

Medicaid Provider Manual

MEDICAID PROVIDER MANUAL OVERVIEW

SECTION 1 – INTRODUCTION

The following documents comprise the Michigan Medicaid Provider Manual and address all health insurance programs administered by the Michigan Department of Health and Human Services (MDHHS). MDHHS also issues periodic bulletins as changes are implemented to the policies and/or processes described in the manual. Bulletins are incorporated into the online version of the manual on a quarterly basis. (Refer to the Directory Appendix for website information.)

1.1 ORGANIZATION [CHANGE MADE 7/1/2025]

The following table identifies each chapter and appendix in the manual, indicates what providers are affected, and provides a brief overview of each.

Chapter Title	Affected Providers	Chapter Content
General Provider Chapters		
Medicaid Provider Manual Overview	All Providers	Brief discussion of the organization of the manual and effectively using the document.
General Information for Providers	All Providers	Policies and general information regarding provider enrollment and participation, prior authorization, record retention, billing the beneficiary, fraud and abuse, etc.
Beneficiary Eligibility	All Providers	Policies and information regarding how to verify beneficiary eligibility, information on various eligibility categories, enrollment in contracted health plans, beneficiary utilization control, etc.
Coordination of Benefit	All Providers	Policies and information regarding coordination of benefits, Medicaid's payment liability, etc.
Billing & Reimbursement for Dental Providers	Providers billing the ADA (text deleted 7/1/2025) or 837 Dental claim formats.	Policies and instructions for billing dental services.
Billing & Reimbursement for Institutional Providers	Providers billing the UB-04 or 837 Institutional claim formats.	Policies and instructions for billing institutional services.

Medicaid Provider Manual

Chapter Title	Affected Providers	Chapter Content
Billing & Reimbursement for Professionals	Providers billing the CMS-1500 or 837 Professional claim formats.	Policies and instructions for billing professional services.
Electronic Visit Verification	MI Choice Waiver Agencies, Centers for Independent Living, Integrated Care Organizations (ICOs), Home Help Agency Providers and Individual Caregivers, Prepaid Inpatient Health Plans (PIHPs), Home Health Agencies, Medicaid Health Plans, Community Mental Health Services Programs (CMHSPs)	Information for personal care services (PCS) and home health care services (HHCS) providers of the 21st Century Cures Act requirements for using Electronic Visit Verification (EVV).
Provider/Service Specific Chapters		
Ambulance	Ambulance	Coverage policy related to emergency and non-emergency transports by ground, water or air ambulance.
Ambulatory Surgical Centers	Ambulatory Surgical Centers	Information regarding billing, coverage, and reimbursement policies related to Ambulatory Surgical Centers.
Behavioral Health and Intellectual and Developmental Disability Supports and Services	Mental Health and Substance Abuse providers, Fee for Service – Psychologists, Social Workers, Counselors and Marriage and Family Therapists	Coverage policies and reporting requirements for services provided through Prepaid Inpatient Health Plans. Includes Children's Home and Community Based Services Waiver, Substance Abuse, and Habilitation Supports Waiver information. Includes Fee for Service Non-Physician Behavioral Health.
Brain Injury Services	Brain Injury Services providers, Hospitals, Practitioners, Nursing Facilities	Coverage policy related to services provided by Brain Injury Services.
Children's Special Health Care Services	All Providers	Information regarding program eligibility, benefit package, etc.
Chiropractor	Chiropractor	Coverage policy related to chiropractic services.

Medicaid Provider Manual

Chapter Title	Affected Providers	Chapter Content
Community Health Worker Services	MI Medicaid certified Community Health Workers (CHWs)	Provider enrollment requirements, covered services, and billing and reimbursement considerations.
Community Transition Services	Area Agencies on Aging, Centers for Independent Living, and other qualified community-based organizations	Policy requirements for operations and billing for Community Transition Services
Dental	Dental Providers/Dental Clinics	Coverage policy related to dental services and information on the <i>Healthy Kids Dental</i> Program.
Doula Services	MDHHS-registered Doulas	Provider enrollment requirements, covered services, and reimbursement considerations.
Early and Periodic Screening, Diagnosis and Treatment	All Providers	Coverage policy for Medicaid beneficiaries younger than 21 years of age.
Emergency Services Only Medicaid	All Providers	Information regarding program eligibility, benefit package, etc.
Family Planning Clinics	Title X Clinics	Coverage policy related to family planning services provided through Title X clinics.
Federally Qualified Health Centers	Clinics designated by the U.S. Department of Health & Human Services (HHS) as FQHCs	Coverage and reimbursement policies applicable to FQHCs.
Healthy Michigan Plan	All Providers	Information regarding program eligibility, benefit package, healthy behaviors, cost sharing, etc.
Hearing Services and Devices	Audiologists, Hearing Centers, Hearing Aid Dealers, Speech-Language Pathologists	Coverage and reimbursement policies related to hearing services, therapy, devices, and supplies.
Home and Community Based Services	Integrated Care Organizations (ICOs), Prepaid Inpatient Health Plans (PIHPs), and Waiver Agencies	Coverage policy related to the requirements for Home and Community-Based Services (HCBS)

Medicaid Provider Manual

Chapter Title	Affected Providers	Chapter Content
Home Health	Home Health	Coverage policy related to services provided by home health agencies.
Home Help	Home Help providers	Coverage policy related to services provided by Home Help providers. Also includes information regarding program eligibility, services, and service limits.
Hospice	Hospice, Medical Suppliers	Coverage policy related to hospice services.
Hospital	Inpatient & outpatient hospitals	Coverage policy for inpatient and outpatient hospital services. Also includes cost reporting requirements, Graduate Medical Education and disproportionate share payment methodologies, appeals, etc.
Independent Diagnostic Testing Facilities and Portable X-ray Suppliers	Independent Diagnostic Testing Facilities and Portable X-ray Suppliers	Information regarding enrollment, billing, coverage and reimbursement for Independent Diagnostic Testing Facilities and Portable X-ray Suppliers.
Laboratory	Providers of laboratory tests and services	Coverage, billing, and reimbursement policies related to laboratory tests and services.
Local Health Departments	Local Health Departments	Coverage policy, cost reporting requirements, interim payments, and appeals for local health departments.
Maternal Infant Health Program	Certified MIHP providers	Provider certification requirements, beneficiary eligibility criteria, and covered services.
Maternity Outpatient Medical Services	Providers of Maternity Related Services	Program eligibility requirements, benefit package, and billing instructions.
Medicaid Health Plans	Contracted HMOs	Health plan participation and coverage policies.
Medical Supplier	Medical Suppliers/Durable Medical Equipment, Orthotists/Prosthetists	Coverage policies and parameters for medical supplies, durable medical equipment, orthotics, and prosthetics.
MI Choice Waiver	All Providers	Information regarding program eligibility, benefit package, etc.

Medicaid Provider Manual

Chapter Title	Affected Providers	Chapter Content
MI Health Link	Integrated Care Organizations and related providers	Describes the MI Health Link program which integrates Medicare and Medicaid benefits into one coordinated delivery system.
Non-Emergency Medical Transportation	Non-Emergency Transportation Providers and Authorizing Parties	Coverage policy related to scheduled non-emergency, non-ambulance, medical transportation.
Nursing Facility	Nursing Facilities, Medical Suppliers	Coverage policy; certification, survey and enforcement policy; cost reporting and reimbursement methodology.
Nursing Facility Level of Care Determination	Nursing Facilities, MI Choice Waiver Program, Program of All-Inclusive Care for the Elderly (PACE), and the MI Health Link HCBS Waiver Program	Policies, processes, and criteria for Nursing Facility Level of Care Determination, Informed Choice, and Appeals
Pharmacy	Pharmacies	Coverage policy related to pharmacy services.
Plan First Family Planning	All Providers	Program eligibility requirements, benefit package, and billing instructions.
Practitioner	MD, DO, Oral-Maxillofacial Surgeons, DPM, PA, NP, CRNA, AA, CNM, Physical Therapists, Medical Suppliers	Coverage policy related to practitioner services.
Private Duty Nursing	Independent & PDN Agency	Coverage policy related to private duty nursing services provided through an agency or by an independent nurse.
Program of All Inclusive Care for the Elderly (PACE)	Contracted PACE providers	Information regarding program eligibility, benefit package, etc.
Rural Health Clinics	Rural Health Clinics	Coverage policy related to Rural Health Clinics.
School Services Program	Enrolled Intermediate School Districts, Detroit Public Schools Community District, and Michigan School for the Deaf	Coverage policy for medical services provided to Medicaid eligible students.

Medicaid Provider Manual

Chapter Title	Affected Providers	Chapter Content
School Services Program Administrative Outreach Program Claims Development	Enrolled Intermediate School Districts, Detroit Public Schools Community District, and Michigan School for the Deaf	Coverage, claiming, and billing policies related to the School Services Program Administrative Outreach Program.
School Services Program Random Moment Time Study	Enrolled Intermediate School Districts, Detroit Public Schools Community District, and Michigan School for the Deaf	Random moment time study process for the School Services Program Direct Medical Services program.
Special Programs	All Providers	General information about MDHHS health insurance programs that are not addressed elsewhere in this manual.
Telemedicine	Practitioners, Hospitals, Nursing Facilities, Federally Qualified Health Centers (FQHC), Local Health Departments (LHD), Rural Health Clinics (RHC), Community Mental Health Services Programs (CMHSP), Tribal Health Centers (THC), School Services Program (SSP) Providers, Dentists, Dental Clinics, Dental Health Plans, Hearing Aid Dealers, Cochlear Implant Manufacturers, Audiologists/Hearing Centers, Vision Providers	Coverage policy related to telemedicine services.
Therapy Services	Therapy Providers, Medical Suppliers	Therapy provider participation requirements and coverage policy.
Tribal Health Centers	Tribal Health Centers	Coverage policy for Tribal Health Centers, defined under the Indian Self-Determination and Education Assistance Act (Public Law 93-638 as those owned and operated by American Indian/Alaska Native tribes and tribal organizations under contract or compact with the Indian Health Service (IHS).

Medicaid Provider Manual

Chapter Title	Affected Providers	Chapter Content
Urgent Care Centers	All Providers	Information regarding billing, coverage, and reimbursement policies related to Urgent Care Centers.
Vision	Ophthalmologists, Optometrists, Vision suppliers	Coverage policy for vision services and hardware.
Appendices		
Acronyms	All Providers	
Directory	All Providers	
Glossary	All Providers	
Forms	All Providers	Provides samples of forms identified in the manual and instructions for form completion, when appropriate. Providers may also download forms directly from the MDHHS website.

1.2 PRINTING

MDHHS does not provide a printed copy of the Provider Manual but does provide the information via compact disc (CD) to enrolled providers upon request. (Refer to the Manual Updates Section of this chapter for additional information.)

Should the user elect to print portions of the manual for their use, please note the following:

- The version date is noted at the bottom of each page on the left hand side. When researching policy, it is imperative that the most current version be used.
- The page number at the bottom right hand side of each page represents the page number within that chapter, not within the whole document.
- The name of the chapter is on the bottom of each page.
- It is recommended that any printing be done in black and white, not color, as printing in color can be very expensive. The features on each page are adequately effective in black and white.

Medicaid Provider Manual

SECTION 2 - NAVIGATION THROUGH THE MANUAL

2.1 BROWSE CAPABILITIES

Each chapter within the manual is linked with all other manual chapters and appendices. Users can easily navigate from chapter to chapter by clicking on the bookmark navigation keys located on a palette on the left side of the screen. (See the following illustrations.) To jump to a topic using its bookmark, click the bookmark icon or text in the palette that represents that topic. The bookmarks in the manual correspond to chapter titles, section titles, subsections and appendices.

Bookmarks can be expanded or collapsed to easily link to the desired information. Primary headings, such as chapter titles, display as the first level of bookmarks. If a primary heading has secondary headings (i.e., section titles, subsections), they are displayed underneath the primary heading. Primary headings can be collapsed to hide the secondary headings. When a primary heading is collapsed, it has a plus (+) sign next to it. Click on the plus (+) sign to expand the bookmarks to display secondary headings. When all headings are displayed, a minus (-) sign appears next to the heading. (See the illustrations below.)

MICHIGAN DEPARTMENT OF COMMUNITY HEALTH

Medicaid Provider Manual

MEDICAID PROVIDER MANUAL OVERVIEW

SECTION 1 – INTRODUCTION

The following documents comprise the Michigan Medicaid Provider Manual, and address all health insurance programs administered by the Michigan Department of Community Health (MDCH). MDCH also issues periodic bulletins as changes are implemented to the policies and/or processes described in the manual. An inventory of these bulletins is maintained in the Supplemental Bulletin List located on the MDCH website. Bulletins are incorporated into the online version of the manual on a quarterly basis. (Refer to the Directory Appendix for website information.)

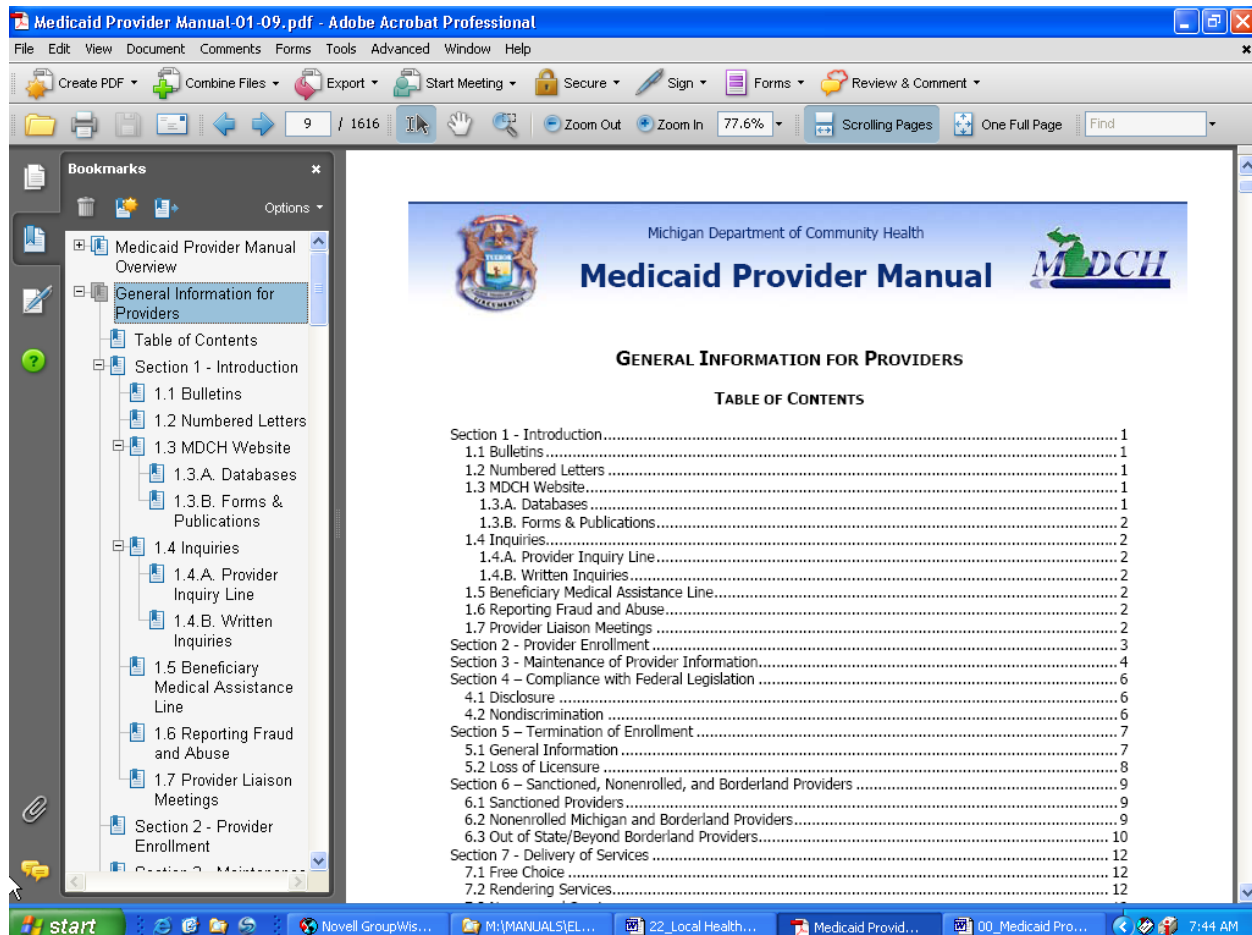

1.1 ORGANIZATION

The following table identifies each chapter and appendix in the manual, indicates what providers are affected, and provides a brief overview of each.

Chapter Title	Affected Providers	Chapter Content
General Provider Chapters		
Medicaid Provider Manual Overview	All Providers	Brief discussion of the organization of the manual and effectively using the document.
General Information for Providers	All Providers	Policies and general information regarding provider enrollment and participation, prior authorization, record retention, billing the beneficiary, fraud and abuse, etc.
Beneficiary Eligibility	All Providers	Policies and information regarding how to verify beneficiary eligibility, information on various eligibility categories, enrollment in contracted health plans, beneficiary utilization control, etc.
Coordination of Benefits	All Providers	Policies and information regarding coordination of benefits, Medicaid's payment liability, etc.
Billing & Reimbursement for Dental Providers	Providers billing the ADA 2006 or 837 Dental claim formats	Policies and instructions for billing dental services.

Medicaid Provider Manual

Users can also navigate from section to section within each chapter by clicking on the Section Titles within the Table of Contents.

2.2 SEARCH CAPABILITIES

Users can access the powerful online search capabilities of Adobe Acrobat to quickly locate information within the manual. There are two search methods:

- Click on Edit, Find on the tool bar and enter a keyword in the Find dialog box, or
- Click on the Binoculars on the toolbar and enter a keyword in the dialog box.

Always use the most specific term or acronym for the search, rather than a general term. (Refer to the Acronym Appendix for a list of all those used in the manual.) Start the search on the first page of the manual to assure that all relevant information is located.

In order to locate all of the information pertinent to a subject, search by the acronym if the word or term has one.

Medicaid Provider Manual

SECTION 3 – MANUAL UPDATES

3.1 QUARTERLY UPDATES

The Medicaid Provider Manual located on the MDHHS website is updated quarterly to reflect information that has been added, deleted or changed via policy bulletins and other communications during the previous quarter. The contact information contained in the Directory Appendix is also updated quarterly.

A policy bulletin, detailing the manual changes made each quarter, is sent to all Medicaid-enrolled providers and is communicated by e-mail to those subscribed to the Medicaid ListServ.

A compact disc (CD) version of the Medicaid Provider Manual is available upon request. (Refer to the Directory Appendix for contact information.)

3.2 HISTORIC MANUALS

The current version of the manual is maintained on the MDHHS website. Previous versions of the electronic manual are available back to January 2004. Refer to the Directory Appendix for information on ordering CD versions of the manual.

Medicaid Provider Manual

SECTION 1 – INTRODUCTION

This chapter applies to all providers.

The Michigan Department of Health and Human Services (MDHHS) acts as the fiscal intermediary for several health insurance programs including, but not limited to, Medicaid, Healthy Michigan Plan, Children's Special Health Care Services (CSHCS), the Refugee Assistance Program (RAP), Maternity Outpatient Medical Services (MOMS), Plan First Family Planning, and the Repatriate Program. Although coverage, limitations, and administration may differ, billing procedures and reimbursement methods are essentially the same.

This chapter is used for all health insurance programs administered by MDHHS. Any reference to Medicaid in the manual and bulletins pertains to all programs administered by MDHHS unless specifically stated otherwise. Reference to the state mental health facilities includes only those facilities owned and operated by MDHHS. It does not include proprietary facilities for the mentally ill or developmentally disabled.

1.1 BULLETINS

This manual is the provider's primary source of policy information. Revisions to the manual regarding policy and procedural changes are communicated to the provider via Policy Bulletins. Providers affected by a bulletin should retain it until it is incorporated into the online version of the manual unless instructed otherwise. Bulletins are numbered for the provider's reference. The first two digits of the bulletin number refer to the year. The next two digits refer to the specific sequence number assigned to the bulletin (e.g., 03-04).

Bulletins are distributed to affected providers by U.S. mail or e-mail. Providers are expected to maintain current contact information in CHAMPS for timely notification. Bulletins are also posted on the MDHHS website. (Refer to the Directory Appendix for website and contact information.)

1.2 NUMBERED LETTERS

The purpose of a numbered letter is to educate, inform, and/or clarify issues related to MDHHS policies, procedures, and/or decisions that affect multiple providers.

1.3 FILE TRANSFER

The MDHHS–File Transfer application allows for the secure electronic transfer of files between MDHHS and Medicaid providers, Medicaid Health Plans, and other organizations. This application is a front-end interface for secure file transfer protocol (FTP) functionality, is Health Insurance Portability and Accountability Act of 1996 (HIPAA) compliant, and uses 128-bit encryption. File types for transfer include, but are not limited to, Medicaid cost report software, Medicaid filed cost reports, Medicaid filed reconciliation reports, and claim and encounter files containing protected health information.

All users requesting access to the MDHHS–File Transfer application must have their own unique MILogin user identification (ID) and password, and the user ID and password must not be shared. Each approved user must be authorized to view any sensitive data that may be transmitted.

Medicaid Provider Manual

MDHHS program areas that use the MDHHS–File Transfer application to securely communicate with providers are authorized to limit the number of users per organization. MDHHS may contact the requestor directly to collect additional information regarding the users that will be applying, the area type(s) they need access to (shared and/or provider specific), and when user access should be removed. MDHHS is not responsible for communications that are undeliverable or are otherwise not received due to a provider's or authorized user's failure to maintain or provide accurate information.

MDHHS-File Transfer is accessed through MILogin. Refer to the Directory Appendix for website information.

1.4 LISTSERV COMMUNICATIONS

The MDHHS Behavioral and Physical Health and Aging Services Administration (BPHASA) offers individuals the option of receiving automated announcements regarding the Michigan Medicaid Program (i.e., changes to policy, billing issues, training opportunities, etc.) through subscription to an e-mail listserv. Subscription instructions are posted on the MDHHS website. (Refer to the Directory Appendix for website information.)

1.5 MDHHS WEBSITE

The MDHHS website provides electronic access to the Medicaid Provider Manual, policy bulletins, proposed policy issued for public comment, as well as a variety of other valuable provider information and resources. (Refer to the Directory Appendix for website information.)

1.5.A. ADDITIONAL CODE/COVERAGE RESOURCE MATERIALS

MDHHS maintains procedure/revenue code fee information in a series of website databases and professional fee schedules. These list procedure codes, descriptions, and fee screens. This information is updated as changes in coverage and/or fees are implemented. Databases and fee schedules are only available on the MDHHS website. (Refer to the Directory Appendix for website information.)

Additional pertinent coverage parameters, such as documentation and billing indicators, are accessible via the Medicaid Code and Rate Reference tool. Medicaid Code and Rate Reference is an online code inquiry system that provides real-time information for the following:

- Age restrictions;
- Documentation requirements;
- Prior authorizations, and medical conditions that may bypass these requirements;
- Service frequency limitations; and
- Rate information.

(Refer to the Directory Appendix for website information.)

Medicaid Provider Manual

1.5.B. FORMS & PUBLICATIONS

In an effort to reduce the administrative burden on providers, forms required by Medicaid are available for electronic download from the MDHHS website. Many publications regarding MDHHS programs and resources are also available.

1.5.C. DISCLAIMER

The Medicaid Provider Manual serves as the policy reference guide and will supersede any discrepancies regarding rates or coverage on the website, databases, fee schedules, or Medicaid Code and Rate Reference tool.

1.6 INQUIRIES

MDHHS has several methods of resolving inquiries. Questions regarding policies and procedures should be directed to Provider Inquiry. (Refer to the Directory Appendix for contact information.)

1.6.A. PROVIDER INQUIRY LINE

If billing assistance is required, the Provider Inquiry Line is available for immediate resolution of inquiries. (Refer to the Directory Appendix for contact information.)

1.6.B. WRITTEN INQUIRIES

Complex problems may require research and analysis. The problem should be clearly explained, in writing, with complete documentation (e.g., RA) attached and sent to Provider Inquiry.

1.7 BENEFICIARY MEDICAL ASSISTANCE LINE

If assistance to the beneficiary is required, the Beneficiary Helpline is available to assist them. (Refer to the Directory Appendix for contact information.) Beneficiaries enrolled in a Medicaid Health Plan (MHP) should be referred to their plan for assistance. Plan member services contact information is included on the beneficiary's plan membership card.

1.8 REPORTING FRAUD AND ABUSE

Any provider, beneficiary, or employee who suspects Medicaid fraud or abuse is encouraged to report that information to MDHHS. Information about fraud and abuse reporting requirements is located on the MDHHS website. (Refer to the Directory Appendix for website and contact information.)

1.9 PROVIDER LIAISON MEETINGS

MDHHS routinely schedules meetings to meet with provider specialty groups (e.g., physicians, hospitals, pharmacies, etc.) to discuss issues of interest/concern. The meetings are arranged through the various provider professional associations, though all affected providers and interested parties are welcome to attend. A calendar of most provider liaison meetings is posted on the MDHHS website, along with contact information. A calendar of Pharmacy Liaison meetings is posted on the MDHHS Pharmacy Benefits Manager website. (Refer to the Directory Appendix for website and contact information.)

Medicaid Provider Manual

1.10 CLAIMS PROCESSING SYSTEM

The Community Health Automated Medicaid Processing System (CHAMPS) is the web-based MDHHS Medicaid claims processing system. CHAMPS is comprised of the following subsystems: Provider Enrollment (PE), Eligibility and Enrollment (EE), Prior Authorization (PA), Claims and Encounters (CE), and Contracts Management (CM). This web-based system allows for the following functions to be completed online: provider enrollment, provider updates, claims status, direct claim entry, batch claim submission, claim adjustments/voids, payment status, prior authorization, eligibility verification, member search and ordering/referring provider verification. (Refer to the Directory Appendix for contact and website information.)

Medicaid Provider Manual

SECTION 2 - PROVIDER ENROLLMENT

Consistent with 42 CFR 431.51(c)(2), 42 CFR 455.452, and pursuant to Michigan's Social Welfare Act (Public Act 280 of 1939 [MCL 400.111e]), the Medicaid single state agency is required, and has the authority, to set reasonable standards and screening related to the qualifications of providers, and may define exclusions that the Medicaid Director determines necessary to protect the best interests of the program and its beneficiaries. An eligible provider who complies with all licensing laws and regulations applicable to the provider's practice or business in Michigan, who is not currently excluded from participating in Medicaid by state or federal sanction or exclusion, is a valid provider type in CHAMPS, and whose services are directly reimbursable per MDHHS policy may enroll as a Medicaid provider. Out-of-state providers must be licensed and/or certified by the appropriate standard-setting authority in the state they are practicing. (Refer to the Beyond-Borderland Area subsection of this chapter for more information.) In addition, some providers must also be certified as meeting Medicare or other standards as specified by MDHHS.

MDHHS is prohibited by federal law from issuing Medicaid payment to any financial institution or entity whose address is outside of the United States. Any individual or entity that provides services to, or orders, prescribes, refers or certifies eligibility for services for, individuals who are eligible for medical assistance under the Medicaid State Plan is required to be screened and enrolled in Medicaid.

The following disclosing individuals are also required to be screened as part of the provider's enrollment:

- An individual with a 5% or greater direct or indirect ownership interest in the provider. This requirement pertains to individuals as well as groups of individuals;
- An agent. An agent is any person who has been delegated the authority to obligate or act on behalf of a provider such as a fiduciary agent or contractor;
- An individual who is on the Board of Directors of a provider entity. A Board of Directors is a group of individuals who are selected or elected to establish corporate management-related policies and to make decisions on major company issues; or
- An individual who is a managing employee. A managing employee would be a general manager, business manager, administrator, director, or other individual who exercises operational or managerial control over, or who directly or indirectly conducts the day-to-day operation of the institution, organization, or agency, either under contract or through some other arrangement, whether or not the individual is a W-2 employee.

Providers must have their enrollment approved through the on-line MDHHS CHAMPS Provider Enrollment (PE) subsystem to be reimbursed for covered services rendered to eligible Medicaid beneficiaries. Enrollment in CHAMPS neither requires nor mandates those providers who are part of a managed care network to accept Medicaid Fee-for-Service beneficiaries. Refer to the Directory Appendix for contact information related to the online application process, including a CHAMPS Preparation Checklist of required information.

A provider's participation in Medicaid will be effective on the date the provider's on-line application is submitted, or a provider may request that enrollment be retroactive to a specific date when completing the on-line application. Retroactive enrollment is not considered prior to the effective date of licensure/certification. Enrollment may be retroactive one year from the date the request is received if the provider's licensure/certification is effective for that entire period. Retroactive enrollment eligibility is not a waiver for claims/services that do not meet established Medicaid billing criteria.

Medicaid Provider Manual

All providers are required to revalidate their Medicaid enrollment information a minimum of once every five years, or more often if requested by MDHHS. MDHHS will notify providers when revalidation is required. Providers must notify MDHHS within 35 days of any change to their enrollment information.

Providers must have their social security number (SSN), employer identification, or tax identification number (EIN/TIN) registered with the Michigan Department of Technology, Management & Budget Vendor Registration prior to enrolling with MDHHS.

Providers electing to appoint another person to enter their MDHHS enrollment information in the CHAMPS PE subsystem on their behalf must complete and retain a copy of the MDHHS Provider Electronic Signature Agreement Cover Sheet (MDHHS-5405) and the MDHHS Electronic Signature Agreement (DCH-1401). Both forms must be submitted to the Provider Enrollment Section per instructions provided on the cover sheet. (Refer to the Forms Appendix for a copy of the MDHHS-5405 and the DCH-1401.)

For information regarding substitute physician or a locum tenens arrangement, refer to the Practitioner Chapter of this manual.

A Medicaid Health Plan (MHP) is responsible for reimbursing a contracted provider or subcontractor for its services according to the conditions stated in the subcontract. The MHP must also reimburse noncontracted providers for properly authorized, medically necessary covered services.

2.1 PROVIDER OWNERSHIP AND CONTROL DISCLOSURES

Provider enrollment information, including home address, date of birth, and Social Security Number, is required from providers and other disclosed individuals (e.g., owners, managing employees, agents, etc.).

2.1.A. REQUIRED DISCLOSURE INFORMATION

Providers (including fiscal agents and managed care entities) are required to disclose the following information on ownership and control during enrollment, revalidation, and within 35 days after any change in ownership:

- The name and address of any person (individual or corporation) with ownership or control interest. The address for corporate entities must include, as applicable, primary business address, every business location, and P.O. Box address.
- Date of birth and Social Security Number (in the case of an individual).
- Other Tax Identification Number, in the case of a corporation, with an ownership or control interest or of any subcontractor in which the disclosing entity has a five percent or more interest.
- Whether the person (individual or corporation) with an ownership or control interest is related to another person with ownership or control interest as a spouse, parent, child or sibling; or whether the person (individual or corporation) with an ownership or control interest of any subcontractor in which the disclosing entity has a five percent or more interest is related to another person with ownership or control interest as a spouse, parent, child or sibling.

Medicaid Provider Manual

- The name of any other fiscal agent or managed care entity in which an owner has an ownership or control interest in an entity that is reimbursable by Medicaid and/or Medicare.
- The name, address, date of birth and Social Security Number of any managing employees.

2.1.B. CRIMINAL OFFENSE NOTIFICATION

Providers must notify the state licensing agency and MDHHS Provider Enrollment of any person(s) with an ownership or controlling interest in a facility that has been convicted of a criminal offense related to their involvement in any programs under Medicare, Medicaid, or Social Services Block Grants since the inception of these programs.

2.1.C. NURSING FACILITY CHANGE OF OWNERSHIP (CHOW)

When a nursing facility changes ownership, the successive owner can either retain the preceding owner's National Provider Identifier (NPI) or obtain a new NPI. If the successive owner chooses to obtain a new NPI, then they must complete the enrollment process in the Community Health Automated Medicaid Processing System (CHAMPS) and submit the required disclosure information within 35 days of the Centers for Medicare & Medicaid Services (CMS) established effective date of the change in ownership. If the successive owner decides to retain the preceding owner's NPI, then the successive owner cannot do a new enrollment. The successive owner's decision to either retain the NPI or to obtain a new NPI does not impact the automatic assignment of the provider agreement.

2.2 ENROLLMENT APPLICATION AND REVALIDATION FEES

Enrollment application and revalidation fees are required from all institutional providers, as defined by the Centers for Medicare & Medicaid Services (CMS). Individual physicians and non-physician practitioners are not considered institutional providers and, as such, are not subject to an application or revalidation fee. Providers who are enrolled in or have paid the application fee to Medicare or another state's Medicaid or Children's Health Insurance Program (CHIP) are not required to pay an application fee to the Michigan Medicaid Program. The fee is required for each enrolled provider type at the time of initial enrollment, re-enrollment and revalidation. The fee amount is established by CMS and updated annually.

2.3 ENROLLMENT SCREENING

MDHHS conducts Medicaid provider enrollment screening per federal and state rules and regulations.

2.3.A. PROVIDER CATEGORICAL RISK ENROLLMENT SCREENING

2.3.A.1. CATEGORIZATION OF PROVIDERS BASED ON LEVEL OF RISK

Provider types must be categorized based on the potential risk of fraud, waste, and abuse to the Medicaid Program. MDHHS has adopted the risk categorization established by the Centers for Medicare & Medicaid Services (CMS). For provider types that are not given a risk level by CMS, MDHHS will be responsible for assigning the appropriate risk level. A provider's categorical risk level may be adjusted to "high" due to payment

Medicaid Provider Manual

suspension, overpayment status, or Health & Human Services – Office of Inspector General (HHS-OIG)/Medicaid Program exclusion status and after lifting of a temporary moratorium.

2.3.A.2. SCREENING ACTIVITIES BASED ON RISK CATEGORY AND PROVIDER TYPE

Additional provider screening activities are required and will be conducted based on the provider's categorical risk level. The following table summarizes the general screening activities by risk category and type of provider.

Category	Type of Provider	Screening Activities
High	<ul style="list-style-type: none">▪ Prospective (newly enrolling) home health agencies▪ Prospective (newly enrolling) DMEPOS suppliers▪ Skilled nursing facilities (SNFs) [effective January 1, 2023]▪ Prospective (newly enrolling) Michigan Diabetes Prevention Program (MiDPP) suppliers.	<ul style="list-style-type: none">▪ Fingerprint based criminal background checks▪ Unannounced pre- and post-enrollment site visits▪ Verifications, including licensure, Social Security Number, Taxpayer Identification Number, National Provider Identifier (NPI), HHS-OIG exclusion status, and information regarding disclosed individuals
Moderate	<ul style="list-style-type: none">▪ Ambulance services▪ Community Mental Health centers▪ Comprehensive Outpatient Rehabilitation Facilities (CORFs)▪ Hospice organizations▪ Independent clinical laboratories▪ Physical therapists enrolling as individuals or as group practices▪ Revalidating home health agencies▪ Revalidating DMEPOS suppliers▪ Revalidating skilled nursing facilities (SNFs)▪ Portable x-ray suppliers	<ul style="list-style-type: none">▪ Unannounced pre- and post-enrollment site visits▪ Verifications, including licensure, Social Security Number, Taxpayer Identification Number, NPI, HHS-OIG exclusion status, and information regarding disclosed individuals▪ Criminal background check
Limited	<ul style="list-style-type: none">▪ All other provider types	<ul style="list-style-type: none">▪ Verifications, including licensure, Social Security Number, Taxpayer Identification Number, NPI, HHS-OIG exclusion status, and information regarding disclosed individuals▪ Criminal background check

Medicaid Provider Manual

2.3.B. SITE INSPECTIONS

All enrolled providers must permit unannounced on-site inspections as a condition of participation. MDHHS will conduct pre-enrollment and post-enrollment site visits of providers designated as "moderate" and "high" categorical risk. (Refer to the Provider Categorical Risk Enrollment Screening subsection within this chapter for further information.)

2.3.C. CRIMINAL BACKGROUND CHECKS

All enrolled providers, or any person with a five percent or more direct or indirect ownership interest in the provider, must consent to criminal background checks, including fingerprinting, as a condition of participation. MDHHS will conduct criminal background checks and will require submission of fingerprints from providers designated as "high" categorical risk when directed by CMS.

2.3.D. VERIFICATION OF PROVIDER INFORMATION

MDHHS conducts verifications, including licensure, Social Security Number, Taxpayer Identification Number, NPI, information regarding disclosed individuals, HHS-OIG exclusion status, and other databases, as required.

2.4 TEMPORARY MORATORIA

A temporary moratoria, numerical caps, or other limits may be placed on the enrollment of new providers or provider types identified as having a significant potential or increased risk for fraud, waste, or abuse as long as it would not adversely impact beneficiary access to medical assistance.

2.5 MEDICARE COST SHARE ENROLLMENT TYPE

Billing, rendering, attending, ordering, and referring Medicare providers who only intend to submit claims to Medicaid for reimbursement of Medicare cost-sharing for dual eligible beneficiaries may choose the restricted cost-sharing option, Medicare Cost Share, during CHAMPS enrollment. Medicare provider types not recognized by Medicaid must choose the Medicare Cost Share option. These providers must contact Provider Enrollment for enrollment assistance. (Refer to the Directory Appendix for contact information.) This special enrollment type is only available to providers participating in original Medicare. Providers participating in Medicare Part C, also known as a Medicare Advantage Plan, must complete a full Medicaid enrollment.

SECTION 3 - MAINTENANCE OF PROVIDER INFORMATION

Maintenance of provider information is done through the CHAMPS PE online system. (Refer to the Establishing Provider Access in CHAMPS section for additional information.) Providers must notify MDHHS via the on-line system within 35 days of any change to their enrollment information. (Refer to the Directory Appendix for CHAMPS PE access information.)

Examples of such changes include:

- A change in the provider's Federal Employer ID Number (or Tax ID Number).
- Moving to a new office
- Adding another office or location
- Leaving the current employer/partnership
- Changing the address(es) to which RAs and/or correspondence are sent
- Retiring from practice
- Closing a business
- Provider files Chapter 11, Reorganization
- Provider files Chapter 7, Bankruptcy
- Any action taken by a licensing authority or hospital that affects health care privileges
- Any criminal conviction
- Addition/change of a specialty
- Employer/partnership additions or changes
- Change/loss of licensure status
- New employees/providers
- New contractual obligations to a clinic, employer, contractor, or other entity
- Clinical Laboratory Improvement Amendments (CLIA) changes
- A change in ownership
- Name change
- E-mail address
- Addition/change of information related to the participating or collaborating physician and/or agreements

Providers must contact the Provider Enrollment Unit to change a Pay To address. (Refer to the Directory Appendix for contact information.)

The Provider Enrollment Unit disenrolls providers if postal mail is returned as nondeliverable.

Nursing Facility providers should refer to the Nursing Facility Chapter for additional instructions.

Michigan Department of Health and Human Services

Medicaid Provider Manual

Failure to notify MDHHS of any change in identification information may result in the loss of Medicaid enrollment, lapse of provider eligibility, or nonpayment of services.

SECTION 4 – ESTABLISHING PROVIDER ACCESS IN CHAMPS

4.1 PROVIDER DOMAINS

Providers must register for a MILogin account to access the CHAMPS system. (Refer to the Directory Appendix for website information.) All users within a provider's organization who need access to information within CHAMPS (Provider Enrollment, Claims, Prior Authorization, etc.) must obtain a MILogin user ID and password. The CHAMPS Provider Enrollment online system allows providers to easily update their information at any time or submit a new provider enrollment application with an approval process of approximately one to two weeks.

The MILogin user who submits the Provider Enrollment application becomes the Provider Domain Administrator for that application. The Provider Domain Administrator has the responsibility of assigning rights for all users within the organization to access the provider's file. Multiple Provider Domain Administrators may be established for a single organization, but a separate application must be completed and approved for each administrator.

4.2 PROVIDER PROFILES

In addition to establishing a provider domain and obtaining necessary user IDs and passwords, the provider must select the appropriate profiles to access applicable subsystems within CHAMPS. The following is a list of available profiles and their definitions.

Profile	Definition
Domain Administrator	The individual who assigns or removes domain and profile access for CHAMPS users
CHAMPS Full Access	Full FFS access to Provider Enrollment, Prior Authorization, Eligibility, and Claims Subsystems
CHAMPS Limited Access	View only access to Provider Enrollment and full FFS access to Prior Authorization, Eligibility, and Claims Subsystems
Prior Authorization Access	FFS access to Prior Authorization only
MCO Provider Access	View Only access to MCO Provider Enrollment
Eligibility Inquiry	Access to Eligibility only
Provider Enrollment Access	Full FFS access to Provider Enrollment only
Provider Enrollment View Access	View Only access to Provider Enrollment
Billing Agent Access	Access to Billing Agent Provider Enrollment only
Claims Access	Access to Claims and Encounters only
Atypical Access	Full access to Provider Enrollment and Electronic Service Verification (ESV)

Medicaid Provider Manual

There are available profiles for Fee for Service (FFS), Managed Care Organization (MCO), and Pharmacy providers along with Billing Agents. Profiles must be established to grant access to each subsystem (Provider Enrollment, Claims, Prior Authorization) within CHAMPS. Users may have multiple profiles if necessary.

Profiles available for each type of provider accessing CHAMPS are as follows:

Provider/Profile	Domain Administrator	CHAMPS Full Access	CHAMPS Limited Access	Prior Authorization Access	MCO Provider Access	Eligibility Inquiry	Provider Enrollment Access	Provider Enrollment View Access	Billing Agent Access	Claims Access
FFS Provider	X	X	X	X		X	X	X		X
MCO Provider	X		X		X	X		X		X
Billing Agent	X						X	X	X	X
Pharmacy	X	X	X			X	X	X		X

Additional information regarding CHAMPS access is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

Medicaid Provider Manual

SECTION 5 – NONDISCRIMINATION

In accordance with federal regulations, including Section 1557 of the Patient Protection and Affordable Care Act, an individual shall not be excluded from participation in, be denied the benefits of, or be subjected to discrimination on the grounds prohibited under Title VI of the Civil Rights Act of 1964, 42 USC 2000d et seq. (race, color, national origin), Title IX of the Education Amendments of 1972, 20 USC 1681 et seq. (sex, gender identification, sexual orientation), the Age Discrimination Act of 1975, 42 USC 6101 et seq. (age), or Section 504 of the Rehabilitation Act of 1973, 29 USC 794 (disability), under any health program or activity, any part of which is receiving federal financial assistance, or under any program or activity that is administered by an Executive Agency or any entity established under Title I of the Affordable Care Act or its amendments.

All Michigan Medicaid program participants and providers are to ensure compliance with all relevant Federal and State nondiscrimination provisions. Failure to comply may result in the provider's disenrollment from the Michigan Medicaid program.

To report noncompliance, contact the Michigan Department of Civil Rights or the U.S. Office for Civil Rights, Department of Health and Human Services. (Refer to the Directory Appendix for contact information.)

SECTION 6 – DENIAL OF ENROLLMENT, TERMINATION AND SUSPENSION

6.1 TERMINATION OR DENIAL OF ENROLLMENT

MDHHS may terminate or deny enrollment in the Michigan Medicaid program. Termination of enrollment means a provider's billing privileges have been revoked and all appeal rights have been exhausted or the timeline for appeal has expired. Denial of enrollment means the provider's application will not be approved for participation in the Medicaid program.

MDHHS must terminate or deny a provider's enrollment in Michigan's Medicaid program for the following reasons:

- Termination on or after January 1, 2011 under Medicare or the Medicaid program, or the Children's Health Insurance Program (CHIP) of any other state.
- Convicted of a relevant crime described under 42 USC 1320a-7(a):

- Conviction of program-related crimes

Any individual or entity that has been convicted of a criminal offense related to the delivery of an item or service under subchapter XVIII or under any State health care program.

- Conviction relating to patient abuse

Any individual or entity that has been convicted, under Federal or State law, of a criminal offense relating to neglect or abuse of patients in connection with the delivery of a health care item or service.

- Felony conviction relating to health care fraud

Any individual or entity that has been convicted for an offense which occurred after August 21, 1996, under Federal or State law, in connection with the delivery of a health care item or service or with respect to any act or omission in a health care program (other than those specifically described in paragraph [1]) operated by or financed in whole or in part by any Federal, State, or local government agency, of a criminal offense consisting of a felony relating to fraud, theft, embezzlement, breach of fiduciary responsibility, or other financial misconduct.

- Felony conviction relating to controlled substance

Any individual or entity that has been convicted for an offense which occurred after August 21, 1996, under Federal or State law, of a criminal offense consisting of a felony relating to the unlawful manufacture, distribution, prescription, or dispensing of a controlled substance.

Providers who have been excluded due to one of the federal mandatory exclusions listed above will remain on the MDHHS Sanctioned Provider List until the minimum period for their exclusion has been completed and the provider has requested a lifting of their sanction from the sanctioning body.

Medicaid Provider Manual

- Failure to comply with the enrollment requirements of the Social Welfare Act, Public Act 280 of 1939 (MCL 400.111b -111e) and the provider screening and enrollment requirements pursuant to 42 CFR 455.416. The basis for termination or denial of enrollment under this section includes, but is not limited to, the provider's:
 - failure to submit timely and accurate information;
 - failure to cooperate with MDHHS screening methods;
 - failure to submit sets of fingerprints as required within 30 days of a CMS or MDHHS request;
 - failure to permit access to provider locations for site visits;
 - falsification of information provided on the enrollment application or subsequent information requests;
 - inability to verify their identity; or
 - failure to comply with Medicaid policies regarding submission of claims and billing Medicaid beneficiaries.
- The provider is excluded from participating in a provider capacity in Medicare, Medicaid or any other Federal health care programs.
- The provider is convicted of violating the Medicaid False Claims Act, the Health Care False Claims Act, a substantially similar statute, or a similar statute by another state or the federal government.
- The provider has a federal or state felony conviction within the preceding 10 years of their provider enrollment application, including but not limited to, any criminal offense related to:
 - murder, rape, abuse or neglect, assault, or other similar crimes against persons;
 - extortion, embezzlement, income tax evasion, insurance fraud, and other similar financial crimes;
 - the use of firearms or dangerous weapons;
 - a felony conviction of theft; or
 - any felony that placed the Medicaid program or its beneficiaries at immediate risk, such as a malpractice suit that results in a conviction of criminal neglect or misconduct.
- The provider has a federal or state misdemeanor conviction within the preceding five years of their provider enrollment application, including but not limited to, any criminal offense related to:
 - any misdemeanor crime listed as a permissive exclusion in 42 USC 1320a-7(b);
 - rape, abuse or neglect, assault, or other similar crimes against persons;
 - extortion, embezzlement, income tax evasion, insurance fraud, or other similar financial crimes;
 - a misdemeanor conviction of theft; or
 - any misdemeanor that placed the Medicaid program or its beneficiaries at immediate risk, such as a malpractice suit that results in a conviction of criminal neglect or misconduct.

Medicaid Provider Manual

For the purposes of the excluded offenses mentioned above, an individual or entity is considered to have been convicted of a criminal offense when:

- a judgment of conviction has been entered against the individual or entity by a federal, state, tribal or local court regardless of whether there is an appeal pending;
- there has been a finding of guilt against the individual or entity by a federal, state, tribal or local court; or
- a plea of guilty or nolo contendere by the individual or entity has been accepted by a federal, state, tribal, or local court.

The criminal history screening will be conducted by MDHHS through reputable and reliable data sources. Screenings for providers will be done as required by law and as deemed necessary by MDHHS for the protection of the Medicaid program and beneficiaries. For criminal offenses that fall under the mandatory exclusions of 42 USC 1320a-7(a), the definition of conviction will conform with 42 USC 1320a-7(i), which may include, but is not limited to, a record relating to criminal conduct that has been expunged.

Any entity that offers, in writing or verbally, discounts on co-pay amounts, fax machines, computers, gift cards, store discounts and other free items, or discounts/waives the cost of medication orders if an entity uses their services:

- may violate the Medicaid False Claim Act and Medicaid/MDHHS policy, which may result in disenrollment from Medicaid/MDHHS programs.
- may violate the Michigan Public Health Code's prohibition against unethical business practices by a licensed health professional, which may subject a licensee to investigation and possible disciplinary action.

Pursuant to MCL 400.111e, the Medicaid Director may terminate or deny enrollment if that action is necessary to protect the health of medically indigent individuals, the welfare of the public, and/or the funds appropriated for the Medicaid program. Additionally, the Medicaid Director may reduce or extend a provider's exclusion from the Medicaid program if, in the Medicaid Director's judgment, the continuation or reduction of the exclusion period is necessary to protect beneficiaries or the Medicaid program.

Providers who are already enrolled at the time of a finding by MDHHS will have their enrollment ended as of the date MDHHS was notified of the excluded offense. Claims with dates of service on and after the provider's enrollment termination date will be denied.

NOTE: Individual Home Help providers denied enrollment due to certain program exclusions may still provide services through the Personal Choice and Acknowledgement of Provider Selection process. (Refer to the Providers [Prohibited Providers] Section of the Home Help chapter for more information.)

6.2 ENROLLMENT AND REINSTATEMENT AFTER TERMINATION OR DENIAL

Providers who are excluded from participation in the Medicaid program due to a conviction for an excludable crime may request a policy exception upon a showing that an exception is in the best interest of the Medicaid program and of Medicaid beneficiaries. The Medicaid Director has sole discretion under MCL 400.111e(7) to grant a policy exception to lift a sanction from an excluded provider. A request for a policy exception is not a request to participate in Medicaid. Factors that may be considered when determining the approval or denial of a policy exception include, but are not limited to:

Medicaid Provider Manual

- whether the exclusion poses an undue hardship to beneficiaries;
- whether the provider is the sole community physician or sole source of specialized services in the community;
- subsequent offenses of the provider;
- amount of time that has lapsed since the excluded offense;
- whether all conditions, terms of probation or parole, penalties, fines, etc. of the felony or misdemeanor offenses that resulted in exclusion have been fully completed;
- provider's participation in Medicare or other state Medicaid programs; or
- other factors that demonstrate the provider does not otherwise pose a risk to the Medicaid program or beneficiaries.

For providers indefinitely excluded due to a conviction listed in 42 USC 1320a-7(a), or who have been debarred or excluded for any reason by a federal or another state agency, an exception request will not be considered unless the federal or state agency has terminated the exclusion or lifted the sanction. However, reinstatement by, or termination of the exclusion by, a federal or state agency is never the sole determinative factor for policy exceptions under this subsection. For all other exclusions, the Medicaid Director may reduce or extend a provider's exclusion from the Medicaid program if, in the Medicaid Director's judgment, the continuation or reduction of the exclusion period is necessary to protect beneficiaries or the Medicaid program.

Requests for reinstatement must be sent in writing to the Medicaid Provider Enrollment Unit. (Refer to the Directory Appendix for contact information.)

If a provider requests a policy exception and it is denied, subsequent requests for an exception will only be considered upon providing documentation that a substantive change in circumstances has occurred since the last exception request. Providers may not request a policy exception for an exclusion while a termination or denial of enrollment is still under administrative or judicial appeal. The denial of a policy exception request is not an adverse action and providers may not appeal the denial.

Providers who have been excluded due to one of the convictions listed in 42 USC 1320a-7(a) shall remain on the MDHHS Sanctioned Provider List indefinitely. A policy exception may be requested as described in this section.

MDHHS will address requests for a policy exception within 60 days after all requested information has been provided.

6.3 SUSPENSION

Summary suspension prevents further payment after a specified date, regardless of the date of service (DOS).

If an indication of fraud or Medicaid misuse/abuse is discovered during any of the following, MDHHS considers it as a basis for summary suspension:

- An evaluation of billing practices.
- The prior authorization (PA) process.

Medicaid Provider Manual

- An on-site review of financial and medical records and a written report of this review is filed.
- The construction of a profile to evaluate patterns of utilization of Medicaid beneficiaries served by the provider.
- A peer review of services or practices.
- A hearing or conference between MDHHS and the provider (and counsel, if so requested).
- Indictment or bindover on charges under the Medicaid or Health Care False Claims Act or similar state/federal statute.

6.4 LOSS OF LICENSURE/LIMITED LICENSES

Providers are required to comply with all licensing laws and regulations applicable to the provider's practice or business in Michigan. For providers who must be licensed to practice their profession, continued enrollment in Medicaid is dependent upon maintaining licensure. Failure to renew a provider's license results in disenrollment from Medicaid effective the date of final lapse of the provider's license.

Limited or suspended licenses may result in disenrollment or denial of enrollment if MDHHS determines the basis of the action to be detrimental to the health or safety of medically indigent individuals, the welfare of the public, and/or the funds appropriated for the Medicaid program. Enrollment will be denied or terminated based on a disciplinary limited or suspended license as designated by the licensing entity. Other non-disciplinary limited licenses recognized for enrollment continue to be accepted.

Suspension or revocation of a provider's license by the appropriate standard setting authority results in termination of Medicaid participation effective on the date the provider is no longer licensed. In the case of a provider not located in Michigan, suspension or revocation would be administered by the appropriate state licensing board.

If a provider is no longer licensed to practice (e.g., the license was suspended, lapsed, or revoked), MDHHS does not reimburse for services ordered, prescribed, referred or rendered by that provider after the termination of the license. Medicaid payments obtained for services rendered during a period when the provider was unlicensed must be refunded to the State.

A provider may submit an on-line application to MDHHS to request re-enrollment as a Medicaid provider when their license is reinstated. Refer to the Provider Enrollment Section of this Chapter for information on the enrollment process.

6.5 PAYMENT SUSPENSION

MDHHS may temporarily suspend payments to a provider after determining there is a credible allegation of fraud for which an investigation is pending under the Medicaid program. An allegation of fraud may be from any source, including fraud hotline complaints, claims data mining and patterns identified through provider audits, civil false claims cases, and law enforcement investigations. Allegations are considered to be credible when they have indications of reliability and the State Medicaid Agency has reviewed all allegations, facts, and evidence carefully and acts judiciously on a case-by-case basis. Providers will be notified within 90 days of initiation of payment suspension. The notification will include the general allegations as to the nature of the suspension action, the period of suspension, and the circumstances under which the suspension will be terminated. Providers may submit written evidence for consideration

Medicaid Provider Manual

through the administrative appeal process. All payment suspensions will include referral to the MDHHS Office of Inspector General.

6.6 APPEALS

Providers may appeal the decision to terminate or deny enrollment. Denial of enrollment due to a temporary enrollment moratorium is appealable, but the scope of review is limited to whether the temporary moratorium applies to the provider appealing the denial. The basis for imposing a temporary moratorium is not subject to review. Refer to the Provider Appeal Process section of this chapter for additional information.

Medicaid Provider Manual

SECTION 7 – SANCTIONED, BORDERLAND, AND OUT-OF-STATE/BEYOND BORDERLAND PROVIDERS

7.1 SANCTIONED PROVIDERS

Pursuant to Section 1128 and Section 1902(a)(39) of the Social Security Act, Medicaid does not reimburse providers for any services/items that were ordered, prescribed, referred or rendered by sanctioned (suspended, terminated, or excluded) providers. If a provider is presented with an order, prescription or referral from a sanctioned provider, that provider should inform the beneficiary that the service/item cannot be provided because the provider has been excluded from Medicaid participation. The beneficiary may elect to purchase the service/item after being notified of the provider's sanction and agrees, in writing, to pay for the service/item out of pocket.

Provider sanctions may be initiated by MDHHS, the U.S. Department of Health & Human Services (HHS) (i.e., Medicare), or other sanctioning body. Notice of a provider's sanction is provided in a cumulative list of sanctioned providers and is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

It is recommended providers check the MDHHS Sanctioned Provider List on the MDHHS website, as well as the websites of other sanctioning bodies, to avoid accepting orders, prescriptions or referrals for Medicaid beneficiaries from these sanctioned providers.

Although MDHHS makes every attempt to publish timely, accurate information about sanctioned providers, a sanctioned provider is excluded from Medicaid participation even if that provider has not been included on Medicaid's list of sanctioned providers. Any payments that may be unintentionally made to a sanctioned provider or a provider acting on an order, prescription or referral from a sanctioned provider must be refunded to Medicaid.

7.2 BORDERLAND PROVIDERS

Borderland is defined as a county that is contiguous to the Michigan border. It also includes the five major cities beyond the contiguous county lines. The borderland area includes:

Indiana	Fort Wayne (city); Elkhart, LaGrange, LaPorte, St. Joseph, and Steuben (counties)
Minnesota	Duluth (city)
Ohio	Fulton, Lucas, and Williams (counties)
Wisconsin	Ashland, Green Bay, and Rhinelander (cities); Florence, Iron, Marinette, Forest, and Vilas (counties)

Medicaid Provider Manual

Note for Hospice Providers: An out-of-state/borderland hospice provider cannot cross over the border into Michigan to provide services to a Medicaid beneficiary unless:

- The agency is licensed and Medicare-certified as a hospice in Michigan; or
- The state in which the provider is licensed and certified has a reciprocal licensing agreement with the State of Michigan.

If one of these conditions is met and the hospice provides services across state lines, its personnel must be qualified (e.g., licensed) to practice in Michigan.

Medicaid will not cover services for a beneficiary who enters a hospice-owned residence outside of Michigan. The Community Health Automated Medicaid Processing System (CHAMPS) will not recognize the core-based statistical area (CBSA) code of another state. Additionally, when a Michigan Medicaid beneficiary voluntarily enters a hospice-owned residence in another state to receive routine hospice care, they are no longer considered a Michigan resident and, therefore, are not eligible for hospice benefits under Michigan Medicaid.

Note for Home Health Providers: An out-of-state/borderland home health provider cannot cross over the border into Michigan to provide services to a Medicaid beneficiary unless they are Medicare certified as a home health agency in Michigan. If this condition is met, and the home health agency provides services across state lines, its personnel must be qualified (e.g., licensed) to practice in Michigan.

Note for Nursing Facilities: An out-of-state/borderland nursing facility is not allowed to enroll with Michigan Medicaid. Historically, the only borderland nursing facilities that were allowed to enroll with Michigan Medicaid were those facilities where Michigan beneficiaries were admitted to the facilities prior to October 1, 2007 or were admitted where placement was approved by Medicaid due to closure of a Michigan facility. The last of such placements and Medicaid facility enrollment ended August 1, 2016.

7.3 OUT OF STATE/BEYOND BORDERLAND PROVIDERS

Reimbursement for services rendered to beneficiaries is normally limited to Medicaid-enrolled providers. MDHHS reimburses out of state providers who are beyond the borderland area if the service meets one of the following criteria:

- Emergency services as defined by the federal Emergency Medical Treatment and Active Labor Act (EMTALA) and the federal Balanced Budget Act of 1997 and its regulations; or
- Medicare and/or private insurance has paid a portion of the service and the provider is billing MDHHS for the coinsurance and/or deductible amounts; or
- The service is prior authorized by MDHHS. MDHHS will only prior authorize non-emergency services to out of state/beyond borderland providers if the service is not available within the state of Michigan and borderland areas.
- Genetic or Molecular laboratory services. Services are subject to clinical PA requirements that would apply if the laboratory provider were located in-state. (Refer to the Laboratory chapter for more information.)

Managed Care Plans follow their own Prior Authorization criteria for out of network/out of state services. Providers participating in Medicaid Health Plan and Dental Health Plan networks should refer to the

Medicaid Provider Manual

Dental chapter (Healthy Kids Dental section) and the Medicaid Health Plans chapter of this manual for additional prior authorization information.

Providers must be licensed and/or certified by the appropriate standard-setting authority.

All providers rendering services to Michigan Medicaid beneficiaries must complete the on-line application process described in the Provider Enrollment Section of this Chapter in order to receive reimbursement. Exceptions to this requirement may be made in special circumstances. These circumstances will be addressed through the Prior Authorization process.

Out of state/beyond borderland providers enrolled with the Michigan Medicaid program may submit their claims directly to CHAMPS. Providers should refer to the appropriate Billing and Reimbursement chapter of this manual for billing instructions.

MDHHS is prohibited by federal law from issuing Medicaid payment to any financial institution or entity whose address is outside of the United States.

Out of state/beyond borderland providers have a responsibility to follow Michigan Medicaid policies, including obtaining PA for those services that require PA.

All non-emergency services rendered by providers, except genetic or molecular laboratory services, require the referring provider to obtain written PA from MDHHS as indicated in the Prior Authorization Section of this chapter.

When a Michigan provider has referred a Medicaid beneficiary to a provider beyond the borderland area, the referring provider should instruct the provider to refer to this manual or the MDHHS website for enrollment instructions. (Refer to the Directory Appendix for website information.)

SECTION 8 - DELIVERY OF SERVICES

8.1 FREE CHOICE

Beneficiaries are assured free choice in selecting an enrolled licensed/certified provider to render services unless they are patients in a state-owned and-operated psychiatric facility, enrolled in a Medicaid Health Plan (MHP), or otherwise specified.

8.2 RENDERING SERVICES

Enrollment in Medicaid does not legally require a provider to render services to every Medicaid beneficiary seeking care, except as noted below. Providers may accept Medicaid beneficiaries on a selective basis. However, a Medicare participating provider must accept assignment for Medicare and Medicaid dual eligibles.

Hospitals must provide emergency services as required by the Emergency Medical Treatment and Active Labor Act (EMTALA), 42USC 1395dd.

If a Medicaid-only beneficiary is told and understands that a provider is not accepting them as a Medicaid patient and asks to be private pay, the provider may charge the patient for services rendered. The beneficiary must be advised prior to services being rendered that their **mihealth** card is not accepted and that they are responsible for payment.

All such services rendered must be in compliance with the provider enrollment agreement; contracts (when appropriate); Medicaid policies; and applicable county, state, and federal laws and regulations governing the delivery of health care services. (Refer to the Billing Beneficiaries Section of this chapter for more information.)

8.3 NONCOVERED SERVICES

The items or services listed below are not covered by the Medicaid program:

- Acupuncture
- Autopsy
- Biofeedback
- All services or supplies that are not medically necessary
- Experimental/investigational drugs, biological agents, procedures, devices or equipment
- Routine screening or testing, except as specified for EPSDT Program or by Medicaid policy
- Elective cosmetic surgery or procedures
- Charges for missed appointments
- Infertility services or procedures for males or females, including reversal of sterilizations
- Charges for time involved in completing necessary forms, claims, or reports

Medicaid Provider Manual

When the beneficiary needs a medical service recognized under State Law, but not covered by Medicaid, the service provider and the beneficiary must make their own payment arrangements for that noncovered service. The beneficiary must be informed, prior to rendering of service, that Medicaid does not cover the service. A Medicaid beneficiary in a nursing facility can use their patient-pay funds to purchase noncovered services subject to MDHHS verification of medical necessity and the provider's usual and customary charge. (Refer to the Nursing Facility Chapter for additional information.)

8.4 NONDISCRIMINATION IN DELIVERY OF SERVICE

Providers must render covered services to a beneficiary in the same scope, quality, and manner as provided to the general public. Within the limits of Medicaid, providers must take the necessary steps to ensure compliance with all relevant nondiscrimination provisions. Failure to comply may result in the provider's disenrollment from the program. Refer to the Nondiscrimination section of this chapter for additional information.

8.5 SERVICE ACCEPTABILITY

MDHHS may determine that a provider did not order, prescribe, refer, or render services/items within the scope of currently accepted medical/dental practice or the service was not provided within Medicaid limitations. In such cases, MDHHS reviews the situation and may:

- Refuse to reimburse for the service.
- Require the provider to repeat or correct the service at no additional charge to Medicaid or the beneficiary (e.g., an inaccurate vision prescription was written).
- Recover any monies paid to the provider for the service.
- Require the service to be done immediately (e.g., provide services to complete an incomplete examination or treatment).

Failure to comply with any of the last three items may result in the provider's disenrollment from Medicaid.

8.6 ORDERING, PRESCRIBING AND REFERRING SERVICES/ITEMS

All providers ordering, prescribing and/or referring services/items to Michigan Medicaid beneficiaries must be enrolled in the Michigan Medicaid program. These regulations apply to Fee for Service Medicaid and Medicaid Health Plan providers. Claims for beneficiaries with Medicare or private insurance coverage will not be exempt from this requirement. (Refer to the specific Billing & Reimbursement chapters for additional information.)

SECTION 9 - PRIOR AUTHORIZATION

9.1 GENERAL INFORMATION

There may be occasions when a beneficiary requires services beyond those ordinarily covered by Medicaid or needs a service that requires prior authorization (PA). In order for Medicaid to reimburse the provider in this situation, MDHHS requires that the provider obtain authorization for these services before the service is rendered. Providers should refer to their provider-specific chapter for PA requirements. (Refer to the Directory Appendix for contact information for PA.)

Requests for PA (except pharmacy) may be submitted in writing, via Direct Data Entry (DDE) through CHAMPS, or electronically (utilizing the ASC X12N 278 5010 Health Care Services Review/Request transaction) if the provider is an MDHHS-approved EDI submitter. Providers wishing to submit a 278 transaction should refer to the Electronic Submission Manual and the MDHHS Companion Guide for the HIPAA 278 Health Care Services Review/Request transaction for further information. Both documents are available on the MDHHS website. (Refer to the Directory Appendix for website information.) Refer to the Pharmacy Chapter for information related to pharmacy PA.

PA requirements for MHP enrollees may differ from those described in this manual. Providers should contact the individual plans regarding their authorization requirements.

PA may not be required if the beneficiary has Medicare or other insurance coverage. (Refer to the Coordination of Benefits Chapter for additional information.)

9.1.A. FFS DIRECT DATA ENTRY (DDE) IN CHAMPS

The CHAMPS PA system allows FFS providers to submit single PA requests through the online web portal. CHAMPS validates both beneficiary and provider information. An error message is returned to the user if the information is incorrect. Any provider may request PA, however, the provider NPI entered in the servicing provider field must represent the provider who will be rendering the service.

Once the PA request is successfully entered, the provider receives a tracking number. If the request is approved by MDHHS, this tracking number becomes the prior authorization number to use for billing purposes. The tracking number is not valid for claims unless a PA request is approved. Modifications to existing prior authorizations on file can be requested via fax to the Program Review Division. Private Duty Nursing providers with an authorization on file for a beneficiary in the Children's Waiver Program or Habilitation Supports Waiver should contact the Community Mental Health Services Program (CMHSP) for assistance. (Refer to the Directory Appendix for contact information.)

Supporting documentation may be linked to a DDE PA request either through facsimile or electronically. For electronically-submitted documentation, the DDE screen will open Internet Explorer on the user's computer and allow the retrieval of the appropriate record to link to the PA request. The system limits each PA request to 10 document attachments; each attachment is limited to a maximum size of 100MB. For documents submitted via facsimile, CHAMPS generates a cover sheet pre-populated with the beneficiary's ID number and the tracking number of the request. The fax cover sheet

Medicaid Provider Manual

contains the applicable fax number and must precede the documents being uploaded into CHAMPS. There is no system limit for the maximum number of pages for faxed documents.

PA Inquiry allows providers to check on the status of submitted PA requests or query on completed PAs on file. Up to seven (7) years of PA history is accessible to providers in CHAMPS.

9.2 PROCESSING REQUESTS

Based on documentation submitted, the PA request is either approved, disapproved, or returned for more information. Results of the request are returned to the provider via a letter. A separate letter is generated for each PA request regardless of the mode of submission and is viewable by providers in CHAMPS. Providers must immediately notify the beneficiary of the approval or denial of the PA request.

Approval of a PA request does not guarantee beneficiary eligibility or payment. It is the provider's responsibility to verify the beneficiary's eligibility for the date a service is actually rendered.

9.2.A. VERBAL PRIOR AUTHORIZATION

If a service requires PA but the situation requires immediate action to diagnose or correct a medical condition or avoid further damage, the provider may request PA by calling the MDHHS Program Review Division. (Refer to the Directory Appendix for contact information.)

If the service is required at a time when MDHHS cannot be contacted, the provider may perform the service and call MDHHS by the end of the next working day.

After verbal authorization is obtained, the provider must submit a written PA request (with supporting documentation) to MDHHS within 30 days. If the supporting documentation matches the information relayed for verbal authorization, MDHHS sends an approval to the provider.

9.2.B. APPROVAL

Payment is made only for services provided during the period of time the PA is valid and the beneficiary is eligible for Medicaid. Providers should carefully review the approval as it is for specific services and may be for only a specific period of time.

The prior authorized service must be the service that is rendered and billed. If there are changes in the plan of treatment or if the approved service does not accurately reflect the service to be provided, the Program Review Division should be contacted prior to rendering the service.

If a beneficiary elects to accept a service other than the service that was authorized, and that service also requires PA which was not obtained or is not covered by Medicaid, the beneficiary is responsible for payment of the entire service. In this situation, the provider must notify the beneficiary prior to rendering the service that Medicaid does not cover the service and the beneficiary is financially responsible for the entire service. It is suggested the beneficiary acknowledge this responsibility in writing.

Medicaid Provider Manual

9.2.C. DENIAL

If PA for the service is denied, it must not be billed to Medicaid. The beneficiary will be sent a letter notifying them of the denial with an explanation of their appeal rights. Once notified of the denial, the beneficiary may still wish to receive the service. The provider must reiterate to the beneficiary prior to rendering the service that Medicaid does not cover the service and the beneficiary is financially responsible for the entire service. It is suggested the beneficiary acknowledge this responsibility in writing.

9.2.D. REIMBURSEMENT

Procedure codes that do not have an MDHHS established fee screen require manual pricing. For certain services, manual pricing is completed through the claims processing process which requires documentation to be submitted with the claim. Other types of services require manual pricing to be completed through the PA process. For PA, it is the provider's responsibility to document the acquisition cost for the service or item submitted for consideration. Medicaid does not accept merchandise price quotes, estimates, retail prices, any document or price that does not indicate the actual cost of the item to the provider, or documentation that is greater than 90 days old. MDHHS reserves the right to set a dollar limit on how much MDHHS will reimburse for a Not Otherwise Classified (NOC) code or any manually priced procedure code for a specific range of products.

Documentation that may be accepted for PA requests includes:

- An invoice indicating what the medical supplier actually paid for the item to be provided to the specified beneficiary.
- An invoice indicating what the medical supplier actually paid for the same item requested on the PA but was purchased for a different beneficiary.
- An order form receipt from the manufacturer that indicates what the medical supplier actually paid for the item ordered for the specified beneficiary.
- For the manufacturer and/or custom-fabricated items, cost for materials and number of hours of labor.

Medicaid does not provide reimbursement if:

- The beneficiary was not eligible for Medicaid on the DOS. Reimbursement is denied on this basis even if the service has been prior authorized. **Exception:** For custom-fabricated equipment and devices, the beneficiary must be eligible for Medicaid on the date the item/service was ordered to be eligible for reimbursement.
- A service that is prior authorized is rendered in conjunction with a service that is not a separately reimbursable service and is not a Medicaid benefit.
- A service that is prior authorized and rendered in conjunction with another service that requires PA, and PA for the second service was not obtained.
- PA was required but was not obtained.

Medicaid Provider Manual

- The beneficiary has other insurance and the rules for coverage for other insurance were not followed.
- It was determined that PA was requested or obtained after the service was rendered. (The provider should refer to the Verbal Prior Authorization subsection above for an exception to this situation.)
- The service/item was ordered, prescribed or referred by a provider who has been sanctioned, and the sanction was in effect before PA was granted.
- The service/item was ordered, prescribed, or referred by a non-enrolled provider.

Providers cannot charge the beneficiary or beneficiary's representative for the provider's failure to obtain PA. If the provider failed to obtain PA for a service and the service was rendered, they cannot apply their fee for that service in calculating other reimbursement due to them from Medicaid.

9.3 PRIOR AUTHORIZATION (MEDICAID HEALTH PLANS ONLY)

Medicaid Health Plans (MHPs) are responsible for authorizing Medicaid-covered services in the Comprehensive Health Care Program (CHCP) benefit package for enrolled Medicaid beneficiaries, with certain exceptions such as emergency services. Providers must contact the MHPs before rendering services to MHP enrollees to obtain PA. Each MHP is responsible for establishing procedures for PA.

9.4 CLINICAL TRIALS

PA requirements that apply to services provided outside of a clinical trial apply to routine services within a clinical trial. PA requests, when required, must contain the clinical trial number, be complete, and include a completed and signed Attestation to the Appropriateness of the Qualified Clinical Trial form (BPHASA-2210). (Refer to the Forms Appendix to review the form and to the Directory Appendix for form access on the MDHHS website.) Submit requests electronically via FFS Direct Data Entry (DDE) in CHAMPS to allow for expedited review. Refer to the Practitioner Chapter for additional information for coverage of routine patient costs for services associated with participation in a qualified clinical trial.

9.5 CUSTOM-FABRICATED MEDICAL EQUIPMENT, DEVICES AND MEDICAL SUPPLIES

Medicaid is responsible for payment of custom-fabricated equipment or devices, hearing aids, eyeglasses, dentures, prosthetics and orthotics authorized and ordered before the last date of Medicaid eligibility and delivered within 30 days after loss of eligibility. Medicaid or the MHP that authorizes and orders the equipment or item is responsible for paying for the item even though it is delivered after the beneficiary loses eligibility or has an enrollment change (fee-for-service [FFS] to MHP, MHP to FFS or MHP to MHP). The order must be placed before the change in enrollment status, and the service should be delivered within 30 days after the change in enrollment status.

If a provider determines that a beneficiary needs a durable medical equipment (DME) item that is authorized by either MDHHS or the current MHP and is ordered before a change in enrollment status, the party that authorized the service is responsible for payment.

If a custom-fabricated item, medical device, or equipment (e.g., prosthetic limb, custom-fabricated medical equipment such as a brace, custom motorized wheelchair, orthotics) is ordered for a beneficiary

Medicaid Provider Manual

during a hospital stay but is not delivered until after discharge and enrollment status changes, payment must be made by the party responsible for the hospital stay.

This policy does not apply to mass-produced, readily available items that can be used by a person other than for whom it was ordered. It also excludes all rental items, all expendable/disposable medical supply items (e.g., diapers, dressings, ostomy supplies, IV infusion supplies) or any item that does not require a length of time (days or weeks) to special order for a specific person.

SECTION 10 - BILLING BENEFICIARIES

10.1 GENERAL INFORMATION

Providers cannot bill beneficiaries for services except in the following situations:

- A Medicaid copayment is required. (Refer to the Beneficiary Copayment Requirements subsection of this chapter for additional information about copayments.)
- A monthly patient-pay amount for inpatient hospital or nursing facility services. The local MDHHS office determines the patient-pay amount. Noncovered services can be purchased by offsetting the nursing facility beneficiary's patient-pay amount. (Refer to the Nursing Facility Chapter for additional information.)
- For nursing facility (NF), state-owned and -operated facilities or CMHSP-operated facilities determine a financial liability or ability-to-pay amount separate from the MDHHS patient-pay amount. The state-owned and -operated facilities or CMHSP-operated facilities liability may be an individual, spouse, or parental responsibility. This responsibility is determined at initiation of services and is reviewed periodically. The beneficiary or their authorized representative is responsible for the state-owned and -operated facilities or CMHSP ability-to-pay amount, even if the patient-pay amount is greater.
- The provider has been notified by MDHHS that the beneficiary has an obligation to pay for part of, or all of, a service because services were applied to the beneficiary's Medicaid deductible amount.
- If the beneficiary is enrolled in a MHP and the health plan did not authorize a service, and the beneficiary had prior knowledge that they were liable for the service. (It is the provider's responsibility to determine eligibility/enrollment status of each beneficiary at the time of treatment and to obtain the appropriate authorization for payment. Failure of the provider to obtain authorization does not create a payment liability for the beneficiary.)
- Medicaid does not cover the service. If the beneficiary requests a service not covered by Medicaid, the provider may charge the beneficiary for the service if the beneficiary is told prior to rendering the service that it is not covered by Medicaid. If the beneficiary is not informed of Medicaid noncoverage until after the services have been rendered, the provider cannot bill the beneficiary.
- Beneficiaries may be billed the amount other insurance paid to the policyholder if the beneficiary is the policyholder.
- The beneficiary is the policyholder of the other insurance and the beneficiary did not follow the rules of the other insurance (e.g., utilizing network providers).
- The provider chooses not to accept the beneficiary as a Medicaid beneficiary and the beneficiary had prior knowledge of the situation. The beneficiary is responsible for payment.

It is recommended that providers obtain the beneficiary's written acknowledgement of payment responsibility prior to rendering any nonauthorized or noncovered service the beneficiary elects to receive.

Some services are rendered over a period of time (e.g., maternity care). Since Medicaid does not normally cover services when a beneficiary is not eligible for Medicaid, the provider is encouraged to

Medicaid Provider Manual

advise the beneficiary prior to the onset of services that the beneficiary is responsible for any services rendered during any periods of ineligibility. Exceptions to this policy are services/equipment (e.g., root canal therapy, dentures, custom-fabricated seating systems) that began, but were not completed, during a period of eligibility. (Refer to the provider-specific chapters of this manual for additional information regarding exceptions.)

When a provider accepts a patient as a Medicaid beneficiary, the beneficiary cannot be billed for:

- Medicaid-covered services. Providers must inform the beneficiary before the service is provided if Medicaid does not cover the service.
- Medicaid-covered services for which the provider has been denied payment because of improper billing, failure to obtain PA, or the claim is over one year old and has never been billed to Medicaid, etc.
- The difference between the provider's charge and the Medicaid payment for a service.
- Missed appointments.
- Copying of medical records for the purpose of supplying them to another health care provider.

If a provider is not enrolled in Medicaid, they do not have to follow Medicaid guidelines about reimbursement, even if the beneficiary has Medicare as primary.

If a Medicaid-only beneficiary understands that a provider is not accepting them as a Medicaid patient and asks to be private pay, the provider may charge the beneficiary its usual and customary charges for services rendered. The beneficiary must be advised prior to services being rendered that their **mihealth** card is not accepted and that they are responsible for payment. It is recommended that the provider obtain the beneficiary's acknowledgement of payment responsibility in writing for the specific services to be provided.

10.2 BENEFICIARY COPAYMENT REQUIREMENTS

Beneficiary copayments may be required for the following Medicaid services:

- Physician office visits (including those provided by physician assistants, advanced practice registered nurses, and podiatrists)
- Chiropractic visits
- Outpatient hospital clinic visits
- Inpatient hospital stays
- Non-emergency use of the emergency room
- Dental services
- Hearing aids
- Pharmacy services
- Vision services

Medicaid Provider Manual

A list of current copayments is available on the MDHHS website. (Refer to the Directory Appendix for website information.) Different copayment requirements may apply for beneficiaries enrolled in a Medicaid Health Plan. Contact the appropriate plan for copayment information.

Preventive medicine evaluation and management services are not subject to beneficiary cost sharing.

10.2.A. BENEFICIARIES EXCLUDED FROM MEDICAID COPAYMENT REQUIREMENTS

Copayment requirements apply to Medicaid fee-for-service beneficiaries age 21 and older who do not meet one of the following exceptions:

- Medicare/Medicaid dual eligibles
- Children's Special Health Care Services (CSHCS) beneficiaries (including those also enrolled in Medicaid)
- Inpatient hospital stay initiated by an emergent admission
- Nursing facility residents
- Pregnancy-related services (claim must include a pregnancy-related diagnosis)
- Family planning services (as described in the Family Planning Clinics Chapter of this manual)
- Mental health specialty services and supports provided/paid through the Prepaid Inpatient Health Plans
- Mental health services provided through state psychiatric hospitals, the state Developmental Disabilities Center, and the Center for Forensic Psychiatry
- Services provided by a Federally Qualified Health Center (FQHC), Rural Health Clinic (RHC), or Tribal Health Center (THC). Copays for prescriptions filled in an FQHC, RHC, or THC are only exempt based on the beneficiary's eligibility and/or specific drug exclusions listed in the Medicaid Copayments subsection of the Pharmacy Chapter.
- Native American Indians/Alaska Natives consistent with federal regulations at 42 CFR §447.56(a)(1)(x)
- Enrollees in the Breast and Cervical Cancer Control Program (BCCCP)

Beneficiaries excluded from Medicaid FFS copayments are also excluded from MHP copayment requirements. (Refer to the Medicaid Health Plans chapter for additional information.)

10.2.B. REFUSAL OF SERVICE DUE TO NON-PAYMENT OF COPAYMENT

A provider cannot refuse to render care or services to a Medicaid beneficiary if the beneficiary is unable to pay the copayment amount at the time the care or service is provided. However, the uncollected copayment is considered a debt. A provider must accept the beneficiary's assertion that they are unable to pay. No additional proof is required.

Medicaid Provider Manual

Care or services cannot be denied unless the provider has first given the beneficiary:

- Appropriate notice of the debt (including documentation such as a billing statement, invoice, cash register receipt, or other writing showing the copayment amount owed), and
- Reasonable opportunity to pay the debt.

A provider refusing to render care or services based on copayment debt must, at the request of the beneficiary, transfer the beneficiary's treatment record to a provider designated by the beneficiary or, if it is the provider's normal practice, provide the beneficiary a copy of their treatment record, with reasonable promptness under the circumstances. Providers may not charge the beneficiary or MDHHS for providing a copy of treatment records for this purpose.

A provider refusing to render care or services based on copayment debt must refer a fee-for-service beneficiary to the toll-free Medicaid Beneficiary Helpline number on the **mihealth** card if the beneficiary has questions or concerns about the denial or about accessing care or services from another provider. (Refer to the Directory Appendix for Beneficiary Helpline contact information.) Managed care enrollees must be referred to the Health Plan's customer service helpline number contained on the beneficiary's Health Plan card.

For all providers except physicians and dentists (MD, DO, DDS), care or services cannot be denied based on the beneficiary's copayment debt unless the provider:

- Has a written policy regarding denial of service based on copayment debt that includes appropriate notice and a reasonable opportunity for payment. The provider's policy must include the statement that a beneficiary will not be denied an item or service because they cannot pay the copayment for the item or service currently being requested. The policy must include the provider's method of furnishing adequate notice, as well as the minimum length of time and terms of payment allowed by the provider as a reasonable opportunity for payment.
- Has established procedures for maintaining business records that show the amount of the copayment debt, the date when the required notice was provided to the beneficiary, and the date(s) and amount(s) of any payment(s) received on the copayment debt.
- Gives written (or verbal, pursuant to #4 below) notice to the beneficiary at least the greater of 30 days (60 days for hospitals), or the period prescribed by the provider, prior to denial.

The notice must include:

- The time period within which the beneficiary must make payment, in whole or at the discretion of the provider in part, on their newly-created copayment debt in order to avoid denial of future service; and
- The dollar amount of the minimum payment that must be remitted as a prerequisite for continued service; and

Medicaid Provider Manual

- The fact that the beneficiary cannot be denied future care, items, or services if they make the required full or partial payment on their newly-created copayment debt in the above-designated period.
- Gives verbal notice in lieu of written notice when the provider:
 - Publicly and prominently posts their policy regarding denial of service based on copayment debt in a public area such as the provider's reception area; and
 - At the time that verbal notice is given, either provides a copy of the posted policy or verbally informs the beneficiary of the existence and location of the posted notice and the beneficiary's right to a copy of the notice upon request; and
 - Makes a copy of the written policy available to the beneficiary and to MDHHS immediately upon request.

If a provider gives verbal notice, rather than individual written notice, the provider cannot require the beneficiary to acknowledge in writing that they have been informed of their copayment rights and responsibilities. If the beneficiary refuses to sign an acknowledgement, the provider may note this in their records. Upon receipt of the required payment in the amount and during the time period designated in the individual notice, the provider cannot deny the beneficiary care, items, or services unless and until a new notice meeting the above requirements is given to the beneficiary.

The policies and procedures described above do not affect a provider's right to deny care, items, or services on the basis of debt unrelated to any copayment responsibility, or for other non-financial reasons, consistent with the provider's usual business practices for patients or customers who are not Medicaid beneficiaries.

10.2.C. COST-SHARING LIMITS

Medicaid cost-sharing, which includes premiums, contributions, copays and co-insurance incurred by individuals in a Medicaid household, may not exceed an aggregate limit of 5% of family income. MDHHS implements these limits on a calendar quarter basis through the tracking of applicable incurred cost-sharing, including paid claims for services as they are processed through the MDHHS Community Health Automated Medicaid Processing System (CHAMPS). Providers are expected to utilize the cost-sharing information in CHAMPS to determine whether cost-sharing may be assessed at the time of the visit and inform the beneficiary of their cost-sharing obligations.

The eligibility response within CHAMPS includes the following cost-sharing information for the current calendar quarter:

- Cost-Share Met (Y or N);
- Cap Amount Remaining; and
- Copayment (for various services).

If the "Cost-Share Met" is listed as "Y" in CHAMPS, a beneficiary may not be charged any cost-sharing for the remainder of that quarter. In addition, regardless of the approved copayment amount for a particular service, beneficiaries may not be charged any cost-sharing that exceeds the "Cap Amount Remaining" amount listed. Finally, beneficiaries and services that are exempt from cost-sharing as set forth in this Section will remain exempt from cost-sharing.

Medicaid Provider Manual

For pharmacy providers, any remaining copay responsibility will be communicated in the National Council for Prescription Drug Programs (NCPDP) transaction response field 505-F5 (Patient Pay Amount). The Point of Sale (POS) system will determine whether the aggregate limit has been met.

Because CHAMPS tracks beneficiary costs incurred as claims are adjudicated, providers are directed to bill all claims in a timely fashion. Providers are also directed to review the remittance advice to ensure that any copay charged at the time of service was appropriate and to provide refunds if necessary. Medicaid Health Plans that charge copays to Medicaid beneficiaries may also have administrative responsibilities to work with their providers to provide refunds when necessary or as directed by MDHHS.

SECTION 11 - BILLING REQUIREMENTS

All claims must be submitted in accordance with the policies, rules, and procedures as stated in the manual and in compliance with applicable coding guidelines and conventions.

11.1 BILLING PROVIDER

Providers must not bill MDHHS for services that have not been completed at the time of the billing. For payment, MDHHS requires the provider name and NPI numbers to be reported in any applicable provider loop or field (e.g., attending, billing, ordering, prescribing, referring, rendering, servicing, supervising, etc.) on the claim. It is the responsibility of the attending, ordering, prescribing, referring or supervising provider to share their name, NPI and Michigan Medicaid Program enrollment status with the provider performing the service. Refer to the Billing & Reimbursement Chapters of this manual for additional information and claim completion instructions.

Providers rendering services to residents of the Intermediate Care Facility for Individuals with Intellectual Disabilities (ICF/IID) may not bill Medicaid directly. All covered services (e.g., laboratory, x-rays, medical surgical supplies including incontinent supplies, hospital emergency rooms, clinics, optometrists, dentists, physicians, and pharmacy) are included in the per diem rate.

11.2 CHARGES

Providers cannot charge Medicaid a higher rate for a service rendered to a beneficiary than the lowest charge that would be made to others for the same or similar service. This includes advertised discounts, special promotions, or other programs to initiate reduced prices made available to the general public or a similar portion of the population. In cases where a beneficiary has private insurance and the provider is participating with the other insurance, refer to the Coordination of Benefits Chapter of this manual for additional information.

11.3 TIMELY FILING BILLING LIMITATION

Each claim received by MDHHS receives a unique identifier called a Transaction Control Number (TCN). This is an 18-digit number found in the Remittance Advice (RA) that indicates the date the claim was entered into the Community Health Automated Medicaid Processing System (CHAMPS). The TCN is used when determining active review of a claim. (Refer to the Billing & Reimbursement Chapters for additional information.)

A claim must be initially received and acknowledged (i.e., assigned a TCN) by MDHHS within 12 months from the date of service (DOS).^{*} DOS has several meanings:

- For claims using the institutional format and MHPs, it is the "To" or "Through" date indicated on the claim.
- For all other providers, it is the date the service was actually rendered or delivered.

^{*}Initial pharmacy claim must be received within 180 days.

Medicaid Provider Manual

All claims must be resolved within one year from the date of service unless an exception exists as noted below. It will no longer be necessary to maintain continuous activity through multiple claim submissions. Claim replacements requesting additional payment must meet exception criteria to be considered beyond one year from DOS.

Only the following types of claims require documentation of previous activity in the Remarks section of the claim (e.g. previous TCNs):

- Claim replacements;
- Claims previously billed under a different provider NPI number;
- Claims previously billed under a different beneficiary ID number; and
- Claims previously billed using a different DOS "statement covers period" for nursing facilities and inpatient hospitals.

This does not apply to state-owned and -operated facilities, as they do not receive a warrant. Note: Nursing Facilities – In cases where a nursing facility may need to submit a claim adjustment due to a change in the beneficiary's patient-pay amount and the claim has not had continuous active review, the adjustment must be submitted within six months from the date MDHHS made the change in the patient-pay amount. The Remarks section must note a reason for the adjustment.

Exceptions may be made to the timely filing billing limitation policy in the following circumstances.

- Department administrative error occurred, including:
 - The provider received erroneous written instructions from MDHHS staff;
 - MDHHS staff failed to enter (or entered erroneous) authorization or restriction in the system;
 - The MDHHS contractor issued an erroneous PA; and
 - Other administrative errors by MDHHS or its contractors that can be documented.
- Retroactive provider enrollment is not considered an exception to the timely filing billing limitation.
- Medicaid beneficiary eligibility/authorization was established retroactively more than 12 months after the DOS.
 - Medicaid beneficiary eligibility/authorization was established retroactively less than 12 months after the DOS. Claims will be accepted up to six months after the retroactive eligibility determination date. Providers with claims that meet this retroactive eligibility exception must indicate 'timely filing' in the comment section of the claim.
 - Judicial Action/Mandate: A court or MOAHR administrative law judge ordered payment of the claim. A copy of the judicial action or court order may be required to support this exception.

Medicaid Provider Manual

- Medicare processing was delayed: The claim must reflect that Medicaid was billed within 120 days of the date of payment, rejection or retroactive recovery of funds by Medicare. (Refer to the Coordination of Benefits Chapter in this manual for further information.)
- Provider returning overpayment: A claim replacement should be submitted with a comment that the provider is returning money. The replacement should be completed to reflect the return of money (e.g., including primary payer's payment or, if returning all the money, zeroing out the money fields).
- Primary insurance taking back payment after timely filing limitation has passed: Must submit a copy of insurance letter or EOB from primary insurance showing date money was taken back from paid claim. The claim must be submitted within 120 days of the primary insurance letter or remit date.

Providers who have claims meeting either of the first two exception criteria must contact their local MDHHS office to initiate the following exception process:

- The MDHHS caseworker completes and submits the Request for Exception to the Twelve-Month Billing Limitation for Medical Services form (MSA-1038) to MDHHS.
- Providers can determine if an MSA-1038 has been approved/denied by accessing the MSA-1038 status tool or by contacting the MDHHS caseworker. (Refer to the Directory Appendix, Eligibility Verification, for contact and website information.)
- Once informed of the approval, the provider prepares claims related to the exception, indicating "MSA-1038 approval on file" in the comment section.
- The provider submits claims to MDHHS through the normal CHAMPS submission process.

Refer to the Billing & Reimbursement chapters of this manual for additional information on claim submission or go to the MDHHS website for additional CHAMPS-related information. Questions regarding claims submitted under this exception should be directed to MDHHS Provider Inquiry. (Refer to the Directory Appendix for contact and website information.)

11.4 PROVIDER RETURNING OVERPAYMENTS

Medicaid providers performing self audits may discover an overpayment situation and wish to return the Medicaid overpayment to MDHHS. This process should only be used when the provider is unable to claim adjust or it is not practical to claim adjust. Sending in a check will not correct the underlying claim(s) data. Providers must:

- Document why the money is being returned (i.e., provider self audit) and identify provider NPI information, address, dates of service, and specialty area (i.e., durable medical items, pharmacy, physician practice, hospital, etc.) and include a basic information letter.
- Attach an excel spreadsheet document with the Tax ID, billing NPIs, and associated amounts (if multiple IDs exist for the entity) for the MDHHS Accounting Office to apply credit to.
- Make check payable to "State of Michigan" and mail to the MDHHS/Cashier's Unit - Attn: Bureau of Finance-MCU. (Refer to the Directory Appendix for contact information.)

11.5 PROFESSIONAL CORPORATION

For services involving multiple visits billed with a single procedure code (e.g., surgery and pre- and post-operative care, prenatal care) or initial or new services, the code/service may be billed only once by a professional corporation. Other members of the corporation may not bill separately any procedures related to the service. This policy includes services rendered in a partnership, employer-employee, or contractor relationship.

11.6 INVOICE COMPLETION FEE

A fee for completing the Medicaid claim cannot be charged to Medicaid, the beneficiary, or the beneficiary's representative.

11.7 CLAIM DOCUMENTATION

In some cases, MDHHS may require specific information with the claim (e.g., indication of medical necessity). Providers should refer to the provider-specific and Billing & Reimbursement Chapters of this manual for the information that may be needed on the claim.

A claim without the requested information may be reviewed:

- Prior to payment. (The claim may be rejected for missing, incorrect or insufficient information.)
- Subsequent to payment. (A post-payment audit/review may indicate that the information was insufficient or missing and a gross adjustment would be initiated to recover the payment.)

11.8 CLAIM CERTIFICATION

Providers certify by signature that a claim is true, accurate, and contains no false or erroneous information. The provider's signature or that of the provider's authorized representative may be handwritten, typed, or rubber-stamped on a paper claim.

When a provider's warrant is endorsed or deposited, it is certification that the services billed were actually provided. It further certifies that the claims (paper or electronic) paid by the warrant accurately document that the health care services provided were within the limitation of Medicaid (or compliance with a contract). The warrant's certification applies to original claims as well as resubmitted claims and claim adjustments.

This does not apply to state-owned and -operated facilities, as they do not receive a warrant.

Providers are held responsible for any errors, omissions, or resulting liabilities that may arise from any claim for medical services submitted to MDHHS under the provider's name or NPI number. Contractual arrangements (verbal or written) with employers, employees, contractors, etc. do not release the provider of the responsibility for services billed or signed under the provider's NPI number.

Providers are responsible for the supervision of a subordinate, officer, employee, or contracted billing agent who prepares or submits the provider's claims.

Medicaid Provider Manual

11.9 BILLING AGENTS

A billing agent that submits Medicaid claims via electronic media must be authorized by MDHHS before submitting claims. Once the billing agent has completed the business-to-business (B2B) testing requirements and is authorized by MDHHS, the provider must authorize the billing agent to submit their claims. The authorization for submitting claims via electronic media must be submitted even if the provider is acting as their own billing agent.

11.9.A. AUTHORIZATION OF BILLING AGENT

The billing agent initiates the authorization process through completion of the MDHHS CHAMPS PE on-line application. Refer to the Provider Enrollment Section of this Chapter and the Trading Partners portion of the MDHHS website for information on the application and billing agent authorization process. (Refer to the Directory Appendix for website information.)

11.9.B. PROVIDER ASSOCIATION WITH A BILLING AGENT

The process for a provider to authorize a billing agent to submit claims is accomplished through the CHAMPS PE on-line process. The enrolled provider must enter the on-line system and request association with a specific billing agent. Once that transaction is completed, the provider must notify the billing agent that they may begin submitting claims on the provider's behalf.

11.9.C. COMMUNICATION WITH BILLING AGENTS

MDHHS communicates changes in coverages, billing requirements, and fees/rates to its enrolled providers. If a provider contracts with a billing agent, it is the provider's responsibility to assure the billing agent is made aware of any changes that may impact submission of the provider's claims. Providers are responsible for the claims submitted by the billing agent, including improper billings, duplicate payments, etc.

SECTION 12 - THIRD PARTY LIABILITY

Federal regulations require that all identifiable financial resources available for payment, including Medicare, be billed prior to billing Medicaid. (Refer to the Coordination of Benefits Chapter of this manual for additional information.)

Medicaid does not reimburse for services provided to individuals being held in a detention facility against their will except for those directly related to an inpatient hospital stay (medical/surgical/psychiatric) provided in a non-state-owned facility. Benefit Plan IDs of INCAR-ESO, INCAR-MA, INCAR-MA-E and MA-HMP-INC, if provided in the eligibility response, all indicate that the beneficiary resides in a detention facility.

12.1 ESTATE RECOVERY PROGRAM

Pursuant to 42 USC §1396p, the federal government requires state Medicaid programs to seek recovery from the estates of certain deceased beneficiaries who received benefits from a state Medicaid program. This is referred to as the Estate Recovery Program. Under some circumstances, the state may choose not to seek or may defer recovery from the estate.

Estate recovery applies only to Medicaid beneficiaries who:

- are 55 years of age or older; and
- received long-term care services any time on or after September 30, 2007.

The Estate Recovery Program can only recover from assets flowing through the probate process.

When a provider has a balance in a patient trust account after the death of a beneficiary, any balance in the account should be refunded to the family to open a probate estate with those funds. Once an estate is opened in probate court, MDHHS will file a claim.

Medicaid Provider Manual

SECTION 13 – REIMBURSEMENT

13.1 PAYMENT IN FULL

Providers must accept Medicaid's payment as payment in full for services rendered, except when authorized by Medicaid (e.g., copayments, patient-pay amounts, other cost sharing arrangements authorized by the State). Providers must not seek nor accept additional or supplemental payment from the beneficiary, the family, or representative in addition to the amount paid by Medicaid, even when a beneficiary has signed an agreement to do so. This policy also applies to payments made by MHPs and PIHPs/CMHSPs/CAs for their Medicaid enrollees.

Contractors or nursing facility (including ICF/IID) operators must not seek nor accept additional or supplemental payment beyond the patient-pay or MDHHS ability-to-pay amount.

13.2 PRE- AND POST-PAYMENT REVIEW/AUDIT

Providers are subject to pre- and post-payment review/audit or an adjustment to the reimbursement rate.

- In pre-payment review, MDHHS may deny reimbursement for a service until it is satisfied the service meets Medicaid guidelines.
- In post-payment review/audit, MDHHS may initiate an adjustment to obtain monies paid for services that do not comply with Medicaid coverage, billing and/or reimbursement policies or that suspends or disenrolls the provider from Medicaid.

13.3 EMERGENCY SERVICES (MHPs ONLY)

Emergency services to the point of stabilization (as required to be provided under the Emergency Medical Treatment and Active Labor Act [EMTALA]), provided to a MHP enrollee inside or outside the MHP's service area, must be reimbursed by the MHP to the provider of services.

13.4 NON-PAYMENT AND REPORTING REQUIREMENTS FOR PROVIDER PREVENTABLE CONDITIONS (PPCs)

In accordance with federal regulations, Michigan Medicaid is prohibited from reimbursing providers for services related to Provider Preventable Conditions (PPCs), as defined below. Providers are required to report the occurrence of PPCs. This policy applies to all services performed on Medicaid beneficiaries, including dual-eligible beneficiaries and those enrolled in Medicaid Health Plans. MDHHS aligns with Medicare's policy and billing guidelines.

13.4.A. CATEGORIES OF PROVIDER PREVENTABLE CONDITIONS

Health Care Acquired Conditions (HCAC)	Applies to inpatient hospital settings and includes, at a minimum, the full list of conditions/secondary diagnosis codes identified by CMS as HCACs when not present on hospital admission.
---	---

Medicaid Provider Manual

Other Provider Preventable Conditions (OPPC)

Applies to conditions occurring in any health care setting that could have reasonably been prevented through the application of evidence based guidelines. Conditions currently identified by CMS include:

- wrong surgical or other invasive procedure performed on a patient;
- surgical or other invasive surgery performed on the wrong body part; and
- surgical or other invasive procedure performed on the wrong patient.

13.4.B. PAYMENT ADJUSTMENT AND REPORTING REQUIREMENTS FOR PPCs

Any reduction in payment will be limited to the amounts directly identifiable as related to the PPC and the resulting treatment. The beneficiary and/or their family are held harmless and the provider and/or facility/hospital must not bill the Medicaid beneficiary or their family (including co-payment, deductibles or coinsurance) for PPCs.

MDHHS will not accept Medicare primary or Medicaid secondary professional or institutional crossover claims resulting in zero liability.

Providers must report the occurrence of a PPC through the appropriate claim(s) type submission process. Providers are referred to the Billing & Reimbursement Chapters of this manual for specific information on reporting requirements and claim submission.

13.5 FACTORING

Factoring of Medicaid accounts by any provider is prohibited. A factor is defined in federal regulations as "an organization, that is, a collection agency or service bureau which advances money to a provider for their accounts receivable which have been assigned or sold, or otherwise transferred to this organization for an added fee or a deduction of the accounts receivable." Power of attorney arrangements, under which a check is payable to the provider but can be cashed by a factor, are prohibited. However, payment may be made in accordance with an assignment from the provider to a government agency or an assignment made pursuant to a court order.

Factor does not include a business representative, such as a billing agent or an accounting firm, which renders statements and receives payments in the name of the individual provider as long as the business representative's compensation for this service is:

- Reasonably related to the cost of processing the claim;
- Not related, in any way, to the dollar amount to be billed or collected; and
- Not dependent upon the actual collection of payment.

This policy is not applicable to State-owned and -operated facilities.

SECTION 14 – RECORD KEEPING

14.1 RECORD RETENTION

Providers must maintain, in English and in a legible manner, written or electronic records necessary to fully disclose and document the extent of services provided to beneficiaries. Necessary records include fiscal and clinical records as discussed below. Appointment books and any logs are also considered a necessary record if the provider renders a service that is time-specific according to the procedure code billed. Examples of services that are time-specific are psychological testing (per hour), medical psychotherapy (20-30 minutes), and vision orthoptic treatment (30 minutes). The records are to be retained for a period of not less than seven years from the DOS, regardless of change in ownership or termination of participation in Medicaid for any reason. This requirement is also extended to any subcontracted provider with which the provider has a business relationship.

14.2 ORDERS, PRESCRIPTIONS AND REFERRALS

Providers arranging or rendering services upon the order, prescription or referral of another provider (e.g., physician) must maintain that order, prescription and/or referral for a period of seven years.

14.3 BENEFICIARY IDENTIFICATION INFORMATION

Providers must retain the following beneficiary identification information in their records:

- Name
- Medicaid ID number
- Medical record number
- Address, including zip code
- Birth date
- Telephone number, if available
- Any private health insurance information for the beneficiary, if available

14.4 AVAILABILITY OF RECORDS

Providers are required to permit MDHHS personnel, or authorized agents, access to all information concerning any services that may be covered by Medicaid. This access does not require an authorization from the beneficiary because the purpose for the disclosure is permitted under the HIPAA Privacy rule. Health plans contracting with the MDHHS must be permitted access to all information relating to services reimbursed by the health plan.

Providers must, upon request from authorized agents of the state or federal government, make available for examination and photocopying all medical records, quality assurance documents, financial records, administrative records, and other documents and records that must be maintained. (Failure to make requested records available for examination and duplication and/or extraction through the method determined by authorized agents of the state or federal government may result in the provider's suspension and/or termination from Medicaid.) Records may only be released to other individuals if they

have a release signed by the beneficiary authorizing access to their records or if the disclosure is for a permitted purpose under all applicable confidentiality laws.

14.5 CONFIDENTIALITY

MDHHS complies with HIPAA Privacy requirements and recognizes the concern for the confidential relationship between the provider and the beneficiary and protects this relationship using the minimum amount of information necessary for purposes directly related to the administration of Medicaid.

All records are of a confidential nature and should not be released, other than to a beneficiary or their representative, unless the provider has a signed release from the beneficiary or the disclosure is for a permitted purpose under all applicable confidentiality laws (refer to the Availability of Records subsection of this chapter for additional information). Providers are bound to all HIPAA privacy and security requirements as federally mandated.

If the provider receives a court order, a subpoena, beneficiary request, or other authorized request for medical bills, payment, or claims adjudication information, the information should be released. At the same time, copies of the court order, subpoena, beneficiary request, other authorized request, and any additional information should be faxed to the MDHHS TPL Section. (Refer to the Directory Appendix for contact information.)

If there is a reason to suspect a duplicate payment has been or will be made, but the payment is not assigned, the provider should contact the TPL Section. TPL will make the necessary arrangements to collect the duplicate payment from the third-party source.

If the provider questions the appropriateness of releasing beneficiary records, they are encouraged to seek legal counsel before doing so.

14.5.A. STANDARD CONSENT FORM

In cases when such consent is required, the Consent to Share Behavioral Health Information (form MDHHS-5515) must be used for all providers requesting release of information for behavioral health and/or substance use disorder related information. The consent is required to be accepted, honored and used for all Fee for Service (FFS), Managed Care and Prepaid Inpatient Health Plan (PIHP) beneficiaries both from and to any of those providers or entities. The MDHHS-5515 is maintained and updated on the MDHHS website. (Refer to the Directory Appendix for website information.)

An interpreter must be provided to assist the individual if the individual does not understand the language used on the consent form or the language used by the person obtaining the consent. Services of an interpreter cannot be billed as separate services or billed to the beneficiary.

Providers receiving federal funding under the Victims of Crime Act, Violence Against Women Act, and/or Family Violence Prevention and Services Act should not use the MDHHS-5515 because they are subject to stringent consent requirements under these federal laws that are not satisfied by the form. These requirements are in place to address the heightened safety and privacy concerns that victims of domestic violence, sexual assault, stalking, or other crimes may have. These individuals may need additional safeguards for their behavioral health information.

Medicaid Provider Manual

For guidance on addressing issues related to consent and the provision of services for domestic violence, sexual assault, stalking, or other crimes, refer to the MDHHS website.

14.6 FISCAL RECORDS

The following fiscal records must be maintained:

- Copies of Remittance Advices (RA);
- PA requests and approvals for services and supplies (including managed care authorizations);
- Verification of medical necessity and the provider's usual and customary charge for the noncovered service;
- Record of third-party payments; and
- Copies of purchase invoices for items offered or supplied to the beneficiary.

14.7 CLINICAL RECORDS

The following table contains general guidelines for clinical documentation that must be maintained by all providers except nursing facilities. Clinical records other than those listed may also be needed to clearly document all information pertinent to services that are rendered to beneficiaries. All providers must refer to their specific coverage policy in this manual for additional documentation requirements. The clinical record must be sufficiently detailed to allow reconstruction of what transpired for each service billed. All documentation for services provided must be signed and dated by the rendering health care professional.

For services that are time-specific according to the procedure code billed, providers must indicate in the medical record the actual begin time and end time of the particular service. For example, some Physical Medicine procedure codes specify per 15 minutes. If the procedure started at 3:00 p.m. and ended at 3:15 p.m., the begin time and end time must be recorded in the medical record.

The medical record must indicate the specific findings or results of diagnostic or therapeutic procedures. If an abbreviation, symbol, or other mark is used, it must be standard, widely accepted health care terminology. Symbols, marks, etc. unique to that provider must not be used.

Examples:

- When a test is performed, at a minimum, the test value for that beneficiary for that test must be noted. Additionally, the normal range of values for the testing methodology should be annotated in the record.
- When an x-ray is taken, the results or findings must be indicated. For example, a chest x-ray may indicate "no pulmonary edema present" or "no consolidation."
- When a physical examination is performed, pertinent results or readings must appear.
- If blood pressure is taken, the actual reading must appear.
- If heart, lungs, eyes, etc. are checked, the results or findings must be detailed.
- Medical/surgical procedures performed must be sufficiently documented to allow another professional to reconstruct what transpired (e.g., "I-D" is not sufficient documentation).

Medicaid Provider Manual

- When a complete physical exam is rendered, the level of service must be fully documented.
- If private duty nursing is provided, the care provided during each hour must be fully detailed.

Hospitals must retain any clinical information required to comply with 42 CFR 482.24. A nursing facility must retain any clinical information required to comply with 42 CFR 483.75 and the plan of care must comply with 42 CFR 483.20(d). These regulations are available from MDHHS or Centers for Medicare & Medicaid Services (CMS). (Hospitals and nursing facilities should refer to the Reimbursement Appendix of their chapters in this manual for additional record keeping requirements.)

SECTION 15 – POST-PAYMENT REVIEW AND FRAUD/ABUSE

All Medicaid-reimbursed services are subject to review for conformity with accepted medical practice and Medicaid coverage and limitations. Post-payment reviews of paid claims may be conducted to assure that all services/items, providers, and settings were appropriate, necessary, and comply with Medicaid policy. Post-payment review also verifies that services were billed appropriately (e.g., correct procedure codes, modifiers, quantities, etc.), and that third party resources were utilized to the fullest extent available.

15.1 MDHHS OFFICE OF INSPECTOR GENERAL

The MDHHS Office of Inspector General, as a federal mandate (42 CFR 455.14), is responsible for investigating all suspected Medicaid provider (FFS or managed care) fraud and/or abuse. To report suspected fraudulent activities to MDHHS, contact the Office of Inspector General. (Refer to the Directory Appendix for contact information.) Suspected fraud and/or abuse is referred by the Office of Inspector General to the Michigan Department of the Attorney General, Medicaid Fraud Control Unit.

15.2 STATE LAW

The Michigan Department of Attorney General uses the following State laws for investigating provider fraud and abuse:

- Medicaid False Claim Act (MCLA 400.601 et. seq.) An individual, whether a provider, an employee, or an accomplice, convicted of such an activity is subject to a fine of up to \$50,000 and a prison sentence of four to ten years for each count, as well as full restitution to Medicaid of all funds fraudulently obtained. The provider may be suspended from participating in Medicaid for a period of time and, in some instances, their license to practice their profession may be suspended or revoked.

Examples of Medicaid fraud are:

- Billing for Services Not Rendered: A provider bills Medicaid for a treatment or procedure that was not actually performed (e.g., laboratory tests or x-rays that were not taken, full dentures were prior authorized and billed for when a partial denture was actually supplied).
- Billing Without Reporting Other Resources: A provider bills Medicaid the full charge for a service without reporting the amount billed and received from another source (e.g., a private insurance company) or charging the patient for the service or a copay for a covered benefit.
- Billing for a Brand Name Drug Not Dispensed: A pharmacy bills Medicaid for a brand name drug when a generic substitute (at a lower cost) was actually dispensed to the beneficiary.
- Billing for Unnecessary Services: A provider misrepresents the diagnosis and symptoms on a beneficiary's record in order to provide and bill for unnecessary tests and procedures.

Medicaid Provider Manual

- Billing a DOS Other Than the Actual Date the Service was Rendered: A provider indicates a DOS other than the actual DOS that was during a time of beneficiary ineligibility or service noncoverage.
- Receiving Kickbacks: An ancillary provider (e.g., physical therapist, laboratory, pharmacy) may agree to pay a physician, nursing facility, or hospital administrator or owner a portion of their Medicaid reimbursement for services rendered to the physician's patient or a beneficiary residing in the facility. Payments to a physician or facility administrator or owner may be a cash payment, a vacation trip, a leased vehicle, inflated rental for space, etc. Often a kickback arrangement results in unnecessary tests or services being provided to the beneficiary in order to generate additional reimbursement.
- Fraudulent Cost Reports: A nursing facility or hospital including nonallowable costs or false information (e.g., understate patient census days) or including nonpatient care expenses (e.g., landscaping, interior design, or remodeling at the administrator's or owner's personal residence) in its cost report to justify a higher per diem or reimbursement rate from Medicaid.
- Social Welfare Act (MCLA 400.111d): A conviction may result in a denial, suspension, or termination of the provider's license or similar action from Medicaid.
- Public Health Code (MCLA 333.16226): A conviction may result in a fine or probation from Medicaid or the denial, suspension, or revocation of a provider's license.

MDHHS encourages provider assistance in reducing and reporting provider fraud and abuse in Medicaid and violation of HIPAA Privacy regulations. Any provider or employee suspecting that a fraudulent activity is occurring should contact the Michigan Department of Attorney General. (Refer to the Directory Appendix for contact information.)

15.3 FEDERAL LAW

The Office of Inspector General of the U.S. Department of Health & Human Services (HHS) investigates provider fraud, abuse and violation of HIPAA Privacy and Security regulations under federal laws.

The following federal laws are primarily used:

- Social Security Act (Section 1909). A conviction resulting in a penalty of up to five years imprisonment and/or a \$10,000 fine.
- Civil Monetary Penalties Law of 1981 (Section 1128A of the Social Security Act). A conviction may result in a civil monetary penalty of not more than \$2,000 for each item or service, and an assessment of not more than twice the amount claimed for each such item or service in lieu of damages sustained by the federal or state agency because of the fraudulent claim.

To report fraudulent activities to the federal investigators, contact the Office of Inspector General of the U.S. Department of Health & Human Services (HHS). Complaints regarding Michigan health facilities may be reported to the Michigan Health Facility Complaint Line. (Refer to the Directory Appendix for contact information.)

15.4 PATIENT ABUSE

Under federal law, the Department of Attorney General, Health Care Fraud Division (Medicaid Fraud Control Unit) is mandated to investigate and prosecute instances of patient abuse occurring in any Michigan facility receiving Medicaid funds.

Examples of patient abuse are:

- Physical abuse, involving assaulting, striking, or sexually abusing a patient.
- Threat or perceived threat of physical or sexual abuse.
- Neglect resulting from inadequate medical or custodial care or other situations that create health risks to the patient.
- Financial abuse, including misappropriation of patient's personal funds, comingling of patient and facility funds.
- Use of patient funds to pay for facility operations.
- Theft of patient's property.

The above examples are not all inclusive.

Complaints involving suspected abuse of patients within any Michigan facility receiving Medicaid funds should be reported to the Michigan Department of Attorney General's 24-hour toll-free hotline. Complaints may also be mailed to the Attorney General's Medicaid Fraud Unit. (Refer to the Directory Appendix for contact information.)

Pursuant to Section 111b of the Social Welfare Act of 1939 (PA 280, as amended, MCLA 400.111b[7]), a provider is required to make available, to authorized agents of the Department of Attorney General, any record required that must be maintained as a condition of participation in Medicaid.

The Michigan Department of Attorney General is also empowered to investigate and prosecute any complaint involving patient abuse by a provider that receives Medicaid funds. It does not matter whether or not the abused patient is receiving Medicaid benefits. (Patient abuse is defined as harm or threat of harm to a patient's health or welfare by a person responsible for the patient's health or welfare that occurs through nonaccidental physical or mental injury, sexual abuse, or maltreatment.)

15.5 BENEFICIARY FRAUD/ABUSE

A provider can contact the local MDHHS office in the beneficiary's county of residence to report beneficiary fraud, or contact the Office of Inspector General's Recipient Fraud Unit Hotline. (Refer to the Directory Appendix for contact information.)

The provider can also report beneficiary over-utilization of services by contacting the local MDHHS worker or the Benefits Monitoring Program. (Refer to the Directory Appendix for contact information.)

Medicaid Provider Manual

SECTION 16 - PROVIDER APPEAL PROCESS

Any provider participating in, or applicant wishing to participate in, Medicaid has the right to appeal any adverse action taken by MDHHS unless the adverse action resulted from an action over which MDHHS had no control (e.g., Medicare termination, license revocation, court's findings in a criminal case). The method of appeal depends upon the provider type and is subject to the Social Welfare Act, Public Act 280 of 1939 (MCL 400.01 et seq.); Chapters 4 and 6 of the Administrative Procedures Act of 1969 (MCL 24.271 to 24.287, MCL 24.301 to 24.306); and the Public Health Code, Public Act 368 of 1978 (MCL 333.20173b). Most providers are informed of the steps to be taken to appeal the action via the notice of adverse action. (Hospital providers may appeal at the time of adverse action, prior to the notice.) Institutional providers should refer to their respective chapters of this manual for the appropriate steps and time frames for appeal.

Any questions regarding this appeal process should be directed to MOAHR. (Refer to the Directory Appendix for contact information.)

SECTION 17 - REVIEW OF PROPOSED CHANGES

The following guidelines for the development of policies, procedures, forms, and instructions apply to the Medicaid, Children's Special Health Care Services, and other health insurance programs administered by MDHHS.

MDHHS consults with affected providers and other interested parties on those proposed changes in Medicaid policies, procedures, forms, and instructions which are determined significant enough to be communicated to providers by means of a provider bulletin. This consultation process involves a notification of the proposed change and the reasons for the change. MDHHS includes the distribution of draft policy to those parties who have expressed interest in reviewing and commenting on the changes.

Affected provider means any enrolled provider or provider association/organization that is impacted by the proposed changes. Any affected provider or other interested party who would like an opportunity to comment on any proposed changes in their area of interest (e.g., podiatry, hospital, vision) may do so.

Visit the MDHHS website to review draft policies or to request draft policies be sent to you for comment. You may also contact MDHHS directly to request to participate in the policy promulgation process. (Refer to the Directory Appendix for contact information.)

Your request to receive draft policies must include:

- Provider's/Individual's name;
- Telephone number;
- E-mail address;
- Involvement with Medicaid (e.g., Medicaid provider, drug manufacturer, interested party);
- Association/organization represented (if applicable); and
- Specific area(s) of interest to review and comment on (e.g., physician, ambulance, hospital, Maternal Infant Health Program (MIHP), dental, nursing facilities).

Copies of draft bulletins are sent to interested parties via e-mail and are posted on the MDHHS website for a minimum of 30 days. Anyone wishing to comment on proposed changes may submit comments electronically, by fax or by US mail within the comment period.

Comments received are considered and suggestions may be incorporated in the final policy if determined appropriate. Upon completion of the consultation process, a provider bulletin serves as final notice of the change. A summary of the comments made, MDHHS response, and a copy of the final bulletin are sent to those who submitted comments. Proposed changes may have to be implemented before comments are considered if specific action is ordered by governmental entities having authority over MDHHS with time frames that do not allow full compliance with the consultation process. In these cases, comments are requested from affected providers and are considered for incorporation after the implementation of the change.

Medicaid Provider Manual

MDHHS consults with the Medical Care Advisory Council (composed of consumers, providers, and government officials) in the review of proposed policies and procedures prior to implementation. Numerous provider associations and organizations are also involved in the review process. A provider who feels that their association or the Medical Care Advisory Council adequately represents them may not wish to be included on the provider consultation list.

SECTION 18 - ELECTRONIC HEALTH RECORD (EHR) INCENTIVE PROGRAM

The American Recovery and Reinvestment Act of 2009 (Recovery Act) provides the opportunity for state Medicaid programs to improve the nation's healthcare through health information technology (HIT) by authorizing incentives for certain eligible professionals (EP), eligible hospitals (EH), and Critical Access Hospitals (CAH) as they adopt, implement, upgrade, or demonstrate meaningful use of certified EHR technology in their first year of participation and demonstrate meaningful use of EHR technology for up to five remaining participation years.

The HIT provisions of the Recovery Act are primarily found in Title XIII, Division A, Health Information Technology, and in Title IV, Division B, Medicare and Medicaid Health Information Technology. These titles, taken together, are referred to as the Health Information Technology for Economic and Clinical Health (HITECH) Act. The Michigan Medicaid EHR Incentive Program is consistent with the Centers for Medicare & Medicaid Services (CMS) Final Rule 0033 published in the Federal Register (July 28, 2010).

The Recovery Act established 100 percent Federal Financial Participation (FFP) to provide incentive payments to eligible Medicaid providers to purchase, implement, and operate, including support services, staff training, and certified EHR technology.

Eligible professionals and hospitals must meet patient volume thresholds to be eligible for the program.

Incentive payments after the initial adoption, implementation, and upgrading of EHR technology require the provider to demonstrate "meaningful use" of the EHR technology. This is done through a means determined by the State and approved by CMS. The State may also require providers to report clinical quality measures as a part of "meaningful use". As required by CMS, the EHR technology must be compatible with State and Federal administrative management systems and certified with the Certification of Health IT Program under the Office of the National Coordinator for Health Information Technology (ONC).

To participate in the Medicaid EHR incentive program, providers must:

- register with the National Level Repository (NLR) at the federal level. To register with the NLR, providers must have a National Provider Identifier (NPI).
- register as a provider in the Community Health Automated Medicaid Processing System (CHAMPS). Those who are providing services through managed care entities must be individually registered as a Medicaid provider in CHAMPS to verify the provider is in good-standing and is eligible to receive an EHR incentive. Revisions to provider information in the EHR section of CHAMPS will need to be updated by the provider through the NLR.
- have an active user account in the National Plan and Provider Enumeration System (NPPES).
- Hospitals must be enrolled in the CMS Provider Enrollment, Chain and Ownership System (PECOS).

CMS will use the NLR, NPPES and PECOS to register the provider for the program and verify their registration prior to notifying Michigan of eligibility status.

Information specific to the Hospital EHR Incentive Program can be found in the Hospital Reimbursement Appendix Chapter of the Provider Manual. Additional information can be found on websites specific to the Incentive Program. (Refer to the Directory Appendix for website information.)

BENEFICIARY ELIGIBILITY

SECTION 1 – DETERMINATION OF ELIGIBILITY

This chapter applies to all providers.

1.1 LOCAL MICHIGAN DEPARTMENT OF HEALTH AND HUMAN SERVICES OFFICE DETERMINATION

Eligibility for Medicaid and most other health programs is determined at the local Michigan Department of Health and Human Services (MDHHS) office. MDHHS reviews the beneficiary's financial and nonfinancial (e.g., disability, age) factors and determines the types of assistance for which the beneficiary is eligible. Once eligibility is established, data from MDHHS is available via the CHAMPS Eligibility Inquiry. CHAMPS will also issue a **mihealth** card for new beneficiaries.

The MDHHS Behavioral and Physical Health and Aging Services Administration (BPHSA) determines eligibility for Children's Special Health Care Services (CSHCS).

Some Medicaid beneficiaries are in a deductible situation. This means the beneficiary has met all Medicaid eligibility criteria except they have excess income. (Refer to the Medicaid Deductible Beneficiaries (Spenddowns) Section of this chapter for additional information.)

Migrant agricultural workers may also be eligible for health care benefits. However, due to the transient nature of the migrant population, they might not receive their **mihealth** card. The provider must verify eligibility using the CHAMPS Eligibility Inquiry and/or vendor that receives eligibility data from CHAMPS. (Refer to the Verifying Beneficiary Eligibility Section of this chapter for additional information.)

1.2 ELIGIBILITY BEGIN DATE

Coverage is usually effective the first day of the month that the beneficiary becomes eligible.

- Not all beneficiaries, however, are eligible beginning the first day of the month. Coverage may become effective the actual day the beneficiary becomes eligible.
- In some instances, the beneficiary's eligibility may be retroactive up to three months prior to the month of application. This may occur if, during the retroactive period:
 - All eligibility requirements for the specific health care program were met; and
 - Medical services were rendered.

The provider may submit claims to the Michigan Department of Health and Human Services (MDHHS) for payment of any covered services rendered during the beneficiary's eligibility period. If the beneficiary has previously paid for services and the provider has billed MDHHS for the same services, the provider must refund to the beneficiary the portion of payment the beneficiary is responsible for, regardless of the amount MDHHS pays. (Refer to the Medicaid Deductible Beneficiaries (Spenddowns) Section of this chapter for additional information.)

Michigan Department of Health and Human Services

Medicaid Provider Manual

1.3 REDETERMINATIONS

Beneficiary eligibility is redetermined annually but may occur more often as case circumstances dictate. Beneficiaries are notified of the need to have their cases redetermined and the process to be followed to accomplish this.

1.4 BENEFICIARY APPEALS

Beneficiaries may appeal their eligibility determination/redetermination by contacting their local MDHHS office.

1.5 CORRECTIVE ACTION

Beneficiaries that have been denied Medicaid eligibility and have filed a hearing request may be entitled to a reimbursement if they paid for Medicaid covered services during a corrective action period. The corrective action period begins on the date the hearing request is received by MDHHS and ends on the date that eligibility is established. The services received must have been provided during the established eligibility period, including any months of established retroactive eligibility.

The provider has the option to reimburse the beneficiary in full and bill Medicaid for services rendered. MDHHS encourages the provider to return the amount the beneficiary paid and bill Medicaid for the service. If the provider chooses not to reimburse the beneficiary, the beneficiary can request a direct reimbursement from the State.

In order to be eligible for a direct reimbursement from the State, the beneficiary, or someone legally responsible for the beneficiary's bills, must have paid for a Medicaid covered service during the corrective action period. The beneficiary cannot receive reimbursement for any required copays, patient pay amounts, amounts used to meet a Medicaid deductible, or care or services paid for through private insurance, Medicare, or any other form of government-sponsored or private health care coverage.

To request a refund of medical expenses, the beneficiary must provide a copy of all bills for medical services received during the established eligibility period or which the beneficiary, or someone legally responsible for the beneficiary's bills, paid during the corrective action period to MDHHS.

Bills must include or contain:

- Beneficiary name
- Date the care or service was received
- Amount charged for the care or service
- Amount paid by the beneficiary or legally responsible party
- Date the bill was paid
- Procedure code(s) for the care or service
- Description of each care or service, e.g., office visit, physical therapy, etc. The drug name, quantity dispensed, and the name of the prescribing physician must be included for prescriptions.
- Proof of any payment made by a third party, such as an insurance company

Michigan Department of Health and Human Services Medicaid Provider Manual

SECTION 2 – MIHEALTH CARD

The **mihealth** card is issued for the following programs:

- Medicaid
- Healthy Michigan Plan
- CSHCS
- Maternity Outpatient Medical Services (MOMS)

The provider must verify eligibility using the CHAMPS Eligibility Inquiry and/or vendor that receives eligibility data from CHAMPS.

(Refer to the Verifying Beneficiary Eligibility Section of this chapter for additional information.)

The **mihealth** card is a plastic, magnetic strip identification card issued once to each beneficiary. The front of the card contains the beneficiary's name and beneficiary ID number. When a family is determined eligible for a health program, a **mihealth** card is issued to each eligible person in the household. All cards for a household are mailed to the head of the household. The **mihealth** card does not contain eligibility information and does not guarantee eligibility until verified using the CHAMPS Eligibility Inquiry that the person is covered. An example of the card follows:

The provider can use the **mihealth** card to access a beneficiary's eligibility information using the CHAMPS Eligibility Inquiry by entering the beneficiary ID number or swiping the card using a magnetic strip reader.

The 10-digit beneficiary identification (ID) number obtained from the CHAMPS Eligibility Inquiry must be used when billing Medicaid.

Michigan Department of Health and Human Services
Medicaid Provider Manual

The provider should request the beneficiary present a **mihealth** card to access a beneficiary's eligibility information using the CHAMPS Eligibility Inquiry to verify health program eligibility before rendering any service. If the beneficiary does not have a **mihealth** card, the provider can also access the beneficiary's eligibility information with the following additional search methods:

- Member ID/Client Identification Number (CIN)/Pending Eligibility Recipient Identification (RID)
- Last Name, First Name and Date of Birth
- Last Name, First Name and Social Security Number (SSN)
- SSN and Date of Birth

Additional search options (use if needed with one of the search options above to obtain a unique member match):

- Gender
- Zip Code
- Case Number

If the beneficiary has lost their **mihealth** card, a replacement card may be issued by contacting the Beneficiary Helpline. (Refer to the Directory Appendix for contact information.) The provider is encouraged to verify a beneficiary's identity by requesting additional identification (e.g., driver's license, State Police ID, Social Security Card).

If the provider suspects fraud, the case should be reported to the MDHHS Office of Inspector General. (Refer to the Directory Appendix for contact information.)

Suspected cases of beneficiary program abuse should be sent to the MDHHS Office of Inspector General. (Refer to the Directory Appendix for contact information.)

Occasionally, the provider may see a Statement of Medical Services Paid (MSA-110-EOB). This statement is for the beneficiary's information only and indicates services received and paid on their behalf by MDHHS.

2.1 BENEFIT PLANS [CHANGES MADE 4/1/2025 & 7/1/2025]

Providers will need to utilize the Benefit Plan ID(s) indicated in the eligibility response to determine a beneficiary's program coverage and related covered services for a specific date of service. A **"No Records Found!"** message will be displayed under the Benefit Plans section of the CHAMPS eligibility response if there is no Benefit Plan on file for the DOS entered.

Service type codes designate a covered benefit category at the benefit plan level if applicable. The service type codes at the benefit category level are applied unless a more specific service type code more closely describes the coverage intent of a benefit plan. For a complete listing of all service type codes and descriptions, refer to the CHAMPS information posted on the MDHHS website. (Refer to the Directory Appendix for website information.)

Medicaid Provider Manual

Benefit Plan ID	Benefit Plan Name	Benefit Plan Description	Type	Funding Source ¹	Covered Services (Service Type Codes)
BHMA-MHP	Medicaid Behavioral Health Enrolled in an MHP	This plan covers Medicaid mental health and substance abuse services managed by the PIHP for MA recipients who have a specialty level of need and are enrolled in a Medicaid Health Plan for Managed Care (MC).	Managed Care Organization	XIX	AI, MH
BIS	Brain Injury Services	Brain Injury Services (BIS) are services and supports provided to persons aged 21 and older with a qualifying brain injury who, but for the provision of these services, would otherwise be served within an institutional setting. The program provides critical rehabilitation and support in the post-acute injury period with the goal of assisting the participant in becoming capable of living in the most independent setting.	Fee for Service	XIX	A9
BMP	Benefits Monitoring Program	The objectives of the Benefits Monitoring Program (BMP) are to promote quality health care, identify beneficiaries that may be mis/over-utilizing Medicaid benefits, modify improper utilization of services through education and monitoring, and ensure that beneficiaries are receiving medically necessary services. Beneficiaries remain in BMP through changes in eligibility, including enrollment into managed care. For beneficiaries with managed care, the Medicaid Health Plan (MHP) coordinates the member's care.	Managed Care Organization	XIX	N/A

Michigan Department of Health and Human Services Medicaid Provider Manual

Benefit Plan ID	Benefit Plan Name	Benefit Plan Description	Type	Funding Source ¹	Covered Services (Service Type Codes)
CCBHC	Certified Community Behavioral Health Clinic	The CCBHC Demonstration benefit plan will reimburse state certified CCBHC sites for providing a comprehensive array of quality behavioral health services. CCBHCs will receive a fixed daily clinic-specific rate (known as a PPS-1 rate) for all CCBHC services provided on a given day, and individuals are eligible for the benefit if they have a mental health or substance use disorder diagnosis, regardless of Medicaid eligibility. CCBHCs are federally required to provide nine core behavioral health services and must meet stringent standards for care coordination, quality and financial reporting, staffing, and governance.	Managed Care Organization	XIX-XXI	AI, MH
CSHCS	Children's Special Health Care Services	This plan is designed to find, diagnose, and treat children and young adults under age 26 with chronic illness or disabling conditions. Persons over age 26 with chronic cystic fibrosis, certain blood coagulation disorders, or hereditary blood cell disorders commonly known as sickle cell disease may also qualify. Covers services related to the client's CSHCS-qualifying diagnoses. Certain providers must be authorized on a client file.	Fee-for-Service	V, GF	1, 35, 47, 48, 50, 71, 86, 88, 98, AL, UC (Most providers must be authorized)
CSHCS-MC	Children's Special Health Care Services – Managed Care	This plan is assigned to CSHCS beneficiaries who also have full Medicaid coverage and are enrolled in a Medicaid Health Plan (MHP). The MHP receives a capitation payment and provides the full range of covered services. Specific services carved out of the MHP contract will remain covered through MA Fee-For-Service.	Managed Care Organization	XIX	1, 35, 47, 48, 50, 71, 86, 88, 98, AL, UC
CSHCS-MH	CSHCS Medical Home	This is a capitated "case management" benefit plan for CSHCS members. CSHCS Medical Home clients are identified by the Medical Home Indicator in the member's CSHCS eligibility file.	Managed Care Organization	V	CQ

Medicaid Provider Manual

Benefit Plan ID	Benefit Plan Name	Benefit Plan Description	Type	Funding Source ¹	Covered Services (Service Type Codes)
CTS	Community Transition Services	Community transition services (CTS) are Medicaid funded services provided to qualified individuals who currently reside in a nursing facility, hospital, or other institution and have expressed a desire to return to the community, but who have barriers to a discharge that cannot be met by discharge staff. CTS may also be provided to individuals in the community who previously transitioned and are at risk for going back to the nursing facility or other institution.	Fee for Service	XIX	TC
CWP-MC	Children's Waiver Program Managed Care	<p>This benefit plan provides services that are enhancements or additions to Medicaid state plan services for children under age 18 with developmental disabilities who are enrolled in the Children's Waiver Program (CWP). The CWP is a statewide managed care program.</p> <p>The CWP enables Medicaid to fund necessary home and community-based services for children with developmental disabilities who have challenging behaviors and/or complex medical needs, meet the criteria for admission to an Intermediate Care Facility for Individuals with Intellectual Disabilities (ICF-IID) and who are at risk for placement without waiver services.</p>	Managed Care Organization	XIX	N/A

Michigan Department of Health and Human Services
Medicaid Provider Manual

Benefit Plan ID	Benefit Plan Name	Benefit Plan Description	Type	Funding Source ¹	Covered Services (Service Type Codes)
DHIP	Foster Care and CPS Incentive Payment	<p>This benefit plan is designed to provide an incentive payment to the PIHPs to serve Medicaid-eligible children in foster care and Medicaid-eligible children in Child Protective Services, Risk Category I and II.</p> <p>There are two incentive payment options:</p> <ul style="list-style-type: none"> ▪ Incentive Payment 1 – is at least two different non-assessment behavioral health services were provided in the eligible month. ▪ Incentive Payment 2 – is at least one of either home-based services or wraparound services were provided in the eligible month. <p>If a PIHP provides services to a beneficiary in a given month meeting the criteria for both Incentive Payment 1 and 2, the PIHP will only receive payment for Incentive Payment 2.</p>	Managed Care Organization	XIX	MH
HHBH	Health Home Behavioral Health	<p>Medicaid Health Home services are intended for beneficiaries with Severe Mental Illness (SMI) who have experienced high rates of inpatient hospital admissions or high rates of hospital emergency department usage and who may or may not have other chronic physical health conditions that are amenable to care coordination and management by the health home (i.e., congestive heart failure, insulin treated diabetes, chronic obstructive pulmonary disorder, seizure disorder). Individuals to whom these conditions apply may be determined by the state to be eligible to receive Health Home services.</p>	Managed Care Organization	XIX	AI, MH

Michigan Department of Health and Human Services
Medicaid Provider Manual

Benefit Plan ID	Benefit Plan Name	Benefit Plan Description	Type	Funding Source ¹	Covered Services (Service Type Codes)
HH MICARE	Health Home MI Care Team	MI Care Team services are intended for Medicaid beneficiaries with specific chronic behavioral and physical health conditions, which includes a diagnosis of depression and/or anxiety and at least one of the following: heart disease, COPD, hypertension, diabetes, or asthma. Individuals to whom these conditions apply may be determined by the State to be eligible to receive MI Care Team services. MI Care Team services include a personalized care management plan and intense care coordination that addresses the physical and social needs of the individual.	Managed Care Organization	XIX	CQ
HHO	Opioid Health Home	Substance Use Disorder Health Home, dba Opioid Health Home (HHO), services are intended for Medicaid beneficiaries with a diagnosis of opioid use disorder, alcohol use disorder, stimulant use disorder in addition to having or being at risk of any other chronic condition. Individuals to whom these conditions apply may be determined by the State to be eligible to receive HHO services. HHO services include a personalized care management plan and intense care coordination that addresses the totality of a beneficiary's physical, social, and recovery-oriented needs.	Managed Care Organization	XIX	AI, CQ (added 4/1/2025)
HK - Dental	Healthy Kids Dental	MDHHS contracts with dental health plans (DHPs) for the administration of dental services for Healthy Kids Dental (HKD) beneficiaries. The DHPs are paid a monthly capitation rate to provide covered services to enrolled Medicaid beneficiaries. The DHP is responsible for providing, arranging, and reimbursing covered dental services. DHPs may cover additional dental services not included on the MDHHS Dental Fee Schedule. Providers must contact the DHP for specific information about covered HKD benefits.	Managed Care Organization	XIX-XXI	35

Medicaid Provider Manual

Benefit Plan ID	Benefit Plan Name	Benefit Plan Description	Type	Funding Source ¹	Covered Services (Service Type Codes)
HK-EXP	Full Fee-for-Service Healthy Kids - Expansion	Benefits mirror Fee-for-Service Medicaid. This benefit plan covers children who are under the age of 19 from 100% FPL up to 160% FPL. This benefit plan is funded by CHIP.	Fee-for-Service	XXI	1, 33, 35, 47, 48, 50, 71, 86, 88, 98, AL, MH, UC (35: FFS dental only if HK-Dental Benefit Plan is not assigned for DOS)
HK-EXP-ESO	Healthy Kids - Expansion - Emergency Services Only	Benefits mirror Medical Assistance Emergency Services Only (MA-ESO). Children who do not meet the Medicaid citizenship requirements to be eligible for full Medicaid may be eligible for Emergency Services Only (ESO). This benefit plan is funded by CHIP. ²	Fee-for-Service	XXI	1, 47, 48, 50, 86, 88, 91, 92, MH, UC Emergency Services Only
Hospice	Hospice	This healthcare program is designed to meet the needs of terminally ill individuals when the individual decides that curative treatment is no longer in their best interest. These individuals choose palliative care, which is not a cure, but ensures comfort, dignity, and quality of life. Hospice is intended to address the needs of the individual with a terminal illness, while also considering family needs. Michigan Medicaid covers hospice care for a terminally ill beneficiary whose life expectancy is six months or less (if the illness runs its normal course), as determined by a licensed physician and the Hospice Medical Director.	Fee-for-Service	XIX	45

MOMS	Maternity Outpatient Medical Services	<p>The Maternity Outpatient Medical Services (MOMS) program provides immediate health coverage for the unborn child of an undocumented pregnant woman. The MOMS program is available to provide immediate prenatal care. Prenatal health care services will be covered by MOMS for the entire pregnancy and for two calendar months after the pregnancy ends.</p> <p>Family Planning Services and supplies are covered under this plan using State of Michigan General Funds.</p>	Fee-for-Service	XXI, GF	47, 48, 50, 69, 82, 88, 98, BU
NEMT	Non-Emergency Medical Transportation	This benefit plan provides Non-Emergency Medical Transportation (NEMT) for MA covered services. The NEMT benefit plan is administered by MDHHS through a contractor and is available in selected counties. NEMT for services covered by the Medicaid Health Plan is provided under the Medicaid Health Plan Benefit Plans (MA-MC, MME-MC, and CSHCS-MC).	Managed Care Organization	XIX	56
NH	Nursing Home	This benefit is for qualifying members residing in a nursing home. A facility or institution must be licensed, certified, or otherwise qualified as a nursing home or long term care facility by the state in which services are rendered. This term includes skilled, intermediate, and custodial care facilities which operate within the terms of licensure.	Fee-for-Service	XIX	54
PACE	Program All-Inclusive Care for Elderly	This program is an innovative model of community-based care that enables elderly individuals, who are certified by their state as needing nursing facility care, to live as independently as possible. PACE provides an alternative to traditional nursing facility care by offering pre-paid, capitated, comprehensive health care services.	Managed Care Organization	XIX	1, 33, 35, 47, 48, 50, 54, 71, 86, 88, 98, AL, MH, UC

Michigan Department of Health and Human Services
Medicaid Provider Manual

Benefit Plan ID	Benefit Plan Name	Benefit Plan Description	Type	Funding Source ¹	Covered Services (Service Type Codes)
Plan First	Plan First Family Planning Benefit	Plan First is a limited benefit plan for the coverage of family planning and family planning-related services. Benefits include contraceptive services and supplies, sexually transmitted infection screening and treatment services, elective sterilization procedures, and other reproductive health services.	Fee for Service	XIX	82
PRTF	Psychiatric Residential Treatment Facility	The PRTF benefit provides mental health treatment to children and adolescents who, due to a mental illness, substance abuse, or severe emotional disturbance, need treatment that can effectively be provided in a residential treatment facility. This benefit offers a short term (90-180 days), intense, focused mental health treatment to promote a successful return of the youth to the community. This benefit is clinically driven to address the behavior health needs of individuals that can be diverted from state hospitalization or are stepping down from state hospitalization.	Fee for Service	XIX	RT
QDWI	Qualified Disabled Working Individual	A client must have applied for or be enrolled in Medicare Part A as a working disabled person who has exhausted Premium-free Part A and whose SSA disability benefits ended because the client's earnings exceed SSA's gainful activity limits. Medicaid pays the client's Medicare Part A premium only.	No Benefits	XIX	N/A
QMB	Qualified Medicare Beneficiary – All Inclusive	This benefit plan is part of the Medicare Savings Program (MSP), also known as the "Buy-In" program. A client must be entitled to Medicare Part A. Under certain income limits, Medicaid pays for Medicare Part B premiums, deductibles and co-insurance. This is an all-inclusive benefit plan.	Fee-for-Service	XIX	N/A

Michigan Department of Health and Human Services
Medicaid Provider Manual

Benefit Plan ID	Benefit Plan Name	Benefit Plan Description	Type	Funding Source ¹	Covered Services (Service Type Codes)
SED-MC	Serious Emotional Disturbances Managed Care	The Waiver for Children with Serious Emotional Disturbances (SEDW) provides services that are enhancements or additions to Medicaid state plan services for children under age 21. The SEDW is a statewide managed care program. The SEDW enables Medicaid to fund necessary home and community-based services for eligible children with a serious emotional disturbance who meet admission criteria for psychiatric hospitalization.	Managed Care Organization	XIX	N/A
SLMB	Specified Low Income Medicare Beneficiary	A client must have applied for or be enrolled in Medicare Part A. Under certain income limits, Medicaid pays the client's Medicare Part B premium only; Expanded Specified Low-Income Medicare Beneficiary (ESLMB): A client must have applied for or be enrolled in Medicare Part B and not be eligible for any other Medicaid coverage. Under certain income limits, Medicaid pays the client's Medicare Part B premium only. No specific benefits are defined for this plan.	No Benefits	XIX	N/A
Spend-down	Medical Spend-down	If the individual's net income is over the Medicaid limit, the amount in excess is established as a "spend-down amount." In order for the person to qualify for Medicaid during the months, he/she must incur medical bills equal to the spend-down amount. Medicaid will pay expenses incurred above this amount. If a group member is liable for bills incurred before the spend-down period began, these bills can be used to meet the spend-down.	No Benefits	XIX	N/A
SPF	State Psychiatric Hospital	This benefit plan allows claims adjudication for offsite inpatient medical care provided to beneficiaries who are between the ages of 22 and 64 and otherwise reside in a State Psychiatric Facility.	Fee-for-Service	XIX	48

Michigan Department of Health and Human Services Medicaid Provider Manual

Benefit Plan ID	Benefit Plan Name	Benefit Plan Description	Type	Funding Source ¹	Covered Services (Service Type Codes)
TCM-INC	Targeted Case Management- INCAR	This benefit plan is assigned to beneficiaries 18 years of age and older who were recently released from an incarcerated setting and is set for one year for the provision of targeted case management services (TCM). The services include an initial comprehensive assessment, development of a care plan, referral and related activities, monitoring and follow-up activities.	Fee for Service	XIX and XXI	CQ
TCMF	Targeted Case Management	The benefit describes Targeted Case Management (TCM) services provided to pregnant women and children up to age 21 with household income up to and including 400% of the federal poverty level (FPL) who were served by the Flint water system on or between April 1, 2014 and the date the water is deemed safe by the appropriate authorities. Pregnant women will remain eligible throughout their pregnancy and will receive two months of post-partum coverage. Once eligibility has been established for a child, including those children born to pregnant women, the child will remain eligible until age 21 as long as other eligibility requirements are met. TCM services assist individuals in gaining access to appropriate medical, educational, social, and/or other services. TCM services include assessments, planning, linkage, advocacy, coordination, referral, monitoring, and follow-up activities.	Fee-for-Service	XIX and XXI	CQ
<p>¹ Social Security Act Title V, Title XIX, Title XXI, and/or State of Michigan General Funds</p> <p>² For the purpose of ESO coverage, federal Medicaid regulations define an emergency medical condition as a sudden onset of a physical or mental condition which causes acute symptoms, including severe pain, where the absence of immediate medical attention could reasonably be expected to:</p> <ul style="list-style-type: none"> Place the person's health in serious jeopardy, or Cause serious impairment to bodily functions, or Cause serious dysfunction of any bodily organ or part.

2.2 PROGRAM ENROLLMENT TYPE (PET) CODES

Program Enrollment Type (PET) codes identify a beneficiary's type of admission or managed care enrollment along with their living arrangement.

The PET code will be reported in the Benefit Plans section (EB05 segment) of the CHAMPS eligibility response, along with the applicable Benefit Plan, as additional information for providers if a beneficiary has an admission or Managed Care enrollment on file for the requested date of service. Providers will utilize the Benefit Plan ID(s) indicated in the EB05 segment to determine a beneficiary's program coverage and related covered services for a specific date of service.

Program Enrollment Type (PET)	Program/Reason	Benefit Plan

2.3 PATIENT PAY INFORMATION

Patient pay is the beneficiary's financial liability. It is shown in whole dollars only and is provided in the CHAMPS eligibility response if the amount is on file for the DOS (e.g., 00050 is \$50.00, not 50 cents; 1285 is \$1,285.00; or 0 (zero) indicates no patient pay amount). This amount applies to inpatient hospitals, nursing facilities (including ICF/IIDs), and hospice while in a nursing facility. (Refer to the Patient Pay Amount Section of this chapter for more information.)

2.4 SPECIAL PROGRAMS – BENEFICIARY IDENTIFICATION

Benefit Plan ID	Program/Eligibility Type
ALMB (No Medicaid coverage exists and no card issued.) CHAMPS Eligibility Response will indicate "No Records Found."	Additional Low-Income Medicare Beneficiary (ALMB) Q1 – Medicaid pays the Medicare Part B premium provided funding is available
BMP	Benefits Monitoring Program
MA (Benefit Plan will be on file once the spend-down is met.)	Medicaid Spend-down met
MA-ESO, MA-HMP-ESO, or HK-EXP-ESO	Limited Medicaid Coverage (Medicaid only covers emergent/urgent services)
MA-MC, MA-HMP-MC	Beneficiary enrolled in a Medicaid Health Plan
QDWI (No Medicaid coverage exists and no card issued.) CHAMPS Eligibility Response will indicate "No Records Found."	Qualified Disabled Working Individual (QDWI) - Medicaid pays the Medicare Part A premium
QMB	Qualified Medicare Beneficiary (QMB) Only - Medicaid pays Medicare Part B premiums, coinsurance, and deductibles
SLMB (No Medicaid coverage exists and no card issued.) CHAMPS Eligibility Response will indicate "No Records Found."	Specified Low Income Medicare Beneficiary (SLMB) – Medicaid pays the Medicare Part B premium
Spend-down (No coverage exists and no card issued.)	Medicaid Spend-down not met
Spend-down & MSP (Medicare Savings Program) (No Medicaid coverage exists. Once the spend-down amount is met, the 'MA' Benefit Plan will be on file.)	Medicaid Deductible not met with QMB

SECTION 3 – VERIFYING BENEFICIARY ELIGIBILITY

The **mihealth** card does not contain eligibility information and does not guarantee eligibility. The provider can use the **mihealth** card to access a beneficiary's eligibility information using the CHAMPS Eligibility Inquiry and/or vendor that receives eligibility data from CHAMPS prior to rendering services.

3.1 CHAMPS ELIGIBILITY INQUIRY

Providers may verify beneficiary eligibility using:

- CHAMPS Eligibility Inquiry
- HIPAA 270/271 (Eligibility Inquiry/Response) transactions
- Web-based options

(Refer to the Directory Appendix for contact and website information.)

Beneficiary information is confidential under federal guidelines and must be used only for verifying beneficiary eligibility. If the beneficiary is eligible, the following information is available from the eligibility response:

- Beneficiary name, beneficiary ID number or MICHild Client Identification Number (CIN), gender, DOB.
- Benefit Plan ID(s) for the date of service (DOS). (Refer to the Benefit Plans subsection for additional information.)
- PET information (including the PET code), Source Provider ID (supplied through MDHHS), National Provider Identifier (NPI), provider name, telephone number, address, and the patient pay amount, if applicable.
- Medicaid Health Plan (MHP) Primary Care Physician (PCP), including the PCP name, telephone number, and NPI. (NOTE: Data is provided only if the date of service is the current date and a PCP record is on file.)
- Third-Party Liability (TPL), including the payer name, payer ID, coverage type code, group number, policy number, and policyholder ID.
- CSHCS restriction data, including qualifying diagnosis code(s) and authorized provider list if the provider submitting the inquiry is authorized for the DOS.

NOTE: The 270/271 response will report up to eight (8) diagnosis codes for a single date of service. Refer to CHAMPS Eligibility Inquiry to obtain all approved diagnosis codes if more than eight (8) diagnosis codes exist for the date of service.

- Other information: Transaction date (when the data was applied to the Eligibility Subsystem), current county of residence, MDHHS case number, MDHHS worker load number, and local MDHHS office phone number.
- Pending Eligibility (Medicaid-related programs only): Providers will have the option to see if eligibility is pending.

Michigan Department of Health and Human Services
Medicaid Provider Manual

NOTES:

- Dental coverage information is identified by using the Benefit Plan ID data provided in the eligibility response. For Healthy Michigan Plan beneficiaries enrolled in a health plan, dental benefits must be verified through the health plan. (Refer to the Benefit Plans subsection of this chapter and the Enrollment Information subsection of the Dental Chapter for additional information.)

Note: The CHAMPS Eligibility Inquiry and 270/271 response will report "FFS Dental" for Medicaid, MICHild and Healthy Kids Expansion beneficiaries who have Fee For Service Dental.

- For Managed Care Organizations (MCOs), beneficiary scope and coverage information is included on the 834 format enrollment files. Additional information is available on the MDHHS website. (Refer to the Directory Appendix for website information.)
- The CHAMPS Eligibility Inquiry and 270/271 response will report the HIPAA Service Type code for services covered under each Benefit Plan and any applicable copay amounts. A generic or explicit response will be returned, determined by the type of inquiry (generic or explicit) received through the electronic 270 eligibility request. Always refer to the applicable chapters in this Manual to obtain detailed information on all covered services, including PA requirements, copay amounts/exclusions, and other requirements for the Benefit Plan ID(s) reported in the eligibility response.

Beneficiary eligibility may be queried using the beneficiary ID number or the Client Identification Number (CIN) (for MICHild inquiries only); or, if the ID number is not available, by using one of the following additional search options:

- Beneficiary social security number (SSN) and date of birth (DOB).
- Beneficiary name and SSN (or DOB).

NOTE: Additional search options (use if needed with one of the search options above to obtain a unique member match) include:

- Gender
- Zip Code

Date of Service criteria includes the following:

- Providers can enter a single DOS or up to a 3-month DOS span. (NOTE: DOS is not required for a pending eligibility inquiry since a response is returned if a pending record exists in CHAMPS.)
- Future DOS allowed only up to the end of the current month.
- Providers are allowed to submit a DOS within 12 months of the date of inquiry.

Providers must be enrolled for the DOS in order to receive the eligibility response.

3.2 ACCESSING CHAMPS ELIGIBILITY INQUIRY

CHAMPS is a web-based system. Providers should refer to the Eligibility Verification section of the Directory Appendix of this manual for website information.

Michigan Department of Health and Human Services
Medicaid Provider Manual

NOTE: Options require providers to submit their NPI number or CHAMPS Provider ID number (HIPAA Exempt providers only).

3.3 ELIGIBILITY VERIFICATION FOR DATES OF SERVICE OVER 12 MONTHS OLD

MDHHS follows CMS guidelines regarding release of eligibility information. An exception is allowed for Hospital providers (Enrollment Type: FAO) to submit DOS older than 12 months for inpatient related services only to complete Medicare DSH audits. Providers must complete the DSH question under the "Manage Provider Checklist" page in the CHAMPS-PE Subsystem and receive approval from MDHHS. To obtain this information, hospitals should refer to the Eligibility Verification section of the Directory Appendix for contact information. There may be a transaction fee charged to the requester for these DSH inquiries.

SECTION 4 – MEDICAID DEDUCTIBLE BENEFICIARIES (SPENDDOWNS)

4.1 ELIGIBILITY

There are cases when beneficiaries have the medical need for Medicaid coverage but they have excess income. These beneficiaries are known as Medicaid deductible beneficiaries. Medicaid deductible means that the beneficiary must incur medical expenses each month equal to, or in excess of, an amount determined by the local MDHHS worker to qualify for Medicaid. Once the deductible amount has been incurred, the beneficiary becomes eligible for Medicaid benefits (Benefit Plan ID of MA). Providers must verify Medicaid coverage using the Benefit Plan ID(s) provided in the CHAMPS Eligibility Inquiry.

The process for a Medicaid deductible beneficiary to become Medicaid eligible is as follows:

- The beneficiary presents proof of any medical expenses incurred (e.g., insurance premiums, bills for prescriptions and/or office visits) to the MDHHS worker. Providers may estimate any other insurance or Medicare payment that may be applied to the incurred bill. If the exact charge is not immediately known, providers should estimate the charge on the incurred bill. This expedites the eligibility process.
- The local MDHHS worker reviews the medical bills incurred and determines if the amount of beneficiary liability is met and the first date of Medicaid eligibility.
 - It is fraud to provide beneficiaries with a notice of a bill incurred if no service has been rendered.
 - Bills for services rendered prior to the effective date of Medicaid eligibility are the beneficiary's responsibility.
- For the first date of eligibility, the MDHHS worker sends letters to those providers whose services are:
 - Entirely the beneficiary's responsibility.
 - Partly the beneficiary's responsibility and partly Medicaid's responsibility.
- A letter is also sent to the beneficiary indicating which services are the beneficiary's responsibilities for that first date of Medicaid eligibility.
- The beneficiary's Benefit Plan ID is changed to MA, MA-ESO, or MA-HMP to indicate the Medicaid eligibility period. The provider must verify eligibility using the CHAMPS Eligibility Inquiry when the beneficiary becomes eligible. Once the deductible amount is incurred, eligibility is established through the end of the month.

Providers may bill Medicaid for any covered services rendered during that eligible period.

Before billing, providers should verify that the Benefit Plan ID of MA, MA-ESO, or MA-HMP is on file for the DOS. This will assure that the claims will not be rejected for lack of eligibility.

Michigan Department of Health and Human Services **Medicaid Provider Manual**

4.2 RETROACTIVE ELIGIBILITY

Providers should be aware that, since bills have to be incurred before the deductible amount is met, there is always a period of retroactive eligibility. This may be several days or up to a period of three months from the current month. In this situation, the local MDHHS office may apply these old bills to the past three months or may prospectively apply them to the next several months, depending on the DOS and the date the bill was presented to the MDHHS worker.

It is the provider's option to bill Medicaid if the beneficiary has paid the provider for services rendered. MDHHS encourages the provider to return the amount the beneficiary paid and bill Medicaid for the service. If the provider decides to bill Medicaid, they must return all money the beneficiary paid over and above the amount identified as the beneficiary's responsibility on the Medicaid deductible letter. If the beneficiary is accepted as a Medicaid beneficiary, they cannot be charged more than indicated on the letter from the local MDHHS office (plus applicable copayment amounts).

4.3 BILLING INSTRUCTIONS

There may be services that are partly the beneficiary's liability and partly Medicaid's liability. If the provider chooses to bill Medicaid for this service, they should refer to the Billing & Reimbursement Chapters of this manual for instructions for submitting claims.

Beneficiaries are responsible for payment of expenses that were incurred to meet the deductible amount. Payment does not have to be made before Medicaid eligibility is approved. Providers may bill a beneficiary for services rendered after a claim rejects for lack of Medicaid eligibility.

(Refer to the Qualified Medicare Beneficiary Section of this chapter for information on Medicaid deductible beneficiaries and Benefit Plan ID of QMB.)

Michigan Department of Health and Human Services
Medicaid Provider Manual

SECTION 5 – CONTRACTUAL CARE ARRANGEMENTS FOR LONG TERM CARE

A **life care contract** is created when an individual enters into an agreement with a continuing care retirement community to provide for all the individual's needs, including health care, for the rest of their life. The individual pays a one-time entrance fee and monthly payments thereafter. The continuing care retirement community assumes full financial responsibility if the individual is unable to make their monthly payments at a later date. An individual with a life care contract is not eligible for Medicaid.

A **continuing care contract** is created when an individual enters into an agreement with a continuing care retirement community to provide or pay for all, or some of, the individual's medical care for the rest of their life. The individual pays a one-time entrance fee and monthly payments thereafter. An individual with a continuing care contract may be eligible for some Medicaid services.

SECTION 6 – MEDICARE SAVINGS PROGRAM (MSP)

6.1 GENERAL INFORMATION

Federal regulations require that Medicaid purchase Medicare coverage for some beneficiaries and reimburse providers for the Medicare coinsurance and deductible amounts. If these beneficiaries are not also eligible for Medicaid, they have a Benefit Plan ID of QMB. Medicaid only reimburses providers for the Medicare coinsurance and deductible amounts up to the Medicaid maximum amount. Medicaid does not reimburse services not covered by Medicare.

6.2 MEDICAID DEDUCTIBLE BENEFICIARIES (SPENDDOWNS) AND MSP

Beneficiaries may be a MSP and also a Medicaid deductible beneficiary. The beneficiary will have a Benefit Plan ID of QMB until the deductible amount has been met. The Benefit Plan ID will change to MA once the deductible amount is met. For this Medicaid eligibility period, Medicaid reimburses the provider for Medicaid-covered services, as well as the Medicare coinsurance and deductible amounts up to the Medicaid allowable.

If Medicare covers the service, the provider may bill Medicaid for the coinsurance and deductible amounts only. For any Medicare noncovered services, the beneficiary should obtain proof of the incurred medical expense to present to the MDHHS worker so the amount may be applied toward the beneficiary's Medicaid deductible amount.

SECTION 7 – NEWBORN CHILD ELIGIBILITY

A newborn is defined as a child aged 0 (birth) to 1 year old. Generally, Medicaid automatically covers a child born to a woman eligible for and receiving Medicaid at the time of the birth. The mother is required to notify the local MDHHS office of the birth of the newborn within ten days of the birth. (Refer to the Hospital Chapter of this manual for PACER requirements for newborns.)

If the mother is enrolled in a Medicaid Health Plan (MHP) at the time of delivery, the newborn's services are also the responsibility of the MHP unless the child is placed in foster care.

7.1 HOSPITAL NEWBORN NOTICE

In the few cases where this process may be delayed, the hospital's submission of the newborn birth through the State's Electronic Birth Certificate (EBC) system will add the Medicaid coverage and assign a MHP to the newborn. This process is the most efficient way for hospitals to obtain a Medicaid ID for newborns. If the facility is unable to submit the newborn birth through the EBC, the hospital may submit a Hospital Newborn Notice (form MSA-2565-C) to the local MDHHS office for Medicaid eligibility to be established and to obtain a Medicaid ID number. If the MSA-2565-C form is used, the local MDHHS office will open the newborn's MA case and return the form to the provider with the necessary billing information.

Eligibility information must be obtained using the CHAMPS Eligibility Inquiry or the HIPAA 270/271 transaction using the newborn ID number provided by MDHHS. The MDHHS Enrollment Services Section should be contacted when the eligibility inquiry does not locate the newborn. (Refer to the Directory Appendix for contact information.) All inquiries must include the following information to assist MDHHS in locating newborn ID numbers:

- Newborn's name (last, first, middle initial)
- Newborn's gender
- Newborn's DOB
- Mother's name (last, first, middle initial)
- Mother's Medicaid ID number
- Requesting person's name and telephone number

7.2 BILLING

When billing MDHHS for medical services rendered to the newborn, providers must use the newborn's Medicaid ID number. The mother's number cannot be used except when the delivering physician performs the newborn's care and circumcision during the mother's inpatient stay. In that situation, the delivering physician may bill for the newborn care and circumcision on the same claim as the delivery under the mother's Medicaid ID number.

SECTION 8 – BENEFITS MONITORING PROGRAM

State and federal regulations require the Medicaid program to conduct surveillance and benefits utilization review to ensure the appropriate amount, scope, and duration of medically necessary services are being provided to program beneficiaries. The Benefits Monitoring Program (BMP) is in place to closely monitor program usage and to identify beneficiaries who may be over-utilizing and/or misusing their Medicaid services and benefits.

The purpose of the Benefits Monitoring Program is to:

- Promote quality health care;
- Promote patient safety through reduction of drug interaction and/or possible drug abuse, and duplication of medical services;
- Identify beneficiaries whose utilization patterns appear to be overutilization and/or misutilization of their Medicaid benefits;
- Analyze individual beneficiary health service utilization data;
- Improve beneficiary utilization of Medicaid services through educational contacts and monitoring;
- Improve the continuity of care and service coordination to prevent fragmentation of services, and
- Assure that beneficiaries are receiving health care services which are medically necessary and supported by evidence-based practices, thereby curtailing unnecessary costs to the program.

To accomplish these program objectives, the BMP performs the following functions:

- Identifies beneficiaries who appear to be over-utilizing and/or misusing covered services.
- Evaluates utilization of covered services to determine whether the services are appropriate to a beneficiary's medical condition(s).
- Educates beneficiaries regarding appropriate utilization.
- Monitors utilization patterns and institutes interventions to optimize program effectiveness.

The beneficiary may be subject to utilization control mechanisms if it is determined that the beneficiary is overusing and/or abusing Medicaid services. When a beneficiary is enrolled in the BMP, they will remain in the program even as they may move between enrollment in fee-for-service (FFS) and Medicaid Health Plan (MHP) settings. Responsibility for administration of the BMP functions transfers between FFS and MHP settings when a beneficiary's enrollment status changes.

In this chapter, references to responsibilities or actions of the Department mean the Medicaid FFS program or MHP under which the beneficiary is enrolled.

A beneficiary who is enrolled in the BMP will be identified with the Benefit Plan ID of BMP. BMP will be indicated on the CHAMPS Eligibility Inquiry response as additional information.

Michigan Department of Health and Human Services
Medicaid Provider Manual

8.1 DEFINITIONS

The following definitions pertain to terminology used specific to the Benefits Monitoring Program and should not be used for interpretation of material found elsewhere in the Medicaid Provider Manual.

Beneficiary	An individual eligible to receive medical assistance through MDHHS.
Benefits Monitoring Program (BMP)	A program to control utilization in which a beneficiary who has been found to engage in misutilization is placed to allow the Department to monitor and assure the medical necessity of services for that beneficiary.
BMP Authorized Provider	A provider who has been approved to render services to a beneficiary enrolled in the Benefits Monitoring Program by MDHHS or MHP BMP staff. Active BMP Authorized Providers are contained in the CHAMPS Eligibility Inquiry response as additional information.
Emergency Medical Condition	Federal Medicaid regulations define an emergency medical condition (including emergency labor and delivery) as a sudden onset of a physical or mental condition which causes acute symptoms, including severe pain, where the absence of immediate medical attention could reasonably be expected to: <ul style="list-style-type: none">▪ Place the person's health in serious jeopardy; or▪ Cause serious impairment to bodily functions; or▪ Cause serious dysfunction of any bodily organ or part.
Medicaid Health Plan (MHP)	MDHHS contracts with Medicaid Health Plans (MHPs), selected through a competitive bid process, to provide services to Medicaid beneficiaries.
Medical Assistance Program	The Department's program to provide for medical assistance established by Section 105 of Act No. 280 of the Public Acts of 1939, as amended, being S400.105 of the Michigan Compiled Laws, and Title XIX of the federal Social Security Act, 42 U.S.C. S1396 et seq.
Misutilization	The use of medical assistance in excess of, or inappropriate to, the particular medical needs of the beneficiary as determined by the Department through investigation and analysis. Initial indicators of possible misutilization in light of a beneficiary's medical condition shall include, but are not limited to, unusually frequent physician, pharmacy or emergency department visits, frequent use of ambulance and/or non-emergency medical transportation services, and unusually frequent acquisition of drugs subject to abuse.
Negative Action	Action by the Department (or MHP) to discontinue, terminate, suspend, or reduce public assistance or services.
Provider	An individual, firm, corporation, association, agency, institution, or other legal entity which has been approved to provide medical assistance to a beneficiary pursuant to the Medical Assistance Program.
The Department	The Michigan Department of Health and Human Services (MDHHS)

8.2 BMP ENROLLMENT CRITERIA

The criteria in the following subsections are used to identify beneficiaries to be placed in the BMP. Enrollment in the BMP is determined after review of the beneficiary's usage of medical services. Beneficiaries may be enrolled in BMP when any of the following criteria (alone or in combination) are present.

8.2.A. FRAUD

The beneficiary is suspected, or has been convicted, of fraud for one or more of the following:

- Selling or purchasing products/pharmaceuticals obtained through Medicaid.
- Altering prescriptions to obtain medical services, products or pharmaceuticals.
- Stealing prescriptions/pads; provider impersonation.
- Using another individual's identity to obtain medical services, products or pharmaceuticals.

8.2.B. MISUTILIZATION OF EMERGENCY DEPARTMENT SERVICES

Criteria include, but are not limited to, the following:

- More than three emergency department visits in one quarter.
- Repeated emergency department visits with no follow-up with a primary care provider (PCP) or specialist when appropriate.
- More than one outpatient hospital emergency department facility in one quarter.
- Repeated emergency department visits for non-emergent conditions.

8.2.C. MISUTILIZATION OF PHARMACY SERVICES

Criteria include, but are not limited to, the following:

- Utilizing more than three different pharmacies in one quarter.
- Aberrant utilization patterns for drug categories listed in the Drug Categories subsection of this chapter over a one-year period.
- Obtaining more than five prescriptions for drug categories listed in the Drug Categories subsection of this chapter in one quarter (including emergency prescriptions).
- Utilizing multiple prescribing providers for drug categories listed in the Drug Categories subsection, including when prescribing providers provide services to the beneficiary as a private pay patient (e.g., beneficiary pays cash for office visits while using the Medicaid pharmacy benefit to obtain prescriptions).

8.2.D. MISUTILIZATION OF PHYSICIAN SERVICES

Criteria include, but are not limited to, the following:

- Utilizing more than one physician/non-physician practitioner in different practices to obtain duplicate or similar services for the same or similar health condition.
- Utilizing more than one physician/non-physician practitioner in different practices to obtain duplicate prescriptions for a drug(s) listed in the Drug Categories subsection of this chapter (e.g., two prescriptions for Vicodin/hydrocodone written by different providers within an overlapping timeframe).
- Utilizing covered services to obtain prescriptions for drugs subject to abuse and paying cash to obtain the drugs.

8.2.E. OTHER

MDHHS will review additional criteria as misutilization patterns emerge or are identified by the Department.

8.3 DRUG CATEGORIES

MDHHS considers the following drug categories as having high potential for abuse:

- Narcotic Analgesics
- Barbiturates
- Sedative-Hypnotic, Non-Barbiturates
- Central Nervous System Stimulants/Anti-Narcoleptics
- Anti-Anxieties
- Amphetamines
- Skeletal Muscle Relaxants

8.4 NOTIFICATION AND ENROLLMENT

Notification of enrollment in the BMP is sent to the beneficiary to the address on file with MDHHS. It is the beneficiary's responsibility to report a change of address to MDHHS. This notification includes the following:

- Information regarding the utilization patterns and concerns;
- The enrollment effective date; and
- Instructions on the selection of providers (which must be approved by the Department).

The beneficiary is given 10 calendar days to contact the Department and discuss the findings prior to the enrollment effective date. Enrollment of a beneficiary in a MHP may be determined by the Department or the MHP using approved criteria. Enrollment in the BMP does not constitute a negative action by the Department or the MHP. Enrollment of a beneficiary in the BMP does not suspend, reduce, discontinue,

Michigan Department of Health and Human Services
Medicaid Provider Manual

or terminate any services or assistance that a beneficiary is eligible for at the time of the beneficiary's enrollment in the BMP.

8.5 BENEFITS MONITORING PROGRAM CONTROL MECHANISMS

8.5.A. OBTAINING DRUGS SUBJECT TO ABUSE

Michigan's Pharmacy Benefits Manager (PBM) processes all point of sale (POS) prescription drug claims for MDHHS. Requests for prescriptions (including emergency prescriptions for the therapeutic drug categories listed above) are evaluated against other prescriptions filled for the beneficiary and paid by Medicaid in the last 34 days.

Beneficiaries in the BMP are prevented from filling or refilling prescribed medications listed in the Drug Categories subsection of this chapter until 95 percent of the medication quantity limits would have been consumed in compliance with the prescribed dose, amount, frequency and time intervals as ordered, and consistent with Medicaid limits.

Additional controls on drugs subject to abuse may be imposed. MDHHS may restrict access to these drug classes through pharmacy and/or prescribing provider assignment. Providers authorized to fill/prescribe drugs subject to abuse are identified by a "Y" indicator in the "Send to PBM" field of the CHAMPS Eligibility Inquiry response, BMP Restrictions page. Refer to the Assigned Providers subsection for additional information.

Drugs subject to abuse ordered in conjunction with exempt services, to include emergency (72 hour) medication supplies, may require communication with the MDHHS PBM and/or BMP program staff. (Refer to the Directory Appendix for contact information.) Refer to the Exempt Services subsection for additional information.

8.5.B. ASSIGNED PROVIDERS

The BMP may assign beneficiaries to providers through which covered services can be obtained. BMP Authorized Providers that may be assigned include, but are not limited to, any one or more of the following:

- Specific PCP
- Specific pharmacy
- Specific outpatient hospital
- Specific specialist provider
- Specific group practice

8.5.C. RESTRICTING BENEFITS

In some cases, the Department may find that a restriction of optional benefits (i.e., pharmacy) is an appropriate intervention. In the event of continued misutilization, as defined in the Definitions subsection and as outlined in the BMP Enrollment Criteria subsection (and its subsections), optional benefits may be reduced in accordance with federal and state regulations. Beneficiaries subject to a benefit restriction will receive

Michigan Department of Health and Human Services
Medicaid Provider Manual

written notice of the action, the effective and end dates applicable, and appeal information.

8.5.D. EXEMPT SERVICES

Services exempt from the BMP include, but are not limited to, the following:

- Emergency services
- Dental services
- Services rendered by a nursing facility provider
- Services rendered in an inpatient hospital
- Hospice services
- Optometry services
- Community Transition Services
- Home Help services

Although these services are exempt, controls on drugs subject to abuse are maintained in MDHHS information systems and will impact the beneficiary's ability to obtain certain pharmaceutical services using Medicaid benefits. Refer to the Obtaining Drugs Subject to Abuse subsection for additional information.

8.6 MONITORING AND REVIEW

Beneficiaries are placed in the BMP for a minimum of 24 months. The utilization of medical services and drugs is routinely monitored and the effectiveness of the BMP interventions is evaluated. The Department shall review the placement at least once every 24 months.

8.7 PROVIDER RESPONSIBILITIES

8.7.A. ALL PROVIDERS

Eligibility must be verified before providing service. BMP enrollees are indicated on the CHAMPS Eligibility Inquiry Response as additional information. If the BMP Provider Restriction Indicator is "Y", the hyperlink will be activated. The hyperlink will open the BMP Restrictions page which contains the BMP FFS and Managed Care Authorized Provider information.

When the beneficiary has FFS eligibility, the information in the BMP FFS Authorized Providers table directs payment. If there are no providers listed in the BMP FFS Authorized Providers table, the beneficiary is restricted only by the pharmaceutical refill tolerance for that date of service. The BMP may be contacted for additional information regarding covered services.

FFS reimbursement for BMP enrollees is limited to exempt services, services provided by an active BMP Authorized Provider per the beneficiary's eligibility file, and services provided by a referred provider when the following are present:

Michigan Department of Health and Human Services
Medicaid Provider Manual

- The beneficiary was referred by an active BMP FFS Authorized Provider; and
- The referred provider has obtained a current Benefits Monitoring Program Referral (form MSA-1302) from the BMP FFS Authorized Provider.

Rendering (and referring, when applicable) provider NPI numbers are required on claim submissions.

When the beneficiary is enrolled in a MHP, the information in both the BMP FFS and Managed Care Authorized Providers tables is applicable. For FFS payment of services carved out of the MHP benefit, providers must be listed in the BMP FFS Authorized Providers table. The "Send to PBM" field must have a "Y" indicator for the prescribing physician for FFS payment of drugs subject to abuse which are carved out of the MHP benefit. The MHP may be contacted for additional information regarding covered services.

8.7.B. BMP AUTHORIZED PROVIDERS

The BMP assigns Authorized Providers who are responsible for supervising the case management and coordination of all prescribed drugs, specialty care, and ancillary services. These responsibilities encompass patient-centered care and do not amount to separate reimbursement. Reimbursement for any ambulatory service will not be made unless the service was provided, referred, prescribed, or ordered by the PCP and the claim includes the appropriate information.

The beneficiary may participate in the PCP and other provider assignment processes, both initially and through request for changes to established BMP Authorized Providers. If the Department has reason to suspect that a beneficiary's provider selection will not contribute to a reduction in utilization and/or be appropriate to the beneficiary's health condition(s), the selection may be denied. If the beneficiary fails to respond to the Department with provider selections, the Department may assign providers without beneficiary participation.

Written notice of provider assignments will be mailed to the beneficiary and the provider. When applicable (e.g., Department assigned providers, denial of request to change providers), appeal information and instructions will accompany written notice.

MDHHS reserves the right to end/terminate provider authorization for a BMP enrollee at any time. A replacement provider may be assigned following such an action. Instances will be determined on a case-by-case basis following periodic review, and must meet at least one of the following criteria:

- A review of utilization reveals that a provider is not contributing to a reduction in service utilization (including use of drugs subject to abuse) as defined by the BMP;
- The BMP Authorized Provider becomes a sanctioned provider; or
- The BMP Authorized Provider makes referrals to the emergency department for non-emergent conditions.

Michigan Department of Health and Human Services
Medicaid Provider Manual

8.7.C. REFERRALS FOR BMP ENROLLEES

The BMP Authorized Provider must complete a MSA-1302 when referring a BMP enrollee for other specialty services. This form applies to beneficiaries with Medicaid FFS program eligibility. (Refer to the Forms Appendix for a copy of the form and form completion instructions.)

8.7.D. DISCHARGE FROM PRACTICE

It is the responsibility of the BMP Authorized Provider to notify the Department when a BMP enrollee is discharged from their practice. General practice standards should be followed with regard to patient notification. Written communication informing the beneficiary of the intent to sever the relationship and/or the MSA-1302 indicating "discharge from practice" may be sent to the Department to satisfy this responsibility.

8.7.E. REFERRALS TO BMP

To report potential misutilization of services, contact the MDHHS Benefits Monitoring Program. (Refer to the Directory Appendix for contact information.)

8.7.F. BENEFICIARY FRAUD

Suspected beneficiary fraud should be referred to the MDHHS Office of Inspector General. (Refer to the Directory Appendix for contact information.)

8.8 CHANGES IN ENROLLMENT

A beneficiary enrolled in the BMP will remain in the BMP for the minimum time period regardless of any change in enrollment status (e.g., change from fee-for-service to managed care, break in eligibility, incarceration, etc.). When a beneficiary in the BMP has a change in enrollment, responsibility for monitoring the beneficiary moves from the Department to the MHP or vice versa.

When a beneficiary has a break or change in eligibility that disrupts historical data collection and review, upon regaining full Medicaid eligibility, the beneficiary will, by default, remain in the BMP and periodic review will depend on availability of sufficient utilization data.

8.9 TERMINATION OF BMP ENROLLMENT

When the beneficiary's utilization has been determined to be at an appropriate level or there is a change in medical status, the Department may terminate the beneficiary's enrollment in BMP.

8.10 APPEALS

Any written notice of a negative action or denial of a beneficiary's provider choice shall include reference to the beneficiary's right to appeal. The appeal process shall conform to Michigan Administrative Code (MAC) Rules R400.901 to R400.922.

The MHP is the respondent in BMP-related hearings pertaining to actions taken by the MHP.

Michigan Department of Health and Human Services

Medicaid Provider Manual

SECTION 9 – MEDICAID HEALTH PLANS

MDHHS contracts with health plans in the state. The Medicaid Health Plans (MHPs) are paid a monthly capitation rate to provide specific covered services to enrolled Medicaid beneficiaries. The MHP is responsible for providing, arranging, and reimbursing most medical services.

9.1 ENROLLMENT

Within the Medicaid population, there are groups that:

- Must enroll in a MHP.
- May voluntarily enroll in a MHP.
- Are excluded from enrollment in a MHP.

Mandatory Enrollment	<ul style="list-style-type: none">▪ Most people who are receiving full Medicaid benefits.▪ People receiving Medicaid who participate in the Children's Waiver or the Habilitation Supports Waiver.▪ Supplemental Security Income (SSI) beneficiaries who do not receive Medicare.▪ Pregnant women whose pregnancy is the basis for Medicaid eligibility. <div>The newborn child is automatically enrolled in that health plan. Health plan responsibilities begin at the time of the child's birth. (Refer to the Newborn Child Eligibility Section of this chapter for more information.)</div>
Voluntary Enrollment	<ul style="list-style-type: none">▪ Migrants▪ Native American Indians of Federally recognized tribes▪ Most people who are dually Medicare/Medicaid eligible
Excluded Enrollment	<ul style="list-style-type: none">▪ People without full Medicaid coverage (they receive emergency services only).▪ People for whom Medicaid is purchasing Medicare coverage (QMB, SLMB, ALMB).▪ People with Medicaid who reside in an ICF/IID or state psychiatric hospital.▪ People in the MDHHS Brain Injury Services transitional residential program.

Michigan Department of Health and Human Services
Medicaid Provider Manual

- People receiving nursing facility services. (Refer to the Excluded Health Plan Services subsection of this chapter for additional information.)
- Beneficiaries diagnosed with inborn errors of metabolism that have been authorized for and use metabolic formulas (B4157 and B4162) will receive all of their Medicaid services through the Medicaid Fee-For-Service Program.
- People being served under the MI Choice Waiver.
- People enrolled in the CSHCS Program without full Medicaid coverage.
- Medicaid Deductible beneficiaries. (Refer to Medicaid Deductible Beneficiaries (Spenddowns) Section of this chapter for additional information.)
- People with commercial managed care coverage. This includes beneficiaries enrolled in a Medicare health plan which is not approved to provide Medicaid service in their county.
- People in PACE (Program of All-Inclusive Care for the Elderly).
- People enrolled in the Plan First Family Planning benefit plan.
- Children in child caring institutions.
- People in the Refugee Assistance Program.
- People in the Repatriate Assistance Program.
- People who have been disenrolled from a Medicaid Health Plan.
- People receiving Private Duty Nursing Services. All beneficiaries enrolled in a health plan will be disenrolled retroactively to the first day of the month in which the PDN services are received.

If one member of a family resides in a nursing facility or loses Medicaid eligibility, this does not exempt the other family members from enrollment in a health plan.

9.2 MICHIGAN ENROLLS

Beneficiaries who are eligible to enroll in a MHP are covered for Medicaid services on a FFS basis until enrolled in a health plan.

Beneficiaries who are required or are eligible to enroll in a health plan have the opportunity to choose their health plan. They are given a pamphlet, "Choosing Your Health Plan", which provides them information on this process. If no selection is made, the beneficiary is automatically enrolled with a health plan in the beneficiary's county of residence. The beneficiary has 90 days after assignment of or choosing a health plan to change the health plan. After 90 days, the beneficiary is required to remain in the chosen health plan until the next open enrollment period.

MDHHS has contracted with MI Enrolls to:

- Inform beneficiaries which physicians, pharmacies, and hospitals are part of each health plan.

Michigan Department of Health and Human Services
Medicaid Provider Manual

- Provide information to help the beneficiary choose a primary provider (a physician, nurse practitioner (NP), or physician's assistant who manages all of the beneficiary's health care).
- Answer beneficiary questions regarding how to use the health plan.
- Enroll beneficiaries in the health plan they choose, or automatically enroll them in a health plan.
- Change the beneficiary's health plan.
- Provide a Request for an Administrative Hearing and Instructions form (DCH-0092).
- Provide a Medical Exception Request form (MSA-1628) for medical exception from Managed Care.
- Provide a Beneficiary Complaint form (MSA-0300).
- Provide the Special Disenrollment-For Cause Request form (MSA-0176).

(Refer to the Directory Appendix for MI Enrolls contact information.)

9.3 MEDICAL EXCEPTIONS TO MANDATORY ENROLLMENT

The intent of the medical exception process is to preserve continuity of medical care for a beneficiary who is receiving active treatment for a serious medical condition from an attending physician (MD or DO) who would not be available to the beneficiary if the beneficiary is enrolled in a MHP. The medical exception may be granted on a time-limited basis necessary to complete treatment for the serious condition. The medical exception process is only available to a beneficiary who is not yet enrolled in a MHP, or who has been enrolled for less than two months. MHP enrollment would be delayed until one of the following occurs:

- The attending physician completes the current ongoing plan of medical treatment for the patient's serious medical condition, or
- The condition stabilizes and becomes chronic in nature, or
- The physician becomes available to the beneficiary through enrollment in a MHP.

If the treating physician can provide service through a MHP that the beneficiary can be enrolled in, then there is no basis for a medical exception to managed care enrollment.

If a beneficiary is enrolled in a MHP, and develops a serious medical condition after enrollment, the medical exception does not apply. The beneficiary should establish relationships with providers within the plan network who can appropriately treat the serious medical condition.

9.3.A. DEFINITIONS

Serious Medical Condition	Grave, complex, or life threatening. Manifests symptoms needing timely intervention to prevent complications or permanent impairment. An acute exacerbation of a chronic condition may be considered serious for the purpose of medical exception.
----------------------------------	--

Michigan Department of Health and Human Services
Medicaid Provider Manual

Chronic Medical Condition	Relatively stable. Requires long term management. Carries little immediate risk to health. Fluctuates over time but responds to well-known standard medical treatment protocols.
Active Treatment	Active treatment is reviewed in regards to intensity of services when: <ul style="list-style-type: none">▪ The beneficiary is seen regularly, (e.g., monthly or more frequently), and▪ The condition requires timely and ongoing assessment because of the severity of symptoms and/or the treatment.
Attending/Treating Physician	The physician (MD or DO) may be either a primary care doctor or a specialist whose scope of practice enables the interventions necessary to treat the serious condition.
MHP Participating Physician	A physician is considering participating in a MHP if they are in the MHP provider network or are available on an out-of-network basis with one of the MHPs with which the beneficiary can be enrolled. The physician may not have a contract with a MHP but may have a referral arrangement to treat the plan's enrollees. If the physician can treat the beneficiary and receive payment from the plan, then the beneficiary would be enrolled in that plan and no medical exception would be allowed.

9.3.B. PROCESS FOR REQUESTING A MEDICAL EXCEPTION

The Medicaid beneficiary must initiate the review process for medical exception by completing Section I of the Medical Exception Request (form MSA-1628). Beneficiaries can obtain forms, discuss managed care options, or ask questions regarding the medical exception process by contacting MI Enrolls. (Refer to the Directory Appendix for contact information.) If the beneficiary has been enrolled in a MHP for more than two months, the medical exception request does not apply.

9.3.C. PHYSICIAN RESPONSIBILITY

The physician who is actively treating the beneficiary for the serious medical condition must complete Section II of the MSA-1628. If multiple physicians are involved, each one must complete a separate form. The physician completing the form must be actively treating the beneficiary, and must not be participating with or have any arrangement with a MHP with which the beneficiary can be enrolled. The information provided by the physician must include:

- A detailed description of the serious medical condition that is being treated, including the diagnosis and current active signs and symptoms in adequate detail to justify the degree of seriousness. Diagnosis alone is not sufficient.
- The length of time that the beneficiary has been actively treated for this condition by the physician completing the form.

Michigan Department of Health and Human Services
Medicaid Provider Manual

- The treatment plan in place, including any planned interventions and a list of all current and anticipated medications.
- The frequency of visits.
- The anticipated length of time (in months) that the beneficiary will need this treatment.

A Medical Exception Request cannot be processed without all of the above information. MDHHS will verify that the treating physician is not available in any MHP in which the beneficiary can be enrolled. If an exception to managed care enrollment is granted, the MDHHS will identify a period of time, up to one year, for which it is approved. At the end of that period, the beneficiary will be eligible for enrollment in a MHP.

9.4 CHAMPS ELIGIBILITY INQUIRY

The CHAMPS Eligibility Inquiry transaction indicates the following for a beneficiary in a MHP:

- Benefit Plan ID of MA-MC, MA-HMP-MC, CSHCS-MC, or MME-MC
- MHP name, telephone number and address
- MHP Primary Care Physician (PCP), including the PCP name, telephone number, and NPI.
(NOTE: Data is provided only if the date of service is the current date and a PCP record is on file.)

9.5 HEALTH PLAN MEMBERSHIP

Once enrolled in a health plan, that health plan sends member information to the beneficiary. The CHAMPS Eligibility Inquiry will indicate the Benefit Plan ID of CSHCS-MC, MA-HMP-MC, MA-MC, or MME-MC, including the MHP name and toll-free telephone number as additional information. The beneficiary also receives a membership card from the health plan.

9.6 COVERED HEALTH PLAN SERVICES

Services may be provided directly by the health plan or arranged through the health plan. Coverages include current Medicaid-covered services and any additional services the health plan may decide to provide that may not be Medicaid-covered services, other than excluded services listed below.

9.7 EXCLUDED HEALTH PLAN SERVICES

Services are either included or excluded from the health plan's monthly capitation rate. The following services are not included in the monthly capitation rate and may be provided by an enrolled provider who would be directly reimbursed by Medicaid.

- Dental custodial services for Healthy Kids Dental eligible beneficiaries. (Oral-maxillofacial surgeons providing medical services are included in the health plan's capitation rate and should follow health plan authorization rules.) Adult dental benefits are included in MHP capitation rates.
- Nursing facility (NF) custodial services. The health plan is responsible for restorative or rehabilitative care in a nursing facility up to 45 days in a rolling 12-month period. In order for a provider to receive Medicaid reimbursement for nursing care, the nursing facility beds must be

Michigan Department of Health and Human Services

Medicaid Provider Manual

Medicaid certified by the SMA and the provider must be enrolled with Medicaid. The SSA is responsible for conducting any required certification surveys for the SMA. If nursing facility services will exceed this coverage, the health plan may initiate the disenrollment process by submitting the Request for Disenrollment Long Term Care form (MSA-2007). The provider may bill Medicaid after the disenrollment is processed.

Beneficiaries who reside in a nursing facility are excluded from subsequent enrollment in a MHP. If a beneficiary is in a facility prior to enrollment in a MHP and the nursing facility does the admission record in CHAMPS correctly, CHAMPS will automatically remove the MHP and set the nursing facility PET.

Services provided to persons with developmental disabilities and billed through the Prepaid Inpatient Health Plan (PIHP)/Community Mental Health Services Program (CMHSP).

- Substance abuse treatment services.
- Inpatient hospital psychiatric services and outpatient partial hospitalization psychiatric services.
- Personal care authorized through MDHHS.
- School-based services.
- Pharmacy and related services prescribed by providers under the State's contract for specialty behavior services.
- Drugs in the categories listed on the MHP carve-out list are excluded from the MHP contract. (Refer to the Directory Appendix for website information.)
- Private Duty Nursing (PDN) services.

9.8 HEALTH PLAN AUTHORIZATIONS

The health plan must provide or arrange for services covered by the plan. Services that are not covered by the health plan do not require the health plan's authorization. If providers render both a health plan covered and a health plan noncovered service, the health plan is responsible for providing/arranging and reimbursing for those health plan covered services. It is imperative that health plan providers obtain authorization from the health plan for plan-covered services.

For Medicaid-covered services:

- Non-emergency care – health plan authorization is required before rendering the service.
- Urgent care – health plan authorization is required before rendering the service.
- Emergency care to the point of stabilization – no authorization is required. The health plan is responsible for reimbursement of the service. The provider must inform the health plan as soon as possible that emergency services were provided. Post-stabilization treatment requires health plan authorization before rendering the service.

If a service requires PA from a health plan and from MDHHS (e.g., cosmetic surgery), the provider must obtain the authorization from the health plan but does not have to obtain a second PA from MDHHS.

Michigan Department of Health and Human Services **Medicaid Provider Manual**

9.9 COPAYMENTS

Health plan beneficiaries may be charged a copayment for physician, dental and outpatient hospital evaluation and management visits, non-emergency visits to the emergency department, the first day of an inpatient hospital stay (except for emergent admissions), and pharmacy, podiatric, chiropractic, vision, or hearing services as described in this manual. Preventive medicine evaluation and management services are not subject to beneficiary cost sharing.

(Refer to the Dental Chapter of this manual for additional information.)

9.10 BILLING

9.10.A. HEALTH PLAN MEMBERS

The health plan receives a monthly capitation fee for each Medicaid beneficiary enrolled in the plan as part of its contract with MDHHS. Health plans and providers may not bill the beneficiary for services not authorized by the health plan unless the beneficiary was informed of their financial responsibility prior to receiving the service. Providers may bill Medicaid for a service that is excluded from the health plan contract, but Medicaid covered under FFS.

9.10.B. REFERRAL PROVIDERS

If the health plan refers a beneficiary to a provider for health plan covered services, the health plan is responsible for reimbursement of those services.

9.10.C. HEALTH PLAN AS A PRIVATE INSURANCE (OTHER INSURANCE CODE 89)

A beneficiary who has an existing private health plan through employment, spouse or other source cannot be enrolled in a MHP at the same time. MDHHS disenrolls that beneficiary from the MHP.

There may be FFS beneficiaries who are enrolled with a health plan as a private insurance. For example, the provider receives a monthly capitation rate for a beneficiary covered by a private health plan policy (such as Blue Care Network).

The monthly capitation payment must not be reflected on the Medicaid claim. In most instances, the provider is billing Medicaid for the copayment amount only. Medicaid only reimburses the provider for the Medicaid fee screen or copayment amount, whichever is less. (Refer to the Billing & Reimbursement Chapters of this manual for additional information.)

If Medicaid's maximum allowable amount is less than the copayment amount billed, the beneficiary or their representative may not be billed for the difference. The amount paid by Medicaid is considered as payment in full.

SECTION 10 – CHILDREN’S SPECIAL HEALTH CARE SERVICES

MDHHS BPHASA determines eligibility for the CSHCS Program. CSHCS provides medically necessary services to individuals who are eligible and apply under the following circumstances:

- Persons under the age of 26 with one or more qualifying medical diagnoses.
- Persons age 26 and older with cystic fibrosis, hereditary coagulation defects commonly known as hemophilia, or hereditary red blood cell disorders commonly known as sickle cell disease.

Medical eligibility must be established by MDHHS before the individual is eligible to apply for CSHCS coverage. Based on medical information submitted by providers, a medically eligible individual is provided an application for determination of other CSHCS criteria. An individual may be eligible for CSHCS and eligible for other medical programs such as Medicaid, Healthy Michigan Plan, Medicare or MICHild. To be determined dually eligible, the individual must meet the eligibility criteria for CSHCS and all eligibility criteria for the other applicable program.

10.1 COVERAGE

The CSHCS coverage is limited to specialty health care services for the treatment of the beneficiary’s qualifying medical condition. CSHCS does not cover primary care, well child visits or immunizations. Those with additional coverage (e.g., Medicaid, MICHild) continue to receive their well child visits, immunizations, etc. through that source or coverage.

Dental interventions may be covered for certain qualifying diagnoses. Beneficiaries must receive services from a Medicaid-enrolled dentist/orthodontist. Services must be related to the qualifying diagnosis and authorized by CSHCS.

CSHCS does not cover the treatment service needs related to developmental delay, intellectual disability, autism, psychiatric, emotional, behavioral or other mental health diagnoses. A beneficiary who has both CSHCS and Medicaid or CSHCS and MICHild benefits receives their Medicaid or MICHild covered mental health services from the local PIHP/CMHSP.

CSHCS does not cover substance abuse treatment services. A beneficiary who has both CSHCS and FFS Medicaid or CSHCS and MICHild benefits receives their Medicaid or MICHild covered substance abuse treatment services from the regional PIHP. A beneficiary who has CSHCS and is enrolled in a Medicaid Health Plan may receive outpatient mental health visits through the Medicaid Health Plan. Provision of outpatient mental health services through the Medicaid Health Plan is available pursuant to the Beneficiary Eligibility subsection of the Behavioral Health and Intellectual and Developmental Disability Supports and Services chapter.

10.2 IDENTIFYING CSHCS ON THE CHAMPS ELIGIBILITY INQUIRY

The eligibility response will indicate when a beneficiary is enrolled in CSHCS for the date of service (DOS) entered in the inquiry. It will also identify if the provider NPI number entered is authorized to render CSHCS services for the beneficiary on that DOS. Providers will receive the Benefit Plan ID of CSHCS with one of the following messages in the eligibility response:

Michigan Department of Health and Human Services
Medicaid Provider Manual

- This NPI is listed. See CSHCS guidelines.
This message means the NPI is authorized by CSHCS to render services to this beneficiary on the specified date(s) of service. Services must be related to the beneficiary's CSHCS qualifying diagnosis.

Note: The 270/271 response will report up to eight (8) diagnosis codes for a single date of service. Refer to CHAMPS Eligibility Inquiry to obtain all approved diagnosis codes if more than eight (8) codes exist for the date of service.

- This NPI is not listed. See CSHCS guidelines.
This message means the NPI is not authorized to render services to a CSHCS beneficiary on the specified date(s) of service. Some providers can render services to a CSHCS beneficiary without being authorized.

Refer to the Approved/Authorized Providers Section of the Children's Special Health Care Services Chapter of this manual for authorized provider information.

10.3 BENEFICIARY REVIEWS

Beneficiaries may request a Department Review for denial of eligibility determinations/redeterminations and denial of services. They may contact their local health department (LHD) or the CSHCS Program through the CSHCS Family Center. (Refer to the Directory Appendix for contact information.)

SECTION 11 – APPLICATION FOR MEDICAL ASSISTANCE

If a person is potentially eligible for health care coverage, excluding CSHCS, but has not applied for assistance, an application form should be completed. If the person is unable to complete the application form and a relative, guardian, or other representative of choice is not available to complete the form on their behalf, then the hospital or NF may do so.

The Application for Health Coverage & Help Paying Costs form (DCH-1426) is used for potential beneficiaries. The form may be obtained from the local MDHHS office or is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

The Medicaid Patient of Nursing Home Application (DHS-4574) may be used as an alternative to the DCH-1426. The DHS-4574 is a Medicaid application/redetermination form used to determine Medicaid eligibility for the nursing facility patient only.

The application forms are self-explanatory. Questions regarding the forms should be referred to the local MDHHS office.

11.1 HOSPITALS AND NURSING FACILITIES

The individual or their authorized representative should sign applications when possible. The local MDHHS office must determine Medicaid eligibility even if the individual is receiving Supplemental Security Income (SSI) benefits. An individual is not automatically eligible for Medicaid just because they have SSI benefits and reside in a nursing facility.

For state-owned and -operated facilities, if the individual is unable to sign and the authorized representative is not available, the Reimbursement Office's authorized representative may sign the application using their personal signature and position title.

If retroactive Medicaid eligibility is requested, in addition to the application form, the Retroactive Medicaid Application (DHS-3243) must be completed for each retroactive month that eligibility is requested.

11.2 INITIAL ASSESSMENT OF ASSETS

The local MDHHS office must make an Initial Asset Assessment for a married resident in a nursing facility (even if not currently applying to Medicaid) or for a married individual who is applying for the MI Choice Waiver or the PACE program. The assessment must be made from the first day of continuous care received by the applicant/individual.

An initial assessment is a determination of the total amount of countable assets owned by an institutionalized or MI Choice waiver patient and/or their spouse on a given day. The day is usually the day the patient was admitted to the NF or MI Choice waiver.

Nursing facilities are required to notify patients, their families, or authorized representatives of the need to request the initial assessment in case of future Medicaid application. The Asset Declaration - Nursing Home Resident and Spouse (FIA-4574B), is to be completed by the patient and submitted to the local MDHHS office to request that an initial assessment be completed. The facility may assist the patient with

Michigan Department of Health and Human Services

Medicaid Provider Manual

the completion of this form. Any questions regarding the form, or requests for copies of the form, should be directed to the local MDHHS office.

The patient may refuse to complete the assessment, but it should be stressed that it is easier to obtain the assessment at the time of admission than it is to try to recreate the situation at a future date.

SECTION 12 – ELIGIBILITY DETERMINATION OF INSTITUTIONAL CARE

Nursing facilities, hospitals, state-owned and –operated facilities, CMHSP facilities, hospice, MI Choice Waiver, and MI Health Link agencies must enter beneficiary admissions, transfers, and discharges directly in CHAMPS. A completed admission will assign a PET code and benefit plan. Alternatively, when a discharge is completed in CHAMPS, the beneficiary's PET code and benefit plan will end date to reflect the discharge date. The admission or discharge should be submitted even if Medicare or other insurance covers the person's stay.

When completing an admission via CHAMPS, the facility must print the admission/enrollment form generated by CHAMPS and continue to obtain the potential beneficiary (or their authorized representative) signature on the form. The signature of the facility personnel completing the admission form must also be obtained. This signed form must be retained in the beneficiary's record. If the facility has a signature on file, that should be noted in the signature box.

In the event a beneficiary is admitted to a subsequent facility and the previous facility did not discharge the beneficiary, the new admission created in CHAMPS by the second facility will automatically discharge the beneficiary from the previous facility one day before the new facility admission date. The previous facility will receive an alert in CHAMPS that the beneficiary was discharged so they can modify the discharge date if needed (for example, if the beneficiary was discharged a week earlier before going to the second facility).

When a beneficiary is discharged, the facility must discharge the beneficiary via CHAMPS to avoid any access to care problems for the beneficiary in the community (e.g., durable medical equipment, medical supplies).

Hospice note: For Medicaid beneficiaries residing in a nursing facility and receiving hospice services when the beneficiary is discharged from hospice (involuntary or voluntary), the NF must complete an admission in CHAMPS to assign the nursing facility PET code and benefit plan. The nursing facility will receive a manual gross adjustment for the date of the admission. Alternatively, if the facility completes the admission in CHAMPS prior to the hospice discharging the beneficiary, the new admission created in CHAMPS will automatically discharge the beneficiary from hospice and the associated PET code one day before the nursing facility admission date.

12.1 PATIENT PAY AMOUNT

12.1.A. NURSING FACILITY DETERMINATIONS

After the Medicaid application has been submitted, the local MDHHS office determines eligibility for medical assistance. All allowable expenses and income are calculated, and any remaining income is then considered in determining the amount the beneficiary must pay toward their medical expenses each month. This monthly contribution by the beneficiary toward their care is called the Patient Pay Amount (PPA).

Michigan Department of Health and Human Services
Medicaid Provider Manual

Nursing facilities have the following options to obtain the PPA and eligibility information:

- DHS-3227 – If the local MDHHS office is unable to determine final eligibility status within five working days of receipt of the application for medical assistance, the Tentative Patient Pay Amount Notice (DHS-3227) is sent to the facility as notification of the person's tentative PPA.
- Nursing facility's determination of potential PPA – A timely collection of the PPA is vital for nursing facilities as it helps eliminate the need to claim adjust Medicaid and the need to retroactively collect the PPA from the beneficiary. To help alleviate unneeded claim adjusting and to collect a PPA more timely, nursing facilities are encouraged to determine what a potential beneficiary's PPA will be and collect that PPA prior to receiving the DHS-3227. Subsequently, the facility would bill Medicaid showing that potential PPA as determined by the facility.
- CHAMPS Eligibility Inquiry and/or other available eligibility options to obtain the Benefit Plan ID, PET code authorization, facility information and PPA. (Refer to the Directory Appendix for contact and website information.)

CHAMPS Eligibility Inquiry and/or other available eligibility options should be used in the preparation of bills for services provided in that month. This avoids many billing problems stemming from eligibility information. The facility may contact the beneficiary's local MDHHS office as identified on the eligibility response if the information provided is incorrect.

The provider should contact MDHHS Provider Inquiry for answers to billing questions. (Refer to the Directory Appendix for contact information.)

Facilities are responsible for collecting the PPA. If the facility receives the DHS-3227, it indicates a tentative PPA to be collected by the facility. In determining the tentative PPA, MDHHS does not prorate for partial months. This amount is subject to change as the beneficiary's financial eligibility changes. The PPA must be exhausted before any Medicaid payment is made.

A beneficiary who has a PPA cannot legally be charged more than the Medicaid rate for a short stay in a facility. For example, if a beneficiary is in a long term care facility for two days in a month, the provider must collect no more than the Medicaid rate for two days from the PPA (even if the PPA is great enough to cover the higher private pay rate). The balance, or unused portion, of the PPA must be returned to the beneficiary or their family.

For necessary medical or remedial care recognized under the State law but not covered by the Medicaid Program, the Medicare Catastrophic Coverage Act of 1988, Public Law 100-360, allows NF beneficiaries to use their PPA to obtain these services. For additional information, the facility may contact MDHHS Long Term Care (LTC) Services. (Refer to the Directory Appendix for contact information.)

Michigan Department of Health and Human Services
Medicaid Provider Manual

12.1.B. HOSPITALS

Hospitals are not notified of a tentative patient pay amount via the DHS-3227. The hospital may obtain the patient pay amount by:

- The eligibility response. (Refer to the Verifying Beneficiary Eligibility section for additional information.)
- Submitting a claim to MDHHS. (Medicaid deducts the patient pay amount and the claim is processed accordingly.)
- Contacting the local MDHHS office.

12.1.C. STATE-OWNED AND -OPERATED FACILITIES/PIHPs/CMHSPs

BPHASA or the PIHP/CMHSP determines a financial liability, or ability to pay, separate from the MDHHS patient pay amount. The ability to pay may be an individual, spouse, or parental responsibility. It is determined and reviewed as required by the Mental Health Code. The beneficiary or their authorized representative is responsible for the ability to pay amount, even if the patient pay amount is greater.

12.1.D. EXCESS PATIENT PAY AMOUNTS

If the provider has an excess patient pay amount and has been billing Medicaid, the provider must return any overpayments made by MDHHS. This must be done using a replacement claim or void/cancel claim. The provider may then use the remaining funds for beneficiary private pay.

12.2 PREADMISSION SCREENING

If a beneficiary is to be transferred from an acute care hospital to a NF, preadmission screening for mental illness/intellectual/developmental disability or a related condition must be completed prior to transfer.

SECTION 1 – INTRODUCTION

This chapter applies to all providers.

Federal regulations require that all identifiable financial resources be utilized prior to expenditure of Medicaid funds for most health care services provided to Medicaid beneficiaries. Medicaid is considered the payer of last resort. If a beneficiary with Medicare or Other Insurance coverage is enrolled in a Medicaid Health Plan (MHP), or is receiving services under a Prepaid Inpatient Health Plan (PIHP) or Community Mental Health Services Program (CMHSP), that entity is responsible for the Medicaid payment liability.

Coordination of Benefits (COB) is the mechanism used to designate the order in which multiple carriers are responsible for benefit payments and, thus, prevention of duplicate payments. Third party liability (TPL) refers to an insurance plan or carrier (e.g., individual, group, employer-related, self-insured or self-funded plan), commercial carrier (e.g., automobile insurance and workers' compensation), or program (e.g., Medicare) that has liability for all or part of a beneficiary's medical coverage. The terms "third party liability" and "other insurance" are used interchangeably to mean any source, other than Medicaid, that has a financial obligation for health care coverage. Providers must investigate and report the existence of other insurance or liability to Medicaid and must utilize other payment sources to their fullest extent prior to filing a claim with the Michigan Department of Health and Human Services (MDHHS).

Billing Medicaid prior to exhausting other insurance resources may be considered fraud under the Medicaid False Claim Act if the provider is aware that the beneficiary had other insurance coverage for the services rendered.

1.1 SUBROGATION

As a condition of Medicaid eligibility, beneficiaries must assign MDHHS the right to seek recovery of other resource payments made on their behalf. If MDHHS identifies another resource for a paid claim, a bill will be generated to the other resource within the appropriate timely filing guideline. The other resource will reimburse Medicaid directly or reject the paid claim. MDHHS will review other resource rejections to determine if the rejection is appropriate or if the provider can resubmit the claim to the other resource for reimbursement.

1.2 CLAIM VOID PROCESS

MDHHS will send a Pending Claim Void notice via mail and the Archived Documents repository within CHAMPS when it is determined that a provider did not hold another resource liable for payment after Medicaid adjudicated the claim. If the claim was lacking information about the existence of another resource, the provider must resubmit the claim in CHAMPS as an adjustment and include the proper Claim Adjustment Reason Code within 30 days of the date provided on the Pending Claim Void notice. Pharmacy providers must resubmit the claim to the Pharmacy Benefits Manager (PBM) and include the proper Other Coverage Code. Pharmacies must also notify MDHHS within 30 days of the date provided on the Pending Pharmacy Claim Void notice to report the updated claim adjudication. MDHHS will automatically void the claim after the 30 days if no adjustment is made in CHAMPS from medical providers or if no notification is received from pharmacy providers. The provider will then have to bill the identified resource for the claim. It is the provider's responsibility to remediate with the primary payer prior to rebilling Medicaid for the claim.

Medicaid Provider Manual

1.3 VERIFICATION OF OTHER INSURANCE

Information about a beneficiary's other insurance is available through the CHAMPS Eligibility Inquiry and/or vendor that receives eligibility data from the CHAMPS 270/271 transaction. It is not displayed on the **mihealth** card. (Refer to the Beneficiary Eligibility Chapter for additional information.)

Providers should always ask the beneficiary if other insurance coverage exists at the time of service. If the beneficiary identifies other insurance coverage that is not listed in the eligibility response, the provider must use that other insurance and report it to MDHHS by contacting Medicaid Provider Inquiry or by completing the on-line Request to Add, Terminate, or Change Other Insurance (form DCH-0078). If the beneficiary belongs to a network, the provider must refer them to that preferred provider for services needed. (Refer to the Directory Appendix for contact information.)

If the beneficiary does not agree with the other insurance information contained in the eligibility response, (e.g., other insurance coverage is no longer available), the beneficiary should be instructed to notify their local MDHHS office of the change or contact the Beneficiary Helpline to report the change. If the provider elects to initiate a change to the beneficiary eligibility response, the DCH-0078 should be completed. (Refer to the Forms Appendix for a copy of the form and additional instructions.)

The form should be submitted prior to billing Medicaid. If known, providers should include the policy's per diem payment amount or any supplemental information in the comments section of the form. The TPL Section will verify the information provided and update the beneficiary's CHAMPS eligibility information accordingly. The provider should bill the other resource first. Once payment has been received, the provider may bill Medicaid. The Medicaid claim must include the payment amount received from the other resource.

Medicaid Provider Manual

SECTION 2 - CATEGORIES OF OTHER INSURANCE

The major categories of other insurance are:

- Commercial health insurance carriers (i.e., managed care carriers [MCC], preferred provider organizations [PPO], point of service organizations [POS], health maintenance organizations [HMO], long-term care [LTC] insurance policies), traditional indemnity policies, and military/veteran insurance (i.e., TRICARE and the Civilian Health and Medical Program of the Department of Veterans Affairs [CHAMPVA]).
- Auto Insurance (accident, no-fault)
- Workers' Disability Compensation
- Court-Ordered Medical Support
- General Liability Insurance
- Medicare

2.1 COMMERCIAL HEALTH INSURANCE, TRADITIONAL INDEMNITY POLICIES, AND MILITARY/VETERAN INSURANCE

If a Medicaid beneficiary is enrolled in a commercial health insurance plan or is covered by a traditional indemnity policy or military/veteran insurance, the rules for coverage by the commercial health insurance, traditional indemnity policy, or military/veteran insurance must be followed. This includes, but is not limited to:

- Prior authorization (PA) requirements.
- Provider qualifications.
- Obtaining services through the insurer's provider network.

Beneficiaries must use the highest level of benefits available to them under their policy. Medicaid is not liable for payment of services denied because coverage rules of the primary health insurance were not followed. For example, Medicaid does not pay the point of service sanction amount for the beneficiary electing to go out of the preferred provider network. Medicaid is, however, liable for Medicaid-covered services that are not part of the primary health insurance coverage.

PA is not necessary for situations of other insurance coverage if all of the following apply:	PA is required for the following:
<ul style="list-style-type: none">▪ The beneficiary is eligible for the other insurance and the primary insurer rules are followed;▪ The provider is billing a standard Healthcare Common Procedure Coding System (HCPCS) code that Medicaid covers, and the primary insurer makes payment or applies the service to the deductible; and▪ The service/item complies with Michigan Medicaid standards of coverage as described in this manual.	<ul style="list-style-type: none">▪ PA is required for cases where the other insurance benefit has been exhausted or the service/item is not a covered benefit.▪ PA is necessary for all other situations, including not otherwise classified (NOC) codes.

Medicaid Provider Manual

Inappropriately recoded claims are rejected by MDHHS even if MDHHS issued PA.

MDHHS payment liability for beneficiaries with other insurance is the lesser of the beneficiary's liability (including coinsurance, copayments, or deductibles), the provider's charge minus contractual adjustments, or the maximum Medicaid fee screen minus the insurance payments. For inpatient hospital claims, refer to the Hospital Claim Completion - Inpatient section (Medicare subsection) of the Billing & Reimbursement for Institutional Providers chapter for additional information.

Providers may enter into agreements with other insurers to accept payment that is less than their usual and customary fees. Known as "Preferred Provider" or "Participating Provider" Agreements, these arrangements are considered payment-in-full for services rendered. Neither the beneficiary nor MDHHS has any financial liability in these situations.

Providers must secure other insurance adjudication response(s) which must include Claim Adjustment Reason Codes (CARCs) prior to billing Medicaid. Denials do not need to be obtained in cases where the parameters of the carrier would never cover a specific service (e.g., a dental carrier would never cover a vision service, etc.). In cases where the provider renders a service and the carrier indicates it does not cover that specific service, the provider needs only to bill the carrier once for the service and keep a copy of the denial in the beneficiary's file. When billing on paper, this documentation must be submitted as an attachment to the paper claim. When billing electronically, no attachment is necessary, as all required data must be included in the electronic submission. (Refer to the Billing & Reimbursement Chapters of this manual for additional information.)

If payments are made by another insurance carrier, the amount paid, whether it is paid to the provider or the beneficiary, must be reflected on the claim. It is the provider's responsibility to obtain the payment from the beneficiary if the other insurance pays the beneficiary directly. It is acceptable to bill the beneficiary in this situation. Providers may not bill a Medicaid beneficiary unless the beneficiary is the policyholder of the other insurance. Failure to repay, return, or reimburse Medicaid may be construed as fraud under the Medicaid False Claim Act if the provider has received payment from a third party resource after Medicaid has made a payment. Medicaid's payment must be repaid, returned, or reimbursed to MDHHS Third Party Liability Section. (Refer to the Directory Appendix for contact information.)

Insurance companies should not submit checks directly to Medicaid. Rather, providers must work directly with the insurance company or the beneficiary to obtain the insurance payment. If the insurance company pays the beneficiary directly, it is the provider's responsibility to obtain the payment from the beneficiary; if the policyholder is someone other than the beneficiary, it is the provider's responsibility to obtain the payment from the policyholder.

2.2 AUTOMOBILE INSURANCE (ACCIDENT, NO-FAULT)

Under Michigan's no-fault law, drivers may choose various levels of personal injury protection (PIP) coverage as part of their automobile insurance coverage. The automobile insurance carrier is required to pay the medical expenses for injuries incurred in an automobile accident consistent with the level of PIP coverage selected by the insured. In some instances, the insured's automobile policy contains a rider stating that their health insurance coverage takes priority over the automobile insurance carrier's policy. (This also applies to Coordination of Benefits riders.) In situations where more than one individual is involved in an accident, there is a possibility that multiple automobile insurance carriers are involved. As a result, the liable insurance carrier cannot always be readily identified at the time of initial medical treatment. The no-fault law is designed to designate an order of priority of liability. Providers must bill

Medicaid Provider Manual

the automobile insurance carrier prior to billing Medicaid or the Medicaid managed care plan. Billing Medicaid or a Medicaid managed care plan prior to exhausting other insurance resources may be considered fraud under the Medicaid False Claim Act if the provider is aware that the beneficiary had other insurance coverage for the services rendered.

The order of responsibility to pay for medical expenses for automobile accidents is as follows:

- The insurance company of the injured party, regardless of whether they were in their, or any, automobile.
- The insurance company of any resident relative of the house in which the injured party also resides.
- The insurer of the owner of the vehicle occupied. For nonoccupants (pedestrians) of the vehicle, the insurer of the vehicle involved.
- The insurer of the driver of the vehicle occupied. For nonoccupants (pedestrians) of the vehicle, the insurer of the driver involved.

Providers may directly pursue no-fault or other casualty cases and submit claims directly to the other insurance carriers. The automobile insurance carrier must be billed within 12 months from the date of the accident in order to preserve the right of recovery under the no-fault statute.

If liability is in question, Medicaid may be billed. If benefits associated with the auto insurance coverage are exhausted, the provider may bill Medicaid for Medicaid covered services consistent with the beneficiary's benefit plan. Medicaid or the Medicaid managed care plan pursues reimbursement from the other insurance through subrogation. For the purposes of this section, a Medicaid managed care plan must follow Medicaid policy regarding TPL.

2.3 WORKERS' DISABILITY COMPENSATION

Workers' Disability Compensation is a system established under state law that provides payments, without regard to fault, to employees injured in the course of their employment. Workers' Disability Compensation does not cover medical care incidental to or separate from the injury. Providers must establish if the beneficiary is covered by Workers' Disability Compensation. Billing Medicaid or a Medicaid managed care plan prior to exhausting other insurance resources may be considered fraud under the Medicaid False Claim Act if the provider is aware that the beneficiary had other insurance coverage for the services rendered.

If a claim has been filed and is contested, providers may bill Medicaid while the claim is pending resolution by Workers' Disability Compensation. The provider must bill the appropriate procedure code, the date the claim was submitted (if known), and any other pertinent information (e.g., employer, Workers' Disability Compensation carrier, and attorney's name). Medicaid or the Medicaid managed care plan may bill the compensation carrier, or may follow up in hearings as to redemption or settlement. For the purposes of this section, a Medicaid managed care plan must follow Medicaid policy regarding TPL.

2.4 COURT-ORDERED MEDICAL SUPPORT

Court-ordered medical support is medical coverage for beneficiaries that the court has ordered to be paid by an individual (who is also the policyholder) other than the beneficiary. This individual could be an absent parent, a grandparent, adoptive parent, etc. The provider must pursue recovery of the other insurance payment directly from the policyholder. In instances where the policyholder does not reside

Medicaid Provider Manual

with the beneficiary (e.g., an absent parent), providers are encouraged to have the custodial parent obtain a Qualifying Medical Support Order through the local Friend of the Court. This allows the provider to bill the other insurance directly (e.g., Blue Cross/Blue Shield). If there is not a Qualifying Medical Support Order on file for the beneficiary, providers must still obtain the other insurance payment from the policyholder. (Refer to the Directory Appendix for contact information.)

2.5 GENERAL LIABILITY

General liability insurance is coverage that generally pertains to claims arising out of the insured's liability for injuries or damage caused by the ownership of property, manufacturing operation, contracting operations, sale or distribution of products, or the operation of machinery, as well as professional services. If the beneficiary's injury is not work - or automobile-related, the beneficiary's medical services may be covered by another insurance carrier (e.g., homeowner's insurance policy). This insurance carrier is considered primary and must be billed according to the rules of the insurance carrier.

2.6 MEDICARE

2.6.A. MEDICARE ELIGIBILITY

Many beneficiaries are eligible for both Medicare and Medicaid benefits. If a provider accepts the individual as a Medicare beneficiary, that provider must also accept the individual as a Medicaid beneficiary.

Medicaid beneficiaries who are eligible for Medicare due to age, but not enrolled in Medicare Part A or Part B, will have claims paid by Medicaid for Medicaid covered services. Medicaid will only pay claims for services that fall under the Medicare Part for which the beneficiary is eligible, but not enrolled. The provider must bill Medicare for covered services when the beneficiary only has Part A or Part B. After the beneficiary obtains Medicare, affected claims will be voided and the provider must bill Medicare. After Medicare's payment is received, Medicaid should be billed for any coinsurance and/or deductible amounts. For Medicare Part A and Part B/Medicaid claims, Medicaid's liability never exceeds that of the beneficiary.

Medicaid beneficiaries may apply for Medicare at any time and are not limited to open enrollment periods. Beneficiaries may be eligible for Medicare if they are:

- 65 years of age or older.
- A disabled adult (entitled to SSI or RSDI due to a disability).
- A disabled minor child.

Medicaid Provider Manual

2.6.B. MEDICARE PART A

Since Medicare Part A pays for care in an inpatient hospital, nursing facility (NF), services provided by a home health agency (HHA) or in other institutional settings, Medicaid's reimbursement for services under Medicare Part A may vary.

For QMBs, if MDHHS is paying a beneficiary's Medicare Part B premium and the beneficiary does not have free Medicare Part A, MDHHS also pays the beneficiary's Medicare Part A premium.

MDHHS monitors beneficiary files to identify all beneficiaries who currently have Medicare Part B coverage only, and have Part B buy-in. Once these beneficiaries are identified, MDHHS automatically processes Part A buy-in.

To expedite the buy-in process, providers may notify MDHHS, in writing, when a beneficiary covered by Medicare Part B only is admitted to an inpatient hospital. (Refer to the Directory Appendix for MDHHS Provider Inquiry contact information.)

The following information is required:

- Beneficiary's name, date of birth, and Medicaid identification (ID) number;
- Medicare Beneficiary Identifier (MBI) or Health insurance claim number (HICN);
- Inpatient hospital admission date; and
- Hospital name, address, and provider NPI number.

Special points to remember:

- Medicaid does not pay for any portion of the services Medicare would have otherwise covered if a provider's error prevents Medicaid from buying-in Medicare Part A.
- To bill a claim when Medicare Part A coverage for Medicare/Medicaid beneficiaries is exhausted prior to an admission or during an inpatient hospital stay, refer to the Billing & Reimbursement for Institutional Providers Chapter of this manual.
- To bill a claim when no Medicare payment has been made because the amount of Medicare coinsurance, plus the amount for lifetime reserve days, is greater than the Medicare diagnosis related group (DRG) amount, refer to the Billing & Reimbursement for Institutional Providers Chapter of this manual.

2.6.C. MEDICARE PART B

Medicare Part B covers practitioner's services, outpatient hospital services, medical equipment and supplies, and other health care services. When a beneficiary is eligible for and enrolled in Medicare Part B, Medicare usually pays for a percentage of the approved Medicare Part B allowable charges and Medicaid pays the applicable deductible and/or coinsurance up to Medicaid's maximum allowable amount. Coverage for outpatient therapeutic psychiatric coverage varies.

Medicaid Provider Manual

Beneficiaries are encouraged to enroll in Medicare Part B as soon as they are eligible to do so. A beneficiary's representative can apply for Medicare Part B benefits on behalf of the beneficiary. After the beneficiary's death, MDHHS is responsible for making the application to the Social Security Administration (SSA) to cover medical services provided prior to the death.

2.6.D. MEDICARE PART D

Beneficiaries enrolled in Medicare Part A and/or Part B are eligible for Medicare Part D. Medicaid does not pay for Medicare Part D covered drugs for Medicare enrolled beneficiaries.

Medicaid will cover some of the drugs which are excluded from Part D. (Refer to the Pharmacy chapter for drug product coverage information.)

Medicaid does not cover Part D drugs for beneficiaries who are enrolled in Medicare Part A and/or Part B and elect to opt out of a Medicare Prescription Drug Plan (PDP). Pharmacies should refer to the Pharmacy Benefits Manager (PBM) website for information on billing Medicare Part D when eligible beneficiaries have not yet enrolled in a Part D plan. (Refer to the Directory Appendix for website information.)

All questions regarding Part D coverage should be directed to Medicare. (Refer to the Directory Appendix for contact information.)

2.6.E. MEDICARE BUY-IN/MEDICARE SAVINGS PROGRAM

If a beneficiary is eligible for Medicare but has not enrolled, they can do so at any time throughout the year by applying with SSA. If the beneficiary is unable to pay the Medicare premiums, Medicaid may pay the premiums through a contractual agreement (called the Medicare Buy-In Agreement) with the federal government. However, Medicaid cannot buy-in for the beneficiary until they apply for Medicare and the SSA is aware that they are Medicaid-eligible, and the beneficiary has applied for the Medicare Savings Program through their local MDHHS office. Beneficiaries eligible for Buy-In but who have not enrolled in Medicare can enroll at any time throughout the year by applying with SSA. Medicaid beneficiaries who did not receive automatic enrollment into Medicare Part A and/or Part B or declined coverage should also seek enrollment. Beneficiaries who need to enroll in Medicare can visit their nearest Social Security office for assistance or contact the Michigan Medicare/Medicaid Assistance Program (MMAP) for health benefit information and counseling. (Refer to the Directory Appendix for contact information.)

Medicaid Provider Manual

Some dual-eligible beneficiaries are classified as:

Qualified Medicare Beneficiaries (QMB)	Medicaid pays Medicare Part A and Part B premiums for these individuals, and reimburses providers for Medicare coinsurance and/or deductible amounts only to the extent that the total payment does not exceed the Medicaid maximum allowable amount. These beneficiaries are identified by the Benefit Plan ID of QMB in the eligibility response. Physicians and suppliers should be aware that services provided to QMBs are reimbursed on a Medicare assignment basis only. If a provider knowingly bills for Medicare services on other than an assignment basis, the U.S. Department of Health & Human Services (HHS) can seek sanctions.
Specified Low Income Medicare Beneficiaries (SLM/SLMB)	Medicaid pays only the Medicare Part B premiums for these individuals. Medicaid does not reimburse providers for any services rendered to the beneficiary. No mihealth card is issued to these individuals.
Additional Low Income Medicare Beneficiaries (ALMB)	Medicaid pays only the Medicare Part B premiums for these individuals. Medicaid does not reimburse the provider for any services rendered to the beneficiary. No mihealth card is issued to these individuals.

2.6.F. MEDICAID LIABILITY

If Medicare has paid 100 percent of the allowable charges and there is no coinsurance involved, then Medicaid has no payment liability.

Neither the beneficiary nor Medicaid is liable for any difference in the amount billed by the provider and Medicare's allowable fee.

If the beneficiary is in a Medicare Risk HMO, MDHHS pays fixed copays (except Medicare Part D) on the services up to the lesser of Medicaid's allowable amount minus the Medicare payment for the service or the beneficiary's payment liability, as long as the rules of the HMO are followed.

MDHHS reimburses providers for the coinsurance and deductible amounts subject to Medicaid reimbursement limitations on all Medicare approved claims even if Medicaid does not normally cover the service. MDHHS payment liability for beneficiaries with Medicare coverage (except Medicare Part D) is the lesser of:

- The beneficiary's liability for coinsurance, copayments, and/or deductibles minus any applicable Medicaid copayment, patient-pay, or deductible amounts.
- The Medicaid fee screen/allowable amount, minus any Medicare or other insurance payments and any applicable Medicaid copayment, patient-pay, or deductible amounts.
- The provider's charge, minus any Medicare or other insurance payments, contractual adjustments, and any applicable Medicaid copayment, patient-pay, or deductible amounts.

Claims submitted by providers with a Medicare Cost Share enrollment type will only adjudicate if Medicare is reported primary for these providers. Claims submitted for

Medicaid Provider Manual

reimbursement of Medicaid primary services will deny for Medicare cost-sharing only providers. Billing, rendering, attending, ordering, and referring provider types reported on these cost-sharing claims must be enrolled either as a Medicare Cost Share or full Medicaid provider.

For inpatient hospital claims, refer to the Hospital Claim Completion - Inpatient section (Medicare subsection) of the Billing & Reimbursement for Institutional Providers chapter for additional information.

Medicare coverage is not available for a Medicaid beneficiary who is 65 years or older and is an alien who has been in the country less than five consecutive years.

MDHHS does not pay for services denied by Medicare or other insurance plans due to noncompliance with Medicare or other insurance plan requirements. If the provider's service would have been covered and payable by Medicare or the other insurance plan but some requirement of the plan was not met, MDHHS will deny the claim. The provider and the beneficiary both have equal responsibility for complying with Medicare or the other insurance plan requirements.

Common noncompliance denials include, but are not limited to,:

- Failure to obtain a referral from a participating primary care provider (PCP).
- Failure to be seen by a participating provider.
- Failure to be seen in a participating place of service.
- Failure to obtain a second opinion.
- Failure to obtain prior authorization

In instances where MDHHS has denied payment or made a post-payment recovery due to noncompliance, it is the provider's responsibility to remediate with the primary payer prior to re-billing with Medicaid.

NOTE: This also applies to Fee-for-Service pharmacy claims, particularly claims submitted with Other Coverage Code (OCC) "3: Other Coverage Billed – Claim Not Covered." When the National Council for Prescription Drug Programs (NCPDP) standard does not provide MDHHS with a point-of-sale (POS) mechanism to verify full compliance with Medicare or commercial health insurance plan requirements, MDHHS will review and recover monies for noncompliance on a post-payment basis (e.g., when the primary payer denies the claim with NCPDP rejection code "75: Prior Authorization Required" and MDHHS is unable to verify at the POS whether prior authorization was requested and denied versus prior authorization not requested).

Medicaid Provider Manual

When a Medicaid beneficiary is eligible for, but not enrolled in, Medicare Part B and/or Part D, MDHHS will pay claims for Medicare Part B or Part D services. Medicaid beneficiaries who did not receive automatic enrollment into Medicare Part A and/or Part B or declined coverage should also seek enrollment.

If Medicare reimburses for the service, Medicaid does not require PA for the service.

MDHHS identifies fee-for-service (FFS) beneficiaries who are retroactively eligible for Medicare. Medicaid payment for services provided to these beneficiaries is adjusted to recoup all monies except the Medicaid liability, and recovered via an automated claim adjustment. FFS providers are notified by MDHHS when these adjustments occur. The notification includes beneficiary detail. If a discrepancy in payment exists, the provider should contact Provider Inquiry. (Refer to the Directory Appendix for contact information.)

Beneficiaries cannot be charged for Medicaid-covered services, except for approved copays or deductibles, whether they are enrolled as a FFS beneficiary, MDHHS is paying the HMO premiums to a contracted health plan, or services are provided under PIHP/CMHSP capitation. Refer to the Commercial Health Insurance, Traditional Indemnity Policies, and Military/Veteran Insurance subsection of this chapter for exceptions when a beneficiary has third party resources.

2.6.G. EXCEPTIONS TO THE TIMELY FILING BILLING LIMITATION

When a delay in payment from Medicare causes a delay in billing Medicaid, an exception may be made if the provider can document that Medicare was billed within 120 days of the date of service and Medicaid was billed within one year of the date of payment, rejection or retroactive recovery of funds by Medicare. Medicaid payment is made provided all other requirements (e.g., beneficiary eligibility, medical necessity) are met. A copy of the Medicare claim submitted and Medicare's response must be attached to the Medicaid paper claim to document Medicare's delay. If billing electronically, a note should be added in the Remarks segment that the late billing is due to Medicare's delay in processing the claim. (Refer to the Billing & Reimbursement Chapters of this manual for additional information.)

2.6.H. LIFETIME RESERVE DAYS

Medicare allows a one-time additional 60 days of coverage known as Lifetime Reserve Days (LRD). A Medicaid beneficiary who has Medicare Part A must use these 60 days before Medicaid makes a payment, except for deductibles and coinsurance.

2.6.I. OUTPATIENT HOSPITAL LABORATORY SERVICES

Medicare pays most diagnostic and clinical laboratory tests at 100 percent. Therefore, Medicaid has no payment liability.

Medicaid Provider Manual

2.6.J. PSYCHIATRIC SERVICES

Diagnostic outpatient hospital psychiatric physician services, including the initial psychiatric diagnostic and evaluation interview, family counseling and psychological testing, are reimbursed as a Medicare Part B service.

2.6.K. OTHER INSURANCE PAYER ID

Other Insurance Payer IDs can be accessed in CHAMPS by individual beneficiary. All third-party carriers must be used to the fullest extent possible, prior to billing Medicaid and Children's Special Health Care Services (CSHCS) Programs, including Medicaid Health Plans (MHPs) and PIHPs/CMHSPs/CAs.

SECTION 3 - SPECIAL CONSIDERATIONS

3.1 MASTER MEDICAL

All insurance coverage, including Master Medical policy riders, must be used before filing a claim with Medicaid. If the beneficiary has a Master Medical policy rider (e.g., Blue Cross/Blue Shield), providers must identify whether the provider or policyholder must bill. If the policyholder must bill, the provider must provide a statement of charges to the beneficiary or policyholder to use when billing Master Medical. If there is a court order for medical support that includes Master Medical, the custodial parent may obtain a qualified medical support order for providers to be paid directly from the insurance carrier. Whether the payment is made to the policyholder or the provider, the provider must report it as other insurance payment on the bill submitted to Medicaid. Providers must pursue recovery of the insurance payment if it is made directly to the policyholder. The beneficiary, or their representative, must not be billed for this payment unless the beneficiary is the policyholder.

3.2 HOSPITAL CREDIT BALANCE REFUND PROCESS

A TPL hospital credit balance refers to funds that must be returned to MDHHS because a claim has been paid by another resource or paid incorrectly.

Providers must refund credit balance overpayments by submitting claim adjustments or claim voids through CHAMPS or submitting them via an electronic claim vendor. Providers are required to include a comment on the claim adjustment or claim void that reads "Credit Balance MM/DD/YYYY" where MM/DD/YYYY is the date the overpayment was identified.

Providers are required to resolve credit balances before submitting their fiscal year end cost report. Any credit balances adjusted through CHAMPS prior to the MDHHS designated contractor's audit need not be reported to the contractor. For credit balance adjustments performed via CHAMPS, the provider's documentation must match the identification date noted in the claim adjustment or claim void comments within CHAMPS.

3.3 COINSURANCE/DEDUCTIBLE AND/OR COPAYMENT

Medicaid responsibility for payment of coinsurance/deductible and/or copayment amounts is:

Coinsurance, Copayments, and Deductibles	Medicaid pays the appropriate coinsurance amounts, copayment amounts, and deductibles up to the beneficiary's financial obligation to pay or the Medicaid allowable amount (less other insurance payments), whichever is less. If the other insurance has negotiated a rate for a service that is lower than the Medicaid allowable amount, that amount must be accepted as payment in full and Medicaid cannot be billed.
Medicaid services not covered by another insurance	If the other insurance does not cover a service that is a Medicaid-covered service, Medicaid reimburses the provider up to the Medicaid allowable amount if all the Medicaid coverage rules are followed.

Michigan Department of Health and Human Services Medicaid Provider Manual

MDHHS cannot be billed for copays, coinsurance, deductibles, or any fees for services provided to beneficiaries enrolled in a MHP, or who are receiving services under PIHP/CMHSP capitation.

Beneficiaries are responsible for payment of all copays and deductibles allowed under the MHP/PIHP/CMHSP contract with MDHHS. If the beneficiary with other insurance coverage is enrolled in a MHP or receiving services under a PIHP/CMHSP capitation, the MHP/PIHP/CMHSP assumes the Medicaid payment liabilities.

Beneficiaries cannot be charged for Medicaid-covered services, except for approved copays or deductibles, whether they are enrolled as a FFS beneficiary, MDHHS is paying the HMO premiums to a contracted health plan, or services are provided under PIHP/CMHSP capitation.

(Refer to the Medicaid Liability subsection of this chapter for additional information on Medicare claims.)

3.4 CLAIM REPLACEMENT

A claim replacement should be submitted if another insurance makes a payment subsequent to Medicaid's payment. (For specific claim replacement instructions, refer to the Billing & Reimbursement Chapters of this manual.)

3.5 CLAIMS SUBJECT TO ADDITIONAL EDITS

If a beneficiary has Medicare or private insurance, submitted claims must contain the name and individual National Provider Identifier (NPI) of the practitioner who ordered, prescribed or referred the service(s)/item(s). If the applicable attending, ordering, prescribing or referring provider information is not reported on the claim, or if the provider is not enrolled in the Michigan Medicaid program, the claim cannot be paid.

3.6 EXCEPTIONS TO MEDICAID PAYER OF LAST RESORT

There are a few exceptions to the general rule that Medicaid is the payer of last resort. In limited circumstances where there is a federal statute making Medicaid primary to a specific program, the Medicaid program must pay before the federally-administered health program.

The following federally-administered programs are some examples of exceptions to Medicaid's payer of last resort rule:

- Crime Victims Compensation Fund
- Ryan White Program
- Indian Health Services
- Women, Infants and Children Program
- Grantees under Title V of the Social Security Act (Maternal and Child Health Services Block Grant)
- Veteran Benefits – emergency treatment provided in a non-VA facility
- Veteran Benefits – non-VA nursing home per diem payments

SECTION 4 – CROSSOVER CLAIMS

The crossover process allows providers to submit a single claim for individuals dually eligible for Medicare and Medicaid, or qualified Medicare beneficiaries eligible for Medicaid payment of coinsurance and deductible to a Medicare fiscal intermediary, and also have it processed for Medicaid reimbursement. Refer to the specific claim type chapters within this manual for further billing instructions.

Additional information about the crossover claim process is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

4.1 ACCEPTABLE CROSSOVER CLAIMS

MDHHS accepts Medicare Part A institutional claims (inpatient and outpatient) and Medicare Part B professional claims processed through the CMS Coordinator of Benefits Contractor, Group Health, Inc. (GHI). Claim adjudication will be based on the provider NPI number reported on the claim submitted to Medicare.

When a claim is crossed over to MDHHS, a remittance advice (RA) will be generated from the fiscal intermediary with the details of the Medicare payment and Remark Code MA07 (the claim information has also been forwarded to Medicaid for review). If this remark does not appear on the fiscal intermediary's RA, a separate claim will have to be submitted to MDHHS.

4.2 CLAIMS EXCLUDED FROM CROSSOVER PROCESS

The following types of claims will be **excluded** from the crossover process between MDHHS and Medicare:

- Totally denied claims
- Claims denied as duplicates or missing information
- Replacement claims or void/cancel claims submitted to Medicare
- Claims reimbursed 100 percent by Medicare
- Claims for dates of service outside the beneficiary's Medicaid eligibility begin and end dates

Providers must resolve denied claims with the fiscal intermediary unless the service is an excluded benefit for Medicare, but covered by Medicaid (e.g., insertion of an IUD or hearing aid supply). In those cases, the excluded Medicare service can be billed directly to MDHHS.

Additional information regarding crossover billing and exclusions can be found on the MDHHS website. (Refer to the Directory Appendix for website information.)

SECTION 1 – GENERAL INFORMATION [CHANGE MADE 7/1/2025]

This chapter applies to all providers billing the ADA (text deleted 7/1/2025) or 837 Dental claim formats. It contains information needed to submit dental claims to the Michigan Department of Health and Human Services (MDHHS) for Medicaid and Children's Special Health Care Services (CSHCS). It also contains information about how claims are processed and how providers are notified of MDHHS actions.

Dental providers must use the ASC X12N 837D 5010 dental format when submitting electronic claims and the ADA (text deleted 7/1/2025) claim form for paper claims.

1.1 CLAIMS PROCESSING SYSTEM

All claims submitted and accepted are processed through CHAMPS. Paper claims are scanned and converted to the same file format as claims submitted electronically.

Claims processed through CHAMPS are edited for many parameters, including provider and beneficiary eligibility, procedure validity, claim duplication, frequency limitations for services, and combination of service edits. Electronic claims received by Wednesday may be processed as early as the next weekly cycle.

MDHHS encourages providers to send claims electronically. (Refer to the Electronic Submission Manual on the MDHHS website for additional information. Refer to the Directory Appendix for website information.) Electronic filing is more cost effective, more accurate, payment is received more quickly, and administrative functions can be automated.

1.2 PREDICTIVE MODELING

Predictive modeling, a pre-payment claims process in CHAMPS, uses advanced screening technology to identify Medicaid claims with billing irregularities. Claims flagged by the predictive modeling process will undergo a detailed analysis to determine the next step(s) to be taken. This may include a review of medical records and/or past claims. Providers must submit the requested records within 45 days of the date on the request for documents letter to avoid denials for lack of documentation. Records should not be submitted prior to receiving a request for documentation letter.

Requested records must be submitted through the Document Management Portal (DMP) available in CHAMPS. Refer to:

- the MDHHS website for information and tutorials on the Document Management Portal.
- the Directory Appendix for Document Management Portal website information.

1.3 CLAIM PAYMENT/CLAIM STATUS

Once claims have been submitted and processed through CHAMPS, an electronic health care claim payment/advice (ASC X12N 835 5010) is sent to the designated service bureau for providers choosing an electronic RA. The CHAMPS RA is also available to providers online or is sent to providers via paper if requested through the Provider Enrollment Subsystem. (Refer to the Remittance Advice Section of this chapter for additional information about both the electronic and paper RA.)

Medicaid Provider Manual

To receive information on suspended claims, a provider-initiated 276 claim status request must be submitted and a 277 claim status response will be returned. Providers have the option to receive information on suspended claims via the CHAMPS claims inquiry screens as well.

1.4 ELECTRONIC FUNDS TRANSFER

Electronic Funds Transfer (EFT) is the method of direct deposit of State of Michigan payments into a provider's bank account. This replaces a paper warrant. To initiate an EFT, the facility should go to the Department of Technology, Management & Budget (DTMB) website. (Refer to the Directory Appendix for website information.)

SECTION 2 – GENERAL INFORMATION/PRIOR AUTHORIZATION

The Dental Prior Approval Authorization Request (MSA-1680-B) is a form designed to obtain authorization for those services that require prior authorization (PA), as indicated in the Dental Chapter. Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.

The dental provider must remember the following:

- Radiographs must be sent along with the PA form and are returned only upon provider request.
- The PA form only needs to include the procedure that requires PA.
- Assess the general oral health and provide a five-year prognosis on the prosthesis requested.
- The dental provider should make liberal use of the Pertinent Dental History and Medical areas on the request to better define symptomatology, treatment situations, etc. when the services requested or the accompanying documentation may leave unresolved questions. When health problems exist, they should be identified on the request along with any effect they might have upon the proposed plan of treatment.
- Any additional documentation submitted with the request must contain the beneficiary's name and identification (ID) number, date, and the dental provider's name and NPI number.

Additional information is generally required to be submitted with or indicated on the PA form. This is to enable staff to make an accurate determination regarding the proposed plan of treatment.

SECTION 3 – HOW TO FILE CLAIMS

Dental claims may be submitted electronically or on paper. Electronic claim submission is the preferred method for submitting claims to MDHHS.

3.1 ELECTRONIC CLAIMS

Claims submitted electronically and accepted are received directly into CHAMPS, which results in faster payments and fewer claims that suspend or reject. (Refer to the Electronic Submission Manual on the MDHHS website for additional information. Refer to the Directory Appendix for website information.) Providers submitting claims electronically must use the ASC X12N 837D 5010 dental format. The payroll cut-off for electronic claims submission to MDHHS is Wednesday of each week.

Complete information on submission of electronic claims is available on the MDHHS website. (Refer to the Directory Appendix for website information.) The MDHHS Electronic Submission Manual and other resources, such as Companion Guides, are on the website. Information on the website is updated as version changes occur at the national level and are adopted by MDHHS.

3.1.A. AUTHORIZED BILLING AGENT

Any entity (service bureau or individual provider) wishing to submit claims electronically to MDHHS must enroll as an authorized billing agent. The Provider Enrollment Section of the General Information for Providers Chapter and the Trading Partners portion of the MDHHS website contain information related to the application and billing agent authorization process. (Refer to the Directory Appendix for website information.)

More than one billing agent per provider can be authorized to submit the provider's claims electronically. However, only one electronic billing agent may be the designated receiver of the electronic health care claim payment/advice ASC X12N 835 5010. Authorizations remain in effect until changed by the provider through the CHAMPS Provider Enrollment subsystem.

Any individual provider can submit claims electronically as long as the authorization process is completed and approved; however, many providers find it easier to use an existing authorized billing agent to submit claims to MDHHS. Billing agents prepare claims received from their clients, format to HIPAA compliant MDHHS standards, and submit the files to MDHHS for processing. Whether claims are submitted directly or through another authorized billing agent, providers receive a paper remittance advice (RA) that reflects their individual claims. Billing agents receive an RA that contains information on all the claims the agent submitted.

For more information on becoming an electronic biller or for a list of authorized billing agents, contact the Automated Billing Unit. (Refer to the Directory Appendix for contact information.)

3.1.B. ELECTRONIC CLAIMS WITH ATTACHMENTS

The Document Management Portal in CHAMPS is available to upload documents. This tool allows providers and billers to submit supporting documentation electronically for

Medicaid Provider Manual

Medicaid electronic claims. (Refer to the MDHHS website for information and tutorials on the Document Management Portal. Refer to the Directory Appendix for website information.)

If comments or additional information are required with an electronic claim, electronic submitters must enter the information in the appropriate segments of the electronic record. If an operative report or other paper attachment is required, providers must use the Document Management Portal. Within the Document Management Portal, the appropriate documentation category must be chosen along with completing specified information to successfully enter the document. MDHHS does not accept paper documentation via mail for any electronic claim. The Document Management Portal process allows MDHHS to communicate directly with providers to resolve claim attachment issues prior to finalizing claim adjudication.

Electronic submitters must:

- Include the notation "Documents uploaded in DMP" in the Claim Note area (NTE02 Segment, Loop 2300) and Reference Code "ADD" (NTE01 Segment, Loop 2300) within the electronic claim.
- Comply with all standard HIPAA reporting requirements, including using Claim Adjustment Segment (CAS) codes when submitting secondary or tertiary claims.

Refer to the MDHHS website for the Document Management Portal instructions. (Refer to the Directory Appendix for website information.)

Submission of electronic attachments via fax requires the use of a fax cover sheet which will be generated in the DMP system. (Refer to the MDHHS website for information on the Document Management Portal. Refer to the Directory Appendix for website information.)

3.2 PAPER CLAIMS [CHANGE MADE 7/1/2025]

The ADA **(text deleted 7/1/2025)** claim form must be used when submitting paper claim forms. The MDHHS Optical Character Reader (OCR) scans paper claims.

Claims may be prepared on a typewriter or on a computer. Handwritten claims are not accepted. Because claims are optically scanned, print or alignment problems may cause misreads, thus delaying processing of the claim. Keep equipment properly maintained to avoid the following:

- Dirty print elements with filled character loops.
- Light print or print of different density.
- Breaks or gaps in characters.
- Ink blotches or smears in print.
- Worn-out ribbons.

Dot matrix printers should not be used as they result in frequent misreads by the OCR.

Medicaid Provider Manual

Questions and/or problems with the compatibility of equipment with MDHHS scanners should be directed to MDHHS Provider Inquiry. (Refer to the Directory Appendix for contact information.)

Paper claims should appear on a remittance advice (RA) within 60 days of submission. Do not resubmit a claim prior to the 60-day period.

3.2.A. GUIDELINES TO COMPLETE PAPER CLAIM FORMS [CHANGE MADE 7/1/2025]

To assure that the scanner correctly reads claim information, adhere to the following guidelines in preparing paper claims. Failure to do so can result in processing/payment delays or claims being returned unprocessed.

- American Dental Association (ADA) standard completion instructions should be followed in completing the ADA **(text deleted 7/1/2025)** claim form.
- Be sure the dates are within the appropriate boxes on the form.
- Use only black ink.
- Do not write or print on the claim, except for the Provider Signature Certification.
- Handwritten claims are not acceptable.
- UPPER CASE alphabetic characters are recommended.
- Do not use italic, script, orator, or proportional fonts.
- 12-point type is preferred.
- Make sure the type is even (on the same horizontal plane) and within the boxes.
- Do not use punctuation marks (e.g., commas or periods).
- Do not use special characters (e.g., dollar signs, decimals, or dashes).
- Only service line data can be on a claim line. Do not squeeze comments below the service line.
- Do not send damaged claims that are torn, glued, taped, stapled, or folded. Prepare another claim.
- Do not use correction fluid or correction tape, including self-correcting typewriters.
- If a mistake is made, start over and prepare a clean claim form.
- Do not submit photocopies.
- Claim forms must be mailed flat, without folding, in 9" x 12" or larger envelopes. Do not fold the form.
- Put your return address on the envelope.
- Separate the claim form from the carbon.
- Separate each claim form if using the continuous forms and remove all pin drive paper completely. Do not cut the edges of forms.
- Keep the file copy.
- Mail Dental claim forms separately from any other claim form type.

Medicaid Provider Manual

3.2.B. PAPER CLAIMS WITH ATTACHMENTS

When a claim attachment(s) is required, it must be directly behind the claim it supports and be identified with the beneficiary's name and Medicaid ID Number. Attachments must be on 8 ½" x 11" white paper and one-sided. Do not submit two-sided materials. Multiple claims cannot be submitted with one attachment. Each claim form that requires an attachment must have a separate attachment. Do not staple or paperclip the documentation to the claim form.

Mail claim forms with attachments flat, with no folding, in a 9" x 12" or larger envelope and print "Ext. material" (for extraneous material) on the outside. Do not put claims without attachments in this envelope. Mail claims without attachments separately. Do not send attachments unless the attachment is required as unnecessary attachments delay processing of claims.

3.2.C. MAILING PAPER CLAIMS

All paper claim forms and claim forms with attachments must be mailed to MDHHS. (Refer to the Directory Appendix for contact information.)

3.3 REPORTING PROVIDER NPI

MDHHS requires that NPI numbers be reported in any applicable provider loop or field (e.g., billing, rendering, referring) on the claim. A provider's Taxpayer Identification Number (TIN) will also be used for claim adjudication. The TIN reported is either the provider's Employer Identification Number (EIN) or Social Security Number (SSN). For a Type 2 (Organization) NPI, both the NPI and EIN must be reported at the billing provider loop for all electronic claims. For a Type 1 (Individual) NPI, both the NPI and EIN/SSN are required at the billing provider loop for electronic claims when a Type 2 NPI does not apply.

A Type 1 (Individual) NPI is the number associated with an individual healthcare professional (e.g., MD, DDS, CRNA, etc.). The individual may be a sole proprietor or be employed by a clinic, group practice, or other organization. If a sole proprietor, the Type 1 NPI must be reported in the billing provider loop or field of the claim for payment.

A Type 2 (Organization) NPI is the number required for organizations such as clinics, group practices, and incorporated individuals who provide health care services and receive payment. For MDHHS, the Organization NPI must be reported in the billing provider loop or field. Also, for dental and professional claims, the appropriate Type 1 (Individual) NPI of the specific provider performing the service must be reported in the rendering provider loop or field for proper claim adjudication. Do not enter the Type 2 (Organization) NPI as the rendering provider.

MDHHS NPI claim editing will be applied to the billing, referring, and/or rendering provider as applicable. A claim cannot be paid if the NPI is missing or the reported NPI is invalid as it does not check digit and/or correctly crosswalk to the Provider Enrollment files for these provider loops or fields.

The ADA claim form does not contain fields for the referring provider. Paper claims which require this information must be submitted via CHAMPS Direct Data Entry (DDE). (Refer to the Directory Appendix for additional information.)

Medicaid Provider Manual

3.3.A. BILLING PROVIDER

The billing provider loop or field is mandatory to complete on all claims. The billing provider must be enrolled with the program for payment. If the billing provider NPI reported is an invalid number and/or represents a non-enrolled provider, the entire claim will be denied for payment.

3.3.B. RENDERING PROVIDER

The rendering provider loop or field must be completed within the professional/dental claim formats only when the provider is enrolled with MDHHS. For an organization (such as clinics and group practices), the rendering provider will be required. If MDHHS does not recognize the rendering provider's NPI, services rendered by these providers (e.g., dental therapist, dental hygienists) must be billed under the supervising dentist's NPI. The supervising dentist is responsible for ensuring the medical necessity and appropriateness of the services.

3.3.C. REFERRING PROVIDER

Referring provider information is a claim editing requirement for services rendered as a result of a referral. The claim must contain the name and individual NPI of the provider who referred the service(s)/item(s).

If referring provider information is not reported on the claim, or if the provider is not enrolled in the Michigan Medicaid program, the claim cannot be paid.

Rendering providers should ensure their referral sources are aware of this requirement. Referring providers may initiate the enrollment process at any time. (Refer to the General Information for Providers chapter for information regarding enrollment.)

SECTION 4 – ADA COMPLETION INSTRUCTIONS

4.1 DENTAL CLAIM FORM COMPLETION INSTRUCTIONS [CHANGE MADE 7/1/2025]

American Dental Association (ADA) standard completion instructions should be followed in completing the ADA **(text deleted 7/1/2025)** claim form.

SECTION 5 – SPECIAL BILLING INSTRUCTIONS

5.1 SUPERNUMERARY TEETH [CHANGE MADE 7/1/2025]

Providers bill the appropriate procedure code and the supernumerary tooth number as identified using the ADA Universal/National Tooth Designation System. Supernumerary Permanent teeth are identified by the numbers 51 through 82, beginning with the upper right third molar, following the upper arch and continuing on the lower arch, concluding with the lower right third molar area in the same manner as permanent tooth numbers 1 through 32. For example, tooth number 51 would correlate with the position of tooth number 1 and tooth number 82 would correlate with the position of tooth number 32.

Refer to the (text deleted 7/1/2025) ADA Claim form instructions for additional information.

5.2 LOSS OR CHANGE IN ELIGIBILITY

Services are not covered after loss or change in eligibility. Root canal therapy, authorized laboratory processed crowns, and authorized complete and partial dentures may be reimbursed if services were started prior to the loss/change in eligibility and completed within the month following the last date of eligibility.

Electronic Claims	Treatment Start Date and Treatment Completion Date are required within Loop 2400 DPT.
DDE Claims	Treatment Start Date and Treatment Completion Date are required within the appropriate DDE fields.
Paper Claims	<p>For complete or partial dentures and laboratory-processed crowns, the date of service on the claim should be the date of the initial impression (the completion date must be entered in the Remarks section).</p> <p>For root canal therapy, the date of service should be the first treatment appointment (the completion date must be entered in the Remarks section).</p>

5.3 INCOMPLETE PROCEDURES

When root canal treatment, authorized laboratory processed crowns or authorized denture services have commenced but extenuating circumstances have prevented completion (e.g., beneficiary death), providers are paid a reduced rate to offset a portion of the costs incurred. A request to amend the original PA must be submitted as described below. Refer to the Dental chapter of this manual for PA requirements.

5.3.A. INCOMPLETE CROWN

- Providers must bill procedure code D2999.
- Date of service is the date of the impression.
- Include the PA number on the claim.

5.3.B. INCOMPLETE ROOT CANAL

- Providers must bill procedure code D3999.
- Date of service is the date of the first treatment appointment.
- Include the PA number on the claim.

5.3.C. INCOMPLETE DENTURE OR PARTIAL DENTURE

- Providers must bill procedure code D5899.
- Date of service is the date of the initial impression.
- Include the PA number on the claim.

5.4 DIAGNOSIS REPORTING

Diagnosis reporting is required for all oral and maxillofacial surgical procedures, anesthesia and IV sedation services. ICD-10 diagnosis codes must be valid, contain the required number of characters, and be reported at the highest level of specificity based on the information available.

Electronic Claims	The diagnosis code(s) is required to be reported in Loop 2300 HI.
DDE Claims	The diagnosis code(s) is required in the applicable DDE diagnosis field.
Paper Claims	The diagnosis code(s) is required in the Remarks section.

5.5 QUANTITY

The Quantity field is available for use for both electronic (Loop 2430 SVD/DVD05) and DDE claims to report the number of dental services rendered. The quantity for dental code D0230 (Intraoral periapical, each additional film) is required for proper claim adjudication.

5.6 ORTHODONTIC BILLING INSTRUCTIONS

5.6.A. LIMITED ORTHODONTIC TREATMENT

For limited orthodontic treatment, submit a single claim for the entire limited treatment phase.

- The date of service is the banding/start date.
- Include the PA number on the claim.
- Reimbursement is made for the entire treatment time period and is considered payment in full.

5.6.B. COMPREHENSIVE ORTHODONTIC TREATMENT

Comprehensive orthodontic treatment procedure codes are used in the first stage of each comprehensive treatment phase.

Billing instructions for comprehensive orthodontic treatment are as follows:

- The date of service is the banding insertion date.
- Include the PA number on the claim.

An initial payment is made with a claim submission using the comprehensive orthodontic procedure code and subsequent payments are made bi-annually using the periodic orthodontic treatment procedure code

5.6.C. PERIODIC ORTHODONTIC TREATMENT

Billing instructions for periodic orthodontic treatment are as follows:

- The date of service is the first day of the six-month treatment period.
- The date of service cannot be the same as the banding insertion date.
- Include the PA number on the claim.
- The beginning and end dates for the entire time period should be entered in the Remarks section of the claim.
- If treatment ends prior to the completion of the six-month time period, the fee for the treatment time frame must be pro-rated.
 - The date of service is the first day of the periodic treatment time period.
 - Include the PA number on the claim.
 - The fee charged should reflect the treatment time period (e.g., if only three months are needed to complete treatment, the charges should reflect half of the current periodic orthodontic treatment fee).
 - The entire pro-rated time period is entered into the Remarks section of the claim.

When paid reimbursement to the provider has met the maximum allowable for the specific phase of treatment, no additional reimbursement will be made and the case is considered paid in full.

5.7 INTERIM CARIES ARRESTING MEDICAMENT

CDT D1354 - Interim Caries Arresting Medicament Application is billable once per date of service regardless of the number of teeth treated up to a maximum of five (5) teeth per visit. Providers are required to enter the tooth number(s)/letter(s) of all teeth treated in the comments section of the claim. There is a maximum of six applications per lifetime. Silver Diamine Fluoride can be billed on the same date of service as other fluoride applications.

SECTION 6 – REPLACEMENT CLAIMS

6.1 GENERAL INFORMATION

Replacement claims must be submitted when all or a portion of the claim was paid incorrectly or a third party payment was received after MDHHS has made payment. Both the provider NPI and beneficiary ID numbers on the replacement claim must be the same as on the original claim. Reasons claims may need to be replaced:

- To return an overpayment (report "returning money" in Remarks section);
- To correct information submitted on the original claim such as changing the date of service, tooth number or incorrect charges;
- To correct an incorrect provider NPI number or beneficiary ID number (refer to the void/cancel process below);
- To report payment from another source after MDHHS paid the claim (report "returning money" in Remarks section); and/or
- To correct information that the scanner may have misread (state reason in Remarks section).

If all service lines on a claim were rejected, the services must be resubmitted as a new claim, not a replacement claim.

6.2 CLAIM REPLACEMENT AND VOID/CANCEL CLAIMS

Instructions for submitting an electronic replacement claim are contained in the MDHHS 837D Companion Guide available on the MDHHS website. (Refer to the Directory Appendix for website information.)

A void/cancel claim must be submitted if the original claim was paid under the incorrect provider ID or beneficiary ID number.

Providers using the paper dental claim form to submit a void/cancel claim must submit a new claim. Only one service line needs to be completed with zero dollars entered in the charges or money field. All money paid on the first claim line will be deleted. Upon notification through the Remittance Advice that the money has been deleted from the Medicaid system, a new claim with the correct provider NPI number and/or beneficiary ID may be submitted.

Replacement and void/cancel claims must be sent to the address noted in the Directory Appendix for that purpose. They are not to be sent to the address utilized for initial claims.

6.3 PAYMENT REFUNDS

Return of overpayments made by MDHHS, due to either payment from a third party resource or due to an error, must be done through the use of a replacement claim or void/cancel claim. This process will result in a debit against future payment.

Medicaid Provider Manual

This requirement does not apply to inactive providers or monies being returned to MDHHS due to settlements or lawsuits. In these situations, checks must:

- be made payable to the State of Michigan in the amount of the refund
- include the provider EIN (tax) number
- be sent to MDHHS Cashier's Unit. (Refer to the Directory Appendix for contact information.)

Do not submit a replacement claim and manually send a refund to the Cashier's Unit as this results in an incorrect refund amount.

SECTION 7 – CHANGES IN ELIGIBILITY AND ENROLLMENT (FFS/CSHCS)

7.1 GENERAL INFORMATION

It is the provider's responsibility to determine eligibility/enrollment status of beneficiaries at the time services are provided and obtain the appropriate authorizations for payment.

Medicaid or Children's Special Health Care Services (CSHCS) beneficiaries may lose their eligibility or change enrollment status on a monthly basis. Enrollment status changes include beneficiaries changing from FFS (Fee-For-Service Medicaid or CSHCS) to a Medicaid Health Plan (MHP), from one health plan to another health plan, or from a health plan to FFS. Normally the change occurs at the beginning of a month; however, some changes may occur during the month. It is important that providers check beneficiary eligibility before each service is provided to determine who is responsible for payment and whether authorization is necessary. (Refer to the Beneficiary Eligibility Chapter of this manual for additional information.)

7.2 BILLING REQUIREMENTS

Providers must use the date of delivery when billing for dentures and laboratory-processed crowns. However, when a beneficiary has a change in eligibility status and services have been started for root canal therapy, dentures and laboratory-processed crowns, the provider has 30 days from the change in/loss of eligibility to complete the services. The date of service on the claim form should be the date of the initial impression for dentures and laboratory-processed crowns, or the first treatment appointment for root canal therapy.

SECTION 8 – REMITTANCE ADVICE

A Remittance Advice (RA) is produced to inform providers about the status of their claims. RAs are available in paper and electronic formats, and utilize the HIPAA-compliant national standard claim adjustment group codes, claim adjustment reason codes, and remarks codes, as well as adjustment reason codes, to report claim status. Code definitions are available from the Washington Publishing Company. (Refer to the Directory Appendix for contact information.)

8.1 PAYMENT PROCESS

MDHHS processes claims and issues payments (by check or EFT) every week unless special provisions for payments are included in the provider enrollment agreement. An RA is issued with each payment to explain the payment made for each claim. If no payment is due or claims have been rejected, an RA is also issued. If claims are not submitted for the current pay cycle or no gross adjustments are processed in the pay cycle, an RA is not generated.

If a claim does not appear on an RA within 60 days of submission, a new claim should be submitted. Providers should verify that the provider NPI number and beneficiary ID number are correct. Submitting claims prior to the end of the 60-day period may result in additional delays in claims processing for payment.

Payments to providers are issued by Tax Identification Number (TIN). All payments due to all providers enrolled with MDHHS under a specific TIN are consolidated and issued as one check or EFT.

Providers who would like to receive payments from MDHHS through EFT must register through the DTMB website. (Refer to the Directory Appendix for DMB website information.)

8.2 ELECTRONIC REMITTANCE ADVICE

The electronic RA is produced in the HIPAA-compliant ASC X12N 835 5010. Providers opting to receive an electronic RA receive all information regarding adjudicated (paid or rejected) claims in this format.

The electronic RA has many advantages:

- It can serve to input provider claim information into the provider's billing and accounting systems.
- It includes a MDHHS trace number to identify the associated warrant or electronic funds transfer (EFT) payment.
- It returns the provider's internal medical record number, line item control number, and patient control number when submitted on the original claim.
- It contains additional informational fields not available on the paper RA.

The 835 transaction corresponds to one payment device (check or EFT). All claims associated with a single TIN processed in a weekly pay cycle report on a single 835, regardless of how the claims were submitted (e.g., some paper, some electronic, multiple billing agents, etc.). Providers choosing to receive the 835 transaction must authorize a billing agent to receive the 835 per TIN. An addition of and/or change to the identification of the billing agent for the provider's 835 must be changed through their CHAMPS enrollment application.

Medicaid Provider Manual

For more information regarding the 835 these transactions. The guides are available through the Washington Publishing transactions issued by MDHHS, refer to the MDHHS 835 Companion Documents (Data Clarification Documents) on the MDHHS website. For general information about the 835, refer to the Implementation Guides for Company. (Refer to the Directory Appendix for contact information.)

8.3 PAPER REMITTANCE ADVICE

A paper RA is generated for all providers and/or billing agents who submit and process claims through CHAMPS. The RA is available online or is sent to providers only if requested through the CHAMPS PE subsystem. The RA contains three main sections: cover sheet, summary page, and detail page(s). Refer to the Forms Appendix for a sample copy of a Remittance Advice.

8.4 GROSS ADJUSTMENTS

Gross adjustments are initiated by MDHHS. A gross adjustment may pertain to one or more claims. Providers are notified in writing when adjustments are made to claims. Notification should be received before the gross adjustment appears on the RA.

The paper RA indicates gross adjustments have been made by:

- **Adjustment Reason Code:** Indicates the reason for the debit or credit memo or adjustment to payment. Standard Adjustment Reason Codes are used. Code definitions can be found in the 835 Implementation Guide.
- **Gross Adjustment Code:** This is the MDHHS gross adjustment code that corresponds to the gross adjustment description.

8.5 CLAIM ADJUSTMENT REASON/REMARK CODES

When claims are initially processed, the Claim Adjustment Reason/Remark column on the RA identifies which service lines have been paid or rejected and lists edits that apply.

If a service line is rejected, a Claim Adjustment Reason/Remark code prints in the Claim Adjustment Reason/Remark column of the RA. The provider should review the definitions of the codes to determine the reason for the rejection.

Michigan Department of Health and Human Services
Medicaid Provider Manual

For leap year, one day must be added to the number of days after February 28. The next three leap years are 2028, 2032 and 2036.

Example: Transaction Control Number (TCN) 211215010000189001 – Header TCN always ends in 000
Position 1: "2" – DDE Web Submission
Position 2: "1" – FFS Claim
Positions 3-7: "12150" – YY = 12 (for 2012) + 3-digit Julian date = "150" (May 29)
Position 8: "1" – Original Claim
Positions 9-15: "0000189" – Sequence Number
Positions 16-18: "001" – Line Number. Will begin with 001 for every new claim and increment by 1 for each claim line. Any replacement or voids claim, use the header TCN.
Header TCN always ends in 000 (211215010000189000).

Medicaid Provider Manual

SECTION 1 – GENERAL INFORMATION

This chapter applies to providers billing the NUBC or 837 institutional claim formats. It contains information needed to submit institutional claims to the Michigan Department of Health and Human Services (MDHHS) for Medicaid programs and Children's Special Health Care Services (CSHCS). It also explains how claims are processed and how providers are notified of MDHHS actions.

The following providers must use the ASC X12N 837 5010 institutional format when submitting electronic claims and the NUBC claim form for paper claims.

- Home Health Agencies
 - Hospice
 - Hospital
 - Nursing Facilities
 - Outpatient Therapy Providers*
 - Private Duty Nursing Agencies
- * Comprehensive Outpatient Rehabilitation Facilities, Outpatient Rehabilitation Agencies, CARF-Accredited Medical Rehabilitation Programs, CAA-Accredited University Graduate Education Programs

1.1 CLAIMS PROCESSING SYSTEM

All claims submitted and accepted are processed through CHAMPS. Paper claims are scanned and converted to the same file format as claims submitted electronically.

Claims processed through CHAMPS are edited for many parameters, including provider and beneficiary eligibility, procedure validity, claim duplication, frequency limitations for services, and combination of service edits. MDHHS uses the Medicaid National Correct Coding Initiative (NCCI) policies and edits. (Refer to the Directory Appendix for resource information.)

MDHHS encourages providers to send claims electronically. (Refer to the Electronic Submission Manual on the MDHHS website for additional information. Refer to the Directory Appendix for website information.) Electronic filing is more cost effective, more accurate, payment is received more quickly and administrative functions can be automated. Electronic claims submitted by Wednesday may be processed as early as the next weekly cycle.

1.2 PREDICTIVE MODELING

Predictive modeling, a pre-payment claims process in CHAMPS, uses advanced screening technology to identify Medicaid claims with billing irregularities. Claims flagged by the predictive modeling process will undergo a detailed analysis to determine the next step(s) to be taken. This may include a review of medical records and/or past claims. Providers must submit the requested records within 45 days of the date on the request for documents letter to avoid denials for lack of documentation. Records should not be submitted prior to receiving a request for documentation letter.

Requested records must be submitted through the Document Management Portal available in CHAMPS. Refer to:

- the MDHHS website for information and tutorials on the Document Management Portal.
- the Directory Appendix for Document Management Portal website information.

Medicaid Provider Manual

1.3 CLAIM PAYMENT/CLAIM STATUS

Once claims have been submitted and processed through CHAMPS, an electronic health care claim payment/advice (ASC X12N 835 5010) is sent to the designated service bureau for providers choosing an electronic RA. The CHAMPS RA is also available to providers online or is sent to providers via paper if requested through the Provider Enrollment Subsystem. (Refer to the Remittance Advice Section of this chapter for additional information about both the electronic and paper RA.)

To receive information on suspended claims, a provider-initiated 276 claim status request must be submitted and a 277 claim status response will be returned. Providers have the option to receive information on suspended claims via the CHAMPS claims inquiry screens as well.

1.4 ELECTRONIC FUNDS TRANSFER

Electronic Funds Transfer (EFT) is the method of direct deposit of State of Michigan payments into a provider's bank account. This replaces a paper warrant. To initiate an EFT, the facility should go to the Department of Technology, Management & Budget (DTMB) website. (Refer to the Directory Appendix for website information.)

Medicaid Provider Manual

SECTION 2 – HOW TO FILE CLAIMS

Institutional claims may be submitted electronically or on paper. Electronic claim submission is the preferred method for submitting claims to MDHHS.

2.1 ELECTRONIC CLAIMS

Claims submitted electronically and accepted are received directly into CHAMPS, resulting in faster payments and fewer claims that suspend or reject. (Refer to the Electronic Submission Manual on the MDHHS website for additional information. Refer to the Directory Appendix for website information.) Providers submitting claims electronically must use the ASC X12N 837 5010 institutional format. The payroll cut-off for electronic claims submission to MDHHS is Wednesday of each week.

Complete information on submission of electronic claims is available on the MDHHS website. (Refer to the Directory Appendix for website information.) The MDHHS Electronic Submission Manual and other resources, such as Companion Guides, are on the MDHHS website. Information on the website is updated as version changes occur at the national level and are adopted by MDHHS.

2.1.A. AUTHORIZED BILLING AGENTS

Any entity (service bureau or individual provider) wishing to submit claims electronically to MDHHS must enroll as an authorized billing agent. The Provider Enrollment Section of the General Information for Providers Chapter and the Trading Partners portion of the MDHHS website contain information related to the application and billing agent authorization process. (Refer to the Directory Appendix for website information.)

More than one billing agent per provider can be authorized to submit the provider's claims electronically. However, only one electronic billing agent may be the designated receiver of the electronic health care claim payment/advice ASC X12N 835 5010. Authorizations remain in effect until changed by the provider through the CHAMPS Provider Enrollment subsystem.

Any individual provider can submit claims electronically as long as the authorization process is completed and approved; however, many providers find it easier to use an existing authorized billing agent to submit claims to MDHHS. Billing agents prepare claims received from their clients, format to HIPAA-compliant MDHHS standards and submit the file to MDHHS for processing. Whether claims are submitted directly or through another authorized billing agent, providers receive a paper remittance advice (RA), which reflects their individual claims. Billing agents receive an RA that contains information on all the claims the agent submitted.

For more information on becoming an electronic biller or for a list of authorized billing agents, contact the Automated Billing Unit. (Refer to the Directory Appendix for contact information.)

Medicaid Provider Manual

2.1.B. ELECTRONIC CLAIMS WITH ATTACHMENTS

The Document Management Portal (DMP) in CHAMPS is available to upload documents. This tool allows providers and billers to submit supporting documentation electronically for Medicaid electronic claims. (Refer to the MDHHS website for information and tutorials on the Document Management Portal. Refer to the Directory Appendix for website information.)

If comments or additional information are required with an electronic claim, electronic submitters must enter the information in the appropriate segments of the electronic record. If an operative report, history and physical, prior authorization (PA), or other paper attachment is required, providers must use the Document Management Portal through CHAMPS to submit electronic attachments to MDHHS. Within the Document Management Portal, the appropriate documentation category must be chosen along with completing specified information to successfully enter the document. MDHHS does not accept paper documentation via mail for any electronic claim. The Document Management Portal process allows MDHHS to communicate directly with providers to resolve claim attachment issues prior to finalizing claim adjudication.

Consent forms (Consent for Sterilization [MSA-1959/HHS-687] and Acknowledgement of Receipt of Hysterectomy Information [MSA-2218]) must be submitted through the Document Management Portal. If submitted via facsimile, consent forms must be sent accompanied by the appropriate fax cover sheet. (Refer to the Forms Appendix for copies of the forms and to the Directory Appendix for website information.) MDHHS will notify the submitter of the status of their consent review within seven business days. Once the consent forms are approved and entered, it is not necessary to submit additional copies when billing for sterilization or hysterectomy services. All consent forms must be submitted through the Document Management Portal.

Electronic submitters must:

- Include the notation "Documents uploaded in DMP" in the Claim Note area (NTE02 Segment, Loop 2300) and Reference Code "ADD" (NTE01 Segment, Loop 2300) within the electronic claim.
- Comply with all standard HIPAA reporting requirements, including using Claim Adjustment Segment (CAS) codes when submitting secondary or tertiary claims.

Refer to the MDHHS website for Document Management Portal instructions. (Refer to the Directory Appendix for website information.)

2.2 PAPER CLAIMS

The National Uniform Billing Committee (NUBC) UB-04 claim form must be used when submitting paper claims. It must be a red-ink form with UB-04 CMS-1450 in the lower left corner. Use of forms other than the red ink version will result in errors when they are scanned by the Optical Character Reader (OCR). Providers are encouraged to bill electronically whenever possible.

Claims may be prepared on a typewriter or on a computer. Handwritten claims are not accepted. Because claims are optically scanned prior to processing, print or alignment problems may cause

Medicaid Provider Manual

misreads, thus delaying processing of the claim. Keep equipment properly maintained to avoid the following:

- Dirty print elements with filled character loops.
- Light print or print of different density.
- Breaks or gaps in characters.
- Ink blotches or smears in print.
- Worn out ribbons.

Dot matrix printers should not be used as they result in frequent misreads by the OCR.

Questions and problems with the compatibility of equipment with MDHHS scanners should be directed to MDHHS Provider Inquiry. (Refer to the Directory Appendix for contact information.)

Paper claims should appear on a remittance advice (RA) within 60 days of submission. Do not resubmit a claim prior to the 60-day period.

2.2.A. GUIDELINES TO COMPLETE PAPER CLAIM FORMS

To ensure that the scanner correctly reads claim information, adhere to the following guidelines in preparing paper claims. Failure to adhere to these guidelines may result in processing/payment delays or claims being returned unprocessed.

- Date of birth must be eight digits without dashes or slashes in the format MMDDCCYY (e.g., 03212002). All other dates must be six digits in the format MMDDYY. Be sure the dates are within the appropriate boxes on the form.
- Use only black ink.
- Do not write or print on the claim, except for the Provider Signature Certification.
- Handwritten claims are not acceptable.
- UPPER CASE alphabetic characters are recommended.
- Do not use italic, script, orator, or proportional fonts.
- 12-point type is preferred.
- Make sure the type is even (on the same horizontal plane) and within the boxes.
- Do not use punctuation marks (e.g., commas or periods).
- Do not use special characters (e.g., dollar signs, decimals, or dashes).
- Only service line data can be on a claim line. Do not squeeze comments below the service line.

Medicaid Provider Manual

- Do not send damaged claims that are torn, glued, taped, stapled, or folded. Prepare another claim.
- Do not use correction fluid or correction tape, including self-correction typewriters.
- If a mistake is made, the provider should start over and prepare a clean claim form.
- Do not submit photocopies.
- Claim forms must be mailed flat, with no folding, in 9" x 12" or larger envelopes.
- Put a return address on the envelope.
- Separate the claim form from the carbon.
- Separate each claim form if using the continuous forms and remove all pin drive paper completely. Do not cut edges of forms.
- Keep the file copy.
- Mail NUBC claim forms separate from any other type of form.

2.2.B. PROVIDING ATTACHMENTS WITH PAPER CLAIM FORMS

When a claim attachment(s) is required, it must be directly behind the claim it supports and be identified on each page with the beneficiary's name and Medicaid ID number. Attachments must be on 8 1/2" x 11" white paper and one-sided. Do not submit two-sided material. Multiple claims cannot be submitted with one attachment. Each claim form that requires an attachment must have a separate attachment. Do not staple or paperclip the documentation to the claim form.

Mail claim forms with attachments flat, with no folding, in a 9" x 12" or larger envelope and print "Ext. material" (for extraneous material) on the outside. Do not put claims that have no attachments in this envelope. Mail claims without attachments separately. Do not send attachments unless the attachment is required as unnecessary attachments delay claim processing.

Claim attachments, such as medical records and EOBs, may be associated to a paper claim via the Document Management Portal. (Refer to the Directory Appendix for website information.)

Once confirmation is received that the consent forms are approved, it is not necessary to submit additional copies when billing for sterilization or hysterectomy services. The notation "Consent form sent via Document Management Portal" must be included in the Remarks section of the paper claim.

Refer to the MDHHS website for Document Management Portal instructions, including fax requirements. (Refer to the Directory Appendix for website information.)

2.2.C. MAILING PAPER CLAIM FORMS

All paper claim forms and claim forms with attachments must be mailed to MDHHS. (Refer to the Directory Appendix for contact information.)

Medicaid Provider Manual

2.3 REPORTING PROVIDER NPI

MDHHS requires that NPI numbers be reported in any applicable provider loop or field (e.g., attending, billing, referring, and rendering) on the claim. A provider's Taxpayer Identification Number (TIN) will also be used for claim adjudication. Both the NPI and the TIN or Employer Identification Number (EIN) must be reported at the billing provider loop for all electronic claims. For the UB-04 paper claim form, the TIN must be reported in Form Locator 5.

A Type 1 (Individual) NPI is the number associated with an individual healthcare professional (e.g., MD, DDS, CRNA, etc.). The individual may be a sole proprietor or be employed by a clinic, group practice, or other organization. If a sole proprietor, the Type 1 NPI must be reported in the billing provider loop or field of the claim for payment.

A Type 2 (Organization) NPI is the number required for organizations (such as clinics, group practices, and incorporated individuals) who provide healthcare services and receive payment. For MDHHS, the Organization NPI must be reported in the billing provider loop or field. Also for dental and professional claims, the appropriate Type 1 (Individual) NPI of the specific provider performing the service must be reported in the rendering provider loop or field for proper claim adjudication. Do not enter the Type 2 (Organization) NPI as the rendering provider.

MDHHS NPI claim editing will be applied to the attending, billing, referring and rendering provider as applicable. A claim cannot be paid if the NPI is missing or the reported NPI is invalid as it does not check digit and/or correctly crosswalk to the Provider Enrollment files for these provider loops or fields.

2.3.A. BILLING PROVIDER

The billing provider loop or field is mandatory to complete on all claims. The billing provider must be enrolled with the program for payment. If the billing provider NPI reported is an invalid number and/or represents a non-enrolled provider, the entire claim will be denied for payment.

2.3.B. ATTENDING PROVIDER

The attending provider NPI is a requirement for all claims submitted within the institutional claim format with one exception. Hospital-owned ambulance Medicaid-enrolled providers submitting Emergency Ambulance Transport claims may report the attending provider NPI, however, completion of this field is not required. For all institutional claims, the attending provider must be Medicaid enrolled. If the attending provider information is not reported on the claim or if the provider is not enrolled in the Michigan Medicaid program, the claim cannot be paid.

Rendering providers should ensure their referral sources are aware of this requirement.

2.3.C. REFERRING PROVIDER

If a referring provider is required to be submitted, use the appropriate Form Locator field for claim completion.

SECTION 3 – REPLACEMENT, VOID/CANCEL CLAIMS AND REFUND OF PAYMENT

3.1 REPLACEMENT CLAIMS (ADJUSTMENTS)

Replacement claims are submitted when all or a portion of the claim was paid incorrectly or a third-party payment was received after MDHHS made payment. When replacement claims are received, MDHHS deletes the original claim and replaces it with the information from the replacement claim. It is very important to include all service lines on the replacement claim, whether they were paid incorrectly or not. All money paid on the first claim will be recouped and payment will be based on information reported on the replacement claim only. Examples of when a claim may need to be replaced:

- To return an overpayment (report "returning money" in Remarks section);
- To correct information submitted on the original claim (other than to correct the provider NPI number and/or the beneficiary ID number). Refer to the Void/Cancel subsection below;
- To report payment from another source after MDHHS paid the claim (report "returning money" in Remarks section); and/or
- To correct information that the scanner may have misread (state reason in Remarks section).

To replace a previously paid claim, indicate 7 (xx7) as the third digit in the Type of Bill Form locator frequency. Providers must enter the 18-digit Transaction Control Number (TCN) of the last approved claim being replaced and the reason for the replacement in Remarks. The provider NPI number and beneficiary ID number on the replacement claim must be the same as on the original claim. Providers must enter in Remarks the reason for the replacement. Refer to the Void/Cancel subsection below for additional information.

3.2 VOID/CANCEL A PRIOR CLAIM

If a claim was paid under the wrong provider NPI or beneficiary ID Number, providers must void/cancel the claim. To void/cancel the claim, indicate an 8 in the Type of Bill (xx8) as the third digit frequency. The 8 indicates that the bill is an exact duplicate of a previously paid claim, and the provider wants to void/cancel that claim. The provider must enter the 18-digit TCN of the last approved claim or adjustment being cancelled and enter in the Remarks section the reason for the void/cancel. A new claim may be submitted immediately using the correct provider NPI or beneficiary ID number.

A void/cancel claim must be completed exactly as the original claim.

3.3 REFUND OF PAYMENT

Return of overpayments made by MDHHS, due to either payment from a third party resource or due to an error, must be done through the use of a replacement claim or void/cancel claim. This process will result in a debit against future payment.

This requirement does not apply to inactive providers or monies being returned to MDHHS due to settlements or lawsuits. In these situations, checks must:

- be made payable to the State of Michigan in the amount of the refund;
- include the provider EIN (tax) number; and

Medicaid Provider Manual

- be sent to the MDHHS Cashier's Unit. (Refer to the Directory Appendix for contact information.)

Do not submit either a replacement claim or a void/cancel claim and manually send a refund to the Cashier's Unit as this will result in an incorrect amount.

SECTION 4 – CHANGES IN ELIGIBILITY/ENROLLMENT (FFS/MHP/CSHCS)

It is the provider's responsibility to determine eligibility/enrollment status of patients at time of treatment and obtain the appropriate authorizations for payment.

Medicaid or CSHCS beneficiaries may lose eligibility or change enrollment status on a monthly basis. Enrollment status changes include beneficiaries changing from FFS (FFS Medicaid or CSHCS) to a Medicaid Health Plan (MHP), from one health plan to another health plan, or from a health plan to FFS. Normally the change occurs at the beginning of a month; however, some changes may occur during the month. (Refer to the Beneficiary Eligibility Chapter of this manual for additional information.) It is important that providers check beneficiary eligibility before each service is provided to determine who is responsible for payment and whether PA is necessary.

4.1 MDHHS ADMISSION NOTIFICATION – HOSPITALS

It is vital that hospital providers complete admission/enrollment and discharge/disenrollment information in a timely manner in CHAMPS in order to maintain an accurate roster, as well as to ensure that beneficiaries have the correct PET and benefit plans assigned for correct payments.

Hospitals must submit facility admissions via CHAMPS for the following beneficiaries:

- Medicaid deductible beneficiaries (regardless of the length of stay).
- Medicaid eligible beneficiaries if their stay is expected to be 30 days or greater.
- Private Pay admission if applying for Medicaid (regardless of length of stay).

Refer to the Beneficiary Eligibility Chapter for additional information about the admission process through CHAMPS.

4.2 AUTHORIZATION OF ADMISSIONS AND SERVICES [CHANGE MADE 7/1/2025]

The following guidelines are intended to assist providers and health plans with common concerns regarding authorization of services and payment responsibility, particularly when a change in enrollment status has occurred.

- All admissions (other than emergency admissions) require PA. The MDHHS Program Review Division (PRD) must authorize medical/surgical (non-psychiatric) admissions for FFS beneficiaries. If the beneficiary is enrolled in a MHP, the health plan must prior authorize the admission. All psychiatric admissions must be authorized by the local Prepaid Inpatient Health Plan (PIHP)/Community Mental Health Services Program (CMHSP).
- Services provided during the inpatient admission may also require PA for health plan enrollees. Providers must be aware of the beneficiary's enrollment status and of health plan requirements and processes for authorization. Consultations, surgical procedures, and diagnostic tests are not reimbursed unless a health plan's PA process is followed.
- If a beneficiary is admitted by the local PIHP/CMHSP, the admission and all psychiatric services are the responsibility of the PIHP/CMHSP. However, for beneficiaries enrolled in a MHP, any non-psychiatric medical/surgical services needed during a psychiatric admission are the responsibility of the health plan and must be authorized by the health plan. For FFS beneficiaries, the non-

Medicaid Provider Manual

psychiatric medical/surgical services should be billed to MDHHS. This includes transportation to another facility for medical/surgical services. If a beneficiary is admitted for medical/surgical services authorized by the health plan and needs psychiatric consultation or care, the initial mental health assessment will be the responsibility of the health plan. The PIHP/CMHSP must be contacted for authorization of subsequent psychiatric services and is then responsible for payment for the psychiatric services.

- If a beneficiary is admitted to an acute care inpatient hospital facility and the enrollment status changes during the admission (e.g., a FFS beneficiary enrolls in a MHP), the payer at the time of admission is responsible for payment for all services provided until the date of discharge. Services provided after discharge are the responsibility of the new payer. The discharge planning process should include the new payer for authorization of any medically necessary services or treatments required after discharge from the hospital.
- If a beneficiary is transferred from one acute care inpatient hospital to another acute care inpatient hospital, this does not constitute a discharge. The payer at admission is the responsible party until the beneficiary is discharged from the acute care inpatient hospital setting to a non-acute care inpatient hospital setting.
- If a beneficiary is transferred from an acute care inpatient hospital to an inpatient rehabilitation hospital or a long term acute care hospital (LTACH), this constitutes a discharge. The new payer assumes payment responsibility upon admission to the inpatient rehabilitation hospital or LTACH.

Change in Setting	Payer Responsibility in New Setting
Acute care inpatient hospital to another acute care inpatient hospital	Payer at admission remains the responsible party while the beneficiary is in the acute care inpatient hospital level setting. Exception: CSHCS enrollment.
Acute care inpatient hospital to inpatient rehabilitation hospital or LTACH	New payer is responsible party upon admission to the inpatient rehabilitation hospital or LTACH.
Inpatient rehabilitation hospital or LTACH to acute care inpatient hospital	New payer is responsible party upon admission to the acute care inpatient hospital.

The following examples illustrate payment responsibilities:

FFS to Health Plan	A FFS beneficiary is admitted on 9-15, enrolled in a health plan on 10-1, and discharged from the hospital on 10-5. The health plan is not responsible for services until 10-5, after discharge. FFS is responsible for the entire admission and physician services provided during the admission. The health plan must be contacted at discharge to transition care needs and authorize services needed after discharge, such as rental of equipment, ongoing medical supply needs, ongoing treatment (e.g., home health care, physical therapy, chemotherapy, IV infusion), etc.
Health Plan to Health Plan	If a beneficiary is in health plan "A" during September and changes to health plan "B" for October, health plan "A" is responsible for the admission. Health plan "B" must be contacted during the discharge planning process and is responsible for authorizing all services needed after discharge.

Medicaid Provider Manual

Health Plan to Health Plan with Transfer to Tertiary Hospital	A beneficiary enrolled in health plan "A" is admitted for authorized surgery in June. The beneficiary is enrolled in health plan "B" on July 1. After surgery, the beneficiary develops complications necessitating a transfer to a tertiary hospital on July 2. The beneficiary is subsequently discharged to home on July 6. Plan "A" is responsible for all hospital and physician services through July 6, and plan "B" is responsible for all services needed after discharge.
Hospitalization for Medical Reasons During an Inpatient Psychiatric Stay	A health plan beneficiary is admitted for inpatient psychiatric care by a PIHP/CMHSP. During the admission, the patient requires surgery for medical reasons at another facility. The beneficiary's health plan must authorize the surgery and is responsible for paying for transport between the facilities and for charges related to the surgery.

(text deleted 7/1/2025)

Providers are advised to check the eligibility response for changes in enrollment status prior to billing. (Refer to the Beneficiary Eligibility Chapter for additional information.)

4.3 ONGOING SERVICES AND EXTENDED TREATMENT PLANS

Providers are responsible for verifying a beneficiary's eligibility/enrollment status before each service is rendered, particularly on the first day of a new month. Even though a beneficiary may be involved in an ongoing treatment or care plan, a change in enrollment status requires new authorization from the new responsible party. Enrollment in a health plan always triggers an authorization process through the new or "current" health plan. There is no requirement for a new health plan to reimburse providers for services that were authorized under a previous health plan. The new health plan must assess the need for continuing services and authorize, as appropriate. Health plans should facilitate the transition between providers to ensure continuity of care for the beneficiary.

The following are examples of situations that may occur while providing care to an eligible beneficiary:

FFS to Health Plan	A beneficiary is in FFS in June. On June 15, MDHHS authorizes a breast reconstruction after mastectomy for breast cancer. The surgery is scheduled for July 20. On July 1, the beneficiary is enrolled in a health plan with the same primary care provider and surgeon. The surgeon must follow the health plan process for authorization of the reconstructive surgery, as the health plan is now the payer, not FFS. MDHHS authorization would be void.
Voluntary Health Plan Change During a Course of Treatment	A beneficiary is in health plan "A" in July and is involved in a course of physical therapy (PT). The therapy program was authorized for six weeks. On August 1, the beneficiary changes enrollment to health plan "B" and still has two more scheduled weeks of PT. Before PT can continue, the provider must obtain a new authorization from health plan "B." Ideally, as a plan-to-plan change occurs at the request of the beneficiary, the provider would coordinate the transition to the new plan, maintain continuity of care, and have an authorization in place from plan "B" so the ongoing PT is not interrupted. However, if PT continues without new plan "B" authorization, plan "A" is not responsible and plan "B" may or may not honor the treatment. Providers cannot bill the beneficiary as the services are covered and it is the provider's responsibility to verify eligibility/enrollment changes and obtain any necessary authorization.

Medicaid Provider Manual

4.4 DURABLE MEDICAL EQUIPMENT [TITLE REVISED & CHANGE MADE 7/1/2025]

MDHHS policy directs providers to bill the date of delivery for durable **medical (text revised 7/1/2025)** equipment. However, when a beneficiary has a change in enrollment status and the responsible payer is different on the date of delivery than on the date of order, providers must bill the date of order and specify the date of delivery in the comments/remarks section. This is especially important when a person changes from FFS to a health plan.

SECTION 5 - PROVIDER PREVENTABLE CONDITIONS (PPCs)

5.1 REPORTING AND NON-PAYMENT FOR PROVIDER PREVENTABLE CONDITIONS (PPCs)

Provider Preventable Conditions (PPCs) addresses both hospital and non-hospital conditions identified by MDHHS for non-payment. PPCs are defined as Health Care Acquired Conditions (HCACs) and Other Provider Preventable Conditions (OPPCs). Medicaid providers are required to report the occurrence of a PPC and are prohibited from payment.

5.2 HEALTH CARE ACQUIRED CONDITIONS (HCAC) – INPATIENT HOSPITAL

MDHHS follows Medicare's policy on reporting Present on Admission (POA) indicators on inpatient hospital claims and non-payment for HCACs. Acute care hospitals and Critical Access Hospitals (CAHs) are required to report whether a diagnosis on a Medicaid claim is present on admission. Claims submitted without the required POA indicators are denied. For claims containing secondary diagnoses that are included on Medicare's most recent list of HCACs and for which the condition was not present on admission, the HCAC secondary diagnosis is not used for DRG grouping. That is, the claim is paid as though any secondary diagnoses (HCAC) were not present on the claim.

POA is defined as "present" at the time the order for inpatient admission occurs. Conditions that develop during an outpatient encounter, including emergency department, observation, or outpatient surgery, are considered Present on Admission. A POA indicator must be assigned to principal and secondary diagnoses.

Providers should refer to the CMS Medicare website for the most up to date POA reporting instructions and list of HCACs ineligible for payment.

5.3 OTHER PROVIDER PREVENTABLE CONDITIONS (OPPCs) – OUTPATIENT

Medicaid follows the Medicare guidelines and national coverage determinations (NCDs), including the list of HAC conditions, diagnosis codes and OPPCs.

Conditions currently identified by CMS include:

- wrong surgical or other invasive procedure performed on a patient;
- surgical or other invasive surgery performed on the wrong body part; and
- surgical or other invasive procedure performed on the wrong patient.

5.4 NON-PAYMENT AND REPORTING REQUIREMENTS PROVIDER PREVENTABLE CONDITIONS (PPCs) – INPATIENT

MDHHS follows the Medicare billing guidelines on how to bill a no-pay claim, reporting the appropriate Type of Bill (TOB 110) when the surgery/procedure related to the NCDs service/procedure (as a PPC) is reported.

Medicaid Provider Manual

If covered services/procedures are also provided during the same stay, MDHHS follows Medicare's billing guidelines requiring hospitals submit two claims: one claim with covered services, and the other claim with the non-covered services/procedures as a non-pay claim. Inpatient hospitals must appropriately report one of the designated ICD diagnosis codes for the PPC on the no-pay TOB claim. MDHHS follows the Medicare billing guidelines on how to bill a no-pay claim, reporting the appropriate Type of Bill (TOB 110) when the surgery/procedure related to the NDC service/procedure (as a PPC) is reported.

5.5 NON-PAYMENT AND REPORTING REQUIREMENTS OTHER PROVIDER PREVENTABLE CONDITIONS (OPPCs) — OUTPATIENT

Medicaid follows the Medicare guidelines and NCDs, including the list of HAC conditions, diagnosis codes and OPPCs. Outpatient providers must use the appropriate claim format, TOB and follow the applicable NCD/modifier(s) to all lines related to the surgery(s).

Medicaid Provider Manual

SECTION 6 – HOSPITAL CLAIM COMPLETION – INPATIENT

Information in this section should be used in conjunction with the National Uniform Billing Committee (NUBC) Manual when preparing hospital claims. The MDHHS website contains additional billing information (i.e., MDHHS Institutional Billing Resource document). (Refer to the Directory Appendix for website information.)

The following references unique billing requirements for completing inpatient claims.

6.1 ACCOMMODATIONS

Hospitals must use the appropriate revenue code that best indicates the type of room the beneficiary occupied.

Personal comfort and convenience items (e.g., telephone, television) are not covered by Medicaid and cannot be used to offset the beneficiary-pay amount. Charges for these services must not be included on the claim.

6.1.A. INTENSIVE CARE

Refer to the NUBC Manual for the specific cost center for a specific type of intensive care unit and the definitions and report the most appropriate revenue code. The MDHHS website contains additional billing information (i.e., MDHHS Institutional Billing Resource document). (Refer to the Directory Appendix for website information.)

6.2 SPECIAL BILLING

6.2.A. GENERAL INFORMATION

Coding	<p>All unlisted or not otherwise classified (NOC) codes require an explanation of the service/item provided. The explanation may be entered in the Remarks Section or may be provided as a claim attachment. Do not re-code procedure codes submitted to Medicare or other insurers to unlisted or NOC codes when billing Medicaid unless MDHHS does not cover the procedure code. When Medicaid covers the procedure code, providers must submit the same procedure code to Medicaid that was submitted to the other payer to ensure proper reimbursement.</p> <div>Claims will be rejected for inappropriate recoding even if PA was issued by MDHHS.</div>
Diagnosis Coding	<p>Use ICD coding conventions to report the diagnosis code(s) at the highest level of specificity and with the correct number of digits. If a code requires additional digits, the claim will reject.</p>

Medicaid Provider Manual

Prior Authorization	For elective services requiring PA, authorization must be obtained prior to providing services. Do not submit the letter with your claim; however, you must report the PA number appropriately (form locator, segment) when billing for the PA services.
National Uniform Billing Committee Manual	This manual may be purchased from the American Hospital Association, National Uniform Billing Committee. (Refer to the Directory Appendix for contact information.) Data elements used in the paper UB-04 are also used in the electronic claim standard required by the Health Insurance Portability and Accountability Act of 1996 (HIPAA). (Refer to the Directory Appendix for contact information.)

6.2.B. CHANGES IN FACILITY OWNERSHIP DURING A BENEFICIARY'S INPATIENT STAY

When a change in facility ownership occurs during a beneficiary's inpatient stay, the owner on the date of admission should submit a claim for all inpatient hospital services for the beneficiary regardless of when the admission began and ended. The National Provider Identifier (NPI) of the hospital facility on the date of admission is the applicable billing NPI for claims to Medicaid.

Claims must include necessary information for Medicaid to compute the payment amount, whether or not some of the services occurred during a period when a different party legally owned the hospital. Payments are not prorated between the buyer and seller.

6.2.C. SPECIAL CIRCUMSTANCES FOR HOSPITAL READMISSIONS AND TRANSFERS

Neonatal Intensive Care Unit (NICU) Return Transfers	<p>Stabilized infants from NICUs may transfer back to the hospital from which the infant was originally transferred. Transfers may be authorized, with parental consent, to another community hospital when the original facility is at capacity or not closely located to the patient's home.</p> <p>A Prior Authorization Certification Evaluation Review (PACER) must be authorized through the MDHHS PRD for elective transfers between hospitals. NICU return transfer requests for continued medical care at a lower acuity hospital will be authorized if a neonatologist provides a written order to transfer to the originating or community hospital for bonding, teaching, and growth. Existing hospital and ambulance transfer reimbursement methodology will be utilized when prior authorization is granted.</p>
Readmissions (DRG Hospitals Only)	<p>Under the fee for service DRG reimbursement system, payment is intended to include all services required to treat the beneficiary. The DRG system is designed to carefully monitor and control readmissions.</p> <p>MDHHS defines a readmission as any admission within 15 days of a previous discharge, whether the readmission is to the same or a different hospital.</p> <p>Example: If a beneficiary is discharged on November 13, 2009 and is readmitted before November 28, 2009, this is considered a readmission within 15 days. (Count the day of the original discharge and the day of readmission.) If the beneficiary is discharged on November 13, 2009 and is readmitted on November 28, 2009, this is considered a new admission. (The beneficiary is discharged and is readmitted after 15 days have elapsed.)</p> <p>MDHHS PRD reviews hospital claims on a pre-payment basis and on a post-payment basis to determine the appropriateness of readmissions. If MDHHS determines that a readmission within 15 days was inappropriate, monies are recovered from the hospital.</p>

Medicaid Provider Manual

Readmission within 15 days to the Same Hospital (Unrelated Readmission)	<p>If a beneficiary is readmitted to the same hospital within 15 days for a condition(s) unrelated to the previous admission (e.g., gall bladder removal, injuries due to a car accident), Medicaid considers the case a new admission for payment purposes.</p> <ul style="list-style-type: none">▪ The provider must submit two separate claims to assure appropriate processing.▪ A claim for the first admission must be submitted and paid prior to submission of the readmission claim.▪ When completing the second (readmission) claim, the hospital must indicate the PACER number in the treatment authorization field and Occurrence Span Code 71 with "from" and "through" dates from the previous admission.
Readmission within 15 days to the Same Hospital (Related Admission)	<p>If a beneficiary is readmitted to the same hospital within 15 days for a related (required as a consequence of the original admission) condition, Medicaid considers the admission and the related readmission as one episode for payment purposes. The related admissions must be combined on a single claim. No PACER number is issued for continuation of care.</p> <ul style="list-style-type: none">▪ Revenue code 0180 is used for the days the beneficiary was not in the hospital.▪ Enter the number of leave days in the service units field.▪ Leave the rate and total charges blank.▪ Include the leave day units in the total units field.▪ Report Occurrence Span Code 74 with "from" and "through" dates of the leave of absence.▪ If the original admission has been submitted and paid, a replacement claim must be submitted that contains the combined services for the original admission and the readmission.
Readmission within 15 days to a Different Hospital	<p>Enter the PACER number in the treatment authorization field and Occurrence Span Code 71 with "from" and "through" dates from the previous admission.</p>
Transfers	<p>Authorization for a transfer is granted only if the transfer is medically necessary and the care/treatment is not available at the transferring hospital. Transfer for convenience is not considered. Authorization should be obtained by the next business day for emergent/urgent transfers.</p> <ul style="list-style-type: none">▪ The receiving hospital enters the PACER number of the approved transfer in the treatment authorization field.▪ Submission of documentation with the claim is not required when billing transfers.

6.2.D. FISCAL YEAR-END/INTERIM BILLING (DRG HOSPITALS ONLY)

Hospitals reimbursed under the DRG system generally cannot submit interim billings. The hospital must wait until the beneficiary is discharged and then bill for all services on one claim. However, if a beneficiary has been continuously hospitalized for at least one year and is expected to remain hospitalized for at least another six months, the hospital may submit a claim as if the beneficiary has been discharged. At least every three months thereafter, the hospital should submit a replacement claim which alters the date

Medicaid Provider Manual

of discharge and increases the charges. The Remarks Section of the replacement claim must indicate the reason for filing (i.e., interim billing due to extended length of stay).

6.2.E. GENDER/DIAGNOSIS CONFLICT

Medical services are available to beneficiaries based on medical need regardless of how the beneficiary identifies or expresses for gender. Claims and encounters for some services may be inadvertently denied or rejected due to sex-specific editing unless billed properly.

Report institutional claims and encounters for services that may pose a gender/diagnosis/procedure conflict or may be subject to related mismatch edits with claim level condition code 45 Ambiguous gender category.

Fee-for-Service claims may also be reported with a diagnosis code from the gender identity category (F64), and these will suspend for review and payment.

6.2.F. HYSTERECTOMY

To encourage electronic billing and reduce administrative burden, MDHHS allows for submission of the Acknowledgement of Receipt of Hysterectomy Information form (MSA-2218) via fax. (Refer to the Forms Appendix for additional information.) This form must be submitted to Medicaid before reimbursement can be made for any hysterectomy procedure. Submitting this form via fax can eliminate submitting paper attachments for hysterectomy claims and pre-confirms the acceptability of the completed acknowledgement form, as well as reduces costly claim rejections.

The provider who obtains the required acknowledgement and completes the MSA-2218 may fax the completed form, along with a cover sheet, to the Medicaid Payments Division. The form is reviewed within five working days. Either an explanation of errors or notice that the form has been accepted and is on file is returned to the submitting provider. When the provider receives notice that the form is accepted and on file, all invoices related to the service may be submitted without attachments.

The procedure for approval of the acknowledgement form is:

- Complete a cover sheet (typed or printed) which must include beneficiary name, beneficiary Medicaid ID number, provider's contact person, provider fax number, and provider phone number.
- Fax the cover sheet and completed acknowledgement form to Hysterectomy Acknowledgement Form Approval. (Refer to the Directory Appendix for contact information.) Do not fax claims.
- Wait for a response. When notified that the acknowledgement form has been accepted and is on file, inform the other providers via a copy of the response.
- If there is no response within five working days, confirm that the fax is working. Be sure that the cover sheet included the necessary information for Medicaid staff to contact the provider. Resend the information if necessary.

Medicaid Provider Manual

- All providers may then submit claims (either electronic or hard copy) to Medicaid. The Remarks Section or Comment Record must include the statement "Acknowledgement on File."
- When hysterectomy claims are received with this information in the Remarks, acknowledgement form edit requirements are forced if the submitted invoice matches the acknowledgement form on file.

This process is an option. Providers may continue to attach a copy of the acknowledgement form to the claim without going through this pre-approval process. If a paper copy of the MSA-2218 is attached with the claim, indicate "submitted attachment" in the Remarks Section.

When billing for a hysterectomy performed during a beneficiary's period of retroactive eligibility, indicate in the Remarks section "MSA-2218 not completed. Not eligible on date of service." Also indicate the beneficiary was informed prior to the hysterectomy that the service would render them incapable of reproducing.

When billing for a beneficiary that was sterile prior to the hysterectomy, the Acknowledgement of Receipt of Hysterectomy Information form is not required. The Remarks field of the claim must indicate "Beneficiary sterile prior to hysterectomy" along with the cause/procedure that rendered them sterile.

6.2.G. LOSS/GAIN MEDICAID ELIGIBILITY

Under the DRG system, hospitals must wait until a beneficiary is discharged and then bill all services on one claim. Hospitals generally cannot split-bill DRG claims. If a beneficiary loses or gains Medicaid eligibility during a hospital stay, the hospital must bill only for the Medicaid eligible days as follows:

- The "from" and "through" dates must reflect only the days of Medicaid eligibility.
- The patient status code must reflect the actual status of the entire admission.
- The Remarks section must indicate that the beneficiary was Medicaid eligible for a portion of the hospital stay.
- The admission date must reflect the date the order to admit the beneficiary was written.

When Medicaid eligibility is determined retroactively, "Retroactive Eligibility" must be entered in the Remarks section of the inpatient hospital claim.

6.2.H. MEDICARE

For Medicare Parts A and B/Medicaid claims, Medicaid only pays up to a Medicare-enrolled beneficiary's obligation to pay (i.e., coinsurance, deductible) or the Medicaid DRG, whichever is less. Medicaid payment does not include capital and direct medical education.

Due to the nature of DRG calculations, the following instructions must be used when completing an inpatient hospital claim:

Medicaid Provider Manual

- All Medicare and other insurance payment information should be indicated on the claim which contains the Patient Status code that indicates the beneficiary has been discharged from the facility. If the inpatient service requires two claims, payment information (e.g., total other insurance payment, Medicare coinsurance and deductible) must be included on the claim for the last date of service for the inpatient stay. Interim claims should not reflect a payment.
- Medicare Part A and Part B charges must be combined on one claim.
- When a beneficiary has Medicare Part B only, this must be reflected in the Remarks section of the claim. Additionally, the claim must reflect the 20 percent amount due from Medicaid. The Medicare Part A and Part B payment is the 80 percent of the allowable charges covered by Medicare for Part B services.

For Medicaid reimbursement, the amount billed for services does not equal the sum of the coinsurance and deductible items. It must be calculated as the gross hospital charges **minus** all Medicare payments, **minus** other insurance payments, and **minus** any patient-pay and/or copayment amount. If a claim is submitted with the amount billed equal to zero, other payment greater than or equal to Medicaid's payment, or a negative amount, Medicaid does not make a payment. If there is a balance to be billed to Medicaid, the hospital may bill Medicaid for covered services only.

For Medicare Part B/Medicaid claims where Medicare Part A is exhausted, Medicaid pays up to the beneficiary's financial obligation to pay or the Medicaid DRG (or per diem rate) less the total amount paid by all other payers, whichever is less. Medicaid reimbursement includes capital and direct medical education (made at final settlement).

Medicare Part A Exhausted Prior to Stay	<ul style="list-style-type: none">▪ Report Type of Bill 0111 and enter occurrence code A3 and the date when Medicare Part A is exhausted.▪ Noncovered days must be reflected on the claim to be paid correctly.▪ Medicare Part B payment must be reflected on the claim.
Medicare Part A Exhausted During Stay	<ul style="list-style-type: none">▪ Report Type of Bill 0111 and enter occurrence code A3 and the date when Medicare Part A is exhausted.▪ Noncovered days must be reflected on the claim to be paid correctly.▪ The Medicare payment must be reflected on the claim.▪ Report value code A2 (coinsurance).

Medicaid Provider Manual

Medicare Part A Becomes Effective During Stay

- Enter occurrence code A2 and the date when Medicare Part A becomes effective.
- Noncovered days must be reflected on the claim to be paid correctly.
- The Medicare payment must be reflected on the claim.
- Report amount applied to coinsurance, copay or deductible [OI and Medicare (Inpatient, Outpatient, LTC, Home Health, Hospice)].
 - For DOS prior to July 1, 2007 – electronic/paper claims: Value Code A1, B1, C1, A2, B2, C2, A7, B7, C7 and amount
 - For DOS on/after July 1, 2007:
 - ◆ Electronic claims: use CAS segments only
 - ◆ Paper claims: use only Value Codes (A1, B1, C1, A2, B2, C2, A7, B7, C7 and amount)

6.2.I. MULTI-PAGE CLAIM (PAPER CLAIM)

Inpatient hospitals can report charges on multiple pages when services exceed more than 22 lines. MDHHS is unable to accept multiple-page paper claims for all institutional providers (Inpatient, Outpatient, LTC, Home Health, Hospice). Providers are encouraged to bill electronically whenever possible for faster payment.

6.2.I.1. INITIAL CLAIM

Refer to the NUBC Manual for reporting multiple pages (on line 23) and total charges.

6.2.I.2. CLAIM REPLACEMENT

Refer to the NUBC Manual for submitting a claim replacement TOB. Enter the 18-digit Transaction Control Number (TCN) of the last approved claim being replaced in the appropriate FL or loop/segment if billing electronically.

When information which affects the entire claim needs to be corrected (i.e., diagnosis coding, other insurance payments, etc.), replace only the claim with an approved dollar amount greater than zero. The DRG assignment and/or amount approved may be changed.

6.2.J. NEWBORN ELIGIBILITY

All newborn services must be billed under the newborn's ID number. The hospital must not bill under the mother's ID number. If an ID number has not been assigned prior to or at the time of delivery, the State's Electronic Birth Certificate (EBC) system is the preferred method of adding Medicaid coverage and assigning a MHP to newborns with mothers who are Medicaid beneficiaries. This process is the most efficient way for hospitals to obtain a Medicaid ID for newborns. If the facility is unable to submit the newborn birth through the EBC, the hospital may submit a Hospital Newborn Notice (form MSA-2565-C) to the local MDHHS office for Medicaid eligibility to be established and to obtain a Medicaid ID number. (Refer to the Forms Appendix for additional information.) If the MSA-2565-C form is used, the local MDHHS office will open the

Medicaid Provider Manual

newborn's MA case and return the form to the provider with the necessary billing information. Providers must not bill until the eligibility response shows the newborn's ID number, date of birth, and the sex. (Refer to the Beneficiary Eligibility Chapter of this manual for additional information regarding verifying beneficiary eligibility. Refer to the Hospital Chapter of this manual for PACER requirements for newborns.)

If the mother is enrolled with a MHP at the time of birth, all newborn charges must be billed to the MHP.

6.2.K. INPATIENT HOSPITAL CLAIM REQUIREMENTS FOR NEWBORNS

Providers are required to adhere to NUBC guidelines for reporting newborn priority (type of) admission or visit, newborn birth weight, and cesarean sections/inductions related to gestational age. Birth weight should be reported as a whole number. For example, if the birth weight is 2764.5 grams, then the NUBC value code should be reported as "2765". Claims that fail to report newborn priority (type of) admission or visit and newborn birth weight will be denied.

6.2.L. PATIENT-PAY AMOUNT

- Value code D3 followed by the dollar amount is used to reflect the patient-pay amount.
- The facility must submit a claim to Medicaid even though the patient-pay amount is sufficient to cover the cost of the entire admission.
- The facility must not bill the beneficiary for any balance between the facility charges and the patient-pay amount.
- If a beneficiary is discharged and/or transferred to another facility within the same calendar month, the first facility collects the patient-pay amount. If a patient-pay amount was deducted from the second admission in error, a claim replacement must be submitted.
- When an admission spans two or more months, the nursing facility must collect the patient-pay amount for each month the beneficiary is in the nursing facility (for PETs LTC-NFAC and LTC-CMCF) and in hospice (PET HOS-NFAC).
- When an admission spans two or more months, the facility only collects one spend-down amount for the entire hospital admission.

6.2.M. DRUGS AND THERAPEUTICS CARVED OUT OF HOSPITAL DRG PAYMENT

Effective for dates of service on or after October 1, 2023, separate reimbursement is available for certain drugs and therapeutics that are medically necessary in the inpatient hospital setting. Drugs and therapeutics that are carved out of the diagnosis related group (DRG) will be published and maintained on the MDHHS billing and reimbursement webpage for Inpatient Hospitals. (Refer to the Directory Appendix for website information.)

Medicaid Provider Manual

Claims for drugs and therapeutics that are carved out of DRG are paid through the Fee For Service (FFS) benefit for beneficiaries in Managed Care and FFS. There is no copayment responsibility to the beneficiary for drugs and therapeutics when administered in the inpatient hospital setting. These drugs and therapeutics may be covered as either professional claims or pharmacy claims. If a drug or therapeutic does not have a specific Healthcare Common Procedure Coding System (HCPCS) code established and is identified using an unlisted or NOC code, then it must be submitted on a pharmacy claim to be considered for reimbursement. Pharmacies and billing providers must ensure that claims are not duplicated. PA may be required.

6.3 CLINICAL TRIALS

All claims for routine patient costs associated with participation in a clinical trial must include the National Clinical Trial (NCT) number and an ICD-10 diagnosis code indicating the services are associated with a clinical trial. Claims must also include a completed and signed Attestation to the Appropriateness of the Qualified Clinical Trial form (BPHASA-2210). (Refer to the Forms Appendix to review the form and to the Directory Appendix for form access on the MDHHS website.)

6.3.A. REPORTING COVERED SERVICES

Submit claims for services on the CMS UB04/837I institutional claim format as follows:

- Report Z00.6 in the primary or secondary position.
- Report condition code 30 whether all services are related to the clinical trial or not.
- For paper/direct data entry, report the clinical trial number in Field Locators (FL) 39-41 for value code D4.
- For electronic claim 837I, report the clinical trial number in Loop 2300 REF02 (REF01=P4).

6.3.B. REPORTING NON-COVERED SERVICES

Generally, services, investigational drugs, or items that are part of the clinical trial and considered experimental or investigational should not be reported on a claim. In instances when claims processing edits require non-covered services be billed with their associated procedures, or when it is necessary for a provider to show the items and services provided free-of-charge to receive payment for the covered routine costs, providers are instructed to report non-covered services/charges on a separate claim using Type of Bill (TOB) 0110 (no-pay claim). The non-covered claim must be billed with the same Statement Covers Period (From and Through date) as the payable TOB 011X submitted for the same stay as the covered services related to the clinical trial. Include the clinical trial identifiers listed above on the no-pay claim. Claims submitted with TOB 0110 will result in a denial.

Refer to the Billing & Reimbursement for Professionals and the Practitioner chapters for additional information.

Medicaid Provider Manual

6.4 REHABILITATION UNITS

For Medicare recognized distinct part rehabilitation units, MDHHS recommends that providers report the appropriate taxonomy code on all claims submitted, either electronically or by paper, to ensure proper adjudication. Within the ASC X12 837 5010 institutional format, report the valid taxonomy code in provider loop 2000A (billing/pay-to-provider taxonomy code). For paper claims, use the Code-Code field within the UB-04 claim form. The PACER number must be entered on the claim in the treatment authorization field.

6.5 STERILIZATION

For coverage policy information, refer to the Hospital Chapter of this manual. Refer to the Forms Appendix of this manual for a copy of the Consent for Sterilization (MSA-1959/HHS-687), including completion instructions. If any field on the form is improperly completed, the claim is rejected.

The procedure for completion of the MSA-1959/HHS-687 form is:

- Complete a cover sheet (typed or printed) which must include: beneficiary name, beneficiary Medicaid ID number, provider's contact person, provider fax number, and provider phone number.
- Fax the cover sheet and completed MSA-1959/HHS-687. Do not fax claims.
- Wait for a response. When notified that the MSA-1959/HHS-687 has been accepted and is on file, inform the other providers via a copy of the response.
- If there is no response within five working days, confirm that the fax is working. Be sure that the cover sheet included the necessary information needed for Medicaid staff to contact the provider. Resend the information if necessary.
- All providers may then submit claims (either electronic or paper copy) to Medicaid. The Remarks Section or Comment Record must include the statement "Consent on File."
- The information on the sterilization claim must match the information on the MSA-1959/HHS-687. If it does not, the claim is rejected.

This process is optional. Copies of the MSA-1959/HHS-687 may be attached to a claim without going through the pre-approval process. If choosing to include a paper copy of the MSA-1959/HHS-687, indicate "submitted attachment" in the Remarks section.

6.6 TELEMEDICINE

To be reimbursed for the originating site facility fee, the hospital must bill the appropriate telemedicine NUBC revenue code with the appropriate telemedicine facility fee code and modifier. Refer to the Telemedicine Chapter for additional information. Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.

6.7 TRANSPLANTS

Heart, liver, lung, simultaneous pancreas/kidney, kidney and pancreas transplants are reimbursed at the hospital's Medicaid cost-to-charge ratio.

Medicaid Provider Manual

- Organ acquisition costs are reimbursed at 100% of charges when billed using either revenue code 0811 or 0812. This applies to heart, liver, lung, simultaneous pancreas/kidney, kidney, or pancreas transplants.
- The letter of authorization for the transplant from the Office of Medical Affairs (OMA) or MHP must be attached to all applicable transplant claims, otherwise payment is denied.
- Indicate "PA letter submitted" in the Remarks section of the submitted claim.
- For other transplant services not described by a specific DRG, identify in the Remarks Section the type of transplant that has been performed (i.e., small bowel transplant).
- If the donor and beneficiary are both Medicaid eligible, the services must be billed under each beneficiary's respective ID Number. If only the beneficiary is Medicaid eligible, bill services for both donor and beneficiary under the Medicaid beneficiary's ID Number.

All other insurance resources must be exhausted before Medicaid is billed. If Medicare eligibility is denied, the denial notice must be submitted with the claim.

Medicaid Provider Manual

SECTION 7 – HOSPITAL CLAIM COMPLETION – OUTPATIENT

Information in this section should be used in conjunction with the National Uniform Billing Committee (NUBC) Manual when preparing Outpatient Hospital claims. The MDHHS website contains additional billing information (i.e., MDHHS Institutional Billing Resource document). (Refer to the Directory Appendix for website information.)

7.1 OPPS/AMBULATORY PAYMENT CLASSIFICATION

7.1.A. PACKAGED/BUNDLED SERVICES

MDHHS follows Medicare guidelines for packaged/bundled service costs. Services having a status indicator (SI) of "N" are considered packaged/bundled into other services. The costs of these services are allocated to the APC but are not paid separately. Providers must report all HCPCS/CPT codes and charges for all services provided on a claim whether payment for the service(s) is made separately or is packaged in order for the claim to pay correctly. Charges related to the packaged services are used for the outlier calculation.

Packaged services revenue codes, when billed under OPPS, do not require a HCPCS code. Any other revenue codes billable on an outpatient hospital claim must contain the HCPCS code to assure payment under OPPS.

7.1.B. PAYMENT STATUS INDICATORS

For categories covered differently than Medicare under the MDHHS OPPS, refer to the MDHHS OPPS Wraparound Code List posted on the MDHHS website. (Refer to the Directory Appendix for website information.)

Medicare assigns a payment status indicator (SI) to every HCPCS code and identifies whether the service described (by the HCPCS code) is paid under OPPS, and whether payment is made separately or packaged. The SI may also provide additional information about how the code is paid under OPPS or under another payment system or fee schedule. A list of Medicare SIs with their definitions is in Medicare's Addendum D. Medicare's Addendum B shows the status indicator for each HCPCS code. (The Addendums are available on the CMS website. Refer to the Directory Appendix for website information.)

7.1.C. TYPE OF BILL

The following Type of Bill (TOB) are accepted for outpatient claims under the MDHHS OPPS: 13x, 14x, 34x, 72x, 74x, 75x or 85x.

7.1.D. REPORTING CPT/HCPCS CODES

The OPPS payment calculations are dependent on CPT/HCPCS procedure codes and modifiers reported at the claim line level. Providers are advised to ensure the accuracy of procedure codes, the OPPS modifiers, and the appropriateness of the revenue codes.

Medicaid Provider Manual

MDHHS uses the Medicare HCPCS/Revenue Code Chart as a guide for how hospitals report services.

7.1.E. DATE OF SERVICE

OPPS requires a claim line date of service for each service billed. If a claim line date of service is not entered for each HCPCS code reported or, if the line item dates of service reported are outside of the "statement covers" period ("from" and "through" dates), the claim will be returned to the provider.

If the claim spans more than one calendar day, the Outpatient Code Editor (OCE) will subdivide the claim into separate days for the purpose of determining discounting and multiple visits on the same calendar day. Per Federal Regulations, the MDHHS OPPS uses Medicaid NCCI and MUE values for OPH claims processing. The Medicaid NCCI and MUE values are reviewed with the quarterly file updates.

All services for a single outpatient encounter must be reported on one claim, except for Medicare's allowable repetitively billed services and hospital-owned ambulance services. MDHHS aligns closely with Medicare's guidelines for monthly repetitive billing.

7.1.F. LATE CHARGES

Late charges do not apply for outpatient hospital (Type of Bill 135). A claim replacement must be submitted to report correct charges. (Refer to the Replacement, Void/Cancel Claims and Refund of Payment Section of this chapter for additional information.)

7.1.G. REPETITIVE SERVICES BILLING

MDHHS follows Medicare's Repetitive Services billing for Medicaid covered services when billed appropriately.

7.2 ABORTION

Physicians must certify on a completed Certification for Induced Abortion form (MSA-4240) that, for medical reasons, an abortion was necessary to save the life of the mother or the beneficiary's medical history indicates that the terminated pregnancy was the result of rape or incest. The physician who completes the MSA-4240 must also ensure completion of the Beneficiary Verification of Coverage form (MSA-1550) and is responsible for providing copies of the forms for billing purposes to any other provider (e.g., anesthesiologist, hospital, laboratory) that would submit claims for services related to the abortion.

Copies of the MSA-4240 and the MSA-1550 are not required for claims for ectopic pregnancies or spontaneous, incomplete, or threatened abortions. Providers may attach copies of the MSA-4240 and the MSA-1550 to the claim or submit them via fax.

Federal regulations require that these forms be submitted to Medicaid before reimbursement can be made for any abortion procedure. This process can eliminate submitting paper attachments for abortion claims and pre-confirms the acceptability of the completed forms, as well as reduces costly claim rejections.

Medicaid Provider Manual

(Refer to the Forms Appendix for copies of MSA-4240 and MSA-1550.)

7.3 AMBULANCE

Claims for hospital-owned ambulance services must be billed using the current 837I or UB paper claim format and Medicare claim completion instructions except as noted below. Hospital-owned ambulance Medicaid-enrolled providers submitting Emergency Ambulance Transport claims may report the National Provider Identifier (NPI) of the attending physician, however, completion of this field is not required.

For coverage policy information, refer to the Ambulance Chapter of this manual. Additional information related to appropriate coverage support codes and reimbursement is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

7.3.A. BILLING INSTRUCTIONS FOR HOSPITAL-OWNED AMBULANCES

- The appropriate NUBC Ambulance revenue code with the appropriate MDHHS covered ambulance CPT/HCPCS procedure code(s) must be reported for each ambulance trip on the individual service line(s).
- For proper claim payment, the appropriate taxonomy code must be reported along with the NPI to designate ambulance, land, air, or by water. (Report the valid taxonomy code in loop 2000A of the ASC X12 837 5010 electronic format or the Code-Code field within the UB-04 paper claim form.)
- A revenue code, HCPCS code(s) and a modifier(s) are required for billing ambulance services and mileage.
- The claim line date of service must be reported for each revenue code line in the Date of Service field for each revenue code used.
- A one-way ambulance trip is reported on two separate consecutive revenue code lines: one line represents the ambulance service provided, and one line represents the mileage.
- Units must be reported in the Service Units field. The number of units reported for the revenue line reflecting each ambulance trip should always equal "1".
- The appropriate origin and destination modifier(s) must be included on the service line when billing for mileage.

Origin and Destination Modifiers	Description
D	Diagnosis or therapeutic site other than "P" or "H" when these are used as origin codes
E	Residential domiciliary custodial facility (other than a Medicare/Medicaid facility)
G	Hospital based dialysis facility
H	Hospital
I	Site of transfer (e.g., airport or helicopter pad) between modes of transportation
J	Non hospital-based dialysis facility

Medicaid Provider Manual

Origin and Destination Modifiers	Description
N	Skilled Nursing Facility (SNF) (Medicare/Medicaid facility)
P	Physician's office
R	Residence
S	Scene of accident or acute event
X	(Destination code only) Intermediate stop at a physician's office on the way to the hospital

7.3.B. MULTIPLE TRANSPORTS PER BENEFICIARY

When a beneficiary requires more than one ambulance transport on the same date of service, providers must report:

- the appropriate origin and destination modifier with both the base rate and the mileage procedure codes; and
- the quantity for each transport base rate as "1" and the quantity for each transport mileage as the number of loaded miles.

If a break in service occurs between transports, each transport must be billed as a separate service. A break in service occurs when the ambulance is available to respond to other requests. If there is no break in service between transports, the transport is considered a single run and is described under the Continuous or Round Trip Transports subsection of the Ambulance Chapter of this manual.

7.3.C. MULTIPLE PATIENT TRANSPORT

When billing for a transport when more than one patient is transported at one time, the appropriate modifier must be reported on the service line for the transport for the second or subsequent patient being transported.

Modifier	Description	Special Instructions
GM	Multiple patients on one ambulance trip	Enter on the transport service line for second or subsequent patient when more than one patient is transported. Reduces reimbursement for the second or subsequent patient transported. Do not report for the first patient.

Medicaid Provider Manual

7.3.D. MILEAGE

When billing a mileage code for trips totaling:

- Less than 100 miles, ambulance providers must report mileage units rounded up to the nearest tenth of a mile (e.g., 15.5 miles). For trips totaling less than one mile, ambulance providers must report a "0" prior to the decimal (e.g., 0.5 miles). For claims submitted with mileage units greater than one decimal place, Medicaid will truncate to accommodate its fractional billing policy (e.g., 15.99 reported miles will become 15.9 miles).
- 100 miles or more, ambulance providers must report mileage rounded up to the nearest whole mile. For claims submitted totaling 100 miles or more and that are reported using fractional mileage, Medicaid will truncate to accommodate this policy (e.g., 115.99 reported miles will become 115 miles). Medicaid will not round up to the nearest whole mile for ambulance runs totaling 100 miles or more that are truncated as a result of this policy.

NOTE: Because the National Uniform Billing Committee (NUBC) UB-04 paper claim form cannot accommodate fractional billing, hard copy ambulance billers submitting the UB-04 should report mileage units rounded up to the nearest whole mile.

7.3.E. WAIT TIME

When billing for wait time (if more than 30 minutes of waiting time occurs), report the procedure code and enter the appropriate number of time units in the Service Units field. Bill one time unit for each 30 minutes of wait time over and above the first 30 minutes.

If more than four hours of waiting time is required, providers must request individual consideration and provide documentation. Documentation is required when billing wait time regarding the circumstances, noting under Remarks or submitted as an attachment with the claim.

7.3.F. ZIP CODE

MDHHS does not require reporting the ZIP code of the geographic location for pricing.

7.4 ANESTHESIA

MDHHS aligns as closely as possible with Medicare's anesthesia billing guidelines. Under OPPS, anesthesia services are packaged services, with items and services considered an integral part of another service being included in the APC payment for that integral part. Anesthesia, routine supplies, recovery room, and most drugs are considered an integral part of a surgical procedure; therefore, payment of these items is packaged into the APC payment for the surgical procedure.

Providers must bill all packaged items and services appropriately.

CRNA, AA, and physician professional charges should not be included in the outpatient hospital bill. (Refer to the Billing & Reimbursement for Professionals Chapter of this manual for information related to billing professional services.)

Medicaid Provider Manual

7.5 APHERESIS

MDHHS aligns as closely as possible with Medicare's billing and reimbursement guidelines for Apheresis services.

7.6 BENEFICIARY EDUCATION

7.6.A. CHILDBIRTH EDUCATION

Childbirth education services must be billed upon completion of the course.

- Report the quantity as "1".
- Enter the last date the beneficiary was seen for childbirth education in "statement covers period".
- The "from" and "through" dates must be the same.

7.6.B. KIDNEY DISEASE EDUCATION (KDE)

MDHHS follows Medicare's billing and reimbursement requirements for covered Kidney Disease Education (KDE) services.

- Bill the appropriate NUBC Revenue Code.
- Bill the appropriate CPT/HCPCS code for KDE.
- Bill the appropriate diagnosis code.

7.7 BLOOD AND PRODUCTS

MDHHS aligns as closely as possible with Medicare's billing and reimbursement guidelines for billing blood or blood products.

7.7.A. TRANSFUSION SERVICES

MDHHS aligns as closely as possible with Medicare's billing and reimbursement guidelines for transfusion services.

7.7.B. UNUSED BLOOD

MDHHS aligns as closely as possible with Medicare's billing and reimbursement guidelines for blood bank unused blood, processing and storage costs. The OPPS provider must not bill the beneficiary for these storage costs.

7.8 CLINIC SERVICES

MDHHS aligns as closely as possible with Medicare's billing and reimbursement guidelines for billing Hospital Clinic services rendered in a clinic setting (that is part of the licensed, Medicaid enrolled hospital) and that satisfy Medicare requirements for provider-based status.

Clinic services rendered in the outpatient hospital include non-emergency outpatient services that are provided to ambulatory beneficiaries.

7.9 CLINICAL TRIALS

All outpatient hospital facility claims for routine patient costs associated with participation in a qualified clinical trial must adhere to the inpatient hospital claim guidelines for reporting covered services using the CMS UB04/837I institutional claim format. (Refer to the Hospital Claim Completion – Inpatient section, Clinical Trials subsection for additional information.) In addition, outpatient hospital facility claims must include:

- A completed and signed Attestation to the Appropriateness of the Qualified Clinical Trial form (BPHASA-2210).
- Clinical trial and non-clinical trial services on separate line items when claims are submitted for both types of services on the same claim.
- Each line identified with the appropriate Healthcare Common Procedure Coding System (HCPCS) Modifier Q0 or Q1.
 - HCPCS Modifier Q0 - **investigational clinical service** provided in a clinical research study that is in an approved clinical research study.
 - HCPCS Modifier Q1 – **routine clinical service** provided in a clinical research study that is in an approved clinical research study.

Report non-covered services/charges with the appropriate modifier and a token charge (\$1) for a 'no cost' item in the covered charge field.

Refer to the Billing & Reimbursement for Professionals and the Practitioner chapters for additional information.

7.10 COSMETIC SURGERY

A copy of the authorization letter that was sent to the attending physician from the OMA or MHP must be submitted with the claim.

Indicate "PA letter submitted" in the Remarks section.

7.11 DENTAL SERVICES

PA is not required for the outpatient hospital setting for FFS beneficiaries. However, PA may be required for MHP enrollees.

The hospital must bill the appropriate supporting HCPCS code and the appropriate revenue code(s).

7.12 DIABETES SELF-MANAGEMENT EDUCATION (DSME) TRAINING PROGRAM

MDHHS follows Medicare's DSME Training (initial and follow-up) billing guidelines as closely as possible. Providers must bill appropriately. All documentation must support that services furnished are provided by a Medicaid enrolled provider who meets Michigan Medicaid DSME program requirements in the appropriate place of service.

Refer to the Hospital Chapter for information regarding DSME program requirements.

7.13 DIALYSIS (HEMODIALYSIS AND PERITONEAL)

MDHHS follows Medicare's billing requirements for outpatient and emergency outpatient dialysis services (e.g., the appropriate diagnosis code, patient weight, height, etc.); however, coverage and reimbursement policies differ. Refer to the outpatient portion of the Hospital Chapter of this manual and the MDHHS OPSS Wraparound Code List on the MDHHS website for additional information. (Refer to the Directory Appendix for MDHHS website information.)

7.14 DONOR SEARCHES

Charges for donor searches which do not result in an organ acquisition and transplant should be billed as an outpatient service.

- A copy of the PA for the transplant that was sent to the attending physician from the OMA or MHP must be submitted with the claim.
- The appropriate NUBC revenue code should be used with the appropriate CPT/HCPCS procedure code. The MDHHS website contains additional billing information (i.e., MDHHS Institutional Billing Resource document). (Refer to the Directory Appendix for website information.)
- Indicate "PA letter submitted" in the Remarks Section.

7.15 DRUGS ADMINISTERED ON PREMISES

Medicaid does not cover the NUBC revenue code for self-administered drugs. Refer to the Revenue Code Requirements Table posted on the MDHHS website. (Refer to the Directory Appendix for website information.)

Medicaid Provider Manual

7.16 EMERGENCY DEPARTMENT SERVICES

Emergency Department services are to be billed as follows:

EMTALA Screen	<p>The hospital must bill the appropriate NUBC Emergency Department (ED) revenue code with the appropriate ED Evaluation and Management (E&M) code/CPT/HCPCS procedure code when billing the EMTALA screen without follow-up treatment/stabilization services. (Refer to the General Information for Providers and the Emergency Services Only Medicaid chapters for additional information.)</p>
Emergency Department Stabilization/ Emergency Treatment Services	<ul style="list-style-type: none">▪ Use the appropriate ED revenue code or combination of codes.▪ Use the appropriate ED E&M code/CPT/HCPCS code to indicate the level of service provided.▪ The principle diagnosis code field must reflect the emergency diagnosis resulting from the EMTALA screen. The Admitting Diagnosis Code field should reflect the beneficiary's reason for the emergency room visit.▪ Hospitals must apply current guidelines designated by the appropriate ED HCPCS code to reasonably relate the intensity of hospital resources to the different E&M levels represented by the codes. <p>Exception: The reason the encounter was considered an emergency must be entered in the Remarks Section if the principal diagnosis or the admitting diagnosis does not reflect the definition of an emergency as stated in the federal Balanced Budget Act of 1997 and its regulations. Information in the Remarks Section should include vital signs, medical problems or conditions noted during the ED visit, if an IV was started, and medications administered during the visit. This information must be adequate to confirm the emergent condition.</p> <ul style="list-style-type: none">▪ All outpatient hospital charges for ED services resulting in an inpatient admission must be billed on the inpatient claim. Payment is made through the inpatient reimbursement system (as part of the DRG).
Emergency Department Non-Emergency Treatment Services	<p>Medicaid covers all appropriate hospital charges for ED services, provided that the diagnosis supports procedures billed and/or documentation supports the facility charges.</p> <ul style="list-style-type: none">▪ Hospitals must bill the appropriate NUBC ED revenue code.▪ Use appropriate ED E&M code/CPT/HCPCS code to indicate level of service provided.▪ All other services (e.g., laboratory, x-ray, etc.) must be billed consistent with Medicaid's FFS policy. <p>For MHP enrollees, authorization must be obtained prior to provision of non-emergency services in the ED.</p>

7.17 HYPERBARIC OXYGEN THERAPY

MDHHS follows Medicare's Hyperbaric Oxygen Therapy billing guidelines as closely as possible when billed appropriately.

7.18 HYSTERECTOMY

Refer to the Hospital Claim Completion-Inpatient Section of this chapter for information related to hysterectomies.

7.19 INJECTIONS

Outpatient hospital providers who bill physician-administered drugs (injectable and non-injectable) separately to Medicaid must report the National Drug Code (NDC) and its supplemental information in addition to the corresponding procedure code (CPT or HCPCS) to assist Medicaid in collecting rebates. Reporting of the NDC is not required for claims that are considered packaged or bundled (Medicare Pay Status = N) under the Outpatient Prospective Payment System (OPPS).

Providers can report decimals if they are part of the NDC supplemental information.

Coverage of a physician-administered drug (except an immunization) is limited to a drug product from a manufacturer who has a signed rebate agreement with the CMS. A current listing of the rebate manufacturers can be found on the CMS website. (Refer to the Directory Appendix for website information.) Providers are required to review the website for any changes. MDHHS will not provide an updated listing of rebate manufacturers.

The NDC information must be reported on all Medicare crossover claims.

Do not recode injectable drugs from a national procedure code covered by Medicare or other payers to a NOC code when billing MDHHS unless MDHHS does not cover that procedure code. When MDHHS covers the procedure code, the same procedure code must be submitted to MDHHS that was submitted to the other payer to ensure proper reimbursement.

When billing a code with a dose-specific description, enter the appropriate quantity. If the dose specified in the code description is exceeded, use modifier 22 and document the actual dosage given in the appropriate segment or form locator.

Up to normal and customary charges can be billed for 340B acquired physician-administered drugs or products when provided in the outpatient hospital setting. Drugs purchased through the 340B program must be indicated on the institutional claim using the MDHHS modifier U6 and CMS modifiers for OPPS 340B acquired drugs.

Invalid or missing NDC information or an NDC by a manufacturer who does not have a signed rebate agreement with CMS will reject at the claim line level.

Medicaid Provider Manual

7.19.A. ELECTRONIC CLAIMS

The following NDC information is reported in the appropriate segments of the electronic claim format:

- N4 (2-digit qualifier)
- NDC (11 digits, with 5-4-2 format)
- Unit of Measurement Value (2-digit qualifier)
- NDC Quantity

To report the NDC information in an 837 HIPAA-compliant format with the correct information in the 2410 Loop:

- Repeat the HCPCS code on multiple service line loops, allowing one NDC to be reported within each LIN segment.
- Within the LIN segment, report the 2-digit qualifier along with the 11-digit NDC.
- Within the CTP segment, report the quantity and unit of measurement.
- For the REF segment, the prescription number or Compound Drug Association Number must be reported on each service line to link this service together.

7.19.B. NUBC CLAIM FORMAT

The National Uniform Billing Committee (NUBC) provides instructions for reporting an NDC and its supplemental information on the NUBC claim format. These instructions can be found on the NUBC website. (Refer to the Directory Appendix for website information.)

To bill a procedure code (HCPCS or CPT) with multiple NDCs:

- Report the first NDC and its supplemental information in the appropriate Form Locator.
- Report the additional NDC and its supplemental information in the Remarks field.

7.19.C. NOT OTHERWISE CLASSIFIED CODE (NOC)

If a nonspecific or not otherwise classified code (NOC) is billed for a drug product, the NDC and its supplemental information must be reported in the appropriate segments of the electronic claim format and the appropriate Form Locator on the UB-04 claim format. The cost of the drug must be reflected in the charges submitted to MDHHS. Enter a quantity of "1."

7.19.D. DRUGS AND BIOLOGICAL PRODUCTS NOT COVERED BY MEDICAID HEALTH PLANS

When multiple OPH or ASC services are provided in conjunction with a carved-out physician-administered drug, claims with the PA number, all services, the appropriate billing codes, and the appropriate National Drug Code (NDC) must be submitted to Medicaid Fee For Service (FFS). Medicaid FFS will process payment of the carved-out

Medicaid Provider Manual

drug service line only. All other claim lines will be denied with Claim Adjustment Reason Code (CARC) 24. Providers are to bill the FFS denied associated services to the beneficiary's health plan.

7.20 LABOR AND DELIVERY ROOM

Labor and delivery room charges must only be billed when labor progresses to delivery.

- Do not report fetal monitoring, a fetal contraction stress test, or a fetal non-stress test in addition to a labor and delivery or false labor room charge when there is no active labor.

False labor charges for a room used by a beneficiary in active labor who does not progress to delivery must be billed using the appropriate NUBC revenue code (i.e., Other Labor Room/Delivery) and the appropriate CPT/HCPCS procedure code.

- A fetal contraction stress test or a fetal non-stress test may be billed in addition to false labor (under the MDHHS OPPS) when medically necessary.
- No other room charges may be billed with the NUBC Revenue Code (Other Labor Room/Delivery) for the same date of service.

Refer to the MDHHS Institutional Billing Resource document (posted on the MDHHS website) for billing updates and additional information. (Refer to the Directory Appendix for website information.)

7.21 LABORATORY

Differences in coverage of lab services between MDHHS and Medicare have been identified and are included in the MDHHS OPPS Wraparound Code List available on the MDHHS website.

7.22 OUTPATIENT OBSERVATION SERVICES

MDHHS follows Medicare's observation care services coverage, claim submission, and reimbursement policies when billed appropriately.

7.23 PREADMISSION DIAGNOSTIC SERVICES

MDHHS policy/billing guidelines align with billing guidance referenced in the Medicare Claims Processing Manual and the applicable section (i.e., date specific) for "Outpatient Services Treated as Inpatient Services."

MDHHS does not differentiate any specialty hospitals or facilities referenced in the CMS policy (i.e., critical access hospital [CAH], cancer, etc.). (NOTE: This policy does not apply to ambulance providers, freestanding dialysis centers or inpatient rehabilitation hospitals.) MDHHS will use a hospital's tax identification number to align with the CMS definition of "any hospital entity that is wholly owned or wholly operated by" the hospital. Otherwise, MDHHS will align as closely as possible with Medicare policy and guidelines for all beneficiaries.

7.24 RADIATION THERAPY SERVICES

MDHHS follows Medicare's billing guidelines for repetitive billing on the same claim or separately by date of service. If reporting charges on a single claim, the provider must also report all charges for the radiation services (one episode of care) and supplies for the recurring radiation service on the same claim.

7.25 REHABILITATION SERVICES

MDHHS follows Medicare's billing requirements for Cardiac Rehabilitation (CR), Intensive Cardiac Rehabilitation (ICR), and Pulmonary Rehabilitation (PR).

Hospitals must bill appropriately following Medicare's billing guidelines.

7.26 SELF-CARE DIALYSIS TRAINING

Bill self-care dialysis training using the appropriate revenue code and HCPCS/CPT codes. Refer to the MDHHS OPPS Wraparound Code List on the MDHHS website for CPT HCPCS codes. (Refer to the Directory Appendix for MDHHS website information.)

If a beneficiary completes a course:

- Report the appropriate CPT/HCPCS procedure code for dialysis patient training, complete course.
- The quantity should be "1."

If a beneficiary does not complete a course:

- Report each session separately using the appropriate CPT/HCPCS procedure code for dialysis patient training, per session.
- The service date on the claim line must indicate the actual date that the session occurred.
- Report each session using the appropriate CPT/HCPCS procedure code for dialysis patient training, course not completed, per training session.

7.27 STERILIZATION

Refer to the Hospital Claim Completion-Inpatient Section of this chapter for additional information related to sterilization.

7.28 TELEMEDICINE

To be reimbursed for the originating site facility fee, the hospital must bill the telemedicine facility fee code and modifier. Refer to the Telemedicine Chapter for additional information. Information about telemedicine services is contained in the Telemedicine Chapter. Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.

Medicaid Provider Manual

7.29 THERAPIES (OCCUPATIONAL, PHYSICAL AND SPEECH-LANGUAGE)

Therapy services must be reported using the appropriate procedure code and therapy modifier to distinguish the plan of care under which the service is delivered. In addition, when services are habilitative, they must be billed with the appropriate modifier that represents the nature of the therapy performed. Maintenance therapy services should also include the MDHHS designated maintenance modifier. Therapy services submitted without these modifiers may be denied.

Modifier	Description	Special Instructions
GN	Service delivered under an outpatient speech-language pathology plan of care.	Identifies services provided under a speech therapy treatment plan.
GO	Service delivered under an outpatient occupational therapy plan of care.	Identifies services provided under an occupational therapy treatment plan.
GP	Service delivered under an outpatient physical therapy plan of care.	Identifies services provided under a physical therapy treatment plan.
96	Habilitative Service	Used to identify therapy services habilitative in nature.
97	Rehabilitative Service	Used to identify therapy services rehabilitative in nature.
TS	Follow-up Service	Used to identify therapy services as maintenance related.

Outpatient hospital facility providers must also report the appropriate therapy assistant modifier when services are furnished in whole or in part by a physical therapy or occupational therapy assistant. In cases where both a physical or occupational therapist and a physical or occupational therapist assistant (PTA/OTA) provide a portion of the same untimed service or 15-minute timed unit of service, Medicaid will utilize Medicare's de minimis standard in determining if the service/unit is considered to be furnished in whole or in part by a PTA or OTA.

For MHP enrollees, the provider should check with the MHP for PA requirements. Refer to the Therapy Services chapter for additional information related to therapies.

Medicaid Provider Manual

Occupational Therapy (OT)	<ul style="list-style-type: none">Refer to the Therapy Services chapter for information regarding OT benefit maximums and PA requirements. For MHP enrollees, the provider should check with the MHP for PA requirements.OT must be billed with a revenue code along with the appropriate HCPCS code on the claim line. The quantity should reflect the appropriate quantity per code description. If the procedure is not defined by a specific time frame, report "1" as the quantity.Therapy must be provided by the evaluating discipline. Evaluation or reevaluation may be billed with other OT services on the same day. Therapy must be provided by the evaluating discipline.Co-treatment therapy can be billed under one therapist or can be divided between the two therapists. If the service units are split, both therapists may not bill for the same minutes. The combined units billed must not exceed the total time the beneficiary received co-treatment services.The fee for OT includes all services. Hospitals cannot bill a clinic room charge in addition to the therapy unless the visit is unrelated to OT.
Physical Therapy (PT)	<ul style="list-style-type: none">Refer to the Therapy Services chapter for information regarding PT benefit maximums and PA requirements. For MHP enrollees, the provider should check with the MHP for PA requirements.For PT services, use a revenue code with the appropriate HCPCS code on the claim line. The quantity should reflect the appropriate quantity per code description. If the procedure is not defined by a specific time frame, report "1" as the quantity. The fee screen for PT includes all services.The fee for PT includes all services. Hospitals cannot bill a clinic room charge in addition to the therapy unless the visit is unrelated to PT.Evaluation or re-evaluation may be billed with other PT services on the same day. Therapy must be provided by the evaluating discipline.Serial casting must be billed under the manual therapy technique procedure code.Co-treatment therapy can be billed under one therapist or can be divided between the two therapists. If the service units are split, both therapists may not bill for the same minutes. The combined units billed must not exceed the total time the beneficiary received co-treatment services.

Medicaid Provider Manual

Speech-Language Therapy (ST)

- Refer to the Therapy Services chapter for information regarding ST benefit maximums and PA requirements. For MHP enrollees, the provider should check with the MHP for PA requirements.
- Speech therapy must be billed with a revenue code along with the appropriate HCPCS code on the claim line. The quantity should reflect the appropriate quantity per code description. If the procedure is not defined by a specific time frame, report "1" as the quantity.
- Evaluation or re-evaluation may be billed with other speech pathology services on the same day. Therapy must be provided by the evaluating discipline.
- The fee for speech-language therapy includes all services. Hospitals cannot bill a clinic room charge in addition to the therapy unless the visit is unrelated to speech therapy.
- If co-treatment therapy includes services that are reported as an untimed session, they may be billed by the SLP as one unit. The therapy session must be at least 38 minutes in length to bill both speech therapy and another discipline.

7.30 ULTRASONOGRAPHY

Claims for diagnostic ultrasound procedures which are performed more than once require documentation of medical necessity. Documentation with the claim should clearly state the reason for the repeat procedure (e.g., multiple gestation, breach presentation, pre-term labor, etc.). Claims are rejected if the documentation does not support the medical necessity for the repeat diagnostic procedure.

7.31 WEIGHT REDUCTION

A copy of the letter of authorization for the weight reduction that was sent to the attending physician from the OMA must be submitted with the claim.

Indicate "PA letter submitted" in the Remarks Section.

SECTION 8 – NURSING FACILITY CLAIM COMPLETION

This section contains information that should be used in conjunction with the NUBC Manual when preparing nursing facility claims.

Only one calendar month is to be billed on a nursing facility claim.

For Room and Board, the service line from and to date (if reported) must match that of the claim header from and through dates and be reflected in the units billed. The room and board revenue code billed must be for the appropriate room type. Both Revenue Codes 0110 and 0120 must not be billed on two separate claims for the same beneficiary and same/overlapping service dates. These claims will be denied or recouped if paid incorrectly.

8.1 SPLIT BILLING – STATEMENT COVERS PERIOD

The Statement Covers Period on the claim is used for reporting the beginning and ending dates of service for the entire period reflected on the claim. In instances where the facility is split billing the month, the From and Through dates must be for only the period reflected on the claim.

Example: Facility is split billing April. On the first claim, the From date would be 040105 and the Through date would be 041505 for 15 days. The second claim From date would be 041605 and the Through date would be 043005 for 15 days.

If a patient-pay amount is involved on both claims, the facility is reminded that the first claim must be paid before submitting the second claim. Refer to the Patient-Pay portion of this section for additional information.

Failure to follow the above claim completion instructions will result in unnecessary suspending of claims and delays in processing.

8.2 PATIENT-PAY AMOUNT

8.2.A. ONE FACILITY – TWO CLAIMS IN ONE MONTH

When a nursing facility must submit two claims within the same month for the same beneficiary who has a patient-pay amount, the following instructions must be followed:

- The claim for the first service dates in the month must be submitted before the claim for the remainder of the month, even if the patient-pay amount is equal to or greater than the amount billed; and

Medicaid Provider Manual

- The first claim must be paid before submitting the second claim. If the first claim is suspended or rejected, and the second claim is submitted and paid, the whole patient-pay amount is deducted incorrectly from the net amount due on the second claim, even if all or a portion of the patient-pay amount was to have been deducted from the first claim. A replacement claim is required for the second claim to correct the underpayment after both claims are paid.

Facilities must report the total patient-pay amount on the first claim. If there is any remaining patient-pay amount, the amount must be reported on the second claim. The total patient-pay amount is not to be reported on both the first and second claims.

8.2.B. TWO FACILITIES – TWO CLAIMS IN ONE MONTH

If a beneficiary with a patient-pay amount resides in more than one Medicaid-certified facility in the same month:

- The first facility must submit a claim:
 - For the days the beneficiary resided in the facility (even if the amount billed is zero because the amount due is covered by the patient-pay amount);
 - To be paid for any amount due that is more than the patient-pay amount; and
 - For the second facility to receive the correct payment.
- If the first claim has not been submitted or is suspended or rejected, and the second facility submits its claim, the whole patient-pay amount is deducted from the amount due on the second claim. The second facility needs to void their claim in order for the first facility to bill their claim so the PPA may be applicable. Once that is complete, the second facility can rebill a new claim to receive its proper payment.

Note: Nursing facilities must not contact the beneficiary's Michigan Department of Health and Human Services (MDHHS) case worker as the case worker cannot change the patient-pay amount in these situations nor is it warranted. Facilities must bill as outlined above.

8.2.C. OFFSET TO PATIENT-PAY AMOUNT FOR NONCOVERED SERVICES

Notes:

- Pre-Eligibility Medical Expenses: This section does not pertain to Pre-Eligibility Medical Expenses (PEME). PEME must not be reported on the claim. (Refer to the Directory Appendix for PEME contact information.)
- Private Insurance Premiums: Premiums for private insurance cannot be reported on a claim to Medicaid as an offset to the patient-pay amount. The cost of insurance premiums must be handled by the beneficiary's local MDHHS office worker. The MDHHS worker will determine if the cost of the insurance is an allowable expense/offset. Any cost of a premium is not permissible on a claim submitted to Medicaid.

Medicaid Provider Manual

Claims containing an offset to the patient-pay amount cannot be split-billed. The facility must submit one claim for the particular month of service. The offset must be reported for the month that the services were provided.

The offset for the noncovered service must be reported on the claim using the appropriate value code and FL 39 and the related dollar amount. Only value codes for Michigan Medicaid noncovered services will be activated for approval through CHAMPS.

The dollar amount of Value Code D3 minus Estimated Responsibility Patient (patient-pay amount) is the beneficiary's monthly patient-pay amount MINUS the dollar amount of the offset.

The total of D3 and the offset must equal the beneficiary patient-pay amount for that given month.

Offsetting the patient-pay amount may involve more than one month. For example, the beneficiary may have a patient-pay amount of \$200 per month. The amount to be offset is \$500. The amount to be offset would involve a three-month period. The first month claim would indicate \$200 as an offset with D3 as zero. The second month claim would indicate \$200 as an offset with D3 as zero. The third month claim would indicate \$100 as an offset with D3 as \$100.

8.2.C.1. CLAIM DOCUMENTATION REQUIREMENTS WHEN OFFSETTING THE PATIENT-PAY AMOUNT

Documentation must accompany the claim when offsetting the patient-pay amount with Value Codes 25, 26, 27, 28, 29, 33, or 34. Refer to the NUBC website for additional information. (Refer to the Directory Appendix for website information.)

Documentation Requirements	<p>The documentation that must accompany the claim includes the specific reason that the patient-pay amount is being offset, a detailed description of the specific item or service that is offset, and receipt showing that the beneficiary paid for the Medicaid non-covered service.</p> <p>The nursing facility must upload the documentation to the Document Management Portal (DMP). The nursing facility is responsible for a successful upload of the documentation. This tool enables providers to electronically submit supporting documentation for Medicaid claims. A review guide for the DMP is available on the MDHHS website. (Refer to the Directory Appendix for website information.)</p> <p>Note: The nursing facility must report in the Note section of the claim that documents have been uploaded to the DMP.</p>
Claims Processing	<p>There will be a change in the processing of claims when the above Value Codes are reported. Claims will suspend for review of the submitted documentation. Claims submitted with no documentation will be rejected.</p>

Medicaid Provider Manual

MI Health Link	For beneficiaries enrolled in the MI Health Link program, nursing facilities must still collect and maintain patient-pay amount offset information according to policy. Nursing facilities will not be required to submit this information to MDHHS for the months in which a beneficiary is enrolled in MI Health Link. Nursing facilities should continue to abide by their individual contracts with the Integrated Care Organizations (ICOs) as it relates to reporting patient-pay amount offsets when a beneficiary is enrolled in MI Health Link.
-----------------------	--

8.2.D. PATIENT -PAY AMOUNT GREATER THAN AMOUNT BILLED

Nursing facilities must bill Medicaid even if the patient-pay amount is greater than the amount billed to Medicaid. Medicaid requires that a claim be billed so it can obtain particular information off the claim for statistical purposes.

8.2.E. BILLED FACILITY DAYS

Day of Admission	Medicaid reimburses the day of admission if the beneficiary is counted in the facility census (e.g., if they are in the facility at midnight).
Day of Discharge	Medicaid does not reimburse the day of discharge unless the discharge is due to the resident's death. When billing, the facility must indicate "20" (expired) as the Patient Status Code. A discharge due to death is counted in the facility census.
Hospital Leave Days	<ul style="list-style-type: none">▪ If the resident is expected to be in the hospital for 10 days or fewer and dies while in the hospital, the nursing facility may bill for the hospital leave days up to the day before the resident died.▪ For Medicaid to pay for hospital leave days, Medicaid must have been paying for the nursing facility stay before the beneficiary was admitted to the hospital.▪ If the resident returns to the nursing facility under Medicare coverage, the facility may bill for the hospital leave days if the emergency hospitalization was for ten days or fewer.▪ A resident is counted in the facility census if they are in the facility at midnight. If the resident is out of the facility on hospital leave at midnight, that day must be counted as a hospital leave day. If the resident returns to the nursing facility from the hospital, then is readmitted to the hospital for the same condition that they were hospitalized for previously, the 10-day period of Medicaid reimbursed hospital leave days continues if the resident was not counted in the facility census for that day. If, given the circumstances above, the resident was counted in the facility census, a new 10-day period of Medicaid reimbursed hospital leave days may begin.
One-Day Stay	A nursing facility is reimbursed for a one-day stay if a Medicaid beneficiary is admitted to the facility and, the same day, is discharged from the facility due to death, return home, or transfer to another institution that is not a Medicaid-enrolled provider. The one-day stay does not apply to a beneficiary admitted to a nursing facility if, later that day, the beneficiary is discharged and transferred to another nursing facility or an inpatient hospital and, at midnight, the second facility or hospital claims the beneficiary in its daily census.

Medicaid Provider Manual

Outpatient and Emergency Room

A beneficiary who goes to the hospital for outpatient or emergency room services is not discharged from the nursing facility because the beneficiary is not admitted to the inpatient hospital. The beneficiary should be included in the census of the nursing facility, and this day may be billed to Medicaid even if the beneficiary was being treated at midnight in the hospital outpatient or emergency room.

8.3 HOSPITAL LEAVE DAYS

For Hospital Leave Days, Medicaid will pay to hold a beneficiary's bed only when the facility's total available bed occupancy is at 98 percent or more on the day the beneficiary leaves the facility. Facilities at 97.50 percent occupancy may round up to 98 percent. Facilities may not round up 97.45 percent – 97.49 percent to 98 percent. Hospital leave days are limited to a total of 10 days per admission to the hospital for emergency medical treatment. The patient must return to the nursing facility in 10 or fewer days in order for the nursing facility to bill for hospital leave days. When billing, the facility must use:

- Revenue Code 0185; and
- Occurrence Span Code 74, with dates representing the leave days.

8.4 THERAPEUTIC LEAVE DAYS

Therapeutic leave days are limited to a total of 18 days during a 365-day period. When billing, the facility must use:

- Revenue Code 0183; and
- Occurrence Span Code 74, with dates representing leave days.

8.5 VENTILATOR DEPENDENT CARE UNIT (VDCU) AND COMPLEX CARE

When billing for approved VDCU care or complex care:

- Facilities must enter the PA number from the Medicaid authorization form on the claim. If a beneficiary is approved for both complex care and therapy services, one PA number is issued for both complex care and therapy. If a beneficiary is approved for ventilator care and also requires therapy, prior authorization for the therapy must be obtained under the VDCU NPI. Both the therapy and VDCU prior authorization numbers may be reported on the same claim.
- Facilities must bill with the appropriate daily care accommodation revenue codes. For ventilator dependent care, revenue code 0110 must be used. For complex care, revenue code 0120 must be used. Providers should contact MDHHS Long Term Care Operations for information on ventilator dependent care and/or complex care. (Refer to the Directory Appendix for contact information.)

For Medicare-Medicaid nursing facility crossover claims, refer to the Medicare-Medicaid Nursing Facility Crossover Claims with Group Health Incorporated (GHI) (Coordination of Benefits) and the Ventilator-Dependent Care Units subsections for additional information regarding ventilator-dependent care units.

Medicaid Provider Manual

8.6 FACILITY UNDER NEW OWNERSHIP

If a facility changes ownership, the facility must register the NPI for the new owner through the on-line CHAMPS Provider Enrollment (PE) subsystem. If the provider tax identification number (TIN) did not change, the NPI can be reported through the CHAMPS PE maintenance function. If the change involves a new TIN, the provider must complete a new enrollment application. (Refer to the Provider Enrollment Section of the General Information for Providers Chapter for enrollment information.)

If the facility changes ownership in the middle of the month and the beneficiary was in continuous residency at the facility for the month, the facility must submit a claim using the old provider NPI number for the first part of the month and another claim for the second part of the month using the new provider NPI number. The process for two facilities and two claims in a month should be followed for beneficiaries with patient-pay amounts. (Refer to the Patient-Pay Amount subsection above for additional information.)

8.7 BENEFICIARY TRANSFER

When a beneficiary is transferred from one facility to another, MDHHS recommends that the second facility obtain the therapeutic leave day record and Medicare status for the year from the first facility. Maintenance of these records allows the second facility to bill properly and prevents unnecessary rejections.

8.8 HOSPITAL SWING BEDS

Providers of Medicaid swing bed services may not bill for swing bed days unless the combined length of stay in the acute care bed and swing bed exceeds the average length of stay for the Medicaid hospital diagnosis related group (DRG) of the admission.

- The admission date on the claim is the date the beneficiary was admitted to the swing bed. A beneficiary may not be admitted to the swing bed until discharged from an acute care bed.
 - The admission date to the swing bed is not included in the billing period if the admission date to the swing bed is within the DRG coverage period.
- The "from" date and "through" dates on the claim are the beginning and end dates of the billing period. No more than one calendar month may be billed on a claim. The billing period for a Medicaid covered swing bed stay begins when the combined length of stay in the acute care bed and swing bed exceeds the average length of stay for the Medicaid hospital DRG for the hospital admission.
- Hospitals that are exempt from the DRG system may bill for Medicaid covered swing bed days beginning the day of admission to the swing bed.
- The units of service entered on the claim is the number of swing bed care days provided. The day of admission to the swing bed may not be included in the billing period. To determine if the admission date is included in the billing period, refer to the instruction (above) for the "from" date.
- The total number of swing bed care days is limited to 100 days per beneficiary per stay.

Medicaid Provider Manual

8.9 COST SETTLED PROVIDER DETAIL REPORT (FD-622)

A Cost Settled Provider Detail Report (FD-622) is available to nursing facilities (nursing homes, county medical care facilities, hospital long-term care units, ventilator-dependent care units, and hospital swing beds). The FD-622 provides detailed information of a facility's charges paid by Medicaid. Since MDHHS acts as a fiscal agent for many different sources of payment, the FD-622 includes all of these sources.

This report can be used in conjunction with the Remittance Advice (RA) to reconcile the accounts receivable and used as the actual log that the facility must maintain for Medicaid, eliminating duplication of paperwork by the facility.

The FD-622 includes:

- Medicaid payroll information
- the facility's billing information
- the facility's current interim reimbursement rate
- beneficiary information on services billed to Medicaid
- summary of cost settled services
- total charges billed to Medicaid
- amount paid by Medicare, other insurance, beneficiary
- Medicaid payments
- gross adjustments
- Medicaid claim statistic information

The detail portion of the FD-622 report is available in an electronic version. Additional information is available on the MDHHS website. (Refer to the Directory Appendix, Nursing Facility Resources, for website information.)

8.10 DAILY CARE

The following providers may bill for daily care and must enter the appropriate revenue code that identifies the specific daily care accommodation being billed:

- Nursing Home Facilities
- County Medical Care Facilities
- Hospital Long Term Care Units
- Hospital Swing Beds
- Ventilator Dependent Units
- State Veterans' Homes

The NUBC Manual provides the revenue codes to be used for Michigan Medicaid.

Medicaid Provider Manual

8.11 ANCILLARY PHYSICAL AND OCCUPATIONAL THERAPY, SPEECH PATHOLOGY

Ancillary services can be billed on the same claim as daily care (room and board).

The following providers may bill physical/occupational therapy and speech pathology:

- Nursing Home Facilities
- County Medical Care Facilities
- Hospital Long Term Care Units
- Outpatient County Medical Care Facilities
- Ventilator Dependent Units
- State Veterans' Homes

When billing on the NUBC claim form, facilities must use the revenue codes and HCPCS codes identified on the MDHHS Therapy Services Database available on the MDHHS website. (Refer to the Directory Appendix for website information.)

- Each ancillary service must be billed on a separate claim line. Series billing is not allowed.
- Each claim line requires a:
 - Date of service
 - Revenue code and a HCPCS code
 - PA number on the claim
 - Therapy discipline modifier
 - Therapy nature modifier (habilitative claims only)
- PA number must be on the claim.

When billing, facilities must enter the PA number from the Medicaid authorization form on the claim. If a beneficiary is approved for both complex care and therapy services, one PA number is issued for both complex care and therapy.

Therapy services must be reported using the appropriate therapy modifier to distinguish the discipline under which the service is delivered. In addition, when services are habilitative, they must be reported with the appropriate modifier that represents the nature of the therapy. Maintenance therapy visits should also include the MDHHS designated maintenance modifier. Refer to the Therapy Services chapter for additional information related to therapies.

Medicaid Provider Manual

- Occupational therapy modifier: GO
- Physical therapy modifier: GP
- Speech therapy modifier: GN
- Rehabilitative therapy modifier: 97
- Habilitative therapy modifier: 96
- Maintenance visit modifier: TS (Follow-up Service)

8.12 OUTPATIENT COUNTY MEDICAL CARE FACILITIES

- When billing for therapies, outpatient county medical care facilities must indicate the Type of Bill as 23X.
- Each service must be billed on a separate claim line. Series billing is not allowed.
- Each claim line requires a revenue code and a CPT/HCPCS code.
- Each claim requires a PA number to be reported in the appropriate form locator or electronic segment.

8.13 MEDICARE PART B COINSURANCE AND DEDUCTIBLE AMOUNTS

The following providers are allowed to bill Medicaid for Medicare Part B coinsurance and deductible:

- Nursing Home Facilities
- County Medical Care Facilities
- Hospital Long Term Care Units

For the following revenue codes, Medicaid reimburses for any Medicare Part B coinsurance and deductible amounts, based on Medicare's payment, up to Medicaid's maximum amount allowed. Also, Medicaid covers the coinsurance and deductible amounts on any Medicare covered services not normally covered by Medicaid. When billing, each claim line requires a CPT/HCPCS code and the date of service (DOS).

If a beneficiary has Medicare Part B coverage and Medicare does not cover the service(s), the service(s) is considered routine nursing care.

Allowed Revenue Codes: 0270, 0272, 0274, 0275, 0276, 0300 - 0359, 0400 - 0409, 0420 - 0449, 0460, 0469, 0480 - 0489, 0610 - 0619, 0636, 0730 - 0749, 0780, 0800 - 0809, 0920 - 0929, 0940 - 0949.

8.14 OTHER SERVICE REVENUE CODES

Other service revenue codes may be billed as indicated below:

- 0160 - For dually eligible beneficiaries who wish to return to their Medicaid NF bed and refuse their Medicare SNF benefit following a qualifying Medicare hospital stay.

Services for nursing facility beneficiaries requiring outpatient physical therapy, outpatient speech pathology, and outpatient occupational therapy must be provided and billed under Medicare

Medicaid Provider Manual

Part B where applicable, even if no payments are made under Medicare Part A for the nursing facility stay.

- 0410 - Oxygen (gas, equipment, and supplies) for frequent or prolonged oxygen on a daily basis (i.e., at least 8 hours per day - covered when billed by a county medical care facility or hospital long-term care unit).

The rental of a concentrator is billable by a Medical Supplier and should not be confused as needing to be billed under Revenue Code 0410.

Interim reimbursement is based on a percent of charge. Final reimbursement is calculated during the respective period's cost settlement and is based on that period's audited cost to charge ratio.

Medicare/Medicaid – If Medicare is being billed for the nursing facility stay, neither the nursing facility nor a medical supplier can bill Medicaid for oxygen services (i.e., gas, equipment, supplies). Oxygen services are included in the Medicare payment to the facility under Medicare's Prospective Payment System.

- Telemedicine – To be reimbursed for the originating site facility fee, the NF must bill the appropriate telemedicine NUBC revenue code with the appropriate telemedicine facility fee and modifier. Refer to the Telemedicine Chapter for additional information. Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.

8.15 PART A CO-INSURANCE RATE FOR NURSING FACILITY CARE

Medicaid co-insurance payments for Part A are the lower of the co-insurance charge or the current maximum co-insurance rate established under the formula stated in the Social Security Act. The facility's total payments from Medicare, Medicaid and other insurance may be up to, but cannot exceed, the amount established by Medicare as reasonable (i.e., the amount allowed by Medicare).

8.16 MEDICARE - MEDICAID NURSING FACILITY CROSSOVER CLAIMS WITH GROUP HEALTH INCORPORATED (GHI) (COORDINATION OF BENEFITS)

MDHHS accepts institutional crossover claims from the Coordination of Benefits Contractor, Group Health Incorporated (GHI).

The institutional nursing facility crossover claim process allows nursing facilities to submit a single claim for residents dually eligible for Medicare and Medicaid. After processing the Medicare portion, GHI forwards the claim to Michigan Medicaid for processing and reimbursement.

A remittance advice (RA) is generated from Medicare with the details of the Medicare payment and Remark Code MA07 (the claim information has also been forwarded to Medicaid for review). If this remark code does not appear on the Medicare RA, a separate claim must be submitted to MDHHS.

Once Medicare payment is received by the facility and Remark Code MA07 appears on the Medicare RA, the claim should appear on the Medicaid RA within 30 days. The facility may check claim status online through CHAMPS. If the claim does not appear in CHAMPS within 30 days, a claim should be submitted directly to MDHHS showing all Medicare payment information.

Medicaid Provider Manual

Providers must resolve denied claims with Medicare when there is a denied Medicare service not covered by Medicaid. The excluded Medicare service covered by Medicaid should be billed directly to Medicaid.

The following claims are excluded from the crossover process:

- Original Medicare claims paid in full without deductible or co-insurance remaining
- Claims with private and commercial insurance
- Adjustment claims fully paid without deductible or co-insurance
- Original Medicare claims paid at greater than 100% of submitted charges without deductible or co-insurance remaining
- 100% denied original claims
- 100% denied adjustment claims, with no additional beneficiary liability
- 100% denied original claims, with additional beneficiary liability
- 100% denied adjustment claims, with additional beneficiary liability
- Adjustment claims
- Mass adjustment claims - other (monetary or non-monetary)
- Medicare secondary payer cost-avoided (fully denied) claims
- Claims reporting Revenue Code 0160 (Medicaid Reimbursement for a Nursing Facility Bed Following a Qualifying Medicare Hospital Stay)

NOTE:

- For any Medicare Part B services associated with this nursing facility claim, the facility would bill Medicare accordingly.
- Nursing facilities must continue to complete their claims as they have been doing for Medicare.
- Nursing facilities must report the beneficiary's patient-pay, any offset to the patient-pay amount, and voluntary payments on the claim submitted to Medicare.
- When reporting ancillary services, the facility must indicate the service date on the line level of the claim. (Refer to applicable subsections in this chapter for additional information regarding ancillary services.)

8.16.A. VENTILATOR-DEPENDENT CARE UNITS

Medicaid-enrolled ventilator-dependent care units have a distinct National Provider Identifier (NPI) number for Medicaid billing. The number is separate from the "regular" facility NPI number. The facility would use the "regular" NPI number to bill days 1 to 100 to Medicare. Starting on day 101, the facility would bill Medicaid directly using its ventilator-dependent care unit distinct NPI number.

Additional information regarding crossover claims is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

NOTE: A Level of Care Determination (LOCD) must be completed for each NPI.

Medicaid Provider Manual

8.17 REPORTING MEDICARE ON THE MEDICAID NURSING FACILITY CLAIM

When reporting Medicare, nursing facilities must bill as outlined below.

- Covered Days
 - Covered days must be reported using Value Code 80.
 - Covered days are the days in which Medicare approves payment for the beneficiary's skilled care. Covered days must be reported when the primary insurance makes a payment.
- Non-Covered Days
 - Non-covered days must be reported using Value Code 81.
 - Non-covered days are the days not covered by Medicare due to Medicare being exhausted or the beneficiary no longer requiring skilled care. Non-covered days must be reported in order to receive the proper Medicaid provider rate payment.
 - When Medicare non-covered days are reported because Medicare benefits are exhausted, facilities must report Occurrence Code A3 and the date benefits were exhausted, along with Claim Adjustment Reason Code (CARC) 96 (Non-Covered Charges) or 119 (Benefit Maximum for the Time Period has been Reached).
 - When Medicare non-covered days are reported because Medicare active care ended, facilities must report Occurrence Code 22 and the corresponding date Medicare active care ended, along with CARC 96 or 119.
- Coinsurance Days
 - Medicare coinsurance days must be reported using Value Code 82.
 - Coinsurance days are the days in which the primary payer (Medicare or Medicare Advantage Plan) applies a portion of the approved amount to coinsurance. Coinsurance days must be reported in order to receive the proper coinsurance rate payment.
 - When reporting Value Code 82, Occurrence Span Code 70 (Qualifying Stay Dates for SNF) and corresponding from/through dates (at least a three-day inpatient hospital stay which qualifies the resident for Medicare payment of SNF services) must also be reported.
 - Facilities billing for beneficiaries in a Medicare Advantage Plan must report CARC 2, and this must equal the Medicare Advantage Plan coinsurance rate times the number of coinsurance days. Facilities using CARC 2 must report it with the amount equal to the coinsurance rate times the number of coinsurance days reported.
 - Medicare Advantage Plan coinsurance rates vary and do not always equal the Medicare Part A coinsurance rate. Providers must verify the beneficiary's Medicare Advantage Plan coinsurance rate prior to billing Medicaid.
- Prior Stay Date
 - If a SNF or nursing facility stay ended within 60 days of the SNF admission, Occurrence Span Code 78 and the from/through dates must be reported along with Occurrence Span Code 70 and the from/through dates.

Medicaid Provider Manual

- Nursing Facilities with Medicaid-Only Certified Beds Not Billing Medicare
 - For nursing facilities with Medicaid-only certified beds not billing Medicare, claims submitted directly to Medicaid must be billed as outlined above. For example, for beneficiaries with Medicare coverage based on Medicaid's TPL file, covered days must be left blank if Medicare is not covering the service or benefits have exhausted as Medicare is the primary payer. The non-covered day must be completed and it must equal the service units billed for room and board revenue codes and/or leave days revenue codes.

The reason Medicare is not covering the service (e.g., benefits exhausted) must also be reported.

8.18 LONG-TERM CARE INSURANCE

Federal regulations require that all identifiable financial resources available for payment, including long-term care insurance, be billed prior to billing Medicaid. If a beneficiary has long-term care insurance, it must be reported as other insurance on the Medicaid claim. (Refer to the Coordination of Benefits chapter for additional information.)

8.19 MONIES RECEIVED FROM A BENEFICIARY AND REPORTED WITH VALUE CODE 22

When a nursing facility uses Value Code 22 – Surplus to report monies received from a beneficiary, beneficiary's family, or beneficiary's legal representative, the facility must also report these monies to the beneficiary's case worker at MDHHS. This must be reported in order for the case worker to evaluate whether or not the money is countable toward the Medicaid asset limit for Medicaid eligibility. When reporting Value Code 22, the facility must report in the "Note" portion of the claim a detailed description of the monies received. The date that the nursing facility contacted the case worker must also be reported in the "Note" portion of the claim.

8.20 STATE VETERANS' HOMES

In addition to customary billing requirements, a State Veterans' Home must report:

- revenue code 0022,
- the five-digit Health Insurance Prospective Payment System (HIPPS) code,
- the Assessment Reference Date (ARD),
- the number of covered days for each HIPPS code, and
- occurrence code 50.

Revenue code 0022 must be reported on the same service line as each HIPPS code. The five-digit HIPPS code reported on the claim represents (in this exact order) the PT/OT score, the Speech-Language Pathology (SLP) score, the Nursing score, the Non-Therapy Ancillary (NTA) score and the Minimum Data Set (MDS) assessment type. HIPPS codes for the PT/OT, SLP, Nursing and NTA scores can be found in the Medicare Claims Processing Manual. The MDS assessment type should always be an Omnibus Budget Reconciliation Act (OBRA) assessment which has a value of 6, so the fifth digit of the HIPPS code should always be 6 on the claim. The service units on the service line must contain the number of covered days for each HIPPS code. Patient Driven Payment Model (PDPM) categories and AIs are determined by the

Medicaid Provider Manual

MDS 3.0 and can be found in the MDS 3.0 Resident Assessment Instrument (RAI) Manual. (Refer to the Directory Appendix for RAI Manual information.)

The federally required OBRA MDS assessments listed in A0310A of the MDS 3.0 RAI Manual are the only assessments that may be used for billing PDPM.

There must be an occurrence code 50 for each assessment period represented on the claim. The date of service with occurrence code 50 must contain the ARD associated with the applicable MDS assessment. Occurrence code 50 is not required with the default HIPPS code.

Providers must report the HIPPS code(s) and ARD(s) based on the applicable MDS assessment(s) to the billing period. Example: The provider is billing for April 1 through April 30, and MDS assessments occurred on March 15 and May 15. The HIPPS code and ARD would be based on the March 15 assessment since that was the assessment in effect when services were rendered.

Submitted claims will reject in the Community Health Automated Medicaid Processing System (CHAMPS). MDHHS will review the rejected claims and make periodic gross adjustments to the provider based on the claims data. MDHHS will adjust the gross adjustments as necessary to correct for past payments that do not conform to MDHHS billing and reimbursement policies.

Non-routine OT, PT and SLP services are included in the PDPM rates paid to State Veterans' Homes. These providers are to bill for non-routine therapies on the same claims as daily care, and they are required to obtain prior authorization.

The revenue code, HIPPS code, number of covered days for each HIPPS code, occurrence code 50, and the MDS ARD may be reported in the claim notes.

These billing requirements apply to State Veterans' Homes billing for NF services and hospice providers billing for room and board in a State Veterans' Home.

State Veterans' Homes are excluded from the reimbursement policy that requires Medicaid to pay the lower of the customary charge to the general public or the prospective rate determined by Medicaid.

Medicaid Provider Manual

SECTION 9 – HOME HEALTH CLAIM COMPLETION

This section contains information that should be used in conjunction with the NUBC Manual when preparing Home Health claims.

9.1 INTERMITTENT NURSING VISITS/AIDE VISITS/THERAPIES

Each visit must be reported on a separate claim line: Medicaid follows Medicare policy on the requirement that each home health agency visit (e.g., nursing, therapy) must be billed on an individual line. This policy includes two visits performed on the same day (i.e., two visits on the same day must be billed on individual lines of the same claim).

Report 15-minute time increments: Medicaid follows Medicare policy for reporting home health visits in 15-minute increments. When billing on the NUBC form, each home health visit revenue code that is reported must have a corresponding 15-minute increment HCPCS code along with the number of 15-minute increments reported in the Service Units as follows:

Units	Time Requirements
1	1 minute to < 23 minutes
2	23 minutes to < 38 minutes
3	38 minutes to < 53 minutes
4	53 minutes to < 68 minutes
5	68 minutes to < 83 minutes
6	83 minutes to < 98 minutes
7	98 minutes to < 113 minutes
8	113 minutes to < 128 minutes

If services continue for longer periods of time, the home health agency would follow the above pattern.

Time of Service Visit: The timing of the visit begins at the beneficiary's home when services actively begin and ends when services are completed. The time counted must be the time spent actively treating the beneficiary. For example:

- If a beneficiary interrupts a treatment to talk on the telephone for other than a minimal amount of time (less than three minutes), then the time the beneficiary spends on the telephone and not engaged in treatment does not count in the amount of service.
- The home health aide completed bathing and transferring the beneficiary into a chair, and now begins to wash the kitchen dishes before leaving. Washing the dishes is considered incidental and does not meet the definition of a home health aide service. Therefore, the time to perform this activity would not be included in the 15-minute incremental reporting to Medicaid.

Medicaid Provider Manual

Other nontreatment-related interruptions would follow the same principle. If the beneficiary is late returning home from a doctor's appointment, the waiting time of the home health agency personnel cannot be counted as treatment time.

However, if the professional spends time with family or other caretakers in the home teaching them to care for the beneficiary, this activity is counted as treatment time. Calls to the physician by the nurse while in the beneficiary's home to report on the beneficiary's condition can also be counted as treatment time.

If beneficiary assessment activities for completion of the Outcome and Assessment Information Set (OASIS) are a part of an otherwise covered and billable visit, time spent in beneficiary assessment may be included in the total count of 15-minute increments. Completion of the assessment activities must be incorporated into a visit providing otherwise necessary home health care to the beneficiary. A separate visit made only to collect information for the OASIS assessment but not to provide other covered home health services is not billable.

9.2 POSTPARTUM/NEWBORN FOLLOW-UP NURSE VISIT

- Medicaid allows one initial postpartum and one initial newborn visit per pregnancy. The initial postpartum visit must be billed using the mother's Medicaid ID number. The initial newborn visit must be billed using the newborn's Medicaid ID number.
- Medicaid allows one subsequent visit to the mother and newborn. This subsequent visit may be billed under either the mother's or newborn's ID number, based on with which beneficiary the nurse spent the majority of the time.

9.3 INTRAVENOUS INFUSIONS

If the beneficiary is in need of intravenous infusion and an Infusion Clinic or ancillary Medicaid provider (who has no nurse) does not cover the service, or a family member/caregiver will not accept this task, the HHA may perform this service and bill accordingly.

These services must be billed as an Infusion Nurse Visit:

- Use Revenue Codes 0550, 0551, or 0552
- Use Procedure Codes:
 - 99601 (per visit - up to two hours). Must be billed on the first claim line.
 - 99602 (each additional hour). Must be billed on each additional claim line for each additional hour.

Medicaid Provider Manual

9.4 HOME HEALTH PROCEDURE CODES

When billing on the NUBC claim form, home health agencies must use the HCPCS codes located in the Healthcare Common Procedure Coding System manual and the revenue codes in the UB-04 Manual. Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.

Medicaid Provider Manual

SECTION 10 – PRIVATE DUTY NURSING AGENCY CLAIM SUBMISSION/COMPLETION

10.1 DIRECT BILLING TO MDHHS

Providers must bill MDHHS directly (either paper or electronically) using the codes listed in the MDHHS Private Duty Nursing Reimbursement Rates Database posted on the MDHHS website. (Refer to the Directory Appendix for website information.) When direct billing to MDHHS, note the following:

Service Dates	Each date of service must be reported on a separate service line.
Units	Each service line must contain the number of units of care in the "Serv. Units" for that date of service.
Prior Authorization	The PA number listed on the Medicaid authorization letter must be recorded on the claim.
Authorization Letter	The provider must retain the authorization letter for private duty nursing in the beneficiary's record. The authorization letter must not be mailed with the claim when billing.
Billable Units	PDN services are authorized, billed, and paid in 15-minute incremental units. The total number of units reported on the claim must not exceed the total units that were authorized for that month. Since 15-minute units of care are authorized, only those units of care that entail a full 15 minutes of care may be billed.
Adjustments	Adjustments to claims are made through a total claim replacement or void/cancel process.
Multiple Beneficiaries Seen At Same Location	<p>The total Medicaid reimbursement for multiple beneficiaries is time-and-one-half for two beneficiaries. The specific codes listed in the HCPCS Codes/Modifiers section of the MDHHS Private Duty Nursing Reimbursement Rates Database must be used if an RN or LPN is caring for more than one beneficiary at the same location for which this approach to staffing has been authorized. These codes must be used for each beneficiary provided care (i.e., first, second beneficiary). For example, if there is one RN caring for two children at the same location, the multiple beneficiary modifier code must be used for both children.</p> <p>When billing for services for one child (when two have been authorized), do not use the TT modifier along with the HCPCS code. Claims will not pay for one child unless the following comment is entered in the Remarks section of the claim: "Only one child present at time of service, documentation on file."</p>
Holidays	Medicaid allows additional reimbursement for holidays. Medicaid currently recognizes the following holidays: New Year's Day, Easter, Memorial Day, July 4th, Labor Day, Thanksgiving Day, and Christmas Day. A holiday begins at 12:00 am and ends at 12:00 midnight of that holiday day.
Other Insurance	If the beneficiary has other insurance, it must be reported on all claims to MDHHS.

Medicaid Provider Manual

10.1.A. REVENUE CODES/HCPCS CODES/MODIFIERS

When billing, the provider must use the appropriate codes. HCPCS codes/modifiers are located in the Healthcare Common Procedure Coding System manual. The Private Duty Nursing Reimbursement Rates Database, posted on the MDHHS website, outlines private duty nursing rates and applicable codes. (Refer to the Directory Appendix for website information.)

10.1.B. PAYMENT IN 15-MINUTE INCREMENTS

Private duty nursing is prior authorized and paid in 15-minute incremental units. When billing for services, the total number of units billed must not exceed the total number of units authorized for that month. Since 15-minute increments of care are authorized, only those units of care that entail a full 15 minutes of care may be billed.

Medicaid Provider Manual

SECTION 11 – HOSPICE CLAIM COMPLETION

This section contains information that should be used in conjunction with the NUBC Manual when preparing Hospice claims.

11.1 BILLING INSTRUCTIONS FOR HOSPICE CLAIM COMPLETION

- **Admission Date:** The Certification (start) date must be reported on every hospice claim. Use Occurrence Code 27 and the applicable date. Hospice claims submitted to MDHHS must be in date sequence order. Ensure payment is received for the initial hospice month prior to submitting claims for subsequent months.
- **Inpatient Respite Care:** "Occurrence Span Code" - include occurrence span code M2 and complete the "from and through" dates for an episode of inpatient respite care.
- **Core Based Statistical Area (CBSA):** "Value Codes" - include value code 61 in the value code field and report the CBSA number. Hospice claims must be reported with a valid CBSA code based on the location of the beneficiary receiving services.
- Use the Revenue Codes listed below:

Revenue Code	Description
0651	Routine Home Care I
0652	Continuous Home Care
0655	Inpatient Respite Care
0656	General Inpatient Care
0657	Physician Services
0658	Other Hospice I (Room & Board)
0659	Other Hospice Service – Facility Innovative Design Supplemental (FIDS) Bed

- Effective for dates of service on or after January 1, 2016, hospice routine home care is reimbursed as a two-tiered reimbursement rate:
 - A higher rate is paid for the first 60 days of hospice care
 - A decreased rate is paid for hospice days 61 and beyond

A day of hospice is counted when any level of hospice care is provided (i.e., Routine Home Care, Continuous Home Care, General Inpatient Care, and Inpatient Respite Care). If a beneficiary is discharged from hospice but the discharge is not due to death, and the individual returns to hospice within 60 days of the discharge, the hospice day count will resume from the point that the beneficiary left hospice. If a beneficiary is discharged from hospice but returns after more than 60 days have elapsed, the count will reset to day one and the higher hospice routine home care rate for days 1 to 60 will be reimbursed. The count of hospice days does not reset if the beneficiary transfers to a different hospice provider.

Medicaid Provider Manual

- To bill for room and board in a nursing facility, licensed hospice long-term care unit, or Ventilator Dependent Care Unit (VDCU), use Revenue Code 0658. Providers must bill their customary room and board rate and Medicaid pays the usual and customary rate or the Medicaid fee screen, whichever is less. Room and board is reimbursable on the day of discharge if the discharge is due to resident death or the resident is discharged from hospice but remains in the NF. NOTE: In order for the hospice provider to complete the hospice beneficiary's admission, the type of facility for the VDCU must be identified as a nursing facility in the Admission Information Section in CHAMPS and include the VDCU's NPI. When a beneficiary resides in a VDCU/Dialysis Unit under which the VDCU has a special agreement with Medicaid and elects hospice, a prior authorization (PA) number for hospice is not required.
- To bill for room and board in a nursing facility when the beneficiary resides in a Facility Innovative Design Supplemental (FIDS) bed, use Revenue Code 0659.
- Revenue Code 0657 Physician Services requires inclusion of a HCPCS code on the claim line. Each Physician service must be billed on a separate claim line.
- Revenue Code 0652 Continuous Home Care must be billed for each date of service on separate claim lines. To receive the Continuous Home Care rate under code 0652, a minimum of 8 hours of care, not necessarily consecutive, in a 24-hour period is required. Less than 8 hours is reported under code 0651. A portion of an hour counts as an hour for this determination.
- Hospital Leave Days must be billed using Revenue Code 0185 (must not exceed 10 consecutive days). Reimbursement is at 100 percent of class-wide Nursing Facility Hospital Leave Day rate for qualifying facilities.
- Therapeutic Leave Days must be billed using Revenue Code 0183 (must not exceed 18 total days for the year) or Revenue Code 0189, Therapeutic Leave Days, for a beneficiary in a Facility Innovative Design Supplemental (FIDS) bed. Reimbursement is at 95 percent of Nursing Facility rate for leave days.
- Hospice services are reimbursable for day of discharge if services were rendered, regardless of the setting in which the services were provided. (See first bullet for instructions regarding room and board.)
- When billing for a hospice/NF resident who has been approved for complex care, bill revenue code 0120 and include the assigned PA number in F.L. 84, as obtained from the NF.
- Billing for Service Intensity Add-on (SIA): Effective for dates of service on and after January 1, 2016, the SIA rate will be reimbursed for a minimum of 15 minutes but not more than four hours daily during the last seven days of a beneficiary's life for in-person visits made by a Registered Nurse (RN) and/or Social Worker when the beneficiary is receiving routine home care. However, the total of combined time rendered by an RN and Social Worker will not be reimbursed more than four hours per day. For example, if an RN provides three hours of care and a Social Worker provides two hours during a given day, four hours will be reimbursed. The following items must be documented on the claim in order for the SIA to be paid:
 - Occurrence Code 55 with date of death
 - Appropriate discharge status code for death

Medicaid Provider Manual

- Revenue Codes and Healthcare Common Procedure Coding System (HCPCS) combinations representative of the RN or Social Worker visit:
 - RN: 0551 and G0299
 - Social Worker: 0561 and G0155
- Time of visit(s) recorded in units for the respective RN or Social Worker visit(s); one unit equals 15 minutes

The Michigan Medicaid program, including Medicaid Health Plans (MHPs) and MICHild, as well as CSHCS, covers hospice care for children under 21 years of age concurrently with curative treatment of the child's terminal illness when the child qualifies for hospice as described in the Hospice Chapter of this manual. Hospice services and curative treatment are billed and reimbursed separately under this policy. Prior to billing, it is important that providers differentiate between services that are palliative and therefore included in hospice reimbursement, and those that are curative and separately reimbursable under Medicaid. Each child's circumstances will need to be taken into consideration when making this distinction. Caution should be taken to avoid billing both the hospice and Medicaid for the same service as this represents double billing and may constitute fraud.

11.2 APPLICATION OF THE PATIENT-PAY AMOUNT

CHAMPS handles the Patient-Pay Amount (PPA) in the following manner: When a beneficiary has a monthly PPA and a corresponding nursing facility and hospice PET (i.e., HOS-NFAC), the PPA will be deducted from the first claim received in CHAMPS. The PPA will be deducted from the first claim received in CHAMPS resulting in deduction of the higher PPA amount. If the PPA is greater than the amount of the first submitted claim, the difference will be applied to subsequent claims until the total PPA for that month is met. The PPA must be exhausted each month before any Medicaid payment will be made. The nursing facility and hospice must bill in sequence according to the location of the beneficiary at the first of the month. This will prevent the PPA from being deducted from the wrong claim.

Providers have the ability to verify the PPA on the Member Eligibility Detail page in CHAMPS.

The following examples are provided for application of the patient-pay amount (PPA).

Example 1: The beneficiary resides in a NF but is not receiving Medicaid hospice benefits. The beneficiary has a PPA of \$500. The room and board for the NF is \$125. The NF collects \$500 from the beneficiary and provides the beneficiary with a receipt.

Example 2: The beneficiary resides in a NF and elects the Hospice benefit at the beginning of the month. The beneficiary has a PPA of \$500. The hospice or the NF collects the \$500 PPA from the beneficiary and applies it to the hospice room and board rate which includes the daily QAS amount (\$150 which is \$125 [NF rate] + \$25 [QAS]). The hospice or the NF provides the beneficiary with a receipt.

Example 3: The beneficiary resides in a NF for the first two days of the month before electing the Hospice benefit. The beneficiary's PPA is \$500. The NF collects the \$500 from the beneficiary, applies \$250 from the PPA (the NF rate of \$125) toward the room and board owed the NF, and passes \$250 on to the hospice. The hospice then bills, showing on its claim the \$250 PPA balance available to be applied to the hospice room and board rate. The NF provides the beneficiary with a receipt.

Medicaid Provider Manual

11.3 OFFSET TO PATIENT-PAY AMOUNT FOR NONCOVERED SERVICES

NOTE: This section does not pertain to Pre-Eligibility Medical Expenses (PEME). PEME must not be reported on the claim. (Refer to the Directory Appendix for PEME contact information.)

Claims containing an offset to patient-pay amounts cannot be split-billed. The hospice must submit one claim for the particular month of service.

The offset for the noncovered service must be reported on the claim using the appropriate value code and F.L. 39 and the related dollar amount. Only value codes for Michigan Medicaid noncovered services will be activated for approval through CHAMPS.

The dollar amount of Value Code D3, minus Estimated Responsibility Patient (patient-pay amount), is the beneficiary's monthly patient-pay amount MINUS the dollar amount of the offset.

The total of D3 and the offset must equal the beneficiary patient-pay amount for that given month.

Offsetting the patient-pay amount may involve more than one month. For example, the beneficiary may have a patient-pay amount of \$200 per month. The amount to be offset is \$500. The amount to be offset would involve a three-month period. The first month claim would indicate \$200 as an offset with D3 as zero. The second month claim would indicate \$200 as an offset with D3 as zero. The third month claim would indicate \$100 as an offset with D3 as \$100.

11.3.A. CLAIM DOCUMENTATION REQUIREMENTS WHEN OFFSETTING THE PATIENT-PAY AMOUNT

Documentation must accompany the claim when offsetting the patient-pay amount with Value Codes 25, 26, 27, 28, 29, 33, or 34. Refer to the NUBC website for additional information. (Refer to the Directory Appendix for website information.)

Documentation Requirements	<p>The documentation that must accompany the claim includes the specific reason that the patient-pay amount is being offset, a detailed description of the specific item or service that is offset, and receipt showing that the beneficiary paid for the Medicaid non-covered service.</p> <p>The hospice provider must upload the documentation to the Document Management Portal (DMP). The hospice provider is responsible for a successful upload of the documentation. This tool enables providers to electronically submit supporting documentation for Medicaid claims. A review guide for the DMP is available on the MDHHS website. (Refer to the Directory Appendix for website information.)</p> <p>Note: The hospice provider must report in the Note section of the claim that documents have been uploaded to the DMP.</p>
Claims Processing	<p>There will be a change in the processing of claims when the above Value Codes are reported. Claims will suspend for review of the submitted documentation. Claims submitted with no documentation will be rejected.</p>

Medicaid Provider Manual

MI Health Link

For beneficiaries enrolled in the MI Health Link program, the hospice provider must still collect and maintain patient-pay amount offset information according to policy. Hospice providers will not be required to submit this information to MDHHS for the months in which a beneficiary is enrolled in MI Health Link. Hospice providers should continue to abide by their individual contracts with the Integrated Care Organizations (ICOs) as it relates to reporting patient-pay amount offsets when a beneficiary is enrolled in MI Health Link.

11.4 PATIENT-PAY AMOUNT GREATER THAN AMOUNT BILLED

Hospices must bill Medicaid even if the patient-pay amount is greater than the amount billed to Medicaid. Medicaid requires that a claim be billed so it can obtain particular information off the claim for statistical purposes.

SECTION 12 – REMITTANCE ADVICE

A Remittance Advice (RA) is produced to inform providers about the status of their claims. RAs are available in paper and electronic formats, and utilize the HIPAA-compliant national standard claim adjustment group codes, claim adjustment reason codes, and remarks codes, as well as adjustment reason codes, to report claim status. Code definitions are available from the Washington Publishing Company. (Refer to the Directory Appendix for contact information.)

12.1 PAYMENT PROCESS

MDHHS processes claims and issues payments (by check or EFT) every week unless special provisions for payments are included in the provider's enrollment agreement. A RA is issued with each payment to explain the payment made for each claim. If no payment is due or claims have been rejected, an RA is also issued. If claims are not submitted for the current pay cycle or no gross adjustments are processed in the pay cycle, an RA is not generated.

If a claim does not appear on an RA within 60 days of submission, a new claim should be submitted. Providers should verify that the provider NPI number and beneficiary ID number are correct. Submitting claims prior to the end of the 60-day period may result in additional delays in claims processing for payment.

Payments to providers are issued by Tax Identification Number (TIN). All payments due to all providers enrolled with MDHHS under a specific TIN are consolidated and issued as one check or EFT.

Providers who would like to receive payments from MDHHS through EFT must register through the DTMB website. (Refer to the Directory Appendix for DTMB website information.)

12.2 ELECTRONIC REMITTANCE ADVICE

The electronic RA is produced in the HIPAA-compliant ASC X12N 835 5010 format. Providers opting to receive an electronic RA receive all information regarding adjudicated (paid or rejected) claims in this format.

The electronic RA (835) has many advantages:

- It can serve to input provider claim information into the provider's billing and accounting systems;
- It includes a MDHHS trace number to identify the associated warrant or electronic funds transfer (EFT) payment;
- It returns the provider's internal medical record number, line item control number, and patient control number when submitted on the original claim; and
- It contains additional informational fields not available on the paper RA.

The 835 transaction corresponds to one payment device (check or EFT). All claims associated with a single TIN processed in a weekly pay cycle report on a single 835, regardless of how the claims were submitted (e.g., some paper, some electronic, multiple billing agents, etc.). Providers choosing to receive the 835 transaction must authorize a billing agent to receive the 835 per TIN. An addition of and/or

Medicaid Provider Manual

change to the identification of the billing agent for the provider's 835 must be changed through their CHAMPS enrollment application.

For more information regarding the 835 transactions issued by MDHHS, refer to the MDHHS 835 Companion Documents (Data Clarification Documents) on the MDHHS website. For general information about the 835, refer to the Implementation Guides for these transactions. The guides are available through the Washington Publishing Company. (Refer to the Directory Appendix for contact information.)

12.3 PAPER REMITTANCE ADVICE

A paper RA is generated for all providers and/or billing agents who submit and process claims through CHAMPS. The RA is available online or is sent to providers only if requested through the CHAMPS PE subsystem. The RA contains three main sections: cover sheet, summary page, and detail page(s). Refer to the Forms Appendix for a sample copy of a Remittance Advice.

12.4 GROSS ADJUSTMENTS

Gross adjustments are initiated by MDHHS. A gross adjustment may pertain to one or more claims. Providers are notified in writing when adjustments are made to claims. Notification should be received before the gross adjustment appears on the RA.

The paper RA indicates gross adjustments have been made by:

- **Adjustment Reason Code:** Indicates the reason for the debit or credit memo or adjustment to payment. Standard Adjustment Reason Codes are used. Code definitions can be found in the 835 Implementation Guide.
- **Gross Adjustment Code:** This is the MDHHS gross adjustment code that corresponds to the gross adjustment description.

12.5 CLAIM ADJUSTMENT REASON/REMARK CODES

When a claim is initially processed, the Claim Adjustment Reason/Remark column on the RA identifies which service lines have been paid or rejected and lists edits which apply.

If a service line is rejected, a Claim Adjustment Reason/Remark code prints in the Claim Adjustment Reason/Remark column of the RA. Providers should review the definition of the codes to determine the reason for the rejection.

Medicaid Provider Manual

SECTION 13 - JULIAN CALENDAR

Day Month	January	February	March	April	May	June	July	August	September	October	November	December
1	1	32	60	91	121	152	182	213	244	274	305	335
2	2	33	61	92	122	153	183	214	245	275	306	336
3	3	34	62	93	123	154	184	215	246	276	307	337
4	4	35	63	94	124	155	185	216	247	277	308	338
5	5	36	64	95	125	156	186	217	248	278	309	339
6	6	37	65	96	126	157	187	218	249	279	310	340
7	7	38	66	97	127	158	188	219	250	280	311	341
8	8	39	67	98	128	159	189	220	251	281	312	342
9	9	40	68	99	129	160	190	221	252	282	313	343

Medicaid Provider Manual

For leap year, one day must be added to the number of days after February 28. The next three leap years are 2028, 2032 and 2036.

Example: Transaction Control Number (TCN) 211215010000189001 – Header TCN always ends in 000
Position 1: "2" – DDE Web Submission
Position 2: "1" – FFS Claim
Positions 3-7: "12150" – YY = 12 (for 2012) + 3-digit Julian date = "150" (May 29)
Position 8: "1" – Original Claim
Positions 9-15: "0000189" – Sequence Number
Positions 16-18: "001" – Line Number. Will begin with 001 for every new claim and increment by 1 for each claim line. Any replacement or voids claim, use the header TCN.
Header TCN always ends in 000 (211215010000189000).

Medicaid Provider Manual

SECTION 1 - GENERAL INFORMATION

This chapter applies to all providers billing the CMS-1500 or 837 Professional claim formats. It contains information needed to submit professional claims to the Michigan Department of Health and Human Services (MDHHS) for Medicaid programs and Children's Special Health Care Services (CSHCS). It also contains information about how claims are processed and how providers are notified of MDHHS actions.

The following providers must use the ASC X12N 837 5010 professional format when submitting electronic claims and the CMS 1500 claim form for paper claims.

- | | | |
|--|---|---|
| ▪ Advanced Practice Registered Nurses (APRNs), including Certified Nurse Practitioners (NPs), Certified Clinical Nurse Specialists (CNSs), Certified Nurse-Midwives (CNMs) | ▪ Federally Qualified Health Centers | ▪ Oral-Maxillofacial Surgeons |
| ▪ Ambulance | ▪ Genetic Counselors | ▪ Orthotists and Prosthetists |
| ▪ Ambulatory Surgical Centers | ▪ Hearing Aid Dealers | ▪ Physician Assistants |
| ▪ Anesthesiologist Assistants | ▪ Hearing Centers | ▪ Physical Therapists |
| ▪ Certified Registered Nurse Anesthetists | ▪ Independent Diagnostic Testing Facilities | ▪ Physicians (MD & DO) |
| ▪ Chiropractors | ▪ Independent Laboratories | ▪ Podiatrists |
| ▪ Community Mental Health Services Programs/Prepaid Inpatient Health Plans | ▪ Indian Health Centers | ▪ Portable X-ray Suppliers |
| ▪ Family Planning Clinics | ▪ Maternal Infant Health Program | ▪ Private Duty Nurses (Individually Enrolled) |
| | ▪ Medical Clinics | ▪ Rural Health Clinics |
| | ▪ Medical Suppliers | ▪ School Services Program |
| | ▪ Optical Companies | ▪ Shoe Stores |
| | ▪ Optometrists | ▪ Urgent Care Centers |

Claims for services rendered as a result of an order or referral must contain the name and individual NPI of the provider who ordered or referred the service/item. The following are the authorized health professionals who may order, prescribe or refer services to Medicaid beneficiaries:

- Physician
- Physician Assistant
- Advanced Practice Registered Nurse
- Dentist
- Podiatrist
- Optometrist
- Chiropractor (limited to spinal x-rays only)

Examples of services that require an order, prescription or referral include, but are not limited to,:

- Ambulance non-emergency transports

Medicaid Provider Manual

- Ancillary services for beneficiaries residing in nursing facilities (e.g., chiropractic, dental, podiatry, vision)
- Childbirth/parenting and diabetes self-management education
- Consultations
- Diagnostic radiology services, unless rendered by the ordering physician
- Durable medical equipment, prosthetics, orthotics, and supplies (DMEPOS)
- Genetic Counseling
- Hearing and hearing aid dealer services
- Home health services
- Hospice services
- Independent Diagnostic Testing Facilities
- Laboratory services
- Certain mental health and substance abuse children's waiver services
- Certain Maternal Infant Health Program (MIHP) services
- Pharmacy services
- Portable X-ray Suppliers
- Private Duty Nursing services
- Certain school based services
- Therapy services (occupational therapy (OT), physical therapy (PT) and speech)
- Certain vision supplies

1.1 CLAIMS PROCESSING SYSTEM

All claims submitted and accepted are processed through CHAMPS. Paper claims are scanned and converted to the same file format as claims submitted electronically.

Claims processed through CHAMPS are edited for many parameters, including provider and beneficiary eligibility, procedure validity, claim duplication, frequency limitations for services, and a combination of service edits. MDHHS uses the Medicaid National Correct Coding Initiative (NCCI) policies and edits. (Refer to the Directory Appendix for resource information.)

MDHHS encourages providers to send claims electronically. (Refer to the Electronic Submission Manual on the MDHHS website for additional information. Refer to the Directory Appendix for website information.) Electronic filing is more cost effective, more accurate, payment is received more quickly, and administrative functions can be automated. Electronic claims filed by Wednesday may be processed as early as the next weekly cycle.

1.2 PREDICTIVE MODELING

Predictive modeling, a pre-payment claims process in CHAMPS, uses advanced screening technology to identify Medicaid claims with billing irregularities. Claims flagged by the predictive modeling process will undergo a detailed analysis to determine the next step(s) to be taken. This may include a review of medical records and/or past claims. Providers must submit the requested records within 45 days of the date on the request for documents letter to avoid denials for lack of documentation. Records should not be submitted prior to receiving a request for documentation letter.

Requested records must be submitted through the Document Management Portal available in CHAMPS. Refer to:

- the MDHHS website for information and tutorials on the Document Management Portal.
- the Directory Appendix for Document Management Portal website information.

1.3 CLAIM PAYMENT/CLAIM STATUS

Once claims have been submitted and processed through CHAMPS, an electronic health care claim payment/advice (ASC X12N 835 5010) is sent to the designated service bureau for providers choosing an electronic RA. The CHAMPS RA is also available to providers online or is sent to providers via paper if requested through the Provider Enrollment Subsystem. (Refer to the Remittance Advice Section of this chapter for additional information about both the electronic and paper RA.)

To receive information on suspended claims, a provider-initiated 276 claim status request must be submitted and a 277 claim status response will be returned. Providers have the option to receive information on suspended claims via the CHAMPS claims inquiry screens as well.

1.4 ELECTRONIC FUNDS TRANSFER

Electronic Funds Transfer (EFT) is the method of direct deposit of State of Michigan payments into a provider's bank account. This replaces a paper warrant. To initiate an EFT, the facility should go to the Department of Technology, Management & Budget (DTMB) website. (Refer to the Directory Appendix for website information.)

SECTION 2 - HOW TO FILE CLAIMS

Professional claims may be submitted electronically or on paper. Electronic claim submission is the preferred method for submitting claims to MDHHS.

2.1 ELECTRONIC CLAIMS

Claims submitted electronically and accepted are received directly into CHAMPS, which results in faster payments and fewer claims that suspend or reject. (Refer to the Electronic Submission Manual on the MDHHS website for additional information. Refer to the Directory Appendix for website information.) Providers submitting claims electronically must use the ASC X12N 837 5010 professional format. The payroll cut-off for electronic claims submission to MDHHS is Wednesday of each week.

Complete information on submission of electronic claims is available on the MDHHS website. (Refer to the Directory Appendix for website information.) The MDHHS Electronic Submission Manual and other resources, such as the Companion Guides, are on the website. Information on the website is updated as version changes occur at the national level and are adopted by MDHHS.

2.1.A. AUTHORIZED BILLING AGENTS

Any entity (service bureau or individual provider) wishing to submit claims electronically to MDHHS must enroll as an authorized billing agent. The Provider Enrollment Section of the General Information for Providers Chapter and the Trading Partners portion of the MDHHS website contain information related to the application and billing agent authorization process. (Refer to the Directory Appendix for website information.)

More than one billing agent per provider can be authorized to submit the provider's claims electronically. However, only one electronic billing agent may be the designated receiver of the electronic health care claim payment/advice ASC X12N 835 5010. Authorizations remain in effect until changed by the provider through the CHAMPS Provider Enrollment subsystem.

Any individual provider can submit claims electronically as long as the authorization process is completed and approved; however, many providers find it easier to use an existing authorized billing agent to submit claims to MDHHS. Billing agents prepare claims received from their clients, format to HIPAA compliant MDHHS standards, and submit the files to MDHHS for processing. Whether claims are submitted directly or through another authorized billing agent, providers receive a paper remittance advice (RA) that reflects their individual claims. Billing agents receive an RA that contains information on all the claims the agent submitted.

For more information on becoming an electronic biller or for a list of authorized billing agents, contact the Automated Billing Unit. (Refer to the Directory Appendix for contact information.)

2.1.B. ELECTRONIC CLAIMS WITH ATTACHMENTS

The Document Management Portal (DMP) in CHAMPS is available to upload documents. This tool allows providers and billers to submit supporting documentation electronically for Medicaid electronic claims. (Refer to the MDHHS website for information and tutorials on the Document Management Portal. Refer to the Directory Appendix for website information.)

If comments or additional information are required with an electronic claim, electronic submitters must enter the information in the appropriate segments of the electronic record. If an operative report or other paper attachment is required, providers must use the Document Management Portal to submit electronic attachments to MDHHS. Within the Document Management Portal, the appropriate documentation category must be chosen along with completing specified information to successfully enter the document. MDHHS does not accept paper documentation via mail for any electronic claim. The Document Management Portal allows MDHHS to communicate directly with providers to resolve claim attachment issues prior to finalizing claim adjudication.

Consent forms (Consent for Sterilization [MSA-1959/HHS-687] and Acknowledgement of Receipt of Hysterectomy Information [MSA-2218]) must be submitted through the Document Management Portal. (Refer to the Forms Appendix for copies of the forms and to the Directory Appendix for website information.) MDHHS will notify the submitter of the status of their consent review within seven business days. Once the consent forms are approved and entered, it is not necessary to submit additional copies when billing for sterilization or hysterectomy services. All consent forms must be submitted through the Document Management Portal.

Electronic submitters must:

- Include the notation "Documents uploaded in DMP" in the Claim Note area (NTE02 Segment, Loop 2300) and Reference Code "ADD" (NTE01 Segment, Loop 2300) within the electronic claim.
- Comply with all standard HIPAA reporting requirements, including using Claim Adjustment Segment (CAS) codes when submitting secondary or tertiary claims.

Refer to the MDHHS website for Document Management Portal instructions. (Refer to the Directory Appendix for website information.)

2.2 PAPER CLAIMS

The CMS-1500 form (02-12) must be used when submitting paper claims. It must be a form printed with red ink with the numbers OMB-0938-1197 FORM 1500 (02-12) in the lower right corner. Instructions for completing the CMS 1500 claim form are available on the NUCC website or through your CMS-1500 vendor. (Refer to the Directory Appendix for website information.)

Claims may be prepared on a typewriter or on a computer. Handwritten claims are not accepted. Because claims are optically scanned, print or alignment problems may cause misreads thus delaying processing of the claim. Keep equipment properly maintained to avoid the following:

Medicaid Provider Manual

- Dirty print elements with filled character loops
- Light print or print of different density
- Breaks or gaps in characters
- Ink blotches or smears in print
- Worn out ribbons

Dot matrix printers should not be used as they result in frequent misreads by the OCR.

Questions and/or problems with the compatibility of equipment with MDHHS scanners should be directed to MDHHS Provider Inquiry. (Refer to the Directory Appendix for contact information.)

Paper claims should appear on a remittance advice (RA) within 60 days of submission. Do not resubmit a claim prior to the 60-day period.

2.2.A. GUIDELINES TO COMPLETE PAPER CLAIM FORMS

To assure that the scanner correctly reads claim information, adhere to the following guidelines in preparing paper claims. Failure to do so can result in processing/payment delays or claims being returned unprocessed.

- Dates must be either the eight-digit format (MMDDCCYY) or the six-digit format (MMDDYY) without dashes or slashes as instructed by the NUCC manual. Be sure the dates are within the appropriate fields on the form.
- Use only black ink.
- Do not write or print on the claim, except for the Provider Signature Certification.
- Handwritten claims are not acceptable.
- UPPER CASE alphabetic characters are recommended.
- Do not use italic, script, orator, or proportional fonts.
- 12-point type is preferred.
- Make sure the type is even (on the same horizontal plane) and within the boxes.
- Do not use punctuation marks (e.g., commas or periods).
- Do not use special characters (e.g., dollar signs, decimals, or dashes).
- Only service line data can be on a claim line. Do not squeeze comments below the service line.
- Do not send damaged claims that are torn, glued, taped, stapled, or folded. Prepare another claim.
- Do not use correction fluid or correction tape, including self-correcting typewriters.

Medicaid Provider Manual

- If a mistake is made, start over and prepare a clean claim form.
- Do not submit photocopies.
- Claim forms must be mailed flat, without folding, in 9" x 12" or larger envelopes. Do not fold the form.
- Put your return address on the envelope.
- Separate the claim form from the carbon.
- Separate each claim form if using the continuous forms and remove all pin drive paper completely. Do not cut edges of forms.
- Keep the file copy.
- Mail CMS 1500 claim forms separately from any other claim form type.

2.2.B. PROVIDING ATTACHMENTS WITH PAPER CLAIMS

When a claim attachment is required, it must be directly behind the claim it supports and be identified with the beneficiary's name and Medicaid ID number. Attachments must be on 8 ½" x 11" white paper and one-sided. Do not submit two-sided materials. Multiple claims cannot be submitted with one attachment. Each claim form that requires an attachment must have a separate attachment. Do not staple or paperclip the documentation to the claim form.

Mail claim forms with attachments flat, with no folding, in a 9" x 12" or larger envelope and print "Ext. material" (for extraneous material) on the outside. Do not put claims without attachments in this envelope. Mail claims without attachments separately. Do not send attachments unless the attachment is required as unnecessary attachments delay processing of claims.

Claim attachments, such as medical records and EOBs, may be associated to a paper claim via the Document Management Portal. (Refer to the Directory Appendix for website information.)

Once confirmation is received that the consent forms are approved, it is not necessary to submit additional copies when billing for sterilization or hysterectomy services. The notation "Consent form sent via Document Management Portal" must be included in the Remarks section of the paper claim.

Refer to the MDHHS website for Document Management Portal instructions, including fax requirements. (Refer to the Directory Appendix for website information.)

2.2.C. MAILING PAPER CLAIMS

All paper claim forms and claim forms with attachments must be mailed to MDHHS. (Refer to the Directory Appendix for contact information.)

2.3 REPORTING PROVIDER NPI

MDHHS requires that NPI numbers be reported in any applicable provider loop or field (e.g., billing, referring/ordering, rendering and supervising) on the claim. A provider's Taxpayer Identification Number (TIN) will also be used for claim adjudication. The TIN reported is either the provider's Employer Identification Number (EIN) or Social Security Number (SSN). The TIN reported is either the provider's Employer Identification Number (EIN) or Social Security Number (SSN). For a Type 2 (Organization) NPI, both the NPI and EIN must be reported at the billing provider loop for all electronic claims. For a Type 1 (Individual) NPI, both the NPI and EIN/SSN are required at the billing provider loop for electronic claims when a Type 2 NPI does not apply.

A Type 1 (Individual) NPI is the number associated with an individual healthcare professional (e.g., MD, DDS, CRNA, etc.). The individual may be a sole proprietor or be employed by a clinic, group practice, or other organization. If a sole proprietor, the Type 1 NPI must be reported in the billing provider loop or field of the claim for payment.

A Type 2 (Organization) NPI is the number required for organizations (such as clinics, group practices, and incorporated individuals) who provide healthcare services and receive payment. For MDHHS, the Organization NPI must be reported in the billing provider loop or field. Also for dental and professional claims, the appropriate Type 1 (Individual) NPI of the specific provider performing the service must be reported in the rendering provider loop or field for proper claim adjudication. Do not enter the Type 2 (Organization) NPI as the rendering provider.

MDHHS NPI claim editing will be applied to the billing, referring/ordering, rendering, and supervising provider, as applicable. A claim cannot be paid if the NPI is missing or the reported NPI is invalid as it does not check digit and/or correctly crosswalk to the Provider Enrollment files for these provider loops or fields.

2.3.A. BILLING PROVIDER

The billing provider loop or field is mandatory to complete on all claims. The billing provider must be enrolled with the program for payment. If the billing provider NPI reported is an invalid number and/or represents a non-enrolled provider, the entire claim will be denied for payment.

2.3.B. RENDERING PROVIDER

For claims requiring a rendering provider, the loop or field is mandatory. The rendering provider must be enrolled with the program for payment. If the rendering provider information is not reported on the claim, or if the provider is not enrolled in the Michigan Medicaid program, the claim cannot be paid. Claims for services rendered by non-physician practitioners (e.g., physician assistants and nurse practitioners) must be billed under the non-physician practitioner's NPI and include the NPI of the supervising physician as applicable.

School Services Program providers are exempt from this requirement and are not required to provide rendering NPIs on their claims.

2.3.C. REFERRING/ORDERING PROVIDER

Referring/ordering provider information is a claim submission requirement for all services rendered as a result of a referral/order. The claim must contain the name and individual NPI of the provider who referred/ordered the service(s)/item(s).

If the referring/ordering provider information is not reported on the claim, or if the provider is not enrolled in the Michigan Medicaid program, the claim cannot be paid.

Rendering providers should ensure their referral sources are aware of this requirement.

2.3.D. SUPERVISING PROVIDER

The supervising physician NPI may be a professional claim editing requirement for physician services rendered by an enrolled non-physician practitioner, such as a physician's assistant or advanced practice registered nurse. When physician collaboration or supervision is required by State law or Medicaid policy, claims must include the Medicaid enrolled supervising physician NPI. Refer to the Practitioner Chapter for additional information related to program requirements for supervision or physician collaboration for services provided by non-physician practitioners.

Medicaid Provider Manual

SECTION 3 - CLAIM COMPLETION

Instructions for completing the CMS 1500 claim form are available on the NUCC website or through your CMS-1500 vendor. (Refer to the Directory Appendix for website information.)

SECTION 4 - REPLACEMENT, VOID/CANCEL CLAIMS AND REFUND OF PAYMENT

4.1 REPLACEMENT CLAIMS (ADJUSTMENTS)

A replacement claim must be submitted when all or a portion of the claim was paid incorrectly or a third party payment was received after MDHHS made payment. When a replacement claim is received, MDHHS deletes the entire original claim and replaces it with the information contained on the replacement claim. All money paid on the original claim is debited and a new payment is issued based solely on information reported on the replacement claim.

Replacement claims should be submitted to:

- return an overpayment. (Provide an explanation of the reason for the overpayment in Remarks section.)
- correct information submitted on the original claim (other than to correct a provider NPI and/or beneficiary ID number). (Provide an explanation of what information is being corrected. Refer to the Void/Cancel Claims subsection below to correct errors related to a provider NPI and/or beneficiary ID number.)
- report payment from another source after MDHHS paid the claim. (Report the source of the payment (e.g., OI, Medicare, etc.) in the Remarks section.)
- correct information that the scanner misread (except a provider NPI or beneficiary ID number). (State reason in the Remarks section. Refer to the Void/Cancel Claims subsection below to correct provider NPI or beneficiary ID number errors.)

All claim completion instructions apply to completing a replacement claim. In addition:

- The provider NPI number and the beneficiary ID number on the replacement claim must be the same as on the original claim.
- Resubmission code 7 must be entered in the left side of Item 22 and the 18-digit Transaction Control Number (TCN) of the previously paid claim in the right side of Item 22. If either the resubmission code of 7 or the original TCN is missing, the claim cannot be processed as a replacement claim.

If all service lines of a claim were rejected, the services must be resubmitted as a new claim, not a replacement claim.

4.2 VOID/CANCEL CLAIMS (ADJUSTMENTS)

A void/cancel claim must be submitted when a claim was paid under an incorrect provider NPI or beneficiary ID number. When void/cancel claims are received, MDHHS deletes the original claim and all money paid on the claim is debited.

Medicaid Provider Manual

When submitting a void/cancel claim:

- The provider NPI number and beneficiary ID number must be the same as on the original claim.
- Resubmission code 8 must be entered in the left side of Item 22 and the TCN of the previously paid claim in the right side of Item 22. If the resubmission code of 8 or the original TCN is missing, the claim cannot be processed as a void/cancel claim.

All claim completion instructions apply for completing a void/cancel claim except as noted below:

- Complete one service line and enter zero dollars (000) in all money fields. The entire payment made on the first claim will be debited. A new claim may then be submitted using the correct beneficiary ID.

After the void/cancel claim is submitted, a new claim containing the correct provider NPI and/or beneficiary ID number may be submitted.

The MDHHS 12-month timely filing billing limitation policy applies to void/cancel claims. Refer to the Timely Filing Billing Limitation subsection of the General Information for Providers Chapter for additional information.

4.3 REFUND OF PAYMENT

Return of overpayments made by MDHHS, due to either payment from a third-party resource or due to an error, must be done through the use of a replacement claim or void/cancel claim. This process will result in a debit against future payment.

This requirement does not apply to **inactive** providers or monies being returned to MDHHS due to settlements or lawsuits. In these situations, checks must:

- be made payable to the State of Michigan in the amount of the refund.
- include the provider EIN (tax) number.
- be sent to the MDHHS Cashier's Unit. (Refer to the Directory Appendix for contact information.)

A copy of the remittance advice corresponding to the original payment and/or a detailed statement explaining the reason for the return of the payment should accompany the check.

Medicaid Provider Manual

SECTION 5 - CHANGES IN ELIGIBILITY ENROLLMENT (FFS/MHP/CSHCS)

It is the provider's responsibility to determine eligibility/enrollment status of beneficiaries at the time services are provided and obtain the appropriate authorizations for payment.

Medicaid or Children's Special Health Care Services (CSHCS) beneficiaries may lose eligibility or change enrollment status on a monthly basis. Enrollment status changes include beneficiaries changing from FFS (Fee-For-Service Medicaid or CSHCS) to a MHP, from one health plan to another health plan, or from a health plan to FFS. Normally the change occurs at the beginning of a month; however, some changes may occur during the month. It is important that providers check beneficiary eligibility before each service is provided to determine who is responsible for payment and whether authorization is necessary. (Refer to the Beneficiary Eligibility Chapter of this manual for additional information.)

5.1 INPATIENT HOSPITAL ADMISSIONS AND SERVICES [CHANGE MADE 7/1/2025]

The following guidelines are intended to assist providers and health plans regarding authorization of services and payment responsibility, particularly when a change in enrollment status has occurred.

- All admissions (other than emergency admissions) require authorization. All medical/surgical (nonpsychiatric) admissions must be authorized by the MDHHS Program Review Division (PRD) or by the Health Plan the beneficiary is enrolled in at the time of the admission. The local Prepaid Inpatient Health Plan (PIHP)/Community Mental Health Services Program (CMHSP) must authorize all psychiatric admissions.
- Services provided during the admission may also require authorization for health plan enrollees. Providers must be aware of the beneficiary's enrollment status and of health plan requirements and processes for authorization. Consultations, surgical procedures, and diagnostic tests may not be reimbursed unless a health plan's authorization process is followed.
- If a beneficiary is admitted by the local PIHP/CMHSP, the admission and all psychiatric services are the responsibility of the PIHP/CMHSP. However, any nonpsychiatric medical/surgical services needed during a psychiatric admission are the responsibility of the health plan and must be authorized by the health plan. This includes transportation to another facility for medical/surgical services. If a beneficiary is admitted for medical/surgical services authorized by the health plan and needs psychiatric consultation or care, the PIHP/CMHSP must be contacted for authorization and is then responsible for payment for the psychiatric services once authorization has been obtained.
- If a beneficiary is admitted to an inpatient hospital facility and the enrollment status changes during the admission, payment for all services provided until the date of discharge are the responsibility of the payer at the time of admission. Services provided after discharge are the responsibility of the new payer. Discharge planning should include the new payer for authorization of any medically necessary services or treatments required after discharge from the hospital.
- If a beneficiary is transferred from one inpatient hospital to another inpatient hospital, this does not constitute a discharge. The payer at admission is the responsible party until the beneficiary is discharged from the inpatient hospital setting to a nonhospital setting.

Medicaid Provider Manual

The following examples illustrate payment responsibilities:

FFS to Health Plan	A FFS beneficiary is admitted to the hospital on September 15, enrolled in a health plan on October 1, and discharged from the hospital on October 5. The health plan is not responsible for services until October 5, after discharge. FFS is responsible for the entire admission and physician services provided during the admission. The health plan must be contacted at discharge to transition care needs and authorize services needed after discharge such as rental of equipment, ongoing medical supply needs, ongoing treatment (e.g., home health care, physical therapy, chemotherapy, IV infusion), etc.
Health Plan to Health Plan	If a beneficiary is in health plan "A" during September and changes to health plan "B" for October, health plan "A" is responsible for the admission. Health plan "B" must be contacted during the discharge planning process and is responsible for authorizing all services needed after discharge.
Health Plan to Health Plan with Transfer to a Tertiary Hospital	A beneficiary enrolled in health plan "A" is admitted for authorized surgery in June. The beneficiary is enrolled in health plan "B" on July 1. After surgery, the patient develops complications necessitating a transfer to a tertiary hospital on July 2. The beneficiary is subsequently discharged to home on July 6. Plan "A" is responsible for all hospital and physician services through July 6, and plan "B" is responsible for all services needed after discharge.
Hospitalization for Medical Reasons During an Inpatient Psychiatric Stay	A health plan beneficiary is admitted for inpatient psychiatric care by a PIHP. During the admission, the beneficiary requires surgery for medical reasons at another facility. The beneficiary's health plan must authorize the surgery and is responsible for paying for transport between the facilities and for charges related to the surgery.

(text deleted 7/1/2025)

Providers are advised to check the eligibility response for changes in enrollment status prior to billing. (Refer to the Beneficiary Eligibility Chapter for additional information.)

5.2 ONGOING SERVICES AND EXTENDED TREATMENT PLANS

Providers are responsible for verifying a beneficiary's eligibility/enrollment status before each service is rendered, particularly on the first day of a new month. Even though a beneficiary may be involved in an ongoing treatment or care plan, a change in enrollment status requires new authorization from the new responsible party. Enrollment in a health plan always triggers an authorization process. There is no requirement for a new health plan to reimburse providers for services that were authorized under a previous health plan with an exception for CSHCS/Medicaid beneficiaries with a Prior Authorization (PA) in place at the time of enrollment in the current health plan.

In order to preserve continuity of care, MHPs and Fee-For-Service (FFS) must accept PAs in place when the CSHCS/Medicaid beneficiary has a change in enrollment status. For CSHCS/Medicaid beneficiaries who have been in the FFS system and who have FFS PA in place at the time the MHP receives the enrollment file, MHPs are expected to honor the PA in place for 30 days after the effective date of enrollment. Full reciprocity is required between the party that originally authorized the service and the new payer for the first 30 days following the enrollment change. This includes accepting the approved provider, services, quantity limits, Medicaid rates and special rates, as well as other terms that have been negotiated for the beneficiary's care.

Medicaid Provider Manual

- The servicing provider is responsible for transmitting a copy of the previously approved PA to the new payer when there is a change in the beneficiary's enrollment status.
- If the prior authorized provider is not in the MHP network, the MHP must pay the out-of-network provider at the prior authorized rate for the first 30 days following the enrollment change. Providers may not bill FFS or the beneficiary for services covered by the MHP; the provider must bill the MHP.
- Providers must be enrolled with Medicaid to bill FFS. Providers may not bill the MHP or the beneficiary for services covered by Medicaid FFS; the provider must bill FFS.

For all other purposes, the health plan in which the beneficiary is enrolled must assess the need for continuing services and authorize as appropriate. Health plans should facilitate the transition between providers for all beneficiaries to ensure continuity of care.

In situations where a change in enrollment status occurs during a hospital admission, physician services provided during the admission are the responsibility of the payer for the admission.

The following are examples of situations that may occur while providing care to an eligible beneficiary.

FFS to Health Plan	A beneficiary is in FFS in June. On June 15, MDHHS authorizes a breast reconstruction after mastectomy for breast cancer. The surgery is scheduled for July 20. On July 1, the beneficiary is enrolled in a health plan with the same primary care provider and surgeon. The surgeon must follow the health plan process for authorization of the reconstructive surgery as the plan is now the payer, not FFS. MDHHS authorization would be void.
Voluntary Health Plan Change During a Course of Treatment	A beneficiary is in health plan "A" in July and is involved in a course of physical therapy (PT). The therapy program was authorized for six weeks. On August 1, the beneficiary changes enrollment to health plan "B" and still has two more scheduled weeks of PT. Before PT can continue, the provider must obtain a new authorization from health plan "B." Ideally, as a plan-to-plan change occurs at the request of the beneficiary, the provider would coordinate the transition to the new plan, maintain continuity of care and have an authorization in place from plan "B" so the ongoing PT is not interrupted. However, if PT continues without new plan "B" authorization, plan "A" is not responsible and plan "B" may or may not honor the treatment. The provider cannot bill the beneficiary as the services are covered and it is the provider's responsibility to verify eligibility/enrollment changes and obtain any necessary authorization.

5.3 DURABLE MEDICAL EQUIPMENT [TITLE REVISED & CHANGE MADE 7/1/2025]

MDHHS policy directs providers to bill the date of delivery for durable **medical (text revised 7/1/2025)** equipment. However, when a beneficiary has a change in enrollment status and the responsible payer is different on the date of delivery than on the date of order, providers must bill the date of order and specify the date of delivery in the Comments/Remarks box on the claim. This is especially important when a beneficiary changes from FFS to a health plan.

SECTION 6 - SPECIAL BILLING

For professional claims, many of the coding conventions described in the CPT manual apply when submitting claims to MDHHS. Additionally, CMS guidelines apply in many instances. Some services may require additional billing information in order to receive correct reimbursement from Medicaid programs and CSHCS.

Do not send documentation with the claim unless it is a MDHHS requirement for processing the claim. The use of modifiers replaces documentation requirements in many instances.

If you have unusual circumstances to report, contact Provider Inquiry for assistance. (Refer to the Directory Appendix for contact information.)

6.1 GENERAL INFORMATION [CHANGE MADE 7/1/2025]

Bundled Codes	MDHHS follows Medicare guidelines for bundled services. CPT procedure codes with a CMS status indicator of "B" indicate that payment for the covered service is always bundled into payment for other related services not specified. These bundled codes do not receive separate reimbursement. Status code indicators may be found in the RVU file on the CMS website. (Refer to the Directory Appendix for website information.)
Coding	<p>All unlisted or not otherwise classified (NOC) codes require an explanation of the service/item provided. The explanation may be entered in the Remarks Section or may be provided as a claim attachment. Do not recode procedure codes submitted to Medicare or other insurers to unlisted or NOC codes when billing Medicaid unless MDHHS does not cover the procedure code. When Medicaid covers the procedure code, providers must submit the same procedure code to Medicaid that was submitted to the other payer to ensure proper reimbursement.</p> <div>Claims will be rejected for inappropriate recoding even if PA was issued by MDHHS.</div>
Diagnosis Coding	Use ICD coding conventions to report the diagnosis code(s) at the highest level of specificity and with the correct number of digits. An external cause code cannot be reported as a primary diagnosis. If an external cause code is reported as primary, or if a code requires additional digits, the claim will reject.
Place of Service Codes	<p>Use CMS approved two-digit place of service codes to report location for provision of covered services.</p> <p>MDHHS does not recognize the following place of service codes for reimbursement by the program:</p> <ul style="list-style-type: none">05 – Indian Health Service Freestanding Facility06 – Indian Health Service Provider-Based Facility08 – Tribal 638 Provider-Based Facility09 – Prison Correctional Facility(text deleted 7/1/2025)

Medicaid Provider Manual

	<ul style="list-style-type: none"> 25 – Birthing Center 26 – Military Treatment Facility 53 – Community Mental Health Center 54 – Intermediate Care Facility for Individuals with Intellectual Disabilities (ICF/IID) [Known as Intermediate Care Facility/Mentally Retarded (ICF/MR) by CMS] <p>Additionally, some locations may be covered only for select providers. Refer to the appropriate provider-specific chapters of this manual for more information.</p>
Prior Authorization	For elective services requiring PA, authorization must be obtained before providing the service. A letter approving or denying the service will be sent to the requesting provider along with a PA number, if approved. Do not submit the letter with the claim when billing. Report the PA number in item 23.

6.2 THIRD PARTY COVERAGE

Identification of Third Party Resources	Providers must always identify third party resources and report third party payments in the appropriate item(s) on the claim. Third party resources must be identified even when the payer does not cover the services.
Medicare Services	<p>Medicare covered services must be submitted on one claim and any excluded services must be submitted on a separate claim. Do not mix covered and excluded services on the same claim.</p> <p>Providers must indicate Medicare's allowable amount as the charge (item 24F) and report the actual payment and/or deductible as instructed.</p> <p>If the beneficiary is in a Medicare risk HMO, the fixed copay must be entered in item 24F.</p> <p>Refer to the Coordination of Benefits Chapter for information regarding Medicare crossover claims.</p>
Commercial Plan with Fixed Copay	If the beneficiary is in a commercial plan with fixed copays, the copay must be entered in item 24F.
Commercial Insurance Payments	If payments are made by a commercial insurance, the EOB must be submitted with the claim.
Medicaid Deductible	If the beneficiary's Medicaid deductible amount is met in the middle of a service so that part of the charge is the beneficiary's responsibility and part is Medicaid's responsibility, enter the remaining Medicaid liability for the service in item 24F of the service line.
Spend-down	See Medicaid Deductible.
Evidence of Other Insurance Response	<p>When billing on the CMS 1500 paper claim form, providers must submit evidence of other insurance responses (EOBs, denials, etc.) when billing MDHHS for covered services.</p> <p>If billing electronically, no EOB is necessary, as all required data are part of the electronic format. However, in all cases where a provider is billing on the CMS 1500 claim form, a copy of the Medicare EOB must be submitted with the claim.</p>

Medicaid Provider Manual

Beneficiaries in a MHP or PIHP	<p>MDHHS cannot be billed for copays, deductibles, or any other fee for services provided to beneficiaries enrolled in a MHP or who are receiving services under PIHP/CMHSP capitation. Payment for services must be obtained from the MHP/PIHP/CMHSP.</p> <p>For detailed information related to third party billing, including Medicare and commercial insurance, refer to the Coordination of Benefits Chapter of this manual.</p>
Injectable Drugs Covered as a Pharmacy Benefit by Third Party Payers	<p>When billing for injectable drugs that are covered as a pharmacy benefit by a third party payer but covered as a physician service by Medicaid, the provider must reflect the payment from the carrier on the claim. The fixed copay/coinsurance/deductible must be reported in the appropriate field on the electronic claim form and in Item 24F on the CMS 1500 paper form.</p>

6.3 AMBULANCE

Wait Time	<p>The appropriate number of time units must be reflected in the Quantity field. One time unit represents each 30 minutes of waiting time after the first 30 minutes. No additional payment is made for the first 30 minutes of waiting time (i.e., total waiting time of 1 hour 30 minutes = 2 time units).</p> <p>The Remarks section or claim attachment must include the following information:</p> <ul style="list-style-type: none">▪ Total length of waiting time, including the first 30 minutes.▪ Name and NPI of the physician ordering the wait.▪ Reason for the wait.
Mileage	<p>When billing a mileage code for trips totaling:</p> <ul style="list-style-type: none">▪ Less than 100 miles, ambulance providers must report mileage units rounded up to the nearest tenth of a mile (e.g., 15.5 miles). For trips totaling less than one mile, ambulance providers must report a "0" prior to the decimal (e.g., 0.5 miles). For claims submitted with mileage units greater than one decimal place, Medicaid will truncate to accommodate its fractional billing policy (e.g., 15.99 reported miles will become 15.9 miles).▪ 100 miles or more, ambulance providers must report mileage rounded up to the nearest whole mile. For claims submitted totaling 100 miles or more and that are reported using fractional mileage, Medicaid will truncate to accommodate this policy (e.g., 115.99 reported miles will become 115 miles). Medicaid will not round up to the nearest whole mile for ambulance runs totaling 100 miles or more that are truncated as a result of this policy.

Medicaid Provider Manual

6.4 ANCILLARY MEDICAL SERVICES

National Drug Code (NDC) Reporting for Physician-Administered Drugs

A provider is required to report the National Drug Code (NDC) supplemental information in addition to the procedure code (CPT or HCPCS) when billing for a physician-administered drug on the electronic and paper claim formats. Coverage of a physician-administered drug (except an immunization) is limited to a drug product from a manufacturer who has a signed rebate agreement with the Centers for Medicare & Medicaid Services (CMS). A current listing of the manufacturers who have signed rebate agreements with CMS can be found on the CMS website. (Refer to the Directory Appendix for website information.) Providers are required to review the website for any changes. MDHHS will not provide an updated listing of manufacturers with signed rebate agreements with CMS.

Providers can report decimals if they are part of the NDC supplemental information.

The NDC information must be reported on Medicare crossover claims.

Claims submitted with invalid or missing NDC information or an NDC by a manufacturer who does not have a signed rebate agreement with CMS will reject at the claim line level.

Examples in billing the NDC supplemental information and the NDC 5-4-2 format can be found on the MDHHS website. (Refer to the Directory Appendix for website information.)

Electronic Claims:

Providers must report the NDC supplemental information in the appropriate segments in the electronic format. Zero dollars (0.00) may also be reported as the NDC Unit Price. A provider who bills a procedure code with multiple NDCs (e.g., compound drug) must repeat the same HCPCS code on multiple service lines allowing each NDC to be reported. The prescription number must be listed on each service line (REF segment) to link this service as one compound drug.

(Refer to the Directory Appendix for additional resources and website information.)

DDE Claims:

To report a procedure code with multiple NDCs (e.g., compound drug), the same HCPCS code must be repeated on multiple service lines, allowing each NDC to be reported. The prescription number must be reported on each service line to link this service together as one compound drug.

CMS 1500:

Providers must report the NDC supplemental information along with the procedure code in Items 24A - 24D on the CMS 1500. A provider can refer to the National Uniform Claim Committee (NUCC) 1500 Health Insurance Claim Form Reference Manual for Version 08/05 for further information. This manual is available on the NUCC website. (Refer to the Directory Appendix for website information.) Providers who bill a procedure code with multiple NDCs must report the first NDC supplemental information on the form in Items 24A - 24D and report subsequent NDC supplemental information in a claim attachment. Report "see attachment" in Item 19 on the CMS 1500 to indicate additional NDC supplemental information is being billed.

Medicaid Provider Manual

Injectable Drugs	<p>If an injectable drug, except a vaccine, is administered on the same day as another service, the administration of the drug is considered a part of the other service and cannot be billed separately. The procedure code, its NDC supplemental information, and the cost of the drug are billed. The cost of the drug must be reflected in the charge submitted to Medicaid. For example, if the drug is obtained at a lower than normal cost through the 340B Program, then the 340B price must be reported on the claim. In addition, injectable drugs purchased through the 340B program must be indicated on the CMS 1500 or in the appropriate field in the electronic format using the modifier U6.</p> <p>If a nonspecific or not otherwise classified (NOC) code is billed, the NDC supplemental information must be reported in Items 24A - 24D of the CMS 1500 or in the appropriate segments of the electronic format. Do not recode injectable drugs from a national procedure code covered by Medicare or other payers to a NOC code when billing Medicaid unless MDHHS does not cover that procedure code. When Medicaid covers the procedure code, providers must submit the same procedure code to Medicaid that was submitted to the other payer to ensure proper reimbursement.</p>
Injectable Drugs and Biological Products Not Covered by Medicaid Health Plans	<p>When multiple medical services are provided in conjunction with a carved-out physician-administered drug, FFS claims will process for payment of the carved-out drug service line only; all other claim lines will be denied with Claim Adjustment Reason Code (CARC) 24 – Charges are covered under a capitation agreement/managed care plan. The associated services that are denied by FFS are to be billed to the beneficiary's health plan for payment.</p>
Chemotherapy Drugs	<p>Chemotherapy drugs and the administration of the chemotherapy drugs must be billed separately. Separate payment is also made for chemotherapy administration by push and by infusion techniques on the same day. The cost of the drug must be reflected in the charge submitted to Medicaid. For example, if the drug is obtained at a lower than normal cost through the 340B Program, the 340B price must be reported on the claim. In addition, chemotherapy drugs purchased through the 340B program must be indicated on the CMS 1500 or in the appropriate field in the electronic format using the modifier U6.</p> <p>If a chemotherapy drug is billed under a nonspecific or not otherwise classified (NOC) code, the NDC supplemental information must be reported in Items 24A - 24D of the CMS 1500 or in the appropriate segment of the electronic format. Do not recode chemotherapy drugs from a national procedure code covered by Medicare or other payers to a NOC code when billing unless Medicaid does not cover that procedure code. When Medicaid covers the procedure code, providers must submit the same procedure code to Medicaid that was submitted to the other payer to ensure proper reimbursement.</p>
Immunizations	<p>Immunizations must be reported using the administration fee code(s) and the code identifying the type of vaccine given. Each vaccine/toxoid given must be reported in addition to the appropriate CPT administration code(s). Immunization administration is covered in addition to the vaccine even if an Evaluation and Management (E/M) visit is reported on the same day. Immunizations included in the Vaccine For Children (VFC) Program are free to providers so the charge for these vaccines must be reported as 0.00 (zero dollars).</p> <p>Medicaid FFS or the appropriate Medicaid Health Plan can be billed directly for immunizations provided to a child even if other insurance resources are available. The preventive pediatric diagnosis code(s) must be included on a claim to avoid a rejection.</p>

Medicaid Provider Manual

Allergy Immunotherapy Services	For allergy immunotherapy services, only component services may be billed. Bill the number of doses of allergy extract or stinging insect venom prepared for and administered to the beneficiary on that date.
Component Billing	For diagnostic tests with global, professional and technical components, practitioners can bill the global service only in the non-facility setting. The professional component may be billed in any setting. Technical component procedures are institutional charges and are not to be billed separately by practitioners when performed in facility settings.

6.5 ANESTHESIA SERVICES

Anesthesia HCPCS/CPT codes include all services integral to the anesthesia procedure such as preparation, monitoring, intra-operative care, and post-operative care until the beneficiary is released by the anesthesia practitioner to the care of another physician or other qualified health care professional. (Refer to the Practitioner Reimbursement Appendix of this manual for information regarding the fee schedule rate calculation for anesthesia services.)

Anesthesia Base Units	Anesthesia base units represent the value assigned by the Centers for Medicare & Medicaid Services (CMS) to each anesthesia CPT code. Anesthesia base units account for all other activities other than anesthesia time which include usual pre-operative, intra-operative, and post-operative visits, administration of fluids and/or blood products incident to anesthesia care, and monitoring services. The anesthesia base units for each surgical procedure are specified in the anesthesia fee schedule and should not be included in the reported time units (quantity).
Anesthesia Time	<p>Anesthesia time is defined as the period during which an anesthesia practitioner is furnishing continuous anesthesia care to the beneficiary. Time starts when the anesthesia provider begins to prepare the beneficiary for induction of anesthesia and continues throughout the case and while the anesthesia provider accompanies the beneficiary to the post-anesthesia care. Time stops when the provider releases the beneficiary to the care of the post-anesthesia care area personnel. In counting anesthesia time when an interruption in the anesthesia service occurs, only the actual time furnishing anesthesia care is counted. Anesthesia start and stop times must be documented in the medical record.</p> <p>Providers are to report actual anesthesia time in minutes on claims for reimbursement.</p> <p>The evaluation and examination of the beneficiary prior to surgery is considered part of the anesthesia service and included in the base unit value of the anesthesia code and is not to be reported in the anesthesia time.</p>
Coding	Report anesthesia services with the five-digit CPT anesthesia codes. Only one primary anesthesia service should be reported for a surgical session. Use the anesthesia code related to the major surgery.
Modifiers	Every anesthesia service must have an appropriate anesthesia modifier reported on the service line.

Medicaid Provider Manual

Anesthesia Add-on Codes	<p>Anesthesia add-on CPT codes (e.g., 01953) are covered in addition to the primary anesthesia code. For all nonobstetrical anesthesia add-on codes, report time units under the primary anesthesia code. Reimbursement is a flat rate calculated using the base units multiplied by the State anesthesia conversion factor. Exceptions are obstetric anesthesia add-on CPT codes 01968 and 01969 which are reimbursed utilizing base units, time and the State anesthesia conversion factor.</p> <p>Obstetric anesthesia add-on CPT codes 01968 and 01969 are reimbursed utilizing base units, time and the State anesthesia conversion factor. For obstetrical anesthesia add-on codes, report the anesthesia time in minutes associated with the add-on code separately from the anesthesia time in minutes associated with the primary obstetrical anesthesia code.</p>
Concurrent Surgical and Anesthesia Services	<p>If allowable surgical services are reported in addition to the anesthesia procedure, do not report time units for surgical services.</p>

6.6 CENTERING PREGNANCY™ [TITLE REVISED AND RE-NUMBERED 4/1/2025]

Medicaid may reimburse a maximum of 12 total in-person group sessions per pregnant beneficiary in addition to the required individual professional maternity visit when all the following criteria are met:

- The group visit is in addition to, and does not replace, the individual prenatal physical assessment visit;
- Group sessions are 90 to 120 minutes; and
- Documentation must support the actual time the pregnant individual spent in the group session.

One of the 12 group visits may be provided in relation to the postpartum professional visit.

Report group prenatal services as follows:

Visit Type	Group Prenatal Visits
Procedure Code	CPT 99078 Physician or other qualified health care professional qualified by education, training, licensure/regulation (when applicable), educational services rendered to patients in a group setting (e.g., prenatal, obesity, or diabetic instructions)
Modifier	TH - Obstetrical treatment/services, prenatal or postpartum

Medicaid Provider Manual

6.7 CHILDREN'S WAIVER PROGRAM [RE-NUMBERED 4/1/2025]

Holiday Pay	<p>Additional reimbursement is allowed under the Children's Waiver Program for Community Living Supports (CLS) and Respite Services performed on a holiday.</p> <p>Information regarding the specific procedure codes and associated holiday rates is available on the MDHHS website in the MDHHS CMHSP Children's Waiver Database. (Refer to the Directory Appendix for website information.)</p> <p>Current recognized holidays are: New Year's Day, Easter, Memorial Day, July 4th, Labor Day, Thanksgiving Day and Christmas Day. A holiday begins at 12:00 a.m. and ends at 12:00 midnight.</p>
Modifiers	<p>Use the appropriate HCPCS modifier that represents the level of the professional providing the service. Refer to the MDHHS CMHSP Children's Waiver Database on the MDHHS website for the appropriate modifier/procedure code combination. Refer to other billing instructions in this chapter for special circumstances requiring the use of a modifier.</p>
Prior Authorization	<p>Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter, Children's Waiver Section for information regarding prior authorization.</p>
Respite Services to More Than One Beneficiary	<p>When services are provided to more than one beneficiary at the same time, use the TT modifier on each claim. If services are performed for more than one beneficiary at the same time by an LPN or RN, use the LPN/RN modifier, as appropriate, in addition to the TT modifier.</p>
Units of Service	<p>Report the units of service/quantity based on the service that was performed. Some services by description are in 15-minute increments; if an hour of service was performed, this would be reported as 4 units of service. If the code description is per hour and 2 hours of service were performed, the reported units would be 2. Refer to the MDHHS CMHSP Children's Waiver Database for the allowable units.</p>

6.8 CHILDREN'S SERIOUS EMOTIONAL DISTURBANCE HOME AND COMMUNITY-BASED SERVICES WAIVER PROGRAM [RE-NUMBERED 4/1/2025]

Holiday Pay	<p>MDHHS allows additional reimbursement under the Children's Serious Emotional Disturbance Home and Community-Based Services Waiver (SEDW) Program for Community Living Supports (CLS) and Respite Services performed on a holiday.</p> <p>Information regarding the specific procedure codes and associated holiday rates is available on the MDHHS website in the MDHHS CMHSP Serious Emotional Disturbance (SED) Waiver Database. (Refer to the Directory Appendix for website information.)</p> <p>Current recognized holidays are: New Year's Day, Easter, Memorial Day, July 4th, Labor Day, Thanksgiving Day and Christmas Day. A holiday begins at 12:00 a.m. and ends at 12:00 midnight.</p>
Modifiers	<p>Use the appropriate HCPCS modifier that represents the level of the professional providing the service. Refer to the MDHHS CMHSP Serious Emotional Disturbance (SED) Waiver Database on the MDHHS website for the appropriate modifier/procedure code combination.</p>

Medicaid Provider Manual

Prior Authorization	Community Transition Services require prior authorization.
Services to More than One Beneficiary	A modifier is required to indicate that services were provided to more than one beneficiary at a time for Community Living Supports (CLS), Community Wraparound and Respite Services. When services are provided to more than one beneficiary at the same time, use the TT modifier on each claim.
Units of Service	Report the units of service/quantity based on the service that was performed. Some services by description are in 15-minute increments; if an hour of service was performed, this would be reported as 4 units of service. If the code description is per hour and 2 hours of service were performed, the reported units would be 2. Refer to the MDHHS CMHSP Serious Emotional Disturbance (SED) Waiver Database for the allowable units.

6.9 CLINICAL TRIALS [RE-NUMBERED 4/1/2025]

All claims for routine patient costs associated with participation in a clinical trial must include the National Clinical Trial (NCT) number and an ICD-10 diagnosis code indicating the services are associated with a clinical trial. Claims must also include a completed and signed Attestation to the Appropriateness of the Qualified Clinical Trial form (BPHASA-2210). (Refer to the Forms Appendix to review the form and to the Directory Appendix for form access on the MDHHS website.) In addition, professional claims must include:

- ICD-10-CM Z00.6 (encounter for examination for normal comparison and control in clinical research program) in the primary or secondary position.
- Clinical trial and non-clinical trial services on separate line items when claims are submitted for both types of services on the same claim.
- Identify each line with the appropriate Healthcare Common Procedure Coding System (HCPCS) Modifier.
 - HCPCS Modifier Q1 – routine clinical service provided in a clinical research study that is in an approved clinical research study.

Generally, services, investigational drugs, or items that are part of the clinical trial and considered experimental or investigational are not program covered services and should not be reported on a claim. In instances when claims processing edits require non-covered services be billed with their associated procedures, or when it is necessary for a provider to show the items and services provided free-of-charge to receive payment for the covered routine costs, providers are instructed to report non-covered services/charges on a separate claim line with the appropriate modifier and a charge of \$0.

- HCPCS Modifier Q0 - investigational clinical service provided in a clinical research study that is in an approved clinical research study.

Refer to the Billing & Reimbursement for Institutional Providers and the Practitioner chapters for additional information.

Medicaid Provider Manual

6.9.A. REPORTING COVERED SERVICES [RE-NUMBERED 4/1/2025]

Submit claims for services using the CMS 1500/837P professional claim format as follows:

Paper/direct data entry	Report the clinical trial number in FL 19.
Electronic claim form 837P	Report the clinical trial number in Loop 2300 NTE.

6.10 COMMUNITY HEALTH WORKER SERVICES [RE-NUMBERED 4/1/2025]

CHW services are to be reported as follows:

- 98960 (education and training for patient self-management; individual patient)
- 98961 (education and training for patient self-management; 2-4 patients)
- 98962 (education and training for patient self-management; 5-8 patients)

These codes are to be reported in 15-minute increments and must be billed with the CG modifier to be considered for payment. One 15-minute increment equals one unit of service. The group size may not exceed eight beneficiaries.

Providers are asked to insert the following into the notes/comments section of the claim to provide additional information about the services being performed:

Claims Notes Section	Description (Based on Beneficiary Need – Covered Services)
C100	Chronic Health Condition – Health System Navigation and Resource Coordination
C200	Chronic Health Condition – Health Promotion and Education
C300	Chronic Health Condition – Screening and Assessment
C400	Chronic Health Condition – Other
S100	Social Need – Health System Navigation and Resource Coordination
S200	Social Need – Health Promotion and Education
S300	Social Need – Screening and Assessment
S400	Social Need – Other
P100	Pregnancy and up to 12 months Postpartum – Health System Navigation and Resource Coordination
P200	Pregnancy and up to 12 months Postpartum – Health Promotion and Education
P300	Pregnancy and up to 12 months Postpartum – Screening and Assessment

Medicaid Provider Manual

Claims Notes Section	Description (Based on Beneficiary Need – Covered Services)
P400	Pregnancy and up to 12 months Postpartum – Other
T100	Other Eligibility – Health System Navigation and Resource Coordination
T200	Other Eligibility – Health Promotion and Education
T300	Other Eligibility – Screening and Assessment
T400	Other Eligibility – Other

Medicaid-enrolled groups/organizations billing for CHW services must report the enrolled CHW as the rendering/servicing provider within the appropriate field on the Professional Claim Form CMS 1500. The CHW reported as the rendering/servicing provider must be enrolled in CHAMPS on the date of service reported on the claim.

6.11 DOULA SERVICES [RE-NUMBERED 4/1/2025]

All claims for doula services must include an ICD-10 diagnosis code and HD modifier to support the services billed. In addition, doulas are encouraged to report the appropriate ICD-10 diagnosis codes within the range of Z55-Z56 to describe any relevant social determinants of health.

Visit Type	Procedure Code	Modifier	Primary Diagnosis Codes	Limit per Pregnancy
Prenatal Visits and Postpartum Visits	S9445	HD	Prenatal: Z33.1 Postpartum: Z39.2	12 total visits
Attendance at Labor and Delivery	T1033	HD	Z33.1	1 visit

6.12 DURABLE MEDICAL EQUIPMENT, PROSTHETICS, ORTHOTICS AND SUPPLIES (DMEPOS) [RE-NUMBERED 4/1/2025]

6.12.A. DATE(S) OF SERVICE [RE-NUMBERED 4/1/2025]

Medical Supplies	For medical supplies, the date supplied must be reported as the date of service.
Diaper and Incontinent Supplier	For the Diaper and Incontinent Supplier Contract, the date the order is transmitted by the contractor to the fulfillment house is the date of service.
DME/Prosthetics/Orthotics	For both custom and noncustom durable medical equipment (DME) and prosthetics and orthotics (P&O), the date of delivery must be reported as the date of service. For subsequent rental months, if applicable, the DOS must be the first day of the service month based on the original date of delivery.

Medicaid Provider Manual

Custom-Fabricated DME or P&O Appliances	For custom-fabricated DME or P&O appliances when there is a loss of eligibility or a change in eligibility status (e.g., from FFS to health plan enrollment or vice versa) between the time the item is ordered and is delivered, the order date rather than the delivery date must be reported as the date of service. For payment, the item must be delivered within 30 days after loss or change in eligibility.
Rented DMEPOS	For all rented DMEPOS, if a beneficiary's death occurs during a specific month in which payment has already been made, the prorating of actual days the items were used is not required.

6.12.B. DAYS OR UNITS [RE-NUMBERED 4/1/2025]

Continuous Passive Motion Device	For a passive motion device, the rental must be billed as a daily rate by reporting total number of days used as units. (Up to 21 days of rental may be considered for payment.)
Enteral Formula	For enteral formula (administered orally or by tube), the appropriate formula HCPCS code should be billed on a monthly basis with total caloric units reported as the quantity. To determine the number of caloric units, divide the total number of calories of all cans to be used by 100.
Gradient Compression Stockings/Surgical Stockings	<p>Gradient compression stockings are considered a "one item" service. The right (RT) and left (LT) modifiers must be used for these items when reporting HCPCS codes A6530 – A6549. When a gradient compression stocking is provided bilaterally, the same code is reported for both garments on one service line using modifiers LTRT with a quantity of "2".</p> <p>Surgical stockings and most gradient compression stockings are packaged by a pair and are billed with a quantity of "1" for each stocking. No RT or LT modifier is required for billing surgical stockings.</p>
Home Intravenous Infusion Therapy	For home intravenous infusion therapy, HCPCS "S" codes must be reported as a daily rate by reporting the total number of days used as units unless otherwise noted in the code description. A home infusion therapy code may be billed with modifier "SH" or "SJ" if multiple drugs are being administered concurrently (e.g., SH – 2 drugs, SJ – 3 drugs). Routine catheter care is included with the daily rate for the active infusion. For chemotherapy and pain management, the specific HCPCS code will designate either continuous or intermittent administration. If the therapy is provided without interruption for 24 hours or more, report the continuous therapy code. For less than 24 hours of therapy, use the intermittent code. For antibiotic, antiviral or antifungal therapy, report the code that best describes the frequency of administration. Only one therapy code of this series may be reported on the same date of service.
Parenteral Intravenous Infusion Therapy	For parenteral intravenous infusion therapy, the appropriate HCPCS "B" codes must be billed as a daily rate by reporting total number of days used as units. The parenteral lipids, the parenteral pre-mix solution, the infusion pump, supply kit, and the administration kit may be billed in combination with each other.

Medicaid Provider Manual

Powered Air Flotation Bed/Air-fluidized Bed

For a powered air flotation bed or air-fluidized bed, the rental must be billed as a daily rate by reporting total number of days used as units. (Up to 10 months of rental may be considered for payment.)

For a powered air flotation bed or air-fluidized bed, the "MS" modifier is reported only after 10 months of rental have occurred and an additional six months of continued maintenance and servicing of the item has been provided. A quantity of "1" must be reported for the entire six-month period of service.

6.12.C. HOSPITAL DISCHARGE WAIVER SERVICES [RE-NUMBERED 4/1/2025]

To bypass the PA requirement when billing for standard DME covered under the hospital discharge waiver service, report the discharge date in item 18. (The discharge date must be entered in the eight-digit MMDDCCYY format.)

6.12.D. CONVERTING RENTAL TO PURCHASE [RE-NUMBERED 4/1/2025]

If the purchase of an item is requested after a previous rental month(s) has been paid, the provider must subtract all amounts previously paid from the total purchase price. Enter this amount in the charge field. Enter in the Remarks section that the item is converting from rental to a purchase. Do not enter any payment made by Medicaid in field 24k.

6.12.E. PLACE OF SERVICE CODES [RE-NUMBERED 4/1/2025]

DMEPOS

Place of service codes acceptable to report for DMEPOS claims submitted by medical suppliers are as follows:

- 01 – Pharmacy
- 04 – Homeless Shelter
- 12 – Home
- 13 – Assisted Living Facility
- 14 – Group Home
- 16 – Temporary Lodging
- 31 – Skilled Nursing Facility
- 32 – Nursing Facility
- 33 – Custodial Care Facility

Medicaid Provider Manual

Nursing Facility Residents	<p>For residents in a skilled nursing facility or a nursing facility, many medical supplies and/or items or DME are considered a part of the facility's per diem rate. For verification of specific procedure codes that may be billed by the medical supplier, refer to the Medicaid Code and Rate Reference tool. (Refer to the Directory Appendix for website information.)</p> <p>DMEPOS items for beneficiary use in the home and community may be delivered on the skilled nursing facility or nursing facility date of discharge. (Refer to the Medical Supplier Chapter for additional information.) The medical supplier must report the facility date of discharge in the relevant dates section of the electronic ASC X12N 837 5010 professional claim (loop 2300 DTP segment) or the Community Health Automated Medicaid Processing System (CHAMPS) direct data entry claim.</p>
-----------------------------------	--

6.13 EVALUATION AND MANAGEMENT SERVICES [RE-NUMBERED 4/1/2025]

Coding	CPT E/M service guidelines apply for determining what level of care is appropriate. Generally, CPT descriptions for E/M services indicate "per day" and only one E/M service may be reported per date of service (DOS).
Preventive Medicine E/M Visit and Another E/M Visit on the Same Date	<p>A preventive medicine E/M visit and another E/M visit on the same date are billed separately if, during the preventive visit, a problem or abnormality is detected which requires additional work which meets the key component requirements of a problem-oriented E/M visit. When this occurs, bill the office/outpatient E/M procedure code using modifier 25 and bill the preventive E/M visit without using a modifier. Refer to CPT guidelines for additional information.</p> <p>If the same level of care E/M visit is provided twice on the same day, report on one service line and use modifier 22. Indicate the time of day for each visit in item 19.</p>
Procedures and New E/M Service	A procedure and a new patient E/M service on the same date should be reported using modifier 25 on the E/M service line.
EPSDT Developmental Screening	The developmental screening using an objective standardized tool is billed using the appropriate CPT E/M codes for the visit. A maximum of three screenings per beneficiary are allowed in one day by a single provider.
Consultations	Consultations require the referring/ordering provider's name and NPI in items 17 and 17b.
Office Emergency Services	To report emergency services in the office, report the applicable procedure (e.g., laceration repair) or the E/M office visit that represents the level of care provided.
Hospital ED Reimbursement	E/M services provided in the hospital emergency department (ED) by the attending physician (MD, DO) are reimbursed on a two-tiered case rate based on whether the beneficiary was released or admitted. If the beneficiary was released from the ED, a single rate is used as the fee screen. If the beneficiary was admitted to the hospital or transferred to another hospital from the ED, a higher single rate is used as the fee screen. Physicians must bill the level of service identified in the CPT coding descriptions to ensure proper reimbursement.
Miscellaneous	Services such as telephone calls, missed appointments, interpretations of lab results, and services of an interpreter cannot be billed as separate services or billed to the beneficiary.

6.14 FAMILY PLANNING CLINICS [RE-NUMBERED 4/1/2025]

A Family Planning Clinic enrolled with a single billing NPI (representing both the Family Planning Clinic and any other enrolled provider specialty) must report the non-individual taxonomy code of 261QF0050X (Family Planning, Non-Surgical) to allow successful adjudication of family planning services. The taxonomy code must be reported at the header level of the claim, along with the billing provider NPI.

The taxonomy code must only be reported for family planning services. For non-family planning services, a separate claim must be submitted to MDHHS omitting the taxonomy code with the billing provider NPI.

6.15 FEDERALLY QUALIFIED HEALTH CENTERS [RE-NUMBERED 4/1/2025]

A Federally Qualified Health Center (FQHC) enrolled with a single billing NPI (representing both the FQHC and Family Planning Clinic) must report the non-individual taxonomy code of 261QF0050X (Family Planning, Non-Surgical) to allow successful adjudication of family planning services. The taxonomy code must be reported at the header level of the claim, along with the billing provider NPI.

The taxonomy code must only be reported for family planning services. For non-family planning services, a separate claim must be submitted to MDHHS omitting the taxonomy code with the billing provider NPI.

6.16 GENDER/DIAGNOSIS CONFLICT [RE-NUMBERED 4/1/2025]

Medical services are available to beneficiaries based on medical need regardless of how the beneficiary identifies or expresses for gender. Claims and encounters for some services may be inadvertently denied or rejected due to sex-specific editing unless billed properly.

Append modifier KX to professional claims and encounters for services that may pose a gender/diagnosis/procedure conflict or may be subject to related mismatch edits.

Fee-for-Service claims may also be reported with a diagnosis code from the gender identity category (F64), and these will suspend for review and payment.

6.17 HEARING AIDS [RE-NUMBERED 4/1/2025]

Delivery Date	The date of delivery of the hearing aid must be reported as the date of service. See Change in Eligibility below.
Change in Eligibility	When there is a loss of eligibility or a change in eligibility status (e.g., from FFS to health plan enrollment or vice versa) between the time a custom hearing aid is ordered and delivered, the date of service should be reported as the order date rather than the delivery date.

6.18 HYSTERECTOMY [RE-NUMBERED 4/1/2025]

Refer to the Surgery Section of this chapter for billing information.

Medicaid Provider Manual

6.19 LABORATORY SERVICES [RE-NUMBERED 4/1/2025]

Panels	CPT definitions for panels apply. All services in the panel must be provided and each test must be appropriate to the diagnosis or symptom for which the test was ordered. If a group of tests overlaps two or more panels, report the panel that incorporates the greater number of tests to fulfill the code definition and report the remaining tests as individual tests.
Blood Handling	On the CMS 1500 claim form, Box 19, Reserved for Local Use, must indicate the reason the blood was obtained as a separate service and the reason the laboratory that performed the testing could not also perform the venipuncture. For electronic claims, ANSI X12 837, Professional, documentation should be entered in the 2300 Loop, segment NTE02.
Referring/Ordering Provider	All clinical lab services billed to Medicaid must have a referring/ordering Medicaid provider name and NPI in items 17 and 17b.
CLIA Number	All clinical lab services billed to Medicaid must have a CLIA number in item 23.
Repeat Tests	If it is medically necessary to repeat the same clinical lab test on the same day for the same patient, report the first test on one line with no modifier and the second test on the next line with modifier 91. Medicaid does not pay for tests that are duplicated due to lab error.

6.20 MATERNITY CARE SERVICES [RE-NUMBERED 4/1/2025]

Coding	CPT guidelines for reporting prenatal care and delivery services apply. Bill the global obstetrical package or the antepartum, delivery, and postpartum components as appropriate per Medicaid NCCI guidelines.
Delivery	Delivery is part of the global maternity package and should not be billed separately if the global package is billed. If the beneficiary is seen for fewer than seven antepartum visits, delivery and postpartum care should be billed separately. Use appropriate CPT guidelines.
Global Service	The global maternity package should be billed if the beneficiary is seen for seven or more antepartum visits with delivery and postpartum performed by the same physician or physician group. The provider or group may choose to bill the antepartum, delivery, and postpartum components separately as allowed by Medicaid NCCI editing.

Medicaid Provider Manual

Multiple Gestation	<p>Per Medicaid NCCI guidelines, if multiple infants were delivered vaginally, report the appropriate CPT code for the initial delivery (global maternity care or vaginal delivery-only) on line one. Code additional vaginal deliveries as vaginal delivery-only. It is appropriate to append the code with modifier 59 (Distinct procedural service).</p> <p>If one infant is delivered vaginally and one or more delivered by cesarean, report the appropriate CPT code for the cesarean delivery (global maternity or cesarean delivery-only) on line one and the appropriate CPT code for the vaginal delivery (delivery-only) on line two. It is appropriate to append modifier 51 (Multiple procedures) to the vaginal delivery code.</p> <p>If multiple infants were delivered by cesarean delivery, report the appropriate CPT code for the cesarean delivery (global maternity care or cesarean delivery-only) on line one. When the delivery was significantly more difficult than usual, modifier 22 (Increased procedural service) may be appended to the delivery code. When modifier 22 is appended, documentation must support the substantial additional work and the reason for the additional work such as:</p> <ul style="list-style-type: none">▪ Increased intensity or time▪ Increased technical difficulty of performing the procedure▪ Severity of the patient's condition▪ Increased physical and mental effort required <p>In instances of multiple births, providers should attach a copy of the medical records with the claim that supports the procedures performed. Providers must use a diagnosis code that represents the multiple birth.</p>
Outpatient Lactation Support Provided by an Internationally Board Certified Lactation Consultant (IBCLC)	<p>Claims are to be submitted utilizing the mother's Medicaid beneficiary identification number.</p> <p>Medicaid will reimburse for evidence-based lactation support services provided up to and through 12 months post-delivery. A maximum of two visits per pregnancy will be reimbursed for either a single or multiple gestation pregnancy. One visit is reimbursable per date of service. Medicaid will reimburse for the first eligible claims submitted for these services.</p> <p>IBCLC services may be billed as a separate and distinct service on the same date as which other services are rendered by a provider. Documentation must support a separately identifiable visit.</p>
Physician Change During Antepartum Care	<p>If the beneficiary changes physicians during the antepartum care (other than physicians within the same group), use the appropriate maternity CPT codes and guidelines for the services performed. The global package should not be billed by either physician regardless of the number of antepartum visits provided.</p>
Postpartum Care	<p>Postpartum care is included in the global maternity package and in the global surgical delivery period when the services are provided by the same physician or physician group. When the postpartum exam is performed by a physician not billing the global package or performing the delivery, the postpartum exam may be billed as a separate service.</p>
Prenatal/Antepartum Care	<p>If the beneficiary receives fewer than seven but greater than three antepartum visits, use the appropriate antepartum CPT code. Individual E/M codes should be used when three or fewer antepartum visits are performed.</p>

Medicaid Provider Manual

6.21 NEWBORN CARE [RE-NUMBERED 4/1/2025]

When billing for medical services provided to the newborn, providers must use the newborn's Medicaid ID number, **except** if the delivering physician performs the newborn care and circumcision during the mother's inpatient stay, the delivering physician may bill for the newborn care and circumcision on the same claim as the delivery under the mother's Medicaid ID number.

6.22 PRIVATE DUTY NURSING (PDN) [RE-NUMBERED 4/1/2025]

6.22.A. DIRECT BILLING TO MDHHS [RE-NUMBERED 4/1/2025]

Providers must bill MDHHS directly (either paper or electronically) using the codes listed in the MDHHS Private Duty Nursing Reimbursement Rates Database posted on the MDHHS website. (Refer to the Directory Appendix for website information.) When direct billing to MDHHS, note the following:

Place of Service	The Place of Service Code on the claim must indicate "Home".
Service Dates	Each date of service must be reported on a separate service line.
Units	Each service line must contain the number of units of care in the "Days or Units" item for that date of service.
Prior Authorization	The PA number listed on the Medicaid authorization letter must be recorded on the claim.
Authorization Letter	The provider must retain the authorization letter for private duty nursing in the beneficiary's record. The authorization letter should not accompany the claim when billing.
Billable Units	PDN services are authorized, billed, and paid in 15-minute incremental units. The total number of units reported on the claim must not exceed the total units that were authorized for that month. Since 15-minute units of care are authorized, only those units of care that entail a full 15 minutes of care may be billed.
Adjustments	Adjustments to claims are made through a total claim replacement or void/cancel process.
Multiple Beneficiaries Seen at Same Location	<p>The appropriate code must be used if an RN or LPN is caring for more than one beneficiary at the same location for which this approach to staffing has been authorized. This code must be used for each beneficiary provided care (i.e., first, second beneficiary). For example, if there is one RN caring for two children at the same location, the multiple beneficiary modifier code must be used for both children.</p> <p>When billing for services for one child (when two have been authorized), do not use the TT modifier along with the HCPCS code. Claims will not pay for one child unless the following comment is entered in the Remarks section of the claim: "Only one child present at time of service, documentation on file."</p>
Holidays	Additional reimbursement for holidays on which private duty nursing services are provided is allowed. Current recognized holidays are: New Year's Day, Easter, Memorial Day, July 4 th , Labor Day, Thanksgiving Day, and Christmas Day. A holiday begins at 12:00 a.m. and ends at 12:00 midnight of that holiday day.

Medicaid Provider Manual

Other Insurance

If the beneficiary has other insurance, it must be reported on all claims to MDHHS.

6.22.B. HCPCS CODES/MODIFIERS [RE-NUMBERED 4/1/2025]

When billing, the provider must use the appropriate codes. HCPCS codes/modifiers are located in the Healthcare Common Procedure Coding System manual. The Private Duty Nursing Reimbursement Rates Database, posted on the MDHHS website, outlines private duty nursing rates and applicable codes. (Refer to the Directory Appendix for website information.)

6.22.C. PAYMENT IN 15-MINUTE INCREMENTS [RE-NUMBERED 4/1/2025]

Private duty nursing is prior authorized and paid in 15-minute incremental units. When billing for services, the total number of units billed must not exceed the total number of units authorized for that month. Since 15-minute increments of care are authorized, only those units of care that entail a full 15 minutes of care may be billed.

6.23 PROVIDER PREVENTABLE CONDITIONS (PPCs) [RE-NUMBERED 4/1/2025]

Coding	Providers must refer to the current CPT and HCPCS code books for the full descriptions of the national procedure codes and for additional explanatory information that may affect billing.
Modifiers	Every PPC service must have an appropriate HCPCS modifier reported on the service line. (Refer to the Modifiers section of this chapter for additional information.)

6.24 RADIOLOGY SERVICES [RE-NUMBERED 4/1/2025]

Bilateral	If bilateral x-rays are performed on extremities, report on two service lines with modifier RT on one and modifier LT on the other.
Multiple X-Rays	If the same x-ray is performed multiple times on the same beneficiary on the same day, (e.g., before and after fracture care) report the appropriate quantity in item 24G.
Component Billing	For radiology services with global, professional and technical components, practitioners can bill the global service only in the non-facility setting. The professional component may be billed in any setting. Technical component procedures are institutional charges and are not to be billed separately by practitioners when performed in facility settings.
Referring/Ordering Provider	Diagnostic radiology services that are a result of a physician's order or referral require the submission of the referring/ordering Medicaid provider name and NPI in items 17 and 17b.

Medicaid Provider Manual

6.25 SCHOOL SERVICES PROGRAM [RE-NUMBERED 4/1/2025]

Units/Time	<p>Procedure codes that specify time intervals cannot be billed until and unless the time unit specified is reached. Providers cannot bill less than a full unit or a partial unit and cannot round up to the next unit of service.</p> <p>For procedure codes billed by time units, such as per 15 minutes, the time specified in the procedure code description equals one unit of service.</p> <p>Procedure codes that are not billed by time units are billed per encounter.</p>
Coding	<p>Qualified staff may bill for assessments, tests and evaluations performed for the Individuals with Disabilities Education Act (IDEA) assessment using the appropriate procedure code with the HT modifier. The date of service is the date of the determination of eligibility for special education or early-on services. The determination date must be included in the assessment, test or evaluation.</p>
IEP/IFSP	<p>Qualified staff may bill for the multidisciplinary team assessment to develop, review and revise an IEP/IFSP treatment plan using the appropriate procedure code and the TM modifier. The date of service is the date of the multidisciplinary team assessment.</p>
Evaluations/ Assessments	<p>Evaluations/assessments may be provided that are not related to the IDEA assessment or IEP/IFSP development, review, and revision. When this occurs, bill the appropriate evaluation/assessment procedure code for that profession with no modifier. The date of service is the date the evaluation/assessment is completed.</p>
Multiple Disciplines on Same DOS	<p>The psychologist, counselor, and social worker can bill for their evaluations/ assessments using the same procedure code for the same date of service. When this occurs, bill on one service line and indicate the total number of units provided for that date of service. The evaluations/assessments that are performed on the same day for the same student must be for different purposes and not duplicative. The date of service is the date the evaluations/assessments are completed.</p>

6.26 SURGERY [RE-NUMBERED 4/1/2025]

Bilateral Procedures	<p>When a bilateral procedure is performed and there is a bilateral CPT code available, the bilateral code must be used. When there is no code describing bilateral services, report the service on one line and use modifier 50. Use CPT guidelines for reporting modifier 50.</p>
Coding	<p>CPT surgery guidelines for add-on codes, separate procedures, and bilateral services generally apply.</p>
Global Surgery	<p>CMS global surgery guidelines apply. Use the appropriate modifiers to identify the service provided.</p>

Medicaid Provider Manual

Hysterectomy and Sterilization Procedures	<p>Hysterectomy and sterilization consent forms may be faxed to MDHHS for acknowledgement of proper completion and signatures before the service is billed. (Refer to the Directory Appendix for contact information.) If completed properly, there is no need to submit a copy of the form with the claim. Indicate "consent on file" in the Remarks section. For MHP enrollees, providers must contact that health plan for specific requirements related to these consent forms.</p> <p>The charge submitted to Medicaid for devices used in the sterilization process, permanent implantable contraceptive intra-tubal occlusion device and delivery system, must reflect the acquisition cost of the device and delivery system, including advertised discounts, special promotions, or other programs initiated to reduce prices for product costs (340B program). In addition, drugs purchased through the 340B program must be indicated on the claim using the modifier U6.</p>
Identical Surgery/ Procedures on Same DOS	<p>If two identical surgical or procedural services are provided on the same day to the same beneficiary and cannot be reported as a bilateral procedure, bill on two service lines with no modifier on the first line and modifier 51 on the second line. Multiple surgery rules apply. If more than two identical services are provided on the same day, the second and subsequent identical services must be combined on the second line. Report modifiers 51 and 22 and provide an explanation of the circumstances.</p>
Multiple Surgery	<p>For multiple surgical procedures performed during the same surgical session, report the primary surgery on the first service line with no modifier. Report the subsequent procedures performed during the same surgical session with modifier 51.</p>
Post-Operative Care	<p>When reporting post-operative care only for surgical procedures with 10-day or 90-day global periods, the provider assuming the post-operative care must bill the date of the surgery and the appropriate surgical code with modifier 55. The claim cannot be submitted until after the patient is seen. Report the date care was assumed/relinquished in the Remarks section.</p>

6.27 TELEMEDICINE [RE-NUMBERED 4/1/2025]

Procedure code and modifier information for all telemedicine services is contained in the MDHHS Telemedicine Services Databases available on the MDHHS website. (Refer to the Directory Appendix for website information.)

6.27.A. ORIGINATING SITE [RE-NUMBERED 4/1/2025]

To be reimbursed for the originating site facility fee, the originating site provider must bill the telehealth facility fee. MDHHS will reimburse the originating site provider the current Medicaid fee screen. Additional services provided at the originating site on the same date as the telemedicine service may be billed and reimbursed separately according to published policy.

6.27.B. DISTANT SITE [RE-NUMBERED 4/1/2025]

Appropriate telemedicine modifiers must be used in conjunction with the appropriate CPT/HCPCS procedure code to identify the professional telemedicine services provided by the distant site provider.

Medicaid Provider Manual

6.28 THERAPIES (OCCUPATIONAL, PHYSICAL, SPEECH LANGUAGE) [RE-NUMBERED 4/1/2025]

Co-Treatment	<p>One therapist can bill for the entire service, or the service units can be divided between the two therapists. If the service units are split, both therapists may not bill for the same minutes. The combined units billed must not exceed the total time the beneficiary received co-treatment services. Medical record documentation must substantiate treatment time billed by each discipline.</p> <p>If co-treatment therapy includes speech therapy services that are reported as an untimed session, they may be billed by the SLP as one unit. The therapy session must be at least 38 minutes in length to bill both speech therapy and occupational or physical therapy.</p>
Evaluations and Re-Evaluations	<p>Evaluations or re-evaluations may be billed with other therapy services on the same day. Therapy must be provided by the evaluating discipline.</p>
Modifiers	<p>Every therapy service must have an appropriate therapy modifier reported on the service line to distinguish the plan of care under which the service is delivered. When the therapy is habilitative in nature, services must be billed modifier 96. Maintenance therapy must also be reported with modifier TS.</p>
Prior Authorization	<p>Refer to the Therapy Services chapter for information regarding prior authorization. For MHP enrollees, the provider should check with the MHP for PA requirements.</p>
Serial Casting	<p>Serial casting must be billed under the manual therapy technique procedure code.</p>
Units of Service	<p>The service quantity should reflect the appropriate quantity per code description. If the procedure is not defined by a specific time frame, report "1" as the quantity.</p>

6.29 VISION [RE-NUMBERED 4/1/2025]

Routine Eye Examination	<p>A routine eye examination includes, but is not limited to:</p> <ul style="list-style-type: none">▪ Case history▪ Determination of visual acuity (each eye)▪ Ophthalmoscopy▪ Biomicroscopy▪ Ocular motility▪ Tonometry▪ Refraction▪ Diagnosis▪ Treatment program▪ Disposition <p>Ophthalmologists and optometrists must use appropriate CPT/HCPCS code(s) for the service</p>
--------------------------------	--

Medicaid Provider Manual

Nonroutine Eye Examination	Nonroutine eye examinations for the purpose of evaluation and treatment of chronic, acute, and/or sudden onset of abnormal ocular conditions must be billed using the appropriate CPT/HCPCS codes.
Glaucoma Screening	<p>Glaucoma screening must be billed with the appropriate CPT/HCPCS procedure codes. This screening entails a dilated eye examination, tonometry, and direct ophthalmoscopy or slit lamp examination. If this screening is provided as part of another billable service, separate reimbursement for this screening is not allowed.</p> <p>If the beneficiary presents with a visual or ocular complaint, the glaucoma screening procedure code should not be used. A procedure code that best describes the encounter should be selected from the E/M or General Ophthalmological codes.</p>
CPT/HCPCS Codes/Modifiers	Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding covered CPT/HCPCS codes.
Eyeglass Dispense Date	Report the date eyeglasses are dispensed as the date of service in item 24A. If eligibility or enrollment status changes after eyeglasses are ordered but before they are delivered, the order date of the eyeglasses must be reported as the date of service in item 24A.
Low Vision Services	When billing for low vision services, the low vision diagnosis must be designated as the primary diagnosis code on the claim service line. Covered low vision diagnosis codes are listed in the Medicaid Code and Rate Reference tool. (Refer to the Directory Appendix for website information.)

SECTION 7 – MODIFIERS

Procedure codes may be modified under certain circumstances to more accurately represent the service or item rendered. MDHHS recognizes two levels of modifiers:

- Level I modifiers are those included in CPT and updated annually by the American Medical Association (AMA).
- Level II modifiers are recognized nationally and updated annually by CMS.

Definitions and use of Level I modifiers can be found in the annual edition of the CPT manual. Definitions of Level II modifiers are found in the annual edition of the HCPCS procedure coding manual. Providers should refer to these manuals and MDHHS provider manuals for specific information on the use of these modifiers.

The modifiers listed below must be reported when applicable. Modifiers affect the processing and/or reimbursement of claims billed to MDHHS for Medicaid programs and CSHCS beneficiaries. Other Level I and Level II modifiers may be used to provide additional information about the service or may be required by other payers but do not affect the processing of the Medicaid claim.

7.1 GENERAL BILLING GUIDELINES

Modifier	Description	Special Instructions
22	Increased Procedural Services	Providers may report when the work required to provide a service is substantially greater than typically required. Documentation/remarks required.
99	Multiple Modifiers	Identifies that more modifiers are necessary than allowed by the format (2 on paper claims or 4 in the electronic format). The second or fourth modifier must be "99" and the additional modifiers must be indicated in item 19 or the appropriate electronic remark area.
EP	Service provided as part of Medicaid EPSDT program	Report to identify EPSDT services.
GC	Service performed by resident under direction of teaching physician	Report to identify services provided by resident in presence of teaching physician.
GE	Service performed by resident under primary care exception	Report to identify primary care services provided by a resident without the presence of the teaching physician under the primary care exception.
HD	Pregnant/parenting program	Report to identify doula services
LT	Left side (used to identify procedures performed on the left side of the body)	Allows appropriate multiple line reporting of select procedures performed on the right and left side of the body on the same day.

Medicaid Provider Manual

Modifier	Description	Special Instructions
Q5	Service furnished by substitute physician under a reciprocal billing arrangement	The name of the physician providing the service must be reported in item 19.
Q6	Service furnished by a locum tenens physician	The name of the physician providing the service must be reported in item 19.
RT	Right side (used to identify procedures performed on the right side of the body)	Allows appropriate multiple line reporting of select procedures performed on the right and left side of the body on the same day.
TS	Follow-up service	Used with procedure code T1029 to determine reimbursement.
UN	Two patients served	Identifies the number of patients served to allow for adjustment to the reimbursement.
UP	Three patients served	Identifies the number of patients served to allow for adjustment to the reimbursement.
UQ	Four patients served	Identifies the number of patients served to allow for adjustment to the reimbursement.
UR	Five patients served	Identifies the number of patients served to allow for adjustment to the reimbursement.
US	Six or more patients served	Identifies the number of patients served to allow for adjustment to the reimbursement.

7.2 AMBULANCE

7.2.A. ORIGIN AND DESTINATION MODIFIERS

When billing for ambulance services, appropriate origin and destination modifiers must be included on any service line when billing for mileage. The first character of the modifier is the origin code and the second character of the modifier is the destination code (e.g., use modifier RH for a transport from the residence to the hospital).

Modifier	Description
D	Diagnosis or therapeutic site other than "P" or "H" when these are used as origin codes
E	Residential domiciliary custodial facility (other than a Medicare/Medicaid facility)
G	Hospital based dialysis facility
H	Hospital
I	Site of transfer (e.g., airport or helicopter pad) between modes of transportation
J	Non hospital-based dialysis facility
N	Skilled Nursing Facility (SNF) (Medicare/Medicaid facility)

Medicaid Provider Manual

Modifier	Description
P	Physician's office
R	Residence
S	Scene of accident or acute event
X	(Destination code only) Intermediate stop at a physician's office on the way to the hospital

7.2.B. MULTIPLE TRANSPORTS PER BENEFICIARY

When a beneficiary requires more than one ambulance transport on the same date of service, providers must report:

- the appropriate origin and destination modifier with both the base rate and the mileage procedure codes; and
- the quantity for each transport base rate as "1" and the quantity for each transport mileage as the number of loaded miles.

If a break in service occurs between transports, each transport must be billed as a separate service. A break in service occurs when the ambulance is available to respond to other requests. If there is no break in service between transports, the transport is considered a single run and is described under the Continuous or Round Trip Transport subsection of the Ambulance Chapter of this manual.

7.2.C. MULTIPLE PATIENTS TRANSPORT

When billing for a transport when more than one patient is transported at one time, the appropriate modifier must be reported on the service line for the transport for the second or subsequent patient being transported.

Modifier	Description	Special Instructions
GM	Multiple patients on one ambulance trip	Enter on the transport service line for second or subsequent patient when more than one patient is transported. Reduces reimbursement for the second or subsequent patient transported. Do not report for the first patient.

7.3 ANESTHESIA

Billing modifiers must be reported for each anesthesia service billed to Medicaid and will determine the level of reimbursement for anesthesia services. Each claim line for anesthesia services must include one of the modifiers described in the table below. The modifier will generate a calculated fee screen as described under "Special Instructions." Anesthesia services billed without an appropriate modifier are rejected.

Medicaid Provider Manual

Modifier	Description	Special Instructions
47	Anesthesia by Surgeon	Anesthesia procedure codes billed with this modifier are not paid. General anesthesia provided by the surgeon is not covered.
AA	Anesthesia Services Performed Personally by Anesthesiologist	Reimbursement for anesthesia services reported with CPT codes 00100-01999 will be reimbursed at 100 percent.
AD	Medical Supervision By a Physician: More Than Four Concurrent Anesthesia Procedures	Reimbursement for anesthesia services reported with CPT codes 00100-01999 will be a flat rate calculated using the base units multiplied by the State anesthesia conversion factor.
QK	Medical direction of 2, 3 or 4 concurrent anesthesia procedures involving qualified individuals	Reimbursement for anesthesia services reported with CPT codes 00100-01999 will be reimbursed at 50 percent.
QS	Monitored anesthesia care service	Informational only. Report in addition to payment associated anesthesia modifiers when Monitored Anesthesia Care (MAC) is provided. Modifier QS, used for informational purposes, must be reported as the second modifier on the claim line. If QS is the only anesthesia modifier reported, the claim will be rejected.
QX	Certified Registered Nurse Anesthetist (CRNA) / Anesthesiologist Assistant (AA) service with medical direction by a physician / anesthesiologist	Reimbursement for anesthesia services reported with CPT codes 00100-01999 will be reimbursed at 50 percent. Anesthesiologist Assistant must be medically directed by an anesthesiologist.
QY	Medical direction of one CRNA/AA by an anesthesiologist	Reimbursement for anesthesia services reported with CPT codes 00100-01999 will be reimbursed at 50 percent.
QZ	CRNA service: without medical direction by a physician	Reimbursement for anesthesia services reported with CPT codes 00100-01999 will be reimbursed at 100 percent. Report for CRNAs practicing independently and for nonmedically directed services.

7.4 CHILDREN'S WAIVER PROGRAM

Modifier	Description	Special Instructions
TD	RN	Report in addition to the appropriate procedure code for respite when a registered nurse provides the service.
TE	LPN/LVN	Report in addition to the appropriate procedure code for respite when the service is provided by a licensed practical nurse.
TT	Individualized service provided to more than one patient in the same setting	Report in addition to the appropriate procedure code for respite when more than one beneficiary is receiving the service at the same time from the same provider.

Medicaid Provider Manual

7.5 COMPONENT BILLING

Modifier	Description	Special Instructions
26	Professional Component	Must be reported when billing only the professional component of a procedure. Providers are limited to billing the professional component for certain services in a facility setting.
TC	Technical Component	Technical component procedures are institutional charges and are not to be billed separately by practitioners when performed in facility settings.

7.6 DMEPOS

7.6.A. SURGICAL DRESSINGS

For surgical dressings, report modifiers A1 through A9 depending on number of wounds being treated.

Modifier	Description	Special Instructions
A1	Dressing for one wound	Use to report surgical dressings
A2	Dressing for two wounds	Use to report surgical dressings
A3	Dressing for three wounds	Use to report surgical dressings
A4	Dressing for four wounds	Use to report surgical dressings
A5	Dressing for five wounds	Use to report surgical dressings
A6	Dressing for six wounds	Use to report surgical dressings
A7	Dressing for seven wounds	Use to report surgical dressings
A8	Dressing for eight wounds	Use to report surgical dressings
A9	Dressing for nine or more wounds	Use to report surgical dressings

7.6.B. NEW/USED DME

Modifier	Description	Special Instructions
KH	DMEPOS item, initial claim, purchase or first month rental	Use with HCPCS code E0604 for first month of rental only. Use with HCPCS code A9274 for initial claim only.
NU	New DME equipment	Use for the purchase of a new DME item. (Refer to the Medical Supplier database and the Medicaid Code and Rate Reference Tool for codes that require the NU modifier.)

Medicaid Provider Manual

Modifier	Description	Special Instructions
UE	Used durable medical equipment	Use for the purchase of used DME equipment. (Refer to the Medical Supplier database and the Medicaid Code and Rate Reference Tool for codes that require the UE modifier.)
RR	Rental (use the "RR" modifier when DME is to be rented)	For monthly rental rate of DME items.

7.6.C. LOWER EXTREMITY PROSTHESES

For all lower extremity prostheses, modifiers "K0" through "K4" must be reported to designate the potential functional ability of a beneficiary (before a prosthesis is furnished) based on the reasonable expectations of the prosthetist and treating physician.

Modifier	Description
K0	Lower extremity prosthesis functional level 0 – does not have the ability or potential to ambulate or transfer safely with or without assistance and a prosthesis does not enhance their quality of life or mobility.
K1	Lower extremity prosthesis functional level 1 – has the ability or potential to use a prosthesis for transfers or ambulation on level surfaces at fixed cadence. Typical of the limited and unlimited household ambulator.
K2	Lower extremity prosthesis functional level 2 – has the ability or potential for ambulation with the ability to traverse low level environmental barriers such as curbs, stairs or uneven surfaces. Typical of the limited community ambulator.
K3	Lower extremity prosthesis functional level 3 – has the ability or potential for ambulation with variable cadence. Typical of the community ambulator who has the ability to transverse most environmental barriers and may have vocational, therapeutic, or exercise activity that demands prosthetic utilization beyond simple locomotion.
K4	Lower extremity prosthesis functional level 4 – has the ability or potential for prosthetic ambulation that exceeds the basic ambulation skills, exhibiting high impact, stress, or energy levels, typical of the prosthetic demands of the child, active adult, or athlete.

7.6.D. ORTHOTIC AND PROSTHETIC

For orthotic and prosthetic items, the "LT" or "RT" modifier is required to designate either the left or right side of the body, if applicable. When reporting bilateral orthotic or prosthetic items on the same DOS, the "LT" and "RT" modifiers must be listed on the same service line with the combined quantities of both items. To verify the specific HCPCS codes that require these modifiers, refer to the Medicaid Code and Rate Reference tool. (Refer to the Directory Appendix for website information.)

Medicaid Provider Manual

Modifier	Description	Special Instructions
LT	Left Side of the Body (used to identify procedures performed on the left side of the body)	Must be reported with select prosthetic and orthotic items to identify the left side of the body for use. Also allows payment of bilateral RT and LT devices placed on the same date of service.
RT	Right Side of the Body (used to identify procedures performed on the right side of the body)	Must be reported with select prosthetic and orthotic items to identify the right side of the body for use. Also allows payment of bilateral RT and LT devices placed on the same date of service.

7.6.E. DME

Modifier	Description	Special Instructions
RA	Replacement of a DME item	Replacement of a DME when a significant change in the beneficiary's condition occurs prior to replacement limit.
RB	Replacement of a part of a DME furnished as part of a repair	Includes cost of the part and the labor associated with its replacement and finishing.

7.6.F. POWERED AIR FLOTATION/AIR-FLUIDIZED BED

Modifier	Description	Special Instructions
MS	Six month maintenance and servicing fee for reasonable and necessary parts and labor which are not covered under any manufacturer or supplier warranty	Use with HCPCS code E0193 or E0194 after six months of continued maintenance and servicing following the initial 10 months of rental. A quantity of "1" must be entered in the quantity field for the full six-month period of service.

7.6.G. ENTERAL NUTRITION

Modifier	Description	Special Instructions
BO	Orally administered nutrition, not by feeding tube	Use to report oral administration of enteral nutrition.
U3	Medicaid State Defined Level 3 used with B4087 (low profile ext.) or with B4155 (formulas specific to inborn errors of metabolism)	Refer to the MDHHS Medical Supplier/DME/Prosthetics and Orthotics Fee Schedule and the Medicaid Code and Rate Reference tool for additional information. (Refer to the Directory Appendix for website information.) Note: The beneficiary must have an inborn errors of metabolism diagnosis to receive manual payment for B4155 with the U3 modifier.

Medicaid Provider Manual

7.6.H. INFUSION THERAPY

Modifier	Description	Special Instructions
SH	Second concurrently administered infusion therapy	Must be reported with HCPCS "S" home infusion codes to specify two concurrently administered drugs.
SJ	Third or more concurrently administered infusion therapy	Must be reported with HCPCS "S" home infusion codes to specify three or more concurrently administered drugs.

7.6.I. MISCELLANEOUS SUPPLIES

Modifier	Description	Special Instructions
KX	Specific required documentation on file.	Append to each HCPCS code A4253/A4259 when submitting claims for over quantity for adults (age 21 and older) with medical need to test their blood glucose more frequently than established quantities. Append to specified HCPCS codes that require a face-to-face visit. Refer to the Medical Supplier Chapter and the Medicaid Code and Rate Reference tool in CHAMPS for all coverage requirements.
U3	Medicaid State Defined Level 3 used with E0247/E0248 (non-standard transfer benches) or with E0240 (non-standard bath/shower chairs).	Append to E0247 or E0248 for non-standard bathtub or combination bath/commode transfer benches or to E0240 for non-standard bath/shower chairs for prior authorization and manual pricing. Refer to the MDHHS Medical Supplier/DME/Prosthetics and Orthotics Fee Schedule and the Medicaid Code and Rate Reference tool for additional information. (Refer to the Directory Appendix for website information.)
U4	Pediatric supply item	Use with HCPCS codes listed on the MDHHS Medical Supplier/DME/Prosthetics and Orthotics Fee Schedule that list the U4 modifier for pediatric pricing only. This information may also be found in the Medicaid Code and Rate Reference tool. (Refer to the Directory Appendix for website information.)

7.7 EVALUATION AND MANAGEMENT (E/M) SERVICES

Modifier	Description	Special Instructions
24	Unrelated Evaluation and Management Service by the Same Physician During a Postoperative Period	E/M services unrelated to the surgery and billed by the surgeon during the postoperative period of a global surgery are not payable without this modifier.
25	Significant, Separately Identifiable Evaluation and Management Services by Same Physician on Same Day of the Procedure	E/M services reported without modifier 25 and billed in addition to other procedures/services on the same day are not payable. Allows significant separately identifiable E/M services to be paid without review. Subject to post payment audit.

Medicaid Provider Manual

Modifier	Description	Special Instructions
57	Decision for Surgery	Required for an E/M service provided the day of or the day before a procedure with a 90-day global period to indicate that the service was for the decision to perform the procedure.
UA	Admitted or transferred to inpatient hospital	Required for ED case rate paid to attending ED physician when beneficiary is admitted or transferred from the ED to the inpatient hospital.
UD	Released/Discharged from Emergency Department	Required for ED case rate paid to attending ED physician when beneficiary is treated and released/discharged from the ED.

7.8 LABORATORY

Modifier	Description	Special Instructions
90	Reference Lab	Identifies that services were referred to specialty lab. The NPI number of the reference lab must be included.
91	Repeat Clinical Diagnostic Laboratory Test	Use to identify a medically necessary repeat test done on same date.
QW	CLIA waived test	Identifies CLIA waived tests as required.

7.9 MEDICARE

Any service reported to Medicaid for a Medicare/Medicaid eligible beneficiary that is an excluded or noncovered Medicare benefit must be identified with modifier GY or GZ on the service line.

Modifier	Description	Special Instructions
GY	Excluded Medicare Benefit	Report this modifier to identify services that are excluded from Medicare coverage.
GZ	Medicare denied as not reasonable or necessary	Report this modifier to identify services determined not reasonable or necessary by Medicare.

**7.10 PREVENTIVE SERVICES**

Modifier	Description	Special Instructions
33	Preventive Services	When the primary purpose of the service is delivery of an evidence-based service in accordance with a United States Preventive Services Task Force (USPSTF) A or B rating in effect and other preventive services mandates (legislative or regulatory), the service may be identified by adding modifier 33 to the procedure. For separately reported services specifically identified as preventive, the modifier should not be used.

7.11 PRIVATE DUTY NURSING

Modifier	Description	Special Instructions
TT	Individualized service provided to more than one patient in same setting	Use this modifier with HCPCS code T1000 and either modifier TD for RN or TE for LPN when private duty nursing services are being provided to more than one beneficiary at one time.

7.12 PROVIDER PREVENTABLE CONDITIONS (PPCs)

Any service reported to Medicaid for a PPC that has been identified for non-payment must be submitted with the appropriate modifier on the service line.

Modifier	Description	Special Instructions
PA	Surgery Wrong Body Part	Use this modifier to report that service is for surgery on wrong body part
PB	Surgery Wrong Patient	Use this modifier to report that service is for surgery on wrong patient
PC	Wrong Surgery on Patient	Use this modifier to report that service is for wrong surgery on patient

7.13 SCHOOL SERVICES PROGRAM

Modifier	Description	Special Instructions
HT	Multi-disciplinary team	Use this modifier with the appropriate evaluation procedure codes to identify participation by each qualified profession in the Individuals with Disabilities Education Act (IDEA) assessment.
TL	Re-evaluation of Existing Data (REED)	Use this modifier with the appropriate procedure codes to identify when a re-evaluation of existing data (REED) was used in the determination of the child's eligibility for special education services.

Medicaid Provider Manual

Modifier	Description	Special Instructions
TM	Individualized Education Program (IEP)	Use this modifier with the appropriate procedure codes to identify participation by each qualified staff in the development, review and revision of the IEP.

7.14 SURGICAL ASSISTANCE

Modifier	Description	Special Instructions
80	Assistant Surgeon	Reimbursement for services at the assistant surgeon rate. If reported with modifiers 54, 55, 58, 59, 78, 79, XE, XP, XS, XU, the claim is not paid.
82	Assistant Surgeon (when qualified resident surgeon not available)	Reimbursement for services at the assistant surgeon rate. If reported with modifiers 54, 55, 58, 59, 78, 79, XE, XP, XS, XU, the claim is not paid.
AS	PA, NP, CNS, or CNM services for assistant at surgery	Reimbursement for services adjusted to CMS limits for reimbursement for these practitioners.

7.15 SURGICAL SERVICES

Modifier	Description	Special Instructions
50	Bilateral Procedure	Report to identify that bilateral procedures were performed during the same operative session. Reimbursement is 150% of the fee for the procedure or the provider's charge if bilateral reporting is appropriate.
51	Multiple Procedure	Use to report multiple procedures during the same operative session. Report on each additional procedure, not on the primary procedure. Determines payment at 100%, 50%, 50%, etc. when appropriate.
52	Reduced Services	Report if a service or procedure is partially reduced or eliminated at the physician's discretion. A report or remarks are required to determine reimbursement. Refer to the Maternity Care Services section of this chapter for maternity care component billing instructions. Do not use for E/M services. Follow current CPT guidelines to determine the appropriate code to use for services performed.
53	Discontinued Procedure	Report if a surgical or diagnostic procedure is terminated after it was started. A report or remarks are required to determine reimbursement.
54	Surgical Care Only	Reported by the surgeon for surgical procedures with 10- or 90-day global periods when all or part of the post op care is relinquished to a physician who is not a member of the same group. Reimbursement is reduced to the surgical care rate only.

Medicaid Provider Manual

Modifier	Description	Special Instructions
55	Postoperative Management Only	Reported by the physician furnishing post-op management only. Report the surgical procedure with the date of surgery and the date care was relinquished/assumed in Box 19.
58	Staged or Related Procedure or Service by the Same Physician During the Postoperative Period	Allows payment for subsequent surgical procedures performed during the global surgery period that meet certain requirements. Do not use in place of modifier 78.
59	Distinct Procedural Service	Report/remarks required. Do not report if another modifier is more appropriate.
62	Two Surgeons	Determines reimbursement when two surgeons were involved in the same surgery.
66	Surgical Team	Determines reimbursement for complex surgery requiring a surgical team. A report or remarks are required.
76	Repeat Procedure by Same Physician	Report when a procedure or service is repeated by the same physician subsequent to the original service.
78	Return to the Operating Room for a Related Procedure During the Postoperative Period	When appropriate, allows payment for related services (complications) requiring a return to OR during the postoperative period. Payment is reduced to operative care only.
79	Unrelated Procedure or Service by Same Physician During Postoperative Period	When appropriate, allows payment for services during the postoperative period unrelated to the original surgery.
FT	Unrelated evaluation and management (E/M) visit during a post-operative period, or on the same day as a procedure or another E/M visit.	Report for critical care visits that are unrelated to the surgical procedure and performed post-operatively.
XE	Separate Encounter; a service that is distinct because it occurred during a separate encounter.	This modifier should only be used to describe separate encounters on the same date of service. May be used in lieu of modifier 59 where this description provides greater specificity.
XP	Separate Practitioner; a service that is distinct because it was performed by a different practitioner.	May be used in lieu of modifier 59 where this description provides greater specificity.
XS	Separate Structure; a service that is distinct because it was performed on a separate organ/structure.	May be used in lieu of modifier 59 where this description provides greater specificity.

Medicaid Provider Manual

Modifier	Description	Special Instructions
XU	Unusual Non-Overlapping Service; the use of a service that is distinct because it does not overlap usual components of the main service.	May be used in lieu of modifier 59 where this description provides greater specificity.

7.16 THERAPY SERVICES

Therapy claims must be submitted using the appropriate procedure code and therapy modifier to distinguish the discipline under which the service is delivered. In addition, habilitative services must be reported with the appropriate modifier that represents the nature of therapy being performed. Maintenance therapy visit claims should also include the MDHHS designated maintenance modifier. Therapy services submitted without these modifiers may be denied.

Modifier	Description	Special Instructions
96	Habilitative Service	Used to identify therapy services habilitative in nature.
97	Rehabilitative Service	Used to identify therapy services rehabilitative in nature.
GP	Service delivered under an outpatient physical therapy plan of care.	Identifies services provided under a physical therapy treatment plan.
GO	Service delivered under an outpatient occupational therapy plan of care.	Identifies services provided under an occupational therapy treatment plan.
GN	Service delivered under an outpatient speech-language pathology plan of care.	Identifies services provided under a speech therapy treatment plan.
TS	Follow-up Service	Used to identify therapy services as maintenance related.

7.17 VISION

Modifier	Description	Special Instructions
U1	Polycarbonate lenses	Determines payment rate to contractor.
U2	High index lenses	Determines payment rate to contractor.
VP	Aphakic patient	Report to identify that service is for aphakic patient.
55	Postoperative management only	Reported by an optometrist (with Therapeutic Pharmaceutical Agent (TPA) certification) for select services when a physician performs the surgical procedure and relinquishes the follow-up care to the optometrist.

SECTION 8 - REMITTANCE ADVICE

A Remittance Advice (RA) is produced to inform providers about the status of their claims. RAs are available in paper and electronic formats, and utilize the HIPAA-compliant national standard claim adjustment group codes, claim adjustment reason codes, and remarks codes, as well as adjustment reason codes, to report claim status. Code definitions are available from the Washington Publishing Company. (Refer to the Directory Appendix for contact information.)

8.1 PAYMENT PROCESS

MDHHS processes claims and issues payments (by check or EFT) every week unless special provisions for payments are included in the provider's enrollment agreement. A Remittance Advice (RA) is issued with each payment to explain the payment made for each claim. If no payment is due or claims have rejected, an RA is also issued. If claims are not submitted for the current pay cycle or no gross adjustments are processed in the pay cycle, an RA is not generated.

If a claim does not appear on an RA within 60 days of submission, a new claim should be submitted. Providers should verify that the provider NPI number and beneficiary ID number are correct. Submitting claims prior to the end of the 60-day period may result in additional delays in claims processing for payment.

Payments to providers are issued by Tax Identification Number (TIN). All payments due to all providers enrolled with MDHHS under a specific TIN are consolidated and issued as one check or EFT.

Providers who would like to receive payments from MDHHS through EFT must register through the DTMB website. (Refer to the Directory Appendix for website information.)

8.2 ELECTRONIC REMITTANCE ADVICE

The electronic RA is produced in the HIPAA-compliant ASC X12N 835 5010 format. Providers opting to receive an electronic RA receive all information regarding adjudicated (paid or rejected) claims in this format.

The electronic RA has many advantages:

- It can serve to input provider claim information into the provider's billing and accounting systems;
- It includes a MDHHS trace number to identify the associated warrant or electronic funds transfer (EFT) payment;
- It returns the provider's internal medical record number, line item control number, and patient control number when submitted on the original claim; and
- It contains additional informational fields not available on the paper RA.

The 835 transaction corresponds to one payment device (check or EFT). All claims associated with a single TIN processed in a weekly pay cycle report on a single 835, regardless of how the claims were submitted (e.g., some paper, some electronic, multiple billing agents, etc.). Providers choosing to receive the 835 transaction must authorize a billing agent to receive the 835 per TIN. An addition of and/or

change to the identification of the billing agent for the provider's 835 must be changed through their CHAMPS enrollment application.

For more information regarding the 835 transactions issued by MDHHS, refer to the MDHHS 835 Companion Documents (Data Clarification Documents) on the MDHHS website. For general information about the 835, refer to the Implementation Guides for these transactions. The guides are available through the Washington Publishing Company. (Refer to the Directory Appendix for contact information.)

8.3 PAPER REMITTANCE ADVICE

A paper RA is generated for all providers and/or billing agents who submit and process claims through CHAMPS. The RA is available online or is sent to providers only if requested through the CHAMPS PE subsystem. The RA contains three main sections: cover sheet, summary page, and detail page(s). Refer to the Forms Appendix for a sample copy of a Remittance Advice.

8.4 GROSS ADJUSTMENTS

Gross adjustments are initiated by MDHHS. A gross adjustment may pertain to one or more claims. Providers are notified in writing when adjustments are made to claims. Notification should be received before the gross adjustment appears on your RA.

The paper RA indicates gross adjustments have been made by:

- **Adjustment Reason Code:** Indicates the reason for the debit or credit memo or adjustment to payment. Standard Adjustment Reason Codes are used and defined in the 835 Implementation Guide.
- **Gross Adjustment Code:** This is the MDHHS gross adjustment code that corresponds to the gross adjustment description.

8.5 CLAIM ADJUSTMENT REASON/REMARK CODES

When a claim is initially processed the Claim Adjustment Reason/Remark column on the RA identifies which service lines have been paid or rejected and lists edits which apply.

If a service line is rejected, a Claim Adjustment Reason/Remark code prints in the Claim Adjustment Reason/Remark column of the RA. The provider should review the definition of the codes to determine the reason for the rejection.

Medicaid Provider Manual

SECTION 9 - JULIAN CALENDAR

Day Month	January	February	March	April	May	June	July	August	September	October	November	December
1	1	32	60	91	121	152	182	213	244	274	305	335

Medicaid Provider Manual

For leap year, one day must be added to the number of days after February 28. The next three leap years are 2028, 2032 and 2036.

Example: Transaction Control Number (TCN) 211215010000189001 – Header TCN always ends in 000
Position 1: "2" – DDE Web Submission
Position 2: "1" – FFS Claim
Positions 3-7: "12150" – YY = 12 (for 2012) + 3-digit Julian date = "150" (May 29)
Position 8: "1" – Original Claim
Positions 9-15: "0000189" – Sequence Number
Positions 16-18: "001" – Line Number. Will begin with 001 for every new claim and increment by 1 for each claim line. Any replacement or voids claim, use the header TCN.
Header TCN always ends in 000 (211215010000189000).

Medicaid Provider Manual

SECTION 1 - INTRODUCTION

The 21st Century Cures Act (the Cures Act), enacted by the U.S. Congress in December 2016, added Section 1903(I) to the Social Security Act to require all states to use electronic visit verification (EVV) for personal care services (PCS) and home health care services (HHCS) provided under a Medicaid State Plan of the Social Security Act or under a waiver of the State Plan.

EVV is a technology-based validation of PCS or HHCS that is required when a provider begins or ends a visit in the home. This information helps to ensure that beneficiaries receive their authorized care. The requirement of EVV does not prohibit PCS being delivered outside of the beneficiary's home. PCS should be delivered in accordance with the beneficiary's needs, the individual plan of care, and the State Plan or Home and Community Based Service standards.

Beginning April 1, 2024, MDHHS requires the use of EVV for HHCS for Medicaid Fee-for-Service (FFS) providers serving Medicaid beneficiaries. Beginning July 1, 2024, Home Help Agency Providers are required to use EVV for Home Help beneficiaries. As of September 3, 2024, Medicaid Managed Care (Medicaid Health Plan) HHCS and PCS provided through Behavioral Health, MI Choice, MI Health Link, and Home Help Individual Caregivers are required to use EVV.

SECTION 2 – EVV INFORMATION

2.1 EVV OPEN VENDOR MODEL

MDHHS uses an open vendor EVV model. This allows providers flexibility to use the State EVV system at no cost or another EVV system of their choosing that meets State requirements. The State selected HHAeXchange as its EVV vendor and aggregator. To use an EVV system other than HHAeXchange, an agency provider must ensure compatibility with the HHAeXchange Electronic Data Interchange (EDI) process and must submit EVV information to the State's aggregator. An agency provider's use of an alternative EVV system is at their own cost.

Additional information about use of an alternative EVV system and the EDI process can be found on the HHAeXchange website. (Refer to the Directory Appendix for vendor information.)

2.2 EVV DATA REQUIREMENTS

The Cures Act requires the following six data elements to be collected for EVV:

- Type of service performed
- Name of person receiving the service
- Date of the service
- Location of the service
- Name of person providing the service
- Times the service begins and ends

2.3 EVV DATA COLLECTION METHODS

If using the State-offered EVV solution, the methods for reporting information include:

2.3.A. MOBILE APPLICATION

The mobile application can be downloaded to a caregiver-owned or employer-issued smart phone or global positioning service (GPS)-enabled tablet. The caregiver will use the device to clock-in at the start of the service and clock-out at the end of the service. This is the preferred method for reporting EVV information.

The mobile device also has an offline EVV feature that allows the caregiver to clock-in and clock-out while offline, as in the absence or loss of an internet connection. The information will transmit the stored data once internet connection returns. The data is time-sensitive, requiring the caregiver to ensure access to an internet connection within seven calendar days of service delivery.

Medicaid Provider Manual

2.3.B. INTERACTIVE VOICE RESPONSE (IVR)/TELEPHONY

Using the beneficiary's landline, the caregiver will call into a designated toll-free EVV telephone line to clock-in at the start of the service and place a second call to clock-out at the end of the service. This is an approved method of reporting EVV, but only expected to be used if the mobile application is not an option.

A caregiver may use IVR when:

- The beneficiary authorizes the use of their landline for EVV.
- The beneficiary's services start and end in their home.

If the beneficiary does not have a landline that can be used for the purpose of EVV, the caregiver must use the mobile application. Agency providers must ensure caregivers have access to alternate methods to capture EVV data.

If using an alternative EVV vendor system, caregivers will use their vendor's existing data collection methods, as long as the system has been validated as meeting federal and state EVV requirements. Refer to the HHAeXchange website for additional information about validation of an alternative EVV system. (Refer to the Directory Appendix for vendor information.)

2.4 ALTERNATIVE EVV VENDOR

If using an alternative EVV vendor system, providers will use their vendor's existing data collection methods, as long as the system has been validated as meeting federal and state EVV requirements.

Medicaid Provider Manual

SECTION 3 – PERSONAL CARE SERVICES

3.1 PCS SERVICE CODES

The Michigan Medicaid program covers PCS that are provided under the State Plan and waivers of the State Plan. The following procedure codes, listed by program, require the use of EVV. Any PCS listed below that starts or ends in the beneficiary's home requires EVV.

Program	Procedure Code	Service Description
Behavioral Health	H2015	Community Living Supports (CLS)
	T1005	Respite Care, per 15 minutes
Home Help	T1019: CG	Personal Care Services
MI Choice	H2015	Comprehensive Community Support Services, per 15 minutes
	S5150	Unskilled Respite Care, not Hospice, per 15 minutes
MI Health Link	H2015	Comprehensive Community Support Services, per 15 minutes
	S5150	Unskilled Respite Care, not Hospice, per 15 minutes
	T1019	Personal Care Services (PCS), per 15 minutes

NOTE: PCS provided through Community Transition Services are excluded from EVV.

Home Help providers must use their current service verification methods (i.e., Community Health Automated Medicaid Processing System [CHAMPS] Electronic Service Verification, Paper Service Verification or the MSA-1904 Home Help Agency Invoice). Payments will be based on the data recorded on the current service verification methods.

3.2 EVV PCS EXCLUSIONS

The following sections contain information on congregate living settings, live-in caregivers, and beneficiaries who receive PCS through Home Help and Behavioral Health services during the same visit. PCS provided to beneficiaries who live in these settings, live with their caregiver(s), or receive Home Help and Behavioral Health services, as described below, are exempt from EVV for their PCS.

NOTE: Home Help providers who are eligible for these exemptions must document Home Help services using an alternate service verification designated by MDHHS. Additional information will be provided prior to Home Help payments being tied to EVV data.

3.2.A. BENEFICIARIES RECEIVING HOME HELP AND BEHAVIORAL HEALTH SERVICES

Beneficiaries who receive PCS through both Home Help and Behavioral Health in the same visit rendered by the same caregiver are excluded from EVV. When only one of these program's (Home Help OR Behavioral Health) services is rendered during a visit, EVV must be used.

Medicaid Provider Manual

3.2.B. CONGREGATE LIVING

The Centers for Medicare & Medicaid Services (CMS) does not require EVV for PCS provided in settings offering 24-hour service availability or in congregate residential settings where 24-hour service is available. There are inherent differences in service delivery models where an employee of a congregate residential setting furnishes services to multiple individuals throughout a shift (this example would NOT require EVV), and for services provided to an individual during an in-home "visit" where the provider goes to a private home or congregate residential setting to provide PCS (this example DOES require EVV), as specified in the EVV statute.

Congregate residential settings that provide PCS that do not require EVV include:

- Adult Foster Care Homes;
- Child Foster Care Homes;
- Homes for the Aged;
- Licensed Respite; and
- Residential settings (including unlicensed provider-owned and/or -operated and privately-owned/-leased settings) with 24 hours per day/7 days per week service availability to two or more unrelated individuals throughout a shift.
 - Home Help services provided in room and board settings do not qualify for the congregate living exemption.

3.2.C. LIVE-IN CAREGIVERS

For the purposes of EVV, the definition of "live-in caregiver" requires the provider to meet all the following criteria:

- The caregiver lives in the same home as the beneficiary;
- The home is the caregiver's permanent and primary residence; and
- The caregiver is responsible for providing PCS that require EVV to the beneficiary.

The caregiver could be employed by the beneficiary, through a home care agency, or through an approved self-determination arrangement.

Live-in caregiver exemptions must be approved by MDHHS or an Approving Entity using the process detailed below. An "Approving Entity" is designated by MDHHS but is not an agency provider.

Medicaid Provider Manual

Approving entities are defined as follows:

Program	Approving Entity
Behavioral Health	Prepaid Inpatient Health Plan (PIHP) or Community Mental Health Services Program (CMHSP) designee
Home Help	MDHHS Adult Services Worker
MI Choice Waiver	MI Choice Waiver Agencies
MI Health Link	Integrated Care Organization (ICO) or designee

Live-in caregivers who do not complete all requirements for the exemption process must use EVV. Those caregivers with a pending exemption request must use EVV until their exemption request has been approved. Live-in caregivers must adhere to outlined policy to continue to be exempt from reporting EVV.

Live-in caregivers paid through a provider agency (i.e., home care agency, fiscal intermediary, etc.) may be required to use an EVV system for business purposes, such as service verification and payroll. The live-in caregiver exemption does not prevent an agency from requiring their caregivers to use EVV for business purposes.

3.2.C.1. EXEMPTION PROCESS FOR LIVE-IN CAREGIVERS

The live-in caregiver must complete form BPHASA-2421, Live-In Caregiver Attestation and provide two of the following as proof of residency. (Refer to the Forms Appendix for a copy of the form. The form is also available on the MDHHS website; refer to the Directory Appendix for website information.) Documents must include the live-in caregiver's name and current home address. Electronic copies of the following are accepted.

- Valid Michigan driver's license
- Valid Michigan state identification
- Utility bill or credit card bill issued within the last 90 days
- Account statement from a bank or other financial institution issued within the last 90 days
- Mortgage, lease or rental agreement (lease and rental agreements must include the landlord's telephone number)
- Pay stub or earnings statement issued within the last 90 days
- Life, health, auto or home insurance policy
- Michigan vehicle title and registration
- Federal, state or local government documents, such as receipts, licenses or assessments

BPHASA-2421 includes space for the caregiver to enter their CHAMPS Provider ID Number. For programs other than Home Help, caregivers may not have a CHAMPS

Medicaid Provider Manual

Provider ID. Caregivers without a CHAMPS Provider ID may leave this field blank or write "N/A" in the field.

The live-in caregiver must submit BPHASA-2421 to the correct Approving Entity. A completed BPHASA-2421 should be submitted directly to the Approving Entity; however, it may be submitted to the provider agency employer or fiscal intermediary (FI) who will forward it to the Approving Entity according to their records.

Renewal of live-in status must be done at least annually and any time the beneficiary's or caregiver's address changes. For the annual renewal, if the beneficiary and caregiver address remains the same, the caregiver signs a new BPHASA-2421, Live-In Caregiver Attestation, for the MDHHS representative or Approving Entity to approve. No additional documentation is required.

A new BPHASA-2421 must be obtained if the beneficiary and live-in caregiver move to a new address. When the caregiver no longer lives with the beneficiary, the caregiver must report this to their MDHHS representative, the fiscal intermediary, home care agency or Approving Entity within ten calendar days. If this caregiver is still providing services that require EVV, the EVV system must be used immediately upon moving out of the shared residence. When the home care agency or fiscal intermediary finds that the caregiver no longer lives with the beneficiary, they must notify MDHHS or the Approving Entity within three business days.

3.2.C.2. RESPONSIBILITIES OF APPROVING ENTITIES AND OTHER PARTIES RELATED TO LIVE-IN CAREGIVER EXEMPTION PROCESS

The MDHHS representative and Approving Entity are responsible for:

- Approval or denial of the individual as a live-in caregiver;
- Providing to the caregiver a reason for denial, if applicable;
- Signing the BPHASA-2421, Live-In Caregiver Attestation;
- Retaining the signed BPHASA-2421 in the beneficiary's case record;
- Sending a copy of the approved BPHASA-2421 to the beneficiary, the live-in caregiver, and the fiscal intermediary or home care agency;
- Updating live-in caregiver information in the EVV system; and
- Monitoring live-in caregiver compliance to live-in caregiver policy.

The MDHHS representative or Approving Entity must review the BPHASA-2421 and documents and provide to the caregiver a reviewed, signed BPHASA-2421 within ten business days of the approver's receipt. Caregivers with a denied request may resubmit a corrected form, as applicable.

Each program's Approving Entity must establish a standard process for submission and review of the BPHASA-2421 and documentation. This process must include a secure process for receiving the documentation if email is used so that personal identifying/health information is not shared publicly.

Medicaid Provider Manual

The Approving Entity is required to have at least two designated approvers (a primary approver and a backup approver) so that review of the form is not delayed if an approver is unavailable. The Approving Entity must review BPHASA-2421 and attached documents and make the decision to approve or deny the exemption request within ten (10) calendar days of receipt of the documentation. If the request is denied, the Approving Entity must indicate a Reason for Denial on BPHASA-2421. The reason for denial must be detailed so the caregiver understands why it is denied.

The Approving Entity must share the approved or denied BPHASA-2421 with the provider agency or FI, live-in caregiver, and the beneficiary. Caregivers must use EVV until an approval is received. NOTE: Home Help caregivers who have submitted the BPHASA-2421 to their Home Help client's MDHHS adult services worker (ASW) are exempt from using EVV until a determination is made.

Provider agencies are required to complete initial set-up within the HHAeXchange system that reflects the beneficiary has an approved live-in caregiver exemption. This requires the provider agency or FI (depending on system access allowed) to enter the live-in caregiver as a "Residing Caregiver" in the appropriate field in the HHAeXchange system. This step will support pre- and post-payment reconciliation needs.

The Approving Entity is required to ensure that documentation is maintained in accordance with their program's document retention policies and must be shared with MDHHS upon request for audit or monitoring purposes.

If the beneficiary transfers to a different Approving Entity, the receiving Approving Entity must maintain the BPHASA-2421 and documentation and may choose to adopt the current BPHASA-2421 or obtain a new one.

3.2.C.3. RENEWAL OF LIVE-IN CAREGIVER STATUS FOR MANAGED CARE PROGRAMS

Renewal of live-in status must be done annually. Using the Notification of Upcoming End Date for Electronic Visit Verification Live-In Caregiver Attestation Documentation letter template, the Approving Entity must notify the caregiver of the upcoming end date (one year after the signed BPHASA-2421) of their approved BPHASA-2421 so the caregiver can timely submit the annual renewal documentation. This notifying letter should be sent to the caregiver, provider agency or FI, and beneficiary. The Approving Entity may send BPHASA-2421 with this letter for the caregiver to use for their renewal. The Managed Care Program Approving Entity must send notification at least 30 calendar days prior to the end date of the existing Attestation. (Refer to the Forms Appendix of this manual for the Notification of Upcoming End Date for Electronic Visit Verification Live-In Caregiver Attestation Documentation letter.)

If the caregiver fails to submit renewal documentation, this must not delay services. The caregiver would no longer be exempt from using EVV and would have 30 days to get set-up with EVV. If EVV is not used after the 30-day grace period, the Approving Entity is held responsible for non-compliance and potential recoupment of funds.

If a beneficiary moves with a caregiver, and the caregiver does not notify the Approving Entity within ten (10) calendar days, the Approving Entity must provide notice that the

Medicaid Provider Manual

current BPHASA-2421 will end and on what date. The caregiver will have 30 calendar days from this notice to submit a new BPHASA-2421 and documentation to maintain the live-in caregiver exemption. If documentation is not provided, the caregiver must begin using EVV. The EVV set-up will occur within that 30-day period after the Approving Entity is notified of the move. During the transition/move, a United States Postal Service (USPS)-issued Change of Address form or Michigan Secretary of State issued temporary State ID are acceptable forms of documentation.

If a provider has recurring issues with non-compliance, the Approving Entity must address the issues with the provider. The Approving Entity must allow time for the provider to make corrections.

3.2.C.4. RENEWAL OF LIVE-IN CAREGIVER STATUS FOR THE HOME HELP PROGRAM

Renewal of live-in status must be done every six months to remain exempt from EVV. ASWs will work with caregivers to complete a renewal of BPHASA-2421 during each six-month review.

3.3 PCS PROVIDER ENROLLMENT

Providers who render/bill PCS to Medicaid beneficiaries are required to be enrolled in the Medicaid program and uniquely identified on claims to be eligible for reimbursement. The chart below, titled Provider Enrollment Requirements, identifies all EVV PCS provider enrollment requirements.

Provider Enrollment Requirements

Program	Provider	Requires an NPI?	Requires enrollment in CHAMPS?
Behavioral Health	Agency Provider	YES	YES
	Fiscal Intermediary	YES	YES
	Individual Provider/ Direct Care Worker	No	No
Home Help	Agency Provider	YES	YES
	Individual and Agency Caregivers	No	YES
MI Choice	Agency Provider	YES	YES
	Fiscal Intermediary	YES	YES
	Individual Provider/ Direct Care Worker	No	No
MI Health Link	Agency Provider	YES	YES
	Fiscal Intermediary	YES	YES
	Individual Provider/ Direct Care Worker	No	No

To obtain an NPI, providers must complete the online application at the National Plan and Provider Enumeration System (NPPES) website. (Refer to the Directory Appendix for website information.) Providers must enroll as a Type 2 (Organization) NPI.

Medicaid Provider Manual

To enroll as a Medicaid provider, the provider must complete an online application in CHAMPS and, if required, enroll with a Type 2 (Organization) NPI. To access CHAMPS, providers must register for a MILogin User ID and password. (Refer to the Directory Appendix for website information.)

Providers must enroll in CHAMPS under the following Enrollment Type, Provider Name, Specialty, and Subspecialty, depending on their provider type and the services they are providing/billing. Providers who have multiple specialties or subspecialties may select as many as applicable.

Provider	Program	Enrollment Type	Provider Name	Specialty	Subspecialty
Individual	Home Help	Atypical	Atypical Individual	Home Help (Individual)	No Subspecialty
Agency	Home Help	Atypical	Atypical Agency	Home Help Facility/ Agency/ Organization (FAO)	No Subspecialty
	Behavioral Health			Home and Community Based Services Agencies	Community Living Supports
	MI Choice				Expanded Community Living Supports
	MI Health Link				Personal Care Services
					Respite
Fiscal Intermediary	Behavioral Health	Atypical		Fiscal Intermediary	Community Living Supports
	MI Choice				Expanded Community Living Supports
	MI Health Link				Personal Care Services
					Respite

An approved provider enrollment application in CHAMPS and an NPI (if required) are necessary for the EVV system to track services and payments for agencies and fiscal intermediaries. Claims submitted with dates of service prior to provider enrollment approval will be rejected.

Providers must meet the requirements in the Provider Enrollment Requirements chart above prior to using EVV.

Refer to the General Information for Providers chapter of this Manual for information about provider enrollment procedures and regulations.

SECTION 4 – HOME HEALTH CARE SERVICES

4.1 HOME HEALTH CARE SERVICE CODES

The following HHCS codes require EVV:

- G0151 - Physical Therapy
- G0152 - Occupational Therapy
- G0153 - Speech/Language Therapy
- G0156 - Home Health Aide
- G0299 - Skilled Nursing Services, RN
- G0300 - Skilled Nursing Services, LPN

The EVV-required codes for HHCS are listed on the Home Health billing and reimbursement website. (Refer to the Directory Appendix for website information.)

4.2 EVV HOME HEALTH CARE SERVICE EXCLUSIONS

The following HHCS are excluded from EVV:

- Hospice Services
- Durable Medical Equipment (DME) Services
- HHCS visits for beneficiaries who are dually enrolled with Medicare and Medicaid are excluded from EVV requirements. Providers are not required to collect EVV data for HHCS visits for these beneficiaries.

Medicaid Provider Manual

SECTION 5 – EVV COMPLIANCE

Programs that require the use of EVV for their HHCS or PCS must be compliant with the EVV policies within this chapter. Failure to comply with these requirements may result in non-payment of Medicaid services.

SECTION 1 - INTRODUCTION

1.1 GENERAL INFORMATION

This chapter applies to Ambulance providers and Hospital-Owned Ambulance Services.

The Michigan Department of Health and Human Services (MDHHS), which administers the Medicaid Program, reimburses for ambulance services as medically necessary and appropriate, regardless of whether there is a corresponding medical claim on the date of service, when:

- Medical/surgical or psychiatric emergencies exist; or
- No other effective and less costly mode of transportation for medical treatment can be used because of the beneficiary's medical condition.

Services that have been excluded from direct reimbursement to ambulance providers are:

- Services that are not medically necessary.
- Services that are included as a part of the base rate.
- Services for beneficiaries in a nursing facility (NF) that are reimbursed as part of the facility's per diem or are billed separately by the facility.
- Services reimbursed as part of the Diagnosis Related Groups (DRG) rate for beneficiaries who are inpatients at a hospital, are sent to another facility for services, and returned to the originating hospital without being discharged from the originating hospital.
- Services to Medicaid Health Plan (MHP) enrollees.
- Nonambulance, non-emergency medical transportation that is provided by a MHP.
- Nonambulance, non-emergency medical transportation arranged by either the local MDHHS office or an MDHHS-contracted transportation broker who reimburses the beneficiary or the transportation provider directly.

The Covered Services Section of this chapter describes the coverages and limitations for payment of ambulance services by Medicaid.

Special billing instructions follow coverage sections, where applicable. These instructions assist the ambulance provider in obtaining reimbursement and must be used in conjunction with the completion instructions found in the Billing & Reimbursement for Professionals and the Billing & Reimbursement for Institutional Providers chapters of this manual and the Healthcare Common Procedure Coding System (HCPCS) manual.

Medicaid Provider Manual

1.2 COMMON TERMS

The following terms have specific meanings in the Ambulance Program:

Advanced Life Support (ALS) Assessment	An assessment performed by an ALS crew (minimum level Emergency Medical Technician-Specialist [EMT-S], Advanced Emergency Medical Technician [AEMT], or Paramedic) as part of an emergency response that was necessary because the patient's reported condition at the time of dispatch was such that only an ALS crew was qualified to perform the assessment to determine whether the patient's condition requires an ALS level of care. The completion of an ALS assessment does not necessarily result in a determination that the patient requires an ALS intervention.
Advanced Life Support Intervention	A procedure in accordance with state and local laws that is required to be performed by minimum level Emergency Medical Technician-Specialist [EMT-S], Advanced Emergency Medical Technician [AEMT], or Paramedic.
Ambulance	A motor vehicle or aircraft that is primarily used or designated as available to provide transportation and basic life support or advanced life support.
Base Rate	A payment rate associated with the level of service provided. Included in the base rate is oxygen, equipment and supplies essential to the provision of services, and accompanying personnel.
Continuous or Round Trip	An ambulance service in which the patient is transported to the hospital, the physician deems it medically necessary for the ambulance to wait, and the beneficiary is then transported to a more appropriate facility for care or back to the place of origin.
Emergency Medical Technician (EMT)	An individual licensed by the state of Michigan to provide BLS services.
Emergency Medical Technician Specialist (EMT-S)	An individual licensed by the state of Michigan to provide limited ALS services.
Emergency Response	<p>A response that, at the time the ambulance provider is called, is provided after the sudden onset of a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain) such that in the absence of immediate medical attention could reasonably be expected to result in:</p> <ul style="list-style-type: none">▪ placing the health of the beneficiary (or, with respect to pregnant women, the health of the woman or their unborn child) in serious jeopardy,▪ serious impairment to bodily functions, or▪ serious dysfunction to any bodily organ or part.
Fixed Wing Air Ambulance	An aircraft, such as an airplane, that is licensed as a fixed wing air ambulance and such ancillary services as may be medically necessary.
Loaded Mileage	The number of miles for which the Medicaid beneficiary is transported in the ambulance vehicle.
Medically Necessary Transport	An ambulance transport which is required because no other effective and less costly mode of transportation can be used due to the patient's medical condition.
Neonate	An infant less than four weeks old.

Medicaid Provider Manual

Neonate Return Transfer	An ambulance transport that returns a stabilized neonate from a Level III or Level IV NICU back to the Level I Well Born Nursery or Level II Special Care Nursery from which the neonate was originally transferred.
Neonatal Transport Team	A team of experienced, specialized, multidisciplinary health care providers (established and defined by a health care facility) who are trained for, and immediately available to respond to, calls for high risk neonatal transports.
Paramedic	An individual licensed by the state of Michigan to provide ALS services.
Rotary Wing Air Ambulance	An aircraft, such as a helicopter, that is licensed as a rotary wing air ambulance and such ancillary services as may be medically necessary.
Transfer	The movement of a beneficiary from one health care facility to another in a licensed ground or air ambulance because a medically necessary service was not available at the primary location.
Waiting Time	When an ambulance provider waits at a hospital while a beneficiary is being stabilized, with the intent of continuing transport to a more appropriate hospital for care, or back to the beneficiary's point of origin.

1.3 AMBULANCE SERVICES

MDHHS recognizes different levels of medical services provided by qualified ambulance staff according to the standards established by law and regulation through Michigan Public Act 368 of 1978 as amended. The standards established for each level of service are detailed in the Base Rate subsection of this chapter.

The beneficiary's attending physician must order all non-emergency, medically necessary ambulance transportation. The ambulance provider must retain all documentation supporting the nature of the service in the beneficiary's file regardless of the level of service provided. (Refer to the Emergency and Non-emergency subsections of this chapter for additional information.)

1.4 MEDICAL NECESSITY

Medical necessity is established when the beneficiary's condition is such that use of any other method of transportation is contraindicated. In cases where a mode of transportation other than an ambulance could be used without endangering the beneficiary's health, no payment may be made for ambulance services regardless of whether such other transportation is available.

The medical care personnel in attendance, including the Emergency Medical Technician (EMT) at the scene of an emergency, determine medical necessity and appropriateness of service within the scope of accepted medical practice and Medicaid guidelines. Medical necessity for non-emergency transports must be substantiated with a physician's written order. Ambulance providers must maintain documentation of the medical necessity and appropriateness of service in the beneficiary's file.

1.5 DOCUMENTATION REQUIREMENTS

Ambulance providers must maintain documentation of the medical necessity and appropriateness of service in the beneficiary's file. This documentation may be used to assess whether the transport meets medical necessity, eligibility, coverage, benefit category, and any other criteria necessary for payment. Documentation must be sufficiently detailed to allow reconstruction of what transpired for each service

Medicaid Provider Manual

billed. (Refer to the General Information for Providers chapter of this manual for information on documentation.) The level of service and assessment findings must be fully documented. An ambulance provider must document the medical necessity and clinical significance of an ALS assessment in the beneficiary's file. The ambulance service must meet all program coverage criteria for payment to be made.

1.6 DIAGNOSIS CODES

Providers must enter the appropriate ICD diagnosis code on all ambulance claims. Providers must report the most specific diagnosis code available that identifies the reason for the service. When billing for emergency transports, refer to the Covered Services Section, Emergency subsection of this chapter. For allowable diagnosis codes, refer to the Medicaid Code and Rate Reference tool. (Refer to the Directory Appendix for website information.)

Documentation supporting the diagnosis code must be retained in the ambulance provider's records for audit purposes.

1.7 USUAL AND CUSTOMARY CHARGES

Providers must bill MDHHS the usual and customary (U&C) fee charged to the public. Customary charge means the amount the provider charges another third party payer or the general public (except in cases where the general public receives free or reduced charges) for the same or a similar service. This definition does not include negotiated or contracted payment rates. If the provider renders a covered service to a beneficiary that the provider offers for free or for a reduced fee to the general public, the provider may only bill Medicaid up to that customary charge as long as all other Medicaid requirements are met. If one charge is made to tax-paying residents in a given township, and a higher charge is made to nonresidents, the same charge formula should be applied for Medicaid beneficiaries.

Refer to the Billing & Reimbursement for Professionals, the Billing & Reimbursement for Institutional Providers, and the Coordination of Benefits chapters of this manual when the beneficiary also has Medicare or other insurance.

1.8 MEDICARE/MEDICAID COVERAGE

MDHHS reimburses the ambulance provider for the coinsurance and deductible amounts subject to Medicaid's reimbursement limitations on Medicare approved claims, even if Medicaid does not normally cover the service.

Refer to the Billing & Reimbursement for Professionals or the Billing & Reimbursement for Institutional Providers chapter of this manual, as appropriate, for instructions on completing the claim after Medicare has approved the services.

1.9 PRIOR AUTHORIZATION

For services requiring PA, the ambulance provider must request authorization from the MDHHS Program Review Division (PRD). (Refer to the Directory Appendix for contact information.) The request must include the following information:

- Beneficiary's name and Medicaid ID number

Medicaid Provider Manual

- Diagnosis
- Point of pick-up and destination
- Services(s) to be provided
- Explanation as to why the ambulance transportation is medically necessary
- Explanation as to why the beneficiary cannot be transported by other means
- Name, address, and National Provider Identifier (NPI) of the ambulance provider
- PA requestor's name

Based on the documentation provided, PRD approves or denies the PA request. The ambulance provider may not bill MDHHS for prior authorized services until PRD approves the PA request. The PA requestor must notify PRD of any changes made to the approved authorization. Except as otherwise specified, the PA number must be entered on the claim before the ambulance provider is reimbursed for services.

SECTION 2 - COVERED SERVICES

2.1 AIR AMBULANCE

Air ambulance providers who are licensed by MDHHS to provide emergency medical services and are properly enrolled in the Medicaid program may be reimbursed for medically necessary air ambulance services. To become Medicaid-enrolled, Michigan-licensed air ambulance providers must submit a copy of their state-issued aircraft operations license number with their provider enrollment application. For prospective air ambulance providers who are not Michigan-licensed, a copy of their respective state-issued aircraft operations license must be submitted with their provider enrollment application, along with a copy of their Commission on Accreditation of Medical Transport Systems (CAMTS) accreditation or an affidavit of substantial CAMTS accreditation compliance. Providers must indicate on the enrollment application that they are requesting either fixed-wing air ambulance or rotary wing air ambulance status. Coverage of the air ambulance services includes the base rate, loaded mileage, and waiting time.

Medicaid reimburses air ambulance services only when a beneficiary requires medical or surgical (not diagnostic) procedures, and their condition requires rapid transportation to a treatment facility. One of the following requirements must be met:

- Great distance or obstacles preclude such delivery to the most appropriate facility; or,
- The beneficiary is inaccessible by either ground or water ambulance.

Hospital-to-hospital emergent transfers performed by either a rotary wing or fixed-wing air ambulance require clinical documentation (i.e., the History and Physical [H & P] report) from the beneficiary's attending physician validating the need for the air, rather than ground, transportation. (Refer to the Emergency subsection of this chapter for more information on emergent transports.)

The ambulance company must bill any ground ambulance transportation ordered to and from the airport in the normal manner.

Non-emergent air ambulance transports require an order from the beneficiary's attending physician and must be prior authorized. (Refer to the Ambulance Services subsection of this chapter for documentation requirements for emergency and medically necessary services.)

The ambulance company must bill any ground ambulance transportation ordered to and from the airport in the normal manner.

2.1.A. FIXED WING AIR AMBULANCE

The Medicaid Provider Enrollment file reflects enrollment as a fixed wing air ambulance provider.

2.1.B. ROTARY WING AIR AMBULANCE

The Medicaid Provider Enrollment file reflects enrollment as a rotary wing air ambulance provider.

2.2 BASE RATE

The ambulance provider may bill one base rate procedure code:

- Advanced Life Support 1 (ALS 1) Non-emergency;
- ALS 1 Emergency;
- Advanced Life Support 2 (ALS 2);
- Basic Life Support (BLS) Non-emergency;
- BLS Emergency;
- Neonatal Emergency Transport;
- Rotary Wing Air Ambulance; or
- Fixed Wing Air Ambulance Transport.

The determination to respond emergently with either an ALS or BLS ambulance vehicle is dependent upon local 911 or equivalent service dispatch protocol. Where the dispatch was inconsistent with this standard of protocol, or where no protocol was used, the beneficiary's condition at the time of ambulance arrival determines the appropriate level of reimbursement. Even if a local government or medical control authority requires an ALS response to all calls, the base rate billed must reflect the level of service rendered and not the type of vehicle in which the beneficiary was transported. Medicaid will only pay for the level of service required and provided.

Reimbursement for the base rate covers all services rendered except mileage that may be billed separately.

When treatment is rendered and no other care or transport is necessary, ambulance providers may bill the base rate procedure code for the level of service performed but not for mileage. (Refer to the Special Situations Section of this chapter for instructions regarding intercept situations.)

2.3 ADVANCED LIFE SUPPORT

Ambulance operations and ambulance staff must be licensed to render advanced life support (ALS) services by the State and properly enrolled with MDHHS.

2.3.A. ADVANCED LIFE SUPPORT, LEVEL 1 (ALS1) – NON-EMERGENCY

ALS1 is defined as the transportation by ground ambulance vehicle, and the provision of medically necessary supplies and services, which includes an ALS assessment or the furnishing of at least one ALS intervention within the context of a non-emergency response.

Medicaid Provider Manual

Ambulance providers must secure a physician's written order indicating the medical necessity of the elevated level of transport and retain it in their files. (Refer to the Non-emergency subsection of this chapter for additional information.)

2.3.B. ADVANCED LIFE SUPPORT, EMERGENCY TRANSPORT, LEVEL 1 (ALS1) – EMERGENCY

ALS1 is defined as the transportation by ground ambulance and the provision of ALS1 services within the context of an emergency response. The furnishing of an ALS assessment, without a medically necessary ALS intervention, is sufficient to bill the ALS base rate if the beneficiary's condition at the time of dispatch indicated an ALS level of service was required, provided that ambulance transportation itself was medically reasonable and necessary.

2.3.C. ADVANCED LIFE SUPPORT, LEVEL 2 (ALS2)

ALS2 is defined as the transportation by ground ambulance vehicle, and the provision of medically necessary supplies and services, including an ALS assessment, and:

- at least three separate administrations of one or more medications by intravenous push/bolus or by continuous infusions (excluding crystalloid fluids); or
- one or more of the following ALS2 procedures:
 - Manual defibrillation/cardioversion
 - Endotracheal intubation, or the monitoring and maintenance of an endotracheal tube that was previously inserted prior to the transport
 - Central venous line
 - Cardiac pacing
 - Chest decompression
 - Surgical airway
 - Intraosseous line

Reimbursement for the ALS base rates includes those services listed under BLS and is the same whether or not special services were performed.

2.4 BASIC LIFE SUPPORT

Ambulance operations and ambulance staff must be licensed to render BLS services by the State of Michigan) and properly enrolled with MDHHS. Medicaid coverage of the BLS base rate includes transportation and medical services that an EMT is routinely trained to provide (e.g., the provision of oxygen and resuscitation). Reimbursement for accompanying personnel, suctioning, labor/delivery, emergency first aid, emergency/night call services, oxygen, and resuscitation is included in the BLS base rate.

BLS also includes equipment and supplies essential to providing such services (e.g., splints, backboards, obstetrical kits).

2.4.A. BASIC LIFE SUPPORT (BLS) – NON-EMERGENCY

BLS – Non-emergency is defined as the transportation by ground ambulance as defined above within the context of a non-emergency response. The BLS service must be provided by either a BLS or an ALS licensed provider.

Ambulance providers must secure a physician's written order indicating the medical necessity of the transport and retain it in their files. (Refer to the Non-emergency subsection of this chapter for additional information.)

2.4.B. BASIC LIFE SUPPORT (BLS) – EMERGENCY

BLS is defined as the transportation by ground ambulance and when either a BLS or an ALS licensed provider renders BLS services as defined above within the context of an emergency response.

2.5 DRUGS AND SOLUTIONS

Drugs, intravenous solutions and needles, and syringes and hypodermic needles carried in ambulances require replacement by a cooperating hospital pharmacy and under the supervision of a licensed pharmacist. Only the hospital is reimbursed for these items.

2.6 EMERGENCY

Claims may be made to MDHHS for emergency transports that meet the criteria specified in the definitions of BLS Emergency, ALS 1 Emergency and ALS 2 transports in this section.

Claims for emergency ambulance transports must be coded with both an emergency procedure code and an appropriate ICD diagnosis code whenever the service results in transport to a hospital, or assessment and treatment/stabilization determines that no further transport is necessary. Claims for emergency transports without this information will be rejected. Documentation supporting the emergency diagnosis code must be retained in the ambulance provider's records for audit purposes.

To assure appropriate coverage and reimbursement for emergency ambulance services, MDHHS maintains a list of diagnosis codes for emergency ambulance transport. For allowable diagnosis codes, refer to the Medicaid Code and Rate Reference tool. (Refer to the Directory Appendix for website information.)

2.7 MILEAGE

Mileage reimbursement is a Medicaid benefit when:

- A transport occurs.
- Loaded mileage is billed.
- Appropriate origin and destination modifier combinations are utilized.

Ambulance mileage reimbursement is a covered Medicaid benefit when a transport occurs and has been reimbursed. Transports that are denied for any reason, including lack of emergency criteria, will also be denied for the mileage reimbursement.

Medicaid Provider Manual

Refer to the Billing & Reimbursement for Professionals or the Billing & Reimbursement for Institutional Providers chapters of this manual, as appropriate, for a list of origin and destination modifiers.

When billing for mileage greater than 100 miles, enter the origin and destination addresses in the Remarks section.

2.8 NEONATAL

Coverage of neonatal transport includes the neonatal base rate, loaded mileage, and waiting time. The cost of the transfer isolette use is included in the neonatal base rate.

The intensive care transport of critically ill neonates to an approved, designated Level III or Level IV Neonatal Intensive Care Unit (NICU), as approved and designated by Certificate of Need (CON) review standards, is covered.

A neonatal transport team must accompany the neonate. The neonatal transport team has primary responsibility for the neonate and the hospital is reimbursed for these services. The designated ambulance provider may bill the neonatal base rate and mileage for the transport.

A neonate return transfer from a NICU to a Level I Well Newborn Nursery or a Level II Special Care Nursery (after the neonate's condition is stabilized) is covered if the transportation is ordered by the neonate's attending physician. A physician's order indicating the medical necessity of the return trip must be retained in the beneficiary's file as detailed in the Ambulance Services subsection of this chapter.

Waiting time that exceeds 30 minutes is reimbursable and must be billed consistent with the Waiting Time subsection of this section.

2.9 NON-EMERGENCY [CHANGE MADE 4/1/2025]

A claim may be made to MDHHS for a scheduled, medically necessary non-emergency ambulance transport only when the beneficiary's attending physician orders the transportation and provides, to the ambulance provider, a written order (e.g., physician certification statement) certifying the medical necessity of the transport.

The ambulance provider must retain a copy of the physician's order in the beneficiary's file.

The written order must contain, at a minimum, the following information:

- beneficiary's name and Medicaid identification (ID) number;
- attending physician's NPI number and attending physician or provider signature;
- type of transport necessary;
- explanation of the medical necessity for ambulance transport (i.e., why other means of transport could not be used);
- origin and destination;
- diagnosis;
- frequency of needed transports (required for ongoing, planned treatment);

Medicaid Provider Manual

- type of ongoing treatment (required for ongoing, planned treatment); and
- an explanation of why ground transportation is not appropriate (required when transported by air ambulance).

A separate physician's order is required for each individual round trip transport, unless a beneficiary has a chronic medical condition that requires planned treatment. For chronic conditions, a physician may order non-emergency transportation for a maximum time period of up to 60 days in a single order. The physician's order for ongoing treatment must state the frequency of the transport and the type of ongoing treatment necessary.

If the ambulance provider is unable to obtain a written order signed by the beneficiary's attending physician, a physician's assistant, advanced practice registered nurse (including nurse practitioner, clinical nurse specialist and certified nurse midwife), registered nurse, or discharge planner who is knowledgeable about the beneficiary's condition and who is employed by the attending physician or facility to which the beneficiary was admitted may sign in the physician's place.

The ordering provider may be held responsible if a medically unnecessary ambulance transport is ordered. The ordering provider may be subject to corrective action related to these services, including recoupment of funds. Additionally, any instances in which the ordering provider fails to document all required information necessary for a written order (e.g., physician certification statement) may be subject to recoupment of funds. The ambulance provider may be subject to corrective action, including the recoupment of funds, if it submits a claim for a medically necessary non-emergency ambulance transport without record of a written order.

Non-emergency transport in a Medi-van or other wheelchair-equipped vehicle is not a covered service for ambulance providers. However, Medicaid beneficiaries or transportation providers may receive reimbursement for this type of transport directly from the local MDHHS office, an MDHHS contracted transportation broker or, if the beneficiary is enrolled, an MHP. Refer to the Non-Emergency Medical Transportation Chapter of this manual for additional information.

(text box was deleted per bulletin MMP 24-33)

2.10 UNLISTED AMBULANCE SERVICE

If a service is rendered that is not included in the coverages defined under the existing procedure codes, the ambulance provider may bill the procedure under the Unlisted Ambulance Service procedure code. The claim pends for manual review to determine whether the service is reimbursable under Medicaid guidelines.

Additional considerations:

- Items included in the base rate are not separately reimbursable.
- If no transport was provided, refer to the base rate billing instructions.
- A complete description of the service must be included in the Remarks section or as an attachment to the claim.

2.11 WAITING TIME

Waiting time is covered only when the beneficiary's attending physician deems it medically necessary. Waiting time is reimbursable after the first 30 minutes.

If more than four hours of waiting time is required, providers must request individual consideration and provide documentation. Providers should refer to the Billing & Reimbursement for Professionals or the Billing & Reimbursement for Institutional Providers chapters of this manual, as appropriate, for instructions.

2.12 INTERFACILITY TRANSFERS

Hospital transfers to the nearest hospital that has the necessary service may be covered when the beneficiary has been stabilized at the first hospital but needs a higher level of care available only at the second hospital. Examples of medically necessary transfers include, but are not limited to, services not available at the first facility such as rehabilitation, a burn unit, ventilator assistance, or other specialized care. The ambulance provider must maintain documentation that clearly describes what service(s) is not available at the first facility. Transport from a hospital capable of treating the beneficiary to another hospital for the convenience or preference of the ordering provider, beneficiary or beneficiary's family is not a covered benefit.

SECTION 3 - SPECIAL SITUATIONS

3.1 INTERCEPTS

In situations where a BLS vehicle intercepts with an ALS vehicle, each provider may bill for the appropriate base rate and for the loaded mileage they provided (if any).

3.2 BRIDGE/TUNNEL TOLL

Bridge and tunnel toll charges are reimbursable to the ambulance provider, both loaded and return trip.

Billing instructions:

- The Unlisted Ambulance Service code must be used.
- All toll charges must be combined on one claim line.
- The Remarks section must contain the bridge or tunnel name and the number of times used.

3.3 CONTINUOUS OR ROUND TRIP TRANSPORT

These types of transports are considered to be one run. The base rate code for the highest level of service performed during transport should be billed on one claim line. Loaded mileage is also billed on one claim line, with the total number of whole (loaded) miles indicated as the quantity.

Refer to the Waiting Time subsection of this chapter in cases where waiting time exceeds 30 minutes.

3.4 NURSING FACILITIES

When a resident requires physician ordered medically necessary non-emergency ambulance transportation, the ambulance provider may only bill MDHHS directly. This cost must not be claimed as a routine cost on Michigan's Medicaid cost report. The ambulance provider must maintain the physician's written order as documentation of medical necessity. (Refer to the Nursing Facility Coverages Chapter of this manual for additional information.)

If a resident's attending physician does not order non-emergency ambulance transport, arrangements for payment must be between the facility and the ambulance provider, and cannot be charged to the resident, the resident's family, or used to offset the patient-pay amount. This cost must not be claimed as a routine cost on Michigan's Medicaid cost report. The cost of non-emergency ambulance transports not ordered by the resident's physician must be identified and removed on Worksheet 1-B by the NF.

3.5 MULTIPLE ARRIVALS

When multiple units respond to a call for services, only the entity that actually provides services to the beneficiary may bill and be paid. The entity that rendered service/care should bill for all services furnished.

3.6 MULTIPLE BENEFICIARIES PER TRANSPORT

When more than one eligible beneficiary is transported at the same time, the only acceptable duplication of charges is half of the base rate.

Separate claims must be submitted for each beneficiary. The first claim is completed in the usual manner and the base rate billed must reflect the highest level of service performed.

Claims for additional beneficiaries must indicate the U&C base rate charge. The appropriate modifier must be reported. Providers should refer to the Billing & Reimbursement for Professionals or the Billing & Reimbursement for Institutional Providers chapters of this manual, as appropriate, for a list of modifiers. Payment is made at 50 percent of Medicaid's reimbursement rate or 50 percent of the provider's charge (whichever is less).

No mileage or waiting time is to be charged for additional beneficiaries. These services are included in the reimbursement of the first claim.

3.7 MULTIPLE TRANSPORTS PER BENEFICIARY

If more than two ambulance transports are needed for the same beneficiary on the same date of service, the third transport will require PA. When additional transports of an emergent nature are necessary, ambulance providers can secure PA after the transport has been rendered. (Refer to the Prior Authorization subsection of this chapter for additional information.) Additional information regarding billing is contained in the Billing & Reimbursement for Institutional Providers and the Billing & Reimbursement for Professionals Chapters of this manual.

3.8 OUT OF STATE/BEYOND BORDERLAND TRANSPORTS

Except in situations when an emergency response is required, out of state/beyond borderland ambulance transports require PA. (Refer to the General Information for Providers chapter of this manual for additional information on out of state/beyond borderland policy.) (Refer to the Prior Authorization subsection of this chapter for additional information.)

3.9 PRONOUNCEMENT OF DEATH

In situations where a Medicaid beneficiary dies, reimbursement to a Medicaid ambulance provider depends upon when the beneficiary's death occurs. If a beneficiary is pronounced dead by an individual legally authorized to pronounce death:

- Prior to the time that the ambulance is called, no payment is made.
- After the ambulance is called, either before or after the ambulance arrives at the scene, payment for an ambulance trip is made at the BLS rate, but no mileage is paid.
- On arrival to the receiving hospital after getting medically necessary care during the ambulance transport from the scene to the receiving facility, payment is made at the medically necessary level of service furnished.

SECTION 4 – AMBULANCE COVERAGE EXCLUSIONS

Circumstances under which Medicaid does not pay for ambulance transportation include, but are not limited to:

- Transport to services that are not Medicaid-covered.
- Transports that are not medically necessary, whether medical/surgical or psychiatric.
- Transport mileage when transports are denied for any reason, including lack of emergency criteria.
- Medi-car, Medi-van, or wheelchair transports.
- Transport to a funeral home.
- Trips made for services, such as drawing blood and catheterization that could have been provided at the beneficiary's location.
- Transportation of a beneficiary pronounced dead before the ambulance was called.
- Round trips when a beneficiary is taken from a hospital to another facility and returned to the same hospital. As long as the beneficiary is an inpatient, all ancillary services are the responsibility of the hospital.
- Transport of inmates to or from a correctional facility.

SECTION 5 – AMBULANCE QUICK REFERENCE GUIDE

Transports rendered in an emergency situation are covered in all settings. Use the following table to determine if the service is covered, not covered or if covered but to be billed to another facility/entity.

	To Inpatient	To Emergency Department Outpatient	To Nursing Facility	To Ambulatory Setting (i.e., Lab, Office, Clinic, Therapy, Dialysis)	To Home
From Inpatient	If Medically Necessary	Emergency Only	If Medically Necessary	If Medically Necessary	If Medically Necessary
From Emergency Department Outpatient	If Medically Necessary	Emergency Only	If Medically Necessary	If Medically Necessary	If Medically Necessary
From Nursing Facility	If Medically Necessary	Emergency Only	If Medically Necessary	If Medically Necessary	If Medically Necessary
From Ambulatory Setting (i.e., lab, office, clinic, therapy, dialysis)	If Medically Necessary	Emergency Only	If Medically Necessary	If Medically Necessary	If Medically Necessary
From Home	Emergency Only	Emergency Only	If Medically Necessary	If Medically Necessary	Not Covered
From At Large (Example: Scene of accident)	Emergency Only	Emergency Only	Not Covered	Emergency Only	Not Covered

Medicaid Provider Manual

SECTION 1 - INTRODUCTION

Pursuant to Section 1642 of Public Act 131 of 2009, Michigan Department of Health and Human Services (MDHHS) recognizes and reimburses Ambulatory Surgical Center (ASC) facilities. An ASC is a distinct entity that operates exclusively for the purpose of furnishing outpatient surgical services.

MDHHS follows Medicare ASC coverage and reimbursement policy, but applies the current Outpatient Prospective Payment System (OPPS)/ASC reduction factor to arrive at the Medicaid ASC reimbursement rate. To facilitate coordination of benefits, ASC policy follows, as closely as possible and appropriate, Medicare's current ASC coverage policies, editing, and claim submission requirements.

1.1 MEDICARE CERTIFICATION

To be eligible for Michigan Medicaid enrollment and payment, ASCs must be certified as meeting the requirements for a Medicare ASC and must enter into an agreement with the Centers for Medicare & Medicaid Services (CMS).

Medicaid Provider Manual

SECTION 2 - COVERED SERVICES

MDHHS follows Medicare's ASC coverage policies, with Medicaid-specific exceptions outlined by code. MDHHS-specific exceptions are outlined as part of the MDHHS Ambulatory Surgical Centers (ASC) Wraparound Code List. Updates are published quarterly on the MDHHS website. (Refer to the Directory Appendix for website information.)

2.1 ASC PAYMENT - STATUS INDICATORS

The Centers for Medicare & Medicaid Services (CMS) assigns a two-digit status indicator to each Current Procedural Terminology (CPT) or Healthcare Common Procedure Coding System (HCPCS) code identifying if a code will be paid and how it will be paid. MDHHS has adopted the CMS ASC status indicators.

For categories of codes that MDHHS covers differently than Medicare (wraparound codes), the following alpha/numeric status indicators are used:

Status Indicator	Description
AA1	MDHHS Covered /Medicare Non-Covered
AA2	MDHHS Covered
AA3	Vaccines for Children (VFC)
AA4	State Plan Reimbursement
RR1	MDHHS Non-Covered

SECTION 3 - ASC REIMBURSEMENT

The current OPPS/ASC reduction factor is applied to the current Medicare ASC reimbursement rate. The OPPS and ASC reduction rate is monitored and adjusted as necessary to assure payments do not exceed appropriated funding. Reimbursement for Ambulatory Surgical Center services will be monitored and adjustments will be made to the MDHHS reduction factor as necessary to ensure spending limits fall within the MDHHS appropriation. A wage index of 1.0 is applied for all Ambulatory Surgical Centers.

Additional billing and reimbursement information is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

3.1 PAYMENT CALCULATION

Payments for ASC facility services are calculated utilizing the following formula:

$$\begin{array}{|c|} \hline \text{Medicare ASC} \\ \text{rate} \\ \hline \end{array} \times \begin{array}{|c|} \hline \text{Current} \\ \text{OPPS/ASC} \\ \text{reduction} \\ \text{factor} \\ \hline \end{array} = \begin{array}{|c|} \hline \text{Medicaid ASC} \\ \text{Rate} \\ \hline \end{array}$$

The MDHHS payment is the lesser of:

- the Medicaid fee screen/allowable amount, minus any Medicare or other insurance payments, and any applicable Medicaid copayment, patient-pay, and/or deductible; or
- (for fee schedule items) the provider's charge, reduced by any contractual adjustments, and minus any Medicare or other insurance payments, and any applicable Medicaid copayment, patient-pay, or deductible amount; or
- the beneficiary's liability for coinsurance, copayments, and/or deductibles.

3.2 PACKAGED SERVICES

MDHHS follows Medicare guidelines for packaged/bundled service costs. ASC services having a status indicator of "N1" are considered a packaged service/item and do not receive separate payment.

3.3 MULTIPLE PROCEDURES

MDHHS follows Medicare payment rules for multiple procedures.

3.4 BILATERAL PROCEDURES

MDHHS follows Medicare payment rules for bilateral procedures. The multiple procedure reduction of 50 percent applies to all bilateral procedures subject to multiple procedure discounting.

3.5 DISCOUNTED PROCEDURES

MDHHS follows Medicare payment rules for discounted procedures.

3.6 APPLICATION OF STATEWIDE OUTPATIENT COST-TO-CHARGE RATIO

Services paid by Medicare at reasonable cost and contractor-priced items are paid by applying the Medicaid statewide outpatient hospital cost-to-charge ratio to the Medicare ASC rate. The OPPI/ASC reduction factor is not applied. Updates of hospital cost-to-charge ratios are done in conjunction with updates to the inpatient operating ratios.

3.7 AMBULATORY SURGICAL CENTERS WRAPAROUND CODE LIST FEE SCHEDULE

Services listed in the MDHHS Ambulatory Surgical Centers (ASC) Wraparound Code List are paid based on a MDHHS-specific fee schedule. CMS updates are published quarterly on the MDHHS website (revisions are made to align with Medicare). The OPPI/ASC reduction factor is not applied to MDHHS Ambulatory Surgical Centers Wraparound Code List services. (Refer to the Directory Appendix for website information.)

3.8 INJECTIONS/INTRAVENOUS INFUSIONS

MDHHS covers intramuscular, subcutaneous or intravenous injections, and intravenous (IV) infusions when medically necessary. A list of outpatient physician-administered drugs and biological products carved out from the Michigan Medicaid Health Plans (MHPs) is maintained on the MDHHS website. (Refer to the Directory Appendix for website information.)

Refer to the Injectable Drugs and Biological Products section of the Practitioner chapter of this manual for additional information regarding prior authorization (PA) requirements. Refer to the Drugs and Biological Products Not Covered by Medicaid Health Plans section of the Billing & Reimbursement for Institutional Providers chapter of this manual for additional information regarding billing instructions.

3.9 ANESTHESIA SERVICES

The ASC facility payment does not include the anesthesia provider's professional services. Claims for the provider's professional services must be submitted on a separate and distinct claim from the ASC facility claim.

Medicaid Provider Manual

SECTION 4 - ASC BILLING

Medicaid-enrolled ASCs are required to bill using the ASC X12 837 5010 professional claim format when submitting electronic claims. Paper claims must be billed on the CMS 1500 paper claim form. Providers are encouraged to bill electronically.

BEHAVIORAL HEALTH AND INTELLECTUAL AND DEVELOPMENTAL DISABILITY SUPPORTS AND SERVICES

This chapter is comprised of two parts:

The **BEHAVIORAL HEALTH AND INTELLECTUAL AND DEVELOPMENTAL DISABILITY SUPPORTS AND SERVICES** portion of the chapter outlines the PIHP requirements and services for specialty behavioral health and intellectual and developmental disability supports and services.

The **NON-PHYSICIAN BEHAVIORAL HEALTH APPENDIX** portion of the chapter includes requirements for psychologists, social workers, professional counselors, and marriage and family therapists providing outpatient behavioral health services not included under the specialty services and supports benefit.

Medicaid Provider Manual

SECTION 1 – GENERAL INFORMATION

This chapter applies to Mental Health providers. Information contained in this chapter is to be used in conjunction with other chapters of this manual including the Billing & Reimbursement Chapters and the Practitioner Chapter, as well as the related procedure code databases and fee schedules located on the Michigan Department of Health and Human Services (MDHHS) website. (Refer to the Directory Appendix for website information.)

1.1 MDHHS APPROVAL

Pursuant to Michigan's Medicaid State Plan and federally approved managed care waiver, community-based mental health, substance abuse and developmental disability specialty services and supports are covered by Medicaid when delivered under the auspices of an approved Prepaid Inpatient Health Plan (PIHP). To be an approved Medicaid provider, a PIHP must be certified as a Community Mental Health Services Program (CMHSP) by MDHHS in accordance with Section 232a of the Michigan Mental Health Code. A PIHP may be either a single CMHSP, or the lead agency in an affiliation of CMHSPs approved by the Specialty Services Selection Panel. Service providers may contract with the PIHP or an affiliate of the PIHP. PIHPs must be enrolled with MDHHS as Medicaid providers. (Refer to the General Information for Providers Chapter of this manual for additional information.) The PIHP must offer, either directly or under contract, a comprehensive array of services, as specified in Section 206 of the Michigan Mental Health Code, being Public Act 258 of 1974, as amended, and all of those specialty services/supports included in this manual.

1.2 STANDARDS

The PIHP shall comply with the standards for organizational structure, fiscal management, administrative record keeping, and clinical record keeping specified in this section. In order for a state plan or HSW service to be reported as a Medicaid cost, it must meet the criteria in this chapter.

1.2.A. NETWORK ADEQUACY STANDARDS FOR THE SPECIALTY BEHAVIORAL HEALTH SYSTEM

The Code of Federal Regulations at 42 CFR Parts 438.68 and 457.1218 charges states holding managed care contracts with the development and implementation of Network Adequacy Standards, including behavioral health and substance use disorder services for both adults and children. As such, MDHHS developed Network Adequacy Standards for the Prepaid Inpatient Health Plan system of care, including an authorizing policy and a companion procedural document that will be updated as necessary. The policy and procedural document can be found on the MDHHS website. (Refer to the Directory Appendix; Mental Health/Substance Abuse Resources section, for website information.)

1.3 ADMINISTRATIVE ORGANIZATION

The administrative organization shall assure effective and efficient operation of the various programs and agencies in a manner consistent with all applicable federal and state laws, regulations, and policies. Effective and efficient operation includes value purchasing. As applied to services and supports, value purchasing assures appropriate access, quality, and the efficient and economic provision of supports and services. Quality is measured by meeting or exceeding the sets of outcome specifications in the beneficiary's individual plan of service, developed through the person-centered planning process or, for

Medicaid Provider Manual

substance abuse services, the individualized treatment plan. Efficient and economic is the lowest cost of the available alternatives that has documented capacity to meet or exceed the outcome quality specifications identified in the beneficiary's plan. There shall be clear policy guidelines for decision-making and program operations and provision for monitoring same. The PIHP must offer direct assistance to explore and secure all applicable first- and third-party reimbursements, and assist the beneficiary to make use of other community resources for non-Medicaid services, or Medicaid services administered by other agencies. MDHHS encourages the use of natural supports to assist in meeting an individual's needs to the extent that the family or friends who provide the natural supports are willing and able to provide this assistance. PIHPs may not require a beneficiary's natural support network to provide such assistance as a condition for receiving specialty mental health supports and services. The use of natural supports must be documented in the beneficiary's individual plan of service.

1.4 PROVIDER REGISTRY

The PIHPs must register with MDHHS any Medicaid specialty services and support they provide directly or through one of their contracted providers, or an affiliate as applicable, as specified in the MDHHS /PIHP contract. The PIHPs should contact the Division of Contracts and Quality Management for more information about the provider registry and for MDHHS approval of special programs. (Refer to the Directory Appendix for contact information.) PIHPs must update the registry whenever changes (address, scope of program, additions, deletions) occur, according to the format and schedule specified by MDHHS.

1.5 PROGRAMS REQUIRING SPECIAL APPROVAL

Certain programs and sites require the PIHP to request specific approval by MDHHS prior to service delivery. Programs must be approved and certified by MDHHS prior to service provision in order to be reported as a Medicaid cost. (Refer to the Directory Appendix for contact information.) Programs previously approved by MDHHS and delivered by CMHSPs that are now affiliates do not need to be approved again unless otherwise directed by MDHHS.

Programs requiring specific approval and certification are:

- Assertive Community Treatment Programs
- Clubhouse Psychosocial Rehabilitation Programs
- Crisis Residential Programs
- Drop-in Programs
- Home-Based Services
- Intensive Crisis Stabilization for Adults and Children
- Wraparound and Children's Therapeutic Foster Care

The PIHP shall notify MDHHS of changes in providers of these programs or sites, including change of address or discontinuation.

1.6 BENEFICIARY ELIGIBILITY [CHANGES MADE 4/1/2025]

A Medicaid beneficiary with mental illness, serious emotional disturbance or developmental disability who is enrolled in a Medicaid Health Plan (MHP) is eligible for specialty mental health services and supports

Medicaid Provider Manual

when their needs exceed the MHP benefits. (Refer to the Medicaid Health Plans Chapter of this manual for additional information.) Such need must be documented in the individual's clinical record.

NOTE: When the assessment is driven by medical need, the MHP is responsible for coverage. Refer to the Practitioner chapter for further information.

Psychological and neuropsychological evaluation provided by professionals in the MHP network for mild to moderate conditions (e.g., attention deficit hyperactivity disorder [ADHD], anxiety disorders, obsessive-compulsive disorder [OCD], tic disorders) are the responsibility of the MHP.

The PIHP is responsible for further evaluation when severe concerns are suspected (i.e., Autism Spectrum Disorder [ASD], Intellectual Disability and serious emotional disturbance [SED]) and treatment if the beneficiary is determined eligible for PIHP services or becomes engaged with PIHP services due to identified need. If results of the completed screening do not determine the need for specialty behavioral health services such as SED or Autism, the beneficiary should be referred back to the primary care provider (PCP) for treatment or subsequent referral to the appropriate practitioner in the MHP network.

Medicaid fee for service (FFS) is responsible for coverage of behavioral health screening including, but not limited to, psychological and neuropsychological screening for FFS beneficiaries when performed by the PCP or other qualified provider. Psychological and neuropsychological evaluation, assessment, and treatment not included under the PIHP benefit and/or provided by a non-PIHP enrolled provider is also covered for FFS beneficiaries. The PIHP is responsible for further evaluation and treatment if the FFS beneficiary is determined eligible for PIHP services or becomes engaged with PIHP services due to identified need. Refer to the Non-Physician Behavioral Health Appendix of this chapter and the Practitioner chapter for additional information regarding program coverage of behavioral health services provided by non-PIHP enrolled providers. **(text revised 4/1/2025)**

The following table has been developed to assist health plans and PIHPs in making coverage determination decisions related to outpatient care for MHP beneficiaries. Generally, as the beneficiary's psychiatric signs, symptoms and degree/extent of functional impairment increase in severity, complexity and/or duration, the more likely it becomes that the beneficiary will require specialized services and supports available through the PIHP/CMHSP. For all coverage determination decisions, it is presumed that the beneficiary has a diagnosable mental illness or emotional disorder as defined in the most recent Diagnostic and Statistical Manual of the Mental Disorders published by the American Psychiatric Association.

In general, MHPs are responsible for outpatient mental health in the following situations:	In general, PIHPs/CMHSPs are responsible for outpatient mental health in the following situations:
<ul style="list-style-type: none">▪ The beneficiary is experiencing or demonstrating mild or moderate psychiatric symptoms or signs of sufficient intensity to cause subjective distress or mildly disordered behavior, with minor or temporary functional limitations or impairments (self-care/daily living skills, social/interpersonal relations, educational/vocational role performance, etc.) and minimal clinical (self/other harm risk) instability.	<ul style="list-style-type: none">▪ The beneficiary is currently or has recently been (within the last 12 months) seriously mentally ill or seriously emotionally disturbed as indicated by diagnosis, intensity of current signs and symptoms, and substantial impairment in ability to perform daily living activities (or for minors, substantial interference in achievement or maintenance of developmentally appropriate social, behavioral, cognitive, communicative or adaptive skills).

Medicaid Provider Manual

- | | |
|--|---|
| <ul style="list-style-type: none">▪ The beneficiary was formerly significantly or seriously mentally ill at some point in the past. Signs and symptoms of the former serious disorder have substantially moderated or remitted and prominent functional disabilities or impairments related to the condition have largely subsided (there has been no serious exacerbation of the condition within the last 12 months). The beneficiary currently needs ongoing routine medication management without further specialized services and supports. | <ul style="list-style-type: none">▪ The beneficiary does not have a current or recent (within the last 12 months) serious condition but was formerly seriously impaired in the past. Clinically significant residual symptoms and impairments exist and the beneficiary requires specialized services and supports to address residual symptomatology and/or functional impairments, promote recovery and/or prevent relapse. |
|--|---|

The "mental health conditions" listed in the table above are descriptions and are intended only as a general guide for PIHPs and MHPs in coverage determination decisions. These categories do not constitute unconditional boundaries and hence cannot provide an absolute demarcation between health plan and PIHP responsibilities for each individual beneficiary. Cases will occur which will require collaboration and negotiated understanding between the medical directors from the MHP and the PIHP. The critical clinical decision-making processes should be based on the written local agreement, common sense and the best treatment path for the beneficiary.

Medicaid beneficiaries who are not enrolled in a MHP, and whose needs do not render them eligible for specialty services and supports, receive their outpatient mental health services through the fee-for-service (FFS) Medicaid Program when experiencing or demonstrating mild or moderate psychiatric symptoms or signs of sufficient intensity to cause subjective distress or mildly disordered behavior, with minor or temporary functional limitations or impairments (self-care/daily living skills, social/interpersonal relations, educational/vocational role performance, etc.) and minimal clinical (self/other harm risk) instability. Refer to the Practitioner Chapter of this manual for coverages and limitations of the FFS mental health benefit.

Medicaid beneficiaries are eligible for substance abuse services if they meet the medical eligibility criteria for one or more services listed in the Substance Abuse Services Section of this chapter.

Medicaid-covered services and supports selected jointly by the beneficiary, clinician, and others during the person-centered planning process and identified in the plan of service must meet the medical necessity criteria contained in this chapter, be appropriate to the individual's needs, and meet the standards herein. A person-centered planning process that meets the standards of the Person-centered Planning Practice Guideline attached to the MDHHS/PIHP contract must be used in selecting services and supports with mental health program beneficiaries who have mental illness, serious emotional disturbance, or developmental disabilities.

Medicaid Provider Manual

1.7 DEFINITION OF TERMS

This list of terms is not exhaustive, but rather the most commonly used terms, listed alphabetically:

Amount	The number of units (e.g., 25 15-minute units of community living supports) of service identified in the individual plan of service or treatment plan to be provided.
Child Mental Health Professional	<ul style="list-style-type: none">▪ A person who is trained and has one year of experience in the examination, evaluation, and treatment of minors and their families and who is either a physician, psychologist, licensed professional counselor, licensed or limited licensed marriage and family therapist or registered professional nurse; or▪ A person with at least a bachelor's degree in a mental health-related field from an accredited school who is trained, and has three years of supervised experience in the examination, evaluation, and treatment of minors and their families; or▪ A person with at least a master's degree in a mental health-related field from an accredited school who is trained, and has one year of experience in the examination, evaluation, and treatment of minors and their families.
Covered Services or Medicaid Covered Services	For the purposes of this manual, Medicaid State Plan Services and specialty services and supports.
Duration	The length of time (e.g., three weeks, six months) it is expected that a service identified in the individual plan of service or treatment plan will be provided.
Electronic Signature	An electronic method to obtain the signature of a Medicaid beneficiary and/or that of their legal representative/guardian to sign required documents, i.e., the plan of service or consents is acceptable. Using this method does not change the requirements for when a signature is mandated; therefore, a new electronic signature is obtained from the Medicaid beneficiary/legal representative/guardian. Electronic signatures must not be stored or saved to be re-used at will or for convenience.
Health Care Professional	A physician, registered nurse, physician assistant, nurse practitioner, clinical nurse specialist, or dietitian. Services provided must be relevant to the health care professional's scope of practice. Refer to the Staff Provider Qualifications in the Program Requirements Section of this chapter.
Individual Plan of Services (also referred to as the "plan" or "plan of services and supports" or "treatment plan" for beneficiaries receiving substance abuse treatment)	The document that identifies the needs and goals of the individual beneficiary and the medical necessity, amount, duration, and scope of the services and supports to be provided. For beneficiaries receiving mental health or developmental disabilities services, the individual plan of services must be developed through a person-centered planning process. In the case of minors with developmental disabilities, serious emotional disturbance or mental illness, the child and their family are the focus of service planning, and family members are an integral part of the planning process.
Medical Necessity	Determination that a specific service is medically (clinically) appropriate, necessary to meet needs, consistent with the person's diagnosis, symptomatology and functional impairments, is the most cost-effective option in the least restrictive environment, and is consistent with clinical standards of care. Medical necessity of a service shall be documented in the individual plan of services.

Medicaid Provider Manual

Mental Health Professional	A physician, psychologist, licensed master's social worker, licensed professional counselor, licensed marriage and family therapist, or registered nurse. (Refer to Staff Provider Qualifications in the Program Requirements Section of this chapter.)
Prescription	<p>A written order for a service or item by a physician or other licensed practitioner of the healing arts within the scope of their practice under Michigan law that contains all of the following:</p> <ul style="list-style-type: none"> ▪ Beneficiary's name; ▪ Prescribing practitioner's name, address and telephone number; ▪ Prescribing practitioner's signature (a stamped signature is not acceptable); ▪ The date the prescription was written; ▪ The specific service or item being prescribed; ▪ The expected start date of the order (if different from the prescription date); and ▪ The amount and length of time that the service or item is needed. <p>A verbal order from a physician or other licensed practitioner of the healing arts within their scope of practice may be used to initiate occupational therapy (OT), physical therapy (PT), or Speech, Hearing and Language services or to dispense medically necessary equipment or supplies when a delay would be medically contraindicated. The written prescription must be obtained within 14 days of the verbal order. The qualified therapist (OT, PT or Speech) responsible for furnishing or supervising the ordered service, supports coordinator or case manager must receive and document the date of the verbal order in the individual plan of service. Upon receipt of the signed prescription, it shall be verified with the verbal order and entered into the individual plan of service.</p>
Qualified Mental Health Professional (QMHP)	<p>An individual who has specialized training or one year of experience in treating or working with a person who has mental illness; and is a psychologist, physician, educator with a degree in education from an accredited program, licensed or limited licensed master's or bachelor's social worker, physical therapist, occupational therapist, speech pathologist or audiologist, registered nurse, therapeutic recreation specialist, rehabilitation counselor, licensed or limited licensed professional counselor or individual with a human services degree hired and performing in the role of QMHP prior to January 1, 2008. (Refer to Staff Provider Qualifications in the Program Requirements Section of this chapter for specific requirements of the professionals.)</p> <p>NOTE: If an individual was hired and performed the role of a QMHP prior to January 1, 2008 and later transfers to a new agency, their QMHP status will be grandfathered into the new agency.</p>
Qualified Intellectual Disability Professional (QIDP)	<p>An individual who meets the qualifications under 42 CFR 483.430. A QIDP is a person who has specialized training or one year of experience in treating or working with a person who has an intellectual disability; and is a psychologist, physician, educator with a degree in education from an accredited program, licensed or limited licensed master's or bachelor's social worker, physical therapist, occupational therapist, speech pathologist or audiologist, registered nurse, therapeutic recreation specialist, rehabilitation counselor, licensed or limited licensed professional counselor or individual with a human services degree hired and performing in the role of QIDP prior to January 1, 2008. (Refer to Staff Provider Qualifications in the Program Requirements Section of this chapter for specific requirements of the professionals.)</p> <p>NOTE: If an individual was hired and performed the role of a QIDP prior to January 1, 2008 and later transfers to a new agency, their QIDP status will be grandfathered into the new agency.</p>

Medicaid Provider Manual

Scope of Service	<p>The parameters within which the service will be provided, including:</p> <ul style="list-style-type: none">▪ Who (e.g., professional, paraprofessional, aide supervised by a professional);▪ How (e.g., face-to-face, telephone, taxi or bus, group or individual); and▪ Where (e.g., community setting, office, beneficiary's home); and▪ Frequency of Service(s) (e.g., daily, weekly, monthly, quarterly). <p>The state is responsible to review the adequacy of service plans for Medicaid beneficiaries. This includes reviewing to ensure that services are delivered in accordance with the service plan, including the type, scope, amount, duration, and frequency specified in the service plan. The requirements for the service plan are listed in 42 CFR 441.725, Michigan Mental Health Code (MMHC) 330.1700-1712 and Michigan Administrative Code R330.7199.</p>
Substance Abuse Treatment Specialist	<ul style="list-style-type: none">▪ An individual who has licensure in one of the following areas, and is working within their scope of practice:<ul style="list-style-type: none">➢ Clinical Nurse Specialist (CNS)➢ Licensed Bachelor's Social Worker (LBSW)➢ Licensed Marriage and Family Therapist➢ Licensed Master's Social Worker (LMSW)➢ Licensed Practical Nurse (LPN)➢ Licensed Professional Counselor (LPC)➢ Licensed Psychologist (LP)➢ Limited Licensed Bachelor's Social Worker (LLBSW)➢ Limited Licensed Marriage and Family Therapist➢ Limited Licensed Master's Social Worker (LLMSW)➢ Limited Licensed Professional Counselor (LLPC)➢ Limited Licensed Psychologist (LLP)➢ Nurse Practitioner (NP)➢ Physician (MD, DO)➢ Physician Assistant (PA)➢ Registered Nurse (RN)➢ Temporary Limited Licensed Psychologist (TLLP) <p>and who has a registered development plan leading to certification and is timely in its implementation (Development Plan – Counselor (DP-C) – approved development plan in place); or who is functioning under a time-limited exception plan approved by the regional PIHP; or</p> <ul style="list-style-type: none">• An individual who has one of the following Michigan Certification Board of Addiction Professionals (MCBAP) or International Certification and Reciprocity Consortium (IC & RC) credentials:<ul style="list-style-type: none">➢ Certified Advanced Alcohol and Drug Counselor – IC & RC (CAADC)➢ Certified Alcohol and Drug Counselor – IC & RC (CADC)

Medicaid Provider Manual

	<ul style="list-style-type: none"> ➤ Certified Alcohol and Drug Counselor – Michigan (CADC-M) ➤ Certified Co-Occurring Disorders Professional – IC & RC (CCDP) ➤ Certified Co-Occurring Disorders Professional Diplomat – IC & RC (CCDP-D) ➤ Certified Criminal Justice Professional – IC & RC - Reciprocal (CCJP-R) <p>or;</p> <ul style="list-style-type: none"> ▪ An individual who has one of the following approved alternative certifications: <ul style="list-style-type: none"> ➤ for medical doctors: American Society of Addiction Medicine (ASAM) ➤ for psychologists: American Psychological Association (APA) specialty in addiction ➤ for counselors/therapists: Certification through the Upper Midwest Indian Council on Addiction Disorders (UMICAD) ➤ for Licensed Professional Counselors: National Certified Counselor (NCC) with concurrent Master Addictions Counselor (MAC) certification <p>A physician (MD, DO), physician assistant, nurse practitioner, registered nurse, clinical nurse specialist, or licensed practical nurse who provides substance use disorder treatment services within the scope of their practice is considered to be specifically-focused treatment staff and is not required to obtain MCBAP credentials. If one of these professionals provides substance use disorder treatment services outside their scope of practice, the appropriate MCBAP/IC & RC credential applies.</p>
Substance Abuse Treatment Practitioner	<p>An individual who has a registered MCBAP certification development plan (Development Plan – Counselor (DP-C) – approved development plan in place), is timely in its implementation, and is supervised by a Certified Clinical Supervisor – Michigan (CCS-M) or Certified Clinical Supervisor – IC & RC (CCS); or who has a registered development plan to obtain the supervisory credential (Development Plan – Supervisor (DP-S) – approved development plan in place) while completing the requirements of the plan (6000 hours).</p>

1.8 CONFIDENTIALITY

MDHHS complies with Health Insurance Portability and Accountability Act (HIPAA) privacy requirements and recognizes the concern for the confidential relationship between the provider and the beneficiary, and protects this relationship using the minimum amount of information necessary for purposes directly related to the administration of Medicaid.

All records are of a confidential nature and should not be released, other than to a beneficiary or their representative, unless the provider has a signed release from the beneficiary/parent/guardian/legal representative or the disclosure is for a permitted purpose under all applicable confidentiality laws.

If the provider questions the appropriateness of releasing beneficiary records, the provider is encouraged to seek legal counsel before doing so.

1.8.A. STANDARD CONSENT FORM

In cases when such consent is required, the Consent to Share Behavioral Health Information (form MDHHS-5515) must be used for all providers requesting release of information for behavioral health and/or substance use disorder related information. The

Medicaid Provider Manual

consent is required to be accepted, honored and used for all Fee for Service (FFS), Managed Care and Prepaid Inpatient Health Plan (PIHP) beneficiaries both from and to any of those providers or entities. The MDHHS-5515 is maintained and updated on the MDHHS website. (Refer to the Directory Appendix for website information.)

An interpreter must be provided to assist the individual if the individual does not understand the language used on the consent form or the language used by the person obtaining the consent. Services of an interpreter cannot be billed as separate services or billed to the beneficiary.

Providers receiving federal funding under the Victims of Crime Act, Violence Against Women Act, and/or Family Violence Prevention and Services Act should not use the MDHHS-5515 because they are subject to stringent consent requirements under these federal laws that are not satisfied by the form. These requirements are in place to address the heightened safety and privacy concerns that victims of domestic violence, sexual assault, stalking, or other crimes may have. These individuals may need additional safeguards for their behavioral health information.

For guidance on addressing issues related to consent and the provision of services for domestic violence, sexual assault, stalking, or other crimes, refer to the MDHHS website.

1.9 ELECTRONIC SIGNATURE

An electronic method to obtain the signature of a Medicaid beneficiary and/or that of their legal representative/guardian to sign required documents, i.e., the plan of service or consents is acceptable. Using this method does not change the requirements for when a signature is mandated; therefore, a new electronic signature is obtained from the Medicaid beneficiary/legal representative/guardian. Electronic signatures must not be stored or saved to be re-used at will or for convenience.

Medicaid Provider Manual

SECTION 2 – PROGRAM REQUIREMENTS

2.1 MENTAL HEALTH AND DEVELOPMENTAL DISABILITIES SERVICES

Mental health and developmental disabilities services (state plan, HSW, and additional/1915(i) SPA) must be:

- Provided under the supervision of a physician, or other licensed health professional whose profession is relevant to the services being provided. This includes professionals who are licensed or certified in Michigan in a human services field typically associated with mental health or developmental disabilities services. (Refer to Staff Provider Qualifications later in this section.)
- Provided to the beneficiary as part of a comprehensive array of specialized mental health or developmental disabilities services.
- Coordinated with other community agencies (including, but not limited to, Medicaid Health Plans [MHPs], family courts, local health departments [LHDs], MI Choice waiver providers, school-based services providers, and local MDHHS offices).
- Provided according to an individual written plan of service that has been developed using a person-centered planning process and that meets the requirements of Section 712 of the Michigan Mental Health Code. A preliminary plan must be developed within seven days of the commencement of services or, if a beneficiary is hospitalized, before discharge or release. Pursuant to state law and in conjunction with the federal Balanced Budget Act of 1997, Section 438.10 (f)(6)(v), each beneficiary must be made aware of the amount, duration, and scope of the services to which they are entitled. Therefore, each plan of service must contain the expected date any authorized service is to commence, and the specified amount, scope, and duration of each authorized service. The beneficiary must receive a copy of their plan of services within 15 business days of completion of the plan.
- The individual plan of service shall be kept current and modified when needed (reflecting changes in the intensity of the beneficiary's health and welfare needs or changes in the beneficiary's preferences for support). A beneficiary or their guardian or authorized representative may request and review the plan at any time. A formal review of the plan with the beneficiary and their guardian or authorized representative shall occur not less than annually to review progress toward goals and objectives and to assess beneficiary satisfaction. The review may occur during person-centered planning.
- Provided without the use of aversive, intrusive, or restrictive techniques unless identified in the individual plan of service and individually approved and monitored by a behavior treatment plan review committee.

2.2 SUBSTANCE ABUSE SERVICES

Substance abuse services must be furnished by service providers licensed by the State of Michigan to provide each type of substance abuse services for which they contract. Substance abuse service providers also must be accredited as an alcohol and/or drug abuse program by one of the following national accreditation bodies:

- The Joint Commission;
- Commission on Accreditation of Rehabilitation Facilities (CARF);

Medicaid Provider Manual

- American Osteopathic Association (AOA);
- Council on Accreditation of Services for Families and Children (COA);
- National Committee on Quality Assurance (NCQA); or
- Accreditation Association for Ambulatory Health Care (AAAHC).

Substance abuse services must be coordinated with other community services as appropriate to an individual's needs and circumstances. Services must also be provided according to an individualized treatment plan. All standard requirements of the Michigan Public Health Code, Article 6 - Substance Abuse apply.

2.3 LOCATION OF SERVICE [CHANGES MADE 4/1/2025]

Services may be provided at or through PIHP service sites or contractual provider locations. Unless otherwise noted in this manual, PIHPs are encouraged to provide mental health and developmental disabilities services in integrated locations in the community, including the beneficiary's home, according to individual need and clinical appropriateness. For office or site-based services, the location of primary service providers must be within 60 minutes/60 miles in rural areas, and 30 minutes/30 miles in urban areas, from the beneficiary's residence.

Substance abuse covered services must generally be provided at state licensed sites. Licensed providers may provide some activities, including outreach, in community (off-site) settings. Mental health case management may be provided off-site, as necessary, to meet individual needs when case management is purchased as a component of a licensed service. For office or site-based services, the location of primary service providers must be within 60 minutes/60 miles in rural areas, and 30 minutes/30 miles in urban areas, from the beneficiary's home.

For beneficiaries residing in nursing facilities, only the following clinic services may be provided:

- Nursing facility mental health monitoring;
- Psychiatric evaluation;
- Psychological testing, and other assessments;
- Treatment planning;
- Individual therapy, including behavioral services;
- Crisis intervention; and
- Services provided at enrolled day program sites.

Refer to the Nursing Facility Chapter of this manual for PASARR information as well as mental health services provided by Nursing Facilities.

Medicaid does not cover services delivered to beneficiaries with a Serious Mental Illness (SMI) in Institutions for Mental Diseases (IMD) for individuals between ages 21 and 64, as specified in §1905(a)(B) of the Social Security Act when the length of stay in the IMD is more than 15 days during the month. However, per Michigan's 1115 Behavioral Health Demonstration, Medicaid does cover services delivered to beneficiaries with a Substance Use Disorder (SUD) in IMDs for individuals between ages 21 and 64 when the stay in the IMD is more than 15 days during the month. Medicaid does not

Medicaid Provider Manual

cover services provided to children with serious emotional disturbance in Child Caring Institutions (CCI) unless it is licensed as a "children's therapeutic group home" as defined in Section 722.111 Sec.1(f) under Act No. 116 of the Public Acts of 1973, as amended, or it is for the purpose of transitioning a child out of an institutional setting (CCI). Medicaid may also be used for the purpose of transitioning a child out of a **State Hospital**. For both the CCI and **State Hospital**, the following mental health services initiated by the PIHP (the child needs to be open to the PIHP/CMHSP) may be provided within the designated timeframes:

- The assessment of a child's eligibility and needs for the purpose of determining the community based services necessary to transition the child out of a CCI or **State Hospital**. This should occur up to 180 days prior to the anticipated discharge from a CCI or **State Hospital**.
- **Intensive Care Coordination with Wraparound (ICCW)** planning, case management or supports coordination. This should occur up to 180 days prior to discharge from a CCI or **State Hospital**. **(revised 4/1/2025)**

Medicaid-funded behavioral health services may be provided to support children with intellectual and developmental disabilities (I/DD) in a CCI that exclusively serves children with I/DD when authorized by the respective PIHP/CMHSP. Authorization by the PIHP/CMHSP includes special considerations, services and/or funding arrangements. Enrollment of the CCI provider is the responsibility of the PIHP/CMHSP to ensure providers rendering services adhere to all state and federal regulations on the use of seclusion and restraint and are appropriately credentialed to perform I/DD services.

Medicaid does not cover services provided to persons/children involuntarily residing in non-medical public facilities (such as jails, prisons or juvenile detention facilities).

Refer to the Amount and Scope of Service subsection for additional information regarding Wraparound program expectations.

2.4 STAFF PROVIDER QUALIFICATIONS

Providers of specialty services and supports (including state plan, HSW, and additional/1915(i) SPA) are chosen by the beneficiary and others assisting them during the person-centered planning process, and must meet the staffing qualifications contained in program sections in this chapter. In addition, qualifications are noted below for provider staff mentioned throughout this chapter, including the Children's Waiver. The planning team should also identify other competencies that will assure the best possible outcomes for the beneficiary. Credentialing and re-credentialing standards located in the Quality Assessment and Performance Improvement Program in the MDHHS/PIHP contract must be followed. Michigan laws regarding licensing and registration of professionals are found in the Public Health Code, the Mental Health Code and the Michigan Administrative Rules. These regulations define the scope of practice for each professional as well as requirements for supervision.

All providers must be:

- At least 18 years of age.
- Able to prevent transmission of any communicable disease from self to others in the environment in which they are providing supports.
- Able to communicate expressively and receptively in order to follow individual plan requirements and beneficiary-specific emergency procedures, and report on activities performed.

Medicaid Provider Manual

- In good standing with the law according to the MDHHS/PIHP contract.

Aides	Must be able to perform basic first aid procedures. Waiver aides must also successfully complete training in recipient rights and implementation of the individual plan of services. For the full list of aide qualifications, refer to the Habilitation Supports Waiver for Persons with Developmental Disabilities section, Aide Qualifications subsection.
Audiologist	A licensed individual; has the equivalent educational requirements and work experience necessary for the license; or has completed the academic program and is acquiring supervised work experience to qualify for the license.
Clinical Nurse Specialist	An individual licensed as a registered professional nurse who has been granted a specialty certification as a clinical nurse specialist by the Michigan Board of Nursing under section 17210.
Dietitian	An individual who is a Registered Dietitian or an individual who meets the qualification of Registered Dietitian established by the Academy of Nutrition and Dietetics.
Licensed Practical Nurse (LPN)	An individual who is licensed by the State of Michigan to practice as a licensed practical nurse under the supervision of a registered nurse, physician, or dentist. LPNs include licensed psychiatric attendant nurses per MCL§ 333.17209.
Nurse Practitioner (NP)	An individual licensed to practice as a registered nurse and certified in a nursing specialty by the State of Michigan.
Occupational Therapist (OT)	An individual who is licensed by the State of Michigan to practice as an occupational therapist.
Occupational Therapy Assistant (OTA)	An individual who is licensed by the State of Michigan to practice as an occupational therapy assistant and who is supervised by a qualified occupational therapist.
Physical Therapist (PT)	An individual licensed by the State of Michigan as a physical therapist.
Physical Therapy Assistant	An individual who is a graduate of a physical therapy assistant associate degree program accredited by an agency recognized by the Commission on the Accreditation in Physical Therapy Education (CAPTE), and who is supervised by the physical therapist licensed by the State of Michigan. The individual must be supervised by the physical therapist licensed by the State of Michigan.
Physician (MD or DO)	An individual who possesses a permanent license to practice medicine in the State of Michigan, a Michigan Controlled Substances license, and a Drug Enforcement Administration (DEA) registration.
Physician Assistant	An individual licensed by the State of Michigan as a physician assistant. Practice as a physician assistant means the practice of medicine with a participating physician under a practice agreement.
Professional Counselor	An individual who is fully licensed or limited-licensed by the State of Michigan to practice professional counseling. This includes Rehabilitation Counselors.
Psychologist	An individual who possesses a full license by the State of Michigan to independently practice psychology; or a master's degree in psychology (or a closely related field as defined by the state licensing agency) and licensed by the State of Michigan as a limited-licensed psychologist (LLP); or a master's degree in psychology (or a closely related field as defined by the state licensing agency) and licensed by the State of Michigan as a temporary-limited-licensed psychologist.

Medicaid Provider Manual

Registered Nurse (RN)	An individual licensed by the State of Michigan to practice nursing (MCL 333.17201).
Social Worker	An individual who possesses Michigan licensure as a master's social worker, or Michigan licensure as a bachelor's social worker, or has a limited license as a bachelor's social worker or master's social worker. Limited licensed social workers must be supervised by a licensed MSW (MCL 333.18501 - 507).
Speech Pathologist (SLP)	An individual engaged in the practice of Speech-Language Pathology and is licensed by the State of Michigan to provide such services.

Refer to the Behavioral Health Code Charts and Provider Qualifications document on the MDHHS website for specific provider qualifications for each covered service. (Refer to the Directory Appendix for website information.)

2.5 MEDICAL NECESSITY CRITERIA

The following medical necessity criteria apply to Medicaid mental health, developmental disabilities, and substance abuse supports and services.

2.5.A. MEDICAL NECESSITY CRITERIA

Mental health, developmental disabilities, and substance abuse services are supports, services, and treatment:

- Necessary for screening and assessing the presence of a mental illness, developmental disability or substance use disorder; and/or
- Required to identify and evaluate a mental illness, developmental disability or substance use disorder; and/or
- Intended to treat, ameliorate, diminish or stabilize the symptoms of mental illness, developmental disability or substance use disorder; and/or
- Expected to arrest or delay the progression of a mental illness, developmental disability, or substance use disorder; and/or
- Designed to assist the beneficiary to attain or maintain a sufficient level of functioning in order to achieve their goals of community inclusion and participation, independence, recovery, or productivity.

2.5.B. DETERMINATION CRITERIA

The determination of a medically necessary support, service or treatment must be:

- Based on information provided by the beneficiary, beneficiary's family, and/or other individuals (e.g., friends, personal assistants/aides) who know the beneficiary;
- Based on clinical information from the beneficiary's primary care physician or health care professionals with relevant qualifications who have evaluated the beneficiary;
- For beneficiaries with mental illness or developmental disabilities, based on person-centered planning, and for beneficiaries with substance use disorders, individualized treatment planning;

Medicaid Provider Manual

- Made by appropriately trained mental health, developmental disabilities, or substance abuse professionals with sufficient clinical experience;
- Made within federal and state standards for timeliness;
- Sufficient in amount, scope and duration of the service(s) to reasonably achieve its/their purpose; and
- Documented in the individual plan of service.

2.5.C. SUPPORTS, SERVICES AND TREATMENT AUTHORIZED BY THE PIHP

Supports, services, and treatment authorized by the PIHP must be:

- Delivered in accordance with federal and state standards for timeliness in a location that is accessible to the beneficiary;
- Responsive to particular needs of multi-cultural populations and furnished in a culturally relevant manner;
- Responsive to the particular needs of beneficiaries with sensory or mobility impairments and provided with the necessary accommodations;
- Provided in the least restrictive, most integrated setting. Inpatient, licensed residential or other segregated settings shall be used only when less restrictive levels of treatment, service or support have been, for that beneficiary, unsuccessful or cannot be safely provided; and
- Delivered consistent with, where they exist, available research findings, health care practice guidelines, best practices and standards of practice issued by professionally recognized organizations or government agencies.

2.5.D. PIHP DECISIONS

Using criteria for medical necessity, a PIHP may:

- Deny services:
 - that are deemed ineffective for a given condition based upon professionally and scientifically recognized and accepted standards of care;
 - that are experimental or investigational in nature; or
 - for which there exists another appropriate, efficacious, less-restrictive and cost-effective service, setting or support that otherwise satisfies the standards for medically-necessary services; and/or
- Employ various methods to determine amount, scope and duration of services, including prior authorization for certain services, concurrent utilization reviews, centralized assessment and referral, gate-keeping arrangements, protocols, and guidelines.

A PIHP may not deny services based **solely** on preset limits of the cost, amount, scope, and duration of services. Instead, determination of the need for services shall be conducted on an individualized basis.

Medicaid Provider Manual

SECTION 3 – COVERED SERVICES

The Mental Health Specialty Services and Supports program is limited to the state plan services listed in this section, the services described in the Habilitation Supports Waiver for Persons with Developmental Disabilities Section of this chapter, and the additional/1915(i) SPA services described in the Behavioral Health §1915(i) Home and Community-Based Services (HCBS) State Plan Amendment section of this chapter. The PIHP is not responsible for providing state plan covered services that MDHHS has designated another agency to provide (refer to other chapters in this manual for additional information, including the chapters on Medicaid Health Plans, Home Health, Hospice, Pharmacy and Ambulance). However, it is expected that the PIHP will assist beneficiaries in accessing these other Medicaid services. (Refer to the Substance Abuse Section of this chapter for the specific program requirements for substance abuse services.) It is expected that PIHPs will offer evidence based and promising practices as part of the Medicaid covered specialty services where applicable. PIHPs shall assure that these practices are provided by staff who have been appropriately trained in the model(s) and are provided to the population for which the model was intended. NOTE: Certain services are State Plan EPSDT services when delivered to children birth-21 years. Each affected service is appropriately identified within the subsections.

3.1 BEHAVIORAL HEALTH TREATMENT SERVICES/APPLIED BEHAVIOR ANALYSIS

Refer to the Behavioral Health Treatment Services/Applied Behavior Analysis Section of this chapter for specific program requirements.

3.2 ASSERTIVE COMMUNITY TREATMENT

Refer to the Assertive Community Treatment Program (ACT) Section of this chapter for specific program requirements.

3.3 ASSESSMENTS

Health Assessment	Health assessment includes activities provided by a registered nurse, physician assistant, nurse practitioner, clinical nurse specialist, or dietitian to determine the beneficiary's need for medical services and to recommend a course of treatment within the scope of practice of the nurse or dietitian.
Psychiatric Evaluation	<p>A comprehensive evaluation performed face-to-face by a psychiatrist, physician, psychologist, master's social worker, licensed professional counselor, marriage and family therapist, nurse practitioner, clinical nurse specialist or licensed physician's assistant who investigates a beneficiary's clinical status, including the presenting problem; the history of the present illness; previous psychiatric, physical, and medication history; relevant personal and family history; personal strengths and assets; and a mental status examination.</p> <p>This examination concludes with a written summary based on a recovery model of positive findings, a biopsychosocial formulation and diagnostic statement, an estimate of risk factors, initial treatment recommendations, estimate of length of stay when indicated, and criteria for discharge.</p>

Medicaid Provider Manual

Psychological Testing	Standardized psychological tests and measures rendered by full, limited-licensed, or temporary-limited-licensed psychologists. The beneficiary's clinical record must indicate the name of the person who administered the tests, the results of the tests, the actual tests administered, and any recommendations. The protocols for testing must be available for review.
All Other Assessments and Testing	<p>Generally accepted professional assessments or tests, other than psychological tests, that are conducted by a mental health care professional within their scope of practice for the purposes of determining eligibility for specialty services and supports, and the treatment needs of the beneficiary. For children/youth who have experienced trauma or have an elevated score on a trauma screener, a standardized, validated trauma assessment tool, appropriate for the age of the child, is utilized to inform the treatment needs of the beneficiary.</p> <p>The MichiCANS Screener is the tool required at the point of access for infants, toddlers, children, youth and young adults ages birth through 20 years of age (day prior to 21). Depending on the results of the MichiCANS Screener, the MichiCANS Comprehensive will be used at initial intake, annually thereafter, and at time of exit for infants, toddlers, young children, youth, and young adults ages birth through 20 to guide treatment service planning. The MichiCANS must be administered by staff who have been trained and certified in the use of the MichiCANS. The Devereux Early Childhood Assessment (DECA) must be used at intake and during treatment planning, based on the results of the MichiCANS Screener for infants, toddlers, and children ages one month and through age 5 (day prior to 6) who have a Serious Emotional Disturbance (SED) or have SED and Intellectual/Developmental Disabilities (IDD). The assessment must be performed by staff who have been trained in the implementation of the DECA.</p> <p>Refer to the MichiCANS section of this chapter for additional information.</p>

3.4 BEHAVIOR TREATMENT REVIEW

The federal Balanced Budget Act of 1997 requires states to ensure that enrollees in their PIHPs will "be free from any form of restraint or seclusion used as a means of coercion, discipline, convenience, or retaliation, as specified in other Federal regulations on the use of restraints or seclusion" [42 CFR 438.100 (b)(2)(v)].

A behavior treatment plan (BTP), where needed, is developed through the person-centered planning process that involves the beneficiary. To determine the need for a BTP, a comprehensive assessment must be completed in order to rule out any physical or environmental cause for the behavior. Any BTP that includes limitations of the beneficiary's rights, any intrusive behavior treatment techniques, or any use of psychoactive drugs for behavior control purposes, must be reviewed and approved by a Behavior Treatment Plan Review Committee (BTPRC) comprised of at least three individuals, one of whom shall be a board-certified behavioral analyst or licensed behavior analyst and/or fully- or limited-licensed psychologist with the specified training, and one of whom shall be a licensed physician/ psychiatrist. A representative of the Office of Recipient Rights (ORR) shall participate on the BTPRC as ex-officio, non-voting member in order to provide consultation and technical assistance to the Committee. Other non-voting members may be added at the BTPRC's discretion and with the consent of the individual whose behavior treatment plan is being reviewed, such as an advocate or Certified Peer Support Specialist.

Exception: Limitations of the beneficiary's rights, any intrusive treatment techniques, or any use of psychoactive drugs where the beneficiary's challenging behavior is due to the active symptoms of a serious mental illness and serious emotional disturbance (as defined in Chapter 1 of the Mental Health

Medicaid Provider Manual

Code [MHC]). Any limitation shall be justified, time-limited, and clearly documented in the individual plan of service (IPOS). Documentation shall be included that describes attempts that have been made to avoid limitations, as well as what actions will be taken as part of the IPOS to ameliorate or eliminate the need for the limitations in the future.

The required BTPRC members must be present during the review and approval process. A BTPRC member who has prepared a BTP for a specific beneficiary must recuse themselves from the final decision-making of that individual. Any BTP submitted for review and approval (or disapproval) must be done in light of current research and prevailing standards of practice as found in current peer-reviewed psychological/psychiatric literature. Any intrusive or restrictive technique not supported in current peer-reviewed psychological/psychiatric literature must be reviewed and approved by MDHHS prior to implementing. BTPs that propose the use of physical management and/or involvement of law enforcement in a non-emergent situation, aversive techniques, or seclusion or restraint in a setting where it is prohibited by law shall be disapproved by the BTPRC. Acceptable BTPs are designed to reduce maladaptive behaviors, to maximize behavioral self-control, or to restore normalized psychological functioning, reality orientation, and emotional adjustment, thus enabling the beneficiary to function more appropriately in interpersonal and social relationships. Such reviews shall be completed prior to the beneficiary's signing and implementation of the BTP and as expeditiously as possible. Staff implementing the beneficiary's BTP must be trained in how to implement the BTP. This coverage includes the monitoring of the BTP by the BTPRC or a designee of the committee which shall occur as indicated in the BTP.

3.5 CHILD THERAPY

Treatment activity designed to prevent deterioration, reduce maladaptive behaviors, maximize skills in behavioral self-control, or restore or maintain normalized psychological functioning, reality orientation and emotional adjustment, thus enabling the child to function more appropriately in interpersonal and social relationships. A child mental health professional may provide child therapy on an individual or group basis with a family-driven, youth-guided approach.

Telemedicine is approved for Individual Therapy or Family Therapy using approved children's evidence-based practices (i.e., Trauma Focused Cognitive Behavioral Therapy, Parent Management Training-Oregon, Parenting Through Change) and utilizes the GT modifier when reporting the service. Qualified providers of children's evidence-based practices have completed their training in the model, its implementation via telehealth, and are able to provide the practice with fidelity.

Telemedicine is the use of telecommunications and information technologies for the exchange of encrypted patient data for the provision of services (e.g., access or travel to needed therapy services may be prohibitive). Telemedicine must be obtained through real-time interaction between the child's/family's physical location and the provider's physical location. Telemedicine services are provided to patients through hardware or internet connection. It is the expectation that providers involved in telemedicine are trained in the use of equipment and software prior to servicing children/families.

The technology used must meet the requirements of audio and visual compliance in accordance with current regulations and industry standards. Refer to the General Information for Providers Chapter of this manual for the complete Health Insurance Portability and Accountability Act (HIPAA) compliance requirements. Refer to the Telemedicine Chapter for additional information.

3.6 CLUBHOUSE PSYCHOSOCIAL REHABILITATION PROGRAMS

Refer to the Clubhouse Psychosocial Rehabilitation Programs Section of this chapter for specific program requirements.

3.7 CRISIS INTERVENTIONS

Unscheduled activities conducted for the purpose of resolving a crisis situation requiring immediate attention. Activities include crisis response, crisis line, assessment, referral, and direct therapy.

The standard for whether or not a crisis exists is a "prudent layperson" standard. That means that a prudent layperson would be able to determine from the beneficiary's symptoms that crisis services are necessary. Crisis situation means a situation in which an individual is experiencing a serious mental illness or a developmental disability, or a child is experiencing a serious emotional disturbance, and one of the following applies:

- The individual can reasonably be expected within the near future to physically injure himself, or another individual, either intentionally or unintentionally.
- The individual is unable to provide themselves food, clothing, or shelter, or to attend to basic physical activities such as eating, toileting, bathing, grooming, dressing, or ambulating, and this inability may lead in the near future to harm to the individual or to another individual.
- The individual's judgment is so impaired that they are unable to understand the need for treatment and, in the opinion of the mental health professional, their continued behavior as a result of the mental illness, developmental disability, or emotional disturbance can reasonably be expected in the near future to result in physical harm to the individual or to another individual.

If the beneficiary developed a crisis plan, the plan is followed with permission from the beneficiary.

3.8 CRISIS RESIDENTIAL SERVICES

Refer to the Crisis Residential Services Section of this chapter for specific program requirements.

3.9 FAMILY THERAPY

Family Therapy is therapy for a beneficiary and family member(s), or other person(s) significant to the beneficiary, for the purpose of improving the beneficiary/family function. For children and youth, a family-driven, youth-guided planning process should be utilized. Family therapy does not include individual psychotherapy or family planning (e.g., birth control) counseling. Family therapy is provided by a mental health professional or limited licensed master's social worker supervised by a fully licensed master's social worker. When providing trauma specific intervention for infants, toddlers (birth through 47 months) and their family member(s) or other person(s) significant to the beneficiary (i.e., Child Parent Psychotherapy), the mental health professional, or limited licensed master's social worker supervised by a fully licensed master's social worker, must minimally have endorsement as an Infant Family Specialist by the Michigan Association of Infant Mental Health; Infant Mental Health Specialist is preferred.

Medicaid Provider Manual

3.10 HEALTH SERVICES

Health Services are provided for purposes of improving the beneficiary's overall health and ability to care for health-related needs. This includes nursing services (on a per-visit basis, not on-going hourly care), dietary/nutritional services, maintenance of health and hygiene, teaching self-administration of medication, care of minor injuries or first aid, recognizing early symptoms of illness and teaching the beneficiary to seek assistance in case of emergencies. Health assessments are covered under the Assessments subsection above. A registered nurse, nurse practitioner, clinical nurse specialist, physician assistant, or dietician must provide these services, according to their scope of practice. Health services must be carefully coordinated with the beneficiary's health care plan so that the PIHP does not provide services that are the responsibility of the MHP.

3.11 HOME-BASED SERVICES

Refer to the Home-Based Services Section of this chapter for specific program requirements.

3.12 INDIVIDUAL/GROUP THERAPY

Treatment activity designed to reduce maladaptive behaviors, maximize behavioral self-control, or restore normalized psychological functioning, reality orientation, remotivation, and emotional adjustment, thus enabling improved functioning and more appropriate interpersonal and social relationships. Evidence-based practices such as integrated dual disorder treatment for co-occurring disorders (IDDT/COD) and dialectical behavior therapy (DBT) are included in this coverage. Individual/group therapy is performed by a mental health professional within their scope of practice or a limited licensed master's social worker supervised by a full licensed master's social worker.

3.13 INPATIENT PSYCHIATRIC HOSPITAL ADMISSIONS

Refer to the Inpatient Psychiatric Hospital Admissions Section of this chapter for specific program requirements.

3.14 INTENSIVE CRISIS STABILIZATION SERVICES

Refer to the Intensive Crisis Stabilization Services Section of this chapter for specific program requirements.

3.15 INTERMEDIATE CARE FACILITY FOR INDIVIDUALS WITH INTELLECTUAL DISABILITIES (ICF/IID) SERVICES

Health and rehabilitative services provided in a state-licensed facility of 16 beds or less that is certified to meet ICF/IID standards that are specified in 42 CFR 483.400 and 42 CFR 442 Subpart C. Beneficiaries must meet ICF/IID level of care criteria and require a continuous active treatment program that is defined in their individual plan of services and coordinated and monitored by a qualified intellectual disability professional (QIDP). The active treatment program includes specialized and generic training, treatment, health and related services that are directed toward acquisition of behaviors necessary for the beneficiary to function with as much self-determination and independence as possible, and the prevention or deceleration of regression or loss of current optimal functional status (42 CFR 483.440 (a)(1)(i & ii)). Treatment services are provided by qualified professionals within their scope of practice. Direct care staff must meet aide level qualifications.

Medicaid Provider Manual

3.16 MEDICATION ADMINISTRATION

Medication Administration is the process of giving a physician-prescribed oral medication, injection, intravenous (IV) or topical medication treatment to a beneficiary. This should not be used as a separate coverage when other health services are utilized, such as Private Duty Nursing or Health Services, which already include these activities. A physician, physician assistant, nurse practitioner, clinical nurse specialist, or registered nurse may perform medication administration under the direction of the physician. A licensed practical nurse or certified medical assistant who is assisting a physician may perform medication administration as long as the physician is on-site.

For injections administered through the CMHSP clinic, refer to the Injectable Drugs and Biologicals subsection of the Practitioner Chapter of this manual.

3.17 MEDICATION REVIEW

Medication Review is evaluating and monitoring medications, their effects, and the need for continuing or changing the medication regimen. A physician, physician assistant, nurse practitioner, clinical nurse specialist, registered nurse, licensed pharmacist, or a licensed practical nurse assisting the physician may perform medication reviews. Medication review includes the administration of screening tools for the presence of extra pyramidal symptoms and tardive dyskinesia secondary to untoward effects of neuroactive medications.

3.18 NURSING FACILITY MENTAL HEALTH MONITORING

This service is the review of the beneficiary's response to mental health treatment, including direct beneficiary contact and, as appropriate, consultation with nursing facility staff to determine whether recommendations from mental health assessments are carried out by the nursing facility. Nursing facility mental health monitoring is intended to allow follow-up for treatment furnished in response to emerging problems or needs of a nursing facility resident. It is not intended to provide ongoing case management, nor is it for monitoring of services unrelated to the mental health needs of the beneficiary. Nursing facility mental health monitoring can be provided by a physician, physician assistant, clinical nurse specialist, or nurse practitioner. If nursing facility mental health monitoring is provided by a limited licensed master's social worker or limited licensed bachelor's social worker, they must be supervised by a licensed master's social worker. If monitoring is provided by a licensed bachelor's social worker or a registered nurse, they need to be supervised by a professional. A "professional" is a physician, physician assistant, clinical nurse specialist, nurse practitioner, licensed master's social worker, professional counselor, QIDP or QMHP.

3.19 OCCUPATIONAL THERAPY

Evaluation	Therapy
Physician/licensed physician assistant/family nurse practitioner/clinical nurse specialist prescribed activities provided by an occupational therapist licensed by the State of Michigan to determine the beneficiary's need for services and to recommend a course of treatment. An occupational therapy assistant may not complete evaluations.	It is anticipated that therapy will result in a functional improvement that is significant to the beneficiary's ability to perform daily living tasks appropriate to their chronological developmental or functional status. These functional improvements should be able to be achieved in a reasonable amount of time and should be durable (i.e., maintainable).

Medicaid Provider Manual

Evaluation	Therapy
	<p>Therapy to make changes in components of function that do not have an impact on the beneficiary's ability to perform age-appropriate tasks is not covered.</p> <p>Therapy must be skilled (requiring the skills, knowledge, and education of a licensed occupational therapist). Interventions that could be expected to be provided by another entity (e.g., teacher, registered nurse, licensed physical therapist, family member, or caregiver) would not be considered as a Medicaid cost under this coverage.</p> <p>Services must be prescribed by a physician/licensed physician assistant/family nurse practitioner/clinical nurse specialist and may be provided on an individual or group basis by an occupational therapist or occupational therapy assistant, licensed by the State of Michigan or by an occupational therapy aide who has received on-the-job training. The occupational therapist must supervise and monitor the assistant's performance with continuous assessment of the beneficiary's progress, but on-site supervision of an assistant is not required. An aide performing an occupational therapy service must be directly supervised by a qualified occupational therapist who is on site. All documentation by an occupational therapy assistant or aide must be reviewed and signed by the appropriately credentialed supervising occupational therapist.</p>

3.20 OUTPATIENT PARTIAL HOSPITALIZATION SERVICES

Refer to the Outpatient Partial Hospitalization Services Section of this chapter for specific program requirements.

3.21 PEER-DELIVERED OR -OPERATED SUPPORT SERVICES

NOTE: This service is a State Plan EPSDT service when delivered to children birth-21 years.

Peer-delivered or peer-operated support services are programs and services that provide individuals with opportunities to learn and share coping skills and strategies, move into more active assistance and away from passive roles, and to build and/or enhance self-esteem and self-confidence.

3.21.A. DROP-IN CENTERS

Peer-Run Drop-In Centers provide an informal, supportive environment to assist beneficiaries with mental illness in the recovery process. If a beneficiary chooses to participate in Peer-Run Drop-In Center services, such services may be included in an IPOS if medically necessary for the beneficiary. Peer-Run Drop-In Centers provide opportunities to learn and share coping skills and strategies, to move into more active

Medicaid Provider Manual

assistance and away from passive beneficiary roles and identities, and to build and/or enhance self-esteem and self-confidence. Under no circumstances may Peer-Run Drop-In Centers be used as respite for caregivers (paid or non-paid) or residential providers of individuals.

PIHPs must seek approval from MDHHS prior to establishing new drop-in programs. Proposed drop-in centers will be reviewed against the following criteria:

- Staff and board of directors of the center are 100% primary consumers;
- PIHP actively supports consumers' autonomy and independence in making day-to-day decisions about the program;
- PIHP facilitates consumers' ability to handle the finances of the program;
- The drop-in center is at a non-CMH site;
- The drop-in center has applied for 501(c)(3) non-profit status;
- There is a contract between the drop-in center and the PIHP, or its subcontractor, identifying the roles and responsibilities of each party; and
- There is a liaison appointed by the PIHP to work with the program.

Some beneficiaries use drop-in centers anonymously and do not have a drop-in center listed as a service in their IPOS. For those beneficiaries who do have drop-in specified in their IPOS, it must be documented to be medically necessary and identify:

- Goals and how the program supports those goals; and
- The amount, scope and duration of the services to be delivered.

The individual clinical record provides evidence that the services were delivered consistent with the plan.

3.21.B. PEER SPECIALIST SERVICES [CHANGES MADE 4/1/2025]

Peer support specialists are individuals with a strong personal knowledge of what it is like to have first-hand lived experience with a mental health condition that has caused a substantial life disruption. A substantial life disruption is defined as experiencing some or all of the following: homelessness, mental health crises, trauma, lack of employment, criminal justice involvement, discrimination, stigma/prejudice intensified by mental health challenges, receiving public benefits due to poverty.

Beneficiaries share mutual experiences in their journey of recovery with the peer support specialist. This mutuality is the foundation of what is referred to as "peerness" between a peer support specialist and a beneficiary seeking recovery, promoting connection, and offering hope. As a state and national expectation, peer support specialists are trained and skillful in sharing their recovery story as a method of engaging beneficiaries.

Peer support specialists inspire hope and support others experiencing similar situations. Through shared understanding and respect, they support people to become and stay engaged in the recovery process. Serving in a role as a community health worker, they

Medicaid Provider Manual

support the beneficiary with their personal wellness and recovery. Peer support services can effectively extend the reach of treatment beyond the clinical setting into the everyday environment of those seeking a successful, sustained recovery process. Peer support specialists assist people in recovery to connect with their own inner strength, motivation, and desire to move forward in life, even when experiencing challenges.

Peer support specialists provide services and supports based on medical necessity criteria that is designed to assist the beneficiary to achieve their goals of community inclusion and participation, independence, recovery, resiliency and/or productivity. This medical necessity criteria is included in the person-centered planning process; listed in amount, scope and duration, and documented in the individual plan of service.

Depending on their position description that is developed specifically by each individual agency, services that peer support specialists provide may include:

- Sharing their story through their lived experience of moving from hopelessness to hope;
- Co-facilitation with the beneficiary in development and implementation of recovery goals in the individual plan of service completed through a person-centered planning process;
- Integration of physical and mental health care, including the development of wellness plans;
- Developing, implementing and providing health and wellness supports to address preventable risk factors for chronic conditions;
- Advocate and assist with opportunities to engage in self-directed care;
- Developing, implementing and facilitating support groups;
- Providing supportive services during and after crises;
- Supporting beneficiaries in completing psychiatric advance directives;
- Accessing benefits and utilizing public assistance;
- Navigating challenging and complex systems of care;
- Linking and engaging the beneficiary to community resources and formal/informal supports;
- Vocational assistance and support;
- Promoting, improving and educating whole health and self-management of chronic conditions;
- Housing assistance and support;
- Active engagement with individuals who have criminal justice involvement;
- Applies and models the five stages of recovery to assist beneficiaries in achieving their personal recovery goals.

As an evidence-based practice, peer support is valuable not only for the person receiving services but also for behavioral health and integrated care professionals, including the systems in which they work. Peer support specialists educate their colleagues and advocate for and advance the field by sharing their perspectives, recovery stories, and

Medicaid Provider Manual

experience in order to increase understanding of how recovery practices and policies may be improved to promote health and wellness. Research and experience show that peer support specialists have a transformative effect on both individuals and systems. Peer support has been shown to improve quality of life, improve engagement and satisfaction with services and supports, improve whole health -- including chronic conditions, decrease hospitalizations and inpatient days, and reduce the overall cost of services.

Supervision Requirements	Peer supervisors may include MDHHS certified peers who have over two continuous years in recovery and over two years in the direct provision of services. Other peer supervisors must be credentialed, certified, licensed or degreed in the field within which the peer is working. (text revised 4/1/2025)
Certification Requirements	<p>Individuals who are working as peer support specialists in a Medicaid service delivery system serving beneficiaries with mental health conditions must:</p> <ul style="list-style-type: none">▪ Be at least 18 years of age;▪ Have a high school diploma, General Education Diploma (GED), or provide college transcripts in lieu of a high school diploma or GED;▪ Have a primary diagnosis of a mental health condition;▪ Have a strong personal knowledge of what it is like to have first-hand lived experience with a mental health condition that has caused a substantial life disruption;▪ Have been a recipient of mental health treatment and/or services for at least one year, with a substantial life disruption due to their mental health condition;▪ Have personal experience in navigating complex mental health treatment services;▪ Self-identify as having a mental health condition with a substantial life disruption and share their recovery story in supporting others;▪ Be employed by a CMHSP or contract provider at the beginning of training;▪ Meet the MDHHS application approval process for specialized training and certification:<ul style="list-style-type: none">➢ Completed peer support specialist application➢ Supervisor signature and acknowledgment form➢ Two written letters of reference➢ Current job description➢ Read, understand, and agree to peer code of ethics➢ Acknowledgement of truthfulness and accuracy of application➢ Peer-to-peer interview➢ Training fee paid by the agency that employs the peer support specialist;▪ Attend professional advancement opportunities to maintain skills;▪ Be freely chosen by beneficiaries utilizing peer support services; and

Medicaid Provider Manual

	<ul style="list-style-type: none">Adhere to the MDHHS Peer Support Specialist Code of Ethics.
Continuing Education Requirements	<ul style="list-style-type: none">Must complete the 32 hours of approved continuing education bi-annually as determined by MDHHS. (text added 4/1/2025)

3.21.C. PEER RECOVERY COACH SERVICES [CHANGES MADE 4/1/2025]

Peer Recovery Coach Services	<p>Peer Recovery Coach services are provided by a person in a journey of recovery from substance use, co-occurring disorders, and/or non-substance addictive disorders, and who identifies with a beneficiary based on a shared background and lived experience. The Peer Recovery Coach serving in a role as a community health worker (CHW) operates as a personal guide and mentor for beneficiaries seeking, or already in, recovery from substance use disorders. Peer Recovery Coaches support a beneficiary's journey toward recovery and wellness by creating and sustaining networks of formal and informal services and supports while role modeling the many pathways to recovery as each individual determines their own way. The Peer Recovery Coach helps to remove barriers and obstacles, assists with practices of harm reduction, and links the beneficiary to resources in the recovery community.</p> <p>Services provided by peer recovery coaches support beneficiaries to become and stay engaged in the recovery process and reduce the likelihood of relapse. Activities are targeted to beneficiaries at all places along the path to recovery.</p> <p>Peer Recovery Coaches embody a powerful message of hope, assisting beneficiaries to achieve goals of community inclusion and participation, independence, recovery, resiliency and/or productivity. This medical necessity criteria assists the peer recovery coach with setting recovery goals, developing recovery action plans, and supporting beneficiaries to live a full and meaningful life in the community through the individualized treatment planning process.</p> <p>The peer recovery coach supports each beneficiary to fully participate in communities of their choosing in the environment most supportive of their recovery. Utilizing a strength-based perspective and emphasizing assessment of recovery capital (utilizing the total resources a beneficiary has to find and sustain recovery), services are designed to include prevention strategies and the integration and coordination of physical and behavioral health services to help attain and maintain recovery and prevent relapse. Building upon the strong foundation of a recovery-oriented philosophy and evidence-based practices (EBPs), peer recovery coaches may offer Screening, Brief Intervention, & Referral to Treatment (SBIRT) to a full continuum of SUD treatment and recovery supports.</p> <p>Peer recovery coaches work in a variety of settings providing successful engagement in treatment and transitions across all levels of care for beneficiaries with high-risk and complex care needs. Some of the settings where peer recovery coaches may provide services include residential treatment facilities, Medication Assisted Treatment (MAT) programs, Recovery Community Organizations (RCO), hospital emergency rooms, Substance Use Disorder Health Homes (SUDHH), housing programs, outpatient treatment and prevention, drug courts and other justice involved settings.</p> <p>Individuals who have been certified by Connecticut Community for Addiction Recovery (CCAR), Michigan Certification Board for Addiction Professionals (MCBAP), or Genesee Health System approved curriculum prior to January 1, 2018, may request a previous standards application.</p>
Supervision Requirements	Peer supervisors may include MDHHS certified peers who have over two continuous years in recovery and over two years in the direct provision of peer services. Other

Medicaid Provider Manual

	peer supervisors must be credentialed, certified, licensed or degreed in the field within which the peer is working. (text revised 4/1/2025)
Requirements	<p>Individuals who work as a Peer Recovery Coach serving beneficiaries with substance use or co-occurring disorders must:</p> <ul style="list-style-type: none">▪ Be at least 18 years of age;▪ Have a high school diploma, General Education Diploma (GED), or provide college transcripts in lieu of a high school diploma or GED;▪ Have a SUD, co-occurring disorder(s), and/or non-substance addictive disorder(s) and have received treatment from a public or private provider;▪ Have two continuous years in recovery at some point in time after the age of 18;▪ Share their recovery story as a tool in helping others;▪ Have personal experience in navigating complex SUD, co-occurring disorder(s), and/or non-substance addictive disorder(s) treatment services (self-help groups are not included);▪ Self-identifies as having a substance use disorder, co-occurring disorder(s), and/or non-substance addictive disorder(s) with a substantial life disruption and shares their recovery story in supporting others;▪ Be employed by a CMHSP or contract provider at the beginning of training;▪ Meet the MDHHS application approval process for specialized training and certification. The process includes:<ul style="list-style-type: none">➢ Completed peer recovery coach application➢ Supervisor signature and acknowledgment form➢ Two written letters of reference➢ Current job description➢ Read, understand, and agree to the MDHHS Peer Recovery Coach Code of Ethics➢ Acknowledgement of truthfulness and accuracy of application➢ Peer-to-peer interview➢ Training fee paid by the agency that employs the peer recovery coach➢ Be freely chosen by beneficiaries utilizing peer recovery coach services➢ Adhere to the MDHHS Peer Recovery Coach Code of Ethics.
Continuing Education Requirements	<ul style="list-style-type: none">▪ Must complete the 32 hours of approved continuing education bi-annually as determined by MDHHS. (text added 4/1/2025)

3.21.D. YOUTH PEER SUPPORT SERVICES

Youth Peer Support is a peer-delivered service for youth and young adults. It is designed to support youth and young adults with a serious emotional disturbance/serious mental illness (SED/SMI) through shared activities and interventions in the form of non-judgmental support, connection through lived experience and supporting self-advocacy.

Medicaid Provider Manual

This service supports youth and young adult voice as part of the Family-Driven, Youth-Guided/Person-Centered approach to treatment and occurs as part of the treatment process. The goals of Youth Peer Support include supporting youth and young adults in their mental health journey by building a strong relationship based on mutual respect and strategic self-disclosure to increase hope, confidence, self-advocacy skills, and decision-making abilities.

Youth Peer Support is a relationship-based service that focuses on supporting youth and young adult empowerment by connecting to the emotions related to living with mental health challenges as a youth or young adult. It is not intended to substitute for other services such as respite, community living support services, or transition-specific support services.

Youth Peer Support Specialists must have direct lived experience with mental health challenges as a youth. Youth Peer Support activities are identified as part of the assessment and the person-centered/family-driven, youth-guided planning process. The goals of Youth Peer Support services shall be included in the individualized plan of service where interventions are provided in the home and community. These goals, to support the youth or young adult's mental health, will be mutually identified in active collaboration with the youth or young adult receiving services and must be delivered by a Youth Peer Support Specialist with lived experience.

Youth Peer Support is intended to be provided to children, youth, and young adults who are middle school to 26 years of age. It is not intended to substitute for other services such as respite or community living support services. The Youth Peer Support Specialist shall receive regular supervision by a child mental health professional and shall participate as an active member of the treatment team.

Youth Peer Support Specialists must have lived experience navigating behavioral health systems and must actively participate in and complete the approved MDHHS curriculum, ongoing certification, and recertification requirements. Qualifications for the Youth Peer Support Specialist include:

- Young adult, ages 18 through 28, with lived experience with mental health challenges as a youth and who received mental health support as a youth or young adult.
- Willing and able to self-identify as a person who has received or is receiving behavioral health services and is prepared to use that experience in helping others.
- Experience receiving services in a variety of systems (such as child welfare, education, the justice system, vocation, housing, etc.) as a youth or young adult is preferred.
- Employed by PIHP/CMHSP or its contract providers.
- Trained in the MDHHS approved curriculum and ongoing certification and recertification model.

3.21.E. PEER MENTORING SERVICES

Peer Mentoring services provide adults with intellectual and developmental disabilities with opportunities to support, mentor and assist beneficiaries to achieve community

Medicaid Provider Manual

inclusion and participation, independence, and productivity. Peer Mentors are individuals with intellectual and developmental disabilities who have a unique skill level from their experience in utilizing services and supports to achieve their goals. Peer Mentors offer the benefit of their personal experiences, passing along encouragement and support to help others construct their own advocacy. Beneficiaries utilizing Peer Mentoring services must freely choose the individual who is providing Peer Mentoring services from available trained Peer Mentors.

Activities provided by Peer Mentors are completed in partnership with beneficiaries for the specific purpose of achieving increased beneficiary community inclusion and participation, independence, and productivity by:

- sharing personal stories of advocacy for the purpose of supporting self-advocacy and independence, person-centered planning goals, and arrangements that support self-direction;
- navigating transportation systems;
- building bridges to people and resources within the community;
- identifying recreation opportunities;
- providing information on entitlements;
- assisting beneficiaries to move towards independence;
- providing housing information by helping to identify affordable and accessible housing for achieving independent living; finding and choosing roommates; making applications for Section 8 Housing vouchers; managing budgets;
- providing vocational information to beneficiaries who are seeking post-secondary education and/or training opportunities, finding a job, and achieving successful employment.

Requirements

Individuals who are functioning as Peer Mentors serving beneficiaries with intellectual and developmental disabilities must:

- be 18 years of age.
- have an intellectual/developmental disability.
- attend the Michigan Developmental Disabilities Council's Peer Mentor 101 training by referral from their local CMHSP.
- complete a supervised 90-120 hour internship at their local CMHSP. (The CMHSP is expected to hire the individual after certification.)
- share their personal experiences to guide and support beneficiaries.
- participate in annual continuing education trainings to maintain skills and expand knowledge base.

The use of the Peer Mentor code for billing purposes is permissible only after the individual is certified by the Michigan Developmental Disabilities Council.

Medicaid Provider Manual

3.22 PERSONAL CARE IN LICENSED SPECIALIZED RESIDENTIAL SETTINGS

Refer to the Personal Care in Licensed Specialized Residential Settings Section for specific program requirements.

3.23 PHYSICAL THERAPY

Evaluation	Therapy
Physician/licensed physician's assistant-prescribed activities provided by a physical therapist currently licensed by the State of Michigan to determine the beneficiary's need for services and to recommend a course of treatment. A physical therapy assistant may not complete an evaluation.	<p>It is anticipated that therapy will result in a functional improvement that is significant to the beneficiary's ability to perform daily living tasks appropriate to their chronological, developmental or functional status.</p> <p>These functional improvements should be able to be achieved in a reasonable amount of time and should be durable (i.e., maintainable). Therapy to make changes in components of function that do not have an impact on the beneficiary's ability to perform age-appropriate tasks is not covered.</p> <p>Physical therapy must be skilled (it requires the skills, knowledge, and education of a licensed physical therapist). Interventions that could be expected to be provided by another entity (e.g., teacher, registered nurse, licensed occupational therapist, family member or caregiver) would not be considered as a Medicaid cost under this coverage.</p> <p>Services must be prescribed by a physician/licensed physician's assistant and may be provided on an individual or group basis by a physical therapist or a physical therapy assistant currently licensed by the State of Michigan, or a physical therapy aide who is receiving on-the-job training. The physical therapist must supervise and monitor the assistant's performance with continuous assessment of the beneficiary's progress. On-site supervision of an assistant is not required. An aide performing a physical therapy service must be directly supervised by a physical therapist that is on-site. All documentation by a physical therapy assistant or aide must be reviewed and signed by the appropriately credentialed supervising physical therapist.</p>

3.24 PREVENTION-DIRECT SERVICE MODELS [CHANGES MADE 4/1/2025]

Prevention-direct service models are programs using individual, family and group interventions designed to reduce the incidence of behavioral, social, emotional or cognitive dysfunction and increase the beneficiary's behavioral functionality, resilience and optimal mental health, thus reducing the need for individuals to seek treatment through the public mental health system. Prevention-direct service models are:

- Infant and Early Childhood Mental Health Consultation (IECMHC) (revised 4/1/2025)

Medicaid Provider Manual

- School Success Programs
- Children of Adults with Mental Illness/Integrated Services (NOTE: This service is a State Plan EPSDT service when delivered to children birth-21 years.)
- Infant Mental Health when not enrolled as a Home-Based program
- Parent Education (NOTE: This service is a State Plan EPSDT service when delivered to children birth-21 years.)

Coverage includes:

Infant and Early Childhood Mental Health Consultation (IECMHC) (revised 4/1/2025)	<p>Infant and Early Childhood Mental Health Consultation (IECMHC) (revised 4/1/2025) provides consultation to child care providers and parents/caregivers who care for children under the age of six who are experiencing behavioral and emotional challenges in their child care settings (non K-12 settings). Sometimes these challenges may put children at risk of suspension and/or expulsion from the childcare setting. IECMHC aims to reduce expulsion and increase the number of parents/caregivers and child care providers who successfully nurture the social and emotional development of children 0-5 in child care settings.</p> <p>IECMHC programs provide short-term child/family-centered mental health consultation for children with challenging behaviors which includes:</p> <ul style="list-style-type: none">▪ Observation and identification of provider capacity to meet the social and emotional needs of the infant, toddler or young child within their care.▪ Strategies are identified for implementation by the IECMH Consultant in partnership with the childcare providers and Great Start Readiness Program provider and caregivers. (text revised 4/1/2025)▪ Intervention (e.g., coaching, training and support for parents/caregivers and providers to build their reflective capacity, learn new ways to interact with the child to build their social-emotional skills and resilience, by providing educational resources for parents and providers, modifying the physical environment, connecting family to community resources, providing counseling for families in crisis, and referral for ongoing mental health services, if needed). <p>Provider qualifications:</p> <ul style="list-style-type: none">▪ Master's prepared early childhood mental health professional plus specific training in the evaluated model as approved by MDHHS. Training requirement must, at a minimum, include Endorsement as Infant Family Specialist by the Michigan Association of Infant Mental Health; Infant Mental Health Specialist is preferred.
School Success Program	<p>Works with parents of children, 6 years and above, so that they can be more involved in their child's life, monitor and supervise their child's behaviors; works with youth to develop pro-social behaviors, coping mechanisms, and problem solving skills; and consults with K-12 teachers, administrators and support staff in order to assist them in developing relationships with these students. Mental Health staff also act as a liaison between home and school.</p> <p>Provider qualifications:</p> <ul style="list-style-type: none">▪ Child Mental Health Professional

Medicaid Provider Manual

Children of Adults with Mental Illness/Integrated Services	<p>Designed to prevent emotional and behavioral disorders among children whose parents are receiving services from the public mental health system and to improve outcomes for adult beneficiaries who are parents. The Integrated Services approach includes assessment and service planning for the adult beneficiaries related to their parenting role and their children's needs. Treatment objectives, services, and supports are incorporated into the service plan through a person-centered planning process for the adult beneficiary who is a parent. Linking the adult beneficiary and child to available community services, respite care and providing for crisis planning are essential components.</p> <p>Provider qualifications:</p> <ul style="list-style-type: none">▪ Mental Health Professional
Infant Mental Health	<p>Provides home-based parent-infant support and therapeutic intervention services, using the evaluated Infant Mental Health Home Visiting model (perinatal people, birth to 36 months), to families where the parent's condition and life circumstances, or the characteristics of the infant, threaten the parent-infant attachment and the consequent social, emotional, behavioral and cognitive development of the infant. Services reduce the incidence and prevalence of abuse, neglect, developmental delay, behavioral and emotional disorder and promote healthy attachment, resilience and optimal mental health for both the infant and parent/primary caregiver. PIHPs or their provider networks may provide infant mental health services, in the home or community based setting, as a specific service when it is not part of a MDHHS-certified home-based program. (text revised 4/1/2025)</p> <p>Provider qualifications:</p> <ul style="list-style-type: none">▪ Masters-prepared early childhood mental health professional plus specific training. Training requirement must minimally have Endorsement as Infant Family Specialist by the Michigan Association of Infant Mental Health; Infant Mental Health Specialist is preferred.
Parent Education	<p>Provided to parents using evaluated/evidence-based practice group models that promote nurturing parenting attitudes and skills, teaching developmental stages of childhood (including social-emotional developmental stages), teach positive approaches to child behavior/discipline and interventions the parent may utilize to support healthy social and emotional development, and to remediate problem behaviors. For specific group models of Parent Education, a parent with lived experience may be trained in the model and work in partnership with the Child Mental Health Professional who is trained in the delivery of the Parent Education model.</p> <p>Provider qualifications:</p> <ul style="list-style-type: none">▪ Child Mental Health Professional who is trained in the evaluated/evidence-based practice group model.▪ Parent with lived experience who is trained in the model and works with the Child Mental Health Professional in the delivery of the model. (text revised/added 4/1/2025)

Medicaid Provider Manual

3.25 SPEECH, HEARING, AND LANGUAGE

Evaluation	Therapy
Activities provided by a licensed speech-language pathologist or licensed audiologist to determine the beneficiary's need for services and to recommend a course of treatment. A speech-language pathology assistant may not complete evaluations.	<p>Diagnostic, screening, preventive, or corrective services provided on an individual or group basis, as appropriate, when referred by a physician (MD, DO).</p> <p>Therapy must be reasonable, medically necessary and anticipated to result in an improvement and/or elimination of the stated problem within a reasonable amount of time. An example of medically necessary therapy is when the treatment is required due to a recent change in the beneficiary's medical or functional status affecting speech, and the beneficiary would experience a reduction in medical or functional status were the therapy not provided.</p> <p>Speech therapy must be skilled (i.e., requires the skills, knowledge, and education of a licensed speech-language pathologist) to assess the beneficiary's speech/language function, develop a treatment program, and provide therapy. Interventions that could be expected to be provided by another entity (e.g., teacher, registered nurse, licensed physical therapist, licensed occupational therapist, family member, or caregiver) would not be considered as a Medicaid cost under this coverage.</p> <p>Services may be provided by a licensed speech-language pathologist or licensed audiologist or by a speech pathology or audiology candidate (i.e., in their clinical fellowship year or having completed all requirements but has not obtained a license). All documentation by the candidate must be reviewed and signed by the appropriately licensed supervising speech-language pathologist or audiologist.</p>

3.26 SUBSTANCE ABUSE

Refer to the Substance Abuse Services Section of this chapter for specific program requirements relating to substance abuse services.

3.27 TARGETED CASE MANAGEMENT

Refer to the Targeted Case Management Section of this chapter for specific program requirements.

3.28 TELEMEDICINE

A CMH/PIHP can be either an originating or distant site for telemedicine services. Practitioners must meet the provider qualifications for the covered service provided via telemedicine.

Refer to the Telemedicine Chapter for additional information regarding telemedicine services.

Medicaid Provider Manual

Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.

3.29 TRANSPORTATION

PIHPs are responsible for transportation to and from the beneficiary's place of residence when provided so a beneficiary may participate in a state plan, HSW or additional/1915(i) SPA service at an approved day program site or in a clubhouse psychosocial rehabilitation program. MHPs are responsible for assuring their enrollees' transportation to the primary health care services provided by the MHPs, and to (non-mental health) specialists and out-of-state medical providers. MDHHS is responsible for assuring transportation to medical appointments for Medicaid beneficiaries not enrolled in MHPs; and to Healthy Kids Dental, substance abuse, and mental health services (except those noted above and in the HSW program described in the Habilitation Supports Waiver for Persons with Developmental Disabilities Section of this chapter) for all Medicaid beneficiaries. (Refer to the local MDHHS office or MHP for additional information, and to the Ambulance Chapter of this manual for information on medical emergency transportation.)

PIHP's payment for transportation should be authorized only after it is determined that it is not otherwise available (e.g., MDHHS, MHP, volunteer, family member), and for the least expensive available means suitable to the beneficiary's need.

3.30 TREATMENT PLANNING

Activities associated with the development and periodic review of the plan of service, including all aspects of the person-centered planning process, such as pre-meeting activities, and external facilitation of person-centered planning. Individuals who receive specialty behavioral health supports and services have the right to choose an independent facilitator (IF) to facilitate the person-centered planning (PCP) process that is used to develop the Individual Plan of Service (IPOS). This includes writing goals, objectives, and outcomes; designing strategies to achieve outcomes (identifying amount, scope, and duration) and ways to measure achievement relative to the outcome methodologies; attending person-centered planning meetings per invitation; and documentation. Monitoring of the IPOS, including specific services when not performed by the case manager or supports coordinator, is included in this coverage. For children and youth, a family-driven, youth-guided planning process should be utilized.

Case managers and supports coordinators perform these functions as part of the case management and supports coordination services; therefore, they should not report this activity as "Treatment Planning." Other mental health and health professionals who attend the beneficiary's person-centered planning should report the activity as "Treatment Planning."

For the Children's Waiver, the attendance of all clinicians and case managers during treatment planning is included in the monthly case management coverage.

Medicaid Provider Manual

3.31 INTENSIVE CARE COORDINATION WITH WRAPAROUND (ICCW) SERVICES FOR CHILDREN AND ADOLESCENTS [TITLE REVISED & CHANGES MADE 4/1/2025]

ICCW is an evidence-informed approach to ensuring comprehensive coordination and holistic planning for children, youth, young adults, and their families with the most intensive needs. ICCW is an Early and Periodic Screening, Diagnosis and Treatment (EPSDT) State Plan service when delivered to children, youth, and young adults under 21 years of age.

ICCW requires the development of a Wraparound Team. The Team must be coordinated prior to the development of and adjustments to the Wraparound Plan. Wraparound Teams include, but are not limited to, the youth, child, or young adult and their family, natural supports, professional supports, and community partners. In the limited circumstance in which a child, youth, young adult, or parent/caregiver is unable to attend a Wraparound Team meeting, Care Coordinators are responsible for ensuring voice and choice.

When a child, youth, or young adult is being served under the Waiver for Children with Serious Emotional Disturbances (SEDW), ICCW is recommended to support the child, youth, young adult and their family through the planning process. At the preference of the child/youth, young adult and their family, Targeted Case Management (TCM) may be utilized instead of ICCW.

Care Coordination includes organization, coordination, linkage, monitoring of services and supports, and advocacy on behalf of the child, youth, or young adult and their family. Coordination and collaboration span across multiple systems, programs, and resources in alignment with systems of care philosophy. Wraparound is the individualized, family-driven and youth-guided planning process facilitated by Care Coordinators that are trained and certified in the Wraparound Planning Process.

The Wraparound Planning Process follows four stages: 1) Hello-Engagement and Team preparation, 2) Help-Initial plan development, 3) Heal-Implementation, and 4) Hope-Transition. The Wraparound Planning Process utilizes a collaborative Wraparound Team approach including a child, youth, or young adult and their family and their choice of professional and natural supports. Care Coordinators facilitate the Wraparound plan development, considering all life domains. **(text revised/added per bulletin MMP 24-41)**

The Child and Family Team's plan is built on strengths and driven by underlying needs. The plan provides realistic strategies to meet meaningful, measurable and attainable outcomes that the Child and Family Team develop. Ongoing evaluation of the Child and Family Team's plan occurs during each Child and Family Team meeting and adjustments are made as needed.

Children, youth, or young adults, birth to age 21, are eligible for ICCW if they meet all the following criteria:

- Serious Emotional Disturbance, Serious Mental Illness, and/or Intellectual/Developmental Disability;
- Presenting with complex behavioral needs; and
- Have an identified community.

AND two or more of the criteria listed below:

- Currently in or at risk of out-of-home placement.

Medicaid Provider Manual

- Involved in two or more child, youth, or young adult-serving systems, including but not limited to: Mental/Behavioral Health, Juvenile or Adult Criminal Justice, Child Welfare, Adult Protective Services, Education (special education or other school support services).
- Has received other case management or case management-like services, and higher intensity is required to meet needs.
- Lack of an identified support system.
- Presenting with complex medical needs and stabilization has not been reached.
- Has a functional impairment related to school activities, attendance, or performance. This includes, but is not limited to, experiencing multiple suspensions and/or expulsions.
- Displays significant physical and/or emotional distress after experiencing a traumatic event. Traumatic events may include, but are not limited to, natural disasters, acts of violence, abuse, neglect.

TCM cannot be authorized in the Individual Plan of Service (IPOS) when ICCW is authorized in the IPOS. Home-based services and ICCW may be authorized concurrently. Case-management functions performed through home-based services may not be billed at the same, specific date/time that ICCW is also being billed to avoid same-time duplication of services. **(text revised/added per bulletin MMP 24-41)**

3.31.A. ORGANIZATIONAL STRUCTURE [CHANGES MADE 4/1/2025]

The required organizational structure of Wraparound **ICCW** must include a Child and Family Team, **ICCW Care Coordinator**, **ICCW** supervisor, and Community Team.

- **ICCW Care Coordinator** Caseload Ratio (dedicated caseload):
 - 1:12 Care Coordinator to Wraparound Teams.
 - The dedicated ratio may increase to a maximum of 1:15 when at least three Wraparound Teams are in the Hope phase.
 - Care Coordinators may not have more than one provider role with a family. If Care Coordinators are providing other mental health services, including crisis response, they may not provide ICCW to the same child, youth, or young adult and their family.
 - If coordinators are assigned to other programs as well as ICCW, the number of child/youth and family teams they facilitate shall correlate to the percentage of their position dedicated to providing Wraparound facilitation.
- ICCW providers must request approval to provide ICCW from MDHHS through a certification process defined by MDHHS, and certification must occur every three years. Programs must be certified to ensure adherence to Medicaid policy requirements and fidelity to the ICCW model. **(text revised/added per bulletin MMP 24-41)**

3.31.B. QUALIFIED STAFF [CHANGES MADE 4/1/2025]

ICCW Care Coordinators must:

- Possess a minimum of a bachelor's degree in any field.

Medicaid Provider Manual

- Receive certification in ICCW through MDHHS-provided training or have been granted provisional approval prior to provision.
- Maintain certification in ICCW:
 - Complete one annual ICCW booster.
 - Complete at least two MDHHS-provided trainings related to ICCW.
 - Complete an additional 16 hours of training (annually) related to provision of support to children, youth, or young adults and their families when providing ICCW to those served under the SEDW.
- Participate in and complete MDHHS-required evaluation and fidelity measurements.
- Provide full scope of ICCW and facilitate the Wraparound Planning Process to model fidelity to develop a Wraparound Plan.
- Participate in Person-Centered Planning Process training, including Self Determination.
- Facilitate the Person-Centered Planning Process in alignment with family-driven and youth-guided guidelines in adherence to applicable policy to develop an Individual Plan of Service (IPOS).
- Obtain certification in MichiCANS if responsible for the completion of the annual MichiCANS.
- Demonstrate knowledge of State Plan and SEDW service array and community resources and programs.
- Attend Community Team meetings as needed to support their Wraparound Teams.
- Care Coordinators may not have more than one provider role with a family. If Care Coordinators are providing other mental health services, including crisis response, they may not provide ICCW to the same child, youth, or young adult and their family.
- If coordinators are assigned to other programs as well as ICCW, the number of child/youth and family teams they facilitate shall correlate to the percentage of their position dedicated to providing Wraparound facilitation.

ICCW supervisors shall:

- Oversee ICCW, including evaluation.
- Receive/process referrals and assign children, youth, or young adults and their families to Care Coordinators.
- Adhere to policies/procedures that align with ICCW.
- Organize and facilitate Community Team meetings quarterly, at minimum.
- Be designated as a Child Mental Health Professional (CMHP) (when overseeing provision to SED youth) and/or Qualified Intellectual Disabilities Professional (QIDP) (when overseeing provision to Intellectual/Developmental Disabilities [I/DD] youth).
- Participate in Person-Centered Planning Process training, including Self Determination.
- Obtain certification in MichiCANS if providing supervision to a Care Coordinator who is responsible for completion of the annual MichiCANS.

Medicaid Provider Manual

- Receive certification in ICCW through MDHHS-provided training prior to supervision of Care Coordinators.
- Maintain certification in ICCW:
 - Complete one annual ICCW booster.
 - Complete at least two MDHHS-provided trainings related to ICCW, one of which must be supervisor specific.
 - Complete an additional 16 hours of annual training related to provision of support to children, youth, or young adults and their families when supervising the provision of ICCW to those served under the SEDW.
- Provide weekly, individualized supervision and coaching to Care Coordinators and maintain a supervision log.
- Maintain partnership with child, youth, or young adult and family community programs, systems, and partners.
- Ensure Care Coordinators have knowledge of State Plan and SEDW service array and community resources and programs.
- Ensure families and staff have access to a directory of community resources, systems, and programs.

ICCW Program Administrators shall:

- Attend ICCW 101 Training.
- Attend one annual ICCW booster.
- Provide direct oversight of ICCW Supervisors.
- Provide local oversight of ICCW.
- Align internal policies and procedures, contracts and/or memorandums of understanding with Wraparound philosophy and ICCW policy.
- Broker services as needed.
- Secure local partnership with child, youth, or young adult and family community programs, systems and partners.

The Community Team shall:

- Include children, youth, young adults and parents/caregivers with lived experience and local system and community partners.
- Work collaboratively to address barriers, provide support, and identify available community services and programs for children, youth, and families. **(revised per bulletin MMP 24-41)**

Medicaid Provider Manual

3.31.C. AMOUNT AND SCOPE OF SERVICE [CHANGES MADE 4/1/2025]

Amount of Service:

- Wraparound Teams shall meet once per week, at minimum, during the Hello and Help phases.
- Wraparound Teams shall meet twice monthly, at minimum, during the Heal phase. The Heal phase begins once the plan has been developed and the Team agrees stabilization has been achieved.
- Wraparound Teams shall meet monthly, at minimum, during the Hope phase. The Hope phase begins when the Team agrees that the child, youth, or young adult and family are ready to graduate from the Wraparound Planning Process and no longer show a need for ICCW.
- When a child, youth, or young adult is in placement and the Care Coordinator is facilitating transition planning back to the home and community, the meeting frequency may reflect the needs of the child, youth, or young adult. Only upon Wraparound Plan development or adjustment may the frequency of Team meetings decrease.
 - Upon discharge, frequency of meetings should align with the phase that the Wraparound Team is in.
- The Care Coordinator must review services at intervals defined in the Individual Plan of Service (IPOS). A formal review of the IPOS shall not occur less often than annually to review progress toward goals and objectives and to assess beneficiary satisfaction.
- Frequency and scope (face-to-face and telephone) of other ICCW monitoring activities must reflect the intensity of the child, youth or young adult's health and welfare needs.

Scope of Service:

- Ensure child, youth, or young adult and their family understand the ICCW and the Wraparound Planning Process. When SEDW is being utilized, orient child, youth, or young adult and their family to the SEDW process and service array.
- Ensure documentation from other service providers and systems partners (physicians, medication prescribers, mental health, education, child welfare, juvenile justice, community services, etc.) involved with the child, youth, or young adult and their family is available and utilized to support identified needs.
- Coordinate communication among service providers and systems partners (physicians, medication prescribers, mental health, education, child welfare, juvenile justice, community services, etc.) who are involved with the child, youth, or young adult and their family.
- Ensure child, youth, or young adult and their family are linked to relevant supports, community service providers and systems partners to expand support network and address identified needs.
- Support and empower the Wraparound Team to advocate on behalf of the child, youth, or young adult and family.

Medicaid Provider Manual

- Ensure child, youth, or young adult and their family and Wraparound Team have access to informational material that supports the ability to address identified needs (guidance on navigation of specific services or systems, psychoeducation materials, parent education materials, etc.).
- Ensure Intake has been completed or is scheduled to be completed.
- Ensure service provider is providing all medically necessary services that the child, youth, or young adult and their family choose and taking appropriate action when those services are unavailable.
- Facilitate the brokerage of services and supports as identified through the Wraparound Planning Process.
- Ensure Family-Driven, Youth-Guided Process is included to develop the IPOS.
- Utilize the Wraparound Planning Process to ensure successful transition of the child, youth, or young adult back into their home and community.
- Facilitate the Wraparound Planning Process with model fidelity to the MDHHS model to develop and update the Wraparound Plan as needed or required.
- Facilitate the Family-Driven, Youth-Guided Process to develop and complete annual updates to the IPOS.
- Ensure an annual MichiCANS is completed by the appropriate entity. **(revised per bulletin MMP 24-41)**

3.31.D. LOCATION

3.31.D.1. TELEMEDICINE [CHANGE MADE 4/1/2025]

- **(text deleted per bulletin MMP 24-41)**
- All Child and Family Team meetings are to be provided in-person during the Hello and Help phases.
- Child and Family Team meetings may be provided either in-person or via simultaneous audio/visual telemedicine during the Heal and Hope phases, according to the preference of the child/youth and their parents/primary caregivers, with the following exceptions:
 - Development of the transition plan (Hope phase) is to be completed in-person.
 - Graduation activities (Hope phase) are to be completed in-person.
 - Child and Family Team meetings are to be provided in-person for the first 60 days upon a child/youth transitioning back to their home and community from out-of-home placement.
 - In-person Child and Family Team meetings are to be provided once per month, at minimum, for children/youth served under the SEDW during both the Heal and Hope phases.

Medicaid Provider Manual

3.31.D.2. CHILD CARING INSTITUTIONS (CCI) AND STATE HOSPITALS [CHANGES MADE 4/1/2025]

- ICCW is covered by Medicaid for up to 180 days while in placement for the purpose of transition back to the community; Wraparound must be suspended once the child/youth has been placed for more than 180 days. When Wraparound-enrolled children/youth are placed at a CCI, including a Qualified Residential Treatment Program (Q RTP), or State Hospitals, transition planning should begin immediately in conjunction with the Wraparound Child and Family Team and facility staff.
 - A child, youth, or young adult who meets eligibility criteria for ICCW should be referred to the service planning provider in the community in which they reside.
 - The Care Coordinator will work with the child/youth and their caregiver(s) to develop a Child and Family Team. The Child and Family Team will work collaboratively with facility staff and other child-serving systems to facilitate a comprehensive and holistic plan of services and supports that will enable the child/youth to return to their community.
- The child/youth must have an identified community to transition. (revised per bulletin MMP 24-41)
- Medicaid does not cover services provided to persons/children involuntarily residing in non-medical public facilities (such as jails, prisons or juvenile detention facilities).

Refer to the Program Requirements section, Location of Services subsection of this chapter for additional information regarding provision within a CCI and State Hospital.
(revised 4/1/2025)

3.31.E. CHILD AND FAMILY TEAM PLAN AND WRAPAROUND PLANNING PROCESS [CHANGES MADE 4/1/2025]

The Wraparound Planning Process must be provided with fidelity in accordance with the MDHHS ICCW model. The Person-Centered Planning Process must be provided according to MDHHS policy, including Family Driven and Youth Guided policy.

The Safety/Crisis Plan, Wraparound Plan and the Individual Plan of Service (IPOS) are the resulting plans from the utilization of the Wraparound Planning Process and the Person-Centered Planning Process. The Wraparound plan should drive development and/or adjustment of the IPOS.

The following planning process activities and supporting documentation shall be completed for each child/youth and family:

Safety/Crisis Plan	<ul style="list-style-type: none">▪ Safety/Crisis Plans must be developed upon the initial meeting with the child, youth, or young adult and their family.▪ Existing Safety/Crisis Plans are to be reviewed with the child, youth, or young adult and their family following initial utilization and as needed to determine if modifications are necessary.▪ Safety/Crisis plans must be developed with fidelity to the MDHHS Wraparound model.
---------------------------	---

Medicaid Provider Manual

Wraparound Plan	<ul style="list-style-type: none">▪ The Wraparound Plan must be developed within 30 days of initial service provision.▪ The Wraparound Plan's strategies are to be reviewed at each Team meeting, and Team adjustments to strategies are to be completed by the Care Coordinator.▪ The Wraparound Plan's outcomes are to be reviewed at least monthly, and Team adjustments to the Plan are to be completed by the Care Coordinator.▪ Wraparound Plan elements must be developed with fidelity to the MDHHS Wraparound model to ensure fidelity.
Individual Plan of Services (IPOS)	<ul style="list-style-type: none">▪ The IPOS Pre-Plan must be developed in the Wraparound Team meeting during the Hello phase.<ul style="list-style-type: none">➤ The annual IPOS Pre-Plan must be developed within the Wraparound Team meeting.▪ The IPOS must be developed in the Help phase following development of the Wraparound Plan. If there is an existing IPOS, it must be updated to reflect the newly developed Wraparound Plan. Each service provider is responsible for providing the narrative for their clinical intervention.▪ The annual IPOS must be developed within the Wraparound Team meeting, driven by the existing Wraparound Plan. Each service provider is responsible for providing the narrative for their clinical intervention.▪ IPOS elements must comply with Michigan Administrative Code R330.7199 requirements.
Wraparound Team Meeting Minutes	<ul style="list-style-type: none">▪ Meeting minutes must be developed following each Wraparound Team meeting and distributed to all Wraparound Team members.▪ Meeting minutes elements must comply with documentation requirements for MDHHS Wraparound model fidelity monitoring.
Graduation Summary	<ul style="list-style-type: none">▪ The Graduation summary must be completed within the last month of the Hope phase and distributed to the child, youth, or young adult, and their family.▪ The Graduation summary elements must be developed with fidelity to the MDHHS Wraparound model. (revised per bulletin MMP 24-41)

3.31.F. EVALUATION AND OUTCOMES MEASUREMENT [CHANGES MADE 4/1/2025]

The enrolled provider will comply with the State of Michigan ICCW evaluation requirements. Current evaluation requirements are:

- The enrolled ICCW provider will comply with MDHHS ICCW evaluation requirements as determined by the department.
- Additional evaluation tools will be completed as identified and requested by MDHHS.
- Adherence to ICCW model fidelity may be reviewed at enrollment, re-enrollment, and at technical assistance visits through file review, family interviews, and evaluation and fidelity tools. **(revised per bulletin MMP 24-41)**

SECTION 4 – ASSERTIVE COMMUNITY TREATMENT PROGRAM

Assertive Community Treatment (ACT) is a therapeutic set of intensive clinical, medical and psychosocial services provided by a mobile multi-disciplinary treatment team that includes case/care management, psychiatric services, counseling/psychotherapy, housing support, Substance Use Disorders treatment, and employment and rehabilitative services provided in the beneficiary's home or community.

ACT provides basic services and supports essential to maintaining the beneficiary's ability to function in community settings, including assistance with accessing basic needs through available community resources (such as food, housing, medical care and supports) to allow beneficiaries to function in social, educational, and vocational settings.

ACT is an individually tailored combination of services and supports that may vary in intensity over time and is based on individual need. ACT includes availability of multiple daily contacts and 24-hour, 7-days-per-week crisis availability provided by the multi-disciplinary ACT team which includes psychiatric and skilled medical staff. ACT services are based on the principles of recovery and person-centered practice and are individually tailored to meet the needs of each beneficiary. Services are provided in the beneficiary's residence or other community locations by all members of the ACT team staff.

The Prepaid Inpatient Health Plans (PIHPs) and the Community Behavioral Health Services Programs (CMHSPs) offer a continuum of adult services including case/care management, outpatient therapy, and psychiatric services that can be used in varying intensities and combinations to assist beneficiaries in a recovery-oriented system of care. The beneficiary's level of need and preferences must be considered in the admission process. ACT is the most intensive non-residential service in the continuum of care within the service array of the public behavioral health system.

4.1 TEAM APPROVAL

Medicaid providers wishing to become providers of ACT services must obtain approval from MDHHS and meet the program components outlined below. Provider programs with more than one ACT team must have individually approved and registered ACT teams. All ACT teams are subject to MDHHS re-approval every three years.

4.2 TARGET POPULATION

The intensity of ACT services is intended for the beneficiary with a primary diagnosis of serious mental illness and who, without ACT, would require more restrictive services and/or settings. ACT is not an appropriate service for a beneficiary with a primary diagnosis of a personality disorder, a primary diagnosis of a Substance Use Disorder, or a primary diagnosis of intellectual or developmental disability. A beneficiary with a primary diagnosis of a serious mental illness may also be diagnosed with a personality disorder or co-occurring Substance Use Disorder and benefit from ACT services.

ACT services are targeted to beneficiaries demonstrating acute or severe psychiatric symptoms that are seriously impairing the beneficiary's ability to function independently, and whose symptoms impede the return of normal functioning as a result of the diagnosis of a serious mental illness. Areas of impairment are significant and are considered individually for each beneficiary.

Medicaid Provider Manual

These areas of difficulty may include:

- Maintaining or having interpersonal relationships with family and friends;
- Accessing needed mental health and physical health care;
- Addressing issues relating to aging, especially where symptoms of serious mental illness may be exacerbated or confused by complex medical conditions or complex medication regimens;
- Performing activities of daily living or other life skills;
- Managing medications without ongoing support;
- Maintaining housing;
- Avoiding arrest and incarceration, navigating the legal system, and transitioning back to the community from jail or prison;
- Coping with relapses or return of symptoms given an increase in psychosocial stressors or changes in the environment resulting in frequent use of hospital services, emergency departments, crisis services, crisis residential programs or homeless shelters;
- Maintaining recovery to meet the challenges of a co-occurring Substance Use Disorder;
- Encountering difficulty in past or present progress toward recovery despite participation in long-term and/or intensive services.

4.3 ESSENTIAL ELEMENTS [CHANGE MADE 7/1/2025]

Team-Based Service Delivery	<p>ACT is a team-based behavioral health service that includes shared service delivery responsibility that provides consistent continuity of care. Case/care management, psychiatric services, counseling/psychotherapy, peer support services, housing support, substance use disorder treatment, employment and rehabilitative services are interwoven with treatment and rehabilitative services, and services are provided by all members of the ACT team in the beneficiary's home or community.</p> <p>All ACT staff must obtain a basic knowledge of ACT programs and principles acquired through participation in MDHHS-approved ACT-specific initial training, and subsequent participation in at least one MDHHS-approved ACT-specific training annually thereafter. All initial training of ACT staff must occur within six months of hire for work in ACT. Physicians/Nurse Practitioners/Physician's Assistants/Clinical Nurse Specialists must participate in the MDHHS-approved Physicians/Nurse Practitioners/Physician's Assistants/Clinical Nurse Specialists training one time, with additional ACT training/participation for Physicians/Nurse Practitioners/Physician's Assistants/Clinical Nurse Specialists encouraged, but not mandatory.</p> <p>Team meetings occur Monday through Friday on business days and are attended by all ACT staff members on duty. Physicians, Nurse Practitioners, Physician's Assistants or Clinical Nurse Specialists are expected to participate in ACT team meetings at least weekly. Agendas for daily team meetings include the status of all beneficiaries, updates from on-call, clinical and case/care management needs, crisis management, schedule organization, and finalized plans for ACT staff deployment into the community.</p>
------------------------------------	---

Medicaid Provider Manual

	<p>A minimum of 80% of ACT contacts provided by the team are in the beneficiary's home or other agreed upon community location. Treatment groups identified in the Individual Plan of Service (IPOS), such as Family Psychoeducation, Alcoholics Anonymous, etc., are excluded from the 80% community visit standard regardless of where the group is held.</p> <p>The average number of visits per day/week/month/etc. provided by the whole team, not individual ACT team members, to an individual consumer will comprise 80% of home or community contacts.</p>
<p>Team Composition and Size</p> <p><i>A minimum of 80% of ACT contacts provided by the team are in the beneficiary's home or other agreed-upon community location.</i></p> <p><i>The average number of visits per day/week/month/etc. provided by the whole team, not individual ACT team members, to a consumer will comprise 80% of home or community contacts. This average is for the entire team, an average across the entire caseload (not individual consumers) and is to be</i></p>	<p>All ACT team members, including the team leader, perform all team functions for which they are qualified. An ACT team member's individual scope of service allows for variance in the frequency of community contacts, and responsibility for primary caseload responsibilities; beneficiary assessment, after hours crisis coverage, person-centered planning and development of individual plans of service, while not exclusive, are examples of activities all team members perform and share.</p> <p>The ACT team requires a sufficient number of qualified staff to assure the provision of an intensive array of services on a 24-hour basis. The minimum ACT staffing requirements are below. An ACT team operates minimally with 4 FTE staff and with no more than 9 FTE staff members. Teams average 6-7 FTE staff. If an ACT team believes it is necessary to operate outside of team requirements, consult with MDHHS regarding feasibility. If appropriate, a waiver request may be submitted to the PIHP. If approved, the PIHP will submit the request to MDHHS for consideration of approval.</p> <ul style="list-style-type: none">▪ A full-time team leader whose experience includes at least two years post-degree clinical work with adults who have a serious mental illness and minimally possesses a master's degree in a relevant discipline, with appropriate licensure to provide clinical supervision to the ACT team staff. The ACT team leader leads the team, provides clinical supervision to team members, and provides direct services to beneficiaries in the community within their individual scope of practice. The ACT team leader also meets the requirements of a MHP and licensing requirements in accordance with Licensing and Regulatory Affairs (LARA) for their position description and provider qualifications. (revised 7/1/2025)▪ A full-time registered nurse (RN) is required on the ACT team. The RN provides integrated behavioral and physical healthcare, including managing medication, assessing and coordinating physical/medical care, and providing direct services to the beneficiary in the community. <p>A physician who provides psychiatric coverage for all beneficiaries served by the ACT team is required. The physician is considered a part of the ACT team, but is not counted in the staff-to-beneficiary ratio. The physician participates in the team meeting at least weekly and is assigned to the ACT team at least 15 minutes per beneficiary per week in a capacity that allows for immediate access to the physician so that emergency, urgent or emergent situations may be addressed. The expectation is that some beneficiaries will need more physician time and some beneficiaries will need less time during any given week. The physician may delegate psychiatric activities to a nurse practitioner, physician's assistant or clinical nurse specialist, but the nurse practitioner, physician's assistant or clinical nurse specialist must be supervised by that physician. Typically, although not exclusively, physician activities may include team meetings, beneficiary appointments during regular office hours, psychiatric evaluations, psychiatric meetings/consultations, medication reviews, home visits, telephone consultations and telemedicine. The physician (MD or DO) must possess a valid license to practice medicine in Michigan, a Michigan Controlled Substance License, and a Drug Enforcement Administration (DEA) registration.</p>

Medicaid Provider Manual

Telemedicine is the use of telecommunications and information technologies for the provision of psychiatric services to ACT consumers and is subject to the same service provisions as psychiatric services provided in person. The telemedicine modifier must be used in conjunction with the ACT encounter reporting code when telemedicine is used.

All telemedicine interactions shall occur through real-time interactions between the ACT consumer and the physician/nurse practitioner/physician's assistant/clinical nurse specialist from their respective physical location. Psychiatric services are the only ACT services that are approved to be provided in this manner.

Refer to the General Information for Providers Chapter of this manual for the complete Health Insurance Portability and Accountability Act (HIPAA) compliance requirements and the Telemedicine chapter for additional telemedicine requirements.

- A physician assistant may perform clinical tasks under the terms of a practice agreement with a participating physician. The physician assistant must hold a current physician assistant license and a controlled substance license in Michigan. The physician assistant is not counted in the staff-to-beneficiary ratio. Typically, although not exclusively, physician assistant activities may include team meetings, beneficiary appointments during regular office hours, evaluations, psychiatric meetings/consultations, medication reviews, home visits, telephone consultations and telemedicine.
 - A nurse practitioner or clinical nurse specialist may perform clinical tasks delegated by and under the supervision of the physician. The nurse practitioner/clinical nurse specialist must hold a specialty certification as a nurse practitioner/clinical nurse specialist in Michigan, a current license to practice nursing in Michigan, and a master's degree in psychiatric mental health nursing. If the ACT team includes a nurse practitioner/clinical nurse specialist, they may substitute for a portion of the physician time, but may not substitute for the ACT RN. The nurse practitioner/clinical nurse specialist is not counted in the staff-to-beneficiary ratio. Typically, although not exclusively, nurse practitioner/clinical nurse specialist activities may include team meetings, beneficiary appointments during regular office hours, evaluations, psychiatric meetings/consultations, medication reviews, home visits, telephone consultations and telemedicine.
 - A case or care manager, possessing minimally a bachelor's degree in a human services discipline, who possesses appropriate licensure to provide the core elements of case or care management with at least one year of experience providing services to adults with a mental illness, and is a QMHP. If the case or care manager has a bachelor's degree but is without one year of experience working with adults with serious mental illness or co-occurring disorders and otherwise meets the requirements of the QMHP, documentation of clinical supervision is provided in the beneficiary record.
 - Individual/family/group counseling provided by a MHP, including a limited-licensed master's degree social worker who is supervised by a licensed master's degree social worker.
 - Up to one Full Time Equivalent (FTE) Peer Support Specialist (PSS) may substitute for one QMHP to achieve the 1:10 required staff-to-beneficiary ratio. Under the supervision of the ACT team leader, a PSS may provide documentation in beneficiary records. This supervision is documented in the beneficiary record.
- PSSs are individuals with a strong personal knowledge of what it is like to have first-hand lived experience with a mental health condition that has caused a substantial life disruption. The Centers for Medicare & Medicaid Services (CMS) requires that PSSs must be supervised by a Qualified Mental Health Professional (QMHP) as defined by the MDHHS Behavioral and Physical Health and Aging Services Administration (BPHASA). The amount, duration and scope of supervision can vary depending on the demonstrated competency and experience of the PSS and may range from direct oversight to periodic care consultation in accordance with their position description and provider qualifications.
- Up to one FTE paraprofessional staff to work with ACT teams may be counted in the staff-to-beneficiary ratio. Paraprofessional staff may have a bachelor's degree or related training in a field other than behavioral sciences (e.g., certified occupational therapy assistance, home health care); or have a high school equivalency and work or life experience with adults with severe mental illness or co-occurring substance use disorders.

Medicaid Provider Manual

<p><i>Treatment Groups identified in the IPOS, such as Family Psychoeducation, Alcoholics Anonymous, etc., are excluded from the 80% community visit standard regardless of where the group is held.</i></p> <p><i>The scope of services for individual ACT staff members require that some staff will work in the community more often than others.</i></p>	<ul style="list-style-type: none">▪ If the ACT team provides substance use disorder services, there must be a designated Substance Abuse Treatment Specialist who has one or more credentials through the Michigan Certification Board of Addiction Professionals (MCBAP). If the ACT team provides co-occurring treatment or substance use disorder treatment, the organization must have a substance use disorder treatment license issued by the State of Michigan, if applicable, based on state licensing requirements and as outlined in contract. <p>Additional staff positions reflect the needs of the population, such as the ability to obtain housing, employment services and rehabilitative services for beneficiaries who request them, and shall minimally be a QMHP.</p>
Staff-to-Beneficiary Ratio	<p>The ACT team's staff-to-beneficiary ratio shall be at least one FTE ACT staff to a maximum of 10 ACT beneficiaries, a 1:10 staff-to-beneficiary ratio. Teams serving large service areas, highly complex beneficiaries, or very high acuity beneficiaries may find a lower staff-to-beneficiary ratio better meets beneficiary needs and retains team capacity to quickly address emerging or acute treatment needs and adjust service contacts. With the exceptions of the limitations on paraprofessionals and certified peer support specialists described above, the staff ratio includes all ACT team members, excluding the clerical support staff and physicians, nurse practitioners, physician assistants, and clinical nurse specialists.</p>
Fixed Point of Responsibility <p><i>Provision of ACT service; place of service is indicated as hospital. For specific codes and modifiers, refer to the Behavioral Health Code Chart and Provider Qualifications document on the MDHHS website for details. (Refer to the Directory Appendix for website information.)</i></p>	<p>The ACT team is the fixed point of responsibility for the development of the individual plan of service (IPOS) using the person-centered planning process and for supporting beneficiaries in all aspects of community living. The process addresses all services and supports to be provided to or obtained for the beneficiary by the team, including consultation with other disciplines and/or coordination of other supportive services as appropriate. Care continuity is maintained with pre-admission screening, team contact during inpatient psychiatric hospitalizations, and team participation in transition and discharge planning.</p>

Medicaid Provider Manual

Availability of Services <i>Pre-admission screens for ACT beneficiaries must be reported by including the appropriate modifier with the ACT encounter code. For specific codes and modifiers, refer to the Behavioral Health Code Chart and Provider Qualifications document on the MDHHS website for details. (Refer to the Directory Appendix for website information.)</i>	Availability of ACT services must include: <ul style="list-style-type: none">▪ 24-hour/7-day crisis response coverage (including psychiatric availability) that is handled directly by members of the ACT team.▪ The ACT team is responsible for performing the required pre-admission screen for all beneficiaries certified in an ACT program seeking inpatient psychiatric admission.▪ The capacity to provide a rapid response to early signs of relapse, including the capability to provide multiple contacts daily with beneficiaries in acute need or with emergent conditions.▪ The ACT team has the ability to provide needed services to the beneficiary 7 days a week as per the IPOS.
Individual Plan of Service (IPOS)	<p>ACT services and interventions must be consistent and balanced through medical necessity and the preferences of the beneficiary while embracing person-centered principles, wellness and behavioral health recovery with a goal of maximizing independence and a progression into less intensive services.</p> <p>Beneficiaries with co-occurring substance use disorders must have both behavioral health and substance use disorders addressed in the IPOS.</p> <p>Beneficiaries who need a less intensive service than ACT, such as case/care management, have documentation in the IPOS detailing the transition plan to the new service and a plan to return to ACT should the need occur.</p>
In Vivo Settings	<p>ACT teams provide a wide array of clinical, medical and rehabilitative services during face-to-face interactions designed to promote the beneficiary's growth in recovery. ACT services and supports are focused on acquiring needed behavioral health services, substance misuse services, physical health care, performing activities of daily living, obtaining and/or maintaining employment, developing leisure activities, developing and maintaining meaningful relationships, maintaining housing, avoiding arrest and incarceration, navigating the legal system, transitioning successfully into the community from jail or prison, and relapse prevention.</p> <p>Services for ACT beneficiaries may include those defined elsewhere in this chapter, as well as others that are consistent with individual preferences, professionally accepted standards of care, and that are medically necessary.</p> <p>ACT services may be used as an alternative to hospitalization as long as beneficiary health and safety issues can be reasonably well-managed with ACT supports that do not require 24-hour-per-day supervision.</p>

Medicaid Provider Manual

4.4 ELIGIBILITY CRITERIA

Utilization of ACT in high acuity conditions and situations allows beneficiaries to remain in their community of residence and may prevent the use of more restrictive alternatives which may be detrimental to a beneficiary's existing natural supports and occupational roles. This level of care is appropriate for beneficiaries with a history of serious mental illness who may be at risk for inpatient hospitalization or intensive crisis residential or partial hospitalization services, but can remain safely in their communities with the considerable support and intensive interventions of ACT. In addition to meeting the following criteria, these beneficiaries may also be likely to require or benefit from continuing psychiatric rehabilitation.

The ACT acute service selection guideline covers criteria in the following domains:

Diagnosis	The beneficiary must have a serious mental illness, as reflected in a primary, validated, current version of Diagnostic and Statistical Manual of Mental Disorders (DSM) or International Classification of Diseases (ICD) diagnosis (not including ICD-9 V-codes and ICD-10 Z-codes).
Severity of Illness	<p>Psychiatric Status</p> <ul style="list-style-type: none">▪ Prominent disturbance of thought processes, perception, affect, memory, consciousness, somatic functioning (due to a mental illness) which may manifest as intermittent hallucinations, transient delusions, panic reactions, agitation, obsessions, ruminations, severe phobias, depression, etc., and is serious enough to cause disordered or aberrant conduct, impulse control problems, questionable judgment, psychomotor acceleration or retardation, withdrawal or avoidance, compulsions, rituals, impaired reality testing and/or impairments in functioning and role performance. <p>Self-Care/Independent Functioning</p> <ul style="list-style-type: none">▪ Disruptions of self-care, limited ability to attend to basic physical needs (nutrition, shelter, etc.), seriously impaired interpersonal functioning, and/or significantly diminished capacity to meet educational/occupational/parental role performance expectations.▪ Drug/Medication Conditions - Drug/medication adherence and/or a co-existing general medical condition which needs to be simultaneously addressed along with the psychiatric illness and which cannot be carried out at a less intensive level of care. Medication use requires monitoring or evaluation for adherence to achieve stabilization, to identify atypical side effects or concurrent physical symptoms and medical conditions.▪ Risk to Self or Others - Symptom acuity does not pose an immediate risk of substantial harm to the beneficiary or others, or if a risk of substantial harm exists, protective care (with appropriate medical/psychiatric supervision) has been arranged. Harm or danger to self, self-mutilation and/or reckless endangerment or other self-injurious activity is an imminent risk.

Medicaid Provider Manual

Intensity of Service	<p>ACT team services are medically necessary to provide treatment in the least restrictive setting, to allow beneficiaries to remain in the community, to improve the beneficiary's condition and /or allow the beneficiary to function without more restrictive care, and the beneficiary requires at least one of the following:</p> <ul style="list-style-type: none">▪ An intensive team-based service is needed to prevent elevation of symptom acuity, to recover functional living skills and maintain or preserve adult role functions, and to strengthen internal coping resources; ongoing monitoring of psychotropic regimen and stabilization necessary for recovery.▪ The beneficiary's acute psychiatric crisis requires intensive, coordinated and sustained treatment services and supports to maintain functioning, arrest regression and forestall the need for inpatient care in a 24-hour protective environment.▪ The beneficiary has reached a level of clinical stability (diminished risk) obviating the need for continued care in a 24-hour protective environment but requires intensive coordinated services and supports.▪ Consistent observation and supervision of behavior are needed to compensate for impaired reality testing, temporarily deficient internal controls, and/or faulty self-preservation inclinations.▪ Frequent monitoring of medication regimen and response is necessary and adherence is doubtful without ongoing monitoring and support.▪ Routine medical observation and monitoring are required to affect significant regulation of psychotropic medications and/or to minimize serious side effects.▪ The total number of contacts averages 120 minutes of face-to-face time each week for each beneficiary. Higher frequency with shorter visits is most effective and is determined and adjusted as needed within the flexibility identified in the Individual Plan of Service (IPOS) and case notes. Clearly documented clinical rationale is provided in exception cases where an average of 120 minutes for each beneficiary is clinically inappropriate.
-----------------------------	--

Medicaid Provider Manual

<p>Discharge</p> <p><i>For beneficiaries who have progressed forward on their journey toward recovery and are ready for a less intensive service, the IPOS should document the transition from ACT to a less intensive service, such as case/care management.</i></p>	<p>Cessation or control of symptoms is not sufficient for discharge from ACT. For beneficiaries who have progressed forward on their journey toward recovery and are ready for a less intensive service, the IPOS should document the transition from ACT to a less intensive service, such as case/care management. Recovery must be sufficient to maintain functioning without the support of ACT as identified through the person-centered planning process as described below:</p> <ul style="list-style-type: none">▪ The beneficiary no longer meets severity-of-illness criteria and has demonstrated the ability to meet all major role functions for a period of time sufficient to show clinical stability. <p>Beneficiaries who meet medical-necessity criteria for ACT services usually require and benefit from long-term participation in ACT. ACT is not a service that is appropriate for short-term stabilization and then transition into another program.</p> <p>If a beneficiary requests transition to other service(s) because they believe maximum benefit has been reached in ACT, consideration for transition into less intensive services must be reviewed during the person-centered planning process. If clinical evidence supports the beneficiary's desire to transition, this evidence and the transition plan must be detailed in a revised IPOS developed through the person-centered planning process. The plan must identify what supports and services will be made available, and contain a provision for re-certification into ACT services, if needed.</p> <ul style="list-style-type: none">▪ Engagement of the beneficiary in ACT is not possible as deliberate, persistent and frequent assertive team outreach, including face-to-face engagement attempts and legal mechanisms when necessary, have been consistent, unsuccessful, and documented over many months, and an appropriate alternative plan has been established with the beneficiary.▪ Beneficiary has moved outside of the geographic service area. Contact continues until service has been established in the new location.
--	---

Medicaid Provider Manual

SECTION 5 – CLUBHOUSE MODEL PROGRAMS

A Clubhouse is a community-based program organized to support individuals living with mental illness. Participants are known as Clubhouse members, and member choice is a key feature of the model. Clubhouses are vibrant, dynamic communities where meaningful work opportunities drive the need for member participation, thereby creating an environment where empowerment, relationship-building, skill development and related competencies are gained. Through what is referred to as the work-ordered day, the Clubhouse provides opportunities for member involvement and ownership in all areas of Clubhouse operation. Members and staff work side-by-side in the program as colleagues. Comprehensive opportunities are provided within the Clubhouse, including supports and services related to employment, education, housing, community inclusion, wellness, community resources, advocacy, and recovery. In addition, members participate in the day-to-day decision-making and governance of the program. Through Clubhouse involvement, members achieve or regain the confidence and skills necessary to lead satisfying, meaningful lives and successfully manage their mental illness. The Clubhouse model is included in the National Registry of Evidence-based Programs and Practices (NREPP), which can be found on the NREPP website. (Refer to the Directory Appendix for website information.)

5.1 PROGRAM APPROVAL

- PIHPs must seek approval for providers of Clubhouse services from the MDHHS Behavioral and Physical Health and Aging Services Administration (BPHASA).
- To ensure fidelity to the model of the evidence-based practice of Psychosocial Rehabilitation, Clubhouses must acquire and maintain Clubhouse International accreditation. Additional information regarding Clubhouse International accreditation is available on the International Center for Clubhouse Development (ICCD) website. (Refer to the Directory Appendix for website information.)
- All new Clubhouses must participate in the Clubhouse International's New Clubhouse Development Training.
- MDHHS approval will be based on adherence to the requirements outlined below.

Requests for approval of Clubhouse services may be submitted to the MDHHS-BPHASA Community Based Practices and Innovation Section, Division of Adult Home and Community Based Services. (Refer to the Directory Appendix for contact information.)

5.2 TARGET POPULATION

Clubhouse programs are appropriate for adults with a serious mental illness who wish to participate in a structured community with staff and peers and who desire to work on the goal areas reflected in the Core Psychiatric Rehabilitation Components subsection of this document. The beneficiary must be able to participate in, and benefit from, the activities necessary to support the program and its members.

Medicaid Provider Manual

5.3 ESSENTIAL ELEMENTS OF THE CLUBHOUSE MODEL

Member Choice/ Involvement	<p>Member choice and involvement are an ongoing essential process imbedded in all aspects of the Clubhouse model.</p> <ul style="list-style-type: none">▪ Membership is voluntary.▪ Clubhouse Membership is without time-limits; access to an intentional community supports the recovery process.▪ All members have access to the services/supports and resources with no differentiation based on diagnosis or level of functioning.▪ Members establish their own schedule of attendance and choose a work unit that they will regularly participate in during the work-ordered day.▪ Members are actively engaged and supported on a regular basis by Clubhouse staff in the activities and tasks that they have chosen.▪ Membership in the program and access to supportive services reflects the beneficiary's preferences and needs, building on the person-centered planning process.▪ Both formal and informal decision-making opportunities are part of the Clubhouse work units and program structures. Members can influence and shape program operations. Clubhouse decisions are generally made by consensus.▪ Staff and members work side-by-side to generate and accomplish individual/team tasks and activities necessary for the development, support, and maintenance of the program.
Work-Ordered Day	<ul style="list-style-type: none">▪ The work-ordered day is a primary component of the program and provides an opportunity for members to regain self-worth, purpose, and confidence. It consists of tasks and activities necessary for the operation of the Clubhouse and typically occurs during normal business hours.▪ Although participation in the work-ordered day provides opportunities to develop a variety of interpersonal and vocationally related skills, it is not intended to be job-specific training.▪ Member participation in the work-ordered day provides experiences that will support members' recovery, and is designed to assist members to acquire personal, community and social competencies and to establish and navigate environmental support systems.▪ The program's structure and schedule identifies when the various program components occur (e.g., work-ordered day, vocational/educational). Other activities, such as self-help groups and social activities, are scheduled before or after the work-ordered day.▪ The work done in the Clubhouse is exclusively the work generated by the Clubhouse in the operation and enhancement of the Clubhouse community. No work for outside individuals or agencies, whether for pay or not, is acceptable work in the Clubhouse. Members are not paid for any Clubhouse work, nor are there any artificial reward systems.▪ The amount, scope, and variety of tasks are sufficient enough to engage the membership in meaningful activities throughout the work-ordered day.

Medicaid Provider Manual

	<ul style="list-style-type: none"> All staff are Clubhouse generalists. Their responsibilities are housed in a unit and they routinely work side-by-side with members to complete unit work. Staff help to identify meaningful work opportunities for members and are able to facilitate workgroups. Staff are dynamic and skilled at developing relationships with members. Staff utilizes a strengths-based approach and promotes an equal culture with members, thereby allowing members to experience themselves as valued colleagues in the Clubhouse community.
Employment Services	<ul style="list-style-type: none"> The Clubhouse provides its own employment services, including Transitional Employment (TE), Supported Employment (SE), and Independent Employment (IE), consistent with Clubhouse International standards and guidelines, which are available on the ICCD website. (Refer to the Directory Appendix for website information.) Additional resources for benefits planning are available.
Educational Services	<ul style="list-style-type: none"> The Clubhouse provides resources and connections to assist members with goals to return to formal educational settings. This should include some of the following supports: <ul style="list-style-type: none"> connections with local colleges and General Educational Development (GED) centers, assistance with admission and financial aid applications, tutoring assistance with fellow members when appropriate, formal education groups, and other activities that support member success. <p>Educational programming should be individualized and should enhance the Clubhouse work-ordered day.</p>
Community Supports	<ul style="list-style-type: none"> Community support services are provided by members and staff of the Clubhouse. Community support activities are centered in the work unit structure of the Clubhouse and include outreach, entitlements, housing, advocacy, promoting wellness, as well as assistance in finding quality medical, psychological, pharmacological and substance use disorder treatment services in the community. The Clubhouse has an advisory board that meets regularly to provide support. Advisory board composition includes individuals from the local community who are able to assist with connections and/or advice in areas such as employment, education, legal assistance, finances, and advocacy. The board also includes member leaders. The Clubhouse must engage with the local community. Activities may include speaking engagements, connections with media outlets, awareness-raising, political advocacy, community service projects, open houses, participating with the statewide Clubhouse coalition, and relevant conferences. The Clubhouse ensures that access to the building, Clubhouse-sponsored community activities, and employment sites are available through public transportation or other alternative modes of transportation. The Clubhouse provides or arranges for effective alternatives whenever access to public transportation is limited.

Medicaid Provider Manual

Social Supports	<ul style="list-style-type: none">• Opportunities are available for members to develop a sense of a community through planning and organizing Clubhouse social activities. This may include opportunities to explore recreational resources and activities in the community. The interests and desires of the membership determine both spontaneous and planned activities.▪ Members may have access to the Clubhouse programming during times other than the work-ordered day, including evenings, weekends, and holidays (New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day). Access during these times should be based on the needs of the Clubhouse community and decided by members and staff.
Wellness Supports	<ul style="list-style-type: none">▪ The Clubhouse supports and encourages physical wellness. This may include enhanced nutrition, weight loss, exercise, smoking cessation, and promoting wellness throughout the Clubhouse. Wellness opportunities occur both within the Clubhouse and through connections with community resources.▪ The voluntary nature of the Clubhouse is respected for all wellness activities. Wellness programming should enhance the Clubhouse work-ordered day rather than detract from it.
Community Setting	<ul style="list-style-type: none">▪ The program is designed as an intentional community, rather than a clinical setting. The Clubhouse does not include clinical personnel such as psychiatrists, nurses, or therapists, nor does it include classes or groups that are of a clinical nature.▪ The Clubhouse is located in its own physical space. It is separate from any mental health center or institutional settings and is impermeable to other programs. The Clubhouse is designed to facilitate the work-ordered day and at the same time be attractive, adequate in size, and convey a sense of respect and dignity.▪ To promote pride and ownership, the Clubhouse has its own identity, including its own name, mailing address, fax, e-mail, and telephone number.▪ All Clubhouse space is member and staff accessible. There are no staff-only or members-only spaces.▪ There are no staff-only or members-only meetings where program decisions are made.

5.4 CORE PSYCHIATRIC REHABILITATION COMPONENTS

The Clubhouse model is not limited to a narrow set of components. A broad contextual perspective is present throughout the Model.

Broad Context	<ul style="list-style-type: none">▪ The Clubhouse model is embedded in the overarching goals of psychiatric rehabilitation. The aims and objectives of Clubhouse communities are to support the access to preferred living, learning, working, and socialization roles for members in their communities.▪ Outcomes that move beyond the clinical condition and facilitate the recovery process from mental illness are more relevant, such as social role functioning (e.g., meaningful roles in society; social inclusion), establishing relationships, social support networks and social capital, work, recreation, and improved quality of life.
----------------------	---

Medicaid Provider Manual

Personal Goal Development	<p>Each Clubhouse member has goals based on their Individual Plan of Service (IPS) developed through the Person-Centered planning process and carried out throughout the member's participation in the Clubhouse. Staff may also work informally with members on individual recovery goals while working side-by-side in the Clubhouse.</p>
Psychiatric Rehabilitation Components, Goals and Objectives	<p>Clubhouse environments support recovery in a variety of ways. Generally, expected outcomes associated with accredited Clubhouse participation include greater personal and interpersonal competencies, links with community resources, access to social support networks, increased illness and symptom management, vocational and educational competencies and opportunities, and overall increased personal independence and psychosocial functioning.</p> <ul style="list-style-type: none"> • Competency Building <p>Community living competencies (e.g., self-care, cooking, money management, personal grooming, maintenance of living environment) are built and include:</p> <ul style="list-style-type: none"> ➤ Social and interpersonal competencies (e.g., conversational competency, developing and/or maintaining positive self-image, interpersonal problem-solving, regaining the ability to evaluate the motivation and feelings of others to establish and maintain positive relationships). ➤ Personal adjustment competencies (e.g., developing and enhancing intrapersonal abilities and problem-solving in everyday experiences, resolving crises, or managing stress with the goal of facilitating self-efficacy and personal independence). ➤ Vocational competencies (e.g., focused tasks that teach how to apply for jobs, conduct employment interviews, provide opportunities of graded steps to promote job entry or reentry, improve co-worker communication and relationships, and task focus and completion). ➤ Cognitive competency (e.g., task-oriented activities to develop and maintain cognitive abilities, maximize independent functioning such as increased attention, improved concentration, better memory, and enhanced empathy). • Community Support, Inclusion, and Participation <p>Identification of support, inclusion and participation through existing natural supports is necessary to:</p> <ul style="list-style-type: none"> ➤ Achieve optimal levels of community membership. ➤ Increase satisfaction with living environment. ➤ Support community participation and integration/inclusion. ➤ Reduce stigma through education, community awareness, and community networking. ➤ Facilitate social capital via peer and social networks, both internal and external to Clubhouse. ➤ Promote utilization of organizational support, community resources, and other collateral support systems, as well as linking with community resources, supports, and services for continuity of care.

Medicaid Provider Manual

	<ul style="list-style-type: none">▪ Illness Management and Recovery The identification and management of situations and prodromal symptoms to reduce the frequency, duration, and severity of psychiatric relapses include the following:<ul style="list-style-type: none">➢ Gaining competence regarding how to respond to and manage a psychiatric crisis (includes working in partnership with members who express desire to develop a recovery plan and incorporate natural supports in crisis planning).➢ Gaining competence in understanding the role psychotropic medication plays in the stabilization of the members' well-being or recovery.➢ Working in partnership to increase confidence and personal self-efficacy through Clubhouse participation.➢ Gaining access to holistic approaches to recovery that includes education, information and support for health and personal wellness.➢ Gaining access to information to support decision making and increased empowerment through Clubhouse participation.• Recovery Enhancing Environment An environment that fosters strength and resilience and practices the inclusion of the following:<ul style="list-style-type: none">➢ Is collaborative and non-hierarchical;➢ Supports work and high levels of activity;➢ Respects choice and control; and➢ Provides access to social and peer support.
--	---

5.5 DOCUMENTATION

Documentation of members' progress in the Clubhouse modality differs from documentation requirements in individual treatment modalities and is demonstrated in the following process.

- Recovery progress can be documented in a variety of ways and, at a minimum, should be documented on at least a monthly basis.
- The documentation process, regardless of the established frequency or process, should be streamlined to minimally disrupt the work-ordered day.
- Progress note processing should be integrated into unit work.
- Members have the opportunity to write their own progress notes.
- Generally, all notes should be signed by both members and staff.

5.6 ELIGIBILITY

Clubhouse services are intended for beneficiaries with a primary diagnosis of serious mental illness. Clubhouse is not an appropriate service for beneficiaries with a primary intellectual/developmental disability.

Medicaid Provider Manual

Clubhouse services are not appropriate for beneficiaries who exhibit:

- Behaviors that would threaten or pose a current health and safety risk to themselves or others.
- A severity of symptoms requiring a more intensive level of treatment.
- Behaviors that disrupt the daily work of the Clubhouse.
- Behaviors that require excessive redirection and/or monitoring.

The Clubhouse director has the responsibility to ensure the safety of the Clubhouse.

All changes to a member's service provision must follow due process and all policies and procedures at local, state, and federal levels.

Discharge criteria are only met if the member moves on voluntarily or if one or more of the above criteria are met. Cessation or control of symptoms alone is not sufficient criteria for discharge from the Clubhouse.

5.7 STAFF CAPACITY

Clubhouse staff effectively facilitate the program with direct, inclusive and collegial member involvement. Sufficient staffing ratios allow for employment development, Transitional Employment management/coverage, supported education, and consistent engagement of the membership throughout the work-ordered day.

Clubhouse staff shall include:

- One full-time on-site Clubhouse director who has a minimum of:
 - A bachelor's degree in a health or human services field and is licensed, certified or registered by the State of Michigan or a national organization to provide health care services, with two years' experience working at a Clubhouse accredited by Clubhouse International; or
 - A master's degree in a health or human services field with appropriate licensure and one year experience working at a Clubhouse.
- Other diverse and uniquely qualified professional staff, typically with a bachelor's education level. If staff are not licensed, certified or registered by the State of Michigan or a national organization to provide health care services, they shall operate under a qualified professional.

All Clubhouse staff function as generalists sharing Clubhouse duties such as employment, social recreation, evening, weekend, and holiday coverage. All Clubhouse generalist staff should be paid at a level commensurate with like staff at the auspice agency. The Clubhouse director is responsible for all aspects of Clubhouse operations. Members are actively involved in the hiring process for both directors and generalists. Exceptions may be requested to the above staffing requirements and/or qualifications and must be submitted in writing to MDHHS for review and potential approval.

Medicaid Provider Manual

5.8 TRAINING REQUIREMENTS

All Clubhouse staff must have a basic knowledge of the Clubhouse Model acquired through MDHHS approved Clubhouse-specific training within six months of hire, and then at least one MDHHS-approved Clubhouse specific training annually. In addition, as part of the accreditation process, the Clubhouse director, members, staff and other appropriate persons participate in a comprehensive training program in the Clubhouse Model at an accredited training base. This team will also schedule a six-month follow-up site visit with the Training Base Clubhouse.

- This training requires the development of an action plan for developing the Clubhouse; and upon returning from training, all Clubhouses will submit their action plan to MDHHS.
- Exceptions may be requested to the above training requirements and must be submitted in writing to MDHHS for review and potential approval.

SECTION 6 – CRISIS RESIDENTIAL SERVICES

Crisis residential services are intended to provide a short-term alternative to inpatient psychiatric services for beneficiaries experiencing an acute psychiatric crisis when clinically indicated. Services may only be used to avert an inpatient psychiatric admission, or to shorten the length of an inpatient stay.

6.1 POPULATION

Services are designed for a subset of beneficiaries who meet psychiatric inpatient admission criteria or are at risk of admission, but who can be appropriately served in settings less intensive than a hospital. The goal of crisis residential services is to facilitate reduction in the intensity of those factors that lead to crisis residential admission through a person-centered/Family Driven, Youth-Guided, and recovery/resiliency-oriented approach.

6.2 COVERED SERVICES

Services must be designed to resolve the immediate crisis and improve the functioning level of the beneficiaries to allow them to return to less intensive community living as soon as possible.

The covered crisis residential services include:

- Psychiatric supervision;
- Therapeutic support services;
- Medication management/stabilization and education;
- Behavioral services;
- Milieu therapy; and
- Nursing services.

Individuals who are admitted to the crisis residential services must be offered the opportunity to explore and learn more about crises, substance abuse, identity, values, choices and choice-making, recovery and recovery planning. Recovery and recovery planning is inclusive of all aspects of life including relationships, where to live, training, employment, daily activities, and physical well-being.

6.2.A. CHILD CRISIS RESIDENTIAL SERVICES

Child Crisis Residential Services may not be provided to children with serious emotional disturbances in a Child Caring Institution (CCI) unless it is licensed as a "children's therapeutic group home" as defined in Section 722.111 Sec. 1(f) under Act No. 116 of the Public Acts of 1973, as amended. The program must include on-site nursing services (RN or LPN under appropriate supervision). On-site nursing must be provided at least one hour per day, per resident, seven days per week, with 24-hour availability on-call.

Medicaid Provider Manual

6.2.B. ADULT CRISIS RESIDENTIAL SERVICES

The program must include on-site nursing services (RN or LPN under appropriate supervision).

- For settings of six beds or fewer: on-site nursing must be provided at least one hour per day, per resident, seven days per week, with 24-hour availability on-call.
- For 7-16 beds: on-site nursing must be provided eight hours per day, seven days per week, with 24-hour availability on-call.

6.3 PROVIDER CRITERIA

The PIHP must seek and maintain MDHHS approval through a certification process for the crisis residential program in order to use Medicaid funds for program services.

6.4 QUALIFIED STAFF

Treatment services must be clinically-supervised by a psychiatrist. A psychiatrist need not be present when services are delivered but must be available by telephone at all times. The psychiatrist shall provide psychiatric evaluation or assessments at the crisis residential home or at an appropriate location in the community. A psychiatric evaluation completed by a treating psychiatrist that resulted in the admission to the program fulfills this requirement as long as the program psychiatrist has consulted with that physician as part of the admission process. Medication reviews performed at the crisis residential home must be performed by appropriately licensed medical personnel acting within their scope of practice and under the clinical supervision of the psychiatrist. The covered crisis residential services (refer to Covered Services subsection) must be supervised on-site eight hours a day, Monday through Friday (and on call at all other times), by a mental health professional possessing at least a master's degree in human services and one year of experience providing services to beneficiaries with serious mental illness, or a bachelor's degree in human services and at least two years of experience providing services to beneficiaries with serious mental illness.

Treatment activities may be carried out by paraprofessional staff who have at least one year of satisfactory work experience providing services to beneficiaries with mental illness, or who have successfully completed a PIHP/MDHHS-approved training program for working with beneficiaries with mental illness.

Peer support specialists may be part of the multidisciplinary team and can facilitate some of the activities based on their scope of practice, such as facilitating peer support groups, assisting in transitioning individuals to less intensive services, and by mentoring towards recovery.

6.5 LOCATION OF SERVICES

Services must be provided to beneficiaries in licensed crisis residential foster care or group home settings not exceeding 16 beds in size. Homes/settings must have appropriate licensure from the state and must be approved by MDHHS to provide specialized crisis residential services. Services must not be provided in a hospital or other institutional setting.

Medicaid Provider Manual

6.6 ADMISSION CRITERIA

Crisis residential services may be provided to adults or children who are assessed by, and admitted through, the authority of the local PIHP. Beneficiaries must meet psychiatric inpatient admission criteria but have symptoms and risk levels that permit them to be treated in such alternative settings. Services are designed for beneficiaries with mental illness or beneficiaries with mental illness and another concomitant disorder, such as substance abuse or developmental disabilities. For beneficiaries with a concomitant disorder, the primary reason for service must be mental illness.

6.7 DURATION OF SERVICES

Services may be provided for a period up to 14 calendar days per crisis residential episode. Services may be extended and regularly monitored, if justified by clinical need, as determined by the interdisciplinary team.

6.8 INDIVIDUAL PLAN OF SERVICE

Services must be delivered according to an individual plan based on an assessment of immediate need. The plan must be developed within 48 hours of admission and signed by the beneficiary (if possible), the parent or guardian, the psychiatrist, and any other professionals involved in treatment planning, as determined by the needs of the beneficiary. If the beneficiary has an assigned case manager, the case manager must be involved in the treatment as soon as possible, and must also be involved in follow-up services.

The plan must contain:

- Clearly stated goals and measurable objectives, derived from the assessment of immediate need, stated in terms of specific observable changes in behavior, skills, attitudes, or circumstances, structured to resolve the crisis.
- Identification of the activities designed to assist the beneficiary to attain their goals and objectives.
- Discharge plans, the need for aftercare/follow-up services, and the role of, and identification of, the case manager.

If the length of stay in the crisis residential program exceeds 14 days, an interdisciplinary team must develop a subsequent plan based on comprehensive assessments. The team is comprised of the beneficiary, the parent or guardian, the psychiatrist, the case manager and other professionals whose disciplines are relevant to the needs of the beneficiary, including the individual ACT team, outpatient services provider or home-based services staff, when applicable. If the beneficiary did not have a case manager prior to initiation of the intensive crisis residential service, and the crisis episode exceeds 14 days, a case manager must be assigned and involved in treatment and follow-up care. (The case manager may be assigned prior to the 14 days, according to need.)

For children's intensive crisis residential services, the plan must also address the child's needs in context with the family's needs. Educational services must also be considered and the plan must be developed in consultation with the child's school district staff.

SECTION 7 – HOME-BASED SERVICES

Mental health home-based services programs are designed to provide intensive services to children and their families with multiple service needs who require access to an array of mental health services. The primary goals of these programs are to support families in meeting their child's developmental needs, to support and preserve families, to reunite families who have been separated, and to provide effective treatment and community supports to address risks that may increase the likelihood of a child being placed outside the home. Treatment is based on the child's needs, with the focus on the family unit. The service style must support a family-driven and youth-guided approach, emphasizing strength-based, culturally relevant interventions, parent/youth and professional teamwork, and connection with community resources and supports.

NOTE: This service is a State Plan EPSDT service when delivered to children under 21 years of age.

7.1 PROGRAM APPROVAL

Applications for certification must identify home-based providers, either internal or contractual, who will serve children under 21 years of age. Home-based services can be provided by one or more providers who serve one or more age groups. Once certified, a program must certify every three years. (Refer to the Directory Appendix for contact information.) MDHHS approval will be based on adherence to the requirements outlined below.

Applications for certification must identify the target population to be served by the program. Providers must assure that staff providing home-based services meet the required qualifications. Information submitted to MDHHS must include basic program information submitted in a format prescribed by MDHHS. If necessary during an initial period, the provider may receive provisional approval that will allow them to provide services. However, any necessary additional actions must be completed within the timeframe specified by MDHHS or provisional approval will be withdrawn.

Medicaid Provider Manual

Organizational Structure	<p>The organizational structure through which the mental health home-based services program shall be delivered must be specified. The following requirements must be met:</p> <ul style="list-style-type: none">▪ Enrolled home-based services providers are available and sufficient to ensure that home-based services are provided to children beginning prenatally to age 17 and meet the need across the entire catchment area.▪ Responsibility for directing, coordinating, and supervising the staff/program must be assigned to a specific staff position. The supervisor of the staff/program must meet the qualifications of a Qualified Mental Health Professional and be a child mental health professional with three years of clinical experience.▪ One staff member or a team of staff may provide these services. Home-based services programs are designed to provide intensive services to children and families in their home and community. The degree of intensity will vary to meet the needs of families.▪ The maximum full-time home-based services worker-to-family ratio is 1:12. This can be adjusted to accommodate families transitioning out of home-based services. The maximum worker-to-family ratio in those circumstances is 1:15 (12 active/3 transitioning).▪ If providers wish to utilize clinicians who have more than one role in the agency (home-based services plus other services, e.g., outpatient, case management, etc.), the percentage of each position dedicated to home-based services must be specified. The number of home-based services families assigned to each partial position cannot exceed the same percentage of the maximum active home-based services families. For example, a 50% home-based position could serve no more than 6 home-based families. The total maximum number of families, including home-based and other services families, for a full-time clinician with multiple roles is 20 families.▪ To determine the appropriate number of families for any home-based services worker, the intensity of service need presented by each family should be considered. The worker-to-family ratio can always be lower than the maximum to accommodate families with very high service needs.▪ Home-based services staff must receive weekly clinical supervision (one-on-one and/or group) to help them navigate the intense needs of the families receiving home-based services. Evidence of the provision of this clinical supervision must be recorded via supervision logs, sign-in sheets, or other methods of documentation.▪ The organization must have a policy or policies in place that support providing a comprehensive crisis/safety training curriculum that is required for all home-based services staff that includes de-escalation skills among other relevant trainings.▪ There must be an internal mechanism for coordinating and integrating the home-based services with other mental health services, as well as general community services relevant to the needs of the child and family.
---------------------------------	---

Medicaid Provider Manual

Qualified Staff	<p>Properly credentialed staff must deliver home-based services. Home-based services professional staff must meet the qualifications of a child mental health professional. The initial training curriculum and 24 hours of annual child-specific training for home-based services staff should be relevant to the age groups served and the needs of the children and families receiving home-based services. For home-based services programs serving infants/toddlers (birth through age three) and their families, staff must be trained in infant mental health interventions and must minimally have Endorsement as Infant Family Specialist by the Michigan Association of Infant Mental Health; Infant Mental Health Specialist is preferred. For home-based services programs serving children with developmental disabilities, the child mental health professional must meet the qualifications, as defined above, and also be a Qualified Intellectual Disability Professional (QIDP).</p> <p>Trained paraprofessional assistants may assist home-based services professional staff with implementation of treatment plan behavioral goals related to positive skill development and development of age-appropriate social behaviors. Services to be provided by the home-based services assistant must be identified in the family plan of service, must relate to identified treatment goals, and must be under the supervision of relevant professionals. Home-based services assistants must be trained regarding the beneficiary's treatment plan and goals, including appropriate intervention and implementation strategies, prior to beginning work with the beneficiary and family. Activities of home-based services assistants do not count as part of the minimum four hours of face-to-face home-based services provided by the primary home-based services worker per month. The home-based services assistant's face-to-face time would be in addition to hours provided by the primary home-based services worker.</p>
Plan of Service	<p>Home-based services must be provided in accordance with a plan of service that focuses on the child and their family. The plan of service is a comprehensive plan that identifies child and family strengths and individual needs, determines appropriate interventions, and identifies supports and resources. It is developed in partnership with family members and other agencies through an equitable person-centered, family-driven and youth-guided planning process. The plan of service should include evidence of a blending of perspectives and information from the child/youth, family, home-based services worker, assessment tools, and other relevant parties. Goals should be based on family needs and priorities and reflect the family culture and voice. Refer to the Family-Driven and Youth-Guided Policy and Practice Guideline (attached to the MDHHS/PIHP contract) for more explicit information on this topic.</p> <p>The plan of service for youth receiving home-based services must also include individualized crisis and safety plans that explicitly outline responses to family-specific crisis situations and safety risks and delineate who, including the family and others, is accountable for the various responses identified.</p>

Medicaid Provider Manual

Amount and Scope of Service	<p>Home-based services programs combine services to restore or enhance social, psychological, or biophysical functioning and promote resilience and optimal mental health of individuals, couples, or families and/or individual therapy, family therapy, group therapy, crisis intervention, case management, and collateral contacts. The family is defined as immediate or extended family or individual(s) acting in the role of family.</p> <p>Services provided in a home-based services program range from assisting beneficiaries to link to other resources that might provide food, housing, and medical care, as well as providing more therapeutic interventions such as family therapy or individual therapy, or services to restore or enhance functioning and promote resilience and optimal mental health for individuals, couples, or families.</p> <p>A minimum of four hours of individual and/or family face-to-face home-based services per month will be provided by the primary home-based services worker or, if appropriate, the evidence-based practice therapist. In addition, it is expected that adequate collateral contacts, including non-face-to-face collateral contacts, with school, caregivers, child welfare, court, psychiatrist, etc., will be provided to implement the plan of service.</p> <p>The amount and scope of home-based services to families as they transition out of home-based services into a less intensive service or to closure can be determined by family-driven and youth-guided decision making to maintain continuity of treatment and ensure stability. Variation from the required intensity of services for families transitioning out of home-based services must be documented in the plan of service. This transition period is not to exceed three months.</p> <p>Crisis intervention services must be available 24 hours a day, 7 days a week, via availability of home-based services staff or agency on-call staff. If after-hours crisis intervention services are provided to a family by staff other than the primary home-based services worker, procedures must be in place which provide the on-call staff access to information about any impending crisis situations and the family's crisis and safety plans.</p>
Location of Service	<p>Services are provided in the family home or community. Any contacts that occur other than in the home or community must be clearly explained in record documentation as to the reason, the expected duration, and the plan to address issues that are preventing the services from being provided in the home or community.</p>

7.2 ELIGIBILITY CRITERIA

The criteria for home-based services are described below for children birth through age three, children age four through age six, and children age seven through age seventeen. These criteria do not preclude the provision of home-based services to an adult beneficiary prenatally or who is a parent for whom it is determined home-based services would be the treatment modality that would best meet the needs of the adult beneficiary and the child. This would include a parent who has a diagnosis within the current version of the Diagnostic and Statistical Manual of Mental Disorders (DSM) or International Classification of Diseases (ICD) that results in a care-giving environment that places the child at-risk for serious emotional disturbance. These criteria do not preclude the provision of home-based services when it is determined through a person-centered, family-driven and youth-guided planning process that these services are necessary to meet the needs of the child and family. For continuing eligibility reviews during the transition to less intensive services, the child and family may be maintained in home-based services, even if they do not meet these criteria. Variation from the required criteria for families transitioning out

Medicaid Provider Manual

of home-based services must be documented in the plan of service. This transition period is not to exceed three months.

7.2.A. PRENATAL/BIRTH THROUGH AGE THREE

Unique criteria must be applied to define serious emotional disturbance for the prenatal/birth through age three population, given:

- The magnitude and speed of developmental changes through pregnancy and infancy;
- The limited capacity of the very young to symptomatically present underlying disturbances;
- The extreme dependence of infants and toddlers upon caregivers for their survival and well-being; and
- The exceptional vulnerability of the very young to other relationship and environmental factors.

Operationally, the above parameters dictate that the mental health professional must be cognizant of the primary indicators of emotional disorder in very young children, and of the importance of assessing the constitutional/physiological and/or care-giving/ environmental factors which reinforce the severity and intractability of the child's disorder. Furthermore, the rapid development of very young children results in transitory disorders and/or symptoms, requiring the professional to regularly re-assess children in the appropriate developmental context.

Refer to the MichiCANS section, Respite Care subsection, for additional information.

7.2.B. AGE FOUR THROUGH FIVE

Decisions regarding whether a child age four through five has a serious emotional disturbance and in need of home-based services and supports utilize similar dimensions to older children. The dimensions include a diagnosable behavioral or emotional disorder, substantial functional impairment/limitation of major life activities, and duration of condition. However, as with younger children birth through age three, assessment must be sensitive to the critical indicators of development and functional impairment for the age group. Significant impairments in functioning are revealed across life domains in the child's expression of affect/self-regulation, social development (generalization of attachment beyond parents, capacity for peer relationships and play, etc.), physical and cognitive development, and the emergence of a sense of self. All of the dimensions must be considered when determining if a child is eligible for home-based services.

Refer to the MichiCANS section, Home Based Services subsection, for additional information.

7.2.C. AGE 6 THROUGH 20

Decisions regarding whether a child or adolescent has a serious emotional disturbance and is in need of home-based services is determined by using the following dimensions: the child has a diagnosable behavioral or emotional disorder, substantial functional

Medicaid Provider Manual

impairment/limitation of major life activities, and duration of the condition. For children age 6 through 20 (day prior to 21), the MichiCANS is used to make determinations within the functional impairment dimension. All of the dimensions, as well as family voice and choice, must be considered when determining if a child is eligible for home-based services.

Refer to the MichiCANS section, Home Based Services subsection, for additional information.

SECTION 8 – INPATIENT PSYCHIATRIC HOSPITAL ADMISSIONS

The PIHP is responsible to manage and pay for Medicaid mental health services in community-based psychiatric inpatient units for all Medicaid beneficiaries who reside within the service area covered by the PIHP. This means that the PIHP is responsible for timely screening and authorization/certification of requests for admission, notice and provision of several opinions, and continuing stay for inpatient services, defined as follows:

- **Screening** means the PIHP has been notified of the beneficiary and has been provided enough information to make a determination of the most appropriate services. The screening may be provided on-site, face-to-face by PIHP personnel, or over the telephone.
- **Authorization/certification** means that the PIHP has screened the beneficiary and has approved the services requested. Telephone screening must be followed-up by the written certification.

PIHP responsibilities include:

- Pre-admission screening to determine whether alternative services are appropriate and available. Severity of Illness and Intensity of Service clinical criteria will be used for such pre-screening. Inpatient pre-screening services must be available 24-hours-a-day, seven-days-a-week.
- Provision of notice regarding rights to a second opinion in the case of denials.
- Coordination with substance abuse treatment providers, when appropriate.
- Provision of, or referral to and linkage with, alternative services, when appropriate.
- Communication with the treating and/or referring provider.
- Communication with the primary care physician or health plan.
- Planning in conjunction with hospital personnel for the beneficiary's after-care services.

In most instances, the beneficiary will receive services in a community-based psychiatric unit in the PIHP service area where they reside. There may be instances when a PIHP is responsible for a resident that they have placed into a community program in another county or state. In these cases, the responsible PIHP, i.e., the one managing the case, is responsible for authorizing admission and/or continuing stay.

If a beneficiary experiences psychiatric crisis in another county, the PIHP in that county should provide crisis intervention/services as needed and contact the PIHP for the county of the beneficiary's residence for disposition.

8.1 ADMISSIONS

The PIHPs will make authorization and approval decisions for these services according to Level of Care guidelines established by MDHHS and appearing in this section. All admission and continuing stay responsibilities and procedures must be conducted in accordance with the terms of the contract between the hospital and the PIHP.

Medicaid Provider Manual

Emergency Room Services	<p>When necessary, the beneficiary may seek services through the emergency room. Disposition of the psychiatric emergency will be the responsibility of the PIHP and may result in:</p> <ul style="list-style-type: none">▪ Inpatient admission;▪ Referral to an alternative service when appropriate and available; or▪ Disposition of the crisis through provision of immediate services/interventions, with follow-up as necessary. <p>The PIHP is involved in the psychiatric aspect of the emergency situation. Any medical treatment needed by the beneficiary is beyond the general purview of the PIHP.</p>
Admissions to In-State Out-of-Area Hospitals	<p>Medicaid beneficiaries may seek inpatient psychiatric services from hospitals located outside their county of residence/PIHP catchment area. If the out-of-area hospital has a contract with the beneficiary's county/catchment area PIHP, the hospital should contact that PIHP to obtain the required pre-admission authorization/approval for the beneficiary. If the out-of-area hospital does not have a contract with the beneficiary's designated county/catchment area PIHP, the hospital must contact the PIHP that serves the county in which the hospital is located to obtain pre-admission approval/authorization. The hospital-area PIHP will conduct the pre-admission review and will consult with the designated county/catchment area PIHP to determine the appropriate disposition of the request for admission authorization/approval. Payment responsibility for authorized days of care will rest with the PIHP that authorized the services.</p>
Admission to Out-of-State Non-Borderland Inpatient Psychiatric Hospitals	<p>The PIHP for the beneficiary's county of residency must prior authorize the admission for psychiatric inpatient care as medically necessary, as with in-state hospitals. The PIHP is responsible for continued stay reviews and payment to these hospitals.</p>

8.2 APPEALS

PIHPs will make authorization and approval decisions for services according to Level of Care guidelines. If the hospital disagrees with the decision of the PIHP, regarding either admission authorization/approval or the number of authorized days of care, the hospital may appeal to the PIHP according to the terms of its contract with the PIHP. If the hospital does not have a contract or agreement with the PIHP, any appeals by the hospital will be conducted through the usual and customary procedures that the PIHP employs in its contracts with other enrolled hospital providers.

If a beneficiary or their legal representative disagrees with a PIHP decision related to admission authorization/approval or approved days of care, they may request a reconsideration and second opinion from the PIHP. If the PIHP's initial decision is upheld, the beneficiary has further redress through the Medicaid fair hearing process. Medicaid beneficiaries can request the Medicaid fair hearing without going through local review processes.

8.3 BENEFICIARIES WHO DO NOT HAVE MEDICAID ELIGIBILITY UPON ADMISSION

For beneficiaries whose enrollment in Medicaid is determined after the end of an episode of inpatient psychiatric or partial hospitalization care (eligibility extends back and encompasses the dates of the episode of care), the PIHP will conduct a retrospective review of the episode of care to determine if services were medically necessary and appropriate for Medicaid reimbursement, unless the PIHP has

Medicaid Provider Manual

previously reviewed and certified the admission and authorized days of care under other contractual and payment arrangements with the hospital. If the PIHP has conducted the pre-admission authorization and continuing stay reviews for these beneficiaries during the episode of care, this will be considered as a certification that authorized services are eligible for reimbursement by the PIHP under the Medicaid program once the beneficiary's retroactive Medicaid eligibility has been established.

As noted above, the purpose of a retrospective review is to determine if services rendered were medically necessary and hence qualify for Medicaid reimbursement. Since the hospital will not receive reimbursement for any care rendered which does not meet the test of medical necessity, it is advantageous for hospitals to involve PIHPs during the episode of care for any beneficiary that the facility believes may be eligible for Medicaid.

8.4 MEDICARE

For Medicare-covered services, the PIHP may only pay up to a Medicare-enrolled beneficiary's obligation to pay (i.e., coinsurance and deductibles). (Refer to the Coordination of Benefits Chapter in this manual for more information.)

8.5 ELIGIBILITY CRITERIA

8.5.A. INPATIENT PSYCHIATRIC AND PARTIAL HOSPITALIZATION SERVICES

Medicaid requires that hospitals providing inpatient psychiatric services or partial hospitalization services obtain authorization and certification of the need for admission and continuing stay from PIHPs. A PIHP reviewer determines authorization and certification by applying criteria outlined in this document. The hospital or attending physician may request a reconsideration of adverse authorization/certification determinations made by the initial PIHP reviewer.

The criteria described below employ the concepts of Severity of Illness (SI) and Intensity of Service (IS) to assist reviewers in determinations regarding whether a particular care setting or service intensity is appropriately matched to the beneficiary's current condition.

- Severity of Illness (SI) refers to the nature and severity of the signs, symptoms, functional impairments and risk potential related to the beneficiary's psychiatric disorder.
- Intensity of Service (IS) refers to the setting of care, to the types and frequency of needed services and supports, and to the degree of restrictiveness necessary to safely and effectively treat the beneficiary.

Medicaid coverage for inpatient psychiatric services is limited to beneficiaries with a current primary psychiatric diagnosis, as described in the criteria below. It is recognized that some beneficiaries will have other conditions or disorders (e.g., developmental disabilities or substance abuse) that coexist with a psychiatric disturbance. In regard to developmental disabilities, if a person with developmental disabilities presents with signs or symptoms of a significant, serious, concomitant mental illness, the mental illness will take precedence for purposes of care and placement decisions, and the beneficiary may be authorized/certified for inpatient psychiatric care under these guidelines.

Medicaid Provider Manual

For beneficiaries who present with psychiatric symptoms associated with current active substance abuse, it may be difficult to determine whether symptoms exhibited are due to a primary mental illness or represent a substance-induced disorder, and to make an informed level of care placement decision. A beneficiary exhibiting a psychiatric disturbance in the context of current active substance use or intoxication may require acute detoxification services before an accurate assessment of the need for psychiatric inpatient services can be made. In these situations, the hospital and the PIHP must confer to determine the appropriate location (acute medical setting or psychiatric unit) for the detoxification services.

The crucial consideration in initial placement decisions for a beneficiary with psychiatric symptoms associated with current active substance abuse is whether the beneficiary's immediate treatment needs are primarily medical or psychiatric. If the beneficiary's primary need is medical (e.g., life-threatening substance-induced toxic conditions requiring acute medical care and detoxification), then detoxification in an acute medical setting (presuming the beneficiary's condition meets previously published acute care detoxification criteria) is indicated. If the beneficiary's primary need is psychiatric care (the person meets the SI/IS criteria for inpatient psychiatric care), they should be admitted to the psychiatric unit and acute medical detoxification provided in that setting.

Hospitals are reminded that they must obtain PIHP admission authorization and certification for all admissions to a distinct part psychiatric unit or freestanding psychiatric hospital.

8.5.B. INPATIENT ADMISSION CRITERIA: ADULTS

Inpatient psychiatric care may be used to treat a person with mental illness who requires care in a 24-hour medically structured and supervised facility. The SI/IS criteria for admission are based upon the assumption that the beneficiary is displaying signs and symptoms of a serious psychiatric disorder, demonstrating functional impairments, and manifesting a level of clinical instability (risk) that, either individually or collectively, are of such severity that treatment in an alternative setting would be unsafe or ineffective.

Medicaid coverage is dependent upon active treatment being provided at the medically necessary level of care.

The individual must meet all three criteria outlined in the following table:

Diagnosis	The beneficiary must be suffering from a mental illness reflected in a primary, validated, current version of DSM or ICD diagnosis (not including ICD-9 V-codes and ICD-10 Z-codes).
Severity of Illness (signs, symptoms, functional impairments and risk potential)	At least one of the following manifestations is present: <ul style="list-style-type: none">Severe Psychiatric Signs and Symptoms<ul style="list-style-type: none">Psychiatric symptoms - features of intense cognitive/perceptual/affective disturbance (hallucinations, delusions, extreme agitation, profound depression) severe enough to cause seriously disordered and/or bizarre behavior (e.g., catatonia, mania, incoherence) or prominent psychomotor

Medicaid Provider Manual

	<p>retardation, resulting in extensive interference with activities of daily living, so that the person cannot function at a lower level of care.</p> <ul style="list-style-type: none">➤ Disorientation, seriously impaired reality testing, defective judgment, impulse control problems and/or memory impairment severe enough to endanger the welfare of the person and/or others.➤ A severe, life-threatening psychiatric syndrome or an atypical or unusually complex psychiatric condition exists that has failed, or is deemed unlikely, to respond to less intensive levels of care, and has resulted in substantial current dysfunction. <ul style="list-style-type: none">▪ Disruptions of Self-Care and Independent Functioning<ul style="list-style-type: none">➤ The person is unable to attend to basic self-care tasks and/or to maintain adequate nutrition, shelter, or other essentials of daily living due to psychiatric disorder.➤ There is evidence of serious disabling impairment in interpersonal functioning (e.g., withdrawal from relationships; repeated conflictual interactions with family, employer, co-workers, neighbors) and/or extreme deterioration in the person's ability to meet current educational/occupational role performance expectations.▪ Harm to Self<ul style="list-style-type: none">➤ Suicide: Attempt or ideation is considered serious by the intention, degree of lethality, extent of hopelessness, degree of impulsivity, level of impairment (current intoxication, judgment, psychological symptoms), history of prior attempts, and/or existence of a workable plan.➤ Self-Mutilation and/or Reckless Endangerment: There is evidence of current behavior, or recent history. There is a verbalized threat of a need or willingness to self-mutilate, or to become involved in other high-risk behaviors; and intent, impulsivity, plan and judgment would suggest an inability to maintain control over these ideations.➤ Other Self-Injurious Activity: The person has a recent history of drug ingestion with a strong suspicion of overdose. The person may not need detoxification but could require treatment of a substance-induced psychiatric disorder.▪ Harm to Others<ul style="list-style-type: none">➤ Serious assaultive behavior has occurred, and there is a risk of escalation or repetition of this behavior in the near future.➤ There is expressed intention to harm others and a plan and/or means to carry it out, and the level of impulse control is non-existent or impaired (due to psychotic symptoms, especially command or verbal hallucinations, intoxication, judgment, or psychological symptoms, such as persecutory delusions and paranoid ideation).▪ Drug/Medication Complications or Coexisting General Medical Condition Requiring Care<ul style="list-style-type: none">➤ There has been significant destructive behavior toward property that endangers others.
--	---

Medicaid Provider Manual

	<ul style="list-style-type: none">➤ The person has experienced severe side effects from using therapeutic psychotropic medications.➤ The person has a known history of psychiatric disorder that requires psychotropic medication for stabilization of the condition, and the administration, adjustment or reinitiation of medications requires close and continuous observation and monitoring, and this cannot be accomplished at a lower level of care due to the beneficiary's condition or to the nature of the procedures involved.➤ There are concurrent significant physical symptoms or medical disorders which necessitate evaluation, intensive monitoring and/or treatment during medically necessary psychiatric hospitalization, and the coexisting general medical condition would complicate or interfere with treatment of the psychiatric disorder at a less intensive level of care. <p>Special Consideration: Concomitant Substance Abuse - The underlying or existing psychiatric diagnosis must be the primary cause of the beneficiary's current symptoms or represent the primary reason observation and treatment is necessary in the psychiatric unit or hospital setting.</p>
Intensity of Service	<p>The person meets the intensity of service requirements if inpatient services are considered medically necessary for the beneficiary's treatment/diagnosis, and if the person requires at least one of the following:</p> <ul style="list-style-type: none">▪ Close and continuous skilled medical observation and supervision are necessary to make significant changes in psychotropic medications.▪ Close and continuous skilled medical observation is necessary due to otherwise unmanageable side effects of psychotropic medications.▪ Continuous observation and control of behavior (e.g., isolation, restraint, closed unit, suicidal/homicidal precautions) is needed to protect the beneficiary, others, and/or property, or to contain the beneficiary so that treatment may occur.▪ A comprehensive multi-modal therapy plan is needed, requiring close medical supervision and coordination, due to its complexity and/or the severity of the beneficiary's signs and symptoms.

8.5.C. INPATIENT ADMISSION CRITERIA: CHILDREN THROUGH AGE 21

Inpatient psychiatric care may be used to treat a child or adolescent with mental illness or serious emotional disturbance who requires care in a 24-hour medically structured and supervised facility. The SI/IS criteria for admission are based on the assumption that the child, youth, or young adult is displaying signs and symptoms of a serious psychiatric disorder, demonstrating functional impairments and manifesting a level of clinical instability (risk) that are, either individually or collectively, of such severity that treatment in an alternative setting would be unsafe or ineffective.

Medicaid coverage is dependent upon active treatment being provided at the medically necessary level of care.

The individual must meet all three criteria outlined in the table below:

Medicaid Provider Manual

Diagnosis	The beneficiary must be suffering from a mental illness reflected in a primary, validated, current version of DSM or ICD diagnosis (not including ICD-9 V-codes and ICD-10 Z-codes).
Severity of Illness (signs, symptoms, functional impairments and risk potential)	<p>At least one of the following manifestations is present:</p> <ul style="list-style-type: none"> ▪ Severe Psychiatric Signs and Symptoms <ul style="list-style-type: none"> ➢ Psychiatric symptoms - features of intense cognitive/perceptual/affective disturbance (hallucinations, delusions, extreme agitation, profound depression) - severe enough to cause disordered and/or bizarre behavior (e.g., catatonia, mania, incoherence) or prominent psychomotor retardation, resulting in extensive interference with activities of daily living, so that the person cannot function at a lower level of care. ➢ Disorientation, impaired reality testing, defective judgment, impulse control problems and/or memory impairment severe enough to endanger the welfare of the person and/or others. ➢ Severe anxiety, phobic symptoms or agitation, or ruminative/obsessive behavior that has failed, or is deemed unlikely, to respond to less intensive levels of care and has resulted in substantial current dysfunction. ▪ Disruptions of Self-Care and Independent Functioning <ul style="list-style-type: none"> ➢ Beneficiary is unable to maintain adequate nutrition or self care due to a severe psychiatric disorder. ➢ The beneficiary exhibits significant inability to attend to age-appropriate responsibilities, and there has been a serious deterioration/impairment of interpersonal, familial, and/or educational functioning due to an acute psychiatric disorder or severe developmental disturbance. ▪ Harm to Self <ul style="list-style-type: none"> ➢ A suicide attempt has been made which is serious by degree of lethal intent, hopelessness, or impulsivity. ➢ There is a specific plan to harm self with clear intent and/or lethal potential. ➢ There is self-harm ideation or threats without a plan, which are considered serious due to impulsivity, current impairment or a history of prior attempts. ➢ There is current behavior or recent history of self-mutilation, severe impulsivity, significant risk-taking or other self-endangering behavior. ➢ There is a verbalized threat of a need or willingness to self-mutilate, or to become involved in other high-risk behaviors; and intent, impulsivity, plan and judgment would suggest an inability to maintain control over these ideations. ➢ There is a recent history of drug ingestion with a strong suspicion of intentional overdose. The person may not need detoxification but could require treatment of a substance-induced psychiatric disorder. ▪ Harm to Others <ul style="list-style-type: none"> ➢ Serious assaultive behavior has occurred and there is a clear risk of escalation or repetition of this behavior in the near future.

Medicaid Provider Manual

	<ul style="list-style-type: none">➤ There is expressed intention to harm others and a plan and means to carry it out; the level of impulse control is non-existent or impaired.➤ There has been significant destructive behavior toward property that endangers others, such as setting fires.➤ The person has experienced severe side effects from using therapeutic psychotropic medications. <ul style="list-style-type: none">▪ Drug/Medication Complications or Coexisting General Medical Condition Requiring Care<ul style="list-style-type: none">➤ The person has a known history of psychiatric disorder that requires psychotropic medication for stabilization of the condition, and the administration, adjustment or reinitiation of medications requires close and continuous observation and monitoring, and this cannot be accomplished at a lower level of care due to the beneficiary's condition or to the nature of the procedures involved.➤ There are concurrent significant physical symptoms or medical disorders which necessitate evaluation, intensive monitoring and/or treatment during medically necessary psychiatric hospitalization, and the coexisting general medical condition would complicate or interfere with treatment of the psychiatric disorder at a less intensive level of care. <p>Special Consideration: Concomitant Substance Abuse - The underlying psychiatric diagnosis must be the primary cause of the beneficiary's current symptoms or represents the primary reason observation and treatment are necessary in the hospital setting.</p>
Intensity of Service	<p>The person meets the intensity of service requirements if inpatient services are considered medically necessary and if the person requires at least one of the following:</p> <ul style="list-style-type: none">▪ Close and continuous skilled medical observation and supervision are necessary to make significant changes in psychotropic medications.▪ Close and continuous skilled medical observation is needed due to otherwise unmanageable side effects of psychotropic medications.▪ Continuous observation and control of behavior (e.g., isolation, restraint, closed unit, suicidal/homicidal precautions) to protect the beneficiary, others, and/or property, or to contain the beneficiary so that treatment may occur.▪ A comprehensive multi-modal therapy plan is needed, requiring close medical supervision and coordination, due to its complexity and/or the severity of the beneficiary's signs and symptoms.

8.5.D. INPATIENT PSYCHIATRIC CARE – CONTINUING STAY CRITERIA: ADULTS, ADOLESCENTS AND CHILDREN

After a beneficiary has been certified for admission to an inpatient psychiatric setting, services must be reviewed at regular intervals to assess the current status of the treatment process and to determine the continued necessity for care in an inpatient setting. Treatment within an inpatient psychiatric setting is directed at stabilization of incapacitating signs or symptoms, amelioration of severely disabling functional impairments, arrestment of potentially life-threatening self/other harm inclinations, management of adverse biologic reactions to treatment and/or regulation of complicated

Medicaid Provider Manual

medication situations. The continuing stay recertification process is designed to assess the efficacy of the treatment regime in addressing these concerns, and to determine whether the inpatient setting remains the most appropriate, least restrictive, level of care for treatment of the beneficiary's problems and dysfunctions.

Continuing treatment in an inpatient setting may be certified when signs, symptoms, behaviors, impairments, harm inclinations or biologic/medication complications, similar to those which justified the beneficiary's admission certification, remain present, and continue to be of such a nature and severity that inpatient psychiatric treatment is still medically necessary. It is anticipated that in those reviews which fall near the end of an episode of care, these problems and dysfunctions will have stabilized or diminished.

Discharge planning must begin at the onset of treatment in the inpatient unit. Payment cannot be authorized for continued stays that are due solely to placement problems or the unavailability of aftercare services.

The individual must meet all three criteria outlined in the following table:

Diagnosis	The beneficiary has a validated current version of DSM or ICD mental disorder (excluding ICD-9 V-codes and ICD-10 Z-codes) that remains the principal diagnosis for purposes of care during the period under review.
Severity of Illness (signs, symptoms, functional impairments and risk potential)	<ul style="list-style-type: none">▪ Persistence/intensification of signs/symptoms, impairments, harm inclinations or biologic/medication complications which necessitated admission to this level of care, and which cannot currently be addressed at a lower level of care.▪ Continued severe disturbance of cognition, perception, affect, memory, behavior or judgment.▪ Continued gravely disabling or incapacitating functional impairments or severely and pervasively impaired personal adjustment.▪ Continued significant self/other harm risk.▪ Use of psychotropic medication at dosage levels necessitating medical supervision, dosage titration of medications requiring skilled observation, or adverse biologic reactions requiring close and continuous observation and monitoring.▪ Emergence of new signs/symptoms, impairments, harm inclinations or medication complications meeting admission criteria.
Intensity of Service	<ul style="list-style-type: none">▪ The beneficiary requires close observation and medical supervision due to the severity of signs and symptoms, to control risk behaviors or inclinations, to assure basic needs are met or to manage biologic/medication complications.▪ The beneficiary is receiving active, timely, treatment delivered according to an individualized plan of care.▪ Active treatment is directed toward stabilizing or diminishing those symptoms, impairments, harm inclinations or biologic/medication complications that necessitated admission to inpatient care.

Medicaid Provider Manual

	<ul style="list-style-type: none">▪ The beneficiary is making progress toward treatment goals as evidenced by a measurable reduction in signs/symptoms, impairments, harm inclinations or biologic/medication complications or, if no progress has been made, there has been a modification of the treatment plan and therapeutic program, and there is a reasonable expectation of a positive response to treatment.
--	---

Discharge criteria and aftercare planning are documented in the beneficiary's record.

SECTION 9 – INTENSIVE CRISIS STABILIZATION SERVICES

9.1 ADULT SERVICES

Intensive crisis stabilization services are structured treatment and support activities provided by a multidisciplinary team and designed to provide a short-term alternative to inpatient psychiatric services. Services may be used to avert a psychiatric admission or to shorten the length of an inpatient stay when clinically indicated.

A crisis situation means a situation in which an individual is experiencing a serious mental illness or a developmental disability and one of the following applies:

- The individual can reasonably be expected within the near future to physically injure themselves or another individual, either intentionally or unintentionally.
- The individual is unable to provide themselves clothing, or shelter, or to attend to basic physical activities such as eating, toileting, bathing, grooming, dressing, or ambulating, and this inability may lead in the near future to harm to the individual or to another individual.
- The individual's judgment is so impaired that they are unable to understand the need for treatment and, in the opinion of the mental health professional, their continued behavior, as a result of the mental illness, developmental disability, or emotional disturbance, can reasonably be expected in the near future to result in physical harm to the individual or to another individual.

9.1.A. APPROVAL

The PIHP must seek and maintain MDHHS approval for the intensive crisis stabilization services in order to use Medicaid funds for program services.

9.1.B. POPULATION

These services are for beneficiaries who have been assessed to meet criteria for psychiatric hospital admissions but who, with intense interventions, can be stabilized and served in their usual community environments. These services may also be provided to beneficiaries leaving inpatient psychiatric services if such services will result in a shortened inpatient stay.

Beneficiaries must have a diagnosis of mental illness or mental illness with a co-occurring substance use disorder or developmental disability.

9.1.C. SERVICES

Intensive crisis services are intensive treatment interventions delivered by an intensive crisis stabilization treatment team under the supervision of a psychiatrist. Component services include:

- Intensive individual counseling/psychotherapy;
- Assessments (rendered by the treatment team);

Medicaid Provider Manual

- Family therapy;
- Psychiatric supervision; and
- Therapeutic support services by trained paraprofessionals.

9.1.D. QUALIFIED STAFF

Intensive crisis services must be provided by a treatment team of mental health professionals under the supervision of a psychiatrist. The psychiatrist need not provide on-site supervision at all times but must be available by telephone at all times. The treatment team providing intensive crisis stabilization services must be mental health professionals. Nursing services/consultation must be available.

The treatment team may be assisted by trained paraprofessionals under appropriate supervision. The trained paraprofessionals must have at least one year of satisfactory work experience providing services to beneficiaries with serious mental illness. Activities of the trained paraprofessionals include assistance with therapeutic support services. In addition, the team may include one or more peer support specialists.

9.1.E. LOCATION OF SERVICES

Intensive crisis stabilization services may be provided where necessary to alleviate the crisis situation, and to permit the beneficiary to remain in, or return more quickly to, their usual community environment. Intensive crisis stabilization services must not be provided exclusively or predominantly at residential programs.

Exceptions: Intensive crisis stabilization services may not be provided in:

- Inpatient settings;
- Jails or other settings where the beneficiary has been adjudicated; or
- Crisis residential settings.

9.1.F. INDIVIDUAL PLAN OF SERVICE

Intensive crisis stabilization services may be provided initially to alleviate an immediate or serious psychiatric crisis. However, following resolution of the immediate situation (and within no more than 48 hours), an intensive crisis stabilization services treatment plan must be developed. The intensive crisis stabilization treatment plan must be developed through a person-centered planning process in consultation with the psychiatrist. Other professionals may also be involved if required by the needs of the beneficiary. The case manager (if the beneficiary receives case management services) must be involved in the treatment and follow-up services.

The individual plan of service must contain:

- Clearly stated goals and measurable objectives, derived from the assessment of immediate need, and stated in terms of specific observable changes in behavior, skills, attitudes, or circumstances, structured to resolve the crisis.

Medicaid Provider Manual

- Identification of the services and activities designed to resolve the crisis and attain their goals and objectives.
- Plans for follow-up services (including other mental health services where indicated) after the crisis has been resolved. The role of the case manager must be identified, where applicable.

9.2 CHILDREN'S SERVICES

Intensive crisis stabilization services are structured treatment and support activities provided by a mobile intensive crisis stabilization team that are designed to promptly address a crisis situation in order to avert a psychiatric admission or other out of home placement or to maintain a child or youth in their home or present living arrangement. These services must be available to children or youth with serious emotional disturbance (SED) and/or intellectual/developmental disabilities (I/DD), including autism, or co-occurring SED and substance use disorder (SUD).

A crisis situation means a situation in which at least one of the following applies:

- The parent/caregiver has identified a crisis and reports that their capacity to manage the crisis is limited at this time and they are requesting assistance.
- The child or youth can reasonably be expected within the near future to physically injure self or another individual, either intentionally or unintentionally.
- The child or youth exhibits risk behaviors and/or behavioral/emotional symptoms which are impacting their overall functioning; and/or the current functional impairment is a clearly observable change compared with previous functioning.
- The child or youth requires immediate intervention in order to be maintained in their home or present living arrangement or to avoid psychiatric hospitalization or other out of home placement.

The goals of intensive crisis stabilization services for children are as follows:

- To rapidly respond to any non-imminently life threatening emotional symptoms and/or behaviors that are disrupting the child's or youth's functioning;
- To provide immediate intervention to assist children and youth and their parents/caregivers in de-escalating behaviors, emotional symptoms and/or dynamics impacting the child's or youth's functioning ability;
- To prevent/reduce the need for care in a more restrictive setting (e.g., inpatient psychiatric hospitalization, detention, etc.) by providing community-based intervention and resource development;
- To effectively engage, assess, deliver and plan for appropriate interventions to minimize risk, aid in stabilization of behaviors, and improve functioning; and
- To enhance the child's or youth's and parent's/caregiver's ability to access any identified community-based supports, resources and services.

Medicaid Provider Manual

9.2.A. APPROVAL

The PIHP must seek and receive MDHHS approval through a certification process, initially and every three years thereafter, for the intensive crisis stabilization services in order to use Medicaid funds for program services.

9.2.B. POPULATION

These services are for children or youth ages 0 to 21 with SED and/or I/DD, including autism or co-occurring SED and SUD, and their parents/caregivers who are currently residing in the catchment area of the approved program, and are in need of intensive crisis stabilization services in the home or community as defined in this section. Mobile intensive crisis stabilization teams must be able to travel to the child or youth in crisis for a face to face contact in one hour or less in urban counties, and in two hours or less in rural counties, from the time of the request for intensive crisis stabilization services.

9.2.C. SERVICES

Component services include:

- Assessments and identifying current strengths and needs of the child and family (rendered by the treatment team)
- De-escalation of the crisis
- Family-driven and youth-guided planning
- Crisis and safety plan development
- Brief intensive individual counseling/psychotherapy
- Brief family therapy
- Skill building
- Psychoeducation
- Referrals and connections to additional community resources
- Collaboration and problem solving with other child- or youth-serving systems, as applicable
- Psychiatric consult, as needed

9.2.D. QUALIFIED STAFF

Intensive crisis stabilization services must be provided by a mobile intensive crisis stabilization team consisting of at least two staff who travel to the child or youth in crisis. One team member must be a Master's prepared Child Mental Health Professional (or Master's prepared Qualified Intellectual Disabilities Professional [QIDP], if applicable) and the second team member may be another professional or paraprofessional under appropriate supervision. Paraprofessionals must have at least one year of satisfactory work experience providing services to children with serious emotional disturbance and/or intellectual/developmental disabilities, as applicable. Team

Medicaid Provider Manual

members must have access to an on-call psychiatrist by telephone, as needed. At minimum, all team members must be trained in crisis intervention and de-escalation techniques.

9.2.E. LOCATION OF SERVICES

Intensive crisis stabilization services are to be provided in the home or community at the preference of the parent or caregiver to alleviate the crisis situation, and to permit the child or youth to remain in their usual home and community environment.

Exceptions: Intensive crisis stabilization services may not be provided in:

- Inpatient settings;
- Jails or detention centers; or
- Residential settings (e.g., Child Caring Institutions, Crisis Residential).

9.2.F. INDIVIDUAL PLAN OF SERVICE

Intensive crisis stabilization services may be provided initially to alleviate an immediate crisis. However, following resolution of the immediate situation, an existing individual plan of service and crisis and safety plan must be updated or, for children or youth who are not yet recipients of CMHSP services but are eligible for such services, a family-driven and youth-guided follow-up plan must be developed. Children who are receiving home based services can also receive this mobile service. If it is clinically appropriate, the home based therapist is able to respond in person to the one hour urban and two hour rural time frame in lieu of the mobile team.

If the child or youth is a current recipient of CMHSP services, mobile intensive crisis stabilization team members are responsible for notifying the primary therapist, case manager, or wraparound facilitator, as applicable, of the contact with the mobile intensive crisis stabilization team the next business day. It is the responsibility of the primary therapist, case manager, or wraparound facilitator to follow-up with the child or youth and parent/caregiver. The child or youth, parent/caregiver and the relevant ongoing treatment team members must revisit the current individual plan of service and crisis and safety plan and make adjustments where necessary to address current treatment needs.

If the child or youth is not yet a recipient of CMHSP services but is eligible for such services, the follow-up plan must include appropriate referrals to mental health assessment and treatment resources and any other resources the child or youth and parent/caregiver may require. The mobile intensive crisis stabilization team is responsible for providing necessary information and referrals. The follow-up plan must also include the next steps for obtaining needed services, timelines for those activities, and identify the responsible parties. Mobile intensive crisis stabilization team members must contact the parent/caregiver by phone or face-to-face within seven business days to determine the status of the stated goals in the follow-up plan.

Planned mobile intensive crisis stabilization services for children can occur as part of a crisis plan or proactive response to support the child and family. The goal would be to stabilize and connect to ongoing services. In these planned situations, the response time is not required.

Medicaid Provider Manual

SECTION 10 – OUTPATIENT PARTIAL HOSPITALIZATION SERVICES

The PIHP is responsible for authorizing and paying for Medicaid admissions and continued stays in partial hospitalization programs by Medicaid beneficiaries.

- Admissions - beneficiaries may be referred to a partial hospitalization program from psychiatric inpatient hospitals or psychiatric units, referring providers, or PIHPs, or they may present themselves at the outpatient hospital without a referral.
- Continued stays must be authorized by the PIHP.

Authorization for the partial hospitalization admission and continued stay includes authorization for all services related to that admission/stay, including laboratory, pharmacy, and radiology services. The outpatient partial hospitalization program must bill the PIHP for authorized services according to procedures and rates established between the facility and the PIHP.

10.1 PARTIAL HOSPITALIZATION ADMISSION CRITERIA: ADULT

Partial hospitalization services may be used to treat a person with mental illness who requires intensive, highly coordinated, multi-modal ambulatory care with active psychiatric supervision. Treatment, services and supports are provided for six or more hours per day, five days a week. The use of partial hospitalization as a setting of care presumes that the beneficiary does not currently need treatment in a 24-hour protective environment. Conversely, the use of partial hospitalization implies that routine outpatient treatment is of insufficient intensity to meet the beneficiary's present treatment needs. The SI/IS criteria for admission assume that the beneficiary is displaying signs and symptoms of a serious psychiatric disorder, demonstrating significant functional impairments in self-care, daily living skills, interpersonal/social and/or educational/vocational domains, and is exhibiting some evidence of clinical instability. However, the level of symptom acuity, extent of functional impairments and/or the estimation of risk (clinical instability) do not justify or necessitate treatment at a more restrictive level of care.

Medicaid coverage is dependent upon active treatment being provided at the medically necessary level of care.

The individual must meet all three criteria outlined in the table below:

Diagnosis	The beneficiary must be suffering from a mental illness, reflected in a primary, validated, current version of DSM or ICD Diagnosis (not including ICD-9 V-codes and ICD-10 Z-codes).
------------------	---

Medicaid Provider Manual

Severity of Illness (signs, symptoms, functional impairments and risk potential)	<p>At least two of the following manifestations are present:</p> <ul style="list-style-type: none">▪ Psychiatric Signs and Symptoms<ul style="list-style-type: none">➢ Some prominent disturbance of thought processes, perception, affect, memory, consciousness, somatic functioning (due to a mental illness) or behavior exists (intermittent hallucinations, transient delusions, panic reactions, agitation, obsessions/ruminations, severe phobias, depression, etc.) and is serious enough to cause disordered or aberrant conduct, impulse control problems, questionable judgment, psychomotor acceleration or retardation, withdrawal or avoidance, compulsions/rituals, impaired reality testing and/or impairments in functioning and role performance. The disordered or aberrant conduct or activity and/or the level of agitation are not so severe, extreme or unstable so as to require frequent restraints or to pose a danger to others.▪ Disruptions of Self-Care and Independent Functioning<ul style="list-style-type: none">➢ The person seriously neglects self-care tasks (hygiene, grooming, etc.) and/or does not sufficiently attend to essential aspects of daily living (does not shop, prepare meals, maintain adequate nutrition, pay bills, complete housekeeping chores, etc.) due to a mental disorder.➢ Beneficiary is able to maintain adequate nutrition, shelter or other essentials of daily living only with structure and supervision for a significant portion of the day, and with family/community support when away from the partial hospitalization program.➢ The person's interpersonal functioning is significantly impaired (seriously dysfunctional communication, extreme social withdrawal, etc.).➢ There has been notable recent deterioration in meeting educational/occupational responsibilities and role performance expectations.▪ Danger to Self<ul style="list-style-type: none">➢ There is modest danger to self, reflected in: intermittent self-harm ideation, expressed ambivalent inclinations without a plan, non-intentional threats, mild and infrequent self-harm gestures (low lethality/intent) or self-mutilation, passive death wishes, or slightly self-endangering activities.➢ The beneficiary has not made any recent significant (by intent or lethality) suicide attempts, nor is there any well-defined plan for such activity or, if there have been recent significant actions, these inclinations/behaviors are now clearly under control and the person no longer needs/requires 24-hour supervision to contain self-harm risk.▪ Danger to Others<ul style="list-style-type: none">➢ Where assaultive tendencies exist, there have been no overt actions and there is reasonable expectation, based upon history and recent behavior, that the beneficiary will be able to curb these inclinations.➢ There have been destructive fantasies described and mild threats verbalized, but the beneficiary appears to have impulse control, judgment, and reality orientation sufficient to suppress urges to act on these imaginings or expressions.➢ There has been minor destructive behavior toward property without endangerment of others.
--	---

Medicaid Provider Manual

	<ul style="list-style-type: none">▪ Drug/Medication Complications<ul style="list-style-type: none">➢ The beneficiary has experienced side effects of atypical complexity resulting from psychotropic drugs, and regulation/correction/monitoring of these circumstances cannot be accomplished at a lower level of care due to the beneficiary's condition or to the nature of the procedures involved.➢ The beneficiary needs evaluation and monitoring due to significant changes in medication or because of problems with medication regimen compliance.
Intensity of Service	<p>The person meets the intensity of service requirements if partial hospitalization services are considered medically necessary and the person requires at least one of the following:</p> <ul style="list-style-type: none">▪ The person requires intensive, structured, coordinated, multi-modal treatment and supports with active psychiatric supervision to arrest regression and forestall the need for inpatient care.▪ The beneficiary has reached a level of clinical stability (diminished risk) obviating the need for continued care in a 24-hour protective environment but continues to require active, intensive treatment and support to relieve/reverse disabling psychiatric symptomatology and/or residual functional impairments.▪ Routine medical observation and supervision is required to effect significant regulation of psychotropic medications and/or to minimize serious side effects.

10.2 PARTIAL HOSPITALIZATION ADMISSION CRITERIA: CHILDREN AND ADOLESCENTS

Partial hospitalization services may be used to treat a child or adolescent with mental illness or serious emotional disturbance who requires intensive, highly coordinated, multi-modal ambulatory care with active psychiatric supervision. Treatment, services and supports are provided for six or more hours per day, five days a week. The use of partial hospitalization as a setting of care presumes that the beneficiary does not currently need treatment in a 24-hour protective environment. Conversely, the use of partial hospitalization implies that routine outpatient treatment is of insufficient intensity to meet the beneficiary's present treatment needs. The SI/IS criteria for admission assume that the beneficiary is displaying signs and symptoms of a serious psychiatric disorder, demonstrating significant functional impairments in self-care, daily living skill, interpersonal/social and/or educational/vocational domains, and is exhibiting some evidence of clinical instability. However, the level of symptom acuity, extent of functional impairments and/or the estimation of risk (clinical instability) does not justify or necessitate treatment at a more restrictive level of care.

Medicaid coverage is dependent upon active treatment being provided at the medically necessary level of care.

The individual must meet all three criteria outlined in the following table:

Diagnosis	The beneficiary must be suffering from a mental illness, reflected in a primary, validated, current version of DSM or ICD diagnosis (not including ICD-9 V-codes and ICD-10 Z-codes).
------------------	---

Medicaid Provider Manual

Severity of Illness (signs, symptoms, functional impairments and risk potential)

At least **two** of the following manifestations are present:

- Psychiatric Signs and Symptoms
 - Some prominent disturbance of thought processes, perception, affect, memory, consciousness, somatic functioning (due to a mental illness) or behavior exists (intermittent hallucinations, transient delusions, panic reactions, agitation, obsessions/ruminations, severe phobias, depression, etc.) and is serious enough to cause disordered or aberrant conduct, impulse control problems, questionable judgment, psychomotor acceleration or retardation, withdrawal or avoidance, compulsions/rituals, impaired reality testing and/or impairments in functioning and role performance. The disordered or aberrant conduct or activity and/or the level of agitation is not so severe, extreme or unstable so as to require frequent restraints or to pose a danger to others.
- Disruptions of Self-Care and Independent Functioning
 - The child/adolescent exhibits significant impairments in self-care skills (feeding, dressing, toileting, hygiene/bathing/grooming, etc.), in the ability to attend to age-appropriate responsibilities, or in self-regulation capabilities, due to a mental disorder or emotional illness.
 - The child/adolescent is able to maintain adequate self-care and self-regulation only with structure and supervision for a significant portion of the day, and with family/community support when away from the partial hospitalization program.
 - There is recent evidence of serious impairment/incapacitation in the child's/adolescent's interpersonal and social functioning (seriously dysfunctional communication, significant social withdrawal and isolation, repeated disruptive, inappropriate or bizarre behavior in social settings, etc.).
 - There is recent evidence of considerable deterioration in functioning within the family and/or significant decline in occupational/educational role performance due to a mental disorder or emotional illness.
- Danger to Self
 - There is modest danger to self, reflected in: non-accidental self-harm gestures or self-mutilation actions which are not life-threatening in either intent or lethal potential, intermittent self-harm ideation, expressed ambivalent inclinations without a plan, non-intentional threats, passive death wishes, or slightly self-endangering activities.
 - The beneficiary has not made any recent significant (by intent or lethality) suicide attempts, nor is there any well-defined plan for such activity or, if there have been recent significant actions, these inclinations/behaviors are now clearly under control and the person no longer needs/requires 24-hour supervision to contain self-harm risk.

Medicaid Provider Manual

	<ul style="list-style-type: none">▪ Danger to Others<ul style="list-style-type: none">➢ Assaultive tendencies exist, and some assaultive behavior may have occurred, but any overt actions have been without any serious or significant injury to others, and there is reasonable expectation, based upon history and recent behavior, that the beneficiary will be able to curb any serious expression of these inclinations.➢ There have been destructive fantasies described and mild threats verbalized, but the beneficiary appears to have adequate impulse control, judgment, and reality orientation sufficient to suppress urges to act on these imaginings or expressions.➢ There has been minor destructive behavior toward property without endangerment of others.▪ Drug/Medication Complications<ul style="list-style-type: none">➢ The beneficiary has experienced side effects of atypical complexity resulting from psychotropic drugs and regulation/correction/monitoring of these circumstances cannot be accomplished at a lower level of care due to the beneficiary's condition or to the nature of the procedures involved.➢ The beneficiary needs evaluation and monitoring due to significant changes in medication or because of problems with medication regimen compliance.
Intensity of Service	<p>The person meets the intensity of service requirements if partial hospitalization services are considered medically necessary and the person requires at least one of the following:</p> <ul style="list-style-type: none">▪ The person requires intensive, structured, coordinated, multi-modal treatment and supports with active psychiatric supervision to arrest regression and forestall the need for inpatient care.▪ The beneficiary has reached a level of clinical stability (diminished risk) obviating the need for continued care in a 24-hour protective environment but continues to require active, intensive treatment and support to relieve/reverse disabling psychiatric symptomatology and/or residual functional impairments.▪ Routine medical observation and supervision is required to effect significant regulation of psychotropic medications and/or to minimize serious side effects.

10.3 PARTIAL HOSPITALIZATION CONTINUING STAY CRITERIA FOR ADULTS, ADOLESCENTS AND CHILDREN

After a beneficiary has been certified for admission to a partial hospitalization program, services will be reviewed at regular intervals to assess the current status of the treatment process and to determine the continued necessity for care in a partial hospitalization setting. Treatment within a partial hospitalization program is directed at resolution or stabilization of acute symptoms, elimination or amelioration of disabling functional impairments, maintenance of self/other safety and/or regulation of precarious or complicated medication situations. The continuing stay recertification process is designed to assess the efficacy of the treatment regime in addressing these concerns, and to determine whether the partial program remains the most appropriate, least restrictive, level of care for treatment of the beneficiary's problems and dysfunctions.

Continuing treatment in the partial program may be certified when symptoms, impairments, harm inclinations or medication complications, similar to those which justified the beneficiary's admission

Medicaid Provider Manual

certification, remain present, and continue to be of such a nature and severity that partial hospitalization treatment is still medically necessary. It is anticipated that in those reviews which fall near the end of an episode of care, these problems and dysfunctions will have stabilized or diminished.

Discharge planning must begin at the onset of treatment in the program. Payment cannot be authorized for continued stays that are due solely to placement problems or the unavailability of aftercare services.

The individual must meet all three criteria outlined in the following table:

Diagnosis	The beneficiary has a validated current version of DSM or ICD mental disorder (excluding ICD-9 V-codes and ICD-10 Z-codes), which remains the principal diagnosis for purposes of care during the period under review.
Severity of Illness (signs, symptoms, functional impairments and risk potential)	<ul style="list-style-type: none">▪ Persistence of symptoms, impairments, harm inclinations or medication complications which necessitated admission to this level of care, and which cannot currently be addressed at a lower level of care.▪ Emergence of new symptoms, impairments, harm inclinations or medication complications meeting admission criteria.▪ Progress has been made in ameliorating admission symptoms or impairments, but the treatment goals have not yet been fully achieved and cannot currently be addressed at a lower level of care.
Intensity of Service	<ul style="list-style-type: none">▪ The beneficiary is receiving active, timely, intensive, structured multi-modal treatment delivered according to an individualized plan of care.▪ Active treatment is directed toward stabilizing or diminishing those symptoms, impairments, harm inclinations or medication complications that necessitated admission to the program.▪ The beneficiary is making progress toward treatment goals or, if no progress has been made, the treatment plan and therapeutic program have been revised accordingly and there is a reasonable expectation of a positive response to treatment.

Discharge criteria and aftercare planning are documented in the beneficiary's record.

SECTION 11 – PERSONAL CARE IN LICENSED SPECIALIZED RESIDENTIAL SETTINGS

Personal care services are those services provided in accordance with an individual plan of service to assist a beneficiary in performing their own personal daily activities. For children with serious emotional disturbance, personal care services may be provided only in a licensed foster care setting or in a Child Caring Institution (CCI) if it is licensed as a “children’s therapeutic group home” as defined in Section 722.111 Sec. 1(f) under Act No. 116 of the Public Acts of 1973, as amended. For children with intellectual/developmental disabilities, services may be provided only in a licensed foster care or CCI setting with a specialized residential program certified by the state. These personal care services are distinctly different from the state plan Home Help program administered by MDHHS.

Personal care services are covered when authorized by a physician or other health care professional in accordance with an individual plan of services and rendered by a qualified person. Supervision of personal care services must be provided by a health care professional who meets the qualifications contained in this chapter.

11.1 SERVICES

Personal care services include assisting the beneficiary to perform the following:

- Assistance with food preparation, clothing and laundry, and housekeeping beyond the level required by facility licensure, (e.g., a beneficiary requires special dietary needs such as pureed food);
- Eating/feeding;
- Toileting;
- Bathing;
- Grooming;
- Dressing;
- Transferring (between bed, chair, wheelchair, and/or stretcher);
- Ambulation; and
- Assistance with self-administered medications.

"Assisting" means staff performs the personal care tasks for the individual; or performs the tasks along with the individual (i.e., some hands-on); or otherwise assists the individual to perform the tasks themselves by prompting, reminding, or by being in attendance while the beneficiary performs the task(s).

11.2 PROVIDER QUALIFICATIONS

Personal care may be rendered to a Medicaid beneficiary in a Foster Care or CCI setting licensed and certified by the state under the 1987 Michigan Department of Health and Human Services Administrative Rule R330.1801-09 (as amended in 1995). For children birth to 21, personal care may be rendered to a Medicaid beneficiary in a Child Caring Institution setting with a specialized residential program facility licensed by the State for individuals with I/DD under Act No. 116 of the Public Acts of 1973, as amended, and Act No. 258 of the Public Acts of 1974, as amended.

11.3 DOCUMENTATION

The following documentation is required in the beneficiary's file in order for reimbursement to be made:

- An assessment of the beneficiary's need for personal care.
- An individual plan of services that includes the specific personal care services and activities, including the amount, scope and duration to be delivered that is reviewed and approved at least once per year during person-centered planning.
- Documentation of the specific days on which personal care services were delivered consistent with the beneficiary's individual plan of service.

SECTION 12 – SUBSTANCE ABUSE SERVICES

12.1 OUTPATIENT CARE

Medicaid-covered services and supports must be provided, based on medical necessity, to eligible beneficiaries who reside in the specified region and request services.

Outpatient treatment is a non-residential treatment service that can take place in an office-based location with clinicians educated/trained in providing professionally directed alcohol and other drug (AOD) treatment or a community-based location with appropriately educated/trained staff. The treatment occurs in regularly scheduled sessions, usually totaling fewer than nine contact hours per week but, when medically necessary, can total over 20 hours in a week. Individual, family or group treatment services may be provided individually or in combination.

Treatment must be individualized based on a bio-psycho-social assessment, diagnostic impression and beneficiary characteristics, including age, gender, culture, and development. Authorized decisions on length of stay, including continued stay, change in level of care, and discharge, must be based on the American Society of Addiction Medicine (ASAM) Criteria. For those in long term or continuous treatment, assessment should occur on an annual basis to ensure medical necessity and to update the beneficiary's treatment/recovery plan. Beneficiary participation in referral and continuing care planning must occur prior to discharge and should be based on the needs of the beneficiary in order to support sustained recovery.

12.1.A. ELIGIBILITY

Outpatient care may be provided only when:

- The service meets medical necessity criteria.
- The current edition of the Diagnostic and Statistical Manual of Mental Disorders (DSM) is used to determine an initial diagnostic impression (also known as provisional diagnosis). The diagnostic impression must include all five axes.
- The service is based on individualized determination of need.
- The service is cost effective.
- The American Society of Addiction Medicine (ASAM) Criteria are used to determine substance abuse treatment placement/admission and/or continued stay needs.
- The service is based on a level of care determination using the six assessment dimensions of the current ASAM Criteria:
 - Withdrawal potential
 - Medical conditions and complications
 - Emotional, behavioral or cognitive conditions and complications
 - Readiness to change
 - Relapse, continued use or continued problem potential
 - Recovery/living environment.

Medicaid Provider Manual

This service is limited to those beneficiaries who will benefit from treatment and have been determined to have:

- an acceptable readiness to change level;
- minimal or manageable medical conditions;
- minimal or manageable withdrawal risks;
- emotional, behavioral and cognitive conditions that will not prevent the beneficiary benefiting from this level of care;
- minimal or manageable relapse potential; and
- a minimally to fully supportive recovery environment.

12.1.1.B. COVERED SERVICES

Once the above criteria have been satisfied and the beneficiary has demonstrated a willingness to participate in treatment, the following services can be provided in the outpatient setting:

Individual Assessment	A face-to-face service for the purpose of identifying functional, treatment, and recovery needs and a basis for formulating the Individualized Treatment Plan.
Individual Treatment Planning	The beneficiary must be directly involved with developing the plan that must include Recovery Support Preparation/Relapse Prevention Activities.
Individual Therapy	Face-to-face counseling services with the beneficiary.
Group Therapy	Face-to-face counseling with three or more beneficiaries, and can include didactic lectures, therapeutic interventions/counseling, and other group related activities.
Family Therapy	Face-to-face counseling with the beneficiary and the significant other and/or traditional or non-traditional family members.
Crisis Intervention	A service for the purpose of addressing problems/issues that may arise during treatment and could result in the beneficiary requiring a higher level of care if intervention is not provided.
Referral/Linking/Coordinating/Management of Services	For the purpose of ensuring follow-through with identified providers, providing additional support in the community if primary services are to be provided in an office setting, addressing other needs identified as part of the assessment and/or establishing the beneficiary with another provider and/or level of care. This service may be provided individually or in conjunction with other services based on the needs of the beneficiary (frequently referred to as substance use disorder case management).
Peer Recovery and Recovery Support	To support and promote recovery and prevent relapse through supportive services that result in the knowledge and skills necessary for an individual's recovery. Peer recovery programs are designed and delivered primarily by individuals in recovery (Recovery Coach) and offer social, emotional, and/or educational supportive services to help prevent relapse and promote recovery.
Compliance Monitoring	For the purpose of identifying abstinence or relapse when it is a part of the treatment plan or an identified part of the treatment program (excludes laboratory drug testing).

Medicaid Provider Manual

Early Intervention	Includes stage-based interventions for individuals with substance use disorders and individuals who may not meet the threshold of abuse or dependence but are experiencing functional/social impairment as a result of use.
Detoxification/ Withdrawal Monitoring	For the purpose of preventing/alleviating medical complications as they relate to no longer using a substance.
Division of Pharmacologic Therapies/Center for Substance Abuse Treatment (DPT/ CSAT) Approved Pharmacological Supports	Refer to the Treatment (DPT/CSAT) Approved Pharmacological Supports subsection.
Substance Abuse Treatment Services	Services that are required to include assessment, treatment planning, stage-based interventions, referral linking and monitoring, recovery support preparation, recovery support services, and treatment based on medical necessity. They may include individual, group and family treatment. These services are provided under the supervision of a SATS or SATP.

12.1.C. ADMISSION CRITERIA

Outpatient services should be authorized based on the number of hours and/or types of services that are medically necessary. Reauthorization or continued treatment should take place when it has been demonstrated that the beneficiary is benefiting from treatment but additional covered services are needed for the beneficiary to be able to sustain recovery independently.

Reauthorization of services can be denied in situations where the beneficiary has:

- not been actively involved in their treatment, as evidenced by repeatedly missing appointments;
- not been participating/refusing to participate in treatment activities;
- continued use of substances and other behavior that is deemed to violate the rules and regulations of the program providing the services.

Beneficiaries may also be terminated from treatment services based on these violations.

12.1.D. SERVICE INTENSITY

The medically necessary outpatient services correspond to the frequency and duration of services established by the ASAM levels of care and are referred to as follows:

- Level 0.5 – Early Intervention
- Level 1.0 – Outpatient
- Level 2.1 – Intensive Outpatient

Medicaid Provider Manual

- Level 2.5 – Expanded Intensive Outpatient

Outpatient services can include any variety of the covered services and are dependent on the individual needs of the beneficiary. The assessment, treatment plan and recovery support preparations are the only components that are consistent throughout the outpatient levels of care as each beneficiary must have these as part of the authorized treatment services. As a beneficiary's needs increase, more services and/or frequency/duration of services may be utilized if these are medically necessary. The ASAM levels correspond with established hours of services that take place during a week.

ASAM Level 0.5	Services are not subdivided by the number of hours received during a week. The amount and type of services provided are based on individual needs based on the beneficiary's motivation to change and other risk factors that may be present.
ASAM Level 1.0	Services from one hour to eight hours during a week.
ASAM Level 2.1	Services from nine to 19 hours in a week. The services are offered at least three days a week to fulfill the minimum nine-hour commitment.
ASAM Level 2.5	Services that are offered 20 or more hours in a week.

12.2 MEDICATION ASSISTED TREATMENT (MAT) [CHANGE MADE 4/1/2025]

Medication-Assisted Treatment (MAT) is the use of medications often used in combination with counseling and behavioral therapies to provide a whole-patient approach to the treatment of substance use disorders (SUDs). Medications used in MAT are approved by the Food and Drug Administration (FDA). MAT programs are clinically driven and tailored to meet each patient's needs.

MAT is a covered service for all Medicaid beneficiaries who meet the medical necessity criteria for receipt of the service. The State assures coverage of Naltrexone, Buprenorphine, and Methadone and all the forms of these drugs for MAT that are approved under section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355) and all biological products licensed under section 351 of the Public Health Service Act (42 U.S.C. 262). The State also provides coverage for additional MAT drugs per the Michigan Preferred Drug List (PDL) used by the Fee for Service (FFS) pharmacy program. This is described as the Single PDL. (Refer to the Directory Appendix for Michigan Preferred Drug List website information.)

The State assures that **Medications for Opioid Use Disorder (MOUD)** for MAT is provided by Opioid Treatment Programs (OTPs) that meet the requirements in 42 CFR Part 8. **(revised 4/1/2025)**

Beneficiaries must have a completed bio-psycho-social assessment using a state approved tool at the time of admission, and annually thereafter if in continuous treatment.

12.2.A. MAT MOUD WITHIN OTPs [TITLE REVISED 4/1/2025]

12.2.A.1. PROVISION OF SERVICES [CHANGES MADE 4/1/2025]

Opioid-dependent beneficiaries may be provided chemotherapy using **MOUD as a treatment service**. Provision of such services must meet the following criteria:

- Services must be provided under the supervision of a physician licensed to practice medicine in Michigan.

Medicaid Provider Manual

- The physician must be licensed to prescribe controlled substances, as well as licensed to work at an OTP.
- The MOUD component of the substance use disorder treatment program must be:
 - licensed as such by the state;
 - certified by the Division of Pharmacologic Therapies/Center for Substance Abuse Treatment (DPT/CSAT);
 - licensed by the Drug Enforcement Administration (DEA); and
 - accredited by a DPT/CSAT and state-approved accrediting organization (The Joint Commission [TJC] and the Commission on Accreditation of Rehabilitation Facilities [CARF]).
- MOUD must be administered by an appropriately licensed MD/DO, physician assistant, nurse practitioner, clinical nurse specialist, registered nurse, licensed practical nurse, or pharmacist. (revisions made 4/1/2025)

12.2.A.2. COVERED SERVICES [CHANGE MADE 4/1/2025]

Covered services for Methadone and pharmacological supports and laboratory services, as required by DPT/CSAT regulations and the Administrative Rules for Substance Use Disorder Service Programs in Michigan, include:

- Medications for Opioid Use Disorder (MOUD) (revised 4/1/2025)
- Nursing services
- Physical examination
- Physician encounters (monthly)
- Laboratory tests (including health screening tests as part of the initial physical exam, pregnancy test at admission, and required toxicology tests)
- TB skin test (as ordered by physician)

12.2.A.3. ELIGIBILITY CRITERIA [CHANGES MADE 4/1/2025]

Medical necessity requirements shall be used to determine the need for MOUD as a treatment and recovery service.

All dimensions of the American Society of Addiction Medicine (ASAM) Criteria must be addressed: (revisions made 4/1/2025)

- Acute intoxication and/or withdrawal potential
- Biomedical conditions and complications
- Emotional/behavioral conditions and complications (e.g., psychiatric conditions, psychological or emotional/behavioral complications of known or unknown origin, poor impulse control, changes in mental status, or transient neuropsychiatric complications)
- Treatment acceptance/resistance

Medicaid Provider Manual

- Relapse/continued use potential
- Recovery/living environment

12.2.A.4. CONTINUUM OF CARE [CHANGES MADE 4/1/2025]

Decisions to admit an individual for MOUD maintenance must be based on medical necessity criteria, satisfy the LOC determination using the dimensions of the ASAM Criteria, the person meets diagnostic criteria for a moderate to severe opioid use disorder (OUD); the individual has an active moderate to severe OUD, or OUD in remission, or is at high risk for recurrence or overdose.

Admission procedures require a screening examination to ensure that the patient meets criteria for admission and that there are no contraindications to treatment with MOUD. A full physical examination must be completed within 14 calendar days following an individual's admission to the OTP. The physician may refer the individual for further medical assessment as indicated.

Consistent with the LOC determination, individuals requesting MOUD must be presented with all appropriate options for substance use disorder treatment, such as:

- Medical Detoxification
- Sub-acute Detoxification
- Residential Care
- Buprenorphine/Naloxone
- Non-Medication Assisted Outpatient Treatment

Medicaid Provider Manual

Special Circumstances for Admissions

There are special circumstances for the admission of pregnant women, pregnant adolescents, and adolescents.

Pregnant Women	<ul style="list-style-type: none">▪ Pregnant women requesting treatment are considered a priority for admission and must be screened and referred for services within 24 hours.▪ Pregnant individuals who have a documented history of opioid addiction, regardless of age or length of opioid dependency, may be admitted to an Opioid Treatment Program (OTP) provided the pregnancy is certified by the OTP physician and treatment is found to be justified.▪ For pregnant individuals, evidence of current physiological dependence is not necessary.▪ Pregnant opioid-dependent individuals must be referred for prenatal care and other pregnancy-related services and supports, as necessary.▪ OTPs must obtain informed consent from pregnant women, and all women admitted to MOUD treatment who may become pregnant, stating that they will not knowingly put themselves and their fetus in jeopardy by leaving the OTP against medical advice.▪ Because MOUD and opioid withdrawal are not recommended during pregnancy due to the increased risk to the fetus, the OTP shall not discharge pregnant women without making documented attempts to facilitate a referral for continued treatment with another provider.
(category deleted 4/1/2025)	
Adolescents (title revised 4/1/2025)	<ul style="list-style-type: none">▪ (bullet point removed 4/1/2025)▪ No individual under 14 years of age may be admitted to maintenance treatment unless a parent, legal guardian, or responsible adult (designated by the relevant state authority) consents, in writing, to such treatment. <p>(text deleted 4/1/2025)</p>

Medical Maintenance Phase

When the maximum therapeutic benefit of counseling has been achieved, it may be appropriate for the individual to enter the medical maintenance (medication only) phase of treatment and recovery; that is if it has been determined that ongoing use of the medication is medically necessary and appropriate for the individual. The following criteria are to be considered when making the decision to move to medical maintenance:

- **(bullet point deleted 4/1/2025)**
- Absence of active substance use disorders for the period indicated by federal and state regulations. **(revised 4/1/2025)**
- No alcohol use problem.
- Stable living conditions in an environment free of substance use.
- Stable and legal source of income.

Medicaid Provider Manual

- Involvement in productive activities (e.g., employment, school, volunteer work).
- No criminal or legal involvement for at least three years and no current parole or probation status.
- Adequate social support system and absence of significant non-stabilized co-occurring disorders.

Discontinuation/Termination Criteria

Discontinuation/termination from **MOUD** treatment refers to the following situations:

- Beneficiaries must discontinue treatment with **MOUD** when treatment is completed with respect to both the medical necessity for the medication and for counseling services.
- Beneficiaries may be terminated from services if there is clinical and/or behavioral non-compliance.
- If a beneficiary is terminated:
 - The OTP must attempt to make a referral for another LOC assessment or for placing the beneficiary at another OTP.
 - The OTP must make an effort to ensure that the beneficiary follows through with the referral.
 - These efforts must be documented in the medical record.
 - The OTP must follow the procedures of the funding authority in coordinating these referrals.
- Any action to terminate treatment of a Medicaid beneficiary requires a "notice of action" be given to the beneficiary and the parent, legal guardian, or responsible adult (designated by the relevant state authority/CPS). The beneficiary and the parent, legal guardian, or responsible adult (designated by the relevant state authority/CPS) has a right to appeal this decision. Services must continue and dosage levels maintained while the appeal is in process, unless the action is being carried out due to administrative discontinuation criteria outlined in the subsection titled Administrative Discontinuation.

Services are discontinued/terminated, either by Completion of Treatment or through Administrative Discontinuation. Refer to the following subsections for additional information.

Completion of Treatment

The decision to discharge a beneficiary must be made by the OTP's physician, with input from clinical staff, the beneficiary, and the parent, legal guardian, or responsible adult (designated by the relevant state authority/CPS). Completion of treatment is determined when the beneficiary has fully or substantially achieved the goals listed in their individualized treatment and recovery plan and no longer needs **MOUD** as a medication. As part of this process, a reduction of the dosage to a medication-free state (tapering) should be implemented within safe and appropriate medical standards.

Medicaid Provider Manual

Administrative Discontinuation

Administrative discontinuation relates to non-compliance with treatment and recovery recommendations, and/or engaging in activities or behaviors that impact the safety of the OTP environment or other individuals who are receiving treatment. The OTP must work with the beneficiary and the parent, legal guardian, or responsible adult (designated by the relevant state authority/CPS) to explore and implement methods to facilitate compliance.

Non-compliance is defined as actions exhibited by the beneficiary which include, but are not limited to:

- **(bullet point deleted 4/1/2025)**
- Toxicology results that do not indicate the presence of methadone metabolites. (The same actions are taken as if illicit drugs, including non-prescribed medication, were detected.)

OTPs must perform toxicology tests for methadone metabolites, opioids, cannabinoids, benzodiazepines, cocaine, amphetamines, and barbiturates. **(revised 4/1/2025)**

OTPs must test the beneficiary for alcohol if use is prohibited under their individualized treatment and recovery plan or the beneficiary appears to be using alcohol to a degree that would make dosing unsafe.

- Repeated failure to submit to toxicology sampling as requested.
- **(bullet point deleted 4/1/2025)**
- Failure to manage medical concerns/conditions, including adherence to physician treatment and recovery services and use of prescription medications that may interfere with the effectiveness of **MOUD** and may present a physical risk to the individual.
- Repeated failure to follow through on other treatment and recovery plan related referrals. (Repeated failure should be considered on an individual basis and only after the OTP has taken steps to assist beneficiaries to comply with activities.)

The commission of acts by the beneficiary that jeopardize the safety and well-being of staff and/or other individuals, or negatively impact the therapeutic environment, is not acceptable and can result in immediate discharge. Such acts include, but are not limited to, the following:

- Possession of a weapon on OTP property
- Assaultive behavior against staff and/or other individuals
- Threats (verbal or physical) against staff and/or other individuals
- Diversion of controlled substances, including **MOUD**
- Diversion and/or adulteration of toxicology samples
- Possession of a controlled substance with intent to use and/or sell on agency property or within a one-block radius of the clinic

Medicaid Provider Manual

- Sexual harassment of staff and/or other individuals
- Loitering on the clinic property or within a one-block radius of the clinic

Administrative discontinuation of services can be carried out by two methods:

- **Immediate Termination** - This involves the discontinuation of services at the time of one of the above safety-related incidents or at the time an incident is brought to the attention of the OTP.
- **Enhanced Tapering Discontinuation** - This involves an accelerated decrease of the **MOUD** dose (usually by 10 mg or 10 percent a day). The manner in which **MOUD** is discontinued is at the discretion of the OTP physician to ensure the safety and well-being of the beneficiary.

It may be necessary for the OTP to refer beneficiaries who are being administratively discharged to the local access management system for evaluation for another level of care. Justification for non-compliance termination must be documented in the beneficiary's chart.

12.3 PRIMARY CARE OFFICE-BASED SUBSTANCE USE TREATMENT (OBSUT)

Primary care providers who do not have a specialty substance use disorder (SUD) benefit services contract with the PIHP are permitted to seek fee for service (FFS) or Medicaid Health Plan reimbursement for substance use treatment services in an office-based setting. (Refer to the Primary Care Office-Based Substance Use Treatment (OBSUT) subsection in the Practitioner chapter for additional information regarding reimbursement provision.)

12.4 SUB-ACUTE DETOXIFICATION

Sub-acute detoxification is defined as supervised care for the purpose of managing the effects of withdrawal from alcohol and/or other drugs as part of a planned sequence of addiction treatment. Detoxification is limited to the stabilization of the medical effects of the withdrawal and to the referral to necessary ongoing treatment and/or support services. Licensure as a sub-acute detoxification program is required.

Sub-acute detoxification is part of a continuum of care for substance use disorders and does not constitute the end goal in the treatment process. The detoxification process consists of three essential components: evaluation, stabilization, and fostering client readiness for, and entry into, treatment. A detoxification process that does not incorporate all three components is considered incomplete and inadequate.

Detoxification can take place in both residential and outpatient settings, and at various levels of intensity within these settings. Client placement to setting and to level of intensity must be based on ASAM Criteria and individualized determination of client need.

The following combinations of sub-acute detoxification settings and levels of intensity correspond to the LOC determination based on the ASAM Criteria.

Medicaid Provider Manual

- Outpatient Setting
 - Ambulatory Detoxification without extended on-site monitoring corresponding to ASAM Level 1-WM, or ambulatory detoxification with extended on-site monitoring (ASAM Level 2-WM).
 - Outpatient setting sub-acute detoxification must be provided under the supervision of a Substance Abuse Treatment Specialist. Services must have arrangements for access to licensed medical personnel as needed. ASAM Level 2-WM ambulatory detoxification services must be monitored by appropriately credentialed and licensed nurses.
- Residential Setting
 - Clinically Managed Residential Detoxification - Non-Medical or Social Detoxification Setting: Emphasizes peer and social support for persons who warrant 24-hour support (ASAM Level 3.2-WM). These services must be provided under the supervision of a Substance Abuse Treatment Specialist. Services must have arrangements for access to licensed medical personnel as needed.
 - Medically Monitored Inpatient Detoxification - Freestanding Detoxification Center – permanent facility with inpatient beds: These services must be staffed 24-hours-per-day, seven-days-per-week by a licensed physician or by the designated representative of a licensed physician (ASAM Level 3.7-WM).

This service is limited to stabilization of the medical effects of the withdrawal, and referral to necessary ongoing treatment and/or support services. This service, when clinically indicated, is an alternative to acute medical care provided by licensed health care professionals in a hospital setting.

Authorization requirements:

- Symptom alleviation is not sufficient for purposes of admission. There must be documentation of current beneficiary status that provides evidence the admission is likely to directly assist the beneficiary in the adoption and pursuit of a plan for further appropriate treatment and recovery.
- Admission to sub-acute detoxification must be made based on:
 - Medical necessity criteria.
 - LOC determination based on an evaluation of the six assessment dimensions of the current ASAM Criteria.
- Initial length-of-stay authorizations may be for up to three days, with additional days authorized if there is clinical evidence that detoxification is not successful or complete and authorization requirements continue to be met.

12.5 RESIDENTIAL TREATMENT

Residential Treatment is defined as intensive therapeutic service which includes overnight stay and planned therapeutic, rehabilitative or didactic counseling to address cognitive and behavioral impairments for the purpose of enabling the beneficiary to participate and benefit from less intensive treatment. A program director is responsible for the overall management of the clinical program, and treatment is provided by appropriate credentialed professional staff, including substance abuse specialists. Residential treatment must be staffed 24-hours-per-day. The clinical program must be provided under the supervision of a Substance Abuse Treatment Specialist with either full licensure or limited licensure as a psychologist, master's social worker, professional counselor, marriage and family therapist or physician. Services may be provided by a Substance Abuse Treatment Specialist or a non-degreed staff.

This intensive therapeutic service is limited to those beneficiaries who, because of specific cognitive and behavioral impairments, need a safe and stable environment in order to benefit from treatment.

Authorization requirements:

- The effects of the substance use disorder must be so significant and the resulting impairment so great that outpatient and intensive outpatient treatments have not been effective or cannot be safely provided, and when the beneficiary provides evidence of willingness to participate in treatment.
- Admissions to Residential Treatment must be based on:
 - Medical necessity criteria
 - LOC determination based on an evaluation of the six assessment dimensions of the current ASAM Criteria
- Additional days may be authorized when authorization requirements continue to be met, if there is evidence of progress in achieving treatment plan goals, and reauthorization is necessary to resolve cognitive and behavioral impairments which prevent the beneficiary from benefiting from less intensive treatment.

12.6 EXCLUDED SERVICES

- Room and board;
- All other services not addressed within Covered or Allowable Services; and
- Medicaid Substance Abuse Services funded Outside the PIHP Plan.

Some Medicaid-covered services are available to substance abuse beneficiaries but are provided outside of the PIHP. PIHPs are not responsible to pay for the following:

- Acute detoxification;
- Laboratory services related to substance abuse (with the exception of lab services required for Methadone);
- Medications used in the treatment/management of addictive disorders;
- Emergency medical care;
- Emergency transportation;

Medicaid Provider Manual

- Substance abuse prevention and treatment that occurs routinely in the context of providing primary health care; and
- Routine transportation to substance abuse treatment services which is the responsibility of the local MDHHS office or beneficiary's MHP.

Medicaid Provider Manual

SECTION 13 – TARGETED CASE MANAGEMENT /SUPPORT AND SERVICE COORDINATION

NOTE: This service is a State Plan EPSDT service when delivered to children birth-21 years.

Targeted Case Management	<p>Targeted case management is a covered service that assists beneficiaries to design and implement strategies for obtaining services and supports that are goal-oriented and individualized. Services include assessment, planning, linkage, advocacy, coordination and monitoring to assist beneficiaries in gaining access to needed health and dental services, financial assistance, housing, employment, education, social services, and other services and natural supports developed through the person-centered planning process. For children and youth, a family driven, youth guided planning process should be utilized. Targeted case management is provided in a responsive, coordinated, effective and efficient manner focusing on process and outcomes.</p> <p>Targeted case management services must be available for all children with serious emotional disturbance, adults with serious mental illness, persons with a developmental disability, and those with co-occurring substance use disorders who have multiple service needs, have a high level of vulnerability, require access to a continuum of mental health services from the PIHP, and/or are unable to independently access and sustain involvement with needed services.</p>
Supports Coordinator/Supports Coordinator Assistant/Services and Supports Broker	<p>Functions performed by a supports coordinator, supports coordinator assistant, services and supports broker, or otherwise designated representative of the PIHP that include assessing the need for support and service coordination, and assurance of the following:</p> <ul style="list-style-type: none">▪ Planning and/or facilitating planning using person-centered principles.▪ Developing an individual plan of service using the person-centered planning process.▪ Linking to, coordinating with, follow-up of, advocacy with, and/or monitoring of Specialty Services and Supports and other community services/supports.▪ Brokering of providers of services/supports.▪ Assistance with access to entitlements and/or legal representation.▪ Coordination with the Medicaid Health Plan, Medicaid fee-for-service, or other health care providers. <p>The role of the supports coordinator assistant is to perform the functions listed above, as they are needed, in lieu of a supports coordinator or case manager. A beneficiary would have only one of the three possible options: targeted case manager, supports coordinator, or supports coordinator assistant. When a supports coordinator assistant is used, a qualified supports coordinator or targeted case manager must supervise the assistant.</p>

Medicaid Provider Manual

	<p>A services and supports broker is used to explore the availability of community services and supports, housing, and employment and then to make the necessary arrangement to link the beneficiary with those supports. The role of the supports coordinator or supports coordinator assistant when a services and supports broker is used is to perform the remainder of the functions listed above as they are needed, and to assure that brokering of providers of services and supports is performed.</p> <p>Whenever services and supports brokers provide any of the supports coordination functions, it is expected that the beneficiary will also have a supports coordinator or case manager, or their assistant, employed by the PIHP or its provider network who assures that the other functions above are in place.</p> <p>If a beneficiary has both a supports coordinator or supports coordinator assistant AND a services and supports broker, the individual plan of service must clearly identify the staff who is responsible for each function. The PIHP must assure that it is not paying for the supports coordinator (or supports coordinator assistant) and the services and supports broker to perform service brokering. Likewise, when a supports coordinator (or supports coordinator assistant) facilitates a person-centered planning meeting, it is expected that the PIHP would not "double count" the time of any services and supports broker who also attends. During its annual on-site visits, MDHHS will review individual plans of service to verify that there is no duplication of service provision when both a supports coordinator assistant and a services and supports broker are assigned supports coordination responsibilities in a beneficiary's individual plan of service.</p> <p>Supports strategies will incorporate the principles of empowerment, community inclusion, health and safety assurances, and the use of natural supports. Supports coordinators will work closely with the beneficiary to assure their ongoing satisfaction with the process and outcomes of the supports, services, and available resources.</p>
--	---

13.1 PROVIDER QUALIFICATIONS

Providers must demonstrate the capacity to provide all core requirements specified below and have a sufficient number of staff to meet the needs of the target population.

Providers must document initial and ongoing training for case managers related to the core requirements and applicable to the target population served.

Caseload size and composition must be realistic for the case manager to complete the core requirements as identified in the individual plan of service developed through the person-centered planning process.

13.2 DETERMINATION OF NEED

The determination of the need for case management/supports coordination must occur at the completion of the intake process and through the person-centered planning process for beneficiaries receiving services and supports. Justification as to whether case management/supports coordination is needed or not must be documented in the beneficiary's record.

Beneficiaries must be provided choice of available, qualified case management/supports coordination staff upon initial assignment and on an ongoing basis.

Medicaid Provider Manual

13.3 CORE REQUIREMENTS

- Assuring that the person-centered planning process takes place and that it results in the individual plan of service.
- Independent facilitation of the person-centered plan is made available. Individuals who receive specialty behavioral health supports and services have the right to choose an IF to facilitate the PCP process that is used to develop the IPOS.
- Assuring that the plan of service identifies what services and supports will be provided, who will provide them, and how the case manager will monitor (i.e., interval of face-to-face contacts) the services and supports identified under each goal and objective.
- Overseeing implementation of the individual plan of service, including supporting the beneficiary's dreams, goals, and desires for optimizing independence; promoting recovery; and assisting in the development and maintenance of natural supports.
- Assuring the participation of the beneficiary on an ongoing basis in discussions related to the beneficiary's plans, goals, and status.
- Identifying and addressing gaps in service provision and addressing all issues, i.e., housing and employment.
- Coordinating the beneficiary's services and supports with all providers, making referrals, and advocating for the beneficiary.
- Assisting the beneficiary to access programs that provide financial, medical, and other assistance such as Home Help and Transportation services.
- Assuring coordination with the beneficiary's primary and other health care providers to ensure continuity of care.
- Coordinating and assisting the beneficiary in crisis intervention and discharge planning, including community supports after hospitalization.
- Facilitating the transition (e.g., from inpatient to community services, school to work, dependent to independent living) process, including arrangements for follow-up services.
- Assisting beneficiaries with crisis planning.
- Identifying the process for after-hours contact.
- Assisting the beneficiary in developing social networks.

Assessment

The provider must have the capacity to perform an initial written comprehensive assessment addressing the beneficiary's needs/wants, barriers to needs/wants, supports to address barriers, and health and welfare issues. Assessments must be updated when there is significant change in the condition or circumstances of the beneficiary. The individual plan of services must also reflect such changes.

Medicaid Provider Manual

Documentation	<p>The beneficiary's record must contain sufficient information to document the provision of case management/supports coordination, including the nature of the service, the date, and the location of contacts between the case manager/supports coordinator and the beneficiary, including whether the contacts were face-to-face. The frequency of face-to-face contacts must be dependent on the intensity of the beneficiary's needs.</p> <p>The case manager/supports coordinator must review services at intervals defined in the individual plan of service. The plan shall be kept current and modified when indicated (reflecting the intensity of the beneficiary's health and welfare needs). A beneficiary or their guardian or authorized representative may request and review the plan at any time. A formal review of the plan shall not occur less often than annually to review progress toward goals and objectives and to assess beneficiary satisfaction.</p>
Monitoring	<p>The case manager/supports coordinator must determine, on an ongoing basis, if the services and supports have been delivered, and if they are adequate to meet the needs/wants of the beneficiary. Frequency and scope (face-to-face and telephone) of case management/supports coordination monitoring activities must reflect the intensity of the beneficiary's health and welfare needs identified in the individual plan of services.</p>

Targeted case management/supports coordination shall not include direct delivery of ongoing day-to-day supports and/or training, or provision of other Medicaid services. Targeted case managers/supports coordinators are prohibited from exercising the agency's authority to authorize or deny the provision of services. Targeted case management/supports coordination shall not duplicate services that are the responsibility of another program.

13.4 STAFF QUALIFICATIONS

A primary case manager must be a qualified mental health or intellectual disability professional (QMHP or QIDP) or, if the case manager has only a bachelor's degree but without the specialized training or experience, they must be supervised by a QMHP or QIDP who does possess the training or experience. Services to a child with serious emotional disturbance must be provided by a QMHP who is also a child mental health professional. Services to children with developmental disabilities must be provided by a QIDP.

Qualifications of supports coordinators are a minimum of a Bachelor's degree in a human services field and one year of experience working with people with developmental disabilities if supporting that population; or a Bachelor's degree in a human services field and one year of experience with people with mental illness if supporting that population. Qualifications of supports coordinator assistants and independent services and supports brokers are a minimum of a high school diploma and equivalent experience (i.e., possesses knowledge, skills and abilities similar to supports coordinator qualifications) and functions under the supervision of a qualified supports coordinator. Independent services and supports brokers must meet these qualifications and function under the guidance and oversight of a qualified supports coordinator or case manager.

SECTION 14 – CHILDREN’S HOME AND COMMUNITY-BASED SERVICES WAIVER (CWP)

The Children’s Home and Community Based Services Waiver Program (CWP) provides services that are enhancements or additions to regular Medicaid coverage to children up to age 18 who are enrolled in the CWP.

Services, equipment and Environmental Accessibility Adaptations (EAAs) that require prior authorization from MDHHS must be submitted to the CWP Clinical Review Team at MDHHS. The team is comprised of a physician, registered nurse, psychologist, and licensed master’s social worker with consultation by a building specialist and an occupational therapist.

14.1 KEY PROVISIONS

The CWP enables Medicaid to fund necessary home- and community-based services for children with developmental disabilities who reside with their birth or legally adoptive parent(s) or with a relative who has been named legal guardian under the laws of the State of Michigan, regardless of their parent's income.

The CMHSP is responsible for assessment of potential waiver candidates. The CMHSP is also responsible for referring potential waiver candidates by completing the CWP "pre-screen" form and sending it to the MDHHS to determine priority rating.

Application for the CWP is made through the CMHSP. The CMHSP is responsible for the coordination of the child’s waiver services. The case manager, the child and their family, friends, and other professional members of the planning team work cooperatively to identify the child’s needs and to secure the necessary services. All services and supports must be included in the Individual Plan of Services (IPOS). The IPOS must be reviewed, approved and signed by the physician.

A CWP beneficiary must receive at least one children’s waiver service per month in order to retain eligibility.

14.2 ELIGIBILITY

The following eligibility requirements must be met:

- The child must have a developmental disability (as defined in Michigan state law), be less than 18 years of age and in need of habilitation services.
- The child must have a score on the Global Assessment of Functioning (GAF) Scale of 50 or below.
- The child must reside with their birth or legally adoptive parent(s) or with a relative who has been named the legal guardian for that child under the laws of the State of Michigan, provided that the relative is not paid to provide foster care for that child.
- The child is at risk of being placed into an ICF/IID facility because of the intensity of the child’s care and the lack of needed support, or the child currently resides in an ICF/IID facility but, with appropriate community support, could return home.
- The child must meet, or be below, Medicaid income and asset limits when viewed as a family of one (the parent's income is waived).

Medicaid Provider Manual

- The child's intellectual or functional limitations indicate that they would be eligible for health, habilitative and active treatment services provided at the ICF/IID level of care. Habilitative services are designed to assist individuals in acquiring, retaining and improving the self-help, socialization and adaptive skills necessary to reside successfully in home and community-based settings. Active treatment includes aggressive, consistent implementation of a program of specialized and generic training, treatment, health services and related services. Active treatment is directed toward the acquisition of the behaviors necessary for the beneficiary to function with as much self-determination and independence as possible, and the prevention or deceleration of regression or loss of current optimal functional status.

14.3 COVERED WAIVER SERVICES

Covered Medicaid services that continue to be available to CWP beneficiaries are listed in the Covered Services Section of this chapter. Refer to the Children's Waiver Community Living Support Services Appendix of this chapter for criteria for determining number of hours. Services covered under CWP include:

14.3.A. COMMUNITY LIVING SUPPORTS

Community Living Supports (CLS) provides assistance to a family in the care of their child while facilitating the child's independence and integration into the community. This service provides skill development related to activities of daily living, such as bathing, eating, dressing, personal hygiene, household chores and safety skills; skill development to achieve or maintain mobility, sensory-motor, communication, socialization and relationship-building skills, and participation in leisure and community activities. These supports must be provided directly to, or on behalf of, the child. The supports, as identified in the individual plan of services, are provided in the child's home and may be provided in community settings when integration into the community is an identified goal. These supports may serve to reinforce skills or lessons taught in school, therapy or other settings, but are not intended to supplant services provided in school or other settings.

Individuals who are identified in the individual plan of services to provide CLS to the child and family must meet provider qualifications.

The CMHSP must maintain the following documentation:

- A log of the CLS must be maintained in the child's record, documenting the provision of activities outlined in the plan.
- Provider qualifications and standards must be maintained for all staff providing services and supports to the child and family.

All service costs must be maintained in the child's file for audit purposes.

14.3.B. ENHANCED TRANSPORTATION

Transportation costs may be reimbursed when separately specified in the individual plan of services and provided by people other than staff performing CLS, in order to enable a child served by the CWP to gain access to waiver and other community services,

Medicaid Provider Manual

activities and resources. Transportation is limited to local distances, where local is defined as within the child's county or a bordering county. This service is an enhancement of transportation services covered under Medicaid. Family, neighbors, friends, or community agencies that can provide this service without charge must be utilized before seeking funding through the CWP. The availability and use of natural supports should be documented in the record.

Parents of children served by the waiver are not entitled to enhanced transportation reimbursement.

14.3.C. ENVIRONMENTAL ACCESSIBILITY ADAPTATIONS (EAAs)

Environmental Accessibility Adaptations (EAAs) include those physical adaptations to the home, specified in the individual plan of services, which are necessary to ensure the health, welfare and safety of the child, or enable them to function with greater independence in the home and without which the child would require institutionalization. Home adaptations may include the installation of ramps, widening of doorways, modification of bathroom facilities, or installation of specialized electric and plumbing systems that are essential to support the child's medical equipment. Requests for EAAs must be prior authorized by the CWP Clinical Review Team following denial by all applicable insurance sources, e.g., private insurance, Children's Special Health Care Services (CSHCS), Medicaid. All services shall be provided in accordance with applicable state or local building codes. A prescription is required and is valid for one year from the date of signature.

Standards of value purchasing must be followed. The EAA must be the most reasonable alternative, based on the results of a review of all options, including a change in the use of rooms within the home or alternative housing. The existing structure must have the capability to accept and support the proposed changes. The infrastructure of the home involved in the funded EAA (e.g., electrical system, plumbing, well/septic, foundation, heating/cooling, smoke detector systems, roof) must be in compliance with any applicable local codes. EAAs shall exclude costs for improvements exclusively required to meet local building codes.

The EAA must incorporate reasonable and necessary construction standards, excluding cosmetic improvements. The adaptation cannot result in valuation of the structure significantly above comparable neighborhood real estate values.

The EAA must demonstrate cost-effectiveness. The family must apply, with the assistance of the case manager if needed, to all applicable funding sources, such as housing commission grants, MSHDA, and community development block grants, for assistance. Acceptances or denials by these funding sources must be documented in the child's records. The CWP is a funding source of last resort.

Excluded are those adaptations or improvements to the home that are of general utility, are considered to be standard housing obligations of parents, and are not of direct medical or remedial benefit to the child. EAAs that are required to support proper functioning of medical equipment, such as electrical upgrades, are limited to the

Medicaid Provider Manual

requirements for safe operation of the specified equipment and are not intended to correct existing code violations in a child's home.

All work must be completed while the child is enrolled in the CWP.

Adaptations may be made to rental properties when the landowner agrees to the adaptation in writing. A written agreement between the landowner and the child's family must specify any requirements for restoration of the property to its original condition if the occupants move and must indicate that the CWP and MDHHS are not obligated for any restoration costs.

If a family purchases a home, or builds a home or addition while the child is receiving waiver services, it is the family's responsibility to assure that the home will meet the child's basic needs, such as having a ground floor bath/bedroom if the child has mobility limitations. The CWP does not cover construction costs in a new home or addition, or a home purchased after the beneficiary is enrolled in the waiver. The CWP funds may be authorized to assist with the adaptation noted above (e.g., ramps, grab bars, widening doorways) for a home recently purchased.

Additional square footage may be prior authorized following a MDHHS specialized housing consultation if it is determined that adding square footage is the only alternative available to make the home accessible and the most cost-effective alternative for housing. Additional square footage is limited to the space necessary to make the home wheelchair-accessible for a child with mobility impairments to prevent institutionalization; the amount will be determined by the direct medical or remedial need of the beneficiary. The family must exhaust all applicable funding options, such as the family's ability to pay, housing commission grants, MSHDA and community development block grants. Acceptances or denials by these funding sources must be documented in the child's records.

14.3.D. FAMILY TRAINING

This provides for training and counseling services for the families of children served on the CWP. For purposes of this service, "family" is defined as the people who live with or provide care to a child served on the CWP and may include a parent or siblings. Family does not include individuals who are employed to care for the child. Training includes instruction about treatment regimens and use of equipment specified in the plan of services, and must include updates as necessary to safely maintain the child at home.

Family training is also a counseling service directed to the family and designed to improve and develop the family's skills in dealing with the life circumstances of parenting a child with special needs. All family training must be included in the child's individual plan of services and must be provided on a face-to-face basis.

14.3.E. NON-FAMILY TRAINING

This service provides coaching, supervision and monitoring of CLS staff by professional staff (LLP, MSW, or QIDP). The professional staff will work with parents and CLS staff to implement the plan that addresses services designed to improve the child's social

Medicaid Provider Manual

interactions and self-control by instilling positive behaviors in the place of behaviors that are socially disruptive, injurious to the child or others, or that cause property damage.

14.3.F. FENCING

Fencing may be approved with documentation that it is essential to achieve the outcomes specified in the child's individual plan of services and necessary to meet a child's health and safety needs. Authorization for fencing is for a maximum of 200 feet of standard chain link fence and one gate. If it is determined that chain link fencing will not meet the child's health and safety needs, a standard stockade fence may be considered.

14.3.G. FINANCIAL MANAGEMENT SERVICES/FISCAL INTERMEDIARY SERVICES

Healthcare Common Procedure Coding System (HCPCS) code "T2025" should be used to bill for this service. This is a "per month" service with a maximum unit of one per month.

Financial Management Services/Fiscal Intermediary Services include, but are not limited to:

- Facilitation of the employment of service workers by the child's parent or guardian acting as the consumer's representative, including federal, state and local tax withholding/payments, unemployment compensation fees, wage settlements, and fiscal accounting;
- Assuring adherence to federal and state laws and regulations; and
- Ensuring compliance with documentation requirements related to management of public funds.

The fiscal intermediary may also perform other supportive functions that enable the consumer – through their parent or guardian - to self-direct needed services. These functions may include helping the consumer's representative recruit staff (e.g., developing job descriptions, placing ads, assisting with interviewing); contracting with or employing providers of services; verification of provider qualifications (including reference and background checks); and assisting the consumer and their representative to understand billing and documentation requirements.

This is a service that handles the financial flow-through of Medicaid dollars for children enrolled in the CWP who are using Choice Voucher arrangements. This CWP waiver service is available only to CWP consumers whose parent or guardian, serving as the consumer's representative, chooses to self-direct selected services through Choice Voucher arrangements. A CMHSP may terminate self-direction of services (and therefore Financial Management Services) when the health and welfare of the consumer is in jeopardy due to the failure of the consumer's representative to direct services and supports or when the consumer's representative consistently fails to comply with contractual requirements.

A fiscal intermediary is an independent legal entity – organization or individual - that acts as the fiscal agent of the CMHSP for the purpose of assuring fiduciary accountability for

Medicaid Provider Manual

the funds authorized to purchase specific services identified in the consumer's individual plan of service (IPOS). The fiscal intermediary receives funds from the CMHSP and makes payments authorized by the consumer's parent or guardian, as the consumer's representative. The fiscal intermediary acts as an employer agent when the consumer's representative directly employs staff or other service providers.

The fiscal intermediary can be an agency or organization (e.g., financial management services agency, accounting firm, local ARC or other advocacy organization) or individual (e.g., accountant, financial advisor/manager, attorney). The fiscal intermediary must meet requirements as identified in the MDHHS/CMHSP Managed Mental Health Supports and Services Contract – Attachment C3.4.4 Medicaid Managed Specialty Supports and Services Concurrent 1915(b)(c) Waiver Program FY12 (and subsequent years) – Attachment P3 4.4.

14.3.H. OVERNIGHT HEALTH AND SAFETY SUPPORTS

NOTE: OHSS is not available for individuals residing in licensed non-community facilities or settings. Payment of OHSS may not be made directly or indirectly to responsible relatives (i.e., spouses or parents of minor children) or a legal guardian.

The need for OHSS must be reviewed and established through the person-centered planning process with the beneficiary's specific needs identified that outline health and safety concerns and a history of behavior or action that has placed the beneficiary at risk of obtaining or maintaining their independent living arrangement. Each provider of OHSS services will ensure the provision of, or provide as its minimum responsibility, overnight supervision activities appropriate to the beneficiary's needs to achieve or maintain independent living, health, welfare, and safety.

14.3.H.1. COVERAGE [CHANGES MADE 4/1/2025]

For purposes of this service, "overnight" includes the hours a beneficiary is typically asleep for no more than 12 hours in a 24-hour period.

The purpose of OHSS is to enhance individual safety and independence with an awake provider supervising the health and welfare of a beneficiary overnight. OHSS is defined as the need for an awake provider to be present (i.e., physically on-site) to oversee and be ready to respond to a beneficiary's unscheduled needs if they occur during the overnight hours when they are typically asleep.

OHSS services are generally furnished on a regularly scheduled basis, for multiple days per week, or as specified in the Individual Plan of Service (IPOS), encompassing both health and safety support services needed for the individual to reside successfully in their own home and community-based settings.

OHSS may be appropriate when:

- Service is necessary to safeguard against injury, hazard, or accident.
- A beneficiary has an evaluation that includes medical necessity that determines the need for OHSS and will allow an individual to remain at home safely after all other available

Medicaid Provider Manual

preventive interventions/appropriate assistive technology, environmental modifications and specialty supplies and equipment (i.e., Lifeline, Personal Emergency Response System [PERS], electronic devices, etc.) have been undertaken to ensure the least intrusive and cost-effective intervention is implemented.

- A beneficiary requires supervision to prevent or mitigate mental health or disability related behaviors that may impact the beneficiary's overall health and welfare during the night.
- A beneficiary is non-self-directing (i.e., struggles to initiate and problem solve issues that may intermittently come up during the night or when they are typically asleep), confused or whose physical functioning overnight is such that they are unable to respond appropriately in a non-medical emergency (i.e., fire, weather-related events, utility failure, etc.).
- A beneficiary has a documented history of a behavior or action that supports the need to have an awake provider on-site for supported assistance with incidental care activities that may be needed during the night that cannot be pre-planned or scheduled.
- A beneficiary requires overnight supervision in order to maintain living arrangements in the most integrated community setting appropriate for their needs.

The following exceptions apply for OHSS:

- OHSS does not include friendly visiting or other social activities.
- OHSS is not available when the need is caused by a medical condition and the form of supervision required is medical in nature (i.e., nursing facility level of care, wound care, sleep apnea, overnight suctioning, end-stage hospice care, etc.) or in anticipation of a medical emergency (i.e., uncontrolled seizures, serious impairment to bodily functions, etc.) that could be more appropriately covered under PERS or medical specialty supplies.
- OHSS is not intended to supplant other medical or crisis emergency services to address acute injury or illness that poses an immediate risk to a person's life.
- OHSS is not available to prevent, address, treat, or control significantly challenging anti-social or severely aggressive individualized behavior.
- OHSS is not available for an individual who is anxious about being alone at night without a history of a mental health or disability related behavior(s) that indicates a medical need for overnight supports.
- OHSS is not intended to supplant services, such as respite, for the relief of the primary caregiver or legal guardian living in the same home. **(revised 4/1/2025)**
- OHSS is not intended to replace a parent's or legal guardian of a minor's obligations and parental rights of minor children living in a family home. **(text added 4/1/2025)**
- OHSS is not an alternative to inpatient psychiatric treatment or other appropriate levels of care to meet the beneficiary's needs and is not available to prevent potential suicide or other self-harm behaviors.

Medicaid Provider Manual

14.3.H.2. COORDINATION OF SERVICES AND CARE

The service normally involves the co-provision of several services through an awake provider in order to achieve the purpose of the service. OHSS services typically fall into this category of “round-the-clock” by the nature and institutional level of care required for HCBS Waiver participants. OHSS is intended to supplement other HCBS (i.e., Community Living Supports [CLS], respite, etc.) that are provided to the beneficiary as part of a comprehensive array of specialized waiver or developmental disabilities services (i.e., supports coordination, peer-delivered, etc.).

If a beneficiary is receiving CLS or respite supports and demonstrates the need for OHSS, the IPOS must document coordination of services to ensure the scope, nature of supervision and/or provider differ from the other community support services to prevent issues of duplicative services. OHSS is complementary of the other habilitative services, but typically does not comprise the entirety of the supports a beneficiary may need to obtain or maintain their independence in their community. OHSS services are enhanced services that are in addition to or concurrent with other waiver services, as outlined in the IPOS, and allow for the provision of supervision to ensure the health and safety of an individual overnight.

14.3.H.3. PROVIDER SERVICES

Providers have the responsibility for the health, welfare, and safety of the beneficiary overnight and must be awake to have the ability to intervene on behalf of the beneficiary. This assistance may take the form of observation and minor redirection of the beneficiary to perform tasks that will enable the beneficiary to maintain their overnight health and sleep safety.

Providers may perform minor redirection and/or prompting that are incidental to the care and supervision of the beneficiary over the course of the night such as:

- The ability to intervene on behalf of the beneficiary supervision of overnight activities, such as reinforcing independent living skills and minor redirection of their independent daily living tasks.
- Provide the level of supervision needed to ensure a beneficiary’s safety, along with the actions required if a beneficiary’s health or welfare are at risk.
- Safeguard the individualized supports needed overnight appropriate to the beneficiary's needs. Common issues, which include fire and evacuation ability, ability to respond independently to health needs during the night, and safety awareness.

14.3.I. RESPITE CARE

Respite care services are provided to the child on an intermittent or short-term basis because of the absence or need for relief of the parent. Respite is intended to support the parent who is the primary caregiver. This service can be provided by a qualified provider under contract with the CMHSP in the child’s home, foster home, group home, licensed respite care facility, licensed camp, or the home of a friend or relative. A parent or guardian may not be considered a provider, nor be reimbursed for this service. All

Medicaid Provider Manual

respite services are billed under HCPCS code T1005 – Respite Care Service 15 Min. – with modifiers as appropriate. The maximum respite allocation is 4,608 units (1,152 hours) per fiscal year.

The cost of room and board cannot be included as part of respite care, unless provided as part of the respite care in a facility that is not a private residence. Respite provided in an institution (i.e., ICF/IID, nursing facility, or hospital) is not covered by the CWP. When a child requires skilled nursing interventions for 24 hours, the maximum daily amount that one nurse can provide is 16 hours. When the family is not available to provide the additional eight hours of care, a second nurse will be required to provide services for the remainder of the 24-hour period. If a nurse provides respite to more than one child at the same time, the nurse can only provide skilled nursing interventions to one child at a time. Therefore, service for that child would be covered as RN or LPN respite, and services to the other child(ren) would be covered as aide-level respite.

14.3.J. SPECIALIZED MEDICAL EQUIPMENT AND SUPPLIES

Specialized medical equipment and supplies includes durable medical equipment, environmental safety and control devices, adaptive toys, activities of daily living (ADL) aids, and allergy control supplies that are specified in the child's individual plan of services. This service is intended to enable the child to increase their ability to perform ADLs or to perceive, control, or communicate with the environment in which the child lives. Generators may be covered for a beneficiary who is ventilator-dependent or requires daily use of oxygen via a concentrator. The size of a generator will be limited to the wattage required to provide power to essential life-sustaining equipment. This service also includes vehicle modifications, van lifts and wheelchair tie-downs. Specialized medical equipment and supplies includes items necessary for life support, ancillary supplies and equipment necessary for the proper functioning of such items, and durable and non-durable medical equipment not covered by Medicaid or through other insurance. (Refer to the Medical Supplier Chapter for information regarding Medicaid-covered equipment and supplies.)

Equipment and supplies must be of direct medical or remedial benefit to the child. "Direct medical or remedial benefit" is a prescribed specialized treatment and its associated equipment or environmental accessibility adaptation that is essential to the implementation of the child's individual plan of services. The plan must include documentation that, as a result of the treatment and its associated equipment or adaptation, institutionalization of the child will be prevented.

A prescription is required and is valid for one year from the date of signature. All items must be determined to be essential to the health, safety, welfare, and independent functioning of the child as specified in the individual plan of services. There must be documented evidence that the item is the most cost-effective alternative to meet the child's need following value purchasing standards. All items must meet applicable standards of manufacture, design and installation. The CMHSP, or its contract agency, must maintain documentation to support that the best value in warranty coverage (e.g., the most coverage for the least cost, per industry standards) was obtained for the item at the time of purchase.

Medicaid Provider Manual

The following are examples of items not covered under this service:

- Items that are not of direct medical or remedial benefit or that are considered to be experimental. "Experimental" means that the validity of use of the item has not been supported in one or more studies in a preferred professional journal.
- Furniture, appliances, bedding, storage cabinets, whirlpool tubs, and other non-custom items that may routinely be found in a home.
- Items that would normally be available to any child and would ordinarily be provided by the family.
- Items that are considered family recreational choices (outdoor play equipment, swimming pools, pool decks and hot tubs).
- The purchase or lease of vehicles and any repairs or routine maintenance to the vehicle.
- Educational supplies and equipment expected to be provided by the school.

Local Authorization of Specialized Medical Equipment and Supplies

As defined below under the various Healthcare Common Procedure Coding System (HCPCS) codes, the CMHSP may locally authorize selected medical equipment and supplies covered under this service category. Medicaid payment will not be made for items that exceed quantity/frequency limits or established Medicaid fee screens as published in the MDHHS CMHSP Children's Waiver Database in effect at the time the equipment or supply is authorized.

- **Miscellaneous therapeutic items and supplies, retail purchases, not otherwise classified; identify product in "Remarks" (HCPCS T1999)**

This code is used to bill Medicaid for age-appropriate adaptive toys identified in the child's individual plan of services to address the adaptive or therapeutic need for the item and the specific habilitative outcome.

Items that are typically available in a home and ordinarily provided by families, schools, etc. (e.g., crayons, coloring books, regular board games, educational or non-adaptive toys/software, CD/DVD players, camera, film, computers) are not covered.

- **Personal care item, not otherwise specified, each; identify product in "Remarks" (HCPCS S5199)**

This code is used to bill Medicaid for ADL aids that enable the child to be as independent as possible in areas of self-care. The child's individual plan of services must describe the purpose and use of the ADL aid and any training that the child requires for its use. ADL aids must not be similar in function to items previously billed to Medicaid.

- **Specialized supply, not otherwise specified, waiver; identify product in "Remarks" (HCPCS T2028)**

This code is used to bill Medicaid for allergy control supplies used for the on-going management of a diagnosed severe reaction to airborne irritants and must be specified in the child's individual plan of services. Household items routinely found in a home are not covered (e.g., bed linens, mattress, pillow, vacuum cleaner).

Medicaid Provider Manual

State-Level Prior Authorization of Specialized Medical Equipment and Supplies

All other items and services covered under this category must be prior authorized by the MDHHS CWP Clinical Review Team following denial by all applicable insurance sources, e.g., private insurance, CSHCS, Medicaid. (Refer to the Children's Waiver Program [CWP] Prior Authorization subsection for details regarding the prior authorization process.) Prior authorization will not be given for items and services that exceed quantity/frequency limits as published in the MDHHS CMHSP Children's Waiver Database in effect at the time the service is authorized. Pursuant to prior authorization by the MDHHS CWP Clinical Review Team and provision of the items or service, Medicaid payment will be at the rate prior authorized.

- **Specialized medical equipment, not otherwise specified, waiver (HCPCS T2029)**

This code is used to bill Medicaid for environmental safety and control devices that enable the child to be as independent as possible. These devices may assist in controlling the environment or assuring safety in conjunction with programs designed to teach safety awareness or skills. The child's individual plan of services must address the use of the device and include any training that the child requires for its use. Environmental safety and control devices do not include items of general utility such as standard smoke detectors, fire extinguishers, home security systems, and storage cabinets.

This service is limited to five environmental safety and control devices or sets of devices per quarter. A set is considered a group of like items that must be purchased in a quantity to meet the child's needs, e.g., outlet plug covers.

- **Repair or non-routine service for durable medical equipment other than oxygen requiring the skill of a technician, labor component, per 15 minutes (HCPCS K0739)**

This code is used to bill Medicaid for repairs to specialized medical equipment that are not covered benefits through other insurances. There must be documentation in the child's individual plan of services that the specialized medical equipment continues to be of direct medical or remedial benefit to the child. All applicable warranty and insurance coverage must be sought and denied before requesting funding for repairs through the CWP. The CMHSP must document that the repair is the most cost-effective solution when compared with replacement or purchase of a new item. If the equipment requires repairs due to misuse or abuse, the CMHSP must provide evidence of training in the use of the equipment to prevent future incidents.

- **Vehicle modifications, waiver; per service (HCPCS T2039)**

This code is used to bill Medicaid for modifications to full-size vans, van lifts and wheelchair tie-down systems. Modifications to the family-owned van must be necessary to ensure the accessibility of the child with mobility impairments, and the vehicle must be the child's primary means of transportation. The individual plan of services must specify the child's accessibility needs that will be addressed by these modifications.

Medicaid Provider Manual

Prior authorization for a van lift will be considered no more frequently than once every five years, which is the minimum life expectancy of a lift.

When purchasing new vehicles, many automobile manufacturers offer a rebate of up to \$1,000 to reimburse documented expenditures for modification of a vehicle for accessibility. The CMHSP must request that the family purchasing the vehicle obtain information regarding any rebate programs and apply the rebate toward the cost of the modifications.

Other modifications to a full-size van, such as raised doors, which are necessary to meet the child's accessibility needs will be considered. It is expected that the CMHSP will use prudence in considering and processing beneficiary requests for modifications to newly purchased vehicles (e.g., providing evidence that the child's needs were considered in purchasing a full-size van; purchasing a vehicle that has a raised roof). Conversions to mini-vans are limited to the same modification and would not include additional costs required to modify the frame (e.g., lower the floor) to accommodate a lift. Excluded are items such as automatic door openers, remote car starters, custom interiors, etc. The purchase of a vehicle or maintenance to the vehicle is the family's responsibility.

If the vehicle is stolen or damaged beyond repair within five years of the purchase, replacement would only be considered with documentation that the existing lift cannot be transferred to a new van and that no other funding source (e.g., automobile insurance, homeowner's insurance, personal liability, judgment settlement, etc.) is available to cover the replacement.

- **Durable medical equipment, miscellaneous (HCPCS E1399)**

This code is used to bill Medicaid for durable medical equipment as described below:

- Window air-conditioning unit for the room where the child spends the majority of their time (e.g., sleeping area). The child must have a documented medical diagnosis of one of the following specific medical diagnoses or conditions:
 - ◆ temperature regulation dysfunction due to brain injury or other medical diagnosis;
 - ◆ severe respiratory distress secondary to asthma, permanent lung damage, or other medical conditions which are exacerbated by heat and humidity;
 - ◆ severe dehydration resulting from a medical diagnosis (e.g., diabetes insipidus) which may result in hospitalization; or
 - ◆ severe cardiac problems which may result in hospitalization unless the environmental temperature is carefully controlled.

Medicaid Provider Manual

	<ul style="list-style-type: none">➤ Generator for a child who is ventilator-dependent or requires daily use of oxygen via a concentrator. The size of a generator will be limited to the wattage required to provide power to essential life-sustaining equipment (typically 5,000 watts) and is not intended to provide power for the entire home. The request for prior approval of a generator must include a documented history of power outages, including frequency and duration. The local power company must be notified in writing of the need to restore power on a priority basis due to the child's needs.➤ Therapeutic items, assistive technology, and other durable medical equipment for a child who has sensory, communication, or mobility needs when the item is reasonably expected to enable the child to perceive, control or communicate with the environment in which the child lives, to have a greater degree of independence than would be possible without the item or device, or to benefit maximally from a program designed to meet physical or behavioral needs.
--	---

14.3.K. SPECIALTY SERVICES

Specialty Services include:

- Music Therapies;
- Recreation Therapies;
- Art Therapies; and
- Massage Therapies.

Specialty Services may include the following activities: Child and family training; coaching and supervision of staff; monitoring of progress related to goals and objectives; and recommending changes in the plan. This may be used in addition to the traditional professional therapy model included in Medicaid.

Services must be directly related to an identified goal in the individual plan of service and approved by the physician. Service providers must meet the CMHSP provider qualifications, including appropriate licensure/certification. Services are limited to four sessions per therapy per month.

The CMHSP must maintain a record of all Specialty Service costs for audit purposes.

Hourly care services are not covered under Specialty Services.

14.4 CHILDREN'S WAIVER PROGRAM (CWP) PRIOR AUTHORIZATION

To determine if a specific service requires MDHHS CWP prior authorization, refer to the Covered Waiver Services subsection above. The CMHSP must complete and submit to the MDHHS CWP an original Prior Review and Approval Request (PRAR) form and the following documentation for each prior authorization request:

- Original current (within 365 days) prescription signed by a physician.
- Narrative justification of need completed by an appropriate professional.

Medicaid Provider Manual

- Documentation that the requested item, device, or modification is essential to the implementation of the child's individual plan of services and is of direct medical or remedial benefit to the child.
- A copy of the habilitation program (i.e., goals, objectives and methodologies) as related to the request and identified in the individual plan of services.
- Written denial of funding from other sources, including private insurance, Medicaid or CSHCS when applicable, charitable or community organizations, and housing grant programs. If the private insurance carrier requires prior authorization to determine coverage, a request for prior authorization must be submitted to the carrier before submitting the PRAR to the MDHHS CWP.
- Three similar bids for requests costing equal to or more than \$1,000; only one bid is required for requests costing less than \$1,000. If fewer than three bids are obtained for requests costing equal to or more than \$1,000, documentation must describe what efforts were made to secure the bids, and why fewer than three bids were obtained.

The completed PRAR and supporting documentation must be submitted to the MDHHS Children's Waiver Program. (Refer to the Directory Appendix for contact information.)

14.5 PROVIDER QUALIFICATIONS

14.5.A. INDIVIDUALS WHO PROVIDE RESPITE AND CLS

Individuals who provide respite and CLS must:

- Be at least 18 years of age.
- Be able to practice prevention techniques to reduce transmission of any communicable diseases from themselves to others in the environment where they are providing support.
- Have a documented understanding and skill in implementing the individual plan of services and report on activities performed.
- Be in good standing with the law (i.e., not a fugitive from justice, a convicted felon, or an illegal alien).
- Be able to perform basic first aid and emergency procedures.
- Be trained in recipient rights.
- Be an employee of the CMHSP or its contract agency, or an employee of the parent who is paid through a Choice Voucher arrangement. The Choice Voucher System is the designation or set of arrangements that facilitate and support accomplishing self-determination through the use of an individual budget, a fiscal intermediary and direct consumer-provider contracting.

14.5.B. INDIVIDUALS PERFORMING CASE MANAGEMENT FUNCTIONS

Individuals performing case management functions must meet the requirements for a Qualified Intellectual Disability Professional (QIDP) and have:

- A minimum of a Bachelor's degree in a human services field.
- One year of experience working with people with developmental disabilities.

SECTION 15 – HABILITATION SUPPORTS WAIVER FOR PERSONS WITH DEVELOPMENTAL DISABILITIES

Beneficiaries with developmental disabilities may be enrolled in Michigan's Habilitation Supports Waiver (HSW) and receive the supports and services as defined in this section. HSW beneficiaries may also receive other Medicaid State Plan covered services. A HSW beneficiary must receive at least one HSW habilitative service per month to retain eligibility. Medical necessity criteria should be used in determining the amount, duration, and scope of services and supports to be used. The beneficiary's services and supports that are to be provided under the auspices of the PIHP must be specified in their individual plan of services (IPOS) developed through the person-centered planning process.

HSW beneficiaries must be enrolled through the MDHHS enrollment process completed by the PIHP. The enrollment process must include annual verification that the beneficiary:

- Has a developmental disability (as defined by Michigan law);
- Is Medicaid-eligible;
- Is residing in a community setting;
- If not for HSW services, would require ICF/IID level of care services; and
- Chooses to participate in the HSW in lieu of ICF/IID services.

The PIHP's enrollment process responsibilities also include confirmation of changes in the beneficiary's enrollment status, including termination from the waiver, changes of residence requiring transfer of the waiver to another PIHP, and death. MDHHS continues to review bed size as part of the waiver enrollment which includes a limit of no more than 12 beds. Termination from the HSW may occur when the beneficiary no longer meets one or more of the eligibility criteria specified above as determined by the PIHP, does not receive at least one HSW habilitative service per month, moves out of the state, withdraws from the program voluntarily, or dies. An OBRA assessment must be provided for disenrollment due to nursing facility placement. Instructions for beneficiary enrollments and annual re-certification may be obtained from the MDHHS Bureau of Specialty Behavioral Health Services. (Refer to the Directory Appendix for contact information.)

PIHPs must report inactive status on HSW beneficiaries not living in community settings (e.g., hospital, nursing facility, Child Caring Institution [CCI], jail, prison, or juvenile detention facility). HSW beneficiaries can be on inactive status for 90 days. After the 90-day period, the PIHP shall start the disenrollment process if there is no transition planning for returning to the community.

The PIHP shall use value purchasing for HSW services and supports. The PIHP shall assist beneficiaries to examine their first- and third-party resources to pursue all reimbursements to which they may be entitled, and to make use of other community resources for non-PIHP covered activities, supports or services.

Reimbursement for services rendered under the HSW is included in the PIHP capitation rate.

Beneficiaries enrolled in the HSW may not be enrolled simultaneously in any other §1915(c) waiver.

Medicaid Provider Manual

Habilitation services under the HSW are not otherwise available to the beneficiary through a local educational agency under the Individuals with Disabilities Education Act (IDEA) or the Rehabilitation Act of 1973.

15.1 WAIVER SUPPORTS AND SERVICES

15.1.A. COMMUNITY LIVING SUPPORTS (CLS)

NOTE: This is a habilitative service.

Community Living Supports (CLS) facilitate an individual's independence, productivity, and promote inclusion and participation. The supports can be provided in the beneficiary's residence (licensed facility, family home, own home or apartment) and in community settings (including, but not limited to, libraries, city pools, camps, etc.), and may not supplant other waiver or Medicaid State Plan covered services (e.g., out-of-home non-vocational habilitation, Home Help Program, personal care in specialized residential setting, respite). The supports are:

- Assisting (that exceeds the Medicaid State Plan for adults), prompting, reminding, cueing, observing, guiding and/or training the beneficiary with:
 - Meal preparation;
 - Laundry;
 - Routine, seasonal, and heavy household care and maintenance (where no other party, such as a landlord or licensee, has responsibility for provision of these services);
 - Activities of daily living, such as bathing, eating, dressing, personal hygiene; and
 - Shopping for food and other necessities of daily living.
- Assisting, supporting and/or training the beneficiary with:
 - Money management;
 - Non-medical care (not requiring nurse or physician intervention);
 - Socialization and relationship building;
 - Transportation (excluding to and from medical appointments that are the responsibility of Medicaid through Medicaid Fee for Service [FFS] or the Medicaid Health Plan [MHP]) from the beneficiary's residence to community activities, among community activities, and from the community activities back to the beneficiary's residence);
 - Leisure choice and participation in regular community activities;
 - Attendance at medical appointments; and
 - Acquiring goods and/or services other than those listed under shopping and non-medical services.
- Reminding, observing, and/or monitoring of medication administration.

Medicaid Provider Manual

CLS does not include costs associated with room and board. Payments for CLS may not be made, directly or indirectly, to responsible relatives (i.e., spouses or parents of minor children) or the legal guardian.

For beneficiaries living in unlicensed homes, CLS assistance with meal preparation, laundry, routine household care and maintenance, ADL, and/or shopping may be used to complement Home Help services when the beneficiary's needs for this assistance have been officially determined to exceed MDHHS allowable parameters. Reminding, observing, guiding, and/or training of these activities are CLS coverages that do not supplant Home Help. CLS may be provided in a licensed specialized residential setting as a complement to, and in conjunction with, Medicaid State Plan coverage of Personal Care in Specialized Residential Settings.

If beneficiaries living in unlicensed homes need assistance with meal preparation, laundry, routine household care and maintenance, ADL, and/or shopping, the beneficiary must request Home Help from MDHHS. CLS may be used for those activities while the beneficiary awaits determination by MDHHS of the amount, scope and duration of Home Help. If the beneficiary requests it, the PIHP must assist with applying for Home Help or submitting a request for a Fair Hearing when the beneficiary believes that the MDHHS authorization of amount, scope and duration of Home Help does not accurately reflect their needs. CLS may also be used for those activities while the beneficiary awaits the decision from a Fair Hearing of the appeal of a MDHHS decision.

CLS provides support to a beneficiary younger than 18, and the family in the care of their child, while facilitating the child's independence and integration into the community. This service provides skill development related to ADL, such as bathing, eating, dressing, personal hygiene, household chores and safety skills; and skill development to achieve or maintain mobility, sensory-motor, communication, socialization and relationship-building skills, and participation in leisure and community activities. These supports must be provided directly to, or on behalf of, the child. These supports may serve to reinforce skills or lessons taught in school, therapy, or other settings. For children and adults up to age 26 who are enrolled in school, CLS services are not intended to supplant services provided in school or other settings or to be provided during the times when the child or adult would typically be in school but for the parent's choice to home-school.

15.1.B. ENHANCED MEDICAL EQUIPMENT AND SUPPLIES

Enhanced medical equipment and supplies include devices, supplies, controls, or appliances that are not available under regular Medicaid coverage or through other insurances. (Refer to the Medical Supplier Chapter of this manual for more information about Medicaid-covered equipment and supplies.) All enhanced medical equipment and supplies must be specified in the IPOS and must enable the beneficiary to increase their abilities to perform ADL; or to perceive, control, or communicate with the environment.

Items that are not of direct medical or remedial benefit, or that are considered to be experimental to the beneficiary, are excluded from coverage.

Medicaid Provider Manual

- "Direct medical or remedial" benefit is a prescribed specialized treatment and its associated equipment or environmental accessibility adaptation that are essential to the implementation of the IPOS.
- "Experimental" means that the validity of the use of the item has not been supported in one or more studies in a refereed professional journal.

The IPOS must document that, as a result of the treatment and its associated equipment or adaptation, institutionalization of the beneficiary will be prevented. There must be documented evidence that the item is the most cost-effective alternative to meet the beneficiary's need. All items must be ordered on a physician's prescription as defined in the General Information section of this chapter. An order is valid one year from the date it was signed. This coverage includes:

- Adaptations to vehicles;
- Items necessary for life support;
- Ancillary supplies and equipment necessary for proper functioning of such items; and
- Durable and non-durable medical equipment not available under the Medicaid State Plan.

Generators may be covered for a beneficiary who is ventilator dependent or requires daily use of an oxygen concentrator. The size of a generator will be limited to the wattage required to provide power to essential life-sustaining equipment.

Assessments and specialized training needed in conjunction with the use of such equipment, as well as warranted upkeep and repair, shall be considered as part of the cost of the services.

Furnishings (e.g., furniture, appliances, bedding) and other non-custom items (e.g., wall and floor coverings, decorative items) that are routinely found in a home are not included.

Items that are considered family recreational choices are not covered (e.g., outdoor play equipment, swimming pools, pool decks and hot tubs). The purchase or lease of a vehicle, as well as any repairs or routine maintenance to the vehicle, is not covered. Educational equipment and supplies expected to be provided by the school are not covered. Eyeglasses, hearing aids, and dentures are not covered.

Covered items must meet applicable standards of manufacture, design, and installation. There must be documentation that the best value in warranty coverage was obtained for the item at the time of purchase. The PIHP should have a process in place that gives notice to a medical equipment supplier that purchase of the equipment or supply has been authorized.

Repairs to enhanced medical equipment that are not covered benefits through other insurances may be covered. There must be documentation in the IPOS that the enhanced medical equipment continues to be of direct medical or remedial benefit. All applicable warranty and insurance coverage must be sought and denied before payment is made for repairs. The PIHP must document the repair is the most cost-effective solution when compared with replacement or purchase of a new item. If the equipment

Medicaid Provider Manual

requires repairs due to misuse or abuse, the PIHP must provide evidence of training in the use of the equipment to prevent future incidents.

The PIHP must assure that all applicable private insurance, Medicare and/or Medicaid requirements for the procurement of durable medical equipment and supplies have been met. The PIHP may not use the waiver service to purchase equipment or supplies that would have been covered by another program if the program's rules were followed, including using providers who participate with that program.

15.1.C. ENHANCED PHARMACY

Enhanced Pharmacy is defined as physician-ordered, nonprescription "medicine chest" items as specified in the beneficiary's IPOS. Items that are not of direct medical or remedial benefit to the beneficiary are not allowed. Only the following items are allowable:

- Cough, cold, pain, headache, allergy, and/or gastrointestinal distress remedies;
- Vitamins and minerals;
- Special dietary juices and foods that augment, but do not replace, a regular diet;
- Thickening agents for safe swallowing when the beneficiary has a diagnosis of dysphagia and either:
 - A history of aspiration pneumonia, or
 - Documentation that the beneficiary is at risk of insertion of a feeding tube without thickening agents for safe swallowing;
- First aid supplies (e.g., band-aids, iodine, rubbing alcohol, cotton swabs, gauze, antiseptic cleansing pads);
- Special oral care products to treat specific oral conditions beyond routine mouth care (e.g., special toothpaste, toothbrushes, anti-plaque rinses, antiseptic mouthwashes); and
- Special items (i.e., accommodating common disabilities -- longer, wider handles -- e.g., tweezers and nail clippers).

Routine cosmetic products (e.g., make-up base, aftershave, mascara, and similar products) are not included. However, products necessary to ameliorate negative visual impact of serious facial disfigurements (e.g., massive scarring) and/or skin conditions (including exposed area eczema, psoriasis, and/or acne) will be covered. Refer to the Pharmacy Chapter in this manual for information about Medicaid-covered prescriptions.

HSW funds cannot be used to pay for copays for other prescription plans the beneficiary may have.

The services under Enhanced Pharmacy are limited to additional services not otherwise covered under the Medicaid State Plan, including EPSDT.

Medicaid Provider Manual

15.1.D. ENVIRONMENTAL MODIFICATIONS

Environmental Modifications are physical adaptations to the home and/or workplace required by the beneficiary's assessed need and identified in the IPOS that are necessary to ensure the health, safety, and welfare of the beneficiary, or enable them to function with greater independence within the environment(s) and without which the beneficiary would require institutionalization.

Adaptations may include:

- The installation of ramps and grab bars;
- Widening of doorways;
- Modification of bathroom facilities;
- Installation of specialized electrical and plumbing systems that are necessary to accommodate the medical equipment and supplies necessary for the welfare of the beneficiary; and
- Environmental control devices that replace the need for paid staff and increase the beneficiary's ability to live independently, such as automatic door openers.

Excluded are those adaptations or improvements to the home that are of general utility, are considered to be standard housing obligations of the beneficiary and are not of direct medical or remedial benefit. Examples of exclusions include, but are not limited to, carpeting, roof repair, sidewalks, driveways, heating, central air conditioning (except under exceptions noted in the service definition), garages, raised garage doors, storage and organizers, hot tubs, whirlpool tubs, swimming pools, landscaping and general home repairs. The HSW does not cover construction costs in a new home or additions to a home purchased after the beneficiary is enrolled in the waiver.

"Direct medical or remedial" benefit is a prescribed specialized treatment and its associated equipment or environmental accessibility adaptation that are essential to the implementation of the IPOS. The plan must document that, as a result of the treatment and its associated equipment or adaptation, institutionalization of the beneficiary will be prevented. There must be documented evidence that the item is the most cost-effective alternative to meet the beneficiary's need. An example of a reasonable alternative, based on the results of a review of all options, may include changing the purpose, use, or function of a room within the home or finding alternative housing. Assessments and specialized training needed in conjunction with the use of such environmental modifications are included as a part of the cost of the service. All items must be ordered on a physician's prescription as defined in the General Information section of this chapter. An order is valid for one year from the date it was signed.

Central air-conditioning is included only when prescribed by a physician and specified with extensive documentation in the IPOS as to how it is essential in the treatment of the beneficiary's illness or condition. This supporting documentation must demonstrate the cost-effectiveness of central air compared to the cost of window units in all rooms that the beneficiary must use. Environmental modifications that are required to support proper functioning of medical equipment, such as electrical upgrades, are limited to the

Medicaid Provider Manual

requirements for safe operation of the specified equipment and are not intended to correct existing code violations in a beneficiary's home.

The PIHP must assure there is a signed contract or bid proposal with the builder prior to the start of an environmental modification. It is the responsibility of the PIHP to work with the beneficiary and builder to ensure that the work is completed as outlined in the contract or bid proposal. If the contract is terminated prior to the completion of the work, HSW funds may not be used to pay for any additional costs resulting from the termination of the contract.

Adaptations may be made to rental properties when the landowner agrees to the adaptation in writing. A written agreement between the landowner, the beneficiary, and the PIHP must specify any requirements for restoration of the property to its original condition if the beneficiary moves. If a beneficiary or their family purchases or builds a home while receiving waiver services, it is the beneficiary's or family's responsibility to ensure that the home will meet basic needs, such as having a ground floor bath/bedroom if the beneficiary has mobility limitations. HSW funds may be authorized to assist with the adaptations noted above (e.g., ramps, grab bars, widening doorways, etc.) for a home recently purchased. If modifications are needed to a home under construction that require special adaptation to address the IPOS (e.g., roll-in shower), the HSW may be used to fund the difference between the standard fixture and the modification required to accommodate the beneficiary's need.

Environmental modifications for **licensed settings** includes only the remaining balance of previous environmental modification costs that accommodate the specific needs of current waiver beneficiaries, and will be limited to the documented portion being amortized in the mortgage, or the lease cost per bed. Environmental modifications exclude the cost of modifications required for basic foster care licensure or to meet local building codes.

The existing structure must have the capability to accept and support the proposed changes. The infrastructure of the home involved in the funded modifications (e.g., electrical system, plumbing, well/septic, foundation, heating/cooling, smoke detector systems, roof) must be in compliance with any applicable local codes. Environmental modifications shall exclude costs for improvements exclusively required to meet local building codes.

The environmental modification must incorporate reasonable and necessary construction standards, excluding cosmetic improvements. The adaptation cannot result in valuation of the structure significantly above comparable neighborhood real estate values.

The beneficiary, with the direct assistance by the PIHP supports coordinator, when necessary, must make a reasonable effort to access all available funding sources, such as housing commission grants, Michigan State Housing Development Authority (MSHDA), and community development block grants, for assistance. A record of efforts to apply for alternative funding sources must be documented in the beneficiary's records, as well as acceptances or denials by these funding sources. The HSW is a funding source of last resort.

Medicaid Provider Manual

Adaptations to the **work environment** are limited to those necessary to accommodate the beneficiary's individualized needs and cannot be used to supplant the requirements of Section 504 of the Rehabilitation Act, the Americans with Disabilities Act (ADA), or covered by the Michigan Department of Labor and Economic Opportunity (LEO) Michigan Rehabilitation Services (MRS) or the LEO Bureau of Services for Blind Persons (BSBP).

All services must be provided in accordance with applicable state or local building codes.

15.1.E. FAMILY TRAINING

Family Training includes training and counseling services for the families of beneficiaries served by the waiver. For purposes of this service, "family" is defined as family members who live with or provide care to the beneficiary on the HSW, and may include parent, spouse, children, relatives, foster family, unpaid caregivers, or in-laws.

Training includes instructions about treatment regimens and use of equipment specified in the IPOS, and includes updates as needed to safely maintain the beneficiary at home. Family training goals, and the content, frequency, and duration of the training and/or counseling, should be identified in the beneficiary's IPOS.

Not included are individuals who are employed to provide waiver services for the beneficiary.

The services under Family Training are limited to additional services not otherwise covered under the Medicaid State Plan, including EPSDT.

15.1.F. FISCAL INTERMEDIARY

Fiscal Intermediary services are defined as services that assist the beneficiary, or a representative identified in the beneficiary's IPOS, to meet the beneficiary's goals of community participation and integration, independence or productivity while controlling their individual budget, and choosing staff who will provide the services and supports identified in the IPOS and authorized by the PIHP. The fiscal intermediary helps the beneficiary manage and distribute funds contained in the individual budget. Fiscal intermediary services include, but are not limited to:

- Facilitation of the employment of service workers by the beneficiary, including federal, state, and local tax withholding/payments, unemployment compensation fees, wage settlements, and fiscal accounting;
- Tracking and monitoring beneficiary-directed budget expenditures and identifying potential over- and under-expenditures;
- Ensuring adherence to federal and state laws and regulations; and
- Ensuring compliance with documentation requirements related to management of public funds.

The fiscal intermediary may also perform other supportive functions that enable the beneficiary to self-direct needed services and supports. These functions may include selecting, contracting with or employing and directing providers of services, verification

Medicaid Provider Manual

of provider qualifications (including reference and background checks), and assisting the beneficiary to understand billing and documentation requirements.

Fiscal intermediary services are available only to beneficiaries choosing the self-determination option.

Fiscal intermediary services may not be authorized for use by a beneficiary's representative where that representative is not conducting tasks in ways that fit the beneficiary's preferences, and/or do not promote achievement of the goals contained in the beneficiary's IPOS so as to promote independence and inclusive community living for the beneficiary, or when they are acting in a manner that is in conflict with the interests of the beneficiary.

15.1.G. GOODS AND SERVICES

The purpose of Goods and Services is to promote individual control over, and flexible use of, the individual budget by the beneficiary using self-directed services and facilitate creative use of funds to accomplish the goals identified in the IPOS through achieving better value or an improved outcome. Goods and Services must increase independence, facilitate productivity, or promote community inclusion and substitute for human assistance (such as personal care in the Medicaid State Plan and CLS and other one-to-one support as described in the HSW or covered Medicaid State Plan definitions) to the extent that individual budget expenditures would otherwise be made for the human assistance.

A Goods and Services item must be identified using a person-centered planning process, meet medical necessity criteria, and be documented in the IPOS. Purchase of a warranty may be included when it is available for the item and is financially reasonable.

Goods and Services are available only to beneficiaries who self direct their services whose individual budget is lodged with a fiscal intermediary.

This coverage may not be used to acquire goods or services that are prohibited by federal or state laws or regulations, e.g., purchase or lease or routine maintenance of a vehicle.

15.1.H. NON-FAMILY TRAINING

This service provides coaching, training, supervision, and monitoring of CLS and respite staff by clinical professionals working within the scope of their practice. Professional staff work with CLS and respite staff to implement the beneficiary's IPOS, with focus on all behavioral health services designed to assist the beneficiary in acquiring, retaining, and improving self-help, socialization, and adaptive skills necessary to reside successfully in home and community-based settings. The activities of the professional staff ensure the appropriateness of services delivered by CLS and respite staff and continuity of care. The service provider is selected on the basis of their competency in the aspect of the IPOS on which training is conducted.

Services under Non-Family Training are limited to additional services not otherwise covered under the Medicaid State Plan, including EPSDT.

Medicaid Provider Manual

15.1.I. OUT-OF-HOME NONVOCATIONAL HABILITATION

NOTE: This is a habilitative service.

This service provides assistance with acquisition, retention, or improvement in self-help, socialization, and adaptive skills; and the supports services, including transportation to and from, incidental to the provision of that assistance that takes place in a non-residential setting, separate from the home or facility in which the beneficiary resides.

Examples of incidental support include:

- Aides helping the beneficiary with their mobility, transferring, and personal hygiene functions at the various sites where habilitation is provided in the community.
- When necessary, helping the person to engage in the habilitation activities (e.g., interpreting).

Services must be furnished on a regularly scheduled basis for one or more days per week unless provided as an adjunct to other day activities included in the beneficiary's IPOS.

These supports focus on enabling the beneficiary to attain or maintain their maximum functioning level, and should be coordinated with any physical, occupational, or speech therapies listed in the IPOS. Services may serve to reinforce skills or lessons taught in school, therapy, or other settings.

15.1.J. OVERNIGHT HEALTH AND SAFETY SUPPORTS (OHSS) [CHANGES MADE 4/1/2025]

NOTE: Overnight Health and Safety Supports (OHSS) is not available for beneficiaries residing in licensed non-community facilities or settings.

Payment of OHSS may not be made directly or indirectly to responsible relatives (i.e., spouses or parents of minor children) or a legal guardian.

The need for OHSS must be reviewed and established through the person-centered planning process, with the beneficiary's specific needs identified that outline health and safety concerns and a history of behavior or action that has placed the beneficiary at risk of obtaining or maintaining their independent living arrangement. Each provider of OHSS services will ensure the provision of, or provide as its minimum responsibility, overnight supervision activities appropriate to the beneficiary's needs to achieve or maintain independent living, health, welfare, and safety.

For purposes of this service, "overnight" includes the hours a beneficiary is typically asleep for no more than 12 hours in a 24-hour period.

The purpose of OHSS is to enhance individual safety and independence with an awake provider supervising the health and welfare of a beneficiary overnight. OHSS is defined as the need for an awake provider to be present (i.e., physically on-site) to oversee and be ready to respond to a beneficiary's unscheduled needs if they occur during the overnight hours when they are typically asleep.

Medicaid Provider Manual

OHSS services are generally furnished on a regularly scheduled basis, for multiple days per week, or as specified in the IPOS, encompassing both health and safety support services needed for the beneficiary to reside successfully in their own home and community-based settings.

OHSS may be appropriate when:

- Service is necessary to safeguard against injury, hazard, or accident.
- A beneficiary has an evaluation that includes medical necessity that determines the need for OHSS and will allow a beneficiary to remain at home safely after all other available preventive interventions/appropriate assistive technology, environmental modifications and specialty supplies and equipment (i.e., Lifeline, Personal Emergency Response System [PERS], electronic devices, etc.) have been undertaken to ensure the least intrusive and cost-effective intervention is implemented.
- A beneficiary requires supervision to prevent or mitigate mental health or disability related behaviors that may impact the beneficiary's overall health and welfare during the night.
- A beneficiary is non-self-directing (i.e., struggles to initiate and problem solve issues that may intermittently come up during the night or when they are typically asleep), confused or whose physical functioning overnight is such that they are unable to respond appropriately in a non-medical emergency (i.e., fire, weather-related events, utility failure, etc.).
- A beneficiary has a documented history of a behavior or action that supports the need to have an awake provider on-site for supported assistance with incidental care activities that may be needed during the night that cannot be pre-planned or scheduled.
- A beneficiary requires overnight supervision in order to maintain living arrangements in the most integrated community setting appropriate for their needs.

The following exceptions apply for OHSS:

- OHSS does not include friendly visiting or other social activities.
- OHSS is not available when the need is caused by a medical condition and the form of supervision required is medical in nature (i.e., nursing facility level of care, wound care, sleep apnea, overnight suctioning, end-stage hospice care, etc.) or in anticipation of a medical emergency (i.e., uncontrolled seizures, serious impairment to bodily functions, etc.) that could be more appropriately covered under PERS or medical specialty supplies.
- OHSS is not intended to supplant other medical or crisis emergency services to address acute injury or illness that poses an immediate risk to a person's life.
- OHSS is not available to prevent, address, treat, or control significantly challenging anti-social or severely aggressive individualized behavior.
- OHSS is not available for a beneficiary who is anxious about being alone at night without a history of a mental health or disability related behavior(s) that indicates a medical need for overnight supports.

Medicaid Provider Manual

- OHSS is not intended to supplant services, such as respite, for the relief of the primary caregiver or legal guardian living in the same home. **(revised 4/1/2025)**
- OHSS is not intended to replace a parent's or legal guardian of a minor's obligations and parental rights of minor children living in a family home. **(text added 4/1/2025)**
- OHSS is not an alternative to inpatient psychiatric treatment or other appropriate levels of care to meet the beneficiary's needs and is not available to prevent potential suicide or other self-harm behaviors.

15.1.J.1. COORDINATION OF SERVICES AND CARE

The service normally involves the co-provision of several services through an awake provider in order to achieve the purpose of the service. OHSS services typically fall into a category of "round-the-clock" by the nature and institutional level of care required for Home and Community Based Services (HCBS) Waiver beneficiaries. OHSS is intended to supplement other HCBS (i.e., CLS, respite, etc.) that are provided to the beneficiary as part of a comprehensive array of specialized waiver or developmental disabilities services (i.e., supports coordination, peer-delivered, etc.).

If a beneficiary is receiving CLS or respite supports and demonstrates the need for OHSS, the IPOS must document coordination of services to ensure the scope, nature of supervision and/or provider differ from the other community support services to prevent issues of duplicative services. OHSS is complementary of other habilitative services, but typically does not comprise the entirety of the supports a beneficiary may need to obtain or maintain their independence in their community. OHSS services are enhanced services that are in addition to or concurrent with other waiver services, as outlined in the IPOS, and allow for the provision of supervision to ensure the health and safety of a beneficiary overnight.

15.1.J.2. PROVIDER SERVICES

Providers have the responsibility for the health, welfare, and safety of the beneficiary overnight and must be awake to have the ability to intervene on behalf of the beneficiary. This assistance may take the form of observation and minor redirection of the beneficiary to perform tasks that will enable the beneficiary to maintain their overnight health and sleep safety.

Providers may perform minor redirection and/or prompting that are incidental to the care and supervision of the beneficiary over the course of the night such as:

- The ability to intervene on behalf of the beneficiary supervision of overnight activities, such as reinforcing independent living skills and minor redirection of their independent daily living tasks.
- Provide the level of supervision needed to ensure a beneficiary's safety, along with the actions required if a beneficiary's health or welfare is at risk.
- Safeguard the individualized supports needed overnight appropriate to the beneficiary's needs. Common issues include fire and evacuation ability, ability to respond independently to health needs during the night, and safety awareness.

Medicaid Provider Manual

15.1.K. PERSONAL EMERGENCY RESPONSE SYSTEMS (PERS)

PERS can be identified as electronic devices that enable beneficiaries to secure help in the event of an emergency. The beneficiary may also wear a portable "help" button to allow for mobility. The system is connected to the beneficiary's phone and programmed to signal a response center once the button is activated. The response center is staffed by trained professionals. This service includes a one-time installation and up to 12 monthly monitoring services per year.

PERS coverage should be limited to beneficiaries living alone (or living with a roommate who does not provide supports), or who are alone for significant parts of the day; who have no regular support or service provider for those parts of the day; and who would otherwise require extensive routine support and guidance.

15.1.L. PREVOCATIONAL SERVICES

NOTE: This is a habilitative service.

Prevocational services involve the provision of learning and work experiences where a beneficiary can develop general, non-job-task-specific strengths and skills that contribute to individual CIE. Services are expected to occur over a defined period of time and provided in sufficient amount and scope to achieve the outcome, as determined by the beneficiary and their care planning team in the ongoing person-centered planning process. Services are expected to specifically involve strategies that enhance a beneficiary's employability. Individual competitive integrated employment (CIE) or supported employment are considered successful outcomes of prevocational services. However, participation in prevocational services is not a required prerequisite for individual CIE or receiving supported employment services.

Prevocational services should enable each beneficiary to attain individual CIE in the community in which the beneficiary is compensated at or above the minimum wage, but not less than the customary wage and level of benefits paid by the employer for the same or similar work performed by individuals without disabilities, and matched to the beneficiary's interests, strengths, priorities, abilities, and capabilities. Services are intended to develop and teach general skills that lead to employment including, but not limited to:

- ability to communicate effectively with supervisors, co-workers and customers;
- generally accepted community workplace conduct and dress;
- ability to follow directions;
- ability to attend to tasks;
- workplace problem solving skills and strategies;
- general workplace safety; and
- mobility training.

Medicaid Provider Manual

Support of employment outcomes is a part of the person-centered planning process and emphasizes informed consumer choice. This process specifies the beneficiary's personal outcomes toward a goal of productivity, identifies the services and items, including prevocational services and other employment-related services that advance achievement of the beneficiary's outcomes, and addresses the alternatives that are effective in supporting their outcomes. Prevocational services provide learning and work experiences, including volunteering, where the beneficiary can develop general, non-job-task-specific strengths and skills that contribute to employability in CIE.

Beneficiaries who receive prevocational services during some days or parts of days may also receive other waiver services, such as supported employment, out-of-home non-vocational habilitation, or CLS, at other times. Beneficiaries who are still attending school may receive prevocational training and other work-related transition services through the school system and may also participate in prevocational services designed to complement and reinforce the skills being learned in the school program during portions of their day that are not the educational system's responsibility, e.g., after school or on weekends and school vacations.

Beneficiaries participating in prevocational services may be compensated in accordance with applicable Federal laws and regulations, but the provision of prevocational services is intended to lead to permanent integrated employment.

Prevocational services needed for each beneficiary are documented, coordinated, and non-duplicative of other services otherwise available under a program funded under Section 110 of the Rehabilitation Act of 1973 or Section 602(16) and (17) of IDEA (20 U.S.C. 1401(16 and 17)).

Prevocational services may be provided to supplement, but may not duplicate, services provided under supported employment or out-of-home non-vocational habilitation services. Coordination with the beneficiary's school is necessary to ensure that prevocational services provided in the waiver do not duplicate or supplant transition services that are the responsibility of the educational program. Transportation provided between the beneficiary's place of residence and the site of the prevocational services, or between habilitation sites, is included as part of the prevocational and/or habilitation services.

Assistance with personal care or other ADL that are provided to a beneficiary during the receipt of prevocational services may be included as part of prevocational services or may be provided as a separate Medicaid State Plan Home Help service or CLS service under the waiver, but the same activity cannot be reported as being provided to more than one service.

Only activities that contribute to the beneficiary's work experience, work skills, or work-related knowledge can be included in prevocational services.

15.1.M. PRIVATE DUTY NURSING (PDN)

Private Duty Nursing (PDN) services are skilled nursing interventions provided to beneficiaries age 21 and older, up to a maximum of 16 hours per day, to meet an individual's health needs that are directly related to their developmental disability. PDN

Medicaid Provider Manual

includes the provision of nursing assessment, treatment and observation provided by licensed nurses within the scope of the Nurse Practice Act, consistent with physician's orders and in accordance with the written health care plan which is part of the beneficiary's IPOS. PDN services are for beneficiaries who require more individual and continuous care than periodic or intermittent nursing available through Medicaid State Plan services, e.g., Home Health. The beneficiary receiving PDN must also require at least one of the following habilitative services:

- CLS
- Out-of-home non-vocational habilitation
- Prevocational or supported employment

To be determined eligible for PDN services, the PIHP must find that the beneficiary meets Medical Criteria I as well as Medical Criteria III, or meets Medical Criteria II as well as Medical Criteria III. Regardless of whether the beneficiary meets Medical Criteria I or II, the beneficiary must also meet Medical Criteria III.

Medical Criteria I – The beneficiary is dependent daily on technology-based medical equipment to sustain life. "Dependent daily on technology-based medical equipment" means:

- Mechanical rate-dependent ventilation (four or more hours per day), or assisted rate-dependent respiration (e.g., some models of Bi-PAP); or
- Deep oral (past the tonsils) or tracheostomy suctioning eight or more times in a 24-hour period; or
- Nasogastric tube feedings or medications when removal and insertion of the nasogastric tube is required, associated with complex medical problems or medical fragility; or
- Total parenteral nutrition (TPN) delivered via a central line, associated with complex medical problems or medical fragility; or
- Continuous oxygen administration (eight or more hours per day), in combination with a pulse oximeter and a documented need for skilled nursing assessment, judgment, and intervention in the rate of oxygen administration. This would not be met if oxygen adjustment is done only according to a written protocol with no skilled assessment, judgment or intervention required. Continuous use of oxygen therapy is a covered Medicaid benefit for beneficiaries age 21 and older when tested at rest while breathing room air and the oxygen saturation rate is 88 percent or below, or the PO₂ level is 55 mm HG or below.

Medical Criteria II – Frequent episodes of medical instability within the past three to six months, requiring skilled nursing assessments, judgments or interventions (as described in III below) due to a substantiated medical condition directly related to the developmental disability.

Definitions:

- "Frequent" means at least 12 episodes of medical instability related to the progressively debilitating physical disorder within the past six months, or at least six episodes of

Medicaid Provider Manual

medical instability related to the progressively debilitating physical disorder within the past three months. "Medical instability" means emergency medical treatment in a hospital emergency room or inpatient hospitalization related to the underlying progressively debilitating physical disorder.

- "Emergency medical treatment" means covered inpatient and outpatient services that are furnished by a provider that is qualified to furnish such services and are needed to evaluate or stabilize an emergency medical condition. "Emergency medical condition" means a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain) such that a prudent layperson who possesses an average knowledge of health and medicine could reasonably expect the absence of immediate medical attention would result in placing the health of the individual in serious jeopardy, serious impairment to bodily functions, or serious dysfunction of any bodily organ or part.

For beneficiaries described in II above, the requirement for frequent episodes of medical instability is applicable only to the initial determination for PDN. A determination of need for continued PDN services is based on the continuous skilled nursing care.

- "Directly related to the developmental disability" means an illness, diagnosis, or syndrome occurred during the developmental period prior to age 22, is likely to continue indefinitely, and results in significant functional limitations in three or more areas of life activity. Illnesses or disability acquired after the developmental period, such as stroke or heart conditions, would not be considered directly related to the developmental disability.
- "Substantiated" means documented in the clinical/medical record, including the nursing notes.

Medical Criteria III – The beneficiary requires continuous skilled nursing care on a daily basis during the time when a licensed nurse is paid to provide services.

Definitions:

- "Continuous" means at least once every three hours throughout a 24-hour period, and/or when delayed interventions may result in further deterioration of health status, in loss of function or death, in acceleration of the chronic condition, or in a preventable acute episode.
- Equipment needs alone do not create the need for skilled nursing services.
- "Skilled nursing" means assessments, judgments, interventions, and evaluations of interventions requiring the education, training, and experience of a licensed nurse. Skilled nursing care includes, but is not limited to:
 - performing assessments to determine the basis for acting or a need for action, and documentation to support the frequency and scope of those decisions or actions;
 - managing mechanical rate-dependent ventilation or assisted rate-dependent respiration (e.g., some models of Bi-PAP) that is required by the beneficiary four or more hours per day;

Medicaid Provider Manual

- deep oral (past the tonsils) or tracheostomy suctioning;
- injections when there is a regular or predicted schedule, or prn injections that are required at least once per month (insulin administration is not considered a skilled nursing intervention);
- nasogastric tube feedings or medications when removal and insertion of the nasogastric tube is required, associated with complex medical problems or medical fragility;
- TPN delivered via a central line and care of the central line;
- continuous oxygen administration (eight or more hours per day), in combination with a pulse oximeter, and a documented need for adjustments in the rate of oxygen administration requiring skilled nursing assessments, judgments and interventions. This would not be met if oxygen adjustment is done only according to a written protocol with no skilled assessment, judgment or intervention required. Continuous use of oxygen therapy is a covered Medicaid benefit for beneficiaries age 21 and older when tested at rest while breathing room air and the oxygen saturation rate is 88 percent or below, or the PO2 level is 55 mm HG or below;
- monitoring fluid and electrolyte balances where imbalances may occur rapidly due to complex medical problems or medical fragility. Monitoring by a skilled nurse would include maintaining strict intake and output, monitoring skin for edema or dehydration, and watching for cardiac and respiratory signs and symptoms. Taking routine blood pressure and pulse once per shift that does not require any skilled assessment, judgment or intervention at least once every three hours during a 24-hour period, as documented in the nursing notes, would not be considered skilled nursing.

Once the Medical Criteria eligibility for PDN has been established, and as part of determining the amount of PDN a beneficiary is eligible for, the Intensity of Care category must be determined. This is a clinical judgment based on the following factors:

- The beneficiary's medical condition;
- The type and frequency of needed nursing assessments, judgments and interventions; and
- The impact of delayed nursing interventions.

Equipment needs alone do not determine intensity of care. Other aspects of care (e.g., administering medications) are important when developing a plan for meeting the overall needs of the beneficiary but do not determine the amount of hours of nursing for which the beneficiary is eligible.

Medicaid Provider Manual

High Category	Medium Category	Low Category
Beneficiaries requiring nursing assessments, judgments and interventions by a licensed nurse (RN/LPN) at least one time each hour throughout a 24-hour period when delayed nursing interventions could result in further deterioration of health status, in loss of function, death, or in acceleration of the chronic condition.	Beneficiaries requiring nursing assessments, judgments and interventions by a licensed nurse (RN/LPN) at least one time every three hours throughout a 24-hour period, or at least one time each hour for at least 12 hours per day, when delayed nursing interventions could result in further deterioration of health status, in loss of function, death, or in acceleration of the chronic condition. This category also includes beneficiaries with a higher need for nursing assessments and judgments due to an inability to communicate and direct their own care.	Beneficiaries requiring nursing assessments, judgments and interventions by a licensed nurse (RN/LPN) at least one time every three hours for at least 12 hours per day, as well as those beneficiaries who can participate in and direct their own care.

The amount of PDN hours authorized represents a monthly total determined by calculating an average amount of PDN per day multiplied by the number of days in the month. The beneficiary has the flexibility to use the hours as needed during the month, not to exceed the total monthly authorized amount.

The amount of PDN (i.e., the number of hours that can be authorized for a beneficiary) is determined through the person-centered planning process to address the beneficiary's unique needs and circumstances. Factors to be considered should include the beneficiary's care needs which establish medical necessity for PDN; the beneficiary's and family's circumstances (e.g., the availability of natural supports); and other resources for daily care (e.g., private health insurance, trusts, bequests). Although the person-centered planning process is used to determine the exact amount of PDN specified in the IPOS, in general, a beneficiary who has Low Category PDN needs would require eight or fewer hours per day, a beneficiary who has Medium Category PDN needs would require 12 or fewer hours per day, and a beneficiary who has High Category PDN needs would require 16 or fewer hours per day.

The nurse may provide personal care only when incidental to the delivery of PDN (e.g., diaper changes) but may not provide routine personal care. The provision of personal care in unlicensed homes is through Home Help, a Medicaid State Plan service. (Refer to the Home Help chapter of this Manual for additional information.) If the beneficiary receiving PDN services demonstrates the need for Home Help services, the IPOS must document coordination of Home Help and PDN to ensure no duplication of services.

Licensed nurses provide the nursing treatments, observation, and/or teaching as ordered by a physician, and that are consistent with the written IPOS.

These services should be provided to a beneficiary at home or in the community. A physician's prescription is required as defined in the General Information section of this chapter.

Medicaid Provider Manual

The PIHP must assess and document the availability of all private health care coverage (e.g., private or commercial health insurance, Medicare, health maintenance organization, preferred provider organization, Civilian Health, and Medical Program of the Department of Veterans Affairs [CHAMPVA], Worker's Compensation, an indemnity policy, automobile insurance) for PDN and will assist the beneficiary in selecting a PDN provider in accordance with available third-party coverage. This includes private health coverage held by, or on behalf of, a beneficiary.

If a beneficiary is attending school and the IEP identifies the need for PDN during transportation to and from school and/or in the classroom, the school is responsible for providing PDN during school hours. For adults up to age 26 who are enrolled in school, PDN services are not intended to supplant services provided in school or other settings or to be provided during the times when the beneficiary would typically be in school but for the parent's choice to home-school.

An exception process is available to ensure the beneficiary's health, safety and welfare if the beneficiary's needs exceed the 16-hours-per-day maximum for a time-limited period not to exceed six months. Factors underlying the need for additional PDN must be identified in the IPOS, including strategies directed toward resolving the factors necessitating the exception, if applicable. Documentation must substantiate all the following:

- Current medical necessity for the exception; and
- Additional PDN services are essential to the successful implementation of the beneficiary's IPOS and are essential to maintain the beneficiary within the least restrictive, safe, and humane environment suitable to their condition.

Exceptions must be based on the increased identified medical needs of the beneficiary or the impact on the beneficiary's needs due to the unavailability of the primary unpaid caregiver. Consideration for an exception is limited to situations outside the beneficiary's or family's control that place the beneficiary in jeopardy of serious injury or significant deterioration of health status. Exceptions may be considered for either of the following general situations:

- A temporary alteration in the beneficiary's care needs, resulting in one or both of the following:
 - A temporary increase in the intensity of required assessments, judgments, and interventions.
 - A temporary need for additional training to enable the primary caregiver(s) to identify and meet the beneficiary's care needs.

The total number of additional PDN hours per day will be based on the physician's documentation of the extent and duration of the beneficiary's increased medical needs for a maximum of six months.

Medicaid Provider Manual

- The temporary inability of the primary unpaid caregiver(s) to provide the required care as the result of one of the following:
 - In the event the caregiver is hospitalized, a maximum of 24 hours per day can be authorized for each day the caregiver is hospitalized. Upon discharge from the hospital, or in the event of an acute illness or injury of the caregiver, the total number of additional PDN hours per day will be based on the physician's documentation of the extent and duration of the caregiver's limitations and the needs of the beneficiary as it relates to those limitations, not to exceed six months.
 - The death of the primary caregiver. The initial amount of hours allowable under this exception is 24 hours per day for 14 days. Subsequent exceptions can be approved up to an additional 60 days, with monthly reviews thereafter by the PIHP/CMHSP.
 - The death of an immediate family member. "Immediate family member" is defined as the caregiver's spouse, partner, parent, sibling, or child. The maximum number of hours allowable under this exception criterion is 24 hours per day for a maximum of seven days.

"Inability" is defined as the caregiver is either unable to provide care or is prevented from providing care.

"Primary caregiver" is defined as the caregiver who provides the majority of unpaid care.

"Unpaid care" is defined as care provided by a caregiver where no reimbursement is received for those services, e.g., is not being paid as a Home Help provider or CLS staff.

This exception is not available if the beneficiary resides in a licensed setting or in a home where all care is provided by paid caregivers.

If a transition plan has been developed wherein PDN services are to be reduced or eliminated based on a determination of medical necessity, the PIHP may provide PDN for a period of time (not to exceed three months) for the purpose of training the CLS or respite aides or family and ensuring a smooth transition. In those cases, the transition plan, including amount, scope, frequency and duration of the training by nurses to aides, must be documented in the IPOS. A transition process is not intended to provide two-to-one (nurse and aide) staffing for any purpose other than for training (with limitations on duration and frequency noted in the IPOS) while the aide or family member becomes familiar with the beneficiary's care needs. This transition period is only permitted when it has been determined that PDN is not medically necessary and the beneficiary's care needs can be met by a trained CLS or respite aide.

The services under PDN are limited to additional services not otherwise covered under the Medicaid State Plan, including EPSDT.

PDN is a Medicaid coverage for beneficiaries under age 21 who meet the medical criteria for eligibility. Refer to the Private Duty Nursing chapter of the MDHHS Medicaid Provider Manual for additional information.

Medicaid Provider Manual

15.1.N. RESPITE CARE

Respite care services are provided to a waiver eligible beneficiary on a short-term, intermittent basis to relieve the beneficiary's family or other primary caregiver(s) from daily stress and care demands during times when they are providing unpaid care. Relief needs of hourly or shift staff workers should be accommodated by staffing substitutions, plan adjustments, or location changes and not by respite care.

- "Short-term" means the respite service is provided during a limited period of time (e.g., a few hours, a few days, weekends, or for vacations).
- "Intermittent" means the respite service does not occur regularly or continuously. The service stops and starts repeatedly or with periods in between.
- "Primary" caregivers are typically the same people who provide at least some unpaid supports daily.
- "Unpaid" means that respite may only be provided during those portions of the day when no one is being paid to provide the care, i.e., not a time when the beneficiary is receiving a paid Medicaid State Plan (e.g., home help) or waiver service (e.g., CLS) or service through other programs (e.g., school).

Since adult beneficiaries living at home typically receive home help services and hire their family members, respite is not available when the family member is being paid to provide the home help service but may be available at other times throughout the day when the caregiver is not paid.

Respite is not intended to be provided on a continuous, long-term basis where it is a part of daily services that would enable an unpaid caregiver to work. The beneficiary's record must clearly differentiate respite hours from CLS services. Decisions about the methods and amounts of respite are decided during the person-centered planning process. Respite care may not be provided by a parent of a minor beneficiary receiving the service, the spouse of the beneficiary, the beneficiary's legal guardian, or the primary unpaid caregiver.

Respite services may be provided in the following settings:

- Waiver beneficiary's home or place of residence.
- Licensed foster care home.
- Facility approved by the State that is not a private residence, such as:
 - Group home; or
 - Licensed respite care facility.
- Home of a friend or relative (not the parent of a minor beneficiary, the spouse of the beneficiary served, or the legal guardian) chosen by the beneficiary; licensed camp; in community settings with respite worker training, if needed, by the beneficiary or family. These sites are approved by the beneficiary and identified in the IPOS.

Medicaid Provider Manual

Cost of room and board must not be included as part of the respite care unless provided as part of the respite care in a facility that is not a private residence. Respite provided in an institution (i.e., ICF/IID, nursing facility, or hospital) or MDHHS-approved day program site is not covered by the HSW. The beneficiary's record must clearly differentiate respite hours from CLS services.

15.1.O. SUPPORTED EMPLOYMENT

NOTE: This is a habilitative service.

Competitive integrated employment (CIE) is employment that is found in the typical labor market in the community that anyone can apply for and is the optimal outcome of supported employment services. Supported employment services seek to align with the Work Innovation and Opportunity Act (WIOA) to achieve desired outcomes for beneficiaries.

Supported employment services support CIE in the general workforce where the beneficiary is compensated at or above the minimum wage, but not less than the customary wage and level of benefits paid by the employer for the same or similar work performed by individuals without disabilities. Supported employment services can be provided through many different service models.

Specific supported employment services include the two following categories:

- Individual Employment Services:
 - Supported Individual Employment Services for Job Development/Career Planning support CIE that is found in the typical labor market in the community that anyone can apply for and is the optimal outcome of supported employment services. Such services may provide ongoing supports to beneficiaries who, because of their disabilities, need some fading level of supports to be successful. Additionally, this service array may include intensive on-going support to obtain or maintain an individual job in competitive or customized employment, or self-employment in CIE in the general workforce for which the beneficiary is compensated at or above the minimum wage, but not less than the customary wage and level of benefits paid by the employer for the same or similar work performed by individuals without disabilities. Self-employment refers to an individual-run business that nets the equivalent of a competitive wage, after a reasonable period for start-up, and is either home-based or takes place in regular integrated business, industry, or community-based settings. This service supports sustained paid employment at or above the minimum wage in CIE in the general workforce in a job that meets personal and career goals.
 - Individual supported employment services are individualized and may include any combination of the following services:
 - vocational/job-related discovery or assessment
 - person-centered employment planning
 - job placement/job development with prospective employers

Medicaid Provider Manual

- job analysis
 - customized employment and job carving
 - training and systematic instruction
 - benefits management, financial literacy, asset development and career advancement services
 - training and planning
 - transportation
 - other workplace support services, including services not specifically related to job skill training that enable the beneficiary to attain a job in a CIE setting of their choice.
- Group Employment Services for two to six individuals:
 - Supported Group Employment Services and training activities provided in regular business, industry, and community settings for groups of two (2) to six (6) workers with disabilities, paying at least minimum wage in an integrated setting. Examples include mobile crews and other business-based workgroups employing small groups of workers with disabilities in employment in the community. Group Employment Services must be provided in a manner that promotes integration into the workplace and interaction between beneficiaries and individuals without disabilities in those workplaces. Funding for this service is to support sustained paid employment and work experience leading to further career development in individual CIE-based employment for which the beneficiary is compensated at or above the minimum wage, but not less than the customary wage and level of benefits paid by the employer for the same or similar work performed by individuals without disabilities. Supported Group Employment Services does not include volunteer work or vocational services provided in facility-based work settings.
 - Supported Group Employment Services may include any combination of the following services:
 - job analysis
 - training and systematic instruction
 - job coaching
 - benefits management support and financial literacy
 - training and planning
 - transportation
 - career advancement services
 - other workplace support services that may include services not specifically related to job skill training that enable the beneficiary to be successful in integrating into the workplace.

Federal Financial Participation (FFP) may not be claimed for incentive payments, subsidies, or unrelated vocational training expenses such as:

Medicaid Provider Manual

- Incentive payments made to an employer to encourage or subsidize the employer's participation in a supported employment program;
- Payments that are passed through to users of supported employment programs; or
- Payments for vocational training that is not directly related to a beneficiary supported employment program.

Supported employment service component(s) needed for each beneficiary are documented, coordinated, and nonduplicative of other services otherwise available under a program funded under Section 110 of the Rehabilitation Act of 1973, or under IDEA, MRS or BSBP. Documentation must be maintained by the PIHP that the beneficiary is not currently eligible for work activity or supported employment services provided by MRS. Information must be updated when MRS eligibility conditions change.

15.2 SUPPORTS AND SERVICES PROVIDER QUALIFICATIONS

Refer to the Behavioral Health Code Charts and Provider Qualifications document for Supports and Services Provider Qualifications. The document is available on the MDHHS website. (Refer to the Directory Appendix of this Manual for website information.)

Medicaid Provider Manual

SECTION 16 – MENTAL HEALTH AND SCHOOL SERVICES PROGRAM

This section is applicable to all PIHP programs/provider requirements and pertains to beneficiaries with mental illness and/or developmental disabilities.

The School-Services Program (SSP) policy requires cooperative agreements between the PIHP and the SSP provider. These agreements are not changed by the policies in this chapter. Any required releases of information are part of the existing requirements of the SSP provider.

The quality assurance standards for SSP also requires the coordination of care with other human service agencies where appropriate, including local public health departments, community mental health agencies and the beneficiary's physician or managed care providers. In addition, enrolled SSP providers are required to cooperate with other human service agencies operating within the same service area and are not expected to replace or substitute services already provided by other agencies.

When a beneficiary receives active treatment from a SBS provider, the services must be coordinated with the PIHP. If the PIHP provides mental health services for a special education student with serious emotional disturbance or a developmental disability, the PIHP must coordinate such services and information with special education and other human services agencies serving the student.

(Refer to the School Services Program Chapter of this manual for additional information.)

Medicaid Provider Manual

SECTION 17 –BEHAVIORAL HEALTH §1915(I) HOME AND COMMUNITY-BASED SERVICES (HCBS) STATE PLAN AMENDMENT

HCBS provides opportunities for Medicaid beneficiaries to receive services in their own home or community rather than institutions or other isolated settings. These programs serve a variety of targeted population groups, such as people with intellectual or developmental disabilities, serious emotional disturbance and/or serious mental illnesses.

NOTE: Certain services found in this section are State Plan Early and Periodic Screening, Diagnosis and Treatment (EPSDT) services when delivered to children birth-21 years

Eligible beneficiaries may be enrolled in Michigan's BH 1915(i) SPA and receive the supports and services defined in this section, as well as other Medicaid covered State Plan services. A BH 1915(i) SPA beneficiary must receive at least one BH 1915(i) SPA service every three months, in addition to monthly monitoring to remain eligible.

17.1 ELIGIBILITY

The BH 1915(i) SPA benefit is available to individual beneficiaries with a serious emotional disturbance, serious mental illness and/or intellectual/developmental disability who are currently residing in a HCBS setting and meet the needs-based criteria defined below. Beneficiaries must be enrolled through the MDHHS enrollment process completed by the PIHP on an annual basis.

17.1.A. NEEDS-BASED CRITERIA

- Have a substantial functional limitation in one or more of the following areas of major life activity:
 - Self-care
 - Communication
 - Learning
 - Mobility
 - Self-direction
 - Capacity for independent living
 - Economic self-sufficiency; and
- Without §1915(i) services, a beneficiary is at risk of not increasing or maintaining a sufficient level of functioning in order to achieve their individual goals of independence, recovery, productivity, and/or community inclusion and participation.

The PIHP provider network will perform the face-to-face assessments, compile required documentation, and submit findings to the MDHHS Behavioral and Physical Health and Aging Services Administration (BPHASA). BPHASA will make the determination of needs-based criteria through an independent evaluation and re-evaluation. The PIHPs must have a network of qualified providers responsible for conducting the assessment, including specific training in an individual's needs for HCBS. These providers must meet one of the following qualifications: Mental Health Professional (MHP), Qualified

Medicaid Provider Manual

Intellectual Disability Professional (QIDP) or Qualified Mental Health Professional (QMHP). Refer to the Behavioral Health Code Charts and Provider Qualifications document for Supports and Services Provider Qualifications. The Behavioral Health Code Charts and Provider Qualifications document is posted on the MDHHS website. (Refer to the Directory Appendix for website information.)

17.1.B. INDEPENDENT EVALUATIONS AND RE-EVALUATIONS

For an independent evaluation/re-evaluation, BPHASA staff will apply the needs-based criteria to determine whether the individual in the targeted group is eligible for §1915(i) benefit services. The PIHP network will utilize standardized instruments to assist in identifying level of need (i.e., Level of Care Utilization System [LOCUS], Supports Intensity Scale [SIS], American Society of Addiction Medicine [ASAM], Global Appraisal of Individual Needs Initial [GAIN-I]), administer other face-to-face assessments related to the individual's functional abilities (i.e., Essential for Living [EFL], Assessment of Functional Living Skills [AFLS], administer other adaptive behavior/global functioning scales, etc.), and identify services and supports required to reach the expected outcomes of community inclusion and participation. The PIHP network will provide evidence to BPHASA for making the needs-based eligibility determination through a Waiver Support Application (WSA) portal.

- For children and adolescents with Serious Emotional Disturbance (SED), standardized tools (i.e., the Preschool and Early Childhood Functional Assessment Scale [PECFAS], the Child Adolescent Functional Assessment Scale [CAFAS], etc.) are utilized.
- For children and adolescents with intellectual or developmental disability, standardized tools to identify functional abilities, adaptive behavior/global functioning, and level of support needs (i.e., Developmental Disabilities Children's Global Assessment Scale [DD-CGAS], Vineland, Supports Intensity Scale – Children's Version [SIS-C], etc.) are utilized.
- For adults with mental health and co-occurring mental health and substance use disorder related needs, LOCUS is applied. For adults with intellectual or developmental disability-related needs, Supports Intensity Scale – Adult Version [SIS-A] is used. For adults presenting with needs only involving substance use disorders, the GAIN-I core assessment is utilized as it directly supports the ASAM level of care criteria that this service system is based on.

Re-evaluation for eligibility is conducted annually. Formal review of the Individual Plan of Service (IPOS) will occur no less than annually with the beneficiary and any other person chosen to participate by the beneficiary or guardian. BPHASA will make determination of continuing eligibility based on evidence provided by the PIHP and an independent evaluation that the beneficiary still meets the needs-based criteria.

17.2 DEFINITIONS OF GOALS THAT MEET THE INTENTS AND PURPOSE OF BEHAVIORAL HEALTH 1915(I) STATE PLAN AMENDMENT (SPA) SUPPORTS AND SERVICES

The goals (listed below) and their operational definitions will vary according to the individual's needs and desires. However, goals that are inconsistent with least restrictive environment (i.e., most integrated home, work, community that meet the individual's needs and desires) and individual choice and control cannot be supported by BH 1915(i) SPA supports and services unless there is documentation that health

Medicaid Provider Manual

and safety would otherwise be jeopardized; or that such least restrictive arrangements or choice and control opportunities have been demonstrated to be unsuccessful for that individual. Care should be taken to ensure that these goals are those of the individual first, not those of a parent, guardian, provider, therapist, or case manager, no matter how well intentioned. The services in the plan, whether BH 1915(i) SPA supports and services alone, or in combination with State Plan or Habilitation Supports Waiver services, must reasonably be expected to achieve the goals and intended outcomes identified. The configuration of supports and services should assist the individual to attain outcomes that are typical in their community; and without such services and supports, would be impossible to attain.

Community Inclusion and Participation	<p>The individual uses community services and participates in community activities in the same manner as the typical community citizen.</p> <p>Examples are recreation (parks, movies, concerts, sporting events, arts classes, etc.), shopping, socialization (visiting friends, attending club meetings, dining out) and civic (volunteering, voting, attending governmental meetings, etc.) activities. A beneficiary's use of, and participation in, community activities are expected to be integrated with that of the typical citizen's (e.g., the beneficiary would attend an "integrated" yoga class at the community center rather than a special yoga class for persons with intellectual disability).</p>
Independence	<p>"Freedom from another's influence, control and determination." (Webster's New World College Dictionary, 1996). Independence in the BH 1915(i) SPA context means how the individual defines the extent of such freedom for themselves during person-centered planning.</p> <p>For example, to some beneficiaries, "freedom" could be living on their own, controlling their own budget, choosing an apartment as well as the persons who will live there with them, or getting around the community on their own. To others, "freedom" could be control over what and when to eat, what and when to watch television, when and how to bathe, or when to go to bed and arise. For children under 18 years old, independence may mean the support given by parents and others to help children achieve the skills they need to be successful in school, enter adulthood and live independently.</p>
Productivity	<p>Engaged in activities that result in or lead to maintenance of or increased self-sufficiency. Those activities are typically going to school and work. The operational definition of productivity for an individual may be influenced by age-appropriateness.</p> <p>For example, a person who is 76 years old may choose to volunteer or participate in other community or senior center activities rather than have any productivity goals. For children under the age of five years, productivity may be successful participation in home, pre-school, or child care activities. Children under 18 would be expected to attend school, but may choose to work in addition. In order to use BH 1915(i) SPA supports and services, individuals would be expected to prepare for, or go to, school or work in the same places that the typical citizen uses.</p>

17.3 CRITERIA FOR AUTHORIZING BH 1915(i) SPA SUPPORTS AND SERVICES

The authorization and use of Medicaid funds for any of the BH 1915(i) SPA supports and services, as well as their amount, scope and duration, are dependent upon:

- The Medicaid beneficiary's eligibility for specialty services and supports as defined in this Chapter;
- The service(s) having been identified during person-centered planning;

Medicaid Provider Manual

- The service(s) being medically necessary as defined in the Medical Necessity Criteria subsection of this chapter;
- The service(s) being expected to achieve one or more of the above-listed goals as identified in the beneficiary's individual plan of service; and
- Additional criteria indicated in certain BH 1915(i) SPA service definitions, as applicable.

Decisions regarding the authorization of a BH 1915(i) SPA service (including the amount, scope and duration) must take into account the PIHP's documented capacity to reasonably and equitably serve other Medicaid beneficiaries who also have needs for these services. The BH 1915(i) SPA supports and services are not intended to meet all the individual's needs and preferences, as some needs may be better met by community and other natural supports. Natural supports mean unpaid assistance provided to the beneficiary by people in their network (family, friends, neighbors, community volunteers) who are willing and able to provide such assistance. It is reasonable to expect that parents of minor children with disabilities will provide the same level of care they would provide to their children without disabilities. MDHHS encourages the use of natural supports to assist in meeting an individual's needs to the extent that the family or friends who provide the natural supports are willing and able to provide this assistance. PIHPs may not require a beneficiary's natural support network to provide such assistance as a condition for receiving specialty mental health supports and services. The use of natural supports must be documented in the beneficiary's individual plan of service.

Refer to the Behavioral Health Code Charts and Provider Qualifications document for supports and services provider qualifications. The Behavioral Health Code Charts and Provider Qualifications document is posted on the MDHHS website. (Refer to the Directory Appendix for website information.)

17.4 BH 1915(i) SPA SUPPORTS AND SERVICES

The BH 1915(i) SPA supports and services defined below are the supports and services that PIHPs are to provide from their Medicaid capitation.

17.4.A. COMMUNITY LIVING SUPPORTS (CLS)

NOTE: This service is a State Plan EPSDT service when delivered to children birth-21 years.

Community Living Supports (CLS) are used to increase or maintain personal self-sufficiency, facilitating a beneficiary's achievement of their goals of community inclusion and participation, independence or productivity. The supports may be provided in the beneficiary's residence or in community settings (including, but not limited to, libraries, city pools, camps, etc.).

Coverage includes:

- Assisting (that exceeds State Plan for adults), prompting, reminding, cueing, observing, guiding and/or training in the following activities:

Medicaid Provider Manual

- meal preparation
- laundry
- routine, seasonal, and heavy household care and maintenance
- activities of daily living (e.g., bathing, eating, dressing, personal hygiene)
- shopping for food and other necessities of daily living

CLS services may not supplant services otherwise available to the beneficiary through a local educational agency under the Individuals with Disabilities Education Act (IDEA) or the Rehabilitation Act of 1973 or State Plan services, e.g., Personal Care (assistance with activities of daily living in a certified specialized residential setting) and Home Help (assistance in the beneficiary's own, unlicensed home with meal preparation, laundry, routine household care and maintenance, activities of daily living and shopping). If such assistance appears to be needed, the beneficiary must request Home Help from MDHHS. CLS may be used for those activities while the beneficiary awaits determination by MDHHS of the amount, scope and duration of Home Help. If the beneficiary requests it, the PIHP case manager or supports coordinator must assist them in requesting Home Help or in filling out and sending a request for Fair Hearing when the beneficiary believes that the MDHHS authorization of amount, scope and duration of Home Help does not appear to reflect the beneficiary's needs based on the findings of the MDHHS assessment.

- CLS staff providing assistance, support and/or training with activities such as:
 - money management
 - non-medical care (not requiring nurse or physician intervention)
 - socialization and relationship building
 - transportation from the beneficiary's residence to community activities, among community activities, and from the community activities back to the beneficiary's residence (transportation to and from medical appointments is excluded)
 - participation in regular community activities and recreation opportunities (e.g., attending classes, movies, concerts and events in a park; volunteering; voting)
 - attendance at medical appointments
 - acquiring or procuring goods, other than those listed under shopping, and non-medical services
 - Reminding, observing and/or monitoring of medication administration
 - Staff assistance with preserving the health and safety of the beneficiary in order that they may reside or be supported in the most integrated, independent community setting.

CLS may be provided in a licensed specialized residential setting as a complement to, and in conjunction with, State Plan coverage Personal Care in Specialized Residential Settings. Transportation to medical appointments is covered by Medicaid through Medicaid FFS or the Medicaid Health Plan. Payment for CLS services may not be made, directly or

Medicaid Provider Manual

indirectly, to responsible relatives (i.e., spouses, or parents of minor children), or guardian of the beneficiary receiving CLS.

CLS assistance with meal preparation, laundry, routine household care and maintenance, activities of daily living and/or shopping may be used to complement Home Help services when the beneficiary's need for this assistance has been officially determined to exceed the allowable parameters. CLS may also be used for those activities while the beneficiary awaits the decision from a Fair Hearing of the appeal of a MDHHS decision. Reminding, observing, guiding, and/or training of these activities are CLS coverages that do not supplant Home Help.

CLS provides support to a beneficiary younger than 18, and the family in the care of their child, while facilitating the beneficiary's independence and integration into the community. This service provides skill development related to activities of daily living, such as bathing, eating, dressing, personal hygiene, household chores and safety skills; and skill development to achieve or maintain mobility, sensory-motor, communication, socialization and relationship-building skills, and participation in leisure and community activities. These supports must be provided directly to, or on behalf of, the beneficiary. These supports may serve to reinforce skills or lessons taught in school, therapy, or other settings. For beneficiaries up to age 26 who are enrolled in school, CLS services are not intended to supplant services provided in school or other settings.

17.4.B. ENHANCED PHARMACY

Enhanced pharmacy items are physician-ordered, nonprescription "medicine chest" items as specified in the individual's plan of service. There must be documented evidence that the item is not available through Medicaid or other insurances, and is the most cost-effective alternative to meet the beneficiary's need.

The following items are covered only for adult beneficiaries living in independent settings (i.e., own home, apartment where deed or lease is signed by the beneficiary):

- Cough, cold, pain, headache, allergy, and/or gastrointestinal distress remedies
- First aid supplies (e.g., band-aids, iodine, rubbing alcohol, cotton swabs, gauze, antiseptic cleansing pads)

The following items are covered for beneficiaries living in independent settings, with family, or in licensed dependent care settings:

- Special oral care products to treat specific oral conditions beyond routine mouth care (e.g., special toothpaste, toothbrushes, anti-plaque rinses, antiseptic mouthwashes)
- Vitamins and minerals
- Special dietary juices and foods that augment, but do not replace, a regular diet
- Thickening agents for safe swallowing when the beneficiary has a diagnosis of dysphagia and either:

Medicaid Provider Manual

- A history of aspiration pneumonia, or
- Documentation that the beneficiary is at risk of insertion of a feeding tube without the thickening agents for safe swallowing.

Coverage excludes:

- Routine cosmetic products (e.g., make-up base, aftershave, mascara, and similar products)

17.4.C. ENVIRONMENTAL MODIFICATIONS

Physical adaptations to the beneficiary's own home or apartment and/or workplace. There must be documented evidence that the modification is the most cost-effective alternative to meet the beneficiary's need/goal based on the results of a review of all options, including a change in the use of rooms within the home or alternative housing, or in the case of vehicle modification, alternative transportation. All modifications must be prescribed by a physician. Prior to the environmental modification being authorized, PIHP may require that the beneficiary apply to all applicable funding sources (e.g., housing commission grants, Michigan State Housing Development Authority (MSHDA), and community development block grants), for assistance. It is expected that the PIHP case manager/supports coordinator will assist the beneficiary in the pursuit of these resources. Acceptances or denials by these funding sources must be documented in the beneficiary's records. Medicaid is a funding source of last resort.

Coverage includes:

- The installation of ramps and grab-bars.
- Widening of doorways.
- Modification of bathroom facilities.
- Special floor, wall or window covering that will enable the beneficiary more independence or control over their environment, and/or ensure health and safety.
- Installation of specialized electrical and plumbing systems that are necessary to accommodate the medical equipment and supplies necessary for the welfare of the beneficiary.
- Assessments by an appropriate health care professional and specialized training needed in conjunction with the use of such environmental modifications.
- Central air conditioning when prescribed by a physician and specified as to how it is essential in the treatment of the beneficiary's illness or condition. This supporting documentation must demonstrate the cost-effectiveness of central air compared to the cost of window units in all rooms that the beneficiary must use.
- Environmental modifications that are required to support proper functioning of medical equipment, such as electrical upgrades, limited to the requirements for safe operation of the specified equipment.
- Adaptations to the work environment limited to those necessary to accommodate the beneficiary's individualized needs.

Medicaid Provider Manual

Coverage excludes:

- Adaptations or improvements to the home that are not of direct medical or remedial benefit to the beneficiary, or do not support the identified goals of community inclusion and participation, independence or productivity.
- Adaptations or improvements to the home that are of general utility or cosmetic value and are considered to be standard housing obligations of the beneficiary. Examples of exclusions include, but are not limited to, carpeting (see exception above), roof repair, sidewalks, driveways, heating, central air conditioning, garages, raised garage doors, storage and organizers, landscaping and general home repairs.
- Cost for construction of a new home or new construction (e.g., additions) in an existing home.
- Environmental modifications costs for improvements exclusively required to meet local building codes.
- Adaptations to the work environment that are the requirements of Section 504 of the Rehabilitation Act, the Americans with Disabilities Act, or are the responsibilities of Michigan Rehabilitation Services (MRS) or the Bureau of Services for Blind Persons (BSBP).

The PIHP must ensure there is a signed contract with the builder for an environmental modification and the homeowner. It is the responsibility of the PIHP to work with the beneficiary and the builder to ensure that the work is completed as outlined in the contract and that issues are resolved among all parties. In the event that the contract is terminated prior to the completion of the work, Medicaid capitation payments may not be used to pay for any additional costs resulting from the termination of the contract.

The existing structure must have the capability to accept and support the proposed changes. The "infrastructure" of the home (e.g., electrical system, plumbing, well/septic, foundation, heating/cooling, smoke detector systems, roof) must be in compliance with all local codes. If the home is not code compliant, other funding sources must be secured to bring the home into compliance.

The environmental modification must incorporate reasonable and necessary construction standards and comply with applicable state or local building codes. The adaptation cannot result in valuation of the structure significantly above comparable neighborhood real estate values.

Adaptations may be made to rental properties when the landowner agrees to the adaptation in writing. A written agreement between the landowner and the beneficiary must specify any requirements for restoration of the property to its original condition if the occupant moves, and must indicate that Medicaid is not obligated for any restoration costs.

If a beneficiary purchases an existing home while receiving Medicaid services, it is the beneficiary's responsibility to assure that the home will meet basic needs, such as having a ground floor bath/bedroom if the beneficiary has mobility limitations. Medicaid funds may be authorized to assist with the adaptations noted above (e.g., ramps, grab bars, widening doorways) for a recently purchased existing home.

Medicaid Provider Manual

17.4.D. FAMILY SUPPORT AND TRAINING

NOTE: This service is a State Plan EPSDT service when delivered to children birth-21 years.

Family-focused services provided to family (natural or adoptive parents, spouse, children, siblings, relatives, foster family, in-laws, and other unpaid caregivers) of persons with serious mental illness, serious emotional disturbance or developmental disability for the purpose of assisting the family in relating to and caring for a beneficiary with one of these disabilities. The services target the family members who are caring for and/or living with a beneficiary receiving mental health services. The service is to be used in cases where the beneficiary is hindered or at risk of being hindered in their ability to achieve goals of:

- performing activities of daily living;
- perceiving, controlling, or communicating with the environment in which the beneficiary lives; or
- improving the beneficiary's inclusion and participation in the community or productive activity, or opportunities for independent living.

The training and counseling goals, content, frequency and duration of the training must be identified in the beneficiary's individual plan of service, along with the beneficiary's goal(s) that are being facilitated by this service.

Coverage includes:

- Education and training, including instructions about treatment regimens, and use of assistive technology and/or medical equipment needed to safely maintain the beneficiary at home as specified in the individual plan of service.
- Counseling and peer support provided by a trained counselor or peer one-on-one or in group for assistance with identifying coping strategies for successfully caring for or living with a person with disabilities.
- Family Psycho-Education (SAMHSA model -- specific information is found in the GUIDE TO FAMILY PSYCHOEDUCATION, Requirements for Certification, Sustainability, and Fidelity) for individuals with serious mental illness and their families. This evidence-based practice includes family educational groups, skills workshops, and joining.
- Parent-to-Parent Support is designed to support parents/family of children with serious emotional disturbance or developmental disabilities as part of the treatment process to be empowered, confident and have skills that will enable them to assist their child to improve in functioning. The trained parent support partner who has or had a child with special mental health needs provides education, training, and support, and augments the assessment and mental health treatment process. The parent support partner provides these services to the parents/family. These activities are provided in the home and in the community. The parent support partner is to be provided regular supervision and team consultation by the treating professionals.

Medicaid Provider Manual

17.4.E. FISCAL INTERMEDIARY SERVICES

Fiscal Intermediary Services is defined as services that assist the beneficiary, or a representative identified in the beneficiary's individual plan of services, to meet the beneficiary's goals of community participation and integration, independence or productivity while controlling their individual budget and choosing staff who will provide the services and supports identified in the IPOS and authorized by the PIHP. The fiscal intermediary helps the beneficiary manage and distribute funds contained in the individual budget. Fiscal intermediary services include, but are not limited to:

- Facilitation of the employment of service workers by the beneficiary, including federal, state and local tax withholding/payments, unemployment compensation fees, wage settlements, and fiscal accounting;
- Tracking and monitoring participant-directed budget expenditures and identifying potential over- and under-expenditures;
- Assuring adherence to federal and state laws and regulations; and
- Ensuring compliance with documentation requirements related to management of public funds.

The fiscal intermediary may also perform other supportive functions that enable the beneficiary to self-direct needed services and supports. These functions may include selecting, contracting with or employing and directing providers of services, verification of provider qualifications (including reference and background checks), and assisting the beneficiary to understand billing and documentation requirements.

Fiscal intermediary services may not be authorized for use by a beneficiary's representative where that representative is not conducting tasks in ways that fit the beneficiary's preferences, and/or do not promote achievement of the goals contained in the beneficiary's plan of service so as to promote independence and inclusive community living for the beneficiary, or when they are acting in a manner that is in conflict with the interests of the beneficiary.

Fiscal intermediary services must be performed by entities with demonstrated competence in managing budgets and performing other functions and responsibilities of a fiscal intermediary. Neither providers of other covered services to the beneficiary, family members, or guardians of the beneficiary may provide fiscal intermediary services to the beneficiary.

17.4.F. HOUSING ASSISTANCE

Housing assistance enables beneficiaries to secure and/or maintain their own housing as set forth in the beneficiary's individual plan of service. Services must be provided in the home or a community setting and include the following components:

- Conducting a community integration assessment identifying the beneficiary's preferences related to housing (type, location, living alone or with someone else, identifying a roommate, accommodations needed, or other important preferences) and needs for support to maintain community integration (including what type of setting works best for

Medicaid Provider Manual

the beneficiary, assistance in budgeting for housing/living expenses, assistance in obtaining/accessing sources of income necessary for community living, assistance in establishing credit and in understanding and meeting obligations of tenancy).

- Assisting the beneficiary with finding and securing housing as needed. This may include arranging for or providing transportation.
- Assisting the beneficiary in securing supporting documents/records, completing/submitting applications, securing deposits, and locating furnishings.
- Developing an individualized community integration plan based upon the assessment as part of the overall Person-Centered Plan (PCP).
- Identify and establish short- and long-term measurable goal(s) and establish how goals will be achieved and how concerns will be addressed.
- Participating in PCP meetings at re-determination and/or revision PCP meetings as needed.
- Providing supports and interventions per the PCP (individualized community integration portion).
- Supports to assist the beneficiary in communicating with the landlord and/or property manager regarding the beneficiary's disability (if authorized and appropriate), detailing accommodations needed, and addressing components of emergency procedures involving the landlord and/or property manager. This includes providing support/intervention for dispute resolution with the landlord/property manager.
- Housing assistance will provide supports to preserve the most independent living arrangement and/or assist the beneficiary in locating the most integrated option appropriate to the beneficiary.

Coverage excludes:

- Costs for room and board (i.e., rent, mortgage, motel/hotel stays, security deposit, etc.)
- Funding for ongoing housing costs (i.e., repairs, utility bills, insurance, taxes, appliances, etc.)

17.4.G. RESPITE CARE SERVICES

Respite care services are intended to assist in maintaining a goal of living in a natural community home and are provided on a short-term, intermittent basis to relieve the beneficiary's family or other primary caregiver(s) from daily stress and care demands during times when they are providing unpaid care. Respite is not intended to be provided on a continuous, long-term basis where it is a part of daily services that would enable an unpaid caregiver to work elsewhere full time. In those cases, CLS, or other services of paid support or training staff, should be used. Decisions about the methods and amounts of respite should be decided during person-centered planning. PIHPs may not require active clinical treatment as a prerequisite for receiving respite care. These services do not supplant or substitute for CLS or other services of paid support/training staff.

Medicaid Provider Manual

- "Short-term" means the respite service is provided during a limited period of time (e.g., a few hours, a few days, weekends, or for vacations).
- "Intermittent" means the respite service does not occur regularly or continuously. The service stops and starts repeatedly or with a time period in between.
- "Primary" caregivers are typically the same people who provide at least some unpaid supports daily.
- "Unpaid" means that respite may only be provided during those portions of the day when no one is being paid to provide the care, i.e., not a time when the beneficiary is receiving a paid State Plan (e.g., home help) or waiver service (e.g., CLS) or service through other programs (e.g., school).
- Beneficiaries who are living in a family foster care home may receive respite services. The only exclusion of receiving respite services in a family foster care home is when the beneficiary is receiving Therapeutic Foster Care as a Medicaid SED waiver service because that is considered in the bundled rate. (Refer to the Child Therapeutic Foster Care subsection in the Children with Serious Emotional Disturbances Home and Community-Based Services Waiver Appendix for additional information.)

If an adult beneficiary living at home is receiving home help services and has hired their family members, respite is not available when the family member is being paid to provide the home help service but may be available at other times throughout the day when the caregiver is not paid.

Respite care may be provided in the following settings:

- Beneficiary's home or place of residence
- Licensed family foster care home
- Facility approved by the State that is not a private residence (e.g., group home or licensed respite care facility)
- Home of a friend or relative chosen by the beneficiary and members of the planning team
- Licensed camp
- In community (social/recreational) settings with a respite worker trained, if needed, by the family
- Licensed family child care home

Respite care may not be provided in:

- day program settings
- Intermediate Care Facility for Individuals with Intellectual Disabilities (ICF/IID)
- nursing homes
- hospitals

Medicaid Provider Manual

Respite care may not be provided by:

- parent of a minor beneficiary receiving the service
- spouse of the beneficiary served
- beneficiary's guardian
- unpaid primary care giver

Cost of room and board must not be included as part of the respite care unless provided as part of the respite care in a facility that is not a private residence.

17.4.H. SKILL-BUILDING ASSISTANCE

NOTE: This service is a State Plan EPSDT service when delivered to children birth-21 years.

Skill-building assistance consists of activities identified in the individual plan of services that assist a beneficiary to increase their economic self-sufficiency and/or to engage in meaningful activities such as school, work, and/or volunteering. The services occur in community-based integrated settings and provide knowledge and specialized skill development and/or supports to achieve specific outcomes consistent with the beneficiary's identified goals with the purpose of furthering habilitation goals that will lead to greater opportunities of community independence, inclusion, participation, and productivity. Refer to the Home and Community Based Services chapter for further detail.

Services include:

- Assistance with acquisition, retention, or improvement in self-help, socialization, and adaptive skills.
- Activities that support a beneficiary to attain and retain Individual Competitive Integrated Employment (ICIE) are time-limited and include work pathway services in the community in which a beneficiary is compensated at or above the minimum wage, but not less than the customary wage and level of benefits paid by the employer for the same or similar work performed by individuals without disabilities.
- Developing and teaching skills that lead to ICIE including, but not limited to, ability to communicate effectively with supervisors, co-workers and customers; generally accepted community workplace conduct and dress; ability to follow directions; ability to attend to tasks; workplace problem-solving skills and strategies; general workplace safety; and mobility training. May also provide learning and work experiences, including volunteering, where the beneficiary can develop general, non-job-task-specific strengths and skills that contribute to employability in ICIE. Such employment related services are expected to occur over a defined period of time, with specific employment-related goals and outcomes to be achieved as determined by the beneficiary's individual plan of service.
- Participation in skill-building is not a required prerequisite for ICIE or receiving supported employment services.

Medicaid Provider Manual

Skill-building service components needed for each beneficiary are documented, coordinated, and non-duplicative of other services otherwise available under a program funded under the Individuals with Disabilities Education Act (IDEA) (20 U.S.C. 1401 et seq.).

If a beneficiary has a need for transportation to participate, maintain, or access the skill-building services, the same provider may be reimbursed for providing this transportation only after it is determined that it is not otherwise available (e.g., volunteer, family member) and is the least expensive available means suitable to the beneficiary's need, in accordance with the Medicaid non-emergency medical transportation policy outlined in the Non-Emergency Medical Transportation chapter of the MDHHS Medicaid Provider Manual.

17.4.I. SPECIALIZED MEDICAL EQUIPMENT AND SUPPLIES

Specialized Medical Equipment and Supplies include an item or set of items that enable the individual to increase their ability to perform activities of daily living (ADL) with a greater degree of independence than without them; to perceive, control, or communicate with the environment in which they live. These are items that are not available through other Medicaid coverage or through other insurances. These items must be specified in the individual plan of service. All items must be ordered by a physician on a prescription as defined in the General Information section of this chapter. An order is valid for one year from the date it was signed.

Coverage includes:

- Items necessary for independent living (e.g., Lifeline, sensory integration equipment, electronic devices for emergencies/personal emergency response systems [PERS], etc.)
- Communication devices
- Special personal care items that accommodate the person's disability (e.g., reachers, full-spectrum lamp)
- Prostheses necessary to ameliorate negative visual impact of serious facial disfigurements and/or skin conditions
- Ancillary supplies and equipment necessary for proper functioning of equipment and supply items
- Repairs to covered supplies and equipment that are not covered benefits through other insurances

Assessments by an appropriate health care professional, specialized training needed in conjunction with the use of the equipment, and warranted upkeep will be considered as part of the cost of the services.

Coverage excludes:

- Furnishings (e.g., furniture, appliances, bedding) and other non-custom items (e.g., wall and floor coverings, decorative items) that are routinely found in a home.
- Items that are considered family recreational choices.
- Educational supplies required to be provided by the school.

Medicaid Provider Manual

Covered items must meet applicable standards of manufacture, design, and installation. There must be documentation that the best value in warranty coverage was obtained for the item at the time of purchase.

In order to cover repairs of items, there must be documentation in the individual plan of services that the specialized equipment and supplies continues to be medically necessary. All applicable warranty and insurance coverages must be sought and denied before repairs are covered. The PIHP must document that the repair is the most cost-effective solution when compared with replacement or purchase of a new item. If the equipment requires repairs due to misuse or abuse, the PIHP must provide evidence of training in the use of the equipment to prevent future incidents.

17.4.J. SUPPORTED/INTEGRATED EMPLOYMENT SERVICES

NOTE: This service is a State Plan EPSDT service when delivered to children birth-21 years.

Supported/integrated employment services are services that are provided in a variety of community settings for the purposes of supporting beneficiaries in obtaining and sustaining ICIE. ICIE refers to full- or part-time work at minimum wage or higher, with wages and benefits similar to workers without disabilities performing the same work, and fully integrated with co-workers without disabilities. Supported employment services promote self-direction, are often customized, and are aimed to meet a beneficiary's personal and career goals and outcomes identified in the IPOS. Services may be provided continuously, intermittently, or on behalf of a beneficiary. Services may be delivered to promote community inclusion and competitive integrated employment.

Coverage includes:

- Job-related discovery, person-centered employment/career planning, job placement, job development, negotiation with prospective employers, job analysis, job carving, training and systematic instruction, job coaching, benefits and work incentives planning and management, asset development, career advancement services, career planning that supports the beneficiary to make informed choices about ICIE or self-employment. The outcome of this service is sustained ICIE at or above the minimum wage in an integrated setting in the general workforce and in a job that meets personal and career goals as outlined in the beneficiary's IPOS.

Supported employment services include the following categories:

- Individual supported employment supports to attain or sustain paid employment at or above the minimum wage, and career development in an integrated, competitive setting in the general workforce in a job that meets personal and career goals.
- Self-employment refers to an individual-run business that nets the equivalent of a competitive wage, after reasonable period for start-up, and is either home-based or takes place in regular integrated business, industry or community-based settings.
- Small group supported employment support are services and training activities, provided in typical business, industry and community settings for groups of two to six workers with disabilities, paying at least minimum wage that leads to ICIE. The purpose of

Medicaid Provider Manual

funding for this service is to support sustained paid employment and work experience that leads to ICIE. Examples include mobile crews and other business-based workgroups employing small groups of workers with disabilities. Small group supported employment must promote integration into the workplace and interaction between workers with disabilities and people who do not have disabilities. Participation in small group supported employment is not a required prerequisite for ICIE or receiving supported employment services.

- Supported/integrated employment service components needed for each beneficiary are documented, coordinated, and non-duplicative of other services otherwise available under a program funded under IDEA (20 U.S.C. 1401 et seq.).
- If a beneficiary has a need for transportation to participate, maintain, or access the supported/integrated employment services, the same service provider may be reimbursed for providing this transportation only after it is determined that it is not otherwise available (e.g., volunteer, family member) and is the least expensive available means suitable to the beneficiary's need, in accordance with Medicaid non-emergency medical transportation policy outlined in the Non-Emergency Medical Transportation chapter.

17.4.K. VEHICLE MODIFICATION

Vehicle modifications include adaptations or alterations to an automobile or van that is the beneficiary's primary means of transportation in order to accommodate the special and medical needs of the beneficiary. These adaptations must be specified in the IPOS and enable the beneficiary to integrate more fully into the community and to ensure the health, welfare and safety of the beneficiary. All items must be ordered by a physician on a prescription as defined within the General Information section of this chapter. An order is valid for one year from the date it was signed.

Coverage includes:

- Adaptations to a vehicle;
- Assessments (by an appropriate health care professional) and specialized training needed in conjunction with the use of the adaptations, as well as alterations, will be considered as part of the cost of the services.

Coverage excludes:

- The purchase or lease of a vehicle;
- Adaptations or improvements to the vehicle that are not of direct medical or remedial benefit to the beneficiary;
- Regularly scheduled upkeep and maintenance of a vehicle, except upkeep and maintenance of the modification(s).

Covered items must meet applicable standards of manufacture, design, and installation. There must be documentation that the best value in warranty coverage was obtained for the item at the time of purchase. In order to cover repairs of vehicle modifications, there must be documentation in the IPOS that the alterations continue to be medically

Medicaid Provider Manual

necessary. All applicable warranty and insurance coverages must be sought and denied before authorization is approved to pay for repairs. The PIHP must document that the repair is the most cost-effective solution when compared with replacement or purchase of a new item. If the equipment requires repairs due to misuse or abuse, the PIHP must provide evidence of training in the use of the equipment to prevent future incidents.

17.5 ELECTRONIC VISIT VERIFICATION

The 21st Century Cures Act (the Cures Act), enacted by the U.S. Congress in December 2016, added Section 1903(l) to the Social Security Act to require all states to use electronic visit verification (EVV) for personal care services (PCS) and home health care services (HHCS) provided under a Medicaid State Plan of the Social Security Act or under a waiver of the State Plan. PCS provided through Behavioral Health programs must meet EVV requirements. Refer to the Electronic Visit Verification chapter of this Manual for more information.

SECTION 18 – BEHAVIORAL HEALTH TREATMENT SERVICES/APPLIED BEHAVIOR ANALYSIS

The purpose of this policy is to provide for the coverage of Behavioral Health Treatment (BHT) services, including Applied Behavior Analysis (ABA), for children under 21 years of age diagnosed with Autism Spectrum Disorder (ASD). All children, including children with ASD, must receive EPSDT services that are designed to assure that children receive early detection and preventive care, in addition to medically necessary treatment services, to correct or ameliorate any physical or behavioral conditions so that health problems are averted or diagnosed and treated as early as possible.

BHT services prevent the progression of ASD, prolong life, and promote the physical and mental health and efficiency of the child. Medical necessity and recommendation for BHT services is determined by a physician, or other licensed practitioner working within their scope of practice under state law. Direct patient care services that treat or address ASD under the state plan are available to children under 21 years of age as required by the EPSDT benefit.

18.1 SCREENING

The American Academy of Pediatrics (AAP) endorses early identification of developmental disorders as being essential to the well-being of children and their families. Early identification of developmental disorders through screening by health care professionals should lead to further evaluation, diagnosis, and treatment. Early identification of a developmental disorder's underlying etiology may affect the medical treatment of the child and the parent's/guardian's intervention planning. Screening for ASD typically occurs during an EPSDT well child visit with the child's primary care provider (PCP). EPSDT well child visits may include a review of the child's overall medical and physical health, hearing, speech, vision, behavioral and developmental status, and screening for ASD with a validated and standardized screening tool. The EPSDT well child evaluation is also designed to rule out medical or behavioral conditions other than ASD, and include those conditions that may have behavioral implications and/or may co-occur with ASD. A full medical and physical examination must be performed before the child is referred for further evaluation.

18.2 REFERRAL

The PCP who screened the child for ASD and determined a referral for further evaluation was necessary will contact the Pre-paid Inpatient Health Plan (PIHP) directly to arrange for a follow-up evaluation. The PCP must refer the child to the PIHP in the geographic service area for Medicaid beneficiaries. The PIHP will contact the child's parent(s)/guardian(s) to arrange a follow-up appointment for a comprehensive diagnostic evaluation and behavioral assessment. Each PIHP will identify a specific point of access for children who have been screened and are being referred for a diagnostic evaluation and behavioral assessment of ASD. If the PCP determines the child who screened positive for ASD is in need of occupational, physical, or speech therapy, the PCP will refer the child directly for the service(s) needed.

After a beneficiary is screened and the PCP determines a referral is necessary for a follow-up visit, the PIHP is responsible for the comprehensive diagnostic evaluation, behavioral assessment, BHT services (including ABA) for eligible Medicaid beneficiaries, and for the related EPSDT medically necessary Mental Health Specialty Services. Occupational therapy, physical therapy, and speech therapy for children with ASD who do not meet the eligibility requirements for developmental disabilities by the PIHP are covered by the Medicaid Health Plan or by Medicaid Fee-for-Service.

18.3 COMPREHENSIVE DIAGNOSTIC EVALUATIONS

Accurate and early diagnosis of ASD is critical in ensuring appropriate intervention and positive outcomes. The comprehensive diagnostic evaluation must be performed before the child receives BHT services. The comprehensive diagnostic evaluation is a neurodevelopmental review of cognitive, behavioral, emotional, adaptive, and social functioning, and should include validated evaluation tools. Based on the evaluation, the practitioner determines the child's diagnosis, recommends general ASD treatment interventions, and refers the child for a behavior assessment which is provided or supervised by a board certified and licensed behavior analyst (BCBA/LBA) to recommend more specific ASD treatment interventions. The diagnostic evaluations are performed by a qualified licensed practitioner working within their scope of practice and who is qualified and experienced in diagnosing ASD. A qualified licensed practitioner includes:

- a physician with a specialty in psychiatry or neurology;
- a physician with a subspecialty in developmental pediatrics, developmental-behavioral pediatrics or a related discipline;
- a physician with a specialty in pediatrics or other appropriate specialty with training, experience or expertise in ASD and/or behavioral health;
- a psychologist;
- an advanced practice registered nurse with training, experience, or expertise in ASD and/or behavioral health;
- a physician assistant with training, experience, or expertise in ASD and/or behavioral health; or
- a masters level, fully licensed clinical social worker, working within their scope of practice, and is qualified and experienced in diagnosing ASD.

The determination of a diagnosis by a qualified licensed practitioner is accomplished by following best practice standards. The differential diagnosis of ASD and related conditions requires multimodal assessment and integration of clinical information. This is a complex assessment procedure in which clinicians must integrate data from caregiver reports, records (e.g., medical, school, other evaluations), collateral reports (e.g., teachers, other treatment providers), data gathered from utilization of standardized psychological tools (e.g., developmental, cognitive, adaptive assessment), and the observational assessment to determine diagnostic and clinical impressions. The utilization of multiple data modes and sources improves the reliability of ASD diagnosis. No one piece of data determines the ASD diagnosis, and evaluators should consider the accuracy of data and confounding factors that may impact data obtained (e.g., parent who seems to be overly negative about the child, child who was intensely shy during observational assessment).

18.4 MEDICAL NECESSITY CRITERIA

Medical necessity and recommendation for BHT services are determined by a physician or other licensed practitioner working within their scope of practice under state law. Comprehensive diagnostic re-evaluations are required no more than once every three years, unless determined medically necessary more frequently by a physician or other licensed practitioner working within their scope of practice. The recommended frequency should be based on the child's age and developmental level, the presence of comorbid disorders or complex medical conditions, the severity level of the child's ASD symptoms, and adaptive behavior deficits through a person-centered, family-driven youth-guided process involving the child, family, and treating behavioral health care providers.

Medicaid Provider Manual

The child must demonstrate substantial functional impairment in social communication, patterns of behavior, and social interaction as evidenced by meeting criteria A and B (listed below); and require BHT services to address the following areas:

- A. The child currently demonstrates substantial functional impairment in social communication and social interaction across multiple contexts, and is manifested by all of the following:
 - 1. Deficits in social-emotional reciprocity ranging, for example, from abnormal social approach and failure of normal back-and-forth conversation, to reduced sharing of interests, emotions, or affect, to failure to initiate or respond to social interactions.
 - 2. Deficits in nonverbal communicative behaviors used for social interaction ranging, for example, from poorly integrated verbal and nonverbal communication, to abnormalities in eye contact and body language or deficits in understanding and use of gestures, to a total lack of facial expressions and nonverbal communication.
 - 3. Deficits in developing, maintaining, and understanding relationships ranging, for example, from difficulties adjusting behavior to suit various social contexts, to difficulties in sharing imaginative play or in making friends, to absence of interest in peers.
- B. The child currently demonstrates substantial restricted, repetitive and stereotyped patterns of behavior, interests, and activities, as manifested by at least two of the following:
 - 1. Stereotyped or repetitive motor movements, use of objects, or speech (e.g., simple motor stereotypes, lining up toys or flipping objects, echolalia, and/or idiosyncratic phrases).
 - 2. Insistence on sameness, inflexible adherence to routines, or ritualized patterns of verbal or nonverbal behavior (e.g., extreme distress at small changes, difficulties with transitions, rigid thinking patterns, greeting rituals, and/or need to take same route or eat the same food every day).
 - 3. Highly restricted, fixated interests that are abnormal in intensity or focus (e.g., strong attachment to or preoccupation with unusual objects and/or excessively circumscribed or perseverative interest).
 - 4. Hyper- or hypo-reactivity to sensory input or unusual interest in sensory aspects of the environment (e.g., apparent indifference to pain/temperature, adverse response to specific sounds or textures, excessive smelling or touching of objects, and/or visual fascination with lights or movement).

18.5 DETERMINATION OF ELIGIBILITY FOR BHT

The following is the process for determining eligibility for BHT services for a child with a confirmed diagnosis of ASD. Eligibility determination and recommendation for BHT must be performed by a qualified licensed practitioner through direct observation utilizing valid evaluation tools. BHT services are available for children under 21 years of age with a diagnosis of ASD from the Diagnostic and Statistical Manual of Mental Disorders (DSM-5), and who have the developmental capacity to clinically participate in the available interventions covered by BHT services. A well-established DSM-IV diagnosis of Autistic Disorder, Asperger's Disorder or PDD-NOS should be given the diagnosis of ASD. Children who have

Medicaid Provider Manual

marked deficits in social communication but whose symptoms do not otherwise meet criteria for ASD should be evaluated for social (pragmatic) communication disorder.

To be eligible for BHT, the following criteria must be met:

- Child is under 21 years of age.
- Child received a diagnosis of ASD from a qualified licensed practitioner utilizing valid evaluation tools.
- Child is medically able to benefit from the BHT treatment.
- Treatment outcomes are expected to develop, maintain, or restore, to the maximum extent practicable, the functioning of a child with ASD. Measurable variables may include increased social-communication skills, increased interactive play/age-appropriate leisure skills, increased reciprocal and functional communication, etc.
- Coordination with the school and/or early intervention program is critical. Collaboration between school and community providers is needed to coordinate treatment and to prevent duplication of services. This collaboration may take the form of phone calls, written communication logs, participation in team meetings (i.e., Individualized Education Plan/Individualized Family Service Plan [IEP/IFSP], Individual Plan of Service [IPOS], etc.).
- Services are able to be provided in the child's home and community, including centers and clinics.
- Symptoms are present in the early developmental period (symptoms may not fully manifest until social demands exceed limited capacities or may be masked by learned strategies later in life).
- Symptoms cause clinically significant impairment in social, occupational, and/or other important areas of current functioning that are fundamental to maintain health, social inclusion, and increased independence.
- Medical necessity and recommendation for BHT services are determined by a qualified licensed practitioner.
- Services must be based on the individual child and the parent's/guardian's needs and must consider the child's age, school attendance requirements, and other daily activities as documented in the IPOS. Families of minor children are expected to provide a minimum of eight hours of care per day on average throughout the month.

18.6 PRIOR AUTHORIZATION

BHT services are authorized for a time period not to exceed 365 days. The 365-day authorization period for services may be re-authorized annually based on recommendation of medical necessity by a qualified licensed practitioner working within their scope of practice under state law.

18.7 RE-EVALUATION

Comprehensive diagnostic re-evaluations are required no more than once every three years, unless determined medically necessary more frequently by a physician or other licensed practitioner working within their scope of practice. The recommended frequency should be based on the child's age and developmental level, the presence of comorbid disorders or complex medical conditions, the severity level of the child's ASD symptoms and adaptive behavior deficits through a person-centered, family-driven youth-guided process involving the child, family, and treating behavioral health care providers.

18.8 TRANSITION AND DISCHARGE CRITERIA

The desired BHT goals and outcomes for discharge should be specified at the initiation of services, monitored throughout the duration of service implementation, and refined through the behavioral service level evaluation process. Transition and discharge from all BHT services should generally involve a gradual step-down model and require careful planning. Transition and discharge planning from BHT services should include transition goal(s) within the behavioral plan of care or plan, or written plan, that specifies details of monitoring and follow-up as is appropriate for the individual and the family or authorized representative(s) utilizing the PCP process.

Discharge from BHT services should be reviewed and evaluated by a qualified BHT professional for children who meet any of the following criteria:

- The individual has achieved treatment goals and less intensive modes of services are medically necessary and/or appropriate.
- The individual is either no longer eligible for Medicaid or is no longer a State of Michigan resident.
- The individual, family, or authorized representative(s) is interested in discontinuing services.
- The individual has not demonstrated measurable improvement and progress toward goals, and the predicted outcomes as evidenced by a lack of generalization of adaptive behaviors across different settings where the benefits of the BHT interventions are not able to be maintained or they are not replicable beyond the BHT treatment sessions through the successive authorization periods.
- Targeted behaviors and symptoms are becoming persistently worse with BHT treatment over time or with successive authorizations.
- The services are no longer medically necessary, as evidenced by use of valid evaluation tools administered by a qualified licensed practitioner.
- The provider and/or individual/family/authorized representative(s) are unable to reconcile important issues in treatment planning and service delivery to a degree that compromises the potential effectiveness and outcome of the BHT service.

18.9 BHT SERVICES

18.9.A. BEHAVIORAL ASSESSMENT

A developmentally appropriate applied behavior analysis (ABA) assessment process must identify strengths and weaknesses across domains and potential barriers to progress. The information from this process is the basis for developing the individualized behavioral plan of care with the individual, family, and treatment planning team. Behavioral assessments can include direct observational assessment, record review, rating scales, data collection, functional or adaptive assessments, structured interviews, and analysis by a board certified and licensed behavior analyst (BCBA/LBA). Behavioral assessment tools must describe specific levels of behavior at baseline to inform the individual's response to treatment through ongoing collection, quantification, and analysis of the individual's data on all goals as monitored by a BCBA/LBA.

Medicaid Provider Manual

18.9.B. BEHAVIORAL INTERVENTION

BHT services include a variety of behavioral interventions which have been identified as evidence-based by nationally recognized research reviews and/or other nationally recognized scientific and clinical evidence. BHT services are designed to be delivered primarily in the home and in other community settings.

BHT treatment services may also include any other intervention supported by credible scientific and/or clinical evidence, as appropriate for each individual. Based on the behavioral plan of care which is adjusted over time based on data collected by the qualified provider to maximize the effectiveness of BHT treatment services, the provider selects and adapts one or more of these services, as appropriate for each individual.

18.10 BHT SERVICE LEVEL

BHT services are available for Medicaid beneficiaries diagnosed with ASD and are provided for all levels of severity of ASD. The behavioral intervention should be provided at an appropriate level of intensity in an appropriate setting(s) within the individual's community for an appropriate period of time, depending on the needs of the individual and their family or authorized representative(s). Clinical determinations of service intensity, setting(s), and duration are designed to facilitate the individual's goal attainment. These supports may serve to reinforce skills or lessons taught in school, therapy, or other settings, but are not intended to supplant responsibilities of educational or other authorities. Each individual's IPOS must specify how identified supports and services will be provided as part of an overall, comprehensive set of supports and services that does not duplicate services that are the responsibility of another entity, such as a private insurance or other funding authority, and do not include special education and related services defined in the Individuals with Disabilities Education Act (IDEA) that are available to the individual through a local education agency. The recommended service level, setting(s), and duration will be included in the individual's IPOS, with the planning team and the family or authorized representative(s) reviewing the IPOS no less than annually and, if indicated, adjusting the service level and setting(s) to meet the individual's changing needs. The service level includes the number of hours of intervention provided to the individual. The service level determination will be based on research-based interventions integrated into the behavioral plan of care with input from the planning team. Service intensity will vary with each individual and should reflect the goals of treatment, specific needs of the individual, and response to treatment. The PIHP's Utilization Management will authorize the level of services prior to the delivery of services.

- **Focused Behavioral Intervention:** Focused behavioral intervention is provided an average of 5-15 hours per week (actual hours needed are determined by the behavioral plan of care and interventions required).
- **Comprehensive Behavioral Intervention:** Comprehensive behavioral intervention is provided an average of 16-25 hours per week (actual hours needed are determined by the behavioral plan of care and interventions required).

18.11 BHT SERVICE EVALUATION

As part of the IPOS, there is a comprehensive, individualized behavioral plan of care that includes specific targeted behaviors, along with measurable, achievable, and realistic goals for improvement. BCBAs/LBAs and other qualified providers develop, monitor, and implement the behavioral plan of care. These providers are responsible for effectively evaluating the child's response to treatment and skill acquisition.

Medicaid Provider Manual

Ongoing determination of the level of service (minimally every six months) requires evidence of measurable and ongoing improvement in targeted behaviors that are demonstrated with the use of reliable and valid assessment instruments and other appropriate documentation of analysis (i.e., graphs, assessment reports, records of service, progress reports, etc.).

18.12 BHT SERVICE PROVIDER QUALIFICATIONS

BHT services are highly specialized services that require specific qualified providers who are available within PIHP/CMHSP provider networks and have extensive experience providing specialty mental health and behavioral health services. BHT services must be provided under the direction of a BCBA/LBA or a Master's prepared QBHP.) These services must be provided directly to, or on behalf of, the child by training their parents/guardians, behavior technicians, and BCaBAs to deliver the behavioral interventions. The BCBA/LBA and other qualified providers are also responsible for communicating progress on goals to parents/guardians minimally every three to six months; clinical skill development and supervision of BCaBA, QBHP, and behavior technicians; and collaborating with support coordinators/case managers and the parents/guardians on goals and objectives with participation in development of the IPOS that includes the behavioral plan of care.

18.12.A. BHT SUPERVISORS

Board Certified Behavior Analyst-Doctoral (BCBA-D/LBA) or Board Certified Behavior Analyst (BCBA/LBA)	<ul style="list-style-type: none">• Services Provided: Behavioral assessment, behavioral intervention, and behavioral observation and direction.• License/Certification: Current certification as a BCBA through the BACB. The BACB is the national entity accredited by the National Commission for Certifying Agencies (NCCA). Licensed through the Michigan Licensing and Regulatory Authority (LARA).• Education and Training: Minimum of a master's degree from an accredited institution conferred in a degree program in which the candidate completed a BACB approved course sequence.
Licensed Psychologist (LP or LLP)	<ul style="list-style-type: none">• Must be certified and licensed as a BCBA/LBA by September 30, 2025.• Services Provided: Behavioral assessment, behavioral intervention, and behavioral observation and direction.• License/Certification: LP means a doctoral level psychologist licensed by the State of Michigan. Must complete all coursework and experience requirements. LLP means a masters level psychologist licensed by the State of Michigan.• Education and Training: Minimum of a doctorate degree from an accredited institution. Works within their scope of practice and has extensive knowledge and training in behavior analysis. Extensive knowledge is defined as having received documented coursework at the graduate level from an accredited university in at least three of the six following areas:<ul style="list-style-type: none">➢ Ethical considerations.➢ Definitions and characteristics; and principles, processes and concepts of behavior.➢ Behavioral assessment and selecting interventions outcomes and strategies.➢ Experimental evaluation of interventions.➢ Measurement of behavior, and developing and interpreting behavioral data.➢ Behavioral change procedures and systems supports.

Medicaid Provider Manual

	<ul style="list-style-type: none"> A minimum of one year experience in treating children with ASD based on the principles of behavior analysis. Works in consultation with the BCBA/LBA to discuss the caseload, progress, and treatment of the child with ASD.
Board Certified Assistant Behavior Analyst (BCaBA)	<ul style="list-style-type: none"> Services Provided: Behavioral assessment, behavioral intervention, and behavioral observation and direction. License/Certification: Current certification as a BCaBA through the BACB. The BACB is the national entity accredited by the NCCA. Education and Training: Minimum of a bachelor's degree from an accredited institution conferred in a degree program in which the candidate completed a BACB approved course sequence. Licensed through LARA. Other Standard: Works under the supervision of the BCBA/LBA.
Qualified Behavioral Health Professional (QBHP)	<ul style="list-style-type: none"> Must be licensed and certified as a BCBA/LBA by September 30, 2025. Services Provided: Behavioral assessment, behavioral intervention, and behavioral observation and direction. License/Certification: Must be certified as a BCBA/LBA within two years of successfully completing ABA graduate coursework. Education and Training: QBHP must meet one of the following state requirements: <ul style="list-style-type: none"> ➤ Must be a physician or licensed practitioner with specialized training and one year of experience in the examination, evaluation, and treatment of children with ASD. ➤ Minimum of a master's degree in a mental health-related field or BACB approved degree category from an accredited institution with specialized training and one year of experience in the examination, evaluation, and treatment of children with ASD. Works within their scope of practice, works under the supervision of a BCBA/LBA, and has extensive knowledge and training in behavior analysis. Extensive knowledge is defined as having received documented coursework at the graduate level (i.e., completion of three BACB evaluated graduate courses or BACB verified course sequences meeting specific standards toward certification) from an accredited university in at least three of the six following areas: <ul style="list-style-type: none"> ◆ Ethical considerations. ◆ Definitions and characteristics; and principles, processes and concepts of behavior. ◆ Behavioral assessment, and selecting interventions outcomes and strategies. ◆ Experimental evaluation of interventions. ◆ Measurement of behavior, and developing and interpreting behavioral data. ◆ Behavioral change procedures and systems supports.
Behavior Technician or Registered Behavior Technician (RBT)	<ul style="list-style-type: none"> Services Provided: Behavioral intervention. License/Certification: A license or certification is not required. Education and Training: Will receive BACB approved Registered Behavior Technician (RBT) training conducted by a professional experienced in BHT

Medicaid Provider Manual

	<p>services (BCBA/LBA, BCaBA, and/or QBHP), but is not required to register with the BACB upon completion in order to furnish services.</p> <ul style="list-style-type: none">• Works under the supervision of the BCBA/LBA or other professional (BCaBA, or QBHP) overseeing the behavioral plan of care, with minimally one hour of clinical observation and direction for every 10 hours of direct treatment.• Must be at least 18 years of age; able to practice universal precautions to protect against the transmission of communicable disease; able to communicate expressively and receptively in order to follow individual plan requirements and beneficiary-specific emergency procedures and to report on activities performed; and be in good standing with the law (i.e., not a fugitive from justice, a convicted felon who is either under jurisdiction or whose felony relates to the kind of duty to be performed, or an illegal alien). Must be able to perform and be certified in basic first aid procedures and is trained in the IPOS/behavioral plan of care utilizing the person-centered planning process.

18.13 ABA RATE [SUBSECTION ADDED 7/1/2025]

All PIHPs will reimburse BHT-ABA services at a minimum to the rate outlined with the most recent executed PIHP contract. **(text added per bulletin MMP 24-51)**

Medicaid Provider Manual

SECTION 19 – SUBSTANCE USE DISORDER HEALTH HOME

Pursuant to the requirements of Section 2703 of the Patient Protection and Affordable Care Act and the State Plan and Alternative Benefit Plan Amendments, the purpose of this policy is to provide for the coverage and reimbursement of Substance Use Disorder Health Home (SUDHH) services. This policy is effective for dates of service on and after October 1, 2024. The policy applies to Fee-for-Service (FFS) and managed care beneficiaries enrolled in Medicaid, the Healthy Michigan Plan, or MICHild who meet SUDHH eligibility criteria. In addition to this policy, an operations guide for providers called the Substance Use Disorder Health Home (SUDHH) Handbook is posted on the MDHHS website. (Refer to the Directory Appendix for website information.)

Note: Continuation of the SUDHH policy/benefit after ten (10) quarters of the effective date is subject to Michigan Department of Health and Human Services (MDHHS) review and approval.

Note: Prepaid Inpatient Health Plan (PIHP) serves as the Lead Entity (LE) for the SUDHH.

19.1 GENERAL INFORMATION

Effective October 1, 2024, MDHHS implemented a care management and care coordination primary care Health Home benefit called the Substance Use Disorder Health Home (SUDHH) (previously referred to as the Opioid Health Home [OHH]). The goals of the program are to ensure seamless transition of care and to connect eligible beneficiaries with needed clinical and social services. MDHHS expects the benefit will enhance patient outcomes and quality of care, while simultaneously shifting people from emergency departments and hospitals to a primary care setting.

19.2. BENEFICIARY ELIGIBILITY

Eligible beneficiaries cited in the Provider Eligibility Requirements subsection of this policy include those enrolled in Medicaid, the Healthy Michigan Plan, or MICHild who have a diagnosis of alcohol, stimulant, and opioid use disorder. Beneficiaries must also be at risk of developing mental health conditions, asthma, diabetes, heart disease, body mass index (BMI) over 25, or chronic obstructive pulmonary disease (COPD).

19.3 BENEFICIARY ENROLLMENT

19.3.A. ENROLLMENT PROCESSES

Potential Substance Use Disorder Health Home (SUDHH) enrollees will be identified using a multifaceted approach. The Michigan Department of Health and Human Services (MDHHS) will provide a generated list that will pull potential enrollees from MDHHS administrative claims data into the Waiver Support Application (WSA) monthly. The PIHP will identify potential enrollees from the WSA and coordinate with a health home partner (HHP) to fully enroll the Medicaid beneficiary into the SUDHH benefit. The selection of a HHP is optional, the beneficiary may have other choices of HHPs, and the beneficiary may disenroll from the benefit at any time. Enrolling into the health home benefit does not restrict access to other providers nor does it limit access to other Medicaid benefits. Enrollment into health home is voluntary and the potential enrollee must agree to receive health home services and provide consent that is maintained in the enrollee's health record.

Medicaid Provider Manual

PIHPs will provide information about the SUDHH to all potential enrollees through community referrals, peer support specialist networks, other providers, courts, health departments, law enforcement, and other community-based settings. PIHPs will strategically provide these settings with informational brochures, posters, and other outreach materials to facilitate awareness and engagement of the SUDHH.

- **PIHP Identification of Potential Enrollees**

The PIHP will be responsible for identifying potential enrollees that have a qualifying SUD diagnosis in the WSA to a HHP and provide information regarding SUDHH services to the Medicaid beneficiary in coordination with the HHP.

- **Provider Recommended Identification of Potential Enrollees**

HHPs are permitted to recommend potential enrollees for the SUDHH benefit via the WSA. HHPs must provide documentation that indicates whether a potential SUDHH enrollee meets all eligibility for the health home benefit, including diagnostic verification, obtaining consent, and establishment of an individualized care plan. The PIHP must review and process all recommended enrollments in the WSA. MDHHS reserves the right to review and verify all enrollments.

19.3.B. BENEFICIARY CONSENT

Potential enrollees must provide HHPs a signed Consent to Share Behavioral Health Information for Care Coordination Purposes form (MDHHS-5515) to receive the SUDHH benefit. The MDHHS-5515 must be collected and stored in the beneficiary's health record with attestation in the WSA. (The MDHHS-5515 can be found on the MDHHS website. Refer to the Directory Appendix for website information.) The form is also available at the designated HHP's office and on the PIHP's website. HHPs are responsible for verifying receipt of the signed consent form and providing proper documentation to MDHHS via the PIHP. All documents must be maintained in compliance with MDHHS record-keeping requirements.

19.3.C. SUDHH BENEFIT PLAN ASSIGNMENT

Once enrolled, the beneficiary is assigned to the Substance Use Disorder Health Home (SUDHH) benefit plan associated with their Medicaid member ID in the Community Health Automated Medicaid Processing System (CHAMPS). It is incumbent upon SUDHH providers to verify a beneficiary's SUDHH benefit plan assignment prior to rendering services. Beneficiaries without the SUDHH benefit plan assignment are not eligible for SUDHH payment.

19.3.D. BENEFICIARY DISENROLLMENT

Beneficiaries may opt-out or disenroll from the SUDHH benefit at any time. Beneficiaries who opt-out of enrollment initially may elect to enroll later contingent on meeting eligibility requirements. Beneficiaries who decline services or disenroll may do so without jeopardizing their access to other entitled medically necessary Medicaid services.

Medicaid Provider Manual

Other than beneficiary-initiated disenrollment, disengaged beneficiaries are categorized into one of the following two groups which have unique disenrollment processes:

- Beneficiaries who moved out of the state of Michigan, are deceased, or are otherwise no longer eligible for the Medicaid program. These beneficiaries will have their eligibility files updated per the standard MI Bridges protocol. HHPs will receive updated files accordingly.
- Beneficiaries who are unresponsive for reasons other than moving or death. The PIHP must make at least three unsuccessful beneficiary contact attempts within six consecutive months for MDHHS to deem a beneficiary as unresponsive. For provider-recommended enrolled beneficiaries, if the beneficiary is unresponsive for three months, the PIHP must mark the beneficiary as disenrolled via the WSA via the last date of service. The PIHP and MDHHS must maintain a list of disenrolled beneficiaries in the WSA. The PIHP must attempt to re-establish contact with these beneficiaries at least every six months after disenrollment, as applicable.

19.3.E. BENEFICIARY CHANGING SUDHH PROVIDERS

While the beneficiary's stage in recovery and individualized care plan is utilized to determine the appropriate setting and HHP of care (i.e., providers within Opioid Treatment Program versus Office-Based Substance Use Disorder Treatment), beneficiaries have the option to change HHPs to the extent feasible within the regional PIHP's designated HHP network. To maximize continuity of care and the patient-provider relationship, MDHHS expects beneficiaries to establish a lasting relationship with their chosen HHP. However, beneficiaries may change HHPs and should notify their current HHP immediately if they intend to do so. Current and future HHPs must discuss the timing of the transfer and communicate transition options to the beneficiary. The change should occur on the first day of the next month with respect to the new HHP's appointment availability. Only one SUDHH provider may be paid per beneficiary per month for SUDHH services.

19.4 COVERED SERVICES

SUDHH services provide integrated, person-centered, and comprehensive care to eligible beneficiaries to successfully address the complexity of substance use disorder and comorbid physical and behavioral health conditions. These services include the following:

- **Comprehensive Care Management**, including but not limited to:
 - Assessment of each beneficiary, including behavioral and physical health care needs;
 - Assessment of beneficiary readiness to change;
 - Development of an individualized care/treatment plan;
 - Documentation of assessment and care plan in the Electronic Health Record; and
 - Periodic reassessment of each beneficiary's treatment, outcomes, goals, self-management, health status, and service utilization.

Medicaid Provider Manual

- **Care Coordination**, including but not limited to:
 - Organization of all aspects of a beneficiary's care;
 - Management of all integrated primary and specialty medical services, behavioral health services, physical health services, and social, educational, vocational, housing, and community services;
 - Information sharing between providers, patient, authorized representative(s), and family;
 - Resource management and advocacy;
 - Maintaining beneficiary contact, with an emphasis on in-person contact (although telephonic contact may be used for lower-risk beneficiaries who require less frequent face-to-face contact);
 - Appointment-making assistance, including coordinating transportation;
 - Development and implementation of care plan;
 - Medication adherence and monitoring;
 - Referral tracking;
 - Use of facility liaisons;
 - Use of patient care team huddles;
 - Use of case conferences;
 - Tracking of test results;
 - Requiring discharge summaries;
 - Providing patient and family activation and education;
 - Providing patient-centered training (e.g., diabetes education, nutrition education, etc.); and
 - Connection of beneficiary to resources (e.g., smoking cessation, substance use disorder treatment, nutritional counseling, obesity reduction and prevention, disease-specific education, etc.).
- **Health Promotion**, including but not limited to:
 - Providing patient and family activation and education;
 - Providing patient-centered training (e.g., diabetes education, nutrition education, etc.);
 - Connection of beneficiary to resources (e.g., smoking cessation, substance use disorder treatment, nutritional counseling, obesity reduction and prevention, disease-specific education, etc.);
 - Promoting healthy lifestyle interventions;
 - Encouraging a routine preventative care such as immunizations and screenings;
 - Assessing the patient and family's understanding of the health condition and motivation to engage in self-management; and

Medicaid Provider Manual

- Using evidence-based practices, to engage and help patient participate in and manage their care.
- **Comprehensive Transitional Care**, including but not limited to:
 - Connecting the beneficiary to health services;
 - Coordinating and tracking the beneficiary's use of health services through Health Information Technology (HIT) in conjunction with the PIHP Coordinator;
 - Providing and receiving notification of admissions and discharges;
 - Receiving and reviewing care records, continuity of care documents, and discharge summaries;
 - Post-discharge outreach to ensure appropriate follow-up services for all care in conjunction with the PIHP Coordinator;
 - Medication reconciliation;
 - Pharmacy coordination;
 - Proactive care (versus reactive care);
 - Specialized transitions when necessary (i.e., age, corrections); and
 - Home visits to ensure stability through transitions.
- **Individual and Family Support (including authorized representatives)**, including but not limited to:
 - Reducing barriers to the beneficiary's care coordination;
 - Increasing patient and family skills and engagement;
 - Use of community supports (i.e., Community Health Workers, peer supports, peer recovery coaches, support groups, self-care programs, etc.);
 - Facilitating improved adherence to treatment;
 - Advocating for individual and family needs;
 - Assessing and increasing individual and family health literacy;
 - Use of advance directives, including psychiatric advance directives;
 - Contributing assistance with maximizing beneficiary's level of functioning; and
 - Providing assistance with development of social networks.
- **Referral to Community and Social Support Services**, including but not limited to:
 - Providing beneficiaries with referrals to support services;
 - Collaborating/coordinating with community-based organizations and key community stakeholders;
 - Emphasizing resources closest to the beneficiary's home;
 - Emphasizing resources which present the fewest barriers;
 - Identifying community-based resources;

Medicaid Provider Manual

- Providing resource materials pertinent to patient needs;
- Assisting in obtaining other resources, including benefit acquisition;
- Providing referral to housing resources; and
- Providing referral tracking and follow-up.

19.5 PROVIDER ELIGIBILITY REQUIREMENTS

Eligible SUDHH providers must meet all applicable state and federal licensing requirements, including specifications set forth in this policy. Additionally, eligible providers must complete the MDHHS Health Home Provider (HHP) Application (form MDHHS-5745), which requires attestation to the requirements cited in this policy, the State Plan Amendment, and other applicable MDHHS policies and procedures. (The MDHHS-5745 and the State Plan are available on the MDHHS website. Refer to the Directory Appendix for website information.)

19.5.A. GEOGRAPHIC AREA

SUDHH services are available to Medicaid beneficiaries pending availability of SUDHH providers. A listing/map of counties is posted on the MDHHS website. (Refer to the Directory Appendix for website information.)

19.5.B. PROVIDER TYPES

Eligible provider types for the SUDHH include Opioid Treatment Programs (OTPs) and Office-Based Substance Use Disorder Treatment (OBSUT) providers. OTPs must meet all state and federal licensing requirements. OBSUT providers must attain the proper federal credentials from the Substance Abuse and Mental Health Services Administration (SAMHSA) and the Drug Enforcement Agency (DEA) to provide MAT. OBSUT providers may include Community Mental Health Services Programs (CMHSPs), Federally Qualified Health Centers (FQHCs), including Section 330 grantees and FQHC Look-Alikes, Tribal Health Centers (THCs), and individual provider practices.

19.5.C. PROVIDER REQUIREMENTS

PIHPs and providers must adhere to the requirements of the State Plan Amendment, all Medicaid statutes, policies, procedures, rules, and regulations, and the SUDHH Handbook.

Regional PIHP (per 100 patients)	<ul style="list-style-type: none">• Health Home Director (0.5 FTE)
Health Home Partners (per 100 patients)	<ul style="list-style-type: none">• Behavioral Health Specialist (0.25 FTE)• Nurse Care Manager (1.00 FTE)• Peer Recovery Coach, Community Health Worker (2.00-4.00 FTE)• Medical Consultant (0.10 FTE)• Psychiatric Consultant (0.05 FTE)

Medicaid Provider Manual

Contingent upon MDHHS exceptions, all providers referenced above must meet the following criteria:

Health Home Director	<ul style="list-style-type: none">• Must be an administrative staff person employed by the PIHP.
Behavioral Health Specialist	<ul style="list-style-type: none">• an individual who has a minimum of a Bachelor's Degree from an accredited four year institution of higher learning, with specialization in psychology, mental health and human services, behavioral health, behavioral sciences, social work, human development, special education, counseling, rehabilitation, sociology, nursing, or closely related field; OR• who has a bachelor's degree from an accredited four-year educational institution in an unrelated field and at least one year of full-time equivalent relevant human services experience; OR• who has a master's degree in social work, education, psychology, counseling, nursing, or closely related field from an accredited graduate school)
Nurse Care Manager	<ul style="list-style-type: none">• licensed registered nurse, licensed practical nurse
Peer Recovery Coach, Community Health Worker, Medical Assistant	<ul style="list-style-type: none">• Appropriate certification/training.• Must be at least 18 years of age.• Must possess high school diploma or equivalent.
Medical Consultant	<ul style="list-style-type: none">• primary care physician, physician's assistant, or nurse practitioner
Psychiatric Consultant	<ul style="list-style-type: none">• licensed mental health service professional (i.e., psychologist, psychiatrist, psychiatric nurse practitioner)

In addition to the above Provider Infrastructure Requirements, eligible HHPs should coordinate care with the following professions:

- Dentist
- Dietician/Nutritionist
- Pharmacist
- Peer support specialist
- Diabetes educator
- School personnel
- Others as appropriate

19.6 PROVIDER ENROLLMENT AND SUDHH DESIGNATION

All HHPs must be properly paneled with the PIHP through contract, memorandum of understanding, or a similar mechanism conveying mutual partnership to execute SUDHH services. Moreover, all HHPs must sign and attest to the requirements set forth in the provider application (MDHHS-5745).

19.6.A. TRAINING AND TECHNICAL ASSISTANCE

MDHHS is requiring HHPs to actively participate in state- and PIHP-sponsored activities related to training and technical assistance and will also impose additional

Medicaid Provider Manual

functional provider requirements to optimize care management, coordination, and behavioral health integration.

19.6.B. USE OF APPLICABLE HEALTH INFORMATION TECHNOLOGY (HIT)

MDHHS requires HHPs to utilize appropriate HIT for enrollment, health service documentation, and care coordination purposes. Training on specific HIT resources is provided by MDHHS.

19.7 PROVIDER DISENROLLMENT

To maximize continuity of care and the patient-provider relationship, MDHHS expects HHPs to establish a lasting relationship with enrolled beneficiaries. However, HHPs wishing to discontinue SUDHH services must notify the regional PIHP and MDHHS before ceasing SUDHH operations. SUDHH services may not be discontinued without MDHHS approval of a provider-created cessation plan and protocols for beneficiary transition.

19.8 SUDHH PAYMENT

Payment for SUDHH services is contingent on designated HHPs meeting the requirements laid out in the State Plan Amendment, this policy, the provider application (MDHHS-5745), the SUDHH Handbook, and as determined by MDHHS. Failure to meet these requirements may result in loss of HHP designation.

19.8.A. GENERAL PROVISIONS FOR SUDHH PAYMENT

19.8.A.1. MDHHS TO REGIONAL PIHP

MDHHS will provide a monthly case rate to the PIHP based on attributed SUDHH beneficiaries with at least one SUDHH service. MDHHS is the PIHP to, in turn, pay HHPs a negotiated rate with a state-directed minimum payment. Any savings afforded through the provision of health home services will be shared between the PIHP and the HHPs based on defined quality metrics. Additionally, MDHHS will employ a P4P incentive that will reward providers based on outcomes. MDHHS will only claim federal match for P4P incentive payments after P4P qualifications have been met and providers are paid.

19.8.A.2. REGIONAL PIHP TO HEALTH HOME PARTNERS

Designated HHPs must bill through their regional PIHP to receive SUDHH payment. Designated HHPs are paid one monthly case rate per beneficiary.

19.8.A.3. PAY FOR PERFORMANCE

MDHHS will afford P4P via a 5% performance incentive to the additional per member per month case rate. The PIHP must distribute P4P monies to HHPs that meet the quality improvement benchmarks in accordance with the timelines and processes. The State will only claim federal match once it determines quality improvement benchmarks have been met and providers have been paid. If quality improvement

Medicaid Provider Manual

benchmarks are not met by any of the HHPs within a given performance year, the State will distribute funds based on HHPs. The funding will be distributed equally among regions that maintain a recoupment rate less than 45% during the performance year. Subsequent performance years will operate in accordance with this structure.

Details and guidance regarding applicable service encounter and diagnosis codes can be found in the SUDHH Handbook.

Note: Payment for SUDHH services is in addition to the existing FFS payments, encounters, or daily rate payments for direct clinical services. The MDHHS payment methodology is designed to only reimburse for the cost of the HHP staff for the delivery of SUDHH services that are not covered by any other currently available Medicaid reimbursement mechanism.

19.8.B. RECOUPMENT OF PAYMENT

The monthly payment is contingent upon an SUDHH beneficiary receiving an SUDHH service during the month at issue. The payment is subject to recoupment if the beneficiary does not receive an SUDHH service during the calendar month. The recoupment lookback will occur six months after the monthly payment is made. Thus, six months after the month a payment is made (for example: in January, MDHHS would look back at the payment made in July), CHAMPS will conduct an automatic recoupment process that will look for an approved encounter code (refer to the SUDHH Handbook) which documents that the SUDHH provided at least one of the six core SUDHH services (refer to the Covered Services subsection) during the calendar month in question. If a core SUDHH service is not provided during a month, that month's payment will be subject to recoupment by MDHHS. Once a recoupment has occurred, there shall be no further opportunity to submit a valid SUDHH encounter code and/or claim for the month that has a payment recouped.

Additional details regarding payment recoupment, including the recoupment schedule and other reasons for recoupment, can be found in the SUDHH Handbook.

Medicaid Provider Manual

SECTION 20 – BEHAVIORAL HEALTH HOME

Pursuant to the requirements of Section 2703 of the Patient Protection and Affordable Care Act/Section 1945 of the Social Security Act, the purpose of the Behavioral Health Home (BHH) is to provide for the coverage and reimbursement of six required Behavioral Health Home services. This benefit is effective for dates of service on and after October 1, 2020. The benefit applies to Fee-for-Service and managed care beneficiaries enrolled in Medicaid, the Healthy Michigan Plan, Freedom of Choice, or MICHild who meet BHH eligibility criteria. In addition, MDHHS created a companion operation guide for providers called the Behavioral Health Home (BHH) Handbook which is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

Note: Continuation of the BHH policy/benefit after eight (8) quarters of the effective date is subject to MDHHS review and approval.

Note: The Prepaid Inpatient Health Plan (PIHP) serves as the Lead Entity (LE) for the BHH.

20.1 GENERAL INFORMATION

The BHH provides comprehensive care management and care coordination services to beneficiaries with a select serious mental illness/serious emotional disturbance. The goals of the benefit are to ensure seamless transition of care and to connect eligible beneficiaries with needed clinical, behavioral, and social services. MDHHS expects the benefit will enhance beneficiary outcomes and quality of care, while simultaneously shifting people from emergency departments and hospitals to a behavioral health care setting.

20.2 BENEFICIARY ELIGIBILITY

Eligible beneficiaries meeting geographic area requirements cited in the Provider Eligibility Requirements subsection include those enrolled in Medicaid, the Healthy Michigan Plan, Freedom of Choice, or MICHild who have a diagnosis of a Serious Mental Illness or Serious Emotional Disturbance.

20.3 BENEFICIARY ENROLLMENT

20.3.A. ENROLLMENT

Potential BHH enrollees will be identified using a multifaceted approach. MDHHS will provide a generated list that will pull potential enrollees from MDHHS administrative claims data into the Waiver Support Application (WSA) monthly. The PIHP will identify potential enrollees from the WSA and coordinate with a Health Home Partner (HHP) to fully enroll the Medicaid beneficiary into the BHH benefit.

PIHPs will provide information about the BHH to all potential enrollees through community referrals, peer support specialist networks, other providers, courts, health departments, law enforcement, and other community-based settings. PIHPs will strategically provide these settings with informational brochures, posters, and other outreach materials to facilitate awareness and engagement of the BHH.

Medicaid Provider Manual

20.3.B. PIHP IDENTIFICATION OF POTENTIAL ENROLLEES

The PIHP will be responsible for identifying potential enrollees that have a qualifying BHH diagnosis in the WSA to a prospective HHP and provide information regarding BHH services to the Medicaid beneficiary in coordination with the HHP.

20.3.C. PROVIDER RECOMMENDED IDENTIFICATION OF POTENTIAL ENROLLEES

HHPs are permitted to recommend potential enrollees for the BHH benefit via the WSA. BHH providers must provide documentation that indicates whether a potential BHH enrollee meets all eligibility for the health home benefit, including diagnostic verification, obtaining consent, and establishment of a Behavioral Health Home care plan. The PIHP must review and process all recommended enrollments in the WSA. MDHHS reserves the right to review and verify all enrollments.

20.3.D. BENEFICIARY CONSENT

Beneficiaries must provide BHH providers a signed Consent to Share Behavioral Health Information for Care Coordination Purposes form (MDHHS-5515) to receive the BHH benefit. The MDHHS-5515 must be collected and stored in the beneficiary's health record with attestation in the WSA. The MDHHS-5515 can be found on the MDHHS website. (Refer to the Directory Appendix for website information.) The form is also available at the designated HHP's office and on the PIHP's website. HHPs are responsible for verifying receipt of the signed consent form and providing proper documentation to MDHHS via the PIHP. All documents must be maintained in compliance with MDHHS record-keeping requirements.

20.3.E. BHH BENEFIT PLAN ASSIGNMENT

Once enrolled, the beneficiary is assigned to the behavioral health home benefit plan (HHBH) associated with their Medicaid member ID in the Community Health Automated Medicaid Processing System (CHAMPS). It is incumbent upon BHH providers to verify a beneficiary's HHBH benefit plan assignment prior to rendering services. Beneficiaries without the HHBH benefit plan assignment are not eligible for BHH payment.

20.3.F. BENEFICIARY DISENROLLMENT

Failure to verify consent or diagnostic eligibility will prevent the Medicaid beneficiary from enrolling into the BHH benefit. Medicaid beneficiaries may opt-out (disenroll) from the BHH at any time with no impact on their eligibility for other Medicaid services.

Other than beneficiary-initiated disenrollment, disengaged beneficiaries will be categorized into one of the following two groups, which have unique disenrollment processes:

- Beneficiaries who have moved out of an eligible geographic area, are deceased, or are otherwise no longer eligible for the Medicaid program. These beneficiaries will

Medicaid Provider Manual

have their eligibility files updated per the standard MI Bridges protocol. Providers will receive updated files accordingly.

- Beneficiaries who are unresponsive for reasons other than moving or death. The PIHP or HHP must make at least three unsuccessful beneficiary contact attempts within three consecutive months for MDHHS to deem a beneficiary as unresponsive. The PIHP and MDHHS must maintain a list of disenrolled beneficiaries in the WSA. The PIHP must attempt to re-establish contact with these beneficiaries at least every six months after disenrollment for a year or until eligibility changes.

20.3.G. BENEFICIARY CHANGING BHH PROVIDERS

While the beneficiary's individualized care plan will be utilized to determine the appropriate setting and BHH provider of care, beneficiaries will have the ability to change BHH providers to the extent feasible within the PIHP's designated BHH network. To maximize continuity of care and the patient-provider relationship, MDHHS expects beneficiaries to establish a lasting relationship with their chosen BHH provider. However, if a beneficiary decides to change BHH providers, they should notify their current BHH provider immediately if they intend to do so. The current and future BHH providers must discuss the timing of the transfer and communicate transition options to the beneficiary. The change should occur on the first day of the next month with respect to the new BHH provider's appointment availability. Only one BHH provider may be paid per beneficiary per month for health home services.

20.4. COVERED SERVICES

BHH services will provide integrated, person-centered, and comprehensive care to eligible beneficiaries to successfully address the complexity of comorbid physical and behavioral health conditions. BHH must provide the following six core services, linked as appropriate by health information technology (HIT):

- Comprehensive Care Management, including but not limited to:
 - Assessment of each beneficiary, including behavioral and physical health care needs;
 - Assessment of beneficiary readiness to change;
 - Development of an individualized care plan;
 - Documentation of assessment and behavioral health home care plan in the Electronic Health Record (EHR); and
 - Periodic reassessment of each beneficiary's treatment, outcomes, goals, self-management, health status, and service utilization.
- Care Coordination, including but not limited to:
 - Organization of all aspects of a beneficiary's care;
 - Management of all integrated primary and specialty medical services, behavioral health services, physical health services, and social, educational, vocational, housing, and community services;

Medicaid Provider Manual

- Information sharing between providers, beneficiary, authorized representative(s), and family;
 - Resource management and advocacy;
 - Maintaining beneficiary contact, with an emphasis on in-person contact (although telephonic contact may be used for lower-risk beneficiaries who require less frequent face-to-face contact);
 - Appointment-making assistance, including coordinating transportation;
 - Development and implementation of individualized care plan;
 - Medication adherence and monitoring;
 - Referral tracking;
 - Use of facility liaisons;
 - Use of patient care team huddles;
 - Use of case conferences;
 - Tracking of test results;
 - Requiring discharge summaries;
 - Providing beneficiary and family activation and education;
 - Providing patient-centered training (e.g., diabetes education, nutrition education, etc.); and
 - Connection of beneficiary to resources (e.g., smoking cessation, substance use disorder treatment, nutritional counseling, obesity reduction and prevention, disease-specific education, etc.).
- Health Promotion, including but not limited to:
 - Providing beneficiary and family activation and education;
 - Providing patient-centered training (e.g., diabetes education, nutrition education, etc.);
 - Connection of beneficiary to resources (e.g., smoking cessation, substance use disorder (SUD) treatment, nutritional counseling, obesity reduction and prevention, disease-specific education, etc.);
 - Promoting healthy lifestyle interventions;
 - Encouraging routine preventative care such as immunizations and screenings;
 - Assessing the beneficiary's and family's understanding of the health condition and motivation to engage in self-management; and
 - Using evidence-based practices to engage and help the beneficiary participate in and manage their care.

Medicaid Provider Manual

- Comprehensive Transitional Care, including but not limited to:
 - Connecting the beneficiary to health services;
 - Coordinating and tracking the beneficiary's use of health services through HIT in conjunction with the PIHP Coordinator;
 - Providing and receiving notification of admissions and discharges;
 - Receiving and reviewing care records, continuity of care documents, and discharge summaries;
 - Post-discharge outreach to ensure appropriate follow-up services for all care in conjunction with the PIHP Coordinator;
 - Medication reconciliation;
 - Pharmacy coordination;
 - Proactive care (versus reactive care);
 - Specialized transitions when necessary (i.e., age, corrections); and
 - Home visits to ensure stability through transitions.
- Individual and Family Support Services (including authorized representatives), including but not limited to:
 - Reducing barriers to the beneficiary's care coordination;
 - Increasing beneficiary and family skills and engagement;
 - Use of community supports (i.e., Community Health Workers [CHW], peer supports, peer recovery coaches, support groups, self-care programs, etc.);
 - Facilitating improved adherence to treatment;
 - Advocating for individual and family needs;
 - Assessing and increasing individual and family health literacy;
 - Use of advance directives, including psychiatric advance directives;
 - Contributing assistance with maximizing beneficiary's level of functioning; and
 - Providing assistance with development of social networks.
- Referral to Community and Social Support Services, including but not limited to:
 - Providing beneficiaries with referrals to support services;
 - Collaborating/coordinating with community-based organizations and key community stakeholders;
 - Emphasizing resources closest to the beneficiary's home;
 - Emphasizing resources which present the fewest barriers;
 - Identifying community-based resources;
 - Providing resource materials pertinent to the beneficiary's needs;
 - Assisting in obtaining other resources, including benefit acquisition;
 - Providing referral to housing resources; and
 - Providing referral tracking and follow-up.

Medicaid Provider Manual

20.5 PROVIDER ELIGIBILITY REQUIREMENTS

Eligible BHH providers must meet all applicable state and federal licensing requirements, including specifications set forth in the BHH Handbook. Additionally, eligible providers will sign the Health Home Provider (HHP) Application (form MDHHS-5745) attesting to meet the requirements in the policy, the State Plan Amendment (SPA), and other applicable MDHHS policies and procedures. HHPs must contract with the PIHP.

20.5.A. GEOGRAPHIC AREA

BHH services are available to Medicaid beneficiaries who reside in select counties and who meet all other eligibility criteria. A listing/map of counties is posted on the MDHHS website. (Refer to the Directory Appendix for website information.)

20.5.B. PROVIDER TYPES

The PIHP will be responsible for providing health home services in partnership with community-based HHPs. PIHPs currently contract with the State of Michigan for Medicaid services. HHPs are permitted to recommend prospective BHH beneficiaries for enrollment into the BHH via the PIHP. BHH providers must provide documentation that indicates whether a prospective BHH beneficiary meets all eligibility for the benefit, including diagnostic verification, obtaining consent (MDHHS-5515), and establishment of a care plan. The PIHP must review and process all recommended enrollments in the WSA.

20.5.C. PROVIDER REQUIREMENTS

PIHPs must adhere to the BHH contractual and policy requirements with MDHHS. HHPs must meet the requirements indicated in the MDHHS-5745 with MDHHS and the PIHP requirements. PIHPs and HHPs must adhere to the requirements of the SPA, all Medicaid statutes, policies, procedures, rules, and regulations, and the BHH Handbook.

20.5.D. PROVIDER INFRASTRUCTURE REQUIREMENTS

HHPs, through the PIHP, will ensure beneficiary access to an interdisciplinary care team that addresses the beneficiary's behavioral and physical health needs. The requirements will span two settings – the PIHP and the HHP providers. Each setting will have its own unique set of requirements commensurate with the scope of their operations to reflect beneficiary needs. The staffing structure below is based on 100 beneficiaries enrolled in the health home.

Medicaid Provider Manual

Regional PIHP (per 100 beneficiaries)	<ul style="list-style-type: none"> Health Home Director (.25 FTE)
Health Home Partners (per 100 beneficiaries)	<ul style="list-style-type: none"> Behavioral Health Specialist (0.25 FTE) Nurse Care Manager (1.00 FTE) Peer Support Specialist, Peer Recovery Coach, Youth Peer Support Specialist, Community Health Worker, Medical Assistant (3.00-4.00 FTE) Medical Consultant (.10 FTE) Psychiatric Consultant (.10 FTE)

Contingent upon MDHHS exceptions, all providers referenced above must meet the following criteria:

Nurse Care Manager	<ul style="list-style-type: none"> Must be a licensed registered nurse in Michigan. Shall be a licensed registered nurse (RN) or licensed practical nurse (LPN). LPNs must meet the following requirements to fill this role: <ul style="list-style-type: none"> ➤ minimum of one year experience in a managed care setting preferred, and ➤ a minimum of three to five years medical nursing, surgical nursing and/or nursing in the acute care setting. A portion of the Nurse Care Manager FTE must include an RN to complete assessments, perform care planning, coordinate complex patients, and provide high-level education as needed.
Behavioral Health Specialist	<ul style="list-style-type: none"> Must have a minimum of a Bachelor's Degree from an accredited four year institution of higher learning, with specialization in psychology, mental health and human services, behavioral health, behavioral sciences, social work, human development, special education, counseling, rehabilitation, sociology, nursing, or closely related field; OR who has a Bachelor's Degree from an accredited four year educational institution in an unrelated field and at least one year of full-time equivalent relevant human services experience; OR an individual who has a Master's Degree in social work, education, psychology, counseling, nursing, or closely related field from an accredited graduate school.
Peer Support Specialist, Peer Recovery Coach, Youth Peer Support Specialist	<ul style="list-style-type: none"> Has received public mental health services in the past or is currently receiving services. Provide at least 10 hours per week of services described above with supported documentation written in the individualized care plan. Meet the MDHHS application approval process for specialized training and certification requirements.
Community Health Worker (CHW)	<ul style="list-style-type: none"> Must be at least 18 years of age. Must possess a high school diploma or equivalent. Must be supervised by licensed professional members of the care team. Must complete a CHW Certificate Program or equivalent.

Medicaid Provider Manual

Medical Assistant	<ul style="list-style-type: none">▪ Must be at least 18 years of age.▪ Must possess a high school diploma or equivalent.▪ Must possess appropriate education, certification, and/or training.
Health Home Director	<ul style="list-style-type: none">▪ Must be an administrative staff person employed by the PIHP.
Access to a Medical Consultant (can be off-site)	<ul style="list-style-type: none">▪ Must be a primary care physician, physician assistant, or certified nurse practitioner with appropriate credentials to practice in Michigan (i.e., full licensure and certification, as applicable).
Access to a Psychiatric Consultant (can be off-site)	<ul style="list-style-type: none">▪ Must be a licensed psychiatrist or doctoral-level psychologist in Michigan.

In addition to the above Provider Infrastructure Requirements, eligible BHH providers should coordinate care with the following professions:

- Dentist
- Dietician/Nutritionist
- Pharmacist
- Peer support specialist
- Diabetes educator
- School personnel
- Others as appropriate

20.6 PROVIDER ENROLLMENT AND BHH DESIGNATION

All HHPs must be properly paneled with the PIHP through contract, memorandum of understanding, or a similar mechanism conveying mutual partnership to execute BHH services. Moreover, all HHPs must sign and attest to the requirements set forth in the MDHHS-5745.

20.6.A. TRAINING AND TECHNICAL ASSISTANCE

MDHHS requires HHPs to actively participate in state- and PIHP-sponsored activities related to training and technical assistance and will also impose additional functional provider requirements to optimize care management, coordination, and behavioral health integration.

20.6.B. USE OF APPLICABLE HEALTH INFORMATION TECHNOLOGY (HIT)

MDHHS requires BHH providers to utilize appropriate HIT for enrollment, health service documentation, and care coordination purposes. Training on specific HIT resources is provided by MDHHS.

Medicaid Provider Manual

20.7 PROVIDER DISENROLLMENT

To maximize continuity of care and the patient-provider relationship, MDHHS expects HHPs to establish a lasting relationship with enrolled beneficiaries. However, HHPs wishing to discontinue BHH services must notify the regional PIHP and MDHHS at least six months in advance of ceasing BHH operations. BHH services may not be discontinued without MDHHS approval of a provider-created cessation plan and protocols for beneficiary transition.

20.8 BHH PAYMENT

MDHHS will provide a monthly case rate to the PIHP based on the number of BHH beneficiaries with at least one BHH service in a month. The PIHP will reimburse the HHP for delivering health home services. Additionally, MDHHS will employ a pay-for-performance (P4P) incentive that will reward providers based on outcomes. MDHHS will only claim federal match for P4P incentive payments after P4P qualifications have been met and providers have been paid.

20.8.A. BHH CASE RATES TO THE PIHP

MDHHS will maintain a fee schedule of the BHH case rate on the MDHHS BHH website, in the BHH Handbook, and in the BPHASA Service Encounter Coding Chart. MDHHS will review the case rates at least annually and make updates as appropriate.

20.8.B. PIHP PAYMENT TO HEALTH HOME PARTNERS

MDHHS will provide a monthly case rate to the PIHP based on the number of BHH beneficiaries with at least one BHH service during a calendar month. The PIHP will reimburse the HHP for delivering health home services. Depending on the current services provided by the HHP, the PIHP may negotiate a rate with the HHP for value-based payment while following the guidelines below, requirements in the approved SPA, policy, and the BHH Handbook.

20.8.C. PAY-FOR-PERFORMANCE

MDHHS will afford P4P via a 5% performance withhold. The PIHP must distribute P4P monies to HHPs that meet the quality improvement benchmarks in accordance with the approved SPA, policy, and BHH Handbook. MDHHS will only claim federal match once it determines quality improvement benchmarks have been met and providers have been paid. If quality improvement benchmarks are not met by any of the HHPs within a given performance year, the withhold will be reserved by MDHHS and reinvested for BHH monthly case rate payments. Subsequent performance years will operate in accordance with this structure. The methodology for metrics, specifications, and distribution will be maintained on the MDHHS BHH website and in the BHH Handbook.

Details and guidance regarding applicable service encounter and diagnosis codes can be found in the BHH Handbook.

Note: Payment for BHH services is in addition to existing FFS payments, encounters, or daily rate payments for direct clinical services. The MDHHS payment methodology is designed to only reimburse for the cost of the BHH provider staff for

Medicaid Provider Manual

the delivery of BHH services that are not covered by any other currently available Medicaid reimbursement mechanism.

20.8.D. RECOUPMENT OF PAYMENT

The monthly payment is contingent upon a BHH beneficiary receiving a BHH service during the month at issue. The payment is subject to recoupment if the beneficiary does not receive a BHH service during the calendar month. The recoupment lookback will occur six months after the monthly payment is made. Thus, six months after the month a payment is made (for example: in January, MDHHS would look back at the month of July's payment), CHAMPS will conduct an automatic recoupment process that will look for an approved encounter code that documents that the HHP provided at least one of the six core BHH services during the calendar month in question. If a core BHH service is not provided during a month, that month's payment will be subject to recoupment by MDHHS. Once a recoupment has occurred, there shall be no further opportunity to submit a valid BHH encounter code and/or claim for the month that has a payment recouped.

Additional details regarding payment recoupment, including the recoupment schedule and other reasons for recoupment, can be found in the BHH Handbook.

SECTION 21 – CERTIFIED COMMUNITY BEHAVIORAL HEALTH CLINIC DEMONSTRATION

21.1 GENERAL INFORMATION

The CMS CCBHC Demonstration requires states and their certified CCBHC sites to provide a robust set of coordinated, integrated, and comprehensive services to all persons with any mental illness or substance use disorder (SUD) diagnosis. Moreover, the demonstration requires and emphasizes 24/7/365 crisis response services (e.g., mobile crisis services). Other critical elements include, but are not limited to, strong accountability in terms of financial and quality metric reporting; formal coordination with primary and other care settings to provide intensive care management and transitions; linkage to social services, criminal justice/law enforcement, and educational systems; and an emphasis on providing services to veterans and active-duty service members.

To account for these requirements, the state must create a prospective payment system (PPS) reimbursement structure that finances CCBHC services at an enhanced payment rate to properly cover costs and offer greater financial predictability and viability. The PPS is integral to sustaining expanded services, investments in the technological and social determinants of care, and serving all eligible Michigan residents regardless of insurance or ability to pay.

MDHHS developed a companion operational guide for providers called the CCBHC Demonstration Handbook which is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

21.2 ELIGIBILITY

21.2.A. SITE ELIGIBILITY

Per CMS directive, states have the flexibility to determine which behavioral health providers can participate in the CCBHC Demonstration. Sites must meet all requirements as outlined in the CCBHC Demonstration Handbook and be certified by MDHHS to be designated as a CCBHC demonstration site.

21.2.B. CCBHC SERVICE RECIPIENT ELIGIBILITY

Any person with a mental health or SUD International Classification of Diseases (ICD)-10 diagnosis code is eligible for CCBHC services. CCBHCs must serve all individuals, regardless of county of residency, insurance coverage, age, severity of need, or ability to pay.

Exceptions to the diagnostic requirement are:

- **Persons in crisis:** People in crisis are eligible to receive CCBHC crisis services even if it is determined during the CCBHC crisis service that the person does not have a mental health or SUD diagnosis.
- **Persons being assessed/screened for mental health and/or SUD diagnoses:** People without a current mental health and/or SUD diagnosis are eligible to receive CCBHC screening and assessment services even if these services do not result in a diagnosis. If the screening/assessment does not result in a mental health and/or SUD diagnosis, the person is not eligible to receive subsequent CCBHC services unless they are:

Medicaid Provider Manual

1) in crisis as described above; or 2) later found to have a mental health and/or SUD diagnosis.

21.2.C. RESIDENCY

CCBHCs must serve all individuals regardless of residency. CCBHCs may define service catchment areas for targeted outreach that correspond directly to the required annual needs assessment. (Refer to the Program Requirements section of this chapter for additional information.) For individuals residing out of state, CCBHCs are responsible for providing, at a minimum, crisis response, evaluation, and stabilization services and should have protocols developed for coordinating care across state lines.

21.3 ENROLLMENT [CHANGE MADE 4/1/2025]

All eligible Medicaid beneficiaries will be automatically enrolled into the CCBHC benefit plan. Additional beneficiaries may be added as appropriate. (revised 4/1/2025) Non-Medicaid individuals are not automatically enrolled in the CCBHC benefit plan but should be tracked using encounter reporting and other methods outlined in the CCBHC Demonstration Handbook. MDHHS reserves the right to review and verify all enrollments.

21.4 CERTIFICATION REQUIREMENTS

CCBHC demonstration clinics must complete the MDHHS certification process to become a CCBHC under the CMS CCBHC Demonstration. During the certification process, CCBHC clinics will provide justification of meeting CCBHC criteria defined by Substance Abuse and Mental Health Services Administration (SAMHSA) and MDHHS by submitting supporting documentation verifying that standards have been met.

In accordance with the Protecting Access to Medicare Act of 2014 (PAMA), certification criteria address the following broad elements.

21.4.A. STAFFING REQUIREMENTS

Staffing requirements include criteria that staff have diverse disciplinary backgrounds, have necessary state required license and accreditation, and are culturally and linguistically trained to serve the needs of the clinic's patient population.

21.4.B. AVAILABILITY AND ACCESSIBILITY OF SERVICES

Availability and accessibility of services includes crisis management services that are available and accessible 24 hours per day, the use of a sliding scale for payment, and no rejection for services or limiting of services based on an individual's ability to pay or county of residence.

Medicaid Provider Manual

21.4.C. CARE COORDINATION

Care coordination includes requirements to coordinate care across settings and providers to ensure seamless transitions for individuals across the full spectrum of health services, including acute, chronic, and behavioral health needs. Care coordination requirements shall include, at minimum, partnerships or formal contracts with federally-qualified health centers (FQHCs) (and, as applicable, rural health clinics [RHCs]) to provide FQHC services (and, as applicable, RHC services) to the extent such services are not provided directly through the CCBHC; inpatient psychiatric facilities and substance use detoxification, post-detoxification step-down services, and residential programs, other community or regional services, supports, and providers, including schools, child welfare agencies, juvenile and criminal justice agencies and facilities, Indian Health Service youth regional treatment centers, state licensed and nationally accredited child placing agencies for therapeutic foster care service, and other social and human services; Department of Veterans Affairs medical centers, independent outpatient clinics, drop-in centers, and other facilities of the department as defined in section 1801 of Title 38, United States Code; and inpatient acute care hospitals and hospital outpatient clinics.

21.4.D. SCOPE OF SERVICES

The CCBHC scope of services includes provision (in a manner reflecting person-centered care) of the nine core CCBHC services outlined in the CCBHC Service Requirements subsection of this policy. Services may be provided directly by the CCBHC or through formal relationships with DCOs. Required evidence based practices and expectations around service delivery are outlined in the CCBHC Demonstration Handbook.

21.4.E. QUALITY AND OTHER REPORTING

CCBHCs must collect, report, and track encounter, outcome, and quality data, and other data as federally required or requested by MDHHS. Measures and specifications for reporting are listed in the CCBHC Demonstration Handbook.

21.4.F. ORGANIZATION AUTHORITY, GOVERNANCE, AND ACCREDITATION

The CCBHC must meet one of the following criteria:

- a non-profit organization, exempt from tax under Section 501(c)(3) of the United States Internal Revenue Code;
- a part of a local government behavioral health authority (which includes all forms of CMHSPs);
- an organization operated under the authority of the Indian Health Service, an Indian tribe, or tribal organization pursuant to a contract, grant, cooperative agreement, or compact with the Indian Health Service pursuant to the Indian Self-Determination Act (25 United States Code [USC] 450 et seq.); or

Medicaid Provider Manual

- an urban Indian organization pursuant to a grant or contract with the Indian Health Service under Title V of the Indian Health Care Improvement Act (25 USC 1601 et seq.).

A detailed description of all certification requirements and standards can be found in the CCBHC Demonstration Handbook.

21.5 SERVICE REQUIREMENTS

CCBHCs, directly or through DCOs, must provide a set of nine comprehensive services to address the complex and myriad needs of persons with mental health or SUD diagnoses services. These services include the following:

- Crisis mental health services, including 24-hour mobile crisis teams, emergency crisis intervention services, and crisis stabilization.
- Screening, assessment, and diagnosis, including risk assessment.
- Patient-centered treatment planning or similar processes, including risk assessment and crisis planning.
- Outpatient mental health and substance use services.
- Outpatient clinic primary care screening and monitoring of key health indicators and health risk.
- Targeted case management.
- Psychiatric rehabilitation services.
- Peer support and counselor services and family supports.
- Intensive, community-based mental health care for members of the armed forces and veterans, particularly those members and veterans located in rural areas.

Services should be provided in accordance with requirements detailed in this Manual unless otherwise specified in the CCBHC Demonstration Handbook. CCBHCs must comply with all Medicaid laws, regulations, and policies when providing services to CCBHC recipients and must adhere to the Michigan Mental Health Code for all CCBHC service recipients as applicable.

21.6 DESIGNATED COLLABORATING ORGANIZATION (DCO)

A DCO is an entity that is not under the direct supervision of the CCBHC but is engaged in a formal relationship with the CCBHC and delivers services under the same requirements as the CCBHC.

21.6.A. AGREEMENTS WITH CCBHCs [CHANGE MADE 4/1/2025]

A formal relationship is evidenced by a contract, Memorandum of Agreement (MOA), Memorandum of Understanding (MOU), or such other formal arrangements describing the parties' mutual expectations and establishing accountability for services to be provided and funding to be sought and utilized. CCBHC maintains responsibility for ensuring the DCO complies with CCBHC requirements, including compliance with contracted services delivered and financial components of the demonstration. (revised 4/1/2025)

Medicaid Provider Manual

21.6.B. PAYMENT FOR DCOs

Payment for DCO services is included within the scope of the CCBHC PPS, and DCO encounters will be treated as CCBHC encounters for purposes of the PPS. Payment will be provided directly to the DCO from the CCBHC based on agreed upon contractual service rates.

21.7 PAYMENT METHODOLOGY

MDHHS will utilize the prospective payment system 1 (CC PPS-1) methodology in which CCBHCs receive a daily clinic-specific rate based on the average expected daily cost to deliver CCBHC services. MDHHS will also employ a Quality Bonus Payment (QBP) that will reward CCBHCs based on attainment of outcomes.

CCBHCs must submit valid CCBHC Encounter Codes cited in Appendix A of the CCBHC Demonstration Handbook with a corresponding T1040 service encounter code to receive payment.

21.7.A. PPS-1 RATES

MDHHS will utilize pertinent cost and utilization data from the submitted annual Cost Report to develop clinic-specific PPS-1 rates. Rates may be updated each demonstration year based on Cost Report data, the appropriate Medicare Economic Index (MEI) adjustment, or as otherwise permitted under federal guidance. Rate updates will be documented in applicable rate certification materials.

21.7.B. QUALITY BONUS PAYMENTS

MDHHS will afford Quality Bonus Payments (QBPs) based on providers meeting CMS-defined quality benchmarks. The methodology, specifications, and distribution will be maintained in the CCBHC Demonstration Handbook.

21.8 REPORTING REQUIREMENTS [CHANGE MADE 4/1/2025]

CCBHCs are responsible for the reporting of encounter data, clinical outcomes data, quality data, and other data as federally required or requested by MDHHS. Data will be used to assess the impact of the demonstration on access to services, quality and scope of services, and costs of providing a comprehensive array of behavioral health services. (revised 4/1/2025)

21.8.A. COST REPORTING [CHANGE MADE 4/1/2025]

CCBHCs must submit an annual cost report with supporting data to MDHHS. Cost reports and supporting data are based on CCBHC financial records and must follow the templates provided by the state. When reporting costs, the CCBHC must adhere to the 45 Code of Federal Regulations (CFR) §75 Uniform Administrative Requirements, Cost Principles, and Audit Requirements for the U.S. Department of Health and Human Services (HHS) Awards and 42 CFR §413 Principles of Reasonable Cost Reimbursement. The CCBHC records must be detailed, orderly, complete, and available for review or audit. (revised 4/1/2025)

Medicaid Provider Manual

21.8.B. QUALITY METRIC REPORTING

CCBHCs are required to collect a core set of quality metrics as defined by CMS and MDHHS. Specifications for the required metrics are defined per federal guidance and detailed in the CCBHC Demonstration Handbook. CCBHCs must report data on individuals served by DCOs. It is the responsibility of the CCBHC to arrange for access to data required for reporting purposes.

SECTION 22 – MICHICANS

The Child and Adolescent Needs and Strengths (CANS) is a comprehensive information integration tool designed to summarize and organize information gathered from multiple sources and assessments. MDHHS utilizes a Michigan-specific version of the tool known as the MichiCANS. MDHHS requires Prepaid Inpatient Health Plans (PIHPs), Community Mental Health Services Programs (CMHSPs), and Certified Community Behavioral Health Clinics (CCBHCs) to use the MichiCANS to support potential eligibility for services, assist with initial determination of needs and strengths, and provide information for appropriate referrals for behavioral health services.

22.1 GENERAL DESCRIPTION

The MichiCANS Screener is the tool required at the point of access for all infants, toddlers, children, youth, and young adults ages birth through 20 years (day prior to 21). The results of the MichiCANS Screener will provide one of the following recommendations for level of need:

- Crisis Continuum of Care Services Need,
- Severe/Serious Level of Need, or
- Mild/Moderate Level of Need

Depending on the results of the MichiCANS Screener, the MichiCANS Comprehensive will be used at initial intake, annually thereafter, and at time of exit for infants, toddlers, young children, youth, and young adults ages birth through 20 years to guide treatment service planning. In addition, relevant sections of the MichiCANS Comprehensive will be updated when there is a significant change in life circumstances and/or a behavioral health event. The MichiCANS Comprehensive will be used to provide recommendations for eligibility for the Michigan Intensive Child and Adolescent Services (MICAS), which include Home-Based Services, Intensive Crisis Stabilization Services, Respite Services, Intensive Care Coordination with Wraparound, Youth Peer Support Services and Parent Support Partners.

PIHPs are required to use the Devereux Early Childhood Assessment at intake and during treatment planning, based on the results of the MichiCANS Screener, for infants, toddlers, and children ages one month up to age six who have (1) a Serious Emotional Disturbance (SED) or (2) SED and Intellectual/Developmental Disabilities (IDD). The results of the MichiCANS Comprehensive will also be used to identify areas of strengths and needs which will be used to assist with the planning process.

22.2 ELIGIBILITY FOR SPECIALTY BEHAVIORAL HEALTH SERVICES

The MichiCANS Screener is the tool required at the point of access for all infants, toddlers, children, youth, and young adults ages birth through 20 years (day prior to 21).

22.2.A. ELIGIBILITY CRITERIA AGES BIRTH THROUGH 5

The following MichiCANS Screener Decision Support Model criteria will be used to determine eligibility for Specialty Behavioral Health Services for children ages birth through 5 years (day prior to 6):

Medicaid Provider Manual

22.2.A.1. LEVEL 1 – MILD/MODERATE LEVEL OF NEED (REFERRAL TO APPROPRIATE SERVICES)

A youth will be classified as 'MILD/MODERATE LEVEL OF NEED' if they meet Criterion 1.1 OR Criterion 1.2 OR Criterion 1.3 OR Criterion 1.4 OR Criterion 1.5.

Treatment Needs/Eligibility	
Criterion 1.1	A rating of '1', '2' or '3' on any of the following items: <ul style="list-style-type: none">▪ Developmental/Intellectual▪ Autism Spectrum Disorder
Criterion 1.2	A rating of '1', '2' or '3' on any of the Challenges items: <ul style="list-style-type: none">▪ Impulsivity/Hyperactivity (36+ months)▪ Depression▪ Anxiety▪ Oppositional Behavior (36+ months)▪ Attachment Difficulties▪ Adjustment to Trauma▪ Regulatory▪ Atypical Behaviors▪ Sleep (12+ months)▪ Aggression
Criterion 1.3	A rating of '1', '2' or '3' on any of the Functioning items: <ul style="list-style-type: none">▪ Family Functioning▪ Social & Emotional Functioning▪ Early Care and Education▪ Medical/Physical▪ Motor (Fine/Gross)▪ Sensory Responsiveness▪ Restricted Interests
Criterion 1.4	A rating of '1', '2' or '3' on any of the Risk Factors & Behaviors items: <ul style="list-style-type: none">▪ Substance Exposure In Utero▪ Environmental Toxin Exposure▪ Prenatal Care▪ Labor and Delivery▪ Birth Weight▪ Failure to Thrive▪ Exploited▪ Self-Harm (12+ months)▪ Flight Risk/Bolting

Medicaid Provider Manual

Criterion 1.5	A rating of '1', '2' or '3' on any of the Caregiver items: <ul style="list-style-type: none">▪ Adjustment to Trauma Experiences▪ Caregiver Capacity▪ Supervision▪ Knowledge
----------------------	--

22.2.A.2. LEVEL 2 – SEVERE/SERIOUS LEVEL OF NEED (IF INITIAL, MOVE TO INITIAL ASSESSMENT)

Note: If a youth is identified as having a Severe/Serious Level of Need, the youth should be referred for an intake appointment through the PIHP.

A youth will be classified as 'SEVERE/SERIOUS LEVEL OF NEED' if they meet Criterion 2.1 OR Criterion 2.2) and (Criterion 2.3 OR Criterion 2.4 OR Criterion 2.5).

Treatment Needs/Eligibility	
Criterion 2.1	A rating of '2' or '3' on any of the following items: <ul style="list-style-type: none">▪ Developmental/Intellectual▪ Autism Spectrum Disorder
Criterion 2.2	A rating of '2' or '3' on any of the Challenges items: <ul style="list-style-type: none">▪ Impulsivity/Hyperactivity (36+ months)▪ Depression▪ Anxiety▪ Oppositional Behavior (36+ months)▪ Attachment Difficulties▪ Adjustment to Trauma▪ Regulatory▪ Atypical Behaviors▪ Aggression

Complexity	
Criterion 2.3	A rating of '2' or '3' on any of the following items: <ul style="list-style-type: none">▪ Family Functioning▪ Social & Emotional Functioning▪ Early Care and Education▪ Sleep (12+ months)

Medicaid Provider Manual

Criterion 2.4	A rating of '2' or '3' on any of the following items: <ul style="list-style-type: none">▪ Failure to Thrive▪ Self-Harm (12+ months)▪ Exploited▪ Flight Risk/Bolting▪ Cultural Stress (Caregiver Need)
Criterion 2.5	A rating of '2' or '3' on any of the Caregiver items: <ul style="list-style-type: none">▪ Adjustment to Trauma▪ Mental Health▪ Caregiver Capacity▪ Supervision▪ Involvement with Care▪ Knowledge▪ Safety

22.2.A.3. LEVEL 3 – CRISIS (MOVE TO CRISIS CONTINUUM OF CARE SERVICES)

A youth will be classified as 'CRISIS' if they meet Criterion 3.1.

Treatment Need/Eligibility	
Criterion 3.1	A rating of '3' on any of the following items: <ul style="list-style-type: none">▪ Impulsivity/Hyperactivity (36+ months)▪ Regulatory▪ Atypical Behaviors▪ Self-Harm (12+ months)▪ Flight Risk/Bolting▪ Exploited▪ Safety (Caregiver Need)

22.2.B. ELIGIBILITY CRITERIA AGES 6 THROUGH 20

The following MichiCANS Screener Decision Support Model criteria will be used to determine eligibility for Specialty Behavioral Health Services for children ages 6 through 20 years (day prior to 21):

Medicaid Provider Manual

22.2.B.1. LEVEL 1 – MILD/MODERATE LEVEL OF NEED – REFERRAL TO APPROPRIATE SERVICES

All children/youth are recommended for this level unless they are eligible for a higher level.

22.2.B.2. LEVEL 2 – SEVERE/SERIOUS LEVEL OF NEED (IF INITIAL, MOVE TO INITIAL ASSESSMENT)

Note: If a youth is identified as having a Severe/Serious Level of Need, the youth should be referred for an intake appointment through the PIHP.

A youth will be classified as 'SEVERE/SERIOUS LEVEL OF NEED' if they meet (Criterion 2.1 OR Criterion 2.2) and (Criterion 2.3 OR Criterion 2.4).

Treatment Need/Eligibility	
Criterion 2.1	A rating of '2' or '3' on any of the Behavioral/Emotional Needs items: <ul style="list-style-type: none">▪ Psychosis▪ Impulsivity/Hyperactivity▪ Depression▪ Anxiety▪ Oppositional Behavior▪ Conduct▪ Anger Control▪ Eating Disturbance▪ Adjustment to Trauma▪ Substance Use
Criterion 2.2	A rating of '2' or '3' on any of the following items: <ul style="list-style-type: none">▪ Developmental/Intellectual▪ Autism Spectrum Disorder

Complexity	
Criterion 2.3	A rating of '2' or '3' on any of the following Life Functioning items or Caregiver Needs items: <ul style="list-style-type: none">▪ Family Functioning▪ Living Situation▪ Social Functioning▪ Legal (age 11+)▪ Medical/Physical

Medicaid Provider Manual

	<ul style="list-style-type: none">▪ School▪ Job Functioning (16+)▪ Sleep▪ Decision Making▪ Caregiver Supervision
Criterion 2.4	<p>A rating of '2' or '3' on any of the following Risk Behavior items:</p> <ul style="list-style-type: none">▪ Suicide Risk▪ Non-Suicidal Self-Injurious Behavior▪ Other Self-Harm▪ Danger to Others▪ Problematic Sexual Behavior▪ Runaway▪ Victimization/Exploitation

22.2.B.3. LEVEL 3 – CRISIS (MOVE TO CRISIS CONTINUUM OF CARE SERVICES)

A youth will be classified as 'CRISIS' if they meet Criterion 3.1 or Criterion 3.2.

Treatment Need/Eligibility	
Criterion 3.1	<p>A rating of '3' on any of the following items:</p> <ul style="list-style-type: none">▪ Suicide Risk▪ Non-Suicidal Self-Injurious Behavior▪ Other Self-Harm▪ Danger to Others▪ Victimization/Exploitation▪ Psychosis
Criterion 3.2	<p>A rating of '3' on the Runaway item and at least one rating of '2' or '3' on any of the following items:</p> <ul style="list-style-type: none">▪ Suicide Risk▪ Non-Suicidal Self-Injurious Behavior▪ Other Self-Harm▪ Danger to Others▪ Victimization/Exploitation▪ Psychosis

22.3 HOME-BASED SERVICES

22.3.A. ELIGIBILITY CRITERIA

The criteria for home-based services are described below for children birth through age 5 and children aged 6 through age 20. These criteria do not preclude the provision of home-based services to an adult beneficiary prenatally or who is a parent for whom it is determined home-based services would be the treatment modality that would best meet the needs of the adult beneficiary and the child. This would include a parent who has a diagnosis within the current version of the Diagnostic and Statistical Manual of Mental Disorders (DSM) or International Classification of Diseases (ICD) that results in a care-giving environment that places the child at-risk for serious emotional disturbance. These criteria do not preclude the provision of home-based services when it is determined through a family-driven and youth-guided planning process that these services are necessary to meet the needs of the child and family. For continuing eligibility reviews during the transition to less intensive services, the child and family may be maintained in home-based services, even if they do not meet these criteria. Variation from the required criteria for families transitioning out of home-based services must be documented in the plan of service. This transition period is not to exceed three months.

22.3.A.1. AGES PRENATAL/BIRTH THROUGH 5

The following MichiCANS Comprehensive Decision Support Model criteria will be used to determine eligibility for Home-Based Services for children ages birth through 5 years (day prior to 6).

A child will be recommended for 'Home-Based Services (Ages birth through 5)' if they meet Criterion A OR (Criterion A and Criterion B) AND Criterion C AND Criterion D.

Treatment Need/Eligibility	
Criterion A	<p>A rating of '2' or '3' on any of the Challenges items:</p> <ul style="list-style-type: none">▪ Impulsivity/Hyperactivity▪ Depression▪ Anxiety▪ Oppositional Behavior (36+ months)▪ Attachment Difficulties▪ Aggression▪ Regulatory▪ Atypical Behaviors▪ Sleep (12+ months)▪ Adjustment to Trauma

Medicaid Provider Manual

22.4 RESPITE CARE

22.4 A. ELIGIBILITY CRITERIA

MichiCANS will be used to support eligibility determinations for respite for children and youth enrolled in the 1915(i), Children's Waiver Program, Waiver Program for Children with Serious Emotional Disturbances, and Habilitation Supports Waiver.

22.4.A.1. AGES BIRTH THROUGH 5

The following MichiCANS Comprehensive Decision Support Model criteria will be used to determine eligibility for Respite Care for beneficiaries ages birth through 5 years (day prior to 6).

A child will be recommended for 'Respite Care (Ages birth through 5)' if they meet (Criterion A OR Criterion B) AND (Criterion C OR Criterion D OR Criterion E).

Treatment Need/Eligibility	
Criterion A	A rating of '2' or '3' on any of the following items: <ul style="list-style-type: none">▪ Developmental/Intellectual▪ Autism Spectrum
Criterion B	A rating of '2' or '3' on any of the following Challenges items: <ul style="list-style-type: none">▪ Impulsivity/Hyperactivity (36+ months)▪ Depression▪ Anxiety▪ Oppositional Behavior (36+ months)▪ Attachment Difficulties▪ Aggression▪ Regulatory▪ Atypical Behaviors▪ Sleep (12+ months)▪ Adjustment to Trauma

22.5 INTENSIVE CARE COORDINATION WITH WRAPAROUND (ICCW)

22.5.A. ELIGIBILITY CRITERIA

The following criteria will help support eligibility for ICCW.

Children, youth, or young adults ages birth through 20 years (day prior to 21) are eligible for ICCW if they meet the following criteria:

- Serious Emotional Disturbance, Serious Mental Illness, and/or Intellectual/Developmental Disability
- Presenting with complex behavioral needs; and
- Have an identified community

Medicaid Provider Manual

AND two or more of the following criteria:

- Currently in or at risk of out-of-home placement.
- Involved in two or more child, youth, or young adult-serving systems, including but not limited to: Mental/Behavioral Health, Juvenile or Adult Criminal Justice, Child Welfare, Adult Protective Services, Education (special education or other school support services).
- Has received other case management or case management-like services, and higher intensity is required to meet needs.
- Lack of an identified support system.
- Presenting with complex medical needs and stabilization has not been reached.
- Has a functional impairment related to school activities, attendance, or performance. This includes, but is not limited to, experiencing multiple suspensions and/or expulsions.
- Displays significant physical and/or emotional distress after experiencing a traumatic event. Traumatic events may include, but are not limited to, natural disasters, acts of violence, abuse, neglect.

22.5.A.1. AGES BIRTH THROUGH 5

The following MichiCANS Comprehensive Decision Support Model criteria will be used to determine eligibility for ICCW for beneficiaries ages birth through 5 years (day prior to 6).

A child will be recommended for 'ICCW (Ages birth through 5)' if they meet (Criterion A OR Criterion B) AND (Criterion C OR Criterion D) and Criterion E.

Treatment Need/Eligibility	
Criterion A	A rating of '2' or '3' on any of the following items: <ul style="list-style-type: none">▪ Developmental/Intellectual▪ Autism Spectrum
Criterion B	A rating of '2' or '3' on any of the following Challenges items: <ul style="list-style-type: none">▪ Impulsivity/Hyperactivity (36+ months)▪ Depression▪ Anxiety▪ Oppositional Behavior (36+ months)▪ Attachment Difficulties▪ Aggression▪ Regulatory▪ Atypical Behaviors▪ Sleep (12+ months)▪ Adjustment to Trauma

Medicaid Provider Manual

*For the 'Family Item Group', choose the highest rating of the grouped items and count that rating once for the item criteria towards meeting Criterion C.

22.6 INTENSIVE CRISIS STABILIZATION SERVICES FOR CHILDREN

22.6.A. ELIGIBILITY CRITERIA

These services are for children or youth ages birth through 20 years (day prior to 21) with SED and/or I/DD, including autism or co-occurring SED and SUD, and their parents/caregivers who are currently residing in the catchment area of the approved program, and are in need of Intensive Crisis Stabilization Services (ICSS) in the home or community as defined in this section.

The child and family define the crisis, and eligibility for receiving children's ICSS will be based on the child and family requesting this service. The MichiCANS DSM may identify beneficiaries who may benefit from crisis services and, if this is a recommendation from the MichiCANS, the treatment team should incorporate this into the family-driven youth-guided planning process.

22.6.A.1. AGES BIRTH THROUGH 5

The following MichiCANS Comprehensive Decision Support Model criteria will be used to determine eligibility for ICSS for beneficiaries ages birth through 5 years (day prior to 6).

A child will be recommended for 'ICSS (ages birth through 5)' if they meet (Criterion A OR Criterion B) AND Criterion C AND Criterion D.

Treatment Need/Eligibility	
Criterion A	A rating of '2' or '3' on any of the following items: <ul style="list-style-type: none">▪ Developmental/Intellectual▪ Autism Spectrum
Criterion B	A rating of '2' or '3' on any of the Challenges items: <ul style="list-style-type: none">▪ Impulsivity/Hyperactivity (36+ months)▪ Depression▪ Anxiety

22.7 YOUTH PEER SUPPORT SERVICES

22.7.A. ELIGIBILITY CRITERIA

Youth Peer Support Services is a peer-delivered service for youth and young adults who are 11 to 26 years of age. It is designed to support youth and young adults with a serious emotional disturbance/serious mental illness (SED/SMI) through shared activities and interventions in the form of nonjudgmental support, connection through lived experience and supporting self-advocacy.

22.7.A.1. AGES 11 THROUGH 20

The following MichiCANS Comprehensive Decision Support Model criteria will be used to determine eligibility for Youth Peer Support for beneficiaries 11 through 20 years.

A youth will be recommended Youth Peer Support for beneficiaries 11 through 20 years if they meet Criterion A AND Criterion B.

Medicaid Provider Manual

Treatment Need/Eligibility	
Criterion A	<ul style="list-style-type: none">Youth is at least 11 years old.

22.8 PARENT SUPPORT PARTNERS

22.8.A. ELIGIBILITY CRITERIA

Parent-to-Parent Support is designed to support parents/family of children with serious emotional disturbance or intellectual and developmental disabilities as part of the treatment process to be empowered, confident, and have skills that will enable them to assist their child to improve in functioning.

22.8.A.1. AGES BIRTH THROUGH 5

The following MichiCANS Comprehensive Decision Support Model criteria will be used to determine eligibility for Parent Support Partners for beneficiaries ages birth through 5 years (day prior to 6).

A child will be recommended Parent Support Partner for beneficiaries (birth through 5 years of age) if they meet Criterion A OR Criterion B OR Criterion C.

Treatment Need/Eligibility	
Criterion A	<p>A rating of '2' or '3' on any of the following Life Functioning or Challenges items:</p> <ul style="list-style-type: none">Developmental/IntellectualAutism SpectrumImpulsivity/Hyperactivity (36+ months)DepressionAnxietyOppositional Behavior (36+ months)Attachment DifficultiesRegulatoryAtypical BehaviorsAdjustment to Trauma

CHILDREN'S WAIVER COMMUNITY LIVING SUPPORT SERVICES APPENDIX

SECTION 1 - CHILDREN WITH CHALLENGING BEHAVIORS

1.1 PURPOSE

This Section is to help the CMHSP determine whether the challenging behavioral needs of the child support hourly care and other support services, and to determine the appropriate range of hourly care that can be authorized under the Community Living Support (CLS) waiver service. The following categories do not, in and of themselves, establish eligibility for publicly funded hourly care.

The amount of CLS services (i.e., the number of hours) that can be authorized for a child is based on several factors, including the child's care needs which establish waiver eligibility, child's and family's circumstances, and other resources for daily care (e.g., private health insurance, trusts bequests, private pay). In addition to identifying the family situation and the specific behaviors as described in the category definitions, the following elements contribute to the overall assessment of need:

- Type of behaviors identified;
- Frequency, intensity, and duration of identified behaviors;
- How recently serious behaviors occurred;
- Actual specific effects of the behavior on persons in family and property;
- Level of family intervention required to prevent behavioral episodes;
- Extent to which family must alter normal routine to address behavioral needs of the child;
- Prognosis for change in the child's behavior;
- Whether or not child functions more effectively in any current setting than in other settings; and
- Age, size, and mobility of child.

1.2 CATEGORIES OF CARE

1.2.A. CATEGORY IV

Qualifications	Demonstrates mild level behaviors that may interfere with the daily routine of the family.
Definitions	Mild Behavior: Infrequent or intermittent behaviors including pinching, hitting, slapping, kicking, head banging, and/or elopement without careful supervision when there is evidence of lack of judgment regarding danger, or an extremely high activity level requiring extensive supervision and redirection.

Medicaid Provider Manual

1.2.B. CATEGORY III

Qualifications	Demonstrates a daily pattern of medium level behaviors including self-injurious, physically aggressive or assaultive behaviors that have not resulted in hospitalization or emergency room treatment for injuries in the past year, or has engaged in occasional, significant property destruction that is not life-threatening.
Definitions	<p>Pattern of Behavior: In addition to a single serious episode in the last year, significant daily behaviors are documented.</p> <p>Medium Behavior: Includes behaviors defined in the Category II definition of "moderate behavior" when emergency room treatment or hospitalization have not been required for treatment of injuries resulting from the behavior. Examples include head banging resulting in bleeding and bruising without concussion or detached retina, hair pulling without removing hair from the scalp, smearing feces without PICA, and biting without drawing blood.</p> <p>Occasional Property Destruction: Property destruction that occurs with a frequency not greater than one time per week.</p>

1.2.C. CATEGORY II

Qualifications	Demonstrates a daily pattern of moderate self-injurious, physically aggressive or assaultive behavior when medical intervention or emergency room treatment has been required for treatment of injuries in the past year without resulting hospitalization, or if the child has engaged in frequent, significant property destruction that is not life-threatening.
Definitions	<p>Moderate Behavior: Includes behaviors that pose a significant risk of injury to self or others in the immediate environment. Examples include physical assault or self-abuse resulting in injuries requiring hospital emergency room treatment without hospital admission in the past year, biting that breaks the skin, hair pulling resulting in removal of clumps of hair from the scalp, multiple daily episodes of smearing feces with associated PICA, and head banging resulting in documented concussion or detached retina.</p>

1.2.D. CATEGORY I

Qualifications	Demonstrates a pattern of severe self-injurious, physically aggressive or assaultive behavior, or life-threatening property destruction that has occurred one or more times in the past year. Documented evidence of additional behavioral problems on a frequent basis each day supports a need for one-to-one intensive behavioral treatment.
Definitions	<p>Severe Behavior: Poses a very significant risk of serious injury or death to self, a family member, or others in the immediate environment. Examples include fire setting, physical assault or self-abuse resulting in injuries to self or others requiring inpatient hospital admission for treatment in the past year.</p>

SECTION 2 – MEDICALLY AND PHYSICALLY COMPLEX CHILDREN

2.1 PURPOSE

The purpose of this Section is to help the CMHSP determine whether CLS services are medically necessary. The following categories do not, in and of themselves, establish eligibility for publicly funded hourly care.

2.1.A. CATEGORY IV

Qualifications	A medical condition and requires significant levels of daily assistance or guidance with activities of daily living (ADLs). In addition, medical condition is stable and observations and interventions are required infrequently. Interventions require minimal training and are associated with minimal or no risk to health status.
Examples	<p>Includes levels of support that would exceed those expected for a person of the child's age in the areas of:</p> <ul style="list-style-type: none">▪ Assistance and/or guidance in ADLs including eating, toileting, bathing, grooming, dressing, and mobility (ambulation and transferring);▪ Assistance and/or guidance with physical transfer (e.g. bed to chair);▪ Assistance and/or guidance with therapeutic positioning and physical therapy; or▪ The child weighs 80 pounds or more and is not ambulatory and/or not mobile and unable to assist the primary caregiver.

2.1.B. CATEGORY III

Qualifications	A medical condition that routinely requires daily hourly care or support in order to maintain and/or improve health status. Clinical observations and interventions may be intermittent. Medical interventions are typically associated with minimal risk to health status, and delayed interventions are not associated with imminent risk to health status.
Examples	<p>Includes a combination of interventions such as:</p> <ul style="list-style-type: none">▪ G-tube feedings with no oral suctioning needs;▪ PRN oxygen administration less often than daily over the past 30 days with or without pulse oximeter;▪ Daily oxygen administration at less than two liters without pulse oximeter and without the need for on-going judgments and observations for oxygen needs (e.g. routine nightly administration without other skilled nursing interventions);▪ Catheterization fewer than five times per day;▪ Routine chest physiotherapy four or more times per day;▪ Ostomy care;▪ Total feeding or formal feeding program requiring more than 45 minutes per meal with need for special trunk-head positioning;

	<ul style="list-style-type: none">▪ Concurrent diagnosis of severe hypertonicity, severe contractures, or severe scoliosis that requires therapeutic positioning every two hours; or▪ Documented evidence that positioning causes apnea and cyanosis, and that positioning is limited to positions with the body in less than a 45 degree angle to horizontal plane.
--	---

2.1.C. CATEGORY II AND CATEGORY I

Services for Category II and Category I children are covered under the Medicaid State Plan private duty nursing (PDN) benefit. Refer to the Private Duty Nursing Chapter of this manual for PDN coverage criteria.

SECTION 3 – COVERAGE DECISIONS

3.1 DECISION RESPONSIBILITY

The MDHHS Children's Waiver Review Team will continue to review all plans of service and current assessments, and prior authorize waiver services, for those children who:

- Qualify for Category of Care I; or
- Have been approved to receive additional CLS hours under the exception process.

The responsible CMHSP, following the Children's Waiver Decision Guide in the following subsection, will review and prior authorize waiver services for those Children's Waiver beneficiaries who are determined to qualify for Categories II, III, or IV.

3.2 DECISION GUIDE

The determination of the amount of hourly care should result from a person-centered planning/family-centered practice process that considers both the child's and family's needs. The Children's Waiver Decision Guide Table below assists in identifying the range of hours provided for children based on their category of care and the family's resources to provide that care. It is expected that hourly care services will be provided within the range for which the child qualifies. Within the four Categories of Care are five sections that apply to the child's family status. In determining the total number of hours, it is acceptable to use the highest range within the appropriate section of the eligible category. If the child is receiving Home Help services, those hours must be considered as part of the total hours allowable. For example, a child determined to have Category III level of care needs is eligible for a maximum of six hours a day while in school. If that child receives two hours per day of Home Help, CWP could then provide a maximum of four hours of CLS staffing per day. The range of hours identified in the guide is an average daily amount that is provided seven days a week, based on a monthly total authorization.

If the child is attending school an average of 25 hours per week, the Section VI maximum would apply unless the maximum exceeds the range qualified for in Sections I-V. In that case, the maximum range in Sections I-V would apply. The Section VI maximum would not be required during school breaks, such as Christmas, Easter, and summer vacations, or if the child is out of school due to illness for 5 or more consecutive days.

Medicaid Provider Manual

Section VI – School				
1. Child attends school an average of 25 hours per week	6 max	6 max	8 max	12 max

3.3 DECISION GUIDE TABLE DEFINITIONS

The definitions used in each section of the Decision Guide Table are as follows:

SECTION	DEFINITIONS
I – Number of Caregivers	<p>Caregiver is defined as a legally responsible adult(s) living in the home or adult(s) who is not legally responsible but chooses to participate in providing care for the child.</p> <p>Full-Time (F/T) is defined as a person who works 30 or more hours per week for wages, or a person who attends school 30 or more hours per week.</p>
II – Health Status of Caregivers	<p>Significant health concerns of a caregiver is defined as one or more of the primary caregivers have a significant health or emotional condition which prevents that caregiver from providing care for the child. Example: A parent that recently had back surgery with full body cast or similar condition.</p> <p>Some health concerns of a caregiver is defined as one or more primary caregivers (as defined above) have a health or emotional condition that interferes with, but does not prevent, provision of care. Examples: Alcoholism, depression, lupus, back pain when lifting, lifting restrictions and similar health concerns; or primary caregiver is in therapy three or more times per month.</p>

Medicaid Provider Manual

SECTION	DEFINITIONS
III - Additional Dependent Children	This section applies when the child has one or more siblings or related individuals under age 18 who reside in the home full-time and the caregiver is not paid for providing care.
IV - Additional Children With Special Needs	<p>Additional special needs are identified when the child has one or more siblings or related individuals who reside in the home and do not currently receive hourly care supports.</p> <p>Siblings with nursing needs are children who meet the criteria for Intensity of Care-High or Intensity of Care-Medium (refer to the Behavioral Health 1915(i) Home and Community-Based Services State Plan Amendment section of this chapter), whether or not those children are developmentally disabled.</p> <p>Siblings without skilled nursing needs are children with needs as identified in Category of Care I-IV definitions.</p>
V – Night Interventions	<p>If the child requires one or two interventions at night and the time required to complete the interventions is one hour or less, Section V-1 applies.</p> <p>If the child requires an average of three or more interventions per night, or the time required to complete the interventions is more than one hour, Section V-2 applies.</p>
VI – School	<p>Average hours of school should be used to determine the appropriate range of hours. Include transportation time if provided by the school.</p> <p>The number of hours of school attendance is based on the school year that applies to the child’s educational classification. Variations in hours may be seen for children without a summer program.</p> <p>This factor limits the maximum number of hours that can be authorized for a child of any age in a center-based school program for more than 25 hours per week, or a child who has reached the age of 6 and for whom there is no medical justification for a home-bound school program.</p> <p>The school maximum is also waived for that time period when a child is out of school for at least 5 consecutive days due to illness, surgery, or scheduled school breaks.</p>

3.4 EXCEPTION PROCESS

The exception process ensures the safety and quality of care of children served by the waiver through consideration of the unique needs of each child and family, and special circumstances that may arise. When occasional relief through respite services is not sufficient, an exception of hourly care may be authorized.

Contingent upon the availability of funds and upon receipt of a Prior Review and Approval Request (PRAR), limited authority to exceed the published hourly care amount defined in the Decision Guide subsection may be granted by MDHHS to a CMHSP to better serve identified children with exceptional care needs. The PRAR must be developed pursuant to family request, person-centered planning/family-centered practice team recommendation, and CMHSP administrative concurrence.

The PRAR must document and substantiate both a current clinical (either medical or psychological) necessity for the exception and a current lack of natural supports requisite for the provision of the needed level of care. The hourly care services must be essential to the successful implementation of a plan of active treatment as defined by CMS ICF/IID rules, and any enhancements must be essential to

maintain the child within their home. Consideration for an exception will be limited to situations outside the family's control that place the child in jeopardy of serious injury or significant deterioration of health status such as:

- A temporary deterioration of the child's clinical condition (e.g. need for nursing care following an acute hospitalization or surgical procedure, or an acute cyclic exacerbation of challenging behaviors);
- A temporary inability of the primary caregivers to provide the requisite level of care (e.g., an acute illness or injury);
- Health condition requires continuous implementation of high risk medically prescribed procedures requiring licensed nursing personnel that are not already addressed within the Decision Guide subsection. The procedures must be beyond the demonstrated capacity of the parents to provide;
- Behavior treatment needs significantly exceed the recommended ranges for the assigned category of care **and** this exception is essential to prevent an otherwise inevitable (i.e., previously documented) deterioration in behavior. The enhanced staffing must be continuously active in the implementation of the behavior treatment plan;
- Natural supports are unable to provide the requisite level of care (e.g., only available care providers have a physical, mental, or emotional disability or they cannot demonstrate competence with the procedures essential to the implementation of the treatment plan). The plan of service must also address plans to rectify the condition or circumstance.

Exceptions may be granted for a specified period not to exceed 180 days. Renewal requests must substantiate the continuing clinical necessity and lack of natural supports.

Exceptions approved by MDHHS can occur in one of the following ways:

- Temporary emergency basis only. Verbal approval can be given to the CMHSP, with written justification to be forwarded to MDHHS within 10 days; or
- In a non-emergency situation, the CMHSP provides MDHHS with written documentation of the specific rationale to support the exception (i.e., physician's prescription). This would include a revised Plan of Care, highlighting the care needs to be provided with the additional staffing hours, and all current assessments. A response from MDHHS will occur within 10 working days.

When approval of an exception is not granted through either of the two processes listed above, the family, case manager, or MDHHS may request a meeting in order to clarify and reconsider the basis for the exception.

MDHHS has the option to request a home visit to meet the child when it is necessary for an effective decision.

3.5 APPEAL PROCESS

The child and family have the right, under the Michigan Mental Health Code, to appeal a negative coverage decision to the director of the CMHSP. The child and family may also request a recipient's rights investigation through their CMHSP.

Medicaid Provider Manual

The CMS approval of the Children's Waiver requires the availability of a fair hearing for any Medicaid-eligible child enrolled in the Children's Waiver Program when that child is subject to a negative action. A negative action results when a Medicaid-covered service or benefit is taken away, reduced, or denied to a Medicaid beneficiary. The Medicaid beneficiary must be notified of the negative action in writing. The negative action notice must indicate:

- The beneficiary's right to appeal through the MDHHS administrative hearing process;
- The beneficiary has 90 days to submit an appeal; and
- Where to send the appeal.

The MDHHS appeal process may occur simultaneously with a recipient's rights or CMHSP administrative appeal process. Individuals and their families are encouraged to resolve disputes regarding waiver services at the local CMHSP level.

The CMHSP is financially responsible for any services that may be approved as a result of the judgment from the administration appeal process.

CHILDREN WITH SERIOUS EMOTIONAL DISTURBANCES HOME AND COMMUNITY-BASED SERVICES WAIVER APPENDIX

SECTION 1 – GENERAL INFORMATION

The Children With Serious Emotional Disturbances Home and Community-Based Services Waiver (SEDW) provides services that are enhancements or additions to Medicaid State Plan coverage for beneficiaries up to age 21 with serious emotional disturbance (SED) who are enrolled in the SEDW. MDHHS operates the SEDW through contracts with the PIHPs. The SEDW is a managed care program administered by the PIHPs in partnership with CMHSPs and other community agencies.

1.1 KEY PROVISIONS

The SEDW enables Medicaid to fund necessary home and community-based services for beneficiaries up to age 21 with SED who meet the criteria for admission to a state inpatient psychiatric hospital and/or who are at risk of hospitalization without waiver services. The PIHP is responsible for assessment of potential waiver candidates.

Application for the SEDW is made through the PIHP. The PIHP is responsible for the coordination of the SEDW services. The Wraparound Facilitator, the beneficiary and their family and friends, and other professional members of the planning team work cooperatively to identify the beneficiary's needs and to secure the necessary services. All services and supports must be included in an IPOS.

A SEDW beneficiary must receive at least one SED waiver service, in addition to Wraparound, per month in order to retain eligibility.

1.2 ELIGIBILITY

To be eligible for this waiver, the beneficiary must meet all the following criteria.

- Reside with the birth or adoptive family or have a plan to return to the birth or adoptive home; OR
- Reside with a legal guardian; OR
- Reside in a foster home with a permanency plan; OR
- Be age 18, 19 or 20 and live independently with supports; AND
- Meet current MDHHS criteria for the State psychiatric hospital for children or is at risk of hospitalization without waiver services; AND
- Meet Medicaid eligibility criteria and become a Medicaid beneficiary; AND
- Demonstrate serious functional limitations that impair their ability to function in the community. As appropriate for age, functional limitation will be identified using the Child and Adolescent Functional Assessment Scale (CAFAS®), the Preschool and Early Childhood Functional Assessment Scale (PECFAS®), or the Devereux Early Childhood Assessment (DECA) Clinical Version scales:

Medicaid Provider Manual

- CAFAS® score of 90 or greater for beneficiaries ages 7 to 12; OR
- CAFAS® score of 120 or greater for beneficiaries ages 13 to 18; OR
- For beneficiaries ages 3 to 7, elevated PECFAS® subscale scores in at least one of these areas: self-harmful behaviors, mood/emotions, thinking/communicating or behavior towards others; OR
- For beneficiaries ages 2 to 4, scores in the concern range across DECA Clinical Version scales:
 - Protective factor scales (initiative, self-control, and attachment) that are in the Concern Range with a Total Protective Factor T-score of 40 or below; and/or
 - Elevated scores on one or more of the behavioral concerns 32 scales (attention problems, aggression, withdrawal/depression, emotional control problems) with a T-score of 60 or above; AND
- Be under the age of 18 when approved for the waiver. If a beneficiary on the SEDW turns 18, continues to meet all non-age-related eligibility criteria, and continues to need waiver services, they can remain on the waiver up to their 21st birthday.

1.3 COVERAGE AREA

Waiver services are limited to eligible beneficiaries (up to the federally-approved maximums) living in the state of Michigan. PIHPs assure CMHSPs:

- Demonstrated strong collaboration with essential community partners; and
- Have the capacity to provide intensive community-based services at a level sufficient to meet the needs of waiver recipients.

SECTION 2 – COVERED WAIVER SERVICES [CHANGE MADE 4/1/2025]

Each beneficiary must have a comprehensive Wraparound Plan and IPOS that specify the services and supports that the beneficiary and family will receive. The Wraparound Plan is to be developed through the Wraparound Planning Process. Each beneficiary must have a Wraparound Facilitator who is responsible to assist the beneficiary/family in identifying, planning and organizing the Child and Family Team, developing the Wraparound Plan, and coordinating services and supports. (Refer to the [Intensive Care Coordination with Wraparound \(ICCW\)](#) Services for Children and Adolescents section of the Behavioral Health and Intellectual and Developmental Disability Supports and Services chapter of this Manual for additional information.) **(revised per bulletin MMP 24-41)**

In addition to Medicaid state plan services, beneficiaries enrolled in the SEDW may receive any of the following Serious Emotional Disturbances Waiver (SEDW) services as identified in the Wraparound Plan and IPOS.

2.1 CHILD THERAPEUTIC FOSTER CARE

Child Therapeutic Foster Care (CTFC) is an evidence-based practice. It provides an intensive therapeutic living environment for a child with challenging behaviors. Important components of CTFC include:

- intensive parental supervision,
- positive adult-youth relationships,
- reduced contact with children with challenging behaviors, and
- family behavior treatment skills.

CTFC seeks to change the negative trajectory of a child's behavior by improving their social adjustment, family adjustment and peer group. CTFC attempts to decrease negative behavior, increase appropriate behavior, and build pro-social skills. Foster parents, teachers, therapists and other adults act as change agents for the child. The change agents contribute to the treatment of the child and the preparation of their family for the child's return to the home and community. Foster parents are specially recruited, trained and supervised. The total number of individuals (including beneficiaries served in the waiver) living in the home who are unrelated to the primary caregiver may not exceed one.

In addition to being licensed, all CTFC programs under this waiver are to be certified by MDHHS to ensure they meet the requirements set forth in this policy. Separate payment will not be made for homemaker or chore services, for community living services provided by the foster parents, or for respite care furnished for the foster care parents to a child receiving CTFC services since these services are integral to, and inherent in, the provision of CTFC.

2.2 COMMUNITY LIVING SUPPORTS

Community Living Supports (CLS) are used to increase or maintain personal self-sufficiency, thus facilitating a beneficiary's achievement of their goals of community inclusion and remaining in their home. The supports may be provided in the beneficiary's home or in community settings (including, but not limited to, libraries, city pools, camps, etc.).

Medicaid Provider Manual

CLS provides assistance to the family in the care of their child while facilitating the child's independence and integration into the community. The supports, as identified in the Wraparound Plan and IPOS, are provided in the beneficiary's home and may be provided in community settings when integration into the community is an identified goal. Skills related to activities of daily living (such as personal hygiene, household chores, and socialization) may be included. CLS may also promote communication, relationship-building skills, and participation in leisure and community activities. These supports must be provided directly to, or on behalf of, the beneficiary enabling the beneficiary to attain or maintain their maximum potential. These supports may serve to reinforce skills or lessons taught in school, therapy, or other settings.

CLS includes:

- Assistance with skill development related to:
 - Activities of daily living (such as personal hygiene)
 - Household chores
 - Socialization
 - Improving communication and relationship-building skills
 - Participation in leisure and community activities
- Staff assistance, support and/or training with such activities as:
 - Improving the beneficiary's social interactions and internal controls by instilling positive behaviors and increasing resiliency factors that should reduce risk factors
 - Non-medical care (i.e., not requiring nurse or physician intervention)
 - Transportation (excluding to and from medical appointments) from the beneficiary's home to community activities, among community activities, and from the community activities back to the beneficiary's residence
 - Participation in regular community activities and recreation opportunities (attending classes, movies, concerts and events in a park; volunteering; etc.)
 - Assisting the family in relating to and caring for the beneficiary
 - Attendance at medical appointments
 - Acquiring or procuring goods other than those listed as shopping and non-medical services.
- Reminding, observing, rewarding and monitoring of pro-social behaviors.
- Medication administration.
- Staff assistance with preserving the health and safety of the beneficiary in order that the beneficiary may reside or be supported in the most integrated, independent community setting.

The maximum CLS allocation is 744 units (186 hours) per month.

2.3 FAMILY HOME CARE TRAINING

Family Home Care Training provides training and counseling services for the families of beneficiaries served by this waiver. For purposes of these services, "family" is defined as the person(s) who lives with or provides care to a beneficiary served by the waiver and may include a parent and/or siblings or the foster parent(s) for a beneficiary in Child Therapeutic Foster Care. This service is provided by a Master's level social worker, psychologist, or qualified mental health professional (QMHP), includes instruction about treatment interventions and support intervention plans specified in the IPOS, and includes updates as necessary to safely maintain the beneficiary at home.

Family Home Care Training is also a counseling service directed to the family and designed to improve and develop the family's skills in dealing with the life circumstances of parenting a beneficiary with special needs and to help the beneficiary remain at home. All family training must be included in the beneficiary's IPOS and must be provided on a face-to-face basis and with the family present.

2.4 FAMILY SUPPORT AND TRAINING

For Parent Support Partner Service, refer to the Family Support and Training subsection (Behavioral Health §1915(I) Home and Community-Based Services (HCBS) State Plan Amendment Supports and Services section) of the Behavioral Health and Intellectual and Developmental Disability Supports and Services chapter of this Manual.

2.5 FISCAL INTERMEDIARY SERVICES

A fiscal intermediary is an independent legal entity that acts as the fiscal agent of the PIHP for the purpose of ensuring financial accountability for the funds authorized to purchase the services and supports identified in the beneficiary's IPOS. The fiscal intermediary receives the funds; makes payments authorized by the beneficiary's representative to providers of services and supports; and acts as an employer agent when the beneficiary's representative directly employs staff or other service providers.

Fiscal intermediary services include, but are not limited to:

- Facilitation of the employment of service workers by the beneficiary's parent or guardian, including federal, state, and local tax withholding/payments, unemployment compensation fees, wage settlements, and fiscal accounting;
- Ensuring adherence to federal and state laws and regulations; and
- Ensuring compliance with documentation requirements related to management of public funds.

The fiscal intermediary may also perform other supportive functions that enable the beneficiary and their representative to self-direct needed services and supports. These functions may include helping the beneficiary recruit staff (e.g., developing job descriptions, placing ads, assisting with interviewing) – as requested by the beneficiary's representative; contracting with or employing and directing providers of services; verification of provider qualifications (including reference and background checks); and assisting the beneficiary and their representative to understand billing and documentation requirements.

This waiver service is limited to beneficiaries who choose to self-direct services through Choice Voucher/Self Determination arrangements. The “unit” for this billable code is “per month” and can be billed once per month for beneficiaries using Choice Voucher/ Self Determination arrangements.

2.6 HOME CARE TRAINING, NON-FAMILY

This service is reimbursable for up to four sessions per day but no more than 12 sessions per 90 days (i.e., three calendar months). A session can be of varying lengths of time but should meet the needs of the plan of service (POS); a billable session must be at least 45 minutes.

This service provides coaching, training, supervision and monitoring of CLS staff by clinicians (i.e., licensed psychologist, Master’s level social worker, occupational therapist, physical therapist, speech therapist, or Child Mental Health Professional). Professional staff work with CLS staff to implement the beneficiary’s POS, with focus on services designed to improve the beneficiary’s social interactions and self-control by instilling positive behaviors instead of behaviors that are socially disruptive, injurious to the beneficiary or others, or that cause property damage. The activities of the professional staff ensure the appropriateness of services delivered by CLS staff and continuity of care. This service can be provided by more than one clinician in any given month, as the service provider is selected on the basis of their competency in the aspect of the POS on which training is conducted.

Services must be provided by qualified providers who meet the requirements of, and in accordance with, 42 CFR §440.50 through §440.60(a) and other applicable state and federal laws or regulations.

2.7 OVERNIGHT HEALTH AND SAFETY SUPPORT (OHSS) SERVICES

NOTE: OHSS is not available for beneficiaries residing in licensed non-community facilities or settings. Payment of OHSS may not be made directly or indirectly to responsible relatives (i.e., spouses or parents of minor children) or a legal guardian.

The need for OHSS must be reviewed and established through the person-centered planning process with the beneficiary’s specific needs identified that outline health and safety concerns and a history of behavior or action that has placed the beneficiary at risk of obtaining or maintaining their independent living arrangement. Each provider of OHSS services will ensure the provision of, or provide as its minimum responsibility, overnight supervision activities appropriate to the beneficiary’s needs to achieve or maintain independent living, health, welfare, and safety.

2.7.A. COVERAGE [CHANGES MADE 4/1/2025]

For purposes of this service, “overnight” includes the hours a beneficiary is typically asleep for no more than 12 hours in a 24-hour period.

The purpose of OHSS is to enhance individual safety and independence with an awake provider supervising the health and welfare of a beneficiary overnight. OHSS is defined as the need for an awake provider to be present (i.e., physically on-site) to oversee and be ready to respond to a beneficiary’s unscheduled needs if they occur during the overnight hours when they are typically asleep.

OHSS services are generally furnished on a regularly scheduled basis, for multiple days per week, or as specified in the IPOS, encompassing both health and safety support services needed for the beneficiary to reside successfully in their own home and community-based settings.

OHSS may be appropriate when:

- Service is necessary to safeguard against injury, hazard, or accident.
- A beneficiary has an evaluation that includes medical necessity that determines the need for OHSS and will allow a beneficiary to remain at home safely after all other available preventive interventions/appropriate assistive technology, environmental modifications and specialty supplies and equipment (i.e., Lifeline, Personal Emergency Response System [PERS], electronic devices, etc.) have been undertaken to ensure the least intrusive and cost-effective intervention is implemented.
- A beneficiary requires supervision to prevent or mitigate mental health or disability related behaviors that may impact the beneficiary’s overall health and welfare during the night.
- A beneficiary is non-self-directing (i.e., struggles to initiate and problem solve issues that may intermittently come up during the night or when they are typically asleep), confused or whose physical functioning overnight is such that they are unable to respond appropriately in a non-medical emergency (i.e., fire, weather-related events, utility failure, etc.).
- A beneficiary has a documented history of a behavior or action that supports the need to have an awake provider on-site for supported assistance with incidental care activities that may be needed during the night that cannot be pre-planned or scheduled.
- A beneficiary requires overnight supervision in order to maintain living arrangements in the most integrated community setting appropriate for their needs.

The following exceptions apply for OHSS:

- OHSS does not include friendly visiting or other social activities.
- OHSS is not available when the need is caused by a medical condition and the form of supervision required is medical in nature (i.e., nursing facility level of care, wound care, sleep apnea, overnight suctioning, end-stage hospice care, etc.) or in anticipation of a

Medicaid Provider Manual

medical emergency (i.e., uncontrolled seizures, serious impairment to bodily functions, etc.) that could be more appropriately covered under PERS or medical specialty supplies.

- OHSS is not intended to supplant other medical or crisis emergency services to address acute injury or illness that poses an immediate risk to a person's life.
- OHSS is not available to prevent, address, treat, or control significantly challenging anti-social or severely aggressive individualized behavior.
- OHSS is not available for a beneficiary who is anxious about being alone at night without a history of a mental health or disability related behavior(s) that indicates a medical need for overnight supports.
- OHSS is not intended to supplant services, such as respite services, for the relief of the primary caregiver or legal guardian living in the same home. **(revised 4/1/2025)**
- OHSS is not intended to replace a parent's or legal guardian of a minor's obligations and parental rights of minor children living in a family home. **(text added 4/1/2025)**
- OHSS is not an alternative to inpatient psychiatric treatment or other appropriate levels of care to meet the beneficiary's needs and is not available to prevent potential suicide or other self-harm behaviors.

2.7.B. COORDINATION OF SERVICES AND CARE

The service normally involves the co-provision of several services through an awake provider in order to achieve the purpose of the service. OHSS services typically fall into this category of "round-the-clock" by the nature and institutional level of care required for Home and Community Based Services (HCBS) Waiver participants. OHSS is intended to supplement other HCBS (i.e., CLS, respite, etc.) that are provided to the beneficiary as part of a comprehensive array of specialized waiver or developmental disabilities services (i.e., supports coordination, peer-delivered, etc.).

If a beneficiary is receiving CLS or respite supports and demonstrates the need for OHSS, the IPOS must document coordination of services to ensure the scope, nature of supervision and/or provider differ from the other community support services to prevent issues of duplicative services. OHSS is complementary of the other habilitative services, but typically does not comprise the entirety of the supports a beneficiary may need to obtain or maintain their independence in their community. OHSS services are enhanced services that are in addition to or concurrent with other waiver services, as outlined in the IPOS, and allow for the provision of supervision to ensure the health and safety of a beneficiary overnight.

2.7.C. PROVIDER SERVICES

Providers have the responsibility for the health, welfare, and safety of the beneficiary overnight and must be awake to have the ability to intervene on behalf of the beneficiary. This assistance may take the form of observation and minor redirection of the beneficiary to perform tasks that will enable the beneficiary to maintain their overnight health and sleep safety.

Medicaid Provider Manual

Providers may perform minor redirection and/or prompting that are incidental to the care and supervision of the beneficiary over the course of the night such as:

- The ability to intervene on behalf of the beneficiary supervision of overnight activities, such as reinforcing independent living skills and minor redirection of their independent daily living tasks.
- Provide the level of supervision needed to ensure a beneficiary's safety, along with the actions required if a beneficiary's health or welfare are at risk.
- Safeguard the individualized supports needed overnight appropriate to the beneficiary's needs. Common issues, which include fire and evacuation ability, ability to respond independently to health needs during the night, and safety awareness.

2.8 RESPITE CARE

Respite care is services provided to beneficiaries unable to care for themselves that are furnished on a short-term basis because of the absence or need for relief of those persons normally providing the care. This service can be provided by a qualified provider under contract with the PIHP/CMHSP. A parent or guardian may not be considered a provider, nor be reimbursed for this service. The maximum respite allocation is 1,248 units (312 hours) per month.

Federal Financial Participation (FFP) may not be claimed for the cost of room and board except when provided as part of respite care furnished in a facility approved by the State that is not a private residence. Respite care can be provided in the following locations:

- Beneficiary's home or place of residence
- Home of a relative or family friend's home in the community
- Licensed Children's Camp
- Licensed Foster Family Home or Foster Family Group Home
- Licensed Children's Therapeutic Group Home

2.9 THERAPEUTIC ACTIVITIES

A therapeutic activity is an alternative service that can be used in lieu of, or in combination with, traditional professional services. The focus of therapeutic activities is to interact with the child to accomplish the goals identified in the POS. The POS ensures the child's health, safety and skill development and maintains the child in the community. Services must be directly related to an identified goal in the POS. Providers are identified through the wraparound planning process and participate in the development of a POS based on strengths, needs, and preferences of the child and family. Therapeutic activities may include the following: child and family training, coaching and supervision, monitoring of progress related to goals and objectives, and recommending changes to the POS. Services provided under Therapeutic Activities include music therapy, recreation therapy, and art therapy. NOTE: The unit of service when billing G0176 for children/youth on the SEDW is per session, 45 minutes or more.

Medicaid Provider Manual

The training, coaching, supervision and monitoring activities provided under this service are specific to music, art, and recreation therapy and must be provided by providers with the qualifications listed below.

Recreation Therapy	Must be provided by a Certified Therapeutic Recreation Specialist credentialed by the National Council for Therapeutic Recreation Certification (NCTRC).
Music Therapy	Must be provided by a Music Therapist - Board Certified (MT-BC) or by a music therapist listed on the National Music Therapy Registry (NMTR).
Art Therapy	Must be provided by a Registered Art Therapist - Board Certified (ATR-BC).

2.10 THERAPEUTIC OVERNIGHT CAMP

Therapeutic Overnight Camp is a group recreational and skill building service in a camp setting aimed at meeting the goal(s) detailed in the beneficiary's IPOS. A session can be one or more days and nights of camp. Room and Board costs are excluded from the SEDW payment for this service. The maximum overnight camp allocation is \$1,400 per session – three sessions per fiscal year.

Additional criteria:

- Camps are licensed by MDHHS;
- The beneficiary's IPOS includes Therapeutic Overnight Camp; and
- Camp staff is trained in working with beneficiaries with SED.

Coverage includes:

- Camp fees, including enrollment and other fees;
- Transportation to and from the camp; and
- Additional costs for staff with specialized training with this population.

Coverage excludes:

- Room and board for the camp.

2.11 WRAPAROUND SERVICES [CHANGE MADE 4/1/2025]

(Refer to the [Intensive Care Coordination with Wraparound \(ICCW\)](#) Services for Children and Adolescents subsection of the Covered Services section of the Behavioral Health and Intellectual and Developmental Disability Supports and Services chapter of this Manual.) **(revised per bulletin MMP 24-41)**

Wraparound services for beneficiaries is a highly individualized planning process facilitated by specialized Wraparound Facilitators. Due to the intense needs and level of risk of beneficiaries and their families served in the SEDW, all SEDW Wraparound providers must meet the following additional requirement:

Medicaid Provider Manual

- Wraparound facilitators and those who provide supervision to facilitators will attend additional training (16 hours) related to provision of support to beneficiaries and their families served in the waiver annually as required by MDHHS. This training is in addition to identified requirements for all supervisors and Wraparound facilitators.

SECTION 3 – MEDICAID STATE PLAN SERVICES

In addition to SEDW services, beneficiaries served by the SEDW have access to Medicaid Mental Health State Plan services (e.g., psychotherapy, medication management, OT and PT evaluations, home based services). Services that can be billed to Medicaid are listed on the PIHP/CMHSP Encounter Reporting Healthcare Common Procedure Coding System (HCPCS) and Revenue Codes chart which is available on the MDHHS website. The code chart lists the CPT/HCPCS code, modifiers (when applicable), short description, Medicaid fee screen, and applicable quantity/timeframe parameters for each service. (Refer to the Directory Appendix for website information.)

Transportation is a Mental Health State Plan service. Parameters related to this service for SEDW enrollees are identified.

PIHPs are responsible for transportation to and from the beneficiary's place of residence when provided so that a beneficiary may participate in a state plan, HSW, or additional/1915(i) State Plan Amendment (SPA) service at an approved day program site or in a clubhouse psychosocial rehabilitation program. Medicaid Health Plans (MHPs) are responsible for assuring enrollee transportation to Medicaid covered medical appointments. MDHHS is responsible for assuring transportation to medical appointments for Medicaid beneficiaries not enrolled in MHPs (except those noted above and in the HSW program – described in the Habilitation Supports Waiver for Persons with Developmental Disabilities Section of this chapter).

For beneficiaries enrolled in the SEDW, transportation may be reimbursed when separately specified in the IPOS and provided in order to enable a beneficiary served by the SEDW to gain access to waiver and other community services, activities, and resources. The transportation benefit is limited to mileage reimbursement, and can be paid to hourly staff (e.g., respite and CLS) and clinical/professional staff providers. Family, neighbors, friends, or community agencies that can provide this service without charge must be utilized before seeking funding through the SEDW. The SEDW-enrolled beneficiary, legally responsible caregivers, and foster care providers cannot be reimbursed for mileage.

SECTION 4 – PROVIDER QUALIFICATIONS

4.1 RESPITE AND CLS

Individuals who provide respite and CLS must, in addition to the specific training, supervision and standards for each support/service, be:

- A responsible adult at least 18 years of age;
- Able to prevent transmission of communicable disease;
- Able to communicate expressively and receptively in order to follow IPOS requirements, and beneficiary-specific emergency procedures, and report on activities performed;
- In "good standing" with the law (i.e., not a fugitive from justice, not a convicted felon who is either still under jurisdiction or one whose felony relates to the kind of duty they would be performing, not an illegal alien);
- Able to perform basic first aid procedures; and
- Trained on the IPOS, as applicable.

4.2 WRAPAROUND FACILITATOR

Wraparound facilitators must:

- Complete MDHHS Wraparound training;
- Possess a bachelor's degree in any field;
- Have a criminal history screen, including state and local child protection agency registries; and
- Be supervised by an individual who meets criteria as a Child Mental Health Professional (CMHP) who has completed MDHHS required training.

4.3 CHILD THERAPEUTIC FOSTER CARE

Child Therapeutic Foster Care (CTFC) providers must be:

- Licensed as a Foster Care Provider (MCL 722.122);
- Enrolled by MDHHS as a CTFC provider; and
- Trained in the IPOS.

4.4 THERAPEUTIC OVERNIGHT CAMP

Therapeutic Overnight Camps must be licensed and certified by MDHHS. Staff must be trained in the IPOS.

NON-PHYSICIAN BEHAVIORAL HEALTH APPENDIX

SECTION 1 - GENERAL INFORMATION

This appendix applies to non-physician behavioral health providers, including psychologists, social workers, counselors, and marriage and family therapists, providing outpatient behavioral health services not included under the specialty services and supports benefit. Information is included to assist the practitioner in determining how the Michigan Department of Health and Human Services (MDHHS) covers specific services. This information should be used in conjunction with the Billing & Reimbursement Chapters of this manual, as well as the Medicaid Code and Rate Reference tool, MDHHS Practitioner and Medical Clinic Fee Schedule, and other related procedure databases/fee schedules located on the MDHHS website. (Refer to the Directory Appendix for website information.)

SECTION 2 – PROVIDER QUALIFICATIONS

Medicaid covers non-physician behavioral health services when performed by any of the following provider types:

- Licensed Psychologist (Doctoral Level)
- Licensed Social Worker (Master's level)
- Licensed Marriage and Family Therapist (Master's or Doctoral level)
- Licensed Professional Counselor (Master's or Doctoral level),
- Limited Licensed Psychologist (Master's or Doctoral Educational level) (LLPs) under the supervision of an enrolled, fully licensed psychologist (except as noted in Section 333.18223 of the Public Health Code).

These practitioners are required to be currently licensed by the Department of Licensing and Regulatory Affairs (LARA), enroll as Medicaid providers, and be uniquely identified on all claims. (Refer to the Billing & Reimbursement for Professionals Chapter for billing information.)

LLPs must enroll as Rendering/Service Only providers and associate themselves to at least one Billing Provider within CHAMPS. Associated Billing Providers may be either employers or organizations the LLP is contracted with to perform services (i.e., Community Mental Health Services Programs [CMHSPs], Prepaid Inpatient Health Plans [PIHPs]).

Non-physician behavioral health services may also be performed by any of the following provider types under the supervision of an enrolled, fully licensed provider of the same profession:

- Temporary Limited License Psychologist (Master's or Doctoral Level)
- Educational or Temporary Limited License Social Worker, Marriage and Family Therapist, or Professional Counselor
- Graduate of a board-approved health profession training program for psychology, social work, counseling, or marriage and family therapy (Master's or Doctoral Level) who has completed all requirements but has not obtained a limited or temporary educational license. Medicaid will cover services for a period of no longer than one year from the date the individual successfully completed their graduate coursework. The graduate's supervising provider must monitor and ensure compliance of this requirement.
- Student Intern. A student intern is an individual who is currently enrolled in a health profession training program for psychology, social work, counseling, or marriage and family therapy that has been approved by the appropriate board, is performing the duties assigned in the course of training, and is appropriately supervised according to the standards set by the appropriate board and the training program. Social work student interns must be pursuing a Master's degree in social work and be supervised by a Licensed Master's Social Worker in a manner that meets the requirements of a Council on Social Work Education (CSWE) accredited education program curriculum that prepares an individual for licensure.

Medicaid Provider Manual

Student interns, graduates and temporary or educational limited licensed providers are not eligible to enroll or be directly reimbursed by Medicaid. Services should be billed to Medicaid under the National Provider Identifier (NPI) of the supervising provider.

Supervision is defined by Section 333.16109 of the Public Health Code (Act 368 of 1978) when required.

To comply with 42 CFR 431.110, licensed health professionals employed by a Tribal Health Program must be licensed in good standing in at least one state, but do not need to be licensed in the state where they are practicing. This Federal regulation supersedes any licensing requirements of individual states.

SECTION 3 – COVERED SERVICES

Medicaid beneficiaries whose needs do not render them eligible for specialty services and supports through the PIHP/CMHSP may receive outpatient behavioral health services directly through the Fee-for-Service (FFS) Medicaid program or Medicaid Health Plan. Non-physician behavioral health services performed by psychologists, social workers, counselors, and marriage and family therapists are covered when performed in a non-facility setting or outpatient hospital clinic and provided within their specific profession's scope of practice guidelines as defined by State law. Providers should refer to the Medicaid Code and Rate Reference tool and the Non-Physician Behavioral Health Provider fee schedule on the MDHHS website for the current list of covered procedure codes. The list of allowable services is reviewed annually and updated as applicable.

Services covered by the PIHPs/CMHSPs are available and reimbursed through the PIHP/CMHSP. Providers should refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services chapter for additional information on these services.

3.1 PRIMARY CARE OFFICE-BASED SUBSTANCE USE TREATMENT (OBSUT)

Providers working in a primary care setting are permitted to seek fee for service (FFS) or Medicaid Health Plan reimbursement for substance use treatment services in an office-based setting. (Refer to the Primary Care Office-Based Substance Use Treatment (OBSUT) subsection in the Practitioner chapter for additional information regarding reimbursement provision.)

SECTION 4 – TELEMEDICINE

Behavioral health services may be delivered via telemedicine in accordance with current Medicaid policy. In compliance with the Michigan Insurance Code of 1956 (Act 218 of 1956), telemedicine services must be provided by a health care professional who is licensed, registered, or otherwise authorized to engage in their health care profession in the state where the patient is located. Refer to the Telemedicine Chapter for additional information regarding telemedicine services.

SECTION 5 – CLAIMS PROCESSING AND REIMBURSEMENT AMOUNTS

Information regarding claims processing is available in the Billing & Reimbursement for Professionals chapter of this manual.

Licensed Psychologist (Doctoral level), Licensed Social Worker (Master's level), Licensed Marriage and Family Therapist (Master's or Doctoral level), or Licensed Professional Counselor (Master's or Doctoral level) behavioral health professionals may receive direct reimbursement for Medicaid covered services.

Limited License Psychologists (LLPs) (Master's and Doctoral Educational level) are not eligible to be directly reimbursed by Medicaid and must associate themselves to at least one billing provider within CHAMPS. LLP services requiring supervision and billed on a professional claim form must include the NPI of the LLP in the Rendering Provider field and the NPI of the Medicaid enrolled supervising Licensed Psychologist in the Supervising Provider field.

All temporary limited licensees, educational limited licensees other than Doctoral Educational Limited License Psychologists, and student interns are not eligible to be directly reimbursed by Medicaid. Services should be billed to Medicaid under the NPI of the supervising provider. The supervising provider must be listed as the Rendering Provider on the claim.

Non-physician behavioral health payment rates are established by MDHHS as a fee screen for each procedure. Services performed by non-physician behavioral health providers are reimbursed at a percentage of the Medicaid practitioner fee schedule rate. Refer to the Medicaid Non-Physician Behavioral Health fee schedule or the Community Health Automated Medicaid Processing System (CHAMPS) Medicaid Rate and Reference tool for additional information. The fee schedule is reviewed and updated at least annually.

For beneficiaries enrolled in a MHP, the provider must contact the MHP for applicable claim completion instructions as these may vary from the FFS Medicaid program.

Medicaid Provider Manual

BRAIN INJURY SERVICES

SECTION 1 – GENERAL INFORMATION

The Michigan Department of Health and Human Services (MDHHS) is committed to providing high quality services and supports to individuals who have experienced a brain injury. Brain Injury Services (BIS) provides necessary services and supports to individuals with qualifying brain injuries who, but for the provision of these services, would otherwise be served in an institutional setting. The program provides critical brain injury-specific rehabilitation and support in the post-acute injury period with the goal of assisting the individual in becoming capable of living in the most independent setting.

1.1 BRAIN INJURY SERVICES SCOPE AND PURPOSE

BIS focuses on specialized rehabilitation and supportive services required upon release from an acute care setting following a moderate or severe brain injury. A brain injury does not include damage to the brain resulting from neurodegenerative disorders such as Alzheimer's disease or dementia. These services are for beneficiaries who can benefit from the advanced level of rehabilitative therapies and other services offered. BIS can be obtained in either a transitional residential or outpatient setting. All providers for BIS must have appropriate accreditation, certifications, or specialized training in serving individuals with brain injuries. These BIS providers are contracted with MDHHS to provide services covered in this chapter. Transitional Residential services are limited to six months for each brain injury.

1.2 BENEFICIARY ELIGIBILITY

To be eligible for BIS, an individual must meet the following criteria:

- Be Medicaid-eligible.
- Have a qualifying brain injury that occurred within 15 months of application to the BIS program. (Refer to the Beneficiaries with a Traumatic Brain Injury and the Beneficiaries with an Acquired Brain Injury subsections for additional information.)
- Be medically stable.
- Be able to participate in appropriate therapies as indicated:
 - For beneficiaries using Transitional Residential services, at least 15 hours per week upon approval for BIS. These beneficiaries may decrease the number of therapy hours based upon a beneficiary evaluation when nearing discharge if most of the treatment goals have been met and the discharge plan has been reevaluated and revised to ensure it remains appropriate for the beneficiary.
 - For beneficiaries receiving Outpatient services, at least nine (9) hours per week.
- Be determined appropriate for 60 to 90 days of BIS as supported by a Physical Medicine and Rehabilitation (PMR) physician's order.
 - For beneficiaries using Transitional Residential services, the order must specify that the physician expects significant progress within the next 90 days to allow for community-based discharge.
 - In the absence of a PMR physician's order, a psychological consultation conducted by a qualified professional that substantiates the beneficiary's ability to interact with the therapy treatment team and the ability to participate in the required therapy levels will be accepted.

Medicaid Provider Manual

1.2.A. EARLY AND PERIODIC SCREENING, DIAGNOSIS, AND TREATMENT AGE-OUTS

Beneficiaries who otherwise qualify for BIS but are receiving similar services through the Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) program and will age-out of the EPSDT program before completing brain injury treatments and therapies may enroll in BIS upon their 21st birthday. Providers should collaborate in advance of the 21st birthday to ensure minimization of interrupted services for these beneficiaries.

1.2.B. BENEFICIARIES WITH A TRAUMATIC BRAIN INJURY

A traumatic brain injury (TBI) is defined as a blunt force trauma to the brain. The Centers for Disease Control and Prevention (CDC) defines a TBI as "caused by a bump, blow or jolt to the head or a penetrating head injury that disrupts the normal function of the brain." Injuries such as gunshot wounds, falls or motor vehicle accidents involving injuries to the head are considered TBIs. Explosive blasts can also cause a TBI, particularly among those who serve in the United States (U.S.) military.

1.2.C. BENEFICIARIES WITH AN ACQUIRED BRAIN INJURY

An acquired brain injury (ABI) is an injury to the brain that is not hereditary, congenital degenerative, or induced by birth trauma. ABIs occur after birth but are not caused by an external force and are non-traumatic. Examples of ABI include stroke, near drowning, substance abuse overdose, hypoxic or anoxic brain injury, tumors, neurotoxins, electric shock, or lightning strike.

1.2.D. TIME SINCE INJURY

Beneficiaries must have sustained the qualifying brain injury within 15 months of applying for BIS.

1.2.E. FUNCTIONING LEVEL

Beneficiaries must demonstrate functioning at a Level 5 on the Rancho Los Amigos scale based on the most recent medical records available. Beneficiaries functioning at a lower level but steadily progressing may be considered for enrollment. MDHHS will make this exception based on a review of medical documentation submitted to MDHHS.

1.2.F. ENROLLMENT IN MEDICAID HEALTH PLANS AND OTHER PROGRAMS

A program participant cannot be simultaneously enrolled in both BIS and a Medicaid Health Plan (MHP), Program of All-Inclusive Care for the Elderly (PACE) program, MI Health Link, MI Choice or any other §1915(c) waiver program. It is not necessary to either delay BIS program enrollment or withhold BIS pending the disenrollment process. Disenrollment from other programs will be coordinated by the MDHHS Home and Community-Based Services (HCBS) Section. Special disenrollment or medical exception processes for BIS program enrollment are not allowed.

1.3 BENEFICIARY DISCHARGES

All beneficiaries will develop a discharge plan as a part of their care plan. The discharge plan will be altered as necessary based upon the beneficiary's goals and outcomes. Beneficiaries who have met most of their goals will begin intensive discharge planning. These beneficiaries may require other home and community-based services (HCBS) programs upon conclusion of BIS. Intensive discharge planning will include planning for enrollment in the most appropriate program for the beneficiary based upon their choice and eligibility for other programs. Every effort will be made to ensure a smooth transition out of the BIS and into other Long-Term Services and Supports (LTSS) programs, as needed, without a lapse between BIS and other program enrollment. MDHHS allows 30 days to facilitate an appropriate discharge.

Discharge from BIS will be based upon the beneficiary meeting any of the following criteria:

- The beneficiary is not eligible for Michigan Medicaid;
- The beneficiary died;
- The beneficiary is not amenable to treatment;
- The beneficiary is non-compliant with program or facility rules;
- The beneficiary has been institutionalized in a hospital or nursing facility for more than 30 days;
- The beneficiary enrolled in a hospice program;
- The beneficiary moved out of the program service area;
- The beneficiary has not shown progress for at least 30 days while approved for BIS;
- The beneficiary chooses to end BIS;
- The beneficiary transferred to a different program or service and no longer requires BIS;
- The beneficiary no longer meets program criteria;
- The beneficiary refused to accept BIS;
- The beneficiary met program goals as established in their care plan; or
- The beneficiary has been enrolled in Transitional Residential services of BIS for six months and does not require or has refused Outpatient services.

SECTION 2 – REFERRAL AND ADMISSION PROCESS

Any knowledgeable person may make a referral for BIS. MDHHS recommends, but does not require, the current social worker or nurse assigned to the beneficiary to contact MDHHS for easier processing of the referral and to provide a brief report of the beneficiary. An individual, family member or friend may contact MDHHS if they want more information about the program or feel their friend or family member may qualify. MDHHS will provide the friend or family with information about the program, answer questions, and provide a list of contracted BIS providers. The potential applicant or family member will have to decide which provider meets their needs and is right for them. MDHHS will then work with the BIS providers to get the complete admission packet and determine if the individual is eligible for the program.

MDHHS will evaluate the application of each individual with a brain injury who applies for BIS using the criteria listed below. All applicants for BIS must meet each criterion at the time of application. MDHHS will not consider applicants who do not meet all criteria specified below for enrollment in the BIS.

2.1 IN-PERSON EVALUATION

Providers must conduct an in-person evaluation to determine whether the beneficiary meets provider admission criteria before making a referral. The provider may request a joint evaluation with MDHHS HCBS staff. MDHHS reserves the right to conduct an in-person assessment of the beneficiary.

When appropriate, the evaluation may occur through telecommunication technology (telemedicine). MDHHS requires a real-time interactive system at both the originating and distant sites, allowing instantaneous interaction between the patient and the health care professional via the telecommunication system. Telemedicine should be used primarily when travel is prohibitive for the beneficiary. Providers must ensure the privacy of the beneficiary and the security of any information shared via telemedicine. (Refer to the Telemedicine chapter of this manual for additional telemedicine requirements.)

2.2 MEDICAL RECORDS

Medical records from the acute or institutional care setting, hereafter referred to as “care setting,” immediately prior to application for BIS must demonstrate all the following:

- The injury occurred no more than 15 months before the BIS application date or start of Brain Injury-specific services through the EPSDT program;
- The beneficiary is at least 21 years old;
- The beneficiary has been determined to have a significant functional or cognitive impairment as identified by a comprehensive assessment and must require long-term support services;
- The beneficiary must have functional or cognitive limitations that are a direct result of a brain injury as documented by a physician, neuropsychologist, or other qualified health professional;
- The beneficiary has potential to maintain skills learned at the setting such as coping mechanisms or other techniques to compensate for identified functional or cognitive deficits;
- The beneficiary does not require continuous 1:1 attention to remain free from harm within the care setting;

Medicaid Provider Manual

- The beneficiary is willing and able to participate in targeted brain injury therapies and work toward identified goals;
- The beneficiary exhibits behavior that does not pose significant harm to self or others; and
- The beneficiary has not used illegal substances or abused legal substances in the care setting or at home after discharge from the last treatment facility. For the purposes of BIS, abuse of legal substances means that for the beneficiary, using the legal substance creates a barrier to participating in and benefitting from intensive rehabilitation services.

2.3 ADDITIONAL BENEFICIARY RECORDS

In addition to medical records that support the medical eligibility requirements described above, the following beneficiary records, as applicable, must be submitted for consideration of approval of BIS:

- Emergency Room records for the brain injury;
- The initial post-injury computed tomography scan, magnetic resonance imaging or other report of brain;
- Neurological consultations and surgery reports related to the brain injury;
- Therapy notes including therapist evaluations;
- Social worker evaluation;
- A statement by a qualified health professional that indicates the beneficiary has functional or cognitive limitations as a direct result of the brain injury;
- Proof of guardianship or power of attorney, if applicable;
- Other documents relative to the beneficiary and their brain injury; and
- Acknowledgement (written or oral) from a qualified provider indicating a willingness to admit the beneficiary.

2.4 SUBMISSION OF RECORDS TO MDHHS

MDHHS HCBS staff will review the documentation submitted to ensure the individual meets eligibility criteria. The standard of promptness for MDHHS to make an eligibility determination is ten (10) business days from receipt of a complete referral packet. Providers must plan for at least this amount of time before confirmation of approval for BIS. Submission of complete admission packets will facilitate the determination process.

In the cases where an applicant for the BIS program does not meet BIS eligibility criteria, BIS providers must send documentation to MDHHS with evidence that the individual does not meet BIS criteria. Only MDHHS can approve or deny eligibility for BIS.

2.5 MDHHS APPROVAL

Once eligibility is verified and a qualified provider is located, MDHHS will approve BIS for up to 90 days for the beneficiary. MDHHS will provide a list of qualified BIS providers to assist the applicant in making an informed choice of providers.

Medicaid Provider Manual

2.6 PROVIDER RESPONSIBILITIES

Upon acceptance of the beneficiary, the provider agrees to do the following:

- Submit a copy of the beneficiary's Plan of Care (POC) within two weeks of admission;
- Submit any changes, reductions, or terminations in services listed in the POC to MDHHS HCBS staff at least two weeks prior to the effective date for MDHHS approval. This will allow MDHHS time to send the beneficiary proper notice. (Refer to the Appeals section for additional information.)
- Submit the Treatment Team report to MDHHS HCBS staff monthly. Reports should include progress toward discharge planning;
- Notify MDHHS HCBS staff of beneficiary hospitalizations for more than two (2) days;
- Submit a discharge plan 30 days prior to the anticipated discharge date; and
- Submit a discharge summary report within 30 days after the beneficiary's discharge from BIS.

2.7 CASE CONFERENCES

Prior to the BIS approval expiration date, MDHHS staff and the provider's treatment team will meet with the beneficiary to determine if the approval for BIS should be renewed and for how long. Renewal is based upon the beneficiary's continued ability to make progress. Renewals will not be granted if the beneficiary meets the discharge criteria. When the beneficiary continues to demonstrate progress toward rehabilitation goals, BIS may be reapproved for up to six months of Transitional Residential rehabilitation. Outpatient rehabilitation is not limited as long as the beneficiary continues to make progress toward goals identified in the POC and other Medicaid-funded services are not available to meet the individual's needs.

SECTION 3 – COVERED SERVICES

BIS covers, upon prior authorization (PA), medically necessary rehabilitation services for beneficiaries with neurological damage resulting from a brain injury. All services must be included on the beneficiary's POC. All services are available to beneficiaries in both transitional residential and outpatient settings. In addition to BIS, beneficiaries have access to Medicaid State Plan services (e.g., prosthetic and orthotic care, durable medical equipment (DME)) on a fee-for-service (FFS) basis. The following services are included as BIS when provided by or under the direction of appropriately qualified individuals.

3.1 DIAGNOSIS AND EVALUATION

Medicaid covers tests to diagnose a disease or a medical condition. Diagnostic testing must be directly related to the brain injury of the beneficiary. Medicaid covers medically necessary evaluation and management (E/M) services provided by a physician or other practitioner authorized by the Department of Licensing and Regulatory Affairs (LARA). Most E/M services are covered once per day for the same beneficiary. In these cases, only one office or outpatient visit is covered on a single day for the same beneficiary unless the visits were for unrelated reasons and at different times of the day (e.g., office visit for blood pressure medication evaluation, followed five hours later by a visit for evaluation of leg pain following an accident). Coverage of an E/M service includes related activities such as coordination of care, telephone calls, writing prescriptions, completing insurance forms, and review and explanation of diagnostic test reports to the beneficiary. Requests for individual consideration should not report the modifier for increased procedural services with E/M services unless specifically directed by this manual. This practice does not follow Current Procedural Terminology (CPT) coding guidelines and causes longer delays in processing claims for payment.

3.2 REHABILITATIVE NURSING SERVICES

Nursing services are covered on an intermittent (separated intervals of time) basis when provided by, or under the direct supervision of, a registered nurse (RN). Nursing care provided by a licensed practical nurse (LPN) must be under the supervision of an RN, and the RN must co-sign the LPN's documentation.

A nursing visit may include, but is not limited to, one or more of the following nursing services:

- Administering prescribed medications that cannot be self-administered.
- Changing an indwelling catheter.
- Applying dressings that require prescribed medications and aseptic techniques.
- Teaching the beneficiary, family member, friend, neighbor, or caregiver (paid or unpaid) to carry out all or some of the services.
- Observation and evaluation.

Intermittent nurse visits are intended for beneficiaries who generally require nursing services for the treatment of an acute illness, injury, or disability. Intermittent nursing visits may last from 15 minutes to one or two hours.

The following nursing services are covered by BIS. Limitations, conditions and special considerations are noted when applicable.

Medicaid Provider Manual

3.2.A. BLADDER TRAINING

When use of a catheter is temporary, visits made by the nurse to change the catheter must also include instruction to the beneficiary in bladder training methods. The actual bladder training (e.g., forcing fluids or other measures) does not require the skills of a nurse. After the catheter is removed, a limited number of visits (maximum two visits per month) are allowed to observe and evaluate the effectiveness with which the bladder training has been accomplished (e.g., the degree to which the bladder is emptying).

3.2.B. ENEMAS

Giving enemas usually does not require the skills of a nurse, and Medicaid does not cover such visits unless the physician has ordered that a nurse gives the enema because of clinical indications.

3.2.C. OBSERVATION/EVALUATION

When the attending physician determines that the beneficiary's condition is unstable and that significant changes may occur, Medicaid covers nurse visits for observation/evaluation. Once the beneficiary's condition has stabilized and there has been no significant change (e.g., no change in medication or vital signs, no recent exacerbation in the beneficiary's condition) for a period of three weeks, and no other necessary nursing services are being furnished, nursing visits solely for observation/evaluation are no longer covered.

3.2.D. ORAL MEDICATIONS

Administration of oral medications does not usually require the skills of a nurse in the home setting. Visits are covered only if the complexity of the beneficiary's condition and/or the number of drugs prescribed require the skill or judgment of a nurse to detect and evaluate side effects (adverse reactions) and/or provide necessary teaching and instruction.

Placing medication in envelopes/cups, giving reminders, etc. to assist the beneficiary in remembering to take them does not constitute a nursing service.

3.2.E. ROUTINE PROPHYLACTIC AND PALLIATIVE SKIN CARE

The recognized stages of decubitus ulcers are classified as:

- Stage I - Inflammation or redness of the skin;
- Stage II - Superficial skin break with erythema of surrounding area;
- Stage III - Skin break with deep tissue involvement; and
- Stage IV - Skin break with deep tissue involvement with necrotic tissue present.

The existence of Stage III or Stage IV decubiti or other widespread skin disorders may necessitate the skills of a nurse. The physician's orders for treating the skin determine the need for this service. The presence of Stage I or Stage II decubiti, rash, or other

Medicaid Provider Manual

relatively minor skin irritations do not indicate a need for nursing care unless ordered by a physician. Bathing the skin, applying creams, etc. are not covered nursing services.

3.2.F. TEACHING AND TRAINING ACTIVITIES

Medicaid covers home health aide teaching and training activities to enable the beneficiary to become independent of skilled care. The teaching of a procedure or service is covered if it is reasonable and necessary for the treatment of a specific illness, injury or disability. Eligibility for teaching visits must take into account the ability of a recipient or family member to comfortably perform the task(s) taught.

Teaching and training activities covered by Medicaid include, but are not limited to:

- Giving an injection
- Prefilling insulin syringes
- Inserting/irrigating a catheter
- Administering eyedrops/topical ointments
- Caring for a colostomy or ileostomy
- Administering oxygen
- Preparing and following a therapeutic diet
- Applying dressings to wounds that require prescription medications and aseptic techniques
- Bladder training
- Bowel training (e.g., bowel incontinency, constipation due to beneficiary's immobility)
- Performing activities of daily living (e.g., dressing, eating, personal hygiene) for the beneficiary through use of special techniques and adaptive devices where the beneficiary has experienced a loss of function
- Aligning and positioning a bed-bound beneficiary
- Performing transfer activities (e.g., from bed to chair or wheelchair, wheelchair to bathtub)
- Ambulating by means of crutches, walker, cane, etc.

Medicaid reimbursement for teaching visits is based on whether the teaching provided in the home is a reinforcement of previous teaching or is initial instruction. If teaching constitutes reinforcement of training previously received, fewer visits should normally be required than for initial training.

Visits made solely to remind or emphasize to the beneficiary, family member, friend, or neighbor the need to follow the instructions are not covered services. However, visits are covered when they include supervision and evaluation of complex care that initially requires training by a nurse (e.g., insulin injections or preparation of formula feedings for gastrectomy beneficiaries).

Medicaid Provider Manual

Whether the teaching is reinforcement or initial, the nurse must establish the goal(s) or intended outcome(s) for the beneficiary and a reasonable period of time to attain them and document these in the POC. The beneficiary must be encouraged to become independent of skilled services in their home whenever feasible.

3.3 COGNITIVE REHABILITATION SERVICES

MDHHS uses the terms cognitive rehabilitation services, cognitive rehabilitation therapy (CRT), CRT and therapy interchangeably. CRT is covered when furnished by a Medicaid-enrolled therapy provider and performed by:

- A licensed cognitive rehabilitation therapist;
- A licensed and certified speech-language pathologist (refer to the Speech Language Services subsection for additional information); or
- A qualified licensed practitioner (refer to the Behavioral and Psychological Services subsection for additional information).

Cognitive rehabilitation services assist the beneficiary with relearning cognitive skills that have been lost or altered because of the brain injury. When skills cannot be relearned, new skills must be taught to enable the beneficiary to compensate for their lost cognitive functions. Cognitive rehabilitation comprises four components:

- Education about cognitive weaknesses and strengths, focusing on developing awareness of the problem.
- Process training or the development of skills through direct retraining or practicing the underlying cognitive skills. The goal of process training is to resolve the deficit.
- Strategy training involves the use of environmental, internal and external strategies to assist with compensating for the deficit rather than resolving the problem.
- Functional activities training applies the above three components (education, process training, and strategy training) in everyday life so that the beneficiary regains independence to the greatest extent possible.

Cognitive rehabilitation achieves functional changes by:

- Reinforcing, strengthening or establishing previously learned patterns of behavior.
- Establishing new patterns of cognitive activity or mechanisms to compensate for impaired neurological systems.
- Interventions that are tailored to help the beneficiary be as independent as possible in the management of their everyday routines and responsibilities in their home and community.

The cognitive rehabilitation therapist will evaluate the beneficiary to understand the beneficiary's unique needs and concerns and to create a treatment plan that describes how cognitive rehabilitation will assist the beneficiary to learn to use tools and strategies to be as independent as possible. The evaluation may include standardized or non-standardized assessments, questionnaires, testing, interviews, or observation to gain the greatest understanding of the beneficiary's abilities and limitations in managing everyday routines and responsibilities.

Medicaid Provider Manual

The beneficiary's treatment plan will summarize the beneficiary's strengths and limitations. The treatment plan will include all the activities that will help the beneficiary remediate or compensate for limitations. The therapist will continually assess the beneficiary's progress and revise goals based on that progress.

3.4 PHYSICAL THERAPY SERVICES

MDHHS uses the terms physical therapy (PT), PT and therapy interchangeably. PT is covered when furnished by a Medicaid-enrolled therapy provider and performed by:

- A licensed physical therapist;
- An appropriately supervised licensed physical therapy assistant; or
- A student completing a clinical affiliation under the direct supervision of (i.e., in the presence of) a licensed physical therapist may also be covered. All documentation must be reviewed and signed by the supervising physical therapist.

PT must be medically necessary and reasonable for the maximum reduction of physical disability and restoration of a beneficiary to their best possible functional level.

MDHHS anticipates PT will result in significant functional improvement in the beneficiary's ability to perform mobility skills appropriate to their chronological, developmental, or functional status. These functional improvements should be able to be achieved in a reasonable amount of time and should be durable (i.e., maintainable). PT that makes changes in components of function that do not have an impact on the beneficiary's ability to perform age-appropriate tasks is not covered.

PT must be skilled (i.e., require the skills, knowledge and education of a physical therapist). MDHHS does not cover PT interventions provided by non-PT practitioners (e.g., teacher, RN, occupational therapist, family, or caregiver).

MDHHS covers the physical therapist's initial evaluation of the beneficiary's needs and design of the PT program. The program must be appropriate to the beneficiary's capacity, tolerance, treatment objectives, and include the instructions to the beneficiary and support personnel (e.g., aides or nursing personnel) for delivery of the individualized treatment plan. MDHHS covers infrequent reevaluations, if appropriate.

The cost of supplies and equipment used as part of the therapy program is included in the reimbursement for the therapy. Skilled PT services are designed to set up, train, monitor, and modify a maintenance or prevention program to be performed by family or caregivers. MDHHS does not reimburse for routine provision of the maintenance/prevention program. MDHHS only covers a clinic room charge in addition to PT if it is unrelated.

PT services may be covered for one or more of the following reasons:

- PT is expected to result in the restoration or amelioration of the anatomical or physical basis for the restriction in performing age-appropriate functional mobility skills;
- PT service is diagnostic;
- PT is for a condition that creates decreased mobility and/or function; and/or

Medicaid Provider Manual

- To prevent a reduction in medical or functional status had the therapy not been provided.

PT may include:

- Training in functional mobility skills (e.g., ambulation, transfers, and wheelchair mobility);
- Stretching for improved flexibility;
- Instruction of family or caregivers;
- Modalities for pain relief and inflammation reduction;
- Modalities to allow gains of function, strength, balance or mobility; and/or
- Training in the use of orthotic/prosthetic devices.

3.5 OCCUPATIONAL THERAPY SERVICES

MDHHS uses the terms occupational therapy (OT), OT, and therapy interchangeably. OT is covered when furnished by a Medicaid-enrolled therapy provider and performed by:

- A licensed occupational therapist;
- A licensed occupational therapy assistant under the supervision of an occupational therapist (i.e., the occupational therapy assistant's services must follow the evaluation and treatment plan developed by the occupational therapist, and the occupational therapist must supervise and monitor the occupational therapy assistant's performance with continuous assessment of the beneficiary's progress). All documentation must be reviewed and signed by the appropriate supervising occupational therapist; or
- A student completing their clinical affiliation under the direct supervision of (i.e., in the presence of) a licensed occupational therapist. All documentation must be reviewed and signed by the supervising occupational therapist.

OT is considered an all-inclusive charge and MDHHS does not reimburse for a clinic room charge in addition to OT services unless it is unrelated. MDHHS expects occupational therapists and occupational therapy assistants to utilize the most ethically appropriate therapy within their scope of practice as defined by state law and/or the appropriate national professional association. OT must be medically necessary, reasonable and required to:

- Return the beneficiary to the functional level prior to illness or disability;
- Return the beneficiary to a functional level that is appropriate to a stable medical status; or
- Prevent a reduction in medical or functional status had the therapy not been provided.

MDHHS anticipates that OT will result in a functional improvement that is significant to the beneficiary's ability to perform appropriate daily living tasks (per beneficiary's chronological, developmental, or functional status). Functional improvements must be achieved in a reasonable amount of time and must be maintainable.

OT must be skilled (i.e., require the skills, knowledge and education of a licensed occupational therapist). MDHHS does not cover OT interventions provided by non-OT practitioners (e.g., teacher, RN, licensed physical therapist, family, or caregiver).

3.6 SPEECH LANGUAGE SERVICES

The terms speech therapy, speech-language pathology, speech-language therapy, and therapy are used to mean speech and language rehabilitation services and speech-language therapy.

MDHHS covers speech-language therapy provided in both transitional residential and outpatient settings. MDHHS only reimburses services for speech-language therapy when provided by:

- A speech-language pathologist (SLP) with a current license.
- An appropriately supervised SLP candidate (i.e., in their clinical fellowship year [CFY]). All documentation must be reviewed and signed by the appropriately credentialed supervising SLP.
- A student completing their clinical affiliation under direct supervision of (i.e., in the presence of) an SLP having a current license. All documentation must be reviewed and signed by the appropriately credentialed supervising SLP.

MDHHS expects that all SLPs will utilize the most ethically appropriate therapy within their scope of practice as defined by Michigan law and/or the appropriate national professional association.

Speech-language therapy must relate to a medical diagnosis, and is limited to services for:

- Articulation
- Language
- Fluency
- Swallowing
- Training in the use of a speech-generating device
- Training in the use of an oral-pharyngeal prosthesis
- Voice
- Cognition

Therapy must be reasonable, medically necessary and expected to result in an improvement and/or elimination of the stated problem within a reasonable amount of time (i.e., when treatment is due to a recent change in medical or functional status affecting speech and the beneficiary would experience a reduction in medical or functional status without therapy).

Speech-language therapy services must be skilled (i.e., require the skills, knowledge and education of a licensed SLP to assess the beneficiary for deficits, develop a treatment program and provide therapy). Interventions that could be provided by another practitioner (e.g., teacher, RN, licensed physical therapist, licensed occupational therapist, family member, or caregiver) would not be reimbursed as speech therapy by MDHHS. (Refer to the Therapy Services Chapter of this manual for additional information regarding therapy services.)

3.7 SOCIAL WORK SERVICES

Social work services include the provision of assistance and advocacy to improve the social and psychological functioning of the beneficiary.

MDHHS covers social work services provided in both transitional residential and outpatient settings. MDHHS only reimburses services for social work services when provided by:

- A social worker with a current Michigan license;
- An appropriately supervised social work candidate (i.e., in their clinical fellowship year) or having completed all requirements but has not obtained a license. All documentation must be reviewed and signed by the appropriately credentialed supervising Master of Social Work (MSW); or
- A student completing their clinical affiliation under direct supervision of (i.e., in the presence of) a licensed MSW. All documentation must be reviewed and signed by the appropriately credentialed supervising MSW.

Services may include, but are not limited to, advising family members and caregivers, providing patient education and counseling, beneficiary advocacy, making referrals to other services, case management interventions, and discharge planning.

3.8 BEHAVIORAL AND PSYCHOLOGICAL SERVICES

A diagnostic evaluation must be performed before the beneficiary receives behavioral and psychological services (BPS). The diagnostic evaluation is a thorough review of cognitive, behavioral, emotional, and social functioning, and includes validated evaluation tools. Based on the evaluation, the practitioner determines the beneficiary's diagnosis and recommends general treatment interventions. If appropriate, the practitioner refers the beneficiary to a comprehensive neuropsychological evaluation or medical evaluation with a psychiatrist for consideration of psychiatric medication (refer to the Neuropsychological Evaluation and the Psychiatry subsections below) for holistic treatment of the psychological condition(s).

The diagnostic evaluation is performed by a qualified licensed practitioner working within their scope of practice and who is qualified and experienced in diagnosing individuals with brain injuries.

A qualified licensed practitioner includes:

- a physician with a specialty in psychiatry;
- a physician with a specialty in behavioral health;
- a psychologist;
- a neuropsychologist; or
- a clinical social worker working within their scope of practice who is qualified and experienced in diagnosing behavioral health issues related to brain injuries.

Medical necessity and recommendation for BPS is determined by a physician or other licensed practitioner working within their scope of practice under state law. The beneficiary must demonstrate functional impairment in social, occupational, or other important areas of functioning, and/or report significant subjective distress associated with changes following the brain injury. Common cognitive, behavioral, emotional, and social changes following a brain injury require BPS to address the following areas:

Medicaid Provider Manual

- Trauma- and Stressor-Related Disorders:
 - in response to a traumatic event, individual experiences intrusive symptoms (recurrent distressing memories of the traumatic event, distressing dreams or flashbacks related to the traumatic event);
 - negative mood (persistent inability to experience positive emotions);
 - dissociative symptoms (altered sense of reality of one's surroundings or oneself);
 - inability to remember an important aspect of the traumatic event;
 - avoidance symptoms (efforts to avoid distressing memories, thoughts, or feelings about the traumatic event);
 - efforts to avoid external reminders of the traumatic event; and
 - arousal symptoms (sleep disturbance, irritable behavior, hypervigilance, problems with concentration, exaggerated startle response).
- Anxiety and Obsessive-Compulsive Disorders:
 - excessive fear or anxiety about a specific object or situation;
 - recurrent, unexpected panic attacks (abrupt surge of intense fear or intense discomfort);
 - marked fear or anxiety about using public transportation, being in open or enclosed spaces, being in a crowd, or being outside of the home alone;
 - difficulty controlling worry about a number of events or activities;
 - recurrent and persistent thoughts or urges that are intrusive and unwanted; and
 - repetitive behaviors performed in response to an obsession.
- Depressive Disorders:
 - depressed mood most of the day, nearly every day;
 - diminished interest or pleasure in activities;
 - weight fluctuations;
 - sleep pattern disruption;
 - psychomotor agitation or slowing;
 - fatigue or loss of energy;
 - feelings of worthlessness or excessive guilt;
 - diminished ability to think or concentrate;
 - recurrent thoughts of death; and
 - severe recurrent temper outbursts manifested verbally and/or behaviorally.
- Neurocognitive Disorders:
 - significant cognitive decline from a previous level of performance in areas of attention, executive function, learning and memory, language, perceptual-motor, or social cognition; and

Medicaid Provider Manual

- the cognitive deficits interfere with independence in everyday activities.
- Personality Disorders:
 - persistent personality disturbance due to a medical condition that may include affective lability, disinhibition, aggression, apathy, or paranoia; and
 - the disturbance causes distress or impairment in social, occupational, or other important areas of functioning.
- Somatic Symptoms and Related Disorders:
 - excessive thoughts, feelings, or behaviors related to the somatic symptoms or associated health concerns;
 - disproportionate and persistent thoughts about the symptoms;
 - high level of anxiety about the symptoms;
 - excessive time and energy devoted to these symptoms or health concerns;
 - symptoms of altered voluntary motor or sensory function (weakness, paralysis, tremors, speech difficulties, attacks or seizures, sensory loss); and
 - psychological or behavioral factors adversely affect the medical condition.

3.8.A. NEUROPSYCHOLOGICAL EVALUATION

A qualified licensed practitioner performing the initial evaluation for BPS may determine the need for a more comprehensive psychological evaluation by a neuropsychologist. The Neuropsychological Evaluation (NPE) is a comprehensive evaluation of cognitive, academic, emotional, social, and adaptive functioning using standardized measures. The NPE may assist with treatment planning, progress monitoring, academic or occupational planning, or necessity of a guardian or conservator. The NPE may be initiated immediately following the injury, at various points throughout treatment to monitor progress, or following the completion of treatment to plan for transition to the next step in the beneficiary's recovery.

3.8.B. PSYCHIATRY

A referral to a psychiatrist with experience in working with individuals with brain injuries may be a necessary component of rehabilitation. The beneficiary may experience significant disruption in social, occupational, or other areas of functioning, or may report significant emotional distress resulting from the injuries. Medication may be indicated for those beneficiaries whose symptoms are significantly impairing daily tasks, interfering with treatment engagement, or not responding to evidence-based interventions at a level expected for the provided treatment. These situations may warrant a referral for an evaluation by a psychiatrist for determination of an appropriate medication regimen.

3.8.C. PSYCHOLOGICAL TREATMENT

BPS includes a variety of behavioral interventions which have been identified as evidence-based by nationally recognized research reviews and other nationally recognized scientific and clinical evidence. BPS is designed to be delivered at a

Medicaid Provider Manual

frequency and intensity appropriate for the clinical presentation of the beneficiary. Behavioral intervention services include, but are not limited to, the following categories of evidence-based interventions:

- Cognitive Behavioral Therapy: Identifying maladaptive cognitions and patterns of behavior as a means of teaching healthy coping skills in response to stressful events.
- Exposure and Response Prevention: Systematically exposing the beneficiary to the stressful images, thoughts, or situations that provoke anxiety and teaching more adaptive responses.
- Acceptance and Commitment Therapy: Accepting thoughts and feelings as they are while identifying behaviors consistent with the beneficiary's values.
- Mindfulness-Based Treatment: Practicing a state of being psychologically present using meditation and breathing exercises to target depression and anxiety.
- Family Therapy: Teaching communication techniques and adaptability within the family unit to promote positive behaviors, connection to each other, and positive identity of each member.

The treatments and interventions listed above are not all-inclusive. BPS treatment services may also include other interventions supported by credible scientific or clinical evidence, as appropriate for each beneficiary. Based on the behavioral POC, which is adjusted over time based on progress monitoring, collaboration with other providers of care, and behavioral observations during treatment, the provider selects and adapts one or more of these services, as appropriate for the beneficiary.

3.9 REHABILITATION AIDE SERVICES

Rehabilitation Aide Services include unskilled assistance improving skills and functioning. The rehabilitation aide assists the beneficiary with meeting therapy goals and reinforcing skills learned during therapy sessions. A rehabilitation aide also provides personal care services, including help with bathing, toileting, and dressing.

SECTION 4 – APPEALS

MDHHS has established beneficiary and provider appeal processes that are applicable to BIS. The beneficiary appeals process conforms to the Medicaid fair hearing requirements found at 42 CFR Part 431, Subpart E of the Code of Federal Regulations. Provider appeal rights conform to the requirements of the Michigan Compiled Laws, MCL 400.1 et seq., and the administrative rules found at Michigan Administrative Code R 400.3402 through R 400.3425, as amended.

4.1 PARTICIPANT APPEALS

MDHHS has established notice and appeals requirements to which BIS providers must adhere when adverse action has been taken for program applicants or beneficiaries. According to 42 CFR 431.201, "Action" means a termination or suspension of Medicaid eligibility or of covered services. This also includes determinations by MDHHS that the applicant does not meet BIS eligibility criteria and other denials of Medicaid eligibility or of covered services. The beneficiary will be notified in writing of the negative action and the right to appeal.

4.1.A. ADEQUATE ACTION NOTICES

MDHHS HCBS staff will send an Adequate Action Notice to applicants or beneficiaries informing them of adverse actions and determinations taken under the following circumstances:

- when MDHHS staff determine applicants to be ineligible for BIS based upon the information provided in the application packet.
- when MDHHS staff determine an individual receiving BIS will have services end as planned in the authorization.
- when an existing benefit is reduced, suspended or terminated and meets the requirements for an exception from an Advance Action Notice as specified in 42 CFR 431.213.

BIS providers must confer with MDHHS HCBS staff prior to refusing, refusing to increase, or reducing services. MDHHS makes the final determination on furnishing, reducing, and refusing services. Upon approval of an adverse action, MDHHS HCBS staff must send an Adequate Action Notice to applicants or beneficiaries informing them of adverse actions and determinations taken under the following circumstances:

- when the provider refuses to furnish a requested service to a program applicant.
- when the provider refuses to increase a service that is currently being provided to the beneficiary.
- when the provider reduces a service that is currently being provided to the beneficiary and this reduction follows the approved POC for the beneficiary.

Medicaid Provider Manual

4.1.B. ADVANCE ACTION NOTICES

An Advance Action Notice must be sent to BIS beneficiaries when action is being taken to reduce, suspend or terminate service(s) a beneficiary currently receives. This notice must be provided 10 days in advance of the intended action.

MDHHS HCBS staff will send an Advance Action Notice to beneficiaries informing them of adverse actions and determinations taken under the following circumstances:

- When MDHHS staff determine the beneficiary is making progress toward goals and will be discharged from BIS.
- When MDHHS staff determine an individual no longer qualifies for BIS.
- When the provider (with permission from MDHHS) plans to reduce or terminate a service that is currently being provided to the beneficiary before the POC indicates.

The Advance Action Notice must inform the beneficiary that services will not be reduced, suspended or terminated until a formal decision has been rendered through the Medicaid Fair Hearings process if the beneficiary formally requests a hearing before the specified date of the intended action.

4.1.C. REQUEST FOR HEARING FORM

MDHHS will supply a copy of the Request for Hearing form (DCH-0092) and a return envelope with each notice sent to an applicant or beneficiary, or any time an applicant or beneficiary requests such material. Providers are required to assist applicants or beneficiaries who request help in filing a formal appeal for any reason through the Medicaid Fair Hearings process.

4.1.D. REPRESENTATION AT STATE FAIR HEARING

Both a BIS provider representative and a MDHHS HCBS Section or Long Term Care Policy Section representative must be present at the hearing. The BIS provider will be expected to participate in the State Fair Hearings process to support medical documentation used to make determinations related to the hearing request.

SECTION 5 – PROVIDERS

5.1 PROVIDER QUALIFICATIONS

In addition to provider qualifications identified above in the Covered Services section, all providers for BIS must have appropriate accreditation, certifications, or specialized training in serving individuals with brain injuries.

5.1.A. ACCREDITATION, CERTIFICATION, OR SPECIALIZED TRAINING

Appropriate accreditation, certification, or specialized training includes:

- Accreditation by the Commission on Accreditation of Rehabilitation Facilities (CARF) with:
 - Medical Rehabilitation accreditation as a brain injury specialty residential program;
 - Medical Rehabilitation accreditation as a brain injury specialty interdisciplinary outpatient service; or
 - Medical Rehabilitation accreditation as a brain injury specialty residential program and interdisciplinary outpatient services.
- Medicare and Medicaid certification as a Comprehensive Outpatient Rehabilitation Facility (CORF).
- Medicare accreditation as a Rehabilitation Agency or Outpatient Physical Therapy program as verified by the American Association for Accreditation of Ambulatory Surgery Facilities (AAAASF).
- In areas of the state where there are limited providers with CARF, CORF, or AAAASF accreditation or certification, MDHHS may allow individual providers who are certified as Brain Injury Specialists (CBIS) through the Brain Injury Association of America's Academy of Certified Brain Injury Specialists (ACBIS) and who work in a health care program with additional licensing or accreditation to become brain injury providers.

5.1.B. PROVIDER ENROLLMENT IN CHAMPS

All providers must follow provider enrollment requirements as specified in the General Information for Providers chapter of this manual, including business location, provider ownership and control disclosures, criminal offense notification, and enrollment screening.

5.1.C. TRANSITIONAL RESIDENTIAL PROVIDER REQUIREMENTS

Transitional Residential services must be conducted in facilities licensed by MDHHS as adult foster care (AFC) facilities.

5.1.C.1. LICENSURE REQUIREMENTS

All AFC homes must maintain current licensure and follow all licensing rules and regulations, including staff qualifications and training. Direct care staff will provide supportive services for each beneficiary 24 hours a day. The ratio of direct care staff is

Medicaid Provider Manual

required to meet the acuity needs of the beneficiaries, but will not be less than one staff to five residents on day and evening shifts and one staff to eight residents during sleeping hours. Substitute employees may only be used in the case of an unexpected staff shortage. The continuity and consistency of the residents' care must be preserved to ensure maximum restorative rehabilitation progress.

5.1.C.2. ADDITIONAL STAFFING REQUIREMENTS

- A Michigan-licensed therapist must be on the premises during the time therapy is provided.
- A Michigan-licensed RN must be available for health assessments, treatments, and other nursing needs required by the residents.
- A Michigan-licensed social worker must be available for assisting in discharge planning, counseling, or other needs.
- Psychiatrists, neuropsychologists, psychologists, and other specialists must be available for consultation and treatment as needed. Evidence of appropriate availability must be documented.

5.1.C.3. PROVIDER CASE RECORD REQUIREMENTS

All BIS providers are required to keep case records for each beneficiary served according to acceptable standards of practice.

Medicaid Provider Manual

SECTION 6 – REIMBURSEMENT

Reimbursement for Transitional Residential BIS will be according to per diem rates, negotiated with the BIS providers, which reflect the service needs of the beneficiary and a reasonable cost basis for the services rendered. PA is required for the Transitional Residential BIS per diem reimbursement. Requests for PA are submitted for days of services, not for individual services (for example, PA request is for 60 days of BIS, regardless of services provided). Providers should contact the MDHHS HCBS Section regarding BIS authorization requirements. (Refer to the Prior Authorization section of the General Information for Providers chapter of this manual for additional information.)

Reimbursement for Outpatient BIS will be according to a published fee schedule based upon the services received by the beneficiary. PA is required for Outpatient BIS reimbursement. Requests for PA are submitted for individual services for a specified duration (for example, PA request is for 30 days of physical therapy BIS for eight 15-minute units per day). Providers should contact the MDHHS HCBS Section regarding BIS authorization requirements. (Refer to the Prior Authorization section of the General Information for Providers chapter of this manual for additional information.)

6.1 EXCLUDED PAYMENTS

BIS does not include payment for room and board. “Room” is defined as rent and lodging expenses. “Board” is defined as three meals per day, regardless of the method of intake for those meals.

BIS also excludes educational services, such as tutoring assistance and school-based services, and vocational services, such as services to train or build skills for the support of the individual’s employment. These services are available to qualified Medicaid beneficiaries through other Medicaid programs and services.

6.2 BILLING REQUIREMENTS

BIS providers must follow the requirements of the Billing & Reimbursement for Institutional Providers and the Billing & Reimbursement for Professionals chapters of this manual.

6.3 BILLING BENEFICIARIES

BIS providers are not allowed to bill Medicaid beneficiaries for services authorized by MDHHS. Additional information about billing beneficiaries is found in the Billing Beneficiaries section of the General Information for Providers chapter of this manual.

SECTION 1 – GENERAL INFORMATION

CSHCS is mandated by the Michigan Public Health Code, Public Act 368 of 1978, Part 58, children and youth with special health care needs (MCL 333.5801 – 333.5879), in cooperation with the federal government under Title V of the Social Security Act, Sec. 501. [42 U.S.C. 701] (a) 1 (D) and the annual Michigan Department of Health and Human Services (MDHHS) Appropriations Act. CSHCS is a separate program from Medicaid.

However, CSHCS partners closely with the Medicaid program regarding the use of the Medicaid system. This allows for greater efficiency in administering the two programs and allows both programs to collaborate on the care of a beneficiary to avert duplication of services. CSHCS does not pay for Medicaid-covered services that have been denied by Medicaid.

CSHCS is charged by the Social Security Act, Title V, Maternal and Child Health Office with promoting the development of systems of care that are family-centered, community-based, coordinated, and culturally-competent with a focus on health equity. CSHCS strives for having the most appropriate pediatric subspecialists and services that are identified by combining the family's expertise regarding their child and the condition, the medical services provider, MDHHS medical expertise, and CSHCS policy and program intent.

CSHCS increases access to resources and supports for the families and beneficiaries. Services occur in partnership, recognizing the family as the constant in the child's life. The goal is to reduce or eliminate barriers that are inherent to the condition. This, in turn, is intended to increase the quality of life for the beneficiary and the family. This family-centered approach impacts the level of independence most beneficiaries are able to achieve.

CSHCS identifies children with special health care needs when the child appears to have a condition that CSHCS may cover. CSHCS does not cover behavioral, developmental or mental health conditions. The child's pediatric subspecialist submits medical reports to CSHCS for determination of medical eligibility. When the child does not have a pediatric subspecialist and there is no other option to obtain a medical report (i.e., private insurance, Medicaid, etc.), CSHCS pays for a diagnostic evaluation of medical conditions that are likely to be covered by CSHCS. The beneficiary may be diagnosed with a CSHCS covered condition, which is the first step toward CSHCS eligibility but is not the only criterion. The condition must also meet chronicity, medical severity criteria, and the need for treatment by a pediatric subspecialist before the beneficiary can be determined medically eligible for CSHCS. Unlike other programs, there are no financial criteria that would limit eligibility for CSHCS. Eligibility is determined based upon medical circumstances and not on financial circumstances. Medical eligibility (and allowable citizenship/permanent residency status) must be established by MDHHS before the beneficiary can enroll in CSHCS.

Once enrolled, CSHCS covers pediatric specialty medical treatment (adult specialty for the few enrolled adults) related to the qualifying condition. Care is limited to the qualifying diagnosis and related conditions. The limitation occurs by authorizing particular specialty providers for each child and having the authorized provider(s) order additional services, such as therapies, lab tests, etc., as needed as related to their specialty. Providers who are not CSHCS-authorized are not eligible for reimbursement. CSHCS does not cover primary care or condition-related care delivered by a primary care provider.

Medicaid Provider Manual

NOTE: CSHCS and Medicaid interface – CSHCS follows Medicaid policy except where specified in this chapter. Many of the CSHCS processes (e.g., prior authorizations, medical determinations, claims, etc.) are integrated into the Medicaid system and processes for CSHCS beneficiaries.

CSHCS strives to enroll CSHCS beneficiaries into Medicaid when they are eligible in order to access the broader range of medical services that are covered by Medicaid.

CSHCS also partners with Medicaid when beneficiaries have both CSHCS and Medicaid. Most beneficiaries who also have Medicaid are required to enroll with a Medicaid Health Plan. Under this situation, medical coverage is subject to the Medicaid rules. CSHCS can, at times, provide additional services beyond what is available through the Medicaid benefit package. These services include care coordination, the development of a plan of care in which the family participates, referral to appropriate medical providers, and assistance with locating, accessing, and navigating community support services, etc.

SECTION 2 – CSHCS PROVIDERS: APPROVED/AUTHORIZED

In addition to enrollment with the Michigan Medicaid Program, physicians and hospitals serving beneficiaries must meet criteria to serve as a CSHCS specialty care provider. The criteria are detailed in the CSHCS Approved Providers subsection below.

All providers must comply with Medicaid policies and requirements, including prior authorization requirements described elsewhere in this manual.

For beneficiaries without Medicaid/MiChild/Healthy Michigan Plan coverage, approved physicians and/or hospitals (including hospital-owned ambulance and hospice agencies) must also be authorized by CSHCS to provide medical services related to the beneficiary's CSHCS qualifying condition. (Refer to the CSHCS Authorized Providers subsection for authorization requirements.)

2.1 CSHCS APPROVED PROVIDERS

2.1.A. PHYSICIANS

Physicians desiring to be CSHCS approved specialty care providers must:

- Be licensed to practice as a doctor of medicine (MD) or osteopathy (DO) by the state where the service is performed.
- Have successfully completed medical residency.
- Possess Specialty Board Certification. (Board eligible physicians in the process of completing certification requirements may be provisionally approved.)
- Be enrolled in the Michigan Medicaid program. (Refer to the General Information for Providers Chapter of this manual for additional information.)
- Have clinical privileges in a CSHCS approved hospital/facility.
- Have documented clinical training or experience with children who have diagnoses eligible for CSHCS services. A physician not having experience treating infants and young children may be conditionally approved to supervise the care of children over 12 years of age.

2.1.B. HOSPITALS

Hospitals desiring to be CSHCS approved must:

- Be enrolled in the Michigan Medicaid program (refer to the General Information for Providers Chapter of this manual for additional information);
- Have an organized Pediatrics Unit with an average daily census of six (6) or greater; and
- Have a Pediatrics Department identified in the medical staff structure.

Exceptions:

- Local laboratory and/or local imaging services ordered by the CSHCS subspecialist during the hospital visit and emergency care are not required to meet the organized Pediatrics Unit requirement, as stated above.
- Emergency services do not require an order by the CSHCS subspecialist.

2.2 CSHCS AUTHORIZED PROVIDERS

The following requirements apply only to providers serving CSHCS beneficiaries who do not also have Medicaid/MiChild/Healthy Michigan Plan coverage:

- An authorized provider is an approved physician and/or hospital that is specifically identified on the CSHCS system as a provider for a specific beneficiary. (Refer to the CSHCS Approved Providers subsection for participation requirements.)
- CSHCS authorization of a provider is the step that allows for reimbursement for medical services rendered that are related to the CSHCS qualified condition(s).
- To become CSHCS authorized for a specific beneficiary, the family or the provider contacts the county health department in which the beneficiary lives.

Providers serving beneficiaries with CSHCS who also have Medicaid/MiChild/Healthy Michigan Plan coverages do not need to be authorized.

2.3 PROVIDERS WHO DO NOT NEED TO BE CSHCS AUTHORIZED

Non-physician providers typically do not need CSHCS authorization to render services to a beneficiary (except for hospital-owned ambulances and hospice agencies).

These providers may render services (and be reimbursed) when ordered or prescribed by a CSHCS authorized provider and the services are related to the beneficiary's CSHCS qualifying diagnosis.

The National Provider Identifier (NPI) number of the CSHCS authorized ordering or prescribing provider must be entered in the appropriate field on the claim.

2.4 VERIFYING PROVIDER AUTHORIZATION

Authorized provider and diagnosis information can be obtained from the beneficiary's Client Eligibility Notice. The CHAMPS Eligibility Inquiry and/or HIPAA 270/271 transaction will also indicate if the inquiring provider NPI number is authorized to render CSHCS services for the beneficiary on that date of service. Providers will receive the Benefit Plan ID of CSHCS along with one of the following messages in the eligibility response:

- This NPI is listed. See CSHCS guidelines.
- This NPI is not listed. See CSHCS guidelines.

(Refer to the Verifying Beneficiary Eligibility section of the Beneficiary Eligibility chapter for additional information.)

2.5 CHILDREN'S MULTI-DISCIPLINARY SPECIALTY (CMDS) CLINIC REQUIREMENTS

CMDS clinics are required to operate under the authority of hospitals or medical universities. Hospitals and medical universities requesting CMDS clinic designation must adhere to the requirements as stated in this policy and acquire approval and oversight from the CSHCS program. Hospitals and medical universities that administer CMDS clinics require a separate National Provider Identifier (NPI) number with which to enroll and submit claims specifically for the CMDS clinic fee.

CSHCS-approved organizations with responsibility for CMDS clinics must enroll through the online MDHHS CHAMPS Provider Enrollment (PE) subsystem to be reimbursed for clinic fees for services rendered to eligible beneficiaries. Each CMDS clinic must operate under the unique CMDS National Provider Identifier (NPI) held by the organization responsible for those CMDS clinics and must identify the providers who render the services in the CMDS clinic as affiliated providers. All affiliated providers whose services are directly reimbursable per MDHHS policy must be separately enrolled in CHAMPS and must also receive a beneficiary-specific authorization from CSHCS prior to the clinic billing for the clinic fees.

Refer to the General Information for Providers chapter for additional provider enrollment information.

SECTION 3 – MEDICAL ELIGIBILITY

CSHCS covers over 2,700 medical diagnoses that are handicapping in nature and require care by a medical or surgical subspecialist. A current list of covered diagnoses is maintained on the MDHHS website. (Refer to the Directory Appendix for website information.) Diagnosis alone does not guarantee medical eligibility for CSHCS. To be medically eligible, the individual must:

- Have at least one of the CSHCS qualifying diagnoses.
- Be within the age limits of the program:
 - Under the age of 26; or
 - Age 26 and above with cystic fibrosis, hereditary coagulation defects commonly known as hemophilia, or hereditary red blood cell disorders commonly known as sickle cell disease.
- Meet the medical evaluation criteria during the required medical review period as determined by a MDHHS medical consultant regarding the level of severity, chronicity and need for treatment. (Refer to the Medical Renewal Period subsection of the Coverage Period section of this chapter.)

A MDHHS medical consultant conducts the medical determination by reviewing the written report of a physician subspecialist. The medical information may be provided to CSHCS in the form of a comprehensive letter, hospital consultation or summary, or the Medical Eligibility Report Form (MERF) (MSA-4114). (A copy of the form is available in the Forms Appendix.) Medical information is reviewed in the context of current standards of care, as interpreted by a MDHHS medical consultant. All of the criteria described below must be met for the individual to be considered medically eligible:

Diagnosis	The individual must have a CSHCS qualifying diagnosis where their activity is or may become so restricted by disease or other medical condition as to reduce their normal capacity for education and self-support. Psychiatric, emotional and behavioral disorders, attention deficit disorder, developmental delay, intellectual disability, autism, or other mental health diagnoses are not conditions covered by the CSHCS Program.
Severity of Condition	The severity criteria is met when it is determined by the MDHHS medical consultant that specialty medical care is needed to prevent, delay, or significantly reduce the risk of activity becoming so restricted by disease or other medical condition as to reduce the individual's normal capacity for education and self-support.
Chronicity of Condition	A condition is considered to be chronic when it is determined to require specialty medical care for not less than 12 months.
Need for Treatment by a Physician Subspecialist	The condition must require treatment by a medical and/or surgical subspecialist at least annually, as opposed to being managed exclusively by a primary care physician.

Medicaid Provider Manual

CSHCS covers diagnostic evaluations for individuals when symptoms and history indicate the possibility of a CSHCS qualifying condition but the appropriate medical information cannot be obtained from their current provider(s). Diagnostic evaluations are to determine whether an individual meets the medical eligibility criteria for CSHCS, not for providing treatment. The local health department (LHD) assists in obtaining these diagnostic evaluations. Treatment is not a CSHCS benefit until a qualifying diagnosis is established and the individual has enrolled in the CSHCS Program. Individuals currently enrolled in a commercial Health Maintenance Organization (HMO), Medicaid Health Plan (MHP), or with other commercial insurance coverage must seek an evaluation by an appropriate physician subspecialist through the network of the respective health plan or health insurance carrier to provide medical documentation of a CSHCS qualifying diagnosis.

Medical information submitted for the purpose of renewing CSHCS eligibility is generally considered current when it is no more than 12 months old. Initial determination of medical eligibility may require reports that are more current to document the individual's current medical status.

Covered medical diagnostic categories include, but are not limited to:

- Cardiovascular Disorders
- Certain chronic conditions peculiar to newborn infants
- Congenital anomalies
- Digestive Disorders
- Endocrine Disorders
- Genito-Urinary Disorders
- Immune Disorders
- Late effects of injuries and poisonings
- Musculoskeletal Disorders
- Neoplastic Diseases
- Neurologic Disorders
- Oncologic and Hematologic Disorders
- Respiratory Disorders
- Special Senses (e.g., vision, hearing)

CSHCS does not cover acute/specialty care that is not related to the CSHCS qualifying diagnosis. CSHCS also does not cover mental health care, primary care, well child visits, or immunizations (with the exception of seasonal influenza and COVID-19). Examples of diagnoses, conditions or procedures not covered include, but are not limited to:

- Acne
- Allergies, without anaphylaxis
- Anorexia Nervosa
- Appendicitis
- Attention Deficit Disorder
- Autism
- Behavioral Problems
- Bronchitis (acute), croup
- Childhood Illnesses (measles, mumps, chicken pox, scarlet fever, etc.)
- Cosmetic Surgery
- Depression
- Developmental Delay
- Headache, migraines
- Hernia (inguinal or umbilical)
- In utero treatment
- Pneumonia
- Refractive Errors and Astigmatism
- Sinusitis
- Tonsillitis, strep throat

SECTION 4 – APPLICATION PROCESS

When the MDHHS medical consultant determines the individual is medically eligible for CSHCS, MDHHS sends the individual a Children’s Special Health Care Services Application (MSA-0737). The individual must complete the application and return it to MDHHS to be considered for enrollment in the program. (Refer to the Directory Appendix for contact information.) Applications submitted by the family cannot be processed until medical eligibility has been determined by MDHHS.

Applications must be signed by the medically eligible individual (when legally responsible for self) or the person(s) who is legally responsible for the individual. Verification of court-appointed guardianship may be required.

Stepparents are not considered the legally responsible persons to sign the application unless the stepparent is in the legal process of adopting the child or is the child’s court-appointed guardian.

The application must be completed and submitted to MDHHS as directed on the application form. MDHHS will notify the individual by mail if the application is incomplete and cannot be processed. The individual has 30 calendar days from the date of the MDHHS letter to submit the required information in order to preserve the initial coverage date. Failure to submit the required information within the required time frame may result in the coverage date being delayed.

When a medical report is submitted to CSHCS on behalf of a beneficiary with full Medicaid, MICHild or Healthy Michigan Plan coverage, and the CSHCS medical consultant determines that the beneficiary is medically eligible for CSHCS, the beneficiary is automatically enrolled in CSHCS without completing the CSHCS application.

SECTION 5 – FINANCIAL DETERMINATION

MDHHS reviews the CSHCS Income Review/Payment Agreement (MSA-0738) submitted by all* individuals to evaluate the family/individual financial resources. The review serves to:

- Determine whether the family/individual income is sufficient to establish a payment agreement to pay toward the costs of the medical care received through CSHCS.
- Aid in identifying additional services or benefits for which the family/individual may be eligible.

5.1 FINANCIAL DETERMINATION PROCESS

Families/individuals are exempt from a payment agreement if at least one of the following applies:

- The beneficiary to be covered has full Medicaid coverage or is enrolled in MICHild or the Healthy Michigan Plan;
- The beneficiary is a ward of the county or state;
- The beneficiary lives in a foster home or a private placement agency;
- The beneficiary has a court-appointed guardian; or
- The beneficiary is deceased (retroactive coverage).

When more than one individual in the family is applying for CSHCS coverage, or already has CSHCS coverage, each individual must be determined exempt as indicated above for the family to be exempt. When any individual in the family fails to meet the exemption criteria, the family will have a payment agreement.

The MSA-0738 must be completed and submitted, when applicable, either indicating the family/individual status is exempt from a payment agreement, or with the responsible party's income and family size as reported on the federal income tax return (Form 1040, 1040A, or 1040EZ) from the previous year. If no federal income tax return is available, families may contact the local health department (LHD) or the CSHCS Family Phone Line for further assistance. (Refer to the Directory Appendix for contact information.)

5.2 VERIFICATION OF INCOME

Families/individuals self declare income at the time of CSHCS application and renewal. Periodic reviews of randomly selected family/individual financial documentation are conducted. When the information submitted is problematic to completing the payment participation determination, or when a family/individual is randomly selected for verification of income, their federal income tax return may be requested. When the federal income tax return is not available, the family/individual may contact the LHD or CSHCS Family Phone Line for further assistance. (Refer to the Directory Appendix for contact information.)

* Individuals determined medically eligible based on documentation submitted by their Medicaid Health Plan (MHP) are not required to submit the MSA-0738 as MHP enrollment is pre-verification of Medicaid coverage resulting in exemption from a payment agreement.

5.3 PAYMENT AGREEMENT

CSHCS is required to determine a family's/individual's ability to pay toward the cost of the individual's care through the financial determination process. Those determined to be exempt from payment participation, as described in the Financial Determination Process subsection, are not required to pay toward the cost of care covered by CSHCS. The family/individual payment amount is established based on the income and family size reported by the responsible party on their most recent federal income tax return as indicated on the CSHCS Payment Agreement Guide (MSA-0738-B). The income is applied to a tiered scale to determine the amount of the payment agreement. The MSA-0738-B is updated at least annually.

Financial reviews occur and new payment agreements are redetermined annually and implemented (if still applicable) according to the beneficiary's CSHCS coverage period.

The MSA-0738 must be signed by the responsible party for CSHCS coverage to be implemented. The amount of the payment agreement is the total family/beneficiary financial obligation for one year, regardless of the number of family members with CSHCS coverage. The total amount of the financial obligation is due upon receipt of the payment agreement notification. The family/beneficiary is responsible for the total amount even if CSHCS coverage ends.

If a family experiences a change in income or family size during the year, they are encouraged to work with the LHD to submit an Income Review/Payment Agreement Amendment (MSA-0927). A refund may be available if the fees paid are greater than the amount due indicated on the amendment. Refunds may be prorated up to 12 months to the date of the event, though not further than the beginning of the current MSA-0738 agreement period. Payment agreement adjustments may not be applied to previous agreements. All other payments are non-refundable.

Beneficiaries who acquire full Medicaid, MICHild, or Healthy Michigan Plan coverage after enrollment into CSHCS will be reimbursed in full for any money paid toward the payment agreement that is in place for the current CSHCS coverage period. Unpaid balances may be forgiven and CSHCS coverage continued when the beneficiary has acquired full Medicaid, MICHild, or Healthy Michigan Plan coverage. Beneficiaries can call the local health department or the CSHCS Family Phone Line to request assistance with the CSHCS payment agreement. (Refer to the Directory Appendix for contact information.)

When death of a beneficiary occurs during the beneficiary's CSHCS coverage period, a notice is sent to the family that the unpaid balance is forgiven. When the family notifies MDHHS that the payment agreement has been paid ahead, in part or in full, MDHHS pro-rates the monthly amount related to the coverage period for which the beneficiary is no longer covered due to death. The family is reimbursed the pro-rated amount. When death of a beneficiary occurs and one or more of the surviving family members have CSHCS coverage, the payment agreement remains intact for the remaining family members.

A family/beneficiary may have no more than two outstanding years of incomplete or unpaid payment agreements. The family/beneficiary will not receive CSHCS coverage under a third year of a payment agreement until the oldest payment agreement obligation has been met.

Medicaid Provider Manual

When the beneficiary reaches the age of majority, or otherwise becomes emancipated, outstanding payment agreements remain with the family who entered into the original agreement. When a beneficiary acquires Medicaid, MICHild, or Healthy Michigan Plan coverage after the beneficiary reaches the age of majority, the current payment agreement entered into by the family while the beneficiary was a minor does not qualify for forgiveness of balance or return of money. The income of the legally independent beneficiary is not assessed for a payment agreement until the beneficiary's next CSHCS renewal period.

SECTION 6 – OTHER ELIGIBILITY CONSIDERATIONS

6.1 CITIZENSHIP STATUS

The individual, parent of a minor, or court-appointed guardian of the individual must be a citizen of the U.S., a noncitizen lawfully admitted for permanent residence, or a lawfully admitted migrant farm worker (i.e., temporary agricultural worker). Any individual born in the United States who meets all other program eligibility criteria is deemed eligible regardless of the citizenship status of the parents/court-appointed guardian.

- Noncitizens who have been granted admission to the U.S. for a temporary or specific period of time are not eligible for CSHCS coverage other than as specified below.
- MDHHS requires a statement of citizenship status from the family if the information is unclear from the application.
- MDHHS may request verification of citizenship or permanent resident status.

There are some exceptions by the U.S. Citizenship and Immigration Services (USCIS) that allow legal status for individuals with specific reasons for nonpermanent entry in the U.S who are recognized as potentially eligible for full Medicaid coverage (as opposed to Emergency Services Only coverage). CSHCS recognizes the same individuals for coverage when all other CSHCS qualifying criteria are met.

6.2 RESIDENCY

The individual, parent, court-appointed guardian, or foster parent of the individual must be:

- A Michigan resident(s); or
- Working or looking for a job in Michigan, and living in Michigan (including migrant status); or
- In Michigan with the clear intent to make Michigan their home.

A Michigan resident who is temporarily absent from the state (e.g., out-of-state college attendance, member of a family stationed out-of-state for military service, or other extenuating circumstances allowed by MDHHS) and agrees to return to Michigan at least annually for subspecialty medical treatment of the qualifying diagnosis(es) meets the criteria for residency.

CSHCS does not issue or maintain coverage when the individual is known to be out-of-state (except for the circumstances listed above) even if the parent, court-appointed guardian or foster parent meets the criteria for residency.

CSHCS does not issue or maintain coverage when the individual is known to reside in a long term care facility whose rate of payment includes medical care and treatment (e.g., nursing facility, ICF/IID, inpatient psychiatric hospitals, etc.). The individual can re-apply for CSHCS coverage or have CSHCS coverage reinstated when the living arrangement changes and all other eligibility criteria are met.

SECTION 7 – EFFECTIVE DATE

The effective date of CSHCS coverage is dependent upon the date of the event that medically qualifies the individual for CSHCS. The CSHCS begin date is the first day of the month of this qualifying event, and may be retroactive up to six (6) months from the date MDHHS receives all necessary documentation that results in a final determination of CSHCS eligibility.

When application information is missing, the individual has 30 days from the date of the letter sent from MDHHS requesting the missing information to submit* the information in order to preserve the initial effective date of coverage. If the information is not submitted within 30 days, the effective date of coverage may be retroactive up to six (6) months from the date the required information has been submitted. Retroactive coverage does not guarantee that providers of services already rendered will accept CSHCS payment.

CSHCS does not reimburse families directly for payments made to providers.

Families/individuals are required to provide complete and accurate information at the time of application and as circumstances change. At a minimum, changes in address and insurance must be reported as they occur.

* Submission date is considered the date the document is received by CSHCS.

SECTION 8 – COVERAGE PERIOD

Upon completion of the application or renewal process requirement (as specified below), CSHCS coverage is typically issued in 12-month increments.

Families/beneficiaries are required to provide updated financial information during the annual renewal of the coverage period to determine financial participation with the CSHCS Program. Those with Medicaid, MICHild, or Healthy Michigan Plan coverage are determined complete in the annual financial review each year those circumstances remain true. Beneficiaries are requested to provide updated information during the annual renewal of the coverage period regarding current providers, address, other insurance, etc.

Beneficiaries are required to apply for MICHild/Healthy Kids/Healthy Michigan Plan coverage when the Income Review/Payment Agreement (MSA-0738) indicates the beneficiary may be eligible for one of these programs based on age and family income. The Income Review/Payment Agreement is submitted at the time of the initial CSHCS application or renewal (refer to the Payment Agreement subsection). A CSHCS temporary eligibility period (TEP) of 90 days is activated to allow the family time to complete the MICHild/Healthy Kids/Healthy Michigan Plan application process.

Upon notification that the family has completed the MICHild/Healthy Kids/Healthy Michigan Plan application process, CSHCS coverage is extended to complete the full 12-month enrollment period from the initial coverage date (begin date of the TEP), regardless of the MICHild/Healthy Kids/ Healthy Michigan Plan eligibility decision. CSHCS coverage terminates at the end of the 90-day TEP if the family fails to submit the application for one of these programs.

All coverage periods end on the last day of a month, or the beneficiary's 26th birthday if the beneficiary does not have a qualifying diagnosis that is covered beyond age 26.

8.1 MEDICAL RENEWAL PERIOD

The CSHCS medical renewal period is established at one year, two years, three years, or five years, depending upon the CSHCS primary diagnosis. Medical reports for renewal of coverage (refer to the Renewal of Coverage subsection within this section) are required consistent with the timeframes indicated by the CSHCS medical renewal period.

When the beneficiary has more than one CSHCS qualifying diagnosis, the diagnosis determined by MDHHS to be primary is used to determine the time interval for required medical information to be submitted for all covered diagnoses. This results in a single periodic medical review process per beneficiary. When the medical review process results in the elimination of one of the qualifying diagnoses while maintaining another diagnosis, the new coverage period is based on the timeframe associated with the new primary diagnosis.

Example: Beneficiary has three diagnoses, each related to a different medical review period. All new medical information is required according to the medical renewal time period of the primary diagnosis.

A change of primary diagnosis during the medical renewal period does not change the time period unless and until the current medical renewal period has been completed and a new one is established.

8.2 PARTIAL MONTH COVERAGE

If a beneficiary enters or leaves a facility that is not a covered facility (e.g., nursing facility, or intermediate care facility) during a month of eligibility, the beneficiary remains a beneficiary for the remainder of that month. However, services provided to the beneficiary while in the facility are not covered (i.e., reimbursable) by CSHCS as these facilities are responsible for providing the medical care. (Refer to the General Information for Providers Chapter in this manual for additional information for beneficiaries who also have Medicaid coverage.)

8.3 RENEWAL OF COVERAGE

The beneficiary's coverage may be renewed as needed if all eligibility criteria continue to be met and the family completes the renewal process. Medical review reports are required according to the timeframes established based on the primary diagnosis for the beneficiary. An annual financial review is also required. If all of the criteria continue to be met for CSHCS coverage, a new coverage period is typically issued in 12-month increments.

SECTION 9 – BENEFITS

CSHCS covers services that are medically necessary, related to the beneficiary's qualifying diagnosis(es), and ordered by the beneficiary's CSHCS authorized specialist(s) or subspecialist(s). Services are covered and reimbursed according to Medicaid policy unless otherwise stated in this chapter.

The primary CSHCS benefits may include:

- Ambulance
- Care Coordination*
- Case Management*
- Dental (General and Enhanced)
- Dietary Formulas (limited)
- Durable Medical Equipment (DME)
- Emergency Department (ED)
- Hearing and Hearing Aids
- Home Health (intermittent visits)
- Hospice*
- Hospital at approved sites (Inpatient/Outpatient)
- Laboratory Tests
- Medical Supplies
- Monitoring Devices (Nonroutine)
- Office Visits to CSHCS Authorized Physicians
- Orthopedic Shoes
- Orthotics and Prosthetics
- Parenteral Nutrition
- Pharmacy
- Physical/Occupational/Speech Therapy
- Radiological Procedures
- Respite*
- Telemedicine
- Transplants and Implants
- Vision

(* Refer to the information and authorization requirements stated in this Section.)

Private Duty Nursing (PDN) may be available for beneficiaries who also have Medicaid coverage.

9.1 CSHCS DENTAL BENEFITS

CSHCS beneficiaries who have a qualifying diagnosis affecting the oral cavity may be eligible to receive select dental services based on the specific diagnoses and treatment plan. All CSHCS beneficiaries do not automatically qualify for dental benefits. Covered services may include general dental services, CSHCS enhanced dental services, or both.

- CSHCS general dental services are services covered under the Medicaid dental benefit.
- CSHCS enhanced dental services are additional services covered by the CSHCS program that are not covered by Medicaid.

9.1.A. CSHCS GENERAL DENTAL SERVICES

CSHCS general dental services may be covered for CSHCS enrollees when related to the CSHCS qualifying diagnosis. Examples of CSHCS qualifying diagnoses eligible for general dental services are identified below. The list is not all inclusive:

- Chemotherapy or radiation which results in significant dental side effects
- Cleft lip/palate/facial anomaly
- Convulsive disorders with gum hypertrophy
- Cystic Fibrosis
- Hemophilia and/or other coagulation disorders
- Pre- and post-transplant
- Sickle Cell disease

CSHCS general dental services are those services covered under the Medicaid dental benefit. Services may include diagnostic, preventive, restorative, endodontics, prosthodontics, and oral surgery. The general dental benefit may include services performed by dental specialists (e.g., endodontists, oral surgeons, etc.). General dental services follow Medicaid coverage parameters, including frequency limits, prior authorization requirements, and age restrictions.

To request approval as a CSHCS General Dentistry provider, dentists must contact MDHHS. (Refer to the Directory Appendix for contact information.)

Hospital charges (e.g., general anesthesia, facility charges, etc.) may be covered for dental services provided through the inpatient or outpatient hospital facility for beneficiaries with certain CSHCS diagnoses, including cases where CSHCS does not cover the dental care itself.

9.1.B. CSHCS ENHANCED DENTAL SERVICES

CSHCS enhanced dental services are additional services covered by the CSHCS program that are not covered by Medicaid. Examples of enhanced dental services may include orthodontics, dental implants, and augmented crown and bridge services beyond Medicaid's limited crown coverage. Examples of CSHCS diagnoses that may qualify for enhanced dental services are listed below. The list is not all inclusive:

- Amelogenesis imperfecta, Dentinogenesis imperfecta
- Anodontia which has significant effect on function
- Cleft palate
- Ectodermal dysplasia, epidermolysis bullosa with significant tooth involvement
- Juvenile periodontitis
- Juvenile rheumatoid arthritis and related connective tissue disorders with jaw dysfunction secondary to temporomandibular joint arthritic involvement

Medicaid Provider Manual

- Post-operative care related to neoplastic jaw disease
- Severe maxillofacial or craniofacial anomalies that require surgical intervention, including orthognathic surgery
- Traumatic injuries to the dental arches

Most CSHCS enhanced dental benefits require prior authorization. Treatment for enhanced dental services is not authorized beyond age 26. Refer to the Children's Special Health Care Services Dental Benefit section in the Dental chapter for additional information.

To request approval as a CSHCS provider of enhanced dental services, dentists must contact MDHHS. (Refer to the Directory Appendix for contact information.)

9.2 CARE COORDINATION BENEFIT

Beneficiaries enrolled in CSHCS with identified needs may be eligible to receive Care Coordination services.

Care Coordination services may be provided by the local health department. LHD staff includes registered nurses (RNs), social workers, or paraprofessionals under the direction and supervision of RNs. Staff must be trained in the service needs of the CSHCS population and demonstrate skill and sensitivity in communicating with children with special needs and their families.

Care Coordination is not reimbursable for beneficiaries also receiving Case Management services during the same LHD billing period, which is usually a calendar quarter. In the event Care Coordination services are no longer appropriate and Case Management services are needed, the change in services may only be made at the beginning of the next billing period.

Families/beneficiaries can contact the LHD for assistance in obtaining Care Coordination services.

9.3 CASE MANAGEMENT BENEFIT

Beneficiaries with either CSHCS, CSHCS and Medicaid, or Medicaid only (no CSHCS) may be eligible to receive Case Management services if they have a CSHCS medically eligible diagnosis, complex medical care needs and/or complex psychosocial situations which require that intervention and direction be provided by an outside, independent professional. LHDs or approved contractors may provide Case Management services. When there is additional training criteria required to perform a specific Case Management role based upon the service being provided (e.g., Elevated Blood Lead services), the provider of the service must be trained and certified, and services must be performed according to the training and requirements specific to that role. Case Management requires the development of a comprehensive plan of care (POC) which meets the minimum elements, as determined by MDHHS, and is monitored/revised as necessary. All services must relate to objectives/goals documented in the POC.

Case Management services address complex needs and services and include an initial in-person encounter with the beneficiary/family. Case Management requires that services be provided in the home setting or other non-office setting based on family preference. Beneficiaries are eligible for a maximum of six billing units per eligibility year. Services above the maximum of six require prior approval by MDHHS. To request approval, the Case Management provider must submit an exception request, including the rationale for additional services, to MDHHS. Limitations on the need for and number of

Case Management service units are set by MDHHS and must be provided by a specific Case Management role, in accordance with training and certification requirements and as specified by the rules within that service type.

Each case manager must be licensed to practice as a registered professional nurse in the State of Michigan and be employed by or contracted with a LHD as a Public Health nurse at the entry level or above, or be able to demonstrate to MDHHS that comparable qualifications are met.

Case Management and Care Coordination services within a specific Case Management role cannot be billed during the same LHD billing period, which is usually a fiscal quarter.

Families/beneficiaries can contact the LHD for assistance in obtaining Case Management services.

9.4 HOSPICE BENEFIT

The CSHCS hospice benefit provides assistance to a family/beneficiary when end of life care related to the beneficiary's CSHCS qualifying diagnosis is appropriate. Hospice is intended to address the medical needs of the beneficiary with a terminal illness whose life expectancy is limited to six months or less.

Hospice services must be prior authorized. Prior authorization requests require medical documentation from the beneficiary's enrolled CSHCS subspecialist who is authorized (i.e., listed on the beneficiary's CSHCS authorized provider file) to treat the terminal illness. The medical documentation must include all of the following:

- A statement of the terminal diagnosis.
- A statement that the beneficiary has reached the terminal phase of illness where the CSHCS subspecialist deems end of life care necessary and appropriate.
- Documentation of the need to pursue end of life care.
- A statement of limited life expectancy of six months or less.
- A proposed plan of care to address the service needs of the beneficiary that is:
 - less than 30 days old;
 - consistent with the philosophy/intent of the CSHCS hospice benefit as described above;
 - clinically and developmentally appropriate to the beneficiary's needs and abilities;
 - representative of the pattern of care for a beneficiary who has reached the terminal phase of illness; and
 - signed by the CSHCS subspecialist authorized to treat the terminal illness.

The prior authorization time period does not exceed six months. To continue hospice services beyond six months, a new prior authorization request with medical documentation must be submitted as described above.

Hospice may not be authorized and/or continued for a beneficiary when **one or more** of the following is true:

- The medical documentation no longer supports the above criteria (e.g., change in condition, change in the plan of care, etc.).
- The family chooses to discontinue hospice.
- The medical services being rendered by the hospice provider are available through another benefit.

Requests for hospice must be made in writing to CSHCS. (Refer to the Directory Appendix for contact information.) CSHCS responds to all prior authorization requests for hospice services in writing.

9.5 RESPITE BENEFIT

Respite services provide limited and temporary relief for families caring for beneficiaries with complex health care needs when the care needs require nursing services in lieu of the trained caregivers. Services are provided in the family home by hourly skilled and licensed nursing services as appropriate. To be eligible and authorized for respite, MDHHS must determine the beneficiary to have:

- Health care needs that meet the following criteria:
 - That skilled nursing judgments and interventions be provided by licensed nurses in the absence of trained and/or experienced parents/caregivers responsible for the beneficiary's care;
 - That the family situation requires respite; and
 - That no other community resources are available for this service.
- No other publicly or privately funded hourly skilled nursing services in the home that would be duplicated by the CSHCS respite benefit.
- Service needs which can reasonably be met only by the CSHCS Respite benefit, not by another service benefit.

Respite is reimbursed when provided by a Medicaid enrolled home health agency, a Medicaid enrolled registered nurse (RN) who is licensed to practice in the state of Michigan, or a Medicaid enrolled licensed practical nurse (LPN) who is licensed to practice in the state of Michigan and working under supervision according to the Michigan Public Health Code. It is the responsibility of the LPN to secure the appropriate supervision and maintain documentation that identifies the supervising professional.

A maximum of 180 hours of CSHCS Respite services may be authorized per family during the 12-month eligibility period. When there is more than one respite-eligible beneficiary in a single home, the respite service is provided by one nurse at an enhanced reimbursement rate for the services provided to multiple beneficiaries. Allotted respite hours may be used at the discretion of the family within the eligibility period. Unused hours from a particular eligibility period are forfeited at the end of that period and cannot be carried forward into the next eligibility period.

Medicaid Provider Manual

Beneficiaries receiving services through any of the following publicly funded programs and benefits are not eligible for the CSHCS Respite benefit:

- Private Duty Nursing Benefit
- Children's Waiver
- Habilitation Supports Waiver
- MI Choice Waiver

Requests for respite must be made in writing to MDHHS (refer to the Directory Appendix for contact information) and include the following information:

- The health care needs of the beneficiary;
- The family situation that influences the need for respite; and
- Other community resources or support systems that are available to the family (e.g., CMH services, MDHHS services, adoption subsidy, SSI, trust funds, etc.).

MDHHS responds to all requests for respite in writing.

9.6 INSURANCE PREMIUM PAYMENT BENEFIT

CSHCS may be able to assist in paying the beneficiary's portion of an insurance premium cost (as related to the CSHCS qualifying diagnosis) for private insurance, Medicare Part B, or Medicare Part D. Premium payment assistance may also be available when the beneficiary has lost or is about to lose insurance coverage. Depending on the timing of the event, CSHCS may be able to assist the family in reactivating or maintaining that coverage. The cost-effectiveness requirements described below always apply.

Premium payment assistance may be available when:

- The current cost of the premium payment is determined to be cost-effective for CSHCS. Cost-effectiveness is defined as when the cost of the insurance premium is less than the projected cost to CSHCS for covering the CSHCS-related care; and
- The family/beneficiary lacks sufficient financial resources to pay for the beneficiary's part of the premium. The lack of ability to pay the insurance premium is defined as follows:
 - When the family has an Income Review/Payment Agreement (MSA-0738) that is within the two lowest payment agreement categories, the financial need is automatically established.
 - When the family has an Income Review/Payment Agreement (MSA-0738) that is above the two lowest categories, the family must describe the reason for the lack of resources that is impacting the ability to pay for insurance. Examples include:
 - The additional out-of-pocket expenses to address only the special needs of the beneficiary(ies) is 10% or more of the gross family income. Documentation is required; or
 - The family income has dropped and a revised MSA-0738 still results in a payment agreement that is above the two lowest payment agreement categories but extenuating

Medicaid Provider Manual

financial circumstances interfere with the family's ability to pay insurance premiums, etc. Documentation is required.

To apply for CSHCS insurance premium payment assistance, the following documents are required from all applicants:

- A completed Application for Payment of Health Insurance Premiums (MSA-0725);
- A copy of a billing statement from the insurance carrier or a statement from the employer or Notice of Medicare Premium Payment Due (CMS-500) that verifies the cost of the premium;
- Copies of previous Explanation of Benefits (EOB) statements or expenditure summaries over the past 12 months from the private health insurance carrier or Medicare; and
- A pharmacy report(s) documenting the cost of the prescriptions and the amount paid by the private health insurance carrier or Medicare, or written evidence that the coverage does not include a prescription benefit.

The following additional documentation is required under two specific circumstances:

- When the family obtained private insurance through the Federally Facilitated Marketplace (FFM) and has a subsidy, proof is required that the subsidy arrangement is the Advanced Premium Tax Credit. Any other subsidy through the FFM enrollment is not eligible for the insurance premium payment assistance; or
- A Consolidated Omnibus Budget Reconciliation Act (COBRA) Election Form is required if the beneficiary lost insurance coverage within three (3) months before application due to termination of employment, death of the policy holder, divorce, etc., and may be eligible for the insurance to remain in place due to COBRA.

The family/beneficiary may contact the Local Health Department CSHCS office to obtain and receive assistance in completing the MSA-0725.

9.6.A. EFFECTIVE DATE OF INSURANCE PREMIUM PAYMENT ASSISTANCE

When premium payment assistance has been approved, the effective date for the coverage is the first day of the month in which the MSA-0725 was received by CSHCS. Insurance premium payments are not covered retroactively for periods before the application was received.

NOTE: Retroactive assistance for premium payment is limited to a one-time-only event when:

- Existing insurance coverage is still active; and
- The private insurance will be terminated due to non-payment; and
- Termination will occur within 30 days of receipt of the MSA-0725 by CSHCS.

The assistance when approved for past coverage is applicable:

- For the beneficiary's portion of the unpaid premium; and
- If those payments will make it possible for the family to pay the remainder of back-payments; and
- When the family can maintain the insurance policy.

9.6.B. ANNUAL REVIEW FOR RENEWAL OF ELIGIBILITY

The MSA-0725 must be submitted each year. The annual eligibility review for continuing premium payment assistance occurs after CSHCS renewal has been completed based on program requirements at that time.

9.6.C. REQUIREMENT TO REPAY CSHCS FOR FUNDS EXPENDED ON TERMINATED POLICIES

In the event that an inappropriate premium payment has been sent to the family (either directly from MDHHS/CSHCS or as a refund to the family by the insurance company), the family is required to return those funds to CSHCS. CSHCS sends the family a letter requesting these funds be submitted to the state. If the funds are not submitted within 60 days from the date on the letter, the Michigan Department of Treasury may collect the funds from the family.

9.7 CHILDREN'S MULTI-DISCIPLINARY SPECIALTY (CMDS) CLINICS

Children's Multi-Disciplinary Specialty (CMDS) clinics provide a coordinated, interdisciplinary approach to the management of specified complex medical diagnoses. Services are provided as a comprehensive package by a team of pediatric specialty physicians and other appropriate health care professionals. When a beneficiary has more than one condition that could be served by more than one CMDS clinic, it is required that only one CMDS clinic assumes the care and coordination responsibility for the beneficiary. This will ordinarily be the responsibility of the CMDS clinic that serves the most complex diagnosis. The CMDS clinic fees may only be reimbursed to one of the CMDS clinics if the beneficiary is utilizing the services of more than one CMDS clinic.

CMDS clinic services are reserved for those beneficiaries who have CSHCS and have at least one of the conditions for which CMDS clinics are available. Additional clinic information is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

9.7.A. EXPLANATION OF SERVICES

In addition to medical services, CMDS clinics provide:

- A single place and extended appointment for the family to be seen by their team of pediatric specialty providers as well as other appropriate health care professionals during each appointment;
- An environment where providers come to the family for the single appointment at the clinic as opposed to the family needing to set separate dates and times to go to each provider as in the usual service methodology;

Medicaid Provider Manual

- Same day care coordination by all of the providers who saw the beneficiary at each appointment allows for immediate discussion, negotiation, coordination and duty assignment. The family does not need to interpret information from one provider to the next which risks misunderstanding as in the usual service methodology;
- Development and upkeep of a coordinated and comprehensive plan of care (POC) and treatment for beneficiaries, including clear statements of current comprehensive assessment and ongoing treatment plans available to the entire team;
- Facilities that are tailored to the needs of children and their families; and
- Opportunities for the parent/beneficiary to participate in treatment planning, allowing for timely feedback and discussion of concerns with specialists and other health care professionals simultaneously when needed.

Services are provided as a comprehensive package by a team of pediatric specialty physicians and other appropriate health care professionals. CMDS clinic fees are not intended for sporadic users of the services available through CMDS clinics such as support services only. CMDS clinic fees are intended for the comprehensive, coordinated and integrated services that CMDS clinics provide to beneficiaries who return for and continue to use this full package of services.

9.7.B. CMDS CLINIC STAFF REQUIREMENTS

Each CMDS clinic must have the following basic staff available to provide the unique service delivery available through a CMDS clinic model:

Medical Director	A Medicaid-enrolled and CSHCS-approved physician currently licensed to practice under Michigan state law, with special training and demonstrated clinical experience related to the diagnoses followed by the specific CMDS clinic type. Physicians are expected to remain familiar with current developments and standards of treatment in their respective fields. If the medical director is not a pediatrician, a board certified pediatrician must be available and function within the scope of current medical practice.
Physician	A Medicaid-enrolled and CSHCS-authorized pediatric subspecialist, or adult subspecialist physician when serving adults, currently licensed to practice under Michigan state law with special training and demonstrated clinical experience related to the diagnoses treated by the specific CMDS clinic type. Physicians are expected to remain familiar with current developments and standards of treatment in their respective fields. Refer to the CMDS Clinic Guide, tables I and II, for subspecialty designations. The CMDS Clinic Guide is available on the MDHHS website. (Refer to the Directory Appendix for website information.)
Registered Nurse	A Registered Nurse (RN) currently licensed to practice under Michigan state law and having a minimum of two years of pediatric nursing experience or adult nursing experience when serving adults. Certain CMDS clinics are exempt from this requirement (e.g., the Metabolic Diseases CMDS clinics) as long as they have the appropriate additional staff as required in the CMDS Clinic Guide.

Medicaid Provider Manual

Registered Dietitian	A Registered Dietitian (RD) in possession of a master's degree in human nutrition, public health, or a health-related field with an emphasis on nutrition, and two years of pediatric nutrition experience or adult nutrition experience when serving adults in providing nutrition assessment, education and counseling.
Social Worker	A Licensed Master Social Worker (LMSW) or professional staff member in possession of a master's degree in social work and two years of experience in counseling and providing service to children/youth, adults and their families.
Parent/Guardian and/or Beneficiary	The parent/guardian and/or the beneficiary must be an actively participating team member in the development of the beneficiary's comprehensive POC.
Additional Required Staff	Additional staffing requirements are based on clinic diagnosis type. Refer to the CMDS Clinic Guides on the MDHHS website for staffing requirements. (Refer to the Directory Appendix for website information.)

9.7.C. CMDS CLINIC VISIT TYPES

Beneficiaries with multiple, complex diagnoses may receive CMDS coordinated services from more than one CMDS clinic. However, the limits and numbers of CMDS clinic visit types indicate what the beneficiary is eligible to receive regardless of the number of CMDS clinics the beneficiary is accessing. Any CMDS clinic serving the beneficiary under the CMDS clinic process may submit claims for the appropriate clinic fee(s) up to the limit allowed per beneficiary. For example, there are 10 Support Visits allowed per beneficiary in a year. Any organization/clinic serving the beneficiary may bill for those support visits until the beneficiary limit has been reached. That might involve one CMDS clinic receiving reimbursement for all 10 of the Support Visits or a combination of CMDS clinics receiving reimbursement for some visits until the limit has been reached. The CMDS clinics must document clinic visit levels to include the following:

- Support services must be indicated in the CMDS Plan of Care (POC) developed at a CMDS clinic Comprehensive Initial or Basic Evaluation visit or Management/Follow-up visit.
- The CMDS clinic must collaborate with other CMDS clinics the family/beneficiary may be using regarding which CMDS clinic is the lead CMDS clinic (usually treating the most severe condition) and how the fee billing will occur in coordination between the CMDS clinics that are both serving the same beneficiary.

9.7.C.1. INITIAL COMPREHENSIVE EVALUATION

The Initial Comprehensive Evaluation is performed in-person during the CSHCS beneficiary's first visit to the CMDS clinic. The medical team integrates assessments and recommendations and works with the family/beneficiary in the development of a coordinated and comprehensive POC and treatment for the beneficiary. The CMDS POC is required to be recorded. The CMDS clinic will communicate the written CMDS POC to the appropriate health care providers and the family/beneficiary. Written CMDS POCs may be provided to other appropriate health care providers for whom the parent/guardian/beneficiary has signed a medical release form. A copy of the CMDS POC is to be submitted to CSHCS medical consultants for review.

Medicaid Provider Manual

An Initial Comprehensive Evaluation visit must include the following:

- Physician specialist(s) and non-physician professionals examination or assessment of the beneficiary and submission of an established/confirmed diagnosis(es), identification of strengths and needs and, with family/beneficiary input, development of a course of action or plan for treatment;
- Integration of findings and recommendations at team conferences;
- Discussion of the medical findings and treatment recommendations with family/beneficiary in language the family/beneficiary can comprehend;
- Designation of identified staff to teach the family/beneficiary how to assist in the management of the beneficiary's health problems if appropriate; and
- Compilation of an integrated CMDS POC from the findings of the various health care providers that includes:
 - relevant history;
 - medical findings by specialty;
 - problem areas that may develop and for which the beneficiary should receive care;
 - recommendations and prescriptions for braces, shoes, special equipment, medications, etc.;
 - referral to physical therapy, speech-language therapy, occupational therapy, public health nurse, CMDS support services; and
 - a description of how the CMDS POC will be implemented.

Authorization and processes may differ per health plans and Fee-for-Service (FFS).

Reimbursement for the Initial Comprehensive Evaluation fee occurs only once per beneficiary per lifetime regardless of the number of diagnoses and/or CMDS clinics from which the beneficiary may be receiving services. Medical services continue to be billed as usual.

9.7.C.2. BASIC AND ONGOING COMPREHENSIVE EVALUATION

Basic and ongoing comprehensive evaluation is conducted with established CMDS patients. The evaluation(s) may include the entire CMDS clinic staff composition or as deemed appropriate by each CMDS clinic Medical Director per visit and is documented in the CMDS POC. At least one visit per year must be conducted in person.

A basic and ongoing comprehensive evaluation may include the following activities:

- Comprehensive beneficiary assessment;
- Evaluation and identification of the beneficiary's needs;
- Coordination of the beneficiary's multi-disciplinary needs;
- Review and modification of the comprehensive CMDS POC;
- Assured implementation and follow-up; and

- Referrals to other professionals, resources, and services as applicable.

Reimbursement for the Basic and Ongoing Comprehensive Evaluation fee is provided for a maximum of three (3) visits per beneficiary, per 12-month CSHCS eligibility year regardless of the number of diagnoses or CMDS clinics the beneficiary may have. Medical services continue to be billed as usual.

9.7.C.3. MANAGEMENT/ FOLLOW-UP VISITS

Management/follow-up visits to a CMDS clinic may be provided if they are recommended in the CMDS POC. In addition, a referral may be recommended based on a tertiary hospital inpatient discharge plan that was written within the previous 12 months of the referral. Every effort should be made to include all staff identified as participants in the CMDS POC or as recommended by the CMDS clinic Medical Director.

The management/follow-up visit may include:

- A physical exam by a pediatrician and/or physician subspecialist(s);
- Assessment by at least two of the clinic staff (in addition to the clinic physicians) designated for the clinic type;
- Follow-up on all components identified in the CMDS POC by appropriate staff;
- Update of condition and treatment, and revision of the CMDS POC; and
- Communication with the family/beneficiary, other providers, and other designated health care providers, including provision of copies of the CMDS POC to the family/beneficiary.

Reimbursement for the management/follow-up visit clinic fee is provided for a maximum of three (3) visits per beneficiary, per 12-month CSHCS eligibility year, regardless of the number of diagnoses or CMDS clinics the beneficiary may have. Medical services continue to be billed as usual.

9.7.C.4. SUPPORT SERVICE VISITS

CMDS clinics may provide support services. Services consists of counseling, specialized training, transition assistance and/or treatment. Support services must be ordered as part of the CMDS POC developed at a CMDS clinic Initial Comprehensive Evaluation, Basic and Ongoing Comprehensive Evaluation, and/or Management/Follow-up Visit.

CMDS clinic support services may be provided by any combination of one or more of the non-physician basic CMDS clinic staff to the family/beneficiary as outlined in the CMDS POC. Support services may be conducted by professional members of the team (i.e., nurses, dietitians, certified diabetes counselors, social workers or other clinical professional staff as appropriate). The presence of a physician is not required.

- The clinical encounter must be substantive with clinical information gathered, treatment recommendations provided, transition needs addressed and an update to the CMDS POC.
- The clinical content of the encounter is documented in the CMDS POC.

Medicaid Provider Manual

CMDS support service visits include and provide two different methods of delivery:

- Face-to-Face meetings between the appropriate clinic professional and the family/beneficiary; or
- Telephone meetings between the appropriate clinic professional and the family/beneficiary.

Reimbursement for support services clinic fees can be provided up to a maximum of ten (10) visits per beneficiary as a single method or as a combination of methods, per 12-month CSHCS eligibility year, regardless of the number of diagnoses or CMDS clinics the beneficiary may have. Medical services continue to be billed as usual.

9.7.D. ADDITIONAL RESPONSIBILITIES

CMDS clinics must establish and maintain an agreement with each Medicaid and MICHild Health Plan for health plan enrolled beneficiaries to ensure coordinated care planning and data sharing.

- CMDS clinics must establish a process for clinical staff to communicate with health plan staff on a regular basis to identify health plan enrollees using the CMDS clinic(s), review testing/assessment/screening results, treatment plans, CMDS POCs, and status of mutually served beneficiaries.
- CMDS clinics must collaborate with health plans on the development of referral procedures and effective means of communicating the need for beneficiary-specific referrals. For beneficiaries enrolled in a health plan, CMDS clinics must bill the Medicaid Health Plan (MHP) for medical services rendered according to the health plan billing rules.

The CMDS clinic fee is billed as a FFS claim through CHAMPS regardless of health plan status. CMDS clinic fees are not intended for sporadic users of the services available through the CMDS clinics such as support services only. CMDS clinic fees are intended for the comprehensive, coordinated and integrated services that CMDS clinics provide to beneficiaries that return for and continue to use the full package of services.

CMDS clinic fees must be billed according to instructions contained in the Billing & Reimbursement for Professionals Chapter of this Manual. CMDS clinics must bill clinic fees following Uniform Billing (UB) guidelines on the professional CMS-1500 claim format or the electronic Health Care Claim Professional (837) ASC X12N version 5010 information. CHAMPS NPI claim editing will be applied to the billing, rendering, supervising, attending, servicing and referring providers as applicable for payment.

SECTION 10 – OUT-OF-STATE MEDICAL CARE

CSHCS covers out-of-state **emergency** medical care when services are related to the qualifying diagnosis. Emergency medical care is defined as a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain) that a prudent layperson, with an average knowledge of health and medicine, could reasonably expect the absence of immediate medical attention to result in:

- Serious jeopardy to the health of the beneficiary;
- Serious impairment to bodily functions; or
- Serious dysfunction of any bodily organ or part.

Non-emergency medical care related to the qualifying diagnosis is defined as not meeting the definition of emergency medical care stated above. Out-of-state non-emergency medical care is covered only when the service has been prior authorized by MDHHS. Prior authorization requests for out-of-state services may be approved when all of the following criteria are met:

- The requested service is related to the CSHCS qualifying diagnosis;
- The request for out-of-state referral is submitted by the appropriate, CSHCS-authorized in-state subspecialist with whom the beneficiary will maintain a relationship following the out-of-state services, explaining the reason the requested service must be provided out-of-state;
- The in-state subspecialist and the out-of-state specialist maintain a collaborative relationship with regard to determining, coordinating, and providing the beneficiary's medical care, including a plan to transition the beneficiary back to in-state services as appropriate;
- Comparable care (the term "comparable care" does not require that services be identical) for the CSHCS qualifying diagnosis cannot be provided within the State of Michigan;
- The requested service is accepted within the context of current medical standards of care as determined by MDHHS;
- The service has been determined medically necessary by MDHHS because the beneficiary's health would be endangered if they were required to travel back to Michigan for services, if applicable.

All out-of-state providers must complete the Community Health Automated Medicaid Processing System (CHAMPS) enrollment process described in the Provider Enrollment Section of the General Information for Providers Chapter to submit claims to MDHHS.

Medical care provided in borderland areas is allowed without application of the Out-of-State Medical Care criteria if the provider is enrolled in the Michigan Medicaid Program. Borderland is defined as counties outside of Michigan that are contiguous to the Michigan border and the major population centers (cities) beyond the contiguous line as recognized by MDHHS. (Refer to the General Information for Providers Chapter of this manual for additional information.)

The LHD CSHCS offices authorize and assist families with travel for care received in borderland areas in the same manner as for travel in state. Refer to the Non-Emergency Medical Transportation (NEMT) Assistance section of this chapter for specific information.

SECTION 11 – NON-EMERGENCY MEDICAL TRANSPORTATION (NEMT) ASSISTANCE

CSHCS may reimburse for travel to assist beneficiaries in accessing and obtaining authorized specialty medical care and treatment (in-state and out-of-state, as appropriate) when the family's resources for the necessary travel pose a barrier to receiving care. NEMT assistance is allowed for the beneficiary and one adult to accompany the beneficiary when the beneficiary:

- Is a minor, or
- Has a court-appointed guardian, and/or
- Has a medical condition that supports the need for a caregiver.

The treatment must be related to the qualifying medical condition and provided by a CSHCS approved provider. The NEMT benefit is not intended to assume the entire cost for the expenses incurred.

11.1 IN-AND OUT-OF-STATE TRAVEL

Requests for NEMT assistance must be made as follows:

- Beneficiaries who are not covered by Medicaid must request NEMT assistance through the LHD.
- Beneficiaries who have Fee-For-Service Medicaid and live in Wayne, Oakland or Macomb County must request NEMT assistance from the contracted transportation broker.
- Beneficiaries who have Fee-For-Service Medicaid and live outside of Wayne, Oakland or Macomb County must request NEMT assistance from their local MDHHS office. When NEMT assistance from the local MDHHS office is unavailable, beneficiaries can request NEMT assistance through the LHD.
- Beneficiaries who are Medicaid Health Plan (MHP) members must request NEMT from their health plan. MHPs may have different prior authorization and documentation requirements from those described in this chapter.

To be eligible and authorized for CSHCS NEMT travel assistance, the beneficiary must be determined by MDHHS to meet the following criteria:

- The beneficiary has CSHCS coverage at the time of the travel;
 - NEMT assistance may be authorized for individuals who do not have CSHCS but need NEMT assistance to participate in a diagnostic evaluation that is performed for the purpose of determining CSHCS eligibility.
 - There must be verification that no other resources are available and the individual is otherwise unable to access the site of the diagnostic evaluation.
- The NEMT assistance is for obtaining CSHCS specialty medical care and treatment from a CSHCS approved provider for the CSHCS medically-eligible condition;
- The family/beneficiary lacks the financial resources to pay for all or part of the travel expenses;
- Other travel/financial resources are unavailable or insufficient;
- The mode of travel to be used is the least expensive and most appropriate mode available; and

Medicaid Provider Manual

- Prior approval for NEMT assistance has been obtained.

The following are additional criteria for out-of-state NEMT assistance:

- Comparable medical care is not available to the beneficiary within the state of Michigan or borderland areas.
- Prior approval for the out-of-state medical care and treatment was obtained from MDHHS before NEMT assistance was requested.

Travel to borderland providers is considered the same as travel to in-state providers and follows the same requirements and rules.

11.2 NEMT REIMBURSEMENT PROCESS

In-state NEMT assistance for beneficiaries who do not have Medicaid, or who are receiving non-Medicaid eligible services, does not require prior authorization. Out-of-state NEMT assistance requests may be initiated by the LHD and must be authorized by the CSHCS state office. Prior authorization may be issued up to one calendar month for recurring visits.

Reimbursement is made according to the allowable amount established by MDHHS. Rates are reviewed at least annually and published on the MDHHS website. (Refer to the Directory Appendix for website information.)

Reimbursement for beneficiaries with Medicaid coverage who request NEMT assistance from their local MDHHS office is provided in accordance with the Medicaid/MDHHS Non-Emergency Medical Transportation policy.

Beneficiaries who are authorized for CSHCS NEMT assistance must request reimbursement by submitting the completed Client Transportation Authorization and Invoice form (MSA-0636) and Addendum according to the General Instructions. Receipts are required for all reimbursable expenditures except mileage. Meal expenditures are not reimbursable. Requests for NEMT reimbursement must be received by MDHHS within 90 days following the authorized month of travel to be considered for payment. New enrollees may be reimbursed retroactive to the date of CSHCS enrollment when applicable.

Ground Transportation	<ul style="list-style-type: none">▪ Mileage by private car to and from the health care service. Mileage is reimbursed according to the rate established by MDHHS.▪ Car rentals, parking costs, and highway, bridge, and tunnel tolls require receipts.▪ Bus, taxi, ferry or train fare, when it is the least expensive, most appropriate mode of transportation available and supported by receipts.
Air Travel	<ul style="list-style-type: none">▪ The family cannot be reimbursed for airline tickets unless prior approval to purchase the tickets was obtained from MDHHS/CSHCS. Receipts are required for reimbursement.▪ Baggage charges, etc. require receipts.

Medicaid Provider Manual

Lodging	<ul style="list-style-type: none">▪ The beneficiary must be required to stay overnight to obtain in-patient or out-patient treatment related to the CSHCS covered condition, performed by a CSHCS approved provider and at a CSHCS approved medical facility, in order for the family to be reimbursed for lodging.▪ Inpatient Requirements: Reimbursement is for the accompanying adult as needed.▪ Outpatient Requirements: Reimbursement is for the beneficiary and the accompanying adult as needed.▪ MDHHS reimburses lodging up to the allowable amount established by MDHHS, regardless of cost. Receipts are required.
----------------	---

11.3 COMMERCIAL OR NON-PROFIT TRANSPORTATION PROVIDER (NON-AMBULANCE)

Beneficiaries may be eligible for NEMT through a commercial or non-profit provider (e.g., Ambu-Cab, Medi-Van, vans operated by medical facilities or public entities, etc.) when at least one of the following conditions is met. Beneficiary is:

- Wheelchair dependent; or
- Bed bound; or
- Medically dependent on life sustaining equipment which cannot be accommodated by standard transportation; or
- Unable to access public or private transportation for the purpose of obtaining medical care.

CSHCS NEMT provided by a commercial or non-profit transportation provider must be prior approved by the LHD on the Non-Emergent Medical Transportation Authorization and Verification form (MSA-0709). Payment is made directly to the commercial or non-profit transportation provider by MDHHS. The family/beneficiary should not pay the provider directly since the family/beneficiary cannot be reimbursed.

11.4 EMERGENCY AND SPECIAL TRANSPORTATION COVERAGE

CSHCS follows the same policies and procedures regarding emergency and special medical transportation coverage as the Medicaid Program. Coverage must be related to the CSHCS qualifying condition. (Refer to the Ambulance Chapter of this manual for additional information.)

An additional person, such as a donor related to the medical care of the beneficiary, may be considered for NEMT assistance when approved by a MDHHS medical consultant. The treating specialist must provide CSHCS with documentation of the relationship between the beneficiary and the additional person.

SECTION 12 – CSHCS COORDINATION WITH OTHER HEALTH CARE COVERAGE

Beneficiaries may have coverage through CSHCS and another program simultaneously.

12.1 MEDICAID

Beneficiaries may have both Medicaid and CSHCS coverage. The beneficiary must comply with Medicaid requirements.

12.2 MICHILD

Beneficiaries may have both MICHild and CSHCS coverage. The beneficiary must comply with MICHild requirements. CSHCS is not considered health insurance for purposes of MICHild eligibility.

12.3 TRANSITIONAL MEDICAL ASSISTANCE (TMA)

Beneficiaries may have both TMA and CSHCS coverage. For services not covered by CSHCS and covered by TMA, the beneficiary must comply with TMA requirements.

12.4 MATERNITY OUTPATIENT MEDICAL SERVICES

Beneficiaries may have both MOMS and CSHCS coverage. The beneficiary must comply with MOMS requirements.

12.5 COURT-ORDERED MEDICAL INSURANCE

CSHCS cannot be used as court-ordered medical insurance.

12.6 MEDICARE

Beneficiaries may have both Medicare and CSHCS. The beneficiary must comply with Medicare requirements.

CSHCS may cover the out-of-pocket pharmacy costs related to the CSHCS covered diagnoses for CSHCS beneficiaries enrolled with a Medicare Part D Pharmacy Drug Plan. These out-of-pocket costs include copays, co-insurance and deductibles specific to the Medicare Part D pharmacy benefit. Providers and beneficiaries should contact CSHCS for additional information regarding the reimbursement of out-of-pocket pharmacy costs. (Refer to the Directory Appendix for contact information.)

12.7 HEALTHY MICHIGAN PLAN

Beneficiaries may have both the Healthy Michigan Plan and CSHCS. The beneficiary must comply with the Healthy Michigan Plan requirements.

SECTION 13 – APPEALS

13.1 DEPARTMENT REVIEWS

Beneficiaries without Medicaid coverage are entitled to appeal MDHHS negative actions, and to a Department Review when they have been denied CSHCS eligibility or services, or when established CSHCS services have been reduced, changed, or terminated. The beneficiary will be notified in writing of the negative action and the right to appeal. CSHCS follows the same appeal and request for hearing policies and procedures as established by MDHHS for all MDHHS programs.

13.2 ADMINISTRATIVE HEARINGS

Beneficiaries who also have Medicaid coverage have a right to an administrative hearing when services have been denied, reduced, changed or terminated. The beneficiary will be notified in writing of the negative action and the right to appeal. The beneficiary may receive an administrative hearing if the circumstances suggest that Medicaid reimbursement is involved in the coverage or service in question. The beneficiary may receive a department review if the circumstances indicate that Medicaid reimbursement is in no way involved in the coverage or service in question. The Michigan Office of Administrative Hearings and Rules (MOAHR) determines which hearing is appropriate once a beneficiary has requested a hearing.

Section 4 – Noncovered Services	5

SECTION 1 – GENERAL INFORMATION

This chapter applies to Chiropractors.

1.1 MEDICAL NECESSITY

Determination of medical necessity and appropriateness of service is the responsibility of chiropractors within the scope of accepted medical practice and Medicaid limitations. Chiropractors are held responsible if excessive or unnecessary services are ordered, regardless of who actually renders these services (e.g., x-rays), or if reimbursement is received for the service. Chiropractors are subject to any corrective action related to these services, including recovery of funds.

1.2 BENEFICIARY COPAYMENT

A copayment for each Medicaid reimbursable chiropractic visit may be required for beneficiaries age 21 years and older. (Refer to the General Information for Providers Chapter for information about copayments.) Current copayment amounts are listed on the MDHHS website. (Refer to the Directory Appendix for website information.)

When more than one reimbursable service is provided during one visit (e.g., spinal manipulation and x-ray on the same date of service [DOS]), only a single copayment may be charged to the beneficiary.

When billing Medicaid for the service, chiropractors should bill their usual and customary (U&C) charge (i.e., without any adjustment for the copayment). Upon approval of the service, Michigan Department of Health and Human Services (MDHHS) automatically deducts the copayment. If the chiropractor deducts the copayment from the charge billed, an underpayment may result.

Refer to the Billing Beneficiaries Section of the General Information for Providers Chapter of this manual for additional information regarding copayment requirements. Beneficiaries may not be denied care or services based on inability to pay a copayment, except as outlined in that section.

1.3 OTHER INSURANCE AND MEDICARE SERVICES

It is the chiropractor's responsibility to question the beneficiary regarding Medicare and other insurance coverage prior to providing the service. Medicaid is the payer of last resort. Payment must be sought from other third party payers before submitting claims to MDHHS. (Refer to the Coordination of Benefits Chapter of this manual for additional information.)

1.4 NURSING FACILITY

Chiropractors may render manual spinal manipulations to beneficiaries in a NF as an ancillary service. The attending physician (MD or DO) must order all ancillary services, including chiropractic services. The chiropractor must keep and make available complete records of the services provided.

SECTION 2 – COVERED SERVICES

2.1 MANUAL SPINAL MANIPULATION

Medicaid covers medically necessary chiropractic services rendered by a chiropractor for the treatment of a diagnosed condition of subluxation of the spine. The subluxation must be demonstrable on x-rays.

Spinal manipulation is the only covered chiropractic procedure. (Refer to the Codes Section of this chapter for additional information.) Only one of the spinal manipulation procedure codes is billable per day, per beneficiary. Clinical signs and symptoms must be consistent with the level of subluxation.

If documentation other than x-rays supports the medical necessity of spinal manipulation for children, the x-ray requirement may be waived. Medicaid reserves the right to request x-ray documentation if deemed necessary.

Medicaid reimburses up to 18 chiropractic visits per calendar year.

2.2 PRIOR AUTHORIZATION INSTRUCTIONS

If additional visits during the calendar year are medically necessary, providers must submit a prior authorization (PA) request before performing manipulations that exceed the 18-visit limit. Submit a written request to the MDHHS Program Review Division. (Refer to the Directory Appendix for contact information.)

The letter requesting PA must:

- Provide beneficiary name and Medicaid identification (ID) number;
- Specify height;
- Specify weight;
- Provide the date of onset of current complaint and the frequency of visits to date, including a brief history of complaint, initial symptoms and significant symptom characteristics;
- Indicate level of subluxation and associated diagnosis, including complications or predisposing conditions, if present;
- Specify physical and objective findings;
- Specify radiographic findings, including significant findings in support of diagnosis;
- Indicate the patient's response to current treatment (improvement to date, if any);
- Provide an estimate of continued treatment necessary for current complaint;
- Provide expected and anticipated benefit of continued treatment; and
- Include any additional details, comments, etc. that may be of assistance in the evaluation.

Medicaid Provider Manual

The PA request is reviewed and a notice is returned to the provider stating the approval or denial of the request. If approved, the provider is notified of the number of additional visits granted. Providers are also given a PA number that must be placed in the PA field on the claim form when billing for the additional services. (Refer to the Billing & Reimbursement for Professionals Chapter of this manual for claim completion instructions.)

2.3 X-RAY SERVICES

A chiropractor may order, and be reimbursed for, no more than one set of spinal x-rays per beneficiary, per year. If more than two procedures are provided for the beneficiary on the same date of service, the services must be combined and billed as one inclusive procedure code, such as the entire radiologic examination of the spine with survey study, anteroposterior and lateral.

SECTION 3 – CODES

3.1 DIAGNOSIS CODES

Chiropractors must use at least one diagnosis code in conjunction with the procedure codes when billing chiropractic services. MDHHS follows the Medicare diagnosis coding requirements for chiropractic services.

3.2 PROCEDURE CODES

Chiropractors must use at least one appropriate procedure code from the Current Procedural Terminology (CPT) and the Healthcare Common Procedure Coding System (HCPCS) coding manuals. A list of procedure codes covered by MDHHS is maintained on the MDHHS website. (Refer to the Directory Appendix for website information.)

Medicaid Provider Manual

SECTION 4 – NONCOVERED SERVICES

Chiropractic services excluded from Medicaid coverage are all services other than manual manipulation of the spine and spinal x-rays. Medicaid does not cover the following services when rendered by a chiropractor:

- Consultations
- Fracture care
- Home visits
- Injections
- Laboratory tests
- Maintenance therapy
- Medical supplies
- Evaluation and management services
- Plaster casts
- Inpatient hospital visits

SECTION 1 – INTRODUCTION

1.1 GENERAL INFORMATION

A Community Health Worker (CHW)/community health representative (CHR) is a frontline public health worker who is a trusted member of and/or has an unusually close understanding of the community served. This trusting relationship enables the worker to serve as a liaison/link/intermediary between the health/social services and the community to facilitate access to services and improve the quality and cultural competence of service delivery. The CHW/CHR is a non-licensed public health provider who facilitates access to needed health and social services for beneficiaries. Hereafter, the term CHW will be used to represent both CHW and CHR terminology.

CHW services focus on preventing disease, disability, and other chronic health conditions or their progression, and promoting physical and mental health. These services are designed to be person-centered and patient driven, with a focus on beneficiary empowerment, fostering self-advocacy skills to promote personalized and effective diagnosis or treatment.

1.2 BENEFICIARY NEED AND RECOMMENDATION OF SERVICES

Conditions that may define a beneficiary's need for CHW services must be assessed utilizing an appropriate health risk and/or social determinant of health (SDOH) screening/assessment tool. The conditions that may support the need for the CHW services include, but are not limited to:

- Diagnosis of one or more chronic health conditions, including behavioral health;
- Unmet health-related social need; or
- Pregnancy and up to 12 months postpartum.

As required by federal regulations at CFR 440.130(c), CHW services must be recommended by a licensed health care provider. Health care providers qualified to recommend CHW services include, but are not limited to, the following:

- Physician
- Physician Assistant
- Advanced Practice Registered Nurse
- Registered Nurse
- Licensed Master Social Worker
- Dentist
- Psychiatrist or Psychologist

Licensed health care providers recommending CHW services are not required to be part of the beneficiary's health care team, but collaboration is highly encouraged.

SECTION 2 – COVERED SERVICES

CHW services must be provided face-to-face. CHW services should be provided in the language of the beneficiary's choice when possible. Refer to the Glossary Appendix of the MDHHS Medicaid Provider Manual for the definition of "face-to-face."

CHW services available to beneficiaries include health system navigation and resource coordination, health promotion and education, and screening and assessment.

2.1 HEALTH SYSTEM NAVIGATION AND RESOURCE COORDINATION

Health system navigation and resource coordination include providing information, training, referrals, or support to encourage beneficiary-led efforts to access covered services, understand, engage, or re-engage in the health care system, or engage in their own care needs.

These services also work to connect beneficiaries to relevant community resources necessary to promote health, address health care barriers, or address health-related social needs.

The following are examples of health system navigation and resource coordination:

- Helping to engage, re-engage, or ensure beneficiary-led follow-up in primary care; routine preventive care; adherence to treatment plans; and/or self-management of chronic conditions.
- Helping a beneficiary find the appropriate Medicaid provider to receive a recommended covered service.
- Helping a beneficiary make and keep an appointment for a Medicaid covered service.
- Helping a beneficiary find and access other relevant community resources.
- Helping a beneficiary with a telehealth appointment and/or educating a beneficiary on the use of telehealth technology.
- Connecting a beneficiary to medical translation/interpretation or transportation services.
- Serving as a cultural liaison or assisting a licensed health care provider to create a plan of care, as part of the health care team.

2.2 HEALTH PROMOTION AND EDUCATION

Health promotion and education includes services that promote the beneficiary's health or address barriers to physical and mental health care, including providing information, instruction, methods, and measures on health topics that have been proven effective in preventing disease, disability, and other health conditions or their progression; prolonging life; and/or promoting physical and mental health and efficiency. The content of health promotion and education must be consistent with established or recognized health care standards and best practices. Health promotion and education may include coaching and goal-setting to improve a beneficiary's health or ability to self-manage health conditions.

The following are examples of Health Promotion and Education topics:

- Addressing family violence/inter-partner violence
- Control of certain health conditions (i.e., heart disease, high blood pressure, dental disease, etc.)

Medicaid Provider Manual

- Diabetes prevention and control
- Chronic disease self-management
- Chronic pain self-management
- Sexual and reproductive health
- Improvement in safety and the environmental health of housing (i.e., to mitigate asthma risk, risk of injury from unsafe housing, lead exposure, etc.)
- Improvement in nutrition, physical and/or mental health
- Promotion of preventative services, such as cancer screenings and immunizations
- Reduction in the misuse of alcohol or drugs
- Stress management and reduction

2.3 SCREENING AND ASSESSMENT

Screening and assessment services include the use of standardized, validated tools that do not require a license and that support the identification of needed services and supports.

2.4 DOCUMENTATION OF SERVICES

Documentation must include date of service, a start and end time of services provided, a description of the professional services rendered, and information regarding the source of the licensed health care provider's recommendation for services. Documentation must be kept in accordance with the record keeping requirements of the Medicaid program and may be subject to review and post-payment audit. (Refer to the Record Keeping section within the General Information for Providers chapter of the MDHHS Medicaid Provider Manual for more information.)

SECTION 3 – NON-COVERED SERVICES

CHW Services cannot duplicate services that are covered under the existing Medicaid State Plan. The following services, while important in various contexts, are not reimbursable under the CHW Services policy and associated billing codes. These services include, but are not limited to:

- Clinical case/care management that requires a license
- Community Transition Services
- Companion services
- Discharge planning
- Delivery of medication, medical equipment, or medical supply
- Employment services
- Helping a beneficiary enroll in government or other assistance programs that are not related to improving their health as part of a provider's recommendation
- Personal care services/Home Help, including shopping and cooking meals
- Respite care
- Services that require a license
- Support services covered under behavioral health services programs by Certified Peer Support Specialists (CPSS) or Certified Peer Recovery Coaches (CPRC)
- Transporting beneficiaries

SECTION 4 – CHW QUALIFICATIONS CRITERIA

This section describes the minimum requirements needed of an individual delivering CHW services to meet the criteria necessary to be verified by the MDHHS designated contractor before the Community Health Automated Medicaid Processing System (CHAMPS) enrollment for Michigan Medicaid reimbursement. Individuals may meet the qualifications criteria and be recognized as certified CHWs through either the CHW Training Program Pathway or the Work Experience Pathway. Refer to the Directory Appendix for website information.

Individuals who meet the verification requirements through the MDHHS designated contractor will be registered with the contractor as certified CHWs and included in the MI Medicaid CHW Registry. (Refer to the Directory Appendix for additional information.) Individuals seeking to deliver CHW services to Medicaid beneficiaries must be registered with the MDHHS contractor prior to enrolling as a Medicaid provider. Additional details regarding the contractor's CHW registry and application process will be made available to all interested parties.

To qualify to deliver Medicaid reimbursable CHW services, an individual must meet the following criteria:

- Must be 18 years of age or older;
- Possess at least a high school diploma or high school equivalency diploma/certification;
- Must meet the CHW Training Program Pathway or the Work Experience Pathway;
- Has successfully completed a CHW application with the MDHHS designated contractor and must be listed in good standing on the MI Medicaid CHW Registry; and
- Complete provider enrollment requirements detailed in the Provider Enrollment section of this policy (below).

CHW Training Program Pathway	To be recognized as a MI Medicaid certified CHW under the CHW Training Program Pathway, an individual must have completed an MDHHS-approved Community Health Worker training program that aligns with the Community Health Worker Core Consensus Project (C3 Project) core competencies. (Refer to the Directory Appendix for additional information.)
Work Experience Pathway	<p>During the initial 24 months of the policy implementation (from January 1, 2024, to December 31, 2025), an individual who does not possess the CHW Training Program Pathway qualifications will be permitted to temporarily deliver CHW services and seek reimbursement if the individual meets the following criteria:</p> <ul style="list-style-type: none">▪ Has completed 1,000 hours of experiential learning in the previous three years; and▪ Has a plan for completing a CHW training program, as described above. <p>A CHW certified through the Work Experience Pathway must complete their MDHHS-approved CHW training program by December 31, 2025, to maintain their eligibility to continue delivery of CHW services for Medicaid reimbursement.</p>

All CHWs are required to maintain a minimum of six (6) hours of continuing education through an MDHHS-approved CHW training program annually that aligns with the C3 Project core competencies. Appropriate documentation must be provided to the MDHHS designated contractor to remain in good standing on the MI Medicaid CHW Registry.

SECTION 5 – PROVIDER ENROLLMENT

After verification of qualifications by the MDHHS designated contractor, certified CHWs seeking reimbursement for services to Medicaid beneficiaries are required to be Medicaid-enrolled providers. To enroll as a Medicaid provider, a certified CHW must complete an online application in CHAMPS and must enroll with an Individual (Type 1) National Provider Identifier (NPI) as a Rendering/Servicing-Only Provider. As part of the enrollment process, certified CHWs must associate themselves to at least one Medicaid-enrolled billing provider within CHAMPS. The billing provider must have a Group/Organizational (Type 2) NPI **or** be an Individual Sole Proprietor with an Individual (Type 1) NPI. Associated billing providers may be employers or organizations the CHW is contracted with to perform services.

Rendering/Servicing CHAMPS enrollment instructions can be found on the MDHHS Provider Enrollment page. (Refer to the Directory Appendix for additional information.)

Individuals delivering CHW services to Medicaid beneficiaries are subject to all relevant policy provisions outlined in the MDHHS Medicaid Provider Manual, including the General Information for Providers Chapter.

SECTION 6 – REIMBURSEMENT

6.1 REIMBURSEMENT CONSIDERATIONS AND BILLING GUIDELINES

CHW services are to be reported as follows:

- 98960 (education and training for patient self-management; individual patient)
- 98961 (education and training for patient self-management; 2-4 patients)
- 98962 (education and training for patient self-management; 5-8 patients)

Medicaid-enrolled groups/organizations billing for CHW services must report the enrolled CHW as the rendering/servicing provider within the appropriate field on the claim. The CHW reported as the rendering/servicing provider must be enrolled in CHAMPS on the date of service reported on the claim.

For CHW services rendered to beneficiaries enrolled in a Medicaid Health Plan (MHP) or Integrated Care Organization (ICO), providers will submit claims to the beneficiary's assigned MHP or ICO. If a beneficiary is not enrolled in an MHP or ICO, CHW providers will submit claims for Fee for Service (FFS) reimbursement through CHAMPS.

For additional CHW services billing information, refer to the Billing & Reimbursement for Professionals chapter.

6.2 SERVICE LIMITATIONS AND PRIOR AUTHORIZATION

CHW services are limited to two hours (eight units) per day and 16 visits per month, for a maximum of 32 hours (128 units) per month, per beneficiary. This limit may be exceeded based on medical necessity determined in collaboration with the recommending licensed provider and requires prior authorization. Group services are limited to eight unique beneficiaries at one time. There are no Place of Service (POS) restrictions for CHW services.

6.3 FQHC, RHC, THC AND TRIBAL FQHC REIMBURSEMENT

The following information applies to clinics billing on behalf of CHWs for services provided within the facilities. Services provided by CHWs do not count as a qualifying visit. Federally Qualified Health Centers (FQHCs), Rural Health Clinics (RHCs), Tribal Health Centers (THCs), and Tribal FQHCs furnishing eligible CHW services will be reimbursed outside of the Prospective Payment System (PPS) methodology or All-Inclusive Rate (AIR) methodology at the applicable Medicaid fee screen rates.

CHW services billed by clinics should be billed on the institutional claim form using the Group/ Organizational - Type 2 clinic specialty enrolled NPI. On the institutional claim form, the Attending Provider field line should include an eligible Individual – Type 1 provider. This is the provider responsible for the overall care of the beneficiary at the clinic. Finally, the Individual – Type 1 NPI of the CHW rendering the actual service to the Medicaid beneficiary at the clinic should be listed in the Other/Rendering field line (referring/rendering/ordering).

Medicaid Provider Manual

Procedure code coverage information is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

6.4 HEALTH HOMES

A CHW can serve as a member of the Health Home Care Team (HHCT) as well as be a staff member of the FQHC/Designated Health Home Partner. (Refer to the Directory Appendix for additional information.) The goal of this policy is for CHWs and Health Homes to complement each other and work together for the benefit of the beneficiary. If Medicaid is billed for CHW services and the Health Home is claiming a core service for a month, it is important that the services are separate and distinct. CHW services may not be duplicative of the monthly core services being claimed by a Health Home.

6.5 CERTIFIED COMMUNITY BEHAVIORAL HEALTH CLINIC (CCBHC)

A CHW can serve as part of the CCBHC demonstration staffing structure and associated costs can be included in the PPS rate. If CHW costs are included in a CCBHC's PPS rate, the CCBHC shall not seek additional Medicaid reimbursement for CCBHC-related activities provided by the CHW. Additionally, when CHW costs are included in the PPS rate, CCBHCs must ensure that CHWs operate within requirements of the CHW policy.

6.6 MEDICAID HEALTH PLANS (MHPs) AND INTEGRATED CARE ORGANIZATIONS (ICOs)

MHPs and ICOs who employ CHWs are obligated to adhere to their contractual requirements for CHW certification, enrollment, and services, and may not seek additional reimbursement.

SECTION 7 – SPECIALTY BEHAVIORAL HEALTH PROVIDERS

CHW covered services (outlined in the Covered Services section of this chapter) are included in the Behavioral Health Code Charts and reimbursable through Prepaid Inpatient Health Plans (PIHPs) effective for dates of service on or after October 1, 2024.

7.1 GENERAL INFORMATION

CHWs have an important role promoting health outcomes related to both physical and behavioral health. CHWs can be utilized by specialty behavioral health providers to facilitate access to needed health and social services.

7.2 COVERED SERVICES

Covered services are the same as outlined in the Covered Services section of this chapter.

Peer Support Specialist (PSS) and Peer Recovery Coach (PRC) services are separately covered. Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services chapter for additional information. To seek Medicaid reimbursement for the delivery of CHW services, an individual must meet the requirements outlined in the CHW Qualifications Criteria section of this chapter.

Michigan Department of Health and Human Services

Medicaid Provider Manual

Section 12 – Case Closure.....	27
--------------------------------	----

SECTION 1 – GENERAL INFORMATION

Community Transition Services (CTS) are Home and Community-Based Services (HCBS) for Medicaid beneficiaries who meet eligibility criteria. The benefit is administered by the Michigan Department of Health and Human Services (MDHHS) on a fee-for-service (FFS) basis through transition agencies including Area Agencies on Aging, Centers for Independent Living, and other qualified community-based organizations.

Beneficiaries eligible for CTS include nursing facility and institutional residents who meet needs-based criteria and have at least one risk factor as described in this chapter. Provision of CTS does not relieve institutions of required discharge planning activities.

1.1 DEFINITION OF TERMS

Community Health Automated Medicaid Processing System (CHAMPS)	The MDHHS web-based Medicaid claims and enrollment processing system.
Compass	Web-based information system utilized for tracking beneficiary data.
Michigan Department of Licensing and Regulatory Affairs (LARA)	The State of Michigan agency responsible for professional licensing.

SECTION 2 – BENEFICIARY ELIGIBILITY FOR COMMUNITY TRANSITION SERVICES [CHANGE MADE 4/1/2025]

To be eligible for CTS, beneficiaries must:

- be eligible for Medicaid or have **all** the following:
 - a completed Michigan Medicaid application with all necessary verifications submitted to the local MDHHS office awaiting review;
 - reasonable assurance that local MDHHS office will likely approve the submitted application; and
 - application registration on Bridges as verified by MDHHS.
- be age 65 or older;
- be age 18 through 64 with a physical disability;
- meet one of the following:
 - be at risk of inappropriate institutionalization due to being served in an institution but do not meet the level of care for that institution;
 - indicate on the Freedom of Choice form that they no longer choose to receive long term services and supports in an institutional setting; **or**
 - the beneficiary does not currently reside in a nursing facility or other institution but is at risk of returning to the nursing facility without the provision of CTS. **(text added per bulletin MMP 24-49)**
- meet Needs-Based Criteria identified within this chapter; and
- have at least one risk factor, as identified within this chapter, that cannot be addressed by standard institutional discharge procedures.

2.1 NEEDS-BASED CRITERIA

Beneficiaries must be assessed to minimally meet Needs-Based Criteria under Door A, B, or C.

Door A: Activities of Daily Living (ADLs)	The beneficiary requires assistance to perform at least one ADL or instrumental activity of daily living (IADLs). ADLs include bed mobility, transfers, toilet use, eating, dressing, personal hygiene, bathing, and locomotion. IADLs include shopping, cooking, managing medications, using the phone, housework, laundry, public transportation, or managing finances.
Door B: Cognitive Performance	The beneficiary: <ul style="list-style-type: none">▪ needs minimal assistance in making safe decisions in familiar situations, but experiences some difficulty in decision-making when faced with new tasks or situations due to a short-term memory problem;▪ is assessed with some difficulty making decisions in new situations or makes poor or unsafe decisions in recurring situations; or

Medicaid Provider Manual

	<ul style="list-style-type: none">▪ is assessed to be usually understood and needs assistance (i.e., little or no prompting) finding the right words or finishing thoughts due to a short-term memory problem.
Door C: Behavior	The beneficiary is assessed to have required assistance managing one of the following challenging behaviors in the last seven (7) days: wandering, verbally abusive, physically abusive, socially inappropriate/disruptive, or resisted care.

2.2 RISK FACTORS

Beneficiaries must have at least one of the following risk factors:

- history or at risk of inability to secure or retain housing in the community;
- history or at risk of inability to secure HCBS without assistance;
- history or at risk of inability to secure documentation needed for independent living without assistance, including identification cards, health insurance cards, birth certificate, etc.; or
- history of an unsafe or inaccessible living environment.

2.3 RE-EVALUATION OF ELIGIBILITY

Individuals who have been approved to receive CTS must have an annual re-evaluation of their eligibility. This includes a re-evaluation of eligibility criteria mentioned above as well as a re-assessment using the community transition assessment.

SECTION 3 – COVERED SERVICES [CHANGE MADE 4/1/2025]

To qualify for CTS, beneficiaries must receive **monthly monitoring** and at least one of the transition services outlined in the Transition Navigation Case Management subsection of this chapter every three months. Transition services are not available through a self-directed arrangement. **(revised per bulletin MMP 24-49)**

3.1 TRANSITION NAVIGATION CASE MANAGEMENT

Transition Navigator (TN) services are provided to ensure the delivery of supports and services needed to meet the beneficiary's goals for living in the community after an institutionalization. The TN functions to be performed and the frequency of face-to-face and other contacts are specified in the beneficiary's person-centered service plan (PCSP). The frequency and scope of TN contacts must take into consideration the health and welfare needs of the beneficiary. TN services may include the direct provision of CTS as specified in the PCSP.

Functions performed by the TN include:

- Conducting the initial and subsequent needs-based criteria evaluation and community transition assessment, and providing that evaluation to MDHHS for approval.
- Annual reassessment and re-evaluation of Medicaid eligibility.
- Gathering, reviewing, documenting, and updating information relating to the assessment and beneficiary's history (i.e., medical, social, etc.).
- Supporting a person-centered planning (PCP) process that:
 - focuses on the beneficiary's preferences;
 - includes family and other allies as determined by the beneficiary;
 - identifies the beneficiary's goals, preferences and needs;
 - provides information about options; and
 - focuses on engaging the beneficiary in monitoring and evaluating services and supports.
- Developing a PCSP using the PCP process, including revisions to the plan at the beneficiary's request or as changes in the beneficiary's circumstances may warrant.
- Conducting the PCP meeting.
- Completing the PCSP.
- Referral to and coordination with providers of home and community-based services and supports, including non-Medicaid services and informal supports. This may include helping with access to entitlements or legal representation.
- Monitoring of the services and supports identified in the PCSP for achievement of the beneficiary's goals. Monitoring includes opportunities for the beneficiary to evaluate the quality of services received and whether those services achieved desired outcomes. This activity includes the beneficiary and other key sources of information as determined by the beneficiary.

Medicaid Provider Manual

- Providing social and emotional support to the beneficiary and allies to facilitate life adjustments and reinforce the beneficiary's sources of support. This may include arranging services to meet those needs.
- Providing advocacy in support of the beneficiary's access to benefits, ensuring the beneficiary's rights as a Medicaid beneficiary, and supporting the beneficiary's decisions.
- Monitoring the beneficiary after the community transition to ensure a successful adjustment to community life, including ensuring access to and enrollment in needed HCBS programs.
- Maintaining documentation of the above listed activities to ensure successful support of the beneficiary, compliance with Medicaid and other relevant policies, and meeting quality assurance and quality improvement requirements.
- Conducting a tenant screening and housing assessment that identifies the beneficiary's preferences and barriers related to successful tenancy. The assessment may include collecting information on potential housing transition barriers, and identification of housing retention barriers.
- Developing an individualized housing support plan based upon the housing assessment that addresses identified barriers, includes short- and long-term measurable goals for each issue, establishes the beneficiary's approach to meeting the goal, and identifies when other providers or services, both reimbursed and not reimbursed by Medicaid, may be required to meet the goal.
- Assisting with the housing search and application process.
- Identifying resources to cover expenses such as security deposit, moving costs, furnishings, adaptive aids, environmental modifications, and other one-time expenses.
- Completing documentation needed to secure services.
- Ensuring that the living environment is safe and ready for move-in.
- Assisting in, arranging for, and supporting the details of the move.
- Developing a housing support crisis plan that includes prevention and early intervention services when housing is jeopardized.
- Providing early identification and intervention for behaviors that may jeopardize housing, such as late rental payment and other lease violations.
- Education and training on the roles, rights, and responsibilities of the tenant and landlord.
- Coaching on developing and maintaining key relationships with landlords and property managers with a goal of fostering successful tenancy.
- Assistance in resolving disputes with landlords and neighbors to reduce risk of eviction or other adverse action.
- Advocacy and linkage with community resources to prevent eviction when housing is, or may potentially become, jeopardized.
- Assistance with the housing recertification process.
- Coordinating with the beneficiary to review, update and modify their housing support and crisis plan on a regular basis to reflect current needs and address existing or recurring housing retention barriers.

Medicaid Provider Manual

- Continuing training in being a good tenant and lease compliance, including ongoing support with activities related to household management.
- If risks are identified during the PCP process, discuss with the beneficiary any strategies to mitigate those risks.

3.1.A. TRANSITION NAVIGATOR PROVIDER QUALIFICATIONS

Provider Type	License or Other Standard	Verification (Annual)
Registered Nurse (RN)	RN, licensed in Michigan	LARA, CHAMPS
Social Worker	Limited or full license: Limited License Bachelor of Social Work (LLBSW), Limited License Master of Social Work (LLMSW), Licensed Baccalaureate Social Worker (LBSW), or Licensed Master Social Worker (LMSW), licensed in Michigan	LARA, CHAMPS
Other Transition Navigator	Non-licensed or other licensed health care professional with the following qualifications: <ul style="list-style-type: none">▪ a bachelor's degree in a health or human services field or Community Health Worker certification, and▪ at least three years of experience in the provision of health or social services. If licensed, must be licensed in Michigan.	CHAMPS

3.2 COMMUNITY TRANSITION SERVICES [CHANGE MADE 4/1/2025]

CTS are non-reoccurring expenses necessary to enable a beneficiary who is transitioning from a nursing facility or other institutional setting to the community to establish a basic household and do not constitute room and board. This service is available while in the institution to prepare the beneficiary's chosen home and to accommodate a successful discharge to the community. This service may be available in the community when additional needs that were not accounted for prior to discharge are identified.

CTS includes the following:

- Security deposits and fees for community living, (**revised per bulletin MMP 24-49**)
- Set-up fees for utilities or service access, including telephone, electricity, heating and water,
- Essential household furnishings and moving expenses required to occupy and use a community domicile, including furniture, window coverings, food preparation items, and bed and bath linens, and
- Services necessary for the beneficiary's health and safety, such as pest eradication, allergen control, and one-time cleaning prior to occupancy.

Some items or services under CTS may require prior authorization from MDHHS. (Refer to the Directory Appendix for website information related to the Transition Services Coding Structure.)

Medicaid Provider Manual

3.2.A. LIMITATIONS

CTS are furnished only to the extent that they are reasonable and necessary as determined through the PCSP development process, clearly identified in the PCSP and only when the beneficiary is unable to meet such expense, or when the services cannot be obtained from other sources. CTS do not include monthly rental or mortgage expenses, food, regular utility charges, or household appliances or items that are intended for purely diversional or recreational purposes.

Personal emergency response systems provided as a transition service are limited to those that do not have ongoing monthly fees and are a one-time purchase.

3.2.B. PROVIDER QUALIFICATIONS

Provider Type	License or Other Standard	Verification	Frequency of Verification
Center for Independent Living	Enrolled as Medicaid Provider in CHAMPS	LARA, CHAMPS	Annually
Area Agency on Aging	Enrolled as Medicaid Provider in CHAMPS	LARA, CHAMPS	Annually
Community Based Organization	Enrolled as Medicaid Provider in CHAMPS	CHAMPS	Annually
Retail Stores	Items purchased from retail stores must meet the CTS definition.	Transition Agency	Prior to furnishing services and annually thereafter.
Contractor, Builder	Licensed Contractor or Builder. Licensed in Michigan	LARA	Annually

3.3 NON-MEDICAL (NON-EMERGENCY) TRANSPORTATION

Non-Medical (Non-Emergency) Transportation (NMNET) is offered to enable beneficiaries to gain access to community services, activities and resources specified by the beneficiary's PCSP.

NMNET services may be provided while in the community to address issues identified on the PCSP. This may include, but is not limited to, going to the grocery store, religious services, volunteering, or work.

This service is available while in the institution, though limited to visiting potential community-based residences and travel to businesses or agencies to address barriers to community-based living. Examples of transportation to a business or agency to address a barrier would be to go to the bank to open an account, or the local Secretary of State office to obtain a State Identification Card.

The fee schedule established by MDHHS for the Non-Emergency Medical Transportation (NEMT) service must be utilized for this NMNET service. Transition agencies may request prior authorization for reimbursement rates that are higher than the NEMT rates.

Medicaid Provider Manual

3.3.A. LIMITATIONS

Whenever possible, family, neighbors, friends or community agencies that can provide transportation without charge must be utilized before authorizing this transition service. NMNET services offered are not available through the State Plan and are in addition to medical transportation required under 42 CFR 431.53 and transportation services under the State Plan, defined at 42 CFR 440.170(a). This service does not include purchasing, leasing, repair or maintenance of vehicles.

This service may not be authorized to reimburse caregivers to run errands for beneficiaries when the beneficiary does not accompany the driver of the vehicle. The purpose of this service is to enable the beneficiary to gain access to their community services, activities, and resources.

Reimbursement does not include expenses for meals or lodging incurred while traveling.

3.3.B. PROVIDER QUALIFICATIONS

Provider Type	License or Other Standard	Responsible for Verification	Frequency of Verification
Individual (paid or volunteer, no familial relationship)	Must have Michigan Driver's License and be enrolled in CHAMPS.	Transition Agency	Annually
	All drivers must have vehicle insurance as required by the State of Michigan. All drivers must follow all motor vehicle laws. All passengers must comply with seat belt laws.	Secretary of State	Every 4 years (renewal of Driver's License)
Public Transit	Must have Michigan Driver's License. Must follow all applicable laws, including licensure, inspections, vehicle maintenance, etc.	Secretary of State	Annually
Private/Commercial/Non-Profit Transportation Company	Must have Michigan Driver's License and be enrolled in CHAMPS. Must follow all applicable laws, including licensure, inspections, insurance, vehicle maintenance, etc. Must include passenger assistance in the provision of service when needed by passenger.	Secretary of State	Annually

3.4 HOME MODIFICATIONS

Home modifications include physical adaptations to the home that, according to the PCSP, are necessary to ensure the health and welfare of the beneficiary or that enable the beneficiary to function with greater independence in the home. Assessments and specialized training needed in conjunction with the home modifications are included as part of the cost of the service.

This service is available while in the institution to prepare the beneficiary's chosen home and to accommodate a successful discharge to the community. This service may be available in the community

when additional needs that were not accounted for prior to discharge are identified. Claims for this service will not be billed until the beneficiary is discharged from the institution.

Home modifications may include:

- installation of ramps and grab bars;
- widening of doorways to accommodate medical equipment such as a wheelchair or walker;
- modification of bathroom facilities to make them accessible to the beneficiary;
- modification of kitchen facilities to make them accessible to the beneficiary;
- installation of specialized electrical and plumbing systems that are necessary to accommodate the medical equipment and supplies necessary for the welfare of the beneficiary; and
- environmental control devices that replace the need for paid staff and increase the beneficiary's ability to live independently, such as automatic door openers or locks.

The case record must document that the home modification is the most cost-effective and reasonable alternative to meet the beneficiary's need. An example of a reasonable alternative, based on the results of a review of all options, may include changing the purpose, use, or function of a room within the home (e.g., converting a dining room on the main floor to a bedroom) or finding alternative housing.

The provider must comply with all local building codes, as applicable. The infrastructure of the home involved in the funded modification must comply with all applicable local codes and have the capability to accept and support the changes.

All home modifications require prior authorization from MDHHS.

3.4.A. LIMITATIONS

The services under the home modification service are limited to additional services not otherwise covered under the State Plan, including Early and Periodic Screening, Diagnosis, and Treatment (EPSDT).

Home modifications required to support proper functioning of medical equipment, such as electrical upgrades, are limited to the requirements for safe operation of the specified equipment and are not intended to correct existing code violations in a beneficiary's home.

Home modifications will not be approved for rental properties without a close examination of the rental agreement and the proprietor's responsibility to furnish the modification.

Home modifications are not available for condemned structures and must not result in valuation of the structure significantly above comparable neighborhood real estate values.

Home modifications cannot increase the square footage of the home.

Medicaid Provider Manual

Other exclusions are those modifications that:

- are of general utility;
- are considered standard housing obligations of the beneficiary or homeowner; and
- are not of direct medical or remedial benefit to the beneficiary.

Examples of exclusions are:

- carpeting
- roof repair
- sidewalks and driveways
- heating
- central air conditioning
- garages and raised garage doors
- storage and organizers
- hot tubs, whirlpool tubs, and swimming pools
- landscaping
- general home repairs or maintenance

Some exceptions may be considered on a case-by-case basis.

Home modifications exclude costs for improvements exclusively required to meet local building codes.

Home modifications exclude general construction costs in a new home or additions to a home purchased by the beneficiary. If a beneficiary or the beneficiary's family purchases or builds a home while in the process of transitioning, it is the beneficiary's or family's responsibility to ensure the home will meet basic needs (such as having a ground floor bath or bedroom when the beneficiary has mobility limitations). However, home modifications may include assistance with the adaptations noted above (e.g., ramps, grab bars, widening doorways, bathroom modifications, etc.) for a recently purchased home.

If modifications are needed to a home under construction that require special adaptation to the plan (e.g., roll-in shower), the home modification service may be used to fund the difference between the standard fixture and the modification required to accommodate the beneficiary's need.

Billing for home modifications must not be done until the service is completed.

Medicaid Provider Manual

3.4.B. PROVIDER QUALIFICATIONS

Provider Type	License or Other Standard	Responsible for Verification	Frequency of Verification
Individual	Licensed builder or licensed contractor Michigan license under: MCL 339.601(1), MCL 339.601.2401(1), MCL 339.601.2403(3)	Transition Agency	Prior to provision of services and annually thereafter
		LARA	Annually
Retail Store	Items purchased from retail stores must meet the home modifications service definition.	Transition Agency	Prior to furnishing services and annually thereafter.
Agency/Business	Licensed builder or licensed contractor Michigan license under: MCL 339.601(1), MCL 339.601.2401(1), MCL 339.601.2403(3)	Transition Agency	Prior to provision of services and annually thereafter
		LARA	Annually

3.5 HOME AND COMMUNITY-BASED SERVICES PERSONAL CARE [CHANGE MADE 4/1/2025]

Home and Community-Based (HCBS) Personal Care Services enable beneficiaries with functional limitations resulting from a medical or physical disability or cognitive impairment to live independently and receive care in the least restrictive setting preferred by the beneficiary. HCBS Personal Care Services include the provision of assistance with ADLs (eating, toileting, bathing, grooming, dressing, transferring, and mobility) and IADLs (taking medication, meal preparation, shopping for food or other necessities, laundry, and housekeeping).

HCBS Personal Care Services provided while in the community are limited to beneficiaries who are not eligible for State Plan Personal Care Services (Home Help) or who require personal care services to begin before State Plan Personal Care Services or other HCBS services (e.g., Program of All-Inclusive Care for the Elderly [PACE], MI Health Link, MI Choice) can be authorized. Beneficiaries must not receive both State Plan Personal Care Services and HCBS Personal Care Services at the same time. HCBS Personal Care Services may also be authorized when a beneficiary's needs change and they are unable to quickly secure other personal care services available through the State Plan or a waiver. Services cannot duplicate, replace or supplant other available State Plan services. Beneficiaries enrolled in another HCBS program offering similar services must receive personal care services through that program.

(text deleted per bulletin MMP 24-49) Claims for this service will not be billed until the beneficiary has transitioned to the community.

Medicaid Provider Manual

MDHHS utilizes the reimbursement structures established for State Plan Personal Care Services. The State-developed fee schedule rates depend on the beneficiary's county of residence and whether the provider is an individual or agency. State-developed rates are published on the MDHHS website. (Refer to the Directory Appendix for website information.)

HCBS Personal Care Services require prior authorization based upon a review of the PCSP and the beneficiary's assessed needs.

3.5.A. PROVIDER QUALIFICATIONS

Provider Type	License or Other Standard	Responsible for Verification	Frequency of Verification
Individual	Must be enrolled in CHAMPS. Must not have any excludable convictions based upon a background check. Must be able to meet the needs of the beneficiary as specified in the PCSP.	Transition Agency	Prior to provision of services and annually thereafter
Agency/Business	Must be enrolled in CHAMPS. Employees and other key staff must not have any excludable convictions based upon a background check. Employees must be able to meet the needs of the beneficiary as specified in the PCSP.	Transition Agency	Prior to provision of services and annually thereafter

3.6 100% STATE FUNDED SERVICES [SUBSECTION ADDED 4/1/2025]

MDHHS allows the following services to be provided to beneficiaries when they are necessary to facilitate a transition to the community. These services are not eligible for Federal Financial Participation.

- First month's rent.
- Payment of delinquent debt that interferes with securing a home in the community.
- A limited quantity of groceries.
- Fees necessary for community living, including fees for a birth certificate, credit checks, or housing application fees required to obtain a lease on an apartment or home.
- Non-emergency, non-medical transportation while in the institution which is limited to visiting potential community-based residences and travel to businesses or agencies to address barriers to community-based living. Examples include going to the bank to open an account or the local Secretary of State office to obtain a State Identification Card.
- Appliances necessary for community-based living.
- Court costs for adding or removing guardianship or conservatorship.

Medicaid Provider Manual

- Personal Care Services provided while the beneficiary is in the institution. These are limited to a one- to three-day trial period in the community-based residence. **(text added per bulletin MMP 24-49)**

3.7 CONFLICT OF INTEREST STANDARDS [RE-NUMBERED 4/1/2025]

The conflict of interest standards for CTS ensure, at a minimum, that persons performing evaluations, assessments, and PCSP functions are not:

- related by blood or marriage to the beneficiary, or any paid caregiver of the beneficiary;
- financially responsible for the beneficiary;
- empowered to make financial or health-related decisions on behalf of the beneficiary; or
- providers of State Plan HCBS for the beneficiary, or those who have interest in or are employed by a provider of State Plan HCBS, except, at the option of the State, when providers are given responsibility to perform assessments and PCSPs because such individuals are the only willing and qualified entity in a geographic area, and the State devises conflict of interest protections.
- TNs who provide 1915(i) services cannot also be supports coordinators for MI Choice Waiver services.

SECTION 4 – PERSON-CENTERED PLANNING

MDHHS requires that transition agencies and TNs use a person-centered approach in working with beneficiaries.

PCP is a process for planning and supporting a beneficiary that builds on the beneficiary's desire to engage in activities that promote community life and that honor that beneficiary's preferences, choices, and abilities. The PCP process involves families, friends, and professionals as the beneficiary desires. TNs must utilize a PCP process that includes assessing the needs and desires of the beneficiary, developing the PCSP, and continuously updating and revising those plans as the beneficiary's needs and desires change. The beneficiary and their chosen representative(s) must be provided with written information from the transition agency explaining their right to participate in the PCP process. Transition agencies must implement the PCP process in accordance with MDHHS guidelines.

PCP meetings are conducted when the beneficiary is not in crisis and at a time of the beneficiary's choice. The beneficiary has authority to determine who will be involved in the PCP process as well as a time and location that meets the needs of all individuals involved in the process.

A pre-planning session may occur prior to the first PCP meeting. During the pre-planning session, the beneficiary chooses desires, goals and other topics they would like to discuss, who to invite to the PCP meetings, who will facilitate and record the meeting, and a time and location that meets the needs of everyone involved in the process. The beneficiary and chosen allies design the agenda for the PCP meeting.

The PCP process results in development of the PCSP. The PCSP may otherwise be referred to as a person-centered transition plan (PCTP). Both terms may be used interchangeably for the same plan.

4.1 PERSON-CENTERED SERVICE PLAN

The PCSP is an individualized, comprehensive document developed by the beneficiary, their chosen representatives, and TN. The TN must establish a written PCSP that is based on the beneficiary's expressed needs and desires. The PCSP identifies the beneficiary's strengths, weaknesses, needs, goals, expected outcomes, and planned interventions. The document includes all services provided to, or needed by, the beneficiary regardless of funding source. The PCSP includes the amount, frequency, and duration of each service. If risks were discussed during the PCP meeting, beneficiary-approved strategies to mitigate those potential risks are documented in the PCSP.

The beneficiary must approve all services and interventions before implementation, and the TN must document the beneficiary's approval. Regular updates to the PCSP occur when the need for services or circumstances change, or otherwise upon the request of the beneficiary, but at least once every year.

The PCSP must reflect the services and supports that are important for the beneficiary to meet the needs identified through an assessment of functional need, as well as what is important to the beneficiary regarding preferences for the delivery of such services and supports. Commensurate with the level of need of the beneficiary, and the scope of services and supports available, the PCSP must:

- Reflect that the setting in which the beneficiary resides is chosen by the beneficiary. The setting chosen by the beneficiary must be integrated in and support full access of beneficiaries receiving Medicaid HCBS to the greater community, including opportunities to seek employment and work

Medicaid Provider Manual

in competitive integrated settings, engage in community life, control personal resources, and receive services in the community to the same degree of access as individuals not receiving Medicaid HCBS.

- Reflect the beneficiary's strengths and preferences.
- Reflect clinical and support needs as identified through an assessment of functional need.
- Include individually identified goals and desired outcomes.
- Reflect the services and supports (paid and unpaid) that will assist the beneficiary to achieve identified goals, and the providers of those services and supports, including natural supports. Natural supports are unpaid supports that are provided voluntarily to the beneficiary in lieu of other services.
- Reflect risk factors and measures in place to minimize them, including individualized backup plans and strategies when needed.
- Be understandable to the beneficiary receiving services and supports, and the individuals important in supporting them. At a minimum, for the written plan to be understandable, it must be written in plain language and in a manner that is accessible to individuals with disabilities and persons who are limited English proficient.
- Identify the individual or entity responsible for monitoring the plan.
- Be finalized and agreed to, with the informed consent of the beneficiary in writing, and signed by all individuals and providers responsible for its implementation.
- Be distributed to the beneficiary and other individuals involved in the plan.
- Prevent the provision of unnecessary or inappropriate services and supports.
- Document that any modifications of the additional conditions specified in the Home and Community Based Services chapter of this manual must be supported by a specific assessed need and justified in the PCSP. The following requirements are documented in the PCSP:
 - identify a specific and individualized assessed need;
 - document the positive interventions and supports used prior to any modifications to the PCSP;
 - document less intrusive methods of meeting the need that have been tried but did not work;
 - include a clear description of the condition that is directly proportionate to the specific assessed need;
 - include a regular collection and review of data to measure the ongoing effectiveness of the modification;
 - include established time limits for periodic reviews to determine if the modification is still necessary or can be terminated;
 - include informed consent of the beneficiary; and
 - include an assurance that the interventions and supports will cause no harm to the beneficiary.

SECTION 5 – ASSESSMENT AND REASSESSMENT

TNs will obtain information from applicants using a community transition assessment approved by MDHHS. The assessment tool contains information about the beneficiary's ability to perform ADLs and IADLs, informal support network, goals for community living, available resources, identification of barriers to transition, how the beneficiary would like to overcome those barriers, and need for CTS. The assessment information will be submitted to MDHHS via the Nursing Facility Transition (NFT) Portal in Compass. MDHHS will review the documentation submitted to verify the beneficiary has Medicaid eligibility and meets the needs-based criteria.

If MDHHS does not have enough information to make an eligibility determination, MDHHS will request additional information from the TN. The TN must provide the additional information if it can be obtained. MDHHS reserves the right to evaluate the applicant in person to confirm that they meet all eligibility requirements for CTS.

During the re-evaluation, the TN will update the community transition assessment tool, including the PCSP. This updated information will be added to the NFT Portal for MDHHS review. MDHHS will review the documentation to ensure the beneficiary still meets criteria for continued receipt of CTS. Beneficiaries must receive at least one of the CTS every three months, and the TN must conduct monthly monitoring.

MDHHS requires TNs to report the initial assessment date and the transition date to MDHHS within the NFT Portal.

Needs-based eligibility re-evaluations are conducted at least every 12 months.

Claims for services will include the actual date of service provision.

SECTION 6 – HOME AND COMMUNITY-BASED SETTINGS

Settings in which a beneficiary resides or receives services must comply with the federal HCBS settings rules, the Home and Community-Based Services policy chapter of this manual, and the Statewide Transition Plan. Transition agencies must ensure that settings to which beneficiaries transition meet federal HCBS settings rules.

Transition agencies must educate beneficiaries that if they choose to live in a setting that does not meet the HCBS settings criteria, Medicaid cannot pay for CTS after the transition date. Medicaid will not pay room and board.

SECTION 7 – BILLING PROCESS

7.1 EXPENDITURE REPORTS

Transition Services Expenditure Reports for CTS provided must be submitted to MDHHS by the 15th day of the month following the month the service was provided. For example, the expenditure report for services provided in January must be submitted to MDHHS by February 15.

The community transition assessment must be updated prior to or upon submission of the Expenditure Report so documentation supports billed services. The NFT Notice must be approved by MDHHS. All expenditures must comply with the established coding structure for CTS (refer to Directory Appendix). Services or items requiring prior authorization will not be payable until approved by MDHHS. Expenditure Reports must be signed by the transition agency prior to submission to MDHHS.

7.2 CHAMPS BILLING

When available, claims must be submitted in CHAMPS. The Professional Invoice claim will be used. Claims may be submitted into CHAMPS via direct data entry or 837P files. Refer to the General Information for Providers and the Billing & Reimbursement for Providers chapters of this manual for claim submission instructions.

The transition agency is the billing provider and will need to have a National Provider Identifier (NPI).

The rendering provider is whomever is providing the service. This provider must have either an NPI or CHAMPS Provider ID. The rendering provider will be included in the header or line on the claim in CHAMPS.

If prior authorization is required for the item or service, the approved prior authorization number must be included on the claim in the "Prior Authorization Number" field.

7.3 PRIOR AUTHORIZATION [CHANGE MADE 4/1/2025]

The prior authorization process is used to approve a specific reimbursement rate for one-time items/services received by a beneficiary. The nature of some CTS makes them inappropriate for fee or frequency screens. There may be instances when a beneficiary has a legitimate need for an item or service that is more expensive than the fee or frequency screen allows. **(text deleted)** Procedure codes must be submitted along with the prior authorization request. Until CHAMPS is programmed to accept prior authorizations for CTS, the Exceptions Process in the NFT Portal must be used.

Claims for all Medicaid-eligible beneficiaries must be submitted in CHAMPS. Providers will use the Professional Invoice claim.

Claims may be submitted into CHAMPS via direct data entry or 837P files. Refer to the General Information for Providers and the Billing & Reimbursement for Providers chapters of this manual for claim submission instructions. **(text revised per bulletin MMP 24-49)**

7.4 EXAMPLES OF NON-BILLABLE SERVICES OR TASKS [CHANGES MADE 4/1/2025]

Some tasks performed by transition agencies are not billable. Some examples of these tasks are:

- TN travel time (non-face-to-face visits)
- TN time off (sick leave, vacation)
- Unsuccessful attempts to contact the beneficiary or others on their behalf
- Staff meetings and trainings
- Contact with support staff within the agency
- Filing
- Reviewing case files for quality assurance
- Activities provided by anyone who does not qualify as a TN
- Fees for community living (text revised/added per bulletin MMP 24-49)

SECTION 8 – CRITICAL INCIDENT RESPONSE AND REPORTING

TNs are required to track and to report certain events that may indicate exceptional risk to the beneficiary.

8.1 TYPES OF CRITICAL INCIDENTS AND SERIOUS EVENTS

The following are specific critical incidents or serious events that must be reported to MDHHS:

- Provider No Show, particularly when the beneficiary is bed-bound all day or there is a critical need for the service to be provided
- Exploitation
- Illegal activity in the home with potential to cause a serious or major negative event
- Medication error
- Neglect
- Physical abuse
- Sexual abuse
- Suicide attempts
- Unexpected/unexplained death related to providing services, supports, or care
- Theft
- Verbal abuse
- Worker consuming drugs/alcohol on the job
- Restraints, seclusion or restrictive interventions

8.2 CRITICAL INCIDENT RESPONSE

TNs have the initial responsibility for identifying, investigating, evaluating, and responding to critical incidents that occur with beneficiaries as listed above. All suspected incidents of abuse, neglect, and exploitation require reporting to MDHHS Adult Protective Services (APS) for investigation and follow-up. TNs must begin investigating and evaluating critical incidents within two business days of the date it was noted that an incident occurred. Suspicious or unexpected death that is also reported to law enforcement agencies must be reported to MDHHS within two business days.

Each transition agency is required to maintain written policy and procedures defining appropriate action to take upon suspicion or determination of abuse, neglect or exploitation. The policies and procedures must include procedures for follow-up activities with MDHHS-APS to determine the result of the reported incident and the steps to be taken if the results are unsatisfactory. All reports to MDHHS-APS must be maintained in the beneficiary's case record.

8.3 CRITICAL INCIDENT REPORTING

TNs are responsible for tracking and responding to critical incidents using the Critical Incident Reporting web-based system. TNs are required to report the type of critical incidents, the responses to those incidents, and the outcome and resolution of each event within 30 days of the date of knowledge of the incident. The critical incident system allows MDHHS to review the reports in real time and ask questions or address concerns with the transition agencies. MDHHS must receive notification from transition agencies of suspicious deaths within two business days.

SECTION 9 – ENROLLMENT IN OTHER PROGRAMS

Some beneficiaries may choose to enroll in other Medicaid programs such as the MI Choice Waiver, MI Health Link, PACE, or Home Help after the discharge from the nursing facility. TNs may follow these beneficiaries for up to 30 days to ensure previously planned services are completed. Once the beneficiary is enrolled in these other programs, the transition agency must not bill for any new CTS for which there are similar services offered through the other program.

If a beneficiary is enrolled in Medicaid managed care with a Medicaid Health Plan, the TN must keep the health plan informed that transition work is occurring and when the transition from the institution to a community setting occurs.

If the beneficiary is enrolled in the MI Health Link program when the CTS referral is made to the transition agency, the transition agency must refer that beneficiary back to the MI Health Link Integrated Care Organization with which the beneficiary is enrolled.

SECTION 10 – PROVISION OF NOTICES

Transition agencies must provide each beneficiary the appropriate Adverse Action Notice when the agency terminates, suspends, or reduces previously authorized services, or denies a request for enrollment or additional services. The types of Adverse Action Notices are: 1) Adequate Action Notice, and 2) Advance Action Notice.

10.1 ADEQUATE ACTION NOTICE

The Adequate Action Notice is a written statement advising the beneficiary of a decision to deny or limit authorization of Medicaid services requested. This notice is provided on the same date the action takes effect.

An Adequate Action Notice is also sent to the beneficiary in the following circumstances:

- when the transition agency is unable to schedule an appointment for the community transition assessment within one week of receiving the referral;
- the beneficiary discharges from an institution prior to the transition agency contacting the beneficiary and the assessment could not be conducted;
- the transition agency has information confirming the death of the beneficiary;
- the transition agency receives a clearly written statement signed by a beneficiary who no longer wishes to receive services;
- the beneficiary gives information that requires the termination of services and indicates that they understand termination is the result of supplying this information;
- the beneficiary's whereabouts are unknown and mail is returned without a forwarding address;
- the transition agency determines the beneficiary has eligibility for Medicaid in a different jurisdiction; and
- the date of the action will occur in less than 10 days.

The Adequate Action Notice must contain:

- a statement of the action being taken;
- the reason for the action;
- the regulation(s) that supports the action;
- an explanation of the beneficiary's right to request a State Fair Hearing and instructions for doing so; and
- an explanation that the beneficiary may have self-representation or use legal counsel or another spokesperson.

10.2 ADVANCE ACTION NOTICE

The Advance Action Notice is a written statement advising the beneficiary of a decision to reduce, suspend, or terminate Medicaid services currently provided. This notice is provided at least 10 days prior to the effective date of the action.

The Advance Action Notice must include:

- all Adequate Action Notice requirements;
- the circumstance under which services will be continued pending resolution of the appeal;
- how to request that benefits be continued; and
- the circumstances under which the beneficiary may be required to pay the costs of these services.

10.3 CONTINUATION OF SERVICES

The transition agency must continue services after the Advance Action Notice when the following are true:

- the beneficiary specifically requests services to continue and files the appeal within 10 days of the date of the notice;
- the appeal involves termination, suspension, or reduction of a previously authorized service; and
- the period covered by the original authorization has not expired.

10.4 EXCEPTIONS TO ADVERSE ACTION NOTICES

There are some exceptions to sending Adverse Action Notices. No notice is necessary if the services were for a clearly defined length of time and that length of time has expired according to the PCSP as approved by the beneficiary or their chosen representative, or the service was offered on a one-time only basis.

An Adverse Action Notice is also not required when the determination is a result of a State Fair Hearing decision.

10.5 EXCEPTIONS TO ADVANCE ACTION NOTICE

There are exceptions to sending an Advance Action Notice. According to 42 CFR §431.213, the transition agency may send an Adequate Action Notice in lieu of an Advance Action Notice no later than the date of action if:

- the transition agency has information confirming the death of the beneficiary;
- the transition agency receives a signed, written statement by the beneficiary that:
 - indicates the choice to no longer receive services; or
 - gives information that requires termination or reduction in services and indicates that they understand that this must be the result of sharing that information;
- the beneficiary has been admitted to a penal institution (jail or prison), making the beneficiary ineligible for CTS;
- the beneficiary's whereabouts are unknown and mail is returned with no forwarding address;

Medicaid Provider Manual

- the beneficiary has been accepted for Medicaid services in another locality, state, territory, or commonwealth; or
- there is a change in the level of medical care needed according to the beneficiary's physician.

SECTION 11 – QUALITY ASSURANCE REVIEWS

To ensure the highest quality of services and supports, MDHHS operates a comprehensive quality management system that incorporates evaluations of various aspects of the CTS program. The quality assurance process evaluates beneficiary satisfaction, service provision, service plan development and maintenance, beneficiary records, responses to critical incidents, and other topics. Transition agencies are required to comply with MDHHS requests and requirements for the quality assurance process.

SECTION 12 – CASE CLOSURE

There is no set time limit on how long an individual may use CTS. In general, individuals who transition from the nursing facility are linked to HCBS programs. Once the individual begins receiving services from another program, the need for CTS may end.

- MDHHS allows up to 30 days to facilitate a transfer from CTS to a HCBS program.
- If all is going well with the individual, the transition navigator should close the individual's case at the end of 30 days.
- Reasons for keeping the case open longer than 30 days after starting HCBS must be clearly documented in the case record and approved by MDHHS Home and Community-Based Services Section.
- Not all individuals who transition will qualify for or choose HCBS programs. These individuals may remain open to CTS if they continue to meet eligibility criteria, including the demonstrated and documented need for at least one community transition service on a monthly basis.
- A case may also be closed if the beneficiary is deceased or otherwise not eligible, or has refused services or moved out of the service area and chosen to work with another transition agency.

Medicaid Provider Manual

SECTION 1 – GENERAL INFORMATION

This chapter applies to dental providers and dental clinics.

Throughout this chapter, the term Medicaid refers to all programs administered by Michigan Department of Health and Human Services (MDHHS), including Healthy Michigan Plan (HMP), *Healthy Kids Dental (HKD)*, MICHild, and other programs, unless specifically stated otherwise. The primary objective of Medicaid is to ensure that essential health care services are made available to those individuals who would not otherwise have the financial resources to purchase them. Policies are aimed at maximizing medically necessary health care services available to eligible Medicaid beneficiaries.

Dental services may be provided by Medicaid-enrolled providers when performed by properly credentialed/licensed professionals acting within their scope of practice as defined in State law, including any applicable supervision requirements. Dental services that may be provided to Medicaid beneficiaries include emergency, diagnostic, preventive, and therapeutic services for dental disease which, if left untreated, would become acute dental problems or cause irreversible damage to teeth or supportive structures. Determination of medical necessity and appropriateness of services is the responsibility of the dental provider within the scope of current accepted dental practice and the limitations of Medicaid policy.

It is important to verify beneficiary eligibility at every appointment before providing dental services. Dental services provided to an ineligible beneficiary will not be reimbursed.

In compliance with uniform billing, Medicaid follows the Code on Dental Procedures and Nomenclature (CDT) standard procedure codes and descriptions published by the American Dental Association (ADA). Dental providers are required to retain documentation in the beneficiary's dental record that supports the procedure code billed and any information required by the CDT procedure code description. Documentation, including narrative and operative notes, must be sufficiently detailed for audit purposes and made available to MDHHS upon request. For claims that require diagnosis reporting, ICD-10 diagnosis codes must be valid, contain the required number of characters, and be reported at the highest level of specificity based on the information available. (Refer to the General Information for Providers and the Billing & Reimbursement for Dental Providers chapters of this manual for additional information.)

In cases where MDHHS determines that the dental provider did not provide service(s) within the scope of current accepted dental practice or the service(s) was not provided within the limitations of Medicaid policy, MDHHS may:

- Require the service(s) to be immediately provided.
- Require the dental provider to repeat the service(s) at no additional charge.
- Refuse payment to the dental provider for the service(s).
- Recover reimbursement from the dental provider for the service(s).

1.1 DENTAL PROGRAM COVERAGE

1.1.A. EARLY AND PERIODIC SCREENING, DIAGNOSIS AND TREATMENT

The Early and Periodic Screening, Diagnosis and Treatment (EPSDT) program is available to all Medicaid beneficiaries under 21 years of age. This program was established to detect and correct or ameliorate defects and physical and mental illnesses and conditions discovered in children. Under EPSDT, dental services are to be provided at intervals which meet reasonable standards of dental practice. Primary care providers (PCPs) should provide an oral health screening and caries risk assessment for beneficiaries at each well child visit as recommended by the American Academy of Pediatrics (AAP) periodicity schedule. (Refer to the Early and Periodic Screening, Diagnosis and Treatment chapter of this manual for additional information.)

1.1.B. DENTAL PERIODICITY SCHEDULE

The Dental Periodicity Schedule follows the American Academy of Pediatric Dentistry (AAPD) recommendations for Pediatric Oral Health Assessment, Preventive Services, and Anticipatory Guidance/Counseling Schedule. (Refer to the Directory Appendix for AAPD website information.)

The AAPD guidelines are designed for the care of children developing typically and without contributing medical conditions. The guidelines include recommendations to modify as needed for children with special health care needs, disease or trauma. The AAPD guidelines emphasize the importance of early professional intervention and continuity of care based on the individualized needs of the child.

The guidelines recommend that a child have a first dental visit when the first tooth erupts or by no later than 12 months of age. The examination includes assessment of pathology and injuries, growth and development, and caries risk assessment. Based on clinical findings and susceptibility to disease, the timing and frequency of radiographic imaging, oral prophylaxis, and topical fluoride should be provided as determined necessary. The examination is to be repeated every six months or as indicated by the child's risk status and susceptibility to disease. Systemic fluoride supplementation should be considered when fluoride exposure is less than optimal.

Anticipatory guidance/counseling should be an integral part of each dental visit. Counseling on oral hygiene, nutrition/dietary practices, injury prevention, and non-nutritive oral habits should be included. A referral for speech/language therapy should be made as needed.

The prevention and treatment of developing malocclusion should be evaluated beginning at two years of age, as determined by assessment of growth and development. Caries-susceptible pits and fissures of teeth should have sealants placed, according to policy, as soon as possible after eruption. Children six years of age and older should receive counseling on substance abuse and intraoral and perioral piercing. Children 12 years of age and older need third molar assessment and potential removal as deemed medically necessary.

Medicaid Provider Manual

1.1.C. ADULT DENTAL PROGRAM

Medicaid Fee-for-Service (FFS): Medicaid beneficiaries ages 21 and older who are not enrolled in a Medicaid Health Plan (MHP), Integrated Care Organization (ICO), or Program of All Inclusive Care for the Elderly (PACE) will receive dental benefits through the Medicaid FFS Program.

Medicaid Health Plan (MHP): Medicaid beneficiaries ages 21 years and older who are enrolled in an MHP receive dental benefits through the MHP. The MHP becomes responsible for the beneficiary's dental services on the enrollment effective date, and dental services must be obtained through the MHP's dental provider network. Questions regarding eligibility, prior authorization (PA), or the provider network should be directed to the beneficiary's MHP.

Healthy Michigan Plan (HMP): HMP beneficiaries enrolled in an MHP will receive dental benefits through the MHP. The MHP becomes responsible for the beneficiary's dental services on the enrollment effective date, and dental services must be obtained through the MHP's dental provider network. Questions regarding eligibility, PA, or the provider network should be directed to the beneficiary's MHP.

Dental services for HMP beneficiaries who are not enrolled in an MHP will be provided through the Medicaid FFS program.

Program of All-Inclusive Care for the Elderly (PACE): PACE is responsible for the coverage of dental benefits for PACE enrollees.

MI Health Link: MI Health Link is responsible for coverage of dental benefits for MI Health Link enrollees.

1.1.D. HEALTHY KIDS DENTAL BENEFIT

MDHHS contracts with dental health plans (DHPs) for the administration of dental services for *HKD* beneficiaries. Providers must contact the DHP for specific information about covered *HKD* benefits. (Refer to the *Healthy Kids Dental* section of this chapter for additional program information.)

1.1.E. CHILDREN'S SPECIAL HEALTH CARE SERVICES

The Children's Special Health Care Services (CSHCS) program covers medically necessary services that are related to the beneficiary's CSHCS qualifying diagnosis. CSHCS beneficiaries may be eligible to receive select dental services based on the CSHCS qualifying diagnosis(es) and treatment plan. Not all CSHCS beneficiaries automatically qualify for dental services. (Refer to the Children's Special Health Care Services chapter of this manual for CSHCS program information.)

Medicaid Provider Manual

SECTION 2 – FEE FOR SERVICE DENTAL FREQUENCY VERIFICATION PROCESS

Providers are required to verify with MDHHS that the beneficiary is eligible for a crown, complete denture or partial denture per the five-year rule prior to rendering service. Providers must utilize the Dental Frequency Verification function located in the Community Health Automated Medicaid Processing System (CHAMPS) to ensure the beneficiary is eligible for a crown, complete denture or partial denture per the five-year rule prior to rendering service.

It is the provider's responsibility to verify the five-year rule before providing service and to retain documentation of the screenshot in CHAMPS and date of the response in the beneficiary's dental record. Failure to complete the verification process may result in denied claims.

Frequency verification approval does not guarantee beneficiary eligibility or payment. Prior to rendering services, the provider is responsible for verifying the beneficiary's Medicaid eligibility on each date of service. Refer to the Beneficiary Eligibility chapter of this Manual, Verifying Beneficiary Eligibility section for additional information.

The provider cannot bill the beneficiary for services rendered. Refer to the General Information for Providers chapter of this Manual, Billing Beneficiaries section for additional information.

SECTION 3 – PRIOR AUTHORIZATION

Prior authorization (PA) is required for services identified in this chapter and the Medicaid Code and Rate Reference tool. For questions about medically necessary dental services beyond those described in this chapter, providers should contact the MDHHS Program Review Division (PRD). (Refer to the Directory Appendix for website and contact information.)

3.1 PRIOR AUTHORIZATION REQUIREMENTS IN CASES OF MISUTILIZATION

MDHHS may require a dental provider found to be improperly utilizing services to obtain PA for all or selected dental services separate from those generally requiring authorization. MDHHS is required to explain to the dental provider, in writing, the reasons for applying this requirement.

3.2 COMPLETION INSTRUCTIONS

The Dental Prior Approval Authorization Request form (MSA-1680-B) is used to obtain authorization. An electronic fill-in enabled version of the MSA-1680-B is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

Providers should use the appropriate CDT code(s) on all PA requests. When requesting medically necessary services for which there is no procedure code, the Not Otherwise Classified (NOC) code is used. Services requested under NOC codes require PA. The MSA-1680-B should only include the procedure(s) that requires PA.

The dental provider should provide additional detailed information in the Other Pertinent Dental or Medical History section of the MSA-1680-B to better define symptomatology, treatment situations, etc. when the services requested or the accompanying documentation may leave unresolved questions. Co-existing medical conditions, including pregnancy, should be identified on the PA request along with any effect they might have upon the proposed treatment plan.

When requesting PA, MDHHS may require dental providers to send additional documentation. Additional documentation must contain the beneficiary's name and other identifying information (e.g., Medicaid ID number, date of birth, etc.).

An authorization determination is made based on the MSA-1680-B and the documentation attached. PA requests are assigned a number, posted in the Community Health Automated Medicaid Processing System (CHAMPS), and a notification of decision is sent to the provider. For billing purposes, the PA approval number must be entered in the appropriate field on the claim form.

3.3 CHAMPS WEBSITE

Information on specific coverage parameters and reimbursement rates can be accessed using the Medicaid Code and Rate Reference tool in CHAMPS. Providers should refer to the CHAMPS website for information on previous PA requests, status of current PA requests, and to update or change an approved PA. To assist in the efficient use of this service, providers should have the beneficiary's file, including all necessary data and information, available when making an inquiry.

All other inquiries, such as billing problems, should be directed to MDHHS Provider Inquiry. (Refer to the Directory Appendix for contact information.)

Medicaid Provider Manual

3.4 APPROVED PRIOR AUTHORIZATION REQUESTS

An approved PA confirms that the beneficiary meets Medicaid's established criteria for the services and the services are Medicaid-covered benefits. Approval does not guarantee beneficiary eligibility or payment.

Prior to rendering services, the provider is responsible for verifying the beneficiary's Medicaid eligibility on each date of service. Refer to the Enrollment Information subsection of this chapter and the Verifying Beneficiary Eligibility section of the Beneficiary Eligibility chapter for additional information.

PA is granted under the National Provider Identifier (NPI) submitted on the MSA-1680-B. PA issued to a group NPI may be used by any individual dental provider within the same group without contacting MDHHS.

PAs are approved for a defined time period, usually six months to one year. If treatment is not completed prior to the end date of the authorization period, the provider must submit the MSA-1680-B to PRD and request an extension of the authorization period for up to six months. When a change in the authorized treatment is necessary, providers must submit the MSA-1680-B with supporting clinical documentation to PRD, identifying the submission as a request for treatment change. The MSA-1680-B should be submitted at least 15 MDHHS business days prior to the end of the authorization period.

If a PA request is denied, the beneficiary receives a letter of denial for the requested service along with notice of appeal rights. The provider also receives a copy of the denial letter.

3.5 LOSS OR CHANGE IN ELIGIBILITY

Services are not covered after loss or change in eligibility. Root canal therapy, authorized laboratory processed crowns, and authorized complete and partial dentures may be reimbursed if services were started prior to the loss/change in eligibility and completed within the month following the last date of eligibility. Example: If a beneficiary loses eligibility on January 31 and a root canal or denture has already been started, the provider has until February 28 to complete the procedure to be eligible to receive reimbursement.

Reimbursement is not made for the following:

- immediate dentures delivered after the loss/change in eligibility.
- when a beneficiary's eligibility is terminated after extractions were performed, but prior to initial impressions for a denture.

HKD beneficiaries are covered for services completed within 60 days from the date of eligibility loss. Refer to the Healthy Kids Dental section of this chapter for additional information.

3.6 INCOMPLETE PROCEDURES

When root canal treatment, authorized laboratory processed crowns or authorized denture services have commenced but extenuating circumstances have prevented completion (e.g., beneficiary death), providers are paid a reduced rate to offset a portion of the costs incurred. A request to amend the original PA must be submitted as described below.

Medicaid Provider Manual

- Incomplete crown:
 - Providers must request procedure code D2999.
 - Date of service is the date of the impression.
 - Provide the reason treatment was not completed.
 - Submit an itemized statement of the invoice detailing the laboratory costs.
- Incomplete root canal:
 - Providers must request procedure code D3999.
 - Date of service is the date of the first treatment appointment.
 - Provide the reason treatment was not completed.
- Incomplete denture:
 - Providers must request procedure code D5899.
 - Date of service is the date of the initial impression.
 - Provide the reason the treatment was not completed.
 - Submit an itemized statement of the invoice detailing the laboratory costs.

Medicaid Provider Manual

SECTION 4 – COPAYMENT

A copayment for each separately reimbursable Medicaid visit may be required for beneficiaries age 21 and older with the following limitations:

- When more than one reimbursable service is provided during a visit, only one copayment may be charged.
- When several visits are required to complete a service (e.g., dentures), only one copayment may be charged.

A provider cannot refuse to render service if the beneficiary is unable to pay the required copayment on the date of service.

Some beneficiaries, programs, and places of service are exempt from copayment requirements. Refer to the General Information for Providers chapter of this manual for information on Medicaid copayment requirements. Current copayment amounts are listed on the MDHHS website. (Refer to the Directory Appendix for website information.)

SECTION 5 – PLACE OF SERVICE

All dental services must be performed in a dental office, public health department dental clinic, dental school, dental hygiene program, federally qualified health center, or tribal health center. Special situations may necessitate the provision of services at an alternate site such as a hospital, surgical setting, nursing facility, or mobile dental facility.

5.1 ALTERNATIVE SETTINGS

5.1.A. INPATIENT OR OUTPATIENT HOSPITAL SETTING

Admission to an inpatient or outpatient hospital setting for any non-emergency dental service is covered for beneficiaries for the following reasons:

- The patient has a high-risk medical condition.
- The type of procedure requires it to be performed in a hospital setting.
- Other contributing factors could compromise the safety of the patient, such as age, behavioral problems due to mental impairment, etc.

The dental provider must document in the beneficiary's dental record the condition that required the dental service to be completed in the hospital setting. Hospitalization is not a covered benefit for the convenience of the dental provider or beneficiary or because of apprehension on the part of the beneficiary.

5.1.B. SURGICAL SETTING

For services performed in a surgical setting, the dental provider should use the usual and customary (U & C) charge for the service as performed in an office setting. In addition, the CDT code for hospital or ambulatory surgical center call may also be billed if services are provided in a hospital or surgical center. This code may be billed in addition to the appropriate dental procedure code for the actual service performed. This procedure code is not for administrative purposes, such as arranging appointment times, gathering signatures for release forms, etc.

5.1.C. NURSING FACILITIES

Dental services provided to a beneficiary who resides in a nursing facility are the same benefits as those identified in the Covered Services section of this chapter.

A written order by a licensed referring physician (MD, DO) is required for provision of dental services to a beneficiary in a nursing facility, regardless of place of service. The order must be signed and dated by the physician and a copy of this order must be retained in the beneficiary's medical record and the beneficiary's dental record.

All dental services provided in a nursing facility must be documented in the beneficiary's medical record. Documentation must include the beneficiary's updated medical history, chief complaint, current oral health status, treatment plan, and services rendered.

Medicaid Provider Manual

5.1.D. MOBILE DENTAL FACILITIES AND PUBLIC ACT 161 (PA 161) PROVIDERS

A mobile dental facility is defined as a self-contained, intact facility in which dentistry or dental hygiene is practiced that may be transported from one location to another, or a site used on a temporary basis to provide dental services using portable equipment. The operator of a mobile dental facility and the operator's agents and employees are expected to comply with all federal, state and local laws, administrative rules, regulations and ordinances applicable to the mobile dental facility.

This subsection is designed to be used in conjunction with the MDHHS Oral Health Program Mobile Dental and PA 161 Operations Guide, developed and maintained by the MDHHS Division of Child and Adolescent Health. The Guide is available on the MDHHS Oral Health Program webpage. (Refer to the Directory Appendix for website information.)

A Mobile Dental Facility Permit must be obtained by an operator before providing dental services. A Mobile Dental Facility Permit will be valid for three years from the date of approval. Requirements include:

- Completion and approval of the Mobile Dental Facility Permit Application (DCH-3929);
- Submission of the required documents;
- Submission of the administrative fee; and
- Memorandum of Agreement for follow-up services.

Mobile dental operators can access the DCH-3929, Notification of Change forms, and the Mobile Dental and PA 161 Operations Guide on the MDHHS Oral Health Program webpage. (Refer to the Directory Appendix for website information.)

To provide dental services and bill Medicaid, a provider must be enrolled in CHAMPS. Instructions for provider enrollment, as well as updating enrollment, can be found on the MDHHS website. (Refer to the Directory Appendix for website information.)

CHAMPS enrollment as a mobile dental provider is required within 30 days of approval of the DCH-3929. Groups may select more than one specialty. Dental hygienists operating in mobile facilities must enroll as a mobile provider.

5.1.E. OTHER SITES

Dental services provided at all other sites require PA. In order to receive PA, the dental provider must complete the MSA-1680-B for each individual and submit it to the Program Review Division. Providers should follow the same instructions for submission of the MSA-1680-B for site of service as they do requests for procedures.

Medicaid Provider Manual

SECTION 6 – ANCILLARY SERVICES

6.1 PHARMACY SERVICES

Medicaid has a list of covered drugs that include selected legend and over-the-counter drugs. Medicaid does not reimburse dental providers for drugs dispensed in the office setting.

The Michigan Pharmaceutical Product List (MPPL) identifies the pharmaceutical products that are covered by MDHHS. The MPPL pharmaceutical product coverages may vary by MDHHS program or be limited by age, clinical parameters, and/or gender. (Refer to the Directory Appendix for website information.) For those beneficiaries enrolled in a Medicaid Health Plan (MHP), dental providers should refer to the MHP Common Formulary for the list of approved drugs covered by health plans. (Refer to the Directory Appendix for website information.) The Preferred Drug List is utilized by both Medicaid Fee-For-Service (FFS) and Medicaid Health Plans for pharmacy coverage of select preferred products. (Refer to the Directory Appendix for website information.)

6.2 MEDICAL LABORATORY SERVICES

Medically necessary laboratory services ordered by dental providers are a Medicaid benefit. Only the provider who performs the service may bill for the service.

Ordering practitioners should use their provider NPI number on medical laboratory service orders written for Medicaid beneficiaries. (The laboratory is required to provide this information when billing.)

SECTION 7 – COVERED SERVICES

This section provides information on Medicaid covered services and is divided into subsections that correspond to the categories of services in the CDT published by the ADA:

- Diagnostic Services
- Preventive Services
- Restorative Treatment
- Endodontics
- Periodontics
- Prosthodontics (Removable)
- Oral Surgery
- Adjunctive General Services

Providers must use the current CDT procedure codes when completing both the claim form and MSA-1680-B. Resources are available to assist the provider in determining coverage and coding of specific services, including the Medicaid Code and Rate Reference tool via the external link in CHAMPS and the MDHHS Dental Fee Schedule located on the MDHHS website. (Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers chapter of this manual for additional information on code/coverage parameters and the Directory Appendix for website information. Billing information can be found in the Billing & Reimbursement for Dental Providers chapter of this manual.)

7.1 DIAGNOSTIC SERVICES

7.1.A. CLINICAL ORAL EVALUATION (EXAMINATIONS)

A clinical oral evaluation is considered a benefit for all beneficiaries only if detailed written documentation of medical and dental findings (both positive and negative) and tests are included in the beneficiary's dental record. (Refer to the General Information for Providers chapter of this manual for additional information.) Typically, it should include the evaluation and recording of dental caries, missing or unerupted teeth, restorations, periodontal conditions, occlusal relationships, hard and soft tissue anomalies, oral cancer screening, and denture condition and usage. All clinical oral evaluations must include a diagnosis and treatment plan. Examinations without this documentation are not a covered benefit.

7.1.A.1. COMPREHENSIVE ORAL EVALUATION

A comprehensive oral evaluation is performed on a new patient or an established patient with significant health changes or absence from treatment for three or more years. The evaluation must include a documented medical and dental history, a thorough evaluation and recording of the condition of extraoral and intraoral hard and soft tissues (including a complete charting of the condition of each tooth and supporting tissues, occlusal relationships, periodontal conditions [including periodontal charting], oral cancer screening and appropriate radiographic studies [radiographs are separately

Medicaid Provider Manual

reimbursable)). The comprehensive oral evaluation is a covered benefit for all beneficiaries. In addition, a complete treatment plan must be included that addresses the beneficiary's needs.

7.1.A.2. PERIODIC ORAL EVALUATION

A periodic oral evaluation is an examination of a patient of record to determine any changes in a beneficiary's dental and medical health status since a previous comprehensive or periodic examination. The periodic oral evaluation must include a written update of the beneficiary's dental and medical history, clinically appropriate charting necessary to update and supplement the comprehensive oral examination data, including periodontal screening and appropriate radiographs as necessary to update previous radiograph surveys (radiographs are separately reimbursable). A periodic oral evaluation is a covered benefit once every six months for all beneficiaries but may not be billed within six months of a comprehensive oral evaluation. In addition, a complete treatment plan must be included that addresses the beneficiary's needs.

7.1.A.3. LIMITED ORAL EVALUATION - PROBLEM FOCUSED EXAM

A limited oral evaluation-problem focused exam consists of an examination for diagnosis and observation of a specific oral health problem or complaint, such as injuries to teeth and supporting structures. A limited oral evaluation must include appropriate recording of the beneficiary's dental and medical history and charting that is clinically appropriate for the specific problem. In addition, the findings, diagnosis, and treatment plan for the diagnosis must be included in the beneficiary's chart.

A limited oral evaluation can be billed in conjunction with radiographs and/or extractions (simple or surgical) and considered as a covered benefit. Routine restorative procedures, root canal therapy, elective surgery, and denture services are not considered emergency procedures and cannot be billed in conjunction with a limited oral evaluation. Limited oral evaluation-problem focused exam is a covered benefit for all ages.

7.1.A.4. COMPREHENSIVE PERIODONTAL EVALUATION

A comprehensive periodontal evaluation is a covered benefit for beneficiaries once every 12 months. It is indicated for beneficiaries showing signs or symptoms of periodontal disease and/or with risk factors such as smoking or chronic disease. It includes the evaluation of periodontal conditions, probing and charting, an oral cancer evaluation, and recording of the beneficiary's dental and medical history. A comprehensive periodontal evaluation is not a covered benefit when billed in conjunction with, or within six months of, other clinical oral evaluation codes.

7.1.B. PRE-DIAGNOSTIC SERVICES

7.1.B.1. ORAL EVALUATION, PATIENT <3 YEARS

An oral evaluation of a patient <3 years of age is performed by a dental provider, preferably within the first six months of the eruption of the first primary tooth. An oral evaluation includes a clinical examination to identify disease, malformation, injury and caries risk. Counseling with the primary caregiver and the development of an

Medicaid Provider Manual

appropriate preventive oral health plan are required. The oral evaluation of a patient <3 years may be billed in conjunction with other dental services but may not be billed on the same date of service as other oral evaluation services.

7.1.B.2. ORAL HEALTH SCREENING OF A PATIENT

An oral health screening of a patient is an inspection of the oral cavity by a PCP as part of the well child exam to determine the need for referral to a dental provider for evaluation and diagnosis. This includes state or federally mandated screenings. Counseling with the primary caregiver and referral to a dental provider, as needed, is required. The oral health screening of a patient may be billed in conjunction with topical fluoride varnish applications but may not be billed on the same date of service as other oral evaluation services. PCPs should provide an oral health screening and caries risk assessment for beneficiaries at each well child visit as recommended by the AAP periodicity schedule. (Refer to the Early and Periodic Screening, Diagnosis and Treatment chapter of this manual for additional information.)

7.1.B.3. ASSESSMENT OF A PATIENT

An assessment of a patient is a clinical evaluation performed by a dental hygienist operating in a public health setting or an approved Public Act 161 of 2005 (PA 161) program. Assessment services performed within the scope of dental hygiene practice can be provided to identify signs of disease, malformation or injury and the need for referral for examination, diagnosis and treatment. An assessment of a patient is a benefit for all ages. The assessment must include written documentation of the beneficiary's dental and medical history. Written documentation of significant clinical findings and the appropriate referral is required. The assessment code cannot be used when a dental provider is on site to perform an examination. An oral examination by the dental provider always supersedes the assessment of a patient in place of service settings where the dental provider is present. The assessment can be billed in conjunction with other dental hygiene services but may not be billed on the same date of service as other oral evaluation services.

7.1.C. CONSULTATION

A consultation provided by another dental provider or a physician (MD, DO) is a benefit for all beneficiaries. Medicaid defines a consultation as a service rendered by a dental provider or a physician whose opinion or advice is formally requested by another appropriate practitioner (e.g., physician, certified nurse-midwife [CNM], dental provider for the further evaluation and/or management of the beneficiary. The consultant does not render patient care or treatment until the consultant assumes responsibility. If a consultant assumes responsibility for any patient management or treatment, then all services subsequent to the consultation must be billed under the appropriate procedure code (e.g., exams, procedures). If a dental provider provides a consultation, the only separately reimbursable service that may be provided in addition to the consultation are radiographs.

A consultation service includes evaluation of the beneficiary, documentation of history and physical examination findings, recommendations, and submission of a written formal

Medicaid Provider Manual

consultation report to the requesting practitioner. The requesting practitioner cannot bill the consultation procedure code.

A consultation related to routine dental treatment (e.g., caries) is not a covered benefit.

7.1.D. RADIOGRAPHS

The policy applies to all radiographs and radiographic procedures, both digital and traditional film, unless otherwise stated.

Radiographs are benefits for all beneficiaries and are limited to the number medically necessary to make a diagnosis (other limitations apply to radiographs - see below). The provider must maintain documentation in the beneficiary's file stating the reason the radiographs were necessary, the diagnosis/radiographic findings, treatment plan, and referral if appropriate.

7.1.D.1. BITEWINGS

Bitewing radiographs are a covered benefit only once every 12 months for all beneficiaries.

7.1.D.2. OCCLUSAL RADIOGRAPHS

An occlusal radiograph is a covered benefit for beneficiaries under age 21 once every three years per arch.

7.1.D.3. PANORAMIC RADIOGRAPHS

A panoramic radiograph is a covered benefit once every five years for all beneficiaries ages five years and older.

7.1.D.4. FULL MOUTH/COMPLETE SERIES

A full mouth/complete series is a covered benefit once every five years for all beneficiaries ages five years and older.

A full mouth/complete series consists of:

- A minimum of 10 periapical radiographs in conjunction with a minimum of two bitewing radiographs; or
- An intraoral/extraoral combination of a panoramic radiograph in conjunction with a minimum of two bitewing radiographs.

The maximum reimbursement for any combination of radiographs will not exceed the established fee for a full mouth/complete series. Any combination of 10 or more intraoral radiographs will be considered a full mouth/complete series.

Medicaid Provider Manual

7.1.D.5. COPIES OF FULL MOUTH/COMPLETE SERIES

Dental providers are expected to provide a copy of full mouth/complete series radiographs taken within the previous 12 months to a subsequent provider as requested. Dental providers cannot charge the beneficiary for copying radiographs. (Refer to the General Information for Providers chapter of this manual for additional information.)

7.1.D.6. RADIOGRAPH SUBMISSION REQUIREMENTS FOR PRIOR AUTHORIZATION

Providers should not send radiographs with PA unless specifically requested by MDHHS, except in the situations below:

- A periapical radiograph is required when submitting the MSA-1680-B for crowns for beneficiaries who have CSHCS coverage but do not have Medicaid.
- Radiographs (cephalometric, panoramic, full series) are required when submitting the MSA-1680-B for orthodontic treatment coverage by CSHCS. Refer to the CSHCS Enhanced Dental Services section of this chapter for additional information.
- Radiographs may be submitted when a dental provider deems them necessary to evaluate or document the beneficiary's oral condition.

Radiographs that are not specifically requested by MDHHS will not be returned to the provider.

7.1.D.7. TECHNICAL CONSIDERATIONS AND ADDITIONAL REQUIREMENTS

All radiographs submitted (original or duplicates) to MDHHS must be diagnostically acceptable and meet the following technical considerations and additional requirements. Unacceptable radiographs will be returned to the dental provider for replacement with no additional reimbursement provided.

Technical Considerations	<ul style="list-style-type: none">▪ All teeth or areas of concern must be visible on the radiographs.▪ Density and clarity of the radiograph must be such that radiographic interpretation can be made without difficulty.▪ On a periapical view, the apex of the tooth must be demonstrated clearly, as well as a minimum of one-eighth of an inch of surrounding bone.▪ Where pathologic change is in question, healthy bone must be seen surrounding the questionable area.▪ Interproximal bone must be visible without the overlapping of interproximal surfaces of teeth under consideration.▪ Posterior teeth areas (e.g., demonstrated impactions, developing third molars) must be completely visible.
Additional Requirements	<ul style="list-style-type: none">▪ Traditional film radiographs submitted must be mounted in the correct anatomical order to allow for a thorough and systematic interpretation.▪ Digital radiographs submitted must be regulation film size and diagnostically acceptable.

Medicaid Provider Manual

	<ul style="list-style-type: none">▪ All radiographs must be identified with the beneficiary's name and Medicaid ID number.▪ All radiographs must have the date the radiograph was taken.▪ All full mouth/complete series and panoramic radiographs must have "right" and "left" identification.▪ All radiographs must include the requesting provider's name and address.
--	--

7.1.D.8. PHOTOGRAPHS

Photographs are not reimbursed under Medicaid or CSHCS; however, they may be submitted with the MSA-1680-B as supplemental documentation to make the beneficiary's condition clearly visible.

Photographs are part of the pretreatment records for orthodontic services for CSHCS beneficiaries and are not separately reimbursable.

7.2 PREVENTIVE SERVICES

7.2.A. PROPHYLAXIS

Oral prophylaxis is a covered benefit for all beneficiaries once every six months. This service includes routine scaling and debridement, as well as stain removal and polishing of the tooth surface.

If more than one visit is necessary to complete the prophylaxis, it must be billed only once, and the date of service used on the claim must be the date of the final visit.

7.2.B. TOPICAL APPLICATION OF FLUORIDE

Non-Varnish	Topical application of fluoride is a benefit for beneficiaries 6 years of age up to 21 once every six months and cannot be combined with topical application of fluoride varnish within the same six months. The fluoride must be approved by the ADA Council on Dental Therapeutics and administered using tray application only if age appropriate.
Varnish	Topical application of fluoride varnish is a benefit for beneficiaries under age 21. Frequency and parameters vary based on the age of the beneficiary as noted below: <ul style="list-style-type: none">▪ Ages 0 through 5: Four times per 12 months as a therapeutic application for all children.▪ Ages 6 through 20: One time per six months and cannot be combined with topical application of non-varnish fluoride within the same six months.

The following types of fluoride treatment are not covered:

- Treatment that incorporates fluoride with the polishing compound (this is considered to be part of the prophylaxis procedure and is not separately reimbursable);
- Topical application of fluoride to the prepared portion of a tooth prior to restoration;

Medicaid Provider Manual

- Fluoride rinses; and
- The use of self or home fluoride application procedures.

Prescription fluoride supplements may be covered as a pharmacy benefit for beneficiaries under age 16. Prescription fluoride supplements may require PA. (Refer to the Pharmacy chapter of this manual for additional information.)

7.2.C. INTERIM CARIES ARRESTING MEDICAMENT

Interim caries arresting medicament application is a Medicaid covered dental benefit for all ages. Advantage Arrest™ by Elevate Oral Care - Silver Diamine Fluoride (SDF) at 38% is the only Food and Drug Administration (FDA) approved SDF for use in the United States. It is also the only caries arresting medicament allowed by Medicaid policy.

SDF is billable once per date of service regardless of the number of teeth treated, up to a maximum of five teeth per visit. There is a maximum of six applications per lifetime. Direct application to the tooth is required to arrest active carious lesions; however, application to sound teeth is not necessary for the additional anti-caries benefit. Application of SDF has an antimicrobial effect on the entire oral cavity in addition to the teeth being treated for caries arrest. (Refer to the Billing & Reimbursement for Dental Providers chapter of this manual for additional billing information.)

SDF is considered a temporary measure to arrest and slow the progression of caries. It should be used only when traditional methods of restoration are not available or are contraindicated. A minimum of two applications per year has been shown to increase the caries arresting effectiveness. Treated lesions must be monitored over time to assess caries arrest. Additional applications may not be necessary or recommended if caries arrest is still in effect.

SDF is not meant to be used as a full-mouth fluoride varnish therapy. SDF application does not eliminate the need for tooth restoration, nor does it preclude the ability to restore the tooth. It is not used as a base prior to restoration and it has the disadvantage of darkening the carious area of the tooth. SDF will not stain non-carious tooth structure. The darkened tooth structure can be removed with restoration of the tooth.

Indications for SDF use include:

- high caries risk
- behavioral or medical management issues
- dentinal hypersensitivity
- caries stabilization
- xerostomia from cancer treatment or multiple hyposalivatory medications
- treating vulnerable surfaces, such as roots exposed from periodontal attachment loss, overdenture and partial denture abutments, or partially exposed third molars
- difficult-to-treat caries lesions (e.g., furcations, margins of fixed bridges)
- patients without access to restorative dental services
- cognitive disabilities (e.g., patients with autism or dementia)

Medicaid Provider Manual

	<ul style="list-style-type: none"> physical disabilities dental phobias
Contraindications for SDF use include:	<ul style="list-style-type: none"> allergy to silver or other heavy-metal ions oral ulcerations, stomatitis, or ulcerative gingivitis present at the time of application more than five teeth treated on the same date of service
Education and Informed Consent	<ul style="list-style-type: none"> SDF application requires education of providers and staff on the application process, benefits, risks and projected outcomes. Also required is education of the beneficiary and informed consent signed by the beneficiary or guardian. Treatment with SDF requires more than one application to effectively arrest decay. Treatment with SDF does not eliminate the need for restorations to repair function or esthetics. Affected areas will stain black permanently until replaced with a restoration. Tooth-colored restorations may discolor from SDF but can generally be removed with polishing. SDF accidentally applied to the skin or gum tissue may stain white or brown if not immediately washed off but will disappear within a couple of weeks. Although SDF has been proven to be highly successful, application does not guarantee caries arrest.

7.2.D. SEALANTS

Coverage is limited to fully erupted permanent first and second molars (2, 3, 14, 15, 18, 19, 30, 31), fully erupted first and second primary molars (A, B, I, J, K, L, S, T) and fully erupted first and second permanent premolars (4, 5, 12, 13, 20, 21, 28, 29) for all beneficiaries for the prevention of pit and fissure caries. Sealants are covered once every three years. Medicaid reimbursement includes repair and replacement of the sealant for three years.

Conditions required for coverage include:

- Surfaces must be free from caries.
- Surfaces to be sealed must be free of any restorations.

Medicaid does not cover sealants applied on beneficiaries with:

- Moderate decay.
- Advanced decay.
- Severe decay.
- Previous restoration on identified surface.

Medicaid Provider Manual

7.2.E. SPACE MAINTAINERS

Space maintainers are covered for beneficiaries under age 13 to maintain a posterior space for a permanent successor of a prematurely lost primary tooth. Only one space maintainer is covered per quadrant. Space maintainers are covered once every two years. When billing for space maintainers, the date of service is the date the space maintainer was delivered to the beneficiary.

7.3 RESTORATIVE TREATMENT

Restorative treatment using amalgam or direct resin-based composite materials to restore carious lesions or fractured teeth is a covered benefit for all beneficiaries. Indirect restorations (crowns) are covered for all beneficiaries. Restorative treatment is limited to those services necessary to restore and maintain adequate dental health. The prognosis of the tooth to be restored, as well as the overall treatment plan for the beneficiary, and a reasonable projection of a successful outcome should be evaluated prior to restoration.

Replacement or repair of all restorations is the provider's responsibility for the first two years following placement. A PA for dentures and partial dentures which includes extraction of the restored tooth within the first two years following placement requires a documented reason for the extraction. (Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers chapter for additional information regarding coverage parameters.)

Restorations are not covered for deciduous teeth when exfoliation is expected to occur within 180 days. Restorations of deciduous molars and cuspids are not covered for beneficiaries age 12 and older, and restorations of deciduous incisors are not covered for beneficiaries age five and older.

7.3.A. AMALGAM RESTORATIONS

Tooth preparation, all adhesives (including amalgam bonding agents), liners and bases are not separately reimbursed and must be included as part of the restoration. If pins are used, they should be reported with the appropriate procedure code.

7.3.B. RESIN-BASED COMPOSITE RESTORATIONS – DIRECT

Resin-based composite refers to a broad category of materials including, but not limited to, composite, light-cured composite and glass ionomers. Tooth preparation, acid etching, adhesives, bonding agents, liners, bases and curing are included as part of the restoration. If pins are used, they should be reported with the appropriate procedure code.

7.3.C. INDIRECT RESTORATIONS

Crowns are a covered benefit for all beneficiaries. Crown coverage includes:

Stainless Steel Crowns	<ul style="list-style-type: none">Stainless steel crowns are covered for primary teeth and permanent molars.Stainless steel crowns with resin windows are covered for anterior primary teeth.Stainless steel crowns are covered only once per two years.
Crowns	<ul style="list-style-type: none">Laboratory-processed resin crown and $\frac{3}{4}$ resin crowns (indirect) – for anterior permanent teeth only.Porcelain and porcelain fused to metal crowns (indirect) are covered for permanent first and second premolars, canines, and incisors.Metal crowns only on molars.Crowns are covered once per five years on the same tooth.

The following are allowed for permanent teeth when a restorative crown will be placed:

- Direct core build-up, including any pins.
- Post and core substructures (indirectly fabricated or prefabricated).

The prognosis of the tooth to be restored, as well as the overall treatment plan for the beneficiary and a reasonable projection of a successful outcome, should be evaluated prior to restoration.

Providers must verify with MDHHS that the beneficiary is eligible for a crown per the five-year rule as described in the Frequency Verification Process section below prior to rendering service. Failure to complete the verification process may result in claim denial.

When billing for laboratory-processed crowns, the date of service is the date the crown was delivered to the beneficiary.

7.4 ENDODONTICS

Endodontics is a benefit for all beneficiaries. The date of service is the date the treatment was completed. (Refer to the Billing & Reimbursement for Dental Providers chapter of this manual for additional information.)

7.4.A. ROOT CANAL TREATMENT

Root canal treatment is a benefit for all beneficiaries and does not require PA. It is a benefit only where otherwise sound teeth can be reasonably restored under program coverages, and the condition of the rest of the mouth supports this method of treatment.

Program coverage for root canal treatment is solely for the professionally accepted, conventional root canal treatment modalities. These involve complete removal of pulpal tissue to the tooth apex, canal enlargement and debridement, and the obliteration of the entire root canal by the permanent insertion of an inert, non-resorbable filling material. The Sargenti technique is not a covered benefit.

Medicaid Provider Manual

Root canal treatment is a benefit only where otherwise sound teeth can be reasonably restored under program coverages, and the condition of the rest of the mouth supports this method of treatment.

The root canal treatment is not covered if the following conditions exist:

- Furcation pathology is present.
- A posterior tooth has no opposing tooth. (Dentures, partials, fixed bridges, implants, and other prosthetics are considered opposing teeth when present.)
- Tooth is not restorable under Medicaid guidelines.

7.4.B. PULPOTOMY

A therapeutic pulpotomy is a benefit for beneficiaries under age 13 if it is performed on primary teeth or permanent teeth with open apices. It is not considered the first stage of root canal therapy. If exfoliation appears imminent, a pulpotomy is not a covered benefit.

7.4.C. PULPECTOMY

Pulpectomy (pulpal therapy) is a benefit for beneficiaries under age 8 on anterior primary teeth and under age 13 on posterior primary teeth when the tooth is nonvital or hemostasis cannot be established by conventional pulpotomy.

7.4.D. PULPAL DEBRIDEMENT

Pulpal debridement is a benefit for beneficiaries under age 13 if it is performed on primary teeth or permanent teeth prior to conventional root therapy. It is not covered when root canal therapy is completed on the same day.

7.4.E. APEXIFICATION

Apexification is a benefit for beneficiaries under age 13 and is limited to permanent teeth when the apex has not completely closed.

7.4.F. APEXOGENESIS

Apexogenesis is a benefit for beneficiaries under age 21 and is limited to permanent teeth. This service is not considered the first stage of root canal therapy.

7.4.G. RETREATMENT OF PREVIOUS ROOT CANAL TREATMENT

Retreatment of previous root canal treatment is a covered benefit for all beneficiaries once per tooth per lifetime and does not require PA. Retreatment requires the removal of all previous root canal materials and the necessary preparation of the canals for new root canal materials and the necessary preparation of the canals for new root canal filling materials. It includes all procedures necessary for complete root canal treatment and should be considered prior to performing an apicoectomy.

7.4.H. APICOECTOMY

Apicoectomy is a surgical procedure to repair a root pathology, defect, fracture and/or removal of extruding filling materials, instruments, or broken root fragments. It also includes the sealing of accessory canals. An apicoectomy should be done only after a tooth has had at least one root canal procedure and retreatment has not been successful or is not possible.

7.5 PERIODONTICS

Periodontal services are a covered benefit for all beneficiaries. Periodontal services are classified as therapeutic and do not fall within the preventive services classification. These services are performed under the general supervision of a dentist.

Documentation for all periodontal services provided must be retained in the beneficiary's dental record for audit purposes and made available to MDHHS upon request.

7.5.A. FULL MOUTH DEBRIDEMENT

Full mouth debridement is performed as a therapeutic, not a preventive, treatment for beneficiaries to aid in the evaluation and diagnosis of their oral condition. It involves the preliminary removal of subgingival and/or supragingival plaque and calculus that interferes with the ability of the dental provider to perform a comprehensive oral evaluation.

Full mouth debridement is a benefit for beneficiaries age 14 and over once every 365 days. It may be performed the same day as a comprehensive or periodic oral evaluation when all the required components of the evaluation have been accomplished and documented in the beneficiary's record.

Full mouth debridement is not a covered benefit when performed on the same date of service as a comprehensive periodontal evaluation or when a prophylaxis is completed on the same day.

7.5.B. SCALING IN THE PRESENCE OF INFLAMMATION

Scaling in the presence of inflammation is a benefit for all beneficiaries once every six months. It is indicated for beneficiaries who have swollen, inflamed gingiva, moderate to severe bleeding on probing, and generalized suprabony pockets, but no bone loss. Scaling in the presence of inflammation is not a covered benefit when billed on the same

Medicaid Provider Manual

date of service or within six months of a prophylaxis, scaling and root planing, periodontal maintenance, or debridement procedures.

7.5.C. PERIODONTAL SCALING AND ROOT PLANING

Periodontal scaling and root planing is a benefit for all beneficiaries every two years per quadrant when the expected prognosis of the teeth is greater than one year. A maximum of two quadrants or two localized areas can be completed on the same day. PA is required. A single PA request may be submitted for up to four quadrants of periodontal scaling and root planing as PA requests are generally approved for 6 to 12 months. The PA request must include both:

- A copy of the beneficiary's clinical record that specifically documents clinical findings that supports the periodontal diagnosis and need for periodontal treatment, including but not limited to:
 - Dental findings and diagnostic information, health history, clinical notes, treatment procedures performed, treatment plans, and patient-related communications.
- A comprehensive periodontal chart completed within 12 months of the PA request that includes six measurements per tooth and all the following, if applicable:
 - Probing depths > 4mm;
 - Bleeding on probing (BOP) and/or gingival inflammation (e.g., color, contour, consistency of the gingiva);
 - Attachment loss as indicated by documenting the free gingival margin progressing apically;
 - Furcation involvement clinically or radiographically;
 - Mobility.

Periodontal services (scaling and root planing) are not covered if the following conditions exist:

- The expected prognosis of the teeth is less than one year (e.g., pre-treatment prior to extractions, etc.). MDHHS may recover payment in these cases.

7.5.D. PERIODONTAL MAINTENANCE

Periodontal maintenance is a covered benefit for all beneficiaries once every six months. It is performed as therapeutic, not preventive, treatment and indicated following active periodontal treatment. Periodontal maintenance is not a covered benefit when billed in conjunction with prophylaxis, scaling and root planing, scaling in the presence of inflammation, or debridement procedures on the same day.

7.6 PROSTHODONTICS (REMOVABLE)

7.6.A. GENERAL INSTRUCTIONS

Complete dentures, immediate complete dentures, and partial dentures are benefits for all beneficiaries.

Medicaid Provider Manual

Complete and partial dentures are benefits once per five years per arch when the expected prognosis of the complete or partial denture is at least five years. Complete and partial dentures do not require PA. Providers must verify with MDHHS that the beneficiary is eligible for a complete or partial denture per the five-year rule prior to rendering service, as described in the Frequency Verification Process section of this chapter. Failure to complete the verification process may result in claim denial.

Providers must assess the beneficiary's general oral health and provide a five-year prognosis for the complete or partial denture requested. The provider is expected to evaluate whether the treatment is appropriate for the individual beneficiary, and assess the probability of delivering removable dentures and the beneficiary's compliance with follow-up care.

It is the provider's responsibility to discuss the treatment plan with the beneficiary, including any applicable frequency limits and other pertinent information related to the proposed services, and obtain the beneficiary's agreement with the proposed treatment plan. Documentation of the beneficiary's agreement must be retained in the beneficiary's dental record.

The following documentation must be retained in the beneficiary's dental record and made available to MDHHS upon request:

- Beneficiary understanding and agreement that another denture is not a covered benefit for five years.
- Beneficiary education addressing all available treatment options and documentation of the beneficiary's understanding and agreement.

Before the final impressions are taken for the fabrication of a denture, adequate healing necessary to support the denture must take place following the completion of extractions and/or surgical procedures.

When billing for a complete or partial denture, the date of service is the date the denture was delivered to the beneficiary. Reimbursement for a complete or partial denture includes all necessary adjustments, relines, repairs, duplication, etc. within six months of insertion.

Complete or partial dentures are not a covered benefit when:

- Medicaid or Medicaid Managed Care has reimbursed a denture in the same arch within five years.
- An adjustment, reline, repair, or rebase will make the current denture serviceable.
- A complete or partial denture obtained through Medicaid within five years has been lost or broken.
- The expected prognosis of the complete or partial denture is less than five years.

Medicaid Provider Manual

7.6.B. COMPLETE DENTURES

Complete dentures are a covered benefit for all beneficiaries. Providers must verify with MDHHS that the beneficiary is eligible for a complete or partial denture per the five-year rule prior to rendering service, as described in the Frequency Verification Process section of this chapter. Failure to complete the verification process may result in claim denial.

Only complete dentures with non-characterized teeth (i.e., without cosmetic enhancements, such as gold denture teeth) and acrylic resin bases are a covered benefit. To be covered by Medicaid, all the following procedures must be used to fabricate the dentures:

- individual positioning of the teeth;
- wax-up of the entire denture body; and
- conventional laboratory processing.

A preformed denture with teeth already mounted (i.e., teeth already set in acrylic prior to initial impressions) forming a denture module is not a covered benefit. Overdentures or Cu-Sil® dentures are not a covered benefit.

7.6.C. IMMEDIATE COMPLETE DENTURES

An immediate complete denture is a definitive denture. It is a covered benefit only when anterior teeth are extracted at the immediate complete denture insertion visit, whether maxillary or mandibular. Medicaid will not cover another denture for five years. Providers must verify with MDHHS that the beneficiary is eligible for a complete or partial denture per the five-year rule prior to rendering service, as described in the Frequency Verification Process section of this chapter. Failure to complete the verification process may result in claim denial.

For reasons of denture stability and retention, an immediate complete denture is not a benefit when:

- Posterior extractions are completed on the same date of service in order to allow adequate healing to support the denture.
- An existing partial denture is converted to an immediate complete denture.

7.6.D. PARTIAL DENTURES

Partial dentures are a covered benefit for all beneficiaries over age 16. Providers must verify with MDHHS that the beneficiary is eligible for a complete or partial denture per the five-year rule prior to rendering service, as described in the Frequency Verification Process section of this chapter. Failure to complete the verification process may result in claim denial.

The beneficiary's remaining teeth must be structurally sound to support a partial denture for five years. All clasps are included in the fee for the partial denture.

Medicaid Provider Manual

To ensure that tooth eruption is completed before a permanent appliance is placed, partial dentures are not a covered benefit for beneficiaries under age 16. To replace a lost anterior tooth on a beneficiary under age 16, prior authorization is required. The MSA-1680-B must be submitted for an interim partial denture.

The following benefits are not covered:

- A one-piece cast metal partial denture.
- Immediate partial dentures.
- Elaborate appliance items, such as semi-precision or precision attachments, stress breakers, hinge saddle areas, Kennedy (lingual) blankets.

7.6.E. INTERIM COMPLETE AND PARTIAL DENTURES

Interim complete dentures or partial dentures to replace anterior teeth (sometimes called a "stay-plate") are a covered benefit for beneficiaries under age 16. PA is required.

7.6.F. RELINES AND REPAIRS

Reimbursement for a complete or partial denture includes all necessary adjustments, relines, repairs, duplication, etc. within six months of insertion. If any necessary adjustments or repairs are identified within six months but are not provided until after six months, no additional reimbursement is allowed for these services.

After the initial six months, relines or duplications are covered benefits once within a two-year period. Relines may be laboratory-processed or chairside. Relines and adjustments are not payable on the same date of service.

After the initial six months, repairs and adjustments are covered benefits twice in a 12-month period. If more repairs are needed, they are the responsibility of the treating dental provider. Repairs for interim partial dentures are not covered.

Within five years of delivery, a dental provider is expected to provide the needed services to maintain the existing removable complete or partial denture. This includes extracting teeth, adding teeth to the existing denture, and removing hyperplastic tissue as necessary to restore the functionality of the complete or partial denture.

MDHHS may consider reimbursement for a replacement denture in less than five years when it is more cost-effective to replace the denture than repair it. When submitting the MSA-1680-B for a replacement denture, the provider must provide an explanation of the failure of the current denture and an itemized statement of the repairs needed to make the denture serviceable.

7.7 ORAL SURGERY

Oral surgical procedures are benefits for all beneficiaries. Detailed operative notes or narrative describing the surgical procedure must be retained in the beneficiary's dental record for all surgical procedures, including surgical extractions. Reimbursement for operative or surgical procedures includes local anesthesia, analgesia, and routine postoperative care. Surgical procedures involving the jaw or facial

Medicaid Provider Manual

bones are considered a medical benefit, not a dental benefit. (Refer to the Practitioner chapter of this manual for additional information.)

The extraction of teeth for prophylactic or orthodontic purposes is not a covered benefit. Dental providers providing enhanced dental services to CSHCS program beneficiaries should refer to the Children's Special Health Care Services Dental Benefits section of this chapter. (Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers chapter of this manual for additional information regarding coverage parameters.)

7.7.A. EXTRACTIONS

Extractions are covered for Medicaid beneficiaries of all ages. The extraction procedure code submitted for reimbursement must follow the CDT guidelines and is not based on the amount of time required, the difficulty of the extraction, or any special circumstances.

A simple extraction of an erupted tooth includes elevation and/or forceps removal. It includes minor contouring of the bone and closure if needed. An extraction is not a covered benefit if exfoliation is imminent.

A surgical extraction requires the removal of bone and/or sectioning of a tooth and may require the elevation of the mucoperiosteal flap. Minor contouring of the bone and closure of the tissue is included. Multiple extractions in the same quadrant for preparation of complete dentures are not considered surgical extractions unless guidelines for surgical extractions are met. The extraction of an impacted tooth is not covered for prophylactic removal of an asymptomatic tooth that does not exhibit pathology.

7.7.B. TOOTH REPLANTATION AND FIXATION

Tooth replantation and fixation is a benefit for beneficiaries under age 21 when permanent anterior teeth are avulsed or displaced due to traumatic injury.

7.7.C. ALVEOLOPLASTY

Alveoplasty is the surgical preparation of the ridge when placement of a prosthesis or other treatments such as radiation therapy and transplant surgery are planned. Alveoplasty is a covered benefit for all beneficiaries when medical necessity is documented in the beneficiary's dental record.

Reimbursement for an extraction includes minor contouring of the bone. Alveoplasty performed in conjunction with extractions is a separate and distinct procedure from extractions. Alveoplasty not in conjunction with extractions is not separately reimbursed when recent extractions have been performed in the same quadrant.

7.8 ADJUNCTIVE GENERAL SERVICES

7.8.A. ANESTHESIA

General anesthesia and intravenous (IV) sedation are covered benefits for all beneficiaries when medically necessary. Documentation of medical necessity must be retained in the beneficiary's dental record. General anesthesia and IV sedation may be billed separately from the surgical procedure. A diagnosis code is required on all claims for general anesthesia or IV sedation. General anesthesia and IV sedation may not be billed in combination with each other.

General anesthesia and IV sedation are not covered for the convenience of the dental provider or beneficiary and are limited to situations when these services are medically necessary. Apprehension and/or anxiety about the procedure are not considered valid medical reasons for general anesthesia or IV sedation.

General anesthesia and IV sedation are not covered when used preceding the administration of local anesthesia as the primary anesthetic agent. General anesthesia and IV sedation may not be billed in combination with each other.

Non-intravenous conscious sedation is a benefit for beneficiaries under age 6. It includes the administration of sedative and/or analgesic agents and requires appropriate monitoring in the office setting.

Local anesthesia is not a separately reimbursable procedure. Locally administered anesthetics are included in the reimbursement of the procedure performed.

Refer to the Practitioner chapter of this manual for additional information.

7.8.B. PROFESSIONAL VISITS

A hospital or ambulatory surgical center call is a covered benefit for all ages when dental care must be provided in a hospital or ambulatory surgical center for medical reasons. The hospital or ambulatory surgical center call can be submitted in addition to the applicable procedure codes for the services provided on the date of service.

Medicaid Provider Manual

SECTION 8 – NONCOVERED SERVICES

The following dental services are not covered by Medicaid:

- Orthodontics
- Gold foil restorations, inlay/onlay restorations
- Fixed bridges
- Dental implants
- Cosmetic and elective services
- Sports appliances
- Temporomandibular joint (TMJ) services, bite splints
- Services or surgeries that are investigational or experimental in nature
- Dental devices not approved by the FDA

SECTION 9 – CHILDREN'S SPECIAL HEALTH CARE SERVICES DENTAL BENEFIT

The CSHCS program covers medically necessary services that are related to the beneficiary's CSHCS qualifying diagnosis. Providers must be approved by CSHCS and authorized on the beneficiary's file. The CSHCS representative at the local health department should be contacted if there are questions regarding a beneficiary's eligibility for the CSHCS program. (Refer to the Children's Special Health Care Services chapter of this manual regarding CSHCS eligibility, qualifying diagnoses, provider authorization and other CSHCS program information.)

CSHCS beneficiaries may be eligible to receive selected dental services based on the CSHCS qualifying diagnoses and treatment plan. Not all CSHCS beneficiaries automatically qualify for dental benefits. Covered services may include general dental services, CSHCS enhanced dental services, or both.

- CSHCS general dental services are services covered under the Medicaid dental benefit.
- CSHCS enhanced dental services are additional services covered by the CSHCS program that are not covered by Medicaid.

Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers chapter of this manual for additional information regarding coverage parameters, including CSHCS covered services and PA requirements.

9.1 CSHCS GENERAL DENTAL SERVICES

CSHCS general dental services are those services covered under the Medicaid dental benefit. Services may include diagnostic, preventive, restorative, endodontics, prosthodontics, and oral surgery. The general dental benefit may include services performed by dental specialists (e.g., endodontists, oral surgeons, etc.). General dental services follow Medicaid coverage parameters, including frequency limits, PA requirements, and age restrictions.

CSHCS beneficiaries under age 21 who are enrolled in both Medicaid and CSHCS receive their general dental benefits through *HKD*. Beneficiaries who are not enrolled in *HKD* due to living arrangements or other factors receive their general dental benefits through Medicaid FFS. CSHCS beneficiaries who are enrolled in HMP receive their general dental benefits through their MHP. CSHCS enhanced dental benefits are administered through Medicaid FFS and are not part of *HKD* or HMP.

9.2 CSHCS ENHANCED DENTAL SERVICES

CSHCS enhanced dental services are additional services covered by the CSHCS program that are not covered by Medicaid. Examples of enhanced dental services may include orthodontics, dental implants, and crown and bridge services beyond Medicaid's coverage.

Most CSHCS enhanced dental services require PA. Authorization and treatment for enhanced dental services ends when the beneficiary turns 26. (Refer to the Prior Authorization section of this chapter for additional information.) Enhanced dental benefits are described in the individual subsections that follow.

9.2.A. ORTHODONTIC SERVICES

Orthodontic treatment is covered for CSHCS beneficiaries who have a qualifying dental diagnosis that includes orthodontia. Only CSHCS approved orthodontists may provide accepted standards of orthodontic treatment. Services that are non-traditional or experimental are not covered. It is the responsibility of the provider to verify CSHCS eligibility prior to rendering services.

CSHCS coverage ends when the beneficiary turns 26. Services completed on or after the beneficiary's 26th birthday will not be reimbursed. The beneficiary cannot be billed for services completed after CSHCS eligibility ends.

PA is required for each phase of orthodontic treatment, including limited, comprehensive, and continued care. PA requests for orthodontic services must be submitted on the MSA-1680-B. PA requests must be approved prior to the initiation of any treatment. An MSA-1680-B submitted after the initiation of services will be denied, resulting in non-payment of services. The MSA-1680-B requesting orthodontic treatment is approved for a six-month time period.

The following documentation must be included with each completed MSA-1680-B as applicable to each phase of treatment:

- Tooth chart documenting teeth present/absent
- A complete orthodontic treatment plan
- Proposed surgery
- Expected timeframe for completion of treatment
- Radiographs (cephalometric, panoramic, full series)
- Optional: Intraoral and facial photographs (not reimbursed by Medicaid)

9.2.A.1. PRE-ORTHODONTIC TREATMENT VISIT

The pre-orthodontic treatment visit includes the examination and diagnostic casts. Radiographs (full mouth/complete series, cephalometric, panoramic) are reimbursed separately from the evaluation. The pre-orthodontic treatment visit does not require PA.

9.2.A.2. LIMITED ORTHODONTIC TREATMENT

The treatment must be deemed necessary to reduce the severity or prevent future effects of a malformation and may involve non-surgical appliances used for palatal expansion. Limited orthodontic treatment is a one-time PA request for the entire time period of treatment.

9.2.A.3. COMPREHENSIVE ORTHODONTIC TREATMENT

Comprehensive orthodontic treatment procedure codes are used when multiple phases of treatment are provided at different stages of orofacial development. Comprehensive orthodontic treatment services are covered for a lifetime maximum of six years, with

each phase of treatment covered for up to two years. There is an initial reimbursement for each stage, with a maximum allowable amount within the two-year period. The submission of the first MSA-1680-B for comprehensive orthodontic treatment must include the appropriate procedure code and the banding/start date of treatment.

9.2.A.4. PERIODIC ORTHODONTIC TREATMENT

Periodic orthodontic treatment requires PA. For each six-month time period, a new MSA-1680-B must be approved prior to the continuation of treatment.

Each MSA-1680-B for an additional six-month time period must include the periodic orthodontic treatment code, description of service, and the start date of the six-month treatment period. The periodic orthodontic treatment procedure code may be used up to a maximum of four times per comprehensive orthodontic treatment. This information is necessary for reviewing case histories and verifying the payment status of the beneficiary. No additional PA will be approved if the provider has received the maximum allowable reimbursement for treatment.

9.2.A.5. DEBANDING/RETENTION

Debanding and retention are considered part of the limited and comprehensive orthodontic treatment phases and are included in the reimbursement rate. Replacement of lost or broken retainers is allowed twice per lifetime per beneficiary.

9.2.B. CROWN AND BRIDGE SERVICES

Qualification for crown and bridge services beyond those covered by Medicaid is based on the specific diagnoses and treatment plan. These services require PA. Not all CSHCS beneficiaries qualify for crown and bridge services.

Replacement will not be made within five years of the insertion date. When billing for crown and bridge services, the date of service is the date the crown or bridge was delivered to the beneficiary.

9.2.C. IMPLANT SERVICES

Dental implants, surgical guides and occlusal guards are covered for CSHCS beneficiaries who have a qualifying diagnosis, including but not limited to, anodontia or traumatic injury to the dental arches, and standard restorative treatment is contraindicated.

Dental implants require PA and must be approved before the initiation of treatment. Submission of the following information is required:

- Complete medical history
- Complete dental history
- Diagnosis
- Treatment plan

Medicaid Provider Manual

- Panoramic radiograph
- Medical justification for the implant services, including the reason alternative forms of prosthetics would not restore function effectively

Providers performing dental implant and adjunctive services must have specialized training in implant procedures (e.g., licensed oral-maxillofacial surgeons or periodontists). Providers must be approved by CSHCS and authorized on the individual CSHCS beneficiary's authorized provider file to receive reimbursement. (Refer to the Children's Special Health Care Services chapter for CSHCS provider approval and authorization information.)

Adjunctive services, including surgical stents, surgical splints and occlusal guards, are covered only when necessary for the success of implant services. Adjunctive services require PA and the dental provider must document the reason services are necessary.

Procedure codes and descriptions for surgical implants, custom or prefabricated abutments, implant supported crowns, occlusal guards and specialized prosthetics are found within the CDT published by the ADA. For additional information regarding coverage parameters, refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers chapter of this manual.

When billing for implant procedures, the date of service is the date of completion.

CSHCS coverage ends when the beneficiary turns 26. Services completed on or after the beneficiary's 26th birthday will not be reimbursed. The beneficiary cannot be billed for services completed after CSHCS eligibility ends.

SECTION 10 – HEALTHY KIDS DENTAL

10.1 BENEFIT ADMINISTRATION INFORMATION

MDHHS contracts with dental health plans (DHPs) for the statewide administration of dental benefits for *HKD* beneficiaries. Dental providers must be enrolled in the Michigan Medicaid program via CHAMPS and be a contracted network provider of the DHP to provide dental services to *HKD* beneficiaries. Providers may choose to participate in one or more DHP networks. *HKD* beneficiaries access dental services through their DHP network dental provider.

DHPs administer covered dental services according to Medicaid policy, contract requirements, and the DHP's standard policies, procedures, PA, and claim submission process. It is the provider's responsibility to adhere to the DHP's policies and procedures when providing services to *HKD* beneficiaries.

There is no beneficiary copayment for *HKD* services. Reimbursement for covered services rendered to *HKD* beneficiaries is based on the individual DHP's fee schedule. The DHP provides its fee schedule directly to its contracted network providers. Providers must accept the DHP's reimbursement as payment in full and cannot balance bill the beneficiary for services rendered. For specific information on a DHP's *HKD* network participation requirements, reimbursement schedule, or other DHP-specific policies and procedures, providers may contact the DHP. (Refer to the Directory Appendix for DHP contact information.)

10.2 COVERED SERVICES

The *HKD* benefit plan covers, at a minimum, all codes listed on the MDHHS Dental Fee Schedule. DHPs must provide the full range of Medicaid covered dental services to beneficiaries but are permitted to develop PA requirements and utilization management review criteria that differ from Medicaid. Questions about covered *HKD* benefits should be directed to the beneficiary's DHP.

The general categories of dental services listed below are covered by DHPs:

- Emergency dental services
- Diagnostic services
- Preventive services
- Restorative services
- Limited adjunctive services
- Endodontic services
- Crowns
- Periodontal services
- Prosthodontics (removable)
- Oral surgery services
- Early and Periodic Screening, Diagnosis and Treatment (EPSDT) services
- All medically necessary services

Medicaid Provider Manual

10.3 BENEFICIARY IDENTIFICATION

Beneficiaries receive a *HKD* DHP identification card upon enrollment in a DHP. Providers must use the DHP identification card when verifying beneficiary enrollment with the DHP.

10.4 ENROLLMENT INFORMATION

All newly eligible *HKD* beneficiaries are automatically enrolled in a DHP. The effective date of enrollment in the DHP will be the first day of the month that CHAMPS receives information that the beneficiary has been determined eligible for Medicaid. For example, if CHAMPS is notified that a beneficiary was determined Medicaid eligible on October 24, the beneficiary will have a DHP enrollment effective date of October 1.

Covered services rendered during the beneficiary's DHP effective enrollment period must be billed to the beneficiary's DHP. Beneficiaries who are automatically enrolled in a DHP and receive services prior to CHAMPS notification but after the DHP effective enrollment date are eligible to receive services through their assigned DHP for the entire first month of enrollment.

MDHHS mails confirmation letters to all beneficiaries who have been automatically enrolled in a DHP. The letter includes the beneficiary's assigned DHP and information on the right to choose a different DHP.

Before providing services, dental providers must verify Medicaid eligibility and DHP enrollment prior to each appointment to ensure prompt and appropriate reimbursement. Failure to do so may result in unpaid claims for which the provider cannot bill the beneficiary.

10.4.A. CHANGE IN DHP ENROLLMENT

A beneficiary may change DHPs within 90 days of the DHP enrollment effective date.

Beneficiaries may contact the MDHHS contracted enrollment broker, MI Enrolls, for help with their DHP selection. MI Enrolls is independent from the DHPs and provides counseling information, including dental provider participation in each DHP's network, to assist beneficiaries in choosing a DHP.

Beneficiaries may contact MI Enrolls to change their DHP. MDHHS also gives beneficiaries the opportunity to change DHPs during each beneficiary's annual open enrollment period. Changes of enrollment are effective on a prospective basis. (Refer to the Directory Appendix for MI Enrolls contact information.)

10.4.B. VOLUNTARY ENROLLMENT

American Indian/Alaska Native *HKD* beneficiaries are a voluntary enrollment population. American Indian/Alaska Native beneficiaries are automatically assigned to a DHP but are given the option to receive dental services through Medicaid FFS. MDHHS mails all new automatically assigned American Indian/Alaska Native beneficiaries confirmation letters informing them of their DHP assignment and the option to choose a different DHP or Medicaid FFS. American Indian/Alaska Native beneficiaries can opt-out of managed care at any time during the beneficiary's enrollment in the *HKD* program. The change of enrollment will be effective prospectively.

Medicaid Provider Manual

10.4.C. SPECIAL DISENROLLMENT

Beneficiaries are required to remain in their DHP if they do not make a change during their allotted open enrollment period or within 90 days of their assigned DHP's effective enrollment date. Any request to change DHP outside these time frames requires a good cause justification. Beneficiaries who believe they can show good cause may complete and submit the Special Disenrollment–For Cause Request form (MSA-0176) to MDHHS for review.

Beneficiaries are required to explain their reason for the requested change and may need to include a statement of support from their dental provider. Providers should refer beneficiaries to MI Enrolls for additional information and for instructions on how to obtain the MSA-0176.

10.4.D. LOSS OF ELIGIBILITY

Beneficiaries who lose Medicaid or Children's Health Insurance Program (CHIP) eligibility while enrolled in a DHP during active treatment that requires appointments beyond the last day of eligibility may still be covered if services were started prior to the loss of eligibility (e.g., laboratory processed crowns, root canal therapy, fabrication of dentures, etc.) Services must be completed within 60 days from the date of eligibility loss and billed to the DHP.

10.5 PAYMENT RESPONSIBILITY FOR ENROLLMENT CHANGES

Covered services rendered during the beneficiary's DHP effective enrollment period must be billed to the DHP. Beneficiaries may change enrollment status from FFS to a DHP, DHP to DHP, or a DHP to FFS. When a provider has an approved PA for a FFS beneficiary and the beneficiary becomes enrolled in a DHP, the provider must follow the rules of the beneficiary's assigned DHP to deliver dental treatment.

When dental treatment that requires multiple visits (e.g., laboratory processed crowns, root canal therapy, fabrication of dentures, etc.) was started prior to a change of enrollment and the dental provider has incurred costs related to the treatment, the dental provider must use the begin date of service and bill the entity responsible on that date. Treatment must be completed within 30 days after the change of enrollment when billing FFS and 60 days after the change of enrollment when billing a DHP.

- Example 1 (FFS to a DHP): An FFS beneficiary is enrolled in a DHP effective October 1. The provider began root canal treatment on September 26 but does not complete the treatment until October 3. The provider bills Medicaid FFS for the entire root canal treatment using September 26 as the date of service on the dental claim. The treatment must be completed within 30 days after the change of eligibility to be reimbursed. The DHP is not responsible for treatment reimbursement.
- Example 2 (DHP to DHP): A beneficiary is enrolled in a DHP effective October 1, but changes enrollment to another DHP effective November 1. The provider begins fabricating a denture on October 15 but does not deliver the denture until November 10. The provider uses October 15 as the date of service on the dental claim and bills the DHP responsible on that date. The service must be completed within 60 days of the enrollment change to be reimbursed.

Medicaid Provider Manual

- Example 3 (DHP to FFS): A beneficiary is enrolled in a DHP effective October 1, but changes enrollment to FFS effective November 1. The provider begins a laboratory processed crown on October 20 but does not deliver the crown until November 5. The provider uses October 20 as the date of service on the dental claim and bills the DHP responsible on that date. The service must be completed within 60 days of the enrollment change to be reimbursed.

DHPs are required to transition the care of members who were previously receiving active dental services. Providers should contact the beneficiary's DHP for transition of care policies and procedures.

Medicaid Provider Manual

SECTION 1 – GENERAL INFORMATION

A doula is a non-clinical person who typically provides physical, emotional, and educational support services to pregnant individuals during the prenatal, labor and delivery, and postpartum periods. Evidence indicates doula services are associated with improved birth outcomes. Doula services have been shown to positively impact social determinants of health, support birth equity, and decrease existing health and racial disparities.

Medicaid Provider Manual

SECTION 2 – COVERED SERVICES

Medicaid will cover different types of doula services, including community-based doulas, prenatal doulas, labor and birth doulas, and postpartum doulas. As required by federal regulations at CFR 440.130(c), doula services must be recommended by a licensed healthcare provider. A recommendation for doula services may come from any licensed healthcare provider. Examples of healthcare providers qualified to recommend doula services are those licensed in Michigan as a licensed practical nurse, registered nurse, social worker, midwife, nurse practitioner, physician assistant, certified nurse midwife or physician. MDHHS has obtained a statewide standing recommendation from a licensed healthcare provider for doula services due to their medical necessity for all pregnant or postpartum Medicaid recipients. The statewide standing recommendation applies to every Medicaid beneficiary eligible for doula services and meets program specific documentation requirements for the recommendation. Separate documentation regarding the recommendation by doula providers is not required.

Dependent on person-centered needs, doula support during the perinatal period may include, but is not limited to:

- Prenatal services, which include:
 - Promoting health literacy and knowledge;
 - Assisting with the development of a birth plan;
 - Supporting personal and cultural preferences around childbirth;
 - Providing emotional support and encouraging self-advocacy;
 - Reinforcing practices known to promote positive outcomes such as breastfeeding;
 - Identifying and addressing social determinants of health; and
 - Coordinating referrals to community-based support services (e.g., Women, Infants and Children [WIC] program, behavioral health services, transportation, home visiting services).
- Labor and delivery services, which include:
 - Providing continual physical comfort measures, information, and emotional support;
 - Advocating for beneficiary needs; and
 - Being an active member of the birth team.
- Postpartum services, which include:
 - Educating regarding newborn care, nutrition, and safety;
 - Supporting breastfeeding;
 - Providing emotional support and encouraging self-care measures;
 - Supporting beneficiary in attending recommended medical appointments;
 - Identifying and addressing social determinants of health;

Medicaid Provider Manual

- Coordinating referrals to community-based support services (e.g., WIC, behavioral health services, transportation, home visiting services); and
- Grief support services.

It is the expectation that doula services be provided face-to-face with the beneficiary. Prenatal and postpartum services may be delivered via telehealth. Doula providers will be expected to adhere to current MDHHS telemedicine policy.

Doula services may include a maximum of 12 total visits during the prenatal and postpartum periods and one visit for attendance at labor and delivery. All prenatal and postpartum visits must be at least a minimum of 20 minutes in duration with a beneficiary to be considered eligible for reimbursement. Additional visits beyond the limits in policy may be requested through the prior authorization (PA) process. PA requirements for MHP enrollees may differ from those required for Fee-for-Service (FFS) beneficiaries. Providers should contact the individual MHPs regarding their authorization requirements.

A qualifying visit for attendance at labor and delivery requires the doula to be physically present during labor, delivery, and the immediate postpartum period. Physical presence at birth includes doulas who remain on-site at the facility.

Documentation must include a start time and end time of services provided, a description of the professional services rendered, and information regarding the source of the licensed healthcare provider recommendation for services if a doula chooses not to rely on the statewide recommendation. Documentation must be kept in accordance with the record keeping requirements of the Medicaid program and may be subject to review and post-payment audit.

SECTION 3 – PROVIDERS

3.1 PROVIDER CRITERIA

Qualified individuals must be at least 18 years of age and possess a high school diploma or equivalent. MDHHS will include doulas who have completed training provided by an MDHHS-approved doula training program or organization on the MDHHS Doula Registry. Doulas must provide proof of training to MDHHS upon request.

At a minimum, a doula training program must include skill development in the following areas:

- Communication, including active listening, cross-cultural communication, and interprofessional communication,
- Perinatal self-care measures,
- Coordination of and linkage to community services and resources,
- Labor and coping strategies, and
- Newborn care and supportive measures.

MDHHS-approved qualified doula training programs or organizations can be found on the MDHHS Doula Initiative website. (Refer to the Directory Appendix for website information.)

It is the expectation that doula providers will work within their scope of training. MDHHS, with community input, will continue to review doula training programs, including those created for specific populations such as community-based doula programs, to support cultural and community needs.

3.2 PROVIDER ENROLLMENT

Doula providers seeking reimbursement for their professional services to Medicaid beneficiaries are required to be Medicaid-enrolled providers. To enroll as a Medicaid provider, a doula must have a Type 1 (Individual) National Provider Identifier (NPI) and complete an online application in the Community Health Automated Medicaid Processing System (CHAMPS). As part of the enrollment process, individually enrolled doulas may also associate their enrollment with Medicaid-enrolled organizations with a Type 2 (Group) NPI.

Doulas providing services to Medicaid beneficiaries are required to be registered with the MDHHS Doula Registry to enroll as a Medicaid provider. Additional details regarding the MDHHS Doula Registry are available on the MDHHS Doula Initiative website. (Refer to the Directory Appendix for website information.)

Doula providers are also subject to all relevant policy provisions outlined in the MDHHS Medicaid Provider Manual, including the General Information for Providers Chapter.

SECTION 4 – REIMBURSEMENT

4.1 REIMBURSEMENT CONSIDERATIONS

For doula services rendered to beneficiaries enrolled in an MHP, providers will submit claims to the beneficiary's assigned MHP. If a beneficiary is not enrolled in an MHP, doula providers will submit claims for FFS reimbursement through CHAMPS.

- Claims are to be submitted utilizing the pregnant or postpartum beneficiary's Medicaid identification (ID) number.
- Medicaid will provide reimbursement for the first eligible claims submitted for these services up to the limit of 12 total prenatal and postpartum visits and one visit for attendance at labor and delivery.
- Claims must include a primary diagnosis code and modifier HD to support the services billed. In addition, doulas are encouraged to report the appropriate International Classification of Diseases 10 (ICD-10) diagnosis codes within the range of Z55-Z65 to describe any relevant social determinants of health (e.g., Z56.1 change of job, Z59.1 inadequate housing, Z59.4 lack of adequate food and safe drinking water).
- For additional doula services billing information, refer to the Billing & Reimbursement for Professionals chapter.

4.2 PRIOR AUTHORIZATION (PA) CRITERIA

There may be occasions when a beneficiary requires services beyond those ordinarily covered by Medicaid, such as additional visits. PA requests should be related to physical, emotional, and educational support services to pregnant individuals during the prenatal and postpartum periods.

Approval for a maximum of six additional visits is dependent on person-centered needs. Requests should include at least one of the following criteria:

- Promoting health literacy and knowledge
- Assisting with the development of a birth plan
- Supporting personal and cultural preferences around childbirth
- Providing emotional support
- Encouraging self-advocacy
- Reinforcing practices known to promote positive outcomes, such as breastfeeding
- Identifying and addressing social determinants of health
- Educating regarding newborn care, nutrition, and safety
- Supporting breastfeeding
- Encouraging self-care measures
- Supporting beneficiary in attending recommended medical appointments
- Identifying and addressing social determinants of health

Medicaid Provider Manual

- Grief support services
- Coordinating referrals to community-based support services (e.g., Women, Infants and Children [WIC] program, behavioral health services, transportation, home visiting services)

PA requests for Fee-For-Service may be submitted by the following methods:

- In writing, via Direct Data Entry (DDE) in the Community Health Automated Medicaid Processing System (CHAMPS). No PA form is required if the request is submitted this way, but the provider will need to include a statement in the procedure comments explaining the need for extra visits.
- By faxing form MSA-1653-B and including a statement on the form or on the fax cover sheet explaining the need for extra visits.

Providers will receive a hard copy of the PA determination letter to the address selected in CHAMPS (located in the pull-down list when a DDE request is entered). If the form is faxed, the address indicated on the form should ideally match the communication address used to enroll in CHAMPS.

Refer to the General Information for Providers chapter for additional information regarding prior authorization of services.

4.3 FEDERALLY QUALIFIED HEALTH CENTER AND RURAL HEALTH CLINIC REIMBURSEMENT

Doula services provided by a FQHC or RHC do not qualify as an encounter. The services may, however, be reimbursed outside of the Prospective Payment System (PPS).

4.4 INDIAN HEALTH CENTER REIMBURSEMENT

Doula services provided by a Tribal Health Center (THC) or Tribal Federally Qualified Health Center (FQHC) do not qualify as an encounter. The services may, however, be reimbursed outside of the All Inclusive Rate (AIR).

SECTION 1 – GENERAL INFORMATION

Federal regulations require state Medicaid programs to offer early and periodic screening, diagnosis, and treatment (EPSDT) services to Medicaid eligible beneficiaries younger than 21 years of age; however, beneficiary participation is voluntary. The intent of EPSDT is to provide necessary health care, diagnostic services, treatment, and other measures according to section 1905(a) and 1905(r) [42 U.S.C. 1396d] of the Social Security Act (1967) to correct or ameliorate defects and physical and mental illnesses and conditions discovered whether or not such services are covered under the state plan. State Medicaid programs are required to provide for any services that are included within the mandatory and optional services that are determined to be medically necessary for children under 21 years of age. Accordingly, EPSDT well child visits and any needed follow-up services are covered by Medicaid.

EPSDT visits cover any medically necessary screening and preventive support services for children, including nutritional and at-risk assessments as well as resulting health education and mental health services. These services are available to all children for the purpose of screening and identifying children who may be at risk for, but not limited to, drug or alcohol abuse, child abuse or neglect, trauma, failure to thrive, low birth weight, low functioning/impaired parent, or homeless or dangerous living situations.

EPSDT visits are to be performed in accordance with the American Academy of Pediatrics (AAP) periodicity schedule, its components, and medical guidelines. Michigan recognizes the AAP definition of "medical necessity" as:

Health care interventions that are evidence based, evidence informed, or based on consensus advisory opinion and that are recommended by recognized health care professionals to promote optimal growth and development in a child and to prevent, detect, diagnose, treat, ameliorate, or palliate the effects of physical, genetic, congenital, developmental, behavioral, or mental conditions, injuries, or disabilities.

EPSDT requires the coverage of medically necessary inter-periodic screenings outside of the AAP periodicity schedule. Coverage for such screenings is required based on an indication of a medical need to diagnose an illness or condition that was not present at the regularly scheduled screening or to determine if there has been a change in a previously diagnosed illness or condition that requires additional services.

Medically necessary services include habilitative or rehabilitative services that are expected to attain, maintain, or regain functional capacity and to achieve maximum health and function. A service need not cure a condition in order to be covered under EPSDT, and maintenance services or services that improve the child's current health condition are also covered in EPSDT because they ameliorate a condition. The common definition of ameliorate is "to make more tolerable." Thus, services such as physical and occupational therapy are covered when they have an ameliorative, maintenance purpose. Maintenance services are defined as services that sustain or support rather than those that cure or improve health problems. It is important to identify illnesses and conditions early and to treat any health problems discovered in children before they become worse and more costly. Services are covered when they prevent a condition from worsening or prevent development of additional health problems. Refer to the Special Coverage Provisions section of the Healthy Michigan Plan chapter for the definition of "habilitative services".

Michigan Department of Health and Human Services
Medicaid Provider Manual

EPSDT includes a broad range of services that can be covered and includes:

- licensed practitioners services;
- speech, occupational, and physical therapies;
- physician services;
- private duty nursing;
- personal care services;
- home health;
- medical equipment and supplies;
- habilitative and rehabilitative services;
- vision services;
- hearing services; and
- dental services.

In addition, the coverage of other diagnostic, screening, preventive and rehabilitative services is required, and includes any medical or remedial services recommended by a physician or other licensed practitioner of the healing arts within the scope of their practice under state law, for the maximum reduction of physical or mental disability and restoration of an individual to the best possible functional level. The coverage of EPSDT services is particularly important for children with disabilities, because such services can prevent conditions from worsening, reduce pain, and avert the development of more costly illnesses and conditions. Other less common examples include items of durable medical equipment, such as decubitus cushions, bed rails and augmentative communication devices. Such services are a crucial component of a good, comprehensive child-focused health benefit.

The determination of whether a service is medically necessary must be made on a case-by-case basis, taking into account the particular physical, behavioral, mental, or dental health needs of the child. While the treating provider is responsible for determining or recommending that a particular service is needed to correct the child's condition, both the Michigan Department of Health and Human Services (MDHHS) and a child's treating provider play a role in determining whether a service is medically necessary. If there is a disagreement between the treating provider, health plan, and/or Medicaid as to whether a service is medically necessary for a particular child, Medicaid is responsible for making a decision for the individual child based on information presented to departmental staff. The MDHHS Office of Medical Affairs consists of a panel of physicians, including pediatricians, who will review the medical necessity of a particular service when there is a disagreement between the treating provider, health plan or Medicaid. These physicians review, on a case-by-case basis, the particular needs of the child based on the medical standards and literature, and in consultation with subspecialists when appropriate in accordance with Michigan Medicaid policy.

A medically necessary treatment service should not be denied to a child based on cost alone, but the relative cost effectiveness of alternative services may be considered as part of the prior authorization process. Services may be covered in the most cost effective mode as long as the less expensive service is equally effective and actually available. Prior authorization must be conducted on a case-by-case basis, evaluating each child's needs individually. Prior authorization is not required for medically necessary screenings.

Michigan Department of Health and Human Services

Medicaid Provider Manual

The main parts of the EPSDT program that providers are responsible for are:

- Well child visits, including immunizations and developmental screening, using a validated and standardized screening tool at specified intervals as defined in the periodicity schedule by the AAP (hereafter referred to as the "AAP periodicity schedule"). A copy of the AAP periodicity schedule is available on the AAP website. (Refer to the Directory Appendix for website information.)

NOTE: The AAP periodicity schedule requires a risk assessment to be performed for vision, hearing, and blood lead screening at the specified intervals. MDHHS requires vision, hearing, and blood lead testing to be performed at the specific ages indicated on the AAP periodicity schedule. A parent/guardian (or person in loco parentis) applying to register a child for the first time in kindergarten or first grade in a school in this state shall present to school officials, at the time of registration or no later than the first day of school, a certificate of hearing and vision testing or screening or a statement of exemption. Refer to the appropriate section within this chapter for MDHHS requirements regarding vision, hearing, and blood lead screening.

- Referrals for:
 - Other preventive health care;
 - Medically necessary follow-up services to treat detected conditions; and
 - Transportation for health care services.

Michigan Department of Health and Human Services
Medicaid Provider Manual

SECTION 2 – AAP PERIODICITY SCHEDULE AND COMPONENTS

The AAP periodicity schedule and its components are available on the AAP website, and they are to be followed for well child visits. (Refer to the Directory Appendix for AAP website information.)

Head Start agencies are directed by federal regulation to meet state EPSDT standards for health screening. MDHHS urges providers to cooperate with these agencies. Providers are strongly encouraged to share the results with the Head Start agency if that agency was the referral source, and if the provider receives authorization.

Providers must complete all testing components at the ages indicated on the AAP periodicity schedule. Well child visits may be performed more frequently than the AAP periodicity schedule indicates if required by court order, foster care standards, or if considered medically necessary. The child's medical record must reflect documentation of the circumstances.

The following sections follow the AAP periodicity schedule and are meant to provide further guidance to providers. The sections include additional policies and procedures to be performed that are beyond the AAP periodicity schedule guidelines.

Michigan Department of Health and Human Services
Medicaid Provider Manual

SECTION 3 – HISTORY AND WELL CHILD VISITS

An initial history must be obtained for each new patient at the first well child visit, with an update (interval history) at each subsequent well child visit. MDHHS supports the concept of a medical home for each Medicaid beneficiary. A medical home is a primary care provider (PCP) who assumes responsibility for assuring the overall care of a beneficiary, and for the maintenance and updating of a beneficiary's medical record. When a PCP accepts a child in a primary care relationship, the provider takes responsibility for arranging or providing EPSDT well child visits.

Well child visits are the health check-ups, newborn, well baby, and well child exams represented by appropriate Current Procedural Terminology (CPT) preventive medicine services procedure codes.

The AAP periodicity schedule indicates all components and age-specific indicators for performing the various components. Developmental screening, using an objective validated and standardized screening tool as recommended by the AAP, should be performed at the specified intervals.

SECTION 4 – MEASUREMENTS

4.1 LENGTH/HEIGHT AND WEIGHT

Length, height, and weight must be measured using standardized techniques each time the PCP conducts a well child visit, with good practice requiring graphing of the measurements. A suitable graphing document may be found on the Centers for Disease Control and Prevention (CDC) website. (Refer to the Directory Appendix for website information.)

4.2 HEAD CIRCUMFERENCE

A head circumference measurement is required at each well child visit through 24 months of age.

4.3 WEIGHT FOR LENGTH

Weight for length must be measured each time the PCP conducts a well child visit through 18 months of age, with good practice requiring graphing of the measurements. A suitable graphing document may be found on the CDC website. (Refer to the Directory Appendix for website information.)

4.4 BODY MASS INDEX (BMI)

Body mass index (BMI) must be measured each time the PCP conducts a well child visit for children 24 months of age and older, with good practice requiring graphing of the measurements. A suitable graphing document may be found on the CDC website. (Refer to the Directory Appendix for website information.)

4.5 BLOOD PRESSURE

PCPs must obtain a blood pressure reading at each well child visit beginning at 3 years of age. Blood pressure measurement in infants and children with specific risk conditions should be performed at well child visits before 3 years of age.

SECTION 5 – SENSORY SCREENING

5.1 VISION SCREENING

PCPs are to perform a subjective vision screening (i.e., by history) or risk assessment at each well child visit as recommended by the AAP periodicity schedule. For asymptomatic children 3 years of age and older, an objective screening must occur as indicated on the AAP periodicity schedule. An objective vision screening is accomplished using a standardized screening tool. A visual acuity screen is recommended at 4 and 5 years of age, as well as in cooperative children 3 years of age. Instrument-based screening may be used to assess risk at 12 and 24 months of age, in addition to the well child visits at 3 through 5 years of age. MDHHS requires vision testing at specific well child visits for children 3 years of age and older.

5.1.A. PRESCHOOL

An objective vision screening may be performed on Medicaid eligible preschool-age children each year beginning at 3 years of age through 6 years of age by qualified Local Health Department (LHD) staff. If the child is uncooperative, the screening should be re-administered within six months. LHDs may provide objective vision screening services and accept referrals for screening from the PCP and from Head Start agencies. In an effort to promote communication with the child's medical home, the objective vision screening results must be reported to the child's PCP. In the event the LHD is unable to report the objective vision screening results to the child's PCP, the LHD must clearly document why this could not be accomplished. Providers are strongly encouraged to share the results with the Head Start agency if that agency was the referral source, and if the provider receives authorization.

5.1.B. REFERRAL

For children of any age, referral to an optometrist or ophthalmologist should be made if there are symptoms or other medical justification (e.g., parent/guardian has suspicions about poor vision in the child). A routine eye examination by an optometrist or ophthalmologist once every two years is a Medicaid benefit and does not require prior authorization.

5.2 HEARING SCREENING

Providers are to perform a subjective hearing screening (i.e., by history) or risk assessment at each well child visit as recommended by the AAP periodicity schedule. For asymptomatic children, an objective screening must occur as indicated on the AAP periodicity schedule. Screen the child with audiometry, including 6,000 and 8,000 Hz high frequencies, once between 11 and 14 years, once between 15 and 17 years, and once between 18 and 21 years. Confirm the initial screen was completed, verify the results as soon as possible, and follow-up as appropriate.

Michigan Department of Health and Human Services
Medicaid Provider Manual

5.2.A. NEWBORNS/INFANTS

All newborns must be screened using evoked otoacoustic emissions (EOAE) and/or auditory brainstem response (ABR) methods. The hospital must provide newborn hearing screenings for Medicaid-covered newborns as indicated by the AAP. If the newborn fails the first screening, another screening must be conducted prior to the newborn's discharge. Coverage for the EOAE and ABR newborn hearing screenings is included within the applicable diagnosis related group (DRG) payment for the newborn's inpatient stay. If the hospital is not equipped for EOAE and/or ABR, the newborn's PCP must be made aware of this fact by the hospital so the newborn can be referred for a hearing screening prior to 1 month of age.

For infants who do not pass ABR testing in the neonatal intensive care unit (NICU), a referral should be made directly to an audiologist for rescreening and, when indicated, a comprehensive evaluation including ABR. For rescreening, a complete screening on both ears is recommended, even if only one ear failed the initial screening. For readmissions in the first month of life for all infants, when there are conditions associated with potential hearing loss, a repeat hearing screening is recommended before discharge. All infants who do not pass the initial hearing screening and the subsequent rescreening should have appropriate audiological and medical evaluations to confirm the presence of hearing loss at no later than 3 months of age. All infants with confirmed permanent hearing loss should receive early intervention as soon as possible after diagnosis but at no later than 6 months of age.

The results of all hearing tests and screenings conducted on infants who are younger than 12 months of age must be reported to the MDHHS Early Hearing Detection and Intervention (EHDI) program. The Audiological/Medical Follow-up Services Report form (DCH-0120) is to be completed and shall include the type, degree, and symmetry of the diagnosis, along with where and when the diagnosis was made. The form is to be submitted to the EHDI program. (Refer to the Directory Appendix for contact and form information.)

Refer to the Newborn Hearing Services subsection of the Hearing Services and Devices Chapter for additional information.

5.2.B. PRESCHOOL

An objective hearing screening may be performed on Medicaid eligible preschool-age children by qualified LHD staff. LHDs may provide objective hearing screening services and accept referrals for screening from the PCP and from Head Start agencies. In an effort to promote communication with the child's medical home, the objective hearing screening results must be reported to the child's PCP. In the event the LHD is unable to report the objective hearing screening results to the child's PCP, the LHD must clearly document why this could not be accomplished. The results of all hearing tests and screens conducted on children who have been diagnosed with hearing loss who are younger than 3 years of age must be reported to the EHDI program. Providers are strongly encouraged to share the results with the Head Start agency if that agency was the referral source, and if the provider receives authorization.

Michigan Department of Health and Human Services

Medicaid Provider Manual

5.2.C. REFERRAL

A referral to a hearing center, audiologist, otologist, or Children's Special Health Care Services (CSHCS)-sponsored otology clinic at a LHD should be made if there are symptoms (e.g., parent/guardian has suspicions about poor hearing in the child), risk factors (e.g., exposure to ototoxic medications, family history of hearing deficits), or other medical justification for further objective testing or diagnosis.

SECTION 6 – DEVELOPMENTAL/SOCIAL/BEHAVIORAL/MENTAL HEALTH

Developmental/social/behavioral/mental health screenings, surveillance, and/or assessment are required at each scheduled EPSDT well child visit from birth through adolescence as recommended by the AAP periodicity schedule and as indicated in the following subsections. The PCP should screen all children for developmental and behavioral concerns, including engaging in risky behavior, using a validated and standardized screening tool as indicated by the AAP periodicity schedule.

If the screening is positive or suspected problems are observed, further evaluation must be completed by the PCP, or the child should be referred for a prompt follow-up assessment to identify any further health needs. The provider may administer additional screenings, surveillance, or assessments as described in the following subsections.

6.1 MATERNAL DEPRESSION SCREENING

Screening for maternal depression with a screening tool, such as the Edinburgh scale, is to be performed by the infant's PCP as recommended by the AAP periodicity schedule. It is intended that the service should be reported and billed under the infant's Medicaid ID number using the appropriate Current Procedural Terminology (CPT) code as it is a service rendered for the benefit of the infant. If the screening is positive, the PCP should address the mother-child dyad relationship (attachment and bonding), follow-up, and refer as appropriate.

6.2 DEVELOPMENTAL SCREENING

A developmental screening using an objective validated and standardized screening tool must be performed following the AAP periodicity schedule at 9, 18 and 30 (or 24) months of age, and during any other preventive health care well child visits when there are parent/guardian and/or provider concerns. Developmental screening may be accomplished by using a validated and standardized developmental screening tool such as the Ages and Stages Questionnaire (ASQ) or Parents' Evaluation of Developmental Status (PEDS). If the screening is positive, PCPs should further evaluate the child, provide counseling, and refer the child as appropriate. A maximum of three objective standardized developmental screenings may be performed in one day for the same beneficiary by a single provider. (Refer to the Billing & Reimbursement for Professionals chapter for billing instructions.)

6.3 AUTISM SPECTRUM DISORDER SCREENING

A validated and standardized screening tool must be administered as part of the well child visit by a physician. Proper assessment of autism spectrum disorder is accomplished by administering a validated and standardized screening tool, such as the Modified Checklist for Autism in Toddlers (M-CHAT), at 18 and 24 months of age as indicated by the AAP periodicity schedule. Surveillance for Autism Spectrum Disorder (ASD) must be completed during other well child visits beginning at 12 months of age by listening for parent/guardian concerns and by watching for red flag abnormalities, such as no babbling by 12 months of age. Children 24 months of age and older who have not been screened may be screened during preventive health care well child visits using a validated and standardized screening tool such as the M-CHAT or the Social Communication Questionnaire (SCQ).

The screening tool may be completed by the parent/guardian and reviewed/verified by the PCP. The M-CHAT is validated for children 16 through 30 months of age. For children 4 years of age and older (mental age greater than 2 years of age), the SCQ may be utilized. For children 30 months through

Michigan Department of Health and Human Services
Medicaid Provider Manual

4 years of age, the more applicable of the two screening tools should be administered (M-CHAT if mental age is younger than 2 years of age; SCQ if mental age is greater than 2 years of age). If the screening is positive, the PCP should contact the Pre-paid Inpatient Health Plan (PIHP) directly to arrange for a follow-up evaluation. (Refer to the Directory Appendix for the National Autism Center contact information and for additional resources regarding ASD.)

6.4 DEVELOPMENTAL SURVEILLANCE

Developmental surveillance should occur at every well child visit throughout childhood and must be performed as indicated by the AAP periodicity schedule. Developmental surveillance includes eliciting and attending to parent/guardian concerns, maintaining a developmental history, making accurate and informed observations of the child, identifying the presence of risk and protective factors, and documenting the process and findings. Further investigation, an appropriate referral, and/or an early return visit should be scheduled for children whose surveillance raises concerns that are not confirmed by a developmental screening tool.

6.5 BEHAVIORAL/SOCIAL/EMOTIONAL SCREENING

The behavioral/social/emotional screening should be family-centered and may include asking about caregiver emotional and mental health concerns and social determinants of health, racism, poverty, and relational health. A behavioral/social/emotional screening is to be performed during each well child visit from newborn through 21 years of age in accordance with the AAP periodicity schedule, the American College of Obstetricians and Gynecologists (Women's Preventive Services Initiative) recommendations, and the American Academy of Child & Adolescent Psychiatry guidelines.

The behavioral/social/emotional screening may be accomplished by using an evidence-based, validated and standardized screening tool such as the Ages and Stages Questionnaire – Social-Emotional (ASQ-SE) or Pediatric Symptom Checklist (PSC), with appropriate action to follow if the screening is positive. Providers should establish office routines for screening and surveillance. Children with significant risk factors should be monitored with heightened surveillance and more frequent screening. The use of validated and standardized screening tools improves the detection rate of social-emotional problems in children compared to the reliance on subjective clinical judgment.

A behavioral/social/emotional screening should also be performed whenever there are general development delays; at any time the clinician observes poor growth, poor attachment, or symptoms such as excessive crying, clinginess, or fearfulness for developmental stage, or regression to earlier behavior; and/or at any time the parent/caregiver identifies behavioral or social-emotional concerns.

If the screening is positive, the PCP should further evaluate the child, provide counseling, and refer the child as appropriate. (Refer to the Children in Foster Care section of this chapter for more information regarding the administration of a behavioral/social/emotional screening for children in foster care.)

6.6 TOBACCO, ALCOHOL OR DRUG USE ASSESSMENT [CHANGE MADE 4/1/2025]

A tobacco, alcohol or drug use assessment must be performed annually at each preventive health care well child visit beginning at 11 years of age and as indicated by the AAP periodicity schedule (added 4/1/2025) or when there are circumstances suggesting the possibility of substance abuse beginning at an earlier age. A risk assessment should be administered and, if necessary, the child should be screened for tobacco, alcohol, and other drug use with a validated and standardized screening tool, such as the

Michigan Department of Health and Human Services
Medicaid Provider Manual

CRAFT (Car, Relax, Alone, Forget, Friends, Trouble) screen. If the assessment and screening are positive, the PCP should further evaluate the child, provide counseling, and refer the child as appropriate.

6.7 DEPRESSION AND SUICIDE RISK SCREENING

A depression and suicide risk screening is to be performed annually for all adolescents who are 12 years of age until 21 years of age as indicated by the AAP periodicity schedule and per the Guidelines for Adolescent Depression in Primary Care (GLAD-PC). A depression screening may be accomplished using a standardized screening tool such as the Patient Health Questionnaire-9 (PHQ-9), PHQ-9 modified for Adolescents (PHQ-A), or other screening tools available in the GLAD-PC toolkit. Every effort should be made to preserve the confidentiality of the adolescent. Any information obtained during the visit should only be shared outside of the office with the permission of the parent or caregiver to protect the adolescent's safety. (Refer to the Directory Appendix for website information.)

SECTION 7 – TRAUMA SERVICES

Children under 21 years of age are covered for trauma-related services under the EPSDT benefit. Trauma results from an event, series of events, or set of circumstances that is experienced by an individual as physically or emotionally harmful or threatening and has lasting adverse effects on the child's functioning and physical, social, or emotional well-being. According to adverse childhood experiences (ACEs), adverse early trauma experiences are related to increased rates of health problems in adulthood including obesity, cardiovascular disease, substance use, mental health problems, social risk factors, and poor health-related quality of life. "Toxic stress" is described as a type of unremitting stress that ultimately compromises a child's ability to regulate their stress response system effectively and can lead to adverse long-term structural and functional changes in the brain and elsewhere in the body. Trauma-specific interventions should be identified to reduce the prevalence and consequences of ACEs and trauma. Trauma-specific interventions generally recognizes the following:

- The child's need to be respected, informed, connected, and hopeful regarding their own recovery;
- The interrelation between trauma and symptoms of trauma such as substance use, eating disorders, depression, and anxiety; and
- The need to work in a collaborative way with the child, family and friends of the child, and other human services agencies.

The primary care provider (PCP) should:

- Strengthen their provision of anticipatory guidance to support children's social-emotional-linguistic skills and to encourage the adoption of positive parenting techniques;
- Actively screen for precipitants of toxic stress that are common in their particular practices;
- Assess the child's exposure to trauma and risk of exposure to trauma using a questionnaire or screening tool. Screening tools are available through the American Academy of Pediatrics (AAP); and
- Identify (or advocate for the development of) local resources that address risks for toxic stress that are prevalent in their communities.

Providers may use current best practices to screen for precipitants of toxic stress. Examples of current trauma screening tools, as indicated by the AAP, include:

- Adverse Childhood Experiences Questionnaire (ACE-Q)
- Resilience Questionnaire
- Pediatric Intake Form

History of trauma may or may not be disclosed by the family or child. The PCP may need to ask about possible current or past exposure to traumatic events and assess for the child's safety. Questions may be targeted when there are unexplained somatic complaints or other indicators that may be associated with exposures to trauma or adversity. The PCP may consider asking the caregiver and/or child explicitly about the exposure to trauma. Providers may refer to the AAP policy statement for questions to ask parent/caregivers. Examples of those questions include:

Michigan Department of Health and Human Services

Medicaid Provider Manual

- “Has your home life changed in any significant way (e.g., moving, new people in the home, people leaving the home)?”
- “Do you have any concerns about your child’s behavior at home, child care or school, or in the neighborhood? Has your child’s teacher mentioned any concerns?”
- “Many children are exposed to violence at home, in the neighborhood, at school or with friends. Do you think your child may have been exposed to violence?”
- “All children are exposed to stress. Sometimes stress can make a child sad or scared. Do you have any concerns about your child’s stress?”

Examples of questions to ask the school-aged child include:

- “Are you having any problems at home, at school, or in the neighborhood?”
- “Do you feel safe at home and/or at school?”
- “How do you deal with stress?”

7.1 REFERRALS FOR BEHAVIORAL HEALTH SERVICES/THERAPY

If the screening is positive, the PCP should refer the child to a mental health professional trained to provide trauma assessment, treatment using a trauma-specific model, and/or support. Behavioral health services are a Medicaid covered service.

Behavioral health services are covered by the local Prepaid Inpatient Health Plan (PIHP)/Community Mental Health Services Program (CMHSP) for the services included under the capitation payments to the PIHPs/CMHSPs. A limited outpatient benefit is covered for children enrolled in a Medicaid Health Plan (MHP) or through Fee-for-Service (FFS) Medicaid.

In general, MHPs are responsible for outpatient mental health treatment when the child is experiencing or demonstrating mild or moderate psychiatric symptoms or signs of sufficient intensity to cause subjective distress or mildly disordered behavior. For children not enrolled in a MHP, behavioral health services are covered through FFS Medicaid. Under FFS, behavioral health services may be provided by a physician (MD or DO), physician assistant, nurse practitioner, psychologist, social worker, professional counselor, or marriage and family therapist working within their scope of practice under State law.

In general, PIHPs/CMHSPs are responsible for outpatient mental health treatment for a child with a serious emotional disturbance as indicated by the diagnosis, intensity of current signs and symptoms, and substantial impairment in ability to perform daily living activities. The child may experience substantial interference in achievement or maintenance of developmentally appropriate social, behavioral, cognitive, communicative or adaptive skills. For children not enrolled in an MHP and for services not included in the capitation payments to the PIHP/CMHSP, behavioral health services are covered through FFS Medicaid. (Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter for additional information. Additional information is also available on the MDHHS website; refer to the Directory Appendix for website information.)

Michigan Department of Health and Human Services
Medicaid Provider Manual

SECTION 8 – PHYSICAL EXAMINATION

A complete physical examination must be performed at each well child visit. Infants are to be totally unclothed and older children must be undressed and suitably draped. If the patient is an adolescent or young adult and the examination requires inspection or palpation of anorectal or genital areas and/or the female breast, a chaperone is recommended. The use of a chaperone should be a shared decision between the patient and the PCP. If the patient declines the use of a chaperone, the provider should document this fact in the medical record. The purpose of the well child examination is to promote health, detect medical problems, and to counsel in order to prevent injury and future health problems. The physical examination also provides opportunities to educate children, adolescents, and their parents/guardians about the body and the growth and development process. The physical examination must be comprehensive and appropriate for the infant's, child's, or adolescent's age, gender, and developmental status, and should build on the history gathered during previous medical and well child visits. The provider should review the scope and findings of the examination with the patient and parents/guardians at the completion of the examination. This review should be documented in the medical record.

SECTION 9 – PROCEDURES

9.1 NEWBORN BLOOD SCREENING

A provider in charge of the care of a newborn child shall administer or cause to be administered to the newborn child a newborn blood screening test. Hospitals must test newborns for over 50 disorders as indicated by the AAP periodicity schedule and as required by Michigan law. The complete list of disorders is determined by MDHHS. If the results of a test administered are positive, the results shall be reported to the newborn child's parents/guardians. Blood samples are to be sent to the MDHHS Bureau of Laboratories Newborn Screening Section. If further sickle cell testing is appropriate, a capillary blood sample may be mailed to the Sickle Cell Disease Association of America, Michigan Chapter (SCDAA-MI). Tubes, forms, and envelopes may be obtained from SCDAA-MI. (Refer to the Directory Appendix for contact information.)

9.2 NEWBORN BILIRUBIN

A universal predischarge newborn bilirubin screening (measurement and assessment of clinical risk factors) is to be performed using total serum bilirubin (TSB) or transcutaneous bilirubin (TcB) measurements to evaluate the risk of subsequent severe hyperbilirubinemia as recommended by the AAP periodicity schedule. The PCP should confirm initial screening was accomplished, verify the results, and follow-up as appropriate.

9.3 CRITICAL CONGENITAL HEART DEFECT SCREENING

A critical congenital heart defect (CCHD) screening is to be administered to the newborn child as indicated by the AAP periodicity schedule. The screening should not be performed until 24 hours after the birth of the child and should be performed as late as possible if an early discharge is planned in order to reduce the number of false positive results. The screening should be performed with motion-tolerant pulse oximeters using either disposable or reusable pulse oximetry probes.

Oxygen saturations should be obtained from the right hand and one foot. Screening that has a pulse oximetry reading of $\geq 95\%$ in either extremity with a $\leq 3\%$ absolute difference between the upper and lower extremity is considered a passing result. It is recommended that repeated measurements be performed in those cases in which the initial screening result was positive in an effort to reduce false-positive results. Infants with saturations $< 90\%$ should receive an immediate evaluation. It is important to note that the oxygen saturation thresholds for a positive screening result may vary at high altitude. If the screening is positive, CCHD needs to be excluded with a diagnostic echocardiogram. Infectious and pulmonary causes of hypoxemia should also be excluded. Every hospital is required to report each newborn's pulse oximetry screening results to the Newborn Screening Program. (Refer to the Directory Appendix for contact information.)

9.4 IMMUNIZATIONS

A review of immunization status shall be performed at each well child visit, with immunizations administered according to recommendations and standards of practice recognized by the AAP and the Advisory Committee on Immunization Practices (ACIP). Providers are reminded that all immunizations must be reported to the Michigan Care Improvement Registry (MCIR). (Refer to the Directory Appendix for contact information.) Vaccine counseling services, including stand-alone vaccine counseling services, are covered for all Medicaid beneficiaries when they are counseled regarding the importance of vaccines.

Michigan Department of Health and Human Services

Medicaid Provider Manual

Stand-alone vaccine counseling refers to when a beneficiary and/or caregiver receives counseling about a vaccine from a health care practitioner, but the beneficiary does not actually receive the vaccine on the same date of service as the counseling.

Immunizations are covered when administered according to ACIP recommendations. MDHHS encourages providers to immunize all Medicaid beneficiaries.

- For Medicaid eligible children 18 years of age and younger, the Vaccines for Children (VFC) Program provides covered immunizations at no cost to the provider.
- Medicaid covers immunizations for beneficiaries 19 years of age and older.
- Any LHD in the state can be contacted for specifics about the VFC program.

For immunizations available free of charge under the VFC program, the amount a provider may charge for vaccine administration may be limited. Providers cannot charge more for services provided to Medicaid beneficiaries than for services provided to their general patient population. For example, if the charge for administering a vaccine to a private-pay patient is \$5.00, then the charge for immunization administration to the Medicaid beneficiary cannot exceed \$5.00.

Medicaid Health Plan (MHP) providers enrolled in the VFC program are encouraged to immunize and are discouraged from referring beneficiaries to a LHD for these services. (Refer to the Practitioner Chapter for additional information.)

9.5 ANEMIA

The PCP must screen the child for anemia according to the AAP periodicity schedule.

9.6 BLOOD LEAD SCREENING

All children covered by Medicaid are considered at high risk for blood lead poisoning. The AAP periodicity schedule requires children to be tested for blood lead poisoning at 12 and 24 months of age. In addition, the Centers for Medicare & Medicaid Services (CMS) mandates that if a child is covered by Medicaid, is between 36 and 72 months of age, and has not been tested for blood lead, the child must be tested. The AAP also requires a blood lead risk assessment to be performed during specific visits as indicated by the AAP periodicity schedule. If the parent/guardian is unsure if the child was previously tested, the child must be tested.

For children who have been tested, the following questions are intended to assist the PCP in determining if further testing is necessary in addition to that completed at the mandated ages:

- Does the child live in or regularly visit a home built before 1978? (Note: Recent or planned renovations can greatly increase risk of lead exposure in homes built before 1978.)
- Does the child live in or regularly visit a home that had a water test with high lead levels?
- Does the child have a brother, sister, or friend that has an elevated blood lead level?
- Does the child come in contact with an adult whose job or hobby involves exposure to lead (e.g., smelting, indoor shooting/firing ranges, pottery, stained glass, refinishing old furniture)? (The chart following these questions presents examples.)

Michigan Department of Health and Human Services
Medicaid Provider Manual

- Does the child's caregiver use home remedies that may contain lead (e.g. ba-baw-san, daw tway, greta, azarcon, balguti kesaria, ghasard)? (The chart following these questions presents examples.)
- Is the child in a special population group such as foreign adoptee, refugee, migrant, immigrant, or foster child?
- Does the child's caregiver have reason to believe the child is at risk for lead exposure (e.g., exhibiting pica behavior, developmental delays)?

If answered "yes" or "don't know" to any of these questions, lead testing is recommended.

Possible means of exposure to lead hazards:

Occupational	Hobbies	Environmental	Other
<ul style="list-style-type: none">▪ Battery manufacturing or repair▪ Bridge reconstruction worker▪ Chemical manufacturing▪ Construction worker▪ Glass manufacturing▪ Industrial machine operator▪ Migrant farm worker▪ Painting▪ Plastics manufacturing▪ Plumber, pipe fitter▪ Police officer▪ Printing▪ Radiator repair▪ Rubber products manufacturing▪ Steel welding and cutting▪ Vehicle repair	<ul style="list-style-type: none">▪ Brass/copper/aluminum processing▪ Casting lead figures (e.g., toy soldiers)▪ Furniture refinishing▪ Jewelry and pottery making▪ Lead soldering (e.g., electronics)▪ Making lead shot, fishing sinkers, bullets▪ Painting▪ Stained glass making▪ Target shooting at firing ranges▪ Vehicle repair	<ul style="list-style-type: none">▪ Burning lead-painted wood▪ Ceramic ware/pottery▪ Lead crystal▪ Lead-soldered cans (imported)▪ Lead paint▪ Lead-painted homes▪ Living near lead-related industries▪ Renovating/remodeling older homes▪ Soil/dust near industries and roadways▪ Use of water from lead pipes	<ul style="list-style-type: none">▪ Cosmetics (e.g., Kohl, sindoor)▪ Food/spices and/or food additives (e.g., Greta, Azarcon, pay-loo-ah, ghasard, Hai ge fen, Bali Goli, Kandu, Xyoo- Fa, Mai ge fen, poying tan, lozeena, turmeric, hot sauce, some Mexican candy)

Publications and other materials concerning blood lead may be obtained from the MDHHS Childhood Lead Poisoning Prevention Program. The MDHHS Bureau of Laboratories – Trace Metals Section can also be contacted. (Refer to the Directory Appendix for contact information.)

Michigan Department of Health and Human Services

Medicaid Provider Manual

There are providers in all areas of the state who have expertise in the treatment of blood lead and are available to discuss blood lead issues with other providers. Providers with questions concerning blood lead testing or treatment should contact the Childhood Lead Poisoning Prevention Program to obtain contact information for these providers. (Refer to the Directory Appendix for contact information.)

For blood lead analysis, the blood sample may be obtained via the capillary method (i.e., heel prick or finger stick) or venipuncture. The sample may be sent to the MDHHS Bureau of Laboratories – Trace Metals Section or to any Michigan Medicaid-enrolled laboratory qualified to perform blood lead testing. If the MDHHS Bureau of Laboratories – Trace Metals Section is used, blood lead testing supplies may be obtained from the laboratory. (Refer to the Directory Appendix for contact information.)

Michigan has an established statewide blood lead registry. This requires that certain information accompany each blood lead specimen (or request, if the specimen is drawn elsewhere).

- If blood lead samples are sent to the MDHHS Bureau of Laboratories – Trace Metals Section:
 - Providers must obtain a Submitter Clinic Code prior to sending blood lead samples. Providers may obtain a Submitter Clinic Code by contacting the MDHHS Bureau of Laboratories – Data and Specimen Handling (DASH) Unit. (Refer to the Directory Appendix for contact information.)
 - The “Blood Lead Test Requisition” form (DHHS-0696) must be used. (The form is available on the MDHHS website. Refer to the Directory Appendix for website information.)
- If blood lead samples are sent to a private laboratory or if the private laboratory draws and tests the sample, the provider must include the following:
 - information with respect to the individual tested (name, sex, ethnicity, race, birthdate, address (and, to the extent available, whether the residence or property is owned or rented), telephone number, Medicaid number, parent/guardian (if individual is a minor), employer (if individual is an adult), secondary contact (name and phone number) for individual tested or parent/guardian;
 - date of the sample collection;
 - the type of sample (capillary or venous); and
 - provider’s name, name of practice (if applicable), telephone number, fax number, e-mail address, and mailing address.

When testing is completed, the laboratory completes the required information and submits it to the blood lead registry.

PCPs are encouraged to draw blood in their offices for all children needing blood lead testing, but may refer children to a lab if necessary. There may be instances when a blood draw is not accomplished. If this occurs and the child resides in a jurisdiction where the LHD agrees to obtain a blood sample for blood lead testing, the PCP may refer a child to the LHD for the service. (Refer to the Local Health Department Chapter for additional information.)

The MDHHS Bureau of Laboratories – Trace Metals Section will report all results to the child’s ordering provider. All clinical laboratories in Michigan that analyze blood samples for lead shall report all blood lead results to the MDHHS Childhood Lead Poisoning Prevention Program/Community Public Health

Michigan Department of Health and Human Services
Medicaid Provider Manual

Agency (CLPPP/CPHA). Reports shall be made within five working days after test completion. If a blood lead test has been completed but is not displayed in the MCIR, the LHD or PCP should contact the MDHHS CLPPP to report the blood lead results. (Refer to the Directory Appendix for contact information.)

There is no established safe level of lead for children. While the below recommendations indicate that certain actions should begin at a blood lead reference value (BLRV) of 3.5 µg/dL, providers may use their own clinical judgement in determining the appropriate actions in the medical management of children potentially exposed to lead whose blood lead levels are below this level. These activities may include, but are not limited to, repeat testing, follow-up evaluations, treatment services, referral for nurse case management services through the local health department, and referral for environmental investigation.

Recommendations on Medical Management of Childhood Lead Exposure and Poisoning*

Blood Lead Level	Action
< 3.5 µg/dL	<ul style="list-style-type: none">▪ The limit of detection for lead can vary by lab and is typically between 1 and 3.3 µg/dL.▪ Review laboratory results with the family. For reference, the geometric mean BLL for children 1-5 years old in the United States is less than 1 µg/dL. Emphasize with the family the dangers of lead and the need for vigilance.▪ Repeat the BLL in 6-12 months if the child is at high risk or if the environmental risk changes during the timeframe. Ensure lead testing is done at 1 and 2 years of age and thereafter, based on local and state guidelines.▪ For children tested at age <12 months, consider re-testing in 3-6 months, as lead exposure may increase as mobility increases. Consider lead-contaminated tap water used daily for infant formula as a possible significant source that may be missed in later assessments of BLL.▪ Perform routine health maintenance, including assessment of nutrition, physical and mental development, as well as iron deficiency risk factors, as per the recommendations in the AAP Bright Futures Guidelines.▪ Provide preliminary advice about reducing/eliminating exposures (e.g., wash children's hands/toys frequently; damp-mop floors, windows and windowsills; leave shoes at the home's threshold; place duct tape or contact paper over chipping/peeling paint; avoid renovations that may create a dust hazard).
3.5-14 µg/dL	<ul style="list-style-type: none">▪ Perform steps as described above for levels <3.5 µg/dL.▪ Re-test venous BLL within 1-3 months to ensure the lead level is not rising. If it is stable or decreasing, re-test the BLL in 3 months. Refer patient to the local health department (LHD). Contact the MDHHS Childhood Lead Poisoning Prevention Program, the Centers for Disease Control and Prevention (CDC), the National Lead Information Center, or the national Pediatric Environmental Health Specialty Unit (PEHSU) network for resources regarding lead-poisoning prevention. (Refer to the Directory Appendix for contact information.)▪ Take a careful environmental history to identify potential sources of exposure. Consider young siblings and other children who may be exposed. If lead paint in older homes is the exposure concern, advise that lead paint abatement is the best solution, and refer the family to the LHD for resources and information.

Recommendations on Medical Management of Childhood Lead Exposure and Poisoning*

Blood Lead Level	Action
	<ul style="list-style-type: none">▪ Provide nutritional counseling related to calcium, vitamin D, and iron. In addition, recommend having fruit at every meal, as iron absorption quadruples when taken with vitamin C-containing foods. Encourage the consumption of iron-enriched foods (e.g., cereals, meats). Some children may be eligible for Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) or other nutritional resources.▪ Ensure iron sufficiency with adequate laboratory testing (complete blood count [CBC], ferritin, and reticulocyte count) and treatment per AAP guidelines. Consider starting a multivitamin with iron or iron supplementation as indicated.▪ Perform structured developmental screening evaluations at child health maintenance visits per recommendations in Bright Futures Guidelines and, if indicated, refer to therapeutic and special educational programs (e.g., Early Intervention Program or Individualized Education Plan) as lead effect on development may manifest over years.
15-44 µg/dL	<ul style="list-style-type: none">▪ Perform steps listed above for levels 3.5-14 µg/dL. Report results to the LHD.▪ Determine if there are any symptoms which may be subtle and can include anorexia and abdominal discomfort.▪ Confirm BLL with venous sample within 1 to 2 weeks, or more rapidly for higher levels.▪ Work with the family to identify and remove potential lead sources. Refer to the LHD to conduct home investigation to assess for the lead source.▪ Additional specific evaluation of the child, such as an abdominal x-ray, should be considered based on the environmental investigation and history (e.g., pica for paint chips, mouthing behaviors). Gastrointestinal decontamination may be considered if radio-opaque foreign bodies consistent with ingested lead are visualized on x-ray. Any treatment for BLL in this range should be done in consultation with an expert.▪ Contact your regional PEHSU or the Michigan Poison and Drug Information Center (MiPDC) for guidance. (Refer to the Directory Appendix for contact information.)
>44 µg/dL	<ul style="list-style-type: none">▪ Follow above guidance for BLL 15-44 µg/dL. Report results to state and local health authorities.▪ Confirm the BLL with repeat venous lead level within 48 hours, or more rapidly for higher levels.▪ Obtain a CBC, electrolytes, blood urea nitrogen, creatinine, liver transaminase enzyme levels, and urinalysis in anticipation of chelation therapy.▪ Abdominal x-ray should be done to look for radio-opaque foreign bodies suggestive of recent ingestion as this may change management. Consider gastrointestinal decontamination if radio-opaque foreign bodies consistent with ingested lead are visualized on x-ray.

Recommendations on Medical Management of Childhood Lead Exposure and Poisoning*

Blood Lead Level	Action
	<ul style="list-style-type: none">▪ Emergently admit all symptomatic children to a hospital. If there is evidence of significant central nervous system pathology, consider pediatric intensive care unit admission. If asymptomatic, consider hospitalization and/or chelation therapy (managed with the assistance of an experienced provider). Chelation in the context of ongoing exposure is ineffective and may result in increasing lead levels in the central nervous system. Factors that may influence management include the status of the home with respect to lead hazards, ability to isolate the lead source, family social situation, and chronicity of the exposure. An elevated blood zinc-protoporphyrin level (ZPP) can confirm either an iron-deficiency anemia as a comorbidity in the lead-poisoned child or, if there is no iron deficiency present, a more chronic lead exposure. Contact your regional PEHSU or MiPDC for assistance. (Refer to the Directory Appendix for contact information.)▪ Prior to initiating chelation therapy for outpatient therapy, it is critical that the home environment is inspected, temporary mitigation measures applied, and preferably demonstration of stable or down-trending lead levels indicating the primary source of lead exposure has been removed prior to starting chelation therapy. There is a risk of worsening lead exposure if chelation therapy continues in a residence with persistent lead hazards. It is expected, after a course of chelation therapy, that the BLL will rebound as the lead re-equilibrates. After chelation is completed, continue to follow the child until the BLL declines steadily; consider occurrence of re-exposure if the BLL remains stable or rebounds above pre-chelation levels.
<p>* Notes:</p> <ul style="list-style-type: none">▪ Table and recommendations adopted from the AAP and the PEHSU.▪ No level of lead in the blood is safe.	

9.7 TUBERCULOSIS TESTING

Medicaid covers tuberculosis (TB) testing according to the AAP periodicity schedule, and upon the recognition of high risk factors. Coverage for the TB test includes any return visit to read the results of the TB test. A risk assessment must be completed at each well child visit. Mantoux testing is the preferred testing method. For assistance in determining high risk and testing, providers may refer to the AAP Red Book: Report of the Committee on Infectious Diseases, or contact the MDHHS Division of Communicable Diseases and/or the Division of Immunization. (Refer to the Directory Appendix for contact information.)

9.8 DYSLIPIDEMIA SCREENING

All children and adolescents should undergo a dyslipidemia (cholesterol) screening once between 9 and 11 years of age and once between 17 and 21 years of age. For children with a significant family history or other risk factors, a lipid assessment should be considered as early as 2 years of age. If a family history cannot be ascertained and other risk factors exist, testing is at the provider's discretion. The lipid assessment should include a fasting or non-fasting lipid profile. Children and adolescents identified as being high risk should be counseled on lifestyle changes in an effort to reduce the risk of Cardiovascular

Disease (CVD). Children younger than 10 years of age should not be treated with medication unless they have a severe hyperlipidemia or a high-risk condition that is associated with serious medical morbidity. Decisions regarding the need for medication therapy should be based on the average of results from two fasting lipid profiles obtained at least two weeks but no more than three months apart.

9.9 SEXUALLY TRANSMITTED INFECTIONS (STI)

A risk assessment for sexually transmitted infections (STIs) is to be performed annually for all sexually active individuals beginning at 11 years of age as recommended by the AAP periodicity schedule. Adolescents and children should be fully immunized, screened for risk, and appropriately tested and treated for STIs. It is recommended to screen males who have sex with males (MSM) at least annually for STIs, and screen every three to six months if the male adolescent is considered high risk because of multiple or anonymous partners, having sex in conjunction with illicit drug use, or having sex partners who participate in these activities.

9.10 HUMAN IMMUNODEFICIENCY VIRUS (HIV) SCREENING [CHANGE MADE 7/1/2025]

A risk assessment for the human immunodeficiency virus (HIV) is to be performed annually for children beginning at 11 years of age and as recommended by the AAP periodicity schedule. A routine HIV screening should be offered to all individuals at least one time between 15 and 21 years of age, making every effort to preserve confidentiality of the adolescent and the young adult. After initial screening, youth at increased risk of HIV infection should be retested annually or more frequently. The PCP should verify the results, follow-up, and refer as appropriate. **(text revised per bulletin MMP 25-11)**

9.11 HEPATITIS B VIRUS INFECTION

A risk assessment for hepatitis B virus (HBV) infection is to be performed for children from newborn to 21 years of age as indicated by the AAP periodicity schedule, according to recommendations per the United States Preventive Services Task Force (USPSTF) and the 2021-2024 edition of the AAP Red Book: Report of the Committee on Infectious Diseases. These screenings, provided for individuals under 21 years of age, are considered an EPSDT service. An HBV infection screening may be provided to any individual requesting the screen, regardless of their disclosure of risk, since there may be reluctance to disclose these risks.

Screening for hepatitis B should be performed with Hepatitis B Surface Antigen (HBsAg) tests approved by the U.S. Food and Drug Administration (FDA), followed by a confirmatory test for initially reactive results. Serologic panels performed concurrently with or after HBsAg screening aid in facilitating the diagnosis and to determine further management.

Individuals who test positive for an HBV infection generally receive education regarding reducing the risk of transmission to others (e.g., during childbirth or with sex and needle-sharing partners and household contacts). EPSDT services include the coverage of any follow-up services and referrals that are medically necessary to treat an HBV infection. Individuals with HBV infection should be provided information about treatment options, how to prevent transmission of HBV to others, and drug treatment, as appropriate. Every effort should be made to preserve the confidentiality of the patient.

9.12 HEPATITIS C VIRUS (HCV) INFECTION SCREENING

All individuals should be screened for a hepatitis C virus (HCV) infection at least once between 18 and 79 years of age. These screenings, provided for individuals under 21 years of age, are considered an EPSDT service. Individuals at increased risk of HCV infection, including those with past or current injection drug use, should be tested for HCV infection and reassessed annually. An HCV infection screening may be provided to any individual requesting the screen regardless of their disclosure of risk since there may be reluctance to disclose these risks.

For individuals identified with HCV infection, it is recommended that they receive appropriate care, including HCV clinical preventive services (e.g., screening and intervention for alcohol or drug use, hepatitis A and hepatitis B vaccination, and medical monitoring of disease). EPSDT services include the coverage of any follow-up services and referrals that are medically necessary to treat an HCV infection. Individuals with HCV infection should be provided information about treatment options, how to prevent transmission of HCV to others, and drug treatment, as appropriate.

9.13 SUDDEN CARDIAC ARREST AND SUDDEN CARDIAC DEATH

Assessing for risk of sudden cardiac arrest (SCA) and sudden cardiac death (SCD) is to be performed as appropriate from 11 to 21 years of age and as indicated by the AAP periodicity schedule. The AAP recommends screening children for SCA and SCD by asking four questions whereas a positive response may indicate an increased risk for SCA and SCD. The PCP may find a positive response to be a significant cue to perform a cardiovascular evaluation which may occur at their discretion.

It is recommended that SCA and SCD screening should be performed for all children regardless of their athletic participation. The screening should be performed at the same time as the pre-participation examinations, at a minimum of every three years, or on entry into middle or junior high school and into high school. Depending on family and PCP concerns, more frequent screening may be appropriate. The four questions that may be applied directly to a family questionnaire are as follows:

- Have you ever fainted, passed out, or had an unexplained seizure suddenly and without warning, especially during exercise or in response to sudden loud noises such as doorbells, alarm clocks, and ringing telephones?
- Have you ever had exercise-related chest pain or shortness of breath?
- Has anyone in your immediate family (parents, grandparents, siblings) or other more distant relatives (aunts, uncles, cousins) died of heart problems or had an unexpected sudden death before age 50? This would include unexpected drownings, unexplained auto crashes in which the relative was driving, or Sudden Infant Death Syndrome (SIDS).
- Are you related to anyone with hypertrophic cardiomyopathy or hypertrophic obstructive cardiomyopathy, Marfan syndrome, arrhythmogenic right ventricular cardiomyopathy, long QT syndrome, short QT syndrome, Brugada syndrome, or catecholaminergic polymorphic ventricular tachycardia (CPVT) or anyone younger than 50 years with a pacemaker or implantable defibrillator?

A positive response from these four questions, or an abnormal electrocardiogram (ECG), should prompt further investigation that may include referral to a pediatric cardiologist or pediatric electrophysiologist.

9.14 CERVICAL DYSPLASIA SCREENING, BREAST EXAMS, COUNSELING AND RISK FACTOR INTERVENTIONS

Screening for cervical cancer in females younger than 21 years of age is not recommended unless a patient has an immune suppression or infection with HIV, in which case an annual Pap test should be administered with the onset of sexual activity. Females previously screened who had a documented cervical intraepithelial neoplasia (CIN) 2 or 3 or carcinoma will require continued screening. Clinical breast exams and the teaching of breast self-examinations for women younger than 21 years of age is not recommended as part of the routine physical examination; breasts should be examined in the female adolescent as part of the assessment of sexual maturity and in the male adolescent to observe for gynecomastia. Whenever a screening for cervical dysplasia as part of a pelvic examination and Pap smear is provided, a breast exam, counseling, and risk factor interventions must be provided.

9.15 DIABETES (TYPE 2)

High-risk children must be tested according to the AAP periodicity schedule. Beginning at 10 years of age (or at the onset of puberty if it occurs at a younger age), a risk assessment must be performed at each well child visit. Children at risk should be tested in accordance with the AAP periodicity schedule guidelines.

A child is considered high risk if they are overweight (i.e., BMI >85th percentile for age and sex, weight for height >85th percentile, or weight >120 percent of ideal for height) and have any two of the following factors:

- A family history of Type 2 diabetes in first- and second-degree relatives;
- Belongs to a certain race/ethnic group (e.g., Native American, African-American, Hispanic, Asian/Pacific Islander); or
- Signs of insulin resistance or conditions associated with insulin resistance (e.g., acanthosis nigricans, hypertension, dyslipidemia, polycystic ovarian syndrome).

SECTION 10 – ORAL HEALTH

The dental health of the beneficiary begins with an oral health screening and caries risk assessment by the child's PCP for beneficiaries at each well child visit as recommended by the AAP periodicity schedule. The oral cavity must be inspected at each well child visit regardless of whether teeth have erupted or not. MDHHS requires providers to stress the importance of preventive and restorative dental care. Encourage parents/caregivers to brush their child's teeth as soon as teeth erupt with fluoride toothpaste in the proper dosage appropriate for the child's age. Children should be referred to establish a dental home when the first tooth erupts and as recommended by the AAP periodicity schedule. Communication between the dental and medical homes should be ongoing to appropriately coordinate care for the child. If a dental home is not available, the PCP should continue to perform an oral health risk assessment during each well-child visit. The PCP should follow-up, educate, and refer as appropriate. Refer to the Directory Appendix for website information on the American Academy of Pediatric Dentistry (AAPD) Caries Risk Assessment Tool. A separate periodicity schedule for dentists is established. The Dental Periodicity Schedule follows the AAPD Recommendations for Pediatric Oral Health Assessment, Preventive Services, and Anticipatory Guidance/Counseling schedule. Refer to the Dental chapter of the Medicaid Provider Manual for additional information.

10.1 FLUORIDE VARNISH

The PCP is to apply fluoride varnish, with parent or caregiver approval, to the primary teeth of all infants and children starting at the age of primary tooth eruption and until the establishment of a dental home. Once teeth are present, apply fluoride varnish to all children every three to six months in the primary care or dental office based on caries risk until six years of age as indicated by the AAP periodicity schedule.

The AAP recommends that providers receive additional training on oral screenings, fluoride varnish indications and application, and office implementation. Additional training on oral screenings, fluoride varnish indications and application, and office implementation can be found in the Smiles for Life Curriculum Course: Caries Risk Assessment, Fluoride Varnish and Counseling. Providers and staff are encouraged to complete the online training module and obtain certification prior to providing oral health screenings and fluoride varnish applications. (Refer to the Directory Appendix for website information.)

10.2 FLUORIDE SUPPLEMENTATION

The PCP should consider oral fluoride supplementation as recommended by the AAP periodicity schedule if the primary water source is deficient in fluoride. It is important to consider a child's overall systemic exposure to fluoride from multiple sources (e.g., water fluoridation, toothpaste, supplements, and/or varnish) prior to prescribing fluoride supplements to minimize the risk of mild fluorosis.

SECTION 11 – ANTICIPATORY GUIDANCE

Anticipatory guidance provided by the AAP explains any and all changes that will most likely occur before the next recommended well child visit, and offers strategies for dealing with the anticipated changes. This applies to all aspects of the child's/adolescent's life. Anticipatory guidance gives the PCP, parent(s)/guardian(s), and the child/adolescent an opportunity to ask questions and to discuss issues of concern. Anticipatory guidance focuses on five priority areas including physical growth and development, social and academic competence, emotional well-being, risk reduction, and violence and injury prevention. The PCP is encouraged to inquire about these priority areas, and to adapt questions and discussion points to meet the specific needs of the families and communities to whom they provide care.

An interpretive conference should also be included to explain the results of the well child visit. Depending on the age and/or family status of the child/adolescent, the conference may be held directly with the child/adolescent, the child/adolescent and parent/guardian, or only with the parent/guardian. If a child/adolescent has a potential or apparent abnormality, the PCP is responsible for providing, or referring for, follow-up diagnostic services and treatment.

11.1 SLEEP POSITION COUNSELING

Positioning of infants on their backs on a firm sleep surface and discussing recommendations for creating a safe sleeping environment with the parent(s)/guardian(s) must occur at each well child visit through 12 months of age. Infants should be placed on their back unless a medical condition warrants that a provider recommends otherwise after weighing the relative risks and benefits. (Refer to the Maternal-Child Educational Resources portion of the Directory Appendix for additional sources regarding infant sleep positioning and to the AAP for recommendations for a safe infant sleeping environment.)

11.2 NUTRITIONAL ASSESSMENTS

Age-appropriate nutrition counseling must be provided at each well child visit. Nutritional assessments must be based on:

- Height, weight, and their relatedness;
- The most recent hematocrit/hemoglobin value;
- Physical examination; and
- Health history.

11.3 VIOLENCE AND INJURY PREVENTION

Violence and injury prevention must be discussed at each well child visit. Providers should become familiar with Connected Kids: Safe, Strong, Secure, the AAP's primary care violence prevention protocol. This resource gives providers recommendations and resources to incorporate preventive education, screening for risk, and linkages to community-based counseling and treatment resources. Treatment and/or a referral for violence and injury related problems identified should be appropriate and timely. (Refer to the Provider Resources portion of the Directory Appendix for additional sources regarding youth violence and injury.)

SECTION 12 – CHILDREN IN FOSTER CARE

Medical interventions, screenings, and various preventive health care services are to be up-to-date for all children in foster care. For purposes of this section, any reference to “child” or “children” in foster care includes any individual in foster care who is younger than 21 years of age. The care of children should be comprehensive, well-coordinated, and fully documented throughout their stay in foster care. All children in foster care younger than 21 years of age must receive a full medical examination and screening for potential mental health issues by a PCP within the first 30 days of entering foster care. All children in foster care are eligible for Medicaid from the first day of the month of entry into foster care. The PCP must verify the child in foster care’s eligibility and enrollment status. In case of difficulty confirming Medicaid status, or of verifying Medicaid Health Plan enrollment, the PCP should contact the foster care worker or the local MDHHS office designee. The PCP must complete the health maintenance visit regardless of whether or not the child in foster care recently received a health maintenance visit prior to entry into the foster care system.

The PCP’s office staff should obtain the completed MDHHS "Consent to Routine, Non-surgical Medical Care and Emergency Medical or Surgical Treatment" form (DHS-3762) from the foster care parent, or consent from the child in foster care if the child is at least 18 years of age, before the child is seen by the PCP. This form provides the PCP with informed consent to routine, non-surgical medical care and emergency medical or surgical treatment and provides the child’s foster care worker’s or local MDHHS office designee’s contact information. This form does not grant informed consent for the physician to provide psychotropic medication treatment. The MDHHS "Psychotropic Medication Informed Consent" form (DHS-1643) must be completed to receive informed consent to provide psychotropic medication treatment. (Refer to the MDHHS website for copies of forms and form information. Refer to the Directory Appendix for website information.)

A child may be assigned to a new PCP upon entry into the foster care system, and it will be necessary for the child’s previous PCP to share the child’s health information with the new PCP. In an order placing a child in foster care, the court shall include an order that each of the child’s medical providers release the child’s medical records. The court order requires the parent(s) to provide names and contact information for all previous medical and mental health providers, and to sign a consent to release health information on the day of the court proceedings.

The supervising agency shall develop a medical passport for each child who comes under its care. The medical passport shall contain all medical information required by policy or law to be provided to the PCP and to the foster care parent. The medical passport includes a basic medical history, a record of all immunizations from the Michigan Care Improvement Registry (MCIR), a complete and regularly updated statement of medical appointments, prescribed medications, and any other information available to the foster care worker concerning the child’s medical, physical, and mental health status. The medical passport should be shared with the child’s foster care parents and all medical providers even if the document is not complete or up to date. Updates to the medical passport should be shared with the foster care parents and medical providers when new information becomes available. If health information, including the medical passport, is not made available to the medical provider at or before the time of the medical examination, the medical provider should contact the foster care worker and/or the local MDHHS office designee (noted on the DHS-3762 form) to assist with obtaining the missing health information.

The medical evaluation must follow the AAP periodicity schedule and Medicaid EPSDT policy. The examination should be completed according to the recommendations for the nearest or most appropriate periodic examination age. The PCP will assess the child for medical, dental, developmental, and mental

Michigan Department of Health and Human Services
Medicaid Provider Manual

health needs. The full medical evaluation will include an immunization review, health history, and physical examination. The medical examination and screenings should be documented for the initial and for all subsequent well child visits and will become a part of the child's medical record. PCPs may reference the age appropriate MDHHS Well Child Exam form and use their own Well Child Exam form or electronic medical record (EMR) if the form or EMR contains all of the elements of the AAP periodicity schedule. (Refer to the Directory Appendix for AAP and MDHHS website information.)

The dental examination must follow the American Academy of Pediatric Dentistry (AAPD) Recommendations for Pediatric Oral Health Assessment, Preventive Services, and Anticipatory Guidance/Counseling schedule. (Refer to the Directory Appendix for AAPD website information.) The guidelines recommend that a child have a first dental visit when the first tooth erupts or no later than 12 months of age. The examination is to be repeated every six months or as indicated by the child's risk status and susceptibility to disease. Refer to the Dental chapter of the Medicaid Provider Manual for additional information.

A developmental/behavioral assessment must be completed according to the recommendations of the AAP. A developmental/behavioral assessment includes developmental screening; autism spectrum disorder screening; developmental surveillance; behavioral/social/emotional screening; tobacco, alcohol or drug use assessment; and depression screening. Screening for these potential developmental/behavioral issues is accomplished by using an objective validated and standardized screening tool and should be completed with the assistance of a person who knows the child best. This may be the child's biological parent, foster care parent, caregiver, or other adult who knows the child. The foster care worker is available to assist the provider in identifying the person who knows the child best. The behavioral/social/emotional screening is required at each scheduled well child visit and may be accomplished by surveillance or by using a validated and standardized screening tool such as the ASQ-SE or PSC with appropriate action to follow if the assessment is positive. PCPs should use a validated and standardized screening tool for all children in foster care and for children with mental health conditions. The use of validated and standardized screening tools improves the detection rate of social-emotional problems of children in foster care compared to the reliance on subjective clinical judgment (i.e., surveillance).

The foster care worker is trained in the use of the ASQ-SE and PSC. If the physician chooses to use either of these tools, the foster care worker is available to assist in completing the screening tool and ensure that it is made available to the medical provider for scoring and for incorporation into the treatment plan. The individual accompanying the child to the medical examination should present the completed screening tool to the PCP at the initial appointment or for any other periodic examinations. The PCP is responsible for scoring and interpreting the results of the screening tool and proposing recommendations regarding follow-up. (Refer to the Directory Appendix for foster care resources.)

The PCP will recommend to the foster care worker, the birth parents, and the foster care parents (when applicable) when the child in foster care may benefit by visiting with a mental health professional. The child will be referred for a prompt follow-up assessment by an appropriate medical, dental, developmental, or mental health professional for any further identified health needs. For more information, refer to the Developmental/Behavioral Assessment Section of this chapter.

12.1 PSYCHOTROPIC MEDICATION TREATMENT

A psychiatric diagnosis using the Diagnostic and Statistical Manual of Mental Disorders (DSM-5) must be made before prescribing psychotropic medications to any child in foster care. When the physician determines that the child requires psychotropic medication treatment, the prescribing physician must

Michigan Department of Health and Human Services
Medicaid Provider Manual

obtain a written and signed informed consent from the child's legal parent (when the child is a temporary court ward), the child (if the child is at least 18 years of age), the foster care worker (when the child is a ward of the state and is committed to the Michigan Children's Institute), or the court (when the child is a permanent court ward of the county) before treatment with any psychotropic medication begins. If a signed informed consent cannot be obtained (e.g., the parent is unable or unwilling to sign, and the physician documents a medical necessity), a court order is required prior to prescribing psychotropic medications to any child in foster care. Foster care parents cannot consent to administration of psychotropic medication. For questions regarding who may provide consent for treatment with psychotropic medications, the physician may contact the child's foster care worker.

Informed consent must be documented by completion of the MDHHS "Psychotropic Medication Informed Consent" form (DHS-1643). (MDHHS forms are available on the MDHHS website. Refer to the Directory Appendix for website information.) Informed consent includes an explanation from the prescribing physician regarding the child's diagnosis, proposed treatment, expected outcomes, any side effects, risks involved, discussion of laboratory findings and ongoing monitoring, uncommon but potentially severe adverse events, a discussion of alternative treatments, the risks associated with no treatment, and the overall potential benefit-to-risk ratio of treatment. If consent is denied by the child's birth parent or legal guardian, or the consent cannot be obtained, a court order shall be obtained by the foster care worker to authorize the administration of the psychotropic medication to the child held in legal custody based on the physician's attestation that treatment with psychotropic medication is medically necessary. If a child is prescribed psychotropic medication prior to enrollment in the foster care system, the DHS-1643 must be completed within 45 days of a child's entry into the foster care system to assure uninterrupted psychotropic medication treatment. The child in foster care who is at least 18 years of age is able to consent to and/or refuse medical treatment. A new DHS-1643 will be required if there is a new psychotropic medication prescribed, a discontinuation of the psychotropic medication, a change in dosage that exceeds the limits of the provided consent, or if the child is at least 18 years of age. The DHS-1643 must be renewed annually.

12.2 ENROLLMENT AND BILLING

MDHHS has designated a Health Liaison Officer (HLO) or an HLO point person to every county in Michigan to assist children in foster care with health plan enrollment/disenrollment, facilitate the timely completion of an initial medical examination, and generally provide technical support to foster care workers. Until HLO positions are allocated for complete statewide coverage, each local MDHHS office has an assigned supervisor to serve as the point person for obtaining any health-related information or for resolving health-related issues.

All children placed into foster care must receive an EPSDT comprehensive examination within 30 days of entering foster care regardless of when their most recent exam was provided. PCPs may complete and bill for an EPSDT/preventive health care well child visit for any child who must be seen within 30 days of entering the foster care system, and for any additional follow-up visits the PCP believes are necessary. The PCP may bill for the visit even if the child in foster care received a recent preventive health care service prior to entry into the foster care system. The PCP should screen all children for developmental and behavioral concerns using a validated and standardized screening tool as indicated by the AAP periodicity schedule. (Refer to the Developmental/Social/Behavioral/Mental Health section of this chapter for additional information.)

Children in foster care not enrolled with a health plan by the time a full medical examination is provided within the 30 day requirement will be considered Fee for Service (FFS). Children in foster care residing in detention facilities, child care institutions, or out-of-state placements will be considered FFS and will not

Michigan Department of Health and Human Services

Medicaid Provider Manual

be transitioned to a health plan. PCPs must verify eligibility and enrollment status prior to providing services to children in foster care. If the child in foster care is enrolled in an MHP, prior authorization requirements may apply.

SECTION 13 – REFERRALS

If a medical issue is determined or suspected during a well child visit, the (suspected) issue must be diagnosed and treated as appropriate. This determination may result in a referral to another provider or a self-referral for further diagnosis and treatment. Referrals must be made based on standards of good practice and the AAP Recommendations for Preventive Pediatric Health Care or presenting need, if outside the normal schedule.

When a FFS provider performs medically necessary treatment involving diagnostic or therapeutic procedures for a medical condition found during a well child visit (e.g., wart removal), these procedures are covered in addition to the well child visit. For information regarding billing a well child evaluation and management (E/M) visit and other E/M visits occurring on the same date of service, refer to the Evaluation and Management Services Section of the Practitioner Chapter. If the provider cannot perform the needed treatment, a referral must be made to an appropriate provider. If providers are not familiar with other providers in the area, the LHD can be of assistance with referrals. MHP providers must follow the referral procedures for the specific health plan in which the beneficiary is enrolled.

13.1 PSYCHIATRIC SERVICES

Psychiatric services are available for Medicaid FFS beneficiaries younger than 21 years of age with mild/moderate mental health conditions or suspected behavioral disorders. (Refer to the Behavioral Health and Substance Use Disorder Services subsection of the Practitioner Chapter for specific coverages.) MHP contracts include mental health benefit coverage for beneficiaries with mild/moderate mental health conditions.

PIHPs/Community Mental Health Services Programs (CMHSPs) are responsible for the provision of covered specialty mental health services necessary for the treatment of Medicaid beneficiaries who have more significant and/or complex psychiatric conditions.

13.2 AUTISM SPECTRUM DISORDERS

The PCP who screened the child for ASD and determined a referral for further evaluation was necessary will contact the PIHP directly to arrange for a follow-up evaluation. The PCP must refer the child to the PIHP in the geographic service area. (Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter for information/policy regarding the treatment of children with autism.)

13.3 SPECIAL SUPPLEMENTAL NUTRITION PROGRAM FOR WOMEN, INFANTS AND CHILDREN (WIC)

The Special Supplemental Nutrition Program for Women, Infants and Children (WIC) program is located in each county in Michigan at LHDs, Tribal Health Centers, and federally funded clinics. WIC is a special health and nutrition program that has demonstrated a positive effect on pregnancy outcomes and child growth and development. WIC provides supplemental healthy foods, nutrition counseling and education, breast feeding support, immunization screening, and referrals to other helpful services to pregnant women, breastfeeding and post-partum women, infants, and children younger than 5 years of age. The PCP is expected to make referrals to a WIC site for eligibility determination if appropriate. (Refer to the Directory Appendix for website and contact information.)

13.4 PEDIATRIC OUTPATIENT INTENSIVE FEEDING PROGRAM SERVICES

Pediatric outpatient intensive feeding program services are for beneficiaries with significant feeding and swallowing difficulties. Pediatric Outpatient Intensive Feeding Program services may be considered medically necessary for individuals with anatomical, physiological, congenital, or cognitive conditions and/or complications of severe illness who experience significant feeding difficulties. The child should be referred to a CSHCS-approved, Medicaid-enrolled program site that is certified by MDHHS. (Refer to the Pediatric Outpatient Intensive Feeding Program Services Section of the Special Programs Chapter for additional information.)

13.5 BLOOD LEAD POISONING FOLLOW-UP SERVICES

Many LHDs provide blood lead poisoning follow-up services which consist of environmental investigations and case management services. The PCP must contact the LHD to determine if blood lead services are available in the area and the blood lead levels at which referrals are accepted. In locations where LHDs do not provide this service, the MDHHS Healthy Homes Section can be contacted to perform the environmental investigation. (Refer to the Additional Information on Blood Lead Testing Section of the Local Health Departments Chapter for additional information and to the Directory Appendix for contact information.)

The PCP may refer pregnant women and children who were served by the Flint water system to the Genesee Health System, the local community mental health (CMH) serving Genesee County that serves as the Designated Provider Organization (DPO), for any needed Family Supports Coordination services. (Refer to the Special Programs Chapter, Flint Family Supports Coordination Services Section, for additional information.)

13.5.A. ENVIRONMENTAL INVESTIGATIONS

An environmental investigation of a beneficiary's home or primary residence is covered for the LHD. If more than one child in the home has blood lead poisoning, the LHD must select one child's Medicaid ID number and report a single environmental investigation visit. (Refer to the Local Health Departments Chapter for additional information on blood lead testing and follow-up services.)

13.5.B. CASE MANAGEMENT SERVICES

Case management services for children with a BLRV of 3.5 µg/dL or greater are covered under the CSHCS case management benefit. Beneficiaries are eligible for a maximum of six billing units per year. (Refer to the Children's Special Health Care Services Chapter, Case Management Benefit for more information.)

13.5.C. BLOOD LEAD RESOURCE DOCUMENTS

Providers are encouraged to obtain and review materials and resources concerning blood lead poisoning from the MDHHS Childhood Lead Poisoning Prevention Program. (Refer to the Directory Appendix for contact information.)

Michigan Department of Health and Human Services

Medicaid Provider Manual

13.6 OTHER PROGRAMS

There are other programs that could benefit Medicaid beneficiaries such as Head Start, intermediate school district/regional education service agency services, genetics counseling, nutrition programs, and public health nursing. Providers are encouraged to become familiar with available programs and make full use of the programs whenever referrals are appropriate.

Michigan Department of Health and Human Services
Medicaid Provider Manual

SECTION 14 – OUTREACH

MDHHS provides outreach to beneficiaries through various means, including informational publications and other beneficiary contacts.

When the beneficiary's **mihealth** card is issued, it is mailed with the MDHHS publication "Michigan Free Health Check-Ups." The publication explains the benefits of a well child visit, describes procedures included in the free health check-up, and presents information about medical transportation options available to beneficiaries for travel to and from well child visits.

Soon after the **mihealth** card is issued, the beneficiary will receive a monthly outreach list, a letter that stresses the importance of well child visits, and medical transportation information.

14.1 FEE-FOR-SERVICE (FFS)

For beneficiaries younger than 2 years of age, a letter stressing the importance of well child visits is sent to the parent/guardian every six months as a reminder to schedule a well child visit with the PCP. The parent/guardian of the beneficiary is encouraged to schedule the well child visits recommended during those six months with the beneficiary's PCP. For beneficiaries 2 years of age and older, if a claim for a well child visit has not been processed by Medicaid by the time the child is halfway to their next well child visit due date (according to the AAP periodicity schedule), the parent/guardian will receive a second letter. A list of FFS beneficiaries who did not have a claim for a well child visit processed will be generated and issued to each LHD. LHDs may assist Medicaid in informing parents/guardians of the EPSDT program, scheduling appointments, and arranging medical transportation options.

14.2 MEDICAID HEALTH PLANS (MHP)

Each MHP is able to download an electronic monthly outreach list of enrollees due or overdue for a well child visit. The MHP must either, directly or through the LHD, notify the parent/guardian of the required action or assist in scheduling appointments or arranging medical transportation options. The "Michigan Free Health Check-ups" publication is mailed to the Medicaid beneficiary once each year.

Michigan Department of Health and Human Services
Medicaid Provider Manual

SECTION 15 – MEDICAL TRANSPORTATION

Medical transportation is available free of charge to the beneficiary and parent/guardian for travel to and from well child visits if requested by the family.

- For beneficiaries enrolled in an MHP, the parent/guardian of the beneficiary should make arrangements directly through the MHP.
- The parent/guardian of the beneficiary not enrolled in an MHP should contact their local MDHHS office directly, or with the assistance of the LHD, to make transportation arrangements for the EPSDT well child visit. MDHHS should be contacted as soon as the date and time of the appointment are known.

MDHHS contracts with a transportation brokerage company to arrange and provide Non-Emergency Medical Transportation (NEMT) for beneficiaries residing in Wayne, Oakland and Macomb counties. Transportation may be provided when the beneficiary qualifies for the service and has no other means of transportation. (Refer to the Directory Appendix for contractor contact information.)

Medicaid Provider Manual

EMERGENCY SERVICES ONLY MEDICAID

TABLE OF CONTENTS

Section 1 – General Information	1
Section 2 – Eligibility	2
Section 3 – Coverage [Change Made 7/1/2025]	3

Medicaid Provider Manual

SECTION 1 – GENERAL INFORMATION

This chapter applies to all providers.

Aliens who are not otherwise eligible for full Medicaid because of immigration status may be eligible for Emergency Services Only (ESO) Medicaid.

For the purpose of ESO coverage, federal Medicaid regulations define an emergency medical condition (including emergency labor and delivery) as a sudden onset of a physical or mental condition which causes acute symptoms, including severe pain, where the absence of immediate medical attention could reasonably be expected to:

- Place the person's health in serious jeopardy, or
- Cause serious impairment to bodily functions, or
- Cause serious dysfunction of any bodily organ or part.

Medicaid Provider Manual

SECTION 2 – ELIGIBILITY

Michigan Department of Health and Human Services (MDHHS) determines eligibility for ESO coverage. To qualify for ESO Medicaid, non-citizens must meet all Medicaid eligibility requirements not related to immigration status. The Beneficiary Eligibility Chapter of this manual contains information on how to identify ESO beneficiaries.

Pregnant ESO beneficiaries may also qualify for pregnancy-related services under the MDHHS Maternity Outpatient Medical Services (MOMS) program. Refer to the Maternity Outpatient Medical Services Chapter of this manual for additional information on MOMS covered services.

Medicaid Provider Manual

SECTION 3 – COVERAGE [CHANGE MADE 7/1/2025]

ESO Medicaid coverage is limited to labor and delivery services, and those services necessary to treat emergency conditions. The following services are **not** covered under this benefit:

- preventative services
- follow-up services related to emergency treatment (e.g., removal of cast, follow-up laboratory studies, etc.)
- treatment of chronic conditions (e.g., chemotherapy, etc.)
- sterilizations performed in conjunction with delivery
- organ transplants
- pre-scheduled surgeries

The following table provides additional information regarding specific coverage under the ESO program. Prior authorization and/or copayment requirements may apply to some services listed. Those requirements are described in other chapters of this manual.

Service	Coverage
Ambulance	Limited to emergency transport to a hospital Emergency Department (ED).
Case Management	Not covered
Chiropractor	Not covered
Dental	Not covered
Eyeglasses	Not covered
Family Planning	Not covered
Hearing Aids	Not covered
Home Health	Not covered
Home Help (personal care)	Not covered
Hospice	Not covered

Medicaid Provider Manual

Service	Coverage
Inpatient Hospital	Limited to labor and delivery, and emergency-related services only.
Lab & X-Ray	Limited to services related to labor and delivery, or necessary to diagnose/treat an emergency condition. Follow-up services to emergency treatment are not covered.
Medical Supplies/ Durable Medical Equipment (DME)	Medical supplies are limited to those items necessary to treat an emergency condition within an inpatient or outpatient hospital setting. Durable medical equipment is not covered.
Mental Health Services	Limited to emergency stabilization of a psychiatric episode within the emergency department of a medical hospital.
Nursing Facility	Not covered
Optometrist	Not covered
Outpatient Hospital/ Emergency Department	Limited to the treatment of emergency conditions. Follow-up care to emergency treatment and chronic care (e.g., chemotherapy, etc.) is not covered.
Pharmacy	Limited to those drugs directly related to the emergency condition. Refills are not covered. Medicaid copays apply. (Refer to the Pharmacy Chapter of this manual for additional information.)
Physician and Non- Physician Practitioner (NPP) Services	Limited to labor and delivery services, and treatment of an emergency condition. Preventative care, follow-up care to emergency treatment, and chronic care are not covered. Medically necessary services provided by physician and non-physician practitioners (NPPs) provided in compliance with state law will be considered for reimbursement.
Podiatrist	Not covered
Prosthetics/ Orthotics	Not covered
Private Duty Nursing	Not covered

Medicaid Provider Manual

Service	Coverage
Substance Abuse	Limited to medically necessary inpatient detoxification services in a life-threatening situation. Inpatient detoxification of a beneficiary who is simply incapacitated is not covered. (Refer to the Acute Inpatient Medical Detoxification subsection of the Hospital Chapter of this manual for additional information.)
Therapies	Not covered
Transportation (nonambulance)	Not covered
Ventilator Services	<p>Covered for life-supporting mechanical ventilating services and equipment due to a medical condition where the absence of such treatment could reasonably be expected to cause a medical emergency and place the person's health in serious jeopardy; cause serious impairment to bodily functions; or cause serious dysfunction of any bodily organ or part.</p> <p>Ventilator services shall be prior authorized by the MDHHS Program Review Division (PRD) for up to six months. For additional needed ventilator services, the provider must obtain further prior authorization.</p> <p>Providers must submit documentation supporting the medical necessity of requiring ventilator services to treat a diagnosed medical condition. (text added per bulletin MMP 25-02)</p>

SECTION 1 – GENERAL INFORMATION

This chapter applies to Title X clinic providers. For information related to the services covered for individuals enrolled in the Plan First Family Planning Program benefit plan, refer to the Plan First Family Planning Chapter of this manual.

The Michigan Medicaid Program includes Family Planning services for qualified beneficiaries when the services are determined to be necessary for the health and well-being of the beneficiary. The services provided, as well as the type of provider and setting, must be appropriate to the specific medical needs of the beneficiary. Determination of medical necessity is the responsibility of the attending physician (MD or DO) and must be within the scope of current medical practice and Medicaid limitations. Submission of the claim for payment serves as the provider's certification of the medical necessity for these services. This determination of medical necessity is subject to review, in the context of accepted standards of medical practice.

1.1 EXPLANATION OF SERVICES

A family planning clinic or a primary care provider (i.e., MD, DO) or other Medicaid-approved provider (i.e., certified nurse midwife [CNM], certified nurse practitioner [NP], certified clinical nurse specialist [CNS] or physician assistant [PA]) can provide family planning services. Family planning clinics are limited to providing only family planning services.

Family planning services are defined as any Medicaid covered contraceptive service, including diagnostic evaluation, drugs, and supplies, for voluntarily preventing or delaying pregnancy.

Services must be furnished under the supervision of a physician or dispensed by a pharmacy for beneficiaries of childbearing age, including minors considered to be sexually active. Family planning services enable beneficiaries to voluntarily choose to prevent initial pregnancy or to limit the number of and spacing of their children.

Covered services include an office visit for a complete exam, pharmaceuticals (including some over the counter [OTC] products), supplies and devices when such services are provided by or under the supervision of a medical doctor, osteopath, or eligible family planning provider. Family planning supplies not furnished by the provider as part of the medical services must be prescribed by a physician and purchased at a pharmacy. Exceptions are condoms and similar supplies which do not require a prescription.

Medicaid does not cover services for treatment of infertility.

1.2 REIMBURSEMENT

If the beneficiary is enrolled in a Medicaid Health Plan (MHP), the MHP is responsible for payment for family planning services provided to their enrollees. Family planning clinics are encouraged to establish a contract with the MHP to define services they will provide and reimbursement methodology. MHP enrollees have freedom of choice to obtain family planning services from any family planning clinic provider; therefore, a referral from the MHP is not required.

Medicaid Provider Manual

Michigan Department of Health and Human Services (MDHHS) reimburses for services provided to beneficiaries who are not enrolled in a MHP.

In order to receive reimbursement, family planning clinics must meet established guidelines and be certified by MDHHS. For additional information regarding family planning clinic procedure codes, refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter. Drugs purchased at 340B prices (actual acquisition costs) will be reimbursed at 340B prices. Medicaid does not reimburse for physician services, lab tests, prescription drugs, or supplies beyond those specified in the Medicaid Code and Rate Reference tool or on the MDHHS Family Planning Clinics Fee Schedule when billed by a family planning clinic. Additional services, when appropriate, are available through the primary care provider and other providers (such as pharmacy, labs, etc.) in accordance with Medicaid policy and procedures. Family planning clinics wishing to provide services in addition to contraceptive management may specifically enroll in the Medicaid program to provide the broader range of services (i.e., Physicians/NPs or Medical Clinics).

Where applicable, special billing instructions for family planning clinics are noted with the service definitions. General billing instructions are located in the Billing & Reimbursement for Professionals Chapter of this manual.

1.3 DIAGNOSIS CODES

The appropriate ICD diagnosis code(s) must be indicated on the claim form when billing for family planning services. Family planning services are limited to the Z30 (ICD-10) code range. Providers must enter the appropriate code on the claim form.

SECTION 2 – OFFICE VISITS

2.1 PREVENTIVE MEDICINE SERVICES - EVALUATION AND MANAGEMENT/OFFICE VISITS

Family Planning Clinic providers are limited to providing preventive services for purposes of delaying or preventing pregnancy (i.e., family planning services). Services provided must be in accordance with the standards of care established for contraceptive management for initial and follow-up services as needed. The appropriate lab services required to manage contraceptive services must be made available, either by the clinic or through a referral process.

Providers must bill using the appropriate Preventive Medicine Evaluation and Management (E/M) codes from the Current Procedural Terminology (CPT) manual and/or the Healthcare Common Procedure Coding System (HCPCS) codes for the services and products listed in the Medicaid Code and Rate Reference tool or on the MDHHS Family Planning Clinics Fee Schedule. If additional medical problems are identified which need follow-up services, beneficiaries must be referred to their primary care provider.

Counseling services are considered a part of E/M services. As such, no separate reimbursement is available for counseling-only services. The appropriate E/M code that most closely describes the service provided must be billed.

2.2 INFORMATION AND EDUCATION REGARDING CONTRACEPTIVE METHODS

Beneficiaries must be given information and education for all methods of contraception available, including reversible methods (e.g., oral, injectable, implant, IUD, diaphragm, cervical cap, contraceptive patch, vaginal ring, foam, condom, and rhythm) and irreversible methods (e.g., tubal ligation, vasectomy). Education regarding all contraceptive methods must include relative effectiveness, common side effects, and difficulty in usage. Basic information concerning sexually transmitted disease (STD) must also be discussed.

Prescriptions for a contraceptive method must reflect the beneficiary's choice, except where such choice is in conflict with sound medical practice.

2.3 PROBLEM VISITS

Beneficiaries should be encouraged to return whenever they have specific problems related to the contraceptive method or wish to have additional guidance or service, including additional supplies. For follow-up care unrelated to contraception, referrals must be made to the primary care provider.

All beneficiaries, regardless of the contraceptive method chosen, must be encouraged to return for a physical examination, laboratory services, and health history at least once per year.

SECTION 3 – LABORATORY

Laboratory testing related to contraceptive management or STDs is a covered service. The family planning clinic or a licensed laboratory may provide services. For additional information regarding family planning clinic procedure codes, refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter.

Clinics can bill only for services actually performed by the family planning clinic and in the clinic setting. If an outside lab provides the service, that lab must bill Medicaid directly. For example, Pap smear specimens sent for testing to a lab outside the clinic must be billed by the lab performing the lab test.

Clinics seeking reimbursement for lab services are required to obtain Clinical Laboratory Improvement Amendments (CLIA) certification. The type of certification determines the complexity of the lab tests the clinic can perform. If a clinic does not have CLIA certification for specific lab service(s) needed by a beneficiary, the beneficiary should be referred to a provider that has CLIA certification to provide the required laboratory service. The clinic's CLIA certification number must be reported when completing the CHAMPS PE on-line enrollment application process. (Refer to the Provider Enrollment Section of the General Information for Providers Chapter for additional information about the CHAMPS PE enrollment application process.) MDHHS may conduct post-payment reviews to verify the certification level and services performed.

Laboratory tests other than those listed in the Medicaid Code and Rate Reference tool or on the MDHHS Family Planning Clinics Fee Schedule are available to beneficiaries when medically necessary, ordered by a physician or other licensed practitioner working within their scope of practice as determined under State law, and provided by an independent laboratory or outpatient hospital laboratory. For additional information, refer to the Laboratory Chapter of this manual.

SECTION 4 – STERILIZATION

For Medicaid purposes, a sterilization procedure is defined as any medical procedure, treatment, or operation for the purpose of rendering a beneficiary (male or female) permanently incapable of reproducing. Surgical procedures performed solely to treat an injury or pathology are not considered sterilizations under Medicaid's definition of sterilization, even though the procedure may result in sterilization (e.g., oophorectomy). Physicians are responsible for obtaining the signed Consent for Sterilization (MSA-1959/HHS-687) 30 days prior to surgery. A copy of the form can be found in the Forms Appendix of this manual.

Sterilizations are covered only if:

- The beneficiary is at least 21 years of age at time of informed consent;
- The beneficiary is not legally declared to be mentally incompetent;
- The beneficiary is not institutionalized in a corrective, penal, or mental rehabilitation facility;
- Informed consent is obtained; and
- Informed consent is not obtained while the beneficiary is in labor or childbirth; seeking to obtain or obtaining an abortion; or under the influence of alcohol or other substances that affect the beneficiary's state of awareness.

4.1 INFORMED CONSENT

Sterilization requires the beneficiary's voluntary informed consent. Persons obtaining the informed consent must adhere to the following requirements:

- The beneficiary must be advised that the sterilization will not be performed for at least 30 days, but within 180 days, after signing the MSA-1959/HHS-687 except in cases of emergency abdominal surgery or premature delivery.
- The person who obtains the informed consent must answer any questions the beneficiary may have concerning the procedure.
- Information must be effectively communicated to the deaf, blind, or otherwise physically challenged.
- An interpreter must be provided if the beneficiary to be sterilized does not understand the language on the consent form or used by the person obtaining the informed consent.
- Beneficiaries may have a witness of their choice present when informed consent is obtained.
- A copy of the consent form must be given to the beneficiary.
- Informed consent may not be obtained while the beneficiary to be sterilized is:
 - In labor or childbirth;
 - Seeking to obtain or obtaining an abortion; or
 - Under the influence of alcohol or other substances that affect the beneficiary's state of awareness.

The following information must be presented orally to the beneficiary both at the time the beneficiary signs the consent form and again by the physician performing the sterilization shortly before the procedure, normally during the pre-operative examination.

- The beneficiary is free to withhold or withdraw consent to the procedure at any time before the sterilization without affecting the right to future care or treatment and without loss or withdrawal of any federally funded program benefits to which the beneficiary might be otherwise entitled.
- A description of available alternative methods of family planning and birth control.
- The sterilization procedure is considered to be irreversible.
- A thorough explanation of the specific sterilization procedure to be performed.
- A full description of the discomforts and risks that may accompany or follow the performing of the procedure, including an explanation of the type and possible effects of any anesthetic to be used.
- A full description of the benefits or advantages that may be expected as a result of the sterilization.
- The beneficiary, the person who obtained the consent, and the interpreter or translator (if required) must sign the consent form at least 30 days but no more than 180 days prior to the sterilization. The physician performing the sterilization must sign and date the consent form after the sterilization has been performed.

4.2 EXCEPTIONS FOR STERILIZATION

All of the above requirements may not be met in some instances, e.g., in cases of premature delivery and emergency abdominal surgery. Exceptions apply when the beneficiary to be sterilized has signed a consent form and, during the required 30-day waiting period, a premature delivery or an emergency abdominal surgery is necessary. To avoid an additional surgery at the conclusion of the required 30-day waiting period, federal regulations permit the sterilization to be performed at the same time as the premature delivery or emergency abdominal surgery if 72 hours have elapsed since the beneficiary signed the consent form. In cases of premature delivery, an additional requirement is that the consent form was signed at least 30 days before the expected delivery date.

4.3 REIMBURSEMENT POLICY FOR STERILIZATION

Pre- and post-operative examinations for the sterilization procedure are included in the reimbursement for the surgical procedure. No additional reimbursement is allowed for the pre-operative examination or the sterilization explanation.

Reimbursement for a vasectomy includes pre- and post-operative visits for counseling, clamp removal, the post-operative semen analysis, etc. No additional charges are allowed for these services and Medicaid does not make separate payment.

Reimbursement for female sterilization and other related medical procedures are available to Medicaid enrolled physicians performing the sterilization. Physicians must bill using their provider NPI number in these cases.

4.4 SPECIAL BILLING INSTRUCTIONS

All items of the MSA-1959/HHS-687 must be completed except in the following circumstances:

- The ethnic information is optional.
- The interpreter statements must be completed only when applicable.

All invoices submitted to MDHHS by the clinic for the sterilization must include a copy of the fully completed MSA-1959/HHS-687. (Refer to the Forms Appendix for additional information.) This requirement applies to all practitioners, technical surgical assistants, anesthesiologists, etc., as well as the hospital and clinics. All sterilization claims suspend and documentation is reviewed by MDHHS. Invoices submitted without the appropriate documentation are rejected. If any field on the form is improperly completed, the claim will be rejected.

When billing for charges related to a sterilization procedure, a copy of the completed MSA-1959/HHS-687 must be included. This form may be submitted by fax or accompany the claim. (Refer to the Directory Appendix for contact information.)

4.5 CONSENT FORM FOR STERILIZATION

MDHHS allows submission of MSA-1959/HHS-687 forms via fax. Federal regulations require that this form be submitted to Medicaid before reimbursement can be made for any sterilization procedure. Submitting the form via fax eliminates attachments to claims and confirms that the form is acceptable, thus reducing costly claim rejections.

The provider who obtains the consent and completes the MSA-1959/HHS-687 may fax or mail the completed consent form, along with a cover sheet, to the Medicaid Payments Division. (Refer to the Directory Appendix for contact information.) The form is reviewed within five working days. Either an explanation of errors or notice that the form has been accepted and is on file is returned to the submitting provider via the same method it was submitted. When the provider receives notice that the form is accepted and on file, all invoices related to the service may be submitted to MDHHS without paper attachments.

4.6 PROCEDURE FOR SUBMITTING THE CONSENT FOR STERILIZATION FORM

Providers must complete the following steps when submitting a MSA-1959/HHS-687:

- Complete a cover sheet according to Document Management Portal instructions.
- Fax the cover sheet and completed consent form to Medicaid Payments Division, Sterilization Consent Form Approval. Do not fax invoices.
- Wait for a response. When notified that the consent form has been accepted and is on file, inform other providers via a copy of the response.
- Providers may then submit claims (either electronic or hard copy) to MDHHS. The Remarks section or Comment Record must include the statement "Consent on File."
- When sterilization claims are received with this information in the Remarks section, the claim is forced for payment if the submitted invoice matches the consent form on file.

Medicaid Provider Manual

- If there is no response from MDHHS within five working days, review the request submitted to ensure that MDHHS received the fax (i.e., confirm that the fax is working, make sure the cover sheet included the necessary provider contact information, etc.). Resend the information if necessary.

Providers have the option to attach a copy of the MSA-1959/HHS-687 to the claim without going through the pre-approval process outlined above.

SECTION 5 – PHARMACEUTICALS

Clinics may dispense and receive reimbursement for contraceptives and limited pharmaceutical supplies. For additional information regarding family planning clinic procedure codes, refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter.

Dispensed oral contraceptives, vaginal rings, and contraceptive hormonal patches may not exceed a 12-month supply. All other contraceptive supplies should be dispensed for one month, with the exception of implants and hormonal contraceptives such as Depo Provera.

If the only service provided is supplies, no visit code may be billed. A billing unit must equal a billing quantity of one on the claim.

Medicaid covers a broader range of pharmaceuticals than those listed in the Medicaid Code and Rate Reference tool or on the MDHHS Family Planning Clinics Fee Schedule. These products must be prescribed by a physician and dispensed by a Medicaid-enrolled pharmacy. The Pharmacy Chapter of this manual or the local pharmacy may be referenced/contacted for details.

5.1 SPECIAL BILLING INSTRUCTIONS

If a pharmaceutical, contraceptive supply, or medical device is purchased at the 340B price, the actual acquisition cost must be billed to Medicaid. In addition, drugs purchased through the 340B program must be indicated as such on the claim. Professional/institutional claims for drugs purchased through the 340B program must be indicated on the claim using the modifier U6. Pharmacy claims for outpatient drugs purchased through the 340B program must be indicated on the claim using a Submission Clarification Code of 20. (Refer to the Billing & Reimbursement for Professionals Chapter for additional information.)

SECTION 6 – OTHER SERVICES

6.1 REFERRALS

Each clinic is responsible for making appropriate referrals in the following circumstances:

- Medical problems identified by the history or physical examination
- All positive Gonorrhea and other STD cultures and/or serology
- Vaginal infections
- Beneficiaries with abnormal cervical cytology
- Beneficiaries with positive urine cultures
- Prenatal services
- Beneficiaries suffering from anemia
- Female sterilizations

6.2 INPATIENT SERVICES

Each clinic must make arrangements for inpatient care for fee-for-service (FFS) beneficiaries requiring inpatient care as a result of complications arising from contraceptive services provided by that clinic. Arrangements for MHP enrollees must be made through the MHP.

6.3 EMERGENCY SERVICES

Each clinic must have a mechanism in place for handling emergency services related to contraceptive services after regular clinic hours.

Medicaid Provider Manual

SECTION 1 – GENERAL INFORMATION

This chapter applies to Federally Qualified Health Centers (FQHCs), designated FQHC look-alikes, and Tribal Health Centers (THCs) electing to be reimbursed as an FQHC. Subsequent references to FQHCs in this chapter are applicable to all three entities. This chapter provides policy and reimbursement information specific to FQHCs and is to be used in combination with other chapters in this manual.

Section 330 of the Public Health Service Act establishes guidelines for health centers applying for grant funding under the Health Centers Consolidation Act of 1996 (Public Law 104-299). This act combined four federal health center grant programs under one authority (community, migrant, homeless and public housing). Health centers applying for, and meeting the criteria for, grant funding under Section 330 are eligible to be recognized as FQHCs by Centers for Medicare & Medicaid Services (CMS) for reimbursement purposes. Once FQHC status is designated by CMS and notification of that status is provided to the Michigan Department of Health and Human Services (MDHHS), an FQHC is eligible to enroll with Medicaid as an FQHC provider in the State of Michigan.

Section 702 of the Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act (BIPA) of 2000 makes provision for the reimbursement of FQHCs under a prospective payment system (PPS). Section 702 of BIPA created a new section 1902(bb) in the Social Security Act. This PPS applies to the ambulatory/outpatient medical services that FQHCs are required, under federal regulation, to provide to Medicaid beneficiaries.

States may elect to reimburse FQHCs under the PPS methodology outlined in the Act or they may choose to implement an alternative payment methodology, referred to as the Memorandum of Understanding (MOU). The MOU must be agreed to by both the state and the FQHC. If an alternative payment methodology is implemented, it must result in payment at least equal to that which an FQHC would receive under the PPS. Refer to the Alternative Payment Methodology subsection of this chapter for additional information.

1.1 ENROLLMENT

Each FQHC that is certified by CMS to provide services as a Medicare-enrolled FQHC is eligible to apply to MDHHS to be a Medicaid provider. To apply, the FQHC must complete the on-line CHAMPS Provider Enrollment application process. (Refer to the Provider Enrollment Section of the General Information for Providers Chapter for enrollment information.)

MDHHS requires all FQHCs to have a Type 2 (Organization) National Provider Identification (NPI) number in order to receive the enhanced FQHC reimbursement. For FQHCs with multiple locations and multiple rates, an NPI number for each location may be necessary so that the proper reimbursement rate of all encounters can be determined. If the FQHC fails to obtain and/or use the correct NPI number, the FQHC reimbursement will be determined under fee for service rules. The NPI number must be reported to MDHHS before billing Medicaid services.

Individual providers (doctors, dentists, optometrists, etc.) are required to obtain a Provider (Type 1 - Individual) NPI number and report the number to MDHHS.

FQHC services that are furnished under contract with physicians, clinical social workers, clinical psychologists, physician assistants, certified family and pediatric NPs, visiting nurses, and other approved

Medicaid Provider Manual

professionals are billed as FQHC services. However, preventive primary services must be provided by an employee of the FQHC or by a physician under contract with the FQHC. Preventive primary services do not qualify as FQHC services if non-employee providers (except physicians) contracting with the FQHC provide the services.

In accordance with 42 CFR 455.104 and the Provider Ownership and Control Disclosures subsection of the General Information for Providers chapter of this Manual, clinics are required to disclose ownership information to MDHHS within 35 days of a change of ownership. Failure to notify MDHHS of any change in identification information may result in the loss of Medicaid enrollment, lapse of provider eligibility, or nonpayment of services.

1.1.A. NON-PHYSICIAN BEHAVIORAL HEALTH SERVICES

Licensed psychologists (Master's Limited or Doctoral level), social workers (Master's level), professional counselors (Master's or Doctoral levels), and marriage and family therapists who serve Medicaid beneficiaries are required to enroll as Medicaid providers to provide behavioral health services. The NPI of the psychologist, social worker, professional counselor, or marriage and family therapist is reimbursed under the FQHC PPS or MOU. These services must be billed using the appropriate evaluation and management (E/M) codes listed in the American Medical Association's Current Procedural Terminology (CPT) Book or Healthcare Common Procedure Coding System (HCPCS) codes. Providers should refer to the Non-Physician Behavioral Health provider database on the MDHHS website for covered procedure codes. The list of allowable services is reviewed annually and updated as applicable. Refer to the Additional Code/Coverage Resource Materials Section of the General Information for Providers Chapter for additional information regarding coverage parameters.

For information relating to service coverage and authorization requirements, refer to the Practitioner and the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapters of this manual.

1.2 SITE SPECIFIC CERTIFICATION

FQHCs are required to report CMS and Health Resources and Services Administration (HRSA) site-specific certification numbers for each site operated by the FQHC as part of the CHAMPS PE online enrollment process. Satellite(s) and/or mobile center(s) locations not approved by HRSA as a Section 330 eligible site will not be eligible for PPS or MOU reimbursement.

FQHCs are required to notify the MDHHS Hospital and Clinic Reimbursement Division (HCRD) in writing within seven (7) business days of any of the following changes:

- HRSA notification of lost FQHC status; or
- Opening(s) and/or closing(s) of any HRSA approved satellite(s) and/or mobile center(s) sites.

1.3 ALLOWABLE PLACES OF SERVICE

Services provided to beneficiaries within the four walls of the FQHC and approved FQHC satellite(s) and/or mobile center(s) are allowable for reimbursement under the PPS or the MOU. Off-site services provided by employed practitioners of the FQHC to beneficiaries temporarily homebound or in any

Medicaid Provider Manual

assisted living or skilled nursing facility because of a medical condition that prevents the beneficiary from traveling to the FQHC are also allowable for reimbursement under the PPS or the MOU.

If a practitioner employed by an FQHC provides services at an inpatient hospital, the service must be billed under the individual practitioner's NPI and will be reimbursed the appropriate fee screen rate. Services performed in an inpatient hospital setting are not included under the PPS or MOU. The costs that are associated with these services must be excluded from the FQHC's Medicaid Reconciliation Report.

1.4 NONENROLLED PROVIDER SERVICES

Professional services performed by limited licensed psychologists (except as noted in Section 333.18223 of the Public Health Code), social workers, professional counselors, marriage and family therapists, or student interns must be performed under the supervision of an enrolled, fully-licensed provider of the same profession. These services are reimbursed under the FQHC PPS or MOU. Since MDHHS does not directly enroll these providers, claims for their services must be billed using the NPI of the supervising provider responsible for ensuring the medical necessity and appropriateness of the services. Claims submitted with the non-enrolled provider's NPI in the rendering provider field will reject. The clinical psychologist and clinical social worker services must be billed with the appropriate procedure codes that reflect the services provided.

Services provided by clinical psychologists and clinical social workers are included in the outpatient visits for MHP members. FQHCs must participate as part of a MHP provider panel in order to bill for services provided to members, and all services must be prior authorized by the respective MHP.

Medicaid Provider Manual

SECTION 2 – BENEFITS

FQHC services subject to PPS reimbursement are FQHC services defined at Section 1861 (aa)(3)(A)-(B) of the Social Security Act.

2.1 PRIMARY CARE SERVICES

Primary care services are defined as:

- Those required under Section 330 of the Public Health Service Act.
- Medicaid-covered services provided in a place of service that is the FQHC's office or clinic, patient's home, Domiciliary Facility Nursing Home, Nursing Facility (NF), or Skilled Nursing Facility (SNF) by a provider type physician, medical clinic, podiatrist, dentist, CNP or CNM.
- Visits by a clinical psychologist or clinical social worker at the FQHC's office or clinic, patient's home, Domiciliary Facility Nursing Home, Nursing Facility, or Skilled Nursing Facility.
- Other ambulatory services, i.e., Medicaid transportation, Medicaid outreach, and Maternal Infant Health Program (MIHP) services.

2.2 TRANSPORTATION/OUTREACH

The cost of outreach and non-emergency transportation is part of an FQHC's encounter rate. These services are not cost settled.

The FQHC provides non-emergency transportation to and from the FQHC for Medicaid covered services provided to Medicaid Fee-for-Service beneficiaries. For Medicaid managed care enrollees, the FQHC may provide transportation in certain circumstances. Refer to the Managed Care Programs section of the Non-Emergency Medical Transportation chapter for additional information.

2.3 TELEMEDICINE

An FQHC can be either an originating or distant site for telemedicine services. Refer to the Billing & Reimbursement for Professionals Chapter for specific billing instructions. Refer to the Telemedicine Chapter for additional information regarding telemedicine services.

Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.

2.4 ADVISORY COMMITTEE ON IMMUNIZATION PRACTICES (ACIP) VACCINES [CHANGE MADE 4/1/2025]

FQHCs providing Advisory Committee on Immunization Practices (ACIP) recommended vaccines for beneficiaries 19 years of age and older in FQHC settings will be reimbursed outside of the Prospective Payment System (PPS) methodology. Reimbursement for ACIP recommended vaccines will be made up to the applicable Medicaid fee screen rates. Refer to the Medical Clinics and/or Federally Qualified Health Centers databases on the MDHHS website or the Medicaid Code and Rate Reference tool for additional information. (Refer to the Directory Appendix for website information.) FQHCs obtaining vaccines at a lower than normal cost through the 340B Program must report the 340B acquisition price on the claim. (text added per bulletin MMP 24-50)

Medicaid Provider Manual

2.5 CHILDREN'S HEALTH INSURANCE PROGRAM SERVICES

Section 503 of the Children's Health Insurance Program Reauthorization Act (CHIPRA) of 2009 authorizes states to incorporate a PPS rate for reimbursement of services provided to children receiving health care services through FQHCs when covered by the Children's Health Insurance Program (CHIP). Reimbursement for eligible services must comply with the requirements of section 1902 (bb) of the Social Security Act.

For beneficiaries enrolled in state CHIP-funded programs (MICHild, Healthy Kids–Expansion, and Maternity Outpatient Medical Services [MOMS]), providers must bill the program according to their existing processes. For beneficiaries enrolled in a health plan, the MDHHS HCRD will perform an annual reconciliation of these encounters provided by FQHCs. (Refer to the Medicaid Health Plans subsection of this chapter for additional information.)

For Healthy Kids–Expansion, MICHild and MOMS beneficiaries, the HCRD will perform an annual reconciliation of these encounters provided by FQHCs. The FQHC PPS rates established for eligible CHIP services are equivalent to those applicable to Medicaid for each respective year they are in effect.

Medicaid Provider Manual

SECTION 3 – ENCOUNTERS

3.1 DEFINITION

An allowable FQHC encounter means a face-to-face medical visit or an interaction using a qualifying telemedicine modality (audio/visual or audio-only) between a patient and the provider of health care services who exercises independent judgment in the provision of health care services. Encounters may be classified as medical, dental, or behavioral health.

An encounter occurs between a medical provider and a patient when medical services are provided for the prevention, diagnosis, treatment, or rehabilitation of an illness or injury. Included in this category are physician visits and mid-level practitioner visits. Family planning medical visits are a subset of medical visits.

An encounter occurs between a dentist, dental hygienist, or dental therapist and a patient when services are for the purpose of prevention, assessment, or treatment of a dental problem, including restoration. A dental hygienist and dental therapist are credited with an encounter only when the professional provides a service independently, not jointly with a dentist. However, two encounters may not be billed for the dental clinic in one day.

An encounter occurs between a speech or physical therapist, audiologist, occupational therapist, clinical psychologist, or clinical social worker and a patient when allied health or mental health services are provided. Allied health services are those provided by specially trained health workers, other than medical and dental personnel. Mental health services are those of a psychological or crisis intervention nature or related to alcohol or drug abuse treatment. For the purpose of these reports, visits with a psychiatrist are included under medical visits.

The following examples help to define an encounter:

- To meet the encounter criteria for independent judgment, the provider must be acting independently and not assisting another provider. For example, a nurse assisting a physician during a physical examination by taking vital signs, taking a history or drawing a blood sample is not credited with a separate encounter.
- Such services as drawing blood, collecting urine specimens, performing laboratory tests, taking X-rays, filling/dispensing prescriptions, or optician services, in and of themselves, do not constitute encounters. However, these procedures may accompany services performed by medical, dental, or other health providers that do constitute encounters.
- Encounters must be documented in the medical record. When a provider renders services to several patients simultaneously, the provider can be credited with a visit for each person if the provision of services is noted in each person's health record. This also applies to family therapy or counseling sessions in which several members of the family receive services relating to mutual family problems and the services are noted in each family member's health record.
- The same timely filing billing limitations identified in the General Information for Providers Chapter of this manual apply to claims submitted for FQHC encounters.

Medicaid Provider Manual

The encounter criteria are not met in the following circumstances:

- When a provider participates in a community meeting or group session that is not designed to provide health services.
- When the only service provided is part of a larger scale effort, such as a mass immunization program, screening program, or community-wide service program.
- When the following services are provided as stand-alone services: taking vital signs, taking a history, drawing a blood sample, collecting urine specimens, performing laboratory tests, taking x-rays, and/or filling/dispensing prescriptions. Refilling prescriptions, filling out insurance forms, etc. are not visits. Allergy injections are not visits.

3.2 MEDICAID HEALTH PLANS

Medicaid-covered services provided by an FQHC to Medicaid-eligible beneficiaries enrolled with an MHP are subject to the PPS when the following conditions are met:

- The FQHC and the MHP must be signatories to a contract that addresses the FQHC providing Medicaid covered services to an MHP enrollee.
- The contract must provide for the MHP to reimburse the FQHC at a fair market rate for similarly situated beneficiaries served by a non-PPS provider. The contractor must implement a payment method equal to, or above that of, other affiliated inter-plan and intra-plan subcontracting arrangements when entering into a subcontract with an FQHC.
- The FQHC must submit documentation of the encounters and payments when requesting MDHHS pay the PPS rate for health plan enrollees.

MHP beneficiaries are identified in the eligibility response with the Benefit Plan ID of CSHCS-MC, MA-HMP-MC, MA-MC or MME-MC. Providers must verify eligibility before providing services. (Refer to the Beneficiary Eligibility Chapter of this manual for additional information.)

3.3 HEALTHY KIDS DENTAL

Dental services provided to Medicaid beneficiaries enrolled in the *Healthy Kids Dental* program are subject to the PPS or MOU rate.

3.4 SUBSTANCE USE DISORDER SERVICES

Selected services provided by an FQHC will be included in the FQHC annual reconciliation when a contract exists between the FQHC and the behavioral health contracting entity. FQHCs that have a contract in place with a behavioral health agency must follow the service and billing arrangements set forth by the contract. Refer to the Medical Clinics and/or Federally Qualified Health Centers databases on the MDHHS website or the Medicaid Code and Rate Reference tool for additional information. (Refer to the Directory Appendix for website information.)

3.5 ALLOWABLE ENCOUNTERS PER DAY

An FQHC may be credited with one encounter for each different type of visit provided to a beneficiary during a single day, regardless of the number of services provided at the visit. A maximum of three encounters are allowed per beneficiary per day (one medical, one dental, and one behavioral health). In

Medicaid Provider Manual

cases where the beneficiary, after the first visit, suffers illness or injury requiring additional diagnosis or treatment, these visits may be classified as two encounters.

- Example 1: A beneficiary sees a dentist for an exam and three restorations and sees the dental hygienist for a prophylaxis on the same day. These visits count as one encounter (dental).
- Example 2: A beneficiary sees a physician at the FQHC, and then later sees a dentist and a social worker on the same day. These visits may be classified as three encounters (one medical, one dental, and one behavioral health).
- Example 3: A beneficiary sees a physician for flu symptoms early in the day, and then later the same day sees the same physician for a broken leg. These visits may be counted as two encounters (both medical – subsequent injury).

3.6 SERVICES AND SUPPLIES INCIDENTAL TO AN FQHC ENCOUNTER

Services and supplies incidental to a FQHC encounter are included in the PPS reimbursement if the service or supply is:

- Of a type commonly furnished in a physician's office.
- Of a type commonly rendered either without charge or included in the professional bill.
- Furnished as an incidental, although integral, part of professional services furnished by a physician, CNP, CNM, or physician's assistant.
- Furnished under the direct personal supervision of a physician, CNP, CNM, or physician's assistant.
- In the case of a service, furnished by a member of the clinic's health care staff who is an employee of the clinic.

The direct personal supervision requirement is met in the case of a CNP, CNM, or physician's assistant only if such a person is permitted to supervise such services under the written policies governing the FQHC.

Medicaid Provider Manual

SECTION 4 – BILLING

FQHC providers are expected to practice in accordance with the accepted standards of care and professional guidelines applicable to medical, dental, and behavioral health services, and comply with all applicable policies published in the Michigan Medicaid Provider Manual. FQHC services must be billed according to instructions published in the Billing & Reimbursement for Institutional Providers Chapter of this manual. FQHCs must refer to this chapter for information needed to submit claims for Medicaid services, as well as information about how MDHHS processes claims and notifies the FQHC of its action. Policies for specific services are found in the provider-specific chapters of this manual.

It is the responsibility of the FQHC to properly bill all Medicaid FFS claims. Since the annual reconciliation and final reimbursement is based on approved Medicaid claims, incorrect or improper billing may adversely affect reimbursement.

The Type 2 (Organization) NPI number must be used as the billing provider on all electronic and paper claims submitted to Medicaid. Do not use Provider (Type 1 - Individual) as the billing provider. The billing provider loop or field is mandatory to complete.

The NPI (Type 1 – Individual) number of the practitioner overseeing the beneficiary's care must be entered as the attending provider. The attending provider field is mandatory to complete. The following providers may be reported in the attending provider field:

- Physicians (includes dentists, podiatrists, optometrists, and chiropractors)
- Nurse Practitioners
- Physician Assistants
- Certified Nurse Midwives
- Clinical Psychologists
- Clinical Social Workers
- Clinical Nurse Specialists
- Licensed Psychologists (Doctoral Level)
- Social Workers (Master's Level)
- Professional Counselors (Master's or Doctoral levels)
- Marriage and Family Therapists
- Limited Licensed Psychologists (Master's or Doctoral Level)

Additionally, the NPI (Type 1 – Individual) number of the practitioner who performed the service should be entered as the rendering provider. Do not enter a Type 2 (Organization) NPI number as the attending or rendering provider.

MDHHS will use the billing provider NPI field (Type 2 - Organization) to determine the number of encounters and calculate the settlement for the year-end reconciliation.

Medicaid Provider Manual

The FQHC's MDHHS-approved claims must be available for review by authorized personnel or agents of MDHHS, the Health Care Fraud Division of the Michigan Department of Attorney General, and U.S. Department of Health & Human Services (HHS) in conformity with the provisions of the Social Security Act. Inappropriate payments identified in post-payment review are subject to recoupment. The FQHC has the full responsibility to maintain proper and complete documentation to verify the services provided.

4.1 PLACE OF SERVICE

Place of service codes are not applicable to institutional billing. However, if the FQHC performs a service that must be billed on the professional claim form within the FQHC, the appropriate place of service code is 50. For services not provided in the FQHC, bill the appropriate place of service (POS) code listed in the Billing & Reimbursement for Professionals Chapter of this manual.

FQHCs providing Medicaid-covered services in locations other than the FQHC office, home, nursing facility or domiciliary facility are reimbursed at Medicaid fee screens.

4.2 BILLING FOR MATERNITY CARE

Global codes for maternity care are used to reimburse a package of services (prenatal visits and delivery) at different places of services (FQHC and hospital). In order for the FQHC to be reimbursed for prenatal visits under the PPS methodology, the FQHC should not bill for global maternity care. The claims for delivery and prenatal care should be billed separately. The claim for delivery should show a hospital place of service and will be paid under the FFS methodology. The claim for prenatal care will be reimbursed under the PPS methodology.

If the FQHC elects to bill for global maternity care, all services will be reimbursed under the FFS rules.

4.2.A. BILLING REQUIREMENTS FOR GROUP PRENATAL CARE SERVICES

Centering Pregnancy™ group services will be reimbursed outside of the Prospective Payment System (PPS) or All-Inclusive Rate (AIR) methodology at the Medicaid fee screen reimbursement rates for these services. FQHCs should use appropriate Healthcare Common Procedure Coding System (HCPCS) codes as identified in the Billing & Reimbursement for Professionals chapter of this manual.

4.3 CLINICAL TRIALS

The program covers routine patient costs furnished in connection with participation in a qualifying clinical trial. Refer to the Practitioner Chapter for additional coverage information.

All FQHC claims for routine patient costs associated with participation in a clinical trial must adhere to the inpatient hospital claim guidelines for reporting covered services using the CMS UB04/8371 institutional claim format. (Refer to the Clinical Trials subsection of the Billing & Reimbursement for Institutional Providers chapter for additional information.) In addition, FQHC claims must include:

- A completed and signed Attestation to the Appropriateness of the Qualified Clinical Trial form (BPHASA-2210). (Refer to the Forms Appendix to review the form and to the Directory Appendix for form access on the MDHHS website.)

Medicaid Provider Manual

- Clinical trial and non-clinical trial services on separate line items when claims are submitted for both types of services on the same claim.
- Each line identified with the appropriate Healthcare Common Procedure Coding System (HCPCS) Modifier Q0 or Q1.
 - HCPCS Modifier Q0 - **investigational clinical service** provided in a clinical research study that is in an approved clinical research study
 - HCPCS Modifier Q1 – **routine clinical service** provided in a clinical research study that is in an approved clinical research study.

4.3.A. REPORTING NON-COVERED SERVICES

Generally, services, investigational drugs, or items that are part of the clinical trial and considered experimental or investigational should not be reported on a claim. In instances when claims processing edits require non-covered services be billed with their associated procedures, or when it is necessary for a provider to show the items and services provided free-of-charge to receive payment for the covered routine costs, providers are instructed to report non-covered services with the appropriate modifier and a charge of \$0.

4.4 OTHER INSURANCE

Billing instructions related to coordination of benefits are contained in the Coordination of Benefits Chapter of this manual. Other insurance and all other payments received for services rendered to a Medicaid beneficiary must be reported. Even if the other insurance payment for a specific service exceeds the amount Medicaid would have paid, the FQHC must still bill the procedure code to receive credit for the encounter.

4.5 MEDICARE AND MEDICAID CROSSOVER CLAIMS

Refer to the Billing & Reimbursement Chapters of this manual for specific instructions regarding Medicare and Medicaid claims. If the Medicare payment exceeds the Medicaid fee screen, the appropriate FFS procedure code should still be billed to Medicaid for encounter and reconciliation purposes.

4.6 COPAYMENTS

Medicaid copayments for chiropractic, dental, physician, podiatry, and vision services are waived under the FQHC benefit as part of the reconciliation.

4.7 DENTAL CLAIMS

FQHCs providing dental services must refer to the Dental and to the Billing & Reimbursement for Dental Providers chapters of this manual for information regarding program coverages, prior authorization requirements, claim completion, and billing instructions.

SECTION 5 – MEDICAID RECONCILIATION REPORT

5.1 RECONCILIATION OF FEE-FOR-SERVICE

Each FQHC is required to submit an annual Medicaid Reconciliation Report. MDHHS will include, as part of the annual Medicaid Reconciliation Report, fee-for-service (FFS) primary care services claims that are approved through the claims system. In order for this to occur, all FFS primary care services must be submitted and processed through CHAMPS. (Refer to the Primary Care Services subsection in this chapter.) Every individual provider or electronic biller (the billing agent) receives a remittance advice (RA) for services that are billed. The RA informs the provider of the action taken on claims. It is the responsibility of FQHC providers to monitor claim activity and take appropriate steps to resolve suspended and rejected claims prior to the final reconciliation. (Refer to the Billing & Reimbursement Chapters of this manual for additional billing information.)

For non-primary care services, the FQHC will receive the Medicaid FFS amounts or the amount agreed to with the MHP as payment in full. The FQHC may enter into a risk contract with the MHP for services not included in the primary care definition. Non-primary care services and risk contracts will not be reconciled and are not included in the Medicaid Reconciliation Report.

5.2 DOCUMENTING ENCOUNTERS

Encounter data for FQHCs services provided to beneficiaries through Medicaid Health Plans, *Healthy Kids Dental*, and/or regional Prepaid Inpatient Health Plans (PIHP) is accessible through the Community Health Automated Medicaid Processing System (CHAMPS).

No individual payment information is needed if health plan payments are made on a capitated basis; however, a separate summary of the monthly payments must be provided.

Upon review and audit, MDHHS will reimburse the difference between the FQHC PPS rate and the amount received from the Medicaid Health Plans, *Healthy Kids Dental*, and/or the regional PIHP.

5.3 RECONCILIATION OF QUARTERLY ADVANCES

Quarterly advances are included as Medicaid revenue on the Medicaid Reconciliation Report and are reconciled with the FQHC PPS. The quarterly payment will be made on the RA at the beginning of each quarter.

Quarterly advances are an estimate of the difference between the payments that an MHP, PIHP, or Dental Health Plan (DHP) make to the FQHC, and the payments the FQHC would have received under the PPS. This quarterly amount may be adjusted periodically by MDHHS to account for changes in the payment limits, cost, utilization, and other factors that affect Medicaid reimbursement to FQHCs. The FQHC may request a change in the quarterly payment through the MDHHS HCRD.

5.4 RECONCILIATION OF TRANSPORTATION/OUTREACH

Medicaid outreach and non-emergency transportation are combined into the all-inclusive encounter rate. Transportation requirements are defined in the Benefits Section of this chapter.

5.5 PROSPECTIVE PAYMENT RATE

An FQHC is reconciled to the prospective payment rate (PPR) determined under the PPS or the MOU. In accordance with section 1902(bb) of the Social Security Act, the PPS per visit payment is equal to 100 percent of the average of the FQHC reasonable costs of providing Medicaid services during Fiscal Years 1999 and 2000. The PPR amount is an all-inclusive rate that covers all defined primary care services. (Refer to the Medicaid Reconciliation Report subsection of this section for a definition of reasonable costs.) The per visit amount is adjusted annually using the Medicare Economic Index (MEI) based on changes in the MEI for the prior calendar year.

5.6 PROSPECTIVE PAYMENT RATE FOR NEW FQHC SITES

An entity that initially qualifies as an FQHC after fiscal year 2000 will be paid as follows:

- Upon enrollment, an interim prospective payment rate (PPR) will be established for new FQHCs equal to the facility type average rate for the county in which they are located or the statewide average (if no previous average exists for the county subject to any limit applied to the specific facility type). The FQHC will be cost settled at the end of its first fiscal year of operation.
- After the facility has been in operation for two full cost reporting periods, the average rate per visit for those two periods will be considered the revised PPR for the facility, subject to the following criteria:
 - The first year will be inflated to the second fiscal year end using the appropriate MEI factors.
 - The PPR shall not exceed the Medicare limit (rural or urban depending upon classification) plus the Medicaid add-on amounts adjusted for MEI.

Newly established FQHCs shall be paid using the PPS methodology or may agree to payment in accordance with the MOU. A newly established FQHC is eligible for quarterly payments. The amount of the quarterly payment will be estimated until the first reconciliation period.

5.7 ADJUSTMENTS TO THE PROSPECTIVE PAYMENT RATE

The prospective payment rate may also be adjusted to reflect changes in the scope of services provided to Medicaid beneficiaries by an FQHC. All scope of service changes are made on a prospective basis. The adjustment may result in either an increase or decrease in the per visit amount paid to the FQHC. (Refer to the Scope of Service subsection of this section for additional information.)

5.8 ALTERNATIVE PAYMENT METHODOLOGY

In accordance with State Plan authority, MDHHS may enter into an alternative payment methodology with an FQHC, referred to as a Memorandum of Understanding (MOU). Reimbursement for Medicaid primary care services provided by an FQHC to Medicaid beneficiaries is subject to the terms of the signed

Medicaid Provider Manual

MOU. For an FQHC paid under the MOU, the PPS base methodology described within this chapter will be maintained to ensure compliance with Section 1902(bb)(6)(B) of the Social Security Act.

The MOU is effective when both MDHHS and an FQHC are signatories to the document. CMS, rather than the State, is the final arbiter of the permissibility of this agreement. The MOU does not supersede any corresponding policy in the Michigan Medicaid Provider Manual, but documents the clinic's acceptance of the terms outlined in the Michigan Medicaid State Plan. If an FQHC does not sign the MOU, reimbursement and corresponding policy defaults to that which is described under the PPS methodology and outlined in this manual.

5.9 SCOPE OF SERVICE

5.9.A. INCREASE/DECREASE IN SCOPE OF SERVICE

The prospective payment rate may be adjusted for an increase or decrease in scope of service. Any facility approved for rebasing due to a change in scope of services shall be treated as a new facility. In order to qualify for a scope of service change, the cost related to the specific change must account for an increase or decrease to the existing PPR of five percent or greater. A facility that changes classification to a system utilizing a different rate limit or methodology shall be considered a change of scope (by default).

- An increase in scope of service results from the addition of a new professional staff member (i.e., contracted or employed) who is licensed to perform medical services that are approved FQHC benefits that no current professional staff is licensed to perform.
- A decrease in scope of service results when no current professional staff member is licensed to perform the medical services currently performed by a departing professional staff member.

An increase or decrease in scope of service does not result from any of the following (although some of these changes may occur in conjunction with a change in scope of service):

- An increase, decrease or change in number of staff working at the clinic.
- An increase, decrease or change in office hours.
- An increase, decrease or change in office space or location.
- The addition of a new site that provides the same set of services.
- An increase, decrease or change in equipment or supplies.
- An increase, decrease or change in the number or type of patients served.

5.9.B. NOTICE OF INTENT TO CHANGE SCOPE OF SERVICE

If an FQHC intends to change its scope of service, the MDHHS HCRD must be notified 90 days before any financial commitments (i.e., money paid or committed to be paid, contracts signed, etc.) have been made. It is the responsibility of the FQHC to notify MDHHS for an increase or decrease in scope of service. Notification should include the following documentation:

Medicaid Provider Manual

- A complete description of the service to be changed (addition or deletion).
- A listing of procedure codes to be billed as a result of this new service.
- A budget for the fiscal year showing an estimate of the total increase or decrease in cost resulting from change.
- An estimate of the change in number of visits.
- Estimates of the cost change on the current Medicaid per visit rate.
- The proposed customary charges for this service by the clinic.
- The customary charges for this service by other providers in the area served by this clinic.
- The amount to be paid by a MHP for this service for various programs (Medicare/Medicaid).
- Medicare fee screen for this service for non-PPS providers.
- The current Medicare visit rate.
- Total encounters for last two years by program (Medicaid, Medicare, uninsured, etc.) and type (MHP, fee screen, contracted amount).
- Estimated increase in encounters by program for two fiscal periods following the change in scope of service.
- Copies of notices, certifications, applications, approvals and other documentation from state licensing agency, CMS, Medicare intermediary, or other organizations documenting the change in scope of service.
- Other information showing cost, visits or approvals/denials of the change.
- Other information as requested by the MDHHS HCRD.

After a review of the information submitted, the MDHHS HCRD determines if a per visit rate change will be made and notifies the FQHC, specifying the effective date of any change. All scope of service changes are made on a prospective basis.

5.10 MEDICAID RECONCILIATION REPORT

Each FQHC must complete a Medicaid Reconciliation Report for its fiscal year. The MDHHS HCRD must receive the report by the due date for the Medicare Cost Report in order for the FQHC to receive PPS reimbursement.

The FQHC's authorized individual who certifies the report and accompanying worksheets for the period noted must sign its Medicaid Reconciliation Report. If the required report and supplemental documents are not submitted within the required time limit, the FQHC waives its rights to PPS reimbursement for that year.

The Medicaid Reconciliation Report must be for the same fiscal period and cover the same sites as the Medicare Cost Report.

Medicaid Provider Manual

5.10.A. REASONABLE COSTS

Reasonable costs are defined as the per visit amount approved and paid by Medicare as of October 1, 2001, and then adjusted to reflect the cost of providing services to Medicaid beneficiaries who are not covered by Medicare.

5.10.B. MAINTENANCE OF MEDICAL AND FINANCIAL RECORDS

The FQHC must maintain, for a period of not less than seven years, financial and clinical records for the period covered by the reconciliation report that are accurate and in sufficient detail to substantiate the cost data reported. The records must be maintained until all issues are resolved. Expenses reported as reasonable costs must be adequately documented in the financial records of the FQHC or the expenses will be disallowed.

The MDHHS HCRD will maintain each required FQHC Medicaid Reconciliation Report submitted by the provider for seven years following the date of submission of the report. In the event that there are unresolved issues at the end of this seven-year period, the report will be maintained until such issues are resolved.

The financial and clinical records of the FQHC must be available for review by authorized personnel or agents of MDHHS, the Health Care Fraud Division of the Michigan Department of Attorney General, and the U.S. Department of Health & Human Services (HHS) in conformity with the provisions of the Social Security Act.

Medicaid Provider Manual

SECTION 6 – AUDITS, RECONCILIATIONS AND APPEALS

6.1 QUARTERLY ADVANCES AND RISK CONTRACTS

The FQHC's quarterly advances will be reconciled annually on the reconciliation report. Risk contracts will not be reconciled.

6.2 RECONCILIATION AND SETTLEMENTS

6.2.A. INITIAL SETTLEMENTS OF FQHCs

An initial settlement is calculated annually. Calculations are determined from the filed FQHC Medicaid Reconciliation Report and Medicaid paid claims information. An initial settlement will be completed generally within three months of the receipt of a complete and acceptable reconciliation report. MDHHS retains the right to withhold a portion of an initial payment based on individual circumstances.

6.2.B. FINAL SETTLEMENTS OF FQHCs

Final settlements for FQHCs are generally completed within one year of the FQHC fiscal year end using updated Medicaid data for the period covered by the FQHC Medicaid Reconciliation Report. This will allow sufficient time for all claims to clear the Medicaid payment system. Medicaid data will be updated using approved claims payment data, all other payments for Medicaid services, and Medicaid visits.

The Medicare intermediary field and/or desk audit may cause MDHHS to process an additional final settlement. After review of the revised cost report and any statistical and audit findings pertaining to it, MDHHS may process a revised Medicaid final settlement for the period covered by the reconciliation report.

6.2.C. UNDERPAYMENTS TO FQHCs

MDHHS staff process the full amount of the final settlement through a gross adjustment.

6.2.D. OVERPAYMENTS TO FQHCs

Once a determination of overpayment has been made, the amount determined is a debt owed to the State of Michigan and shall be recovered by MDHHS. The recovery will start approximately 30 days after notification to the FQHC. A credit gross adjustment will stop all payments to the FQHC physician(s) until the amount is recovered. This amount will be reflected on the Remittance Advice (RA).

Any issues left unresolved due to the Medicare audit and/or Medicare adjustment process must be appealed through the proper Medicare process before any changes can be made to the Medicaid settlements.

Medicaid Provider Manual

6.3 RESPONSE TO THE AUDIT ADJUSTMENT REPORT

MDHHS staff prepares the Audit Adjustment Report, which contains a descriptive list of all Medicaid data adjustments made to the Medicaid Reconciliation Report by MDHHS audit staff. The Audit Adjustment Report must be accepted or rejected by the FQHC within 30 calendar days of its mailing date.

The FQHC may take the following actions:

FQHC Accepts the Report	If the FQHC accepts the findings contained in the Audit Adjustment Report, an appropriate officer of the FQHC must sign the report and mail it to the MDHHS HCRD. (Refer to the Directory Appendix for contact information.) A Notice of Amount of Program Reimbursement will be mailed to the FQHC. No further administrative appeal rights will be available for the adjustments contained in the Audit Adjustment Report.
FQHC Does Not Respond	If the FQHC does not respond within this time period, MDHHS shall issue a Notice of Amount of Program Reimbursement, which is the final determination of an adverse action. No further administrative appeal rights are available.
FQHC Rejects the Report	If the FQHC rejects any or all of the findings contained in the Audit Adjustment Report, the FQHC may request a Post-Audit Conference within 30 calendar days from the date of receipt of the Audit Adjustment Report.

The Notice of Amount of Program Reimbursement is the notice of final determination of an adverse action and is considered the offer of settlement for all reimbursement issues for the reporting period under consideration.

6.4 MEDICAID APPEALS

Medicaid providers have the right to appeal any adverse action taken by MDHHS unless that adverse action resulted from an action over which the MDHHS had no control (e.g., Medicare termination, license revocation). The appeal process is outlined in the General Information for Providers Chapter of this manual and in the MDHHS Medicaid Provider Reviews and Hearings rules, Michigan Administrative Code R400.3402 through R400.3425, amended, and filed with the Secretary of State on May 19, 2016. Any questions regarding this appeal process should be directed to the Michigan Office of Administrative Hearings and Rules (MOAHR). (Refer to the Directory Appendix for contact information.)

SECTION 7 – MI CARE TEAM (PRIMARY CARE HEALTH HOME BENEFIT)

7.1 GENERAL INFORMATION

Effective July 1, 2016, MDHHS implemented a new care management and care coordination primary care Health Home benefit called the MI Care Team. The goals of the program are to ensure seamless transitions of care and to connect eligible beneficiaries with needed clinical and social services. MDHHS expects the benefit will enhance patient outcomes and quality of care, while simultaneously shifting people from emergency departments and hospitals to a primary care setting. The MI Care Team has an operations guide for providers called the MI Care Team Handbook. In addition, the MI Care Team has a website with provider resources. (Refer to the Directory Appendix for website information.)

Note: The benefit will continue as program evaluations are completed.

7.2. BENEFICIARY ELIGIBILITY

Eligible beneficiaries meeting geographic area requirements cited in the Provider Eligibility Requirements subsection of this policy include those enrolled in Medicaid, the Healthy Michigan Plan, or MICHild who have a diagnosis of depression and/or anxiety in addition to a diagnosis of one of the following:

- Asthma
- Diabetes
- Hypertension
- Heart Disease
- Chronic Obstructive Pulmonary Disease

7.3 BENEFICIARY ENROLLMENT

7.3.A. ENROLLMENT PROCESSES

The MI Care Team uses a two-pronged enrollment approach where both MDHHS and Health Home providers participate. The process is as follows:

- MDHHS will identify potential eligible beneficiaries using claims data and send each beneficiary a letter notifying them of their eligibility. MDHHS will also provide a list of potential eligible beneficiaries to designated MI Care Team providers with whom they have an established relationship. The list of eligible beneficiaries will be updated and maintained on a monthly basis. Enrollment is contingent on beneficiary consent (refer to the Beneficiary Consent subsection), and beneficiary assignment will occur only after a beneficiary visits a MI Care Team provider, fills out the enrollment and consent forms, and establishes a Health Action Plan (an individualized care plan). These steps must be documented.
- MI Care Team providers are permitted to recommend potential eligible beneficiaries for enrollment to MDHHS. MI Care Team providers must provide documentation that indicates that a prospective MI Care Team beneficiary meets all eligibility for the benefit, including presence of qualifying conditions, consent, and establishment of an

Medicaid Provider Manual

individualized care plan. MDHHS shall authorize all beneficiary eligibility and process approved enrollments.

7.3.B. BENEFICIARY CONSENT

Beneficiaries must provide a signed MI Care Team Beneficiary Enrollment/Disenrollment form (MSA-1030) and a signed Consent to Share Behavioral Health Information form (MDHHS-5515) to enroll in and receive the MI Care Team benefit. Signed enrollment and consent forms must be collected and retained in the beneficiary's health record. Providers are responsible for verifying receipt of signed enrollment and consent forms and providing proper documentation to MDHHS. All documents must be maintained in compliance with MDHHS record-keeping requirements.

In cases when such consent is required, the Consent to Share Behavioral Health Information (form MDHHS-5515) must be used for all providers requesting release of information for behavioral health and/or substance use disorder related information. The consent is required to be accepted, honored and used for all Fee for Service (FFS), Managed Care and Prepaid Inpatient Health Plan (PIHP) beneficiaries both from and to any of those providers or entities. The MDHHS-5515 is maintained and updated on the MDHHS website. (Refer to the Directory Appendix for website information.)

An interpreter must be provided to assist the individual if the individual does not understand the language used on the consent form or the language used by the person obtaining the consent. Services of an interpreter cannot be billed as separate services or billed to the beneficiary.

Providers receiving federal funding under the Victims of Crime Act, Violence Against Women Act, and/or Family Violence Prevention and Services Act should not use the MDHHS-5515 because they are subject to stringent consent requirements under these federal laws that are not satisfied by the form. These requirements are in place to address the heightened safety and privacy concerns that victims of domestic violence, sexual assault, stalking, or other crimes may have. These individuals may need additional safeguards for their behavioral health information.

For guidance on addressing issues related to consent and the provision of services for domestic violence, sexual assault, stalking, or other crimes, refer to the MDHHS website.

7.3.C. MI CARE TEAM BENEFIT PLAN ASSIGNMENT

Once the steps outlined above are completed, the beneficiary will be assigned a benefit plan of HHMICARE associated to their Medicaid member ID in CHAMPS. It is incumbent upon MI Care Team providers to verify a beneficiary's HHMICARE assignment prior to rendering services. Beneficiaries without the benefit plan assignment of HHMICARE are not eligible for MI Care Team payment.

7.3.D. BENEFICIARY DISENROLLMENT

Beneficiaries may disenroll from the MI Care Team benefit at any time. Beneficiaries who decline enrollment initially may elect to enroll at a later date contingent on meeting

Medicaid Provider Manual

eligibility requirements. Beneficiaries who decline services or disenroll may do so without jeopardizing their access to other medically necessary services.

Other than beneficiary-initiated disenrollment, disengaged beneficiaries will be categorized into the following two groups which have unique disenrollment processes:

- Beneficiaries who have moved out of an eligible geographic area, died, or are otherwise no longer eligible for Medicaid program benefits will have their eligibility files updated per the standard MI Bridges protocol. Providers will receive updated files accordingly.
- Beneficiaries who are unresponsive for reasons other than moving or death. Providers must make three unsuccessful beneficiary contact attempts within three consecutive months for MDHHS to deem a beneficiary as unresponsive. Providers will not receive payment for unsuccessful contacts. Providers must provide documentation for each unsuccessful contact attempt. After the final unsuccessful attempt, providers will recommend disenrollment to MDHHS with proper documentation.

Providers should process disenrollments by completing the disenrollment section of the MI Care Team Beneficiary Enrollment/Disenrollment form (MSA-1030). Moreover, providers must document disenrollments in the Waiver Support Application. MDHHS requires that providers try to re-establish contact with disenrolled beneficiaries at least bi-annually, as applicable.

7.3.E. BENEFICIARY CHANGING MI CARE TEAM PROVIDERS

To maximize continuity of care and the patient-provider relationship, MDHHS expects beneficiaries to establish a lasting relationship with their chosen MI Care Team provider. However, beneficiaries may change MI Care Team providers, and should notify their current MI Care Team provider immediately if they intend to do so. The current and future MI Care Team providers must discuss the timing of the transfer and communicate transition options to the beneficiary. Additionally, the beneficiary must complete new enrollment and consent forms (MI Care Team Beneficiary Enrollment/Disenrollment form [MSA-1030] and a signed Consent to Share Behavioral Health Information form [MDHHS-5515]). The MI Care Team provider change should occur on the first day of the next month with respect to the new provider's appointment availability. Only one MI Care Team provider may be paid per beneficiary per month. The new MI Care Team provider will also not be eligible for the initial "Access and Health Action Plan" payment if that one-time payment was already made to another MI Care Team provider. (Refer to the MI Care Team Payment subsection of this policy for additional information.)

Medicaid Provider Manual

7.4 COVERED SERVICES

MI Care Team services provide integrated, person-centered, and comprehensive care to eligible beneficiaries to successfully address the complexity of comorbid physical and behavioral health conditions. These services include the following:

- **Comprehensive Care Management**, including but not limited to:
 - Assessment of each beneficiary, including behavioral and physical health care needs;
 - Assessment of beneficiary readiness to change;
 - Development of a Health Action Plan;
 - Documentation of assessment and Health Action Plan in the Electronic Health Record; and
 - Periodic reassessment of each beneficiary's treatment, outcomes, goals, self-management, health status, and service utilization.
- **Care Coordination and Health Promotion**, including but not limited to:
 - Organization of all aspects of a beneficiary's care;
 - Management of all integrated primary and specialty medical services, behavioral health services, physical health services, and social, educational, vocational, housing, and community services;
 - Information sharing between providers, patient, authorized representative(s), and family;
 - Resource management and advocacy;
 - Maintaining beneficiary contact, with an emphasis on in-person contact (although telephonic contact may be used for lower-risk beneficiaries who require less frequent face-to-face contact);
 - Appointment-making assistance, including coordinating transportation;
 - Development and implementation of a Health Action Plan;
 - Medication adherence and monitoring;
 - Referral tracking;
 - Use of facility liaisons;
 - Use of patient care team huddles;
 - Use of case conferences;
 - Tracking of test results;
 - Requiring discharge summaries;
 - Providing patient and family activation and education;
 - Providing patient-centered training (i.e., diabetes education, nutrition education, etc.); and

Medicaid Provider Manual

- Connection of beneficiary to resources (i.e., smoking cessation, substance use disorder treatment, nutritional counseling, obesity reduction and prevention, disease-specific education, etc.).
- **Comprehensive Transitional Care**, including but not limited to:
 - Connecting the patient to health services;
 - Coordinating and tracking the patient's use of health services;
 - Providing and receiving notification of admissions and discharges;
 - Receiving and reviewing care records, continuity of care documents, and discharge summaries;
 - Post-discharge outreach to assure appropriate follow-up services;
 - Medication reconciliation;
 - Pharmacy coordination;
 - Proactive care (versus reactive care);
 - Specialized transitions when necessary (i.e., age, corrections); and
 - Home visits.
- **Patient and Family Support**, including but not limited to:
 - Reducing barriers to the beneficiary's care coordination;
 - Increasing patient and family skills and engagement;
 - Use of community supports (i.e., community health workers, peer supports, support groups, self-care programs, etc.);
 - Facilitating improved adherence to treatment;
 - Advocating for individual and family needs;
 - Assessing and increasing individual and family health literacy;
 - Use of advance directives;
 - Providing assistance with maximizing beneficiary's level of functioning; and
 - Providing assistance with development of social networks.
- **Referral to Community and Social Support Services**, including but not limited to:
 - Providing beneficiaries with referrals to support services;
 - Collaborating/coordinating with community-based organizations and key community stakeholders;
 - Emphasizing resources closest to the beneficiary's home;
 - Emphasizing resources which present the fewest barriers;
 - Identifying community-based resources;
 - Providing resource materials pertinent to patient needs;
 - Assisting in attaining other resources, including benefit acquisition;

Medicaid Provider Manual

- Providing referral to housing resources; and
- Providing referral tracking and follow up.
- **Use of Health Information Technology to link services**, including but not limited to:
 - Use of an Electronic Health Record with meaningful use attainment;
 - Use of CareConnect360 for care coordination, transition and planning; and
 - Use of telemedicine as needed.

7.5 PROVIDER ELIGIBILITY REQUIREMENTS

Eligible providers are selected by MDHHS through its Invitation-to-Bid (ITB) process. Applicants are selected on the basis of meeting the requirements outlined in the ITB. Selected MI Care Team providers will assure that all requirements are met and maintained. Failure to meet and maintain these requirements can result in loss of MI Care Team eligibility.

7.5.A. GEOGRAPHIC AREA

Eligible providers must implement the MI Care Team in geographic areas determined by the ITB process.

7.5.B. PROVIDER TYPES

Eligible provider types for the MI Care Team are Federally Qualified Health Centers (FQHCs), including Section 330 grantees and FQHC Look-Alikes, and Tribal Health Centers (THCs).

7.5.C. PROVIDER REQUIREMENTS

Providers must meet the requirements indicated in the ITB, the MOU, and the MI Care Team Handbook. (Refer to the Directory Appendix for website information.)

7.5.D. PROVIDER INFRASTRUCTURE REQUIREMENTS

MI Care Team providers will assure beneficiary access to an interdisciplinary care team that addresses the beneficiary's behavioral and physical health needs. The on-site care team must consist of, at a minimum, the following:

- Primary Care Provider
 - Must be a primary care physician, physician's assistant, or nurse practitioner with appropriate credentials to practice in Michigan (i.e., full licensure and certification, as applicable)
- Behavioral Health Consultant
 - Must be a licensed master's level social worker in Michigan
- Nurse Care Manager
 - Must be a licensed registered nurse in Michigan

Medicaid Provider Manual

- Community Health Worker (CHW)
 - Must be at least 18 years of age
 - Must possess a high school diploma or equivalent
 - Must be supervised by licensed professional members of the care team
 - MDHHS strongly encourages the completion of a CHW Certificate Program
- Health Home Coordinator
 - Must be an administrative staff person employed by the eligible provider
- Access to a Psychiatrist/Psychologist for consultation purposes (can be off-site)
 - Must be a doctoral level licensed psychiatrist or psychologist in Michigan

In addition to the above required provider infrastructure, eligible providers should coordinate care with the following professions:

- Dentist
- Dietician/Nutritionist
- Pharmacist
- Peer support specialist
- Diabetes educator
- School personnel
- Others as appropriate

7.6 PROVIDER ENROLLMENT AND MI CARE TEAM DESIGNATION

All providers selected through the ITB process and meeting the requirements in the Provider Eligibility Requirements subsection of this policy may enroll as a designated MI Care Team provider contingent upon adherence to this policy and the MI Care Team MOU. MDHHS will provide, in writing, the MOU and any other contingencies needed to obtain or preserve MI Care Team designation. Providers must sign and attest to adhere to this policy and the MOU and return to MDHHS. Only after MDHHS receives this signed attestation will a provider become a designated MI Care Team provider.

7.6.A. TRAINING AND TECHNICAL ASSISTANCE

MDHHS requires provider participation in state-sponsored training and technical assistance as a standard condition for continued MI Care Team designation. A readiness assessment will be completed for each designated MI Care Team site which will provide a basis for training and technical assistance needs.

7.6.B. USE OF APPLICABLE HEALTH INFORMATION TECHNOLOGY (HIT)

MDHHS requires MI Care Team providers to utilize appropriate HIT for enrollment, health service documentation, and care coordination purposes. Training on specific HIT resources will be provided by MDHHS.

Medicaid Provider Manual

7.7 PROVIDER DISENROLLMENT

To maximize continuity of care and the patient-provider relationship, MDHHS expects MI Care Team providers to establish a lasting relationship with enrolled beneficiaries. However, designated MI Care Team providers wishing to discontinue MI Care Team services must notify MDHHS at least six months in advance of ceasing MI Care Team operations. MI Care Team services may not be discontinued without MDHHS approval of a provider-created cessation plan and protocols for beneficiary transition.

7.8 MI CARE TEAM PAYMENT

Payment for MI Care Team services is contingent on designated MI Care Team providers meeting the requirements laid out in this policy and in the MOU, and as determined by MDHHS. Failure to meet these requirements may result in loss of MI Care Team provider designation.

7.8.A. GENERAL PROVISIONS FOR MI CARE TEAM PAYMENT

To provide MI Care Team services and bill Medicaid, a provider must be enrolled in the Community Health Automated Medicaid Processing System (CHAMPS), including enrollment as a billing agent or utilization of an existing billing agent to bill for and receive the MI Care Team payments. Designated MI Care Team providers have their own CHAMPS identifier which must be used to submit encounters for MI Care Team Services. This identifier is only used for documenting MI Care Team services. The Type 2 (Organization) National Provider Identifier (NPI) number must be used as the billing provider on all MI Care Team service encounters submitted. The billing provider loop or field is mandatory to complete. The Provider (Type 1 - Individual) NPI number of the provider who performed the service encounter, or the supervising physician, should be entered as the rendering provider. If the provider who performed the service is not enrolled in CHAMPS (e.g., CHW), then a supervising primary care provider must be entered as the rendering provider (i.e., primary care physician, nurse practitioner, physician's assistant). Designated MI Care Team providers should use their standard NPI for payment of regular (non-MI Care Team) clinical services.

Designated MI Care Team providers are paid one of two monthly case rates, which are as follows:

- **Health Action Plan Rate**

The MI Care Team uses a once-in-a-lifetime-per-beneficiary Health Action Plan rate to be paid only for the first month that a beneficiary participates in the MI Care Team program. This once-in-a-lifetime-per-beneficiary rate represents reimbursement for certain actions and services including, but not limited to, initial care plan development. This service must be delivered in person.

- **Ongoing Care Coordination Rate**

For all subsequent months following the Health Action Plan payment, the Ongoing Care Coordination rate will be paid for eligible MI Care Team beneficiaries.

Medicaid Provider Manual

Details and guidance regarding applicable service encounter and diagnosis codes can be found in the MI Care Team Handbook. (Refer to the Directory Appendix for website information.)

Payment for MI Care Team services is in addition to the existing fee-for-service payments, encounters, or daily rate payments for direct clinical services. MDHHS payment methodology is designed to only reimburse for the cost of MI Care Team staff for the delivery of Health Home services that are not covered by any other currently available Medicaid reimbursement mechanism.

7.8.B. RECOUPMENT OF PAYMENT

The monthly payment is contingent on a MI Care Team beneficiary receiving a MI Care Team service during the month. The payment is subject to recoupment if the beneficiary does not receive a MI Care Team service during the calendar month. The recoupment lookback will occur four months after the monthly payment is made. Thus, four months after the month a payment is made (for example, in November, MDHHS would look back at July's payment), CHAMPS will conduct an automatic recoupment process that will look for an appropriate code. If a core MI Care Team service is not provided during a calendar month, that month's payment is subject to recoupment by MDHHS. Once a recoupment has occurred, there is no further opportunity to submit a valid MI Care Team encounter code and/or claim.

7.9. MI CARE TEAM AND MANAGED CARE BENEFICIARIES

MI Care Team providers and Medicaid Health Plans are expected to work together to coordinate services for eligible members who wish to enroll in the MI Care Team benefit. Both the providers and the health plans will be given a list of their members deemed eligible for the MI Care Team program. MDHHS requires providers and health plans confer to optimize communication to beneficiaries. MI Care Team providers are primarily responsible for conducting outreach to eligible beneficiaries.

SECTION 1 – GENERAL INFORMATION

This chapter applies to all providers.

The Healthy Michigan Plan provides health care coverage for a category of eligibility authorized under the Patient Protection and Affordable Care Act and Michigan Public Act 107 of 2013 that began April 1, 2014. The benefit design of the Healthy Michigan Plan ensures beneficiary access to quality health care, encourages utilization of high-value services, and promotes adoption of healthy behaviors.

Information contained in this chapter is to be used in conjunction with other chapters of this manual, including the Billing & Reimbursement Chapters as well as the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter.

1.1 ELIGIBILITY

The Healthy Michigan Plan provides health care coverage for individuals who:

- Are 19-64 years of age
- Have income at or below 133% of the federal poverty level under the Modified Adjusted Gross Income (MAGI) methodology
- Do not qualify for or are not enrolled in Medicare
- Do not qualify for or are not enrolled in other Medicaid programs
- Are not pregnant at the time of application
- Are residents of the State of Michigan

Eligibility for the Healthy Michigan Plan is determined through the MAGI methodology, coordinated through the Michigan Department of Health and Human Services (MDHHS). All criteria for MAGI eligibility must be met to be eligible for the Healthy Michigan Plan. For additional information on program eligibility, refer to the Beneficiary Eligibility Chapter of this manual.

1.2 BENEFIT ADMINISTRATION

All Healthy Michigan Plan beneficiaries, with the exception of some beneficiaries (e.g., Native Americans), are required to enroll in a health plan. Enrollees will select their health plan with assistance from MI Enrolls. In addition, behavioral health and substance use disorders will be administered in accordance with the current service delivery model.

1.2.A. MEDICAID HEALTH PLANS

MDHHS contracts with Medicaid Health Plans (MHPs) to provide services to Medicaid beneficiaries. MHPs must operate consistently with all applicable published Medicaid coverage and limitation policies. (Refer to the Medicaid Health Plans Chapter of this manual for additional information.)

Medicaid Provider Manual

Although MHPs must provide the full range of covered services, MHPs may also choose to provide services over and above those specified. MHPs are allowed to develop prior authorization (PA) requirements and utilization management and review criteria that differ from Medicaid requirements.

1.2.B. PREPAID INPATIENT HEALTH PLANS

Pursuant to Michigan's Medicaid State Plan and federally approved Section 1115 waiver, community-based mental health and substance use disorder services and supports are covered by the Healthy Michigan Plan when delivered under the auspices of an approved Prepaid Inpatient Health Plan (PIHP).

1.2.C. FEE FOR SERVICE

Prior to enrollment in a health plan, beneficiaries are eligible to receive Healthy Michigan Plan services through the fee-for-service (FFS) system. Providers must submit claims through the Community Health Automated Medicaid Processing System (CHAMPS).

Covered services that are carved out of the MHP and PIHP delivery systems will be reimbursed through FFS consistent with applicable Medicaid policy.

Unless noted in Medicaid provider-specific chapters, service coverage and authorization requirements for FFS beneficiaries enrolled in the Healthy Michigan Plan mirror those required for Medicaid.

SECTION 2 – HEALTHY MICHIGAN PLAN AND HEALTHY BEHAVIORS

The benefit design of the Healthy Michigan Plan ensures beneficiary access to quality health care, encourages utilization of high-value services, and promotes adoption of healthy behaviors.

2.1 INITIAL APPOINTMENT WITH PRIMARY CARE PROVIDER

Healthy Michigan Plan beneficiaries are required to contact their primary care provider within 60 days of enrollment in a health plan to schedule an appointment. When contacted by the beneficiary, providers are expected to make reasonable efforts to promptly schedule an initial appointment.

2.2 HEALTHY BEHAVIORS INCENTIVES

Healthy behaviors will be supported through access to primary care providers and healthy behavior promotion by health plans.

SECTION 3 – COST SHARING INFORMATION

The Healthy Michigan Plan has beneficiary cost-sharing obligations. Copayments may be required and due at the point of service for beneficiaries ages 21 years and older. The MDHHS Healthy Michigan Plan Copay Requirements table, available on the MDHHS website, provides detailed information regarding the specific services to which the copays may be applied. (Refer to the Directory Appendix for website information and the Beneficiary Eligibility chapter for information regarding cost sharing provisions.)

SECTION 4 – COVERAGE

The table below outlines beneficiary coverage under the Healthy Michigan Plan. Refer to the Special Coverage Provisions Section for additional coverage information.

Service	Coverage
Ambulatory patient services	<ul style="list-style-type: none"> Primary care provider services Specialist/Referral care services Outpatient hospital services, including Ambulatory Surgical Center (ASC) services Home health care services Hospice care Podiatry care Chiropractic services
Emergency services	<ul style="list-style-type: none"> Emergency room services Emergency transportation/ambulance Urgent Care Centers (UCC) or facilities
Hospitalization	<ul style="list-style-type: none"> Inpatient hospital services (e.g., hospital stay, physician and surgical services)

SECTION 5 – SPECIAL COVERAGE PROVISIONS

This section provides general information regarding Healthy Michigan Plan coverage requirements for certain services. Additional information regarding these services may be contained in other relevant chapters of this manual, as applicable.

5.1 DENTAL

Refer to the General Information section of the Dental chapter for information on dental coverage.

5.2 HABILITATIVE SERVICES

Michigan adopted the National Association of Insurance Commissioners definition of habilitative services, which are described as services that help a person keep, learn or improve skills and functioning for daily living. These services may include physical and occupational therapy and speech-language pathology services provided in an outpatient hospital setting for people with disabilities.

5.2.A. COVERED SERVICES AND LIMITS

All services must be provided under the written order of a Medical Doctor (MD), Doctor of Osteopathic Medicine (DO), or other qualified health professional as defined by law according to a written treatment plan established by that provider.

Physical and occupational therapy services provided in a private practice or outpatient setting will be limited to 144 units (15-minute increments) in a calendar year period without PA. Evaluations and re-evaluations will be limited to two per year without PA.

Speech therapy services provided in a private practice or outpatient setting will be limited to 36 visits in a calendar year period without PA. Evaluations and re-evaluations will be limited to two per year without PA.

The habilitative services modifier must be reported in addition to the procedure code for all habilitative services submitted either on PA requests or for claim adjudication to ensure proper payment. Refer to the Billing & Reimbursement chapters for additional therapy modifier information.

5.2.B. NON-COVERED SERVICES

Respite care, day care, recreational care, residential treatment, social services, custodial care, and services for vocational or educational purposes are not covered as habilitative services.

NOTE: Habilitative services provided as part of a mental health or substance use disorder person-centered planning process are subject to the Mental Health Specialty Services and Supports program criteria.

5.2.C. PRIOR AUTHORIZATION

When billing FFS, providers must obtain PA to continue therapy beyond the maximum benefit. Requests for PA must be submitted on the Occupational Therapy-Physical

Medicaid Provider Manual

Therapy-Speech Therapy Prior Approval Request/Authorization form (MSA-115). (Refer to the Forms Appendix for additional information.)

PA requirements for beneficiaries enrolled in a health plan may differ from those described in this policy for FFS. Providers should contact the individual plans regarding their authorization requirements.

5.2.D. PLACE OF SERVICE

Habilitative services may be provided to beneficiaries of all ages by properly qualified and credentialed professionals in the outpatient hospital setting.

5.3 BEHAVIORAL HEALTH SERVICES

Healthy Michigan Plan beneficiaries have an array of behavioral health services available to treat mental health and substance use disorders.

5.3.A. MENTAL HEALTH SERVICES

Health plans will provide mental health services under the Mental Health Outpatient benefit consistent with the policies and procedures established by the traditional Medicaid Program. For mental health needs that do not meet established criteria, health plans must coordinate with the appropriate PIHP to ensure that medically necessary mental health services are provided. Refer to the Medicaid Health Plans and the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapters of this manual for additional information.

Beneficiaries who are not enrolled in a health plan will receive their outpatient mental health services through Fee-for-Service and may include Prepaid Inpatient Health Plan services as described in this manual.

Additional mental health services (e.g., inpatient hospitalization, intensive crisis stabilization, etc.) are covered benefits consistent with the policies and procedures established by the Medicaid program.

5.3.B. BEHAVIORAL HEALTH COMMUNITY-BASED SPECIALTY SERVICES

This section applies to Behavioral Health supports and services providers. Behavioral Health, as referenced in this section, is inclusive of mental health disorders, substance use disorders and intellectual/developmental disabilities. Information contained in this section is to be used in conjunction with other chapters of the Medicaid Provider Manual (e.g., the Billing & Reimbursement Chapters, the Practitioner Chapter and the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter) as well as the related procedure code databases located on the MDHHS website. (Refer to the Directory Appendix for website information.)

Pursuant to Michigan's Medicaid State Plan and federally approved Section 1115 waiver, community-based behavioral health supports and services are covered by the Healthy Michigan Plan when delivered under the auspices of an approved Prepaid Inpatient Health Plan (PIHP).

Medicaid Provider Manual

The requirements and information found in the General Information Section of the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter also apply to the provision of the Healthy Michigan Plan behavioral health supports and services.

In addition to the Definition of Terms found in the General Information Section of the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter, the following definitions are applicable to the Healthy Michigan Plan.

5.3.B.1. DEFINITION OF TERMS

American Society of Addiction Medicine (ASAM) Criteria	The clinical guide designed by ASAM to improve assessment and outcomes-driven treatment and recovery services. It is also used to match patients to appropriate types and levels of care. In general, the purpose of the ASAM Criteria is to enhance the use of multidimensional assessments to develop patient-centered service plans and to guide clinicians, counselors, and care managers in making objective decisions about patient admission, continuing care, and transfer/discharge for various levels of care for addictive, substance-related, and co-occurring conditions.
Behavioral Health	A categorical description that is inclusive of mental health disorders, substance use disorders and intellectual/developmental disabilities.
Behavioral Health Professional	For purposes of the Healthy Michigan Plan Chapter, this is a categorical description used to refer to the individuals who provide mental health and/or substance use disorder services that are identified in the Behavioral Health Code Charts and Provider Qualifications document on the MDHHS website. Refer to the Directory Appendix for website information.)
Covered Services	For purposes of the Healthy Michigan Plan chapter, Healthy Michigan Plan Specialty Behavioral Health Services.

5.3.B.2. PROGRAM REQUIREMENTS

Refer to the Program Requirements Section of the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter. These requirements are consistent with the expectations for the Healthy Michigan Plan.

Additionally, as the Healthy Michigan Plan provides a behavioral health benefit, certain support services that are part of the Healthy Michigan Plan specialty behavioral health benefit do not require substance use disorder program licensure or accreditation to provide that service. Beneficiaries with a substance use disorder may receive these supports from a provider if the beneficiary meets the eligibility criteria outlined in each description. Those services are:

- Assistive Technology
- Community Living Supports
- Enhanced Pharmacy
- Environmental Modifications
- Fiscal Intermediary
- Housing Assistance
- Occupational Therapy

Medicaid Provider Manual

- Peer Specialist Services (recovery coach)
- Personal Care in Licensed Specialized Residential Care Settings
- Physical Therapy
- Respite Care
- Skill Building Assistance
- Support and Service Coordination
- Speech, Hearing and Language Therapy
- Transportation

5.3.B.3. COVERED SUPPORTS AND SERVICES

The following behavioral health supports and services are covered under the Healthy Michigan Plan. Supports and services with program changes specific to the Healthy Michigan Plan are explained in the following subsections. Information for supports and services marked with an * may be found in the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter.

The following supports and services are designed to assist those with physical, cognitive and/or functional impairments. These supports and services shall be provided to beneficiaries with a substance use disorder diagnosis who meet the medical necessity criteria in the identified area. The supports and services would be indicated as part of the beneficiary's plan of service.

Some interventions listed below (i.e., Assertive Community Treatment, Clubhouse, Hospital-Based Psychiatric Services, Intermediate Care Facilities, Peer Operated Drop In Centers and Supported Employment) are only indicated for a specified population (mental health or intellectual/developmental disability) and do not apply to those with a substance use disorder diagnosis, in which case beneficiaries would not be considered eligible for those services. Likewise, beneficiaries with a mental health or intellectual/developmental disability diagnosis would not be eligible for the services identified for substance use disorders (i.e., Residential, Sub-Acute Detoxification and Treatment Approved Pharmacological Supports).

- Supported/Integrated Employment Services *
- Targeted Case Management
- Transportation *
- Treatment (DPT/CSAT) Approved Pharmacological Supports *
- Treatment Planning *

5.3.B.4. CRISIS SERVICES

Crisis Interventions	<p>Crisis Interventions are unscheduled activities conducted for the purpose of resolving a crisis situation requiring immediate attention. Activities include crisis response, crisis line, assessment, referral, and direct therapy.</p> <p>The standard for whether or not a crisis exists is a "prudent layperson" standard. That means that a prudent layperson would be able to determine from the beneficiary's symptoms that crisis services are necessary. Crisis means a situation in which an individual is experiencing the signs and symptoms of a serious behavioral health disorder, and one of the following applies:</p>
-----------------------------	---

Medicaid Provider Manual

	<ul style="list-style-type: none">▪ The individual can reasonably be expected within the near future to physically injure themselves or another individual, either intentionally or unintentionally;▪ The individual is unable to provide themselves food, clothing, or shelter, or to attend to basic physical activities such as eating, toileting, bathing, grooming, dressing, or ambulating, and this inability may lead in the near future to harm to the individual or to another individual; or▪ The individual's judgment is so impaired that they are unable to understand the need for treatment and, in the opinion of the behavioral health professional, their continued behavior as a result of the behavioral health disorder can reasonably be expected in the near future to result in physical harm to the individual or to another individual. <p>If the beneficiary developed a crisis plan, the plan is followed with permission from the beneficiary.</p>
Crisis Residential Services	<p>Crisis residential services are intended to provide a short-term alternative to inpatient psychiatric services for beneficiaries experiencing an acute psychiatric crisis when clinically indicated. Services may be used to avert an inpatient psychiatric admission or to shorten the length of an inpatient stay. Additionally, these services are designed for a subset of beneficiaries who meet the ASAM Criteria for Level 3.7 Medically Monitored Intensive Inpatient Services admission criteria or are at risk of admission, but who can be appropriately served in settings less intensive than a hospital. This service is also designed for beneficiaries who are intoxicated and at risk of admission to an acute setting or another level of care but can be appropriately served in this less intensive setting. The goal of crisis residential services is to facilitate reduction in the intensity of those factors that lead to crisis residential admission through a person-centered/individualized and recovery-oriented approach.</p>

Medicaid Provider Manual

- **Population:** Services are designed for a subset of beneficiaries who meet psychiatric inpatient/substance use disorder residential admission criteria or are at risk of admission to a high level of care setting but who can be appropriately served in a less intensive setting.
- **Covered Services:** Services must be designed to resolve the immediate crisis and improve the functioning level of the beneficiary to allow them to return to less intensive community living as soon as possible. Covered crisis residential services include:
 - Psychiatric supervision (for programs providing mental health services and/or co-occurring disorders);
 - Therapeutic support services;
 - Medication management/stabilization and education;
 - Behavioral services;
 - Milieu therapy; and
 - Nursing/medical services (on-site nursing services are required for those beneficiaries who are in the detoxification process, and who require medications to manage the current crisis).

Beneficiaries who are admitted to crisis residential services must be offered the opportunity to explore and learn more about crises, mental health disorders, substance use disorders, identity, values, choices and choice-making, recovery and recovery planning. Recovery and recovery planning is inclusive of all aspects of life, including relationships, where to live, training, employment, daily activities, and physical well-being.

The program must include on-site nursing services (Registered Nurse [RN] or Licensed Practical Nurse [LPN] under appropriate supervision).

- For settings of 6 beds or fewer: on-site nursing must be provided at least one hour per day, per resident, seven days per week, with 24-hour availability on-call.
- For 7-16 beds: on-site nursing must be provided eight hours per day, seven days per week, with 24-hour availability on-call.

Medicaid Provider Manual

- **Provider Criteria:** The PIHP must seek and maintain MDHHS approval for the crisis residential program in order to use Healthy Michigan Plan funds for program services. Healthy Michigan Plan crisis residential programs may choose to provide a program for serious mental illness, intellectual/developmental disabilities, substance use disorders or a combined program. A program offering services for substance use disorders must be licensed for residential substance use disorder treatment services per the Administrative Rules for Substance Use Disorder Programs and appropriately accredited through one of the organizations identified in the Substance Abuse Services subsection of the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter. A combined program, one offering services for serious mental illness/intellectual and developmental disabilities and substance use disorders, must also be approved by MDHHS as a “co-occurring enhanced crisis residential program” (consistent with PA 338 of 2018). A co-occurring enhanced crisis residential program must be able to demonstrate that it can address the mental health needs, substance use disorder needs, or both of an individual through enhanced programming and staffing patterns. Established mental health residential programs that purport to offer this service for individuals with substance use disorders will be required to seek re-approval of the program by MDHHS when appropriate licensing and accreditation has been obtained. Programs currently approved to provide services for mental health and/or intellectual/developmental disabilities by MDHHS through the delivery of Medicaid State Plan, Habilitation Supports Waiver (HSW), or additional/1915(i) SPA services do not require re-approval.

- **Qualified Staff:** Treatment services must be clinically supervised by a psychiatrist. A psychiatrist need not be present when services are delivered but must be available by telephone at all times. The psychiatrist shall provide psychiatric evaluation or assessments at the crisis residential home or at an appropriate location in the community. A psychiatric evaluation completed by a treating psychiatrist that resulted in the admission to the program fulfills this requirement as long as the program psychiatrist has consulted with that physician as part of the admission process. Medication reviews performed at the crisis residential home must be performed by appropriately licensed medical personnel acting within their scope of practice and under the clinical supervision of the psychiatrist. The covered crisis residential services must be supervised on-site eight hours a day, Monday through Friday (and on call at all other times). Supervision must be by a behavioral health professional (Mental Health Professional [MHP] and/or a Substance Abuse Treatment Specialist [SATS] depending on the scope of services being provided) possessing at least a master’s degree in human services and one year of experience providing behavioral health services to individuals with serious mental illness and/or substance use disorders; or a bachelor’s degree in human services and at least two years of experience providing behavioral health services to individuals with serious mental illness and/or substance use disorders.

Treatment activities may be carried out by paraprofessional staff who have at least one year of satisfactory work experience providing behavioral health services to individuals with mental illness and/or substance use disorders, or who have successfully completed a PIHP/ MDHHS-approved training program for working with individuals with mental illness and/or substance use disorders.

Peer support specialists and/or recovery coaches may be part of the multidisciplinary team and can facilitate some of the activities based on their scope of practice, such as facilitating peer lead support groups, assisting in transitioning beneficiaries to less intensive services, and by mentoring beneficiaries towards recovery.

Medicaid Provider Manual

- **Location of Services:** Services must be provided to beneficiaries in licensed crisis residential foster care, group home settings not exceeding 16 beds in size, or in a licensed substance use disorder residential treatment program (when providing services for substance use disorders). Homes/settings must have appropriate licensure from the State and must be approved by MDHHS to provide specialized crisis residential services. Services must not be provided in a hospital or other institutional setting.
- **Admission Criteria:** Crisis residential services may be provided to beneficiaries who are assessed by, and admitted through, the authority of the local PIHP. Beneficiaries must meet psychiatric inpatient admission or residential substance use disorder level of care criteria but have symptoms and risk levels that permit them to be treated in such alternative settings. Services are designed for beneficiaries with mental health or substance use disorders, beneficiaries with a co-occurring mental health and substance use disorder, or beneficiaries with intellectual/developmental disabilities. For beneficiaries with a concomitant disorder with an intellectual/developmental disability, the primary reason for service must be mental illness or substance use disorder.
- **Duration of Services:** Services may be provided for a period up to 14 calendar days per crisis residential episode. Services may be extended and regularly monitored, if justified by clinical need, as determined by the interdisciplinary team. For substance use disorders, beneficiaries should be moved to another ASAM Level of Care within 14 days; however, services may be extended if justified by clinical need, medical necessity, and as determined by the interdisciplinary team.
- **Individual Plan of Service/Treatment Plan:** Services must be delivered according to an Individual Plan of Service (IPOS) or appropriate treatment plan process for substance use disorder beneficiaries (refer to the Treatment Planning subsection of the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter) based on an assessment of immediate need. The IPOS/treatment plan must be developed within 48 hours of admission and signed by the beneficiary (if possible), the guardian, the psychiatrist, and any other professionals involved in the treatment planning process as determined by the needs of the beneficiary. If the beneficiary has an assigned case manager, the case manager must be involved in the treatment as soon as possible, and must also be involved in follow-up services.

The IPOS/treatment plan must contain:

- Clearly stated goals and measurable objectives, derived from the assessment of immediate need, stated in terms of specific observable changes in behavior, skills, attitudes, or circumstances, structured to resolve the crisis;
- Identification of the activities designed to assist the beneficiary to attain their goals and objectives; and
- Discharge plans, the need for aftercare/follow-up services, and the role of, and identification of, the case manager.

If the length of stay in the crisis residential program exceeds 14 days, an interdisciplinary team must develop a subsequent plan based on comprehensive assessments. The team is comprised of the beneficiary, the guardian, the psychiatrist, the case manager and other professionals whose disciplines are relevant to the needs of the beneficiary, including the individual Assertive Community Treatment (ACT) team, outpatient services provider, when applicable. If the beneficiary did not have a case manager prior to initiation of the intensive crisis residential service and the crisis episode exceeds 14 days, a case manager must be assigned and involved in treatment and follow-up care. (The case manager may be assigned prior to the 14 days according to need.)

Medicaid Provider Manual

Intensive Crisis Stabilization Services

Individuals between 19-21 years of age could be served under EPSDT utilizing the intensive crisis stabilization team for children. (Refer to the Intensive Crisis Stabilization Services section in the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter for additional information.)

Intensive crisis stabilization services are structured treatment and support activities provided by a multidisciplinary team and designed to provide a short-term alternative to inpatient psychiatric services and/or substance use disorder residential treatment in a community setting. Services may be used to avert a psychiatric admission, residential substance use disorder admission, or to shorten the length of an inpatient or substance use disorder residential stay when clinically indicated.

Crisis situation means a situation in which an individual is experiencing the signs and symptoms of a serious behavioral health disorder, and one of the following applies:

- The individual can reasonably be expected within the near future to physically injure themselves or another individual, either intentionally or unintentionally;
- The individual is unable to provide themselves food, clothing, or shelter, or to attend to basic physical activities such as eating, toileting, bathing, grooming, dressing, or ambulating, and this inability may lead in the near future to harm to the individual or to another individual; or
- The individual's judgment is so impaired that they are unable to understand the need for treatment and, in the opinion of the behavioral health professional, their continued behavior as a result of the behavioral health disorder can reasonably be expected in the near future to result in physical harm to the individual or to another individual.
- **Approval:** The PIHP must seek and maintain MDHHS approval for the intensive crisis stabilization services in order to use Healthy Michigan Plan funds for program services. A program that will be offering services for substance use disorders must be licensed for outpatient substance use disorder treatment services per the Administrative Rules for Substance Use Disorder Programs and appropriately accredited through one of the organizations identified in the Substance Abuse Services subsection of the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter. Established crisis stabilization service programs that purport to offer this service for individuals with substance use disorders will be required to seek re-approval of the program by MDHHS when appropriate licensing and accreditation has been obtained. Programs currently approved to provide services for mental health and/or intellectual/developmental disabilities by MDHHS through the delivery of Medicaid State Plan, Habilitation Supports Waiver (HSW), or additional/1915(i) SPA services do not require re-approval.
- **Population:** These services are for beneficiaries who have been assessed to meet criteria for psychiatric hospital admissions and/or substance use disorder residential/inpatient treatment but who, with intense interventions, can be stabilized and served in their usual community environments. These services may also be provided to beneficiaries leaving inpatient psychiatric services and/or substance use disorder residential/inpatient treatment if such services will result in a shortened stay. Beneficiaries must have a diagnosis of mental illness, substance use disorder or mental illness with a co-occurring substance use disorder, or intellectual/developmental disability.

Medicaid Provider Manual

- **Services:** Intensive crisis stabilization services are intensive treatment interventions delivered by an intensive crisis stabilization treatment team under the supervision of a psychiatrist. Component services include:

- Intensive individual counseling/psychotherapy;
- Assessments (rendered by the treatment team);
- Family therapy;
- Psychiatric supervision; and
- Therapeutic support services by trained paraprofessionals.

- **Qualified Staff:** Intensive crisis stabilization services must be provided by a treatment team of behavioral health professionals under the supervision of a psychiatrist. The psychiatrist need not provide on-site supervision at all times, but must be available by telephone at all times. The treatment team providing intensive crisis stabilization services must be Mental Health Professionals and/or Substance Abuse Treatment Specialists. Nursing services/consultation must be available.

The treatment team may be assisted by trained paraprofessionals under appropriate supervision. Trained paraprofessionals must have at least one year of satisfactory work experience providing services to individuals with behavioral health disorders. Activities of trained paraprofessionals include assistance with therapeutic support services. In addition, the team may include one or more peer support specialists and/or recovery coaches.

- **Location of Services:** Intensive crisis stabilization services may be provided where necessary to alleviate the crisis situation, and to permit the beneficiary to remain in, or return more quickly to, their usual community environment. Intensive crisis stabilization services must not be provided exclusively or predominantly at residential programs.

Exceptions: Intensive crisis stabilization services may not be provided in:

- Inpatient settings;
- Jails or other settings where the beneficiary has been adjudicated; or
- Crisis residential settings.

- **Individual Plan of Service/Treatment Plan:** Intensive crisis stabilization services may be provided initially to alleviate an immediate behavioral health crisis. However, following resolution of the immediate situation (and within no more than 48 hours), an intensive crisis stabilization services IPOS or appropriate treatment plan process for substance use disorder beneficiaries (refer to the Treatment Planning subsection of the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter) must be developed. The intensive crisis stabilization IPOS/treatment plan must be developed through a person-centered planning process in consultation with the psychiatrist. Other professionals may also be involved if required by the needs of the beneficiary. The case manager (if the beneficiary receives case management services) must be involved in the treatment and follow-up services.

The IPOS/treatment plan must contain:

- Clearly stated goals and measurable objectives, derived from the assessment of immediate need, and stated in terms of specific observable changes in behavior, skills, attitudes, or circumstances structured to resolve the crisis.
- Identification of the services and activities designed to resolve the crisis and attain the beneficiary's goals and objectives.
- Plans for follow-up services (including other behavioral health services where indicated) after the crisis has been resolved. The role of the case manager must be identified, where applicable.

5.3.B.5. FAMILY SUPPORT AND TRAINING

Family-focused services are provided to the family (natural or adoptive parents, spouse, children, siblings, relatives, foster family, in-laws, and other unpaid caregivers) of beneficiaries with behavioral health disorders for the purpose of assisting the family in relating to and caring for a relative with a behavioral health disorder. The services target the family members who are caring for and/or living with the beneficiary who is receiving behavioral health services. The service is to be used in cases where the beneficiary is hindered or at risk of being hindered in their ability to achieve goals of:

- Performing activities of daily living;
- Perceiving, controlling, or communicating with the environment in which they live; or
- Improving their inclusion and participation in the community or productive activity, or opportunities for independent living.

The training and counseling goals, content, frequency and duration of the training must be identified in the beneficiary's IPOS/treatment plan, along with the beneficiary's goals that are being facilitated by this service.

Coverage includes:

- Education and training, including instructions about treatment regimens, and use of assistive technology and/or medical equipment needed to safely maintain the beneficiary at home as specified in the IPOS/treatment plan.
- Counseling and peer support provided by an appropriately trained counselor or appropriately trained peer. This can be in a one-on-one or group setting to provide assistance with identifying coping strategies for successfully caring for or living with a person who has a behavioral health disorder.
- Family Psycho-Education (SAMHSA model) for individuals with serious mental illness and their families. This evidence-based practice includes family educational groups, skills workshops, and joining.

5.3.B.6. OUTPATIENT COUNSELING AND THERAPY

Outpatient counseling and therapy is a non-residential treatment service that can take place in an office-based location with clinicians educated/trained in providing professionally directed behavioral health treatment or in a community-based location with appropriately educated/trained staff. The treatment occurs in regularly scheduled sessions, usually totaling fewer than nine contact hours per week but, when medically necessary and determined by individual need, can total over 20 hours in a week. Individual, family or group treatment services may be provided separately or in combination.

Treatment must be person-centered/individualized based on an appropriate assessment/evaluation and contain a diagnostic impression and beneficiary characteristics, including age, gender, culture, and development. Authorized decisions on length of stay, including continued stay, change in level of care and discharge, must be based on medical necessity and/or the ASAM Criteria. Beneficiary participation in referral and continuing care planning must occur prior to discharge and should be based on the needs of the beneficiary in order to support sustained recovery. Referral, continuing stay, and recovery support needs must be identified through the person-centered/individualized treatment planning process.

Provider Qualifications	<p>Substance use disorder outpatient service providers are required to be licensed as an organization. A program offering services for substance use disorders must be licensed for outpatient substance use disorder treatment services per the Administrative Rules for Substance Use Disorder Programs and appropriately accredited through one of the organizations identified in the Substance Abuse Services subsection of the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter. Substance use disorder outpatient providers offering the adjunct support services of case management, early intervention, integrated treatment for persons with mental health and substance use disorders, and/or peer recovery and recovery support must have these areas added to their outpatient substance use disorder license as approved service categories.</p> <p>All behavioral health organizations/providers of outpatient services must have appropriately licensed and credentialed staff and provide treatment that is within their established scope of practice. (Refer to the Behavioral Health Code Charts and Provider Qualifications document that supports the Medicaid Provider Manual. The Behavioral Health Code Charts and Provider Qualifications document is posted on the MDHHS website. Refer to the Directory Appendix for website information.)</p>
Eligibility	<p>Outpatient counseling and therapy may be provided only when:</p> <ul style="list-style-type: none">▪ The service meets medical necessity criteria;▪ It meets the person-centered service planning requirement;▪ The current edition of the Diagnostic and Statistical Manual of Mental Disorders (DSM) is used to determine an initial diagnostic impression (also known as provisional diagnosis);▪ The service is based on individualized determination of need through the state established needs-based criteria;▪ The service is cost effective;▪ The ASAM Criteria are used in the determination of substance use disorder treatment placement/admission and/or continued stay needs; and

Medicaid Provider Manual

	<ul style="list-style-type: none"> ▪ The substance use disorder service is supported by a level of care determination using the six assessment dimensions of the current ASAM Criteria: <ul style="list-style-type: none"> ➢ Withdrawal potential; ➢ Medical conditions and complications; ➢ Emotional, behavioral or cognitive conditions and complications; ➢ Readiness to change; ➢ Relapse, continued use, or continued problem potential; and ➢ Recovery/living environment. <p>This service is limited to those beneficiaries who will benefit from treatment and have been determined to have:</p> <ul style="list-style-type: none"> ▪ An acceptable readiness to change level; ▪ Minimal or manageable medical conditions; ▪ Minimal or manageable withdrawal risks; ▪ Emotional, behavioral and cognitive conditions that will not prevent the beneficiary from benefiting from this level of care; ▪ Minimal or manageable relapse potential; and ▪ A minimally to fully supportive recovery environment.
<p>Allowable Services</p>	<p>Once the above criteria have been satisfied and the beneficiary has demonstrated a willingness to participate in treatment, the following behavioral health services can be provided in the outpatient setting.</p> <ul style="list-style-type: none"> ▪ Individual Assessment: A face-to-face service for the purpose of identifying functional, treatment, and recovery needs of a behavioral health disorder and a basis for formulating the person-centered/individualized treatment planning process. ▪ Individual Treatment Planning: Refer to the Treatment Planning subsection of the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter. ▪ Individual Therapy: Treatment activity designed to reduce maladaptive behaviors, maximize behavioral self-control or restore normalized psychological functioning, reality orientation, re-motivation, and emotional adjustment, thus enabling improved functioning and more appropriate interpersonal and social relationships. Evidence-based practices, such as Integrated Dual Disorder Treatment for Co-Occurring Disorders (IDDT/COD) and Dialectical Behavior Therapy (DBT), are included in this coverage. Individual therapy is provided by a Behavioral Health Professional practicing within their scope of practice and within the guidelines of the Behavioral Health Code Charts and Provider Qualifications document which is posted on the MDHHS website. (Refer to the Directory Appendix for website information.)

Medicaid Provider Manual

- **Group Therapy:** Face-to-face counseling with three or more beneficiaries, and can include didactic lectures, therapeutic interventions/counseling, and other group related activities. Treatment activity designed to reduce maladaptive behaviors, maximize behavioral self-control or restore normalized psychological functioning, reality orientation, re-motivation, and emotional adjustment, thus enabling improved functioning and more appropriate interpersonal and social relationships. Evidence-based practices (such as IDDT/COD and DBT) are included in this coverage. Group therapy is provided by a Behavioral Health Professional practicing within their scope of practice and within the guidelines of the Behavioral Health Code Charts and Provider Qualifications document which is posted on the MDHHS website. (Refer to the Directory Appendix for website information.)
- **Family Therapy:** Family Therapy is therapy for a beneficiary and family member(s), or other person(s) significant to the beneficiary, for the purpose of improving the beneficiary/family function. Family therapy does not include individual psychotherapy or family planning (e.g., birth control) counseling. Family therapy is provided by a Behavioral Health Professional practicing within their scope of practice and within the guidelines of the Behavioral Health Code Charts and Provider Qualifications document which is posted on the MDHHS website. Refer to the Directory Appendix for website information.)
- **Crisis Intervention:** Refer to the Crisis Interventions subsection of the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter.
- **Referral/Linking/Coordinating/Management of Services:** For the purpose of providing adjunct support for ensuring follow-through with identified providers, providing additional support in the community if primary services are to be provided in an office setting, addressing other needs identified as part of the assessment, and/or establishing the beneficiary with another provider and/or level of care. This service may be provided individually or in conjunction with other services based on the needs of the beneficiary.
- **Peer Support Specialist/Recovery Coach and Recovery Support:** For the purpose of providing adjunct support to outpatient services. Refer to the Peer-Delivered or Peer-Operated Support Services subsection of this chapter for additional information.
- **Compliance Monitoring:** For the purpose of identifying abstinence or relapse when it is a part of the treatment plan or an identified part of the treatment program (excludes laboratory drug testing). Also includes tracking the appropriate use of prescribed medications.
- **Early Intervention:** Includes stage-based interventions for beneficiaries with substance use disorders and beneficiaries who may not meet the threshold of abuse or dependence but are experiencing functional/social impairment as a result of use.
- **Detoxification/Withdrawal Monitoring:** For the purpose of preventing/alleviating medical complications as they relate to no longer using a substance.
- **Division of Pharmacologic Therapies/Center for Substance Abuse Treatment (DPT/CSAT) Approved Pharmacological Supports:** Refer to the Treatment (DPT/CSAT) Approved Pharmacological Supports subsection of the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter.

Medicaid Provider Manual

Admission Criteria	<p>Outpatient services should be authorized based on the number of hours and/or types of services that are medically necessary. Reauthorization or continued treatment should take place when it has been demonstrated that the beneficiary is benefiting from treatment but additional covered services are needed for the beneficiary to be able to sustain recovery independently. Reauthorization of services can be denied in situations where the beneficiary has:</p> <ul style="list-style-type: none"> ▪ Not been actively involved in their treatment, as evidenced by repeatedly missing appointments; ▪ Not been participating/refused to participate in treatment activities; or ▪ Continued use of substances and other behavior that is deemed to violate the rules and regulations of the program providing the services. <p>Beneficiaries may also be terminated from treatment services based on these violations.</p>
Level of Care Criteria for Substance Use Disorders	<p>Medically necessary outpatient services for beneficiaries with substance use disorders correspond to the frequency and duration of services established by the ASAM criteria and are referred to as follows:</p> <ul style="list-style-type: none"> ▪ Level 0.5 – Early Intervention ▪ Level 1 – Outpatient ▪ Level 2.1 – Intensive Outpatient ▪ Level 2.5 – Partial Hospitalization Services <p>Outpatient services can include any variety of the covered services and are dependent on the individual needs of the beneficiary. The assessment, treatment plan, and recovery support preparations are the only components that are consistent throughout the outpatient levels of care as each beneficiary must have these as part of the authorized treatment services. As a beneficiary's needs increase, more services and/or frequency/duration of services may be utilized if these are medically necessary. The ASAM criteria correspond with established hours of services that take place during a week.</p> <ul style="list-style-type: none"> ▪ ASAM Level 0.5: Services are not subdivided by the number of hours received during a week. The amount and type of services provided are based on individual needs based on the beneficiary's motivation to change and other risk factors that may be present. ▪ ASAM Level 1: Services from one hour to eight hours during a week. ▪ ASAM Level 2.1: Services from nine to 19 hours in a week. The services are offered at least three days a week to fulfill the minimum nine-hour commitment. ▪ ASAM Level 2.5: Services that are offered 20 or more hours in a week. <p>The medically necessary outpatient services for beneficiaries with a mental illness and/or a concomitant substance use disorder or intellectual/developmental disability correspond with the frequency and duration of the evidenced-based practice, promising practice, or the specialty-focused service provided. The guidelines for these practices, along with the individual needs of the beneficiary, will establish the frequency, duration, and type of treatment service.</p>

5.3.B.7. PEER-DELIVERED OR PEER-OPERATED SUPPORT SERVICES

Peer-delivered or peer-operated support services are programs and services that provide beneficiaries with opportunities to learn and share coping skills and strategies, move into more active assistance and away from passive roles, and to build and/or enhance self-esteem and self-confidence.

Peer specialist and recovery coach services provide individuals with opportunities to support, mentor and assist beneficiaries to achieve community inclusion, participation, independence, recovery, resiliency and/or productivity. Peers are individuals who have a unique background and skill level from their experience in utilizing behavioral health supports and services to achieve their personal goals of community membership, independence and productivity. Peers have a special ability to gain trust and respect of other beneficiaries based on shared experiences and perspectives with disabilities, and with planning and negotiating human services systems.

- Vocational assistance provides support for beneficiaries seeking education and/or training opportunities, finding a job, achieving successful employment activities, and developing self-employment opportunities (reported as skill-building or supported employment).
- Housing assistance provides support locating and acquiring appropriate housing for achieving independent living; finding and choosing roommates; utilizing short-term, interim, or one-time-only financial assistance in order to transition from restrictive settings into independent integrated living arrangements; making applications for Section 8 Housing vouchers; managing costs of room and board utilizing an individual budget; purchasing a home; etc. (reported as Supports Coordination).
- Supports and services planning and utilization assistance provides assistance and partnership in:
 - The person-centered planning process (reported as either Treatment Planning or Supports Coordination);
 - Developing and applying arrangements that support self-determination;
 - Directly selecting, employing or directing support staff;
 - Sharing stories of recovery and/or advocacy involvement and initiative for the purpose of assisting recovery and self-advocacy;
 - Accessing entitlements;
 - Developing health and wellness plans;
 - Developing advance directives;
 - Learning about and pursuing alternatives to guardianship;
 - Providing supportive services during crises;
 - Developing, implementing and providing ongoing guidance for advocacy and support groups;
 - Integration of physical and mental health care; and
 - Developing, implementing and providing health and wellness classes to address preventable risk factors for medical conditions.

Medicaid Provider Manual

Activities provided by peer specialists are completed in partnership with beneficiaries for the specific purpose of achieving increased beneficiary community inclusion and participation, independence, recovery and productivity.

<p>Peer Support Specialist and Recovery Coach Services</p>	<p>Individuals providing Peer Support Services must be able to demonstrate their experience in relationship to the types of guidance, support and mentoring activities they will provide. Individuals providing these services should be those who are generally recognized and accepted to be peers. Beneficiaries utilizing Peer Support Services must freely choose the individual who is providing Peer Support Services.</p> <p>Individuals who are functioning as Peer Support Specialists serving beneficiaries with mental illness must:</p> <ul style="list-style-type: none"> ▪ Have a serious mental illness; ▪ Have received public mental health services in the past or are currently receiving services; ▪ Provide at least 10 hours per week of services described above, with supported documentation written in the IPOS/treatment plan; and ▪ Meet the MDHHS application approval process for specialized training and certification requirements. <p>Individuals who are functioning as a Recovery Coach serving beneficiaries with a substance use disorder must:</p> <ul style="list-style-type: none"> ▪ Have a minimum of two years of recovery from a substance use disorder; ▪ Receive specialized training and certification approved by MDHHS; ▪ Be employed through a substance use disorder treatment program or a Recovery Community Organization under contract with the PIHP; and ▪ Recognize that there are many pathways to recovery.
<p>Drop-In Centers</p>	<p>Peer-Run Drop-In Centers provide an informal, supportive environment to assist beneficiaries with mental illness in the recovery process. If a beneficiary chooses to participate in Peer-Run Drop-In Center services, such services may be included in an IPOS if medically necessary for the beneficiary. Peer-Run Drop-In Centers provide opportunities to learn and share coping skills and strategies, to move into more active assistance and away from passive beneficiary roles and identities, and to build and/or enhance self-esteem and self-confidence. Under no circumstances may Peer-Run Drop-In Centers be used as respite for caregivers (paid or non-paid) or residential providers of beneficiaries.</p> <p>PIHPs must seek approval from MDHHS prior to establishing new drop-in programs. Programs currently approved to provide services by MDHHS through the delivery of Medicaid State Plan, HSW, or additional/1915(i) SPA services do not require re-approval.</p> <p>Proposed drop-in centers will be reviewed against the following criteria:</p> <ul style="list-style-type: none"> ▪ Staff and board of directors of the center are 100% primary consumers; ▪ PIHP actively supports consumers' autonomy and independence in making day-to-day decisions about the program; ▪ PIHP facilitates consumers' ability to handle the finances of the program; ▪ The drop-in center is at a non-CMH site; ▪ The drop-in center has applied for 501(c)(3) non-profit status;

Medicaid Provider Manual

	<ul style="list-style-type: none">▪ There is a contract between the drop-in center and the PIHP or its subcontractor identifying the roles and responsibilities of each party; and▪ There is a liaison appointed by the PIHP to work with the program. <p>Some beneficiaries use drop-in centers anonymously and do not have a drop-in center listed as a service in their IPOS. For those beneficiaries who do have drop-in service specified in their IPOS, it must be documented to be medically necessary and identify:</p> <ul style="list-style-type: none">▪ Goals and how the program supports those goals; and▪ The amount, scope and duration of the services to be delivered. <p>The individual clinical record provides evidence that the services were delivered consistent with the plan.</p>
--	---

5.3.B.8. PREVENTION-DIRECT SERVICE MODEL

Children of Adults with Behavioral Health Disorders/ Integrated Services	<p>Designed to prevent emotional and behavioral disorders among children whose parents are receiving services from the specialty behavioral health service system and to improve outcomes for beneficiaries who are parents. The Integrated Services approach includes assessment and service planning for the beneficiary related to their parenting role and their children's needs. Treatment objectives, services, and supports are incorporated into the IPOS/treatment plan through a person centered planning process for the beneficiary who is a parent. Linking the beneficiary and child to available community services, respite care, and providing for crisis planning are essential components.</p> <p>Provider qualifications:</p> <ul style="list-style-type: none">▪ Mental Health Professional; and/or▪ Substance Abuse Treatment Specialist.
---	---

5.3.B.9. TARGETED CASE MANAGEMENT

Targeted case management is a covered service that assists beneficiaries to design and implement strategies for obtaining services and supports that are goal-oriented and individualized. Services include assessment, planning, linkage, advocacy, coordination and monitoring to assist beneficiaries in gaining access to needed health and dental services, financial assistance, housing, employment, education, social services, and other services and natural supports developed through the person-centered planning process. Targeted case management is provided in a responsive, coordinated, effective and efficient manner focusing on process and outcomes.

Targeted case management services must be available for all Healthy Michigan Plan beneficiaries with a behavioral health disorder who have multiple service needs, have a high level of vulnerability, require access to a continuum of behavioral health services from the PIHP, and/or are unable to independently access and sustain involvement with needed services.

Beneficiaries must be provided choice of available, qualified case management staff upon initial assignment and on an ongoing basis.

Medicaid Provider Manual

Provider Qualifications	<p>Providers must demonstrate the capacity to provide all core requirements specified below and have a sufficient number of staff to meet the needs of the target population. Providers must document initial and ongoing training for case managers related to the core requirements and applicable to the target population served. Caseload size and composition must be realistic for the case manager to complete the core requirements as identified in the IPOS developed through the person-centered planning process.</p> <p>Additionally, providers serving beneficiaries with a substance use disorder must be licensed for outpatient substance use disorder treatment services per the Administrative Rules for Substance Abuse Services, with the case management service category and appropriately accredited through one of the organizations identified in the Substance Abuse Services subsection of the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter. If a program is serving beneficiaries with a co-occurring mental health and substance use disorder, the outpatient license must also have the added service category of "integrated treatment for persons with mental health and substance use disorders". Established targeted case management programs that purport to offer this service for individuals with substance use disorders will be required to seek re-approval of the program by MDHHS when appropriate licensing and accreditation has been obtained. Programs currently approved to provide services for mental health and/or intellectual/developmental disabilities by MDHHS through the delivery of Medicaid State Plan, Habilitation Supports Waiver (HSW), or additional/1915(i) SPA services do not require re-approval.</p>
Determination of Need	<p>The determination of the need for case management must occur at the completion of the intake process and through the person-centered planning process for beneficiaries receiving supports and services. Justification as to whether case management is needed or not must be documented in the beneficiary's case record.</p>
Core Requirements	<p>Targeted case management services must:</p> <ul style="list-style-type: none"> ▪ Assure that the person-centered planning process takes place and that it results in the development of the IPOS/treatment plan; ▪ Assure that the IPOS/treatment plan identifies what supports and services will be provided, who will provide them, and how the case manager will monitor (i.e., interval of face-to-face contacts) the supports and services identified under each goal and objective; ▪ Oversee implementation of the IPOS/treatment plan, including supporting the beneficiary's dreams, goals, and desires for optimizing independence; promoting recovery; and assisting in the development and maintenance of natural supports; ▪ Assure the participation of the beneficiary on an ongoing basis in discussions of their plans, goals, and status; ▪ Identify and address gaps in service provision; ▪ Coordinate the beneficiary's supports and services with all providers, make referrals, and advocate for the beneficiary; ▪ Assist the beneficiary to access programs that provide financial, medical, and other assistance, such as Home Help and Transportation services; ▪ Assure coordination with the beneficiary's primary and other health care providers to assure continuity of care; ▪ Coordinate, and assist the beneficiary in, crisis intervention and discharge planning, including community supports after hospitalization;

Medicaid Provider Manual

	<ul style="list-style-type: none"> Facilitate the transition (e.g., from inpatient to community services, school to work, dependent to independent living) process, including arrangements for follow-up services; Assist the beneficiary with crisis planning; and Identify the process for after-hours contact.
Assessment	The provider must have the capacity to perform an initial written comprehensive assessment addressing the beneficiary's needs/wants, barriers to needs/wants, supports to address barriers, and health and welfare issues. Assessments must be updated when there is significant change in the condition or circumstances of the beneficiary. The IPOS/treatment plan must also reflect such changes.
Documentation	<p>The beneficiary's record must contain sufficient information to document the provision of case management, including the nature of the service, the date, and the location/type of contacts between the case manager and the beneficiary, including whether the contacts were face-to-face. The frequency of face-to-face contacts must be dependent on the intensity of the beneficiary's needs.</p> <p>The case manager must review services at intervals defined in the IPOS/treatment plan. The IPOS/treatment plan shall be kept current and modified when indicated (reflecting the intensity of the beneficiary's health and welfare needs). A beneficiary or their guardian or authorized representative may request and review the IPOS/treatment plan at any time. A formal review of the plan shall not occur less often than annually to review progress toward goals and objectives and to assess beneficiary satisfaction.</p>
Monitoring	<p>The case manager must determine, on an ongoing basis, if the supports and services have been delivered and if they are adequate to meet the needs/wants of the beneficiary. Frequency and scope (face-to-face and telephone) of case management monitoring activities must reflect the intensity of the beneficiary's health and welfare needs identified in the IPOS/treatment plan.</p> <p>Targeted case management shall not include direct delivery of ongoing day-to-day supports and/or training or provision of Medicaid services. Targeted case managers are prohibited from exercising the funding agency's authority to authorize or deny the provision of services. Targeted case management shall not duplicate services that are the responsibility of another program.</p>
Staff Qualifications	A primary case manager for beneficiaries with a mental health or intellectual/developmental disability must be a Qualified Mental Health Professional (QMHP) or Qualified Intellectual Disabilities Professional (QIDP); or, if the case manager has only a bachelor's degree but is without the specialized training or experience, they must be supervised by a QMHP or QIDP who does possess the training or experience. A primary case manager for beneficiaries with a substance use disorder must be appropriately trained and supervised by a SATS. For beneficiaries with concomitant behavioral health disorders, the case manager must have the appropriate training or experience and/or be supervised by someone who does possess the training or experience for the concomitant disorder in question.

Medicaid Provider Manual

SECTION 1 – GENERAL INFORMATION

This chapter applies to audiology providers, hearing aid dealers, and cochlear implant manufacturers. Information contained in this chapter is to be used in conjunction with other chapters of this manual, including the Billing & Reimbursement chapters, as well as the related procedure code databases and fee schedules located on the Michigan Department of Health and Human Services (MDHHS) website. (Refer to the Directory Appendix for website information.)

Medicaid covers audiology services and devices, including hearing tests, diagnostic services, auditory rehabilitation, hearing aids, cochlear implants, and bone anchored hearing devices (BAHDs), when ordered/referred by a Medicaid enrolled physician or qualified non-physician practitioner (i.e., physician assistant (PA) or advanced practice registered nurse (APRN)). Medicaid covers the least costly alternative that meets the beneficiary's medical need for medical supplies, durable medical equipment, or orthotics/prosthetics.

The term Medicaid throughout this chapter refers to all programs administered by MDHHS unless specifically stated otherwise. Providers should refer to the Children's Special Health Care Services chapter of this manual for information specific to Children's Special Health Care Services (CSHCS)-only beneficiaries.

1.1 PROVIDER REQUIREMENTS

1.1.A. LICENSED AUDIOLOGISTS

Licensed audiologists may enroll with Medicaid for reimbursement of audiology and hearing aid services. Out-of-state audiologists must be licensed and/or certified by the appropriate standard-setting authority in the state they are practicing. (Refer to the Out of State/Beyond Borderland Providers subsection of the General Information for Providers chapter for more information.)

Services performed by licensed audiologists must be provided at the service/practice address identified on the Medicaid provider enrollment application or may be provided to nursing facility residents at a Medicaid-enrolled nursing facility.

1.1.B. COCHLEAR IMPLANT MANUFACTURERS

Cochlear implant manufacturers may enroll with Medicaid for reimbursement of cochlear implant and BAHDs, parts, accessories, and repairs. Manufacturers must be licensed in the state in which they conduct business if that state requires licensure.

1.1.C. COMPREHENSIVE OUTPATIENT REHABILITATION FACILITIES AND OUTPATIENT REHABILITATION AGENCIES

Comprehensive Outpatient Rehabilitation Facilities (CORFs) and Outpatient Rehabilitation Agencies (Rehab Agencies) may enroll with Medicaid for reimbursement of audiology services provided by qualified professionals. All CORFs and Rehab Agencies must provide proof of Medicare certification when enrolling in Medicaid.

Medicaid Provider Manual

Services must be provided at the service/practice address identified on the provider enrollment application or may be provided to nursing facility residents at a Medicaid-enrolled nursing facility.

1.1.D. HEARING AID DEALERS

Hearing aid dealers licensed in the state of Michigan and conforming to the standards of practice described in the current Michigan Occupational Code (Act 299 of 1980, Article 13) may enroll with Medicaid for reimbursement of hearing aid devices and services. This provider type must enroll as a Facility/Agency/Organization with a Type 2 (Organization) Billing National Provider Identifier (NPI).

1.1.E. HEARING CENTERS

Freestanding hearing centers may enroll with Medicaid for reimbursement of audiology services. The freestanding hearing center must not be part of, or owned by, a hospital, CORF, Rehab Agency, or university graduate education program.

1.1.F. INDEPENDENT DIAGNOSTIC TESTING FACILITIES

Medicare certified Independent Diagnostic Testing Facilities (IDTFs) may enroll with Medicaid for reimbursement of audiology related diagnostic testing services. The IDTF must be an independent facility not associated with a physician's office or hospital. Refer to the Independent Diagnostic Testing Facilities and Portable X-ray Suppliers chapter for information and requirements related to IDTFs.

1.1.G. MEDICAL SUPPLIER

Medical Suppliers may enroll with Medicaid for reimbursement of disposable hearing aid batteries. Refer to the Medical Supplier chapter for information and requirements related to Medical Suppliers.

1.1.H. OUTPATIENT HOSPITAL

Audiology services may be provided to beneficiaries in the outpatient hospital.

1.1.I. PHYSICIANS AND CLINICS

A physician, Federally Qualified Health Center, Rural Health Clinic, Tribal Health Center, or Local Health Department that provides hearing services may enroll with Medicaid for reimbursement.

1.1.J. UNIVERSITY AFFILIATED AUDIOLOGY GRADUATE EDUCATION PROGRAMS

University affiliated audiology graduate education programs accredited by the American Speech-Language-Hearing Association's (ASHA) Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) or doctor of audiology programs accredited by the American Academy of Audiology (AAA) Accreditation Commission for Audiology Education (ACAE) may enroll with Medicaid for reimbursement of audiology

Medicaid Provider Manual

services provided by qualified professionals. The university program must be freestanding and not part of, or owned by, a hospital, CORF, or Rehab Agency. All university programs must provide proof of their current ASHA-CAA or AAA-ACAE when enrolling in Medicaid.

1.1.K. SPEECH-LANGUAGE PATHOLOGISTS

Speech-Language Pathologists (SLPs) may enroll with Medicaid for reimbursement of audiological rehabilitation and speech-language therapy services. SLPs must possess a current license and/or be certified by the appropriate standard-setting authority in the state in which they are practicing. Refer to the Therapy Services chapter for information and requirements related to SLPs.

1.2 HEALTHCARE COMMON PROCEDURE CODING SYSTEM CODES, PARAMETERS AND MODIFIERS

Providers should refer to the current edition of the Current Procedural Terminology (CPT) or Healthcare Common Procedure Coding System (HCPCS) manuals published by the American Medical Association (AMA) for the appropriate procedure code to use when billing Medicaid. The descriptor assigned to a code represents the definition of the item/service that can be billed using that code. If no established procedure code adequately describes the item, use the appropriate Not Otherwise Classified (NOC) HCPCS procedure code. All NOC codes require prior authorization (PA).

For specifics regarding the HCPCS and CPT codes used to denote covered services, refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers chapter or the Medicaid Code and Rate Reference tool for more information. (Refer to the Directory Appendix for website information.)

The "LT" or "RT" modifier must be reported for all earmolds, sound processors, devices (including monaural hearing aids, BAHDS, and cochlear implants), and monaural dispensing services to designate either the left or right side of the body. When the same service is provided for both the left and right ears on the same date of service (DOS), the service should be reported on two separate claim lines with the appropriate modifier on each line.

1.3 DOCUMENTATION IN BENEFICIARY FILE

Hearing services providers must maintain all applicable documentation in the beneficiary's file for seven years. For audit purposes, the beneficiary's medical record must substantiate the medical necessity of the item or service supplied.

1.4 CSHCS REQUIREMENTS

The following information is regarding beneficiaries who are enrolled in CSHCS only. These requirements do not apply to services provided to Medicaid-only or dual Medicaid/CSHCS beneficiaries.

Once a beneficiary is enrolled in the CSHCS program for a condition that requires audiology services, a pediatric subspecialist is authorized by CSHCS to serve the beneficiary. CSHCS does not cover audiology services that are unrelated to the beneficiary's qualifying diagnosis. Prescriptions for hearing devices and supplies must be signed by the authorized subspecialist.

Medicaid Provider Manual

The pediatric subspecialist coordinates hearing treatment and services relating to the beneficiary's CSHCS qualifying diagnosis. However, a diagnostic evaluation by an audiologist does not require a referral by the pediatric subspecialist. Before billing for audiology services, the enrolled provider(s) must verify that they have been authorized to provide services to the beneficiary. (Refer to the Children's Special Health Care Services chapter for further CSHCS information.)

1.5 COPAYMENTS

A copayment for a hearing aid may be required for beneficiaries age 21 years and older. Current copayment amounts are listed on the MDHHS website. (Refer to the Directory Appendix for website information.)

When calculating reimbursement, Medicaid deducts the copayment from the amount approved, when applicable. If the provider deducts the copayment from their claim, an underpayment results. Addition of the copayment amount to the acquisition cost is not allowed.

Refer to the Billing Beneficiaries section of the General Information for Providers chapter of this manual for additional information regarding copayment requirements.

1.6 PRACTITIONER SIGNATURES

In all documentation requiring a signature, the signature must be handwritten by the practitioner or submitted electronically. A stamped signature, second party signature, or statement of "signature on file" will not be accepted. An electronic signature must specifically identify and authenticate the individual practitioner. This applies to signatures for ordering, referring, and treating practitioners.

1.7 REIMBURSEMENT

Reimbursement is based on the provider's enrollment type. Reimbursement methodologies include the MDHHS Outpatient Prospective Payment System (OPPS) and Medicaid fee screens. (Refer to the Medicaid Code and Rate Reference tool in the Community Health Automated Medicaid Processing System [CHAMPS] or the MDHHS Hearing Services and Hearing Aid Dealers Fee Schedules on the MDHHS website.) For NOC codes or covered codes without established fee screens, the authorized reimbursement amount is indicated on the approved PA request.

The date of delivery of the hearing aid must be reported as the DOS. When there is a loss of eligibility or a change in eligibility status between the time a hearing aid is ordered and delivered, the DOS should be reported as the order date rather than the delivery date.

1.8 OTHER INSURANCE

If the beneficiary has another insurance plan (e.g., Medicare or commercial insurance) and the service is a covered benefit, the provider must follow the requirements of the other insurance plan(s) including, but not limited to, prescription, PA, and provider qualifications. (Refer to the Coordination of Benefits chapter for more information.)

SECTION 2 – COVERAGE OVERVIEW

2.1 SERVICE PROVIDERS

Audiology services may be provided by Medicaid enrolled, properly credentialed/licensed or appropriately supervised providers in the following settings:

- Hospital
- Hearing Center
- Comprehensive Outpatient Rehabilitation Facility (CORF)
- Outpatient Rehabilitation Agency
- CAA or AAA Accredited University Affiliated Audiology Graduate Education Program
- Licensed Audiologist Office/Clinic
- Physician's Office/Clinic including, but not limited to, a Federally Qualified Health Center, Rural Health Clinic, Tribal Health Center, or Local Health Department.
- Independent Diagnostic Testing Facility

Audiology services and hearing aid evaluations may be performed by the following Medicaid enrolled, properly credentialed/licensed or appropriately supervised providers:

- Licensed Audiologist
- Supervised Limited License Audiologist completing their post graduate clinical experience or having completed all requirements but has not obtained a full license
- Audiology Student completing their clinical experience under the direct supervision of (i.e., in the presence of) a licensed audiologist

Hearing aid selection, fitting, and conformity evaluations may be performed by the following Medicaid enrolled, properly credentialed/licensed or appropriately supervised providers:

- Licensed Audiologist
- Supervised Limited License Audiologist completing their post graduate clinical experience or having completed all requirements but has not obtained a full license
- Audiology Student completing their clinical experience under the direct supervision of (i.e., in the presence of) a licensed audiologist
- Hearing Aid Dealer

2.2 DIAGNOSTIC AND AMPLIFICATION SERVICES

The following diagnostic and amplification services may be provided to all eligible beneficiaries:

- Air and/or bone conduction audiogram
- Basic hearing evaluation (includes pure-tone audiometry, speech audiometry and report)

Medicaid Provider Manual

- Diagnostic audiologic evaluations
- Earmold fabrication
- Electroacoustic analysis of hearing aid
- Aided performance assessment with the beneficiary's hearing aid
- Hearing aid evaluation and selection
- Hearing aid orientation/training or hearing therapy

Standards of practice must conform to those published in the current version of ASHA's Preferred Practice Patterns for the Profession of Audiology or AAA's Standards of Practice for Audiology. Audiologic test equipment and hearing aid test equipment used must conform to current, applicable American National Standards Institute (ANSI) criteria.

2.3 NEWBORN HEARING SERVICES

All Medicaid-covered newborns must be screened using the auditory brainstem response (ABR) method and/or the evoked otoacoustic emissions (EOAE) method. Audiology newborn hearing screening tests must be performed by staff trained in the screening of infant hearing via the ABR or EOAE method. Medicaid requires appropriate interaction with parents/guardians and the medical team, and the proper reporting of hearing results with the MDHHS monitoring program.

Coverage for the EOAE and ABR newborn hearing screenings is included within the applicable diagnosis related group (DRG) payment for the newborn's inpatient stay. If the birthing facility is not equipped for ABR or EOAE, the child's APRN, physician, or PA must refer the newborn to an audiologist or hearing center for screening prior to one month of age.

Equipment must be available to audiologists providing a comprehensive diagnostic evaluation to infants less than six months of age. Infant evaluation services include, but are not limited to:

- Tone Burst ABR or Auditory Steady State Response (ASSR) Test
- Click ABR
- Bone Conduction ABR
- High Frequency Acoustic Immittance Measures
- Otoacoustic Emissions

Equipment must be available to audiologists providing hearing aid evaluation, selection, and follow-up services to infants less than six months of age. Infant hearing aid services include, but are not limited to:

- Infant Predictive Method (e.g., Desired Sensation Level)
- Real-Ear to Coupler Difference

Refer to the Early and Periodic Screening, Diagnosis and Treatment chapter for additional information.

Medicaid Provider Manual

2.4 HEARING AID SERVICES AND SUPPLIES

Medicaid covers hearing aid devices, repairs, earmolds, batteries, supplies, and accessories provided by a Medicaid enrolled licensed hearing aid dealer or audiologist. Batteries may also be provided by an enrolled Medical Supplier.

Hearing aids are only a benefit when:

- The recommended hearing aid meets United States Food and Drug Administration (FDA) and Federal Trade Commission (FTC) requirements;
- Medical documentation indicates that the conductive hearing loss is not transient in nature due to a treatable medical middle ear effusion or that surgery is not planned within the next year;
- The beneficiary has not received a Medicaid covered hearing aid(s) within the last five years;
- A manufacturer's warranty of 24 months covering parts and labor and a 12-month warranty covering loss or damage are included. These warranties apply to all hearing aids, including those not covered under the MDHHS volume purchase contract.

MDHHS participates in a volume purchase contract agreement for hearing aid devices. Providers must purchase hearing aids directly from the manufacturers that are part of the MDHHS volume purchase contract whenever possible. The Hearing Aid Contract Vendor listing is maintained on the MDHHS website. (Refer to the Directory Appendix for website information.) Providers should refer to the Hearing Aids section of this chapter for complete information on hearing aid services and devices.

2.5 ASSISTIVE LISTENING DEVICES

An Assistive Listening Device (ALD) is a benefit when the patient management of a personal hearing aid is considered unrealistic or the frequency specific audiometric data cannot be obtained in each ear. The ALD is provided for situations involving one-on-one conversation and is not designed primarily for recreational or educational use. An ALD is covered when Medicaid has not covered any hearing aid(s) or ALD dispensed to the beneficiary within the last three years. Providers should refer to the Other Hearing Devices section, Assistive Listening Devices subsection of this chapter for additional information.

2.6 SPEECH SERVICES

Evaluation and treatment of speech, language, cognition, voice, and auditory processing is covered when performed by a SLP. Refer to the Therapy Services chapter for information and requirements related to speech therapy services.

2.7 AUDITORY REHABILITATION

Auditory rehabilitation is covered when medically necessary for beneficiaries who have received an implanted hearing device, hearing aid, or who have pre-lingual or post-lingual hearing loss. Auditory rehabilitation services are designed to optimize the benefit provided by the hearing device and improve the communication relationships affected by the beneficiary's loss of hearing. Aural rehabilitation focuses on auditory signal utilization, speech perception, and communication and listening skills development.

Auditory rehabilitation can be provided by a licensed audiologist or SLP who has training and expertise in the procedures. Evaluations for auditory rehabilitation may be provided up to two times per year, and a

Medicaid Provider Manual

maximum of 36 visits per year of aural rehabilitation are allowed. SLPs should refer to the Therapy Services chapter for documentation requirements. If additional visits are needed, PA is required.

2.8 COCHLEAR IMPLANTS

Cochlear implantation and associated mapping/calibration are covered and reimbursable under Medicaid and CSHCS programs for eligible beneficiaries using FDA approved implants. Cochlear implants are covered with PA for beneficiaries with pre- or post-lingual deafness who meet the implantation criteria. Providers should refer to the Other Hearing Devices section, Cochlear Implants subsection of this chapter for complete information.

2.9 BONE ANCHORED HEARING DEVICES

Medicaid covers FDA approved implantable and non-implantable BAHDs as an assistive hearing instrument for those who can benefit when there is no other suitable aid. Beneficiaries must have a unilateral or bilateral conductive or mixed hearing loss, or a unilateral profound sensorineural hearing loss. Providers should refer to the Other Hearing Devices section, Bone Anchored Hearing Devices subsection of this chapter for additional information.

Medicaid Provider Manual

SECTION 3 – PRIOR AUTHORIZATION

PA is required for certain services before the services are rendered. To determine which service requires PA, refer to the prior authorization subsections throughout this chapter and the Medicaid Code and Rate Reference tool. (Refer to the Directory Appendix for website information.)

PA is required for the following situations:

- Services or devices for which the beneficiary does not meet the Medicaid Standards of Coverage as outlined in this policy
- Any hearing aids that are not covered under the MDHHS volume purchase contract
- ALDs
- Cochlear implant devices or processors (unilateral or bilateral)
- BAHDS or processors (bilateral only)
- Services and items that exceed quantity limits, frequency limits, or established fee screens
- Use of a NOC code

3.1 PRIOR AUTHORIZATION FORM AND COMPLETION INSTRUCTIONS

Requests for PA must be submitted on the Special Services Prior Approval-Request/Authorization form (MSA-1653-B). (Refer to the Forms Appendix or the MDHHS website for a copy of the form.) Medical documentation (e.g., medical clearance, audiogram, and hearing aid recommendation from an audiologist) must accompany the MSA-1653-B.

Providers requesting PA for items without an established fee screen must also include a copy of the manufacturer's invoice that lists the acquisition cost for the item. Manufacturer quotes or dealer list prices are not accepted as documentation of the cost. Modified manufacturer invoices will not be accepted. If the manufacturer's invoice is not included with the initial PA request, the MDHHS determination letter will indicate an approved fee of \$0.01 for PA purposes; the reimbursement fee will be updated once the actual invoice is submitted to MDHHS for pricing.

The information on the MSA-1653-B must be:

- Typed – All information must be clearly typed in the designated boxes of the form;
- Thorough – Complete information, including manufacturer, model, and style of the hearing device requested (if applicable), and the appropriate HCPCS procedure codes with applicable modifiers must be provided on the form. The MSA-1653-B and all documentation must include the beneficiary's name and **mihealth** card identification (ID) number, provider name, address, and National Provider Identification (NPI) number.

A sample of the MSA-1653-B with additional instructions is available in the Forms Appendix of this manual.

For all Medicaid Fee-for-Service (FFS) beneficiaries, the MSA-1653-B must be mailed or faxed to the MDHHS Program Review Division. Providers can check the status of a PA request in CHAMPS or by

Medicaid Provider Manual

contacting the MDHHS Program Review Division via telephone. (Refer to the Directory Appendix for website and contact information.)

PA requests may also be submitted electronically via FFS Direct Data Entry (DDE) in CHAMPS. (Refer to the General Information for Providers chapter of this manual for additional information.) A copy of the MSA-1653-B must be attached to each electronic PA request.

A copy of the PA determination letter must be retained in the beneficiary's medical record.

3.2 RETROACTIVE PRIOR AUTHORIZATION

Hearing services or devices provided before PA is requested will not be covered unless the beneficiary was not eligible on the DOS and a subsequent eligibility determination was made retroactive to the DOS. If the MDHHS eligibility file does not show that retroactive eligibility was approved, then the request for retroactive PA will be denied.

3.3 BENEFICIARY ELIGIBILITY

Approval of a service on the MSA-1653-B confirms that the service is authorized for the beneficiary. Approval of a PA request does not guarantee beneficiary eligibility or payment. To assure payment, it is recommended providers verify the beneficiary's eligibility on the DOS. Providers should refer to the Beneficiary Eligibility chapter of this manual for additional information.

3.4 REIMBURSEMENT AMOUNTS

Many items have established fee screens that are published in the MDHHS Hearing Services or Hearing Aid Dealers Fee Schedules. For NOC codes and all codes without established fee screens, the approved reimbursement amount is indicated on the authorized MSA-1653-B.

3.5 BILLING AUTHORIZED SERVICES

After PA is issued, the information (e.g., PA number, HCPCS/CPT code, modifier, and quantity) that was approved must match the information submitted on the claim form. (Refer to the Billing & Reimbursement chapters of this manual for complete billing instructions.)

Medicaid Provider Manual

SECTION 4 – HEARING AIDS

4.1 DEFINITIONS

The following definitions are used for purposes of administering and clarifying Medicaid coverages and limitations for hearing aid dealers:

Hearing Aid	A hearing aid is a wearable instrument or device designed to deliver amplified sound in order to compensate for a hearing loss. Models include body worn, behind the ear, in the ear, in the canal, and bone conduction. The hearing aid usually consists of a microphone, an amplifier, and a receiver.
Contralateral Routing System Hearing Aid	A hearing aid with a microphone worn on an unaidable ear with a receiver or additional microphone worn on the better ear.
Digital Hearing Aid	A hearing aid that uses digitized sound processing (DSP) to convert sound waves into digital signals.

4.2 COVERED SERVICES AND ITEMS

Medicaid covers the following services and items when medically necessary and provided by a licensed hearing aid dealer, hearing center, or audiologist.

- Hearing aids and delivery
- Hearing aid repairs and modifications
- Replacement earmolds
- Hearing aid supplies and accessories
- Replacement of hearing aid batteries
- Assistive listening devices (ALDs)

Disposable hearing aid batteries may also be provided by a medical supplier.

4.3 NONCOVERED SERVICES AND ITEMS

Noncovered services and items include, but are not limited to, the following:

- Hearing aids that do not meet FDA requirements
- Spare equipment (e.g., an old hearing aid in working condition for back-up use in emergencies)
- Personal FM Amplification Systems
- Alerting devices
- Hearing aids requested solely or primarily for the elimination of tinnitus
- Equipment requested solely or primarily for cosmetic reasons or package features relative to cosmetics

Medicaid Provider Manual

- Devices (i.e., hearing aids and non-surgical BAHDs) ordered for eligible beneficiaries but delivered more than 30 days after a beneficiary became ineligible for Medicaid
- Services rendered or devices dispensed before PA is approved
- Services or devices required to be provided by another public agency or program (e.g., school-based services, etc.)

NOTE: Federal EPSDT regulations require coverage of medically necessary treatment for children under 21 years of age, including medically necessary habilitative services. Refer to the Early and Periodic Screening, Diagnosis and Treatment chapter for additional information.

4.4 HEARING AID CONTRACT

MDHHS participates in a volume purchase contract agreement for hearing aids. Providers must purchase hearing aids directly from the manufacturers that are part of the MDHHS volume purchase contract whenever possible. The Hearing Aid Contract Vendor listing is maintained on the MDHHS website. (Refer to the Directory Appendix for website information.) Providers must bill and are reimbursed the contract price for the hearing aid which cannot be further reduced or altered.

4.5 MEDICAL CLEARANCE

A medical clearance is a written statement signed by the physician, physician assistant, or advanced practice registered nurse indicating that:

- A medical evaluation was performed within six months prior to the beneficiary obtaining a hearing aid; and
- There are no contraindications to the use of a hearing aid.

For Medicaid beneficiaries under age 18, a Medicaid enrolled otolaryngologist or other appropriate specialty physician must complete the medical clearance.

For Medicaid beneficiaries age 18 years or older, the medical clearance may be completed by a Medicaid enrolled primary care provider, otolaryngologist, or other appropriate specialty care provider.

The medical clearance must include the beneficiary's name, birth date, address, **mihealth** card identification (ID) number, the services provided, the DOS, the provider's name, and provider NPI number.

For beneficiaries eligible for CSHCS coverage only, the following additional requirements apply:

- The hearing aid prescription must be related to the CSHCS qualifying diagnosis.
- The otolaryngologist signing the medical clearance must be a CSHCS enrolled provider.

4.6 EVALUATION AND SELECTION

Audiologists may perform hearing aid evaluations and selections with medical concurrence from the primary care provider, otolaryngologist, or other appropriate specialty care provider. After the appropriate audiologic procedures have been completed and it is determined that the beneficiary requires a hearing aid, a recommendation for the hearing aid must be completed and signed by the audiologist.

Medicaid Provider Manual

The recommendation, as well as a copy of the medical clearance, is given to the beneficiary along with a list of Medicaid-enrolled hearing aid dealers in the area. Beneficiaries must be given freedom of choice of any Medicaid-enrolled hearing aid dealer when obtaining their hearing aid, even when the licensed audiologist is also enrolled with Medicaid to dispense hearing aids.

4.7 MEASURABLE BENEFITS/CONFORMITY EVALUATIONS

Any delivered hearing aid is expected to demonstrate measurable benefit, established either at the time of fitting or follow-up. Benefit may be established by one, or a combination of, commonly used procedures, including:

- Measures of aided hearing and understanding of speech;
- Functional gain measures;
- Probe-microphone measurements; and/or
- (Minimally) the subjective impressions of the beneficiary, the beneficiary's family members or guardian, or attending staff.

Benefit may be demonstrated in cases of severe to profound hearing loss by at least one of the following measures:

- Improved functional or insertion gain in the speech frequencies.
- Increased awareness of speech and/or environmental sounds.
- Improved word recognition performance at average or slightly raised conversational levels with or without visual cues.
- Beneficiary's or family member's subjective report of speech benefit in everyday listening situations.

Hearing aid dealers must instruct beneficiaries to return to the evaluating audiologist for the conformity evaluation to allow for the return of the device, if necessary, within 90 days of the hearing aid dispensing date. When a delivered hearing aid does not provide benefit, as defined above, providers are expected to return it to the manufacturer within 90 days for modifications, remake, exchange, or credit as recommended by the evaluating audiologist. The hearing aid dealer must notify the beneficiary of this when the hearing aid is dispensed.

All full or partial refunds made by a manufacturer to the hearing aid dealer when a hearing aid is returned within the 90-day trial period and replaced with a less costly aid must be returned to Medicaid via a claim replacement.

A conformity evaluation for verification and validation of a hearing aid's benefit and performance provided on the same date of service as the dispensing fee will not be separately reimbursed. Hearing aid conformity evaluations for beneficiaries with an existing hearing aid may be provided up to a maximum of two times per year without PA.

4.8 DISPENSING FEE

The hearing aid dealer may bill a dispensing fee when providing direct patient contact in delivering, fitting, and orientating beneficiaries on the use and care of the hearing aid. This fee applies to both

Medicaid Provider Manual

digital or contralateral routing system models purchased through the Medicaid volume purchase contract agreement and noncontracted hearing aids. The dispensing fee covers all services and products listed below for a period of 90 days unless otherwise noted.

- Hearing aid delivery. Packing, shipping, and handling are provided by the hearing aid manufacturer at no cost to the dispensing provider.
- Initial and follow-up care for hearing aid set up and management. Services include, but are not limited to, electroacoustic assessments, programming or setting of internal device controls, device inspections, cleanings, physical fit adjustments, and accessory pairing.
- Initial and follow-up hearing aid education. Services include, but are not limited to, orientation, education, and instruction on use, care, and maintenance of the device.
- One 90-day supply of disposable batteries per aid (non-rechargeable models).
- All components necessary for the hearing aid's operation. These are generally provided by the hearing aid manufacturer and include items such as rechargeable batteries, chargers, cords, tubing, connectors, or receivers.
- A 90-day trial/adjustment period with exchange/return privilege. This warranty is provided by the hearing aid manufacturer at no cost to the dispensing provider.

The dispensing fee should be billed separately from the hearing aid using the appropriate HCPCS code. Components of the dispensing fee are not to be billed separately. Earmolds and hearing aid supplies and accessories not provided by the manufacturer may be billed separately from the dispensing fee.

Providers may not receive a dispensing fee for hearing aids returned during the 90-day trial period. Any dispensing fees paid to providers for hearing aids subsequently returned during the 90-day trial period must be returned to MDHHS via a claim replacement. If the hearing aid is returned, MDHHS will reimburse for the hearing aid fitting/checking visit.

4.9 MANDATORY MANUFACTURER'S WARRANTY

Medicaid requires that all hearing aids include a manufacturer's equipment warranty that includes parts and labor for all repairs and modifications for a 24-month period, and loss and/or damaged replacements for a 12-month period. This warranty must be provided at no cost to the beneficiary or to Medicaid. Manufacturers may not charge for packing, shipping, invoicing, postage, insurance, or handling while the hearing aid is under warranty.

Repairs required after the hearing aid repair warranty has expired are reimbursed based on the contracted rate and will have a new warranty period specified per the contract. The manufacturer is also responsible for all shipping costs on non-warranty equipment repairs.

4.10 HEARING AID FITTING AND CHECKING SERVICES

Follow-up hearing aid fitting and checking services performed by a hearing aid dealer or audiologist are covered services after the hearing aid's 90-day dispensing fee period. Hearing aid fitting and checking visits may include, but are not limited to, all the following services: device inspection, maintenance and cleaning, reprogramming or setting of internal device controls, listening checks, device counseling/training/education, and physical fit adjustments. Individual services included in the fitting and

Medicaid Provider Manual

checking visit or device handling, pick up, and drop off fees are not to be charged separately. Hearing aid fitting and checking visits may be billed up to a maximum of two times per year without PA.

4.11 REPLACEMENT

Medicaid covers one (monaural) or two (binaural) hearing aids once every five years. PA is required when a hearing aid is needed more frequently.

If a hearing aid is lost or damaged beyond repair within five years of the dispensing date and the 12-month loss and damage warranty has expired, Medicaid will pay for the replacement of the aid **one** time. Beneficiaries age 21 years and under may be eligible for additional replacements. PA is required.

Medicaid will not replace a hearing aid when lost or damaged beyond repair as a result of misuse or abuse by the beneficiary or caregiver. If loss or damage to a hearing aid is the result of theft or car accident, attempts should be made to collect the full or partial payment from the third party's insurance company, if applicable. A copy of the police or fire report must be submitted with the MSA-1653-B. All liable insurance coverage should be sought before requesting replacement by Medicaid.

4.12 DIGITAL HEARING AIDS

4.12.A. STANDARDS OF COVERAGE – UNILATERAL HEARING LOSS

Age Under 21 Years	<p>A digital monaural hearing aid is covered for beneficiaries with unilateral hearing loss documented by one of the following:</p> <ul style="list-style-type: none">▪ An audiogram showing hearing loss of 25 dB HL or greater using the four-frequency average of 500, 1000, 2000 and 4000 Hz in the ear to be aided with normal hearing in the better ear. Normal hearing is defined as a Pure Tone Average (PTA) air-conduction hearing threshold of better than or equal to 20 dB HL; or▪ Results of a complete diagnostic audiological evaluation (e.g. ABR, EOAE, sound field testing, pure tone audiometry, or any combination of these) indicating a hearing loss of 25 dB HL or greater.
Age 21 Years or Over	<p>A digital monaural hearing aid is covered when all the following apply:</p> <ul style="list-style-type: none">▪ Unilateral hearing loss documented by an audiogram showing a hearing loss of 30 dB HL or greater using the four-frequency average of 500, 1000, 2000 and 4000 Hz in the ear to be aided with normal hearing in the better ear. Normal hearing is defined as a PTA air-conduction hearing threshold of better than or equal to 20 dB HL;▪ A Hearing Handicap Inventory for Adults, Hearing Handicap Inventory for the Elderly, Abbreviated Profile of Hearing Aid Benefit, or similar inventory indicates a need for amplification; and▪ Hearing loss interferes with or significantly restricts functional communication, routine activities of daily living, education, and/or employment.

Medicaid Provider Manual

4.12.B. STANDARDS OF COVERAGE – BILATERAL HEARING LOSS

Age Under 21 Years	A digital monaural or binaural hearing aid is covered for beneficiaries with bilateral hearing loss documented by one of the following: <ul style="list-style-type: none">▪ An audiogram showing a hearing loss of 25 dB HL or greater in both ears using the four-frequency average of 500, 1000, 2000 and 4000 Hz; or▪ Results of a complete diagnostic audiological evaluation (e.g. ABR, EOAE, sound field testing, pure tone audiometry, or any combination of these) indicating a hearing loss of 25 dB HL or greater.
Age 21 Years or Over	A digital monaural or binaural hearing aid is covered when all the following apply: <ul style="list-style-type: none">▪ Bilateral hearing loss documented by an audiogram showing hearing loss of 30 dB HL or greater in both ears using the four-frequency average of 500, 1000, 2000, and 4000 Hz or the two-frequency average of 2000 and 4000 Hz; and▪ Hearing loss interferes with or significantly restricts functional communication, routine activities of daily living, education, and/or employment.

4.12.C. PRIOR AUTHORIZATION REQUIREMENTS

PA is not required for either monaural or binaural digital hearing aids included in the MDHHS volume purchase contract if all other hearing aid requirements are met and restrictions, i.e., frequency of replacement, are not exceeded.

PA is required for the following:

- Any hearing aid not included in the MDHHS volume purchase contract
- Replacement aids within five years

All Ages	For beneficiaries of all ages, the following documentation must be submitted with the MSA-1653-B: <ul style="list-style-type: none">▪ Audiological evaluation and assessment results, signed and dated by the audiologist within the previous six months, demonstrating the specific standards of coverage have been met (i.e., audiogram and amplification inventory).▪ A medical clearance signed and dated by the primary care or specialty provider within six months prior to prescribing the hearing aid.▪ Recommended manufacturer, model, and style of hearing aid.▪ For hearing aids not covered under the MDHHS volume purchase contract, documentation from the manufacturer showing invoice price, discounts, and shipping and handling charges.▪ If applicable, documentation indicating whether the child is receiving deaf or hard of hearing services from the educational system.
-----------------	--

Medicaid Provider Manual

Age 21 Years or Over	<p>In addition to the above documentation, providers must submit the following for beneficiaries 21 years or older:</p> <ul style="list-style-type: none">Documentation demonstrating hearing loss interferes with or significantly restricts functional communication, routine activities of daily living, education, and/or employment.
-----------------------------	---

4.12.D. DOCUMENTATION

Applicable documentation to be maintained in the beneficiary record includes:

- Audiological evaluation and assessment results, signed and dated by the audiologist within the previous six months, demonstrating the specific standards of coverage have been met (i.e., audiogram and amplification inventory);
- A medical clearance signed and dated by the primary care provider or otolaryngologist within six months prior to prescribing the hearing aid;
- Recommendation of the make, model, and type of hearing aid;
- For hearing aids not covered under the MDHHS volume purchase contract, a copy of the manufacturer's invoice showing the hearing aid model, serial number, invoice price, applicable discounts, and shipping and handling charges; and
- If applicable, documentation indicating whether the child is receiving deaf or hard of hearing services from the educational system including, but not limited to, letters of support from the classroom teacher, the deaf or hard of hearing teacher consultant, and/or the educational audiologist.

4.12.E. PAYMENT RULES

Most items have established fee screens that are published in the MDHHS Hearing Aid Dealers Fee Schedule or MDHHS volume purchase contract. For codes without established fee screens, the approved reimbursement amount is indicated on the approved PA request.

4.13 CONTRALATERAL ROUTING SYSTEMS

4.13.A. STANDARDS OF COVERAGE

All Ages	<p>A contralateral routing hearing aid is covered when one of the following applies:</p> <ul style="list-style-type: none">An audiogram indicates profound hearing loss in the poorer ear (unaidable) as demonstrated by greater than 90 dB HL and indicates thresholds less than or equal to 30 dB HL in the better ear using the four-frequency average of 500, 1000, 2000, and 4000 Hz; orAn audiogram indicates profound hearing loss in the poorer ear (unaidable) as demonstrated by greater than 90 dB HL and indicates a hearing loss greater than 25 dB HL in the better ear using the four-frequency average of 500, 1000, 2000, and 4000 Hz.
-----------------	---

Medicaid Provider Manual

Age 21 Years or Over	<p>In addition to the above, beneficiaries age 21 years or over must have all the following:</p> <ul style="list-style-type: none">▪ A Hearing Handicap Inventory for Adults, Hearing Handicap Inventory for the Elderly, Abbreviated Profile of Hearing Aid Benefit, or similar inventory that indicates a need for amplification; and▪ A hearing loss that interferes with or significantly restricts functional communication, routine activities of daily living, education, and/or employment.
-----------------------------	---

4.13.B. PRIOR AUTHORIZATION REQUIREMENTS

PA is not required for monaural or binaural contralateral routing hearing aids included in the MDHHS volume purchase contract if all other hearing aid requirements are met and restrictions (i.e., frequency of replacement) are not exceeded.

PA is required for the following:

- Any hearing aid not included in the MDHHS volume purchase contract.
- Replacement aids within five years.

All Ages	<p>When PA is needed, the following documentation must be submitted with the MSA-1653-B:</p> <ul style="list-style-type: none">▪ Audiological evaluation and assessment results, signed and dated by the audiologist within the previous six months, demonstrating the contralateral routing system's standards of coverage have been met (e.g., audiogram and amplification inventory);▪ A medical clearance signed and dated by the physician within six months prior to prescribing the hearing aid;▪ Hearing aid recommended manufacturer, model, and style;▪ For hearing aids not covered under the MDHHS volume purchase contract, documentation from the manufacturer showing invoice price, discounts, and shipping and handling charges; and▪ If applicable, documentation indicating whether the child is receiving deaf or hard of hearing services from the educational system including, but not limited to, letters of support from the classroom teacher, the deaf or hard of hearing teacher consultant, and/or the educational audiologist.
Age 21 Years or Over	<p>In addition to the above, providers must submit the following documentation for beneficiaries age 21 years or over:</p> <ul style="list-style-type: none">▪ Documentation demonstrating hearing loss interferes with or significantly restricts functional communication, routine activities of daily living, education, and/or employment.

4.13.C. DOCUMENTATION

Applicable documentation to be maintained in the beneficiary record for a contralateral routing hearing aid includes:

- Audiological evaluation and assessment results, signed and dated by the audiologist within the previous six months, demonstrating the contralateral routing system's standards of coverage have been met (i.e., audiogram and amplification inventory);
- A medical clearance signed and dated by the physician within six months prior to prescribing the hearing aid;
- Recommendation of the make, model, and type of hearing aid;
- For hearing aids not covered under the MDHHS volume purchase contract, a copy of the manufacturer's invoice showing the hearing aid model, serial number, invoice price, applicable discounts, and shipping and handling charges; and
- If applicable, documentation indicating whether the child is receiving deaf or hard of hearing services from the educational system, including letters of support from the classroom teacher, the deaf or hard of hearing teacher consultant, and/or the educational audiologist.

4.13.D. PAYMENT RULES

Each of the HCPCS codes for contralateral routing systems covers both the transmitter and the receiver/hearing aid. Monaural codes should be used when providing one contralateral routing device to a beneficiary who already wears a Contralateral Routing of Signals (CROS) compatible hearing aid in the better ear. Providers should choose the procedure code that corresponds to the appropriate model being fit on the poorer ear. Binaural codes should be used when providing one hearing aid and one contralateral routing device. No other hearing aid device procedure code may be billed in addition to the specific contralateral routing systems code used.

Most devices have established fee screens that are published in the MDHHS Hearing Aid Dealers Fee Schedule or indicated on the MDHHS volume purchase contract. For codes without established fee screens, the approved reimbursement amount is indicated on the approved PA request.

4.14 NON-CONTRACT HEARING AIDS

Hearing aid providers must provide hearing aids available through the MDHHS volume purchase contract whenever possible. If the provider prescribes a non-contract hearing aid, the hearing aid provider must obtain PA.

In addition to the required documents listed under the Digital Hearing Aids – Prior Authorization Requirements or the Contralateral Routing Systems - Prior Authorization Requirements subsections (as applicable) of this chapter, a letter of medical necessity must be submitted with the MSA-1653-B. The letter must identify the specific medical reason(s) why a contracted hearing aid will not meet the beneficiary's needs.
