim Rate Request letter.

The provider is reimbursed an interim per diem rate based on the cost information submitted. The interim reimbursement is adjusted to actual allowable costs through annual cost settlement. Refer to the Cost Reporting and the Rate Setting sections of this appendix for additional information.

10.10 CLASS VI NURSING FACILITIES - HOSPITAL SWING BEDS

The reimbursement rate for hospital Swing Beds (Class VI) is set prospectively as a flat per diem rate determined by Medicaid. Swing bed reimbursement occurs after the combined length of stay in an acute care bed and a swing bed exceeds the average length of stay for the Medicaid diagnosis related group (DRG) for the admission.

The rate is the weighted statewide average per diem rate paid for routine nursing care. The rate calculation sums Medicaid per diem payments and divides the sum by the number of Medicaid service days paid to Class I and Class III facilities as reflected on the State’s prior fiscal year’s Medicaid report of services and payments.

10.11 ADD-ONS

Add-ons are items that provide reimbursement to a provider for costs that are not previously included in the provider’s variable cost component.

10.11.A. SPECIAL DIETARY

The Coverages portion of this chapter, Dietary Services and Food subsection, provides for program reimbursement to non-profit nursing facilities for special dietary needs for religious reasons. Interim payment reimbursement to the nursing facility will be made by inclusion of a per diem rate add-on amount to the nursing facility routine nursing care rate. The total special dietary add-on reimbursement to the nursing facility during the reimbursement year will be adjusted through the annual cost report reimbursement
settlement. Refer to the Cost Report Reimbursement Settlement section of this appendix for additional information.

A qualifying nursing facility that has previous year cost history of special dietary costs will have the interim payment rate add-on based on special dietary cost center allocated cost and nursing facility resident census data determined in the nursing facility cost report. The most recent annual filed or audited cost report that is used for determining the nursing facility current routine nursing care rate will be the source of the cost data for the current interim rate add-on.

A qualifying nursing facility that does not have previous year cost history of special dietary costs will have an interim reimbursement rate add-on based on estimated cost data. The nursing facility must submit a written request identifying the estimated costs to be incurred in food purchase and preparation associated with special dietary needs for religious reasons. The request must be submitted to the RARSS and must include a certification statement attesting to the accuracy of the data and signed by the nursing facility authorized representative. (Refer to the Directory Appendix for contact information.) The written request must present the following data for the current cost report year:

- Estimated resident days (not less than 85% occupancy rate for all nursing facility resident units)
- Estimated raw food purchase costs, including a detailed listing of the types of food to be purchased for special dietary needs for religious reasons.
- Estimated cost for supplies, tableware, cooking utensils, etc. for food preparation and service associated with special dietary needs for religious reasons.

The submitted data will be subject to review and adjustment by Medicaid for consideration and calculation of the interim rate and the add-on reimbursement rate to the facility. The submitted data will be utilized for interim rate determination until annual cost reporting data has been filed and accepted by Medicaid.

**10.11.B. NURSE AIDE TRAINING AND COMPETENCY EVALUATION PROGRAM (NATCEP) ADD-ON**

Certification, Survey & Enforcement Appendix, Staff Certification section provides for nursing facility Medicaid reimbursement for Medicaid's share of costs incurred by the nursing facility for approved Nursing Aide Training and Competency Evaluation Program (NATCEP) expenditures. Interim payment reimbursement to the nursing facility will be made by inclusion of a per diem rate add-on amount to the nursing facility routine nursing care rate. The total NATCEP add-on reimbursement paid to the nursing facility during the nursing facility's cost report reimbursement year will be adjusted through the annual cost report reimbursement settlement. Refer to the Cost Classifications and Cost Finding section and Cost Report Reimbursement Settlement section of this appendix for additional information.

The interim rate add-on amount is limited to a maximum per diem of $1.00 per resident day; however, the nursing facility cost reimbursement settlement for these training costs is not subject to a per diem limit. The interim payment rate add-on will reflect the
nursing facility's prior year cost history of NATCEP costs utilizing the NATCEP cost center allocated cost and nursing facility resident census data determined in the nursing facility cost report. The most recent annual filed or audited cost report that is used for determining the nursing facility current routine nursing care rate is the source of the cost data for the current interim rate add-on, except where a more recent interim reimbursement request has been submitted by the nursing facility.

A nursing facility that is notified by the SSA of loss of NATCEP or CEP, has been placed on NATCEP lockout status, or has a NATCEP withdrawal of program approval will be notified by Medicaid that its interim reimbursement NATCEP add-on amount will be deleted from the reimbursement rate. The nursing facility must submit a completed interim reimbursement request identifying expected NATCEP allowable costs, in accordance with policy provisions referenced above, for consideration of an interim reimbursement add-on amount for allowable NATCEP costs incurred during the lockout period.

A nursing facility is eligible to submit an interim reimbursement request for a change in the interim payment rate add-on amount in the following situations:

- The nursing facility is experiencing a change in its current year NATCEP cost level that would cause a per diem increase or decrease in excess of $.25 per day in the current period reimbursement rate add-on.
- The nursing facility does not have previous year cost history of NATCEP cost.
- The nursing facility has been identified a lockout facility for NATCEP or CEP, or has loss of approval of its NATCEP, and has made acceptable arrangements for securing approved nurse aide training for nursing facility staff.

The nursing facility must submit a completed Nurse Aide Training and Testing Program Interim Reimbursement Request (form MSA-1324) identifying the estimated costs to be incurred in providing approved NATCEP training for the nursing facility staff and projected resident census data. The request must be submitted to RARSS and must include the signed certification statement attesting to the accuracy of the data and signed by the nursing facility authorized representative. (Refer to the Directory Appendix for contact information.) Electronic copies of the request form and completion instructions can be accessed on the MDHHS website. (Refer to the Directory Appendix for website information.)

The submitted data is subject to review and adjustment by Medicaid for consideration and calculation of the interim rate add-on payment to the facility. Medicaid will issue the provider a rate notice indicating the accepted cost level for interim rate determination, or a request denial and reason for such action. The submitted data will be utilized for interim rate determination until annual cost reporting data has been filed and accepted by Medicaid.
10.12 SPECIAL CIRCUMSTANCES – RATE DETERMINATION

10.12.A. NEW FACILITY AND PROVIDER [CHANGE MADE 7/1/18]

A new facility is a provider operating a nursing facility where there is not Medicaid historical cost. Examples include:

- A newly constructed (non-replacement) (text added 7/1/18) facility.
- An existing facility that has never before participated in Medicaid.
- A facility that has participated in Medicaid in a different provider class.
- An existing nursing facility that has not provided nursing care for Medicaid beneficiaries or billed Medicaid in the past two years (24 months).

10.12.A.1. NEW PROVIDER NURSING FACILITY PER RESIDENT DAY PLANT COST

A new provider in the Medicaid program is eligible for the Plant Cost Certification process to reflect the facility asset costs and related plant costs. The Plant Cost Certification data submission will be used for calculation of the nursing facility Plant Cost Component as outlined in the policy for the respective nursing facility class. Refer to the Plant Cost Certification section of this appendix for additional information.

10.12.A.2. NEW PROVIDER NURSING FACILITY VARIABLE COST COMPONENT [CHANGE MADE 7/1/18]

The Variable Rate Base for the new facility and provider will be determined using special methods. During the first two cost reporting periods, new facilities and facilities with a change of class will have a Variable Rate Base equal to the Class Average of Variable Costs. This rate base will be used in the calculation of the nursing facility Variable Cost Component as outlined in the policy for the respective nursing class. In subsequent periods, the nursing facility’s Variable Rate Base will be determined using the methods described in “Variable Cost Component” subsection of this appendix.

A new provider that purchases an existing facility participating in the Medicaid program or a provider with an existing, participating facility that makes major additions, renovations, or new construction does not qualify for these special methods because there are historical variable costs on which to base rates. The Variable Rate Base will be determined in accordance with Medicaid policy identified in applicable subsections of this appendix.

This section does not apply to Class V providers. (text added 7/1/18)

10.12.B. COMPLEX CARE

The Nursing Facility Coverages chapter of this manual details Medicaid policy on complex care cases. Complex care cases are those requiring specialized care beyond services covered by the usual Medicaid per diem rate. The payment rate for specially-placed residents is a negotiated prospective rate per resident day.
Reimbursement is made for prior authorized services/care to residents who have specialized and concentrated nursing and support service needs and who have been transferred from an acute care hospital setting to an approved nursing facility. The negotiated rate provides reimbursement adequate to meet the unusual needs of this type of resident in a less costly and more appropriate environment than an acute care hospital setting.

Factors used in Medicaid's negotiation of the per resident day prospective rate include, but are not limited to, complexity, type of equipment and supplies required, the resident's condition, and the market place availability of placement. Any authorized increase in the per diem rate represents only the cost of the service. The negotiated prospective rate is re-evaluated, in consideration of the resident's needs, prior to the last day of the approval period.

10.12.C. HOSPITAL LEAVE DAYS

The Hospital Leave Days Section in the Coverages portion of this chapter identifies the parameters for program reimbursement.

Reimbursement for a hospital leave day is a single rate paid to all nursing facility providers regardless of facility class. The rate is determined annually with an effective time period coinciding with the State fiscal year. The rate determination utilizes the Class I nursing facility Class Average Variable Cost (AVC) for the State fiscal year. The hospital leave day reimbursement rate represents a calculated salary and wage component of the room and board cost portion of the total AVC. The room and board portion is equal to 95 percent of the Class I nursing facility AVC, and the salary and wage component is determined as 66 percent of the room and board cost. The formula for calculating the hospital leave day rate is:

\[
\text{AVC (Class I NF)} \times 95\% \text{ (room and board portion)} \times 66\% \text{ (salary and wage component)} = \text{Hospital Leave Day Rate}
\]

Hospital Leave Day rate information is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

10.12.D. THERAPEUTIC LEAVE DAY

The Therapeutic Leave Days section in the Coverages portion of this chapter identifies the parameters for program reimbursement.

The reimbursement rate for a therapeutic leave day is the nursing facility's established per diem rate in effect for the period coinciding with the leave day.

10.12.E. ONE-DAY STAY

The One-Day Stay section of the Coverages portion of this chapter identifies the parameters for program reimbursement.
The reimbursement rate for an approved one-day stay is the nursing facility’s established per diem rate in effect for the period coinciding with the stay.

10.12.F. FACILITY INNOVATIVE DESIGN SUPPLEMENTAL (FIDS) PROGRAM

Effective for dates of service on and after October 1, 2007, Medicaid providers participating in the Facility Innovative Design Supplemental (FIDS) program are eligible to receive supplemental reimbursement for room and board services provided to Medicaid beneficiaries when the beneficiary resides in a FIDS bed. FIDS participating facilities are eligible for the reimbursement supplement for up to 20 consecutive years beginning in the fiscal year of the project completion date. For projects completed on or after January 1, 2008, providers must plant cost certify or forgo the FIDS reimbursement supplement.

The FIDS facility standards and required culture change must be maintained throughout the Medicaid supplemental payment program. FIDS participating facilities will be reviewed annually by the Aging and Adult Services Agency (AASA) to certify continued participation in the culture change. Reimbursement of the FIDS payment will be terminated if it is determined that a facility is not compliant with the culture change requirement. FIDS participating nursing facilities receive increased capital reimbursement for FIDS construction and renovation projects. The increased reimbursement is paid through the claims reimbursement process. Reimbursement of the supplement amount is contingent upon sufficient appropriation to the Medicaid budget.

10.12.F.1. CHANGE OF OWNERSHIP

A new owner may receive reimbursement for the balance of the facility’s eligible years of participation in the FIDS program. In order to receive the supplemental Medicaid payment, the new owner must continue the FIDS facility standards and culture change. If the new owner initially decides to discontinue participation as a FIDS facility and subsequently decides to participate as a FIDS facility, the provider must notify the LARA, Bureau of Community and Health Systems (BCHS) licensing officer and AASA. MDHHS will notify the provider of the supplemental payment amount upon reinstatement of participation in FIDS. MDHHS will notify the provider of the terminated supplemental payment if the facility is determined ineligible for the supplemental payment because the new owner has discontinued or plans to discontinue the FIDS facility standards or culture change.

10.12.F.2. FIDS PROGRAM REIMBURSEMENT METHODOLOGY

FIDS participating facilities that have received approval from LARA for construction or renovation design plans that complied with quality goals of the FIDS program to improve nursing facility quality of life and nursing facility structures are eligible for reimbursement. If a provider chooses to discontinue participation in the design and/or culture change aspects of the FIDS program, the provider must contact the MDHHS LTC Reimbursement and Rate Setting Section (RARSS) 30 days prior to the discontinuance. (Refer to the Directory Appendix for contact information.) The FIDS reimbursement
supplement will be discontinued when the facility no longer participates in the design and/or culture change.

MDHHS confirmation and approval that a FIDS participating facility has completed the pre-approved construction or renovation project(s) allows the facility to be eligible for the capital reimbursement supplement. The reimbursement supplement only applies to qualifying FIDS costs above the nursing facility’s Capital Asset Value (CAV) Limit for Class I and the Plant Cost Limit (PCL) for Class III. Qualifying costs are the cost of capital assets such as land, land improvement, building, building improvement, and equipment that meet the MDHHS capital asset classification. Providers submitting for plant cost certification can identify all costs for certification but must distinguish FIDS qualifying costs on the certification request. As FIDS qualifying costs fall below the nursing facility’s CAV or the nursing facility’s PCL, the supplement amount is adjusted. The reimbursement supplement reflects qualifying costs prorated over 20 consecutive years. Medicaid reimbursement methodology for the FIDS program follows current MDHHS nursing facility cost-based principles and rate determination guidelines and policy, including plant cost certification, except as identified below for Class I and Class III providers.

10.12.F.3. CLASS I NURSING FACILITY REIMBURSEMENT FOR FIDS

For Class I nursing facilities participating in the FIDS program, the supplement amount, up to five dollars ($5) per Medicaid day, is added to the Return on Current Asset Value Component (RCAV) for qualifying FIDS construction or renovation project costs above the nursing facility’s CAV Limit. Medicaid reimbursement methodology for the FIDS program follows current Medicaid nursing facility reimbursement guidelines and policy with the exceptions noted below:

- Up to five dollars ($5) per Medicaid day is added to the nursing facility’s RCAV.
- The supplement amount is based on qualifying costs above the nursing facility’s CAV Limit determined by MDHHS either by plant cost certification or by cost reporting. When the plant cost certification estimate is used, the amount of the supplement is subject to an adjustment following the completion of an audit to the applicable period’s cost report in which the FIDS project is initially reported.
- To determine the amount of the FIDS supplement, MDHHS will utilize the following calculation:
  - Qualifying FIDS construction or renovation costs above the CAV Limit are divided by the number of FIDS beds in the project divided by the number of years remaining in the supplemental program divided by 365 days.

10.12.F.4. CLASS III NURSING FACILITY REIMBURSEMENT FOR FIDS

For Class III nursing facilities participating in the FIDS program, MDHHS will increase the Plant Cost Component (PCC) up to five dollars ($5) per Medicaid day for FIDS construction of renovation project costs above the nursing facility’s PCL. MDHHS reimbursement methodology for the FIDS program follows current MDHHS nursing facility reimbursement guidelines and policy with the exceptions noted below.
Up to five dollars ($5) per Medicaid day is added to the nursing facility’s PCC.

The supplement amount is based on qualifying costs above the re-determined PCL determined by MDHHS either by plant cost certification or by cost reporting. When the plant cost certification estimate is used, the amount of the supplement is subject to an adjustment following the completion of an audit to the applicable period’s cost report in which the FIDS project is initially reported.

To determine the amount of the FIDS supplement, MDHHS will apply the following to qualifying project costs:

- For FIDS renovation projects, the supplement is determined using qualifying costs to calculate the plant cost per resident day above the facility’s PCL per resident day. For a newly constructed facility, the calculation will be based on plant cost per resident day above the Class PCL per resident day effective the quarter the new construction is placed into service.

10.12.F.5. FIDS PROGRAM BILLING AND REIMBURSEMENT PROCESS

Participating FIDS providers are reimbursed per Medicaid day when claims are submitted for services provided in the FIDS area. FIDS facilities compliant with facility standards and culture change are eligible for the supplemental payment. Only participating FIDS providers billing for room and board in a FIDS area are to use the following revenue codes:

- For a single occupancy/private room, bill revenue code 0119
- For a double occupancy/semi-private room, bill revenue code 0129
- For Therapeutic Leave Day claims, bill revenue code 0189
- For hospice room and board, bill revenue code 0659

FIDS reimbursement is subject to post-payment audit action, including the prospective elimination of a provider’s supplemental payment if the provider submits claims for FIDS services not provided in an approved FIDS area.

10.13 RATE RELIEF FOR CLASS I NURSING FACILITIES

Medicaid reimbursement rate relief for current and new nursing facility providers is determined on a case-by-case basis in accordance with specific criteria for evaluating eligibility for relief and rate methodology for determining the rate level. The following definitions of nursing facility providers are applied in this rate relief policy for Class I nursing facilities:

- Current provider is defined as the provider that operated the facility during the time period of the last cost report on which the normal rate setting would occur, and will operate the facility during the time period for which rate relief is requested.
- New provider is defined as a person or business entity that has purchased or is purchasing a nursing facility that had immediate prior Medicaid participation, and the new provider ownership individual(s) or business entity is not related through family or business ties to the ownership individual(s) or business entity of the previous provider. A nursing facility sale between family members may be approved by Medicaid and the new owner may be considered a new provider.
under certain circumstances, as outlined in the Ownership Changes and Medicaid Termination section of this appendix.

**10.13.A. ELIGIBILITY CRITERIA**

The provider must be a Class I nursing facility:

- The provider must demonstrate that the current Medicaid reimbursement (Rate + QAS) does not provide adequate funding to deliver a level of care to Medicaid beneficiaries in the facility that assures "each resident attains and maintains the highest practicable physical, mental, and psycho-social well-being" as required by the Omnibus Budget Reconciliation Act (OBRA) of 1987.

- The nursing facility Variable Rate Base amount must meet the following criteria:
  - For a Current Provider – The facility's Variable Rate Base is at or below the corresponding Class Average Variable Cost. The Average Variable Cost used for the class is the one that corresponds with the October 1 to September 30 rate year for which rate relief has been requested.
  - For a New Provider in a Medicaid-enrolled nursing facility – The facility's current Variable Rate Base is at or less than 80 percent of the corresponding Class Average Variable Cost. The Average Variable Cost used for the class is the one that corresponds with the October 1 to September 30 rate year for which rate relief has been requested. A new provider in a facility with a Variable Rate Base between 80 and 100 percent of the corresponding Class Average Variable Cost is eligible for accelerated rebasing and is treated as a current provider.

- A current Medicaid provider agreement for the facility is in effect. The rate relief period is applied to the facility and not the owner, provider, or licensee. A change of ownership, provider, or licensee during the rate relief period does not end the agreement for rate relief under this policy as long as the new owner, provider, or licensee fully complies with the requirements of the rate relief agreement.

- The nursing facility provider must also meet at least one of the following six criteria:
  - The sum of the provider's Variable Rate Base, Economic Inflation Update, and other associated rate add-ons (excluding Nurse Aide Training and Testing reimbursement), plus the Net Quality Assurance Supplement, must be less than the provider's audited Medicaid variable cost per resident day for the provider's two fiscal cost reporting periods (not rate setting periods) of not less than seven months immediately prior to the first period of rate relief. This comparison to cost is a measurement to normal reimbursement rate calculation methodology and excludes the effect of Executive Order reimbursement actions. The provider must submit a per diem cost analysis using the outline format presented as a reference titled "Worksheet to Establish Criteria for Nursing Facility Class I Rate Relief". The required cost analysis information is available in electronic file format on the MDHHS website. (Refer to the Directory Appendix for website information.)
  - The provider is required, as a result of a survey by the SSA, to correct one or more substandard quality of care deficiencies to attain or sustain compliance with Medicaid certification requirements. The survey must have occurred within six months prior to the provider's request for rate relief. The provider must submit a copy of the citation.
and an approved Plan of Correction outlining the action being taken by the provider to address the requirement(s). The provider must submit to the MDHHS LTC Reimbursement and Rate Setting Section (RARSS) a copy of the citation and an approved Plan of Correction outlining the action being taken by the provider to address the deficiencies. A copy of facility staffing levels before and after the survey citation must be provided to RARSS to demonstrate the staffing increase is sustained and is not for short-term training purposes only.

- The provider has experienced a significant change in the level of care needed for current Medicaid residents in the nursing facility. Significant change is defined as an increase of ten minutes per patient day, as demonstrated by Minimum Data Set (MDS) data, which results in a corresponding increase in direct care staffing equal to or greater than the increase in patient minutes per day. The provider must submit an analysis comparing resident acuity levels from the rate base year to current resident acuity levels. Minimum Data Set (MDS) data must be used for this comparison. The data is subject to a clinical review by Medicaid. The analysis must also include a comparison of the previous and current nurse staffing levels required based on actual residential census or actual patient days and other nursing related costs or requirements likely to increase the operational costs. This does not include nursing administration staff.

- The provider is new in a Medicaid-enrolled facility and the facility's most recent cost report submitted to Medicaid was incomplete, undocumented or had unsubstantiated cost data by the previous provider. Inadequate cost reporting includes non-payment of accrued liabilities due to the previous provider's bankruptcy as determined by Medicaid auditors or their designees in accordance with Medicaid allowable costs, or inadequate records to support the filed cost report. Proof of the change of ownership must be submitted along with an explanation of why the cost report data is inadequate to calculate the provider's reimbursement rate.

- Rate relief is needed to prevent closure of a Medicaid-enrolled facility due to a regulatory action by the SSA, where the facility's closure would result in severe hardship for its residents and their families due to the distance to other nursing facilities, and no new provider would operate the facility at its current reimbursement rate. A facility would meet this hardship criteria only if a new owner has agreed to take over its operation and it is either the only nursing facility in the county or the facility has at least 65 percent of the Medicaid nursing facility (Class I, III and V) certified beds in that county.

- The provider’s current Variable Rate Base is less than or equal to 60 percent of the corresponding rate year’s Variable Cost Limit. A facility is not eligible under this criterion if an owner’s or administrator’s compensation is above the current compensation limit. A provider with non-allowable related party transaction costs or non-allowable related party lease costs is not eligible under this criterion.
10.13.B. RATE RELIEF PETITION PROCESS

All petitions for rate relief must be in writing and submitted to RARSS. An authorized representative from the entity that holds the nursing facility license must sign the petition.

Medicaid will make the final determination for the approval or disapproval of the rate relief request. Medicaid will provide a written response within 60 calendar days of Medicaid's receipt of the rate relief request. The response may include a request for additional information. The 60 calendar day time period does not begin until the provider has submitted all of the necessary documentation for Medicaid to evaluate the rate relief request. Once the nursing facility provider has complied with the request(s) for additional information, a written notice of the approval or disapproval is given within 30 calendar days of Medicaid's receipt of the additional information.

If Medicaid requests additional or supporting documentation needed to complete the evaluation of the rate relief request, the provider must submit the documentation within 30 calendar days of the request. If Medicaid does not receive the documentation or the provider has not received a one-time extension for 30 additional calendar days, the SMA will issue a denial notice for rate relief. Appropriate time allowances will be made in cases where the needed data is for a time period that is not yet concluded. Subsequent rate relief requests by the provider will only be effective on a prospective basis following receipt of the new requests and documentation for rate relief.

10.13.C. RATE RELIEF AGREEMENT

If the rate relief petition is approved, Medicaid will prepare a rate relief agreement to be signed by the nursing facility authorized representative and an authorized representative of Medicaid. Once the agreement is approved, the provider's Medicaid rate is adjusted consistent with the relief granted. The agreement outlines the rate relief granted, the effective date and any conditions or requirements.

Requirements may include, but are not limited to,

- Annual and interim cost reporting requirements during the period of rate relief.
- Appointment of a monitor, at facility cost, for oversight if, after consultation with staff in the SSA, such action is deemed appropriate.
- Follow-up surveys by the SSA.

10.13.D. RATE RELIEF PERIOD

Rate relief is effective on a prospective basis beginning in the month after receipt of the request by RARSS. No retroactive rate relief will be approved.

Nursing facility providers may apply and receive rate relief under this policy once every seven years, i.e., 84 months. This seven-year period begins on the effective date of rate relief.
Example: If rate relief takes effect January 1, 2017, the facility would not be eligible for rate relief again until on or after January 1, 2024.

The rate relief period is based on the facility, not on the owner or licensee. A change of ownership does not void the seven-year period under this policy.

10.13.E. WITHDRAWAL OF RATE RELIEF AGREEMENT

Medicaid may withdraw the rate relief agreement if the facility is cited by the SSA for serious certification violations while receiving rate relief. If the citation(s) is for immediate jeopardy or substandard quality of care, or the provider is not spending the money in accordance with the plan filed for special rate relief, the rate relief agreement may be withdrawn. Medicaid will review the nursing facility actions to determine if rate relief termination is warranted. If Medicaid terminates the agreement, the nursing facility's Medicaid rate will be recalculated in accordance with existing Medicaid reimbursement policy without rate relief. The rate change would take effect at the beginning of the month following issuance of a 30-calendar day notice to the provider.

10.13.F. RATE RELIEF APPEALS

Nursing facility providers that receive notices of denial for rate relief or are notified that a rate relief agreement has been withdrawn may file an appeal. Appeals are handled in accordance with the existing appeals process. Additional information appears in the Appeal Process section in this appendix.

10.13.G. RATE RELIEF FOR A NEW PROVIDER IN A MEDICAID-ENROLLED NURSING FACILITY WITH A VARIABLE RATE BASE LESS THAN OR EQUAL TO 80 PERCENT OF THE CLASS AVERAGE VARIABLE COST

A new provider in a Medicaid enrolled nursing facility with a Variable Rate Base less than or equal to 80 percent of the Class Average Variable Cost may request an increase in the current facility rate. The new provider must be operating in a facility that has previously participated with Medicaid.

10.13.G.1. RATE RELIEF METHODOLOGY

A new rate is calculated using the Class I Average Variable Cost for the appropriate year as the Variable Rate Base for the calculation of the facility Variable Cost Component, thereby increasing the facility per diem rate. This Variable Rate Base is in effect through the current State fiscal year rate period ending September 30.

Effective October 1 of the State fiscal year rate period starting after the new provider begins operation, the Variable Rate Base is determined using accelerated rebasing. The accelerated rebasing utilizes the new provider's first cost reporting period that reflects at least seven months of nursing facility operation. The cost reporting time period is based on the new provider's established fiscal year. The nursing facility allowable variable cost is indexed to October 1 of the year that is one year prior to the new rate year being calculated by applying the appropriate cost index. The new provider Variable Rate Base is limited to the Class I Average Variable Cost for the corresponding rate year time period.
The new provider receiving rate relief in this category must utilize the standardized data to file a Class I Rate Relief Interim Cost Statement prior to September 15. The Interim Cost Statement excerpted worksheets from the Medicaid annual cost report (Medicaid cost reporting formats identified below) must reflect actual or expected costs incurred by the nursing facility for the new provider’s first cost reporting period (as referenced above). The facility’s annual cost report may be used in lieu of the Interim Cost Statement if the cost report will be filed with Medicaid prior to September 15.

The Rate Relief Interim Cost Statement must contain the following completed schedules of the cost report in the MDHHS required electronic format:

- Checklist
- Worksheet A
- Worksheet B
- Worksheet 1
- Worksheet 1-C (only if claiming allocated related party costs)
- Worksheet 2

The Interim Cost Statement is used to determine the interim rate utilizing the accelerated rebasing provisions. The interim rate is revised when the acceptable annual cost report is submitted and used for accelerated rebasing.

The subsequent rate year calculation is in accordance with standard reimbursement methodology.

**Example:** A new nursing facility provider begins operations on January 1, 2018 and selects a September 30 year-end cost reporting period. Following request, the provider is approved for rate relief for rate year October 1, 2017 to September 30, 2018. The facility per diem rate is set using the Class I Average Variable Costs effective for the rate year beginning October 1, 2017 (effective for the new provider on January 1, 2018). The provider must complete an interim cost statement for variable costs for the period January 1, 2018 through September 30, 2018 that must be filed by September 15, 2018. Effective October 1, 2018, the Variable Rate Base is the lesser of the variable costs from the interim cost statement indexed to October 1, 2017 or the Class Average Variable Cost effective October 1, 2018. Following the filing of the annual cost report, the variable costs from the annual report are indexed to October 1, 2017, and the interim Variable Rate Base is recalculated.

Rate relief is subject to audit and settlement with reimbursement adjustment using the principles and guidelines outlined in Medicaid policy. Rate relief reimbursement cannot exceed the appropriate cost and rate limitations. The provider is reimbursed by Medicaid for any underpayment, and the provider must reimburse Medicaid for any overpayment. If the interim Variable Rate Base determined for rate relief reimbursement to the provider exceeds the audited Variable Rate Base reimbursement by more than three percent, the provider will be assessed a penalty equal to 10 percent of the total overpayment amount.
A nursing facility provider receiving rate relief is allowed to participate in any other add-on reimbursement programs at their election. These programs are handled under the Medicaid policy applicable to the program. The costs associated with these add-on programs are not included in the cost settlement of the variable costs for rate relief as previously described.

10.13.G.2. RATE RELIEF DOCUMENTATION [CHANGE MADE 7/1/18]

It is the provider's responsibility to present supporting documentation with the rate relief petition. Petition from a new provider must include:

- Identification of the criteria under which relief is requested.
- Supporting documentation for the criteria.
- Detail of the circumstances causing the need for the rate relief request.
- The proposed effective date. The actual effective date of the rate relief is based on the date the petition is received by Medicaid. The earliest effective date would be the first day of the next month following the receipt of the request.
- The services time period that is the basis for which rate relief is requested.
- Detail of the expenses that are not in the base period for the current or subsequent fiscal year Medicaid rate and how these expenditures relate to the provision of resident care. NOTE: Increases in cost per day due to changes in resident occupancy or changes in the application of rate limitations do not constitute additional expenses. (revised 7/1/18)
- Plans on how these changes will ensure the required level of resident care.

10.13.H. RATE RELIEF FOR A CURRENT PROVIDER OR A NEW PROVIDER IN A MEDICAID ENROLLED NURSING FACILITY WITH A VARIABLE RATE BASE BETWEEN 80 PERCENT AND 100 PERCENT OF THE CLASS AVERAGE VARIABLE COST

A current or new provider in a Medicaid enrolled nursing facility with a Variable Rate Base between 80 percent and 100 percent of the Class Average Variable Cost may request accelerated rebasing.

Rate relief applies only to the nursing facility’s Variable Rate Base. The facility’s qualification for adjustment of the Plant Cost Component in the Medicaid rate and Nurse Aide Training and Testing costs is handled in accordance with current Medicaid policy.

10.13.H.1. RATE RELIEF METHODOLOGY

Accelerated rebasing is the use of the Medicaid cost report data from the period ending in the current calendar year in the rate setting process, rather than using cost report data from the period ending in the previous calendar year under the standard reimbursement methodology. The nursing facility’s allowable variable cost is indexed to October 1 of the year that is one year prior to the rate year being calculated by applying the appropriate cost index.
Example: The provider's cost report for the period ending December 31, 2018 could be used to set the October 1, 2018 rate if approved for rate relief under the criteria established in the Eligibility Criteria Section of this Appendix. The provider would be allowed to participate in any add-on reimbursement programs at their election.

The cost reporting is based on the provider's established fiscal year and must not cover a time period of less than seven months. The cost report period used for accelerated rebasing must have a reporting period end date prior to January 1 of the State rate year. This example is applicable to the third and fourth criteria for rate relief qualifications as stated in the Eligibility Criteria Section of this Appendix.

Example: A cost report time period ending after January 1, 2018 could not be used for accelerated rebasing of a rate effective during the State rate year October 1, 2017 through September 30, 2018.

10.13.H.2. RATE RELIEF DOCUMENTATION [CHANGE MADE 7/1/18]

It is the provider's responsibility to submit supporting documentation with the rate relief petition. Petition from the provider must include:

- Identification of the criteria under which rate relief is requested.
- Supporting documentation for the criteria.
- Detail of the circumstances causing the need for the rate relief request.
- A requested effective date (the actual effective date of the rate relief is based on the date that the petition is received by Medicaid). The earliest effective date would be the first day of the next month. For example, a petition received on August 31 may be effective as soon as September 1.
- The services time period that is the basis for which rate relief is requested.
- Detail of the expenses that are not in the base period for the current or subsequent fiscal year Medicaid rate and how these expenditures relate to the provision of resident care.

NOTE: Increases in cost per day due to changes in resident occupancy or changes in the application of rate limitations do not constitute additional expenses. (text added 7/1/18)
- Plans on how these changes will ensure the required level of resident care.

10.13.I. RATE RELIEF FOR A CURRENT PROVIDER IN A MEDICAID ENROLLED NURSING HOME FACILITY WITH A VARIABLE RATE BASE LESS THAN OR EQUAL TO 60 PERCENT OF THE VARIABLE COST LIMIT

A current provider in a Medicaid enrolled nursing facility with a Variable Rate Base of less than or equal to 60 percent may request rate relief.

10.13.I.1. RATE RELIEF METHODOLOGY

A new Variable Rate Base of the rate is calculated that will be no more than 50 percent of the difference between the Class I Average Variable Cost and the existing Variable Rate Base for the current rate year. The resulting new Variable Cost Component will
thereby adjust the facility's per diem rate. This Variable Rate Base will remain in effect through the current State fiscal year rate period ending September 30.

Example: A nursing facility has a current Variable Rate Base of $96, the Variable Cost Limit is $160, and the Class I Average Variable Cost is $150 (none of the figures are based on actual data, they are used for example purposes). Based on the facility's request for rate relief, they are found eligible for the maximum 50 percent of the difference between their current Variable Rate Base and the Average Variable Cost. Their Variable Rate Base will then increase from $96 to $123.

The provider receiving rate relief in this category must utilize the standardized data to file a Class I Rate Relief Interim Cost Statement at the time of application for relief. The Interim Cost Statement excerpted worksheets from the Medicaid annual cost report (Medicaid cost reporting formats identified below) must reflect actual or expected costs incurred by the nursing facility for the provider's cost reporting period. A facility with less than seven months remaining in its cost reporting period may file a second Interim Cost Statement at the end of that fiscal year.

The Rate Relief Interim Cost Statement must contain the following completed schedules of the cost report in the MDHHS required electronic format:

- Checklist
- Worksheet A
- Worksheet B
- Worksheet 1
- Worksheet 1-C (only if claiming allocated related party costs)
- Worksheet 2

The Interim Cost Statement is used to determine the interim rate for the remainder of the rate period. The interim rate is revised when the acceptable annual cost report is submitted and used for accelerated rebasing.

Effective October 1 of the following State fiscal year rate period, MDHHS determines the Variable Rate Base using accelerated rebasing. The accelerated rebasing utilizes the provider's first cost reporting period that reflects at least seven months of nursing facility operation after rate relief. The cost reporting time period is based on the provider's established fiscal year. The nursing facility allowable variable cost is indexed to October 1 of the year that is one year prior to the new rate year being calculated by applying the appropriate cost index.

The subsequent rate year calculation is in accordance with standard reimbursement methodology.

**Example 1 - Request Received with Less Than Seven Months in the Cost Reporting Period:** A provider has a cost reporting period ending on December 31 of each year. The provider is approved for rate relief for rate year October 1, 2017 to September 30, 2018. The facility per diem rate is set using a new Variable Rate Base of
no more than 50 percent of the difference between the Variable Rate Base and Class I Average Variable Costs effective for the rate year beginning October 1, 2017. The provider must complete an Interim Cost Statement for variable costs for their cost report period that must be filed with their rate relief request. In this instance, they may submit a revised Interim Cost Statement for the provider’s cost reporting period January 1, 2018 through December 31, 2018. The rate year beginning October 1, 2018 would then utilize the accelerated rebasing to determine the rate for that period based on the December 31, 2018 fiscal year.

Example 2 - Request Received with Seven Months or More in the Cost Reporting Period: A provider has a cost reporting period ending December 31 of each year. The provider is approved for rate relief and submits their Interim Cost Statement ending on February 1, 2017. The facility per diem rate is set using a new Variable Rate Base of no more than 50 percent of the difference between the Class I Average Variable Cost and the Variable Base Cost effective for the rate period February 1, 2017 through September 30, 2017. The rate relief would be effective through the end of the rate relief period of September 30, 2017. The rate year beginning October 1, 2017 would then utilize the accelerated rebasing to determine the rate for that period based on the December 31, 2017 fiscal year.

Rate relief is subject to audit and settlement, with reimbursement adjustment using the principles and guidelines outlined in Medicaid policy. Rate relief reimbursement cannot exceed the appropriate cost and rate limitations. The provider is reimbursed by Medicaid for any underpayment, and the provider must reimburse Medicaid for any overpayment. If the interim Variable Rate Base determined for rate relief reimbursement to the provider exceeds the audited Variable Rate Base reimbursement by more than three percent, the provider will be assessed a penalty equal to 10 percent of the total overpayment amount.

A nursing facility provider receiving rate relief is allowed to participate in any other add-on reimbursement programs at their election. These programs are defined under the Medicaid policy applicable to the program. The costs associated with these add-on programs are not included in the cost settlement of the variable costs for rate relief as previously described.

10.13.1.2. RATE RELIEF DOCUMENTATION [CHANGE MADE 7/1/18]

It is the provider’s responsibility to submit supporting documentation with the rate relief petition. A petition from the provider must include:

- Identification of the criteria under which rate relief is requested.
- Supporting documentation for the criteria.
- Detail of the circumstances causing the need for the rate relief request.
- A requested effective date (the actual effective date of the rate relief is based on the date that the petition is received by Medicaid). The earliest effective date would be the first day of the next month (i.e., a petition received on August 31 may be effective as soon as September 1).
The services time period that is the basis for which rate relief is requested.

Detail of the expenses that are not in the base period for the current or subsequent fiscal year Medicaid rate and how these expenditures relate to the provision of resident care. **NOTE:** Increases in cost per day due to changes in resident occupancy or changes in the application of rate limitations do not constitute additional expenses.  

Plans on how these changes will ensure the required level of resident care.

**10.14 COUNTY MEDICAL CARE FACILITIES SPECIAL PAYMENTS (CMCFSP) PROGRAM**

Eligible County Medical Care Facilities (CMCF) may receive special payments for unreimbursed costs incurred for services to Medicaid beneficiaries. Allocations to individual facilities will be determined based upon unreimbursed costs certified as public expenditures in accordance with the Code of Federal Regulations (CFR) 42 CFR 433.51. MDHHS will make special payments to CMCFs who provided services to Medicaid beneficiaries for dates of service on and after January 1, 2009.

**10.14.A. ELIGIBILITY FOR CMCFSP PROGRAM**

To be eligible for participation in the CMCFSP Program, each provider must meet the following conditions:

- The provider must be a county-owned and -operated licensed CMCF.
- The provider must be certified to serve Medicaid beneficiaries.
- The provider must have reported Medicaid bed days during the fiscal year covered.
- The provider must have incurred allowable costs in excess of Medicaid reimbursement for Medicaid bed days reported during the fiscal year covered.

**10.14.B. ENROLLMENT IN CMCFSP PROGRAM**

To participate in the CMCFSP Program, a Medicaid-participating CMCF must submit a signed copy of the Attestation of Participation form to the MDHHS LTC Reimbursement and Rate Setting Section (RARSS). (Refer to the Directory Appendix for contact information.) Providers must acknowledge and agree to the terms of participation in the CMCFSP Program as outlined in this section and in the attestation form.

If a provider desires to receive interim payments during their fiscal year, the request to participate in the CMCFSP Program must be received prior to that fiscal year for which participation is desired. A provider may also wait to submit a request to participate until the filing of their annual Medicaid cost report. If a provider opts to participate when they file their annual cost report, the provider may receive payments for unreimbursed costs through the initial and final reconciliation, but will not receive interim payments.

If participation is approved, RARSS will enroll the provider in the CMCFSP Program in the provider’s fiscal year following the approval of RARSS. The provider must submit an attestation form for each year that the provider desires to participate in the CMCFSP Program.
10.14.C. CALCULATION OF CMCFSP PAYMENT

An interim payment and reconciliation process will be employed to make payments to qualifying facilities. Allowable unreimbursed costs for services provided to Medicaid beneficiaries will be determined based on information obtained from the most recently filed cost report. Costs will be trended to the current state fiscal year using an inflation factor, without capital, taken from the Health Care Cost Review, which is published quarterly by Global Insight. Interim payments will then be made to qualifying CMCFs.

Interim payments will be reconciled twice. First, an interim reconciliation of the original payments will be conducted based on allowable Medicaid costs. Information needed to reconcile initial payments will be obtained from the cost report filed with MDHHS for the applicable reporting period. Second, payments will be readjusted based on changes to the filed cost report for the applicable reporting period, resulting from an audit of that cost report conducted by MDHHS.

Facilities receiving special payments for unreimbursed Medicaid costs are liable for any overpayment amount identified in the reconciliation process. Providers must repay any overpayment amount within 120 days of the date of notification of overpayment.
SECTION 11 - APPEAL PROCESS

A nursing facility participating in the Medicaid program may appeal an adverse action and certain determinations made by Medicaid. The provider will be given a written notice of the determination or action that outlines the proposed action, the provider's appeal rights, and the appeal process.

Adverse actions include, but are not limited to:

- A suspension or termination of a provider's Medicaid program participation.
- A reduction, suspension, or adjustment of provider payments.
- A retroactive adjustment following an audit or review of a facility's daily reimbursement rate or other services reimbursement.
- The prospective reimbursement rate determination.

Some elements of the Medicaid nursing facility reimbursement determination methodology are not appealed through an administrative process, but may be appealed to a court of appropriate jurisdiction. These are elements where an administrative remedy, if permitted for a single provider, would imply or necessitate a change for all providers or for all providers in a class and include, but are not limited to:

- The formula for the determination of the nursing facility cost factor.
- The Principles of Reimbursement and guidelines that define allowable costs.
- Medicaid Interim Payment (MIP) Program normal payment amount or reconciliation of payments and approved service billings.
- Non-Medicaid issues.
- Cost limits established in program policy.
- Medicaid's determination of allowable items and costs until an audit has been completed.

The review and hearings process for providers has been promulgated in the administrative rules located on LARA's website. The process is explained in more detail in the MDHHS Administrative Hearing pamphlet on the MDHHS website. (Refer to the Directory Appendix for website information.)

11.1 AUDIT APPEALS

Each nursing facility cost report is audited to ensure that expenses attributable to allowable cost were reported in adherence with Medicaid policy. Once the audit report is completed, the provider is given a Preliminary Summary of Audit Adjustments Notice. This notice outlines audit results and advises the provider of their appeal rights, including the right to an Area Office Conference.

If the provider or the provider's designee does not respond to the Preliminary Summary of Audit Adjustments within 15 business days of the date of the notice, the provider will receive a Final Summary of Audit Adjustment Notice. The notice advises the nursing facility of subsequent appeal rights, up to and including an administrative hearing. The provider or their designee has 30 calendar days from the date of the Final Summary of Audit Adjustments Notice to request a formal hearing in accordance with MDHHS rules for hearings.
If a provider wants an Area Office Conference, the provider or the provider’s designee must send a written request to the audit representative(s) within 15 business days of the Preliminary Summary of Audit Adjustments Notice date. The Area Office Conference is a forum for the provider or their designee to present documents and arguments contesting the Preliminary Summary of Audit Adjustments Notice. The audit representative(s) must schedule an Area Office Conference within 15 calendar days of the receipt of the provider’s or provider designee’s request. Within 15 calendar days after the Area Office Conference, the audit representative(s) must issue a Final Summary of Audit Adjustments Notice to the provider. The notice advises the nursing facility of subsequent appeal rights, up to and including an administrative hearing. The provider or their designee has 30 calendar days from the date of the Final Summary of Audit Adjustments Notice to request a formal hearing in accordance with MDHHS rules for hearings.

If a provider does not appeal or does not respond to the Final Summary of Audit Adjustments Notice or other notices or processes related to a conference or hearing within the allotted timeframe, the provider has waived the right to any further administrative review.

11.2 RATE APPEALS

Providers are notified in writing of their Medicaid reimbursement rate(s) at least 30 calendar days prior to the rate’s effective date. The provider is given an opportunity for informal review of the rate determination by RARSS. The provider may also formally appeal issues of disagreement or dispute regarding the determined reimbursement rate. A notice of appeal rights, with instructions on how to request an appeal, is included in the final settlement Notice of Medicaid Reimbursement.

11.3 REIMBURSEMENT SETTLEMENT APPEALS

A final settlement reimbursement determination is made to determine the aggregate Medicaid reimbursement to the nursing facility for the time period covered by the cost report. Providers are notified in writing of the final reimbursement settlement and given an opportunity for informal review of the settlement determination. The provider may formally appeal issues of disagreement or dispute of the reimbursement settlement determination. A notice of appeal rights, with instructions on how to request an appeal, is included in the final settlement Notice of Program Reimbursement.

11.4 PROVISIONAL RATES

A provider will be given a provisional rate for the new rate year if:

- Medicaid is responsible for a delay in determination procedures.
- An Area Office Conference or Administrative Conference is in progress.
- The potential for an Area Office Conference or an Administrative Conference is still open at the beginning of the rate year that begins a year and a day after the end of the rate year that is being processed.
For this purpose, "delay in the procedures" means (if applicable):

- Medicaid failed to issue the Preliminary Summary of Audit Adjustments in a timely manner.
- Medicaid failed to conduct the Area Office Conference in a timely manner.
- Medicaid failed to issue the Final Summary of Audit Adjustments Notice, including a final determination notice, in a timely manner.

11.5 PROVIDER PAYMENT ADJUSTMENT RESULTING FROM APPEAL DECISION

If the appeal result requires a change in a provider's rate or reimbursement level, the change will be made retroactively for service time periods coinciding with the effective dates of the original reimbursement rate notice. Payment adjustments will be made by an aggregate adjustment rather than by individual claim adjustments.
SECTION 12 - MEDICAID INTERIM PAYMENT PROGRAM

A nursing facility has the option of selecting one of two payment methods:

- payment directly related to claims submitted to and processed by CHAMPS, or
- enrollment in the Medicaid Interim Payment (MIP) Program.

Providers enrolled in MIP receive a pre-determined dollar amount in cycled payments. MIP payments represent the expected dollar amount that Medicaid would have paid to the nursing facility in claims reimbursement during a period of time. The MIP payment calculation is based on historical approved billings, current reimbursement rate and claims data. MDHHS may perform interim reconciliation(s) if a significant amount is due the program. After the end of the quarter, a comparison is made of the most recent pre-determined payment and the approved days activity billed. The result of the comparison could result in an increase or a decrease to the MIP payment amount. A reconciliation is done at the end of the provider's fiscal year.

12.1 ENROLLMENT IN MIP

To participate in MIP, a Medicaid participating provider must submit a written request to RARSS. New providers must submit the necessary information outlined in the New Provider Information Data format. Established providers may submit a written request. Providers must acknowledge and agree to the terms of participation in the MIP as outlined in this section. Requests to enroll in MIP must be received one month prior to the beginning of the calendar quarter for which enrollment is desired.

If enrollment is approved, RARSS will enroll the provider in MIP in the calendar quarter following the approval of RARSS. Once MIP payments begin, claims approved through CHAMPS, regardless of date of service, will not generate a separate or additional payment.

12.2 DISENROLLMENT IN MIP

To disenroll in MIP, the provider must submit a written request to RARSS. The request to disenroll must be received by RARSS one month prior to the end of a calendar quarter. Disenrollment is effective at the beginning of the calendar quarter following the receipt of the request by RARSS.

Providers terminating participation in the Medicaid Program will not receive a MIP payment in the final month of participation.

The final month's MIP payment is subject to reconciliation to determine the status of MIP. Special arrangements may be made where there is guaranteed assurance the State can recover any payment difference that may exist as the result of MIP participation. A provider interested in a special arrangement must contact RARSS for consideration.

Providers interested in re-enrollment in the MIP program must wait at least one full quarter before reapplying.
12.3 CLAIMS SUBMISSION

Providers are expected to submit claims for services rendered in a timely manner. Although a provider enrolled in MIP does not receive payment directly from claims submission, future MIP payments are affected by claims submission. MIP payments are calculated for expected days to be reimbursed.

12.4 CALCULATION OF MIP PAYMENT

The MIP amount is recalculated on a quarterly basis. The recalculation is to update the MIP amount to reflect the current Medicaid billing activity for the facility and the provider's Medicaid per diem rate when necessary. A recalculation may occur any time during a calendar quarter due to a change in the provider's per diem rate. The quarterly recalculation is based on the approved claims activity over the most recent twelve months, regardless of the date of service, and Medicaid utilization during the same time period. At the end of each quarter, the recently completed quarter's approved claims are used to update the MIP payment calculation.

The annually projected State liability to the provider (total reimbursement less other insurance and patient payments) will be divided by 24 to determine the regularly scheduled payment amount that will be made twice a month. The other insurance and patient payment amounts are based on the most recent quarter payment data projected to an annual amount.

In the case of major problems to Medicaid data system where a significant change has occurred in the approved claims data for a quarter as a result of Medicaid data system, the MIP amount would continue as previously calculated or the provider may request that RARSS perform a recalculation. If a significant reduction in the MIP amount is due to a problem outside the provider's control, such as a payment system error, the provider may request that RARSS perform a recalculation as a special consideration. RARSS staff will analyze and review the request to determine if special consideration is warranted.

Interim recalculations requests as a result of provider delays in billing must be submitted to RARSS for approval or denial. Providers that have demonstrated repeated occurrences of delays in billing may not receive an interim recalculation.

12.5 FREQUENCY OF MIP PAYMENT

The biweekly MIP payment is an estimate of one-half of the Medicaid liability for reimbursable services rendered in the previous month. The MIP payment will be paid on the first and third Thursday of each month. This means a provider could receive 100 percent of the monthly payment as early as the 15th day of the month and no later than the 21st day. Providers enrolled in MIP will receive six regularly scheduled payments during a calendar quarter.

12.6 ANNUAL RECONCILIATION

The reconciliation of approved claims and MIP payments is done annually, generally 90 calendar days after the end of the provider's fiscal year. If a provider changes their cost-reporting fiscal year, they must notify RARSS in advance in writing. Any change in a fiscal year could adversely affect a provider in the reconciliation.
If an underpayment has been made, the provider will receive a gross adjustment payment. If an overpayment is determined, recovery will be made by gross adjustment recovery against future payments. The gross adjustment process follows the Initial and Final Settlement practices in the respective subsections of this appendix. A provider may submit a written request to RARSS for an extended repayment schedule to repay the Program. The request must provide adequate justification for the need for extended repayment.

MIP amount determination, reconciliation and adjustments are not subject to appeal under the administrative rules. The MIP Program does not determine the reimbursement rate; it is an interim payment mechanism substituting for CHAMPS payments. The provider is given advance notice of the MIP actions and can request a review with RARSS. The provider’s action must be timely and specific to the problem.

12.7 NEW PROVIDERS

New providers, resulting from a change in facility ownership, may request MIP at the time of Medicaid Program enrollment by submitting the information in the New Provider Information Data format to RARSS.

New providers in facilities without historical Medicaid Program billing data are not eligible for MIP.
SECTION 13 – APPRAISAL GUIDELINES

Where historical cost records of a purchased asset are not available or are incomplete, or where fair market value or current reproduction cost must be established, a timely appraisal of the historical costs, fair market value, or depreciated reproduction cost (as appropriate) of the asset made by an independent, recognized expert is acceptable for depreciation and owner’s equity capital purposes. The appraisal of the historical cost of assets should produce a value approximating the cost of reproducing substantially identical assets of like type, quality, and quantity at a price level in a bona fide market as of the date of acquisition. The appraisal must be conducted in accordance with "The Principles of Appraisal Practices and Code of Ethics" of the American Society of Appraisers.

For Medicaid program purposes, the term "appraisal" refers primarily to the process of establishing or reconstructing the historical cost, fair market value, or current reproduction cost of an asset. It includes a systematic, analytic determination and the recording and analyzing of property facts, rights, investments, and values based on a personal inspection and inventory of the property.

### Appraisal Date
The date selected for establishing the value of fixed assets. For example, if December 31, 2016 was established as the appraisal date and the actual physical inventory of fixed assets was taken on February 1, 2017, any additions or dispossession of fixed assets between December 31, 2016 and February 1, 2017 must be taken into account in the appraisal values.

### Appraised Book Value
The book value of an asset's appraised cost as of the date of acquisition less accumulated depreciation computed on an approved basis up to the appraisal date.

### Appraisal Expert
An individual or firm that is experienced and specialized in multi-purpose appraisals of plant assets involving the establishment or reconstruction of the historical cost, fair market value, or current reproduction cost of such assets. The appraisal expert must employ a specially trained and well supervised staff with a complete range of appraisal and cost construction techniques; be experienced in appraisals of plant assets used by providers; and demonstrate a knowledge and understanding of the reimbursement principles, particularly those pertinent to depreciation.

13.1 APPROVAL

Medicaid does not require the nursing facility representatives to get prior approval before an appraisal is made for Medicaid purposes. Medicaid requirements are that the appraisal be conducted in accordance with the provisions of these guidelines. Questions regarding the appraisal of the nursing facility should be directed to the MDHHS LTC Reimbursement and Rate Setting Section (RARSS). (Refer to the Directory Appendix for contact information.) The provider must make the appraisal agreement and final report available to Agency staff for audit review. The scope of the appraisal must conform to Medicare Principles of Reimbursement as modified by Michigan Medicaid for provider costs in effect on the appraisal date.

13.2 NEED FOR APPRAISAL

An appraisal for Medicaid purposes should be made only where the nursing facility provider has no historical cost records, has incomplete records of the depreciable fixed assets, or needs to determine an asset's fair market value or depreciated reproduction cost. The appraisal should develop the historical cost and related information that will assist in the construction, reconstruction, or revision of accounting
records to enable the provider to make proper distribution of depreciation expense in cost reports. Normally, a proprietary provider will not need a historical cost basis of its assets. Where an appraisal is being performed to determine the current reproduction of an asset, the appraisal should represent the cost to reproduce the actual facility in like kind and should not be inflated by such factors as current or anticipated space needs or different construction types, e.g., masonry versus wood frame. Appraisals must be performed within the time limit specified in the proposed agreement and not on a piecemeal or intermittent basis.

13.3 PURCHASE OF ONGOING FACILITY

In establishing the historical cost of assets where an ongoing nursing facility is purchased through a bona fide sale after July 1, 1966 and prior to August 1, 1970, the purchase price or portion thereof attributable to the asset must not exceed the fair market value of the asset at the time of the sale. For depreciable assets acquired after July 1970, the cost basis of the depreciable assets must not exceed the lower of the current reproduction cost adjusted for straight-line depreciation over the life of the assets to the time of the sale or the fair market value of the tangible assets purchased.

If the nursing facility was participating in the Medicaid program at the time of sale, the sale price used by the seller in computing gain or loss for the final cost report must agree with the historical cost used by the new facility owner (the purchaser) in computing depreciation. However, where the basis for depreciation to the purchaser for an asset acquired after July 1970 is limited to the lower of current reproduction cost (adjusted for straight-line depreciation from the time of asset acquisition to the time of the sale) or the fair market value, the basis for computing gain or loss to the seller is the sale price. The gain or loss on the sale of each depreciable asset must be determined by allocating the lump sum sale price among all the assets sold (including land, goodwill, and any assets not related to resident care) in accordance with the fair market value of each asset as it was used by the seller at the time of sale. If the purchaser and seller cannot agree on an allocation of sale price, or if they do agree but there is insufficient documentation of the current fair market value of each asset, the SMA will require an appraisal by an independent appraisal expert to establish the fair market value of each asset and will make an allocation of the sale price in accordance with the appraisal. In any case, the sale price must be allocated among all the assets sold, even if some of the assets will be disposed of shortly after the sale.

If a purchaser cannot demonstrate that the sale is bona fide, the seller's net book value will be used by the purchaser as the basis for depreciation of the asset. In such cases, the purchaser must record the historical cost and accumulated depreciation of the seller recognized under the Medicaid program, and these must be considered as incurred by the purchaser for Medicaid purposes.

The cost basis for the depreciable assets of a nursing facility purchased in a bona fide sale on or after August 1, 1970 is limited to the lowest of the following:

- The total price paid for the facility by the purchaser as allocated to the individual assets;
- The total fair market value of the facility at the time of the sale as allocated to the individual assets;
- The combined fair market value of the individually identified assets at the time of the sale; or
- The current reproduction costs of the depreciable assets, depreciated on a straight-line basis over the life of the assets to the time of the sale.
The purchaser has the burden of proving that the transaction was a bona fide sale, and if the burden is not met, the cost basis may also not exceed the seller's cost basis less accumulated depreciation.

13.4 **FIXED ASSETS INCLUDED IN APPRAISED VALUES**

Fixed asset values established by an appraisal must include all plant assets owned by the nursing facility provider that are used in resident care or in the overall operation and administration of the facility. Fixed assets used in research and other non-allowable cost areas or functions should be included so that depreciation is reflected in those departmental costs to provide a proper basis for allocating administrative and general expense. Fixed assets of a related organization not used by a provider in rendering resident care, assets acquired in anticipation of expansion, and assets held for investment and not used in the plant operation should not be included as a part of the appraised values.

Generally accepted accounting principles relating to improvements or betterments must be followed in determining the asset values established by the appraisal. Repair or maintenance of a nature that restores an asset to its original condition but does not extend its useful life is not betterment or improvement but an expense of that period.

The pricing of assets to establish historical costs is based on such actual supporting documents as vendor invoices and construction contractor completion statements. In the absence of invoices, such other records as revenue stamps, board minutes, contracts of purchase, and deeds recorded with the county's Recorder of Deeds may be used.

Other methods, such as manufacturer's catalogs, libraries of material prices, or techniques involving reverse trending and price indices may be used to establish acquisition costs and dates. Such methods may be used only when actual supporting documents are not available. When these sources and techniques are used, consideration must be given to the manufacturers and to quantity discounts. The determined value should closely approximate the actual historical cost of an asset at the date of acquisition.

13.5 **MINOR EQUIPMENT**

Where minor equipment is concerned, the SMA recognizes that the inventory costs of such equipment may not truly reflect the cost of equipment purchased and in use by the nursing facility provider. Differences in the capitalization policies of providers and their desire to limit property record controls over certain classes of small assets cause variations in the recorded costs of assets generally considered depreciable. Medicaid will only recognize an appropriate amount for minor equipment costs where the original equipment acquisition cost was recorded in the accounting records as capital asset cost and had not previously recorded the minor equipment acquisition as current period operations expense.

Minor equipment includes, but is not limited to, such items as wastebaskets, bedpans, syringes, catheters, silverware, mops, and buckets. The general characteristics of this type of equipment are as follows:

- The equipment is in no fixed location and is subject to use by various departments in the nursing facility;
- The items are comparatively small in size and unit cost;
- The equipment is subject to inventory control;
There is a fairly large quantity of the items in use; and

The equipment has a useful life of approximately three years or less.

However, where all other depreciable assets are concerned, such as buildings, building equipment, major movable equipment, land improvements, and leasehold improvements, the Medicaid program will not recognize a historical cost of such assets in excess of the historical cost used for federal income tax purposes. Nursing facility providers should be able to support this historical cost by reference to original documents such as contracts, vouchers, checks and other evidence. If the provider does not have such original documentation constituting primary evidence of the historical cost of assets, the SMA will consider the provider's federal income tax returns as secondary evidence to be used in establishing and verifying the historical cost of the assets. Further, it is possible that because of the effects of other provisions within the Medicare Principles of Reimbursement, such as "cost to related organizations," the historical cost under Medicaid might be less than that allowed and used for income tax purposes.

Under the Principles, nursing facility providers may change the useful lives of assets where this can be justified and appropriately adjust the accumulated depreciation applicable to the historical cost of the assets involved. The effect of such adjustments is to change the undepreciated amount of the historical cost for Medicaid purposes. The Principles do not permit providers to increase the historical cost basis of their assets to recognize elements of costs or expenditures that were not capitalized but were considered as expense items.

**Example:** If a provider determines that a physical modification of the building was a repair, and thus an item of expense not capitalized, and uses the historical cost so determined for federal income tax purposes, the provider may not change the historical cost basis to include that expenditure previously determined a repair and capitalize it, i.e., increase the historical cost basis of the building for Medicaid purposes.

**Example:** If a provider builds a facility and, in establishing the historical cost of the building, determines that material and labor used were not part of the historical cost of the building and charges the cost of such material and labor into expenses for federal income tax purposes, the provider may not then include such expenditures in the historical cost of the building for Medicaid purposes.

Costs in excess of the cost basis used for federal income tax purposes will not be recognized under Medicaid. Further, for cost reporting periods beginning on or after January 1, 1970, the SMA will also require a redetermination of allowable costs for the reporting period covered to reflect the effects of the adjustment in the historical cost basis of the assets. For cost reporting periods beginning before January 1, 1970, however, no redetermination of such allowable costs need be made for the reporting periods covered. Accumulated depreciation applicable to the depreciable assets under the Medicaid program will include the full amount allowed during those periods in which an increased historical cost basis was used. The net book value will be used for computations of gain or loss on the sale of assets and for any other reimbursement purposes under Medicaid.

### 13.6 Donated Assets

The fair market value for a donated asset is the price that the asset would bring by bona fide bargaining between well-informed purchasers and sellers at the date of acquisition. Usually, the fair market price is the price at which bona fide sales have been consummated for assets of like type, quality, and quantity in a particular market at the time of acquisition.
Exception: In cases where an asset has been used or depreciated under the Medicaid program and then donated to a provider, the basis of depreciation will be the lesser of the fair market value or the net book value of the asset in the hands of the owner last participating in the program.

If the nursing facility provider's records do not include the fair market value of the donated assets as of the date of donation, an appraisal of such fair market value by a recognized appraisal expert will be acceptable for depreciation and owner's equity capital purposes.

Where material, labor, and services are donated in the construction of an asset, the asset value is the sum of the appraised cost of the material, labor, or services actually donated and the incurred cost of that part which was not donated. Labor costs should be determined in accordance with both the rates prevailing in the community at the time of construction and the type of labor incurred, i.e., if the labor donated was non-union labor, the cost would be at the non-union labor rate rather than at a union labor rate. If records are not available as to the actual labor, services, or material donated, the fair market value at the time of donation may be determined by the other methods shown in Medicare Principles of Reimbursement. Estimated labor costs provided by an owner or shareholder of a facility are not includable in the historical cost of constructed assets.

13.7 Assets Costing Less Than $100

Individual major movable assets costing less than $100, whether or not purchased in quantity prior to the appraisal date, may be capitalized at the time of appraisal at the purchase cost less accumulated depreciation from the date of acquisition regardless of the provider's past accounting practices. If an election is made to capitalize such assets, this policy must be applied consistently.

Nursing facility providers that have expensed such items while in the Medicaid program may not decide later to capitalize them. This also applies to those providers that eventually decide to have appraisals. The appraisal expert may group major movable equipment with a unit cost of $100 or less. However, the book value assigned to such grouped assets at appraisal may not exceed the book value of the assets if individually appraised. Identification of the individual assets comprising the group must be available.

13.8 Tagging of Equipment

For Medicaid program purposes, tagging of equipment is not mandatory. In the absence of tagging, however, alternate records must be maintained to satisfy audit verification of the existence and location of the assets.

13.9 Appraisal Programs

Since the condition of nursing facility provider asset records varies significantly, an appraisal program may be comprehensive or partial. For instance, a provider may engage an appraisal expert to appraise a part of its facility for which no historical records have been maintained, or a provider may need to have an appraisal made on a particular class of assets in a specific identified location.

Comprehensive appraisal programs are usually appropriate because of such complexities as lump-sum purchases of assets or a complete lack of historical cost records for all assets.
An appraisal program should include:

- A physical inventory and listing of pertinent data for all applicable assets in use or in standby status as of the appraisal date or report date. The physical inventory may be made by the provider or by the appraiser. If made by the provider, the appraiser must verify the inventory.
- The acquisition cost of each item or unit of property including, but not limited to, architect fees, installation costs, and freight.
- A classification of each item or unit of property in accordance with the American Hospital Association (AHA) Health Data and Coding Standards Group, Estimated Useful Lives of Depreciable Hospital Assets. These classifications are:
  - Land improvements;
  - Buildings, including building improvement, fixed equipment, building services equipment and other fixed equipment;
  - Major movable equipment;
  - Minor equipment; and
  - Leasehold equipment.

  **Note:** Refer to the Cost Classifications and Cost Finding section of this appendix for a comprehensive description for capital assets by category.
- Establishing an estimated useful life for each asset. The estimated useful life for purposes of the appraisal must be consistent with the estimated useful life for each asset used by the provider for depreciation purposes.
- Determining a salvage value for each asset.
- Selecting a depreciation method for each asset.
- Calculating depreciation provisions for the current reporting period.
- Calculating accumulated depreciation using an approved basis, from the date of acquisition to the start of the Medicaid reporting period in which actual depreciation is first claimed.
- Determining square footage for each cost center to identify all rooms on a floor or within a building if the provider did not previously do this. This should be accomplished as explained in the AHA Cost Finding and Rate Setting for Hospitals publication.
- Reconciling appraisal results with provider records. For assets acquired prior to January 1, 1966, the provider's plant asset records, if any, and accounting records must be considered even though they may be inaccurate. This reconciliation must be made for land improvements, buildings, building services equipment and, where possible, for other major asset classifications.

Where applicable, differences discussed by the reconciliation must be reflected as adjustments in the provider's accounting and plant asset records.

**13.10 APPRAISAL REPORT**

The appraisal expert must prepare a letter of certification. The letter should state that, in the appraisal expert's judgment, the appraisal results were determined in conformity with Medicaid program regulations and requirements. This letter will include such information as:
Name of the nursing facility provider for which the appraisal was conducted;
Location(s) of the facility included in the appraisal;
Appraisal date, the date up to which accumulated depreciation was calculated (if other than the appraisal date), and the period for which current depreciation is calculated;
Contents of data supplied to the provider, i.e., summaries, schedules, plans, etc.;
Appraisal program descriptions, including:
  ➢ The extent of asset appraisal, i.e., assets physically inventoried,
  ➢ Pricing basis, and
  ➢ Other pertinent information not readily apparent in the detail results, such as depreciation methods.
Policy for determining capitalizable assets;
Depreciation policy in the year of acquisition and disposal; and
Identification of material items included in the appraisal where the values of such items were obtained from outside sources without independent verification by the appraisal expert.

13.11 LISTING OF ASSETS APPRAISED

If a listing of assets that constitutes the nursing facility provider's Medicaid property records is supplied, it must contain all necessary and pertinent information, even if portions were determined solely by the provider. A listing of assets should include the following information for each asset:

  ➢ Building location;
  ➢ Cost center or department;
  ➢ Asset description, usually including manufacturer’s name, model number, serial number, etc.;
  ➢ AHA asset classification;
  ➢ Historical cost;
  ➢ Acquisition date;
  ➢ Estimated useful life to provider;
  ➢ Salvage value;
  ➢ Depreciation provision for current reporting period;
  ➢ Accumulated depreciation provision for current reporting period; and
  ➢ Pricing method necessary for adequate disclosure, where more than one method was used for various assets.

Reconciliations and comparisons with provider records must also be included, as well as square footage and other allocation basis information for buildings and cost centers within buildings.
13.12 **Records**

Appraisal work papers must be made available to SMA staff or their designee upon reasonable request.

13.13 **Appraisal Expense**

The expense of an appraisal to establish plant records for Medicaid program purposes, including the expense for appraisal of research and other non-resident departments incurred by a nursing facility provider after entrance into the program, may be included as an allowable cost. The expenses will be considered as administrative costs in the period incurred, subject to apportionment to the Medicaid program. Appraisal expenses incurred relative to assets not connected with provider operations are not allowable costs.

Where providers have appraisals made for other business purposes, such as insurance coverage, tax values or financing, the incurred expenses for such appraisals may be included in allowable costs as part of administrative and general costs. However, appraisal expenses incurred to establish values for the sale or anticipated sale of the nursing facility or provider organization are not allowable costs.

Where the SMA determines that a provider has incurred appraisal expenses to establish the historical cost of assets which were already adequately reflected in its books, records, or tax returns, the cost of performing the appraisal is not allowable.
**SECTION 14 – COST REPORTING AND REIMBURSEMENT DESCRIPTIONS AND CLASSIFICATIONS**

**14.1 GENERAL**

Refer to Cost Classifications and Cost Finding section of this appendix for detailed discussion and description of program cost categories for Plant, Variable Base, Support and Base/Support.

SECTION 1 – GENERAL INFORMATION

This chapter applies to enrolled outpatient therapy providers.

The primary objective of Medicaid is to ensure that essential medical/health services are made available to those who would not otherwise have the financial resources to purchase them. The primary objective of the Children’s Special Health Care Services (CSHCS) Program is to ensure that CSHCS beneficiaries receive medically necessary services, recommended and supported by a pediatric subspecialist, with care coordination that relates to the CSHCS qualifying diagnosis. Policies are aimed at maximizing the health care services obtained for this population with the limited number of dollars available.

The term Medicaid throughout this chapter refers to both the Medicaid and CSHCS programs.

1.1 SERVICE PROVISION

Outpatient therapy may be provided by Medicaid-enrolled providers when performed by properly credentialed professionals in the following settings:

- Outpatient Occupational Therapy (OT) and Physical Therapy (PT)
  - Outpatient Hospital
  - Comprehensive Outpatient Rehabilitation Facility (CORF)
  - Outpatient Rehabilitation Agency (Rehab Agencies)
  - CARF-Accredited Outpatient Medical Rehabilitation Program
  - Physical Therapist or Occupational Therapist in Private Practice (Medicare coinsurance and deductible amounts only)
  - Physician's Office
  - Optometrist's Office

- Outpatient Speech Language Pathology (ST)
  - Outpatient Hospital
  - Comprehensive Outpatient Rehabilitation Facility (CORF)
  - Outpatient Rehabilitation Agency (Rehab Agencies)
  - CARF-Accredited Medical Rehabilitation Program
  - CAA-Accredited University Graduate Education Program

1.2 OUTPATIENT THERAPY DATABASE

For specifics regarding Medicaid coverage of the Healthcare Common Procedure Coding System (HCPCS), refer to the Michigan Department of Health and Human Services (MDHHS) Outpatient Therapy Database on the MDHHS website. (Refer to the Directory Appendix for website information.) The database includes all covered outpatient therapy codes and applicable frequency limits.
1.3 DOCUMENTATION IN BENEFICIARY FILE

Outpatient therapy providers must maintain all applicable documentation in the beneficiary's file for seven years. For audit purposes, the patient's medical record must substantiate the medical necessity of the item or service supplied.
SECTION 2 – PROVIDER REQUIREMENTS

2.1 OUTPATIENT HOSPITALS

Outpatient OT, PT and ST services may be provided to beneficiaries of all ages in the outpatient hospital.

2.2 COMPREHENSIVE OUTPATIENT REHABILITATION FACILITIES AND OUTPATIENT REHABILITATION AGENCIES

Comprehensive Outpatient Rehabilitation Facilities (CORFs) and Rehab Agencies may enroll with Medicaid for reimbursement of outpatient OT, PT and ST provided by qualified professionals. All CORFs and Rehab Agencies must provide proof of Medicare certification when enrolling in Medicaid.

2.3 COMMISSION ON ACCREDITATION OF REHABILITATION FACILITIES (CARF) ACCREDITED OUTPATIENT MEDICAL REHABILITATION PROGRAMS

CARF accredited outpatient medical rehabilitation programs may enroll with Medicaid for reimbursement of outpatient OT, PT and ST services provided by qualified professionals. The program must be freestanding and not part of, or owned by, a hospital, CORF or Rehab Agency. All CARF accredited outpatient medical rehabilitation programs must provide proof of their current CARF accreditation when enrolling in Medicaid.

2.4 UNIVERSITY AFFILIATED SPEECH-LANGUAGE PATHOLOGY GRADUATE EDUCATION PROGRAMS

University graduate education programs accredited by the American Speech-Language-Hearing Association’s (ASHA) Council on Academic Accreditation (CAA) in Audiology and Speech-Language Pathology may enroll with Medicaid for reimbursement of outpatient ST provided by qualified professionals. The university program must be freestanding and not part of, or owned by, a hospital, CORF or Rehab Agency. All university programs must provide proof of their current ASHA-CAA when enrolling in Medicaid.

2.5 PHYSICAL THERAPISTS AND OCCUPATIONAL THERAPISTS IN PRIVATE PRACTICE

Medicaid enrolls physical therapists and occupational therapists in private practice only for reimbursement of the Medicare coinsurance and deductible on behalf of dual Medicaid/Medicare beneficiaries. These providers may not bill for services provided to beneficiaries with Medicaid or CSHCS only.

2.6 PHYSICIAN’S OFFICE OR CLINIC

OT and PT services may be provided to beneficiaries of all ages in a physician’s office.
SECTION 3 - CSHCS REQUIREMENTS

As a condition to participate in the CSHCS program, the beneficiary's assigned pediatric subspecialist must coordinate treatment and services relating to the beneficiary's CSHCS-qualifying diagnosis. CSHCS beneficiaries must be referred by their pediatric subspecialist directly to the specified Medicaid-enrolled provider of therapy services. Documentation of this referral must remain in the beneficiary's medical record.

CSHCS diagnostic evaluations authorized by the local health department do not require a referral by the pediatric subspecialist.

CSHCS-covered outpatient therapy services must be directly related to the CSHCS-eligible diagnosis. Therapists providing or supervising services provided to CSHCS beneficiaries must have obtained at least one year of prior professional experience treating the health care needs of pediatric patients with physical disabilities. Professional resumes documenting pediatric experience, as well as a copy of the facility's program description and mission/vision statement, must be submitted to the MDHHS Program Review Division. (Refer to the Directory Appendix for contact information.) CSHCS will make the determination, based on this documentation, of whether the provider is approved to provide therapy services to CSHCS beneficiaries.

Once approved to provide therapy services to CSHCS beneficiaries, the provider may accept referrals from the pediatric subspecialist. When a CSHCS beneficiary presents for services, the provider must check the beneficiary's CSHCS Client Eligibility Notice. Before billing for therapy services, the enrolled provider must be listed on the beneficiary's CSHCS Client Eligibility Notice. Providers may contact the MDHHS Program Review Division to request addition to a Client Eligibility Notice. (Refer to the Directory Appendix for contact information.)

These requirements do not apply to services provided to Medicaid-only or dual Medicaid/CSHCS beneficiaries.
SECTION 4 – PRIOR AUTHORIZATION REQUESTS

PA is required for certain services before the services are rendered. To determine which services require PA, refer to the Standards of Coverage and Service Limitations Section of this chapter or the MDHHS Outpatient Therapy Database on the MDHHS website. (Refer to the Directory Appendix for website information.)

Requests for PA for all services must be submitted on the Occupational Therapy-Physical Therapy-Speech Therapy Prior Approval Request/Authorization form (MSA-115). (Refer to the Forms Appendix or the MDHHS website for a copy of the form.) Required medical documentation must accompany the form. The information on the PA request form must be:

- Typed – All information must be clearly typed in the designated boxes of the form.
- Thorough – Complete information, including the appropriate HCPCS procedure codes, must be provided on the form. The form and all documentation must include the beneficiary name and Medicaid identification (ID) number, provider name, address and the provider’s NPI number.

PA request forms for all eligible Medicaid beneficiaries must be sent or faxed to the MDHHS Program Review Division. To check the status of a PA request, contact the MDHHS Program Review Division via telephone. (Refer to the Directory Appendix for contact information.)

4.1 EMERGENCY PRIOR AUTHORIZATION

A provider may contact MDHHS to obtain a verbal PA when the physician/physician assistant providing the medical clearance has indicated that it is medically necessary to provide the service within a 24-hour time period.

To obtain verbal PA, providers may call or fax a request. If the provider faxes a request, the request must state, “verbal prior authorization required.” (Refer to the Directory Appendix for contact information.)

If a service is required during MDHHS nonworking hours, providers must contact the Program Review Division the next working day.

The following steps must still be completed before a PA number is issued for billing purposes:

- The verbal authorization date must be entered on the MSA-115.
- The MSA-115 must be submitted to the Program Review Division within 30 days of the verbal authorization.
- Supporting documentation must be submitted along with the PA request.

The verbal authorization does not guarantee reimbursement for the services if:

- The beneficiary was not eligible when the service was provided.
- The Program Review Division does not receive the completed MSA-115 and required documentation within 30 days of the verbal authorization.
- The required documentation is dated after the date of service.
4.2 RETROACTIVE PRIOR AUTHORIZATION

Services provided before PA is requested are not covered unless the beneficiary was not eligible on the date of service (DOS) and a subsequent eligibility determination was made retroactive to the DOS. If the MDHHS record does not show that retroactive eligibility was approved, then the request for retroactive PA is denied.

4.3 BENEFICIARY ELIGIBILITY

Approval of a service on the MSA-115 confirms that the service is authorized for the beneficiary. The approval does not guarantee that the beneficiary is eligible. To assure payment, the provider must verify eligibility for fee-for-service (FFS) Medicaid or CSHCS before initiating services.

4.4 REIMBURSEMENT AMOUNTS

Outpatient therapy services are processed through the MDHHS Outpatient Prospective Payment System (OPPS) utilizing Medicare fee screens with an MDHHS reduction factor applied. For NOC codes and all codes without established fee screens, the approved reimbursement amount is indicated on the authorized PA request.

4.5 BILLING AUTHORIZED SERVICES

After authorization is issued, the information (e.g., PA number, procedure code, modifier, and quantity) that was approved on the authorization must match the information on the claim form. (Refer to the Billing & Reimbursement Chapters of this manual for complete billing instructions.)

The copy of the PA request returned to the provider must be retained in the beneficiary's medical record.
SECTION 5 – STANDARDS OF COVERAGE AND SERVICE LIMITATIONS

5.1 OCCUPATIONAL THERAPY

MDHHS uses the terms Occupational Therapy, OT, and therapy interchangeably. OT is covered when furnished by a Medicaid-enrolled outpatient therapy provider when performed by:

- A licensed occupational therapist (OT);
- A licensed occupational therapy assistant (OTA) under the supervision of an OT (i.e., the OTA’s services must follow the evaluation and treatment plan developed by the OT, and the OT must supervise and monitor the OTA’s performance with continuous assessment of the beneficiary’s progress). All documentation must be reviewed and signed by the appropriate supervising OT; or
- A student completing his clinical affiliation under the direct supervision of (i.e., in the presence of) an OT. All documentation must be reviewed and signed by the supervising OT.

OT is considered an all-inclusive charge and MDHHS does not reimburse for a clinic room charge in addition to OT services unless it is unrelated. MDHHS expects OTs and OTAs to utilize the most ethically appropriate therapy within their scope of practice as defined by state law and/or the appropriate national professional association. OT must be medically necessary, reasonable and required to:

- Return the beneficiary to the functional level prior to illness or disability;
- Return the beneficiary to a functional level that is appropriate to a stable medical status; or
- Prevent a reduction in medical or functional status had the therapy not been provided.

<table>
<thead>
<tr>
<th>For CSHCS beneficiaries</th>
<th>OT must be directly related to the CSHCS-eligible diagnosis(es) and prescribed by the specialty physician who is overseeing care.</th>
</tr>
</thead>
<tbody>
<tr>
<td>For beneficiaries 21 years of age and older</td>
<td>OT is only covered if it can be reasonably expected to result in a meaningful improvement in the beneficiary’s ability to perform functional day-to-day activities that are significant in the beneficiary’s life roles despite impairments, activity limitations or participation restrictions.</td>
</tr>
</tbody>
</table>

MDHHS anticipates OT will result in a functional improvement that is significant to the beneficiary’s ability to perform appropriate daily living tasks (per beneficiary’s chronological, developmental, or functional status). Functional improvements must be achieved in a reasonable amount of time and must be maintainable. MDHHS does not cover therapy that does not have an impact on the beneficiary’s ability to perform age-appropriate tasks.

OT must be skilled (i.e., require the skills, knowledge and education of an OT). MDHHS does not cover interventions provided by another practitioner (e.g., teacher, registered nurse [RN], licensed physical therapist [PT], family member, or caregiver).
OT may be covered for one or more of the following:

- Therapeutic use of occupations*.
- Adaptation of environments and processes to enhance functional performance in occupations*.
- Graded tasks (performance components) in activities as prerequisites to an engagement in occupations*.
- Design, fabrication, application, or training in the use of assistive technology or orthotic devices.
- Skilled services that are designed to set up, train, monitor, and modify a maintenance or prevention program to be carried out by family or caregivers. Routine provision of the maintenance/prevention program is not a covered OT service.

* Occupations are goal-directed activities that extend over time (i.e., performed repeatedly), are meaningful to the performer, and involve multiple steps or tasks. For example, doing dishes is a repeated task. Buying dishes happens once; therefore, does not extend over time and is not a repeated task.

OT is not covered for the following:

- When provided by an independent OT**.
- For educational, vocational, or recreational purposes.
- If services are required to be provided by another public agency (e.g., community mental health services provider, school-based services).
- If therapy requires PA and service is rendered before PA is approved.
- If therapy is habilitative. Habilitative treatment includes teaching someone how to perform a task (i.e., daily living skill) for the first time without compensatory techniques or processes. This may include teaching a child normal dressing techniques or cooking skills to an adult who has not performed meal preparation tasks in the past.

** An independent OT may enroll in Medicaid to provide Medicare-covered therapy and bill Medicaid only for Medicare coinsurance and/or deductible.

Note: Federal EPSDT regulations require coverage of medically necessary treatment for children under 21 years of age, including medically necessary habilitative therapy services.

5.1.A. DUPLICATION OF SERVICES

Some therapy areas (e.g., dysphagia, assistive technology, hand therapy) may be appropriately addressed by more than one discipline (e.g., OT, PT, speech therapy) in more than one setting. MDHHS does not cover duplication of service (i.e., where two disciplines are working on similar goals/areas). The OT is responsible to communicate...
with other therapists and coordinate services. MDHHS requires any related documentation to include coordination of services.

5.1.B. SERVICES TO SCHOOL-AGED BENEFICIARIES

School-aged beneficiaries may be eligible to receive OT through multiple sources. MDHHS expects educational OT to be provided by the school system, and it is not covered by MDHHS or CSHCS. (Example: OT coordination for handwriting, increasing attention span, identifying colors and numbers.)

MDHHS only covers medically necessary OT when provided in the outpatient setting. Coordination between all OT providers must be continuous to ensure a smooth transition between sources.

Outpatient therapy provided to school-aged children during the summer months in order to maintain the therapy services provided in the school is considered a continuation of therapy services when there is no change in beneficiary diagnosis or function. Prior authorization is required before initiating a continuation of therapy.

If a school-aged beneficiary receives medically necessary therapy services in both a school setting (as part of an Individualized Education Plan [IEP]) and in an outpatient setting, coordination of therapy between the providers is required. Providers are to maintain documentation of coordination in the beneficiary’s file.

5.1.C. AQUATIC THERAPY

Medicaid does not cover aquatic therapy as a separately reimbursable treatment or modality. A covered therapeutic procedure performed in a pool would be reimbursed when billed using the HCPCS code describing the covered procedure as long as the service met all Medicaid coverage requirements.

5.1.D. GROUP THERAPY

OT is not covered by Medicaid when provided concurrently to a group of two or more individuals by the same therapist. Covered therapeutic procedures require direct (one-to-one) patient contact by the therapist.

5.1.E. SERIAL CASTING

Serial casting is a process in which a joint(s) which normally lacks full range of motion, is immobilized with a rigid cast. During this procedure, the affected joint(s) is gradually and repeatedly set in more anatomically correct alignment to improve joint alignment and/or to achieve a decrease in abnormal tone and increased muscle length, resulting in an increase in the range of motion.

Casts are applied and removed in succession, usually every week, over a specified period of time. Upon removal of each cast, the limb is stretched and a new cast is applied immediately to hold the limb in place.
Serial casting is a covered Medicaid/CSHCS benefit when performed by or under the direct supervision of a qualified therapist and defined in a treatment plan as medically necessary rehabilitation services for improving range of motion and/or reducing abnormal tone. Either the referral for therapy services must specifically indicate that the beneficiary is being referred for serial casting, or the referring provider must provide written concurrence of any treatment plan, including serial casting. For CSHCS beneficiaries without dual Medicaid eligibility, the service must be directly related to the CSHCS-eligible diagnosis and must be referred by the beneficiary’s assigned pediatric subspecialist.

5.1.F. PRESCRIPTION REQUIREMENTS

MDHHS requires a prescription from a physician/physician assistant for an OT evaluation and preparation of the treatment plan. The prescription must include beneficiary name, prescribed therapy, and diagnosis(es) or medical condition(s). MDHHS requires a new prescription if OT is not initiated within 30 days of the prescription date. An evaluation may be provided for the same medical diagnosis without PA twice in a 365-day period with a prescription. PA is required if an evaluation is needed more frequently.

<table>
<thead>
<tr>
<th>Evaluations</th>
<th>Evaluations must include standardized tests and/or measurable functional baselines. OT evaluations must be completed by an OT and include the following:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• Treatment diagnosis and medical diagnosis, if different from the treatment diagnosis(es) (e.g., medical diagnosis of cerebral palsy with contractures being treated);</td>
</tr>
<tr>
<td></td>
<td>• OT provided previously, including facility/site, dates, duration, and summary of change;</td>
</tr>
<tr>
<td></td>
<td>• Current therapy being provided to the beneficiary in this or other settings;</td>
</tr>
<tr>
<td></td>
<td>• Medical history as it relates to the current course of therapy;</td>
</tr>
<tr>
<td></td>
<td>• The beneficiary’s current functional status (functional baseline);</td>
</tr>
<tr>
<td></td>
<td>• Standardized and other evaluation tools used to establish the baseline and to document progress;</td>
</tr>
<tr>
<td></td>
<td>• Assessment of the beneficiary’s performance components (strength, dexterity, range of motion, sensation, perception) directly affecting the beneficiary’s ability to function; and</td>
</tr>
<tr>
<td></td>
<td>• Assessment of the beneficiary’s cognitive skill level (e.g., ability to follow directions, including auditory and visual comprehension).</td>
</tr>
</tbody>
</table>

| Treatment Plan | The OT treatment plan that results from the evaluation must consist of the following: |
|               | • Time-related short-term goals that are measurable, functional, and significant to the beneficiary’s life goals; |
|               | • Long-term goals that identify specific functional maximum reasonable achievement, which serve as indicators for discharge from therapy; |
|               | • Anticipated frequency and duration of treatment required to meet short- and long-term goals; |
### Initiation of Services

OT may be initiated without PA upon completion of the assessment and development of a treatment plan that is reasonable and medically necessary as documented in the patient record. The outpatient setting allows up to 144 units of OT services provided in the initial 12-month treatment period. If therapy is not initiated within 30 days of the prescription date, a new prescription is required.

PA is not required for the initial period of skilled therapy for the first 12 consecutive calendar months in the outpatient setting for a new treatment diagnosis or new medical diagnosis if:
- The beneficiary remains Medicaid-eligible during the period therapy is provided.
- A copy of the signed and dated (within 30 days of initiation of services) prescription for OT is on file in the beneficiary’s medical record.

Providers may initiate services without PA when there is a change in the treatment diagnosis and/or medical diagnosis resulting in decreased functional ability.

OT must be provided by the evaluating discipline. (Example: A speech-language pathologist cannot provide treatment under an occupational therapist’s evaluation.) Cosigning of evaluations and sharing treatments require PA.

MDHHS does not cover the service when Medicare determines that the service is not medically necessary.

### Requirements of Continued Therapy

The OT must request PA to continue therapy beyond the initial 12 months. When requesting PA, providers must complete the MSA-115. MDHHS returns a copy of the PA to the provider, and it must be retained in the beneficiary’s medical record.

Requests to continue active therapy must be supported by the following:
- Treatment summary of previous OT period, including measurable progress on each short- and long-term goal. This must include the treating OT’s analysis of the therapy provided during the previous month, rate of progress, and justification for any change in the treatment plan. Do not send daily treatment notes.
- Progress summary related to the identified treatment goals, reporting progress toward those goals, as well as revised goals for the requested period of therapy.
- Documentation related to the period no more than 30 days prior to that time period for which prior approval is being requested.
- Statement of the beneficiary’s response to treatment, including factors that have affected progress during this interim.
- Statement detailing coordination of services with other therapies (e.g., medical and educational) if appropriate.
A copy of the prescription must be provided with each request. The prescription must be hand-signed by the referring provider and dated within 30 days prior to initiation of the continued service.

A discharge plan.

When a beneficiary completes 144 units of initial therapy and then chooses to change providers for continued therapy, prior authorization for the continued therapy is required.

In some cases, the beneficiary does not require active treatment, but the skills of an OT are required for training or monitoring of maintenance programs being carried out by family and/or caregivers, or continued follow-up for the fit and function of orthotic or prosthetic devices. PA is not required for these types of service for up to four times per 12-month period in the outpatient setting.

If continued maintenance therapy is needed after the initial period specified in the paragraph above, PA is required. The OT must complete an MSA-115 and include the following:

- Service summary, including a description of the skilled services being provided (to include the treating OT’S analysis of the rate of progress, and justification for any change in the treatment plan). Documentation must relate to the period immediately prior to that time period for which PA is being requested.
- A comprehensive description of the maintenance/activity plan.
- A statement of the beneficiary’s response to treatment, including factors that have affected progress during this interim.
- A statement detailing coordination of services with other therapies (medical and educational) if appropriate.
- The anticipated discharge plan.
- The anticipated frequency and duration of continued maintenance/monitoring.

5.2 PHYSICAL THERAPY

MDHHS uses the terms physical therapy, PT and therapy interchangeably. PT is covered when furnished by a Medicaid-enrolled outpatient therapy provider and performed by a licensed Physical Therapist (PT) or an appropriately supervised licensed Physical Therapy Assistant (PTA).

**The PT must supervise and monitor the PTA’s performance with continuous assessment of the beneficiary’s progress. All documentation must be reviewed and signed by the supervising PT.**

PT must be medically necessary and reasonable for the maximum reduction of physical disability and restoration of a beneficiary to his/her best possible functional level.
For CSHCS beneficiaries
PT must be directly related to the CSHCS-eligible diagnosis(es) and prescribed by the specialty physician who is overseeing the beneficiary's care. Functional progress must be demonstrated and documented.

For beneficiaries 21 years of age and older
PT is covered if it can be reasonably expected to result in a meaningful improvement in the beneficiary's ability to perform functional day-to-day activities that are significant to the beneficiary's life roles despite impairments, activity limitations or participation restrictions.

MDHHS anticipates PT will result in significant functional improvement in the beneficiary's ability to perform mobility skills appropriate to his chronological, developmental, or functional status. These functional improvements should be able to be achieved in a reasonable amount of time and should be durable (i.e., maintainable). PT making changes in components of function that do not have an impact on the beneficiary's ability to perform age-appropriate tasks is not covered.

PT must be skilled (i.e., require the skills, knowledge and education of a PT). MDHHS does not cover interventions provided by another practitioner (e.g., teacher, RN, OT, family member, or caregiver).

MDHHS covers the physical therapist's initial evaluation of the beneficiary's needs and design of the PT program. The program must be appropriate to the beneficiary's capacity, tolerance, treatment objectives, and include the instructions to the beneficiary and support personnel (e.g., aides or nursing personnel) for delivery of the individualized treatment plan. MDHHS covers infrequent reevaluations, if appropriate.

The cost of supplies and equipment used as part of the therapy program is included in the reimbursement for the therapy. MDHHS only covers a clinic room charge in addition to PT if it is unrelated.

PT services may be covered for one or more of the following reasons:

- PT is expected to result in the restoration or amelioration of the anatomical or physical basis for the restriction in performing age-appropriate functional mobility skills;
- PT service is diagnostic;
- PT is for a temporary condition that creates decreased mobility and/or function; or
- Skilled PT services are designed to set up, train, monitor, and modify a maintenance or prevention program to be performed by family or caregivers. MDHHS does not reimburse for routine provision of the maintenance/prevention program.

PT may include:

- Training in functional mobility skills (e.g., ambulation, transfers, and wheelchair mobility);
- Stretching for improved flexibility;
- Instruction of family or caregivers;
- Modalities to allow gains of function, strength, or mobility; and/or
- Training in the use of orthotic/prosthetic devices.
MDHHS requires a new prescription if PT is not initiated within 30 days of the prescription date.

PT is not covered for the following:

- When PT is provided by an independent PT. (An independent PT may enroll in Medicaid if they provide Medicare-covered therapy and intend to bill Medicaid for Medicare coinsurance and/or deductible only.)
- When PT is for educational, vocational, or recreational purposes.
- If PT services are required to be provided by another public agency (e.g., CMHSP services, school-based services [SBS]).
- If PT requires PA and services are rendered prior to approval.
- If PT is habilitative therapy. Habilitative treatment includes teaching a beneficiary how to perform a task (i.e., daily living skill) for the first time without compensatory techniques or processes. For example, teaching a child normal dressing techniques or teaching cooking skills to an adult who has not performed meal preparation tasks previously.

Note: Federal EPSDT regulations require coverage of medically necessary treatment for children under 21 years of age, including medically necessary habilitative therapy services.

- If PT is designed to facilitate the normal progression of development without compensatory techniques or processes.
- If PT is a continuation of PT that is maintenance in nature.
- If PT services are provided to meet developmental milestones.
- If PT services are not covered by Medicare as medically necessary.

Only medically necessary PT may be provided in the outpatient setting. Coordination between all PT providers must be continuous to ensure a smooth transition between sources.

5.2.A. DUPLICATION OF SERVICES

MDHHS recognizes some areas of therapy (e.g., dysphagia, assistive technology, hand therapy) may also be addressed appropriately by multiple disciplines (e.g., OT, PT, speech therapy) in more than one setting. MDHHS does not cover two disciplines working on similar areas/goals. The PT is responsible for coordinating/communicating with other therapists and providing documentation in the medical record.

5.2.B. SERVICES TO SCHOOL-AGED BENEFICIARIES

MDHHS recognizes school-aged beneficiaries may be eligible to receive PT through multiple sources. MDHHS expects educational PT (e.g., strengthening to play school sports) to be provided by the school system and is not covered by MDHHS or CSHCS.

Outpatient therapy provided to school-aged children during the summer months in order to maintain the therapy services provided in the school is considered a continuation of therapy services when there is no change in beneficiary diagnosis or function. Prior authorization is required before initiating a continuation of therapy.
If a school-aged beneficiary receives medically necessary therapy services in both a school setting (as part of an Individualized Education Plan [IEP]) and in an outpatient setting, coordination of therapy between the providers is required. Providers are to maintain documentation of coordination in the beneficiary's file.

5.2.C. AQUATIC THERAPY

Medicaid does not cover aquatic therapy as a separately reimbursable treatment or modality. A covered therapeutic procedure performed in a pool would be reimbursed when billed using the HCPCS code describing the covered procedure as long as the service met all Medicaid coverage requirements.

5.2.D. GROUP THERAPY

PT is not covered by Medicaid when provided concurrently to a group of two or more individuals by the same therapist. Covered therapeutic procedures require direct (one-to-one) patient contact by the therapist.

5.2.E. SERIAL CASTING

Serial casting is a process in which a joint(s), which normally lacks full range of motion, is immobilized with a rigid cast. During this procedure, the affected joint(s) is gradually and repeatedly set in more anatomically correct alignment to improve joint alignment and/or to achieve a decrease in abnormal tone and increased muscle length, resulting in an increase in the range of motion.

Casts are applied and removed in succession, usually every week, over a specified period of time. Upon removal of each cast, the limb is stretched and a new cast is applied immediately to hold the limb in place.

Serial casting is a covered Medicaid/CSHCS benefit when performed by or under the direct supervision of a qualified therapist and defined in a treatment plan as medically necessary rehabilitation services for improving range of motion and/or reducing abnormal tone. Either the referral for therapy services must specifically indicate that the beneficiary is being referred for serial casting, or the referring provider must provide written concurrence of any treatment plan, including serial casting. For CSHCS beneficiaries without dual Medicaid eligibility, the service must be directly related to the CSHCS-eligible diagnosis and must be referred by the beneficiary's assigned pediatric subspecialist. This may be met by the referring provider's dated signature on the PT plan of care.

5.2.F. PRESCRIPTION REQUIREMENTS

MDHHS requires a prescription from a physician/physician assistant for a PT evaluation and preparation of the treatment plan. It must include the beneficiary’s name, prescribed therapy and diagnosis(es) or medical condition. A new prescription is required if PT is not initiated within 30 days of the prescription date.
### Evaluation

MDHHS does not require PA for evaluations. An evaluation is formalized testing in the early stages of a beneficiary's treatment program followed by periodic testing and reports to indicate the disposition of the beneficiary's treatment. Evaluations may be provided for the same diagnosis without PA twice in a 365-day period with a prescription. PA is required for more frequent evaluations.

PT evaluations must be completed by a PT, include standardized tests and/or measurable functional baselines, and include:

- Treatment and medical diagnosis, if different than the treatment diagnosis (e.g., medical diagnosis of cerebral vascular accident with gait treatment);
- PT previously provided, facility/site, dates, duration, and summary of change;
- Current therapy provided in this or other settings;
- Medical history as it relates to current PT;
- Beneficiary's current functional status (i.e., functional baseline);
- Standardized and other evaluation tools used to establish the baseline and to document progress;
- Assessment of the beneficiary’s performance components (e.g., strength, dexterity, range of motion) directly affecting the beneficiary’s ability to function; and
- Assessment of the beneficiary’s cognitive skill level (e.g., ability to follow directions, including auditory, visual, and comprehensive).

### Treatment Plan

MDHHS requires a PT treatment plan immediately follow the evaluation. The treatment plan must include:

- Time-related short-term goals that are measurable, functional, and significant to the beneficiary's function and/or mobility;
- Long-term goals that identify specific functional maximum reasonable achievement, which serve as indicators for discharge from therapy;
- Anticipated frequency and duration of treatment required to meet short-term and long-term goals;
- Plan for discharge from service, including the development of follow-up activities/maintenance programs;
- Statement detailing coordination of services with other therapies (e.g., medical and educational); and
- Prescribing provider signature verifying acceptance of the treatment plan.

CSHCS beneficiaries must have a treatment plan signed by the referring specialty physician.
## Initiation of Services

MDHHS requires PT be initiated upon completion of an evaluation and development of a treatment plan that supports the reasonableness and medical necessity of therapy without PA. For the initial period, PT may be provided up to 144 units in 12 months in the outpatient setting. PT must be provided by the evaluating discipline (e.g., OT cannot provide treatment under a PT’s evaluation). Cosigning evaluations and sharing treatment requires PA. MDHHS does not require PA for the initial period of skilled therapy the first 12 consecutive calendar months in the outpatient setting for a new treatment diagnosis or new medical diagnosis if:
- Beneficiary remains Medicaid-eligible during the period therapy is provided; and
- A copy of the signed and dated (within 30 days of initiation of services) prescription for PT is on file in the medical record.

MDHHS does not require PA when PT services are initiated when there is a change in the treatment diagnosis and/or medical diagnosis resulting in decreased functional ability.

## Continued Active Treatment

MDHHS requires providers to obtain PA to continue PT beyond the initial 12 months. Providers must complete the MSA-115. MDHHS returns a copy of the PA to the provider after processing the request. The PA must be retained in the beneficiary’s medical record. Requests to continue Active Therapy must contain:
- A treatment summary of the previous period of PT, including measurable progress on each short-term and long-term goal. This should include the treating PT’s analysis of the therapy provided during the previous month, the rate of progress, and justification for any change in the treatment plan. Do not send daily treatment notes.
- A progress summary related to the identified treatment goals, reporting progress toward those goals, as well as revised goals for the requested period of PT.
- Documentation related to the period no more than 30 days prior to that time period for which PA is being requested.
- A statement of the beneficiary’s response to treatment, including factors that have affected progress during this interim.
- A statement detailing coordination of services with other therapies (e.g., medical and educational), if appropriate.
- A copy of the prescription, hand-signed by the referring provider and dated within 30 days prior to initiation of continued service, must be provided for each request.
- A discharge plan.

When a beneficiary completes 144 units of initial therapy and then chooses to change providers for continued therapy, prior authorization for the continued therapy is required.
MDHHS recognizes that, in some cases, a beneficiary does not require active treatment but the skills of a PT are necessary for training, modifying, or monitoring of maintenance programs being performed by family and/or caregivers. PA is not required for these types of services for up to four times in 12 months for the outpatient setting.

If continued maintenance therapy is needed after the initial period specified in the paragraph above, PA is required for up to 90 consecutive calendar days in the outpatient setting.

The PT must complete an MSA-115 and include:

- A service summary, including a description of the skilled services being provided (including the treatment PT’s analysis of the rate of progress, and justification for any change in the treatment plan). Documentation must relate to the period immediately prior to that time period for which PA is requested.
- A comprehensive description or copy of the maintenance/activity plan.
- A statement of the beneficiary’s response to treatment, including factors that have affected progress during this interim.
- A statement detailing coordination of services with other therapies (e.g., medical and educational), if appropriate.
- A discharge plan.

5.2.G. DISCHARGE SUMMARY

MDHHS requires the PT to document a discharge summary to identify the completion of PT services and the discharge status. This must include:

- Dates of service (i.e., initial and discharge dates);
- Description of services provided;
- Functional status related to treatment areas/goals at discharge;
- Analysis of the effectiveness of the therapy program, including reasons for goals not met or changes in the treatment plan necessitated by changes in medical status;
- Description or copy of follow-up or maintenance program put into place, if appropriate;
- Identification of adaptive equipment provided (e.g., walker) and its current utilization, if appropriate; and
- Recommendations/referral to other services, if appropriate.

5.3 SPEECH THERAPY

The terms speech therapy, speech-language pathology, speech-language therapy, and therapy are used to mean speech and language rehabilitation services and speech-language therapy.

MDHHS covers speech-language therapy provided in the outpatient setting. MDHHS only reimburses services for speech-language therapy when provided by:

- A speech-language pathologist (SLP) with a current license.
An appropriately supervised SLP candidate (i.e., in their clinical fellowship year [CFY]) or having completed all requirements but has not obtained a license. All documentation must be reviewed and signed by the appropriately credentialed supervising SLP.

A student completing his clinical affiliation under direct supervision of (i.e., in the presence of) an SLP having a current license. All documentation must be reviewed and signed by the appropriately credentialed supervising SLP.

MDHHS expects that all SLPs will utilize the most ethically appropriate therapy within their scope of practice as defined by Michigan law and/or the appropriate national professional association.

Speech therapy must relate to a medical diagnosis, and is limited to services for:

- Articulation
- Language
- Rhythm
- Swallowing
- Training in the use of an speech-generating device
- Training in the use of an oral-pharyngeal prosthesis
- Voice

For CSHCS beneficiaries (i.e., those not enrolled in Medicaid; only enrolled with CSHCS), therapy must be directly related to the CSHCS-eligible diagnosis(es) and prescribed by the specialty physician who is overseeing the care of the beneficiary.

Therapy must be reasonable, medically necessary and expected to result in an improvement and/or elimination of the stated problem within a reasonable amount of time (i.e., when treatment is due to a recent change in medical or functional status affecting speech, and the beneficiary would experience a reduction in medical or functional status without therapy).

Speech therapy services must be skilled (i.e., require the skills, knowledge and education of a licensed SLP to assess the beneficiary for deficits, develop a treatment program and provide therapy). Interventions that could be provided by another practitioner (e.g., teacher, registered nurse [RN], licensed physical therapist [PT], licensed occupational therapist [OT], family member, or caregiver) would not be reimbursed as speech therapy by MDHHS.

Therapy is not covered:

- When provided by an independent SLP.
- For educational, vocational, social/emotional, or recreational purposes.
- If services are required to be provided by another public agency (e.g., PIHP/CMHSP provider, SBS).
- When intended to improve communication skills beyond premorbid levels (e.g., beyond the functional communication status prior to the onset of a new diagnosis or change in medical status).
If it requires PA but is rendered before PA is approved.

If it is habilitative. Habilitative treatment includes teaching someone communication skills for the first time without compensatory techniques or processes. This may include syntax or semantics (which are developmental) or articulation errors that are within the normal developmental process.

**Note:** Federal EPSDT regulations require coverage of medically necessary treatment for children under 21 years of age, including medically necessary habilitative therapy services.

- If it is designed to facilitate the normal progression of development without compensatory techniques or processes.
- If continuation is maintenance in nature.
- If provided to meet developmental milestones.
- If Medicare does not consider the service medically necessary.

### 5.3.A. DUPLICATION OF SERVICES

Some areas (e.g., dysphagia, assistive technology) may appropriately be addressed by more than one discipline (e.g., OT, PT, speech therapy) in more than one setting. MDHHS does not cover duplication of services, i.e., where two disciplines are working on similar areas/goals. It is the treating therapist's responsibility to communicate with other practitioners, coordinate services, and document this in his reports.

### 5.3.B. SERVICES TO SCHOOL-AGED BENEFICIARIES

School-aged beneficiaries may be eligible to receive speech-language therapy through multiple sources. Educational speech is expected to be provided by the school system and is not covered by MDHHS or CSHCS. Examples of educational speech include enhancing vocabulary, improving sentence structure, improving reading, increasing attention span, and identifying colors and numbers. Only medically necessary therapy may be provided in the outpatient setting. Coordination between all speech therapy providers should be continuous to ensure a smooth transition between sources.

Outpatient therapy provided to school-aged children during the summer months in order to maintain the therapy services provided in the school are considered a continuation of therapy services when there is no change in beneficiary diagnosis or function. Prior authorization is required before initiating a continuation of therapy.

If a school-aged beneficiary receives medically necessary therapy services in both a school setting (as part of an Individualized Education Plan [IEP]) and in an outpatient setting, coordination of therapy between the providers is required. Providers are to maintain documentation of coordination in the beneficiary's file.

### 5.3.C. REFERRAL FOR SPEECH THERAPY

A referral from a physician/physician assistant is required for Medicaid coverage of speech therapy. The referral for speech therapy must be documented in the beneficiary's medical record and must include the following:
Beneficiary name;
Beneficiary date of birth;
Diagnosis for referral (for CSHCS beneficiaries, this must be the CSHCS-qualifying diagnosis); and
A statement indicating that the beneficiary is being referred for speech therapy.

If therapy is not initiated within 30 days of the referral date, a new referral is required. A new referral must be made at least annually for continuing treatment lasting longer than 12 months. Whenever a beneficiary is discharged from speech therapy treatment, a new referral must be made and an evaluation and treatment plan must be completed before therapy may resume.

A copy of the referral must be attached to all PA requests for speech therapy.

| Evaluation | Does not require PA. This is formalized testing in early stages of a beneficiary's treatment program followed by periodic testing and reports to indicate measurable functional change resulting from the beneficiary's treatment. These may be provided for the same diagnosis without PA twice in a 365-day period with a referral. If an evaluation is needed more frequently, PA is required.

Evaluations must include standardized tests and/or measurable functional baselines. The speech-language evaluation must be completed by an SLP and include:

- The disorder and the medical diagnosis, if different than the treatment diagnosis (e.g., medical diagnosis of cerebral vascular accident with dysphasia as the speech disorder being treated).
- Speech therapy provided previously, including facility/site, dates, duration and summary of measurable change.
- Current rehabilitation services being provided to the beneficiary in this or other settings.
- Medical history as it relates to the current course of therapy.
- Beneficiary's current functional communication status (functional baseline).
- Standardized and other evaluation tools used to establish the baseline and to document progress.
- Assessment of the beneficiary's functional communication skill level, which must be measurable.
- Medical, physical, intellectual deficits that could interfere with the beneficiary's improvement in therapy. |
Evaluations must include, but are not limited to:

- **Articulation** – standardized tests that measure receptive and expressive language, mental age, oral motor skills, articulation skills, current diet level (including difficulties with any food consistencies), current means of communication and a medical diagnosis.
- **Language** – standardized tests that measure receptive and expressive language, mental age, oral motor skills, current and previous means of communication, and medical diagnosis(es).
- **Rhythm** – standardized tests that measure receptive and expressive language, mental age, oral motor skills, measurable assessment of dysfluency, current means of communication and a medical diagnosis.
- **Swallowing** – copy of a video fluoroscopy or documentation that objectively addresses the laryngeal and pharyngeal stages, oral motor assessment that measures consistencies that have been attempted and the results, voice quality (i.e., pre- and post-feeding and natural voice), articulation assessment and a standardized cognitive assessment.
- **Voice** – copy of the referring provider’s medical assessment of the beneficiary’s voice mechanism and medical diagnosis.

<table>
<thead>
<tr>
<th>Treatment Plan</th>
</tr>
</thead>
<tbody>
<tr>
<td>Is the immediate result of the evaluation and consists of:</td>
</tr>
<tr>
<td>- Time-related short-term goals that are measurable, functional and significant to the beneficiary’s communication needs.</td>
</tr>
<tr>
<td>- Long-term goals that identify specific functional maximum reasonable achievement, which serve as indicators for discharge from speech-language therapy services.</td>
</tr>
<tr>
<td>- Anticipated frequency and duration of treatment required to meet short-term and long-term goals.</td>
</tr>
<tr>
<td>- Plan for discharge from service, including the development of follow-up activities/maintenance programs.</td>
</tr>
<tr>
<td>- Statement detailing coordination of services with other therapies (e.g., medical and educational).</td>
</tr>
<tr>
<td>- Documentation of acceptance by referring provider of stated treatment plan. The treatment plan must be accepted by the referring specialty physician for CSHCS beneficiaries.</td>
</tr>
</tbody>
</table>

Referring provider acceptance of the speech therapy treatment plan must be documented by one of the following processes:

- Phone call to the referring provider (document date and time).
- Copy of the plan to the referring provider (document date sent and method sent).
- Referring provider’s sign-off on the treatment plan.

Documentation of the referring provider’s acceptance of the speech therapy treatment plan must be placed in the beneficiary’s medical record.
**Initiation of Services**

Therapy may only be initiated upon completion of an evaluation and development of a treatment plan that supports the reasonableness and medical necessity of therapy without PA.

For the initial period, speech may be provided up to a maximum of 36 times during the 12 consecutive calendar months in the outpatient setting. If therapy is not initiated within 30 days of the referral, a new referral is required.

No more than one encounter for individual speech therapy and one encounter for group speech therapy may be billed on the same date of service. Each encounter must represent a minimum of 25 minutes of therapy provided on the date of service.

Therapy must be provided by the evaluating discipline. (An OT cannot provide treatment under a SLP's evaluation.) Cosigning of evaluations and sharing treatments require PA.

PA is not required for the first 12 consecutive calendar months in the outpatient setting for a new treatment diagnosis or new medical diagnosis if:

- The beneficiary remains Medicaid-eligible and enrolled during the period services are provided; and
- A copy of the referring provider’s signed and dated (within 30 days of initiation of services) referral for speech-language therapy is on file in the beneficiary's medical record.

Providers may also initiate services without PA when there is a change in the treatment diagnosis and/or medical diagnosis resulting in decreased functional ability.

**Continued Active Treatment**

MDHHS requires providers to request PA for therapy beyond the initial 12 months. The SLP must complete the MSA-115. MDHHS returns a copy of the PA to the provider after processing the request. The PA must be retained in the beneficiary’s medical record.

Requests to continue active treatment must be accompanied by:

- Treatment summary of the previous service period, including measurable progress on each short-term and long-term goal. This must include the treating SLP's analysis of the therapy provided during the previous month, the rate of progress, and justification for any change in the treatment plan. Do not send daily treatment notes.
- A progress summary related to the identified treatment goals, reporting progress toward those goals, as well as revised goals for the requested period of therapy.
- Documentation related to the period no more than 30 days prior to that time period for which prior approval is being requested.
- A statement of the beneficiary’s treatment response, including factors that have affected progress during this interim.
- A statement detailing coordination of services with other therapies (e.g., medical and educational), if appropriate.
- Anticipated frequency and duration of maintenance/monitoring.
- A discharge plan.
A copy of the referral, hand-signed by the referring provider and dated within 30 days prior to initiation of continued service, must be provided with each request.

When a beneficiary completes 36 visits of initial therapy and then chooses to change providers for continued therapy, prior authorization for the continued therapy is required.

<table>
<thead>
<tr>
<th>Maintenance/ Monitoring Services</th>
</tr>
</thead>
<tbody>
<tr>
<td>A beneficiary may not require active treatment, but the skills of an SLP are required for training or monitoring of maintenance programs that are being carried out by a family member and/or caregiver. In the outpatient setting, these types of service may be provided without PA up to four times per 12-month period. If continued maintenance therapy is needed after the initial period specified in the paragraph above, PA is required. The SLP must complete the MSA-115 and include:</td>
</tr>
<tr>
<td>- A service summary, including a description of the skilled services being provided. This should include the treating SLP’s analysis of the rate of progress and justification for any change in treatment plan. Documentation must relate to the period immediately prior to that time period for which PA is requested and can cover up to three months.</td>
</tr>
<tr>

</tr>
<tr>
<td>- The anticipated frequency and duration of continued maintenance/monitoring.</td>
</tr>
<tr>
<td>- A discharge plan.</td>
</tr>
</tbody>
</table>

5.3.D. Discharge Summary

When the beneficiary is discharged from therapy services, the SLP must maintain a discharge summary on file as a mechanism for identifying completion of services and beneficiary status at discharge. The discharge summary should include:

- Dates of service (initial and discharge);
- Description of services provided;
- Functional status related to treatment areas/goals at discharge;
- Analysis of the effectiveness of the therapy program, including reasons for goals not met or changes in the treatment plan necessitated by changes in medical status;
- Description or copy of follow-up or maintenance program put into place, if appropriate;
- Identification of adaptive equipment provided and its current utilization, if appropriate; and
- Recommendations/referral to other services, if appropriate.
5.3.E. EVALUATIONS AND FOLLOW-UP FOR SPEECH-GENERATING DEVICES

Up to six hours of face-to-face time spent by the SLP evaluating or re-evaluating a beneficiary to determine the need for a specified Speech-Generating Device (SGD) may be billed once in three years without PA. The results of this evaluation must be shared with the prescribing provider.

SGD follow-up care that requires the skills of an SLP, as is identified by the evaluating SLP, may be billed up to two times per year before PA is required. This service includes training or set-up services (including programming and modification) that are not provided by the SGD vendor.

An SLP evaluation for the use and/or fitting of a voice prosthetic device to supplement oral speech is only to be billed if the evaluation was done to determine the need for an electro-larynx. This service may be billed once in three years without PA.

PA is required for all SGDs. MSA-1653-B must be submitted for all original and replacement/upgrade SGDs. In addition, specific SGD documentation, described in the table below, must be included with the MSA-1653-B.

SECTION 1 – GENERAL INFORMATION

Michigan Department of Health and Human Services (MDHHS) administers the fee-for-service (FFS) programs for Medicaid, Healthy Michigan Plan, Children’s Special Health Care Services (CSHCS), and Maternity Outpatient Medical Services (MOMS). This chapter and the Michigan Pharmaceutical Product List (MPPL) comprise program policies and explain coverage and reimbursement for the services dispensed and billed by enrolled pharmacies.

Throughout this chapter the terms Medicaid and MDHHS are used to refer to the Michigan Medicaid FFS, Healthy Michigan Plan, CSHCS, MOMS, and Plan First! programs unless otherwise noted.

1.1 MDHHS PHARMACY BENEFITS MANAGER AND OTHER VENDOR CONTRACTORS

MDHHS retains all decisions for policy, coverage, and reimbursement, and contracts with a pharmacy benefits manager (PBM). PBM services provided include pharmacy claims payment (paper and electronic), claims instruction, prior authorization (PA), prospective drug utilization, retrospective drug utilization, clinical consultation, provider information lines, and Maximum Allowable Cost (MAC) rate setting. (Refer to the Directory Appendix for PBM contact information.)

The PBM website contains the:

- Pharmacy Claims Processing Manual for Michigan Medicaid
- Michigan Pharmaceutical Product List (MPPL)
- Preferred Drug List (PDL)
- Drug Utilization Review (DUR) Meeting Notices
- Dose Optimization Program
- Pharmacy and Therapeutics (P&T) Committee Meeting Notices
- Pharmacy Forms
- Maintenance Drug List

Pharmacies may call the PBM for questions or concerns. Beneficiaries may call the PBM Beneficiary Helpline. (Refer to the Directory Appendix for contact information.)

MDHHS contracts with other vendors to perform financial, program or provider audits on behalf of the State of Michigan. (Refer to the Pharmacy Resources portion of the Directory Appendix for additional information.)

1.2 DEFINITIONS

The following definitions have specific meaning in the Pharmacy program:

<p>| Brand-Name Drug | A single-source drug, a cross-licensed drug or an innovator drug for which a lower-cost generic equivalent is available. |</p>
<table>
<thead>
<tr>
<th>Term</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Compounded Prescription</td>
<td>The combination of two or more ingredients extemporaneously mixed in usually accepted therapeutic doses. This requires the pharmacist’s skill in weighing, measuring, levigating, etc., at the time of dispensing. The allowable compounding fee applies to the preparation of an individual prescription. It does not apply to prescriptions dispensed from a previously prepared stock supply (i.e., premaking a special lotion, cream, or ointment in gallons or pounds).</td>
</tr>
<tr>
<td>Dispensing Fee</td>
<td>Payment for filling a prescription and all related services performed by a pharmacist.</td>
</tr>
<tr>
<td>Drug Efficacy Study Implementation (DESI) Drugs</td>
<td>FDA designations related to &quot;substantial evidence&quot; of effectiveness. These products are also known as proposed less than effective.</td>
</tr>
<tr>
<td>Drug Rebate Program</td>
<td>Administered by the Centers for Medicare &amp; Medicaid Services' Center for Medicaid and State Operations. It was created by the Omnibus Budget Reconciliation Act of 1990 (OBRA '90) and requires drug manufacturers to enter into and have in effect a national rebate agreement with the Secretary of the U.S. Department of Health &amp; Human Services (HHS) for states to receive Federal funding for outpatient drugs dispensed to Medicaid patients. To receive rebates, States must identify the drugs by their national drug code.</td>
</tr>
<tr>
<td>Drug Utilization Review (DUR)</td>
<td>A process designed to ensure that prescriptions are appropriate, medically necessary and not likely to result in adverse medical outcomes.</td>
</tr>
<tr>
<td>Drug Utilization Review Board (DUR Board)</td>
<td>An advisory board to the State's Medicaid Program that includes physicians and pharmacists.</td>
</tr>
<tr>
<td>Fraud</td>
<td>Deliberate, intentional, and willful act with the specific purpose of deceiving MDHHS with respect to any material fact, condition, or circumstance affecting eligibility or need.</td>
</tr>
<tr>
<td>Generic Drug</td>
<td>Refers to a nonproprietary drug or class of drugs. The generic name refers to the official chemical composition of the drug as published in the latest edition of a nationally recognized pharmacopoeia or drug compendium. Generics do not refer to a particular brand name product.</td>
</tr>
<tr>
<td>Labeler</td>
<td>Any firm that manufactures (including repackers or relabelers) or distributes (under its own name) the drug.</td>
</tr>
<tr>
<td>Long Term Care Pharmacy</td>
<td>Refers to pharmacies specializing in provision of drugs and services in an institutional setting such as a nursing facility, medical care facility or hospital long term care unit.</td>
</tr>
<tr>
<td>Maximum Allowable Cost (MAC)</td>
<td>The maximum cost allowed by MDHHS for certain multiple source brands, generics, cross-licensed drugs and sometimes for sole-source drugs or classes.</td>
</tr>
<tr>
<td>Multiple Source Drug (Multi-Source)</td>
<td>A drug marketed or sold by two or more manufacturers or labelers, or a drug marketed or sold by the same manufacturer or labeler under two or more different proprietary names or both under a proprietary name and without such a name.</td>
</tr>
<tr>
<td>National Average Drug Acquisition Cost (NADAC)</td>
<td>Pricing benchmark based on a nationwide survey of retail community pharmacy covered outpatient drug prices.</td>
</tr>
<tr>
<td>National Council for Prescription Drug Programs (NCPDP)</td>
<td>Develops standards for electronic pharmacy transactions (Point of Sale claims transactions).</td>
</tr>
</tbody>
</table>
National Drug Code (NDC)

The 11-digit code assigned to all prescription and over-the-counter products by the labeler/manufacturer of the product under Food and Drug Administration (FDA) regulations.

Out of State Pharmacy

An entity not housed within the state of Michigan but registered by the Michigan Board of Pharmacy. An Out of State Pharmacist is required to be licensed in the state the pharmacy is located in.

Over-the-Counter (OTC) Drug

A drug that can normally be purchased without a physician’s prescription, although it may require a prescription if covered by Medicaid.

Pharmacist

A person licensed under Michigan statutes to provide services within the scope of pharmacy practice.

Pharmacy

An entity registered by the Michigan Board of Pharmacy.

Pharmacy and Therapeutics (P&T) Committee

An advisory committee to MDHHS on issues affecting prescription drug coverage for its various health care programs. The committee recommends guidelines for prescription drugs covered in its various health care programs.

Point of Sale (POS)

Real-time on-line adjudication of pharmacy claims to the PBM. Point of Sale provides participating pharmacies real-time access to beneficiary eligibility, drug coverage, pricing information, guidelines for drug use, and dispensing fees.

Prescribed Drug

A drug, either legend or over-the-counter, that is ordered by a prescriber to be used by a patient to treat a disease or condition.

Prescriptions Not Picked Up

Retail prescriptions filled but not dispensed or picked up by the beneficiary or his representative.

Prospective Drug Utilization Review (ProDUR)

Detection, evaluation, and counseling components of pre-dispensing drug therapy screening. ProDUR is required at the point of sale before each prescription is delivered to a Medicaid beneficiary. ProDUR screening is the responsibility of each Medicaid participating pharmacy and is a requirement of Medicaid participation.

Retrospective Drug Utilization Review (RetroDUR)

Program that analyzes and interprets patterns of prescribing and dispensing beneficiary drug usage through periodic examinations of claims data to identify patterns of fraud and abuse, gross overuse, and inappropriate or medically unnecessary care.

Tamper Resistant Prescription Pad

A tamper resistant prescription pad must contain all three of the following characteristics:

- Prevent unauthorized copying of a completed or blank prescription form.
- Prevent the erasure or modification of information written on the prescription by the prescriber.
- Prevent the use of a counterfeit prescription form.

Wholesale Acquisition Cost (WAC)

The list price determined by a manufacturer for a pharmaceutical sold by a manufacturer to a wholesaler.

1.3 CHILDREN’S SPECIAL HEALTH CARE SERVICES

Pharmacy coverage for beneficiaries who only have CSHCS coverage is limited to those pharmaceutical products that are required for the treatment of the CSHCS qualifying diagnosis. The beneficiary’s CSHCS qualifying diagnosis is listed on his eligibility letter by ICD code. Pharmacies may not bill for...
pharmaceutical products not required for the treatment of the CSHCS qualifying diagnosis. Also, the MPPL specifies other coverages unique to this program.

1.4 PLACE OF SERVICE

Coverage and payment policies for products dispensed in the settings listed below are not contained in this chapter or the MPPL. Healthcare providers should refer to the provider-specific chapter for Hospital, Practitioner, Nursing Facility, or Laboratory in this manual for these services:

- Physician’s office or clinic: Injectable products used in physician offices or clinics are reimbursed to the healthcare provider administering the drug, not a pharmacy. If a pharmacy sells injectable products to a physician or clinic, a pharmacy must obtain payment directly from the purchasing provider and not MDHHS. Injectable products are not to be dispensed to the beneficiary for the purpose of administration at the physician’s office.
  
  Exception: Beneficiaries with a Benefit Plan ID of NH (Nursing Home) can receive injectable drugs as a pharmacy benefit due to the relationship between the nursing facility and its contracted providers.

- Inpatient hospital.

- Mental health, hospital long term care, and medical care facilities with in-house pharmacies.

- Laboratory.

1.5 OUTPATIENT HOSPITAL

Outpatient hospitals with pharmacies enrolled with MDHHS as pharmacy providers must bill for take-home pharmaceutical products in compliance with policies of this chapter and the MPPL. Such services cannot be billed under the outpatient hospital’s NPI number.

Injectable drugs and single doses given on the premises, including products used in conjunction with lab, radiology, and other medical procedures, must be billed using the outpatient hospital’s NPI number, not the pharmacy’s NPI number.

1.6 HOSPICE

Services, including drugs and nutritional supplements related to a beneficiary’s terminal illness, are provided by the hospice (Benefit Plan ID of Hospice). The hospice reimburses pharmacies for these services. Coverage, payment amounts, and billing procedures of the particular hospice must be followed. To confirm that a product is not related to the terminal illness, the pharmacist must contact the hospice regarding coverage before billing. A pharmacy must not bill MDHHS for prescription services related to the terminal illness.

The MDHHS PBM messages back to the pharmacy when claims are submitted for beneficiaries with a Benefit Plan ID of Hospice. It is the pharmacy’s responsibility to assure that the claim submitted is not related to the beneficiary’s terminal illness. If billings contrary to this policy are found in post-payment review, MDHHS will recover inappropriate payment.
1.6. A. EXCEPTION FOR SELECTED HIV DRUGS

MDHHS separately reimburses a pharmacy for selected HIV drugs that the beneficiary had previously used to prevent the terminal illness. These HIV drugs include Protease Inhibitors, Nucleoside/-tide Reverse Transcriptase Inhibitors, and Non-Nucleoside Reverse Transcriptase Inhibitors, even though the product is related to the terminal illness.

1.6. B. PRODUCTS NOT RELATED TO THE TERMINAL ILLNESS

Covered drug products not related to the terminal illness may be separately billed by the pharmacy. For example: A hospice beneficiary has leukemia and a lifelong condition of diabetes. Products related to the diabetes can be separately billed by a pharmacy provider.

1.7. MEDICAID HEALTH PLANS

Providers should verify eligibility to determine if the beneficiary is enrolled in a MHP (Benefit Plan ID of CSHCS-MC, MA-HMP-MC, MA-MC or MME-MC) for the DOS. (Refer to the Beneficiary Eligibility chapter for additional information.)

Coverage criteria (including PA) and reimbursement limits for members of MDHHS contracted Medicaid Health Plans (MHPs) may not follow the policies specified in this chapter applicable to FFS.

Each health plan enrolls its own providers and structures its own billing system. All plan providers are required to enroll/register in CHAMPS. Providers must contact the contracted plan for information regarding reimbursement issues.

Pharmacy Aspects of MHP: Quick Reference

<table>
<thead>
<tr>
<th>Benefit Plan ID</th>
<th>CSHCS-MC, MA-HMP-MC, MA-MC or MME-MC</th>
</tr>
</thead>
<tbody>
<tr>
<td>Provider Enrollment</td>
<td>Pharmacies must follow the MHP procedures for enrollment to ensure payment.</td>
</tr>
<tr>
<td>Pharmaceutical Coverage</td>
<td>Approved MHP pharmaceutical products may differ from Medicaid FFS and CSHCS programs.</td>
</tr>
<tr>
<td></td>
<td>The MHP Common Formulary establishes the minimum coverage requirements for drugs covered by health plans, as well as drug utilization management tools such as quantity limits, age and gender edits, prior authorization criteria, and step therapies. MHPs may be less restrictive, but not more restrictive, than the coverage parameters of the Common Formulary. Additional information is available on the MDHHS website. (Refer to the Directory Appendix for website information.)</td>
</tr>
<tr>
<td></td>
<td>With the exception of products that are carved out, MHPs must have a process to approve provider requests for any prescribed medically appropriate product identified on the Michigan Pharmaceutical Product List (MPPL). (Refer to the Directory Appendix for website information.)</td>
</tr>
<tr>
<td>Copayment</td>
<td>Copayments may differ.</td>
</tr>
<tr>
<td>Payment and Billing</td>
<td>Payment levels and billing methods are set by the MHP, MDHHS.</td>
</tr>
</tbody>
</table>
Prior Authorization
(PA) | Follow the MHP PA procedures.

| Questions | For general managed care questions, call the MDHHS Provider Inquiry or Beneficiary Helpline. (Refer to the Directory Appendix for contact information.) Contact the individual MHP for specific coverage questions.

1.7.A. CARVE-OUT EXCEPTIONS

Select drugs and classes may be carved-out from the respective health plan’s reimbursement and paid Medicaid Fee For Service. (Refer to the PBM website listed in the Directory Appendix for a listing of these drug classes.)

Any services paid Fee For Service must follow appropriate guidelines for supporting documentation, including attending, billing, prescribing, referring, rendering and supervising provider requirements.

1.8 INTERMEDIATE CARE FACILITY FOR INDIVIDUALS WITH INTELLECTUAL DISABILITIES

Beneficiaries residing in an Intermediate Care Facility for Individuals with Intellectual Disabilities (ICF/IID) are identified by the Benefit Plan ID of ICF/IID. For Medicare/Medicaid dually-eligible beneficiaries, pharmacy services will be covered by Medicare Part D. Drugs not covered by Medicare Part D are included in the ICF/IID per diem rate.

1.9 MEDICARE PART D BENEFIT

The Medicare Modernization Act of 2003 provides a prescription drug benefit to Medicare beneficiaries. The benefit is commonly referred to as Medicare Part D. Dually eligible Medicare/Medicaid beneficiaries must obtain all Part D covered drugs through their Medicare Part D Plan (PDP or MA-PD).

Drugs covered by Medicare Part D, but not included in the beneficiary’s Medicare Part D Plan’s formulary, will not be covered by Medicaid.

Drugs excluded from coverage by Medicare Part D will not be covered by Medicaid, except for the following:

- Over-the-counter (OTC) drugs listed on the MPPL
- Over-the-counter agents used to promote smoking cessation
- Select group of vitamins and minerals prescribed at therapeutic doses for deficiency diagnoses that meet Medicaid coverage criteria

Questions concerning the Medicare Part D benefit must be directed to Medicare. (Refer to the Directory Appendix for contact information.)
**SECTION 2 – PRESCRIBER REQUIREMENTS**

All MDHHS-covered legend and over-the-counter drugs (OTCs), except condoms, require a prescription order by a licensed prescriber.

Coverage of pharmaceutical products is based on limitations stated in this chapter, the MPPL, and medical necessity. Determination of medical necessity and appropriateness of service is the responsibility of the prescribing physician/provider (prescriber) within the scope of currently accepted medical practice and MDHHS limitations. Participating providers must observe applicable State and Federal laws, rules, regulations, and policies. MDHHS may impose additional constraints to reduce misuse.

2.1 **SCOPE OF PRACTICE**

MDHHS only reimburses for products prescribed by a licensed prescriber that are within the prescriber's scope of currently accepted medical practice and MDHHS limitations.

2.2 **PRESCRIBER IDENTIFICATION**

Pharmacy providers must provide the individual prescriber's National Provider Identifier (NPI) on the submitted claim.

Refer to the Practitioner chapter for additional information.

2.3 **SANCTIONED PRESCRIBERS**

MDHHS does not reimburse for pharmaceuticals prescribed by providers sanctioned by the Federal Government, the State of Michigan, or for prescribers having a limited, expired (lapsed), or revoked license. A list of sanctioned providers is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

2.4 **OTHER PERTINENT SECTIONS**

Prescribers should refer to other pertinent sections in this chapter for policies and procedures related to Drug Utilization Review, Prior Authorization, and the MPPL.
SECTION 3 – PHARMACY REQUIREMENTS

3.1 COMPLIANCE WITH APPLICABLE STATE, FEDERAL, AND MDHHS PROVISIONS

A provider who complies with all licensing and regulation laws applicable to the practice of pharmacy in Michigan may enroll as a Medicaid provider. Applicable State and Federal laws, rules, regulations, and policies must be observed by participating pharmacies. MDHHS does not enroll dispensing physicians as Medicaid providers for pharmacy services. (Refer to the General Information for Providers Chapter of this manual for additional information.)

3.2 ENROLLMENT

Pharmacy enrollment is processed through CHAMPS. Refer to the General Information for Providers Chapter, Provider Enrollment section, for additional information.
SECTION 4 – COUNSELING REQUIREMENTS

Pharmacies must follow the counseling requirements mandated in State and Federal statutes and regulations. These requirements do not apply to drugs dispensed in nursing facilities that are in compliance with the drug regimen review procedures specified by the licensing authority.

4.1 OFFER TO DISCUSS

For every new prescription presented by the beneficiary, the pharmacy's representative must offer the beneficiary the opportunity to discuss/receive counseling from the pharmacist regarding the new prescription. The offer for counseling must be in a positive, helpful manner. If practical, the offer to counsel must be face-to-face and verbal. Otherwise, it is permissible for the offer to be made in writing or by telephone. Pharmacies are required to provide toll-free access for beneficiary inquiries related to products dispensed. A pharmacist is not required to provide counseling when a beneficiary or representative refuses the offer for counseling.

4.2 DISCUSSION

When the beneficiary (or representative) accepts the offer for counseling, it must be provided by the pharmacist in person (whenever practical) or by telephone and may include written materials. Information must be in a language that can be understood by the beneficiary (or representative) and must include an opportunity for questions.

In addition to discussing interactions with drugs previously dispensed by the pharmacist, the discussion should also include the potential interaction with any other drugs the beneficiary indicates he is taking. The beneficiary (or representative) must be counseled in a confidential manner, consistent with any State or Federal regulations. Federal law requires that the pharmacist must discuss all the items indicated below, and any others deemed significant in the pharmacist's professional judgment. If an interpreter is required, the provider must provide one free of charge.

- The name and description of the medication.
- The dosage form, dosage, route of administration, and duration of drug therapy.
- Special directions and precautions for preparation and use by the beneficiary.
- Common side effects or interactions and therapeutic contraindications that may be encountered, including their avoidance, and the action required if they occur.
- Techniques for self-monitoring drug therapy.
- Proper storage.
- Prescription refill information.
- Action to be taken in the event of a missed dose.
SECTION 5 – SIGNATURE LOG, DATA COLLECTION AND DOCUMENTATION

5.1 SIGNATURE LOG

Pharmacy providers must maintain a log containing the following information:

- Beneficiary's name;
- The signature of the beneficiary or that of his representative; and
- The date of receipt of the prescription.

The log must effectively differentiate between prescriptions received by a beneficiary for which counseling was accepted and provided, and those for which counseling was offered and was declined. This log must be retained for review by MDHHS or the MDHHS agent for seven years and is subject to audit.

The signature log serves as verification of the beneficiary receiving the prescription billed. The absence of the appropriate signature indicates the beneficiary did not receive the prescription, and funds will be recouped from the pharmacy.

5.2 BENEFICIARY INFORMATION AND DATA COLLECTION REQUIREMENTS

To meet specified State and Federal requirements, pharmacies must make a reasonable effort to obtain, record, and maintain on file at least the following information:

- Name, address, telephone number, date of birth (or age), and gender of the beneficiary.
- Pharmacist notes on the beneficiary's drug therapy.
- Beneficiary history when significant, including:
  - Disease state(s);
  - Known allergies and drug reactions; and
  - Comprehensive list of drugs and relevant devices.
- Whether the offer to counsel was made and whether this offer was accepted or rejected by the beneficiary or the beneficiary's representative.

5.3 DOCUMENTATION REQUIREMENTS

To assure that pharmacy counseling and other data collection requirements were performed, pharmacies must record the required information in the beneficiary's manual or electronic profile, in the prescription signature log, or any other system of records. Regardless of the format used, the associated documentation must be retained electronically or otherwise for a period of seven years, or longer if specified by law.
5.3.A. NON-CONTROLLED ELECTRONICALLY TRANSMITTED PRESCRIPTIONS

If a prescription is created, signed, transmitted and received electronically, all records related to that prescription must be retained electronically. Records must be retained electronically for a period of seven years, or longer if specified by law. Records must be made available within 72 hours or as requested. The electronically transmitted prescription must include all of the following information:

- The name, address, and telephone number of the prescriber;
- The full name of the patient for whom the prescription is issued;
- An electronic signature or other identifier that specifically identifies and authenticates the prescriber;
- The time and date of the transmission;
- The identity of the pharmacy intended to receive the transmission; and
- Any other information required by the federal act or state law.

The electronic equipment or system utilized in the transmission and communication of prescriptions must provide adequate confidentiality safeguards and be maintained to protect patient confidentiality as required under any applicable federal and state law and to ensure against unauthorized access. The electronic transmission of a prescription must be communicated in a retrievable, recognizable form acceptable to the intended recipient. The electronic form utilized in the transmission of a prescription must not include "dispense as written" or "d.a.w." as the default setting.

Prior to dispensing a prescription that is electronically transmitted, the pharmacist must exercise professional judgment regarding the accuracy, validity, and authenticity of the transmitted prescription. An electronically transmitted prescription that meets the above requirements is the original prescription.
SECTION 6 – GENERAL NONCOVERED SERVICES

This section specifies general coverage restrictions. However, drugs in other classes may not be covered. Pharmacies should review the MPPL for specific coverage. When possible, pharmacies are encouraged to suggest alternative covered therapy to the prescriber if a product is not covered.

The following drug categories are not covered as a benefit:

- Agents used for anorexia
- Agents used for weight gain
- Agents used for cosmetic purposes or hair growth
- Agents used for symptomatic relief of cough and colds
- Experimental or investigational drugs
- Agents used to promote fertility
- Agents used to promote smoking cessation not on the MPPL
- Vitamin/Mineral combinations not for prenatal care, end stage renal disease or pediatric fluoride supplementation
- Covered outpatient drugs that the Labeler seeks to require as a condition of sale that associated tests or monitoring services be purchased exclusively from the Labeler or their designee
- Covered outpatient drugs where the Labeler limits distribution
- Proposed less-than-effective (LTE) drugs identified by the Drug Efficacy Study Implementation (DESI) program
- Over-the-counter drugs not on the MPPL
- Drugs of Labelers not participating in the Rebate Program
- Drugs prescribed for "off label" use if there is no generally accepted medical indication in peer reviewed medical literature (Index Medicus), or listing of such use in standard pharmaceutical references such as Drug Facts and Comparisons, AMA Drug Evaluations, American Hospital Formulary Service Drug Information, or DRUGDEX Information Systems
- Drugs prescribed specifically for medical studies
- Drugs recalled by Labelers
- Drugs past CMS termination dates (Refer to the Directory Appendix for CMS website information.)
- Lifestyle agents
- Standard Infant Formulas
- Drugs used to treat gender identity conditions, such as hormone replacement
- Drugs covered by the Medicare Part D benefit
- Drugs not FDA approved or licensed for use in the United States
- Agents used for treatment of sexual or erectile dysfunction
SECTION 7 - MICHIGAN PHARMACEUTICAL PRODUCT LIST

The Michigan Pharmaceutical Product List (MPPL) identifies the pharmaceutical products that are covered by MDHHS. The MPPL pharmaceutical product coverages may vary by MDHHS program or be limited by age, clinical parameters, and/or gender. The Point of Sale pharmacy claim adjudication also provides coverage information related to a specific beneficiary or prescription.

The MPPL is posted on the PBM’s website. (Refer to the Directory Appendix for website information.) Providers must refer to the MPPL for the additions and deletions of drug products. Specific notification of changes will not be issued.

7.1 NOTIFICATION OF NEW OUTPATIENT DRUGS

MDHHS receives weekly, comprehensive new information about outpatient drugs from First DataBank. Manufacturers are not required to submit notification of new drug products. New drug products are required to be reviewed by the Pharmacy and Therapeutics (P&T) committee.

Most drug products are required to be on the market for six months prior to review. Products with a “priority” FDA rating may be reviewed earlier than the six month requirement.

7.2 APPROVED LABELERS

MDHHS reimburses MPPL products distributed by approved Labelers who have signed rebate agreements with the Centers for Medicare & Medicaid Services (CMS). A list of these approved Labelers is located on the CMS website and identification is by the first five digits of a National Drug Code (NDC). (Refer to the Pharmacy portion of the Directory Appendix for CMS website information.)

Alcohol swabs, condoms, diaphragms, lancets, syringes, aerochambers, spacers, and peak flow meters provided by a pharmacy are covered regardless of the manufacturer’s rebate agreement.
SECTION 8 – PRIOR AUTHORIZATION

8.1 PRIOR AUTHORIZATION PROCESSOR

The MDHHS PBM processes prior authorizations (PAs). Refer to PBM’s Pharmacy Claims Processing Manual for PA procedures. (See Directory Appendix for contact information.) Authorization to override denial edits must be obtained from the PBM.

Do not call the PBM’s Call Centers for:

- Supplies billed by Medical Suppliers, including enteral formula and Total Parenteral Nutrition (TPN), since these are only reimbursed to a Medical Supplier provider. Contact the MDHHS Program Review Division for PA. (Refer to the Directory Appendix for contact information.)
- Information about the member’s MHP. The provider must contact the MHP to obtain their policies.

8.2 PRIOR AUTHORIZATION REQUIREMENTS

PA is required for:

- Products as specified in the MPPL. Pharmacies should review the information in the Remarks as certain drugs may have PA only for selected age groups, gender, etc. (e.g., over 17 years).
- Payment above the Maximum Allowable Cost (MAC) rate.
- Prescriptions that exceed MDHHS quantity or dosage limits.
- Medical exception for drugs not listed in the MPPL.
- Medical exception for noncovered drug categories.
- Acute dosage prescriptions beyond MDHHS coverage limits for H2 Antagonists and Proton Pump Inhibitor medications.
- Dispensing a 100-day supply of maintenance medications that are beneficiary-specific and not on the maintenance list.
- Pharmaceutical products included in selected therapeutic classes. These classes include those with products that have minimal clinical differences, the same or similar therapeutic actions, the same or similar outcomes, or have multiple effective generics available.

8.3 RESPONSIBILITY FOR OBTAINING AUTHORIZATION

8.3.A. PHARMACY RESPONSIBILITY

Pharmacies may call the PBM Technical Call Center for exceptions on:

- Quantity;
- Early refills; and
- 72-hour supply of medication for emergency needs only when the prescriber is not available to obtain PA.
Pharmacies may call the PBM Clinical Call Center for exceptions on payment for brand name over the MAC.

The PBM Technical Call Center is available 24 hours per day/seven days a week.

Refer to the Directory Appendix for PBM’s Call Center contact information.

**8.3.B. PRESCRIBER RESPONSIBILITY**

Prescribers or their designees may call the PBM Clinical Call Center for any PA, but must call for any request that falls outside the categories noted above as applying to pharmacies.

The PBM Clinical Call Center is available after hours by telephone and by pager. The PBM may also be contacted by fax or in writing via U.S. mail.

Refer to the Directory Appendix for the PBM Clinical Call Center contact information, PA contact information and hours of operation.

**8.4 DOCUMENTATION REQUIREMENTS**

For all requests for PA, the following documentation is required:

- Pharmacy name and phone number
- Beneficiary diagnosis and medical reason(s) why another covered drug cannot be used
- Drug name, strength, and form
- Other pharmaceutical products prescribed
- Results of therapeutic alternative medications tried
- MedWatch Form or other clinical information may be required

**8.5 ADDITIONAL DOCUMENTATION**

Depending on the specific drug being prescribed, additional medical documentation may be required. The most common categories requiring additional documentation are:

**8.5.A. BRAND OVERRIDE**

Provide documentation of the therapeutic trial and failure reasons of the generic.

**8.5.B. WEIGHT LOSS**

- Current medical status, including nutritional or dietetic assessment.
- Current therapy for all medical conditions, including obesity.
- Documentation of specific treatments, including medications.
- Current accurate Body Mass Index (BMI), height, and weight measurements.
Confirmation that there are no medical contraindications to reversible lipase inhibitor use; no malabsorption syndromes, cholestasis, pregnancy and/or lactation.

Details of previous weight loss attempts and clinical reason for failure (at least two failed, physician supervised, attempts are required).

8.6 PRIOR AUTHORIZATION DENIALS

PA denials are conveyed to the requester. PA is denied if:

- The medical necessity is not established.
- Alternative medications are not ruled out.
- Evidence-based research and compendia do not support it.
- It is contraindicated, inappropriate standard of care.
- It does not fall within MDHHS clinical review criteria.
- Documentation required was not provided.

The PBM reviews the information submitted to determine whether the clinical criteria have been met. If the submitted information does not indicate that the criteria have been met, the PA is then sent to the Office of Medical Affairs in MDHHS for final determination on whether the clinical criteria have been met.
SECTION 9 – H2 ANTAGONIST AND PROTON PUMP INHIBITOR POLICY

For high dose use greater than 102 days in a 365-day period, PA is required for H2 Antagonists and Proton Pump Inhibitors (PPIs). MDHHS defines high dose use as:

<table>
<thead>
<tr>
<th>H2 Receptor Antagonists</th>
<th>Proton Pump Inhibitors</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cimetidine: 800 mg per day or more</td>
<td>Omeprazole: 40 mg per day or more</td>
</tr>
<tr>
<td>Famotidine: 40 mg per day or more</td>
<td>Esomeprazole (Nexium): 40 mg per day or more</td>
</tr>
<tr>
<td>Nizatidine: 300 mg per day or more</td>
<td>Lansoprazole (Prevacid): 30 mg per day or more</td>
</tr>
<tr>
<td>Ranitidine: 300 mg per day or more</td>
<td>Rabeprazole (Aciphex): 20 mg per day or more</td>
</tr>
<tr>
<td></td>
<td>Pantoprazole (Protonix): 40 mg per day or more</td>
</tr>
</tbody>
</table>

Nonpreferred H2 Antagonists or PPIs require PA for both high and low dose use. Compliance with the H2 Antagonists and PPI Policy is monitored with POS or post-payment review.

Prescribers may request PA for high dose therapy over the 102 days through the PBM Clinical Call Center. (Refer to the Directory Appendix for contact information.) The following information is required for PA determination:

- Diagnosis
- Drug and dose for which PA is requested
- Date and results of GI testing
- All alternative H2 Antagonists and PPIs tried, including dose and duration
- Other prescribed medications relating to this diagnosis
- Reason patient cannot endure testing
- Health education or other counseling employed for this condition
Section 10 – Drug Utilization Review

10.1 Prospective Drug Utilization Review

MDHHS utilizes Prospective Drug Utilization Review (ProDUR) edits in its Point of Sale (POS) system. ProDUR encompasses drug therapy screening, including problem detection, evaluation, and counseling components of pre-dispensed drugs.

In the POS system, MDHHS limits the number of messages to providers that concern potential drug problems to those that are critical to quality of care and appropriate dispensing. It is the provider’s responsibility to provide ProDUR screening and to adhere to beneficiary information and data collection requirements.

10.1.A. ProDUR Screening Requirement

Before prescriptions are filled or delivered, pharmacists must review the consequences of the drug therapy based on the appropriate standards and guidelines.

The review must screen for potential therapy problems due to:

- Therapeutic duplication
- Drug-disease contraindications (to the extent diagnosis information is available)
- Drug-drug interactions (including interactions with known over-the-counter drugs)
- Incorrect drug dosage or duration of drug treatment
- Drug-allergy interactions
- Clinical abuse/misuse
- Under-utilization or over-utilization

10.1.B. ProDUR Alert Messages

The PBM’s POS system provides online assistance for the dispensing pharmacist. Incoming drug claims are compared to a beneficiary’s pharmacy claims history file to detect potential therapeutic problems. ProDUR alert messages are returned to the pharmacist when significant problems are discovered by this review.

10.2 Retrospective Drug Utilization Review

Medicaid utilizes pharmacy data for retrospective drug utilization review (RetroDUR) as required by Federal law and the following compendia:

- American Hospital Formulary Service Drug Information
- United States Pharmacopoeia Drug Information
- DRUGDEX Information System
- Peer-reviewed medical literature

RetroDUR is intended to be an educational tool to reduce costs resulting from drug-induced illnesses and hospitalizations. The purpose of retrospective drug utilization review is:

- To identify high-risk cases for drug-induced illness.
- To communicate risk factors to prescribers and dispensing pharmacists for evaluation.
- To improve patient healthcare outcomes and quality of care.

RetroDUR alerts providers to a beneficiary’s medical condition and total drug usage from all prescribers and pharmacies. The MDHHS PBM reviews utilization data on a monthly basis and makes recommendations to the Michigan DUR Board for interventions and educational seminars.

10.3 MICHIGAN DRUG UTILIZATION REVIEW BOARD

The Michigan Drug Utilization Review (DUR) Board includes both physicians and pharmacists. After post-payment review, the DUR vendor sends appropriate intervention letters to pharmacies and prescribers. Based on the DUR intervention information, prescribers may choose to modify therapy. However, prescribers or pharmacists may also choose to correct beneficiary negative patterns by counseling, or provide background for re-evaluation by the DUR vendor or the DUR Board.

As needed, the PBM or DUR Board follows up on re-occurring patterns that have not been justified. Provider education or academic detailing may be provided to address re-occurring patterns.

10.4 CLINICAL CONSULTATION

MDHHS provides feedback to providers through its academic detailing program. Administered by PBM, Medicaid targets topics related to drug therapy where direct educational intervention to medical providers may prove beneficial in improving outcomes. The Michigan DUR Board approves the topics for academic detailing. Clinical consultants are Michigan-licensed pharmacists who are recruited and trained through the Michigan Pharmacists Association under the direction of PBM. Whenever possible, clinical consultants are assigned to call on medical providers who practice in the same geographical area as the detailing pharmacist to provide a personal and professional connection between the healthcare providers.

Providers are encouraged to give the clinical consultants feedback on both topics presented and the overall program.
SECTION 11 – DISPENSING POLICY

11.1 DAYS SUPPLY

Prescription quantities are limited to the quantity specified by the prescriber. MDHHS covers up to a 34-day supply for acute medications, and up to a 102-day supply for maintenance medications.

The pharmacy must submit accurate days supply information. Submitting incorrect days supply information can cause false ProDUR messages and claim denials. It could also result in a pharmacy being targeted for a post-payment audit.

11.2 ACUTE AND MAINTENANCE SUPPLIES

Providers must bill and dispense as follows:

- For acute illness: The amount dispensed must be limited to the quantity required for the desired therapy during that episode of illness or up to a 34-day supply.
- For chronic illness:
  - Maintenance drugs must be dispensed in quantities as ordered by the physician and to achieve optimum therapy and economy of dispensing, or up to a 102-day supply.
  - If a prescription for a product on the maintenance list is for more than a month's supply and less than a 102-day supply, only one dispensing fee is allowed.
  - A maximum of 13 dispensing fees are paid for the same drug dispensed to the same beneficiary within a 365-day billing period.

A list of maintenance medications is posted on the PBM's website. (Refer to the Directory Appendix for website information.) This list does not exclude medications from other standard therapeutic class codes from being supplied in maintenance quantities. PA is necessary when a maintenance quantity of other medications is required for specific beneficiaries.

11.3 REFILLS

Refills must conform to the current Administrative Rules of the Michigan Board of Pharmacy, Michigan Public Health Code, state and federal statutes, rules, regulations, and policies. Claims will deny at point-of-sale if the utilization requirements have not been met.

For non-controlled substances, a FFS beneficiary cannot obtain a refill of the prescription until at least 75 percent of the drug quantity limit has been consumed in compliance with the prescribed dose, amount, frequency, and time intervals established by MDHHS. (Refer to the Narcotic Analgesics subsection for additional information regarding refill thresholds for narcotic analgesics.)

Early refill overrides may be granted once per drug per 12 months for any of the following circumstances:

- To replace medication that has been lost, stolen or destroyed.
- For the purposes of vacation or travel.
The early refill will not exceed a 34-day supply. MDHHS or its designee may limit the number of instances early refill overrides are approved in cases of suspected fraud or abuse, and may request additional documentation before an override is authorized.

The pharmacy may contact the MDHHS PBM Technical Call Center to request an override for an instance where an early refill is warranted. (Refer to the Directory Appendix for contact information.)

11.4 PRESCRIPTIONS NOT PICKED UP

MDHHS does not reimburse for retail prescriptions filled but not dispensed or picked up by the beneficiary or his representative, and does not allow restocking fees. For prescriptions not picked up, pharmacies must claim adjust or reverse the claim for any payments received, including the dispensing fee. The pharmacy should reverse claims in a timely manner. However, MDHHS policy allows claim adjustments or reversals to be submitted up to twelve months after the original date of service. For example, if the Medicaid beneficiary does not pick up a prescription from the pharmacy within 14 calendar days from the date the prescription claim was submitted by the pharmacy, the prescription claim should be reversed on the 15th calendar day and must have been reversed by the 365th day. For audit purposes, a record of processed reversals must be retained by the pharmacy for seven years.

11.5 TAMPER RESISTANT PRESCRIPTIONS

A pharmacist can only fill a written prescription for a Medicaid FFS beneficiary or POS carveout drugs for MHP enrollees when executed on a tamper resistant prescription pad. (See the following subsections for special considerations.)

Additional information on the tamper resistant prescription pad policy can be found in CMS guidelines which are available online. (Refer to the Directory Appendix for website information.)

11.5.A. EXEMPTIONS

- A compliant pad is not required if the prescription is transmitted verbally or electronically by telephone, facsimile, or modem to the pharmacy per federal and state laws.
- MHP enrollee if the MHP is reimbursing the prescriptions.
- Medicaid FFS beneficiaries receiving prescription drugs not separately reimbursable to a pharmacy. This includes drugs provided incident to, or part of, another service or as part of a per diem payment in the following settings:
  - Nursing facilities
  - ICF/IID
  - Inpatient/Outpatient Hospitals
  - Clinical Settings (hospice, dental, physician office/clinic, laboratory and x-ray, renal dialysis)
11.5.B. EMERGENCY PRESCRIPTIONS

In the event a pharmacy receives a non-compliant emergency prescription, the prescribed drug may be dispensed. However, the prescriber must provide to the pharmacy a compliant prescription within 72 hours of the date the emergency prescription was filled.
SECTION 12 – QUANTITY AND BILLING UNITS

MDHHS uses standard metric billing units and the provider may not round fractions. For example, if the product is 2.500 ml, it must be billed as 2.500 ml, not 3 ml. The PBM’s processing allows a quantity entry up to 999,999.999.

12.1 QUANTITY LIMITS

Dispensing quantities are limited according to accepted standards of practice, Food and Drug Administration (FDA)-approved Labeler recommendations and the recommendations of the Michigan DUR Board.

12.2 COMMON UNIT BASES

Quantities are based on the amount dispensed for the unit of the product. Thus, quantity field entries must be based on the amount dispensed for the unit specified in the MPPL. The most common unit bases are EACH, ML, or GM. Following are examples.

<table>
<thead>
<tr>
<th>Drug Name</th>
<th>Drug Strength</th>
<th>Dosage Form</th>

</tbody>
</table>
SECTION 13 – REIMBURSEMENT, COPAYMENTS, AND COORDINATION OF BENEFITS

13.1 USUAL AND CUSTOMARY CHARGE

Reimbursement is the lower of the usual and customary (U&C) charge or the MDHHS product cost payment limits and a dispensing fee minus the beneficiary copayment, with the exception of condoms. If a beneficiary has other insurance or Medicare coverage, the related other insurance or Medicare payments are subtracted from the MDHHS payment.

U&C charge is defined as a pharmacy's charge to the general public. If the provider renders a covered service to a beneficiary that the provider offers for free or for a reduced fee to the general public, the provider may only bill Medicaid up to that customary charge as long as all other Medicaid requirements are met. The sum of charges for both the product cost and dispensing fee must not exceed a pharmacy’s U&C charge for the same or similar service. The U&C charge must reflect all advertised discounts, special promotions, or other programs initiated to reduce prices for product costs available to the general public or to a special population.

If a pharmacy discounts prescriptions to an inclusive category of customers (e.g., over 60 years), the pharmacy must reflect this discount in its billings for MDHHS program beneficiaries in the same category.

13.2 OVER-THE-COUNTER DRUGS

The U&C charge for prescription-ordered OTC drugs may be different, but not greater, than the retail pharmacy's shelf price of the same product sold without a prescription.

13.3 SALES TAX

Sales tax must not be added to a pharmacy’s U&C charge. MDHHS does not reimburse for sales tax.

13.4 PRODUCT COST PAYMENT LIMITS [CHANGE MADE 7/1/18]

Product Cost Payment Limits are based on the NDC the pharmacy identifies as the product that was dispensed. Reimbursement is the lower of the National Average Drug Acquisition Cost (NADAC), the Wholesale Acquisition Cost (WAC), the MAC, or the provider’s charge. Misrepresentation of the product’s NDC results in denied payment and fraud/abuse sanctions subject to applicable Federal and State laws.

Entities that dispense drugs purchased through the Federal 340B program to beneficiaries must bill the 340B price as the actual acquisition cost. (revised 7/1/18)

NADAC rates are posted on the CMS website. (Refer to the Pharmacy Resources portion of the Directory Appendix for website information.)

13.4.A. MAXIMUM ALLOWABLE COST

Maximum Allowable Cost (MAC) reimbursement levels for Michigan Medicaid are established and managed by an MDHHS contractor. MAC reimbursement levels are generally applied to multi-source brand and generic products. However, MAC reimbursement may also be applied to single source drugs or drug classifications where appropriate. New or changed MAC prices are posted on the contractor’s website the next
business day after they are determined. A monthly online MAC list is also available on the contractor's website. MAC reimbursement reviews will take place on an on-going basis. In addition to the website, specific MAC reimbursement levels are also available by contacting the MAC vendor by US mail, e-mail, fax or telephone. (Refer to the Directory Appendix for the MAC vendor website and contact information.)

All requested MAC price reviews require the following information:

- The brand and generic name, strength, form, and NDC requested for review
- Reason for requested review (availability, price, or other)
- Supporting documentation that the MAC is below cost or the product is not available (wholesaler invoice to support a request)
- Date of service to identify the difference between reimbursement and actual cost
- Prescription number
- Company or pharmacy name, NPI, telephone number, and contact person

13.4.B. MAC OVERRIDES

Specific brand products have a MAC reimbursement level. To receive payment above the MAC reimbursement level, PA through the PBM is required. (Refer to the Directory Appendix for contact information.)

13.5 PROFESSIONAL DISPENSING FEES

The professional dispensing fee is defined as the fee charged for filling a prescription and all related services performed by a pharmacy. MDHHS dispensing fees are posted on the MDHHS website. (Refer to the Directory Appendix for website information.)

13.6 BENEFICIARY COPAYMENTS

13.6.A. MEDICAID COPAYMENTS [CHANGE MADE 7/1/18]

A copayment for each generic/preferred drug dispensed, and for each brand name/non-preferred drug dispensed, may apply for Medicaid beneficiaries age 21 years and older. A copayment may apply to certain brand name drugs that are preferred. Refer to the General Information for Providers Chapter for information about copayments. Current copayment amounts are listed on the MDHHS website. (Refer to the Directory Appendix for website information.)

Copayments cannot be discounted for promotional purposes.
## Copayment Exemptions

<table>
<thead>
<tr>
<th>Over Age 21 Exclusions</th>
</tr>
</thead>
<tbody>
<tr>
<td>▪ The pharmaceutical product is a family planning or pregnancy-related product.</td>
</tr>
<tr>
<td>▪ The beneficiary is in a nursing facility (<a href="#">Benefit Plan ID of NH</a>). (<a href="#">revised per bulletin MSA 17-46</a>) (Revised per Nursing Facility section of this chapter for additional information.)</td>
</tr>
<tr>
<td>▪ The beneficiary is enrolled in a hospice program (<a href="#">Benefit Plan ID of Hospice</a>).</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Other Exclusions</th>
</tr>
</thead>
<tbody>
<tr>
<td>▪ Medicaid beneficiaries who are under the age of 21 are excluded from the copay requirement.</td>
</tr>
<tr>
<td>▪ All CSHCS and MOMS beneficiaries are excluded, including those over age 21.</td>
</tr>
<tr>
<td>▪ Medicare/Medicaid dual eligibles.</td>
</tr>
</tbody>
</table>

Claims for drugs related to the treatment of the following chronic conditions are exempt from copayments for Healthy Michigan Plan beneficiaries:

▪ Alcohol Use Disorder
▪ Asthma
▪ Chronic Kidney Disease
▪ Chronic Obstructive Pulmonary Disease and Bronchiectasis
▪ Deep Venous Thrombosis (while on anticoagulation)/Pulmonary Embolism (chronic anticoagulation)
▪ Depression
▪ Diabetes
▪ Heart Failure
▪ HIV
▪ Hyperlipidemia
▪ Hypertension
▪ Ischemic Heart Disease
▪ Obesity
▪ Schizophrenia
▪ Stroke/Transient Ischemic Attack
▪ Substance Use Disorder
▪ Tobacco Use Disorder
13.6.B. MEDICARE PART D COPAYMENTS

Medicaid will not reimburse:

- Copays, deductibles, or coinsurance for Medicare Part D drugs.
- Commercial insurance drug copays, deductibles, or coinsurance for Medicare/Medicaid beneficiaries who chooses to retain their creditable drug coverage offered by the commercial insurance in place of joining a Medicare Part D plan.
- Copays, deductibles, or coinsurance that exceed the standard Medicare Part D benefit for Medicare/Medicaid beneficiaries.

13.7 NONALLOWABLE CHARGES TO THE BENEFICIARY

A pharmacy must not charge a beneficiary for a prescription if the pharmacy or prescriber fails to request prior authorization (PA). For all products listed in the MPPL indicating PA is required, the pharmacy may contact the PBM for PA or notify the prescriber that a PA is needed.

A pharmacy may charge the beneficiary its U&C charge for a product requiring PA only if the pharmacy has written documentation that the beneficiary was informed of the attempt and failure to obtain PA and of the resultant desire to purchase the drug privately. The pharmacy must not charge any portion of this claim to Medicaid.

The beneficiary must be made aware that PA and reimbursement cannot be obtained later.

13.8 ALLOWABLE CHARGES TO THE BENEFICIARY

A pharmacy may only charge a beneficiary the MDHHS established copayment for covered services. A beneficiary may not be charged for any cost of the prescription above the MDHHS reimbursement level. A pharmacy may only charge a beneficiary its usual and customary charge if the service is a noncovered service, or if MDHHS has denied the service based on lack of medical necessity and the beneficiary has indicated a desire to purchase the service privately. Furthermore, a beneficiary may not be charged for a prescription in lieu of the pharmacy accepting the reimbursement paid by MDHHS, or in lieu of obtaining PA when indicated.

13.9 ADVERTISING

Advertisements must convey only participation in Medicaid. Advertising must not be used to influence the free choice of a pharmacy by a beneficiary. Promotions offering beneficiaries free goods, gift certificates, or shopping sprees in exchange for filled prescriptions are prohibited. No pharmacy may discount the copayment for promotional purposes.
13.10 COORDINATION OF BENEFITS

Coordination of Benefits (COB) (also referred to as Third Party Liability [TPL]) requires providers to bill other insurances, including Medicare Part B, before billing MDHHS. Pharmacy providers should submit both the primary insurer payment amount and the beneficiary's liability (copayment, coinsurance, and/or deductible) under the primary insurer's plan to MDHHS. Regardless of participation by the pharmacy provider with the other insurance and/or Medicare, MDHHS only reimburses for the coinsurance and deductible amounts up to the Medicaid allowable fee screen. If the other insurance's (including Medicare) reimbursement exceeds the reimbursement level of Medicaid, no additional monies are paid. Providers must submit the charge as the amount allowed by the other insurance, indicating the other insurance payment (including the professional dispensing fee) and the other insurance copayment. In addition, the provider is to use the drug list established by the beneficiary's other insurance carrier. If the other insurance carrier's drug list covers a drug not on the MPPL, the prescriber must obtain PA from MDHHS. (For complete information on MDHHS policy regarding other insurance, refer to the Coordination of Benefits Chapter of this manual.)

If a provider receives payment from another insurance and/or Medicare after MDHHS has made full payment, the payment must be returned to MDHHS through a claim adjustment. Failure to reimburse MDHHS may be construed as fraud under the Medicaid False Claim Act. For billing information on COB, refer to the PBM Pharmacy Claims Processing Manual, the PBM website, or contact the PBM Technical Call Center. (Refer to the Directory Appendix for website and contact information.)
SECTION 14 – SPECIAL PRODUCT COVERAGE

14.1 AMPHETAMINE

Some drugs used to treat narcolepsy or hyperkinesis may be covered for beneficiaries over 17 years of age. The prescriber or designee must obtain PA before the pharmacy dispenses these products.

14.2 ANTIHEMOPHILIC DRUGS

A Medical Supplier must bill for infusion kits necessary for administration. (Refer to the Medical Supplier Chapter of this manual for additional information.)

Antihemophilic drugs are a Medicare Part B benefit. For beneficiaries who are eligible for both Medicare and Medicaid, the pharmacy must bill Medicare prior to billing Medicaid as explained in the Coordination of Benefits Chapter of this manual.

14.3 ANTI NEOPLASTIC DRUGS

Covered chemotherapeutic agents are listed in the MPPL. Most injectable chemotherapy forms are not listed in the MPPL as reimbursement is made to the administering healthcare provider (e.g., physicians, outpatient hospitals). A dosage intended for parenteral infusion (continuous or intermittent), perfusion, or intracavity administration in an office, clinic, or outpatient hospital is not a reimbursable Medicaid benefit to a pharmacy. The pharmacy should bill the ordering provider of service.

Injectable chemotherapy and topical uses for these products may be reimbursed to a pharmacy for home use. Some of these agents may require PA. Refer to the MPPL for verification of PA requirements.

14.4 COMPOUNDED DRUGS

Medicaid defines a compounded drug as the combination of two or more ingredients not available from any Labeler in the combination prescribed. Compounded prescriptions must contain at least one product manufactured by an approved Labeler. The following compounded drug policies do not apply to infusion therapy.

14.4.A. EXCLUSIONS

Compounded drugs are not covered if active ingredients include:

- A noncovered legend drug or drug class (e.g., cough/cold, DESI);
- Only OTC drugs;
- Reconstitution of a product only; or
- Pre-mixed infusion solutions (Refer to the Directory Appendix for PBM website information to obtain the list of pre-mixed infusion solutions)

A compounded prescription is not covered if it contains noncovered products and is prescribed solely to circumvent program limitations.
14.4.B. PROFESSIONAL DISPENSING FEES

Professional dispensing fees for compounded drugs are available on the MDHHS website. (Refer to the Pharmacy Resources portion of the Directory Appendix for website information.) To receive the compounded fee, a prescription must involve extemporaneous compounding and dispensing prepared only when orders for specific beneficiaries are received.

Medicaid monitors its compounded drug policy on a pre- and post-payment basis.

14.5 FAMILY PLANNING SUPPLIES

14.5.A. CONDOMS

Condoms do not require a prescription. A pharmacy may provide condoms at the beneficiary’s request. Both males and females are eligible to receive condoms. Condoms are not a covered benefit for participants in the CSHCS program.

- **Payment Limit** - Payment is the lesser of the pharmacy’s retail price or the MAC listed in the MPPL. A dispensing fee is not paid for condoms.
- **Dispensing Limits** - The following quantity requirements are monitored by pre- and post-payment reviews. A pharmacy is not reimbursed for more than:
  - 12 condoms at one time to a beneficiary; or
  - 36 condoms in 30 days to a beneficiary.
- **Documentation** - Pharmacies are responsible for maintaining adequate documentation to substantiate which beneficiaries received condoms. Documentation can be collected on a prescription blank or a log entry. Either form of documentation must contain:
  - An assigned control number (e.g., prescription number);
  - Beneficiary name;
  - Beneficiary Medicaid ID number;
  - Brand name of condom dispensed;
  - Quantity dispensed; and
  - Date dispensed.

14.5.B. DIAPHRAGMS AND CERVICAL CAPS

A dispensing fee is not paid for diaphragms and cervical caps.

14.6 CLOZAPINE

Clozapine may be billed in weekly cycles. A professional dispensing fee may be reimbursed each week when billed in accordance with other MDHHS and FDA product licensure guidelines.
14.7 INFUSION THERAPY

Infusion therapy, except for Total Parental Nutrition (TPN) used in the home setting, is covered for a pharmacy. If a specific drug is not listed in the MPPL, PA must be obtained. A Medical Supplier must bill for infusion-related expendable supplies and durable medical equipment, such as pumps or IV stands and TPN.

MDHHS will reimburse an additional single all-inclusive fee, above the standard dispensing fee, for the diluent and vehicle that is administered with the active ingredient. MDHHS dispensing fees are posted on the MDHHS website. (Refer to the Directory Appendix for website information.)

Daily billing for infusion therapy is not allowed. Drugs for infusion therapy must not be billed more frequently than seven days.

14.8 INHALERS

Depending on the beneficiary’s condition, several inhalers per month may be necessary. If dispensing limitations allow and the prescriber writes accordingly, the beneficiary may obtain more than one inhaler per prescription. A dispensing fee for inhalers is not paid to pharmacies.

14.9 METHADONE

Methadone is only covered when used as an analgesic for severe intractable pain such as that produced by some types of terminal illnesses.

14.10 NARCOTIC ANALGESICS

A FFS beneficiary cannot obtain a new prescription or refill of an existing narcotic analgesic, whether the drug is prescribed by the same or different healthcare provider or for a different drug in the same class, until 90 percent (95 percent for Benefits Monitoring Program beneficiaries) of the drug quantity limit has been consumed in compliance with the prescribed dose, amount, frequency and time intervals established by MDHHS.

Hospice (Benefit Plan ID of Hospice) beneficiaries are exempt from refill tolerance restriction. Benefits Monitoring Program beneficiaries are also exempt from refill tolerance restriction.

The refill restriction also does not apply if payment from the other insurance is reported on the claim.

The pharmacy may contact the MDHHS PBM Technical Call Center to request an override for an instance where an early refill is warranted. (Refer to the Directory Appendix for contact information.)

14.11 ORAL CONTRACEPTIVES

Prescriptions for oral contraceptives may be dispensed for a three-month supply when the prescriber writes the prescription accordingly.

14.12 OVER THE COUNTER DRUGS

Covered OTC drugs are listed in the MPPL. A prescription is required. The refill policy is the same as for legend drugs.
14.12.A. OTC DRUGS FOR END STAGE RENAL DISEASE

Certain OTC drugs are covered only for End Stage Renal Disease (ESRD) (that is, prescribed for the treatment of a beneficiary with a kidney transplant or one undergoing maintenance dialysis). Documentation must be kept on file by the pharmacy to substantiate the beneficiary's ESRD condition and must include:

- The date of the transplant (month and year); or
- The name of the facility performing dialysis; or
- An indication that the beneficiary is on Continuous Ambulatory Peritoneal Dialysis (CAPD).

14.12.B. OTC DRUGS FOR NURSING FACILITIES

The MPPL designates when a covered OTC drug is included in the NF per diem. These products and noncovered OTC drugs are included in the per diem rate paid to a nursing facility. It is the responsibility of the nursing facility to provide these products for its beneficiaries. Reimbursement must be obtained from the nursing facility.

Covered OTC drugs, such as insulin (except if covered by the Medicare Part D benefit) and those not designated as included in the NF rate, are reimbursable to a pharmacy for NF beneficiaries.

14.13 PEAK FLOW METERS, SPACERS, AND AEROCHAMBERS

Peak flow meters, spacers, and aerochambers listed in the MPPL may be billed by pharmacies. A dispensing fee is not reimbursed to pharmacies that bill for these supplies. Coverage is limited to four (4) peak flow meters per year, and four (4) spacers and/or aerochambers combined total per year.

Spacers and aerochambers cannot be billed by the pharmacy for NF beneficiaries. These items are included in the NF per diem rate.

14.14 PHYSICIAN-ADMINISTERED INJECTABLE DRUGS

Pharmacy claims for the following physician-administered injectable drugs are reimbursable under Michigan Medicaid and the Healthy Michigan Plan:

- Mental health and substance abuse injectable drugs, as listed on the Prepaid Inpatient Health Plan (PIHP)/Community Mental Health Services Program (CMHSP) Physician Injectable Drug Coverage database available on the MDHHS website, administered in an outpatient setting or residential treatment center. (Refer to the Directory Appendix for website information.)

- 17 Alpha Hydroxyprogesterone Caproate (17P and Makena), administered in an outpatient setting.

Pharmacy providers may be reimbursed for these injectable drugs for administration using a rate based on the National Drug Code (NDC). The rates for drug product reimbursement are outlined in the Michigan Medicaid State Plan. Professional or institutional claims for physician-administered injectable
drugs are also a covered benefit. Pharmacies and prescribing practitioners must ensure that claims are not duplicated. This policy applies to Fee-for-Service claims.

Pharmacy providers may not dispense a physician-administered injectable drug directly to the beneficiary. To ensure the content and integrity of the drug administered to the beneficiary, the drug must be delivered from the pharmacy directly to the physician for administration. The method of delivery of the injectable drug to the physician should be agreed upon by the pharmacy and physician. The refrigeration, stabilization, and other storage and handling requirements of the drug must be met during delivery and at all points of the transaction. The costs associated with the delivery of the injectable drug to the physician are not reimbursable by MDHHS.

The injectable drug must be administered to the beneficiary within 14 days of the arrival of the drug to the physician's office. For multi-dose vials, the first dose must be administered to the beneficiary within 14 days of the arrival of the drug to the physician's office. For the safety of beneficiaries and to minimize waste, procedures should be established to return unused medications to the pharmacy when appropriate. Restocking returned products should be compliant with Michigan Board of Pharmacy guidelines.

Enrolled pharmacy providers may bill for the injectable drug Synagis.

14.15 VACCINES

All vaccines recommended by the Advisory Committee on Immunization Practices (ACIP), including seasonal influenza vaccines, administered by pharmacists are covered for adults aged 19 years and older.

Pharmacies may submit a claim for the vaccine and its administration for Fee-for-Service Medicaid and MOMS beneficiaries. In addition, pharmacies may submit a claim for seasonal influenza vaccine and its administration for CSHCS beneficiaries. For beneficiaries enrolled in a Medicaid Health Plan, the pharmacy provider must confirm coverage of pharmacist-administered vaccines with the plan.

Pharmacists must be in compliance with State of Michigan rules and regulations, have received the appropriate training for vaccine administration, and have a letter of delegation from a physician to be eligible to administer vaccines. Standing orders are required from a Michigan-licensed physician who is responsible for the clinical practice of the vaccine operations. This documentation must be readily available onsite in the event of an audit.

Pharmacists who administer vaccines must register with the Michigan Care Improvement Registry (MCIR). This database provides a complete record of immunizations for Michigan residents. Pharmacists must review the beneficiary's immunization history in MCIR prior to administering the vaccine. MCIR must be updated within 72 hours of administering the vaccine.

In order to receive reimbursement for vaccine administration, pharmacies must submit claims through the MDHHS Pharmacy Benefits Manager (PBM). (Refer to the Directory Appendix for contact information.)

The pharmacy must submit the National Drug Code (NDC) for the product administered and the appropriate values in the Drug Utilization Review (DUR)/Professional Pharmacy Services (PPS) segment.
and the Professional Service Code respectively. MDHHS allows pharmacies to bill the cost of the vaccine; therefore, the pharmacy should submit the allowed administrative fee in the incentive fee submitted field.

Dispensing fees are not allowed for the administration of vaccines.

The pharmacy must develop an appropriate mechanism for purposes of properly documenting the identification of the administering pharmacist.

Either a pharmacy or physician can bill for the vaccine administration, but not both. Copayments for vaccine administration services do not apply.
SECTION 15 – NURSING FACILITY

Because of the uniqueness of pharmacy services provided in the nursing facility (NF) setting, separate billing policies were established. Other policies listed in this chapter also apply to NF beneficiaries.

15.1 BENEFIT PLANS [CHANGE MADE 7/1/18]

NF beneficiaries typically reside in a nursing home, hospital long term care (LTC) unit, or county-operated medical care facility (MCF). The Benefit Plan ID of NH will be indicated in the eligibility response for beneficiaries who reside in a nursing home.

(text deleted per bulletin MSA 17-46)

15.2 DISPENSING FEE

A pharmacy may receive a maximum of 13 dispensing fees for the same drug entity per 365-day billing period.

15.3 COPAYMENT

Medicaid beneficiaries residing in NFs have no pharmacy copayment.

15.4 PHARMACY CONSULTANT SERVICES

Medication reviews and other pharmacy consultant services are the responsibility of the facility and are included in the facility's per diem rate. The pharmacy must make arrangements with the facility for reimbursement of such services.

15.5 PRODUCTS INCLUDED IN THE NURSING FACILITY PER DIEM RATE

MDHHS does not directly reimburse a pharmacy for items included in a facility's per diem rate. If provided, no additional or separate charges may be made to a beneficiary, a member of the beneficiary's family, or other beneficiary representative. If a pharmacy is requested to dispense any of the following, arrangements for payment must be between the pharmacy and the facility.

- Medical Supplies - Examples of medical supplies included in the facility's per diem rate are insulin syringes, reagent strips, aerochambers, spacers, peak flow meters, etc.
- Enteral Formulas – Enteral Formulas are included in the facility's per diem rate.
- OTC products not listed in the MPPL as in the NF’s per diem rate may be paid directly to a pharmacy by MDHHS. Noncovered OTCs are included in the NF’s per diem rate. Examples of OTCs in the per diem include, but are not limited to:

|                                 | • Stool Softeners and stool softeners/laxative combinations  

15.6 **DRUG RETURNED FROM NURSING FACILITY**

MDHHS does not reimburse for prescriptions that are not consumed by the beneficiary. The quantity of drug(s) consumed is determined by subtracting the quantity of drug(s) that is returned for the beneficiary from the quantity that was dispensed for the beneficiary. A pharmacy must credit MDHHS for those drugs that are not consumed, except for controlled, adulterated, compromised or unusable. The pharmacy must maintain documentation of the quantity dispensed and consumed by the beneficiary, showing a credit to MDHHS for drugs not consumed.

MDHHS does not allow restocking fees.
SECTION 16 – PUBLIC HEALTH SERVICE AND DISPROPORTIONATE SHARE HOSPITALS

With enactment of Section 602 of the Veterans Healthcare Act of 1992, Public Health Service (PHS) covered entities and selected disproportionate share hospitals (DSH) became eligible for contract drug prices from Labelers (340B Program). A list of participating entities is located on the Bureau of Primary Health Care - Health Resources and Services Administration (HRSA) website. (Refer to the Directory Appendix for website information.)

In addition to these product cost discounts, entities participating in this contract drug program are required by Federal policies to bill drugs covered in the PHS program using the actual acquisition cost for a drug plus a professional dispensing fee. Actual acquisition cost is defined as the actual invoice cost for a drug product to the pharmacy or company, organization, corporation, or affiliate with which it is associated.

Actual acquisition cost must reflect trade and quantity discounts, rebates, free goods, and price concessions.

On a post-payment basis, MDHHS reviews billings from PHS participating entities to track compliance with this requirement.

Covered entities or their contracted pharmacies, or disproportionate share hospital participating entities that are enrolled as Medicaid pharmacy providers who bill 340B prices, must indicate on the claim that the drug was purchased through the 340B program so their claims can be excluded from the drug rebates. Professional/institutional claims for drugs purchased through the 340B program must be indicated on the claim using the modifier U6. Pharmacy claims for outpatient drugs purchased through the 340B program must be indicated on the claim using a Submission Clarification Code of 20.
SECTION 17 – DRUG REBATE PROGRAM

17.1 APPROVED LABELERS AND MPPL

MDHHS covers only those drugs produced by Labelers who have signed rebate agreements with the federal government. Products distributed by companies or a division within a company that did not enroll are not covered.

Approved Labelers are located on the CMS website and are identified by the specific five-digit labeler code (the first five digits of the NDC). (Refer to the Directory Appendix for CMS website information.)

17.2 NATIONAL DRUG CODE ACCURACY

MDHHS invoices pharmaceutical Labelers for rebates quarterly from the pharmacy paid claims history. Pharmacies must bill the actual NDC for a product dispensed. Pharmacies may be contacted periodically to verify product utilization and cost. Contact can include phone or written verification requests. Documentation requirements for verification can include, but are not limited to:

- Copies of the product invoice
- Copies of original prescriptions
- Compounding records
SECTION 18 – BENEFITS MONITORING PROGRAM

The purpose of the Benefits Monitoring Program (BMP) is to monitor and control inappropriate utilization of covered services, including prescribed drugs. (Refer to the Beneficiary Eligibility Chapter for additional information regarding the BMP.)
**SECTION 19 – PHARMACY AUDIT AND DOCUMENTATION**

**19.1 DOCUMENTATION REQUIREMENTS**

MDHHS monitors for compliance with Medicaid policy, the Administrative Rules of the Michigan Board of Pharmacy, the Public Health Code, and other applicable federal and state regulations.

The following information serves as a general guide for compliance monitoring during post-payment pharmacy reviews and audits. Additional details pertaining to post-payment pharmacy audits can be found on the post-payment auditor’s website. (Refer to the Directory Appendix for website and contact information.) Non-compliance, especially continued non-compliance, may result in payment recovery, sanctions, or referral to the Michigan Attorney General’s Office.

| 340B Drug Pricing Program | Billing ingredient costs may not be higher than actual acquisition costs for drugs procured under the 340B Drug Pricing Program. Pharmacy claims for outpatient drugs purchased through the 340B program must be indicated on the claim using a Submission Clarification Code of 20. |
| Changing Claim Information | Providers may not falsely alter the NDC number, date of service, prescription number, days supply, or any other claim requirement that would allow payment. |
| Compounds | The compounding of prescription products to gain coverage of noncovered OTC, noncovered legend drugs, or other noncovered categories is prohibited (e.g., the use of injectable Sodium Bicarbonate to compound a Sodium Bicarbonate foot irrigation). Medicaid recovers inappropriate payments for billings found in violation of policy. |
| CSHCS Only | Pharmaceutical products must relate to the qualifying diagnosis. Payment is recouped for billings for products not related to the qualifying diagnosis. |
| Days Supply | Accurate days supply information is required. Altering days supply information for purposes of payment will be considered fraud and will be reported to the appropriate unit for investigation. Dosages outside the normal dosage range based on the days supply submitted may prompt a verification request of product usage on reported utilization. |
| Drug(s) Returned From Nursing Facility | MDHHS does not reimburse for prescriptions that are not consumed by the beneficiary. MDHHS does not allow restocking fees. |
| Hospice | Pharmacies must not bill MDHHS for prescription services related to the terminal illness except for selected HIV drugs. (Refer to the General Information Section of this chapter for additional information.) |
| Inaccurate Billing | All claim submission requirements outlined in the PBM Pharmacy Claims Processing Manual must be followed including, but not limited to, accurate Prescription Origin Code, NDC, and NDC unit of measure reporting. The Pharmacy Claims Processing Manual is available on the PBM website. (Refer to the Directory Appendix for website information.) |
| Medicare Part D | Pharmacies cannot bill Medicaid for drugs covered by Medicare Part D. The Medicaid Program does not coordinate benefits with Medicare Part D. |
| Other Insurance Payments | Pharmacies must bill other insurances before billing Medicaid. This also applies to Medicare Part B eligible beneficiaries. Failure to bill Medicaid the total due less the amount paid by another insurance or by Medicare Part B may be construed as fraud under the Medicaid False Claim Act. |
### Prescriber Information

Accurate prescriber information must be provided as required by MCL 400.111b(21). Submitting incorrect prescriber identification numbers can cause false ProDUR messages and claim denials. It could also cause a pharmacy to be targeted for post-payment audit. Pharmacies are audited for inappropriate identification of prescribers.

### Prescription Documentation

Original written prescriptions must be executed on tamper resistant prescription pads. If a prescription is created, signed, transmitted, and received electronically, all records related to that prescription must be readily accessible and maintained for seven years. Prescriber medical record documentation may be provided to validate prescriptions. Prescriber affidavits, attestations, and retroactively dated prescriptions will not be accepted for pharmacy documentation. Notation on a pharmacy’s database is not considered a written form of the prescription. For originals and all refills, accurate prescription documentation must be readily accessible and maintained for seven years. All of the following information must be entered in the record for each prescription:

- prescription number
- full name and address of patient for whom the drug is prescribed
- prescriber’s printed name and address
- prescriber’s individual NPI
- prescriber’s DEA (for controlled substance only)
- drug name and strength
- quantity prescribed
- directions for use
- number of refills authorized

### Prescriptions Filled But Not Picked Up

Retail prescriptions filled but not dispensed or picked up by the beneficiary or his representative. Restocking fees are not allowed. A record of the reversal log must be maintained for seven years for audit purposes.

### Professional Dispensing Fees

Pharmacies may not bill in a pattern that would lead to more than 13 professional dispensing fees in a 365-day billing period for the same drug entity. Splitting prescriptions to increase the number of fees paid is considered fraud and will be reported to the appropriate unit for investigation.

### Signature Requirement

Providers must maintain and have accessible the signature log indicating beneficiary’s pick-up of prescription and acceptance or denial of beneficiary counseling. Missing signatures indicate the prescription was not picked-up or the beneficiary was not offered counseling as required. Pharmacies are required to maintain this log for seven years.

### Usual & Customary (U&C) Charge

For specified products, the submitted charge is compared to the cash price to the general public.

---

### 19.2 Invoice and Inventory Records

In addition to all other documentation required under state law, federal law, and MDHHS policy, pharmacy providers must maintain invoices, manufacturer and/or wholesaler sales records, distributor delivery records to the provider, inventory transfer records, provider payment records, and all other records necessary to support the size and quantity of the goods paid for by Medicaid during the audit/review period. Failure to do so will result in the recoupment of pharmacy funds related to unsupported Medicaid claims. In the event inventory for any such product cannot be substantiated...
through reliable documentation for the beginning of the audit/review period, MDHHS may assume that the beginning and ending inventory quantities are the same for that product. For the purposes of this policy, the “audit/review period” shall be a period defined by MDHHS.

**19.3 MEDICATION THERAPY MANAGEMENT DOCUMENTATION REQUIREMENTS**

Pharmacists must document each Medication Therapy Management (MTM) service provided. Documentation must include, but is not limited to, the following:

- **Beneficiary information**
  - Name
  - Address and telephone number
  - Medicaid identification number
  - Gender
  - Date of birth
- **Beneficiary’s consent for the MTM service, indicated by the beneficiary’s signature and date**
  - If the beneficiary is a child who is younger than the age of consent per state law, or has physical or cognitive impairments that preclude the beneficiary from managing his or her own medications, a caregiver (e.g., caretaker relative, legal guardian, power of attorney, licensed health professional) may provide written consent on the beneficiary’s behalf.
- **Pharmacist information**
  - Name
  - Pharmacist National Provider Identifier (NPI)
  - Pharmacy Name and NPI
- **Date of Service**
- **Place of Service**
- **Indication of how the beneficiary meets the criteria to receive an MTM service (e.g., meets the chronic condition requirement)**
- **Indication if this is an initial assessment or follow-up assessment**
- **Current medical conditions**
- **Allergies**
- **Primary physician and contact information**
Other information may include the following (items are required if relevant):

- Date of documentation
- Location of beneficiary if service is provided through telepractice
- Time spent with beneficiary
- Resolved medical conditions
- List of all prescription drugs, along with prescriber information and name of dispensing pharmacy
- List of nonprescription drugs with their indications
- List of drug doses, directions and intended use
- List of all relevant medical devices
- List of all dietary supplements and herbal products
- Alcohol and tobacco use history
- List of environmental factors that impact the beneficiary
- Assessment of drug problems identified, including but not limited to:
  - Determining that the medications are appropriately indicated
  - Determining if the beneficiary needs additional medications
  - Determining if the medications are the most effective products available for the conditions
  - Determining if the medications are dosed appropriately to meet goals of therapy
  - Identifying adverse effects caused by medications
  - Determining if the medications are dosed excessively and causing toxicities
  - Determining if the beneficiary is taking the medications appropriately to meet goals of therapy
  - Evaluating effectiveness and safety of current drug therapy
  - Written plan, including goals and actions needed to resolve issues of current drug therapy
  - Evaluation of success in meeting goals of medication treatment plan
  - Information, instructions and resources delivered to the beneficiary
  - Content of pharmacist’s communications to beneficiary’s other health care providers
- Description of what was discussed with the beneficiary during the assessment, and whether that information was communicated to the beneficiary's primary care providers

This documentation must be made available to MDHHS upon request. In addition, this documentation and any other relevant documentation may be collected by MDHHS or its designee on an annual basis for the purposes of program evaluation.
SECTION 20 – MEDICAL SUPPLIES

20.1 GENERAL INFORMATION

Covered medical supply items payable (minus a dispensing fee) to a pharmacy are listed in the MPPL. A prescription is required for medical supplies. Covered products include insulin syringes, alcohol swabs, etc.

MDHHS does not separately reimburse a pharmacy for medical supplies dispensed to beneficiaries in nursing facilities, hospital long term care units, or medical care facilities. These items are considered a part of the facility's per diem rate. If provided, no additional or separate charges may be made to a beneficiary, a member of the beneficiary’s family, or other beneficiary representative. If a pharmacy is requested to dispense any of these items, arrangements for payment must be between the pharmacy and the facility.

Except for those items listed in the MPPL, medical supplies and equipment are covered only when billed by a Medical Supplier or Orthotist/Prosthetist. These items include equipment (e.g., canes), orthotics (e.g., arch supports), prosthetics, oxygen dispensers, wound care dressings (e.g., transparent film, hydrocolloid absorptive dressings, alginate and gel dressing), splints, ace bandages, TPN, enteral and oral nutritional supplements, etc.

When billing as a Medical Supplier or Orthotist/Prosthetist, refer to the Medical Supplier and the Billing & Reimbursement for Professionals Chapters of this manual for additional information.

To enroll as a Medical Supplier, providers must complete an on-line application through the CHAMPS Provider Enrollment subsystem. (Refer to the Provider Enrollment Section of the General Information for Providers Chapter for additional enrollment information, and the Directory Appendix for contact information.)

20.2 SUPPLIES FOR ADMINISTRATION OF PART D DRUGS

MDHHS will reimburse (minus a dispensing fee) a pharmacy for medical supplies and/or equipment (e.g., IV poles, tubing) associated with the administration of Medicare Part D drug(s) to the dual eligibles (except those residing in a nursing facility) for home infusion therapy.
SECTION 21 - MEDICATION THERAPY MANAGEMENT

21.1 OVERVIEW OF MEDICATION THERAPY MANAGEMENT (MTM)

Medication Therapy Management (MTM) services are face-to-face consultations provided by pharmacists to optimize drug therapy and improve therapeutic outcomes for beneficiaries. Beneficiaries may elect MTM as an optional service provided by participating pharmacists. (Refer to the Eligible Providers subsection for information on enrolling as an MTM provider.) These services are paid through the Fee-for-Service program for beneficiaries enrolled either in FFS or in a Medicaid Health Plan. There is no cost-sharing responsibility to the beneficiary for the MTM service.

The requirements outlined in the Counseling Requirements section may not be billed as an MTM service.

21.2 COVERED SERVICES

MTM services include the following:

- Obtaining necessary assessments of the beneficiary's health status
- Formulating a medication treatment plan
- Monitoring and evaluating the beneficiary's response to therapy, including safety and effectiveness
- Performing a comprehensive medication review to identify, resolve, and prevent medication-related problems, including adverse drug events
- Documenting the care delivered and communicating essential information to the beneficiary's other primary care providers
- Referring the beneficiary to his/her primary care provider or specialist, if necessary
- Providing verbal education and training designed to enhance the beneficiary's understanding and appropriate use of medications
- Providing information, support services, and resources designed to enhance adherence with the beneficiary's therapeutic regimens
- Providing an updated personal medication record and medication action plan for the beneficiary
- Coordinating and integrating MTM services within the broader health care management services being provided to the beneficiary

Any recommended changes to the beneficiary's drug therapy must be approved by the original prescriber(s) of the affected drugs.

Refer to the Medication Therapy Management Documentation Requirements subsection for requirements on documenting MTM services.

21.3 NON-COVERED SERVICES

The following are not eligible to be covered as MTM services:

- Services provided by telephone, email or US Postal Service mail
Services provided in skilled nursing facilities
Services provided to more than one beneficiary at a time (i.e., group services)
Services provided in an inpatient, institutional, or incarceration setting

21.4 ELIGIBLE RECIPIENTS

Beneficiaries are eligible for MTM services if they are not eligible for Medicare Part D and are taking a medication to treat or prevent one or more chronic conditions as identified in the List of Chronic Conditions for MTM Eligibility. (Refer to the Directory Appendix for website information.)

MTM services must be provided face-to-face with the beneficiary whenever possible. If the beneficiary is a child who is younger than the age of consent per state law, or has physical or cognitive impairments that preclude the beneficiary from managing his or her own medications, MTM services may be provided face-to-face to a caregiver (e.g., caretaker relative, legal guardian, power of attorney, licensed health professional) on the beneficiary’s behalf.

21.5 ELIGIBLE PROVIDERS

To provide MTM services, a pharmacist must be licensed and have successfully completed either the American Pharmacists Association’s “Delivering Medication Therapy Management Services” certificate training program or other MTM program(s) approved by the Accreditation Council of Pharmacy Education.

Pharmacists who meet these requirements must enroll in the Community Health Automated Medicaid Processing System (CHAMPS) with an Individual (Type 1) National Provider Identifier (NPI) Number as a Rendering/Servicing-Only provider. Under this type of enrollment, pharmacists are required to affiliate themselves with the billing NPI of a pharmacy, Federally Qualified Health Center (FQHC), Tribal Health Center (THC), or Rural Health Clinic (RHC). The pharmacist must enroll as a Non-Physician, with a Pharmacist specialty and the subspecialty of Medication Therapy Management. Individual pharmacists are not eligible for direct Medicaid reimbursement; payment for MTM services will be issued to the affiliated pharmacy, FQHC, THC and/or RHC NPI. Refer to the Provider Enrollment section of the General Information for Providers chapter for more information on this process.

These services may not be delegated by pharmacists to pharmacy technicians or other healthcare professionals.

21.6 LOCATION REQUIREMENTS

MTM services may be provided in the following settings:

- Ambulatory care outpatient setting
- Clinic
- Pharmacy
- Beneficiary’s home if the beneficiary does not reside in a non-covered services setting

These services must be provided face-to-face in a private or semiprivate patient care area that is separate from the commercial business that also occurs in the setting, or in home settings.
21.7 TELEPRACTICE FOR MTM SERVICES

In the event that the beneficiary is unable to physically access a face-to-face care setting, an eligible pharmacist may provide MTM services via telepractice. Telepractice is the use of telecommunications and information technologies for the exchange of encrypted patient data for the provision of services. Telepractice must be obtained through real-time interactions between the beneficiary’s physical location (origin site) and the pharmacist provider’s physical location (distant site). Telepractice services are provided to beneficiaries through hardwire or internet connection. It is the expectation that providers and facilitators involved in telepractice are trained in the use of equipment and software prior to servicing beneficiaries. The arrangements for telepractice will be made by the pharmacist. The administration of telepractice services are subject to the same provision of services that are provided to a beneficiary in person. Providers must ensure the privacy of the beneficiary and secure any information shared via telepractice.

Refer to the Billing Instructions subsection (of this section) for instructions on indicating the MTM service was provided through telepractice.

21.8 BILLING INSTRUCTIONS

21.8.A PROFESSIONAL CLAIMS

Pharmacy-based MTM claims must be submitted on the professional claim format (HIPAA 837P). The Billing Provider reported on the claim must be the Pharmacy’s (Type 2) NPI and be actively enrolled in CHAMPS to be paid. The Rendering Provider reported on the claim must be the Pharmacist’s (Type 1) NPI and be actively enrolled in CHAMPS.

For services provided through telepractice, each procedure code must include the modifier GT. Providers can submit HIPAA 837P electronic claims to CHAMPS through a billing agent, through a batch upload process, or through Direct Data Entry (DDE). Providers can also view claims online and complete claim replacements or voids within CHAMPS.

21.8.B INSTITUTIONAL CLAIMS

The Billing Provider NPI reported on the claim must be the FQHC, RHC, or THC and be actively enrolled in CHAMPS. The Pharmacist (Type 1) NPI must be reported on the Institutional MTM claim as the Rendering Provider and must be actively enrolled in CHAMPS and associated to the Billing FQHC, RHC, or THC for the date of service. The NPI (Type 1 - Individual) number of the physician (MD or DO) overseeing the patient’s care must be entered as the attending provider. The attending provider field is mandatory to complete.

3.1 Provider Eligibility [Change Made 4/1/18] .................................................................................. A4
3.2 Eligible Primary Care Services ................................................................................................... A5
3.3 Enhanced Rates for Primary Care.............................................................................................. A5
SECTION 1 - GENERAL INFORMATION

This chapter applies to physicians (MD, DO), Oral-Maxillofacial Surgeons, Doctors of Podiatric Medicine (DPM), Medical Clinics, Physical Therapists (PTs), Certified Nurse-Midwives (CNMs), Certified Registered Nurse Anesthetists (CRNAs), Anesthesiologist Assistants (AAs), and Nurse Practitioners (NPs).

Generally, medically necessary services provided to a Medicaid beneficiary by an enrolled practitioner are covered. The services addressed in this chapter include services that require explanation or clarification, have special coverage requirements, require prior authorization (PA), or must be ordered by a physician (MD or DO).

Information is included to assist the practitioner in determining how the Michigan Department of Health and Human Services (MDHHS) covers specific services. This information should be used in conjunction with the Billing & Reimbursement for Professionals Chapter of this manual, as well as the Medicaid Code and Rate Reference tool, MDHHS Practitioner and Medical Clinic Fee Schedule and other related procedure databases/fee schedules located on the MDHHS website. (Refer to the Directory Appendix for website information.)

1.1 ADMINISTRATIVE SERVICES

Services of physicians, medical staff or other licensed or certified health professionals functioning in an administrative or teaching capacity for a hospital or nursing facility (including physician-owners or other staff paid by the physician) are not covered separately as physician services.

Pathology services or interpretive studies done for hospital or nursing facility quality improvement purposes or other reasons which do not directly assist with the specific care of a specific beneficiary are considered to be administrative services and are not separately covered as physician services. These services are included in the facility's allowable costs and are paid to the facility.

1.2 COMPONENT SERVICES

Many physician services are covered as global services. A global service includes all resources necessary to perform the procedure (e.g., office overhead, equipment, supplies, and staff) and the services provided by the physician (e.g., interpretation of results and preparation of a report of findings).

Some services are divided into a professional component and a technical component for coverage purposes. The professional component includes the services provided by the physician while the technical component includes equipment, supplies, and technical staff.

Coverage for the professional component or the technical component generally depends on where the service is provided and who provides that portion of the service. Services for which the components are covered for the physician are identified in the Medicaid Code and Rate Reference tool or on the MDHHS Practitioner and Medical Clinic Fee Schedule. (Refer to the Directory Appendix for website information.)

Global services are covered for the physician in non-facility settings or the professional component is covered for the physician in any setting. The technical component is only covered when the service is provided in an appropriate non-facility setting. The global service and its professional component service
cannot both be covered for the same service since the professional component is included in the global service.

1.3 COPAYMENTS

A copayment may be required for physician office (evaluation and management) visits for beneficiaries age 21 years and older.

The office visit copayment applies to services provided in the physician’s office, urgent care center, or other appropriate setting. It does not apply to professional services provided in the outpatient hospital or inpatient hospital settings. Refer to the General Information for Providers Chapter for information about copayments. Current copayment amounts are listed on the MDHHS website. (Refer to the Directory Appendix for website information.)

Podiatrists should refer to the Podiatrist Section of this chapter for information regarding beneficiary copayments for podiatry services.

Ophthalmologists providing routine vision services should also refer to the Vision Chapter for information regarding beneficiary copayments for vision services.

Refer to the Billing Beneficiaries Section of the General Information for Providers Chapter of this manual for additional information regarding copayment requirements. Beneficiaries may not be denied care or services based on inability to pay a copayment, except as outlined in that section.

1.4 FACILITY AND NONFACILITY REIMBURSEMENT

Medicaid reduces payment for specified procedures provided in a facility setting. This policy is consistent with the Centers for Medicare & Medicaid Services (CMS) facility and nonfacility reimbursement determination. When a provider performs services in a facility setting, costs for certain procedures are reduced because the practitioner does not incur certain overhead expenses (such as clinical staff, supplies, equipment) necessary to provide the service. When a service is performed in a nonfacility setting, the payment rate is based on the nonfacility relative value units (RVUs). When the service is provided in a facility setting, the payment rate is based on the facility RVUs. The payment difference takes into account the higher expenses for the provider in the nonfacility setting. For the purpose of this payment policy, a facility includes the following:

- Hospital inpatient and outpatient facilities
- Psychiatric facilities
- Skilled nursing facilities
- Ambulatory surgery centers
- Rehabilitation facilities
1.5 HOSPITAL-BASED PROVIDER [CHANGE MADE 7/1/18]

Medicaid covers services by hospital-based providers (HBPs). A hospital-based provider is employed by the hospital. Each HBP is assigned his own NPI number.

For purposes of Medicaid, a HBP includes physicians (MD, DO, DPM). Some nonphysician practitioners, such as certified registered nurse anesthetists (CRNAs), nurse practitioners (NPs), certified nurse midwives (CNMs), and physician assistants (PAs) (text added 7/1/18) can also be considered HBPs under certain circumstances.

Medicaid follows Medicare guidelines for the coverage of HBP services provided by physicians. Generally, professional services provided by nonphysician providers that are employed by a hospital are included in the hospital cost report and are reimbursed to the hospital.

(The HBP should refer to their provider-specific chapter of this manual for policies, procedures, and coverage information.)

1.6 MEDICARE RELATED SERVICES

MDHHS reimburses practitioners for the coinsurance and deductible amounts subject to Medicaid reimbursement limitations on all Medicare approved claims even if Medicaid does not normally cover the service. (Refer to the Billing & Reimbursement for Professionals and the Coordination of Benefits Chapters of this manual for additional information.)

1.7 PHYSICIAN DELEGATION AND SUPERVISION

All physician services covered by Medicaid must be performed by the physician personally, the physician’s employee, or an employee of the same legal entity that employs the physician, under the physician’s delegation and supervision. Only persons currently licensed/certified in an appropriate health occupation/profession (e.g., physician’s assistant, NP, CNM) as authorized by Public Act 368 of 1978, as amended, may provide direct patient care under the delegation and supervision of a physician when the physician is not physically present on the premises. The delegating/supervising physician must be continuously available through direct communication such as telephone, radio, or telecommunication when not on the premises. Delegated and supervised services rendered by non-physician practitioners (e.g., physician assistants and nurse practitioners) must be billed under the non-physician practitioner’s NPI and include the NPI of the supervising physician as applicable.

In the physician’s absence, licensed persons who are under the physician’s delegation and supervision at the medical care site where the physician regularly sees beneficiaries may provide medical services. Records must demonstrate that the licensed physician is regularly available and provides medical care to beneficiaries at the site on a routine basis. This does not preclude licensed persons under the physician’s delegation and supervision from making calls or going on rounds to private homes, public institutions, hospitals, or other health care facilities, as long as the care is a supplement to and does not replace the physician’s personal services.

Care and treatment of Medicaid beneficiaries may only be delegated to unlicensed/certified persons when the physician is physically present and providing direct supervision.
1.8 PHYSICIAN RESPONSIBILITY

Determination of medical necessity and appropriateness of services is the responsibility of the physician within the scope of currently accepted medical practice and Medicaid limitations. The physician is held responsible if he orders excessive or unnecessary services (e.g., diagnostic tests, prescriptions) regardless of who actually renders or who receives payment for the service. The physician may also be subject to any corrective action related to these services, including recovery of funds.

Services generally must be ordered by a physician to be covered by Medicaid. Some services provided by other providers, such as medical supplies, lab services, and prescriptions, may require the physician to provide written documentation to support the need for the service. For specifics regarding whether a service is a covered benefit, refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter or the Medicaid Code and Rate Reference tool for more information. (Refer to the Directory Appendix for website information.)

1.9 PRIOR AUTHORIZATION

Medicaid requires prior authorization (PA) to cover certain services before those services are rendered to the beneficiary. The purpose of PA is to review the medical need for certain services. It does not serve as an authorization of fees or beneficiary eligibility. Different types of services requiring PA include:

- Procedures identified as requiring PA in the Medicaid Code and Rate Reference tool. (Refer to the Directory Appendix for website information.)
- Procedures/items that are normally noncovered but may be medically necessary for select beneficiaries (e.g., surgery normally cosmetic in nature, obesity surgery, off-label use drugs, etc.).
- Referrals for elective services by out-of-state nonenrolled providers.

1.9.A. TO OBTAIN PRIOR AUTHORIZATION

Requests for PA for surgeries, procedures, office-administered pharmaceuticals, biologicals, and out-of-state-care must be submitted utilizing the Practitioner Special Services Prior Approval – Request/Authorization form (MSA-6544-B). (Refer to the Forms Appendix for a copy of the form or download the form from the MDHHS website.) The form must be completed in its entirety. Supportive medical documentation must accompany the form.

Providers receive a written response from MDHHS. If the authorization is granted, the provider receives a PA number to report on the claim. The physician obtaining PA must make the PA number available to other providers, such as other practitioners or the hospital, for billing purposes.

If the beneficiary has Medicare and Medicare covers the service, the provider does not have to obtain PA from Medicaid. If Medicare denies a service as not medically necessary, Medicaid does not cover the service even if a PA has been obtained. If Medicare identifies a service as an excluded benefit under Medicare and Medicaid requires PA, the provider must pursue PA from Medicaid and a coverage determination is made. If the beneficiary has commercial insurance that covers the service and the
provider reports the coverage correctly on the claim, the provider does not have to obtain PA from Medicaid. If a primary insurer covers a service but requires PA and the provider does not follow the primary insurance PA process, Medicaid does not make payment for the service either.

1.9.B. SPECIAL AUTHORIZATIONS

Special authorization requirements must be met for selected surgeries performed in the inpatient setting, all elective inpatient admissions, all readmissions within 15 days, and all transfers to an inpatient hospital/unit. Physicians should refer to the Hospital Inpatient Physician Services and the Surgery Sections of this chapter for specific information.

Some beneficiaries may need authorization of services because they are enrolled in special programs, such as the Benefits Monitoring Program. (Refer to the Beneficiary Eligibility Chapter of this manual for additional information.)

1.10 SERVICES IN A TEACHING SETTING

Administrative costs associated with teaching physician services, as well as payment for direct patient care services provided by a resident (including interns or fellows) in a teaching setting and supervised by a teaching physician, are subject to guidelines and conditions developed and published by CMS for Medicare. Services covered by Medicaid under these guidelines must be identified with the appropriate modifier.

Teaching institutions and teaching physicians within those institutions must abide by the CMS teaching physician guidelines which explain when services provided in teaching settings can be covered by Medicaid or must be included as allowable medical education costs in the hospital’s cost report.

Guidelines require the presence of the teaching physician during the key portion of the performance of the service in which a resident is involved and the teaching physician seeks payment (or the hospital on the behalf of the physician). The medical record must fully support the physician's presence and participation in the service provided. There are exceptions and other considerations that may apply; therefore, the full text of the guidelines must be consulted to ensure compliance. Any services that meet the teaching physician criteria must be reported with the appropriate modifier.

CMS provides an exception to the physician presence requirement for some low- and mid-level Evaluation and Management (E/M) services furnished in certain primary care centers when specified conditions are met. For Medicaid, the preventive medicine E/M visits are also included under the “presence” exception for services provided in the primary care centers by residents. The appropriate modifier must be reported using the “presence” exception when residents provide E/M services. The E/M services that can be reported with this modifier include office or other outpatient visits requiring straightforward or low complexity medical decision making and comprehensive preventive medicine visits. For higher-level services and all invasive procedures, the teaching physician must be present.

Services of residents or physicians/medical staff functioning in an administrative, teaching or learning capacity in the hospital or long term care facility that are covered as individual physician services are subject to post payment review and recovery of funds unless the provider can present proof that the services were not included in the allowable facility costs.
1.11 SERVICES TO NEWBORNS

Physician services provided to newborns are covered under the newborn’s Medicaid ID number. The mother’s Medicaid ID number cannot be used.

If the delivering physician performs the newborn’s care and circumcision during the mother’s inpatient stay, these services can be covered under the mother’s Medicaid ID number if they are billed on the same claim as the services to the mother.

1.12 UNIFORM REPORTING OF SERVICES

MDHHS follows the American Medical Association’s manual and guidelines for Current Procedural Terminology (CPT) numeric codes, and the Healthcare Common Procedure Coding System (HCPCS). In conjunction with the CPT/HCPCS coding systems to describe services rendered, MDHHS utilizes the Medicaid National Correct Coding Initiative (NCCI) coding policies and edits as developed by the Centers for Medicare & Medicaid Services (CMS) to promote national correct coding methodologies.
SECTION 2 – ANESTHESIA SERVICES

Medicaid covers anesthesia services provided by qualified practitioners in conjunction with covered surgeries and other procedures. Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter or the Medicaid Code and Rate Reference tool for more information regarding coverage parameters. (Refer to the Directory Appendix for website information.) Medicaid does not cover any anesthesia service related to the treatment of infertility.

2.1 MEDICALLY DIRECTED ANESTHESIA SERVICES

Medicaid covers anesthesia services provided by physicians, Certified Registered Nurse Anesthetists (CRNAs), and Anesthesiologist Assistants (AAs) for medically directed anesthesia services consistent with anesthesia team practice. (Refer to the Certified Registered Nurse Anesthetist Section and/or the Anesthesiologist Assistant Section of this chapter for additional information). Medicaid recognizes medical direction of general anesthesia, regional anesthesia, and reasonable and medically necessary Monitored Anesthesia Care (MAC). Physicians cannot medically direct more than four concurrent anesthesia cases at one time and cannot perform any other services during the same period of time except as outlined below. In all cases in which medical direction is furnished, the physician must be physically present in the operating suite.

NOTE: Anesthesiologist assistants must be medically directed by a Medicaid enrolled anesthesiologist and must comply with the requirements for the delegation and supervision of services in the Michigan Public Health Code.

All of the following conditions must be met for medically directed anesthesia services to be reimbursed to the physician. For each beneficiary, the physician must:

- Perform a pre-anesthetic examination and evaluation;
- Prescribe the anesthesia plan;
- Personally participate in the most demanding procedures in the anesthesia plan including, if applicable, induction and emergence;
- Ensure that a qualified individual performs any procedures in the anesthesia plan that he does not personally perform;
- Monitor the course of anesthesia administration at frequent intervals;
- Remain physically present and available for immediate diagnosis and treatment of emergencies; and
- Provide indicated post-anesthesia care.

A medical direction service furnished by a physician is not covered if the physician directs a nonqualified individual. A qualified individual is a CRNA, a student anesthetist, an anesthesiologist assistant, or an intern or resident.

Physicians must document in the beneficiary’s medical record that he performed the pre-anesthetic exam and evaluation, provided indicated post-anesthesia care, was present during some portion of the anesthesia monitoring, and present during the most demanding procedures, including induction and emergence, where indicated. Total anesthesia time must be documented in the medical record.
If anesthesiologists are in a group practice, one physician member may provide the pre-anesthesia examination and evaluation while another physician member fulfills the other criteria. Similarly, one physician member of the group may provide post-anesthesia care while another member of the group furnishes the other component parts of the anesthesia service. The medical record must indicate the services were furnished by physicians and identify the physician(s) who rendered them.

A physician who is directing the concurrent administration of anesthesia to four or fewer surgical patients should not be involved in furnishing additional services to other patients. If the physician is addressing an emergency of short duration in the immediate area, or administering an epidural or caudal anesthetic to ease labor pain, or providing periodic rather than continuous monitoring of an obstetrical patient, it does not constitute a separate service for the purpose of determining whether the medical direction criteria are met. A physician may also receive patients entering the operating suite for subsequent surgeries, may check on or discharge patients from the recovery room, and may handle scheduling matters while directing concurrent anesthesia procedures without affecting coverage for medical direction.

If the physician leaves the immediate area of the operating suite for other than short durations, devotes extensive time to an emergency case, or is not available to respond to the immediate needs of the surgical patients, the physician's services are considered supervisory and are not covered as medical direction.

Medically directed anesthesia services are covered when provided by an anesthesiologist who is monitoring more than four concurrent anesthesia procedures, or who is performing other services while directing the concurrent procedures, in select instances. The physician must personally provide the pre-anesthesia exam and evaluation, prescribe the anesthesia plan, and be in the operating suite during the entire procedure. A flat rate payment is made to cover the physician’s involvement in pre-surgical anesthesia services.

Medically supervised CRNA services are covered and are reported with the appropriate modifier.

Medicaid covers anesthesia services consistent with Medicare guidelines when provided under an attending physician relationship in a teaching hospital and/or in accordance with the coverage guidelines established by the Medicare policies for teaching physicians.

2.2 Nonmedically Directed Anesthesia Services by the CRNA

Anesthesia services provided by a CRNA under the supervision of the surgeon or another physician who is immediately available if needed are covered as nonmedically directed anesthesia services. MDHHS reimburses CRNAs for these services if all of the following conditions are met:

- The facility in which the services are rendered ensures that the anesthesia services are provided in a well-organized manner under the supervision of a physician (MD or DO).
- The facility is responsible for all anesthesia administered in the facility.
- A physician (MD or DO) or a CRNA under the supervision of a physician provided a pre-anesthetic exam and evaluation within 48 hours prior to the surgery.
- An intra-operative anesthesia record identifies the CRNA providing the anesthesia service and the supervising physician.
• For inpatients, the person administering the anesthesia writes a post-anesthesia follow-up report within 48 hours after surgery.
• For outpatients, a post-anesthesia evaluation for proper anesthesia recovery is performed in accordance with the policies and procedures approved by the medical staff.

There is no separate coverage for physicians for any portion of nonmedically directed anesthesia services. The physician's supervisory service is covered as part of the facility charge where the surgery is performed. The pre-anesthetic exam and post-anesthesia evaluation is included in the anesthesia coverage for the nonmedically directed CRNA care and is not separately covered. Payment for the nonmedically directed anesthesia service provided by the CRNA is made to the CRNA or the legal entity employing the CRNA.

There is no separate coverage for anesthesia services performed by physicians who are also performing the medical or surgical service requiring the anesthesia. Any anesthesia service provided personally by the surgeon is included in the coverage for the surgical procedure itself.

2.3 Monitored Anesthesia Care

Monitored Anesthesia Care (MAC) is covered on the same basis as other anesthesia services as long as it is reasonable and medically necessary. MAC involves intra-operative monitoring by a physician, or by a qualified anesthesia provider under the medical direction of a physician, or by a CRNA under the supervision of a physician of the beneficiary’s vital physiological signs, in anticipation of the need for administration of general anesthesia or the development of adverse physiological patient reaction to the surgical procedure. It also includes the performance of a pre-anesthetic examination and evaluation, prescription of the anesthesia care required, administration of any necessary oral or parenteral medications (e.g., Atropine, Demerol, Valium) and provision of indicated post-operative anesthesia care.

2.4 Medical and Surgical Services Furnished in Addition to Anesthesia Services

2.4.A. Allowable Services

Separate coverage is available for certain medical or surgical services furnished by a physician while furnishing anesthesia services to the beneficiary. The services may be furnished in conjunction with the anesthesia procedure to the beneficiary or as single services (e.g., the day of or the day before the anesthesia service). These services include insertion of a Swan Ganz catheter, insertion of central venous pressure lines, emergency intubation, and critical care. Separate coverage is not available for medical or surgical services, such as the pre-anesthetic examination of the beneficiary, pre- or post-operative visits, or usual monitoring functions, that are ordinarily included in the anesthesia service.

2.4.B. Post-Operative Pain Management

Post-operative pain management is the responsibility of the surgeon (except in special circumstances) and is covered as part of the global service provided by the surgeon.

Placement of a continuous epidural to manage post-operative pain is separately covered under the appropriate CPT/HCPCS code for a continuous epidural when the physician (or CRNA under a physician’s supervision) performed the service for post-operative pain...
management and the procedure was not used as the mode of anesthesia for the surgery. Daily management of a continuous epidural on subsequent post-operative days is covered under the appropriate procedure code.

2.5 **Anesthesia Time**

Anesthesia time means the time during which the anesthesia provider (physician, CRNA, or AA providing anesthesia) is furnishing continuous anesthesia care to the beneficiary. It starts when the anesthesia provider begins to prepare the beneficiary for induction of anesthesia and ends when the beneficiary may be safely placed under post-operative supervision and the anesthesia provider is no longer in personal attendance. In counting anesthesia time when an interruption in the anesthesia service occurs, only the actual anesthesia time is counted. The anesthesia start and stop times must be documented in the medical record.

2.6 **Electro-Convulsive Therapy**

Anesthesia services related to electro-convulsive therapy are covered by the beneficiary's Prepaid Inpatient Health Plan (PIHP)/Community Mental Health Services Program (CMHSP) or Medicaid Health Plan (MHP). The attending physician must obtain authorization from the PIHP/CMHSP or the MHP. Payment is made by the PIHP/CMHSP or MHP that authorized the service.

2.7 **Prior Authorization for Anesthesia Services**

If a surgical procedure requires PA, the operating surgeon is responsible for obtaining the authorization to perform the service. The anesthesia provider is not responsible for providing proof that the surgical procedure was authorized.

2.8 **Hysterectomies and Sterilization Procedures**

By federal statute, all services, including anesthesia services related to hysterectomies or sterilization procedures, must be supported by an informed consent that meets Medicaid's consent requirements before the service can be covered. It is the responsibility of the operating surgeon to obtain this consent.

2.9 **Using Modifiers**

Anesthesia services must be coded using the appropriate CPT/HCPCS anesthesia codes with the appropriate modifiers. Anesthesia services for multiple surgeries are reported under the anesthesia procedure code with the highest base unit value with the total anesthesia time, in minutes, including all surgical procedures. (Refer to the MDHHS website for specific modifiers required for use with anesthesia services.)

2.10 **Anesthesia Add-On Codes**

Anesthesia add-on codes are covered in addition to the primary anesthesia code. Coverage for anesthesia add-on codes is based on the anesthesia base units (ABUs) established by CMS for the specific anesthesia add-on code.

**Obstetrical anesthesia add-on codes are covered based on the ABUs assigned by CMS plus the anesthesia time units associated with the anesthesia add-on code.**
2.11 LABOR AND DELIVERY

Coverage of anesthesia services associated with labor and delivery is based on the type of anesthesia provided. If anesthesia is provided by placement of an epidural catheter, it is covered under the appropriate anesthesia code depending on the type of delivery. The coverage for this service includes any needle placement, drug injection, and any replacement of the epidural catheter during labor. If endotracheal or general anesthesia is provided for the delivery, it is covered under the appropriate anesthesia code. If an epidural catheter is inserted for labor and delivery but it is later necessary to provide endotracheal anesthesia for the delivery, the surgical code for the epidural insertion is covered in addition to the anesthesia service code for the delivery. The medical record must fully document the circumstances requiring both types of anesthesia.
SECTION 3 – GENERAL PRACTICE

3.1 ALLERGY TESTING AND IMMUNOTHERAPY

Medicaid covers allergy testing and immunotherapy services. Testing is covered under the appropriate CPT/HCPCS code with the appropriate quantity as indicated by the code description. A visit is covered in addition to the testing. Coverage of the testing includes the interpretation of the test results in relation to the history and physical examination of the beneficiary.

Immunotherapy services are covered under the appropriate CPT/HCPCS component codes. The services of the provider who actually prepares and provides the antigens/venoms are covered on a per dose basis. Services of the provider who parenterally administers the antigen/venom are covered under the appropriate injection codes. The injection and the antigen/venom preparation services are covered separately.

Allergy injection services are not covered in addition to the visit unless the visit represents another significant, separately identifiable service above and beyond the antigen/venom immunotherapy and the appropriate modifier is reported.

MDHHS assumes antigens are prepared for administration over a period of time in increasing doses. Antigens are covered at the same rate per dose regardless of whether multiple or single dose vials are used. Medicaid covers the dose administered and the preparation of the dose administered.

Any allergy testing and treatments that have not been proven to be effective are not covered.

3.2 AMBULANCE SERVICES

Coverage for ambulance services is restricted to medically necessary and appropriate services when medical/surgical or psychiatric emergencies exist or no other effective or less costly mode of transportation for medical treatment can be used because of the beneficiary's medical condition.

Emergency ambulance services do not require a physician's order.

The physician must order all non-emergency, medically necessary ambulance transportation. Refer to the Ambulance Chapter for order requirements and additional information related to ambulance services.

3.3 AUDIOLOGICAL AND HEARING SERVICES

Medicaid covers hearing evaluations and other audiological function testing by a physician. Hearing evaluations are covered when they include pure-tone audiometry, speech audiometry, and a report of findings.

A hearing aid is covered if all of the following criteria are met:

- The physician performs an evaluation within six months prior to the beneficiary obtaining a hearing aid.
- The evaluation reveals that the beneficiary needs a hearing aid and that there is no contraindication to the use of a hearing aid.
The physician prescribes a hearing aid.

The beneficiary presents the prescription and a written statement of the evaluation to an enrolled hearing center.

The enrolled hearing center determines the type of hearing aid that is needed.

The beneficiary is referred to an enrolled hearing aid dealer for provision of the aid.

### 3.3.A. NEWBORN HEARING SCREENING EXAMINATION [CHANGES MADE 4/1/18]

MDHHS requires that all Medicaid-covered newborns be screened using the automated auditory brainstem response (ABR) method and/or the automated evoked otoacoustic emissions (EOAE) method.

Results must be reported to the child's primary care provider in a timely manner.

If the birthing hospital has the appropriate equipment, the screening must be done at the hospital. When this occurs, the screening is covered as a part of the inpatient stay.

If the hospital is not equipped for ABR or EOAE, the child's physician, CNM, or NP must refer the newborn to a Medicaid enrolled hearing center where screening must be completed (revised 4/1/18) prior to one month of age.

Refer to the Hearing Services subsection of the Hospital Chapter for additional information. (text added 4/1/18)

### 3.3.B. LOCAL HEALTH DEPARTMENT SCREENINGS [CHANGES MADE 4/1/18 & 7/1/18]

The primary care provider or Head Start agency (with approval from the child's primary care provider) may refer preschool-aged children to the local health department (LHD) for objective hearing screening. The results of the screening must be reported to the child's primary care provider. If the LHD is unable to report the results to the child's primary care provider, the LHD must clearly document why this was not accomplished. (text added 4/1/18) Providers are strongly encouraged to share the results with the Head Start agency if that agency was the referral source, and if the provider receives authorization. (revised 7/1/18)

MDHHS monitors the number of MHP referrals reported by LHDs, and may initiate charge-backs to the plans.

Refer to the Additional Information on Objective Hearing & Vision Screening subsection of the Local Health Department Chapter for additional information. (text added 4/1/18)

### 3.4 CARE OF ABUSED CHILDREN

Medicaid covers physician services related to the diagnosis and treatment of suspected abused or neglected children. When the physician has reasonable cause to suspect that a child may have been abused or neglected, he must immediately contact the appropriate Protective Services Unit of the local DHS office to report his suspicions.
Medicaid covers the inpatient stay of an abused or neglected child when, upon admission, the attending physician determines that the child requires further assessment and treatment which is best provided on an inpatient basis.

**Physicians cannot admit a child to the hospital for the sole purpose of custodial or protective care.**

### 3.5 Childbirth/Parenting Education

Medicaid covers childbirth/parenting education for pregnant women when referred in writing by the prenatal care provider and provided by qualified educators in a Medicare certified outpatient hospital or by a certified Maternal Infant Health Program (MIHP) program provider.

This service is not covered if rendered by the prenatal care provider in the office setting.

### 3.6 Communicable Disease Treatment

Medicaid covers the diagnosis and treatment of communicable diseases, including tuberculosis (TB), hepatitis, meningitis, and enteric disease. Cases of communicable disease must be reported to the LHD. Providers may obtain additional information regarding communicable disease prevention and control from the LHD.

### 3.7 Diabetes Patient Education

Medicaid covers diabetes self-management education for beneficiaries diagnosed with diabetes when ordered by an enrolled physician or qualified non-physician medical practitioner responsible for the beneficiary’s diabetic care. Services must be provided by diabetes educators (e.g., nurse, dietitian) in a Medicaid enrolled outpatient hospital or LHD that meets Michigan Medicaid DSME program requirements.

The physician or qualified non-physician medical practitioner treating the beneficiary’s diabetes must maintain a documented diabetes diagnosis and any special needs supported by medical necessity in the medical record.

Refer to the Hospital Chapter of this manual for information about DSME program requirements.

### 3.8 Diagnostic Tests [Change Made 7/1/18]

Medicaid covers tests to diagnose a disease or a medical condition. Diagnostic testing must be directly related to the presenting condition of the beneficiary. The ordering or referring of specific diagnostic tests may be restricted to physicians (MD or DO) by program policy. *(text added 7/1/18)*

### 3.9 Family Planning

Medicaid covers family planning services (e.g., examination, sterilization procedures, limited infertility screening, and diagnosis). A visit for family planning typically includes a complete physical examination, including a pelvic examination.
Separately identifiable services provided in addition to the examination are covered separately. Counseling for family planning services, including sterilization, is covered as a part of the family planning visit.

Medicaid covers contraceptives including:

- Oral contraceptives (must be prescribed by a physician and dispensed by an enrolled pharmacy or Family Planning Clinic)
- Diaphragms
- Intrauterine devices
- Condoms (available from a pharmacy without a prescription, or from a family planning clinic)
- Foams, gels, sponges (must be prescribed by a physician and dispensed by a pharmacy or family planning clinic)

3.10 FOOT CARE

3.10.A. ROUTINE FOOT CARE

Medicaid covers these services when provided by a physician or podiatrist and when the beneficiary manifests signs and symptoms from a specific systemic disease of sufficient severity that care by a nonprofessional would be hazardous. The medical necessity for these services must be documented in the beneficiary’s medical record, and the beneficiary must be receiving regular care from a physician for the systemic disease.

3.10.B. MYCOTIC NAILS, DEBRIDEMENT

Medicaid covers debridement of mycotic nails once in a 60-day period when provided during or following any appropriate course of medical treatment for the causative fungal infection. Documentation in the beneficiary’s medical record must support clinical evidence of the mycosis, identification of the toenail(s) affected, and evidence that the mycosis is likely to result in significant medical complications if appropriate antifungal treatment is not rendered.

The debridement of mycotic nails is covered for beneficiaries in the nursing facility only on the written order of the attending physician (MD or DO). The order must be patient-specific and not for routine care only.

3.11 FRACTURE CARE

Medicaid covers medically necessary fracture care. Coverage includes the initial traction, cast application and removal, and routine follow-up care. Additional reductions are independent procedures not included in the original treatment and are covered separately.

Fracture care includes the insertion and removal of necessary wires, pins, etc. If the wire, pins, etc., are the types that are not normally removed but the removal is medically necessary, Medicaid also covers such removal. Documentation of the need must be included on the claim.
Coverage also includes subsequent recasting required during the course of fracture treatment (i.e., following initial cast application). Medicaid covers cast removal as a separate service only when performed by a physician who was not involved in the fracture care and who is not reapplying another cast.

3.12 IMMUNIZATIONS (VACCINES AND TOXOIDS)

Immunizations are covered when given according to Advisory Committee on Immunization Practices (ACIP) recommendations. MDHHS encourages providers to immunize all Medicaid beneficiaries according to the accepted immunization schedule.

- For Medicaid children 18 years and younger, the Vaccine for Children (VFC) Program provides covered immunizations at no cost to the provider.
- Medicaid covers immunizations for beneficiaries 19 years of age or older.
- Any Local Health Department (LHD) in the state can be contacted for specifics about the VFC program, what immunizations are available, and instructions on enrolling and obtaining immunizations.

Medicaid does not pay for immunization costs for any product that is available free of charge for Medicaid beneficiaries. An administration fee is covered separately for immunizations given to Medicaid beneficiaries whether the immunization is free or not, and without regard to other services provided on the same day. The administration fee is set for each immunization.

For immunizations available free under the VFC program, the amount a provider may charge for vaccine administration may be limited. Providers cannot charge more for services provided to Medicaid beneficiaries than for services provided to their general patient population. For example, if the charge for administering a vaccine to a private-pay patient is $5.00, then the charge for immunization administration to the Medicaid patient cannot exceed $5.00.

For Medicaid beneficiaries enrolled in an MHP, the health plan must ensure that the beneficiary has access to receive complete and timely immunizations. When a provider contracts with a health plan to provide primary care (which includes immunizations), the provider should immunize the beneficiaries assigned to him by the plan. MHP providers enrolled in the VFC program are encouraged to immunize and are discouraged from referring beneficiaries to a LHD for these services.

If a beneficiary is in a nursing facility, the facility is responsible for appropriately immunizing the beneficiary. Coverage of the immunizations is included in the per diem payment made to the facility.

3.13 INJECTABLE DRUGS AND BIOLOGICAL PRODUCTS [Title Revised 7/1/18]

3.13.A. COVERAGE OF THE INJECTABLE [Change Made 7/1/18]

Medicaid covers injectable drugs and biological products administered by a physician in the office, clinic setting, and in the beneficiary’s home. The drug or biological product must be Food and Drug Administration (FDA) approved and reasonable and necessary according to accepted standards of medical practice for the diagnosis or treatment of the illness or injury of the beneficiary. There must be sufficient clinical evidence

* An immunization administered for travel to a foreign country is not a Medicaid-covered benefit.
demonstrating the effectiveness and safety of the drug or biological product. (revised per bulletin MSA 18-02)

An injectable drug is covered if the drug is:

- Specific and effective treatment for the condition for which it is being given.
- Given for the treatment of a particular documented diagnosis, illness, or condition (e.g., vitamin injections which are not specific replacement therapy for a documented deficiency or disease and are given simply for the general good and welfare of the patient).
- Administered by the recommended or accepted administration method for the condition being treated.
- Administered according to the recommended dosing schedule and amount for the condition being treated.

For any injectable drug that a practitioner purchases directly through a pharmacy, distributor or wholesaler which is administered in the office, clinic setting, or the beneficiary’s home, the injectable drug is considered a physician service rather than a pharmacy benefit. The physician must not send the beneficiary to a pharmacy to obtain an injectable drug. (revised per bulletin MSA 18-02) If a pharmacy sells injectable drug products to a physician, the pharmacy must obtain payment directly from the purchasing physician.

MDHHS allows a select list of physician-administered drugs to be covered through the pharmacy benefit as identified in the Special Product Coverage section of the Pharmacy Chapter. If the practitioner uses a pharmacy to acquire the drug for administration, the pharmacy must submit the claim as a pharmacy claim. (Refer to the Special Product Coverage section of the Pharmacy chapter for additional information.) (added per bulletin MSA 18-02)

If the beneficiary has other insurance that allows the injectable drug product to be obtained at the pharmacy by the beneficiary, then the other insurance rules (e.g., Medicare Part D) must be followed; however, the reimbursement of the beneficiary’s liability (i.e., coinsurance/deductible/ copay) may be covered as a physician service.

When administering a dose drawn from a multidose vial, only the amount administered to the beneficiary is covered. If a drug is only available in a single use vial and any drug not administered must be discarded, the amount of the drug contained in the vial is covered.

3.13.B. PHYSICIAN-ADMINISTERED DRUGS AND BIOLOGICAL PRODUCTS NOT COVERED BY MEDICAID HEALTH PLANS [SUBSECTION ADDED 7/1/18]

MDHHS will maintain a list of specific Medicaid program covered physician-administered drugs and biological products that are not covered by MHPs. This list of physician-administered drugs and biological products, carved out from MHP coverage, will be reimbursed as a Fee-for-Service (FFS) benefit for all beneficiaries in FFS and for those enrolled in an MHP.
A list of the specific drugs covered under this policy will be maintained on the MDHHS website. The list may be modified as new drugs are approved or added to the physician-administered carve-out. No notice of changes to the list will be issued directly to providers. (Refer to the Directory Appendix for website information.)

3.13.B.1. PRIOR AUTHORIZATION REQUIREMENTS FOR CARVE-OUT INJECTABLE DRUGS AND BIOLOGICAL PRODUCTS [SUBSECTION ADDED 7/1/18]

Certain drugs on the carve-out list of physician-administered drugs and biological products not covered by MHPs may require prior authorization (PA). The purpose of PA is to review the medical need for certain services. It does not serve as an authorization of fees or beneficiary eligibility.

When indicated on the MDHHS-maintained list, PA requests will require a completed Practitioner Special Services Prior Approval-Request/Authorization form (MSA-6544-B), a Program Review Division (PRD) documentation checklist, and all supporting documentation. Providers are to contact the PRD to obtain the PRD documentation checklist for drugs and biological products that require PA. Once all required documentation is collated, information must be submitted according to form MSA-6544-B completion and submission instructions. (Refer to the Forms Appendix for a copy of the form and completion instructions and to the Directory Appendix for PRD contact information.)

3.13.B.2. BILLING CONSIDERATIONS FOR CARVE-OUT INJECTABLE DRUGS AND BIOLOGICAL PRODUCTS FOR MEDICAID HEALTH PLAN ENROLLEES [SUBSECTION ADDED 7/1/18]

When multiple medical services are provided in conjunction with a carve-out physician-administered drug, FFS claims will process for payment of the carve-out drug service line only; all other claim lines will be denied with Claim Adjustment Reason Code (CARC) 24 - Charges are covered under a capitation agreement/managed care plan. The associated services that are denied by FFS are to be billed to the beneficiary's health plan for payment.

3.13.C. ADMINISTRATION OF THE INJECTABLE [RE-NUMBERED 7/1/18]

Medicaid covers the injectable drug and the administration of the drug. If another covered service is provided at the same time, the administration of the drug is considered a part of that service and is not covered separately.

Payment for administration of injectables provided through a PIHP/CMHSP clinic or affiliated physician practice is included in the capitation rate to the PIHP/CMHSP and is not separately reimbursable to the physician.

Injections in the office/clinic/beneficiary's home may be administered by appropriate non-physician staff who are employed by the physician or are employed by the same clinic/group as the physician. Administration of the injectable drug by non-physician staff must be under the physician's personal supervision or under the delegation and
supervision of the physician as required by the Public Health Code. Providers should refer to the Coordination of Benefits Chapter of this manual for additional requirements that apply when a beneficiary has Medicare or commercial insurance coverage. For a list of the drugs administered under this policy, refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information. Physician-administered drugs and biologicals are included on the Practitioner and Medical Clinic Fee Schedule. (Refer to the Directory Appendix for website information.)

3.13.D. INJECTABLES ADMINISTERED THROUGH PIHP/CMHSP FOR MHP ENROLLEES [RE-NUMBERED 7/1/18]

Specific injectable drugs administered by a physician or non-physician practitioner (e.g., physician assistant and nurse practitioner) through a PIHP/CMHSP clinic to Medicaid Health Plan (MHP) enrollees are reimbursable by MDHHS on a fee-for-service basis when the following criteria are met:

- The beneficiary has an open case with the PIHP/CMHSP;
- The beneficiary receives the injections on a scheduled or routine basis as part of the PIHP/CMHSP treatment/supports regimen; and
- The PIHP/CMHSP clinic notifies the beneficiary’s MHP or primary care physician that this service is being rendered.

A list of the specific drugs covered under this policy is maintained on the MDHHS website. (Refer to the Directory Appendix for website information.) The list may be modified as new drugs are approved for Medicaid coverage. No notice of changes to the list will be issued directly to providers. Drugs on this list may be billed using the provider’s NPI number(s) associated with the PIHP/CMHSP.

3.13.E. PSYCHOTROPIC INJECTABLES ADMINISTERED BY PHYSICIANS NOT ASSOCIATED WITH A PIHP/CMHSP [RE-NUMBERED 7/1/18]

Physicians not associated with a PIHP/CMHSP who are administering psychotropic injectable carve-out drugs in an outpatient setting to MHP enrollees must comply with the following criteria:

- Physicians administering psychotropic injectable carve-out drugs must notify the beneficiary’s MHP or primary care physician that this service is being rendered.
- Injectable carve-out drugs covered by MDHHS through FFS must be billed through CHAMPS using the physician's NPI.
- FFS reimbursement by MDHHS to physicians not associated with a PIHP/CMHSP is limited to psychotropic injectable carve-out drugs only. Physicians may not bill MDHHS for additional services rendered during the visit, including any injectable administration cost. Physicians should bill the MHP for any additional services, if necessary, after obtaining MHP prior authorization as per the "Out-of-Network Services" policy located in the Medicaid Health Plan chapter.
3.14 LABORATORY [CHANGES MADE 7/1/18]

The program covers medically necessary laboratory services, including the specimen collection, analysis, and report, to diagnose or treat a specific condition, illness, or injury and laboratory tests associated with preventive services assigned a grade A or B by the United States Preventive Services Task Force (USPSTF). A physician, podiatrist, physician assistant, nurse practitioner, clinical nurse specialist, dentist, or CNM must order laboratory services according to their scope of practice.

The ordering practitioner must document required laboratory testing in the beneficiary's medical chart regardless of where the tests are performed. The ordering practitioner is held responsible for the ordering of excessive or unnecessary laboratory tests regardless of who actually renders the services. (text deleted 7/1/18)

MDHHS performs pre- and/ or post-payment reviews to monitor laboratory procedures for medical necessity and appropriate practitioner orders. Questionable ordering patterns may result in a prepayment review of each laboratory procedure billed or other corrective measures, including recovery of funds. A beneficiary cannot be charged for any covered laboratory procedure, including those that are determined to be not medically necessary. (revised 7/1/18)

3.14.A. MEDICAL NECESSITY [CHANGE MADE 7/1/18]

The documentation of medical necessity must include a description of the beneficiary's symptomatology and other findings that have led the practitioner (revised 7/1/18) to order the test(s). An explanation of the laboratory testing method or the results of diagnostic tests, whether normal or abnormal, is not considered documentation of medical necessity.

3.14.B. REFERRED SERVICES [CHANGES MADE 7/1/18]

If a practitioner refers a beneficiary to an outside laboratory (independent lab, hospital lab, clinic lab, or physician office lab) for testing, the practitioner must indicate his NPI number on the referral. (revised 7/1/18)

A physician cannot refer a beneficiary to an outside laboratory where he or an immediate family member has a financial relationship. Noncompliance may result in corrective action by MDHHS or other agencies. (text deleted 7/1/18)

A beneficiary cannot be charged for any covered laboratory procedure, including those that are determined to be not medically necessary.

3.14.C. NON-COVERED SERVICES [SUBSECTION ADDED 7/1/18]

Ordering or rendering of “profiles”, “batteries” or “panels” of tests that include tests not necessary for the diagnosis or treatment of the beneficiary's specific condition is considered random screening and is not covered. Multiple laboratory tests carried out as
a part of the initial evaluation of the beneficiary, when the results of the history and physical examination do not suggest the need for the tests, are considered screening and are not covered. The collection of the lab specimen(s), analysis, and test results are included in the reimbursement for laboratory services and are not covered separately unless otherwise indicated.

Refer to the Laboratory chapter for additional information regarding coverage parameters, ordering limitations, and prior authorization requirements. (text added 7/1/18)

3.14.D. CHILDREN’S SPECIAL HEALTH CARE SERVICES COVERAGE [RENUMBERED 7/1/18]

The coverages defined in this section and the daily reimbursement limits do not apply to beneficiaries with only Children’s Special Health Care Services (CSHCS) eligibility. The coverage limits do apply to beneficiaries with dual Medicaid and CSHCS eligibility if the laboratory procedures are not related to the crippling diagnosis.

| Blood Handling | MDHHS reimburses for blood handling only under the following circumstances:  
|                | • A beneficiary may be referred to a laboratory, clinic, or outpatient hospital for the sole purpose of drawing, packaging, and mailing a blood sample to MDHHS for blood lead analysis. In this instance, the laboratory, clinic, or outpatient hospital may bill for blood handling. The MDHHS provides lead-free vacutainers for the analysis. Requests for vacutainers and the samples for analysis should be sent to MDHHS Blood Lead Laboratory. (Refer to the Directory Appendix for contact information.)  
|                | • A beneficiary occasionally requires blood tests that are not performed in conjunction with other reimbursable services. Whenever possible, the beneficiary should be sent to the laboratory that will be performing the test(s). If this is not practical (i.e., the laboratory is not a local facility) and the sole purpose of a visit is to draw, package, and mail the sample to a laboratory, the blood handling may be covered. An office visit or other service code is not covered on the same date of service (DOS) as the blood handling service. |
| Hematology Studies | A practitioner’s order for a complete blood count (CBC) with white blood cell (WBC) differential includes the RBC and WBC count, Hgb, Hct, MCH, MCHC, MCV, RBC morphology, platelet estimate, and WBC differential only. Additional hematology testing must have specific practitioner orders. The ordering practitioner is responsible for documenting medical necessity and recording the order in the beneficiary’s medical record. |
| Microbiology Studies | Gram, fluorescent/acid fast stain procedures are included in the coverage for microbiology procedures when performed on the same DOS for the same beneficiary. |
| Pap Smear | Coverage for obtaining the cervical smear is included as a part of the pelvic examination. A pathologist must perform interpretation of the smear. The pathology report must include the printed or typewritten name of the pathologist and his handwritten signature.  
More than one Papanicolaou test within a 12-month period is covered only when determined medically necessary by the attending practitioner. |
### Pathology Consultations

Pathology consultations performed by a hematologist/pathologist for the review of abnormal laboratory test results are covered by Medicaid if:

- The abnormality relates to the beneficiary's medical condition and corresponding medical care (i.e., a peripheral blood smear review must be necessary for the specific beneficiary's care).
- The referring physician orders the review and records the order in the beneficiary's medical record. (Standing consultation orders from a physician to a laboratory are not covered by Medicaid.)
- A detailed report is sent to the referring physician.

The report prepared from the study performed by the hematologist/pathologist must include:

- Identification of the laboratory where the review was performed.
- Name of the referring physician.
- Beneficiary's name.
- Date of review.
- Identification of material examined.
- Comments and descriptions of normal and abnormal findings.
- Descriptions detailed enough to support a clinical impression or diagnosis.
- Clinical impression or diagnosis presented in relation to the suspected disease, disease process, or state of altered physiology.
- Recommendations for investigation or therapy, if any.
- The typewritten or printed hematologist/pathologist's name and his handwritten signature.

This information must be retained in the beneficiary's medical records.

### Pregnancy Related Lab Services

For routine pregnancy testing, Medicaid covers the serum or urine HCG qualitative method.

The obstetric profile is covered when ordered by the attending practitioner as an all-inclusive panel of tests for required prenatal laboratory services. The individual tests of the OB Profile are:

- ABO typing
- CBC with WBC differential
- Hepatitis B surface antigen
- RBC antibody detection
- Rh (D) typing
- Rubella antibody
- Syphilis testing

HIV testing and Urinalysis are covered separately when determined to be medically necessary and are ordered by the practitioner.
Clinics and office-based laboratories must be registered as required by the Clinical Laboratory Improvement Amendments (CLIA). Medicaid only covers the procedures contained in the CLIA Certificate of Waiver Testing list for Certificate of Waiver practitioners. Coverage includes only the procedures contained in the CLIA Certificate of Registration Testing list for Certificate of Registration practitioners. Medicaid covers the procedures identified in the CLIA Physician Performed Microscopy list for appropriately certified physicians. Laboratory tests covered for CNMs and podiatrists who have the appropriate CLIA certification are identified in the Medicaid Code and Rate Reference tool. (Refer to the Directory Appendix for website information.)

### 3.15 NERVE BLOCKS

Nerve blocks are covered as a surgical procedure when performed for diagnostic or therapeutic purposes. As a surgical procedure, a complete description of the services rendered must be documented in the beneficiary’s medical record. When used as anesthesia for another procedure, the anesthesia guidelines apply. Nerve blocks are not separately covered when used as a local anesthetic for another surgical procedure.

A nerve block is the injecting of a local anesthetic or neurolytic agent around a nerve to produce a block of that specific nerve. It is not injecting a painful area under the skin or a trigger point, or an injection into the general muscle mass of subcutaneous tissue that does not follow the anatomy of a specific nerve, to produce temporary relief of pain in that area.

Nerve blocks are payable in the hospital or office setting as appropriate. No more than three nerve blocks to the same area are covered within a six-month period without documentation of medical necessity. Documentation must include the diagnosis or condition, the management/treatment plan, specific nerve(s) affected, indications, and expected benefits. A medical visit is not covered separately on the same day unless documentation is supplied to justify the separate services.

### 3.16 OXYGEN

Medicaid covers oxygen and the equipment necessary for the administration of oxygen therapy.

A pharmacy or a medical supplier may provide gaseous cylinder oxygen. Portable cylinder oxygen is allowable if the cylinder can be refilled and if the flow rate is adjustable.

Only a medical supplier may provide concentrators, liquid oxygen, and oxygen tents, and PA is required.

All oxygen and equipment requires a physician's prescription and a CMN. The initial prescription is valid for six months. The first follow-up prescription is valid for six months, and each subsequent prescription is valid for one year.

The written prescription for oxygen must include all of the following:

- The date the oxygen was prescribed;
- The beneficiary's diagnosis(es);
- The flow rate (liters per minute);
- The number of hours to be used per day;
 Duration of need;
 Delivery system to be used; and
 PO2 level or oxygen saturation.

(Refer to the Medical Supplier Chapter of this manual for additional information and specific PA requirements.)

3.17 SUBSTITUTE AND LOCUM TENENS PHYSICIANS

Medicaid covers substitute physicians or locum tenens physicians and allows payment to be made to the beneficiary’s attending physician for these services. Federal statutes and CMS requirements determine parameters for these arrangements.

Medicaid coverage under the beneficiary’s attending physician for the services of a substitute physician can only occur under the following substitute physician billing arrangements:

 An informal reciprocal arrangement for a period not to exceed 14 days; or
 A locum tenens or temporary arrangement for 90 continuous days in the case of a per diem or other fee-for-time compensation.

Coverage for services provided by a substitute physician under either a reciprocal billing or a locum tenens arrangement must follow Medicaid policy for the service(s) rendered. Documentation in the beneficiary’s medical record must identify the physician actually providing the service.

3.18 SUPPLIES IN THE OFFICE SETTING [CHANGES MADE 4/1/18]

RVU-based payment to practitioners includes payment for the office overhead expense associated with the service. In most cases, the overhead includes the supplies used or provided by the practitioner in connection with the service, and the supplies are not separately reimbursed. (text added 4/1/18).

Providers must not require beneficiaries to purchase an item in advance from a pharmacy or medical supplier that is an integral component of the service. Surgical dressings applied by a physician in the office or other nonfacility setting are not covered separately. (revised 4/1/18)

Medicaid does not cover take-home supplies dispensed from the office setting. If a beneficiary requires in-home supplies, a written prescription must be presented to the pharmacy or medical supplier and supplies dispensed accordingly. (text added 4/1/18)

In keeping with the RVU-based fee schedule, Medicaid separately covers a limited number of supplies used in the office setting (such as intrauterine devices and casting supplies) because an allowance for these supplies is not typically included in the respective treatment procedure codes. Casting and splinting supplies are covered separately when used with the fracture and dislocation or casting, splinting or strapping procedure codes listed in the musculoskeletal surgery section of the CPT coding manual. (revised 4/1/18)
3.19 VISION SERVICES

Refer to the Vision chapter of this manual for specific coverage information.

3.20 ORTHOPTIC SERVICES

Strabismus surgeries are covered for beneficiaries of any age and do not require PA. Providers are reminded that these surgeries must be medically necessary and not performed solely for cosmetic purposes.

Refer to the Vision chapter of this manual for other specific orthoptic coverages.

3.21 WEIGHT REDUCTION

Medicaid covers treatment of obesity when done for the purpose of controlling life-endangering complications, such as hypertension and diabetes. If conservative measures to control weight and manage the complications have failed, other weight reduction efforts may be approved. The physician must obtain PA for this service. Medicaid does not cover treatment specifically for obesity or weight reduction and maintenance alone.

The request for PA must include the medical history, past and current treatment and results, complications encountered, all weight control methods that have been tried and have failed, and expected benefits or prognosis for the method being requested. If surgical intervention is desired, a psychiatric evaluation of the beneficiary's willingness/ability to alter his lifestyle following surgical intervention must be included.

If the request is approved, the physician receives an authorization letter for the service. A copy of the letter must be supplied to any other provider, such as a hospital, that is involved in providing care to the beneficiary.

3.22 TUBERCULOSIS TESTING

Medicaid covers TB testing according to the guidelines established by the AAP and USPSTF which are based on risk. A risk assessment may be completed at each visit. Coverage for the TB test includes any return visit to read the results of the TB test.

For assistance in determining high risk, providers may contact the MDHHS Division of Communicable Diseases, the AAP, or the USPSTF. (Refer to the Directory Appendix for contact information.)
SECTION 4 – GENERAL PRACTICE - SPECIAL CONSIDERATIONS

4.1 APERESIS, THERAPEUTIC

Therapeutic apheresis is covered for the following indications:

- Plasma exchange for acquired myasthenia gravis;
- Leukapheresis in the treatment of leukemia;
- Plasmapheresis in the treatment of primary macro-globulinemia (Waldenstrom);
- Treatment of hyperglobulinemia, including (but not limited to) multiple myelomas, cryoglobulinemia and hyperviscosity syndromes;
- Plasmapheresis or plasma exchange in the last resort treatment of thrombotic thrombocytopenic purpura (TTP);
- Plasmapheresis or plasma exchange in the last resort treatment of life-threatening rheumatoid vasculitis;
- Plasma perfusion of charcoal filters for treatment of pruritis of cholestatic liver disease;
- Plasma exchange in the treatment of life-threatening forms of Goodpasture's Syndrome;
- Plasma exchange in the treatment of glomerulonephritis associated with antilglomerular basement membrane antibodies and advancing renal failure or pulmonary hemorrhage;
- Treatment of chronic relapsing polyneuropathy for beneficiaries with severe or life-threatening symptoms who have failed to respond to conventional therapy;
- Treatment of life-threatening scleroderma and polymyositis when the beneficiary is unresponsive to conventional therapy;
- Treatment of Guillain-Barre Syndrome; and
- Treatment of life-threatening Systemic Lupus Erythematosus (SLE) when conventional therapy has failed to prevent clinical deterioration

Coverage is limited to the following settings:

- In a hospital setting (either inpatient or outpatient). Nonphysician services furnished to hospital patients are covered as hospital services. When covered services are provided to hospital patients by an outside provider/supplier, the hospital is responsible for paying the provider/supplier for the services.
- In a nonhospital setting, such as a physician directed clinic, when all of the following conditions are met:
  - A physician is present to perform medical services and to respond to medical emergencies at all times during patient care hours.
Each patient is under the care of a physician.

All nonphysician services are furnished under the personal supervision of a physician.

When the physician provides direct supervision of the procedure or personally performs any services, professional services are covered as therapeutic apheresis (plasma and/or cell exchange).

4.2 CHEMOTHERAPY ADMINISTRATION

Medicaid covers the services of a physician who administers antineoplastic chemotherapy to beneficiaries with a cancer diagnosis in the office setting and in the beneficiary's home. The chemotherapy drugs administered by the physician are covered separately.

Administration of other drugs for diagnoses other than cancer is covered under therapeutic, diagnostic, or prophylactic injection/infusion services.

Chemotherapy administration by push and by infusion techniques is covered on the same day; however, only one push administration is covered on a single day.

Physicians must personally administer the drug or be present when a qualified employee of the physician administers the drug. If chemotherapy is administered without face-to-face contact between the physician and the beneficiary, the services are covered if furnished in the physician's office by a qualified employee under the physician's supervision and the medical record reflects the physician's active participation in and management of the course of treatment.

In the hospital setting, chemotherapy administration is only covered when the physician personally administers the drug.

Refilling and maintenance of an implantable pump or reservoir is covered. Chemotherapy administration by IV push, infusion, or intra-arterial technique is not covered in addition to refilling the implantable pump or reservoir. Flushing of a vascular port prior to chemotherapy is included in the administration and is not covered separately. If a special visit is made to the physician's office only for port flushing, the service is covered under the appropriate E/M code.

Hydration therapy intravenous (IV) infusion is covered as a part of the chemotherapy IV infusion service when administered simultaneously. Hydration therapy is covered separately when administered sequentially or as separate procedures. The distinct procedural service modifier should be reported with the hydration therapy code when performed sequentially.

Supplies necessary to administer chemotherapy in the office setting are included in the overhead expense portion of the administration services and are not covered separately. (Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters for chemotherapy drugs.)

4.3 HEMODIALYSIS AND PERITONEAL DIALYSIS

Medicaid covers physician services required to manage care of beneficiaries with end-stage renal disease (ESRD) who are receiving ongoing dialysis in an outpatient facility or at home.
Most physician services are covered through a monthly capitation payment (MCP) to the managing physician. The MCP covers ESRD related physician services in all settings necessary to manage the beneficiary’s dialysis care, except declotting of shunts, dialysis training, and nonrenal-related medical services.

Self-dialysis training services provided by the physician are covered.

4.4 HOME HEALTH CARE

Medicaid covers home health care subject to the requirements in this section.

Home Health services include intermittent nursing care, home health aide services, and physical therapy provided in the beneficiary's home by a Medicaid enrolled Home Health Agency (HHA). The service must be reasonable and necessary for the treatment of a specific illness, injury, or disability, and must be consistent with the nature and severity of the beneficiary's condition, particular medical need and accepted standards of medical practice. Limited services to ensure stability of beneficiaries with an established disability or frail condition, or to prevent an illness, injury or disability for women and newborns during the postpartum period are covered.

Home health is intended for beneficiaries whose conditions require intermittent rather than continuous medical/nursing care. In special instances, intensive nursing care in the home may be approved if MDHHS determines that home care is appropriate and is a cost-effective alternative to institutional care.

4.4.A. PHYSICIAN ORDER FOR CARE

The beneficiary's physician must order covered home health services as part of a written plan of care (POC), and must review the POC every 60 days for continuing need. A HHA should not provide home care prior to the date of the physician's order for the care. The agency must maintain a patient plan of treatment form which must be signed and dated by the physician, or a narrative summary of the POC which must have the physician's signed and dated order attached. The HHA is responsible for obtaining necessary authorization from MDHHS for special or extended care which may be provided.

For initial certification, a physician certifying eligibility for home health services must provide documentation of a face-to-face encounter with the beneficiary within 90 days prior to or 30 days after the start of care. Refer to the Face-to-Face Encounter section in the Home Health Chapter for additional information.

Home health services are not to replace the services of a physician and are not covered solely for the lack of transportation or as a convenience to the beneficiary. Home health services may be appropriate when leaving the home is medically contraindicated or special transportation or effort is required.

4.4.B. MEDICAL SUPPLIES AND EQUIPMENT

Medical supplies, durable medical equipment, orthotic and prosthetic appliances, shoe supplies, and oxygen are covered for beneficiaries receiving services from an enrolled HHA. The physician (MD, DO, DPM, NP, PA) must prescribe these items. (Refer to the Home Health and the Medical Supplier Chapters of this manual for specific information...
concerning which equipment/supplies are covered for the medical supplier and which are covered for the HHA.)

4.4.C. PERSONAL CARE

If beneficiaries are not in need of nursing care or physical therapy, but have a need for nonspecialized, unskilled personal care or chore services, such services are available through the MDHHS Home Help Program. The local MDHHS office should be contacted for information.

4.5 HOSPICE SERVICES [CHANGE MADE 7/1/18]

Medicaid covers hospice services which include palliative and supportive services to meet physical, psychological, social, and spiritual needs of terminally ill beneficiaries and their families in the home, adult foster care facility, home for the aged, nursing facility, or an inpatient hospice setting. Medicaid enrolled Hospice programs are responsible for providing all physician services related to a beneficiary’s terminal illness as part of its core services. (text added 7/1/18)

To enroll in hospice, the beneficiary must have a life expectancy of six months or less, have knowledge of the illness and life expectancy, and elect to receive hospice services rather than active treatment for the illness. Both the referring physician and the hospice medical director must certify the life expectancy. (text deleted 7/1/18)

If the physician is not familiar with Medicaid-enrolled hospices in his area, hospice names, addresses, and telephone numbers may be obtained from MDHHS Provider Inquiry. (Refer to the Directory Appendix for contact information.)

Refer to the Billing & Reimbursement for Institutional Providers and the Hospice chapters of this manual for specific requirements related to the provision of hospice services. (text added 7/1/18)

4.6 IMPLANTABLE INFUSION PUMPS

Medicaid covers the refill and reprogramming of implantable infusion pumps by physicians in the physician’s office. The refill kit and the electronic analysis of the pump are covered as a part of the refill and reprogramming procedure. Injectable drugs used during this procedure are covered separately in the physician’s office.

4.7 PEDIATRIC MULTICHANNEL RECORDINGS

Multichannel recording is covered for a child under age 21 when provided in the inpatient or outpatient hospital setting by qualified personnel and interpreted by a physician. Multichannel recordings are not covered in the beneficiary’s home.

A pediatric multichannel recording is a continuous and simultaneous recording of at least four channels that may include ECG, thoracic impedance, airflow measurements, oxygen saturation, esophageal pH, or strain gauge measurements. Other additional recording parameters may be included. A multichannel recording does not have to include an electroencephalogram (EEG). When an EEG is performed in addition to the four or more channels, it is covered separately. Payment for the multichannel recording is the same regardless of the number of channels or the length of time required. Use of a video camera is not separately covered.
Two multichannel recordings may be covered in one year for the same beneficiary. If more than two are medically justified for CSHCS beneficiaries, the physician must obtain PA from CSHCS. A copy of the PA approval letter must be attached to the claim form to be reimbursed. Physicians are responsible for providing a copy of the PA approval letter to the hospital.

A multichannel recording is covered as a professional service to the physician and as a technical service to the hospital. The professional service includes the interpretation with written report, and the scanning and scoring.

4.8 PREVENTIVE SERVICES

The program covers preventive services assigned a grade A or B by the USPSTF and all adult vaccines and their administration recommended by ACIP for beneficiaries age 21 years and older. (Refer to the Directory Appendix for USPSTF and ACIP website information.)

Preventive services for beneficiaries under 21 years of age are covered as part of the Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) benefit. (Refer to the Early and Periodic Screening, Diagnosis, and Treatment Chapter for specific information.)

Providers submitting claims for services in accordance with the USPSTF grade A and B recommendations are to identify the service with the appropriate International Classification of Diseases (ICD) diagnosis code(s). To identify the service as a preventive service, providers are encouraged to include HCPCS Modifier 33, Preventive Services. (Refer to the Billing & Reimbursement for Professionals Chapter for specific information.)
SECTION 5 – EVALUATION AND MANAGEMENT SERVICES

Medicaid covers medically necessary evaluation and management (E/M) services provided by a physician or other practitioner authorized by the State. Providers should refer to the CPT explanations, coding conventions, and definitions for E/M services.

Most E/M services are covered once per day for the same beneficiary. In these cases, only one office or outpatient visit is covered on a single day for the same beneficiary unless the visits were for unrelated reasons and at different times of the day (e.g., office visit for blood pressure medication evaluation, followed five hours later by a visit for evaluation of leg pain following an accident).

Coverage of an E/M service includes related activities such as coordination of care, telephone calls, writing prescriptions, completing insurance forms, review and explanation of diagnostic test reports to the beneficiary.

Do not report the modifier for increased procedural services with E/M services in order to request individual consideration, unless specifically directed by this manual. This does not follow CPT coding guidelines and causes longer delays in processing the claims for payment.

5.1 PREVENTIVE MEDICINE SERVICES

The program covers one preventive visit annually. For beneficiaries under 21 years of age, EPSDT screening services are covered according to the AAP periodicity schedule and CMS requirements. (Refer to the Early and Periodic Screening, Diagnosis, and Treatment Chapter for specific information.)

A preventive medicine E/M visit and another E/M visit on the same date are covered separately if, during the preventive visit, a problem or abnormality is detected which requires additional work which meets the key component requirements of a problem oriented E/M visit. When this occurs, the office/outpatient E/M procedure code is covered using the modifier for a separately identifiable service, and the preventive E/M visit is covered without using a modifier. (Refer to CPT guidelines for additional information.)

5.2 E/M VISITS IN RELATION TO GLOBAL SURGERY PACKAGE

An E/M service that results in the decision for surgery is covered separately when provided by the surgeon on the day before or the day of a procedure with a 90-day global period and the decision for surgery modifier is reported. This same E/M service provided the day before or the day of a procedure with a 0-day or 10-day global period is not covered separately.

An E/M service is not covered separately on the same day as a procedure with any global surgery period unless the beneficiary's condition requires a significant, separately identifiable E/M service that is above and beyond the pre- and post-operative care associated with the procedure or service performed.

If the surgeon performs E/M services during the post-operative global surgery period for a reason unrelated to the surgical procedure, report the appropriate modifier with the E/M service. All care provided during the inpatient stay in which the surgery is performed is compensated through the global surgery package and is not covered separately.
5.3 Consultations

Medicaid covers consultations rendered by a physician whose opinion or advice is requested by another appropriate practitioner (e.g., physician, CNM, dentist) for the further evaluation and management of the patient. A consultation includes preparation of a report of findings that is provided to the referring provider for the referring provider’s use in the treatment of the beneficiary. A consultant may initiate diagnostic and/or therapeutic services. If the referring provider transfers complete responsibility for treatment either orally or in writing to the consultant at the time of the request for consultation, the receiving physician’s services are covered as normal E/M services rather than as a consultation.

If the referring provider transfers responsibility for the beneficiary's care to the consultant after the consultation is completed, the consultant's service is covered as a consultation. After the consulting physician assumes responsibility for the beneficiary's care, subsequent visits are covered as established patient office visits or subsequent hospital care, depending on the setting.

A consultation is covered if one provider in a group practice requests a consultation from a physician of a different specialty in the same group practice as long as all of the requirements for use of the CPT/HCPCS consultation codes are met. A request for a consultation from the attending provider and the need for consultation must be documented in the beneficiary's medical record. In an inpatient setting, the request may be documented as part of a plan written in the requesting physician's progress notes, an order in the hospital record, or a specific written request for the consultation.

Medicaid covers second opinions for surgery. The second opinion is covered as a consultation as long as all requirements for a consultation are met.

Ancillary services provided to a beneficiary in a nursing facility must be ordered by the attending physician and are not covered as consultations unless a specific request for opinion and advice is documented. Requests for services by another physician are covered as the actual service provided (e.g., nursing facility visit or eye examination).

5.4 Initial Visits

Medicaid covers one new patient visit for a physician or a group practice for the same beneficiary, regardless of the type of new patient visit billed (e.g., office visit, clinic visit, long term care visit, home visit).

5.5 Observation Care

Medicaid covers physician services for beneficiaries admitted and discharged from observation status in the hospital setting for a stay less than 24 hours. Coverage is based on CPT coding conventions to report observation stays occurring on a single date and observation stays which start on one date and end on the subsequent date. It is expected that the beneficiary would be discharged from the hospital at the end of observation care. The medical record must include the following documentation:

- the length of time of the observation stay
- the physician was present and personally performed the services
- the physician wrote the observation admission and/or discharge notes
For outpatient surgical procedures, the global surgery rules apply. The surgeon is responsible for all post-operative care in the hospital and observation care is not covered separately.

Observation care for psychiatric reasons must be authorized by the PIHP/CMHSP. The PIHP/CMHSP is responsible for coverage of authorized psychiatric observation care services.

5.6 NURSING FACILITY SERVICES

Visits necessary to perform Medicare and Medicaid required assessments are covered under the appropriate E/M services involving comprehensive resident assessments.

Visits required to monitor and evaluate residents at the frequencies detailed in the coverage portion of the Nursing Facility chapter of this manual are also covered under the appropriate E/M service for subsequent nursing facility care.

Additional visits for the diagnosis or treatment of illness or injury, or to improve the functioning of a malformed body member, are only covered when documentation of the medical necessity for the visit is included on, or attached to, the claim. Documentation must include diagnoses describing the acute illness or injury; or remarks documenting the necessity for the additional visit recorded on the claim; or documentation such as notes from the visit supporting the above criteria attached to the claim. Providers may report modifier 22. Additional visits which repeatedly reflect the same chronic diagnoses and additional visits for the purpose of routine monitoring are not covered.

Refer to the Coverages portion of the Nursing Facility chapter of this manual for timeframes and additional details for required nursing facility visits.
SECTION 6 – EMERGENCY SERVICES

Medicaid covers all medically necessary emergency services. Federal statutes prohibit prior authorization (PA) for coverage of emergency services. Emergency services include covered inpatient and outpatient services that are furnished by a provider that is qualified to furnish such services and the services are necessary to evaluate or stabilize an emergency medical condition. All professional services must be identified as either an emergency or not an emergency.

6.1 SCREENING EXAM AND STABILIZATION IN THE EMERGENCY DEPARTMENT

MDHHS and its contracted health plans must follow the applicable requirements and definitions of the federal Emergency Medical Treatment and Active Labor Act (EMTALA).

Medicaid covers the medical screening examination, any ancillary service(s) when performed in a hospital emergency department (ED) for the sole purpose of determining if an emergency medical condition exists, and any necessary stabilizing treatment.

For both Medicaid FFS and MHP beneficiaries, the screening examination and any physician-ordered procedures (e.g., x-rays, lab, etc.) necessary to determine the beneficiary's condition are covered without PA. For Medicaid FFS beneficiaries, the screening examination and related diagnostic procedures are covered by MDHHS. For Medicaid MHP beneficiaries, these services are covered by the beneficiary's MHP.

Professional services for the medical screening and stabilization in the ED are covered separately from the facility fees.

6.2 TREATMENT OF EMERGENCY MEDICAL CONDITION IN THE EMERGENCY DEPARTMENT

PA is not required for the treatment of emergency medical conditions.

An emergency medical condition is defined by the Balanced Budget Act of 1997 and its regulations.

An emergency medical condition may exist whether the beneficiary is discharged from the ED or admitted to the inpatient hospital. This includes admissions where death occurs before a bed is occupied.

If an emergency medical condition exists, the medical findings must be fully documented in the beneficiary's medical record.

6.3 NON-EMERGENCY MEDICAL CONDITIONS IN THE EMERGENCY DEPARTMENT

If the medical findings from the screening indicate the beneficiary's condition does not meet the definition of an emergency medical condition, but requires additional, follow-up treatment, the following rules apply:

- FFS Medicaid beneficiaries without private health insurance should be referred to their primary care provider to obtain treatment. However, treatment may be rendered in the ED and does not require PA.
FFS Medicaid beneficiaries with private health insurance must follow the rules of the private health insurance. Private insurers frequently require that the primary care provider perform the follow-up care.

MHP enrollees must be referred to their primary care provider for treatment, or the MHP can be contacted to request authorization to provide the treatment. If the MHP fails to respond within one hour to the request to provide additional services beyond those required for stabilization, the request for authorization is deemed approved.

6.4 Psychiatric Emergency Services in the Emergency Department

Screening and stabilization of a psychiatric emergency does not require PA. These services are covered in the same manner as other emergency services provided in the ED detailed above. If it is determined that the beneficiary requires post-stabilization psychiatric services, the PIHP/CMHSP must be contacted for PA. The need for PA from the PIHP/CMHSP includes, but is not limited to, inpatient psychiatric admission, psychiatric partial hospitalization, and specialty mental health services.

A psychiatric emergency is defined as a situation in which an individual must be treated to protect him from inflicting injury to self or others as the result of a serious mental illness, emotional disturbance, or developmental disability, or could reasonably be expected to intentionally or unintentionally injure himself or others in the near future. The emergency may result from an inability to provide food, clothing, or shelter for him or others, inability to attend to activities of daily living, or when judgment is so impaired the individual is unable to understand the need for treatment.

6.5 Urgent Care Settings

Physician services rendered in urgent care centers or similar settings that are not part of a licensed hospital are covered. Coverage is based on the appropriate office or other outpatient services E/M procedure codes. Coverage for any additional professional services rendered in these settings follows CPT guidelines.
SECTION 7 – MATERNITY CARE AND DELIVERY SERVICES

Medicaid covers maternity care and delivery services. The services normally provided in uncomplicated maternity cases include antepartum care, delivery, and postpartum care. These services are included in the global obstetrical package. The global obstetrical package is covered when one physician or physician group practice provides the obstetric care to a beneficiary. The global obstetrical package is covered as long as the provider or group has provided seven or more antepartum visits, the delivery, and the postpartum care. If less than seven antepartum visits are provided, report the global package with the modifier for reduced services and indicate the number of antepartum visits on the claim.

7.1 ANTEPARTUM CARE

Includes the initial and any subsequent history, physical examinations, recording of weight, blood pressures, fetal heart tones, routine chemical urinalysis, and monthly visits up to 28 weeks gestation, biweekly visits to 36 weeks gestation, and weekly visits until delivery. Typically, if a beneficiary enrolls in the first trimester and delivers at term, she has about 13 antepartum visits. This varies depending on the actual start of antepartum care and the delivery date. If the total number of antepartum visits exceeds 13 due to a high-risk condition, the additional visits are covered when using the appropriate E/M codes with the diagnosis for the high-risk condition.

7.2 DELIVERY

Includes admission to the hospital, the admission history and physical examination, management of uncomplicated labor, and delivery. All hospital visits within 24 hours of delivery are generally considered part of the global package. If the beneficiary is admitted more than 24 hours before delivery and stays more than 24 hours, then hospital care rendered prior to the day of delivery is covered separately as an E/M code. Medical problems complicating labor and delivery management that require additional resources are also covered separately.

7.3 POSTPARTUM

Includes all the visits following a delivery, both in the hospital and in the office. Services provided by physicians within the same group practice are considered as provided by the primary physician responsible for the beneficiary’s overall obstetrical care.

7.4 OBSTETRICAL PACKAGE VS. COMPONENTS

If the same physician or group practice does not provide all of the obstetric care, Medicaid covers the portion of the care provided by each provider. Postpartum care or antepartum care is covered separately if provided by a different physician or group than the physician providing the delivery services. To be consistent with some commercial payers and Medicare, the physician or group providing the entire global obstetrical package may choose to report either the entire global package or may report the antepartum care, delivery, and postpartum care separately as each of these services is provided. Combinations of these components must be allowable under Medicaid NCCI editing. Components such as the antepartum care or postpartum care cannot be unbundled into individual visits.
Services that are not included in the global package include:

- Maternal or fetal echography or fetal echography procedures
- Fetal biophysical profile
- Chorionic villus sampling, any method
- Fetal contraction stress test
- Fetal nonstress test
- Hospital and observation care visits for premature labor (prior to 36 weeks gestation)

7.5 **HIGH-RISK PREGNANCY**

High-risk pregnancies are those with complicating conditions that are life-threatening to either the mother or fetus and, therefore, require more services than those provided in a routine pregnancy. When high-risk pregnancies require more visits than described for routine obstetrical care and more laboratory data than normally required, the additional services are covered in addition to the global obstetrical package. If beneficiary visits are required due to conditions unrelated to the pregnancy, they are also covered in addition to the global obstetrical package. Medicaid follows CPT guidelines for reporting high-risk pregnancy services.

7.6 **MULTIPLE GESTATION**

In the case of multiple gestation, Medicaid covers the services provided. Payment follows the multiple procedure rules. (Refer to the Billing & Reimbursement for Professionals Chapter, Maternity Care Services subsection, for additional information.) Providers must use a diagnosis code representing multiple gestation.

7.7 **OB ENHANCED PAYMENTS**

MDHHS provides an enhanced payment for each Medicaid delivery performed. This additional reimbursement is added to the fee reimbursed under FFS for the global maternity and delivery procedure codes. The maternity case rate paid to MHPs is also enhanced.

7.8 **MATERNITY OUTPATIENT MEDICAL SERVICES PROGRAM**

Under the Maternity Outpatient Medical Services (MOMS) program, pregnant women can enroll and receive pregnancy related care early in the pregnancy. Refer to the MOMS Chapter for additional information.

7.9 **LACTATION SUPPORT SERVICES**

Medicaid will reimburse for evidence-based lactation support services provided to Medicaid eligible postpartum women in the outpatient setting up to and through 60 days post-delivery. Services must be rendered by a licensed, qualified health professional as outlined. A maximum of two visits per pregnancy will be reimbursed for either a single or multiple gestation pregnancy. One visit is reimbursable per date of service.
7.9.A. PROVIDER CRITERIA

Lactation support and counseling services must be rendered by an Internationally Board Certified Lactation Consultant (IBCLC) credentialed by the International Board of Lactation Consultant Examiners (IBLCE) with possession of a valid and current IBCLC certification.

Rendering IBCLC providers must be Medicaid-enrolled physicians, nurse practitioners, physician assistants or nurse midwives. When a Medicaid-enrolled practitioner provides delegation and supervision, within the confines of his/her scope of practice, to an individual with possession of a valid and current IBCLC certification, that Medicaid-enrolled health professional may bill for comprehensive lactation support services.

For all IBCLC rendered services, a copy of the current, valid IBCLC certification is to be maintained by the supervising physician or employing organization, where applicable, in accordance with the record keeping requirements of the Medicaid program.

7.9.B. COVERED SUPPORTS AND SERVICES

Comprehensive lactation counseling services must include the following:

- A face-to-face encounter with the beneficiary lasting a minimum of 30 minutes.
- Comprehensive maternal, infant and feeding assessment related to lactation.
- Provision of evidence-based interventions that, at a minimum, include:
  - Instruction in positioning techniques and proper latching to the breast;
  - Counseling in nutritive suckling and swallowing, milk production and release, frequency of feedings, and reasons to contact a health care professional; and
  - The provision of community support resource referrals, such as the Women, Infants, and Children (WIC) program, as indicated.
- Evaluation of outcomes from interventions.

Documentation must include a begin time and end time of services and a comprehensive description of the professional interventions provided. Documentation may be subject to review and post-payment audit.

Prenatal lactation education and support services are provided as part of the curriculum of childbirth education programs and will not be separately reimbursed. Reimbursement for lactation education and support received by beneficiaries post-delivery in the inpatient hospital is included in the inpatient hospital payment and will not be separately reimbursed.

Refer to the Billing & Reimbursement for Professionals Chapter of this manual for additional billing information.
7.10 MATERNAL INFANT HEALTH PROGRAM

Maternal Infant Health Program (MIHP) provides preventive health services that are delivered by certified MIHP agencies to high-risk pregnant women and infants born to high risk mothers. The purpose of MIHP is to reduce infant morbidity and mortality. The goal is to deliver a healthy, full term infant. Refer to the Maternal Infant Health Program Chapter for additional information about this program.
SECTION 8 – PHARMACY

A practitioner must report his individual National Provider Identifier (NPI) with a prescription order. An emergency room practitioner must report his individual NPI with a prescription order. Each practitioner at a teaching hospital must report his individual NPI with a prescription order that is submitted to the dispensing pharmacy. A prescription or prescription order must comply with state and federal laws.

Refer to the Pharmacy Chapter of this manual for additional information.
SECTION 9 – RADIOLOGY, RADIATION THERAPY AND NUCLEAR MEDICINE

9.1 RADIOLOGY SERVICES

Medically necessary radiological services are covered when ordered by a physician to diagnose or treat a specific condition based on the beneficiary's signs, symptoms, and past history as documented in the medical record. Radiology services include diagnostic and therapeutic radiology, nuclear medicine, CT scan procedures, magnetic resonance imaging (MRI) services, diagnostic ultrasound, and other imaging procedures. Medical need for all services must be documented in the medical record and are subject to post-payment review.

9.1.A. GLOBAL/COMPONENT SERVICES

Global services are covered for the physician in non-facility settings or the professional component is covered for the physician in any setting. The technical component is only covered when the service is provided in an appropriate non-facility setting. The global service and its professional component service cannot both be covered for the same service since the professional component is included in the global service.

When a physician reports a global procedure, the physician is responsible for the overall performance and quality of the test. The physician must either personally perform the test or it must be performed under the physician's supervision and direction. The physician must personally interpret the results and complete the written report. While some radiology procedures and diagnostic tests may not require the presence of the supervising physician on the premises, other procedures dictate that the physician be present and may even need to be directly involved in the performance of the procedure.

Interpretation of radiology services are covered for any physician trained in the interpretation of the study. The provider who interprets the study must be the one who evaluates the study and prepares and signs the written report for the medical record. Review of results and explanation to the beneficiary are part of the attending physician's E/M service and are not considered as interpretation of the study.

9.1.B. MULTIPLE SERVICES ON SAME DAY

Medicaid covers bilateral x-rays when medically necessary. Bilateral services are studies done on the same body area, once on the right side and once on the left side. Comparison films obtained for routine purposes are not covered. Providers should use a bilateral code when available. Medicaid also covers multiple studies of both areas if reported with the appropriate modifier. Examples would include bilateral wrist studies done before and after fracture care on both wrists the same day for the same patient or doing films to assess a patient’s response to medical care, such as multiple chest films to monitor the cardiopulmonary status of a critically ill patient.

Contiguous Areas

<p>| Contiguous Areas | Studies of contiguous areas, such as the wrist and hand, lumbosacral spine and pelvis, ankle and foot, are covered on the same day when medically necessary to visualize each space. The medical record must support the need for individual studies. If cervical, lumbosacral and thoracic views are performed, an entire spine study should be reported. |</p>
<table>
<thead>
<tr>
<th>Service</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Screening Mammography</td>
<td>Screening mammography is covered according to the American Cancer Society guidelines. Women age 40 and older should have annual breast cancer screening consisting of a clinical breast examination and a mammogram.</td>
</tr>
<tr>
<td>Transrectal or Prostate Ultrasound</td>
<td>Transrectal or prostate ultrasound is covered when the patient is considered at high risk for prostate cancer. It is also covered for pathologic indications that include evaluation of prostatic nodule(s) or abnormalities of the seminal vesicles, staging of prostatic cancer, and monitoring of response to therapy for prostatic cancer.</td>
</tr>
<tr>
<td>CT, MRI, PET Scans</td>
<td>For CT, MRI and PET scans to be covered, all conditions of Certificate of Need (CON) must be met. These services are subject to standards for provision of the service that include specific staff and designation of who is qualified to interpret the results. Flat films and CT or MRI studies of the same area are covered on the same day when medically indicated. The provider is responsible for using the most appropriate diagnostic test(s) according to current standards of practice. A CT and a myelogram may be covered on the same day; however, an MRI and a myelogram are not covered separately if done on the same day. Coverage of a CT of the spine is limited to one level per day, and coverage of an MRI is limited to two levels of the spine on the same day. Providers should be directing the study at the area of the suspected problem. CT and MRI scans may be done with or without contrast media or both. When a scan is done without contrast followed by another with contrast, only the full service is covered. The global RVUs for CT and MRI contrast scans include allowance for high osmolar contrast media, and the RVUs for global MRIs include allowance for paramagnetic contrast media. In certain instances, the use of low osmolar contrast media (LOCM) is separately covered. In the case of intra-arterial and intravenous radiological procedures, LOCM is covered separately for nonhospital patients with one or more of the following: - A history of previous adverse reaction to contrast material, with the exception of a sensation of heat, flushing, or a single episode of nausea or vomiting; - A history of asthma or allergy; - Significant cardiac dysfunction, including recent or imminent cardiac decompensation, severe arrhythmia, unstable angina pectoris, recent myocardial infarction, and pulmonary hypertension; - Generalized severe debilitation; or - Sickle cell disease. If the patient does not meet any of these criteria, the contrast media is considered bundled into the global service and is not covered separately. When high dose contrast technique is used with MRI, the global service is covered for the procedure designated without contrast, then with contrast. The third MRI (again with contrast) is not covered separately. The contrast material used in the second MRI procedure is not covered separately; however, the contrast material for the third MRI procedure is covered separately.</td>
</tr>
<tr>
<td>Obstetrical Ultrasound</td>
<td>Obstetrical ultrasound studies are covered in addition to the global obstetrical package. More than two studies are covered only for high-risk conditions such as bleeding, placental abnormalities, fetal post-maturity, etc. The need for the additional studies, including the change in clinical symptoms, must be documented. Pelvic ultrasounds are not covered to diagnose pregnancy or vaginal infections. The use of ultrasound studies for routine fetal age determination in or preparatory for pregnancy termination procedures is considered part of the termination procedure and is not covered separately.</td>
</tr>
</tbody>
</table>
9.2 RADIATION THERAPY

Medicaid covers medically necessary radiation therapy services provided to beneficiaries. CPT/HCPCS guidelines for radiation therapy services are followed.

Following the Medicare guidelines, many services are bundled into the treatment management codes and are not covered separately when the diagnosis is related to the weekly treatment diagnosis and the services are provided by the radiation oncologists or in conjunction with the therapy. The following services are included in the weekly treatment management service:

- Anesthesia
- Care of infected skin
- Checking treatment charts
- Continuing-care patient evaluation and examination
- Final medical examination
- Nutritional counseling
- Pain management
- Medical prescription
- Review and revision of the treatment plan
- Routine medical management of related problems
- Special care of ostomy
- Verification of dosage
- Written reports, progress notes
- Follow-up examination and care 90 days after the last treatment

Medicaid separately covers services furnished by a radiation physicist only when provided to a nonhospital beneficiary in a freestanding facility.

Professional services provided to hospital patients are covered only when personally performed by a physician.

Global physician services are only covered if provided in a freestanding, nonhospital setting.

9.3 NUCLEAR MEDICINE

Medicaid covers medically necessary nuclear medicine procedures. Providers are responsible for complying with Nuclear Regulatory Commission (NRC) requirements. Only professional services rendered to hospital patients are covered for the practitioner.

Medicaid covers global services when provided in a freestanding, nonhospital setting. Radionuclides used in the procedures are covered separately.
When specific nuclear medicine diagnostic procedures are performed, multiple procedure coverage rules apply. Generation and interpretation of automated data is covered as a part of the primary procedure.

9.4 TRANSPORTATION AND SET-UP OF PORTABLE X-RAY EQUIPMENT [SUBSECTION ADDED 7/1/18]

The transportation of portable x-ray equipment, set-up, and personnel is covered when furnished in a place or residence used as the patient’s home as reported by the corresponding HCPCS code. These services must be provided under the order and general supervision of a physician. No transportation charge is payable unless the portable x-ray equipment was actually transported to the location where the x-ray was taken. For patients residing in a nursing facility, the transportation, set-up and personnel costs are included in the nursing facility’s per diem rate and not separately reimbursable. (Refer to the Nursing Facility Chapter of this manual for additional information.)

If only one patient is served, report the appropriate HCPCS code. When more than one patient is served during a single trip to the same location, report the appropriate HCPCS code with the appropriate Level II HCPCS modifier (UN, UP, UQ, UR, US) relative to the number of patients served, irrespective of their insurance. Total payment for services will be adjusted by the number of patients. (added per bulletin MSA 18-01)
SECTION 10 – HOSPITAL INPATIENT PHYSICIAN SERVICES

Medicaid covers physician services to hospital inpatients that are medically necessary and follow the requirements in this section.

10.1 VENTILATION MANAGEMENT

Ventilation management provided in the inpatient hospital setting is covered separately unless an E/M service is provided on the same day.

10.2 CRITICAL CARE

Medicaid covers critical care consistent with the CPT/HCPCS definitions and guidelines. Each day that critical care is provided, the medical record must support the level of service provided. The actual time spent with the patient delivering critical care services must be documented in the medical record.

10.3 RESPIRATORY CARE

Medicaid covers respiratory care as a separate service in the inpatient hospital setting for the anesthesiologist/physician who initiates respiratory care by setting up the respirator, placing the beneficiary on the respirator, and providing daily supervision of the beneficiary for the respiratory care alone.

10.4 STANDBY SERVICES

Medicaid does not cover the services of a standby surgeon, anesthesiologist or surgical team. Only direct beneficiary care is covered. Physician standby services are covered as a part of the hospital services.
SECTION 11 – SURGERY – GENERAL

Medicaid covers medically necessary surgical procedures.

11.1 GLOBAL SURGERY

Coverage for the global surgery package includes related services that are furnished by the physician who performs the surgery or by members of the same group with the same specialty. Medicaid policy is based on CMS guidelines for Medicare services for the global surgery package.

11.1.A. SERVICES INCLUDED IN THE GLOBAL SURGERY PACKAGE

- Pre-operative visits beginning with the day before the surgery for major surgeries and the day of the surgery for minor surgeries.
- Intra-operative services that are a usual and necessary part of a surgical procedure.
- Complications following surgery. This includes all additional medical or surgical services required of the surgeon during the post-operative period due to complications that do not require return to the operating room. The surgeon’s visits to a patient in an intensive care or critical care unit are also included.
- Follow-up visits within the post-operative period related to recovery from the surgery.
- Post-surgical pain management by the surgeon.
- Supplies for certain services furnished in a physician's office.
- Miscellaneous services and items such as dressing changes, local incisional care, removal of operative pack, removal of cutaneous sutures and staples, lines, wires, tubes, drains, casts, and splints; insertion, irrigation and removal of urinary catheters, routine peripheral intravenous lines, nasogastric and rectal tubes, and changes and removal of tracheostomy tubes.

11.1.B. SERVICES NOT INCLUDED IN THE GLOBAL SURGERY PACKAGE

- The surgeon's initial consultation or evaluation of the problem to determine the need for surgery.
- The office or hospital visit to decide upon surgery if it occurs on the day before or the day of a major surgery.
- Other physicians’ services, except when the surgeon and the other physician(s) agree on the transfer of care. (The transfer of care agreement may be in the form of a letter or an annotation in the discharge summary, hospital records, or ambulatory surgical center records.)
- Visits unrelated to the diagnosis for which the surgical procedure was performed.
- Treatment of the underlying condition or an added course of treatment that is not part of the normal recovery from surgery.
- Diagnostic tests and procedures, including diagnostic radiology procedures.
- Clearly distinct surgical procedures that are not repeat procedures, or treatment for complications during the post-operative period. A new post-operative period begins with the subsequent procedure.
- Staged procedures done in two or more parts for which the decision to stage the procedure is made prospectively or at the time of the first procedure. Examples include procedures to diagnose and treat epilepsy in succession within 90 days of each other.
- Laser eye surgeries (and all other services whose CPT/HCPCS description includes one or more sessions) performed in a series over a period of weeks or months are not considered staged procedures. All sessions during the post-operative period of the first session are covered as a part of the global package.
- Chemotherapy and/or radiation therapy following cancer surgery.
- Treatment for post-operative complications that requires a return to the operating room. For this purpose, an operating room is a place of service specially equipped and staffed for the sole purpose of performing surgical procedures, including a cardiac catheterization suite, a laser suite, and an endoscopy suite. Not included is a patient’s room, a minor treatment room, a recovery room, or intensive care unit unless the patient’s condition is so critical there is insufficient time for transportation to an operating room.
- A second, more extensive procedure when a less extensive procedure fails.
- A therapeutic service that is required during the post-operative period of a diagnostic service. Example: A D&C followed by a therapeutic hysterectomy performed during the D&Cs global period.
- Immunosuppressive therapy for organ transplants.
- Critical care services unrelated to the surgery when a seriously injured or burned patient is critically ill and requires constant attendance of the physician.
- Visits that are a significant, separately identifiable service on the same day as a minor surgery or endoscopy. For example, a visit for a full evaluation of a lump in the breast on the same day as a removal of a lesion on the back.
- When a beneficiary is returned to the operating room for treatment of complications, only the intra-operative portion of the service is covered.

11.2 PARTIAL GLOBAL PACKAGE

Services of physicians furnishing less than the full global surgery package are covered. Modifiers are used to identify the portion of the global surgery package that is covered separately when performed by different physicians under certain circumstances. Only procedures with 10- or 90-day global periods are eligible for partial global surgery package coverage.

Surgeons should use the modifier for surgical care only when another physician provides all or part of the outpatient post-operative care. MDHHS assumes that the surgeon is responsible for pre-operative, intra-operative and inpatient hospital post-operative care at a minimum. The modifier for post-operative management only is used when a second physician provides all or part of the post-operative care after hospital discharge in the global package. Surgeons must transfer care to the second physician, and both must keep a copy of the written transfer agreement in the beneficiary’s medical record.
11.3 BILATERAL SURGERY

Bilateral surgeries are procedures performed on both sides of the body during the same operative session or on the same day. The descriptions for some procedure codes include the terms “bilateral” or “unilateral or bilateral”. The RVUs for these codes reflect the work involved if done bilaterally as the description states. Other procedure code descriptions do not include bilateral but may be performed bilaterally. The bilateral procedure modifier is used with these procedure codes.

Reimbursement for a bilateral procedure reported appropriately with modifier 50 is based on the lower of the amount billed or 150 percent of the fee screen for the procedure.

11.4 MULTIPLE SURGICAL PROCEDURES

Multiple surgeries are separate procedures performed by a physician on the same beneficiary during the same operative session or on the same day for which separate coverage may be allowed. Co-surgeons, surgical teams, or assistants at surgery may participate in performing multiple surgeries on the same beneficiary on the same day.

When the same physician performs multiple surgical procedures during one operative session, all services are covered separately. MDHHS follows CMS multiple surgery guidelines for coverage of the procedures. If an integral procedure (one that is part of a larger surgery and is necessary to perform the larger surgery) is performed, it is covered as a part of the larger procedure. If two or more physicians each perform distinctly different, unrelated surgeries on the same patient on the same day (e.g., in some multiple trauma cases), the procedures are covered separately.

Multiple surgery reimbursement policy applies to procedures performed during the same operative session or on the same day by the same physician or physicians of the same specialty in the same group practice. Medicaid reimburses up to 100 percent of the fee screen for the most complex surgical procedure and up to 50 percent of the fee screens for the second through the fifth surgical procedures. If more than five multiple procedures are performed, an operative report must be provided with the claim.

11.5 MULTIPLE ENDOSCOPY PROCEDURES

Multiple endoscopy procedures are reimbursed based on the full fee for the highest paid service, plus the difference between the next highest and the base endoscopy. When related endoscopies are performed on the same day as other endoscopies or other surgical procedures, the standard multiple surgery rules apply. The multiple surgery rules consider the coverage for the related endoscopies as one service, and any other unrelated endoscopy or procedure as another service.

11.6 MULTIPLE SURGEONS

Under some circumstances, the individual skills of two or more surgeons are required to perform surgery on the same beneficiary during the same operative session. This may be required due to the complex nature of the procedures or the beneficiary’s condition. Medicaid reimbursement policy is based on CMS guidelines for Medicare services for multiple surgeons.
11.7 CO-SURGEONS

Two surgeons who work together as primary surgeons performing distinct parts of a total service are considered co-surgeons. The medical record must contain sufficient documentation supporting the medical necessity for co-surgeons. Report the modifier indicating two surgeons for the services furnished by each co-surgeon. The primary procedure is reimbursed at the full screen times 62.5 percent. Second and subsequent services are paid at 50 percent of the full-allowed amount times 62.5 percent.

11.8 TEAM SURGEONS

Three or more surgeons who work together as primary surgeons to perform a specific procedure are considered team surgeons. Sufficient documentation must be submitted with the claim to establish that a team was medically necessary. If two or more surgeons are of the same specialty, the reason each was needed must be documented also. Report the surgical team modifier when billing for services rendered by each team surgeon. Each surgeon’s dictated operative report must be included with the claims. Reimbursement is based on individual consideration.

11.9 ASSISTANT AT SURGERY/ASSISTANT SURGEON

Medicaid covers assistant at surgery services for designated surgical procedures. Assistant at surgery services must be considered reasonable and necessary for the surgery performed. An assistant at surgery actively assists the primary surgeon during the surgical procedure. Coverage for assistant at surgery services is not allowed when co-surgeons or team surgeons are utilized.

Medicaid does not cover assistant surgeon services in a teaching hospital setting unless a qualified resident is not available. The medical record must document the circumstances causing the unavailability of a qualified resident. The surgical procedure is reported with appropriate modifier identifying use of an assistant surgeon.

Medicaid covers assistant at surgery services performed by a second physician, a physician's assistant, or a nurse practitioner (NP). Physician’s assistant and NP services as assistant at surgery must be under the delegation and supervision of the physician employing the physician's assistant or NP, or a physician employed by the same group practice that employs the physician’s assistant or NP. If the physician’s assistant and/or NP are employees of the hospital, their services are covered as a part of the hospital charges.

11.10 SURGEONS PERFORMING DISTINCTLY DIFFERENT UNRELATED PROCEDURES

If two or more physicians each perform distinctly different, unrelated surgeries on the beneficiary on the same day, the payment adjustment rules for multiple surgeries or co-surgeons do not apply. In such cases, the multiple procedures modifier should not be used unless one of the surgeons individually performs multiple surgeries.

11.11 VISION PROCEDURES AND CARE

Ophthalmologists may transfer post-operative care associated with cataract removal or insertion of intraocular lens prosthesis to an optometrist. In this case, the ophthalmologist who performs eye surgery but does not provide the post-surgical care must report the surgical care only modifier with the surgery procedure code. This includes the pre-operative care, the surgery, and any in-hospital post-operative
care. Post-operative care after hospital discharge is covered separately for the provider that the care was transferred to using the surgery code with the post-operative management only modifier.

Surgical procedure descriptions that include the phrase “one or more sessions” include all sessions. These procedures include the 90-day global period during which the procedure(s) can be completed in one or more session(s). These procedures include trabeculoplasty by laser surgery, iridotomy/iridectomy by laser or photocoagulation, repair of retinal detachment, destruction of retinal or choroid lesions. The code description in CPT identifies when one or more sessions are included. Separate coverage for a second or subsequent session of the same procedure during the global period of the initial service is limited to cases where the modifier reported with the procedure code indicates that services were performed on different eyes.
SECTION 12 – SURGERY - SPECIAL CONSIDERATIONS

12.1 ABORTIONS

Medicaid only covers an abortion performed by a physician and related hospital charges (e.g., room, supplies) when it has been determined medically necessary to save the life of the mother or the pregnancy is the result of rape or incest. Medicaid funding is not available for any elective therapeutic abortion or service related to the performance of such abortion unless one of these criteria has been met.

Physicians must certify on a completed Certification for Induced Abortion form (MSA-4240) that, for medical reasons, an abortion was necessary to save the life of the mother or the beneficiary’s medical history indicates that the terminated pregnancy was the result of rape or incest.

The physician who completes the MSA-4240 must also ensure completion of the Beneficiary Verification of Coverage form (MSA-1550) and is responsible for providing copies of the forms for billing purposes to any other provider (e.g., anesthesiologist, hospital, laboratory) that would submit claims for services related to the abortion.

Copies of the MSA-4240 and the MSA-1550 are not required for claims for ectopic pregnancies or spontaneous, incomplete, or threatened abortions.

Providers may attach copies of the MSA-4240 and the MSA-1550 to the claim or submit them via fax.

Federal regulations require that these forms be submitted to Medicaid before reimbursement can be made for any abortion procedure. This process can eliminate submitting paper attachments for abortion claims and pre-confirms the acceptability of the completed forms, as well as reduces costly claim rejections.

The medical record must include a complete beneficiary history, including the medical conditions that made the abortion necessary to save the life of the mother. When the pregnancy is the result of rape or incest, the medical record must include the circumstances of the case and that the pregnancy was the result of rape or incest.

(Refer to the Forms Appendix for copies of MSA-4240 and MSA-1550. The forms are also available on the MDHHS website. Refer to the Directory Appendix for website information.)

12.2 BREAST RECONSTRUCTION SURGERY

Medicaid covers breast reconstruction surgery following the diagnosis and treatment of breast cancer. Covered services include procedures related to the affected and the contralateral unaffected breast following a medically necessary mastectomy. The prior authorization requirements for these specified breast reconstruction procedure codes are waived when billed with appropriate ICD breast cancer diagnosis codes. The specified CPT codes subject to this PA waiver are identified in the Medicaid Code and Rate Reference tool. (Refer to the Directory Appendix for website information.)
12.3 **COSMETIC SURGERY**

Medicaid only covers cosmetic surgery if PA has been obtained. The physician may request PA if any of the following exist:

- The condition interferes with employment.
- It causes significant disability or psychological trauma (as documented by psychiatric evaluation).
- It is a component of a program of reconstructive surgery for congenital deformity or trauma.
- It contributes to a major health problem.

The physician must identify the specific reasons any of the above criteria are met in the PA request.

Physicians should refer to the General Information for Providers Chapter for specific information for obtaining authorization.

12.4 **DESTRUCTION OF LESIONS**

Medicaid covers destruction of lesions by methods such as electrocautery, cryocautery, laser, and surgery.

Coverage of the surgical destruction of lesions that involves more extensive procedures is limited to the hospital/facility setting. Less extensive procedures are covered in the office/non-facility setting. (Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding which procedures require a hospital/facility setting for coverage and which procedures are covered in the office/non-facility setting.) If a repeat procedure to the same lesion is necessary, it is covered as an office visit.

Chemocautery or chemical destruction of any lesion, such as the use of a nitrate stick or podophyllin, is covered as a part of the office visit.

12.5 **HYSTERECTOMY**

Hysterectomies are covered only if the beneficiary has been informed orally, prior to surgery, that a hysterectomy will render her permanently incapable of reproducing. The beneficiary or her representative must sign a written acknowledgment of receipt of that information. The Acknowledgment of Receipt of Hysterectomy Information (MSA-2218) serves as the written acknowledgment.

All items on the MSA-2218 must be completed and the form must be signed by the beneficiary (or representative) and the physician (MD or DO).

Federal regulations prohibit Medicaid coverage for hysterectomies performed solely for the purpose of sterilization. Hysterectomies are also prohibited when performed for family planning purposes even when there are medical indications, which alone do not indicate a hysterectomy.
12.5.A. EXCEPTIONS

The MSA-2218 is not required in the following situations:

- The beneficiary was already sterile before the hysterectomy.
- The beneficiary requires a hysterectomy because of a life-threatening emergency situation. It was not possible for the physician to inform the beneficiary in advance that the surgery would make her permanently incapable of reproducing.
- The hysterectomy (as covered according to Medicaid policy) was performed during a period of retroactive eligibility.

12.5.B. ACKNOWLEDGEMENT OF RECEIPT OF HYSTERECTOMY INFORMATION

Providers may attach a copy of the MSA-2218 to the claim or submit the MSA-2218 via fax.

Federal regulations require that this form be submitted to Medicaid before reimbursement can be made for any hysterectomy procedure. This process can eliminate submitting paper attachments for hysterectomy claims and pre-confirms the acceptability of the completed acknowledgement form, as well as reduces costly claim rejections.

(Refer to the Forms Appendix for a copy of MSA-2218. The form is also available on the MDHHS website. Refer to the Directory Appendix for website and contact information.)

12.5.C. PROCEDURE FOR ACKNOWLEDGEMENT OF RECEIPT OF HYSTERECTOMY INFORMATION APPROVAL

- The provider who obtains the required Acknowledgement completes a cover sheet (typed or printed) which must include: beneficiary name, beneficiary Medicaid ID number, provider’s contact person, provider fax number, and provider phone number.
- Fax the cover sheet and completed acknowledgement form to the Medicaid Payments Division, Hysterectomy Acknowledgement Form Approval. (Refer to the Directory Appendix for contact information.) Do not fax invoices.
- The form is reviewed within five working days, and a notice of errors or acceptance is returned to the provider. When notified that the acknowledgement form has been accepted and is on file, inform the other providers via a copy of the response. All invoices related to the service may be submitted without attachments.
- If there is no response within five working days:
  - Confirm that the fax is working.
  - Be sure that the cover sheet included the necessary information for Medicaid staff to respond to the provider.
  - Resend the information if necessary.
12.6 ORGAN TRANSPLANTS

Medicaid covers organ transplants and related services if all requirements for these services are met. PA is required for all beneficiary, donor, and potential donor services related to all organ transplants except cornea and kidney transplants. If transplantation of additional organ(s) is to occur during the same operative session as a cornea or kidney transplant, PA is required.

Prior to surgery, the beneficiary must be evaluated at an accepted transplant center approved by the Office of Medical Affairs (OMA) to determine if he is a good transplant candidate. The attending physician must obtain the PA for this evaluation. If the beneficiary is accepted as a transplant candidate, the PA for the evaluation also covers the transplant and related services.

12.7 STERILIZATION

Medicaid covers sterilization procedures when specific requirements are met. Medicaid defines a sterilization procedure as any medical procedure, treatment, or operation for the purpose of rendering an individual (male or female) permanently incapable of reproducing. Surgical procedures performed solely to treat an injury or pathology are not considered sterilizations under Medicaid's definition of sterilization, even though the procedure may result in sterilization (e.g., oophorectomy). The physician is responsible for obtaining the signed Consent for Sterilization (MSA-1959/HHS-687).

Sterilizations are only covered if all of the following are met:

- The beneficiary is at least 21 years of age at time of informed consent.
- The beneficiary is not legally declared to be mentally incompetent.
- The beneficiary is not institutionalized in a corrective, penal, or mental rehabilitation facility.
- Informed consent is obtained.
Informed consent is not obtained while the beneficiary is in labor or childbirth; seeking to obtain or obtaining an abortion; or under the influence of alcohol or other substances that affect the beneficiary’s state of awareness.

Informed consent must be obtained not less than 30 days nor more than 180 days prior to sterilization.

The only exception is in the case of premature delivery or emergency abdominal surgery. If the premature delivery or emergency abdominal surgery occurred before the 30-day waiting period is over, at least 72 hours must have passed between the time of obtaining informed consent and the sterilization procedure.

In cases of premature delivery, informed consent must have been given at least 30 days before the expected delivery date. The consent form must indicate the expected date of delivery.

In cases of abdominal surgery, the emergency nature of the surgery must be clearly identified (e.g., diagnosis, physician’s statement, or hospital summary). The nature of the emergency must be included on the consent form.

12.7.A. INFORMED CONSENT PROCESS

The following procedures must be included in the process of informed consent:

- The beneficiary must be advised that the sterilization will not be performed for at least 30 days after the MSA-1959/HHS-687 is signed, except in cases of emergency abdominal surgery or premature delivery.
- The person who obtains informed consent must offer to answer any questions the beneficiary may have concerning the procedure.
- Suitable arrangements must be made to ensure that information is effectively communicated to the deaf, blind, or otherwise handicapped.
- An interpreter must be provided if the beneficiary does not understand the language used on the consent form or the language used by the person obtaining informed consent.
- The beneficiary is permitted to have a witness of his choice present when informed consent is obtained.
- At the time of the informed consent, a copy of the consent form must be given to the beneficiary.

All of the following sterilization information and advice must be presented orally to the beneficiary both at the time the beneficiary signs the MSA-1959/HHS-687 and again by the physician performing the sterilization shortly before the procedure (e.g., during the pre-operative examination):

- Advice that the beneficiary is free to withhold or withdraw consent to the procedure at any time before the sterilization without affecting the right to future care or treatment and without loss or withdrawal of any federally funded program benefits to which the beneficiary might be otherwise entitled.
- A description of available alternative methods of family planning and birth control.
- Advice that the sterilization procedure is considered to be irreversible.
- A thorough explanation of the specific sterilization procedure to be performed.
- A full description of the discomforts and risks that may accompany or follow the procedure, including an explanation of the type and possible effects of any anesthetic to be used.
- A full description of the benefits or advantages that may be expected as a result of the sterilization.

The beneficiary, the person who obtained the consent, and the interpreter (if required) must sign the MSA-1959/HHS-687 not less than 30 days nor more than 180 days prior to the sterilization. The physician performing the sterilization must also sign and date the MSA-1959/HHS-687 after the sterilization has been performed.

No additional reimbursement is allowed for the examination or the sterilization explanation.

If the procedure occurs in a place other than that in which the consent form is signed (e.g., forms were signed in the physician's office, but the procedure will be rendered in the hospital), the person obtaining consent must send a copy of the completed form to the place of surgery. The second provider (e.g., hospital) is responsible for acquiring the physician's statement (if not previously documented) and for photocopying the signed form and supplying copies to any other Medicaid provider who is billing as a participant in the sterilization.

A copy of the completed MSA-1959/HHS-687 is required for coverage of charges related to a sterilization procedure. This form may be faxed or attached to the claim form.

### 12.7.B. CONSENT FOR STERILIZATION FORM

Providers may attach a copy of the Consent for Sterilization (MSA-1959/HHS-687) form to the claim or submit the MSA-1959/HHS-687 via fax.

Federal regulations require that this form be submitted to MDHHS before reimbursement can be made for any sterilization procedure. This process can eliminate submitting paper attachments for sterilization claims, and pre-confirms the acceptability of the completed consent form.

(Refer to the Forms Appendix for a copy of MSA-1959/HHS-687. Refer to the Directory Appendix for website and contact information.)

### 12.7.C. PROCEDURE FOR CONSENT FOR STERILIZATION FORM APPROVAL

- The provider who obtains the required Consent and completed MSA-1959/HHS-687 completes a cover sheet (typed or printed) which must include: beneficiary name, beneficiary Medicaid ID number, provider's contact person, provider fax number, and provider phone number.
Fax the cover sheet (according to Document Management Portal instructions) and completed MSA-1959/HHS-687 to the Medicaid Payments Division, Sterilization Consent Form Approval. (Refer to the Directory Appendix for contact information.) Do not fax invoices.

The MSA-1959/HHS-687 is reviewed within five working days, and a notice of errors or acceptance is returned to the provider. When notified that the MSA-1959/HHS-687 has been accepted and is on file, inform the other providers via a copy of the response. All invoices related to the service may be submitted without attachments.

Providers may then submit claims (either electronic or hard copy) to Medicaid. The remarks section or appropriate electronic segment must include the statement "Consent on File."

When sterilization claims are received with this information in the remarks section, consent form edit requirements are forced if the submitted invoice matches the consent form on file.

If there is no response within five working days:

- Confirm that the fax is working.
- Be sure that the cover sheet included the necessary information for Medicaid staff to respond to the provider.
- Resend the information if necessary.

12.7.D. **REVERSAL OF STERILIZATION**

Services to reverse a previous sterilization are not covered by Medicaid.
SECTION 13 – DURABLE MEDICAL EQUIPMENT/ ORTHOTICS/ PROSTHETICS

Refer to the Medical Supplier Chapter of this manual for additional information.
SECTION 14 – BEHAVIORAL HEALTH AND SUBSTANCE USE DISORDER SERVICES

14.1 BEHAVIORAL HEALTH SERVICES

Medicaid covers behavioral health services for diagnostic or active treatment purposes. Behavioral health services are covered by the local PIHP/CMHSP for services included under the capitation payments to the PIHPs/CMHSPs. (Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter for additional information.) For services not included in the capitation payments to the PIHP/CMHSP, behavioral health services are covered through Medicaid Health Plans or FFS Medicaid. Under FFS, behavioral health services may be provided by a physician (MD or DO), psychologist, social worker, professional counselor, or marriage and family therapist (as defined in the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter, Non-Physician Behavioral Health Appendix). (Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding covered services.)

Beneficiaries enrolled in an MHP will receive behavioral health services through the health plan. (Refer to the Medicaid Health Plans Chapter of this manual for additional information.)

(Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter of this manual for specific coverages and authorization requirements.)

<table>
<thead>
<tr>
<th>Psychological Testing</th>
<th>Medicaid covers psychological testing that is reasonable and necessary for diagnosing the beneficiary's mental or developmental status and strengths and needs. If a beneficiary requires psychological testing more than once per year, documentation of medical necessity must be maintained in the medical record. Psychological testing must be ordered by a physician (MD or DO) and may be performed by a psychologist who is fully licensed, limited-licensed, or temporary limited-licensed. This order must be kept in the beneficiary's clinical record. Supervision of limited-licensed and temporary limited-licensed psychologists must comply with the requirements of Michigan Public Act 368 of 1978, as amended.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Inpatient Psychiatric Admissions</td>
<td>Inpatient stays in a psychiatric unit of a general hospital are covered for beneficiaries of any age. Inpatient treatment, including related psychiatric visits, in a freestanding psychiatric hospital, both private and state owned, is limited to eligible beneficiaries under age 21, and age 65 and older. If the beneficiary was an inpatient immediately prior to attaining age 21, he would be eligible to continue as an inpatient until age 22. If the beneficiary is discharged at some time following his 21st birthday, coverage terminates on the discharge date. All psychiatric admissions and continued stays must be authorized by the local PIHP/CMHSP. (Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter of this manual for specific coverages and authorization requirements.)</td>
</tr>
</tbody>
</table>
### Psychiatric Partial Hospitalization

Psychiatric coverage includes partial hospitalization on a day-care or night-care plan for all beneficiaries, regardless of age. To be eligible for partial hospitalization, the beneficiary must be receiving active psychiatric treatment provided under the direction of a psychiatrist.

All partial hospitalization admissions and continued stays must be authorized by the local PIHP/CMHSP. (Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter of this manual for specific coverages and authorization requirements.)

### Office-Based Opioid Treatment (OBOT)

OBOT services are reimbursed directly by MDHHS for both MHP enrollees and FFS beneficiaries. Physician and non-physician practitioner (Physician Assistant [PA] and Nurse Practitioner [NP]) services related to opioid dependence may be reimbursed through the Medicaid Fee-for-Service (FFS) program.

Working within their scope of practice, physician and non-physician practitioner (PA and NP) services related to OBOT will be considered for reimbursement through the FFS program when the beneficiary meets the American Society of Addiction Medicine (ASAM) criteria for outpatient treatment. Providers are required to provide services consistent with clinical practice guidelines established by the Substance Abuse and Mental Health Services Administration (SAMHSA) and ASAM.

The following services related to opioid treatment qualify for FFS reimbursement when a beneficiary has a primary diagnosis of opioid dependence:

- Evaluation and Management services
- Consultation services

Physicians and non-physician practitioners (PA and NP) seeking FFS reimbursement for OBOT services must be enrolled in the Community Health Automated Medicaid Processing System (CHAMPS) as a FFS provider. Enrolled providers cannot duplicate and/or be reimbursed through the PIHP/CMHSP for the same service.

According to SAMHSA opioid treatment standards, use of medication with counseling is crucial to successful treatment for individuals with opioid dependence. Beneficiaries must be actively involved in their treatment and, as such, it is important that all providers coordinate care.

OBOT providers should ensure beneficiaries have access and receive referral to PIHPs for further assessment and treatment and any of the other supports and services that are available (i.e., PIHP specialty services, community based services, and natural supports). PIHP/CMHSP, FFS and Managed Care must partner in overseeing and coordinating the treatment plan knowing that OBOT is only part of the services necessary to achieve successful outcomes.

(Refer to the General Information for Providers Chapter for additional information on enrollment in CHAMPS.)

### 14.2 Substance Use Disorder Services

Most substance use disorder services provided to Medicaid beneficiaries are covered through the local PIHP/CMHSP. PIHPs/CMHSPs are responsible for direct payment for inpatient psychiatric or partial hospitalization services, related physician services, and specialized community mental health clinical and rehabilitation services that the PIHP/CMHSP has prior authorized. Providers should not bill MDHHS for these services.
Acute Care Detoxification

Acute detoxification services are reimbursed directly by MDHHS for both MHP enrollees and FFS beneficiaries.

Admission to the acute care setting for a diagnosis of substance use must meet at least one of the following criteria as reflected in the physician's orders and patient care plans:

- Vital signs, extreme and unstable
- Uncontrolled hypertension, extreme and unstable
- Delirium tremens, (e.g., confusion, hallucinations, seizures) or a documented history of delirium tremens requiring treatment
- Convulsions or multiple convulsions within the last 72 hours
- Unconsciousness
- Occurrence of substance abuse with pregnancy and monitoring the fetus is vital to the continued health of the fetus
- Insulin treated diabetes complicated by diabetic ketoacidosis
- Suspected diagnosis of closed head injury based on trauma injury
- Congestive heart disease or ischemic heart disease, or significant arrhythmia as examples of active symptomatic heart disease
- Suicidal ideation and gestures necessitating suicidal precautions as part of treatment
- Blood alcohol level 350 mg/dl with a diagnosis of alcohol abuse
- Blood alcohol level 400 mg/dl with diagnosis of alcohol dependence
- Active presentation of psychotic symptoms reflecting an emergent/urgent condition

Additional Substance Use Disorder Services

Medicaid covers additional substance use disorder services through capitation payments to the PIHPs/CMHSPs. (Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter of this manual for coverage details and authorization requirements.)
SECTION 15 – PRIVATE DUTY NURSING

Refer to the Private Duty Nursing Chapter of this manual for additional information.
Section 16 – Outpatient Therapy

Refer to the Outpatient Therapy Chapter of this manual for additional information.
SECTION 17 – TELEMEDICINE

Telemedicine is the use of telecommunication technology to connect a patient with a health care professional in a different location. MDHHS requires a real time interactive system at both the originating and distant site, allowing instantaneous interaction between the patient and health care professional via the telecommunication system. Telemedicine should be used primarily when travel is prohibitive for the beneficiary or there is an imminent health risk justifying immediate medical need for services.

Providers must ensure the privacy of the beneficiary and the security of any information shared via telemedicine. The technology used must meet the needs for audio and visual compliance in accordance with current regulations and industry standards.

Telecommunication systems using store and forward technology, including asynchronous transmission of medical data or the use of robotics for remote access surgical procedures, are not included in this policy.

17.1 TELEMEDICINE SERVICES

The following services may be provided via telemedicine:

- ESRD-related services
- Behavior change intervention
- Behavioral Health and/or Substance Use Disorder Treatment
- Education Services, Telehealth
- Inpatient consultations
- Nursing facility subsequent care
- Office or other outpatient consultations
- Office or other outpatient services
- Psychiatric diagnostic procedures
- Subsequent hospital care
- Training service – Diabetes (Refer to the Diabetes Self-Management Education (DSME) Training Program subsection in the Hospital Chapter for specific program requirements)

Where face-to-face visits are required (such as ESRD and nursing facility related services), the telemedicine service may be used in addition to the required face-to-face visit, but cannot be used as a substitute. There must be at least one face-to-face hands-on visit (i.e., not via telemedicine) by a physician, nurse practitioner, or physician’s assistant per month to examine the vascular site for ESRD services. The initial visit for nursing facility services must be face-to-face.

Procedure code and modifier information is contained in the MDHHS Telemedicine Services Database available on the MDHHS website. (Refer to the Directory Appendix for website information.)
17.2 Authorization Requirements

There are no prior authorization requirements when providing telemedicine services for fee-for-service beneficiaries.

Authorization requirements for beneficiaries enrolled in Medicaid Health Plans (MHPs) may vary. Providers must check with individual MHPs for any authorization or coverage requirements.

17.3 Authorized Originating Sites

The originating site is the location of an eligible beneficiary at the time the service being furnished via a telecommunications system occurs.

The following are authorized as originating sites for telemedicine services:

- County mental health clinic or publicly funded mental health facility
- Federally Qualified Health Center (FQHC)
- Hospital (inpatient, outpatient, or critical access hospital)
- Office of a physician or other practitioner (including medical clinics)
- Hospital-based or CAH-based Renal Dialysis Centers (including satellites)
- Rural health clinic
- Skilled nursing facility
- Tribal Health Center (THC)

Information regarding billing for the originating site facility fee is contained in the Billing & Reimbursement for Institutional Providers and the Billing & Reimbursement for Professionals chapters. Providers at the originating site may bill services they provide on the same date as a service that is performed via telemedicine. The originating site provider is not limited to services listed on the Telemedicine Services database but must bill the medically necessary service they performed.

17.4 Distant Site

The location of the physician or practitioner providing the professional service via a telecommunications system is called the distant site. A medical professional is not required to present the beneficiary to the physician or practitioner at the distant site unless medically necessary. Providers at the distant site can only bill services listed in the Telemedicine Services database.

17.5 Authorized Practitioners [Change Made 7/1/18]

In compliance with the Michigan Insurance Code of 1956 (Act 218 of 1956), telemedicine services must be provided by a health care professional who is licensed, registered, or otherwise authorized to engage in his or her health care profession in the state where the patient is located.  (text added 7/1/18)

The physician or practitioner at the distant site who is licensed under State law to furnish a covered telemedicine service (as described in the Telemedicine Services subsection) may bill, and receive payment for, the service when it is delivered via a telecommunications system.
If providing services through the PIHP/CMHSP, the provider must have a contract with or be authorized by the appropriate entity.

In order to be reimbursed for services, distant site providers must be enrolled in Michigan Medicaid.

When providing services via telemedicine, providers can only bill for services listed on the Telemedicine Services database. Procedure code and modifier information is contained in the MDHHS Telemedicine Services Database available on the MDHHS website. (Refer to the Directory Appendix for website information.)
SECTION 18 - CERTIFIED REGISTERED NURSE ANESTHETIST

Medicaid covers anesthesia services provided by a Medicaid enrolled Certified Registered Nurse Anesthetist (CRNA). CRNA services are covered for the CRNA or for the entity with which the CRNA has an employment or contract relationship that provides for payment to be made to the entity. CRNAs must comply with Michigan scope of practice licensing laws and regulations.

If a rural hospital elects reasonable cost reimbursement for CRNA services under Medicare, the CRNA costs are included in the facility payments to the hospital and are not covered separately by Medicaid.

For specific coverage parameters, refer to the Anesthesia Services Section of this chapter.

To enroll as a Medicaid provider, a CRNA must meet all of the following requirements:

- be currently licensed in Michigan as a registered professional nurse;
- be certified by the State as a CRNA; and
- complete an on-line application through the CHAMPS Provider Enrollment subsystem.

(Refer to the Provider Enrollment Section of the General Information for Providers Chapter for additional enrollment information, and the Directory Appendix for contact information.)
SECTION 19 – PHYSICIAN’S ASSISTANT

Medicaid covers services provided by a physician’s assistant provided under the delegation and supervision of a physician licensed under part 170, part 175, or part 180 of Michigan Public Act 368 of 1978, as amended. The supervising physician must comply with the physician delegation and supervision requirements for utilizing physician’s assistants specified in Public Act 368 of 1978, as amended, and any related rules promulgated by the State of Michigan or its Departments.

To enroll as a Medicaid provider, physician assistants must complete an on-line application through CHAMPS and are to be enrolled as Rendering/Servicing-Only providers. Physician assistants are not eligible for direct Medicaid reimbursement. Payment for services rendered by a physician’s assistant will be made to the delegating/supervising physician, group or billing provider NPI. The supervising physician is responsible for the services performed by the physician’s assistant.

The physician’s assistant may provide direct patient care under the delegation and supervision of a physician at the medical care site where the physician regularly sees patients. Records must demonstrate that the physician’s assistant provided the services, and that the licensed physician is regularly available and provides medical care to beneficiaries at the site on a routine basis. When the supervising physician is not physically present on the premises, he must be continuously available to the physician’s assistant through direct communication such as telephone, radio, or telecommunication. This does not preclude licensed persons under the physician’s delegation and supervision from making calls or going on rounds to private homes, public institutions, hospitals, or other health care facilities as long as the care is a supplement to, and does not replace, the physician’s personal services.

(Refer to the Surgery – General Section of this chapter for information on a physician’s assistant functioning as an assistant at surgery.)
SECTION 20 – PODIATRIST

Medicaid covers the medically necessary services of a podiatrist. (Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.)

Podiatrists should refer to the appropriate sections of this chapter for specific information related to the coverage of specific services.

20.1 COPAYMENT

A copayment is required for each separately covered visit for beneficiaries age 21 and older. If more than one separately covered service is rendered on the same day, such as an office visit and laboratory services, only one copayment is required. If a procedure such as a surgery with a global period is rendered, only one copayment is required. Refer to the General Information for Providers Chapter for information about copayments. Current copayment amounts are listed on the MDHHS website. (Refer to the Directory Appendix for website information.)

20.2 CONSULTATIONS

Medicaid covers limited and intermediate level consultations if requested by a physician.

20.3 NURSING FACILITY SERVICES

Podiatry services provided to a beneficiary in a nursing facility are considered an ancillary service and require the written order of the beneficiary’s attending physician. All terms and conditions related to Medicaid covered and non-covered services, including PA and billing requirements, apply to services provided to beneficiaries in a nursing facility.
SECTION 21 – PHYSICAL THERAPIST [CHANGE MADE 4/1/18]

Medicaid only covers Medicare coinsurance and deductible amounts for services provided by enrolled physical therapists. A physician/physician assistant/nurse practitioner must prescribe physical therapy services.

To qualify for coverage, services must be provided in the physical therapist’s office. Services provided in the physician’s office are covered under the physician, and services provided in a nursing facility setting are covered under the long term care provider. A licensed physical therapist (PT) or a physical therapy assistant under the direct supervision of the physical therapist must provide services.

Refer to the Outpatient Therapy Chapter for additional therapy information. (text added 4/1/18)
SECTION 22 – CERTIFIED NURSE MIDWIFE

Medicaid covers services provided by enrolled certified nurse midwives (CNMs). (Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.)

CNM coverage includes the management of low risk and uncomplicated pregnancies and services to essentially normal women and newborns. Medically complicated pregnancies and services to beneficiaries with high-risk conditions MUST be referred to a physician. Services provided to high-risk women and women with medical complications are only covered under the delegation and supervision of a physician.

22.1 ENROLLMENT

To enroll as a Medicaid provider, a CNM must complete an on-line application through the CHAMPS Provider Enrollment subsystem. (Refer to the Provider Enrollment Section of the General Information for Providers Chapter for additional enrollment information, and the Directory Appendix for contact information.) A CNM must be able to demonstrate a safe mechanism for physician consultation, collaboration, and referral within an alliance agreement that includes mutually approved protocols.

22.2 FAMILY PLANNING

Medicaid covers family planning services provided by CNMs. (Refer to the Family Planning portion of the General Practice Section of this chapter for specific coverage information.) A CNM can only prescribe oral contraceptives under the delegation of a physician.

22.3 GYNECOLOGIC CARE

Medicaid covers gynecologic care provided by CNMs. CNMs may receive direct reimbursement for these services when completed within the CNM scope of practice guidelines.

22.4 LABORATORY TESTS

Laboratory testing ordered by the CNM is covered and must be documented in the beneficiary’s medical record by the ordering CNM regardless of where the tests are performed.

The following laboratory tests can be ordered by a CNM:

- Acetone and diacetic acid (ketone bodies), both qualitative and semi-quantitative
- Albumin, qualitative, semi-quantitative, and quantitative
- Antibody titer Rh system
- Blood typing, ABO, Rh(D), RBC antibody screening
- Blood count, RBC, WBC, hemoglobin, hematocrit, indices (MCV, MCH, MCHC)
- Culture, presumptive screening, for Neisseria, Gonorrhea, Candida, Hemophilus, or beta hemolytic Streptococci group A, etc.
- Culture, urine, definitive, with or without colony count
Cytopathology, vaginal and/or cervical smears
Glucose, qualitative, quantitative, timed specimen, tolerance
Hemoglobin, electrophoretic separation, qualitative
Hepatitis B test
HIV detection
Pregnancy test
Quantitative sediment analysis and quantitative protein, 12- or 24-hour urine specimen
Reticulocyte count, manual
Routine prenatal laboratory services (OB profile)
Rubella test, titer
Syphilis test (VDRL, RPR, etc.), qualitative
Sickle cell slide test
TB skin test, tine
Susceptibility (sensitivity) for aerobes
Treponema antibodies, fluorescent, absorbed
Complete urinalysis
Wet mount, smear, tissue, direct microscopic examination

The following laboratory tests are covered when performed by the CNM:

- Complete urinalysis
- Direct microscopic examination of a smear, wet mount, and/or tissue for fungi
- Hematocrit
- Hemoglobin
- Pregnancy testing

These tests are not covered for the CNM if rendered by an outside laboratory.

**22.5 Maternity Care**

Medicaid covers antepartum care, delivery, and postpartum care rendered by a CNM when provided in compliance with the specific coverage policies of this chapter.

| Antepartum Care | Coverage for antepartum care includes all usual antepartum services provided prior to delivery and referral to MIHP given the presence of psychosocial or nutritional factors that could adversely affect the pregnancy. |
If the provider initiated prenatal care within the first six months of pregnancy through the month of delivery, the appropriate antepartum care CPT code is covered. If the beneficiary is seen by several CNMs within a group or multiple CNMs supervised by the same physician or physician group, the antepartum care package is covered. (Refer to the Maternity Care and Delivery Services Section of this chapter for details on coverage of antepartum care and when individual E/M services are covered.)

CNMs may perform and bill Medicaid for non-stress tests when this service is determined medically necessary and is part of routine care provided for uncomplicated pregnancies. CNMs may receive direct reimbursement for this service when completed within the CNM scope of practice guidelines.

### Delivery

Deliveries performed by a CNM are covered in a licensed setting only. Home deliveries and services associated with these deliveries are not covered. Coverage of the delivery includes monitoring, vaginal delivery, and resuscitation of the newborn infant when necessary.

### Post-partum Care

Medicaid covers post-partum office visits following the delivery. Routine post-partum hospital care for the mother is covered as a part of the delivery. Routine care of the newborn in the hospital is covered for the provider who examines and provides the total hospital care of the newborn regardless of whether he performed the delivery. (Refer to the Services to Newborns subsection in this chapter for additional coverage information.)

### 22.6 Office Visits

Visits not directly related to antepartum care or follow-up to a delivery, such as family planning visits, are covered under the appropriate office visit procedure code. (Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters. Refer to the Evaluation and Management Services Section of this chapter for specific coverage information related to office visits.)

### 22.7 Pharmacy

Pharmaceuticals can only be ordered by a CNM under the delegation of a physician. The pharmaceutical must be provided by an enrolled pharmacy or, if appropriate, by an enrolled Family Planning Clinic (FPC).
SECTION 23 - NURSE PRACTITIONER

23.1 GENERAL INFORMATION

Medicaid covers the services of a nurse practitioner (NP) when they are performed while working in collaboration with a physician. Medicaid covers NP services only if:

- the services would be covered if furnished by a physician;
- the services are not otherwise excluded from coverage; and,
- the NP is legally authorized to perform the services under state law.

NP services are subject to the limitations that apply to physician services. Certain services, such as long-term care facility visits, consultations, and initial hospital care, may be restricted to physicians by program policy or federal and state statues and may not be covered for NPs.

Professional services are only covered when the NP has personally performed the services and no facility or other provider charges, or is paid, any amount for the furnishing of the professional service. Services provided jointly by an NP and the supervising physician are covered for only one practitioner.

Determination of the medical necessity and appropriateness of services is the responsibility of the NP/physician based on the terms of their collaborative agreement.

23.2 ENROLLMENT OF NURSE PRACTITIONERS

Nurse practitioners who render services to Medicaid beneficiaries must be enrolled providers. In order for an NP to enroll, he/she must enroll as either a Rendering/Servicing-Only Provider or an Individual/Sole Provider and:

- meet all state qualifications for nurse practitioners;
- have an ambulatory based practice;
- attest to the type of nurse practice engaged in, such as pediatric, family, geriatric, adult, etc.; and,
- if engaged in family or pediatric nurse practice, continue to provide proof of certification as a family nurse practitioner or a pediatric nurse practitioner by the appropriate accepted national credentialing body. (Refer to Michigan Rule 338.10404 [3].)

23.2.A. RENDERING/ SERVICING-ONLY NURSE PRACTITIONERS

A physician-employed NP who renders services only under the physician's delegation and supervision under an employment relationship or agreement is required to be an enrolled provider and uniquely identified on claims for services. He/she may enroll as a Rendering/Servicing-Only Provider, and payment for these services will be made to the employing, supervising physician or physician group.
23.2.B. INDIVIDUAL/SOLE PROVIDER NURSE PRACTITIONERS

In order for an NP to enroll and receive direct reimbursement as an Individual/Sole Provider, he/she must comply with the following requirements:

- provide services according to the terms of a written collaborative practice agreement in place with a physician. (Refer to the Collaborative Practice Agreement subsection for additional information.);
- complete the appropriate enrollment forms and a Nurse Practitioner/Physician Agreement (DCH-1575). (A copy of the form is available on the MDHHS website. Refer to the Directory Appendix for website information.); and
- once enrolled, the individual/sole provider NP may submit claims to MDHHS directly if the beneficiary is in FFS Medicaid. For beneficiaries enrolled in a MHP, the NP must negotiate provider terms and payment arrangements with each individual MHP.

23.3 COLLABORATIVE PRACTICE AGREEMENT

This is a formal document to be completed by Individual/Sole Provider NPs seeking direct reimbursement. It describes terms under which the NP and the physician deliver covered medical services. It is mutually developed or approved as satisfactory to both professionals involved and describes the types of services to be provided and any criteria for referral and consultation. This agreement must be available to MDHHS upon request. Services must be delivered within each practitioner's scope of practice as allowed by federal regulations and state law.

The collaborative practice agreement must be reviewed at least annually and updated as necessary. The NP must notify MDHHS if the agreement is dissolved so the NP's enrollment with Medicaid can be terminated. Medicaid only covers NP services provided within the provisions of the agreement.
SECTION 24 – ANESTHESIOLOGIST ASSISTANT

Medicaid covers anesthesia services provided by qualified anesthesiologist assistants (AAs). AA services are covered for the AA or for the entity with which the AA has an employment or contract relationship that provides for payment to be made to the entity.

For specific coverage parameters, refer to the Anesthesia Services section of this chapter.

To enroll as a Medicaid provider, an AA must meet all of the following requirements:

- Works under the delegation and direction of a Medicaid enrolled anesthesiologist.
- Is in compliance with all applicable requirements of State law.
- Is a graduate of a medical (MD or DO) school-based anesthesiologist assistant education program that:
  - Is accredited by the Committee on Allied Health Education and Accreditation; and
  - Includes approximately two years of specialized basic science and clinical education in anesthesia at a level that builds on a premedical undergraduate science background.
- Is currently certified by the National Commission for Certification of Anesthesiologist Assistants.
PRACTITIONER REIMBURSEMENT APPENDIX

SECTION 1 - REIMBURSEMENT METHODOLOGY

1.1 PRACTITIONER FEE SCREENS

Practitioner payment rates are established by MDHHS as a fee screen for each procedure. The Medicare prevailing fees, the Resource Based Relative Value Scale (RBRVS) and other relative value information, other state Medicaid fee screens, and providers' charges may be utilized as guidelines or references in determining the maximum fee screens for individual procedures. The Practitioner fee schedule is updated annually following the CMS January release of the RBRVS. Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.

Any rate discrepancies will be resolved by using the policy language describing reimbursement methodology for the established fee schedules.

1.2 EMERGENCY DEPARTMENT SERVICES

Physician services provided in the ED are covered as individual services. Critical care services are covered according to the CPT/HCPCS definitions and coding conventions for critical care. If critical care is required for a beneficiary in the ED, then only the critical care codes are covered. ED E/M or visit codes are not covered on the same day as critical care for the same provider.

When a beneficiary is seen in the ED, the appropriate level of ED E/M service is covered unless another E/M service is more appropriate (e.g., observation care, initial inpatient hospital care, or critical care). The ED E/M service which includes the medical screening exam is covered without regard to whether the medical screening results in the medical condition being deemed an emergency or not. The results of the medical screening examination, along with any medically necessary appropriate diagnostic services, determine if further treatment must be provided. If the attending physician determines that an emergency medical condition does exist, all subsequent medically appropriate services to stabilize the patient must be provided and are covered in addition to the ED E/M service. CPT/HCPCS coding conventions and Medicaid guidelines must be followed.

The medical record must support the need for the type and extent of diagnostic services performed based on the presenting symptoms of the beneficiary. The ED physician's review of x-rays and EKGs performed on the beneficiary are covered as a part of the E/M service. Professional component services are covered only for the physician who prepares a complete, written report of the findings for the medical record. If a specialist in the field prepares this, then the ED physician's review of the findings does not meet the conditions for separate coverage of the service.

The ED E/M services provided by the attending physician, regardless of the level of the service, are covered using a two-tiered rate based on whether the beneficiary was released or admitted. If the beneficiary was released from the ED, a single rate is used as the fee screen. If the beneficiary was admitted to the hospital or transferred to another hospital from the ED, a higher single rate is used as the fee screen.
SECTION 2 – ENHANCED PRACTITIONER PAYMENTS

MDHHS makes payment adjustments for practitioner services payable under Medicaid Fee-For-Service (FFS) through entities identified in the Medicaid State Plan, Attachment 4.19-B, page 1a. (The Medicaid State Plan is available on the MDHHS website; refer to the Directory Appendix for website information.)

2.1 QUALIFYING PRACTITIONERS [CHANGE MADE 7/1/18]

Adjustments apply to both public and private practitioners and practitioner groups who are either employees of the public entities identified in the state plan, or are under contract with one or more of the public entities, (revised 7/1/18) and include the following:

- University medical and dental faculty, employed practitioners, and private practice groups with contractual arrangements with one or more of the above universities and provide services to Medicaid beneficiaries in a variety of settings.
- Hurley Hospital-employed or -contracted physicians, dentists, and other practitioners who provide services to Medicaid beneficiaries in a variety of settings.

Services eligible for the payment adjustments are billed under the federal employer identification number of the public entity or under the federal employer identification number of the practitioner/practitioner group.

Inpatient and outpatient services provided by the following practitioners, when not included in facility payments to the public entity, are included:

- Physicians (MD and DO)
- Ophthalmologists
- Oral-Maxillofacial Surgeons
- Dentists
- Podiatrists
- Physician Assistants
- Nurse Practitioners
- Certified Nurse Midwives
- Certified Registered Nurse Anesthetists
- Anesthesiologist Assistants
- Optometrists
2.2 PAYMENT ADJUSTMENT AMOUNT [CHANGES MADE 4/1/18]

The payment adjustment amount for services provided to Medicaid beneficiaries who do not have other insurance coverage will be the lesser of:

- The difference between the practitioner Medicaid fee-for-service fee screen and the practitioner’s customary charge; or,
- Up to 100% (revised 4/1/18) of the Average Commercial Rate for the service rendered.

The payment adjustment amount for services provided to Medicaid beneficiaries with other insurance coverage will be the lesser of:

- The difference between the total of the Medicaid, Medicare, and commercial insurance payments and the practitioner’s customary charge; or,
- The difference between the total of the Medicaid, Medicare, and commercial insurance payments and up to 100% (revised 4/1/18) of the Average Commercial Rate.

2.3 FINANCING THE PAYMENT ADJUSTMENTS

The public entities must certify to MDHHS that they will provide the non-federal share of the payment adjustments established by this policy. These public entities must also certify to MDHHS that the financial arrangements used to offset the non-federal share of these Medicaid payment adjustments do not violate Title XIX of the Social Security Act, §1903 Payment to States, Subsection (W) Prohibition on Use of Voluntary Contributions, and Limitation on Use of Provider-Specific Taxes to Obtain Federal Financial Participation Under Medicaid.

No additional state funds are available beyond the amount needed to pay designated providers up to the standard Medicaid fee screens for these services. The non-federal share of the Medicaid payment adjustments is supplied by the public entity through an intergovernmental transfer (IGT) to MDHHS.

2.4 PAYMENT ADJUSTMENT PROCESS

Upon receipt of the provider information from the public entity, MDHHS will generate a report which will include the federal employer identification numbers and utilization data for the providers affected by this policy for each covered period. The public entity must review the report and acknowledge the completeness and accuracy of the report. After receipt of this confirmation, MDHHS will make the payment adjustment. The payment adjustments will be made for the federal employer identification number used to bill Medicaid under the FFS program. The payment adjustments will be processed quarterly. Each quarterly payment adjustment will include a reconciliation that takes into account all claims submitted to MDHHS and paid after the prior Physician Adjustor payment quarter cut-off date.
SECTION 3 – PRIMARY CARE PRACTITIONER SERVICES INCENTIVE PAYMENT [CHANGE MADE 4/1/18]

For dates of service on and after January 1, 2015, MDHHS applies an increased payment rate to enrolled providers for primary care services delivered by a physician with a specialty designation of family medicine, general internal medicine, or pediatric medicine and, for dates of service on and after January 1, 2018, physicians with the specialty designation of general practice. The increase applies to a set of designated primary care services.

3.1 PROVIDER ELIGIBILITY [CHANGE MADE 4/1/18]

Physicians with primary specialty designations of family medicine, general internal medicine, pediatric medicine, and general practice may qualify as primary care practitioners for purposes of increased payment. Eligibility for this payment is limited to being board certified or board eligible in one of the three designated primary care specialties as recognized by the American Board of Medical Specialties, American Osteopathic Association, and the American Board of Physician Specialists. Primary care physicians may also be determined eligible by conducting a thorough review of the physician’s practice characteristics as identified through their billing history.

Physician practitioners whose CHAMPS Provider Enrollment profile information reflects that they provide specialty or subspecialty (e.g., cardiology, endocrinology, or oncology, etc.) services are not eligible for the adjusted payment. Providers with multiple subspecialties are also not eligible for the adjusted payment. Exceptions will be made for practitioners who have subspecialty practices in adolescent and geriatric medicine.

Before enhanced payments are made, MDHHS will verify that a practitioner meets the eligibility criteria which are identified as the following:

- **Board Certification:** A primary care physician who has designated their primary specialty in their CHAMPS enrollment file as one of the eligible specialties and has provided applicable Board certification information will be validated by MDHHS prior to any enhanced payment.

- **Board Eligible:** A primary care physician who has designated their primary specialty in their CHAMPS enrollment file as one of the eligible specialties and has provided applicable documentation to support board eligibility status is also eligible for the enhanced payment. MDHHS will recognize physicians as board eligible for the period of time as defined by the applicable medical board following completion of their medical residency training program in one of the defined specialties.

- **Review of Practice Characteristics:** For non-board certified or non-board eligible primary care physicians, MDHHS will review an enrolled practitioner’s billing history for the previous calendar year. At least 60 percent of the physician’s codes paid by Medicaid must be for the evaluation and management (E/M) codes specified in this policy, including the preventive medicine E/M codes. This review of practice characteristics will be done by MDHHS only for providers who have self-attested by designating in their CHAMPS enrollment file that their primary specialty is one of the eligible specialties.

- **Non-physician Practitioners:** Nurse practitioners (NPs) and physician assistants (PAs) who provide primary care services under the personal supervision of a physician who is one of the
designated primary care specialty types may be reimbursed at the enhanced rate. Claims submitted by NPs and PAs must include their own NPI as the rendering provider and the NPI of their supervising/delegating physician. If the NP’s or PA’s supervising/delegating physician has not been identified as an eligible provider for the primary care rate, as verified by CHAMPS enrollment, services performed by the NP or PA will not receive the enhanced rate.

Practitioners delivering primary care services at Federally Qualified Health Centers (FQHCs), Rural Health Clinics (RHCs) and Local Health Departments (LHDs) are not eligible for these enhanced payments. Practitioner services in these settings are reimbursed using a payment methodology designed to reimburse those providers at cost and are made on a facility basis, not specific to the physician’s services.

Practitioners who participate in the MDHHS Physician Adjustor Program are eligible for the primary care practitioner services incentive payment. For these participating providers, MDHHS calculates the Physician Adjustor Program payment adjustment consistent with the existing methodology.

Physicians with primary specialty designations of family medicine, general internal medicine, pediatric medicine, and general practice (revised per bulletin MSA 17-43) who are affiliated with Medicaid Health Plans (MHP) are eligible for the primary care practitioner rate increase as identified by their Primary Care Provider status within the MHP network.

### 3.2 Eligible Primary Care Services

Primary care practitioner services subject to the enhanced primary care rate are defined as Healthcare Common Procedure Coding System (HCPCS) codes:

- 99201 through 99215 for new and established patient office or outpatient evaluation and management (E/M) visits
- 99304 through 99318 for initial, subsequent, discharge and other nursing facility E/M services
- 99324 through 99337 for new and established patient domiciliary, rest home or custodial care E/M services
- 99341 through 99350 for new and established patient home E/M visits
- 99381 through 99397 for new and established patient preventive medicine services

### 3.3 Enhanced Rates for Primary Care

For primary care practitioners identified as eligible for the primary care rate, payment will be made on the qualified procedure codes as published in a separate fee schedule as published on the MDHHS website. The Primary Care Fee Schedule reflects rates that have been adjusted in compliance with funding levels established by state law. (Refer to the Directory Appendix for website information.)

SECTION 1 – GENERAL INFORMATION

This chapter applies to Independent and Agency Private Duty Nurses.

Private duty nursing (PDN) is a Medicaid benefit when provided in accordance with the policies and procedures outlined in this manual. Providers must adhere to all applicable coverage limitations, policies and procedures set forth in this manual.

PDN is covered for beneficiaries under age 21 who meet the medical criteria in this section. If the beneficiary is enrolled in or receiving case management services from the Habilitation Supports Waiver (the Community Mental Health Services Program) and over 21 years of age, that program authorizes the PDN services.

For a Medicaid beneficiary who is not receiving services from the Habilitation Supports Waiver (the Community Mental Health Services Program), the MDHHS Program Review Division (PRD) reviews the request for authorization and authorizes the services if the medical criteria and general eligibility requirements are met.

For beneficiaries 21 and older, PDN is a waiver service that may be covered for qualifying individuals enrolled in the Habilitation Supports Waiver or MI Choice Waiver. When PDN is provided as a waiver service, the waiver agent must be billed for the services.

Beneficiaries who are receiving PDN services through one Medicaid program cannot seek supplemental PDN hours from another Medicaid Program (i.e., Habilitation Supports Waiver, MI Choice Waiver).

1.1 DEFINITION OF PDN

Private Duty Nursing is defined as nursing services for beneficiaries who require more individual and continuous care, in contrast to part-time or intermittent care, than is available under the home health benefit. These services are provided by a registered nurse (RN), or licensed practical nurse (LPN) under the supervision of an RN, and must be ordered by the beneficiary’s physician. Beneficiaries requiring PDN must demonstrate a need for continuous skilled nursing services, rather than a need for intermittent skilled nursing, personal care, and/or Home Help services. The terms "continuous" and "skilled nursing" are further defined in the Medical Criteria subsection for beneficiaries under age 21.
### 1.2 Enrollment Requirements

**Medicaid Enrolled Nurse (RN/ LPN)**

To enroll as a Medicaid provider, the nurse must meet the following criteria:

- Be a Registered Nurse (RN) licensed to practice in Michigan; or a Licensed Practical Nurse (LPN) licensed to practice in Michigan working under the supervision of an RN. Supervision of a Medicaid-enrolled LPN must be by an RN who has at least one year of experience in any of the following areas: community health nursing, pediatric nursing, maternal and child health nursing, or a similar nursing practice. Medicaid requires an on-site (beneficiary's home) supervisory visit by the RN of the LPN at least once every two months. The Medicaid-enrolled LPN must maintain documentation that verifies who the supervising RN is, a copy of the RN's license and documentation that supports that the RN supervisory visits were rendered. Documentation of the supervisory visit as signed by the RN must be included in the medical record. The medical record must be complete enough to allow another professional to reconstruct what transpired during the supervisory visit.

- Cooperate with MDHHS in quality monitoring activities, beneficiary complaint resolution, and post-payment audit reviews. Medicaid-enrolled nurses must document complaints made by a beneficiary or the beneficiary's family regarding treatment or care that is (or fails to be) furnished, or regarding the lack of respect for the beneficiary's property, and must document both the existence of the complaint and the resolution of the complaint.

**Private Duty Nursing Agency**

To enroll as a Medicaid provider, the PDN agency must meet the following criteria:

- Be accredited by the Community Health Accreditation Program (CHAP) or the Accreditation Commission for Health Care (ACHC) as a PDN agency; or be accredited by The Joint Commission as a Home Health Agency; or be accredited by the Commission on Accreditation of Rehabilitation Facilities (CARF) as a Home and Community-Based Rehabilitation Program.

- If a PDN agency delivers services from more than one location (office), each location (office) must be accredited.

PDN agencies are not permitted to avoid the above accreditation requirements by individually enrolling RNs or LPNs in the Medicaid Program.

- Cooperate with MDHHS in quality monitoring activities, beneficiary complaint resolution, and post-payment audit reviews. Providers must document complaints made by a beneficiary or the beneficiary's family regarding treatment or care that is (or fails to be) furnished, or regarding the lack of respect for the beneficiary's property, and must document both the existence of the complaint and the resolution of the complaint.

### 1.3 Provision of Private Duty Nursing

PDN must be ordered by a physician and provided by a Medicaid enrolled private duty nursing agency, a Medicaid enrolled registered nurse (RN), or a Medicaid enrolled licensed practical nurse (LPN) who is working under the supervision of an RN (per Michigan Public Health Code). It is the responsibility of the LPN to secure the RN supervision.
Supervision of a Medicaid enrolled LPN must be by an RN who has at least one year of experience in any of the following areas:

- Community health nursing,
- Pediatric nursing,
- Maternal and child health nursing, or
- A similar nursing practice.

MDHHS requires an onsite supervisory visit by the supervising RN at least once every two months. The Medicaid enrolled LPN must maintain documentation that identifies the supervising RN.

If a beneficiary's services are performed exclusively by LPNs, the supervisory RN is responsible for completing a physical assessment for each beneficiary the LPN is caring for, and is required to participate in the development of the beneficiary's plan of care (POC). The above assessments and supervisory visits are not covered by Medicaid, including when provided by a home health agency.

PDN is not covered when rendered in a hospital or nursing facility, including an intermediate care facility for individuals with intellectual disabilities (ICF/IID) or licensed adult foster care facility (AFC).

PDN is not covered when provided by an RN or LPN who is the beneficiary's spouse, legally responsible relative, stepparent, adoptive parent, legal guardian, or foster parent.

When more than one agency is authorized to provide PDN for a beneficiary, the hours rendered by each must be reported to the PRD on a monthly basis in order to permit the adjustment of authorized hours as necessary between the providers. Payment cannot be made until all utilized hours are reported. The primary agency on the case (the first agency involved) is responsible for contacting the other PDN provider(s) caring for the beneficiary to obtain the actual number of hours rendered during the preceding month, and must fax the total hours provided by each to the PRD. The authorization letter will detail all PDN providers that are caring for a beneficiary during the authorization period.

1.4 PRIOR AUTHORIZATION

PDN services must be authorized by the PRD, before services are provided. (Refer to the Directory Appendix for contact information.) PDN services are authorized and billed in 15-minute incremental units (1 unit = 15 minutes). Prior authorization of a particular PDN provider to render services considers the following factors:

- Available third party resources.
- Beneficiary/family choice.
- Beneficiary's medical needs and age.
- The knowledge and appropriate nursing skills needed for the specific case.
- The understanding of the concept and delivery of home care and linkages to relevant services and health care organizations in the area served.

The Private Duty Nursing Prior Authorization – Request for Services form (MSA-0732) must be submitted when requesting PDN for persons with Medicaid coverage before services can begin and at regular
intervals thereafter if continued services are determined to be necessary. A copy of the form is provided in the Forms Appendix and is also available on the MDHHS website. (Refer to the Directory Appendix for website information.) This form is not to be used for beneficiaries enrolled in the MI Choice Waiver. Private Duty Nursing is not a benefit under CSHCS. Individuals with CSHCS coverage may be eligible for PDN under Medicaid.

The MSA-0732 must be submitted every time services are requested for the following situations:

- for initial services when the beneficiary has never received PDN services under Medicaid, such as following a hospitalization or when there is an increase in severity of an acute or chronic condition;
- for continuation of services beyond the end date of the current authorization period (renewal);
- for an increase in services; or
- for a decrease in services.

Following receipt and review of the MSA-0732 and the required documentation by the PRD, a notice is sent to the PDN provider and beneficiary or primary caregiver, either approving or denying services, or requesting additional information. The provider must maintain this notice in the beneficiary's medical record. For services that are approved, the Notice of Authorization will contain the prior authorization number and approved authorization dates. It is important to include this PA number on every claim and in all other communications to the PRD.

If a beneficiary receiving PDN continues to require the services after the initial authorization period, a new MSA-0732 must be submitted along with the required documentation supporting the continued need for PDN. This request must be received by the PRD no less than 15 business days prior to the end of the current authorization period. Failure to do so may result in a delay of authorization for continued services which, in turn, may result in delayed or no payment for services rendered without authorization. The length of each subsequent authorization period will be determined by the PRD and will be specific to each beneficiary based on several factors, including the beneficiary’s medical needs and family situation.

MDHHS will not reimburse PDN providers for services that have not been prior authorized. All forms and documentation must be completed according to the procedures provided in this chapter. If information is not provided according to policy (which includes signatures and correct information on the MSA-0732, POC and nursing assessment), requests will be returned to the provider. Authorization cannot be granted until all completed documentation is provided to MDHHS. Corrected submissions will be processed as a new request for PDN authorization and no backdating will occur.

If during an authorization period a beneficiary’s condition changes warranting an increase or decrease in the number of approved units or a discontinuation of services, the provider must report the change to the PRD. (Refer to the Directory Appendix for contact information.) It is important that the provider report all changes as soon as they occur, as well as properly updating the POC. The request to increase or decrease units must be accompanied by an updated and signed POC; and documentation from the attending physician addressing the medical need if the request is for an increase in PDN units.

Often the request to begin services will be submitted by a PDN agency or individual PDN; however, a person other than the PDN provider (such as the hospital discharge planner, CSHCS case manager, physician, or physician’s staff person) may submit the MSA-0732. When this is the case, the person...
submitting the request must do so in consultation with the PDN agency or individual PDN who will be assuming responsibility for the care of the beneficiary.

If services are requested for more than one beneficiary in the home, a separate MSA-0732 must be completed for each beneficiary.

When a parent/guardian requests a transfer of care from one PDN provider to another, a completed MSA-0732 must be submitted to the PRD along with signed and dated documentation from the parent/guardian indicating that they are requesting a change in providers. The balance of hours authorized to a previous PDN provider will not be automatically transferred to a new provider. The new PDN provider is responsible for submitting the MSA-0732 to the PRD along with documentation from the parent/guardian requesting a new provider.

The PA number is for private duty nursing only. Any CMHSP prior authorized respite services must be billed to the authorizing CMHSP.

Other services provided in the home by community-based programs may affect the total care needs and the amount of PDN authorized. These other services must be disclosed on the MSA-0732 and documented in the POC. Although the amount of PDN authorized considers the beneficiary’s medical needs and family circumstances, community-based services provided in the home are also part of this assessment. Disclosure is necessary to prevent duplication of services to allow for an accurate calculation of authorized PDN hours. Providers are advised that failure to disclose all community resources in the home may be cause for recoupment of funds.

1.4.A. DOCUMENTATION REQUIREMENTS

The following documentation is required for all PA requests for PDN services and must accompany the MSA-0732:

- Most recent signed and dated nursing assessment, including a summary of the beneficiary’s current status compared to their status during the previous authorization period, completed by a registered nurse;
- Nursing notes for two (2) four-day periods, including one four-day period that reflects the most current medically stable period and another four-day period that reflects the most recent acute episode of illness related to the PDN qualifying diagnosis/condition;
- Most recent updated POC signed and dated by the ordering/managing physician, RN, and the beneficiary’s parent/guardian. The POC must support the skilled nursing services requested, and contain dates inclusive of the requested authorization period.

The POC must include:

- Name of beneficiary and Medicaid ID number
- Diagnosis(es)/presenting symptom(s)/condition(s)
- Name, address, and telephone number of the ordering/managing physician
- Frequency and duration of skilled nursing visits, and the frequency and types of skilled interventions, assessments, and judgments that pertain to and support the PDN services to be provided and billed
Identification of technology-based medical equipment, assistive devices (and/or appliances), durable medical equipment, and supplies

Other services being provided in the home by community-based entities that may affect the total care needs must be documented.

List of medications and pharmaceuticals (prescribed and over-the-counter)

Statement of family strengths, capabilities, and support systems available for assisting in the provision of the PDN benefit (for renewals, submit changes only)

- If the beneficiary was hospitalized during the last authorization period, include documentation related to the PDN qualifying diagnosis/condition, i.e., all hospital discharge summaries, history and physical examination, social worker notes/assessment, consultation reports (pulmonary; ears, nose and throat [ENT]; ventilator clinic; sleep study; etc.), and emergency department reports (if emergency services were rendered during the last authorization period).

- Teaching records pertaining to the education of parents/caregivers on the child’s care.

- Other documentation as requested by MDHHS.

1.4.B. BENEFICIARY ELIGIBILITY

Approval of the MSA-0732 confirms that the service is authorized for the beneficiary. The approval does not guarantee that the beneficiary is eligible for Medicaid. If the beneficiary is not eligible on the date of service, MDHHS will not reimburse the provider for services provided and billed. To assure payment, the provider must verify beneficiary eligibility monthly at a minimum.

1.4.C. RETROACTIVE PRIOR AUTHORIZATION

Services provided before PA is requested will not be covered unless the beneficiary was not Medicaid eligible on the date of service but became eligible retroactively. If the MDHHS eligibility information does not demonstrate retroactive eligibility, then the request for retroactive PA will be denied.

1.5 OTHER INSURANCE

It is the responsibility of the family, private duty nursing agency, RN or LPN to assess, investigate and exhaust all commercial insurance for the beneficiary prior to billing Medicaid. A private duty nursing agency, RN, or LPN should not accept any Medicaid PDN case until it has been determined what, if any, commercial insurance a beneficiary may have.

For any Medicaid case accepted in which the beneficiary has other insurance, the provider must first follow the rules of the other insurance. Such rules may include obtaining a physician’s order, obtaining prior authorization, and being a participating provider with the other insurance carrier. Failure to follow the rules of the other insurance may result in nonpayment from Medicaid.

If a beneficiary’s commercial insurance does not cover PDN, the PDN agency, RN or LPN must inform the PRD prior to billing MDHHS. (Refer to the Directory Appendix for contact information.) A copy of the letter of explanation or explanation of benefits (EOB) must be kept in the beneficiary’s medical record.
Once it has been established that the commercial insurance does not cover PDN, a letter of explanation or EOB is valid as long as the insurance coverage remains unchanged. On an annual basis, the policyholder and provider should confirm with the commercial insurance that PDN coverage has not changed.

(Refer to the Coordination of Benefits Chapter of this manual for additional information.)

1.6 GENERAL ELIGIBILITY REQUIREMENTS

The beneficiary is eligible for PDN coverage when all of the following requirements are met:

 The beneficiary is eligible for Medicaid in the home/community setting (i.e., in the noninstitutional setting).
 The beneficiary is under the age of 21 and meets the medical criteria for PDN.
 PDN is appropriate, considering the beneficiary’s health and medical care needs.
 PDN can be provided safely in the home setting.
 The beneficiary, his family (or guardian), the beneficiary’s physician, the Medicaid case manager, and RN (i.e., from the PDN agency or the Medicaid enrolled RN, or the supervising RN for the Medicaid enrolled LPN) have collaborated and developed an integrated POC that identifies and addresses the beneficiary’s need for PDN. The PDN must be under the direction of the beneficiary’s physician; the physician must prescribe/order the services. The POC must be signed and dated by the beneficiary’s physician, RN (as described above), and by the beneficiary or beneficiary’s parent/guardian. The POC must be updated at least annually or more frequently as needed based on the beneficiary’s medical needs.

1.7 BENEFIT LIMITATIONS

The purpose of the PDN benefit is to assist the beneficiary with medical care, enabling the beneficiary to remain in their home. PDN is intended as a transitional benefit to support and teach family members to function as independently as possible. Authorized hours will be modified as the beneficiary's condition and living situation stabilizes or changes. A decrease in hours will occur, for example, after a child has been weaned from a ventilator or after a long term tracheostomy no longer requires frequent suctioning, etc. The benefit is not intended to supplant the caregiving responsibility of parents, guardians, or other responsible parties (e.g., foster parents). There must be a primary caregiver (i.e., parent, guardian, significant other adult) who resides with a beneficiary under the age of 18, and the caregiver must provide a monthly average of a minimum of eight hours of care during a typical 24-hour period. The calculation of the number of units authorized per month includes eight hours or more of care that will be provided by the caregiver during a 24-hour period, which are then averaged across the time authorized for the month. The caregiver has the flexibility to use the monthly-authorized units as needed during the month. Substantial alterations to the scheduled allotment of daily PDN hours due to family choice (i.e., vacations) unrelated to medical need or emergent circumstances require advance notice to the PRD. The remaining balance of authorized hours will not be increased to cover this type of utilization. Authorized time cannot be carried over from one authorization period to another.

The time a beneficiary is under the supervision of another entity or individual (e.g., in school, in day/child care, in work program) cannot be used to meet the eight hours of obligated care as discussed above, nor can the eight hours of care requirement for beneficiaries under age 18 be met by other public funded
programs (e.g., MDHHS Home Help Program) or other resources for hourly care (e.g., private health insurance, trusts, bequests, private pay).

PDN providers are encouraged to work with families to assist in developing a backup plan for care of their child in the event that a PDN shift is delayed or cancelled, and the parent/guardian is unable to provide care. The parent/guardian is expected to arrange backup caregivers that they will notify, and the parent/guardian remains responsible for contacting these backup caregivers when necessary.

1.8 SERVICE LOG

If PDN is prior approved and care is initiated, a detailed log for each date of service must be maintained. The service log must be beneficiary specific, with the beneficiary's name and birth date in the header portion of the document and must clearly identify the specific time worked by each PDN in the home and for each date of service. In cases where the nurse is caring for two or more beneficiaries in the same home, a separate service log for each beneficiary must be maintained. This log must be kept in the beneficiary's record and may be documented in electronic or paper format. The medical record itself or nursing flow sheets containing other information are not considered a service log for the purposes of this policy. Failure to maintain a log or to submit this information to MDHHS upon request may result in recoupment of PDN reimbursement.

The following service log provides an example of the required fields.

<table>
<thead>
<tr>
<th>Name</th>
<th>Date of Service</th>
<th>Start Time</th>
<th>Stop Time</th>
<th>Units</th>
<th>Nurse Signature &amp; Date</th>
<th>Parent/ Caregiver Signature &amp; Date</th>

<td></td>
</tr>
</tbody>
</table>

PDN agencies should refer to the Billing & Reimbursement for Institutional Providers chapter for instructions on claim completion and requirements for the processing of claims. Medicaid-enrolled Registered Nurses (RN) or Licensed Practical Nurses (LPN) should refer to the Billing & Reimbursement for Professionals Chapter for instructions on claim completion and requirements for the processing of claims.

Each signature must be accompanied by a date. The date of the nurse's signature must be the same as the date of service. The date of the parent/caregiver signature should be within one week of the date of service. A claim must not be submitted before the service log is completed for those dates of service.

1.9 CLINICAL RECORD

In addition to the Service Log, the provider must maintain clinical records as detailed in the General Information for Providers Chapter of this manual. The clinical record must be sufficiently documented to
allow another professional to reconstruct what transpired during each hour of nursing service and billed to Medicaid in 15-minute incremental units.

1.10 **PDN IN CONJUNCTION WITH HOME HELP OR PERSONAL CARE SERVICES**

If the beneficiary receiving PDN demonstrates a need for personal care or Home Help services in addition to PDN, there must be coordination between the delivery of personal care or Home Help services and the PDN services, as well as documentation in the POC to verify there is no duplication of services.

1.11 **HOLIDAYS**

MDHHS allows additional reimbursement for holidays. Currently recognized holidays are: New Year’s Day, Easter, Memorial Day, July 4th, Labor Day, Thanksgiving and Christmas Day.

A holiday begins at 12:00 a.m. and ends at 12:00 midnight of that holiday day.

1.12 **MILEAGE**

Staff mileage to the beneficiary’s home is covered as a part of the PDN service and may not be billed separately.

1.13 **CARING FOR MORE THAN ONE PATIENT AT A TIME**

For ratios of more than two patients per nurse, the provider must contact the entity authorizing the beneficiary’s PDN services: Children’s Waiver (the Community Mental Health Services Program), Habilitation Supports Waiver (the Community Mental Health Services Program), Home and Community-Based Services Waiver for the Elderly and Disabled (MI Choice Waiver) or the PRD. These ratios are considered exceptional cases and require prior approval.

When two Medicaid beneficiaries less than 21 years of age reside in the same home and require PDN services, one nurse will be authorized to provide care for both individuals. (The PDN rate is adjusted to accommodate this ratio.) In the event of an exceptional and emergent circumstance, a ratio of 1:1 nursing will be authorized for a limited period of time when two PDN beneficiaries reside in the same home. During this time period, PDN services must be reassessed on at least a monthly basis, documented in the POC, and submitted to the PDN authorizing entity to demonstrate the need for continuation of 1:1 nursing services. The POC must document efforts being made to wean the beneficiaries from 1:1 care.

A PDN authorized to provide services to two children at the same location may find that, at times, only one child is present to receive services. This may occur when one child is in school, at a medical appointment, hospitalized, or on a family outing. The beneficiary record must document why only one child was present to receive services, as well as the beginning and ending time of the services. (Refer to the appropriate Billing and Reimbursement chapter for billing instructions.)

1.14 **BILLING FOR PRIVATE DUTY NURSING**

For billing instructions, nurses should refer to the Billing & Reimbursement for Professionals Chapter of this manual and agencies should refer to the Billing & Reimbursement for Institutional Providers Chapter of this manual.
SECTION 2 – CARE REQUIREMENTS

2.1 PLAN OF CARE

A written plan of care (POC) guides all services provided to the beneficiary by the PDN provider. The POC identifies and addresses the beneficiary's need for PDN. The POC and the process for developing it reflect the beneficiary's and family's basic rights of self-determination and autonomy.

- Family members and the beneficiary (as appropriate to his maturity) participate in developing the POC. They are provided with accurate information and support appropriate to informed decision-making. They must give informed consent for the planned services by signing and dating the POC annually and when updating the POC as needed based on the beneficiary's medical needs.
- Beneficiary/family strengths, including cultural and ethnic identity, are respected and utilized in the delivery of care. Services delivered in the home accommodate beneficiary/family life activities.
- The plan includes goals directed toward increasing beneficiary/family capability, effectiveness, and control.
- The plan includes compensatory services to support the growth and developmental potential of each beneficiary, given his disability or illness.
- Appointments are coordinated and services are scheduled with the goals of minimizing inconvenience to the beneficiary/family, and of facilitating the family's participation in the beneficiary's care.
- If the services are provided by LPNs, the POC must identify the frequency of the supervisory RN visits.

The written POC must be retained in the beneficiary's medical record.

2.2 SUSPECTED ABUSE/NEGLECT

If there is reasonable cause to suspect that a beneficiary may be in danger of abuse, neglect, exploitation, cruelty, or other hazards, the PDN must report the suspected abuse to the Adult or Child Protective Services Unit of the local MDHHS office. (Refer to the General Information for Providers Chapter of this manual for additional information.)

2.3 MEDICAL CRITERIA

To qualify for PDN, the beneficiary must meet the medical criteria of either I and III below or II and III below:
### Medical Criteria I

**The beneficiary is dependent daily on technology-based medical equipment to sustain life.** "Dependent daily on technology-based medical equipment" means:

- Mechanical ventilation four or more hours per day, or assisted respiration does not automatically include ventilation through Bi-level Positive Airway Pressure (Bi-PAP) or Continuous Positive Airway Pressure (CPAP). Use of these devices to satisfy this criteria will be evaluated on a case-by-case basis; or
- Oral or tracheostomy suctioning 8 or more times in a 24-hour period; or
- Nasogastric tube feedings or medications when removal and insertion of the nasogastric tube is required, associated with complex medical problems or medical fragility; or
- Total parenteral nutrition delivered via a central line, associated with complex medical problems or medical fragility; or
- Continuous oxygen administration, in combination with a pulse oximeter and a documented need for observations and adjustments in the rate of oxygen administration.

### Medical Criteria II

**Frequent episodes of medical instability within the past three to six months,** requiring skilled nursing assessments, judgments or interventions as described in III below, due to a substantiated progressively debilitating physical disorder.

- "Frequent" means at least 12 episodes of medical instability related to the progressively debilitating physical disorder within the past six months, or at least six episodes of medical instability related to the progressively debilitating physical disorder within the past three months;
- "Medical instability" means emergency medical treatment in a hospital emergency room or inpatient hospitalization related to the underlying progressively debilitating physical disorder;
- "Emergency medical treatment" means covered inpatient and outpatient services that are furnished by a provider who is qualified to furnish such services and which are needed to evaluate or stabilize an emergency medical condition. "Emergency medical condition" means a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain) such that a prudent layperson who possesses an average knowledge of health and medicine could reasonably expect the absence of immediate medical attention to place the health of the individual in serious jeopardy, serious impairment to bodily functions, or serious dysfunction of any bodily organ or part.
- "Progressively debilitating physical disorder" means an illness, diagnosis, or syndrome that results in increasing loss of function due to a physical disease process, and that has progressed to the point that continuous skilled nursing care (as defined in III below) is required; and
- "Substantiated" means documented in the clinical/medical record, including the nursing notes.

For beneficiaries described in II, the requirement for frequent episodes of medical instability is applicable only to the initial determination of medical necessity for PDN. Determination of continuing eligibility for PDN for beneficiaries defined in II is based on the original need for skilled nursing assessments, judgments, or interventions as described in III below.
Medical Criteria III

The beneficiary requires continuous skilled nursing care on a daily basis during the time when a licensed nurse is paid to provide services.

- "Continuous" means at least once every three hours throughout a 24-hour period, and/or when delayed interventions may result in further deterioration of health status, in loss of function or death, in acceleration of the chronic condition, or in a preventable acute episode.
- Equipment needs alone do not create the need for skilled nursing services.
- "Skilled nursing" means assessments, judgments, interventions, and evaluations of interventions requiring the education, training, and experience of a licensed nurse. Skilled nursing care includes, but is not limited to, performing assessments to determine the basis for acting or a need for action; monitoring fluid and electrolyte balance; suctioning of the airway; injections; indwelling central venous catheter care; managing mechanical ventilation; oxygen administration and evaluation; and tracheostomy care.

2.4 Determining Intensity of Care and Maximum Amount of PDN

As part of determining the maximum amount of PDN a beneficiary is eligible for, his Intensity of Care category must be determined. This is a clinical judgment based on the following factors:

- The beneficiary's medical condition;
- The type and frequency of needed nursing assessments, judgments and interventions; and
- The impact of delayed nursing interventions.

Equipment needs alone do not determine intensity of care. Other aspects of care (e.g., administering medications) are important when developing a plan for meeting the overall needs of the beneficiary, but do not determine the number of hours of nursing for which the beneficiary is eligible.

Medicaid uses the "Decision Guide for Establishing Maximum Amount of Private Duty Nursing to be Authorized on a Daily Basis" (below) to establish the amount of PDN that is approved. The Decision Guide is used to determine the appropriate range of nursing hours (prior authorized and billed in 15-minute increments) that can be authorized under the Medicaid PDN benefit and defines the "benefit
limitation" for individual beneficiaries. The Decision Guide is used by the authorizing entity after it has determined the beneficiary meets both general eligibility requirements and medical criteria as stated above. The amount of PDN (i.e., the time) that can be authorized for a beneficiary is based on several factors, including the beneficiary's care needs which establish medical necessity for PDN, the beneficiary's and family's circumstances, and other resources for daily care (e.g., private health insurance, trusts, bequests, private pay). To illustrate, the number of hours covered by private health insurance is subtracted from the hours approved under Medicaid PDN. These factors are incorporated into the Decision Guide. The higher number in the range is considered the maximum number of hours that can be authorized. Except in emergency circumstances, Medicaid does not approve more than the maximum hours indicated in the guide.

Only those factors that influence the maximum number of hours that can be authorized are included on this decision matrix. Other factors (e.g., additional dependent children, additional children with special needs, and required nighttime interventions) that impact the caregiver's availability to provide care should be identified during an assessment of service needs. These factors have implications for service planning and should be considered when determining the actual number of hours (within the range) to authorize.

<tr>
<td>Beneficiary attends school 25 or more hours per week, on average</td>
<td>Maximum of 6 hours per day</td>
<td>Maximum of 8 hours per day</td>
</tr>
</tbody>
</table>

* Factor III limits the maximum number of hours which can be authorized for a beneficiary:
  - Of any age in a center-based school program for more than 25 hours per week; or
  - Age six and older for whom there is no medical justification for a homebound school program.

In both cases, the lesser of the maximum "allowable" for Factors I and II, or the maximum specified for Factor III, applies.
When using the Decision Guide, the following definitions apply:

- **“Caregiver“**: legally responsible person (e.g., birth parents, adoptive parents, spouses), paid foster parents, guardian or other adults who are not legally responsible or paid to provide care but who choose to participate in providing care.
- **"Full-time (F/T)“**: working at least 30 hours per week for wages/salary, or attending school at least 30 hours per week.
- **"Part-time (P/T)“**: working at least 15 hours per week for wages/salary, or attending school at least 15 hours per week.
- **“Significant“ health issues**: one or more primary caregiver(s) has a health or emotional condition that prevents the caregiver from providing care to the beneficiary (e.g., beneficiary weighs 70 pounds and has no mobility and the primary caregiver just had back surgery and is in a full-body cast).
- **“Some“ health issues**: one or more primary caregiver(s) has a health or emotional condition, as documented by the caregiver’s treating physician, that interferes with, but does not prevent, provision of care (e.g., caregiver has lupus, alcoholism, depression, back pain when lifting, lifting restrictions, etc.).
- **“School“ attendance**: The average number of hours of school attendance per week is used to determine the maximum number of hours that can be authorized for the individual of school age. The average number of hours is determined by adding the number of hours in school plus transportation time. Authorization of PDN hours will not automatically be increased during breaks from school (vacations) or adjusted beyond the limits of factors I and II.

The Local School District (LSD) or Intermediate School District (ISD) is responsible for providing such "health and related services" as necessary for the student to participate in his education program. Unless medically contraindicated, individuals of school age should attend school. Factor III applies when determining the maximum number of hours to be authorized for an individual of school age. The Medicaid PDN benefit cannot be used to replace the LSD’s or ISD’s responsibility for services (either during transportation to/from school or during participation in the school program) or when the child would typically be in school but for the parent’s choice to home-school the child.

### 2.5 Exception Process

Because each beneficiary and his family are unique and because special circumstances arise, it is important to maintain an exception process to ensure the beneficiary’s safety and quality of care. PDN services that exceed the beneficiary’s benefit limitation, as established by the Decision Guide, must be prior authorized by the appropriate Medicaid case management program. Limited authority to exceed the published PDN benefit limitations may be granted on a time-limited basis as detailed below.

The beneficiary or his primary care giver must initiate the request for an exception. The applicable Medicaid case management program’s representative is responsible for facilitating the request and documenting the necessity for an exception. Factors underlying the need for additional PDN must be identified in the beneficiary’s POC, which must include strategies directed toward resolving the factors necessitating the exception, if applicable. Documentation must substantiate all of the following:
- Current medical necessity for the exception;
- Current lack of natural supports required for the provision of the needed level of support; and
- Additional PDN services are essential to the successful implementation of the beneficiary’s written POC, and are essential to maintain the beneficiary within the least restrictive, safe, and humane environment suitable to his condition.

Exceptions are time-limited and must reflect the increased identified needs of the beneficiary. Consideration for an exception is limited to situations outside the beneficiary’s or family’s control that place the beneficiary in jeopardy of serious injury or significant deterioration of health status. Exceptions may be considered for either of the following general situations:

<table>
<thead>
<tr>
<th>A temporary alteration in the beneficiary’s care needs following a hospitalization, resulting in one or both of the following:</th>
<th>The temporary inability of the primary caregiver(s) to provide required care as the result of one of the following:</th>
</tr>
</thead>
</table>
| - A temporary increase in the intensity of required assessments, judgments, and interventions.  
- A temporary need for additional training to enable the primary caregiver(s) to identify and meet the beneficiary’s care needs.  
The total number of additional PDN hours cannot exceed two hours per day, for a maximum of six months. | - An acute illness or injury of the primary caregiver(s). The total number of additional PDN hours cannot exceed two hours per day for the duration of the caregiver’s inability, not to exceed six months. In the event there is only one caregiver living in the home and that caregiver is hospitalized, a maximum of 24 hours per day can be authorized for each day the caregiver is hospitalized.  
- The death of the primary caregiver(s) or an immediate family member. "Immediate family member" is defined as the caregiver’s spouse, partner, parent, sibling, or child. The maximum number of hours allowable under this exception criterion is 24 hours per day for a maximum of seven days.  
- The home environment has been determined to be unstable, as evidenced by MDHHS protective or preventive services involvement.  
The written POC and community-based care coordination activities must include strategies directed toward stabilizing service supports and/or the family situation. The maximum number of hours varies by the beneficiary’s Intensity of Care category: High = maximum of 18 hours per day; Medium = maximum of 14 hours per day; Low = maximum of 10 hours per day. The length of time for this exception is three months or the time needed to stabilize service supports and/or family situation, whichever is less. A one-time extension of up to three months may be made if there is documented progress toward achieving the stabilized home environment. |
2.6 Change in Beneficiary's Condition/ PDN as a Transitional Benefit

Medicaid policy requires that the integrated POC be updated as necessary based on the beneficiary's medical needs. Additionally, when a beneficiary's condition changes, warranting a decrease in the number of approved hours or a discontinuation of services, the provider must report the change to the appropriate authorizing agent (i.e., the PRD, Children's Waiver, or Habilitation Supports Waiver) in writing. Changes such as weaning from a ventilator or tracheostomy decannulation can occur after months or years of services, or a beneficiary's condition may stabilize to the point of requiring fewer PDN hours or the discontinuation of hours altogether. It is important that the provider report all changes resulting in a decrease in the number of hours to the authorizing agent as soon as they occur, as well as properly updating the POC. MDHHS will seek recovery of monies inappropriately paid to the provider if, during case review, the authorizing agent determines that a beneficiary required fewer PDN hours than was provided and MDHHS was not notified of the change in condition.

In some cases, the authorized PDN services may be considered a transitional benefit. In cases such as this, one of the primary reasons for providing services should be to assist the family or caregiver(s) to become independent in the care of the beneficiary. The provider, in collaboration with the family or caregiver(s), may decide that the authorized number of hours should be decreased gradually to accommodate increased independence on the part of the family, caregiver(s), and/or beneficiary. A detailed exit plan with instructions relating to the decrease in hours and possible discontinuation of care should be documented in the POC. The provider must notify the authorizing agent that hours are being decreased and/or when the care will be discontinued.

2.7 Hospice Services

If a beneficiary receiving private duty nursing (PDN) becomes eligible for hospice, the hospice is required to notify the PRD before a claim is submitted for the services. (Refer to the Directory Appendix for contact information.)

The hospice must provide the following information on agency letterhead to the PRD.

- beneficiary name and Medicaid ID number;
- a request for a case review and approval of hospice services;
- a statement confirming that the beneficiary has been certified terminally ill with six months or less to live, signed by the hospice medical director and the beneficiary's attending physician; and
- name, e-mail address, and telephone number of the contact person.

PRD staff may request additional medical record documentation for their review. PDN authorization cannot occur unless the hospice submits the requested documentation to the PRD. If services are approved, the hospice must work with the PDN agency to develop a coordinated POC. Both the hospice and PDN staff must ensure that duplication of services does not occur. While hospice maintains the lead in coordinating the services, the PDN agency must continue to obtain prior authorization from MDHHS for the PDN services. Hospice services must be utilized to the fullest extent before PDN services will be authorized.
This does not apply to beneficiaries receiving PDN services under the Habilitation Supports Waiver (HSW) and over 21 years old, or the MI Choice Waiver. For beneficiaries under the HSW (over 21 years old), providers should contact the beneficiary's case manager to inform them of hospice eligibility. If the beneficiary is under the MI Choice Waiver, providers should contact the MI Choice Waiver Supports Coordinator.

Section 5 – Becoming a PACE Organization .................................................. 11
SECTION 1 – GENERAL INFORMATION

The Program of All-Inclusive Care for the Elderly (PACE) is an innovative model of community-based care that enables elderly individuals, who are certified by their state as needing nursing facility care, to live as independently as possible.

PACE provides an alternative to traditional nursing facility care by offering pre-paid, capitated, comprehensive health care services designed to meet the following objectives:

- Enhance the quality of life and autonomy for frail, older adults;
- Maximize the dignity of, and respect for, older adults;
- Enable frail, older adults to live in the community as long as medically and socially feasible; and
- Preserve and support the older adult’s family unit.

The PACE capitated benefit was authorized by the Balanced Budget Act of 1997 and features a comprehensive service delivery system with integrated Medicare and Medicaid financing.

An interdisciplinary team, consisting of professional and paraprofessional staff, assesses beneficiary needs, develops a plan of care, and monitors delivery of all services (including acute care services as well as nursing facility services, when necessary) within an integrated system for a seamless provision of total care. Typically, PACE organizations provide social and medical services in an adult day health center supplemented by in-home and other services as needed.

The financing model combines payments from Medicare and Medicaid, allowing PACE organizations to provide all needed services rather than be limited to those reimbursable under the Medicare and Medicaid fee-for-service systems. PACE organizations assume full financial risk for beneficiary care without limits on amount, duration, or scope of services.

Physicians currently treating Medicaid patients who are in need of nursing facility care may consider PACE as an option. Hospital discharge planners may also identify suitable candidates for referral to PACE as an alternative to a nursing facility. (Refer to the Directory Appendix for PACE contact information.)
SECTION 2 – SERVICES

The PACE organization becomes the sole source of services for Medicare and Medicaid beneficiaries who choose to enroll in a PACE organization.

The PACE organization is able to coordinate the entire array of services to older adults with chronic care needs while allowing elders to maintain independence in the community for as long as possible. The PACE service package must include all Medicare and Medicaid covered services, in addition to other services determined necessary by the interdisciplinary team for the individual beneficiary. Services must include, but are not limited to:

- Adult day care that offers nursing, physical, occupational and recreational therapies, meals, nutritional counseling, social work and personal care
- All primary medical care provided by a PACE physician familiar with the history, needs and preferences of each beneficiary, all specialty medical care, and all mental health care
- Interdisciplinary assessment and treatment planning
- Home health care, personal care, homemaker and chore services
- Restorative therapies
- Diagnostic services, including laboratory, x-rays, and other necessary tests and procedures
- Transportation for medical needs
- All necessary prescription drugs and any authorized over-the-counter medications included in the plan of care
- Social services
- All ancillary health services, such as audiology, dentistry, optometry, podiatry, speech therapy, prosthetics, durable medical equipment, and medical supplies
- Respite care
- Emergency room services, acute inpatient hospital and nursing facility care when necessary
- End-of-Life care
SECTION 3 – ELIGIBILITY AND ENROLLMENT

3.1 ELIGIBILITY REQUIREMENTS

To be eligible for PACE enrollment, applicants must meet the following requirements:

- Be age 55 years or older.
- Meet applicable Medicaid financial eligibility requirements. (Eligibility determinations will be made by the Michigan Department of Health and Human Services (MDHHS).)
- Reside in the PACE organization’s service area.
- Be capable of safely residing in the community without jeopardizing health or safety while receiving services offered by the PACE organization.
- Receive a comprehensive assessment of participant needs by an interdisciplinary team.
- A determination of functional/medical eligibility based upon the online version of the Michigan Medicaid Nursing Facility Level of Care Determination (LOCD) that was conducted online within fourteen (14) calendar days from the date of enrollment into the PACE organization.
- Be provided timely and accurate information to support Informed Choice for all appropriate Medicaid options for Long Term Care.
- Not concurrently enrolled in the MI Choice program.
- Not concurrently enrolled in an HMO.

3.2 COMPLETION OF THE MEDICAID NURSING FACILITY LOC DETERMINATION

A PACE applicant’s eligibility for coverage of nursing facility services and enrollment in the PACE organization is determined by the online application of the Michigan Medicaid Nursing Facility Level of Care Determination (LOCD). The PACE organization will not be reimbursed for nursing facility services rendered when the applicant is determined not to meet the LOCD criteria. Providers must submit the LOCD information into its online version no later than fourteen (14) calendar days following the start of services. Instructions and required forms related to the completion of the Medicaid Nursing Facility Level of Care Determination are available on the MDHHS website. (Refer to the Directory Appendix for website information.)

The LOCD must be completed by a health professional (physician, registered nurse, licensed practical nurse, clinical social worker (BSW or MSW), or physician assistant) representing the proposed provider. Nonclinical staff may perform the evaluation when clinical oversight by a professional is performed. The PACE organization will be held responsible for enrolling only those participants who meet the criteria outlined in this section.
The Michigan Medicaid Nursing Facility Level of Care Determination must be completed using the online version in the following situations:

- all new enrollments of Medicaid-eligible beneficiaries.
- re-enrollment of Medicaid-eligible beneficiaries.
- significant change in condition of a current PACE Medicaid-eligible beneficiary.

The online LOCD must be completed only once for each admission or readmission to the program.

### 3.3 INFORMED CHOICE

When a beneficiary is determined eligible for nursing facility level of care through completion of the online LOCD, he must be provided timely and accurate information to support informed choice for all appropriate Medicaid options for long-term care.

Process Guidelines available on the MDHHS website define the required process. (Refer to the Directory Appendix for website information.)

### 3.4 NURSING FACILITY LEVEL OF CARE EXCEPTION PROCESS - EXCEPTION REVIEW

A Nursing Facility (NF) Level of Care (LOC) Exception Process is a review that is available for financially eligible beneficiaries who have demonstrated a significant level of long term care need but do not meet the LOC. The NF LOC Exception Process is initiated when the PACE organization telephones the MDHHS designee and requests the NF LOC Exception Review on the date that the applicant was determined ineligible based on the online version of the LOCD. The NF LOC Exception criteria and information on how to request an Exception Review is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

### 3.5 TELEPHONE INTAKE GUIDELINES

The Telephone Intake Guidelines are questions that identify potential PACE participants for further assessment. The Telephone Intake Guidelines do not determine program eligibility. Use of the Telephone Intake Guidelines is at the discretion of the PACE organization. The guidelines are available on the MDHHS website. (Refer to the Directory Appendix for website information.)

### 3.6 ENROLLMENT AND DISENROLLMENT [SUBSECTION ADDED 7/1/18]

PACE provider staff must submit PACE enrollment and disenrollment forms electronically within CHAMPS by the end of card cut-off. *(added per bulletin MSA 17-46)*

**3.6A. ENROLLMENTS [SUBSECTION ADDED 7/1/18]**

PACE providers must upload and submit the following signed enrollment materials with the electronic enrollment.

- Enrollment Agreement Benefits and Coverages
- Nursing Facility Level of Care Freedom of Choice Form
If necessary, Durable Power of Attorney (DPOA) or guardianship documents

Once completed and all eligibility requirements have been checked, CHAMPS will assign the participant a PET code and enrollment start date. (added per bulletin MSA 17-46)

3.6.B. DISENROLLMENTS [SUBSECTION ADDED 7/1/18]

<table>
<thead>
<tr>
<th>Voluntary</th>
<th>A signed disenrollment form must be uploaded to CHAMPS.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Involuntary</td>
<td>Once the electronic form has been completed, PACE providers will submit appropriate supporting documentation to their MDHHS contract manager. MDHHS will review and approve or deny the electronic disenrollment in CHAMPS and determine the appropriate date of disenrollment.</td>
</tr>
<tr>
<td>Death</td>
<td>Providers will enter the date of death with the electronic disenrollment. A completed disenrollment will end-date the corresponding PET code. (added per bulletin MSA 17-46)</td>
</tr>
</tbody>
</table>

3.7 ANNUAL RECERTIFICATION [RE-NUMBERED 7/1/18]

MDHHS must annually certify that PACE participants continue to meet PACE financial eligibility requirements. PACE organizations must also ensure that participants continue to meet the LOCD criteria on an ongoing basis. If the participant continues to meet the LOCD criteria, it must be demonstrated in the medical record by way of initial comprehensive assessments, reassessments and progress notes. Additional online LOCDs are not conducted for the purpose of determining ongoing LOCD eligibility.

If the PACE participant no longer meets the LOCD criteria, federal regulations may deem the participant to be eligible for the PACE program until the next annual reevaluation if, in the absence of continued coverage under PACE, the participant reasonably would be expected to again meet the nursing facility level of care criteria within the next six months.

3.8 RETROSPECTIVE REVIEW AND MEDICAID RECOVERY [RE-NUMBERED 7/1/18]

At random and whenever indicated, MDHHS will perform retrospective reviews to validate the Michigan Medicaid Nursing Facility Level of Care Determination. If the participant is found to be ineligible for PACE services, MDHHS will recover all Medicaid payments made for PACE services rendered during the period of ineligibility. The Retrospective Review process (defined in the Beneficiary Eligibility and Admission Process Section of the Nursing Facility Coverages Chapter) is applicable to PACE organizations.

3.9 ADVERSE ACTION NOTICE [RE-NUMBERED 7/1/18]

When the provider determines that the beneficiary does not qualify for services based on the Michigan Medicaid Nursing Facility Level of Care Determination, the organization must immediately issue an adverse action notice to the beneficiary or his authorized representative. The action notice must include all of the language of the sample letters for long term care. Copies of the letters are available on the MDHHS website. (Refer to the Directory Appendix for website information.)
As with any benefit denial, the beneficiary may request an administrative hearing. The Michigan Administrative Hearing System (MAHS) Policies and Procedures Manual explains the process by which each different case is brought to completion. The manual is available for review on the MDHHS website. (Refer to the Directory Appendix for MAHS contact and website information.)

3.10 NURSING FACILITY LEVEL OF CARE PROCESS - IMMEDIATE REVIEW UPON ISSUANCE OF AN ADVERSE ACTION NOTICE [RE-NUMBERED 7/1/18]

The MDHHS designee may conduct a Nursing Facility (NF) Level of Care (LOC) Process Immediate Review for a Medicaid pending/eligible beneficiary who was determined functionally/medically ineligible based on the online Michigan Medicaid Nursing Facility Level of Care Determination. The beneficiary, or their representative, must request an Immediate Review before noon of the first working day after the date of receipt of the notice as follows:

- The MDHHS designee will request the PACE organization to provide medical documentation by close of business of the first business day after the date the beneficiary requests an Immediate Review.
- The MDHHS designee will review the medical documentation, obtain information from the beneficiary and/or their representative, and notify the beneficiary and the provider of the determination within three business days of receipt of the medical documentation.

The beneficiary (or representative) may still request an MDHHS appeal of the Michigan Medicaid Nursing Facility Level of Care Determination. (Refer to the Directory Appendix for contact information.)

3.11 FREEDOM OF CHOICE [RE-NUMBERED 7/1/18]

When an applicant has been determined eligible for nursing facility level of care through completion of the online LOCD, the beneficiary must be informed of his benefit options and elect to receive services in a specific program. This election must take place prior to initiating PACE services.

The applicant (or legal representative) must be informed of the following:

- services available under PACE
- services available in other community settings, such as the MI Choice Program
- services available through Medicaid-reimbursed nursing facilities

If applicants are interested in nursing facility or MI Choice Program care, the PACE organization must provide appropriate referral information using the Access Guidelines to Medicaid Services for Persons with Long Term Care Needs. These guidelines are available on the MDHHS website. (Refer to the Directory Appendix for website information.)

Applicants must acknowledge that they have been informed of their program options in writing by signing the Freedom of Choice form that is witnessed by the applicant's representative when appropriate. A copy of the completed form for non-participants must be retained for a period of three years. The completed form must be kept in the medical record if the applicant chooses to receive PACE services.

A copy of the Freedom of Choice form is included with the Michigan Medicaid Nursing Facility Level of Care Determination on the MDHHS website. (Refer to the Directory Appendix for website information.)
3.12 APPLICANT APPEALS [RE-NUMBERED 7/1/18]

3.12.A. FINANCIAL ELIGIBILITY [RE-NUMBERED 7/1/18]

A determination that an applicant is not financially eligible for Medicaid is an adverse action. Applicants may appeal to MDHHS. (Refer to the Directory Appendix for contact information.)

3.12.B. FUNCTIONAL/MEDICAL ELIGIBILITY [RE-NUMBERED 7/1/18]

A determination that a beneficiary is not functionally/medically eligible for PACE services is an adverse action. If the beneficiary and/or representative disagrees with this determination, they have the right to request an administrative hearing before an administrative law judge. Information regarding the appeal process may be found on the Michigan Administrative Hearing System (MAHS) website. (Refer to the Directory Appendix for website information.)

3.12.C. PACE SERVICES [RE-NUMBERED 7/1/18]

Noncoverage or nonpayment of services by the PACE organization for a beneficiary enrolled in PACE is an adverse action. If the beneficiary and/or representative disagrees with the noncoverage or nonpayment of services by the PACE organization, they have the right to request an administrative hearing before an administrative law judge. Information regarding the appeal process may be found on the Michigan Administrative Hearing System (MAHS) website. (Refer to the Directory Appendix for website information.) The beneficiary may request continuation of the disputed service with the understanding that he may be liable for the cost of the disputed service if the determination is not made in his favor.

3.13 PROVIDER APPEALS [RE-NUMBERED 7/1/18]

A Retrospective Review of the Michigan Medicaid Nursing Facility Level of Care Determination that results in a denial is an Adverse Action for PACE when MDHHS proposes to recover payments made for services rendered to the beneficiary for whom the Retrospective Review was conducted. If the PACE organization disagrees with the MDHHS Adverse Action Notice, the PACE organization may appeal if their written request is received by the Michigan Administrative Hearing System within 30 calendar days from the date of the MDHHS Adverse Action Notice.

Information regarding the MDHHS appeal process is available in the General Information for Providers Chapter and on the MDHHS website. (Refer to the Directory Appendix for website information.)
SECTION 4 – PACE ORGANIZATION EVALUATION CRITERIA [RE-FORMATTED 4/1/18]

4.1 INITIAL APPLICATIONS [SUBSECTION HEADING ADDED 4/1/18]

A prospective PACE organization can be a not-for-profit or for profit (revised per bulletin MSA 17-35) private or public entity that is primarily engaged in providing PACE services and participates in both Medicare and Medicaid. Michigan licensure as a health care entity is not required; however, unlicensed entities may only serve Medicare and Medicaid beneficiaries. Federal regulations (42 CFR Part 460) describe administrative requirements for PACE. At a minimum, prospective entities must meet the federal requirements for PACE organizations, enroll as a Michigan Medicaid provider, and complete a feasibility study. MDHHS will evaluate potential PACE organizations using the following criteria:

- Submission of a feasibility study that:
  - identifies the proposed service area;
  - shows evidence of demand for PACE services in the proposed service area (the potential pool of PACE beneficiaries should be sufficient to have 250 to 300 beneficiaries enrolled within four to five years of start-up);
  - identifies competing PACE organizations, documents the organization's timeline for development and anticipated costs;
  - identifies the anticipated source of referrals for potential beneficiaries; and
  - assesses the supply of alternative long-term care services already in existence in the community.

If MDHHS receives multiple letters of intent for the same service area, the feasibility studies will be reviewed in the order in which they are received. (text added per bulletin MSA 17-35)

- Organizational commitment to principles consistent with the PACE model.
- Evidence of experience in providing primary, acute and/or long-term care services to the target population and evidence of positive community support.
- Evidence that the organization has the depth in leadership and experience required to develop and implement PACE successfully.
- Evidence that the PACE organization will either be cost neutral or save money for long term care services provided by MDHHS in the PACE organization's service area (i.e., total Medicaid expenditures for services in the service area will not increase and may decrease).
- Assurance of adequate financial capacity to fund program development and start-up costs, including identification of patient capacity and break-even consideration.
- Evidence of the proposed provider network and assurance that the organization will have staff and professionals experienced in providing care to the target population.
- Evidence that the Executive (Program) Director position will be staffed with a full-time employee.
- Evidence that the key positions of Medical Director, Center Manager, Financial Manager, and Quality Improvement Manager are sufficiently staffed, as determined by MDHHS, to meet the needs of the PACE organization.
- Ability to meet federal PACE requirements.
A prospective PACE program must submit to MDHHS:

- Feasibility Study: within 90 calendar days of submitting their letter of intent.
- Provider Application: within one year of MDHHS approval of the feasibility study. (text added per bulletin MSA 17-35)

Other evaluation criteria may be considered and will be available to organizations who file a letter of intent with MDHHS to become a PACE organization.

### 4.2 Expansion Applications [Subsection Added 4/1/18]

Expansion applications will not be accepted by MDHHS until the first CMS audit has been completed with good standing and the organization is fiscally sound. (text added per bulletin MSA 17-35)

### 4.3 Alternative Care Settings [Subsection Added 4/1/18]

To be eligible to request an ACS, the following guidelines must be met:

- The PACE organization must have successfully completed their first trial period audit and be in good standing with CMS, per CMS audits.
- An ACS participant must belong to a PACE organizations center.
- The PACE organization’s enrollment limit must have adequate space to accommodate projected ACS attendants.
- MDHHS must tour the proposed ACS location prior to approval.
- The ACS must be less than one (1) hour travel time from PACE Center.

The ACS is subject to MDHHS Readiness Review and will be included in the PACE organization’s annual audits. ACSs are also subject to all state and federal regulations.

The following documents must be submitted to MDHHS when an ACS is requested:

- Previous year’s annual financial report for the PACE organization;
- The PACE organization’s business plan for ACS;
- Financial projection for ACS site (to include cost of ACS site, renovations, staff, equipment, etc.);
- Description of what population of participants will attend the ACS;
- Description of what and how services will be provided at the ACS:
  - ACS services must include, but are not limited to, meals, activities, personal care, laundry, and nursing (triage);
- Description of how services that are not provided at the ACS will be available to participants; and
- Description of plan for participants to attend a PACE Center, at least quarterly or more often, as determined by the PACE organization interdisciplinary team.
MDHHS may request additional information when necessary.  (text added per bulletin MSA 17-35)
SECTION 5 – BECOMING A PACE ORGANIZATION

Information regarding the process to become a PACE organization is available on the MDHHS website. Any entity seeking to become a PACE organization in Michigan may contact MDHHS regarding state-specific requirements. (Refer to the Directory Appendix for contact and website information.)

SECTION 1 – GENERAL INFORMATION

1.1 RURAL HEALTH CLINIC CERTIFICATION

This chapter provides policy and reimbursement information specific to Rural Health Clinics (RHCs) and is to be used in combination with other chapters of the Medicaid Provider Manual.

In compliance with the Rural Health Clinic Services Act of 1977 (Public Law 95-210), the Medicaid program reimburses certified and enrolled RHCs for services provided to Medicaid beneficiaries in the State of Michigan. To become certified as a RHC in Michigan, clinics must make application for RHC status through the designated state-certifying agency. (Refer to the Directory Appendix for contact information.) Based on information in the application, the certifying agency determines if an applicant clinic meets the staffing and location requirements for certification. If a clinic appears eligible, an on-site visit is conducted. If a clinic meets all the requirements, the certifying agency makes a recommendation for certification to the Centers for Medicare & Medicaid Services (CMS). CMS makes the final determination as to a clinic’s eligibility for RHC status and notifies the Michigan Department of Health and Human Services (MDHHS) when eligibility is granted.

RHCs may be provider-based or independently operated. Provider-based RHCs may be operated by a hospital, skilled nursing facility (SNF) or home health agency (HHA). An independent RHC is permitted to occupy a permanent structure or be located in a mobile unit. RHCs may be publicly or privately held clinics and they may be operated on a profit or not-for-profit basis.

1.2 GENERAL REIMBURSEMENT INFORMATION

Medicaid-enrolled RHCs are reimbursed with a prospective payment system (PPS) in compliance with Medicare, Medicaid and SCHIP Benefits Improvement and Protection Act (BIPA) of 2000. Section 702 of BIPA created a new section 1902(bb) in the Social Security Act. Specific information related to RHC reimbursement is contained in the Rate Setting Section of this chapter.
SECTION 2 – MEDICAID ENROLLMENT

2.1 PROVIDER ENROLLMENT

MDHHS requires all RHCs to have a Group (Type 2 - Organization) National Provider Identification (NPI) number in order to receive the enhanced RHC reimbursement. For RHCs with multiple locations and multiple rates, an NPI number for each location may be necessary so that the proper reimbursement rate of all encounters can be determined. If the RHC fails to obtain and/or use the correct NPI number, the RHC reimbursement will be determined under fee for service rules. The NPI number must be reported to MDHHS before billing Medicaid services.

Individual providers (doctors, dentists, optometrists, etc.) are required to obtain a Provider (Type 1 - Individual) NPI number and report the number to MDHHS.

All inquiries related to provider enrollment should be directed to the MDHHS Provider Enrollment Unit. (Refer to the Directory Appendix for contact information.)

2.1.A. NON-PHYSICIAN BEHAVIORAL HEALTH SERVICE

Licensed psychologists (Master's Limited or Doctoral level), social workers (Master's level), professional counselors (Master's or Doctoral level), and marriage and family therapists who serve Medicaid beneficiaries are required to enroll as Medicaid providers. The NPI of the psychologist, social worker, professional counselor, or marriage and family therapist is reimbursed under the RHC PPS. These services must be billed using the appropriate evaluation and management (E/M) codes listed in the American Medical Association’s Current Procedural Terminology (CPT) Book or Healthcare Common Procedure Coding System (HCPCS) codes. Providers should refer to the Non-Physician Behavioral Health provider database on the MDHHS website for the current list of covered procedure codes. The list of allowable services is reviewed annually and updated as applicable. Refer to the Additional Code/Coverage Resource Materials Section of the General Information for Providers Chapter for additional information regarding coverage parameters.

For information relating to service coverage and authorization requirements, refer to the Practitioner and the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapters of this manual.

2.2 NONENROLLED PROVIDERS

Professional services performed by limited licensed psychologists (except as noted in Section 333.18223 of the Public Health Code), social workers, professional counselors, marriage and family therapists, or student interns must be performed under the supervision of an enrolled, fully-licensed provider of the same profession. These services are reimbursed under the RHC PPS. Since MDHHS does not directly enroll these providers, claims for their services must be billed using the NPI of the supervising provider responsible for ensuring the medical necessity and appropriateness of the services. Claims submitted with the non-enrolled provider’s NPI in the rendering provider field will reject.
SECTION 3 – BENEFITS

RHC services subject to PPS reimbursement are RHC services defined at Section 1861 (aa)(1)(A)-(C) of the Social Security Act.

- Physician (MD, DO), podiatrist, chiropractor, and optometrist professional services, and services and supplies incidental to physician services, including certain drugs and biologicals that cannot be self-administered, immunizations and their administration.
- Licensed physician’s assistant, certified family nurse practitioner (CFNP), certified pediatric nurse practitioner (CPNP) and certified nurse midwife (CNM) services, and the services and supplies incidental to these services as would otherwise be furnished by, or incidental to, physician services.
- Clinical psychologist and clinical social worker services, and services and supplies incidental to these services as would otherwise be furnished by, or incidental to, physician services.
- Dental services, and services and supplies incidental to dental services.

Primary care services that are covered and reimbursed under the PPS are defined as the above listed services provided in a place of service that is the RHC’s office or clinic, patient’s home, skilled NF, domiciliary facility or NF.

3.1 SERVICES AND SUPPLIES INCIDENTAL TO AN RHC VISIT

RHC services and supplies incidental to an RHC visit are included in the PPS reimbursement if the service or supply is:

- Of a type commonly furnished in a physician’s office.
- Of a type commonly rendered either without charge or included in the professional bill.
- Furnished as an incidental, although integral part of professional services furnished by a physician (MD, DO), dentist, optometrist, podiatrist, chiropractor, CNP (who has a collaborative agreement with a physician), CNM or licensed physician’s assistant.
- Furnished under the direct personal supervision of a physician (MD, DO), dentist, optometrist, podiatrist, chiropractor, CNP (who has a collaborative agreement with a physician), CNM or licensed physician’s assistant.
- In the case of a service, furnished by a member of the clinic’s health care staff who is an employee of the clinic.

The direct personal supervision requirement is met in the case of a CNP, CNM, or licensed physician’s assistant only if such a person is permitted to supervise such services under the written policies governing the RHC.

3.2 SERVICES EXCLUDED FROM RHC REIMBURSEMENT

Payment for any other Medicaid covered services not defined as a primary care service are Medicaid-covered under fee-for-service (FFS) policies. Services not listed as primary care services are excluded from the RHC prospective payment rate (PPR).
3.3 **TELEMEDICINE**

An RHC can be either an originating or distant site for telemedicine services. Refer to the Billing & Reimbursement for Institutional Providers Chapter for specific billing instructions. Refer to the Telemedicine Section of the Practitioner Chapter for additional information regarding telemedicine services.

Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.

3.4 **CHILDREN’S HEALTH INSURANCE PROGRAM SERVICES**

Section 503 of the Children’s Health Insurance Program Reauthorization Act (CHIPRA) of 2009 authorizes states to incorporate a PPS rate for reimbursement of services provided to children receiving health care services through RHCs when covered by the Children’s Health Insurance Program (CHIP). Reimbursement for eligible services must comply with the requirements of section 1902 (bb) of the Social Security Act.

For beneficiaries enrolled in state CHIP-funded programs (MI Child, Healthy Kids–Expansion, and Maternity Outpatient Medical Services [MOMS]), providers must bill the program according to their existing processes. For beneficiaries enrolled in a health plan, the MDHHS HCRD will perform an annual reconciliation of these encounters provided by RHCs. (Refer to the Eligibility Groups Subject to PPS Methodology subsection of this chapter for additional information.)

For Healthy Kids–Expansion, MI Child and MOMS beneficiaries, the HCRD will perform an annual reconciliation of these encounters provided by RHCs. The RHC PPS rates established for eligible CHIP services are equivalent to those applicable to Medicaid for each respective year they are in effect.
SECTION 4 – ENCOUNTERS

4.1 DEFINITION

Reimbursement to RHCs under the PPS requires that each office visit that meets the following definition of an encounter be counted for payment purposes.

An encounter is a face-to-face visit between a patient and the provider of health care services who exercises independent judgment in the provision of health care services. For a health service to be defined as an encounter, the provision of the health service must be recorded in the patient's medical record.

Encounters include provision of service by the following professionals:

- Licensed physicians (MD, DO), dentists, optometrists, podiatrists, chiropractors, CNPs (who have a collaborative agreement with a physician), CNMs, physician assistants or dental hygienists.
- Clinical psychologists or clinical social workers.

The following examples help to define an encounter:

- To meet the encounter criterion for independent judgment, the provider must be acting independently and not be assisting another provider. For example, a nurse assisting a physician during a physical examination by taking vital signs, taking a history, or drawing a blood sample is not credited with a separate encounter.
- Such services as drawing blood, collecting urine specimens, performing laboratory tests, taking x-rays, filling/dispensing prescriptions, in and of themselves, do not constitute encounters. However, these procedures may accompany professional services performed by physicians, dentists, or other health providers that do constitute encounters.
- An RHC may be credited for more than one encounter by the same health professional on the same day. For example, a beneficiary suffers illness or injury requiring additional diagnosis or treatment on the same date of service, or a patient sees a physician for flu symptoms early in the day and then later the same day sees the same physician for a broken leg. These visits are classified as two encounters, and the patient’s medical record must document the circumstances of the two encounters.
- An RHC may be credited for encounters by different health professionals on the same day. For example, if a patient first sees a physician at the RHC and then sees a clinical psychologist, these visits are classified as two encounters.
- An encounter may take place in the RHC or at another approved location.

The encounter criteria are not met in the following circumstances:

- Provider participation in a community meeting or group session that is not designed to provide health services.
- When the only service provided is part of a large-scale effort, such as a mass immunization program, screening program, or community-wide service program.
• Nursing services such as taking vital signs, taking a history, drawing a blood sample, collecting urine specimens, performing laboratory tests, taking x-rays, and/or filling or dispensing prescriptions.
• Calling in prescriptions, filling out insurance forms, etc.
• Allergy injection(s).

4.2 Eligibility Groups Subject to PPS Methodology

The following list identifies Medicaid eligibility groups that are subject to the PPS methodology:

<table>
<thead>
<tr>
<th>Medicaid</th>
<th>RHC primary care services constitute encounters covered by Medicaid.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Qualified Medicare Beneficiaries</td>
<td>Medicaid is billed coinsurance and deductibles for Qualified Medicare Beneficiaries (QMBs), and the services covered by Medicare are included as encounters.</td>
</tr>
</tbody>
</table>
| Medicaid Health Plan Enrollees  | Medicaid-covered services provided by a RHC to Medicaid-eligible beneficiaries enrolled with a Medicaid Health Plan (MHP) are Medicaid encounters if the following conditions are met:  
  ▪ The RHC and MHP must have a signed contract outlining payment provisions in order for the RHC to provide Medicaid-covered services to the MHP enrollee.  
  ▪ The contract must provide for the MHP to reimburse the RHC at a fair market rate for similarly situated beneficiaries served by a non-RHC provider. The MHP must implement a level of payment equal to, or above, that of other subcontracting arrangements when entering into a subcontract with a RHC.  
  ▪ The RHC must file information with the MDHHS HCRD in a format determined by MDHHS showing encounters and payments of Medicaid beneficiaries enrolled with MHP.  
  ▪ RHCs may not bill Medicaid for MHP beneficiaries.  
  ▪ After verification of the fair market rate by the HCRD, the difference between the RHC prospective payment rate and MHP payments are reconciled by MDHHS annually.  
  ▪ The contract between RHCs and MHP services is subject to review and verification by MDHHS. |
| Healthy Kids Dental             | Dental services provided to Medicaid beneficiaries enrolled in the Healthy Kids Dental program are eligible for the PPR. RHCs should report Medicaid information on encounters and revenue in the annual reconciliation report. The RHC receives the difference between the PPR and the revenue received as part of the annual reconciliation. |
| Medicare/ Medicaid              | Medicaid covered primary care services provided to Medicare/Medicaid dual eligibles are considered Medicaid encounters and are reimbursed under the PPS methodology. |

4.3 Eligibility Groups Not Subject to PPS Methodology

If an individual does not have Medicaid eligibility (i.e., is eligible for CSHCS-Title V), the services and costs are not Medicaid RHC services. CSHCS and Family Planning Waiver (Plan First!) may be paid FFS rates only.
SECTION 5 – RATE SETTING

The RHC is reimbursed on a per visit basis for RHC services. In accordance with section 1902(bb) of the Social Security Act, the PPS per visit payment is equal to 100 percent of the average of the RHC’s reasonable costs of providing Medicaid services during fiscal years 1999 and 2000. MDHHS defines reasonable costs as the per-visit amount approved and paid by Medicare. For RHCs that have a fiscal year ending other than September 30, the PPR is prorated based on the number of months in each period covered by a different prospective rate.

The per visit amount is adjusted each year (beginning on October 1, 2001) by 100 percent of the Medicare Economic Index for the prior calendar year (i.e., the adjustment effective October 1, 2001 reflects the index for calendar year 2000).

The per visit amount may also be adjusted to reflect changes in the scope of services provided to Medicaid beneficiaries by the RHC. An adjustment to the per-visit amount based upon a change in the scope of services becomes effective as determined by MDHHS.

Any rate setting/cost settlement related questions should be directed to the MDHHS HCRD. (Refer to the Directory Appendix for contact information.)

5.1 ESTABLISHING RATES FOR NEW CLINICS

An entity that initially qualifies as an RHC after fiscal year 2000 will be paid as follows:

- Upon enrollment, an interim prospective payment rate (PPR) will be established for new RHCs equal to the facility type average rate for the county in which they are located or the statewide average (if no previous average exists for the county subject to any limit applied to the specific facility type). The RHC will be cost settled at the end of its first fiscal year of operation.
- After the facility has been in operation for two full cost reporting periods, the average rate per visit for those two periods will be considered the revised PPR for the facility, subject to the following criteria:
  - The first year will be inflated to the second fiscal year end using the appropriate Medicare Economic Index (MEI) factors.
  - For independent RHCs, the rebased PPR shall not exceed the Medicare limit.
  - For provider-based RHCs (associated with a hospital with fewer than 50 enrolled beds), the PPR shall not exceed the statewide average cost per visit. The limit will increase annually at a minimum of the MEI factor.
  - For provider-based RHCs (associated with a hospital with 50 or more beds), the PPR shall not exceed the Medicare limit.

5.2 ALTERNATE PAYMENT METHODOLOGY

The State and the RHC may agree to an alternative payment methodology that provides reimbursement at least equal to that which an RHC would receive under the PPS.
5.3 QUARTERLY PAYMENTS

RHCs receive a quarterly payment. This payment is an estimate of the difference between the payment the RHC receives from various sources (FFS, MHP, Medicare and other insurance) and the amount the RHC should receive under the PPS. These quarterly payments are included in the annual reconciliation.
SECTION 6 – BILLING

6.1 BILLING RURAL HEALTH CLINIC SERVICES

RHC services must be billed according to instructions contained in the Billing & Reimbursement for Institutional Providers Chapter of this manual. RHCs must refer to that chapter for information needed to submit claims for Medicaid services, as well as information about how MDHHS processes claims and notifies the RHC of its action. If the RHC performs a service that must be billed on the professional claim form, refer to the Billing & Reimbursement for Professionals Chapter of this manual. Policies for specific services are found in the provider-specific chapters of this manual.

It is the responsibility of the RHC to properly bill all Medicaid FFS claims. Incorrect or improper billing may adversely affect reimbursement since the annual reconciliation and final reimbursement is based on approved claims.

The Group (Type 2 - Organization) NPI number must be used as the billing provider on all electronic and paper claims submitted to Medicaid. Do not use Provider (Type 1 - Individual) as the billing provider. The billing provider loop or field is mandatory to complete.

The NPI (Type 1 - Individual) number of the physician (MD or DO) overseeing the beneficiary’s care must be entered as the attending provider. The attending provider field is mandatory to complete. Additionally, the NPI (Type 1 - Individual) number of the practitioner who performed the service should be entered as the rendering provider. Do not enter a Group (Type 2) NPI number as the attending or rendering provider.

MDHHS will use the billing provider NPI field (Type 2 - Organization) to determine the number of encounters and calculate the settlement for the year-end reconciliation.

6.2 PLACE OF SERVICE REQUIREMENTS

Place of service codes are not applicable to institutional billing. However, if the RHC performs a service that must be billed on the professional claim form within the clinic, RHCs must use place of service (POS) code 72. For services provided outside the RHC, bill with the appropriate POS code noted in the Billing & Reimbursement for Professionals Chapter of this manual.

RHCs may provide Medicaid covered services in settings other than the RHC office, beneficiary's home, nursing facility or domiciliary facility, but these services are not included in the PPS reimbursement methodology. Services provided outside of the settings noted here are reimbursed at FFS rates.

6.3 BILLING FOR MATERNITY CARE

Global codes for maternity care are used to reimburse a package of services (prenatal visits and delivery) at different places of service (RHC and hospital). In order for the RHC to be reimbursed for prenatal visits under the PPS methodology, the RHC should not bill for global maternity care. The claims for delivery and prenatal care should be billed separately. The claim for delivery should show a hospital place of service and will be paid under the FFS methodology. The claim for prenatal care will be reimbursed under the PPS methodology.

If the RHC elects to bill for global maternity care, all services will be reimbursed under the FFS rules.
6.4 Other Insurance

Billing instructions related to coordination of benefits are published in the Coordination of Benefits Chapter of this manual. Other insurance and all other payments received for services rendered to a Medicaid beneficiary must be reported. Even if the other insurance payment for a specific service exceeds the amount Medicaid would have paid, the RHC must still bill the procedure code to receive credit for the encounter. (Refer to the Billing & Reimbursement Chapters of this manual for specific billing guidelines.)

6.5 Medicare and Medicaid Crossover Claims

Refer to the Billing & Reimbursement Chapters of this manual for specific instructions regarding Medicare and Medicaid claims. If the Medicare payment exceeds the Medicaid fee screen, the appropriate FFS procedure code should still be billed to Medicaid for encounter and reconciliation purposes.

6.6 Copayments

Medicaid copayments for chiropractic, dental, physician, podiatry, and vision services are waived under the RHC benefit as part of the reconciliation. (Services requiring copayments are listed in the General Information for Providers Chapter of this manual.)

6.7 Dental Claims

RHCs providing dental services must refer to the Dental and to the Billing & Reimbursement for Dental Providers Chapters of this manual for information regarding program coverages, prior authorization requirements, claims completion and billing instructions.
SECTION 7 – RISK CONTRACTS

RHCs may enter into risk contracts with MHPs for nonprimary care services. However, these contracts are not included in the reconciliation process. All RHC reconciliations are for primary care services only.

7.1 SCOPE OF SERVICE

The prospective payment rate may be adjusted for an increase or decrease in scope of service. Any facility approved for rebasing due to a change in scope of services shall be treated as a new facility. In order to qualify for a scope of service change, the cost related to the specific change must account for an increase or decrease to the existing PPR of five percent or greater. A facility that changes classification to a system utilizing a different rate limit or methodology shall be considered a change of scope (by default). For example, an independent RHC that changes ownership to a provider-based RHC when the hospital has less than 50 beds is considered to have a change of scope.

7.1.A. INCREASE IN SCOPE OF SERVICE

An increase in scope of service results from the addition of a new professional staff member (i.e., contracted or employed) who is licensed to perform medical services that are approved RHC benefits that no current professional staff is licensed to perform.

7.1.B. DECREASE IN SCOPE OF SERVICE

A decrease in scope of service results when no current professional staff member is licensed to perform the medical services currently performed by a departing professional staff member.

7.1.C. CHANGES THAT DO NOT CHANGE THE SCOPE OF SERVICE

An increase or decrease in scope of service does not result from any of the following (although some of these changes may occur in conjunction with a change in scope of service):

- an increase, decrease or change in number of staff working at the clinic.
- an increase, decrease or change in office hours.
- an increase, decrease or change in office space or location.
- the addition of a new site that provides the same set of services.
- an increase, decrease or change in equipment or supplies.
- an increase, decrease or change in the number or type of patients served.
7.2 NOTICE OF INTENT TO CHANGE SCOPE OF SERVICE

If a RHC intends to change its scope of service, the MDHHS HCRD must be notified 90 days before any financial commitments (i.e., money paid or committed to be paid, contracts signed, etc.) have been made. Notification should include the following documentation:

- Complete description of the service to be changed (addition or deletion).
- A listing of procedure codes to be billed as a result of this new service.
- A budget for the fiscal year showing an estimate of the total increase or decrease in cost resulting from change.
- An estimate of the change in number of encounters.
- Estimates of the cost change on the current Medicaid encounter rate.
- The proposed customary charges for this service by the RHC.
- The customary charges for this service by other providers in the area served by this RHC.
- The amount to be paid by an MHP for this service for various programs (Medicare/Medicaid).
- The current Medicare encounter rate.
- Medicare fee screen for this service for non-full cost providers.
- Total encounters for last two years by program (Medicaid, Medicare, uninsured, etc.), and type (MHP, fee screen/contracted amount).
- Estimated change in encounters by program for two fiscal periods following the change in scope of service.
- Copies of notices, certifications, applications, approvals and other documentation from the state-licensing agency, CMS, Medicare intermediary, or other organizations documenting the change in scope of service.
- Other information showing cost, encounters or approvals/denials of the change.
- Other information as requested by the HCRD.

After a review of the information submitted, the HCRD notifies the RHC of its determination regarding a rate change, including the effective date of any change.
SECTION 8 – RECONCILIATION REPORTING

Medicaid Reconciliation Reports must be completed by each RHC in order to receive reimbursement under the PPS.

The RHC must file the following documents at the end of its fiscal year for PPS reimbursement:

- A copy of its filed Medicare Cost Report and Trial Balance
- A completed copy of the Medicaid Reconciliation Report

Encounter data for RHC services provided to beneficiaries through Medicaid Health Plans, Healthy Kids Dental, and/or regional Prepaid Inpatient Health Plans (PIHP) is accessible through the Community Health Automated Medicaid Processing System (CHAMPS).

No individual payment information is needed if payments are made on a capitated basis; however, a separate summary of the monthly payments must be provided.

Upon review and audit, MDHHS will reimburse the difference between the RHC PPS rate and the amount received from the Medicaid Health Plans, Healthy Kids Dental, and/or the regional Prepaid Inpatient Health Plan (PIHP).

8.1 REPORT FILING

RHCs must file Reconciliation Reports and supplemental documents to the MDHHS HCRD annually. Due dates are consistent with the Medicare Cost Report filing requirement. If the required reconciliation report and supplemental documents are not submitted within the required time limit, the RHC waives its right to the PPS reimbursement for that year.

The reconciliation report is the basis for determining future quarterly payments and the current year’s reconciliation. The report must be an original(s) and signed by the authorized individual who normally signs the RHC’s federal income tax return or similar reports and should be for the same fiscal period and cover the same sites as the Medicare Cost Report. Improperly completed or incomplete filings are returned to the facility for proper completion and must be resubmitted to MDHHS within 30 days of date of receipt.

8.2 ACCOUNTING AND RECORD KEEPING

RHCs must maintain, for a period of not less than seven years from the end of the fiscal year of the Reconciliation Report, financial and clinical records for the period covered by the reconciliation report that are accurate and in sufficient detail to substantiate the information reported. If there are unresolved issues at the end of this seven-year period, the records must be maintained until these issues are resolved.

The MDHHS HCRD retains each required Reconciliation Report and supplemental documents submitted by the RHC for seven years after issuance of a final decision. In the event there are unresolved issues at the end of this seven-year period, the report is maintained until such issues are resolved.
SECTION 9 – AUDIT, SETTLEMENTS AND APPEALS

An annual reconciliation is performed to assure that the prospective payment rate is paid to the RHC for all eligible encounters. The reconciliation process begins with the receipt of the Reconciliation Report and supplemental documents and ends with the issuance of the Notice of Amount of Program Reimbursement.

9.1 DESK REVIEWS AND FIELD AUDITS

The desk review may include procedures that:

- Verify the completeness and mathematical accuracy of all schedules in the report.
- Compare the Reconciliation Report with MDHHS paid claim and encounter data.
- Identify the need for supporting documentation and arrange to receive same.
- Identify the need for a field audit examination necessary to conclude final reconciliation calculations.
- Compare reported data with industry norms as an aid to the audit scope determination.

Field audits may be conducted to verify information on the Reconciliation Report.

9.2 MEDICARE AUDIT

The Medicare intermediary may perform audits of the RHC. These audit results may be used to verify information or for statistical purposes.

9.3 INITIAL RECONCILIATION AND SETTLEMENT

An initial reconciliation is calculated after the annual reconciliation report is received. The initial reconciliation is processed approximately four months after the reconciliation report is received, with the payment or recovery made at that time. Future quarterly payments are adjusted based on the information in the initial reconciliation.

9.3.A. UNDERPAYMENTS TO AN RHC

Based on the annual reconciliation, MDHHS reimburses any underpayment due an RHC through a gross adjustment. This gross adjustment is shown in a Remittance Advice (RA). MDHHS retains the right to withhold a portion of any initial payment based on individual circumstances.

9.3.B. OVERPAYMENTS TO AN RHC

Once a determination of overpayment has been made, the amount so determined is a debt owed to the State of Michigan and will be recovered by MDHHS. The recovery starts approximately 30 days after notification to the RHC. The gross adjustment stops all payments to the RHC's physician(s) until the full amount is recovered.
9.4 Audit Adjustment Report

The Audit Adjustment Report contains a list of all Program data adjustments made to the Medicaid Reconciliation Report by MDHHS audit staff.

9.4.A. Audit Adjustment Report

The Audit Adjustment Report must be accepted or rejected by the RHC within 30 calendar days of its mailing date.

If the RHC accepts the findings contained in the Audit Adjustment Report, an appropriate officer of the RHC should sign the report and mail it to MDHHS HCRD. (Refer to the Directory Appendix for contact information.) A Notice of Amount of Program Reimbursement is then mailed to the RHC. No further administrative appeal rights are available for the adjustments contained in the Audit Adjustment Report.

If the RHC has not responded within this time period, MDHHS shall issue a Notice of Amount of Program Reimbursement that is the final determination of an adverse action. No further administrative appeal rights are available.

9.4.B. Notice of Amount of Program Reimbursement

The Notice of Amount of Program Reimbursement is the notice of final determination of an adverse action and is considered the offer of settlement for all reimbursement issues for the reporting period under consideration.

9.4.C. RHC Rejection of the Audit Adjustment Report

Within 30 calendar days of the mailing date of the Audit Adjustment Report, the RHC may reject any or all of the findings in the Audit Adjustment Report and request a post-audit conference.

The Post-Audit Conference is an informal process where the MDHHS HCRD staff and the RHC may resolve differences prior to an appeal and/or formal hearing. The process is initiated by the RHC after the receipt of the Audit Adjustment Report. The RHC must request in writing a Post-Audit Conference with the HCRD and indicate in that letter the area(s) of disagreement. The letter must state the appropriate regulation and/or other appropriate decisions that support the RHC’s position and be sent to MDHHS HCRD. (Refer to the Directory Appendix for contact information.)

The RHC or its representative must present, either before or at the time of the Post-Audit Conference, the audit staff with the documents and arguments that support its position relative to the disputed issue(s). The audit staff will explain to the RHC the basis for its findings. This step does not stop the recovery of monies due Medicaid.
9.5 Appeals

RHCs have the right to appeal any adverse action taken by MDHHS, unless that adverse action resulted from an action over which MDHHS had no control (e.g., Medicare termination, license revocation). The appeal must be submitted in writing and mailed to the Michigan Administrative Hearing System (MAHS). (Refer to the Directory Appendix for contact information.)

The appeal process is outlined in the MDHHS Medicaid Provider Reviews and Hearings administrative rules, Michigan Administrative Code R400.3402 through R400.3425. Any questions regarding the appeal process should be directed to the MAHS.

RHCs may appeal their respective Notice of Program Reimbursement if the contested issue(s) is other than those precluded due to failure to appeal rate adjustment(s) in the Audit Adjustment Report according to established time frames. Appeals accepted as appropriate are also governed by the aforementioned MDHHS Medicaid Provider Reviews and Hearings rules.

SECTION 1 – GENERAL INFORMATION

This chapter applies to enrolled Intermediate School Districts, Detroit Public Schools, and Michigan School for the Deaf.

This chapter describes the coverage and reimbursement policy for direct medical services, targeted case management, and personal care services. Coverage applies to individuals up to the age of 21 who are eligible under the provisions of the Individuals with Disabilities Education Act (IDEA) of 1990 as amended in 2004 and to those enrolled in programs that require an Individualized Education Program (IEP) or an Individualized Family Service Plan (IFSP). The Centers for Medicare & Medicaid Services (CMS) has determined that services provided in the "school" setting include services provided by qualified school staff in the "home" setting when necessary.

These services assist students with a disability to benefit from special education and related services. Medicaid reimbursement, through the Michigan Department of Health and Human Services (MDHHS), addresses the medical service needs of beneficiaries receiving special education and related services and provides funding for those services. The Social Security Act, as amended in 1988 by the Medicare Catastrophic Coverage Act, specifically provides for medical assistance (Medicaid) to cover "related services" which are specified in Federal Medicaid statute as medically necessary and "included in the child's IEP established pursuant to Part B of the IDEA or furnished to a handicapped infant or toddler because such services are included in the child's IFSP adopted pursuant to Part C (formerly called Part H) of such Act."

Section 504 of the Rehabilitation Act of 1973 requires local school districts to provide or pay for certain services to make education accessible to handicapped children. These services are described in an individualized service plan and provided free of charge to eligible individuals. Medicaid reimbursement is not allowed for these services.

Medicaid school based services are not covered for beneficiaries involuntarily residing in a detention setting with a Benefit Plan ID of INCAR-ESO, INCAR-MA, INCAR-MA-E, or MA-HMP-INC.

Coverage is based on medically necessary, Medicaid-covered services already being provided in the school setting and enables these services provided to Medicaid-eligible beneficiaries to be billed to Medicaid. This ensures federal participation in the funding of these Medicaid covered services. Enrollment as a Michigan Medicaid provider for services delivered in the school setting is limited to the Intermediate School Districts (ISDs), Detroit Public Schools, and Michigan School for the Deaf. For the purpose of this document, the ISDs, Detroit Public Schools, and Michigan School for the Deaf will be referred to as "ISDs" for simplicity.

Enrolled providers are required to establish an interagency agreement to facilitate coordination and cooperation with other human service agencies operating within the same service area. Medicaid services provided by the ISDs are to be provided as outlined in the IEP/IFSP treatment plan and are not expected to replace or substitute for services already provided by other agencies. If services are being provided by another program, ISDs are expected to coordinate the services to prevent service overlap and to assure continuity of care to the Medicaid beneficiary. Enrollment as a SBS provider is not expected to result in any change in the education agency's set of existing services or service utilization. MDHHS periodically evaluates the impact of Medicaid enrollment on special education programs through review of service utilization and other program data and information.
Covered services do not require prior authorization but must be documented and provided by qualified personnel as specified in the Covered Services Section of this chapter.

The following terms have specific meanings in the school setting:

<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Assistive Technology Device (ATD)</td>
<td>Per IDEA, Section 602, the term &quot;assistive technology device&quot; means any item, piece of equipment or product system, whether acquired commercially off the shelf or modified or customized, that is used to increase, maintain, or improve functional capabilities of a child with a disability.</td>
</tr>
<tr>
<td>Assistive Technology Service</td>
<td>The term &quot;assistive technology service&quot; means any service that directly assists a child with a disability in the selection, acquisition or use of an assistive technology device.</td>
</tr>
<tr>
<td>Certified Public Expenditure</td>
<td>A certified public expenditure is an expenditure of a governmental unit whose state share is supported by tax dollars, or a mix of tax dollars and appropriated dollars, and is certified as eligible for federal match.</td>
</tr>
<tr>
<td>Claims Development Software</td>
<td>The claims development software is a custom-developed software that automates the school district claiming process. The claims development process is comprised of three components: sampling, training, and costs/claim generation.</td>
</tr>
<tr>
<td>Direct Medical Services Program</td>
<td>Direct medical services, specialized transportation, targeted case management and personal care services provided in the school setting and reimbursed by Medicaid.</td>
</tr>
</tbody>
</table>
### Medicaid Provider Manual

#### Durable Medical Equipment, Supplies, Prosthetics and Orthotics (DMEPOS)

- DME items are those that can stand repeated use, are primarily and customarily used to serve a medical purpose, are not useful to a person in the absence of an illness or injury, and can be used in the beneficiary’s home. DME is a covered benefit when:
  - It is medically and functionally necessary to meet the needs of the beneficiary.
  - It may prevent frequent hospitalization or institutionalization.
  - It is life sustaining.

- Medical Supplies are those items that are required for medical management of the beneficiary, are disposable or have a limited life expectancy, and can be used in the beneficiary’s home. Medical supplies are items that:
  - Treat a medical condition.
  - Prevent unnecessary hospitalization or institutionalization.
  - Support DME used by the beneficiary.

- Prosthetics artificially replace a portion of the body to prevent or correct a physical anomaly or malfunctioning portion of the body. Prosthetics are a benefit to:
  - Improve and/or restore the beneficiary’s functional level.
  - Enable a beneficiary to ambulate or transfer.

- Orthotics assist in correcting or strengthening a congenital or acquired physical anomaly or malfunctioning portion of the body. Orthotics are a benefit to:
  - Improve and/or restore the beneficiary’s functional level.
  - Prevent or reduce contractures.
  - Facilitate healing or prevent further injury.

#### Enrolled Medicaid Provider

- The 56 Michigan Intermediate School Districts, Detroit Public Schools, and Michigan School for the Deaf that have enrolled and revalidated with the MDHHS CHAMPS Provider Enrollment subsystem.

#### HT Modifier (Multi-disciplinary team)

- The HT modifier is used when billing for an assessment, evaluation or test performed for the IDEA Assessment. Each qualified staff bills using the appropriate procedure code followed by the modifier HT (multi-disciplinary team).

#### IEP (Individualized Education Program)

- A written plan for services for eligible students between the ages of 4 and 26 in Michigan as determined by the federal IDEA statute. Medicaid funds are available to reimburse for health and medical services that are a part of a student’s IEP for beneficiaries up to the age of 21.

#### IFSP (Individualized Family Service Plan)

- A written plan for a child with a disability who is between the ages of zero and three years that is developed jointly by the family and appropriate qualified personnel, and is based on multi-disciplinary evaluation and assessment of the child’s unique strengths and needs, as well as a family-directed assessment of the priorities, resources and concerns. Medicaid funds are available to reimburse for health and medical services that are a part of a child’s IFSP.
IDEA (Individuals with Disabilities Education Act) | The federal statute, IDEA of 1990 as amended in 2004, which requires public schools to determine whether a child has a disability, develop a plan that details the education and support services that the student will receive, provide the services, and evaluate the plan at least annually. There may be federal funding available for some of these responsibilities.

IDEA Assessment | An IDEA assessment is a formal evaluation that includes assessments, evaluations, tests and all related activities performed to determine if an individual is eligible under provisions of the IDEA of 1990, as amended in 2004, and are related to the evaluation and functioning of the individual.

ISD (District) | A corporate body established by statute in the Michigan Revised School Code (PA 451 of 1976) that is regulated by an intermediate school board. Michigan has 56 intermediate school districts.

MDE (Michigan Department of Education) | A department within the State of Michigan.

Random Moment Time Study | A random moment sampling to determine the extent to which Medicaid-reimbursable activities are being performed by capturing what is done during a specific moment in time.

School-Based Services | A program which provides medically necessary Medicaid covered services in the school setting. All Michigan ISDs, Detroit Public Schools, and Michigan School for the Deaf participate in the Direct Medical Services Program.

School Clinical Record | All the written or electronic information that has been created and is necessary to fully disclose and document the services requested for reimbursement.

Special Education Transportation | Transport to and from the student’s pick-up and drop-off site where school based services are provided.

TL Modifier (Re-evaluation of Existing Data (REED)) | The TL modifier is used with the appropriate procedure codes to identify when a re-evaluation of existing data (REED) was used in the determination of the child’s eligibility for special education services.

TM Modifier (Individualized Education Program [IEP]) | The TM modifier is used when billing for the multi-disciplinary team assessment for the development, review and revision of an IEP/IFSP treatment plan. Each qualified staff bills for this assessment using the appropriate procedure code with the modifier TM (Individualized Education Program [IEP]).

Treatment Plan | If an evaluation indicates that Medicaid-covered services are required, the qualified staff must develop and maintain a treatment plan for the student. The student’s IEP/IFSP form may suffice as the treatment plan as long as the IEP/IFSP contains the required components described under the Treatment Plan subsection of this section.

1.1 Children’s Special Health Care Services

The Medicaid School Based Services program covers services provided to children who are determined either dually eligible for Children's Special Health Care Services (CSHCS) and Medicaid (Title V/XIX), or those eligible for only Medicaid (Title XIX). SBS providers are not reimbursed for beneficiaries enrolled only in the CSHCS program (Title V only), and must not submit claims for these beneficiaries.
1.2 THIRD PARTY LIABILITY

Federal regulations require that all identifiable financial resources available for payment be billed prior to billing Medicaid. If a Medicaid-eligible child is presently covered by another resource and the school district does not bill the other resource, Medicaid cannot be billed for the services. (Refer to the Coordination of Benefits chapter for additional information.)

1.3 MEDICAL NECESSITY

A Medicaid service provided by an ISD is determined medically necessary when all of the following criteria are met:

- Addresses a medical or mental disability;
- Needed to attain or retain the capability for normal activity, independence or self care;
- Is included in the student’s IEP/IFSP treatment plan; and
- Is ordered, in writing, by a physician or other licensed practitioner acting within the scope of his/her practice under State law. Students who require speech, language and hearing services must be referred. The written order/referral must be updated at least annually. A stamped signature is not acceptable.

1.4 UNDER THE DIRECTION OF AND SUPERVISION

Certain specified services may be provided under the direction of or under the supervision of another clinician. For the supervising clinician, “under the direction of” means that the clinician is supervising the individual's care which, at a minimum, includes seeing the individual initially, prescribing the type of care to be provided, reviewing the need for continued services throughout treatment, assuring professional responsibility for services provided, and ensuring that all services are medically necessary. "Under the direction of" requires face-to-face contact by the clinician at least at the beginning of treatment and periodically thereafter.

“Supervision of” limited-licensed mental health professionals consists of the practitioner meeting regularly with another professional, at an interval described within the professional administrative rules, to discuss casework and other professional issues in a structured way. This is often known as clinical or counseling supervision or consultation. The purpose is to assist the practitioner to learn from his or her experience and expertise, as well as to ensure good service to the client or patient.

1.5 COVERED SERVICES

Medicaid covered services billed by ISDs include:

- Evaluations and tests performed for assessments
- Occupational Therapy Services
- Orientation and Mobility Services
- Assistive Technology Device Services
- Physical Therapy Services
Speech, Language and Hearing Therapy Services  
Psychological, Counseling and Social Work Services  
Developmental Testing Services  
Nursing Services  
Physician and Psychiatrist Services  
Personal Care Services  
Targeted Case Management (TCM) Services  
Specialized Transportation Services

1.6 SERVICE EXPECTATIONS

The IEP/IFSP treatment plan must include the appropriate annual goals and short-term objectives, criteria, evaluation procedures, and schedules for determining whether the objectives are being achieved within an appropriate period of time (at least annually). All therapy services must be skilled (i.e., require the skills, knowledge, and education of a licensed occupational therapist, licensed physical therapist, or fully licensed speech-language pathologist or licensed audiologist). Interventions expected to be provided by another practitioner (e.g., teacher, registered nurse), family member or caregiver are not reimbursable as occupational, physical, or speech, language and hearing therapy by this program.

To be covered by Medicaid, occupational, physical, and speech, language and hearing therapy must address a beneficiary’s medical need that affects his/her ability to learn in the classroom environment. MDHHS does not reimburse for therapies that do not have medically related goals (i.e., handwriting, increasing attention span, identifying colors and numbers, enhancing vocabulary, improving sentence structure, and reading).

Group therapy or treatment must be provided in groups of two to eight. Services provided as part of a regular classroom activity are not reimbursable. When regularly scheduled attention is provided to one beneficiary who is part of the class currently in session, the service is not reimbursable.

Supplies or equipment utilized in service delivery are included as part of the service and are not reimbursed separately. Art, music and recreation therapies are not covered services.

Medicaid is required to follow the procedure code definition from the Current Procedural Terminology (CPT) and Healthcare Common Procedure Coding System (HCPCS) manuals. Procedure codes referencing office or outpatient facility include the medical services provided in the school setting. Procedure codes that do not specify a unit of time are to be billed per session. Group therapy is billed per beneficiary.

Certain CPT/HCPCS code descriptions include a specified unit of service time. Service times are based on the time it generally takes to provide the service. If the procedure code specifies “up to 15 minutes of service”, the service may be billed in a unit of time from 1-15 minutes. If the procedure code specifies a unit of time “each 15 minutes”, the code may be billed when the service time equals the specified unit of time. Any additional time cannot be billed unless the full time specified is reached.

Consultation or consultative services are an integral part or an extension of a direct medical service and are not separately reimbursable.
1.7 TREATMENT PLAN

Requirements

If an evaluation indicates that Medicaid-covered services are required, the qualified staff must develop and maintain a treatment plan for the beneficiary. The beneficiary's IEP/IFSP form may suffice as the treatment plan as long as the IEP/IFSP contains the required components described below. Only qualified staff may initiate, develop or change the beneficiary's treatment plan. The treatment plan must be signed, titled and dated by the qualified staff prior to billing Medicaid for services and must be retained in the beneficiary's school clinical record. (Refer to the Covered Services Section of this chapter for definitions of qualified staff.)

Components

The treatment plan, which is an immediate result of the evaluation, must consist of the following components:
- Beneficiary's name;
- Description of the beneficiary's qualifying diagnosis and medical condition;
- Time-related goals that are measurable and significant to the beneficiary's function and/or mobility;
- Long-term goals that identify specific functional achievement to serve as indicators that the service is no longer needed;
- Anticipated frequency and duration of treatment required to meet the time-related goals;
- Plan for reaching the functional goals and outcomes in the IEP/IFSP;
- A statement detailing coordination of services with other providers (e.g., medical and educational); and
- All services are provided with the expectation that the beneficiary's primary care provider and, if applicable, the beneficiary's case manager are informed on a regular basis.

Review

The treatment plan must be reviewed and updated at least annually as part of the IEP/IFSP multi-disciplinary team assessment process, or more frequently if the beneficiary's condition changes or alternative treatments are recommended.

1.8 EVALUATIONS

Evaluations for medical services are covered when:
- Performed as part of the IDEA Assessment.
- The beneficiary left and is re-entering special education.
- An initial development, review or revision of the student's IEP/IFSP treatment plan will occur.
- A change or decrease in function occurs.
1.8.A. EVALUATIONS PERFORMED FOR DMEPOS MEDICAL SUPPLIERS

If an ISD physical therapist, occupational therapist, speech pathologist or audiologist performs assessments for DMEPOS that are billed by a Medicaid medical supplier, the clinician must comply with all prior authorization policies and procedures regarding that DMEPOS item. For example, a physician must order the assessment. The clinician must comply with all requirements for the assessments specified in the Medical Supplier Chapter of this manual. For example, the clinician must perform and write his/her own evaluation and may not sign evaluations completed by a medical supplier. Three appropriate economical alternatives must be ruled out for some items. (Refer to the Medical Supplier Chapter of this manual for details.) If the child is also receiving physical therapy, occupational therapy, speech pathology or audiology services in another outpatient setting, it may be more appropriate for the outpatient clinician to perform the assessment. The ISD clinician must coordinate with all clinicians in other settings.
### SECTION 2 – COVERED SERVICES

#### 2.1 INDIVIDUALS WITH DISABILITIES EDUCATION ACT ASSESSMENT AND IEP/IFSP DEVELOPMENT, REVIEW AND REVISION

<table>
<thead>
<tr>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Individuals with Disabilities Education Act (IDEA) Assessment is a formal evaluation that includes assessments, evaluations, tests and all related activities performed to determine if a beneficiary is eligible under provisions of the IDEA of 1990, as amended in 2004, and are related to the evaluation and functioning of the beneficiary. These services are reimbursable only after they result in the implementation of an IEP/IFSP treatment plan. If an IEP/IFSP treatment plan is not implemented within one year of the date of service, then none of the services provided are covered.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Provider Qualifications</th>
</tr>
</thead>
<tbody>
<tr>
<td>Qualified staff can bill for assessments, tests, and evaluations performed for the IDEA Assessment. To be covered by Medicaid, the staff must have the following Michigan current credentials:</td>
</tr>
<tr>
<td>• A licensed occupational therapist (OT)</td>
</tr>
<tr>
<td>• A certified orientation and mobility specialist (O&amp;M)</td>
</tr>
<tr>
<td>• A licensed physical therapist (PT)</td>
</tr>
<tr>
<td>• A fully licensed speech-language pathologist (SLP)</td>
</tr>
<tr>
<td>• A licensed audiologist</td>
</tr>
<tr>
<td>• A fully licensed psychologist</td>
</tr>
<tr>
<td>• A limited-licensed psychologist (under the supervision of a licensed psychologist)</td>
</tr>
<tr>
<td>• A licensed professional counselor</td>
</tr>
<tr>
<td>• A limited-licensed counselor (under the supervision of a licensed professional counselor)</td>
</tr>
<tr>
<td>• A licensed master’s social worker</td>
</tr>
<tr>
<td>• A limited-licensed master’s social worker (under the supervision of a licensed master’s social worker)</td>
</tr>
<tr>
<td>• A licensed physician or psychiatrist (MD or DO)</td>
</tr>
<tr>
<td>• A registered nurse (RN)</td>
</tr>
</tbody>
</table>
Qualified staff can bill for three distinct types of assessments/evaluations/tests. All activities, such as meetings and written reports related to the assessment/evaluation/test, are an integral part or extension of the service and are not separately reimbursable. For a complete listing of procedure codes, refer to the School Based Services CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)

- **The HT modifier** is used with the procedure code when billing for an assessment/evaluation/test performed for the IDEA Assessment. Each qualified staff bills using the appropriate procedure code below followed by the modifier HT (multi-disciplinary team). The date of service is the date of determination of eligibility for special education or early-on services. The determination date must be included in the assessment/evaluation/test.

- **The TL modifier** is used with the appropriate procedure codes to identify when a re-evaluation of existing data (REED) was used in the determination of the child's eligibility for special education services.

- **The TM modifier** is used with the procedure code when billing for the multi-disciplinary team assessment to develop, review and revise an IEP/IFSP treatment plan. Each qualified staff bills using the appropriate procedure code below with the modifier TM (Individualized Education Program [IEP]). The date of service is the date of the multi-disciplinary team assessment.

- **52 Modifier (Reduced Services)** - The 52 modifier is used to describe circumstances in which services provided were reduced in comparison to the full description of the service.

- No modifier is used when assessments/evaluations/tests are provided not related to the IDEA Assessment or the IEP/IFSP treatment plan development, review and revision. Each qualified staff bills for these activities using the appropriate procedure code below with no modifier. The date of service is the date the assessment/evaluation/test is completed.

### 2.2 OCCUPATIONAL THERAPY (INCLUDES ORIENTATION AND MOBILITY SERVICES AND ASSISTIVE TECHNOLOGY DEVICE SERVICES)

#### 2.2.A. OCCUPATIONAL THERAPY SERVICES

<table>
<thead>
<tr>
<th>Definition</th>
<th>Occupational Therapy:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Occupational therapy (OT) must be rehabilitative, active or restorative and designed to correct or compensate for a medical problem interfering with age-appropriate functional performance. Occupational therapy services must require the skills, knowledge, and education of a licensed occupational therapist, licensed occupational therapy assistant, or Orientation and Mobility specialist.</td>
</tr>
</tbody>
</table>

<p>| Prescription | Occupational therapy services must be prescribed by a physician and updated annually. A stamped physician signature is not acceptable. Services supported by an Individualized Education Program can precede the signed prescription by up to 90 days; however, the active period of the prescription cannot be longer than one year. |</p>
<table>
<thead>
<tr>
<th>Provider Qualifications</th>
</tr>
</thead>
<tbody>
<tr>
<td>OT services may be reimbursed when provided by:</td>
</tr>
<tr>
<td>▪ A licensed occupational therapist (OT); or</td>
</tr>
<tr>
<td>▪ A licensed occupational therapy assistant (OTA) under the direction of a licensed occupational therapist (OT).</td>
</tr>
<tr>
<td>NOTE: The OTA’s services must follow the evaluation and treatment plan developed by the OT. The OT must supervise and monitor the OTA’s performance with continuous assessment of the beneficiary’s progress. All documentation must be reviewed and signed by the supervising OT.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Evaluations for Occupational Therapies</th>
</tr>
</thead>
<tbody>
<tr>
<td>Evaluations are formalized testing and reports for the development of the beneficiary’s treatment plan. They may be completed by a licensed occupational therapist.</td>
</tr>
<tr>
<td>An evaluation includes:</td>
</tr>
<tr>
<td>▪ The treatment diagnosis and the medical diagnosis, if different from the treatment diagnosis;</td>
</tr>
<tr>
<td>▪ Current therapy being provided to the beneficiary in this and other settings;</td>
</tr>
<tr>
<td>▪ Medical history as it relates to the current course of therapy;</td>
</tr>
<tr>
<td>▪ The beneficiary’s current functional status (functional baseline);</td>
</tr>
<tr>
<td>▪ The standardized and other evaluation tools used to establish the baseline and to document progress;</td>
</tr>
<tr>
<td>▪ Assessment of the beneficiary’s performance components (strength, dexterity, range of motion, sensation, perception) directly affecting the beneficiary’s ability to function;</td>
</tr>
<tr>
<td>▪ Assessment of the beneficiary’s cognitive skill level (e.g., ability to follow directions, including auditory and visual, comprehension); and</td>
</tr>
<tr>
<td>▪ Evaluation of the needs related to assistive technology device services, including a functional evaluation of the beneficiary.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Assessments for Durable Medical Equipment</th>
</tr>
</thead>
<tbody>
<tr>
<td>If an ISD occupational therapist performs assessments for DMEPOS that are billed by a Medicaid medical supplier, the clinician must comply with all prior authorization policies and procedures regarding that DMEPOS item. For example, a physician must order the assessment. The clinician must comply with all requirements for the assessments specified in the Medical Supplier Chapter of this manual. For example, the clinician must perform and write his/her own evaluation and may not sign evaluations completed by a medical supplier. Three appropriate economical alternatives must be ruled out for some items. (Refer to the Medical Supplier Chapter of this manual for details.) If the child is also receiving physical therapy, occupational therapy, speech pathology or audiology services in another outpatient setting, it may be more appropriate for the outpatient clinician to perform the assessment. The ISD clinician must coordinate with all clinicians in other settings.</td>

</table>

| Procedure Codes | For a complete listing of procedure codes, refer to the School Based Services CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.) |
2.2.B. Orientation and Mobility Services

| Definition       | Orientation and Mobility Services:  
|                 | Orientation and mobility services are services provided to blind or visually impaired students by qualified personnel to enable those students to attain systematic orientation to and safe movement within their environment in the school, home and community. Services are based on the individual student's needs for assistance in compensatory skill development, visual efficiency, utilization of low vision aids/devices and technology, etc.  
|                 | Spatial and environmental concepts and use of information received by the senses (such as sound, temperature and vibration) to establish, maintain, or regain orientation and line of travel (for example, using sound at a traffic light to cross the street); to use the long cane, as appropriate, to supplement visual travel skills or as a tool for safely negotiating the environment for students with no available travel vision; and to understand and use remaining vision and distance low vision aids/devices, as appropriate. |

| Prescription     | Orientation and mobility services must be prescribed by a physician and updated annually. A stamped physician signature is not acceptable.  
|                 | Services supported by an Individualized Education Program can precede the signed prescription by up to 90 days; however, the active period of the prescription cannot be longer than one year. |

| Provider Qualifications | Orientation and mobility services may be reimbursed when provided by:  
|                        | • A certified orientation and mobility specialist with current certification from the Academy for Certification of Vision Rehabilitation and Education Professionals (ACVREP); or  
|                        | • A licensed occupational therapist. |
| Evaluations | Evaluations are formalized testing and reports for the development of the beneficiary’s treatment plan. They may be completed by an Orientation and Mobility Specialist (O&M) or a licensed occupational therapist. An evaluation for Orientation and Mobility services includes:  
- The treatment diagnosis and the medical diagnosis, if different from the treatment diagnosis;  
- Medical history as it relates to the current course of therapy;  
- The beneficiary’s current functional status (functional baseline);  
- The standardized and other evaluation tools used to establish the baseline and to document progress;  
- Assessment of the beneficiary’s performance components (status of sensory skills, proficiency of use of travel tools, current age-appropriate independence, complexity or introduction of new environment, caregiver input, assessment in the home/living environment, assessment in the school environment, assessment in the residential/neighborhood environment, assessment in the commercial environment, and assessment in the public transportation environment;  
- Assessment of the beneficiary’s cognitive skill level (e.g., ability to follow directions, including auditory and visual, comprehension); and  
- Evaluation of the needs related to assistive technology device services, including a functional evaluation of the beneficiary. |
|---|---|
| Services | Orientation and mobility services include:  
- Providing assistance in the development of skills and knowledge that enable the child to travel independently to the highest degree possible, based on assessed needs and the IEP;  
- Training the child to travel with proficiency, safety and confidence in familiar and unfamiliar environments;  
- Preparing and using equipment and material, such as tactile maps, models, distance low vision aids/devices, and long canes, for the development of orientation and mobility skills;  
- Evaluation and training performed to correct or alleviate movement deficiencies created by a loss or lack of vision;  
- Communication skills training (teaching Braille is not a covered benefit);  
- Systematic orientation training to allow safe movement within their environments in school, home and community;  
- Spatial and environmental concept training and training in the use of information received by the senses (such as sound, temperature and vibration) to establish, maintain, or regain orientation;  
- Visual training to understand and use the remaining vision for those with low vision;  
- Training necessary to activate visual motor abilities;  
- Training to use distance low vision aids/devices; and  
- Independent living skills training. |

### 2.2.C. ASSISTIVE TECHNOLOGY DEVICE SERVICES

#### Definition

Assistive Technology Device Services General Description:

Utilizing the description in Section 602(2) of the Individuals with Disabilities Education Act (IDEA), the term ‘assistive technology device’ means any item, piece of equipment, or product system, whether acquired commercially off the shelf, modified, or customized, that is used to increase, maintain, or improve functional capabilities of a child with a disability. Therapists should restrict their evaluations and services to those within the scope of their practice and consistent with their education and training.

#### Prescription

Assistive technology device services must be prescribed by a physician and updated annually. A stamped physician signature is not acceptable.

#### Provider Qualifications

Assistive technology device services may be reimbursed when provided by:

- A licensed occupational therapist (OT); or
- A licensed occupational therapy assistant (OTA).

#### Evaluations for Assistive Technology Devices

Evaluations are formalized testing and reports for the development of the beneficiary’s treatment plan. They may be completed by a licensed occupational therapist.

An evaluation includes:

- The treatment diagnosis and the medical diagnosis, if different from the treatment diagnosis;
- Current therapy being provided to the beneficiary in this and other settings;
- Medical history as it relates to the current course of therapy;
- The beneficiary’s current functional status (functional baseline);
- The standardized and other evaluation tools used to establish the baseline and to document progress;
- Assessment of the beneficiary’s performance components (strength, dexterity, range of motion, sensation, perception) directly affecting the beneficiary’s ability to function;
- Assessment of the beneficiary’s cognitive skill level (e.g., ability to follow directions, including auditory and visual, comprehension); and
- Evaluation of the needs related to assistive technology device services, including a functional evaluation of the beneficiary in the school environment and home.
### Assessments for Durable Medical Equipment

If an ISD occupational therapist performs assessments for DMEPOS that are billed by a Medicaid medical supplier, the clinician must comply with all prior authorization policies and procedures regarding that DMEPOS item. For example, a physician must order the assessment. The clinician must comply with all requirements for the assessments specified in the Medical Supplier Chapter of this manual. For example, the clinician must perform and write his/her own evaluation and may not sign evaluations completed by a medical supplier. Three appropriate economical alternatives must be ruled out for some items. (Refer to the Medical Supplier Chapter of this manual for details.) If the child is also receiving physical therapy, occupational therapy, speech pathology or audiology services in another outpatient setting, it may be more appropriate for the outpatient clinician to perform the assessment. The ISD clinician must coordinate with all clinicians in other settings.

### Services

ATD services are intended to directly assist a beneficiary with a disability in the selection, coordination of acquisition, or use of an ATD. The direct acquisition of medical equipment, such as wheelchairs etc., is not a covered benefit of the SBS program; this service must be billed under the Medical Supplier program coverage. The direct acquisition of medical equipment is covered under the Medical Supplier Medicaid benefit.

Assistive Technology Device Services include:

- Coordinating and using other therapies, interventions, or services with the ATD.
- Training or technical assistance for the beneficiary or, if appropriate, the beneficiary's parent/guardian.
- Training or technical assistance for professionals providing other education or rehabilitation services to the beneficiary receiving ATD services.
- Neuromuscular re-education of movement, balance, coordination, kinesthetic sense, posture, and/or proprioception for sitting and/or standing activities.
- Evaluating the needs of the beneficiary, including a functional evaluation of the beneficiary. ATD services are intended to directly assist a beneficiary with a disability in the selection, coordination of acquisition, or use of an ATD.
- Selecting, providing for the acquisition of the device, designing, fitting customizing, adapting, applying, retaining or replacing the ATD, including orthotics.
- Wheelchair assessment, fitting, training. If the wheelchair assessment is for equipment billed by a Medicaid medical supplier, all prior authorization and coverage policies and procedures in the Medical Supplier Chapter of this manual must be adhered to by school based providers.

### Procedure Codes

For a complete listing of procedure codes, refer to the School Based Services CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)
### 2.3 PHYSICAL THERAPY SERVICES (INCLUDES ASSISTIVE TECHNOLOGY DEVICE SERVICES)

#### 2.3.A. PHYSICAL THERAPY SERVICES

<table>
<thead>
<tr>
<th>Definition</th>
<th>Physical therapy (PT) must be rehabilitative, active or restorative and designed to correct or compensate for a medical problem. Physical therapy services must require the skills, knowledge and education of a PT or PTA to provide therapy. Treatment is performed through the use of therapeutic exercises and rehabilitative procedures.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prescription</td>
<td>Physical therapy services must be prescribed by a physician and updated annually. A stamped physician signature is not acceptable.</td>
</tr>
</tbody>
</table>
| Provider Qualifications | PT services may be reimbursed when provided by:  
  - A licensed physical therapist (PT); or  
  - A licensed physical therapy assistant (PTA) under the direction of a licensed physical therapist (PT) (i.e., the PT supervises and monitors the PTA's performance with continuous assessment of the beneficiary's progress). All documentation must be reviewed and signed by the supervising PT. |
| Evaluations for Physical Therapies | Evaluations are formalized testing and reports to determine a beneficiary’s need for services and recommend a course of treatment. They may be completed by a PT. Evaluations include:  
  - The treatment diagnosis and the medical diagnosis, if different than the treatment diagnosis;  
  - Current therapy being provided to the beneficiary in this and other settings;  
  - Medical history as it relates to the current course of therapy;  
  - The beneficiary’s current functional status (i.e., functional baseline);  
  - The standardized and other evaluation tools used to establish the baseline and to document progress;  
  - Assessment of the beneficiary’s performance components (e.g., strength, dexterity, range of motion) directly affecting the beneficiary’s ability to function;  
  - Assessment of the beneficiary’s cognitive skill level (e.g., ability to follow directions, including auditory and visual, comprehension); and  
  - Evaluation of the needs related to assistive technology device services, including a functional evaluation of the beneficiary. |
### Assessments for Durable Medical Equipment

If an ISD physical therapist performs assessments for DMEPOS that are billed by a Medicaid medical supplier, the clinician must comply with all prior authorization policies and procedures regarding that DMEPOS item. For example, a physician must order the assessment. The clinician must comply with all requirements for the assessments specified in the Medical Supplier Chapter of this manual. For example, the clinician must perform and write his/her own evaluation and may not sign evaluations completed by a medical supplier. Three appropriate economical alternatives must be ruled out for some items. (Refer to the Medical Supplier Chapter of this manual for details.) If the child is also receiving physical therapy, occupational therapy, speech pathology or audiology services in another outpatient setting, it may be more appropriate for the outpatient clinician to perform the assessment. The ISD clinician must coordinate with all clinicians in other settings.

#### Services

Physical therapy services include:
- Group therapy provided in a group of two to eight beneficiaries;
- Gait training;
- Training in functional mobility skills (e.g., ambulation, transfers, and wheelchair mobility);
- Stretching for improved flexibility; and
- Modalities to allow gains of function, strength or mobility.

#### Procedure Codes

For a complete listing of procedure codes, refer to the School Based Services CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)

### 2.3.B. ASSISTIVE TECHNOLOGY DEVICE SERVICES

#### Definition

**Assistive Technology Device Services General Description:**
Utilizing the description in Section 602(2) of the Individuals with Disabilities Education Act (IDEA), the term 'assistive technology device' means any item, piece of equipment, or product system, whether acquired commercially off the shelf, modified, or customized, that is used to increase, maintain, or improve functional capabilities of a child with a disability. Therapists should restrict their evaluations and services to those within the scope of their practice and consistent with their education and training.

#### Prescription

Assistive technology device services must be prescribed by a physician and updated annually. A stamped physician signature is not acceptable.

#### Provider Qualifications

Assistive technology device services may be reimbursed when provided by:
- a licensed physical therapist (PT); or
- a licensed physical therapy assistant (PTA).
### Evaluations for Assistive Technology Devices

Evaluations are formalized testing and reports for the development of the beneficiary’s treatment plan. They may be completed by a PT.

An evaluation includes:

- The treatment diagnosis and the medical diagnosis, if different from the treatment diagnosis;
- Current therapy being provided to the beneficiary in this and other settings;
- Medical history as it relates to the current course of therapy;
- The beneficiary’s current functional status (functional baseline);
- The standardized and other evaluation tools used to establish the baseline and to document progress;
- Assessment of the beneficiary’s performance components (strength, dexterity, range of motion, sensation, perception) directly affecting the beneficiary’s ability to function;
- Assessment of the beneficiary’s cognitive skill level (e.g., ability to follow directions, including auditory and visual, comprehension); and
- Evaluation of the needs related to assistive technology device services, including a functional evaluation of the beneficiary in the school environment and home.

### Assessments for Durable Medical Equipment

If an ISD physical therapist performs assessments for DMEPOS that are billed by a Medicaid medical supplier, the clinician must comply with all prior authorization policies and procedures regarding that DMEPOS item. For example, a physician must order the assessment. The clinician must comply with all requirements for the assessments specified in the Medical Supplier Chapter of this manual. For example, the clinician must perform and write his/her own evaluation and may not sign evaluations completed by a medical supplier. Three appropriate economical alternatives must be ruled out for some items. (Refer to the Medical Supplier Chapter of this manual for details.) If the child is also receiving physical therapy, occupational therapy, speech pathology or audiology services in another outpatient setting, it may be more appropriate for the outpatient clinician to perform the assessment. The ISD clinician must coordinate with all clinicians in other settings.
| Services | ATD services are intended to directly assist a beneficiary with a disability in the selection, coordination of acquisition, or use of an ATD. The direct acquisition of medical equipment, such as wheelchairs, etc., is not a covered benefit of the SBS program; this service must be billed under the Medical Supplier program coverage. - Selecting, providing for the acquisition of the device, designing, fitting customizing, adapting, applying, retaining or replacing the ATD, including orthotics.  
- Wheelchair assessment, fitting, training. If the wheelchair assessment is for equipment billed by a Medical Supplier, all prior authorization and coverage policies and procedures in the Medical Supplier Chapter of this manual must be adhered to by school based providers. |

| Procedure Codes | For a complete listing of procedure codes, refer to the School Based Services CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.) |

### 2.4 SPEECH, LANGUAGE AND HEARING THERAPY (INCLUDES ASSISTIVE TECHNOLOGY DEVICE SERVICES)

#### 2.4.A. SPEECH, LANGUAGE AND HEARING THERAPY

| Definition | Speech, language and hearing therapy must be a diagnostic or corrective service to teach compensatory skills for deficits that directly result from a medical condition. This service is provided to beneficiaries with a diagnosed speech, language or hearing disorder adversely affecting the functioning of the beneficiary. Speech, language and hearing therapy must require the skills, knowledge and education of a fully licensed speech-language pathologist or audiologist to provide the therapy. |

| Prescription | Speech, language and hearing services require an annual referral from a physician. A stamped physician signature is not acceptable.  
Services supported by an Individualized Education Program can precede the signed referral by up to 90 days; however, the active period of the referral cannot be longer than one year. |
Provider Qualifications

Speech, language and hearing services may be reimbursed when provided by:

- A fully licensed speech-language pathologist (SLP);
- A licensed audiologist in Michigan;
- A speech-language pathologist (SLP) and/or audiology candidate (i.e., in his clinical fellowship year or having completed all requirements but has not obtained a license), under the direction of a qualified SLP or audiologist. All documentation must be reviewed and signed by the appropriately licensed SLP or licensed audiologist; or
- A limited licensed speech language pathologist, under the direction of a fully licensed SLP or audiologist. All documentation must be reviewed and signed by the appropriately licensed supervising SLP or licensed audiologist.

Evaluations for Speech Pathology Services

Evaluations are formalized testing and reports conducted to determine the need for services and recommendation for a course of treatment. They may be completed by a licensed SLP or audiologist.

Evaluations include:

- The treatment diagnosis and the medical diagnosis, if different from the treatment diagnosis;
- Current therapy being provided to the beneficiary in this and other settings;
- Medical history as it relates to the current course of therapy;
- The beneficiary’s current communication status (functional baseline);
- The standardized and other evaluation tools used to establish the baseline and to document progress; and
- Evaluation of the needs related to assistive technology device services, including a functional evaluation of the beneficiary.

Evaluations may also include, but are not limited to:

- Articulation - standardized tests that measure receptive and expressive language, mental age, oral motor skills, articulation skills, current diet level (including difficulties with any food consistencies), current means of communication, and a medical diagnosis.
- Language - standardized tests that measure receptive and expressive language, mental age, oral motor skills, current and previous means of communication, and medical diagnosis(es).
- Rhythm - standardized tests that measure receptive and expressive language, mental age, oral motor skills, and measurable assessment of dysfluency, current means of communication, and a medical diagnosis.
- Swallowing - copy of the video fluoroscopy or documentation that objectively addresses the laryngeal and pharyngeal stages, oral motor assessment that measures consistencies that have been attempted and the results, voice quality (i.e., pre- and post-feeding and natural voice), articulation assessment, and a standardized cognitive assessment.
- Voice - copy of the physician’s medical assessment of the beneficiary’s voice mechanism and the medical diagnosis.
Speech Assessments for Durable Medical Equipment

If an ISD speech pathologist or audiologist performs assessments for DMEPOS that are billed by a Medicaid medical supplier, the clinician must comply with all prior authorization policies and procedures regarding that DMEPOS item. For example, a physician must order the assessment. The clinician must comply with all requirements for the assessments specified in the Medical Supplier Chapter of this manual. For example, the clinician must perform and write his/her own evaluation and may not sign evaluations completed by a medical supplier. Three appropriate economical alternatives must be ruled out for some items. (Refer to the Medical Supplier Chapter of this manual for details.) If the child is also receiving physical therapy, occupational therapy, speech pathology or audiology services in another outpatient setting, it may be more appropriate for the outpatient clinician to perform the assessment. The ISD clinician must coordinate with all clinicians in other settings.

Services

Speech, language and hearing services include:
- Group therapy provided in a group of two to eight beneficiaries
- Articulation, language, and rhythm
- Swallowing dysfunction and/or oral function for feeding
- Voice therapy
- Speech, language or hearing therapy
- Speech reading/aural rehabilitation
- Esophageal speech training therapy
- Speech defect corrective therapy
- Fitting and testing of hearing aids or other communication devices

Procedure Codes

For a complete listing of procedure codes, refer to the School Based Services CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)

2.4.B. ASSISTIVE TECHNOLOGY DEVICE SERVICES

Definition

Assistive Technology Device Services General Description:
Utilizing the description in Section 602(2) of the Individuals with Disabilities Education Act (IDEA), the term ‘assistive technology device’ means any item, piece of equipment, or product system, whether acquired commercially off the shelf, modified, or customized, that is used to increase, maintain, or improve functional capabilities of a child with a disability. Therapists should restrict their evaluations and services to those within the scope of their practice and consistent with their education and training.

Prescription

Assistive technology device services must be prescribed by a physician and updated annually. A stamped physician signature is not acceptable.

Provider Qualifications

Assistive Technology services may be reimbursed when provided by:
- A licensed audiologist;
- A fully licensed speech-language pathologist (SLP)
### Evaluations for Assistive Technology Devices

Evaluations are formalized testing and reports for the development of the beneficiary’s treatment plan. They may be completed by an audiologist or SLP.

An evaluation includes:

- The treatment diagnosis and the medical diagnosis, if different from the treatment diagnosis;
- Current therapy being provided to the beneficiary in this and other settings;
- Medical history as it relates to the current course of therapy;
- The beneficiary’s current functional status (functional baseline);
- The standardized and other evaluation tools used to establish the baseline and to document progress;
- Assessment of the beneficiary’s performance components (strength, dexterity, range of motion, sensation, perception) directly affecting the beneficiary’s ability to function;
- Assessment of the beneficiary’s cognitive skill level (e.g., ability to follow directions, including auditory and visual, comprehension); and
- Evaluation of the needs related to assistive technology device services, including a functional evaluation of the beneficiary in the school environment and home.

### Assessments for Durable Medical Equipment

If an ISD audiologist or speech-language pathologist performs assessments for DMEPOS that are billed by a Medicaid medical supplier, the clinician must comply with all prior authorization policies and procedures regarding that DMEPOS item. For example, a physician must order the assessment. The clinician must comply with all requirements for the assessments specified in the Medical Supplier Chapter of this manual. For example, the clinician must perform and write his/her own evaluation and may not sign evaluations completed by a medical supplier. Three appropriate economical alternatives must be ruled out for some items. (Refer to the Medical Supplier Chapter of this manual for details.) If the child is also receiving physical therapy, occupational therapy, speech pathology or audiology services in another outpatient setting, it may be more appropriate for the outpatient clinician to perform the assessment. The ISD clinician must coordinate with all clinicians in other settings.

### Services

ATD services are intended to directly assist a beneficiary with a disability in the selection, coordination of acquisition, or use of an ATD. The direct acquisition of medical equipment, such as wheelchairs, etc., is not a covered benefit of the SBS program; this service must be billed under the Medical Supplier program coverage. The direct acquisition of medical equipment is covered under the Medicaid Medical Supplier benefit.

Assistive Technology Device Services include:

- Coordinating and using other therapies, interventions, or services with the ATD.
- Training or technical assistance for the beneficiary or, if appropriate, the beneficiary’s parent/guardian.
- Training or technical assistance for professionals providing other education or rehabilitation services to the beneficiary receiving ATD services.
- Evaluating the needs of the beneficiary, including a functional evaluation of the beneficiary. ATD services are intended to directly assist a beneficiary with a disability in the selection, coordination of acquisition, or use of an ATD.
2.4.C. Telepractice for Speech, Language and Hearing Services

Definition

Telepractice is the use of telecommunications and information technologies for the exchange of encrypted patient data for the provision of speech, language and hearing services. Telepractice must be obtained through real-time interaction between the patient's physical location (patient site) and the provider's physical location (provider site). Services are provided to patients through hardwire or internet connection. It is the expectation that providers, facilitators and staff involved in telepractice are trained in the use of equipment and software prior to servicing patients. Speech, language and hearing services administered by telepractice are subject to the same provisions as services provided to a patient in person.

Prescription

Speech, language and hearing services require an annual referral from a physician. A stamped physician signature is not acceptable.

Provider Qualifications

Speech, language and hearing services may be reimbursed when provided by:

- A fully licensed speech-language pathologist (SLP);
- A licensed audiologist in Michigan;
- A speech-language pathologist (SLP) and/or audiology candidate (i.e., in his clinical fellowship year or having completed all requirements but has not obtained a license) under the direction of a qualified SLP or audiologist. All documentation must be reviewed and signed by the appropriately licensed SLP or licensed audiologist; or
- A limited licensed speech language pathologist under the direction of a fully licensed SLP or audiologist. All documentation must be reviewed and signed by the appropriately licensed supervising SLP or licensed audiologist.

Conditions

Providers must ensure the privacy of the beneficiary and the security of any information shared via telemedicine. The technology used must meet the needs for audio and visual compliance in accordance with current regulations and industry standards. Refer to the General Information for Providers Chapter for complete Health Insurance Portability and Accountability Act (HIPAA) compliance requirements.

The patient site may be located within the school, at the patient’s home, or any other established site deemed appropriate by the provider. It must be a room free from distractions so as not to interfere with the telepractice session. A facilitator must be trained in the use of the telepractice technology and physically present at the patient site during the entire telepractice session to assist the patient at the direction of the SLP or audiologist.

Billing Instructions

Telepractice services are billed using the same procedure codes as services rendered to a patient who is physically present. In addition to the procedure code, billers use the “GT” modifier to identify services provided by telepractice.
### 2.5 Psychological, Counseling and Social Work Services

#### Definitions

Psychological, counseling and social work services include planning, managing and providing a program of face-to-face services for beneficiaries with diagnosed psychological conditions. Psychological, counseling and social work services must require the skills, knowledge and education of a psychologist, counselor or licensed social worker to provide treatment.

Psychotherapy is the treatment of a mental disorder or behavioral disturbance for which the clinician provides services through definitive therapeutic communication, attempts to alleviate the emotional disturbances, reverses or changes maladaptive patterns of behavior, and encourages personality growth and development. The codes for reporting psychotherapy are divided into two broad categories: Interactive Psychotherapy, and Insight-Oriented, Behavior-Modifying and/or Supportive Psychotherapy.

- Interactive psychotherapy refers to the use of physical aids and nonverbal communication to overcome barriers to therapeutic interaction between the clinician and a beneficiary who has not yet developed, or has lost, either the expressive language communication skills to explain their symptoms and response to treatment, or the receptive communication skills to understand the clinician if they would use ordinary adult language for communication.
- Insight-oriented, behavior-modifying and/or supportive psychotherapy refers to the development of insight or affective understanding, the use of behavior modification techniques, the use of supportive interactions, and the use of cognitive discussion of reality or any combination of the above to provide therapeutic change.

#### Provider Qualifications

Psychological, counseling and social work services may be reimbursed when provided by:

- A licensed physician or psychiatrist in Michigan;
- A fully licensed psychologist in Michigan;
- A limited-licensed psychologist under the supervision of a licensed psychologist;
- A temporary limited-licensed psychologist under the supervision of a licensed psychologist;
- A licensed master's social worker in Michigan;
- A limited licensed master's social worker under the supervision of a licensed master's social worker;
- A licensed professional counselor in Michigan; or
- A limited licensed counselor under the supervision of a licensed professional counselor.

#### Evaluations

Evaluations or assessments include tests, interviews and behavioral evaluations that appraise cognitive, emotional, social functioning and self-concept. These may also include interpretations of information about a beneficiary's behavior and conditions relating to functioning. A qualified psychologist, counselor or licensed social worker must complete them.
### Psychological Testing

Psychological testing includes tests, interviews, evaluations and recommendations for treatment. This may also include interpretations of information about a beneficiary's behavior and conditions relating to functioning. A fully licensed psychologist or a limited-licensed psychologist may perform psychological testing. Medicaid covers psychological testing that is reasonable and necessary for diagnosing the beneficiary's condition. Medicaid does not cover the time that a beneficiary spends alone in testing. The beneficiary's clinical record must be signed and dated by the staff that administered the tests, and include the actual tests administered and completed reports. The protocols for testing must be available for review. Psychological testing may be billed per hour with a five-hour maximum per year, and a report must be generated from the results of the tests. In accordance with CPT guidelines, the service includes testing time only; it does not include writing a report. Writing the report is considered a part of the testing process and is a requirement for billing.

The psychological testing report must include all of the following:
- Beneficiary name and birth date;
- Psychological tests administered;
- Summary of testing results;
- Treatment recommendations; and
- Psychologist name and dated signature.

### Procedure Codes

For a complete listing of procedure codes, refer to the School Based Services CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)

### Crisis Intervention

Crisis intervention services are unscheduled activities performed for the purpose of resolving an immediate crisis situation. Activities include crisis response, assessment, referral and direct therapy. Since these services are unscheduled activities, they are not listed in the beneficiary's IEP/IFSP treatment plan.

Crisis intervention must be billed using the following procedure code:

- **S9484** - Crisis intervention mental health services, per hour.

### 2.6 Developmental Testing

**Definition**

Developmental testing is medically related testing (not performed for educational purposes) provided to determine if motor, speech, language and psychological problems exist or to detect the presence of any developmental delays. Testing is accomplished by the combination of several testing procedures and includes the evaluation of the beneficiary's history and observation. Whenever possible and when age-appropriate, standardized objective measurements are to be used (e.g., Denver II) for children under the age of six. Administering the tests must generate material that is formulated into a report. Developmental testing done for educational purposes cannot be billed to Medicaid.

### 2.7 Nursing Services

**Definition**

Nursing services are professional services relevant to the medical needs of the beneficiary provided through direct intervention. Direct service interventions must be medically based services that are within the scope of the professional practice of the Registered Nurse (RN) and Licensed Practical Nurse (LPN), provided during a face-to-face encounter, and provided on a one-to-one basis.

Services include:

- Catheterizations or Catheter care
- Maintenance of tracheotomies
- Medication administration
- Oxygen administration
- Tube feeding
- Suctioning
- Ventilator care

Services considered observation or stand-by in nature are not covered.

LPN services can only be billed if performed under the supervision of an RN or physician.

**Prescription**

Direct service interventions require a physician's written order when the initial need for services is determined. Direct service interventions must be reviewed and revised annually or as medically necessary by the beneficiary's attending physician. The nurse is responsible for notifying the attending physician of any change in the beneficiary's condition which may result in a change or modification to the care plan.

**Provider Qualifications**

Nursing services may be reimbursed when provided by:

- A licensed Registered Nurse (RN) in Michigan; or
- A Licensed Practical Nurse (LPN) in Michigan.

**Evaluations**

A RN must complete the evaluations/assessments and prepare a nursing care plan. An evaluation/assessment may be performed when a change in the beneficiary's medical condition occurs. LPNs cannot bill for evaluations/assessments.

**Procedure Codes**

For a complete listing of procedure codes, refer to the School Based Services CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)
2.8 **Physician and Psychiatrist Services**

| **Definition** | Physician and psychiatrist services are services provided with the intent to diagnose, identify or determine the nature and extent of a beneficiary's medical or other health-related condition. Physician/psychiatrist services include:  
  - Evaluation and consultation with providers of covered services for diagnostic and prescriptive services; includes participation in multi-disciplinary team assessment.  
  - Record review for diagnostic and prescriptive services.  
  Only the services provided by a physician or psychiatrist (MD or DO) through SBS may be billed and reimbursed through the enrolled ISD.  
  Other physician or psychiatrist services, including those which may be delivered through other Medicaid-enrolled providers, are to be billed separately and may not be billed through the enrolled ISD. |
| **Provider Qualifications** | A licensed physician or psychiatrist (MD or DO) in Michigan. |
| **Procedure Codes** | For a complete listing of procedure codes, refer to the School Based Services CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)  
  Procedure codes that replicate the services of other billed codes, either in part or in total, will not be reimbursed for the same date of service.  
  If a physician order/referral is written as a result of a physician medical conference, the order/referral is considered to be a part of that service and is not separately reimbursable. |
### 2.9 PERSONAL CARE SERVICES

<table>
<thead>
<tr>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Personal Care Services are a range of human assistance services provided to persons with disabilities and chronic conditions which enables them to accomplish tasks that they would normally do for themselves if they did not have a disability. Assistance may be in the form of hands-on assistance or cueing so that the person performs the task by him/herself.</td>
</tr>
</tbody>
</table>

Personal Care Services may be provided when:
- The service is medically necessary.

Personal Care Services are not covered if they are:
- Provided by a family member. A family member is described by the Centers for Medicare & Medicaid Services (CMS) to be "legally responsible relatives"; thus, spouses of beneficiaries and parents of minor beneficiaries (including stepparents who are legally responsible for minor children).
- Not documented in the IEP/IFSP.
- Educational in focus, such as tutoring, preparation of educational materials or Braille interpretation.
- Performed as a group service; however, one or more students may be served one-at-a-time sequentially.

Personal Care Services may include, but are not limited to, assisting with the following:
- Eating/feeding
- Respiratory assistance
- Toileting
- Grooming
- Dressing
- Transferring
- Ambulation
- Personal hygiene
- Mobility/Positioning
- Meal preparation
- Skin care
- Bathing
- Maintaining continence
- Assistance with self-administered medications
- Redirection and intervention for behavior
- Health related functions through hands-on assistance, supervision and cueing
### Personal Care

**Paraprofessional Provider Qualifications**

The personal care paraprofessional personnel are employed in the Special Education Program and shall be qualified under the requirements established by their respective ISD plan. Providers must be trained in the skills needed to perform covered services, and must be under the direction of a qualified professional as designated in the IEP/IFSP. Paraprofessional personnel include:

- Teacher Aides
- Health Care Aides
- Instructional Aides
- Bilingual Aides
- Program Assistants
- Trainable Aides

### Prescription

In accordance with 42 CFR 440.167, authorization for Personal Care Services (PCS) may be done by a physician or "other licensed practitioner" operating within the scope of their practice. The State definition of "other licensed practitioner" consists of Registered Nurse (RN), Licensed Occupational Therapist, Licensed Physical Therapist (PT), Master of Social Work (MSW), or fully licensed Speech Language Pathologist (SLP). It is expected that personal care services will be authorized by the appropriate practitioner.

### Documentation

Personal care services must be medically necessary and the need for the service must be documented in the student's IEP/IFSP. Each child's school clinical record must contain a completed, signed and dated monthly activity checklist. Service categories (i.e., toileting, feeding, transferring, etc.), times and frequencies must be documented either in the IEP/IFSP, in an attached document, or in the child's treatment authorization.

### Procedure Codes

For a complete listing of procedure codes, refer to the School Based Services CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)

---

### 2.10 TARGETED CASE MANAGEMENT SERVICES

**Definition**

Targeted case management (TCM) services are services furnished to assist individuals in gaining access to needed medical, social, educational or other services.

Targeted case management services include the following assistance:

- A comprehensive assessment and periodic reassessment of an individual to determine the need for medical, social, educational or other services. These assessment activities include:
  - Taking client history;
  - Identifying the individual's needs and completing related documentation; and
Gathering information from other sources, such as family members, medical providers, social workers, and educators (if necessary), to form a complete assessment of the individual.

- Development (and periodic revision) of a specific care plan that:
  - Is based on the information collected through the assessment;
  - Specifies the goals and actions to address the medical, social, educational or other services needed by the individual;
  - Includes activities such as ensuring the active participation of the eligible individual, and working with the individual (or the individual’s authorized health care decision maker) and others to develop those goals; and
  - Identifies a course of action to respond to the assessed needs of the eligible individual.

- Referral and related activities:
  - To help an eligible individual obtain needed services, including activities that help link an individual with medical, social, educational providers or other programs and services that are capable of providing needed services, such as making referrals to providers for needed services and scheduling appointments for the individual;
  - Monitoring and follow-up activities;
  - Activities and contacts that are necessary to ensure the care plan is implemented and adequately addresses the individual’s needs, and which may be with the individual, family members, providers, or other entities or individuals, and conducted as frequently as necessary, including at least one annual monitoring, to determine whether the following conditions are met:
    - Services are being furnished in accordance with the individual’s care plan;
    - Services in the care plan are adequate.

If there are changes in the needs or status of the individual, necessary adjustments are made to the care plan and service arrangements.

TCM services may be reimbursed when provided by a Designated Case Manager.

Providers must maintain case records that document, for all individuals receiving case management, the following: the name of the individual, the dates of the case management services, the person providing the case management services, and the nature, content, and units of case management services received. The case record must also reflect whether the goals specified in the care plan have been achieved, whether the individual has declined services in the care plan, the need for and occurrences of coordination with other case managers, the timeline for obtaining needed services, and a timeline for re-evaluation of the plan.
### Provider Qualifications

The Designated Case Manager is the person responsible for the implementation of the plan of care/treatment plan. The Designated Case Manager must be an individual who meets one of the following criteria:

- A licensed RN in Michigan;
- A bachelor's degree with a major in a specific special education area;
- Has earned credit in coursework equivalent to that required for a major in a specific special education area; or
- Has a minimum of three years' personal experience in the direct care of an individual with special needs.

In addition to meeting at least one of the above, the Designated Case Manager must also demonstrate knowledge and understanding of all of the following:

- Services for infants and toddlers who are eligible under the IDEA law as appropriate;
- Part C of the IDEA law and the associated regulations;
- The nature and scope of services covered under IDEA, as well as systems of payments for services and other pertinent information;
- Provisions of direct care services to individuals with special needs; and
- Provisions of culturally competent services within the community being served.

### Designated Case Manager Services

Targeted Case Management services include:

- Assuring that standard re-examination and follow-up of the beneficiary are conducted on a periodic basis to ensure that the beneficiary receives needed diagnosis and treatment;
- Assisting families in identifying and choosing the most appropriate providers of care and services, scheduling appointments, and helping families to maintain contact with providers;
- Follow-up to ensure that the beneficiary receives needed diagnostic and treatment services;
- Assuring that case records are maintained and indicate all contacts with, or on behalf of, a beneficiary in the same manner as other covered services;
- Coordinating school based services and treatment with parents and the child;
- Monitoring and recommending a plan of action;
- Coordinating performance of evaluations, assessments and other services that the beneficiary needs;
- Facilitating and participating in the development, review, modification and evaluation of the multi-disciplinary team treatment plan;
- Activities that support linking and coordinating needed health services for the beneficiary;
- Providing a summary of provider, parent and student health and behavioral consultation; and
- Coordinating with staff/health professionals to establish continuum of health and behavioral services in the school setting.
**Procedure Code**  
For a complete listing of procedure codes, refer to the School Based Services CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)

### 2.11 SPECIAL EDUCATION TRANSPORTATION

**Definition**  
Special education specialized transportation services include transport to and from the beneficiary's pick-up and drop-off site where Medicaid services are provided. It includes no more than two one-way trips on a date of service.

The need for special education transportation must be specified in the beneficiary's IEP/IFSP treatment plan. Medicaid may reimburse for special education transportation when a beneficiary receives a Medicaid-covered service on the same day.

Medicaid does not reimburse for transportation provided in a regular or general education school bus. There is no additional payment for an attendant.

**Documentation**  
Federal requirements include documentation for transportation service claims that must be maintained for purposes of an audit trail, such as an ongoing trip log maintained by the provider of the special education transportation. Ridership must be documented for each one-way trip.

**Procedure Codes**  
For a complete listing of procedure codes, refer to the School Based Services CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)
Taxi and Private Vehicle Transportation

For a taxi or family vehicle transportation expense to be reimbursed, the following documentation must be on file at the local education agency (LEA) or intermediate school district (ISD):

- Specialized transportation must be included in the Individualized Education Program (IEP).
- A Medicaid covered medical service must be provided on the same day as the transportation.
- Dates and times of each trip must be listed on the LEA's or ISD's trip log.
- Documentation from the beneficiary's physician or a school provider treating the student, stating the reason taxi or family transportation is required must be retained in the student's file.
- For transportation by taxi, an additional statement justifying the need for a taxi and the reason other less costly means of transportation cannot be used must be retained in the student's file.
- For ongoing transportation needs, documentation is only required once per student per school year.
- For one-time or occasional use transportation, documentation is required for each trip, or trip period per beneficiary.
- The total number of trips claimed for taxi and family transportation must be included in the Special Education trip count on the Medicaid Allowable Expenditure Report (MAER).

Taxi and family vehicle cost reimbursement will be retroactive to July 1, 2012 if the proper documentation has been retained, and a claim for the trip has been approved through the Community Health Automated Medicaid Processing System (CHAMPS). Claims must be filed within one year from the date of service according to Medicaid timely filing requirements.

Transportation by stretcher car is not covered. The term "stretcher car" is defined as a vehicle capable of transporting a patient (student) in a prone or supine position (e.g., Ambucab).
SECTION 3 – QUALITY ASSURANCE AND COORDINATION OF SERVICES

3.1 QUALITY ASSURANCE

SBS providers must have a written quality assurance plan on file. SBS costs will be reviewed/audited by MDHHS for determination of medical necessity and to verify that all services were billed and paid appropriately. The purpose of the quality assurance plan is to establish and maintain a process for monitoring and evaluating the quality and documentation of covered services, and the impact of Medicaid enrollment on the school environment.

An acceptable quality assurance plan must address each of the following quality assurance standards:

- Covered services are medically necessary, as determined and documented through appropriate and objective testing, evaluation and diagnosis.
- The IEP/IFSP treatment plan identifies which covered services are to be provided and the service frequency, duration, goals and objectives.
- A monitoring program exists to ensure that services are appropriate, effective and delivered in a cost effective manner consistent with the reduction of physical or mental disabilities and assisting the beneficiary to benefit from special education.
- Billings are reviewed for accuracy.
- Staff qualifications meet current license, certification and program requirements.
- Established coordination and collaboration exists to develop plans of care with all other providers, (i.e., Public Health, MDHHS, Community Mental Health Services Programs (CMHSPs), Medicaid Health Plans (MHPs), Hearing Centers, Outpatient Hospitals, etc.).
- Parent/guardian and beneficiary participation exists outside of the IEP/IFSP team process in evaluating the impact of the SBS program on the educational setting, service quality and outcomes.

3.2 SERVICE COORDINATION AND COLLABORATION

Children with special needs have access to services available in both outpatient and school-based treatment settings. If treatment is provided in both settings, the goals and purpose for the two must be distinct. School based services are provided to assist a child with a disability to benefit from special education. Outpatient services are provided to optimize the child’s functional performance in relation to needs in the home or community setting and must not duplicate those provided in the school setting. Collaboration between the school and the community providers is mandated to coordinate treatment and to prevent duplication of services. This collaboration may take the form of phone calls, written communication logs, or participation in team meetings such as the IEP/IFSP meeting.

3.3 ISD RESPONSIBILITIES

Each ISD must establish an implementation plan that includes explicit quality control review mechanisms to ensure full staff training and compliance, accuracy and completeness of the RMTS sample frame (designated employees), adherence to MDHHS-published methodology, editing of all moments for completeness and consistency, and accurate financial and staffing reports. Claiming entities must also fully cooperate with any review requested by the U.S. Department of Health & Human Services (HHS),
3.3.A. SANCTIONS

It is the intent of the State to pursue, when necessary, remedial action or implement a Corrective Plan if the ISDs or their vendors are not in compliance with Medicaid policy and procedures. If these actions are not successful, a payment freeze will be implemented and sanctions put in place until the matter is resolved. ISDs are responsible for the actions of their vendors.

The following are examples of causes for sanctions. The list is not all-inclusive.

- Repeated errors in completing the RMTS forms or filing of the claims.
- Providing insufficient data or incomplete reports to the State Contractor.
- Failure to use the claims development software.
- Failure to submit requested information, reports, or data to the State Contractor, CMS, MDHHS, MDE, or failure to cooperate with representatives of these agencies during site visits, reviews or audits.
- Failure to comply with the federal mandate to submit procedure-specific claims through the Community Health Automated Medicaid Processing System (CHAMPS).
SECTION 4 – PROVIDER ENROLLMENT

4.1 ENROLLMENT

The 56 Michigan Intermediate School Districts (ISDs), Detroit Public Schools, and Michigan School for the Deaf are the only providers eligible to bill Medicaid for School Based Services. Providers must be enrolled and/or revalidated via the CHAMPS Provider Enrollment subsystem. Any applications or updates must be made through the CHAMPS system.

4.2 CERTIFICATION OF QUALIFIED STAFF

The Michigan Department of Education (MDE) must provide MDHHS with documentation that enrolled ISDs meet the regulatory requirements set forth for all staff providing services in the school setting.

Enrollment as a provider is predicated on certification to MDE that the educational and experiential requirements and credentials of all staff (i.e., licensure, certification, registration, etc.) who may be performing claimable activities have been met and are current. The MDE will assist any school district in this certification process and verify the status of its certification in writing, along with recommendations, with a copy sent to MDHHS.

4.3 MEDICAID ELIGIBILITY RATE

Michigan’s RMTS activity codes are designed to reflect the actual direct medical services activities that occur in a school on any given day. Because these activities and services are provided for students who are both Medicaid and non-Medicaid eligible, it is necessary to develop and apply a formula that properly allocates which students are being supported and what activities and services are being provided. This is referred to as the "IEP Medicaid Eligibility Rate (MER)" for the direct medical services program.

IEP MER is determined by calculating the ratio of Medicaid eligible recipients with health-related services indicated on their IEP/IFSPs to the total number of special education population with health-related services indicated on their IEP/IFSPs.
SECTION 5 – FINANCIAL DATA REQUIREMENTS AND UNALLOWABLE COSTS

5.1 FINANCIAL DATA

The financial data reported for the Direct Medical Services (salaries, benefits, supplies, etc.) must be based on actual detailed expenditure reports obtained directly from the participating ISD’s financial accounting system. The financial accounting system data is applied using generally accepted governmental accounting standards and principles or applicable administrative rules. The expenditures accumulated for calculating the Direct Medical Services allowable costs are to include actual non-federal expenditures incurred during the claiming period, except for the summer quarter. These allowable expenditures include such things as salaries, wages, fringe benefits and medically related supplies, purchased services and materials.

5.2 UNALLOWABLE COSTS

Providers are not allowed to report any costs that are federal funds, State flow-through funds, or non-federal funds that have been committed as local match for other federal or State funds or programs.

Claims for approved Medicaid School Based Service functions may not include expenditures of:

- Federal funds received by the ISD/LEA directly
- Federal funds that have been passed through a State or local agency
- Non-Federal funds that have been committed as local match for other Federal or State funds or programs

Funds received by an ISD for school based direct medical services are not Federal funds. They are reimbursement for prior expenditures and become, upon receipt, local funds.
SECTION 6 – SCHOOL BASED SERVICES REIMBURSEMENT

6.1 METHOD OF REIMBURSEMENT FOR DIRECT MEDICAL SERVICES, PERSONAL CARE SERVICES AND TARGETED CASE MANAGEMENT

Payment for Michigan’s school based services program is a cost-based, provider specific, annually reconciled and cost settled reimbursement methodology.

The Centers for Medicare & Medicaid Services (CMS) also requires Michigan SBS providers to submit procedure specific direct medical services claims for all Medicaid allowable services. These claims do not generate a payment but are required by CMS in order to monitor the services provided, the eligibility of the recipient, and provide an audit trail. Interim monthly payments are tied to the submission of the direct medical services claims. If claim volume decreases significantly or drops to zero in any two consecutive months, all interim payments will be held until the provider is contacted and the issue resolved. MDHHS will monitor provider claim volume to make sure that this mandate is followed.

Claims are submitted and processed through the Community Health Automated Medicaid Processing System (CHAMPS); however, the procedure code fee screens are set to pay zero. SBS providers receive their cash flow from the interim monthly payment process described below.

The interim monthly payments are based on prior year actual costs and reconciled on an annual basis to the current year costs. Cost reporting and reconciliation are based on the school fiscal year which is July 1 through June 30 of each year.

The reimbursement process for the direct medical services is comprised of the following parts:

- The SBS direct medical services procedure code specific billing process;
- The random moment time study (RMTS) component;
- The interim payment process; and,
- The cost reconciliation and cost settlement process.

6.1.A. DIRECT MEDICAL SERVICES PROCEDURE CODE SPECIFIC BILLING

Providers must continue to submit procedure specific claims in addition to the expenditure reports. The procedure specific process is described in the Covered Services Section of this chapter.

Claim documentation must be sufficient to identify the patient clearly, justify the diagnosis and treatment, and document the results accurately. Documentation must be adequate enough to demonstrate that the service was provided and that the service followed the “approved plan of treatment” (for school-based services, the service must be identified in the child’s IEP/IFSP).

The ISD may either purchase software for the claims submission function or it may utilize the services of a billing agent. The cost of this process is the responsibility of the ISD.
6.1.B. RANDOM MOMENT TIME STUDY

For the Random Moment Time Study, all ISDs will be required to utilize the services of the State Contractor who will conduct the statewide time studies.

The quarterly RMTS sampling results are produced by the State Contractor who converts them to percentages. This percentage is applied to program costs to determine reimbursement. Once complete, the time study results are provided to MDHHS where they are uploaded into the cost settlement program.

Costs are reported for direct medical services and specialized transportation services on the Medicaid Allowable Expenditure Report (MAER) and collected via financial worksheets for Personal Care Services and Targeted Case Management.

Electronic Data Systems (EDS) combines all cost information and the RMTS results, the indirect cost rate, and the Medicaid eligibility rate to calculate the total allowable costs. The MDHHS Hospital and Health Plan Reimbursement section performs the reconciliation and cost settlement process.

The ISD and/or State Contractor must comply with all conditions set forth by MDHHS as SBS policy.

The cost for the State Contractor is charged back to providers based on the State Contractor's projected cost per ISD (after federal match).

For detailed description and instructions regarding the Random Moment Time Study, refer to the School Based Services Random Moment Time Study chapter of this manual.

Summer Quarter Process

The summer quarter months are July, August and September. There is a break period between the end of one regular school year and the beginning of the next regular school year during which only a few staff are working. The majority of school staff work during the school year and do not work for part of the summer quarter (9-month staff). However, there are some 9-month staff that opt to receive their pay over a 12-month period. Therefore, different factors must be applied to the summer formula in order to accurately reflect the activities that are performed by the staff.

The summer quarter will be divided into two parts. The first part of the quarter will extend from July 1 to the date the students return to school. The second part of the quarter will be from the date the students return to school through September 30.

The RMTS will still be performed in the summer quarter, but will take place only after the staff start back to work and will only be applied to the costs for the second part of the summer quarter. To accurately reflect the work efforts being performed when all staff have returned to work, the RMTS will be performed during a shorter time period.
6.1.C. INTERIM PAYMENT PROCESS

Interim payments are calculated based on an estimated monthly cost formula. The monthly cost formula utilizes prior year costs plus any inflation or program changes to calculate a monthly interim reimbursement amount. After the final cost reports have been reviewed and reported to MDHHS, reconciliation will be performed and settlements will be made to make the providers whole.

Interim payments are issued on the first pay cycle of each month based on prior year costs.

To justify an increase in the interim payment, providers must submit written documentation of significant changes in coverage, service utilization or staff costs.

Providers may request an increase or decrease in their interim payment amount at any time throughout the year. Instructions and contact information will be included with the MAER. Any written inquiries should be addressed to the MDHHS Hospital and Clinic Reimbursement Division (HCRD). (Refer to the Directory Appendix for contact information.)

All payments and adjustments are issued by the MDHHS Hospital and Clinic Reimbursement Division. Once the payments are issued to the SBS providers (ISDs), how the interim payment revenue is distributed to the respective LEAs and how the initial and final settlements are handled is up to the discretion of the ISD.

6.1.D. COST RECONCILIATION AND SETTLEMENT

Allowable cost will be based on the following components:

- Costs from the MAER
- Targeted Case Management and Personal Care Services Financial Worksheets
- MDE Indirect Cost Rate
- Random Moment Time Study Percentage
- Health Related IEP Medicaid Eligibility Rate (IEP MER)
- Federal Medical Assistance Percentage (FMAP)

\[
\text{Medicaid reimbursement amount} = \text{Allowable costs (MAER & financial worksheets for TCM and PCS)} \times \text{Indirect Cost Rate} \times \text{Annual average % time claimable to Medicaid from the time studies} \times \text{Discounted by the Medicaid eligibility percentage} \times \% \text{ Federal Medical Assistance Percentage (FMAP) rate}
\]

The Medicaid Allowable Expenditure Report (MAER) (modeled after the MDE SE-4096 cost report) is utilized to collect allowable costs for the medical professional staff. Costs for the staff providing targeted case management services and personal care services
that are not included in the direct medical costs are obtained from the participating ISD’s financial accounting system via financial worksheets sent out by the State Contractor.

To report direct service-related costs, providers will utilize the Medicaid Allowable Expenditure Report. This cost report template may be obtained from the School Based Services Provider Specific webpage. (Refer to the Directory Appendix for website information.) An Excel printable version of the cost report is also available on the website for those providers in need of a paper version. Cost reports from the Local Educational Agencies will be submitted to their Intermediate School District for summation utilizing the Michigan Medicaid Forms (MMF) summary software (available to providers via the File Transfer Service). Providers must register and have access to the secure MI Login in order to utilize the MMF summary software. MI Login registration instructions are also available on the School Based Services Provider Specific webpage.

The filed cost data is used to calculate an initial settlement within 90 days after the receipt of the initial cost report data. The initial settlement may result in either an over or under adjustment to the provider interim payment.

Within six months after the close of the school fiscal year, the School Based Services providers will review, certify, and finalize the MAER and transmit the report to the MDHHS Medical Services Administration for reconciliation. The cost certification form (CMS-10231; Certification of Public Expenditures) must be signed and on file with MDHHS before a final settlement will be processed. The final settlement process will begin within 12-18 months after the close of the school fiscal year. Settlements may take several months for completion. (Refer to the Forms Appendix for a copy of the CMS-10231.)

ISDs/LEAs may submit revisions to the MAER until the final settlements are processed. Instructions for completing revisions are attached to the MAER.

6.2 METHOD OF REIMBURSEMENT FOR SPECIALIZED TRANSPORTATION

6.2.A. REIMBURSEMENT [CHANGE MADE 7/1/18]

Specialized transportation costs reported on the Michigan Department of Education Transportation Expenditure Report (form SE-4094) are only the costs associated with the special education buses, taxis or private vehicles used for the specific purpose of transporting only special education children. This report does not include any federal dollars.

Medicaid-allowable specialized transportation costs include the following costs from the SE-4094:

- Salaries [Sec. 52 & Sec. 53a]
  - Bus Drivers
  - Aides
  - Employee Benefits (Bus Drivers and Aides only)
- Purchased Services - Staff (Bus Drivers and Aides only)
Michigan Department of Health and Human Services
Medicaid Provider Manual

- Purchased Services – Vehicle Related Costs [Sec. 52 & Sec. 53a]
  - Pupil Transportation by Carrier
  - Pupil Transportation by Carrier (b/y)
  - Family Vehicle K Cost
  - Contracted Taxis
  - Pupil Transportation Fleet Insurance
  - Contracted/Leased Buses
- Supplies [Sec. 52 & Sec. 53a]
  - Gasoline/Fuel
  - Oil/Grease
  - Tires/Batteries
  - Other Expense/Adjustments, only the costs associated with adjustments to allowable costs
  - Bus Amortization

For reimbursement purposes, Bus Aides are defined as aides who ride on the bus providing care to those students being transported, assisting with the specific health concerns documented in the student’s Individualized Education Program (revised 7/1/18).

6.2.B. SPECIALIZED TRANSPORTATION RECONCILIATION AND SETTLEMENT [CHANGE MADE 7/1/18]

On an annual basis, the cost per trip is calculated by dividing the total Medicaid allowable costs (including indirect cost) by the total ISD-reported special education (specialized) one-way transportation trips. The cost per trip is multiplied by the quantity of Medicaid “allowable” one-way trips gleaned from CHAMPS to arrive at the Medicaid allowable cost.

An "allowable" one-way trip is one that is provided to a Medicaid beneficiary and fulfills all of the following requirements:

- Documentation of ridership is on file;
- The need for the specialized transportation service is identified in the Individualized Education Program (IEP)/Individualized Family Service Plan (revised 7/1/18) (IFSP); and
- A Medicaid-covered service (other than transportation) is provided on the same date of service. The Medicaidcovered service must also be documented in the IEP/IFSP.

The cost settlement is accomplished by comparing the interim monthly payment totals to the annual Medicaid allowable specialized transportation cost. The cost settlement amount for the specialized transportation is combined with the cost settlement amounts for the Direct Medical Services, Targeted Case Management, and Personal Care Services; any over/under adjustments are processed as one transaction.
SECTION 7 – INDIRECT COST RATE (ICR)

7.1 INDIRECT COSTS

The ISD/LEA unrestricted indirect cost rate is calculated using the Federal Office of Management and Budget (OMB) Title 2 CFR Part 200. The methodology used to determine the indirect cost rate specific to each district is approved by the Federal cognizant agency. The indirect cost rates are updated annually by the Michigan Department of Education.
SECTION 8 – COST CERTIFICATION

8.1 COST CERTIFICATION

Once all cost reports and financial worksheets have been received by MDHHS, the summary worksheet of the Medicaid Allowable Expenditure Report (MAER) will be completed. The summary report will combine the allowable cost data submitted by the ISDs for each LEA for all four cost pools (Direct Medical, Specialized Transportation, Personal Care and Targeted Case Management). The total will be entered into the cost certification form as the "Total Computable Expenditure". The ISD is responsible for annually certifying that the total amount of expenditures for covered services has been expended and that none of the expenditures have been used as match for other programs or services. MDHHS will be utilizing the CMS-10231, "Certification of Public Expenditures (CPE)" form, for this purpose. (Refer to the Forms Appendix.)
SECTION 9 – COST ALLOCATION FACTORS

9.1 FEDERAL MEDICAL ASSISTANCE PERCENTAGE RATE

Federal regulations allow for payments to States on the basis of a Federal medical assistance percentage for part of their expenditures for services under an approved State plan. The formula for calculating this annual percentage is described in section 1905(b) of the Social Security Act. Under the formula, if a State’s per capita income is equal to the national average per capita income, the Federal share is 55%. If a State’s per capita income exceeds the national average, the Federal share is lower, with a statutory minimum of 50%. If a State’s per capita income is lower than the national average, the Federal share is increased, with a statutory maximum of 83%.

9.2 DISCOUNTED HEALTH-RELATED MEDICAID ELIGIBILITY RATE (MER)

The discounted health-related Medicaid Eligibility Rate (MER) percentage is determined by the percentage of the special education student population that is Medicaid eligible in each ISD with a health-related support service code indicated on their December 1 Student Count Report. Support service codes are gleaned from Fields 43 and 57 of the December 1 Student Count Report. Only those codes that relate to covered school based health services are to be utilized.

| Field 43 | 290, 310, 320, 360, 370, 400, 450, 460, 470 |
| Field 57 | 801, 804, 805, 807, 808, 809, 812, 814, 816, 818 |

MDHHS receives the file of special education children with health-related support services indicated on their IEPs and matches the names and birthdates of those with health-related support services against the Medicaid eligibility file to identify the percentage that are Medicaid eligible. The eligibility rate is determined once each year utilizing the December 1 Student Count Report. The calculation for the eligibility rate is as follows:

\[
\frac{\text{Medicaid special education students with a health-related support service in their IEP}}{\text{Total special education students with a health-related support service in their IEP}}
\]

9.3 ALLOCATION OF SALARIES AND BENEFITS OF PERSONNEL PROVIDING DIRECT CARE SERVICES

Actual expenditures for salaries and benefits of all personnel are to be obtained from each participating ISD’s financial accounting system. Expenditures related to the performance of approved Medicaid contracted service providers (e.g., occupational therapists, physical therapists) who also provide direct care services must also be obtained from each participating ISD’s financial accounting system.
SECTION 10 – DOCUMENTATION

10.1 DIRECT MEDICAL SERVICES DOCUMENTATION

For covered services, the school clinical record must include all of the following:

- Beneficiary name and birth date;
- Date of service/treatment;
- Type (modality) of service/treatment;
- The response to the service/treatment; and
- The name and title of the person providing the service/treatment and a dated signature.

For services that have time-specific procedure codes, the provider must indicate the actual begin and end times of the service in the school clinical record. The record must indicate the specific findings or results of the diagnostic or therapeutic procedures. The student’s school clinical record should include documentation of the implementation and coordination of services for the special education student.

Progress notes must be written monthly, or more frequently as appropriate, and must include:

- Evaluation of progress;
- Changes in medical or mental status; and
- Changes in treatment with rationale for change.

(Refer to the General Information for Providers Chapter of this manual for additional information regarding clinical record requirements.)

10.2 RMTS DOCUMENTATION

Each participating LEA must maintain a separate audit file for each quarter billed. The following minimum documentation is required:

- Financial data used to establish cost pools and factors.
- A copy of the quarterly sample results produced by the State Contractor.
- A copy of the warrant, remittance advice or Electronic Funds Transfer (EFT) documentation verifying that payment from MDHHS was received.

ISDs/LEAs must cooperate fully with any review requested by MDHHS and CMS, and maintain all necessary records for a minimum of seven (7) years.

Any changes in Federal regulations related to claims for administrative expenditures are incorporated by reference into this document.
SECTION 11 – AUDIT AND RECOVERY PROCEDURES

11.1 DIRECT SERVICE/TRANSPORTATION PROGRAM AUDIT ACTIVITIES TO BE PERFORMED BY MDHHS OFFICE OF AUDIT STAFF

MDHHS audit review of selected ISD/DPS and MSD cost reports for the Direct Service/Transportation Program may include the following activities:

- Verification that the Medicaid Allowable Expenditure Report (MAER) accurately reports the allowable costs incurred for the appropriate period.
- Verification that the salaries listed for employees/positions included in the RMTS staff pool match the payroll records for the same period as the time study.
- A review of the salaries of employees who changed positions during the time study period.
- If a replacement was hired/transferred, the auditor will verify that only the salary earned while working in a position on the MAER staff pool list was reported, and that salaries for both the original and replacement employees were not duplicated on the report for the same time period.
- Confirmation that none of the direct costs reported were also claimed as an indirect cost, that the proper indirect cost rate was used, and the rate was applied only to costs in the base. The employees in non-standard job categories are the most likely to be considered indirect type employees; therefore, documentation will be reviewed for these individuals.
- Verification that no federal funds were claimed on MAER cost reports and that MAER costs were not accepted for cost-sharing.
- A standard review of other areas, such as confirmation that reported costs were actually paid, support documentation was maintained as required, and costs were properly charged to the correct accounts should also be expected.
- Any other area deemed necessary.

The ISD/DPS/MSD should be prepared to direct the auditor to any document used to support and identify the reported MAER costs.

11.2 STUDENT CLAIMS AUDIT ACTIVITIES TO BE PERFORMED BY MDHHS OFFICE OF AUDIT STAFF

MDHHS audit review of selected ISD/DPS and MSD for approved SBS student claims may include the following activities:

- Verification that appropriate prescriptions/referrals/authorizations are updated annually and ordered by the appropriate individual.
- Verification that occupational, physical, and speech, language and hearing therapy address a beneficiary's medical need that affects his/her ability to learn in the classroom environment.
- Confirmation that services requiring the student to be in attendance have support documentation (i.e., attendance records) on file.
- Confirmation that the providers performing the service have the required licensure/certification.
- Verification that the providers requiring supervision both "under the direction of" and "under the supervision of" have the necessary support documentation on file.
Verification that the beneficiary receiving special education transportation also received a Medicaid-covered service on the same day. In addition, the support documentation for specialized transportation includes an ongoing trip log maintained by the provider of the special education transportation.

Confirmation that support documentation for personal care services includes a completed, signed and dated monthly activity checklist.

Verification that group therapy or treatment was provided in groups of two to eight.

A standard review of the Individualized Education Program (IEP)/Individualized Family Service Plan (IFSP) treatment plan areas, such as the inclusion of a description of the beneficiary’s qualifying diagnosis and medical condition, time-related goals that are measurable and significant to the beneficiary’s function and/or mobility, and anticipated frequency and duration of treatment required to meet the time-related goals.

Any other area deemed necessary.

The ISD/DPS/MSD should be prepared to direct the auditor to any document used to support and identify the reported student claims.

11.3 AUDIT ACTIVITIES TO BE PERFORMED BY MDHHS OFFICE OF AUDIT STAFF

MDHHS audit review of selected ISD/DPS cost reports for the Administrative Outreach Program may include the following activities:

Verification that the salaries listed for employees/positions included in the Random Moment Time Study (RMTS) staff pool match the payroll records for the same period as the time study.

A review of the salaries of employees who changed positions during the time study period.

If a replacement was hired/transferred, the auditor will verify that only the salary earned while working in a position on the AOP staff pool list was reported, and that salaries for both the original and replacement employees were not duplicated on the report for the same time period.

Verification that any other salaries and costs for supplies, etc., are of direct benefit to the employees on the staff pool list, and therefore, allocable to the AOP in the same percentage as the AOP-eligible employees.

Confirmation that none of the direct costs reported were also claimed as an indirect cost, that the proper indirect cost rate was used, and the rate was applied only to costs in the base. The employees in non-standard job categories are the most likely to be considered indirect type employees; therefore, documentation will be reviewed for these individuals.

Verification that no federal funds were claimed on AOP cost reports and that AOP costs were not accepted for cost sharing.

A standard review of other areas, such as confirmation that reported costs were actually paid, support documentation was maintained as required, and costs were properly charged to the correct accounts should also be expected.

Any other area deemed necessary.

The ISD/DPS should be prepared to direct the auditor to any document used to support and identify the reported AOP costs.
11.4 Audit Findings and Resolution

Audit findings and resolution will include the following:

- Identified overstatement of expenditures on the MAER will require the revision of the MAER and a revised final settlement for all specifically identified overstatements.

- For claim error rates in excess of the materiality threshold percentage, as established by MDHHS, the recovery will be any excess percentage greater than materiality threshold multiplied by total Medicaid paid to the ISD during the period covered by the audit.

Recoveries and re-filings are limited to fiscal years considered within three years from the last date of payment for that period.

SECTION 1 - CLAIMS DEVELOPMENT OVERVIEW

Using the State of Michigan’s competitive bid process, MDHHS will select one Contractor to implement and administer the random moment time study. The Contractor will also provide the ISDs/DPS the option of performing certain time study responsibilities and claims development activities on behalf of those ISDs/DPS that choose to participate in this portion of the State contract and pay for these services.

1.1 CLAIMS DEVELOPMENT ENROLLED PROVIDERS

All ISDs/DPS will be required to utilize the services of the State’s RMTS and Claims Development Contractor, who will conduct the statewide time studies and develop and submit claims on their behalf each quarter.

The State Claims Development Contractor will develop an implementation plan on behalf of its ISDs/DPS to conduct the statewide time studies each quarter, utilizing the claims development software, as well as complete all other key functions required for valid claim development.

The cost for the Contractor will be charged back to providers who participate in this option based on the Contractor’s projected cost per ISD/DPS (after federal match).

1.2 OVERVIEW OF CLAIMS DEVELOPMENT PROCESS

Based on federal and state statutes and regulations, below is a partial list of specific functions and tasks that must be accomplished for reimbursement of Medicaid Administrative Outreach Program services. Additional details appear in subsequent sections of this chapter.

Claims will be developed by the State’s Claims Development Contractor utilizing the claims development software following these basic steps:

- The quarterly RMTS sampling results are produced by the State’s RMTS and Claims Development Contractor, who converts them to percentages. The percentages are applied to program costs to determine reimbursement.
- The cost/claim generation component of the claims development software uses ISD/DPS costs and other claim factors to calculate and produce the claim.
- The claim is submitted to MDHHS with verification of claim validity from each ISD/DPS.
- The ISD/DPS and/or Contractor must comply with all conditions set forth by MDHHS as SBS policy.

1.3 IMPLEMENTATION PLAN

Each ISD/DPS must submit an Implementation Plan that reflects the details of their SBS Administrative Outreach Program operation for review and approval by MDHHS and by CMS. Any subsequent changes must also be reported and receive approval.

Claims may not be submitted to MDHHS for reimbursement until MDHHS has approved the Implementation Plan that will be utilized based on this published policy.
SECTION 2 - CLAIM CALCULATIONS

2.1 IMPLEMENTATION PLAN

Each ISD/DPS must submit an implementation plan that reflects the details of their SBS Administrative Outreach Program for review and approval by MDHHS and CMS. Any subsequent changes must also receive approval.

Each implementation plan must include explicit quality control review mechanisms to ensure full staff training and compliance, accuracy and completeness of the sample frame (designated employees), adherence to the MDHHS-published methodology, editing of all moments for completeness and consistency, and accurate financial and staffing reports. Claiming entities must also fully cooperate with any review requested by the U.S. Department of Health & Human Services (HHS), maintaining all necessary records for a minimum of seven (7) years after submission of each quarterly claim.

2.2 SANCTIONS

It is the intent of the State to pursue, when necessary, remedial action or implement a Corrective Plan if the State-selected contractors, the ISD/DPS, or their vendors are not in compliance with the new SBS Administrative Outreach published policy. If this is not successful, a contract payment freeze will be implemented and sanctions put in place until the matter is resolved. Those independent ISDs/DPS not participating in the State’s claims development contract will be held accountable for their vendor’s actions.

The following are examples of causes for implementation of sanctions for all districts. The list is not all-inclusive.

- Repeated errors in completing the RMTS forms or filing of the claims.
- Providing insufficient data or incomplete reports to the Contractors.
- Failure to use the CLAIMS DEVELOPMENT software.
- Failure to cooperate with, or submit requested information, reports, or data to the Special Monitoring Contractor, CMS, MDHHS, MDE, and other staff involved during site visits, reviews or audits.

2.3 FACTORS FOR CLAIMS DEVELOPMENT

MDHHS will submit quarterly claims on behalf of all participating school districts to the CMS. Each claim will be based on the following factors: The cost pool, percentage of time claimable to Medicaid Outreach Program administration, the Federal Financial Participation (FFP) rate, and the discounted Medicaid eligibility percentage rate for that district. The factors for the summer quarter are described above.

2.3.A. COST POOL

This consists of the actual costs incurred for the quarter being claimed, such as salaries, overhead, etc. Each participating ISD/DPS must certify that the claim they submit to MDHHS contains sufficient non-Federal (State, county, or local) funds to match requirements and that the claim only includes actual costs.
2.3.B. FEDERAL FINANCIAL PARTICIPATION RATE

Federal regulations allow for a reimbursement rate of 50% for Medicaid administrative activities.

2.3.C. DISCOUNTED MEDICAID ELIGIBILITY PERCENTAGE

The discounted Medicaid eligibility percentage is determined by the percentage of the student population in each ISD/DPS who are actually Medicaid beneficiaries. The discounted Medicaid eligibility rates will be determined twice each year and applied to certain activities in the claim calculation formula. To calculate the discounted Medicaid eligibility rates, the claiming entity will obtain the September and February fourth Wednesday pupil count report list from the Center for Educational Performance and Information (CEPI). The pupil count list will include the student name and date of birth. MDHHS will provide a method for using the list to verify the number of Medicaid-eligible students. This number will be used in a calculation with the total pupil count to determine the discounted percentage of Medicaid-eligible students in the ISD/DPS. The September pupil count list will be used to determine discounted Medicaid eligibility rates for time studies conducted in the Fall and Winter quarters, and the February pupil count will be used for time studies conducted in the Spring and Summer quarters.

Based on the above factors, the claim that is sent to Medicaid is calculated as follows:

**Fall, Winter and Spring Quarter Formulas for Calculating Administrative Outreach Claims**

<table>
<thead>
<tr>
<th>Cost pools (salaries, overhead, etc.)</th>
<th>x</th>
<th>% time claimable to Medicaid Outreach Administration from time studies</th>
<th>x</th>
<th>Discounted by the Medicaid eligibility percentage</th>
<th>x</th>
<th>% Federal Financial Participation (FFP) rate</th>
<th>=</th>
</tr>
</thead>
</table>

**Summer Quarter Formulas**

The summer quarter will be divided into two parts. The sum of both parts will be submitted to Medicaid for reimbursement. There will be two workbooks created for the summer quarter, one for each part.

**Part I - Summer Quarter Formulas from July 1 to the Date Students Return to School**

<table>
<thead>
<tr>
<th>Cost pool (only the 9-month salaries and related costs that are paid during this time period)</th>
<th>x</th>
<th>Average % of time claimable to Medicaid Outreach Administration from the previous three quarters</th>
<th>x</th>
<th>Discounted by the Medicaid eligibility percentage</th>
<th>x</th>
<th>Percent of FFP rate</th>
<th>=</th>
</tr>
</thead>
</table>

The amount of the claim submitted for Medicaid reimbursement
Salary and related costs for 9-month staff that were earned during the school year, but are paid during the summer break, will be collected in a separate cost pool. Salaries paid during this period for 12-month staff are not included in the cost pool.

The cost pool containing the salaries and related costs of 9-month staff who are paid over 12 months will be claimed based on the average time study results and Medicaid Eligibility (MAE) rate from the previous three quarters.

**Part II - Remainder of the Summer Quarter - Begins on the Date Students Return to School through September 30**

<table>
<thead>
<tr>
<th>Cost pools (include all allowable salaries, overhead, etc.)</th>
<th>% of time claimable to Medicaid Outreach from the Summer Quarter time study</th>
<th>Discounted by the Medicaid eligibility percentage</th>
<th>Percent of FFP rate</th>
<th>The amount of the claim for Part II of Summer Quarter</th>
</tr>
</thead>
</table>

Salary and related costs of all staff eligible for the time study are included in the cost pool, along with other allowable overhead.

An RMTS is performed and applied to determine the percent of time claimable for Outreach during Part II of the summer quarter.

The claims development software will add the Summer Quarter Part I and Part II claim amounts together to reach the dollar amount of the total Summer Quarter claim submitted to MDHHS for reimbursement.

**2.4 Financial Data**

The financial data reported (salaries, benefits, supplies, etc.) must be based on actual detailed expenditure reports obtained directly from the participating ISDs/DPS' financial accounting system. The financial accounting system data is applied using generally accepted governmental accounting standards and principles or applicable administrative rules. The expenditures accumulated for calculating the Administrative Outreach claim are to include only actual expenditures incurred during the claiming period, except for the summer quarter.

**2.5 Allocation of Salaries and Benefits of Personnel Providing Direct Care Services**

Actual expenditures for salaries and benefits of all personnel included in an Administrative Outreach claim are to be obtained from each participating ISD/DPS financial accounting system. Expenditures related to the performance of approved Medicaid Administrative Outreach functions by contracted service providers (e.g., occupational therapists, physical therapists) who also provide direct care services must also be obtained from each participating ISD/DPS financial accounting system.
2.6 RMTS DOCUMENTATION AND RECORDKEEPING/ AUDIT FILE REQUIREMENTS

Each participating school district will maintain a separate audit file for each quarter billed. The following minimum documentation will be required:

- Financial data used to establish cost pools and factors.
- A copy of the quarterly sample results, produced by the State’s RMTS and Claims Development Contractor.
- A completed quarterly claim, produced by the claims development software and signed by the Chief Financial Officer of the ISD/DPS.
- A copy of the warrant, remittance advice or Electronic Funds Transfer (EFT) documentation, verifying that payment from MDHHS was received.

Districts must cooperate fully with any review requested by MDHHS and CMS, and maintain all necessary records for a minimum of seven (7) years after submission of each quarterly claim.

Any changes in Federal regulations related to claims for administrative expenditures are incorporated by reference into this document.

2.7 NON-STUDENT SPECIFIC/ PRE-MEDICAID ELIGIBILITY DETERMINATION

There are some Administrative Outreach activities and expenditures that are approved by Medicaid that have not been addressed thus far. They are:

- Provided to the entire "at-risk" population,
- Not identifiable to individual students, and
- Provided before Medicaid eligibility is determined.

These activities are to be allocated to the approved Medicaid administrative outreach claim based on the results of the time study conducted during the claiming period.

2.8 STUDENT-SPECIFIC ADMINISTRATIVE FUNCTIONS EXPENDITURES

There are some Administrative Outreach functions that are identifiable to individual students after Medicaid eligibility has been determined. These functions are to be allocated in the administrative claim based on both the time study results conducted during the claiming period and the applicable discounted Medicaid eligibility rate.

2.9 NON-SALARY EXPENDITURES

Expenditures for materials and supplies related to the approved Medicaid administrative outreach activities may be included in the claim if they can be attributed directly to individuals who are claimed. The principles for claiming expenditures and cost allocation, including correct depreciation of assets as published in the Federal Office of Management and Budget (OMB) Title 2 CFR Part 200, must be followed. Examples include conference fees, registration fees, mileage, pagers, printing fees (i.e., for business cards), furniture, equipment, copy machine expenses, etc. Such expenditures are to be based on actual detailed departmental expenditure reports obtained directly from the participating ISD/DPS.
financial accounting system. These expenditures may not include items identified as indirect costs, such as central business office operations, general building maintenance and repair costs, or any other costs classified as an indirect cost.

2.10 INDIRECT COSTS

Allocable indirect costs are the product of the school district aggregate, calculated, approved Medicaid administrative outreach claim amount, multiplied by the ISD/LEA unrestricted indirect cost rate, as approved annually by the Michigan State Board of Education (MSBE). The ISD/LEA unrestricted indirect cost rate is calculated using the Federal Office of Management and Budget (OMB) Title 2 CFR Part 200. The methodology used to determine the indirect cost rate specific to each district has been approved by the Federal cognizant agency. The indirect cost rates are updated annually by the Michigan Department of Education.

2.11 CLAIM CERTIFICATION

The accuracy of the submitted claims must be certified by the chief financial officer, the superintendent of the district, or the consortium's lead ISD/DPS designee. Such certification is to be documented on an MDHHS-approved certification form, and conform to the certification requirements of 42 CFR 433.51. Detailed claim analyses and supporting documentation will be maintained by the ISD/DPS for audit or future reference purposes according to the terms identified in the interagency agreement between the district and MDHHS.

The Electronic Signature Verification Statement (DCH-3890) form must be completed by each provider and submitted to MDHHS to certify costs electronically. A copy of the completed DCH-3890 must be kept on file by the provider until the individual signing the certification changes. (Refer to the Forms Appendix for a copy of the form.)

Reimbursement will be paid after the claim has been submitted to, reviewed by, and determined to be acceptable and accurate by MDHHS and CMS.

2.12 ANNUAL RECONCILIATION

At the end of the district’s fiscal year, and after its annual financial audit is completed, a reconciliation of the filed administrative outreach claims, with the financial accounting records and supporting documentation, must be performed. Adjustments to future administrative claims must be made based on the results of the reconciliation analyses to consider any year-end adjustments to accounting entries of any items which might have impacted the claim amounts.

2.13 FISCAL PROVISIONS

School districts must use an appropriate Revenue Code to identify the Medicaid SBS Administrative Outreach Program funds within their accounting records.

2.14 SUBMISSION OF CLAIMS

All claims must be developed and submitted using the reporting format (structured spreadsheet template) and approved certification forms.
The claim package consists of completed Excel workbooks for each individual ISD/DPS and are combined and consolidated into one claim that is submitted to MDHHS.

All claims are to be submitted in accordance with the reporting requirements established by MDHHS. It is imperative that districts work closely with the Claims Development Contractor to provide pertinent financial, enrollment and personnel data and meet their deadlines and any other technical specifications. Claims not submitted on time must be submitted the following quarter as an adjustment to the prior missed quarter and will be processed for that following quarter. Claims not conforming to reporting requirements will not be accepted or processed.

2.15 Periodicity of Reporting

Districts must submit claims for expenditures related to approved Medicaid administrative outreach activities to MDHHS on a quarterly basis. The claim is due to MDHHS on or before 120 calendar days after the end of the reporting quarter.

SECTION 1 – GENERAL TIME STUDY INFORMATION

This chapter describes the random moment time study process for the School Based Services (SBS) direct medical services program.

In accordance with the Centers for Medicare & Medicaid Services (CMS) reimbursement policy, some activities performed by medical professionals and Intermediate School District (ISD) staff in a school-based setting are eligible for federal matching funds. These activities may be performed by staff with multiple responsibilities. CMS reimbursement requirements include the use of a random moment time study (RMTS) as a component of the Medicaid reimbursement methodology. The time study results are used to determine the amount of staff time spent on Medicaid-allowable activities. One statewide time study per staff pool is performed each quarter.

1.1 ADMINISTRATIVE OUTREACH PROGRAM ACTIVITIES

The School Based Services Administrative Outreach Program (AOP) offers reimbursement for the cost of administrative activities that support efforts to identify and enroll potentially eligible persons into Medicaid and that are in support of the state Medicaid plan.

The activities fall into several categories:

- Medicaid Outreach
- Facilitating Medicaid Eligibility Determinations
- Health-related Referral Activities
- Medical Service Program Planning, Policy Development, and Interagency Coordination
- Programmatic Monitoring and Coordination of Medical Services
- Transportation and Translation Services

1.2 DIRECT MEDICAL SERVICES

Medicaid covered services that are medically necessary and specified in the beneficiary’s Individualized Education Program (IEP) or Individualized Family Service Plan (IFSP) include:

- Occupational Therapy Services
- Orientation and Mobility Services
- Physical Therapy Services
- Assistive Technology Device Services
- Speech, Language and Hearing Services
- Psychological, Counseling and Social Work Services
- Developmental Testing Services
- Nursing Services
- Physician and Psychiatric Services
1.3 STAFF POOLS AND CONFIDENCE LEVELS

The RMTS is carried out utilizing customized claims development software that automates aspects of the school district time study process. The claims development software is comprised of three components: sampling/staff pool lists, training, and cost/claim generation. All ISDs are required to utilize the services of the State’s RMTS and Claims Development Contractor (hereafter referred to as the Contractor). The Contractor conducts the statewide time studies, produces the implementation plans and reports, and develops and submits the claims on behalf of the 56 ISDs, Detroit Public Schools and Michigan School for the Deaf (hereafter referred to as the ISDs).

Time studies will be carried out over the following staff pools:

- AOP Only Staff – This staff pool consists of individuals who perform only administrative outreach activities. They do not perform any direct medical activities.
- AOP & Direct Medical Staff – This staff pool consists of individuals who perform both Direct Medical activities and AOP activities.
- Personal Care Services Staff – This direct medical only staff pool consists of individuals who perform direct care Personal Care Services.
- Targeted Case Management Services Staff – This direct medical only staff pool consists of individuals who perform Targeted Case Management (TCM) Services.

The RMTS results identifying the percentage of claimable time are applied to the allowable correlating cost pool. All staff pools are mutually exclusive.

The sample size of each cost pool ensures a quarterly level of precision of +/- 2% (two percent) with at least a 95% (ninety-five percent) confidence level and an annual level of precision of +/- 2% (two percent) with at least a 95% (ninety-five percent) confidence level.

Valid moments are completed moments that have been received by the Contractor and determined to be complete and accurate. Invalid moments are moments that are assigned to staff who are no longer in the position as selected, moments that are outside of paid work hours, and moments not returned for any other reason (including Activity Code 18).

As long as the completed observation rate meets or exceeds 85%, missing observations will be dropped from all calculations. Should the completion rate fall below 85%, missing observations will be included as non-matchable.
SECTION 2 – CENTRALIZED CODING

The Contractor is responsible for coding the time study moments. MDHHS oversees the Contractor and ISDs participating to assure their compliance with all aspects of program policy and federal regulations.
SECTION 3 – TIME STUDY METHODOLOGY

3.1 RANDOM MOMENT TIME STUDY OVERVIEW

The time study design logs only what the participant is doing at one moment in time. A random moment consists of one minute of work done by one employee, both chosen at random, from among all such minutes of work that have been scheduled for all designated staff statewide.

The RMTS measures the work effort of each group of approved staff involved in the time study process by sampling and analyzing the work efforts of a randomly-selected cross-section of each staff pool. The RMTS methodology employs a technique of polling employees at random moments over a given time period and tallying the results of the polling over that period. The method provides a statistically valid means of determining the work effort being accomplished in each program of services. The sampling period is defined as the three-month period comprising each federal quarter of the year, except for the abbreviated sample period used in the summer quarter (July through September).

The Contractor will use the claims development software to conduct the statewide time studies each quarter. This software produces random moments concurrent with the entire reporting period which are then paired with randomly selected members of the designated staff pool population. The sampling is constructed to provide each staff person in the pool with an equal opportunity or chance to be included in each sample moment. Sampling occurs with replacement so that after a staff person and a moment are selected, the staff person is returned to the potential sampling universe. Therefore, each staff person has the same chance as any other person to be selected for each moment, which ensures true independence of sample moments.

Once the random sample of staff moments has been generated, the sample is printed in the form of master and location control lists for sample administration purposes, and as time study forms for collecting the moment data. Each sampled moment is identified on its respective control list in chronological order by the name of the staff person to be sampled and the date and time at which the recording should take place.

3.1.A. LONG-TERM SUBSTITUTES

Long-term substitute staff replacing permanent staff on leave may be added to the staff pool lists. The following criteria apply when long-term substitutes are utilized:

- A long-term substitute staff must be employed by the ISD/Local Educational Agency (LEA) for at least 30 calendar days within the quarter.
- The ISD/LEA may report the name of the long-term substitute staff any time after the sampling moments are distributed.
- The long-term substitute staff must meet all of the program requirements and provider qualifications necessary to participate in the Medicaid school based services program staff pool.
- If listed on the staff pool list, the substitute staff must complete the time study moment.
- The cost reflected should be the sum of the cost of the regular staff on leave and the long-term substitute staff.
3.2 RANDOM MOMENT TIME STUDY FORM COMPLETION

There are two steps to completing a time study form:

- In the first step, for the designated moment, the time study participant provides the answers to three questions (What are you doing? Who are you with? Why are you doing it?). These questions relate to their activities at the time of their randomly selected moment.
- In the second step, the time study forms are collected from the participants, and the Contractor assigns the appropriate activity code for that moment based on the answers to the three time study questions.

The Contractor conducts the statewide time studies each quarter for all ISDs and produces a report detailing the results. This involves importing clinician information from the ISDs to compile the statewide pool of all eligible time study participants for each staff pool list. There are four separate staff pools sampled for the RMTS each quarter: 1) the AOP only staff pool, 2) the AOP and Direct Medical Services staff pool, 3) the Personal Care Services staff pool, and 4) the Targeted Case Management Services staff pool. All staff pools have 800 moments randomly selected for the summer quarter (July-September). For the remaining three quarters, the Direct Medical Services and the Targeted Case Management Services staff pools have 3,000 moments randomly selected per quarter, and the Personal Care Services staff pool has 3,200 moments randomly selected per quarter. The person’s name that is associated with each moment is placed on a time study form. The Contractor distributes the control lists of their selected staff and the time study forms to the ISDs prior to the beginning of the reporting period. The Contractor is also responsible for the collection of all time study forms for the ISDs.

The Contractor monitors the status of each time study form so that appropriate follow-up calls are made for delinquent moments or missing data. The ISD is responsible for ensuring that a copy of the time study form and instructions are distributed to staff just prior to the assigned moment. The completed time study forms are returned to the Contractor, generally on a weekly basis, for data entry and tabulation.

At the end of the sampling period after all data has been collected and tabulated, program precision tables will be produced by the Contractor. These tables will verify that a sufficient number of personnel were sampled to ensure time study results that have a confidence level of at least 95% quarterly with a precision level of +/- 2% annually.

3.3 TIME STUDY STAFF POOLS

To preserve the integrity of the RMTS process and to allow for timely process flow, school staff are given four weeks to review and return the staff pool lists and financials to the Contractor for those staff eligible to participate in each time study group. The staff pool lists must be returned as a complete file with all updates reflected. No partial staff pool list files will be accepted by the Contractor.
If staff pool lists and/or financials for the Personal Care Services, the Targeted Case Management, or the Administrative Outreach Program (AOP) time studies are not returned to the Contractor on or before the published deadline, the LEA staff pool lists and correlating financials will be removed from the time study and claim calculation for the affected quarter. ISD coordinators and LEA financial contact staff will be notified.

When providing the staff pool list of those eligible to participate in the time studies, school districts must certify the list of participants and activities to be claimed to ensure that all appropriate personnel are submitted and that appropriate credentials are in place for billing Medicaid.

### 3.3.A. AOP ONLY STAFF POOL

AOP Only Staff Pool:

- Administrators
- Counselors
- Early Identification/Intervention Personnel
- Physician Assistants
- Teacher Consultants
- School Psychologists (certified by the Michigan Department of Education but without Michigan licensure)
- Limited Licensed Speech Language Pathologists (without their American Speech-Language-Hearing Association Certificate of Clinical Competence)
- School Social Workers (certified by the Michigan Department of Education but without Michigan licensure)

### 3.3.B. AOP & DIRECT MEDICAL SERVICES STAFF POOL

AOP & Direct Medical Services Staff Pool:

- Fully Licensed Speech Language Pathologists
- Audiologists
- Counselors
- Licensed Practical Nurses
- Occupational Therapists
- Occupational Therapist Assistants
- Orientation and Mobility Specialists
- Physical Therapists
- Physical Therapist Assistants
- Physician and Psychiatrists
- Psychologists (not School Psychologists)
- Registered Nurses
- Social Workers
3.3.C. PERSONAL CARE SERVICES STAFF POOL

The following staff may be appropriate for inclusion in time studies if they are involved in Personal Care activities in the school setting:

- Bilingual Aides
- Health Aides
- Instructional Aides
- Paraprofessionals
- Program Assistants
- Teacher Aides
- Trainable Aides

3.3.D. TARGETED CASE MANAGEMENT SERVICES STAFF POOL

Staff with the following credentials may be appropriate for inclusion in time studies if they are involved in Targeted Case Management activities in the school setting:

- A bachelor's degree with a major in a specific special education area.
- Coursework credit equivalent to a major in a specific special education area.
- Minimum of three years' personal experience in the direct care of an individual with special needs.
- A licensed Registered Nurse (RN) in Michigan.

Targeted case managers must also demonstrate knowledge and understanding of all of the following:

- Services for infants and toddlers who are eligible under the IDEA law as appropriate;
- Part C of the IDEA law and the associated regulations;
- The nature and scope of services covered under IDEA, as well as systems of payments for services and other pertinent information;
- Provision of direct care services to individuals with special needs; and
- Provision of culturally competent services within the community being served.
SECTION 4 – ADMINISTRATIVE OUTREACH AND DIRECT MEDICAL ACTIVITY CODE SUMMARY

This section summarizes the code categories utilized for the random moment time study and indicates whether they are claimable for reimbursement under the AOP only, the AOP & Direct Medical program (including Personal Care Services and Targeted Case Management Services), allocated across all programs, or “unallowable” (not claimable). The “unallowable” activities are those that are purely educational in nature.

Activities can fall into one of the following categories for Medicaid reimbursement purposes:

- "A" - Allowable means the expense is allowable for Medicaid reimbursement
  - AOP services have a federal financial participation (FFP) rate of 50%
  - Direct medical IEP/IFSP services have a federal medical assistance percentage (FMAP) rate that varies from year to year
- "U" - Unallowable means the expense is not allowable for Medicaid reimbursement
- "R" - Reallocated means reimbursement across multiple activities that is allocated to isolate the amount applicable to the Medicaid allowable category
- "AOP Medicaid Eligibility Rate (MER)" - The AOP MER is determined by calculating the percentage of the county student population that is Medicaid eligible
- "IEP MER" - The direct medical IEP MER is determined by calculating the percentage of special education students under the age of 21 with health related support services documented in their IEP/IFSPs that are Medicaid eligible

These codes represent activities that may be performed by any time study participants during a typical workday. Some of these activities may be claimed under Medicaid and some may not. In the following section, examples and clarifications of each code are provided to assist with the appropriate coding of the activities.

### 4.1 ACTIVITY CODING

**4.1.A. CODE 1 - MEDICAID OUTREACH AND PUBLIC AWARENESS**

**U - Direct Medical Services**

**A - Administrative Outreach**

This code is used when school staff are performing activities that inform eligible or potentially eligible individuals about Medicaid and how to access Medicaid programs. This code is also used for describing the services covered under the Medicaid program and how to obtain Medicaid preventive services. Activities related to Child Find are not recorded here, but instead under Code 2.
It includes related paperwork, clerical activities, or staff travel required to perform the following activities:

- Informing families and distributing literature about the services and availability of the Early and Periodic Screening, Diagnosis and Treatment (EPSDT) program and the many different Michigan Medicaid programs such as Healthy Kids, MIChild and Children’s Special Health Care Services.
- Informing and encouraging families to access Medicaid managed care systems, i.e., Medicaid Health Plans.
- Informing families about the EPSDT and Medicaid health-related programs and the value of preventive health services and periodic exams.
- Assisting the Medicaid agency to fulfill outreach objectives of the Medicaid program by informing individuals, students, and their families about health resources available through the Federal Medicaid Program.
- Conducting Medicaid outreach campaigns and activities not related to Child Find (e.g., health fairs) that provide information about services provided by such entities as the Community Mental Health Service providers, Local Health Departments, etc.
- Conducting a family planning health education outreach program or campaign, if it is targeted specifically to Medicaid-covered family planning services.
- Contacting pregnant and parenting teenagers about the availability of Medicaid services, including referral to family planning and well baby care programs and services.
- Providing referral assistance to families with information about the Medicaid program.
- Providing information about Medicaid screenings that will help improve the identification of medical conditions that can be corrected or ameliorated through Medicaid services.
- Notifying families of EPSDT program initiatives such as Medicaid screenings conducted at a school site. These screenings are distinct from other general health screenings that are covered by Code 2.
- Coordinating with the local media (newspaper, TV, radio, video) to inform the public about EPSDT screenings, health fairs and other health related services, programs and activities organized by the school.
- Coordinating or attending child health fairs that emphasize preventive health care and promote Medicaid services by presenting Medicaid material in areas with the likelihood of high Medicaid eligibility.
- Informing families about the availability of Medicaid providers of specific covered services, and how to effectively utilize services and maintain participation in the Medicaid program.
- Providing parents, on report card pick-up day or at parent conferences, information about the Medicaid program and health care services available to eligible children, including EPSDT screening services and medically necessary treatment.
4.1.B. CODE 2 - NON-MEDICAID OUTREACH

U - Direct Medical Services

U - Administrative Outreach

This code is used for performing activities that inform eligible or potentially eligible individuals about social, vocational and educational programs, including special education, that are not covered by Medicaid and how to access them. Activities include describing the eligible or potentially eligible individuals, the range of benefits covered under these non-Medicaid social, vocational, and educational programs, and how to obtain them (e.g., WIC, SSI, LIIF, Child Find).

It includes related paperwork, clerical activities, or staff travel required to perform the following activities:

- Informing families about wellness programs and how to access these programs.
- Scheduling and promoting activities that educate individuals about the benefits of healthy lifestyles and practices.
- Conducting general health education programs or campaigns addressed to the general population.
- Conducting outreach campaigns directed toward encouraging persons to access social, educational, legal or other services not covered by Medicaid.
- Assisting in early identification of children with special medical/mental health needs through various Child Find activities.
- Developing the school district’s student/parent handbook.
- Coordinating with the local media (newspaper, TV, radio, video) to inform the public about upcoming events such as health fairs or screenings that focus on non-Medicaid social, vocational and educational programs, and activities such as scholarships, remedial classes, Child Find, DARE, anti-smoking campaigns, etc.
- Providing parents, on report card pick-up day or at parent conferences, information about non-Medicaid programs, social, vocational and educational, and general health care services available in the community or the school for their children.

4.1.C. CODE 3 - FACILITATING MEDICAID ELIGIBILITY DETERMINATION

U - Direct Medical Services

A - Administrative Outreach

This code is used for assisting an individual to become eligible for Medicaid. This activity does not include the actual determination of Medicaid eligibility.
It includes paperwork, clerical activities, or staff travel required to perform the following activities:

- Verifying an individual’s current Medicaid eligibility status.
- Facilitating eligibility determination for Medicaid by planning and implementing a Medicaid information program.
- Participating as a provider of Medicaid eligibility outreach information.
- Explaining Medicaid eligibility rules and the Medicaid eligibility process to prospective applicants.
- Referring an individual or family to the local MDHHS office or other local office to make application for Medicaid benefits.
- Assisting individuals or families to complete the Michigan Medicaid eligibility application.
- Assisting the individual or family in collecting/gathering information related to the application and eligibility determination for an individual, including resource information and third party liability (TPL) information, as a prelude to submitting a formal Medicaid application.
- Providing necessary forms and packaging all forms in preparation for the Medicaid eligibility determination.
- Referring families to appropriate sources to obtain Medicaid applications.

### 4.1.D. CODE 4 - FACILITATING APPLICATION FOR NON-MEDICAID PROGRAMS

**U - Direct Medical Services**

**U - Administrative Outreach**

This code is used for informing an individual or family about programs such as Child Find, Food Stamps, SSI, WIC, Daycare, Legal Aid, Free and Reduced Lunch, and other social or educational programs and referring them to the appropriate agency to make application.

It includes related paperwork, clerical activities, or staff travel required to perform the following activities:

- Explaining the eligibility process for non-Medicaid programs.
- Assisting the individual or family to collect/gather information and documents for the non-Medicaid program applications.
- Assisting the individual or family in completing the non-Medicaid programs application(s).
- Developing and verifying initial and continuing eligibility for the Free and Reduced Lunch Program.
- Providing necessary forms and packaging all forms in preparation for the non-Medicaid eligibility determination.
4.1.E. CODE 5 - PROGRAM PLANNING, POLICY DEVELOPMENT AND INTERAGENCY COORDINATION RELATED TO MEDICAL SERVICES

U - Direct Medical Services

A - Administrative Outreach

This code is used for performing activities associated with the collaborative development of programs with other agencies that assure the delivery of Medicaid-covered medical/mental health services to school-age children. It applies only to employees whose position descriptions include program planning, policy development and interagency coordination, and/or those staff specifically appointed to appropriate committees/programs performing required activities.

It includes related paperwork, clerical activities or staff travel required to perform the following activities:

- Defining the scope of each agency's Medicaid service in relation to the other, and identifying gaps or duplication of medical/mental health programs.
- Analyzing Medicaid data related to a specific program, population, or geographic area and working with Medicaid resources, such as Medicaid Health Plans, to locate and develop EPSDT health services referral relationships and expanding school medical/mental health programs to school populations of need.
- Creating a collaboration of health professionals to provide consultation and advice on the delivery of health care services to the school populations, and developing methods to improve the referral and service delivery process by Medicaid health providers.
- Containing Medicaid costs for individuals with multiple challenging disabilities by reducing overlap and duplication of Medicaid services through collaborative efforts with Medicaid Health Plans, local Community Mental Health Service providers and Local Health Departments.
- Monitoring and evaluating policies and criteria for performance standards of medical/mental health delivery systems in schools and designing strategies for improvements.
- As a part of the school health policy quality assurance system, maintain and ensure the continuity of all Medicaid health-related services, including developing and monitoring contracts with private providers, agencies and/or provider groups.
- Overseeing the organization and outcomes of the coordinated medical/mental health service provision with Medicaid Health Plans.
- Developing internal referral policies and procedures for use by staff so that appropriate coordination of health services occurs between the various Medicaid providers and entities, such as Community Mental Health Service providers, Local Health Departments, Medicaid Health Plans, and those in the educational setting.
Designing and implementing strategies to:

- identify students who may be at high risk for poor outcomes because of poverty, dysfunctional families, and/or inappropriate referrals, and need medical/mental health interventions.
- identify pregnant students who may be at high risk of poor health outcomes because of drug usage, lack of appropriate prenatal care, and/or abuse or neglect.
- assure that students with any significant health problems are diagnosed and treated early.

Presenting specific provider information about Medicaid EPSDT screening in the schools that will help identify medical conditions that can be corrected or ameliorated by services covered through Medicaid.

Developing procedures for tracking and resolving families’ requests for assistance with Medicaid services and providers. This does not include the actual tracking of requests for Medicaid services.

Developing new health programs with local community health providers for the Medicaid population, as determined by a needs assessment and geographic mapping.

Working with requests and inquiries from local school board members, county commissioners, or State legislators to resolve unique or unusual requests or boundary issues regarding appropriate care for certain Medicaid-eligible groups or populations.

Coordinating with interagency committees to identify, promote and develop medical services in the school system.

4.1.F. CODE 6 - PROGRAM PLANNING, POLICY DEVELOPMENT AND INTERAGENCY COORDINATION RELATED TO NON-MEDICAL SERVICES

U - Direct Medical Services

U - Administrative Outreach

This code is used when performing activities associated with the development of strategies to improve the coordination and delivery of community services to school-age children, and when performing collaborative activities with other agencies. Non-medical services may include social, educational, and vocational services.

It includes related paperwork, clerical activities or staff travel necessary to perform the following activities:

- Identifying gaps or duplication of other non-medical services (e.g., social, vocational and educational programs) to school-age children and developing strategies to improve the delivery and coordination of these services.
- Developing strategies to assess or increase the capacity of non-medical school programs.
- Developing procedures for tracking and resolving families’ requests for assistance with non-medical services and the providers of such services.
- Developing and coordinating advisory or work groups of professionals to provide consultation and advice regarding the delivery of non-medical services to the school populations.
- Developing non-medical referral sources.
- Analyzing non-medical data related to a specific program, population, or geographic area.
- Working with other agencies providing non-medical services to improve the coordination and delivery of services and to improve collaboration around the early identification of non-medical problems.
- Defining the scope of each agency’s non-medical service in relation to the other.
- Evaluating the need for non-medical services in relation to specific populations or geographic areas.
- Monitoring the non-medical delivery system in schools.
- Coordinating with interagency delivery committees to identify, promote and develop non-medical services in the school system.

4.1.G. CODE 7 - REFERRAL, COORDINATION, AND MONITORING OF MEDICAL SERVICES

U - Direct Medical Services
A - Administrative Outreach

This code is issued for developing appropriate referral sources for program-specific services for the school district, coordinating programs and services at the school or district level, and monitoring the delivery of Medicaid services within the school system.

This code is not to be used for providing IEP/IFSP targeted case management referral, coordination and monitoring of Medicaid eligible services. IEP/IFSP targeted case management is reported under code 13(C).

It includes related paperwork, clerical activities or staff travel necessary to perform the following activities:

- Making referrals for, and coordinating access to, medical services.
- Identifying and referring adolescents who may be in need of Medicaid family planning services.
- Making referrals for and/or scheduling appropriate Medicaid-covered immunizations, vision, and hearing testing, but not to include the child health screenings (vision, hearing and scoliosis) and immunizations that are required for all students.
- Providing information about Medicaid EPSDT screening (e.g., dental, vision) in the schools that will help identify medical conditions that can be corrected or improved by services through Medicaid.
- Contacting Medicaid providers of pediatric services in lower income areas to determine the scope of EPSDT screening and treatment services available to meet the needs of the at-risk child.
- Reviewing clinical notes of staff by a designated clinician to identify medical referral and follow-up practices, and making recommendations to supervisors for improvements as needed.
- Conducting quality assurance reviews of specific health-related programs objectives.
- Providing both oral and written instructions about the referral policies and procedures between the various agencies to parents for appropriate coordination of health services in the educational setting and for follow-up at home.

4.1.H. CODE 9 - REFERRAL, COORDINATION, AND MONITORING OF NON-MEDICAL SERVICES

U - Direct Medical Services

U - Administrative Outreach

This code is used for making referrals for, coordinating, and/or monitoring the delivery of non-medical, such as educational, services.

It includes related paperwork, clerical activities or staff travel necessary to perform the following activities:

- Making referrals for, and coordinating access to, social and educational services, such as childcare, employment, job training, and housing.
- Making referrals for, coordinating, and/or monitoring the delivery of immunizations and child health screenings (vision, hearing, and scoliosis) that are required for all students.
- Making referrals for, coordinating, and monitoring the delivery of educational, scholastic, vocational, and other non-health-related examinations/assessments.
- Gathering any information that may be required in advance of these non-Medicaid-related referrals.
- Participating in a meeting/discussion to coordinate or review a student’s need for instructional, scholastic, vocational, and non-health-related services not covered by Medicaid.
- Monitoring and evaluating the non-medical components of the individualized plan, such as parent-teacher conferences regarding a student’s educational progress, or compiling attendance reports.
- Linking or referring a family to a non-medical service delivery system.
- Evaluating curriculum and instructional services, policies and procedures.
- Developing procedures for tracking families’ requests for assistance with non-medical services and the providers of those services, such as tutors or remedial education courses.
Health networking beyond the scope of Medicaid that is necessary to coordinate or monitor health fairs or screenings that focus on non-Medicaid social, vocational or educational programs and activities, i.e., scholarships, remedial classes, Child Find, DARE, anti-smoking campaigns, etc.

4.1.1. CODE 10 - MEDICAID-SPECIFIC TRAINING ON OUTREACH, ELIGIBILITY AND SERVICES

U - Direct Medical Services

A - Administrative Outreach

This code is used for coordinating, conducting, or participating in training events and seminars for outreach staff regarding the benefits of the Medicaid program, how to assist families to access Medicaid services, and how to more effectively refer students for services. Training for Child Find activities is NOT recorded here, but under Code 12.

It includes related paperwork, clerical activities or staff travel required to perform the following activities:

- Participating in or coordinating training that improves the delivery of Medicaid services.
- Participating in or coordinating training which enhances early identification, intervention, screening and referral of students with special health needs to EPSDT services.
- Coordinating training to assist families to access Medicaid services.
- Participating in or presenting training that improves the quality of identification, referral, treatment and care of children, e.g., talking to new staff about the EPSDT referral process or available EPSDT and health-related services.
- Conducting Medicaid outreach training of non-medical professional staff for the purpose of targeting and identifying children with special or severe health or mental health needs for appropriate referral to EPSDT screening services.
- Disseminating information on training sessions and conducting all related administrative tasks.
- Conducting seminars and presentations to teachers, parents, and community members on:
  - appropriately identifying students concerning indications of mental health behavioral conditions (i.e., bi-polar disorders, drug/substance abuse, autism, attention deficit, mood disorders, pervasive disability disorder, suicidal tendencies, and clinical depression);
  - identifying physical disabilities and other medical conditions that can be corrected or ameliorated by services covered through Medicaid; and
  - providing information on where and how to seek assistance through the Medicaid system.
4.1.J. **CODE 12 - NON-MEDICAID TRAINING**

**U - Direct Medical Services**

**U - Administrative Outreach**

This code is used for coordinating, conducting, or participating in training events and seminars for outreach staff regarding the benefits of the programs other than the Medicaid program. Programs may include educational programs such as how to assist families to access the services of the relevant programs, and how to more effectively refer students for those services.

It includes related paperwork, clerical activities, or staff travel required to perform these activities:

- Participating in or coordinating training that improves the delivery of services for programs other than Medicaid.
- Participating in or coordinating training that enhances IDEA Child Find Programs.
- Participating in or coordinating training that improves relationships between and among local agencies.
- Participating in training to improve computer skills to collect data.
- Training regarding educational issues.
- Training regarding other non-medical social service issues.
- Participating in or coordinating training that improves the medical knowledge and skills of skilled professional medical personnel.
- Training on general health awareness and prevention programs, such as DARE, sex education, the Michigan Model, vocational or scholarship programs, MEAP tests, etc.

4.1.K. **CODE 13 - IEP/IFSP DIRECT MEDICAL SERVICES**

**A - Direct Medical Services**

**U - Administrative Outreach**

This code is used for providing medically necessary direct medical services which are part of an IEP/IFSP treatment plan. These services are provided to an individual in order to correct or ameliorate a specific condition. Medical evaluations or assessments that are conducted to determine a child’s health-related needs for purposes of the special education eligibility and for the development of the IEP/IFSP are covered under this code.

Direct Medical Services includes related paperwork, clerical activities, or staff travel required to perform the following activities:

- Occupational therapy services
- Physical therapy services
- Speech, language and hearing services
- Orientation and mobility services
- Psychological, counseling and social work services
- Developmental testing and assessments
- Nursing services
- Physician and psychiatrist services
- Assistive technology device services
- Providing health/mental health services contained in an IEP/IFSP
- Medical/health assessment and evaluation as part of the development of an IEP/IFSP
- Conducting medical/health assessments/evaluations and diagnostic testing, and preparing reports
- Providing or participating in face-to-face interventions with either an individual student or a group (2-8 students)
- Administering/monitoring medication included as part of an IEP/IFSP and documented in the IEP/IFSP

4.1.L. CODE 13(A) - IEP/IFSP PERSONAL CARE SERVICES

A - Direct Medical Services

U - Administrative Outreach

This code is used for providing a range of human assistance services to persons with disabilities and chronic conditions which enable them to accomplish tasks that they would normally do for themselves if they did not have a disability or chronic condition. Assistance may be in the form of hands-on assistance or cueing so that the person performs the task by him/herself. The need for services must be documented in the child's IEP/IFSP. Services are not covered when provided by a family member or if they are educational in nature.

Personal care services include related paperwork, clerical activities, or staff travel required to perform the following activities:

- Eating/feeding
- Respiratory assistance
- Toileting
- Grooming
- Dressing
- Transferring
- Ambulation
• Intervention for seizure disorder
• Personal hygiene
• Mobility/Positioning
• Meal preparation
• Skin care
• Muscle strengthening
• Bathing
• Maintaining continence
• Medical equipment maintenance
• Assistance with self-administered medications
• Redirection and intervention for behavior
• Health related functions through hands-on assistance, supervision and cueing

4.1.M. Code 13(B) - IEP/IFSP Targeted Case Management Services

A - Direct Medical Services

U - Administrative Outreach

This code is used for providing services which are a part of the IEP/IFSP treatment plan. These services identify and address special health problems and needs that affect the student’s ability to learn, and assist the student to gain and coordinate access to a broad range of medically-necessary services covered under the Medicaid program.

Targeted Case Management Services include related paperwork, clerical activities, or staff travel required to perform the following activities:

• Assure that standard re-examination/follow-up of the student is periodically conducted to ensure the student receives needed diagnosis and treatment
• Assist families in identifying/choosing appropriate care providers and services
• Maintain case records and indicate all contact for student in the same manner as other covered services
• Coordinate performance evaluations/assessments and other service needs for the student
• Prevention of duplicate services
• Facilitation/participation in development, review and evaluation of the multi-disciplinary assessment
• Supporting activities that link or coordinate needed health services for the student
• Meeting with teachers and other professional staff to discuss testing, planning, treatment, coordinating effective interventions, and student progress
- Coordinating school based services and treatment with parents and student
- Monitoring and recommending a plan of action
- Providing modifications to the multi-disciplinary, patient-centered treatment plan
- Coordinating with staff/health professionals to establish continuum of health and behavioral services in the school setting
- Provide summary of provider, parent and student consultation

4.1.N. CODE 13(C) - OTHER AND NON IEP/ IFSP DIRECT MEDICAL SERVICES

U - Direct Medical Services

U - Administrative Outreach

This code is used when providing direct medical services that are not documented in an IEP/IFSP or for services that are not allowable for Medicaid federal matching purposes.

- Administering first aid
- Performing routine or mandated child health screens including, but not limited to, vision, hearing, dental, scoliosis, and EPSDT screens
- Administering immunizations
- Discussing health care needs and the importance of well-baby care with adolescents
- Routine medication administration (such as over-the-counter medications or maintenance medications)

4.1.O. CODE 14 - TRANSPORTATION AND TRANSLATION SERVICES IN SUPPORT OF MEDICAID-COVERED SERVICES

U - Direct Medical Services

A - Administrative Outreach

This code is used for assisting an individual to obtain transportation to Medicaid-covered services. This does not include the provision of the actual transportation service, but rather the administrative activities involved providing transportation. This code also does not include activities that contribute to the actual billing of transportation as a medical service, nor does it include accompanying the Medicaid-eligible individual to Medicaid services as an administrative activity.

This code is used for school employees who provide translation services related to Medicaid-covered services as an activity. Translation may be allowable as an administrative activity if it is not included and paid for as part of a medical assistance service.
It includes related paperwork, clerical activities or staff travel required to perform the following activities:

- Scheduling or arranging transportation to Medicaid-covered services.
- Assisting or arranging for transportation for the family in support of the referral and evaluation activities.
- Arranging for or providing translation services that assist the individual to access transportation and medical services.
- Arranging for or providing translation services that assist the individual to "communicate" with service providers about medical services being provided.
- Arranging for or providing translation services that assist the individual to understand necessary care or treatment.
- Assisting the student to define/explain their symptoms to the physician.
- Arranging for or providing signing services that assist family members to understand how to provide necessary medical support and care to the student.

4.1.P. Code 15 - Transportation and Translation Services in Support of Non-Medicaid Covered Services

U - Direct Medical Services

U - Administrative Outreach

This code is used for assisting an individual to obtain transportation to services not covered by Medicaid, or accompanying the individual to services not covered by Medicaid.

This code is used for school employees who provide translation services related to social, vocational, or educational programs and activities as an activity separate from the activities referenced in other codes.

It includes related paperwork, clerical activities, or staff travel required to perform the following activities:

- Scheduling or arranging transportation for social, vocational, and/or educational programs and activities.
- Scheduling or arranging transportation to and from school when no Medicaid service has been provided.
- Arranging for or providing translation services that assist the individual to access and understand non-medical services, programs, and activities.
- Arranging for or providing signing services that assist the individual’s or family’s access to and understanding of non-medical programs and activities.
4.1.Q. Code 16 - General Administration

R - Direct Medical Services

R - Administrative Outreach

This code is used for time study participants performing activities that are not directly assignable to program activities.

It includes related paperwork, clerical activities, or staff travel required to perform these activities. Typical examples (not all inclusive) of general administrative activities may include:

- Establishing goals and objectives of health-related programs as part of the school’s annual or multi-year plan
- Reviewing school or district procedures and rules
- Attending or facilitating school or unit staff meetings, training, or board meetings
- Performing administrative or clerical activities related to general building or district functions or operations
- Providing general supervision of staff, including supervision of student teachers or classroom volunteers, and evaluation of employee performance
- Reviewing technical literature and research articles
- Taking lunch, breaks, or time not at work when staff are paid for these activities
- Paid leave day
- Paid leave of absence
- Processing payroll/personnel-related documents
- Maintaining inventories and ordering supplies
- Developing budgets and maintaining records
- Training (not related to curriculum or instruction), such as how to use the district’s new computer system
- Other general administrative activities of a similar nature, as listed above, which cannot be specifically identified under other activity codes

4.1.R. Code 17 - School-Related and Educational Activities

U - Direct Medical Services

U - Administrative Outreach

This code is used for any other school-related activities that are not health-related, such as social services, educational services and teaching services, and employment and job training. These activities include the development, coordination, and monitoring of a student’s education plan.
It includes related paperwork, clerical activities, or staff travel required to perform these activities. Examples of activities may include:

- Providing classroom instruction (including lesson planning)
- Testing and correcting papers
- Compiling attendance reports
- Performing activities that are specific to instructional, curriculum, and student-focused areas
- Reviewing the education records for students who are new to the school district
- Providing general supervision of students (e.g., playground, lunchroom)
- Monitoring student academic achievement
- Providing individualized instruction (e.g., math concepts) to a special education student
- Conducting external communications related to school educational issues/matters
- Compiling report cards
- Applying discipline activities
- Activities related to the immunization requirements for school attendance
- Compiling, preparing, and reviewing reports on textbooks or attendance
- Enrolling new students or obtaining registration information
- Conferring with students or parents about discipline, academic matters, or other school-related issues
- Evaluating curriculum and instructional services, policies, and procedures
- Participating in or presenting training related to curriculum or instruction (e.g., language arts workshop, computer instruction)
- Translating an academic test for a student
- Transportation, if covered as a medical service under Medicaid

4.1.S. CODE 17(D) - NON-RETURNED MOMENTS

U - Direct Medical Services

U - Administrative Outreach

This code is used for moments that are not returned by the published deadline. As long as the compliance rate remains above 85%, these moments will not be used as a negative factor in the RMTS calculation.
4.1.T. CODE 18 - NOT SCHEDULED TO WORK AND NOT PAID

U - Direct Medical Services

U - Administrative Outreach

This code is used for time study participants who are not scheduled to work and not paid on the randomly selected moment pre-printed on the time study form.

Examples of this may include:

- Participant is a part-time employee who is not scheduled to work at the selected sample time
- The selected sample time falls before or after the participant’s scheduled work day
- School is closed due to an unpaid holiday or an unpaid school district day off (i.e., winter break, spring break, or a built-in “bad weather day”)
- Unpaid leave of absence
SECTION 5 – CONFIDENTIALITY

Aggregate time study data may occasionally be useful for other administrative tasks (i.e., planning) and may be used in that way. However, any individually identifiable information must be protected as required by all applicable state and federal statutes and regulations to ensure confidentiality and protection of privacy.
SECTION 6 – TIME STUDY TRAINING

6.1 TRAINING

The approved training methods, materials, information, and instructions are tailored to each group involved in the time studies.

The Contractor, along with MDHHS, is responsible for developing training programs and materials and, along with the ISD coordinator, providing follow-up assistance as needed. For training, there are some services the Contractor will provide statewide and other services that will be provided to the individual ISDs.

6.1.A. LOCAL ISD COORDINATOR TRAINING

All ISDs have an ISD Coordinator/representative who receives training that ensures a thorough understanding of their coordinator responsibilities, the approved time study and cost reporting activities. These individuals must understand their role as the liaison between the Medicaid Program, the Contractor, and other staff. They must understand and be able to convey to others the basic purpose of the program, assist the Contractor with follow-up as needed, and serve as a facilitator for the Contractor to "navigate" the district as necessary.

6.1.B. TIME STUDY PARTICIPANT TRAINING

For time study participants, it is essential that these individuals understand the purpose of the time studies, that time is of the essence related to completion of the form, and that their role is crucial to the success of the time study. The Contractor develops and provides detailed written information and instructions for completing the time study forms as a coversheet attached to each time study form. The coversheet provides a "tutorial" with the aforementioned basics of the program as well as information about the Medicaid covered services provided in the school setting.
SECTION 7 – SUMMARY OF TIME STUDY STEPS

The Contractor duties are to:

- Import eligible school district staff information to create the RMTS staff pools.
- Randomly select staff/moments to be sampled.
- Generate printed or electronic RMTS forms for each moment.
- Generate and distribute a master list of selected moments to the ISD Coordinators as a local control list.
- Generate mailing labels addressed to randomly selected staff.
- Code the time study responses.
- Calculate activity percentages for each of the activity codes.
- Scan completed and coded time study forms.
- Transfer raw data from scanned forms to the claims development software to calculate activity percentages for each of the activity codes.
- Produce quarterly reports summarizing the results of the random moment time studies (RMTS) and RMTS compliance reporting. (Both reports are forwarded to the MDHHS Program Policy Division for posting on the MDHHS website. Refer to the Directory Appendix for website information.)
- Produce periodic and special RMTS reports that provide data and information sorted by LEA and ISD that are provided to the CMS, MDHHS, MDE, ISDs and their auditors.
- Create and verify the eligible staff pools for time studies from the quarterly information provided by the ISDs.
- Distribute time study forms and collect completed time study forms.
- Code the activity forms received from the ISDs.
- Initiate and complete the ISD claim workbooks by obtaining the financial data from each LEA and compiling data to complete the workbook.
SECTION 8 – SUMMER QUARTER TIME STUDY METHODOLOGY

8.1 AOP QUARTERLY CLAIM (OTHER THAN SUMMER QUARTER)

The claim consists of the results of the quarterly RMTS of the approved staff pool for the quarter and the correlating allowable costs applied to the reimbursement methodology.

8.2 AOP SUMMER QUARTER FORMULA AND RANDOM MOMENT TIME STUDY

The summer quarter months are July, August and September. There is a break period between the end of one regular school year and the beginning of the next regular school year during which only a few staff are working. The majority of school staff work during the school year and do not work for part of the summer quarter (9-month staff). However, there are some 9-month staff that opt to receive their pay over a 12-month period. Therefore, different factors must be applied to the summer formula in order to accurately reflect the activities that are performed by the staff.

The summer quarter is divided into two parts producing two partial claims. For the AOP process, the sum of both claims is submitted to Medicaid for reimbursement for the summer quarter. The first part of the quarter is from July 1 to the date students return to school. The second part of the quarter is from the date students return to school through September 30.

The summer time study of 800 moments is performed after students return to school and is only applied to the staff pool costs for the second part of the summer quarter (Fall staff pool costs). The RMTS is performed during a shorter time period to accurately reflect the work efforts being performed when all staff have returned to work.

The sums of Part I and Part II are utilized to calculate the claim submitted to Medicaid for reimbursement.

8.2.A. PART I - JULY 1 TO THE INDIVIDUAL ISD DATE THAT STUDENTS RETURN TO SCHOOL

Part I of the summer quarter is comprised of the following elements:

- Staff Pool – those eligible staff in the April through June staff pool
- Costs – April through June allowable staff pool costs
- A weighted average of the October-December, January-March, April-June, and the summer time study results.

8.2.B. PART II – DATE STUDENTS RETURN TO SCHOOL THROUGH SEPTEMBER 30

Part II of the summer quarter is comprised of the following elements:

- Staff Pool – the eligible new Fall staff returning to work
- Costs – the allowable cost associated with the new Fall staff pool
- RMTS – the time study for Part II is performed for a shortened period of time from the day students return to school through September 30. The start date will vary by ISD depending on the date the students return to school.
8.3 DIRECT MEDICAL SUMMER QUARTER FORMULA AND RANDOM MOMENT TIME STUDY

A weighted average of the four time study results for the staff pool periods listed below is applied to the Medicaid Allowable Expenditure Report (MAER) total costs. The MAER costs include the annual costs associated with the direct medical services, personal care services and targeted case management services.

The direct medical services time study application is comprised of the following elements:

- **Staff Pools** – Those individuals eligible to participate in the following four staff pool periods:
  - October through December
  - January through March
  - April through June
  - Date students return to school through September 30 (summer time study)

- **Cost Pool** – The costs from the annual Medicaid Allowable Expenditure Report (direct medical services, targeted case management and personal care services).

- **RMTS** – A weighted average of the October–December, January–March, April–June and the summer time study results as described above.

8.4 FINANCIAL REPORTING COMPLIANCE REQUIREMENTS

The financial data reported (salaries, benefits, supplies, purchased services, and other expenditures) must be based on actual detailed expenditures from LEA payroll and financial systems. Payroll and financial system data must be applied using generally accepted governmental accounting standards and principles or applicable administrative rules. The expenditures accumulated must correlate to the claiming period.
SECTION 9 – AUDIT AND QUALITY ASSURANCE

9.1 AUDIT

9.1 A. ACTIVITIES TO BE PERFORMED BY MDHHS OFFICE OF AUDIT STAFF

MDHHS audit staff review of selected ISD cost reports includes the following activities:

- Verification that the salaries listed for employees/positions included in the Random Moment Time Study (RMTS) staff pool match the payroll records for the same period as the time study.
- A review of the salaries of employees who changed positions during the time study period.
- If a replacement was hired/transferred, the auditor will verify that only the salary earned while working in a position on the staff pool list was reported, and that salaries for both the original and replacement employees were not duplicated on the report for the same time period.
- Verification that any other salaries and costs for supplies, etc., are of direct benefit to the employees on the relevant staff pool list and, therefore, allocable to that staff pool cost. For the Direct Medical program, all supplies and materials must be medically related.
- Confirmation that none of the direct costs reported were also claimed as an indirect cost, that the proper indirect cost rate was used, and the rate was applied only to costs in the base. The employees in non-standard job categories are the most likely to be considered indirect type employees; therefore, documentation will be reviewed for these individuals.
- Verification that no federal funds were claimed on the cost reports and that costs were not accepted for cost sharing.
- A standard review of other areas, such as confirmation that reported costs were actually paid, support documentation was maintained as required, and costs were properly charged to the correct accounts.
- Verification of recipient eligibility, documentation of services in the IEP/IFSP, and provider credentials.

The ISD must be prepared to direct the auditor to any document used to support and identify the reported RMTS costs.

9.1.B. SSAE 16 AUDIT REQUIREMENTS

The Contractor is required to have a Type II Statement on Standards for Attestation Engagements (SSAE) 16 audit to provide the necessary assurances that the claiming process (e.g., methodology, time studies, cost allocations, etc.) have been properly applied.

In a SSAE 16 Type II engagement, the service auditor expresses an opinion on whether the description of the service organization's system is fairly presented, whether the controls included in the description are suitably designed, whether the controls were
operating effectively, and provides a description of the service auditor’s tests of operating
effectiveness and the results of those tests.

The Contractor must undergo a SSAE 16 audit annually. The SSAE 16 audit must be
submitted within 90 days after the end of the examination period.

Three (3) copies of the audit should be forwarded to the MDHHS Program Policy Section.
(Refer to the Directory Appendix for contact information.)

9.2 QUALITY ASSURANCE, OVERSIGHT AND MONITORING

Quality assurance, oversight and monitoring activities include:

9.2.A. MDHHS PROGRAM POLICY - OVERSIGHT OF ADMINISTRATION AND OPERATIONS

MDHHS policy staff responsibilities are:

- Review quarterly time study results against historical benchmarks according to:
  - Overall results and matchable percentages
  - Benchmarks by activity code and by staff category
- Detailed investigation of anomalies in results.
- Determination of policy or procedure changes based on results of anomaly review.
- Overall statistical requirements in terms of confidence and precision levels on a quarterly
  basis and an annual basis.
- Sampling to review coding activities performed by the Contractor.
- Disseminate CMS guidance.
- Monitor ISDs processing of claims for compliance with State and Federal regulations and
  program guidelines.
- Assure that billing entities have the processes in place to correct any claims paid in error.
- Provide information and training to billing entities as needed for program compliance.
- Provide operational oversight and technical assistance.
- Assist the ISDs with quality assurance and compliance monitoring.
- Provide oversight of the ISDs quality assurance and compliance plans to insure that they
  provide oversight and monitoring of such things as documentation, provider credentials,
  record retention, parental consent, and confidentiality.
9.2.B. MDHHS OFFICE OF INSPECTOR GENERAL – POST PAYMENT REVIEW AND COMPLIANCE

MDHHS Office of Inspector General staff responsibilities are:

- Post payment review for the purpose of adherence to provider policy, provider credentials and appropriate billing practices.
- Post payment review for the purpose of reported fraud or abuse.

For more detailed information regarding the Fraud and Abuse and Post Payment Review, refer to the Post Payment Review and Fraud/Abuse Section of the General Information for Providers Chapter.

9.2.C. MDHHS RATE REVIEW SECTION – COST SETTLEMENT REVIEW

MDHHS Rate Review Section staff responsibilities are:

- Import and create a database of the cost report data submitted by the ISDs.
- Perform reviews of the data for accuracy and completeness.
- Summarize the data and forward to the ISDs for final approval.
- Compile cost settlement summaries and prepare over/under adjustments.

9.2.D. CONTRACTOR OVERSIGHT AND QUALITY ASSURANCE

There are several levels of quality assurance and validation built into the RMTS process.

- In terms of coding, the Contractor has a coding process in place in which centralized coders code all moments, and then a second coder reviews all moments coded as matchable for verification of accurate and consistent application of activity codes. The second coder also reviews a random sample of 10% of all non-matchable moments for quality assurance purposes.
- Quality assurance and validation includes the quarterly review which includes the Contractor meeting with MDHHS staff specifically to review time study results and other procedural issues. Each quarter, the team reviews detailed reports which outline the current quarter time study results benchmarked against past quarter results. The results are reviewed by activity code as well as by matchable/non-matchable categories. Comparisons are made of the variances in the overall quarterly results from the same quarter in the previous year, as well as variances of the current quarter against the average of the past four quarters. Results are reviewed and discussed in terms of results by staff category. Any anomalies identified are pursued through a detailed investigation of the moments which produced the anomaly. The Contractor, in conjunction with MDHHS, then determines how to handle any issues in terms of additional communication or training for RMTS participants, policy or procedural changes, etc.
- ISDs utilizing the web-based input process may view compliance reporting online.
- ISDs utilizing the paper methodology are sent compliance reporting on a weekly basis.
9.2.E. ISD Oversight

ISD responsibilities are to:

- have systems in place to monitor service delivery, claim documentation, claim billing, and payments received.
- verify that the credentials of all clinicians are current and appropriate for Medicaid billing and that services rendered are within the scope of the clinician’s practice.

SECTION 1 - GENERAL INFORMATION

This chapter applies to all providers.

The Michigan Department of Health and Human Services (MDHHS) administers the Medicaid Program, Children's Special Health Care Services (CSHCS), Maternity Outpatient Medical Services (MOMS) and other special programs described elsewhere in this manual. In addition to these traditional programs, MDHHS administers many other programs/coverages to meet the healthcare needs of Michigan’s medically indigent population. Programs vary in scope and eligibility requirements and are funded through various sources, including federal, state, and/or private. Some of the programs offer comprehensive or reduced Medicaid benefits as indicated. Additional information regarding these programs may be available on the MDHHS website.

Contact information for the various programs is listed in the Directory Appendix.
SECTION 2 – PROGRAMS THAT TARGET SPECIFIC MEDICAL CONDITIONS

2.1 BREAST AND CERVICAL CANCER CONTROL PROGRAM

2.1.A. ELIGIBLE BENEFICIARIES

The Breast and Cervical Cancer Control Program (BCCCP) covers uninsured low-income women of all ages especially, but not limited to, women aged 40-64. Certain income restrictions do apply. Enrollees in the Breast and Cervical Cancer Control Program (BCCCP) are exempt from co-pays.

- Insured women may apply if certain insurance, age, and income requirements are met.
- Women who are enrolled in a managed care program, health maintenance organization (HMO) or have Medicare Part B are not eligible.

2.1.B. COVERED SERVICES

Covered services include:

- Clinical breast exams
- Pap smears
- Pelvic exams
- Screening mammogram, and
- Appropriate referral to community providers for follow-up of abnormalities.

Breast biopsy, colposcopy-directed services, colposcopy service, diagnostic mammograms, and loop electrosurgical excision procedure (LEEP) may be provided based upon medical needs, financial and insurance status, and availability of federal grant funds or Michigan tobacco tax dollars.

2.2 TRAUMATIC BRAIN INJURY REHABILITATION PROGRAM

2.2.A. ELIGIBLE BENEFICIARIES

The Traumatic Brain Injury (TBI) Rehabilitation Program covers adults age 18 or older who are U.S. citizens and have incurred a traumatic brain injury in the past 15 months, or have experienced a significant change within the last three months but are medically stable. Individuals must be a RANCHO 5-6 and currently Medicaid eligible. There must be a documented need for comprehensive, specialized rehabilitative services.

Individuals must be bowel and bladder trained and able to actively participate in 21 hours of therapy a week. Services must be provided under a physician approved plan of care and rendered in a residential or outpatient program that is accredited by the Commission on Accreditation of Rehabilitation Facilities (CARF) and has an agreement with a Medicaid approved nursing facility.
2.2.B. COVERED SERVICES

In addition to regular Medicaid coverage, the TBI Rehabilitation Program provides:

- Hearing & speech/language services
- Occupational therapy
- Physical therapy
- Physician services
- Psychological services
- Social work.

Vocational and educational services are not reimbursable by Medicaid.
SECTION 3 – GENERAL COVERAGE PROGRAMS

3.1 MEDICARE SAVINGS PROGRAM

3.1.A. ELIGIBLE BENEFICIARIES

Low income Medicare beneficiaries and those individuals who are eligible for Medicare but do not enroll due to the cost may participate in the Medicare Savings Program (MSP). Financial and nonfinancial requirements and restrictions do apply.

3.1.B. COVERED SERVICES

The MSP pays Medicare coinsurance, deductible, and premiums.

3.2 SPECIAL N SUPPORT

3.2.A. ELIGIBLE BENEFICIARIES

Families that received the low-income families (LIF) Medicaid but are no longer eligible due to an increase in child support may qualify for Special N Support. Most of the health coverage is provided by Medicaid Health Plans (MHPs), and the majority of the beneficiaries are already enrolled in a MHP.

3.2.B. COVERED SERVICES

Special N Support beneficiaries receive regular Medicaid coverage for four months.

3.3 FREEDOM TO WORK

3.3.A. ELIGIBLE BENEFICIARIES

Medicaid-eligible disabled adults aged 16 through 64 years old with earned income may be eligible. A beneficiary must move into this Medicaid category from another Medicaid category. SSI beneficiaries whose SSI eligibility may end due to financial factors are among those eligible to be considered for this program.

To be eligible, the beneficiary must be employed on a regular and continuing basis. There may be temporary breaks in employment up to 24 months if they are the result of involuntary layoff or are determined to be medically necessary.

For a married beneficiary, the spouse’s income and assets are not considered when determining eligibility for this Medicaid category. The beneficiary’s total countable unearned income cannot exceed 100 percent of the Federal Poverty Level (FPL). The beneficiary’s countable assets are limited to $75,000. In addition, the beneficiary is allowed to have IRS-recognized retirement accounts (including IRAs and 401Ks) of unlimited value.
3.3.B. COVERED SERVICES

Freedom To Work beneficiaries receive regular Medicaid coverage.

3.3.C. PREMIUMS

If the beneficiary’s earned income is below 250 percent of the FPL, there is no premium required for coverage. If the beneficiary’s earned income is between 250 percent of the FPL and $75,000 per year, the premium is based on the sliding fee scale. If the total countable earned income exceeds $75,000 per year, the beneficiary must pay a premium equal to 100 percent of the cost of Medicaid coverage.

3.4 MEDICAID FOR SUPPLEMENTAL SECURITY INCOME BENEFICIARIES

3.4.A. ELIGIBLE BENEFICIARIES

Supplemental Security Income (SSI) covers disabled children whose families have low income, and low-income adults who are aged, disabled or blind. The Social Security Administration determines eligibility and awards monthly SSI payments based on income and assets requirements. Beneficiaries awarded SSI are automatically eligible for regular Medicaid coverage.

3.4.B. COVERED SERVICES

SSI beneficiaries are eligible for regular Medicaid. In some cases, Medicare premiums are paid by Medicaid based upon certain individual situations and previous work histories.

3.5 TRANSITIONAL MEDICAL ASSISTANCE

3.5.A. ELIGIBLE BENEFICIARIES

Transitional Medical Assistance (TMA) covers families who are U.S. citizens that are no longer eligible for the low-income family (LIF) Medicaid because the parent(s) has too much income from employment. The family must have received low-income family Medicaid for at least three months of the previous six months to be eligible for TMA. Most of the health coverage is provided by HMOs contracted by MDHHS. The majority of the beneficiaries are already enrolled in a MHP. A renewal of the application to TMA is not necessary.

3.5.B. COVERED SERVICES

TMA provides regular Medicaid coverage, or a comprehensive health care package that includes vision, dental and mental health services, if the beneficiary has been enrolled in a MHP for 12 months.
SECTION 4 – COMMUNITY-BASED LONG TERM CARE

4.1 MI CHOICE WAIVER (HOME AND COMMUNITY-BASED WAIVER FOR THE ELDERLY AND DISABLED)

The MI Choice Waiver provides services to aged and physically disabled individuals 18 years old and over who are eligible for full Medicaid and want to stay in their homes or another residential setting but, without the provision of waiver services, would require the level of care only available in a nursing facility. Income and assets requirements and restrictions apply. Applicants must also meet the Michigan Medicaid Nursing Facility Level of Care Determination criteria. Individuals must be currently Medicaid approved or be Medicaid eligible if they were to enter a nursing facility. MDHHS contracts with local agencies to administer this program. (Refer to the MI Choice Waiver Chapter for additional information.)

4.2 PROGRAM OF ALL-INCLUSIVE CARE FOR THE ELDERLY (PACE)

PACE is a comprehensive service delivery system for frail, elderly individuals who meet the Michigan Medicaid Nursing Facility Level of Care criteria. Refer to the PACE Chapter of this manual for additional information.
SECTION 5 – MI CHILD

5.1 ELIGIBLE BENEFICIARIES

Effective January 1, 2016, the Michigan Department of Health and Human Services (MDHHS) converted the MI Child program to a Medicaid expansion program. Although individuals are enrolled in a Medicaid expansion program, the program will continue to be referred to as the MI Child program. All Medicaid coverages and conditions will apply in accordance with current Medicaid policy.

The MI Child Medicaid program provides health care coverage for children who:

- Are age 0 through 18
- Have income at or below 212% of the Federal Poverty Level under the Modified Adjusted Gross Income (MAGI) methodology
- Do not have other comprehensive medical insurance (this includes insurance that covers inpatient and outpatient hospital services, laboratory, x-ray, pharmacy and physician services)
- Do not qualify for other MAGI related Medicaid programs
- Are residents of the State of Michigan

The child's eligibility for MI Child is determined through the MAGI methodology. All criteria for MAGI eligibility must be met to be eligible for MI Child.

Families enrolled in the MI Child program are required to pay a premium of $10 per month per family to maintain coverage for their children. Children enrolled in MI Child are exempt from copay for services.

5.2 COVERED SERVICES

Children enrolled in MI Child are considered Medicaid beneficiaries and are entitled to all Medicaid covered services.
SECTION 6 – CHILD AND ADOLESCENT HEALTH CENTERS AND PROGRAMS

Under an agreement with MDHHS, Child and Adolescent Health Centers and Programs (CAHCPs) provide medical services and outreach on behalf of the Medicaid Health Plans (MHPs) to school-aged children. (Refer to the Medicaid Health Plan Chapter of this manual for additional information.)
SECTION 7 - FLINT FAMILY SUPPORTS COORDINATION SERVICES

Family Supports Coordination services are part of a comprehensive health benefit available to pregnant women and children who were served by the Flint water system who meet the Medicaid eligibility requirements.

Family Supports Coordination services assist individuals in gaining access to appropriate medical, educational, social, and/or other services. Family Supports Coordination services include assessments, planning, linkage, advocacy, care coordination, referral, monitoring, and follow-up activities.

In addition to Family Supports Coordination services, eligible beneficiaries will receive the full array of Medicaid-covered benefits. This includes the provision of Early and Periodic Screening, Diagnosis and Treatment (EPSDT) services for children up to age 21, Non-Emergency Medical Transportation (NEMT), and Maternal Infant Health Program (MIHP) services.

7.1 ELIGIBILITY

Providers may verify beneficiary eligibility for Family Supports Coordination services through a Community Health Automated Medicaid Processing System (CHAMPS) online eligibility inquiry or via a Health Insurance Portability and Accountability Act (HIPAA) 270 transaction. The CHAMPS or 271 eligibility response for beneficiaries eligible for Family Supports Coordination services will show:

- a current MAGI category beginning with “F”; and
- a current benefit plan of “TCMF” in addition to their assigned Medicaid or Children’s Health Insurance Program (CHIP)-related benefit plans.

7.2 CORE ELEMENTS OF FAMILY SUPPORTS COORDINATION

The purpose of Family Supports Coordination services is to provide a comprehensive array of services that are appropriate to the conditions of the individual. At a minimum, Family Supports Coordination services must include:

- a face-to-face comprehensive assessment, history, re-assessments, and identification of a course of action to determine the specific needs of the beneficiary and to develop an individual Plan of Care;
- planning, linking, coordinating, follow-up, and monitoring to assist the beneficiary in gaining access to services;
- coordination with the beneficiary’s primary care provider (PCP), other providers, and Medicaid Health Plan (MHP), as applicable; and
- any other service approved by MDHHS.

7.2.A. INITIAL/ANNUAL COMPREHENSIVE ASSESSMENT VISIT

All comprehensive assessment visits, including the initial face-to-face comprehensive assessment visit, must be conducted by a qualified licensed nurse or social worker with the beneficiary in the beneficiary’s home or primary place of residence. The purpose of the comprehensive assessment visit is to gather sufficient information to develop an
individualized Plan of Care for the beneficiary and to ensure that all other eligible individuals in the household are identified for further screening.

It is expected that face-to-face assessments are performed annually; however, the frequency should be based on the needs and circumstances of the beneficiary and/or family. Active participation by the beneficiary and/or parent(s)/legal guardian(s) is necessary. Comprehensive assessment activities include:

- obtaining client history;
- identifying the beneficiary’s needs and completing related documentation; and
- gathering information from other sources, such as family members, medical providers, social workers, and educators (if necessary), to form a complete assessment of the beneficiary.

At a minimum, the comprehensive assessment visit shall assess:

- the growth and development of beneficiaries up to age 21;
- the behavioral profile of beneficiaries up to the age of 21, including the notation of aggressive or hyperactive behavior;
- the beneficiary’s access to a PCP and other health care providers;
- whether the beneficiary’s PCP has conducted a developmental and social-emotional screen(s) utilizing a standardized and validated tool, such as the Ages & Stages Questionnaire: Social-Emotional (ASQ:SE) or the Pediatric Symptom Checklist (PSC) as indicated by the American Academy of Pediatrics (AAP) Periodicity Schedule, and documenting the results of any screenings performed;
- whether the beneficiary’s PCP has assessed the beneficiary for sources of toxic stress and for sources of strength using nationally recognized tools, such as the Adverse Childhood Experiences (ACEs) and Resiliency questionnaires, and documenting the results of any screenings performed;
- the beneficiary’s access to prenatal care, potential for pregnancy complications, pica activities, and intent to breastfeed (pregnant beneficiaries);
- the beneficiary’s educational and nutritional needs, including participation in the Women, Infants and Children (WIC) program and/or the Food Assistance Program (FAP);
- the beneficiary’s environment and typical family practices that may pose a lead risk;
- lead hazards within the family’s dwelling; and
- access to NEMT.

7.2.B. DEVELOPMENT OF THE PLAN OF CARE AND DOCUMENTATION

During or immediately following the face-to-face initial comprehensive assessment visit, a Plan of Care must be developed for beneficiaries who agree to participate in Family Supports Coordination services, with the active participation of the parent(s)/legal guardian(s) when applicable. The development (and periodic revision) of a specific Plan of Care that is based on the information collected through the comprehensive
assessment must specify the goals and actions to address the medical, educational, social, and/or other services needed by the beneficiary. The supports coordinator must ensure the active participation of the beneficiary, and work with the beneficiary (or the beneficiary's parent[s]/legal guardian[s]) and others to develop those goals, and to identify a course of action to respond to the assessed needs of the beneficiary. The Plan of Care is to be shared with the beneficiary's MHP and PCP, if applicable. Beneficiaries must consent to share the Plan of Care with the MHP and other providers identified in the Plan of Care. At a minimum, the Plan of Care must:

- identify a course of action to respond to the assessed needs of the beneficiary (e.g., plan for the testing of family members at risk for lead hazard exposure);
- provide education and information regarding lead hazards, including the impact of lead exposure on the developing fetus of pregnant beneficiaries; and
- facilitate blood lead testing and follow-up testing and treatment as recommended by the PCP.

Family Supports Coordination providers are required to document the following information for all beneficiaries receiving Family Supports Coordination services:

- the name of the beneficiary;
- the dates of the supports coordination services;
- the name of the Family Supports Coordination provider and the qualified professional (i.e., licensed nurse or social worker) providing the supports coordination services;
- the nature and content of the supports coordination visits received, and whether goals specified in the Plan of Care have been achieved;
- whether the beneficiary has declined services within the Plan of Care;
- the need for, and occurrences of, coordination with other providers;
- a timeline for obtaining needed services;
- a timeline for re-evaluation of the Plan of Care; and
- the beneficiary's consent to share information.

7.2.C. REFFERALS AND RELATED ACTIVITIES

In collaboration with the PCP and the MHP, it is expected that the supports coordinator will facilitate and coordinate referral and related activities to assist the beneficiary in obtaining needed services. Activities such as scheduling appointments or linking the beneficiary with medical, educational, social, and/or other programs and services to address identified needs and achieve goals specified in the Plan of Care are primary components of Family Supports Coordination services. Referral activities include, but are not limited to, the coordination of age-appropriate services such as:

- health care related services, including physical and specialty behavioral health services;
- nutritional services, such as coordinating referrals to the Special Supplemental Nutrition Program, WIC program, or FAP;
• educational services, such as age-appropriate referrals to Early On, Great Start Readiness Programs, Head Start, and school-based services;
• additional social supports (including home visiting programs) to assist the beneficiary in obtaining other assistance, such as financial, housing, and transportation assistance, and lead assessment and abatement resources; and
• blood lead testing and re-testing for family members at risk for lead exposure, and education regarding lead hazards including the impact of lead exposure on young children and the developing fetus.

7.2.D. MONITORING AND FOLLOW-UP ACTIVITIES

Monitoring and follow-up activities include activities and contacts that are necessary to ensure the Plan of Care is implemented and adequately addresses the eligible beneficiary’s needs, and which may be conducted with the beneficiary, family members, service providers, or other entities or individuals. Monitoring and follow-up activities are conducted as frequently as necessary by the supports coordinator.

A maximum of five (5) face-to-face monitoring visits are billable per year for each eligible beneficiary. To be reimbursed, the visit must be face-to-face. Additional monitoring and follow-up activities are likely between face-to-face visits but are not reimbursable. At least one annual face-to-face monitoring visit should be conducted to determine whether the following conditions are met:

• services are being furnished in accordance with the beneficiary’s Plan of Care;
• services in the Plan of Care are adequate; and
• changes in the needs or status of the beneficiary are reflected in the Plan of Care.

Monitoring and follow-up activities include making necessary adjustments in the Plan of Care and service arrangements with providers.

7.3 ACCESSING SERVICES

Accessing Family Supports Coordination services may occur a number of ways. If the beneficiary is an MHP member, the MHP may initiate the initial contact with the beneficiary and identify those beneficiaries that may benefit from Family Supports Coordination services. Fee-for-Service (FFS) and MHP beneficiaries may also access Family Supports Coordination services either through a referral from their PCP or through a self-referral.

7.4 COVERED SUPPORTS AND SERVICES

A maximum of six (6) face-to-face visits per year will be reimbursed for each eligible beneficiary as follows:

• one (1) visit for the initial/annual comprehensive assessment.
• a maximum of five (5) visits for monitoring and follow-up.
For additional visits, MDHHS requires the provider to obtain prior authorization before the service is rendered. (Refer to the Directory Appendix for contact information regarding prior authorizations.)

Reimbursement for assessment and monitoring visits is inclusive of all related care coordination and monitoring activities. MDHHS does not reimburse for missed appointments/visits. A beneficiary may not be billed for a missed appointment/visit.

Medicaid reimbursement for Family Supports Coordination services may not duplicate payments made to public agencies or private entities under other program authorities for the same purpose.

Supports coordination includes contacts with non-eligible beneficiaries when the contact is:

- directly related to identifying the eligible beneficiary's needs and care for the purpose of assisting the beneficiary in accessing services;
- identifying needs and supports to assist the beneficiary in obtaining services;
- providing supports coordinators with useful feedback; and
- alerting supports coordinators to changes in the beneficiary's needs.

Family supports coordination does not include activities that constitute the direct delivery of underlying medical, educational, social, and/or other services to which an eligible beneficiary has been referred, including foster care programs and services such as, but not limited to, the following:

- research gathering and completion of documentation required by the foster care program;
- assessing adoption placements;
- recruiting or interviewing potential foster care parents;
- serving legal papers;
- home investigations;
- providing transportation;
- administering foster care subsidies; and
- making placement arrangements.

### 7.5 Transfer of Care/Records

During the course of care, the beneficiary may require services from a different supports coordinator due to relocation of the beneficiary's primary residence or due to a request of the beneficiary to change supports coordinators. When there is a planned change of the supports coordinator, information about the new supports coordinator (e.g., contact information) should be provided to the beneficiary. The referring supports coordinator must consult with the new supports coordinator about the case and transfer all applicable information and records, including all completed assessment visits and the updated Plan of Care, to the new supports coordinator in compliance with the privacy and security requirements of federal and state laws and regulations including, but not limited to, the HIPAA and the Michigan Mental Health Code.
7.6 FAMILY SUPPORTS COORDINATION CLOSURE

Family Supports Coordination services are available to all eligible beneficiaries up to age 21, or for pregnant women up to and through 60 days post-delivery. Family Supports Coordination services will be discontinued:

- if the beneficiary is no longer eligible;
- when the beneficiary parent(s) or guardian(s) refuses the service; or
- if CMS does not extend the Flint, Michigan Section 1115 Demonstration Waiver.

When services are refused, Family Supports Coordination services may be resumed at any point during the defined period of eligibility. A discharge summary, including the services provided, outcomes, current status, and ongoing needs of the beneficiary, must be completed and provided to the PCP when the Family Supports Coordination case is closed.

7.7 PROVIDER QUALIFICATIONS

Genesee Health System, the local community mental health (CMH) serving Genesee County, serves as the Designated Provider Organization (DPO) for Family Supports Coordination services. The DPO:

- has a sufficient number of qualified staff to meet the service needs of the target population and has the administrative capacity to ensure the provision of quality services in accordance with state and federal requirements;
- has experience in the coordination and linkage of community services;
- has the willingness and capabilities to coordinate with the beneficiary’s PCP and MHP as applicable; and
- must seek approval by MDHHS of all subcontractors for the provision of Family Supports Coordination services.

The DPO will provide Family Supports Coordination services primarily through the use of a supports coordinator. The supports coordinator must meet one of the following professional qualifications:

- licensure as a registered nurse by the Michigan Department of Licensing and Regulatory Affairs (LARA), and at least one year of experience providing community health, pediatric or maternal infant health nursing services; or
- licensure as a social worker by LARA, and at least one year of experience providing social work services to families.

7.8 CLAIMS SUBMISSION AND PAYMENT

All claims submitted and accepted are processed through CHAMPS. Claims must be submitted on the ASC X12N 837 5010 professional format when submitting electronic claims or on the CMS 1500 claim form for paper claims. (Refer to the Billing & Reimbursement for Professionals Chapter for additional billing information.)
7.8.A. INITIAL/ANNUAL ASSESSMENTS

Face-to-face assessment visits are to be billed using HCPCS code T2024 for an individual or family. This includes reimbursement for the development of a Plan of Care for one individual. HCPCS code T2024 with modifier TT (additional patient) should be billed for each additional individual Plan of Care that is developed from the assessment visit. For informational/reporting purposes, use modifier UN (two patients served), UP (three patients served), UQ (four patients served), UR (five patients served), or US (six or more patients served).

Assessment visits must be in the home or “home-like” environment. One face-to-face initial/annual assessment visit per year per family/household is allowed. Additional assessment visits beyond one per year per family/household require prior authorization.

7.8.B. FOLLOW-UP/MONITORING

Face-to-face follow-up/monitoring visits are to be billed using HCPCS code T1017 for an individual or family. For informational/reporting purposes, use modifier UN (two patients served), UP (three patients served), UQ (four patients served), UR (five patients served), or US (six or more patients served), and enter the Medicaid beneficiary ID numbers of the family members served during the follow-up visit in the claim notes.

Follow-up visits must last at least 30 minutes and ideally take place in the home or “home-like” environment but may be performed in the office. A maximum of five face-to-face follow-up/monitoring visits per year per family/household is allowed. Additional follow-up visits beyond five per year per beneficiary require prior authorization.

</table>
SECTION 1 - GENERAL INFORMATION

Under the Indian Self-Determination and Education Assistance Act (Public Law 93-638), tribal facilities, including Tribal Health Centers (THCs), are those owned and operated by American Indian/Alaska Native tribes and tribal organizations under contract or compact with the Indian Health Service (IHS).

The Michigan Department of Health and Human Services (MDHHS), which administers the State Medicaid Agency (SMA), has the authority to enter into reimbursement agreements with THCs to establish a payment mechanism for Medicaid beneficiaries receiving outpatient services through a THC.

Under the Michigan Medicaid State Plan, THCs have the option of choosing from one of three reimbursement mechanisms. The THC may elect to be reimbursed under only one of the options listed below, and the selected option applies to all beneficiaries receiving services at the THC. The options are:

- A THC may choose to be certified as an IHS facility and receive the IHS outpatient all-inclusive rate (AIR) for eligible encounters. The AIR applies to encounters for both native and non-native Medicaid beneficiaries. THCs are reimbursed at the AIR unless the THC chooses a different payment option and informs MDHHS of this choice in writing.
- If a THC chooses to be reimbursed as a FQHC, the entity would be required to adhere to the same requirements specified in the Federally Qualified Health Centers Chapter.
- A THC may be reimbursed as a fee-for-service provider. THCs choosing this option receive payment for covered services. No additional reimbursement or settlement is made.

Upon federal approval by the Health Resources and Services Administration, THCs may be reimbursed as a Federally Qualified Health Center (FQHC) by signing the FQHC Memorandum of Understanding (MOU). THCs choosing this option will receive the FQHC encounter rate set by the State in accordance with the Michigan Medicaid State Plan and federal regulations. The FQHC encounter rate applies to encounters for both native and non-native Medicaid beneficiaries. A THC electing to be reimbursed as an FQHC is not required to have a contract with the managed care entity.
SECTION 2 – MEDICAID ENROLLMENT

2.1 PROVIDER ENROLLMENT

MDHHS requires all THCs to have a Group (Type 2 - Organization) National Provider Identification (NPI) number in order to receive the enhanced THC reimbursement. For THCs with multiple locations and multiple rates, an NPI number for each location may be necessary so that the proper reimbursement rate of all encounters can be determined. If the THC fails to obtain and/or use the correct NPI number, the THC reimbursement will be determined under fee for service rules. The NPI number must be reported to MDHHS before billing Medicaid services.

Individual providers (doctors, dentists, optometrists, etc.) are required to obtain a Provider (Type 1 - Individual) NPI number and report the number to MDHHS.

2.1.A. NON-PHYSICIAN BEHAVIORAL HEALTH SERVICES

Licensed psychologists (Master’s Limited or Doctoral level), social workers (Master’s level), professional counselors (Master’s or Doctoral level), and marriage and family therapists who serve Medicaid beneficiaries are required to enroll as Medicaid providers. Services must be billed using the appropriate evaluation and management (E/M) codes listed in the American Medical Association’s Current Procedural Terminology (CPT) Book or Healthcare Common Procedure Coding System (HCPCS) codes. Providers should refer to the Non-Physician Behavioral Health provider database on the MDHHS website for the current list of covered procedure codes. The list of allowable services is reviewed annually and updated as applicable. Refer to the Additional Code/Coverage Resource Materials Section of the General Information for Providers Chapter for additional information regarding coverage parameters.

2.2 NONENROLLED PROVIDERS

Professional services performed by limited licensed psychologists (except as noted in Section 333.18223 of the Public Health Code), social workers, professional counselors, marriage and family therapists or student interns must be performed under the supervision of an enrolled, fully-licensed provider of the same profession. Since MDHHS does not directly enroll these providers, claims for their services must be billed using the NPI of the supervising provider responsible for ensuring the medical necessity and appropriateness of the services. Claims submitted with the non-enrolled provider’s NPI in the rendering provider field will reject.
SECTION 3 – BENEFITS

3.1 COVERED SERVICES

THC services are reimbursed at the current Medicaid fee screens and reconciled annually, if applicable, for services provided to Medicaid fee-for-service (FFS) or managed care beneficiaries. THC Medicaid services include:

- Physician (MD, DO) services
- Podiatrist (DPM) services
- Chiropractor (DC) services
- Optometrist (OD) services
- Dental (DDS) services
- Certified nurse practitioner (CNP) services
- Certified nurse midwife (CNM) services
- Physician assistant (PA) services
- Services and supplies incident to the services rendered by the provider:
  - Pharmacy services administered by the provider and billed under the provider’s NPI number
  - Laboratory services billed under the provider’s NPI number
  - Diagnostic services billed under the provider’s NPI number
- Therapies (i.e., Occupational, Physical, and Speech, Hearing, and Language Evaluation and Therapy) rendered under the physician’s NPI number

The services listed may be modified in accordance with benefits covered under the Medicaid State Plan. MDHHS notifies providers of changes (additions/deletions) in Medicaid covered services through the Medicaid bulletin process. Providers should refer to these documents to verify that benefits are covered prior to rendering services.

For clarification of covered services:

### Maternal Infant Health Program (MIHP)

THCs providing Maternal Infant Health Program (MIHP) services must be certified through MDHHS. Information specific to the coverages and limitations for MIHP services are detailed in the Maternal Infant Health Program Chapter of this manual. MIHP related services rendered to fee-for-service beneficiaries must be billed on the ASC X12N 837 5010 professional format. Refer to the Billing & Reimbursement for Professionals Chapter of this manual for specific billing guidelines.

If the THC subcontracts any MIHP services, no duplicate billing is permitted.

### Physician's Assistant

Physician's assistant services must comply with coverages and limitations published in the Practitioner Chapter of this manual and in MDHHS Bulletins.

### Pharmacy Services

Pharmacy services billed under the practitioner NPI number are included in the encounter rate but do not constitute a separate encounter as they are considered part of the office visit.

Practitioner pharmacy services do not include drugs provided by a pharmacy. THCs with enrolled pharmacy providers may continue to bill prescription claims to the MDHHS Pharmacy Benefits Manager (PBM).

Medication Therapy Management (MTM) services are face-to-face consultations provided by pharmacists to optimize drug therapy and improve therapeutic outcomes for beneficiaries. MTM services provided according to Medicaid policy may be eligible to receive the encounter rate. (Refer to the Pharmacy Chapter of this manual for additional information.)

MDHHS contracts with a PBM for processing of all fee-for-service (FFS) pharmacy claims for Medicaid. (Refer to the Pharmacy Chapter of this manual for an explanation of coverages and limitations.)

### Laboratory Services

The Practitioner Chapter of this manual explains the coverages and limitations of the Medicaid laboratory benefit. Laboratory services billed under the practitioner's NPI number are included in the THC encounter rate but do not constitute a separate encounter for reimbursement purposes as they are considered part of the office visit.

THCs cannot bill for any services rendered by an outside laboratory provider or for an outside laboratory's employees performing tests.

### Diagnostic Services

Diagnostic testing performed as part of an office visit must be directly related to the presenting condition and substantiated in the medical records. (Refer to the Billing & Reimbursement for Professionals Chapter of this manual for billing information.)

Diagnostic testing services do not constitute a separate encounter. These services are regarded as part of the office visit and are included in the encounter reimbursement. Examples of diagnostic tests are allergy testing, audiologic function tests, x-rays, and EKGs.

### Telemedicine

A THC can be either an originating or distant site for telemedicine services. Refer to the Billing & Reimbursement for Institutional Providers Chapter for specific billing instructions. Refer to the Telemedicine Section of the Practitioner Chapter for additional information regarding telemedicine services.

Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.
Therapies

Physical therapy, speech therapy, and occupational therapy are covered when performed at the THCs. Refer to the appropriate chapter of this manual and MDHHS Bulletins for an explanation of current coverages and limitations. The Billing & Reimbursement for Professionals Chapter of this manual describes the billing requirements for services provided. Therapies provided on the same date of service as a physician visit are included in the encounter reimbursement.

3.2 DENTAL COVERAGES AND LIMITATIONS

THC dental services are covered if provided in the THC and must comply with coverages and limitations for dental services as specified in the Dental Chapter of this manual. Dental benefits covered for beneficiaries under the age of 21 differ from those covered for beneficiaries age 21 and over.

Information for billing dental services is published in the Billing & Reimbursement for Dental Providers Chapter of this manual.

The Healthy Kids Dental Program is administered by a contractor in selected Michigan counties. (Refer to the Directory Appendix for contact information.) Claims for services provided to beneficiaries enrolled in the Healthy Kids Dental Program should be submitted to the contractor. Payment is made based on the contractor's fee schedule. No additional reimbursement is made by MDHHS.

3.3 VISION COVERAGES AND LIMITATIONS

Vision services are covered if provided at the THC. Vision providers are ophthalmologists and optometrists. The vision services provided by an ophthalmologist or optometrist must comply with coverages and limitations published in the Vision Chapter of this manual.

MDHHS contracts for the volume purchase of frames and lenses from an optical house. Frames and lenses covered by the program must be ordered through the contractor and are listed in the Vision Chapter of this manual.

Some vision services require prior authorization (PA) before they can be rendered. The Vision Services Approval/Order Form (DCH-0893) is used to obtain PA. (Refer to the Vision Chapter for information on services that require PA and to the Forms Appendix for a copy of the form.)

3.4 SERVICES PROVIDED TO MEDICAID HEALTH PLAN ENROLLEES

For Medicaid-covered services provided to Medicaid beneficiaries enrolled in a Medicaid Health Plan (MHP), THCs receive payment from the MHP based on an agreement or contract with the MHP. In the absence of an agreement or contract, payment is based on the Medicaid fee-for-service (FFS) rates in effect on the date of service (DOS). Approved services provided to MHP enrollees are then recognized as encounters.

3.5 MEDICARE AND MEDICAID BENEFICIARIES

For dually eligible Medicare and Medicaid beneficiaries, Medicaid reimburses coinsurance and deductible amounts on Medicare-approved claims up to Medicare's IHS encounter rate.
SECTION 4 – SUBSTANCE ABUSE

Outpatient substance abuse services provided by physicians, clinical social workers, clinical psychologists, and substance abuse treatment specialists are reimbursed. These services may include:

- Initial complete physical
- Medical history
- Social history
- Psychiatric history
- Individual, family, and group counseling
- Outpatient substance abuse treatment
- Intensive outpatient counseling
- Therapies (i.e., Psychiatric occupational/recreational therapy) in a Tribal-operated substance abuse treatment center are covered services provided they are active, restorative, and designed to prevent, correct, or compensate for a specific medical problem.
- Methadone

4.1 REQUIREMENTS FOR PARTICIPATION

All programs must meet the following criteria to bill Medicaid for services:

- Licensed by the state licensing agency to provide each type of substance abuse service; and
- Accredited as an alcohol and/or drug abuse program by one of the five national accreditation bodies:
  - The Joint Commission
  - Commission on Accreditation of Rehabilitation Facilities (CARF)
  - American Osteopathic Association (AOA)
  - Council on Accreditation of Services for Families and Children (CASFC)
  - National Committee on Quality Assurance (NCQA)

4.2 AUTHORIZATION

Services provided at the THC to American Indian and Alaska Native beneficiaries do not require the authorization of the regional Prepaid Inpatient Health Plan (PIHP).

4.3 AMERICAN INDIAN AND ALASKA NATIVE SERVICES

American Indians and Alaska Natives who are Medicaid beneficiaries can obtain substance abuse services directly from the THC. These services are not included in the MDHHS §1915(b) Managed Specialty Services and Supports Waiver for PIHPs and substance use disorder services. THCs should contact their regional PIHP to determine the appropriate process for accessing other funding sources or other service providers for those individuals requiring substance abuse services not covered by the THC.
4.4 Services Provided to Non-American Indians and Alaska Natives

The MDHHS Prepaid Inpatient Health Plan (PIHP) for Specialty Developmental Disabilities, Mental Health and Substance Abuse services assumes responsibility for certifying admission/continuing stays and reimbursing claims for the specialized substance abuse services of non-American Indians and Alaska Natives. Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter of this manual for further information on PIHPs, Mental Health and Substance Abuse Services. Substance abuse services for non-American Indians and Alaska Natives must not be billed under CPT and HCPCS codes.

4.5 Service Limits

THCs may exceed the substance abuse treatment limits for American Indian and Alaska Native beneficiaries as long as the medical record and plan of care documents the medical necessity.

4.6 Noncovered Services

The following substance abuse services are not covered when provided through THCs:

- Emergency and non-emergency transportation
- Initial emergency screening and medical stabilization
- Acute medical detoxification services
- Medications prescribed in the management or treatment of methadone
- Room and Board
SECTION 5 – MENTAL HEALTH

Outpatient mental health services provided by physicians, clinical social workers, and clinical psychologists are covered. These services may include:

- Health assessment
- Psychiatric evaluation
- Psychological testing
- All other assessments and testing
- Case management
- Child therapy
- Crisis interventions
- Crisis residential services
- Intensive crisis stabilization services
- Individual psychotherapy
- Family psychotherapy
- Group psychotherapy
- Interpretation or explanation of data to family
- Medication administration
- Medication review
- Therapies (i.e., psychiatric occupational/recreational therapy) in a mental health treatment center are a covered service provided they are active, restorative, and designed to prevent, correct, or compensate for a specific medical problem.

5.1 NONENROLLED PROVIDERS

Professional services provided by limited licensed psychologists (except as noted in Section 333.18223 of the Public Health Code), social workers, professional counselors, marriage and family therapists or student interns are covered but must be performed under the supervision of an enrolled, fully-licensed provider of the same profession. Individuals who meet Michigan licensure/certification requirements for social workers and psychologists may provide services.

5.2 AUTHORIZATION

Mental health services provided at the THC to American Indian and Alaska Native beneficiaries do not require the authorization of PIHPs/CMHSPs.
5.3 AMERICAN INDIAN AND ALASKA NATIVE SERVICES

American Indians and Alaska Natives who are Medicaid beneficiaries can obtain mental health services directly from the THC. THC services are not included in the MDHHS §1915(b) Managed Specialty Services and Supports Waiver for PIHPs and substance use disorder services. THCs may refer tribal members to the PIHP/CMHSP for mental health services not provided at the THC.

5.4 NON-AMERICAN INDIAN SERVICES

PIHPs/CMHSPs assume responsibility for community-based mental health and developmental disability services covered through Medicaid for non-American Indians. Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter of this manual for policies and procedures. Non-American Indian mental health services must not be billed under CPT or HCPCS codes.

5.5 NONCOVERED SERVICES

Mental Health services that are not the responsibility of the THC are as follows:

- Home-based mental health services
- Nursing facility (NF) mental health monitoring
- Emergency and non-emergency transportation
SECTION 6 – ENCOUNTERS

THCs are eligible to receive an encounter (per visit) rate as reimbursement for Medicaid covered services provided at the THC for native and non-native Medicaid beneficiaries.

The IHS outpatient all-inclusive rate (AIR) is determined by the Centers for Medicare & Medicaid Services (CMS) and is published in the Federal Register. The FQHC encounter rate under the FQHC MOU is an alternative methodology that was based on the prospective payment system (PPS) outlined in section 1902(bb) of the Social Security Act.

6.1 DEFINITION

An encounter is a face-to-face visit between a Medicaid beneficiary and the THC provider of health care services who exercises independent judgment in the provision of Medicaid-covered services. The THC provider may be credited with no more than one face-to-face encounter with a given beneficiary per day, except when the beneficiary, after the first encounter, suffers a separate or different illness or injury requiring additional diagnosis or treatment.

For a service to be defined as an encounter, the Medicaid-covered service must be recorded in the patient’s record.

6.2 SERVICES BUNDLED IN THE ENCOUNTER

Ancillary Medicaid services (e.g., labs, x-rays, injections, etc.) are included in the per visit encounter. These ancillary services are described as being provided incident to the office visit. For example, lab services billed under the physician’s NPI number would not be considered a separate encounter.

Ancillary services provided at another facility are not bundled under the office visit encounter. For example, services provided by the local hospital are not included in the encounter.
SECTION 7 – BILLING [CHANGE MADE 7/1/18]

The Group (Type 2 - Organization) NPI number must be used as the billing provider on all electronic and paper claims submitted to Medicaid. Do not use Provider (Type 1 - Individual) as the billing provider. The billing provider loop or field is mandatory to complete.

The NPI (Type 1 – Individual) number is the individual who has overall responsibility for the patient’s medical care and treatment reported in the claim or encounter. (revised 7/1/18) The attending provider field is mandatory to complete. Additionally, the NPI (Type 1 – Individual) number of the practitioner who performed the service should be entered as the rendering provider. Do not enter a Group (Type 2) NPI number as the attending or rendering provider.

MDHHS will use the billing provider NPI field (Type 2 - Organization) to determine the number of encounters and calculate the settlement for the year-end reconciliation.

7.1 OTHER INSURANCE

Billing instructions related to coordination of benefits are published in the Coordination of Benefits Chapter of this manual. Other insurance and all other payments received for services rendered to a Medicaid beneficiary must be reported. If payment received from other insurance exceeds the amount Medicaid would have paid, the THC must still submit a claim to Medicaid with the appropriate procedure code in order for the visit to be counted as an encounter.

7.2 MEDICARE AND MEDICAID CLAIMS

Refer to the Billing & Reimbursement Chapters of this manual for specific instructions regarding Medicare and Medicaid claims. If the Medicare payment exceeds the Medicaid fee screen, the appropriate procedure code should still be billed to Medicaid for encounter and reconciliation purposes.

7.3 PAYER OF LAST RESORT

The IHS is the payer of last resort for persons defined as eligible for contract health services under the regulations in 42 CFR, Part 36a, Subpart G, Section 36.61, notwithstanding any State or local law or regulation to the contrary.

7.4 COPAYMENTS

Medicaid copayments for chiropractic, dental, physician, podiatry and vision services are waived under the THC benefit as part of the reconciliation. (Refer to the General Information for Providers chapter for a list of services requiring copayments.)

Refer to the Billing Beneficiaries Section of the General Information for Providers Chapter of this manual for additional information regarding copayment requirements. Beneficiaries may not be denied care or services based on inability to pay a copayment, except as outlined in that section.
7.5 TIMELY FILING BILLING LIMITATION

The same timely filing billing limitations explained in the General Information for Providers Chapter of this manual pertain to encounters as well as claim submission.

7.6 PLACE OF SERVICE

Place of service codes are not applicable to institutional billing. However, if the THC performs a service that must be billed on the professional claim form within the clinic, THCs must use place of service (POS) code 07. For services provided outside the THC, bill with the appropriate POS code noted in the Billing & Reimbursement for Professionals Chapter of this manual.

THC services provided to beneficiaries at the THC are reconciled annually, if applicable.

The THC may bill for covered services that are not provided at the THC. These services must be billed with the appropriate Place of Service (POS) code in compliance with the coverages and limitations specified in the Practitioner Chapter of this manual. A complete list of POS codes can be found in the Billing & Reimbursement for Professionals Chapter of this manual.

Services billed to Medicaid are subject to audit and verifications.
SECTION 8 – MEDICAID PAYMENTS, ANNUAL RECONCILIATION AND APPEALS

8.1 QUARTERLY PAYMENTS

Quarterly payments are made to the THC at the beginning of each quarter. The payment is based on an estimate of the difference between the amount the THC receives for Medicaid services from FFS claims, managed care encounters, and other third party payments (including Medicare) during the year and the amount due the center based on the THC encounter rate.

8.2 INITIAL RECONCILIATION AND SETTLEMENT

An annual reconciliation, if applicable, ensures that reimbursement is made according to the payment option selected by the THC. The initial reconciliation and settlement is calculated approximately six months after the THC’s fiscal year end. The number of encounters is determined from Medicaid fee-for-service (FFS) and managed care approved claims. Any difference between the THC rate and the amount paid to the THC from FFS and managed care payments, other insurance and quarterly payments is paid to or recovered from the THC. Future quarterly payments are adjusted based on the information in the initial reconciliation.

8.3 FINAL RECONCILIATION AND SETTLEMENT

A final reconciliation and settlement is calculated approximately one year after the THC’s fiscal year end. This will allow time for all claims to clear the payment system.

8.4 APPEALS

A Medicaid provider has the right to appeal any adverse action taken by MDHHS unless that adverse action resulted from an action over which MDHHS had no control (e.g., Medicare termination, license revocation). The appeals process is outlined in MDHHS Medicaid Provider Reviews and Hearings rules, Michigan Administrative Code R400.3402 through R400.3425, amended, and filed with the Secretary of State on May 19, 2016. Any questions regarding this appeal process should be directed to the Michigan Administrative Hearing System (MAHS). (Refer to the Directory Appendix for contact information.)

**SECTION 1 – GENERAL INFORMATION**

An Urgent Care Center (UCC) is a medical clinic or office, not located in a hospital emergency department, whose purpose is to provide unscheduled diagnosis and treatment of illnesses for ambulatory beneficiaries requiring immediate medical attention for non-life-threatening conditions. It is expected that UCCs will provide access to a place of service (POS) more appropriate than a hospital emergency department for addressing non-emergency medical needs when a beneficiary's primary care provider (PCP) is not available.

1.1 Staff Credentials

The UCC medical director must be a Michigan-licensed physician. The UCC medical director is responsible for the medical management of the UCC. All Medicaid-covered physician services must be performed by the physician, the physician's employee, or an employee of the same legal entity that employs the physician under the physician's delegation and supervision. Only persons currently licensed/certified in an appropriate health occupation/profession (e.g., physician assistant, nurse practitioner), as authorized by Public Act 368 of 1978 as amended, may provide direct patient care under the delegation and supervision of a physician when the physician is not physically present on the premises.

1.2 Hours of Operation

UCCs must be open seven days a week, and include evening hours, weekends and holidays. Hours of operation must be posted in the facility. UCCs must accept walk-in patients of all ages during all hours the facility is open to see patients.
 SECTION 2 - COVERED SERVICES

Unscheduled, non-emergency, medically necessary services that are a non-life threatening condition or injury or illness that can be treated appropriately in a UCC are Medicaid covered services.

Michigan Department of Health and Human Services (MDHHS) covered services are based on the level of care that can be appropriately rendered in an urgent care place of service.

MDHHS will not cover separate facility charges.

Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.

All facilities must provide clinical documentation for services rendered and complete a discharge summary which must be sent to the appropriate PCP. If a beneficiary does not have a PCP, the facility must document assistance with arranging a medical home for follow-up care.
SECTION 3 – PROVIDER ENROLLMENT

Providers must be enrolled with Medicaid and have a valid Type 2 (Group) National Provider Identifier (NPI) for MDHHS claim adjudication.

Claims must also include the appropriate Type 1 (Individual) NPI of the specific provider performing the service(s) as the rendering provider. A valid MDHHS-enrolled rendering provider number is required for claim adjudication. Providers must not enter a Type 2 (Group) NPI as the rendering provider. The Group NPI must be reported as the billing provider.

3.1 NPI Edits

MDHHS NPI claim editing will be applied to attending, billing, referring, rendering and supervising providers, as applicable. A claim cannot be paid if the NPI is missing or the reported NPI is invalid as it does not check digit and/or correctly crosswalk to the Provider Enrollment files for these provider loops or fields.
SECTION 4 – BILLING & REIMBURSEMENT

UCC providers must follow uniform billing guidelines using the professional CMS-1500 claim format or electronic Health Care Claim Professional (837) ASC X12N Version 5010 information. All providers are encouraged to bill electronically. Refer to the Billing & Reimbursement for Professionals chapter for additional CMS-1500 or 837P Professional claims submission and billing information.

If ancillary services are provided by UCC staff using hospital-owned equipment (i.e., done in the same building where urgent care is located), the hospital may bill that service on the institutional claim format for the technical service.

Reimbursement is based on the practitioner fee schedule. Services performed in a UCC are reimbursed at the non-facility rate based on the non-facility relative value unit (RVU). MDHHS utilizes the Medicaid National Correct Coding Initiative (NCCI) coding policies and edits as developed by the Centers for Medicare & Medicaid Services (CMS) to promote national correct coding methodologies. To avoid duplicate payments, UCC providers must submit only one non-facility service claim per beneficiary per DOS. Separate physician service claims should not be submitted.

4.1 Copay Requirements

A copayment may be required for office evaluation and management (E&M) visits for beneficiaries age 21 years and older.

Refer to the General Information for Providers Chapter for information about copayments. Current copayment amounts are listed on the MDHHS website. (Refer to the Directory Appendix for website information.)

SECTION 1 - GENERAL GUIDELINES AND REQUIREMENTS

The Michigan Department of Health and Human Services (MDHHS) contracts for the volume purchase of frames and lenses from an optical laboratory, referred to in this chapter as the contractor.

Vision providers (e.g., opticians, dispensing ophthalmologists, optometrists) must order frames and lenses from the contractor. A list of lenses is available in the MDHHS Vision Services Fee Schedule located on the MDHHS website. A list of available frames is available from the contractor, currently Classic Optical Laboratories. (Refer to the Directory Appendix for contact information.)

Orders placed with the contractor must be postmarked no later than 30 days after the date of order. If orders are placed beyond the 30 days, the contractor returns the order to the provider, who must explain to Medicaid why submission was delayed and request an exception from the time limit.

Procurement of contact lenses, low vision aids, and prosthetic eyes must be obtained from the vision provider’s own source and are subject to prior authorization (PA) requirements as described in this chapter.

1.1 BENEFICIARY ELIGIBILITY AND COPAYMENTS

Providers must verify beneficiary eligibility prior to rendering services or ordering materials. If a beneficiary’s eligibility expires prior to the date the material is delivered, reimbursement is made only if the beneficiary was eligible on the date the material was ordered by the vision provider and the date of order is used when billing. (Refer to the Beneficiary Eligibility Chapter of this manual for additional information.)

A copayment may be required for Medicaid beneficiaries age 21 and older for each separately reimbursable:

- Ophthalmological service performed by an optometrist or ophthalmologist; and
- Dispensing service for glasses or contact lenses billed by dispensing ophthalmologists or optometrists.

Refer to the General Information for Providers Chapter for information about copayments. Current copayment amounts are listed on the MDHHS website. (Refer to the Directory Appendix for website information.)

1.2 PRIOR AUTHORIZATION

Some vision services and materials require PA before they can be rendered. Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.

The Vision Services Approval/Order Form (DCH-0893) is used to obtain PA. A copy of the DCH-0893 and completion instructions can be found in the Forms Appendix of this manual. Complete and mail or fax the DCH-0893 to the MDHHS Program Review Division. (Refer to the Directory Appendix for contact information.) PA requests must be postmarked no later than 30 calendar days after the date of order. If
beyond the 30 days, the provider must include a detailed explanation of why the submission was
delayed.

When requesting prior approval, providers should make a photocopy of the completed form for the
beneficiary file. Upon completion of the PA process, MDHHS returns one copy of the DCH-0893 to the
provider.

An electronic copy of the DCH-0893 is available on the MDHHS website. (Refer to the Directory Appendix
for website information.)

1.3 CODING OF SERVICES

The American Medical Association’s (AMA) Current Procedural Terminology (CPT) is the national coding
standard for health care professional services. Vision providers must use CPT codes in effect on the date
of service to describe and identify the services and procedures performed. Optometrists must be
Therapeutic Pharmaceutical Agent certified in order to use many of these codes. All prescriptions or
prescription orders must comply with state and federal laws. (Refer to the Pharmacy Chapter of this
manual for additional information.)

Providers must use the International Classification of Diseases (ICD) for diagnostic coding of diseases,
injuries, and conditions. Codes must be used at the highest level of specificity.

Healthcare Common Procedure Coding System (HCPCS) is a system developed by the Centers for
Medicare & Medicaid Services (CMS) to report materials, supplies, and certain services not covered by the
CPT codes. HCPCS codes are to be used when applicable.

1.4 MEDICARE

All vision services are subject to editing for Medicare coverage. MDHHS reimburses vision providers for
coinsurance and deductible amounts on Medicare-approved claims up to Medicaid’s reimbursement limit.

If a service requires PA by Medicaid and is covered by Medicare, vision providers do not have to obtain
PA, nor does the vision provider have to obtain lenses or frames through the volume purchase program.

(Refer to the Billing & Reimbursement for Professionals Chapter of this manual for additional
information.)

1.5 CONTRACTOR GUARANTEE

Frames and lenses furnished by the contractor are guaranteed for 90 days. If any material is found to be
unsatisfactory due to contractor error or defective workmanship or materials, the materials and work
order form should be returned to the contractor. The contractor is required to correct, adjust, or replace
the materials.

If the vision provider supplies the contractor with incorrect specifications that results in eyeglasses being
fabricated which the beneficiary cannot use, the vision provider is responsible for payment to the
contractor for the remake. The contractor may not charge the vision provider more than what they
would charge MDHHS for the remake. MDHHS does not pay for the remake (e.g., eyeglasses, lenses, or
frames) due to vision provider error.
1.6 COMPLAINT PROCESS

To resolve problems (such as an overdue shipment, error in an order, or defective workmanship), vision providers should first contact the contractor.

If the lenses and/or frames are not received from the contractor within 21 days from the date they were ordered, vision providers are responsible for contacting the contractor to determine the cause of the delay.

If difficulties are encountered with the contractor in resolving a problem, vision providers should call the Vision Contract Manager. (Refer to the Directory Appendix for contact information.) Vision providers must be prepared to report the beneficiary's name and Medicaid ID number, and a detailed explanation of the problem(s) they have experienced.

MDHHS reviews the complaint, takes necessary action to correct the problem, and notifies the vision provider of the resolution.
SECTION 2 – DIOPTER CRITERIA

2.1 INITIAL LENSES

Initial lenses are considered to be the first prescription lenses ever worn by a person regardless of how they were obtained (e.g., through Medicaid, other insurance, or private pay). Initial lenses are a Medicaid benefit and do not require PA if the following minimum diopter criteria are met:

<table>
<thead>
<tr>
<th>Age Group 42 Years and Younger</th>
<th>Age Group 43 Years and Older</th>
</tr>
</thead>
<tbody>
<tr>
<td>0.50D myopia</td>
<td>0.50D myopia</td>
</tr>
<tr>
<td>0.50D astigmatism</td>
<td>0.50D astigmatism</td>
</tr>
<tr>
<td>0.75D anisometropia</td>
<td>0.75D anisometropia</td>
</tr>
<tr>
<td>0.75D hyperopia</td>
<td>0.75D hyperopia</td>
</tr>
<tr>
<td>0.50D hyperopia</td>
<td>0.50D presbyopia</td>
</tr>
</tbody>
</table>

2.2 SUBSEQUENT LENSES

Regardless of age group, subsequent lenses are medically necessary lenses that are provided after initial lenses. Subsequent lenses are a Medicaid benefit and do not require PA if there is a change in the refractive error of 0.75D or more in the meridian of greatest change, or a change in the cylinder axis of at least 10 degrees for cylinders of 1.00D or more. These lenses must also meet minimum dioptric criteria as specified above. The change need only be present in one eye.

The following example illustrates how this requirement is assessed for a new correction (+2.75-0.75 ax 092) and a previous correction (+2.25-0.25 ax 090). The dioptric power in each meridian can be portrayed in the form of cross diagrams.

New Correction: +2.75 -0.75 +2.00

Previous Correction: +2.25 -0.25 +2.00

This is an example of where the change in diopter power for subsequent lenses has not been met. Note that the resultant powers in the vertical meridians of the "new" and "previous" correction are +2.75 and +2.25 respectively. There is only a 0.50D change in the vertical meridian and no change in the horizontal.

For periods greater than 24 months from the date of the previous prescription, subsequent lenses may be ordered for diopter changes less than those specified above.
**SECTION 3 – SERVICES**

This section provides information on both Medicaid covered and noncovered services.

**3.1 DIAGNOSTIC SERVICES**

In providing services, it is the responsibility of the optometrist or ophthalmologist to determine that the services are medically necessary, appropriate, and within the scope of current medical practice and Medicaid limitations. The prescribing optometrist or ophthalmologist is held responsible if he orders excessive or unnecessary services, regardless of who actually renders the services. The prescribing optometrist or ophthalmologist may be subject to corrective action related to these services, including recovery of funds.

*Documentation Guidelines for Evaluation and Management Services, 1995, 1997, or latest version thereof, developed jointly by CMS and the AMA, must be adhered to when using the CPT/HCPCS procedure codes.*

| Eye Examinations | ▪ A routine eye examination once every two years is a Medicaid benefit and does not require PA. Examinations include, but are not limited to, case history, determination of visual acuity (each eye), ophthalmoscopy, biomicroscopy, ocular motility, tonometry, refraction, diagnosis, treatment program and disposition. (Use appropriate CPT/HCPCS procedure codes for routine eye exam and applicable ICD diagnosis codes.)
|                 | ▪ Nonroutine eye examinations are a Medicaid benefit for the purpose of evaluation and treatment of chronic, acute, or sudden onset of abnormal ocular conditions. (Use appropriate CPT/HCPCS procedure codes.)
| Glaucoma Screenings | Glaucoma screenings are covered without PA on an annual basis for beneficiaries who:
|                   | ▪ Have no ocular complaints or prior history of glaucoma and who have diabetes;
|                   | ▪ Have a family history of glaucoma; or
|                   | ▪ Are African-American, age 50 or older.
|                   | This screening entails a dilated eye examination, tonometry, and direct ophthalmoscopy or slit lamp examination. If this screening is provided as part of another billable service, separate reimbursement for this screening is not allowed. Use the appropriate CPT/HCPCS procedure code for glaucoma screening and the applicable ICD diagnosis code.
|                   | If the beneficiary presents with a visual or ocular complaint, the glaucoma screening code should not be used. The procedure code which best describes the visit should be selected from the CPT Evaluation and Management (E/M) codes or General Ophthalmological procedure codes.
3.2 DISPENSING SERVICES

Dispensing services are a Medicaid benefit and do not require PA. Vision providers may bill a dispensing fee for dispensing prescription lenses, prescription lenses with frames, or replacing a complete frame.

Reimbursement for the dispensing service includes the vision provider’s services in selecting, ordering, verifying, and aligning/fitting of eyeglasses as described above. Routine follow-up and post-prescription visits (e.g., for minor adjustments) are considered part of the dispensing service and are not separately reimbursable.

3.3 NURSING FACILITY BENEFICIARIES

Covered and noncovered vision services, as well as PA requirements, apply to vision services provided to beneficiaries residing in a nursing facility (NF).

Performance of vision services (except replacement of a frame part for eyeglass repair) must be upon the written request of the beneficiary, a member of the beneficiary’s family, or other beneficiary representative and upon the written order of the beneficiary’s attending physician (MD, DO) prior to the date of the vision provider’s visit.

If service is provided in the NF, a copy of the request and written order must be retained by the facility as part of the beneficiary’s record.

Vision services are not considered a part of the facility’s per diem rate. The vision provider or contractor must bill MDHHS for vision services rendered.

No additional payments are made to vision providers for a visit(s) to the NF. Appropriate procedure codes must be utilized.

3.4 OPHTHALMIC FRAMES AND LENSES

A complete pair of eyeglasses is a Medicaid benefit and does not require PA when:

- The eyeglasses being prescribed are the beneficiary’s first pair of eyeglasses ever worn. These eyeglasses are considered to be initial eyeglasses and must meet minimum diopter criteria for initial lenses.
- The beneficiary’s correction meets diopter criteria for subsequent lenses and the frames are unusable.
- A previously used frame requires oversized lenses. (Oversized lenses are not a Medicaid benefit, therefore, a complete pair of eyeglasses must be ordered.)
- Prescription lenses remain usable, but the original frame is broken beyond repair and the original frame is not a Medicaid benefit.
- The beneficiary’s correction meets diopter criteria for subsequent lenses and the frames remain usable, but the vision provider or beneficiary elects not to send the frames to the contractor or the contractor feels that the previously used frames will break or otherwise be damaged during lens insertion.
The beneficiary’s eyeglasses have been lost, stolen, or broken beyond repair and the number of replacements have not exceeded Medicaid limits which are:

- For beneficiaries age 21 and over, one pair of replacement eyeglasses per year.
- For beneficiaries under age 21, two pair of replacement eyeglasses per year.

One year is defined as 365 days from the date the first pair of eyeglasses (initial or subsequent) was ordered.

The DCH-0893 must be used when ordering frames and/or lenses. A copy of the form and instructions for completing the form are available in the Forms Appendix of this manual and on the MDHHS website. (Refer to the Directory Appendix for website information.) These orders must be sent directly to the contractor. Orders may be mailed, faxed, or entered directly online at the contractor’s website. (Refer to the Directory Appendix for contact information. The contractor must be contacted directly to register for on-line access.) The contractor fills the vision provider's order in accordance with the lens and frame specifications indicated on the DCH-0893. The order form is returned to the provider if the eligibility information is not completed.

Procedures identified as requiring PA must first receive approval from the MDHHS Program Review Division. (Refer to the Prior Authorization subsection in this chapter for instructions on obtaining PA.)

The contractor monitors orders to assure that Medicaid replacement limitations, diopter criteria, and PA requirements are being maintained. The contractor returns an order if the order exceeds the replacement limits, does not meet diopter criteria, or requires PA.

The contractor bills MDHHS for the frames and/or lenses ordered by vision providers. Vision providers subsequently bill for a dispensing service for dispensing the frames and/or lenses.

If the beneficiary has other insurance that covers frames and/or lenses, the material may still be obtained through the contractor. (Refer to the Billing & Reimbursement for Professionals and the Coordination of Benefits Chapters of this manual when billing for the dispensing service if other insurance is involved.)

**3.4.A. LENSES**

Lenses must conform to the latest edition of the *American National Standard Recommendations for Prescription Ophthalmic Lenses*.

Plastic and glass lenses are a Medicaid benefit. Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.

- Plastic and glass bifocals are available in Round 22, FT-28, FT-35, and Executive style.
- Plastic and glass trifocals are available in FT-7x28 segments.
Photochromic, Tinted and Dyed Lenses

PA is required for these lens features. Appropriate documentation of medical necessity must be attached to the DCH-0893 when submitted to the MDHHS Program Review Division.

Polycarbonate Lenses

For beneficiaries age 21 and over, polycarbonate lenses are a Medicaid benefit when diopter criteria is met and the lenses are inserted into a safety frame marked "Z 87" or "Z 87-2". For beneficiaries under age 21, polycarbonate lenses may be inserted into any covered Medicaid frame and do not require PA.

Oversized lenses, no-line, progressive style multi-focals, or transitions are not Medicaid benefits.

3.4.B. OPHTHALMIC FRAMES

Ophthalmic frame styles that are a Medicaid benefit are available from the contractor. Vision providers may order sample frames directly from the contractor. The vision provider is charged for sample frames at the same price stated in the current contract. Neither the provider nor the contractor may charge Medicaid for sample frames.

Vision providers must offer a beneficiary the opportunity to select a frame from at least 80 percent of the total authorized frame styles. A vision provider who fails to comply with this requirement is subject to termination of enrollment in Medicaid.

If a frame manufacturer discontinues production of a frame that is listed as a benefit, vision providers may utilize the discontinued frame from their sample kit. If lenses are required, they must be ordered from the contractor. Submit the DCH-0893 to the MDHHS Program Review Division for approval. (Refer to the Directory Appendix for contact information.)

Safety Frames

Safety frames are a Medicaid benefit. A list of authorized safety frame styles is available from the contractor. These frames conform to ANSI Z87.1-2003 standards, and samples can be purchased from the contractor at contract prices. Only polycarbonate lenses of 2 millimeter minimum thickness shall be used in frames marked "Z 87" or "Z 87-2".

Frame Repairs

Frame repairs (e.g., aligning temples, insertion of screws, adjusting frames) are not a separately reimbursable service and cannot be billed.

3.4.C. SUBSEQUENT LENSES PLACED IN PREVIOUSLY USED FRAMES

Subsequent lenses that are to be placed in a beneficiary’s previously used frame are a Medicaid benefit and do not require PA. Previously used frames are defined as ophthalmic frames in which the beneficiary has had previous corrective lenses incorporated and which were previously worn.

All noncontract previously used frames require PA.
To order subsequent lenses for insertion into a previously used frame, vision providers must complete the DCH-0893, indicating all information necessary for proper fabrication. Vision providers have the option of having the contractor insert the lenses, in which case the provider must supply the previously used frame to the contractor, or inserting the newly fabricated lenses into the frames in their office.

If the previously used frames are sent to the contractor for lens insertion, the contractor is required to fabricate the lenses and mail the frames and lenses to the vision provider within nine working days after receiving the frames. If a special prescription requires more than nine working days to complete, the contractor must notify the vision provider. If the provider does not receive the materials within three weeks from the date the order was sent, he should contact the contractor.

If the vision provider or beneficiary elects not to send the previously used frames as might be requested by the contractor, or if the contractor feels that the previously used frames may break or otherwise be damaged during lens insertion, the vision provider is requested to order a complete pair of eyeglasses.

If frames are sent to the contractor, either at the contractor’s request or the vision provider’s preference, the vision provider is responsible for paying the postage necessary to ship the frames. Also, vision providers are responsible for paying for frames lost or damaged in transit.

**If a previously used frame requires lenses that are not a Medicaid benefit (e.g., oversize lenses), a complete pair of eyeglasses that are a benefit must be ordered.**

### 3.4.D. REPLACEMENT OR REPAIR

<table>
<thead>
<tr>
<th>Eyeglasses</th>
</tr>
</thead>
</table>
| Eyeglass repairs are a separately reimbursed service when the repair is considered major (e.g., reinsertion of a lens, repair of a sheared screw, shortening or replacing temples, etc.) and when the glasses are deemed repairable. Minor repairs (e.g., insertion of screw, adjustments of nose pads or temples, etc.) that occur as a result of the beneficiary’s typical wear patterns are not separately reimbursed. The appropriate HCPCS code(s) must be reported for the component part that is being replaced. The reason for the repair must be documented in the beneficiary’s file and made available upon request.

If a provider determines that eyeglasses are repairable, the provider must guarantee the repair for a minimum of 30 days. Subsequent repair for the same issue within 30 days is the responsibility of the provider. If replacement eyeglasses are needed within the 30 day time frame following a repair, the provider must return the reimbursement received for the repair to MDHHS.

Eyeglasses that are broken beyond repair may be eligible for replacement by the contractor. Eyeglass replacement requires prior authorization if replacement limits have been exceeded. |
Lenses Only
Replacement of a corrective lens(es), without frames, for one that is damaged or broken is a benefit if that lens(es) is covered by Medicaid and the replacement limits have not been exceeded. A replacement lens(es) must be an identical copy of the damaged or broken lens. It does not require PA. Vision providers must order the lens(es) directly from the contractor.

For periods greater than 24 months from the date of the previous prescription when ordering subsequent lenses or complete eyeglasses, see Subsequent Lenses subsection above for appropriate diopter criteria.

Frames Only
Replacement of a complete frame (front and temples) is a Medicaid benefit only when the original frame is broken beyond repair, the prescription lenses remain usable, and the replacement limits have not been exceeded. The replacement frame must be an identical replacement. If an identical frame is not listed as a Medicaid benefit, the beneficiary must select a frame that is a covered benefit.

The contractor bills Medicaid for the complete frame. The vision provider inserts the lenses into the frame and bills Medicaid for the dispensing service.

3.4.E. TWO PAIRS OF EYEGLASSES

Two pairs of single vision eyeglasses (one for near visual tasks and the other for distance visual tasks) are a Medicaid benefit in either of the following instances:

- When the beneficiary has clearly demonstrated the inability to adjust to bifocals after a reasonable trial period.
- When the beneficiary’s physical condition does not allow bifocal usage.

PA is required when requesting two pairs of eyeglasses. Appropriate documentation must be attached to the DCH-0893 and submitted to the MDHHS Program Review Division.

Providing both multi-focal and single vision eyeglasses for interchangeable usage is not a Medicaid benefit.

3.4.F. NONDELIVERABLE EYEGLASSES

If a beneficiary fails to return to the vision provider for dispensing of eyeglasses, the vision provider should make every effort to locate the beneficiary, including contacting the local MDHHS office in the beneficiary’s area.

If the beneficiary still cannot be located, the eyeglasses should be sent to the local MDHHS office (or local nonprofit agency if the MDHHS office refuses to accept them) in the beneficiary’s area within 90 days of placing the order with the contractor. Do not send the nondelivered lenses and/or frames to MDHHS unless requested to do so by MDHHS.

To bill for dispensing, the provider must use the date of order for the lenses and/or frames.

Medicaid does not reimburse vision providers for postage and handling.
3.4.G. EYEGlass CASE

One eyeglass case for every complete pair of eyeglasses ordered is a Medicaid benefit and must be provided by the contractor. Vision providers cannot bill for eyeglass cases.

3.5 LOW VISION SERVICES

| Evaluation                                                                 | A low vision evaluation is a benefit when the beneficiary presents with moderate visual impairment, severe visual impairment, or profound visual impairment. Under these conditions, a low vision evaluation does not require PA.
|                                                                           | This evaluation includes, but is not limited to, a detailed case history, effectiveness of any low vision aids in use, visual acuity in each eye with best spectacle correction, steadiness of fixation, assessment of aids required for distance vision and near vision, evaluation of any supplemental aids, evaluation of therapeutic filters, development of treatment, counseling of beneficiary, and advice to family (if appropriate).
|                                                                           | The CPT E/M or General Ophthalmological procedure code which best describes this service should be utilized.
| Aids                                                                      | High add bifocals do not require PA. For high add bifocals, complete the DCH-0893 and submit to the contractor.
|                                                                           | The prescription and fitting of low vision optical aids (such as telescopes, microscopes, and certain other low vision aids) require PA. Only basic and essential low vision aids are a Medicaid benefit.
|                                                                           | The Provision of Low Vision Services and Aids Support Documentation (MSA-0891) form outlines the information required when requesting PA for low vision services and aids. A sample of this form is provided in the Forms Appendix. It can also be obtained through the MDHHS website. (Refer to the Directory Appendix for website information.)
|                                                                           | This form must be attached to DCH-0893 and submitted as part of the PA process. (Refer to the Prior Authorization subsection above.)
|                                                                           | Reimbursement for a low vision aid is based on the manufacturer's charge for the aid plus a professional fee. Procurement of the low vision aid is done through the vision provider's own source. The professional fee includes procurement, verification, and fitting of the aid.
|                                                                           | Only an enrolled optometrist or a dispensing ophthalmologist can bill for a low vision aid.
| Rehabilitative Services                                                  | Low vision rehabilitative services include instructions, training, and assistance to the beneficiary in the most effective use of the low vision aid. Documentation for these services should be included when requesting the low vision aid.
3.6 CONTACT LENSES

3.6.A. EVALUATION

A comprehensive contact lens evaluation is a Medicaid benefit when the beneficiary presents with one of the following conditions (use appropriate HCPCS comprehensive contact lens evaluation code):

- Aniridia
- Anisometropia or Antimetropia (of two diopters or greater that results in Aniseikonia)
- Aphakia
- Irregular cornea
- Keratoconus (if vision cannot be improved to 20/40 or better with eyeglasses)
- Other conditions which have no alternative treatment (e.g., Aniseikonia with documentation and severe Keratoconjunctivitis sicca)

3.6.B. PRESCRIPTION AND FITTING

The prescription and fitting of contact lenses is a Medicaid benefit and requires PA, except for beneficiaries who are under six years of age with a diagnosis of aphakia.

3.6.B.1. PRESCRIPTION

The prescription for contact lenses requires the complete description of contact lens specifications. The following must be included on a prescription for contact lenses:

- complete description of the contact lens(es) parameters
- material of the contact lens(es)
- manufacturer of the contact lens(es)
- material discard and replacement schedule
- number of lenses required to provide a one-year supply
- prescription expiration date

3.6.B.2. FITTING

The fitting of the contact lens(es) must include:

- determination of appropriate initial contact lens parameters based on clinical observation, and measurements of the eye with or without a trial (sample) contact lens.
a trial or adaption period of one to three months, including a fitting warranty that provides for adjustments in the contact lens parameters either by exchange or by modification of existing materials.

**Note:** Certain custom contact lens designs may not be warranted by the manufacturer. This type of custom contact lens design will be considered on a case-by-case basis. The provider must provide a detailed explanation of need, initial cost, and potential re-fitting cost.

- instruction of proper insertion, removal, disinfection, and care of the contact lens(es).
- initial supply of contact lenses, storage case, and solutions sufficient to last until the fitting is complete.

### 3.6.C. REPLACEMENT AND SUPPLIES

Procurement of contact lenses is to be done through the vision provider’s own source.

The Documentation of Medical Necessity for the Provision of Contact Lenses form (MSA-0892) outlines the information required when requesting contact lens PA. A sample of this form is provided in the Forms Appendix and can also be obtained through the MDHHS website. (Refer to the Directory Appendix for website information.)

This form must be attached to the Vision Services Approval/Order form (DCH-0893) and submitted to MDHHS as part of the PA process. (Refer to the Prior Authorization subsection in this chapter for additional information.)

Requests for contact lens replacements due to loss or damage will require PA and will be reviewed on an individual basis.

Except as previously indicated, contact lens supplies (e.g., wetting and cleaning solutions, carrying cases) are not Medicaid benefits.

### 3.7 STRABISMUS AND AMBLYOPIA EXAMINATION

Strabismus and amblyopia examinations (sensorimotor examination) are Medicaid benefits and do not require PA.

### 3.8 ORTHOPTICS AND PleOPTICS TRAINING

<table>
<thead>
<tr>
<th>Orthoptics and Pleoptics Training</th>
</tr>
</thead>
<tbody>
<tr>
<td>Orthoptics and Pleoptics (O &amp; P) training is a Medicaid benefit only when there is a diagnosis of one of the following conditions:</td>
</tr>
<tr>
<td>• Amblyopia</td>
</tr>
<tr>
<td>• Esotropia</td>
</tr>
<tr>
<td>• Exotropia</td>
</tr>
<tr>
<td>• Heterotropia</td>
</tr>
<tr>
<td>• Strabismus</td>
</tr>
</tbody>
</table>
Ocular Motor and Fusion Dysfunction

PA is not required for O & P training for beneficiaries under age 21. PA is required for beneficiaries age 21 and older for O & P training.

When requesting PA, the following documentation must be attached to the DCH-0893 and submitted to the Program Review Division:

- Visual acuity, each eye, with best spectacle correction;
- Magnitude and direction of the subjective and objective angle of strabismus at distance and near;
- Refractive error of each eye;
- Degree of fusion;
- History of strabismus, including onset, duration, prior treatment; and
- Other relevant information.

In addition to the above documentation, a detailed plan indicating the training procedures and equipment to be employed, frequency of office visits, home training aids, and prognosis must be attached to the DCH-0893. This training plan may be authorized for a period of up to three calendar months.

O & P training is limited to a maximum of 13 visits within the first three calendar months of therapy without PA. PA will be required for additional necessary visits.

If continued training beyond the period that was authorized is necessary, a new request for PA must be submitted with the following information:

- Update of the above-listed items;
- Report of the results of previous training; and
- Indication for further treatment with a detailed plan.

Orthoptic Training Aids

Orthoptic training aids are a Medicaid benefit when incorporated in an orthoptics or pleoptics training plan (as described above) and require PA. The following documentation must be included with the vision provider’s detailed plan when requesting the purchase of an aid:

- How the aid is to be used;
- Complete description of the aid;
- Name of the manufacturer; and
- Manufacturer’s charge.

Reimbursement for a training aid is based on the manufacturer’s charge to the vision provider plus a professional fee. The professional fee includes procurement, instruction in use, and fitting when applicable. Procurement of the training aid is done through the vision provider’s own source.

Purchase of orthoptic training aids must be billed only by an enrolled optometrist or dispensing ophthalmologist.
3.9 PROSTHETIC EYES

A prosthetic eye (plastic/custom) or shell is a Medicaid benefit and does not require PA.

For an enlargement or reduction of an ocular prosthesis, PA is required. PA is also required when requesting a prosthesis other than a plastic/custom eye. When requesting PA, the DCH-0893 should be completed, with documentation attached, and submitted to the MDHHS Program Review Division. Procurement of the prosthesis should be obtained from the provider's own source.

Reimbursement for a prosthesis is made on a per case basis which includes, but is not limited to:

- Trial fitting
- Supply of prosthesis
- Solutions
- Training in insertion and removal
- Instruction in care
- Subsequent office visits to achieve maximum wearing time and optimal cosmetic fit
- Any necessary modification during the adaptation period of six months

DIRECTORY APPENDIX

This directory provides contact information referenced in the various chapters of the Medicaid Provider Manual, and is divided into the following topic areas:

- Provider Assistance
- Beneficiary Assistance
- Eligibility Verification
- Prior Authorization
- Billing Resources
- Claim Submission/Payment
- Policy/Forms/Publications
- Appeals
- Health Plan Information
- Healthy Michigan Plan
- Provider Resources
- Hospice Resources
- Maternal-Child Educational Resources
- Maternal Infant Health Program Resources
- MH/SA Resources
- MI Choice Waiver Resources
- MI Health Link
- Nursing Facility Resources
- Pharmacy Resources
- Private Duty Nursing Resources
- School Based Services
- Vision Services Resources
- Reporting Fraud, Abuse, or Misuse of Services
- Other Health Care Resources/Programs
- Miscellaneous Contact Information

**ELIGIBILITY VERIFICATION**

| CHAMPS Eligibility Inquiry | MDHHS Provider Inquiry Helpline 1-800-292-2550 for questions/ issues related to the eligibility response, and for providers without internet access to verify eligibility. email: providersupport@michigan.gov Website: Log into CHAMPS using MyLogin at https://milogintp.michigan.gov. Go to the Eligibility Inquiry hyperlink located on the ‘Provider Portal’ page under the ‘Member’ section. Benefit Plan Information: www.michigan.gov/medicaidproviders >> CHAMPS >> Resources >> Benefit Plan Handout & Service Type Codes | For Medicaid providers to verify eligibility for the Medicaid, CSHCS, MOMS, and MI Child programs. Refer to the Benefit Plan ID table in the Beneficiary Eligibility Chapter for a complete list of Benefit Plan IDs that are provided in the eligibility response. Providers need to utilize the Benefit Plan ID(s) indicated in the eligibility response to determine coverage for a specific DOS. |
| CHAMPS 270/271 Batch Transaction | email: AutomatedBilling@michigan.gov Web Address: www.michigan.gov/medicaidproviders >> Billing & Reimbursement >> Electronic Billing >> HIPAA - Companion Guides | A HIPAA 270/271 Batch option is available in CHAMPS for providers and/or their contracted clearinghouse vendors to verify eligibility. Refer to the HIPAA 5010 270/271 Inquire Response Companion Guide for more information and/or the Electronic Submission Manual for upload availability. |
### Contact/Topic | Phone # Fax # | Mailing/Email/Web Address | Information Available/Purpose
--- | --- | --- | ---
**Web-DENIS** | 1-877-BLUE-WEB (1-877-258-3932) fax 248-486-2214 | Blue Cross Blue Shield of MI Electronic Business Interchange Group, LB30 53200 Grand River New Hudson, MI 48165 www.bcbsm.com | Web-DENIS is BCBSM's secure browser-based internet site for eligibility verification. Medicaid providers can verify eligibility for the Medicaid, CSHCS, MOMS, and MIChild programs at no cost. Eligibility response data is provided from CHAMPS. Providers need to utilize the Benefit Plan ID(s) indicated in the eligibility response to determine coverage for a specific DOS.

**Newborn ID Numbers** | Fax 517-373-1437 | MDHHS Enrollment Services Section PO Box 30479 Lansing, MI 48909-7979 MSA-ESS@michigan.gov | Fax or e-mail requests to obtain newborn ID numbers for billing Medicaid only when an eligibility inquiry does not locate the newborn. Eligibility information must be obtained using the CHAMPS Eligibility Inquiry with the ID number provided by MDHHS. When submitting a request, include newborn's name, gender, date of birth, mother's name, and mother's Medicaid ID number.

**MOMS Eligibility** | Fax 517-241-8556 | Customer Services Division Attn: MOMS Program | ONLY if MOMS ID number is not available through the CHAMPS Eligibility Inquiry or **mihealth** card. Request must be on provider letterhead and include provider’s phone number and contact person.

**Eligibility Verification (out-of-state providers)** | 1-800-292-2550 | | For out-of-state providers without internet access to verify eligibility for Medicaid, CSHCS, MOMS, and MIChild programs within the last 12 months.

**Michigan Public Health Institute (MPHI)** | email: MedicaidEligibility@mphi.org Web Address: https://healthplanbenefits.mihealth.org | | For Medicaid providers to verify eligibility for the Medicaid, CSHCS, MOMS, and MIChild programs at no cost. Eligibility response data provided from CHAMPS. Providers need to utilize the Benefit Plan ID(s) indicated in the eligibility response to determine coverage for a specific DOS.

</tbody>
</table>
| **Noncovered Service** | A medical or health care service that is:  
- Not covered by Medicaid;  
- Not medically necessary;  
- Not described in a MHP’s Certificate of Coverage;  
- Provided before or after a beneficiary is an Enrollee in a MHP; or  
- Non-emergency services for which the Hospital did not secure PA. |
| **Nursing Facility** | A nursing home, county medical care facility, or hospital long-term care unit, with Medicaid certification. |
| **Orthotics** | Orthotics assist in correcting or strengthening a congenital or acquired physical anomaly, or malfunctioning portion of the body. |
| **Outpatient Hospital** | A portion of a hospital, which provides diagnostic, therapeutic (both surgical and non-surgical), and rehabilitation services to sick or injured persons who do not require inpatient hospitalization or institutionalization. |
| **Outpatient Prospective Payment System (OPPS)** | A Prospective Payment System (PPS) is a method of reimbursement in which Medicare payment is made based on a predetermined, fixed amount. The payment amount for a particular service is derived based on the classification system of that service (i.e., DRGs for inpatient hospital services, APCs for outpatient hospital services).  
All services paid under the PPS are classified into groups called Ambulatory Payment Classifications (or APCs). Services in each APC are similar clinically and in terms of the resources they require. A payment rate is established for each APC. |
<p>| <strong>Physician (MD or DO)</strong> | An individual licensed under the Michigan Public Health Code (1978 P.A. 368) to engage in the practice of medicine or osteopathic medicine and surgery. |
| <strong>Prosthetics</strong> | Prosthetics artificially replace a portion of the body to prevent or correct a physical anomaly or malfunctioning portion of the body. |
| <strong>Provider</strong> | An individual, firm, corporation, association, agency, institution, or other legal entity which is providing, has formerly provided, or has been approved to provide medical assistance to a beneficiary pursuant to the medical assistance program. |</p>

FORMS APPENDIX

INTRODUCTION

The Forms Appendix contains all MDHHS forms referenced within the Michigan Medicaid Provider Manual. Detailed instructions are provided for forms that are not self-explanatory (refer to the table below). The bookmarks link to each form. The Forms field in the table below also links to the appropriate forms. Hold the cursor over form number (the hand cursor will turn into a pointing finger). Double click the cursor to access the form directly from the table. Use the navigation arrows to move from page to page and form to appendix.

All forms are also available on the MDHHS website (refer to the Directory Appendix for website information). Most forms are available in PDF format as well as in a downloadable Word-enabled format.

ACKNOWLEDGMENT OF RECEIPT OF HYSTERECTOMY INFORMATION

Michigan Department of Health and Human Services

RECIPIENT STATEMENT:

I, _______________________________________________________, was told before the hysterectomy was done that after the hysterectomy I would not be able to become pregnant.

___________________________________________________          _________________
(Recipient or Representative Signature) (Date)

___________________________________________________          _________________
(Interpreter Signature, if required to inform the recipient of the above information) (Date)

PHYSICIAN STATEMENT:

The hysterectomy for the above named recipient is solely for medical indications. This hysterectomy is not primarily or secondarily for family planning reasons, to render the above named recipient permanently incapable of reproducing, i.e. sterilization. It was explained to the above named recipient prior to the hysterectomy that the hysterectomy will render her permanently incapable of reproducing.

___________________________________________________          _________________
(Physician Signature) (Date)

Authority: Title XIX of the Social Security Act
Completion: Is Voluntary, but is required if Medical Assistance program payment is desired. The Department of Health and Human Services will not discriminate against any individual or group because of race, sex, religion, age, national origin, marital status, political beliefs or disability. If you need help with reading, writing, hearing, etc., under the Americans with Disabilities Act, you are invited to make your needs known to your local MDHHS office.

MSA-2218 (Rev. 6-2015) Formerly DSS-2218 which may be used

**SECTION 5 – Drugs Subject to Abuse**

MDHHS must authorize all prescribers of drugs subject to abuse for BMP-enrolled beneficiaries. Do you anticipate a need for the referred provider to prescribe medications in these classes?

- [ ] YES
- [ ] NO
- [ ] Unable to determine

Include the beneficiary’s current medication list with form submission.

**SECTION 6 – Additional Information/Comments (including diagnoses)**

**Provider Signature**

**Date of Authorization**
General Instructions

This form should ONLY be used for beneficiaries enrolled in the Benefits Monitoring Program (BMP).* Enrollment may be verified through the CHAMPS Eligibility Inquiry response as additional information. The form is to be completed by the beneficiary's BMP Authorized Provider(s). For additional program information, refer to the Michigan Medicaid Provider Manual (Beneficiary Eligibility Chapter, Benefits Monitoring Program Section) available on the MDHHS website.

MDHHS requests that the MSA-1302 be typewritten to facilitate processing.

Form Submission

The MSA-1302 and any supplemental information (e.g. medication list, medical records, forged prescriptions, etc.) must be mailed or faxed to:

MDHHS – Medical Services Administration
Benefits Monitoring Program
PO Box 30170
Lansing, MI 48909

Fax Number: (517) 335-0075

The MDHHS Program Review Division may be reached via telephone at (800) 622-0276.

* Previously known as Beneficiary Monitoring Program.

The Michigan Department of Health and Human Services is an equal opportunity employer, services and programs provider.

AUTHORITY: Title XIX of the Social Security Act.
COMPLETION: Is Voluntary, but is required if Medical Assistance program payment is desired.
I understand that Medicaid, Healthy Michigan Plan, or MIChild only covers payment for elective abortions under limited circumstances.

These are:

- [ ] Elective abortion to terminate a pregnancy to save the life of the mother,
- [ ] Elective abortion to terminate a pregnancy that was the result of rape, or
- [ ] Elective abortion to terminate a pregnancy that was the result of incest.

I certify that I am eligible for Medicaid, Healthy Michigan Plan, or MIChild coverage for an elective abortion based upon the circumstance that I have checked above. I understand that if I have given false information to obtain coverage for an elective abortion I can be prosecuted for fraud. I also understand that a copy of this verification will be sent to the local Michigan Department of Health and Human Services (MDHHS) office or to a police agency when appropriate.

**Authority:** Title XIX and Title XXI of the Social Security Act.

**Completion:** Is Voluntary, but is required if payment from the Medicaid, Healthy Michigan Plan, or MIChild programs is sought.

The Michigan Department of Health and Human Services (MDHHS) does not discriminate against any individual or group because of race, religion, age, national origin, color, height, weight, marital status, genetic information, sex, sexual orientation, gender identity or expression, political beliefs or disability.
CERTIFICATION FOR INDUCED ABORTION
Michigan Department of Health and Human Services
Medical Services Administration

Medicaid, Healthy Michigan Plan, or MiChild payments for abortion services are limited to cases in which the life of the mother would be endangered if the pregnancy were continued or cases in which the pregnancy was the result of rape or incest. To receive payment for abortion services, a physician must determine and certify that the abortion is necessary to save the life of the mother or is to terminate a pregnancy that resulted from rape or incest.

INSTRUCTIONS:
- TYPE or PRINT ALL Information below.
- The Physician completing this form is responsible for providing a copy of the completed form to any other provider assisting in this procedure (e.g., hospital, anesthesiologist, laboratory) for billing purposes.
- Send a copy of the completed form with the claim. (Refer to the Medicaid Provider Manual, Directory Appendix, Claim Submission/Payment.)

Any questions regarding this form should be referred to Provider Inquiry at 800-292-2550 or e-mail ProviderSupport@michigan.gov.

<table>
<thead>
<tr>
<th>Beneficiary Name</th>
<th>mihealth Number</th>
<th>Date of Service</th>
</tr>
</thead>
<tbody>
<tr>
<td>Beneficiary Address (no. &amp; street, apt./lot #, etc.)</td>
<td>City</td>
<td>State</td>
</tr>
</tbody>
</table>

Appropriate box **must** be checked for payment to be made.
By signing below, I certify that:

- **☐** the life of the mother would be endangered if the pregnancy were continued. (List the medical condition(s) that exists.)

- **☐** the pregnancy terminated through this procedure was the result of rape or incest. Information included in the medical record supports this claim.

In cases of rape or incest, was a police report filed?
- **☐** YES  **☐** NO (If NO, explain)

If appropriate, was a report filed with the local MDHHS office?
- **☐** YES  **☐** NO (If NO, explain)

**NOTE** Payment for service is not dependent upon a report being filed with the police or the local MDHHS office.

**CERTIFICATION STATEMENT BY OFFICER OF THE PROVIDER**

I HEREBY CERTIFY that:

1. I have examined this statement, the accompanying supporting exhibits, the allocation of expenses, services and activities, and the attached worksheets for the period from ____________________ to ____________________, and that to the best of my knowledge and belief they are true and correct statements prepared from the books and records of the governmental provider in accordance with applicable instructions.

2. The expenditures included in this statement are based on the actual cost of recorded expenditures and reflect the reporting provider's cost of serving Medicaid recipients.

3. I am the officer authorized by the referenced governmental provider to submit this form and I have made a good faith effort to assure that all information reported is true and accurate.

4. The required amount of State and/or local funds were used to pay for total computable allowable expenditures included in this statement, and such State and/or local funds were in accordance with all applicable Federal requirements for the non-Federal share match of expenditures (including that the funds were not Federal funds in origin, or are Federal funds authorized by Federal law to be used to match other Federal funds, and that the claimed expenditures were not used to meet matching requirements under other Federally funded programs).

5. The total computable expenditures identified herein are submitted in accordance with 42 CFR 433.51.

6. I understand that this certification of public expenditures serves as the basis for Federal matching funds; that such expenditures were allowable to the State Medicaid program in accordance with all procedures, instructions, and guidance issued by and to the single state agency during the reporting period; and that falsification or concealment of a material fact may be prosecuted under Federal or State civil or criminal law.

**Signature** (officer of the governmental provider): ____________________  **Date**: ____________________

**Title**: ____________________  **Phone Number**: ____________________

(250-Character Limit)

**SECTION IV: PROVIDER CERTIFICATION**

The patient named above (parent or guardian if applicable) understands the necessity to request prior approval for the services indicated. I understand that services requested herein require prior approval and, if approved and submitted on the appropriate invoice, payment and satisfaction of approved services will be from Federal and State funds. I understand that any false claims, statements or documents or concealment of a material fact may lead to prosecution under applicable Federal or State law.

The MSA-1653-D must be used by Medicaid enrolled DME Providers. Note: Requests for new complex seating or mobility devices submit with a completed Evaluation and Medical Justification for Complex Seating Systems and Mobility Devices form (MSA-1656).

MDHHS requests that the MSA-1653-D be typewritten to facilitate processing. A Word fill-in enabled version of this form can be downloaded from the MDHHS website www.michigan.gov/medicaidproviders >> Policy, Letters & Forms. The form is generally self-explanatory. For complete information on required modifiers, documentation, and appropriate quantity amounts, refer to the following documents:

- Standards of Coverage portion of the provider-specific chapters of the Medicaid Provider Manual.
- Billing & Reimbursement for Professionals Chapter of the Medicaid Provider Manual.
- Provider-specific databases on the MDHHS website. www.michigan.gov/medicaidproviders >> Billing and Reimbursement >> Provider Specific Information.

Completion of this form is as follows:

<table>
<thead>
<tr>
<th>Box</th>
<th>Description</th>

Form Submission

PA request forms and required documentation for all eligible Medicaid beneficiaries must be mailed or faxed to:

**MDHHS - Medical Services Administration**
**Program Review Division**
P.O. Box 30170
Lansing, Michigan 48909

**Fax Number:** (517) 335-0075

To check the status of a PA request, contact the MDHHS - Medical Services Administration, Program Review Division via telephone at 1-800-622-0276.
The provider is responsible for eligibility verification. Approval does not guarantee beneficiary eligibility or payment.

CONSENT TO STERILIZATION

I have asked for and received information about sterilization from ___________________________. When I first asked for the information, I was told that the decision to be sterilized is completely up to me. I was told that I could decide not to be sterilized. If I decide not to be sterilized, my decision will not affect my right to future care or treatment. I will not lose any help or benefits from programs receiving Federal funds, such as A.F.D.C. or Medicaid that I am now getting or for which I may become eligible.

I UNDERSTAND THAT THE STERILIZATION MUST BE CONSIDERED PERMANENT AND NOT REVERSIBLE. I HAVE DECIDED THAT I DO NOT WANT TO BECOME PREGNANT, BEAR CHILDREN OR FATHER CHILDREN. I was told about those temporary methods of birth control that are available and could be provided to me which will allow me to bear or father a child in the future. I have rejected these alternatives and chosen to be sterilized.

I understand that I will be sterilized by an operation known as a . The discomforts, risks and benefits associated with the operation have been explained to me. All my questions have been answered to my satisfaction.

I understand that the operation will not be done until at least thirty days after I sign this form. I understand that I can change my mind at any time and that my decision at any time not to be sterilized will not result in the withholding of any benefits or medical services provided by federally funded programs.

I am at least 21 years of age and was born on ___________________________. I, ___________________________, hereby consent of my own free will to be sterilized by ___________________________.

(Name of Individual Being Sterilized)

by a method called ___________________________. My consent expires 180 days from the date of my signature below.

I also consent to the release of this form and other medical records about the operation to:

Representatives of the Department of Health and Human Services OR Employees of programs or projects funded by that Department but only for determining if Federal laws were observed. I have received a copy of this form.

________________________
(Signature of Person Giving Consent) (Month / Day / Year)

You are requested to supply the following information, but it is not required: Ethnicity and race designation (please check)

Ethnicity: ___________________________ Race (mark one or more):

☐ Hispanic or Latino ☐ American Indian or Alaska Native
☐ Not Hispanic or Latino ☐ Asian
☐ Black or African American ☐ Native Hawaiian or Other Pacific Islander
☐ White

INTERPRETER’S STATEMENT

If an interpreter is provided to assist the individual to be sterilized:

I have translated the information and advice presented orally to the individual to be sterilized by the person obtaining this consent. I have also read him/her the consent form in ______ language and explained its contents to him/her. To the best of my knowledge and belief he/she understood this explanation.

________________________
(Interpreter’s Signature) (Month / Day / Year)

STATEMENT OF PERSON OBTAINING CONSENT

Before ___________________________ signed the consent form, I explained to him/her the nature of the sterilization operation intended to be a final and irreversible procedure and the discomforts, risks and benefits associated with it. I counseled the individual to be sterilized that alternative methods of birth control are available which are temporary. I explained that sterilization is different because it is permanent.

I informed the individual to be sterilized that his/her consent can be withdrawn at any time and that he/she will not lose any health services or any benefits provided by Federal funds.

To the best of my knowledge and belief the individual to be sterilized is at least 21 years old and appears mentally competent. He/she knowingly and voluntarily requested to be sterilized and appears to understand the nature and consequences of the procedure.

________________________
(Signature of Person obtaining consent) (Date)

PHYSICIAN’S STATEMENT

Shortly before I performed a sterilization operation upon ___________________________

(Name of Individual to be sterilized) (Date of sterilization)

I explained to him/her the nature of the sterilization operation ___________________________. The fact that it is intended to be a final and irreversible procedure and the discomfort, risks and benefits associated with it.

I counseled the individual to be sterilized that alternative methods of birth control are available which are temporary. I explained that sterilization is different because it is permanent.

I informed the individual to be sterilized that his/her consent can be withdrawn at any time and that he/she will not lose any health services or benefits provided by Federal funds.

To the best of my knowledge and belief the individual to be sterilized is at least 21 years old and appears mentally competent. He/she knowingly and voluntarily requested to be sterilized and appeared to understand the nature and consequences of the procedure.

(Instructions for use of alternative final paragraphs: Use the first paragraph below except in the case of premature delivery or emergency abdominal surgery where the sterilization is performed less than 30 days after the date of the individual’s signature on the consent form. In those cases, the second paragraph below must be used. Cross out the paragraph which is not used.)

(1) At least thirty days have passed between the date of the individual’s signature on this consent form and the date the sterilization was performed.

(2) This sterilization was performed less than 30 days but more than 72 hours after the date of the individual’s signature on this consent form because of the following circumstances (check applicable box and fill in information requested):

☐ Premature delivery

Individual’s expected date of delivery: ___________________________

☐ Emergency abdominal surgery: ___________________________

(describe circumstances)

Date: ___________________________

MSA-1959 (Rev.5-15) Previous edition may be used
**INSTRUCTIONS TO COMPLETE CONSENT FOR STERILIZATION FORM**

1. Name of the physician or clinic giving information to the beneficiary. The "M.D." or "D.O." designation must be included.
2. Name of the sterilization procedure to be performed (e.g., Tubal Ligation or Vasectomy).
3. Beneficiary's complete birth date (month, day, and year). The beneficiary must be 21 years of age at the time they sign the form.
4. Beneficiary’s full name. If a name change is indicated on the Medicaid card by the time surgery is performed, both names must be indicated.
5. Name of physician performing the sterilization. If the physician is unknown, "doctor on call" may be indicated.
6. Name of surgery to be performed (e.g., Tubal Ligation or Vasectomy).
7. Beneficiary’s handwritten signature. A beneficiary who cannot write should sign with an "X." The "X" signature must be witnessed. The witness’ handwritten signature must appear below item 7.
8. Date the consent form was signed (month, day and year). This date must be more than 30 days and less than 180 days before the date the sterilization is performed. If it is less than 30 days, see instructions for "alternative final paragraphs."
9. Race and ethnicity designation is optional.
10. Interpreter's Statement. This information is only required if the beneficiary is unable to understand English. The language used for interpretation must be specified (e.g., Spanish). The interpreter’s handwritten signature and date must appear. The date must be the same date the beneficiary signed the form.
11. Name of beneficiary.
12. Name of sterilization procedure (e.g., Tubal Ligation or Vasectomy).
13. The handwritten signature of the person obtaining consent.
14. Date consent is taken (month, day and year). This date must be before the date sterilization is performed (#18).
15. Name of provider or clinic (e.g., office of John Doe, M.D., doctor's office, ABC Clinic, XYZ Hospital).
16. Street address, city, state, and zip code. No P.O. boxes allowed.
17. Beneficiary's full name.
18. Date of sterilization (month, day, and year). The surgery date must be the same as indicated on the claim.
19. Name of sterilization procedure (e.g., Tubal Ligation, Vasectomy).
20. Instructions for use of alternative final paragraphs.
21. If at least 30 days have passed since the date the beneficiary signed the consent form and the date of sterilization, paragraph "1" applies and paragraph "2" should be crossed out.
22. If the date the sterilization was performed is less than 30 days and more than 72 hours of the beneficiary signing the consent form, paragraph "2" applies and paragraph "1" should be crossed out. The applicable box should be checked.
23. For premature delivery, the expected date of delivery must be given.
24. Physician's signature. This can be a stamped signature if counter initialed.
25. Date physician signed the consent form. This date must be on or after the date of surgery. This can be typed or stamped.

If abdominal surgery was performed, the circumstances must be explained and operative notes submitted with the claim.
Application for Payment of Health Insurance Premiums

SECTION ONE – CSHCS Identifying Information

1. Name of Client (Last, First MI)  
2. CSHCS ID Number

3. Client’s Contact Phone Number  
4. Client’s Date of Birth (MM/DD/YYYY)

5. Does Client have Medicare Part B?  
6. Does Client have Medicare Part D?  
7. Does Client have MiChild?

SECTION TWO – Insurance Information

Is this case for:
- ☐ COBRA - Answer questions 8-24
- ☐ Insurance Premium (new or continuing coverage) - Answer questions 13-24

8. Reason COBRA was offered OR may be available:

9. Date of qualifying event  
10. Date of COBRA notice to employee

11. Date COBRA election form was signed (if applicable)  
12. Has first COBRA payment been made?  
   YES ☐ NO ☐
   If yes, list date

13. Is insurance coverage through employer?  
14. Name of employee (if applicable)

15. Name of employer (if applicable)  
16. Name of insurance contact person

17. Phone number of insurance contact person  
18. Name of insurance company

19. Insurance contract number/group number  
20. Premium cost per month for client's coverage
   $ 

21. Date next premium is due  
22. Date of contract renewal (when rate could change)

23. Name and address of company where premium payments are to be sent:

24. Reason family is unable to pay premium:

SECTION THREE – Health and Medical Information

25. What is the client's CSHCS covered diagnosis?

26. What does the health insurance cover:  
   ☐ HOSPITAL  ☐ DOCTOR VISITS  ☐ PRESCRIPTIONS  
   ☐ VISION  ☐ DENTAL

27. What are the expected future medical needs for the CSHCS client?
28. Is it likely the client's insurance will cover these medical needs? Explain.

29. What special health care needs are not covered by the client's health insurance?

30. Are there other health insurance coverages for which the client might be eligible (e.g. Medicare Part B, Medicare Part D, other private health insurance, etc)?

   □ YES  □ NO

   Explain:

31. Additional Comments:

   Attach the following information:
   - Copy of the billing statement from the insurance carrier or a statement from the employer verifying the cost of the insurance premium.
   - Copies of Explanation of Benefit (EOB) statements or expenditure summaries from the private health insurance carrier or Medicare.
   - Copy of the completed COBRA election form if health insurance coverage is to be maintained under the provisions of COBRA.
   - Pharmacy report documenting the cost of the prescriptions and the amount paid by the private health insurance carrier or Medicare if the coverage includes a prescription benefit.

Mail this application and attachments to:

Is voluntary, but is required if CSHCS program services are desired.

The Michigan Department of Health and Human Services is an equal opportunity employer, services and programs provider.
DENTAL PRIOR APPROVAL AUTHORIZATION REQUEST

Instructions for MSA-1680-B

The Dental Prior Approval Authorization Request form (MSA-1680-B) is to be used for persons with Medicaid coverage in the Fee For Service dental benefit and persons enrolled in Children’s Special Health Care Services (CSHCS). For beneficiaries enrolled in Healthy Kids Dental, dentists should contact Delta Dental Plan for authorization requirements.

The MSA-1680-B must be completed by private dentists or community-based dental clinics (e.g., local health departments, Federally Qualified Health Centers (FQHC)). This form is self-explanatory.

If services are approved, the provider will receive a copy of the form marked "Approved" and with a Prior Authorization number. Approved services are required to be completed before the end of the Prior Authorization. To request an extension, the provider must submit a copy of the current MSA-1680-B and required documentation within 15 days prior to the end date of the current authorization. If the original prior authorization is over one year old, a new prior authorization request must be submitted.

For further information on the prior authorization of dental services, please see the Prior Authorization Section, Dental Chapter of the Medicaid Provider Manual.

Dental providers treating CSHCS beneficiaries are required to submit the beneficiary’s CSHCS qualifying diagnosis. For authorization of orthodontics and/or crown and bridge services for beneficiaries enrolled in CSHCS, please see the Children’s Special Health Care Services Dental Services Section, Dental Chapter of the Medicaid Provider Manual.

The completed MSA-1680-B may be mailed or faxed, depending whether x-ray films are necessary, to:

Michigan Department of Health and Human Services
Dental Prior Authorization
P.O. Box 30154
Lansing, MI 48909
Fax: (517) 335-0075

Questions should be directed to Dental Prior Authorization at 1-800-622-0276.

If submitting electronically, the completed MSA-1680-B must be attached with all x-ray films as required by policy.
Michigan Department of Health and Human Services
DENTAL PRIOR APPROVAL AUTHORIZATION REQUEST
www.michigan.gov/mdhhs
FAX: 517-335-0075

Note: Approval refers to service only and does not authorize fees or patient eligibility, including age.

Pursuant to 42 CFR § 433.51, this Electronic Signature Verification Statement is intended to document a physical copy of my signature as part of the documentation required for the submission of visits and financial data.

I understand that this electronic signature is created with a unique combination of my computer login name and secure password. This unique combination is to ensure that all documentation is completed under this combination is done by me.

By signing this statement, I confirm that I will keep my password secure and that I will not inappropriately disclose this information to others. I also confirm that all documentation entered under my login name and password is true and correct. This form will remain in effect until the individual named on the form changes.

Form Submission

The completed original DCH-3890 must be mailed:

Michigan Department of Health and Human Services
Bureau of Medicaid Operations
Hospital and Clinic Reimbursement Division
Rate Review Section
PO Box 30479
Lansing, MI  48909

Questions should be directed to MDHHS Medical Services Administration, Rate Review Section, via telephone at 517-335-5330.

Authority: Public Act 305 § 450.832 and 42 CFR § 433.51
Completion: Mandatory for payment.

The Michigan Department of Health and Human Services (MDHHS) does not discriminate against any individual or group because of race, religion, age, national origin, color, height, weight, marital status, genetic information, sex, sexual orientation, gender identity or expression, political beliefs or disability.
HOSPITAL NEWBORN NOTICE

INSTRUCTIONS

The MSA-2565-C serves as notice of birth of a newborn for the purposes of obtaining a Medicaid ID number. It must be completed only if the hospital is unable to submit notice of the birth through the Michigan Electronic Birth Certificate system.

- The hospital must retain THE ORIGINAL of the Hospital Newborn Notice in the beneficiary's file. A copy MUST be sent to the local MDHHS office.
- A copy of the MSA-2565-C will be returned to the hospital, noting the eligibility status of the newborn.
- Item 6 must state the name of the mother.
- A copy of the CHAMPS Eligibility Inquiry or HIPAA 271 transaction response with the mother's Benefit Plan ID information should be attached to the form; or the form must contain the county, district, unit, worker, and case number data from the eligibility response separated by slashes (e.g., 33/01/01/08/1234567890).

The Michigan Department of Health and Human Services does not discriminate against any individual or group because of race, religion, age, national origin, color, height, weight, marital status, genetic information, sex, sexual orientation, gender identity or expression, political beliefs, or disability.

GUARANTEE OF PAYMENT FOR PREGNANCY-RELATED SERVICES
NOTICE TO PRENATAL CARE PROVIDERS
PHARMACY, LABORATORY AND DIAGNOSTIC SERVICES AGENCIES

Today's Date

Expected Date of Confinement / Due Date

Beneficiary’s Name

Beneficiary’s Date of Birth

Address (Number and Street)

Apt. No.

Medicaid Case Number (if available)

City, State, ZIP Code

Medicaid Beneficiary ID Number (if available)

IMPORTANT: All of the above information MUST be completed.

The Michigan Department of Health and Human Services (MDHHS) GUARANTEES PAYMENT of the pregnancy-related services listed below for 45 days from the date listed above. This document should be considered as proof of coverage until the beneficiary receives a mihealth card or a beneficiary ID number. Michigan Medicaid-covered maternity services and fee screens apply.

Subsequent to the 45 days, MDHHS will continue to provide medical coverage for eligible women through the Maternity Outpatient Medical Services (MOMS) Program or the Michigan Medicaid Program for prenatal care, delivery, and other pregnancy-related services for the duration of the pregnancy. Medically necessary ambulatory postpartum care will be covered for 60 days after the pregnancy ends. Inpatient hospital coverage is limited to delivery-related services only.

Pregnancy-related covered services during the eligibility period include:

1. Prenatal care
2. Pharmaceuticals and prescription vitamins
3. Laboratory
4. Labor and Delivery – will cover both professional fees and inpatient hospitalization
5. Postpartum Care through 60 days after the pregnancy ends
6. Radiology and Ultrasound
7. Maternal Infant Health Program (MIHP) services until delivery
8. Outpatient hospital care
9. Childbirth education
10. Other pregnancy-related care with prior authorization

If you have questions regarding billing or you are providing a medical service that is not listed above, please refer to page 2 of this letter for instructions on billing and prior authorization procedures.

If you require this document for your files, please make a copy and return the original to the beneficiary.

Guarantee of payment applies only for providers enrolled in the Michigan Medicaid Program.

Chris Priest, Director
Medical Services Administration
ELIGIBILITY:
MOMS eligibility may be obtained through the Community Health Automated Medicaid Processing System (CHAMPS) (Eligibility Inquiry and/or 270/271 transaction). MDHHS will issue a beneficiary ID number to be used when billing for services. If the beneficiary receives full Medicaid and enrolls in a Medicaid Health Plan, the health plan’s policies and procedures will apply. If you are not a participating provider with the health plan, the beneficiary should be referred to the health plan before services are rendered.

BILLING INSTRUCTIONS:
• Electronic submission of claims is the preferred method for quick and accurate claim reimbursement.
• All services must be billed within one year of the date of service. Pharmacy services should be billed within six months of the date of service.
• Claims must be completed following standard Medicaid billing and reimbursement guidelines contained in the Billing and Reimbursement Chapters of the Medicaid Provider Manual. Claims must be submitted to the same location where you submit your Medicaid Claims.
• Private insurance must be billed first, if applicable.
• This Guarantee of Payment insures the MDHHS will provide coverage for pregnancy related services. You must hold your claim for services provided until the beneficiary receives her mihealth card or a beneficiary ID number can be identified in CHAMPS (Eligibility Inquiry and/or 270/271 transaction) with MOMS eligibility, identified with Benefit Plan ID MOMS, for the date of service. You must provide the beneficiary ID number on the claim to receive payment. Do not use the “I” number that appears in the upper right hand corner of the Guarantee of Payment letter.
• MOMS claim adjudication information will be included in the weekly remittance advice, merged alphabetically with Medicaid and other MDHHS-administered programs. The remittance advice is your claim status. If a claim does not appear on a remittance advice within 45 days, the account should be resubmitted for processing. Should you have other questions about your claim, you may contact the Medicaid Provider Inquiry line at 1-800-292-2550 or by e-mail at providersupport@michigan.gov.

All MOMS covered services are subject to the published policies and procedures applicable under the Medicaid program as they relate to health care and claim submission requirements.

PRIOR AUTHORIZATION:
If your service does not meet the definition of pregnancy-related services listed on page one of this letter, or if the service normally requires prior authorization by the Medicaid program, submit your request for authorization, by mail or by fax. Refer to the Directory Appendix in the Medicaid Provider Manual for contact information.

PHARMACY SERVICES:
Pharmacy services provided to MOMS beneficiaries must be billed to the Pharmacy Benefits Manager. Refer to the Michigan Pharmaceutical Product List to identify products that may require prior authorization. To obtain prior authorization, you may write, call or fax your request to the Pharmacy Benefits Manager. Refer to the Directory Appendix in the Medicaid Provider Manual for contact information.

Pharmacies who provide MOMS services, when presented with this Guarantee of Payment letter (DCH-1164), have the option of billing the Pharmacy Benefits Manager as indicated below:

A. Pharmacies will need to hold the electronic claim (electronic preferred) until MOMS eligibility, identified with Benefit Plan ID MOMS, is in CHAMPS (Eligibility Inquiry and/or 270/271 transaction) for the date of service. Then bill the Pharmacy Benefits Manager via the on-line system, if the electronic claim is used.
B. Submit the appropriate HIPAA compliant National Council for Prescription Drug Programs (NCPDP) electronic claim or submit a Universal Claim Form, along with a copy of the Letter, to the Pharmacy Benefits Manager per the instructions in their manual.
C. Pharmacies will need to hold the electronic claim until MOMS eligibility, identified with Benefit Plan ID MOMS, is in CHAMPS (Eligibility Inquiry and/or 270/271 transaction) for the date of service and obtain a copy of the Guarantee of Payment letter (DCH-1164) as proof of coverage in order to fill the prescription(s).
Instructions for MSA-1755

The Medicaid Enrolled Birthing Hospital Agreement for Elective, Non-Medically Indicated Delivery Prior to 39 Weeks Completed Gestation form (MSA-1755) is to be completed by all Medicaid enrolled birthing hospitals in the State of Michigan.

The purpose of this form is to serve as an attestation that each Medicaid enrolled birthing hospital utilizes evidence-based guidelines (EBGs) to address elective, non-medically indicated delivery prior to 39 weeks completed gestation for Medicaid beneficiaries.

To complete the form, hospitals must indicate whether they have elective delivery EBGs in place. If the hospital utilizes guidelines that are not listed on the form, hospitals may use the space provided on the form to explain. Hospitals may also submit copies of their elective delivery policies.

The form must be signed by both the Chief Executive Officer (CEO) and the Chief Medical Officer (CMO) of the facility.

The completed MSA-1755 must be mailed or faxed to:

Attn: Inpatient Hospital Policy
Michigan Department of Health and Human Services
Medical Services Administration, Program Policy Division
PO Box 30479
Lansing, Michigan 48909-7979
Fax: (517) 335-5136

Questions should be directed to Provider Support at ProviderSupport@michigan.gov.
The purpose of this agreement is to certify that Medicaid enrolled birthing hospitals utilize evidence-based guidelines (EBGs) to address elective, non-medically indicated delivery prior to 39 weeks completed gestation for Medicaid beneficiaries.

NOTE: This agreement must be signed by both the Chief Executive Officer (CEO) and the Chief Medical Officer (CMO) of the facility.

Complete the following:

<table>
<thead>
<tr>
<th>Hospital Name</th>
<th>National Provider Identifier</th>
</tr>
</thead>
</table>

attests that the following elective delivery EBGs are utilized:

Yes  No  (Indicate Yes or No for each statement)

☐ ☐ Medical indications for elective, non-medically indicated delivery prior to 39 weeks completed gestation are defined in hospital policy.

☐ ☐ Hospital staff is not authorized to schedule an elective, non-medically indicated delivery prior to 39 weeks completed gestation.

☐ ☐ Providers are required to obtain permission from physician leadership (e.g., the head of the obstetrics department) before performing an elective, non-medically indicated delivery prior to 39 weeks completed gestation.

☐ ☐ Provider education materials are used to educate providers on the risks of elective, non-medically indicated delivery prior to 39 weeks completed gestation.

☐ ☐ Patient education materials are used to educate patients on the risks of elective, non-medically indicated delivery prior to 39 weeks completed gestation.

☐ ☐ Hospital involvement in an initiative that addresses elective, non-medically indicated delivery prior to 39 weeks completed gestation (e.g., Michigan Health & Hospital Association [MHA] Keystone Center’s initiative in obstetrics, Trinity Health System’s Perinatal Patient Safety Initiative [PPSI], Ascension Health System’s Handling All Neonatal Deliveries Safely [HANDS]).

☐ ☐ Other. Explain in the space provided below. If more space is needed, attach explanation on a separate document.

Along with this completed agreement, MDHHS will also accept a copy of each facility’s elective delivery policy.

I certify that the responses in this attestation agreement are accurate, complete and current as of the date signed.

CSHCS MEDICAL ELIGIBILITY REPORT

Instructions for Form MSA-4114

Purpose:
This form is used to determine if an individual is medically eligible for the Children’s Special Health Care Services (CSHCS) program. The condition must require the services of a medical and/or surgical sub-specialist at least annually, as opposed to being managed exclusively by a primary care physician. A current list of covered diagnoses is maintained on the MDHHS website at www.michigan.gov/mdhhs. In addition, some diagnoses must meet severity or chronicity criteria (e.g. asthma).

This form should be completed for the following persons:
- Anyone UNDER 21 years of age with a potentially eligible condition. Psychiatric, emotional and behavioral disorders, attention deficit disorder, developmental delay, intellectual disability, autism, or other mental health diagnoses are not conditions covered by the CSHCS program.
- Anyone, regardless of age, with cystic fibrosis or hereditary coagulation defects commonly known as hemophilia.

Completion Instructions:
- Read this instruction page thoroughly. Then separate attached forms.
- TYPE or PRINT clearly in INK.
- The Physician’s Signature (or the Attending Physician if a Hospital) and the Date Signed are REQUIRED.
- Attach supporting medical documentation.
- If desired, make a photocopy for your records.
- FAX the completed form to the CSHCS Division at 517-335-9491.

Other Information:
- If this request is approved, the client is medically eligible for the CSHCS program.
- For actual program coverage, the client or the client’s family MUST APPLY to join the CSHCS program by completing form MSA-0737, APPLICATION FOR CHILDREN’S SPECIAL HEALTH CARE SERVICES.
- If the family does NOT receive an application after notification of approval, call 1-800-359-3722.

MENTAL ILLNESS/INTELLECTUAL DISABILITY/RELATED CONDITION
EXEMPTION CRITERIA CERTIFICATION
Michigan Department of Health and Human Services
(For Use in Claiming Exemption Only)
Level II Screening

INSTRUCTIONS:
• This form must be completed by a registered nurse, licensed bachelor or master social worker, licensed professional counselor, psychologist, physician's assistant, nurse practitioner or physician and signed and dated by a physician's assistant, nurse practitioner or physician.
• The patient being screened shall require a comprehensive LEVEL II evaluation UNLESS any of the exemption criteria below is met and certified by a physician's assistant, nurse practitioner or physician. Indicate which exemption applies.

Exemption Criteria

- **COMA:**
  - Yes, I certify the patient under consideration is in a coma/persistent vegetative state.

- **DEMENTIA:**
  - Yes, I certify the patient under consideration has dementia as established by clinical examination and evidence of meeting ALL 5 criteria below.
  - Yes, I certify the patient under consideration does not have another primary psychiatric diagnosis of a serious mental illness.
  - Yes, I certify the patient under consideration does not have an intellectual disability, developmental disability or a related condition.

Specify the type of dementia:

1. Has demonstrable evidence of impairment in short-term or long-term memory as indicated by the inability to learn new information or remember three objects after five minutes, and the inability to remember past personal information or facts of common knowledge.
2. Exhibits at least one of the following:
   - Impairment of abstract thinking, as indicated by the inability to find similarities and differences between related words; has difficulty defining words, concepts and similar tasks.
   - Impaired judgment, as indicated by inability to make reasonable plans to deal with interpersonal, family and job-related issues.
   - Other disturbances of higher cortical function, i.e., aphasia, apraxia and constructional difficulty.
   - Personality change: altered or accentuated premorbid traits.
3. Disturbances in items 1 or 2 above significantly interfere with work, usual activities or relationships with others.
4. The disturbance has NOT occurred exclusively during the course of delirium.
5. EITHER:
   a) Medical history, physical exam and/or lab tests show evidence of a specific organic factor judged to be etiologically related to the disturbance, OR
   b) An etiologic organic factor is presumed in the absence of such evidence if the disturbance cannot be accounted for by any non-organic mental disorder.

- **HOSPITAL EXEMPTED DISCHARGE:**
  - Yes, I certify that the patient under consideration:
    1) is being admitted after a hospital stay, AND
    2) requires nursing facility services for the condition for which he/she received hospital care, AND
    3) is likely to require less than 30 days of nursing services.

<table>
<thead>
<tr>

<th>Date</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>Name (Typed or Printed)</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>Telephone Number</th>
</tr>
</thead>
</table>

AUTHORITY: Title XIX of the Social Security Act
COMPLETION: Is voluntary, however, if NOT completed, Medicaid will not reimburse the nursing facility.

The Michigan Department of Health and Human Services (MDHHS) does not discriminate against any individual or group because of race, religion, age, national origin, color, height, weight, marital status, genetic information, sex, sexual orientation, gender identity or expression, political beliefs or disability.

COPY DISTRIBUTION:
ORIGINAL - Nursing Facility retains in Patient file
COPY - Attach to form DCH-3877 and send to Local CMHSP
COPY - Patient Copy or Legal Representative

DCH-3878 (Rev. 8-17) Previous edition obsolete.
Instructions for Completing Level II Screening

The DCH-3878 is to be used ONLY when the individual identified on a DCH-3877, Preadmission Screening (PAS)/Annual Resident Review (ARR) as needing a LEVEL II evaluation meets one of the specified exemptions from LEVEL II screening. If the individual under consideration meets one of the following exemptions, he/she may be admitted or retained at a nursing facility without additional evaluation. However, a completed copy of the DCH-3878 must be attached to the DCH-3877 and sent to the local Community Mental Health Services Program (CMHSP).

This form must be completed by a registered nurse, licensed bachelor or master social worker, licensed professional counselor, psychologist, physician’s assistant, nurse practitioner or physician, and signed and dated by a physician's assistant, nurse practitioner or physician.

Complete the following information to match the DCH-3877: Patient Name, DOB, and Referring Agency (including agency address and telephone number).

Use an "X" to indicate which exemption applies to the individual under consideration.

DEMENTIA:

- Review the 5 criteria listed under the dementia exemption category. Do NOT check this exemption unless the individual meets all 5 criteria. Any individual who meets some, but not all 5 criteria will be subject to a LEVEL II evaluation. If the individual under consideration meets this exemption category, specify the type of dementia.

- Do not mark the Dementia Exemption if there is a primary diagnosis of a serious mental illness. Do not mark Dementia Exemption if there is a diagnosis of intellectual disability, developmental disability or a related condition.

Dementia diagnoses include the following:
1. Dementia of the Alzheimer’s Type
2. Vascular Dementia
3. Dementia due to Other General Medical Conditions
4. Substance - Induced Persisting Dementia
5. Dementia Not Otherwise Specified
Evaluation and Medical Justification for Complex Seating Systems and Mobility Devices
Completion Instructions

This form should be completed for NEW or REPLACEMENT mobility device(s) and seating systems. It must be submitted with the Complex Seating and Mobility Device Prior Approval - Request/Authorization (MSA-1653-D). The evaluation and justification must be submitted within 90 days of the date the evaluation was completed.

The appropriate Addendum(s) must accompany the MSA-1656 & MSA-1653-D.

**BENEFICIARY INFORMATION:** Complete beneficiary name, date of birth, sex, mihealth number, ordering physician and physician specialty. The beneficiary name and mihealth number must be entered at the top of each subsequent page.

**SECTIONS 1 THROUGH SECTION 11 MUST BE COMPLETED BY A LICENSED/CERTIFIED MEDICAL PROFESSIONAL.**

**NOTE:** A licensed/certified medical professional means an occupational or physical therapist, a physiatrist or rehabilitation RN who has at least two years' experience in rehabilitation seating; and is not an employee of, or affiliated in any way with, the Medical Supplier with the exception of hospitals with integrated delivery models that include the supplier of the equipment and the provider of the clinical evaluation. A PTA or OTA may not evaluate for, complete or sign this document.

**SECTION 3: HOME ENVIRONMENT**

- Beneficiary resides in: House | Condo/town home | Apartment | Assisted Living / AFC/Group Home | Nursing Facility
- Does beneficiary live alone? | YES | NO | If NO, does beneficiary have a caregiver? | YES | NO
- If YES, who provides the care? | Family member | RN | LPN | Other (explain)
- How many hours per day are provided by the caregiver? |

**SECTION 4: COMMUNITY ADL (Transportation)**

- What is the beneficiary’s mode of transportation? (Check all that apply.)
  - Car | Van/SUV | Van w/ Lift | Truck | Taxi Cab | Bus | School Bus | Ambulance | Other
- Does the beneficiary attend school or work? | YES | NO |
- Is the beneficiary transported in the current or requested wheelchair? | YES | NO | If NO, explain why the beneficiary cannot be transported in the current or requested chair.
- Explain: |

**SECTION 5: SENSATION AND SKIN ISSUES**

</tbody>
</table>

### Transfers:

- ☐ Independent
- ☐ Type of assistance needed
- ☐ Pivot
- ☐ Sliding
- ☐ Mechanical Lift
- ☐ Other: (Explain)

#### Ambulation

- ☐ Independent > or = 150 ft.
- ☐ Ambulates with assist > or = 150 ft.
- ☐ Ambulates with device > or = 150 ft.
- ☐ Ambulates short distance only _____ ft.

#### Ambulate within 1 minute:

- ☐ Independent > or = 150 ft.
- ☐ Ambulates with assist > or = 150 ft.
- ☐ Ambulates with device > or = 150 ft.
- ☐ Unable to ambulate
- ☐ Limited due to endurance - Explain:

#### Ambulate with device

- Explain how this affects equipment ordered?

### Complete only if power mobility item is requested (e.g., power wheelchair, scooter, power assisted wheels, etc.)

#### Visual perception:

- Has visual acuity and perception that permits safe and independent operation of the equipment requested.
- ☐ YES ☐ NO

#### Problem solving:

- Has problem solving skills appropriate to operate requested power mobility item.
- ☐ YES ☐ NO
- If beneficiary is unable, who will complete? Explain:

#### Comprehension:

- Understands and is able to follow directions and conversations that are complex or abstract; understands either spoken or written language.
- ☐ YES ☐ NO
- If NO, explain:

### SECTION 7: MODIFIED ASHWORTH SCALE AND MANUAL MUSCLE EVALUATION INFORMATION

See Form Completion Instructions for Modified Ashworth Scale and Manual Muscle Evaluation.

#### Primitive reflexes present:

- ☐ Asymmetrical Tonic Neck Reflex
- ☐ Symmetrical Tonic Neck Reflex
- ☐ Startle Reflex
- ☐ Other: Explain:

#### Explain how this relates to equipment ordered:
Beneficiary Name: ____________________________  mHealth Number: __________________________

SECTION 8: GOALS

Check all that apply.

☐ Independence with mobility in the home and mobility related activities of daily living (MRADLs) in the community (independence is - no help or oversight provided, and has physically demonstrated independence in operating requested equipment)

☐ Assisted mobility/occasional assistance with wheelchair propulsion (e.g., verbal cueing, pushing up a ramp or onto a bus, over curbs, etc.)

☐ Dependent mobility

☐ Optimize pressure relief

☐ Proper positioning and/or correction of a physiological condition. Explain:

☐ Other: (Explain)

SECTION 9: LIST TYPE OF EQUIPMENT PRESENTLY OWNED OR USED BY THE BENEFICIARY

<table>

AUTHORITY: Title XIX of the Social Security Act
COMPLETION: Is voluntary, but is required if payment from applicable.

The Michigan Department of Health and Human Services is an equal opportunity employer, services and programs provider.
MICHIGAN DEPARTMENT OF HEALTH AND HUMAN SERVICES

Evaluation and Medical Justification for Complex Seating Systems and Mobility Devices
Addendum A: Mobility/Seating

This form must be completed by a physical therapist, occupational therapist, physiatrist, or rehabilitation registered nurse. The evaluator must complete requested and/or current equipment, warranty information and economic alternative information.

NOTE: Only complete sections that apply to the requested equipment/accessories.

Incomplete information will result in the form being returned to the evaluator for completion.

### Medical Reason

Specify Medical Reason for brand(s) and model(s) requested for this beneficiary:
EVALUATOR (PT, OT, PHYSIATRIST OR REHAB RN) ATTESTATION AND SIGNATURE/DATE

I certify that I conducted the evaluation and have completed the information in the appropriate Sections of the MSA-1656-Addendum B and that there is no financial arrangement with the selected durable medical equipment provider and/or the evaluating clinician. I certify that the equipment requested is the most economical alternative that meets the beneficiary's basic medical and functional needs. I certify that the information contained in this form is true, accurate, and complete to the best of my knowledge, and I understand that any falsification, omission, or concealment of material fact may subject me to civil or criminal liability.

Interim reimbursement request data is used to establish the amount of per diem add-on reimbursement to be included in the Medicaid Program per diem payment rate. The total amount of add-on reimbursement for the nurse aide training and testing program during the fiscal year will be adjusted through the annual settlement determination of the training and testing costs apportioned to Medicaid inpatient days.

Information included in this request may reflect estimated costs and projections for the time period indicated.

Send completed request to: LTC REIMBURSEMENT AND RATE SETTING SECTION
MEDICAL SERVICES ADMINISTRATION
MICHIGAN DEPARTMENT OF HEALTH AND HUMAN SERVICES

  - d. Total equipment use allowance (Sum of 10.c. line amounts)

#### 11. Estimated Total Nurse Aide Training Program Costs
(Sum of Line 9 and Line 10d.)
PURPOSE

This form is for the provider to obtain Medicaid Program reimbursement outside the routine nursing care rate per diem for OBRA nurse aide training and testing programs. The form must be completed in order to receive interim reimbursement for those providers that have been determined to be a lockout facility, or for those facilities incurring costs in excess of interim reimbursement. Costs will be retrospectively settled to reflect the Medicaid Program’s appropriate share of actual allowable training and testing costs.

Training and testing program costs claimed for services and supplies furnished to or purchased by the facility from organizations related to the provider by common ownership or control must adhere to the related party allowable cost principles. Expenses for such transactions should not exceed expenses for like items or services in an arms-length transaction with other non-related organizations, or the cost to the related organization.

Administrative overhead costs and space costs in nursing facilities conducting in-house training are not considered training and testing program costs. The costs reported must be specifically incurred in conducting the approved nurse aide training and testing program.

Supporting accounting records such as class attendance rosters or training participation logs, purchase orders, vendor invoices, contracts, documentation verifying amounts reimbursed to employees for approved training program expenses incurred by the employee prior to employment at the facility (e.g., canceled check, training program receipt) must be maintained for audit purposes. Supporting materials should be readily identifiable as training related cost documentation and must indicate the type of training involved.

**Training Program Approval Requirement** - Only costs incurred relative to a Department of Licensing And Regulatory Affairs (LARA) Bureau of Community and Health Systems approved Nurse Aide Training Program may be claimed on this schedule. An approved program may be conducted by the provider’s facility or by a separate entity from the provider. The provider must not report and make claim for Medicaid Program reimbursement on this schedule for any costs incurred and associated with providing training by the lockout facility during the lockout time period. Allowable nurse aide training program costs during the lockout time period are limited to the costs incurred in obtaining training and testing outside the facility from an approved nurse aide training program.

Note: If the facility maintains separate cost center reporting for the training program, enter the appropriate costs as identified.

**ITEM EXPLANATION**

1. **Provider's Cost Reporting Period**
   Enter the fiscal period coinciding with the provider’s cost reporting period.

2. **Mode of Training**
   It is possible that providers may utilize both in-house staff and outside contractors. If a chain organization or group home ownership uses an approved central training program, indicate the training as “in-house” and check “centralized training.” If multiple outside contractors are used, indicate each contractor and the time periods utilized.

6. **Lockout Facility**
   A facility identified by the LARA Bureau of Community and Health Systems as a “lockout facility” cannot conduct an approved training and testing program, cannot be a training/clinical practice site for another approved program, and cannot conduct clinical skills testing. The facility is notified of the lockout determination action by the LARA Bureau of Community and Health Systems.

8. **Estimated Total Inpatient Days for the Period**
   Indicate the appropriate number of LTC total inpatient days of care estimated to be rendered during the time period reported on this form.

13. **Name of Facility**
   Enter the provider name under which Medicaid payments are issued to the provider.

15. **County Number**
   Enter the two-digit county number.

14-16. **Provider Location**
   Enter street address, city (village and/or township) and zip code of the facility’s physical location.

17. **Provider NPI Number**
   Enter the Nursing Facility's ten-digit provider NPI number.

18. **Provider's License Number**
   Enter the three-digit license number.
1. **Facility Training Staff**  
Payroll-related costs for facility employees incurred by the approved program's direct training time or the nurse aide training program's preparation time.

2. **Nurse Aide Training Consultants**  
Costs incurred for non-facility staff engaged to provide instruction or consultation for the facility's approved nurse aide training program.

3. **Nurse Aide Student Staff**  
Payroll costs for facility employees incurred while the student is engaged in the approved training program or traveling to and from the off-site approved training location, or is engaged in off-site testing or traveling to and from the off-site testing location.

4. **Training Program Supplies**  
Cost incurred for supplies and materials used in conducting an approved training program.

5. **Training Program Transportation**  
Travel or transportation costs incurred by facility staff conducting the approved training program activity and testing, or for off-site nurse aide training and testing. Identify costs separately for training staff and student staff.

6. **Outside Contracted Approved Nurse Aide Training Program**  
- **Paid Directly By Facility** - Costs incurred to obtain nurse aide training through an outside entity approved training program. Payment for subject training is made directly from the nursing facility to the training entity and the nurse aide trainees are employed by the nursing facility.  
- **Reimbursed To Employee Staff** - Costs incurred to reimburse a facility employee who had personally paid for an approved nurse aide training program prior to becoming an employee at the facility. Reasonable and necessary expenses incurred by the employee through participation and completion of a Bureau of Community and Health Systems approved training program for which the aide has made payment are eligible for remuneration. Only the cost of tuition and books are reimbursed. The aide must be hired by a facility within 12 months after incurring this expense. The facility must obtain receipts and retain documentation from the employee to verify the expense.

7. **Nurse Aide Testing Fees**  
- **Paid Directly By Facility** - Costs incurred for State-run testing. Payment for testing fees is made directly from the nursing facility to the testing authority for aides employed at the facility.  
- **Reimbursed To Employee Staff** - Costs incurred to reimburse a facility employee who had personally paid for State-run testing prior to becoming an employee at the facility. The aide must be hired by a facility within 12 months after paying the testing fee. The facility must obtain receipts and retain documentation from the employee to verify the expense.

8. **Other Training Program Costs**  
Costs incurred that are not classified in the identified cost categories 1-7.  
Rental costs for space located off-site of the facility are reimbursable under training and testing only if the space is used solely for the training and testing program. Space costs not meeting this requirement are reimbursable within the plant cost component of Michigan’s prospective reimbursement system. Reasonable rental expense for training equipment necessary to the approved training program is an eligible cost.

Enter the detail and cost of these individual expenses in the yellow shaded cells. The total of these items will be automatically calculated by use of the F9 key.

9. **Total Training Program Cost Before Equipment Allowance**  
Subtotal of Lines 1 through 8b costs. This total will be automatically calculated by use of the F9 key.

10. **Training Program Equipment Use Allowance**  
An annual cost allowance is made for equipment purchased specifically for the Bureau of Community and Health Systems approved nurse aide training program. Such equipment purchases are not included in the plant asset costs of the facility for routine nursing care. An annual allowance of 15 percent of the equipment purchase price is reported as a cost of the training program for as long as the equipment is used in the program, but cannot exceed seven years.

The use allowance is an annual percentage adjustment made to the 15 percent amount if the cost report period differs from 12 months. Line 10.a. and Line 10.b. will automatically be calculated.

Enter line 10.c. the cost of the equipment purchased as required in the yellow shaded cells.
**General Instructions**

The MSA-115 must be used by Medicaid enrolled outpatient hospitals, outpatient therapy providers, nursing facilities and home health agencies to request Prior Authorization (PA) for therapy services. MDHHS requests that the MSA-115 be typewritten to facilitate processing. Fill-in enabled copies of this form can be downloaded from the Michigan Department of Health and Human Services (MDHHS) website [www.michigan.gov/medicaidproviders](http://www.michigan.gov/medicaidproviders) >> Policy, Letters & Forms. The request for PA must be complete and of adequate clarity to permit a determination of the appropriateness of the service without examination of the beneficiary.

PA may be authorized for a period not to exceed three months for outpatient therapy providers and outpatient hospitals, or two months for home health agencies and nursing facilities. If continued treatment is necessary, a subsequent request for PA must be submitted. The provider should retain a copy of the PA form until the approval or denial is returned.

For complete information on covered services and PA requirements, refer to the Hospital, Outpatient Therapies, Nursing Facility or Home Health Chapters of the Michigan Medicaid Provider Manual.

**Attachments/Additional Documentation**

Any additional documentation submitted with the request must contain the beneficiary name and mihealth card number, provider name and address, and the provider’s NPI number.

When requesting the initial PA, the provider must attach a copy of the initial evaluation and written treatment plan to the PA request.

**Form Completion**

The following fields must be completed unless stated otherwise:

<table>
<thead>
<tr>
<th>Box Number(s)</th>
<th>Instructions</th>

Practitioner Special Services Prior Approval - Request/Authorization
Completion Instructions

The MSA-6544-B must be used by Medicaid enrolled providers to request provider services that require prior authorization (PA) (e.g. out-of-state care and genetic testing).

MDHHS requests that the MSA-6544-B be typewritten to facilitate processing. A Word fill-in enabled version of this form can be downloaded from the MDHHS website www.michigan.gov/medicaidproviders >> Policy, Letters & Forms. For information on required modifiers, documentation, and appropriate quantity amounts, refer to the following documents:

- Standards of Coverage portion of the provider-specific chapters of the Medicaid Provider Manual.
- Billing & Reimbursement for Professionals Chapter of the Medicaid Provider Manual.
- Provider-specific databases on the MDHHS website. www.michigan.gov/medicaidproviders >> Billing and Reimbursement >> Provider Specific Information.
- For more detailed information on procedure codes refer to CHAMPS – External Links – Medicaid Code and Rate Reference.

Completion of this form is as follows:

<table>
<thead>
<tr>
<th>Box 1</th>
<th>MDHHS Use Only</th>
</tr>
</thead>
<tbody>
<tr>
<td>Box 22</td>
<td>Indicate whether this is the first request for services or if this is a renewal request for ongoing services</td>
</tr>
<tr>
<td>Box 24</td>
<td>Enter a complete description of the services, procedures, lab test, etc. requested</td>
</tr>
<tr>
<td>Box 25</td>
<td>Enter the HCPCS Procedure Code.</td>
</tr>
<tr>
<td>Box 26</td>
<td>Enter the applicable HCPCS Modifier.</td>
</tr>
<tr>
<td>Box 27</td>
<td>Enter the quantity of the services requested. If an injectable drug is requested, indicate the number of billing units requested.</td>
</tr>
<tr>
<td>Box 28</td>
<td>Enter the dates for which the requested procedure or service will take place.</td>
</tr>
<tr>
<td>Box 29</td>
<td>Enter the beneficiary’s primary and secondary diagnoses or the CSHCS qualifying diagnosis (list both the code and description)</td>
</tr>
<tr>
<td>Box 30</td>
<td>Any additional remarks regarding the request should be listed in this box such as verbal authorization date, retroactive date of service if being requested. Provide other insurance coverage for services requested.</td>
</tr>
<tr>
<td>Box 31</td>
<td>Check each box that corresponds to documentation included in the request. No request should leave all boxes unchecked.</td>
</tr>
<tr>
<td>Box 32</td>
<td>Must be completed for all requests.</td>
</tr>

Nursing Facility Address (number and street): __________________________

City | State | ZIP Code |

Sections II and III of this form must be completed by a registered nurse, licensed bachelor or master social worker, licensed professional counselor, psychologist, physician’s assistant, nurse practitioner or a physician.

### SECTION II – Screening Criteria (All 6 items must be completed.)

1. [ ] No  
- [ ] Yes  

The person has a current diagnoses of Mental Illness or Dementia (Circle one)

2. [ ] No  
- [ ] Yes  

The person has received treatment for Mental Illness or Dementia within the past 24 months (Circle one)

3. [ ] No  
- [ ] Yes  

The person has routinely received one or more prescribed antipsychotic or antidepressant medications within the last 14 days.

4. [ ] No  
- [ ] Yes  

There is presenting evidence of mental illness or dementia, including significant disturbances in thought, conduct, emotions, or judgment. Presenting evidence may include, but is not limited to, suicidal ideations, hallucinations, delusions, serious difficulty completing tasks, or serious difficulty interacting with others.

5. [ ] No  
- [ ] Yes  

The person has a diagnosis of an intellectual disability or a related condition including, but not limited to, epilepsy, autism, or cerebral palsy and this diagnosis manifested before the age of 22.

6. [ ] No  
- [ ] Yes  

There is presenting evidence of deficits in intellectual functioning or adaptive behavior which suggests that the person may have an intellectual disability or a related condition. These deficits appear to have manifested before the age of 22.

Note: If you check “Yes” to items 1 and/or 2, circle the word “Mental Illness” or “Dementia.”

Note: Explain any “Yes”

Note: The person screened shall be determined to require a comprehensive Level II OBRA evaluation if any of the above items are "Yes" UNLESS a physician, nurse practitioner or physician’s assistant certifies on form DCH-3878 that the person meets at least one of the exemption criteria.

### SECTION III – CLINICIAN’S STATEMENT: I certify to the best of my knowledge that the above information is accurate.

| Clinician signature | Date | Name (type or print) |
| Address (number, street, apt. number or suite number) | Degree/license |
| City | State | ZIP Code |
| Telephone Number | – | – |

**AUTHORITY:** Title XX of the Social Security Act  
**COMPLETION:** Is voluntary, however, if NOT completed, Medicaid will not reimburse the nursing facility.  
The Michigan Department of Health and Human Services (MDHHS) does not discriminate against any individual or group because of race, religion, age, national origin, color, height, weight, marital status, genetic information, sex, sexual orientation, gender identity or expression, political beliefs or disability.

**DISTRIBUTION:** If any answer to items 1 – 6 in SECTION II is “Yes”, send ONE copy to the local Community Mental Health Services Program (CMHSP), with a copy of form DCH-3878 if an exemption is requested. The nursing facility must retain the original in the patient record and provide a copy to the patient or legal representative.
PREADMISSION SCREENING (PAS)/ANNUAL RESIDENT REVIEW (ARR)
Mental Illness/Intellectual Disability/Related Conditions Identification

Instructions for Completing Level I Screening

This form is used to identify prospective and current nursing facility residents who meet the criteria for possible mental illness or intellectual disability, or a related condition and who may be in need of mental health services.

Sections II and III must be completed by a registered nurse, licensed bachelor or master social worker, licensed professional counselor, psychologist, physician’s assistant, nurse practitioner or physician.

Preadmission Screening or Hospital Exempted Discharge: The referral source completing the Level I Screening (DCH-3877), must complete and provide a copy to the proposed nursing facility prior to admission. Check the appropriate box in the upper right hand corner.

Annual Resident Review or Change in Condition: This form must be completed by the nursing facility. Check the appropriate box in the upper right hand corner.

Section II – Screening Criteria – All 6 items in this section must be completed. The following provides additional explanation of the items.

1. Mental Illness: A current primary diagnosis of a mental disorder as defined in the American Psychiatric Association Diagnostic and Statistical Manual of Mental Disorders.

   Current Diagnosis means that a clinician has established a diagnosis of a mental disorder within the past 24 months. Do NOT mark “Yes” for an individual cited as having a diagnosis “by history” only.

2. Receipt of treatment for mental illness or dementia within the past 24 months means any of the following: inpatient psychiatric hospitalization; outpatient services such as psychotherapy, day program, or mental health case management; or referral for psychiatric consultation, evaluation, or prescription of psychopharmacological medications.

3. Antidepressant and antipsychotic medications mean any currently prescribed medication classified as an antidepressant or antipsychotic, plus Lithium Carbonate and Lithium Citrate.

4. Presenting evidence means the individual currently manifests symptoms of mental illness or dementia, which suggests the need for further evaluation to establish causal factors, diagnosis and treatment recommendations. Further evaluation may need to be completed if evidence of suicidal ideation, hallucinations, delusion, serious difficulty completing tasks or serious difficulty interacting with others.

5. Intellectual Disability/Related Condition: An individual is considered to have a severe, chronic disability that meets ALL 4 of the following conditions:
   a. It is manifested before the person reaches age 22.
   b. It is likely to continue indefinitely.
   c. It results in substantial functional limitations in 3 or more of the following areas of major life activity: self-care, understanding and use of language, learning, mobility, self-direction, and capacity for independent living.
   d. It is attributable to:
      - Intellectual Disability such that the person has significant subaverage general intellectual functioning existing concurrently with deficits in adaptive behavior and manifested during the developmental period;
      - cerebral palsy, epilepsy, autism; or
      - any condition other than mental illness found to be closely related to Intellectual Disability because this condition results in impairment in general intellectual functioning OR adaptive behavior similar to that of persons with Intellectual Disability, and requires treatment or services similar to those required for these persons.

6. Presenting evidence means the individual manifests deficits in intellectual functioning or adaptive behavior, which suggests the need for further evaluation to determine the presence of a developmental disability, causal factors, and treatment recommendations. These deficits appear to have manifested before the age of 22.

NOTE: When there are one or more “Yes” answers to items 1 – 6 under SECTION II, complete form DCH-3878, Mental Illness/Intellectual Disability/Related Condition Exemption Criteria Certification only if the referring agency is seeking to establish exemption criteria for a dementia, state of coma, or hospital exempted discharge.
Completion Instructions for MSA-0732
Private Duty Nursing Prior Authorization – Request for Services

The MSA-0732 form (page 2) must be submitted every time services are requested, i.e., before services can begin and for each specified authorization period thereafter, no less than 15 days prior to the end of the current authorization period.

MDHHS requests that the MSA-0732 be typewritten to facilitate processing. A Word fill-in enabled version of this form can be downloaded from the MDHHS website www.michigan.gov/medicaidproviders >> Policy, Letters & Forms >> Forms.

This form must be used to request Prior Authorization (PA) for Private Duty Nursing (PDN) services for beneficiaries with Medicaid coverage under 21 years of age. Private Duty Nursing is not a benefit under Children’s Special Health Care Services (CSHCS). Beneficiaries with CSHCS coverage may be eligible for PDN under Medicaid. A request to begin services may be submitted by a person other than the PDN such as the hospital Discharge Planner, CSHCS case manager, physician, or physician’s staff person. When this is the case, the person submitting the request must do so in consultation with the PDN who will be assuming responsibility for the care of the beneficiary. If services are being requested for more than one beneficiary in the home, a separate form must be completed for each beneficiary.

Refer to the Medicaid Provider Manual, Private Duty Nursing Chapter, Prior Authorization Subsection, for the listing of required documentation to accompany each request.

Completion of this form is as follows:

<table>
<thead>
<tr>
<th>Item#</th>
<th>Instructions</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Prior Authorization Number. MDHHS use only.</td>
</tr>
<tr>
<td>2</td>
<td>Check specific box as to whether this is an initial or renewal request. If a renewal, check the INCREASE UNITS box only if this request demonstrates an increase in time from the previous authorization period. Time is authorized and billed in 15-minute incremental units (1 unit = 15 minutes).</td>
</tr>
<tr>
<td>3 - 7</td>
<td>PDN provider information. Provide complete agency name, or name of individual (last, first, and middle initial). Designate whether RN or LPN. Include NPI number, phone number, address, and fax number.</td>
</tr>
<tr>
<td>8 - 14</td>
<td>Beneficiary information. Provide complete name and birth date (month, day, and year); sex, mihhealth card number, complete address, county, and primary diagnosis using the appropriate ICD code only.</td>
</tr>
<tr>
<td>15 - 18</td>
<td>Other insurance information if applicable, including name of company and beneficiary’s group/policy and certificate/contract numbers.</td>
</tr>
<tr>
<td>19 - 25</td>
<td>Hospital information including complete address and phone number, anticipated discharge date, and name and contact information of Discharge Planner, if beneficiary is currently hospitalized.</td>
</tr>
<tr>
<td>26 - 30</td>
<td>Ordering physician information. Provide complete name (including MD or DO); NPI number, phone number, address, and fax number.</td>
</tr>
<tr>
<td>31 - 35</td>
<td>Description of the service(s) to be provided utilizing HCPCS code T1000 and modifier TD for RN or TE for LPN. Use modifier TT if caring for more than one beneficiary. Include the number of total units per month required to provide the service(s) with the start date and end date, if known.</td>
</tr>
<tr>
<td>36 - 40</td>
<td>Home environment information, including number of siblings residing in the home (include step and foster child(ren) if applicable) and if they receive PDN. Provide child’s name and mihhealth card number if receiving PDN. Also provide the number of other individuals in the home requiring care (e.g., elderly parent, grandparent, disabled spouse, sibling), name(s) and number of caregivers for the beneficiary for whom services are being requested, and whether the caregiver(s) either work and/or attend school outside of the home. If so, how many hours are spent working and/or attending school. (Additional pages may be required.)</td>
</tr>
<tr>
<td>41 - 42</td>
<td>Current school information if child is or will be attending school during the authorization period when PDN services are being provided. Include number of hours per day and per week, including travel time.</td>
</tr>
<tr>
<td>43 - 46</td>
<td>If more than one PDN or agency is involved, their name(s), phone number(s), fax number(s), and which PDN will be managing the care plan (i.e., the provider named in items 2 – 6, or the provider named in this space).</td>
</tr>
<tr>
<td>47</td>
<td>The Provider’s signature certifies that (1) the individual PDN or agency requesting the services understands the necessity for obtaining prior authorization for PDN and, (2) the information provided on this form is accurate and complete.</td>
</tr>
<tr>
<td>48</td>
<td>Signature certifies that Parent/Guardian of beneficiary attests that information provided on this form is accurate and complete to the best of their ability.</td>
</tr>
<tr>
<td>50 - 56</td>
<td>List all other services in the home. Failure to disclose all services in the home may result in recoupment of Medicaid dollars for PDN reimbursement.</td>
</tr>
</tbody>
</table>

Form Submission

The completed MSA-0732 (page 2) and required documentation must be mailed or faxed to:

Michigan Department of Health and Human Services  Fax:  (517) 241-7813
Program Review Division
P.O. Box 30170
Lansing, MI 48909

Questions should be directed to MDHHS - Medical Services Administration, Program Review Division via telephone at 1-800-622-0276.

AUTHORITY: Title XIX of the Social Security Act
COMPLETION: Is voluntary, but is required if payment from applicable programs is sought. The Michigan Department of Health and Human Services is an equal opportunity employer, services and programs provider.
The provider is responsible for eligibility verification. Authorization does not guarantee beneficiary eligibility or payment.

Provision of Low Vision Services and Aids  
Support Documentation

To facilitate processing of your request for low vision services and aids, this form must be completed. Failure to provide complete documentation will result in automatic disapproval of your request. Do not use abbreviations as their use may result in misinterpretation and possible disapproval. A Vision Services Approval/Order form (DCH-0893) must accompany this documentation. (Exception: High add bifocals do not require prior approval; hence, a completed DCH-0893 should be sent directly to the State’s vision contractor.)

_____________________________________   _______________________________________
Beneficiary’s Name  Medicaid ID Number

Based on the Low Vision Evaluation provide the following information:

A. HISTORY

  1. History of onset of low vision (including, but not limited to, onset, duration, etiology, and any ocular surgery):

SAMPLE NOTICE OF NON-COVERAGE

(Hospital Letterhead)

(Name of Patient) (Date of Notice)
(Address)
(City, State, Zip)

(Medical Record Number)
(Beneficiary Number)
(Attending Physician’s Name)
(Admission Date)

Dear (Name of Patient)

SUBJECT: CONTINUED STAY NOTICE OF NON-COVERAGE

As a Medicaid beneficiary, it is important for you to understand that there are circumstances when Medicaid does not pay for hospital care or certain services provided in the hospital. Medicaid pays for hospital care when the services are medically necessary and delivered in the most appropriate setting.

The Utilization Review Committee of (Name of Hospital) has reviewed the medical services you have received for (Specify services or condition) from (Date of Admission) to (Date of Notice). The Review Committee has determined that your continued stay in an acute care hospital is not medically necessary, and the medical services you are receiving for (Specify services or condition) could be safely rendered in another less costly setting. You should discuss with your attending physician the arrangements for the health care you may require.

You will not be responsible for payment of the services which are rendered by this hospital from (Date of Admission) through the date you receive this notice, except for payment of deductible, coinsurance, or any convenience services or items not covered by Medicaid. If you decide to stay in the hospital, you will be responsible for payment of all services provided to you by this hospital beginning the day after you receive this notice.

For example: If you receive this notice on _______ you will be responsible for payment of services provided beginning_______.

The Michigan Peer Review Organization (MPRO) is the review organization authorized by the Medicaid Program to re-review on behalf of the patient or his/her physician any hospital denied to Medicaid patients in the State of Michigan.

If you disagree with this decision and you remain in the hospital, you or your representative may request an immediate review by MPRO. You may request this by calling:

Michigan Peer Review Organization
Attention: Medicaid PACER Program
22670 Haggerty Rd., Ste. 100
Farmington Hills, MI 48335-2611
Telephone: 1-800-727-7223
"SAMPLE"
NOTICE OF NON-COVERAGE

(Hospital Letterhead)

(Name of Patient) (Date of Notice)
(Address) (City, State, Zip)
(Medical Record Number) (Beneficiary Medicaid Number) (Attending Physician’s Name) (Admission Date – if applicable)

Subject: NOTICE OF NON-COVERAGE FOR INPATIENT HOSPITAL ADMISSION

Dear (Name of Patient):

As a Medicaid beneficiary, it is important for you to understand that there are circumstances when Medicaid does not pay for hospital care or inpatient services provided in the hospital. Medicaid pays for hospital care when the services are medically necessary and delivered in the most appropriate setting.

NOTICE OF NON-COVERAGE
(Name of Hospital) Utilization Review (UR) Committee has reviewed your physician’s request for your hospital admission. The request has been denied. The hospital’s UR Committee has determined that your admission to (Name of Hospital) for treatment of (Specify services or condition) is either: 1) not medically necessary, or 2) that the medical services you may require for the treatment of your condition can be safely rendered in another less costly setting. You should discuss arrangements for any health care treatment you may require with your physician.

APPEAL RIGHTS
The Michigan Peer Review Organization (MPRO) is the review organization authorized by the Medicaid Program to review on behalf of the patient or his/her physician any hospital care denied to Medicaid patients in the State of Michigan.

If you disagree with this decision, you or your representative must request an immediate review by MPRO. You must request this review by calling:

Michigan Peer Review Organization
Attention: Medicaid PACER Program
22670 Haggerty Road, Suite 100
Farmington Hills, MI 48335-2611
Telephone: 1-800-727-7223

If MPRO confirms the hospital’s initial decision, you will be notified in writing of its decision. If you decide to proceed with the admission to the hospital, you will be responsible for the payment of all services provided to you by the hospital beginning with the date of admission.
If MPRO overturns the hospital’s decision, you will also be notified in writing of MPRO’s decision. The hospital will contact your physician and make arrangements for your admission to the hospital. Medicaid will cover the cost of your hospital stay except for the payment of any deductible, coinsurance, or convenience services or items not covered by Medicaid.
Maternal Infant Health Program Provider and Medicaid Health Plan
Care Coordination Agreement

This agreement is made and entered into this _____ day of _____, in the year _____ by
and between _____________________________________ (Medicaid Health Plan) and
___________________________________ (Maternal Infant Health Program provider).

A. Legal Basis

Whereas, in order to expand enrollment, the Michigan Department of Health and
Human Services (MDHHS) has established a competitive bid process that has resulted
in contracts with Medicaid Health Plans (MHPs) that are deemed to be qualified to
provide specified health care services to Medicaid beneficiaries; and

Whereas, Medicaid-covered maternal and infant health services will be provided
through arrangements between MDHHS, MDHHS contracted MHPs, and selected
Maternal Infant Health Program (MIHP) providers.

Now, therefore, the MHP and the MIHP provider agree as follows:

B. Terms of Agreement

This agreement will be effective ________ in the year ________. This
agreement will be subject to amendment due to changes in the contract between
MDHHS and the MHP or changes to the MIHP Medicaid policy certification
requirements.

This agreement is effective upon execution and will continue for the length of
MHP and MDHHS contract period. Either party may cancel this agreement for cause
upon 30 days written notice. Reasons for cause include: breach of duty or obligation;
fraud or abuse; federal or state sanctions; and failure to comply with state law or rules
the Medicaid Provider Manual, or the MIHP Operations Guide. The terminating party is
required to notify MDHHS at least 30 days prior to termination. This agreement will
automatically terminate when an MIHP provider fails to maintain the certification
requirements of MDHHS.

Once a signed agreement is obtained from both parties, the provisions of this
agreement will be extended for a timeframe consistent with the MHP and MDHHS
contract period, and the MIHP provider maintaining certification with MDHHS. Either
party may cancel this agreement upon 30 days written notice. MDHHS must be notified
of the termination of this agreement.
C. Purpose, Administration and Point of Authority

MIHP services are home-visiting preventive services provided to pregnant women, mothers, and their infants to promote healthy pregnancies, positive birth outcomes, and healthy infant growth and development. These support services are to be provided by a multidisciplinary team of health care professionals consisting of a qualified licensed registered nurse, licensed social worker and, if available, a registered dietitian and/or infant mental health specialist.

MIHP services are intended to supplement regular prenatal/infant care and to assist physicians (MD, DO), certified nurse midwives (CNMs), and nurse practitioners (NPs) contracted with MHPs. In compliance with MIHP and MHP guidelines, MIHP providers are to coordinate care with medical care providers, mental health providers, and the MHPs, as well as assist in the coordination of transportation services as needed for health care, support services and pregnancy-related appointments.

MDHHS/MHP Contracts and MHP/MIHP Care Coordination Agreements will be available for review upon request by MDHHS. The intent of the Care Coordination Agreement is to explicitly describe the services to be coordinated and the essential aspects of collaboration between the MHP and the MIHP provider.

The MHP shall designate in writing to the MIHP provider the person who has authority to administer this agreement. The MIHP provider shall designate in writing to the MHP the person who has authority to administer this agreement.

D. Areas of Responsibility

Mutually Served Consumers

Mutually served consumers refers to MHP beneficiaries who also qualify for MIHP services. All pregnant and infant Medicaid beneficiaries may qualify for MIHP services. The intent of establishing written procedures between the MHP and the MIHP provider is to assure service coordination and continuity of care for persons receiving services from both entities.

Services to be Provided by the MHP

The MHP will provide Medicaid covered services to Medicaid beneficiaries as required by the MHP contract with MDHHS. MIHP services are voluntary. Beneficiaries may refuse MIHP services at any time.

The MHP will notify all Medicaid beneficiaries enrolled in the MHP of the availability of MIHP services at the time of enrollment. The MHP shall provide a referral for MIHP services for those pregnant and infant Medicaid beneficiaries who are not currently receiving MIHP services or receiving equivalent maternal or infant support services from an evidence-based home visiting program. Referrals can be made in person, by letter, email, fax, or telephone.
Services to be Provided by the MIHP Provider

The MIHP provider will provide the following services:

- Psychosocial and nutritional screening and assessment;
- Plan of care development;
- Professional intervention services by a multidisciplinary team consisting of a qualified licensed registered nurse and licensed social worker and, when available, a registered dietitian and/or an infant mental health specialist;
- Coordination with the MHP for transportation services as needed for health care, substance use disorder treatment, support services, oral health services, and/or pregnancy-related appointments.
- Referral to community services (e.g. mental health, substance use disorder);
- Referral to or provision of childbirth or parenting education classes;
- Coordination with medical care providers; and
- Coordination with the MHP.

MIHP providers will bill and receive reimbursement for MIHP services provided to MHP members as noted in the provider contract established with the applicable MHP.

E. Medical Coordination

Both parties agree to establish a process for clinical staff to communicate on a regular basis to review the care coordination plans and status of mutually served beneficiaries in accordance with applicable privacy laws such as HIPAA, the Mental Health Code and 42 CFR Part 2. This may involve the sharing of written documents and verbal reports. Both parties will collaborate on development of referral procedures and effective means of communicating the need for individual referrals. The MIHP provider will provide the MHP with names of MHP beneficiaries receiving MIHP services on a regular basis, utilizing a standardized form. Communication may include assessment/screening results, the plan of care, and discharge summaries upon request.

The MIHP and MHP will accept and use the MDHHS behavioral health consent form (Consent to Share Behavioral Health Information for Care Coordination Purposes form [MDHHS-5515]) to disclose medical information protected under the Mental Health Code or substance use disorder information under 42CFR Part 2.

F. Grievance and Appeals

MIHP providers and MHPs are required to establish internal processes for resolution of grievances and appeals from Medicaid beneficiaries. Medicaid beneficiaries may file a grievance or appeal on any aspect of service provided to them by the MIHP or the MHP in accordance with MIHP and MHP grievance and appeal policies.
The MIHP provider is required to direct beneficiaries to the MHP’s grievance and appeal process as appropriate. The MHP is required to direct beneficiaries to the MIHP provider’s grievance and appeal process as appropriate.

Both parties will participate in grievance and appeal policies and shall cooperate in identifying, processing, and promptly resolving all grievances and appeals. Both parties are responsible for informing the other about their grievance and appeal process.

G. Dispute Resolution

Both parties agree to participate in a dispute resolution process in the event that the MHP or the MIHP provider contests a decision or action by the other party related to the terms of this agreement.

The dispute resolution process should include:

- Request to the other party for reconsideration of the disputed decision or action.
- Appeal to MDHHS regarding a disputed decision by an MHP, or for a disputed decision by an MIHP provider.

H. Transportation

The MHP and the MIHP provider each have specific requirements for coordinating transportation services for Medicaid beneficiaries. These responsibilities are outlined in the MHP contract with MDHHS, the contract between the MIHP and the MHP and in the Maternal Infant Health Program Chapter of the Medicaid Provider Manual.

The MIHP provider may coordinate transportation in accordance with the established MIHP/MHP provider agreement or refer the Medicaid beneficiary to utilize the MHP transportation benefit to access MHP covered services, substance use disorder treatment, oral health services, support services and/or pregnancy-related appointments.

Transportation must be arranged and provided within a reasonable timeframe to meet the needs of the beneficiary. The provision or arrangement of transportation may not be delayed due to disagreements between the MIHP and MHP regarding financial responsibility for transportation. Disputes as to payment of transportation services may be handled through the dispute resolution process.

I. Quality Improvement

Both parties agree to have mechanisms in place to conduct Quality Improvement activities to monitor the coordination of services. The MIHP provider and the MHP shall participate in quality improvement programs and shall cooperate in conducting reviews and audits of care.
J. Governing Laws

Both parties agree that performance under this agreement will be conducted in compliance with all federal, state and local laws, regulations, guidelines, and directives.

VISION SERVICES APPROVAL/ORDER
COMPLETION INSTRUCTIONS FOR DCH-0893
Michigan Department of Health and Human Services

GENERAL INSTRUCTIONS

The DCH-0893 must be used by Medicaid enrolled vision providers to request Prior Approval (PA) and/or order optical hardware for vision services. MDHHS requests that the DCH-0893 be typewritten to facilitate processing. A fill-in enabled copy of this form can be downloaded from the MDHHS website www.michigan.gov/medicaidproviders >> Policy, Letters & Forms. The request for PA must be complete and of adequate clarity to permit a determination of the appropriateness of the service without examination of the beneficiary. The form is generally self-explanatory. The following instructions are to assist in completing the DCH-0893.

Note:

- If prior authorization is required, attach documentation of medical necessity and the detailed training plan (if applicable) pursuant to the Medicaid Provider Manual.
- If applicable, complete and attach form MSA-0891 (Provision of Low Vision Services and Aids Support Documentation).
- If applicable, complete and attach form MSA-0892 (Documentation of Medical Necessity for the Provision of Contact Lenses).

<td>• Lines 01 through 07 are available for lenses, frames, and/or special characteristics (e.g., prisms, high adds) or other services (e.g., contact lens, orthoptics), if applicable.</td>
</tr>
<tr>
<td></td>
<td>• Item 18 (Procedure Code) must reflect the appropriate CPT/HCPCS procedure code.</td>
</tr>
<tr>
<td></td>
<td>• Item 19 (Modifier) must reflect a valid modifier applicable for the listed procedure code.</td>
</tr>
<tr>
<td></td>
<td>• Item 20 (Quantity) must reflect the appropriate quantity for each procedure code. Each spectacle lens procedure code represents one lens. When requesting approval for, or ordering, a pair of spectacle lenses using the same procedure code, use a quantity of &quot;2.&quot;</td>
</tr>
<tr>
<td></td>
<td>• Item 21 (Charge) is completed only for items without fee screens requiring prior approval. Enter your usual and customary charge.</td>
</tr>
<tr>
<td>22 – 24</td>
<td>Relate to the type/style of lens(es) and frame requested.</td>
</tr>
<tr>
<td>25</td>
<td>Enter all lens specifications. The width and style must be consistent with the procedure code appearing in Item 18.</td>
</tr>
<tr>
<td>26</td>
<td>Additional instructions to the vision contractor necessary for proper fabrication.</td>
</tr>
<tr>
<td>27</td>
<td>Specifications from the beneficiary’s previous lens(es). This is applicable for diopter changes or replacements, as well as when requesting frames only. NOTE: The only time this item is left blank is for initial spectacles.</td>
</tr>
<tr>
<td>28 – 29</td>
<td>MDHHS use only.</td>
</tr>
</tbody>
</table>
Submission Instructions

Prior Approval

PA requests should be received by the MDHHS Vision Contract Manager no more than 30 calendar days from the date of order. If received beyond 30 days, the provider must include a detailed explanation of why the form submission was delayed.

The provider should retain a copy of the completed form for their file and mail or fax the DCH-0893 to:

MDHHS Vision Contract Manager
Program Review Division
PO Box 30170
Lansing, MI  48909

Fax: 517-335-0075

Upon completion of the PA process, a copy of the DCH-0893 is returned to the provider.

Optical Hardware Order

Orders placed with the vision contractor must be received no more than 30 calendar days after the date of order. If beyond the 30 days, the contractor will return the order to the provider who must explain to the Medicaid Program Review Division why the form submission was delayed and request an exception from the time limit.

When placing an order with the contractor, the provider should retain a copy of the completed form for their file and submit the DCH-0893 to:

Classic Optical Laboratories
3710 Belmont Avenue
PO Box 1341
Youngstown, OH  44501-1341

Telephone: 888-522-2020
Fax: 888-522-2022

Online Address: http://www.classicoptical.com

Note: Optical hardware orders may also be submitted through an online process with the vision contractor. To utilize on-line submission, contact Classic Optical Laboratories for additional information.
