- The referring physician orders the review and records the order in the beneficiary's medical record. (Standing consultation orders from a physician to a laboratory are not covered by Medicaid.)  
- A detailed report is sent to the referring physician.  

The report prepared from the study performed by the hematologist/pathologist must include:  
- Identification of the laboratory where the review was performed.  
- Name of the referring physician.  
- Beneficiary's name.  
- Date of review.  
- Identification of material examined.  
- Comments and descriptions of normal and abnormal findings.  
- Descriptions detailed enough to support a clinical impression or diagnosis.  
- Clinical impression or diagnosis presented in relation to the suspected disease, disease process, or state of altered physiology.  
- Recommendations for investigation or therapy, if any.  
- The typewritten or printed hematologist/pathologist's name and his handwritten signature.  

This information must be retained in the beneficiary's medical records. |

| Pregnancy Related Lab Services | For routine pregnancy testing, Medicaid covers the serum or urine HCG qualitative method.  

The obstetric profile is covered when ordered by the attending practitioner as an all-inclusive panel of tests for required prenatal laboratory services. The individual tests of the OB Profile are:  
- ABO typing  
- CBC with WBC differential  
- Hepatitis B surface antigen  
- RBC antibody detection  
- Rh (D) typing  
- Rubella antibody  
- Syphilis testing  

HIV testing and Urinalysis are covered separately when determined to be medically necessary and are ordered by the practitioner. |
Clinics and office-based laboratories must be registered as required by the Clinical Laboratory Improvement Amendments (CLIA). Medicaid only covers the procedures contained in the CLIA Certificate of Waiver Testing list for Certificate of Waiver practitioners. Coverage includes only the procedures contained in the CLIA Certificate of Registration Testing list for Certificate of Registration practitioners. Medicaid covers the procedures identified in the CLIA Physician Performed Microscopy list for appropriately certified physicians. Laboratory tests covered for CNMs and podiatrists who have the appropriate CLIA certification are identified in the Medicaid Code and Rate Reference tool. (Refer to the Directory Appendix for website information.)

### 3.15 NERVE BLOCKS

Nerve blocks are covered as a surgical procedure when performed for diagnostic or therapeutic purposes. As a surgical procedure, a complete description of the services rendered must be documented in the beneficiary’s medical record. When used as anesthesia for another procedure, the anesthesia guidelines apply. Nerve blocks are not separately covered when used as a local anesthetic for another surgical procedure.

A nerve block is the injecting of a local anesthetic or neurolytic agent around a nerve to produce a block of that specific nerve. It is not injecting a painful area under the skin or a trigger point, or an injection into the general muscle mass of subcutaneous tissue that does not follow the anatomy of a specific nerve, to produce temporary relief of pain in that area.

Nerve blocks are payable in the hospital or office setting as appropriate. No more than three nerve blocks to the same area are covered within a six-month period without documentation of medical necessity. Documentation must include the diagnosis or condition, the management/treatment plan, specific nerve(s) affected, indications, and expected benefits. A medical visit is not covered separately on the same day unless documentation is supplied to justify the separate services.

### 3.16 OXYGEN

Medicaid covers oxygen and the equipment necessary for the administration of oxygen therapy.

A pharmacy or a medical supplier may provide gaseous cylinder oxygen. Portable cylinder oxygen is allowable if the cylinder can be refilled and if the flow rate is adjustable.

Only a medical supplier may provide concentrators, liquid oxygen, and oxygen tents, and PA is required.

All oxygen and equipment requires a physician’s prescription and a CMN. The initial prescription is valid for six months. The first follow-up prescription is valid for six months, and each subsequent prescription is valid for one year.

The written prescription for oxygen must include all of the following:

- The date the oxygen was prescribed;
- The beneficiary’s diagnosis(es);
- The flow rate (liters per minute);
- The number of hours to be used per day;
• Duration of need;
• Delivery system to be used; and
• PO2 level or oxygen saturation.

(Refer to the Medical Supplier Chapter of this manual for additional information related to face-to-face and PA requirements.)

3.17 SUBSTITUTE AND LOCUM TENENS PHYSICIANS

Medicaid covers substitute physicians or locum tenens physicians and allows payment to be made to the beneficiary’s attending physician for these services. Federal statutes and CMS requirements determine parameters for these arrangements.

Medicaid coverage under the beneficiary’s attending physician for the services of a substitute physician can only occur under the following substitute physician billing arrangements:

• An informal reciprocal arrangement for a period not to exceed 14 days; or
• A locum tenens or temporary arrangement for 90 continuous days in the case of a per diem or other fee-for-time compensation.

Coverage for services provided by a substitute physician under either a reciprocal billing or a locum tenens arrangement must follow Medicaid policy for the service(s) rendered. Documentation in the beneficiary’s medical record must identify the physician actually providing the service.

3.18 SUPPLIES IN THE OFFICE SETTING

RVU-based payment to practitioners includes payment for the office overhead expense associated with the service. In most cases, the overhead includes the supplies used or provided by the practitioner in connection with the service, and the supplies are not separately reimbursed.

Providers must not require beneficiaries to purchase an item in advance from a pharmacy or medical supplier that is an integral component of the service. Surgical dressings applied by a physician in the office or other nonfacility setting are not covered separately.

Medicaid does not cover take-home supplies dispensed from the office setting. If a beneficiary requires in-home supplies, a written prescription must be presented to the pharmacy or medical supplier and supplies dispensed accordingly.

In keeping with the RVU-based fee schedule, Medicaid separately covers a limited number of supplies used in the office setting (such as intrauterine devices and casting supplies) because an allowance for these supplies is not typically included in the respective treatment procedure codes. Casting and splinting supplies are covered separately when used with the fracture and dislocation or casting, splinting or strapping procedure codes listed in the musculoskeletal surgery section of the CPT coding manual.
3.19 VISION SERVICES

Refer to the Vision chapter of this manual for specific coverage information.

3.20 ORTHOPTIC SERVICES

Strabismus surgeries are covered for beneficiaries of any age and do not require PA. Providers are reminded that these surgeries must be medically necessary and not performed solely for cosmetic purposes.

Refer to the Vision chapter of this manual for other specific orthoptic coverages.

3.21 WEIGHT REDUCTION

Medicaid covers treatment of obesity when done for the purpose of controlling life-endangering complications, such as hypertension and diabetes. If conservative measures to control weight and manage the complications have failed, other weight reduction efforts may be approved. The physician must obtain PA for this service. Medicaid does not cover treatment specifically for obesity or weight reduction and maintenance alone.

The request for PA must include the medical history, past and current treatment and results, complications encountered, all weight control methods that have been tried and have failed, and expected benefits or prognosis for the method being requested. If surgical intervention is desired, a psychiatric evaluation of the beneficiary's willingness/ability to alter his lifestyle following surgical intervention must be included.

If the request is approved, the physician receives an authorization letter for the service. A copy of the letter must be supplied to any other provider, such as a hospital, that is involved in providing care to the beneficiary.

3.22 TUBERCULOSIS TESTING

Medicaid covers TB testing according to the guidelines established by the AAP and USPSTF which are based on risk. A risk assessment may be completed at each visit. Coverage for the TB test includes any return visit to read the results of the TB test.

For assistance in determining high risk, providers may contact the MDHHS Division of Communicable Diseases, the AAP, or the USPSTF. (Refer to the Directory Appendix for contact information.)
SECTION 4 – GENERAL PRACTICE - SPECIAL CONSIDERATIONS

4.1 APHERESIS, THERAPEUTIC

Therapeutic apheresis is covered for the following indications:

- Plasma exchange for acquired myasthenia gravis;
- Leukapheresis in the treatment of leukemia;
- Plasmapheresis in the treatment of primary macro-globulinemia (Waldenstrom);
- Treatment of hyperglobulinemia, including (but not limited to) multiple myelomas, cryoglobulinemia and hyperviscosity syndromes;
- Plasmapheresis or plasma exchange in the last resort treatment of thrombotic trombocytopenic purpura (TTP);
- Plasmapheresis or plasma exchange in the last resort treatment of life-threatening rheumatoid vasculitis;
- Plasma perfusion of charcoal filters for treatment of pruritis of cholestatic liver disease;
- Plasma exchange in the treatment of life-threatening forms of Goodpasture’s Syndrome;
- Plasma exchange in the treatment of glomerulonephritis associated with antiglomerular basement membrane antibodies and advancing renal failure or pulmonary hemorrhage;
- Treatment of chronic relapsing polyneuropathy for beneficiaries with severe or life-threatening symptoms who have failed to respond to conventional therapy;
- Treatment of life-threatening scleroderma and polymyositis when the beneficiary is unresponsive to conventional therapy;
- Treatment of Guillain-Barre Syndrome; and
- Treatment of life-threatening Systemic Lupus Erythematosus (SLE) when conventional therapy has failed to prevent clinical deterioration

Coverage is limited to the following settings:

- In a hospital setting (either inpatient or outpatient). Nonphysician services furnished to hospital patients are covered as hospital services. When covered services are provided to hospital patients by an outside provider/supplier, the hospital is responsible for paying the provider/supplier for the services.
- In a nonhospital setting, such as a physician directed clinic, when all of the following conditions are met:
  - A physician is present to perform medical services and to respond to medical emergencies at all times during patient care hours.
- Each patient is under the care of a physician.
- All nonphysician services are furnished under the personal supervision of a physician.

When the physician provides direct supervision of the procedure or personally performs any services, professional services are covered as therapeutic apheresis (plasma and/or cell exchange).

### 4.2 CHEMOTHERAPY ADMINISTRATION

Medicaid covers the services of a physician who administers antineoplastic chemotherapy to beneficiaries with a cancer diagnosis in the office setting and in the beneficiary’s home. The chemotherapy drugs administered by the physician are covered separately.

Administration of other drugs for diagnoses other than cancer is covered under therapeutic, diagnostic, or prophylactic injection/infusion services.

Chemotherapy administration by push and by infusion techniques is covered on the same day; however, only one push administration is covered on a single day.

Physicians must personally administer the drug or be present when a qualified employee of the physician administers the drug. If chemotherapy is administered without face-to-face contact between the physician and the beneficiary, the services are covered if furnished in the physician’s office by a qualified employee under the physician's supervision and the medical record reflects the physician's active participation in and management of the course of treatment.

In the hospital setting, chemotherapy administration is only covered when the physician personally administers the drug.

Refilling and maintenance of an implantable pump or reservoir is covered. Chemotherapy administration by IV push, infusion, or intra-arterial technique is not covered in addition to refilling the implantable pump or reservoir. Flushing of a vascular port prior to chemotherapy is included in the administration and is not covered separately. If a special visit is made to the physician’s office only for port flushing, the service is covered under the appropriate E/M code.

Hydration therapy intravenous (IV) infusion is covered as a part of the chemotherapy IV infusion service when administered simultaneously. Hydration therapy is covered separately when administered sequentially or as separate procedures. The distinct procedural service modifier should be reported with the hydration therapy code when performed sequentially.

Supplies necessary to administer chemotherapy in the office setting are included in the overhead expense portion of the administration services and are not covered separately. (Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters for chemotherapy drugs.)

### 4.3 HEMODIALYSIS AND PERITONEAL DIALYSIS

Medicaid covers physician services required to manage care of beneficiaries with end-stage renal disease (ESRD) who are receiving ongoing dialysis in an outpatient facility or at home.
Most physician services are covered through a monthly capitation payment (MCP) to the managing physician. The MCP covers ESRD related physician services in all settings necessary to manage the beneficiary’s dialysis care, except declotting of shunts, dialysis training, and nonrenal-related medical services.

Self-dialysis training services provided by the physician are covered.

4.4 HOME HEALTH CARE

Medicaid covers home health care subject to the requirements in this section.

Home Health services include intermittent nursing care, home health aide services, and physical therapy provided in the beneficiary’s home by a Medicaid enrolled Home Health Agency (HHA). The service must be reasonable and necessary for the treatment of a specific illness, injury, or disability, and must be consistent with the nature and severity of the beneficiary’s condition, particular medical need and accepted standards of medical practice. Limited services to ensure stability of beneficiaries with an established disability or frail condition, or to prevent an illness, injury or disability for women and newborns during the postpartum period are covered.

Home health is intended for beneficiaries whose conditions require intermittent rather than continuous medical/nursing care. In special instances, intensive nursing care in the home may be approved if MDHHS determines that home care is appropriate and is a cost-effective alternative to institutional care.

4.4.A. PHYSICIAN ORDER FOR CARE

The beneficiary’s physician must order covered home health services as part of a written plan of care (POC), and must review the POC every 60 days for continuing need. A HHA should not provide home care prior to the date of the physician’s order for the care. The agency must maintain a patient plan of treatment form which must be signed and dated by the physician, or a narrative summary of the POC which must have the physician’s signed and dated order attached. The HHA is responsible for obtaining necessary authorization from MDHHS for special or extended care which may be provided.

For initial certification, a physician certifying eligibility for home health services must provide documentation of a face-to-face encounter with the beneficiary within 90 days prior to or 30 days after the start of care. Refer to the Face-to-Face Encounter section in the Home Health Chapter for additional information.

Home health services are not to replace the services of a physician and are not covered solely for the lack of transportation or as a convenience to the beneficiary. Home health services may be appropriate when leaving the home is medically contraindicated or special transportation or effort is required.

4.4.B. MEDICAL SUPPLIES AND EQUIPMENT

Medical supplies, durable medical equipment, orthotic and prosthetic appliances, shoe supplies, and oxygen are covered for beneficiaries receiving services from an enrolled HHA. The physician (MD, DO, DPM, NP, PA) must prescribe these items. (Refer to the Home Health and the Medical Supplier Chapters of this manual for specific information
concerning which equipment/supplies are covered for the medical supplier and which are covered for the HHA.) Face-to-face visits and prior authorization may apply.

4.4.C. PERSONAL CARE

If beneficiaries are not in need of nursing care or physical therapy, but have a need for nonspecialized, unskilled personal care or chore services, such services are available through the MDHHS Home Help Program. The local MDHHS office should be contacted for information.

4.5 HOSPICE SERVICES

Medicaid covers hospice services which include palliative and supportive services to meet physical, psychological, social, and spiritual needs of terminally ill beneficiaries and their families in the home, adult foster care facility, home for the aged, nursing facility, or an inpatient hospice setting. Medicaid enrolled Hospice programs are responsible for providing all physician services related to a beneficiary’s terminal illness as part of its core services.

To enroll in hospice, the beneficiary must have a life expectancy of six months or less, have knowledge of the illness and life expectancy, and elect to receive hospice services rather than active treatment for the illness. Both the referring physician and the hospice medical director must certify the life expectancy.

If the physician is not familiar with Medicaid-enrolled hospices in his area, hospice names, addresses, and telephone numbers may be obtained from MDHHS Provider Inquiry. (Refer to the Directory Appendix for contact information.)

Refer to the Billing & Reimbursement for Institutional Providers and the Hospice chapters of this manual for specific requirements related to the provision of hospice services.

4.6 IMPLANTABLE INFUSION PUMPS

Medicaid covers the refill and reprogramming of implantable infusion pumps by physicians in the physician's office. The refill kit and the electronic analysis of the pump are covered as a part of the refill and reprogramming procedure. Injectable drugs used during this procedure are covered separately in the physician's office.

4.7 PEDIATRIC MULTICHANNEL RECORDINGS [CHANGE MADE 4/1/19]

Multichannel recording is covered for a child under age 21 when provided in the inpatient or outpatient hospital setting by qualified personnel and interpreted by a physician. Multichannel recordings are not covered in the beneficiary’s home.

A pediatric multichannel recording is a continuous and simultaneous recording of at least four channels that may include ECG, thoracic impedance, airflow measurements, oxygen saturation, esophageal pH, or strain gauge measurements. Other additional recording parameters may be included. A multichannel recording does not have to include an electroencephalogram (EEG). When an EEG is performed in addition to the four or more channels, it is covered separately. Payment for the multichannel recording is the same regardless of the number of channels or the length of time required. Use of a video camera is not separately covered.
Two multichannel recordings may be covered in one year for the same beneficiary. If more than two are medically justified for CSHCS beneficiaries, the physician must obtain PA. The PA number must be included on the claim for payment. (Refer to the General Information for Providers Chapter for additional prior authorization information.) (revised 4/1/19)

A multichannel recording is covered as a professional service to the physician and as a technical service to the hospital. The professional service includes the interpretation with written report, and the scanning and scoring.

**4.8 PREVENTIVE SERVICES**

The program covers preventive services assigned a grade A or B by the USPSTF and all adult vaccines and their administration recommended by ACIP for beneficiaries age 21 years and older. (Refer to the Directory Appendix for USPSTF and ACIP website information.)

Preventive services for beneficiaries under 21 years of age are covered as part of the Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) benefit. (Refer to the Early and Periodic Screening, Diagnosis, and Treatment Chapter for specific information.)

Providers submitting claims for services in accordance with the USPSTF grade A and B recommendations are to identify the service with the appropriate International Classification of Diseases (ICD) diagnosis code(s). To identify the service as a preventive service, providers are encouraged to include HCPCS Modifier 33, Preventive Services. (Refer to the Billing & Reimbursement for Professionals Chapter for specific information.)
SECTION 5 – EVALUATION AND MANAGEMENT SERVICES

Medicaid covers medically necessary evaluation and management (E/M) services provided by a physician or other practitioner authorized by the State. Providers should refer to the CPT explanations, coding conventions, and definitions for E/M services.

Most E/M services are covered once per day for the same beneficiary. In these cases, only one office or outpatient visit is covered on a single day for the same beneficiary unless the visits were for unrelated reasons and at different times of the day (e.g., office visit for blood pressure medication evaluation, followed five hours later by a visit for evaluation of leg pain following an accident).

Coverage of an E/M service includes related activities such as coordination of care, telephone calls, writing prescriptions, completing insurance forms, review and explanation of diagnostic test reports to the beneficiary.

Do not report the modifier for increased procedural services with E/M services in order to request individual consideration, unless specifically directed by this manual. This does not follow CPT coding guidelines and causes longer delays in processing the claims for payment.

5.1 PREVENTIVE MEDICINE SERVICES

The program covers one preventive visit annually. For beneficiaries under 21 years of age, EPSDT screening services are covered according to the AAP periodicity schedule and CMS requirements. (Refer to the Early and Periodic Screening, Diagnosis, and Treatment Chapter for specific information.)

A preventive medicine E/M visit and another E/M visit on the same date are covered separately if, during the preventive visit, a problem or abnormality is detected which requires additional work which meets the key component requirements of a problem oriented E/M visit. When this occurs, the office/outpatient E/M procedure code is covered using the modifier for a separately identifiable service, and the preventive E/M visit is covered without using a modifier. (Refer to CPT guidelines for additional information.)

5.2 E/M VISITS IN RELATION TO GLOBAL SURGERY PACKAGE

An E/M service that results in the decision for surgery is covered separately when provided by the surgeon on the day before or the day of a procedure with a 90-day global period and the decision for surgery modifier is reported. This same E/M service provided the day before or the day of a procedure with a 0-day or 10-day global period is not covered separately.

An E/M service is not covered separately on the same day as a procedure with any global surgery period unless the beneficiary's condition requires a significant, separately identifiable E/M service that is above and beyond the pre- and post-operative care associated with the procedure or service performed.

If the surgeon performs E/M services during the post-operative global surgery period for a reason unrelated to the surgical procedure, report the appropriate modifier with the E/M service. All care provided during the inpatient stay in which the surgery is performed is compensated through the global surgery package and is not covered separately.
5.3 Consultations

Medicaid covers consultations rendered by a physician whose opinion or advice is requested by another appropriate practitioner (e.g., physician, CNM, dentist) for the further evaluation and management of the patient. A consultation includes preparation of a report of findings that is provided to the referring provider for the referring provider’s use in the treatment of the beneficiary. A consultant may initiate diagnostic and/or therapeutic services. If the referring provider transfers complete responsibility for treatment either orally or in writing to the consultant at the time of the request for consultation, the receiving physician’s services are covered as normal E/M services rather than as a consultation.

If the referring provider transfers responsibility for the beneficiary’s care to the consultant after the consultation is completed, the consultant’s service is covered as a consultation. After the consulting physician assumes responsibility for the beneficiary’s care, subsequent visits are covered as established patient office visits or subsequent hospital care, depending on the setting.

A consultation is covered if one provider in a group practice requests a consultation from a physician of a different specialty in the same group practice as long as all of the requirements for use of the CPT/HCPCS consultation codes are met. A request for a consultation from the attending provider and the need for consultation must be documented in the beneficiary’s medical record. In an inpatient setting, the request may be documented as part of a plan written in the requesting physician's progress notes, an order in the hospital record, or a specific written request for the consultation.

Medicaid covers second opinions for surgery. The second opinion is covered as a consultation as long as all requirements for a consultation are met.

Ancillary services provided to a beneficiary in a nursing facility must be ordered by the attending physician and are not covered as consultations unless a specific request for opinion and advice is documented. Requests for services by another physician are covered as the actual service provided (e.g., nursing facility visit or eye examination).

5.4 Initial Visits

Medicaid covers one new patient visit for a physician or a group practice for the same beneficiary, regardless of the type of new patient visit billed (e.g., office visit, clinic visit, long term care visit, home visit).

5.5 Observation Care

Medicaid covers physician services for beneficiaries admitted and discharged from observation status in the hospital setting for a stay less than 24 hours. Coverage is based on CPT coding conventions to report observation stays occurring on a single date and observation stays which start on one date and end on the subsequent date. It is expected that the beneficiary would be discharged from the hospital at the end of observation care. The medical record must include the following documentation:

- the length of time of the observation stay
- the physician was present and personally performed the services
- the physician wrote the observation admission and/or discharge notes
For outpatient surgical procedures, the global surgery rules apply. The surgeon is responsible for all post-operative care in the hospital and observation care is not covered separately.

Observation care for psychiatric reasons must be authorized by the PIHP/CMHSP. The PIHP/CMHSP is responsible for coverage of authorized psychiatric observation care services.

5.6 NURSING FACILITY SERVICES

Visits necessary to perform Medicare and Medicaid required assessments are covered under the appropriate E/M services involving comprehensive resident assessments.

Visits required to monitor and evaluate residents at the frequencies detailed in the coverage portion of the Nursing Facility chapter of this manual are also covered under the appropriate E/M service for subsequent nursing facility care.

Additional visits for the diagnosis or treatment of illness or injury, or to improve the functioning of a malformed body member, are only covered when documentation of the medical necessity for the visit is included on, or attached to, the claim. Documentation must include diagnoses describing the acute illness or injury; or remarks documenting the necessity for the additional visit recorded on the claim; or documentation such as notes from the visit supporting the above criteria attached to the claim. Providers may report modifier 22. Additional visits which repeatedly reflect the same chronic diagnoses and additional visits for the purpose of routine monitoring are not covered.

Refer to the Coverages portion of the Nursing Facility chapter of this manual for timeframes and additional details for required nursing facility visits.
SECTION 6 – EMERGENCY SERVICES

Medicaid covers all medically necessary emergency services. Federal statutes prohibit prior authorization (PA) for coverage of emergency services. Emergency services include covered inpatient and outpatient services that are furnished by a provider that is qualified to furnish such services and the services are necessary to evaluate or stabilize an emergency medical condition. All professional services must be identified as either an emergency or not an emergency.

6.1 SCREENING EXAM AND STABILIZATION IN THE EMERGENCY DEPARTMENT

MDHHS and its contracted health plans must follow the applicable requirements and definitions of the federal Emergency Medical Treatment and Active Labor Act (EMTALA).

Medicaid covers the medical screening examination, any ancillary service(s) when performed in a hospital emergency department (ED) for the sole purpose of determining if an emergency medical condition exists, and any necessary stabilizing treatment.

For both Medicaid FFS and MHP beneficiaries, the screening examination and any physician-ordered procedures (e.g., x-rays, lab, etc.) necessary to determine the beneficiary's condition are covered without PA. For Medicaid FFS beneficiaries, the screening examination and related diagnostic procedures are covered by MDHHS. For Medicaid MHP beneficiaries, these services are covered by the beneficiary's MHP.

Professional services for the medical screening and stabilization in the ED are covered separately from the facility fees.

6.2 TREATMENT OF EMERGENCY MEDICAL CONDITION IN THE EMERGENCY DEPARTMENT

PA is not required for the treatment of emergency medical conditions.

An emergency medical condition is defined by the Balanced Budget Act of 1997 and its regulations.

An emergency medical condition may exist whether the beneficiary is discharged from the ED or admitted to the inpatient hospital. This includes admissions where death occurs before a bed is occupied.

If an emergency medical condition exists, the medical findings must be fully documented in the beneficiary’s medical record.

6.3 NON-EMERGENCY MEDICAL CONDITIONS IN THE EMERGENCY DEPARTMENT

If the medical findings from the screening indicate the beneficiary's condition does not meet the definition of an emergency medical condition, but requires additional, follow-up treatment, the following rules apply:

- FFS Medicaid beneficiaries without private health insurance should be referred to their primary care provider to obtain treatment. However, treatment may be rendered in the ED and does not require PA.
• FFS Medicaid beneficiaries with private health insurance must follow the rules of the private health insurance. Private insurers frequently require that the primary care provider perform the follow-up care.

• MHP enrollees must be referred to their primary care provider for treatment, or the MHP can be contacted to request authorization to provide the treatment. If the MHP fails to respond within one hour to the request to provide additional services beyond those required for stabilization, the request for authorization is deemed approved.

6.4 PSYCHIATRIC EMERGENCY SERVICES IN THE EMERGENCY DEPARTMENT

Screening and stabilization of a psychiatric emergency does not require PA. These services are covered in the same manner as other emergency services provided in the ED detailed above. If it is determined that the beneficiary requires post-stabilization psychiatric services, the PIHP/CMHSP must be contacted for PA. The need for PA from the PIHP/CMHSP includes, but is not limited to, inpatient psychiatric admission, psychiatric partial hospitalization, and specialty mental health services.

A psychiatric emergency is defined as a situation in which an individual must be treated to protect him from inflicting injury to self or others as the result of a serious mental illness, emotional disturbance, or developmental disability, or could reasonably be expected to intentionally or unintentionally injure himself or others in the near future. The emergency may result from an inability to provide food, clothing, or shelter for him or others, inability to attend to activities of daily living, or when judgment is so impaired the individual is unable to understand the need for treatment.

6.5 URGENT CARE SETTINGS

Physician services rendered in urgent care centers or similar settings that are not part of a licensed hospital are covered. Coverage is based on the appropriate office or other outpatient services E/M procedure codes. Coverage for any additional professional services rendered in these settings follows CPT guidelines.
SECTION 7 – MATERNITY CARE AND DELIVERY SERVICES

Medicaid covers maternity care and delivery services. The services normally provided in uncomplicated maternity cases include antepartum care, delivery, and postpartum care. These services are included in the global obstetrical package. The global obstetrical package is covered when one physician or physician group practice provides the obstetric care to a beneficiary. The global obstetrical package is covered as long as the provider or group has provided seven or more antepartum visits, the delivery, and the postpartum care. If less than seven antepartum visits are provided, report the global package with the modifier for reduced services and indicate the number of antepartum visits on the claim.

7.1 ANTEPARTUM CARE

Includes the initial and any subsequent history, physical examinations, recording of weight, blood pressures, fetal heart tones, routine chemical urinalysis, and monthly visits up to 28 weeks gestation, biweekly visits to 36 weeks gestation, and weekly visits until delivery. Typically, if a beneficiary enrolls in the first trimester and delivers at term, she has about 13 antepartum visits. This varies depending on the actual start of antepartum care and the delivery date. If the total number of antepartum visits exceeds 13 due to a high-risk condition, the additional visits are covered when using the appropriate E/M codes with the diagnosis for the high-risk condition.

7.2 DELIVERY

Includes admission to the hospital, the admission history and physical examination, management of uncomplicated labor, and delivery. All hospital visits within 24 hours of delivery are generally considered part of the global package. If the beneficiary is admitted more than 24 hours before delivery and stays more than 24 hours, then hospital care rendered prior to the day of delivery is covered separately as an E/M code. Medical problems complicating labor and delivery management that require additional resources are also covered separately.

7.3 POSTPARTUM

Includes all the visits following a delivery, both in the hospital and in the office. Services provided by physicians within the same group practice are considered as provided by the primary physician responsible for the beneficiary’s overall obstetrical care.

7.4 OBSTETRICAL PACKAGE VS. COMPONENTS

If the same physician or group practice does not provide all of the obstetric care, Medicaid covers the portion of the care provided by each provider. Postpartum care or antepartum care is covered separately if provided by a different physician or group than the physician providing the delivery services. To be consistent with some commercial payers and Medicare, the physician or group providing the entire global obstetrical package may choose to report either the entire global package or may report the antepartum care, delivery, and postpartum care separately as each of these services is provided. Combinations of these components must be allowable under Medicaid NCCI editing. Components such as the antepartum care or postpartum care cannot be unbundled into individual visits.
Services that are not included in the global package include:

- Maternal or fetal echography or fetal echography procedures
- Fetal biophysical profile
- Chorionic villus sampling, any method
- Fetal contraction stress test
- Fetal nonstress test
- Hospital and observation care visits for premature labor (prior to 36 weeks gestation)

7.5 HIGH-RISK PREGNANCY

High-risk pregnancies are those with complicating conditions that are life-threatening to either the mother or fetus and, therefore, require more services than those provided in a routine pregnancy. When high-risk pregnancies require more visits than described for routine obstetrical care and more laboratory data than normally required, the additional services are covered in addition to the global obstetrical package. If beneficiary visits are required due to conditions unrelated to the pregnancy, they are also covered in addition to the global obstetrical package. Medicaid follows CPT guidelines for reporting high-risk pregnancy services.

7.6 MULTIPLE GESTATION

In the case of multiple gestation, Medicaid covers the services provided. Payment follows the multiple procedure rules. (Refer to the Billing & Reimbursement for Professionals Chapter, Maternity Care Services subsection, for additional information.) Providers must use a diagnosis code representing multiple gestation.

7.7 OB ENHANCED PAYMENTS

MDHHS provides an enhanced payment for each Medicaid delivery performed. This additional reimbursement is added to the fee reimbursed under FFS for the global maternity and delivery procedure codes. The maternity case rate paid to MHPs is also enhanced.

7.8 MATERNITY OUTPATIENT MEDICAL SERVICES PROGRAM

Under the Maternity Outpatient Medical Services (MOMS) program, pregnant women can enroll and receive pregnancy related care early in the pregnancy. Refer to the MOMS Chapter for additional information.

7.9 LACTATION SUPPORT SERVICES

Medicaid will reimburse for evidence-based lactation support services provided to Medicaid eligible postpartum women in the outpatient setting up to and through 60 days post-delivery. Services must be rendered by a licensed, qualified health professional as outlined. A maximum of two visits per pregnancy will be reimbursed for either a single or multiple gestation pregnancy. One visit is reimbursable per date of service.
7.9.A. PROVIDER CRITERIA

Lactation support and counseling services must be rendered by an Internationally Board Certified Lactation Consultant (IBCLC) credentialed by the International Board of Lactation Consultant Examiners (IBLCE) with possession of a valid and current IBCLC certification.

Rendering IBCLC providers must be Medicaid-enrolled physicians, nurse practitioners, physician assistants or nurse midwives. When a Medicaid-enrolled practitioner provides delegation and supervision, within the confines of his/her scope of practice, to an individual with possession of a valid and current IBCLC certification, that Medicaid-enrolled health professional may bill for comprehensive lactation support services.

For all IBCLC rendered services, a copy of the current, valid IBCLC certification is to be maintained by the supervising physician or employing organization, where applicable, in accordance with the record keeping requirements of the Medicaid program.

7.9.B. COVERED SUPPORTS AND SERVICES

Comprehensive lactation counseling services must include the following:

- A face-to-face encounter with the beneficiary lasting a minimum of 30 minutes.
- Comprehensive maternal, infant and feeding assessment related to lactation.
- Provision of evidence-based interventions that, at a minimum, include:
  - Instruction in positioning techniques and proper latching to the breast;
  - Counseling in nutritive suckling and swallowing, milk production and release, frequency of feedings, and reasons to contact a health care professional; and
  - The provision of community support resource referrals, such as the Women, Infants, and Children (WIC) program, as indicated.
- Evaluation of outcomes from interventions.

Documentation must include a begin time and end time of services and a comprehensive description of the professional interventions provided. Documentation may be subject to review and post-payment audit.

Prenatal lactation education and support services are provided as part of the curriculum of childbirth education programs and will not be separately reimbursed. Reimbursement for lactation education and support received by beneficiaries post-delivery in the inpatient hospital is included in the inpatient hospital payment and will not be separately reimbursed.

Refer to the Billing & Reimbursement for Professionals Chapter of this manual for additional billing information.
7.10 MATERNAL INFANT HEALTH PROGRAM

Maternal Infant Health Program (MIHP) provides preventive health services that are delivered by certified MIHP agencies to high-risk pregnant women and infants born to high risk mothers. The purpose of MIHP is to reduce infant morbidity and mortality. The goal is to deliver a healthy, full term infant. Refer to the Maternal Infant Health Program Chapter for additional information about this program.
SECTION 8 — PHARMACY

A practitioner must report his individual National Provider Identifier (NPI) with a prescription order. An emergency room practitioner must report his individual NPI with a prescription order. Each practitioner at a teaching hospital must report his individual NPI with a prescription order that is submitted to the dispensing pharmacy. A prescription or prescription order must comply with state and federal laws.

Refer to the Pharmacy Chapter of this manual for additional information.
SECTION 9 — RADIOLYT, RADIATION THERAPY AND NUCLEAR MEDICINE

9.1 RADIOLOGY AND DIAGNOSTIC IMAGING SERVICES [TITLE & OTHER CHANGES MADE 4/1/19]

Medically necessary radiological services are covered when ordered by a qualified practitioner to diagnose or treat a specific condition based on the beneficiary’s signs, symptoms, and past history as documented in the medical record. Radiology services include diagnostic imaging services and therapeutic radiology services such as proton beam therapy, nuclear medicine, computed tomography (CT) procedures, magnetic resonance imaging (MRI) services, diagnostic ultrasound, and other diagnostic and therapeutic services. Practitioners are required to perform or interpret radiologic services within their professional expertise and education within the confines of federal and State law. It is the expectation that practitioners conform with professional practice parameters and technical standards to ensure the most efficacious use of radiology and the delivery of safe, quality care. Medical need for all services must be documented in the medical record and is subject to post-payment review. (revised 4/1/19)

9.1.A. GLOBAL/COMPONENT SERVICES

Global services are covered for the physician in non-facility settings or the professional component is covered for the physician in any setting. The technical component is only covered when the service is provided in an appropriate non-facility setting. The global service and its professional component service cannot both be covered for the same service since the professional component is included in the global service.

When a physician reports a global procedure, the physician is responsible for the overall performance and quality of the test. The physician must either personally perform the test or it must be performed under the physician’s supervision and direction. The physician must personally interpret the results and complete the written report. While some radiology procedures and diagnostic tests may not require the presence of the supervising physician on the premises, other procedures dictate that the physician be present and may even need to be directly involved in the performance of the procedure.

Interpretation of radiology services are covered for any physician trained in the interpretation of the study. The provider who interprets the study must be the one who evaluates the study and prepares and signs the written report for the medical record. Review of results and explanation to the beneficiary are part of the attending physician’s E/M service and are not considered as interpretation of the study.

9.1.B. MULTIPLE SERVICES ON SAME DAY [CHANGE MADE 4/1/19]

Medicaid covers bilateral x-rays when medically necessary. Bilateral services are studies done on the same body area, once on the right side and once on the left side. Comparison films obtained for routine purposes are not covered. Providers should use a bilateral code when available. Medicaid also covers multiple studies of both areas if reported with the appropriate modifier. Examples would include bilateral wrist studies done before and after fracture care on both wrists the same day for the same patient or doing films to assess a patient’s response to medical care, such as multiple chest films to monitor the cardiopulmonary status of a critically ill patient.
### Contiguous Areas

Studies of contiguous areas, such as the wrist and hand, lumbosacral spine and pelvis, ankle and foot, are covered on the same day when medically necessary to visualize each space. The medical record must support the need for individual studies. If cervical, lumbosacral and thoracic views are performed, an entire spine study should be reported.

### Screening Mammography

Screening mammography is covered according to the American Cancer Society guidelines. Women age 40 and older should have annual breast cancer screening consisting of a clinical breast examination and a mammogram.

### Transrectal or Prostate Ultrasound

Transrectal or prostate ultrasound is covered when the patient is considered at high risk for prostate cancer. It is also covered for pathologic indications that include evaluation of prostatic nodule(s) or abnormalities of the seminal vesicles, staging of prostatic cancer, and monitoring of response to therapy for prostatic cancer.

### CT, MRI, PET Scans

For CT, MRI and PET scans to be covered, all conditions of Certificate of Need (CON) must be met. These services are subject to standards for provision of the service that include specific staff and designation of who is qualified to interpret the results.

Radiographic images, including CT or MRI studies of the same anatomical area, *(revised 4/1/19)* are covered on the same day when medically indicated. The provider is responsible for using the most appropriate diagnostic test(s) according to current standards of practice. A CT and a myelogram may be covered on the same day; however, an MRI and a myelogram are not covered separately if done on the same day. Coverage of a CT of the spine is limited to one level per day, and coverage of an MRI is limited to two levels of the spine on the same day. Providers should be directing the study at the area of the suspected problem.

CT and MRI scans may be done with or without contrast media or both. When a scan is done without contrast followed by another with contrast, only the full service is covered. The global RVUs for CT and MRI contrast scans include allowance for high osmolar contrast media, and the RVUs for global MRIs include allowance for paramagnetic contrast media.

In certain instances, the use of low osmolar contrast media (LOCM) is separately covered. In the case of intra-arterial and intravenous radiological procedures, LOCM is covered separately for nonhospital patients with one or more of the following:

- A history of previous adverse reaction to contrast material, with the exception of a sensation of heat, flushing, or a single episode of nausea or vomiting;
- A history of asthma or allergy;
- Significant cardiac dysfunction, including recent or imminent cardiac decompensation, severe arrhythmia, unstable angina pectoris, recent myocardial infarction, and pulmonary hypertension;
- Generalized severe debilitation; or
- Sickle cell disease.

If the patient does not meet any of these criteria, the contrast media is considered bundled into the global service and is not covered separately.

When high dose contrast technique is used with MRI, the global service is covered for the procedure designated without contrast, then with contrast. The third MRI (again with contrast) is not covered separately. The contrast material used in the second MRI procedure is not covered separately; however, the contrast material for the third MRI procedure is covered separately.
Obstetrical ultrasound studies are covered in addition to the global obstetrical package. More than two studies are covered only for high-risk conditions such as bleeding, placental abnormalities, fetal post-maturity, etc. The need for the additional studies, including the change in clinical symptoms, must be documented. Pelvic ultrasounds are not covered to diagnose pregnancy or vaginal infections. The use of ultrasound studies for routine fetal age determination in or preparatory for pregnancy termination procedures is considered part of the termination procedure and is not covered separately.

9.2 RADIATION THERAPY

Medicaid covers medically necessary radiation therapy services provided to beneficiaries. CPT/HCPCS guidelines for radiation therapy services are followed.

Following the Medicare guidelines, many services are bundled into the treatment management codes and are not covered separately when the diagnosis is related to the weekly treatment diagnosis and the services are provided by the radiation oncologists or in conjunction with the therapy. The following services are included in the weekly treatment management service:

- Anesthesia
- Care of infected skin
- Checking treatment charts
- Continuing-care patient evaluation and examination
- Final medical examination
- Nutritional counseling
- Pain management
- Medical prescription
- Review and revision of the treatment plan
- Routine medical management of related problems
- Special care of ostomy
- Verification of dosage
- Written reports, progress notes
- Follow-up examination and care 90 days after the last treatment

Medicaid separately covers services furnished by a radiation physicist only when provided to a nonhospital beneficiary in a freestanding facility.

Professional services provided to hospital patients are covered only when personally performed by a physician.

Global physician services are only covered if provided in a freestanding, nonhospital setting.
9.3 NUCLEAR MEDICINE [CHANGE MADE 4/1/19]

Medicaid covers medically necessary nuclear medicine procedures. Providers are responsible for complying with Federal and State law (revised 4/1/19) requirements. Only professional services rendered to hospital patients are covered for the practitioner.

Medicaid covers global services when provided in a freestanding, nonhospital setting. Radionuclides used in the procedures are covered separately.

When specific nuclear medicine diagnostic procedures are performed, multiple procedure coverage rules apply. Generation and interpretation of automated data is covered as a part of the primary procedure.

9.4 TRANSPORTATION AND SET-UP OF PORTABLE X-RAY EQUIPMENT

The transportation of portable x-ray equipment, set-up, and personnel is covered when furnished in a place or residence used as the patient's home as reported by the corresponding HCPCS code. These services must be provided under the order and general supervision of a physician. No transportation charge is payable unless the portable x-ray equipment was actually transported to the location where the x-ray was taken. For patients residing in a nursing facility, the transportation, set-up and personnel costs are included in the nursing facility's per diem rate and not separately reimbursable. (Refer to the Nursing Facility Chapter of this manual for additional information.)

If only one patient is served, report the appropriate HCPCS code. When more than one patient is served during a single trip to the same location, report the appropriate HCPCS code with the appropriate Level II HCPCS modifier (UN, UP, UQ, UR, US) relative to the number of patients served, irrespective of their insurance. Total payment for services will be adjusted by the number of patients.
SECTION 10 – HOSPITAL INPATIENT PHYSICIAN SERVICES

Medicaid covers physician services to hospital inpatients that are medically necessary and follow the requirements in this section.

10.1 VENTILATION MANAGEMENT

Ventilation management provided in the inpatient hospital setting is covered separately unless an E/M service is provided on the same day.

10.2 CRITICAL CARE

Medicaid covers critical care consistent with the CPT/HCPCS definitions and guidelines. Each day that critical care is provided, the medical record must support the level of service provided. The actual time spent with the patient delivering critical care services must be documented in the medical record.

10.3 RESPIRATORY CARE

Medicaid covers respiratory care as a separate service in the inpatient hospital setting for the anesthesiologist/physician who initiates respiratory care by setting up the respirator, placing the beneficiary on the respirator, and providing daily supervision of the beneficiary for the respiratory care alone.

10.4 STANDBY SERVICES

Medicaid does not cover the services of a standby surgeon, anesthesiologist or surgical team. Only direct beneficiary care is covered. Physician standby services are covered as a part of the hospital services.
SECTION 11 – SURGERY – GENERAL

Medicaid covers medically necessary surgical procedures.

11.1 GLOBAL SURGERY

Coverage for the global surgery package includes related services that are furnished by the physician who performs the surgery or by members of the same group with the same specialty. Medicaid policy is based on CMS guidelines for Medicare services for the global surgery package.

11.1.A. SERVICES INCLUDED IN THE GLOBAL SURGERY PACKAGE

- Pre-operative visits beginning with the day before the surgery for major surgeries and the day of the surgery for minor surgeries.
- Intra-operative services that are a usual and necessary part of a surgical procedure.
- Complications following surgery. This includes all additional medical or surgical services required of the surgeon during the post-operative period due to complications that do not require return to the operating room. The surgeon’s visits to a patient in an intensive care or critical care unit are also included.
- Follow-up visits within the post-operative period related to recovery from the surgery.
- Post-surgical pain management by the surgeon.
- Supplies for certain services furnished in a physician's office.
- Miscellaneous services and items such as dressing changes, local incisional care, removal of operative pack, removal of cutaneous sutures and staples, lines, wires, tubes, drains, casts, and splints; insertion, irrigation and removal of urinary catheters, routine peripheral intravenous lines, nasogastric and rectal tubes, and changes and removal of tracheostomy tubes.

11.1.B. SERVICES NOT INCLUDED IN THE GLOBAL SURGERY PACKAGE

- The surgeon’s initial consultation or evaluation of the problem to determine the need for surgery.
- The office or hospital visit to decide upon surgery if it occurs on the day before or the day of a major surgery.
- Other physicians’ services, except when the surgeon and the other physician(s) agree on the transfer of care. (The transfer of care agreement may be in the form of a letter or an annotation in the discharge summary, hospital records, or ambulatory surgical center records.)
- Visits unrelated to the diagnosis for which the surgical procedure was performed.
- Treatment of the underlying condition or an added course of treatment that is not part of the normal recovery from surgery.
- Diagnostic tests and procedures, including diagnostic radiology procedures.
- Clearly distinct surgical procedures that are not repeat procedures, or treatment for complications during the post-operative period. A new post-operative period begins with the subsequent procedure.
- Staged procedures done in two or more parts for which the decision to stage the procedure is made prospectively or at the time of the first procedure. Examples include procedures to diagnose and treat epilepsy in succession within 90 days of each other.
- Laser eye surgeries (and all other services whose CPT/HCPCS description includes one or more sessions) performed in a series over a period of weeks or months are not considered staged procedures. All sessions during the post-operative period of the first session are covered as a part of the global package.
- Chemotherapy and/or radiation therapy following cancer surgery.
- Treatment for post-operative complications that requires a return to the operating room. For this purpose, an operating room is a place of service specially equipped and staffed for the sole purpose of performing surgical procedures, including a cardiac catheterization suite, a laser suite, and an endoscopy suite. Not included is a patient's room, a minor treatment room, a recovery room, or intensive care unit unless the patient's condition is so critical there is insufficient time for transportation to an operating room.
- A second, more extensive procedure when a less extensive procedure fails.
- A therapeutic service that is required during the post-operative period of a diagnostic service. Example: A D&C followed by a therapeutic hysterectomy performed during the D&Cs global period.
- Immunosuppressive therapy for organ transplants.
- Critical care services unrelated to the surgery when a seriously injured or burned patient is critically ill and requires constant attendance of the physician.
- Visits that are a significant, separately identifiable service on the same day as a minor surgery or endoscopy. For example, a visit for a full evaluation of a lump in the breast on the same day as a removal of a lesion on the back.
- When a beneficiary is returned to the operating room for treatment of complications, only the intra-operative portion of the service is covered.

11.2 PARTIAL GLOBAL PACKAGE

Services of physicians furnishing less than the full global surgery package are covered. Modifiers are used to identify the portion of the global surgery package that is covered separately when performed by different physicians under certain circumstances. Only procedures with 10- or 90-day global periods are eligible for partial global surgery package coverage.

Surgeons should use the modifier for surgical care only when another physician provides all or part of the outpatient post-operative care. MDHHS assumes that the surgeon is responsible for pre-operative, intra-operative and inpatient hospital post-operative care at a minimum. The modifier for post-operative management only is used when a second physician provides all or part of the post-operative care after hospital discharge in the global package. Surgeons must transfer care to the second physician, and both must keep a copy of the written transfer agreement in the beneficiary's medical record.
11.3 Bilateral Surgery

Bilateral surgeries are procedures performed on both sides of the body during the same operative session or on the same day. The descriptions for some procedure codes include the terms "bilateral" or "unilateral or bilateral". The RVUs for these codes reflect the work involved if done bilaterally as the description states. Other procedure code descriptions do not include bilateral but may be performed bilaterally. The bilateral procedure modifier is used with these procedure codes.

Reimbursement for a bilateral procedure reported appropriately with modifier 50 is based on the lower of the amount billed or 150 percent of the fee screen for the procedure.

11.4 Multiple Surgical Procedures

Multiple surgeries are separate procedures performed by a physician on the same beneficiary during the same operative session or on the same day for which separate coverage may be allowed. Co-surgeons, surgical teams, or assistants at surgery may participate in performing multiple surgeries on the same beneficiary on the same day.

When the same physician performs multiple surgical procedures during one operative session, all services are covered separately. MDHHS follows CMS multiple surgery guidelines for coverage of the procedures. If an integral procedure (one that is part of a larger surgery and is necessary to perform the larger surgery) is performed, it is covered as a part of the larger procedure. If two or more physicians each perform distinctly different, unrelated surgeries on the same patient on the same day (e.g., in some multiple trauma cases), the procedures are covered separately.

Multiple surgery reimbursement policy applies to procedures performed during the same operative session or on the same day by the same physician or physicians of the same specialty in the same group practice. Medicaid reimburses up to 100 percent of the fee screen for the most complex surgical procedure and up to 50 percent of the fee screens for the second through the fifth surgical procedures. If more than five multiple procedures are performed, an operative report must be provided with the claim.

11.5 Multiple Endoscopy Procedures

Multiple endoscopy procedures are reimbursed based on the full fee for the highest paid service, plus the difference between the next highest and the base endoscopy. When related endoscopies are performed on the same day as other endoscopies or other surgical procedures, the standard multiple surgery rules apply. The multiple surgery rules consider the coverage for the related endoscopies as one service, and any other unrelated endoscopy or procedure as another service.

11.6 Multiple Surgeons

Under some circumstances, the individual skills of two or more surgeons are required to perform surgery on the same beneficiary during the same operative session. This may be required due to the complex nature of the procedures or the beneficiary’s condition. Medicaid reimbursement policy is based on CMS guidelines for Medicare services for multiple surgeons.
11.7 CO-SURGEONS

Two surgeons who work together as primary surgeons performing distinct parts of a total service are considered co-surgeons. The medical record must contain sufficient documentation supporting the medical necessity for co-surgeons. Report the modifier indicating two surgeons for the services furnished by each co-surgeon. The primary procedure is reimbursed at the full screen times 62.5 percent. Second and subsequent services are paid at 50 percent of the full-allowed amount times 62.5 percent.

11.8 TEAM SURGEONS

Three or more surgeons who work together as primary surgeons to perform a specific procedure are considered team surgeons. Sufficient documentation must be submitted with the claim to establish that a team was medically necessary. If two or more surgeons are of the same specialty, the reason each was needed must be documented also. Report the surgical team modifier when billing for services rendered by each team surgeon. Each surgeon’s dictated operative report must be included with the claims. Reimbursement is based on individual consideration.

11.9 ASSISTANT AT SURGERY/ASSISTANT SURGEON

Medicaid covers assistant at surgery services for designated surgical procedures. Assistant at surgery services must be considered reasonable and necessary for the surgery performed. An assistant at surgery actively assists the primary surgeon during the surgical procedure. Coverage for assistant at surgery services is not allowed when co-surgeons or team surgeons are utilized.

Medicaid does not cover assistant surgeon services in a teaching hospital setting unless a qualified resident is not available. The medical record must document the circumstances causing the unavailability of a qualified resident. The surgical procedure is reported with appropriate modifier identifying use of an assistant surgeon.

Medicaid covers assistant at surgery services performed by a second physician, a physician’s assistant, or a nurse practitioner (NP). Physician’s assistant and NP services as assistant at surgery must be under the delegation and supervision of the physician employing the physician’s assistant or NP, or a physician employed by the same group practice that employs the physician’s assistant or NP. If the physician’s assistant and/or NP are employees of the hospital, their services are covered as a part of the hospital charges.

11.10 SURGEONS PERFORMING DISTINCTLY DIFFERENT UNRELATED PROCEDURES

If two or more physicians each perform distinctly different, unrelated surgeries on the beneficiary on the same day, the payment adjustment rules for multiple surgeries or co-surgeons do not apply. In such cases, the multiple procedures modifier should not be used unless one of the surgeons individually performs multiple surgeries.

11.11 VISION PROCEDURES AND CARE

Ophthalmologists may transfer post-operative care associated with cataract removal or insertion of intraocular lens prosthesis to an optometrist. In this case, the ophthalmologist who performs eye surgery but does not provide the post-surgical care must report the surgical care only modifier with the surgery procedure code. This includes the pre-operative care, the surgery, and any in-hospital post-operative
care. Post-operative care after hospital discharge is covered separately for the provider that the care was transferred to using the surgery code with the post-operative management only modifier.

Surgical procedure descriptions that include the phrase "one or more sessions" include all sessions. These procedures include the 90-day global period during which the procedure(s) can be completed in one or more session(s). These procedures include trabeculoplasty by laser surgery, iridotomy/iridectomy by laser or photocoagulation, repair of retinal detachment, destruction of retinal or choroid lesions. The code description in CPT identifies when one or more sessions are included. Separate coverage for a second or subsequent session of the same procedure during the global period of the initial service is limited to cases where the modifier reported with the procedure code indicates that services were performed on different eyes.
SECTION 12 – SURGERY - SPECIAL CONSIDERATIONS

12.1 ABORTIONS

Medicaid only covers an abortion performed by a physician and related hospital charges (e.g., room, supplies) when it has been determined medically necessary to save the life of the mother or the pregnancy is the result of rape or incest. Medicaid funding is not available for any elective therapeutic abortion or service related to the performance of such abortion unless one of these criteria has been met.

Physicians must certify on a completed Certification for Induced Abortion form (MSA-4240) that, for medical reasons, an abortion was necessary to save the life of the mother or the beneficiary’s medical history indicates that the terminated pregnancy was the result of rape or incest.

The physician who completes the MSA-4240 must also ensure completion of the Beneficiary Verification of Coverage form (MSA-1550) and is responsible for providing copies of the forms for billing purposes to any other provider (e.g., anesthesiologist, hospital, laboratory) that would submit claims for services related to the abortion.

Copies of the MSA-4240 and the MSA-1550 are not required for claims for ectopic pregnancies or spontaneous, incomplete, or threatened abortions.

Providers may attach copies of the MSA-4240 and the MSA-1550 to the claim or submit them via fax.

Federal regulations require that these forms be submitted to Medicaid before reimbursement can be made for any abortion procedure. This process can eliminate submitting paper attachments for abortion claims and pre-confirms the acceptability of the completed forms, as well as reduces costly claim rejections.

The medical record must include a complete beneficiary history, including the medical conditions that made the abortion necessary to save the life of the mother. When the pregnancy is the result of rape or incest, the medical record must include the circumstances of the case and that the pregnancy was the result of rape or incest.

(Refer to the Forms Appendix for copies of MSA-4240 and MSA-1550. The forms are also available on the MDHHS website. Refer to the Directory Appendix for website and contact information.)

12.2 BREAST RECONSTRUCTION SURGERY

Medicaid covers breast reconstruction surgery following the diagnosis and treatment of breast cancer. Covered services include procedures related to the affected and the contralateral unaffected breast following a medically necessary mastectomy. The prior authorization requirements for these specified breast reconstruction procedure codes are waived when billed with appropriate ICD breast cancer diagnosis codes. The specified CPT codes subject to this PA waiver are identified in the Medicaid Code and Rate Reference tool. (Refer to the Directory Appendix for website information.)
12.3 COSMETIC SURGERY

Medicaid only covers cosmetic surgery if PA has been obtained. The physician may request PA if any of the following exist:

- The condition interferes with employment.
- It causes significant disability or psychological trauma (as documented by psychiatric evaluation).
- It is a component of a program of reconstructive surgery for congenital deformity or trauma.
- It contributes to a major health problem.

The physician must identify the specific reasons any of the above criteria are met in the PA request.

Physicians should refer to the General Information for Providers Chapter for specific information for obtaining authorization.

12.4 DESTRUCTION OF LESIONS

Medicaid covers destruction of lesions by methods such as electrocautery, cryocautery, laser, and surgery.

Coverage of the surgical destruction of lesions that involves more extensive procedures is limited to the hospital/facility setting. Less extensive procedures are covered in the office/non-facility setting. (Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding which procedures require a hospital/facility setting for coverage and which procedures are covered in the office/non-facility setting.) If a repeat procedure to the same lesion is necessary, it is covered as an office visit.

Chemocautery or chemical destruction of any lesion, such as the use of a nitrate stick or podophyllin, is covered as a part of the office visit.

12.5 HYSTERECTOMY

Hysterectomies are covered only if the beneficiary has been informed orally, prior to surgery, that a hysterectomy will render her permanently incapable of reproducing. The beneficiary or her representative must sign a written acknowledgment of receipt of that information. The Acknowledgment of Receipt of Hysterectomy Information (MSA-2218) serves as the written acknowledgment.

All items on the MSA-2218 must be completed and the form must be signed by the beneficiary (or representative) and the physician (MD or DO).

Federal regulations prohibit Medicaid coverage for hysterectomies performed solely for the purpose of sterilization. Hysterectomies are also prohibited when performed for family planning purposes even when there are medical indications, which alone do not indicate a hysterectomy.
12.5.A. EXCEPTIONS

The MSA-2218 is not required in the following situations:

- The beneficiary was already sterile before the hysterectomy.
- The beneficiary requires a hysterectomy because of a life-threatening emergency situation. It was not possible for the physician to inform the beneficiary in advance that the surgery would make her permanently incapable of reproducing.
- The hysterectomy (as covered according to Medicaid policy) was performed during a period of retroactive eligibility.

12.5.B. ACKNOWLEDGEMENT OF RECEIPT OF HYSTERECTOMY INFORMATION

Providers may attach a copy of the MSA-2218 to the claim or submit the MSA-2218 via fax.

Federal regulations require that this form be submitted to Medicaid before reimbursement can be made for any hysterectomy procedure. This process can eliminate submitting paper attachments for hysterectomy claims and pre-confirms the acceptability of the completed acknowledgement form, as well as reduces costly claim rejections.

(Refer to the Forms Appendix for a copy of MSA-2218. The form is also available on the MDHHS website. Refer to the Directory Appendix for website and contact information.)

12.5.C. PROCEDURE FOR ACKNOWLEDGEMENT OF RECEIPT OF HYSTERECTOMY INFORMATION APPROVAL

- The provider who obtains the required Acknowledgement completes a cover sheet (typed or printed) which must include: beneficiary name, beneficiary Medicaid ID number, provider’s contact person, provider fax number, and provider phone number.
- Fax the cover sheet and completed acknowledgement form to the Medicaid Payments Division, Hysterectomy Acknowledgement Form Approval. (Refer to the Directory Appendix for contact information.) Do not fax invoices.
- The form is reviewed within five working days, and a notice of errors or acceptance is returned to the provider. When notified that the acknowledgement form has been accepted and is on file, inform the other providers via a copy of the response. All invoices related to the service may be submitted without attachments.
- If there is no response within five working days:
  - Confirm that the fax is working.
  - Be sure that the cover sheet included the necessary information for Medicaid staff to respond to the provider.
  - Resend the information if necessary.
12.6 ORGAN TRANSPLANTS

Medicaid covers organ transplants and related services if all requirements for these services are met. PA is required for all beneficiary, donor, and potential donor services related to all organ transplants except cornea and kidney transplants. If transplantation of additional organ(s) is to occur during the same operative session as a cornea or kidney transplant, PA is required.

Prior to surgery, the beneficiary must be evaluated at an accepted transplant center approved by the Office of Medical Affairs (OMA) to determine if he is a good transplant candidate. The attending physician must obtain the PA for this evaluation. If the beneficiary is accepted as a transplant candidate, the PA for the evaluation also covers the transplant and related services.

12.7 STERILIZATION

Medicaid covers sterilization procedures when specific requirements are met. Medicaid defines a sterilization procedure as any medical procedure, treatment, or operation for the purpose of rendering an individual (male or female) permanently incapable of reproducing. Surgical procedures performed solely to treat an injury or pathology are not considered sterilizations under Medicaid’s definition of sterilization, even though the procedure may result in sterilization (e.g., oophorectomy). The physician is responsible for obtaining the signed Consent for Sterilization (MSA-1959/HHS-687).

Sterilizations are only covered if all of the following are met:

- The beneficiary is at least 21 years of age at time of informed consent.
- The beneficiary is not legally declared to be mentally incompetent.
- The beneficiary is not institutionalized in a corrective, penal, or mental rehabilitation facility.
- Informed consent is obtained.
Informed consent is not obtained while the beneficiary is in labor or childbirth; seeking to obtain or obtaining an abortion; or under the influence of alcohol or other substances that affect the beneficiary's state of awareness.

Informed consent must be obtained not less than 30 days nor more than 180 days prior to sterilization.

The only exception is in the case of premature delivery or emergency abdominal surgery. If the premature delivery or emergency abdominal surgery occurred before the 30-day waiting period is over, at least 72 hours must have passed between the time of obtaining informed consent and the sterilization procedure.

In cases of premature delivery, informed consent must have been given at least 30 days before the expected delivery date. The consent form must indicate the expected date of delivery.

In cases of abdominal surgery, the emergency nature of the surgery must be clearly identified (e.g., diagnosis, physician's statement, or hospital summary). The nature of the emergency must be included on the consent form.

**12.7.A. INFORMED CONSENT PROCESS**

The following procedures must be included in the process of informed consent:

- The beneficiary must be advised that the sterilization will not be performed for at least 30 days after the MSA-1959/HHS-687 is signed, except in cases of emergency abdominal surgery or premature delivery.
- The person who obtains informed consent must offer to answer any questions the beneficiary may have concerning the procedure.
- Suitable arrangements must be made to ensure that information is effectively communicated to the deaf, blind, or otherwise handicapped.
- An interpreter must be provided if the beneficiary does not understand the language used on the consent form or the language used by the person obtaining informed consent.
- The beneficiary is permitted to have a witness of his choice present when informed consent is obtained.
- At the time of the informed consent, a copy of the consent form must be given to the beneficiary.

All of the following sterilization information and advice must be presented orally to the beneficiary both at the time the beneficiary signs the MSA-1959/HHS-687 and again by the physician performing the sterilization shortly before the procedure (e.g., during the pre-operative examination):

- Advice that the beneficiary is free to withhold or withdraw consent to the procedure at any time before the sterilization without affecting the right to future care or treatment and without loss or withdrawal of any federally funded program benefits to which the beneficiary might be otherwise entitled.
- A description of available alternative methods of family planning and birth control.
- Advice that the sterilization procedure is considered to be irreversible.
- A thorough explanation of the specific sterilization procedure to be performed.
- A full description of the discomforts and risks that may accompany or follow the procedure, including an explanation of the type and possible effects of any anesthetic to be used.
- A full description of the benefits or advantages that may be expected as a result of the sterilization.

The beneficiary, the person who obtained the consent, and the interpreter (if required) must sign the MSA-1959/HHS-687 not less than 30 days nor more than 180 days prior to the sterilization. The physician performing the sterilization must also sign and date the MSA-1959/HHS-687 after the sterilization has been performed.

No additional reimbursement is allowed for the examination or the sterilization explanation.

If the procedure occurs in a place other than that in which the consent form is signed (e.g., forms were signed in the physician's office, but the procedure will be rendered in the hospital), the person obtaining consent must send a copy of the completed form to the place of surgery. The second provider (e.g., hospital) is responsible for acquiring the physician's statement (if not previously documented) and for photocopying the signed form and supplying copies to any other Medicaid provider who is billing as a participant in the sterilization.

A copy of the completed MSA-1959/HHS-687 is required for coverage of charges related to a sterilization procedure. This form may be faxed or attached to the claim form.

### 12.7.B. CONSENT FOR STERILIZATION FORM

Providers may attach a copy of the Consent for Sterilization (MSA-1959/HHS-687) form to the claim or submit the MSA-1959/HHS-687 via fax.

Federal regulations require that this form be submitted to MDHHS before reimbursement can be made for any sterilization procedure. This process can eliminate submitting paper attachments for sterilization claims, and pre-confirms the acceptability of the completed consent form.

(Refer to the Forms Appendix for a copy of MSA-1959/HHS-687. Refer to the Directory Appendix for website and contact information.)

### 12.7.C. PROCEDURE FOR CONSENT FOR STERILIZATION FORM APPROVAL

- The provider who obtains the required Consent and completed MSA-1959/HHS-687 completes a cover sheet (typed or printed) which must include: beneficiary name, beneficiary Medicaid ID number, provider's contact person, provider fax number, and provider phone number.
Fax the cover sheet (according to Document Management Portal instructions) and completed MSA-1959/HHS-687 to the Medicaid Payments Division, Sterilization Consent Form Approval. (Refer to the Directory Appendix for contact information.) Do not fax invoices.

The MSA-1959/HHS-687 is reviewed within five working days, and a notice of errors or acceptance is returned to the provider. When notified that the MSA-1959/HHS-687 has been accepted and is on file, inform the other providers via a copy of the response. All invoices related to the service may be submitted without attachments.

Providers may then submit claims (either electronic or hard copy) to Medicaid. The remarks section or appropriate electronic segment must include the statement "Consent on File."

When sterilization claims are received with this information in the remarks section, consent form edit requirements are forced if the submitted invoice matches the consent form on file.

If there is no response within five working days:

- Confirm that the fax is working.
- Be sure that the cover sheet included the necessary information for Medicaid staff to respond to the provider.
- Resend the information if necessary.

12.7.D. REVERSAL OF STERILIZATION

Services to reverse a previous sterilization are not covered by Medicaid.
SECTION 13 – DURABLE MEDICAL EQUIPMENT/ORTHOTICS/PROSTHETICS

Refer to the Medical Supplier Chapter of this manual for additional information.
SECTION 14 – BEHAVIORAL HEALTH AND SUBSTANCE USE DISORDER SERVICES

14.1 BEHAVIORAL HEALTH SERVICES

Medicaid covers behavioral health services for diagnostic or active treatment purposes. Behavioral health services are covered by the local PIHP/CMHSP for services included under the capitation payments to the PIHPs/CMHSPs. (Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter for additional information.) For services not included in the capitation payments to the PIHP/CMHSP, behavioral health services are covered through Medicaid Health Plans or FFS Medicaid. Under FFS, behavioral health services may be provided by a physician (MD or DO), psychologist, social worker, professional counselor, or marriage and family therapist (as defined in the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter, Non-Physician Behavioral Health Appendix). (Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding covered services.)

Beneficiaries enrolled in an MHP will receive behavioral health services through the health plan. (Refer to the Medicaid Health Plans Chapter of this manual for additional information.)

(Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter of this manual for services covered by the PIHPs/CMHSPs and authorization requirements.)

<table>
<thead>
<tr>
<th>Psychological Testing</th>
<th>Medicaid covers psychological testing that is reasonable and necessary for diagnosing the beneficiary's mental or developmental status and strengths and needs. If a beneficiary requires psychological testing more than once per year, documentation of medical necessity must be maintained in the medical record. Psychological testing must be ordered by a physician (MD or DO) and may be performed by a psychologist who is fully licensed, limited-licensed, or temporary limited-licensed. This order must be kept in the beneficiary's clinical record. Supervision of limited-licensed and temporary limited-licensed psychologists must comply with the requirements of Michigan Public Act 368 of 1978, as amended.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Inpatient Psychiatric Admissions</td>
<td>Inpatient stays in a psychiatric unit of a general hospital are covered for beneficiaries of any age. Inpatient treatment, including related psychiatric visits, in a freestanding psychiatric hospital, both private and state owned, is limited to eligible beneficiaries under age 21, and age 65 and older. If the beneficiary was an inpatient immediately prior to attaining age 21, he would be eligible to continue as an inpatient until age 22. If the beneficiary is discharged at some time following his 21st birthday, coverage terminates on the discharge date. All psychiatric admissions and continued stays must be authorized by the local PIHP/CMHSP. (Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter of this manual for specific coverages and authorization requirements.)</td>
</tr>
</tbody>
</table>
Psychiatric Partial Hospitalization

Psychiatric coverage includes partial hospitalization on a day-care or night-care plan for all beneficiaries, regardless of age. To be eligible for partial hospitalization, the beneficiary must be receiving active psychiatric treatment provided under the direction of a psychiatrist.

All partial hospitalization admissions and continued stays must be authorized by the local PIHP/CMHSP. (Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter of this manual for specific coverages and authorization requirements.)

14.2 SUBSTANCE USE DISORDER SERVICES

Most substance use disorder services provided to Medicaid beneficiaries are covered through the local PIHP/CMHSP. PIHPs/CMHSPs are responsible for direct payment for inpatient psychiatric or partial hospitalization services, related physician services, and specialized community mental health clinical and rehabilitation services that the PIHP/CMHSP has prior authorized. Providers should not bill MDHHS for these services.

Acute Care Detoxification

Acute detoxification services are reimbursed directly by MDHHS for both MHP enrollees and FFS beneficiaries.

Admission to the acute care setting for a diagnosis of substance use must meet at least one of the following criteria as reflected in the physician's orders and patient care plans:

- Vital signs, extreme and unstable
- Uncontrolled hypertension, extreme and unstable
- Delirium tremens, (e.g., confusion, hallucinations, seizures) or a documented history of delirium tremens requiring treatment
- Convulsions or multiple convulsions within the last 72 hours
- Unconsciousness
- Occurrence of substance abuse with pregnancy and monitoring the fetus is vital to the continued health of the fetus
- Insulin treated diabetes complicated by diabetic ketoacidosis
- Suspected diagnosis of closed head injury based on trauma injury
- Congestive heart disease or ischemic heart disease, or significant arrhythmia as examples of active symptomatic heart disease
- Suicidal ideation and gestures necessitating suicidal precautions as part of treatment
- Blood alcohol level 350 mg/dl with a diagnosis of alcohol abuse
- Blood alcohol level 400 mg/dl with diagnosis of alcohol dependence
- Active presentation of psychotic symptoms reflecting an emergent/urgent condition
### Additional Substance Use Disorder Services

Medicaid covers additional substance use disorder services through capitation payments to the PIHPs/CMHSPs. (Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter of this manual for coverage details and authorization requirements.)

### Office-Based Opioid Treatment (OBOT)

OBOT services are reimbursed directly by MDHHS for both MHP enrollees and FFS beneficiaries. Physician and non-physician practitioner (Physician Assistant [PA] and Nurse Practitioner [NP]) services related to opioid dependence may be reimbursed through the Medicaid Fee-for-Service (FFS) program.

Working within their scope of practice, physician and non-physician practitioner (PA and NP) services related to OBOT will be considered for reimbursement through the FFS program when the beneficiary meets the American Society of Addiction Medicine (ASAM) criteria for outpatient treatment. Providers are required to provide services consistent with clinical practice guidelines established by the Substance Abuse and Mental Health Services Administration (SAMHSA) and ASAM.

The following services related to opioid treatment qualify for FFS reimbursement when a beneficiary has a primary diagnosis of opioid dependence:

- Evaluation and Management services
- Consultation services

Physicians and non-physician practitioners (PA and NP) seeking FFS reimbursement for OBOT services must be enrolled in the Community Health Automated Medicaid Processing System (CHAMPS) as a FFS provider. Enrolled providers cannot duplicate and/or be reimbursed through the PIHP/CMHSP for the same service.

According to SAMHSA opioid treatment standards, use of medication with counseling is crucial to successful treatment for individuals with opioid dependence. Beneficiaries must be actively involved in their treatment and, as such, it is important that all providers coordinate care.

OBOT providers should ensure beneficiaries have access and receive referral to PIHPs for further assessment and treatment and any of the other supports and services that are available (i.e., PIHP specialty services, community based services, and natural supports). PIHP/CMHSP, FFS and Managed Care must partner in overseeing and coordinating the treatment plan knowing that OBOT is only part of the services necessary to achieve successful outcomes.

(Refer to the General Information for Providers Chapter for additional information on enrollment in CHAMPS.)
SECTION 15 – PRIVATE DUTY NURSING

Refer to the Private Duty Nursing Chapter of this manual for additional information.
**SECTION 16 — OUTPATIENT THERAPY**

Refer to the Therapy Services Chapter of this manual for additional information.
**SECTION 17 – TELEMEDICINE**

Telemedicine is the use of telecommunication technology to connect a patient with a health care professional in a different location. MDHHS requires a real time interactive system at both the originating and distant site, allowing instantaneous interaction between the patient and health care professional via the telecommunication system. Telemedicine should be used primarily when travel is prohibitive for the beneficiary or there is an imminent health risk justifying immediate medical need for services.

Providers must ensure the privacy of the beneficiary and the security of any information shared via telemedicine. The technology used must meet the needs for audio and visual compliance in accordance with current regulations and industry standards.

Telecommunication systems using store and forward technology, including asynchronous transmission of medical data or the use of robotics for remote access surgical procedures, are not included in this policy.

### 17.1 TELEMEDICINE SERVICES

The following services may be provided via telemedicine:

- ESRD-related services
- Behavior change intervention
- Behavioral Health and/or Substance Use Disorder Treatment
- Education Services, Telehealth
- Inpatient consultations
- Nursing facility subsequent care
- Office or other outpatient consultations
- Office or other outpatient services
- Psychiatric diagnostic procedures
- Subsequent hospital care
- Training service – Diabetes (Refer to the Diabetes Self-Management Education (DSME) Training Program subsection in the Hospital Chapter for specific program requirements)

Where face-to-face visits are required (such as ESRD and nursing facility related services), the telemedicine service may be used in addition to the required face-to-face visit, but cannot be used as a substitute. There must be at least one face-to-face hands-on visit (i.e., not via telemedicine) by a physician, nurse practitioner, or physician’s assistant per month to examine the vascular site for ESRD services. The initial visit for nursing facility services must be face-to-face.

Procedure code and modifier information is contained in the MDHHS Telemedicine Services Database available on the MDHHS website. (Refer to the Directory Appendix for website information.)
17.2 Authorization Requirements

There are no prior authorization requirements when providing telemedicine services for fee-for-service beneficiaries.

Authorization requirements for beneficiaries enrolled in Medicaid Health Plans (MHPs) may vary. Providers must check with individual MHPs for any authorization or coverage requirements.

17.3 Authorized Originating Sites

The originating site is the location of an eligible beneficiary at the time the service being furnished via a telecommunications system occurs.

The following are authorized as originating sites for telemedicine services:

- County mental health clinic or publicly funded mental health facility
- Federally Qualified Health Center (FQHC)
- Hospital (inpatient, outpatient, or critical access hospital)
- Office of a physician or other practitioner (including medical clinics)
- Hospital-based or CAH-based Renal Dialysis Centers (including satellites)
- Rural health clinic
- Skilled nursing facility
- Tribal Health Center (THC)

Information regarding billing for the originating site facility fee is contained in the Billing & Reimbursement for Institutional Providers and the Billing & Reimbursement for Professionals chapters. Providers at the originating site may bill services they provide on the same date as a service that is performed via telemedicine. The originating site provider is not limited to services listed on the Telemedicine Services database but must bill the medically necessary service they performed.

17.4 Distant Site

The location of the physician or practitioner providing the professional service via a telecommunications system is called the distant site. A medical professional is not required to present the beneficiary to the physician or practitioner at the distant site unless medically necessary. Providers at the distant site can only bill services listed in the Telemedicine Services database.

17.5 Authorized Practitioners

In compliance with the Michigan Insurance Code of 1956 (Act 218 of 1956), telemedicine services must be provided by a health care professional who is licensed, registered, or otherwise authorized to engage in his or her health care profession in the state where the patient is located.

The physician or practitioner at the distant site who is licensed under State law to furnish a covered telemedicine service (as described in the Telemedicine Services subsection) may bill, and receive payment for, the service when it is delivered via a telecommunications system.
If providing services through the PIHP/CMHSP, the provider must have a contract with or be authorized by the appropriate entity.

In order to be reimbursed for services, distant site providers must be enrolled in Michigan Medicaid.

When providing services via telemedicine, providers can only bill for services listed on the Telemedicine Services database. Procedure code and modifier information is contained in the MDHHS Telemedicine Services Database available on the MDHHS website. (Refer to the Directory Appendix for website information.)
**SECTION 18 – ANESTHESIOLOGIST ASSISTANT**

Medicaid covers anesthesia services provided by qualified anesthesiologist assistants (AAs). AA services are covered for the AA or for the entity with which the AA has an employment or contract relationship that provides for payment to be made to the entity.

For specific coverage parameters, refer to the Anesthesia Services section of this chapter.

To enroll as a Medicaid provider, an AA must meet all of the following requirements:

- Works under the delegation and direction of a Medicaid enrolled anesthesiologist.
- Is in compliance with all applicable requirements of State law.
- Is a graduate of a medical (MD or DO) school-based anesthesiologist assistant education program that:
  - Is accredited by the Committee on Allied Health Education and Accreditation; and
  - Includes approximately two years of specialized basic science and clinical education in anesthesia at a level that builds on a premedical undergraduate science background.
- Is currently certified by the National Commission for Certification of Anesthesiologist Assistants.
SECTION 19 – CERTIFIED REGISTERED NURSE ANESTHETIST

Medicaid covers anesthesia services provided by a Medicaid enrolled Certified Registered Nurse Anesthetist (CRNA). CRNA services are covered for the CRNA or for the entity with which the CRNA has an employment or contract relationship that provides for payment to be made to the entity. CRNAs must comply with Michigan scope of practice licensing laws and regulations.

If a rural hospital elects reasonable cost reimbursement for CRNA services under Medicare, the CRNA costs are included in the facility payments to the hospital and are not covered separately by Medicaid.

For specific coverage parameters, refer to the Anesthesia Services Section of this chapter.

To enroll as a Medicaid provider, a CRNA must meet all of the following requirements:

- be currently licensed in Michigan as a registered professional nurse;
- be certified by the State as a CRNA; and
- complete an online application through the CHAMPS Provider Enrollment subsystem.

(Refer to the Provider Enrollment Section of the General Information for Providers Chapter for additional enrollment information, and the Directory Appendix for contact information.)
SECTION 20 – CERTIFIED NURSE PRACTITIONER

20.1 GENERAL INFORMATION

Medicaid covers the services of a nurse practitioner (NP) when they are performed while working in collaboration with a physician. Medicaid covers NP services only if:

- the services would be covered if furnished by a physician;
- the services are not otherwise excluded from coverage; and,
- the NP is legally authorized to perform the services under state law.

NP services are subject to the limitations that apply to physician services. Certain services, such as long-term care facility visits, consultations, and initial hospital care, may be restricted to physicians by program policy or federal and state statues and may not be covered for NPs.

Professional services are only covered when the NP has personally performed the services and no facility or other provider charges, or is paid, any amount for the furnishing of the professional service. Services provided jointly by an NP and the supervising physician are covered for only one practitioner.

Determination of the medical necessity and appropriateness of services is the responsibility of the NP/physician based on the terms of their collaborative agreement.

20.2 ENROLLMENT OF CERTIFIED NURSE PRACTITIONERS

Nurse practitioners who render services to Medicaid beneficiaries must be enrolled providers. In order for an NP to enroll, he/she must enroll as either a Rendering/Servicing-Only Provider or an Individual/Sole Provider and:

- meet all state qualifications for nurse practitioners;
- have an ambulatory based practice;
- attest to the type of nurse practice engaged in, such as pediatric, family, geriatric, adult, etc.; and,
- if engaged in family or pediatric nurse practice, continue to provide proof of certification as a family nurse practitioner or a pediatric nurse practitioner by the appropriate accepted national credentialing body. (Refer to Michigan Rule 338.10404 [3].)

20.2.A. RENDERING/SERVICING-ONLY CERTIFIED NURSE PRACTITIONERS

A physician-employed NP who renders services only under the physician’s delegation and supervision under an employment relationship or agreement is required to be an enrolled provider and uniquely identified on claims for services. He/she may enroll as a Rendering/Servicing-Only Provider, and payment for these services will be made to the employing, supervising physician or physician group.
20.2.B. INDIVIDUAL/SOLE PROVIDER CERTIFIED NURSE PRACTITIONERS

In order for an NP to enroll and receive direct reimbursement as an Individual/Sole Provider, he/she must comply with the following requirements:

- provide services according to the terms of a written collaborative practice agreement in place with a physician. (Refer to the Collaborative Practice Agreement subsection for additional information.);
- complete the appropriate enrollment forms and a Nurse Practitioner/Physician Agreement (DCH-1575). (A copy of the form is available on the MDHHS website. Refer to the Directory Appendix for website information.); and
- once enrolled, the individual/sole provider NP may submit claims to MDHHS directly if the beneficiary is in FFS Medicaid. For beneficiaries enrolled in a MHP, the NP must negotiate provider terms and payment arrangements with each individual MHP.

20.3 COLLABORATIVE PRACTICE AGREEMENT

This is a formal document to be completed by Individual/Sole Provider NPs seeking direct reimbursement. It describes terms under which the NP and the physician deliver covered medical services. It is mutually developed or approved as satisfactory to both professionals involved and describes the types of services to be provided and any criteria for referral and consultation. This agreement must be available to MDHHS upon request. Services must be delivered within each practitioner’s scope of practice as allowed by federal regulations and state law.

The collaborative practice agreement must be reviewed at least annually and updated as necessary. The NP must notify MDHHS if the agreement is dissolved so the NP’s enrollment with Medicaid can be terminated. Medicaid only covers NP services provided within the provisions of the agreement.
SECTION 21 – CERTIFIED NURSE MIDWIFE

Medicaid covers services provided by enrolled certified nurse midwives (CNMs). (Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.)

CNM coverage includes the management of low risk and uncomplicated pregnancies and services to essentially normal women and newborns. Medically complicated pregnancies and services to beneficiaries with high-risk conditions MUST be referred to a physician. Services provided to high-risk women and women with medical complications are only covered under the delegation and supervision of a physician.

21.1 ENROLLMENT

To enroll as a Medicaid provider, a CNM must complete an on-line application through the CHAMPS Provider Enrollment subsystem. (Refer to the Provider Enrollment Section of the General Information for Providers Chapter for additional enrollment information, and the Directory Appendix for contact information.) A CNM must be able to demonstrate a safe mechanism for physician consultation, collaboration, and referral within an alliance agreement that includes mutually approved protocols.

21.2 FAMILY PLANNING

Medicaid covers family planning services provided by CNMs. (Refer to the Family Planning portion of the General Practice Section of this chapter for specific coverage information.) A CNM can only prescribe oral contraceptives under the delegation of a physician.

21.3 GYNECOLOGIC CARE

Medicaid covers gynecologic care provided by CNMs. CNMs may receive direct reimbursement for these services when completed within the CNM scope of practice guidelines.

21.4 LABORATORY TESTS

Laboratory testing ordered by the CNM is covered and must be documented in the beneficiary’s medical record by the ordering CNM regardless of where the tests are performed.

The following laboratory tests can be ordered by a CNM:

- Acetone and diacetic acid (ketone bodies), both qualitative and semi-quantitative
- Albumin, qualitative, semi-quantitative, and quantitative
- Antibody titer Rh system
- Blood typing, ABO, Rh(D), RBC antibody screening
- Blood count, RBC, WBC, hemoglobin, hematocrit, indices (MCV, MCH, MCHC)
- Culture, presumptive screening, for Neisseria, Gonorrhea, Candida, Hemophilus, or beta hemolytic Streptococci group A, etc.
- Culture, urine, definitive, with or without colony count
Cytopathology, vaginal and/or cervical smears
- Glucose, qualitative, quantitative, timed specimen, tolerance
- Hemoglobin, electrophoretic separation, qualitative
- Hepatitis B test
- HIV detection
- Pregnancy test
- Quantitative sediment analysis and quantitative protein, 12- or 24-hour urine specimen
- Reticulocyte count, manual
- Routine prenatal laboratory services (OB profile)
- Rubella test, titer
- Syphilis test (VDRL, RPR, etc.), qualitative
- Sickle cell slide test
- TB skin test, tine
- Susceptibility (sensitivity) for aerobes
- Treponema antibodies, fluorescent, absorbed
- Complete urinalysis
- Wet mount, smear, tissue, direct microscopic examination

The following laboratory tests are covered when performed by the CNM:

- Complete urinalysis
- Direct microscopic examination of a smear, wet mount, and/or tissue for fungi
- Hematocrit
- Hemoglobin
- Pregnancy testing

These tests are not covered for the CNM if rendered by an outside laboratory.

21.5 MATERNITY CARE

Medicaid covers antepartum care, delivery, and postpartum care rendered by a CNM when provided in compliance with the specific coverage policies of this chapter.

| Antepartum Care | Coverage for antepartum care includes all usual antepartum services provided prior to delivery and referral to MIHP given the presence of psychosocial or nutritional factors that could adversely affect the pregnancy. |
If the provider initiated prenatal care within the first six months of pregnancy through the month of delivery, the appropriate antepartum care CPT code is covered. If the beneficiary is seen by several CNMs within a group or multiple CNMs supervised by the same physician or physician group, the antepartum care package is covered. (Refer to the Maternity Care and Delivery Services Section of this chapter for details on coverage of antepartum care and when individual E/M services are covered.)

CNMs may perform and bill Medicaid for non-stress tests when this service is determined medically necessary and is part of routine care provided for uncomplicated pregnancies. CNMs may receive direct reimbursement for this service when completed within the CNM scope of practice guidelines.

<table>
<thead>
<tr>
<th>Delivery</th>
<th>Deliveries performed by a CNM are covered in a licensed setting only. Home deliveries and services associated with these deliveries are not covered. Coverage of the delivery includes monitoring, vaginal delivery, and resuscitation of the newborn infant when necessary.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Post-partum Care</td>
<td>Medicaid covers post-partum office visits following the delivery. Routine post-partum hospital care for the mother is covered as a part of the delivery. Routine care of the newborn in the hospital is covered for the provider who examines and provides the total hospital care of the newborn regardless of whether he performed the delivery. (Refer to the Services to Newborns subsection in this chapter for additional coverage information.)</td>
</tr>
</tbody>
</table>

21.6 Office Visits

Visits not directly related to antepartum care or follow-up to a delivery, such as family planning visits, are covered under the appropriate office visit procedure code. (Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters. Refer to the Evaluation and Management Services Section of this chapter for specific coverage information related to office visits.)

21.7 Pharmacy

Pharmaceuticals can only be ordered by a CNM under the delegation of a physician. The pharmaceutical must be provided by an enrolled pharmacy or, if appropriate, by an enrolled Family Planning Clinic (FPC).
**SECTION 22 – PHYSICIAN ASSISTANT**

Medicaid covers physician assistant (PA) services provided by qualified, Medicaid enrolled practitioners in conjunction with covered surgeries and other procedures. Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter or the Medicaid Code and Rate Reference tool available through CHAMPS for more information regarding coverage parameters. (Refer to the Directory Appendix for CHAMPS access information.)

**22.1 COVERED SERVICES**

Medicaid covers medically necessary services provided by a PA, as defined in Public Act 368 of 1978 as amended, when all the following requirements are met:

- the services are the type that are considered physician’s services if furnished by a Doctor of Medicine or Osteopathy (MD/DO);
- the services are performed by a person who is licensed as a PA under state law;
- the PA is legally authorized to perform the service in compliance with state law;
- the services are performed under the terms of a valid practice agreement with a Medicaid-enrolled MD/DO; and
- the services are not restricted to physicians or otherwise excluded by Medicaid program policy or federal and state statutes.

**22.2 ENROLLMENT OF PHYSICIAN ASSISTANTS**

PAs who provide professional services to Medicaid beneficiaries are required to be enrolled providers in the Medicaid program and uniquely identified on claims for their services to be considered eligible for reimbursement. To enroll, the PA must complete an online application in the Community Health Automated Medicaid Processing System (CHAMPS) with an Individual (Type 1) National Provider Identifier (NPI) as a Rendering/Servicing-Only provider. Additional provider enrollment information can be found on the MDHHS website and in the General Information for Providers Chapter of this manual. (Refer to the Directory Appendix for website information.)

**22.2.A. PARTICIPATING PHYSICIAN**

Professional services rendered by a PA will be covered when provided under the terms of a valid practice agreement established with a participating physician as defined in state law. A group of physicians practicing other than as sole practitioners may designate one or more physicians in the group to enter into a practice agreement.

During enrollment and enrollment revalidation, the PA must report the NPI of their Medicaid-enrolled participating physician by including the participating physician’s NPI on the checklist and associating to the participating physician in the “Associate to Billing Provider/Other Association” step in CHAMPS. Disenrollment of the participating physician from the program may prompt disenrollment of the PA. To avoid interruption in enrollment, the PA must ensure his/her CHAMPS enrollment information reflects current/accurate participating physician information.
Practitioners who wish to provide services to Medicaid Health Plan (MHP) enrollees are encouraged to contact the individual MHP for additional enrollment, credentialing, and contract requirements.

22.2.B. PRACTICE AGREEMENT

As part of the enrollment process, the PA must attest to having a valid practice agreement with a participating physician that complies with applicable state law requirements. Determination of medical necessity and appropriateness of services is the responsibility of the PA and participating physician based on the terms of the practice agreement. The participating physician does not have to be physically on the premises where the services are provided. The PA shall maintain the practice agreement at his/her primary place of practice and provide the agreement to MDHHS upon request.

22.3 BILLING & REIMBURSEMENT

22.3.A. CLAIMS

Professional claims must include the NPI of the PA in the Rendering Provider field and the participating or supervising physician in the Supervising Provider field as applicable. Refer to the Billing & Reimbursement for Professionals and the Billing & Reimbursement for Institutional Providers Chapters for additional Information.

22.3.B. REIMBURSEMENT

As a Rendering/Servicing-Only provider, PAs are not eligible to receive direct reimbursement. Payment for PA services will be issued to the participating physician, physician group or billing provider. Professional services are only covered when the PA has personally performed the service and no other provider or entity has been paid for the service. Services provided jointly by the PA and physician are covered for a single practitioner only.

Fee-for-Service reimbursement for PA services is based upon the limits and rates associated to physician professional services and are published on the Practitioner fee schedule located on the MDHHS website. Provider specific information may be located utilizing the Medicaid Code and Rate Reference tool within CHAMPS. Refer to the Billing & Reimbursement Chapter for additional information.

MHPs are responsible for reimbursing contracted providers or subcontractors for their services according to the conditions stated in the subcontract established between the practitioner and the MHP.

Noncontracted providers must comply with all applicable authorization requirements of the MHP and uniform billing requirements.

(Refer to the Surgery - General section of this chapter for information on a PA functioning as an assistant at surgery.)
SECTION 23 – PHYSICAL THERAPIST

Refer to the Therapy Services Chapter for additional therapy information.
SECTION 24 – PODIATRIST

Medicaid covers the medically necessary services of a podiatrist. (Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.)

Podiatrists should refer to the appropriate sections of this chapter for specific information related to the coverage of specific services.

24.1 COPAYMENT

A copayment is required for each separately covered visit for beneficiaries age 21 and older. If more than one separately covered service is rendered on the same day, such as an office visit and laboratory services, only one copayment is required. If a procedure such as a surgery with a global period is rendered, only one copayment is required. Refer to the General Information for Providers Chapter for information about copayments. Current copayment amounts are listed on the MDHHS website. (Refer to the Directory Appendix for website information.)

24.2 CONSULTATIONS

Medicaid covers limited and intermediate level consultations if requested by a physician.

24.3 NURSING FACILITY SERVICES

Podiatry services provided to a beneficiary in a nursing facility are considered an ancillary service and require the written order of the beneficiary's attending physician. All terms and conditions related to Medicaid covered and non-covered services, including PA and billing requirements, apply to services provided to beneficiaries in a nursing facility.
PRACTITIONER REIMBURSEMENT APPENDIX

SECTION 1 – REIMBURSEMENT METHODOLOGY

1.1 PRACTITIONER FEE SCREENS

Practitioner payment rates are established by MDHHS as a fee screen for each procedure. The Medicare prevailing fees, the Resource Based Relative Value Scale (RBRVS) and other relative value information, other state Medicaid fee screens, and providers’ charges may be utilized as guidelines or references in determining the maximum fee screens for individual procedures. The Practitioner fee schedule is updated annually following the CMS January release of the RBRVS. Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.

Any rate discrepancies will be resolved by using the policy language describing reimbursement methodology for the established fee schedules.

1.2 EMERGENCY DEPARTMENT SERVICES

Physician services provided in the ED are covered as individual services. Critical care services are covered according to the CPT/HCPCS definitions and coding conventions for critical care. If critical care is required for a beneficiary in the ED, then only the critical care codes are covered. ED E/M or visit codes are not covered on the same day as critical care for the same provider.

When a beneficiary is seen in the ED, the appropriate level of ED E/M service is covered unless another E/M service is more appropriate (e.g., observation care, initial inpatient hospital care, or critical care). The ED E/M service which includes the medical screening exam is covered without regard to whether the medical screening results in the medical condition being deemed an emergency or not. The results of the medical screening examination, along with any medically necessary appropriate diagnostic services, determine if further treatment must be provided. If the attending physician determines that an emergency medical condition does exist, all subsequent medically appropriate services to stabilize the patient must be provided and are covered in addition to the ED E/M service. CPT/HCPCS coding conventions and Medicaid guidelines must be followed.

The medical record must support the need for the type and extent of diagnostic services performed based on the presenting symptoms of the beneficiary. The ED physician’s review of x-rays and EKGs performed on the beneficiary are covered as a part of the E/M service. Professional component services are covered only for the physician who prepares a complete, written report of the findings for the medical record. If a specialist in the field prepares this, then the ED physician’s review of the findings does not meet the conditions for separate coverage of the service.

The ED E/M services provided by the attending physician, regardless of the level of the service, are covered using a two-tiered rate based on whether the beneficiary was released or admitted. If the beneficiary was released from the ED, a single rate is used as the fee screen. If the beneficiary was admitted to the hospital or transferred to another hospital from the ED, a higher single rate is used as the fee screen.
SECTION 2 – ENHANCED PRACTITIONER PAYMENTS

MDHHS makes payment adjustments for practitioner services payable under Medicaid Fee-For-Service (FFS) through entities identified in the Medicaid State Plan, Attachment 4.19-B, page 1a. (The Medicaid State Plan is available on the MDHHS website; refer to the Directory Appendix for website information.)

2.1 QUALIFYING PRACTITIONERS

Adjustments apply to both public and private practitioners and practitioner groups who are either employees of the public entities identified in the state plan, or are under contract with one or more of the public entities, and include the following:

- University medical and dental faculty, employed practitioners, and private practice groups with contractual arrangements with one or more of the above universities and provide services to Medicaid beneficiaries in a variety of settings.
- Hurley Hospital-employed or -contracted physicians, dentists, and other practitioners who provide services to Medicaid beneficiaries in a variety of settings.

Services eligible for the payment adjustments are billed under the federal employer identification number of the public entity or under the federal employer identification number of the practitioner/practitioner group.

Inpatient and outpatient services provided by the following practitioners, when not included in facility payments to the public entity, are included:

- Physicians (MD and DO)
- Ophthalmologists
- Oral-Maxillofacial Surgeons
- Dentists
- Podiatrists
- Physician Assistants
- Nurse Practitioners
- Certified Nurse Midwives
- Certified Registered Nurse Anesthetists
- Anesthesiologist Assistants
- Optometrists
2.2 PAYMENT ADJUSTMENT AMOUNT

The payment adjustment amount for services provided to Medicaid beneficiaries who do not have other insurance coverage will be the lesser of:

- The difference between the practitioner Medicaid fee-for-service fee screen and the practitioner’s customary charge; or,
- Up to 100% of the Average Commercial Rate for the service rendered.

The payment adjustment amount for services provided to Medicaid beneficiaries with other insurance coverage will be the lesser of:

- The difference between the total of the Medicaid, Medicare, and commercial insurance payments and the practitioner’s customary charge; or,
- The difference between the total of the Medicaid, Medicare, and commercial insurance payments and up to 100% of the Average Commercial Rate.

2.3 FINANCING THE PAYMENT ADJUSTMENTS

The public entities must certify to MDHHS that they will provide the non-federal share of the payment adjustments established by this policy. These public entities must also certify to MDHHS that the financial arrangements used to offset the non-federal share of these Medicaid payment adjustments do not violate Title XIX of the Social Security Act, §1903 Payment to States, Subsection (W) Prohibition on Use of Voluntary Contributions, and Limitation on Use of Provider-Specific Taxes to Obtain Federal Financial Participation Under Medicaid.

No additional state funds are available beyond the amount needed to pay designated providers up to the standard Medicaid fee screens for these services. The non-federal share of the Medicaid payment adjustments is supplied by the public entity through an intergovernmental transfer (IGT) to MDHHS.

2.4 PAYMENT ADJUSTMENT PROCESS

Upon receipt of the provider information from the public entity, MDHHS will generate a report which will include the federal employer identification numbers and utilization data for the providers affected by this policy for each covered period. The public entity must review the report and acknowledge the completeness and accuracy of the report. After receipt of this confirmation, MDHHS will make the payment adjustment. The payment adjustments will be made for the federal employer identification number used to bill Medicaid under the FFS program. The payment adjustments will be processed quarterly. Each quarterly payment adjustment will include a reconciliation that takes into account all claims submitted to MDHHS and paid after the prior Physician Adjustor payment quarter cut-off date.
SECTION 3 – PRIMARY CARE PRACTITIONER SERVICES INCENTIVE PAYMENT

For dates of service on and after January 1, 2015, MDHHS applies an increased payment rate to enrolled providers for primary care services delivered by a physician with a specialty designation of family medicine, general internal medicine, or pediatric medicine and, for dates of service on and after January 1, 2018, physicians with the specialty designation of general practice. The increase applies to a set of designated primary care services.

3.1 PROVIDER ELIGIBILITY

Physicians with primary specialty designations of family medicine, general internal medicine, pediatric medicine, and general practice may qualify as primary care practitioners for purposes of increased payment. Eligibility for this payment is limited to being board certified or board eligible in one of the three designated primary care specialties as recognized by the American Board of Medical Specialties, American Osteopathic Association, and the American Board of Physician Specialists. Primary care physicians may also be determined eligible by conducting a thorough review of the physician’s practice characteristics as identified through their billing history.

Physician practitioners whose CHAMPS Provider Enrollment profile information reflects that they provide specialty or subspecialty (e.g., cardiology, endocrinology, or oncology, etc.) services are not eligible for the adjusted payment. Providers with multiple subspecialties are also not eligible for the adjusted payment. Exceptions will be made for practitioners who have subspecialty practices in adolescent and geriatric medicine.

Before enhanced payments are made, MDHHS will verify that a practitioner meets the eligibility criteria which are identified as the following:

- **Board Certification**: A primary care physician who has designated their primary specialty in their CHAMPS enrollment file as one of the eligible specialties and has provided applicable Board certification information will be validated by MDHHS prior to any enhanced payment.

- **Board Eligible**: A primary care physician who has designated their primary specialty in their CHAMPS enrollment file as one of the eligible specialties and has provided applicable documentation to support board eligibility status is also eligible for the enhanced payment. MDHHS will recognize physicians as board eligible for the period of time as defined by the applicable medical board following completion of their medical residency training program in one of the defined specialties.

- **Review of Practice Characteristics**: For non-board certified or non-board eligible primary care physicians, MDHHS will review an enrolled practitioner’s billing history for the previous calendar year. At least 60 percent of the physician’s codes paid by Medicaid must be for the evaluation and management (E/M) codes specified in this policy, including the preventive medicine E/M codes. This review of practice characteristics will be done by MDHHS only for providers who have self-attested by designating in their CHAMPS enrollment file that their primary specialty is one of the eligible specialties.

- **Non-physician Practitioners**: Nurse practitioners (NPs) and physician assistants (PAs) who provide primary care services under the personal supervision of a physician who is one of the designated primary care specialty types may be reimbursed at the enhanced rate. Claims submitted by NPs and PAs must include their own NPI as the rendering provider and the NPI of their supervising/delegating physician. If the NP’s or PA’s supervising/delegating physician has
not been identified as an eligible provider for the primary care rate, as verified by CHAMPS enrollment, services performed by the NP or PA will not receive the enhanced rate.

Practitioners delivering primary care services at Federally Qualified Health Centers (FQHCs), Rural Health Clinics (RHCs) and Local Health Departments (LHDs) are not eligible for these enhanced payments. Practitioner services in these settings are reimbursed using a payment methodology designed to reimburse those providers at cost and are made on a facility basis, not specific to the physician’s services.

Practitioners who participate in the MDHHS Physician Adjustor Program are eligible for the primary care practitioner services incentive payment. For these participating providers, MDHHS calculates the Physician Adjustor Program payment adjustment consistent with the existing methodology.

Physicians with primary specialty designations of family medicine, general internal medicine, pediatric medicine, and general practice who are affiliated with Medicaid Health Plans (MHP) are eligible for the primary care practitioner rate increase as identified by their Primary Care Provider status within the MHP network.

### 3.2 Eligible Primary Care Services

Primary care practitioner services subject to the enhanced primary care rate are defined as Healthcare Common Procedure Coding System (HCPCS) codes:

- 99201 through 99215 for new and established patient office or outpatient evaluation and management (E/M) visits
- 99304 through 99318 for initial, subsequent, discharge and other nursing facility E/M services
- 99324 through 99337 for new and established patient domiciliary, rest home or custodial care E/M services
- 99341 through 99350 for new and established patient home E/M visits
- 99381 through 99397 for new and established patient preventive medicine services

### 3.3 Enhanced Rates for Primary Care

For primary care practitioners identified as eligible for the primary care rate, payment will be made on the qualified procedure codes as published in a separate fee schedule as published on the MDHHS website. The Primary Care Fee Schedule reflects rates that have been adjusted in compliance with funding levels established by state law. (Refer to the Directory Appendix for website information.)

SECTION 1 – GENERAL INFORMATION

This chapter applies to Independent and Agency Private Duty Nurses.

Private duty nursing (PDN) is a Medicaid benefit when provided in accordance with the policies and procedures outlined in this manual. Providers must adhere to all applicable coverage limitations, policies and procedures set forth in this manual.

PDN is covered for beneficiaries under age 21 who meet the medical criteria in this section. If the beneficiary is enrolled in or receiving case management services from the Habilitation Supports Waiver (the Community Mental Health Services Program) and over 21 years of age, that program authorizes the PDN services.

For a Medicaid beneficiary who is not receiving services from the Habilitation Supports Waiver (the Community Mental Health Services Program), the MDHHS Program Review Division (PRD) reviews the request for authorization and authorizes the services if the medical criteria and general eligibility requirements are met.

For beneficiaries 21 and older, PDN is a waiver service that may be covered for qualifying individuals enrolled in the Habilitation Supports Waiver or MI Choice Waiver. When PDN is provided as a waiver service, the waiver agent must be billed for the services.

Beneficiaries who are receiving PDN services through one Medicaid program cannot seek supplemental PDN hours from another Medicaid Program (i.e., Habilitation Supports Waiver, MI Choice Waiver).

1.1 DEFINITION OF PDN

Private Duty Nursing is defined as nursing services for beneficiaries who require more individual and continuous care, in contrast to part-time or intermittent care, than is available under the home health benefit. These services are provided by a registered nurse (RN), or licensed practical nurse (LPN) under the supervision of an RN, and must be ordered by the beneficiary’s physician. Beneficiaries requiring PDN must demonstrate a need for continuous skilled nursing services, rather than a need for intermittent skilled nursing, personal care, and/or Home Help services. The terms "continuous" and "skilled nursing" are further defined in the Medical Criteria subsection for beneficiaries under age 21.
1.2 Enrollment Requirements

| Medicaid Enrolled Nurse (RN/LPN) | To enroll as a Medicaid provider, the nurse must meet the following criteria:  
|---------------------------------|---------------------------------------------------------------------------------|
|                                 | • Be a Registered Nurse (RN) licensed to practice in Michigan; or a Licensed Practical Nurse (LPN) licensed to practice in Michigan working under the supervision of an RN. Supervision of a Medicaid-enrolled LPN must be by an RN who has at least one year of experience in any of the following areas: community health nursing, pediatric nursing, maternal and child health nursing, or a similar nursing practice. Medicaid requires an on-site (beneficiary's home) supervisory visit by the RN of the LPN at least once every two months. The Medicaid-enrolled LPN must maintain documentation that verifies who the supervising RN is, a copy of the RN's license and documentation that supports that the RN supervisory visits were rendered. Documentation of the supervisory visit as signed by the RN must be included in the medical record. The medical record must be complete enough to allow another professional to reconstruct what transpired during the supervisory visit.  
|                                 | • Cooperate with MDHHS in quality monitoring activities, beneficiary complaint resolution, and post-payment audit reviews. Medicaid-enrolled nurses must document complaints made by a beneficiary or the beneficiary's family regarding treatment or care that is (or fails to be) furnished, or regarding the lack of respect for the beneficiary's property, and must document both the existence of the complaint and the resolution of the complaint.  
| Private Duty Nursing Agency     | To enroll as a Medicaid provider, the PDN agency must meet the following criteria:  
|                                 | • Be accredited by the Community Health Accreditation Program (CHAP) or the Accreditation Commission for Health Care (ACHC) as a PDN agency; or be accredited by The Joint Commission as a Home Health Agency; or be accredited by the Commission on Accreditation of Rehabilitation Facilities (CARF) as a Home and Community-Based Rehabilitation Program.  
|                                 | • If a PDN agency delivers services from more than one location (office), each location (office) must be accredited.  
|                                 | PDN agencies are not permitted to avoid the above accreditation requirements by individually enrolling RNs or LPNs in the Medicaid Program.  
|                                 | • Cooperate with MDHHS in quality monitoring activities, beneficiary complaint resolution, and post-payment audit reviews. Providers must document complaints made by a beneficiary or the beneficiary's family regarding treatment or care that is (or fails to be) furnished, or regarding the lack of respect for the beneficiary's property, and must document both the existence of the complaint and the resolution of the complaint.  

1.3 Provision of Private Duty Nursing

PDN must be ordered by a physician and provided by a Medicaid enrolled private duty nursing agency, a Medicaid enrolled registered nurse (RN), or a Medicaid enrolled licensed practical nurse (LPN) who is working under the supervision of an RN (per Michigan Public Health Code). It is the responsibility of the LPN to secure the RN supervision.
Supervision of a Medicaid enrolled LPN must be by an RN who has at least one year of experience in any of the following areas:

- Community health nursing,
- Pediatric nursing,
- Maternal and child health nursing, or
- A similar nursing practice.

MDHHS requires an onsite supervisory visit by the supervising RN at least once every two months. The Medicaid enrolled LPN must maintain documentation that identifies the supervising RN.

If a beneficiary’s services are performed exclusively by LPNs, the supervisory RN is responsible for completing a physical assessment for each beneficiary the LPN is caring for, and is required to participate in the development of the beneficiary’s plan of care (POC). The above assessments and supervisory visits are not covered by Medicaid, including when provided by a home health agency.

PDN is not covered when rendered in a hospital or nursing facility, including an intermediate care facility for individuals with intellectual disabilities (ICF/IID) or licensed adult foster care facility (AFC).

PDN is not covered when provided by an RN or LPN who is the beneficiary’s spouse, legally responsible relative, stepparent, adoptive parent, legal guardian, or foster parent.

When more than one agency is authorized to provide PDN for a beneficiary, the hours rendered by each must be reported to the PRD on a monthly basis in order to permit the adjustment of authorized hours as necessary between the providers. Payment cannot be made until all utilized hours are reported. The primary agency on the case (the first agency involved) is responsible for contacting the other PDN provider(s) caring for the beneficiary to obtain the actual number of hours rendered during the preceding month, and must fax the total hours provided by each to the PRD. The authorization letter will detail all PDN providers that are caring for a beneficiary during the authorization period.

1.4 PRIOR AUTHORIZATION

PDN services must be authorized by the PRD, before services are provided. (Refer to the Directory Appendix for contact information.) PDN services are authorized and billed in 15-minute incremental units (1 unit = 15 minutes). Prior authorization of a particular PDN provider to render services considers the following factors:

- Available third party resources.
- Beneficiary/family choice.
- Beneficiary’s medical needs and age.
- The knowledge and appropriate nursing skills needed for the specific case.
- The understanding of the concept and delivery of home care and linkages to relevant services and health care organizations in the area served.

The Private Duty Nursing Prior Authorization – Request for Services form (MSA-0732) must be submitted when requesting PDN for persons with Medicaid coverage before services can begin and at regular
intervals thereafter if continued services are determined to be necessary. A copy of the form is provided in the Forms Appendix and is also available on the MDHHS website. (Refer to the Directory Appendix for website information.) This form is not to be used for beneficiaries enrolled in the MI Choice Waiver. Private Duty Nursing is not a benefit under CSHCS. Individuals with CSHCS coverage may be eligible for PDN under Medicaid.

The MSA-0732 must be submitted every time services are requested for the following situations:

- for initial services when the beneficiary has never received PDN services under Medicaid, such as following a hospitalization or when there is an increase in severity of an acute or chronic condition;
- for continuation of services beyond the end date of the current authorization period (renewal);
- for an increase in services; or
- for a decrease in services.

Following receipt and review of the MSA-0732 and the required documentation by the PRD, a notice is sent to the PDN provider and beneficiary or primary caregiver, either approving or denying services, or requesting additional information. The provider must maintain this notice in the beneficiary’s medical record. For services that are approved, the Notice of Authorization will contain the prior authorization number and approved authorization dates. It is important to include this PA number on every claim and in all other communications to the PRD.

If a beneficiary receiving PDN continues to require the services after the initial authorization period, a new MSA-0732 must be submitted along with the required documentation supporting the continued need for PDN. This request must be received by the PRD no less than 15 business days prior to the end of the current authorization period. Failure to do so may result in a delay of authorization for continued services which, in turn, may result in delayed or no payment for services rendered without authorization. The length of each subsequent authorization period will be determined by the PRD and will be specific to each beneficiary based on several factors, including the beneficiary’s medical needs and family situation.

MDHHS will not reimburse PDN providers for services that have not been prior authorized. All forms and documentation must be completed according to the procedures provided in this chapter. If information is not provided according to policy (which includes signatures and correct information on the MSA-0732, POC and nursing assessment), requests will be returned to the provider. Authorization cannot be granted until all completed documentation is provided to MDHHS. Corrected submissions will be processed as a new request for PDN authorization and no backdating will occur.

If during an authorization period a beneficiary’s condition changes warranting an increase or decrease in the number of approved units or a discontinuation of services, the provider must report the change to the PRD. (Refer to the Directory Appendix for contact information.) It is important that the provider report all changes as soon as they occur, as well as properly updating the POC. The request to increase or decrease units must be accompanied by an updated and signed POC; and documentation from the attending physician addressing the medical need if the request is for an increase in PDN units.

Often the request to begin services will be submitted by a PDN agency or individual PDN; however, a person other than the PDN provider (such as the hospital discharge planner, CSHCS case manager, physician, or physician’s staff person) may submit the MSA-0732. When this is the case, the person
submitting the request must do so in consultation with the PDN agency or individual PDN who will be assuming responsibility for the care of the beneficiary.

If services are requested for more than one beneficiary in the home, a separate MSA-0732 must be completed for each beneficiary.

When a parent/guardian requests a transfer of care from one PDN provider to another, a completed MSA-0732 must be submitted to the PRD along with signed and dated documentation from the parent/guardian indicating that they are requesting a change in providers. The balance of hours authorized to a previous PDN provider will not be automatically transferred to a new provider. The new PDN provider is responsible for submitting the MSA-0732 to the PRD along with documentation from the parent/guardian requesting a new provider.

The PA number is for private duty nursing only. Any CMHSP prior authorized respite services must be billed to the authorizing CMHSP.

Other services provided in the home by community-based programs may affect the total care needs and the amount of PDN authorized. These other services must be disclosed on the MSA-0732 and documented in the POC. Although the amount of PDN authorized considers the beneficiary’s medical needs and family circumstances, community-based services provided in the home are also part of this assessment. Disclosure is necessary to prevent duplication of services to allow for an accurate calculation of authorized PDN hours. Providers are advised that failure to disclose all community resources in the home may be cause for recoupment of funds.

1.4.A. DOCUMENTATION REQUIREMENTS

The following documentation is required for all PA requests for PDN services and must accompany the MSA-0732:

- Most recent signed and dated nursing assessment, including a summary of the beneficiary’s current status compared to their status during the previous authorization period, completed by a registered nurse;
- Nursing notes for two (2) four-day periods, including one four-day period that reflects the most current medically stable period and another four-day period that reflects the most recent acute episode of illness related to the PDN qualifying diagnosis/condition;
- Most recent updated POC signed and dated by the ordering/managing physician, RN, and the beneficiary’s parent/guardian. The POC must support the skilled nursing services requested, and contain dates inclusive of the requested authorization period.

The POC must include:

- Name of beneficiary and Medicaid ID number
- Diagnosis(es)/presenting symptom(s)/condition(s)
- Name, address, and telephone number of the ordering/managing physician
- Frequency and duration of skilled nursing visits, and the frequency and types of skilled interventions, assessments, and judgments that pertain to and support the PDN services to be provided and billed
 Identification of technology-based medical equipment, assistive devices (and/or appliances), durable medical equipment, and supplies
 Other services being provided in the home by community-based entities that may affect the total care needs must be documented.
 List of medications and pharmaceuticals (prescribed and over-the-counter)
 Statement of family strengths, capabilities, and support systems available for assisting in the provision of the PDN benefit (for renewals, submit changes only)

- If the beneficiary was hospitalized during the last authorization period, include documentation related to the PDN qualifying diagnosis/condition, i.e., all hospital discharge summaries, history and physical examination, social worker notes/assessment, consultation reports (pulmonary; ears, nose and throat [ENT]; ventilator clinic; sleep study; etc.), and emergency department reports (if emergency services were rendered during the last authorization period).
- Teaching records pertaining to the education of parents/caregivers on the child’s care.
- Other documentation as requested by MDHHS.

1.4.B. BENEFICIARY ELIGIBILITY

Approval of the MSA-0732 confirms that the service is authorized for the beneficiary. The approval does not guarantee that the beneficiary is eligible for Medicaid. If the beneficiary is not eligible on the date of service, MDHHS will not reimburse the provider for services provided and billed. To assure payment, the provider must verify beneficiary eligibility monthly at a minimum.

1.4.C. RETROACTIVE PRIOR AUTHORIZATION

Services provided before PA is requested will not be covered unless the beneficiary was not Medicaid eligible on the date of service but became eligible retroactively. If the MDHHS eligibility information does not demonstrate retroactive eligibility, then the request for retroactive PA will be denied.

1.5 OTHER INSURANCE

It is the responsibility of the family, private duty nursing agency, RN or LPN to assess, investigate and exhaust all commercial insurance for the beneficiary prior to billing Medicaid. A private duty nursing agency, RN, or LPN should not accept any Medicaid PDN case until it has been determined what, if any, commercial insurance a beneficiary may have.

For any Medicaid case accepted in which the beneficiary has other insurance, the provider must first follow the rules of the other insurance. Such rules may include obtaining a physician’s order, obtaining prior authorization, and being a participating provider with the other insurance carrier. Failure to follow the rules of the other insurance may result in nonpayment from Medicaid.

If a beneficiary’s commercial insurance does not cover PDN, the PDN agency, RN or LPN must inform the PRD prior to billing MDHHS. (Refer to the Directory Appendix for contact information.) A copy of the letter of explanation or explanation of benefits (EOB) must be kept in the beneficiary’s medical record.
Once it has been established that the commercial insurance does not cover PDN, a letter of explanation or EOB is valid as long as the insurance coverage remains unchanged. On an annual basis, the policyholder and provider should confirm with the commercial insurance that PDN coverage has not changed.

(Refer to the Coordination of Benefits Chapter of this manual for additional information.)

1.6 GENERAL ELIGIBILITY REQUIREMENTS

The beneficiary is eligible for PDN coverage when all of the following requirements are met:

- The beneficiary is eligible for Medicaid in the home/community setting (i.e., in the noninstitutional setting).
- The beneficiary is under the age of 21 and meets the medical criteria for PDN.
- PDN is appropriate, considering the beneficiary's health and medical care needs.
- PDN can be provided safely in the home setting.
- The beneficiary, his family (or guardian), the beneficiary's physician, the Medicaid case manager, and RN (i.e., from the PDN agency or the Medicaid enrolled RN, or the supervising RN for the Medicaid enrolled LPN) have collaborated and developed an integrated POC that identifies and addresses the beneficiary's need for PDN. The PDN must be under the direction of the beneficiary's physician; the physician must prescribe/order the services. The POC must be signed and dated by the beneficiary's physician, RN (as described above), and by the beneficiary or beneficiary’s parent/guardian. The POC must be updated at least annually or more frequently as needed based on the beneficiary’s medical needs.

1.7 BENEFIT LIMITATIONS

The purpose of the PDN benefit is to assist the beneficiary with medical care, enabling the beneficiary to remain in their home. PDN is intended as a transitional benefit to support and teach family members to function as independently as possible. Authorized hours will be modified as the beneficiary's condition and living situation stabilizes or changes. A decrease in hours will occur, for example, after a child has been weaned from a ventilator or after a long term tracheostomy no longer requires frequent suctioning, etc. The benefit is not intended to supplant the caregiving responsibility of parents, guardians, or other responsible parties (e.g., foster parents). There must be a primary caregiver (i.e., parent, guardian, significant other adult) who resides with a beneficiary under the age of 18, and the caregiver must provide a minimum average of eight hours of care during a typical 24-hour period. The calculation of the number of units authorized per month includes eight hours or more of care that will be provided by the caregiver during a 24-hour period, which are then averaged across the time authorized for the month. The caregiver has the flexibility to use the monthly-authorized units as needed during the month. Substantial alterations to the scheduled allotment of daily PDN hours due to family choice (i.e., vacations) unrelated to medical need or emergent circumstances require advance notice to the PRD. The remaining balance of authorized hours will not be increased to cover this type of utilization. Authorized time cannot be carried over from one authorization period to another.

The time a beneficiary is under the supervision of another entity or individual (e.g., in school, in day/child care, in work program) cannot be used to meet the eight hours of obligated care as discussed above, nor can the eight hours of care requirement for beneficiaries under age 18 be met by other public funded...
programs (e.g., MDHHS Home Help Program) or other resources for hourly care (e.g., private health insurance, trusts, bequests, private pay).

PDN providers are encouraged to work with families to assist in developing a backup plan for care of their child in the event that a PDN shift is delayed or cancelled, and the parent/guardian is unable to provide care. The parent/guardian is expected to arrange backup caregivers that they will notify, and the parent/guardian remains responsible for contacting these backup caregivers when necessary.

1.8 SERVICE LOG

If PDN is prior approved and care is initiated, a detailed log for each date of service must be maintained. The service log must be beneficiary specific, with the beneficiary’s name and birth date in the header portion of the document and must clearly identify the specific time worked by each PDN in the home and for each date of service. In cases where the nurse is caring for two or more beneficiaries in the same home, a separate service log for each beneficiary must be maintained. This log must be kept in the beneficiary’s record and may be documented in electronic or paper format. The medical record itself or nursing flow sheets containing other information are not considered a service log for the purposes of this policy. Failure to maintain a log or to submit this information to MDHHS upon request may result in recoupment of PDN reimbursement.

The following service log provides an example of the required fields.

<table>

PDN agencies should refer to the Billing & Reimbursement for Institutional Providers chapter for instructions on claim completion and requirements for the processing of claims. Medicaid-enrolled Registered Nurses (RN) or Licensed Practical Nurses (LPN) should refer to the Billing & Reimbursement for Professionals Chapter for instructions on claim completion and requirements for the processing of claims.

Each signature must be accompanied by a date. The date of the nurse’s signature must be the same as the date of service. The date of the parent/caregiver signature should be within one week of the date of service. A claim must not be submitted before the service log is completed for those dates of service.

1.9 CLINICAL RECORD

In addition to the Service Log, the provider must maintain clinical records as detailed in the General Information for Providers Chapter of this manual. The clinical record must be sufficiently documented to
allow another professional to reconstruct what transpired during each hour of nursing service and billed to Medicaid in 15-minute incremental units.

1.10 PDN IN CONJUNCTION WITH HOME HELP OR PERSONAL CARE SERVICES

If the beneficiary receiving PDN demonstrates a need for personal care or Home Help services in addition to PDN, there must be coordination between the delivery of personal care or Home Help services and the PDN services, as well as documentation in the POC to verify there is no duplication of services.

1.11 HOLIDAYS

MDHHS allows additional reimbursement for holidays. Currently recognized holidays are: New Year’s Day, Easter, Memorial Day, July 4th, Labor Day, Thanksgiving and Christmas Day.

A holiday begins at 12:00 a.m. and ends at 12:00 midnight of that holiday day.

1.12 MILEAGE

Staff mileage to the beneficiary’s home is covered as a part of the PDN service and may not be billed separately.

1.13 CARING FOR MORE THAN ONE PATIENT AT A TIME

For ratios of more than two patients per nurse, the provider must contact the entity authorizing the beneficiary’s PDN services: Children’s Waiver (the Community Mental Health Services Program), Habilitation Supports Waiver (the Community Mental Health Services Program), Home and Community-Based Services Waiver for the Elderly and Disabled (MI Choice Waiver) or the PRD. These ratios are considered exceptional cases and require prior approval.

When two Medicaid beneficiaries less than 21 years of age reside in the same home and require PDN services, one nurse will be authorized to provide care for both individuals. (The PDN rate is adjusted to accommodate this ratio.) In the event of an exceptional and emergent circumstance, a ratio of 1:1 nursing will be authorized for a limited period of time when two PDN beneficiaries reside in the same home. During this time period, PDN services must be reassessed on at least a monthly basis, documented in the POC, and submitted to the PDN authorizing entity to demonstrate the need for continuation of 1:1 nursing services. The POC must document efforts being made to wean the beneficiaries from 1:1 care.

A PDN authorized to provide services to two children at the same location may find that, at times, only one child is present to receive services. This may occur when one child is in school, at a medical appointment, hospitalized, or on a family outing. The beneficiary record must document why only one child was present to receive services, as well as the beginning and ending time of the services. (Refer to the appropriate Billing and Reimbursement chapter for billing instructions.)

1.14 BILLING FOR PRIVATE DUTY NURSING

For billing instructions, nurses should refer to the Billing & Reimbursement for Professionals Chapter of this manual and agencies should refer to the Billing & Reimbursement for Institutional Providers Chapter of this manual.
SECTION 2 – CARE REQUIREMENTS

2.1 PLAN OF CARE

A written plan of care (POC) guides all services provided to the beneficiary by the PDN provider. The POC identifies and addresses the beneficiary’s need for PDN. The POC and the process for developing it reflect the beneficiary’s and family’s basic rights of self-determination and autonomy.

- Family members and the beneficiary (as appropriate to his maturity) participate in developing the POC. They are provided with accurate information and support appropriate to informed decision-making. They must give informed consent for the planned services by signing and dating the POC annually and when updating the POC as needed based on the beneficiary's medical needs.
- Beneficiary/family strengths, including cultural and ethnic identity, are respected and utilized in the delivery of care. Services delivered in the home accommodate beneficiary/family life activities.
- The plan includes goals directed toward increasing beneficiary/family capability, effectiveness, and control.
- The plan includes compensatory services to support the growth and developmental potential of each beneficiary, given his disability or illness.
- Appointments are coordinated and services are scheduled with the goals of minimizing inconvenience to the beneficiary/family, and of facilitating the family's participation in the beneficiary's care.
- If the services are provided by LPNs, the POC must identify the frequency of the supervisory RN visits.

The written POC must be retained in the beneficiary's medical record.

2.2 SUSPECTED ABUSE/NEGLECT

If there is reasonable cause to suspect that a beneficiary may be in danger of abuse, neglect, exploitation, cruelty, or other hazards, the PDN must report the suspected abuse to the Adult or Child Protective Services Unit of the local MDHHS office. (Refer to the General Information for Providers Chapter of this manual for additional information.)

2.3 MEDICAL CRITERIA

To qualify for PDN, the beneficiary must meet the medical criteria of either I and III below or II and III below:

The written POC must be retained in the beneficiary's medical record.
Medical Criteria I

The beneficiary is dependent daily on technology-based medical equipment to sustain life. "Dependent daily on technology-based medical equipment" means:

- Mechanical ventilation four or more hours per day, or assisted respiration does not automatically include ventilation through Bi-level Positive Airway Pressure (Bi-PAP) or Continuous Positive Airway Pressure (CPAP). Use of these devices to satisfy this criteria will be evaluated on a case-by-case basis; or
- Oral or tracheostomy suctioning 8 or more times in a 24-hour period; or
- Nasogastric tube feedings or medications when removal and insertion of the nasogastric tube is required, associated with complex medical problems or medical fragility; or
- Total parenteral nutrition delivered via a central line, associated with complex medical problems or medical fragility; or
- Continuous oxygen administration, in combination with a pulse oximeter and a documented need for observations and adjustments in the rate of oxygen administration.

Medical Criteria II

Frequent episodes of medical instability within the past three to six months, requiring skilled nursing assessments, judgments or interventions as described in III below, due to a substantiated progressively debilitating physical disorder.

- "Frequent" means at least 12 episodes of medical instability related to the progressively debilitating physical disorder within the past six months, or at least six episodes of medical instability related to the progressively debilitating physical disorder within the past three months;
- "Medical instability" means emergency medical treatment in a hospital emergency room or inpatient hospitalization related to the underlying progressively debilitating physical disorder;
- "Emergency medical treatment" means covered inpatient and outpatient services that are furnished by a provider who is qualified to furnish such services and which are needed to evaluate or stabilize an emergency medical condition. "Emergency medical condition" means a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain) such that a prudent layperson who possesses an average knowledge of health and medicine could reasonably expect the absence of immediate medical attention to place the health of the individual in serious jeopardy, serious impairment to bodily functions, or serious dysfunction of any bodily organ or part.
- "Progressively debilitating physical disorder" means an illness, diagnosis, or syndrome that results in increasing loss of function due to a physical disease process, and that has progressed to the point that continuous skilled nursing care (as defined in III below) is required; and
- "Substantiated" means documented in the clinical/medical record, including the nursing notes.

For beneficiaries described in II, the requirement for frequent episodes of medical instability is applicable only to the initial determination of medical necessity for PDN. Determination of continuing eligibility for PDN for beneficiaries defined in II is based on the original need for skilled nursing assessments, judgments, or interventions as described in III below.
Medical Criteria III

The beneficiary requires continuous skilled nursing care on a daily basis during the time when a licensed nurse is paid to provide services.

- "Continuous" means at least once every three hours throughout a 24-hour period, and/or when delayed interventions may result in further deterioration of health status, in loss of function or death, in acceleration of the chronic condition, or in a preventable acute episode.
- Equipment needs alone do not create the need for skilled nursing services.
- "Skilled nursing" means assessments, judgments, interventions, and evaluations of interventions requiring the education, training, and experience of a licensed nurse. Skilled nursing care includes, but is not limited to, performing assessments to determine the basis for acting or a need for action; monitoring fluid and electrolyte balance; suctioning of the airway; injections; indwelling central venous catheter care; managing mechanical ventilation; oxygen administration and evaluation; and tracheostomy care.

2.4 Determining Intensity of Care and Maximum Amount of PDN

As part of determining the maximum amount of PDN a beneficiary is eligible for, his Intensity of Care category must be determined. This is a clinical judgment based on the following factors:

- The beneficiary's medical condition;
- The type and frequency of needed nursing assessments, judgments and interventions; and
- The impact of delayed nursing interventions.

Equipment needs alone do not determine intensity of care. Other aspects of care (e.g., administering medications) are important when developing a plan for meeting the overall needs of the beneficiary, but do not determine the number of hours of nursing for which the beneficiary is eligible.

<td>Beneficiaries requiring nursing assessments, judgments and interventions by a licensed nurse (RN/LPN) at least one time each hour throughout a 24-hour period, when delayed nursing interventions could result in further deterioration of health status, in loss of function or death, or in acceleration of the chronic condition.</td>
<td>Beneficiaries requiring nursing assessments, judgments and interventions by a licensed nurse (RN/LPN) at least one time every three hours throughout a 24-hour period, or at least 1 time each hour for at least 12 hours per day, when delayed nursing interventions could result in further deterioration of health status, in loss of function or death, or in acceleration of the chronic condition. This category also includes beneficiaries with a higher need for nursing assessments and judgments due to an inability to communicate and direct their own care.</td>
<td>Beneficiaries requiring nursing assessments, judgments and interventions by a licensed nurse (RN/LPN) at least one time every three hours for at least 12 hours per day, as well as those beneficiaries who can participate in and direct their own care.</td>
</tr>
</tbody>
</table>

Medicaid uses the "Decision Guide for Establishing Maximum Amount of Private Duty Nursing to be Authorized on a Daily Basis" (below) to establish the amount of PDN that is approved. The Decision Guide is used to determine the appropriate range of nursing hours (prior authorized and billed in 15-minute increments) that can be authorized under the Medicaid PDN benefit and defines the "benefit
"limitation" for individual beneficiaries. The Decision Guide is used by the authorizing entity after it has determined the beneficiary meets both general eligibility requirements and medical criteria as stated above. The amount of PDN (i.e., the time) that can be authorized for a beneficiary is based on several factors, including the beneficiary’s care needs which establish medical necessity for PDN, the beneficiary’s and family’s circumstances, and other resources for daily care (e.g., private health insurance, trusts, bequests, private pay). To illustrate, the number of hours covered by private health insurance is subtracted from the hours approved under Medicaid PDN. These factors are incorporated into the Decision Guide. The higher number in the range is considered the maximum number of hours that can be authorized. Except in emergency circumstances, Medicaid does not approve more than the maximum hours indicated in the guide.

Only those factors that influence the maximum number of hours that can be authorized are included on this decision matrix. Other factors (e.g., additional dependent children, additional children with special needs, and required nighttime interventions) that impact the caregiver's availability to provide care should be identified during an assessment of service needs. These factors have implications for service planning and should be considered when determining the actual number of hours (within the range) to authorize.

<tr>
<td>Beneficiary attends school 25 or more hours per week, on average</td>
<td>Maximum of 6 hours per day</td>
<td>Maximum of 8 hours per day</td>
</tr>
</tbody>
</table>

* Factor III limits the maximum number of hours which can be authorized for a beneficiary:
  * Of any age in a center-based school program for more than 25 hours per week; or
  * Age six and older for whom there is no medical justification for a homebound school program.

In both cases, the lesser of the maximum "allowable" for Factors I and II, or the maximum specified for Factor III, applies.
When using the Decision Guide, the following definitions apply:

- **"Caregiver":** legally responsible person (e.g., birth parents, adoptive parents, spouses), paid foster parents, guardian or other adults who are not legally responsible or paid to provide care but who choose to participate in providing care.
- **"Full-time (F/T)"**: working at least 30 hours per week for wages/salary, or attending school at least 30 hours per week.
- **"Part-time (P/T)"**: working at least 15 hours per week for wages/salary, or attending school at least 15 hours per week.
- **"Significant" health issues**: one or more primary caregiver(s) has a health or emotional condition that prevents the caregiver from providing care to the beneficiary (e.g., beneficiary weighs 70 pounds and has no mobility and the primary caregiver just had back surgery and is in a full-body cast).
- **"Some" health issues**: one or more primary caregiver(s) has a health or emotional condition, as documented by the caregiver’s treating physician, that interferes with, but does not prevent, provision of care (e.g., caregiver has lupus, alcoholism, depression, back pain when lifting, lifting restrictions, etc.).
- **"School" attendance**: The average number of hours of school attendance per week is used to determine the maximum number of hours that can be authorized for the individual of school age. The average number of hours is determined by adding the number of hours in school plus transportation time. Authorization of PDN hours will not automatically be increased during breaks from school (vacations) or adjusted beyond the limits of factors I and II.

The Local School District (LSD) or Intermediate School District (ISD) is responsible for providing such “health and related services” as necessary for the student to participate in his education program. Unless medically contraindicated, individuals of school age should attend school. Factor III applies when determining the maximum number of hours to be authorized for an individual of school age. The Medicaid PDN benefit cannot be used to replace the LSD’s or ISD’s responsibility for services (either during transportation to/from school or during participation in the school program) or when the child would typically be in school but for the parent's choice to home-school the child.

### 2.5 Exception Process

Because each beneficiary and his family are unique and because special circumstances arise, it is important to maintain an exception process to ensure the beneficiary’s safety and quality of care. PDN services that exceed the beneficiary’s benefit limitation, as established by the Decision Guide, must be prior authorized by the appropriate Medicaid case management program. Limited authority to exceed the published PDN benefit limitations may be granted on a time-limited basis as detailed below.

The beneficiary or his primary care giver must initiate the request for an exception. The applicable Medicaid case management program’s representative is responsible for facilitating the request and documenting the necessity for an exception. Factors underlying the need for additional PDN must be identified in the beneficiary’s POC, which must include strategies directed toward resolving the factors necessitating the exception, if applicable. Documentation must substantiate all of the following:
- Current medical necessity for the exception;
- Current lack of natural supports required for the provision of the needed level of support; and
- Additional PDN services are essential to the successful implementation of the beneficiary’s written POC, and are essential to maintain the beneficiary within the least restrictive, safe, and humane environment suitable to his condition.

Exceptions are time-limited and must reflect the increased identified needs of the beneficiary. Consideration for an exception is limited to situations outside the beneficiary’s or family’s control that place the beneficiary in jeopardy of serious injury or significant deterioration of health status. Exceptions may be considered for either of the following general situations:

<table>
<thead>
<tr>
<th>A temporary alteration in the beneficiary’s care needs following a hospitalization, resulting in one or both of the following:</th>
<th>The temporary inability of the primary caregiver(s) to provide required care as the result of one of the following:</th>
</tr>
</thead>
<tbody>
<tr>
<td>- A temporary increase in the intensity of required assessments, judgments, and interventions.</td>
<td>- An acute illness or injury of the primary caregiver(s). The total number of additional PDN hours cannot exceed two hours per day for the duration of the caregiver’s inability, not to exceed six months. In the event there is only one caregiver living in the home and that caregiver is hospitalized, a maximum of 24 hours per day can be authorized for each day the caregiver is hospitalized.</td>
</tr>
<tr>
<td>- A temporary need for additional training to enable the primary caregiver(s) to identify and meet the beneficiary’s care needs.</td>
<td>- The death of the primary caregiver(s) or an immediate family member. &quot;Immediate family member&quot; is defined as the caregiver’s spouse, partner, parent, sibling, or child. The maximum number of hours allowable under this exception criterion is 24 hours per day for a maximum of seven days.</td>
</tr>
</tbody>
</table>

The total number of additional PDN hours cannot exceed two hours per day, for a maximum of six months.

The written POC and community-based care coordination activities must include strategies directed toward stabilizing service supports and/or the family situation. The maximum number of hours varies by the beneficiary’s Intensity of Care category: High = maximum of 18 hours per day; Medium = maximum of 14 hours per day; Low = maximum of 10 hours per day. The length of time for this exception is three months or the time needed to stabilize service supports and/or family situation, whichever is less. A one-time extension of up to three months may be made if there is documented progress toward achieving the stabilized home environment.
2.6 CHANGE IN BENEFICIARY'S CONDITION/PDN AS A TRANSITIONAL BENEFIT

Medicaid policy requires that the integrated POC be updated as necessary based on the beneficiary's medical needs. Additionally, when a beneficiary's condition changes, warranting a decrease in the number of approved hours or a discontinuation of services, the provider must report the change to the appropriate authorizing agent (i.e., the PRD, Children's Waiver, or Habilitation Supports Waiver) in writing. Changes such as weaning from a ventilator or tracheostomy decannulation can occur after months or years of services, or a beneficiary's condition may stabilize to the point of requiring fewer PDN hours or the discontinuation of hours altogether. It is important that the provider report all changes resulting in a decrease in the number of hours to the authorizing agent as soon as they occur, as well as properly updating the POC. MDHHS will seek recovery of monies inappropriately paid to the provider if, during case review, the authorizing agent determines that a beneficiary required fewer PDN hours than was provided and MDHHS was not notified of the change in condition.

In some cases, the authorized PDN services may be considered a transitional benefit. In cases such as this, one of the primary reasons for providing services should be to assist the family or caregiver(s) to become independent in the care of the beneficiary. The provider, in collaboration with the family or caregiver(s), may decide that the authorized number of hours should be decreased gradually to accommodate increased independence on the part of the family, caregiver(s), and/or beneficiary. A detailed exit plan with instructions relating to the decrease in hours and possible discontinuation of care should be documented in the POC. The provider must notify the authorizing agent that hours are being decreased and/or when the care will be discontinued.

2.7 HOSPICE SERVICES

If a beneficiary receiving private duty nursing (PDN) becomes eligible for hospice, the hospice is required to notify the PRD before a claim is submitted for the services. (Refer to the Directory Appendix for contact information.)

The hospice must provide the following information on agency letterhead to the PRD.

- beneficiary name and Medicaid ID number;
- a request for a case review and approval of hospice services;
- a statement confirming that the beneficiary has been certified terminally ill with six months or less to live, signed by the hospice medical director and the beneficiary's attending physician; and
- name, e-mail address, and telephone number of the contact person.

PRD staff may request additional medical record documentation for their review. PDN authorization cannot occur unless the hospice submits the requested documentation to the PRD. If services are approved, the hospice must work with the PDN agency to develop a coordinated POC. Both the hospice and PDN staff must ensure that duplication of services does not occur. While hospice maintains the lead in coordinating the services, the PDN agency must continue to obtain prior authorization from MDHHS for the PDN services. Hospice services must be utilized to the fullest extent before PDN services will be authorized.
This does not apply to beneficiaries receiving PDN services under the Habilitation Supports Waiver (HSW) and over 21 years old, or the MI Choice Waiver. For beneficiaries under the HSW (over 21 years old), providers should contact the beneficiary’s case manager to inform them of hospice eligibility. If the beneficiary is under the MI Choice Waiver, providers should contact the MI Choice Waiver Supports Coordinator.

Section 5 – Becoming a PACE Organization ............................................. 11
SECTION 1 – GENERAL INFORMATION

The Program of All-Inclusive Care for the Elderly (PACE) is an innovative model of community-based care that enables elderly individuals, who are certified by their state as needing nursing facility care, to live as independently as possible.

PACE provides an alternative to traditional nursing facility care by offering pre-paid, capitated, comprehensive health care services designed to meet the following objectives:

- Enhance the quality of life and autonomy for frail, older adults;
- Maximize the dignity of, and respect for, older adults;
- Enable frail, older adults to live in the community as long as medically and socially feasible; and
- Preserve and support the older adult’s family unit.

The PACE capitated benefit was authorized by the Balanced Budget Act of 1997 and features a comprehensive service delivery system with integrated Medicare and Medicaid financing.

An interdisciplinary team, consisting of professional and paraprofessional staff, assesses beneficiary needs, develops a plan of care, and monitors delivery of all services (including acute care services as well as nursing facility services, when necessary) within an integrated system for a seamless provision of total care. Typically, PACE organizations provide social and medical services in an adult day health center supplemented by in-home and other services as needed.

The financing model combines payments from Medicare and Medicaid, allowing PACE organizations to provide all needed services rather than be limited to those reimbursable under the Medicare and Medicaid fee-for-service systems. PACE organizations assume full financial risk for beneficiary care without limits on amount, duration, or scope of services.

Physicians currently treating Medicaid patients who are in need of nursing facility care may consider PACE as an option. Hospital discharge planners may also identify suitable candidates for referral to PACE as an alternative to a nursing facility. (Refer to the Directory Appendix for PACE contact information.)
SECTION 2 — SERVICES

The PACE organization becomes the sole source of services for Medicare and Medicaid beneficiaries who choose to enroll in a PACE organization.

The PACE organization is able to coordinate the entire array of services to older adults with chronic care needs while allowing elders to maintain independence in the community for as long as possible. The PACE service package must include all Medicare and Medicaid covered services, in addition to other services determined necessary by the interdisciplinary team for the individual beneficiary. Services must include, but are not limited to:

- Adult day care that offers nursing, physical, occupational and recreational therapies, meals, nutritional counseling, social work and personal care
- All primary medical care provided by a PACE physician familiar with the history, needs and preferences of each beneficiary, all specialty medical care, and all mental health care
- Interdisciplinary assessment and treatment planning
- Home health care, personal care, homemaker and chore services
- Restorative therapies
- Diagnostic services, including laboratory, x-rays, and other necessary tests and procedures
- Transportation for medical needs
- All necessary prescription drugs and any authorized over-the-counter medications included in the plan of care
- Social services
- All ancillary health services, such as audiology, dentistry, optometry, podiatry, speech therapy, prosthetics, durable medical equipment, and medical supplies
- Respite care
- Emergency room services, acute inpatient hospital and nursing facility care when necessary
- End-of-Life care
SECTION 3 – ELIGIBILITY AND ENROLLMENT

3.1 ELIGIBILITY REQUIREMENTS

To be eligible for PACE enrollment, applicants must meet the following requirements:

- Be age 55 years or older.
- Meet applicable Medicaid financial eligibility requirements. (Eligibility determinations will be made by the Michigan Department of Health and Human Services (MDHHS).)
- Reside in the PACE organization’s service area.
- Be capable of safely residing in the community without jeopardizing health or safety while receiving services offered by the PACE organization.
- Receive a comprehensive assessment of participant needs by an interdisciplinary team.
- A determination of functional/medical eligibility based upon the online version of the Michigan Medicaid Nursing Facility Level of Care Determination (LOCD) that was conducted online within fourteen (14) calendar days from the date of enrollment into the PACE organization.
- Be provided timely and accurate information to support Informed Choice for all appropriate Medicaid options for Long Term Care.
- Not concurrently enrolled in the MI Choice program.
- Not concurrently enrolled in an HMO.

3.2 COMPLETION OF THE MEDICAID NURSING FACILITY LOC DETERMINATION

A PACE applicant’s eligibility for coverage of nursing facility services and enrollment in the PACE organization is determined by the online application of the Michigan Medicaid Nursing Facility Level of Care Determination (LOCD). The PACE organization will not be reimbursed for nursing facility services rendered when the applicant is determined not to meet the LOCD criteria. Providers must submit the LOCD information into its online version no later than fourteen (14) calendar days following the start of services. Instructions and required forms related to the completion of the Medicaid Nursing Facility Level of Care Determination are available on the MDHHS website. (Refer to the Directory Appendix for website information.)

The LOCD must be completed by a health professional (physician, registered nurse, licensed practical nurse, clinical social worker (BSW or MSW), or physician assistant) representing the proposed provider. Nonclinical staff may perform the evaluation when clinical oversight by a professional is performed. The PACE organization will be held responsible for enrolling only those participants who meet the criteria outlined in this section.
The Michigan Medicaid Nursing Facility Level of Care Determination must be completed using the online version in the following situations:

- all new enrollments of Medicaid-eligible beneficiaries.
- re-enrollment of Medicaid-eligible beneficiaries.
- significant change in condition of a current PACE Medicaid-eligible beneficiary.

The online LOCD must be completed only once for each admission or readmission to the program.

### 3.3 INFORMED CHOICE

When a beneficiary is determined eligible for nursing facility level of care through completion of the online LOCD, he must be provided timely and accurate information to support informed choice for all appropriate Medicaid options for long-term care.

Process Guidelines available on the MDHHS website define the required process. (Refer to the Directory Appendix for website information.)

### 3.4 NURSING FACILITY LEVEL OF CARE EXCEPTION PROCESS - EXCEPTION REVIEW

A Nursing Facility (NF) Level of Care (LOC) Exception Process is a review that is available for financially eligible beneficiaries who have demonstrated a significant level of long term care need but do not meet the LOCD. The NF LOC Exception Process is initiated when the PACE organization telephones the MDHHS designee and requests the NF LOC Exception Review on the date that the applicant was determined ineligible based on the online version of the LOCD. The NF LOC Exception criteria and information on how to request an Exception Review is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

### 3.5 TELEPHONE INTAKE GUIDELINES

The Telephone Intake Guidelines are questions that identify potential PACE participants for further assessment. The Telephone Intake Guidelines do not determine program eligibility. Use of the Telephone Intake Guidelines is at the discretion of the PACE organization. The guidelines are available on the MDHHS website. (Refer to the Directory Appendix for website information.)

### 3.6 DEEMING PROCESS

MDHHS may deem a participant who no longer meets the State Medicaid nursing facility level of care requirements to continue to be eligible for the PACE program if, in the absence of continued coverage under the program, MDHHS determines the participant reasonably would be expected to meet the nursing facility level of care requirement in the next six months.

To be eligible for deeming, a participant must meet the following requirements:

- Participant must have been receiving PACE services for at least the past six months and no longer than one year.
- Participant no longer meets nursing facility level of care requirements.
- In the absence of continued coverage under PACE, the participant reasonably would be expected to meet the nursing facility level of care requirement in the next six months.

When a deemed PACE participant has been in the program for one year, the PACE organization must conduct an in-person annual reassessment to determine if the participant meets nursing facility level of care.

### 3.7 Enrollment and Disenrollment

PACE provider staff must submit PACE enrollment and disenrollment forms electronically within CHAMPS by the end of card cut-off.

#### 3.7.A. Enrollments

PACE providers must upload and submit the following signed enrollment materials with the electronic enrollment.

- Enrollment Agreement Benefits and Coverages
- Nursing Facility Level of Care Freedom of Choice Form
- If necessary, Durable Power of Attorney (DPOA) or guardianship documents

Once completed and all eligibility requirements have been checked, CHAMPS will assign the participant a PET code and enrollment start date.

#### 3.7.B. Disenrollments

<table>
<thead>
<tr>
<th>Voluntary</th>
<th>A signed disenrollment form must be uploaded to CHAMPS.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Involuntary</td>
<td>Once the electronic form has been completed, PACE providers will submit appropriate supporting documentation to their MDHHS contract manager. MDHHS will review and approve or deny the electronic disenrollment in CHAMPS and determine the appropriate date of disenrollment.</td>
</tr>
<tr>
<td>Death</td>
<td>Providers will enter the date of death with the electronic disenrollment. A completed disenrollment will end-date the corresponding PET code.</td>

</tbody>
</table>

### 3.8 Annual Recertification

MDHHS must annually certify that PACE participants continue to meet PACE financial eligibility requirements. PACE organizations must also ensure that participants continue to meet the LOCD criteria on an ongoing basis. If the participant continues to meet the LOCD criteria, it must be demonstrated in the medical record by way of initial comprehensive assessments, reassessments and progress notes. Additional online LOCDs are not conducted for the purpose of determining ongoing LOCD eligibility.
If the PACE participant no longer meets the LOCD criteria, federal regulations may deem the participant to be eligible for the PACE program until the next annual reevaluation if, in the absence of continued coverage under PACE, the participant reasonably would be expected to again meet the nursing facility level of care criteria within the next six months.

3.9 RETROSPECTIVE REVIEW AND MEDICAID RECOVERY

At random and whenever indicated, MDHHS will perform retrospective reviews to validate the Michigan Medicaid Nursing Facility Level of Care Determination. If the participant is found to be ineligible for PACE services, MDHHS will recover all Medicaid payments made for PACE services rendered during the period of ineligibility. The Retrospective Review process (defined in the Beneficiary Eligibility and Admission Process Section of the Nursing Facility Coverages Chapter) is applicable to PACE organizations.

3.10 ADVERSE ACTION NOTICE

When the provider determines that the beneficiary does not qualify for services based on the Michigan Medicaid Nursing Facility Level of Care Determination, the organization must immediately issue an adverse action notice to the beneficiary or his authorized representative. The action notice must include all of the language of the sample letters for long term care. Copies of the letters are available on the MDHHS website. (Refer to the Directory Appendix for website information.)

As with any benefit denial, the beneficiary may request an administrative hearing. The Michigan Administrative Hearing System (MAHS) Policies and Procedures Manual explains the process by which each different case is brought to completion. The manual is available for review on the MDHHS website. (Refer to the Directory Appendix for MAHS contact and website information.)

3.11 NURSING FACILITY LEVEL OF CARE PROCESS - IMMEDIATE REVIEW UPON ISSUANCE OF AN ADVERSE ACTION NOTICE

The MDHHS designee may conduct a Nursing Facility (NF) Level of Care (LOC) Process Immediate Review for a Medicaid pending/eligible beneficiary who was determined functionally/medically ineligible based on the online Michigan Medicaid Nursing Facility Level of Care Determination. The beneficiary, or their representative, must request an Immediate Review before noon of the first working day after the date of receipt of the notice as follows:

- The MDHHS designee will request the PACE organization to provide medical documentation by close of business of the first business day after the date the beneficiary requests an Immediate Review.
- The MDHHS designee will review the medical documentation, obtain information from the beneficiary and/or their representative, and notify the beneficiary and the provider of the determination within three business days of receipt of the medical documentation.

The beneficiary (or representative) may still request an MDHHS appeal of the Michigan Medicaid Nursing Facility Level of Care Determination. (Refer to the Directory Appendix for contact information.)
3.12 FREEDOM OF CHOICE

When an applicant has been determined eligible for nursing facility level of care through completion of the online LOCD, the beneficiary must be informed of his benefit options and elect to receive services in a specific program. This election must take place prior to initiating PACE services.

The applicant (or legal representative) must be informed of the following:

- services available under PACE
- services available in other community settings, such as the MI Choice Program
- services available through Medicaid-reimbursed nursing facilities

If applicants are interested in nursing facility or MI Choice Program care, the PACE organization must provide appropriate referral information using the Access Guidelines to Medicaid Services for Persons with Long Term Care Needs. These guidelines are available on the MDHHS website. (Refer to the Directory Appendix for website information.)

Applicants must acknowledge that they have been informed of their program options in writing by signing the Freedom of Choice form that is witnessed by the applicant's representative when appropriate. A copy of the completed form for non-participants must be retained for a period of three years. The completed form must be kept in the medical record if the applicant chooses to receive PACE services.

A copy of the Freedom of Choice form is included with the Michigan Medicaid Nursing Facility Level of Care Determination on the MDHHS website. (Refer to the Directory Appendix for website information.)

3.13 APPLICANT APPEALS

3.13.A. FINANCIAL ELIGIBILITY

A determination that an applicant is not financially eligible for Medicaid is an adverse action. Applicants may appeal to MDHHS. (Refer to the Directory Appendix for contact information.)

3.13.B. FUNCTIONAL/MEDICAL ELIGIBILITY

A determination that a beneficiary is not functionally/medically eligible for PACE services is an adverse action. If the beneficiary and/or representative disagrees with this determination, they have the right to request an administrative hearing before an administrative law judge. Information regarding the appeal process may be found on the Michigan Administrative Hearing System (MAHS) website. (Refer to the Directory Appendix for website information.)

3.13.C. PACE SERVICES

Noncoverage or nonpayment of services by the PACE organization for a beneficiary enrolled in PACE is an adverse action. If the beneficiary and/or representative disagrees with the noncoverage or nonpayment of services by the PACE organization, they have the right to request an administrative hearing before an administrative law judge. Information regarding the appeal process may be found on the Michigan Administrative
Hearing System (MAHS) website. (Refer to the Directory Appendix for website information.) The beneficiary may request continuation of the disputed service with the understanding that he may be liable for the cost of the disputed service if the determination is not made in his favor.

3.14 PROVIDER APPEALS

A Retrospective Review of the Michigan Medicaid Nursing Facility Level of Care Determination that results in a denial is an Adverse Action for PACE when MDHHS proposes to recover payments made for services rendered to the beneficiary for whom the Retrospective Review was conducted. If the PACE organization disagrees with the MDHHS Adverse Action Notice, the PACE organization may appeal if their written request is received by the Michigan Administrative Hearing System within 30 calendar days from the date of the MDHHS Adverse Action Notice.

Information regarding the MDHHS appeal process is available in the General Information for Providers Chapter and on the MDHHS website. (Refer to the Directory Appendix for website information.)
SECTION 4 – PACE ORGANIZATION EVALUATION CRITERIA

4.1 INITIAL APPLICATIONS

A prospective PACE organization can be a not-for-profit or for profit private or public entity that is primarily engaged in providing PACE services and participates in both Medicare and Medicaid. Michigan licensure as a health care entity is not required; however, unlicensed entities may only serve Medicare and Medicaid beneficiaries. Federal regulations (42 CFR Part 460) describe administrative requirements for PACE. At a minimum, prospective entities must meet the federal requirements for PACE organizations, enroll as a Michigan Medicaid provider, and complete a feasibility study. MDHHS will evaluate potential PACE organizations using the following criteria:

- Submission of a feasibility study that:
  - identifies the proposed service area;
  - shows evidence of demand for PACE services in the proposed service area (the potential pool of PACE beneficiaries should be sufficient to have 250 to 300 beneficiaries enrolled within four to five years of start-up);
  - identifies competing PACE organizations, documents the organization’s timeline for development and anticipated costs;
  - identifies the anticipated source of referrals for potential beneficiaries; and
  - assesses the supply of alternative long-term care services already in existence in the community.

If MDHHS receives multiple letters of intent for the same service area, the feasibility studies will be reviewed in the order in which they are received.

- Organizational commitment to principles consistent with the PACE model.
- Evidence of experience in providing primary, acute and/or long-term care services to the target population and evidence of positive community support.
- Evidence that the organization has the depth in leadership and experience required to develop and implement PACE successfully.
- Evidence that the PACE organization will either be cost neutral or save money for long term care services provided by MDHHS in the PACE organization’s service area (i.e., total Medicaid expenditures for services in the service area will not increase and may decrease).
- Assurance of adequate financial capacity to fund program development and start-up costs, including identification of patient capacity and break-even consideration.
- Evidence of the proposed provider network and assurance that the organization will have staff and professionals experienced in providing care to the target population.
- Evidence that the Executive (Program) Director position will be staffed with a full-time employee.
- Evidence that the key positions of Medical Director, Center Manager, Financial Manager, and Quality Improvement Manager are sufficiently staffed, as determined by MDHHS, to meet the needs of the PACE organization.
- Ability to meet federal PACE requirements.
A prospective PACE program must submit to MDHHS:

- Feasibility Study: within 90 calendar days of submitting their letter of intent.
- Provider Application: within one year of MDHHS approval of the feasibility study.

Other evaluation criteria may be considered and will be available to organizations who file a letter of intent with MDHHS to become a PACE organization.

### 4.2 Expansion Applications

Expansion applications will not be accepted by MDHHS until the first CMS audit has been completed with good standing and the organization is fiscally sound.

### 4.3 Alternative Care Settings

To be eligible to request an ACS, the following guidelines must be met:

- The PACE organization must have successfully completed their first trial period audit and be in good standing with CMS, per CMS audits.
- An ACS participant must belong to a PACE organizations center.
- The PACE organization’s enrollment limit must have adequate space to accommodate projected ACS attendants.
- MDHHS must tour the proposed ACS location prior to approval.
- The ACS must be less than one (1) hour travel time from PACE Center.

The ACS is subject to MDHHS Readiness Review and will be included in the PACE organization’s annual audits. ACSs are also subject to all state and federal regulations.

The following documents must be submitted to MDHHS when an ACS is requested:

- Previous year’s annual financial report for the PACE organization;
- The PACE organization’s business plan for ACS;
- Financial projection for ACS site (to include cost of ACS site, renovations, staff, equipment, etc.);
- Description of what population of participants will attend the ACS;
- Description of what and how services will be provided at the ACS:
  - ACS services must include, but are not limited to, meals, activities, personal care, laundry, and nursing (triage);
- Description of how services that are not provided at the ACS will be available to participants; and
- Description of plan for participants to attend a PACE Center, at least quarterly or more often, as determined by the PACE organization interdisciplinary team.

MDHHS may request additional information when necessary.
SECTION 5 — BECOMING A PACE ORGANIZATION

Information regarding the process to become a PACE organization is available on the MDHHS website. Any entity seeking to become a PACE organization in Michigan may contact MDHHS regarding state-specific requirements. (Refer to the Directory Appendix for contact and website information.)

SECTION 1 – GENERAL INFORMATION

1.1 RURAL HEALTH CLINIC CERTIFICATION

This chapter provides policy and reimbursement information specific to Rural Health Clinics (RHCs) and is to be used in combination with other chapters of the Medicaid Provider Manual.

In compliance with the Rural Health Clinic Services Act of 1977 (Public Law 95-210), the Medicaid program reimburses certified and enrolled RHCs for services provided to Medicaid beneficiaries in the State of Michigan. To become certified as a RHC in Michigan, clinics must make application for RHC status through the designated state-certifying agency. (Refer to the Directory Appendix for contact information.) Based on information in the application, the certifying agency determines if an applicant clinic meets the staffing and location requirements for certification. If a clinic appears eligible, an on-site visit is conducted. If a clinic meets all the requirements, the certifying agency makes a recommendation for certification to the Centers for Medicare & Medicaid Services (CMS). CMS makes the final determination as to a clinic’s eligibility for RHC status and notifies the Michigan Department of Health and Human Services (MDHHS) when eligibility is granted.

RHCs may be provider-based or independently operated. Provider-based RHCs may be operated by a hospital, skilled nursing facility (SNF) or home health agency (HHA). An independent RHC is permitted to occupy a permanent structure or be located in a mobile unit. RHCs may be publicly or privately held clinics and they may be operated on a profit or not-for-profit basis.

1.2 GENERAL REIMBURSEMENT INFORMATION

Medicaid-enrolled RHCs are reimbursed with a prospective payment system (PPS) in compliance with Medicare, Medicaid and SCHIP Benefits Improvement and Protection Act (BIPA) of 2000. Section 702 of BIPA created a new section 1902(bb) in the Social Security Act. Specific information related to RHC reimbursement is contained in the Rate Setting Section of this chapter.
SECTION 2 – MEDICAID ENROLLMENT

2.1 PROVIDER ENROLLMENT

MDHHS requires all RHCs to have a Group (Type 2 - Organization) National Provider Identification (NPI) number in order to receive the enhanced RHC reimbursement. For RHCs with multiple locations and multiple rates, an NPI number for each location may be necessary so that the proper reimbursement rate of all encounters can be determined. If the RHC fails to obtain and/or use the correct NPI number, the RHC reimbursement will be determined under fee for service rules. The NPI number must be reported to MDHHS before billing Medicaid services.

Individual providers (doctors, dentists, optometrists, etc.) are required to obtain a Provider (Type 1 - Individual) NPI number and report the number to MDHHS.

All inquiries related to provider enrollment should be directed to the MDHHS Provider Enrollment Unit. (Refer to the Directory Appendix for contact information.)

2.1.A. NON-PHYSICIAN BEHAVIORAL HEALTH SERVICE

Licensed psychologists (Master’s Limited or Doctoral level), social workers (Master’s level), professional counselors (Master’s or Doctoral level), and marriage and family therapists who serve Medicaid beneficiaries are required to enroll as Medicaid providers. The NPI of the psychologist, social worker, professional counselor, or marriage and family therapist is reimbursed under the RHC PPS. These services must be billed using the appropriate evaluation and management (E/M) codes listed in the American Medical Association’s Current Procedural Terminology (CPT) Book or Healthcare Common Procedure Coding System (HCPCS) codes. Providers should refer to the Non-Physician Behavioral Health provider database on the MDHHS website for the current list of covered procedure codes. The list of allowable services is reviewed annually and updated as applicable. Refer to the Additional Code/Coverage Resource Materials Section of the General Information for Providers Chapter for additional information regarding coverage parameters.

For information relating to service coverage and authorization requirements, refer to the Practitioner and the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapters of this manual.

2.2 NONENROLLED PROVIDERS

Professional services performed by limited licensed psychologists (except as noted in Section 333.18223 of the Public Health Code), social workers, professional counselors, marriage and family therapists, or student interns must be performed under the supervision of an enrolled, fully-licensed provider of the same profession. These services are reimbursed under the RHC PPS. Since MDHHS does not directly enroll these providers, claims for their services must be billed using the NPI of the supervising provider responsible for ensuring the medical necessity and appropriateness of the services. Claims submitted with the non-enrolled provider’s NPI in the rendering provider field will reject.
SECTION 3 – BENEFITS

RHC services subject to PPS reimbursement are RHC services defined at Section 1861 (aa)(1)(A)-(C) of the Social Security Act.

- Physician (MD, DO), podiatrist, chiropractor, and optometrist professional services, and services and supplies incidental to physician services, including certain drugs and biologicals that cannot be self-administered, immunizations and their administration.
- Licensed physician’s assistant, certified family nurse practitioner (CFNP), certified pediatric nurse practitioner (CPNP) and certified nurse midwife (CNM) services, and the services and supplies incidental to these services as would otherwise be furnished by, or incidental to, physician services.
- Clinical psychologist and clinical social worker services, and services and supplies incidental to these services as would otherwise be furnished by, or incidental to, physician services.
- Dental services, and services and supplies incidental to dental services.

Primary care services that are covered and reimbursed under the PPS are defined as the above listed services provided in a place of service that is the RHC’s office or clinic, patient’s home, skilled NF, domiciliary facility or NF.

3.1 SERVICES AND SUPPLIES INCIDENTAL TO AN RHC VISIT

RHC services and supplies incidental to an RHC visit are included in the PPS reimbursement if the service or supply is:

- Of a type commonly furnished in a physician's office.
- Of a type commonly rendered either without charge or included in the professional bill.
- Furnished as an incidental, although integral part of professional services furnished by a physician (MD, DO), dentist, optometrist, podiatrist, chiropractor, CNP (who has a collaborative agreement with a physician), CNM or licensed physician’s assistant.
- Furnished under the direct personal supervision of a physician (MD, DO), dentist, optometrist, podiatrist, chiropractor, CNP (who has a collaborative agreement with a physician), CNM or licensed physician’s assistant.
- In the case of a service, furnished by a member of the clinic’s health care staff who is an employee of the clinic.

The direct personal supervision requirement is met in the case of a CNP, CNM, or licensed physician’s assistant only if such a person is permitted to supervise such services under the written policies governing the RHC.

3.2 SERVICES EXCLUDED FROM RHC REIMBURSEMENT

Payment for any other Medicaid covered services not defined as a primary care service are Medicaid-covered under fee-for-service (FFS) policies. Services not listed as primary care services are excluded from the RHC prospective payment rate (PPR).
3.3 **Telemedicine**

An RHC can be either an originating or distant site for telemedicine services. Refer to the Billing & Reimbursement for Institutional Providers Chapter for specific billing instructions. Refer to the Telemedicine Section of the Practitioner Chapter for additional information regarding telemedicine services.

Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.

3.4 **Children's Health Insurance Program Services**

Section 503 of the Children’s Health Insurance Program Reauthorization Act (CHIPRA) of 2009 authorizes states to incorporate a PPS rate for reimbursement of services provided to children receiving health care services through RHCs when covered by the Children’s Health Insurance Program (CHIP). Reimbursement for eligible services must comply with the requirements of section 1902 (bb) of the Social Security Act.

For beneficiaries enrolled in state CHIP-funded programs (MIChild, Healthy Kids–Expansion, and Maternity Outpatient Medical Services [MOMS]), providers must bill the program according to their existing processes. For beneficiaries enrolled in a health plan, the MDHHS HCRD will perform an annual reconciliation of these encounters provided by RHCs. (Refer to the Eligibility Groups Subject to PPS Methodology subsection of this chapter for additional information.)

For Healthy Kids–Expansion, MIChild and MOMS beneficiaries, the HCRD will perform an annual reconciliation of these encounters provided by RHCs. The RHC PPS rates established for eligible CHIP services are equivalent to those applicable to Medicaid for each respective year they are in effect.
SECTION 4 – ENCOUNTERS

4.1 DEFINITION

Reimbursement to RHCs under the PPS requires that each office visit that meets the following definition of an encounter be counted for payment purposes.

An encounter is a face-to-face visit between a patient and the provider of health care services who exercises independent judgment in the provision of health care services. For a health service to be defined as an encounter, the provision of the health service must be recorded in the patient’s medical record.

Encounters include provision of service by the following professionals:

- Licensed physicians (MD, DO), dentists, optometrists, podiatrists, chiropractors, CNPs (who have a collaborative agreement with a physician), CNMs, physician assistants or dental hygienists.
- Clinical psychologists or clinical social workers.

The following examples help to define an encounter:

- To meet the encounter criterion for independent judgment, the provider must be acting independently and not be assisting another provider. For example, a nurse assisting a physician during a physical examination by taking vital signs, taking a history, or drawing a blood sample is not credited with a separate encounter.
- Such services as drawing blood, collecting urine specimens, performing laboratory tests, taking x-rays, filling/dispensing prescriptions, in and of themselves, do not constitute encounters. However, these procedures may accompany professional services performed by physicians, dentists, or other health providers that do constitute encounters.
- An RHC may be credited for more than one encounter by the same health professional on the same day. For example, a beneficiary suffers illness or injury requiring additional diagnosis or treatment on the same date of service, or a patient sees a physician for flu symptoms early in the day and then later the same day sees the same physician for a broken leg. These visits are classified as two encounters, and the patient’s medical record must document the circumstances of the two encounters.
- An RHC may be credited for encounters by different health professionals on the same day. For example, if a patient first sees a physician at the RHC and then sees a clinical psychologist, these visits are classified as two encounters.
- An encounter may take place in the RHC or at another approved location.

The encounter criteria are not met in the following circumstances:

- Provider participation in a community meeting or group session that is not designed to provide health services.
- When the only service provided is part of a large-scale effort, such as a mass immunization program, screening program, or community-wide service program.
Nursing services such as taking vital signs, taking a history, drawing a blood sample, collecting urine specimens, performing laboratory tests, taking x-rays, and/or filling or dispensing prescriptions.

- Calling in prescriptions, filling out insurance forms, etc.
- Allergy injection(s).

### 4.2 Eligibility Groups Subject to PPS Methodology

The following list identifies Medicaid eligibility groups that are subject to the PPS methodology:

<table>
<thead>
<tr>
<th>Medicaid</th>
<th>RHC primary care services constitute encounters covered by Medicaid.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Qualified Medicare Beneficiaries</td>
<td>Medicaid is billed coinsurance and deductibles for Qualified Medicare Beneficiaries (QMBs), and the services covered by Medicare are included as encounters.</td>
</tr>
</tbody>
</table>
| Medicaid Health Plan Enrollees | Medicaid-covered services provided by a RHC to Medicaid-eligible beneficiaries enrolled with a Medicaid Health Plan (MHP) are Medicaid encounters if the following conditions are met:  
  - The RHC and MHP must have a signed contract outlining payment provisions in order for the RHC to provide Medicaid-covered services to the MHP enrollee.  
  - The contract must provide for the MHP to reimburse the RHC at a fair market rate for similarly situated beneficiaries served by a non-RHC provider. The MHP must implement a level of payment equal to, or above, that of other subcontracting arrangements when entering into a subcontract with a RHC.  
  - The RHC must file information with the MDHHS HCRD in a format determined by MDHHS showing encounters and payments of Medicaid beneficiaries enrolled with MHP.  
  - RHCs may not bill Medicaid for MHP beneficiaries.  
  - After verification of the fair market rate by the HCRD, the difference between the RHC prospective payment rate and MHP payments are reconciled by MDHHS annually.  
  - The contract between RHCs and MHP services is subject to review and verification by MDHHS. |
| Healthy Kids Dental | Dental services provided to Medicaid beneficiaries enrolled in the Healthy Kids Dental program are eligible for the PPR. RHCs should report Medicaid information on encounters and revenue in the annual reconciliation report. The RHC receives the difference between the PPR and the revenue received as part of the annual reconciliation. |
| Medicare/Medicaid | Medicaid covered primary care services provided to Medicare/Medicaid dual eligibles are considered Medicaid encounters and are reimbursed under the PPS methodology. |

### 4.3 Eligibility Groups Not Subject to PPS Methodology

If an individual does not have Medicaid eligibility (i.e., is eligible for CSHCS-Title V), the services and costs are not Medicaid RHC services. CSHCS may be paid FFS rates only.
SECTION 5 – RATE SETTING

The RHC is reimbursed on a per visit basis for RHC services. In accordance with section 1902(bb) of the Social Security Act, the PPS per visit payment is equal to 100 percent of the average of the RHC’s reasonable costs of providing Medicaid services during fiscal years 1999 and 2000. MDHHS defines reasonable costs as the per-visit amount approved and paid by Medicare. For RHCs that have a fiscal year ending other than September 30, the PPR is prorated based on the number of months in each period covered by a different prospective rate.

The per visit amount is adjusted each year (beginning on October 1, 2001) by 100 percent of the Medicare Economic Index for the prior calendar year (i.e., the adjustment effective October 1, 2001 reflects the index for calendar year 2000).

The per visit amount may also be adjusted to reflect changes in the scope of services provided to Medicaid beneficiaries by the RHC. An adjustment to the per-visit amount based upon a change in the scope of services becomes effective as determined by MDHHS.

Any rate setting/cost settlement related questions should be directed to the MDHHS HCRD. (Refer to the Directory Appendix for contact information.)

5.1 ESTABLISHING RATES FOR NEW CLINICS

An entity that initially qualifies as an RHC after fiscal year 2000 will be paid as follows:

- Upon enrollment, an interim prospective payment rate (PPR) will be established for new RHCs equal to the facility type average rate for the county in which they are located or the statewide average (if no previous average exists for the county subject to any limit applied to the specific facility type). The RHC will be cost settled at the end of its first fiscal year of operation.

- After the facility has been in operation for two full cost reporting periods, the average rate per visit for those two periods will be considered the revised PPR for the facility, subject to the following criteria:
  - The first year will be inflated to the second fiscal year end using the appropriate Medicare Economic Index (MEI) factors.
  - For independent RHCs, the rebased PPR shall not exceed the Medicare limit.
  - For provider-based RHCs (associated with a hospital with fewer than 50 enrolled beds), the PPR shall not exceed the statewide average cost per visit. The limit will increase annually at a minimum of the MEI factor.
  - For provider-based RHCs (associated with a hospital with 50 or more beds), the PPR shall not exceed the Medicare limit.

5.2 ALTERNATE PAYMENT METHODOLOGY

The State and the RHC may agree to an alternative payment methodology that provides reimbursement at least equal to that which an RHC would receive under the PPS.
5.3 Quarterly Payments

RHCs receive a quarterly payment. This payment is an estimate of the difference between the payment the RHC receives from various sources (FFS, MHP, Medicare and other insurance) and the amount the RHC should receive under the PPS. These quarterly payments are included in the annual reconciliation.
SECTION 6 – BILLING

6.1 BILLING RURAL HEALTH CLINIC SERVICES

RHC services must be billed according to instructions contained in the Billing & Reimbursement for Institutional Providers Chapter of this manual. RHCs must refer to that chapter for information needed to submit claims for Medicaid services, as well as information about how MDHHS processes claims and notifies the RHC of its action. If the RHC performs a service that must be billed on the professional claim form, refer to the Billing & Reimbursement for Professionals Chapter of this manual. Policies for specific services are found in the provider-specific chapters of this manual.

It is the responsibility of the RHC to properly bill all Medicaid FFS claims. Incorrect or improper billing may adversely affect reimbursement since the annual reconciliation and final reimbursement is based on approved claims.

The Group (Type 2 - Organization) NPI number must be used as the billing provider on all electronic and paper claims submitted to Medicaid. Do not use Provider (Type 1 - Individual) as the billing provider. The billing provider loop or field is mandatory to complete.

The NPI (Type 1 – Individual) number of the physician (MD or DO) overseeing the beneficiary’s care must be entered as the attending provider. The attending provider field is mandatory to complete. Additionally, the NPI (Type 1 – Individual) number of the practitioner who performed the service should be entered as the rendering provider. Do not enter a Group (Type 2) NPI number as the attending or rendering provider.

MDHHS will use the billing provider NPI field (Type 2 - Organization) to determine the number of encounters and calculate the settlement for the year-end reconciliation.

6.2 PLACE OF SERVICE REQUIREMENTS

Place of service codes are not applicable to institutional billing. However, if the RHC performs a service that must be billed on the professional claim form within the clinic, RHCs must use place of service (POS) code 72. For services provided outside the RHC, bill with the appropriate POS code noted in the Billing & Reimbursement for Professionals Chapter of this manual.

RHCs may provide Medicaid covered services in settings other than the RHC office, beneficiary’s home, nursing facility or domiciliary facility, but these services are not included in the PPS reimbursement methodology. Services provided outside of the settings noted here are reimbursed at FFS rates.

6.3 BILLING FOR MATERNITY CARE

Global codes for maternity care are used to reimburse a package of services (prenatal visits and delivery) at different places of service (RHC and hospital). In order for the RHC to be reimbursed for prenatal visits under the PPS methodology, the RHC should not bill for global maternity care. The claims for delivery and prenatal care should be billed separately. The claim for delivery should show a hospital place of service and will be paid under the FFS methodology. The claim for prenatal care will be reimbursed under the PPS methodology.

If the RHC elects to bill for global maternity care, all services will be reimbursed under the FFS rules.
6.4 Other Insurance

Billing instructions related to coordination of benefits are published in the Coordination of Benefits Chapter of this manual. Other insurance and all other payments received for services rendered to a Medicaid beneficiary must be reported. Even if the other insurance payment for a specific service exceeds the amount Medicaid would have paid, the RHC must still bill the procedure code to receive credit for the encounter. (Refer to the Billing & Reimbursement Chapters of this manual for specific billing guidelines.)

6.5 Medicare and Medicaid Crossover Claims

Refer to the Billing & Reimbursement Chapters of this manual for specific instructions regarding Medicare and Medicaid claims. If the Medicare payment exceeds the Medicaid fee screen, the appropriate FFS procedure code should still be billed to Medicaid for encounter and reconciliation purposes.

6.6 Copayments

Medicaid copayments for chiropractic, dental, physician, podiatry, and vision services are waived under the RHC benefit as part of the reconciliation. (Services requiring copayments are listed in the General Information for Providers Chapter of this manual.)

6.7 Dental Claims

RHCs providing dental services must refer to the Dental and to the Billing & Reimbursement for Dental Providers Chapters of this manual for information regarding program coverages, prior authorization requirements, claims completion and billing instructions.
SECTION 7 – RISK CONTRACTS

RHCs may enter into risk contracts with MHPs for nonprimary care services. However, these contracts are not included in the reconciliation process. All RHC reconciliations are for primary care services only.

7.1 SCOPE OF SERVICE

The prospective payment rate may be adjusted for an increase or decrease in scope of service. Any facility approved for rebasing due to a change in scope of services shall be treated as a new facility. In order to qualify for a scope of service change, the cost related to the specific change must account for an increase or decrease to the existing PPR of five percent or greater. A facility that changes classification to a system utilizing a different rate limit or methodology shall be considered a change of scope (by default). For example, an independent RHC that changes ownership to a provider-based RHC when the hospital has less than 50 beds is considered to have a change of scope.

7.1.A. INCREASE IN SCOPE OF SERVICE

An increase in scope of service results from the addition of a new professional staff member (i.e., contracted or employed) who is licensed to perform medical services that are approved RHC benefits that no current professional staff is licensed to perform.

7.1.B. DECREASE IN SCOPE OF SERVICE

A decrease in scope of service results when no current professional staff member is licensed to perform the medical services currently performed by a departing professional staff member.

7.1.C. CHANGES THAT DO NOT CHANGE THE SCOPE OF SERVICE

An increase or decrease in scope of service does not result from any of the following (although some of these changes may occur in conjunction with a change in scope of service):

- an increase, decrease or change in number of staff working at the clinic.
- an increase, decrease or change in office hours.
- an increase, decrease or change in office space or location.
- the addition of a new site that provides the same set of services.
- an increase, decrease or change in equipment or supplies.
- an increase, decrease or change in the number or type of patients served.
7.2 NOTICE OF INTENT TO CHANGE SCOPE OF SERVICE

If a RHC intends to change its scope of service, the MDHHS HCRD must be notified 90 days before any financial commitments (i.e., money paid or committed to be paid, contracts signed, etc.) have been made. Notification should include the following documentation:

- Complete description of the service to be changed (addition or deletion).
- A listing of procedure codes to be billed as a result of this new service.
- A budget for the fiscal year showing an estimate of the total increase or decrease in cost resulting from change.
- An estimate of the change in number of encounters.
- Estimates of the cost change on the current Medicaid encounter rate.
- The proposed customary charges for this service by the RHC.
- The customary charges for this service by other providers in the area served by this RHC.
- The amount to be paid by an MHP for this service for various programs (Medicare/Medicaid).
- The current Medicare encounter rate.
- Medicare fee screen for this service for non-full cost providers.
- Total encounters for last two years by program (Medicaid, Medicare, uninsured, etc.), and type (MHP, fee screen/contracted amount).
- Estimated change in encounters by program for two fiscal periods following the change in scope of service.
- Copies of notices, certifications, applications, approvals and other documentation from the state-licensing agency, CMS, Medicare intermediary, or other organizations documenting the change in scope of service.
- Other information showing cost, encounters or approvals/denials of the change.
- Other information as requested by the HCRD.

After a review of the information submitted, the HCRD notifies the RHC of its determination regarding a rate change, including the effective date of any change.
SECTION 8 — RECONCILIATION REPORTING

Medicaid Reconciliation Reports must be completed by each RHC in order to receive reimbursement under the PPS.

The RHC must file the following documents at the end of its fiscal year for PPS reimbursement:

- A copy of its filed Medicare Cost Report and Trial Balance
- A completed copy of the Medicaid Reconciliation Report

Encounter data for RHC services provided to beneficiaries through Medicaid Health Plans, Healthy Kids Dental, and/or regional Prepaid Inpatient Health Plans (PIHP) is accessible through the Community Health Automated Medicaid Processing System (CHAMPS).

No individual payment information is needed if payments are made on a capitated basis; however, a separate summary of the monthly payments must be provided.

Upon review and audit, MDHHS will reimburse the difference between the RHC PPS rate and the amount received from the Medicaid Health Plans, Healthy Kids Dental, and/or the regional Prepaid Inpatient Health Plan (PIHP).

8.1 REPORT FILING

RHCs must file Reconciliation Reports and supplemental documents to the MDHHS HCRD annually. Due dates are consistent with the Medicare Cost Report filing requirement. If the required reconciliation report and supplemental documents are not submitted within the required time limit, the RHC waives its right to the PPS reimbursement for that year.

The reconciliation report is the basis for determining future quarterly payments and the current year’s reconciliation. The report must be an original(s) and signed by the authorized individual who normally signs the RHC’s federal income tax return or similar reports and should be for the same fiscal period and cover the same sites as the Medicare Cost Report. Improperly completed or incomplete filings are returned to the facility for proper completion and must be resubmitted to MDHHS within 30 days of date of receipt.

8.2 ACCOUNTING AND RECORD KEEPING

RHCs must maintain, for a period of not less than seven years from the end of the fiscal year of the Reconciliation Report, financial and clinical records for the period covered by the reconciliation report that are accurate and in sufficient detail to substantiate the information reported. If there are unresolved issues at the end of this seven-year period, the records must be maintained until these issues are resolved.

The MDHHS HCRD retains each required Reconciliation Report and supplemental documents submitted by the RHC for seven years after issuance of a final decision. In the event there are unresolved issues at the end of this seven-year period, the report is maintained until such issues are resolved.
SECTION 9 – AUDIT, SETTLEMENTS AND APPEALS

An annual reconciliation is performed to assure that the prospective payment rate is paid to the RHC for all eligible encounters. The reconciliation process begins with the receipt of the Reconciliation Report and supplemental documents and ends with the issuance of the Notice of Amount of Program Reimbursement.

9.1 DESK REVIEWS AND FIELD AUDITS

The desk review may include procedures that:

- Verify the completeness and mathematical accuracy of all schedules in the report.
- Compare the Reconciliation Report with MDHHS paid claim and encounter data.
- Identify the need for supporting documentation and arrange to receive same.
- Identify the need for a field audit examination necessary to conclude final reconciliation calculations.
- Compare reported data with industry norms as an aid to the audit scope determination.

Field audits may be conducted to verify information on the Reconciliation Report.

9.2 MEDICARE AUDIT

The Medicare intermediary may perform audits of the RHC. These audit results may be used to verify information or for statistical purposes.

9.3 INITIAL RECONCILIATION AND SETTLEMENT

An initial reconciliation is calculated after the annual reconciliation report is received. The initial reconciliation is processed approximately four months after the reconciliation report is received, with the payment or recovery made at that time. Future quarterly payments are adjusted based on the information in the initial reconciliation.

9.3.A. UNDERPAYMENTS TO AN RHC

Based on the annual reconciliation, MDHHS reimburses any underpayment due an RHC through a gross adjustment. This gross adjustment is shown in a Remittance Advice (RA). MDHHS retains the right to withhold a portion of any initial payment based on individual circumstances.

9.3.B. OVERPAYMENTS TO AN RHC

Once a determination of overpayment has been made, the amount so determined is a debt owed to the State of Michigan and will be recovered by MDHHS. The recovery starts approximately 30 days after notification to the RHC. The gross adjustment stops all payments to the RHC’s physician(s) until the full amount is recovered.
9.4 Audit Adjustment Report

The Audit Adjustment Report contains a list of all Program data adjustments made to the Medicaid Reconciliation Report by MDHHS audit staff.

9.4.A. Audit Adjustment Report

The Audit Adjustment Report must be accepted or rejected by the RHC within 30 calendar days of its mailing date.

If the RHC accepts the findings contained in the Audit Adjustment Report, an appropriate officer of the RHC should sign the report and mail it to MDHHS HCRD. (Refer to the Directory Appendix for contact information.) A Notice of Amount of Program Reimbursement is then mailed to the RHC. No further administrative appeal rights are available for the adjustments contained in the Audit Adjustment Report.

If the RHC has not responded within this time period, MDHHS shall issue a Notice of Amount of Program Reimbursement that is the final determination of an adverse action. No further administrative appeal rights are available.

9.4.B. Notice of Amount of Program Reimbursement

The Notice of Amount of Program Reimbursement is the notice of final determination of an adverse action and is considered the offer of settlement for all reimbursement issues for the reporting period under consideration.

9.4.C. RHC Rejection of the Audit Adjustment Report

Within 30 calendar days of the mailing date of the Audit Adjustment Report, the RHC may reject any or all of the findings in the Audit Adjustment Report and request a post-audit conference.

The Post-Audit Conference is an informal process where the MDHHS HCRD staff and the RHC may resolve differences prior to an appeal and/or formal hearing. The process is initiated by the RHC after the receipt of the Audit Adjustment Report. The RHC must request in writing a Post-Audit Conference with the HCRD and indicate in that letter the area(s) of disagreement. The letter must state the appropriate regulation and/or other appropriate decisions that support the RHC’s position and be sent to MDHHS HCRD. (Refer to the Directory Appendix for contact information.)

The RHC or its representative must present, either before or at the time of the Post-Audit Conference, the audit staff with the documents and arguments that support its position relative to the disputed issue(s). The audit staff will explain to the RHC the basis for its findings. This step does not stop the recovery of monies due Medicaid.
9.5 Appeals

RHCs have the right to appeal any adverse action taken by MDHHS, unless that adverse action resulted from an action over which MDHHS had no control (e.g., Medicare termination, license revocation). The appeal must be submitted in writing and mailed to the Michigan Administrative Hearing System (MAHS). (Refer to the Directory Appendix for contact information.)

The appeal process is outlined in the MDHHS Medicaid Provider Reviews and Hearings administrative rules, Michigan Administrative Code R400.3402 through R400.3425. Any questions regarding the appeal process should be directed to the MAHS.

RHCs may appeal their respective Notice of Program Reimbursement if the contested issue(s) is other than those precluded due to failure to appeal rate adjustment(s) in the Audit Adjustment Report according to established time frames. Appeals accepted as appropriate are also governed by the aforementioned MDHHS Medicaid Provider Reviews and Hearings rules.

SECTION 1 – GENERAL INFORMATION [CHANGES MADE 4/1/19]

This chapter applies to enrolled Intermediate School Districts, Detroit Public Schools Community District, (revised 4/1/19) and Michigan School for the Deaf.

This chapter describes the coverage and reimbursement policy for direct medical services, targeted case management, and personal care services. Coverage applies to individuals up to the age of 21 who are eligible under the provisions of the Individuals with Disabilities Education Act (IDEA) of 1990 as amended in 2004 and to those enrolled in programs that require an Individualized Education Program (IEP) or an Individualized Family Service Plan (IFSP). The Centers for Medicare & Medicaid Services (CMS) has determined that services provided in the "school" setting include services provided by qualified school staff in the "home" setting when necessary.

These services assist students with a disability to benefit from special education and related services. Medicaid reimbursement, through the Michigan Department of Health and Human Services (MDHHS), addresses the medical service needs of beneficiaries receiving special education and related services and provides funding for those services. The Social Security Act, as amended in 1988 by the Medicare Catastrophic Coverage Act, specifically provides for medical assistance (Medicaid) to cover "related services" which are specified in Federal Medicaid statute as medically necessary and "included in the child’s IEP established pursuant to Part B of the IDEA or furnished to a handicapped infant or toddler because such services are included in the child’s IFSP adopted pursuant to Part C (formerly called Part H) of such Act."

Section 504 of the Rehabilitation Act of 1973 requires local school districts to provide or pay for certain services to make education accessible to handicapped children. These services are described in an individualized service plan and provided free of charge to eligible individuals. Medicaid reimbursement is not allowed for these services.

Medicaid school based services are not covered for beneficiaries involuntarily residing in a detention setting with a Benefit Plan ID of INCAR-ESO, INCAR-MA, INCAR-MA-E, or MA-HMP-INC.

Coverage is based on medically necessary, Medicaid-covered services already being provided in the school setting and enables these services provided to Medicaid-eligible beneficiaries to be billed to Medicaid. This ensures federal participation in the funding of these Medicaid covered services. Enrollment as a Michigan Medicaid provider for services delivered in the school setting is limited to the Intermediate School Districts (ISDs), Detroit Public Schools Community District, and Michigan School for the Deaf. For the purpose of this document, the ISDs, Detroit Public Schools Community District, (revised 4/1/19) and Michigan School for the Deaf will be referred to as "ISDs" for simplicity.

Enrolled providers are required to establish an interagency agreement to facilitate coordination and cooperation with other human service agencies operating within the same service area. Medicaid services provided by the ISDs are to be provided as outlined in the IEP/IFSP treatment plan and are not expected to replace or substitute for services already provided by other agencies. If services are being provided by another program, ISDs are expected to coordinate the services to prevent service overlap and to assure continuity of care to the Medicaid beneficiary. Enrollment as a SBS provider is not expected to result in any change in the education agency's set of existing services or service utilization. MDHHS periodically evaluates the impact of Medicaid enrollment on special education programs through review of service utilization and other program data and information.
Covered services do not require prior authorization but must be documented and provided by qualified personnel as specified in the Covered Services Section of this chapter.

The following terms have specific meanings in the school setting:

<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Assistive Technology Device (ATD)</strong></td>
<td>Per IDEA, Section 602, the term “assistive technology device” means any item, piece of equipment or product system, whether acquired commercially off the shelf or modified or customized, that is used to increase, maintain, or improve functional capabilities of a child with a disability.</td>
</tr>
<tr>
<td><strong>Assistive Technology Service</strong></td>
<td>The term “assistive technology service” means any service that directly assists a child with a disability in the selection, acquisition or use of an assistive technology device.</td>
</tr>
<tr>
<td><strong>Certified Public Expenditure</strong></td>
<td>A certified public expenditure is an expenditure of a governmental unit whose state share is supported by tax dollars, or a mix of tax dollars and appropriated dollars, and is certified as eligible for federal match.</td>
</tr>
<tr>
<td><strong>Claims Development Software</strong></td>
<td>The claims development software is a custom-developed software that automates the school district claiming process. The claims development process is comprised of three components: sampling, training, and costs/claim generation.</td>
</tr>
<tr>
<td><strong>Direct Medical Services Program</strong></td>
<td>Direct medical services, specialized transportation, targeted case management and personal care services provided in the school setting and reimbursed by Medicaid.</td>
</tr>
</tbody>
</table>
| **Durable Medical Equipment, Supplies, Prosthetics and Orthotics (DMEPOS)** | - DME items are those that can stand repeated use, are primarily and customarily used to serve a medical purpose, are not useful to a person in the absence of an illness or injury, and can be used in the beneficiary's home. DME is a covered benefit when:  
  - It is medically and functionally necessary to meet the needs of the beneficiary.  
  - It may prevent frequent hospitalization or institutionalization.  
  - It is life sustaining.  
- Medical Supplies are those items that are required for medical management of the beneficiary, are disposable or have a limited life expectancy, and can be used in the beneficiary’s home. Medical supplies are items that:  
  - Treat a medical condition.  
  - Prevent unnecessary hospitalization or institutionalization.  
  - Support DME used by the beneficiary.  
- Prosthetics artificially replace a portion of the body to prevent or correct a physical anomaly or malfunctioning portion of the body. Prosthetics are a benefit to:  
  - Improve and/or restore the beneficiary’s functional level.  
  - Enable a beneficiary to ambulate or transfer.  
- Orthotics assist in correcting or strengthening a congenital or acquired physical anomaly or malfunctioning portion of the body. Orthotics are a benefit to:  
  - Improve and/or restore the beneficiary’s functional level.  
  - Prevent or reduce contractures.  
  - Facilitate healing or prevent further injury. |

<tbody>
<tr>
<td><strong>HT Modifier (Multi-disciplinary team)</strong></td>
<td>The HT modifier is used when billing for an assessment, evaluation or test performed for the IDEA Assessment. Each qualified staff bills using the appropriate procedure code followed by the modifier HT (multi-disciplinary team).</td>
</tr>
<tr>
<td><strong>IEP (Individualized Education Program)</strong></td>
<td>A written plan for services for eligible students between the ages of 4 and 26 in Michigan as determined by the federal IDEA statute. Medicaid funds are available to reimburse for health and medical services that are a part of a student’s IEP for beneficiaries up to the age of 21.</td>
</tr>
<tr>
<td><strong>IFSP (Individualized Family Service Plan)</strong></td>
<td>A written plan for a child with a disability who is between the ages of zero and three years that is developed jointly by the family and appropriate qualified personnel, and is based on multi-disciplinary evaluation and assessment of the child’s unique strengths and needs, as well as a family-directed assessment of the priorities, resources and concerns. Medicaid funds are available to reimburse for health and medical services that are a part of a child’s IFSP.</td>
</tr>
<tr>
<td><strong>IDEA (Individuals with Disabilities Education Act)</strong></td>
<td>The federal statute, IDEA of 1990 as amended in 2004, which requires public schools to determine whether a child has a disability, develop a plan that details the education and support services that the student will receive, provide the services, and evaluate the plan at least annually. There may be federal funding available for some of these responsibilities.</td>
</tr>
<tr>
<td><strong>IDEA Assessment</strong></td>
<td>An IDEA assessment is a formal evaluation that includes assessments, evaluations, tests and all related activities performed to determine if an individual is eligible under provisions of the IDEA of 1990, as amended in 2004, and are related to the evaluation and functioning of the individual.</td>
</tr>
<tr>
<td><strong>ISD (District)</strong></td>
<td>A corporate body established by statute in the Michigan Revised School Code (PA 451 of 1976) that is regulated by an intermediate school board. Michigan has 56 intermediate school districts.</td>
</tr>
<tr>
<td><strong>MDE (Michigan Department of Education)</strong></td>
<td>A department within the State of Michigan.</td>
</tr>
<tr>
<td><strong>Random Moment Time Study</strong></td>
<td>A random moment sampling to determine the extent to which Medicaid-reimbursable activities are being performed by capturing what is done during a specific moment in time.</td>
</tr>
<tr>
<td><strong>School-Based Services</strong></td>
<td>A program which provides medically necessary Medicaid covered services in the school setting. All Michigan ISDs, Detroit Public Schools Community District, (revised 4/1/19) and Michigan School for the Deaf participate in the Direct Medical Services Program.</td>
</tr>
<tr>
<td><strong>School Clinical Record</strong></td>
<td>All the written or electronic information that has been created and is necessary to fully disclose and document the services requested for reimbursement.</td>
</tr>
<tr>
<td><strong>Special Education Transportation</strong></td>
<td>Transport to and from the student’s pick-up and drop-off site where school based services are provided.</td>
</tr>
<tr>
<td><strong>TL Modifier (Re-evaluation of Existing Data (REED))</strong></td>
<td>The TL modifier is used with the appropriate procedure codes to identify when a re-evaluation of existing data (REED) was used in the determination of the child’s eligibility for special education services.</td>
</tr>
</tbody>
</table>
TM Modifier
(Individualized Education Program [IEP])
The TM modifier is used when billing for the multi-disciplinary team assessment for the development, review and revision of an IEP/IFSP treatment plan. Each qualified staff bills for this assessment using the appropriate procedure code with the modifier TM (Individualized Education Program [IEP]).

Treatment Plan
If an evaluation indicates that Medicaid-covered services are required, the qualified staff must develop and maintain a treatment plan for the student. The student's IEP/IFSP form may suffice as the treatment plan as long as the IEP/IFSP contains the required components described under the Treatment Plan subsection of this section.

1.1 CHILDREN’S SPECIAL HEALTH CARE SERVICES

The Medicaid School Based Services program covers services provided to children who are determined either dually eligible for Children's Special Health Care Services (CSHCS) and Medicaid (Title V/XIX), or those eligible for only Medicaid (Title XIX). SBS providers are not reimbursed for beneficiaries enrolled only in the CSHCS program (Title V only), and must not submit claims for these beneficiaries.

1.2 THIRD PARTY LIABILITY

Federal regulations require that all identifiable financial resources available for payment be billed prior to billing Medicaid. If a Medicaid-eligible child is presently covered by another resource and the school district does not bill the other resource, Medicaid cannot be billed for the services. (Refer to the Coordination of Benefits chapter for additional information.)

1.3 MEDICAL NECESSITY

A Medicaid service provided by an ISD is determined medically necessary when all of the following criteria are met:

- Addresses a medical or mental disability;
- Needed to attain or retain the capability for normal activity, independence or self care;
- Is included in the student’s IEP/IFSP treatment plan; and
- Is ordered, in writing, by a physician or other licensed practitioner acting within the scope of his/her practice under State law. Students who require speech, language and hearing services must be referred. The written order/referral must be updated at least annually. A stamped signature is not acceptable.

1.4 UNDER THE DIRECTION OF AND SUPERVISION

Certain specified services may be provided under the direction of or under the supervision of another clinician. For the supervising clinician, "under the direction of" means that the clinician is supervising the individual's care which, at a minimum, includes seeing the individual initially, prescribing the type of care to be provided, reviewing the need for continued services throughout treatment, assuring professional responsibility for services provided, and ensuring that all services are medically necessary. "Under the direction of" requires face-to-face contact by the clinician at least at the beginning of treatment and periodically thereafter.
"Supervision of" limited-licensed mental health professionals consists of the practitioner meeting regularly with another professional, at an interval described within the professional administrative rules, to discuss casework and other professional issues in a structured way. This is often known as clinical or counseling supervision or consultation. The purpose is to assist the practitioner to learn from his or her experience and expertise, as well as to ensure good service to the client or patient.

1.5 COVERED SERVICES

Medicaid covered services billed by ISDs include:

- Evaluations and tests performed for assessments
- Occupational Therapy Services
- Orientation and Mobility Services
- Assistive Technology Device Services
- Physical Therapy Services
- Speech, Language and Hearing Therapy Services
- Psychological, Counseling and Social Work Services
- Developmental Testing Services
- Nursing Services
- Physician and Psychiatrist Services
- Personal Care Services
- Targeted Case Management (TCM) Services
- Specialized Transportation Services

1.6 SERVICE EXPECTATIONS

The IEP/IFSP treatment plan must include the appropriate annual goals and short-term objectives, criteria, evaluation procedures, and schedules for determining whether the objectives are being achieved within an appropriate period of time (at least annually). All therapy services must be skilled (i.e., require the skills, knowledge, and education of a licensed occupational therapist, licensed physical therapist, or fully licensed speech-language pathologist or licensed audiologist). Interventions expected to be provided by another practitioner (e.g., teacher, registered nurse), family member or caregiver are not reimbursable as occupational, physical, or speech, language and hearing therapy by this program.

To be covered by Medicaid, occupational, physical, and speech, language and hearing therapy must address a beneficiary’s medical need that affects his/her ability to learn in the classroom environment. MDHHS does not reimburse for therapies that do not have medically related goals (i.e., handwriting, increasing attention span, identifying colors and numbers, enhancing vocabulary, improving sentence structure, and reading).

Group therapy or treatment must be provided in groups of two to eight. Services provided as part of a regular classroom activity are not reimbursable. When regularly scheduled attention is provided to one beneficiary who is part of the class currently in session, the service is not reimbursable.
Supplies or equipment utilized in service delivery are included as part of the service and are not reimbursed separately. Art, music and recreation therapies are not covered services.

Medicaid is required to follow the procedure code definition from the Current Procedural Terminology (CPT) and Healthcare Common Procedure Coding System (HCPCS) manuals. Procedure codes referencing office or outpatient facility include the medical services provided in the school setting. Procedure codes that do not specify a unit of time are to be billed per session. Group therapy is billed per beneficiary.

Certain CPT/HCPCS code descriptions include a specified unit of service time. Service times are based on the time it generally takes to provide the service. If the procedure code specifies "up to 15 minutes of service", the service may be billed in a unit of time from 1-15 minutes. If the procedure code specifies a unit of time "each 15 minutes", the code may be billed when the service time equals the specified unit of time. Any additional time cannot be billed unless the full time specified is reached.

Consultation or consultative services are an integral part or an extension of a direct medical service and are not separately reimbursable.

### 1.7 TREATMENT PLAN

<table>
<thead>
<tr>
<th>Requirements</th>
<th>If an evaluation indicates that Medicaid-covered services are required, the qualified staff must develop and maintain a treatment plan for the beneficiary. The beneficiary's IEP/IFSP form may suffice as the treatment plan as long as the IEP/IFSP contains the required components described below. Only qualified staff may initiate, develop or change the beneficiary’s treatment plan. The treatment plan must be signed, titled and dated by the qualified staff prior to billing Medicaid for services and must be retained in the beneficiary’s school clinical record. (Refer to the Covered Services Section of this chapter for definitions of qualified staff.)</th>
</tr>
</thead>
</table>
| Components | The treatment plan, which is an immediate result of the evaluation, must consist of the following components:  
- **Beneficiary’s name;**  
- **Description of the beneficiary’s qualifying diagnosis and medical condition;**  
- **Time-related goals that are measurable and significant to the beneficiary’s function and/or mobility;**  
- **Long-term goals that identify specific functional achievement to serve as indicators that the service is no longer needed;**  
- **Anticipated frequency and duration of treatment required to meet the time-related goals;**  
- **Plan for reaching the functional goals and outcomes in the IEP/IFSP;**  
- **A statement detailing coordination of services with other providers (e.g., medical and educational); and**  
- **All services are provided with the expectation that the beneficiary’s primary care provider and, if applicable, the beneficiary’s case manager are informed on a regular basis.** |
The treatment plan must be reviewed and updated at least annually as part of the IEP/IFSP multi-disciplinary team assessment process, or more frequently if the beneficiary’s condition changes or alternative treatments are recommended.

1.8 EVALUATIONS

Evaluations for medical services are covered when:

- Performed as part of the IDEA Assessment.
- The beneficiary left and is re-entering special education.
- An initial development, review or revision of the student’s IEP/IFSP treatment plan will occur.
- A change or decrease in function occurs.

1.8.A. EVALUATIONS PERFORMED FOR DMEPOS MEDICAL SUPPLIERS

If an ISD physical therapist, occupational therapist, speech pathologist or audiologist performs assessments for DMEPOS that are billed by a Medicaid medical supplier, the clinician must comply with all prior authorization policies and procedures regarding that DMEPOS item. For example, a physician must order the assessment. The clinician must comply with all requirements for the assessments specified in the Medical Supplier Chapter of this manual. For example, the clinician must perform and write his/her own evaluation and may not sign evaluations completed by a medical supplier. Three appropriate economical alternatives must be ruled out for some items. (Refer to the Medical Supplier Chapter of this manual for details.) If the child is also receiving physical therapy, occupational therapy, speech pathology or audiology services in another outpatient setting, it may be more appropriate for the outpatient clinician to perform the assessment. The ISD clinician must coordinate with all clinicians in other settings.
### SECTION 2 – COVERED SERVICES

#### 2.1 INDIVIDUALS WITH DISABILITIES EDUCATION ACT ASSESSMENT AND IEP/IFSP DEVELOPMENT, REVIEW AND REVISION

<table>
<thead>
<tr>
<th>Definition</th>
<th>The Individuals with Disabilities Education Act (IDEA) Assessment is a formal evaluation that includes assessments, evaluations, tests and all related activities performed to determine if a beneficiary is eligible under provisions of the IDEA of 1990, as amended in 2004, and are related to the evaluation and functioning of the beneficiary. These services are reimbursable only after they result in the implementation of an IEP/IFSP treatment plan. If an IEP/IFSP treatment plan is not implemented within one year of the date of service, then none of the services provided are covered.</th>
</tr>
</thead>
</table>
| Provider Qualifications | Qualified staff can bill for assessments, tests, and evaluations performed for the IDEA Assessment. To be covered by Medicaid, the staff must have the following Michigan current credentials:  
- A licensed occupational therapist (OT)  
- A certified orientation and mobility specialist (O&M)  
- A licensed physical therapist (PT)  
- A fully licensed speech-language pathologist (SLP)  
- A licensed audiologist  
- A fully licensed psychologist  
- A limited-licensed psychologist (under the supervision of a licensed psychologist)  
- A licensed professional counselor  
- A limited-licensed counselor (under the supervision of a licensed professional counselor)  
- A licensed master’s social worker  
- A limited-licensed master’s social worker (under the supervision of a licensed master’s social worker)  
- A licensed physician or psychiatrist (MD or DO)  
- A registered nurse (RN) |
Qualified staff can bill for three distinct types of assessments/evaluations/tests. All activities, such as meetings and written reports related to the assessment/evaluation/test, are an integral part or extension of the service and are not separately reimbursable. For a complete listing of procedure codes, refer to the School Based Services CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)

- **The HT modifier** is used with the procedure code when billing for an assessment/evaluation/test performed for the IDEA Assessment. Each qualified staff bills using the appropriate procedure code below followed by the modifier HT (multi-disciplinary team). The date of service is the date of determination of eligibility for special education or early-on services. The determination date must be included in the assessment/evaluation/test.

- **The TL modifier** is used with the appropriate procedure codes to identify when a re-evaluation of existing data (REED) was used in the determination of the child's eligibility for special education services.

- **The TM modifier** is used with the procedure code when billing for the multi-disciplinary team assessment to develop, review and revise an IEP/IFSP treatment plan. Each qualified staff bills using the appropriate procedure code below with the modifier TM (Individualized Education Program [IEP]). The date of service is the date of the multi-disciplinary team assessment.

- **52 Modifier (Reduced Services)** - The 52 modifier is used to describe circumstances in which services provided were reduced in comparison to the full description of the service.

- No modifier is used when assessments/evaluations/tests are provided not related to the IDEA Assessment or the IEP/IFSP treatment plan development, review and revision. Each qualified staff bills for these activities using the appropriate procedure code below with no modifier. The date of service is the date the assessment/evaluation/test is completed.

### 2.2 Occupational Therapy (Includes Orientation and Mobility Services and Assistive Technology Device Services)

#### 2.2.A. Occupational Therapy Services

<table>
<thead>
<tr>
<th>Definition</th>
<th>Occupational Therapy:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Occupational therapy (OT) must be rehabilitative, active or restorative and designed to correct or compensate for a medical problem interfering with age-appropriate functional performance. Occupational therapy services must require the skills, knowledge, and education of a licensed occupational therapist, licensed occupational therapy assistant, or Orientation and Mobility specialist.</td>
</tr>
</tbody>
</table>

<p>| Prescription | Occupational therapy services must be prescribed by a physician and updated annually. A stamped physician signature is not acceptable. ### 2.2.B. ORIENTATION AND MOBILITY SERVICES

| Definition | **Orientation and Mobility Services:**  
Orientation and mobility services are services provided to blind or visually impaired students by qualified personnel to enable those students to attain systematic orientation to and safe movement within their environment in the school, home and community. Services are based on the individual student’s needs for assistance in compensatory skill development, visual efficiency, utilization of low vision aids/devices and technology, etc.  
Spatial and environmental concepts and use of information received by the senses (such as sound, temperature and vibration) to establish, maintain, or regain orientation and line of travel (for example, using sound at a traffic light to cross the street); to use the long cane, as appropriate, to supplement visual travel skills or as a tool for safely negotiating the environment for students with no available travel vision; and to understand and use remaining vision and distance low vision aids/devices, as appropriate. |
| --- | --- |
| Prescription | Orientation and mobility services must be prescribed by a physician and updated annually. A stamped physician signature is not acceptable.  
Services supported by an Individualized Education Program can precede the signed prescription by up to 90 days; however, the active period of the prescription cannot be longer than one year. |
| Provider Qualifications | Orientation and mobility services may be reimbursed when provided by:  
- A certified orientation and mobility specialist with current certification from the Academy for Certification of Vision Rehabilitation and Education Professionals (ACVREP); or  
- A licensed occupational therapist. |
### Evaluations
Evaluations are formalized testing and reports for the development of the beneficiary’s treatment plan. They may be completed by an Orientation and Mobility Specialist (O&M) or a licensed occupational therapist.

An evaluation for Orientation and Mobility services includes:

- The treatment diagnosis and the medical diagnosis, if different from the treatment diagnosis;
- Medical history as it relates to the current course of therapy;
- The beneficiary’s current functional status (functional baseline);
- The standardized and other evaluation tools used to establish the baseline and to document progress;
- Assessment of the beneficiary’s performance components (status of sensory skills, proficiency of use of travel tools, current age-appropriate independence, complexity or introduction of new environment, caregiver input, assessment in the home/living environment, assessment in the school environment, assessment in the residential/neighborhood environment, assessment in the commercial environment, and assessment in the public transportation environment);
- Assessment of the beneficiary’s cognitive skill level (e.g., ability to follow directions, including auditory and visual, comprehension); and
- Evaluation of the needs related to assistive technology device services, including a functional evaluation of the beneficiary.

### Services
Orientation and mobility services include:

- Providing assistance in the development of skills and knowledge that enable the child to travel independently to the highest degree possible, based on assessed needs and the IEP;
- Training the child to travel with proficiency, safety and confidence in familiar and unfamiliar environments;
- Preparing and using equipment and material, such as tactile maps, models, distance low vision aids/devices, and long canes, for the development of orientation and mobility skills;
- Evaluation and training performed to correct or alleviate movement deficiencies created by a loss or lack of vision;
- Communication skills training (teaching Braille is not a covered benefit);
- Systematic orientation training to allow safe movement within their environments in school, home and community;
- Spatial and environmental concept training and training in the use of information received by the senses (such as sound, temperature and vibration) to establish, maintain, or regain orientation;
- Visual training to understand and use the remaining vision for those with low vision;
- Training necessary to activate visual motor abilities;
- Training to use distance low vision aids/devices; and
- Independent living skills training.
## 2.2.C. ASSISTIVE TECHNOLOGY DEVICE SERVICES

### Definition

Assistive Technology Device Services General Description:

Utilizing the description in Section 602(2) of the Individuals with Disabilities Education Act (IDEA), the term 'assistive technology device' means any item, piece of equipment, or product system, whether acquired commercially off the shelf, modified, or customized, that is used to increase, maintain, or improve functional capabilities of a child with a disability. Therapists should restrict their evaluations and services to those within the scope of their practice and consistent with their education and training.

### Prescription

Assistive technology device services must be prescribed by a physician and updated annually. A stamped physician signature is not acceptable.

### Provider Qualifications

Assistive technology device services may be reimbursed when provided by:
- A licensed occupational therapist (OT); or
- A licensed occupational therapy assistant (OTA).

### Evaluations for Assistive Technology Devices

Evaluations are formalized testing and reports for the development of the beneficiary's treatment plan. They may be completed by a licensed occupational therapist.

An evaluation includes:
- The treatment diagnosis and the medical diagnosis, if different from the treatment diagnosis;
- Current therapy being provided to the beneficiary in this and other settings;
- Medical history as it relates to the current course of therapy;
- The beneficiary's current functional status (functional baseline);
- The standardized and other evaluation tools used to establish the baseline and to document progress;
- Assessment of the beneficiary's performance components (strength, dexterity, range of motion, sensation, perception) directly affecting the beneficiary's ability to function;
- Assessment of the beneficiary's cognitive skill level (e.g., ability to follow directions, including auditory and visual, comprehension); and
- Evaluation of the needs related to assistive technology device services, including a functional evaluation of the beneficiary in the school environment and home.
### Assessments for Durable Medical Equipment

If an ISD occupational therapist performs assessments for DMEPOS that are billed by a Medicaid medical supplier, the clinician must comply with all prior authorization policies and procedures regarding that DMEPOS item. For example, a physician must order the assessment. The clinician must comply with all requirements for the assessments specified in the Medical Supplier Chapter of this manual. For example, the clinician must perform and write his/her own evaluation and may not sign evaluations completed by a medical supplier. Three appropriate economical alternatives must be ruled out for some items. (Refer to the Medical Supplier Chapter of this manual for details.) If the child is also receiving physical therapy, occupational therapy, speech pathology or audiology services in another outpatient setting, it may be more appropriate for the outpatient clinician to perform the assessment. The ISD clinician must coordinate with all clinicians in other settings.

### Services

ATD services are intended to directly assist a beneficiary with a disability in the selection, coordination of acquisition, or use of an ATD. The direct acquisition of medical equipment, such as wheelchairs etc., is not a covered benefit of the SBS program; this service must be billed under the Medical Supplier program coverage. The direct acquisition of medical equipment is covered under the Medical Supplier Medicaid benefit.

Assistive Technology Device Services include:

- Coordinating and using other therapies, interventions, or services with the ATD.
- Training or technical assistance for the beneficiary or, if appropriate, the beneficiary’s parent/guardian.
- Training or technical assistance for professionals providing other education or rehabilitation services to the beneficiary receiving ATD services.
- Neuromuscular re-education of movement, balance, coordination, kinesthetic sense, posture, and/or proprioception for sitting and/or standing activities.
- Evaluating the needs of the beneficiary, including a functional evaluation of the beneficiary. ATD services are intended to directly assist a beneficiary with a disability in the selection, coordination of acquisition, or use of an ATD.
- Selecting, providing for the acquisition of the device, designing, fitting customizing, adapting, applying, retaining or replacing the ATD, including orthotics.
- Wheelchair assessment, fitting, training. If the wheelchair assessment is for equipment billed by a Medicaid medical supplier, all prior authorization and coverage policies and procedures in the Medical Supplier Chapter of this manual must be adhered to by school based providers.

### Procedure Codes

For a complete listing of procedure codes, refer to the School Based Services CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)
## 2.3 PHYSICAL THERAPY SERVICES (INCLUDES ASSISTIVE TECHNOLOGY DEVICE SERVICES)

### 2.3.A. PHYSICAL THERAPY SERVICES

<table>
<thead>
<tr>
<th>Definition</th>
<th>Physical therapy (PT) must be rehabilitative, active or restorative and designed to correct or compensate for a medical problem. Physical therapy services must require the skills, knowledge and education of a PT or PTA to provide therapy. Treatment is performed through the use of therapeutic exercises and rehabilitative procedures.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prescription</td>
<td>Physical therapy services must be prescribed by a physician and updated annually. A stamped physician signature is not acceptable.</td>
</tr>
</tbody>
</table>
| Provider Qualifications | PT services may be reimbursed when provided by:  
- A licensed physical therapist (PT); or  
- A licensed physical therapy assistant (PTA) under the direction of a licensed physical therapist (PT) (i.e., the PT supervises and monitors the PTA’s performance with continuous assessment of the beneficiary’s progress). All documentation must be reviewed and signed by the supervising PT. |
| Evaluations for Physical Therapies | Evaluations are formalized testing and reports to determine a beneficiary’s need for services and recommend a course of treatment. They may be completed by a PT. Evaluations include:  
- The treatment diagnosis and the medical diagnosis, if different than the treatment diagnosis;  
- Current therapy being provided to the beneficiary in this and other settings;  
- Medical history as it relates to the current course of therapy;  
- The beneficiary’s current functional status (i.e., functional baseline);  
- The standardized and other evaluation tools used to establish the baseline and to document progress;  
- Assessment of the beneficiary’s performance components (e.g., strength, dexterity, range of motion) directly affecting the beneficiary’s ability to function;  
- Assessment of the beneficiary’s cognitive skill level (e.g., ability to follow directions, including auditory and visual, comprehension); and  
- Evaluation of the needs related to assistive technology device services, including a functional evaluation of the beneficiary. |
Assessments for Durable Medical Equipment

If an ISD physical therapist performs assessments for DMEPOS that are billed by a Medicaid medical supplier, the clinician must comply with all prior authorization policies and procedures regarding that DMEPOS item. For example, a physician must order the assessment. The clinician must comply with all requirements for the assessments specified in the Medical Supplier Chapter of this manual. For example, the clinician must perform and write his/her own evaluation and may not sign evaluations completed by a medical supplier. Three appropriate economical alternatives must be ruled out for some items. (Refer to the Medical Supplier Chapter of this manual for details.) If the child is also receiving physical therapy, occupational therapy, speech pathology or audiology services in another outpatient setting, it may be more appropriate for the outpatient clinician to perform the assessment. The ISD clinician must coordinate with all clinicians in other settings.

Services

Physical therapy services include:
- Group therapy provided in a group of two to eight beneficiaries;
- Gait training;
- Training in functional mobility skills (e.g., ambulation, transfers, and wheelchair mobility);
- Stretching for improved flexibility; and
- Modalities to allow gains of function, strength or mobility.

Procedure Codes

For a complete listing of procedure codes, refer to the School Based Services CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)

2.3.B. ASSISTIVE TECHNOLOGY DEVICE SERVICES

Definition

**Assistive Technology Device Services General Description:**

Utilizing the description in Section 602(2) of the Individuals with Disabilities Education Act (IDEA), the term 'assistive technology device' means any item, piece of equipment, or product system, whether acquired commercially off the shelf, modified, or customized, that is used to increase, maintain, or improve functional capabilities of a child with a disability. Therapists should restrict their evaluations and services to those within the scope of their practice and consistent with their education and training.

Prescription

Assistive technology device services must be prescribed by a physician and updated annually. A stamped physician signature is not acceptable.

Provider Qualifications

Assistive technology device services may be reimbursed when provided by:
- a licensed physical therapist (PT); or
- a licensed physical therapy assistant (PTA).
### Evaluations for Assistive Technology Devices

Evaluations are formalized testing and reports for the development of the beneficiary’s treatment plan. They may be completed by a PT.

An evaluation includes:

- The treatment diagnosis and the medical diagnosis, if different from the treatment diagnosis;
- Current therapy being provided to the beneficiary in this and other settings;
- Medical history as it relates to the current course of therapy;
- The beneficiary’s current functional status (functional baseline);
- The standardized and other evaluation tools used to establish the baseline and to document progress;
- Assessment of the beneficiary’s performance components (strength, dexterity, range of motion, sensation, perception) directly affecting the beneficiary’s ability to function;
- Assessment of the beneficiary’s cognitive skill level (e.g., ability to follow directions, including auditory and visual, comprehension); and
- Evaluation of the needs related to assistive technology device services, including a functional evaluation of the beneficiary in the school environment and home.

### Assessments for Durable Medical Equipment

If an ISD physical therapist performs assessments for DMEPOS that are billed by a Medicaid medical supplier, the clinician must comply with all prior authorization policies and procedures regarding that DMEPOS item. For example, a physician must order the assessment. The clinician must comply with all requirements for the assessments specified in the Medical Supplier Chapter of this manual. For example, the clinician must perform and write his/her own evaluation and may not sign evaluations completed by a medical supplier. Three appropriate economical alternatives must be ruled out for some items. (Refer to the Medical Supplier Chapter of this manual for details.) If the child is also receiving physical therapy, occupational therapy, speech pathology or audiology services in another outpatient setting, it may be more appropriate for the outpatient clinician to perform the assessment. The ISD clinician must coordinate with all clinicians in other settings.
ATD services are intended to directly assist a beneficiary with a disability in the selection, coordination of acquisition, or use of an ATD. The direct acquisition of medical equipment, such as wheelchairs, etc., is not a covered benefit of the SBS program; this service must be billed under the Medical Supplier program coverage. The direct acquisition of medical equipment is covered under the Medical Supplier Medicaid benefit.

Assistive Technology Device Services include:

- Coordinating and using other therapies, interventions, or services with the ATD.
- Training or technical assistance for the beneficiary or, if appropriate, the beneficiary’s parent/guardian.
- Training or technical assistance for professionals providing other education or rehabilitation services to the beneficiary receiving ATD services.
- Evaluating the needs of the beneficiary, including a functional evaluation of the beneficiary. ATD services are intended to directly assist a beneficiary with a disability in the selection, coordination of acquisition, or use of an ATD.
- Selecting, providing for the acquisition of the device, designing, fitting customizing, adapting, applying, retaining or replacing the ATD, including orthotics.
- Wheelchair assessment, fitting, training. If the wheelchair assessment is for equipment billed by a Medical Supplier, all prior authorization and coverage policies and procedures in the Medical Supplier Chapter of this manual must be adhered to by school based providers.

For a complete listing of procedure codes, refer to the School Based Services CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)

2.4 SPEECH, LANGUAGE AND HEARING THERAPY (INCLUDES ASSISTIVE TECHNOLOGY DEVICE SERVICES)

2.4.A. SPEECH, LANGUAGE AND HEARING THERAPY

Definition

Speech, language and hearing therapy must be a diagnostic or corrective service to teach compensatory skills for deficits that directly result from a medical condition. This service is provided to beneficiaries with a diagnosed speech, language or hearing disorder adversely affecting the functioning of the beneficiary. Speech, language and hearing therapy must require the skills, knowledge and education of a fully licensed speech-language pathologist or audiologist to provide the therapy.

Prescription

Speech, language and hearing services require an annual referral from a physician. A stamped physician signature is not acceptable.

Services supported by an Individualized Education Program can precede the signed referral by up to 90 days; however, the active period of the referral cannot be longer than one year.
### Provider Qualifications

Speech, language and hearing services may be reimbursed when provided by:

- A fully licensed speech-language pathologist (SLP);
- A licensed audiologist in Michigan;
- A speech-language pathologist (SLP) and/or audiology candidate (i.e., in his clinical fellowship year or having completed all requirements but has not obtained a license), under the direction of a qualified SLP or audiologist. All documentation must be reviewed and signed by the appropriately licensed SLP or licensed audiologist; or
- A limited licensed speech language pathologist, under the direction of a fully licensed SLP or audiologist. All documentation must be reviewed and signed by the appropriately licensed supervising SLP or licensed audiologist.

### Evaluations for Speech Pathology Services

Evaluations are formalized testing and reports conducted to determine the need for services and recommendation for a course of treatment. They may be completed by a licensed SLP or audiologist.

Evaluations include:

- The treatment diagnosis and the medical diagnosis, if different from the treatment diagnosis;
- Current therapy being provided to the beneficiary in this and other settings;
- Medical history as it relates to the current course of therapy;
- The beneficiary’s current communication status (functional baseline);
- The standardized and other evaluation tools used to establish the baseline and to document progress; and
- Evaluation of the needs related to assistive technology device services, including a functional evaluation of the beneficiary.

Evaluations may also include, but are not limited to:

- Articulation - standardized tests that measure receptive and expressive language, mental age, oral motor skills, articulation skills, current diet level (including difficulties with any food consistencies), current means of communication, and a medical diagnosis.
- Language - standardized tests that measure receptive and expressive language, mental age, oral motor skills, current and previous means of communication, and medical diagnosis(es).
- Rhythm - standardized tests that measure receptive and expressive language, mental age, oral motor skills, and measurable assessment of dysfluency, current means of communication, and a medical diagnosis.
- Swallowing - copy of the video fluoroscopy or documentation that objectively addresses the laryngeal and pharyngeal stages, oral motor assessment that measures consistencies that have been attempted and the results, voice quality (i.e., pre- and post-feeding and natural voice), articulation assessment, and a standardized cognitive assessment.
- Voice - copy of the physician’s medical assessment of the beneficiary’s voice mechanism and the medical diagnosis.
Speech Assessments for Durable Medical Equipment

If an ISD speech pathologist or audiologist performs assessments for DMEPOS that are billed by a Medicaid medical supplier, the clinician must comply with all prior authorization policies and procedures regarding that DMEPOS item. For example, a physician must order the assessment. The clinician must comply with all requirements for the assessments specified in the Medical Supplier Chapter of this manual. For example, the clinician must perform and write his/her own evaluation and may not sign evaluations completed by a medical supplier. Three appropriate economical alternatives must be ruled out for some items. (Refer to the Medical Supplier Chapter of this manual for details.) If the child is also receiving physical therapy, occupational therapy, speech pathology or audiology services in another outpatient setting, it may be more appropriate for the outpatient clinician to perform the assessment. The ISD clinician must coordinate with all clinicians in other settings.

Services

Speech, language and hearing services include:
- Group therapy provided in a group of two to eight beneficiaries
- Articulation, language, and rhythm
- Swallowing dysfunction and/or oral function for feeding
- Voice therapy
- Speech, language or hearing therapy
- Speech reading/aural rehabilitation
- Esophageal speech training therapy
- Speech defect corrective therapy
- Fitting and testing of hearing aids or other communication devices

Procedure Codes

For a complete listing of procedure codes, refer to the School Based Services CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)

The direct acquisition of medical equipment, such as wheelchairs, etc., is not a covered benefit of the SBS program; this service must be billed under the Medical Supplier program coverage. The direct acquisition of medical equipment is covered under the Medicaid Medical Supplier benefit.

Assistive Technology Device Services include:

- Coordinating and using other therapies, interventions, or services with the ATD.
- Training or technical assistance for the beneficiary or, if appropriate, the beneficiary's parent/guardian.
- Training or technical assistance for professionals providing other education or rehabilitation services to the beneficiary receiving ATD services.
- Evaluating the needs of the beneficiary, including a functional evaluation of the beneficiary. ATD services are intended to directly assist a beneficiary with a disability in the selection, coordination of acquisition, or use of an ATD. |
2.4.C. TELEPRACTICE FOR SPEECH, LANGUAGE AND HEARING SERVICES

Definition

Telepractice is the use of telecommunications and information technologies for the exchange of encrypted patient data for the provision of speech, language and hearing services. Telepractice must be obtained through real-time interaction between the patient's physical location (patient site) and the provider's physical location (provider site). Services are provided to patients through hardwire or internet connection. It is the expectation that providers, facilitators and staff involved in telepractice are trained in the use of equipment and software prior to servicing patients. Speech, language and hearing services administered by telepractice are subject to the same provisions as services provided to a patient in person.

Prescription

Speech, language and hearing services require an annual referral from a physician. A stamped physician signature is not acceptable.

Provider Qualifications

Speech, language and hearing services may be reimbursed when provided by:

- A fully licensed speech-language pathologist (SLP);
- A licensed audiologist in Michigan;
- A speech-language pathologist (SLP) and/or audiology candidate (i.e., in his clinical fellowship year or having completed all requirements but has not obtained a license) under the direction of a qualified SLP or audiologist. All documentation must be reviewed and signed by the appropriately licensed SLP or licensed audiologist; or
- A limited licensed speech language pathologist under the direction of a fully licensed SLP or audiologist. All documentation must be reviewed and signed by the appropriately licensed supervising SLP or licensed audiologist.

Conditions

Providers must ensure the privacy of the beneficiary and the security of any information shared via telemedicine. The technology used must meet the needs for audio and visual compliance in accordance with current regulations and industry standards. Refer to the General Information for Providers Chapter for complete Health Insurance Portability and Accountability Act (HIPAA) compliance requirements.

The patient site may be located within the school, at the patient’s home, or any other established site deemed appropriate by the provider. It must be a room free from distractions so as not to interfere with the telepractice session. A facilitator must be trained in the use of the telepractice technology and physically present at the patient site during the entire telepractice session to assist the patient at the direction of the SLP or audiologist.

Billing Instructions

Telepractice services are billed using the same procedure codes as services rendered to a patient who is physically present. In addition to the procedure code, billers use the "GT" modifier to identify services provided by telepractice.
### Definitions

Psychological, counseling and social work services include planning, managing and providing a program of face-to-face services for beneficiaries with diagnosed psychological conditions. Psychological, counseling and social work services must require the skills, knowledge and education of a psychologist, counselor or licensed social worker to provide treatment.

Psychotherapy is the treatment of a mental disorder or behavioral disturbance for which the clinician provides services through definitive therapeutic communication, attempts to alleviate the emotional disturbances, reverses or changes maladaptive patterns of behavior, and encourages personality growth and development. The codes for reporting psychotherapy are divided into two broad categories: Interactive Psychotherapy, and Insight-Oriented, Behavior-Modifying and/or Supportive Psychotherapy.

- Interactive psychotherapy refers to the use of physical aids and nonverbal communication to overcome barriers to therapeutic interaction between the clinician and a beneficiary who has not yet developed, or has lost, either the expressive language communication skills to explain their symptoms and response to treatment, or the receptive communication skills to understand the clinician if they would use ordinary adult language for communication.
- Insight-oriented, behavior-modifying and/or supportive psychotherapy refers to the development of insight or affective understanding, the use of behavior modification techniques, the use of supportive interactions, and the use of cognitive discussion of reality or any combination of the above to provide therapeutic change.

### Provider Qualifications

Psychological, counseling and social work services may be reimbursed when provided by:

- A licensed physician or psychiatrist in Michigan;
- A fully licensed psychologist in Michigan;
- A limited-licensed psychologist under the supervision of a licensed psychologist;
- A temporary limited-licensed psychologist under the supervision of a licensed psychologist;
- A licensed master’s social worker in Michigan;
- A limited licensed master’s social worker under the supervision of a licensed master’s social worker;
- A licensed professional counselor in Michigan; or
- A limited licensed counselor under the supervision of a licensed professional counselor.

### Evaluations

Evaluations or assessments include tests, interviews and behavioral evaluations that appraise cognitive, emotional, social functioning and self-concept. These may also include interpretations of information about a beneficiary's behavior and conditions relating to functioning. A qualified psychologist, counselor or licensed social worker must complete them.
### Psychological Testing

Psychological testing includes tests, interviews, evaluations and recommendations for treatment. This may also include interpretations of information about a beneficiary's behavior and conditions relating to functioning. A fully licensed psychologist or a limited-licensed psychologist may perform psychological testing. Medicaid covers psychological testing that is reasonable and necessary for diagnosing the beneficiary's condition. Medicaid does not cover the time that a beneficiary spends alone in testing. The beneficiary's clinical record must be signed and dated by the staff that administered the tests, and include the actual tests administered and completed reports. The protocols for testing must be available for review. Psychological testing may be billed per hour with a five-hour maximum per year, and a report must be generated from the results of the tests. In accordance with CPT guidelines, the service includes testing time only; it does not include writing a report. Writing the report is considered a part of the testing process and is a requirement for billing.

The psychological testing report must include all of the following:

- Beneficiary name and birth date;
- Psychological tests administered;
- Summary of testing results;
- Treatment recommendations; and
- Psychologist name and dated signature.

### Procedure Codes

For a complete listing of procedure codes, refer to the School Based Services CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)

### Crisis Intervention

Crisis intervention services are unscheduled activities performed for the purpose of resolving an immediate crisis situation. Activities include crisis response, assessment, referral and direct therapy. Since these services are unscheduled activities, they are not listed in the beneficiary's IEP/IFSP treatment plan.

Crisis intervention must be billed using the following procedure code:

- **S9484** – Crisis intervention mental health services, per hour.

### 2.6 Developmental Testing

#### Definition

Developmental testing is medically related testing (not performed for educational purposes) provided to determine if motor, speech, language and psychological problems exist or to detect the presence of any developmental delays. Testing is accomplished by the combination of several testing procedures and includes the evaluation of the beneficiary's history and observation. Whenever possible and when age-appropriate, standardized objective measurements are to be used (e.g., Denver II) for children under the age of six. Administering the tests must generate material that is formulated into a report. Developmental testing done for educational purposes cannot be billed to Medicaid.
### Documentation

The developmental testing report must include all of the following:

- Beneficiary name and birth date;
- Tests administered;
- A completed quarterly claim breakdown, produced by the claims development software;
- Treatment recommendations; and
- The dated signature, address and phone number of the person administering the tests.

### Provider Qualifications

Developmental testing services may be reimbursed when provided by the following qualified staff in accordance with their professional credentials:

- A fully-licensed psychologist in the State of Michigan;
- A limited-licensed psychologist under the supervision of a licensed psychologist;
- A licensed master’s social worker in Michigan;
- A limited licensed master’s social worker under the supervision of a licensed master’s social worker; or
- A licensed physician or psychiatrist in Michigan.

### Procedure Codes

For a complete listing of procedure codes, refer to the School Based Services CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)
2.7 **NURSING SERVICES**

| Definition | Nursing services are professional services relevant to the medical needs of the beneficiary provided through direct intervention. Direct service interventions must be medically based services that are within the scope of the professional practice of the Registered Nurse (RN) and Licensed Practical Nurse (LPN), provided during a face-to-face encounter, and provided on a one-to-one basis. Medicaid policy will follow current Michigan Public Health Code scope of practice guidelines for nursing practices. Services include:
| | - Catheterizations or Catheter care
| | - Maintenance of tracheotomies
| | - Medication administration
| | - Oxygen administration
| | - Tube feeding
| | - Suctioning
| | - Ventilator care
| | Services considered observation or stand-by in nature are not covered.
| | LPN services can only be billed if performed under the supervision of an RN or physician.
| Prescription | Direct service interventions require a physician's written order when the initial need for services is determined. Direct service interventions must be reviewed and revised annually or as medically necessary by the beneficiary's attending physician. The nurse is responsible for notifying the attending physician of any change in the beneficiary's condition which may result in a change or modification to the care plan.
| Provider Qualifications | Nursing services may be reimbursed when provided by:
| | - A licensed Registered Nurse (RN) in Michigan; or
| | - A Licensed Practical Nurse (LPN) in Michigan.
| Evaluations | A RN must complete the evaluations/assessments and prepare a nursing care plan. An evaluation/assessment may be performed when a change in the beneficiary's medical condition occurs. LPNs cannot bill for evaluations/assessments.
| Procedure Codes | For a complete listing of procedure codes, refer to the School Based Services CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)
### 2.8 Physician and Psychiatrist Services

| Definition | Physician and psychiatrist services are services provided with the intent to diagnose, identify or determine the nature and extent of a beneficiary's medical or other health-related condition. Physician/psychiatrist services include:  
| | - Evaluation and consultation with providers of covered services for diagnostic and prescriptive services; includes participation in multi-disciplinary team assessment.  
| | - Record review for diagnostic and prescriptive services.  
| | Only the services provided by a physician or psychiatrist (MD or DO) through SBS may be billed and reimbursed through the enrolled ISD.  
| | Other physician or psychiatrist services, including those which may be delivered through other Medicaid-enrolled providers, are to be billed separately and may not be billed through the enrolled ISD. |
| Provider Qualifications | A licensed physician or psychiatrist (MD or DO) in Michigan. |
| Procedure Codes | For a complete listing of procedure codes, refer to the School Based Services CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)  
| | Procedure codes that replicate the services of other billed codes, either in part or in total, will not be reimbursed for the same date of service.  
| | If a physician order/referral is written as a result of a physician medical conference, the order/referral is considered to be a part of that service and is not separately reimbursable. |
2.9 PERSONAL CARE SERVICES

### Personal Care Paraprofessional Provider Qualifications

The personal care paraprofessional personnel are employed in the Special Education Program and shall be qualified under the requirements established by their respective ISD plan. Providers must be trained in the skills needed to perform covered services, and must be under the direction of a qualified professional as designated in the IEP/IFSP. Paraprofessional personnel include:

- Teacher Aides
- Health Care Aides
- Instructional Aides
- Bilingual Aides
- Program Assistants
- Trainable Aides

### Prescription

In accordance with 42 CFR 440.167, authorization for Personal Care Services (PCS) may be done by a physician or "other licensed practitioner" operating within the scope of their practice. The State definition of "other licensed practitioner" consists of Registered Nurse (RN), Licensed Occupational Therapist, Licensed Physical Therapist (PT), Master of Social Work (MSW), or fully licensed Speech Language Pathologist (SLP). It is expected that personal care services will be authorized by the appropriate practitioner.

### Documentation

Personal care services must be medically necessary and the need for the service must be documented in the student’s IEP/IFSP. Each child’s school clinical record must contain a completed, signed and dated monthly activity checklist. Service categories (i.e., toileting, feeding, transferring, etc.), times and frequencies must be documented either in the IEP/IFSP, in an attached document, or in the child's treatment authorization.

### Procedure Codes

For a complete listing of procedure codes, refer to the School Based Services CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)

---

### 2.10 Targeted Case Management Services

#### Definition

Targeted case management (TCM) services are services furnished to assist individuals in gaining access to needed medical, social, educational or other services. Targeted case management services include the following assistance:

- A comprehensive assessment and periodic reassessment of an individual to determine the need for medical, social, educational or other services. These assessment activities include:
  - Taking client history;
  - Identifying the individual’s needs and completing related documentation; and
Gathering information from other sources, such as family members, medical providers, social workers, and educators (if necessary), to form a complete assessment of the individual.

- Development (and periodic revision) of a specific care plan that:
  - Is based on the information collected through the assessment;
  - Specifies the goals and actions to address the medical, social, educational or other services needed by the individual;
  - Includes activities such as ensuring the active participation of the eligible individual, and working with the individual (or the individual’s authorized health care decision maker) and others to develop those goals; and
  - Identifies a course of action to respond to the assessed needs of the eligible individual.

- Referral and related activities:
  - To help an eligible individual obtain needed services, including activities that help link an individual with medical, social, educational providers or other programs and services that are capable of providing needed services, such as making referrals to providers for needed services and scheduling appointments for the individual;
  - Monitoring and follow-up activities;
  - Activities and contacts that are necessary to ensure the care plan is implemented and adequately addresses the individual’s needs, and which may be with the individual, family members, providers, or other entities or individuals, and conducted as frequently as necessary, including at least one annual monitoring, to determine whether the following conditions are met:
    - Services are being furnished in accordance with the individual’s care plan;
    - Services in the care plan are adequate.

If there are changes in the needs or status of the individual, necessary adjustments are made to the care plan and service arrangements.

TCM services may be reimbursed when provided by a Designated Case Manager.

Providers must maintain case records that document, for all individuals receiving case management, the following: the name of the individual, the dates of the case management services, the person providing the case management services, and the nature, content, and units of case management services received. The case record must also reflect whether the goals specified in the care plan have been achieved, whether the individual has declined services in the care plan, the need for and occurrences of coordination with other case managers, the timeline for obtaining needed services, and a timeline for re-evaluation of the plan.
| Provider Qualifications | The Designated Case Manager is the person responsible for the implementation of the plan of care/treatment plan. The Designated Case Manager must be an individual who meets one of the following criteria:  
- A licensed RN in Michigan;  
- A bachelor's degree with a major in a specific special education area;  
- Has earned credit in coursework equivalent to that required for a major in a specific special education area; or  
- Has a minimum of three years’ personal experience in the direct care of an individual with special needs.  
In addition to meeting at least one of the above, the Designated Case Manager must also demonstrate knowledge and understanding of all of the following:  
- Services for infants and toddlers who are eligible under the IDEA law as appropriate;  
- Part C of the IDEA law and the associated regulations;  
- The nature and scope of services covered under IDEA, as well as systems of payments for services and other pertinent information;  
- Provisions of direct care services to individuals with special needs; and  
- Provisions of culturally competent services within the community being served. |
| Designated Case Manager Services | Targeted Case Management services include:  
- Assuring that standard re-examination and follow-up of the beneficiary are conducted on a periodic basis to ensure that the beneficiary receives needed diagnosis and treatment;  
- Assisting families in identifying and choosing the most appropriate providers of care and services, scheduling appointments, and helping families to maintain contact with providers;  
- Follow-up to ensure that the beneficiary receives needed diagnostic and treatment services;  
- Assuring that case records are maintained and indicate all contacts with, or on behalf of, a beneficiary in the same manner as other covered services;  
- Coordinating school based services and treatment with parents and the child;  
- Monitoring and recommending a plan of action;  
- Coordinating performance of evaluations, assessments and other services that the beneficiary needs;  
- Facilitating and participating in the development, review, modification and evaluation of the multi-disciplinary team treatment plan;  
- Activities that support linking and coordinating needed health services for the beneficiary;  
- Providing a summary of provider, parent and student health and behavioral consultation; and  
- Coordinating with staff/health professionals to establish continuum of health and behavioral services in the school setting. |
### 2.11 SPECIAL EDUCATION TRANSPORTATION

| **Definition** | Special education specialized transportation services include transport to and from the beneficiary's pick-up and drop-off site where Medicaid services are provided. It includes no more than two one-way trips on a date of service. The need for special education transportation must be specified in the beneficiary's IEP/IFSP treatment plan. Medicaid may reimburse for special education transportation when a beneficiary receives a Medicaid-covered service on the same day. Medicaid does not reimburse for transportation provided in a regular or general education school bus. There is no additional payment for an attendant. |
| **Documentation** | Federal requirements include documentation for transportation service claims that must be maintained for purposes of an audit trail, such as an ongoing trip log maintained by the provider of the special education transportation. Ridership must be documented for each one-way trip. |
| **Procedure Codes** | For a complete listing of procedure codes, refer to the School Based Services CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.) |
| Taxi and Private Vehicle Transportation | For a taxi or family vehicle transportation expense to be reimbursed, the following documentation must be on file at the local education agency (LEA) or intermediate school district (ISD):

- Specialized transportation must be included in the Individualized Education Program (IEP).
- A Medicaid covered medical service must be provided on the same day as the transportation.
- Dates and times of each trip must be listed on the LEA’s or ISD’s trip log.
- Documentation from the beneficiary’s physician or a school provider treating the student, stating the reason taxi or family transportation is required must be retained in the student’s file.
- For transportation by taxi, an additional statement justifying the need for a taxi and the reason other less costly means of transportation cannot be used must be retained in the student’s file.
- For ongoing transportation needs, documentation is only required once per student per school year.
- For one-time or occasional use transportation, documentation is required for each trip, or trip period per beneficiary.
- The total number of trips claimed for taxi and family transportation must be included in the Special Education trip count on the Medicaid Allowable Expenditure Report (MAER).

Taxi and family vehicle cost reimbursement will be retroactive to July 1, 2012 if the proper documentation has been retained, and a claim for the trip has been approved through the Community Health Automated Medicaid Processing System (CHAMPS). Claims must be filed within one year from the date of service according to Medicaid timely filing requirements.

Transportation by stretcher car is not covered. The term "stretcher car" is defined as a vehicle capable of transporting a patient (student) in a prone or supine position (e.g., Ambucab). |
SECTION 3 – QUALITY ASSURANCE AND COORDINATION OF SERVICES

3.1 QUALITY ASSURANCE

SBS providers must have a written quality assurance plan on file. SBS costs will be reviewed/audited by MDHHS for determination of medical necessity and to verify that all services were billed and paid appropriately. The purpose of the quality assurance plan is to establish and maintain a process for monitoring and evaluating the quality and documentation of covered services, and the impact of Medicaid enrollment on the school environment.

An acceptable quality assurance plan must address each of the following quality assurance standards:

- Covered services are medically necessary, as determined and documented through appropriate and objective testing, evaluation and diagnosis.
- The IEP/IFSP treatment plan identifies which covered services are to be provided and the service frequency, duration, goals and objectives.
- A monitoring program exists to ensure that services are appropriate, effective and delivered in a cost effective manner consistent with the reduction of physical or mental disabilities and assisting the beneficiary to benefit from special education.
- Billings are reviewed for accuracy.
- Staff qualifications meet current license, certification and program requirements.
- Established coordination and collaboration exists to develop plans of care with all other providers, (i.e., Public Health, MDHHS, Community Mental Health Services Programs (CMHSPs), Medicaid Health Plans (MHPs), Hearing Centers, Outpatient Hospitals, etc.).
- Parent/guardian and beneficiary participation exists outside of the IEP/IFSP team process in evaluating the impact of the SBS program on the educational setting, service quality and outcomes.

3.2 SERVICE COORDINATION AND COLLABORATION

Children with special needs have access to services available in both outpatient and school-based treatment settings. If treatment is provided in both settings, the goals and purpose for the two must be distinct. School based services are provided to assist a child with a disability to benefit from special education. Outpatient services are provided to optimize the child’s functional performance in relation to needs in the home or community setting and must not duplicate those provided in the school setting. Collaboration between the school and the community providers is mandated to coordinate treatment and to prevent duplication of services. This collaboration may take the form of phone calls, written communication logs, or participation in team meetings such as the IEP/IFSP meeting.

3.3 ISD RESPONSIBILITIES

Each ISD must establish an implementation plan that includes explicit quality control review mechanisms to ensure full staff training and compliance, accuracy and completeness of the RMTS sample frame (designated employees), adherence to MDHHS-published methodology, editing of all moments for completeness and consistency, and accurate financial and staffing reports. Claiming entities must also fully cooperate with any review requested by the U.S. Department of Health & Human Services (HHS),
maintaining all necessary records for a minimum of seven (7) years after submission of each quarterly claim.

3.3.A. SANCTIONS

It is the intent of the State to pursue, when necessary, remedial action or implement a Corrective Plan if the ISDs or their vendors are not in compliance with Medicaid policy and procedures. If these actions are not successful, a payment freeze will be implemented and sanctions put in place until the matter is resolved. ISDs are responsible for the actions of their vendors.

The following are examples of causes for sanctions. The list is not all-inclusive.

- Repeated errors in completing the RMTS forms or filing of the claims.
- Providing insufficient data or incomplete reports to the State Contractor.
- Failure to use the claims development software.
- Failure to submit requested information, reports, or data to the State Contractor, CMS, MDHHS, MDE, or failure to cooperate with representatives of these agencies during site visits, reviews or audits.
- Failure to comply with the federal mandate to submit procedure-specific claims through the Community Health Automated Medicaid Processing System (CHAMPS).
SECTION 4 – PROVIDER ENROLLMENT

4.1 ENROLLMENT [Change Made 4/1/19]

The 56 Michigan Intermediate School Districts (ISDs), Detroit Public Schools Community District, (revised 4/1/19) and Michigan School for the Deaf are the only providers eligible to bill Medicaid for School Based Services. Providers must be enrolled and/or revalidated via the CHAMPS Provider Enrollment subsystem. Any applications or updates must be made through the CHAMPS system.

4.2 CERTIFICATION OF QUALIFIED STAFF

The Michigan Department of Education (MDE) must provide MDHHS with documentation that enrolled ISDs meet the regulatory requirements set forth for all staff providing services in the school setting.

Enrollment as a provider is predicated on certification to MDE that the educational and experiential requirements and credentials of all staff (i.e., licensure, certification, registration, etc.) who may be performing claimable activities have been met and are current. The MDE will assist any school district in this certification process and verify the status of its certification in writing, along with recommendations, with a copy sent to MDHHS.

4.3 MEDICAID ELIGIBILITY RATE

Michigan’s RMTS activity codes are designed to reflect the actual direct medical services activities that occur in a school on any given day. Because these activities and services are provided for students who are both Medicaid and non-Medicaid eligible, it is necessary to develop and apply a formula that properly allocates which students are being supported and what activities and services are being provided. This is referred to as the "IEP Medicaid Eligibility Rate (MER)" for the direct medical services program.

IEP MER is determined by calculating the ratio of Medicaid eligible recipients with health-related services indicated on their IEP/IFSPs to the total number of special education population with health-related services indicated on their IEP/IFSPs.
SECTION 5 – FINANCIAL DATA REQUIREMENTS AND UNALLOWABLE COSTS

5.1 FINANCIAL DATA

The financial data reported for the Direct Medical Services (salaries, benefits, supplies, etc.) must be based on actual detailed expenditure reports obtained directly from the participating ISD’s financial accounting system. The financial accounting system data is applied using generally accepted governmental accounting standards and principles or applicable administrative rules. The expenditures accumulated for calculating the Direct Medical Services allowable costs are to include actual non-federal expenditures incurred during the claiming period, except for the summer quarter. These allowable expenditures include such things as salaries, wages, fringe benefits and medically related supplies, purchased services and materials.

5.2 UNALLOWABLE COSTS

Providers are not allowed to report any costs that are federal funds, State flow-through funds, or non-federal funds that have been committed as local match for other federal or State funds or programs.

Claims for approved Medicaid School Based Service functions may not include expenditures of:

- Federal funds received by the ISD/LEA directly
- Federal funds that have been passed through a State or local agency
- Non-Federal funds that have been committed as local match for other Federal or State funds or programs

Funds received by an ISD for school based direct medical services are not Federal funds. They are reimbursement for prior expenditures and become, upon receipt, local funds.
SECTION 6 – SCHOOL BASED SERVICES REIMBURSEMENT

6.1 METHOD OF REIMBURSEMENT FOR DIRECT MEDICAL SERVICES, PERSONAL CARE SERVICES AND TARGETED CASE MANAGEMENT

Payment for Michigan’s school based services program is a cost-based, provider specific, annually reconciled and cost settled reimbursement methodology.

The Centers for Medicare & Medicaid Services (CMS) also requires Michigan SBS providers to submit procedure specific direct medical services claims for all Medicaid allowable services. These claims do not generate a payment but are required by CMS in order to monitor the services provided, the eligibility of the recipient, and provide an audit trail. Interim monthly payments are tied to the submission of the direct medical services claims. If claim volume decreases significantly or drops to zero in any two consecutive months, all interim payments will be held until the provider is contacted and the issue resolved. MDHHS will monitor provider claim volume to make sure that this mandate is followed.

Claims are submitted and processed through the Community Health Automated Medicaid Processing System (CHAMPS); however, the procedure code fee screens are set to pay zero. SBS providers receive their cash flow from the interim monthly payment process described below.

The interim monthly payments are based on prior year actual costs and reconciled on an annual basis to the current year costs. Cost reporting and reconciliation are based on the school fiscal year which is July 1 through June 30 of each year.

The reimbursement process for the direct medical services is comprised of the following parts:

- The SBS direct medical services procedure code specific billing process;
- The random moment time study (RMTS) component;
- The interim payment process; and,
- The cost reconciliation and cost settlement process.

6.1.A. DIRECT MEDICAL SERVICES PROCEDURE CODE SPECIFIC BILLING

Providers must continue to submit procedure specific claims in addition to the expenditure reports. The procedure specific process is described in the Covered Services Section of this chapter.

Claim documentation must be sufficient to identify the patient clearly, justify the diagnosis and treatment, and document the results accurately. Documentation must be adequate enough to demonstrate that the service was provided and that the service followed the "approved plan of treatment" (for school-based services, the service must be identified in the child’s IEP/IFSP).

The ISD may either purchase software for the claims submission function or it may utilize the services of a billing agent. The cost of this process is the responsibility of the ISD.
6.1.B. RANDOM MOMENT TIME STUDY

For the Random Moment Time Study, all ISDs will be required to utilize the services of the State Contractor who will conduct the statewide time studies.

The quarterly RMTS sampling results are produced by the State Contractor who converts them to percentages. This percentage is applied to program costs to determine reimbursement. Once complete, the time study results are provided to MDHHS where they are uploaded into the cost settlement program.

Costs are reported for direct medical services and specialized transportation services on the Medicaid Allowable Expenditure Report (MAER) and collected via financial worksheets for Personal Care Services and Targeted Case Management.

Electronic Data Systems (EDS) combines all cost information and the RMTS results, the indirect cost rate, and the Medicaid eligibility rate to calculate the total allowable costs. The MDHHS Hospital and Health Plan Reimbursement section performs the reconciliation and cost settlement process.

The ISD and/or State Contractor must comply with all conditions set forth by MDHHS as SBS policy.

The cost for the State Contractor is charged back to providers based on the State Contractor's projected cost per ISD (after federal match).

For detailed description and instructions regarding the Random Moment Time Study, refer to the School Based Services Random Moment Time Study chapter of this manual.

Summer Quarter Process

The summer quarter months are July, August and September. There is a break period between the end of one regular school year and the beginning of the next regular school year during which only a few staff are working. The majority of school staff work during the school year and do not work for part of the summer quarter (9-month staff).
However, there are some 9-month staff that opt to receive their pay over a 12-month period. Therefore, different factors must be applied to the summer formula in order to accurately reflect the activities that are performed by the staff.

The summer quarter will be divided into two parts. The first part of the quarter will extend from July 1 to the date the students return to school. The second part of the quarter will be from the date the students return to school through September 30.

The RMTS will still be performed in the summer quarter, but will take place only after the staff start back to work and will only be applied to the costs for the second part of the summer quarter. To accurately reflect the work efforts being performed when all staff have returned to work, the RMTS will be performed during a shorter time period.
### 6.1.C. INTERIM PAYMENT PROCESS

Interim payments are calculated based on an estimated monthly cost formula. The monthly cost formula utilizes prior year costs plus any inflation or program changes to calculate a monthly interim reimbursement amount. After the final cost reports have been reviewed and reported to MDHHS, reconciliation will be performed and settlements will be made to make the providers whole.

Interim payments are issued on the first pay cycle of each month based on prior year costs.

To justify an increase in the interim payment, providers must submit written documentation of significant changes in coverage, service utilization or staff costs.

Providers may request an increase or decrease in their interim payment amount at any time throughout the year. Instructions and contact information will be included with the MAER. Any written inquiries should be addressed to the MDHHS Hospital and Clinic Reimbursement Division (HCRD). (Refer to the Directory Appendix for contact information.)

All payments and adjustments are issued by the MDHHS Hospital and Clinic Reimbursement Division. Once the payments are issued to the SBS providers (ISDs), how the interim payment revenue is distributed to the respective LEAs and how the initial and final settlements are handled is up to the discretion of the ISD.

### 6.1.D. COST RECONCILIATION AND SETTLEMENT

Allowable cost will be based on the following components:

- Costs from the MAER
- Targeted Case Management and Personal Care Services Financial Worksheets
- MDE Indirect Cost Rate
- Random Moment Time Study Percentage
- Health Related IEP Medicaid Eligibility Rate (IEP MER)
- Federal Medical Assistance Percentage (FMAP)

<table>
<thead>
<tr>
<th>Allowable costs (MAER &amp; financial worksheets for TCM and PCS)</th>
<th>Indirect Cost Rate</th>
<th>Annual average % time claimable to Medicaid from the time studies</th>
<th>Discounted by the Medicaid eligibility percentage</th>
<th>% Federal Medical Assistance Percentage (FMAP) rate</th>
<th>= Medicaid reimbursement amount</th>
</tr>
</thead>
</table>

The Medicaid Allowable Expenditure Report (MAER) (modeled after the MDE SE-4096 cost report) is utilized to collect allowable costs for the medical professional staff. Costs for the staff providing targeted case management services and personal care services
that are not included in the direct medical costs are obtained from the participating ISD’s financial accounting system via financial worksheets sent out by the State Contractor.

To report direct service-related costs, providers will utilize the Medicaid Allowable Expenditure Report. This cost report template may be obtained from the School Based Services Provider Specific webpage. (Refer to the Directory Appendix for website information.) An Excel printable version of the cost report is also available on the website for those providers in need of a paper version. Cost reports from the Local Educational Agencies will be submitted to their Intermediate School District for summation utilizing the Michigan Medicaid Forms (MMF) summary software (available to providers via the File Transfer Service). Providers must register and have access to the secure MILogin in order to utilize the MMF summary software. MILogin registration instructions are also available on the School Based Services Provider Specific webpage.

The filed cost data is used to calculate an initial settlement within 90 days after the receipt of the initial cost report data. The initial settlement may result in either an over or under adjustment to the provider interim payment.

Within six months after the close of the school fiscal year, the School Based Services providers will review, certify, and finalize the MAER and transmit the report to the MDHHS Medical Services Administration for reconciliation. The cost certification form (CMS-10231; Certification of Public Expenditures) must be signed and on file with MDHHS before a final settlement will be processed. The final settlement process will begin within 12-18 months after the close of the school fiscal year. Settlements may take several months for completion. (Refer to the Forms Appendix for a copy of the CMS-10231.)

ISDs/LEAs may submit revisions to the MAER until the final settlements are processed. Instructions for completing revisions are attached to the MAER.

6.2 METHOD OF REIMBURSEMENT FOR SPECIALIZED TRANSPORTATION

6.2.A. REIMBURSEMENT

Specialized transportation costs reported on the Michigan Department of Education Transportation Expenditure Report (form SE-4094) are only the costs associated with the special education buses, taxis or private vehicles used for the specific purpose of transporting only special education children. This report does not include any federal dollars.

Medicaid-allowable specialized transportation costs include the following costs from the SE-4094:

- Salaries [Sec. 52 & Sec. 53a]
  - Bus Drivers
  - Aides
  - Employee Benefits (Bus Drivers and Aides only)
- Purchased Services – Staff (Bus Drivers and Aides only)
6.2.B. SPECIALIZED TRANSPORTATION RECONCILIATION AND SETTLEMENT

On an annual basis, the cost per trip is calculated by dividing the total Medicaid allowable costs (including indirect cost) by the total ISD-reported special education (specialized) one-way transportation trips. The cost per trip is multiplied by the quantity of Medicaid "allowable" one-way trips gleaned from CHAMPS to arrive at the Medicaid allowable cost.

An "allowable" one-way trip is one that is provided to a Medicaid beneficiary and fulfills all of the following requirements:

- Documentation of ridership is on file;
- The need for the specialized transportation service is identified in the Individualized Education Program (IEP)/Individualized Family Service Plan (IFSP); and
- A Medicaid-covered service (other than transportation) is provided on the same date of service. The Medicaid covered service must also be documented in the IEP/IFSP.

The cost settlement is accomplished by comparing the interim monthly payment totals to the annual Medicaid allowable specialized transportation cost. The cost settlement amount for the specialized transportation is combined with the cost settlement amounts for the Direct Medical Services, Targeted Case Management, and Personal Care Services; any over/under adjustments are processed as one transaction.
SECTION 7 – INDIRECT COST RATE (ICR)

7.1 INDIRECT COSTS

The ISD/LEA unrestricted indirect cost rate is calculated using the Federal Office of Management and Budget (OMB) Title 2 CFR Part 200. The methodology used to determine the indirect cost rate specific to each district is approved by the Federal cognizant agency. The indirect cost rates are updated annually by the Michigan Department of Education.
SECTION 8 – COST CERTIFICATION

8.1 COST CERTIFICATION

Once all cost reports and financial worksheets have been received by MDHHS, the summary worksheet of the Medicaid Allowable Expenditure Report (MAER) will be completed. The summary report will combine the allowable cost data submitted by the ISDs for each LEA for all four cost pools (Direct Medical, Specialized Transportation, Personal Care and Targeted Case Management). The total will be entered into the cost certification form as the "Total Computable Expenditure". The ISD is responsible for annually certifying that the total amount of expenditures for covered services has been expended and that none of the expenditures have been used as match for other programs or services. MDHHS will be utilizing the CMS-10231, "Certification of Public Expenditures (CPE)" form, for this purpose. (Refer to the Forms Appendix.)
SECTION 9 – COST ALLOCATION FACTORS

9.1 FEDERAL MEDICAL ASSISTANCE PERCENTAGE RATE

Federal regulations allow for payments to States on the basis of a Federal medical assistance percentage for part of their expenditures for services under an approved State plan. The formula for calculating this annual percentage is described in section 1905(b) of the Social Security Act. Under the formula, if a State’s per capita income is equal to the national average per capita income, the Federal share is 55%. If a State’s per capita income exceeds the national average, the Federal share is lower, with a statutory minimum of 50%. If a State’s per capita income is lower than the national average, the Federal share is increased, with a statutory maximum of 83%.

9.2 DISCOUNTED HEALTH-RELATED MEDICAID ELIGIBILITY RATE (MER)

The discounted health-related Medicaid Eligibility Rate (MER) percentage is determined by the percentage of the special education student population that is Medicaid eligible in each ISD with a health-related support service code indicated on their December 1 Student Count Report. Support service codes are gleaned from Fields 43 and 57 of the December 1 Student Count Report. Only those codes that relate to covered school based health services are to be utilized.

<table>
<thead>
<tr>
<th>Field 43</th>
<th>290, 310, 320, 360, 370, 400, 450, 460, 470</th>
</tr>
</thead>
<tbody>
<tr>
<td>Field 57</td>
<td>801, 804, 805, 807, 808, 809, 812, 814, 816, 818</td>
</tr>
</tbody>
</table>

MDHHS receives the file of special education children with health-related support services indicated on their IEPs and matches the names and birthdates of those with health-related support services against the Medicaid eligibility file to identify the percentage that are Medicaid eligible. The eligibility rate is determined once each year utilizing the December 1 Student Count Report. The calculation for the eligibility rate is as follows:

\[
\frac{\text{Medicaid special education students with a health-related support service in their IEP}}{\text{Total special education students with a health-related support service in their IEP}}
\]

9.3 ALLOCATION OF SALARIES AND BENEFITS OF PERSONNEL PROVIDING DIRECT CARE SERVICES

Actual expenditures for salaries and benefits of all personnel are to be obtained from each participating ISD’s financial accounting system. Expenditures related to the performance of approved Medicaid contracted service providers (e.g., occupational therapists, physical therapists) who also provide direct care services must also be obtained from each participating ISD’s financial accounting system.
SECTION 10 – DOCUMENTATION

10.1 DIRECT MEDICAL SERVICES DOCUMENTATION

For covered services, the school clinical record must include all of the following:

- Beneficiary name and birth date;
- Date of service/treatment;
- Type (modality) of service/treatment;
- The response to the service/treatment; and
- The name and title of the person providing the service/treatment and a dated signature.

For services that have time-specific procedure codes, the provider must indicate the actual begin and end times of the service in the school clinical record. The record must indicate the specific findings or results of the diagnostic or therapeutic procedures. The student’s school clinical record should include documentation of the implementation and coordination of services for the special education student.

Progress notes must be written monthly, or more frequently as appropriate, and must include:

- Evaluation of progress;
- Changes in medical or mental status; and
- Changes in treatment with rationale for change.

(Refer to the General Information for Providers Chapter of this manual for additional information regarding clinical record requirements.)

10.2 RMTS DOCUMENTATION

Each participating LEA must maintain a separate audit file for each quarter billed. The following minimum documentation is required:

- Financial data used to establish cost pools and factors.
- A copy of the quarterly sample results produced by the State Contractor.
- A copy of the warrant, remittance advice or Electronic Funds Transfer (EFT) documentation verifying that payment from MDHHS was received.

ISDs/LEAs must cooperate fully with any review requested by MDHHS and CMS, and maintain all necessary records for a minimum of seven (7) years.

Any changes in Federal regulations related to claims for administrative expenditures are incorporated by reference into this document.
SECTION 11 – AUDIT AND RECOVERY PROCEDURES

11.1 DIRECT SERVICE/TRANSPORTATION PROGRAM AUDIT ACTIVITIES TO BE PERFORMED BY MDHHS OFFICE OF AUDIT STAFF

MDHHS audit review of selected ISD/DPS and MSD cost reports for the Direct Service/Transportation Program may include the following activities:

- Verification that the Medicaid Allowable Expenditure Report (MAER) accurately reports the allowable costs incurred for the appropriate period.
- Verification that the salaries listed for employees/positions included in the RMTS staff pool match the payroll records for the same period as the time study.
- A review of the salaries of employees who changed positions during the time study period.
- If a replacement was hired/transferred, the auditor will verify that only the salary earned while working in a position on the MAER staff pool list was reported, and that salaries for both the original and replacement employees were not duplicated on the report for the same time period.
- Confirmation that none of the direct costs reported were also claimed as an indirect cost, that the proper indirect cost rate was used, and the rate was applied only to costs in the base. The employees in non-standard job categories are the most likely to be considered indirect type employees; therefore, documentation will be reviewed for these individuals.
- Verification that no federal funds were claimed on MAER cost reports and that MAER costs were not accepted for cost-sharing.
- A standard review of other areas, such as confirmation that reported costs were actually paid, support documentation was maintained as required, and costs were properly charged to the correct accounts should also be expected.
- Any other area deemed necessary.

The ISD/DPS/MSD should be prepared to direct the auditor to any document used to support and identify the reported MAER costs.

11.2 STUDENT CLAIMS AUDIT ACTIVITIES TO BE PERFORMED BY MDHHS OFFICE OF AUDIT STAFF

MDHHS audit review of selected ISD/DPS and MSD for approved SBS student claims may include the following activities:

- Verification that appropriate prescriptions/referrals/authorizations are updated annually and ordered by the appropriate individual.
- Verification that occupational, physical, and speech, language and hearing therapy address a beneficiary’s medical need that affects his/her ability to learn in the classroom environment.
- Confirmation that services requiring the student to be in attendance have support documentation (i.e., attendance records) on file.
- Confirmation that the providers performing the service have the required licensure/certification.
- Verification that the providers requiring supervision both "under the direction of" and "under the supervision of" have the necessary support documentation on file.
Verification that the beneficiary receiving special education transportation also received a Medicaid-covered service on the same day. In addition, the support documentation for specialized transportation includes an ongoing trip log maintained by the provider of the special education transportation.

Confirmation that support documentation for personal care services includes a completed, signed and dated monthly activity checklist.

Verification that group therapy or treatment was provided in groups of two to eight.

A standard review of the Individualized Education Program (IEP)/Individualized Family Service Plan (IFSP) treatment plan areas, such as the inclusion of a description of the beneficiary’s qualifying diagnosis and medical condition, time-related goals that are measurable and significant to the beneficiary’s function and/or mobility, and anticipated frequency and duration of treatment required to meet the time-related goals.

Any other area deemed necessary.

The ISD/DPS/MSD should be prepared to direct the auditor to any document used to support and identify the reported student claims.

11.3 AUDIT ACTIVITIES TO BE PERFORMED BY MDHHS OFFICE OF AUDIT STAFF

MDHHS audit review of selected ISD/DPS cost reports for the Administrative Outreach Program may include the following activities:

Verification that the salaries listed for employees/positions included in the Random Moment Time Study (RMTS) staff pool match the payroll records for the same period as the time study.

A review of the salaries of employees who changed positions during the time study period.

If a replacement was hired/transferred, the auditor will verify that only the salary earned while working in a position on the AOP staff pool list was reported, and that salaries for both the original and replacement employees were not duplicated on the report for the same time period.

Verification that any other salaries and costs for supplies, etc., are of direct benefit to the employees on the staff pool list, and therefore, allocable to the AOP in the same percentage as the AOP-eligible employees.

Confirmation that none of the direct costs reported were also claimed as an indirect cost, that the proper indirect cost rate was used, and the rate was applied only to costs in the base. The employees in non-standard job categories are the most likely to be considered indirect type employees; therefore, documentation will be reviewed for these individuals.

Verification that no federal funds were claimed on AOP cost reports and that AOP costs were not accepted for cost sharing.

A standard review of other areas, such as confirmation that reported costs were actually paid, support documentation was maintained as required, and costs were properly charged to the correct accounts should also be expected.

Any other area deemed necessary.

The ISD/DPS should be prepared to direct the auditor to any document used to support and identify the reported AOP costs.
11.4 Audit Findings and Resolution

Audit findings and resolution will include the following:

- Identified overstatement of expenditures on the MAER will require the revision of the MAER and a revised final settlement for all specifically identified overstatements.

- For claim error rates in excess of the materiality threshold percentage, as established by MDHHS, the recovery will be any excess percentage greater than materiality threshold multiplied by total Medicaid paid to the ISD during the period covered by the audit.

 Recoveries and re-filings are limited to fiscal years considered within three years from the last date of payment for that period.

  2.15 Periodicity of Reporting ............................................................................................................ 7
SECTION 1 - CLAIMS DEVELOPMENT OVERVIEW

Using the State of Michigan’s competitive bid process, MDHHS will select one Contractor to implement and administer the random moment time study. The Contractor will also provide the ISDs/DPS the option of performing certain time study responsibilities and claims development activities on behalf of those ISDs/DPS that choose to participate in this portion of the State contract and pay for these services.

1.1 CLAIMS DEVELOPMENT ENROLLED PROVIDERS

All ISDs/DPS will be required to utilize the services of the State’s RMTS and Claims Development Contractor, who will conduct the statewide time studies and develop and submit claims on their behalf each quarter.

The State Claims Development Contractor will develop an implementation plan on behalf of its ISDs/DPS to conduct the statewide time studies each quarter, utilizing the claims development software, as well as complete all other key functions required for valid claim development.

The cost for the Contractor will be charged back to providers who participate in this option based on the Contractor’s projected cost per ISD/DPS (after federal match).

1.2 OVERVIEW OF CLAIMS DEVELOPMENT PROCESS

Based on federal and state statutes and regulations, below is a partial list of specific functions and tasks that must be accomplished for reimbursement of Medicaid Administrative Outreach Program services. Additional details appear in subsequent sections of this chapter.

Claims will be developed by the State’s Claims Development Contractor utilizing the claims development software following these basic steps:

- The quarterly RMTS sampling results are produced by the State’s RMTS and Claims Development Contractor, who converts them to percentages. The percentages are applied to program costs to determine reimbursement.
- The cost/claim generation component of the claims development software uses ISD/DPS costs and other claim factors to calculate and produce the claim.
- The claim is submitted to MDHHS with verification of claim validity from each ISD/DPS.
- The ISD/DPS and/or Contractor must comply with all conditions set forth by MDHHS as SBS policy.

1.3 IMPLEMENTATION PLAN

Each ISD/DPS must submit an Implementation Plan that reflects the details of their SBS Administrative Outreach Program operation for review and approval by MDHHS and by CMS. Any subsequent changes must also be reported and receive approval.

Claims may not be submitted to MDHHS for reimbursement until MDHHS has approved the Implementation Plan that will be utilized based on this published policy.
SECTION 2 - CLAIM CALCULATIONS

2.1 IMPLEMENTATION PLAN

Each ISD/DPS must submit an implementation plan that reflects the details of their SBS Administrative Outreach Program for review and approval by MDHHS and CMS. Any subsequent changes must also receive approval.

Each implementation plan must include explicit quality control review mechanisms to ensure full staff training and compliance, accuracy and completeness of the sample frame (designated employees), adherence to the MDHHS-published methodology, editing of all moments for completeness and consistency, and accurate financial and staffing reports. Claiming entities must also fully cooperate with any review requested by the U.S. Department of Health & Human Services (HHS), maintaining all necessary records for a minimum of seven (7) years after submission of each quarterly claim.

2.2 SANCTIONS

It is the intent of the State to pursue, when necessary, remedial action or implement a Corrective Plan if the State-selected contractors, the ISD/DPS, or their vendors are not in compliance with the new SBS Administrative Outreach published policy. If this is not successful, a contract payment freeze will be implemented and sanctions put in place until the matter is resolved. Those independent ISDs/DPS not participating in the State’s claims development contract will be held accountable for their vendor’s actions.

The following are examples of causes for implementation of sanctions for all districts. The list is not all-inclusive.

- Repeated errors in completing the RMTS forms or filing of the claims.
- Providing insufficient data or incomplete reports to the Contractors.
- Failure to use the CLAIMS DEVELOPMENT software.
- Failure to cooperate with, or submit requested information, reports, or data to the Special Monitoring Contractor, CMS, MDHHS, MDE, and other staff involved during site visits, reviews or audits.

2.3 FACTORS FOR CLAIMS DEVELOPMENT

MDHHS will submit quarterly claims on behalf of all participating school districts to the CMS. Each claim will be based on the following factors: The cost pool, percentage of time claimable to Medicaid Outreach Program administration, the Federal Financial Participation (FFP) rate, and the discounted Medicaid eligibility percentage rate for that district. The factors for the summer quarter are described above.

2.3.A. COST POOL

This consists of the actual costs incurred for the quarter being claimed, such as salaries, overhead, etc. Each participating ISD/DPS must certify that the claim they submit to MDHHS contains sufficient non-Federal (State, county, or local) funds to match requirements and that the claim only includes actual costs.
2.3.B. FEDERAL FINANCIAL PARTICIPATION RATE

Federal regulations allow for a reimbursement rate of 50% for Medicaid administrative activities.

2.3.C. DISCOUNTED MEDICAID ELIGIBILITY PERCENTAGE

The discounted Medicaid eligibility percentage is determined by the percentage of the student population in each ISD/DPS who are actually Medicaid beneficiaries. The discounted Medicaid eligibility rates will be determined twice each year and applied to certain activities in the claim calculation formula. To calculate the discounted Medicaid eligibility rates, the claiming entity will obtain the September and February fourth Wednesday pupil count report list from the Center for Educational Performance and Information (CEPI). The pupil count list will include the student name and date of birth. MDHHS will provide a method for using the list to verify the number of Medicaid-eligible students. This number will be used in a calculation with the total pupil count to determine the discounted percentage of Medicaid-eligible students in the ISD/DPS. The September pupil count list will be used to determine discounted Medicaid eligibility rates for time studies conducted in the Fall and Winter quarters, and the February pupil count will be used for time studies conducted in the Spring and Summer quarters.

Based on the above factors, the claim that is sent to Medicaid is calculated as follows:

### Fall, Winter and Spring Quarter Formulas for Calculating Administrative Outreach Claims

<table>
<thead>
<tr>
<th>Cost pools (salaries, overhead, etc.)</th>
<th>X</th>
<th>% time claimable to Medicaid Outreach Administration from time studies</th>
<th>X</th>
<th>Discounted by the Medicaid eligibility percentage</th>
<th>X</th>
<th>% Federal Financial Participation (FFP) rate</th>
<th>=</th>
<th>The amount of the claim submitted for Medicaid reimbursement</th>
</tr>
</thead>
</table>

### Summer Quarter Formulas

The summer quarter will be divided into two parts. The sum of both parts will be submitted to Medicaid for reimbursement. There will be two workbooks created for the summer quarter, one for each part.

#### Part I - Summer Quarter Formulas from July 1 to the Date Students Return to School

<table>
<thead>
<tr>
<th>Cost pool (only the 9-month salaries and related costs that are paid during this time period)</th>
<th>X</th>
<th>Average % of time claimable to Medicaid Outreach Administration from the previous three quarters</th>
<th>X</th>
<th>Discounted by the Medicaid eligibility percentage</th>
<th>X</th>
<th>Percent of FFP rate</th>
<th>=</th>
<th>The amount of the partial claim for Part I of the Summer Quarter</th>
</tr>
</thead>
</table>
Salary and related costs for 9-month staff that were earned during the school year, but are paid during the summer break, will be collected in a separate cost pool. Salaries paid during this period for 12-month staff are not included in the cost pool.

The cost pool containing the salaries and related costs of 9-month staff who are paid over 12 months will be claimed based on the average time study results and Medicaid Eligibility (MAE) rate from the previous three quarters.

Part II - Remainder of the Summer Quarter – Begins on the Date Students Return to School through September 30

<table>
<thead>
<tr>
<th>Cost pools (include all allowable salaries, overhead, etc.)</th>
<th>% of time claimable to Medicaid Outreach from the Summer Quarter time study</th>
<th>Discounted by the Medicaid eligibility percentage</th>
<th>Percent of FFP rate</th>
<th>The amount of the claim for Part II of Summer Quarter</th>
</tr>
</thead>
</table>

The claims development software will add the Summer Quarter Part I and Part II claim amounts together to reach the dollar amount of the total Summer Quarter claim submitted to MDHHS for reimbursement.

2.4 FINANCIAL DATA

The financial data reported (salaries, benefits, supplies, etc.) must be based on actual detailed expenditure reports obtained directly from the participating ISDs'/DPS' financial accounting system. The financial accounting system data is applied using generally accepted governmental accounting standards and principles or applicable administrative rules. The expenditures accumulated for calculating the Administrative Outreach claim are to include only actual expenditures incurred during the claiming period, except for the summer quarter.

2.5 ALLOCATION OF SALARIES AND BENEFITS OF PERSONNEL PROVIDING DIRECT CARE SERVICES

Actual expenditures for salaries and benefits of all personnel included in an Administrative Outreach claim are to be obtained from each participating ISD/DPS financial accounting system. Expenditures related to the performance of approved Medicaid Administrative Outreach functions by contracted service providers (e.g., occupational therapists, physical therapists) who also provide direct care services must also be obtained from each participating ISD/DPS financial accounting system.
2.6 RMTS DOCUMENTATION AND RECORDKEEPING/AUDIT FILE REQUIREMENTS

Each participating school district will maintain a separate audit file for each quarter billed. The following minimum documentation will be required:

- Financial data used to establish cost pools and factors.
- A copy of the quarterly sample results, produced by the State’s RMTS and Claims Development Contractor.
- A completed quarterly claim, produced by the claims development software and signed by the Chief Financial Officer of the ISD/DPS.
- A copy of the warrant, remittance advice or Electronic Funds Transfer (EFT) documentation, verifying that payment from MDHHS was received.

Districts must cooperate fully with any review requested by MDHHS and CMS, and maintain all necessary records for a minimum of seven (7) years after submission of each quarterly claim.

Any changes in Federal regulations related to claims for administrative expenditures are incorporated by reference into this document.

2.7 NON-STUDENT SPECIFIC/PRE-MEDICAID ELIGIBILITY DETERMINATION

There are some Administrative Outreach activities and expenditures that are approved by Medicaid that have not been addressed thus far. They are:

- Provided to the entire "at-risk" population,
- Not identifiable to individual students, and
- Provided before Medicaid eligibility is determined.

These activities are to be allocated to the approved Medicaid administrative outreach claim based on the results of the time study conducted during the claiming period.

2.8 STUDENT-SPECIFIC ADMINISTRATIVE FUNCTIONS EXPENDITURES

There are some Administrative Outreach functions that are identifiable to individual students after Medicaid eligibility has been determined. These functions are to be allocated in the administrative claim based on both the time study results conducted during the claiming period and the applicable discounted Medicaid eligibility rate.

2.9 NON-SALARY EXPENDITURES

Expenditures for materials and supplies related to the approved Medicaid administrative outreach activities may be included in the claim if they can be attributed directly to individuals who are claimed. The principles for claiming expenditures and cost allocation, including correct depreciation of assets as published in the Federal Office of Management and Budget (OMB) Title 2 CFR Part 200, must be followed. Examples include conference fees, registration fees, mileage, pagers, printing fees (i.e., for business cards), furniture, equipment, copy machine expenses, etc. Such expenditures are to be based on actual detailed departmental expenditure reports obtained directly from the participating ISD/DPS...
financial accounting system. These expenditures may not include items identified as indirect costs, such as central business office operations, general building maintenance and repair costs, or any other costs classified as an indirect cost.

### 2.10 INDIRECT COSTS

Allocable indirect costs are the product of the school district aggregate, calculated, approved Medicaid administrative outreach claim amount, multiplied by the ISD/LEA unrestricted indirect cost rate, as approved annually by the Michigan State Board of Education (MSBE). The ISD/LEA unrestricted indirect cost rate is calculated using the Federal Office of Management and Budget (OMB) Title 2 CFR Part 200. The methodology used to determine the indirect cost rate specific to each district has been approved by the Federal cognizant agency. The indirect cost rates are updated annually by the Michigan Department of Education.

### 2.11 CLAIM CERTIFICATION

The accuracy of the submitted claims must be certified by the chief financial officer, the superintendent of the district, or the consortium’s lead ISD/DPS designee. Such certification is to be documented on an MDHHS-approved certification form, and conform to the certification requirements of 42 CFR 433.51. Detailed claim analyses and supporting documentation will be maintained by the ISD/DPS for audit or future reference purposes according to the terms identified in the interagency agreement between the district and MDHHS.

The Electronic Signature Verification Statement (DCH-3890) form must be completed by each provider and submitted to MDHHS to certify costs electronically. A copy of the completed DCH-3890 must be kept on file by the provider until the individual signing the certification changes. (Refer to the Forms Appendix for a copy of the form.)

Reimbursement will be paid after the claim has been submitted to, reviewed by, and determined to be acceptable and accurate by MDHHS and CMS.

### 2.12 ANNUAL RECONCILIATION

At the end of the district’s fiscal year, and after its annual financial audit is completed, a reconciliation of the filed administrative outreach claims, with the financial accounting records and supporting documentation, must be performed. Adjustments to future administrative claims must be made based on the results of the reconciliation analyses to consider any year-end adjustments to accounting entries of any items which might have impacted the claim amounts.

### 2.13 FISCAL PROVISIONS

School districts must use an appropriate Revenue Code to identify the Medicaid SBS Administrative Outreach Program funds within their accounting records.

### 2.14 SUBMISSION OF CLAIMS

All claims must be developed and submitted using the reporting format (structured spreadsheet template) and approved certification forms.
The claim package consists of completed Excel workbooks for each individual ISD/DPS and are combined and consolidated into one claim that is submitted to MDHHS.

All claims are to be submitted in accordance with the reporting requirements established by MDHHS. It is imperative that districts work closely with the Claims Development Contractor to provide pertinent financial, enrollment and personnel data and meet their deadlines and any other technical specifications. Claims not submitted on time must be submitted the following quarter as an adjustment to the prior missed quarter and will be processed for that following quarter. Claims not conforming to reporting requirements will not be accepted or processed.

### 2.15 Periodicity of Reporting

Districts must submit claims for expenditures related to approved Medicaid administrative outreach activities to MDHHS on a quarterly basis. The claim is due to MDHHS on or before 120 calendar days after the end of the reporting quarter.

#### Timeframes to Submit Administrative Outreach Claims to MDHHS

9.2.E. ISD Oversight
SECTION 1 – GENERAL TIME STUDY INFORMATION

This chapter describes the random moment time study process for the School Based Services (SBS) direct medical services program.

In accordance with the Centers for Medicare & Medicaid Services (CMS) reimbursement policy, some activities performed by medical professionals and Intermediate School District (ISD) staff in a school-based setting are eligible for federal matching funds. These activities may be performed by staff with multiple responsibilities. CMS reimbursement requirements include the use of a random moment time study (RMTS) as a component of the Medicaid reimbursement methodology. The time study results are used to determine the amount of staff time spent on Medicaid-allowable activities. One statewide time study per staff pool is performed each quarter.

1.1 ADMINISTRATIVE OUTREACH PROGRAM ACTIVITIES

The School Based Services Administrative Outreach Program (AOP) offers reimbursement for the cost of administrative activities that support efforts to identify and enroll potentially eligible persons into Medicaid and that are in support of the state Medicaid plan.

The activities fall into several categories:

- Medicaid Outreach
- Facilitating Medicaid Eligibility Determinations
- Health-related Referral Activities
- Medical Service Program Planning, Policy Development, and Interagency Coordination
- Programmatic Monitoring and Coordination of Medical Services
- Transportation and Translation Services

1.2 DIRECT MEDICAL SERVICES

Medicaid covered services that are medically necessary and specified in the beneficiary’s Individualized Education Program (IEP) or Individualized Family Service Plan (IFSP) include:

- Occupational Therapy Services
- Orientation and Mobility Services
- Physical Therapy Services
- Assistive Technology Device Services
- Speech, Language and Hearing Services
- Psychological, Counseling and Social Work Services
- Developmental Testing Services
- Nursing Services
- Physician and Psychiatric Services
- Personal Care Services
- Targeted Case Management Services

1.3 STAFF POOLS AND CONFIDENCE LEVELS [CHANGE MADE 4/1/19]

The RMTS is carried out utilizing customized claims development software that automates aspects of the school district time study process. The claims development software is comprised of three components: sampling/staff pool lists, training, and cost/claim generation. All ISDs are required to utilize the services of the State’s RMTS and Claims Development Contractor (hereafter referred to as the Contractor). The Contractor conducts the statewide time studies, produces the implementation plans and reports, and develops and submits the claims on behalf of the 56 ISDs, Detroit Public Schools Community District (revised 4/1/19) and Michigan School for the Deaf (hereafter referred to as the ISDs).

Time studies will be carried out over the following staff pools:

- AOP Only Staff – This staff pool consists of individuals who perform only administrative outreach activities. They do not perform any direct medical activities.
- AOP & Direct Medical Staff – This staff pool consists of individuals who perform both Direct Medical activities and AOP activities.
- Personal Care Services Staff – This direct medical only staff pool consists of individuals who perform direct care Personal Care Services.
- Targeted Case Management Services Staff – This direct medical only staff pool consists of individuals who perform Targeted Case Management (TCM) Services.

The RMTS results identifying the percentage of claimable time are applied to the allowable correlating cost pool. All staff pools are mutually exclusive.

The sample size of each cost pool ensures a quarterly level of precision of +/- 2% (two percent) with at least a 95% (ninety-five percent) confidence level and an annual level of precision of +/- 2% (two percent) with at least a 95% (ninety-five percent) confidence level.

Valid moments are completed moments that have been received by the Contractor and determined to be complete and accurate. Invalid moments are moments that are assigned to staff who are no longer in the position as selected, moments that are outside of paid work hours, and moments not returned for any other reason (including Activity Code 18).

As long as the completed observation rate meets or exceeds 85%, missing observations will be dropped from all calculations. Should the completion rate fall below 85%, missing observations will be included as non-matchable.
**SECTION 2 – CENTRALIZED CODING**

The Contractor is responsible for coding the time study moments. MDHHS oversees the Contractor and ISDs participating to assure their compliance with all aspects of program policy and federal regulations.
SECTION 3 – TIME STUDY METHODOLOGY

3.1 RANDOM MOMENT TIME STUDY OVERVIEW

The time study design logs only what the participant is doing at one moment in time. A random moment consists of one minute of work done by one employee, both chosen at random, from among all such minutes of work that have been scheduled for all designated staff statewide.

The RMTS measures the work effort of each group of approved staff involved in the time study process by sampling and analyzing the work efforts of a randomly-selected cross-section of each staff pool. The RMTS methodology employs a technique of polling employees at random moments over a given time period and tallying the results of the polling over that period. The method provides a statistically valid means of determining the work effort being accomplished in each program of services. The sampling period is defined as the three-month period comprising each federal quarter of the year, except for the abbreviated sample period used in the summer quarter (July through September).

The Contractor will use the claims development software to conduct the statewide time studies each quarter. This software produces random moments concurrent with the entire reporting period which are then paired with randomly selected members of the designated staff pool population. The sampling is constructed to provide each staff person in the pool with an equal opportunity or chance to be included in each sample moment. Sampling occurs with replacement so that after a staff person and a moment are selected, the staff person is returned to the potential sampling universe. Therefore, each staff person has the same chance as any other person to be selected for each moment, which ensures true independence of sample moments.

Once the random sample of staff moments has been generated, the sample is printed in the form of master and location control lists for sample administration purposes, and as time study forms for collecting the moment data. Each sampled moment is identified on its respective control list in chronological order by the name of the staff person to be sampled and the date and time at which the recording should take place.

3.1.A. LONG-TERM SUBSTITUTES

Long-term substitute staff replacing permanent staff on leave may be added to the staff pool lists. The following criteria apply when long-term substitutes are utilized:

- A long-term substitute staff must be employed by the ISD/Local Educational Agency (LEA) for at least 30 calendar days within the quarter.
- The ISD/LEA may report the name of the long-term substitute staff any time after the sampling moments are distributed.
- The long-term substitute staff must meet all of the program requirements and provider qualifications necessary to participate in the Medicaid school based services program staff pool.
- If listed on the staff pool list, the substitute staff must complete the time study moment.
- The cost reflected should be the sum of the cost of the regular staff on leave and the long-term substitute staff.
All audit liability for the financial data reported and the tracking of the moments is the responsibility of the ISD/LEA reporting entity.

All staff whose costs are included in the cost pool, including long-term substitutes, must be included in the sample universe for the time study.

3.2 RANDOM MOMENT TIME STUDY FORM COMPLETION

There are two steps to completing a time study form:

- In the first step, for the designated moment, the time study participant provides the answers to three questions (What are you doing? Who are you with? Why are you doing it?). These questions relate to their activities at the time of their randomly selected moment.
- In the second step, the time study forms are collected from the participants, and the Contractor assigns the appropriate activity code for that moment based on the answers to the three time study questions.

The Contractor conducts the statewide time studies each quarter for all ISDs and produces a report detailing the results. This involves importing clinician information from the ISDs to compile the statewide pool of all eligible time study participants for each staff pool list. There are four separate staff pools sampled for the RMTS each quarter: 1) the AOP only staff pool, 2) the AOP and Direct Medical Services staff pool, 3) the Personal Care Services staff pool, and 4) the Targeted Case Management Services staff pool. All staff pools have 800 moments randomly selected for the summer quarter (July-September). For the remaining three quarters, the Direct Medical Services and the Targeted Case Management Services staff pools have 3,000 moments randomly selected per quarter, and the Personal Care Services staff pool has 3,200 moments randomly selected per quarter. The person’s name that is associated with each moment is placed on a time study form. The Contractor distributes the control lists of their selected staff and the time study forms to the ISDs prior to the beginning of the reporting period. The Contractor is also responsible for the collection of all time study forms for the ISDs.

The Contractor monitors the status of each time study form so that appropriate follow-up calls are made for delinquent moments or missing data. The ISD is responsible for ensuring that a copy of the time study form and instructions are distributed to staff just prior to the assigned moment. The completed time study forms are returned to the Contractor, generally on a weekly basis, for data entry and tabulation.

At the end of the sampling period after all data has been collected and tabulated, program precision tables will be produced by the Contractor. These tables will verify that a sufficient number of personnel were sampled to ensure time study results that have a confidence level of at least 95% quarterly with a precision level of +/- 2% annually.

3.3 TIME STUDY STAFF POOLS

To preserve the integrity of the RMTS process and to allow for timely process flow, school staff are given four weeks to review and return the staff pool lists and financials to the Contractor for those staff eligible to participate in each time study group. The staff pool lists must be returned as a complete file with all updates reflected. No partial staff pool list files will be accepted by the Contractor.
If staff pool lists and/or financials for the Personal Care Services, the Targeted Case Management, or the Administrative Outreach Program (AOP) time studies are not returned to the Contractor on or before the published deadline, the LEA staff pool lists and correlating financials will be removed from the time study and claim calculation for the affected quarter. ISD coordinators and LEA financial contact staff will be notified.

When providing the staff pool list of those eligible to participate in the time studies, school districts must certify the list of participants and activities to be claimed to ensure that all appropriate personnel are submitted and that appropriate credentials are in place for billing Medicaid.

### 3.3.A. AOP ONLY STAFF POOL

AOP Only Staff Pool:

- Administrators
- Counselors
- Early Identification/Intervention Personnel
- Physician Assistants
- Teacher Consultants
- School Psychologists (certified by the Michigan Department of Education but without Michigan licensure)
- Limited Licensed Speech Language Pathologists (without their American Speech-Language-Hearing Association Certificate of Clinical Competence)
- School Social Workers (certified by the Michigan Department of Education but without Michigan licensure)

### 3.3.B. AOP & DIRECT MEDICAL SERVICES STAFF POOL

AOP & Direct Medical Services Staff Pool:

- Fully Licensed Speech Language Pathologists
- Audiologists
- Counselors
- Licensed Practical Nurses
- Occupational Therapists
- Occupational Therapist Assistants
- Orientation and Mobility Specialists
- Physical Therapists
- Physical Therapist Assistants
- Physician and Psychiatrists
- Psychologists (not School Psychologists)
- Registered Nurses
- Social Workers
3.3.C. PERSONAL CARE SERVICES STAFF POOL

The following staff may be appropriate for inclusion in time studies if they are involved in Personal Care activities in the school setting:

- Bilingual Aides
- Health Aides
- Instructional Aides
- Paraprofessionals
- Program Assistants
- Teacher Aides
- Trainable Aides

3.3.D. TARGETED CASE MANAGEMENT SERVICES STAFF POOL

Staff with the following credentials may be appropriate for inclusion in time studies if they are involved in Targeted Case Management activities in the school setting:

- A bachelor’s degree with a major in a specific special education area.
- Coursework credit equivalent to a major in a specific special education area.
- Minimum of three years' personal experience in the direct care of an individual with special needs.
- A licensed Registered Nurse (RN) in Michigan.

Targeted case managers must also demonstrate knowledge and understanding of all of the following:

- Services for infants and toddlers who are eligible under the IDEA law as appropriate;
- Part C of the IDEA law and the associated regulations;
- The nature and scope of services covered under IDEA, as well as systems of payments for services and other pertinent information;
- Provision of direct care services to individuals with special needs; and
- Provision of culturally competent services within the community being served.
**SECTION 4 – ADMINISTRATIVE OUTREACH AND DIRECT MEDICAL ACTIVITY CODE SUMMARY**

This section summarizes the code categories utilized for the random moment time study and indicates whether they are claimable for reimbursement under the AOP only, the AOP & Direct Medical program (including Personal Care Services and Targeted Case Management Services), allocated across all programs, or "unallowable" (not claimable). The "unallowable" activities are those that are purely educational in nature.

Activities can fall into one of the following categories for Medicaid reimbursement purposes:

- "A" - Allowable means the expense is allowable for Medicaid reimbursement
  - AOP services have a federal financial participation (FFP) rate of 50%
  - Direct medical IEP/IFSP services have a federal medical assistance percentage (FMAP) rate that varies from year to year
- "U" - Unallowable means the expense is not allowable for Medicaid reimbursement
- "R" - Reallocated means reimbursement across multiple activities that is allocated to isolate the amount applicable to the Medicaid allowable category
- "AOP Medicaid Eligibility Rate (MER)" - The AOP MER is determined by calculating the percentage of the county student population that is Medicaid eligible
- "IEP MER" - The direct medical IEP MER is determined by calculating the percentage of special education students under the age of 21 with health related support services documented in their IEP/IFSPs that are Medicaid eligible

These codes represent activities that may be performed by any time study participants during a typical workday. Some of these activities may be claimed under Medicaid and some may not. In the following section, examples and clarifications of each code are provided to assist with the appropriate coding of the activities.

### 4.1 Activity Coding

#### 4.1.A. Code 1 - Medicaid Outreach and Public Awareness

**U – Direct Medical Services**

**A – Administrative Outreach**

This code is used when school staff are performing activities that inform eligible or potentially eligible individuals about Medicaid and how to access Medicaid programs. This code is also used for describing the services covered under the Medicaid program and how to obtain Medicaid preventive services. Activities related to Child Find are not recorded here, but instead under Code 2.
It includes related paperwork, clerical activities, or staff travel required to perform the following activities:

- Informing families and distributing literature about the services and availability of the Early and Periodic Screening, Diagnosis and Treatment (EPSDT) program and the many different Michigan Medicaid programs such as Healthy Kids, MIChild and Children’s Special Health Care Services.

- Informing and encouraging families to access Medicaid managed care systems, i.e., Medicaid Health Plans.

- Informing families about the EPSDT and Medicaid health-related programs and the value of preventive health services and periodic exams.

- Assisting the Medicaid agency to fulfill outreach objectives of the Medicaid program by informing individuals, students, and their families about health resources available through the Federal Medicaid Program.

- Conducting Medicaid outreach campaigns and activities not related to Child Find (e.g., health fairs) that provide information about services provided by such entities as the Community Mental Health Service providers, Local Health Departments, etc.

- Conducting a family planning health education outreach program or campaign, if it is targeted specifically to Medicaid-covered family planning services.

- Contacting pregnant and parenting teenagers about the availability of Medicaid services, including referral to family planning and well baby care programs and services.

- Providing referral assistance to families with information about the Medicaid program.

- Providing information about Medicaid screenings that will help improve the identification of medical conditions that can be corrected or ameliorated through Medicaid services.

- Notifying families of EPSDT program initiatives such as Medicaid screenings conducted at a school site. These screenings are distinct from other general health screenings that are covered by Code 2.

- Coordinating with the local media (newspaper, TV, radio, video) to inform the public about EPSDT screenings, health fairs and other health related services, programs and activities organized by the school.

- Coordinating or attending child health fairs that emphasize preventive health care and promote Medicaid services by presenting Medicaid material in areas with the likelihood of high Medicaid eligibility.

- Informing families about the availability of Medicaid providers of specific covered services, and how to effectively utilize services and maintain participation in the Medicaid program.

- Providing parents, on report card pick-up day or at parent conferences, information about the Medicaid program and health care services available to eligible children, including EPSDT screening services and medically necessary treatment.
4.1.B. CODE 2 - NON-MEDICAID OUTREACH

U – Direct Medical Services

U – Administrative Outreach

This code is used for performing activities that inform eligible or potentially eligible individuals about social, vocational and educational programs, including special education, that are not covered by Medicaid and how to access them. Activities include describing the eligible or potentially eligible individuals, the range of benefits covered under these non-Medicaid social, vocational, and educational programs, and how to obtain them (e.g., WIC, SSI, LIF, Child Find).

It includes related paperwork, clerical activities, or staff travel required to perform the following activities:

- Informing families about wellness programs and how to access these programs.
- Scheduling and promoting activities that educate individuals about the benefits of healthy lifestyles and practices.
- Conducting general health education programs or campaigns addressed to the general population.
- Conducting outreach campaigns directed toward encouraging persons to access social, educational, legal or other services not covered by Medicaid.
- Assisting in early identification of children with special medical/mental health needs through various Child Find activities.
- Developing the school district’s student/parent handbook.
- Coordinating with the local media (newspaper, TV, radio, video) to inform the public about upcoming events such as health fairs or screenings that focus on non-Medicaid social, vocational and educational programs, and activities such as scholarships, remedial classes, Child Find, DARE, anti-smoking campaigns, etc.
- Providing parents, on report card pick-up day or at parent conferences, information about non-Medicaid programs, social, vocational and educational, and general health care services available in the community or the school for their children.

4.1.C. CODE 3 - FACILITATING MEDICAID ELIGIBILITY DETERMINATION

U – Direct Medical Services

A – Administrative Outreach

This code is used for assisting an individual to become eligible for Medicaid. This activity does not include the actual determination of Medicaid eligibility.
It includes paperwork, clerical activities, or staff travel required to perform the following activities:

- Verifying an individual’s current Medicaid eligibility status.
- Facilitating eligibility determination for Medicaid by planning and implementing a Medicaid information program.
- Participating as a provider of Medicaid eligibility outreach information.
- Explaining Medicaid eligibility rules and the Medicaid eligibility process to prospective applicants.
- Referring an individual or family to the local MDHHS office or other local office to make application for Medicaid benefits.
- Assisting individuals or families to complete the Michigan Medicaid eligibility application.
- Assisting the individual or family in collecting/gathering information related to the application and eligibility determination for an individual, including resource information and third party liability (TPL) information, as a prelude to submitting a formal Medicaid application.
- Providing necessary forms and packaging all forms in preparation for the Medicaid eligibility determination.
- Referring families to appropriate sources to obtain Medicaid applications.

**4.1.D. CODE 4 - FACILITATING APPLICATION FOR NON-MEDICAID PROGRAMS**

**U – Direct Medical Services**

**U – Administrative Outreach**

This code is used for informing an individual or family about programs such as Child Find, Food Stamps, SSI, WIC, Daycare, Legal Aid, Free and Reduced Lunch, and other social or educational programs and referring them to the appropriate agency to make application.

It includes related paperwork, clerical activities, or staff travel required to perform the following activities:

- Explaining the eligibility process for non-Medicaid programs.
- Assisting the individual or family to collect/gather information and documents for the non-Medicaid program applications.
- Assisting the individual or family in completing the non-Medicaid programs application(s).
- Developing and verifying initial and continuing eligibility for the Free and Reduced Lunch Program.
- Providing necessary forms and packaging all forms in preparation for the non-Medicaid eligibility determination.
4.1.E. CODE 5 - PROGRAM PLANNING, POLICY DEVELOPMENT AND INTERAGENCY COORDINATION RELATED TO MEDICAL SERVICES

U – Direct Medical Services

A – Administrative Outreach

This code is used for performing activities associated with the collaborative development of programs with other agencies that assure the delivery of Medicaid-covered medical/mental health services to school-age children. It applies only to employees whose position descriptions include program planning, policy development and interagency coordination, and/or those staff specifically appointed to appropriate committees/programs performing required activities.

It includes related paperwork, clerical activities or staff travel required to perform the following activities:

- Defining the scope of each agency’s Medicaid service in relation to the other, and identifying gaps or duplication of medical/mental health programs.
- Analyzing Medicaid data related to a specific program, population, or geographic area and working with Medicaid resources, such as Medicaid Health Plans, to locate and develop EPSDT health services referral relationships and expanding school medical/mental health programs to school populations of need.
- Creating a collaboration of health professionals to provide consultation and advice on the delivery of health care services to the school populations, and developing methods to improve the referral and service delivery process by Medicaid health providers.
- Containing Medicaid costs for individuals with multiple challenging disabilities by reducing overlap and duplication of Medicaid services through collaborative efforts with Medicaid Health Plans, local Community Mental Health Service providers and Local Health Departments.
- Monitoring and evaluating policies and criteria for performance standards of medical/mental health delivery systems in schools and designing strategies for improvements.
- As a part of the school health policy quality assurance system, maintain and ensure the continuity of all Medicaid health-related services, including developing and monitoring contracts with private providers, agencies and/or provider groups.
- Overseeing the organization and outcomes of the coordinated medical/mental health service provision with Medicaid Health Plans.
- Developing internal referral policies and procedures for use by staff so that appropriate coordination of health services occurs between the various Medicaid providers and entities, such as Community Mental Health Service providers, Local Health Departments, Medicaid Health Plans, and those in the educational setting.
Designing and implementing strategies to:

- identify students who may be at high risk for poor outcomes because of poverty, dysfunctional families, and/or inappropriate referrals, and need medical/mental health interventions.
- identify pregnant students who may be at high risk of poor health outcomes because of drug usage, lack of appropriate prenatal care, and/or abuse or neglect.
- assure that students with any significant health problems are diagnosed and treated early.

Presenting specific provider information about Medicaid EPSDT screening in the schools that will help identify medical conditions that can be corrected or ameliorated by services covered through Medicaid.

Developing procedures for tracking and resolving families’ requests for assistance with Medicaid services and providers. This does not include the actual tracking of requests for Medicaid services.

Developing new health programs with local community health providers for the Medicaid population, as determined by a needs assessment and geographic mapping.

Working with requests and inquiries from local school board members, county commissioners, or State legislators to resolve unique or unusual requests or boundary issues regarding appropriate care for certain Medicaid-eligible groups or populations.

Coordinating with interagency committees to identify, promote and develop medical services in the school system.

**4.1.F. CODE 6 - PROGRAM PLANNING, POLICY DEVELOPMENT AND INTERAGENCY COORDINATION RELATED TO NON-MEDICAL SERVICES**

**U – Direct Medical Services**

**U – Administrative Outreach**

This code is used when performing activities associated with the development of strategies to improve the coordination and delivery of community services to school-age children, and when performing collaborative activities with other agencies. Non-medical services may include social, educational, and vocational services.

It includes related paperwork, clerical activities or staff travel necessary to perform the following activities:

- Identifying gaps or duplication of other non-medical services (e.g., social, vocational and educational programs) to school-age children and developing strategies to improve the delivery and coordination of these services.
- Developing strategies to assess or increase the capacity of non-medical school programs.
- Developing procedures for tracking and resolving families’ requests for assistance with non-medical services and the providers of such services.
Developing and coordinating advisory or work groups of professionals to provide consultation and advice regarding the delivery of non-medical services to the school populations.

Developing non-medical referral sources.

Analyzing non-medical data related to a specific program, population, or geographic area.

Working with other agencies providing non-medical services to improve the coordination and delivery of services and to improve collaboration around the early identification of non-medical problems.

Defining the scope of each agency’s non-medical service in relation to the other.

Evaluating the need for non-medical services in relation to specific populations or geographic areas.

Monitoring the non-medical delivery system in schools.

Coordinating with interagency committees to identify, promote and develop non-medical services in the school system.

4.1.G. CODE 7 - REFERRAL, COORDINATION, AND MONITORING OF MEDICAL SERVICES

U – Direct Medical Services

A – Administrative Outreach

This code is issued for developing appropriate referral sources for program-specific services for the school district, coordinating programs and services at the school or district level, and monitoring the delivery of Medicaid services within the school system.

This code is not to be used for providing IEP/IFSP targeted case management referral, coordination and monitoring of Medicaid eligible services. IEP/IFSP targeted case management is reported under code 13(C).

It includes related paperwork, clerical activities or staff travel necessary to perform the following activities:

- Making referrals for, and coordinating access to, medical services.
- Identifying and referring adolescents who may be in need of Medicaid family planning services.
- Making referrals for and/or scheduling appropriate Medicaid-covered immunizations, vision, and hearing testing, but not to include the child health screenings (vision, hearing and scoliosis) and immunizations that are required for all students.
- Providing information about Medicaid EPSDT screening (e.g., dental, vision) in the schools that will help identify medical conditions that can be corrected or improved by services through Medicaid.
- Contacting Medicaid providers of pediatric services in lower income areas to determine the scope of EPSDT screening and treatment services available to meet the needs of the at-risk child.
- Reviewing clinical notes of staff by a designated clinician to identify medical referral and follow-up practices, and making recommendations to supervisors for improvements as needed.
- Conducting quality assurance reviews of specific health-related programs objectives.
- Providing both oral and written instructions about the referral policies and procedures between the various agencies to parents for appropriate coordination of health services in the educational setting and for follow-up at home.

4.1.H. CODE 9 - REFERRAL, COORDINATION, AND MONITORING OF NON-MEDICAL SERVICES

U – Direct Medical Services

U – Administrative Outreach

This code is used for making referrals for, coordinating, and/or monitoring the delivery of non-medical, such as educational, services.

It includes related paperwork, clerical activities or staff travel necessary to perform the following activities:

- Making referrals for, and coordinating access to, social and educational services, such as childcare, employment, job training, and housing.
- Making referrals for, coordinating, and/or monitoring the delivery of immunizations and child health screenings (vision, hearing, and scoliosis) that are required for all students.
- Making referrals for, coordinating, and monitoring the delivery of educational, scholastic, vocational, and other non-health-related examinations/assessments.
- Gathering any information that may be required in advance of these non-Medicaid-related referrals.
- Participating in a meeting/discussion to coordinate or review a student’s need for instructional, scholastic, vocational, and non-health-related services not covered by Medicaid.
- Monitoring and evaluating the non-medical components of the individualized plan, such as parent-teacher conferences regarding a student’s educational progress, or compiling attendance reports.
- Linking or referring a family to a non-medical service delivery system.
- Evaluating curriculum and instructional services, policies and procedures.
- Developing procedures for tracking families’ requests for assistance with non-medical services and the providers of those services, such as tutors or remedial education courses.
- Health networking beyond the scope of Medicaid that is necessary to coordinate or monitor health fairs or screenings that focus on non-Medicaid social, vocational or educational programs and activities, i.e., scholarships, remedial classes, Child Find, DARE, anti-smoking campaigns, etc.

4.1.1. **Code 10 - Medicaid-Specific Training on Outreach, Eligibility and Services**

**U – Direct Medical Services**

**A – Administrative Outreach**

This code is used for coordinating, conducting, or participating in training events and seminars for outreach staff regarding the benefits of the Medicaid program, how to assist families to access Medicaid services, and how to more effectively refer students for services. Training for Child Find activities is NOT recorded here, but under Code 12.

It includes related paperwork, clerical activities or staff travel required to perform the following activities:

- Participating in or coordinating training that improves the delivery of Medicaid services.
- Participating in or coordinating training which enhances early identification, intervention, screening and referral of students with special health needs to EPSDT services.
- Coordinating training to assist families to access Medicaid services.
- Participating in or presenting training that improves the quality of identification, referral, treatment and care of children, e.g., talking to new staff about the EPSDT referral process or available EPSDT and health-related services.
- Conducting Medicaid outreach training of non-medical professional staff for the purpose of targeting and identifying children with special or severe health or mental health needs for appropriate referral to EPSDT screening services.
- Disseminating information on training sessions and conducting all related administrative tasks.
- Conducting seminars and presentations to teachers, parents, and community members on:
  - appropriately identifying students concerning indications of mental health behavioral conditions (i.e., bi-polar disorders, drug/substance abuse, autism, attention deficit, mood disorders, pervasive disability disorder, suicidal tendencies, and clinical depression);
  - identifying physical disabilities and other medical conditions that can be corrected or ameliorated by services covered through Medicaid; and
  - providing information on where and how to seek assistance through the Medicaid system.
4.1.J. Code 12 - Non-Medicaid Training

U – Direct Medical Services

U – Administrative Outreach

This code is used for coordinating, conducting, or participating in training events and seminars for outreach staff regarding the benefits of the programs other than the Medicaid program. Programs may include educational programs such as how to assist families to access the services of the relevant programs, and how to more effectively refer students for those services.

It includes related paperwork, clerical activities, or staff travel required to perform these activities:

- Participating in or coordinating training that improves the delivery of services for programs other than Medicaid.
- Participating in or coordinating training that enhances IDEA Child Find Programs.
- Participating in or coordinating training that improves relationships between and among local agencies.
- Participating in training to improve computer skills to collect data.
- Training regarding educational issues.
- Training regarding other non-medical social service issues.
- Participating in or coordinating training that improves the medical knowledge and skills of skilled professional medical personnel.
- Training on general health awareness and prevention programs, such as DARE, sex education, the Michigan Model, vocational or scholarship programs, MEAP tests, etc.

4.1.K. Code 13 - IEP/IFSP Direct Medical Services

A – Direct Medical Services

U – Administrative Outreach

This code is used for providing medically necessary direct medical services which are part of an IEP/IFSP treatment plan. These services are provided to an individual in order to correct or ameliorate a specific condition. Medical evaluations or assessments that are conducted to determine a child’s health-related needs for purposes of the special education eligibility and for the development of the IEP/IFSP are covered under this code.

Direct Medical Services includes related paperwork, clerical activities, or staff travel required to perform the following activities:

- Occupational therapy services
- Physical therapy services
Speech, language and hearing services  
Orientation and mobility services  
Psychological, counseling and social work services  
Developmental testing and assessments  
Nursing services  
Physician and psychiatrist services  
Assistive technology device services  
Providing health/mental health services contained in an IEP/IFSP  
Medical/health assessment and evaluation as part of the development of an IEP/IFSP  
Conducting medical/health assessments/evaluations and diagnostic testing, and preparing reports  
Providing or participating in face-to-face interventions with either an individual student or a group (2-8 students)  
Administering/monitoring medication included as part of an IEP/IFSP and documented in the IEP/IFSP

4.1.L. CODE 13(A) - IEP/IFSP PERSONAL CARE SERVICES

A – Direct Medical Services

U – Administrative Outreach

This code is used for providing a range of human assistance services to persons with disabilities and chronic conditions which enable them to accomplish tasks that they would normally do for themselves if they did not have a disability or chronic condition. Assistance may be in the form of hands-on assistance or cueing so that the person performs the task by him/herself. The need for services must be documented in the child’s IEP/IFSP. Services are not covered when provided by a family member or if they are educational in nature.

Personal care services include related paperwork, clerical activities, or staff travel required to perform the following activities:

- Eating/feeding
- Respiratory assistance
- Toileting
- Grooming
- Dressing
- Transferring
- Ambulation
- Intervention for seizure disorder
- Personal hygiene
- Mobility/Positioning
- Meal preparation
- Skin care
- Muscle strengthening
- Bathing
- Maintaining continence
- Medical equipment maintenance
- Assistance with self-administered medications
- Redirection and intervention for behavior
- Health related functions through hands-on assistance, supervision and cueing

4.1.M. CODE 13(B) - IEP/IFSP TARGETED CASE MANAGEMENT SERVICES

A – Direct Medical Services

U – Administrative Outreach

This code is used for providing services which are a part of the IEP/IFSP treatment plan. These services identify and address special health problems and needs that affect the student’s ability to learn, and assist the student to gain and coordinate access to a broad range of medically-necessary services covered under the Medicaid program.

Targeted Case Management Services include related paperwork, clerical activities, or staff travel required to perform the following activities:

- Assure that standard re-examination/follow-up of the student is periodically conducted to ensure the student receives needed diagnosis and treatment
- Assist families in identifying/choosing appropriate care providers and services
- Maintain case records and indicate all contact for student in the same manner as other covered services
- Coordinate performance evaluations/assessments and other service needs for the student
- Prevention of duplicate services
- Facilitation/participation in development, review and evaluation of the multi-disciplinary assessment
- Supporting activities that link or coordinate needed health services for the student
- Meeting with teachers and other professional staff to discuss testing, planning, treatment, coordinating effective interventions, and student progress
• Coordinating school based services and treatment with parents and student
• Monitoring and recommending a plan of action
• Providing modifications to the multi-disciplinary, patient-centered treatment plan
• Coordinating with staff/health professionals to establish continuum of health and behavioral services in the school setting
• Provide summary of provider, parent and student consultation

4.1.N. CODE 13(C) - OTHER AND NON IEP/IFSP DIRECT MEDICAL SERVICES

U – Direct Medical Services

U – Administrative Outreach

This code is used when providing direct medical services that are not documented in an IEP/IFSP or for services that are not allowable for Medicaid federal matching purposes.

• Administering first aid
• Performing routine or mandated child health screens including, but not limited to, vision, hearing, dental, scoliosis, and EPSDT screens
• Administering immunizations
• Discussing health care needs and the importance of well-baby care with adolescents
• Routine medication administration (such as over-the-counter medications or maintenance medications)

4.1.O. CODE 14 - TRANSPORTATION AND TRANSLATION SERVICES IN SUPPORT OF MEDICAID-COVERED SERVICES

U – Direct Medical Services

A – Administrative Outreach

This code is used for assisting an individual to obtain transportation to Medicaid-covered services. This does not include the provision of the actual transportation service, but rather the administrative activities involved providing transportation. This code also does not include activities that contribute to the actual billing of transportation as a medical service, nor does it include accompanying the Medicaid-eligible individual to Medicaid services as an administrative activity.

This code is used for school employees who provide translation services related to Medicaid-covered services as an activity. Translation may be allowable as an administrative activity if it is not included and paid for as part of a medical assistance service.
It includes related paperwork, clerical activities or staff travel required to perform the following activities:

- Scheduling or arranging transportation to Medicaid-covered services.
- Assisting or arranging for transportation for the family in support of the referral and evaluation activities.
- Arranging for or providing translation services that assist the individual to access transportation and medical services.
- Arranging for or providing translation services that assist the individual to "communicate" with service providers about medical services being provided.
- Arranging for or providing translation services that assist the individual to understand necessary care or treatment.
- Assisting the student to define/explain their symptoms to the physician.
- Arranging for or providing signing services that assist family members to understand how to provide necessary medical support and care to the student.

4.1.P. CODE 15 - TRANSPORTATION AND TRANSLATION SERVICES IN SUPPORT OF NON-MEDICAID COVERED SERVICES

U – Direct Medical Services

This code is used for assisting an individual to obtain transportation to services not covered by Medicaid, or accompanying the individual to services not covered by Medicaid.

This code is used for school employees who provide translation services related to social, vocational, or educational programs and activities as an activity separate from the activities referenced in other codes.

It includes related paperwork, clerical activities, or staff travel required to perform the following activities:

- Scheduling or arranging transportation for social, vocational, and/or educational programs and activities.
- Scheduling or arranging transportation to and from school when no Medicaid service has been provided.
- Arranging for or providing translation services that assist the individual to access and understand non-medical services, programs, and activities.
- Arranging for or providing signing services that assist the individual’s or family’s access to and understanding of non-medical programs and activities.
4.1.Q. CODE 16 - GENERAL ADMINISTRATION

R – Direct Medical Services

R – Administrative Outreach

This code is used for time study participants performing activities that are not directly assignable to program activities.

It includes related paperwork, clerical activities, or staff travel required to perform these activities. Typical examples (not all inclusive) of general administrative activities may include:

- Establishing goals and objectives of health-related programs as part of the school’s annual or multi-year plan
- Reviewing school or district procedures and rules
- Attending or facilitating school or unit staff meetings, training, or board meetings
- Performing administrative or clerical activities related to general building or district functions or operations
- Providing general supervision of staff, including supervision of student teachers or classroom volunteers, and evaluation of employee performance
- Reviewing technical literature and research articles
- Taking lunch, breaks, or time not at work when staff are paid for these activities
- Paid leave day
- Paid leave of absence
- Processing payroll/personnel-related documents
- Maintaining inventories and ordering supplies
- Developing budgets and maintaining records
- Training (not related to curriculum or instruction), such as how to use the district’s new computer system
- Other general administrative activities of a similar nature, as listed above, which cannot be specifically identified under other activity codes

4.1.R. CODE 17 - SCHOOL-RELATED AND EDUCATIONAL ACTIVITIES

U – Direct Medical Services

U – Administrative Outreach

This code is used for any other school-related activities that are not health-related, such as social services, educational services and teaching services, and employment and job training. These activities include the development, coordination, and monitoring of a student’s education plan.
It includes related paperwork, clerical activities, or staff travel required to perform these activities. Examples of activities may include:

- Providing classroom instruction (including lesson planning)
- Testing and correcting papers
- Compiling attendance reports
- Performing activities that are specific to instructional, curriculum, and student-focused areas
- Reviewing the education records for students who are new to the school district
- Providing general supervision of students (e.g., playground, lunchroom)
- Monitoring student academic achievement
- Providing individualized instruction (e.g., math concepts) to a special education student
- Conducting external communications related to school educational issues/matters
- Compiling report cards
- Applying discipline activities
- Activities related to the immunization requirements for school attendance
- Compiling, preparing, and reviewing reports on textbooks or attendance
- Enrolling new students or obtaining registration information
- Conferring with students or parents about discipline, academic matters, or other school-related issues
- Evaluating curriculum and instructional services, policies, and procedures
- Participating in or presenting training related to curriculum or instruction (e.g., language arts workshop, computer instruction)
- Translating an academic test for a student
- Transportation, if covered as a medical service under Medicaid

4.1.S. CODE 17(D) – NON-RETURNED MOMENTS

U – Direct Medical Services

U – Administrative Outreach

This code is used for moments that are not returned by the published deadline. As long as the compliance rate remains above 85%, these moments will not be used as a negative factor in the RMTS calculation.
4.1.T. Code 18 - Not Scheduled to Work and Not Paid

U – Direct Medical Services

U – Administrative Outreach

This code is used for time study participants who are not scheduled to work and not paid on the randomly selected moment pre-printed on the time study form.

Examples of this may include:

- Participant is a part-time employee who is not scheduled to work at the selected sample time
- The selected sample time falls before or after the participant’s scheduled work day
- School is closed due to an unpaid holiday or an unpaid school district day off (i.e., winter break, spring break, or a built-in "bad weather day")
- Unpaid leave of absence
SECTION 5 — CONFIDENTIALITY

Aggregate time study data may occasionally be useful for other administrative tasks (i.e., planning) and may be used in that way. However, any individually identifiable information must be protected as required by all applicable state and federal statutes and regulations to ensure confidentiality and protection of privacy.
SECTION 6 – TIME STUDY TRAINING

6.1 TRAINING

The approved training methods, materials, information, and instructions are tailored to each group involved in the time studies.

The Contractor, along with MDHHS, is responsible for developing training programs and materials and, along with the ISD coordinator, providing follow-up assistance as needed. For training, there are some services the Contractor will provide statewide and other services that will be provided to the individual ISDs.

6.1.A. LOCAL ISD COORDINATOR TRAINING

All ISDs have an ISD Coordinator/representative who receives training that ensures a thorough understanding of their coordinator responsibilities, the approved time study and cost reporting activities. These individuals must understand their role as the liaison between the Medicaid Program, the Contractor, and other staff. They must understand and be able to convey to others the basic purpose of the program, assist the Contractor with follow-up as needed, and serve as a facilitator for the Contractor to "navigate" the district as necessary.

6.1.B. TIME STUDY PARTICIPANT TRAINING

For time study participants, it is essential that these individuals understand the purpose of the time studies, that time is of the essence related to completion of the form, and that their role is crucial to the success of the time study. The Contractor develops and provides detailed written information and instructions for completing the time study forms as a coversheet attached to each time study form. The coversheet provides a "tutorial" with the aforementioned basics of the program as well as information about the Medicaid covered services provided in the school setting.
SECTION 7 – SUMMARY OF TIME STUDY STEPS

The Contractor duties are to:

- Import eligible school district staff information to create the RMTS staff pools.
- Randomly select staff/moments to be sampled.
- Generate printed or electronic RMTS forms for each moment.
- Generate and distribute a master list of selected moments to the ISD Coordinators as a local control list.
- Generate mailing labels addressed to randomly selected staff.
- Code the time study responses.
- Calculate activity percentages for each of the activity codes.
- Scan completed and coded time study forms.
- Transfer raw data from scanned forms to the claims development software to calculate activity percentages for each of the activity codes.
- Produce quarterly reports summarizing the results of the random moment time studies (RMTS) and RMTS compliance reporting. (Both reports are forwarded to the MDHHS Program Policy Division for posting on the MDHHS website. Refer to the Directory Appendix for website information.)
- Produce periodic and special RMTS reports that provide data and information sorted by LEA and ISD that are provided to the CMS, MDHHS, MDE, ISDs and their auditors.
- Create and verify the eligible staff pools for time studies from the quarterly information provided by the ISDs.
- Distribute time study forms and collect completed time study forms.
- Code the activity forms received from the ISDs.
- Initiate and complete the ISD claim workbooks by obtaining the financial data from each LEA and compiling data to complete the workbook.
SECTION 8 – SUMMER QUARTER TIME STUDY METHODOLOGY

8.1 AOP QUARTERLY CLAIM (OTHER THAN SUMMER QUARTER)

The claim consists of the results of the quarterly RMTS of the approved staff pool for the quarter and the correlating allowable costs applied to the reimbursement methodology.

8.2 AOP SUMMER QUARTER FORMULA AND RANDOM MOMENT TIME STUDY

The summer quarter months are July, August and September. There is a break period between the end of one regular school year and the beginning of the next regular school year during which only a few staff are working. The majority of school staff work during the school year and do not work for part of the summer quarter (9-month staff). However, there are some 9-month staff that opt to receive their pay over a 12-month period. Therefore, different factors must be applied to the summer formula in order to accurately reflect the activities that are performed by the staff.

The summer quarter is divided into two parts producing two partial claims. For the AOP process, the sum of both claims is submitted to Medicaid for reimbursement for the summer quarter. The first part of the quarter is from July 1 to the date students return to school. The second part of the quarter is from the date students return to school through September 30.

The summer time study of 800 moments is performed after students return to school and is only applied to the staff pool costs for the second part of the summer quarter (Fall staff pool costs). The RMTS is performed during a shorter time period to accurately reflect the work efforts being performed when all staff have returned to work.

The sums of Part I and Part II are utilized to calculate the claim submitted to Medicaid for reimbursement.

8.2.A. PART I - JULY 1 TO THE INDIVIDUAL ISD DATE THAT STUDENTS RETURN TO SCHOOL

Part I of the summer quarter is comprised of the following elements:

- Staff Pool – those eligible staff in the April through June staff pool
- Costs – April through June allowable staff pool costs
- A weighted average of the October-December, January-March, April-June, and the summer time study results.

8.2.B. PART II – DATE STUDENTS RETURN TO SCHOOL THROUGH SEPTEMBER 30

Part II of the summer quarter is comprised of the following elements:

- Staff Pool – the eligible new Fall staff returning to work
- Costs – the allowable cost associated with the new Fall staff pool
- RMTS – the time study for Part II is performed for a shortened period of time from the day students return to school through September 30. The start date will vary by ISD depending on the date the students return to school.
8.3 DIRECT MEDICAL SUMMER QUARTER FORMULA AND RANDOM MOMENT TIME STUDY

A weighted average of the four time study results for the staff pool periods listed below is applied to the Medicaid Allowable Expenditure Report (MAER) total costs. The MAER costs include the annual costs associated with the direct medical services, personal care services and targeted case management services.

The direct medical services time study application is comprised of the following elements:

- Staff Pools – Those individuals eligible to participate in the following four staff pool periods:
  - October through December
  - January through March
  - April through June
  - Date students return to school through September 30 (summer time study)

- Cost Pool – The costs from the annual Medicaid Allowable Expenditure Report (direct medical services, targeted case management and personal care services).

- RMTS – A weighted average of the October–December, January–March, April–June and the summer time study results as described above.

8.4 FINANCIAL REPORTING COMPLIANCE REQUIREMENTS

The financial data reported (salaries, benefits, supplies, purchased services, and other expenditures) must be based on actual detailed expenditures from LEA payroll and financial systems. Payroll and financial system data must be applied using generally accepted governmental accounting standards and principles or applicable administrative rules. The expenditures accumulated must correlate to the claiming period.
SECTION 9 – AUDIT AND QUALITY ASSURANCE

9.1 Audit

9.1 A. Activities to be Performed by MDHHS Office of Audit Staff

MDHHS audit staff review of selected ISD cost reports includes the following activities:

- Verification that the salaries listed for employees/positions included in the Random Moment Time Study (RMTS) staff pool match the payroll records for the same period as the time study.
- A review of the salaries of employees who changed positions during the time study period.
- If a replacement was hired/transferred, the auditor will verify that only the salary earned while working in a position on the staff pool list was reported, and that salaries for both the original and replacement employees were not duplicated on the report for the same time period.
- Verification that any other salaries and costs for supplies, etc., are of direct benefit to the employees on the relevant staff pool list and, therefore, allocable to that staff pool cost. For the Direct Medical program, all supplies and materials must be medically related.
- Confirmation that none of the direct costs reported were also claimed as an indirect cost, that the proper indirect cost rate was used, and the rate was applied only to costs in the base. The employees in non-standard job categories are the most likely to be considered indirect type employees; therefore, documentation will be reviewed for these individuals.
- Verification that no federal funds were claimed on the cost reports and that costs were not accepted for cost sharing.
- A standard review of other areas, such as confirmation that reported costs were actually paid, support documentation was maintained as required, and costs were properly charged to the correct accounts.
- Verification of recipient eligibility, documentation of services in the IEP/IFSP, and provider credentials.

The ISD must be prepared to direct the auditor to any document used to support and identify the reported RMTS costs.

9.1.B. SSAE 16 Audit Requirements

The Contractor is required to have a Type II Statement on Standards for Attestation Engagements (SSAE) 16 audit to provide the necessary assurances that the claiming process (e.g., methodology, time studies, cost allocations, etc.) have been properly applied.

In a SSAE 16 Type II engagement, the service auditor expresses an opinion on whether the description of the service organization's system is fairly presented, whether the controls included in the description are suitably designed, whether the controls were
operating effectively, and provides a description of the service auditor’s tests of operating effectiveness and the results of those tests.

The Contractor must undergo a SSAE 16 audit annually. The SSAE 16 audit must be submitted within 90 days after the end of the examination period.

Three (3) copies of the audit should be forwarded to the MDHHS Program Policy Section. (Refer to the Directory Appendix for contact information.)

9.2 QUALITY ASSURANCE, OVERSIGHT AND MONITORING

Quality assurance, oversight and monitoring activities include:

9.2.A. MDHHS PROGRAM POLICY – OVERSIGHT OF ADMINISTRATION AND OPERATIONS

MDHHS policy staff responsibilities are:

- Review quarterly time study results against historical benchmarks according to:
  - Overall results and matchable percentages
  - Benchmarks by activity code and by staff category
- Detailed investigation of anomalies in results.
- Determination of policy or procedure changes based on results of anomaly review.
- Overall statistical requirements in terms of confidence and precision levels on a quarterly basis and an annual basis.
- Sampling to review coding activities performed by the Contractor.
- Disseminate CMS guidance.
- Monitor ISDs processing of claims for compliance with State and Federal regulations and program guidelines.
- Assure that billing entities have the processes in place to correct any claims paid in error.
- Provide information and training to billing entities as needed for program compliance.
- Provide operational oversight and technical assistance.
- Assist the ISDs with quality assurance and compliance monitoring.
- Provide oversight of the ISDs quality assurance and compliance plans to insure that they provide oversight and monitoring of such things as documentation, provider credentials, record retention, parental consent, and confidentiality.
9.2.B. MDHHS OFFICE OF INSPECTOR GENERAL – POST PAYMENT REVIEW AND COMPLIANCE

MDHHS Office of Inspector General staff responsibilities are:

- Post payment review for the purpose of adherence to provider policy, provider credentials and appropriate billing practices.
- Post payment review for the purpose of reported fraud or abuse.

For more detailed information regarding the Fraud and Abuse and Post Payment Review, refer to the Post Payment Review and Fraud/Abuse Section of the General Information for Providers Chapter.

9.2.C. MDHHS RATE REVIEW SECTION – COST SETTLEMENT REVIEW

MDHHS Rate Review Section staff responsibilities are:

- Import and create a database of the cost report data submitted by the ISDs.
- Perform reviews of the data for accuracy and completeness.
- Summarize the data and forward to the ISDs for final approval.
- Compile cost settlement summaries and prepare over/under adjustments.

9.2.D. CONTRACTOR OVERSIGHT AND QUALITY ASSURANCE

There are several levels of quality assurance and validation built into the RMTS process.

- In terms of coding, the Contractor has a coding process in place in which centralized coders code all moments, and then a second coder reviews all moments coded as matchable for verification of accurate and consistent application of activity codes. The second coder also reviews a random sample of 10% of all non-matchable moments for quality assurance purposes.
- Quality assurance and validation includes the quarterly review which includes the Contractor meeting with MDHHS staff specifically to review time study results and other procedural issues. Each quarter, the team reviews detailed reports which outline the current quarter time study results benchmarked against past quarter results. The results are reviewed by activity code as well as by matchable/non-matchable categories. Comparisons are made of the variances in the overall quarterly results from the same quarter in the previous year, as well as variances of the current quarter against the average of the past four quarters. Results are reviewed and discussed in terms of results by staff category. Any anomalies identified are pursued through a detailed investigation of the moments which produced the anomaly. The Contractor, in conjunction with MDHHS, then determines how to handle any issues in terms of additional communication or training for RMTS participants, policy or procedural changes, etc.
- ISDs utilizing the web-based input process may view compliance reporting online.
- ISDs utilizing the paper methodology are sent compliance reporting on a weekly basis.
9.2.E. ISD OVERSIGHT

ISD responsibilities are to:

- have systems in place to monitor service delivery, claim documentation, claim billing, and payments received.
- verify that the credentials of all clinicians are current and appropriate for Medicaid billing and that services rendered are within the scope of the clinician's practice.

SECTION 1 – GENERAL INFORMATION

This chapter applies to all providers.

The Michigan Department of Health and Human Services (MDHHS) administers the Medicaid Program, Children’s Special Health Care Services (CSHCS), Maternity Outpatient Medical Services (MOMS) and other special programs described elsewhere in this manual. In addition to these traditional programs, MDHHS administers many other programs/coverages to meet the healthcare needs of Michigan's medically indigent population. Programs vary in scope and eligibility requirements and are funded through various sources, including federal, state, and/or private. Some of the programs offer comprehensive or reduced Medicaid benefits as indicated. Additional information regarding these programs may be available on the MDHHS website.

Contact information for the various programs is listed in the Directory Appendix.
SECTION 2 – PROGRAMS THAT TARGET SPECIFIC MEDICAL CONDITIONS

2.1 BREAST AND CERVICAL CANCER CONTROL PROGRAM

2.1.A. ELIGIBLE BENEFICIARIES

The Breast and Cervical Cancer Control Program (BCCCP) covers uninsured low-income women of all ages especially, but not limited to, women aged 40-64. Certain income restrictions do apply. Enrollees in the Breast and Cervical Cancer Control Program (BCCCP) are exempt from co-pays.

- Insured women may apply if certain insurance, age, and income requirements are met.
- Women who are enrolled in a managed care program, health maintenance organization (HMO) or have Medicare Part B are not eligible.

2.1.B. COVERED SERVICES

Covered services include:

- Clinical breast exams
- Pap smears
- Pelvic exams
- Screening mammogram, and
- Appropriate referral to community providers for follow-up of abnormalities.

Breast biopsy, colposcopy-directed services, colposcopy service, diagnostic mammograms, and loop electrosurgical excision procedure (LEEP) may be provided based upon medical needs, financial and insurance status, and availability of federal grant funds or Michigan tobacco tax dollars.

2.2 TRAUMATIC BRAIN INJURY REHABILITATION PROGRAM

2.2.A. ELIGIBLE BENEFICIARIES

The Traumatic Brain Injury (TBI) Rehabilitation Program covers adults age 18 or older who are U.S. citizens and have incurred a traumatic brain injury in the past 15 months, or have experienced a significant change within the last three months but are medically stable. Individuals must be a RANCHO 5-6 and currently Medicaid eligible. There must be a documented need for comprehensive, specialized rehabilitative services.

Individuals must be bowel and bladder trained and able to actively participate in 21 hours of therapy a week. Services must be provided under a physician approved plan of care and rendered in a residential or outpatient program that is accredited by the Commission on Accreditation of Rehabilitation Facilities (CARF) and has an agreement with a Medicaid approved nursing facility.
2.2.B. COVERED SERVICES

In addition to regular Medicaid coverage, the TBI Rehabilitation Program provides:

- Hearing & speech/language services
- Occupational therapy
- Physical therapy
- Physician services
- Psychological services
- Social work.

Vocational and educational services are not reimbursable by Medicaid.
SECTION 3 — GENERAL COVERAGE PROGRAMS

3.1 MEDICARE SAVINGS PROGRAM

3.1.A. ELIGIBLE BENEFICIARIES

Low income Medicare beneficiaries and those individuals who are eligible for Medicare but do not enroll due to the cost may participate in the Medicare Savings Program (MSP). Financial and nonfinancial requirements and restrictions do apply.

3.1.B. COVERED SERVICES

The MSP pays Medicare coinsurance, deductible, and premiums.

3.2 SPECIAL N SUPPORT

3.2.A. ELIGIBLE BENEFICIARIES

Families that received the low-income families (LIF) Medicaid but are no longer eligible due to an increase in child support may qualify for Special N Support. Most of the health coverage is provided by Medicaid Health Plans (MHPs), and the majority of the beneficiaries are already enrolled in a MHP.

3.2.B. COVERED SERVICES

Special N Support beneficiaries receive regular Medicaid coverage for four months.

3.3 FREEDOM TO WORK

3.3.A. ELIGIBLE BENEFICIARIES

Medicaid-eligible disabled adults aged 16 through 64 years old with earned income may be eligible. A beneficiary must move into this Medicaid category from another Medicaid category. SSI beneficiaries whose SSI eligibility may end due to financial factors are among those eligible to be considered for this program.

To be eligible, the beneficiary must be employed on a regular and continuing basis. There may be temporary breaks in employment up to 24 months if they are the result of involuntary layoff or are determined to be medically necessary.

For a married beneficiary, the spouse’s income and assets are not considered when determining eligibility for this Medicaid category. The beneficiary’s total countable unearned income cannot exceed 100 percent of the Federal Poverty Level (FPL). The beneficiary’s countable assets are limited to $75,000. In addition, the beneficiary is allowed to have IRS-recognized retirement accounts (including IRAs and 401Ks) of unlimited value.
3.3.B. COVERED SERVICES

Freedom To Work beneficiaries receive regular Medicaid coverage.

3.3.C. PREMIUMS

If the beneficiary’s earned income is below 250 percent of the FPL, there is no premium required for coverage. If the beneficiary’s earned income is between 250 percent of the FPL and $75,000 per year, the premium is based on the sliding fee scale. If the total countable earned income exceeds $75,000 per year, the beneficiary must pay a premium equal to 100 percent of the cost of Medicaid coverage.

3.4 MEDICAID FOR SUPPLEMENTAL SECURITY INCOME BENEFICIARIES

3.4.A. ELIGIBLE BENEFICIARIES

Supplemental Security Income (SSI) covers disabled children whose families have low income, and low-income adults who are aged, disabled or blind. The Social Security Administration determines eligibility and awards monthly SSI payments based on income and assets requirements. Beneficiaries awarded SSI are automatically eligible for regular Medicaid coverage.

3.4.B. COVERED SERVICES

SSI beneficiaries are eligible for regular Medicaid. In some cases, Medicare premiums are paid by Medicaid based upon certain individual situations and previous work histories.

3.5 TRANSITIONAL MEDICAL ASSISTANCE

3.5.A. ELIGIBLE BENEFICIARIES

Transitional Medical Assistance (TMA) covers families who are U.S. citizens that are no longer eligible for the low-income family (LIF) Medicaid because the parent(s) has too much income from employment. The family must have received low-income family Medicaid for at least three months of the previous six months to be eligible for TMA. Most of the health coverage is provided by HMOs contracted by MDHHS. The majority of the beneficiaries are already enrolled in a MHP. A renewal of the application to TMA is not necessary.

3.5.B. COVERED SERVICES

TMA provides regular Medicaid coverage, or a comprehensive health care package that includes vision, dental and mental health services, if the beneficiary has been enrolled in a MHP for 12 months.
SECTION 4 – COMMUNITY-BASED LONG TERM CARE

4.1 MI CHOICE WAIVER (HOME AND COMMUNITY-BASED WAIVER FOR THE ELDERLY AND DISABLED)

The MI Choice Waiver provides services to aged and physically disabled individuals 18 years old and over who are eligible for full Medicaid and want to stay in their homes or another residential setting but, without the provision of waiver services, would require the level of care only available in a nursing facility. Income and assets requirements and restrictions apply. Applicants must also meet the Michigan Medicaid Nursing Facility Level of Care Determination criteria. Individuals must be currently Medicaid approved or be Medicaid eligible if they were to enter a nursing facility. MDHHS contracts with local agencies to administer this program. (Refer to the MI Choice Waiver Chapter for additional information.)

4.2 PROGRAM OF ALL-INCLUSIVE CARE FOR THE ELDERLY (PACE)

PACE is a comprehensive service delivery system for frail, elderly individuals who meet the Michigan Medicaid Nursing Facility Level of Care criteria. Refer to the PACE Chapter of this manual for additional information.
SECTION 5 — MICHILD

5.1 ELIGIBLE BENEFICIARIES

Effective January 1, 2016, the Michigan Department of Health and Human Services (MDHHS) converted the MIChild program to a Medicaid expansion program. Although individuals are enrolled in a Medicaid expansion program, the program will continue to be referred to as the MIChild program. All Medicaid coverages and conditions will apply in accordance with current Medicaid policy.

The MIChild Medicaid program provides health care coverage for children who:

- Are age 0 through 18
- Have income at or below 212% of the Federal Poverty Level under the Modified Adjusted Gross Income (MAGI) methodology
- Do not have other comprehensive medical insurance (this includes insurance that covers inpatient and outpatient hospital services, laboratory, x-ray, pharmacy and physician services)
- Do not qualify for other MAGI related Medicaid programs
- Are residents of the State of Michigan

The child's eligibility for MIChild is determined through the MAGI methodology. All criteria for MAGI eligibility must be met to be eligible for MIChild.

Families enrolled in the MIChild program are required to pay a premium of $10 per month per family to maintain coverage for their children. Children enrolled in MIChild are exempt from copay for services.

5.2 COVERED SERVICES

Children enrolled in MIChild are considered Medicaid beneficiaries and are entitled to all Medicaid covered services.
SECTION 6 — CHILD AND ADOLESCENT HEALTH CENTERS AND PROGRAMS

Under an agreement with MDHHS, Child and Adolescent Health Centers and Programs (CAHCPs) provide medical services and outreach on behalf of the Medicaid Health Plans (MHPs) to school-aged children. (Refer to the Medicaid Health Plan Chapter of this manual for additional information.)
SECTION 7 - FLINT FAMILY SUPPORTS COORDINATION SERVICES

Family Supports Coordination services are part of a comprehensive health benefit available to pregnant women and children who were served by the Flint water system who meet the Medicaid eligibility requirements.

Family Supports Coordination services assist individuals in gaining access to appropriate medical, educational, social, and/or other services. Family Supports Coordination services include assessments, planning, linkage, advocacy, care coordination, referral, monitoring, and follow-up activities.

In addition to Family Supports Coordination services, eligible beneficiaries will receive the full array of Medicaid-covered benefits. This includes the provision of Early and Periodic Screening, Diagnosis and Treatment (EPSDT) services for children up to age 21, Non-Emergency Medical Transportation (NEMT), and Maternal Infant Health Program (MIHP) services.

7.1 ELIGIBILITY

Providers may verify beneficiary eligibility for Family Supports Coordination services through a Community Health Automated Medicaid Processing System (CHAMPS) online eligibility inquiry or via a Health Insurance Portability and Accountability Act (HIPAA) 270 transaction. The CHAMPS or 271 eligibility response for beneficiaries eligible for Family Supports Coordination services will show:

- a current MAGI category beginning with “F”; and
- a current benefit plan of “TCMF” in addition to their assigned Medicaid or Children's Health Insurance Program (CHIP)-related benefit plans.

7.2 CORE ELEMENTS OF FAMILY SUPPORTS COORDINATION

The purpose of Family Supports Coordination services is to provide a comprehensive array of services that are appropriate to the conditions of the individual. At a minimum, Family Supports Coordination services must include:

- a face-to-face comprehensive assessment, history, re-assessments, and identification of a course of action to determine the specific needs of the beneficiary and to develop an individual Plan of Care;
- planning, linking, coordinating, follow-up, and monitoring to assist the beneficiary in gaining access to services;
- coordination with the beneficiary's primary care provider (PCP), other providers, and Medicaid Health Plan (MHP), as applicable; and
- any other service approved by MDHHS.

7.2.A. INITIAL/ ANNUAL COMPREHENSIVE ASSESSMENT VISIT

All comprehensive assessment visits, including the initial face-to-face comprehensive assessment visit, must be conducted by a qualified licensed nurse or social worker with the beneficiary in the beneficiary’s home or primary place of residence. The purpose of the comprehensive assessment visit is to gather sufficient information to develop an
individualized Plan of Care for the beneficiary and to ensure that all other eligible individuals in the household are identified for further screening.

It is expected that face-to-face assessments are performed annually; however, the frequency should be based on the needs and circumstances of the beneficiary and/or family. Active participation by the beneficiary and/or parent(s)/legal guardian(s) is necessary. Comprehensive assessment activities include:

- obtaining client history;
- identifying the beneficiary’s needs and completing related documentation; and
- gathering information from other sources, such as family members, medical providers, social workers, and educators (if necessary), to form a complete assessment of the beneficiary.

At a minimum, the comprehensive assessment visit shall assess:

- the growth and development of beneficiaries up to age 21;
- the behavioral profile of beneficiaries up to the age of 21, including the notation of aggressive or hyperactive behavior;
- the beneficiary’s access to a PCP and other health care providers;
- whether the beneficiary’s PCP has conducted a developmental and social-emotional screen(s) utilizing a standardized and validated tool, such as the Ages & Stages Questionnaire: Social-Emotional (ASQ:SE) or the Pediatric Symptom Checklist (PSC) as indicated by the American Academy of Pediatrics (AAP) Periodicity Schedule, and documenting the results of any screenings performed;
- whether the beneficiary’s PCP has assessed the beneficiary for sources of toxic stress and for sources of strength using nationally recognized tools, such as the Adverse Childhood Experiences (ACEs) and Resiliency questionnaires, and documenting the results of any screenings performed;
- the beneficiary’s access to prenatal care, potential for pregnancy complications, pica activities, and intent to breastfeed (pregnant beneficiaries);
- the beneficiary’s educational and nutritional needs, including participation in the Women, Infants and Children (WIC) program and/or the Food Assistance Program (FAP);
- the beneficiary’s environment and typical family practices that may pose a lead risk;
- lead hazards within the family’s dwelling; and
- access to NEMT.

7.2.B. DEVELOPMENT OF THE PLAN OF CARE AND DOCUMENTATION

During or immediately following the face-to-face initial comprehensive assessment visit, a Plan of Care must be developed for beneficiaries who agree to participate in Family Supports Coordination services, with the active participation of the parent(s)/legal guardian(s) when applicable. The development (and periodic revision) of a specific Plan of Care that is based on the information collected through the comprehensive
assessment must specify the goals and actions to address the medical, educational, social, and/or other services needed by the beneficiary. The supports coordinator must ensure the active participation of the beneficiary, and work with the beneficiary (or the beneficiary’s parent[s]/legal guardian[s]) and others to develop those goals, and to identify a course of action to respond to the assessed needs of the beneficiary. The Plan of Care is to be shared with the beneficiary’s MHP and PCP, if applicable. Beneficiaries must consent to share the Plan of Care with the MHP and other providers identified in the Plan of Care. At a minimum, the Plan of Care must:

- identify a course of action to respond to the assessed needs of the beneficiary (e.g., plan for the testing of family members at risk for lead hazard exposure);
- provide education and information regarding lead hazards, including the impact of lead exposure on the developing fetus of pregnant beneficiaries; and
- facilitate blood lead testing and follow-up testing and treatment as recommended by the PCP.

Family Supports Coordination providers are required to document the following information for all beneficiaries receiving Family Supports Coordination services:

- the name of the beneficiary;
- the dates of the supports coordination services;
- the name of the Family Supports Coordination provider and the qualified professional (i.e., licensed nurse or social worker) providing the supports coordination services;
- the nature and content of the supports coordination visits received, and whether goals specified in the Plan of Care have been achieved;
- whether the beneficiary has declined services within the Plan of Care;
- the need for, and occurrences of, coordination with other providers;
- a timeline for obtaining needed services;
- a timeline for re-evaluation of the Plan of Care; and
- the beneficiary’s consent to share information.

### 7.2.C. Referrals and Related Activities

In collaboration with the PCP and the MHP, it is expected that the supports coordinator will facilitate and coordinate referral and related activities to assist the beneficiary in obtaining needed services. Activities such as scheduling appointments or linking the beneficiary with medical, educational, social, and/or other programs and services to address identified needs and achieve goals specified in the Plan of Care are primary components of Family Supports Coordination services. Referral activities include, but are not limited to, the coordination of age-appropriate services such as:

- health care related services, including physical and specialty behavioral health services;
- nutritional services, such as coordinating referrals to the Special Supplemental Nutrition Program, WIC program, or FAP;
• educational services, such as age-appropriate referrals to Early On, Great Start Readiness Programs, Head Start, and school-based services;
• additional social supports (including home visiting programs) to assist the beneficiary in obtaining other assistance, such as financial, housing, and transportation assistance, and lead assessment and abatement resources; and
• blood lead testing and re-testing for family members at risk for lead exposure, and education regarding lead hazards including the impact of lead exposure on young children and the developing fetus.

7.2.D. MONITORING AND FOLLOW-UP ACTIVITIES

Monitoring and follow-up activities include activities and contacts that are necessary to ensure the Plan of Care is implemented and adequately addresses the eligible beneficiary’s needs, and which may be conducted with the beneficiary, family members, service providers, or other entities or individuals. Monitoring and follow-up activities are conducted as frequently as necessary by the supports coordinator.

A maximum of five (5) face-to-face monitoring visits are billable per year for each eligible beneficiary. To be reimbursed, the visit must be face-to-face. Additional monitoring and follow-up activities are likely between face-to-face visits but are not reimbursable. At least one annual face-to-face monitoring visit should be conducted to determine whether the following conditions are met:

• services are being furnished in accordance with the beneficiary’s Plan of Care;
• services in the Plan of Care are adequate; and
• changes in the needs or status of the beneficiary are reflected in the Plan of Care.

Monitoring and follow-up activities include making necessary adjustments in the Plan of Care and service arrangements with providers.

7.3 ACCESSING SERVICES

Accessing Family Supports Coordination services may occur a number of ways. If the beneficiary is an MHP member, the MHP may initiate the initial contact with the beneficiary and identify those beneficiaries that may benefit from Family Supports Coordination services. Fee-for-Service (FFS) and MHP beneficiaries may also access Family Supports Coordination services either through a referral from their PCP or through a self-referral.

7.4 COVERED SUPPORTS AND SERVICES

A maximum of six (6) face-to-face visits per year will be reimbursed for each eligible beneficiary as follows:

• one (1) visit for the initial/annual comprehensive assessment.
• a maximum of five (5) visits for monitoring and follow-up.
For additional visits, MDHHS requires the provider to obtain prior authorization before the service is rendered. (Refer to the Directory Appendix for contact information regarding prior authorizations.)

Reimbursement for assessment and monitoring visits is inclusive of all related care coordination and monitoring activities. MDHHS does not reimburse for missed appointments/visits. A beneficiary may not be billed for a missed appointment/visit.

Medicaid reimbursement for Family Supports Coordination services may not duplicate payments made to public agencies or private entities under other program authorities for the same purpose.

Supports coordination includes contacts with non-eligible beneficiaries when the contact is:

- directly related to identifying the eligible beneficiary’s needs and care for the purpose of assisting the beneficiary in accessing services;
- identifying needs and supports to assist the beneficiary in obtaining services;
- providing supports coordinators with useful feedback; and
- alerting supports coordinators to changes in the beneficiary’s needs.

Family supports coordination does not include activities that constitute the direct delivery of underlying medical, educational, social, and/or other services to which an eligible beneficiary has been referred, including foster care programs and services such as, but not limited to, the following:

- research gathering and completion of documentation required by the foster care program;
- assessing adoption placements;
- recruiting or interviewing potential foster care parents;
- serving legal papers;
- home investigations;
- providing transportation;
- administering foster care subsidies; and
- making placement arrangements.

### 7.5 TRANSFER OF CARE/ RECORDS

During the course of care, the beneficiary may require services from a different supports coordinator due to relocation of the beneficiary’s primary residence or due to a request of the beneficiary to change supports coordinators. When there is a planned change of the supports coordinator, information about the new supports coordinator (e.g., contact information) should be provided to the beneficiary. The referring supports coordinator must consult with the new supports coordinator about the case and transfer all applicable information and records, including all completed assessment visits and the updated Plan of Care, to the new supports coordinator in compliance with the privacy and security requirements of federal and state laws and regulations including, but not limited to, the HIPAA and the Michigan Mental Health Code.
7.6 FAMILY SUPPORTS COORDINATION CLOSURE

Family Supports Coordination services are available to all eligible beneficiaries up to age 21, or for pregnant women up to and through 60 days post-delivery. Family Supports Coordination services will be discontinued:

- if the beneficiary is no longer eligible;
- when the beneficiary parent(s) or guardian(s) refuses the service; or
- if CMS does not extend the Flint, Michigan Section 1115 Demonstration Waiver.

When services are refused, Family Supports Coordination services may be resumed at any point during the defined period of eligibility. A discharge summary, including the services provided, outcomes, current status, and ongoing needs of the beneficiary, must be completed and provided to the PCP when the Family Supports Coordination case is closed.

7.7 PROVIDER QUALIFICATIONS

Genesee Health System, the local community mental health (CMH) serving Genesee County, serves as the Designated Provider Organization (DPO) for Family Supports Coordination services. The DPO:

- has a sufficient number of qualified staff to meet the service needs of the target population and has the administrative capacity to ensure the provision of quality services in accordance with state and federal requirements;
- has experience in the coordination and linkage of community services;
- has the willingness and capabilities to coordinate with the beneficiary’s PCP and MHP as applicable; and
- must seek approval by MDHHS of all subcontractors for the provision of Family Supports Coordination services.

The DPO will provide Family Supports Coordination services primarily through the use of a supports coordinator. The supports coordinator must meet one of the following professional qualifications:

- licensure as a registered nurse by the Michigan Department of Licensing and Regulatory Affairs (LARA), and at least one year of experience providing community health, pediatric or maternal infant health nursing services; or
- licensure as a social worker by LARA, and at least one year of experience providing social work services to families.

7.8 CLAIMS SUBMISSION AND PAYMENT

All claims submitted and accepted are processed through CHAMPS. Claims must be submitted on the ASC X12N 837 5010 professional format when submitting electronic claims or on the CMS 1500 claim form for paper claims. (Refer to the Billing & Reimbursement for Professionals Chapter for additional billing information.)
7.8.A. INITIAL/ANNUAL ASSESSMENTS

Face-to-face assessment visits are to be billed using HCPCS code T2024 for an individual or family. This includes reimbursement for the development of a Plan of Care for one individual. HCPCS code T2024 with modifier TT (additional patient) should be billed for each additional individual Plan of Care that is developed from the assessment visit. For informational/reporting purposes, use modifier UN (two patients served), UP (three patients served), UQ (four patients served), UR (five patients served), or US (six or more patients served).

Assessment visits must be in the home or “home-like” environment. One face-to face initial/annual assessment visit per year per family/household is allowed. Additional assessment visits beyond one per year per family/household require prior authorization.

7.8.B. FOLLOW-UP/MONITORING

Face-to-face follow-up/monitoring visits are to be billed using HCPCS code T1017 for an individual or family. For informational/reporting purposes, use modifier UN (two patients served), UP (three patients served), UQ (four patients served), UR (five patients served), or US (six or more patients served), and enter the Medicaid beneficiary ID numbers of the family members served during the follow-up visit in the claim notes.

Follow-up visits must last at least 30 minutes and ideally take place in the home or “home-like” environment but may be performed in the office. A maximum of five face-to face follow-up/monitoring visits per year per family/household is allowed. Additional follow-up visits beyond five per year per beneficiary require prior authorization.
SECTION 8 — PEDIATRIC OUTPATIENT INTENSIVE FEEDING PROGRAM SERVICES

Pediatric Outpatient Intensive Feeding Program services are for beneficiaries with significant feeding and swallowing difficulties and are part of the Early and Periodic Screening, Diagnosis and Treatment (EPSDT) benefit. (Refer to the Early and Periodic Screening, Diagnosis and Treatment Chapter for additional information.)

Pediatric Outpatient Intensive Feeding Program services may be reimbursed through Medicaid Fee-for-Service (FFS). Covered services that are carved out of the Medicaid Health Plan (MHP) delivery system will be reimbursed through FFS consistent with applicable Medicaid policy.

8.1 GENERAL INFORMATION

Pediatric feeding disorders are a complex set of feeding and swallowing problems that disrupt the acquisition of functional age-appropriate feeding habits. To resolve complex pediatric feeding issues, clinical evidence indicates that both medical and behavioral interventions are needed. Failure to address feeding issues in young children can be severe and include growth failure, susceptibility to chronic illness, and/or death.

A Pediatric Outpatient Intensive Feeding Program is an onsite day program that is delivered by a team of medical, behavioral health and other professionals who address complex feeding issues through integrated, individualized care.

8.2 PROGRAM SERVICES

Medicaid covers medically necessary Pediatric Outpatient Intensive Feeding Program services for eligible beneficiaries. Pediatric Outpatient Intensive Feeding Program services primarily focus on children who have been diagnosed by a medical professional to have significant feeding difficulties that have not been resolved or treated adequately through less intensive therapies. Pediatric Outpatient Intensive Feeding Program services utilize a multi-disciplinary team to assist the beneficiary and his/her parents/guardians in improving the beneficiary’s ability to eat and swallow and improve nutritional outcomes. Pediatric Outpatient Intensive Feeding Program services include an initial comprehensive assessment, individualized plan of care (POC), on-going monitoring, and incorporate appropriate behavioral modification techniques and parent/guardian education/training. Pediatric Outpatient Intensive Feeding Program services offer an intensive focus on oral-motor skill development with attention to nutritional markers for the most therapeutic outcome.

Medicaid covers medically necessary Pediatric Outpatient Intensive Feeding Program services for eligible beneficiaries. Pediatric Outpatient Intensive Feeding Program services:

- Primarily focus on children who have been diagnosed by a medical professional to have significant feeding difficulties that have not been resolved or treated adequately through less intensive therapies;
- Utilize a multi-disciplinary team to assist the beneficiary and his/her parents/guardians in improving the beneficiary’s ability to eat and swallow and improve nutritional outcomes;
- Include an initial comprehensive assessment, individualized POC, ongoing monitoring, and incorporate appropriate behavioral modification techniques and parent/guardian education/training; and
● Offer an intensive focus on oral-motor skill development with attention to nutritional markers for the most therapeutic outcome.

Pediatric Outpatient Intensive Feeding Program services are designed to evaluate, diagnose and treat beneficiaries with significant feeding and swallowing difficulties. The initial comprehensive evaluation is performed by a multi-disciplinary team who meets with the beneficiary and his/her parents/guardians to assess the beneficiary’s current status and potential for improvement. The initial comprehensive evaluation should include:

● Assessment of medical history and physical exam;
● Nutritional history and evaluation of growth and nutritional parameters;
● Psychological assessment of developmental, cognitive, emotional and behavioral function;
● Psychosocial evaluation;
● Evaluation of oral-motor function (may include videofluoroscopy swallow study, Fiberoptic Endoscopic Evaluation of Swallowing (FEES), clinical swallowing evaluation, and sensory evaluation);
● Standardized tests and/or objective functional baseline measures to assist with planning short- and long-term goals and to document progress;
● Observation of a simulated meal/snack time; and
● Development of an individualized POC.

Following the initial comprehensive evaluation, the beneficiary and his/her parents/guardians commit to an outpatient program which may typically be held five days per week, six to eight hours per day, for a period up to six weeks. The goals of Pediatric Outpatient Intensive Feeding Program services are to:

● Promote consistent mealtime acceptance;
● Promote good nutrition;
● Increase the variety of foods the beneficiary will eat;
● Promote development of oral-motor skills for feeding;
● Promote developmental feeding skills, such as cup drinking and self-feeding;
● Transition from tube to oral feeding; and
● Assist the beneficiary and/or parents/guardians in acquiring feeding skills through education/training.

Beneficiaries should be routinely monitored, and one-on-one consultations and/or conferences with team members should be routinely scheduled to discuss progress. Supportive services provided during this time may include speech therapy, occupational therapy, physical therapy and/or social work. Progress is assessed regularly and the POC is updated, if continuation is necessary.

### 8.3 Indications for Services

Pediatric Outpatient Intensive Feeding Program services may be considered medically necessary for individuals with anatomical, physiological, congenital, or cognitive conditions and/or complications of
severe illness who experience significant feeding difficulties. Eligible beneficiaries must meet all the following criteria:

- Significant oral-motor problems and/or chronic medical condition exist;
- Normal feeding milestones have not been met through previous therapies and treatment;
- Suboptimal nutritional status has been determined; and
- Inadequate responsiveness to less intensive treatment has been clinically documented.

Examples of feeding disorders treated in these programs include, but are not limited to:

- Oral-motor dysfunction (including swallowing, oral and/or pharyngeal dysphagia);
- Severe pathology in the perception of, or response to, sensory input to the extent that it significantly limits the ability to function;
- Gastrointestinal disorders; and
- Feeding tube dependency.

Pediatric Outpatient Intensive Feeding Program services are not covered for individuals with specific eating disorders (e.g., binge eating, bulimia, anorexia or obesity-related disorders).

### 8.4 Provider Qualifications

Pediatric Outpatient Intensive Feeding Programs are provided under the delegation and supervision of a Medical Director and delivered by a multi-disciplinary team of medical, behavioral health and other professionals who are licensed, certified and/or registered to provide health-related services within the scope of practice for their discipline. The multi-disciplinary team should integrate and coordinate an individualized, comprehensive POC to address complex feeding issues. Each Pediatric Outpatient Intensive Feeding Program must have the following staff actively involved in the assessment process and/or development/implementation of the POC.

<table>
<thead>
<tr>
<th>Provider Type</th>
<th>Required Qualifications</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pediatrician</td>
<td>A Medicaid-enrolled and CSHCS-approved physician who possesses or is eligible for Pediatric Specialty Board Certification. Physicians are expected to remain familiar with current developments and standards of treatment in their respective fields. May serve in the required role as Medical Director.</td>
</tr>
<tr>
<td>Subspecialist</td>
<td>A Medicaid-enrolled and CSHCS-approved physician who possesses or is eligible for Pediatric Subspecialty Board Certification, including physicians with special training and demonstrated clinical experience related to pediatric feeding clinic issues. Physicians are expected to remain familiar with current developments and standards of treatment in their respective fields. May serve in the required role as Medical Director.</td>
</tr>
<tr>
<td>Licensed Behavioral Health Professional</td>
<td>A Licensed Behavioral Health Professional, such as a licensed psychologist or licensed Master’s Social Worker, with at least two years of professional experience in providing services to children/youth and their families.</td>

<tr>
<td>Parent/Guardian and/or Beneficiary</td>
<td>The parent/guardian and/or the beneficiary must be an active, participating team member in the development of the beneficiary’s comprehensive POC.</td>
</tr>
</tbody>
</table>

8.5 SERVICE PROVIDER ENROLLMENT

CSHCS-approved, Medicaid-enrolled program sites must be certified by the Michigan Department of Health and Human Services (MDHHS). MDHHS certification will be based upon adherence to the following requirements:

- Existence of a program schedule of services and supports.
- Assessment and POC services must be delivered by professional staff, as identified.
- If an aide under professional supervision delivers direct services, that supervision must be documented in the beneficiary's medical record.

Certification of new program sites will be contingent upon submission of acceptable enrollment information to MDHHS or upon a site visit by MDHHS.

8.6 PRIOR AUTHORIZATION

Pediatric Outpatient Intensive Feeding Program services require prior authorization. Requests for prior authorization must be submitted utilizing form MSA-6544-B (Practitioner Special Services Prior Approval – Request/Authorization) and include documentation to support medical necessity such as height/weight measurements and previously attempted therapeutic interventions. (Refer to the Prior Authorization subsection of the Practitioner Chapter for additional information.) Medicaid forms can be accessed on the MDHHS website. (Refer to the Directory Appendix for website information.)

A copy of the prior authorization must be retained in the beneficiary's medical record.

Pediatric Outpatient Intensive Feeding Program services must request prior authorization to continue intensive treatment services beyond the current authorization period, even if a beneficiary changes providers. A copy of the latest re-evaluation must be submitted with the prior authorization request.

Requests for continued treatment must be supported by all of the following:

- Summary of previous treatment period (not to exceed 90 days prior to that time period for which prior authorization is being requested), including measurable progress on each short- and long-term goal, rate of progress, statement of the beneficiary's response to treatment, and any factors that have affected progress during the therapy period. Do not send daily treatment notes.
- Revised goals and justification for any change in the treatment plan for the requested period of treatment.
- Statement detailing any parent/guardian education and training.
8.7 BILLING AND REIMBURSEMENT

Reimbursement for Pediatric Outpatient Intensive Feeding Program services is a bundled payment rate based on the covered services provided by a multi-disciplinary team. This service is reimbursed as a daily rate comprised of all costs associated with the services provided within the day program, including: facility-related costs; medical care services provided by the physician and other licensed practitioners; services provided by clinical staff working under the delegation and supervision of a licensed medical practitioner; and diagnostic, screening and rehabilitative services. Services are billed as FFS claims through the Community Health Automated Medicaid Processing System (CHAMPS) regardless of beneficiary health plan status. Providers are to bill using Healthcare Common Procedure Coding System (HCPCS) code S0317 (disease management; per diem).

SECTION 1 – GENERAL INFORMATION

This chapter applies to enrolled Private Practice, Outpatient, Nursing Facility, and Home Health Agency therapy providers.

The term Medicaid throughout this chapter refers to all programs administered by MDHHS unless specifically stated otherwise. The primary objective of Medicaid is to ensure that essential health care services are made available to those individuals who would not otherwise have the financial resources to purchase them. Policies are aimed at maximizing medically necessary health care services available to eligible Medicaid beneficiaries.

The primary objective of the Children’s Special Health Care Services (CSHCS) Program is to ensure that CSHCS beneficiaries receive medically necessary services related to a CSHCS qualifying diagnosis as recommended by a CSHCS authorized subspecialist. Providers should refer to the Children’s Special Health Care Services chapter of this manual for information specific to CSHCS only beneficiaries.

1.1 SERVICE PROVISION

Therapy may be provided by Medicaid-enrolled providers when performed by properly credentialed/licensed or appropriately supervised professionals in the following settings:

- **Occupational Therapy (OT) and Physical Therapy (PT)**
  - Outpatient Hospital
  - Comprehensive Outpatient Rehabilitation Facility (CORF)
  - Outpatient Rehabilitation Agency (Rehab Agencies)
  - Commission on Accreditation of Rehabilitation Facilities (CARF)-Accredited Outpatient Medical Rehabilitation Program
  - Physical Therapist or Occupational Therapist in Private Practice
  - Physician's Office/Clinic
  - Optometrist's Office
  - Nursing Facility
  - Home Health Agency

- **Speech-Language Therapy (ST)**
  - Outpatient Hospital
  - Comprehensive Outpatient Rehabilitation Facility (CORF)
  - Outpatient Rehabilitation Agency (Rehab Agencies)
  - CARF-Accredited Outpatient Medical Rehabilitation Program
  - Council on Academic Accreditation (CAA)-Accredited University Graduate Education Program
  - Speech-Language Pathologist in Private Practice
Medicaid covers medically necessary rehabilitative therapy services for beneficiaries of all ages. Rehabilitative services include teaching or training someone to perform or develop a level of reasonable functional proficiency of tasks or skills that were previously learned, with or without compensatory strategies. Examples may include, but are not limited to:

- PT to regain functional ambulation using a cane following a stroke, or to advance from ambulation with an assistive device/physical assistance to ambulation without an assistive device or physical assistance;
- OT to achieve independent dressing following a spinal cord injury, or to develop dressing independence without an assistive device or physical assistance;
- Speech-Language Pathology (SLP) to improve articulation and fluency following a traumatic brain injury or develop communication skills utilizing an augmentative communication strategy.

Medicaid beneficiaries under 21 years of age and Healthy Michigan Plan beneficiaries may be eligible for medically necessary habilitative therapy services. Habilitation therapy includes teaching/training someone to perform/develop a level of reasonable functional proficiency of a task that was not previously learned/achieved at a typically expected age or without compensatory techniques or processes. Examples may include, but are not limited to:

- PT for a child who is not walking at a typically expected age.
- OT teaching normal dressing skills beyond the typically expected age of learning.
- SLP for communication skills including articulation errors beyond the typically expected age of learning or syntax and semantics for a person with significant hearing impairment.

Documentation must objectively support the request for rehabilitative and/or habilitative therapy.

1.2 THERAPY DATABASE

For specifics regarding Medicaid coverage of the Healthcare Common Procedure Coding System (HCPCS), refer to the MDHHS Therapies Database on the MDHHS website or the Medicaid Code and Rate Reference tool in the Community Health Automated Medicaid Processing System (CHAMPS). (Refer to the Directory Appendix for website information.) The database includes covered private practice, outpatient, nursing facility, and home health therapy codes, applicable limits, and prior authorization requirements.

1.3 DOCUMENTATION IN BENEFICIARY MEDICAL RECORD

Therapy providers must retain all applicable documentation in the beneficiary's medical record for seven years. For audit purposes, the beneficiary's medical record must substantiate the medical necessity of the service performed.
1.4 Practitioner Signatures

In all documentation requiring a signature, the signature must be hand written by the practitioner or submitted electronically. A stamped signature, second party signature, or statement of “signature on file” will not be accepted. NOTE: An electronic signature must specifically identify and authenticate the individual practitioner. This applies to signatures for ordering, referring, and treating practitioners.

1.5 Modifiers [Change Made 4/1/19]

Therapy claims must be submitted using the appropriate procedure code and therapy modifier to distinguish the discipline under which the service is delivered. To differentiate between habilitative and rehabilitative therapy, when services are habilitative report (revised 4/1/19) with the appropriate modifier that represents the nature of the therapy being performed. Only Medicaid beneficiaries under 21 years of age and Healthy Michigan Plan beneficiaries may be eligible for medically necessary habilitative therapy services. In addition to these modifiers, maintenance therapy services should be billed with the MDHHS identified modifier to categorize the service as maintenance related.

Therapy services submitted without these modifiers may be denied. Refer to the Billing and Reimbursement chapters in this manual for additional modifier information.

1.6 Reimbursement

Reimbursement structure is based on the provider’s enrollment type. Reimbursement methodologies include the MDHHS Outpatient Prospective Payment System or the Medicaid fee screens. (Refer to the Medicaid Code and Rate Reference tool in CHAMPS or the MDHHS Therapies Database on the MDHHS website.) For Not Otherwise Classified codes or covered codes without established fee screens, the authorized reimbursement amount is indicated on the approved prior authorization request.
SECTION 2 – PROVIDER REQUIREMENTS

2.1 OUTPATIENT HOSPITALS

Outpatient OT, PT and ST services may be provided to beneficiaries of all ages in the outpatient hospital.

2.2 COMPREHENSIVE OUTPATIENT REHABILITATION FACILITIES AND OUTPATIENT REHABILITATION AGENCIES

Comprehensive Outpatient Rehabilitation Facilities (CORFs) and rehab agencies may enroll with Medicaid for reimbursement of outpatient OT, PT and ST services provided by qualified professionals. All CORFs and rehab agencies must provide proof of Medicare certification when enrolling in Medicaid.

2.3 COMMISSION ON ACCREDITATION OF REHABILITATION FACILITIES-ACCREDITED OUTPATIENT MEDICAL REHABILITATION PROGRAMS

Commission on Accreditation of Rehabilitation Facilities (CARF)-accredited outpatient medical rehabilitation programs may enroll with Medicaid for reimbursement of outpatient OT, PT and ST services provided by qualified professionals. The program must not be part of, or owned by, a hospital, CORF or rehab agency. All CARF-accredited outpatient medical rehabilitation programs must provide proof of their current CARF accreditation when enrolling in Medicaid.

2.4 NURSING FACILITY

A Medicaid-certified nursing facility (NF) is defined as a nursing home, county medical care facility, or hospital long term care unit with Medicaid certification. Nursing facilities must provide or obtain specialized rehabilitative services if required by the beneficiary’s plan of care.

In situations where the therapist is not an employee of the facility, the facility must establish a valid contract with a therapist/speech-language pathologist who meets applicable licensure/certification/accreditation requirements. A valid contract allows the facility to retain professional and administrative control over the services provided. Therefore, an agreement that stipulates only the use of facility space does not constitute a valid contract.

2.5 HOME HEALTH AGENCY

A Home Health Agency (HHA) is an organization that provides home care services, such as skilled nursing care, OT, PT, ST and home health aide services. The HHA must be Medicare certified to enroll as a Medicaid provider and must comply with the Medicare/Medicaid conditions of participation.

OT, PT, and ST services may be provided by an HHA if Medicare/Medicaid conditions of participation, including medical necessity, are met. A therapist in the home health setting may be responsible for supervision of the home health aide. Refer to the Home Health chapter for additional information.

2.6 UNIVERSITY AFFILIATED SPEECH-LANGUAGE PATHOLOGY GRADUATE EDUCATION PROGRAMS

University graduate education programs accredited by the American Speech-Language-Hearing Association’s (ASHA) Council on Academic Accreditation (CAA) in Audiology and Speech-Language Pathology may enroll with Medicaid for reimbursement of outpatient speech-language therapy provided
by qualified professionals. The university program must be freestanding and not part of, or owned by, a hospital, CORF or rehab agency. All university programs must provide proof of their current ASHA-CAA when enrolling in Medicaid.

2.7 PHYSICAL THERAPISTS, OCCUPATIONAL THERAPISTS, AND SPEECH-LANGUAGE PATHOLOGISTS’ PRIVATE PRACTICE

PT, OT, and ST services may be provided to beneficiaries of all ages when provided by a Medicaid enrolled physical therapist, occupational therapist, or speech-language pathologist employed by an individual/sole, partnership, or group practice. These providers are eligible for direct reimbursement.

2.8 PHYSICIAN’S OFFICE OR CLINIC

PT, OT, and ST services may be provided to beneficiaries of all ages in a physician's office or one of the following clinics: Federally Qualified Health Center, Rural Health Clinic, Tribal Health Center, or Local Health Department.
SECTION 3 – PRIOR AUTHORIZATION REQUESTS

Prior authorization is required for certain therapy services before the services are rendered. To determine which therapy services require prior authorization, refer to the Standards of Coverage and Service Limitations Section of this chapter, the Medicaid Code and Rate Reference tool in CHAMPS, or the MDHHS Therapies Database on the MDHHS website. (Refer to the Directory Appendix for website information.)

Prior authorization is not required for the first 60-days of home health therapy if the beneficiary has not received home therapy within the last year (365 consecutive days from the date of service) and services do not exceed the visit maximum. If a beneficiary has previously received home health therapy and services were provided more than 60 days ago but less than 365 days, authorization is needed.

Prior authorization (PA) is needed when therapy limits are exceeded regardless of diagnosis.

PA may be authorized for a period not to exceed six months for outpatient and private practice therapy providers and outpatient hospitals, or two months for home health agencies and nursing facilities.

Nursing facilities participating in Medicare are not required to obtain prior authorization for the deductible and/or coinsurance amounts when Medicare approves the services.

If a beneficiary is approved for ventilator care and requires therapy, prior authorization for the therapy must be obtained under the Ventilator Dependent Care Unit (VDCU) National Provider Identification (NPI).

Prior authorization requests must be submitted on the Occupational Therapy-Physical Therapy-Speech Therapy Prior Approval Request/Authorization form (MSA-115). (Refer to the Forms Appendix or the MDHHS website for a copy of the form.) Required medical documentation must accompany the form.

The information on the MSA-115 must be:

- Typed – All information must be clearly typed in the designated boxes of the form.
- Thorough – Complete information, including the appropriate HCPCS procedure codes, must be provided on the form. The form and all documentation must include the beneficiary’s name and mihealth card ID number, provider name and address, and the provider’s NPI number.

Whenever a beneficiary is admitted to a nursing facility directly from a general hospital or from another nursing facility where the beneficiary was receiving reimbursable therapy services, the name of that facility and the date of discharge from that facility should be included on the prior authorization request.

Prior authorization requests should be submitted with the appropriate therapy modifier to distinguish the discipline under which the service is being requested and a modifier that represents the nature of the therapy being requested (habilitative vs rehabilitative therapy). Requests for maintenance therapy services should also contain the appropriate maintenance modifier. Refer to the Billing & Reimbursement Chapters for additional modifier information.

For all Medicaid Fee-for-Service (FFS) beneficiaries, the MSA-115 must be mailed or faxed to the MDHHS Program Review Division. Providers can check the status of a prior authorization request in CHAMPS or
by contacting the MDHHS Program Review Division via telephone. (Refer to the Directory Appendix for website and contact information.)

Prior authorization requests may also be submitted electronically via FFS Direct Data Entry (DDE) in CHAMPS. (Refer to the General Information for Providers chapter of this manual for additional information.) A copy of the MSA-115 must be attached to each electronic prior authorization request.

A copy of the prior authorization determination letter must be retained in the beneficiary’s medical record.

3.1 EMERGENCY/VERBAL PRIOR AUTHORIZATION

A provider may contact MDHHS to obtain a verbal prior authorization when the prescribing practitioner (practicing within their scope of practice as defined by state law) has indicated that it is medically necessary to provide therapy services without delay. If a therapy service is required during MDHHS nonworking hours, providers must contact the Program Review Division the next working day.

To obtain verbal prior authorization, providers may call or fax a request to the Program Review Division. (Refer to the Directory Appendix for contact information. Refer to the Forms Appendix for a copy of form MSA-115 and completion instructions.) If the provider faxes a request, the request must state “verbal prior authorization required.”

The following steps must be completed before a prior authorization number is issued for billing purposes:

- The verbal authorization date must be entered on the MSA-115 or electronically in CHAMPS via FFS DDE.
- The MSA-115 or FFS DDE prior authorization request must be submitted to the Program Review Division within 30 days of the verbal authorization.
- Supporting documentation must be submitted with the prior authorization request.

The verbal authorization does not guarantee reimbursement for the services if:

- The beneficiary was not eligible for Medicaid when the therapy service was provided.
- The Program Review Division does not receive the completed MSA-115 and documentation within 30 days of the verbal authorization.
- The prescription is dated after the date the verbal authorization was requested.

3.2 RETROACTIVE PRIOR AUTHORIZATION

Therapy services provided before prior authorization is requested will not be covered unless the beneficiary was not eligible on the date of service and a subsequent eligibility determination was made retroactive to the date of service. If the MDHHS eligibility file does not show that retroactive eligibility was approved, then the request for retroactive prior authorization will be denied.

- Exception for nursing facilities: When a beneficiary is admitted to a nursing facility directly from a general hospital or from another nursing facility where the beneficiary was receiving reimbursable therapy services, retroactive authorization may be requested to ensure continuity of a treatment regimen if the request is filed within ten days following admission. Retroactive
authorization may be granted when the service is rendered within Program guidelines for coverage (e.g., is restorative in nature).

3.3 BENEFICIARY ELIGIBILITY

Approval of a therapy service on the prior authorization request confirms that the service is authorized for the beneficiary. Approval of a prior authorization request does not guarantee beneficiary eligibility or payment. It is the provider’s responsibility to verify the beneficiary’s eligibility prior to rendering the service.

3.4 BILLING AUTHORIZED SERVICES

After prior authorization is issued, the information (e.g., prior authorization number, HCPCS/ CPT procedure code, modifier, and quantity) that was approved on the prior authorization must match the information on the claim form.

Therapy rendered to a nursing facility beneficiary must be billed by the nursing facility.

Refer to the Billing & Reimbursement Chapters of this manual for complete billing instructions.
SECTION 4 – STANDARDS OF COVERAGE AND SERVICE LIMITATIONS

4.1 OCCUPATIONAL THERAPY

MDHHS uses the terms Occupational Therapy, OT, and therapy interchangeably. OT is covered when furnished by a Medicaid-enrolled therapy provider and the documentation is signed by the treating therapist. Medicaid reimburses for occupational therapy services when provided by any of the following:

- A licensed occupational therapist.
- A licensed occupational therapy assistant under the supervision of an occupational therapist (i.e., the occupational therapy assistant services must follow the evaluation and treatment plan developed by the occupational therapist, and the occupational therapist must supervise and monitor the occupational therapy assistant’s performance with continuous assessment of the beneficiary’s progress). All documentation must be reviewed and co-signed by the supervising occupational therapist.
- A student completing their clinical affiliation under the direct supervision of (i.e., in the presence of) an occupational therapist. All documentation must be reviewed and co-signed by the supervising occupational therapist.

OT is considered an all-inclusive charge. Medicaid does not reimburse for a clinic room charge in addition to therapy services unless the room charges are unrelated. MDHHS expects occupational therapists and occupational therapy assistants to utilize the most ethically appropriate therapy within their scope of practice as defined by state law or the appropriate national professional association. OT must be medically necessary, reasonable and required to achieve one or more of the following:

- Return the beneficiary to the functional level prior to illness or disability;
- Return the beneficiary to a functional level that is appropriate to a stable medical status;
- Prevent a reduction in medical or functional status had the therapy not been provided.

Therapies provided to nursing facility beneficiaries outside the nursing facility premises must be provided in the outpatient department of a general hospital or medical care facility.

Therapies provided to county medical care facility, hospital long term care unit, or hospital swing bed beneficiaries outside their respective facilities must be provided in the outpatient department of a general hospital.

Medicaid standard coverage allows the following:

<table>
<thead>
<tr>
<th>Outpatient/Private Practice Occupational Therapy</th>
<th>Nursing Facility Occupational Therapy</th>
<th>Home Health Occupational Therapy</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Up to 144 units of OT per calendar year period.</td>

<td></td>
<td>the initial 60 days.</td>
</tr>
</tbody>
</table>
OT is expected to result in measurable improvement that is significant to the beneficiary’s ability to perform daily living tasks appropriate to his/her chronological, developmental, or functional status. Functional improvements must be achieved in a reasonable, and generally predictable, amount of time as specified in the short- and long-term goals identified on the evaluation/re-evaluation and treatment plan. Functional improvements must be maintainable. Medicaid does not cover therapy if the beneficiary’s maximum functional potential has been realized, the beneficiary has plateaued, or the therapy has no impact on the beneficiary’s ability to perform age-appropriate tasks. However, medically necessary habilitative therapy services may be covered under Early and Periodic Screening, Diagnosis and Treatment (EPSDT) or Healthy Michigan Plan.

Medicaid only covers OT services that require the skills, knowledge, and education of an occupational therapist. Medicaid does not cover interventions provided by another practitioner or caregiver (e.g., registered nurse, physical therapist, family member, teacher, etc.).

<table>
<thead>
<tr>
<th>Occupational therapy may be covered for one or more of the following:</th>
<th></th>
</tr>
</thead>

<td></td>
</tr>
</tbody>
</table>

*Covered occupations include:

- Activities of daily living (self-care activities).
- Instrumental activities of daily living (multistep activities to care for self and others, such as household management and childcare).
Occupational therapy is not covered for the following:

- If provided solely for educational, vocational, or recreational purposes.
- If therapy services are required to be provided by another public agency (e.g., community mental health services provider, school-based services, etc.).
- If a therapy service requires prior authorization and the service is rendered before prior authorization is approved.
- Habilitative therapy designed to facilitate the normal progression of development without compensatory techniques or processes. (Refer to the Early and Periodic Screening, Diagnosis and Treatment and the Healthy Michigan Plan chapters for coverage exceptions.)
- If therapy is rote practice of achieved skills.
- Development of perceptual motor skills and sensory integrative functions to follow a normal sequence. (Refer to the Early and Periodic Screening, Diagnosis and Treatment and the Healthy Michigan Plan chapters for coverage exceptions.)
- If therapy is designed to facilitate the normal progression of development without compensatory techniques or processes. (Refer to the Early and Periodic Screening, Diagnosis and Treatment and the Healthy Michigan Plan chapters for coverage exceptions.)
- Non-diagnostic, non-therapeutic, routine, or repetitive tasks without skilled feedback (e.g., sitting with a beneficiary needing prompting to swallow or take small bites which does not require the skills of a therapist, etc.)
- Feeding for a beneficiary whose status is nothing per oral cavity (NPO), with physician orders to continue NPO, and who does not demonstrate the potential to improve oral and/or pharyngeal phases of swallowing (i.e., pleasure eating).
- Continuation of therapy that is maintenance in nature, except as described under Maintenance Visits in the Prescription Requirements subsection (below).
- If Medicare determines the service is not medically necessary.
- Additionally for nursing facility beneficiaries:
  - Therapy provided by a physician (MD or DO).
  - Services covered by the facility's per diem rate, including diversional OT, reality orientation, restorative nursing functions, routine maintenance, or the development of the therapy and treatment plan.

4.1.A. Duplication of Services

Medicaid does not cover two disciplines working concurrently on similar goals/areas (e.g., dysphagia, assistive technology, sitting and standing balance/tolerance, etc.). Collaboration between treating therapists is required to coordinate therapy and prevent duplication of services. Documentation of the collaboration must be retained in the beneficiary's medical record for audit purposes.
4.1.B. ACCESS TO SERVICES FOR SCHOOL-AGED BENEFICIARIES

School based therapy services are covered by Medicaid when they assist a child/youth with a disability to benefit from special education. This includes beneficiaries up to the age of 21 who are eligible under the provisions of the Individuals with Disabilities Education Act (IDEA) of 1990 as amended, and those enrolled in programs that require an Individualized Education Program (IEP) or an Individualized Family Service Plan (IFSP). Therapy provided solely for educational purposes (e.g., pre-academic goals such as improved attention span, catching/throwing/kicking balls, etc.) is not covered by Medicaid.

Beneficiaries receiving school-based therapy may also receive medically-based therapy services in an outpatient setting, nursing facility, or through a home health agency. If therapy is provided in more than one setting, the goals and purpose for each must be distinct.

Outpatient therapy services are provided to optimize the child's/youth's maximum functional performance in relation to needs in the home or community setting and must not directly duplicate those provided in the school setting. Collaboration between the school and community providers is required to coordinate therapy and prevent direct duplication of services. Documentation of the collaboration must be retained in the beneficiary's medical record for audit purposes.

Beneficiaries receiving school-based therapy services with medically-related goals may be eligible for the continuation of services in an outpatient setting during the summer months to maintain function. Prior authorization is required if standard coverage limitations have been exceeded. (Refer to the Requirements of Continued Therapy under the Prescription Requirements subsection below for additional information.)

4.1.C. AQUATIC THERAPY

Medicaid does not cover aquatic therapy as a separately reimbursable treatment or modality. A covered therapeutic procedure performed in a pool may be reimbursed when billed using the HCPCS code describing the covered procedure if the service meets all Medicaid coverage requirements.

4.1.D. GROUP THERAPY

OT is not covered by Medicaid when provided concurrently to a group of two or more individuals by the same therapist. Covered therapeutic procedures require direct (one-to-one) contact between the beneficiary and the therapist.

4.1.E. SERIAL CASTING

Serial casting is a process in which a joint(s) that lacks full range of motion is immobilized with a rigid or semi-rigid cast. During this procedure, the affected joint(s) is gradually and progressively set in a more anatomically correct alignment to improve joint alignment, increase muscle length, or to achieve a decrease in abnormal tone, resulting in an increase in the range of motion.
Casts are applied and removed in succession, usually every week, until full range of motion, flexibility, or plateau is reached. Upon removal of each cast, the limb is stretched, and a new cast is applied to hold the limb in place.

Serial casting is a covered benefit when performed by, or under the direct supervision of, a qualified therapist and defined in a treatment plan as a medically necessary therapy service for improving range of motion or reducing abnormal tone. The referral for therapy services must specifically indicate that the beneficiary is being referred for serial casting, or the referring provider must provide written concurrence, via signature, of any treatment plan that includes serial casting.

4.1.F. PRESCRIPTION REQUIREMENTS

Outpatient and private practice therapy requires a prescription from a physician or other licensed practitioner practicing within their scope of practice as defined in State law for occupational therapy. Home health and nursing facility therapy require a prescription from a physician for occupational therapy.

A treatment plan meeting all the requirements below is considered a prescription. The prescription/treatment plan must contain all the following:

- Beneficiary's name;
- Beneficiary's date of birth;
- Prescribing practitioner’s name, address, and telephone number;
- Prescribing practitioner’s signature;
- The date the prescription was written;
- The frequency and duration of the therapy services;
- Diagnosis; and
- For swallowing or oral motor evaluation/treatment, the documentation must clearly specify allowance of trial feeds and/or oral intake during therapy). All documentation, including the prescription, current plan of care, and prior authorization, must consistently substantiate this allowance.

A copy of the prescription must be retained in the beneficiary's medical record. A prescription is valid for 90 days from the date that the prescription was written unless the termination date is otherwise stated by the authorized prescribing practitioner on the prescription.

If the beneficiary has another insurance plan (e.g. Medicare or commercial insurance) and the service is a covered benefit, the provider must follow the requirements of the other insurance plan(s), including but not limited to, prescription, prior authorization, and provider qualifications. (Refer to the Coordination of Benefits chapter for more information.)
<table>
<thead>
<tr>
<th>Evaluations/Re-evaluations</th>
</tr>
</thead>
</table>
| An evaluation is formalized testing at the initiation of the beneficiary’s treatment plan. Evaluations may be provided up to two times in a 365-day period. Evaluations of swallowing function may be provided up to four times in a 365-day period. Objective and periodic re-evaluations and reports are utilized to determine the measurable functional change resulting from the treatment plan. Re-evaluations may be provided up to two times in a 365-day period. Prior authorization is required if an evaluation or re-evaluation is needed more frequently. An evaluation/re-evaluation is required for the initiation of therapy and continued therapy. 

OT evaluations/re-evaluations must be completed and signed by the occupational therapist and include all the following:

- Standardized tests and/or objective functional baseline measures to establish short- and long-term goals and to document progress;
- Corresponding baseline measures for all short- and long-term goals;
- Treatment diagnosis(es);
- Medical diagnosis(es), if different from treatment diagnosis;
- Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable;
- Medical history as it relates to the current course of therapy;
- The beneficiary’s current functional status (functional baseline);
- Assessment of the beneficiary’s performance components (e.g., strength, dexterity, range of motion, sensation, perception, muscle tone, etc.) directly affecting the beneficiary’s ability to function or make progress toward goals; and
- Assessment of the beneficiary’s cognitive skill level (e.g., ability to follow directions, including auditory and visual comprehension).

Oral function/swallowing evaluations must also include:

- Presence/absence of coughing;
- History of recent respiratory illness;
- Current diet, documenting difficulties with food consistencies;
- Aversion/sensitivity during eating;
- Objective oral motor assessment addressing labial, glossal, laryngeal, and pharyngeal stages;
- Report or copy of a video fluoroscopy and any other formal testing, if available; and
- Voice quality (i.e., pre- and post-feeding and natural voice), if applicable.
The OT treatment plan that results from the evaluation must be medically necessary, signed by the occupational therapist, and include all the following:

- Time-related short-term goals that are measurable, functional, and significant to the beneficiary's function or mobility;
- Long-term goals that are measurable, functional, and identify specific maximum functional achievement for the requested authorization period;
- Functional outcome measures specific to maximum functional achievement for the current course of therapy (up to 12 consecutive months);
- Anticipated type, frequency and duration of therapy required to meet short- and long-term goals;
- Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable;
- Plan for discharge from service; and
- Signature of the prescribing practitioner confirming agreement with the treatment plan.

A treatment plan, including all the criteria established above, must be submitted with the prior authorization request.

OT may be initiated upon completion of the evaluation (current within 12 months) and development of a treatment plan that is medically necessary as documented in the beneficiary’s medical record. The initiation of therapy services may begin if all the following have been met:

- The beneficiary is Medicaid-eligible;
- A copy of the signed and dated (no more than 90 days prior to the initiation of services) prescription for occupational therapy is retained in the beneficiary’s medical record;
- The standard coverage limitations have not been exceeded;
- Therapy is provided by the evaluating discipline (e.g., a speech-language pathologist may not provide treatment under an occupational therapist’s evaluation); and
- There is a change in medical status resulting in decreased activities of daily living skills, oral motor skills, or functional ability.
The occupational therapist must request prior authorization to continue therapy beyond standard coverage limitations, even if the beneficiary changes providers. A copy of the latest evaluation/re-evaluation (completed no more than 12 months prior to the prior authorization request) must be submitted with the prior authorization request.

Requests for continued therapy must be supported by all the following:

- Summary of previous treatment period (not to exceed the 90 days prior to that period for which prior authorization is being requested), including measurable progress on each short- and long-term goal, rate of progress, a statement of the beneficiary’s response to treatment, and any factors that have affected progress during the therapy period. Do not send daily treatment notes.
- Revised goals and justification for any change in the treatment plan for the requested period of therapy.
- Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable.
- Statement detailing any family/caregiver services being provided in a maintenance program, if appropriate.
- A copy of the prescription indicating the date range of the requested treatment period must be provided with each prior authorization request. The prescription must meet all the requirements established under this subsection. A treatment plan meeting all the prescription requirements is considered a prescription.
- The anticipated plan of discharge for the current course of therapy (up to 12 consecutive months). If more than 12 months of therapy is anticipated, a new course of therapy with a new evaluation/re-evaluation and treatment plan is required.

</tbody>
</table>
Maintenance Visits

The skills of an occupational therapist may be required for training, review of previously achieved skills, monitoring of a maintenance program being carried out by family or caregivers, or continued follow-up for the fit and function of orthotic, prosthetic, or assistive technology devices. Maintenance visits in an outpatient or nursing facility setting may be provided up to four times per 90-consecutive day period. If more than four maintenance visits are required in a 90-consecutive day period, the therapist must request prior authorization. Maintenance visits in a home setting may be provided up to four times per 60-consecutive day period. If more than four maintenance visits are required in a 60-consecutive day period, the therapist must request prior authorization.

The occupational therapist must complete the MSA-115 or FFS DDE plus MSA-115 prior authorization request, and include all the following:

- Summary of previous treatment period, including measurable progress on each short- and long-term goal. This must include the treating occupational therapist’s analysis of the therapy, rate of progress, and justification for any change in the treatment plan. Documentation must relate to the 90-day period immediately prior to that period for which prior authorization is being requested.
- A statement of the beneficiary’s response to treatment, including factors that have affected progress during the therapy period.
- A copy or description of the maintenance program.
- A statement detailing the reason(s) additional maintenance visits are medically necessary.
- Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable.
- The anticipated frequency and duration of maintenance visits.
- The anticipated plan of discharge for the current course of therapy (up to 12 months).
- A treatment plan signed by the prescribing practitioner that includes all the criteria established under Treatment Plan/Plan of Care above.

4.1.G. DISCHARGE SUMMARY

MDHHS requires the occupational therapist to document a discharge summary to identify the completion of OT services and the discharge status. The discharge summary must be retained in the beneficiary's medical record and include all the following:

- Dates of service (i.e., initial and discharge dates);
- Description of therapy services provided;
- Functional status at discharge related to treatment areas/goals/maximum functional achievement over the course of therapy;
- Analysis of the effectiveness of the therapy program, including reasons for goals not met or changes in the treatment plan necessitated by changes in medical status;
- A copy or description of the maintenance program, if appropriate;
- Identification of assistive technology devices (e.g., walker) and its current utilization, if appropriate; and
4.1.H. SUPPLIES AND EQUIPMENT

MDHHS does not allow separate reimbursement for supplies and equipment used as part of a therapy treatment or for trials/training in the use of complex durable medical equipment when required to establish competency for a prior authorization request. The cost of supplies and equipment used are included in the reimbursement for the therapy.

4.2 PHYSICAL THERAPY

MDHHS uses the terms Physical Therapy, PT, and therapy interchangeably. PT is covered when furnished by a Medicaid-enrolled therapy provider and the documentation is signed by the treating therapist. Medicaid reimburses for physical therapy services when provided by any of the following:

- A licensed physical therapist.
- A licensed physical therapy assistant under the supervision of a physical therapist (i.e., the physical therapy assistant services must follow the evaluation and treatment plan developed by the physical therapist, and the physical therapist must supervise and monitor the physical therapy assistant’s performance with continuous assessment of the beneficiary’s progress). All documentation must be reviewed and co-signed by the supervising physical therapist.
- A student completing their clinical affiliation under the direct supervision of (i.e., in the presence of) a physical therapist. All documentation must be reviewed and co-signed by the supervising physical therapist.

PT is considered an all-inclusive charge. Medicaid does not reimburse for a clinic room charge in addition to therapy services unless the room charges are unrelated. MDHHS expects physical therapists and physical therapy assistants to utilize the most ethically appropriate therapy within their scope of practice as defined by state law or the appropriate national professional association. PT must be medically necessary, reasonable and required to achieve one or more of the following:

- Return the beneficiary to the functional level prior to illness or disability;
- Return the beneficiary to a functional level that is appropriate to a stable medical status;
- Prevent a reduction in medical or functional status had the therapy not been provided.

Therapies provided to nursing facility beneficiaries outside the nursing facility premises must be provided in the outpatient department of a general hospital or medical care facility.

Therapies provided to county medical care facility, hospital long term care unit or hospital swing bed beneficiaries outside their respective facilities must be provided in the outpatient department of a general hospital.
Medicaid standard coverage allows the following:

<table>
<thead>
<tr>
<th>Outpatient/Private Practice Physical Therapy</th>
<th>Nursing Facility Physical Therapy</th>
<th>Home Health Physical Therapy</th>
</tr>
</thead>
</table>
| • Up to 144 units of PT per calendar year period.  
• Prior authorization is required for treatment that exceeds this unit limitation. | • Prior authorization is required. | • Up to 24 visits of PT in a 60-consecutive day period.  
• Prior authorization (PA) is required for treatment that exceeds this visit limitation or for continued treatment beyond the initial 60 days. |

PT is expected to result in measurable improvement that is significant to the beneficiary’s ability to perform mobility skills appropriate to his/her chronological, developmental, or functional status. Functional improvements must be achieved in a reasonable, and generally predictable, amount of time as specified in the short- and long-term goals identified on the evaluation/re-evaluation and treatment plan. Functional improvements must be maintainable. Medicaid does not cover therapy if the beneficiary’s maximum functional potential has been realized, the beneficiary has plateaued, or the therapy has no impact on the beneficiary’s ability to perform age-appropriate tasks. However, medically necessary habilitative therapy services may be covered under EPSDT or Healthy Michigan Plan.

Medicaid only covers PT services that require the skills, knowledge, and education of a physical therapist. Medicaid does not cover interventions provided by another practitioner or caregiver (e.g., registered nurse, licensed occupational therapist, family member, teacher, etc.).

| Physical therapy may be covered for one or more of the following: | If expected to result in the restoration or amelioration of the anatomical or physical basis for the restriction in performing age-appropriate functional mobility skills.  
• PT service that is diagnostic.  
• For a temporary condition that creates decreased mobility and/or function.  
• Training in functional mobility skills (e.g., ambulation, transfers, floor mobility, transitions, wheelchair mobility, etc.).  
• Stretching for improved flexibility.  
• Modalities to allow gains of function, strength, or mobility.  
• Training in the use of orthotic/prosthetic devices and assistive technology devices.  
• Severe pathology in the perception of, or response to, sensory input to the extent that it significantly limits the ability to function.  
• Skilled services that are designed to develop, train, monitor, and modify a maintenance program to be carried out by family or caregivers.  
• Federal EPSDT regulations require coverage of medically necessary treatment for beneficiaries under 21 years of age, including medically necessary habilitative therapy services. (Refer to the Early and Periodic Screening, Diagnosis and Treatment chapter for additional information.) |
Physical therapy is not covered for the following:

- If provided solely for educational, vocational, or recreational purposes.
- If therapy services are required to be provided by another public agency (e.g., community mental health services provider, school-based services, etc.).
- If a therapy service requires prior authorization and the service is rendered before prior authorization is approved.
- Habilitative therapy designed to facilitate the normal progression of development without compensatory techniques or processes. (Refer to the Early and Periodic Screening, Diagnosis and Treatment and the Healthy Michigan Plan chapters for coverage exceptions.)
- If therapy is rote practice of achieved skills.
- Development of perceptual motor skills and sensory integrative functions to follow a normal sequence. (Refer to the Early and Periodic Screening, Diagnosis and Treatment and the Healthy Michigan Plan chapters for coverage exceptions.)
- Continuation of therapy that is maintenance in nature, except as described under Maintenance Visits in the Prescription Requirements subsection below.
- If Medicare determines the service is not medically necessary.
- Additionally for nursing facility beneficiaries:
  - Therapy provided by a physician (MD or DO);
  - Services covered by the facility’s per diem rate, including routine maintenance and the development of the therapy and treatment.

**4.2.A. DUPLICATION OF SERVICES**

Medicaid does not cover two disciplines working concurrently on similar goals/areas (e.g., assistive technology, hand therapy, sitting and standing balance/tolerance, transfers, etc.). Collaboration between treating therapists is required to coordinate therapy and prevent duplication of services. Documentation of the collaboration must be retained in the beneficiary’s medical record for audit purposes.

**4.2.B. ACCESS TO SERVICES FOR SCHOOL-AGED BENEFICIARIES**

School-based therapy services are covered by Medicaid when they assist a child/youth with a disability to benefit from special education. This includes beneficiaries up to the age of 21 who are eligible under the provisions of the Individuals with Disabilities Education Act (IDEA) of 1990 as amended, and those enrolled in programs that require an Individualized Education Program (IEP) or an Individualized Family Service Plan (IFSP). Therapy provided solely for educational purposes (e.g., pre-academic goals such as improved attention span, catching/throwing/kicking balls, etc.) is not covered by Medicaid.

Beneficiaries receiving school-based therapy may also receive medically-based therapy services in an outpatient setting, nursing facility, or through a home health agency. If therapy is provided in more than one setting, the goals and purpose for each must be distinct.
Outpatient therapy services are provided to optimize the child’s/youth’s maximum functional performance in relation to needs in the home or community setting and must not directly duplicate those provided in the school setting. Collaboration between the school and community providers is required to coordinate therapy and prevent direct duplication of services. Documentation of the collaboration must be retained in the beneficiary’s medical record for audit purposes.

Beneficiaries receiving school-based therapy services with medically-related goals may be eligible for the continuation of services in an outpatient setting during the summer months to maintain function. Prior authorization is required if standard coverage limitations have been exceeded. (Refer to Requirements of Continued Therapy under the Prescription Requirements subsection below for additional information.)

4.2.C. AQUATIC THERAPY

Medicaid does not cover aquatic therapy as a separately reimbursable treatment or modality. A covered therapeutic procedure performed in a pool may be reimbursed when billed using the HCPCS code describing the covered procedure if the service meets all Medicaid coverage requirements.

4.2.D. GROUP THERAPY

PT is not covered by Medicaid when provided concurrently to a group of two or more individuals by the same therapist. Covered therapeutic procedures require direct (one-to-one) contact between the beneficiary and the therapist.

4.2.E. SERIAL CASTING

Serial casting is a process in which a joint(s) which lacks full range of motion is immobilized with a rigid or semi-rigid cast. During this procedure, the affected joint(s) is gradually and progressively set in a more anatomically correct alignment to improve joint alignment, increase muscle length, or to achieve a decrease in abnormal tone, resulting in an increase in the range of motion.

Casts are applied and removed in succession, usually every week, until full range of motion, flexibility, or plateau is reached. Upon removal of each cast, the limb is stretched, and a new cast is applied to hold the limb in place.

Serial casting is a covered benefit when performed by, or under the direct supervision of, a qualified therapist and defined in a treatment plan as a medically necessary therapy service for improving range of motion or reducing abnormal tone. The referral for therapy services must specifically indicate that the beneficiary is being referred for serial casting, or the prescribing provider must provide written concurrence, via signature, of any treatment plan that includes serial casting.

4.2.F. PRESCRIPTION REQUIREMENTS

Outpatient and private practice therapy requires a prescription from a physician or other licensed practitioner practicing within their scope of practice as defined in State law for
physical therapy. Home health and nursing facility therapy require a prescription from a physician for physical therapy.

A treatment plan meeting all of the requirements below is considered a prescription. The prescription/treatment plan must contain all the following:

- Beneficiary's name;
- Beneficiary's date of birth;
- Prescribing practitioner’s name, address, and telephone number;
- Prescribing practitioner’s signature;
- The date the prescription was written;
- The frequency and duration of the therapy services; and
- Diagnosis.

A copy of the prescription must be retained in the beneficiary’s medical record. A prescription is valid for 90 days from the date that the prescription was written unless the termination date is otherwise stated by the authorized prescribing practitioner on the prescription.

If the beneficiary has another insurance plan (e.g. Medicare or commercial insurance) and the service is a covered benefit, the provider must follow the requirements of the other insurance plan(s), including but not limited to, prescription, prior authorization, and provider qualifications. (Refer to the Coordination of Benefits chapter for more information.)
### Evaluations/Re-evaluations
An evaluation is formalized testing at the initiation of the beneficiary’s treatment plan. Evaluations may be provided up to two times in a 365-day period. Objective and periodic re-evaluations and reports are utilized to determine the measurable functional change resulting from the treatment plan. Re-evaluations may be provided up to two times in a 365-day period. Prior authorization is required if an evaluation or re-evaluation is needed more frequently. An evaluation/re-evaluation is required for the initiation of therapy and continued therapy.

PT evaluations/re-evaluations must be completed and signed by the physical therapist and include all the following:

- Standardized tests and/or objective functional baseline measures to establish short- and long-term goals and to document progress;
- Corresponding baseline measures for all short-and long-term goals;
- Treatment diagnosis(es);
- Medical diagnosis(es), if different from treatment diagnosis;
- Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable;
- Medical history as it relates to the current course of therapy;
- The beneficiary's current functional status (functional baseline);
- Assessment of the beneficiary’s performance components (e.g., strength, dexterity, range of motion, sensation, perception, muscle tone, etc.) directly affecting the beneficiary’s ability to function or make progress toward goals; and
- Assessment of the beneficiary’s cognitive skill level (e.g., ability to follow directions, including auditory and visual comprehension).

### Treatment Plan/Plan of Care
The PT treatment plan that results from the evaluation must be medically necessary, signed by the physical therapist, and include all the following:

- Time-related short-term goals that are measurable, functional, and significant to the beneficiary's function or mobility;
- Long-term goals that are measurable, functional, and identify specific maximum functional achievement for the requested authorization period;
- Functional outcome measures specific to maximum functional achievement for the current course of therapy (up to 12 consecutive months);
- Anticipated type, frequency, and duration of therapy required to meet short- and long-term goals;
- Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable;
- Plan for discharge from service; and
- Signature of the prescribing practitioner confirming agreement with the treatment plan.

A treatment plan, including all the criteria established above, must be submitted with the prior authorization request.
| **Initiation of Services** | PT may be initiated upon completion of the evaluation (current within 12 months) and development of a treatment plan that is medically necessary as documented in the beneficiary’s medical record. The initiation of therapy services may begin if all the following have been met:
- The beneficiary is Medicaid-eligible;
- A copy of the signed and dated (no more than 90 days prior to the initiation of services) prescription for physical therapy is retained in the beneficiary’s medical record;
- The standard coverage limitations have not been exceeded;
- Therapy is provided by the evaluating discipline (e.g., occupational therapist cannot provide treatment under a physical therapist’s evaluation); and
- There is a change in medical status resulting in decreased mobility skills or functional ability. |
| **Requirements of Continued Therapy** | The physical therapist must request prior authorization to continue therapy beyond standard coverage limitations, even if the beneficiary changes providers. A copy of the latest evaluation/re-evaluation (completed no more than 12 months prior to the authorization request) must be submitted with the prior authorization request.

Requests for continued therapy must be supported by all the following:
- Summary of previous treatment period (not to exceed the 90 days prior to that period for which prior authorization is being requested), including measurable progress on each short- and long-term goal, rate of progress, a statement of the beneficiary’s response to treatment, and any factors that have affected progress during the therapy period. Do not send daily treatment notes;
- Revised goals and justification for any change in the treatment plan for the requested period of therapy;
- Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable;
- Statement detailing any family/caregiver services being provided in a maintenance program, if appropriate;
- A copy of the prescription indicating the date range of the requested treatment period must be provided with each prior authorization request. The prescription must meet all the requirements established in this subsection. A treatment plan meeting all the prescription requirements is considered a prescription; and
- The anticipated plan of discharge for the current course of therapy (up to 12 months). If more than 12 months of therapy is anticipated, a new course of therapy with a new evaluation/re-evaluation and treatment plan is required. |
### Maintenance Visits

The skills of a physical therapist may be required for training, review of previously achieved skills, monitoring of a maintenance program being carried out by family or caregivers, or continued follow-up for the fit and function of orthotic, prosthetic, or assistive technology devices. Maintenance visits in an outpatient or nursing facility setting may be provided up to four times per 90-consecutive day period. If more than four maintenance visits are required in a 90-consecutive day period, the therapist must request prior authorization. Maintenance visits in a home setting may be provided up to four times per 60-consecutive day period. If more than four maintenance visits are required in a 60-consecutive day period, the therapist must request prior authorization.

The physical therapist must complete the MSA-115 or FFS DDE plus MSA-115 prior authorization request, and include all the following:

- Summary of previous treatment period, including measurable progress on each short- and long-term goal. This must include the treating physical therapist’s analysis of the therapy, rate of progress, and justification for any change in the treatment plan. Documentation must relate to the 90-day period immediately prior to that period for which prior authorization is being requested;
- A statement of the beneficiary’s response to treatment, including factors that have affected progress during the therapy period;
- A copy or description of the maintenance program;
- A statement detailing the reason(s) additional maintenance visits are medically necessary;
- Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable;
- The anticipated frequency and duration of the maintenance visits;
- The anticipated plan of discharge for the current course of therapy (up to 12 consecutive months);
- A treatment plan signed by the prescribing practitioner that includes all the criteria established under Treatment Plan/Plan of Care (above).

### 4.2.G. DISCHARGE SUMMARY

MDHHS requires the physical therapist to document a discharge summary to identify the completion of PT services and the discharge status. The discharge summary must be retained in the beneficiary’s medical record and include all the following:

- Dates of service (i.e., initial and discharge dates);
- Description of therapy services provided;
- Functional status at discharge related to treatment areas/goals/maximum functional potential over the course of therapy;
- Analysis of the effectiveness of the therapy program, including reasons for goals not met or changes in the treatment plan necessitated by changes in medical status;
- A copy or description of the maintenance program, if appropriate;
- Identification of assistive technology devices (e.g., walker) and its current utilization, if appropriate; and
Recommendations/referral to other services, if appropriate.

4.2.H. SUPPLIES AND EQUIPMENT

MDHHS does not allow separate reimbursement for supplies and equipment used as part of a therapy treatment or for trials/training in the use of complex durable medical equipment when required to establish competency for a prior authorization request. The cost of supplies and equipment used are included in the reimbursement for the therapy.

4.3 SPEECH-LANGUAGE THERAPY

MDHHS uses the terms speech therapy, SLP, speech-language pathology, speech-language therapy (ST), and therapy to mean speech and language services and speech-language therapy. Speech-language therapy is covered when furnished by a Medicaid-enrolled therapy provider and the documentation is signed by the treating therapist. Medicaid reimburses services for speech-language therapy when provided by any of the following:

- A speech-language pathologist with a current license and who is authorized by ASHA to use Certificate of Clinical Competence in Speech-Language Pathology (CCC-SLP) credentials.
- An appropriately supervised speech-language pathologist candidate (i.e., in their clinical fellowship year) or having completed all requirements but has not obtained a license. All documentation must be reviewed and co-signed by the appropriately credentialed supervising speech-language pathologist.
- A student completing their clinical affiliation under the direct supervision of (i.e., in the presence of) a licensed speech-language pathologist. All documentation must be reviewed and co-signed by the appropriately credentialed supervising speech-language pathologist.

ST is considered an all-inclusive charge. Medicaid does not reimburse for a clinic room charge in addition to therapy services unless the room charges are unrelated. MDHHS expects speech-language pathologists to utilize the most ethically appropriate therapy within their scope of practice as defined by state law or the appropriate national professional association. ST must be medically necessary, related to a medical diagnosis, reasonable, and required to achieve one or more of the following:

- Return the beneficiary to the functional level prior to illness or disability;
- Return the beneficiary to a functional level that is appropriate to a stable medical status; and
- Prevent a reduction in medical or functional status had the therapy not been provided.

Speech-Language therapy is limited to services for:

- Articulation
- Language
- Fluency
- Oral function (including swallowing, oral and/or pharyngeal dysphagia, and increasing nutrition/hydration)
- Training in the use of a speech-generating device (SGD)/Augmentative and Alternative Communication (AAC) device/Augmentative Communication Device (ACD)
- Evaluation and instruction in the use of an oral-pharyngeal prosthesis
- Voice
- Rehabilitation of executive skills function status post neurological insult (examples may include reasoning, decision making, judgement, and language)
- Audiologic/Aural Rehabilitation

Speech-Language Therapies (ST) provided to nursing facility beneficiaries outside the nursing facility premises must be provided in the outpatient department of a general hospital or medical care facility.

Therapies provided to county medical care facility, hospital long term care unit, or hospital swing bed beneficiaries outside their respective facilities must be provided in the outpatient department of a general hospital.

Medicaid standard coverage allows the following:

<table>
<thead>
<tr>
<th>Outpatient/Private Practice Speech-Language Therapy</th>
<th>Nursing Facility Speech-Language Therapy</th>
<th>Home Health Speech-Language Therapy</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Up to 36 visits of ST per calendar year period.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>• Prior authorization is required for treatment that exceeds this unit limitation.</td>
<td>• Prior authorization is required.</td>
<td>• Home Health ST is covered for CSHCS beneficiaries only.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Prior authorization is required.</td>
</tr>
</tbody>
</table>

ST is expected to result in a measurable improvement that is significant to the beneficiary’s ability to demonstrate communication and/or oral motor function appropriate to his/her chronological, developmental, cognitive, or functional status. Functional improvements must be achieved in a reasonable, and generally predictable, amount of time as specified in the short- and long-term goals identified on the evaluation/re-evaluation and treatment plan. Functional improvements must be maintainable. Medicaid does not cover therapy if the beneficiary’s maximum functional potential has been realized, the beneficiary has plateaued, or the therapy has no impact on the beneficiary’s ability to perform age-appropriate tasks. However, medically necessary habilitative therapy services may be covered under EPSDT or Healthy Michigan Plan.

Medicaid only covers ST services that require the skills, knowledge, and education of a speech-language pathologist. MDHHS does not cover interventions provided by another practitioner or caregiver (e.g., registered nurse, licensed physical therapist, family member, teacher, etc.).
Speech-Language therapy that is related to a medical diagnosis may be covered for one or more of the following:

- It is expected to result in the restoration or amelioration of the beneficiary’s ability to communicate wants, needs, and desires to their previous level of function following illness or injury.
- A temporary condition that results in decreased comprehension and expression, fluency, and/or oral function.
- Training to improve articulation.
- Training to improve receptive and expressive language.
- Training to improve fluency.
- Training to improve oral and/or pharyngeal phases of swallowing.
- Training in the use of a SGD/AAC/ACD device.
- Training in the use of an oral-pharyngeal prosthesis.
- Training in voice disorders.
- Training in the use of compensatory communication strategies.
- Training in restoration of executive skill functions.
- Skilled services that are designed to develop, train, monitor, and modify a maintenance program to be carried out by family or caregivers.
- Federal EPSDT regulations require coverage of medically necessary treatment for beneficiaries under 21 years of age, including medically necessary habilitative therapy services. (Refer to the Early and Periodic Screening, Diagnosis and Treatment chapter for additional information.)
Speech-Language therapy is not covered for the following:

- If provided solely for educational, vocational, social/emotional, or recreational purposes.
- If therapy services are required to be provided by another public agency (e.g., community mental health services provider, school-based services, etc.).
- If a therapy service requires prior authorization and the service is rendered before prior authorization is approved.
- Habilitative therapy designed to facilitate the normal progression of development without compensatory techniques or processes. (Refer to the Early and Periodic Screening, Diagnosis and Treatment and the Healthy Michigan Plan chapters for coverage exceptions.).
- If therapy is rote practice of achieved skills.
- Feeding for a beneficiary whose status is NPO, with physician orders to continue NPO, and who does not demonstrate the potential to improve oral and/or pharyngeal phases of swallowing (i.e., pleasure eating).
- Non-diagnostic, non-therapeutic, routine, or repetitive tasks without skilled feedback (e.g., sitting with a beneficiary needing prompting to swallow or take small bites which does not require the skills of a therapist, etc.).
- Continuation of therapy that is maintenance in nature, except as described under Maintenance Visits in the Prescription Requirements subsection (below).
- If Medicare determines the service is not medically necessary.
- Additionally for nursing facility beneficiaries:
  - Therapy provided by a physician (MD or DO) is not a covered benefit for beneficiaries in a nursing facility.
  - Services covered by the facility's per diem rate including routine maintenance and the development of the therapy and treatment.

4.3.A. DUPLICATION OF SERVICES

Medicaid does not cover two disciplines working concurrently on similar goals/areas (e.g., dysphagia, assistive technology, etc.). Collaboration between treating therapists is required to coordinate therapy and prevent duplication of services. Documentation of the collaboration must be retained in the beneficiary’s medical record for audit purposes.

4.3.B. ACCESS TO SERVICES FOR SCHOOL-AGED BENEFICIARIES

School-based therapy services are covered by Medicaid when they assist a child/youth with a disability to benefit from special education. This includes beneficiaries up to the age of 21 who are eligible under the provisions of the Individuals with Disabilities Education Act (IDEA) of 1990 as amended, and those enrolled in programs that require an Individualized Education Program (IEP) or an Individualized Family Service Plan (IFSP). Therapy provided solely for educational purposes (e.g., pre-academic goals such as improved attention span, catching/throwing/kicking balls, etc.) is not covered by Medicaid.
Beneficiaries receiving school-based therapy may also receive medically-based therapy services in an outpatient setting, nursing facility, or through a home health agency. If therapy is provided in more than one setting, the goals and purpose for each must be distinct.

Outpatient therapy services are provided to optimize the child’s/youth’s functional performance in relation to needs in the home or community setting and must not directly duplicate those provided in the school setting. Collaboration between the school and community providers is required to coordinate therapy and prevent direct duplication of services. Documentation of the collaboration must be retained in the beneficiary’s medical record for audit purposes.

Beneficiaries receiving school-based therapy services with medically-related goals may be eligible for the continuation of services in an outpatient setting during the summer months to maintain function. Prior authorization is required if standard coverage limitations have been exceeded. (Refer to Requirements of Continued Therapy under the Prescription Requirements subsection below for additional information.)

4.3.C. GROUP THERAPY

Group therapy requires documentation justifying the benefit of group therapy in addition to, or in place of, individual therapy. No more than one session of individual speech-language therapy and one session of group speech-language therapy may be provided on the same date of service. Group therapy is not covered in the home setting.

4.3.D. PRESCRIPTION REQUIREMENTS

Outpatient and private practice therapy requires a prescription from a physician or other licensed practitioner practicing within their scope of practice as defined in State law for speech-language therapy. Home health and nursing facility therapy require a prescription from a physician for speech-language therapy.

A treatment plan meeting all the requirements below is considered a prescription. The prescription/treatment plan must contain all the following:

- Beneficiary's name;
- Beneficiary's date of birth;
- Prescribing practitioner's name, address, and telephone number;
- Prescribing practitioner’s signature;
- The date the prescription was written;
- The frequency and duration of the therapy services;
- Diagnosis; and
- For swallowing or oral motor evaluation/treatment, the documentation must clearly specify allowance of trial feeds and/or oral intake during therapy. All documentation, including the prescription, current plan of care, and prior authorization, must consistently substantiate this allowance.
A copy of the prescription must be retained in the beneficiary’s medical record. A prescription is valid for 90 days from the date that the prescription was written unless the termination date is otherwise stated by the authorized prescribing practitioner on the prescription.

If the beneficiary has another insurance plan (e.g. Medicare or commercial insurance) and the service is a covered benefit, the provider must follow the requirements of the other insurance plan(s), including but not limited to, prescription, prior authorization, and provider qualifications. (Refer to the Coordination of Benefits chapter for more information.)
| Evaluations/Re-evaluations | An evaluation is formalized testing at the initiation of the beneficiary’s treatment plan. Evaluations may be provided up to two times in a 365-day period. Oral function or swallowing evaluations may be provided up to four times in a 365-day period. Objective and periodic re-evaluations and reports are utilized to determine the measurable functional change resulting from the treatment plan. Re-evaluations may be provided up to two times in a 365-day period. Prior authorization is required if an evaluation or re-evaluation is needed more frequently. An evaluation/re-evaluation is required for the initiation of therapy and continued therapy. Speech-Language therapy evaluations/re-evaluations must be completed and signed by the speech-language pathologist and include all the following: ▪ Standardized tests and/or objective functional baseline measures used to establish short- and long-term goals and to document progress; ▪ Corresponding baseline measures for all short- and long-term goals; ▪ Treatment diagnosis(es); ▪ Medical diagnosis(es), if different from treatment diagnosis; ▪ Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable; ▪ Medical history as it relates to the current course of therapy; ▪ Assessment of the beneficiary’s performance components (e.g., functional communication, receptive, expressive, articulation, fluency, voice, oral function, muscle tone, etc.) directly affecting the beneficiary’s ability to function or make progress toward goals; ▪ Assessment of the beneficiary’s cognitive skill level (e.g., ability to follow directions, including auditory and visual comprehension). Oral function/swallowing evaluations must also include: ▪ Presence/absence of coughing; ▪ History of recent respiratory illness; ▪ Current diet, documenting difficulties with food consistencies; ▪ Aversion/sensitivity during eating; ▪ Report or copy of a video fluoroscopy and any other formal testing, if available; ▪ Objective oral motor assessment addressing labial, glossal, laryngeal, and pharyngeal stages; ▪ Voice quality (i.e., pre- and post-feeding and natural voice), if applicable. |
### Treatment Plan/Plan of Care

The ST treatment plan that results from the evaluation must be medically necessary, signed by the speech-language pathologist, and include all the following:

- Time-related short-term goals that are measurable, functional, and significant to the beneficiary’s communication needs;
- Long-term goals that are measurable, functional, and identify specific maximum functional achievement for the requested authorization period;
- Functional outcome measures specific to maximum functional achievement for the current course of therapy (up to 12 consecutive months);
- Anticipated type, frequency and duration of therapy required to meet short- and long-term goals;
- Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable;
- Plan for discharge from service; and
- Signature of the prescribing practitioner confirming agreement with the treatment plan.

A treatment plan, including all the criteria established above, must be submitted with the prior authorization request.

### Initiation of Services

Speech-Language therapy may be initiated upon completion of the evaluation (current within 12 months) and development of a treatment plan that is medically necessary as documented in the beneficiary’s medical record. The initiation of therapy services may begin if all the following have been met:

- The beneficiary is Medicaid eligible;
- A copy of the signed and dated (no more than 90 days prior to the initiation of services) prescription for speech-language therapy is retained in the beneficiary’s medical record;
- The standard coverage limitations have not been exceeded;
- Therapy is provided by the evaluating discipline (e.g., an occupational therapist cannot provide treatment under a speech-language pathologist’s evaluation); and
- If there is a change in medical status resulting in decreased communication skills, oral motor skills, or functional ability.
### Requirements of Continued Therapy

The speech-language pathologist must request prior authorization to continue therapy beyond standard coverage limitations, even if the beneficiary changes providers. A copy of the latest evaluation/re-evaluation (completed no more than 12 months prior to the prior authorization request) must be submitted with the prior authorization request.

Requests for continued therapy must be supported by all the following:

- Summary of previous treatment period (not to exceed the 90 days prior to that period for which prior authorization is being requested), including measurable progress on each short- and long-term goal, rate of progress, a statement of the beneficiary’s response to treatment, and any factors that have affected progress during the therapy period. Do not send daily treatment notes.

- Revised goals and justification for any change in the treatment plan for the requested period of therapy.

- Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable.

- Statement detailing any family/caregiver services being provided in a maintenance program, if appropriate.

- A copy of the prescription indicating the date range of the requested treatment period must be submitted with each prior authorization request. The prescription must meet all the requirements established under this subsection. A treatment plan meeting all the prescription requirements is considered a prescription.

- The anticipated plan of discharge for the current course of therapy (up to 12 months). If more than 12 months of therapy is anticipated, a new course of therapy with a new evaluation/re-evaluation and treatment plan is required.
## Maintenance Visits

The skills of a speech-language pathologist may be required for training, review of previously achieved skills, monitoring of a maintenance program being carried out by family or caregivers, or continued follow-up for the fit and function of orthotic, prosthetic, or assistive technology devices. Maintenance visits in an outpatient or nursing facility setting may be provided up to four times per 90-consecutive day period. If more than four maintenance visits are required in a 90-consecutive day period, the speech-language pathologist must request prior authorization. Maintenance visits in a home setting may be provided up to four times per 60-consecutive day period. If more than four maintenance visits are required in a 60-consecutive day period, the speech-language pathologist must request prior authorization.

The speech-language pathologist must complete the MSA-115 or FFS DDE plus MSA-115 prior authorization request, and include all the following:

- Summary of previous treatment period, including measurable progress on each short- and long-term goal. The summary must include the treating speech-language pathologist’s analysis of the therapy, rate of progress, and justification for any change in the treatment plan. Documentation must relate to the 90-consecutive day period immediately prior to that period for which prior authorization is being requested.
- A statement of the beneficiary’s response to treatment, including factors that have affected progress during the therapy period.
- A copy or description of the maintenance program.
- A statement detailing the reason(s) additional maintenance visits are medically necessary.
- Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable.
- The anticipated frequency and duration of the maintenance visits.
- The anticipated discharge plan for the current course of therapy (up to 12 consecutive months).
- A treatment plan signed by the prescribing practitioner that includes all the criteria established under Treatment Plan/Plan of Care (above).

## 4.3.E. DISCHARGE SUMMARY

MDHHS requires the speech-language pathologist to document a discharge summary to identify the completion of speech-language therapy services and the discharge status. The discharge summary must be retained in the beneficiary’s medical record and include all the following:

- Dates of service (i.e., initial and discharge dates);
- Description of therapy services provided;
- Functional status at discharge related to treatment areas/goals/maximum functional achievement over course of therapy;
- Analysis of the effectiveness of the therapy program, including reasons for goals not met or changes in the treatment plan necessitated by changes in medical status;
- A copy or description of the maintenance program, if appropriate;
Identification of assistive technology devices provided (e.g., SGD/AAC, switches) and its current utilization, if appropriate; and

Recommendations/referrals to other services, if appropriate.

4.3.F. SUPPLIES AND EQUIPMENT

MDHHS does not allow separate reimbursement for supplies and equipment used as part of a therapy treatment or for trials/training in the use of complex durable medical equipment when required to establish competency for a prior authorization request. The cost of supplies and equipment used are included in the reimbursement for the therapy. Refer to the Speech Generating Devices subsection of the Medical Supplier Chapter for additional information regarding SGDs, including trial periods.

4.3.G. EVALUATIONS AND FOLLOW-UP FOR SPEECH-GENERATING DEVICES/VOICE PROSTHESES

An evaluation by the speech-language pathologist for recommendation of a SGD may be billed once in three years. Prior authorization is required for evaluations exceeding standard coverage limitations. The results of this evaluation must be shared with the provider submitting the SGD prior authorization request.

SGD set-up, programming, and modification services that require the skills of a speech-language pathologist (beyond those provided by the SGD vendor) may be billed up to two times per year.

Prior authorization is required for all SGDs. The Special Services Prior Approval-Request/Authorization form (MSA-1653-B) must be submitted for all original, replacement, upgrade, or repair of SGDs. (Refer to the Forms Appendix for additional information.)

Refer to the Speech Generating Devices subsection of the Medical Supplier Chapter for additional information regarding SGDs.

An evaluation for the use and/or fitting of a voice prosthetic device to supplement oral speech may be billed only if the evaluation was done to determine the need for an electro-larynx. The evaluation may be provided once in three years.

</table>
SECTION 1 – GENERAL INFORMATION

Under the Indian Self-Determination and Education Assistance Act (Public Law 93-638), tribal facilities, including Tribal Health Centers (THCs), are those owned and operated by American Indian/Alaska Native tribes and tribal organizations under contract or compact with the Indian Health Service (IHS).

The Michigan Department of Health and Human Services (MDHHS), which administers the State Medicaid Agency (SMA), has the authority to enter into reimbursement agreements with THCs to establish a payment mechanism for Medicaid beneficiaries receiving outpatient services through a THC.

Under the Michigan Medicaid State Plan, THCs have the option of choosing from one of three reimbursement mechanisms. The THC may elect to be reimbursed under only one of the options listed below, and the selected option applies to all beneficiaries receiving services at the THC. The options are:

- A THC may choose to be certified as an IHS facility and receive the IHS outpatient all-inclusive rate (AIR) for eligible encounters. The AIR applies to encounters for both native and non-native Medicaid beneficiaries. THCs are reimbursed at the AIR unless the THC chooses a different payment option and informs MDHHS of this choice in writing.
- If a THC chooses to be reimbursed as a FQHC, the entity would be required to adhere to the same requirements specified in the Federally Qualified Health Centers Chapter.
- A THC may be reimbursed as a fee-for-service provider. THCs choosing this option receive payment for covered services. No additional reimbursement or settlement is made.

Upon federal approval by the Health Resources and Services Administration, THCs may be reimbursed as a Federally Qualified Health Center (FQHC) by signing the FQHC Memorandum of Understanding (MOU). THCs choosing this option will receive the FQHC encounter rate set by the State in accordance with the Michigan Medicaid State Plan and federal regulations. The FQHC encounter rate applies to encounters for both native and non-native Medicaid beneficiaries. A THC electing to be reimbursed as an FQHC is not required to have a contract with the managed care entity.
SECTION 2 – MEDICAID ENROLLMENT

2.1 PROVIDER ENROLLMENT

MDHHS requires all THCs to have a Group (Type 2 - Organization) National Provider Identification (NPI) number in order to receive the enhanced THC reimbursement. For THCs with multiple locations and multiple rates, an NPI number for each location may be necessary so that the proper reimbursement rate of all encounters can be determined. If the THC fails to obtain and/or use the correct NPI number, the THC reimbursement will be determined under fee for service rules. The NPI number must be reported to MDHHS before billing Medicaid services.

Individual providers (doctors, dentists, optometrists, etc.) are required to obtain a Provider (Type 1 - Individual) NPI number and report the number to MDHHS.

2.1.A. NON-PHYSICIAN BEHAVIORAL HEALTH SERVICES

Licensed psychologists (Master’s Limited or Doctoral level), social workers (Master’s level), professional counselors (Master’s or Doctoral level), and marriage and family therapists who serve Medicaid beneficiaries are required to enroll as Medicaid providers. Services must be billed using the appropriate evaluation and management (E/M) codes listed in the American Medical Association’s Current Procedural Terminology (CPT) Book or Healthcare Common Procedure Coding System (HCPCS) codes. Providers should refer to the Non-Physician Behavioral Health provider database on the MDHHS website for the current list of covered procedure codes. The list of allowable services is reviewed annually and updated as applicable. Refer to the Additional Code/Coverage Resource Materials Section of the General Information for Providers Chapter for additional information regarding coverage parameters.

2.2 NONENROLLED PROVIDERS

Professional services performed by limited licensed psychologists (except as noted in Section 333.18223 of the Public Health Code), social workers, professional counselors, marriage and family therapists or student interns must be performed under the supervision of an enrolled, fully-licensed provider of the same profession. Since MDHHS does not directly enroll these providers, claims for their services must be billed using the NPI of the supervising provider responsible for ensuring the medical necessity and appropriateness of the services. Claims submitted with the non-enrolled provider’s NPI in the rendering provider field will reject.
SECTION 3 – BENEFITS

3.1 COVERED SERVICES

THC services are reimbursed at the current Medicaid fee screens and reconciled annually, if applicable, for services provided to Medicaid fee-for-service (FFS) or managed care beneficiaries. THC Medicaid services include:

- Physician (MD, DO) services
- Podiatrist (DPM) services
- Chiropractor (DC) services
- Optometrist (OD) services
- Dental (DDS) services
- Certified nurse practitioner (CNP) services
- Certified nurse midwife (CNM) services
- Physician assistant (PA) services

Services and supplies incident to the services rendered by the provider:

- Pharmacy services administered by the provider and billed under the provider’s NPI number
- Laboratory services billed under the provider’s NPI number
- Diagnostic services billed under the provider’s NPI number
- Therapies (i.e., Occupational, Physical, and Speech, Hearing, and Language Evaluation and Therapy) rendered under the physician’s NPI number

The services listed may be modified in accordance with benefits covered under the Medicaid State Plan. MDHHS notifies providers of changes (additions/deletions) in Medicaid covered services through the Medicaid bulletin process. Providers should refer to these documents to verify that benefits are covered prior to rendering services.

For clarification of covered services:

</table>
| **Maternal Infant Health Program (MIHP)** | THCs providing Maternal Infant Health Program (MIHP) services must be certified through MDHHS. Information specific to the coverages and limitations for MIHP services are detailed in the Maternal Infant Health Program Chapter of this manual. MIHP related services rendered to fee-for-service beneficiaries must be billed on the ASC X12N 837 5010 professional format. Refer to the Billing & Reimbursement for Professionals Chapter of this manual for specific billing guidelines.

If the THC subcontracts any MIHP services, no duplicate billing is permitted. |
| **Physician’s Assistant** | Physician’s assistant services must comply with coverages and limitations published in the Practitioner Chapter of this manual and in MDHHS Bulletins. |
| **Pharmacy Services** | Pharmacy services billed under the practitioner NPI number are included in the encounter rate but do not constitute a separate encounter as they are considered part of the office visit.

Practitioner pharmacy services do not include drugs provided by a pharmacy. THCs with enrolled pharmacy providers may continue to bill prescription claims to the MDHHS Pharmacy Benefits Manager (PBM).

Medication Therapy Management (MTM) services are face-to-face consultations provided by pharmacists to optimize drug therapy and improve therapeutic outcomes for beneficiaries. MTM services provided according to Medicaid policy may be eligible to receive the encounter rate. (Refer to the Pharmacy Chapter of this manual for additional information.)

MDHHS contracts with a PBM for processing of all fee-for-service (FFS) pharmacy claims for Medicaid. (Refer to the Pharmacy Chapter of this manual for an explanation of coverages and limitations.) |
| **Laboratory Services** | The Practitioner Chapter of this manual explains the coverages and limitations of the Medicaid laboratory benefit. Laboratory services billed under the practitioner’s NPI number are included in the THC encounter rate but do not constitute a separate encounter for reimbursement purposes as they are considered part of the office visit.

THCs cannot bill for any services rendered by an outside laboratory provider or for an outside laboratory’s employees performing tests. |
| **Diagnostic Services** | Diagnostic testing performed as part of an office visit must be directly related to the presenting condition and substantiated in the medical records. (Refer to the Billing & Reimbursement for Professionals Chapter of this manual for billing information.)

Diagnostic testing services do not constitute a separate encounter. These services are regarded as part of the office visit and are included in the encounter reimbursement. Examples of diagnostic tests are allergy testing, audiologic function tests, x-rays, and EKGs. |
| **Telemedicine** | A THC can be either an originating or distant site for telemedicine services. Refer to the Billing & Reimbursement for Institutional Providers Chapter for specific billing instructions. Refer to the Telemedicine Section of the Practitioner Chapter for additional information regarding telemedicine services.

Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters. |
Therapies

Physical therapy, speech therapy, and occupational therapy are covered when performed at the THCs. Refer to the appropriate chapter of this manual and MDHHS Bulletins for an explanation of current coverages and limitations. The Billing & Reimbursement for Professionals Chapter of this manual describes the billing requirements for services provided. Therapies provided on the same date of service as a physician visit are included in the encounter reimbursement.

3.2 DENTAL COVERAGES AND LIMITATIONS

THC dental services are covered if provided in the THC and must comply with coverages and limitations for dental services as specified in the Dental Chapter of this manual. Dental benefits covered for beneficiaries under the age of 21 differ from those covered for beneficiaries age 21 and over.

Information for billing dental services is published in the Billing & Reimbursement for Dental Providers Chapter of this manual.

MDHHS contracts with Dental Health Plans (DHPs) for the administration of dental services for Healthy Kids Dental (HKD) beneficiaries. Claims for services provided to beneficiaries enrolled in the HKD program should be submitted to the beneficiary’s DHP. Payment is made based on the DHP fee schedule. No additional reimbursement is made by MDHHS.

(Refer to the Directory Appendix for DHP contact information.)

3.3 VISION COVERAGES AND LIMITATIONS

Vision services are covered if provided at the THC. Vision providers are ophthalmologists and optometrists. The vision services provided by an ophthalmologist or optometrist must comply with coverages and limitations published in the Vision Chapter of this manual.

MDHHS contracts for the volume purchase of frames and lenses from an optical house. Frames and lenses covered by the program must be ordered through the contractor and are listed in the Vision Chapter of this manual.

Some vision services require prior authorization (PA) before they can be rendered. The Vision Services Approval/Order Form (DCH-0893) is used to obtain PA. (Refer to the Vision Chapter for information on services that require PA and to the Forms Appendix for a copy of the form.)

3.4 SERVICES PROVIDED TO MEDICAID HEALTH PLAN ENROLLEES

For Medicaid-covered services provided to Medicaid beneficiaries enrolled in a Medicaid Health Plan (MHP), THCs receive payment from the MHP based on an agreement or contract with the MHP. In the absence of an agreement or contract, payment is based on the Medicaid fee-for-service (FFS) rates in effect on the date of service (DOS). Approved services provided to MHP enrollees are then recognized as encounters.

3.5 MEDICARE AND MEDICAID BENEFICIARIES

For dually eligible Medicare and Medicaid beneficiaries, Medicaid reimburses coinsurance and deductible amounts on Medicare-approved claims up to Medicare’s IHS encounter rate.
SECTION 4 — SUBSTANCE ABUSE

Outpatient substance abuse services provided by physicians, clinical social workers, clinical psychologists, and substance abuse treatment specialists are reimbursed. These services may include:

- Initial complete physical
- Medical history
- Social history
- Psychiatric history
- Individual, family, and group counseling
- Outpatient substance abuse treatment
- Intensive outpatient counseling
- Therapies (i.e., Psychiatric occupational/recreational therapy) in a Tribal-operated substance abuse treatment center are covered services provided they are active, restorative, and designed to prevent, correct, or compensate for a specific medical problem.
- Methadone

4.1 REQUIREMENTS FOR PARTICIPATION

All programs must meet the following criteria to bill Medicaid for services:

- Licensed by the state licensing agency to provide each type of substance abuse service; and
- Accredited as an alcohol and/or drug abuse program by one of the five national accreditation bodies:
  - The Joint Commission
  - Commission on Accreditation of Rehabilitation Facilities (CARF)
  - American Osteopathic Association (AOA)
  - Council on Accreditation of Services for Families and Children (CASFC)
  - National Committee on Quality Assurance (NCQA)

4.2 AUTHORIZATION

Services provided at the THC to American Indian and Alaska Native beneficiaries do not require the authorization of the regional Prepaid Inpatient Health Plan (PIHP).

4.3 AMERICAN INDIAN AND ALASKA NATIVE SERVICES

American Indians and Alaska Natives who are Medicaid beneficiaries can obtain substance abuse services directly from the THC. These services are not included in the MDHHS §1915(b) Managed Specialty Services and Supports Waiver for PIHPs and substance use disorder services. THCs should contact their regional PIHP to determine the appropriate process for accessing other funding sources or other service providers for those individuals requiring substance abuse services not covered by the THC.
4.4 SERVICES PROVIDED TO NON-AMERICAN INDIANS AND ALASKA NATIVES

The MDHHS Prepaid Inpatient Health Plan (PIHP) for Specialty Developmental Disabilities, Mental Health and Substance Abuse services assumes responsibility for certifying admission/continuing stays and reimbursing claims for the specialized substance abuse services of non-American Indians and Alaska Natives. Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter of this manual for further information on PIHPs, Mental Health and Substance Abuse Services. Substance abuse services for non-American Indians and Alaska Natives must not be billed under CPT and HCPCS codes.

4.5 SERVICE LIMITS

THCs may exceed the substance abuse treatment limits for American Indian and Alaska Native beneficiaries as long as the medical record and plan of care documents the medical necessity.

4.6 NONCOVERED SERVICES

The following substance abuse services are not covered when provided through THCs:

- Emergency and non-emergency transportation
- Initial emergency screening and medical stabilization
- Acute medical detoxification services
- Medications prescribed in the management or treatment of methadone
- Room and Board
SECTION 5 – MENTAL HEALTH

Outpatient mental health services provided by physicians, clinical social workers, and clinical psychologists are covered. These services may include:

- Health assessment
- Psychiatric evaluation
- Psychological testing
- All other assessments and testing
- Case management
- Child therapy
- Crisis interventions
- Crisis residential services
- Intensive crisis stabilization services
- Individual psychotherapy
- Family psychotherapy
- Group psychotherapy
- Interpretation or explanation of data to family
- Medication administration
- Medication review
- Therapies (i.e., psychiatric occupational/recreational therapy) in a mental health treatment center are a covered service provided they are active, restorative, and designed to prevent, correct, or compensate for a specific medical problem.

5.1 NONENROLLED PROVIDERS

Professional services provided by limited licensed psychologists (except as noted in Section 333.18223 of the Public Health Code), social workers, professional counselors, marriage and family therapists or student interns are covered but must be performed under the supervision of an enrolled, fully-licensed provider of the same profession. Individuals who meet Michigan licensure/certification requirements for social workers and psychologists may provide services.

5.2 AUTHORIZATION

Mental health services provided at the THC to American Indian and Alaska Native beneficiaries do not require the authorization of PIHPs/CMHSPs.
5.3 AMERICAN INDIAN AND ALASKA NATIVE SERVICES

American Indians and Alaska Natives who are Medicaid beneficiaries can obtain mental health services directly from the THC. THC services are not included in the MDHHS §1915(b) Managed Specialty Services and Supports Waiver for PIHPs and substance use disorder services. THCs may refer tribal members to the PIHP/CMHSP for mental health services not provided at the THC.

5.4 NON-AMERICAN INDIAN SERVICES

PIHPs/CMHSPs assume responsibility for community-based mental health and developmental disability services covered through Medicaid for non-American Indians. Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter of this manual for policies and procedures. Non-American Indian mental health services must not be billed under CPT or HCPCS codes.

5.5 NONCOVERED SERVICES

Mental Health services that are not the responsibility of the THC are as follows:

- Home-based mental health services
- Nursing facility (NF) mental health monitoring
- Emergency and non-emergency transportation
SECTION 6 — ENCOUNTERS

THCs are eligible to receive an encounter (per visit) rate as reimbursement for Medicaid covered services provided at the THC for native and non-native Medicaid beneficiaries.

The IHS outpatient all-inclusive rate (AIR) is determined by the Centers for Medicare & Medicaid Services (CMS) and is published in the Federal Register. The FQHC encounter rate under the FQHC MOU is an alternative methodology that was based on the prospective payment system (PPS) outlined in section 1902(bb) of the Social Security Act.

6.1 DEFINITION

An encounter is a face-to-face visit between a Medicaid beneficiary and the THC provider of health care services who exercises independent judgment in the provision of Medicaid-covered services. The THC provider may be credited with no more than one face-to-face encounter with a given beneficiary per day, except when the beneficiary, after the first encounter, suffers a separate or different illness or injury requiring additional diagnosis or treatment.

For a service to be defined as an encounter, the Medicaid-covered service must be recorded in the patient’s record.

6.2 SERVICES BUNDLED IN THE ENCOUNTER

Ancillary Medicaid services (e.g., labs, x-rays, injections, etc.) are included in the per visit encounter. These ancillary services are described as being provided incident to the office visit. For example, lab services billed under the physician’s NPI number would not be considered a separate encounter.

Ancillary services provided at another facility are not bundled under the office visit encounter. For example, services provided by the local hospital are not included in the encounter.
SECTION 7 – BILLING

The Group (Type 2 - Organization) NPI number must be used as the billing provider on all electronic and paper claims submitted to Medicaid. Do not use Provider (Type 1 - Individual) as the billing provider. The billing provider loop or field is mandatory to complete.

The NPI (Type 1 – Individual) number is the individual who has overall responsibility for the patient’s medical care and treatment reported in the claim or encounter. The attending provider field is mandatory to complete. Additionally, the NPI (Type 1 – Individual) number of the practitioner who performed the service should be entered as the rendering provider. Do not enter a Group (Type 2) NPI number as the attending or rendering provider.

MDHHS will use the billing provider NPI field (Type 2 - Organization) to determine the number of encounters and calculate the settlement for the year-end reconciliation.

7.1 OTHER INSURANCE

Billing instructions related to coordination of benefits are published in the Coordination of Benefits Chapter of this manual. Other insurance and all other payments received for services rendered to a Medicaid beneficiary must be reported. If payment received from other insurance exceeds the amount Medicaid would have paid, the THC must still submit a claim to Medicaid with the appropriate procedure code in order for the visit to be counted as an encounter.

7.2 MEDICARE AND MEDICAID CLAIMS

Refer to the Billing & Reimbursement Chapters of this manual for specific instructions regarding Medicare and Medicaid claims. If the Medicare payment exceeds the Medicaid fee screen, the appropriate procedure code should still be billed to Medicaid for encounter and reconciliation purposes.

7.3 PAYER OF LAST RESORT

The IHS is the payer of last resort for persons defined as eligible for contract health services under the regulations in 42 CFR, Part 36a, Subpart G, Section 36.61, notwithstanding any State or local law or regulation to the contrary.

7.4 COPAYMENTS

Medicaid copayments for chiropractic, dental, physician, podiatry and vision services are waived under the THC benefit as part of the reconciliation. (Refer to the General Information for Providers chapter for a list of services requiring copayments.)

Refer to the Billing Beneficiaries Section of the General Information for Providers Chapter of this manual for additional information regarding copayment requirements. Beneficiaries may not be denied care or services based on inability to pay a copayment, except as outlined in that section.
7.5 **Timely Filing Billing Limitation**

The same timely filing billing limitations explained in the General Information for Providers Chapter of this manual pertain to encounters as well as claim submission.

7.6 **Place of Service**

Place of service codes are not applicable to institutional billing. However, if the THC performs a service that must be billed on the professional claim form within the clinic, THCs must use place of service (POS) code 07. For services provided outside the THC, bill with the appropriate POS code noted in the Billing & Reimbursement for Professionals Chapter of this manual.

THC services provided to beneficiaries at the THC are reconciled annually, if applicable.

The THC may bill for covered services that are not provided at the THC. These services must be billed with the appropriate Place of Service (POS) code in compliance with the coverages and limitations specified in the Practitioner Chapter of this manual. A complete list of POS codes can be found in the Billing & Reimbursement for Professionals Chapter of this manual.

Services billed to Medicaid are subject to audit and verifications.
SECTION 8 – MEDICAID PAYMENTS, ANNUAL RECONCILIATION AND APPEALS

8.1 QUARTERLY PAYMENTS

Quarterly payments are made to the THC at the beginning of each quarter. The payment is based on an estimate of the difference between the amount the THC receives for Medicaid services from FFS claims, managed care encounters, and other third party payments (including Medicare) during the year and the amount due the center based on the THC encounter rate.

8.2 INITIAL RECONCILIATION AND SETTLEMENT

An annual reconciliation, if applicable, ensures that reimbursement is made according to the payment option selected by the THC. The initial reconciliation and settlement is calculated approximately six months after the THC’s fiscal year end. The number of encounters is determined from Medicaid fee-for-service (FFS) and managed care approved claims. Any difference between the THC rate and the amount paid to the THC from FFS and managed care payments, other insurance and quarterly payments is paid to or recovered from the THC. Future quarterly payments are adjusted based on the information in the initial reconciliation.

8.3 FINAL RECONCILIATION AND SETTLEMENT

A final reconciliation and settlement is calculated approximately one year after the THC’s fiscal year end. This will allow time for all claims to clear the payment system.

8.4 APPEALS

A Medicaid provider has the right to appeal any adverse action taken by MDHHS unless that adverse action resulted from an action over which MDHHS had no control (e.g., Medicare termination, license revocation). The appeals process is outlined in MDHHS Medicaid Provider Reviews and Hearings rules, Michigan Administrative Code R400.3402 through R400.3425, amended, and filed with the Secretary of State on May 19, 2016. Any questions regarding this appeal process should be directed to the Michigan Administrative Hearing System (MAHS). (Refer to the Directory Appendix for contact information.)
# URGENT CARE CENTERS

## TABLE OF CONTENTS

Section 1 – General Information .......................................................................................................... 1  
1.1 Staff Credentials ........................................................................................................................ 1  
1.2 Hours of Operation .................................................................................................................... 1  
Section 2 - Covered Services ................................................................................................................ 2  
Section 3 – Provider Enrollment ........................................................................................................... 3  
3.1 NPI Edits ................................................................................................................................... 3  
Section 4 – Billing & Reimbursement .................................................................................................... 4  
4.1 Copay Requirements .................................................................................................................. 4
**SECTION 1 – GENERAL INFORMATION**

An Urgent Care Center (UCC) is a medical clinic or office, not located in a hospital emergency department, whose purpose is to provide unscheduled diagnosis and treatment of illnesses for ambulatory beneficiaries requiring immediate medical attention for non-life-threatening conditions. It is expected that UCCs will provide access to a place of service (POS) more appropriate than a hospital emergency department for addressing non-emergency medical needs when a beneficiary’s primary care provider (PCP) is not available.

1.1 Staff Credentials

The UCC medical director must be a Michigan-licensed physician. The UCC medical director is responsible for the medical management of the UCC. All Medicaid-covered physician services must be performed by the physician, the physician’s employee, or an employee of the same legal entity that employs the physician under the physician’s delegation and supervision. Only persons currently licensed/certified in an appropriate health occupation/profession (e.g., physician assistant, nurse practitioner), as authorized by Public Act 368 of 1978 as amended, may provide direct patient care under the delegation and supervision of a physician when the physician is not physically present on the premises.

1.2 Hours of Operation

UCCs must be open seven days a week, and include evening hours, weekends and holidays. Hours of operation must be posted in the facility. UCCs must accept walk-in patients of all ages during all hours the facility is open to see patients.
SECTION 2 - COVERED SERVICES

Unscheduled, non-emergency, medically necessary services that are a non-life threatening condition or injury or illness that can be treated appropriately in a UCC are Medicaid covered services.

Michigan Department of Health and Human Services (MDHHS) covered services are based on the level of care that can be appropriately rendered in an urgent care place of service.

MDHHS will not cover separate facility charges.

Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.

All facilities must provide clinical documentation for services rendered and complete a discharge summary which must be sent to the appropriate PCP. If a beneficiary does not have a PCP, the facility must document assistance with arranging a medical home for follow-up care.
SECTION 3 – PROVIDER ENROLLMENT

Providers must be enrolled with Medicaid and have a valid Type 2 (Group) National Provider Identifier (NPI) for MDHHS claim adjudication.

Claims must also include the appropriate Type 1 (Individual) NPI of the specific provider performing the service(s) as the rendering provider. A valid MDHHS-enrolled rendering provider number is required for claim adjudication. Providers must not enter a Type 2 (Group) NPI as the rendering provider. The Group NPI must be reported as the billing provider.

3.1 NPI Edits

MDHHS NPI claim editing will be applied to attending, billing, referring, rendering and supervising providers, as applicable. A claim cannot be paid if the NPI is missing or the reported NPI is invalid as it does not check digit and/or correctly crosswalk to the Provider Enrollment files for these provider loops or fields.
SECTION 4 – BILLING & REIMBURSEMENT

UCC providers must follow uniform billing guidelines using the professional CMS-1500 claim format or electronic Health Care Claim Professional (837) ASC X12N Version 5010 information. All providers are encouraged to bill electronically. Refer to the Billing & Reimbursement for Professionals chapter for additional CMS-1500 or 837P Professional claims submission and billing information.

If ancillary services are provided by UCC staff using hospital-owned equipment (i.e., done in the same building where urgent care is located), the hospital may bill that service on the institutional claim format for the technical service.

Reimbursement is based on the practitioner fee schedule. Services performed in a UCC are reimbursed at the non-facility rate based on the non-facility relative value unit (RVU). MDHHS utilizes the Medicaid National Correct Coding Initiative (NCCI) coding policies and edits as developed by the Centers for Medicare & Medicaid Services (CMS) to promote national correct coding methodologies. To avoid duplicate payments, UCC providers must submit only one non-facility service claim per beneficiary per DOS. Separate physician service claims should not be submitted.

4.1 Copay Requirements

A copayment may be required for office evaluation and management (E&M) visits for beneficiaries age 21 years and older.

Refer to the General Information for Providers Chapter for information about copayments. Current copayment amounts are listed on the MDHHS website. (Refer to the Directory Appendix for website information.)

  3.9 Prosthetic Eyes ......................................................................................................................... 15
SECTION 1 – GENERAL GUIDELINES AND REQUIREMENTS

The Michigan Department of Health and Human Services (MDHHS) contracts for the volume purchase of frames and lenses from an optical laboratory, referred to in this chapter as the contractor.

Vision providers (e.g., opticians, dispensing ophthalmologists, optometrists) must order frames and lenses from the contractor. A list of lenses is available in the MDHHS Vision Services Fee Schedule located on the MDHHS website. A list of available frames is available from the contractor, currently Classic Optical Laboratories. (Refer to the Directory Appendix for contact information.)

Orders placed with the contractor must be postmarked no later than 30 days after the date of order. If orders are placed beyond the 30 days, the contractor returns the order to the provider, who must explain to Medicaid why submission was delayed and request an exception from the time limit.

Procurement of contact lenses, low vision aids, and prosthetic eyes must be obtained from the vision provider’s own source and are subject to prior authorization (PA) requirements as described in this chapter.

1.1 BENEFICIARY ELIGIBILITY AND COPAYMENTS

Providers must verify beneficiary eligibility prior to rendering services or ordering materials. If a beneficiary’s eligibility expires prior to the date the material is delivered, reimbursement is made only if the beneficiary was eligible on the date the material was ordered by the vision provider and the date of order is used when billing. (Refer to the Beneficiary Eligibility Chapter of this manual for additional information.)

A copayment may be required for Medicaid beneficiaries age 21 and older for each separately reimbursable:

- Ophthalmological service performed by an optometrist or ophthalmologist; and
- Dispensing service for glasses or contact lenses billed by dispensing ophthalmologists or optometrists.

Refer to the General Information for Providers Chapter for information about copayments. Current copayment amounts are listed on the MDHHS website. (Refer to the Directory Appendix for website information.)

1.2 PRIOR AUTHORIZATION

Some vision services and materials require PA before they can be rendered. Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.

The Vision Services Approval/Order Form (DCH-0893) is used to obtain PA. A copy of the DCH-0893 and completion instructions can be found in the Forms Appendix of this manual. Complete and mail or fax the DCH-0893 to the MDHHS Program Review Division. (Refer to the Directory Appendix for contact information.) PA requests must be postmarked no later than 30 calendar days after the date of order.
beyond the 30 days, the provider must include a detailed explanation of why the submission was delayed.

When requesting prior approval, providers should make a photocopy of the completed form for the beneficiary file. Upon completion of the PA process, MDHHS returns one copy of the DCH-0893 to the provider.

An electronic copy of the DCH-0893 is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

1.3 CODING OF SERVICES

The American Medical Association’s (AMA) Current Procedural Terminology (CPT) is the national coding standard for health care professional services. Vision providers must use CPT codes in effect on the date of service to describe and identify the services and procedures performed. Optometrists must be Therapeutic Pharmaceutical Agent certified in order to use many of these codes. All prescriptions or prescription orders must comply with state and federal laws. (Refer to the Pharmacy Chapter of this manual for additional information.)

Providers must use the International Classification of Diseases (ICD) for diagnostic coding of diseases, injuries, and conditions. Codes must be used at the highest level of specificity.

Healthcare Common Procedure Coding System (HCPCS) is a system developed by the Centers for Medicare & Medicaid Services (CMS) to report materials, supplies, and certain services not covered by the CPT codes. HCPCS codes are to be used when applicable.

1.4 MEDICARE

All vision services are subject to editing for Medicare coverage. MDHHS reimburses vision providers for coinsurance and deductible amounts on Medicare-approved claims up to Medicaid’s reimbursement limit.

If a service requires PA by Medicaid and is covered by Medicare, vision providers do not have to obtain PA, nor does the vision provider have to obtain lenses or frames through the volume purchase program. (Refer to the Billing & Reimbursement for Professionals Chapter of this manual for additional information.)

1.5 CONTRACTOR GUARANTEE

Frames and lenses furnished by the contractor are guaranteed for 90 days. If any material is found to be unsatisfactory due to contractor error or defective workmanship or materials, the materials and work order form should be returned to the contractor. The contractor is required to correct, adjust, or replace the materials.

If the vision provider supplies the contractor with incorrect specifications that results in eyeglasses being fabricated which the beneficiary cannot use, the vision provider is responsible for payment to the contractor for the remake. The contractor may not charge the vision provider more than what they would charge MDHHS for the remake. MDHHS does not pay for the remake (e.g., eyeglasses, lenses, or frames) due to vision provider error.
1.6 Complaint Process

To resolve problems (such as an overdue shipment, error in an order, or defective workmanship), vision providers should first contact the contractor.

If the lenses and/or frames are not received from the contractor within 21 days from the date they were ordered, vision providers are responsible for contacting the contractor to determine the cause of the delay.

If difficulties are encountered with the contractor in resolving a problem, vision providers should call the Vision Contract Manager. (Refer to the Directory Appendix for contact information.) Vision providers must be prepared to report the beneficiary’s name and Medicaid ID number, and a detailed explanation of the problem(s) they have experienced.

MDHHS reviews the complaint, takes necessary action to correct the problem, and notifies the vision provider of the resolution.
SECTION 2 – DIOPTER CRITERIA

2.1 INITIAL LENSES

Initial lenses are considered to be the first prescription lenses ever worn by a person regardless of how they were obtained (e.g., through Medicaid, other insurance, or private pay). Initial lenses are a Medicaid benefit and do not require PA if the following minimum diopter criteria are met:

| Age Group 42 Years and Younger | | Age Group 43 Years and Older |
|--------------------------------|--------------------------------|
| • 0.50D myopia                | • 0.50D myopia                |
| • 0.50D astigmatism           | • 0.75D anisometropia         |
| • 0.75D hyperopia             | • 0.50D astigmatism           |
| • 0.75D anisometropia         | • 0.75D hyperopia             |
| • 0.50D hyperopia             |                              |

2.2 SUBSEQUENT LENSES

Regardless of age group, subsequent lenses are medically necessary lenses that are provided after initial lenses. Subsequent lenses are a Medicaid benefit and do not require PA if there is a change in the refractive error of 0.75D or more in the meridian of greatest change, or a change in the cylinder axis of at least 10 degrees for cylinders of 1.00D or more. These lenses must also meet minimum dioptic criteria as specified above. The change need only be present in one eye.

The following example illustrates how this requirement is assessed for a new correction (+2.75 -0.75 ax 092) and a previous correction (+2.25-0.25 ax 090). The dioptic power in each meridian can be portrayed in the form of cross diagrams.

New Correction:  
+2.75  -0.75  +2.00

Sphere Power  Cylinder Power  Resultant Power in each meridian

Previous Correction:  
+2.25  -0.25  +2.00

This is an example of where the change in dioptic power for subsequent lenses has not been met. Note that the resultant powers in the vertical meridians of the "new" and "previous" correction are +2.75 and +2.25 respectively. There is only a 0.50D change in the vertical meridian and no change in the horizontal.

For periods greater than 24 months from the date of the previous prescription, subsequent lenses may be ordered for diopter changes less than those specified above.
SECTION 3 — SERVICES

This section provides information on both Medicaid covered and noncovered services.

3.1 DIAGNOSTIC SERVICES

In providing services, it is the responsibility of the optometrist or ophthalmologist to determine that the services are medically necessary, appropriate, and within the scope of current medical practice and Medicaid limitations. The prescribing optometrist or ophthalmologist is held responsible if he orders excessive or unnecessary services, regardless of who actually renders the services. The prescribing optometrist or ophthalmologist may be subject to corrective action related to these services, including recovery of funds.

*Documentation Guidelines for Evaluation and Management Services, 1995, 1997, or latest version thereof, developed jointly by CMS and the AMA, must be adhered to when using the CPT/HCPCS procedure codes.*

<table>
<thead>
<tr>
<th>Eye Examinations</th>
<th>Glaucoma Screenings</th>
</tr>
</thead>
<tbody>
<tr>
<td>• A routine eye examination once every two years is a Medicaid benefit and does not require PA. Examinations include, but are not limited to, case history, determination of visual acuity (each eye), ophthalmoscopy, biomicroscopy, ocular motility, tonometry, refraction, diagnosis, treatment program and disposition. (Use appropriate CPT/HCPCS procedure codes for routine eye exam and applicable ICD diagnosis codes.)</td>
<td>Glaucoma screenings are covered without PA on an annual basis for beneficiaries who:</td>
</tr>
<tr>
<td>• Nonroutine eye examinations are a Medicaid benefit for the purpose of evaluation and treatment of chronic, acute, or sudden onset of abnormal ocular conditions. (Use appropriate CPT/HCPCS procedure codes.)</td>
<td>• Have no ocular complaints or prior history of glaucoma and who have diabetes;</td>
</tr>
<tr>
<td></td>
<td>• Have a family history of glaucoma; or</td>
</tr>
<tr>
<td></td>
<td>• Are African-American, age 50 or older.</td>
</tr>
<tr>
<td></td>
<td>This screening entails a dilated eye examination, tonometry, and direct ophthalmoscopy or slit lamp examination. If this screening is provided as part of another billable service, separate reimbursement for this screening is not allowed. Use the appropriate CPT/HCPCS procedure code for glaucoma screening and the applicable ICD diagnosis code.</td>
</tr>
<tr>
<td></td>
<td>If the beneficiary presents with a visual or ocular complaint, the glaucoma screening code should not be used. The procedure code which best describes the visit should be selected from the CPT Evaluation and Management (E/M) codes or General Ophthalmological procedure codes.</td>
</tr>
</tbody>
</table>
3.2 DISPENSING SERVICES

Dispensing services are a Medicaid benefit and do not require PA. Vision providers may bill a dispensing fee for dispensing prescription lenses, prescription lenses with frames, or replacing a complete frame.

Reimbursement for the dispensing service includes the vision provider’s services in selecting, ordering, verifying, and aligning/fitting of eyeglasses as described above. Routine follow-up and post-prescription visits (e.g., for minor adjustments) are considered part of the dispensing service and are not separately reimbursable.

3.3 NURSING FACILITY BENEFICIARIES

Covered and noncovered vision services, as well as PA requirements, apply to vision services provided to beneficiaries residing in a nursing facility (NF).

Performance of vision services (except replacement of a frame part for eyeglass repair) must be upon the written request of the beneficiary, a member of the beneficiary’s family, or other beneficiary representative and upon the written order of the beneficiary’s attending physician (MD, DO) prior to the date of the vision provider’s visit.

If service is provided in the NF, a copy of the request and written order must be retained by the facility as part of the beneficiary’s record.

Vision services are not considered a part of the facility’s per diem rate. The vision provider or contractor must bill MDHHS for vision services rendered.

No additional payments are made to vision providers for a visit(s) to the NF. Appropriate procedure codes must be utilized.

3.4 OPHTHALMIC FRAMES AND LENSES

A complete pair of eyeglasses is a Medicaid benefit and does not require PA when:

- The eyeglasses being prescribed are the beneficiary’s first pair of eyeglasses ever worn. These eyeglasses are considered to be initial eyeglasses and must meet minimum diopter criteria for initial lenses.

- The beneficiary’s correction meets diopter criteria for subsequent lenses and the frames are unusable.

- A previously used frame requires oversized lenses. (Oversized lenses are not a Medicaid benefit, therefore, a complete pair of eyeglasses must be ordered.)

- Prescription lenses remain usable, but the original frame is broken beyond repair and the original frame is not a Medicaid benefit.

- The beneficiary’s correction meets diopter criteria for subsequent lenses and the frames remain usable, but the vision provider or beneficiary elects not to send the frames to the contractor or the contractor feels that the previously used frames will break or otherwise be damaged during lens insertion.
The beneficiary’s eyeglasses have been lost, stolen, or broken beyond repair and the number of replacements have not exceeded Medicaid limits which are:

- For beneficiaries age 21 and over, one pair of replacement eyeglasses per year.
- For beneficiaries under age 21, two pairs of replacement eyeglasses per year.

One year is defined as 365 days from the date the first pair of eyeglasses (initial or subsequent) was ordered.

The DCH-0893 must be used when ordering frames and/or lenses. A copy of the form and instructions for completing the form are available in the Forms Appendix of this manual and on the MDHHS website. (Refer to the Directory Appendix for website information.) These orders must be sent directly to the contractor. Orders may be mailed, faxed, or entered directly online at the contractor's website. (Refer to the Directory Appendix for contact information. The contractor must be contacted directly to register for on-line access.) The contractor fills the vision provider's order in accordance with the lens and frame specifications indicated on the DCH-0893. The order form is returned to the provider if the eligibility information is not completed.

Procedures identified as requiring PA must first receive approval from the MDHHS Program Review Division. (Refer to the Prior Authorization subsection in this chapter for instructions on obtaining PA.)

The contractor monitors orders to assure that Medicaid replacement limitations, diopter criteria, and PA requirements are being maintained. The contractor returns an order if the order exceeds the replacement limits, does not meet diopter criteria, or requires PA.

The contractor bills MDHHS for the frames and/or lenses ordered by vision providers. Vision providers subsequently bill for a dispensing service for dispensing the frames and/or lenses.

If the beneficiary has other insurance that covers frames and/or lenses, the material may still be obtained through the contractor. (Refer to the Billing & Reimbursement for Professionals and the Coordination of Benefits Chapters of this manual when billing for the dispensing service if other insurance is involved.)

### 3.4.A. LENSES

Lenses must conform to the latest edition of the *American National Standard Recommendations for Prescription Ophthalmic Lenses*.

Plastic and glass lenses are a Medicaid benefit. Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.

- Plastic and glass bifocals are available in Round 22, FT-28, FT-35, and Executive style.
- Plastic and glass trifocals are available in FT-7x28 segments.
All noncontract previously used frames require PA.
To order subsequent lenses for insertion into a previously used frame, vision providers must complete the DCH-0893, indicating all information necessary for proper fabrication. Vision providers have the option of having the contractor insert the lenses, in which case the provider must supply the previously used frame to the contractor, or inserting the newly fabricated lenses into the frames in their office.

If the previously used frames are sent to the contractor for lens insertion, the contractor is required to fabricate the lenses and mail the frames and lenses to the vision provider within nine working days after receiving the frames. If a special prescription requires more than nine working days to complete, the contractor must notify the vision provider. If the provider does not receive the materials within three weeks from the date the order was sent, he should contact the contractor.

If the vision provider or beneficiary elects not to send the previously used frames as might be requested by the contractor, or if the contractor feels that the previously used frames may break or otherwise be damaged during lens insertion, the vision provider is requested to order a complete pair of eyeglasses.

If frames are sent to the contractor, either at the contractor’s request or the vision provider’s preference, the vision provider is responsible for paying the postage necessary to ship the frames. Also, vision providers are responsible for paying for frames lost or damaged in transit.

### 3.4.D. REPLACEMENT OR REPAIR

**Eyeglasses**

Eyeglass repairs are a separately reimbursed service when the repair is considered major (e.g., reinsertion of a lens, repair of a sheared screw, shortening or replacing temples, etc.) and when the glasses are deemed repairable. Minor repairs (e.g., insertion of screw, adjustments of nose pads or temples, etc.) that occur as a result of the beneficiary’s typical wear patterns are not separately reimbursed. The appropriate HCPCS code(s) must be reported for the component part that is being replaced. The reason for the repair must be documented in the beneficiary’s file and made available upon request.

If a provider determines that eyeglasses are repairable, the provider must guarantee the repair for a minimum of 30 days. Subsequent repair for the same issue within 30 days is the responsibility of the provider. If replacement eyeglasses are needed within the 30 day time frame following a repair, the provider must return the reimbursement received for the repair to MDHHS.

Eyeglasses that are broken beyond repair may be eligible for replacement by the contractor. Eyeglass replacement requires prior authorization if replacement limits have been exceeded.

If a previously used frame requires lenses that are not a Medicaid benefit (e.g., oversize lenses), a complete pair of eyeglasses that are a benefit must be ordered.
Lenses Only

Replacement of a corrective lens(es), without frames, for one that is damaged or broken is a benefit if that lens(es) is covered by Medicaid and the replacement limits have not been exceeded. A replacement lens(es) must be an identical copy of the damaged or broken lens. It does not require PA. Vision providers must order the lens(es) directly from the contractor.

For periods greater than 24 months from the date of the previous prescription when ordering subsequent lenses or complete eyeglasses, see Subsequent Lenses subsection above for appropriate diopter criteria.

Frames Only

Replacement of a complete frame (front and temples) is a Medicaid benefit only when the original frame is broken beyond repair, the prescription lenses remain usable, and the replacement limits have not been exceeded. The replacement frame must be an identical replacement. If an identical frame is not listed as a Medicaid benefit, the beneficiary must select a frame that is a covered benefit.

The contractor bills Medicaid for the complete frame. The vision provider inserts the lenses into the frame and bills Medicaid for the dispensing service.

3.4.E. TWO PAIRS OF EYEGLASSES

Two pairs of single vision eyeglasses (one for near visual tasks and the other for distance visual tasks) are a Medicaid benefit in either of the following instances:

- When the beneficiary has clearly demonstrated the inability to adjust to bifocals after a reasonable trial period.
- When the beneficiary’s physical condition does not allow bifocal usage.

PA is required when requesting two pairs of eyeglasses. Appropriate documentation must be attached to the DCH-0893 and submitted to the MDHHS Program Review Division.

Providing both multi-focal and single vision eyeglasses for interchangeable usage is not a Medicaid benefit.

3.4.F. NONDELIVERABLE EYEGLASSES

If a beneficiary fails to return to the vision provider for dispensing of eyeglasses, the vision provider should make every effort to locate the beneficiary, including contacting the local MDHHS office in the beneficiary’s area.

If the beneficiary still cannot be located, the eyeglasses should be sent to the local MDHHS office (or local nonprofit agency if the MDHHS office refuses to accept them) in the beneficiary’s area within 90 days of placing the order with the contractor. Do not send the nondelivered lenses and/or frames to MDHHS unless requested to do so by MDHHS.

To bill for dispensing, the provider must use the date of order for the lenses and/or frames.

Medicaid does not reimburse vision providers for postage and handling.
3.4.G. EYEGLASS CASE

One eyeglass case for every complete pair of eyeglasses ordered is a Medicaid benefit and must be provided by the contractor. Vision providers cannot bill for eyeglass cases.

3.5 LOW VISION SERVICES

<table>
<thead>
<tr>
<th>Evaluation</th>
</tr>
</thead>
<tbody>
<tr>
<td>A low vision evaluation is a benefit when the beneficiary presents with moderate visual impairment, severe visual impairment, or profound visual impairment. Under these conditions, a low vision evaluation does not require PA.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Aids</th>
</tr>
</thead>
<tbody>
<tr>
<td>High add bifocals do not require PA. For high add bifocals, complete the DCH-0893 and submit to the contractor.</td>
</tr>
<tr>
<td>The prescription and fitting of low vision optical aids (such as telescopes, microscopes, and certain other low vision aids) require PA. Only basic and essential low vision aids are a Medicaid benefit. The Provision of Low Vision Services and Aids Support Documentation (MSA-0891) form outlines the information required when requesting PA for low vision services and aids. A sample of this form is provided in the Forms Appendix. It can also be obtained through the MDHHS website. (Refer to the Directory Appendix for website information.) This form must be attached to DCH-0893 and submitted as part of the PA process. (Refer to the Prior Authorization subsection above.) Reimbursement for a low vision aid is based on the manufacturer’s charge for the aid plus a professional fee. Procurement of the low vision aid is done through the vision provider’s own source. The professional fee includes procurement, verification, and fitting of the aid. Only an enrolled optometrist or a dispensing ophthalmologist can bill for a low vision aid.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Rehabilitative Services</th>
</tr>
</thead>
<tbody>
<tr>
<td>Low vision rehabilitative services include instructions, training, and assistance to the beneficiary in the most effective use of the low vision aid. Documentation for these services should be included when requesting the low vision aid.</td>
</tr>
</tbody>
</table>
3.6 CONTACT LENSES

3.6.A. EVALUATION

A comprehensive contact lens evaluation is a Medicaid benefit when the beneficiary presents with one of the following conditions (use appropriate HCPCS comprehensive contact lens evaluation code):

- Aniridia
- Anisometropia or Antimetropia (of two diopters or greater that results in Aniseikonia)
- Aphakia
- Irregular cornea
- Keratoconus (if vision cannot be improved to 20/40 or better with eyeglasses)
- Other conditions which have no alternative treatment (e.g., Aniseikonia with documentation and severe Keratoconjunctivitis sicca)

3.6.B. PRESCRIPTION AND FITTING

The prescription and fitting of contact lenses is a Medicaid benefit and requires PA, except for beneficiaries who are under six years of age with a diagnosis of aphakia.

3.6.B.1. PRESCRIPTION

The prescription for contact lenses requires the complete description of contact lens specifications. The following must be included on a prescription for contact lenses:

- complete description of the contact lens(es) parameters
- material of the contact lens(es)
- manufacturer of the contact lens(es)
- material discard and replacement schedule
- number of lenses required to provide a one-year supply
- prescription expiration date

3.6.B.2. FITTING

The fitting of the contact lens(es) must include:

- determination of appropriate initial contact lens parameters based on clinical observation, and measurements of the eye with or without a trial (sample) contact lens.
a trial or adaption period of one to three months, including a fitting warranty that provides for adjustments in the contact lens parameters either by exchange or by modification of existing materials.

**Note:** Certain custom contact lens designs may not be warranted by the manufacturer. This type of custom contact lens design will be considered on a case-by-case basis. The provider must provide a detailed explanation of need, initial cost, and potential re-fitting cost.

- instruction of proper insertion, removal, disinfection, and care of the contact lens(es).
- initial supply of contact lenses, storage case, and solutions sufficient to last until the fitting is complete.

### 3.6.C. REPLACEMENT AND SUPPLIES

Procurement of contact lenses is to be done through the vision provider’s own source.

The Documentation of Medical Necessity for the Provision of Contact Lenses form (MSA-0892) outlines the information required when requesting contact lens PA. A sample of this form is provided in the Forms Appendix and can also be obtained through the MDHHS website. (Refer to the Directory Appendix for website information.)

This form must be attached to the Vision Services Approval/Order form (DCH-0893) and submitted to MDHHS as part of the PA process. (Refer to the Prior Authorization subsection in this chapter for additional information.)

Requests for contact lens replacements due to loss or damage will require PA and will be reviewed on an individual basis.

Except as previously indicated, contact lens supplies (e.g., wetting and cleaning solutions, carrying cases) are not Medicaid benefits.

### 3.7 STRABISMUS AND AMBLYOPIA EXAMINATION

Strabismus and amblyopia examinations (sensorimotor examination) are Medicaid benefits and do not require PA.

### 3.8 ORTHOPTICS AND PLEOPTICS TRAINING

<table>
<thead>
<tr>
<th>Orthoptics and Pleoptics Training</th>
<th>Orthoptics and Pleoptics (O &amp; P) training is a Medicaid benefit only when there is a diagnosis of one of the following conditions:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>- Amblyopia</td>
</tr>
<tr>
<td></td>
<td>- Esotropia</td>
</tr>
<tr>
<td></td>
<td>- Exotropia</td>
</tr>
<tr>
<td></td>
<td>- Heterotropia</td>
</tr>
<tr>
<td></td>
<td>- Strabismus</td>
</tr>
</tbody>
</table>
• Ocular Motor and Fusion Dysfunction

PA is not required for O & P training for beneficiaries under age 21. PA is required for beneficiaries age 21 and older for O & P training.

When requesting PA, the following documentation must be attached to the DCH-0893 and submitted to the Program Review Division:

• Visual acuity, each eye, with best spectacle correction;
• Magnitude and direction of the subjective and objective angle of strabismus at distance and near;
• Refractive error of each eye;
• Degree of fusion;
• History of strabismus, including onset, duration, prior treatment; and
• Other relevant information.

In addition to the above documentation, a detailed plan indicating the training procedures and equipment to be employed, frequency of office visits, home training aids, and prognosis must be attached to the DCH-0893. This training plan may be authorized for a period of up to three calendar months.

O & P training is limited to a maximum of 13 visits within the first three calendar months of therapy without PA. PA will be required for additional necessary visits.

If continued training beyond the period that was authorized is necessary, a new request for PA must be submitted with the following information:

• Update of the above-listed items;
• Report of the results of previous training; and
• Indication for further treatment with a detailed plan.

Orthoptic Training Aids

Orthoptic training aids are a Medicaid benefit when incorporated in an orthoptics or pleoptics training plan (as described above) and require PA. The following documentation must be included with the vision provider’s detailed plan when requesting the purchase of an aid:

• How the aid is to be used;
• Complete description of the aid;
• Name of the manufacturer; and
• Manufacturer’s charge.

Reimbursement for a training aid is based on the manufacturer’s charge to the vision provider plus a professional fee. The professional fee includes procurement, instruction in use, and fitting when applicable. Procurement of the training aid is done through the vision provider’s own source.

Purchase of orthoptic training aids must be billed only by an enrolled optometrist or dispensing ophthalmologist.
3.9 PROSTHETIC EYES

A prosthetic eye (plastic/custom) or shell is a Medicaid benefit and does not require PA.

For an enlargement or reduction of an ocular prosthesis, PA is required. PA is also required when requesting a prosthesis other than a plastic/custom eye. When requesting PA, the DCH-0893 should be completed, with documentation attached, and submitted to the MDHHS Program Review Division. Procurement of the prosthesis should be obtained from the provider’s own source.

Reimbursement for a prosthesis is made on a per case basis which includes, but is not limited to:

- Trial fitting
- Supply of prosthesis
- Solutions
- Training in insertion and removal
- Instruction in care
- Subsequent office visits to achieve maximum wearing time and optimal cosmetic fit
- Any necessary modification during the adaptation period of six months

# Glossary Appendix

<table>
<thead>
<tr>
<th>Glossary Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Acquisition Costs</td>
<td>The manufacturer’s invoice price, minus primary discount, plus a percentage over cost, plus actual shipping costs. Acquisition cost does not include handling fees. (For the specific percentage over cost, refer to the archived MDHHS Medical Supplier/DME/Prosthetics and Orthotics Database Instructions posted on the MDHHS website.)</td>
</tr>
<tr>
<td>Ambulatory Payment Classification (APC)</td>
<td>The Outpatient Prospective Payment System (OPPS) Ambulatory Payment Classification (APC) is a reimbursement method representing groups of outpatient visits according to clinical characteristics and costs associated with the diagnoses and the procedures rendered known as APCs.</td>
</tr>
<tr>
<td>Borderland</td>
<td>A county that is contiguous to the Michigan border and includes several major cities beyond the contiguous county lines.</td>
</tr>
<tr>
<td>Durable Medical Equipment (DME)</td>
<td>Equipment that can withstand repeated use, is reusable or removable, is suitable for use in any non-institutional setting in which normal life activities take place, is primarily and customarily used to serve a medical purpose and is generally not useful to an individual in the absence of illness, injury or disability.</td>
</tr>
<tr>
<td>The Emergency Medical Treatment and Active Labor Act (EMTALA)</td>
<td>42 USC 1395dd, that requires a Hospital to perform a medical screening examination of any individual presenting in its emergency department to determine if an emergency medical condition exists and to stabilize the individual’s medical condition.</td>
</tr>
<tr>
<td>Encounter</td>
<td>A face-to-face contact between a patient and the provider of health care services who exercises independent judgment in the provision of health care services.</td>
</tr>
<tr>
<td>Hospital</td>
<td>Hospital means the licensed entity that executed the Hospital Access Agreement, which has the inpatient capacity necessary to provide covered services.</td>
</tr>
<tr>
<td>Hospital Based Provider (HBP)</td>
<td>A hospital-employed MD, DO, Certified Registered Nurse Anesthetist (CRNA), dentist, podiatrist, optometrist, or nurse-midwife.</td>
</tr>
<tr>
<td>Medicaid Deductible</td>
<td>Beneficiary must incur medical expenses each month equal to, or in excess of, an amount determined by the local MDHHS worker to qualify for Medicaid. Previously referred to as Medicaid Spend-down.</td>
</tr>
<tr>
<td>Medicaid Health Plan (MHP)</td>
<td>A Medicaid managed care plan that provides medical assistance through the delivery of Covered Services to Beneficiaries and that holds a Comprehensive Health Care Program Medicaid Contract with the State of Michigan.</td>
</tr>
<tr>
<td>Glossary Term</td>
<td>Definition</td>
</tr>
<tr>
<td>---------------------------------------------------</td>
<td>---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td><strong>Medical Supplies</strong></td>
<td>Health care related items that are required to address an individual’s illness, injury or disability; are consumable, disposable or have a limited life expectancy, cannot withstand repeated use, and are suitable for use in any non-institutional setting in which normal life activities take place. Examples are: hypodermic syringes/needles, ostomy supplies, and dressings necessary for the medical management of the beneficiary.</td>
</tr>
<tr>
<td><strong>Mobility Related Activities of Daily Living (MRADL)</strong></td>
<td>Daily activities (e.g., grooming, dressing, etc.) the beneficiary is capable of performing with the aid of mobility equipment.</td>
</tr>
<tr>
<td><strong>Noncompliance</strong></td>
<td>Failure or refusal to follow instructions related to improving or stabilizing a condition.</td>
</tr>
<tr>
<td><strong>Noncovered Service</strong></td>
<td>A medical or health care service that is:</td>
</tr>
<tr>
<td></td>
<td>• Not covered by Medicaid;</td>
</tr>
<tr>
<td></td>
<td>• Not medically necessary;</td>
</tr>
<tr>
<td></td>
<td>• Not described in a MHP’s Certificate of Coverage;</td>
</tr>
<tr>
<td></td>
<td>• Provided before or after a beneficiary is an Enrollee in a MHP; or</td>
</tr>
<tr>
<td></td>
<td>• Non-emergency services for which the Hospital did not secure PA.</td>
</tr>
<tr>
<td><strong>Nursing Facility</strong></td>
<td>A nursing home, county medical care facility, State Veterans’ Home, or hospital long-term care unit, with Medicaid certification.</td>
</tr>
<tr>
<td><strong>Orthotics</strong></td>
<td>Orthotics assist in correcting or strengthening a congenital or acquired physical anomaly, or malfunctioning portion of the body.</td>
</tr>
<tr>
<td><strong>Outpatient Hospital</strong></td>
<td>A portion of a hospital, which provides diagnostic, therapeutic (both surgical and non-surgical), and rehabilitation services to sick or injured persons who do not require inpatient hospitalization or institutionalization.</td>
</tr>
<tr>
<td><strong>Outpatient Prospective Payment System (OPPS)</strong></td>
<td>A Prospective Payment System (PPS) is a method of reimbursement in which Medicare payment is made based on a predetermined, fixed amount. The payment amount for a particular service is derived based on the classification system of that service (i.e., DRGs for inpatient hospital services, APCs for outpatient hospital services). All services paid under the PPS are classified into groups called Ambulatory Payment Classifications (or APCs). Services in each APC are similar clinically and in terms of the resources they require. A payment rate is established for each APC.</td>
</tr>
<tr>
<td><strong>Physician (MD or DO)</strong></td>
<td>An individual licensed under the Michigan Public Health Code (1978 P.A. 368) to engage in the practice of medicine or osteopathic medicine and surgery.</td>
</tr>
<tr>
<td>Glossary Term</td>
<td>Definition</td>
</tr>
<tr>
<td>-------------------------------</td>
<td>-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td><strong>Prosthetics</strong></td>
<td>Prosthetics artificially replace a portion of the body to prevent or correct a physical anomaly or malfunctioning portion of the body.</td>
</tr>
<tr>
<td><strong>Provider</strong></td>
<td>An individual, firm, corporation, association, agency, institution, or other legal entity which is providing, has formerly provided, or has been approved to provide medical assistance to a beneficiary pursuant to the medical assistance program.</td>
</tr>
<tr>
<td><strong>Public Facility</strong></td>
<td>A public facility is defined at one of the following sections of the Michigan Public Health Code (PA 368 of 1978, as amended): Section 333.2413, Section 333.2415, or Section 333.2421.</td>
</tr>
<tr>
<td><strong>Rapid Dispute Resolution Process</strong></td>
<td>The process implemented by MDHHS to administer and resolve claim disputes.</td>
</tr>
<tr>
<td><strong>Readmission</strong></td>
<td>Any admission/hospitalization of a beneficiary within 15 days of a previous discharge, whether the readmission is to the same or different hospital.</td>
</tr>
<tr>
<td><strong>Reference Laboratory</strong></td>
<td>An enrolled laboratory that receives a specimen from another referring laboratory for testing and that actually performs the test.</td>
</tr>
<tr>
<td><strong>Referring Laboratory</strong></td>
<td>A laboratory that receives a specimen to be tested and that refers the specimen to another laboratory for performance of the laboratory test.</td>
</tr>
<tr>
<td><strong>Sanctioned Provider</strong></td>
<td>A provider who has been suspended, terminated or excluded from furnishing, ordering, or prescribing items or services to Medicaid beneficiaries.</td>
</tr>
<tr>
<td><strong>Spend-down</strong></td>
<td>See Medicaid Deductible.</td>
</tr>
<tr>
<td><strong>Sterilization</strong></td>
<td>Any medical procedure, treatment, or operation for the sole purpose of rendering an individual (male or female) permanently incapable of reproducing.</td>
</tr>
<tr>
<td><strong>Third Party Liability</strong></td>
<td>A payment resource available from both private and public insurance and other liable third parties that can be applied toward the beneficiary’s health care expense.</td>
</tr>
<tr>
<td><strong>Transfer Trauma</strong></td>
<td>Any adverse psychological and/or physical effects occasioned by the transfer of a nursing home patient who would be materially detrimental to the physical or mental health of the patient.</td>
</tr>
<tr>
<td><strong>U &amp; C Charge</strong></td>
<td>The usual and customary charge to the general public. Customary charge means the amount the provider charges another third party payer or the general public (except in cases where the general public receives free or reduced charges) for the same or a similar service. This definition does not include negotiated or contracted payment rates. If the provider renders a covered service to a beneficiary that the provider offers for free or for a reduced fee to the general public, the provider may only bill Medicaid up to that customary charge as long as all other Medicaid requirements are met.</td>

ACKNOWLEDGMENT OF RECEIPT OF HYSSTERECTOMY INFORMATION

Michigan Department of Health and Human Services

RECIPIENT STATEMENT:

I, _______________________________________________________, was told before the hysterectomy was done that after the hysterectomy I would not be able to become pregnant.

___________________________________________________          _________________
(Recipient or Representative Signature) (Date)

___________________________________________________          _________________
(Interpreter Signature, if required to inform the recipient of the above information) (Date)

PHYSICIAN STATEMENT:

The hysterectomy for the above named recipient is solely for medical indications. This hysterectomy is not primarily or secondarily for family planning reasons, to render the above named recipient permanently incapable of reproducing, i.e. sterilization. It was explained to the above named recipient prior to the hysterectomy that the hysterectomy will render her permanently incapable of reproducing.

___________________________________________________          _________________
(Physician Signature) (Date)

Authority: Title XIX of the Social Security Act
Completion: Is Voluntary, but is required if Medical Assistance program payment is desired.

The Department of Health and Human Services will not discriminate against any individual or group because of race, sex, religion, age, national origin, marital status, political beliefs or disability. If you need help with reading, writing, hearing, etc., under the Americans with Disabilities Act, you are invited to make your needs known to your local MDHHS office.

MSA-2218 (Rev. 6-2015) Formerly DSS-2218 which may be used
### BENEFITS MONITORING PROGRAM REFERRAL

Benefits Monitoring Program Referral (MSA-1302)
Instructions for Completion and Submission

General Instructions

This form should ONLY be used for beneficiaries enrolled in the Benefits Monitoring Program (BMP).* Enrollment may be verified through the CHAMPS Eligibility Inquiry response as additional information. The form is to be completed by the beneficiary's BMP Authorized Provider(s). For additional program information, refer to the Michigan Medicaid Provider Manual (Beneficiary Eligibility Chapter, Benefits Monitoring Program Section) available on the MDHHS website.

MDHHS requests that the MSA-1302 be typewritten to facilitate processing.

Copy Distribution

- Original – Referring Provider File
- Copy – Referred Provider
- Copy – Michigan Department of Health and Human Services (MDHHS), Medical Services Administration, Benefits Monitoring Program

Form Submission

The MSA-1302 and any supplemental information (e.g. medication list, medical records, forged prescriptions, etc.) must be mailed or faxed to:

MDHHS – Medical Services Administration
Benefits Monitoring Program
PO Box 30170
Lansing, MI 48909

Fax Number: (517) 335-0075

The MDHHS Program Review Division may be reached via telephone at (800) 622-0276.

* Previously known as Beneficiary Monitoring Program.

The Michigan Department of Health and Human Services is an equal opportunity employer, services and programs provider.

AUTHORITY: Title XIX of the Social Security Act.
COMPLETION: Is Voluntary, but is required if Medical Assistance program payment is desired.
I understand that Medicaid, Healthy Michigan Plan, or MIChild only covers payment for elective abortions under limited circumstances.

These are:

- Elective abortion to terminate a pregnancy to save the life of the mother,
- Elective abortion to terminate a pregnancy that was the result of rape, or
- Elective abortion to terminate a pregnancy that was the result of incest.

I certify that I am eligible for Medicaid, Healthy Michigan Plan, or MIChild coverage for an elective abortion based upon the circumstance that I have checked above. I understand that if I have given false information to obtain coverage for an elective abortion I can be prosecuted for fraud. I also understand that a copy of this verification will be sent to the local Michigan Department of Health and Human Services (MDHHS) office or to a police agency when appropriate.

Authority: Title XIX and Title XXI of the Social Security Act.

Completion: Is Voluntary, but is required if payment from the Medicaid, Healthy Michigan Plan, or MIChild programs is sought.

The Michigan Department of Health and Human Services (MDHHS) does not discriminate against any individual or group because of race, religion, age, national origin, color, height, weight, marital status, genetic information, sex, sexual orientation, gender identity or expression, political beliefs or disability.
CERTIFICATION FOR INDUCED ABORTION
Michigan Department of Health and Human Services
Medical Services Administration

Medicaid, Healthy Michigan Plan, or MIChild payments for abortion services are limited to cases in which the life of the mother would be endangered if the pregnancy were continued or cases in which the pregnancy was the result of rape or incest. To receive payment for abortion services, a physician must determine and certify that the abortion is necessary to save the life of the mother or is to terminate a pregnancy that resulted from rape or incest.

INSTRUCTIONS:

- TYPE or PRINT ALL Information below.
- The Physician completing this form is responsible for providing a copy of the completed form to any other provider assisting in this procedure (e.g., hospital, anesthesiologist, laboratory) for billing purposes.
- Send a copy of the completed form with the claim. (Refer to the Medicaid Provider Manual, Directory Appendix, Claim Submission/Payment.)

Any questions regarding this form should be referred to Provider Inquiry at 800-292-2550 or e-mail ProviderSupport@michigan.gov.

<table>
<thead>
<tr>

<th>Date of Service</th>
</tr>
</thead>
<tbody>
<tr>
<td>Beneficiary Address (no. &amp; street, apt./lot #, etc.)</td>
<td>City</td>
<td>State</td>
</tr>
</tbody>
</table>

Appropriate box must be checked for payment to be made.

By signing below, I certify that:

☐ the life of the mother would be endangered if the pregnancy were continued. (List the medical condition(s) that exists.)

☐ the pregnancy terminated through this procedure was the result of rape or incest. Information included in the medical record supports this claim.

In cases of rape or incest, was a police report filed?
  ☐ YES ☐ NO (If NO, explain)

If appropriate, was a report filed with the local MDHHS office?
  ☐ YES ☐ NO (If NO, explain)

NOTE: Payment for service is not dependent upon a report being filed with the police or the local MDHHS office.

   b. Total Computable Certified Public Expenditure by Component:
   [X] Medicaid Medical Services
      Total Computable Expenditure (From Exhibit 11, Line 23)

INTENTIONAL MISREPRESENTATION OR FALSIFICATION OF ANY INFORMATION CONTAINED HEREIN MAY BE PUNISHABLE BY FINE AND/OR IMPRISONMENT UNDER FEDERAL AND/OR STATE LAW.

CERTIFICATION STATEMENT BY OFFICER OF THE PROVIDER

I HEREBY CERTIFY that:

1. I have examined this statement, the accompanying supporting exhibits, the allocation of expenses, services and activities, and the attached worksheets for the period from ________________ to ________________ and that to the best of my knowledge and belief they are true and correct statements prepared from the books and records of the governmental provider in accordance with applicable instructions.

2. The expenditures included in this statement are based on the actual cost of recorded expenditures and reflect the reporting provider’s cost of serving Medicaid recipients.

3. I am the officer authorized by the referenced governmental provider to submit this form and I have made a good faith effort to assure that all information reported is true and accurate.

4. The required amount of State and/or local funds were used to pay for total computable allowable expenditures included in this statement, and such State and/or local funds were in accordance with all applicable Federal requirements for the non-Federal share match of expenditures (including that the funds were not Federal funds in origin, or are Federal funds authorized by Federal law to be used to match other Federal funds, and that the claimed expenditures were not used to meet matching requirements under other Federally funded programs).

5. The total computable expenditures identified herein are submitted in accordance with 42 CFR 433.51.

6. I understand that this certification of public expenditures serves as the basis for Federal matching funds; that such expenditures were allowable to the State Medicaid program in accordance with all procedures, instructions, and guidance issued by and to the single state agency during the reporting period; and that falsification or concealment of a material fact may be prosecuted under Federal or State civil or criminal law.

Authority: Title XIX of the Social Security Act.
Completion: Completion is required for Medicaid reimbursement.
MSA-1576 (5/15) - Previous editions are obsolete.
Complex Seating and Mobility Device Prior Approval - Request/Authorization
Completion Instructions

The MSA-1653-D must be used by Medicaid enrolled DME Providers. Note: Requests for new complex seating or mobility devices submit with a completed Evaluation and Medical Justification for Complex Seating Systems and Mobility Devices form (MSA-1656).

MDHHS requests that the MSA-1653-D be typewritten to facilitate processing. A Word fill-in enabled version of this form can be downloaded from the MDHHS website www.michigan.gov/medicaidproviders >> Policy, Letters & Forms. The form is generally self-explanatory. For complete information on required modifiers, documentation, and appropriate quantity amounts, refer to the following documents:

- Standards of Coverage portion of the provider-specific chapters of the Medicaid Provider Manual.
- Billing & Reimbursement for Professionals Chapter of the Medicaid Provider Manual.
- Provider-specific databases on the MDHHS website. www.michigan.gov/medicaidproviders >> Billing and Reimbursement >> Provider Specific Information.

Completion of this form is as follows:

| Box 1 | MDHHS Use Only |
| Box 11 | Beneficiary address. If beneficiary resides in Nursing Facility include the Nursing Facility name, address and phone number. |
| Box 17 | Complete this box ONLY for wheelchair requests. |
| Box 20 | Enter brand name, model catalog or part number. DME, orthotics and prosthetics, must provide the brand name, model, and catalog or part number. |
| Box 21 | Enter a complete description of the item requested. |
| Box 22 | Enter the HCPCS Procedure Code. |
| Box 23 | Enter the applicable HCPCS Modifier. |
| Box 28 | Enter the beneficiary’s primary and secondary diagnoses or the CSHCS qualifying diagnosis (list both the code and description). DME/POS providers must submit the prescription/CMN with this form. |
| Box 29 | Any additional remarks regarding the request should be listed in this box such as verbal authorization date, retroactive date of service if being requested. Provide other insurance coverage for services requested. |
| Box 31 | Must be completed for all requests. |

Form Submission

PA request forms and required documentation for all eligible Medicaid beneficiaries must be mailed or faxed to:

MDHHS - Medical Services Administration
Program Review Division
P.O. Box 30170
Lansing, Michigan 48909

Fax Number: (517) 335-0075

To check the status of a PA request, contact the MDHHS - Medical Services Administration, Program Review Division via telephone at 1-800-622-0276.
The provider is responsible for eligibility verification. Approval does not guarantee beneficiary eligibility or payment.

CONSENT FOR STERILIZATION
Michigan Department of Health and Human Services

NOTICE: YOUR DECISION AT ANY TIME NOT TO BE STERILIZED WILL NOT RESULT IN THE WITHDRAWAL OR WITHHOLDING OF ANY BENEFITS PROVIDED BY PROGRAMS OR PROJECTS RECEIVING FEDERAL FUNDS.

CONSENT TO STERILIZATION

I have asked for and received information about sterilization from _______________________. When I first asked for the information, I was told that the decision to be sterilized is completely up to me. I was told that I could decide not to be sterilized. If I decide not to be sterilized, my decision will not affect my right to future care or treatment. I will not lose any help or benefits from programs receiving Federal funds, such as A.F.D.C. or Medicaid that I am now getting or for which I may become eligible.

I UNDERSTAND THAT THE STERILIZATION MUST BE CONSIDERED PERMANENT AND NOT REVERSIBLE. I HAVE DECIDED THAT I DO NOT WANT TO BECOME PREGNANT, BEAR CHILDREN OR FATHER CHILDREN.

I was told about those temporary methods of birth control that are available and could be provided to me which will allow me to bear or father a child in the future. I have rejected these alternatives and chosen to be sterilized.

I understand that I will be sterilized by an operation known as _______________________. The discomforts, risks and benefits associated with the operation have been explained to me. All my questions have been answered to my satisfaction.

I understand that the operation will not be done until at least thirty days after I sign this form. I understand that I can change my mind at any time and that my decision at any time not to be sterilized will not result in the withholding of any benefits or medical services provided by federally funded programs.

I am at least 21 years of age and was born on ______________ (Month / Day / Year). I, _______________________, hereby consent of my own free will to be sterilized by _______________________, a child in the future. I have rejected these alternatives and chosen to be sterilized.

(Name of Individual Being Sterilized)

by a method called _______________________. My consent expires 180 days from the date of my signature below. I also consent to the release of this form and other medical records about the operation to:

Representatives of the Department of Health and Human Services OR Employees of programs or projects funded by that Department but only for determining if Federal laws were observed. I have received a copy of this form.

________________________
(Signature of Person Giving Consent) (Month / Day / Year)

You are requested to supply the following information, but it is not required: Ethnicity and race designation (please check)

Ethnicity: ____________ Race (mark one or more):

☐ Hispanic or Latino ☐ American Indian or Alaska Native
☐ Not Hispanic or Latino ☐ Asian
☐ Black or African American ☐ Native Hawaiian or Other Pacific Islander
☐ White

INTERPRETER’S STATEMENT

If an interpreter is provided to assist the individual to be sterilized:

I have translated the information and advice presented orally to the individual to be sterilized by the person obtaining this consent. I have also read him/her the consent form in ____________ language and explained its contents to him/her. To the best of my knowledge and belief he/she understood this explanation.

________________________
(Interpreter’s Signature) (Month / Day / Year)

STATEMENT OF PERSON OBTAINING CONSENT

Before _______________________, (Name of Individual) signed the consent form, I explained to him/her the nature of the sterilization operation and the fact that it is intended to be a final and irreversible procedure and the discomforts, risks and benefits associated with it.

I counseled the individual to be sterilized that alternative methods of birth control are available which are temporary. I explained that sterilization is different because it is permanent.

I informed the individual to be sterilized that his/her consent can be withdrawn at any time and that he/she will not lose any health services or benefits provided by Federal funds.

To the best of my knowledge and belief the individual to be sterilized is at least 21 years old and appears mentally competent. He/she knowingly and voluntarily requested to be sterilized and appears to understand the nature and consequences of the procedure.

________________________
(Signature of Person obtaining consent) (Date)

________________________
(Signature of Physician and Professional Degree) (Month / Day / Year)

PHYSICIAN’S STATEMENT

Shortly before I performed a sterilization operation upon _______________________, (Name of Individual to be sterilized) on _______________________, I explained to him/her the nature of the sterilization operation _______________________, the fact that it is intended to be a final and irreversible procedure and the discomforts, risks and benefits associated with it.

I informed the individual to be sterilized that his/her consent can be withdrawn at any time and that he/she will not lose any health services or benefits provided by Federal funds.

To the best of my knowledge and belief the individual to be sterilized is at least 21 years old and appears mentally competent. He/she knowingly and voluntarily requested to be sterilized and appears to understand the nature and consequences of the procedure.

(Instructions for use of alternative final paragraphs: Use the first paragraph below except in the case of premature delivery or emergency abdominal surgery where the sterilization is performed less than 30 days after the date of the individual’s signature on the consent form. In those cases, the second paragraph below must be used. Cross out the paragraph which is not used.)

(1) At least thirty days have passed between the date of the individual’s signature on this consent form and the date the sterilization was performed.

(2) This sterilization was performed less than 30 days but more than 72 hours after the date of the individual’s signature on this consent form because of the following circumstances (check applicable box and fill in information requested):

☐ Premature delivery

☐ Emergency abdominal surgery: _______________________

(describe circumstances)

________________________
(Signature of Physician and Professional Degree) (Month / Day / Year)

AUTHORIZED: Title XIX of the Social Security Act
COMPLETION: Is Voluntary, but is required if Medical Assistance program payment is desired.

The Michigan Department of Health and Human Services is an equal opportunity employer, services and programs provider.

MSA-1959 (Rev.5-15) Previous edition may be used
INSTRUCTIONS TO COMPLETE CONSENT FOR STERILIZATION FORM

1. Name of the physician or clinic giving information to the beneficiary. The "M.D." or "D.O." designation must be included.
2. Name of the sterilization procedure to be performed (e.g., Tubal Ligation or Vasectomy).
3. Beneficiary's complete birth date (month, day, and year). The beneficiary must be 21 years of age at the time they sign the form.
4. Beneficiary’s full name. If a name change is indicated on the Medicaid card by the time surgery is performed, both names must be indicated.
5. Name of physician performing the sterilization. If the physician is unknown, "doctor on call" may be indicated.
6. Name of surgery to be performed (e.g., Tubal Ligation or Vasectomy).
7. Beneficiary’s handwritten signature. A beneficiary who cannot write should sign with an "X." The "X" signature must be witnessed. The witness’ handwritten signature must appear below item 7.
8. Date the consent form was signed (month, day and year). This date must be more than 30 days and less than 180 days before the date the sterilization is performed. If it is less than 30 days, see instructions for "alternative final paragraphs."
9. Race and ethnicity designation is optional.
10. Interpreter’s Statement. This information is only required if the beneficiary is unable to understand English. The language used for interpretation must be specified (e.g., Spanish). The interpreter’s handwritten signature and date must appear. The date must be the same date the beneficiary signed the form.
11. Name of beneficiary.
12. Name of sterilization procedure (e.g., Tubal Ligation or Vasectomy).
13. The handwritten signature of the person obtaining consent.
14. Date consent is taken (month, day and year). This date must be before the date sterilization is performed (#18).
15. Name of provider or clinic (e.g., office of John Doe, M.D., doctor's office, ABC Clinic, XYZ Hospital).
16. Street address, city, state, and zip code. No P.O. boxes allowed.
17. Beneficiary’s full name.
18. Date of sterilization (month, day, and year). The surgery date must be the same as indicated on the claim.
19. Name of sterilization procedure (e.g., Tubal Ligation, Vasectomy).
20. Instructions for use of alternative final paragraphs.
21. If at least 30 days have passed since the date the beneficiary signed the consent form and the date of sterilization, paragraph "1" applies and paragraph "2" should be crossed out.
22. If the date the sterilization was performed is less than 30 days and more than 72 hours of the beneficiary signing the consent form, paragraph "2" applies and paragraph "1" should be crossed out. The applicable box should be checked.
23. For premature delivery, the expected date of delivery must be given.
24. Physician’s signature. This can be a stamped signature if counter initialed.
25. Date physician signed the consent form. This date must be on or after the date of surgery. This can be typed or stamped.

If abdominal surgery was performed, the circumstances must be explained and operative notes submitted with the claim.
Application for Payment of Health Insurance Premiums

SECTION ONE – CSHCS Identifying Information

1. Name of Client (Last, First MI)  
   2. CSHCS ID Number

3. Client’s Contact Phone Number  
   4. Client’s Date of Birth (MM/DD/YYYY)

5. Does Client have Medicare Part B?  
   6. Does Client have Medicare Part D?  
   7. Does Client have MiChild?

   □ YES  □ NO  
   □ YES  □ NO  
   □ YES  □ NO

SECTION TWO – Insurance Information

Is this case for:  
□ COBRA - Answer questions 8-24  
□ Insurance Premium (new or continuing coverage) - Answer questions 13-24

8. Reason COBRA was offered OR may be available:

9. Date of qualifying event  
   / / 

10. Date of COBRA notice to employee  
    / / 

11. Date COBRA election form was signed (if applicable)  
   / / 

12. Has first COBRA payment been made?  
   □ YES □ NO

   If yes, list date / / 

13. Is insurance coverage through employer?  
    □ YES □ NO

14. Name of employee (if applicable)

15. Name of employer (if applicable)

16. Name of insurance contact person

17. Phone number of insurance contact person  
   (   )

18. Name of insurance company

19. Insurance contract number/group number

20. Premium cost per month for client’s coverage  
    $   .

21. Date next premium is due  
    / / 

22. Date of contract renewal (when rate could change)  
    / / 

23. Name and address of company where premium payments are to be sent:

24. Reason family is unable to pay premium:

SECTION THREE – Health and Medical Information

25. What is the client's CSHCS covered diagnosis?

26. What does the health insurance cover:  
   □ HOSPITAL  □ DOCTOR VISITS  □ PRESCRIPTIONS  
   □ VISION  □ DENTAL

27. What are the expected future medical needs for the CSHCS client?
28. Is it likely the client's insurance will cover these medical needs? Explain.

29. What special health care needs are **not** covered by the client's health insurance?

30. Are there other health insurance coverages for which the client might be eligible (e.g. Medicare Part B, Medicare Part D, other private health insurance, etc)?

<table>

DENTAL PRIOR APPROVAL AUTHORIZATION REQUEST

Instructions for MSA-1680-B

The Dental Prior Approval Authorization Request form (MSA-1680-B) is to be used for persons with Medicaid coverage in the Fee for Service dental benefit and persons enrolled in Children's Special Health Care Services (CSHCS). For beneficiaries enrolled in Healthy Kids Dental, Healthy Michigan Plan Health Plans, Integrated Care Organizations and pregnant women enrolled in a Medicaid Health Plan, providers should contact the assigned plan for authorization requirements.

The MSA-1680-B must be completed by private dentists or community-based dental clinics (e.g., local health departments, Federally Qualified Health Centers (FQHC)). MDHHS requires that the MSA-1680-B be typewritten, handwritten forms will not be accepted.

The status of a prior authorization request may be reviewed in CHAMPS. Additionally, providers will receive a Prior Authorization determination letter. Approved services are required to be completed before the end of the Prior Authorization. To request an extension, the provider must submit a copy of the determination letter and required documentation within 15 days prior to the end date of the current authorization. If the original prior authorization is over one year old, a new prior authorization request must be submitted.

For further information on the prior authorization of dental services, please see the Prior Authorization Section, Dental Chapter of the Medicaid Provider Manual.

Dental providers treating CSHCS beneficiaries are required to submit the beneficiary’s CSHCS qualifying diagnosis related to the services being requested. For authorization of orthodontics and/or crown and bridge services for beneficiaries enrolled in CSHCS, please see the Children’s Special Health Care Services Dental Services Section, Dental Chapter of the Medicaid Provider Manual.

The completed MSA-1680-B may be mailed, faxed, or submitted via CHAMPS, depending whether Radiograph films are necessary, to:

Michigan Department of Health and Human Services
Dental Prior Authorization
P.O. Box 30154
Lansing, MI 48909
Fax: (517) 335-0075

Questions should be directed to Dental Prior Authorization at 1-800-622-0276.

If submitting electronically, the completed MSA-1680-B and all radiographs must be attached, as required by policy.

Radiographs will only be returned upon request, as indicated in box 17.
Michigan Department of Health and Human Services  
DENTAL PRIOR APPROVAL AUTHORIZATION REQUEST  
www.michigan.gov/mdhhs  
FAX: 517-335-0075

Note: The provider is responsible for eligibility verification. Authorization does not guarantee beneficiary eligibility or payment. MDHHS requires that the MSA-1680-B be typewritten, handwritten forms will not be accepted.

2. Provider Name (Last, First, Middle Initial)  
3. Provider Street Address  
4. City  
5. Provider Fax Number

Pursuant to 42 CFR § 433.51, this Electronic Signature Verification Statement is intended to document a physical copy of my signature as part of the documentation required for the submission of visits and financial data.

I understand that this electronic signature is created with a unique combination of my computer login name and secure password. This unique combination is to ensure that all documentation is completed under this combination is done by me.

By signing this statement, I confirm that I will keep my password secure and that I will not inappropriately disclose this information to others. I also confirm that all documentation entered under my login name and password is true and correct. This form will remain in effect until the individual named on the form changes.

Form Submission

The completed original DCH-3890 must be mailed:
Michigan Department of Health and Human Services
Bureau of Medicaid Operations
Hospital and Clinic Reimbursement Division
Rate Review Section
PO Box 30479
Lansing, MI 48909

Questions should be directed to MDHHS Medical Services Administration, Rate Review Section, via telephone at 517-335-5330.

Authority: Public Act 305 § 450.832 and 42 CFR § 433.51
Completion: Mandatory for payment.

The Michigan Department of Health and Human Services (MDHHS) does not discriminate against any individual or group because of race, religion, age, national origin, color, height, weight, marital status, genetic information, sex, sexual orientation, gender identity or expression, political beliefs or disability.
General Instructions

The MSA-181 must be used by Medicaid enrolled and home health agencies to request Prior Authorization (PA) for home health aide services. MDHHS requires that the MSA-181 be typewritten; handwritten forms will not be accepted. A Word fill-in enabled version of this form can be downloaded from the MDHHS website www.michigan.gov/medicaidproviders >> Policy, Letters & Forms >> Forms.

This form must be used to request Prior Authorization (PA) for home health aide services for beneficiaries with Medicaid. A request to begin services may be submitted by a person other than the home health agency such as the hospital Discharge Planner or physician. When this is the case, the person submitting the request must do so in consultation with the beneficiary (parent or guardian if applicable), and home health agency who will be assuming responsibility for the care of the beneficiary.

PA may be authorized for a period not to exceed ninety days. If need for home health aide services are medically necessary, a subsequent request for PA must be submitted. The provider should retain a copy of the PA form until the approval or denial is returned.

Refer to the Medicaid Provider Manual, Home Health Chapter, Prior Authorization Subsection, for the listing of required documentation to accompany each request.

Completion of this form is as follows:

<table>

**38. PATIENT (PARENT / GUARDIAN IF APPLICABLE) CERTIFICATION**

I, the patient (parent/guardian) named above, understand the necessity to request prior authorization for the medically necessary services indicated. I understand that services requested herein require prior authorization and, if approved and submitted by the agency on the appropriate invoice, payment of authorized services will be from general and/or state funds. I understand that any false claims, statements or documents, or concealment of a material fact may lead to prosecution under applicable federal and/or state law. I hereby attest that information provided on this form is accurate and complete to the best of my ability.

**39. PHYSICIAN CERTIFICATION**

I certify that I have examined the patient named above and have determined that home health aide services are medically necessary, as supervised by a licensed, registered nurse or other authorized licensed professional. I understand that home health aide services require prior authorization to validate that such services are deemed medically necessary in accordance with Michigan Medicaid Provider Manual policy. I understand that any false claims, statements or documents, or concealment of a material fact may lead to prosecution under applicable federal and/or state law. I hereby attest that information provided on this form is accurate and complete to the best of my ability.

**40. LICENSED SUPERVISING PROFESSIONAL CERTIFICATION**

I hereby attest as a licensed professional (registered nurse, physical therapist, occupational therapist, or speech/language pathologist) that supervision of the home health aide is under my authority and deemed medically necessary. I understand that services requested herein require prior approval and, if approved and submitted on the appropriate invoice, payment of approved services will be from federal and/or state funds. I understand that any false claims, statements or documents, or concealment of a material fact may lead to prosecution under applicable federal and/or state law. I hereby attest that information provided on this form is accurate and complete to the best of my ability.

HOSPITAL NEWBORN NOTICE

INSTRUCTIONS

The MSA-2565-C serves as notice of birth of a newborn for the purposes of obtaining a Medicaid ID number. It must be completed only if the hospital is unable to submit notice of the birth through the Michigan Electronic Birth Certificate system.

- The hospital must retain THE ORIGINAL of the Hospital Newborn Notice in the beneficiary's file. A copy MUST be sent to the local MDHHS office.
- A copy of the MSA-2565-C will be returned to the hospital, noting the eligibility status of the newborn.
- Item 6 must state the name of the mother.
- A copy of the CHAMPS Eligibility Inquiry or HIPAA 271 transaction response with the mother's Benefit Plan ID information should be attached to the form; or the form must contain the county, district, unit, worker, and case number data from the eligibility response separated by slashes (e.g., 33/01/01/08/1234567890).

The Michigan Department of Health and Human Services does not discriminate against any individual or group because of race, religion, age, national origin, color, height, weight, marital status, genetic information, sex, sexual orientation, gender identity or expression, political beliefs, or disability.

AUTHORITY: P.A. 280 of 1939 and Federal 42 CFR of 435
Title XIX of the Social Security Act

COMPLETION: Is voluntary

GUARANTEE OF PAYMENT FOR PREGNANCY-RELATED SERVICES
NOTICE TO PRENATAL CARE PROVIDERS
PHARMACY, LABORATORY AND DIAGNOSTIC SERVICES AGENCIES

Today's Date ___________________________ Expected Date of Confinement / Due Date ___________________________

Beneficiary’s Name ___________________________ Beneficiary’s Date of Birth ___________________________

Address (Number and Street) ___________________________ Apt. No. ___________________________

City, State, ZIP Code ___________________________ Medicaid Case Number (if available) ___________________________

Medicaid Beneficiary ID Number (if available) ___________________________

IMPORTANT: All of the above information MUST be completed.

The Michigan Department of Health and Human Services (MDHHS) GUARANTEES PAYMENT of the pregnancy-related services listed below for 45 days from the date listed above. This document should be considered as proof of coverage until the beneficiary receives a mihealth card or a beneficiary ID number. Michigan Medicaid-covered maternity services and fee screens apply.

Subsequent to the 45 days, MDHHS will continue to provide medical coverage for eligible women through the Maternity Outpatient Medical Services (MOMS) Program or the Michigan Medicaid Program for prenatal care, delivery, and other pregnancy-related services for the duration of the pregnancy. Medically necessary ambulatory postpartum care will be covered for 60 days after the pregnancy ends. Inpatient hospital coverage is limited to delivery-related services only.

Pregnancy-related covered services during the eligibility period include:
1. Prenatal care
2. Pharmaceuticals and prescription vitamins
3. Laboratory
4. Labor and Delivery – will cover both professional fees and inpatient hospitalization
5. Postpartum Care through 60 days after the pregnancy ends
6. Radiology and Ultrasound
7. Maternal Infant Health Program (MIHP) services until delivery
8. Outpatient hospital care
9. Childbirth education
10. Other pregnancy-related care with prior authorization

If you have questions regarding billing or you are providing a medical service that is not listed above, please refer to page 2 of this letter for instructions on billing and prior authorization procedures.

If you require this document for your files, please make a copy and return the original to the beneficiary.

Guarantee of payment applies only for providers enrolled in the Michigan Medicaid Program.

Chris Priest, Director
Medical Services Administration
ELIGIBILITY:
MOMS eligibility may be obtained through the Community Health Automated Medicaid Processing System (CHAMPS) (Eligibility Inquiry and/or 270/271 transaction). MDHHS will issue a beneficiary ID number to be used when billing for services. If the beneficiary receives full Medicaid and enrolls in a Medicaid Health Plan, the health plan’s policies and procedures will apply. If you are not a participating provider with the health plan, the beneficiary should be referred to the health plan before services are rendered.

BILLING INSTRUCTIONS:
- Electronic submission of claims is the preferred method for quick and accurate claim reimbursement.
- All services must be billed within one year of the date of service. Pharmacy services should be billed within six months of the date of service.
- Claims must be completed following standard Medicaid billing and reimbursement guidelines contained in the Billing and Reimbursement Chapters of the Medicaid Provider Manual. Claims must be submitted to the same location where you submit your Medicaid Claims.
- Private insurance must be billed first, if applicable.
- This Guarantee of Payment insures the MDHHS will provide coverage for pregnancy related services. You must hold your claim for services provided until the beneficiary receives her mihealth card or a beneficiary ID number can be identified in CHAMPS (Eligibility Inquiry and/or 270/271 transaction) with MOMS eligibility, identified with Benefit Plan ID MOMS, for the date of service. You must provide the beneficiary ID number on the claim to receive payment. Do not use the "I" number that appears in the upper right hand corner of the Guarantee of Payment letter.
- MOMS claim adjudication information will be included in the weekly remittance advice, merged alphabetically with Medicaid and other MDHHS-administered programs. The remittance advice is your claim status. If a claim does not appear on a remittance advice within 45 days, the account should be resubmitted for processing. Should you have other questions about your claim, you may contact the Medicaid Provider Inquiry line at 1-800-292-2550 or by e-mail at providersupport@michigan.gov.

All MOMS covered services are subject to the published policies and procedures applicable under the Medicaid program as they relate to health care and claim submission requirements.

PRIOR AUTHORIZATION:
If your service does not meet the definition of pregnancy-related services listed on page one of this letter, or if the service normally requires prior authorization by the Medicaid program, submit your request for authorization, by mail or by fax. Refer to the Directory Appendix in the Medicaid Provider Manual for contact information.

PHARMACY SERVICES:
Pharmacy services provided to MOMS beneficiaries must be billed to the Pharmacy Benefits Manager. Refer to the Michigan Pharmaceutical Product List to identify products that may require prior authorization. To obtain prior authorization, you may write, call or fax your request to the Pharmacy Benefits Manager. Refer to the Directory Appendix in the Medicaid Provider Manual for contact information.

Pharmacies who provide MOMS services, when presented with this Guarantee of Payment letter (DCH-1164), have the option of billing the Pharmacy Benefits Manager as indicated below:

A. Pharmacies will need to hold the electronic claim (electronic preferred) until MOMS eligibility, identified with Benefit Plan ID MOMS, is in CHAMPS (Eligibility Inquiry and/or 270/271 transaction) for the date of service. Then bill the Pharmacy Benefits Manager via the on-line system, if the electronic claim is used.
B. Submit the appropriate HIPAA compliant National Council for Prescription Drug Programs (NCPDP) electronic claim or submit a Universal Claim Form, along with a copy of the Letter, to the Pharmacy Benefits Manager per the instructions in their manual.
C. Pharmacies will need to hold the electronic claim until MOMS eligibility, identified with Benefit Plan ID MOMS, is in CHAMPS (Eligibility Inquiry and/or 270/271 transaction) for the date of service and obtain a copy of the Guarantee of Payment letter (DCH-1164) as proof of coverage in order to fill the prescription(s).
Instructions for MSA-1755

The Medicaid Enrolled Birthing Hospital Agreement for Elective, Non-Medically Indicated Delivery Prior to 39 Weeks Completed Gestation form (MSA-1755) is to be completed by all Medicaid enrolled birthing hospitals in the State of Michigan.

The purpose of this form is to serve as an attestation that each Medicaid enrolled birthing hospital utilizes evidence-based guidelines (EBGs) to address elective, non-medically indicated delivery prior to 39 weeks completed gestation for Medicaid beneficiaries.

To complete the form, hospitals must indicate whether they have elective delivery EBGs in place. If the hospital utilizes guidelines that are not listed on the form, hospitals may use the space provided on the form to explain. Hospitals may also submit copies of their elective delivery policies.

The form must be signed by both the Chief Executive Officer (CEO) and the Chief Medical Officer (CMO) of the facility.

The completed MSA-1755 must be mailed or faxed to:

Attn: Inpatient Hospital Policy
Michigan Department of Health and Human Services
Medical Services Administration, Program Policy Division
PO Box 30479
Lansing, Michigan 48909-7979
Fax: (517) 335-5136

Questions should be directed to Provider Support at ProviderSupport@michigan.gov.
The purpose of this agreement is to certify that Medicaid enrolled birthing hospitals utilize evidence-based guidelines (EBGs) to address elective, non-medically indicated delivery prior to 39 weeks completed gestation for Medicaid beneficiaries.

**NOTE:** This agreement must be signed by both the Chief Executive Officer (CEO) and the Chief Medical Officer (CMO) of the facility.

Complete the following:

<table>
<thead>
<tr>
<th>Hospital Name</th>
<th>National Provider Identifier</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

attests that the following elective delivery EBGs are utilized:

<table>
<thead>
<tr>
<th></th>
<th></th>
<th>(Indicate Yes or No for each statement)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
<td>No</td>
<td>Medical indications for elective, non-medically indicated delivery prior to 39 weeks completed gestation are defined in hospital policy.</td>
</tr>
<tr>
<td>Yes</td>
<td>No</td>
<td>Hospital staff is not authorized to schedule an elective, non-medically indicated delivery prior to 39 weeks completed gestation.</td>
</tr>
<tr>
<td>Yes</td>
<td>No</td>
<td>Providers are required to obtain permission from physician leadership (e.g., the head of the obstetrics department) before performing an elective, non-medically indicated delivery prior to 39 weeks completed gestation.</td>
</tr>
<tr>
<td>Yes</td>
<td>No</td>
<td>Provider education materials are used to educate providers on the risks of elective, non-medically indicated delivery prior to 39 weeks completed gestation.</td>
</tr>
<tr>
<td>Yes</td>
<td>No</td>
<td>Patient education materials are used to educate patients on the risks of elective, non-medically indicated delivery prior to 39 weeks completed gestation.</td>
</tr>
<tr>
<td>Yes</td>
<td>No</td>
<td>Hospital involvement in an initiative that addresses elective, non-medically indicated delivery prior to 39 weeks completed gestation (e.g., Michigan Health &amp; Hospital Association [MHA] Keystone Center’s initiative in obstetrics, Trinity Health System’s Perinatal Patient Safety Initiative [PPSI], Ascension Health System’s Handling All Neonatal Deliveries Safely [HANDS]).</td>
</tr>
<tr>
<td>Yes</td>
<td>No</td>
<td>Other. Explain in the space provided below. If more space is needed, attach explanation on a separate document.</td>
</tr>
</tbody>
</table>

Along with this completed agreement, MDHHS will also accept a copy of each facility’s elective delivery policy.

I certify that the responses in this attestation agreement are accurate, complete and current as of the date signed.

CSHCS MEDICAL ELIGIBILITY REPORT

Instructions for Form MSA-4114

Purpose:
This form is used to determine if an individual is medically eligible for the Children's Special Health Care Services (CSHCS) program. The condition must require the services of a medical and/or surgical sub-specialist at least annually, as opposed to being managed exclusively by a primary care physician. A current list of covered diagnoses is maintained on the MDHHS website at www.michigan.gov/mdhhs. In addition, some diagnoses must meet severity or chronicity criteria (e.g. asthma).

This form should be completed for the following persons:
- Anyone UNDER 21 years of age with a potentially eligible condition. Psychiatric, emotional and behavioral disorders, attention deficit disorder, developmental delay, intellectual disability, autism, or other mental health diagnoses are not conditions covered by the CSHCS program.
- Anyone, regardless of age, with cystic fibrosis or hereditary coagulation defects commonly known as hemophilia.

Completion Instructions:
- Read this instruction page thoroughly. Then separate attached forms.
- TYPE or PRINT clearly in INK.
- The Physician’s Signature (or the Attending Physician if a Hospital) and the Date Signed are REQUIRED.
- Attach supporting medical documentation.
- If desired, make a photocopy for your records.
- FAX the completed form to the CSHCS Division at 517-335-9491.

Other Information:
- If this request is approved, the client is medically eligible for the CSHCS program.
- For actual program coverage, the client or the client’s family MUST APPLY to join the CSHCS program by completing form MSA-0737, APPLICATION FOR CHILDREN’S SPECIAL HEALTH CARE SERVICES.
- If the family does NOT receive an application after notification of approval, call 1-800-359-3722.

For questions and/or problems, or help to translate, call the Beneficiary Help Line at 1-800-642-3195 (TTY 1-866-501-5656).
Spanish: Si necesita ayuda para traducir o entender este texto, por favor llame al teléfono 1-800-642-3195 (TTY 1-866-501-5656)
Arabic: 1-800-642-3195 (TTY 1-866-501-5656)

If you have a disability and require assistance, contact the Beneficiary Help Line at 1-800-642-3195 (TTY 1-866-501-5656).

For more information, visit www.michigan.gov/mdhhs.

AUTHORITY: Title V of the Social Security Act
COMPLETION: Completion is voluntary, but is required if coverage under the Children's Special Health Care Services program is desired.

The Department of Health and Human Services is an equal opportunity employer, services and programs provider.

Exemption Criteria

☐ COMA: Yes, I certify the patient under consideration is in a coma/persistent vegetative state.

☐ DEMENTIA: Yes, I certify the patient under consideration has dementia as established by clinical examination and evidence of meeting ALL 5 criteria below.

   Yes, I certify the patient under consideration does not have another primary psychiatric diagnosis of a serious mental illness.

   Yes, I certify the patient under consideration does not have an intellectual disability, developmental disability or a related condition.

Specify the type of dementia:

1. Has demonstrable evidence of impairment in short-term or long-term memory as indicated by the inability to learn new information or remember three objects after five minutes, and the inability to remember past personal information or facts of common knowledge.

2. Exhibits at least one of the following:
   • Impairment of abstract thinking, as indicated by the inability to find similarities and differences between related words; has difficulty defining words, concepts and similar tasks.
   • Impaired judgment, as indicated by inability to make reasonable plans to deal with interpersonal, family and job-related issues.
   • Other disturbances of higher cortical function, i.e., aphasia, apraxia and constructional difficulty.
   • Personality change: altered or accentuated premorbid traits.

3. Disturbances in items 1 or 2 above significantly interfere with work, usual activities or relationships with others.

4. The disturbance has NOT occurred exclusively during the course of delirium.
5. **EITHER:**
   a. Medical history, physical exam and/or lab tests show evidence of a specific organic factor judged to be etiologically related to the disturbance, **OR**
   b. An etiologic organic factor is presumed in the absence of such evidence if the disturbance cannot be accounted for by any non-organic mental disorder.

**HOSPITAL EXEMPTED DISCHARGE:**

**Yes**, I certify that the patient under consideration:

1. is being admitted after a hospital stay, **AND**
2. requires nursing facility services for the condition for which he/she received hospital care, **AND**
3. is likely to require less than 30 days of nursing services.

<table>
<thead>
<tr>

<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Name (Typed or Printed)</td>
<td></td>
</tr>
<tr>
<td>Telephone Number</td>
<td></td>
</tr>
</tbody>
</table>

**AUTHORITY:** Title XIX of the Social Security Act  
**COMPLETION:** Is voluntary, however, if NOT completed, Medicaid will not reimburse the nursing facility.

The Michigan Department of Health and Human Services (MDHHS) does not discriminate against any individual or group because of race, religion, age, national origin, color, height, weight, marital status, genetic information, sex, sexual orientation, gender identity or expression, political beliefs or disability.

**COPY DISTRIBUTION:** ORIGINAL- Nursing Facility retains in Patient file  
COPY - Attach to form DCH-3877 and send to Local Community Mental Health Services Program (CMHSP)  
COPY - Patient Copy or Legal Representative
INSTRUCTIONS FOR COMPLETING LEVEL II SCREENING

The DCH-3878 is to be used ONLY when the individual identified on a DCH-3877, Preadmission Screening (PAS)/Annual Resident Review (ARR) as needing a LEVEL II evaluation meets one of the specified exemptions from LEVEL II screening. If the individual under consideration meets one of the following exemptions, he/she may be admitted or retained at a nursing facility without additional evaluation. However, a completed copy of the DCH-3878 must be attached to the DCH-3877 and sent to the local Community Mental Health Services Program (CMHSP).

Must be completed, signed and dated by a nurse practitioner, physician’s assistant or physician.

Complete the following information to match the DCH-3877: Patient Name, DOB, and Referring Agency (including agency address and telephone number).

Use an "X" to indicate which exemption applies to the individual under consideration.

DEMENTIA:

- Review the 5 criteria listed under the dementia exemption category. Do NOT check this exemption unless the individual meets all 5 criteria. Any individual who meets some, but not all 5 criteria will be subject to a LEVEL II evaluation. If the individual under consideration meets this exemption category, specify the type of dementia.

- Do not mark the Dementia Exemption if there is a primary diagnosis of a serious mental illness. Do not mark Dementia Exemption if there is a diagnosis of intellectual disability, developmental disability or a related condition.

Dementia diagnoses include the following:

1. Dementia of the Alzheimer’s Type
2. Vascular Dementia
3. Dementia due to Other General Medical Conditions
4. Substance - Induced Persisting Dementia
5. Dementia Not Otherwise Specified
Evaluation and Medical Justification for Complex Seating Systems and Mobility Devices

Completion Instructions

This form should be completed for NEW or REPLACEMENT mobility device(s) and seating systems. It must be submitted with the Complex Seating and Mobility Device Prior Approval - Request/Authorization (MSA-1653-D). The evaluation and justification must be submitted within 90 days of the date the evaluation was completed.

The appropriate Addendum(s) must accompany the MSA-1656 & MSA-1653-D.

BENEFICIARY INFORMATION: Complete beneficiary name, date of birth, sex, mihealth number, ordering physician and physician specialty. The beneficiary name and mihealth number must be entered at the top of each subsequent page.

SECTIONS 1 THROUGH SECTION 11 MUST BE COMPLETED BY A LICENSED/CERTIFIED MEDICAL PROFESSIONAL.

NOTE: A licensed/certified medical professional means an occupational or physical therapist, a physiatrist or rehabilitation RN who has at least two years’ experience in rehabilitation seating; and is not an employee of, or affiliated in any way with, the Medical Supplier with the exception of hospitals with integrated delivery models that include the supplier of the equipment and the provider of the clinical evaluation. A PTA or OTA may not evaluate for, complete or sign this document.

<tr>
<td>6</td>
<td>Mandatory for all requests. Describes the beneficiary’s ADL functional ability without mobility devices. The acronym &quot;UE&quot; means &quot;upper extremity.&quot; Answer the items regarding visual perception, problem solving and comprehension only if requesting a power mobility item.</td>
</tr>
<tr>
<td>7</td>
<td>Evaluation includes measurements of the beneficiary. Relevant measures include adjustments for clothing. Complete the Manual Muscle Test (MMT) for hand only if requesting a power mobility item. This measurement should be of the appropriate hand/digits that will be used to operate specialty controllers.</td>
</tr>
</tbody>
</table>

**Modified Ashworth Scale**

- 0: No increase in muscle tone
- 1: Slight increase in muscle tone, manifested by a catch and release or by minimal resistance at the end of the range of motion when the attached part is moved in flexion or extension
- 1+: Slight increase in muscle tone, manifested by a catch, followed by minimal resistance throughout the remainder (less than half) of the ROM
- 2: More marked increase in muscle tone through most of the ROM, but affected part easily moved
- 3: Considerable increase in muscle tone, passive movement difficult
- 4: Affected part rigid in flexion or extension

**Manual Muscle Evaluation**

- 100%: Complete ROM against gravity with full resistance
- 75%: Complete ROM against gravity with some resistance
- 50%: Complete ROM against gravity
- 25%: Complete ROM with gravity eliminated
- 10%: Evidence of contractibility but no joint motion
- 0%: No evidence of contractility

C = Complete; IC = Incomplete; *= Pain

<td>To be completed if beneficiary is in a nursing facility. This section should be completed and signed by the Director of Nursing, Facility Administrator or Ordering/referring Physician. This page must accompany the MSA-1653-D and appropriate Addendum(s) when submitting to the MDHHS Program Review Division.</td>
</tr>
<tr>
<td>11</td>
<td>To be completed by the evaluator and, if applicable, all team members involved in the evaluation. Enter date of evaluation, evaluator's name, title, telephone number, place of employment and address. If team evaluation, in Section 11, list all participants and titles (attach additional pages if necessary). The attestation page must accompany the MSA-1653-D and appropriate Addendum(s) when submitting to the Michigan Department of Health and Human Services (MDHHS) Program Review Division.</td>
</tr>
</tbody>
</table>

**Notes**

The applicable addendums must accompany the MSA-1656 & MSA-1653-D when requesting the authorization. Failure to include the appropriate addendum(s) may cause a delay in the authorization process.

| Addendum A: | To be completed when requesting new or replacement manual wheelchairs with accessories, power mobility devices, and/or seating systems. |
| Addendum B: | To be completed when requesting new or replacement strollers, standers, gait trainers and children's positioning chairs. |

**Note:**

For beneficiaries residing in a nursing facility, return the completed MSA-1656, addendum(s) and MSA-1653-D to the requesting nursing facility.

For beneficiaries in the community, the MSA-1656, addendum(s) and MSA-1653-D are forwarded to the ordering physician for their review.

  - Ambulates with assist > or = 150 ft.
  - Limited due to endurance - Explain:
  - Unable to ambulate
  - Explain type of assistance:
  - Ambulates with device > or = 150 ft.
  - Ambulates short distance only ____ ft.

**SECTION 7: MODIFIED ASHWORTH SCALE AND MANUAL MUSCLE EVALUATION INFORMATION**

See Form Completion Instructions for Modified Ashworth Scale and Manual Muscle Evaluation.

- **Width at the:**
  - Head: ___
  - Neck: ___
  - Shoulder: ___
  - Trunk: ___
  - Hips: ___
  - Feet: ___

- **Height:**
  - Crown: ___
  - Occiput: ___
  - Shoulder: ___
  - Axilla: ___
  - Elbow: ___
  - Seat Depth: ___
  - Leg Length: ___
  - Foot Length: ___

**Primitive reflexes present:**
- Asymmetrical Tonic Neck Reflex
- Symmetrical Tonic Neck Reflex
- Startle Reflex
- Other; Explain:

**Explain how this relates to equipment ordered:**
**SECTION 8: GOALS**

Check all that apply.

- [ ] Independence with mobility in the home and mobility related activities of daily living (MRADLs) in the community (independence is - no help or oversight provided, and has physically demonstrated independence in operating requested equipment)
- [ ] Assisted mobility/occasional assistance with wheelchair propulsion (e.g., verbal cueing, pushing up a ramp or onto a bus, over curbs, etc.)
- [ ] Dependent mobility
- [ ] Optimize pressure relief
- [ ] Proper positioning and/or correction of a physiological condition. Explain:
- [ ] Other: (Explain)

**SECTION 9: LIST TYPE OF EQUIPMENT PRESENTLY OWNED OR USED BY THE BENEFICIARY**

- Past Two Months of Nursing Notes
- Current Plan of Care that relates to the equipment ordered

Director of Nursing Signature

Ordering Physician Signature

SECTION 11: EVALUATOR (PT, OT, PHYSIATRIST OR REHAB RN) ATTESTATION AND SIGNATURE/DATE

I certify that I conducted the evaluation and have completed the information presented in Sections 1 - 9, and that there is no financial arrangement with the selected durable medical equipment provider and/or the evaluating clinician. I certify that the equipment requested is the most economical alternative that meets the beneficiary's basic medical and functional needs. I certify that the information contained in this form is true, accurate, and complete to the best of my knowledge, and I understand that any falsification, omission, or concealment of material fact may subject me to civil or criminal liability.

Evaluator Signature

Evaluator Name/Title (Print)

Place of Employment and Address

NPI Phone Number

Evaluator Signature Date

AUTHORITY: Title XIX of the Social Security Act

COMPLETION: Is voluntary, but is required if payment from applicable.

The Michigan Department of Health and Human Services is an equal opportunity employer, services and programs provider.
This form must be completed by a physical therapist, occupational therapist, physiatrist, or rehabilitation registered nurse. The evaluator must complete requested and/or current equipment, warranty information and economic alternative information.

NOTE: Only complete sections that apply to the requested equipment/accessories.

Incomplete information will result in the form being returned to the evaluator for completion.

If requesting custom seating, specify why planar/non-custom contour does not meet beneficiary's medical needs.

* For definition of custom refer to MDHHS Medicaid Provider Manual, Medical Supplier Chapter, sections Standard Equipment and Custom-Fabricated Seating, and section Standards of Coverage

EVALUATOR (PT, OT, PHYSIATRIST OR REHAB RN) ATTESTATION AND SIGNATURE/DATE

I certify that I conducted the evaluation and have completed the information in the appropriate Sections of the MSA-1656-Addendum A and that there is no financial arrangement with the selected durable medical equipment provider and/or the evaluating clinician. I certify that the equipment requested is the most economical alternative that meets the beneficiary's basic medical and functional needs. I certify that the information contained in this form is true, accurate, and complete to the best of my knowledge, and I understand that any falsification, omission, or concealment of material fact may subject me to civil or criminal liability.

MICHIGAN DEPARTMENT OF HEALTH AND HUMAN SERVICES

Evaluation and Medical Justification for Complex Seating Systems and Mobility Devices
Addendum B: Strollers, Gait Trainers, Standers, Car Seats, and Children's Positioning Chairs

This form must be completed by a physical therapist, occupational therapist, physiatrist, or rehabilitation registered nurse. The Evaluator must complete requested and/or current equipment information, warranty information and economic alternative information.

NOTE: Only complete sections that apply to the requested equipment/accessories. If requesting an equipment/accessories complete Current/None area of the section.

Incomplete information will result in the form being returned to the evaluator for completion.

Interim reimbursement request data is used to establish the amount of per diem add-on reimbursement to be included in the Medicaid Program per diem payment rate. The total amount of add-on reimbursement for the nurse aide training and testing program during the fiscal year will be adjusted through the annual settlement determination of the training and testing costs apportioned to Medicaid inpatient days.

Information included in this request may reflect estimated costs and projections for the time period indicated.

Send completed request to: MDHHS/LTC REIMBURSEMENT & RATE SETTING SECTION

   - d. Total equipment use allowance (Sum of 10.c. line amounts)

## 11. Estimated Total Nurse Aide Training Program Costs
   (Sum of Line 9 and Line 10d.)
PURPOSE

This form is for the provider to obtain Medicaid Program reimbursement outside the routine nursing care rate per diem for OBRA nurse aide training and testing programs. The form must be completed in order to receive interim reimbursement for those providers that have been determined to be a lockout facility, or for those facilities incurring costs in excess of interim reimbursement. Costs will be retrospectively settled to reflect the Medicaid Program’s appropriate share of actual allowable training and testing costs.

Training and testing program costs claimed for services and supplies furnished to or purchased by the facility from organizations related to the provider by common ownership or control must adhere to the related party allowable cost principles. Expenses for such transactions should not exceed expenses for like items or services in an arms-length transaction with other non-related organizations, or the cost to the related organization.

Administrative overhead costs and space costs in nursing facilities conducting in-house training are not considered training and testing program costs. The costs reported must be specifically incurred in conducting the approved nurse aide training and testing program.

Supporting accounting records such as class attendance rosters or training participation logs, purchase orders, vendor invoices, contracts, documentation verifying amounts reimbursed to employees for approved training program expenses incurred by the employee prior to employment at the facility (e.g., canceled check, training program receipt) must be maintained for audit purposes. Supporting materials should be readily identifiable as training related cost documentation and must indicate the type of training involved.

Training Program Approval Requirement - Only costs incurred relative to a Department of Licensing And Regulatory Affairs (LARA) Bureau of Community and Health Systems approved Nurse Aide Training Program may be claimed on this schedule. An approved program may be conducted by the provider’s facility or by a separate entity from the provider. The provider must not report and make claim for Medicaid Program reimbursement on this schedule for any costs incurred and associated with providing training by the lockout facility during the lockout time period. Allowable nurse aide training program costs during the lockout time period are limited to the costs incurred in obtaining training and testing outside the facility from an approved nurse aide training program.

Note: If the facility maintains separate cost center reporting for the training program, enter the appropriate costs as identified.

ITEM EXPLANATION

1. Provider's Cost Reporting Period
   Enter the fiscal period coinciding with the provider's cost reporting period.

2. Mode of Training
   It is possible that providers may utilize both in-house staff and outside contractors. If a chain organization or group home ownership uses an approved central training program, indicate the training as “in-house” and check "centralized training." If multiple outside contractors are used, indicate each contractor and the time periods utilized.

6. Lockout Facility
   A facility identified by the LARA Bureau of Community and Health Systems as a “lockout facility” cannot conduct an approved training and testing program, cannot be a training/clinical practice site for another approved program, and cannot conduct clinical skills testing. The facility is notified of the lockout determination action by the LARA Bureau of Community and Health Systems.

8. Estimated Total Inpatient Days for the Period
   Indicate the appropriate number of LTC total inpatient days of care estimated to be rendered during the time period reported on this form.

13. Name of Facility
   Enter the provider name under which Medicaid payments are issued to the provider.

15. County Number
   Enter the two-digit county number.

14-16. Provider Location
   Enter street address, city (village and/or township) and zip code of the facility's physical location.

17. Provider NPI Number
   Enter the Nursing Facility's ten-digit provider NPI number.

18. Provider's License Number
   Enter the three-digit license number.
1. **Facility Training Staff**
   Payroll-related costs for facility employees incurred by the approved program's direct training time or the nurse aide training program's preparation time.

2. **Nurse Aide Training Consultants**
   Costs incurred for non-facility staff engaged to provide instruction or consultation for the facility's approved nurse aide training program.

3. **Nurse Aide Student Staff**
   Payroll costs for facility employees incurred while the student is engaged in the approved training program or traveling to and from the off-site approved training location, or is engaged in off-site testing or traveling to and from the off-site testing location.

4. **Training Program Supplies**
   Cost incurred for supplies and materials used in conducting an approved training program.

5. **Training Program Transportation**
   Travel or transportation costs incurred by facility staff conducting the approved training program activity and testing, or for off-site nurse aide training and testing. Identify costs separately for training staff and student staff.

6. **Outside Contracted Approved Nurse Aide Training Program**
   **Paid Directly By Facility** - Costs incurred to obtain nurse aide training through an outside entity approved training program. Payment for subject training is made directly from the nursing facility to the training entity and the nurse aide trainees are employed by the nursing facility.
   **Reimbursed To Employee Staff** - Costs incurred to reimburse a facility employee who had personally paid for an approved nurse aide training program prior to becoming an employee at the facility. Reasonable and necessary expenses incurred by the employee through participation and completion of a Bureau of Community and Health Systems approved training program for which the aide has made payment are eligible for remuneration. Only the cost of tuition and books are reimbursed. The aide must be hired by a facility within 12 months after incurring this expense. The facility must obtain receipts and retain documentation from the employee to verify the expense.

7. **Nurse Aide Testing Fees**
   **Paid Directly By Facility** - Costs incurred for State-run testing. Payment for testing fees is made directly from the nursing facility to the testing authority for aides employed at the facility.
   **Reimbursed To Employee Staff** - Costs incurred to reimburse a facility employee who had personally paid for State-run testing prior to becoming an employee at the facility. The aide must be hired by a facility within 12 months after paying the testing fee. The facility must obtain receipts and retain documentation from the employee to verify the expense.

8. **Other Training Program Costs**
   Costs incurred that are not classified in the identified cost categories 1-7.

   Rental costs for space located off-site of the facility are reimbursable under training and testing only if the space is used solely for the training and testing program. Space costs not meeting this requirement are reimbursable within the plant cost component of Michigan's prospective reimbursement system. Reasonable rental expense for training equipment necessary to the approved training program is an eligible cost.

   Enter the detail and cost of these individual expenses in the yellow shaded cells. The total of these items will be automatically calculated by use of the F9 key.

9. **Total Training Program Cost Before Equipment Allowance**
   Subtotal of Lines 1 through 8b costs. This total will be automatically calculated by use of the F9 key.

10. **Training Program Equipment Use Allowance**
    An annual cost allowance is made for equipment purchased specifically for the Bureau of Community and Health Systems approved nurse aide training program. Such equipment purchases are not included in the plant asset costs of the facility for routine nursing care. An annual allowance of 15 percent of the equipment purchase price is reported as a cost of the training program for as long as the equipment is used in the program, but cannot exceed seven years.

    The use allowance is an annual percentage adjustment made to the 15 percent amount if the cost report period differs from 12 months. Line 10.a. and Line 10.b. will automatically be calculated.

    Enter line 10.c. the cost of the equipment purchased as required in the yellow shaded cells.
Completion Instructions for MSA-115
Occupational Therapy - Physical Therapy - Speech Therapy
Prior Approval Request/Authorization

General Instructions

The MSA-115 must be used by Medicaid-enrolled outpatient hospitals, outpatient therapy providers, nursing facilities and home health agencies to request prior authorization (PA) for therapy services. MDHHS requires that the MSA-115 be typewritten, handwritten forms will not be accepted. Fill-in enabled copies of this form can be downloaded from the Michigan Department of Health and Human Services (MDHHS) website www.michigan.gov/medicaidproviders >> Policy, Letters & Forms. The PA request must be complete and of adequate clarity to permit a determination of the appropriateness of the service without examination of the beneficiary.

PA may be authorized for a period not to exceed six months for outpatient therapy providers and outpatient hospitals, or two months for home health agencies and nursing facilities. If continued treatment is necessary, a subsequent request for PA must be submitted. The provider should retain a copy of the PA form until the approval or denial is determination is received.

For complete information on covered services, PA, and documentation requirements, refer to the Therapy Services Chapter of the Michigan Medicaid Provider Manual located at the MDHHS website www.michigan.gov/medicaidproviders >> Policy, Letters & Forms >> Medicaid Provider Manual.

Attachments/Additional Documentation

All additional attachments/documentation submitted with the request must contain the beneficiary name and mihealth card number, provider name and address, and the provider’s National Provider Identifier (NPI) number.

When requesting the initial PA, the provider must attach a copy of the initial evaluation and treatment plan to the PA request.

Form Completion

**Form Submission:**
PA request forms for all eligible Medicaid beneficiaries must be submitted electronically*, mailed or faxed to:

MDHHS – Program Review Division  
P.O. Box 30170  
Lansing, Michigan 48909  
Fax Number: (517) 335-0075  

If submitting electronically, the completed MSA-115 must be uploaded along with the supporting clinical documentation required.

To check the status of a PA request, contact the Program Review Division via telephone at 1-800-622-0276 or electronically via the CHAMPS Provider Portal located at [https://milogintp.michigan.gov](https://milogintp.michigan.gov).

**Authority:** Title XIX of the Social Security Act.  
**Completion:** Is voluntary but is required if payment from applicable programs is sought.

The Michigan Department of Health and Human Services (MDHHS) does not discriminate against any individual or group because of race, religion, age, national origin, color, height, weight, marital status, genetic information, sex, sexual orientation, gender identity or expression, political beliefs, or disability.
The provider is responsible for eligibility verification. Approval does not guarantee beneficiary eligibility or payment. All fields must be completed and typewritten.

The MSA-6544-B must be used by Medicaid enrolled providers to request provider services that require prior authorization (PA) (e.g. out-of-state care and genetic testing).

MDHHS requests that the MSA-6544-B be typewritten to facilitate processing. A Word fill-in enabled version of this form can be downloaded from the MDHHS website www.michigan.gov/medicaidproviders >> Policy, Letters & Forms. For information on required modifiers, documentation, and appropriate quantity amounts, refer to the following documents:

- Standards of Coverage portion of the provider-specific chapters of the Medicaid Provider Manual.
- Billing & Reimbursement for Professionals Chapter of the Medicaid Provider Manual.
- Provider-specific databases on the MDHHS website. www.michigan.gov/medicaidproviders >> Billing and Reimbursement >> Provider Specific Information.
- For more detailed information on procedure codes refer to CHAMPS – External Links – Medicaid Code and Rate Reference.

Completion of this form is as follows:

<table>
<thead>
<tr>
<th>Box 1</th>
<th>MDHHS Use Only</th>
</tr>
</thead>
<tbody>
<tr>
<td>Box 22</td>
<td>Indicate whether this is the first request for services or if this is a renewal request for ongoing services</td>

Sections II and III of this form must be completed by a registered nurse, licensed bachelor or master social worker, licensed professional counselor, psychologist, physician’s assistant, nurse practitioner or a physician.

**SECTION II** – Screening Criteria (All 6 items must be completed.)

1. □ No □ Yes .......... The person has a current diagnoses of **Mental Illness** or **Dementia** (Circle one)

2. □ No □ Yes .......... The person has received treatment for **Mental Illness** or **Dementia** (within the past 24 months) (Circle one)

3. □ No □ Yes .......... The person has routinely received one or more prescribed antipsychotic or antidepressant medications within the last 14 days.

4. □ No □ Yes .......... There is presenting evidence of mental illness or dementia, including significant disturbances in thought, conduct, emotions, or judgment. Presenting evidence may include, but is not limited to, suicidal ideations, hallucinations, delusions, serious difficulty completing tasks, or serious difficulty interacting with others.

5. □ No □ Yes .......... The person has a diagnosis of an intellectual disability or a related condition including, but not limited to, epilepsy, autism, or cerebral palsy and this diagnosis manifested before the age of 22.

6. □ No □ Yes .......... There is presenting evidence of deficits in intellectual functioning or adaptive behavior which suggests that the person may have an intellectual disability or a related condition. These deficits appear to have manifested before the age of 22.

**Note:** If you check “Yes” to items 1 and/or 2, circle the word “**Mental Illness**” or “**Dementia.**”

**Note:** Explain any “Yes”

**Note:** The person screened shall be determined to require a comprehensive Level II OBRA evaluation if any of the above items are "Yes" UNLESS a physician, nurse practitioner or physician’s assistant certifies on form DCH-3878 that the person meets at least one of the exemption criteria.

**SECTION III** – CLINICIAN’S STATEMENT: I certify to the best of my knowledge that the above information is accurate.

**AUTHORITY:** Title XIX of the Social Security Act

**COMPLETION:** Is voluntary, however, if NOT completed, Medicaid will not reimburse the nursing facility.

The Michigan Department of Health and Human Services (MDHHS) does not discriminate against any individual or group because of race, religion, age, national origin, color, height, weight, marital status, genetic information, sex, sexual orientation, gender identity or expression, political beliefs or disability.

**DISTRIBUTION:** If any answer to items 1 – 6 in SECTION II is "Yes", send **ONE copy** to the local Community Mental Health Services Program (CMHSP), with a copy of form DCH-3878 if an exemption is requested. The nursing facility must retain the original in the patient record and provide a copy to the patient or legal representative.
PREADMISSION SCREENING (PAS)/ANNUAL RESIDENT REVIEW (ARR)
Mental Illness/Intellectual Disability/Related Conditions Identification

Instructions for Completing Level I Screening

This form is used to identify prospective and current nursing facility residents who meet the criteria for possible mental illness or intellectual disability, or a related condition and who may be in need of mental health services.

Sections II and III must be completed by a registered nurse, licensed bachelor or master social worker, licensed professional counselor, psychologist, physician’s assistant, nurse practitioner or physician.

Preadmission Screening or Hospital Exempted Discharge: The referral source completing the Level I Screening (DCH-3877), must complete and provide a copy to the proposed nursing facility prior to admission. Check the appropriate box in the upper right hand corner.

Annual Resident Review or Change in Condition: This form must be completed by the nursing facility. Check the appropriate box in the upper right hand corner.

Section II – Screening Criteria – All 6 items in this section must be completed. The following provides additional explanation of the items.

1. Mental Illness: A current primary diagnosis of a mental disorder as defined in the American Psychiatric Association Diagnostic and Statistical Manual of Mental Disorders.
   
   Current Diagnosis means that a clinician has established a diagnosis of a mental disorder within the past 24 months. Do NOT mark “Yes” for an individual cited as having a diagnosis “by history” only.

2. Receipt of treatment for mental illness or dementia within the past 24 months means any of the following: inpatient psychiatric hospitalization; outpatient services such as psychotherapy, day program, or mental health case management; or referral for psychiatric consultation, evaluation, or prescription of psychopharmacological medications.

3. Antidepressant and antipsychotic medications mean any currently prescribed medication classified as an antidepressant or antipsychotic, plus Lithium Carbonate and Lithium Citrate.

4. Presenting evidence means the individual currently manifests symptoms of mental illness or dementia, which suggests the need for further evaluation to establish causal factors, diagnosis and treatment recommendations. Further evaluation may need to be completed if evidence of suicidal ideation, hallucinations, delusion, serious difficulty completing tasks or serious difficulty interacting with others.

5. Intellectual Disability/Related Condition: An individual is considered to have a severe, chronic disability that meets ALL 4 of the following conditions:
   
   a. It is manifested before the person reaches age 22.
   b. It is likely to continue indefinitely.
   c. It results in substantial functional limitations in 3 or more of the following areas of major life activity: self-care, understanding and use of language, learning, mobility, self-direction, and capacity for independent living.
   d. It is attributable to:
      • Intellectual Disability such that the person has significant subaverage general intellectual functioning existing concurrently with deficits in adaptive behavior and manifested during the developmental period;
      • cerebral palsy, epilepsy, autism; or
      • any condition other than mental illness found to be closely related to Intellectual Disability because this condition results in impairment in general intellectual functioning OR adaptive behavior similar to that of persons with Intellectual Disability, and requires treatment or services similar to those required for these persons.

6. Presenting evidence means the individual manifests deficits in intellectual functioning or adaptive behavior, which suggests the need for further evaluation to determine the presence of a developmental disability, causal factors, and treatment recommendations. These deficits appear to have manifested before the age of 22.

NOTE: When there are one or more “Yes” answers to items 1 – 6 under SECTION II, complete form DCH-3878, Mental Illness/Intellectual Disability/Related Condition Exemption Criteria Certification only if the referring agency is seeking to establish exemption criteria for a dementia, state of coma, or hospital exempted discharge.
Michigan Department of Health and Human Services

Private Duty Nursing Prior Authorization – Request for Services

The MSA-0732 form (page 2) must be submitted every time services are requested, i.e., before services can begin and for each specified authorization period thereafter, no less than 15 days prior to the end of the current authorization period.

MDHHS requests that the MSA-0732 be typewritten to facilitate processing. A Word fill-in enabled version of this form can be downloaded from the MDHHS website www.michigan.gov/medicaidproviders >> Policy, Letters & Forms >> Forms.

This form must be used to request Prior Authorization (PA) for Private Duty Nursing (PDN) services for beneficiaries with Medicaid coverage under 21 years of age. Private Duty Nursing is not a benefit under Children’s Special Health Care Services (CSHCS). Beneficiaries with CSHCS coverage may be eligible for PDN under Medicaid. A request to begin services may be submitted by a person other than the PDN such as the hospital Discharge Planner, CSHCS case manager, physician, or physician’s staff person. When this is the case, the person submitting the request must do so in consultation with the PDN who will be assuming responsibility for the care of the beneficiary. If services are being requested for more than one beneficiary in the home, a separate form must be completed for each beneficiary.

Refer to the Medicaid Provider Manual, Private Duty Nursing Chapter, Prior Authorization Subsection, for the listing of required documentation to accompany each request.

Completion of this form is as follows:

<table>
<thead>
<tr>
<th>Item#</th>
<th>Instructions</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Prior Authorization Number. MDHHS use only.</td>
</tr>
<tr>
<td>2</td>
<td>Check specific box as to whether this is an initial or renewal request. If a renewal, check the INCREASE UNITS or DECREASE UNITS box only if this request demonstrates an increase or decrease in time from the previous authorization period. Time is authorized and billed in 15-minute incremental units (1 unit = 15 minutes).</td>
</tr>
<tr>
<td>3 - 7</td>
<td>PDN provider information. Provide complete agency name, or name of individual (last, first, and middle initial). Designate whether RN or LPN. Include NPI number, phone number, address, and fax number.</td>
</tr>
<tr>
<td>8 - 14</td>
<td>Beneficiary information. Provide complete name and birth date (month, day, and year); sex, mihealth card number, complete address, county, and primary diagnosis using the appropriate ICD code only.</td>
</tr>
<tr>
<td>15 - 18</td>
<td>Other insurance information if applicable, including name of company and beneficiary’s group/policy and certificate/contract numbers.</td>
</tr>
<tr>
<td>19 - 25</td>
<td>Hospital information including complete address and phone number, anticipated discharge date, and name and contact information of Discharge Planner, if beneficiary is currently hospitalized.</td>
</tr>
<tr>
<td>26 - 30</td>
<td>Ordering physician information. Provide complete name (including MD or DO); NPI number, phone number, address, and fax number.</td>
</tr>
<tr>
<td>31 - 35</td>
<td>Description of the service(s) to be provided utilizing HCPCS code T1000 and modifier TD for RN or TE for LPN. Use modifier TT if caring for more than one beneficiary. Include the number of total units per month required to provide the service(s) with the start date and end date, if known.</td>
</tr>
<tr>
<td>36 - 40</td>
<td>Home environment information, including number of siblings residing in the home (include step and foster child(ren)) if applicable, and if they receive PDN. Provide child’s name and mihealth card number if receiving PDN. Also provide the number of other individuals in the home requiring care (e.g., elderly parent, grandparent, disabled spouse, sibling), name(s) and number of caregivers for the beneficiary for whom services are being requested, and whether the care giver(s) work and/or attend school outside of the home. If so, how many hours are spent working and/or attending school. (Additional pages may be required.)</td>
</tr>
<tr>
<td>41 - 42</td>
<td>Current school information if child is or will be attending school during the authorization period when PDN services are being provided. Include number of hours per day and per week, including travel time.</td>
</tr>
<tr>
<td>43 - 49</td>
<td>If more than one PDN or PDN agency is involved, their name(s), phone number(s), fax number(s), and which PDN will be managing the care plan (i.e., the provider named in items 2 – 6, or the provider named in this space).</td>
</tr>
<tr>
<td>50 - 56</td>
<td>List all other services in the home. Failure to disclose all services in the home may result in recoupment of Medicaid dollars for PDN reimbursement.</td>
</tr>
<tr>
<td>57</td>
<td>The Provider’s signature certifies that (1) the individual PDN or agency requesting the services understands the necessity for obtaining prior authorization for PDN and; (2) The information provided on this form is accurate and complete.</td>
</tr>
<tr>
<td>59</td>
<td>Signature certifies that Parent/Guardian of beneficiary attests that information provided on this form is accurate and complete to the best of their ability.</td>
</tr>
</tbody>
</table>

Form Submission

The completed MSA-0732 (page 2) and required documentation must be mailed or faxed to:

Michigan Department of Health and Human Services  Fax: (517) 241-7813
Program Review Division
P.O. Box 30170
Lansing, MI 48909

Questions should be directed to MDHHS - Medical Services Administration, Program Review Division via telephone at 1-800-622-0276.

AUTHORITY: Title XIX of the Social Security Act
COMPLETION: Is voluntary, but is required if payment from applicable programs is sought. The Michigan Department of Health and Human Services is an equal opportunity employer, services and programs provider.
## Michigan Department of Health and Human Services

The Michigan Department of Health and Human Services (MDHHS) does not discriminate against any individual or group because of race, religion, age, national origin, color, height, weight, marital status, genetic information, sex, sexual orientation, gender identity or expression, political beliefs or disability.
To facilitate processing of your request for low vision services and aids, this form must be completed. Failure to provide complete documentation will result in automatic disapproval of your request. Do not use abbreviations as their use may result in misinterpretation and possible disapproval. A Vision Services Approval/Order form (DCH-0893) must accompany this documentation. (Exception: High add bifocals do not require prior approval; hence, a completed DCH-0893 should be sent directly to the State’s vision contractor.)

REQUEST FOR AUTHORIZATION OF PRIVATE ROOM
SUPPLEMENTAL PAYMENT FOR NURSING FACILITY
Michigan Department of Health and Human Services

This is my written request for authorization of supplemental payment for a single room for:

<table>
<thead>
<tr>
<th>Name of Beneficiary/Resident</th>
<th>Medicaid ID Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>Facility Contact</td>
<td>Facility Telephone Number</td>
</tr>
<tr>
<td>Facility Name</td>
<td>Facility Fax Number</td>
</tr>
<tr>
<td>Facility Address</td>
<td></td>
</tr>
</tbody>
</table>

The basis for this request is:

- [ ] I believe a single room is medically necessary. (If medically necessary, the Medicaid daily rate already pays for a single room.)
- [ ] I believe a single room is not medically necessary, but is needed for the following reason(s):

I understand that I must accept responsibility for paying the difference between the facility’s two-person room and single room rates that are listed below. I will pay any difference in the rates that may change over time, as long as a single room is needed.

| Two-person room rate: $ _______ per day |
| Single room rate: $ _________ per day   |

Printed Name of Requestor                      Telephone Number

Address                                             Relationship to Beneficiary/Resident

Signature of Requester                          Date

MAIL TO: Long Term Care Services
         Michigan Department of Health and Human Services
         PO Box 30479
         Lansing, MI 48909-7979

FAX TO: 517-241-8995

Note: If no response is received within 10 working days, contact 517-241-4293.

The Michigan Department of Health and Human Services (MDHHS) does not discriminate against any individual or group because of race, religion, age, national origin, color, height, weight, marital status, genetic information, sex, sexual orientation, gender identity or expression, political beliefs or disability.
Form DCH-0078 is a formal request for change in other insurance status and must be submitted by the Medicaid provider, Medicaid Health Plan, Local Health Department or the Michigan Department of Health and Human Services caseworker to add, terminate, or change beneficiary insurance information other than Medicaid.

INSTRUCTIONS:
To add, terminate or change other insurance on-line, visit https://www.Michigan.gov/ReportTPL to access the form and instructions.

To submit the form via fax or mail:
- PRINT or TYPE to complete the form
- Place a check mark in the appropriate "Add," "Terminate," or "Change" field
- Sections denoted by * are mandatory to be completed
- Attach clear copy of insurance card (front and back) when adding insurance (if available)
- Retain a COPY in beneficiary file
- Submit form and applicable attachments via: Fax Number: 517-346-9817
  Mail to: Michigan Department of Health and Human Services
  Third Party Liability Division
  Bureau of Medicaid Operations
  PO Box 30479
  Lansing MI 48909

Allow 7-10 business days for the request to be completed. To verify the request has been completed, view the beneficiary eligibility information in the Community Health Automated Medicaid Processing System (CHAMPS).

AUTHORITY: Title V and Title XIX of the Social Security Act.
COMPLETION: Is voluntary.

DCH-0078 (6-15) Previous editions are obsolete.

SAMPLE NOTICE OF NON-COVERAGE

(Hospital Letterhead)

(Name of Patient)  (Date of Notice)
(Address)
(City, State, Zip)

(Medical Record Number)
(Beneficiary Number)
(Attending Physician’s Name)
(Admission Date)

Dear (Name of Patient)

SUBJECT: CONTINUED STAY NOTICE OF NON-COVERAGE

As a Medicaid beneficiary, it is important for you to understand that there are circumstances when Medicaid does not pay for hospital care or certain services provided in the hospital. Medicaid pays for hospital care when the services are medically necessary and delivered in the most appropriate setting.

The Utilization Review Committee of (Name of Hospital) has reviewed the medical services you have received for (Specify services or condition) from (Date of Admission) to (Date of Notice). The Review Committee has determined that your continued stay in an acute care hospital is not medically necessary, and the medical services you are receiving for (Specify services or condition) could be safely rendered in another less costly setting. You should discuss with your attending physician the arrangements for the health care you may require.

You will not be responsible for payment of the services which are rendered by this hospital from (Date of Admission) through the date you receive this notice, except for payment of deductible, coinsurance, or any convenience services or items not covered by Medicaid. If you decide to stay in the hospital, you will be responsible for payment of all services provided to you by this hospital beginning the day after you receive this notice.

For example: If you receive this notice on ______ you will be responsible for payment of services provided beginning________.

The Michigan Peer Review Organization (MPRO) is the review organization authorized by the Medicaid Program to re-review on behalf of the patient or his/her physician any hospital denied to Medicaid patients in the State of Michigan.

If you disagree with this decision and you remain in the hospital, you or your representative may request an immediate review by MPRO. You may request this by calling:

Michigan Peer Review Organization
Attention: Medicaid PACER Program
22670 Haggerty Rd., Ste. 100
Farmington Hills, MI 48335-2611
Telephone: 1-800-727-7223
"SAMPLE"
NOTICE OF NON-COVERAGE

(Hospital Letterhead)

(Name of Patient) (Date of Notice)
(Address)
(City, State, Zip)

(Medical Record Number)
(Beneficiary Medicaid Number)
(Attending Physician’s Name)
(Admission Date – if applicable)

Subject: NOTICE OF NON-COVERAGE FOR INPATIENT HOSPITAL ADMISSION

Dear (Name of Patient):

As a Medicaid beneficiary, it is important for you to understand that there are circumstances when Medicaid does not pay for hospital care or inpatient services provided in the hospital. Medicaid pays for hospital care when the services are medically necessary and delivered in the most appropriate setting.

NOTICE OF NON-COVERAGE
(Name of Hospital) Utilization Review (UR) Committee has reviewed your physician’s request for your hospital admission. The request has been denied. The hospital’s UR Committee has determined that your admission to (Name of Hospital) for treatment of (Specify services or condition) is either: 1) not medically necessary, or 2) that the medical services you may require for the treatment of your condition can be safely rendered in another less costly setting. You should discuss arrangements for any health care treatment you may require with your physician.

APPEAL RIGHTS
The Michigan Peer Review Organization (MPRO) is the review organization authorized by the Medicaid Program to review on behalf of the patient or his/her physician any hospital care denied to Medicaid patients in the State of Michigan.

If you disagree with this decision, you or your representative must request an immediate review by MPRO. You must request this review by calling:

Michigan Peer Review Organization
Attention: Medicaid PACER Program
22670 Haggerty Road, Suite 100
Farmington Hills, MI 48335-2611
Telephone: 1-800-727-7223

If MPRO confirms the hospital’s initial decision, you will be notified in writing of its decision. If you decide to proceed with the admission to the hospital, you will be responsible for the payment of all services provided to you by the hospital beginning with the date of admission.

If MPRO overturns the hospital’s decision, you will also be notified in writing of MPRO’s decision. The hospital will contact your physician and make arrangements for your admission to the hospital. Medicaid will cover the cost of your hospital stay except for the payment of any deductible, coinsurance, or convenience services or items not covered by Medicaid.
Maternal Infant Health Program Provider and Medicaid Health Plan
Care Coordination Agreement

This agreement is made and entered into this _____ day of _____, in the year _____ by and between ____________________________ (Medicaid Health Plan) and ____________________________ (Maternal Infant Health Program provider).

A. Legal Basis

Whereas, in order to expand enrollment, the Michigan Department of Health and Human Services (MDHHS) has established a competitive bid process that has resulted in contracts with Medicaid Health Plans (MHPs) that are deemed to be qualified to provide specified health care services to Medicaid beneficiaries; and

Whereas, Medicaid-covered maternal and infant health services will be provided through arrangements between MDHHS, MDHHS contracted MHPs, and selected Maternal Infant Health Program (MIHP) providers.

Now, therefore, the MHP and the MIHP provider agree as follows:

B. Terms of Agreement

This agreement will be effective ________ in the year ________. This agreement will be subject to amendment due to changes in the contract between MDHHS and the MHP or changes to the MIHP Medicaid policy certification requirements.

This agreement is effective upon execution and will continue for the length of MHP and MDHHS contract period. Either party may cancel this agreement for cause upon 30 days written notice. Reasons for cause include: breach of duty or obligation; fraud or abuse; federal or state sanctions; and failure to comply with state law or rules the Medicaid Provider Manual, or the MIHP Operations Guide. The terminating party is required to notify MDHHS at least 30 days prior to termination. This agreement will automatically terminate when an MIHP provider fails to maintain the certification requirements of MDHHS.

Once a signed agreement is obtained from both parties, the provisions of this agreement will be extended for a timeframe consistent with the MHP and MDHHS contract period, and the MIHP provider maintaining certification with MDHHS. Either party may cancel this agreement upon 30 days written notice. MDHHS must be notified of the termination of this agreement.
C. Purpose, Administration and Point of Authority

MIHP services are home-visiting preventive services provided to pregnant women, mothers, and their infants to promote healthy pregnancies, positive birth outcomes, and healthy infant growth and development. These support services are to be provided by a multidisciplinary team of health care professionals consisting of a qualified licensed registered nurse, licensed social worker and, if available, a registered dietitian and/or infant mental health specialist.

MIHP services are intended to supplement regular prenatal/infant care and to assist physicians (MD, DO), certified nurse midwives (CNMs), and nurse practitioners (NPs) contracted with MHPs. In compliance with MIHP and MHP guidelines, MIHP providers are to coordinate care with medical care providers, mental health providers, and the MHPs, as well as assist in the coordination of transportation services as needed for health care, support services and pregnancy-related appointments.

MDHHS/MHP Contracts and MHP/MIHP Care Coordination Agreements will be available for review upon request by MDHHS. The intent of the Care Coordination Agreement is to explicitly describe the services to be coordinated and the essential aspects of collaboration between the MHP and the MIHP provider.

The MHP shall designate in writing to the MIHP provider the person who has authority to administer this agreement. The MIHP provider shall designate in writing to the MHP the person who has authority to administer this agreement.

D. Areas of Responsibility

Mutually Served Consumers

Mutually served consumers refers to MHP beneficiaries who also qualify for MIHP services. All pregnant and infant Medicaid beneficiaries may qualify for MIHP services. The intent of establishing written procedures between the MHP and the MIHP provider is to assure service coordination and continuity of care for persons receiving services from both entities.

Services to be Provided by the MHP

The MHP will provide Medicaid covered services to Medicaid beneficiaries as required by the MHP contract with MDHHS. MIHP services are voluntary. Beneficiaries may refuse MIHP services at any time.

The MHP will notify all Medicaid beneficiaries enrolled in the MHP of the availability of MIHP services at the time of enrollment. The MHP shall provide a referral for MIHP services for those pregnant and infant Medicaid beneficiaries who are not currently receiving MIHP services or receiving equivalent maternal or infant support services from an evidence-based home visiting program. Referrals can be made in person, by letter, email, fax, or telephone.
Services to be Provided by the MIHP Provider

The MIHP provider will provide the following services:

- Psychosocial and nutritional screening and assessment;
- Plan of care development;
- Professional intervention services by a multidisciplinary team consisting of a qualified licensed registered nurse and licensed social worker and, when available, a registered dietitian and/or an infant mental health specialist;
- Coordination with the MHP for transportation services as needed for health care, substance use disorder treatment, support services, oral health services, and/or pregnancy-related appointments.
- Referral to community services (e.g. mental health, substance use disorder);
- Referral to or provision of childbirth or parenting education classes;
- Coordination with medical care providers; and
- Coordination with the MHP.

MIHP providers will bill and receive reimbursement for MIHP services provided to MHP members as noted in the provider contract established with the applicable MHP.

E. Medical Coordination

Both parties agree to establish a process for clinical staff to communicate on a regular basis to review the care coordination plans and status of mutually served beneficiaries in accordance with applicable privacy laws such as HIPAA, the Mental Health Code and 42 CFR Part 2. This may involve the sharing of written documents and verbal reports. Both parties will collaborate on development of referral procedures and effective means of communicating the need for individual referrals. The MIHP provider will provide the MHP with names of MHP beneficiaries receiving MIHP services on a regular basis, utilizing a standardized form. Communication may include assessment/screening results, the plan of care, and discharge summaries upon request.

The MIHP and MHP will accept and use the MDHHS behavioral health consent form (Consent to Share Behavioral Health Information form [MDHHS-5515]) to disclose medical information protected under the Mental Health Code or substance use disorder information under 42 CFR Part 2.

F. Grievance and Appeals

MIHP providers and MHPs are required to establish internal processes for resolution of grievances and appeals from Medicaid beneficiaries. Medicaid beneficiaries may file a grievance or appeal on any aspect of service provided to them by the MIHP or the MHP in accordance with MIHP and MHP grievance and appeal policies.
The MIHP provider is required to direct beneficiaries to the MHP’s grievance and appeal process as appropriate. The MHP is required to direct beneficiaries to the MIHP provider’s grievance and appeal process as appropriate.

Both parties will participate in grievance and appeal policies and shall cooperate in identifying, processing, and promptly resolving all grievances and appeals. Both parties are responsible for informing the other about their grievance and appeal process.

G. Dispute Resolution

Both parties agree to participate in a dispute resolution process in the event that the MHP or the MIHP provider contests a decision or action by the other party related to the terms of this agreement.

The dispute resolution process should include:

- Request to the other party for reconsideration of the disputed decision or action.
- Appeal to MDHHS regarding a disputed decision by an MHP, or for a disputed decision by an MIHP provider.

H. Transportation

The MHP and the MIHP provider each have specific requirements for coordinating transportation services for Medicaid beneficiaries. These responsibilities are outlined in the MHP contract with MDHHS, the contract between the MIHP and the MHP and in the Maternal Infant Health Program Chapter of the Medicaid Provider Manual.

The MIHP provider may coordinate transportation in accordance with the established MIHP/MHP provider agreement or refer the Medicaid beneficiary to utilize the MHP transportation benefit to access MHP covered services, substance use disorder treatment, oral health services, support services and/or pregnancy-related appointments.

Transportation must be arranged and provided within a reasonable timeframe to meet the needs of the beneficiary. The provision or arrangement of transportation may not be delayed due to disagreements between the MIHP and MHP regarding financial responsibility for transportation. Disputes as to payment of transportation services may be handled through the dispute resolution process.

I. Quality Improvement

Both parties agree to have mechanisms in place to conduct Quality Improvement activities to monitor the coordination of services. The MIHP provider and the MHP shall participate in quality improvement programs and shall cooperate in conducting reviews and audits of care.
J. Governing Laws

Both parties agree that performance under this agreement will be conducted in compliance with all federal, state and local laws, regulations, guidelines, and directives.

The MSA-1653-B must be used by Medicaid enrolled DME, Medical Suppliers, Orthotists, Prosthetists, Hearing Aid Dealers, Audiologists and Cochlear Manufacturers.

MDHHS requests that the MSA-1653-B be typewritten to facilitate processing. A Word fill-in enabled version of this form can be downloaded from the MDHHS website www.michigan.gov/medicaidproviders >> Policy, Letters & Forms. The form is generally self-explanatory. For information on required modifiers, documentation, and appropriate quantity amounts, refer to the following documents:

- Standards of Coverage portion of the provider-specific chapters of the Medicaid Provider Manual.
- Billing & Reimbursement for Professionals Chapter of the Medicaid Provider Manual.
- Provider-specific databases on the MDHHS website. www.michigan.gov/medicaidproviders >> Billing and Reimbursement >> Provider Specific Information.

Completion of this form is as follows:

| Box 1 | MDHHS Use Only |
| Box 12 | Check Yes if beneficiary is in a Nursing Facility or No if the beneficiary is not in a Nursing Care Facility. If Yes, include the Nursing Facility name, address and phone number. |
| Box 20 | Enter a complete description of the item requested, including manufacturer, model, style, etc. DME, orthotics and prosthetics, must provide the brand name, model, and catalog or part number. |
| Box 21 | Enter the HCPCS Procedure Code. |
| Box 22 | Enter the applicable HCPCS Modifier. |
| Box 25 | Enter the beneficiary’s primary and secondary diagnoses or the CSHCS qualifying diagnosis (list both the code and description). DME/POS providers must submit the prescription/CMN with this form. |
| Box 26 | Any additional remarks regarding the request should be listed in this box such as verbal authorization date, retroactive date of service if being requested. Provide other insurance coverage for services requested. |
| Box 28 | Must be completed for all requests. |

**Form Submission**

PA request forms and required documentation for all eligible Medicaid beneficiaries must be mailed or faxed to:

**MDHHS - Medical Services Administration**  
Program Review Division  
P.O. Box 30170  
Lansing, Michigan 48909

Fax Number: (517) 335-0075

To check the status of a PA request, contact the MDHHS - Medical Services Administration, Program Review Division via telephone at 1-800-622-0276.
The provider is responsible for eligibility verification. Approval does not guarantee beneficiary eligibility or payment.

VISION SERVICES APPROVAL/ORDER
COMPLETION INSTRUCTIONS FOR DCH-0893
Michigan Department of Health and Human Services

GENERAL INSTRUCTIONS
The DCH-0893 must be used by Medicaid enrolled vision providers to request Prior Approval (PA) and/or order optical hardware for vision services. MDHHS requests that the DCH-0893 be typewritten to facilitate processing. A fill-in enabled copy of this form can be downloaded from the MDHHS website www.michigan.gov/medicaidproviders >> Policy, Letters & Forms. The request for PA must be complete and of adequate clarity to permit a determination of the appropriateness of the service without examination of the beneficiary. The form is generally self-explanatory. The following instructions are to assist in completing the DCH-0893.

Note:
- If prior authorization is required, attach documentation of medical necessity and the detailed training plan (if applicable) pursuant to the Medicaid Provider Manual.
- If applicable, complete and attach form MSA-0891 (Provision of Low Vision Services and Aids Support Documentation).
- If applicable, complete and attach form MSA-0892 (Documentation of Medical Necessity for the Provision of Contact Lenses).

</table>
Submission Instructions

Prior Approval

PA requests should be received by the MDHHS Vision Contract Manager no more than 30 calendar days from the date of order. If received beyond 30 days, the provider must include a detailed explanation of why the form submission was delayed.

The provider should retain a copy of the completed form for their file and mail or fax the DCH-0893 to:

MDHHS Vision Contract Manager
Program Review Division
PO Box 30170
Lansing, MI  48909

Fax: 517-335-0075

Upon completion of the PA process, a copy of the DCH-0893 is returned to the provider.

Optical Hardware Order

Orders placed with the vision contractor must be received no more than 30 calendar days after the date of order. If beyond the 30 days, the contractor will return the order to the provider who must explain to the Medicaid Program Review Division why the form submission was delayed and request an exception from the time limit.

When placing an order with the contractor, the provider should retain a copy of the completed form for their file and submit the DCH-0893 to:

Classic Optical Laboratories
3710 Belmont Avenue
PO Box 1341
Youngstown, OH  44501-1341

Telephone: 888-522-2020
Fax: 888-522-2022
Online Address: http://www.classicoptical.com

Note: Optical hardware orders may also be submitted through an online process with the vision contractor. To utilize on-line submission, contact Classic Optical Laboratories for additional information.
The provider is responsible for eligibility verification. Approval does NOT guarantee beneficiary eligibility or payment.
