Life insurance premiums are allowable when the premium is a fringe benefit for the insured employee when the beneficiary of the employee's insurance is not the provider. The cost of life insurance premiums for insurance on the lives of officers and employees, including provider-based physicians, is an allowable cost only within the provisions of Medicare Principles of Reimbursement.

8.11 LIQUIDATION OF SHORT-TERM LIABILITIES

A short-term liability must be liquidated within one year after the end of the cost reporting period in which the liability is incurred. The liquidation of liabilities requirement for Medicaid applies the federal Principles of Reimbursement for the determination of allowable costs. In instances where a nursing facility provider does not liquidate a short-term liability within the period specified in the federal requirements, the costs for the related goods and services are not allowed in the cost reporting period in which the liability was incurred, but are allowable in the cost report period when the liability is paid.

Exception to the one-year time limit to liquidate a short-term liability will be considered in accordance with the federal Principles of Reimbursement. A provider may request an extension for good cause to liquidate short-term liability. The provider must submit a written request at the time of submission of the Medicaid cost report to RARSS identifying the liability amount(s) and an explanation for the nonpayment of the liabilities and expected payments to liquidate the liability. RARSS will review the request and notify the Provider of the approval of an extension, not to exceed three years after the end of the cost report period that the request is filed, or of the denial of the request.

8.12 LOBBYING AND POLITICAL ACTIVITY COSTS

A provider's costs incurred to support or oppose decisions of the federal Congress or state Legislature, costs related to campaigns for particular candidates or issues, and contributions to political action committees involving partisan elections are not allowable. Costs incurred, whether directly or indirectly through organization membership dues, fees or assessments, for these activities or to influence

legislation are not allowable. Contacts with federal or state agencies in the course of business operations of the nursing facility and general comment on proposed policies are not considered lobbying activity.

8.13 MAINTENANCE OF EFFORT CONTRIBUTIONS BY COUNTY GOVERNMENT

In accordance with Public Act 408 of 1984, as amended, county governments that own and operate a nursing facility are responsible for maintenance of effort funding levels for the operation of that facility. The county government contributions to the nursing facility operations specifically due to the provisions of the Act, as amended, are not allowable costs of the county medical care facility Medicaid cost reporting.

8.14 MEDICAL SUPPLIES, DURABLE MEDICAL EQUIPMENT (DME), ORTHOTICS, AND PROSTHETICS

The cost of medical supplies or DME are generally considered an allowable cost. However, the following items are not allowable and must be billed by the medical supplier:

- Air-fluidized beds
- Bariatric beds
- Bilevel positive airway pressure (BiPAP) device
- Custom-fabricated seating systems may be covered outside of the nursing facility per diem rate when a standard item will not meet the medical and functional needs of the user and standards of coverage are met.
- Negative pressure wound therapy pump and accessories (wound VAC)
- Orthotics and Prosthetics
- Parenteral nutrition, including all supplies, equipment, and solutions
- Powered air flotation bed (low air loss therapy)
- Selected surgical dressings
- Shoes and additional components

The Nursing Facility Coverages chapter further describes the services included in the Medicaid per diem rate.

8.15 MEMBERSHIP FEES

Reasonable costs of memberships in professional, technical, or business-related organizations are allowable if the organization's mission or objectives are primarily related to resident care and/or long term care services activities. Costs of memberships in civic organizations for the purpose of implementing civic objectives are also allowable for Medicaid purposes (e.g., Chamber of Commerce). Any portion of membership fees used for lobbying, supporting political candidates and campaigning, or in social, fraternal, and other such organizations are not allowable. Awareness of an organization's ongoing lobbying and political activities requires identification of the portion of the organization's fees, dues, assessments or other allocations of costs to members or associated nursing facility providers. If an amount of non-allowable cost is not identified relating to this purpose, all costs associated with the fees or dues are non-allowable, unless the provider can document the appropriate unallowable portion.

8.16 MEDICAL DIRECTOR/PHYSICIAN SERVICES

The nursing facility must have a designated medical director that maintains responsibility for the implementation of resident care policies, for coordinating medical care, and is directly accountable to nursing facility management. The cost(s) applicable to the provision of the duties and responsibilities of the medical director is allowable routine nursing care. The nursing facility must maintain adequate records to document the level and type of services rendered by the medical director as a facility employee, or under a service contract or some other designated capacity. The cost(s) relating to the medical director duties and responsibilities must be distinguished from physician services activities that are not allowable routine nursing care. Refer to the Practitioner Chapter for discussion regarding physician services.

8.17 NON-PAID WORKERS/VOLUNTEERS

The value of services of non-paid workers is an allowable cost. The services must be performed on a regular, scheduled basis. The services must be of the type customarily performed by full-time employees and necessary to enable the nursing facility provider to carry out the functions of normal resident care and the operation of the facility. The value of services of a type for which providers generally do not remunerate individuals performing such services is not an allowable cost.

Example: Donated services of individuals in distributing books and magazines to residents, administering a provider canteen or cafeteria or a provider gift shop are not allowable/reimbursable.

8.18 OWNER AND ADMINISTRATOR COMPENSATION

The cost for compensation to nursing facility owners is determined in accordance with Medicare Principles of Reimbursement, except the compensation to administrators, owner/administrators, or owners who function as administrators or assistant administrators, and corporate office executive management compensation is subject to specific dollar amount cost limits. Allowable cost limits are applied to nursing facilities based upon the bed size of the facility. Allowable cost limits are applied to individuals based upon the aggregate number of beds in nursing facilities being served or within the corporate organization. Compensation is remuneration to the individual for job performance and includes the costs of salary and wages, fringe benefits, director fees, and costs of services or items provided to the individual.

The compensation limit schedule is available on the MDHHS website. MDHHS annually adjusts the Owner/Administrator Compensation Limits to include cost-of-living changes as reflected by the United States Department of Labor Consumer Price Index for the metropolitan Detroit area. (Refer to the Directory Appendix for the website address.) Owner/Administrator Compensation Limits are expressed as facility annual compensation amounts and must be pro-rated on a monthly basis in situations where the cost reporting period is not 12 months.

8.18.A. COMPENSATION LIMIT FOR INDIVIDUAL NURSING FACILITY

The allowable cost limit for compensation to nursing facility administrators, owner/administrators, or owners who function as administrators or assistant administrators is determined according to the following criteria.

Medicaid Provider Manual

- Facility bed size includes licensed beds for nursing home, home for the aged and hospital services beds. Other categories of resident beds or housing arrangement beds are not included in determining the facility bed size for determining the appropriate compensation limit.
- The owner/administrator compensation limit used must coincide with the number of beds available for occupancy. The measurement criteria for determining the facility bed size is the number of beds available for resident or patient care at the beginning of the cost reporting period.
- Each nursing facility having 50 licensed beds or more must have a full-time licensed facility administrator. As required under State law, this individual is expected to be in the facility directing, conducting, or participating in activities directly related to the nursing facility during the normal 40-hour business week. A current position description that adequately defines the duties and responsibilities for the administrator position must be retained at the facility.
- The total compensation amount claimed for allowable costs for the facility administrator and related positions must not exceed amounts established by the SMA. These amounts are established by facility bed size: 1-49 beds, 50-99 beds, 100-149 beds and 150 beds or more.

The owner/administrator compensation limits apply to the costs for the positions of administrator, assistant administrator, and/or other administrative employees performing functions or having work responsibilities normally considered nursing facility administrator work activity. If an individual is functioning in a position that requires a nursing facility administrator's license, that person's compensation must be subjected to the limit. However, if a person does not have a license, but is performing the job functions and work activity of an administrator, that individual's compensation must also be included in the amount subjected to the limit. Inclusion of an individual's compensation in the total amount subjected to the limit is not only based on the individual having a license, it is also based on the job functions and work activity. Compensation paid by a related party or central office and charged directly to the nursing facility for individuals performing these activities must be included in the individual nursing facility compensation amount subject to the limit.

The compensation limit schedule does not apply to the salary of owners employed in capacities other than administration of the nursing facility provider's operation. The allowable salary level of an owner employed in a non-administration position cannot exceed the market value salary for that position, e.g., director of nursing, social services director. The allowable salary level must be commensurate with the amount of time the owner spends working in the non-administration position. If the owner also participates in facility administration, the portion of the payroll costs attributed to the administrative work must be included in the owner/administrator salary compensation and subject to the appropriate salary limits. The individual's administrative work must be appropriately documented with a position description and job responsibilities, and the allowable salary level for the administrative work must not exceed salary levels for similar administrative positions.

8.18.B. COMPENSATION LIMIT FOR OWNER AND/OR ADMINISTRATOR SERVING MULTIPLE NURSING FACILITIES

Where an individual is involved in the administration of more than one nursing facility, the maximum compensation allowed for allocation per facility and the allowable facility compensation is computed as follows:

- Total the number of beds, as defined in the individual nursing facility section, in all facilities served by the owner and/or administrator.
- Determine the appropriate compensation limit from the published schedule for the total number of beds.
- Compare the appropriate compensation limit with the actual allowable total salary and fringe benefits paid to the individual. The compensation limit is expressed as an annual amount (12-month period) and applicable to a full time position defined as a minimum of 40 hours per week committed to nursing home related management and administrative activity. Adequate work activity records must be available for verification of time expended for nursing facility related activity. Time commitment for less than full time requires the compensation limit be prorated to reflect the portion of time committed to this activity. Example, if 30 hours per week during an annual period is attributed to this activity, the adjusted limit for the individual is 75 percent of the appropriate compensation limit.
- The lesser of total allowable compensation or the compensation limit per the schedule is then allocated to all the facilities served by the owner and/or administrator based on a ratio of the number of beds in the individual facility to the total number of beds in all facilities served. The hours directly devoted to individual homes may be used as the allocation basis if verified by auditable records.
- Combine the allocated owner and/or administrator compensation with the allowable compensation of the facility's administrator/assistant administrator/co-administrator.
- Compare the combined compensation amount to the compensation limit schedule maximum allowable for the number of beds for that particular sized facility. The lesser of the facility's combined compensation or the facility's compensation limit is the allowable compensation to be used in the determination of allowable cost related to resident care.

The following illustrates an example of the allowable owner/administration compensation limit application for a group of four facilities of varying sizes with a total of 400 beds, and the allowable facility compensation. The owner and/or administrator total compensation is \$250,000 for full time nursing facility related activity for a cost reporting period ending December 31, 2017. The compensation is \$31,354 greater than the limit (\$250,000 minus \$218,646 equals \$31,354).

Medicaid Provider Manual

Total number of beds in all facilities served	400
Compensation Cost Limit for 150+ bed facility as of 12/31/2017	\$218,646
Owner and/or Administrator Total Compensation	\$250,000
Amount allowed for allocation to individual facilities (lesser of bed size limit or actual compensation)	\$218,646
Amount of compensation not allowed	\$31,354

Nursing Facility Bed Sizes	1-49 Beds	50-99 Beds	100-149 Beds	150+ Beds
Facility Compensation Limit 12/31/2017	\$72,883	\$121,471	\$145,766	\$218,646
Example Facilities	Facility 1	Facility 2	Facility 3	Facility 4
Total Facility Beds	40	70	100	190
Allocation of Owner and/or Administrator Compensation ¹	\$21,865	\$38,263	\$54,662	\$103,857
Compensation of Facility Administrator	\$40,000	\$85,000	\$95,000	\$115,000
Facility Total Compensation to be compared to Limit ²	\$61,865	\$123,263	\$149,662	\$218,857
Disallowed Compensation per Facility	\$0	\$1,792	\$3,896	\$211

¹ The percentage of the facility's beds of the total across all four facilities is multiplied by the compensation limit, e.g., 40/400 x \$218,646.

² Total compensation equals the sum of the allocation amount and the individual nursing facility administrator compensation.

8.18.C. COMPENSATION LIMITATION FOR HOME OFFICE EXECUTIVE/MANAGEMENT

Salary and wages, fringe benefits and other related compensation costs for home office executive and management staff are included in the provider's home office cost report, and costs are allocated to the individual nursing homes and other business activities conducted by the organization. The allocation of the compensation costs is made to the operating entities of the corporation through the home office cost statement, and these costs are not included in the limit imposed on the individual nursing facility owner/administrator compensation.

Medicaid Provider Manual

The compensation limit for high-level management employees at the corporate home office level is enhanced to acknowledge increased scope of the business activity and corporate responsibility. The enhanced compensation limit is applicable in chain organization or related party management services situations where home office cost statement reporting exists, and full management oversight and administrative services are being provided to the nursing facilities and other business activities of the organization. Compensation costs for corporate office individuals under the enhanced compensation limit must be documented by a current position description, employment contract or other verifiable documentation that adequately defines the position, duties and responsibilities for the individual, and demonstrates the presence of services provided to the organization. Compensation to an individual employee of the corporate or central office, regardless of employment position or job activity function, is subject to the enhanced compensation limit to determine allowable cost. The enhanced compensation limit is expressed as an annual amount (12-month period) and is applicable to a full time position.

Employees paid by the corporate or central office but charged directly to the individual nursing facility for administrator or assistant administrator work functions at that facility are not eligible for the enhanced compensation limit. Allowable cost limits for such employees are addressed under individual nursing facility compensation limit.

The enhanced Medicaid allowable compensation for individual corporate office official and executive management employee personnel is applicable only to organizations greater than 150 beds. The enhanced compensation limit is based on the total number of beds owned and operated by and under full management control of the corporate organization and determined in accordance with the following schedule:

Number of Beds in the Chain Organization	Enhanced Compensation Limit
151 to 500 beds	100% of the 150+ bed facility limit
501 to 1,000 beds	120% of the 150+ bed facility limit
1,001 to 2,000 beds	130% of the 150+ bed facility limit
Over 2,000 beds	150% of the 150+ bed facility limit

The total number of beds includes all types of nursing home, home for the aged, hospital services, resident and other housing arrangement beds. If the business activity for the beds is not included in the allocation of the home office costs, the beds must not be counted for determining the number of beds in the chain organization. The 150+ bed facility limit used to determine the enhanced compensation limit amount is the MDHHS published limit for the year end corresponding to the reporting period end date of the home office cost statement.

8.19 OXYGEN

Medicaid coverage of oxygen services for residents in nursing facilities is addressed in the Medicaid Services Descriptions Section of the Coverages portion of this chapter. The costs of oxygen gas, equipment, and supplies for intermittent and infrequent use are allowable in the routine nursing care cost and are included in the per diem reimbursement rate. Oxygen equipment rental costs for a limited period for purposes of providing this service are allowable in accordance with the incidental rental cost provisions addressed in the Lease Cost subsection of this appendix.

The costs of oxygen related services for frequent or prolonged use on a daily basis (i.e., at least 8 hours per day), regardless of payer source, is an ancillary services cost and is not an allowable routine nursing care cost. For residents requiring frequent and prolonged oxygen use who are in a nursing facility, the oxygen gas, equipment, and supplies must be billed by an enrolled medical supplier, not the nursing facility. For residents requiring frequent and prolonged oxygen use in a County Medical Care Facility or a Hospital Long Term Care Unit, the oxygen gas, equipment, and supplies must be billed by the nursing facility, not the medical supplier. These costs must be separately identified in the facility's accounting records or adequately compiled and verifiable for audit and excluded from Medicaid cost report routine nursing care unit cost.

8.20 PATIENT TRANSPORTATION

The Transportation Section of the Coverages portion of this chapter addresses the nursing facility's responsibility to arrange or provide for non-emergency patient transportation. The cost for this transportation is a routine nursing care cost included in the nursing facility's annual cost report, and any reimbursement for the services is included in the routine nursing care per diem rate. Patient transportation costs are classified as support costs for Medicaid cost reporting.

The nursing facility must select the most efficient and cost effective mode of transportation for resident care which may include utilizing a facility owned vehicle or contracted outside service. Whenever possible, a facility-owned vehicle should be used. Costs relating to the nursing facility vehicle operation are addressed under the Facility Vehicles and Capital Asset Cost subsections of this appendix.

Costs incurred for contracted outside service for patient transportation must be included in the Medicaid cost reporting under the following reporting procedures:

- Administration and General Transportation – when the expense is not directly identified for specific residents or the care unit in which the resident resides in the facility; or
- Routine Nursing Care, Miscellaneous Support Cost
 - when there is only one routine nursing care unit in the facility and all resident transportation is for residents in that unit, or
 - when there are multiple nursing or residential care units in the facility, and the expense is directly identified by individual resident and location unit where the individual resides in the facility. Costs must be allocated to the corresponding nursing unit cost center identified in the Medicaid cost report.

8.20.A. NON-EMERGENCY AMBULANCE

When a physician issues a written order for non-emergency ambulance transportation, usually due to the need for a stretcher or other emergency equipment, the ambulance provider may bill Medicaid directly and must maintain the physician's order as documentation of medical necessity. If non-emergency ambulance transport is not ordered by the beneficiary's physician, arrangements for payment must be between the facility and the ambulance provider and cannot be charged to the beneficiary, beneficiary's family, or used to offset the patient-pay amount. The cost of non-emergency ambulance transports not ordered by the beneficiary's physician must be identified and removed on Worksheet 1-B by the nursing facility.

8.21 PERSONAL COMFORT ITEMS

The costs of services and items that do not contribute primarily to the resident's treatment of an illness or the resident's ability to function are not allowable. Direct costs, and the appropriate share of indirect costs, relating to such items as telephones, televisions and/or radios that are located in the patient's accommodations and furnished solely for the personal comfort of the resident, are not allowable. The cost of television and radio services furnished to residents generally is allowable if furnished in common use areas of the facility such as day rooms, recreation rooms or similar purpose area of the facility for the common benefit of facility residents. The cost of nurse-patient communications system that has no capability other than nurse and patient communication is allowable.

The costs of systems, including nurse-patient communications, television and telephone services, and similar items, may have the capability of providing residents with outside entertainment and providing nurse-patient communications. Only the cost of the component for nurse-patient communication is allowable routine nursing care. Direct distinction of cost related to the nurse-patient communication must be made for proper cost reporting, or an appropriate allocation must be established for Medicaid approval for the purpose of identifying the patient related and personal comfort related cost portions of combined systems.

8.22 PRIVATE DUTY NURSES

Costs for nursing staff services provided by or under the supervision of a registered professional nurse are allowable; however, the costs of services of a private-duty nurse or other private-duty attendant are not allowable routine nursing care. Private-duty nurses or private-duty attendants are registered professional nurses, licensed practical nurses, or any other trained attendant whose services ordinarily are rendered to, and restricted to, a particular patient under arrangement between the patient and the private-duty nurse or attendant.

A patient, or someone acting on their behalf, may arrange and pay for a private-duty nurse, or the nursing facility that initially incurs the requested costs may look to the patient for payment of the non-covered nursing facility service. Where the nursing facility acts on behalf of the resident, the services of the private-duty nurse or other attendant(s) under this arrangement are not allowable routine nursing care services regardless of the payment process to the private duty or other personnel or the control which the nursing facility may exercise with respect to the services rendered by the private-duty nurse or attendant.

8.23 PROVIDER DONATIONS FOR OUTSTATIONED STATE STAFF

For cost reporting periods beginning prior to April 1, 2019, provider donations and administrative costs and incidental costs (workspace and telephone), incurred by the provider for outstationed staff are allowable costs. Costs are allowable to the amount contractually determined with the State.

For cost reporting periods beginning on or after April 1, 2019, provider donations for outstationed state staff and any associated costs paid to the State of Michigan for outstationed state staff are non-allowable costs. These costs must be reported on the provider's cost report and then adjusted from the cost report to be excluded from the rate setting process. A provider that utilizes an outstationed state worker(s) must submit a copy of their contract(s) for the use of that worker with their cost report.

8.24 PURCHASE DISCOUNTS

All discounts, allowances, and refunds of expenses are reductions in the cost of goods or services purchased and are not income. When they are received in the same accounting period in which the purchases were made or expenses were incurred, they will reduce the purchases or expenses of that period. However, when they are received in a later accounting period, they will reduce the comparable purchases or expenses in the period in which they are received.

Purchase discounts have been classified as cash, trade, or quantity. Cash discounts are reductions granted for the settlement of debts before they are due. Trade discounts are reductions from list prices granted to a class of customers before consideration of credit terms. Quantity discounts are reductions from list prices granted because of the size of individual or aggregate purchase transactions. Whatever the classification of purchase discounts, like treatment in reducing allowable costs is required.

As with discounts, allowances and rebates received from purchases of goods or services and refunds of previous expense payments are clearly reductions in costs and must be reflected in the determination of allowable costs. In addition, late charges on purchases are not an allowable expense. These would be in addition to regular costs authorized.

8.25 REBATES LARGER THAN ONE YEAR'S EXPENSE AND EXTRAORDINARY EXPENSE

Normal refund or rebate amounts are reported as a reduction offset to current operating costs in accordance with federal Principles of Reimbursement. A refund or rebate amount of previous years' allowable expenses must not be reported in total in the current fiscal year-end cost report where the refund or rebate amount pertains to more than one prior year reported expense. Likewise, extraordinary expense pertaining to more than one prior year must not be reported in total in the current fiscal year-end cost report. Refund or rebate and the extraordinary expense amounts pertaining to more than one prior year must be equally spread over as many subsequent years as the number of years represented by the refund or rebate or the extraordinary expense amount not to exceed three years. In the instance of a sale, the selling provider must include 100 percent of the remaining rebate balance in the final cost report. The apportionment will start in the cost-reporting year in which the refund amount is received or the extraordinary expense is discovered. These provisions are limited to Medicaid cost reporting requirements and do not change the applicable accounting principles for financial reporting.

8.26 RESEARCH ACTIVITIES

The cost of research activities is allowable in accordance with Medicare Principles. If research is conducted in conjunction with, and as a part of, the care of residents, the costs of usual resident care are allowable to the extent that such costs are not met by funds provided for the research.

8.27 ROUTINE NURSING SERVICES

A provider's costs associated with the provision of necessary medical, nursing and mental health services, within the provisions of Medicare Principles of Reimbursement and requirements specified in the Coverages portion of this chapter, are allowable expenses. This includes costs incurred for meeting state federal requirements associated with specialized mental health rehabilitation services, e.g., monitoring the necessity for Annual Resident Reviews and coordinating or providing required services. The medical supply costs associated with routine nursing services and reimbursed by Medicare Part B are not allowable routine costs for Medicaid if the provider is reimbursed by Medicare.

8.28 SICK LEAVE

The reasonable cost of sick leave taken (or payment in lieu of sick leave taken) by an employee is recognized as a fringe benefit and is included in allowable costs in the cost reporting period when paid. If the sick leave is vested and refunded, contributions to the fund are allowed under applicable provisions of the Medicare Principles. However, where the nursing facility provider's sick pay plan grants employees the right to demand cash payment for unused sick leave at the end of each year, the pertinent accruals are includable, without funding, in the cost reporting period when earned.

8.29 TAXES AND FEES

Taxes, including employee payroll taxes, sales taxes, and state imposed sales and use taxes, are allowable variable costs. The Michigan Business Tax and the Michigan Corporate Income Tax are allowable variable support costs.

8.29.A. GENERAL TAXES

Real and personal property taxes are allowable plant costs.

8.29.B. QUALITY ASSURANCE ASSESSMENT PROGRAM (QAAP) TAX

A nursing facility's QAAP tax, including the Quality Measure Initiative (QMI) share of the tax, is an allowable cost and must be reported in the nursing facility Medicaid annual cost report. The tax must be reported on the provider's cost report as assessed and accounted for on the accrual basis. The QAAP tax cost is adjusted through the cost reporting process to be segregated from use in rate setting. The QMI share of the QAAP tax must be reported on a separate account on the provider's cost report than the rest of the QAAP tax.

8.29.C. FEES AND ASSESSMENTS

Costs incurred for late payments, or for violation of federal, state, or local laws, are not allowable.

8.29.D. PENALTY TAXES UNDER THE PATIENT PROTECTION AND AFFORDABLE CARE ACT

Penalty taxes that may be assessed on employers under the employer-shared responsibility provisions in the Patient Protection and Affordable Care Act (PPACA) are not allowable costs used to calculate the Medicaid room and board rate. As such, the facility must remove these penalty taxes from allowable costs via a Worksheet 1-B adjustment.

8.30 THERAPY AND PATHOLOGY SERVICES

A nursing facility provider must establish accounting procedures to reflect individual cost centers for reimbursable ancillary services, including physical therapy, occupational therapy, speech pathology and other services not classified as routine nursing care. Whether the therapist/pathologist is salaried, under contract, or an independent provider, a nursing facility provider must record Medicaid program payments as income and all expenditures for therapist/pathologist supportive personnel, equipment and its maintenance, supplies, and other costs directly attributable to rendering services in these cost centers.

The service is considered ancillary if the complexity of the service prescribed for the resident is such that it can be performed safely and/or effectively only under the general supervision of skilled rehabilitation personnel. Ancillary therapy services are evidenced by the presence of the following conditions:

- A written physician order.
- The skills of qualified technical or professional health personnel, such as physical therapists, occupational therapists, speech pathologists or audiologists, are required.
- Services are provided directly by, or under the general supervision of, the skilled personnel to assure the safety of the patient and to achieve medically desired results. General supervision requires that initial direction and periodic inspection of the actual activity is necessary.
- Services are rendered as part of an active treatment for a specific condition that has resulted in a loss or restriction of mobility or function.

Therapy services considered routine nursing care are services rendered under circumstances where the general supervision of exercises, which have been taught to the patient, can be performed repetitiously without skilled rehabilitation personnel. This includes maintenance programs where the performances of repetitive exercises, which may be required to maintain functions, do not require the involvement and services of skilled rehabilitation personnel, but may require the assistance of a trained nurse aide. Routine nursing care may include repetitive exercises to improve gait, maintain strength or endurance, passive exercises to maintain range of motion in paralyzed extremities, and assistive walking.

The cost of the development of the maintenance plan when prepared by a licensed therapist is allowable. A provider must maintain documentation, which includes the amount of time required by the therapist to develop the maintenance plan. Medicaid considers maintenance plan development as routine nursing care included in the per diem rate.

The cost of the MDS assessment is allowable. A provider must maintain documentation, which includes the amount of time required by the therapist to complete the MDS assessment. Medicaid considers the MDS assessment as routine nursing care included in the per diem rate.

Medicaid Provider Manual

Depreciation for equipment and facility space assigned to these services must be included as an expense in the ancillary cost centers and computed in accordance with Medicaid guidelines for allowable depreciation. A uniform charge structure must be applied to the entire facility population receiving the services.

SECTION 9 - COST CLASSIFICATIONS AND COST FINDING

Medicaid-enrolled providers must develop and adopt a uniform Chart of Accounts that meets the minimum requirements established by Medicaid for classifying and reporting costs incurred in providing care to nursing facility residents. A nursing facility's accounting system will normally include more detailed accounts for recording facility costs. However, for cost reporting purposes, the detailed accounts are compiled into aggregate cost classification centers in accordance with program policies.

The following cost descriptions are guidelines to provide consistency in nursing facility provider cost reporting. Reimbursement classifications are identified for individual cost elements in examples available on the MDHHS website. (Refer to the Directory Appendix for website information.) More detailed discussions of cost categories are in the Allowable and Non-Allowable Costs section of this appendix.

9.1 NURSING FACILITY BED DAYS AND RESIDENT OCCUPANCY

A provider must report nursing facility bed days and resident occupancy statistics in the annual cost report. Policy related to facility census is presented in the Definitions section of this appendix. Specific attention should be directed to the following definitions: available bed, available bed days, ban on admissions, census, census day, denial of payment for new admissions, hold a bed day, leave day – hospital, leave day – therapeutic, occupancy, occupancy rate, per resident day cost, resident, resident days/occupancy, therapeutic leave day.

The nursing facility's resident occupancy statistics and cost reporting requirements will be significantly affected in cases where the provider requests, and is granted, approval for designating non-available beds as outlined in the Non-Available Beds subsection of this appendix.

9.2 VARIABLE COSTS – BASE AND SUPPORT

Variable costs include the total allowable base and support costs in a facility's routine nursing service units. A provider must allocate variable costs (support or base) depending on the activity for which the cost was incurred. The provider must also report direct costs for ancillary service costs and other non-reimbursable service costs. The direct costs incurred or attributed to these activities will not specifically be identified as base or support costs, however, the cost report cost finding process will allocate general services cost activities as base or support costs depending on the activity for which the cost was incurred.

9.2.A. BASE COSTS

Base costs cover activities associated with direct patient care. Major activities under these categories are payroll and payroll-related costs for departments of nursing, nursing administration, dietary, laundry, diversional therapy and social services, food, linen (excluding mattress and mattress support unit), workers compensation, utility costs, consultant costs from related party organizations for services relating to base cost activity, nursing pool agency contract service for direct patient care nursing staff, and medical and nursing supply costs included in the base cost departments.

Medicaid Provider Manual

9.2.B. SUPPORT COSTS

Support costs cover allowable activities not associated with direct patient care. Major items under these categories are payroll and payroll-related costs for the departments of housekeeping, maintenance of plant operations, medical records, medical director, and administration, administrative costs, all consultant costs not specifically identified as base, all equipment maintenance and repair costs, purchased services, and contract labor not specified as base costs. Contract services costs for these departments are also support costs.

9.2.C. BASE/SUPPORT COSTS – PAYROLL RELATED

Nursing facility expenses related to payroll taxes and employee health and welfare are classified as base/support costs. These costs include fringe benefits such as employer contributions to FICA, FUTA, MESC, employee life and health insurance, retirement, physicals and all other insurance provided to employees as fringe benefits. If a nursing facility's accounting records do not separately reflect the payroll taxes and employee health and welfare expenses for "base" and "support" personnel by cost center identification, the total amount of these costs must be reported in the appropriate "base/support" cost category. Workers compensation is a base cost and not divided between base and support.

If the nursing facility's accounting system allows the allocation of costs to specific personnel or activities, the specified costs must be used on the cost report. If the nursing facility accounting system does not allow for this specificity, then a reclassification of costs must be made to the appropriate service areas. In these cases, it will be necessary to reclassify such costs on the basis of salary and wage costs distribution.

9.2.D. BASE/SUPPORT COSTS – CONTRACT SERVICES FOR DIRECT PATIENT CARE

A provider that purchases direct care services as an alternative to employing personnel may apportion the contract services costs between base and support cost by applying the industry-wide average base-to-variable cost ratio. The nursing facility must appropriately report these costs in the annual cost report. Medicaid reviews the industry-wide average base-to variable cost ratio annually and revises it if a difference of two percent or greater exists between the current calendar year cost report aggregate average industry data and the previously promulgated industry-wide base-to-variable cost ratio. If a revision is applicable, the revised cost ratio will be effective for subsequent year cost reporting.

9.3 PLANT COSTS

Plant costs include depreciation, interest expense (either working capital or capital indebtedness), real estate and personal property taxes, amortization costs associated with loan financing costs (amortization of legal fees, recording fees or other fees relating to the capital asset acquisition points, letters of credit), and specific lease expenses.

9.4 CAPITAL ASSET EXPENDITURE

Medicaid limitations on capital expenditure costs are determined in accordance with Medicare Principles except as modified by Medicaid policy.

A nursing facility provider anticipating capital expenditures should contact the CON Evaluation Section to make application for a CON. (Refer to the Directory Appendix for contact information.)

If a CON is approved, the provider may be eligible for increased reimbursement, subject to Plant Cost Component limits. If a new capital expenditure required CON review and was denied, the provider's reimbursement rate must exclude the costs of the denied capital expenditure. The provider's cost report must identify capital expenditures approved and denied by CON.

The nursing facility must have written policies and procedures that establish dollar level thresholds beyond which an asset acquisition is considered a capital asset. Medicaid sets the thresholds at having an estimated useful life of at least two years and a historical cost of at least \$5,000. The nursing facility capital asset policy may have lower dollar level threshold than the Medicaid limit, but may not have a higher limit. If the provider's capitalization policy sets lower thresholds than Medicaid, then the provider's established policy must be followed for cost reporting. A provider may not have separate capitalization policies for Medicaid cost reporting and for other financial statements and reports.

Assets that are acquired as part of an integrated system must be considered as a single asset for capitalization purposes. Assets that have a stand-alone functional capability may be considered on a single item basis. Individual asset items that do not meet the dollar and useful life threshold are classified as minor equipment and will be reported as minor equipment expense in the cost report of the year of acquisition.

Example: An office workspace with connecting portions dependent upon other portions for support and stability; a communication system installed in the facility and in resident rooms to allow the full functioning of two-way communication system.

Repair and improvement costs related to assets that result in extending useful life or increased productivity must be capitalized for Medicaid if they are capitalized under Generally Accepted Accounting Principles. Providers must demonstrate consistency in financial reporting.

Providers must follow Generally Accepted Accounting Principles (GAAP) in reporting repairs to capital assets. Repairs that should be capitalized under GAAP must not be an expense item on the cost report.

9.4.A. CAPITAL ASSET COST DATA FOR CLASS I FACILITIES

9.4.A.1. CAPITALIZED ASSET ACQUISITION COSTS

Capitalized asset acquisition costs are used to determine the Current Asset Value for the Plant Cost Component in the Class I nursing facility reimbursement rate. The Medicare Principles of Reimbursement are used to determine the acquisition costs allowable to the original provider/owner of the asset. The SMA uses only the acquisition cost incurred by the original owner to determine the capital asset value cost data. Asset acquisition costs are allowed for related party transactions in accordance with Medicare's interpretation for costs to related organizations.

Medicaid Provider Manual

The cost basis for capital assets is the CAV value determination of the original owner's audited historical acquisition cost. It is the responsibility of the current owner to provide the audited historical cost and purchase year of the original owner; otherwise, the assets are assumed obsolete for payment determination purposes, i.e., of no current asset value. The current provider must annually report the cost and the applicable year's depreciation for newly purchased assets and value changes to previously acquired assets. Cost reporting for asset acquisition costs related to a capital asset that is traded-in for a new replacement item must also report the value of the capital assets.

Capital costs related to assets that are no longer used in the facility operation and assets that are not necessary for resident care, e.g., excessive land not allowed under the Principles, are not allowable in the nursing facility capital asset value cost data.

To ensure that Medicaid does not pay for assets that are no longer being used to provide resident care, the original acquisition costs, or an estimate thereof, are removed from the current capital asset cost data. The costs of retirement or replacement of buildings, building improvements, building additions, fixed building equipment, land improvements, or movable equipment are removed from the capital asset cost data for the corresponding year of the original acquisition of that retired or replaced asset.

When the original value can be ascertained through such methods as component part depreciation records, the provider must remove the original costs of the retired or replaced assets from the year of the original acquisition, and report the new asset item cost for the year purchased.

Building components, building services equipment or other fixed equipment assets or land improvements may have historically been included within the asset price of the building to which they are attached and, as a result, are not separable for purposes of calculating depreciation or the capital asset cost data. However, in the determination of the Current Asset Value, an asset must exist in the nursing facility for it to have a value. Therefore, if a fixed asset has been retired or replaced and the asset cost cannot be determined from the provider's Medicaid/Medicare asset cost schedule, construction records, or tax records, the provider must determine and report the original asset cost based on the cost of a similar asset.

If a nursing facility provider is unable to report the original asset cost by either individual asset cost or component basis, the new asset will be assumed as a replacement of a similar asset for determining the necessary revisions to the capital asset cost data using the asset trade-in provisions.

When a capital asset is traded-in for a new replacement item, either the original owner's cost or a derived value of the item traded in is removed from the capital asset cost data. The purchase price of the new asset, prior to consideration of the value of any trade-in, is added into the capital asset cost data for the current year of purchase. If the original cost of the item is unknown, the provider must derive a value by backdating the purchase price amount for the new replacement asset. If the asset being replaced is of a different quality or type than the new asset, the amount to be backdated may be based on the expected current cost of a similar asset of like quality and type. The derived value calculation is made by applying a construction cost index (exclusive of the annual obsolescence adjustment) to the value of the new asset item cost, then subtracting the

Medicaid Provider Manual

derived value from the previous capital asset cost data historical cost for that original acquisition year. An electronic copy of the annual economic index compilation and the derived application process used for nursing facility cost reporting can be accessed on the MDHHS website. (Refer to the Directory Appendix for website information.)

Capital assets that are leased or rented are treated as obsolete assets for rate determination purposes when the underlying historical acquisition cost to the original owner has not been disclosed, or when the underlying information cannot be verified through audit.

Capital assets recorded in the central office, home office, or related organization financial records that are identifiable to a specific nursing facility are included in that facility's capital asset cost data determination process. The asset values, interest, and property taxes identified with these assets must be charged directly to the nursing facility and will be reimbursed in accordance with the applicable policy.

Costs of capital assets associated with the operation of related organizations are not included in the capital asset cost data determination for a specific nursing facility. The plant and variable costs of such organizations are treated as purchased services. (Refer to the Variable Costs – Base and Support subsections for discussion regarding purchase and contract services.)

9.4.A.2. EXCEPTIONS TO ASSET ACQUISITION COST CAPITALIZATION

Exceptions to the acquisition cost basis for assets may be allowed in the following situations:

- For the occasional purchase of used, movable equipment for ongoing nursing facility operations when the purchase is not related to a change in facility ownership. For the purchase of used replacement equipment, e.g., re-manufactured beds, a used lawn tractor, or used vehicles, the asset acquisition is treated as if new items were purchased. The allowable cost of acquisition is included in the year the asset is put into service by the current purchaser.
- For the nursing facility land value. The land value to be included in the Current Asset Value is based on the current owner's allowable acquisition cost determined in accordance with Medicare Principles, and not to exceed the amount reported to the Internal Revenue Service for federal tax purposes. The cost of the prior owner's land improvement asset, which is an integral part of the nursing facility land component and is included in the new or current owner's land acquisition cost, must be excluded from the historical capital asset cost data. The current facility ownership capital asset cost data cannot include both the land purchase price and the original owner's land improvement cost data.
- When equipment is purchased as "used" equipment as part of a facility change of ownership, or only a change of ownership of the facility equipment has occurred, the prior owner's (seller) computation of value at the time of sale is continued to the new owner.

9.4.B. CAPITAL ASSET CATEGORIES (FIXED ASSETS)

Capital asset classifications and asset useful life for depreciation purposes are determined in accordance with the American Hospital Association (AHA) guidelines in effect at the time of the asset acquisition.

General descriptions of the asset cost categories for cost reporting are:

Land – includes the land owned and used in the provider operations and includes off-site sewer and water lines, public utility costs necessary to service the land, government assessments for street paving and sewers, cost of permanent roadways and grading of a non-depreciable nature, cost of curbs and sidewalks where the replacement is not the responsibility of the nursing facility, and other land expenditure of a non-depreciable nature.

Land Improvement – improvements of a depreciable nature including paving, tunnels, underpasses, on-site sewer and water lines, parking lots, shrubbery, fences, walls, etc. where replacement is the responsibility of the nursing facility.

Building – includes the basic building structure, shell or frame, and additions thereto, building components, exterior walls, interior framing, walls, floors and ceiling, architectural, consulting, and interest expense associated with new construction or acquisition.

Building Improvement – includes building equipment attachments to buildings, such as wiring, electrical fixtures, plumbing, elevators, heating and air conditioning systems, etc. The general characteristics of fixed equipment are: (a) attached to or installed in the building structure, and (b) fairly long life but may be less than the building.

Leasehold Improvement – includes betterments and additions made by the lessee to the leased property, whereby the improvements become the property of the lessor after expiration of the lease. These items generally meet the requirements of building improvement assets.

Department Equipment – includes assets generally assigned to a specific department within the nursing facility with relatively fixed location but capable of being moved; as distinguished from building equipment. (Refer to Building Improvement.)

Furniture and Fixtures – includes assets similar in characteristic to department equipment, however, normally with no fixed location or used by various departments within the facility.

Transportation Equipment – includes vehicles used in conducting nursing facility operations relative to resident transportation, plant operations and maintenance, or general means of transport.

Capital asset costs incurred by a landlord who is leasing facility assets to a provider must be disclosed and reported in the provider's annual cost report. Capital asset cost reporting and allowable cost policies are applicable to the reporting of the leased assets in the same manner as if the assets were owned by the provider.

Medicaid Provider Manual

9.4.C. DEPRECIATION

Class I and Class II nursing facilities are under the tenure plant cost reimbursement methodology, and potential reimbursement is not based on depreciation expense for the nursing facility capital assets. The costs of services provided from home office or related party transactions, other than for capital assets related to the nursing facility physical plant, may include depreciation expense for asset costs applicable to the operations of the home office or related party business. Allowable depreciation costs for the home office or related party will be determined in accordance with Medicare Principles. These costs will be included in the home office or related party administrative services space costs and must be reported in accordance with Medicaid policy identified in the Related or Chain Organization Cost Allocation subsection of this appendix. Class III and Class IV nursing facilities reimbursed under the depreciation plant cost reimbursement methodology will have depreciation costs determined in accordance with allowable cost principles defined in this policy. The allowance for depreciation is determined in accordance with Medicare Principles except that only the straight-line method of depreciation may be used. The historical asset cost basis and the depreciation basis for nursing facility sales is subject to the limitation on the valuation of assets mandated by the Medicare Principles.

In addition to the depreciation standards in the Medicare Principles, Medicaid also requires adherence to the following standards:

- Consistent use of either component or composite asset depreciation schedules. Component depreciation is permitted in the case of a newly constructed facility and for recognized building improvements where the costs can be separated and acceptable useful lives determined. Composite depreciation must be used in the case of a newly purchased, existing facility.
- All abandonment losses are considered as a depreciation expense item.

9.4.D. DISPOSAL OF DEPRECIABLE ASSETS

9.4.D.1. CLASS I NURSING FACILITIES

Class I nursing facilities will account for asset acquisition and disposal in accordance with the Capital Asset Cost Data for Class I Facilities subsection of this appendix.

A Class I nursing facility purchased on or after March 31, 1985 is not subject to depreciation adjustment. In the event of a sale, the assets of Class I facilities whose ownership began prior to March 31, 1985, amounts included in the Medicaid per diem rate as an explicit depreciation expense item are subject to recapture in the event of a gain on the disposal of assets. The selling Provider must complete Medicaid Program Depreciation Recapture reporting schedules along with the applicable fiscal year cost report. Refer to the Cost Report Reimbursement Settlement, Depreciation Recapture Reimbursement Adjustment subsection of this appendix for additional information.

9.4.D.2. CLASS III NURSING FACILITIES

Class III providers whose Medicaid rate includes depreciation expense must adhere to the Medicare Principles of Reimbursement to account for the disposal of depreciable assets. If the disposal of depreciable assets in the reporting year results in a gain or aggregate loss below \$5,000, the adjustment will be made in the nursing facility provider's current year cost reporting allowable cost. The allowable gain is limited to the amount of depreciation previously included in the provider's allowable costs for the disposed assets.

In the event of a sale of the entire nursing facility and the termination of Provider participation in the Medicaid program, the terminating Provider must complete Medicaid Program Depreciation Recapture reporting schedules along with the applicable fiscal period cost report. Refer to the Cost Report Reimbursement Settlement, Depreciation Recapture Reimbursement Adjustment section of this appendix for additional information.

9.5 LOANS/BORROWINGS BALANCE REPORTING

Necessary and proper interest on current and capital debt is a Medicaid allowable cost. All interest expense, whether on current or long term debt, is classified as a plant cost. Determination of allowable interest expense will be in accordance with Medicare allowable cost principles. However, there are reimbursement limits for determining the Plant Cost Component specific to Medicaid which are addressed in the Rate Determination section of this appendix.

Medicaid requires nursing facilities to report the loans and borrowings balance in the annual cost report. The cost report instructions identify the schedules that must be used to report borrowing principle balances. The nursing facility must report the beginning balance and monthly end balance of outstanding allowable loans and borrowings for the period corresponding to the cost report year. The loans and borrowings in the borrowing balance report must only include the outstanding loans or other liability obligations for which the nursing facility is claiming interest expense related to that borrowing principle. If the nursing facility is filing a cost report claim for interest expense as an allowable cost, the nursing facility must document the corresponding borrowing obligation related to the interest expense. The outstanding borrowing balance is defined as the allowable borrowing principle amount on which the interest rate, normally expressed as an "interest rate percentage", is applied for the purpose of calculating the interest expense applicable to the specific cost report period.

Loans from related parties or unallowable borrowings must be excluded from the cost report borrowing balance schedule. The interest incurred on excluded borrowings must be removed from incurred interest costs in a like manner. Interest income or investment income which is required to be offset to interest expense in the cost report period must not be considered a reduction in the outstanding borrowing balance principle.

Mortgage principle balances or similar finance arrangements for the purpose of nursing facility or business acquisition must be separately identified from other loan balances in the cost report borrowing balance schedule. Examples of other loan balances include working capital and miscellaneous asset acquisition purpose loans. In the event of refinancing and co-mingling of separate loan balances into a single finance arrangement, the nursing facility must identify the appropriate portions of the combined financed amount used for different purposes and maintain the separation for cost reporting. Likewise, multiple loans for the same purpose must be combined for the appropriate category for cost reporting.

Borrowing principle obligations incurred by a home office must be reported on the individual nursing facility cost report borrowing balance worksheet only for loans directly associated with financing the individual nursing facility asset purchases or facility acquisition costs. The interest expense applicable to such loans must also be identified, directly charged to the individual nursing facility, and reported as interest expense for the nursing facility. Working capital and other loans incurred directly under the home office operation and not related to nursing facility acquisition are considered general administrative costs and are included, to the extent determined necessary and reasonable, in the home office cost allocation to the individual nursing facilities and other business operations of the corporate chain.

Allowable outstanding loan balances of landlord entities that are leasing nursing home facility assets to a provider must be disclosed and reported in the provider's annual cost report. Borrowings balance cost reporting and allowable cost policies are applicable to the reporting of the underlying cost of the landlord entity in the same manner had the borrowings been recorded on the financial records of the provider.

9.6 COST FINDING

Cost finding is the process of recasting the data from the accounts kept by a provider to determine the cost of services rendered, allocating direct costs, and prorating indirect costs in accordance with Medicare Principles of Reimbursement, except where modified by Medicaid policy. Medicaid determines reimbursement rates for nursing facility providers based on specific categories of cost, as addressed in other sections of this appendix.

9.6.A. COST ALLOCATION BASIS

The Medicaid cost reporting process establishes the cost finding process. Indirect and non-revenue producing cost centers are allocated using a statistical basis that reflects an equitable measurement of the services provided to, or benefits derived by, a revenue producing or non-reimbursable activity. The nursing facility must develop and maintain adequate statistical data to corroborate the basis of the cost allocation. Adequacy requires that the data be accurate and include sufficient detail to accomplish the purpose for which it is intended. When completing the allocation of the general service cost centers, the nursing facility provider should first allocate those cost centers that render the most services to, and receive the least services from, other cost centers.

9.6.A.1. FACILITY SQUARE FOOTAGE AND SPACE REPORTING

A facility space cost allocation is based on square footage identified with specific service areas or activities occupying and using that space. Square footage is an allocation base that may be applicable for multiple indirect cost center activities. However, for cost centers where the basis is the same (e.g., square feet), the total statistical basis over which the costs are to be allocated will differ because of the prior elimination of cost centers that have been allocated.

A consistent and uniform process must be used by the nursing facility for compiling and charging the square footage to each service activity that is primarily benefiting from or using that space. Facility space that is used for multiple activities must be documented and connected to each applicable activity based upon current data that reflects actual use and is available for audit verification. Hallway space located within a specific department or service area is considered usable space for that department. Areas of the

facility for general use, such as connecting hallways, reception areas, lobby, and elevator, used or benefiting all service activities are considered common space. Identifying and counting common space must be consistent for all service areas of the facility.

For example, common space in one service department cannot be excluded from space allocated to that service activity, while similar common space located in other service departments is included in the space allocation of other service activities. The allocation basis must apply either the gross method, where all common area is included and charged to the specific services activity, or the net method, where common space located within the identified service area is not charged to the service activity. The nursing facility's handling of common space area in the cost report allocation must result in equitable distribution of costs associated with the common space to appropriate activities. A change in the process or methodology that the nursing facility uses for allocating space is a change in allocation basis, so appropriate notice and a request must be made to the SMA.

9.6.A.2. ANCILLARY/THERAPY SERVICES SPACE REPORTING

Facility space used for ancillary services delivery must be identified and charged to the appropriate ancillary services cost center. For example, space used for skilled rehabilitation services provided based on a physician's order must be allocated to the appropriate ancillary cost center.

Accounting procedures must be established and implemented to reflect individual cost centers for reimbursable therapy and pathology services. Irrespective of the therapist or pathologist's status as an employee, contractor or independent provider, the nursing facility must record all charges as income and all expenditures for supportive personnel, equipment and its maintenance, supplies and other costs directly attributable to reimbursable expenses in these cost centers.

9.6.A.3. ANCILLARY/THERAPY SERVICES ADMINISTRATIVE OVERHEAD

Medicaid requires that administrative overhead associated with ancillary services be allocated to the ancillary services cost center. The required basis for distribution of administrative costs to the benefiting activities of the nursing facility is accumulated costs. The accumulated costs base generally includes all service activities of the nursing facility.

In specific situations, the nursing facility may request exclusion of certain ancillary service groups from the administrative cost overhead allocation in the Medicaid cost report. The determination applies only to those service items where the billing to the third party only allows for the recovery of the direct cost of the service. The provider must demonstrate considerable inequity of the overhead cost allocation to these service activities that have been identified as excluded groups under the Medicare Principles of Reimbursement and that it is not incurring additional costs beyond the activity for arranging for the services. The incidental costs for inclusion of the ancillary service bill preparation must be as follows:

Medicaid Provider Manual

- The facility representatives arrange for the services to be performed by an agency or entity that is not part of the nursing facility operation.
- The nursing facility is not directly involved in providing the ancillary service.
- The nursing facility does not incur any costs for supplies and equipment necessary to perform the service.
- The ancillary service is being recorded through the accounting records and billing system of the nursing facility for the consolidated billing of the services provided to the nursing facility resident.
- The nursing facility does not have physical space dedicated for the purpose of delivery or rendering of the ancillary service. Dedicated space is considered space that is used predominantly for the purpose of the ancillary service delivery.
- The nursing facility is not charging a mark-up related to the billing of the service.

If the nursing facility is allowed to bill for, or recover revenue in excess of, the direct cost of the services, the statistical and fiscal worksheet of the cost report may be adjusted to reflect the revenue received. The amount of revenue exceeding the direct cost will be considered the overhead amount that must be reflected as an adjustment to the "miscellaneous expense" in the Administrative and General cost center, in addition to the direct cost adjustment to exclude the ancillary service cost from the cost allocation step-down. The nursing facility must demonstrate that the excess revenue is a fair representation of the overhead cost or activity associated with providing the service. If this requirement is not met, the ancillary services activity must be included in the administrative cost allocation basis for the apportionment of overhead to the activity.

9.6.A.4. ANCILLARY GROUP EXCLUSION

A provider may request an ancillary group exclusion. The exclusion request must be approved by RARSS. The request must include the parameters under which the exception is requested. If the request is approved by RARSS and it is later determined non-applicable, the exclusion is void for that entire cost report period.

9.6.A.5. CHANGE OF OWNERSHIP – EXCLUSION REQUEST

If a CHOW occurs, the prior owner's ancillary group exclusion is no longer applicable. The new owner may submit an ancillary group exclusion request to RARSS for approval. The exclusion process is outlined in the Ancillary Group Exclusion subsection of this appendix.

9.6.B. CHANGE IN COST ALLOCATION BASIS

A provider who wishes to change the allocation basis for a particular cost center, or the order in which the cost centers are allocated, must submit a written request to the RARSS. (Refer to the Directory Appendix for contact information.) The request must include reasonable justification and supporting documentation that the new basis is more accurate and appropriate for allocation of the cost activity for Medicaid reimbursement determination. The request must be made prior to the beginning of the cost-reporting period in which the change is to apply. The effective date of the change will be the

Medicaid Provider Manual

beginning of the cost-reporting period for which the request has been made. Failure to submit a timely written request will result in an audit adjustment. The nursing facility provider must maintain both prior and proposed statistics base data until the change is approved.

Medicaid may reject a submitted cost report if a request to change the allocation basis has not been submitted and approved by RARSS. If the previous allocation basis methodology has not been maintained for the current year, Medicaid may accept previous year's statistics for the current year cost reporting.

9.6.C. RELATED OR CHAIN ORGANIZATION COST ALLOCATION

The Medicare Principles of Reimbursement define a related organization as an organization linked to a nursing facility provider by common ownership or control, including a chain organization. Medicaid extends an option for cost allocation for related or chain organizations. An immediate family relationship establishes an irrefutable presumption of relatedness.

For Medicaid purposes, a chain organization consists of a group of two or more nursing facilities, or at least one nursing facility and any other business or entity owned or operated and controlled by one organization. To the extent that the home office furnishes services related to patient care to the nursing facility, the reasonable costs of the services are included in the nursing facility's cost report. Medicaid policy for related organization costs is determined in accordance with provisions in the federal Provider Reimbursement Manual for related organization costs. Exceptions to the application of federal provisions are addressed in the Cost Classifications and Cost Finding and the Allowable and Non-Allowable Costs sections of this appendix.

Home office costs apportioned to individual nursing facilities through the Home Office Cost Statement are classified as support costs. Cost report requirements for home office are addressed in the Cost Reporting section of this appendix.

Costs incurred by a nursing facility for services furnished by a related organization are allowable. The cost allocated to the nursing facility cannot exceed the price of comparable services, facilities, or supplies that could be purchased in competitive market conditions. The principles of reimbursement applied for the determination of allowable cost to the nursing facility are also applicable to the related organization. If a cost would be unallowable to the nursing facility, it would be unallowable to the related organization.

The operating costs of a related ownership organization are allocated to an individual nursing facility as a "purchased service" and must be identified within the appropriate cost center for Medicaid cost reporting. The type of service determines if the costs qualify to be apportioned between base and support cost using the industry-wide base and support cost percentages. If the service does not qualify to be apportioned by this method, the allocated costs are classified as support costs in the individual nursing facility. Refer to the Cost Classifications and Cost Finding section of this appendix for additional information.

For cost reports where the home office and the individual nursing facility's fiscal year ends are different, a provider must elect to forego the inclusion of an allocation of the

Medicaid Provider Manual

current year's home office costs in the current year's individual provider cost report. A written request must be submitted annually to RARSS, with the individual provider's cost report signed by the appropriate corporate official acknowledging that the cost report is being submitted with the prior fiscal year's home office costs. The written request must also indicate that the corporation is waiving the right to inclusion of any allocation of the current year's home office costs in the current year's individual provider cost report.

For example, a home office fiscal year end (FYE) is December 31 and the individual facility's FYEs are May 31, August 31, September 30 and December 31. For individual facility cost reporting for fiscal year 2018 ending in May, August, September and October, the individual facility must elect to report only the home office costs from the FYE December 31, 2017 home office cost report. The home office allocation of costs from FYE December 31, 2017 to the individual facility would be reported and audited. During the audit of the individual facility cost report, adjustments to allocate actual FYE December 31, 2018 home office costs would not be made. For individual facilities with FYE December 31, 2018, the home office costs from the FYE December 31, 2018 cost report would be reported.

9.7 DISTINCT PART UNIT REPORTING

For reimbursement purposes, the Nursing Facility is defined as the unit that is certified for participation in the Medicaid program, whether that unit comprises all of, or a distinct part of, a larger institution.

Certification regulations require that a distinct part be physically distinguishable from the larger institution and fiscally separate for cost reporting purposes. The provider must demonstrate to Medicaid that the system used for recording the hours of nursing services can be audited and equitably allocates the nursing services costs between the distinct part and other parts of the facility. The nursing services costs are only the gross salaries and wages of nursing and related personnel, such as RNs, LPNs, and CNAs. Costs applicable to general services areas of the institution must be allocated in accordance with the Cost Finding section of this appendix.

Nursing services costs allocated to that distinct part of the facility must relate only to services provided to those residents. While a provider may choose the record keeping method used to allocate these costs, the system must be capable of accurately reflecting the hours of nursing service applicable to the distinct part and other parts of the institution. Various systems may be employed to record and accumulate the hours of nursing services such as actual time spent taken from payroll records, assignment schedules, sign-in sheets, etc. Providers wishing to use any other method that does not identify actual time must obtain written approval from the RARSS prior to changing its cost allocation method. The request must identify the reason for the change and must demonstrate that the proposed method is representative of actual nursing staffing within the facility and results in an equitable and accurate allocation of nursing services costs.

A nursing services cost allocation alternative may be applied only with the prior written permission from RARSS.

An institution may have more than one Medicaid distinct unit in specific cases where Medicaid has certified beds as special use for specialized nursing care. The specialized nursing care beds must be physically distinguishable, within a designated area, and identified as a separate nursing bed class for Medicaid reimbursement. Requirements for reporting nursing services costs also apply to nursing

services for residents in specialized nursing care beds. The nursing facility must have prior approval from Medicaid for participation in a program for specialized nursing care.

9.8 DAY CARE SERVICES PROVIDED IN THE NURSING FACILITY

According to federal principles, day care services provided to an employee's dependent are not a fringe benefit when furnished for the convenience of the provider. Medicaid considers day care services provided to an employee's dependent a convenience to the provider due to potential support of staff recruitment and retention.

9.8.A. EMPLOYEE DEPENDENTS

According to federal principles, the costs of operating a day care center for the children of a facility's or related facility's employees must not be reported as an employee fringe benefit. The costs are allowable to the extent that the amount is reasonable.

"Reasonableness" means that the services are provided in accordance with the policies and regulations established for the provision of such services and must take into account both direct and indirect costs. The provision of services must also be considered reasonable in that the costs of operating a facility demonstrate sufficient benefits. For example, the number of children participating justifies the provision of services.

Total cost must not exceed what a prudent and cost conscious buyer pays for like services. If costs are determined to exceed such level and the nursing facility cannot provide clear evidence that the higher costs were unavoidable, the excess costs are not allowable. The day care center operations must be provided in accordance with, and satisfy applicable regulatory requirements governing the operations of, such activities. The nursing facility must maintain accounting records and documentation to demonstrate the total cost and utilization of day care services.

The following costs are non-allowable:

- diapers
- oils
- towelettes
- similarly used hygiene products
- lotions

9.8.B. SERVICES PROVIDED TO NON-EMPLOYEE DEPENDENTS

If a provider renders services to non-employee dependents, the day care center must be established as a separate entity even if services are also provided to employee dependents. Medicaid will allow costs relative to intergenerational activities as an offset when the day care center suffers a financial loss, which is limited to the lesser of total documented intergenerational activities or the amount of the loss. Intergenerational activities must be documented, organized activities between the children attending the day care and the nursing facility residents.

The nursing facility must maintain accounting records and documentation to demonstrate the total cost and utilization of day care services.

9.9 NURSE AIDE TRAINING AND COMPETENCY EVALUATION PROGRAM (NATCEP) AND COMPETENCY EVALUATION PROGRAM (CEP)

The Omnibus Budget Reconciliation Act (OBRA) of 1987 and 1990 requires that any nurse aide employed in a nursing facility complete a competency evaluation program. Medicaid will reimburse a Medicaid certified nursing facility for the Medicaid share of allowable costs directly related to meeting the nurse aide training and competency evaluation requirements. Reimbursement includes only costs incurred with a NATCEP or CEP approved by the SSA. Medicaid reimbursement applies only to Certified Nurse Aides (CNA) working in a Medicaid certified nursing facility and are not available to CNAs in other residential or patient care settings.

A nurse aide who is employed by a nursing facility or who has received an offer of employment from a nursing facility on the date on which the nurse aide begins a NATCEP may not be charged for any portion of the cost of the program. The nursing facility must reimburse newly employed CNAs who have personally paid for NATCEP or CEP costs prior to employment in the facility, in accordance with criteria identified in the Nurse Aide Reimbursement section of this appendix. Medicaid in turn reimburses the nursing facility.

Providers may obtain reimbursement from Medicaid for CNA costs. The reimbursement process and necessary forms are available on the MDHHS website. (Refer to the Directory Appendix for website information.)

9.9.A. NURSE AIDE COMPETENCY EVALUATION PROGRAM AND NURSE AIDE REGISTRY

Nurse aide candidates must pass both a clinical skills test and a knowledge test in order to become certified. Fees for the individual nurse aide to take the tests, and retake each test up to three times, are allowable costs for nursing facility reimbursement. Refer to the Nursing Facility Reimbursement and Nurse Aide Reimbursement subsections of this appendix.

When a nurse aide has successfully passed the CEP, their name is placed on the Michigan Nurse Aide Registry. Fees relating to initial registration and biennial registry renewal are allowable costs for nursing facility reimbursement. For currently employed nurse aides, the nursing facility is responsible for the direct payment of biennial registry renewal fees. Refer to the Nursing Facility Reimbursement and Nurse Aide Reimbursement subsections of this appendix.

Information about training requirements, competency evaluation program and registry data is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

9.9.B. NURSING FACILITY REIMBURSEMENT

Reimbursement to the nursing facility for NATCEP related costs is calculated as an add-on to the routine per diem rate. The Nurse Aide Training and Testing Program Interim Reimbursement Request (MSA-1324) and instructions are available on the MDHHS website. The total NATCEP add-on amount will be adjusted through the annual cost report settlement process. The Medicaid share of the costs is computed based on the ratio of Medicaid resident days to total resident days for all nursing care provided in the

Medicaid Provider Manual

facility during the cost report period. Refer to the Cost Report Reimbursement Settlement section and the Rate Determination section of this appendix for additional information.

The NATCEP cost center on the Medicaid cost report must be used to report the following:

- Costs of conducting a nursing facility based NATCEP.
- Costs of having employees participate in an approved NATCEP outside the nursing facility.
- Costs of employee competency testing by a regional testing facility.

The costs and staffing levels relating to and charged to the NATCEP cost center must not be included in the nursing facility determination of routine nursing care costs.

The determination of allowable NATCEP costs is made in accordance with provisions in the federal Principles of Reimbursement established for the Medicare Program, and cost limitations in Medicaid policy. Training and evaluation program costs claimed for services and supplies furnished to or purchased by the facility from related organizations must adhere to related party allowable cost principles. The cost of such transactions must not exceed the cost of like items or services in an arms-length transaction with a non-related organization, or the actual cost to the related organization, whichever is lower.

The following are not NATCEP costs and must be classified as routine nursing care costs on the cost report:

- Administrative overhead in a facility-based training program.
- Space costs in a facility-based training program.
- Uniform allowance costs.
- Required in-service training.

NATCEP and CEP allowable cost must only include the costs of activities or items that are directly related to providing approved training and the competency evaluation process.

The following table contains eligible training and evaluation activities.

Training Staff	<p>Salaries and wages, employee benefits and payroll taxes for conducting training and evaluation activities, including supervised practical training, and direct time devoted to development and preparation for conducting the NATCEP.</p> <p>Payroll costs allowed for NATCEP do not include the cost of time that the training staff devote to routine in-service training activities, general nursing administration or direct patient care, except for supervised practical training. These costs must be classified as routine nursing care cost for consideration in the routine per diem rate.</p>
Training Consultants	<p>Costs incurred for non-facility staff to assist in developing and conducting the facility's NATCEP.</p>

Medicaid Provider Manual

Student Staff	<p>Salaries and wages, employee benefits and payroll taxes incurred for the time the student is enrolled in the approved training program, i.e., classroom and required supervised practical training. A reasonable time allowance for student employees traveling to and from the off-site training location or competency evaluation, in accordance with a nursing facility's established and documented travel policy, is allowable as NATCEP cost.</p> <p>Payroll costs allowed for NATCEP do not include the cost of staff time for patient care activities that the nurse aide is performing during the period the student is completing the training program. These costs must be classified as routine nursing care cost for consideration in the routine per diem rate.</p>
Training Program Supplies	Costs of supplies and materials used in conducting an approved NATCEP.
Training Program Transportation	<p>Travel or transportation costs incurred by facility staff in conducting the NATCEP activity, and for transportation or travel reimbursement to student staff for off-site NATCEP or CEP attendance. Refer to the Facility Vehicle and Transportation, Allowable and Non-Allowable Cost section of this appendix for mileage allowance provisions.</p> <p>Use of a facility owned vehicle for staff transportation for training is not charged to NATCEP. Facility vehicle operation cost must be classified as administrative overhead and is considered in the routine per diem rate.</p>
Outside Contracted NATCEP Paid Directly by the Facility	Cost to obtain approved nurse aide training of facility employees by an outside entity approved NATCEP. The nursing facility is responsible to ensure that the contractor is an approved NATCEP.
Outside Contracted NATCEP Costs Reimbursed to Employee	Cost for reimbursement to an employed CNA who had personally paid for an approved NATCEP participation and completion prior to being employed in the facility. Refer to the Nurse Aide Reimbursement subsection of this appendix for additional information.
Competency Evaluation Fees Paid Directly by the Facility	Fees paid by the nursing facility to a State-approved competency evaluator. This includes testing and retesting fees, rescheduling fees, and nurse aide registry.
Competency Evaluation Fees Reimbursed to Employee	Cost for reimbursement to an employed CNA who had personally paid for State-approved competency evaluation and registration fee prior to being employed in the facility. Refer to the Nurse Aide Reimbursement subsection of this appendix for additional information.
Miscellaneous Costs	<p>Allowable costs that are not specifically identified in another category include, but are not limited to, the following items:</p> <ul style="list-style-type: none"> Rental costs for space located out of the facility are allowable only if the space is used solely for the training and competency evaluation program. Space costs not meeting this requirement are reimbursable with the Plant Cost Component of the routine per diem. Reasonable rental expense for training equipment necessary for conducting an approved training program. Nurse aide biennial Registry Document renewal fees for current employees.

Medicaid Provider Manual

Equipment Purchased	Equipment purchased and used specifically for the nursing facility based NATCEP are reported as NATCEP cost center costs for Medicaid cost reporting and reimbursement purposes. NATCEP equipment costing less than \$5,000 may be expensed in the year of acquisition and reported in the NATCEP cost center. Equipment acquired as part of an integrated system costing greater than \$5,000 must be amortized at an annual rate of 15% for each cost reporting year the equipment is used in the NATCEP, up to a maximum of seven years. Instructions for NATCEP equipment reporting are included in the annual cost reporting instructions.
----------------------------	---

9.9.C. NURSE AIDE REIMBURSEMENT

A nursing facility must reimburse a newly hired CNA if the CNA paid for nurse aide training, competency evaluation and registry, and completed the approved training program within 12 months prior to employment in that facility. The nursing facility is not required to reimburse the CNA in cases where the expenses were paid by an employment or education training program or were reimbursed by the CNA's previous employer. The nurse aide should not be reimbursed for more than 100 percent of the NATCEP or CEP costs they paid.

The nursing facility is responsible to ensure that a newly hired CNA who requests reimbursement of training and testing expenses has not already received payment for these costs. An aide who paid for any of these eligible costs and received payment of a portion of the expenses from prior facility employment is eligible for only the remaining balance from the new employer.

The CNA must request reimbursement by submitting to the nursing facility the Nurse Aide Training and Competency Evaluation Program, Certified Nurse Aide Training Reimbursement form (MSA-1326), available in the Forms Appendix and on the MDHHS website. The reimbursement should be requested within the first six months of employment or work as a certified CNA.

NATCEP costs that are eligible for reimbursement to the individual nurse aide include:

- Training program cost including fees for textbooks and required course material up to a maximum of \$650. Medicaid will update the maximum allowable reimbursement limit effective October 1, 2006 and biennial thereafter, based on the Global Insight's Skilled Nursing Facility Market Basket Without Capital Index corresponding to that update period. The training program maximum reimbursement amount will be updated biennially on the RARSS website.
- Competency Evaluation Program testing fees, including retesting fees; CEP testing required due to the nurse aide registry document expiration; and rescheduling fees.
- Registry or Registry Renewal Document fees that the CNA personally paid within 24 months prior to being employed in the nursing facility.

For cost reporting and audit purposes, the nursing facility must maintain a copy of the MSA-1326 signed by the employee and documentation reflecting reimbursement to the employee. This documentation must include a copy of a receipt for cash payment, a copy of a cancelled check, or a credit card receipt showing the amount paid by the nurse

Medicaid Provider Manual

aide and the date of payment, as well as copies of the nursing facility's cancelled checks disclosing reimbursement to the employee.

The nursing facility has the option to reimburse the individual via a one-time payment or payment installments. The reimbursement to the individual, regardless of full-time or part-time employee status, must be fully paid within six months of the individual's date of employment, or must be prorated based on their dates of employment in the facility if employed for less than six months. If the nursing facility fails to reimburse a CNA employed in the facility within this timeframe, the unpaid balance will not be an allowable NATCEP or routine nursing care cost. This determination does not relieve the nursing facility of its obligation to reimburse the nurse aide. Wages may not be reduced to offset the facility's obligation to pay the nurse aide for training, competency evaluation, and registry costs.

The nursing facility is not obligated to pay the remaining balance of nurse aide training costs at the time an employee who has worked less than six months leaves facility employment. The CNA has the opportunity to recoup the non-reimbursed costs through subsequent employment at other nursing facilities. The facility should properly record payments so that the unpaid amount is not carried as a payment obligation.

9.9.D. NURSING FACILITY LOCKOUT AND LOSS OF NATCEP APPROVAL

A provider with a facility-based training CNA program is not eligible for Medicaid reimbursement of training costs when it has been issued a final notice from CMS or the SSA of the withdrawal of NATCEP approval, or of a NAT prohibition (lockout). For Medicaid reimbursement purposes, the lockout effective period coincides with the SSA period notice to the nursing facility. The nursing facility must not claim Medicaid reimbursement for costs associated with any facility-based training class beginning after the withdrawal or lockout effective date identified in the final notice. Nurse aide students beginning training prior to the withdrawal effective date are allowed to complete training, and the related costs to complete that training class are eligible for NATCEP reimbursement. Nurse aide training costs incurred for that facility based program subsequent to completion of that student class are not allowable NATCEP costs. This disallowed cost is also not allowable under routine nursing care cost.

Although the nursing facility experiencing approval withdrawal or lockout status cannot conduct its own training, the nursing facility must provide and reimburse for training and competency evaluation of its new nurse aide employees at approved sites. Such costs are eligible for Medicaid cost reporting and reimbursement in the annual cost report under the appropriate NATCEP cost categories. Nurse aide reimbursement for eligible training and competency evaluation personally paid expenses are allowable to be reported as NATCEP cost in the nursing facility annual cost report.

In the event that the nursing facility has been granted a waiver for a NAT program prohibition or lockout by the SSA, the nursing facility must comply with the provisions of the nursing facility waiver request and the requirements set forth by the SSA in the waiver approval. The facility-based NATCEP operating under a waiver is subject to audit by Medicaid for compliance with these requirements. If the nursing facility fails to conduct the program in accordance with these requirements, the training program

expenses are not allowable costs for NATCEP or routine nursing cost reimbursement by Medicaid.

9.10 BEAUTY AND BARBER SERVICE COST CENTER

Personal services for residents, such as simple barber and beautician services (e.g., shaves, haircuts, shampoos, and simple hair sets), that residents need are considered routine patient care. The provision of such services is reimbursed in the routine per diem rate when provided routinely without charge to the resident in the nursing facility. Personal services provided by a professional beautician or barber are unallowable costs.

If the nursing facility designates an area for providing non-routine personal hygiene services, such as professional manicures, or hair styling, costs must be separately reported and accounted for in the cost report. Direct and overhead costs related to these services must be separately accounted for in this special services cost center and should not be included in the cost of providing routine nursing care.

9.11 SPECIAL DIETARY COST CENTER

Medicaid provides for reimbursement outside the per diem rate to non-profit nursing facilities for the cost of meeting residents' special dietary needs for religious reasons. Nursing facilities requesting reimbursement must report these costs as a separate cost center in the Medicaid annual cost report. Direct costs may include food purchase, salary and wages for the extra staff time for preparation, supplies and kitchen utensils necessary for preparation and service. The costs applicable to plant operations costs related to the special dietary needs will be determined through the Medicaid cost finding process.

9.12 HOSPITAL LEAVE DAYS

A separate accounting of costs incurred due to hospital leave days is not necessary.

9.13 NON-AVAILABLE BEDS

In special circumstances, nursing facility beds may be designated "non-available for occupancy" for Medicaid cost reporting when the patient care rooms in which the beds are located are not used for resident care. Beds with a "non-available" designation remain licensed or certified; the designation is for Medicaid cost reporting and reimbursement determinations only. An approved non-available bed plan reduces the total number of beds used for calculating available bed days for the annual cost report period coinciding with the period of the non-available bed plan. Non-available beds must be located in a discrete area and readily identified for statistical cost reporting. During the period the area is designated non-available for patient care, Medicaid does not reimburse for variable and plant costs attributed to the area designated as having non-available beds.

9.13.A. QUALIFYING CRITERIA

A non-available bed plan must include all of the licensed beds in a patient care room. The rooms must be a discrete area and primarily consist of a contiguous physical arrangement of rooms. Rooms may not be a random collection of individual rooms or beds located throughout the nursing facility.

Medicaid Provider Manual

Common physical space located adjacent to or within the designated rooms area will normally be included in the designated non-available bed area. Planned use of any common areas within the designated non-available bed area must be disclosed in the written notice to the RARSS.

Rooms with non-available beds may not be used for resident care service regardless of payer source nor can the space be used for any other normally reimbursable purpose.

Resident rooms that are not used for resident care do not qualify for non-available bed designation. Although the rooms may be used for alternative services, the beds located within the room area must continue to be counted as available for resident care. Physical plant area used for alternative use must appropriately be charged to the applicable alternative services cost center if the services activity results in ancillary care services or other revenue services.

The written request must be submitted within 30 calendar days of the date that the provider removes the beds from service.

9.13.B. WRITTEN NOTICE AND REQUEST FOR PLAN APPROVAL

The provider must submit a written request for a non-available bed plan to RARSS. The RARSS must receive the request within 30 calendar days of the date that the beds are to be removed from resident care service. Non-available bed plan requests will not be approved on a retroactive basis. (Refer to the Directory Appendix for contact information.)

The written notice from the provider to RARSS must:

- Indicate the date that the beds will be removed from resident care service and the expected duration of the non-available plan.
- Indicate the reason for the request.
- Include a floor plan of the facility that marks the beds to be designated as non-available.

The RARSS will review the request and provide a written response of approval, denial or a request for additional information. If approved, the RARSS will notify the SSA of the non-available bed designated rooms and effective period.

9.13.C. LIFE OF AN APPROVED PLAN

Beds must remain non-available for not less than the balance of the provider's fiscal cost reporting year in which the beds are deemed non-available plus the entire following fiscal year. An exception is when the non-available bed plan is effective on the first day of the provider's fiscal year. The cost report year may qualify as the entire period of the non-available bed plan if the cost report period is not less than 12 months.

Non-available bed designations will be effective on the first day of the month. If the notice is not received within the required 30 calendar day period, the plan will become effective on the first of the month in which RARSS received the notice if the beds have not been utilized during that month.

Medicaid Provider Manual

The initial period of the non-available bed plan expires upon completion of the minimum required period.

The nursing facility may request up to two extensions of 12 months each following this minimum period. The agreement may be extended on the basis of the provider's fiscal year. A request for extension must be submitted in writing to the RARSS 30 calendar days prior to expiration of the initial plan. The request for a second extension must be submitted to RARSS 30 calendar days prior to expiration of the first extension. The requests must include at least one of the following items:

- The same rooms and bed area.
- A revision to bring some, but not all, of the beds back into service (if applicable).
- A revision to increase the number of non-available beds that includes all of the beds already designated as non-available.
- A change in the room and bed designation area that is equal to the number of beds designated as non-available in the initial plan.

Requests for a revision to bring some, but not all, beds back into service must include:

- The same rooms and the same bed area.
- If applicable, the change in room and bed designation area that is equal to the number of beds designated as non-available in the initial plan.

The extensions must meet the elements of the qualifying criteria, notice requirements and related policy for initial non-available bed requests.

Non-available bed plans expiring on or after April 1, 2005 are limited to two 12-month extensions. When a provider's initial or extended non-available bed plan ends, the nursing facility must return the beds to service or decertify the beds from Medicaid participation. Medicaid will not approve a non-available bed plan that substitutes beds elsewhere in the facility for the formerly non-available beds.

The nursing facility will not be eligible to submit a new non-available bed plan for 24 months following the expiration of the previously approved plan.

A provider may only request a grace period after the final extension period if the provider can demonstrate progress to place the non-available beds into resident care service. The request for a grace period must be made to MDHHS Long Term Care Operations 30 calendar days prior to the expiration of the final extension period. (Refer to the Directory Appendix for contact information.) The request for a grace period must be submitted before expiration of the final extension period, and must meet the elements of the qualifying criteria, notice requirements and related policy for initial non-available bed requests. The request must specify the date that the beds will be available for occupancy and may not exceed 12 months. An example for such action is gradual facility renovation involving periodic non-available beds in a nursing unit and replacement with non-available beds in another unit as renovation plans progress.

Medicaid Provider Manual

Nursing facilities holding a written agreement with an accredited medical school instructing students in providing geriatric care may request consideration for an exception to policy in this subsection (Life of an Approved Plan). Requests must be submitted in writing to the MDHHS LTC Reimbursement and Rate Setting Section (RARSS) and should outline the provisions of the agreement, stating that the medical school staff determines admissions into the program and facility. The request must establish an area in the facility that is a distinct unit for the purpose of conducting the educational program, and the area must continue to meet all other non-available bed plan requirements. A copy of the agreement or contract between the facility and the medical school must be provided to RARSS with the exception request. If the agreement or contract undergoes change, a copy of the new terms of agreement must be submitted for approval prior to implementation.

All requests for an exception to policy will include a review of the facility's historical and current survey performance. Criteria regarding survey history (found in the Criteria for Evaluation of Medicaid Bed Certification Applications subsection of the Nursing Facility Certification, Survey & Enforcement Appendix of this manual) are also applicable to this exception request.

The provider must meet all appropriate certification requirements for distinct part units for the remaining Medicaid beds. Additional beds may have to be decertified in order to meet the distinct nursing unit requirements. The nursing facility may request re-certification of these beds for Medicaid participation after a 24-month period. A request to re-certify must meet all current Medicaid certification requirements.

9.13.D. CHANGE OF OWNERSHIP (CHOW)

The non-available bed plan approval expires with a change of ownership of the nursing facility. If the new owner wishes to continue the non-available bed plan, they must submit a written request to the RARSS within 90 calendar days of the CHOW. A non-available bed plan submitted after the 90-day period will be considered a new request and must satisfy the qualifying criteria and related policy requirements. If the new owner does not request continuation of the existing plan, the beds will be deemed available for occupancy effective with the date of ownership change.

The new owner may apply to extend the plan to coincide with its cost reporting period by following the extension request policy outlined in the Life of an Approved Plan subsection. The nursing facility change of ownership does not relieve the nursing facility from the restrictions for non-available bed designation limitations for plan extensions other than allow for coinciding with the cost report year of the new ownership.

9.13.E. AMENDING A PLAN

The nursing facility may amend an approved non-available beds designation by submitting a written request to the RARSS. (Refer to the Directory Appendix for contact information.) A non-available bed plan may be amended only one time during the life of the non-available bed plan. A request for an amendment must include the same information as an initial request and will be reviewed using the same criteria. A plan amendment increasing the number of non-available beds is subject to the minimum

Medicaid Provider Manual

period requirement and the designation of all the beds must be effective for the period of not less than the balance of the provider's current fiscal cost reporting year in which the beds are deemed non-available plus the following fiscal cost report year.

A nursing facility holding a written agreement with an accredited medical school that instructs students in providing geriatric care may be permitted to amend a non-available plan more than once in the plan's approved period. Requests to amend a plan under these circumstances must adhere to the requirements outlined in the Life of an Approved Plan subsection of this appendix. As noted, all requests will include a review of the facility's historical and current survey performance consistent with the Criteria for Evaluation of Medicaid Bed Certification Applications subsection of the Nursing Facility Certification, Survey & Enforcement Appendix of this manual.

9.13.F. PENALTY FOR USE OF NON-AVAILABLE BEDS

Admitting residents to any beds in the area designated non-available for occupancy, regardless of payer source, before the end of the plan negates the non-available bed agreement. All beds covered by a non-available bed agreement that is negated during the initial period of the plan will be considered available for patient care for the plan's entire initial period.

All beds covered by a non-available bed agreement that is negated during a plan's extension period will be considered available for patient care beginning with the first day of that cost reporting period of the extension.

9.13.G. RETURNING BEDS TO SERVICE

All of the beds in the non-available bed plan will be considered returned to service and available for occupancy when the non-available bed plan expires.

In special circumstances, such as a sudden increase in demand due to closure of a nearby facility, non-available beds may be returned to service before the end of the approved plan with prior approval of the RARSS. A nursing facility with an approved non-available beds plan may submit a written request to return beds to nursing care if the individual nursing facility experiences the need for the beds due to the exception circumstances. The request must identify the reason for the need and the specific beds and room designations being made available. RARSS will provide immediate review and response to the nursing facility request.

9.13.H. PLANT COST CERTIFICATION

A provider with an approved non-available beds plan has the option to submit to a Plant Cost Certification for the cost report fiscal period in which the beds are approved as non-available for occupancy or the termination of the plan. Refer to the Plant Cost Certification Section in this appendix for additional information.

9.13.I. COST REPORTING

The variable and plant costs attributed to the area designated as non-available and the related capital asset cost are not Medicaid reimbursable costs. The non-available rooms and bed numbers must be reported as a Non-Available Beds cost center on the provider's Medicaid cost report.

Each general service cost center must be evaluated separately to determine if the non-available bed area benefits from the service. The nursing facility may charge specific costs to the Non-Available Beds cost center only when the dollar amount is identifiable. Costs that cannot be specifically identified must be apportioned to the non-available beds cost center using the Medicaid cost report allocation methodology. The statistic or measure used for the general services cost center must also be used to allocate costs to the non-available bed cost center.

Example: If square feet are used to allocate costs to the housekeeping activity, the general services cost center, then square feet must also be used to allocate costs to the non-available bed area. The allocation to the non-available bed cost center is zero when the non-available bed area receives no benefit from the general service.

Example: If a wing is designated as non-available and does not receive any housekeeping services, then the allocation to the non-available cost center is zero.

The reduction in available beds is included in the provider's cost report effective for the fiscal period in which the non-available bed plan is approved by the RARSS. For Medicaid reimbursement determination of tenure and allowable average borrowings, the percentage of the total plant asset costs applicable to available beds must equal the percentage of the facility remaining available for resident nursing care.

9.14 COMPLEX CARE

Medicaid-approved complex care cases provide an enhanced reimbursement rate to the facility due to the cost and/or complexity of nursing care or special needs of the beneficiary. Separate cost records are not required for identifying these costs. The Program has designated the special care revenue amount equal to cost. Providers with an approved complex care case must adjust the annual Medicaid cost report by removing the dollar amount of the total difference between reimbursement at the complex care rate and the established routine Medicaid rate from the appropriate nursing care costs. The approved complex care rate is identified on the Complex Care Prior Approval-Request/Authorization for Nursing Facilities form (MSA-1576) issued to the facility for the specific beneficiary.

9.15 QUALITY MEASURE INITIATIVE (QMI) SPECIAL COST REPORTING REQUIREMENTS

The nursing facility QMI provides payments to facilities based on their average quality measure domain rating on the Nursing Home Compare (NHC) website. For additional information about the QMI, refer to the Nursing Facility Quality Measure Initiative (QMI) subsection of the Rate Determination section of this Appendix.

The Quality Assurance Assessment Program (QAAP) tax levied for the QMI and the payment amount of the QMI are to be reported on the cost report the year they are applicable and in the following manner:

- The QAAP tax assessed during the cost reporting period is to be reported on the "Quality Measure Initiative Assessment" line of the cost report under the Administrative & General cost center.
- The amount of QMI payments in a cost reporting period are to be reported on the "Quality Measure Initiative Payment" line of the cost report under Routine Services Revenue.

The QAAP tax assessed is adjusted from the cost report in accordance with the Quality Assurance Assessment Tax subsection of the Allowable and Non-Allowable Costs section of this Appendix. An adjustment is also made to the cost report to remove the Net QMI Amount. The QMI adjustment may not exceed zero (i.e., the adjustment is either a negative amount or zero), and the adjustment amount is made to "Miscellaneous – Base" in the Medicaid Routine Care Unit #1 and Medicaid Routine Care Unit #2 cost center of the cost report.

Example: Facility A had \$150,000 in QMI QAAP tax assessed and \$250,000 in QMI payments during their 2019 cost reporting period, so Facility A would apply a -\$100,000 adjustment to the "Miscellaneous – Base" line in the Medicaid Routine Care Unit #1 cost of their 2019 cost report.

Example: Facility B had \$150,000 in QMI QAAP tax assessed and \$100,000 in QMI payments during their 2019 cost reporting period, so Facility A would not apply an adjustment to the "Miscellaneous – Base" line in the Medicaid Routine Care Unit #1 cost of their 2019 cost report.

SECTION 10 - RATE DETERMINATION

There are six classes of nursing care facilities for which there are specific reimbursement methods. For a definition of the six classes, refer to the Definitions section in this appendix. Providers reimbursed for care using a special reimbursement calculation or method are addressed at the end of this section.

The determination of a nursing facility's class is made by the SSA. If a nursing facility changes ownership or the services it provides such that a change in class is appropriate, the facility will be reimbursed according to the respective facility class to which it has been changed. The effective date of the reimbursement change is the effective date of the SSA's determination. Nursing facility providers other than Class IV are reimbursed under a methodology that pays the lower of the customary charge to the general public or a prospective payment rate determined by Medicaid.

Payment rates described in this section refer to the provider's prospective per resident per diems and are generally set 30 calendar days in advance of the State's fiscal year, which is October 1 through September 30. (Rate determination timing is dependent on legislative approval of the MDHHS budget.)

NOTE: An illustration of the timeline and calculations for per diem rate setting is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

Prospective payment rates are calculated using the facility's cost report ending in the previous calendar year. If the cost reporting period of the Medicaid routine unit is less than seven months, the cost report used for rate setting is the most recent cost report available prior to the previous calendar year that covers a period of at least seven months. The cost reporting period may only cover dates the facility was enrolled in Medicaid and averaged six or more Medicaid residents per day.

The reimbursement rate determination process uses a provider's most recent fiscal period audited cost data to calculate the routine nursing care per diem rate. If audited data is not available, an interim prospective rate is calculated using the filed cost report, if the cost report was acceptable and was filed with Medicaid within five months from the end date of the cost reporting period. If an acceptable cost report was not filed within this period, Medicaid is not required to set the prospective payment rate in advance of the State's fiscal year. If the nursing facility did not file within the five month period, or has amended an original cost report subsequent to the five month period, Medicaid will calculate the prospective rate for an effective date for services no later than the beginning of the fourth month (January 1) of the State fiscal year. Nursing facilities that are required to file an amended cost report in order to include home office costs that were not included in the original cost report due to the difference in cost reporting period from the home office are exempt from this provision. The amended cost report, if filed timely following the completion of the home office cost statement, will be considered filed timely if the original cost report had met the five month filing requirement. Refer to the Cost Classification and Cost Finding section of this appendix for home office cost statement and nursing facility amended cost reports.

10.1 RATE DETERMINATION PROCESS

The per diem reimbursement rate for Class I and Class III nursing facility providers is made up of three components: a plant cost component, a variable cost component, and add-ons.

Medicaid Provider Manual

- For Class I facilities, the plant cost component is made up of the Property Tax/Interest Expense/Lease Component plus the Return on Current Asset Value Component.
- For Class III facilities, the Plant Cost Component is the lesser of the Facility Per Patient Day Plant Cost or the Facility Plant Cost Limit. The Facility Plant Cost Component is the depreciation, interest and lease expenses calculated on a per patient day basis.
- For Class I and Class III facilities, the Variable Cost Component is made up of the facility's Variable Rate Base plus the Economic Inflationary Update.

Class II facilities, being proprietary nursing facilities for individuals with mental illness or intellectual disability, are reimbursed an all-inclusive prospective payment rate negotiated with the MDHHS State Mental Health Agency on an annual basis. Final reimbursement is a retrospective cost settlement, not to exceed a ceiling limit. The provider may be eligible for a reimbursement efficiency allowance in the final rate if total allowable costs do not exceed the prospectively established ceiling limit.

Class IV facilities, being state-owned and -operated institutions, Intermediate Care Facilities for Individuals with Intellectual Disabilities (Developmentally Disabled), and non-profit nursing facilities for individuals with intellectual disabilities, are reimbursed allowable costs determined in accordance with Medicare Principles of Reimbursement and are retrospectively cost settled.

Per diem rates for Class V facilities, Ventilator Dependent Care Units, are set prospectively. Services included in the per diem rate are outlined by contract with Medicaid.

Payment rates for Class VI Hospital Swing Beds are set prospectively as a flat per resident day rate determined by Medicaid.

10.2 RETROACTIVE RATE CHANGES [CHANGE MADE 4/1/2025]

A retroactive rate change may be made for facilities that have interim prospective rates based on filed cost reports. Retroactive rate changes may be made for, but are not limited to, the following:

- audit adjustments to a filed cost report that was used for setting an interim rate;
- facilities that filed timely and were approved for Plant Cost Certification due to capital cost changes, an approved non-available bed plan, a plant rate affected by a DEFRA rate limitation for the cost report period, or when an interim rate was incorrectly calculated;
- audit adjustments that are required because of an appeal;
- audit adjustments that are required because of fraud or facility failure to disclose required financial information; and
- **(text deleted per bulletin MMP 24-55)**

The Plant Cost Component of a rate for the nursing facility that experiences a change of ownership will be retroactively adjusted under the Plant Cost Certification process. The DEFRA Reimbursement Limit application will continue to apply to each rate year until a fiscal year retrospective rate change results in zero DEFRA limit. The nursing facility Plant Cost Component will be calculated on a prospective basis for the year following the zero DEFRA limit rate year.

10.3 PLANT COST COMPONENT CLASS I NURSING FACILITIES

The prospectively established Plant Cost Component for each Class I nursing facility provider is the sum of the facility Net Property Tax/Interest Expense/Lease Component and Return on Current Asset Value Component. The Plant Cost Component is expressed as a per patient day amount.

10.3.A. NET PROPERTY TAX/INTEREST EXPENSE/LEASE COMPONENT PER PATIENT DAY

The Net Property Tax/Interest Expense/Lease Component per patient day is calculated under the following formula:

Property Tax/Interest Expense/Lease Plant Cost	-	CAV Excess Borrowings Limit	+	DEFRA Reimbursement Limit (not to exceed zero)	=	Net Property Tax/Interest Expense/Lease Plant Cost
Net Property Tax/Interest Expense/Lease Plant Cost	÷	Nursing Facility Resident Days	=	Net Property Tax/Interest Expense/Lease Plant Cost Per Patient Day		

10.3.A.1. PROPERTY TAX/INTEREST EXPENSE/LEASE PLANT COSTS

These plant costs consist of allowable costs for real estate and personal property taxes, interest expense, and lease expense defined under the Allowable and Non-Allowable Cost section and the Cost Classification section of this appendix. The aggregate dollar amount for these plant costs is obtained from the nursing facility cost report. The period of the cost report will correspond with the cost basis period identified for the respective State rate year.

10.3.A.2. CAV EXCESS BORROWINGS LIMIT

The CAV excess borrowings limit is unreimbursable interest due to excess borrowings. An example of the calculation is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

The dollar amount of allowable interest expense included in the reimbursable plant cost will be reduced if the nursing facility loan balance applicable to the nursing care unit exceeds the facility reimbursement limit. The nursing facility's average allowable borrowing balance cannot exceed the lesser of the "Nursing Facility Current Asset Value" or the "Nursing Facility Capital Asset Value Limit." If the nursing facility borrowing balance exceeds the limit, a reduction is made to the allowable plant cost for the portion of the excess borrowing. The amount of the reduction is based on the ratio of the limit amount to the average borrowings balance times the dollar amount of allowable interest expense. The following formula is applied to calculate the reduction:

Medicaid Provider Manual

$$\begin{aligned} & \boxed{\text{Lesser of (NF CAV) or (NF CAV LIMIT)}} \div \boxed{\text{Facility Average Borrowing Balance}} \times \boxed{\text{Total Allowable Interest Expense}} = \boxed{\text{Reimbursable Interest}} \\ & \left(\boxed{\text{Total Interest Expense}} - \boxed{\text{Reimbursable Interest Expense}} \right) = \boxed{\text{CAV Excess Borrowings Limit (N/A if less than zero)}} \end{aligned}$$

A nursing facility that has undergone a change of ownership and is incurring interest costs relating to the acquisition financing will be subject to a DEFRA Reimbursement Limit disallowance. The DEFRA Reimbursement Limit calculation will determine if the nursing facility acquisition and financing costs exceed the Medicaid allowable reimbursement increase limit. Reductions to the facility total borrowing balance are made to avoid including the borrowings balance in the reimbursable interest, and to avoid including the total allowable interest expense amount in both the DEFRA limit and the CAV excess borrowing limit.

If the nursing facility has a DEFRA Reimbursement Limit due to the nursing facility acquisition, the nursing facility's total average borrowing balance used in the calculation for CAV excess borrowings limit will be reduced by a calculated dollar amount of borrowings corresponding with the DEFRA Reimbursement Limit. The borrowing amount corresponding with the DEFRA Reimbursement Limit is calculated under the following formula:

$$\boxed{\text{Dollar Amount of DEFRA Reimbursement Limit}} \div \boxed{\text{Nursing Facility Total Allowable Interest Expense}} \times \boxed{\text{Nursing Facility Total Borrowing Balance}} = \boxed{\text{Reduction to NF Average Borrowing Balance}}$$

10.3.A.3. DEFRA REIMBURSEMENT LIMIT

Increases in reimbursement for tenure and interest expense subsequent to a sale or resale (after July 18, 1984) are limited under provisions of the Deficit Reduction Act (DEFRA) of 1984 as defined in federal Medicaid law. The Medicaid application of DEFRA provisions is a limit on the dollar amount of plant cost component reimbursement increase to the provider due to the nursing facility change of ownership. An established formula calculation is used to determine the new ownership's eligible increase reimbursement for tenure and interest (DEFRA Application Limit). If the new ownership tenure and interest increase before application of the DEFRA Reimbursement Limit does not exceed the DEFRA Application Limit, the DEFRA Reimbursement Limit is not applicable. If the new ownership tenure and interest increase before application of the DEFRA Reimbursement Limit exceeds the DEFRA Application Limit allowable increase, the DEFRA Reimbursement Limit reduction will be made to the allowable plant costs.

Medicaid Provider Manual

The calculation is made as follows:

$$\begin{array}{|c|} \hline \text{DEFRA Application} \\ \text{Limit} \\ \hline \end{array} - \begin{array}{|c|} \hline \text{Increase in tenure and} \\ \text{interest for new} \\ \text{ownership prior to} \\ \text{DEFRA Limit} \\ \hline \end{array} = \begin{array}{|c|} \hline \text{DEFRA Reimbursement} \\ \text{Limit (not applicable if} \\ \text{greater than zero)} \\ \hline \end{array}$$

DEFRA Application Limit is determined as:

$$\begin{array}{|c|} \hline \text{Allowable} \\ \text{historical capital} \\ \text{asset cost to the} \\ \text{asset original} \\ \text{owner (excluding} \\ \text{land) for assets} \\ \text{in the NF at the} \\ \text{time of sale} \\ \hline \end{array} \times \begin{array}{|c|} \hline 3.33\% \\ \hline \end{array} + \left[\begin{array}{|c|} \hline \text{Allowable} \\ \text{land value} \\ \text{to the} \\ \text{seller} \\ \hline \end{array} + \begin{array}{|c|} \hline \text{Historical capital} \\ \text{asset cost of the} \\ \text{asset's original owner} \\ \text{for assets in the} \\ \text{nursing facility at the} \\ \text{time of sale} \\ \hline \end{array} \right] - \left[\begin{array}{|c|} \hline \text{Purchaser} \\ \text{down payment} \\ \hline \end{array} \times \begin{array}{|c|} \hline \text{Purchase} \\ \text{Mortgage} \\ \text{interest rate} \\ \hline \end{array} - \begin{array}{|c|} \hline \text{Allowable interest} \\ \text{expense of the} \\ \text{seller for the rate} \\ \text{period prior to the} \\ \text{sale} \\ \hline \end{array} \right] = \begin{array}{|c|} \hline \text{DEFRA Application} \\ \text{Limit} \\ \hline \end{array}$$

For purposes of the DEFRA Reimbursement Limit calculation, allowable acquisition cost is the cost to the original owner of the asset. An example of this calculation is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

Increase in tenure and interest for the new ownership prior to DEFRA Limit is determined as:

$$\begin{array}{|c|} \hline \text{Purchaser tenure} \\ \text{and allowable} \\ \text{interest after} \\ \text{acquisition} \\ \hline \end{array} - \begin{array}{|c|} \hline \text{Seller tenure} \\ \text{and allowable} \\ \text{interest in the} \\ \text{Medicaid rate} \\ \text{prior to the} \\ \text{sale} \\ \hline \end{array} = \begin{array}{|c|} \hline \text{Increase in tenure} \\ \text{and interest for new} \\ \text{ownership prior to} \\ \text{DEFRA Limit} \\ \hline \end{array}$$

The calculation formula is defined for application when using annualized cost data (reflective of 12-month period). Tenure refers to the purchaser's initial ownership year. Allowable interest refers to interest associated with a facility acquisition. If all of the data elements needed in the calculation do not include data for a 12-month period, the data

Medicaid Provider Manual

elements must be adjusted to reflect a period of equal duration to the cost report base period used in determining the "purchaser tenure and allowable interest after the sale."

The DEFRA Reimbursement Limit continues to apply to the new ownership annual Property Tax/Interest Expense/Lease Component rate using the Plant Cost Certification reimbursement settlement procedure until the limit amount is zero.

10.3.B. RETURN ON CURRENT ASSET VALUE (CAV) COMPONENT

The Return on Current Asset Value Component is a per resident day amount representing a use allowance on facility assets. The return amount is determined by multiplying the "tenure factor" times a CAV calculated for the nursing facility. A nursing facility's CAV is determined by a formula using historical costs of the nursing facility's capital assets, as identified in the Allowable and Non-Allowable Costs section in this appendix, times the difference between an asset value update factor and an obsolescence factor. Assets purchased prior to 1960 are treated as assets brought into service in 1960. A nursing facility's CAV for rate reimbursement calculation cannot exceed the "current asset value upper limit" and will not be less than the "current asset value floor."

The calculation for the return on current asset value component is:

$$\begin{array}{l} \boxed{\begin{array}{c} \text{Lesser of NF} \\ \text{CAV or NF CAV} \\ \text{Limit} \end{array}} \times \boxed{\begin{array}{c} \text{Tenure Factor} \end{array}} = \boxed{\begin{array}{c} \text{Total NF Return} \\ \text{on CAV} \end{array}} \\ \\ \boxed{\begin{array}{c} \text{Total NF Return} \\ \text{on CAV} \end{array}} \div \boxed{\begin{array}{c} \text{NF Resident} \\ \text{Days} \end{array}} = \boxed{\begin{array}{c} \text{Return on CAV} \\ \text{Component Per} \\ \text{Resident Days} \end{array}} \end{array}$$

10.3.B.1. ASSET VALUE UPDATE FACTOR

The asset value update factor used to calculate CAV depends on the type of capital asset. Land improvements, buildings, building improvements, and fixed building equipment are updated using a construction cost index for steel frame buildings in the central United States from the fiscal year the asset was brought into service until the most recent period for which cost report data is available for the respective rate year calculation. The asset value update factor is not applied to land and other assets not specifically listed above.

10.3.B.2. ASSET VALUE OBSOLESCENCE FACTOR

The obsolescence factor is applied based on the classification category of the capital asset. Land has an obsolescence factor of zero. Land improvements, buildings, building improvements, and fixed building equipment have an obsolescence factor of .03 for each year the asset has been in service. Movable equipment and other capital assets have an obsolescence factor of .10 for each year the asset has been in service up to a maximum of 10 years. The number of years that the asset has been in service is determined by subtracting the year the asset was put into service from the most recent fiscal year for which data is available under the standard rate setting timeframe.

10.3.B.3. CURRENT ASSET VALUE FORMULA

A nursing facility's CAV is determined by a formula using historical costs of capital assets. The current asset value for each asset is the historical cost of that asset times the difference between its Asset Value Update Factor and its Asset Value Obsolescence Factor. Assets purchased prior to 1960 are recorded as assets brought into service in 1960. Current asset values are updated annually based on the most recent audited or reviewed cost report. A nursing facility's current asset value is the sum of current asset values for the various asset types.

Example: Building assets with historical cost of \$100,000 in service for 10 years through the cost report year used in the rate calculation; the update factor for the 10 years is 1.50; the obsolescence factor is .30 (10 years times .03); the amount included in the CAV compilation for the nursing facility for these assets is \$120,000 [\$100,000 times (1.50 minus .30)].

If the nursing facility Plant Cost Component is calculated based on Plant Cost Certification data, the new capital assets acquired in the current cost report year and the immediate prior cost report year will be included in the nursing facility historical asset costs for compiling the CAV. The update factor for these assets will be 1.0, and the obsolescence factor will be zero.

10.3.B.4. NURSING FACILITY CURRENT ASSET VALUE

The current asset value calculation process determines the CAV for the entire nursing facility since capital assets are used for all types of service delivery in that facility. Only the portion of the nursing facility assets having a use related to routine nursing resident care are included for reimbursement under the return on current asset value component. The reference to Nursing Facility CAV is defined as the nursing unit portion of the nursing facility's total current asset value applicable to routine nursing care. The apportionment, expressed as a percentage, of a total facility that is applicable to the routine nursing care unit is determined by means of the facility's annual cost report. The SMA cost reporting process apportions the nursing facility asset costs into the appropriate cost centers for reimbursement purposes.

The Nursing Facility CAV is calculated as:

$$\begin{array}{|c|} \hline \text{Total CAV for} \\ \text{the NF} \\ \hline \end{array} \times \begin{array}{|c|} \hline \text{Percentage} \\ \text{representing} \\ \text{the nursing unit} \\ \text{apportionment} \\ \hline \end{array} = \begin{array}{|c|} \hline \text{NF CAV} \\ \hline \end{array}$$

10.3.B.5. CLASS I NURSING FACILITY CURRENT ASSET VALUE LIMIT PER BED

The current asset value upper limit is a maximum per bed dollar amount that will be used for calculating the individual Nursing Facility CAV. The per bed value of the upper limit is based on the historical costs of construction and other asset acquisition costs for nursing facilities opened on or after January 1, 1975. The historical costs are updated through

Medicaid Provider Manual

1983 using the U.S. Department of Commerce Composite Construction Index, and annual updates after 1983 are made using a construction cost index for steel frame buildings. The update index does not apply an obsolescence factor. The current asset value limit is the sum of the updated historical costs for the facilities included in this calculation divided by the total number of beds in those facilities. The current asset value limit is recalculated annually to include construction costs of new facilities reported on the most recent calendar year filed cost report and the construction index update. The per bed upper limit is effective for the period corresponding to the State rate year.

The current asset value floor is 30 percent of the current asset value upper limit.

Class I nursing facility current asset value limits per bed for each rate year are available on the MDHHS website. Refer to the Directory Appendix for website information.

10.3.B.6. NURSING FACILITY CURRENT ASSET VALUE LIMIT

A current asset value limit is determined by the individual nursing facility and is dependent on the number of beds in the Medicaid nursing unit for the period corresponding with the respective rate effective date. The current asset value upper limit is a maximum dollar amount for the individual Nursing Facility CAV that will be used for calculating the return on current asset value. The Nursing Facility CAV Limit is the number of available beds in the nursing unit times the Class Current Asset Value Limit Per Bed.

The current asset value floor limit is a minimum dollar amount for CAV that will be used for calculating the return on current asset value for that nursing facility. The individual Nursing Facility CAV floor is the Nursing Facility CAV Limit times 30 percent.

10.3.B.7. TENURE FACTOR

The tenure factor is dependent on the nursing facility provider's number of full years of continued Medicaid certification as of the beginning of the Medicaid rate year (i.e., months of continuous Medicaid certification divided by 12 and disregarding fractions). The continuous Medicaid certification is based on the current ownership of the nursing facility.

Continued Medicaid certification is based on the number of full years that have elapsed from the effective date of a provider's initial Medicaid certification to the beginning of the Medicaid rate year. For example, a provider that has been Medicaid certified for 42 continuous months has, for purposes of the tenure factor, been certified for three full years. The provider's years of ownership are translated into a tenure rate, and applicable rates are identified in the following table.

Years of Ownership at Start of Provider Fiscal Year	Rate of Return on Current Asset Value
0-1	.0250
2	.0275

Medicaid Provider Manual

Years of Ownership at Start of Provider Fiscal Year	Rate of Return on Current Asset Value
3	.0300
4	.0325
5	.0350
6	.0375
7	.0400
8	.0425
9	.0450
10	.0475
11	.0500
12 or more	.0525

The rate of return on current asset value is expressed as an annual return rate. Qualification for the total return rate requires that the period included in the nursing facility cost report used as the basis for the facility plant cost rate include twelve calendar months. In cases where the nursing facility cost report does not include twelve calendar months, the following formula is used to calculate the return rate:

$$\begin{array}{|c|} \hline \text{Number of} \\ \text{calendar days in} \\ \text{the cost report} \\ \text{period} \\ \hline \end{array} \div \begin{array}{|c|} \hline 365 \\ \hline \end{array} \times \begin{array}{|c|} \hline \text{Rate of return} \\ \text{on CAV (for the} \\ \text{respective years} \\ \text{of ownership)} \\ \hline \end{array} = \begin{array}{|c|} \hline \text{Return Rate} \\ \hline \end{array}$$

Example: A nursing facility has seven years of ownership and the cost report period used for plant costs in the rate calculation is for a nine-month period (275 days). The adjusted return rate is .030 (275/365 times .0400).

If a nursing facility is sold or totally replaced (regardless of facility ownership), years of ownership return to zero. If a facility is remodeled or expanded and facility ownership remains unchanged, the years of ownership remain continuous.

When licensure has changed but there has been no effective change in operator/provider, and there has been no transaction that would affect Medicaid reimbursement other than the tenure factor, the provider may request that Medicaid recognize the continuous tenure such that the tenure schedule would not revert to zero years at the time of the licensure change. The provider's written request must be submitted at the time licensure is changed.

Exception: Where licensure does not change after a sale of nursing facility assets, the nursing facility provider (new owner) must choose either to retain the original tenure schedule and forego increased reimbursement for interest expense, or to receive

Medicaid Provider Manual

increased reimbursement for interest expense, subject to the DEFRA Reimbursement Limit, and allow the tenure schedule to revert to zero years and a tenure factor of .0250. Should the provider elect to retain the previous tenure schedule, Medicaid will not recognize, for allowable cost and per diem rate determination purposes, any interest expense beyond the schedule of borrowings, principal amortization, and interest expenses that would have been incurred were the former owner's loans maintained or assumed by the new owner. This provision applies to all property transactions between lessors, lessees, and/or operators.

10.4 PLANT COST COMPONENT CLASS III NURSING FACILITIES

The prospectively established plant cost component for each county medical care facility provider and hospital long term care unit provider is the lesser of the allowable per resident day facility plant cost or the per resident day facility plant cost limit. Proprietary providers are permitted to retain, as part of the plant cost component, up to \$.50 of the difference between allowable per resident day plant costs and the per resident day plant costs in effect on March 31, 1985 (\$5.66 per resident day).

10.4.A. FACILITY PLANT COST PER RESIDENT DAY

The allowable per resident day plant cost is the sum of depreciation expense, interest expense, property taxes, and allowable lease costs divided by total resident days as determined from the provider's cost report. A facility with a change in facility asset costs may qualify for plant cost limit updates.

10.4.B. FACILITY PLANT COST LIMIT PER RESIDENT DAY

The individual provider facility Plant Cost Limit is dependent upon when facility beds were constructed and brought into service for Medicaid residents. Nursing facilities existing prior to July 1, 1978 were initially assigned the facility Class Plant Cost Limit for new construction as of that date. A nursing facility constructed after that date is initially assigned the facility Class Plant Cost Limit effective in the year facility beds are constructed and brought into service for Medicaid.

A facility's Plant Cost Limit, expressed as per resident day, is the sum of the per resident day component limits for depreciation expense, interest expense, financing fees and property taxes. The individual nursing facility Plant Cost Limit is updated for a nursing facility that undergoes a significant change in facility asset costs. The nursing facility must meet the filing requirements and complete the plant cost certification process to qualify for consideration of the update to the individual facility plant cost limit. A plant cost certification filed after the applicable period's cost report will not be accepted for calculation of an updated facility plant cost limit. The provider must meet the qualifying provisions for Plant Cost Certification eligibility, other than non-available bed designation or returning non-available beds to service, to be eligible for a revised plant cost limit. The non-available bed plan designation criteria does not qualify the nursing facility for an update to the facility plant cost limit. An existing provider with a change of facility class, major addition, renovation or new construction may be eligible for a Plant Cost Limit update to reflect the change in facility asset costs. An existing facility that chooses to become a Medicaid-participating provider may also qualify for an updated plant cost limit.

Medicaid Provider Manual

The updated plant cost limit is applicable to a nursing facility dependent upon the facility's capital asset project. A nursing facility that is a total new construction, a facility that incurs major capital asset renovation and/or addition, a facility newly participating in the Medicaid program, or a facility that experiences a change in facility class are eligible for updated depreciation, interest, finance fees and property tax components for the facility Plant Cost Limit. The update in the limit is based on a compilation of the facility limit prior to the capital asset change and the Class Plant Cost Limit.

The individual facility updated Plant Cost Limit effective with the completion of the capital asset project is a weighted average of the historic individual facility Plant Cost Limit for the portion of the facility prior to the new construction, addition or renovation project and the current Class Plant Cost Limit applicable to the new capital asset project. The weighting factors used are the respective ratios of the allowable historic asset costs of the facility prior to the new construction addition or renovation project, and the allowable asset costs of the new capital asset project, to the combined allowable old and new asset costs of the nursing facility after completion of the capital asset project. The current Class Plant Cost Limit used in the weighted calculation applicable to the new capital cost portion will be the class limit in effect for the year corresponding to the new asset acquisitions being placed into service.

Nursing facility providers that incur a capital asset change resulting from a facility sale of assets will use, as a plant cost basis, only those allowable costs identified in the Allowable and Non-Allowable Costs section in this appendix. The individual nursing facility updated Plant Cost Limit after the sale is only eligible for an update for the interest expense component limit to reflect changes in interest rates.

10.4.C. FACILITY CLASS PLANT COST LIMIT PER RESIDENT DAY

The Class Plant Cost Limit is the maximum reimbursement rate, expressed as per resident day amount, for a nursing facility's new construction. The Class Plant Cost Limit is applicable to new construction nursing facilities dependent upon when facility beds were constructed and brought into service for Medicaid residents. The Class Plant Cost Limit is the sum of the per resident day component limits for depreciation expense, interest expense, financing fees and property taxes. The Class Plant Cost Limit components are updated annually to reflect changes in industry construction cost, interest rates and corresponding effect on financing fees and real estate taxes due to changes in capital costs. The new construction limit is used in determining the individual nursing facility limit in cases where the nursing facility is an entire new construction or an existing nursing facility has completed a significant capital improvement.

The per resident day Class Plant Cost Limit is the amount that would be paid for a recently constructed and prudently financed facility. Calculation of the plant cost limit is based on a survey of nursing facilities constructed between January 1, 1975 and December 31, 1977, and initially updated to June 30, 1978. The original Class Plant Cost limit individual components are updated annually using published economic indicators identified in the subsections addressing the specific component of the limit. The Class Plant Cost Limit annual updates are available on the MDHHS website. (Refer to the Directory Appendix for website information.)

10.4.C.1. FACILITY CLASS PLANT COST LIMIT DEPRECIATION EXPENSE COMPONENT

The value for the depreciation expense component is a sum based on the mean of the surveyed values of depreciable assets (referenced above) and the mean depreciation rate for assets of similar type using straight-line depreciation with useful lives determined in accordance with Medicare Principles of Reimbursement. The per resident day depreciation expense component is updated each calendar quarter to reflect the change in costs of construction and changes in standards and regulations which have a direct impact on plant costs. The depreciation component is updated using the economic index release as published under U.S. Department of Commerce, Bureau of Economic Analysis, National Income and Product Accounts Tables for Nonresidential Structures.

10.4.C.2. FACILITY CLASS PLANT COST LIMIT INTEREST EXPENSE COMPONENT

The value for interest expense is based on the surveyed mean of interest rates paid (referenced above) and the mean asset values for facilities constructed during the initial three-year survey period. The per resident day interest component is updated annually based on the changes in interest rates. The interest rate data used to calculate the interest component limit is updated by applying an index of change in interest rates for home mortgage loans (reflected in conventional new home mortgage rates, as published by the Federal Housing Finance Board for Newly Built Homes) to the interest rate used to calculate the original interest component limit.

A nursing facility that undergoes a change of ownership is eligible for an update to the individual facility Plant Cost Limit. The update will only include an adjustment to the interest component of the individual facility Plant Cost Limit in effect prior to the sale. The adjustment will be made to the interest component of that prior limit to reflect the change in the interest rate index between the period reflected in the prior limit calculation and the date of the facility sale.

10.4.C.3. FACILITY CLASS PLANT COST LIMIT FINANCING FEES COMPONENT

The value for financing fees is based on the mean of financing fees of the surveyed construction (referenced above). The per resident day financing fees component limit is updated using the same update factor used for the depreciation expense component limit update. The update factor is applied to the original financing fees component limit.

10.4.C.4. FACILITY CLASS PLANT COST LIMIT TAX EXPENSE COMPONENT

The value for property taxes is based on the mean of property taxes of the surveyed taxable properties (referenced above). The per resident day property tax component limit is updated using the same update factor used for the depreciation expense component limit update. The update factor is applied to the original property tax component limit.

10.5 VARIABLE COST COMPONENT (VCC) – CLASS I AND CLASS III FACILITIES

The variable cost component of the nursing facility per resident day rate reflects the Medicaid determination for reimbursement for the nursing facility base and support costs incurred for routine nursing care. Base and support cost classifications are discussed in detail in the Cost Classifications and Cost Finding subsection of this appendix. The calculation of the component uses nursing facility historical costs and economic index application to adjust cost levels to coincide with the State rate year periods. The support costs and total variable (base plus support) costs are separately subjected to rate ceiling reimbursement limits dependent on individual facility bed size and facility class.

For Class I and Class III nursing facility rate setting periods beginning on or after October 1, 2003, the Variable Cost Component is a per resident day rate and is equal to the lesser of the facility's Variable Rate Base (VRB) or the Class Variable Cost Limit (VCL), plus the Economic Inflationary Update (EIU).

$$\text{VCC} = (\text{lesser of VRB or Class VCL}) + \text{EIU}$$

10.5.A. VARIABLE RATE BASE (VRB)

The facility Variable Rate Base is the sum of the facility's indexed base cost component and the facility's indexed support cost component. For rate setting purposes, the per resident day amount used for the provider's Variable Rate Base is the lesser of the calculated Variable Rate Base or the Class Variable Cost Limit.

$$\text{VRB} = \text{Base Cost Component} + \text{Support Cost Component}$$

10.5.A.1. BASE COST COMPONENT (BCC)

A facility's BCC is the facility per patient day allowable base costs indexed to October 1 of the year that is one year prior to the rate year being calculated.

$$\text{BCC} = (\text{base costs/total number of resident days}) \times \text{Cost Index}$$

- Facility's base cost per day - the facility base costs divided by the total number of resident days for the cost reporting period.

10.5.A.2. SUPPORT COST COMPONENT (SCC)

A facility's support cost component is the facility's BCC multiplied by the lesser of the facility's support-to-base ratio or the support-to-base ratio limit for that nursing facility bed-size group.

$$\text{SCC} = \text{BCC} \times \text{applicable S/B ratio (Facility or Bed-Size Group Limit)}$$

- Facility's support cost per day - the facility support costs divided by the total number of resident days for the cost reporting period.
- Facility Support-to-Base Ratio (S/B-Facility) - the nursing facility's allowable support costs divided by the allowable base costs for the cost reporting period. The individual provider's S/B ratio for rate calculation is limited to the Support-to-Base Ratio Bed Size Group Limit for the provider's bed-size group. The individual nursing facility bed-size group classification is based on the number of nursing home licensed beds, Home for the

Medicaid Provider Manual

Aged beds, or any other type of licensed beds where nursing care is provided. The provider's S/B ratio is rebased annually from the most recent audited cost period, regardless of ownership.

- Support-to-Base Ratio – Bed Size Group Limit (S/B-Group) – the 80th percentile of the support-to-base ratios for nursing facilities in the same bed-size group for a cost reporting year. The bed-size groups are defined as 0-50, 51-100, 101-150, and 151+ nursing care beds in the nursing facility. The nursing facility bed-size group classification is based on the number of nursing home licensed beds, Home for the Aged beds, or any other type of licensed beds where nursing care is provided. The 80th percentile is determined by rank ordering the provider nursing facilities within the same bed-size group from the lowest to highest S/B ratio, then accumulating nursing facility Medicaid resident days of the rank ordered providers, beginning with the lowest, until 80 percent of the total Medicaid resident days for this group of providers is reached. The S/B ratio limit for the bed-size group equals the support-to-base ratio of the nursing facility in which the 80th percentile of accumulated Medicaid days occurs.

10.5.B. COST INDEX (CI)

A facility cost index is the Global Insight's Skilled Nursing Facility Market Basket Without Capital Index, which is published quarterly in the Global Insight DRI-WEFA Health Care Cost Review. The cost index will be used to index reported costs from the end of the facility's cost report period to October 1 of the year that is one year prior to the rate year being calculated.

Example: Cost report data used to set reimbursement rates for the October 1, 2018 to September 30, 2019 rate year will be indexed to October 1, 2017.

10.5.C. CLASS AVERAGE VARIABLE COSTS (AVC) [CHANGE MADE 4/1/2025]

The Class Average Variable Cost is defined as the total indexed variable costs for all facilities in the Class divided by the total resident days for all facilities in the class for a cost reporting year. An AVC is calculated for Class I and Class III nursing facilities. The Class AVC is used for rate calculations for nursing facilities that meet the qualifying criteria as a new provider for Medicaid participation. **(text deleted per bulletin MMP 24-55)**

$$\text{AVC} = \frac{(\text{total Indexed Variable Costs for all NF's in the class})}{(\text{total resident days for all NF's in the class})}$$

- Facility's Variable Costs (VC) - the total allowable base and support costs for a facility to provide routine nursing care services to residents, as determined in accordance with Medicaid allowable costs and reporting requirements.
- Indexed Variable Costs (IVC) – the facility's total VC indexed to October 1 of the year that is one year prior to the rate year being calculated.

Example: The AVC for October 1, 2018, which is used for the rate year October 1, 2018 to September 30, 2019, is based on variable costs reported in cost reports ending in calendar year 2017 indexed to October 1, 2017.

10.5.D. CLASS VARIABLE COST LIMIT (VCL)

The Variable Cost Limit for a class of nursing facilities is set at the 80th percentile of the Indexed Variable Costs (IVC) per resident day for facilities in the class during the current calendar year. The 80th percentile is determined by rank ordering providers from the lowest to the highest IVC per resident day, then accumulating nursing facility Medicaid resident days of the rank ordered providers, beginning with the lowest, until 80 percent of the total Medicaid resident days for the facility class of providers is reached. The VCL for the class of providers equals the IVC per resident day of the nursing facility in which the 80th percentile of accumulated Medicaid resident days occurs. A VCL is calculated for Class I and Class III nursing facilities.

- Facility's Variable Cost per resident day (VC/pd) - the facility VC divided by the total number of resident days for the cost reporting period.
- Indexed Variable Costs Per Resident Day (IVC/pd) – the facility's VC/pd indexed to October 1 of the year that is one year prior to the rate year being calculated.

Example: The VCL for October 1, 2018, which is used for the rate year October 1, 2018 to September 30, 2019, is based on variable costs per resident day reported in cost reports ending in calendar year 2017 indexed to October 1, 2017.

(Subsection 10.5.D.1. Class I Nursing Facility VCL Exception - New Provider Rate Relief was deleted per bulletin MMP 24-55)

10.5.D.1. CLASS III NURSING FACILITY VCL EXCEPTION – NEW HOSPITAL LONG TERM CARE UNITS AFTER JULY 1, 1990 [RE-NUMBERED 4/1/2025]

Class III nursing facilities that are new long term care units of a hospital, and have a Certificate of Need (CON) approval from the Michigan Department of Health and Human Services (MDHHS) [formerly Michigan Department of Community Health (MDCH) and Michigan Department of Public Health] dated on or after July 1, 1990, are reimbursed according to the method for Class III facilities except that the facility Variable Cost Component is determined as the lesser of the facility Variable Rate Base or the Class I Variable Cost Limit (VCL).

10.5.E. ECONOMIC INFLATIONARY UPDATE (EIU)

The economic inflationary update for a facility is the Economic Inflation Rate (EIR) for the class applied to the lesser of the Variable Rate Base or the Class Variable Cost Limit.

$$\text{EIU} = \text{EIR} \times (\text{lesser of VRB or Class VCL})$$

Economic Inflation Rate (EIR) - the State legislative appropriations process will determine the annual economic inflation percentage for Class I and Class III nursing facilities.

10.6 CLASS V NURSING FACILITIES – VENTILATOR DEPENDENT CARE (VDC) UNITS

The reimbursement rate for special nursing facilities caring for ventilator-dependent residents (Class V) is set prospectively by Medicaid as an individual nursing unit rate per resident day and is based on actual occupancy.

Reimbursement is made for prior authorized ventilator-dependent services/care for residents who have been transferred to a Medicaid contracted facility. The prospective rate covers all ventilator care requirements of the residents, including all the costs of benefits associated with Medicare Parts A and B while the resident resides in the special nursing facility. This includes, but is not limited to, all routine, ancillary, physician, and other services.

Factors used in the determination of the per diem rate include audited costs of facilities providing similar services, the inflationary factor for the effective period of the prospective rate, the supply response of providers, and the number of residents for whom beds are needed. The prospective rate does not exceed 85 percent, nor fall below 15 percent, of an estimated average inpatient hospital rate for currently placed acute care Medicaid residents who are ventilator-dependent. The prospective rate is periodically re-evaluated to ensure reasonableness of supply and demand for special care. A new VDC unit that has not previously participated in Medicaid for VDC services will have a reimbursement rate in the initial two years (24 months) of Medicaid operations (from the date of admitting the first Medicaid beneficiary) based upon the statewide average VDC unit reimbursement rate for the current year. The reimbursement rate period beginning on the October 1 after the initial two years of Medicaid operations will utilize the most recent Medicaid cost report ending in the prior calendar year. If this cost report covers a period that is less than seven months or there was no cost report filed in the prior calendar year, the cost report used for rate setting is the most recent cost report available prior to the previous calendar year that covers a period of at least seven months.

10.7 NURSING FACILITY QUALITY ASSURANCE ASSESSMENT PROGRAM (QAAP)

The QAAP was implemented by Medicaid in compliance with Michigan and Federal law. The QAAP provides a QAS payment and Quality Measure Initiative payment to nursing facilities by incorporating funds from the quality assurance assessment tax. When a provider sells a nursing facility, the provider is responsible for all QAAP assessments billed and incurred prior to the date of the sale. The purchaser(s) must assure escrow of any outstanding QAAP amounts owed, or the purchaser(s) becomes responsible for payment of the QAAP and penalty amounts owed before Medicaid participation is granted. If the provider quits the business, the provider is responsible for all QAAP assessments billed and prorated as of the date MDHHS determines the facility closed. The QAAP applies to Class I, Class III and Class V nursing facilities.

10.7.A. QUALITY ASSURANCE SUPPLEMENT (QAS) FOR CLASS I AND CLASS III NURSING FACILITIES

The nursing facility will receive a QAS payment as a monthly gross adjustment. The monthly gross adjustment for an individual nursing facility will be determined based on one-twelfth of the facility's annual historical Medicaid utilization (resident days) multiplied by the facility's QAS per resident day. The facility's historical Medicaid utilization will include all routine nursing care and therapeutic leave days billed to Medicaid by the facility. A nursing facility that is experiencing a significant increase or decrease in its Medicaid utilization for the current rate year resulting in a difference of greater than five

Medicaid Provider Manual

percent in the nursing facility's total QAS payments for the year must contact the SMA for consideration of adjustment to the facility's monthly QAS payment. Current year Medicaid resident census data must be provided to MDHHS to document the change in order to revise the monthly QAS payment amounts. It is the desired intent of MDHHS to assure accuracy of total QAS monthly payments and to approximate the annual reimbursement due the facility. MDHHS reserves the right to adjust the individual nursing facility monthly QAS payment to reflect the current year Medicaid activity to achieve this goal.

A facility's QAS is equal to the lesser of the facility's Variable Rate Base or Class Variable Cost Limit times the Quality Assurance Assessment Factor (QAAF) determined by MDHHS, except for Class III publicly owned facilities, in which the QAAF is multiplied by the lesser of the facility's Variable Cost Component or the Class I Variable Cost Limit. A provider's QAS will be reconciled at the end of the fiscal year to accommodate the actual Medicaid utilization, changes to the variable rate from filed to audited cost report data, and to adjust the increase initially estimated to accommodate the fixed pool of funds established by the QAAP and any legislative offsets to that pool.

The QAAF is determined based on the estimated pool of funds created by the quality assurance assessment tax as well as the projected number of Medicaid nursing facility days for the fiscal year. In aggregate, the quality assurance assessment fee may not exceed 6 percent of total industry revenue for the fiscal year.

QAS payments to Class I, III and V providers will be reduced by the amount of restricted funding revenue written off during the current fiscal year. This reduction will be allocated across Class I, III and V providers participating in the QAAP program that receive QAS payments. QAS payments will be reduced by both the state and federal share of the uncollected restricted revenue. Any restricted revenue that is subsequently collected after being included in a QAS reduction will be restored to providers. The QAS reduction will be equal to the total QAAP shortage divided by the total number of Medicaid days used in the QAS payment calculation multiplied by the number of Medicaid days in each facility.

It is the intent of MDHHS that nursing facilities that provide hospice care for residents by contracting with a hospice provider also benefit from this quality program. Medicaid will reimburse hospice providers 100 percent of a nursing facility's QAS rate add-on for Medicaid beneficiaries provided hospice care in Medicaid participating nursing facilities. It is the responsibility of the hospice provider to pay the room and board rate to the nursing facility as specified in their contract for services.

10.7.B. QUALITY ASSURANCE SUPPLEMENT (QAS) FOR CLASS V NURSING FACILITIES - VENTILATOR DEPENDENT CARE (VDC) UNITS

Qualifying VDC units will receive a QAAP payment as a monthly gross adjustment. The monthly gross adjustment for an individual unit will be determined based on one-twelfth of the VDC unit's annual historical Medicaid utilization (resident days) multiplied by the unit's QAS per resident day basis. The unit's Medicaid utilization will include all days billed to Medicaid by the VDC unit. A nursing unit that is experiencing a significant increase or decrease in its current rate year Medicaid utilization which will cause a

Medicaid Provider Manual

difference of greater than five percent in the nursing unit's total QAS payments for the year must contact MDHHS for consideration of adjustment to the unit's monthly QAS payment. Current year Medicaid resident census data must be provided to the SMA to document the change in order to make revision to the monthly QAS payment amounts. It is the desired intent of MDHHS to assure accuracy of total QAS monthly payments to approximate the annual reimbursement due the VDC unit. MDHHS reserves the right to adjust the individual VDC unit monthly QAS payment to reflect the current year Medicaid activity to achieve this goal.

The VDC unit QAS is equal to the Class I Variable Cost Limit times the Quality Assurance Assessment Factor (QAAF) determined by MDHHS. A provider's QAS will be reconciled at the end of the fiscal year to accommodate the actual Medicaid utilization and to adjust the total increase initially estimated to accommodate the fixed pool of funds established by the QAAP and any legislative offsets to that pool.

The QAAF is determined based on the estimated pool of funds created by collection of the quality assurance assessment tax and the projected number of Medicaid nursing facility days for the fiscal year. In aggregate, the quality assurance assessment tax may not exceed six (6) percent of total industry revenue for the fiscal year.

10.7.C. ANNUAL RECONCILIATION

The reconciliation of approved Medicaid days, changes to the variable rate from filed to audited cost report data, and QAS payments is completed on an annual basis within 90 calendar days after the end of the State's fiscal year. For State Fiscal Year 2022, this reconciliation will take place at least 365 days after the end of the fiscal year.

The Reimbursement and Rate Setting Section (RARSS) will reconcile the QAS payments to the provider against the provider's approved Medicaid days and filed and audited cost report data. If RARSS determines that an underpayment has been made, the provider will receive a gross adjustment payment. If RARSS determines that an overpayment has been made, recovery will be made by gross adjustment recovery against future payments. The gross adjustment process follows the Initial Settlement and Final Settlement practices described in the Cost Report Reimbursement Settlements section of this chapter. A provider may submit a written request to RARSS for an extended repayment schedule to repay the Program. The request must include a written justification of the need for extended payment.

The provider will be given advance notice of the actions taken on QAS payments and has 30 calendar days from the date of the advance notice to request a review of the determination with RARSS. The provider's request for a review must cite specific concerns with the determination.

10.7.D. NURSING FACILITY QUALITY MEASURE INITIATIVE (QMI)

Eligible nursing facilities may receive a supplemental QMI payment. Payments to individual nursing facilities will be determined by their average 5-star quality measure rating on the CMS Nursing Home Compare (NHC) website, Medicaid utilization rate, number of licensed beds, and resident satisfaction survey data as described in this

Medicaid Provider Manual

section. In cases of a change of ownership, the new owner's QMI payment will continue to be calculated based off the prior owner's average quality measure rating, Medicaid utilization rate, number of licensed beds, and resident satisfaction survey data.

The average 5-star quality measure rating will be based upon the average rating from July of the prior calendar year to June of the current calendar year (e.g., for the rate year beginning October 1, 2018, the average 5-star quality measure rating would be based on the average rating between July 1, 2017 to June 30, 2018).

For special cost reporting requirements related to the QMI, refer to the Quality Measure Initiative (QMI) Special Cost Reporting Requirements subsection of the Cost Classifications and Cost Finding section of this Appendix.

Refer to the Nursing Facility Resources section of the Directory Appendix for NHC website information, and for additional QMI resources and contact information.

10.7.D.1. ELIGIBILITY FOR QMI PAYMENT

To be eligible to receive a QMI payment, a provider must meet the following conditions:

- The provider must be a Class I or III nursing facility.
- The provider must have a 1, 2, 3, 4 or 5-star quality measure rating on the NHC website.
- The provider must be a Medicaid-certified nursing facility.
- The provider must not be closed for business. That includes a voluntary closure, or an action by MDHHS, CMS or LARA to decertify or delicense a provider.
- The provider must not be designated as a Special Focus Facility (SFF) by CMS. (Refer to the Directory Appendix for SFF list website information.)
- If the provider has an average quality measure rating below 2.5 stars, they must submit an action plan to the Long Term Care Policy Section as described in the QMI Action Plan subsection.
- The provider must deliver at least one day of Medicaid nursing facility services at the room and board level during the state fiscal year in which they receive QMI payments and in their immediate prior year-end cost reporting period. QMI payments made to a provider found to have no days of Medicaid nursing facility services during the state fiscal year shall be recouped by the Michigan Department of Health and Human Services (MDHHS).

MDHHS will generally check in August prior to the beginning of a rate year and approximately every three months thereafter to see which facilities are designated as SFFs or have closed. A provider designated as a SFF will not be eligible to receive any QMI payments until they graduate from the SFF list. A SFF that graduates after the rate year begins will only be eligible for prorated QMI payments for the balance of the remaining months of the rate year (e.g., a provider that graduates from the SFF list would not receive reimbursement equal to what they would have received had they been eligible for the entire rate year). If a provider has closed or graduated from the SFF list,

Medicaid Provider Manual

MDHHS may recalculate some or all QMI payments depending on the amount of available funds.

10.7.D.2. QMI ACTION PLAN

A provider with an average quality measure rating below 2.5 stars must file an acceptable QMI action plan with the Long Term Care Policy Section to be eligible for a QMI payment. The action plan will need to provide specific details reflecting how a provider intends to use QMI funds to increase quality outcomes. The Long Term Care Policy Section will electronically provide written notice to providers with a rating below 2.5 stars and will provide the expectations for the action plan. A plan that does not provide the specific details required in the notice will not be accepted by the Long Term Care Policy Section.

The Long Term Care Policy Section will set a due date in the notice for a provider to submit the action plan. A provider that fails to submit an action plan by the due date cannot receive payment until an action plan is sent to and accepted by the Long Term Care Policy Section. If a provider fails to submit an acceptable action plan within 30 days of the due date, they will be unable to receive a QMI payment for the remainder of the fiscal year. Unless directed otherwise by the Long Term Care Policy Section, the action plan must be sent electronically as specified in the notice.

10.7.D.3. QMI PAYMENT METHODOLOGY

The Medicaid utilization rate will be determined from the immediate prior year-end cost report covering a period of at least seven months (e.g., 2016 year-end cost reports will set the utilization rate for the fiscal year beginning October 1, 2017). For the purposes of this section, a cost report refers to the uniform Medicaid nursing facility cost report or a less than complete cost report. The sum of the total Title XIX patient days in the Medicaid Routine Care Unit #1, Medicaid Routine Care Unit #2, and the Medicaid Special Care Unit #1 over the sum of the total inpatient days in all nursing facility units on the cost report will set the utilization rate (e.g., if the sum of the Title XIX inpatient days in the Medicaid Routine Care Unit #1, Medicaid Routine Care Unit #2, and the Medicaid Special Care Unit #1 is 1,000, while the sum of total inpatient days in all units is 1,500, the Medicaid utilization rate would be 66.7%). If the immediate prior year-end cost report does not cover a period of at least seven months, then the Medicaid utilization rate will be determined as follows:

- If the prior year-end cost report covers a period of less than seven months, and if multiple cost reports were filed by the current or prior facility owner, then all cost reports submitted for the prior year-end will be used in calculating the Medicaid utilization rate (i.e., if the current owner and the prior owner each submitted a 2016 year-end cost report, then both cost reports would be used to determine the Medicaid utilization rate).
- If no cost report was filed for the prior year-end because the current or prior owner submitted an extended period cost report, then the most recent cost report filed prior to the previous calendar year that covers a period of at least seven months will be used in calculating the Medicaid utilization rate.

Medicaid Provider Manual

- If the immediate prior year-end cost report is the only cost report the provider has ever filed, then that cost report will be used in calculating the Medicaid utilization rate even if it covers a cost reporting period of less than seven months.
- A provider that has not filed an immediate prior year-end cost report will be assumed to have no Medicaid utilization.

Per-bed QMI payment amounts are multiplied by a Medicaid utilization scale. The Medicaid utilization scale will be applied as follows:

- For nursing facilities with a Medicaid utilization rate of above 63%, the facility shall receive 100% of the QMI payment.
- For nursing facilities with a Medicaid utilization rate between 50% and 63%, the facility shall receive 75% of the QMI payment.
- For nursing facilities with a Medicaid utilization rate of less than 50%, the facility shall receive a payment proportionate to their Medicaid utilization rate.

Example: Facility A has a Medicaid utilization rate of 64% while Facility B has a Medicaid utilization rate of 35%, so Facility A would receive 100% of their QMI payment while Facility B would receive 35% of their payment.

Effective for rate years beginning on or after October 1, 2018, an adjustment is made for the submission of resident satisfaction survey data from recently performed surveys. The Long Term Care Policy Section will provide notice to facilities prior to the fiscal year on how to submit the data, what documentation is necessary, and where to submit resident satisfaction survey data by a due date specified in the notice. Per-bed QMI payments will be multiplied by 100% for facilities that submit acceptable resident satisfaction survey data and documentation, but payments will be multiplied by a percentage set by MDHHS for facilities that do not submit the data and documentation. The resident satisfaction survey must have been conducted no more than 12 months before the submission of the notice, and survey data submitted for prior year QMI payments will not be accepted.

The following formula demonstrates the monthly adjusted QMI payment (for rate years prior to October 1, 2018, the resident satisfaction survey factor is not included in the formula):

- $$\text{QMI Gross Adjustment} = (([\text{NHC Per-Bed Amount}] \times [\text{Medicaid Utilization Scale}] \times [\text{Resident Satisfaction Survey Factor}]) \times [\text{Number of Licensed Nursing Facility Beds}]) / [\text{Number of Eligible Payment Months}]$$

Examples:

- For rate year October 1, 2017, Nursing Facility A has an average NHC rating of 5 stars, a Medicaid utilization rate of 55%, 100 licensed nursing facility beds, and meets all the payment eligibility requirements. The NHC per-bed amount for a 5-star rating is \$2,000, so the QMI Gross Adjustment = $((\$2,000) \times (75\%) \times (100)) / 12 = \$12,500/\text{month}$.

Medicaid Provider Manual

- For rate year October 1, 2017, Nursing Facility B has an average NHC rating of 2 stars, a Medicaid utilization rate of 32%, 45 licensed nursing facility beds, and meets all the payment eligibility requirements. The NHC per-bed amount for a 2-star rating is \$1,250, so the QMI Gross Adjustment = $((\$1,250) \times (32\%) \times (45))/12 = \$1,500/\text{month}$.
- For rate year October 1, 2018, Nursing Facility C has an average NHC rating of 3 stars, a Medicaid utilization rate of 78%, 200 licensed nursing facility beds, has not submitted resident satisfaction survey data, and meets all the payment eligibility requirements. The NHC per-bed amount for a 4-star rating is \$1,750 and the resident satisfaction survey factor for facilities with no survey is 85%, so the QMI Gross Adjustment = $((\$1,750) \times (100\%) \times (85\%) \times (200))/12 = \$24,791.67/\text{month}$.

All values in the examples above are for example purposes only and do not reflect actual rates.

10.8 CLASS II NURSING FACILITIES – PROPRIETARY NURSING FACILITY FOR INDIVIDUALS WITH MENTAL ILLNESS OR INTELLECTUAL DISABILITIES

The Class II proprietary nursing facilities for individuals with mental illness or intellectual disabilities are reimbursed an all-inclusive prospective payment rate negotiated with the MDHHS State Mental Health Agency on an annual basis. Rate ceiling limits are prospectively set for allowable costs and resident occupancy for determining final reimbursement for the annual services. Final reimbursement is retrospective cost settlement, not to exceed the ceiling limit. Nursing facility allowable costs included for reimbursement are determined in accordance with Medicaid cost reporting requirements and allowable and non-allowable cost policies, including plant cost based on allowable depreciation expense. The provider is paid a reimbursement efficiency allowance equal to the lesser of \$2.50 per resident day or the difference between the prospective ceiling limit and the nursing facility actual allowable cost.

10.9 CLASS IV NURSING FACILITIES – INSTITUTIONS FOR INDIVIDUALS WITH DEVELOPMENTAL DISABILITIES

State-owned and -operated institutions, Intermediate Care Facilities for Individuals with Intellectual Disabilities (ICF/IID), and non-profit nursing facilities for individuals with intellectual disabilities are retrospectively cost settled.

The State Mental Health Agency must submit rate information regarding the facility's expected costs for the prospective year in an Interim Rate Request letter to Medicaid at the beginning of the Medicaid rate year. Subsequent requests may be submitted during the rate year if rate adjustments are necessary. The reimbursement rate for the new Medicaid rate year will not be updated until the State Mental Health Agency submits the Interim Rate Request letter.

The provider is reimbursed an interim per diem rate based on the cost information submitted. The interim reimbursement is adjusted to actual allowable costs through annual cost settlement. Refer to the Cost Reporting and the Rate Setting sections of this appendix for additional information.

10.10 CLASS VI NURSING FACILITIES – HOSPITAL SWING BEDS

The reimbursement rate for hospital Swing Beds (Class VI) is set prospectively as a flat per diem rate determined by Medicaid. Swing bed reimbursement occurs after the combined length of stay in an acute care bed and a swing bed exceeds the average length of stay for the Medicaid diagnosis related group (DRG) for the admission.

The rate is the weighted statewide average per diem rate paid for routine nursing care. The rate calculation sums Medicaid per diem payments and divides the sum by the number of Medicaid service days paid to Class I and Class III facilities as reflected on the State's prior fiscal year's Medicaid report of services and payments.

10.11 CLASS VII NURSING FACILITIES – STATE VETERANS' HOMES

Reimbursement rates to State Veterans' Homes will be prospective, per patient day, and based on the PDM classification of each resident. MDHHS will utilize the PDM classifications used under the Medicare skilled nursing facility (SNF) prospective payment system (PPS) as calculated by the MDS 3.0. PDPM consists of four case-mix categories and six rate components. The PT and OT component, the SLP component, the NTA component and the Nursing component represent the four case-mix categories. PDPM rates are comprised of a PT component, OT component, a SLP component, an NTA component, a Nursing component and a Non-Case-Mix component. The Variable Per Diem adjustment and the add-on payment for residents with AIDS under the Medicare SNF PPS are not included in this rate methodology.

The formula for PDPM payments is as follows:

$$PDPM \text{ rate} = PT \text{ rate} + OT \text{ rate} + SLP \text{ rate} + NTA \text{ rate} + Nursing \text{ rate} + Non\text{-}Case\text{-}Mix \text{ rate}$$

Refer to the Directory Appendix for website information regarding PDPM.

The rate associated with an individual PDPM component will be set as a percentage of the rate paid by the Medicare SNF PPS. The percentage used to set rates will not exceed 100% of the corresponding Medicare PPS rate. MDHHS will notify the State Veterans' Homes of the percentage and specific payment rates by October 1 of each year.

The PDPM categories used for payments will be based on the applicable MDS assessment(s) to the billing period. Example: Services were rendered from April 1 through April 30, and MDS assessments were conducted on January 15 and April 15. The payment to the provider would be based on the January 15 assessment for dates of services from April 1 through April 14, and would be based on the April 15 assessment for dates of services April 15 through April 30.

State Veterans' Homes are excluded from the reimbursement policy that requires Medicaid to pay the lower of the customary charge to the general public or the prospective rate determined by Medicaid.

In conformance with the Veterans' Health Programs Improvement Act of 2004, per diem payments received by State Veterans' Homes from the federal Department of Veterans Affairs will not be considered a third-party liability or otherwise used to directly reduce Medicaid payments to these providers.

State Veterans' Homes are excluded from the NF QAAP and all supplemental payments funded by the QAAP.

Medicaid Provider Manual

State Veterans' Homes will receive payment for services through gross adjustments.

10.12 ADD-ONS

Add-ons are items that provide reimbursement to a provider for costs that are not previously included in the provider's variable cost component.

10.12.A. SPECIAL DIETARY

The Coverages portion of this chapter, Dietary Services and Food subsection, provides for program reimbursement to non-profit nursing facilities for special dietary needs for religious reasons. Interim payment reimbursement to the nursing facility will be made by inclusion of a per diem rate add-on amount to the nursing facility routine nursing care rate. The total special dietary add-on reimbursement to the nursing facility during the reimbursement year will be adjusted through the annual cost report reimbursement settlement. Refer to the Cost Report Reimbursement Settlement section of this appendix for additional information.

A qualifying nursing facility that has previous year cost history of special dietary costs will have the interim payment rate add-on based on special dietary cost center allocated cost and nursing facility resident census data determined in the nursing facility cost report. The most recent annual filed or audited cost report that is used for determining the nursing facility current routine nursing care rate will be the source of the cost data for the current interim rate add-on.

A qualifying nursing facility that does not have previous year cost history of special dietary costs will have an interim reimbursement rate add-on based on estimated cost data. The nursing facility must submit a written request identifying the estimated costs to be incurred in food purchase and preparation associated with special dietary needs for religious reasons. The request must be submitted to the RARSS and must include a certification statement attesting to the accuracy of the data and signed by the nursing facility authorized representative. (Refer to the Directory Appendix for contact information.) The written request must present the following data for the current cost report year:

- Estimated resident days (not less than 85% occupancy rate for all nursing facility resident units)
- Estimated raw food purchase costs, including a detailed listing of the types of food to be purchased for special dietary needs for religious reasons.
- Estimated cost for supplies, tableware, cooking utensils, etc. for food preparation and service associated with special dietary needs for religious reasons.

The submitted data will be subject to review and adjustment by Medicaid for consideration and calculation of the interim rate and the add-on reimbursement rate to the facility. The submitted data will be utilized for interim rate determination until annual cost reporting data has been filed and accepted by Medicaid.

10.12.B. NURSE AIDE TRAINING AND COMPETENCY EVALUATION PROGRAM (NATCEP) ADD-ON

Certification, Survey & Enforcement Appendix, Staff Certification section provides for nursing facility Medicaid reimbursement for Medicaid's share of costs incurred by the nursing facility for approved Nursing Aide Training and Competency Evaluation Program (NATCEP) expenditures. Interim payment reimbursement to the nursing facility will be made by inclusion of a per diem rate add-on amount to the nursing facility routine nursing care rate. The total NATCEP add-on reimbursement paid to the nursing facility during the nursing facility's cost report reimbursement year will be adjusted through the annual cost report reimbursement settlement. Refer to the Cost Classifications and Cost Finding section and Cost Report Reimbursement Settlement section of this appendix for additional information.

The interim rate add-on amount is limited to a maximum per diem of \$1.00 per resident day; however, the nursing facility cost reimbursement settlement for these training costs is not subject to a per diem limit. The interim payment rate add-on will reflect the nursing facility's prior year cost history of NATCEP costs utilizing the NATCEP cost center allocated cost and nursing facility resident census data determined in the nursing facility cost report. The most recent annual filed or audited cost report that is used for determining the nursing facility current routine nursing care rate is the source of the cost data for the current interim rate add-on, except where a more recent interim reimbursement request has been submitted by the nursing facility.

A nursing facility that is notified by the SSA of loss of NATCEP or CEP, has been placed on NATCEP lockout status, or has a NATCEP withdrawal of program approval will be notified by Medicaid that its interim reimbursement NATCEP add-on amount will be deleted from the reimbursement rate. The nursing facility must submit a completed interim reimbursement request identifying expected NATCEP allowable costs, in accordance with policy provisions referenced above, for consideration of an interim reimbursement add-on amount for allowable NATCEP costs incurred during the lockout period.

A nursing facility is eligible to submit an interim reimbursement request for a change in the interim payment rate add-on amount in the following situations:

- The nursing facility is experiencing a change in its current year NATCEP cost level that would cause a per diem increase or decrease in excess of \$.25 per day in the current period reimbursement rate add-on.
- The nursing facility does not have previous year cost history of NATCEP cost.
- The nursing facility has been identified a lockout facility for NATCEP or CEP, or has loss of approval of its NATCEP, and has made acceptable arrangements for securing approved nurse aide training for nursing facility staff.

The nursing facility must submit a completed Nurse Aide Training and Testing Program Interim Reimbursement Request (form MSA-1324) identifying the estimated costs to be incurred in providing approved NATCEP training for the nursing facility staff and projected resident census data. The request must be submitted to RARSS and must include the signed certification statement attesting to the accuracy of the data and

Medicaid Provider Manual

signed by the nursing facility authorized representative. (Refer to the Directory Appendix for contact information.) Electronic copies of the request form and completion instructions can be accessed on the MDHHS website. (Refer to the Directory Appendix for website information.)

The submitted data is subject to review and adjustment by Medicaid for consideration and calculation of the interim rate add-on payment to the facility. Medicaid will issue the provider a rate notice indicating the accepted cost level for interim rate determination, or a request denial and reason for such action. The submitted data will be utilized for interim rate determination until annual cost reporting data has been filed and accepted by Medicaid.

10.13 SPECIAL CIRCUMSTANCES – RATE DETERMINATION

10.13.A. NEW FACILITY AND PROVIDER

A new facility is a provider operating a nursing facility where there is not Medicaid historical cost. Examples include:

- A newly constructed (non-replacement) facility.
- An existing facility that has never before participated in Medicaid.
- A facility that has participated in Medicaid in a different provider class.
- An existing nursing facility that has not provided nursing care for Medicaid beneficiaries or billed Medicaid in the past two years (24 months).

10.13.A.1. NEW PROVIDER NURSING FACILITY PER RESIDENT DAY PLANT COST

A new provider in the Medicaid program is eligible for the Plant Cost Certification process to reflect the facility asset costs and related plant costs. The Plant Cost Certification data submission will be used for calculation of the nursing facility Plant Cost Component as outlined in the policy for the respective nursing facility class. Refer to the Plant Cost Certification section of this appendix for additional information.

10.13.A.2. NEW PROVIDER NURSING FACILITY VARIABLE COST COMPONENT

The Variable Rate Base for the new facility and provider will be determined using special methods. During the first two cost reporting periods, new facilities and facilities with a change of class will have a Variable Rate Base equal to the Class Average of Variable Costs. The first two cost reporting periods must cover a period of at least 19 months (the first cost reporting period must cover a period of at least seven months, and the second cost reporting period must cover a period of 12 months) and the facility must have averaged six or more Medicaid residents per day. This rate base will be used in the calculation of the nursing facility Variable Cost Component as outlined in the policy for the respective nursing class. In subsequent periods, the nursing facility's Variable Rate Base will be determined using the methods described in the Rate Determination section of this appendix.

Medicaid Provider Manual

A new provider that purchases an existing facility participating in the Medicaid program or a provider with an existing, participating facility that makes major additions, renovations, or new construction does not qualify for these special methods because there are historical variable costs on which to base rates. The Variable Rate Base will be determined in accordance with Medicaid policy identified in applicable subsections of this appendix.

This section does not apply to Class V providers.

10.13.B. COMPLEX CARE

The Nursing Facility Coverages chapter of this manual details Medicaid policy on complex care cases. Complex care cases are those requiring specialized care beyond services covered by the usual Medicaid per diem rate. The payment rate for specially-placed residents is a negotiated prospective rate per resident day.

Reimbursement is made for prior authorized services/care to residents who have specialized and concentrated nursing and support service needs and who have been transferred from an acute care hospital setting to an approved nursing facility. The negotiated rate provides reimbursement adequate to meet the unusual needs of this type of resident in a less costly and more appropriate environment than an acute care hospital setting.

Factors used in Medicaid's negotiation of the per resident day prospective rate include, but are not limited to, complexity, type of equipment and supplies required, the resident's condition, and the marketplace availability of placement. Any authorized increase in the per diem rate represents only the cost of the service. The negotiated prospective rate is re-evaluated, in consideration of the resident's needs, prior to the last day of the approval period.

10.13.C. HOSPITAL LEAVE DAYS

The Hospital Leave Days Section in the Coverages portion of this chapter identifies the parameters for program reimbursement.

Reimbursement for a hospital leave day is a single rate paid to all nursing facility providers regardless of facility class. The rate is determined annually with an effective period coinciding with the State fiscal year. The rate determination utilizes the Class I nursing facility Class Average Variable Cost (AVC) for the State fiscal year. The hospital leave day reimbursement rate represents a calculated salary and wage component of the room and board cost portion of the total AVC. The room and board portion is equal to 95 percent of the Class I nursing facility AVC, and the salary and wage component is determined as 66 percent of the room and board cost. The formula for calculating the hospital leave day rate is:

AVC (Class I NF)	×	95% (room and board portion)	×	66% (salary and wage component)	=	Hospital Leave Day Rate
------------------	---	------------------------------	---	---------------------------------	---	-------------------------

Medicaid Provider Manual

Hospital Leave Day rate information is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

10.13.D. THERAPEUTIC LEAVE DAY

The Therapeutic Leave Days section in the Coverages portion of this chapter identifies the parameters for program reimbursement.

The reimbursement rate for a therapeutic leave day is the nursing facility's established per diem rate in effect for the period coinciding with the leave day.

10.13.E. ONE-DAY STAY

The One-Day Stay section of the Coverages portion of this chapter identifies the parameters for program reimbursement.

The reimbursement rate for an approved one-day stay is the nursing facility's established per diem rate in effect for the period coinciding with the stay.

10.13.F. FACILITY INNOVATIVE DESIGN SUPPLEMENTAL (FIDS) PROGRAM

Effective for dates of service on and after October 1, 2007, Medicaid providers participating in the Facility Innovative Design Supplemental (FIDS) program are eligible to receive supplemental reimbursement for room and board services provided to Medicaid beneficiaries when the beneficiary resides in a FIDS bed. FIDS participating facilities are eligible for the reimbursement supplement for up to 20 consecutive years beginning in the fiscal year of the project completion date. For projects completed on or after January 1, 2008, providers must plant cost certify or forgo the FIDS reimbursement supplement.

The FIDS facility standards and required culture change must be maintained throughout the Medicaid supplemental payment program. FIDS participating facilities will be reviewed annually by BPHASA to certify continued participation in the culture change. Reimbursement of the FIDS payment will be terminated if it is determined that a facility is not compliant with the culture change requirement. FIDS participating nursing facilities receive increased capital reimbursement for FIDS construction and renovation projects. The increased reimbursement is paid through the claims reimbursement process. Reimbursement of the supplement amount is contingent upon sufficient appropriation to the Medicaid budget.

10.13.F.1. CHANGE OF OWNERSHIP

A new owner may receive reimbursement for the balance of the facility's eligible years of participation in the FIDS program. The new owner must notify RARSS via File Transfer within 45 calendar days of the change of ownership if the facility is going to continue participation in the FIDS program, or RARSS will assume participation has been discontinued and end FIDS reimbursement supplemental payments. In order to receive the supplemental Medicaid payment, the new owner must continue the FIDS facility standards and culture change. If the new owner initially decides to discontinue

Medicaid Provider Manual

participation as a FIDS facility and subsequently decides to participate as a FIDS facility, the provider must notify the LARA, Bureau of Community and Health Systems (BCHS) team manager and BPHASA. MDHHS will notify the provider of the supplemental payment amount upon reinstatement of participation in FIDS. MDHHS will notify the provider of the terminated supplemental payment if the facility is determined ineligible for the supplemental payment because the new owner has discontinued or plans to discontinue the FIDS facility standards or culture change.

10.13.F.2. FIDS PROGRAM REIMBURSEMENT METHODOLOGY

FIDS participating facilities that have received approval from LARA for construction or renovation design plans that complied with quality goals of the FIDS program to improve nursing facility quality of life and nursing facility structures are eligible for reimbursement. If a provider chooses to discontinue participation in the design and/or culture change aspects of the FIDS program, the provider must contact the MDHHS LTC Reimbursement and Rate Setting Section (RARSS) 30 days prior to the discontinuance. (Refer to the Directory Appendix for contact information.) The FIDS reimbursement supplement will be discontinued when the facility no longer participates in the design and/or culture change.

MDHHS confirmation and approval that a FIDS participating facility has completed the pre-approved construction or renovation project(s) allows the facility to be eligible for the capital reimbursement supplement. The reimbursement supplement only applies to qualifying FIDS costs above the nursing facility's Capital Asset Value (CAV) Limit for Class I and the Plant Cost Limit (PCL) for Class III. Qualifying costs are the cost of capital assets such as land, land improvement, building, building improvement, and equipment that meet the MDHHS capital asset classification. Providers submitting for plant cost certification can identify all costs for certification but must distinguish FIDS qualifying costs on the certification request. As FIDS qualifying costs fall below the nursing facility's CAV or the nursing facility's PCL, the supplement amount is adjusted. The reimbursement supplement reflects qualifying costs prorated over 20 consecutive years. Medicaid reimbursement methodology for the FIDS program follows current MDHHS nursing facility cost-based principles and rate determination guidelines and policy, including plant cost certification, except as identified below for Class I and Class III providers.

10.13.F.3. CLASS I NURSING FACILITY REIMBURSEMENT FOR FIDS

For Class I nursing facilities participating in the FIDS program, the supplement amount, up to five dollars (\$5) per Medicaid day, is added to the Return on Current Asset Value Component (RCAV) for qualifying FIDS construction or renovation project costs above the nursing facility's CAV Limit. Medicaid reimbursement methodology for the FIDS program follows current Medicaid nursing facility reimbursement guidelines and policy with the exceptions noted below:

- Up to five dollars (\$5) per Medicaid day is added to the nursing facility's RCAV.
- The supplement amount is based on qualifying costs above the nursing facility's CAV Limit determined by MDHHS either by plant cost certification or by cost reporting. When the plant cost certification estimate is used, the amount of the supplement is subject to

Medicaid Provider Manual

an adjustment following the completion of an audit to the applicable period's cost report in which the FIDS project is initially reported.

- To determine the amount of the FIDS supplement, MDHHS will utilize the following calculation:
 - Qualifying FIDS construction or renovation costs above the CAV Limit are divided by the number of FIDS beds in the project divided by the number of years remaining in the supplemental program divided by 365 days.

10.13.F.4. CLASS III NURSING FACILITY REIMBURSEMENT FOR FIDS

For Class III nursing facilities participating in the FIDS program, MDHHS will increase the Plant Cost Component (PCC) up to five dollars (\$5) per Medicaid day for FIDS construction or renovation project costs above the nursing facility's PCL. MDHHS reimbursement methodology for the FIDS program follows current MDHHS nursing facility reimbursement guidelines and policy with the exceptions noted below.

- Up to five dollars (\$5) per Medicaid day is added to the nursing facility's PCC.
- The supplement amount is based on qualifying costs above the re-determined PCL determined by MDHHS either by plant cost certification or by cost reporting. When the plant cost certification estimate is used, the amount of the supplement is subject to an adjustment following the completion of an audit to the applicable period's cost report in which the FIDS project is initially reported.
- To determine the amount of the FIDS supplement, MDHHS will apply the following to qualifying project costs:
 - For FIDS renovation projects, the supplement is determined using qualifying costs to calculate the plant cost per resident day above the facility's PCL per resident day.
 - For a newly constructed facility, the calculation will be based on plant cost per resident day above the Class PCL per resident day effective the quarter the new construction is placed into service.

10.13.F.5. FIDS PROGRAM BILLING AND REIMBURSEMENT PROCESS

Participating FIDS providers are reimbursed per Medicaid day when claims are submitted for services provided in the FIDS area. FIDS facilities compliant with facility standards and culture change are eligible for the supplemental payment. Only participating FIDS providers billing for room and board in a FIDS area are to use the following revenue codes:

- For a single occupancy/private room, bill revenue code 0119
- For a double occupancy/semi-private room, bill revenue code 0129
- For Therapeutic Leave Day claims, bill revenue code 0189
- For hospice room and board, bill revenue code 0659

Medicaid Provider Manual

FIDS reimbursement is subject to post-payment audit action, including the prospective elimination of a provider's supplemental payment if the provider submits claims for FIDS services not provided in an approved FIDS area.

(Subsection 10.14 Rate Relief for Class I Nursing Facilities was removed per bulletin MMP 24-55. This included the following subsections:

- **10.14.A. Eligibility Criteria**
- **10.14.B. Rate Relief Petition Process**
- **10.14.C. Rate Relief Agreement**
- **10.14.D. Rate Relief Period**
- **10.14.E. Withdrawal of Rate Relief Agreement**
- **10.14.F. Rate Relief Appeals**
- **10.14.G. Rate Relief for a New Provider in a Medicaid-Enrolled Nursing Facility With a Variable Rate Base Less Than or Equal to 80 Percent of the Class Average Variable Cost**
- **10.14.G.1. Rate Relief Methodology**
- **10.14.H. Rate Relief for a Current Provider or a New Provider in a Medicaid Enrolled Nursing Facility With a Variable Rate Base Between 80 Percent and 100 Percent of the Class Average Variable Cost**
- **10.14.H.1. Rate Relief Methodology**
- **10.14.I. Rate Relief for a Current Provider in a Medicaid Enrolled Nursing Home Facility With a Variable Rate Base Less Than or Equal to 60 Percent of the Variable Cost Limit**
- **10.14.I.1. Rate Relief Methodology**

10.14 COUNTY MEDICAL CARE FACILITIES SPECIAL PAYMENTS (CMCFSP) PROGRAM [RE-NUMBERED 4/1/2025]

Eligible County Medical Care Facilities (CMCF) may receive special payments for unreimbursed costs incurred for services to Medicaid beneficiaries. Allocations to individual facilities will be determined based upon unreimbursed costs certified as public expenditures in accordance with the Code of Federal Regulations (CFR) 42 CFR 433.51. MDHHS will make special payments to CMCFs who provided services to Medicaid beneficiaries for dates of service on and after January 1, 2009.

10.14.A. ELIGIBILITY FOR CMCFSP PROGRAM [RE-NUMBERED 4/1/2025]

To be eligible for participation in the CMCFSP Program, each provider must meet the following conditions:

- The provider must be a county-owned and -operated licensed CMCF.
- The provider must be certified to serve Medicaid beneficiaries.
- The provider must have reported Medicaid bed days during the fiscal year covered.
- The provider must have incurred allowable costs in excess of Medicaid reimbursement for Medicaid bed days reported during the fiscal year covered.

10.14.B. ENROLLMENT IN CMCFSP PROGRAM [RE-NUMBERED 4/1/2025]

To participate in the CMCFSP Program, a Medicaid-participating CMCF must submit a signed copy of the Attestation of Participation form to the MDHHS LTC Reimbursement

Medicaid Provider Manual

and Rate Setting Section (RARSS). (Refer to the Directory Appendix for contact information.) Providers must acknowledge and agree to the terms of participation in the CMCFSP Program as outlined in this section and in the attestation form.

If a provider desires to receive interim payments during their fiscal year, the request to participate in the CMCFSP Program must be received prior to that fiscal year for which participation is desired. A provider may also wait to submit a request to participate until the filing of their annual Medicaid cost report. If a provider opts to participate when they file their annual cost report, the provider may receive payments for unreimbursed costs through the initial and final reconciliation but will not receive interim payments.

If participation is approved, RARSS will enroll the provider in the CMCFSP Program in the provider's fiscal year following the approval of RARSS. The provider must submit an attestation form for each year that the provider desires to participate in the CMCFSP Program.

10.14.C. CALCULATION OF CMCFSP PAYMENT [RE-NUMBERED 4/1/2025]

An interim payment and reconciliation process will be employed to make payments to qualifying facilities. Allowable unreimbursed costs for services provided to Medicaid beneficiaries will be determined from information reported on the most recently filed cost report. Allowable unreimbursed costs are defined as total allowable Medicaid routine costs before formula limitations minus total Medicaid routine services revenue received. Medicaid routine services revenue includes all revenues received for Medicaid routine services, including all supplemental/enhanced payments (e.g., Net QAS, Net QMI Amount, etc.) from the State and all payments received from residents and other payers for the same services. Costs will be trended to the current state fiscal year using an inflation factor, without capital, taken from the Health Care Cost Review, which is published quarterly by Global Insight. Interim payments will then be made to qualifying CMCFs.

10.14.D. RECONCILIATION PROCESS [RE-NUMBERED 4/1/2025]

Interim payments will be reconciled twice. First, an interim reconciliation of the original payments will be conducted based on allowable Medicaid costs. Information needed to reconcile initial payments will be obtained from the cost report filed with MDHHS for the applicable reporting period. Second, payments will be readjusted based on changes to the filed cost report for the applicable reporting period, resulting from an audit of that cost report conducted by MDHHS.

Facilities receiving special payments for unreimbursed Medicaid costs are liable for any overpayment amount identified in the reconciliation process. Providers must repay any overpayment amount within 120 days of the date of notification of overpayment.

SECTION 11 - APPEAL PROCESS

A nursing facility participating in the Medicaid program may appeal an adverse action and certain determinations made by Medicaid. The provider will be given a written notice of the determination or action that outlines the proposed action, the provider's appeal rights, and the appeal process.

Adverse actions include, but are not limited to:

- A suspension or termination of a provider's Medicaid program participation.
- A reduction, suspension, or adjustment of provider payments.
- A retroactive adjustment following an audit or review of a facility's daily reimbursement rate or other services reimbursement.
- The prospective reimbursement rate determination.

Some elements of the Medicaid nursing facility reimbursement determination methodology are not appealed through an administrative process, but may be appealed to a court of appropriate jurisdiction. These are elements where an administrative remedy, if permitted for a single provider, would imply or necessitate a change for all providers or for all providers in a class and include, but are not limited to:

- The formula for the determination of the nursing facility cost factor.
- The Principles of Reimbursement and guidelines that define allowable costs.
- Non-Medicaid issues.
- Cost limits established in program policy.
- Medicaid's determination of allowable items and costs until an audit has been completed.

The provider retains their right to an administrative hearing regardless of the outcome of the internal conference. The provider may waive the internal conference and directly request an administrative hearing. The review and hearings process for providers has been promulgated in the administrative rules located on LARA's website. The process is explained in more detail in the MDHHS Administrative Hearing pamphlet on the MDHHS website. (Refer to the Directory Appendix for website information.)

11.1 AUDIT APPEALS

Each nursing facility cost report is audited to ensure that expenses were reported in adherence with Medicaid policy. Once the Exit Meeting is completed or waived, the provider is given a Preliminary Summary of Audit Adjustments Notice via File Transfer. This notice outlines audit results, serves as the adverse action notice, and advises the nursing facility of subsequent appeal rights, up to and including an administrative hearing. The provider or their designee has 30 calendar days from the date of the Preliminary Summary of Audit Adjustments Notice to request a formal hearing in accordance with MDHHS rules for hearings.

If the provider or the provider's designee does not respond to the Preliminary Summary of Audit Adjustments Notice within 30 calendar days of the date of the notice, then the Preliminary Summary of Audit Adjustments Notice will serve as the Final Summary of Audit Adjustments Notice. If the appeal process is exhausted, the provider will receive a Final Summary of Audit Adjustments Notice. The Final

Medicaid Provider Manual

Summary of Audit Adjustments Notice outlines the final audit results and may not be appealed. A Preliminary Summary of Audit Adjustments Notice that serves as a Final Summary of Audit Adjustments Notice is also not appealable.

To ensure faster processing of final settlements, a provider should notify MDHHS via File Transfer if they are not appealing any of the audit adjustments in the Preliminary Summary of Audit Adjustments Notice.

If a provider does not appeal or does not respond to the Preliminary Summary of Audit Adjustments Notice or other notices or processes related to a conference or hearing within the allotted timeframe, the provider has waived the right to any further administrative review.

11.2 RATE APPEALS

Providers are notified in writing of their Medicaid reimbursement rate(s) at least 30 calendar days prior to the rate's effective date. The provider is given an opportunity for informal review of the rate determination by RARSS. The provider may also formally appeal issues of disagreement or dispute regarding the determined reimbursement rate. A notice of appeal rights, with instructions on how to request an appeal, is included in the final settlement Notice of Medicaid Reimbursement.

11.3 REIMBURSEMENT SETTLEMENT APPEALS

A final settlement reimbursement determination is made to determine the aggregate Medicaid reimbursement to the nursing facility for the period covered by the cost report. Providers are notified in writing of the final reimbursement settlement and given an opportunity for informal review of the settlement determination. The provider may formally appeal issues of disagreement or dispute of the reimbursement settlement determination. A notice of appeal rights, with instructions on how to request an appeal, is included in the final settlement Notice of Program Reimbursement.

11.4 PROVISIONAL RATES

A provider will be given a provisional rate for the new rate year if:

- Medicaid is responsible for a delay in determination procedures.
- An Area Office Conference or Administrative Conference is in progress.
- The potential for an Area Office Conference or an Administrative Conference is still open at the beginning of the rate year that begins a year and a day after the end of the rate year that is being processed.

For this purpose, "delay in the procedures" means (if applicable):

- Medicaid failed to issue the Preliminary Summary of Audit Adjustments in a timely manner.
- Medicaid failed to conduct the Area Office Conference in a timely manner.
- Medicaid failed to issue the Final Summary of Audit Adjustments Notice, including a final determination notice, in a timely manner.

11.5 PROVIDER PAYMENT ADJUSTMENT RESULTING FROM APPEAL DECISION

If the appeal result requires a change in a provider's rate or reimbursement level, the change will be made retroactively for service periods coinciding with the effective dates of the original reimbursement rate notice. Payment adjustments will be made by an aggregate adjustment rather than by individual claim adjustments.

SECTION 12 – DIRECT CARE WORKER WAGE INCREASE FOR PERSONAL CARE SERVICES

The direct care worker wage increase is consistent with the final State fiscal year budget and is available for eligible clinical and non-clinical direct care workers providing in-person direct care for Medicaid beneficiaries in Medicaid-certified nursing facilities. This payment applies to base hourly wages that were in effect on September 30 of the previous fiscal year and includes any associated share of employer Federal Insurance Contributions Act (FICA) payroll taxes. Any subsequent wage increases will be according to the applicable fee schedule found on the MDHHS website. (Refer to the Directory Appendix for website information.)

- Eligible clinical direct care workers include registered nurses, licensed practical nurses, competency-evaluated nursing assistants, and respiratory therapists employed by Medicaid-certified nursing facilities.
- Eligible non-clinical workers include Medicaid-certified nursing facility employees whose costs are reported in the following job classifications in nursing facility institutional cost reports: other housekeeping, other maintenance worker, other plant operations, other laundry, dining room assistants, other dietary worker, other medical records, other social services, other diversion therapy, beauty and barber, gift, flower, coffee and canteen worker.
 - An employee in a non-direct care position (e.g., recreation coordinator, administrator) who also has a current license as a Registered Nurse, Licensed Practical Nurse or respiratory therapist, or current certification as a competency-evaluated nursing assistant is eligible for the wage increase only for hours worked providing direct care.
 - A nursing assistant who has not completed the evaluation for certification is not eligible for the wage increase.
 - An administrative or support employee providing direct care does not qualify if that person does not have the qualifying license or certification.
 - Any qualifying administrative or support employee providing direct care is required to remain in compliance with all federal laws applied in CFR 483.35 (b)(1)-(3). (Refer to the Directory Appendix for website information.)
 - State employees are not eligible for the wage increase.

12.1 ADMINISTRATION OF PREMIUM PAY

- For eligible clinical direct and indirect care staff, the hourly wage increase should be a base wage increase paid above the worker's regular wage paid or starting wage offered to eligible staff on September 30 of the previous fiscal year.
- The wage increase payment cannot be used to supplant other wage increases.
- The wage increase must be applied entirely to eligible employee wages. Any associated share of employer Federal Insurance Contributions Act (FICA) payroll taxes must also be paid.
- The wage increase must be paid to employees prior to requesting reimbursement from MDHHS and on at least a monthly basis. Any nursing facility who holds employee owed wage increases

Medicaid Provider Manual

in a bank account for any period of time shall be required to reimburse MDHHS for any accumulated interest associated with the payments.

- The wage increase applies to overtime hours for non-exempt employees (including those employees covered by the "8 and 80" overtime system) at a time-and-a-half rate per hour for clinical workers and non-clinical workers providing direct care.
 - For example, if the current wage increase amount was \$3.40 for clinical and \$0.85 for non-clinical and an employee works 43 hours in a week and is not covered by the "8 and 80" overtime system, they would be eligible for 3 hours of overtime and the wage increase would be \$5.10 per hour for a clinical worker and \$1.28 per hour for the non-clinical worker for the 3 overtime hours.
 - If an eligible employee providing direct care is paid on a salary basis, the wage increase for a regular work week would be \$136 (40 hours x \$3.40) or \$272 (80 hours x \$3.40) in a two-week period for a clinical worker and \$34 (40 hours x \$0.85) for a regular work week or \$68 (80 hours x \$0.85) in a two-week period for a non-clinical worker.
 - A nursing facility is eligible for reimbursement for employee payroll tax expenses directly related to the \$3.40 and \$0.85 per hour wage increase and \$5.10 and \$1.28 per hour overtime wage increase.
- The wage increase does not apply to employer contributions to the employee's retirement plan.
- Additional funding is not available to the nursing facility for Worker's Compensation, unemployment insurance costs or other additional administrative costs associated with the wage increase funding.
- The wage increase is a direct pass-through separate from the Medicaid nursing facility per diem.
- An employee eligible for the wage increase may elect to not receive the payment. This decision must be documented in writing or electronically by the employee.
- This funding is subject to audit and recoupment if these funds are not used for their intended purpose.

12.2 REPORTING

Updated Wage Pass-Through forms, as well as more information regarding administration of the wage increase for skilled nursing facilities, can be found in a Frequently Asked Questions document found on the MDHHS website. (Refer to the Directory Appendix for website information.)

- Nursing homes must complete the Nursing Home Direct Care Worker and Non-Clinical Staff Wage Pass-Through Reimbursement form (MDHHS-5919-A) and submit to MDHHS for reimbursement. (Refer to the Directory Appendix for website information.) Completed forms should be submitted on a monthly or bi-weekly basis. Nursing facilities must maintain payroll and personnel records to support wage increases to eligible employees for direct care hours worked, including overtime hours. As with all MDHHS payments to providers, wage increase funds are subject to audit and recovery of inappropriate payments.
- Nursing facilities should not send to MDHHS any information that is specific to an individual employee. Employee-specific information must be maintained by the nursing facility for audit purposes. If the documentation is required for an audit, it must be submitted using a secure method.

**SECTION 13 – APPRAISAL GUIDELINES**

Where historical cost records of a purchased asset are not available or are incomplete, or where fair market value or current reproduction cost must be established, a timely appraisal of the historical costs, fair market value, or depreciated reproduction cost (as appropriate) of the asset made by an independent, recognized expert is acceptable for depreciation and owner's equity capital purposes. The appraisal of the historical cost of assets should produce a value approximating the cost of reproducing substantially identical assets of like type, quality, and quantity at a price level in a bona fide market as of the date of acquisition. The appraisal must be conducted in accordance with "The Principles of Appraisal Practices and Code of Ethics" of the American Society of Appraisers.

For Medicaid program purposes, the term "appraisal" refers primarily to the process of establishing or reconstructing the historical cost, fair market value, or current reproduction cost of an asset. It includes a systematic, analytic determination and the recording and analyzing of property facts, rights, investments, and values based on a personal inspection and inventory of the property.

Appraisal Date	The date selected for establishing the value of fixed assets. For example, if December 31, 2017 was established as the appraisal date and the actual physical inventory of fixed assets was taken on February 1, 2018, any additions or dispositions of fixed assets between December 31, 2017 and February 1, 2018 must be taken into account in the appraisal values.
Appraised Book Value	The book value of an asset's appraised cost as of the date of acquisition less accumulated depreciation computed on an approved basis up to the appraisal date.
Appraisal Expert	An individual or firm that is experienced and specialized in multi-purpose appraisals of plant assets involving the establishment or reconstruction of the historical cost, fair market value, or current reproduction cost of such assets. The appraisal expert must employ a specially trained and well supervised staff with a complete range of appraisal and cost construction techniques; be experienced in appraisals of plant assets used by providers; and demonstrate a knowledge and understanding of the reimbursement principles, particularly those pertinent to depreciation.

13.1 APPROVAL

Medicaid does not require the nursing facility representatives to get prior approval before an appraisal is made for Medicaid purposes. Medicaid requirements are that the appraisal be conducted in accordance with the provisions of these guidelines. Questions regarding the appraisal of the nursing facility should be directed to the MDHHS LTC Reimbursement and Rate Setting Section (RARSS). (Refer to the Directory Appendix for contact information.) The provider must make the appraisal agreement and final report available to Agency staff for audit review. The scope of the appraisal must conform to Medicare Principles of Reimbursement as modified by Michigan Medicaid for provider costs in effect on the appraisal date.

13.2 NEED FOR APPRAISAL

An appraisal for Medicaid purposes should be made only where the nursing facility provider has no historical cost records, has incomplete records of the depreciable fixed assets, or needs to determine an asset's fair market value or depreciated reproduction cost. The appraisal should develop the historical cost and related information that will assist in the construction, reconstruction, or revision of accounting records to enable the provider to make proper distribution of depreciation expense in cost reports.

Normally, a proprietary provider will not need a historical cost basis of its assets. Where an appraisal is being performed to determine the current reproduction of an asset, the appraisal should represent the cost to reproduce the actual facility in like kind and should not be inflated by such factors as current or anticipated space needs or different construction types, e.g., masonry versus wood frame. Appraisals must be performed within the time limit specified in the proposed agreement and not on a piecemeal or intermittent basis.

13.3 PURCHASE OF ONGOING FACILITY

In establishing the historical cost of assets where an ongoing nursing facility is purchased through a bona fide sale after July 1, 1966 and prior to August 1, 1970, the purchase price or portion thereof attributable to the asset must not exceed the fair market value of the asset at the time of the sale. For depreciable assets acquired after July 1970, the cost basis of the depreciable assets must not exceed the lower of the current reproduction cost adjusted for straight-line depreciation over the life of the assets to the time of the sale or the fair market value of the tangible assets purchased.

If the nursing facility was participating in the Medicaid program at the time of sale, the sale price used by the seller in computing gain or loss for the final cost report must agree with the historical cost used by the new facility owner (the purchaser) in computing depreciation. However, where the basis for depreciation to the purchaser for an asset acquired after July 1970 is limited to the lower of current reproduction cost (adjusted for straight-line depreciation from the time of asset acquisition to the time of the sale) or the fair market value, the basis for computing gain or loss to the seller is the sale price. The gain or loss on the sale of each depreciable asset must be determined by allocating the lump sum sale price among all the assets sold (including land, goodwill, and any assets not related to resident care) in accordance with the fair market value of each asset as it was used by the seller at the time of sale. If the purchaser and seller cannot agree on an allocation of sale price, or if they do agree but there is insufficient documentation of the current fair market value of each asset, the SMA will require an appraisal by an independent appraisal expert to establish the fair market value of each asset and will make an allocation of the sale price in accordance with the appraisal. In any case, the sale price must be allocated among all the assets sold, even if some of the assets will be disposed of shortly after the sale.

If a purchaser cannot demonstrate that the sale is bona fide, the seller's net book value will be used by the purchaser as the basis for depreciation of the asset. In such cases, the purchaser must record the historical cost and accumulated depreciation of the seller recognized under the Medicaid program, and these must be considered as incurred by the purchaser for Medicaid purposes.

The cost basis for the depreciable assets of a nursing facility purchased in a bona fide sale on or after August 1, 1970 is limited to the lowest of the following:

- The total price paid for the facility by the purchaser as allocated to the individual assets;
- The total fair market value of the facility at the time of the sale as allocated to the individual assets;
- The combined fair market value of the individually identified assets at the time of the sale; or
- The current reproduction costs of the depreciable assets, depreciated on a straight-line basis over the life of the assets to the time of the sale.

The purchaser has the burden of proving that the transaction was a bona fide sale, and if the burden is not met, the cost basis may also not exceed the seller's cost basis less accumulated depreciation.

13.4 FIXED ASSETS INCLUDED IN APPRAISED VALUES

Fixed asset values established by an appraisal must include all plant assets owned by the nursing facility provider that are used in resident care or in the overall operation and administration of the facility. Fixed assets used in research and other non-allowable cost areas or functions should be included so that depreciation is reflected in those departmental costs to provide a proper basis for allocating administrative and general expense. Fixed assets of a related organization not used by a provider in rendering resident care, assets acquired in anticipation of expansion, and assets held for investment and not used in the plant operation should not be included as a part of the appraised values.

Generally accepted accounting principles relating to improvements or betterments must be followed in determining the asset values established by the appraisal. Repair or maintenance of a nature that restores an asset to its original condition but does not extend its useful life is not betterment or improvement but an expense of that period.

The pricing of assets to establish historical costs is based on such actual supporting documents as vendor invoices and construction contractor completion statements. In the absence of invoices, such other records as revenue stamps, board minutes, contracts of purchase, and deeds recorded with the county's Recorder of Deeds may be used.

Other methods, such as manufacturer's catalogs, libraries of material prices, or techniques involving reverse trending and price indices may be used to establish acquisition costs and dates. Such methods may be used only when actual supporting documents are not available. When these sources and techniques are used, consideration must be given to the manufacturers and to quantity discounts. The determined value should closely approximate the actual historical cost of an asset at the date of acquisition.

13.5 MINOR EQUIPMENT [CHANGE MADE 4/1/2025]

Where minor equipment is concerned, the SMA recognizes that the inventory costs of such equipment may not truly reflect the cost of equipment purchased and in use by the nursing facility provider. Differences in the capitalization policies of providers and their desire to limit property record controls over certain classes of small assets cause variations in the recorded costs of assets generally considered depreciable. Medicaid will only recognize an appropriate amount for minor equipment costs where the original equipment acquisition cost was recorded in the accounting records as capital asset cost and had not previously recorded the minor equipment acquisition as current period operations expense. **If the cost was capitalized on the financial statements, then it must be reported on Worksheet 3. (text added 4/1/2025)**

Minor equipment includes, but is not limited to, such items as wastebaskets, bedpans, syringes, catheters, silverware, mops, and buckets. The general characteristics of this type of equipment are as follows:

- The equipment is in no fixed location and is subject to use by various departments in the nursing facility;
- The items are comparatively small in size and unit cost;
- The equipment is subject to inventory control;
- There is a fairly large quantity of the items in use; and

Medicaid Provider Manual

- The equipment has a useful life of approximately three years or less.

However, where all other depreciable assets are concerned, such as buildings, building equipment, major movable equipment, land improvements, and leasehold improvements, the Medicaid program will not recognize a historical cost of such assets in excess of the historical cost used for federal income tax purposes. Nursing facility providers should be able to support this historical cost by reference to original documents such as contracts, vouchers, checks and other evidence. If the provider does not have such original documentation constituting primary evidence of the historical cost of assets, the SMA will consider the provider's federal income tax returns as secondary evidence to be used in establishing and verifying the historical cost of the assets. Further, it is possible that because of the effects of other provisions within the Medicare Principles of Reimbursement, such as "cost to related organizations," the historical cost under Medicaid might be less than that allowed and used for income tax purposes.

Under the Principles, nursing facility providers may change the useful lives of assets where this can be justified and appropriately adjust the accumulated depreciation applicable to the historical cost of the assets involved. The effect of such adjustments is to change the undepreciated amount of the historical cost for Medicaid purposes. The Principles do not permit providers to increase the historical cost basis of their assets to recognize elements of costs or expenditures that were not capitalized but were considered as expense items.

Example: If a provider determines that a physical modification of the building was a repair, and thus an item of expense not capitalized, and uses the historical cost so determined for federal income tax purposes, the provider may not change the historical cost basis to include that expenditure previously determined a repair and capitalize it, i.e., increase the historical cost basis of the building for Medicaid purposes.

Example: If a provider builds a facility and, in establishing the historical cost of the building, determines that material and labor used were not part of the historical cost of the building and charges the cost of such material and labor into expenses for federal income tax purposes, the provider may not then include such expenditures in the historical cost of the building for Medicaid purposes.

Costs in excess of the cost basis used for federal income tax purposes will not be recognized under Medicaid. Further, for cost reporting periods beginning on or after January 1, 1970, the SMA will also require a redetermination of allowable costs for the reporting period covered to reflect the effects of the adjustment in the historical cost basis of the assets. For cost reporting periods beginning before January 1, 1970, however, no redetermination of such allowable costs need be made for the reporting periods covered. Accumulated depreciation applicable to the depreciable assets under the Medicaid program will include the full amount allowed during those periods in which an increased historical cost basis was used. The net book value will be used for computations of gain or loss on the sale of assets and for any other reimbursement purposes under Medicaid.

13.6 DONATED ASSETS

The fair market value for a donated asset is the price that the asset would bring by bona fide bargaining between well-informed purchasers and sellers at the date of acquisition. Usually, the fair market price is the price at which bona fide sales have been consummated for assets of like type, quality, and quantity in a particular market at the time of acquisition.

Medicaid Provider Manual

Exception: In cases where an asset has been used or depreciated under the Medicaid program and then donated to a provider, the basis of depreciation will be the lesser of the fair market value or the net book value of the asset in the hands of the owner last participating in the program.

If the nursing facility provider's records do not include the fair market value of the donated assets as of the date of donation, an appraisal of such fair market value by a recognized appraisal expert will be acceptable for depreciation and owner's equity capital purposes.

Where material, labor, and services are donated in the construction of an asset, the asset value is the sum of the appraised cost of the material, labor, or services actually donated and the incurred cost of that part which was not donated. Labor costs should be determined in accordance with both the rates prevailing in the community at the time of construction and the type of labor incurred, i.e., if the labor donated was non-union labor, the cost would be at the non-union labor rate rather than at a union labor rate. If records are not available as to the actual labor, services, or material donated, the fair market value at the time of donation may be determined by the other methods shown in Medicare Principles of Reimbursement. Estimated labor costs provided by an owner or shareholder of a facility are not includable in the historical cost of constructed assets.

13.7 ASSETS COSTING LESS THAN \$100

Individual major movable assets costing less than \$100, whether or not purchased in quantity prior to the appraisal date, may be capitalized at the time of appraisal at the purchase cost less accumulated depreciation from the date of acquisition regardless of the provider's past accounting practices. If an election is made to capitalize such assets, this policy must be applied consistently.

Nursing facility providers that have expensed such items while in the Medicaid program may not decide later to capitalize them. This also applies to those providers that eventually decide to have appraisals. The appraisal expert may group major movable equipment with a unit cost of \$100 or less. However, the book value assigned to such grouped assets at appraisal may not exceed the book value of the assets if individually appraised. Identification of the individual assets comprising the group must be available.

13.8 TAGGING OF EQUIPMENT

For Medicaid program purposes, tagging of equipment is not mandatory. In the absence of tagging, however, alternate records must be maintained to satisfy audit verification of the existence and location of the assets.

13.9 APPRAISAL PROGRAMS

Since the condition of nursing facility provider asset records varies significantly, an appraisal program may be comprehensive or partial. For instance, a provider may engage an appraisal expert to appraise a part of its facility for which no historical records have been maintained, or a provider may need to have an appraisal made on a particular class of assets in a specific identified location.

Comprehensive appraisal programs are usually appropriate because of such complexities as lump-sum purchases of assets or a complete lack of historical cost records for all assets.

Medicaid Provider Manual

An appraisal program should include:

- A physical inventory and listing of pertinent data for all applicable assets in use or in standby status as of the appraisal date or report date. The physical inventory may be made by the provider or by the appraiser. If made by the provider, the appraiser must verify the inventory.
- The acquisition cost of each item or unit of property including, but not limited to, architect fees, installation costs, and freight.
- A classification of each item or unit of property in accordance with the American Hospital Association (AHA) Health Data and Coding Standards Group, Estimated Useful Lives of Depreciable Hospital Assets. These classifications are:
 - Land improvements;
 - Buildings, including building improvement, fixed equipment, building services equipment and other fixed equipment;
 - Major movable equipment;
 - Minor equipment; and
 - Leasehold equipment.

Note: Refer to the Cost Classifications and Cost Finding section of this appendix for a comprehensive description for capital assets by category.

- Establishing an estimated useful life for each asset. The estimated useful life for purposes of the appraisal must be consistent with the estimated useful life for each asset used by the provider for depreciation purposes.
- Determining a salvage value for each asset.
- Selecting a depreciation method for each asset.
- Calculating depreciation provisions for the current reporting period.
- Calculating accumulated depreciation using an approved basis, from the date of acquisition to the start of the Medicaid reporting period in which actual depreciation is first claimed.
- Determining square footage for each cost center to identify all rooms on a floor or within a building if the provider did not previously do this. This should be accomplished as explained in the AHA Cost Finding and Rate Setting for Hospitals publication.
- Reconciling appraisal results with provider records. For assets acquired prior to January 1, 1966, the provider's plant asset records, if any, and accounting records must be considered even though they may be inaccurate. This reconciliation must be made for land improvements, buildings, building services equipment and, where possible, for other major asset classifications.

Where applicable, differences discussed by the reconciliation must be reflected as adjustments in the provider's accounting and plant asset records.

13.10 APPRAISAL REPORT

The appraisal expert must prepare a letter of certification. The letter should state that, in the appraisal expert's judgment, the appraisal results were determined in conformity with Medicaid program regulations and requirements. This letter will include such information as:

Medicaid Provider Manual

- Name of the nursing facility provider for which the appraisal was conducted;
- Location(s) of the facility included in the appraisal;
- Appraisal date, the date up to which accumulated depreciation was calculated (if other than the appraisal date), and the period for which current depreciation is calculated;
- Contents of data supplied to the provider, i.e., summaries, schedules, plans, etc.;
- Appraisal program descriptions, including:
 - The extent of asset appraisal, i.e., assets physically inventoried,
 - Pricing basis, and
 - Other pertinent information not readily apparent in the detail results, such as depreciation methods;
- Policy for determining capitalizable assets;
- Depreciation policy in the year of acquisition and disposal; and
- Identification of material items included in the appraisal where the values of such items were obtained from outside sources without independent verification by the appraisal expert.

13.11 LISTING OF ASSETS APPRAISED

If a listing of assets that constitutes the nursing facility provider's Medicaid property records is supplied, it must contain all necessary and pertinent information, even if portions were determined solely by the provider. A listing of assets should include the following information for each asset:

- Building location;
- Cost center or department;
- Asset description, usually including manufacturer's name, model number, serial number, etc.;
- AHA asset classification;
- Historical cost;
- Acquisition date;
- Estimated useful life to provider;
- Salvage value;
- Depreciation provision for current reporting period;
- Accumulated depreciation provision for current reporting period; and
- Pricing method necessary for adequate disclosure, where more than one method was used for various assets.

Reconciliations and comparisons with provider records must also be included, as well as square footage and other allocation basis information for buildings and cost centers within buildings.

Medicaid Provider Manual

13.12 RECORDS

Appraisal work papers must be made available to SMA staff or their designee upon reasonable request.

13.13 APPRAISAL EXPENSE

The expense of an appraisal to establish plant records for Medicaid program purposes, including the expense for appraisal of research and other non-resident departments incurred by a nursing facility provider after entrance into the program, may be included as an allowable cost. The expenses will be considered as administrative costs in the period incurred, subject to apportionment to the Medicaid program. Appraisal expenses incurred relative to assets not connected with provider operations are not allowable costs.

Where providers have appraisals made for other business purposes, such as insurance coverage, tax values or financing, the incurred expenses for such appraisals may be included in allowable costs as part of administrative and general costs. However, appraisal expenses incurred to establish values for the sale or anticipated sale of the nursing facility or provider organization are not allowable costs.

Where the SMA determines that a provider has incurred appraisal expenses to establish the historical cost of assets which were already adequately reflected in its books, records, or tax returns, the cost of performing the appraisal is not allowable.

Medicaid Provider Manual

SECTION 14 – COST REPORTING AND REIMBURSEMENT DESCRIPTIONS AND CLASSIFICATIONS

14.1 GENERAL

Refer to Cost Classifications and Cost Finding section of this appendix for detailed discussion and description of program cost categories for Plant, Variable Base, Support and Base/Support.

Plant 1	Depreciation cost category generally allocated to operational cost centers on the basis of square footage.
Plant 2	Depreciation cost category generally allocated to operational cost centers on the basis of square footage or asset dollar value.
Plant 3	Interest, real and personal property taxes, allowable lease rental and borrowing-related amortization cost category generally allocated to operational cost centers on the basis of square footage.

SECTION 1 – GENERAL INFORMATION

The Michigan Department of Health and Human Services (MDHHS) is required to assess all individuals seeking Medicaid-funded long-term services and supports (LTSS) that require level of care eligibility to determine their functional need for those services. The determination is an essential component of eligibility for services provided in nursing facilities, the MI Choice Waiver Program, the Program of All-Inclusive Care for the Elderly (PACE), and the MI Health Link Home and Community Based Services (HCBS) Waiver Program. Policies contained herein apply equally and consistently to each of these programs except as noted.

MDHHS uses a standard assessment and process for all programs and services that require an individual meet the nursing facility level of care. Programs may not use any other assessment in place of the Level of Care Determination (LOCD) tool for this determination. The LOCD assures a consistent and reliable process for determining that individuals meet the functional eligibility requirements.

Providers may access the LOCD online in the Community Health Automated Medicaid Processing System (CHAMPS) through the MILogin application. (Refer to the Directory Appendix for website information.) LOCD assessment data is entered and processed in CHAMPS.

The LOCD is a “point in time” assessment; that is, it determines the individual’s functional eligibility at the time of the assessment. MDHHS assumes that beneficiaries will maintain functional eligibility until they are determined otherwise through a reassessment or the LOCD’s End Date. An LOCD is an in-person meeting between the qualified and licensed health professional and the individual seeking functional eligibility.

Medicaid Provider Manual

SECTION 2 – ELIGIBILITY REQUIREMENTS

Individuals seeking Medicaid-funded services from nursing facilities, MI Choice Waiver Program, PACE, or the MI Health Link HCBS Waiver Program must meet eligibility criteria. These criteria must be met before Medicaid payment is made for services rendered. Each beneficiary must be eligible for Medicaid services, demonstrate a need for nursing facility level of care, and meet all additional program-specific requirements. Medicaid reimbursement for covered services is only appropriate when both financial and functional eligibility have been established, and the individual meets other program-specific eligibility criteria.

2.1 BASIC MEDICAID ELIGIBILITY

Eligibility for Medicaid is determined by a variety of factors including, but not limited to, financial rules, age, health status, state residency and citizenship status. Providers are instructed to refer individuals who are not yet Medicaid eligible to a local MDHHS office or the MDHHS website for assistance. (Refer to the Directory Appendix for website information.)

2.2 NEED FOR NURSING FACILITY LEVEL OF CARE

An individual's need for nursing facility level of care is determined through the Nursing Facility Level of Care Determination (LOCD) assessment tool. The LOCD is a scientifically-validated and reliability-tested tool utilized during initial application and program eligibility redeterminations. This chapter describes the criteria and processes for administering the LOCD.

2.3 PROGRAM SPECIFIED ELIGIBILITY REQUIREMENTS

In addition to meeting Medicaid financial and functional eligibility requirements, individuals must also meet all program specific requirements before they can be determined eligible for that program. (Refer to the Nursing Facility Coverages, the MI Choice Waiver, the Program of All-Inclusive Care for the Elderly, and the MI Health Link chapters or to provider contracts for specific program requirements.) This chapter applies only to the LOCD process and is not intended to replace program-specific requirements.

SECTION 3 – NURSING FACILITY LEVEL OF CARE DETERMINATION PROCESS

3.1 LOCD ASSESSMENT REQUIREMENT FOR REIMBURSEMENT

The LOCD must be conducted prior to or on the day of an individual's admission to a nursing facility or enrollment in MI Choice Waiver Program, PACE, or MI Health Link HCBS Waiver Program to ensure reimbursement for a Medicaid eligible beneficiary. The LOCD must be conducted in person by a qualified and licensed health professional. The qualified and licensed health professional conducting the LOCD or a designated employee of the organization must enter the assessment findings online in the CHAMPS system. Except where otherwise noted, only LOCDs entered in CHAMPS are considered valid for establishing functional eligibility.

The LOCD is considered payable when all the following conditions are met:

- the beneficiary meets LOCD criteria;
- the LOCD is entered online in CHAMPS;
- the LOCD is active on the date of service (meaning the date of service is on or after the LOCD Start Date and before the LOCD End Date); and
- the beneficiary is receiving LTSS and meets all program-specific eligibility criteria.

3.2 PERSONS AUTHORIZED TO CONDUCT THE LOCD

A qualified and licensed health professional must be a physician, registered nurse, licensed practical nurse, licensed social worker (Limited License Bachelor of Social Work, Limited License Master Social Worker, Licensed Bachelor Social Worker, or Licensed Master Social Worker), physician's assistant, nurse practitioner, licensed psychologist, physical therapist, respiratory therapist, occupational therapist or speech therapist. Once the LOCD is completed by a qualified and licensed health professional, a clinical or non-clinical staff person may enter the LOCD information in CHAMPS. When the LOCD data are entered, CHAMPS applies the MDHHS algorithm to determine eligibility.

3.3 INITIAL LOCD ASSESSMENT

The LOCD must be conducted in person by a qualified and licensed health professional (as defined in the Persons Authorized to Conduct the LOCD subsection) before the provider is eligible for Medicaid reimbursement for services rendered to the beneficiary. The LOCD must be conducted prior to or on the day of admission or enrollment. The LOCD assessment findings for all LOCDs conducted, including Door 0 (zero), which indicate the individual does not meet LOCD criteria must be entered online in CHAMPS. (LOCD Doors are described in the Nursing Facility Level of Care Determination Criteria section.)

All LOCD determinations must be entered in CHAMPS. This is regardless of whether the individual or beneficiary meets LOCD criteria.

Medicaid Provider Manual

The provider may conduct LOCDs for individuals without Medicaid eligibility and enter the LOCD in CHAMPS prior to Medicaid eligibility being established. NOTE: Medicaid reimbursement for covered services is only appropriate when both financial and functional eligibility have been established, and the individual meets other program-specific eligibility criteria.

3.4 ADOPTION OF AN EXISTING LOCD BY ANOTHER PROVIDER

The LOCD is associated with the beneficiary, rather than the provider serving the beneficiary. Therefore, if a beneficiary is seeking admission to or enrollment in a program and has a current LOCD in CHAMPS, the provider may adopt that LOCD to confirm functional eligibility. When adopting a current LOCD, the provider must print out the computer-generated FOC from that LOCD record and complete the form with proper signatures and date. A qualified and licensed health professional from the admitting or enrolling provider must sign and date the CHAMPS-generated FOC from the adopted LOCD record. The FOC must also be signed by the beneficiary or their legal representative.

The provider may also choose to conduct a new LOCD. A new LOCD must be conducted if the current LOCD is no longer an accurate representation of the beneficiary's current functional status.

3.5 LOCD START AND END DATES

All LOCDs must be entered in CHAMPS within 14 calendar days from the date the qualified and licensed health professional conducted the in person LOCD. Functional eligibility is valid for 365 days from the conducted date unless the provider conducts a new LOCD because a beneficiary had a significant change of condition. If a subsequent LOCD is conducted prior to the LOCD End Date and confirms the individual meets LOCD criteria, the new LOCD will have a 365-day end-date. Providers should refer to their specific program policies and procedures regarding the definition of a significant change of condition.

Each beneficiary must have a current LOCD in CHAMPS to establish eligibility for Medicaid reimbursement. The provider is responsible for:

- confirming that a current LOCD demonstrating eligibility is in CHAMPS;
- monitoring the beneficiary's LOCD End Date to avoid an interruption in functional eligibility; and
- conducting another LOCD for the beneficiary prior to the current LOCD End Date or when there is a significant change of condition.

The LOCD Start Date will be the date the LOCD was conducted if the LOCD is entered in CHAMPS within 14 days of the conducted date. If the LOCD is entered in CHAMPS more than 14 days from the date the LOCD was conducted, CHAMPS will set the LOCD Start Date as the date the LOCD was entered in the system. The End Date of an LOCD will be 365 days from the date the LOCD was conducted. LOCDs are payable from the Start Date through the End Date. (Refer to the Nursing Facility Level of Care Determination Criteria section for an explanation of each Door.)

3.6 VERIFICATION REVIEW OF LOCD [CHANGE MADE 4/1/2025]

The purpose of the verification review (LOCD-VR) is to determine if the LOCD was conducted properly according to policy and resulted in the correct determination of eligibility. A randomly selected sample of LOCDs will be reviewed by MDHHS or its designee. CHAMPS will randomly select a statistically significant sample of LOCDs entered in the system. Upon submission of the LOCD in the system, CHAMPS will

Medicaid Provider Manual

immediately notify the provider if the LOCD was selected for review with a pop-up message. The provider is required to submit all relevant documentation used to support the LOCD including, but not limited to, observation notes, assessment reports, physician orders or notes, caregiver reports, cognitive test results, time studies, nursing or case management notes, intervention reports, or evidence of other medical or community services provided. The related CHAMPS LOCD Application ID must be indicated on all documents for tracking purposes. Documents must be uploaded electronically in CHAMPS within **four calendar days (revised per bulletin MMP 24-53)** of the LOCD being selected for verification review in CHAMPS.

MDHHS or its designee will review the documentation furnished by the provider and make a determination within two business days of receiving the required documentation. Upon conclusion of the review, MDHHS or its designee will inform the provider of the results of the review in CHAMPS. When an LOCD is selected for review, the determination of eligibility is not complete until MDHHS or its designee notifies the provider of the results of the verification review.

When the individual is found to not meet LOCD criteria, MDHHS or its designee will provide to the individual an Adequate Action Notice including appeal rights per Medicaid policy. Services provided to the individual during the verification review process will not be eligible for Medicaid reimbursement.

3.7 ONGOING FUNCTIONAL ELIGIBILITY

Medicaid LTSS providers are required to ensure the individual continues to meet eligibility requirements on an ongoing basis. The functional eligibility that is assessed by the LOCD is one of the eligibility requirements. Therefore, Medicaid LTSS providers must ensure that individuals meet LOCD criteria on an ongoing basis. The LTSS provider is responsible for conducting a new LOCD if there is a significant change in the beneficiary's condition. When a provider possesses information that a beneficiary may no longer meet eligibility, the provider must conduct an in person reassessment. Such information may come in the form of progress notes, routine assessments, staff observations, or any other documentation that might call into question the continued functional eligibility of the beneficiary.

3.8 PASSIVE REDETERMINATION OF FUNCTIONAL ELIGIBILITY [CHANGES MADE 4/1/2025]

Providers are responsible for reassessing LOCD eligibility prior to the End Date of the current LOCD or when there is a significant change in the beneficiary's condition. **The Minimum Data Set (MDS) and interRAI Home Care Assessment System (iHC) contain items** that correspond to the items in the LOCD. Under certain conditions, MDHHS will use a passive redetermination process based upon information from the beneficiary's most recent assessment **and program enrollment or admission**.

When **this data** is available, MDHHS will apply an algorithm that uses the common assessment items to allow CHAMPS to generate a new LOCD for the beneficiary. **(revised 4/1/2025)**

(text deleted 4/1/2025) An LOCD generated by CHAMPS can be adopted by all LTSS programs.

3.8.A. LOCD DOORS ADDRESSED BY PASSIVE ASSESSMENT [CHANGE MADE 4/1/2025]

The correspondence between MDS and iHC assessment items and LOCD items is extensive but not complete. Therefore, the algorithm used for the passive

Medicaid Provider Manual

redetermination process is not able to verify eligibility through all LOCD doors. The passive redetermination process may confirm LOCD eligibility as follows:

Door 1: The passive redetermination process can confirm all criteria.

Door 2: The passive redetermination process can confirm all criteria.

Door 3: The passive redetermination process can confirm criteria from the MDS (nursing facilities). The passive redetermination process cannot confirm criteria from the iHC (MI Choice).

Door 4: The passive redetermination process cannot confirm criteria.

Door 5: The passive redetermination process cannot confirm the criteria. (revised per bulletin MMP 24-53)

Door 6: The passive redetermination process can confirm criteria from the MDS (nursing facilities). The passive redetermination process can partially confirm criteria from the iHC (MI Choice).

Door 7: The passive redetermination process cannot confirm the criteria.

Door 8: The passive redetermination process cannot confirm the criteria.

3.8.B. PASSIVE REDETERMINATION PROCESS

The initial LOCD for a beneficiary must be conducted in an in-person meeting by a qualified and licensed health professional. When a current LOCD exists for a beneficiary, MDHHS will use the passive redetermination process to allow CHAMPS to generate a new LOCD for the beneficiary. The amount of time from the provider conducting an assessment to MDHHS having access to the assessment data varies, affecting when the passive redetermination process will be applied.

When this process confirms continued functional eligibility, the Start Date of the CHAMPS-generated LOCD will be the date of the MDS or iHC assessment. CHAMPS will set the End Date at 365 days from the newly established Start Date. This process will repeat with each new MDS or iHC when the passive redetermination process confirms the beneficiary meets LOCD criteria and allows CHAMPS to generate a new LOCD.

When a beneficiary is currently eligible through a door that the passive redetermination process cannot confirm, the LOCD will be bypassed from the passive redetermination process and the current End Date will remain in effect.

The passive redetermination process will not determine ineligibility. If an individual previously met LOCD criteria through a Door the passive redetermination process can assess, and the process cannot establish eligibility from the most recent MDS or iHC, CHAMPS will issue a notice to the provider. Additionally, CHAMPS will generate a new LOCD using Door 87 with a Start Date equal to the date the passive redetermination process was applied to the MDS or iHC assessment. Door 87 LOCD will have an End

Medicaid Provider Manual

Date of 45 days from the Door 87 Start Date, or the End Date of the previous LOCD, whichever is earlier.

The provider must conduct a face-to-face LOCD before the Door 87 End Date to confirm the beneficiary continues to meet LOCD criteria. If the provider does not conduct a face-to-face LOCD before the Door 87 End Date, the provider will not be eligible for Medicaid reimbursement. Door 87 is not sufficient basis for issuing an Adverse Action Notice to the beneficiary. An Adverse Action Notice must be based upon a face-to-face LOCD.

3.8.C. PASSIVE REDETERMINATION DECISIONS

If the face-to-face LOCD results are:	And the Passive Redetermination results are:	Then the LOCD results are as follows:
Eligible through a Door assessed by Passive Redetermination e.g. Door 1	Confirmed by Passive Redetermination e.g. confirm Door 1	New LOCD created with End Date 365 days from date of the MDS or iHC assessment.
Eligible through a Door not assessed by Passive Redetermination e.g. Door 4	Passive Determination is not applied	No change to existing LOCD or its End Date.
Eligible through any Door e.g. Door 7	Eligible through a different Door e.g. Door 2	New LOCD created with the Passive Redetermination Door and an End Date 365 days from the date of the MDS or iHC assessment.
Eligible through a Door assessed by Passive Redetermination e.g. Door 2	Passive Redetermination does not determine eligibility through any Door	LOCD Door 87 created with an End Date of 45 days from the date the passive redetermination ran.

Note: For the passive redetermination process to occur, a current LOCD must be in CHAMPS and the MDS or iHC must be conducted prior to the End Date of the LOCD.

3.8.D. NEED TO CONDUCT A NEW LOCD

For the Doors that the passive determination is unable to assess, the provider must conduct an in-person LOCD prior to the current LOCD End Date. The provider must conduct a new LOCD prior to the End Date and enter it in CHAMPS within 14 days of the conducted date.

When the passive redetermination applies but the process cannot confirm eligibility based upon MDS or iHC assessment data, CHAMPS will create a LOCD Door 87 with an End Date 45 days from the date that record is loaded in CHAMPS, or until the current End Date, whichever is earlier. When the passive redetermination process continuously confirms that the beneficiary meets LOCD criteria, it is possible that the beneficiary will not require another in-person LOCD because the passive redetermination process

Medicaid Provider Manual

confirms LOCD eligibility and creates a new LOCD with a new 365-day End Date. In addition, providers must conduct an in-person LOCD when there is a significant change in the beneficiary's condition, as defined by the program.

SECTION 4 – NURSING FACILITY LEVEL OF CARE DETERMINATION CRITERIA

The Michigan Nursing Facility Level of Care Determination criteria includes seven domains of need, called Doors. The Doors include: (1) Activities of Daily Living; (2) Cognitive Performance; (3) Physician Involvement; (4) Treatments and Conditions; (5) Skilled Rehabilitation Therapies; (6) Behaviors; and (7) Service Dependency. The Doors and the assessment items are listed below. Guidance on administering the LOCD, including definitions and methods, is provided in the Michigan Medicaid Nursing Facility Level of Care Determination Field Definition Guidelines.

The LOCD should be an accurate reflection of an individual's current functional status. This information is gathered in an in-person meeting by speaking to the individual and those who know the individual well, observing the individual's activities, and reviewing an individual's medical documentation. Refer to the Michigan Medicaid Nursing Facility Level of Care Determination Field Definition Guidelines on the MDHHS website for more information. (Refer to the Directory Appendix for website information.)

4.1 DOOR 1: ACTIVITIES OF DAILY LIVING

Door 1 assesses four ADLs: (1) Bed Mobility; (2) Transfers; (3) Toilet Use; and (4) Eating.

4.2 DOOR 2: COGNITIVE PERFORMANCE

Door 2 assesses short-term memory, cognitive skills for daily decision-making and making self-understood.

4.3 DOOR 3: PHYSICIAN INVOLVEMENT

Door 3 assesses the frequency of physician visits and physician order changes.

4.4 DOOR 4: TREATMENTS AND CONDITIONS

Door 4 assesses a set of nine treatments and conditions that may be a predictor of potential frailty or increased health risk. The treatments and conditions include: Stage 3-4 Pressure Sores; Intravenous or Parenteral Feeding; Intravenous Medications; End-stage Care; Daily Tracheostomy Care, Daily Respiratory Care, Daily Suctioning; Pneumonia within the Last 14 Days; Daily Oxygen Therapy; Daily Insulin with Two Order Changes in the Last 14 Days; and Peritoneal or Hemodialysis.

4.5 DOOR 5: SKILLED REHABILITATION THERAPIES

Door 5 assesses the presence of rehabilitation interventions, including physical therapy, occupational therapy, and speech therapy.

4.6 DOOR 6: BEHAVIOR

Door 6 assesses behavioral challenges. It includes five behavioral symptoms: wandering, verbal abuse, physical abuse, socially inappropriate or disruptive behavior, and resistance to care. Door 6 also assesses for the presence of delusions and hallucinations.

4.7 DOOR 7: SERVICE DEPENDENCY

Door 7 applies to beneficiaries currently receiving other services and supports in nursing facilities, MI Choice, PACE, or the MI Health Link HCBS Waiver program. It assesses the beneficiary's dependence on services to maintain the current level of functioning and whether there are options for maintaining the level of functioning with services and supports available in the community.

4.8 DOOR 8: FRAILTY

MDHHS or its designee determined that the beneficiary is eligible for Medicaid LTSS services based upon the Frailty Criteria. Individuals who exhibit certain behaviors and treatment characteristics that indicate frailty may be admitted or enrolled to LTSS programs requiring an LOCD. The individual needs to trigger one element of this criteria to be considered for Frailty. Refer to the Michigan Medicaid Nursing Facility Level of Care Determination Exception Process on the MDHHS website for more information. (Refer to the Directory Appendix for website information.) For the MI Health Link program, the Frailty Criteria are applied by the Integrated Care Organization.

4.9 DOOR 0: INELIGIBLE

The LOCD was conducted and the beneficiary did not meet the criteria for any of the doors. The beneficiary is not eligible for Medicaid LTSS services at this time. (Refer to the Individual Does Not Meet LOCD Criteria, Action Notices, and Appeal Rights section for additional information.)

4.10 DOOR 87: ELIGIBLE PENDING IN-PERSON REASSESSMENT

The passive redetermination process could not confirm eligibility. The provider has 45 days from the date of the passive redetermination or until the current End Date, whichever is earlier, to conduct a new in-person assessment.

SECTION 5 – INFORMED CHOICE

Informed choice is important for the MDHHS admission or enrollment process for LTSS. It is essential that individuals and their legal representatives fully understand all available options for receiving Medicaid LTSS. When an individual meets LOCD criteria, they automatically meet the functional eligibility requirement for nursing facility care, MI Choice Waiver Program, PACE, and MI Health Link HCBS Waiver Program. The Freedom of Choice form confirms that these options and referral processes have been explained to the individual. All Medicaid-funded LTSS programs are required to make program information available to individuals at admission/enrollment, at an in-person reassessment, and upon request from the individual or their legal representative.

Program providers must explain all Medicaid LTSS options as well as other available LTSS to the individual in a language the individual understands, as well as culturally and linguistically appropriate. It is important that individuals understand their options and that they have ongoing access to information about all settings and programs. As the functional ability of the individual may change over time and program options may change, it is important to continue to update their options and discharge plan.

5.1 FREEDOM OF CHOICE FORM

A properly completed Freedom of Choice (FOC) form documents the individual's choice of where to receive LTSS. It is required that all LTSS programs use this form to confirm the individual was made aware of their choices and to document the individual's preference. It is critical that individuals understand their options and have ongoing access to information about settings and programs. This requires providing the information using methods that are effective for the individual and in the individual's primary language. The individual (or their legal representative) must be informed of Medicaid LTSS available through the MI Choice Waiver Program, nursing facilities, PACE, and MI Health Link HCBS Waiver Program. An explanation regarding each program must be provided in a manner and using language that the individual understands. A hard copy of the form must be printed so signatures can be provided, and the signed form retained in the beneficiary's case record. The FOC form must be completed each time the beneficiary changes programs or providers, whether a new LOCD is conducted or not.

A CHAMPS-generated FOC form is automatically created online (and available to print) for every individual for whom an online LOCD was completed, regardless of the individual's determination of eligibility.

When adopting a current LOCD, the provider must print out the computer-generated FOC from that LOCD record and complete the form with proper signatures and date. A qualified and licensed health professional from the admitting or enrolling provider must sign and date the CHAMPS-generated FOC for the adopted LOCD record. The FOC must also be signed by the individual or their legal representative.

The information in Section I of the FOC is automatically populated by CHAMPS when the LOCD is entered. The individual's name, date of birth, conducted date of the LOCD, eligibility status, and, if determined eligible, the door through which the individual qualified is entered by the system. If the individual is found ineligible, a Door 0 will populate. The system also enters the provider's information and the date the LOCD was created. The qualified and licensed health professional who conducted or adopted the LOCD must sign, provide their title, and date the FOC under Section I. If using an FOC form not generated by CHAMPS, the provider must complete the appropriate fields in Section 1 and sign and date the form.

Medicaid Provider Manual

Section II of the FOC provides a list of LTSS options available to individuals who meet LOCD criteria, including nursing facility care, MI Choice Waiver Program, PACE, or MI Health Link HCBS Waiver Program. Individuals must also be informed of service options that do not require nursing facility level of care, including Home Health, Home Help State Plan services, and other services available locally that are not Medicaid-funded.

Section III of the FOC is completed when an individual does not meet the LOCD criteria. The individual, or their legal representative, must sign their name and provide the date they were notified of their LOCD ineligibility and appeal rights. Appeal rights must be provided according to Michigan Medicaid policy.

The form is completed when the above steps have been taken and it is signed and dated by the qualified and licensed health professional who conducted the LOCD and by the individual or their legal representative. The completed FOC form must be maintained in the individual's record and provided to the individual or their legal representative upon request. A copy of the completed FOC form for non-qualifying individuals must be retained for at least three years.

SECTION 6 – INDIVIDUAL DOES NOT MEET LOCD CRITERIA, ACTION NOTICES, AND APPEAL RIGHTS

If an individual does not meet LOCD criteria for Doors 1 through 7, the provider must provide notice to the individual. The individual may request a Secondary Review from MDHHS or its third-party designee and request a Medicaid Fair Hearing before an Administrative Law Judge.

6.1 ISSUING AN ADVERSE ACTION NOTICE

When a qualified and licensed health professional determines that an individual does not qualify for nursing facility level of care services based on the online LOCD, and the provider does not contact the MDHHS designee to request a Secondary Review, the provider must issue an adverse action notice to the individual or their legal representative. The provider must also offer the individual referral information about other services that may meet the individual's needs.

6.2 ADEQUATE ACTION NOTICE

For individuals who are not currently receiving LTSS in a program or setting that requires an LOCD, an adequate action notice is provided when the initial LOCD determines the individual does not meet LOCD criteria. The adequate action notice must include all the language in the sample adequate action notices for LTSS available on the MDHHS LOCD website. (Refer to the Directory Appendix for website information.)

6.3 ADVANCE ACTION NOTICE

The advance action notice is applicable to beneficiaries who met their initial LOCD, but based upon a significant change in condition, did not meet their subsequent LOCD. The advance action notice must include all of the language in the sample advance action notices for LTSS available on the MDHHS LOCD website. (Refer to the Directory Appendix for website information.)

When a current LTSS beneficiary is determined to not meet LOCD criteria, the provider must follow program-specific procedures for the provision of notice to the beneficiary.

6.4 LOCD SECONDARY REVIEW

The provider or the individual (or their legal representative) may request an LOCD Secondary Review. This review is completed by MDHHS or its designee to ensure full consideration of LOCD eligibility options. The Secondary Review is available only when an LOCD is entered in CHAMPS and results in a Door 0, indicating ineligibility. The review is a secondary review of documentation for all LOCD Doors, including Door 8.

The LOCD Secondary Review Process is conducted as follows:

- A Secondary Review may be initiated by the provider, individual or their legal representative after the qualified and licensed health professional issues an adverse action notice based on a finding of ineligibility. The provider, individual or their legal representative may request a Secondary

Medicaid Provider Manual

Review from MDHHS or its designee. The individual will have three business days to make a request following written notice of the adverse action.

- In the action notice, the provider who conducted the ineligible LOCD must provide the individual with information on how to timely request a Secondary Review following an ineligible LOCD.
- Following the individual's request for review, the MDHHS designee will contact the provider who conducted the LOCD and inform them to upload documentation in CHAMPS for review.
- The provider who conducted the LOCD will upload the relevant documentation in CHAMPS within one business day of being notified to do so.
- The MDHHS designee will review the documentation, obtain information from the individual or their legal representative, if requested, and notify the provider and the individual or their legal representative of the decision.
- If the Secondary Review determines that the individual is eligible, MDHHS or its designee will contact the provider and the individual or their legal representative.
- If the Secondary Review determines that the individual is ineligible, MDHHS or its designee will issue an adverse action notice and inform the individual of their appeal rights.
- MDHHS or its designee will enter the appropriate LOCD in CHAMPS.

6.5 APPEAL RIGHTS AND MEDICAID FAIR HEARING

When an individual is determined ineligible for services and an appeal is requested, it is an adverse action for the individual. If the individual or their legal representative disagrees with the denial, they may request an administrative hearing.

The Michigan Office of Administrative Hearings and Rules (MOAHR) Administrative Hearings Pamphlet explains the process by which an administrative hearing and a preliminary conference are brought to completion. The pamphlet is available for review on the MDHHS website. (Refer to the Directory Appendix for website information.) Both a provider representative and a MDHHS Long Term Care Policy Section representative must be present at the hearing.

When a current LTSS beneficiary is determined to not meet LOCD criteria, the provider must follow program-specific procedures for the provision of notice to the beneficiary.

When a beneficiary is determined to no longer be eligible for Medicaid-funded services and an appeal is requested, Medicaid will continue to pay for services if the beneficiary appeals within required program timeframes. If the beneficiary does not appeal the decision, the provider is eligible for Medicaid-reimbursement through the effective date of the advanced action notice, or the date in which the beneficiary stopped receiving services, whichever is first. When the beneficiary appeals the decision in compliance with MDHHS policy, MDHHS will reimburse the provider for services throughout the appeal process. If the beneficiary's appeal is denied, MDHHS will reimburse the provider for up to 30 days from the date of issuance of the hearing decision and order.

Medicaid Provider Manual

SECTION 1 – GENERAL INFORMATION [CHANGE MADE 4/1/2025]

Michigan Department of Health and Human Services (MDHHS) administers the fee-for-service (FFS) programs for Medicaid, Healthy Michigan Plan, Children's Special Health Care Services (CSHCS), and Maternity Outpatient Medical Services (MOMS). This chapter, the Michigan Pharmaceutical Product List (MPPL), and the Michigan Preferred Drug List (PDL)/Single PDL comprise program policies and explain coverage and reimbursement for the services dispensed and billed by enrolled pharmacies.

Throughout this chapter, the terms Medicaid and MDHHS are used to refer to Michigan Medicaid FFS, Healthy Michigan Plan, CSHCS, and MOMS programs and to Plan First Family Planning benefit plans unless otherwise noted. (revised 4/1/2025)

1.1 MDHHS PHARMACY BENEFITS MANAGER AND OTHER VENDOR CONTRACTORS

MDHHS retains all decisions for policy, coverage, and reimbursement, and contracts with a pharmacy benefits manager (PBM). PBM services provided include pharmacy claims payment (paper and electronic), claims instruction, prior authorization (PA), prospective drug utilization, retrospective drug utilization, clinical consultation, provider information lines, and Maximum Allowable Cost (MAC) rate setting. (Refer to the Directory Appendix for PBM contact information.)

The PBM website contains the:

- Pharmacy Claims Processing Manual for Michigan Medicaid
- Michigan Pharmaceutical Product List (MPPL)
- Michigan Preferred Drug List (PDL)/Single PDL
- Drug Utilization Review (DUR) Meeting Notices
- Dose Optimization Program
- Pharmacy and Therapeutics (P&T) Committee Meeting Notices
- Pharmacy Forms
- Maintenance Drug List

Pharmacies may call the PBM for questions or concerns. Beneficiaries may call the PBM Beneficiary Helpline. (Refer to the Directory Appendix for contact information.)

MDHHS contracts with other vendors to perform financial, program or provider audits on behalf of the State of Michigan. (Refer to the Provider Resources portion of the Directory Appendix for additional information.)

1.2 DEFINITIONS

The following definitions have specific meaning in the Pharmacy program:

Brand-Name Drug	A single-source drug, a cross-licensed drug or an innovator drug for which a lower-cost generic equivalent is available.
------------------------	--

Medicaid Provider Manual

Compounded Prescription	The combination of two or more ingredients extemporaneously mixed in usually accepted therapeutic doses. This requires the pharmacist's skill in weighing, measuring, levigating, etc., at the time of dispensing. The allowable compounding fee applies to the preparation of an individual prescription. It does not apply to prescriptions dispensed from a previously prepared stock supply (i.e., premaking a special lotion, cream, or ointment in gallons or pounds).
Dispensing Fee	Payment for filling a prescription and all related services performed by a pharmacist.
Drug Efficacy Study Implementation (DESI) Drugs	FDA designations related to "substantial evidence" of effectiveness. These products are also known as proposed less than effective.
Drug Rebate Program	Administered by the Centers for Medicare & Medicaid Services' Center for Medicaid and State Operations. It was created by the Omnibus Budget Reconciliation Act of 1990 (OBRA '90) and requires drug manufacturers to enter into and have in effect a national rebate agreement with the Secretary of the U.S. Department of Health & Human Services (HHS) for states to receive Federal funding for outpatient drugs dispensed to Medicaid patients. To receive rebates, States must identify the drugs by their national drug code.
Drug Utilization Review (DUR)	A process designed to ensure that prescriptions are appropriate, medically necessary and not likely to result in adverse medical outcomes.
Drug Utilization Review Board (DUR Board)	An advisory board to the State's Medicaid Program that includes physicians and pharmacists.
Fraud	Deliberate, intentional, and willful act with the specific purpose of deceiving MDHHS with respect to any material fact, condition, or circumstance affecting eligibility or need.
Generic Drug	Refers to a nonproprietary drug or class of drugs. The generic name refers to the official chemical composition of the drug as published in the latest edition of a nationally recognized pharmacopoeia or drug compendium. Generics do not refer to a particular brand name product.
Labeler	Any firm that manufactures (including repackers or relabelers) or distributes (under its own name) the drug.
Legend Drug	A drug bearing the statement: "Caution – Federal Law Prohibits Dispensing without a Prescription."
Long Term Care Pharmacy	Refers to pharmacies specializing in provision of drugs and services in an institutional setting such as a nursing facility, medical care facility or hospital long term care unit.
Maximum Allowable Cost (MAC)	The maximum cost allowed by MDHHS for certain multiple source brands, generics, cross-licensed drugs and sometimes for sole-source drugs or classes.
Multiple Source Drug (Multi-Source)	A drug marketed or sold by two or more manufacturers or labelers, or a drug marketed or sold by the same manufacturer or labeler under two or more different proprietary names or both under a proprietary name and without such a name.
National Average Drug Acquisition Cost (NADAC)	Pricing benchmark based on a nationwide survey of retail community pharmacy covered outpatient drug prices.
National Council for Prescription Drug Programs (NCPDP)	Develops standards for electronic pharmacy transactions (Point of Sale claims transactions).

Medicaid Provider Manual

National Drug Code (NDC)	The 11-digit code assigned to all prescription and over-the-counter products by the labeler/manufacture of the product under Food and Drug Administration (FDA) regulations.
Out of State Pharmacy	An entity not housed within the state of Michigan but registered by the Michigan Board of Pharmacy. An Out of State Pharmacist is required to be licensed in the state the pharmacy is located in.
Over-the-Counter (OTC) Drug	A drug that can normally be purchased without a prescription, although it may require a prescription if covered by Medicaid.
Pharmacist	A person licensed under Michigan statutes to provide services within the scope of pharmacy practice.
Pharmacy	An entity registered by the Michigan Board of Pharmacy.
Pharmacy and Therapeutics (P&T) Committee	An advisory committee to MDHHS on issues affecting prescription drug coverage for its various health care programs. The committee recommends guidelines for prescription drugs covered in its various health care programs.
Point of Sale (POS)	Real-time on-line adjudication of pharmacy claims to the PBM. Point of-Sale provides participating pharmacies real-time access to beneficiary eligibility, drug coverage, pricing information, guidelines for drug use, and dispensing fees.
Prescribed Drug	A drug, either legend or over-the-counter, that is ordered by a prescriber to be used by a patient to treat a disease or condition.
Prescriptions Not Picked Up	Retail prescriptions filled but not dispensed or picked up by the beneficiary or their representative.
Prospective Drug Utilization Review (ProDUR)	Detection, evaluation, and counseling components of pre-dispensing drug therapy screening. ProDUR is required at the point of sale before each prescription is delivered to a Medicaid beneficiary. ProDUR screening is the responsibility of each Medicaid participating pharmacy and is a requirement of Medicaid participation.
Retrospective Drug Utilization Review (RetroDUR)	Program that analyzes and interprets patterns of prescribing and dispensing beneficiary drug usage through periodic examinations of claims data to identify patterns of fraud and abuse, gross overuse, and inappropriate or medically unnecessary care.
Tamper Resistant Prescription Pad	A tamper resistant prescription pad must contain all three of the following characteristics: <ul style="list-style-type: none">▪ Prevent unauthorized copying of a completed or blank prescription form.▪ Prevent the erasure or modification of information written on the prescription by the prescriber.▪ Prevent the use of a counterfeit prescription form.
Wholesale Acquisition Cost (WAC)	The list price determined by a manufacturer for a pharmaceutical sold by a manufacturer to a wholesaler.

1.3 CHILDREN'S SPECIAL HEALTH CARE SERVICES

Pharmacy coverage for beneficiaries who only have CSHCS coverage is limited to those pharmaceutical products that are required for the treatment of the CSHCS qualifying diagnosis. The beneficiary's CSHCS qualifying diagnosis is listed on their eligibility letter by ICD code. Pharmacies may not bill for

Medicaid Provider Manual

pharmaceutical products not required for the treatment of the CSHCS qualifying diagnosis. Also, the MPPL specifies other coverages unique to this program.

1.4 PLACE OF SERVICE

Coverage and payment policies for products dispensed in the settings listed below are not contained in this chapter or the MPPL. Healthcare providers should refer to the provider-specific chapter for Hospital, Practitioner, Nursing Facility, or Laboratory in this manual for these services:

- Physician's office or clinic: Injectable products used in physician offices or clinics are reimbursed to the healthcare provider administering the drug, not a pharmacy. If a pharmacy sells injectable products to a physician or clinic, a pharmacy must obtain payment directly from the purchasing provider and not MDHHS. Injectable products are not to be dispensed to the beneficiary for the purpose of administration at the physician's office.

Exception: Beneficiaries with a Benefit Plan ID of NH (Nursing Home) can receive injectable drugs as a pharmacy benefit due to the relationship between the nursing facility and its contracted providers.

- Inpatient hospital.
- Mental health, hospital long term care, and medical care facilities with in-house pharmacies.
- Laboratory.

1.5 OUTPATIENT HOSPITAL

Outpatient hospitals with pharmacies enrolled with MDHHS as pharmacy providers must bill for take-home pharmaceutical products in compliance with policies of this chapter and the MPPL. Such services cannot be billed under the outpatient hospital's NPI number.

Injectable drugs and single doses given on the premises, including products used in conjunction with lab, radiology, and other medical procedures, must be billed using the outpatient hospital's NPI number, not the pharmacy's NPI number.

1.6 HOSPICE

Services, including drugs and nutritional supplements related to a beneficiary's terminal illness, are provided by the hospice (Benefit Plan ID of Hospice). The hospice reimburses pharmacies for these services. Coverage, payment amounts, and billing procedures of the particular hospice must be followed. To confirm that a product is not related to the terminal illness, the pharmacist must contact the hospice regarding coverage before billing. A pharmacy must not bill MDHHS for prescription services related to the terminal illness.

The MDHHS PBM messages back to the pharmacy when claims are submitted for beneficiaries with a Benefit Plan ID of Hospice. It is the pharmacy's responsibility to assure that the claim submitted is not related to the beneficiary's terminal illness. If billings contrary to this policy are found in post-payment review, MDHHS will recover inappropriate payment.

Medicaid Provider Manual

1.6.A. EXCEPTION FOR SELECTED HIV DRUGS

MDHHS separately reimburses a pharmacy for selected HIV drugs that the beneficiary had previously used to prevent the terminal illness. These HIV drugs include Protease Inhibitors, Nucleoside/-tide Reverse Transcriptase Inhibitors, and Non-Nucleoside Reverse Transcriptase Inhibitors, even though the product is related to the terminal illness.

1.6.B. PRODUCTS NOT RELATED TO THE TERMINAL ILLNESS

Covered drug products not related to the terminal illness may be separately billed by the pharmacy. For example: A hospice beneficiary has leukemia and a lifelong condition of diabetes. Products related to the diabetes can be separately billed by a pharmacy provider.

1.7 MEDICAID HEALTH PLANS

Providers should verify eligibility to determine if the beneficiary is enrolled in a MHP (Benefit Plan ID of CSHCS-MC, MA-HMP-MC, MA-MC or MME-MC) for the DOS. (Refer to the Beneficiary Eligibility chapter for additional information.)

Coverage criteria (including PA) and reimbursement limits for members of MDHHS contracted Medicaid Health Plans (MHPs) may not follow the policies specified in this chapter applicable to FFS.

Each health plan enrolls its own providers and structures its own billing system. All plan providers are required to enroll/register in CHAMPS. Providers must contact the contracted plan for information regarding reimbursement issues.

Pharmacy Aspects of MHP: Quick Reference

Benefit Plan ID	CSHCS-MC, MA-HMP-MC, MA-MC or MME-MC
Provider Enrollment	Pharmacies must follow the MHP procedures for enrollment to ensure payment.
Pharmaceutical Coverage	<p>Approved MHP pharmaceutical products may differ from Medicaid FFS and CSHCS programs.</p> <p>The MHP Common Formulary establishes the minimum coverage requirements for drugs covered by health plans, as well as drug utilization management tools such as quantity limits, age and gender edits, prior authorization criteria, and step therapies. MHPs may be less restrictive, but not more restrictive, than the coverage parameters of the Common Formulary. Additional information is available on the MDHHS website. (Refer to the Directory Appendix for website information.)</p> <p>With the exception of products that are carved out, MHPs must have a process to approve provider requests for any prescribed medically appropriate product identified on the Michigan Pharmaceutical Product List (MPPL). (Refer to the Directory Appendix for website information.)</p>
Copayment	Copayments may differ.
Payment and Billing	Payment levels and billing methods are set by the MHP, MDHHS.

Medicaid Provider Manual

Prior Authorization (PA)	Follow the MHP PA procedures.
Questions	For general managed care questions, call the MDHHS Provider Inquiry or Beneficiary Helpline. (Refer to the Directory Appendix for contact information.) Contact the individual MHP for specific coverage questions.

1.7.A. CARVE-OUT EXCEPTIONS

Select drugs and classes may be carved-out from the respective health plan's reimbursement and paid Medicaid Fee For Service. (Refer to the PBM website listed in the Directory Appendix for a listing of these drug classes.)

Any services paid Fee For Service must follow appropriate guidelines for supporting documentation, including attending, billing, prescribing, referring, rendering and supervising provider requirements.

1.8 INTERMEDIATE CARE FACILITY FOR INDIVIDUALS WITH INTELLECTUAL DISABILITIES

Beneficiaries residing in an Intermediate Care Facility for Individuals with Intellectual Disabilities (ICF/IID) are identified by the Benefit Plan ID of ICF/IID. For Medicare/Medicaid dually-eligible beneficiaries, pharmacy services will be covered by Medicare Part D. Drugs not covered by Medicare Part D are included in the ICF/IID per diem rate.

1.9 MEDICARE PART D BENEFIT

The Medicare Modernization Act of 2003 provides a prescription drug benefit to Medicare beneficiaries. The benefit is commonly referred to as Medicare Part D. Dually enrolled Medicare/Medicaid beneficiaries must obtain all Part D covered drugs through their Medicare Part D Plan (PDP) or Medicare Advantage Prescription Drug Plan (MA-PD).

Drugs covered by Medicare Part D, but not included in the beneficiary's Medicare Part D Plan's formulary, will not be covered by Medicaid.

Medicaid does not cover Part D drugs for beneficiaries who are enrolled in Medicare Part A and/or Part B and elect to opt out of a Medicare Prescription Drug Plan (PDP). Pharmacies should refer to the Pharmacy Benefits Manager (PBM) website for information on billing Medicare Part D when eligible beneficiaries have not yet enrolled in a Part D plan. (Refer to the Directory Appendix for website information.)

Drugs excluded from coverage by Medicare Part D will not be covered by Medicaid, except for the following:

- Over-the-counter (OTC) drugs listed on the MPPL
- Over-the-counter agents used to promote smoking cessation

Medicaid Provider Manual

- Select group of vitamins and minerals prescribed at therapeutic doses for deficiency diagnoses that meet Medicaid coverage criteria

Questions concerning the Medicare Part D benefit must be directed to Medicare. (Refer to the Directory Appendix for contact information.)

SECTION 2 – PRESCRIBER REQUIREMENTS

All MDHHS-covered legend and over-the-counter drugs (OTCs), except condoms, require a prescription order by a licensed professional acting within their scope of practice as defined by state and federal laws, rules, and regulations.

Coverage of pharmaceutical products is based on limitations stated in this chapter, the MPPL, and medical necessity. Determination of medical necessity and appropriateness of service is the responsibility of the prescribing physician/provider (prescriber) within the scope of currently accepted medical practice and MDHHS limitations. Participating providers must observe applicable State and Federal laws, rules, regulations, and policies. Providers or designees of such providers who prescribe a controlled substance are required to check the Michigan Automated Prescription System (MAPS) for the beneficiary's 12-month prescription drug history before prescribing controlled substances. Documentation of the required MAPS check should be retained in accordance with the Medicaid record retention policy. Exemptions to this requirement include:

- Beneficiaries who are receiving cancer treatment or hospice/ palliative care in long-term care facilities described in 1396d of Title XIX or other facilities with a single pharmacy contract, and
- Prescriptions provided during declared natural disasters or emergency services. (Refer to the Directory Appendix for MAPS information.)

MDHHS may impose additional constraints to reduce misuse.

2.1 SCOPE OF PRACTICE

MDHHS only reimburses for products prescribed by a licensed prescriber that are within the prescriber's scope of currently accepted medical practice and MDHHS limitations.

2.2 PRESCRIBER IDENTIFICATION [CHANGE MADE 4/1/2025]

Pharmacy providers must provide the individual prescriber's National Provider Identifier (NPI) on the submitted claim. MDHHS will deny pharmacy claims where the prescriber is not enrolled in CHAMPS. Exceptions to this in compliance with MDHHS policy include:

- Prescriber enrollment in another state Medicaid program has been validated.
- Prescription is being provided during a declared natural disaster or emergency services. **(text added per bulletin MMP 25-01)**

Refer to the General Information for Providers chapter and the Practitioner chapter for additional information.

2.3 SANCTIONED PRESCRIBERS

MDHHS does not reimburse for pharmaceuticals prescribed by providers sanctioned by the Federal Government, the State of Michigan, or for prescribers having a limited, expired (lapsed), or revoked license. A list of sanctioned providers is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

Medicaid Provider Manual

2.4 OTHER PERTINENT SECTIONS

Prescribers should refer to other pertinent sections in this chapter for policies and procedures related to Drug Utilization Review, Prior Authorization, and the MPPL.

Medicaid Provider Manual

SECTION 3 – PHARMACY REQUIREMENTS

3.1 COMPLIANCE WITH APPLICABLE STATE, FEDERAL, AND MDHHS PROVISIONS

A provider who complies with all licensing and regulation laws applicable to the practice of pharmacy in Michigan may enroll as a Medicaid provider. Applicable State and Federal laws, rules, regulations, and policies must be observed by participating pharmacies. MDHHS does not enroll dispensing physicians as Medicaid providers for pharmacy services. (Refer to the General Information for Providers Chapter of this manual for additional information.)

3.2 ENROLLMENT

Pharmacy enrollment is processed through CHAMPS. Refer to the General Information for Providers Chapter, Provider Enrollment section, for additional information.

SECTION 4 – COUNSELING REQUIREMENTS

Pharmacies must follow the counseling requirements mandated in State and Federal statutes and regulations. These requirements do not apply to drugs dispensed in nursing facilities that are in compliance with the drug regimen review procedures specified by the licensing authority.

4.1 OFFER TO DISCUSS

For every new prescription presented by the beneficiary, the pharmacy's representative must offer the beneficiary the opportunity to discuss/receive counseling from the pharmacist regarding the new prescription. The offer for counseling must be in a positive, helpful manner. If practical, the offer to counsel must be in person and verbal. Otherwise, it is permissible for the offer to be made in writing or by telephone. Pharmacies are required to provide toll-free access for beneficiary inquiries related to products dispensed. A pharmacist is not required to provide counseling when a beneficiary or representative refuses the offer for counseling.

4.2 DISCUSSION

When the beneficiary (or representative) accepts the offer for counseling, it must be provided by the pharmacist in person (whenever practical) or by telephone and may include written materials. Information must be in a language that can be understood by the beneficiary (or representative) and must include an opportunity for questions.

In addition to discussing interactions with drugs previously dispensed by the pharmacist, the discussion should also include the potential interaction with any other drugs the beneficiary indicates they are taking. The beneficiary (or representative) must be counseled in a confidential manner, consistent with any State or Federal regulations. Federal law requires that the pharmacist must discuss all the items indicated below, and any others deemed significant in the pharmacist's professional judgment. If an interpreter is required, the provider must provide one free of charge.

- The name and description of the medication.
- The dosage form, dosage, route of administration, and duration of drug therapy.
- Special directions and precautions for preparation and use by the beneficiary.
- Common side effects or interactions and therapeutic contraindications that may be encountered, including their avoidance, and the action required if they occur.
- Techniques for self-monitoring drug therapy.
- Proper storage.
- Prescription refill information.
- Action to be taken in the event of a missed dose.

SECTION 5 – SIGNATURE LOG, DATA COLLECTION AND DOCUMENTATION

5.1 SIGNATURE LOG

Pharmacy providers must document receipt or delivery of new or refilled medications to the intended Medicaid beneficiary. This documentation serves as verification of the beneficiary receiving the prescription billed. The absence of the appropriate verification indicates the beneficiary did not receive the prescription, and funds will be recouped from the pharmacy. Documentation described below must be retained for review by MDHHS or the MDHHS agent for seven years and is subject to audit. Any method of reproducing past signatures is not acceptable.

5.1.A. SIGNATURE LOG

Pharmacy providers must maintain a log containing the following information:

- Beneficiary's name;
- The manual or electronic signature of the beneficiary or that of their representative; and
- The date of receipt of the prescription.

The log must effectively differentiate between prescriptions received by a beneficiary for which counseling was accepted and provided, and those for which counseling was offered and was declined.

5.1.B. PROOF OF DELIVERY

Pharmacy providers must maintain a log verifying proof of delivery for all prescriptions delivered by common carrier (i.e., FedEx, UPS, USPS, etc.). Pharmacies should be able to link the tracking information to the prescription record through supporting documents if requested. Pharmacies must validate the member's address prior to mailing the prescription. A tracking number alone is not considered a valid proof of member receipt. The tracking number must be accompanied by either:

- the tracking detail from the carrier showing medication was delivered, including date and time of delivery; or
- the manual or electronic signature of the member or that of their representative at the time of delivery.

5.2 BENEFICIARY CONSENT AUTHORIZING ENROLLMENT INTO AUTOMATIC REFILL PROGRAMS

Beneficiary participation in an automatic refill program must be voluntary and opt-in only. Pharmacy providers must obtain beneficiary consent in either written or electronic form prior to enrollment into an automatic refill program for each prescription that will be refilled using the program. The pharmacy shall also obtain an annual renewal consent no later than 12 months since the prescription was previously enrolled in the program. This documentation must be retained for review by MDHHS or the MDHHS agent for seven years and is subject to audit. Any method of reproducing past signatures is not acceptable.

Medicaid Provider Manual

Beneficiary consent documentation for participation in automatic refill programs must include the following information:

- Beneficiary's name;
- The manual or electronic signature of the beneficiary or that of their representative;
- The date of receipt of the signature; and
- Instructions on how to disenroll from the automatic refill program.

Licensed intermediate care facility pharmacy providers are exempt from this requirement. This requirement does not affect retail refill or reminder programs that require the beneficiary to pick up the prescription.

5.3 BENEFICIARY INFORMATION AND DATA COLLECTION REQUIREMENTS

To meet specified State and Federal requirements, pharmacies must make a reasonable effort to obtain, record, and maintain on file at least the following information:

- Name, address, telephone number, date of birth (or age), and gender of the beneficiary.
- Pharmacist notes on the beneficiary's drug therapy.
- Beneficiary history when significant, including:
 - Disease state(s);
 - Known allergies and drug reactions; and
 - Comprehensive list of drugs and relevant devices.
- Whether the offer to counsel was made and whether this offer was accepted or rejected by the beneficiary or the beneficiary's representative.

5.4 DOCUMENTATION REQUIREMENTS

To assure that pharmacy counseling and other data collection requirements were performed, pharmacies must record the required information in the beneficiary's manual or electronic profile, in the prescription signature log, or any other system of records. Regardless of the format used, the associated documentation must be retained electronically or otherwise for a period of seven years, or longer if specified by law.

5.4.A. NON-CONTROLLED ELECTRONICALLY TRANSMITTED PRESCRIPTIONS

If a prescription is created, signed, transmitted and received electronically, all records related to that prescription must be retained electronically. Records must be retained electronically for a period of seven years, or longer if specified by law. Records must be made available within 72 hours or as requested. The electronically transmitted prescription must include all of the following information:

- The name, address, and telephone number of the prescriber;
- The full name of the patient for whom the prescription is issued;

Medicaid Provider Manual

- An electronic signature or other identifier that specifically identifies and authenticates the prescriber;
- The time and date of the transmission;
- The identity of the pharmacy intended to receive the transmission; and
- Any other information required by the federal act or state law.

The electronic equipment or system utilized in the transmission and communication of prescriptions must provide adequate confidentiality safeguards and be maintained to protect patient confidentiality as required under any applicable federal and state law and to ensure against unauthorized access. The electronic transmission of a prescription must be communicated in a retrievable, recognizable form acceptable to the intended recipient. The electronic form utilized in the transmission of a prescription must not include "dispense as written" or "d.a.w." as the default setting.

Prior to dispensing a prescription that is electronically transmitted, the pharmacist must exercise professional judgment regarding the accuracy, validity, and authenticity of the transmitted prescription. An electronically transmitted prescription that meets the above requirements is the original prescription.

SECTION 6 – GENERAL NONCOVERED SERVICES

This section specifies general coverage restrictions. However, drugs in other classes may not be covered. Pharmacies should review the MPPL for specific coverage. When possible, pharmacies are encouraged to suggest alternative covered therapy to the prescriber if a product is not covered.

The following drug categories are **not covered** as a benefit:

- Agents used for anorexia
- Agents used for weight gain
- Agents used for cosmetic purposes or hair growth
- Agents used for symptomatic relief of cough and colds
- Experimental or investigational drugs
- Agents used to promote fertility
- Agents used to promote smoking cessation not on the MPPL
- Vitamin/Mineral combinations not for prenatal care, end stage renal disease or pediatric fluoride supplementation
- Covered outpatient drugs that the Labeler seeks to require as a condition of sale that associated tests or monitoring services be purchased exclusively from the Labeler or their designee
- Covered outpatient drugs where the Labeler limits distribution
- Proposed less-than-effective (LTE) drugs identified by the Drug Efficacy Study Implementation (DESI) program
- Over-the-counter drugs not on the MPPL
- Drugs of Labelers not participating in the Rebate Program
- Drugs prescribed for "off label" use if there is no generally accepted medical indication in peer reviewed medical literature (Index Medicus), or listing of such use in standard pharmaceutical references such as Drug Facts and Comparisons, AMA Drug Evaluations, American Hospital Formulary Service Drug Information, or DRUGDEX Information Systems
- Drugs prescribed specifically for medical studies
- Drugs recalled by Labelers
- Drugs past CMS termination dates (Refer to the Directory Appendix for CMS website information.)
- Lifestyle agents
- Standard Infant Formulas
- Drugs covered by the Medicare Part D benefit
- Drugs not FDA approved or licensed for use in the United States
- Agents used for treatment of sexual or erectile dysfunction

SECTION 7 - MICHIGAN PHARMACEUTICAL PRODUCT LIST

The Michigan Pharmaceutical Product List (MPPL) identifies the pharmaceutical products that are covered by MDHHS. The MPPL pharmaceutical product coverages may vary by MDHHS program or be limited by age, clinical parameters, and/or gender. The Point of Sale pharmacy claim adjudication also provides coverage information related to a specific beneficiary or prescription.

The MPPL is posted on the PBM's website. (Refer to the Directory Appendix for website information.) Providers must refer to the MPPL for the additions and deletions of drug products. Specific notification of changes will not be issued.

7.1 NOTIFICATION OF NEW OUTPATIENT DRUGS

MDHHS receives weekly, comprehensive new information about outpatient drugs from First DataBank. Manufacturers are not required to submit notification of new drug products. New drug products are required to be reviewed by the Pharmacy and Therapeutics (P&T) committee.

Most drug products are required to be on the market for six months prior to review. Products with a "priority" FDA rating may be reviewed earlier than the six month requirement.

7.2 APPROVED LABELERS

MDHHS reimburses MPPL products distributed by approved Labelers who have signed rebate agreements with the Centers for Medicare & Medicaid Services (CMS). A list of these approved Labelers is located on the CMS website and identification is by the first five digits of a National Drug Code (NDC). (Refer to the Pharmacy portion of the Directory Appendix for CMS website information.)

Alcohol swabs, condoms, diaphragms, syringes, aerochambers, spacers, and peak flow meters provided by a pharmacy are covered regardless of the manufacturer's rebate agreement.

SECTION 8 – PRIOR AUTHORIZATION

8.1 PRIOR AUTHORIZATION PROCESSOR

The MDHHS PBM processes prior authorizations (PAs). Refer to PBM's Pharmacy Claims Processing Manual for PA procedures. (Refer to the Directory Appendix for contact information.) Authorization to override denial edits must be obtained from the PBM.

Do **not** call the PBM's Call Centers for:

- Supplies billed by Medical Suppliers, including enteral formula and Total Parenteral Nutrition (TPN), since these are only reimbursed to a Medical Supplier provider. Contact the MDHHS Program Review Division for PA. (Refer to the Directory Appendix for contact information.)
- Information about the member's MHP. The provider must contact the MHP to obtain their policies.

8.2 PRIOR AUTHORIZATION REQUIREMENTS

PA is required for:

- Products as specified in the MPPL. Pharmacies should review the information in the Remarks as certain drugs may have PA only for selected age groups, gender, etc. (e.g., over 17 years).
- Payment above the Maximum Allowable Cost (MAC) rate.
- Prescriptions that exceed MDHHS quantity or dosage limits.
- Medical exception for drugs not listed in the MPPL.
- Medical exception for noncovered drug categories.
- Acute dosage prescriptions beyond MDHHS coverage limits for H2 Antagonists and Proton Pump Inhibitor medications.
- Dispensing a 100-day supply of maintenance medications that are beneficiary-specific and not on the maintenance list.
- Pharmaceutical products included in selected therapeutic classes. These classes include those with products that have minimal clinical differences, the same or similar therapeutic actions, the same or similar outcomes, or have multiple effective generics available.

8.3 RESPONSIBILITY FOR OBTAINING AUTHORIZATION

8.3.A. PHARMACY RESPONSIBILITY

Pharmacies may call the PBM Technical Call Center for exceptions on:

- Quantity;
- Early refills; and
- 72-hour supply of medication for emergency needs only when the prescriber is not available to obtain PA.

Medicaid Provider Manual

Pharmacies may call the PBM Clinical Call Center for exceptions on payment for brand name over the MAC.

The PBM Technical Call Center is available 24 hours per day/seven days a week.

Refer to the Directory Appendix for PBM's Call Center contact information.

8.3.B. PRESCRIBER RESPONSIBILITY

Prescribers or their designees may call the PBM Clinical Call Center for any PA, but must call for any request that falls outside the categories noted above as applying to pharmacies.

The PBM Clinical Call Center is available after hours by telephone and by pager. The PBM may also be contacted by fax or in writing via U.S. mail.

Refer to the Directory Appendix for the PBM Clinical Call Center contact information, PA contact information and hours of operation.

8.4 DOCUMENTATION REQUIREMENTS

For all requests for PA, the following documentation is required:

- Pharmacy name and phone number
- Beneficiary diagnosis and medical reason(s) why another covered drug cannot be used
- Drug name, strength, and form
- Other pharmaceutical products prescribed
- Results of therapeutic alternative medications tried
- MedWatch Form or other clinical information may be required

If prior authorization is being submitted for an item related to a clinical trial, PA requests must also include a completed and signed Attestation to the Appropriateness of the Qualified Clinical Trial form (BPHASA-2210). Refer to the Forms Appendix for a copy of BPHASA-2210.

8.5 ADDITIONAL DOCUMENTATION

Depending on the specific drug being prescribed, additional medical documentation may be required. The most common categories requiring additional documentation are:

8.5.A. BRAND OVERRIDE

Provide documentation of the therapeutic trial and failure reasons of the generic.

8.5.B. ANTI-OBESITY

Prior authorization criteria can be found on the PBM vendor website as 'Clinical and PDL PA Criteria'. (Refer to the Directory Appendix for website information.)

8.5.C. CLINICAL TRIAL ATTESTATION FORM

For items and services that require prior authorization and were provided in connection with a beneficiary's participation in a qualified clinical trial, a completed Attestation to the Appropriateness of the Qualified Clinical Trial form (BPHASA-2210) is required to be submitted with the pharmacy prior authorization request. Refer to the Forms Appendix for a copy of the form. Refer to the Prior Authorization section of the Directory Appendix for Pharmacy Prior Authorization contact information.

8.6 PRIOR AUTHORIZATION DENIALS

PA denials are conveyed to the requester. PA is denied if:

- The medical necessity is not established.
- Alternative medications are not ruled out.
- Evidence-based research and compendia do not support it.
- It is contraindicated, inappropriate standard of care.
- It does not fall within MDHHS clinical review criteria.
- Documentation required was not provided.

The PBM reviews the information submitted to determine whether the clinical criteria have been met. If the submitted information does not indicate that the criteria have been met, the PA is then sent to the Office of Medical Affairs in MDHHS for final determination on whether the clinical criteria have been met.

**SECTION 9 – H2 ANTAGONIST AND PROTON PUMP INHIBITOR POLICY**

For high dose use greater than 102 days in a 365-day period, PA is required for H2 Antagonists and Proton Pump Inhibitors (PPIs). MDHHS defines high dose use as:

H2 Receptor Antagonists	Proton Pump Inhibitors
Cimetidine: 800 mg per day or more	Omeprazole: 40 mg per day or more
Famotidine: 40 mg per day or more	Esomeprazole (Nexium): 40 mg per day or more
Nizatidine: 300 mg per day or more	Lansopazole (Prevacid): 30 mg per day or more
Ranitidine: 300 mg per day or more	Rabeprazole (Aciphex): 20 mg per day or more
	Pantoprazole (Protonix): 40 mg per day or more

Nonpreferred H2 Antagonists or PPIs require PA for both high and low dose use. Compliance with the H2 Antagonists and PPI Policy is monitored with POS or post-payment review.

Prescribers may request PA for high dose therapy over the 102 days through the PBM Clinical Call Center. (Refer to the Directory Appendix for contact information.) The following information is required for PA determination:

- Diagnosis
- Drug and dose for which PA is requested
- Date and results of GI testing
- All alternative H2 Antagonists and PPIs tried, including dose and duration
- Other prescribed medications relating to this diagnosis
- Reason patient cannot endure testing
- Health education or other counseling employed for this condition

SECTION 10 – DRUG UTILIZATION REVIEW

10.1 PROSPECTIVE DRUG UTILIZATION REVIEW

MDHHS utilizes Prospective Drug Utilization Review (ProDUR) edits in its Point of Sale (POS) system. ProDUR encompasses drug therapy screening, including problem detection, evaluation, and counseling components of pre-dispensed drugs.

In the POS system, MDHHS limits the number of messages to providers that concern potential drug problems to those that are critical to quality of care and appropriate dispensing. It is the provider's responsibility to provide ProDUR screening and to adhere to beneficiary information and data collection requirements.

10.1.A. ProDUR SCREENING REQUIREMENT

Before prescriptions are filled or delivered, pharmacists must review the consequences of the drug therapy based on the appropriate standards and guidelines.

The review must screen for potential therapy problems due to:

- Therapeutic duplication
- Drug-disease contraindications (to the extent diagnosis information is available)
- Drug-drug interactions (including interactions with known over-the-counter drugs)
- Incorrect drug dosage or duration of drug treatment
- Drug-allergy interactions
- Clinical abuse/misuse
- Under-utilization or over-utilization

10.1.B. ProDUR ALERT MESSAGES

The PBM's POS system provides online assistance for the dispensing pharmacist. Incoming drug claims are compared to a beneficiary's pharmacy claims history file to detect potential therapeutic problems. ProDUR alert messages are returned to the pharmacist when significant problems are discovered by this review.

10.2 RETROSPECTIVE DRUG UTILIZATION REVIEW

Medicaid utilizes pharmacy data for retrospective drug utilization review (RetroDUR) as required by Federal law and the following compendia:

- American Hospital Formulary Service Drug Information
- United States Pharmacopoeia Drug Information

Medicaid Provider Manual

- DRUGDEX Information System
- Peer-reviewed medical literature

RetroDUR is intended to be an educational tool to reduce costs resulting from drug-induced illnesses and hospitalizations. The purpose of retrospective drug utilization review is:

- To identify high-risk cases for drug-induced illness.
- To communicate risk factors to prescribers and dispensing pharmacists for evaluation.
- To improve patient healthcare outcomes and quality of care.

RetroDUR alerts providers to a beneficiary's medical condition and total drug usage from all prescribers and pharmacies. The MDHHS PBM reviews utilization data on a monthly basis and makes recommendations to the Michigan DUR Board for interventions and educational seminars.

10.3 MICHIGAN DRUG UTILIZATION REVIEW BOARD

The Michigan Drug Utilization Review (DUR) Board includes both physicians and pharmacists. After post-payment review, the DUR vendor sends appropriate intervention letters to pharmacies and prescribers. Based on the DUR intervention information, prescribers may choose to modify therapy. However, prescribers or pharmacists may also choose to correct beneficiary negative patterns by counseling, or provide background for re-evaluation by the DUR vendor or the DUR Board.

As needed, the PBM or DUR Board follows up on re-occurring patterns that have not been justified. Provider education or academic detailing may be provided to address re-occurring patterns.

10.4 CLINICAL CONSULTATION

MDHHS provides feedback to providers through its academic detailing program. Administered by PBM, Medicaid targets topics related to drug therapy where direct educational intervention to medical providers may prove beneficial in improving outcomes. The Michigan DUR Board approves the topics for academic detailing. Clinical consultants are Michigan-licensed pharmacists who are recruited and trained through the Michigan Pharmacists Association under the direction of PBM. Whenever possible, clinical consultants are assigned to call on medical providers who practice in the same geographical area as the detailing pharmacist to provide a personal and professional connection between the healthcare providers. Providers are encouraged to give the clinical consultants feedback on both topics presented and the overall program.

SECTION 11 – DISPENSING POLICY

11.1 DAYS SUPPLY

Prescription quantities are limited to the quantity specified by the prescriber. MDHHS covers up to a 34-day supply for acute medications, up to a 102-day supply for maintenance medications, and up to a 12-month supply of contraceptives, including oral, vaginal ring, and contraceptive hormonal patches.

The pharmacy must submit accurate days supply information. Submitting incorrect days supply information can cause false ProDUR messages and claim denials. It could also result in a pharmacy being targeted for a post-payment audit.

11.2 ACUTE AND MAINTENANCE SUPPLIES

Providers must bill and dispense as follows:

- For acute illness: The amount dispensed must be limited to the quantity required for the desired therapy during that episode of illness or up to a 34-day supply.
- For chronic illness:
 - Maintenance drugs must be dispensed in quantities as ordered by the prescriber and to achieve optimum therapy and economy of dispensing, or up to a 102-day supply.
 - If a prescription for a product on the maintenance list is for more than a month's supply and less than a 102-day supply, only one dispensing fee is allowed.
 - A maximum of 13 dispensing fees are paid for the same drug dispensed to the same beneficiary within a 365-day billing period.

A list of maintenance medications is posted on the PBM's website. (Refer to the Directory Appendix for website information.) This list does not exclude medications from other standard therapeutic class codes from being supplied in maintenance quantities. PA is necessary when a maintenance quantity of other medications is required for specific beneficiaries.

11.3 REFILLS

Refills must conform to the current Administrative Rules of the Michigan Board of Pharmacy, Michigan Public Health Code, state and federal statutes, rules, regulations, and policies. Claims will deny at point-of-sale if the utilization requirements have not been met.

For non-controlled substances, a FFS beneficiary cannot obtain a refill of the prescription until at least 75 percent of the drug quantity limit has been consumed in compliance with the prescribed dose, amount, frequency, and time intervals established by MDHHS. (Refer to the Narcotic Analgesics subsection for additional information regarding refill thresholds for narcotic analgesics.)

Early refill overrides may be granted once per drug per 12 months for any of the following circumstances:

- To replace medication that has been lost, stolen or destroyed.
- For the purposes of vacation or travel.

Medicaid Provider Manual

The early refill will not exceed a 34-day supply. MDHHS or its designee may limit the number of instances early refill overrides are approved in cases of suspected fraud or abuse, and may request additional documentation before an override is authorized.

The pharmacy may contact the MDHHS PBM Technical Call Center to request an override for an instance where an early refill is warranted. (Refer to the Directory Appendix for contact information.)

11.4 PRESCRIPTIONS NOT PICKED UP

MDHHS does not reimburse for retail prescriptions filled but not dispensed or picked up by the beneficiary or their representative, and does not allow restocking fees. For prescriptions not picked up, pharmacies must claim adjust or reverse the claim for any payments received, including the dispensing fee. The pharmacy should reverse claims in a timely manner. However, MDHHS policy allows claim adjustments or reversals to be submitted up to twelve months after the original date of service. For example, if the Medicaid beneficiary does not pick up a prescription from the pharmacy within 14 calendar days from the date the prescription claim was submitted by the pharmacy, the prescription claim should be reversed on the 15th calendar day and must have been reversed by the 365th day. For audit purposes, a record of processed reversals must be retained by the pharmacy for seven years.

11.5 TAMPER RESISTANT PRESCRIPTIONS

A pharmacist can only fill a written prescription for a Medicaid FFS beneficiary or POS carveout drugs for MHP enrollees when executed on a tamper resistant prescription pad. (See the following subsections for special considerations.)

Additional information on the tamper resistant prescription pad policy can be found in CMS guidelines which are available online. (Refer to the Directory Appendix for website information.)

11.5.A. EXEMPTIONS

- A compliant pad is not required if the prescription is transmitted verbally or electronically by telephone, facsimile, or modem to the pharmacy per federal and state laws.
- MHP enrollee if the MHP is reimbursing the prescriptions.
- Medicaid FFS beneficiaries receiving prescription drugs not separately reimbursable to a pharmacy. This includes drugs provided incident to, or part of, another service or as part of a per diem payment in the following settings:
 - Nursing facilities
 - ICF/IIDs
 - Inpatient/Outpatient Hospitals
 - Clinical Settings (hospice, dental, physician office/clinic, laboratory and x-ray, renal dialysis)

11.5.B. EMERGENCY PRESCRIPTIONS

In the event a pharmacy receives a non-compliant emergency prescription, the prescribed drug may be dispensed. However, the prescriber must provide to the pharmacy a compliant prescription within 72 hours of the date the emergency prescription was filled.

11.6 EMERGENCY SERVICES ONLY (ESO) AND END STAGE RENAL DISEASE (ESRD)

For coverage of medications related to ESRD for an ESO beneficiary, practitioners must identify the appropriate ESRD diagnosis code on prescriptions. Pharmacies should report both the ESRD diagnosis code and required level of service value of '3'.

**SECTION 12 – QUANTITY AND BILLING UNITS**

MDHHS uses standard metric billing units and the provider may not round fractions. For example, if the product is 2.500 ml, it must be billed as 2.500 ml, not 3 ml. The PBM's processing allows a quantity entry up to 999,999.999.

12.1 QUANTITY LIMITS

Dispensing quantities are limited according to accepted standards of practice, Food and Drug Administration (FDA)-approved Labeler recommendations and the recommendations of the Michigan DUR Board.

12.2 COMMON UNIT BASES

Quantities are based on the amount dispensed for the unit of the product. Thus, quantity field entries must be based on the amount dispensed for the unit specified in the MPPL. The most common unit bases are EACH, ML, or GM. Following are examples.

Drug Name	Drug Strength	Dosage Form	Unit	Billing Quantity Based On
Alphanate		Vial	EA	AntiHemophilic Factor Units
Amoxicillin Trihydrate	125 mg/5 ml	Susp Recon	ML	Reconstituted Milliliters
Cefazolin Sodium	1 gm	Vial	EA	Vials (Powdered-Filled)
Gentamicin Sulfate	40 mg/ml	Vial	ML	Milliliters (Liquid-Filled)
Humulin-N	100 U/ml	Vial	ML	Milliliters (Liquid-Filled)
Indocin	50 mg	Supp Rect	EA	Suppositories
Prolastin		Vial	EA	Milligrams
Proventil Inhaler		Aerosol	GM	Grams in each canister
Ranitidine	300 mg	Tablet	EA	Tablets

SECTION 13 – REIMBURSEMENT, COPAYMENTS, AND COORDINATION OF BENEFITS

Prescriptions dispensed by Tribal 638 facility pharmacies are reimbursed at the Indian Health Services per visit outpatient rate. Refer to the Tribal Health Centers chapter for additional information.

13.1 USUAL AND CUSTOMARY CHARGE

Reimbursement is the lower of the usual and customary (U&C) charge or the MDHHS product cost payment limits and a dispensing fee minus the beneficiary copayment, with the exception of condoms. If a beneficiary has other insurance or Medicare coverage, the related other insurance or Medicare payments are subtracted from the MDHHS payment.

U&C charge is defined as a pharmacy's charge to the general public. If the provider renders a covered service to a beneficiary that the provider offers for free or for a reduced fee to the general public, the provider may only bill Medicaid up to that customary charge as long as all other Medicaid requirements are met. The sum of charges for both the product cost and dispensing fee must not exceed a pharmacy's U&C charge for the same or similar service. The U&C charge must reflect all advertised discounts, special promotions, or other programs initiated to reduce prices for product costs available to the general public or to a special population.

If a pharmacy discounts prescriptions to an inclusive category of customers (e.g., over 60 years), the pharmacy must reflect this discount in its billings for MDHHS program beneficiaries in the same category.

13.2 OVER-THE-COUNTER DRUGS

The U&C charge for prescription-ordered OTC drugs may be different, but not greater, than the retail pharmacy's shelf price of the same product sold without a prescription.

13.3 SALES TAX

Sales tax must not be added to a pharmacy's U&C charge. MDHHS does not reimburse for sales tax.

13.4 PRODUCT COST PAYMENT LIMITS

Product Cost Payment Limits are based on the NDC the pharmacy identifies as the product that was dispensed. Reimbursement is the lower of the National Average Drug Acquisition Cost (NADAC), the Wholesale Acquisition Cost (WAC), the MAC, or the provider's charge. Misrepresentation of the product's NDC results in denied payment and fraud/abuse sanctions subject to applicable Federal and State laws.

Entities that dispense drugs purchased through the Federal 340B program to beneficiaries must bill the 340B price as the actual acquisition cost.

NADAC rates are posted on the CMS website. (Refer to the Pharmacy Resources portion of the Directory Appendix for website information.)

13.4.A. MAXIMUM ALLOWABLE COST

Maximum Allowable Cost (MAC) reimbursement levels for Michigan Medicaid are established and managed by an MDHHS contractor. MAC reimbursement levels are generally applied to

Medicaid Provider Manual

multi-source brand and generic products. However, MAC reimbursement may also be applied to single source drugs or drug classifications where appropriate. New or changed MAC prices are posted on the contractor's website the next business day after they are determined. A monthly online MAC list is also available on the contractor's website. MAC reimbursement reviews will take place on an on-going basis. In addition to the website, specific MAC reimbursement levels are also available by contacting the MAC vendor by US mail, e-mail, fax or telephone. (Refer to the Directory Appendix for the MAC vendor website and contact information.)

All requested MAC price reviews require the following information:

- The brand and generic name, strength, form, and NDC requested for review
- Reason for requested review (availability, price, or other)
- Supporting documentation that the MAC is below cost or the product is not available (wholesaler invoice to support a request)
- Date of service to identify the difference between reimbursement and actual cost
- Prescription number
- Company or pharmacy name, NPI, telephone number, and contact person

13.4.B. MAC OVERRIDES

Specific brand products have a MAC reimbursement level. To receive payment above the MAC reimbursement level, PA through the PBM is required. (Refer to the Directory Appendix for contact information.)

13.5 PROFESSIONAL DISPENSING FEES

The professional dispensing fee is defined as the fee charged for filling a prescription and all related services performed by a pharmacy. MDHHS dispensing fees are posted on the MDHHS website. (Refer to the Directory Appendix for website information.)

13.6 BENEFICIARY COPAYMENTS

13.6.A. MEDICAID COPAYMENTS

A copayment for each generic/preferred drug dispensed, and for each brand name/non-preferred drug dispensed, may apply for Medicaid beneficiaries age 21 years and older. A copayment may apply to certain brand name drugs that are preferred. Refer to the General Information for Providers Chapter for information about copayments. Current copayment amounts are listed on the MDHHS website. (Refer to the Directory Appendix for website information.)

Copayments cannot be discounted for promotional purposes.

Medicaid Provider Manual

Copayment Exemptions	
Over Age 21 Exclusions	<ul style="list-style-type: none">▪ The pharmaceutical product is a family planning or pregnancy-related product.▪ The beneficiary is in a nursing facility (Benefit Plan ID of NH). (Refer to the Nursing Facility section of this chapter for additional information.)▪ The beneficiary is enrolled in a hospice program (Benefit Plan ID of Hospice).
Other Exclusions	<ul style="list-style-type: none">▪ Medicaid beneficiaries who are under the age of 21 are excluded from the copay requirement.▪ Native American Indians/Alaska Natives consistent with federal regulations at 42 CFR §447.56(a)(1)(x).▪ All CSHCS, MOMS, and Plan First Family Planning program beneficiaries are excluded, including those over age 21.▪ Medicare/Medicaid dual eligibles. <p>Claims for the following drugs related to the treatment of Mental Health Conditions and Substance Use Disorders are exempt from copayments:</p> <ul style="list-style-type: none">▪ Central Nervous System Drugs▪ Psychotherapeutic Drugs▪ Sedative/Hypnotics▪ Anti-Alcoholic Preparations▪ Selective Serotonin Reuptake Inhibitors▪ Narcotic Withdrawal Therapies▪ Neuropathic Agents▪ Opioid antidotes▪ Drugs used to treat Substance Use Disorder▪ Drugs used to treat Tobacco Use Disorder

13.6.B. MEDICARE PART D COPAYMENTS

Refer to the Billing Beneficiaries Section of the General Information for Providers Chapter of this manual for additional information regarding co-payment requirements. Beneficiaries may not be denied care or services based on inability to pay a co-payment, except as outlined in that section.

Medicaid will not reimburse:

- Copays, deductibles, or coinsurance for Medicare Part D drugs.
- Commercial insurance drug copays, deductibles, or coinsurance for Medicare/Medicaid beneficiaries who chooses to retain their creditable drug coverage offered by the commercial insurance in place of joining a Medicare Part D plan.
- Copays, deductibles, or coinsurance that exceed the standard Medicare Part D benefit for Medicare/Medicaid beneficiaries.

13.7 NONALLOWABLE CHARGES TO THE BENEFICIARY

A pharmacy must not charge a beneficiary for a prescription if the pharmacy or prescriber fails to request prior authorization (PA). For all products listed in the MPPL indicating PA is required, the pharmacy may contact the PBM for PA or notify the prescriber that a PA is needed.

A pharmacy may charge the beneficiary its U&C charge for a product requiring PA only if the pharmacy has written documentation that the beneficiary was informed of the attempt and failure to obtain PA and of the resultant desire to purchase the drug privately. The pharmacy must not charge any portion of this claim to Medicaid.

The beneficiary must be made aware that PA and reimbursement cannot be obtained later.

13.8 ALLOWABLE CHARGES TO THE BENEFICIARY

A pharmacy may only charge a beneficiary the MDHHS established copayment for covered services. A beneficiary may not be charged for any cost of the prescription above the MDHHS reimbursement level. A pharmacy may only charge a beneficiary its usual and customary charge if the service is a noncovered service and the beneficiary has indicated a desire to purchase the service privately. Furthermore, a beneficiary may not be charged for a prescription in lieu of the pharmacy accepting the reimbursement paid by MDHHS, or in lieu of obtaining PA when indicated.

13.9 ADVERTISING

Advertisements must convey only participation in Medicaid. Advertising must not be used to influence the free choice of a pharmacy by a beneficiary. Promotions offering beneficiaries free goods, gift certificates, or shopping sprees in exchange for filled prescriptions are prohibited. No pharmacy may discount the copayment for promotional purposes.

Medicaid Provider Manual

13.10 COORDINATION OF BENEFITS

Coordination of Benefits (COB) (also referred to as Third Party Liability [TPL]) requires providers to bill other insurances, including Medicare Part B, before billing MDHHS. Pharmacy providers should submit both the primary insurer payment amount and the beneficiary's liability (copayment, coinsurance, and/or deductible) under the primary insurer's plan to MDHHS. Regardless of participation by the pharmacy provider with the other insurance and/or Medicare, MDHHS only reimburses for the coinsurance and deductible amounts up to the Medicaid allowable fee screen. If the other insurance's (including Medicare) reimbursement exceeds the reimbursement level of Medicaid, no additional monies are paid. Providers must submit the charge as the amount allowed by the other insurance, indicating the other insurance payment (including the professional dispensing fee) and the other insurance copayment. In addition, the provider is to use the drug list established by the beneficiary's other insurance carrier. If the other insurance carrier's drug list covers a drug not on the MPPL, the prescriber must obtain PA from MDHHS. (For complete information on MDHHS policy regarding other insurance, refer to the Coordination of Benefits Chapter of this manual.)

If a provider receives payment from another insurance and/or Medicare after MDHHS has made full payment, the payment must be returned to MDHHS through a claim adjustment. Failure to reimburse MDHHS may be construed as fraud under the Medicaid False Claim Act. For billing information on COB, refer to the PBM Pharmacy Claims Processing Manual, the PBM website, or contact the PBM Technical Call Center. (Refer to the Directory Appendix for website and contact information.)

13.10.A. SECONDARY PAYER COVERAGE OF SELECT CONTINUOUS GLUCOSE MONITORING SYSTEMS (CGMS), DISPOSABLE INSULIN PUMPS, AND RELATED SUPPLIES

MDHHS allows coordination of benefits for select CGMS and disposable insulin pumps and their respective supplies on the pharmacy claim format where primary insurance only covers these products as a pharmacy benefit and has already been billed. Refer to the Directory Appendix for a list of covered products.

These select products are covered for eligible MDHHS program beneficiaries under the Durable Medical Equipment (DME) program medical benefit when no other insurance applies (or the other insurance covers under the DME benefit).

Pharmacies must submit coordination of benefit claims utilizing one of the following National Council for Prescription Drug Program (NCPDP) Other Coverage Codes:

2	Other coverage exists, payment collected (Coinsurance claim)
4	Other coverage exists, payment not collected (Deductible claim)

Refer to the PBM's Pharmacy Claims Processing Manual for billing procedures. (Refer to the Directory Appendix for website information.)

SECTION 14 – SPECIAL PRODUCT COVERAGE

14.1 AMPHETAMINE

Some drugs used to treat narcolepsy or hyperkinesis may be covered for beneficiaries over 17 years of age. The prescriber or designee must obtain PA before the pharmacy dispenses these products.

14.2 ANTIHEMOPHILIC DRUGS

A Medical Supplier must bill for infusion kits necessary for administration. (Refer to the Medical Supplier Chapter of this manual for additional information.)

Antihemophilic drugs are a Medicare Part B benefit. For beneficiaries who are eligible for both Medicare and Medicaid, the pharmacy must bill Medicare prior to billing Medicaid as explained in the Coordination of Benefits Chapter of this manual.

14.3 ANTINEOPLASTIC DRUGS

Covered chemotherapeutic agents are listed in the MPPL. Most injectable chemotherapy forms are not listed in the MPPL as reimbursement is made to the administering healthcare provider (e.g., physicians, outpatient hospitals). A dosage intended for parenteral infusion (continuous or intermittent), perfusion, or intracavity administration in an office, clinic, or outpatient hospital is not a reimbursable Medicaid benefit to a pharmacy. The pharmacy should bill the ordering provider of service.

Injectable chemotherapy and topical uses for these products may be reimbursed to a pharmacy for home use. Some of these agents may require PA. Refer to the MPPL for verification of PA requirements.

14.4 CLOZAPINE

Clozapine may be billed in weekly cycles. A professional dispensing fee may be reimbursed each week when billed in accordance with other MDHHS and FDA product licensure guidelines.

14.5 COMPOUNDED DRUGS

Medicaid defines a compounded drug as the combination of two or more ingredients not available from any Labeler in the combination prescribed. Compounded prescriptions must contain at least one product manufactured by an approved Labeler. The following compounded drug policies do not apply to infusion therapy. Additionally, certain Active Pharmaceutical Ingredients (APIs) and excipients utilized in compounded drug claims are covered. MDHHS maintains a list of these covered products on the Michigan Medicaid Pharmacy Benefits Manager (PBM) website. (Refer to the Directory Appendix for PBM website information to obtain the list of covered products.)

14.5.A. EXCLUSIONS

Compounded drugs are not covered if active ingredients include:

- A noncovered legend drug or drug class (e.g., cough/cold, DESI);
- Only OTC drugs;

Medicaid Provider Manual

- Reconstitution of a product only; or
- Pre-mixed infusion solutions (Refer to the Directory Appendix for PBM website information to obtain the list of pre-mixed infusion solutions)

A compounded prescription is not covered if it contains noncovered products and is prescribed solely to circumvent program limitations.

14.5.B. PROFESSIONAL DISPENSING FEES

Professional dispensing fees for compounded drugs are available on the MDHHS website. (Refer to the Pharmacy Resources portion of the Directory Appendix for website information.) To receive the compounded fee, a prescription must involve extemporaneous compounding and dispensing prepared only when orders for specific beneficiaries are received.

Medicaid monitors its compounded drug policy on a pre- and post-payment basis.

14.6 FAMILY PLANNING SUPPLIES

14.6.A. CONDOMS

Condoms do not require a prescription. A pharmacy may provide condoms at the beneficiary's request. Both males and females are eligible to receive condoms. Condoms are not a covered benefit for participants in the CSHCS program.

- **Payment Limit** – Payment is the lesser of the pharmacy's retail price or the MAC listed in the MPPL. A dispensing fee is not paid for condoms.
- **Dispensing Limits** – The following quantity requirements are monitored by pre- and post-payment reviews. A pharmacy is not reimbursed for more than:
 - 12 condoms at one time to a beneficiary; or
 - 36 condoms in 30 days to a beneficiary.
- **Documentation** – Pharmacies are responsible for maintaining adequate documentation to substantiate which beneficiaries received condoms. Documentation can be collected on a prescription blank or a log entry. Either form of documentation must contain:
 - An assigned control number (e.g., prescription number);
 - Beneficiary name;
 - Beneficiary Medicaid ID number;
 - Brand name of condom dispensed;
 - Quantity dispensed; and
 - Date dispensed.

14.6.B. DIAPHRAGMS AND CERVICAL CAPS

A dispensing fee is not paid for diaphragms and cervical caps.

14.7 INFUSION THERAPY

Infusion therapy, except for Total Parental Nutrition (TPN) used in the home setting, is covered for a pharmacy. If a specific drug is not listed in the MPPL, PA must be obtained. A Medical Supplier must bill for infusion-related expendable supplies and durable medical equipment, such as pumps or IV stands and TPN.

MDHHS will reimburse an additional single all-inclusive fee, above the standard dispensing fee, for the diluent and vehicle that is administered with the active ingredient. MDHHS dispensing fees are posted on the MDHHS website. (Refer to the Directory Appendix for website information.)

Daily billing for infusion therapy is not allowed. Drugs for infusion therapy must not be billed more frequently than seven days.

14.8 INHALERS [CHANGE MADE 7/1/2025]

Depending on the beneficiary's condition, several inhalers per month may be necessary. If dispensing limitations allow and the prescriber writes accordingly, the beneficiary may obtain more than one inhaler per prescription. A dispensing fee for **inhaler assist devices (revised 7/1/2025)** is not paid to pharmacies.

14.9 METHADONE

Methadone is only covered when used as an analgesic for severe intractable pain such as that produced by some types of terminal illnesses.

14.10 NARCOTIC ANALGESICS

A FFS beneficiary cannot obtain a new prescription or refill of an existing narcotic analgesic, whether the drug is prescribed by the same or different healthcare provider or for a different drug in the same class, until 90 percent (95 percent for Benefits Monitoring Program beneficiaries) of the drug quantity limit has been consumed in compliance with the prescribed dose, amount, frequency and time intervals established by MDHHS.

Hospice (Benefit Plan ID of Hospice) beneficiaries are exempt from refill tolerance restriction. Benefits Monitoring Program beneficiaries are also exempt from refill tolerance restriction.

The refill restriction also does not apply if payment from the other insurance is reported on the claim.

The pharmacy may contact the MDHHS PBM Technical Call Center to request an override for an instance where an early refill is warranted. (Refer to the Directory Appendix for contact information.)

14.11 OPIOID WITHDRAWAL AGENTS, OPIOID TYPE

Opioid withdrawal agents may be billed in weekly cycles. Professional dispensing fee limits are extended for this category only.

14.12 ORAL CONTRACEPTIVES

Prescriptions for oral contraceptives may be dispensed for a 12-month supply when the prescriber writes the prescription accordingly.

14.13 OVER THE COUNTER DRUGS

Covered OTC drugs are listed in the MPPL. A prescription is required. The refill policy is the same as for legend drugs. OTC supply or test kit items that remain in their original packaging should not have a professional dispensing fee requested in the provider's usual and customary charge.

14.13.A. OTC DRUGS FOR END STAGE RENAL DISEASE

Certain OTC drugs are covered only for End Stage Renal Disease (ESRD) (that is, prescribed for the treatment of a beneficiary with a kidney transplant or one undergoing maintenance dialysis). Documentation must be kept on file by the pharmacy to substantiate the beneficiary's ESRD condition and must include:

- The date of the transplant (month and year); or
- The name of the facility performing dialysis; or
- An indication that the beneficiary is on Continuous Ambulatory Peritoneal Dialysis (CAPD).

14.13.B. OTC DRUGS FOR NURSING FACILITIES

The MPPL designates when a covered OTC drug is included in the NF per diem. These products and noncovered OTC drugs are included in the per diem rate paid to a nursing facility. It is the responsibility of the nursing facility to provide these products for its beneficiaries. Reimbursement must be obtained from the nursing facility.

Covered OTC drugs, such as insulin (except if covered by the Medicare Part D benefit) and those not designated as included in the NF rate, are reimbursable to a pharmacy for NF beneficiaries.

14.14 PEAK FLOW METERS, SPACERS, AND AEROCHAMBERS

Peak flow meters, spacers, and aerochambers listed in the MPPL may be billed by pharmacies. A dispensing fee is not reimbursed to pharmacies that bill for these supplies. Coverage is limited to four (4) peak flow meters per year, and four (4) spacers and/or aerochambers combined total per year.

Spacers and aerochambers cannot be billed by the pharmacy for NF beneficiaries. These items are included in the NF per diem rate.

14.15 PHYSICIAN-ADMINISTERED INJECTABLE DRUGS [CHANGES MADE 4/1/2025]

Pharmacy claims for the following physician-administered injectable drugs are reimbursable under Michigan Medicaid, Healthy Michigan Plan and Children's Special Health Care Services:

- Mental health and substance abuse injectable drugs, as listed on the Prepaid Inpatient Health Plan (PIHP)/Community Mental Health Services Program (CMHSP) Physician Injectable Drug Coverage database available on the MDHHS website, administered in an outpatient setting or residential treatment center. (Refer to the Directory Appendix for website information.)
- 17 Alpha Hydroxyprogesterone Caproate (17P), administered in an outpatient setting.

Medicaid Provider Manual

- Injectable drug products covered under the medical benefit and carved-out of Medicaid Health Plan coverage. Refer to the PBM's Pharmacy Claims Processing Manual for billing procedures. (Refer to the Directory Appendix for website information.) **(text added per bulletin MMP 24-62)**

Pharmacy providers may be reimbursed for these injectable drugs for administration using a rate based on the National Drug Code (NDC). The rates for drug product reimbursement are outlined in the Michigan Medicaid State Plan. Professional or institutional claims for physician-administered injectable drugs are also a covered benefit. Pharmacies and prescribing practitioners must ensure that claims are not duplicated. This policy applies to Fee-for-Service claims.

Pharmacy providers may not dispense a physician-administered injectable drug directly to the beneficiary. To ensure the content and integrity of the drug administered to the beneficiary, the drug must be delivered from the pharmacy directly to the physician for administration. The method of delivery of the injectable drug to the physician should be agreed upon by the pharmacy and physician. The refrigeration, stabilization, and other storage and handling requirements of the drug must be met during delivery and at all points of the transaction. The costs associated with the delivery of the injectable drug to the physician are not reimbursable by MDHHS.

The injectable drug must be administered to the beneficiary within 14 days of the arrival of the drug to the physician's office. For multi-dose vials, the first dose must be administered to the beneficiary within 14 days of the arrival of the drug to the physician's office. For the safety of beneficiaries and to minimize waste, procedures should be established to return unused medications to the pharmacy when appropriate. Restocking returned products should be compliant with Michigan Board of Pharmacy guidelines.

14.15.A. RESPIRATORY SYNCYTIAL VIRUS (RSV) INJECTABLES

Enrolled pharmacy providers may bill for covered RSV injectable drugs. (Refer to the Michigan Pharmaceutical Product List subsection for additional information.)

14.16 VACCINES

The cost of the vaccine and administration of all vaccines recommended by the Advisory Committee on Immunization Practices (ACIP), including seasonal influenza vaccines, administered by pharmacists are covered for adults aged 19 years and older for Fee-For-Service Medicaid, Healthy Michigan Plan, and MOMS program beneficiaries. Additionally, pharmacies approved to participate in the Vaccines for Children (VFC) program may administer ACIP recommended vaccines to Medicaid, Healthy Michigan Plan, and MOMS beneficiaries ages 3 through 18 years. The cost of the VFC vaccine is at no cost to participating pharmacies. VFC enrolled pharmacies can bill administration fees for VFC vaccines as a Medicaid Fee-For-Service pharmacy benefit, including for beneficiaries ages 3 through 18 years of age who are enrolled in a Medicaid Health Plan. (Refer to the Directory Appendix for information on the Vaccines For Children program.)

Pharmacies may submit a claim for COVID-19 and seasonal influenza vaccines and their administration for CSHCS beneficiaries. For beneficiaries 19 years and older who are enrolled in a Medicaid Health Plan, the pharmacy provider must confirm coverage of pharmacist-administered vaccines with the plan.

Pharmacists must be in compliance with State of Michigan rules and regulations and have received the appropriate training for vaccine administration in order to be eligible to administer vaccines. Standing

Medicaid Provider Manual

orders are required from a Michigan-licensed physician who is responsible for the clinical practice of the vaccine operations. This documentation must be readily available onsite in the event of an audit.

Pharmacists who administer vaccines must register with the Michigan Care Improvement Registry (MCIR). This database provides a complete record of immunizations for Michigan residents. Pharmacists must review the beneficiary's immunization history in MCIR prior to administering the vaccine. MCIR must be updated within 72 hours of administering the vaccine.

In order to receive reimbursement for vaccine administration, pharmacies must submit claims through the MDHHS Pharmacy Benefits Manager (PBM). (Refer to the Directory Appendix for contact information.)

The pharmacy must submit the National Drug Code (NDC) for the product administered and the appropriate values in the Drug Utilization Review (DUR)/Professional Pharmacy Services (PPS) segment and the Professional Service Code respectively. MDHHS allows pharmacies to bill the cost of the vaccine when not purchased through the VFC program. The pharmacy should submit the allowed administrative fee in the incentive fee submitted field.

Dispensing fees are not allowed for the administration of vaccines.

The pharmacy must develop an appropriate mechanism for purposes of properly documenting the identification of the administering pharmacist.

Either a pharmacy or physician can bill for the vaccine administration, but not both. Copayments for vaccine administration services do not apply.

SECTION 15 – NURSING FACILITY

Because of the uniqueness of pharmacy services provided in the nursing facility (NF) setting, separate billing policies were established. Other policies listed in this chapter also apply to NF beneficiaries.

15.1 BENEFIT PLANS

NF beneficiaries typically reside in a nursing home, hospital long term care (LTC) unit, or county-operated medical care facility (MCF). The Benefit Plan ID of NH will be indicated in the eligibility response for beneficiaries who reside in a nursing home.

15.2 DISPENSING FEE

A pharmacy may receive a maximum of 13 dispensing fees for the same drug entity per 365-day billing period.

15.3 COPAYMENT

Medicaid beneficiaries residing in NFs have no pharmacy copayment.

15.4 PHARMACY CONSULTANT SERVICES

Medication reviews and other pharmacy consultant services are the responsibility of the facility and are included in the facility's per diem rate. The pharmacy must make arrangements with the facility for reimbursement of such services.

15.5 PRODUCTS INCLUDED IN THE NURSING FACILITY PER DIEM RATE

MDHHS does not directly reimburse a pharmacy for items included in a facility's per diem rate. If provided, no additional or separate charges may be made to a beneficiary, a member of the beneficiary's family, or other beneficiary representative. If a pharmacy is requested to dispense any of the following, arrangements for payment must be between the pharmacy and the facility.

- Medical Supplies - Examples of medical supplies included in the facility's per diem rate are insulin syringes, reagent strips, aerochambers, spacers, peak flow meters, etc.
- Enteral Formulas – Enteral Formulas are included in the facility's per diem rate.
- OTC products not listed in the MPPL as in the NF's per diem rate may be paid directly to a pharmacy by MDHHS. Noncovered OTCs are included in the NF's per diem rate. Examples of OTCs in the per diem include, but are not limited to:

Analgesics	<ul style="list-style-type: none">▪ Acetaminophen▪ Aspirin▪ Buffered Aspirin▪ Enteric-coated aspirin▪ Ibuprofen
-------------------	---

Medicaid Provider Manual

Cough/Cold Preparations	<ul style="list-style-type: none">▪ Guaifenesin with and without Dextromethorphan▪ Pseudoephedrine/Chlorphen/Dextromethorphan▪ Pseudoephedrine/Chlorpheniramine▪ Pseudoephedrine HCl
Ointments	<ul style="list-style-type: none">▪ Vitamins A & D Ointment▪ White Petroleum▪ Zinc Oxide
Oral Antiseptics	<ul style="list-style-type: none">▪ Mouthwash
Topical Antiseptics	<ul style="list-style-type: none">▪ Chlorhexidine Gluconate Wash and Solution▪ Hydrogen Peroxide▪ Isopropyl Alcohol▪ Povidone-Iodine Solution/Wash
Vitamins/Minerals	<ul style="list-style-type: none">▪ Calcium Carbonate, Calcium Gluconate, Calcium Lactate▪ Daily Multiple Vitamin with and without Minerals▪ Oyster Shell Calcium with and without Vitamin D▪ Vitamin B1, Vitamin B6▪ All other OTC vitamins and minerals
Miscellaneous	<ul style="list-style-type: none">▪ Epsom Salts (external use)▪ Glycerin Suppositories▪ Milk of Magnesia▪ Mineral Oil or Emulsions of Mineral Oil▪ Povidone Douches▪ Sterile Lubricant▪ Vinegar Douches▪ Stool Softeners and stool softeners/laxative combinations

15.6 DRUG RETURNED FROM NURSING FACILITY

MDHHS does not reimburse for prescriptions that are not consumed by the beneficiary. The quantity of drug(s) consumed is determined by subtracting the quantity of drug(s) that is returned for the beneficiary from the quantity that was dispensed for the beneficiary. A pharmacy must credit MDHHS for those drugs that are not consumed, except for controlled, adulterated, compromised or unusable. The pharmacy must maintain documentation of the quantity dispensed and consumed by the beneficiary, showing a credit to MDHHS for drugs not consumed.

MDHHS does not allow restocking fees.

SECTION 16 – PUBLIC HEALTH SERVICE AND DISPROPORTIONATE SHARE HOSPITALS

With enactment of Section 602 of the Veterans Healthcare Act of 1992, Public Health Service (PHS) covered entities and selected disproportionate share hospitals (DSH) became eligible for contract drug prices from Labelers (340B Program). A list of participating entities is located on the Bureau of Primary Health Care - Health Resources and Services Administration (HRSA) website. (Refer to the Directory Appendix for website information.)

In addition to these product cost discounts, entities participating in this contract drug program are required by Federal policies to bill drugs covered in the PHS program using the actual acquisition cost for a drug plus a professional dispensing fee. Hospitals can bill up to normal and customary charges for 340B acquired physician-administered drugs or products when provided in the outpatient hospital setting. Actual acquisition cost is defined as the actual invoice cost for a drug product to the pharmacy or company, organization, corporation, or affiliate with which it is associated.

Actual acquisition cost must reflect trade and quantity discounts, rebates, free goods, and price concessions.

On a post-payment basis, MDHHS reviews billings from PHS participating entities to track compliance with this requirement.

Covered entities or their contracted pharmacies, or disproportionate share hospital participating entities that are enrolled as Medicaid pharmacy providers who bill 340B prices, must indicate on the claim that the drug was purchased through the 340B program so their claims can be excluded from the drug rebates. Professional/institutional claims for drugs purchased through the 340B program must be indicated on the claim using the modifier U6. Pharmacy claims for outpatient drugs purchased through the 340B program must be indicated on the claim using a Submission Clarification Code of 20.

SECTION 17 – DRUG REBATE PROGRAM

17.1 APPROVED LABELERS AND MPPL

MDHHS covers only those drugs produced by Labelers who have signed rebate agreements with the federal government. Products distributed by companies or a division within a company that did not enroll are not covered.

Approved Labelers are located on the CMS website and are identified by the specific five-digit labeler code (the first five digits of the NDC). (Refer to the Directory Appendix for CMS website information.)

17.2 NATIONAL DRUG CODE ACCURACY

MDHHS invoices pharmaceutical Labelers for rebates quarterly from the pharmacy paid claims history. Pharmacies must bill the actual NDC for a product dispensed. Pharmacies may be contacted periodically to verify product utilization and cost. Contact can include phone or written verification requests. Documentation requirements for verification can include, but are not limited to:

- Copies of the product invoice
- Copies of original prescriptions
- Compounding records

Medicaid Provider Manual

SECTION 18 – BENEFITS MONITORING PROGRAM

The purpose of the Benefits Monitoring Program (BMP) is to monitor and control inappropriate utilization of covered services, including prescribed drugs. (Refer to the Beneficiary Eligibility Chapter for additional information regarding the BMP.)

Medicaid Provider Manual

SECTION 19 – PHARMACY AUDIT AND DOCUMENTATION

19.1 DOCUMENTATION REQUIREMENTS

MDHHS monitors for compliance with Medicaid policy, the Administrative Rules of the Michigan Board of Pharmacy, the Public Health Code, and other applicable federal and state regulations.

The following information serves as a general guide for compliance monitoring during post-payment pharmacy reviews and audits. Additional information regarding audits can be found on the MDHHS post-payment auditor's website. (Refer to the Directory Appendix for website and contact information.) Non-compliance, especially continued non-compliance, may result in payment recovery, sanctions, or referral to the Michigan Attorney General's Office.

340B Drug Pricing Program	Billing ingredient costs may not be higher than actual acquisition costs for drugs procured under the 340B Drug Pricing Program. Pharmacy claims for outpatient drugs purchased through the 340B program must be indicated on the claim using a Submission Clarification Code of 20.
Automatic Refill Program Consent	Providers must maintain and have accessible the signature of the beneficiary's annual consent of enrollment into an automatic refill program for each prescription enrolled. Missing signatures indicate the beneficiary did not consent to have their prescription enrolled into an automatic refill program. Pharmacies are required to maintain this log for seven years.
Changing Claim Information	Providers may not falsely alter the NDC number, date of service, prescription number, days supply, or any other claim requirement that would allow payment.
Compounds	The compounding of prescription products to gain coverage of noncovered OTC, noncovered legend drugs, or other noncovered categories is prohibited (e.g., the use of injectable Sodium Bicarbonate to compound a Sodium Bicarbonate foot irrigation). Medicaid recovers inappropriate payments for billings found in violation of policy.
CSHCS Only	Pharmaceutical products must relate to the qualifying diagnosis. Payment is recouped for billings for products not related to the qualifying diagnosis.
Days Supply	Accurate days supply information is required. Altering days supply information for purposes of payment will be considered fraud and will be reported to the appropriate unit for investigation. Dosages outside the normal dosage range based on the days supply submitted may prompt a verification request of product usage on reported utilization.
Drug(s) Returned From Nursing Facility	MDHHS does not reimburse for prescriptions that are not consumed by the beneficiary. MDHHS does not allow restocking fees.
Hospice	Pharmacies must not bill MDHHS for prescription services related to the terminal illness except for selected HIV drugs. (Refer to the General Information Section of this chapter for additional information.)
Inaccurate Billing	All claim submission requirements outlined in the PBM Pharmacy Claims Processing Manual must be followed including, but not limited to, accurate Prescription Origin Code, NDC, and NDC unit of measure reporting. The Pharmacy Claims Processing Manual is available on the PBM website. (Refer to the Directory Appendix for website information.)

Medicaid Provider Manual

Medicare Part D	Pharmacies cannot bill Medicaid for drugs covered by Medicare Part D. The Medicaid Program does not coordinate benefits with Medicare Part D.
Other Insurance Payments	Pharmacies must bill other insurances before billing Medicaid. This also applies to Medicare Part B eligible beneficiaries. Failure to bill Medicaid the total due less the amount paid by another insurance or by Medicare Part B may be construed as fraud under the Medicaid False Claim Act.
Prescriber Information	Accurate prescriber information must be provided as required by MCL 400.111b(21). Submitting incorrect prescriber identification numbers can cause false ProDUR messages and claim denials. It could also cause a pharmacy to be targeted for post-payment audit. Pharmacies are audited for inappropriate identification of prescribers.
Prescription Documentation	<p>Original written prescriptions must be executed on tamper resistant prescription pads. If a prescription is created, signed, transmitted, and received electronically, all records related to that prescription must be readily accessible and maintained for seven years. Prescriber medical record documentation may be provided to validate prescriptions. Prescriber affidavits, attestations, and retroactively dated prescriptions will not be accepted for pharmacy documentation. Notation on a pharmacy's database is not considered a written form of the prescription. For originals and all refills, accurate prescription documentation must be readily accessible and maintained for seven years. All of the following information must be entered in the record for each prescription:</p> <ul style="list-style-type: none">▪ prescription number▪ full name and address of patient for whom the drug is prescribed▪ prescriber's printed name and address▪ prescriber's individual NPI▪ prescriber's DEA (for controlled substance only)▪ drug name and strength▪ quantity prescribed▪ directions for use▪ number of refills authorized
Prescriptions Filled But Not Picked Up	Retail prescriptions filled but not dispensed or picked up by the beneficiary or their representative. Restocking fees are not allowed. A record of the reversal log must be maintained for seven years for audit purposes.
Professional Dispensing Fees	Pharmacies may not bill in a pattern that would lead to more than 13 professional dispensing fees in a 365-day billing period for the same drug entity. Splitting prescriptions to increase the number of fees paid is considered fraud and will be reported to the appropriate unit for investigation.
Signature Requirement	Providers must maintain and have accessible the signature log indicating beneficiary's pick-up of prescription and acceptance or denial of beneficiary counseling. Missing signatures indicate the prescription was not picked-up or the beneficiary was not offered counseling as required. Pharmacies are required to maintain this log for seven years.
Usual & Customary (U&C) Charge	For specified products, the submitted charge is compared to the cash price to the general public.

19.2 INVOICE AND INVENTORY RECORDS

In addition to all other documentation required under state law, federal law, and MDHHS policy, pharmacy providers must maintain invoices, manufacturer and/or wholesaler sales records, distributor delivery records to the provider, inventory transfer records, provider payment records, and all other records necessary to support the size and quantity of the goods paid for by Medicaid during the audit/review period. Failure to do so will result in the recoupment of pharmacy funds related to unsupported Medicaid claims. In the event inventory for any such product cannot be substantiated through reliable documentation for the beginning of the audit/review period, MDHHS may assume that the beginning and ending inventory quantities are the same for that product. For the purposes of this policy, the "audit/review period" shall be a period defined by MDHHS.

19.3 MEDICATION THERAPY MANAGEMENT DOCUMENTATION REQUIREMENTS

Pharmacists must document each Medication Therapy Management (MTM) service provided. Documentation must include, but is not limited to, the following:

- Beneficiary information
 - Name
 - Address and telephone number
 - Medicaid identification number
 - Gender
 - Date of birth
- Beneficiary's consent for the MTM service, indicated by the beneficiary's signature and date
 - If the beneficiary is a child who is younger than the age of consent per state law, or has physical or cognitive impairments that preclude the beneficiary from managing their own medications, a caregiver (e.g., caretaker relative, legal guardian, power of attorney, licensed health professional) may provide written consent on the beneficiary's behalf.
- Pharmacist information
 - Name
 - Pharmacist National Provider Identifier (NPI)
 - Pharmacy Name and NPI
- Date of Service
- Place of Service
- Indication of how the beneficiary meets the criteria to receive an MTM service (e.g., meets the chronic condition requirement)
- Indication if this is an initial assessment or follow-up assessment
- Current medical conditions
- Allergies

Medicaid Provider Manual

- Primary physician and contact information

Other information may include the following (items are required if relevant):

- Date of documentation
- Location of beneficiary if service is provided through telemedicine
- Time spent with beneficiary
- Resolved medical conditions
- List of all prescription drugs, along with prescriber information and name of dispensing pharmacy
- List of nonprescription drugs with their indications
- List of drug doses, directions and intended use
- List of all relevant medical devices
- List of all dietary supplements and herbal products
- Alcohol and tobacco use history
- List of environmental factors that impact the beneficiary
- Assessment of drug problems identified, including but not limited to:
 - Determining that the medications are appropriately indicated
 - Determining if the beneficiary needs additional medications
 - Determining if the medications are the most effective products available for the conditions
 - Determining if the medications are dosed appropriately to meet goals of therapy
 - Identifying adverse effects caused by medications
 - Determining if the medications are dosed excessively and causing toxicities
 - Determining if the beneficiary is taking the medications appropriately to meet goals of therapy
 - Evaluating effectiveness and safety of current drug therapy
 - Written plan, including goals and actions needed to resolve issues of current drug therapy
 - Evaluation of success in meeting goals of medication treatment plan
 - Information, instructions and resources delivered to the beneficiary
 - Content of pharmacist's communications to beneficiary's other health care providers
- Description of what was discussed with the beneficiary during the assessment, and whether that information was communicated to the beneficiary's primary care providers

This documentation must be made available to MDHHS upon request. In addition, this documentation and any other relevant documentation may be collected by MDHHS or its designee on an annual basis for the purposes of program evaluation.

Medicaid Provider Manual

SECTION 20 – MEDICAL SUPPLIES

20.1 GENERAL INFORMATION

Covered medical supply items payable (minus a dispensing fee) to a pharmacy are listed in the MPPL. A prescription is required for medical supplies. Covered products include insulin syringes, alcohol swabs, etc.

MDHHS does not separately reimburse a pharmacy for medical supplies dispensed to beneficiaries in nursing facilities, hospital long term care units, or medical care facilities. These items are considered a part of the facility's per diem rate. If provided, no additional or separate charges may be made to a beneficiary, a member of the beneficiary's family, or other beneficiary representative. If a pharmacy is requested to dispense any of these items, arrangements for payment must be between the pharmacy and the facility.

Except for those items listed in the MPPL, medical supplies and equipment are covered only when billed by a Medical Supplier or Orthotist/Prosthetist. These items include equipment (e.g., canes), orthotics (e.g., arch supports), prosthetics, oxygen dispensers, wound care dressings (e.g., transparent film, hydrocolloid absorptive dressings, alginate and gel dressing), splints, ace bandages, TPN, enteral and oral nutritional supplements, etc.

When billing as a Medical Supplier or Orthotist/Prosthetist, refer to the Medical Supplier and the Billing & Reimbursement for Professionals Chapters of this manual for additional information.

To enroll as a Medical Supplier, providers must complete an on-line application through the CHAMPS Provider Enrollment subsystem. (Refer to the Provider Enrollment Section of the General Information for Providers Chapter for additional enrollment information, and the Directory Appendix for contact information.)

20.2 SUPPLIES FOR ADMINISTRATION OF PART D DRUGS

MDHHS will reimburse (minus a dispensing fee) a pharmacy for medical supplies and/or equipment (e.g., IV poles, tubing) associated with the administration of Medicare Part D drug(s) to the dual eligibles (except those residing in a nursing facility) for home infusion therapy.

SECTION 21 - MEDICATION THERAPY MANAGEMENT

21.1 OVERVIEW OF MEDICATION THERAPY MANAGEMENT (MTM)

Medication Therapy Management (MTM) services are face-to-face consultations provided by pharmacists to optimize drug therapy and improve therapeutic outcomes for beneficiaries. Beneficiaries may elect MTM as an optional service provided by participating pharmacists. (Refer to the Eligible Providers subsection for information on enrolling as an MTM provider.) These services are paid through the Fee-for-Service program for beneficiaries enrolled either in FFS or in a Medicaid Health Plan. There is no cost-sharing responsibility to the beneficiary for the MTM service.

The requirements outlined in the Counseling Requirements section may not be billed as an MTM service.

21.2 COVERED SERVICES

MTM services include the following:

- Obtaining necessary assessments of the beneficiary's health status
- Formulating a medication treatment plan
- Monitoring and evaluating the beneficiary's response to therapy, including safety and effectiveness
- Performing a comprehensive medication review to identify, resolve, and prevent medication-related problems, including adverse drug events
- Documenting the care delivered and communicating essential information to the beneficiary's other primary care providers
- Referring the beneficiary to their primary care provider or specialist, if necessary
- Providing verbal education and training designed to enhance the beneficiary's understanding and appropriate use of medications
- Providing information, support services, and resources designed to enhance adherence with the beneficiary's therapeutic regimens
- Providing an updated personal medication record and medication action plan for the beneficiary
- Coordinating and integrating MTM services within the broader health care management services being provided to the beneficiary

Any recommended changes to the beneficiary's drug therapy must be approved by the original prescriber(s) of the affected drugs.

Refer to the Medication Therapy Management Documentation Requirements subsection for requirements on documenting MTM services.

21.3 NON-COVERED SERVICES

The following are not eligible to be covered as MTM services:

- Services provided by telephone, email or US Postal Service mail

Medicaid Provider Manual

- Services provided in skilled nursing facilities
- Services provided to more than one beneficiary at a time (i.e., group services)
- Services provided in an inpatient, institutional, or incarceration setting

21.4 ELIGIBLE RECIPIENTS

Beneficiaries are eligible for MTM services if they are not eligible for Medicare Part D and are taking a medication to treat or prevent one or more chronic conditions as identified in the List of Chronic Conditions for MTM Eligibility. (Refer to the Directory Appendix for website information.)

MTM services must be provided in person with the beneficiary whenever possible. If the beneficiary is a child who is younger than the age of consent per state law, or has physical or cognitive impairments that preclude the beneficiary from managing their own medications, MTM services may be provided face-to-face to a caregiver (e.g., caretaker relative, legal guardian, power of attorney, licensed health professional) on the beneficiary's behalf.

21.5 ELIGIBLE PROVIDERS

To provide MTM services, a pharmacist must be licensed and have successfully completed either the American Pharmacists Association's "Delivering Medication Therapy Management Services" certificate training program or other MTM program(s) approved by the Accreditation Council of Pharmacy Education.

Pharmacists who meet these requirements must enroll in the Community Health Automated Medicaid Processing System (CHAMPS) with an Individual (Type 1) National Provider Identifier (NPI) Number as a Rendering/Servicing-Only provider. Under this type of enrollment, pharmacists are required to affiliate themselves with the billing NPI of a pharmacy, Federally Qualified Health Center (FQHC), Tribal Health Center (THC), or Rural Health Clinic (RHC). The pharmacist must enroll as a Non-Physician, with a Pharmacist specialty and the subspecialty of Medication Therapy Management. Individual pharmacists are not eligible for direct Medicaid reimbursement; payment for MTM services will be issued to the affiliated pharmacy, FQHC, THC and/or RHC NPI. Refer to the Provider Enrollment section of the General Information for Providers chapter for more information on this process.

These services may not be delegated by pharmacists to pharmacy technicians or other healthcare professionals.

21.6 LOCATION REQUIREMENTS

MTM services may be provided in the following settings:

- Ambulatory care outpatient setting
- Clinic
- Pharmacy
- Beneficiary's home if the beneficiary does not reside in a non-covered services setting

These services must be provided in person in a private or semiprivate patient care area that is separate from the commercial business that also occurs in the setting, or in home settings.

21.7 TELEMEDICINE FOR MTM SERVICES

In the event that the beneficiary is unable to physically access an in-person care setting, an eligible pharmacist may provide MTM services via telemedicine. Telemedicine is the use of telecommunications and information technologies for the exchange of encrypted patient data for the provision of services. Telemedicine must be obtained through real-time interactions between the beneficiary's physical location (originating site) and the pharmacist provider's physical location (distant site). MTM telemedicine audio/visual services are provided to beneficiaries through hardware or internet connection. It is the expectation that providers and facilitators involved in telemedicine are trained in the use of equipment and software prior to servicing beneficiaries. The arrangements for telemedicine will be made by the pharmacist. The administration of telemedicine services is subject to the same provision of services that are provided to a beneficiary in person. Providers must ensure the privacy of the beneficiary and secure any information shared via telemedicine. Refer to the Telemedicine chapter for additional information regarding telemedicine service provision.

Refer to the Billing Instructions subsection (of this section) for instructions on indicating the MTM service was provided through telemedicine.

21.8 BILLING INSTRUCTIONS

21.8.A PROFESSIONAL CLAIMS

Pharmacy-based MTM claims must be submitted on the professional claim format (HIPAA 837P). The Billing Provider reported on the claim must be the Pharmacy's (Type 2) NPI and be actively enrolled in CHAMPS to be paid. The Rendering Provider reported on the claim must be the Pharmacist's (Type 1) NPI and be actively enrolled in CHAMPS.

For services provided through telemedicine, each procedure code must include the modifier 95. Providers can submit HIPAA 837P electronic claims to CHAMPS through a billing agent, through a batch upload process, or through Direct Data Entry (DDE). Providers can also view claims online and complete claim replacements or voids within CHAMPS.

21.8.B. INSTITUTIONAL CLAIMS

The Billing Provider NPI reported on the claim must be the FQHC, RHC, or THC and be actively enrolled in CHAMPS. The Pharmacist (Type 1) NPI must be reported on the Institutional MTM claim as the Rendering Provider and must be actively enrolled in CHAMPS and associated to the Billing FQHC, RHC, or THC for the date of service. The NPI (Type 1 – Individual) number of the physician (MD or DO) overseeing the patient's care must be entered as the attending provider. The attending provider field is mandatory to complete.

Medicaid Provider Manual

SECTION 22 – OUTCOMES BASED CONTRACT ARRANGEMENTS

MDHHS utilizes outcomes-based contract arrangements with drug manufacturers for certain high-cost drug products. Under these arrangements, supplemental rebates paid by participating drug manufacturers help offset some of the costs to MDHHS. Drug products for which MDHHS has an outcomes-based contract arrangement are posted on the PBM's website. Reimbursement for these products will be in accordance with established policies and dependent on whether the coverage is billed as a medical or pharmacy benefit. Providers must refer to this list for additions and deletions of drug products. Specific notification of changes will not be issued. Drug manufacturers that are interested in an outcomes-based contract with MDHHS may refer to the PBM's website for MDHHS' CMS-approved Contract Template. (Refer to the Directory Appendix for website information.)

Section 2 - Eligibility	2
Section 3 - Services.....	3
3.1 Covered Services.....	3
3.2 Non-covered Services	4
Section 4 – Additional Information.....	5

Medicaid Provider Manual

SECTION 1 - GENERAL INFORMATION

The Plan First program benefit is limited to family planning services only. The Plan First Family Planning program covers a broad range of family planning services which includes U.S. Food and Drug Administration (FDA)-approved contraceptive products and natural family planning methods for individuals who want to prevent pregnancy and to space births. It also includes pregnancy testing and counseling, sexually transmitted infection (STI) services, and other preconception health services. Decisions about family planning methods, including sterilization procedures, are to be made only with the full and informed consent of the individual, either alone or with support, and free from coercion.

All Plan First enrollees have free choice of family planning providers and may obtain covered family planning services from any qualified Medicaid-enrolled providers. Qualified family planning providers working within their state licensure and scope of practice include, but are not limited to, Title X family planning clinics, Local Health Departments, Federally Qualified Health Centers, Tribal Health Centers, and primary care or obstetrical providers such as physicians, physician assistants, Certified Nurse-Midwives, Nurse Practitioners, and Clinical Nurse Specialists.

Medicaid Provider Manual

SECTION 2 - ELIGIBILITY

To be eligible for this group, an individual must:

- Have income at or below 195% of the Federal Poverty Level (FPL) under the Modified Adjusted Gross Income (MAGI) methodology;
- Not be pregnant at the time of application;
- Be a resident of the state of Michigan; and
- Meet Medicaid citizenship and immigration requirements.

There are no gender or age requirements to be eligible for Plan First.

Medicaid Provider Manual

SECTION 3 - SERVICES

3.1 COVERED SERVICES

The Plan First program includes the following covered services:

- Office Visits:
 - Family planning services, including preconception counseling, contraceptive counseling, and physical exams.
 - Preventive services, including annual wellness exams, preventive screening, counseling, and vaccines, including Human Papilloma Virus (HPV) and Hepatitis B.
 - Diagnostic procedures, counseling, and follow-up visits to diagnose and/or treat an STI or STI-related condition identified or diagnosed at a family planning visit.
 - Counseling for the prevention, screening, and diagnosis of human immunodeficiency virus (HIV)/acquired immunodeficiency syndrome (AIDS) and hepatitis.
 - Treatment of pre-cancerous conditions which commonly originate from an STI.
 - Basic diagnostic infertility services, including infertility counseling.
 - Treatment of major complications related to family planning services and family planning-related procedures.

(Refer to the Practitioner Chapter for additional coverage information.)

- Laboratory Services:
 - Pregnancy testing.
 - Screening for cervical cancer.
 - Screening and counseling for STIs, HIV/AIDS, and hepatitis.

(Refer to the Laboratory Chapter for additional coverage information.)

- Pharmaceutical Services:
 - All FDA-approved methods of contraception supplies and devices to prevent or delay pregnancy.
 - Over-the-counter contraceptives and supplies, such as condoms, spermicides, and sponges.
 - Pharmaceuticals to treat an STI or STI-related condition routinely identified or diagnosed at a family planning visit (other than HIV/AIDS or hepatitis).
 - HIV post-exposure prophylaxis (PEP) and pre-exposure prophylaxis (PrEP)

(Refer to the Pharmacy Chapter for additional coverage information.)

- Sterilization Procedure Services:
 - Voluntary sterilization surgical procedures and follow-up care provided in accordance with Medicaid program coverage.

Medicaid Provider Manual

Refer to the Sterilization subsections of the Practitioner and Hospital Chapters of this Manual for other coverage requirements related to sterilizations.

3.2 NON-COVERED SERVICES

The Plan First program does not cover the following:

- Abortions
- Treatment of infertility, such as drugs or artificial insemination
- Reversal of voluntary sterilization
- Hysterectomies for sterilization
- Treatment, including pharmaceuticals, for conditions not related to family planning, such as cancer, HIV/AIDS, or hepatitis
- Inpatient hospital services

Medicaid Provider Manual

SECTION 4 – ADDITIONAL INFORMATION

Family planning services are not subject to beneficiary cost-sharing, including co-pays.

Providers must report an appropriate family planning-related diagnosis code on the associated claim line for family planning services.

Family planning services covered under the Plan First program are limited to those drug classes and Current Procedural Terminology/Healthcare Common Procedure Coding System (CPT/HCPCS) and ICD-10-CM codes located on the MDHHS website. (Refer to the Directory Appendix for website information.)

SECTION 1 – GENERAL INFORMATION

This chapter applies to physicians (MD, DO), Oral-Maxillofacial Surgeons (MD, DO), Doctors of Podiatric Medicine (DPM), Physician Assistants (PAs), Medical Clinics, Advanced Practice Registered Nurses (APRNs) [including Certified Nurse Practitioners (NPs), Certified Clinical Nurse Specialists (CNSs), and Certified Nurse-Midwives (CNMs)], Certified Registered Nurse Anesthetists (CRNAs), Anesthesiologist Assistants (AAs), and Genetic Counselors.

Generally, medically necessary services provided to a Medicaid beneficiary by an enrolled practitioner are covered. This includes, but is not limited to, medically necessary health care services that are evidence-based and provided within generally accepted standards of medical practice to prevent, diagnose or treat an illness, injury, condition, disease or its symptoms. The services addressed in this chapter include services that require explanation or clarification, have special coverage requirements, require prior authorization (PA), or must be ordered by a physician (MD or DO).

Information is included to assist the practitioner in determining how the Michigan Department of Health and Human Services (MDHHS) covers specific services. This information should be used in conjunction with the Billing & Reimbursement for Professionals Chapter of this manual, as well as the Medicaid Code and Rate Reference tool, MDHHS Practitioner and Medical Clinic Fee Schedule and other related procedure databases/fee schedules located on the MDHHS website. (Refer to the Directory Appendix for website information.)

1.1 ADMINISTRATIVE SERVICES

Services of physicians, medical staff or other licensed or certified health professionals functioning in an administrative or teaching capacity for a hospital or nursing facility (including physician-owners or other staff paid by the physician) are not covered separately as physician services.

Pathology services or interpretive studies done for hospital or nursing facility quality improvement purposes or other reasons which do not directly assist with the specific care of a specific beneficiary are considered to be administrative services and are not separately covered as physician services. These services are included in the facility's allowable costs and are paid to the facility.

1.2 COMPONENT SERVICES

Many physician services are covered as global services. A global service includes all resources necessary to perform the procedure (e.g., office overhead, equipment, supplies, and staff) and the services provided by the physician (e.g., interpretation of results and preparation of a report of findings).

Some services are divided into a professional component and a technical component for coverage purposes. The professional component includes the services provided by the physician while the technical component includes equipment, supplies, and technical staff.

Coverage for the professional component or the technical component generally depends on where the service is provided and who provides that portion of the service. Services for which the components are covered for the physician are identified in the Medicaid Code and Rate Reference tool or on the MDHHS Practitioner and Medical Clinic Fee Schedule. (Refer to the Directory Appendix for website information.)

Medicaid Provider Manual

Global services are covered for the physician in non-facility settings or the professional component is covered for the physician in any setting. The technical component is only covered when the service is provided in an appropriate non-facility setting. The global service and its professional component service cannot both be covered for the same service since the professional component is included in the global service.

1.3 COPAYMENTS

A copayment may be required for physician office (evaluation and management) visits for beneficiaries age 21 years and older.

The office visit copayment applies to services provided in the physician's office, urgent care center, or other appropriate setting. It does not apply to professional services provided in the outpatient hospital or inpatient hospital settings. Refer to the General Information for Providers Chapter for information about copayments. Current copayment amounts are listed on the MDHHS website. (Refer to the Directory Appendix for website information.)

Podiatrists should refer to the Podiatrist Section of this chapter for information regarding beneficiary copayments for podiatry services.

Ophthalmologists providing routine vision services should also refer to the Vision Chapter for information regarding beneficiary copayments for vision services.

Refer to the Billing Beneficiaries Section of the General Information for Providers Chapter of this manual for additional information regarding copayment requirements. Beneficiaries may not be denied care or services based on inability to pay a copayment, except as outlined in that section.

1.4 FACILITY AND NONFACILITY REIMBURSEMENT

Medicaid reduces payment for specified procedures provided in a facility setting. This policy is consistent with the Centers for Medicare & Medicaid Services (CMS) facility and nonfacility reimbursement determination. When a provider performs services in a facility setting, costs for certain procedures are reduced because the practitioner does not incur certain overhead expenses (such as clinical staff, supplies, equipment) necessary to provide the service. When a service is performed in a nonfacility setting, the payment rate is based on the nonfacility relative value units (RVUs). When the service is provided in a facility setting, the payment rate is based on the facility RVUs. The payment difference takes into account the higher expenses for the provider in the nonfacility setting. For the purpose of this payment policy, a facility includes the following:

- Hospital inpatient and outpatient facilities
- Psychiatric facilities
- Skilled nursing facilities
- Ambulatory surgery centers
- Rehabilitation facilities

Medicaid Provider Manual

1.5 HOSPITAL-BASED PROVIDER

Medicaid covers services by hospital-based providers (HBPs). A hospital-based provider is employed by the hospital. Each HBP is assigned their own NPI number.

For purposes of Medicaid, a HBP includes physicians (MD, DO, DPM). Some nonphysician practitioners, such as physician assistants (PAs), certified registered nurse anesthetists (CRNAs), and advanced practice registered nurses (APRNs), can also be considered HBPs under certain circumstances.

Medicaid follows Medicare guidelines for the coverage of HBP services provided by physicians. Generally, professional services provided by nonphysician providers that are employed by a hospital are included in the hospital cost report and are reimbursed to the hospital.

(The HBP should refer to their provider-specific section of this chapter for policies, procedures, and coverage information.)

1.6 MEDICARE RELATED SERVICES

MDHHS reimburses practitioners for the coinsurance and deductible amounts subject to Medicaid reimbursement limitations on all Medicare approved claims even if Medicaid does not normally cover the service. (Refer to the Billing & Reimbursement for Professionals and the Coordination of Benefits Chapters of this manual for additional information.)

1.7 PHYSICIAN DELEGATION AND SUPERVISION

Physician services covered by Medicaid must be performed by the physician personally, the physician's employee, or an employee of the same legal entity that employs the physician, under the physician's delegation and supervision in accordance with State law, professional scope of practice, and program and organizational policy. Only persons currently licensed/certified in an appropriate health occupation/profession (e.g., advanced practice registered nurse or physician assistant) as authorized by Public Act 368 of 1978, as amended, may provide direct patient care under the delegation and supervision of a physician when the physician is not physically present on the premises. The delegating/supervising physician must be continuously available through direct communication such as telephone, radio, or telecommunication when not on the premises. Delegated and supervised services rendered by non-physician practitioners (e.g., advanced practice registered nurses, physician assistants) must be billed under the non-physician practitioner's NPI and include the NPI of the supervising physician as applicable.

In the physician's absence, licensed persons who are under the physician's delegation and supervision at the medical care site where the physician regularly sees beneficiaries may provide medical services. Records must demonstrate that the licensed physician is regularly available and provides medical care to beneficiaries at the site on a routine basis. This does not preclude licensed persons under the physician's delegation and supervision from making calls or going on rounds to private homes, public institutions, hospitals, or other health care facilities, as long as the care is a supplement to and does not replace the physician's personal services.

Medicaid covers services delegated to unlicensed/certified persons only when the delegating physician or licensed non-physician practitioner is physically present and providing direct supervision. For information related to services provided by an advanced practice registered nurse or physician assistant under the

Medicaid Provider Manual

terms of a valid collaborative, practice or alliance agreement, refer to the provider-specific section of this chapter.

1.8 PHYSICIAN RESPONSIBILITY

Determination of medical necessity and appropriateness of services is the responsibility of the physician within the scope of currently accepted medical practice and Medicaid limitations. The physician is held responsible if they order excessive or unnecessary services (e.g., diagnostic tests, prescriptions) regardless of who actually renders or who receives payment for the service. The physician may also be subject to any corrective action related to these services, including recovery of funds.

Services generally must be ordered by a physician to be covered by Medicaid. Some services provided by other providers, such as medical supplies, lab services, and prescriptions, may require the physician to provide written documentation to support the need for the service. For specifics regarding whether a service is a covered benefit, refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter or the Medicaid Code and Rate Reference tool for more information. (Refer to the Directory Appendix for website information.)

1.9 PRIOR AUTHORIZATION [CHANGE MADE 7/1/2025]

Medicaid requires prior authorization (PA) to cover certain services before those services are rendered to the beneficiary. The purpose of PA is to review the medical need for certain services. It does not serve as an authorization of fees or beneficiary eligibility. Different types of services requiring PA include:

- Procedures identified as requiring PA in the Medicaid Code and Rate Reference tool. (Refer to the Directory Appendix for website information.)
- Procedures/items that are normally noncovered but may be medically necessary for select beneficiaries (e.g., surgery normally cosmetic in nature, obesity surgery, off-label use of non-protected drug classes, etc.). (revised per bulletin MMP 25-12)
- Referrals for elective services by out-of-state nonenrolled providers.

1.9.A. TO OBTAIN PRIOR AUTHORIZATION

Requests for PA for practitioner services such as surgeries, procedures, office-administered pharmaceuticals, biologicals, and out-of-state-care must be submitted utilizing the Practitioner Special Services Prior Approval – Request/Authorization form (MSA-6544-B). (Refer to the Forms Appendix for a copy of the form or download the form from the MDHHS website.) The form must be completed in its entirety. Supportive medical documentation must accompany the form.

Providers receive a written response from MDHHS. If the authorization is granted, the provider receives a PA number to report on the claim. The physician obtaining PA must make the PA number available to other providers, such as other practitioners or the hospital, for billing purposes.

If the beneficiary has Medicare and Medicare covers the service, the provider does not have to obtain PA from Medicaid. If Medicare denies a service as not medically necessary, Medicaid does not cover the service even if a PA has been obtained. If

Medicaid Provider Manual

Medicare identifies a service as an excluded benefit under Medicare and Medicaid requires PA, the provider must pursue PA from Medicaid and a coverage determination is made. If the beneficiary has commercial insurance that covers the service and the provider reports the coverage correctly on the claim, the provider does not have to obtain PA from Medicaid. If a primary insurer covers a service but requires PA and the provider does not follow the primary insurance PA process, Medicaid does not make payment for the service either.

1.9.B. SPECIAL AUTHORIZATIONS

Special authorization requirements must be met for selected surgeries performed in the inpatient setting, all elective inpatient admissions, all readmissions within 15 days, and all transfers to an inpatient hospital/unit. Physicians should refer to the Hospital Inpatient Physician Services and the Surgery Sections of this chapter for specific information.

Some beneficiaries may need authorization of services because they are enrolled in special programs, such as the Benefits Monitoring Program. (Refer to the Beneficiary Eligibility Chapter of this manual for additional information.)

1.10 SERVICES IN A TEACHING SETTING

Administrative costs associated with teaching physician services, as well as payment for direct patient care services provided by a resident (including interns or fellows) in a teaching setting and supervised by a teaching physician, are subject to guidelines and conditions developed and published by CMS for Medicare. Services covered by Medicaid under these guidelines must be identified with the appropriate modifier.

Teaching institutions and teaching physicians within those institutions must abide by the CMS teaching physician guidelines which explain when services provided in teaching settings can be covered by Medicaid or must be included as allowable medical education costs in the hospital's cost report.

Guidelines require the presence of the teaching physician during the key portion of the performance of the service in which a resident is involved and the teaching physician seeks payment (or the hospital on the behalf of the physician). The medical record must fully support the physician's presence and participation in the service provided. There are exceptions and other considerations that may apply; therefore, the full text of the guidelines must be consulted to ensure compliance.

CMS provides an exception to the physician presence requirement for some low- and mid-level Evaluation and Management (E/M) services furnished within a teaching setting when specified conditions are met. For Medicaid, the preventive medicine E/M visits are also included under the primary care exception for primary care services provided by residents. Under the CMS primary care exception, time cannot be used to select a visit level, only medical decision making (MDM). The appropriate modifier must be reported using the primary care exception when residents provide E/M services. The E/M services that can be reported with this modifier include office or other outpatient visits requiring straightforward or low complexity medical decision making and comprehensive preventive medicine visits. For higher-level services and all invasive procedures, the teaching physician must be present.

Services of residents or physicians/medical staff functioning in an administrative, teaching or learning capacity in the hospital or long term care facility that are covered as individual physician services are

Medicaid Provider Manual

subject to post payment review and recovery of funds unless the provider can present proof that the services were not included in the allowable facility costs.

1.11 SERVICES TO NEWBORNS

Physician services provided to newborns are covered under the newborn's Medicaid ID number. The mother's Medicaid ID number cannot be used.

If the delivering physician performs the newborn's care and circumcision during the mother's inpatient stay, these services can be covered under the mother's Medicaid ID number if they are billed on the same claim as the services to the mother.

1.12 UNIFORM REPORTING OF SERVICES

MDHHS follows the American Medical Association's manual and guidelines for Current Procedural Terminology (CPT) numeric codes, and the Healthcare Common Procedure Coding System (HCPCS). In conjunction with the CPT/HCPCS coding systems to describe services rendered, MDHHS utilizes the Medicaid National Correct Coding Initiative (NCCI) coding policies and edits as developed by the Centers for Medicare & Medicaid Services (CMS) to promote national correct coding methodologies.

SECTION 2 – ANESTHESIA SERVICES

Medicaid covers anesthesia and analgesia services when provided by qualified health care professional acting within their professional scope of practice and within the requirements of State law and facility policy.

2.1 ANESTHESIA PROVIDERS

Practitioners qualified to administer anesthesia may include the following:

- Physician;
- Dentist;
- Podiatrist;
- Certified registered nurse anesthetist (CRNA); or
- Certified anesthesiology assistant (AA) providing anesthesia services under the supervision of an anesthesiologist.

The anesthesia provider is responsible for the anesthesia care package, which consists of pre-operative evaluation, standard preparation and monitoring services, administration of anesthesia, blood products and fluids, post-anesthesia recovery care, and supportive services. There is no separate coverage for anesthesia services performed by physicians who are also performing the medical or surgical service requiring the anesthesia. Any anesthesia service provided personally by the surgeon is included in the reimbursement for the surgical procedure itself.

2.2 LEVELS OF SEDATION/ANALGESIA

The continuum of anesthesia services, from least intense to most intense in complexity, is as follows: local or topical anesthesia, moderate (conscious) sedation, regional anesthesia, and general anesthesia. MDHHS recognizes the following definition of general anesthesia and levels of sedation/analgesia:

Minimal Sedation (Anxiolysis)	Drug-induced state during which individuals respond normally to verbal commands. Although cognitive function and physical coordination may be impaired, airway reflexes and ventilatory and cardiovascular functions are unaffected.
Moderate Sedation/Analgesia (Conscious Sedation)	Drug-induced depression of consciousness during which individuals respond purposefully to verbal commands, either alone or accompanied by light tactile stimulation. No interventions are required to maintain a patent airway, and spontaneous ventilation is adequate. Cardiovascular function is usually maintained. During moderate sedation, the responsible physician typically assumes the dual role of performing the procedure and supervising the sedation.
Deep Sedation/Analgesia	Drug-induced depression of consciousness during which individuals cannot be easily aroused but respond purposefully following repeated or painful stimulation. The ability to independently maintain ventilatory function may be impaired. Individuals may require assistance in maintaining a patent airway, and spontaneous ventilation may be inadequate. Cardiovascular function is usually maintained.

Medicaid Provider Manual

General Anesthesia	Drug-induced loss of consciousness during which individuals are not arousable, even by painful stimulation. The ability to independently maintain ventilatory function is often impaired. Individuals often require assistance in maintaining a patent airway, and positive pressure ventilation may be required because of depressed spontaneous ventilation or drug-induced depression of neuromuscular function. Cardiovascular function may be impaired.
---------------------------	--

2.3 COVERAGE OF ANESTHESIA SERVICES

Medicaid covers anesthesia services associated with Medicaid covered surgeries and other procedures. Covered anesthesia services include medically directed, non-medically directed, and monitored anesthesia care. Moderate sedation is also a covered service. Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers chapter or the Medicaid Code and Rate Reference tool for more information regarding coverage parameters. (Refer to the Directory Appendix for website information.)

2.3.A. MEDICALLY DIRECTED ANESTHESIA

Medicaid covers anesthesia services provided by physicians (anesthesiologists), CRNAs, and AAs for medically directed anesthesia services consistent with anesthesia team practice. (Refer to the Certified Registered Nurse Anesthetist section and/or the Anesthesiologist Assistant section of this policy for additional information). Medicaid recognizes medical direction of general anesthesia, regional anesthesia, and reasonable and medically necessary MAC.

Payment will be made at the medically directed rate if the physician medically directs qualified individuals (all of whom could be CRNAs, anesthesiologist assistants*, interns, residents, or combinations of these individuals) in two, three, or four concurrent cases, and the physician performs the following activities:

- Performs the pre-anesthetic examination and evaluation;
- Prescribes the anesthesia plan;
- Personally participates in the most demanding services in the anesthesia plan including, if applicable, induction and emergence;
- Ensures that a qualified individual performs any services in the anesthesia plan that the physician does not personally perform;
- Monitors the course of anesthesia administration at frequent intervals;
- Remains physically present and available for immediate diagnosis and treatment of emergencies; and
- Provides indicated post-anesthesia care.

Physicians must document in the beneficiary's medical record that they performed the pre-anesthetic exam and evaluation, provided indicated post-anesthesia care, were present during some portion of the anesthesia monitoring, and present during the most demanding services, including induction and emergence, where indicated. Total anesthesia time must be documented in the medical record. The pre-anesthetic exam

Medicaid Provider Manual

and post-anesthesia evaluation is included in payment for the medically directed services and generally not separately reimbursed.

*Anesthesiologist assistants must be medically directed by a Medicaid-enrolled anesthesiologist and must comply with the requirements for the delegation and supervision of services in the Michigan Public Health Code.

Physicians cannot medically direct more than four concurrent anesthesia cases at one time. Concurrency refers to the maximum number of procedures that the physician is medically directing within the context of a single procedure and whether these other procedures overlap each other. Concurrency is not dependent on only the cases involving a Medicaid beneficiary but the entirety of the number of medically directed cases.

A physician who is providing medical direction of anesthesia care generally cannot provide additional services to other patients. Addressing an emergency of short duration in the immediate area, administering an epidural or caudal anesthetic to ease labor pain, periodic (rather than continuous) monitoring of an obstetrical patient, receiving patients entering the operating suite for the next surgery, checking or discharging patients in the recovery room, or handling scheduling matters do not substantially diminish the scope of control exercised by the physician and do not constitute a separate service for the purpose of determining whether the requirements for payment at the medically directed rate are met. However, if the physician leaves the immediate area of the operating suite for other than short durations or devotes extensive time to an emergency case or is otherwise not available to respond to the immediate needs of the surgical patients, the physician's services to the surgical patients are supervisory in nature and, therefore, are not paid under the fee schedule.

In select instances, medically directed anesthesia services are covered when provided by a physician who is monitoring more than four concurrent anesthesia services, or who is performing other services while directing the concurrent services, as medically supervised services. The physician must personally provide the pre-anesthesia exam and evaluation, prescribe the anesthesia plan, and be in the operating suite during the entire procedure. A flat rate payment may be made to cover the physician's involvement in the pre-surgical anesthesia services.

If physicians are in a group practice, one physician member may provide the pre-anesthesia examination and evaluation while another fulfills the other criteria. Similarly, one physician member of the group may provide post-anesthesia care while another member of the group furnishes the other component parts of the anesthesia service. However, the medical record must indicate that the services were furnished by physicians and identify the physicians who furnished them.

2.3.B. NON-MEDICALLY DIRECTED ANESTHESIA SERVICES BY THE CRNA

Anesthesia services provided by the independent CRNA or CRNA under the supervision of the surgeon, or other physician who is immediately available, are covered as non-medically directed anesthesia services. MDHHS reimburses CRNAs for these services if all the following conditions are met:

Medicaid Provider Manual

- CRNA services are provided in accordance with supervision requirements established by state law.
- The facility in which the services are rendered ensures that the anesthesia services are provided in a well-organized manner.
- The facility is responsible for all anesthesia administered in the facility.
- The CRNA provided a pre-anesthetic exam and evaluation within 48 hours prior to the surgery.
- An intra-operative anesthesia record identifies the CRNA providing the anesthesia service and the supervising physician, where applicable.
- The CRNA completes a post-anesthesia follow-up report within 48 hours after surgery for inpatients.
- For outpatients, a post-anesthesia evaluation for proper anesthesia recovery is performed in accordance with the policies and procedures approved by the medical staff.

There is no separate coverage for physicians for any portion of non-medically directed anesthesia services. The physician's supervisory service is included in the facility charge. The pre-anesthetic exam and post-anesthesia evaluation are included in payment for the non-medically directed CRNA care and are generally not separately reimbursed. Reimbursement for the non-medically directed anesthesia service provided by the CRNA is made to the CRNA or the legal entity employing the CRNA.

2.3.C. MONITORED ANESTHESIA CARE (MAC)

MAC is a specific anesthesia service performed by a physician, non-medically directed CRNA, or other qualified anesthesia practitioner under the medical direction of a physician for a diagnostic or therapeutic procedure or in anticipation of the need for administration of general anesthesia. Services may include varying levels of sedation, awareness, analgesia and anxiolysis as necessary. MAC does not describe the continuum of depth of sedation.

MAC is covered on the same basis as other anesthesia services if it is reasonable and medically necessary. MAC includes all aspects of anesthesia care, including a pre-procedure assessment and optimization, intra-procedural care including the administration of sedatives, analgesics, hypnotics, anesthetic agents, or other medications as necessary, and post-procedural management. Indications for MAC include, but are not limited to, the nature of the procedure, the beneficiary's clinical condition and/or the need for deeper levels of analgesia/sedation than can be provided by moderate sedation (including potential conversion to a general or regional anesthetic).

2.3.D. MODERATE SEDATION SERVICES

Moderate sedation services (e.g., CPTs 99151-99157) are reimbursed utilizing the annual Resource Based Relative Value Scale (RBRVS) multiplied by the State conversion factor. Rates are published on the Physician/Practitioner/Medical Clinics fee schedules. Codes representing moderate sedation are not to be reported for the administration of minimal

sedation, deep sedation, general anesthesia or monitored anesthesia care (CPT codes 00100-01999).

2.4 COVERAGE OF ANESTHESIA SERVICES FOR SPECIFIC PROCEDURES

2.4.A. MEDICAL SERVICES

Separate coverage is available for certain medical or surgical services furnished by a provider while furnishing anesthesia services to the beneficiary. The services may be furnished in conjunction with the anesthesia procedure to the beneficiary or as single services (e.g., the day of or the day before the anesthesia service). These services include insertion of a Swan Ganz catheter, insertion of central venous pressure lines, emergency intubation, and critical care. Separate coverage is not available for medical or surgical services such as the pre-anesthetic examination of the beneficiary, pre- or post-operative visits, or usual monitoring functions that are ordinarily included in the anesthesia service.

2.4.B. ANESTHESIA PERFORMED IN CONJUNCTION WITH SERVICES THAT REQUIRE PRIOR AUTHORIZATION

If a surgical procedure requires prior authorization (PA), the surgeon is responsible for obtaining the authorization to perform the service. The anesthesia provider is not responsible for providing proof that the surgical procedure was authorized. (Refer to the General Information for Providers chapter of this manual for information regarding PA of services.)

2.4.C. POST-OPERATIVE PAIN MANAGEMENT

Post-operative pain management is the responsibility of the surgeon (except in special circumstances) and is covered as part of the global service provided by the surgeon.

Placement of a continuous epidural to manage post-operative pain is separately covered under the appropriate CPT/HCPCS code (e.g., CPT 01996) when the anesthesia practitioner performed the service for post-operative pain management and the procedure was not used as the mode of anesthesia for the surgery. Daily management of a continuous epidural on subsequent post-operative days is covered under the appropriate procedure code.

2.4.D. ELECTRO-CONVULSIVE THERAPY

Anesthesia services related to electro-convulsive therapy (ECT) are covered by the beneficiary's Prepaid Inpatient Health Plan (PIHP)/Community Mental Health Services Program (CMHSP) or Medicaid Health Plan (MHP). The attending physician must obtain authorization from the PIHP/CMHSP or the MHP. Payment is made by the PIHP/CMHSP or MHP that authorized the service.

2.4.E. LABOR AND DELIVERY

Coverage of anesthesia services associated with labor and delivery is based on the type of anesthesia provided. If anesthesia is provided by placement of an epidural catheter, it is covered under the appropriate anesthesia code depending on the type of delivery. The coverage for this service includes any needle placement, drug injection, and any replacement of the epidural catheter during labor. If endotracheal or general anesthesia is provided for the delivery, it is covered under the appropriate anesthesia code. If an epidural catheter is inserted for labor and delivery but it is later necessary to provide endotracheal anesthesia for the delivery, the surgical code for the epidural insertion is covered in addition to the anesthesia service code for the delivery. The medical record must fully document the circumstances requiring both types of anesthesia.

Time for obstetric epidural anesthesia during labor and vaginal and cesarean section deliveries begins with insertion and ends with removal of the epidural catheter. Anesthesia time for sterilization is added to the time for the delivery when the two procedures are performed during the same operative session.

2.4.F. HYSTERECTOMY AND STERILIZATION

By federal statute, all services, including anesthesia services related to hysterectomies or sterilization procedures, must be supported by an informed consent that meets Medicaid consent requirements before the service can be rendered. It is the responsibility of the operating surgeon to obtain this consent. (Refer to the Surgery – Special Considerations section of this chapter for additional information for hysterectomies and sterilizations.)

2.5 SPECIAL CONSIDERATIONS

2.5.A. MULTIPLE ANESTHESIA SERVICES

Report the anesthesia code with the highest Base Unit Value when multiple surgical procedures are performed during a single anesthesia administration. The time reported is the combined total for all procedures performed on the same beneficiary on the same date of service by the same or different physician or other qualified health care professional.

2.5.B. DISCONTINUED ANESTHESIA SERVICES

In the instance a procedure is cancelled or discontinued after general or regional anesthesia induction has occurred, report the anesthesia base code corresponding to the surgical procedure plus the time expended providing the anesthesia service in minutes.

When a procedure is cancelled after the pre-operative evaluation, reimbursement may be made to the anesthesiologist or the independent CRNA when the appropriate Evaluation and Management (E&M) code is reported.

Medicaid Provider Manual

2.5.C. TEACHING SERVICES

Medicaid covers anesthesia services consistent with Medicare guidelines when provided under an attending provider relationship in a teaching hospital and/or in accordance with the coverage and reimbursement guidelines established by the Medicare policies for teaching practitioners. (Refer to the Services in a Teaching Setting section of this chapter for additional information.)

SECTION 3 – GENERAL PRACTICE

3.1 ALLERGY TESTING AND IMMUNOTHERAPY

Medicaid covers allergy testing and immunotherapy services. Testing is covered under the appropriate CPT/HCPCS code with the appropriate quantity as indicated by the code description. A visit is covered in addition to the testing. Coverage of the testing includes the interpretation of the test results in relation to the history and physical examination of the beneficiary.

Immunotherapy services are covered under the appropriate CPT/HCPCS component codes. The services of the provider who actually prepares and provides the antigens/venoms are covered on a per dose basis. Services of the provider who parenterally administers the antigen/venom are covered under the appropriate injection codes. The injection and the antigen/venom preparation services are covered separately.

Allergy injection services are not covered in addition to the visit unless the visit represents another significant, separately identifiable service above and beyond the antigen/venom immunotherapy and the appropriate modifier is reported.

MDHHS assumes antigens are prepared for administration over a period of time in increasing doses. Antigens are covered at the same rate per dose regardless of whether multiple or single dose vials are used. Medicaid covers the dose administered and the preparation of the dose administered.

Any allergy testing and treatments that have not been proven to be effective are not covered.

3.2 AMBULANCE SERVICES

Coverage for ambulance services is restricted to medically necessary and appropriate services when medical/surgical or psychiatric emergencies exist or no other effective or less costly mode of transportation for medical treatment can be used because of the beneficiary's medical condition.

Emergency ambulance services do not require a physician's order.

The physician must order all non-emergency, medically necessary ambulance transportation. Refer to the Ambulance Chapter for order requirements and additional information related to ambulance services.

3.3 AUDIOLOGICAL AND HEARING SERVICES

Medicaid covers hearing evaluations and other audiological function testing by a physician, physician assistant, or advanced practice registered nurse. Hearing evaluations are covered when they include pure-tone audiometry, speech audiometry, and a report of findings.

A hearing aid is covered if all of the following criteria are met:

- The practitioner performs a medical evaluation within six months prior to the beneficiary obtaining a hearing aid. For beneficiaries under age 18, an otolaryngologist or other appropriate specialty physician must complete the evaluation.
- The evaluation reveals that the beneficiary needs a hearing aid and that there is no contraindication to the use of a hearing aid.

- The practitioner prescribes a hearing aid.
- The beneficiary presents the prescription and a written statement of the medical clearance to an enrolled hearing center or audiologist for audiological testing and a hearing aid exam.
- The beneficiary is referred to an enrolled hearing aid dealer, hearing center, or audiologist for the selection and provision of the aid.

3.3.A. NEWBORN HEARING SCREENING EXAMINATION

MDHHS requires that all Medicaid-covered newborns be screened using the automated auditory brainstem response (ABR) method and/or the automated evoked otoacoustic emissions (EOAE) method.

Results must be reported to the child's primary care provider in a timely manner.

If the birthing hospital has the appropriate equipment, the screening must be done at the hospital. When this occurs, the screening is covered as a part of the inpatient stay.

If the hospital is not equipped for ABR or EOAE, the child's physician, CNM, or NP must refer the newborn to a Medicaid enrolled hearing center where screening must be completed prior to one month of age.

Refer to the Hearing Services subsection of the Hospital Chapter for additional information.

3.3.B. LOCAL HEALTH DEPARTMENT SCREENINGS

The primary care provider or Head Start agency (with approval from the child's primary care provider) may refer preschool-aged children to the local health department (LHD) for objective hearing screening. The results of the screening must be reported to the child's primary care provider. If the LHD is unable to report the results to the child's primary care provider, the LHD must clearly document why this was not accomplished. Providers are strongly encouraged to share the results with the Head Start agency if that agency was the referral source, and if the provider receives authorization.

MDHHS monitors the number of MHP referrals reported by LHDs, and may initiate charge-backs to the plans.

Refer to the Additional Information on Objective Hearing & Vision Screening subsection of the Local Health Department Chapter for additional information.

3.4 CARE OF ABUSED CHILDREN

Medicaid covers physician services related to the diagnosis and treatment of suspected abused or neglected children. When the physician has reasonable cause to suspect that a child may have been abused or neglected, they must immediately contact the appropriate Protective Services Unit of the local MDHHS office to report their suspicions.

Medicaid Provider Manual

Medicaid covers the inpatient stay of an abused or neglected child when, upon admission, the attending provider determines that the child requires further assessment and treatment which is best provided on an inpatient basis.

Healthcare providers cannot admit a child to the hospital for the sole purpose of custodial or protective care.

3.5 CHILDBIRTH/PARENTING EDUCATION

Medicaid covers childbirth/parenting education for pregnant women when referred in writing by the prenatal care provider and provided by qualified educators in a Medicare certified outpatient hospital or by a certified Maternal Infant Health Program (MIHP) program provider.

This service is not covered if rendered by the prenatal care provider in the office setting.

3.6 CLINICAL TRIALS

The program covers routine patient costs furnished in connection with participation in a qualifying clinical trial. Routine patient costs are any item or service provided to the beneficiary under the qualifying clinical trial.

3.6.A. COVERED ITEMS AND SERVICES

Routine patient costs include any item or service provided to prevent, diagnose, monitor, or treat complications resulting from participation in the qualifying clinical trial to the extent that the provision of such items or services to the beneficiary would otherwise be covered outside the course of participation in the qualifying clinical trial under the state plan or waiver. Routine patient costs also include any item or service required solely for the provision of the investigational item or service that is the subject of the qualifying clinical trial, including the administration of the investigational item or service. Examples of routine costs include otherwise covered physician services or laboratory or medical imaging services that assist with prevention, diagnosis, monitoring, or treatment of complications arising from clinical trial participation.

3.6.B. NON-COVERED ITEMS AND SERVICES

Items and services considered experimental or investigational are not a covered benefit. This includes the experimental or investigational drug, item, or service that is the subject of the qualifying clinical trial. Other non-covered items and services include:

- Items and services not otherwise covered by the Medicaid program;
- Items and services provided to the beneficiary solely to satisfy data collection and analysis for the qualifying clinical trial that are not used in the direct clinical management of the beneficiary; and
- Items and services provided by the trial sponsor without charge.

3.6.C. QUALIFYING CLINICAL TRIAL

A qualifying clinical trial is defined to include a clinical trial in any clinical phase of development that is conducted in relation to the prevention, detection, or treatment of any serious or life-threatening disease or condition. A qualifying clinical trial must also be one or more of the following:

- A study or investigation that is approved, conducted, or supported (including funding through in-kind contributions) by one or more of the following:
 - the National Institutes of Health (NIH);
 - the Centers for Disease Control and Prevention (CDC);
 - the Agency for Healthcare Research and Quality (AHRQ);
 - the Centers for Medicare & Medicaid Services (CMS);
 - a cooperative group or center of any of the entities described above, or the Department of Defense or the Department of Veterans Affairs; and
 - a qualified non-governmental research entity identified in the guidelines issued by NIH for center support grants.
- A clinical trial, approved or funded by any of the following entities, that has been reviewed and approved through a system of peer review in compliance with Section 210 of the Consolidated Appropriations Act:
 - the Department of Energy
 - the Department of Veterans Affairs
 - the Department of Defense
- A clinical trial that is one conducted pursuant to an investigational new drug exemption under section 505(i) of the Federal Food, Drug, and Cosmetic Act or an exemption for a biological product undergoing investigation under section 351(a)(3) of the Public Health Service Act; or
- A clinical trial that is a drug trial exempt from being required to have one of the exemptions in the prior bullet.

3.6.D. DETERMINATION FOR COVERAGE

Determination for coverage of costs associated with a beneficiary participating in a qualifying clinical trial shall be made with the following considerations:

- Expedited and completed within 72 hours;
- Made without limitation on the geographic location of where the clinical trial is conducted or based on the network affiliation of the principal investigator or provider treating the beneficiary in connection with the clinical trial;
- Based on attestation of the principal investigator or provider regarding the appropriateness of the qualifying clinical trial via the Attestation to the Appropriateness of the Qualified Clinical Trial form (BPHASA-2210); and

Medicaid Provider Manual

- Shall not require the submission of protocols of the qualifying clinical trial or any other documentation that may be proprietary.

3.6.E. ATTESTATION TO THE APPROPRIATENESS OF THE QUALIFIED CLINICAL TRIAL

A completed and signed Attestation to the Appropriateness of the Qualified Clinical Trial form (BPHASA-2210) must be submitted with all claims and PA requests for routine patient costs for items and services furnished in connection with a beneficiary's participation in a qualified clinical trial. The form represents the attestation by the principal investigator and health care provider to the appropriateness of the clinical trial.

The BPHASA-2210 must be signed by both the principal investigator of the clinical trial and a qualified health care provider. Qualified health care providers include licensed providers who are part of the beneficiary's health care team such as, but not limited to; the beneficiary's primary care, specialty, treating, referring, or ordering provider, pharmacist, or the principal investigator of the clinical trial. The completed form must be submitted with all claims and PA requests for routine patient costs for items and services furnished in connection with a beneficiary's participation in a qualified clinical trial. (Refer to the Forms Appendix for form BPHASA-2210.)

3.6.F. PRIOR AUTHORIZATION

Not all items and services associated with a clinical trial require prior authorization (PA). All PA requirements that apply to services provided outside of a clinical trial apply to routine services within a clinical trial. PA requests for routine patient costs for items and services furnished in connection with a beneficiary's participation in a qualified clinical trial must include a completed and signed Attestation to the Appropriateness of the Qualified Clinical Trial form (BPHASA-2210). Refer to the General Information for Providers Chapter for additional PA requirements.

3.6.G. CLAIMS FOR SERVICES

All claims for routine patient costs associated with participation in a clinical trial must include a completed and signed Attestation to the Appropriateness of the Qualified Clinical Trial form (BPHASA-2210), the National Clinical Trial (NCT) number and an ICD-10 diagnosis code indicating the services are associated with a clinical trial, such as Z00.6 (encounter for examination for normal comparison and control in clinical research program). Claims may also include any future ICD-10 diagnosis code(s) that falls within the structure and conventions of the classification and general guidelines applicable to clinical trial services as established by CMS and National Center for Health Statistics (NCHS) services.

Refer to the Billing & Reimbursement for Institutional Providers and the Billing & Reimbursement for Professionals chapters for additional claim requirements for services associated with participation in a clinical trial.

3.7 COMMUNICABLE DISEASE TREATMENT

Medicaid covers the diagnosis and treatment of communicable diseases, including tuberculosis (TB), hepatitis, meningitis, and enteric disease. Cases of communicable disease must be reported to the LHD.

Medicaid Provider Manual

Providers may obtain additional information regarding communicable disease prevention and control from the LHD.

3.8 DIABETES PATIENT EDUCATION

Medicaid covers diabetes self-management education for beneficiaries diagnosed with diabetes when ordered by an enrolled physician or qualified non-physician medical practitioner responsible for the beneficiary's diabetic care. Services must be provided by diabetes educators (e.g., nurse, dietitian) in a Medicaid enrolled outpatient hospital or LHD that meets Michigan Medicaid DSME program requirements.

The physician or qualified non-physician medical practitioner treating the beneficiary's diabetes must maintain a documented diabetes diagnosis and any special needs supported by medical necessity in the medical record.

Refer to the Hospital Chapter of this manual for information about DSME program requirements.

3.9 DIAGNOSTIC TESTS

Medicaid covers tests to diagnose a disease or a medical condition. Diagnostic testing must be directly related to the presenting condition of the beneficiary. The ordering or referring of specific diagnostic tests may be restricted to physicians (MD or DO) by program policy.

3.10 FAMILY PLANNING

Medicaid covers family planning services (e.g., examination, sterilization procedures, limited infertility screening, and diagnosis). A visit for family planning typically includes a complete physical examination, including a pelvic examination.

Separately identifiable services provided in addition to the examination are covered separately. Counseling for family planning services, including sterilization, is covered as a part of the family planning visit.

Medicaid covers contraceptives including:

- Oral contraceptives (must be prescribed by a physician and dispensed by an enrolled pharmacy or Family Planning Clinic)
- Diaphragms
- Intrauterine devices
- Condoms (available from a pharmacy without a prescription, or from a family planning clinic)
- Foams, gels, sponges (must be prescribed by a physician and dispensed by a pharmacy or family planning clinic)

3.11 FOOT CARE

3.11.A. ROUTINE FOOT CARE

Medicaid covers these services when provided by a physician or podiatrist and when the beneficiary manifests signs and symptoms from a specific systemic disease of sufficient

Medicaid Provider Manual

severity that care by a nonprofessional would be hazardous. The medical necessity for these services must be documented in the beneficiary's medical record, and the beneficiary must be receiving regular care from a physician for the systemic disease.

3.11.B. MYCOTIC NAILS, DEBRIDEMENT

Medicaid covers debridement of mycotic nails once in a 60-day period when provided during or following any appropriate course of medical treatment for the causative fungal infection. Documentation in the beneficiary's medical record must support clinical evidence of the mycosis, identification of the toenail(s) affected, and evidence that the mycosis is likely to result in significant medical complications if appropriate antifungal treatment is not rendered.

The debridement of mycotic nails is covered for beneficiaries in the nursing facility only on the written order of the attending physician (MD or DO). The order must be patient-specific and not for routine care only.

3.12 FRACTURE CARE

Medicaid covers medically necessary fracture care. Coverage includes the initial traction, cast application and removal, and routine follow-up care. Additional reductions are independent procedures not included in the original treatment and are covered separately.

Fracture care includes the insertion and removal of necessary wires, pins, etc. If the wire, pins, etc., are the types that are not normally removed but the removal is medically necessary, Medicaid also covers such removal. Documentation of the need must be included on the claim.

Coverage also includes subsequent recasting required during the course of fracture treatment (i.e., following initial cast application). Medicaid covers cast removal as a separate service only when performed by a physician who was not involved in the fracture care and who is not reapplying another cast.

3.13 GENDER AFFIRMATION SERVICES

The Medicaid program covers medically necessary gender affirmation/ confirming medical, surgical, and pharmacologic treatments and procedures for beneficiaries clinically diagnosed with gender dysphoria. Treatment and procedures for the health management of individuals with gender dysphoria are not considered to be elective or cosmetic when determined to be medically necessary. Medical and mental health services, determination of medical necessity, as well as the relevant qualifications and clinical experience requirements of treating providers, must adhere to the most current clinical practice guidelines, including those established by the World Professional Association for Transgender Health (WPATH) and the Endocrine Society, as applicable.

3.14 GENETIC COUNSELING

Medicaid covers medically necessary genetic counseling services as defined in section 333.17001 (Act 368 of 1978) when provided by a Medicaid-enrolled physician, PA, or APRN (NPs, CNSs, and CNMs). Genetic counseling may also be provided by a licensed Medicaid-enrolled Genetic Counselor when ordered by a physician, PA, or APRN.

Medicaid Provider Manual

Counseling is covered when provided in consideration of, or in conjunction with, genetic testing, or provided in relation to a genetic or congenital condition. Counseling is considered medically necessary when there is an expectation that a genetically inherited or acquired condition exists, and the beneficiary displays clinical features or is at risk of inheriting the disease/condition based upon factors including, but not limited to, personal history, family history, documentation of a genetic mutation, and/or ethnic background.

Genetic tests recommended as a result of genetic counseling may be covered when provided in accordance with Medicaid's Genetic and Molecular Testing policy. Providers should refer to the Genetic and Molecular Testing subsection of the Laboratory Chapter for information on genetic testing.

3.15 IMMUNIZATIONS (VACCINES AND TOXOIDS)

Immunizations are covered when given according to the Centers for Disease Control and Prevention (CDC) Advisory Committee on Immunization Practices (ACIP) recommendations. This includes ACIP recommendations based on risk due to health condition, occupation, and travel. MDHHS encourages providers to immunize all Medicaid beneficiaries according to the recommended immunization schedules.

- For Medicaid children 18 years and younger, the Vaccine for Children (VFC) Program provides covered immunizations at no cost to the provider.
- Medicaid covers immunizations for beneficiaries 19 years of age or older.
- Any Local Health Department (LHD) in the state can be contacted for specifics about the VFC program, what immunizations are available, and instructions on enrolling and obtaining immunizations.

Medicaid does not pay for immunization costs for any product that is available free of charge for Medicaid beneficiaries. An administration fee is covered separately for immunizations given to Medicaid beneficiaries whether the immunization is free or not, and without regard to other services provided on the same day. The administration fee is set for each immunization.

For immunizations available free under the VFC program, the amount a provider may charge for vaccine administration may be limited. Providers cannot charge more for services provided to Medicaid beneficiaries than for services provided to their general patient population. For example, if the charge for administering a vaccine to a private-pay patient is \$5.00, then the charge for immunization administration to the Medicaid patient cannot exceed \$5.00.

For Medicaid beneficiaries enrolled in an MHP, the health plan must ensure that the beneficiary has access to receive complete and timely immunizations. When a provider contracts with a health plan to provide primary care (which includes immunizations), the provider should immunize the beneficiaries assigned to them by the plan. MHP providers enrolled in the VFC program are encouraged to immunize and are discouraged from referring beneficiaries to a LHD for these services.

If a beneficiary is in a nursing facility, the facility is responsible for appropriately immunizing the beneficiary. Coverage of the immunizations is included in the per diem payment made to the facility.

3.16 INJECTABLE DRUGS AND BIOLOGICAL PRODUCTS

3.16.A. COVERAGE OF THE INJECTABLE

Medicaid covers injectable drugs and biological products administered by a physician in the office, clinic setting, and in the beneficiary's home. The drug or biological product must be Food and Drug Administration (FDA) approved and reasonable and necessary according to accepted standards of medical practice for the diagnosis or treatment of the illness or injury of the beneficiary. There must be sufficient clinical evidence demonstrating the effectiveness and safety of the drug or biological product.

An injectable drug is covered if the drug is:

- Specific and effective treatment for the condition for which it is being given.
- Given for the treatment of a particular documented diagnosis, illness, or condition (e.g., vitamin injections which are not specific replacement therapy for a documented deficiency or disease and are given simply for the general good and welfare of the patient).
- Administered by the recommended or accepted administration method for the condition being treated.
- Administered according to the recommended dosing schedule and amount for the condition being treated.

For any injectable drug that a practitioner purchases directly through a pharmacy, distributor or wholesaler which is administered in the office, clinic setting, or the beneficiary's home, the injectable drug is considered a physician service rather than a pharmacy benefit. The physician must not send the beneficiary to a pharmacy to obtain an injectable drug. If a pharmacy sells injectable drug products to a physician, the pharmacy must obtain payment directly from the purchasing physician.

MDHHS allows a select list of physician-administered drugs to be covered through the pharmacy benefit as identified in the Special Product Coverage section of the Pharmacy Chapter. If the practitioner uses a pharmacy to acquire the drug for administration, the pharmacy must submit the claim as a pharmacy claim. (Refer to the Special Product Coverage section of the Pharmacy chapter for additional information.)

If the beneficiary has other insurance that allows the injectable drug product to be obtained at the pharmacy by the beneficiary, then the other insurance rules (e.g., Medicare Part D) must be followed; however, the reimbursement of the beneficiary's liability (i.e., coinsurance/deductible/ copay) may be covered as a physician service.

When administering a dose drawn from a multidose vial, only the amount administered to the beneficiary is covered. If a drug is only available in a single use vial and any drug not administered must be discarded, the amount of the drug contained in the vial is covered.

Medicaid Provider Manual

3.16.A.1. OFF-LABEL USE OF PHYSICIAN-ADMINISTERED DRUGS **[SUBSECTION ADDED 7/1/2025]**

Off-label uses of physician-administered drugs generally require a prior authorization. However, certain drug classes are protected from prior authorization requirements by state law.

Claims submitted for FDA off-label use of physician-administered drugs within the protected drug classes, as identified in MCL 400.109h, must include documentation to support the indication is evidence-based and that it is being administered within generally accepted standards of practice. This may include, but is not limited to, documents from medical compendia, peer reviewed studies, progress notes, or provider letters that demonstrate other failed lines of treatment.

Prior authorization is required for off-label uses of drugs not included in the protected drug classes.

This policy does not apply to claims for physician-administered drugs billed under the outpatient pharmacy benefit. Refer to the Pharmacy chapter of this manual for coverage requirements of physician-administered drugs billed under the pharmacy benefit. **(text added per bulletin MMP 25-12)**

3.16.B. PHYSICIAN-ADMINISTERED DRUGS AND BIOLOGICAL PRODUCTS NOT COVERED BY MEDICAID HEALTH PLANS

MDHHS will maintain a list of specific Medicaid program covered physician-administered drugs and biological products that are not covered by MHPs. This list of physician-administered drugs and biological products, carved out from MHP coverage, will be reimbursed as a Fee-for-Service (FFS) benefit for all beneficiaries in FFS and for those enrolled in an MHP.

A list of the specific drugs covered under this policy will be maintained on the MDHHS website. The list may be modified as new drugs are approved or added to the physician-administered carve-out. No notice of changes to the list will be issued directly to providers. (Refer to the Directory Appendix for website information.)

3.16.B.1. PRIOR AUTHORIZATION REQUIREMENTS FOR CARVE-OUT INJECTABLE DRUGS AND BIOLOGICAL PRODUCTS

Certain drugs on the carve-out list of physician-administered drugs and biological products not covered by MHPs may require prior authorization (PA). The purpose of PA is to review the medical need for certain services. It does not serve as an authorization of fees or beneficiary eligibility.

When indicated on the MDHHS-maintained list, PA requests will require a completed Practitioner Special Services Prior Approval-Request/Authorization form (MSA-6544-B), a Program Review Division (PRD) documentation checklist, and all supporting documentation. Providers are to contact the PRD to obtain the PRD documentation checklist for drugs and biological products that require PA. Once all required documentation is collated, information must be submitted according to form MSA-6544-B completion and submission instructions. (Refer to the Forms Appendix for a copy of the

Medicaid Provider Manual

form and completion instructions and to the Directory Appendix for PRD contact information.)

3.16.B.2. BILLING CONSIDERATIONS FOR CARVE-OUT INJECTABLE DRUGS AND BIOLOGICAL PRODUCTS FOR MEDICAID HEALTH PLAN ENROLLEES

When multiple medical services are provided in conjunction with a carve-out physician-administered drug, FFS claims will process for payment of the carve-out drug service line only; all other claim lines will be denied with Claim Adjustment Reason Code (CARC) 24 – Charges are covered under a capitation agreement/managed care plan. The associated services that are denied by FFS are to be billed to the beneficiary's health plan for payment.

3.16.C. ADMINISTRATION OF THE INJECTABLE

Medicaid covers the injectable drug and the administration of the drug. If the administration of the drug is an integral component of the procedure, the administration is considered a part of that service and is not separately reimbursed.

Payment for administration of injectables provided through a PIHP/CMHSP clinic or affiliated physician practice is included in the capitation rate to the PIHP/CMHSP and is not separately reimbursable to the physician.

Injections in the office/clinic/beneficiary's home may be administered by appropriate non-physician staff who are employed by the physician or are employed by the same clinic/group as the physician. Administration of the injectable drug by non-physician staff must be under the physician's personal supervision or under the delegation and supervision of the physician as required by the Public Health Code. Providers should refer to the Coordination of Benefits Chapter of this manual for additional requirements that apply when a beneficiary has Medicare or commercial insurance coverage. For a list of the drugs administered under this policy, refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information. Physician-administered drugs and biologicals are included on the Practitioner and Medical Clinic Fee Schedule. (Refer to the Directory Appendix for website information.)

3.16.D. INJECTABLES ADMINISTERED THROUGH PIHP/CMHSP FOR MHP ENROLLEES

Specific injectable drugs administered by a physician or non-physician practitioner (e.g., physician assistant and nurse practitioner) through a PIHP/CMHSP clinic to Medicaid Health Plan (MHP) enrollees are reimbursable by MDHHS on a fee-for-service basis when the following criteria are met:

- The beneficiary has an open case with the PIHP/CMHSP;
- The beneficiary receives the injections on a scheduled or routine basis as part of the PIHP/CMHSP treatment/supports regimen; and
- The PIHP/CMHSP clinic notifies the beneficiary's MHP or primary care physician that this service is being rendered.

Medicaid Provider Manual

A list of the specific drugs covered under this policy is maintained on the MDHHS website. (Refer to the Directory Appendix for website information.) The list may be modified as new drugs are approved for Medicaid coverage. No notice of changes to the list will be issued directly to providers. Drugs on this list may be billed using the provider's NPI number(s) associated with the PIHP/CMHSP.

3.16.E. PSYCHOTROPIC INJECTABLES ADMINISTERED BY PHYSICIANS NOT ASSOCIATED WITH A PIHP/CMHSP

Physicians not associated with a PIHP/CMHSP who are administering psychotropic injectable carve-out drugs in an outpatient setting to MHP enrollees must comply with the following criteria:

- Physicians administering psychotropic injectable carve-out drugs must notify the beneficiary's MHP or primary care physician that this service is being rendered.
- Injectable carve-out drugs covered by MDHHS through FFS must be billed through CHAMPS using the physician's NPI.
- FFS reimbursement by MDHHS to physicians not associated with a PIHP/CMHSP is limited to psychotropic injectable carve-out drugs only. Physicians may not bill MDHHS for additional services rendered during the visit, including any injectable administration cost. Physicians should bill the MHP for any additional services, if necessary, after obtaining MHP prior authorization as per the "Out-of-Network Services" policy located in the Medicaid Health Plan chapter.

3.17 LABORATORY

Medicaid covers diagnostic laboratory services and pathology procedures reasonable and necessary to guide detection, diagnosis, management, and/or treatment of a specific medical condition, illness, or injury and a limited number of screening laboratory tests, including but not limited to, those associated with preventive services assigned a grade A or B by the United States Preventive Services Task Force (USPSTF).

Covered laboratory and pathology services must be:

- Recommended and ordered by the beneficiary's treating physician, podiatrist, physician assistant, nurse practitioner, clinical nurse specialist, dentist, or CNM according to their scope of practice.
- Provided in accordance with evidence based generally accepted standards of medical practice.
- Clinically appropriate in terms of type, frequency, extent, site, and duration for the beneficiary's symptoms, diagnosis, illness, or injury.
- Used in the clinical management of the beneficiary's specific medical condition.
- Provided in accordance with all applicable Medicaid clinical criteria, requirements, policies, and/or provisions of coverage.
- Performed in a laboratory appropriately certified by the Clinical Laboratory Improvement Amendments (CLIA).

Refer to the Laboratory chapter for additional information regarding coverage parameters, ordering limitations, and prior authorization requirements.

3.17.A. MEDICAL NECESSITY

The beneficiary's medical record must include sufficient documentation to support the medical necessity of the laboratory service regardless of where the tests are performed. The documentation must include a description of the beneficiary's symptomatology and other findings that led the practitioner to order the test(s). An explanation of the laboratory testing method or the results of diagnostic tests, whether normal or abnormal, is not considered documentation of medical necessity. For approval of payment, the laboratory procedure(s) must be specific and appropriate to the beneficiary's documented condition and diagnosis.

3.17.B. REFERRED SERVICES

If a practitioner refers a beneficiary to an outside laboratory (e.g. independent clinical lab or hospital outreach lab) for testing, the practitioner must indicate their NPI number on the referral. A practitioner may not charge for laboratory tests when a specimen is obtained but sent out of the office (i.e., skin lesions, pap smears, etc.) for analysis.

3.17.C. PRACTITIONER'S OFFICE LABORATORY

Medicaid covers laboratory services provided in a practitioner's office laboratory (POL) when they are appropriate to be performed in the office and the POL is certified to perform the specialties or subspecialties of tests billed. The laboratory must hold a CLIA certificate of registration, compliance (COC), accreditation (COA), waiver (COW) or a certificate of Physician Performed Microscopy Procedures (PPMP) from the Centers for Medicare & Medicaid Services (CMS). The POL's CLIA number must be present on the claim for laboratory services to be considered for reimbursement. POL reimbursement is limited to services listed on the applicable provider's fee schedule.

3.18 NERVE BLOCK

Nerve blocks are covered as a surgical procedure when performed for diagnostic or therapeutic purposes. As a surgical procedure, a complete description of the services rendered must be documented in the beneficiary's medical record. When used as anesthesia for another procedure, the anesthesia guidelines apply. Nerve blocks are not separately covered when used as a local anesthetic for another surgical procedure.

A nerve block is the injecting of a local anesthetic or neurolytic agent around a nerve to produce a block of that specific nerve. It is not injecting a painful area under the skin or a trigger point, or an injection into the general muscle mass of subcutaneous tissue that does not follow the anatomy of a specific nerve, to produce temporary relief of pain in that area.

Nerve blocks are payable in the hospital or office setting as appropriate. No more than three nerve blocks to the same area are covered within a six-month period without documentation of medical necessity. Documentation must include the diagnosis or condition, the management/treatment plan, specific nerve(s) affected, indications, and expected benefits. A medical visit is not covered separately on the same day unless documentation is supplied to justify the separate services.

3.19 ORTHOPTIC SERVICES

Strabismus surgeries are covered for beneficiaries of any age and do not require PA. Providers are reminded that these surgeries must be medically necessary and not performed solely for cosmetic purposes.

Refer to the Vision chapter of this manual for other specific orthoptic coverages.

3.20 OXYGEN

Medicaid covers oxygen and the equipment necessary for the administration of oxygen therapy.

A pharmacy or a medical supplier may provide gaseous cylinder oxygen. Portable cylinder oxygen is allowable if the cylinder can be refilled and if the flow rate is adjustable.

Only a medical supplier may provide concentrators, liquid oxygen, and oxygen tents, and PA is required.

All oxygen and equipment requires a physician's prescription and a CMN. The initial prescription is valid for six months. The first follow-up prescription is valid for six months, and each subsequent prescription is valid for one year.

The written prescription for oxygen must include all of the following:

- The date the oxygen was prescribed;
- The beneficiary's diagnosis(es);
- The flow rate (liters per minute);
- The number of hours to be used per day;
- Duration of need;
- Delivery system to be used; and
- PO2 level or oxygen saturation.

(Refer to the Medical Supplier Chapter of this manual for additional information related to face-to-face and PA requirements.)

3.21 SUBSTITUTE AND LOCUM TENENS PHYSICIANS

Medicaid covers substitute physicians or locum tenens physicians and allows payment to be made to the beneficiary's regular physician for these services. Federal statutes and CMS requirements determine parameters for these arrangements.

Medicaid coverage under the beneficiary's regular physician for the services of a substitute physician can only occur under the following substitute physician billing arrangements:

- An informal reciprocal arrangement for a period not to exceed 14 days; or
- A locum tenens or temporary arrangement for 90 continuous days in the case of a per diem or other fee-for-time compensation.

Medicaid Provider Manual

Coverage for services provided by a substitute physician under either a reciprocal billing or a locum tenens arrangement must follow Medicaid policy for the service(s) rendered. Documentation in the beneficiary's medical record must identify the physician actually providing the service.

3.22 SUPPLIES IN THE OFFICE SETTING

RVU-based payment to practitioners includes payment for the office overhead expense associated with the service. In most cases, the overhead includes the supplies used or provided by the practitioner in connection with the service, and the supplies are not separately reimbursed.

Providers must not require beneficiaries to purchase an item in advance from a pharmacy or medical supplier that is an integral component of the service. Surgical dressings applied by a physician in the office or other nonfacility setting are not covered separately.

Medicaid does not cover take-home supplies dispensed from the office setting. If a beneficiary requires in-home supplies, a written prescription must be presented to the pharmacy or medical supplier and supplies dispensed accordingly.

In keeping with the RVU-based fee schedule, Medicaid separately covers a limited number of supplies used in the office setting (such as intrauterine devices and casting supplies) because an allowance for these supplies is not typically included in the respective treatment procedure codes. Casting and splinting supplies are covered separately when used with the fracture and dislocation or casting, splinting or strapping procedure codes listed in the musculoskeletal surgery section of the CPT coding manual.

(Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding separately covered supplies.)

3.23 TUBERCULOSIS TESTING

Medicaid covers TB testing according to the guidelines established by the AAP and USPSTF which are based on risk. A risk assessment may be completed at each visit. Coverage for the TB test includes any return visit to read the results of the TB test.

For assistance in determining high risk, providers may contact the MDHHS Division of Communicable Diseases, the AAP, or the USPSTF. (Refer to the Directory Appendix for contact information.)

3.24 VISION SERVICES

Refer to the Vision chapter of this manual for specific coverage information.

3.25 WEIGHT REDUCTION

Medicaid covers a broad array of health services for the treatment of obesity. These services include, but are not limited to, physician office visits, pharmacotherapy, laboratory, behavioral health, and surgical interventions.

Gastric bypass, metabolic, and bariatric surgeries, collectively referred to as weight loss surgeries, involve modifications to the digestive system that promote weight loss. Weight loss surgery is an evidence-based treatment for obesity resulting in significant weight loss and the improvement, prevention, or resolution of many associated comorbidities including type 2 diabetes, heart disease and hypertension.

3.25.A. COVERAGE OF WEIGHT LOSS SURGERY

Weight loss surgery is a covered service for the treatment of obesity when medically indicated and when the procedure performed is within professional standards of medical practice. Covered surgical procedures may include, but are not limited to, gastric bypass, gastric band, sleeve gastrectomy, removal, revision, and/or replacement of adjustable gastric restrictive devices, and subcutaneous port components and repeat procedures. Procedures considered investigational/experimental are not covered services. Mandatory participation in a preoperative weight loss regimen prior to weight loss surgery is not required.

3.25.B. CRITERIA

Body Mass Index	<p>Medically indicated weight loss surgery will be covered for the treatment of obesity in beneficiaries meeting one or more of the following criteria:</p> <ul style="list-style-type: none">▪ A body mass index (BMI) > 40 kg/m² regardless of the presence or absence of co-morbidities; or▪ BMI > 35 kg/m² and < 40 kg/m² with at least one co-morbid condition. Common co-morbid conditions include, but are not limited to:<ul style="list-style-type: none">➤ Coronary artery disease;➤ Type-2 diabetes;➤ Obstructive sleep apnea;➤ Hypertension; or➤ Impaired glucose tolerance (diabetes)▪ BMI = or < 35 kg/m² when documentation supports medical necessity, including those beneficiaries who may require weight loss surgery to reduce their BMI in preparation for other medical procedures.
------------------------	---

Beneficiaries are encouraged to have a health behavior/psychosocial assessment by a licensed mental health provider to identify and address the psychological, behavioral, emotional, cognitive, and interpersonal factors that may impact the beneficiary's ability to successfully achieve the necessary post-operative treatment and healthcare requirements.

Coverage of associated medically necessary reconstructive procedures directly attributable to weight loss surgery, such as panniculectomy procedures, will be considered through the prior authorization (PA) process. Providers must obtain a separate PA for these services.

3.25.C. PRIOR AUTHORIZATION

PA is required for weight loss surgeries. Requests must include a completed, signed, and dated MSA-6544-B – Practitioner Special Services Prior-Approval – Request/Authorization form. If submitting the prior authorization request electronically via direct data entry in the Community Health Automated Medicaid Processing System (CHAMPS), this PA

Medicaid Provider Manual

request form is not required. PA requests must include the medical history, past and current treatment and results, complications encountered, results of the health behavior/ psychosocial assessment (when indicated), and expected benefits or prognosis for the method requested.

Refer to the General Information for Providers Chapter and the Directory Appendix of this manual for additional language and webpage location of Fee-for-Service Medicaid Prior Authorization Criteria.

Refer to the Pharmacy Chapter for information regarding Medicaid coverage of pharmacotherapy for the treatment of obesity.

SECTION 4 – GENERAL PRACTICE - SPECIAL CONSIDERATIONS

4.1 APHERESIS, THERAPEUTIC

Therapeutic apheresis is covered for the following indications:

- Plasma exchange for acquired myasthenia gravis;
- Leukapheresis in the treatment of leukemia;
- Plasmapheresis in the treatment of primary macro-globulinemia (Waldenstrom);
- Treatment of hyperglobulinemia, including (but not limited to) multiple myelomas, cryoglobulinemia and hyperviscosity syndromes;
- Plasmapheresis or plasma exchange in the last resort treatment of thrombotic thrombocytopenic purpura (TTP);
- Plasmapheresis or plasma exchange in the last resort treatment of life-threatening rheumatoid vasculitis;
- Plasma perfusion of charcoal filters for treatment of pruritis of cholestatic liver disease;
- Plasma exchange in the treatment of life-threatening forms of Goodpasture's Syndrome;
- Plasma exchange in the treatment of glomerulonephritis associated with antiglomerular basement membrane antibodies and advancing renal failure or pulmonary hemorrhage;
- Treatment of chronic relapsing polyneuropathy for beneficiaries with severe or life-threatening symptoms who have failed to respond to conventional therapy;
- Treatment of life-threatening scleroderma and polymyositis when the beneficiary is unresponsive to conventional therapy;
- Treatment of Guillain-Barre Syndrome; and
- Treatment of life-threatening Systemic Lupus Erythematosus (SLE) when conventional therapy has failed to prevent clinical deterioration

Coverage is limited to the following settings:

- In a hospital setting (either inpatient or outpatient). Nonphysician services furnished to hospital patients are covered as hospital services. When covered services are provided to hospital patients by an outside provider/supplier, the hospital is responsible for paying the provider/supplier for the services.
- In a nonhospital setting, such as a physician directed clinic, when all of the following conditions are met:
 - A physician is present to perform medical services and to respond to medical emergencies at all times during patient care hours.

Medicaid Provider Manual

- Each patient is under the care of a physician.
- All nonphysician services are furnished under the personal supervision of a physician.

When the physician provides direct supervision of the procedure or personally performs any services, professional services are covered as therapeutic apheresis (plasma and/or cell exchange).

4.2 CHEMOTHERAPY ADMINISTRATION

Medicaid covers the services of a physician who administers antineoplastic chemotherapy to beneficiaries with a cancer diagnosis in the office setting and in the beneficiary's home. The chemotherapy drugs administered by the physician are covered separately.

Administration of other drugs for diagnoses other than cancer is covered under therapeutic, diagnostic, or prophylactic injection/infusion services.

Chemotherapy administration by push and by infusion techniques is covered on the same day; however, only one push administration is covered on a single day.

Physicians must personally administer the drug or be present when a qualified employee of the physician administers the drug. If chemotherapy is administered without face-to-face contact between the physician and the beneficiary, the services are covered if furnished in the physician's office by a qualified employee under the physician's supervision and the medical record reflects the physician's active participation in and management of the course of treatment.

In the hospital setting, chemotherapy administration is only covered when the physician personally administers the drug.

Refilling and maintenance of an implantable pump or reservoir is covered. Chemotherapy administration by IV push, infusion, or intra-arterial technique is not covered in addition to refilling the implantable pump or reservoir. Flushing of a vascular port prior to chemotherapy is included in the administration and is not covered separately. If a special visit is made to the physician's office only for port flushing, the service is covered under the appropriate E/M code.

Hydration therapy intravenous (IV) infusion is covered as a part of the chemotherapy IV infusion service when administered simultaneously. Hydration therapy is covered separately when administered sequentially or as separate procedures. The distinct procedural service modifier should be reported with the hydration therapy code when performed sequentially.

Supplies necessary to administer chemotherapy in the office setting are included in the overhead expense portion of the administration services and are not covered separately. (Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters for chemotherapy drugs.)

4.3 HEMODIALYSIS AND PERITONEAL DIALYSIS

Medicaid covers physician services required to manage care of beneficiaries with end-stage renal disease (ESRD) who are receiving outpatient and emergency dialysis.

Medicaid Provider Manual

Professional services for emergency dialysis must include an ESRD diagnosis and the “Y” Emergency Indicator.

Most physician services are covered through a monthly capitation payment (MCP) to the managing physician. The MCP covers ESRD related physician services in all settings necessary to manage the beneficiary’s dialysis care, except dec clotting of shunts, dialysis training, and nonrenal-related medical services.

Self-dialysis training services provided by the physician are covered.

4.4 HOME HEALTH CARE

Medicaid covers home health care subject to the requirements in this section.

Home Health services include intermittent nursing care, home health aide services, and physical therapy provided in the beneficiary's home by a Medicaid enrolled Home Health Agency (HHA). The service must be reasonable and necessary for the treatment of a specific illness, injury, or disability, and must be consistent with the nature and severity of the beneficiary's condition, particular medical need and accepted standards of medical practice. Limited services to ensure stability of beneficiaries with an established disability or frail condition, or to prevent an illness, injury or disability for women and newborns during the postpartum period are covered.

Home health is intended for beneficiaries whose conditions require intermittent rather than continuous medical/nursing care. In special instances, intensive nursing care in the home may be approved if MDHHS determines that home care is appropriate and is a cost-effective alternative to institutional care.

4.4.A. PHYSICIAN ORDER FOR CARE

The beneficiary's physician must order covered home health services as part of a written plan of care (POC), and must review the POC every 60 days for continuing need. A HHA should not provide home care prior to the date of the physician's order for the care. The agency must maintain a patient plan of treatment form which must be signed and dated by the physician, or a narrative summary of the POC which must have the physician's signed and dated order attached. The HHA is responsible for obtaining necessary authorization from MDHHS for special or extended care which may be provided.

For initial certification, a physician certifying eligibility for home health services must provide documentation of a face-to-face encounter with the beneficiary within 90 days prior to or 30 days after the start of care. Refer to the Face-to-Face Encounter section in the Home Health Chapter for additional information.

Home health services are not to replace the services of a physician and are not covered solely for the lack of transportation or as a convenience to the beneficiary. Home health services may be appropriate when leaving the home is medically contraindicated or special transportation or effort is required.

4.4.B. MEDICAL SUPPLIES AND EQUIPMENT

Medical supplies, durable medical equipment, orthotic and prosthetic appliances, shoe supplies, and oxygen are covered for beneficiaries receiving services from an enrolled

Medicaid Provider Manual

HHA. The physician (MD, DO, DPM, NP, PA) must prescribe these items. (Refer to the Home Health and the Medical Supplier Chapters of this manual for specific information concerning which equipment/supplies are covered for the medical supplier and which are covered for the HHA.) Face-to-face visits and prior authorization may apply.

4.4.C. PERSONAL CARE

If beneficiaries are not in need of nursing care or physical therapy, but have a need for nonspecialized, unskilled personal care or chore services, such services are available through the MDHHS Home Help Program. The local MDHHS office should be contacted for information.

4.5 HOSPICE SERVICES

Medicaid covers hospice services which include palliative and supportive services to meet physical, psychological, social, and spiritual needs of terminally ill beneficiaries and their families in the home, adult foster care facility, home for the aged, nursing facility, or an inpatient hospice setting. Medicaid enrolled Hospice programs are responsible for providing all physician services related to a beneficiary's terminal illness as part of its core services.

To enroll in hospice, the beneficiary must have a life expectancy of six months or less, have knowledge of the illness and life expectancy, and elect to receive hospice services rather than active treatment for the illness. Both the referring physician and the hospice medical director must certify the life expectancy.

If the physician is not familiar with Medicaid-enrolled hospices in their area, hospice names, addresses, and telephone numbers may be obtained from MDHHS Provider Inquiry. (Refer to the Directory Appendix for contact information.)

Refer to the Billing & Reimbursement for Institutional Providers and the Hospice chapters of this manual for specific requirements related to the provision of hospice services.

4.6 IMPLANTABLE INFUSION PUMPS

Medicaid covers the refill and reprogramming of implantable infusion pumps by physicians in the physician's office. The refill kit and the electronic analysis of the pump are covered as a part of the refill and reprogramming procedure. Injectable drugs used during this procedure are covered separately in the physician's office.

4.7 PEDIATRIC MULTICHANNEL RECORDINGS

Multichannel recording is covered for a child under age 21 when provided in the inpatient or outpatient hospital setting by qualified personnel and interpreted by a physician. Multichannel recordings are not covered in the beneficiary's home.

A pediatric multichannel recording is a continuous and simultaneous recording of at least four channels that may include ECG, thoracic impedance, airflow measurements, oxygen saturation, esophageal pH, or strain gauge measurements. Other additional recording parameters may be included. A multichannel recording does not have to include an electroencephalogram (EEG). When an EEG is performed in addition to the four or more channels, it is covered separately. Payment for the multichannel recording is

Medicaid Provider Manual

the same regardless of the number of channels or the length of time required. Use of a video camera is not separately covered.

Two multichannel recordings may be covered in one year for the same beneficiary. If more than two are medically justified for CSHCS beneficiaries, the physician must obtain PA. The PA number must be included on the claim for payment. (Refer to the General Information for Providers Chapter for additional prior authorization information.)

A multichannel recording is covered as a professional service to the physician and as a technical service to the hospital. The professional service includes the interpretation with written report, and the scanning and scoring.

4.8 PREVENTIVE SERVICES

The program covers preventive services assigned a grade A or B by the USPSTF and all adult vaccines and their administration recommended by ACIP for beneficiaries age 21 years and older. (Refer to the Directory Appendix for USPSTF and ACIP website information.)

Vaccine counseling services, including stand-alone vaccine counseling services, are covered for all adult Medicaid beneficiaries when they are counseled regarding the importance of vaccines. Stand-alone vaccine counseling refers to when a beneficiary and/or caregiver receives counseling about a vaccine from a health care practitioner, but the beneficiary does not actually receive the vaccine on the same date of service as the counseling.

Preventive services, including vaccine counseling services, for beneficiaries under 21 years of age are covered as part of the Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) benefit. (Refer to the Early and Periodic Screening, Diagnosis, and Treatment Chapter for specific information.)

Providers submitting claims for services in accordance with the USPSTF grade A and B recommendations are to identify the service with the appropriate International Classification of Diseases (ICD) diagnosis code(s). To identify the service as a preventive service, providers are encouraged to include HCPCS Modifier 33, Preventive Services. (Refer to the Billing & Reimbursement for Professionals Chapter for specific information.)

SECTION 5 – EVALUATION AND MANAGEMENT SERVICES

Medicaid covers medically necessary evaluation and management (E/M) services provided by a physician or other practitioner authorized by the State. Providers should refer to the CPT explanations, coding conventions, and definitions for E/M services.

Most E/M services are covered once per day for the same beneficiary. In these cases, only one office or outpatient visit is covered on a single day for the same beneficiary unless the visits were for unrelated reasons and at different times of the day (e.g., office visit for blood pressure medication evaluation, followed five hours later by a visit for evaluation of leg pain following an accident).

Coverage of an E/M service includes related activities such as coordination of care, telephone calls, writing prescriptions, completing insurance forms, review and explanation of diagnostic test reports to the beneficiary.

Do not report the modifier for increased procedural services with E/M services in order to request individual consideration, unless specifically directed by this manual. This does not follow CPT coding guidelines and causes longer delays in processing the claims for payment.

5.1 PREVENTIVE MEDICINE SERVICES

The program covers one preventive visit annually. For beneficiaries under 21 years of age, EPSDT screening services are covered according to the AAP periodicity schedule and CMS requirements. (Refer to the Early and Periodic Screening, Diagnosis, and Treatment Chapter for specific information.)

A preventive medicine E/M visit and another E/M visit on the same date are covered separately if, during the preventive visit, a problem or abnormality is detected which requires additional work which meets the key component requirements of a problem oriented E/M visit. When this occurs, the office/outpatient E/M procedure code is covered using the modifier for a separately identifiable service, and the preventive E/M visit is covered without using a modifier. (Refer to CPT guidelines for additional information.)

5.2 E/M VISITS IN RELATION TO GLOBAL SURGERY PACKAGE

An E/M service that results in the decision for surgery is covered separately when provided by the surgeon on the day before or the day of a procedure with a 90-day global period and the decision for surgery modifier is reported. This same E/M service provided the day before or the day of a procedure with a 0-day or 10-day global period is not covered separately.

An E/M service is not covered separately on the same day as a procedure with any global surgery period unless the beneficiary's condition requires a significant, separately identifiable E/M service that is above and beyond the pre- and post-operative care associated with the procedure or service performed.

If the surgeon performs E/M services during the post-operative global surgery period for a reason unrelated to the surgical procedure, report the appropriate modifier with the E/M service. All care provided during the inpatient stay in which the surgery is performed is compensated through the global surgery package and is not covered separately.

5.3 CONSULTATIONS

Medicaid covers consultations rendered by a physician whose opinion or advice is requested by another appropriate practitioner (e.g., physician, CNM, dentist) for the further evaluation and management of the patient. A consultation includes preparation of a report of findings that is provided to the referring provider for the referring provider's use in the treatment of the beneficiary. A consultant may initiate diagnostic and/or therapeutic services. If the referring provider transfers complete responsibility for treatment either orally or in writing to the consultant at the time of the request for consultation, the receiving physician's services are covered as normal E/M services rather than as a consultation.

If the referring provider transfers responsibility for the beneficiary's care to the consultant after the consultation is completed, the consultant's service is covered as a consultation. After the consulting physician assumes responsibility for the beneficiary's care, subsequent visits are covered as established patient office visits or subsequent hospital care, depending on the setting.

A consultation is covered if one provider in a group practice requests a consultation from a physician of a different specialty in the same group practice as long as all of the requirements for use of the CPT/HCPCS consultation codes are met. A provider's request for a consultation and the need for consultation must be documented in the beneficiary's medical record. In an inpatient setting, the request may be documented as part of a plan written in the requesting physician's progress notes, an order in the hospital record, or a specific written request for the consultation.

Medicaid covers second opinions for surgery. The second opinion is covered as a consultation as long as all requirements for a consultation are met.

Ancillary services provided to a beneficiary in a nursing facility must be ordered by the attending physician and are not covered as consultations unless a specific request for opinion and advice is documented. Requests for services by another physician are covered as the actual service provided (e.g., nursing facility visit or eye examination).

5.4 INITIAL VISITS

Medicaid covers one new patient visit for a physician or a group practice for the same beneficiary, regardless of the type of new patient visit billed (e.g., office visit, clinic visit, long term care visit, home visit).

5.5 OBSERVATION CARE [CHANGE MADE 4/1/2025]

Medicaid covers practitioner evaluation and management services related to hospital observation care. Observation care services are a well-defined set of specific, clinically-appropriate hospital outpatient services. Professional services include the ongoing short-term treatment, assessment, and reassessment necessary to determine whether a beneficiary will require further treatment as a hospital inpatient or if they are able to be discharged from the hospital. In most cases, the decision whether to discharge a beneficiary from the hospital or to admit the beneficiary as an inpatient can be made in less than 24-48 hours. (text deleted 4/1/2025)

The medical record must include the following documentation:

- The order for observation care services by a Medicaid-enrolled healthcare provider;

Medicaid Provider Manual

- Progress and discharge notes completed by the rendering provider;
- The billing provider was present and personally performed the services; and
- The total length of time of the observation stay.

5.5.A. REPORTING OF PROFESSIONAL OUTPATIENT HOSPITAL OBSERVATION CARE SERVICES

Practitioners shall report only one observation care Current Procedural Terminology (CPT) code for an initial visit, a subsequent visit, or inpatient or observation care (including admission and discharge), as appropriate, once per calendar date. The selected code must reflect all of the practitioner's services provided during the date of the service with the following considerations:

- If a beneficiary receives less than eight hours of observation services, the practitioner is to report only initial observation care (e.g., 99221 through 99223). Practitioners will not be reimbursed for, nor should they report, CPT codes representing same-day admission/discharge or observation care discharge day management services.
- If a beneficiary receives observation care services for a minimum of eight hours but less than 24 hours, the practitioner should report the same-day discharge code which includes both admission and discharge as part of a single service (e.g., 99234 through 99236).
- If a beneficiary begins observation services and is then discharged after more than 24 hours, the practitioner may report an observation care code (e.g., CPT codes 99221 through 99223) for the date of admission, and a hospital discharge day management service (e.g., CPT code 99238 or 99239) on the date of discharge.

Time or medical decision making (MDM) may be utilized in the selection of the level of observation care service. When using time for code selection, a continuous service that spans the transition of two calendar dates is a single service and is reported on one date, which is the date the encounter begins. If the service is continuous before and through midnight, all the time may be applied to the reported date of the service (i.e., the calendar date the encounter began).

5.5.B. SPECIAL CONSIDERATIONS

When a beneficiary is admitted to observation status in the course of an encounter in another site of service (e.g., hospital, emergency department, practitioner office, nursing facility), all services provided by the practitioner in conjunction with that admission are considered part of the initial hospital observation care when performed on the same calendar date as the admission.

Observation care services should not be reported for monitoring that is inclusive of, or included in payment for, a surgical, diagnostic, or therapeutic procedure. For outpatient surgical procedures, the global surgery rules apply. The surgeon is responsible for all post-operative care in the hospital and observation care is not covered separately.

Observation care services and inpatient hospital services for psychiatric reasons must be authorized by the Prepaid Inpatient Health Plan (PIHP)/Community Mental Health

Medicaid Provider Manual

Services Program (CMHSP). The PIHP/CMHSP is responsible for coverage of authorized psychiatric observation care services.

Refer to the Hospital Chapter of this manual for information regarding program coverage of facility claims for outpatient hospital observation care services.

5.6 NURSING FACILITY SERVICES

Visits necessary to perform Medicare and Medicaid required assessments are covered under the appropriate E/M services involving comprehensive resident assessments.

Visits required to monitor and evaluate residents at the frequencies detailed in the coverage portion of the Nursing Facility chapter of this manual are also covered under the appropriate E/M service for subsequent nursing facility care.

Additional visits for the diagnosis or treatment of illness or injury, or to improve the functioning of a malformed body member, are only covered when documentation of the medical necessity for the visit is included on, or attached to, the claim. Documentation must include diagnoses describing the acute illness or injury; or remarks documenting the necessity for the additional visit recorded on the claim; or documentation such as notes from the visit supporting the above criteria attached to the claim. Providers may report modifier 22. Additional visits which repeatedly reflect the same chronic diagnoses and additional visits for the purpose of routine monitoring are not covered.

Refer to the Coverages portion of the Nursing Facility chapter of this manual for timeframes and additional details for required nursing facility visits.

SECTION 6 – EMERGENCY SERVICES

Medicaid covers all medically necessary emergency services. Federal statutes prohibit prior authorization (PA) for coverage of emergency services. Emergency services include covered inpatient and outpatient services that are furnished by a provider that is qualified to furnish such services and the services are necessary to evaluate or stabilize an emergency medical condition. All professional services must be identified as either an emergency or not an emergency.

6.1 SCREENING EXAM AND STABILIZATION IN THE EMERGENCY DEPARTMENT

MDHHS and its contracted health plans must follow the applicable requirements and definitions of the federal Emergency Medical Treatment and Active Labor Act (EMTALA).

Medicaid covers the medical screening examination, any ancillary service(s) when performed in a hospital emergency department (ED) for the sole purpose of determining if an emergency medical condition exists, and any necessary stabilizing treatment.

For both Medicaid FFS and MHP beneficiaries, the screening examination and any physician-ordered procedures (e.g., x-rays, lab, etc.) necessary to determine the beneficiary's condition are covered without PA. For Medicaid FFS beneficiaries, the screening examination and related diagnostic procedures are covered by MDHHS. For Medicaid MHP beneficiaries, these services are covered by the beneficiary's MHP.

Professional services for the medical screening and stabilization in the ED are covered separately from the facility fees.

6.2 TREATMENT OF EMERGENCY MEDICAL CONDITION IN THE EMERGENCY DEPARTMENT

PA is not required for the treatment of emergency medical conditions.

An emergency medical condition is defined by the federal Balanced Budget Act of 1997 and its regulations.

An emergency medical condition may exist whether the beneficiary is discharged from the ED or admitted to the inpatient hospital. This includes admissions where death occurs before a bed is occupied.

If an emergency medical condition exists, the medical findings must be fully documented in the beneficiary's medical record.

6.3 NON-EMERGENCY MEDICAL CONDITIONS IN THE EMERGENCY DEPARTMENT

If the medical findings from the screening indicate the beneficiary's condition does not meet the definition of an emergency medical condition, but requires additional, follow-up treatment, the following rules apply:

- FFS Medicaid beneficiaries without private health insurance should be referred to their primary care provider to obtain treatment. However, treatment may be rendered in the ED and does not require PA.

Medicaid Provider Manual

- FFS Medicaid beneficiaries with private health insurance must follow the rules of the private health insurance. Private insurers frequently require that the primary care provider perform the follow-up care.
- MHP enrollees must be referred to their primary care provider for treatment, or the MHP can be contacted to request authorization to provide the treatment. If the MHP fails to respond within one hour to the request to provide additional services beyond those required for stabilization, the request for authorization is deemed approved.

6.4 PSYCHIATRIC EMERGENCY SERVICES IN THE EMERGENCY DEPARTMENT

Screening and stabilization of a psychiatric emergency does not require PA. These services are covered in the same manner as other emergency services provided in the ED detailed above. If it is determined that the beneficiary requires post-stabilization psychiatric services, the PIHP/CMHSP must be contacted for PA. The need for PA from the PIHP/CMHSP includes, but is not limited to, inpatient psychiatric admission, psychiatric partial hospitalization, and specialty mental health services.

A psychiatric emergency is defined as a situation in which an individual must be treated to protect them from inflicting injury to self or others as the result of a serious mental illness, emotional disturbance, or developmental disability, or could reasonably be expected to intentionally or unintentionally injure themselves or others in the near future. The emergency may result from an inability to provide food, clothing, or shelter for them or others, inability to attend to activities of daily living, or when judgment is so impaired the individual is unable to understand the need for treatment.

6.5 URGENT CARE SETTINGS

Physician services rendered in urgent care centers or similar settings that are not part of a licensed hospital are covered. Coverage is based on the appropriate office or other outpatient services E/M procedure codes. Coverage for any additional professional services rendered in these settings follows CPT guidelines.

SECTION 7 – MATERNITY CARE AND DELIVERY SERVICES

Medicaid covers maternity care and delivery services. The services normally provided in uncomplicated maternity cases include antepartum care, delivery, and postpartum care. These services are included in the global obstetrical package. The global obstetrical package is covered when one physician or physician group practice provides the obstetric care to a beneficiary. The global obstetrical package is covered as long as the provider or group has provided seven or more antepartum visits, the delivery, and the postpartum care. If less than seven antepartum visits are provided, report the global package with the modifier for reduced services and indicate the number of antepartum visits on the claim.

7.1 ANTEPARTUM CARE

Includes the initial and any subsequent history, physical examinations, recording of weight, blood pressures, fetal heart tones, routine chemical urinalysis, and monthly visits up to 28 weeks gestation, biweekly visits to 36 weeks gestation, and weekly visits until delivery. Typically, if a beneficiary enrolls in the first trimester and delivers at term, they have about 13 antepartum visits. This varies depending on the actual start of antepartum care and the delivery date. If the total number of antepartum visits exceeds 13 due to a high-risk condition, the additional visits are covered when using the appropriate E/M codes with the diagnosis for the high-risk condition.

7.2 DELIVERY

Includes admission to the hospital, the admission history and physical examination, management of uncomplicated labor, and delivery. All hospital visits within 24 hours of delivery are generally considered part of the global package. If the beneficiary is admitted more than 24 hours before delivery and stays more than 24 hours, then hospital care rendered prior to the day of delivery is covered separately as an E/M code. Medical problems complicating labor and delivery management that require additional resources are also covered separately.

7.3 POSTPARTUM

Includes all the visits following a delivery, both in the hospital and in the office. Services provided by physicians within the same group practice are considered as provided by the primary physician responsible for the beneficiary's overall obstetrical care.

7.4 OBSTETRICAL PACKAGE VS. COMPONENTS

If the same physician or group practice does not provide all of the obstetric care, Medicaid covers the portion of the care provided by each provider. Postpartum care or antepartum care is covered separately if provided by a different physician or group than the physician providing the delivery services. To be consistent with some commercial payers and Medicare, the physician or group providing the entire global obstetrical package may choose to report either the entire global package or may report the antepartum care, delivery, and postpartum care separately as each of these services is provided. Combinations of these components must be allowable under Medicaid NCCI editing. Components such as the antepartum care or postpartum care cannot be unbundled into individual visits.

Medicaid Provider Manual

Services that are not included in the global package include:

- Maternal or fetal echography or fetal echography procedures
- Fetal biophysical profile
- Chorionic villus sampling, any method
- Fetal contraction stress test
- Fetal nonstress test
- Hospital and observation care visits for premature labor (prior to 36 weeks gestation)

7.5 HIGH-RISK PREGNANCY

High-risk pregnancies are those with complicating conditions that are life-threatening to either the mother or fetus and, therefore, require more services than those provided in a routine pregnancy. When high-risk pregnancies require more visits than described for routine obstetrical care and more laboratory data than normally required, the additional services are covered in addition to the global obstetrical package. If beneficiary visits are required due to conditions unrelated to the pregnancy, they are also covered in addition to the global obstetrical package. Medicaid follows CPT guidelines for reporting high-risk pregnancy services.

7.6 MULTIPLE GESTATION

In the case of multiple gestation, Medicaid covers the services provided. Payment follows the multiple procedure rules. (Refer to the Billing & Reimbursement for Professionals Chapter, Maternity Care Services subsection, for additional information.) Providers must use a diagnosis code representing multiple gestation.

7.7 OB ENHANCED PAYMENTS

MDHHS provides an enhanced payment for each Medicaid delivery performed. This additional reimbursement is added to the fee reimbursed under FFS for the global maternity and delivery procedure codes. The maternity case rate paid to MHPs is also enhanced.

7.8 MATERNITY OUTPATIENT MEDICAL SERVICES PROGRAM

Under the Maternity Outpatient Medical Services (MOMS) program, pregnant women can enroll and receive pregnancy related care early in the pregnancy. Refer to the MOMS Chapter for additional information.

7.9 LACTATION SUPPORT SERVICES

Medicaid will reimburse for evidence-based lactation support services provided to Medicaid eligible postpartum women in the outpatient setting up to and through 12 months post-delivery. Services must be rendered by a licensed, qualified health professional as outlined. A maximum of two visits per pregnancy will be reimbursed for either a single or multiple gestation pregnancy. One visit is reimbursable per date of service.

Medicaid Provider Manual

7.9.A. PROVIDER CRITERIA

Lactation support and counseling services must be rendered by an Internationally Board Certified Lactation Consultant (IBCLC) credentialed by the International Board of Lactation Consultant Examiners (IBLCE) with possession of a valid and current IBCLC certification.

Rendering IBCLC providers must be Medicaid-enrolled physicians, physician assistants or advanced practice registered nurses. When a Medicaid-enrolled practitioner provides delegation and supervision within the confines of their scope of practice to an individual with possession of a valid and current IBCLC certification, that Medicaid-enrolled health professional may bill for comprehensive lactation support services.

For all IBCLC rendered services, a copy of the current, valid IBCLC certification is to be maintained by the supervising physician or employing organization, where applicable, in accordance with the record keeping requirements of the Medicaid program.

7.9.B. COVERED SUPPORTS AND SERVICES

Comprehensive lactation counseling services must include the following:

- A face-to-face encounter, provided in-person or via simultaneous audio-visual technology, with the beneficiary lasting a minimum of 30 minutes.
- Comprehensive maternal, infant and feeding assessment related to lactation.
- Provision of evidence-based interventions that, at a minimum, include:
 - Instruction in positioning techniques and proper latching to the breast;
 - Counseling in nutritive suckling and swallowing, milk production and release, frequency of feedings, and reasons to contact a health care professional; and
 - The provision of community support resource referrals, such as the Women, Infants, and Children (WIC) program, as indicated.
- Evaluation of outcomes from interventions.

Documentation must include a begin time and end time of services and a comprehensive description of the professional interventions provided. Documentation may be subject to review and post-payment audit.

Prenatal lactation education and support services are provided as part of the curriculum of childbirth education programs and will not be separately reimbursed. Reimbursement for lactation education and support received by beneficiaries post-delivery in the inpatient hospital is included in the inpatient hospital payment and will not be separately reimbursed.

Refer to the Billing & Reimbursement for Professionals Chapter of this manual for additional billing information.

7.10 MATERNAL INFANT HEALTH PROGRAM

Maternal Infant Health Program (MIHP) provides preventive health services that are delivered by certified MIHP agencies to high-risk pregnant women and infants born to high risk mothers. The purpose of MIHP is to reduce infant morbidity and mortality. The goal is to deliver a healthy, full term infant. Refer to the Maternal Infant Health Program Chapter for additional information about this program.

7.11 DOULA SERVICES

MDHHS certified doulas typically provide non-clinical physical, emotional, and educational support services to pregnant individuals during the prenatal, labor and delivery, and postpartum periods. Evidence indicates doula services are associated with improved birth outcomes. Refer to the Doula Services Chapter for additional information.

7.12 CENTERING PREGNANCY™

Group prenatal care is a service delivery model provided to pregnant individuals. Groups are facilitated by a trained healthcare provider and include individuals in similar stages of pregnancy. Group prenatal care models improve patient education and skill building and include opportunities for peer social support while maintaining the risk screening and physical assessment included in the individual prenatal maternity professional visit.

7.12.A. COVERED SERVICES

The Medicaid program will cover professional services associated with in-person, group prenatal care when delivered by accredited Centering Pregnancy™ providers. Centering Pregnancy™ is an evidence-based group prenatal care model that typically includes cohorts of 10 to 12 pregnant individuals within the same gestational period. Individuals are educated in health topics such as childbirth preparation, nutrition and exercise, stress management, breastfeeding, parenting, and contraception.

7.12.B. PROVIDER CRITERIA

Collaborative group sessions are led by a Medicaid-enrolled physician, physician assistant, or advanced practice registered nurse. This practitioner is generally the same practitioner who performs the in-person individual prenatal physical assessment.

Sites must be accredited with the Centering Healthcare Institute (CHI). Services must be provided in accordance with the most current Centering Pregnancy™ model of care.

Refer to the Billing & Reimbursement for Professionals chapter of this manual for additional billing information.

Refer to the Federally Qualified Health Centers chapter of this manual for additional billing guidance for services provided within the FQHC.

Medicaid Provider Manual

SECTION 8 – PHARMACY

A practitioner must report their individual National Provider Identifier (NPI) with a prescription order. An emergency room practitioner must report their individual NPI with a prescription order. Each practitioner at a teaching hospital must report their individual NPI with a prescription order that is submitted to the dispensing pharmacy. A prescription or prescription order must comply with state and federal laws.

Refer to the Pharmacy Chapter of this manual for additional information.

SECTION 9 – RADIOLOGY, RADIATION THERAPY AND NUCLEAR MEDICINE

9.1 RADIOLOGY AND DIAGNOSTIC IMAGING SERVICES

Medically necessary radiological services are covered when ordered by a qualified practitioner to diagnose or treat a specific condition based on the beneficiary's signs, symptoms, and past history as documented in the medical record. Radiology services include diagnostic imaging services and therapeutic radiology services such as proton beam therapy, nuclear medicine, computed tomography (CT) procedures, magnetic resonance imaging (MRI) services, diagnostic ultrasound, and other diagnostic and therapeutic services. Practitioners are required to perform or interpret radiologic services within their professional expertise and education within the confines of federal and State law. It is the expectation that practitioners conform with professional practice parameters and technical standards to ensure the most efficacious use of radiology and the delivery of safe, quality care. Medical need for all services must be documented in the medical record and is subject to post-payment review.

9.1.A. GLOBAL/COMPONENT SERVICES

Global services are covered for the physician or qualified healthcare provider in non-facility settings or the professional component is covered for the provider in any setting. The technical component is only covered when the service is provided in an appropriate non-facility setting. The global service and its professional component service cannot both be covered for the same service since the professional component is included in the global service.

When a physician or qualified healthcare provider reports a global procedure, the provider is responsible for the overall performance and quality of the test. The provider must either personally perform the test or it must be performed under a physician's supervision and direction when applicable. The provider must personally interpret the results and complete the written report. While some radiology procedures and diagnostic tests may not require the presence of a supervising physician on the premises, other procedures dictate that a physician be present and may even need to be directly involved in the performance of the procedure.

Interpretation of radiology services are covered for any physician or qualified healthcare provider trained in the interpretation of the study. The provider who interprets the study must be the one who evaluates the study and prepares and signs the written report for the medical record. Review of results and explanation to the beneficiary are part of the attending provider's E/M service and are not considered as interpretation of the study.

9.1.B. MULTIPLE SERVICES ON SAME DAY

Medicaid covers bilateral x-rays when medically necessary. Bilateral services are studies done on the same body area, once on the right side and once on the left side. Comparison films obtained for routine purposes are not covered. Providers should use a bilateral code when available. Medicaid also covers multiple studies of both areas if reported with the appropriate modifier. Examples would include bilateral wrist studies done before and after fracture care on both wrists the same day for the same patient or doing films to assess a patient's response to medical care, such as multiple chest films to monitor the cardiopulmonary status of a critically ill patient.

9.2 SPECIFIC RADIOLOGIC SERVICES

9.2.A. CT, MRI, PET SCANS

For CT, MRI and PET scans to be covered, all conditions of Certificate of Need (CON) must be met. These services are subject to standards for provision of the service that include specific staff and designation of who is qualified to interpret the results.

Radiographic images, including CT or MRI studies of the same anatomical area, are covered on the same day when medically indicated. The provider is responsible for using the most appropriate diagnostic test(s) according to current standards of practice. A CT and a myelogram may be covered on the same day; however, an MRI and a myelogram are not covered separately if done on the same day. Coverage of a CT of the spine is limited to one level per day, and coverage of an MRI is limited to two levels of the spine on the same day. Providers should be directing the study at the area of the suspected problem.

CT and MRI scans may be done with or without contrast media or both. When a scan is done without contrast followed by another with contrast, only the full service is covered. The global RVUs for CT and MRI contrast scans include allowance for high osmolar contrast media, and the RVUs for global MRIs include allowance for paramagnetic contrast media.

In certain instances, the use of low osmolar contrast media (LOCM) is separately covered. In the case of intra-arterial and intravenous radiological procedures, LOCM is covered separately for nonhospital patients with one or more of the following:

- A history of previous adverse reaction to contrast material, with the exception of a sensation of heat, flushing, or a single episode of nausea or vomiting;
- A history of asthma or allergy;
- Significant cardiac dysfunction, including recent or imminent cardiac decompensation, severe arrhythmia, unstable angina pectoris, recent myocardial infarction, and pulmonary hypertension;
- Generalized severe debilitation; or
- Sickle cell disease.

If the patient does not meet any of these criteria, the contrast media is considered bundled into the global service and is not covered separately.

When high dose contrast technique is used with MRI, the global service is covered for the procedure designated without contrast, then with contrast. The third MRI (again with contrast) is not covered separately. The contrast material used in the second MRI procedure is not covered separately; however, the contrast material for the third MRI procedure is covered separately.

9.2.B. CONTIGUOUS AREAS

Studies of contiguous areas, such as the wrist and hand, lumbosacral spine and pelvis, ankle and foot, are covered on the same day when medically necessary to visualize each space. The medical record must support the need for individual studies. If cervical, lumbosacral and thoracic views are performed, an entire spine study should be reported.

9.2.C. OBSTETRICAL ULTRASOUND

Obstetrical ultrasound studies are covered in addition to the global obstetrical package. More than two studies are covered only for high-risk conditions such as bleeding, placental abnormalities, fetal post-maturity, etc. The need for the additional studies, including the change in clinical symptoms, must be documented. Pelvic ultrasounds are not covered to diagnose pregnancy or vaginal infections. The use of ultrasound studies for routine fetal age determination in or preparatory for pregnancy termination procedures is considered part of the termination procedure and is not covered separately.

9.2.D. SCREENING MAMMOGRAPHY

Screening mammography, including clinically indicated digital breast tomosynthesis, is covered for individuals in accordance with current, evidence-based, generally accepted standards of medical practice. A practitioner referral or order is not required.

9.2.E. TRANSRECTAL OR PROSTATE ULTRASOUND

Transrectal or prostate ultrasound is covered when the patient is considered at high risk for prostate cancer. It is also covered for pathologic indications that include evaluation of prostatic nodule(s) or abnormalities of the seminal vesicles, staging of prostatic cancer, and monitoring of response to therapy for prostatic cancer.

9.3 RADIATION THERAPY

Medicaid covers medically necessary radiation therapy services provided to beneficiaries. CPT/HCPCS guidelines for radiation therapy services are followed.

Following the Medicare guidelines, many services are bundled into the treatment management codes and are not covered separately when the diagnosis is related to the weekly treatment diagnosis and the services are provided by the radiation oncologists or in conjunction with the therapy. The following services are included in the weekly treatment management service:

- Anesthesia
- Care of infected skin
- Checking treatment charts
- Continuing-care patient evaluation and examination
- Final medical examination
- Nutritional counseling

Medicaid Provider Manual

- Pain management
- Medical prescription
- Review and revision of the treatment plan
- Routine medical management of related problems
- Special care of ostomy
- Verification of dosage
- Written reports, progress notes
- Follow-up examination and care 90 days after the last treatment

Medicaid separately covers services furnished by a radiation physicist only when provided to a nonhospital beneficiary in a freestanding facility.

Professional services provided to hospital patients are covered only when personally performed by a physician.

Global physician services are only covered if provided in a freestanding, nonhospital setting.

9.4 NUCLEAR MEDICINE

Medicaid covers medically necessary nuclear medicine procedures. Providers are responsible for complying with Federal and State law requirements. Only professional services rendered to hospital patients are covered for the practitioner.

Medicaid covers global services when provided in a freestanding, nonhospital setting. Radionuclides used in the procedures are covered separately.

When specific nuclear medicine diagnostic procedures are performed, multiple procedure coverage rules apply. Generation and interpretation of automated data is covered as a part of the primary procedure.

9.5 TRANSPORTATION AND SET-UP OF PORTABLE X-RAY EQUIPMENT

The transportation of portable x-ray equipment, set-up, and personnel may be covered when furnished in a place or residence used as the patient's home, including a nursing facility, as reported by the corresponding HCPCS code. (Refer to the Independent Diagnostic Testing Facilities and Portable X-ray Suppliers chapters of this manual for additional information.)

SECTION 10 – HOSPITAL INPATIENT PHYSICIAN SERVICES

Medicaid covers physician services to hospital inpatients that are medically necessary and follow the requirements in this section.

10.1 VENTILATION MANAGEMENT

Ventilation management provided in the inpatient hospital setting is covered separately unless an E/M service is provided on the same day.

10.2 CRITICAL CARE

Medicaid covers critical care consistent with the CPT/HCPCS definitions and guidelines. Each day that critical care is provided, the medical record must support the level of service provided. The actual time spent with the patient delivering critical care services must be documented in the medical record.

10.3 RESPIRATORY CARE

Medicaid covers respiratory care as a separate service in the inpatient hospital setting for the anesthesiologist/physician who initiates respiratory care by setting up the respirator, placing the beneficiary on the respirator, and providing daily supervision of the beneficiary for the respiratory care alone.

10.4 STANDBY SERVICES

Medicaid does not cover the services of a standby surgeon, anesthesiologist or surgical team. Only direct beneficiary care is covered. Physician standby services are covered as a part of the hospital services.

SECTION 11 – SURGERY – GENERAL

Medicaid covers medically necessary surgical procedures.

11.1 GLOBAL SURGERY

Coverage for the global surgery package includes related services that are furnished by the physician who performs the surgery or by members of the same group with the same specialty. Medicaid policy is based on CMS guidelines for Medicare services for the global surgery package.

11.1.A. SERVICES INCLUDED IN THE GLOBAL SURGERY PACKAGE

- Pre-operative visits beginning with the day before the surgery for major surgeries and the day of the surgery for minor surgeries.
- Intra-operative services that are a usual and necessary part of a surgical procedure.
- Complications following surgery. This includes all additional medical or surgical services required of the surgeon during the post-operative period due to complications that do not require return to the operating room. The surgeon's visits to a patient in an intensive care or critical care unit are also included.
- Follow-up visits within the post-operative period related to recovery from the surgery.
- Post-surgical pain management by the surgeon.
- Supplies for certain services furnished in a physician's office.
- Miscellaneous services and items such as dressing changes, local incisional care, removal of operative pack, removal of cutaneous sutures and staples, lines, wires, tubes, drains, casts, and splints; insertion, irrigation and removal of urinary catheters, routine peripheral intravenous lines, nasogastric and rectal tubes, and changes and removal of tracheostomy tubes.

11.1.B. SERVICES NOT INCLUDED IN THE GLOBAL SURGERY PACKAGE

- The surgeon's initial consultation or evaluation of the problem to determine the need for surgery.
- The office or hospital visit to decide upon surgery if it occurs on the day before or the day of a major surgery.
- Other physicians' services, except when the surgeon and the other physician(s) agree on the transfer of care. (The transfer of care agreement may be in the form of a letter or an annotation in the discharge summary, hospital records, or ambulatory surgical center records.)
- Visits unrelated to the diagnosis for which the surgical procedure was performed.
- Treatment of the underlying condition or an added course of treatment that is not part of the normal recovery from surgery.
- Diagnostic tests and procedures, including diagnostic radiology procedures.

Medicaid Provider Manual

- Clearly distinct surgical procedures that are not repeat procedures, or treatment for complications during the post-operative period. A new post-operative period begins with the subsequent procedure.
- Staged procedures done in two or more parts for which the decision to stage the procedure is made prospectively or at the time of the first procedure. Examples include procedures to diagnose and treat epilepsy in succession within 90 days of each other.
- Laser eye surgeries (and all other services whose CPT/HCPCS description includes one or more sessions) performed in a series over a period of weeks or months are not considered staged procedures. All sessions during the post-operative period of the first session are covered as a part of the global package.
- Chemotherapy and/or radiation therapy following cancer surgery.
- Treatment for post-operative complications that requires a return to the operating room. For this purpose, an operating room is a place of service specially equipped and staffed for the sole purpose of performing surgical procedures, including a cardiac catheterization suite, a laser suite, and an endoscopy suite. Not included is a patient's room, a minor treatment room, a recovery room, or intensive care unit unless the patient's condition is so critical there is insufficient time for transportation to an operating room.
- A second, more extensive procedure when a less extensive procedure fails.
- A therapeutic service that is required during the post-operative period of a diagnostic service. Example: A D&C followed by a therapeutic hysterectomy performed during the D&Cs global period.
- Immunosuppressive therapy for organ transplants.
- Critical care services unrelated to the surgery when a seriously injured or burned patient is critically ill and requires constant attendance of the physician.
- Visits that are a significant, separately identifiable service on the same day as a minor surgery or endoscopy. For example, a visit for a full evaluation of a lump in the breast on the same day as a removal of a lesion on the back.
- When a beneficiary is returned to the operating room for treatment of complications, only the intra-operative portion of the service is covered.

11.2 PARTIAL GLOBAL PACKAGE

Services of physicians furnishing less than the full global surgery package are covered. Modifiers are used to identify the portion of the global surgery package that is covered separately when performed by different physicians under certain circumstances. Only procedures with 10- or 90-day global periods are eligible for partial global surgery package coverage.

Surgeons should use the modifier for surgical care only when another physician provides all or part of the outpatient post-operative care. MDHHS assumes that the surgeon is responsible for pre-operative, intra-operative and inpatient hospital post-operative care at a minimum. The modifier for post-operative management only is used when a second physician provides all or part of the post-operative care after hospital discharge in the global package. Surgeons must transfer care to the second physician, and both must keep a copy of the written transfer agreement in the beneficiary's medical record.

11.3 BILATERAL SURGERY

Bilateral surgeries are procedures performed on both sides of the body during the same operative session or on the same day. The descriptions for some procedure codes include the terms "bilateral" or "unilateral or bilateral". The RVUs for these codes reflect the work involved if done bilaterally as the description states. Other procedure code descriptions do not include bilateral but may be performed bilaterally. The bilateral procedure modifier is used with these procedure codes.

Reimbursement for a bilateral procedure reported appropriately with modifier 50 is based on the lower of the amount billed or 150 percent of the fee screen for the procedure.

11.4 MULTIPLE SURGICAL PROCEDURES

Multiple surgeries are separate procedures performed by a physician on the same beneficiary during the same operative session or on the same day for which separate coverage may be allowed. Co-surgeons, surgical teams, or assistants at surgery may participate in performing multiple surgeries on the same beneficiary on the same day.

When the same physician performs multiple surgical procedures during one operative session, all services are covered separately. MDHHS follows CMS multiple surgery guidelines for coverage of the procedures. If an integral procedure (one that is part of a larger surgery and is necessary to perform the larger surgery) is performed, it is covered as a part of the larger procedure. If two or more physicians each perform distinctly different, unrelated surgeries on the same patient on the same day (e.g., in some multiple trauma cases), the procedures are covered separately.

Multiple surgery reimbursement policy applies to procedures performed during the same operative session or on the same day by the same physician or physicians of the same specialty in the same group practice. Medicaid reimburses up to 100 percent of the fee screen for the most complex surgical procedure and up to 50 percent of the fee screens for the second through the fifth surgical procedures. If more than five multiple procedures are performed, an operative report must be provided with the claim.

11.5 MULTIPLE ENDOSCOPY PROCEDURES

Multiple endoscopy procedures are reimbursed based on the full fee for the highest paid service, plus the difference between the next highest and the base endoscopy. When related endoscopies are performed on the same day as other endoscopies or other surgical procedures, the standard multiple surgery rules apply. The multiple surgery rules consider the coverage for the related endoscopies as one service, and any other unrelated endoscopy or procedure as another service.

11.6 MULTIPLE SURGEONS

Under some circumstances, the individual skills of two or more surgeons are required to perform surgery on the same beneficiary during the same operative session. This may be required due to the complex nature of the procedures or the beneficiary's condition. Medicaid reimbursement policy is based on CMS guidelines for Medicare services for multiple surgeons.

11.7 Co-Surgeons

Two surgeons who work together as primary surgeons performing distinct parts of a total service are considered co-surgeons. The medical record must contain sufficient documentation supporting the medical necessity for co-surgeons. Report the modifier indicating two surgeons for the services furnished by each co-surgeon. The primary procedure is reimbursed at the full screen times 62.5 percent. Second and subsequent services are paid at 50 percent of the full-allowed amount times 62.5 percent.

11.8 TEAM SURGEONS

Three or more surgeons who work together as primary surgeons to perform a specific procedure are considered team surgeons. Sufficient documentation must be submitted with the claim to establish that a team was medically necessary. If two or more surgeons are of the same specialty, the reason each was needed must be documented also. Report the surgical team modifier when billing for services rendered by each team surgeon. Each surgeon's dictated operative report must be included with the claims. Reimbursement is based on individual consideration.

11.9 ASSISTANT AT SURGERY/ASSISTANT SURGEON

Medicaid covers assistant at surgery services for designated surgical procedures. Assistant at surgery services must be considered reasonable and necessary for the surgery performed. An assistant at surgery actively assists the primary surgeon during the surgical procedure. Coverage for assistant at surgery services is not allowed when co-surgeons or team surgeons are utilized.

Medicaid does not cover assistant surgeon services in a teaching hospital setting unless a qualified resident is not available. The medical record must document the circumstances causing the unavailability of a qualified resident. The surgical procedure is reported with appropriate modifier identifying use of an assistant surgeon.

Medicaid covers assistant at surgery services performed by a second physician, a physician's assistant (PA), a certified nurse practitioner (NP), a certified clinical nurse specialist (CNS) and, in limited instances, a certified nurse midwife (CNM). PA, NP, CNS and CNM services as assistant at surgery must be under the delegation and supervision of the physician employing the PA, NP, CNS or CNM, or a physician employed by the same group practice that employs the PA, NP, CNS or CNM. If the PA, NP, CNS and/or CNM are employees of the hospital, their services are covered as a part of the hospital charges.

11.10 SURGEONS PERFORMING DISTINCTLY DIFFERENT UNRELATED PROCEDURES

If two or more physicians each perform distinctly different, unrelated surgeries on the beneficiary on the same day, the payment adjustment rules for multiple surgeries or co-surgeons do not apply. In such cases, the multiple procedures modifier should not be used unless one of the surgeons individually performs multiple surgeries.

11.11 VISION PROCEDURES AND CARE

Ophthalmologists may transfer post-operative care associated with cataract removal or insertion of intraocular lens prosthesis to an optometrist. In this case, the ophthalmologist who performs eye surgery but does not provide the post-surgical care must report the surgical care only modifier with the surgery procedure code. This includes the pre-operative care, the surgery, and any in-hospital post-operative

Medicaid Provider Manual

care. Post-operative care after hospital discharge is covered separately for the provider that the care was transferred to using the surgery code with the post-operative management only modifier.

Surgical procedure descriptions that include the phrase "one or more sessions" include all sessions. These procedures include the 90-day global period during which the procedure(s) can be completed in one or more session(s). These procedures include trabeculoplasty by laser surgery, iridotomy/iridectomy by laser or photocoagulation, repair of retinal detachment, destruction of retinal or choroid lesions. The code description in CPT identifies when one or more sessions are included. Separate coverage for a second or subsequent session of the same procedure during the global period of the initial service is limited to cases where the modifier reported with the procedure code indicates that services were performed on different eyes.

SECTION 12 – SURGERY - SPECIAL CONSIDERATIONS

12.1 ABORTIONS

Medicaid only covers an abortion performed by a physician and related hospital charges (e.g., room, supplies) when it has been determined medically necessary to save the life of the mother or the pregnancy is the result of rape or incest. Medicaid funding is not available for any elective therapeutic abortion or service related to the performance of such abortion unless one of these criteria has been met.

Physicians must certify on a completed Certification for Induced Abortion form (MSA-4240) that, for medical reasons, an abortion was necessary to save the life of the mother or the beneficiary's medical history indicates that the terminated pregnancy was the result of rape or incest.

The physician who completes the MSA-4240 must also ensure completion of the Beneficiary Verification of Coverage form (MSA-1550) and is responsible for providing copies of the forms for billing purposes to any other provider (e.g., anesthesiologist, hospital, laboratory) that would submit claims for services related to the abortion.

Copies of the MSA-4240 and the MSA-1550 are not required for claims for ectopic pregnancies or spontaneous, incomplete, or threatened abortions.

Providers may attach copies of the MSA-4240 and the MSA-1550 to the claim or submit them via fax.

Federal regulations require that these forms be submitted to Medicaid before reimbursement can be made for any abortion procedure. This process can eliminate submitting paper attachments for abortion claims and pre-confirms the acceptability of the completed forms, as well as reduces costly claim rejections.

The medical record must include a complete beneficiary history, including the medical conditions that made the abortion necessary to save the life of the mother. When the pregnancy is the result of rape or incest, the medical record must include the circumstances of the case and that the pregnancy was the result of rape or incest.

(Refer to the Forms Appendix for copies of MSA-4240 and MSA-1550. The forms are also available on the MDHHS website. Refer to the Directory Appendix for website and contact information.)

12.2 BREAST RECONSTRUCTION SURGERY

Medicaid covers breast reconstruction surgery following the diagnosis and treatment of breast cancer. Covered services include procedures related to the affected and the contralateral unaffected breast following a medically necessary mastectomy. The prior authorization requirements for these specified breast reconstruction procedure codes are waived when billed with appropriate ICD breast cancer diagnosis codes. The specified CPT codes subject to this PA waiver are identified in the Medicaid Code and Rate Reference tool. (Refer to the Directory Appendix for website information.)

12.3 COSMETIC SURGERY

Medicaid only covers cosmetic surgery if PA has been obtained. The physician may request PA if any of the following exist:

- The condition interferes with employment.
- It causes significant disability or psychological trauma (as documented by psychiatric evaluation).
- It is a component of a program of reconstructive surgery for congenital deformity or trauma.
- It contributes to a major health problem.

The physician must identify the specific reasons any of the above criteria are met in the PA request.

Physicians should refer to the General Information for Providers Chapter for specific information for obtaining authorization.

12.4 DESTRUCTION OF LESIONS

Medicaid covers destruction of lesions by methods such as electrocautery, cryocautery, laser, and surgery.

Coverage of the surgical destruction of lesions that involves more extensive procedures is limited to the hospital/facility setting. Less extensive procedures are covered in the office/non-facility setting. (Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding which procedures require a hospital/facility setting for coverage and which procedures are covered in the office/non-facility setting.) If a repeat procedure to the same lesion is necessary, it is covered as an office visit.

Chemocautery or chemical destruction of any lesion, such as the use of a nitrate stick or podophyllin, is covered as a part of the office visit.

12.5 HYSTERECTOMY

Hysterectomies are covered only if the beneficiary has been informed orally, prior to surgery, that a hysterectomy will render them permanently incapable of reproducing. The beneficiary or their representative must sign a written acknowledgment of receipt of that information. The Acknowledgment of Receipt of Hysterectomy Information (MSA-2218) serves as the written acknowledgment.

All items on the MSA-2218 must be completed and the form must be signed by the beneficiary (or representative) and the physician (MD or DO).

Federal regulations prohibit Medicaid coverage for hysterectomies performed solely for the purpose of sterilization. Hysterectomies are also prohibited when performed for family planning purposes even when there are medical indications, which alone do not indicate a hysterectomy.

Medicaid Provider Manual

12.5.A. EXCEPTIONS

The MSA-2218 is not required in the following situations:

- The beneficiary was already sterile before the hysterectomy.
- The beneficiary requires a hysterectomy because of a life-threatening emergency situation. It was not possible for the physician to inform the beneficiary in advance that the surgery would make them permanently incapable of reproducing.
- The hysterectomy (as covered according to Medicaid policy) was performed during a period of retroactive eligibility.

12.5.B. ACKNOWLEDGEMENT OF RECEIPT OF HYSTERECTOMY INFORMATION

Providers may attach a copy of the MSA-2218 to the claim or submit the MSA-2218 via fax.

Federal regulations require that this form be submitted to Medicaid before reimbursement can be made for any hysterectomy procedure. This process can eliminate submitting paper attachments for hysterectomy claims and pre-confirms the acceptability of the completed acknowledgement form, as well as reduces costly claim rejections.

(Refer to the Forms Appendix for a copy of MSA-2218. The form is also available on the MDHHS website. Refer to the Directory Appendix for website and contact information.)

12.5.C. PROCEDURE FOR ACKNOWLEDGEMENT OF RECEIPT OF HYSTERECTOMY INFORMATION APPROVAL

- The provider who obtains the required Acknowledgement completes a cover sheet (typed or printed) which must include: beneficiary name, beneficiary Medicaid ID number, provider's contact person, provider fax number, and provider phone number.
- Fax the cover sheet and completed acknowledgement form to the Medicaid Payments Division, Hysterectomy Acknowledgement Form Approval. (Refer to the Directory Appendix for contact information.) Do not fax invoices.
- The form is reviewed within five working days, and a notice of errors or acceptance is returned to the provider. When notified that the acknowledgement form has been accepted and is on file, inform the other providers via a copy of the response. All invoices related to the service may be submitted without attachments.
- If there is no response within five working days:
 - Confirm that the fax is working.
 - Be sure that the cover sheet included the necessary information for Medicaid staff to respond to the provider.
 - Resend the information if necessary.

12.6 ORGAN TRANSPLANTS

Medicaid covers organ transplants and related services if all requirements for these services are met. PA is required for all beneficiary, donor, and potential donor services related to all organ transplants except cornea and kidney transplants.

Refer to the Hospital Chapter for further information.

12.7 STERILIZATION

Medicaid covers sterilization procedures when specific requirements are met. Medicaid defines a sterilization procedure as any medical procedure, treatment, or operation for the purpose of rendering an individual (male or female) permanently incapable of reproducing. Surgical procedures performed solely to treat an injury or pathology are not considered sterilizations under Medicaid's definition of sterilization, even though the procedure may result in sterilization (e.g., oophorectomy). The physician is responsible for obtaining the signed Consent for Sterilization (MSA-1959/HHS-687).

Sterilizations are only covered if all of the following are met:

- The beneficiary is at least 21 years of age at time of informed consent.
- The beneficiary is not legally declared to be mentally incompetent.
- The beneficiary is not institutionalized in a corrective, penal, or mental rehabilitation facility.
- Informed consent is obtained.
- Informed consent is not obtained while the beneficiary is in labor or childbirth; seeking to obtain or obtaining an abortion; or under the influence of alcohol or other substances that affect the beneficiary's state of awareness.
- Informed consent must be obtained not less than 30 days nor more than 180 days prior to sterilization.

The only exception is in the case of premature delivery or emergency abdominal surgery. If the premature delivery or emergency abdominal surgery occurred before the 30-day waiting period is over, at least 72 hours must have passed between the time of obtaining informed consent and the sterilization procedure.

- In cases of premature delivery, informed consent must have been given at least 30 days before the expected delivery date. The consent form must indicate the expected date of delivery.
- In cases of abdominal surgery, the emergency nature of the surgery must be clearly identified (e.g., diagnosis, physician's statement, or hospital summary). The nature of the emergency must be included on the consent form.

12.7.A. INFORMED CONSENT PROCESS

The following procedures must be included in the process of informed consent:

- The beneficiary must be advised that the sterilization will not be performed for at least 30 days after the MSA-1959/HHS-687 is signed, except in cases of emergency abdominal surgery or premature delivery.
- The person who obtains informed consent must offer to answer any questions the beneficiary may have concerning the procedure.
- Suitable arrangements must be made to ensure that information is effectively communicated to the deaf, blind, or otherwise handicapped.
- An interpreter must be provided if the beneficiary does not understand the language used on the consent form or the language used by the person obtaining informed consent.
- The beneficiary is permitted to have a witness of their choice present when informed consent is obtained.
- At the time of the informed consent, a copy of the consent form must be given to the beneficiary.

All of the following sterilization information and advice must be presented orally to the beneficiary both at the time the beneficiary signs the MSA-1959/HHS-687 and again by the physician performing the sterilization shortly before the procedure (e.g., during the pre-operative examination):

- Advice that the beneficiary is free to withhold or withdraw consent to the procedure at any time before the sterilization without affecting the right to future care or treatment and without loss or withdrawal of any federally funded program benefits to which the beneficiary might be otherwise entitled.
- A description of available alternative methods of family planning and birth control.
- Advice that the sterilization procedure is considered to be irreversible.
- A thorough explanation of the specific sterilization procedure to be performed.
- A full description of the discomforts and risks that may accompany or follow the procedure, including an explanation of the type and possible effects of any anesthetic to be used.
- A full description of the benefits or advantages that may be expected as a result of the sterilization.

The beneficiary, the person who obtained the consent, and the interpreter (if required) must sign the MSA-1959/HHS-687 not less than 30 days nor more than 180 days prior to the sterilization. The physician performing the sterilization must also sign and date the MSA-1959/HHS-687 after the sterilization has been performed.

No additional reimbursement is allowed for the examination or the sterilization explanation.

Medicaid Provider Manual

If the procedure occurs in a place other than that in which the consent form is signed (e.g., forms were signed in the physician's office, but the procedure will be rendered in the hospital), the person obtaining consent must send a copy of the completed form to the place of surgery. The second provider (e.g., hospital) is responsible for acquiring the physician's statement (if not previously documented) and for photocopying the signed form and supplying copies to any other Medicaid provider who is billing as a participant in the sterilization.

A copy of the completed MSA-1959/HHS-687 is required for coverage of charges related to a sterilization procedure. This form may be faxed or attached to the claim form.

12.7.B. CONSENT FOR STERILIZATION FORM

Providers may attach a copy of the Consent for Sterilization (MSA-1959/HHS-687) form to the claim or submit the MSA-1959/HHS-687 via fax.

Federal regulations require that this form be submitted to MDHHS before reimbursement can be made for any sterilization procedure. This process can eliminate submitting paper attachments for sterilization claims, and pre-confirms the acceptability of the completed consent form.

(Refer to the Forms Appendix for a copy of MSA-1959/HHS-687. Refer to the Directory Appendix for website and contact information.)

12.7.C. PROCEDURE FOR CONSENT FOR STERILIZATION FORM APPROVAL

- The provider who obtains the required Consent and completed MSA-1959/HHS-687 completes a cover sheet (typed or printed) which must include: beneficiary name, beneficiary Medicaid ID number, provider's contact person, provider fax number, and provider phone number.
- Fax the cover sheet (according to Document Management Portal instructions) and completed MSA-1959/HHS-687 to the Medicaid Payments Division, Sterilization Consent Form Approval. (Refer to the Directory Appendix for contact information.) Do not fax invoices.
- The MSA-1959/HHS-687 is reviewed within five working days, and a notice of errors or acceptance is returned to the provider. When notified that the MSA-1959/HHS-687 has been accepted and is on file, inform the other providers via a copy of the response. All invoices related to the service may be submitted without attachments.
- Providers may then submit claims (either electronic or hard copy) to Medicaid. The remarks section or appropriate electronic segment must include the statement "Consent on File."
- When sterilization claims are received with this information in the remarks section, consent form edit requirements are forced if the submitted invoice matches the consent form on file.

Medicaid Provider Manual

- If there is no response within five working days:
 - Confirm that the fax is working.
 - Be sure that the cover sheet included the necessary information for Medicaid staff to respond to the provider.
 - Resend the information if necessary.

12.7.D. REVERSAL OF STERILIZATION

Services to reverse a previous sterilization are not covered by Medicaid.

Medicaid Provider Manual

SECTION 13 – DURABLE MEDICAL EQUIPMENT/ORTHOTICS/PROSTHETICS

Refer to the Medical Supplier Chapter of this manual for additional information.

SECTION 14 – BEHAVIORAL HEALTH AND SUBSTANCE USE DISORDER SERVICES

14.1 BEHAVIORAL HEALTH SERVICES

Medicaid covers behavioral health services for diagnostic or active treatment purposes. Behavioral health services are covered by the local PIHP/CMHSP for services included under the capitation payments to the PIHPs/CMHSPs. (Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter for additional information.) For services not included in the capitation payments to the PIHP/CMHSP, behavioral health services are covered through Medicaid Health Plans or FFS Medicaid. Under FFS, behavioral health services may be provided by a physician (MD or DO), psychologist, social worker, professional counselor, or marriage and family therapist (as defined in the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter, Non-Physician Behavioral Health Appendix). (Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding covered services.)

Beneficiaries enrolled in an MHP will receive behavioral health services through the health plan. (Refer to the Medicaid Health Plans Chapter of this manual for additional information.)

(Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter of this manual for services covered by the PIHPs/CMHSPs and authorization requirements.)

Psychological Testing	Medicaid covers psychological testing that is reasonable and necessary for diagnosing the beneficiary's mental or developmental status and strengths and needs. If a beneficiary requires psychological testing more than once per year, documentation of medical necessity must be maintained in the medical record. Psychological testing must be ordered by a physician (MD or DO) and may be performed by a psychologist who is fully licensed, limited-licensed, or temporary limited-licensed. This order must be kept in the beneficiary's clinical record. Supervision of limited-licensed and temporary limited-licensed psychologists must comply with the requirements of Michigan Public Act 368 of 1978, as amended.
Inpatient Psychiatric Admissions	<p>Inpatient stays in a psychiatric unit of a general hospital are covered for beneficiaries of any age. Inpatient treatment, including related psychiatric visits, in a freestanding psychiatric hospital, both private and state owned, is limited to eligible beneficiaries under age 21, and age 65 and older. If the beneficiary was an inpatient immediately prior to attaining age 21, they would be eligible to continue as an inpatient until age 22. If the beneficiary is discharged at some time following their 21st birthday, coverage terminates on the discharge date.</p> <p>All psychiatric admissions and continued stays must be authorized by the local PIHP/CMHSP. (Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter of this manual for specific coverages and authorization requirements.)</p>

Medicaid Provider Manual

Psychiatric Partial Hospitalization

Psychiatric coverage includes partial hospitalization on a day-care or night-care plan for all beneficiaries, regardless of age. To be eligible for partial hospitalization, the beneficiary must be receiving active psychiatric treatment provided under the direction of a psychiatrist.

All partial hospitalization admissions and continued stays must be authorized by the local PIHP/CMHSP. (Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter of this manual for specific coverages and authorization requirements.)

14.2 SUBSTANCE USE DISORDER SERVICES

Most substance use disorder (SUD) services provided to Medicaid beneficiaries are covered through the local PIHP/CMHSP. PIHPs/CMHSPs are responsible for direct payment for inpatient psychiatric or partial hospitalization services, related physician services, and specialized community mental health clinical and rehabilitation services that the PIHP/CMHSP has prior authorized. Providers should not bill MDHHS for these services. All providers are encouraged to utilize this system when and wherever possible.

14.2.A. ACUTE CARE DETOXIFICATION

Acute detoxification services are reimbursed directly by MDHHS for both MHP enrollees and FFS beneficiaries.

Admission to the acute care setting for a diagnosis of substance use must meet at least one of the following criteria as reflected in the physician's orders and patient care plans:

- Vital signs, extreme and unstable
- Uncontrolled hypertension, extreme and unstable
- Delirium tremens, (e.g., confusion, hallucinations, seizures) or a documented history of delirium tremens requiring treatment
- Convulsions or multiple convulsions within the last 72 hours
- Unconsciousness
- Occurrence of substance abuse with pregnancy and monitoring the fetus is vital to the continued health of the fetus
- Insulin treated diabetes complicated by diabetic ketoacidosis
- Suspected diagnosis of closed head injury based on trauma injury
- Congestive heart disease or ischemic heart disease, or significant arrhythmia as examples of active symptomatic heart disease
- Suicidal ideation and gestures necessitating suicidal precautions as part of treatment
- Blood alcohol level 350 mg/dl with a diagnosis of alcohol abuse
- Blood alcohol level 400 mg/dl with diagnosis of alcohol dependence
- Active presentation of psychotic symptoms reflecting an emergent/urgent condition

14.2.B. MEDICATION-ASSISTED TREATMENT

MAT is the use of medications often used in combination with counseling and behavioral therapies to provide a whole-patient approach to the treatment of substance use disorders (SUDs). Medications used in MAT are approved by the Food and Drug Administration (FDA). MAT programs are clinically driven and tailored to meet each patient's needs. For additional information regarding MAT, refer to the Medication-Assisted Treatment (MAT) subsection of the Behavioral Health and Intellectual and Developmental Disability Supports and Services chapter.

14.2.C. PRIMARY CARE OFFICE-BASED SUBSTANCE USE TREATMENT (OBSUT)

OBSUT services may be reimbursed directly by MDHHS or through the Medicaid Health Plans (MHP) when provided to MHP enrollees and Fee for Service (FFS) beneficiaries based upon their enrollment. Primary healthcare providers (which encompasses the following healthcare providers: Physicians [MD/DO], Nurse Practitioners, Physician Assistants, Clinical Nurse Specialists, Certified Nurse Midwives, Obstetricians/Gynecologists, and Pediatricians) in an office-based setting who are licensed or otherwise trained to provide SUD services and behavioral health providers (Licensed Psychologist [doctoral level], Licensed Social Worker [master's level], Licensed Marriage and Family Therapist [master's or doctoral level], Licensed Professional Counselor [master's or doctoral level], Limited Licensed Psychologist [master's or doctoral educational level] under the supervision of an enrolled, fully-licensed psychologist [except as noted in Section 333.18223 of the Public Health Code] who are associated with them, and who do not have a specialty SUD benefit services contract with a PIHP) may be reimbursed through the Medicaid FFS program or through the MHPs. OBSUT services provided by qualified providers, as identified above, will be considered for reimbursement through the FFS program or through the MHPs when the beneficiary meets the American Society of Addiction Medicine (ASAM) criteria for outpatient treatment.

Providers are required to provide services consistent with clinical practice guidelines established by the Substance Abuse and Mental Health Services Administration (SAMHSA) and ASAM.

The following services related to substance use treatment will qualify for FFS or MHP reimbursement when a beneficiary meets ASAM criteria for outpatient treatment and has a primary diagnosis of substance use disorder (use, abuse and dependence) as classified by the International Classification of Diseases, Version 10 (ICD-10):

- Evaluation and Management services
- Consultation services
- Psychotherapy services
- Psychiatric Collaborative Care Management services
- Behavioral Health Care Management
- Screening, Brief Intervention and Referral to Treatment (SBIRT)

Medicaid Provider Manual

- Medications for substance use treatment

Substance use treatment requires a multi-faceted and individualized approach to reach full treatment potential that may include screening and assessment, medications and medication management, and counseling and/or other psychosocial supports.

To reach optimal treatment, beneficiaries must be actively involved in their treatment and, as such, it is important that all providers coordinate care. Beneficiaries with significant substance use disorder may require assistance with transportation, housing, job resources, and other important life aspects that impact a beneficiary's recovery. Primary healthcare providers must ensure beneficiaries have access and receive referral to PIHPs for further assessment and treatment, and any of the other supports and services that are available (i.e., PIHP specialty services, community-based services, and natural supports) as needed to ensure desired treatment results.

PIHPs/CMHSPs, FFS and MHPs must partner as needed in overseeing and coordinating the treatment plan, knowing that office-based substance use treatment may be only part of the services necessary to achieve successful outcomes.

When making a referral to a PIHP, primary healthcare providers must communicate with the PIHP who is receiving the call to let them know they are about to transfer the beneficiary. The PIHP team should be supplied with the relevant background information and should have the necessary expertise to assist the beneficiary. Primary healthcare providers agree to track referrals and conduct further outreach if necessary.

Participating providers must observe applicable State and Federal laws, rules, regulations, and policies, including Michigan Automated Prescription System (MAPS) prescribing requirements. Refer to the Directory Appendix for website information regarding MAPS.

(Refer to the General Information for Providers Chapter for additional information on enrollment in CHAMPS.)

14.2.D. ADDITIONAL SUBSTANCE USE DISORDER SERVICES

Medicaid covers additional substance use disorder services through capitation payments to the PIHPs/CMHSPs. (Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter of this manual for coverage details and authorization requirements.)

14.3 PSYCHIATRIC COLLABORATIVE CARE MODEL (CoCM) SERVICES

14.3.A. GENERAL INFORMATION

CoCM is a model of integrated behavioral health service which is typically provided within the primary care setting. The evidence-based model includes a person-centered care team, weekly and/or monthly monitoring of person-centered goals, and referral to behavioral health support services if goals are unmet after an initial six-month episode of care. CoCM uses team-based collaborative and management services which are provided under the direction and supervision of a treating physician or other qualified healthcare

Medicaid Provider Manual

professional and utilizes a measurement-based treatment-to-target approach. The CoCM team includes the primary care provider, a behavioral health care manager, a psychiatric consultant and the FFS or MHP beneficiary. The model requires the use and maintenance of a patient registry, typically maintained by the behavioral health care manager, which is to be accessible by the primary care provider and psychiatric consultant. CoCM allows for behavioral health integration services to be delivered in a familiar setting that helps engage beneficiaries in care, adapts to their changing needs over time, and reduces the likelihood of duplication of services by addressing both physical and behavioral health care in one setting.

14.3.B. TARGET POPULATION

CoCM is intended for beneficiaries who typically have behavioral signs and/or symptoms of a newly diagnosed behavioral health condition, need help engaging in treatment, have not responded to care delivered in a non-psychiatric setting or require further assessment, engagement and management prior to consideration of a referral to a psychiatric care setting.

These services are not intended to manage severe and/or persistent conditions which require specialty care. Eligible conditions include, but are not limited to, mild to moderate depression, anxiety, bipolar disorder, attention deficit disorder, substance use disorder (SUD), and individuals who may not be deemed eligible for specialty services through CMHSP.

14.3.C. PSYCHIATRIC COLLABORATIVE CARE MODEL

Medicaid enrolled providers must be able to demonstrate they are following the evidence-based best practices of CoCM. The model is most effective when all five core principles are in place and incorporated into service delivery. These principles include:

- **Person-centered care:** The beneficiary is part of the team and makes the ultimate decisions regarding their treatment and based on their own goals.
- **Measurement-based treatment-to-target strategy:** The use of validated tools allows measurement of beneficiary signs and symptoms.
- **Population-based care:** The patient registry allows monitoring of beneficiary outcomes by the care team over time and can be utilized in conjunction with, or alongside, existing beneficiary health records.
- **Evidence-based treatment:** Beneficiaries are offered evidence-based treatment that may include medications and brief therapeutic interventions.
- **Accountable care:** The CoCM team of providers is accountable for all beneficiary care, including quality and clinical outcomes for beneficiaries receiving CoCM support services.

14.3.C.1. EPISODE OF CARE

An episode of care begins when a beneficiary starts CoCM and an episode of care ends when a beneficiary either:

Medicaid Provider Manual

- Fulfills treatment goals and the beneficiary returns to usual primary care follow-up;
- Fails to attain treatment goals, fails to improve or their condition worsens and requires referral to specialty services, or
- A break in services for six consecutive months or more occurs, at which point a new episode of care begins.

14.3.C.2. MEASUREMENT-BASED TREATMENT TO TARGET STRATEGY

The model utilizes validated tools which allows for measurement of beneficiary signs and symptoms. At a minimum, the POC for each beneficiary should be adjusted every 10-12 weeks based on the goal of reducing measured symptoms. Outcome measures are tracked in a patient registry. For example, if a beneficiary is recommended to engage in evidence-based therapy and does not exhibit symptom measurement improvement after 10 weeks, the psychiatric consultant may recommend an adjustment to treatment in an effort to reach person-centered goals.

14.3.C.3. REQUIRED DOCUMENTATION

CoCM is a data-driven service delivery model that requires the use of a patient registry and corresponding POC for each beneficiary. The registry can be part of, or maintained alongside, an already existing Electronic Health Record (EHR). Typically, the behavioral health care manager is responsible for maintaining these tools and ensuring all documentation is included. CoCM services are most effective when the psychiatric consultant has direct access. Documentation must support the services provided and follow Medicaid documentation requirements, including consent for treatment. Services must be provided within the confines of state and federal law. Behavioral health care managers are required to ensure all aspects of registry/POC are included in the documentation.

Documentation requirements, at a minimum:

- Beneficiary information,
- Assessment, treatment plan, including evidence-based treatment interventions,
- Monitoring of individual beneficiary progress,
- Referrals, and
- Medication management.

The patient registry, at a minimum, must include the following key components:

- Date of enrollment and date of most recent contact with care team,
- Initial and most recent validated outcome measure,
- Prompt treatment-to-target strategies for treatment adjustment according to changes in validated tool scores, such as a flagging/alert system or systematic weekly review of the patient registry, and
- Facilitation of efficient, systematic psychiatric caseload review.

14.3.D. COLLABORATIVE CARE TEAM CRITERIA

All team members must participate in the care and treatment of the beneficiary to be considered as a covered CoCM service. Services are reported by the primary care provider and include the services of the treating physician, behavioral health care manager and the psychiatric consultant who is contracted to provide consultative services to the primary care provider. Psychiatric consultants typically make recommendations to the behavioral health care manager who will then convey recommendations to the treating physician. The psychiatric consultant does not typically provide direct consultation to the treating physician or direct treatment to beneficiaries, but instead works through the behavioral health care manager.

Primary Care Provider or Treating Physician	<p>A licensed Medicaid-enrolled health care provider (e.g., MD/DO, certified Nurse Practitioner [NP], certified Clinical Nurse Specialist [CNS], Physician Assistant [PA]), who will:</p> <ul style="list-style-type: none">▪ Direct the behavioral health care manager,▪ Continue to provide and direct beneficiary behavioral health and physical care,▪ Prescribe and manage medications based on psychiatric consultant recommendations, and▪ Make referrals to specialty care as needed.
Behavioral Health Care Manager	<p>A licensed master's or doctoral level clinician, or individual with specialized training in behavioral health (such as a licensed social worker, registered nurse, or licensed psychologist) working under the direction and supervision of the primary care provider, who will:</p> <ul style="list-style-type: none">▪ Provide care management services through face-to-face and non-face-to-face interactions,▪ Assess beneficiary needs,▪ Develop a POC,▪ Administer validated screening tools (PHQ-9 or GAD-7) at least monthly, or more frequently if clinically indicated,▪ Provide evidence-based interventions,▪ Engage in ongoing collaboration with the primary care provider,▪ Maintain the patient registry, and▪ Consult weekly with the psychiatric consultant (may be non-face-to-face).

Medicaid Provider Manual

Psychiatric Consultant	<p>Medical professional (MD, DO or Mental Health Nurse Practitioner [MHNP])) who is trained in psychiatry or behavioral health and qualified to prescribe the full range of medications. The psychiatric consultant will:</p> <ul style="list-style-type: none">▪ Recommend treatment strategies,▪ Recommend medication and changes in medication based on beneficiary status,▪ Recommend referral to specialty services when needed,▪ Consult weekly with the behavioral health care manager,▪ Consult with and advise the treating primary care provider as clinically indicated,▪ Have infrequent contact with beneficiaries (refer to the Reimbursement subsection within the Psychiatric Collaborative Care Model [CoCM] Services subsection of this chapter for additional information), and▪ On rare occasions, directly prescribe medications to a beneficiary.
Beneficiary	<p>The beneficiary is an active member of the care team and participation in care has proven to increase motivation, adherence to treatment plan, satisfaction with care and positive beneficiary outcomes.</p>

14.3.E. COVERAGE OF CoCM SERVICES

CoCM is a covered service for beneficiaries who are diagnosed with a psychiatric disorder that requires behavioral health care assessment; establishing, implementing, revising, or monitoring a care plan; and brief interventions. For primary medical care practices that meet all CoCM team criteria, Medicaid will cover CoCM services provided by the care team and rendered by the primary care provider for six months of care. After the initial 12 months, prior authorization is required for 12 additional calendar months if the beneficiary shows improvement and there is a need for continued care. If no improvement occurs after the initial six months or their condition worsens, the beneficiary is to be referred to specialty services. An episode of care does not have to be six consecutive months. A beneficiary can be absent from services for five months and still return to their initial episode of care. After a six-month break in service, a new episode of care begins and prior authorization is not required.

CoCM services are based on reaching person-centered goals through the planning and management of the behavioral health care manager and primary care provider all in consultation with the psychiatric consultant.

CoCM services must include:

- **Initial assessment:** Visit occurring either in-person or via audio-visual telemedicine in which the beneficiary sets goals and is screened by a diagnosis-appropriate and consistent validated clinical rating scale, such as the PHQ-9 or GAD-7, which also must be done prior to subsequent CoCM services.
- **Continued monitoring:** Face-to-face or non-face-to-face weekly to monthly follow-up by the behavioral health care manager that must include monthly screening with validated rating scale, monitoring of goals and/or medication, and may include recommended evidence-based therapies.

Medicaid Provider Manual

- **Monthly monitoring:** Continues until goals are met, the beneficiary stops participating or the beneficiary is referred to specialty services.

14.3.F. NON-COVERED SERVICES

Psychiatric CoCM services do not include:

- Treatment related to severe and persistent behavioral health conditions that require specialty care beyond the intent of CoCM services.
- Direct interaction between the beneficiary and the psychiatric consultant, either in person or by telephone. CoCM services typically include the psychiatric consultant as recommending treatment to the behavioral health care manager and are ultimately directed by the primary care provider.
- SUD-related Medication Assisted Treatment (MAT) is not covered under CoCM services and should be reported separately.

14.3.G. PRIOR AUTHORIZATION

After the initial 12 months of care, prior authorization is required for an additional 12 months. Prior authorization requests must include documentation showing progress toward beneficiary goals through validated screening tool scores and an explanation for the medical necessity of continued services. (Refer to the Prior Authorization subsection of this chapter for additional information.)

14.3.H. REIMBURSEMENT

CoCM is a bundled monthly payment that represents a model of care rendered by all team members. The primary care provider is the sole biller for CoCM and services are not to be billed by the psychiatric consultant. The primary care provider agency is expected to have its own contract with the psychiatric consultant and will pay for their services as part of the CoCM. Providers are expected to adhere to the American Medical Association's CPT coding guidelines for Psychiatric Collaborative Care Management Services.

Direct consultant services delivered to beneficiaries by the psychiatric consultant outside of CoCM, such as evaluation and management or therapeutic interventions, may be reported separately.

To avoid duplication of services, CoCM services should not be provided to beneficiaries receiving the following Medicaid program services:

- MI Care Team benefit,
- Behavioral Health Home benefit,
- Substance Use Disorder Health Home benefit, or
- Other care management services that include mental health treatment.

Providers may check the beneficiary's assigned benefit plan information in CHAMPS.

14.3.I. FEDERALLY QUALIFIED HEALTH CENTER AND RURAL HEALTH CLINIC REIMBURSEMENT

CoCM services provided by a FQHC or RHC provider (e.g., MD/DO, certified NP, certified CNS, PA) do not qualify as an encounter. It may, however, be reimbursed outside of the Prospective Payment System.

14.3.J. INDIAN HEALTH CENTER REIMBURSEMENT

CoCM services provided by a Tribal Health Center (THC) or Tribal Federally Qualified Health Center (FQHC) provider (e.g., MD/DO, certified NP, certified CNS, PA) do not qualify as an encounter. It may, however, be reimbursed outside of the All Inclusive Rate (AIR).

14.3.K. SUBSTANCE USE DISORDER CoCM REIMBURSEMENT

For MHP-enrolled beneficiaries, CoCM services provided for a primary diagnosis of SUD are carved-out of the MHPs. Such services will be reimbursed by the PIHPs, or FFS as applicable, per Medicaid policy.

Medicaid Provider Manual

SECTION 15 – PRIVATE DUTY NURSING

Refer to the Private Duty Nursing Chapter of this manual for additional information.

Medicaid Provider Manual

SECTION 16 – OUTPATIENT THERAPY

Refer to the Therapy Services Chapter of this manual for additional information.

Medicaid Provider Manual

SECTION 17 – TELEMEDICINE

Refer to the Telemedicine chapter for additional information.

SECTION 18 – ANESTHESIOLOGIST ASSISTANT

Medicaid covers anesthesia services provided by qualified anesthesiologist assistants (AAs). AA services are covered for the AA or for the entity with which the AA has an employment or contract relationship that provides for payment to be made to the entity.

For specific coverage parameters, refer to the Anesthesia Services section of this chapter.

To enroll as a Medicaid provider, an AA must meet all of the following requirements:

- Works under the delegation and direction of a Medicaid enrolled anesthesiologist.
- Is in compliance with all applicable requirements of State law.
- Is a graduate of a medical (MD or DO) school-based anesthesiologist assistant education program that:
 - Is accredited by the Committee on Allied Health Education and Accreditation; and
 - Includes approximately two years of specialized basic science and clinical education in anesthesia at a level that builds on a premedical undergraduate science background.
- Is currently certified by the National Commission for Certification of Anesthesiologist Assistants.

SECTION 19 – CERTIFIED REGISTERED NURSE ANESTHETIST

Medicaid covers anesthesia and analgesia services provided by a Medicaid enrolled Certified Registered Nurse Anesthetist (CRNA).

19.1 COVERED SERVICES

CRNAs must comply with Michigan scope of practice licensing laws and regulations and State law requirements for supervision, as applicable. Supervising providers (physicians, dentists, and podiatrists) must be Medicaid enrolled providers. Pain management services provided by a CRNA in a freestanding pain clinic may only be covered when provided under the supervision of a Medicaid enrolled physician.

CRNA services are covered for the CRNA or for the entity with which the CRNA has an employment or contract relationship that provides for payment to be made to the entity.

If a rural hospital elects reasonable cost reimbursement for CRNA services under Medicare, the CRNA costs are included in the facility payments to the hospital and are not covered separately by Medicaid.

For specific coverage parameters, refer to the Anesthesia Services Section of this chapter. Refer to the Billing & Reimbursement for Professionals Chapter for information regarding Anesthesia modifiers. Refer to the Practitioner Reimbursement Appendix for information regarding the payment calculation of anesthesia services.

19.2 ENROLLMENT

To enroll as a Medicaid provider, a CRNA must meet all of the following requirements:

- be currently licensed in Michigan as a registered professional nurse;
- be certified by the State as a CRNA; and
- complete an on-line application through the CHAMPS Provider Enrollment subsystem.

(Refer to the Provider Enrollment Section of the General Information for Providers Chapter for additional enrollment information, and the Directory Appendix for contact information.)

SECTION 20 – CERTIFIED NURSE PRACTITIONER

Medicaid covers services provided by qualified Medicaid enrolled nurse practitioners (NPs). Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter or the Medicaid Code and Rate Reference tool for additional information regarding coverage parameters.

20.1 COVERED SERVICES

Medicaid covers medically necessary services provided by a NP, as defined in Public Act 368 of 1978 as amended, when all of the following requirements are met:

- the services are the type that are considered physician's services if furnished by a Doctor of Medicine or Osteopathy (MD/DO);
- the services are performed by a person who is licensed as an advanced practice registered nurse (APRN) under state law with the NP specialty certification granted by the Michigan Board of Nursing;
- the NP is legally authorized to perform the service in compliance with state law;
- the services are performed in collaboration with or under the terms of a valid practice agreement with a Medicaid-enrolled MD/DO; and
- the services are not restricted to physicians or otherwise excluded by Medicaid program policy or federal and state statutes.

NP services are subject to the limitations that apply to physician services. Certain services may be restricted to physicians by program policy or federal and state statutes and may not be covered for NPs. Professional services are only covered when the NP has personally performed the service and no other provider or entity has been paid for the service. Services provided jointly by the NP and physician are covered for a single practitioner only.

20.2 ENROLLMENT OF NURSE PRACTITIONERS

A NP who provides professional services to Medicaid beneficiaries is required to be a Medicaid-enrolled provider and uniquely identified on claims. To enroll as a Medicaid provider, the NP must complete an on-line application in the Community Health Automated Medicaid Processing System (CHAMPS) and enroll with an Individual (Type 1) National Provider Identifier (NPI) as either a Rendering/Servicing-Only or Individual/Sole Provider.

20.2.A. RENDERING/SERVICING-ONLY PROVIDER

A physician-employed NP who renders services only under the physician's delegation and supervision under an employment relationship or agreement is required to be an enrolled provider and uniquely identified on claims for services. They may enroll as a Rendering/Servicing-Only Provider, and payment for services will be made to the employing, supervising physician or physician group.

20.2.B. INDIVIDUAL/SOLE PROVIDER

NPs enrolled as Individual/Sole Providers may receive direct reimbursement for services. Claims for services provided to FFS beneficiaries may be directly submitted to MDHHS. For beneficiaries enrolled in a MHP, the NP must negotiate provider terms and payment arrangements with each MHP.

During enrollment and enrollment revalidation processes, the NP must report the NPI of their Medicaid enrolled collaborating physician by including the collaborating physician's NPI on the checklist and associating to the collaborating physician in the "Associate to Billing Provider/Other Association" step in CHAMPS. Disenrollment of the collaborating physician from the program may prompt disenrollment of the NP. To avoid interruption in enrollment, the NP must ensure their CHAMPS enrollment information reflects current collaborating physician information. Additional provider enrollment information can be found on the MDHHS website (refer to the Directory Appendix for website information) and in the General Information for Providers Chapter of this manual.

20.3 NURSE PRACTITIONER COLLABORATIVE PRACTICE AGREEMENT

As part of the enrollment and enrollment revalidation processes, the NP must attest to having a valid collaborative practice agreement with a Medicaid enrolled physician. Determination of medical necessity and appropriateness of services is the responsibility of the practitioner and physician based on the terms of the collaborative practice agreement. The collaborating physician does not have to be physically on the premises where the services are provided.

The collaborative practice agreement is a written document that the practitioner and physician utilize to outline the performance of medical care services or the prescribing of schedule 2 to 5 controlled substances, or both. The agreement shall not include an act, task, or function that the practitioner or collaborating physician is not qualified to perform by education, training, or experience and that is not within the scope of the license held by the practitioner or physician. The agreement must include the effective date of delegation and subsequent review dates. The NP must maintain the collaborative practice agreement at their primary place of practice and provide the agreement to MDHHS upon request.

The terms of the agreement, at a minimum, must include the following:

- A process between the practitioner and collaborating physician for communication, availability, and decision making, including an emergency plan;
- A protocol for designating an alternative physician for consultation in situations in which the collaborating physician is not available;
- A description of the duties and responsibilities of the practitioner and collaborating physician based upon their education, training and experience;
- A provision that allows the practitioner or collaborating physician to terminate their agreement; and
- The signatures of the practitioner and physician.

Medicaid Provider Manual

The NP must notify MDHHS if the collaborative practice agreement is terminated. Termination or suspension of the agreement by either professional, or termination of the collaborating physician's enrollment, may lead to disenrollment of the NP from the program.

20.4 NURSE PRACTITIONER BILLING AND REIMBURSEMENT

Professional claims must include the NPI of the NP in the Rendering Provider field and the supervising or collaborating physician in the Supervising Provider field as applicable. Refer to the Billing & Reimbursement for Professionals and the Billing & Reimbursement for Institutional Providers Chapters for additional Information.

Fee-for-Service reimbursement for NP services is based upon the limits and rates associated to physician professional services and are published on the NP/CNS fee schedule located on the MDHHS website. Provider specific information may be located utilizing the Medicaid Code and Rate Reference tool within CHAMPS. Refer to the Billing & Reimbursement Chapters for additional information.

MHPs are responsible for reimbursing contracted providers or subcontractors for their services according to the conditions stated in the subcontract established between the practitioner and the MHP. Noncontracted providers must comply with all applicable authorization requirements of the MHP and uniform billing requirements. Refer to the Medicaid Health Plans Chapter for additional information.

(Refer to the Surgery-General section of this chapter for information on an NP functioning as an assistant at surgery.)

SECTION 21 – CERTIFIED CLINICAL NURSE SPECIALIST

Medicaid covers services provided by qualified Medicaid enrolled clinical nurse specialists (CNSs). Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter or the Medicaid Code and Rate Reference tool for additional information regarding coverage parameters.

21.1 COVERED SERVICES

Medicaid covers medically necessary professional services provided by a CNS, as defined in Public Act 368 of 1978 as amended, when all of the following requirements are met:

- the services are the type that are considered physician's services if furnished by a Doctor of Medicine or Osteopathy (MD/DO);
- the services are performed by a person who is licensed as an advanced practice registered nurse (APRN) under state law, with the CNS specialty certification granted by the Michigan Board of Nursing;
- the CNS is legally authorized to perform the service in compliance with state law;
- the services are performed in collaboration with or under the terms of a valid practice agreement with a Medicaid enrolled MD/DO; and
- the services are not restricted to physicians or otherwise excluded by Medicaid program policy or federal and state statutes.

CNS services are subject to the limitations that apply to physician services. Certain services may be restricted to physicians by program policy or federal and state statutes and may not be covered for CNSs. Professional services are only covered when the CNS has personally performed the service and no other provider or entity has been paid for the service. Services provided jointly by the CNS and physician are covered for a single practitioner only.

21.2 ENROLLMENT OF CLINICAL NURSE SPECIALISTS

The CNS who provides professional services to Medicaid beneficiaries is required to be an enrolled provider and uniquely identified on claims for services to be considered eligible for reimbursement. To enroll, the CNS must complete an on-line application in the Community Health Automated Medicaid Processing System (CHAMPS) and enroll with an Individual (Type 1) National Provider Identifier (NPI) as either a Rendering/Servicing-Only or Individual/Sole Provider.

21.2.A. RENDERING/SERVICING-ONLY PROVIDER

A physician-employed CNS who renders services only under the physician's delegation and supervision under an employment relationship or agreement is required to be an enrolled provider and uniquely identified on claims for services. They may enroll as a Rendering/Servicing Only Provider, and payment for services will be made to the employing, supervising physician or physician group.

21.2.B. INDIVIDUAL/SOLE PROVIDER

CNSs enrolled as Individual/Sole Providers may receive direct reimbursement for services. Claims for services provided to FFS beneficiaries may be directly submitted to MDHHS. For beneficiaries enrolled in an MHP, the CNS must negotiate provider terms and payment arrangements with each MHP.

During enrollment and enrollment revalidation processes, the CNS must report the NPI of their Medicaid-enrolled collaborating physician by including the collaborating physician's NPI on the checklist and associating to the collaborating physician in the "Associate to Billing Provider/Other Association" step in CHAMPS. Disenrollment of the collaborating physician from the program may prompt disenrollment of the CNS. To avoid interruption in enrollment, the CNS must ensure their CHAMPS enrollment information reflects current collaborating physician information. Additional provider enrollment information can be found on the MDHHS website (refer to the Directory Appendix for website information) and in the General Information for Providers Chapter of this manual.

21.3 COLLABORATIVE PRACTICE AGREEMENT

As part of the enrollment process, the CNS must attest to having a valid collaborative practice agreement with a Medicaid enrolled physician. Determination of medical necessity and appropriateness of services is the responsibility of the practitioner and physician based on the terms of the collaborative practice agreement. The collaborating physician does not have to be physically on the premises where the services are provided.

The collaborative practice agreement is a written document that the practitioner and physician utilize to outline the performance of medical care services or the prescribing of schedule 2 to 5 controlled substances, or both. The agreement shall not include an act, task, or function that the practitioner or collaborating physician is not qualified to perform by education, training, or experience and that is not within the scope of the license held by the practitioner or physician. The agreement must include the effective date of delegation and subsequent review dates. The CNS must maintain the collaborative practice agreement at their primary place of practice and provide the agreement to MDHHS upon request.

The terms of the agreement, at a minimum, must include the following:

- A process between the practitioner and collaborating physician for communication, availability, and decision making, including an emergency plan;
- A protocol for designating an alternative physician for consultation in situations in which the collaborating physician is not available;
- A description of the duties and responsibilities of the practitioner and collaborating physician based upon their education, training and experience;
- A provision that allows the practitioner or collaborating physician to terminate their agreement; and
- The signatures of the practitioner and physician.

Medicaid Provider Manual

The CNS must notify MDHHS if the collaborative practice agreement is terminated. Termination or suspension of the agreement by either professional, or termination of the collaborating physician's enrollment, may lead to disenrollment of the CNS from the program.

21.4 BILLING & REIMBURSEMENT

Professional claims must include the NPI of the CNS in the Rendering Provider field and the supervising or collaborating physician in the Supervising Provider field as applicable. Refer to the Billing & Reimbursement for Professionals and the Billing & Reimbursement for Institutional Providers Chapters for additional information.

Fee-for-Service reimbursement for CNS services is based upon the limits and rates associated to physician professional services and is published on the NP/CNS fee schedule located on the MDHHS website. Provider specific information may be located utilizing the Medicaid Code and Rate Reference tool within CHAMPS. Refer to the Billing & Reimbursement Chapters for additional information.

MHPs are responsible for reimbursing contracted providers or subcontractors for their services according to the conditions stated in the subcontract established between the practitioner and the MHP. Noncontracted providers must comply with all applicable authorization requirements of the MHP and uniform billing requirements. Refer to the Medicaid Health Plans Chapter for additional information.

(Refer to the Surgery-General section of this chapter for information on a CNS functioning as an assistant at surgery.)

SECTION 22 – CERTIFIED NURSE MIDWIFE

Medicaid covers services provided by qualified Medicaid enrolled certified nurse midwives (CNMs). (Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter or the Medicaid Code and Rate Reference tool for additional information regarding coverage parameters.)

22.1 COVERED SERVICES

Medicaid covers medically necessary professional services provided by a CNM, as defined in Public Act 368 of 1978 as amended, when all the following requirements are met:

- the services are the type that are considered physician's services if furnished by a Doctor of Medicine or Osteopathy (MD/DO);
- the services are performed by a person who is licensed as an advanced practice registered nurse (APRN) under state law, with the CNM specialty certification granted by the Michigan Board of Nursing;
- the CNM is legally authorized to perform the service in compliance with state law; and
- the services are not restricted to physicians or otherwise excluded by Medicaid program policy or federal and state statutes.

Covered services include those within the CNM's scope of practice as defined in state law. Services focus on inpatient and outpatient obstetric, gynecologic and women's primary health care. Services must be administered within the framework of an alliance agreement that provides for physician consultation and referral as indicated by the health of the beneficiary. Covered CNM services include the following:

- Maternity care, including antepartum care, hospital delivery and postpartum care;
- Newborn care;
- Primary care services for women throughout their lifespan, including physical exams;
- Diagnosis and treatment of common health problems;
- Gynecological services;
- Reproductive health services;
- Contraceptive services;
- Treatment of male partners for sexually transmitted infection and reproductive health; and
- The prescribing of pharmacological and nonpharmacological interventions and treatments that are within the CNM's specialty role, scope of practice, and state law.

22.2 MATERNITY CARE

Medicaid covers antepartum care, delivery, and postpartum care rendered by a CNM when provided in compliance with Medicaid policy.

Medicaid Provider Manual

Antepartum Care	<p>Coverage for antepartum care includes all usual and customary antepartum services provided prior to delivery and referral to MIHP when there are psychosocial or nutritional factors that could adversely affect the pregnancy or the health and well-being of the mother or infant.</p> <p>If the provider initiated prenatal care within the first six months of pregnancy through the month of delivery, the appropriate antepartum care CPT code is covered. If the beneficiary is seen by multiple CNMs or physicians within a group practice, the antepartum care package may be covered. (Refer to the Maternity Care and Delivery Services Section of this chapter for details on coverage of antepartum care and when individual E/M services are covered.)</p>
Delivery	<p>Deliveries performed by a CNM are covered in a licensed hospital setting only. Home deliveries and services associated with these deliveries are not covered. Coverage of the delivery includes the usual and customary services associated with the hospital admission, management of labor, monitoring, vaginal delivery, and resuscitation of the newborn infant when necessary.</p>
Post-partum Care	<p>Medicaid covers usual and customary inpatient and outpatient post-partum services provided after the delivery. Routine post-partum hospital care for the mother is covered as a part of the delivery. Routine care of the newborn in the hospital is covered for the provider who examines and provides the total hospital care of the newborn regardless of whether they performed the delivery. (Refer to the Services to Newborns subsection in this chapter for additional coverage information.)</p>

22.3 OFFICE VISITS

Visits not directly related to antepartum care or follow-up to a delivery, such as family planning visits, are covered under the appropriate office visit procedure code. (Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters. Refer to the Evaluation and Management Services Section of this chapter for specific coverage information related to office visits.)

22.4 ENROLLMENT OF CERTIFIED NURSE MIDWIVES

The CNM who provides professional services to Medicaid beneficiaries is required to be an enrolled provider and uniquely identified on claims for services to be considered eligible for reimbursement. To enroll, the CNM must complete an on-line application in the Community Health Automated Medicaid Processing System (CHAMPS) and enroll with an Individual (Type 1) National Provider Identifier (NPI). Additional provider enrollment information can be found on the MDHHS website (refer to the Directory Appendix for website information) and in the General Information for Providers Chapter of this manual.

Practitioners who wish to provide services to Medicaid Health Plan (MHP) enrollees are encouraged to contact the individual MHP for additional enrollment, credentialing, and contract requirements.

22.5 BILLING & REIMBURSEMENT

Professional claims must include the NPI of the CNM in the Rendering Provider field and the supervising or collaborating physician in the Supervising Provider field as applicable. Refer to the Billing & Reimbursement for Professionals and the Billing & Reimbursement for Institutional Providers Chapters for additional information.

Medicaid Provider Manual

Professional services are only covered when the CNM has personally performed the service and no other provider or entity has been paid for the service. Services provided jointly by the CNM and physician are covered for a single practitioner only.

Fee-for-Service reimbursement for CNM services is based upon the limits and rates associated to physician professional services and are published on the CNM fee schedule located on the MDHHS website. Provider specific information may be located utilizing the Medicaid Code and Rate Reference tool within CHAMPS. Refer to the Billing & Reimbursement Chapters for additional information.

MHPs are responsible for reimbursing contracted providers or subcontractors for its services according to the conditions stated in the subcontract established between the practitioner and the MHP. Noncontracted providers must comply with all applicable authorization requirements of the MHP and uniform billing requirements. Refer to the Medicaid Health Plans Chapter for additional information.

(Refer to the Surgery-General section of this chapter for information on a CNM functioning as an assistant at surgery.)

SECTION 23 – PHYSICIAN ASSISTANT

Medicaid covers physician assistant (PA) services provided by qualified, Medicaid enrolled practitioners in conjunction with covered surgeries and other procedures. Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter or the Medicaid Code and Rate Reference tool available through CHAMPS for more information regarding coverage parameters. (Refer to the Directory Appendix for CHAMPS access information.)

23.1 COVERED SERVICES

Medicaid covers medically necessary services provided by a PA, as defined in Public Act 368 of 1978 as amended, when all the following requirements are met:

- the services are the type that are considered physician's services if furnished by a Doctor of Medicine or Osteopathy (MD/DO);
- the services are performed by a person who is licensed as a PA under state law;
- the PA is legally authorized to perform the service in compliance with state law;
- the services are performed under the terms of a valid practice agreement with a Medicaid-enrolled MD/DO; and
- the services are not restricted to physicians or otherwise excluded by Medicaid program policy or federal and state statutes.

23.2 ENROLLMENT OF PHYSICIAN ASSISTANTS

PAs who provide professional services to Medicaid beneficiaries are required to be enrolled providers in the Medicaid program and uniquely identified on claims for their services to be considered eligible for reimbursement. To enroll, the PA must complete an online application in the Community Health Automated Medicaid Processing System (CHAMPS) with an Individual (Type 1) National Provider Identifier (NPI) as a Rendering/Servicing-Only provider. Additional provider enrollment information can be found on the MDHHS website and in the General Information for Providers Chapter of this manual. (Refer to the Directory Appendix for website information.)

23.2.A. PARTICIPATING PHYSICIAN

Professional services rendered by a PA will be covered when provided under the terms of a valid practice agreement established with a participating physician as defined in state law. A group of physicians practicing other than as sole practitioners may designate one or more physicians in the group to enter into a practice agreement.

During enrollment and enrollment revalidation, the PA must report the NPI of their Medicaid-enrolled participating physician by including the participating physician's NPI on the checklist and associating to the participating physician in the "Associate to Billing Provider/Other Association" step in CHAMPS. Disenrollment of the participating physician from the program may prompt disenrollment of the PA. To avoid interruption in enrollment, the PA must ensure their CHAMPS enrollment information reflects current/accurate participating physician information.

Medicaid Provider Manual

Practitioners who wish to provide services to Medicaid Health Plan (MHP) enrollees are encouraged to contact the individual MHP for additional enrollment, credentialing, and contract requirements.

23.2.B. PRACTICE AGREEMENT

As part of the enrollment process, the PA must attest to having a valid practice agreement with a participating physician that complies with applicable state law requirements. Determination of medical necessity and appropriateness of services is the responsibility of the PA and participating physician based on the terms of the practice agreement. The participating physician does not have to be physically on the premises where the services are provided. The PA shall maintain the practice agreement at their primary place of practice and provide the agreement to MDHHS upon request.

23.3 BILLING & REIMBURSEMENT

23.3.A. CLAIMS

Professional claims must include the NPI of the PA in the Rendering Provider field and the participating or supervising physician in the Supervising Provider field as applicable. Refer to the Billing & Reimbursement for Professionals and the Billing & Reimbursement for Institutional Providers Chapters for additional Information.

23.3.B. REIMBURSEMENT

As a Rendering/Servicing-Only provider, PAs are not eligible to receive direct reimbursement. Payment for PA services will be issued to the participating physician, physician group or billing provider. Professional services are only covered when the PA has personally performed the service and no other provider or entity has been paid for the service. Services provided jointly by the PA and physician are covered for a single practitioner only.

Fee-for-Service reimbursement for PA services is based upon the limits and rates associated to physician professional services and are published on the Practitioner fee schedule located on the MDHHS website. Provider specific information may be located utilizing the Medicaid Code and Rate Reference tool within CHAMPS. Refer to the Billing & Reimbursement Chapter for additional information.

MHPs are responsible for reimbursing contracted providers or subcontractors for their services according to the conditions stated in the subcontract established between the practitioner and the MHP.

Noncontracted providers must comply with all applicable authorization requirements of the MHP and uniform billing requirements.

(Refer to the Surgery - General section of this chapter for information on a PA functioning as an assistant at surgery.)

SECTION 24 – PHYSICAL THERAPIST

Refer to the Therapy Services Chapter for additional therapy information.

SECTION 25 – PODIATRIST

Medicaid covers the medically necessary services of a podiatrist. (Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.)

Podiatrists should refer to the appropriate sections of this chapter for specific information related to the coverage of specific services.

25.1 COPAYMENT

A copayment is required for each separately covered visit for beneficiaries age 21 and older. If more than one separately covered service is rendered on the same day, such as an office visit and laboratory services, only one copayment is required. If a procedure such as a surgery with a global period is rendered, only one copayment is required. Refer to the General Information for Providers Chapter for information about copayments. Current copayment amounts are listed on the MDHHS website. (Refer to the Directory Appendix for website information.)

25.2 CONSULTATIONS

Medicaid covers limited and intermediate level consultations if requested by a physician or qualified healthcare provider.

25.3 NURSING FACILITY SERVICES

Podiatry services provided to a beneficiary in a nursing facility are considered an ancillary service and require the written order of the beneficiary's attending physician. All terms and conditions related to Medicaid covered and non-covered services, including PA and billing requirements, apply to services provided to beneficiaries in a nursing facility.

SECTION 26 – GENETIC COUNSELORS

26.1 COVERED SERVICES

Medicaid covers medically necessary genetic counseling services, as defined in section 333.17001 (Act 368 of 1978), when provided by a licensed Genetic Counselor and ordered by a Medicaid-enrolled physician, PA, or APRN (NPs, CNSs, and CNMs).

Genetic counseling is covered when provided in consideration of, or in conjunction with, genetic testing, or provided in relation to a genetic or congenital condition. Counseling is considered medically necessary when there is an expectation that a genetically inherited or acquired condition exists, and the beneficiary displays clinical features or is at risk of inheriting the disease/condition based upon factors including, but not limited to, personal history, family history, documentation of a genetic mutation, and/or ethnic background.

Services are only covered when the genetic counselor has personally performed the genetic counseling and no other provider or entity has billed or been paid for the service. Genetic counseling services provided jointly by the genetic counselor and a collaborating physician or qualified non-physician medical practitioner are covered for a single practitioner only.

Genetic tests recommended as a result of genetic counseling may be covered when provided in accordance with Medicaid's Genetic and Molecular Testing policy. Providers should refer to the Genetic and Molecular Testing subsection of the Laboratory Chapter for information on genetic testing.

26.2 ENROLLMENT OF GENETIC COUNSELORS

Licensed genetic counselors may enroll with Medicaid for reimbursement of genetic counseling services. To enroll as a Medicaid provider, the Genetic Counselor must complete an online application in the Community Health Automated Medicaid Processing System (CHAMPS) and enroll with an Individual (Type 1) National Provider Identifier (NPI) as either a Rendering/Servicing-Only or Individual/Sole Provider. Genetic counselors in Michigan must be currently licensed by the Department of Licensing and Regulatory Affairs (LARA) and certified by the American Board of Genetic Counseling (ABGC) or American Board of Medical Genetics (ABMG). Out-of-state counselors must be currently licensed by the appropriate standard-setting authority in the state where they are practicing and must comply with Michigan Medicaid policy requirements regarding the provision of out-of-state services.

Individuals holding temporary genetic counselor licenses are not eligible to enroll as providers or be directly reimbursed by Medicaid. Services performed by these individuals must be performed under the supervision of a fully licensed, qualified genetic counselor as defined in section 333.6109 (Act 368 of 1978). Services must be billed to Medicaid under the NPI of the supervising genetic counselor.

Licensed genetic counselors may not be employed by or contracted with a commercial genetic testing laboratory. Genetic counselors working within an integrated, comprehensive health care delivery system that operates a laboratory but also routinely delivers health care services beyond laboratory testing are not excluded from enrollment.

PRACTITIONER REIMBURSEMENT APPENDIX

SECTION 1 – REIMBURSEMENT METHODOLOGY

1.1 PRACTITIONER FEE SCREENS

Practitioner payment rates are established by MDHHS as a fee screen for each procedure. The Medicare prevailing fees, the Resource Based Relative Value Scale (RBRVS) and other relative value information, other state Medicaid fee screens, and providers' charges may be utilized as guidelines or references in determining the maximum fee screens for individual procedures. The Practitioner fee schedule is updated annually following the CMS January release of the RBRVS. Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.

Any rate discrepancies will be resolved by using the policy language describing reimbursement methodology for the established fee schedules.

1.2 ANESTHESIA SERVICES

The fee schedule rate calculation for anesthesia services (Current Procedural Terminology [CPT] codes 00100 to 01999) is, with the exceptions noted in the Anesthesia Services section of the Practitioner Chapter of this manual, based on the sum of the allowable anesthesia base units and anesthesia time units (i.e., time reported in min/15) multiplied by the State anesthesia conversion factor. Pricing modifier adjustments are then applied. Reimbursement will be the calculated fee screen or the provider's charge, whichever is less. No additional reimbursement will be made for beneficiary risk factors such as age or health status. Refer to the Billing & Reimbursement for Professionals Chapter of this manual for information about the impact of anesthesia modifiers on reimbursement.

1.3 EMERGENCY DEPARTMENT SERVICES

Physician services provided in the ED are covered as individual services. Critical care services are covered according to the CPT/HCPCS definitions and coding conventions for critical care. If critical care is required for a beneficiary in the ED, then only the critical care codes are covered. ED E/M or visit codes are not covered on the same day as critical care for the same provider.

When a beneficiary is seen in the ED, the appropriate level of ED E/M service is covered unless another E/M service is more appropriate (e.g., observation care, initial inpatient hospital care, or critical care). The ED E/M service which includes the medical screening exam is covered without regard to whether the medical screening results in the medical condition being deemed an emergency or not. The results of the medical screening examination, along with any medically necessary appropriate diagnostic services, determine if further treatment must be provided. If the attending physician determines that an emergency medical condition does exist, all subsequent medically appropriate services to stabilize the patient must be provided and are covered in addition to the ED E/M service. CPT/HCPCS coding conventions and Medicaid guidelines must be followed.

The medical record must support the need for the type and extent of diagnostic services performed based on the presenting symptoms of the beneficiary. The ED physician's review of x-rays and EKGs performed on the beneficiary are covered as a part of the E/M service. Professional component services are covered only for the physician who prepares a complete, written report of the findings for the medical

record. If a specialist in the field prepares this, then the ED physician's review of the findings does not meet the conditions for separate coverage of the service.

The ED E/M services provided by the attending physician, regardless of the level of the service, are covered using a two-tiered rate based on whether the beneficiary was released or admitted. If the beneficiary was released from the ED, a single rate is used as the fee screen. If the beneficiary was admitted to the hospital or transferred to another hospital from the ED, a higher single rate is used as the fee screen.

The two-tiered fee screen applies only to the attending ED physician E/M service. The standard Medicaid fee screens continue to be applied to other separately billable attending ED physician services and the services of other physicians (e.g. specialists) who provide E/M or other services in the ED. When billing for these additional services, CPT/HCPCS coding conventions and Medicaid program guidelines must be followed.

1.4 NEONATAL AND PEDIATRIC CRITICAL CARE SERVICES

Effective for dates of service on and after October 1, 2022, practitioner rates for inpatient neonatal and pediatric critical and intensive care services will be reimbursed at 100% of the Medicare annual rate.

1.5 OBSTETRICAL SERVICES

Effective for dates of service on and after October 1, 2014, practitioner rates for obstetric care, including antepartum, delivery, and postpartum services, will be reimbursed at 95% of Medicare rates.

1.6 PSYCHIATRIC SERVICES FOR INDIVIDUALS <21 YEARS OF AGE

Effective for dates of service on and after February 1, 2020, practitioner rates for psychiatric diagnostic evaluation services provided to individuals less than 21 years of age will be reimbursed at 100% of the Medicare annual rate.

Effective for dates of service on and after January 1, 2021, practitioner rates for psychotherapy and other psychiatric services provided to individuals less than 21 years of age will be reimbursed at 63% of Medicare.

SECTION 2 – ENHANCED PRACTITIONER PAYMENTS

MDHHS makes payment adjustments for practitioner services payable under Medicaid Fee-For-Service (FFS) through entities identified in the Medicaid State Plan, Attachment 4.19-B, page 1a. (The Medicaid State Plan is available on the MDHHS website; refer to the Directory Appendix for website information.)

2.1 QUALIFYING PRACTITIONERS

Adjustments apply to both public and private practitioners and practitioner groups who are either employees of the public entities identified in the state plan, or are under contract with one or more of the public entities, and include the following:

- University medical and dental faculty, employed practitioners, and private practice groups with contractual arrangements with one or more of the above universities and provide services to Medicaid beneficiaries in a variety of settings.
- Hurley Hospital-employed or -contracted physicians, dentists, and other practitioners who provide services to Medicaid beneficiaries in a variety of settings.

Services eligible for the payment adjustments are billed under the federal employer identification number of the public entity or under the federal employer identification number of the practitioner/practitioner group.

Inpatient and outpatient services provided by the following practitioners, when not included in facility payments to the public entity, are included:

- Physicians (MD and DO)
- Ophthalmologists
- Oral-Maxillofacial Surgeons
- Dentists
- Podiatrists
- Physician Assistants
- Nurse Practitioners
- Clinical Nurse Specialists
- Certified Nurse Midwives
- Certified Registered Nurse Anesthetists
- Anesthesiologist Assistants
- Optometrists

2.2 PAYMENT ADJUSTMENT AMOUNT

The payment adjustment amount for services provided to Medicaid beneficiaries who do not have other insurance coverage will be the lesser of:

- The difference between the practitioner Medicaid fee-for-service fee screen and the practitioner's customary charge; or,
- Up to 100% of the Average Commercial Rate for the service rendered.

The payment adjustment amount for services provided to Medicaid beneficiaries with other insurance coverage will be the lesser of:

- The difference between the total of the Medicaid, Medicare, and commercial insurance payments and the practitioner's customary charge; or,
- The difference between the total of the Medicaid, Medicare, and commercial insurance payments and up to 100% of the Average Commercial Rate.

2.3 FINANCING THE PAYMENT ADJUSTMENTS

The public entities must certify to MDHHS that they will provide the non-federal share of the payment adjustments established by this policy. These public entities must also certify to MDHHS that the financial arrangements used to offset the non-federal share of these Medicaid payment adjustments do not violate Title XIX of the Social Security Act, §1903 Payment to States, Subsection (W) Prohibition on Use of Voluntary Contributions, and Limitation on Use of Provider-Specific Taxes to Obtain Federal Financial Participation Under Medicaid.

No additional state funds are available beyond the amount needed to pay designated providers up to the standard Medicaid fee screens for these services. The non-federal share of the Medicaid payment adjustments is supplied by the public entity through an intergovernmental transfer (IGT) to MDHHS.

2.4 PAYMENT ADJUSTMENT PROCESS

Upon receipt of the provider information from the public entity, MDHHS will generate a report which will include the federal employer identification numbers and utilization data for the providers affected by this policy for each covered period. The public entity must review the report and acknowledge the completeness and accuracy of the report. After receipt of this confirmation, MDHHS will make the payment adjustment. The payment adjustments will be made for the federal employer identification number used to bill Medicaid under the FFS program. The payment adjustments will be processed quarterly. Each quarterly payment adjustment will include a reconciliation that takes into account all claims submitted to MDHHS and paid after the prior Physician Adjustor payment quarter cut-off date.

SECTION 3 – PRIMARY CARE PRACTITIONER SERVICES INCENTIVE PAYMENT

For dates of service on and after January 1, 2015, MDHHS applies an increased payment rate to enrolled providers for primary care services delivered by a physician with a specialty designation of family medicine, general internal medicine, or pediatric medicine and, for dates of service on and after January 1, 2018, physicians with the specialty designation of general practice. The increase applies to a set of designated primary care services.

3.1 PROVIDER ELIGIBILITY

Physicians with primary specialty designations of family medicine, general internal medicine, pediatric medicine, and general practice may qualify as primary care practitioners for purposes of increased payment. Eligibility for this payment is limited to being board certified or board eligible in one of the three designated primary care specialties as recognized by the American Board of Medical Specialties, American Osteopathic Association, and the American Board of Physician Specialists. Primary care physicians may also be determined eligible by conducting a thorough review of the physician's practice characteristics as identified through their billing history.

Physician practitioners whose CHAMPS Provider Enrollment profile information reflects that they provide specialty or subspecialty (e.g., cardiology, endocrinology, or oncology, etc.) services are not eligible for the adjusted payment. Providers with multiple subspecialties are also not eligible for the adjusted payment. Exceptions will be made for practitioners who have subspecialty practices in adolescent and geriatric medicine.

Before enhanced payments are made, MDHHS will verify that a practitioner meets the eligibility criteria which are identified as the following:

- **Board Certification:** A primary care physician who has designated their primary specialty in their CHAMPS enrollment file as one of the eligible specialties and has provided applicable Board certification information will be validated by MDHHS prior to any enhanced payment.
- **Board Eligible:** A primary care physician who has designated their primary specialty in their CHAMPS enrollment file as one of the eligible specialties and has provided applicable documentation to support board eligibility status is also eligible for the enhanced payment. MDHHS will recognize physicians as board eligible for the period of time as defined by the applicable medical board following completion of their medical residency training program in one of the defined specialties.
- **Review of Practice Characteristics:** For non-board certified or non-board eligible primary care physicians, MDHHS will review an enrolled practitioner's billing history for the previous calendar year. At least 60 percent of the physician's codes paid by Medicaid must be for the evaluation and management (E/M) codes specified in this policy, including the preventive medicine E/M codes. This review of practice characteristics will be done by MDHHS only for providers who have self-attested by designating in their CHAMPS enrollment file that their primary specialty is one of the eligible specialties.
- **Non-physician Practitioners:** Nurse practitioners (NPs) and physician assistants (PAs) who provide primary care services while working in collaboration with a physician who is one of the designated primary care specialty types may be reimbursed at the enhanced rate. Claims submitted by NPs and PAs must include their own NPI as the rendering provider and the NPI of their supervising/delegating physician. If the collaborating physician has not been identified as

Medicaid Provider Manual

an eligible provider for the primary care rate, as verified by CHAMPS enrollment, services performed by the NP or PA will not receive the enhanced rate.

Practitioners delivering primary care services at Federally Qualified Health Centers (FQHCs), Rural Health Clinics (RHCs) and Local Health Departments (LHDs) are not eligible for these enhanced payments. Practitioner services in these settings are reimbursed using a payment methodology designed to reimburse those providers at cost and are made on a facility basis, not specific to the physician's services.

Practitioners who participate in the MDHHS Physician Adjustor Program are eligible for the primary care practitioner services incentive payment. For these participating providers, MDHHS calculates the Physician Adjustor Program payment adjustment consistent with the existing methodology.

Physicians with primary specialty designations of family medicine, general internal medicine, pediatric medicine, and general practice who are affiliated with Medicaid Health Plans (MHP) are eligible for the primary care practitioner rate increase as identified by their Primary Care Provider status within the MHP network.

3.2 ELIGIBLE PRIMARY CARE SERVICES [CHANGES MADE 4/1/2025]

Primary care practitioner services subject to the enhanced primary care rate are defined as Healthcare Common Procedure Coding System (HCPCS) codes:

- 99202 through 99215 for new and established patient office or outpatient evaluation and management (E/M) visits
- 99304 through 99318 for initial, subsequent, discharge and other nursing facility E/M services
- (text deleted 4/1/2025)
- 99341 through 99350 for new and established patient home E/M visits
- 99381 through 99397 for new and established patient preventive medicine services
- 99421 through 99423 for online digital E/M services
- (text deleted 4/1/2025)

3.3 ENHANCED RATES FOR PRIMARY CARE

For primary care practitioners identified as eligible for the primary care rate, payment will be made on the qualified procedure codes as published in a separate fee schedule as published on the MDHHS website. The Primary Care Fee Schedule reflects rates that have been adjusted in compliance with funding levels established by state law. (Refer to the Directory Appendix for website information.)

SECTION 1 – GENERAL INFORMATION

This chapter applies to Independent and Agency Private Duty Nurses.

Private duty nursing (PDN) is a Medicaid benefit when provided in accordance with the policies and procedures outlined in this manual. Providers must adhere to all applicable coverage limitations, policies and procedures set forth in this manual.

PDN is covered for beneficiaries under age 21 who meet the medical criteria in this section. If the beneficiary is enrolled in or receiving case management services from the Habilitation Supports Waiver (the Community Mental Health Services Program) and over 21 years of age, that program authorizes the PDN services.

For a Medicaid beneficiary who is not receiving services from the Habilitation Supports Waiver (the Community Mental Health Services Program), the MDHHS Program Review Division (PRD) reviews the request for authorization and authorizes the services if the medical criteria and general eligibility requirements are met.

For beneficiaries 21 and older, PDN is a waiver service that may be covered for qualifying individuals enrolled in the Habilitation Supports Waiver or MI Choice Waiver. When PDN is provided as a waiver service, the waiver agent must be billed for the services.

Beneficiaries who are receiving PDN services through one Medicaid program cannot seek supplemental PDN hours from another Medicaid Program (i.e., Habilitation Supports Waiver, MI Choice Waiver).

1.1 DEFINITION OF PDN

Private Duty Nursing is defined as nursing services for beneficiaries who require more individual and continuous care, in contrast to part-time or intermittent care, than is available under the home health benefit. These services are provided by a registered nurse (RN), or licensed practical nurse (LPN) under the supervision of an RN, and must be ordered by the beneficiary's physician. Beneficiaries requiring PDN must demonstrate a need for continuous skilled nursing services, rather than a need for intermittent skilled nursing, personal care, and/or Home Help services. The terms "continuous" and "skilled nursing" are further defined in the Medical Criteria subsection for beneficiaries under age 21.

Medicaid Provider Manual

1.2 ENROLLMENT REQUIREMENTS

Medicaid Enrolled Nurse (RN/LPN)	<p>To enroll as a Medicaid provider, the nurse must meet the following criteria:</p> <ul style="list-style-type: none">▪ Be a Registered Nurse (RN) licensed to practice in Michigan; or a Licensed Practical Nurse (LPN) licensed to practice in Michigan working under the supervision of an RN. Supervision of a Medicaid-enrolled LPN must be by an RN who has at least one year of experience in any of the following areas: community health nursing, pediatric nursing, maternal and child health nursing, or a similar nursing practice. Medicaid requires an on-site (beneficiary's home) supervisory visit by the RN of the LPN at least once every two months. The Medicaid-enrolled LPN must maintain documentation that verifies who the supervising RN is, a copy of the RN's license and documentation that supports that the RN supervisory visits were rendered. Documentation of the supervisory visit as signed by the RN must be included in the medical record. The medical record must be complete enough to allow another professional to reconstruct what transpired during the supervisory visit.▪ Cooperate with MDHHS in quality monitoring activities, beneficiary complaint resolution, and post-payment audit reviews. Medicaid-enrolled nurses must document complaints made by a beneficiary or the beneficiary's family regarding treatment or care that is (or fails to be) furnished, or regarding the lack of respect for the beneficiary's property, and must document both the existence of the complaint and the resolution of the complaint.
Private Duty Nursing Agency	<p>To enroll as a Medicaid provider, the PDN agency must meet the following criteria:</p> <ul style="list-style-type: none">▪ Be accredited by the Community Health Accreditation Program (CHAP) or the Accreditation Commission for Health Care (ACHC) as a PDN agency; or be accredited by The Joint Commission as a Home Health Agency; or be accredited by the Commission on Accreditation of Rehabilitation Facilities (CARF) as a Home and Community-Based Rehabilitation Program.▪ If a PDN agency delivers services from more than one location (office), each location (office) must be accredited. <p>PDN agencies are not permitted to avoid the above accreditation requirements by individually enrolling RNs or LPNs in the Medicaid Program.</p> <ul style="list-style-type: none">▪ Cooperate with MDHHS in quality monitoring activities, beneficiary complaint resolution, and post-payment audit reviews. Providers must document complaints made by a beneficiary or the beneficiary's family regarding treatment or care that is (or fails to be) furnished, or regarding the lack of respect for the beneficiary's property, and must document both the existence of the complaint and the resolution of the complaint.

1.3 PROVISION OF PRIVATE DUTY NURSING

PDN must be ordered by a physician and provided by a Medicaid enrolled private duty nursing agency, a Medicaid enrolled registered nurse (RN), or a Medicaid enrolled licensed practical nurse (LPN) who is working under the supervision of an RN (per Michigan Public Health Code). It is the responsibility of the LPN to secure the RN supervision.

Medicaid Provider Manual

Supervision of a Medicaid enrolled LPN must be by an RN who has at least one year of experience in any of the following areas:

- Community health nursing,
- Pediatric nursing,
- Maternal and child health nursing, or
- A similar nursing practice.

MDHHS requires an onsite supervisory visit by the supervising RN at least once every two months. The Medicaid enrolled LPN must maintain documentation that identifies the supervising RN.

If a beneficiary's services are performed exclusively by LPNs, the supervisory RN is responsible for completing a physical assessment for each beneficiary the LPN is caring for, and is required to participate in the development of the beneficiary's plan of care (POC). The above assessments and supervisory visits are not covered by Medicaid, including when provided by a home health agency.

PDN is not covered when rendered in a hospital or nursing facility, including an intermediate care facility for individuals with intellectual disabilities (ICF/IID) or licensed adult foster care facility (AFC).

PDN is not covered when provided by an RN or LPN who is the beneficiary's spouse, legally responsible relative, stepparent, adoptive parent, legal guardian, or foster parent.

When more than one agency is authorized to provide PDN for a beneficiary, the hours rendered by each must be reported to the PRD on a monthly basis in order to permit the adjustment of authorized hours as necessary between the providers. Payment cannot be made until all utilized hours are reported. The primary agency on the case (the first agency involved) is responsible for contacting the other PDN provider(s) caring for the beneficiary to obtain the actual number of hours rendered during the preceding month, and must fax the total hours provided by each to the PRD. The authorization letter will detail all PDN providers that are caring for a beneficiary during the authorization period.

1.4 PRIOR AUTHORIZATION

PDN services must be authorized by the PRD, before services are provided. (Refer to the Directory Appendix for contact information.) PDN services are authorized and billed in 15-minute incremental units (1 unit = 15 minutes). Prior authorization of a particular PDN provider to render services considers the following factors:

- Available third party resources.
- Beneficiary/family choice.
- Beneficiary's medical needs and age.
- The knowledge and appropriate nursing skills needed for the specific case.
- The understanding of the concept and delivery of home care and linkages to relevant services and health care organizations in the area served.

The Private Duty Nursing Prior Authorization – Request for Services form (MSA-0732) must be submitted when requesting PDN for persons with Medicaid coverage before services can begin and at regular

Medicaid Provider Manual

intervals thereafter if continued services are determined to be necessary. A copy of the form is provided in the Forms Appendix and is also available on the MDHHS website. (Refer to the Directory Appendix for website information.) The parent or guardian signature certification on MSA-0372 may be electronically generated. Each MSA-0732 form requires a new electronic signature and date. This form is not to be used for beneficiaries enrolled in the MI Choice Waiver. Private Duty Nursing is not a benefit under CSHCS. Individuals with CSHCS coverage may be eligible for PDN under Medicaid.

The MSA-0732 must be submitted every time services are requested for the following situations:

- for initial services when the beneficiary has never received PDN services under Medicaid, such as following a hospitalization or when there is an increase in severity of an acute or chronic condition;
- for continuation of services beyond the end date of the current authorization period (renewal);
- for an increase in services; or
- for a decrease in services.

Following receipt and review of the MSA-0732 and the required documentation by the PRD, a notice is sent to the PDN provider and beneficiary or primary caregiver, either approving or denying services, or requesting additional information. The provider must maintain this notice in the beneficiary's medical record. For services that are approved, the Notice of Authorization will contain the prior authorization number and approved authorization dates. It is important to include this PA number on every claim and in all other communications to the PRD.

If a beneficiary receiving PDN continues to require the services after the initial authorization period, a new MSA-0732 must be submitted along with the required documentation supporting the continued need for PDN. This request must be received by the PRD no less than 15 business days prior to the end of the current authorization period. Failure to do so may result in a delay of authorization for continued services which, in turn, may result in delayed or no payment for services rendered without authorization. The length of each subsequent authorization period will be determined by the PRD and will be specific to each beneficiary based on several factors, including the beneficiary's medical needs and family situation.

MDHHS will not reimburse PDN providers for services that have not been prior authorized. All forms and documentation must be completed according to the procedures provided in this chapter. If information is not provided according to policy (which includes signatures and correct information on the MSA-0732, POC and nursing assessment), requests will be returned to the provider. Authorization cannot be granted until all completed documentation is provided to MDHHS. Corrected submissions will be processed as a new request for PDN authorization and no backdating will occur.

If during an authorization period a beneficiary's condition changes warranting an increase or decrease in the number of approved units or a discontinuation of services, the provider must report the change to the PRD. (Refer to the Directory Appendix for contact information.) It is important that the provider report all changes as soon as they occur, as well as properly updating the POC. The request to increase or decrease units must be accompanied by an updated and signed POC; and documentation from the attending physician addressing the medical need if the request is for an increase in PDN units.

Often the request to begin services will be submitted by a PDN agency or individual PDN; however, a person other than the PDN provider (such as the hospital discharge planner, CSHCS case manager, physician, or physician's staff person) may submit the MSA-0732. When this is the case, the person

Medicaid Provider Manual

submitting the request must do so in consultation with the PDN agency or individual PDN who will be assuming responsibility for the care of the beneficiary.

If services are requested for more than one beneficiary in the home, a separate MSA-0732 must be completed for each beneficiary.

When a parent/guardian requests a transfer of care from one PDN provider to another, a completed MSA-0732 must be submitted to the PRD along with signed and dated documentation from the parent/guardian indicating that they are requesting a change in providers. The balance of hours authorized to a previous PDN provider will not be automatically transferred to a new provider. The new PDN provider is responsible for submitting the MSA-0732 to the PRD along with documentation from the parent/guardian requesting a new provider.

The PA number is for private duty nursing only. Any CMHSP prior authorized respite services must be billed to the authorizing CMHSP.

Other services provided in the home by community-based programs may affect the total care needs and the amount of PDN authorized. These other services must be disclosed on the MSA-0732 and documented in the POC. Although the amount of PDN authorized considers the beneficiary's medical needs and family circumstances, community-based services provided in the home are also part of this assessment. Disclosure is necessary to prevent duplication of services to allow for an accurate calculation of authorized PDN hours. Providers are advised that failure to disclose all community resources in the home may be cause for recoupment of funds.

1.4.A. DOCUMENTATION REQUIREMENTS

The following documentation is required for all PA requests for PDN services and must accompany the MSA-0732:

- Most recent signed and dated nursing assessment, including a summary of the beneficiary's current status compared to their status during the previous authorization period, completed by a registered nurse.
- Nursing notes for two (2) four-day periods, including one four-day period that reflects the most current medically stable period and another four-day period that reflects the most recent acute episode of illness related to the PDN qualifying diagnosis/condition.
- Most recent updated POC signed and dated by the ordering/managing physician, RN, and the beneficiary's parent/guardian. The POC must support the skilled nursing services requested, and contain dates inclusive of the requested authorization period.

The POC must include:

- Name of beneficiary and Medicaid ID number
- Diagnosis(es)/presenting symptom(s)/condition(s)
- Name, address, and telephone number of the ordering/managing physician
- Frequency and duration of skilled nursing visits, and the frequency and types of skilled interventions, assessments, and judgments that pertain to and support the PDN services to be provided and billed

Medicaid Provider Manual

- Identification of technology-based medical equipment, assistive devices (and/or appliances), durable medical equipment, and supplies
- Other services being provided in the home by community-based entities that may affect the total care needs must be documented
- List of medications and pharmaceuticals (prescribed and over-the-counter)
- Statement of family strengths, capabilities, and support systems available for assisting in the provision of the PDN benefit (for renewals, submit changes only).
- If the beneficiary was hospitalized during the last authorization period, include documentation related to the PDN qualifying diagnosis/condition, i.e., all hospital discharge summaries, history and physical examination, social worker notes/assessment, consultation reports (pulmonary; ears, nose and throat [ENT]; ventilator clinic; sleep study; etc.), and emergency department reports (if emergency services were rendered during the last authorization period).
- Teaching records pertaining to the education of parents/caregivers on the child's care.
- Other documentation as requested by MDHHS.

1.4.B. BENEFICIARY ELIGIBILITY

Approval of the MSA-0732 confirms that the service is authorized for the beneficiary. The approval does not guarantee that the beneficiary is eligible for Medicaid. If the beneficiary is not eligible on the date of service, MDHHS will not reimburse the provider for services provided and billed. To assure payment, the provider must verify beneficiary eligibility monthly at a minimum.

1.4.C. RETROACTIVE PRIOR AUTHORIZATION

Services provided before PA is requested will not be covered unless the beneficiary was not Medicaid eligible on the date of service but became eligible retroactively. If the MDHHS eligibility information does not demonstrate retroactive eligibility, then the request for retroactive PA will be denied.

1.5 OTHER INSURANCE

It is the responsibility of the family, private duty nursing agency, RN or LPN to assess, investigate and exhaust all commercial insurance for the beneficiary prior to billing Medicaid. A private duty nursing agency, RN, or LPN should not accept any Medicaid PDN case until it has been determined what, if any, commercial insurance a beneficiary may have.

For any Medicaid case accepted in which the beneficiary has other insurance, the provider must first follow the rules of the other insurance. Such rules may include obtaining a physician's order, obtaining prior authorization, and being a participating provider with the other insurance carrier. Failure to follow the rules of the other insurance may result in nonpayment from Medicaid.

If a beneficiary's commercial insurance does not cover PDN, the PDN agency, RN or LPN must inform the PRD prior to billing MDHHS. (Refer to the Directory Appendix for contact information.) A copy of the letter of explanation or explanation of benefits (EOB) must be kept in the beneficiary's medical record.

Medicaid Provider Manual

Once it has been established that the commercial insurance does not cover PDN, a letter of explanation or EOB is valid as long as the insurance coverage remains unchanged. On an annual basis, the policyholder and provider should confirm with the commercial insurance that PDN coverage has not changed.

(Refer to the Coordination of Benefits Chapter of this manual for additional information.)

1.6 GENERAL ELIGIBILITY REQUIREMENTS

The beneficiary is eligible for PDN coverage when all of the following requirements are met:

- The beneficiary is eligible for Medicaid in the home/community setting (i.e., in the noninstitutional setting).
- The beneficiary is under the age of 21 and meets the medical criteria for PDN.
- PDN is appropriate, considering the beneficiary's health and medical care needs.
- PDN can be provided safely in the home setting.
- The beneficiary, their family (or guardian), the beneficiary's physician, the Medicaid case manager, and RN (i.e., from the PDN agency or the Medicaid enrolled RN, or the supervising RN for the Medicaid enrolled LPN) have collaborated and developed an integrated POC that identifies and addresses the beneficiary's need for PDN. The PDN must be under the direction of the beneficiary's physician; the physician must prescribe/order the services. The POC must be signed and dated by the beneficiary's physician, RN (as described above), and by the beneficiary or beneficiary's parent/guardian. The POC must be updated at least annually or more frequently as needed based on the beneficiary's medical needs.

1.7 BENEFIT LIMITATIONS

The purpose of the PDN benefit is to assist the beneficiary with medical care, enabling the beneficiary to remain in their home. PDN is intended as a transitional benefit to support and teach family members to function as independently as possible. Authorized hours will be modified as the beneficiary's condition and living situation stabilizes or changes. A decrease in hours will occur, for example, after a child has been weaned from a ventilator or after a long term tracheostomy no longer requires frequent suctioning, etc. The benefit is not intended to supplant the caregiving responsibility of parents, guardians, or other responsible parties (e.g., foster parents). There must be a primary caregiver (i.e., parent, guardian, significant other adult) who resides with a beneficiary under the age of 18, and the caregiver must provide a monthly average of a minimum of eight hours of care during a typical 24-hour period. The calculation of the number of units authorized per month includes eight hours or more of care that will be provided by the caregiver during a 24-hour period, which are then averaged across the time authorized for the month. The caregiver has the flexibility to use the monthly-authorized units as needed during the month. Substantial alterations to the scheduled allotment of daily PDN hours due to family choice (i.e., vacations) unrelated to medical need or emergent circumstances require advance notice to the PRD. The remaining balance of authorized hours will not be increased to cover this type of utilization. Authorized time cannot be carried over from one authorization period to another.

The time a beneficiary is under the supervision of another entity or individual (e.g., in school, in day/child care, in work program) cannot be used to meet the eight hours of obligated care as discussed above, nor can the eight hours of care requirement for beneficiaries under age 18 be met by other public funded

Medicaid Provider Manual

programs (e.g., MDHHS Home Help Program) or other resources for hourly care (e.g., private health insurance, trusts, bequests, private pay).

PDN providers are encouraged to work with families to assist in developing a backup plan for care of their child in the event that a PDN shift is delayed or cancelled, and the parent/guardian is unable to provide care. The parent/guardian is expected to arrange backup caregivers that they will notify, and the parent/guardian remains responsible for contacting these backup caregivers when necessary.

1.8 SERVICE LOG

If PDN is prior approved and care is initiated, a detailed log for each date of service must be maintained. The service log must be beneficiary specific, with the beneficiary's name and birth date in the header portion of the document and must clearly identify the specific time worked by each PDN in the home and for each date of service. In cases where the nurse is caring for two or more beneficiaries in the same home, a separate service log for each beneficiary must be maintained. This log must be kept in the beneficiary's record and may be documented in electronic or paper format. The medical record itself or nursing flow sheets containing other information are not considered a service log for the purposes of this policy. Failure to maintain a log or to submit this information to MDHHS upon request may result in recoupment of PDN reimbursement.

The following service log provides an example of the required fields.

(Beneficiary Name and Birth Date)						
Name	Date of Service	Start Time	Stop Time	Units	Nurse Signature & Date	Parent/Caregiver Signature & Date
(name RN/LPN)	10/06/10	8:00 a.m.	12:00 p.m.	16		
(name RN/LPN)	10/07/10	8:00 a.m.	4:20 p.m.	33		
(name RN/LPN)	10/08/10	7:45 a.m.	1:00 p.m.	21		
(name RN/LPN)	10/9/10	12:00 p.m.	5:45 p.m.	23		

PDN agencies should refer to the Billing & Reimbursement for Institutional Providers chapter for instructions on claim completion and requirements for the processing of claims. Medicaid-enrolled Registered Nurses (RN) or Licensed Practical Nurses (LPN) should refer to the Billing & Reimbursement for Professionals Chapter for instructions on claim completion and requirements for the processing of claims.

Each signature must be accompanied by a date. The date of the nurse's signature must be the same as the date of service. The date of the parent/caregiver signature should be within one week of the date of service. A claim must not be submitted before the service log is completed for those dates of service.

1.9 CLINICAL RECORD

In addition to the Service Log, the provider must maintain clinical records as detailed in the General Information for Providers Chapter of this manual. The clinical record must be sufficiently documented to

Medicaid Provider Manual

allow another professional to reconstruct what transpired during each hour of nursing service and billed to Medicaid in 15-minute incremental units.

1.10 PDN IN CONJUNCTION WITH HOME HELP OR PERSONAL CARE SERVICES

If the beneficiary receiving PDN demonstrates a need for personal care or Home Help services in addition to PDN, there must be coordination between the delivery of personal care or Home Help services and the PDN services, as well as documentation in the POC to verify there is no duplication of services.

1.11 HOLIDAYS

MDHHS allows additional reimbursement for holidays. Currently recognized holidays are: New Year's Day, Easter, Memorial Day, July 4th, Labor Day, Thanksgiving and Christmas Day.

A holiday begins at 12:00 a.m. and ends at 12:00 midnight of that holiday day.

1.12 MILEAGE

Staff mileage to the beneficiary's home is covered as a part of the PDN service and may not be billed separately.

1.13 CARING FOR MORE THAN ONE PATIENT AT A TIME

For ratios of more than two patients per nurse, the provider must contact the entity authorizing the beneficiary's PDN services: Children's Waiver (the Community Mental Health Services Program), Habilitation Supports Waiver (the Community Mental Health Services Program), Home and Community-Based Services Waiver for the Elderly and Disabled (MI Choice Waiver) or the PRD. These ratios are considered exceptional cases and require prior approval.

When two Medicaid beneficiaries less than 21 years of age reside in the same home and require PDN services, one nurse will be authorized to provide care for both individuals. (The PDN rate is adjusted to accommodate this ratio.) In the event of an exceptional and emergent circumstance, a ratio of 1:1 nursing will be authorized for a limited period of time when two PDN beneficiaries reside in the same home. During this time period, PDN services must be reassessed on at least a monthly basis, documented in the POC, and submitted to the PDN authorizing entity to demonstrate the need for continuation of 1:1 nursing services. The POC must document efforts being made to wean the beneficiaries from 1:1 care.

A PDN authorized to provide services to two children at the same location may find that, at times, only one child is present to receive services. This may occur when one child is in school, at a medical appointment, hospitalized, or on a family outing. The beneficiary record must document why only one child was present to receive services, as well as the beginning and ending time of the services. (Refer to the appropriate Billing and Reimbursement chapter for billing instructions.)

1.14 BILLING FOR PRIVATE DUTY NURSING

For billing instructions, nurses should refer to the Billing & Reimbursement for Professionals Chapter of this manual and agencies should refer to the Billing & Reimbursement for Institutional Providers Chapter of this manual.

SECTION 2 – CARE REQUIREMENTS

2.1 PLAN OF CARE

A written plan of care (POC) guides all services provided to the beneficiary by the PDN provider. The POC identifies and addresses the beneficiary's need for PDN. The POC and the process for developing it reflect the beneficiary's and family's basic rights of self-determination and autonomy.

- Family members and the beneficiary (as appropriate to their maturity) participate in developing the POC. They are provided with accurate information and support appropriate to informed decision-making. They must give informed consent for the planned services by signing and dating the POC annually and when updating the POC as needed based on the beneficiary's medical needs.
- Beneficiary/family strengths, including cultural and ethnic identity, are respected and utilized in the delivery of care. Services delivered in the home accommodate beneficiary/family life activities.
- The plan includes goals directed toward increasing beneficiary/family capability, effectiveness, and control.
- The plan includes compensatory services to support the growth and developmental potential of each beneficiary, given their disability or illness.
- Appointments are coordinated and services are scheduled with the goals of minimizing inconvenience to the beneficiary/family, and of facilitating the family's participation in the beneficiary's care.
- If the services are provided by LPNs, the POC must identify the frequency of the supervisory RN visits.

The written POC must be retained in the beneficiary's medical record.

2.2 SUSPECTED ABUSE/NEGLECT

If there is reasonable cause to suspect that a beneficiary may be in danger of abuse, neglect, exploitation, cruelty, or other hazards, the PDN must report the suspected abuse to the Adult or Child Protective Services Unit of the local MDHHS office. (Refer to the General Information for Providers Chapter of this manual for additional information.)

2.3 MEDICAL CRITERIA

To qualify for PDN, the beneficiary must meet the medical criteria of **either** I and III below **or** II and III below:

Medicaid Provider Manual

Medical Criteria I	<p>The beneficiary is dependent daily on technology-based medical equipment to sustain life. "Dependent daily on technology-based medical equipment" means:</p> <ul style="list-style-type: none">▪ Mechanical ventilation four or more hours per day, or assisted respiration does not automatically include ventilation through Bi-level Positive Airway Pressure (Bi-PAP) or Continuous Positive Airway Pressure (CPAP). Use of these devices to satisfy this criteria will be evaluated on a case-by-case basis; or▪ Oral or tracheostomy suctioning 8 or more times in a 24-hour period; or▪ Nasogastric tube feedings or medications when removal and insertion of the nasogastric tube is required, associated with complex medical problems or medical fragility; or▪ Total parenteral nutrition delivered via a central line, associated with complex medical problems or medical fragility; or▪ Continuous oxygen administration, in combination with a pulse oximeter and a documented need for observations and adjustments in the rate of oxygen administration.
Medical Criteria II	<p>Frequent episodes of medical instability within the past three to six months, requiring skilled nursing assessments, judgments or interventions as described in III below, due to a substantiated progressively debilitating physical disorder.</p> <ul style="list-style-type: none">▪ "Frequent" means at least 12 episodes of medical instability related to the progressively debilitating physical disorder within the past six months, or at least six episodes of medical instability related to the progressively debilitating physical disorder within the past three months;▪ "Medical instability" means emergency medical treatment in a hospital emergency room or inpatient hospitalization related to the underlying progressively debilitating physical disorder;▪ "Emergency medical treatment" means covered inpatient and outpatient services that are furnished by a provider who is qualified to furnish such services and which are needed to evaluate or stabilize an emergency medical condition. "Emergency medical condition" means a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain) such that a prudent layperson who possesses an average knowledge of health and medicine could reasonably expect the absence of immediate medical attention to place the health of the individual in serious jeopardy, serious impairment to bodily functions, or serious dysfunction of any bodily organ or part.▪ "Progressively debilitating physical disorder" means an illness, diagnosis, or syndrome that results in increasing loss of function due to a physical disease process, and that has progressed to the point that continuous skilled nursing care (as defined in III below) is required; and▪ "Substantiated" means documented in the clinical/medical record, including the nursing notes. <p>For beneficiaries described in II, the requirement for frequent episodes of medical instability is applicable only to the initial determination of medical necessity for PDN. Determination of continuing eligibility for PDN for beneficiaries defined in II is based on the original need for skilled nursing assessments, judgments, or interventions as described in III below.</p>

Medicaid Provider Manual

Medical Criteria III	<p>The beneficiary requires continuous skilled nursing care on a daily basis during the time when a licensed nurse is paid to provide services.</p> <ul style="list-style-type: none">▪ "Continuous" means at least once every three hours throughout a 24-hour period, and/or when delayed interventions may result in further deterioration of health status, in loss of function or death, in acceleration of the chronic condition, or in a preventable acute episode.▪ Equipment needs alone do not create the need for skilled nursing services.▪ "Skilled nursing" means assessments, judgments, interventions, and evaluations of interventions requiring the education, training, and experience of a licensed nurse. Skilled nursing care includes, but is not limited to, performing assessments to determine the basis for acting or a need for action; monitoring fluid and electrolyte balance; suctioning of the airway; injections; indwelling central venous catheter care; managing mechanical ventilation; oxygen administration and evaluation; and tracheostomy care.
-----------------------------	---

2.4 DETERMINING INTENSITY OF CARE AND MAXIMUM AMOUNT OF PDN

As part of determining the maximum amount of PDN a beneficiary is eligible for, their Intensity of Care category must be determined. This is a clinical judgment based on the following factors:

- The beneficiary's medical condition;
- The type and frequency of needed nursing assessments, judgments and interventions; and
- The impact of delayed nursing interventions.

Equipment needs alone do not determine intensity of care. Other aspects of care (e.g., administering medications) are important when developing a plan for meeting the overall needs of the beneficiary, but do not determine the number of hours of nursing for which the beneficiary is eligible.

High Category	Medium Category	Low Category
Beneficiaries requiring nursing assessments, judgments and interventions by a licensed nurse (RN/LPN) at least one time each hour throughout a 24-hour period, when delayed nursing interventions could result in further deterioration of health status, in loss of function or death, or in acceleration of the chronic condition.	Beneficiaries requiring nursing assessments, judgments and interventions by a licensed nurse (RN/LPN) at least one time every three hours throughout a 24-hour period, or at least 1 time each hour for at least 12 hours per day, when delayed nursing interventions could result in further deterioration of health status, in loss of function or death, or in acceleration of the chronic condition. This category also includes beneficiaries with a higher need for nursing assessments and judgments due to an inability to communicate and direct their own care.	Beneficiaries requiring nursing assessments, judgments and interventions by a licensed nurse (RN/LPN) at least one time every three hours for at least 12 hours per day, as well as those beneficiaries who can participate in and direct their own care.

Medicaid uses the "Decision Guide for Establishing Maximum Amount of Private Duty Nursing to be Authorized on a Daily Basis" (below) to establish the amount of PDN that is approved. The Decision Guide is used to determine the appropriate range of nursing hours (prior authorized and billed in 15-minute increments) that can be authorized under the Medicaid PDN benefit and defines the "benefit

Medicaid Provider Manual

limitation" for individual beneficiaries. The Decision Guide is used by the authorizing entity after it has determined the beneficiary meets both general eligibility requirements and medical criteria as stated above. The amount of PDN (i.e., the time) that can be authorized for a beneficiary is based on several factors, including the beneficiary's care needs which establish medical necessity for PDN, the beneficiary's and family's circumstances, and other resources for daily care (e.g., private health insurance, trusts, bequests, private pay). To illustrate, the number of hours covered by private health insurance is subtracted from the hours approved under Medicaid PDN. These factors are incorporated into the Decision Guide. The higher number in the range is considered the maximum number of hours that can be authorized. Except in emergency circumstances, Medicaid does not approve more than the maximum hours indicated in the guide.

Only those factors that influence the maximum number of hours that can be authorized are included on this decision matrix. Other factors (e.g., additional dependent children, additional children with special needs, and required nighttime interventions) that impact the caregiver's availability to provide care should be identified during an assessment of service needs. These factors have implications for service planning and should be considered when determining the actual number of hours (within the range) to authorize.

Decision Guide for Establishing Maximum Amount of Private Duty Nursing to be Authorized on a Daily Basis

FAMILY SITUATION/ RESOURCE CONSIDERATIONS		INTENSITY OF CARE Average Number of Hours Per Day		
		LOW	MEDIUM	HIGH
Factor I – Availability of Caregivers Living in the Home	2 or more caregivers; both work or are in school F/T or P/T	4-8	6-12	10-16
	2 or more caregivers; 1 works or is in school F/T or P/T	4-6	4-10	10-14
	2 or more caregivers; neither works or is in school at least P/T	1-4	4-8	6-12
	1 caregiver; works or is in school F/T or P/T	4-8	6-12	10-16
	1 caregiver; does not work or is not a student	1-4	6-10	8-14
Factor II – Health Status of Caregiver(s)	Significant health issues	Add 2 hours if Factor I ≤ 8	Add 2 hours if Factor I ≤ 12	Add 2 hours if Factor I ≤ 14
	Some health issues	Add 1 hour if Factor I ≤ 7	Add 1 hour if Factor I ≤ 9	Add 1 hour if Factor I ≤ 13
Factor III – School *	Beneficiary attends school 25 or more hours per week, on average	Maximum of 6 hours per day	Maximum of 8 hours per day	Maximum of 12 hours per day
<p>* Factor III limits the maximum number of hours which can be authorized for a beneficiary:</p> <ul style="list-style-type: none"> Of any age in a center-based school program for more than 25 hours per week; or Age six and older for whom there is no medical justification for a homebound school program. <p>In both cases, the lesser of the maximum "allowable" for Factors I and II, or the maximum specified for Factor III, applies.</p>				

Medicaid Provider Manual

When using the Decision Guide, the following definitions apply:

- "Caregiver": legally responsible person (e.g., birth parents, adoptive parents, spouses), paid foster parents, guardian or other adults who are not legally responsible or paid to provide care but who choose to participate in providing care.
- "Full-time (F/T)": working at least 30 hours per week for wages/salary, or attending school at least 30 hours per week.
- "Part-time (P/T)": working at least 15 hours per week for wages/salary, or attending school at least 15 hours per week.
- "Significant" health issues: one or more primary caregiver(s) has a health or emotional condition that prevents the caregiver from providing care to the beneficiary (e.g., beneficiary weighs 70 pounds and has no mobility and the primary caregiver just had back surgery and is in a full-body cast).
- "Some" health issues: one or more primary caregiver(s) has a health or emotional condition, as documented by the caregiver's treating physician, that interferes with, but does not prevent, provision of care (e.g., caregiver has lupus, alcoholism, depression, back pain when lifting, lifting restrictions, etc.).
- "School" attendance: The average number of hours of school attendance per week is used to determine the maximum number of hours that can be authorized for the individual of school age. The average number of hours is determined by adding the number of hours in school plus transportation time. Authorization of PDN hours will not automatically be increased during breaks from school (vacations) or adjusted beyond the limits of factors I and II.

The Local School District (LSD) or Intermediate School District (ISD) is responsible for providing such "health and related services" as necessary for the student to participate in their education program. Unless medically contraindicated, individuals of school age should attend school. Factor III applies when determining the maximum number of hours to be authorized for an individual of school age. The Medicaid PDN benefit cannot be used to replace the LSD's or ISD's responsibility for services (either during transportation to/from school or during participation in the school program) or when the child would typically be in school but for the parent's choice to home-school the child.

2.5 EXCEPTION PROCESS

Because each beneficiary and their family are unique and because special circumstances arise, it is important to maintain an exception process to ensure the beneficiary's safety and quality of care. PDN services that exceed the beneficiary's benefit limitation, as established by the Decision Guide, must be prior authorized by the appropriate Medicaid case management program. Limited authority to exceed the published PDN benefit limitations may be granted on a time-limited basis as detailed below.

The beneficiary or their primary care giver must initiate the request for an exception. The applicable Medicaid case management program's representative is responsible for facilitating the request and documenting the necessity for an exception. Factors underlying the need for additional PDN must be identified in the beneficiary's POC, which must include strategies directed toward resolving the factors necessitating the exception, if applicable. Documentation must substantiate all of the following:

Medicaid Provider Manual

- Current medical necessity for the exception;
- Current lack of natural supports required for the provision of the needed level of support; and
- Additional PDN services are essential to the successful implementation of the beneficiary's written POC, and are essential to maintain the beneficiary within the least restrictive, safe, and humane environment suitable to their condition.

Exceptions are time-limited and must reflect the increased identified needs of the beneficiary. Consideration for an exception is limited to situations outside the beneficiary's or family's control that place the beneficiary in jeopardy of serious injury or significant deterioration of health status. Exceptions may be considered for either of the following general situations:

A temporary alteration in the beneficiary's care needs following a hospitalization, resulting in one or both of the following:	The temporary inability of the primary caregiver(s) to provide required care as the result of one of the following: ("Inability" is defined as the caregiver is either unable to provide care or is prevented from providing care.)
<ul style="list-style-type: none">▪ A temporary increase in the intensity of required assessments, judgments, and interventions.▪ A temporary need for additional training to enable the primary caregiver(s) to identify and meet the beneficiary's care needs. <p>The total number of additional PDN hours cannot exceed two hours per day, for a maximum of six months.</p>	<ul style="list-style-type: none">▪ An acute illness or injury of the primary caregiver(s). The total number of additional PDN hours cannot exceed two hours per day for the duration of the caregiver's inability, not to exceed six months. In the event there is only one caregiver living in the home and that caregiver is hospitalized, a maximum of 24 hours per day can be authorized for each day the caregiver is hospitalized.▪ The death of the primary caregiver(s) or an immediate family member. "Immediate family member" is defined as the caregiver's spouse, partner, parent, sibling, or child. The maximum number of hours allowable under this exception criterion is 24 hours per day for a maximum of seven days.▪ The home environment has been determined to be unstable, as evidenced by MDHHS protective or preventive services involvement. <p>The written POC and community-based care coordination activities must include strategies directed toward stabilizing service supports and/or the family situation. The maximum number of hours varies by the beneficiary's Intensity of Care category: High = maximum of 18 hours per day; Medium = maximum of 14 hours per day; Low = maximum of 10 hours per day. The length of time for this exception is three months or the time needed to stabilize service supports and/or family situation, whichever is less. A one-time extension of up to three months may be made if there is documented progress toward achieving the stabilized home environment.</p>

2.6 CHANGE IN BENEFICIARY'S CONDITION/PDN AS A TRANSITIONAL BENEFIT

Medicaid policy requires that the integrated POC be updated as necessary based on the beneficiary's medical needs. Additionally, when a beneficiary's condition changes, warranting a decrease in the number of approved hours or a discontinuation of services, the provider must report the change to the appropriate authorizing agent (i.e., the PRD, Children's Waiver, or Habilitation Supports Waiver) in writing. Changes such as weaning from a ventilator or tracheostomy decannulation can occur after months or years of services, or a beneficiary's condition may stabilize to the point of requiring fewer PDN hours or the discontinuation of hours altogether. It is important that the provider report all changes resulting in a decrease in the number of hours to the authorizing agent as soon as they occur, as well as properly updating the POC. MDHHS will seek recovery of monies inappropriately paid to the provider if, during case review, the authorizing agent determines that a beneficiary required fewer PDN hours than was provided and MDHHS was not notified of the change in condition.

In some cases, the authorized PDN services may be considered a transitional benefit. In cases such as this, one of the primary reasons for providing services should be to assist the family or caregiver(s) to become independent in the care of the beneficiary. The provider, in collaboration with the family or caregiver(s), may decide that the authorized number of hours should be decreased gradually to accommodate increased independence on the part of the family, caregiver(s), and/or beneficiary. A detailed exit plan with instructions relating to the decrease in hours and possible discontinuation of care should be documented in the POC. The provider must notify the authorizing agent that hours are being decreased and/or when the care will be discontinued.

2.7 HOSPICE SERVICES

If a beneficiary receiving private duty nursing (PDN) becomes eligible for hospice, the hospice is required to notify the PRD before a claim is submitted for the services. (Refer to the Directory Appendix for contact information.)

The hospice must provide the following information on agency letterhead to the PRD.

- beneficiary name and Medicaid ID number;
- a request for a case review and approval of hospice services;
- a statement confirming that the beneficiary has been certified terminally ill with six months or less to live, signed by the hospice medical director and the beneficiary's attending physician; and
- name, e-mail address, and telephone number of the contact person.

PRD staff may request additional medical record documentation for their review. PDN authorization cannot occur unless the hospice submits the requested documentation to the PRD. If services are approved, the hospice must work with the PDN agency to develop a coordinated POC. Both the hospice and PDN staff must ensure that duplication of services does not occur. While hospice maintains the lead in coordinating the services, the PDN agency must continue to obtain prior authorization from MDHHS for the PDN services. Hospice services must be utilized to the fullest extent before PDN services will be authorized.

Medicaid Provider Manual

This does not apply to beneficiaries receiving PDN services under the Habilitation Supports Waiver (HSW) and over 21 years old, or the MI Choice Waiver. For beneficiaries under the HSW (over 21 years old), providers should contact the beneficiary's case manager to inform them of hospice eligibility. If the beneficiary is under the MI Choice Waiver, providers should contact the MI Choice Waiver Supports Coordinator.

SECTION 1 – GENERAL INFORMATION

The Program of All-Inclusive Care for the Elderly (PACE) is an innovative model of community-based care that enables elderly individuals, who are certified by their state as needing nursing facility care, to live as independently as possible.

PACE provides an alternative to traditional nursing facility care by offering pre-paid, capitated, comprehensive health care services designed to meet the following objectives:

- Enhance the quality of life and autonomy for frail, older adults;
- Maximize the dignity of, and respect for, older adults;
- Enable frail, older adults to live in the community as long as medically and socially feasible; and
- Preserve and support the older adult's family unit.

The PACE capitated benefit was authorized by the federal Balanced Budget Act of 1997 and features a comprehensive service delivery system with integrated Medicare and Medicaid financing.

An interdisciplinary team, consisting of professional and paraprofessional staff, assesses beneficiary needs, develops a plan of care, and monitors delivery of all services (including acute care services as well as nursing facility services, when necessary) within an integrated system for a seamless provision of total care. Typically, PACE organizations provide social and medical services in an adult day health center supplemented by in-home and other services as needed.

The financing model combines payments from Medicare and Medicaid, allowing PACE organizations to provide all needed services rather than be limited to those reimbursable under the Medicare and Medicaid fee-for-service systems. PACE organizations assume full financial risk for beneficiary care without limits on amount, duration, or scope of services.

Physicians currently treating Medicaid patients who are in need of nursing facility care may consider PACE as an option. Hospital discharge planners may also identify suitable candidates for referral to PACE as an alternative to a nursing facility. (Refer to the Directory Appendix for PACE contact information.)

SECTION 2 – SERVICES

The PACE organization becomes the sole source of services for Medicare and Medicaid beneficiaries who choose to enroll in a PACE organization.

The PACE organization is able to coordinate the entire array of services to older adults with chronic care needs while allowing elders to maintain independence in the community for as long as possible. The PACE service package must include all Medicare and Medicaid covered services, in addition to other services determined necessary by the interdisciplinary team for the individual beneficiary. Services must include, but are not limited to:

- Adult day care that offers nursing, physical, occupational and recreational therapies, meals, nutritional counseling, social work and personal care
- All primary medical care provided by a PACE physician familiar with the history, needs and preferences of each beneficiary, all specialty medical care, and all mental health care
- Interdisciplinary assessment and treatment planning
- Home health care, personal care, homemaker and chore services
- Restorative therapies
- Diagnostic services, including laboratory, x-rays, and other necessary tests and procedures
- Transportation for medical needs
- All necessary prescription drugs and any authorized over-the-counter medications included in the plan of care
- Social services
- All ancillary health services, such as audiology, dentistry, optometry, podiatry, speech therapy, prosthetics, durable medical equipment, and medical supplies
- Respite care
- Emergency room services, acute inpatient hospital and nursing facility care when necessary
- End-of-Life care

SECTION 3 – ELIGIBILITY AND ENROLLMENT

3.1 ELIGIBILITY REQUIREMENTS

To be eligible for PACE enrollment, applicants must meet the following requirements:

- Be age 55 years or older.
- Meet applicable Medicaid financial eligibility requirements. (Eligibility determinations will be made by the Michigan Department of Health and Human Services (MDHHS).)
- Reside in the PACE organization's service area.
- Be capable of safely residing in the community without jeopardizing health or safety while receiving services offered by the PACE organization.
- Receive a comprehensive assessment of participant needs by an interdisciplinary team.
- A determination of functional/medical eligibility based upon the online version of the Michigan Medicaid Nursing Facility Level of Care Determination (LOCD) that was conducted online within fourteen (14) calendar days from the date of enrollment into the PACE organization.
- Be provided timely and accurate information to support Informed Choice for all appropriate Medicaid options for Long Term Care.
- Not concurrently enrolled in the MI Choice program.
- Not concurrently enrolled in an HMO.

3.2 COMPLETION OF THE MEDICAID NURSING FACILITY LOC DETERMINATION

A PACE applicant's eligibility for coverage of nursing facility services and enrollment in the PACE organization is determined by the online application of the Michigan Medicaid Nursing Facility Level of Care Determination (LOCD). The PACE organization will not be reimbursed for nursing facility services rendered when the applicant is determined not to meet the LOCD criteria. Providers must submit the LOCD information into its online version no later than fourteen (14) calendar days following the start of services. Instructions and required forms related to the completion of the Medicaid Nursing Facility Level of Care Determination are available on the MDHHS website. (Refer to the Directory Appendix for website information.)

The LOCD must be completed by a health professional (physician, registered nurse, licensed practical nurse, clinical social worker (BSW or MSW), or physician assistant) representing the proposed provider. Nonclinical staff may perform the evaluation when clinical oversight by a professional is performed. The PACE organization will be held responsible for enrolling only those participants who meet the criteria outlined in this section.

The Michigan Medicaid Nursing Facility Level of Care Determination must be completed using the online version in the following situations:

- all new enrollments of Medicaid-eligible beneficiaries.
- re-enrollment of Medicaid-eligible beneficiaries.
- significant change in condition of a current PACE Medicaid-eligible beneficiary.

The online LOCD must be completed only once for each admission or readmission to the program.

3.3 INFORMED CHOICE

When a beneficiary is determined eligible for nursing facility level of care through completion of the online LOCD, they must be provided timely and accurate information to support informed choice for all appropriate Medicaid options for long-term care.

Process Guidelines available on the MDHHS website define the required process. (Refer to the Directory Appendix for website information.)

3.4 NURSING FACILITY LEVEL OF CARE EXCEPTION PROCESS - EXCEPTION REVIEW

A Nursing Facility (NF) Level of Care (LOC) Exception Process is a review that is available for financially eligible beneficiaries who have demonstrated a significant level of long term care need but do not meet the LOCD. The NF LOC Exception Process is initiated when the PACE organization telephones the MDHHS designee and requests the NF LOC Exception Review on the date that the applicant was determined ineligible based on the online version of the LOCD. The NF LOC Exception criteria and information on how to request an Exception Review is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

3.5 TELEPHONE INTAKE GUIDELINES

The Telephone Intake Guidelines are questions that identify potential PACE participants for further assessment. The Telephone Intake Guidelines do not determine program eligibility. Use of the Telephone Intake Guidelines is at the discretion of the PACE organization. The guidelines are available on the MDHHS website. (Refer to the Directory Appendix for website information.)

3.6 DEEMING PROCESS

MDHHS may deem a participant who no longer meets the State Medicaid nursing facility level of care requirements to continue to be eligible for the PACE program if, in the absence of continued coverage under the program, MDHHS determines the participant reasonably would be expected to meet the nursing facility level of care requirement in the next six months.

To be eligible for deeming, a participant must meet the following requirements:

- Participant must have been receiving PACE services for at least the past six months and no longer than one year.
- Participant no longer meets nursing facility level of care requirements.

Medicaid Provider Manual

- In the absence of continued coverage under PACE, the participant reasonably would be expected to meet the nursing facility level of care requirement in the next six months.

When a deemed PACE participant has been in the program for one year, the PACE organization must conduct an in-person annual reassessment to determine if the participant meets nursing facility level of care.

3.7 ENROLLMENT AND DISENROLLMENT

PACE provider staff must submit PACE enrollment and disenrollment forms electronically within the Community Health Automated Medicaid Processing System (CHAMPS) by the end of card cut-off.

3.7.A. ENROLLMENTS

PACE providers must upload and submit the following signed enrollment materials with the electronic enrollment.

- Enrollment Agreement Benefits and Coverages
- Nursing Facility Level of Care Freedom of Choice Form
- If necessary, Durable Power of Attorney (DPOA) or guardianship documents

Once completed and all eligibility requirements have been checked, CHAMPS will assign the participant a PET code and enrollment start date.

3.7.B. DISENROLLMENTS

Voluntary	A signed disenrollment form must be uploaded to CHAMPS.
Involuntary	Once the electronic form has been completed, PACE providers will submit appropriate supporting documentation to their MDHHS contract manager. MDHHS will review and approve or deny the electronic disenrollment in CHAMPS and determine the appropriate date of disenrollment.
Death	Providers will enter the date of death with the electronic disenrollment. A completed disenrollment will end-date the corresponding PET code.

3.8 ANNUAL RECERTIFICATION

MDHHS must annually certify that PACE participants continue to meet PACE financial eligibility requirements. PACE organizations must also ensure that participants continue to meet the LOCD criteria on an ongoing basis. If the participant continues to meet the LOCD criteria, it must be demonstrated in the medical record by way of initial comprehensive assessments, reassessments and progress notes. Additional online LOCDs are not conducted for the purpose of determining ongoing LOCD eligibility.

If the PACE participant no longer meets the LOCD criteria, federal regulations may deem the participant to be eligible for the PACE program until the next annual reevaluation if, in the absence of continued coverage under PACE, the participant reasonably would be expected to again meet the nursing facility level of care criteria within the next six months.

3.9 RETROSPECTIVE REVIEW AND MEDICAID RECOVERY

At random and whenever indicated, MDHHS will perform retrospective reviews to validate the Michigan Medicaid Nursing Facility Level of Care Determination. If the participant is found to be ineligible for PACE services, MDHHS will recover all Medicaid payments made for PACE services rendered during the period of ineligibility. The Retrospective Review process (defined in the Beneficiary Eligibility and Admission Process Section of the Nursing Facility Coverages Chapter) is applicable to PACE organizations.

3.10 ADVERSE ACTION NOTICE

When the provider determines that the beneficiary does not qualify for services based on the Michigan Medicaid Nursing Facility Level of Care Determination, the organization must immediately issue an adverse action notice to the beneficiary or their authorized representative. The action notice must include all of the language of the sample letters for long term care. Copies of the letters are available on the MDHHS website. (Refer to the Directory Appendix for website information.)

As with any benefit denial, the beneficiary may request an administrative hearing. The Michigan Office of Administrative Hearings and Rules (MOAHR) Policies and Procedures Manual explains the process by which each different case is brought to completion. The manual is available for review on the MDHHS website. (Refer to the Directory Appendix for MOAHR contact and website information.)

3.11 NURSING FACILITY LEVEL OF CARE PROCESS - IMMEDIATE REVIEW UPON ISSUANCE OF AN ADVERSE ACTION NOTICE

The MDHHS designee may conduct a Nursing Facility (NF) Level of Care (LOC) Process Immediate Review for a Medicaid pending/eligible beneficiary who was determined functionally/medically ineligible based on the online Michigan Medicaid Nursing Facility Level of Care Determination. The beneficiary, or their representative, must request an Immediate Review before noon of the first working day after the date of receipt of the notice as follows:

- The MDHHS designee will request the PACE organization to provide medical documentation by close of business of the first business day after the date the beneficiary requests an Immediate Review.
- The MDHHS designee will review the medical documentation, obtain information from the beneficiary and/or their representative, and notify the beneficiary and the provider of the determination within three business days of receipt of the medical documentation.

The beneficiary (or representative) may still request an MDHHS appeal of the Michigan Medicaid Nursing Facility Level of Care Determination. (Refer to the Directory Appendix for contact information.)

3.12 FREEDOM OF CHOICE

When an applicant has been determined eligible for nursing facility level of care through completion of the online LOCD, the beneficiary must be informed of their benefit options and elect to receive services in a specific program. This election must take place prior to initiating PACE services.

The applicant (or legal representative) must be informed of the following:

- services available under PACE
- services available in other community settings, such as the MI Choice Program
- services available through Medicaid-reimbursed nursing facilities

If applicants are interested in nursing facility or MI Choice Program care, the PACE organization must provide appropriate referral information using the Access Guidelines to Medicaid Services for Persons with Long Term Care Needs. These guidelines are available on the MDHHS website. (Refer to the Directory Appendix for website information.)

Applicants must acknowledge that they have been informed of their program options in writing by signing the Freedom of Choice form that is witnessed by the applicant's representative when appropriate. A copy of the completed form for non-participants must be retained for a period of three years. The completed form must be kept in the medical record if the applicant chooses to receive PACE services.

A copy of the Freedom of Choice form is included with the Michigan Medicaid Nursing Facility Level of Care Determination on the MDHHS website. (Refer to the Directory Appendix for website information.)

3.13 APPLICANT APPEALS

3.13.A. FINANCIAL ELIGIBILITY

A determination that an applicant is not financially eligible for Medicaid is an adverse action. Applicants may appeal to MDHHS. (Refer to the Directory Appendix for contact information.)

3.13.B. FUNCTIONAL/MEDICAL ELIGIBILITY

A determination that a beneficiary is not functionally/medically eligible for PACE services is an adverse action. If the beneficiary and/or representative disagrees with this determination, they have the right to request an administrative hearing before an administrative law judge. Information regarding the appeal process may be found on the MOAHR website. (Refer to the Directory Appendix for website information.)

3.13.C. PACE SERVICES

Noncoverage or nonpayment of services by the PACE organization for a beneficiary enrolled in PACE is an adverse action. If the beneficiary and/or representative disagrees with the noncoverage or nonpayment of services by the PACE organization, they have the right to request an administrative hearing before an administrative law judge. Information regarding the appeal process may be found on the MOAHR website. (Refer to the Directory Appendix for website information.) The beneficiary may request

continuation of the disputed service with the understanding that they may be liable for the cost of the disputed service if the determination is not made in their favor.

3.14 PROVIDER APPEALS

A Retrospective Review of the Michigan Medicaid Nursing Facility Level of Care Determination that results in a denial is an Adverse Action for PACE when MDHHS proposes to recover payments made for services rendered to the beneficiary for whom the Retrospective Review was conducted. If the PACE organization disagrees with the MDHHS Adverse Action Notice, the PACE organization may appeal if their written request is received by MOAHR within 30 calendar days from the date of the MDHHS Adverse Action Notice.

Information regarding the MDHHS appeal process is available in the General Information for Providers Chapter and on the MDHHS website. (Refer to the Directory Appendix for website information.)

SECTION 4 – PACE ORGANIZATION EVALUATION CRITERIA

4.1 INITIAL APPLICATIONS

Initial applications are for applicants seeking to become a PACE organization for the first time.

A prospective PACE organization can be a not-for-profit or for profit private or public entity that is primarily engaged in providing PACE services and participates in both Medicare and Medicaid. Michigan licensure as a health care entity is not required; however, unlicensed entities may only serve Medicare and Medicaid beneficiaries. Federal regulations (42 CFR Part 460) describe administrative requirements for PACE. At a minimum, prospective entities must meet the federal requirements for PACE organizations to enroll as a Michigan Medicaid provider and complete a feasibility study. Prospective entities will not be considered if the prospective entity has active sanctions in other states, as defined in the Federal regulations (42 CFR Part 460 Subpart D).

4.1.A. LETTER OF INTENT

A prospective PACE entity must submit a letter of intent to MDHHS that includes:

- Name of organization
- Location of potential PACE center
- Service area that is being requested by county and/or zip code
- Capacity

For budget consideration, a letter of intent must be received by MDHHS prior to August 1 (14 months) in advance of the fiscal year in which the program plans to open.

If MDHHS receives multiple letters of intent for the same service area, the feasibility studies will be reviewed in the order in which the letters of intent are received.

If MDHHS receives a letter of intent for a service area that is already being serviced by a PACE provider, MDHHS will begin the unmet need process. (Refer to the Unmet Need subsection in this chapter for additional information.)

Within 14 business days of receiving the letter of intent, MDHHS will send a letter to the prospective PACE entity to confirm the receipt of their letter of intent and notify the prospective PACE entity that a feasibility study must be submitted to MDHHS within 90 calendar days from the date of the letter.

4.1.B. FEASIBILITY STUDY

MDHHS will evaluate potential PACE organizations using the following criteria:

- Submission of a feasibility study that:
 - identifies the proposed service area;

Medicaid Provider Manual

- shows evidence of demand for PACE services in the proposed service area (the potential pool of PACE beneficiaries should be sufficient to have, at minimum, 125 participants);
- documents the organization's timeline for development and anticipated costs;
- identifies the anticipated source of referrals for potential beneficiaries and assesses the availability of long-term care services already in existence in the community;
- demonstrates organizational commitment to principles consistent with the PACE model;
- shows evidence of experience in providing primary, acute and/or long-term care services to the target population and evidence of positive community support;
- shows evidence that the organization has the depth in leadership and experience required to develop and implement PACE successfully;
- shows evidence that the PACE organization will either be cost neutral or save money for long-term care services provided by MDHHS in the PACE organization's service area (i.e., total Medicaid expenditures for services in the service area will not increase and may decrease);
- includes assurance of adequate financial capacity to fund program development and start-up costs, including identification of patient capacity and break-even consideration;
- shows evidence of the proposed provider network and assurance that the organization will have staff and professionals experienced in providing care to the target population;
- shows evidence that the Executive (Program) Director position will be staffed with a full-time employee;
- shows evidence that the key positions of Executive Director, Medical Director, Center Manager, Financial Manager, and Quality Improvement Manager are sufficiently staffed, as determined by MDHHS, to meet the needs of the PACE organization;
- shows evidence that the key positions will be staffed on-site; and
- demonstrates ability to meet state and federal PACE requirements.

Other evaluation criteria may be considered and will be available to organizations that file a letter of intent with MDHHS to become a PACE organization.

Once MDHHS has approved the prospective PACE entity's feasibility study, MDHHS will send an approval letter and the entity will have one year from the date of the letter to submit a PACE application to MDHHS and the Centers for Medicare & Medicaid Services (CMS). Prior to the submission, MDHHS will provide a State Assurance document in support of the application.

4.2 EXPANSION APPLICATIONS

An expansion application is for existing PACE organizations that are seeking to expand.

Types of expansions include:

- A PACE organization requests to expand its geographic service area without building additional sites.
- A PACE organization requests to open another physical site in the existing geographic service area.
- A PACE organization requests to expand its geographic service area and open another physical site in the expanded area.
- A PACE organization requests to expand its current capacity.
- A PACE organization requests to expand its current building or change to a new address (does not require a Letter of Intent 14 months before fiscal year).

Expansion applications will not be accepted by MDHHS until the first CMS trial period audit has been completed with good standing and the organization is fiscally sound. A PACE organization will not be considered if the PACE organization has active sanctions, as defined in the Code of Federal regulations (42 CFR Part 460 Subpart D).

4.2.A. LETTER OF INTENT

An existing PACE provider must submit a letter of intent to MDHHS that includes:

- Name of organization
- Location of potential PACE center (if applicable)
- Service area that is being requested by county and/or zip code (if applicable)
- Capacity increase

For budget consideration, a letter of intent must be received by MDHHS prior to August 1 (14 months) in advance of the fiscal year in which the program plans to open. If MDHHS receives multiple letters of intent for the same service area, the feasibility studies will be reviewed in the order in which the letters of intent are received.

Within 14 business days of receiving the letter of intent, MDHHS will send a letter to the PACE program to confirm the receipt of their letter of intent and notify the PACE program that a feasibility study must be submitted to MDHHS within 90 calendar days from the date of the letter.

4.2.B. FEASIBILITY STUDY

PACE organizations requesting an expansion must submit a feasibility study that includes:

- A PACE organization requests to expand its geographic service area without building additional sites.
 - Identifies the proposed service area
 - Shows evidence of demand for PACE services in the proposed service area
 - Documents the organization's timeline

Medicaid Provider Manual

- Identifies the anticipated source of referrals for potential participants
- Includes assurance of adequate financial capacity to fund program development and start-up costs, including identification of participant capacity and break-even consideration
- Shows evidence of the proposed provider network and assurance that the organization will have staff and professionals experienced in providing care to the participants
- Shows evidence of experience in providing primary, acute and/or long-term care services to the target population and evidence of positive community support
- Demonstrates the ability to meet state and federal PACE requirements
- Demonstrates organizational commitment to principles consistent with the PACE model
- Shows evidence that the key positions of Executive Director, Medical Director, Center Manager, Financial Manager, and Quality Improvement Manager are sufficiently staffed
- Shows evidence that the Executive (Program) Director position will be staffed with a full-time employee
- Shows evidence that the organization has the depth in leadership and experience required to develop and implement PACE successfully
- A PACE organization requests to open another physical site in the existing geographic service area.
 - Identifies the proposed service area
 - Shows evidence of demand for PACE services in the proposed service area
 - Documents the organization's timeline for development and anticipated costs
 - Includes assurance of adequate financial capacity to fund program development and start-up costs, including identification of participant capacity and break-even consideration
 - Shows evidence that the key positions will be staffed on-site
 - Shows evidence that the key positions of Executive Director, Medical Director, Center Manager, Financial Manager, and Quality Improvement Manager are sufficiently staffed
 - Shows evidence that the Executive (Program) Director position will be staffed with a full-time employee
 - Demonstrates the ability to meet state and federal PACE requirements
 - Demonstrates organizational commitment to principles consistent with the PACE model
 - Demonstrates that the organization has the depth in leadership and experience required to develop and implement PACE successfully

Medicaid Provider Manual

- Shows evidence of experience in providing primary, acute and/or long-term care services to the target population and evidence of positive community support
- A PACE organization requests to expand its geographic service area and open another physical site in the expanded area.
 - Identifies the proposed service area
 - Shows evidence of demand for PACE services in the proposed service area
 - Documents the organization's timeline for development and anticipated costs
 - Identifies the anticipated source of referrals for potential participants
 - Includes assurance of adequate financial capacity to fund program development and start-up costs, including identification of participant capacity and break-even consideration
 - Shows evidence of the proposed provider network and assurance that the organization will have staff and professionals experienced in providing care to the participants
 - Shows evidence of experience in providing primary, acute and/or long-term care services to the target population and evidence of positive community support
 - Demonstrates the ability to meet state and federal PACE requirements
 - Demonstrates organizational commitment to principles consistent with the PACE model
 - Shows evidence that the key positions of Executive Director, Medical Director, Center Manager, Financial Manager, and Quality Improvement Manager are sufficiently staffed
 - Shows evidence that the Executive (Program) Director position will be staffed with a full-time employee
 - Shows evidence that the key positions will be staffed on-site
 - Shows evidence that the organization has the depth in leadership and experience required to develop and implement PACE successfully
- A PACE organization requests to increase its current capacity.
 - Identifies current capacity
 - Identifies current enrollment
 - Includes proposal for why increase is needed
 - Documents physical capacity determined by fire marshal for
 - Building
 - Day Center
 - Clinic
 - Identifies current average daily attendance for participants and staff
 - Building

Medicaid Provider Manual

- Day Center
- Clinic
- Documents projected daily attendance for participants and staff
 - Building
 - Day Center
 - Clinic
- A PACE organization requests to expand its current building or change of address.
- Identifies information that will be available to organizations that file a letter of intent with MDHHS.

Other evaluation criteria may be considered and will be available to organizations that file a letter of intent with MDHHS to become a PACE organization.

Once MDHHS has approved the PACE program's feasibility study, MDHHS will send an approval letter and the PACE program will have one year from date of the letter to submit a PACE application to MDHHS and CMS. Prior to the submission, MDHHS will provide a State Assurance document in support of the application.

4.3 ALTERNATIVE CARE SETTINGS

To be eligible to request an ACS, the following guidelines must be met:

- The PACE organization must have successfully completed their first trial period audit and be in good standing with CMS, per CMS audits.
- An ACS participant must belong to a PACE organizations center.
- The PACE organization's enrollment limit must have adequate space to accommodate projected ACS attendants.
- MDHHS must tour the proposed ACS location prior to approval.
- The ACS must be less than one (1) hour travel time from PACE Center.

The ACS is subject to MDHHS Readiness Review and will be included in the PACE organization's annual audits. ACSs are also subject to all state and federal regulations.

The following documents must be submitted to MDHHS when an ACS is requested:

- Previous year's annual financial report for the PACE organization;
- The PACE organization's business plan for ACS;
- Financial projection for ACS site (to include cost of ACS site, renovations, staff, equipment, etc.);
- Description of what population of participants will attend the ACS;
- Description of what and how services will be provided at the ACS:
 - ACS services must include, but are not limited to, meals, activities, personal care, laundry, and nursing (triage);

Medicaid Provider Manual

- Description of how services that are not provided at the ACS will be available to participants; and
- Description of plan for participants to attend a PACE Center, at least quarterly or more often, as determined by the PACE organization interdisciplinary team.

MDHHS may request additional information when necessary.

4.4 UNMET NEED

Definition	An unmet need is established when the number of true potential PACE beneficiaries (TPPB) is greater than zero.
Methodology	<p>Data from the Michigan Department of Health and Human Services (MDHHS) Data Warehouse will be used to determine unmet need when a prospective PACE entity is requesting an area being served by an existing PACE organization. MDHHS will pull the following data on a quarterly basis:</p> <ul style="list-style-type: none">▪ The number of beneficiaries in each county with an active Level of Care Determination (LOCD) and the number of beneficiaries currently in a PACE organization within each county.▪ To determine if there is unmet need, MDHHS will multiply the number of beneficiaries with an active LOCD by 11.25%.▪ MDHHS will remove current PACE beneficiaries and subtract the remaining enrollment capacity assigned to the current PACE organization to find the TPPB.▪ If the number of TPPB is greater than zero, there is an unmet need; if not, the need is met. <p>The National PACE Association (NPA) indicates 9% as the average national PACE market penetration rate (MPR). This rate is defined as the percentage of dual Medicare and Medicaid and Medicaid-only eligible beneficiaries needing long-term services and supports (LTSS) in the service area of a PACE organization who are enrolled in PACE according to the NPA. While the NPA indicates 9% as the MPR, MDHHS will use a higher MPR than the national average.</p> <p>Number of beneficiaries who meet nursing facility level of care <u>times 11.25% (MPR)</u> = number of potential PACE beneficiaries (PPB)</p> <p>Number of (PPB) <u>minus current PACE organization capacity</u> = number of (TPPB)</p> <p>Numerical example:</p> <p>5,000 beneficiaries who meet nursing facility level of care <u>times 11.25% (MPR)</u> 563 (PPB)</p> <p>563 (PPB) <u>minus 200 capacity of current organization</u> 363 (TPPB)</p> <p>= unmet need of 363 (TPPB)</p>

Medicaid Provider Manual

	<ul style="list-style-type: none">• If the number of TPPB is greater than zero = unmet need.• If the number of TPPB is less than zero = no unmet need. <p>The data used in the methodology described above will be pulled quarterly and posted on the MDHHS PACE website. MDHHS will also conduct an ongoing analysis to determine the effectiveness of the methodology.</p> <p>If an unmet need is determined, the current PACE organization will have the opportunity to submit expansion plans for review. If the current PACE organization fails to submit a plan for expansion, MDHHS will allow proposals from other organizations.</p>
--	--

4.4.A. UNMET NEED PROCESS

A prospective PACE entity must submit a letter of intent to MDHHS that includes:

- Name of organization
- Location of the PACE center
- Service area by county and/or zip code (if applicable)

MDHHS will confirm whether there is an unmet need by utilizing existing methodology.

If an unmet need is determined:

- Upon determination of unmet need, MDHHS will send a letter within 14 business days to the prospective PACE entity to confirm the receipt of their letter of intent. The letter will confirm whether there is an unmet need and the next steps for right of refusal.
- MDHHS will send a letter to the current PACE provider within 14 business days that an unmet need was determined, and a prospective PACE entity has requested their current service area. The current PACE provider will be given the opportunity to submit a plan to expand capacity sufficient to accommodate need and will have six (6) months from the notice of determination of unmet need to submit an expansion plan.
- An expansion plan from a current PACE provider must include:
 - Letter of Intent
 - Location (if applicable)
 - Service Area
 - Capacity increase
 - Estimated timeline
- If the current PACE provider's expansion plan is approved by MDHHS, they will have 90 calendar days from approval to submit a feasibility study. Once the feasibility study is received, current policy timelines will be followed. Refer to the Initial Applications subsection of this chapter for additional information regarding expansion timelines.
 - The current PACE provider must provide quarterly updates to MDHHS to ensure that the organization is making progress on the plan they submitted to address the unmet need.

Medicaid Provider Manual

- If the current PACE provider chooses to not submit an expansion plan within six (6) months, MDHHS will move forward with requesting the prospective PACE entity's submission of a feasibility study within 90 calendar days of notice.

If an unmet need is not determined:

- MDHHS will send a letter within 14 business days of notice to the prospective PACE entity that an unmet need was not determined and, therefore, will not accept their letter of intent.

SECTION 5 – BECOMING A PACE ORGANIZATION

Information regarding the process to become a PACE organization is available on the MDHHS website. Any entity seeking to become a PACE organization in Michigan may contact MDHHS regarding state-specific requirements. (Refer to the Directory Appendix for contact and website information.)

Medicaid Provider Manual

SECTION 1 – GENERAL INFORMATION

1.1 RURAL HEALTH CLINIC CERTIFICATION

This chapter provides policy and reimbursement information specific to Rural Health Clinics (RHCs) and is to be used in combination with other chapters of the Medicaid Provider Manual.

In compliance with the Rural Health Clinic Services Act of 1977 (Public Law 95-210), the Medicaid program reimburses certified and enrolled RHCs for services provided to Medicaid beneficiaries in the State of Michigan. To become certified as a RHC in Michigan, clinics must make application for RHC status through the designated state-certifying agency. (Refer to the Directory Appendix for contact information.) Based on information in the application, the certifying agency determines if an applicant clinic meets the staffing and location requirements for certification. If a clinic appears eligible, an on-site visit is conducted. If a clinic meets all the requirements, the certifying agency makes a recommendation for certification to the Centers for Medicare & Medicaid Services (CMS). CMS makes the final determination as to a clinic's eligibility for RHC status and notifies the Michigan Department of Health and Human Services (MDHHS) when eligibility is granted.

RHCs may be provider-based or independently operated. Provider-based RHCs may be operated by a hospital, skilled nursing facility (SNF) or home health agency (HHA). An independent RHC is permitted to occupy a permanent structure or be located in a mobile unit. RHCs may be publicly or privately held clinics and they may be operated on a profit or not-for-profit basis.

1.2 GENERAL REIMBURSEMENT INFORMATION

Medicaid-enrolled RHCs are reimbursed with a prospective payment system (PPS) in compliance with Medicare, Medicaid and SCHIP Benefits Improvement and Protection Act (BIPA) of 2000. Section 702 of BIPA created a new section 1902(bb) in the Social Security Act. Specific information related to RHC reimbursement is contained in the Rate Setting Section of this chapter.

SECTION 2 – MEDICAID ENROLLMENT

2.1 PROVIDER ENROLLMENT

MDHHS requires all RHCs to have a Type 2 (Organization) National Provider Identification (NPI) number in order to receive the enhanced RHC reimbursement. For RHCs with multiple locations and multiple rates, an NPI number for each location may be necessary so that the proper reimbursement rate of all encounters can be determined. If the RHC fails to obtain and/or use the correct NPI number, the RHC reimbursement will be determined under fee for service rules. The NPI number must be reported to MDHHS before billing Medicaid services.

Individual providers (doctors, dentists, optometrists, etc.) are required to obtain a Provider (Type 1 - Individual) NPI number and report the number to MDHHS.

In accordance with 42 CFR 455.104 and the Provider Ownership and Control Disclosures subsection of the General Information for Providers chapter of this Manual, clinics are required to disclose ownership information to MDHHS within 35 days of a change of ownership. Failure to notify MDHHS of any change in identification information may result in the loss of Medicaid enrollment, lapse of provider eligibility, or nonpayment of services.

All inquiries related to provider enrollment should be directed to the MDHHS Provider Enrollment Unit. (Refer to the Directory Appendix for contact information.)

2.1.A. NON-PHYSICIAN BEHAVIORAL HEALTH SERVICE

Licensed psychologists (Master's Limited or Doctoral level), social workers (Master's level), professional counselors (Master's or Doctoral level), and marriage and family therapists who serve Medicaid beneficiaries are required to enroll as Medicaid providers. The NPI of the psychologist, social worker, professional counselor, or marriage and family therapist is reimbursed under the RHC PPS. These services must be billed using the appropriate evaluation and management (E/M) codes listed in the American Medical Association's Current Procedural Terminology (CPT) Book or Healthcare Common Procedure Coding System (HCPCS) codes. Providers should refer to the Non-Physician Behavioral Health provider database on the MDHHS website for the current list of covered procedure codes. The list of allowable services is reviewed annually and updated as applicable. Refer to the Additional Code/Coverage Resource Materials Section of the General Information for Providers Chapter for additional information regarding coverage parameters.

For information relating to service coverage and authorization requirements, refer to the Practitioner and the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapters of this manual.

2.2 NONENROLLED PROVIDERS

Professional services performed by limited licensed psychologists (except as noted in Section 333.18223 of the Public Health Code), social workers, professional counselors, marriage and family therapists, or student interns must be performed under the supervision of an enrolled, fully-licensed provider of the same profession. These services are reimbursed under the RHC PPS. Since MDHHS does not directly

Michigan Department of Health and Human Services

Medicaid Provider Manual

enroll these providers, claims for their services must be billed using the NPI of the supervising provider responsible for ensuring the medical necessity and appropriateness of the services. Claims submitted with the non-enrolled provider's NPI in the rendering provider field will reject.

SECTION 3 – BENEFITS

RHC services subject to PPS reimbursement are RHC services defined at Section 1861 (aa)(1)(A)-(C) of the Social Security Act.

- Physician (MD, DO), podiatrist, chiropractor, and optometrist professional services, and services and supplies incidental to physician services, including certain drugs and biologicals that cannot be self-administered, immunizations and their administration.
- Licensed physician's assistant and advanced practice registered nurse (NP, CNS, CNM) services, and the services and supplies incidental to these services as would otherwise be furnished by, or incidental to, physician services.
- Clinical psychologist and clinical social worker services, and services and supplies incidental to these services as would otherwise be furnished by, or incidental to, physician services.
- Dental services, and services and supplies incidental to dental services.

Primary care services that are covered and reimbursed under the PPS are defined as the above listed services provided in a place of service that is the RHC's office or clinic, patient's home, skilled NF, domiciliary facility or NF.

3.1 SERVICES AND SUPPLIES INCIDENTAL TO AN RHC VISIT

RHC services and supplies incidental to an RHC visit are included in the PPS reimbursement if the service or supply is:

- Of a type commonly furnished in a physician's office.
- Of a type commonly rendered either without charge or included in the professional bill.
- Furnished as an incidental, although integral part of professional services furnished by a physician (MD, DO), dentist, optometrist, podiatrist, chiropractor, NP or CNS (under the terms of a collaborative agreement with a physician), CNM or licensed physician's assistant (under the terms of a practice agreement).
- Furnished under the direct personal supervision of a physician (MD, DO), dentist, optometrist, podiatrist, chiropractor, NP or CNS (under the terms of a collaborative agreement with a physician), CNM or licensed physician's assistant (under the terms of a practice agreement).
- In the case of a service, furnished by a member of the clinic's health care staff who is an employee of the clinic.

The direct personal supervision requirement is met in the case of a NP, CNS, CNM, or licensed physician's assistant only if such a person is permitted to supervise such services under the written policies governing the RHC.

3.2 SERVICES EXCLUDED FROM RHC REIMBURSEMENT

Payment for any other Medicaid covered services not defined as a primary care service are Medicaid-covered under fee-for-service (FFS) policies. Services not listed as primary care services are excluded from the RHC prospective payment rate (PPR).

Medicaid Provider Manual

3.3 TELEMEDICINE

An RHC can be either an originating or distant site for telemedicine services. Refer to the Billing & Reimbursement for Institutional Providers Chapter for specific billing instructions. Refer to the Telemedicine Chapter for additional information regarding telemedicine services.

Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.

3.4 CHILDREN'S HEALTH INSURANCE PROGRAM SERVICES

Section 503 of the Children's Health Insurance Program Reauthorization Act (CHIPRA) of 2009 authorizes states to incorporate a PPS rate for reimbursement of services provided to children receiving health care services through RHCs when covered by the Children's Health Insurance Program (CHIP). Reimbursement for eligible services must comply with the requirements of section 1902 (bb) of the Social Security Act.

For beneficiaries enrolled in state CHIP-funded programs (MICHild, Healthy Kids–Expansion, and Maternity Outpatient Medical Services [MOMS]), providers must bill the program according to their existing processes. For beneficiaries enrolled in a health plan, the MDHHS HCRD will perform an annual reconciliation of these encounters provided by RHCs. (Refer to the Eligibility Groups Subject to PPS Methodology subsection of this chapter for additional information.)

For Healthy Kids–Expansion, MICHild and MOMS beneficiaries, the HCRD will perform an annual reconciliation of these encounters provided by RHCs. The RHC PPS rates established for eligible CHIP services are equivalent to those applicable to Medicaid for each respective year they are in effect.

SECTION 4 – ENCOUNTERS

4.1 DEFINITION

Reimbursement to RHCs under the PPS requires that each office visit that meets the following definition of an encounter be counted for payment purposes.

An encounter is a face-to-face visit or an interaction using a qualifying telemedicine modality (audio/visual or audio-only) between a patient and the provider of health care services who exercises independent judgment in the provision of health care services. For a health service to be defined as an encounter, the provision of the health service must be recorded in the patient's medical record. Encounters may be classified as medical or behavioral health.

An RHC may be credited with one encounter for each different type of visit provided to a beneficiary during a single day, regardless of the number of services provided at the visit. A maximum of two encounters are allowed per beneficiary per day (one medical and one behavioral health). In cases where the beneficiary, after the first visit, suffers illness or injury requiring additional diagnosis or treatment, these visits may be classified as two encounters.

- Example 1: A beneficiary sees a physician at the RHC to treat bronchitis and then sees an optometrist on the same day for an eye exam. These visits count as one encounter (medical).
- Example 2: A beneficiary sees a physician at the RHC, and then later sees a social worker on the same day. These visits may be classified as two encounters (one medical and one behavioral health).
- Example 3: A beneficiary sees a physician for flu symptoms early in the day, and then later the same day sees the same physician for a broken leg. These visits may be counted as two encounters (both medical – subsequent injury).

Encounters include provision of service by the following professionals:

- Licensed physicians (MD, DO), dentists, optometrists, podiatrists, chiropractors, CNPs (who have a collaborative agreement with a physician), CNMs, physician assistants, dental hygienists, or dental therapists.
- Clinical psychologists or clinical social workers.

The following examples help to define an encounter:

- To meet the encounter criterion for independent judgment, the provider must be acting independently and not be assisting another provider. For example, a nurse assisting a physician during a physical examination by taking vital signs, taking a history, or drawing a blood sample is not credited with a separate encounter.
- Such services as drawing blood, collecting urine specimens, performing laboratory tests, taking x-rays, filling/dispensing prescriptions, in and of themselves, do not constitute encounters. However, these procedures may accompany professional services performed by physicians, dentists, or other health providers that do constitute encounters.

Medicaid Provider Manual

- An RHC may be credited for more than one encounter by the same health professional on the same day. For example, a beneficiary suffers illness or injury requiring additional diagnosis or treatment on the same date of service, or a patient sees a physician for flu symptoms early in the day and then later the same day sees the same physician for a broken leg. These visits are classified as two encounters, and the patient's medical record must document the circumstances of the two encounters.
- An RHC may be credited for encounters by different health professionals on the same day. For example, if a patient first sees a physician at the RHC and then sees a clinical psychologist, these visits are classified as two encounters.
- An encounter may take place in the RHC or at another approved location.

The encounter criteria are **not** met in the following circumstances:

- Provider participation in a community meeting or group session that is not designed to provide health services.
- When the only service provided is part of a large-scale effort, such as a mass immunization program, screening program, or community-wide service program.
- Nursing services such as taking vital signs, taking a history, drawing a blood sample, collecting urine specimens, performing laboratory tests, taking x-rays, and/or filling or dispensing prescriptions.
- Calling in prescriptions, filling out insurance forms, etc.
- Allergy injection(s).

4.2 ELIGIBILITY GROUPS SUBJECT TO PPS METHODOLOGY

The following list identifies Medicaid eligibility groups that are subject to the PPS methodology:

Medicaid	RHC primary care services constitute encounters covered by Medicaid.
Qualified Medicare Beneficiaries	Medicaid is billed coinsurance and deductibles for Qualified Medicare Beneficiaries (QMBs), and the services covered by Medicare are included as encounters.
Medicaid Health Plan Enrollees	<p>Medicaid-covered services provided by a RHC to Medicaid-eligible beneficiaries enrolled with a Medicaid Health Plan (MHP) are Medicaid encounters if the following conditions are met:</p> <ul style="list-style-type: none">▪ The RHC and MHP must have a signed contract outlining payment provisions in order for the RHC to provide Medicaid-covered services to the MHP enrollee.▪ The contract must provide for the MHP to reimburse the RHC at a fair market rate for similarly situated beneficiaries served by a non-RHC provider. The MHP must implement a level of payment equal to, or above, that of other subcontracting arrangements when entering into a subcontract with a RHC.▪ The RHC must file information with the MDHHS HCRD in a format determined by MDHHS showing encounters and payments of Medicaid beneficiaries enrolled with MHP.▪ RHCs may not bill Medicaid for MHP beneficiaries.

Medicaid Provider Manual

	<ul style="list-style-type: none">▪ After verification of the fair market rate by the HCRD, the difference between the RHC prospective payment rate and MHP payments are reconciled by MDHHS annually.▪ The contract between RHCs and MHP services is subject to review and verification by MDHHS.
Healthy Kids Dental	Dental services provided to Medicaid beneficiaries enrolled in the Healthy Kids Dental program are eligible for the PPR. RHCs should report Medicaid information on encounters and revenue in the annual reconciliation report. The RHC receives the difference between the PPR and the revenue received as part of the annual reconciliation.
Medicare/Medicaid	Medicaid covered primary care services provided to Medicare/Medicaid dual eligibles are considered Medicaid encounters and are reimbursed under the PPS methodology.

4.3 ELIGIBILITY GROUPS NOT SUBJECT TO PPS METHODOLOGY

If an individual does not have Medicaid eligibility (i.e., is eligible for CSHCS-Title V), the services and costs are not Medicaid RHC services. CSHCS may be paid FFS rates only.

SECTION 5 – RATE SETTING

The RHC is reimbursed on a per visit basis for RHC services. In accordance with section 1902(bb) of the Social Security Act, the PPS per visit payment is equal to 100 percent of the average of the RHC's reasonable costs of providing Medicaid services during fiscal years 1999 and 2000. MDHHS defines reasonable costs as the per-visit amount approved and paid by Medicare. For RHCs that have a fiscal year ending other than September 30, the PPR is prorated based on the number of months in each period covered by a different prospective rate.

The per visit amount is adjusted each year (beginning on October 1, 2001) by 100 percent of the Medicare Economic Index for the prior calendar year (i.e., the adjustment effective October 1, 2001 reflects the index for calendar year 2000).

The per visit amount may also be adjusted to reflect changes in the scope of services provided to Medicaid beneficiaries by the RHC. An adjustment to the per-visit amount based upon a change in the scope of services becomes effective as determined by MDHHS.

Any rate setting/cost settlement related questions should be directed to the MDHHS HCRD. (Refer to the Directory Appendix for contact information.)

5.1 ESTABLISHING RATES FOR NEW CLINICS

An entity that initially qualifies as an RHC after fiscal year 2000 will be paid as follows:

- Upon enrollment, an interim prospective payment rate (PPR) will be established for new RHCs equal to the facility type average rate for the county in which they are located or the statewide average (if no previous average exists for the county subject to any limit applied to the specific facility type). The RHC will be cost settled at the end of its first fiscal year of operation.
- After the facility has been in operation for two full cost reporting periods, the average rate per visit for those two periods will be considered the revised PPR for the facility, subject to the following criteria:
 - The first year will be inflated to the second fiscal year end using the appropriate Medicare Economic Index (MEI) factors.
 - For independent RHCs, the rebased PPR shall not exceed the Medicare limit.
 - For provider-based RHCs (associated with a hospital with fewer than 50 enrolled beds), the PPR shall not exceed the statewide average cost per visit. The limit will increase annually at a minimum of the MEI factor.
 - For provider-based RHCs (associated with a hospital with 50 or more beds), the PPR shall not exceed the Medicare limit.

5.2 ALTERNATE PAYMENT METHODOLOGY

In accordance with State Plan authority, MDHHS may enter into an alternative payment methodology with an RHC, referred to as a Memorandum of Understanding (MOU). Reimbursement for Medicaid primary care services provided by an RHC to Medicaid beneficiaries is subject to the terms of the signed MOU. For an RHC paid under the MOU, the PPS base methodology described within this chapter will be maintained to ensure compliance with Section 1902(bb)(6)(B) of the Social Security Act.

Medicaid Provider Manual

The MOU is effective when both MDHHS and an RHC are signatories to the document. CMS, rather than the State, is the final arbiter of the permissibility of this agreement. The MOU does not supersede any corresponding policy in the MDHHS Medicaid Provider Manual but documents the clinic's acceptance of the terms outlined in the Michigan Medicaid State Plan. If an RHC does not sign the MOU, reimbursement and corresponding policy defaults to that which is described under the PPS methodology and outlined in this manual.

5.3 QUARTERLY PAYMENTS

RHCs receive a quarterly payment. This payment is an estimate of the difference between the payment the RHC receives from various sources (FFS, MHP, Medicare and other insurance) and the amount the RHC should receive under the PPS. These quarterly payments are included in the annual reconciliation. This quarterly amount may be adjusted periodically by MDHHS to account for changes in the payment limits, cost, utilization, and other factors that affect Medicaid reimbursement to RHCs. The RHC may request a change in the quarterly payment through the MDHHS HCRD.

SECTION 6 – BILLING

6.1 BILLING RURAL HEALTH CLINIC SERVICES

RHC services must be billed according to instructions contained in the Billing & Reimbursement for Institutional Providers Chapter of this manual. RHCs must refer to that chapter for information needed to submit claims for Medicaid services, as well as information about how MDHHS processes claims and notifies the RHC of its action. If the RHC performs a service that must be billed on the professional claim form, refer to the Billing & Reimbursement for Professionals Chapter of this manual. Policies for specific services are found in the provider-specific chapters of this manual.

It is the responsibility of the RHC to properly bill all Medicaid FFS claims. Incorrect or improper billing may adversely affect reimbursement since the annual reconciliation and final reimbursement is based on approved claims.

The Type 2 (Organization) NPI number must be used as the billing provider on all electronic and paper claims submitted to Medicaid. Do not use Provider (Type 1 - Individual) as the billing provider. The billing provider loop or field is mandatory to complete.

The NPI (Type 1 – Individual) number of the practitioner overseeing the beneficiary's care must be entered as the attending provider. The attending provider field is mandatory to complete. The following providers may be reported in the attending provider field:

- Physicians (includes dentists, podiatrists, optometrists, and chiropractors)
- Nurse Practitioners
- Physician Assistants
- Certified Nurse Midwives
- Clinical Psychologists
- Clinical Social Workers
- Clinical Nurse Specialists
- Licensed Psychologists (Doctoral Level)
- Social Workers (Master's Level)
- Professional Counselors (Master's or Doctoral levels)
- Marriage and Family Therapists
- Limited Licensed Psychologists (Master's or Doctoral Level)

Additionally, the NPI (Type 1 – Individual) number of the practitioner who performed the service should be entered as the rendering provider. Do not enter a Type 2 (Organization) NPI number as the attending or rendering provider.

MDHHS will use the billing provider NPI field (Type 2 - Organization) to determine the number of encounters and calculate the settlement for the year-end reconciliation.

Medicaid Provider Manual

6.2 PLACE OF SERVICE REQUIREMENTS

Place of service codes are not applicable to institutional billing. However, if the RHC performs a service that must be billed on the professional claim form within the clinic, RHCs must use place of service (POS) code 72. For services provided outside the RHC, bill with the appropriate POS code noted in the Billing & Reimbursement for Professionals Chapter of this manual.

RHCs may provide Medicaid covered services in settings other than the RHC office, beneficiary's home, nursing facility or domiciliary facility, but these services are not included in the PPS reimbursement methodology. Services provided outside of the settings noted here are reimbursed at FFS rates.

6.2.A. BILLING REQUIREMENTS FOR GROUP PRENATAL CARE SERVICES

Centering Pregnancy™ group services will be reimbursed outside of the Prospective Payment System (PPS) methodology at the Medicaid fee screen reimbursement rates for these services. RHCs should use appropriate Healthcare Common Procedure Coding System (HCPCS) coded as identified in the Billing & Reimbursement for Professionals chapter of this manual.

6.3 CLINICAL TRIALS

The program covers routine patient costs furnished in connection with participation in a qualifying clinical trial. Refer to the Practitioner Chapter for additional coverage information.

All RHC claims for routine patient costs associated with participation in a clinical trial must adhere to the inpatient hospital claim guidelines for reporting covered services using the CMS UB04/8371 institutional claim format. In addition, RHC claims must include:

- A completed and signed Attestation to the Appropriateness of the Qualified Clinical Trial form (BPHASA-2210). (Refer to the Forms Appendix to review the form and to the Directory Appendix for form access on the MDHHS website.)
- Clinical trial and non-clinical trial services on separate line items when claims are submitted for both types of services on the same claim.
- Each line identified with the appropriate Healthcare Common Procedure Coding System (HCPCS) Modifier Q0 or Q1.
 - HCPCS Modifier Q0 - **investigational clinical service** provided in a clinical research study that is in an approved clinical research study.
 - HCPCS Modifier Q1 – **routine clinical service** provided in a clinical research study that is in an approved clinical research study.

6.3.A. REPORTING NON-COVERED SERVICES

Generally, services, investigational drugs, or items that are part of the clinical trial and considered experimental or investigational should not be reported on a claim. In instances when claims processing edits require non-covered services be billed with their associated procedures, or when it is necessary for a provider to show the items and services provided free-of-charge to receive payment for the covered routine costs,

Medicaid Provider Manual

providers are instructed to report non-covered services with the appropriate modifier and a charge of \$0.

6.4 BILLING FOR MATERNITY CARE

Global codes for maternity care are used to reimburse a package of services (prenatal visits and delivery) at different places of service (RHC and hospital). In order for the RHC to be reimbursed for prenatal visits under the PPS methodology, the RHC should not bill for global maternity care. The claims for delivery and prenatal care should be billed separately. The claim for delivery should show a hospital place of service and will be paid under the FFS methodology. The claim for prenatal care will be reimbursed under the PPS methodology.

If the RHC elects to bill for global maternity care, all services will be reimbursed under the FFS rules.

6.5 OTHER INSURANCE

Billing instructions related to coordination of benefits are published in the Coordination of Benefits Chapter of this manual. Other insurance and all other payments received for services rendered to a Medicaid beneficiary must be reported. Even if the other insurance payment for a specific service exceeds the amount Medicaid would have paid, the RHC must still bill the procedure code to receive credit for the encounter. (Refer to the Billing & Reimbursement Chapters of this manual for specific billing guidelines.)

6.6 MEDICARE AND MEDICAID CROSSOVER CLAIMS

Refer to the Billing & Reimbursement Chapters of this manual for specific instructions regarding Medicare and Medicaid claims. If the Medicare payment exceeds the Medicaid fee screen, the appropriate FFS procedure code should still be billed to Medicaid for encounter and reconciliation purposes.

6.7 COPAYMENTS

Medicaid copayments for chiropractic, dental, physician, podiatry, and vision services are waived under the RHC benefit as part of the reconciliation. (Services requiring copayments are listed in the General Information for Providers Chapter of this manual.)

6.8 DENTAL CLAIMS

RHCs providing dental services must refer to the Dental and to the Billing & Reimbursement for Dental Providers Chapters of this manual for information regarding program coverages, prior authorization requirements, claims completion and billing instructions.

SECTION 7 – RISK CONTRACTS

RHCs may enter into risk contracts with MHPs for nonprimary care services. However, these contracts are not included in the reconciliation process. All RHC reconciliations are for primary care services only.

7.1 SCOPE OF SERVICE

The prospective payment rate may be adjusted for an increase or decrease in scope of service. Any facility approved for rebasing due to a change in scope of services shall be treated as a new facility. In order to qualify for a scope of service change, the cost related to the specific change must account for an increase or decrease to the existing PPR of five percent or greater. A facility that changes classification to a system utilizing a different rate limit or methodology shall be considered a change of scope (by default). For example, an independent RHC that changes ownership to a provider-based RHC when the hospital has less than 50 beds is considered to have a change of scope.

7.1.A. INCREASE IN SCOPE OF SERVICE

An increase in scope of service results from the addition of a new professional staff member (i.e., contracted or employed) who is licensed to perform medical services that are approved RHC benefits that no current professional staff is licensed to perform.

7.1.B. DECREASE IN SCOPE OF SERVICE

A decrease in scope of service results when no current professional staff member is licensed to perform the medical services currently performed by a departing professional staff member.

7.1.C. CHANGES THAT DO NOT CHANGE THE SCOPE OF SERVICE

An increase or decrease in scope of service does not result from any of the following (although some of these changes may occur in conjunction with a change in scope of service):

- an increase, decrease or change in number of staff working at the clinic.
- an increase, decrease or change in office hours.
- an increase, decrease or change in office space or location.
- the addition of a new site that provides the same set of services.
- an increase, decrease or change in equipment or supplies.
- an increase, decrease or change in the number or type of patients served.

7.2 NOTICE OF INTENT TO CHANGE SCOPE OF SERVICE

If a RHC intends to change its scope of service, the MDHHS HCRD must be notified 90 days before any financial commitments (i.e., money paid or committed to be paid, contracts signed, etc.) have been made. Notification should include the following documentation:

- Complete description of the service to be changed (addition or deletion).
- A listing of procedure codes to be billed as a result of this new service.
- A budget for the fiscal year showing an estimate of the total increase or decrease in cost resulting from change.
- An estimate of the change in number of encounters.
- Estimates of the cost change on the current Medicaid encounter rate.
- The proposed customary charges for this service by the RHC.
- The customary charges for this service by other providers in the area served by this RHC.
- The amount to be paid by an MHP for this service for various programs (Medicare/Medicaid).
- The current Medicare encounter rate.
- Medicare fee screen for this service for non-full cost providers.
- Total encounters for last two years by program (Medicaid, Medicare, uninsured, etc.), and type (MHP, fee screen/contracted amount).
- Estimated change in encounters by program for two fiscal periods following the change in scope of service.
- Copies of notices, certifications, applications, approvals and other documentation from the state-licensing agency, CMS, Medicare intermediary, or other organizations documenting the change in scope of service.
- Other information showing cost, encounters or approvals/denials of the change.
- Other information as requested by the HCRD.

After a review of the information submitted, the HCRD notifies the RHC of its determination regarding a rate change, including the effective date of any change.

SECTION 8 – RECONCILIATION REPORTING

Medicaid Reconciliation Reports must be completed by each RHC in order to receive reimbursement under the PPS.

The RHC must file the following documents at the end of its fiscal year for PPS reimbursement:

- A copy of its filed Medicare Cost Report and Trial Balance
- A completed copy of the Medicaid Reconciliation Report

Encounter data for RHC services provided to beneficiaries through Medicaid Health Plans, *Healthy Kids Dental*, and/or regional Prepaid Inpatient Health Plans (PIHP) is accessible through the Community Health Automated Medicaid Processing System (CHAMPS).

No individual payment information is needed if payments are made on a capitated basis; however, a separate summary of the monthly payments must be provided.

Upon review and audit, MDHHS will reimburse the difference between the RHC PPS rate and the amount received from the Medicaid Health Plans, *Healthy Kids Dental*, and/or the regional Prepaid Inpatient Health Plan (PIHP).

8.1 REPORT FILING

RHCs must file Reconciliation Reports and supplemental documents to the MDHHS HCRD annually. Due dates are consistent with the Medicare Cost Report filing requirement. If the required reconciliation report and supplemental documents are not submitted within the required time limit, the RHC waives its right to the PPS reimbursement for that year.

The reconciliation report is the basis for determining future quarterly payments and the current year's reconciliation. The report must be an original(s) and signed by the authorized individual who normally signs the RHC's federal income tax return or similar reports and should be for the same fiscal period and cover the same sites as the Medicare Cost Report. Improperly completed or incomplete filings are returned to the facility for proper completion and must be resubmitted to MDHHS within 30 days of date of receipt.

8.2 ACCOUNTING AND RECORD KEEPING

RHCs must maintain, for a period of not less than seven years from the end of the fiscal year of the Reconciliation Report, financial and clinical records for the period covered by the reconciliation report that are accurate and in sufficient detail to substantiate the information reported. If there are unresolved issues at the end of this seven-year period, the records must be maintained until these issues are resolved.

The MDHHS HCRD retains each required Reconciliation Report and supplemental documents submitted by the RHC for seven years after issuance of a final decision. In the event there are unresolved issues at the end of this seven-year period, the report is maintained until such issues are resolved.

SECTION 9 – AUDIT, SETTLEMENTS AND APPEALS

An annual reconciliation is performed to assure that the prospective payment rate is paid to the RHC for all eligible encounters. The reconciliation process begins with the receipt of the Reconciliation Report and supplemental documents and ends with the issuance of the Notice of Amount of Program Reimbursement.

9.1 DESK REVIEWS AND FIELD AUDITS

The desk review may include procedures that:

- Verify the completeness and mathematical accuracy of all schedules in the report.
- Compare the Reconciliation Report with MDHHS paid claim and encounter data.
- Identify the need for supporting documentation and arrange to receive same.
- Identify the need for a field audit examination necessary to conclude final reconciliation calculations.
- Compare reported data with industry norms as an aid to the audit scope determination.

Field audits may be conducted to verify information on the Reconciliation Report.

9.2 MEDICARE AUDIT

The Medicare intermediary may perform audits of the RHC. These audit results may be used to verify information or for statistical purposes.

9.3 INITIAL RECONCILIATION AND SETTLEMENT

An initial reconciliation is calculated after the annual reconciliation report is received. The initial reconciliation is processed approximately four months after the reconciliation report is received, with the payment or recovery made at that time. Future quarterly payments are adjusted based on the information in the initial reconciliation.

9.3.A. UNDERPAYMENTS TO AN RHC

Based on the annual reconciliation, MDHHS reimburses any underpayment due an RHC through a gross adjustment. This gross adjustment is shown in a Remittance Advice (RA). MDHHS retains the right to withhold a portion of any initial payment based on individual circumstances.

9.3.B. OVERPAYMENTS TO AN RHC

Once a determination of overpayment has been made, the amount so determined is a debt owed to the State of Michigan and will be recovered by MDHHS. The recovery starts approximately 30 days after notification to the RHC. The gross adjustment stops all payments to the RHC's physician(s) until the full amount is recovered.

9.4 AUDIT ADJUSTMENT REPORT

The Audit Adjustment Report contains a list of all Program data adjustments made to the Medicaid Reconciliation Report by MDHHS audit staff.

9.4.A. AUDIT ADJUSTMENT REPORT

The Audit Adjustment Report must be accepted or rejected by the RHC within 30 calendar days of its mailing date.

If the RHC accepts the findings contained in the Audit Adjustment Report, an appropriate officer of the RHC should sign the report and mail it to MDHHS HCRD. (Refer to the Directory Appendix for contact information.) A Notice of Amount of Program Reimbursement is then mailed to the RHC. No further administrative appeal rights are available for the adjustments contained in the Audit Adjustment Report.

If the RHC has not responded within this time period, MDHHS shall issue a Notice of Amount of Program Reimbursement that is the final determination of an adverse action. No further administrative appeal rights are available.

9.4.B. NOTICE OF AMOUNT OF PROGRAM REIMBURSEMENT

The Notice of Amount of Program Reimbursement is the notice of final determination of an adverse action and is considered the offer of settlement for all reimbursement issues for the reporting period under consideration.

9.4.C. RHC REJECTION OF THE AUDIT ADJUSTMENT REPORT

Within 30 calendar days of the mailing date of the Audit Adjustment Report, the RHC may reject any or all of the findings in the Audit Adjustment Report and request a post-audit conference.

The Post-Audit Conference is an informal process where the MDHHS HCRD staff and the RHC may resolve differences prior to an appeal and/or formal hearing. The process is initiated by the RHC after the receipt of the Audit Adjustment Report. The RHC must request in writing a Post-Audit Conference with the HCRD and indicate in that letter the area(s) of disagreement. The letter must state the appropriate regulation and/or other appropriate decisions that support the RHC's position and be sent to MDHHS HCRD. (Refer to the Directory Appendix for contact information.)

The RHC or its representative must present, either before or at the time of the Post-Audit Conference, the audit staff with the documents and arguments that support its position relative to the disputed issue(s). The audit staff will explain to the RHC the basis for its findings. This step does not stop the recovery of monies due Medicaid.

Medicaid Provider Manual

9.5 APPEALS

RHCs have the right to appeal any adverse action taken by MDHHS, unless that adverse action resulted from an action over which MDHHS had no control (e.g., Medicare termination, license revocation). The appeal must be submitted in writing and mailed to the Michigan Office of Administrative Hearings and Rules (MOAHR). (Refer to the Directory Appendix for contact information.)

The appeal process is outlined in the MDHHS Medicaid Provider Reviews and Hearings administrative rules, Michigan Administrative Code R400.3402 through R400.3425. Any questions regarding the appeal process should be directed to MOAHR.

RHCs may appeal their respective Notice of Program Reimbursement if the contested issue(s) is other than those precluded due to failure to appeal rate adjustment(s) in the Audit Adjustment Report according to established time frames. Appeals accepted as appropriate are also governed by the aforementioned MDHHS Medicaid Provider Reviews and Hearings rules.

SCHOOL SERVICES PROGRAM

This chapter is comprised of three parts:

The [SCHOOL SERVICES PROGRAM](#) portion of the chapter outlines the general requirements and direct services for the program.

The [SCHOOL SERVICES PROGRAM ADMINISTRATIVE OUTREACH PROGRAM CLAIMS DEVELOPMENT](#) portion of the chapter outlines the program's administrative outreach requirements.

The [SCHOOL SERVICES PROGRAM RANDOM MOMENT TIME STUDY](#) portion of the chapter focuses on the RMTS requirements for the program.

11.3 Audit Activities to be Performed by MDHHS Audit Division Staff	53
11.4 Audit Findings and Resolution	54

SECTION 1 – GENERAL INFORMATION

This chapter applies to enrolled Intermediate School Districts (ISDs) and their associated local education agencies (LEAs), Detroit Public Schools Community District (DPSCD), and Michigan School for the Deaf (MSD).

This chapter describes the coverage and reimbursement policy for direct medical services, targeted case management (TCM), and personal care services (PCS). Coverage applies to individuals up to the age of 21 who are eligible under the provisions of the Individuals with Disabilities Education Act (IDEA) of 1990 as amended in 2004 and to those enrolled in programs that require an Individualized Education Program (IEP) or an Individualized Family Service Plan (IFSP), Non-Public Service Plan (NPSP), other individualized health care plan, or as otherwise medically necessary. The Centers for Medicare & Medicaid Services (CMS) has determined that services provided in the "school" setting include services provided by qualified school staff in the "home" setting when necessary. For the purpose of this document, IEPs, IFSPs, NPSPs, individualized plans of care, and all other plans of care will be referred to as "plan of care (POC)" for simplicity.

These services assist students, with or without a disability, in benefiting from educational and related services. Medicaid reimbursement, through the Michigan Department of Health and Human Services (MDHHS), addresses the medical service needs of beneficiaries receiving educational and related services and provides funding for those services. The Social Security Act, as amended in 1988 by the Medicare Catastrophic Coverage Act, specifically provides for medical assistance (Medicaid) to cover "related services" which are specified in Federal Medicaid statute as medically necessary and "included in the student's IEP/IFSP/NPSP established pursuant to Part B of the IDEA or furnished to a disabled infant or toddler because such services are included in the child's IFSP adopted pursuant to Part C (formerly called Part H) of such Act." On December 15, 2014, CMS issued State Medicaid Director Letter (SMDL) 14-006 *Medicaid Payment for Services without Charge (Free Care)*. Based on that guidance, ISD/LEAs can seek reimbursement for all covered services provided to all students enrolled in Medicaid, regardless of whether the services are provided at no cost to other students, and allows for Medicaid reimbursement for services delivered outside of an IEP, IFSP, or NPSP.

Section 504 of the Rehabilitation Act of 1973 requires school districts to provide or pay for certain services to make education accessible to all students. These services are described in an individualized POC and are provided free of charge to eligible students. Medicaid reimbursement is allowed for these services.

Medicaid services provided through the School Services Program (SSP) are not covered for students involuntarily residing in a detention setting with a Benefit Plan ID of INCAR-ESO, INCAR-MA, INCAR-MA-E, or MA-HMP-INC.

Coverage is based on medical necessity and allows Medicaid-covered services being provided in the school setting to Medicaid-eligible beneficiaries to be billed to Medicaid. This ensures federal participation in the funding of these Medicaid-covered services. Enrollment as a Michigan Medicaid provider for services delivered in the school setting is limited to ISDs and their associated LEAs, DPSCD, and MSD. For the purpose of this document, the ISDs and their associated LEAs, DPSCD, and MSD will be referred to as "ISDs" for simplicity.

Medicaid Provider Manual

Enrolled providers are required to establish an interagency agreement to facilitate coordination and cooperation with other human service agencies operating within the same service area. Medicaid services provided by the ISDs/LEAs are to be provided as outlined in the POC and are not expected to replace or substitute for services already provided by other agencies. If services are being provided by another program, ISDs/LEAs are expected to coordinate the services to prevent service overlap and to ensure continuity of care to the Medicaid beneficiary. All services are provided with the expectation that the beneficiary's primary care provider and, if applicable, the beneficiary's case manager are informed on a regular basis. Enrollment as a SSP provider is not expected to result in any change in the ISD/LEA's set of existing services or service utilization. MDHHS periodically evaluates the impact of Medicaid enrollment on special education programs through review of service utilization and other program data and information.

Covered services do not require prior authorization but must be documented and provided by qualified staff members as specified in the Covered Services section of this chapter.

The following terms have specific meanings in the school setting:

Assistive Technology Device (ATD)	Per IDEA, Section 602, the term "assistive technology device" means any item, piece of equipment or product system, whether acquired commercially off the shelf or modified or customized, that is used to increase, maintain, or improve functional capabilities of a student with a disability.
Assistive Technology Service	The term "assistive technology service" means any service that directly assists a student with a disability in the selection, acquisition or use of an ATD.
Caring for Students (C4S)	Program component enabling reimbursement of Medicaid costs associated with providing services to students outside of an IEP/IFSP/NPSP.
Certified Public Expenditure	A certified public expenditure is an expenditure of funds by a governmental unit whose state share is supported by tax dollars, or a mix of tax dollars and appropriated dollars, and is certified as eligible for federal match.
Direct Medical Services	Direct medical services, specialized transportation, TCM, and PCS provided in the school setting and reimbursed by Medicaid.
Direct Service Claiming (DSC)	Program component enabling reimbursement of Medicaid costs associated with providing services to students within an IEP/IFSP/NPSP. This component was previously known as School-Based Services (SBS).

Medicaid Provider Manual

Durable Medical Equipment, Prosthetics, Orthotics & Supplies (DMEPOS)	<ul style="list-style-type: none"> ▪ Durable Medical Equipment (DME) items are those that can stand repeated use, are primarily and customarily used to serve a medical purpose, are not useful to a person in the absence of an illness or injury, and can be used in the beneficiary's home. DME is a covered benefit when: <ul style="list-style-type: none"> ➤ It is medically and functionally necessary to meet the needs of the beneficiary. ➤ It may prevent frequent hospitalization or institutionalization. ➤ It is life sustaining. ▪ Medical supplies are those items that are required for medical management of the beneficiary, are disposable or have a limited life expectancy, and can be used in the beneficiary's home. Medical supplies are items that: <ul style="list-style-type: none"> ➤ Treat a medical condition. ➤ Prevent unnecessary hospitalization or institutionalization. ➤ Support DME used by the beneficiary. ▪ Prosthetics artificially replace a portion of the body to prevent or correct a physical anomaly or malfunctioning portion of the body. Prosthetics are a benefit to: <ul style="list-style-type: none"> ➤ Improve and/or restore the beneficiary's functional level. ➤ Enable a beneficiary to ambulate or transfer. ▪ Orthotics assist in correcting or strengthening a congenital or acquired physical anomaly or malfunctioning portion of the body. Orthotics are a benefit to: <ul style="list-style-type: none"> ➤ Improve and/or restore the beneficiary's functional level. ➤ Prevent or reduce contractures. ➤ Facilitate healing or prevent further injury.
Enrolled Medicaid Provider	<p>The 56 Michigan ISDs, DPSCD, and MSD who have enrolled and revalidated with the MDHHS Community Health Automated Medicaid Processing System (CHAMPS) Provider Enrollment subsystem.</p>
HA Modifier (C4S)	<p>The HA modifier is used with the appropriate procedure codes to identify services delivered outside of an IEP/IFSP/NPSP.</p>
HT Modifier (multi-disciplinary team)	<p>The HT modifier is used when billing for an assessment, evaluation or test performed for the IDEA assessment. Each qualified staff bills using the appropriate procedure code followed by the HT modifier (multi-disciplinary team).</p>
IDEA (Individuals with Disabilities Education Act)	<p>The federal statute, IDEA of 1990 as amended in 2004, which requires public schools to determine whether a child has a disability, develop a plan that details the education and support services that the student will receive, provide the services, and evaluate the plan at least annually. There may be federal funding available for some of these responsibilities.</p>
IDEA Assessment	<p>An IDEA assessment is a formal evaluation that includes assessments, evaluations, tests and all related activities performed to determine if an individual is eligible under provisions of IDEA of 1990 as amended in 2004 and are related to the evaluation and functioning of the individual.</p>

Medicaid Provider Manual

IEP (Individualized Education Program)	A written plan for services for eligible students between the ages of 2.5 and 26 years in Michigan as determined by the federal IDEA statute. Medicaid funds are available to reimburse for health and medical services that are a part of a student's IEP for Medicaid eligible students up to the age of 21.
IFSP (Individualized Family Service Plan)	A written plan for a child with a disability who is between the ages of zero and three years that is developed jointly by the family and appropriate qualified personnel, and is based on multi-disciplinary evaluation and assessment of the child's unique strengths and needs, as well as a family-directed assessment of the priorities, resources and concerns. Medicaid funds are available to reimburse for health and medical services that are a part of a child's IFSP.
ISD (Intermediate School District)	A corporate body established by statute in the Michigan Revised School Code (PA 451 of 1976) that is regulated by an intermediate school board. Michigan has 56 intermediate school districts.
ISD/LEA Clinician	Any clinician/provider employed or contracted through an ISD or associated LEA.
MDE (Michigan Department of Education)	A department within the State of Michigan.
Medical Necessity	Determination that a specific service is medically (clinically) appropriate, necessary to meet needs, consistent with the student's diagnosis, symptomatology and functional impairments, is the most cost-effective option in the least restrictive environment, and is consistent with clinical standards of care. Medical necessity of a service shall be documented in the POC. Medical necessity may support educational outcomes and goals.
MiLEAP (Michigan Lifelong Education, Advancement, and Potential)	A department within the State of Michigan government that prioritizes education from pre-school through post-secondary with a focus on preparing children for kindergarten and helping more people earn a skill certificate or degree to help them obtain good paying jobs.
NPSP (Non-Public Service Plan)	A written plan for services for eligible students between the ages of 2.5 and 26 years in non-public schools within Michigan as determined by the federal IDEA statute. Medicaid funds are available to reimburse for health and medical services that are a part of a student's NPSP for Medicaid eligible students up to the age of 21.
Plan of Care (POC)	A POC is a form that summarizes a student's health conditions, specific care needs, and current treatments. The POC outlines what needs to be done to manage the student's care needs and organizes and prioritizes services. The student's IEP/IFSP/NPSP form, individual treatment plan, behavioral health plan, or other plan may suffice as the POC as long as the document contains the required components described under the Plan of Care subsection of this section.
Random Moment Time Study	A random moment sampling to determine the extent to which Medicaid-reimbursable activities are being performed by capturing what is done during a specific moment in time.
School Clinical Record	All the written or electronic information that has been created and is necessary to fully disclose and document the services requested for reimbursement.

Medicaid Provider Manual

School Services Program (SSP)	A program which provides medically necessary Medicaid-covered services in the school setting. All Michigan ISDs and their associated LEAs, DPSCD, and MSD participate in the School Services Program.
Specialized Transportation	Transport to and from the student's pick-up and drop-off site when school-based services are provided for students through an IEP/IFSP/NPSP. Reimbursement for Specialized Transportation is not available for students receiving services outside of an IEP/IFSP/NPSP.
TL Modifier (Re-evaluation of Existing Data [REED])	The TL modifier is used with the appropriate procedure codes to identify when a re-evaluation of existing data (REED) was used in the determination of the student's eligibility for special education services.
TM Modifier (Individualized Education Program [IEP])	The TM modifier is used when billing for the multi-disciplinary evaluation team assessment for the development, review and revision of an IEP/IFSP/NPSP POC. Each qualified staff bills for this assessment using the appropriate procedure codes with the modifier.
52 Modifier	The 52 modifier is used with the appropriate procedure codes to describe circumstances in which services provided were reduced in comparison to the full description of the service.
59 Modifier	The 59 modifier is used with the appropriate procedure codes to identify when a service was distinct or independent from other services provided on the same day with the same Current Procedural Terminology (CPT) codes.
93 Modifier	The 93 modifier is used with the appropriate procedure codes to identify when service is provided via telemedicine using audio only.
95 Modifier	The 95 modifier is used with the appropriate procedure codes to identify when a service is provided via telemedicine using audio and video.

1.1 CHILDREN'S SPECIAL HEALTH CARE SERVICES

The Medicaid SSP covers services provided to children who are determined either dually eligible for Children's Special Health Care Services (CSHCS) and Medicaid (Title V/XIX), or those eligible for only Medicaid (Title XIX). SSP providers are not reimbursed for beneficiaries enrolled only in the CSHCS program (Title V only) and must not submit claims for these beneficiaries.

1.2 THIRD PARTY LIABILITY

Federal regulations require that all identifiable financial resources available for payment be billed prior to billing Medicaid for services provided outside of an IEP/IFSP/NPSP. If a Medicaid-eligible student is presently covered by another resource and the ISD/LEA does not bill the other resource, Medicaid cannot be billed for the services outside of an IEP/IFSP/NPSP. ISDs/LEAs are not required to bill other resources prior to billing Medicaid for services provided through an IEP/IFSP/NPSP. (Refer to the Coordination of Benefits chapter for additional information.)

1.3 MEDICAL NECESSITY

A Medicaid service provided by an ISD/LEA is determined medically necessary when all of the following criteria are met:

- Addresses a medical or mental disability;
- Needed to attain or retain the capability for normal activity, independence or self-care;
- Is included in the student's IEP/IFSP/NPSP, other plan of care, or is otherwise medically necessary; and
- Is ordered, in writing, by a physician or other licensed practitioner acting within the scope of their practice under State law. Students who require speech, language and hearing services must be referred. The written order/referral must be updated at least annually. Electronic and faxed signatures are acceptable; however, stamped signatures are not acceptable. Behavioral health services do not require written orders.

1.4 UNDER THE DIRECTION OF AND UNDER THE SUPERVISION OF

Certain specified services may be provided under the direction of or under the supervision of another clinician. For the supervising clinician, "under the direction of" means that the clinician is supervising the student's care which, at a minimum, includes seeing the individual initially, prescribing the type of care to be provided, reviewing the need for continued services throughout treatment, ensuring professional responsibility for services provided, and ensuring that all services are medically necessary. "Under the direction of" requires face-to-face contact by the clinician at least at the beginning of treatment and periodically thereafter.

"Supervision of" limited-licensed mental health professionals consists of the practitioner meeting regularly with another professional, at an interval described within the professional administrative rules, to discuss casework and other professional issues in a structured way. This is often known as clinical or counseling supervision or consultation. The purpose is to assist the practitioner to learn from the supervisor's experience and expertise, as well as to ensure good service to the student.

1.5 COVERED SERVICES

Medicaid covered services billed by ISDs/LEAs include:

- Evaluations and tests performed for assessments
- Occupational Therapy Services
- Orientation and Mobility Services
- Assistive Technology Device Services
- Physical Therapy Services
- Speech, Language and Hearing Therapy Services
- Psychological, Counseling and Social Work Services
- Developmental Testing Services
- Nursing Services

Medicaid Provider Manual

- Physician and Psychiatrist Services
- Personal Care Services (PCS)
- Targeted Case Management (TCM) Services (DSC services only)
- Specialized Transportation Services (DSC services only)

1.6 SERVICE EXPECTATIONS

The POC must include the appropriate annual goals and short-term objectives, criteria, evaluation procedures, and schedules for determining whether the objectives are being achieved within an appropriate period of time (at least annually). All therapy services must be skilled (i.e., require the skills, knowledge, and education of a licensed or properly credentialed provider). Interventions expected to be provided by another practitioner (e.g., teacher, registered nurse), family member or caregiver are not reimbursable as occupational, physical, or speech, language and hearing therapy by this program.

To be covered by Medicaid, behavioral and physical health services must address a beneficiary's medical need that affects their ability to learn in the classroom environment. MDHHS does not reimburse for therapies that do not have medically related goals.

Group therapy or treatment must be provided in groups of two to eight, with the specific number of students in the group identified in all documentation. Services provided as part of a regular classroom activity are not reimbursable. When regularly scheduled attention is provided to one beneficiary who is part of the class currently in session, the service is not reimbursable.

Supplies or equipment utilized in service delivery are included as part of the service and are not reimbursed separately. Art, music, and recreation therapies are not covered services.

Medicaid is required to follow the procedure code definition from the Current Procedural Terminology (CPT) and Healthcare Common Procedure Coding System (HCPCS) manuals. Procedure codes referencing office or outpatient facility include the medical services provided in the school setting. Procedure codes that do not specify a unit of time are to be billed per session. Group therapy is billed per beneficiary.

Certain CPT/HCPCS code descriptions include a specified unit of service time. Service times are based on the time it generally takes to provide the service. If the CPT/HCPCS code specifies "up to 15 minutes of service", the service may be billed in a unit of time from 1-15 minutes. If the CPT/HCPCS code specifies a unit of time "each 15 minutes", the CPT/HCPCS code may be billed when the service time equals more than half of the specified unit of time. Any additional time cannot be billed unless the full time specified is reached for the prior unit.

Consultation or consultative services are an integral part or an extension of a direct medical service and are not separately reimbursable.

Medicaid Provider Manual

1.7 PLAN OF CARE (POC)

Requirements	<p>If an evaluation indicates that Medicaid-covered services are required, qualified staff must develop and maintain a POC for the student. The student's IEP/IFSP/NPSP or individual POC form may suffice as the POC if the IEP/IFSP/NPSP or individualized POC contains the required components described below. Only qualified staff may initiate, develop, or change the student's POC. The POC must be signed, titled, and dated by a qualified medical provider prior to billing Medicaid for services and must be retained in the student's school clinical record. By signing the POC, the qualified medical provider is indicating that they have reviewed the POC and it is appropriate for the student's needs. The qualified medical provider is not taking individual responsibility for the provision or supervision of services, coordination of services, or taking personal liability for the services performed. Services may be billed in the absence of a POC for up to 30 calendar days when determined to be medically necessary. (Refer to the Covered Services section of this chapter for definitions of qualified staff.)</p>
Components	<p>The POC, which is an immediate result of the evaluation, must consist of the following components:</p> <ul style="list-style-type: none">▪ Student's name and date of birth;▪ Description of the student's qualifying diagnosis or medical condition;▪ Time-related goals that are measurable and significant to the student's function and/or mobility;▪ Long-term goals that identify specific functional achievement to serve as indicators of when the service is no longer needed;▪ Anticipated frequency and duration of treatment required to meet the time-related goals, as applicable;▪ Plan for reaching the functional goals and outcomes in the POC;▪ A statement detailing coordination of services with other providers (e.g., medical and educational); and▪ Signature, title, and date of the qualified medical provider signing the POC.

Medicaid Provider Manual

Individuals Authorized to Review/Sign the POC	<p>The POC must be signed by a qualified medical provider listed below:</p> <ul style="list-style-type: none"> ▪ A licensed occupational therapist (OT) ▪ A certified orientation and mobility specialist (O&M) ▪ A licensed physical therapist (PT) ▪ A fully-licensed speech-language pathologist (SLP) ▪ A licensed audiologist ▪ A fully-licensed psychologist ▪ A limited-licensed psychologist (under the supervision of a licensed psychologist) ▪ A certified school psychologist ▪ A licensed marriage and family therapist ▪ A licensed professional counselor ▪ A limited-licensed counselor (under the supervision of a licensed professional counselor) ▪ A licensed master's social worker ▪ A limited-licensed master's social worker (under the supervision of a licensed master's social worker) ▪ A licensed physician or psychiatrist (MD or DO) ▪ A licensed physician assistant (PA) ▪ A licensed nurse practitioner (NP) ▪ A licensed clinical nurse specialist (CNS) ▪ A registered nurse (RN) ▪ A qualified school nurse
Review	<p>The POC must be reviewed and updated at least annually, or more frequently if the student's condition changes or alternative treatments are recommended.</p>
Revision	<p>If the POC is updated in a way that changes the student's diagnosis and medical condition, goals, plan for reaching the functional goals and outcome, or frequency or duration of services, the POC must be revised and a new signature from a qualified medical provider is required.</p>

1.8 PRESCRIPTIONS, REFERRALS, AND AUTHORIZATIONS

Prescriptions, referrals, and authorizations must include:

- Student's name
- Type of services to be provided
- Provider's typed or printed name
- Provider's National Provider Identification (NPI) number when appropriate

Medicaid Provider Manual

- Signature, including date of the signature, by a qualified medical provider acting within their scope of practice, as outlined in the Practitioner Signatures subsection

1.9 EVALUATIONS

Evaluations for medical services are covered under any of the following conditions:

- Performed as part of the IDEA assessment.
- Performed as part of the student's initial assessment.
- The student left and is re-entering the SSP.
- An initial development, review or revision of the student's POC will occur.
- A change or decrease in function occurs.

1.9.A. EVALUATIONS PERFORMED FOR DMEPOS MEDICAL SUPPLIERS

If an ISD/LEA physical therapist, occupational therapist, speech-language pathologist or audiologist performs assessments for DMEPOS that are billed by a Medicaid medical supplier, the clinician must comply with all prior authorization policies and procedures regarding that DMEPOS item. For example, a physician must order the assessment. The clinician must comply with all requirements for the assessments specified in the Medical Supplier Chapter of this manual. The clinician must perform and write their own evaluation and may not sign evaluations completed by a medical supplier. Three appropriate economical alternatives must be ruled out for some items. (Refer to the Medical Supplier Chapter of this manual for details.) If the student is also receiving physical therapy, occupational therapy, or speech pathology or audiology services in another outpatient setting, it may be more appropriate for the outpatient clinician to perform the assessment. The ISD/LEA clinician must coordinate with all clinicians in other settings.

1.10 PRACTITIONER SIGNATURES

In all documentation requiring a signature, the signature must be handwritten by the practitioner or submitted electronically. A stamped signature, second party signature, or statement of "signature on file" will not be accepted. An electronic signature must specifically identify and authenticate the individual practitioner. This applies to all signatures within the program.

SECTION 2 – COVERED SERVICES

2.1 ASSESSMENT AND POC DEVELOPMENT, REVIEW AND REVISION

Definition	<p>The assessment process includes assessments, evaluations, tests and all related activities performed to determine if a beneficiary is eligible under provisions of Early and Periodic Screening, Diagnosis and Treatment (EPSDT), and are related to the evaluation and functioning of the beneficiary. These services are reimbursable even if they do not result in the implementation of a POC. If a POC is developed and not implemented within one year of the date of assessment, then none of the services within that POC are covered and a new POC is required.</p>
Provider Qualifications	<p>Qualified staff can bill for assessments, tests, and evaluations performed for the IDEA assessment. To be covered by Medicaid, staff must have the following Michigan current credentials:</p> <ul style="list-style-type: none">▪ A licensed occupational therapist (OT)▪ A certified orientation and mobility specialist (O&M)▪ A licensed physical therapist (PT)▪ A fully-licensed speech-language pathologist (SLP)▪ A limited-licensed speech-language pathologist (under the direction of a licensed speech-language pathologist)▪ A licensed audiologist▪ A fully-licensed psychologist▪ A limited-licensed psychologist (under the supervision of a licensed psychologist)▪ A certified school psychologist▪ A board-certified behavior analyst (BCBA)▪ A board-certified assistant behavior analyst (BCaBA) under the supervision of a BCBA▪ A licensed professional counselor▪ A limited-licensed counselor (under the supervision of a licensed professional counselor)▪ A licensed master's social worker▪ A limited-licensed master's social worker (under the supervision of a licensed master's social worker)▪ A licensed marriage and family therapist▪ A licensed physician or psychiatrist (MD or DO)▪ A licensed physician assistant (PA)▪ A licensed nurse practitioner (NP)▪ A licensed clinical nurse specialist (CNS)▪ A registered nurse (RN)▪ A licensed practical nurse (LPN)

Medicaid Provider Manual

	<ul style="list-style-type: none"> A qualified school nurse
Procedure Codes	<p>Qualified staff can bill for multiple types of assessments/evaluations/tests. All activities, such as meetings and written reports related to the assessment/evaluation/test, are an integral part or extension of the service and are not separately claimable. For a complete listing of procedure codes, refer to the SSP CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)</p> <ul style="list-style-type: none"> The HA modifier is used with the procedure code when billing for services provided outside of an IEP/IFSP/NPSP (C4S). This modifier is also used when an IDEA assessment does not result in the development of an IEP. The HT modifier is used with the procedure code when billing for an assessment/evaluation/test performed for the IDEA assessment. Each qualified staff bills using the appropriate procedure code followed by the HT modifier (multi-disciplinary evaluation team). The date of service is the date of determination of eligibility for special education or Early On® services. The determination date must be included in the assessment/evaluation/test. The TL modifier is used with the appropriate procedure codes to identify when a REED was used in the determination of the student's eligibility for special education services. The TM modifier is used with the procedure code when billing for the multi-disciplinary team assessment to develop, review and revise an IEP/IFSP POC. Each qualified staff bills using the appropriate procedure code below with the modifier TM (Individualized Education Program [IEP]). The date of service is the date of the multi-disciplinary team assessment. <p>No modifier is used for assessments/evaluations/tests unless one of the following is true:</p> <ul style="list-style-type: none"> The assessment/evaluation/test is to determine initial eligibility for Special Education. The assessment/evaluation/test is to determine eligibility for Special Education for an out-of-state transfer student. The assessment/evaluation/test is to determine ongoing eligibility for Special Education. The assessment/evaluation/test is to determine a change in eligibility for Special Education. The assessment/evaluation/test is to determine appropriate programs or services in Special Education. The assessment/evaluation/test is to transfer a student from Early On® to Part B. The assessment/evaluation/test is used to determine that the student is not eligible for Special Education, in which case the HT modifier is used. <p>Each qualified staff bills for these activities using the appropriate procedure code with or without a modifier. The date of service is the date the assessment/evaluation/test is completed.</p>

2.2 OCCUPATIONAL THERAPY (INCLUDES ORIENTATION AND MOBILITY SERVICES AND ASSISTIVE TECHNOLOGY DEVICE SERVICES)

2.2.A. OCCUPATIONAL THERAPY SERVICES

NOTE: Telemedicine Services are covered in the Telemedicine Chapter of this manual.

Definition	Occupational Therapy: Occupational therapy (OT) must be habilitative or rehabilitative, active or restorative, and designed to correct or compensate for a medical problem interfering with age-appropriate functional performance. OT services must require the skills, knowledge, and education of a licensed occupational therapist, licensed occupational therapy assistant, or certified orientation and mobility specialist.
Prescription	Occupational therapy services must be prescribed by a physician, physician assistant, nurse practitioner, or clinical nurse specialist and updated no less than annually. All prescriptions must conform to the standards outlined in the Prescriptions, Referrals, and Authorizations subsection of this chapter.
Provider Qualifications	<p>OT services may be reimbursed when provided by:</p> <ul style="list-style-type: none">▪ A licensed occupational therapist (OT);▪ A licensed occupational therapy assistant (OTA) under the direction of a licensed OT; or▪ A certified orientation and mobility specialist with current certification from the Academy for Certification of Vision Rehabilitation and Education Professionals (ACVREP). <p>NOTE: The OTA's services must follow the evaluation and POC developed by the OT. The OT must supervise and monitor the OTA's performance with continuous assessment of the student's progress. All documentation must be reviewed and signed by the supervising OT.</p>

Medicaid Provider Manual

Evaluations for Occupational Therapy	<p>Evaluations are formalized testing and reports for the development of the student's POC. They may be completed by a licensed OT.</p> <p>An evaluation includes:</p> <ul style="list-style-type: none">▪ The treatment diagnosis and the medical diagnosis, if different from the treatment diagnosis;▪ Current therapy being provided to the student in this and other settings;▪ Medical history as it relates to the current course of therapy;▪ The student's current functional status (functional baseline);▪ The standardized and other evaluation tools used to establish the baseline and to document progress;▪ Assessment of the student's performance components (strength, dexterity, range of motion, sensation, perception) directly affecting the student's ability to function;▪ Assessment of the student's cognitive skill level (e.g., ability to follow directions, including auditory and visual, comprehension); and▪ Evaluation of the needs related to ATD services, including a functional evaluation of the student.
Assessments for Durable Medical Equipment	<p>If an ISD/LEA occupational therapist performs assessments for DMEPOS that are billed by a Medicaid medical supplier, the clinician must comply with all prior authorization policies and procedures regarding that DMEPOS item. For example, a physician must order the assessment. The clinician must comply with all requirements for the assessments specified in the Medical Supplier Chapter of this manual. The clinician must perform and write their own evaluation and may not sign evaluations completed by a medical supplier. Three appropriate economical alternatives must be ruled out for some items. (Refer to the Medical Supplier Chapter of this manual for details.) If the student is also receiving physical therapy, occupational therapy, or speech pathology or audiology services in another outpatient setting, it may be more appropriate for the outpatient clinician to perform the assessment. The ISD/LEA clinician must coordinate with all clinicians in other settings.</p>

Medicaid Provider Manual

Services	<p>OT services include:</p> <ul style="list-style-type: none"> ▪ Group therapy provided in a group of two to eight students; ▪ Manual therapy techniques (e.g., mobilization/manipulation, manual lymphatic drainage, manual traction), one or more regions; ▪ Wheelchair management/propulsion training; ▪ Independent living skills training; ▪ Coordinating and using other therapies, interventions, or services with the ATD; ▪ Training or technical assistance for the student or, if appropriate, the student's parent/guardian; ▪ Training or technical assistance for professionals providing other education or rehabilitation services to the student receiving ATD services; ▪ Neuromuscular re-education of movement, balance, coordination, kinesthetic sense, posture, and/or proprioception for sitting and/or standing activities; ▪ Evaluating the needs of the student, including a functional evaluation of the student. ATD services are intended to directly assist a student with a disability in the selection, coordination of acquisition, or use of an ATD; and ▪ Selecting, providing for the acquisition of the device, designing, fitting, customizing, adapting, applying, retaining, or replacing the ATD, including orthotics.
Procedure Codes	For a complete listing of procedure codes, refer to the SSP CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)

2.2.B. ORIENTATION AND MOBILITY SERVICES

Definition	<p>Orientation and Mobility Services:</p> <p>Orientation and mobility services are services provided to blind or visually impaired students by qualified personnel to enable those students to attain systematic orientation to and safe movement within their environment in the school, home and community. Services are based on the individual student's needs for assistance in compensatory skill development, visual efficiency, utilization of low vision aids/devices and technology, etc.</p> <p>Spatial and environmental concepts and use of information received by the senses (such as sound, temperature and vibration) to establish, maintain, or regain orientation and line of travel (for example, using sound at a traffic light to cross the street); to use the long cane, as appropriate, to supplement visual travel skills or as a tool for safely negotiating the environment for students with no available travel vision; and to understand and use remaining vision and distance low-vision aids/devices, as appropriate.</p>
Prescription	Orientation and mobility services must be prescribed by a physician, physician assistant, nurse practitioner, or clinical nurse specialist and updated annually. All prescriptions must conform to the standards outlined in the Prescriptions, Referrals, and Authorizations subsection of this chapter.

Medicaid Provider Manual

Provider Qualifications	<p>Orientation and mobility services may be reimbursed when provided by:</p> <ul style="list-style-type: none">▪ A certified orientation and mobility specialist with current certification from the Academy for Certification of Vision Rehabilitation and Education Professionals (ACVREP); or▪ A licensed occupational therapist.
Evaluations	<p>Evaluations are formalized testing and reports for the development of the student's POC. They may be completed by an Orientation and Mobility Specialist (O&M) or a licensed occupational therapist.</p> <p>An evaluation for orientation and mobility services includes:</p> <ul style="list-style-type: none">▪ The treatment diagnosis and the medical diagnosis, if different from the treatment diagnosis;▪ Medical history as it relates to the current course of therapy;▪ The student's current functional status (functional baseline);▪ The standardized and other evaluation tools used to establish the baseline and to document progress;▪ Assessment of the student's performance components (status of sensory skills, proficiency of use of travel tools, current age-appropriate independence, complexity or introduction of new environment, caregiver input, assessment in the home/living environment, assessment in the school environment, assessment in the residential/neighborhood environment, assessment in the commercial environment, and assessment in the public transportation environment);▪ Assessment of the student's cognitive skill level (e.g., ability to follow directions, including auditory and visual, comprehension); and▪ Evaluation of the needs related to ATD services, including a functional evaluation of the student.
Services	<p>Orientation and mobility services include:</p> <ul style="list-style-type: none">▪ Providing assistance in the development of skills and knowledge that enable the student to travel independently to the highest degree possible, based on assessed needs and the POC;▪ Training the student to travel with proficiency, safety and confidence in familiar and unfamiliar environments;▪ Preparing and using equipment and material, such as tactile maps, models, distance low-vision aids/devices, and long canes, for the development of orientation and mobility skills;▪ Evaluation and training performed to correct or alleviate movement deficiencies created by a loss or lack of vision;▪ Communication skills training (teaching Braille is not a covered benefit);▪ Systematic orientation training to allow safe movement within the student's environments in school, home and community;▪ Spatial and environmental concept training and training in the use of information received by the senses (such as sound, temperature and vibration) to establish, maintain, or regain orientation;

Medicaid Provider Manual

	<ul style="list-style-type: none"> Visual training to understand and use the remaining vision for those with low vision; Training necessary to activate visual motor abilities; Training to use distance low-vision aids/devices; and Independent living skills training.
Procedure Codes	For a complete listing of procedure codes, refer to the SSP CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)

2.2.C. ATD SERVICES

Definition	<p>Assistive Technology Device (ATD) Services General Description:</p> <p>Utilizing the description in Section 602(2) of IDEA, the term 'assistive technology device' means any item, piece of equipment, or product system, whether acquired commercially off the shelf, modified, or customized, that is used to increase, maintain, or improve functional capabilities of a student with a disability. That same description applies to students receiving services outside of an IEP/IFSP. Therapists should restrict their evaluations and services to those within the scope of their practice and consistent with their education and training.</p>
Prescription	ATD services must be prescribed by a physician, physician assistant, nurse practitioner, or clinical nurse specialist and updated annually. All prescriptions must conform to the standards outlined in the Prescriptions, Referrals, and Authorizations subsection of this chapter.
Provider Qualifications	<p>ATD services may be reimbursed when provided by:</p> <ul style="list-style-type: none"> A licensed OT; or A licensed OTA; or A certified orientation and mobility specialist with current certification from the Academy for Certification of Vision Rehabilitation and Education Professionals (ACVREP).
Evaluations for ATDs	<p>Evaluations are formalized testing and reports for the development of the student's POC. They may be completed by a licensed OT.</p> <p>An evaluation includes:</p> <ul style="list-style-type: none"> The treatment diagnosis and the medical diagnosis, if different from the treatment diagnosis; Current therapy being provided to the student in this and other settings; Medical history as it relates to the current course of therapy; The student's current functional status (functional baseline); The standardized and other evaluation tools used to establish the baseline and to document progress; Assessment of the student's performance components (strength, dexterity, range of motion, sensation, perception) directly affecting the student's ability to function;

Medicaid Provider Manual

	<ul style="list-style-type: none"> Assessment of the student's cognitive skill level (e.g., ability to follow directions, including auditory and visual, comprehension); and Evaluation of the needs related to ATD services, including a functional evaluation of the student in the school environment and home.
Assessments for DME	<p>If an ISD/LEA OT performs assessments for DMEPOS that are billed by a Medicaid medical supplier, the clinician must comply with all prior authorization policies and procedures regarding that DMEPOS item. For example, a physician must order the assessment. The clinician must comply with all requirements for the assessments specified in the Medical Supplier Chapter of this manual. The clinician must perform and write their own evaluation and may not sign evaluations completed by a medical supplier. Three appropriate economical alternatives must be ruled out for some items. (Refer to the Medical Supplier Chapter of this manual for details.) If the student is also receiving physical therapy, occupational therapy, or speech pathology or audiology services in another outpatient setting, it may be more appropriate for the outpatient clinician to perform the assessment. The ISD/LEA clinician must coordinate with all clinicians in other settings.</p>
Services	<p>ATD services are intended to directly assist a student with a disability in the selection, coordination of acquisition, or use of an ATD. The direct acquisition of medical equipment, such as wheelchairs etc., is not a covered benefit of SSP; this service must be billed under the Medical Supplier program coverage. The direct acquisition of medical equipment is covered under the Medical Supplier Medicaid benefit.</p> <p>ATD services include:</p> <ul style="list-style-type: none"> Coordinating and using other therapies, interventions, or services with the ATD. Training or technical assistance for the student or, if appropriate, the student's parent/guardian. Training or technical assistance for professionals providing other education or rehabilitation services to the student receiving ATD services. Neuromuscular re-education of movement, balance, coordination, kinesthetic sense, posture, and/or proprioception for sitting and/or standing activities. Evaluating the needs of the student, including a functional evaluation of the student. ATD services are intended to directly assist a student with a disability in the selection, coordination of acquisition, or use of an ATD. Selecting, providing for the acquisition of the device, designing, fitting, customizing, adapting, applying, retaining or replacing the ATD, including orthotics. Wheelchair assessment, fitting, training. If the wheelchair assessment is for equipment billed by a Medicaid medical supplier, all prior authorization and coverage policies and procedures in the Medical Supplier Chapter of this manual must be adhered to by SSP providers.
Procedure Codes	<p>For a complete listing of procedure codes, refer to the SSP CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)</p>

Medicaid Provider Manual

2.3 PHYSICAL THERAPY SERVICES (INCLUDES ATD SERVICES)

2.3.A. PHYSICAL THERAPY SERVICES

NOTE: Telemedicine Services are covered in the Telemedicine Chapter of this manual.

Definition	Physical therapy (PT) may be habilitative or rehabilitative, active or restorative, and designed to correct or compensate for a medical problem. PT services require the skills, knowledge and education of a PT or PTA to provide therapy. Treatment is performed through the use of therapeutic exercises and rehabilitative procedures.
Prescription	PT services must be prescribed by a physician, physician assistant, nurse practitioner, or clinical nurse specialist and updated annually. All prescriptions must conform to the standards outlined in the Prescriptions, Referrals, and Authorizations subsection of this chapter.
Provider Qualifications	PT services may be reimbursed when provided by: <ul style="list-style-type: none">▪ A licensed physical therapist (PT); or▪ A licensed physical therapy assistant (PTA) under the direction of a licensed PT (i.e., the PT supervises and monitors the PTA's performance with continuous assessment of the student's progress). All documentation must be reviewed and signed by the supervising PT.
Evaluations for Physical Therapies	Evaluations are formalized testing and reports to determine a student's need for services and recommend a course of treatment. They may be completed by a PT. Evaluations include: <ul style="list-style-type: none">▪ The treatment diagnosis and the medical diagnosis, if different than the treatment diagnosis;▪ Current therapy being provided to the student in this and other settings;▪ Medical history as it relates to the current course of therapy;▪ The student's current functional status (i.e., functional baseline);▪ The standardized and other evaluation tools used to establish the baseline and to document progress;▪ Assessment of the student's performance components (e.g., strength, dexterity, range of motion) directly affecting the student's ability to function;▪ Assessment of the student's cognitive skill level (e.g., ability to follow directions, including auditory and visual, comprehension); and▪ Evaluation of the needs related to ATD services, including a functional evaluation of the student.

Medicaid Provider Manual

Assessments for DME	If an ISD/LEA physical therapist performs assessments for DMEPOS that are billed by a Medicaid medical supplier, the clinician must comply with all prior authorization policies and procedures regarding that DMEPOS item. For example, a physician must order the assessment. The clinician must comply with all requirements for the assessments specified in the Medical Supplier Chapter of this manual. The clinician must perform and write their own evaluation and may not sign evaluations completed by a medical supplier. Three appropriate economical alternatives must be ruled out for some items. (Refer to the Medical Supplier Chapter of this manual for details.) If the student is also receiving physical therapy, occupational therapy, or speech pathology or audiology services in another outpatient setting, it may be more appropriate for the outpatient clinician to perform the assessment. The ISD/LEA clinician must coordinate with all clinicians in other settings.
Services	PT services include, but are not limited to: <ul style="list-style-type: none"> ▪ Group therapy provided in a group of two to eight students; ▪ Gait training; ▪ Training in functional mobility skills (e.g., ambulation, transfers, and wheelchair mobility); ▪ Stretching for improved flexibility; and ▪ Modalities to allow gains of function, strength or mobility.
Procedure Codes	For a complete listing of procedure codes, refer to the SSP CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)

2.3.B. ATD SERVICES

Definition	ATD Services General Description: Utilizing the description in Section 602(2) of IDEA, the term 'assistive technology device' means any item, piece of equipment, or product system, whether acquired commercially off the shelf, modified, or customized, that is used to increase, maintain, or improve functional capabilities of a student with a disability. That same description applies to students receiving services outside of an IEP/IFSP. Therapists should restrict their evaluations and services to those within the scope of their practice and consistent with their education and training.
Prescription	ATD services must be prescribed by a physician, physician assistant, nurse practitioner, or clinical nurse specialist and updated annually. All prescriptions must conform to the standards outlined in the Prescriptions, Referrals, and Authorizations subsection of this chapter.
Provider Qualifications	ATD services may be reimbursed when provided by: <ul style="list-style-type: none"> ▪ a licensed physical therapist (PT); or ▪ a licensed physical therapy assistant (PTA).

Medicaid Provider Manual

Evaluations for ATDs	<p>Evaluations are formalized testing and reports for the development of the student's POC. They may be completed by a PT.</p> <p>An evaluation includes:</p> <ul style="list-style-type: none">▪ The treatment diagnosis and the medical diagnosis, if different from the treatment diagnosis;▪ Current therapy being provided to the student in this and other settings;▪ Medical history as it relates to the current course of therapy;▪ The student's current functional status (functional baseline);▪ The standardized and other evaluation tools used to establish the baseline and to document progress;▪ Assessment of the student's performance components (strength, dexterity, range of motion, sensation, perception) directly affecting the student's ability to function;▪ Assessment of the student's cognitive skill level (e.g., ability to follow directions, including auditory and visual, comprehension); and▪ Evaluation of the needs related to ATD services, including a functional evaluation of the student in the school environment and home.
Assessments for DME	<p>If an ISD/LEA physical therapist performs assessments for DMEPOS that are billed by a Medicaid medical supplier, the clinician must comply with all prior authorization policies and procedures regarding that DMEPOS item. For example, a physician must order the assessment. The clinician must comply with all requirements for the assessments specified in the Medical Supplier Chapter of this manual. The clinician must perform and write their own evaluation and may not sign evaluations completed by a medical supplier. Three appropriate economical alternatives must be ruled out for some items. (Refer to the Medical Supplier Chapter of this manual for details.) If the student is also receiving physical therapy, occupational therapy, or speech pathology or audiology services in another outpatient setting, it may be more appropriate for the outpatient clinician to perform the assessment. The ISD/LEA clinician must coordinate with all clinicians in other settings.</p>

Medicaid Provider Manual

Services	<p>ATD services are intended to directly assist a student with a disability in the selection, coordination of acquisition, or use of an ATD. The direct acquisition of medical equipment, such as wheelchairs, etc., is not a covered benefit of SSP; this service must be billed under the Medical Supplier program coverage. The direct acquisition of medical equipment is covered under the Medical Supplier Medicaid benefit.</p> <p>ATD services include:</p> <ul style="list-style-type: none">▪ Coordinating and using other therapies, interventions, or services with the ATD.▪ Training or technical assistance for the student or, if appropriate, the student's parent/guardian.▪ Training or technical assistance for professionals providing other education or rehabilitation services to the student receiving ATD services.▪ Evaluating the needs of the student, including a functional evaluation of the student. ATD services are intended to directly assist a student with a disability in the selection, coordination of acquisition, or use of an ATD.▪ Selecting, providing for the acquisition of the device, designing, fitting, customizing, adapting, applying, retaining or replacing the ATD, including orthotics.▪ Wheelchair assessment, fitting, training. If the wheelchair assessment is for equipment billed by a Medical Supplier, all prior authorization and coverage policies and procedures in the Medical Supplier Chapter of this manual must be adhered to by SSP providers.
Procedure Codes	<p>For a complete listing of procedure codes, refer to the SSP CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)</p>

2.4 SPEECH, LANGUAGE AND HEARING THERAPY (INCLUDES ATD SERVICES)

2.4.A. SPEECH, LANGUAGE AND HEARING THERAPY

NOTE: Telemedicine Services are covered in the Telemedicine Chapter of this manual.

Definition	<p>Speech, language and hearing therapy must be a diagnostic or corrective service to teach compensatory skills for deficits that directly result from a medical condition. This service is provided to students with a diagnosed speech, language or hearing disorder adversely affecting the functioning of the student. Speech, language and hearing therapy must require the skills, knowledge and education of a fully licensed speech-language pathologist, limited-licensed speech-language pathologist, or audiologist to provide the therapy.</p>
Prescription	<p>Speech, language, and hearing services require a referral by a physician, physician assistant, nurse practitioner, or clinical nurse specialist and updated annually. All referrals must conform to the standards outlined in the Prescriptions, Referrals, and Authorizations subsection of this chapter.</p>

Medicaid Provider Manual

Provider Qualifications	<p>Speech, language and hearing services may be reimbursed when provided by:</p> <ul style="list-style-type: none"> ▪ A fully licensed speech-language pathologist (SLP); ▪ A licensed audiologist; ▪ A speech-language pathologist (SLP) and/or audiology candidate (i.e., in their clinical fellowship year or having completed all requirements but has not obtained a license), under the direction of a qualified SLP or audiologist. All documentation must be reviewed and signed by the appropriately licensed SLP or licensed audiologist; or ▪ A limited licensed SLP, under the direction of a fully licensed SLP or audiologist. All documentation must be reviewed and signed by the appropriately licensed supervising SLP or licensed audiologist.
Evaluations for Speech Pathology Services	<p>Evaluations are formalized testing and reports conducted to determine the need for services and recommendation for a course of treatment. They may be completed by a licensed SLP or audiologist.</p> <p>Evaluations include:</p> <ul style="list-style-type: none"> ▪ The treatment diagnosis and the medical diagnosis, if different from the treatment diagnosis; ▪ Current therapy being provided to the student in this and other settings; ▪ Medical history as it relates to the current course of therapy; ▪ The student's current communication status (functional baseline); ▪ The standardized and other evaluation tools used to establish the baseline and to document progress; and ▪ Evaluation of the needs related to ATD services, including a functional evaluation of the student. <p>Evaluations may also include, but are not limited to:</p> <ul style="list-style-type: none"> ▪ Articulation - standardized tests that measure receptive and expressive language, mental age, oral motor skills, articulation skills, current diet level (including difficulties with any food consistencies), current means of communication, and a medical diagnosis. ▪ Language - standardized tests that measure receptive and expressive language, mental age, oral motor skills, current and previous means of communication, and medical diagnosis(es). ▪ Rhythm - standardized tests that measure receptive and expressive language, mental age, oral motor skills, measurable assessment of dysfluency, current means of communication, and a medical diagnosis. ▪ Swallowing - copy of the video fluoroscopy or documentation that objectively addresses the laryngeal and pharyngeal stages, oral motor assessment that measures consistencies that have been attempted and the results, voice quality (i.e., pre- and post-feeding and natural voice), articulation assessment, and a standardized cognitive assessment. ▪ Voice - copy of the physician's medical assessment of the student's voice mechanism and the medical diagnosis.

Medicaid Provider Manual

Speech Assessments for DME	If an ISD/LEA SLP or audiologist performs assessments for DMEPOS that are billed by a Medicaid medical supplier, the clinician must comply with all prior authorization policies and procedures regarding that DMEPOS item. For example, a physician must order the assessment. The clinician must comply with all requirements for the assessments specified in the Medical Supplier Chapter of this manual. The clinician must perform and write their own evaluation and may not sign evaluations completed by a medical supplier. Three appropriate economical alternatives must be ruled out for some items. (Refer to the Medical Supplier Chapter of this manual for details.) If the student is also receiving physical therapy, occupational therapy, or speech pathology or audiology services in another outpatient setting, it may be more appropriate for the outpatient clinician to perform the assessment. The ISD/LEA clinician must coordinate with all clinicians in other settings.
Services	Speech, language and hearing services include, but are not limited to: <ul style="list-style-type: none"> ▪ Group therapy provided in a group of two to eight students ▪ Articulation, language, and rhythm ▪ Swallowing dysfunction and/or oral function for feeding ▪ Voice therapy ▪ Speech, language or hearing therapy ▪ Speech reading/aural rehabilitation ▪ Esophageal speech training therapy ▪ Speech defect corrective therapy ▪ Fitting and testing of hearing aids or other communication devices
Procedure Codes	For a complete listing of procedure codes, refer to the SSP CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)

2.4.B. ATD SERVICES

Definition	ATD Services General Description: Utilizing the description in Section 602(2) of IDEA, the term 'assistive technology device' means any item, piece of equipment, or product system, whether acquired commercially off the shelf, modified, or customized, that is used to increase, maintain, or improve functional capabilities of a student with a disability. That same description applies to students receiving services outside of an IEP/IFSP. Therapists should restrict their evaluations and services to those within the scope of their practice and consistent with their education and training.
Prescription	ATD services must be prescribed by a physician, physician assistant, nurse practitioner, or clinical nurse specialist and updated annually. All prescriptions must conform to the standards outlined in the Prescriptions, Referrals, and Authorizations subsection of this chapter.
Provider Qualifications	ATD services may be reimbursed when provided by: <ul style="list-style-type: none"> ▪ A licensed audiologist ▪ A fully licensed speech-language pathologist (SLP)

Medicaid Provider Manual

Evaluations for ATDs	<p>Evaluations are formalized testing and reports for the development of the student's POC. They may be completed by an audiologist or SLP.</p> <p>An evaluation includes:</p> <ul style="list-style-type: none"> ▪ The treatment diagnosis and the medical diagnosis, if different from the treatment diagnosis; ▪ Current therapy being provided to the student in this and other settings; ▪ Medical history as it relates to the current course of therapy; ▪ The student's current functional status (functional baseline); ▪ The standardized and other evaluation tools used to establish the baseline and to document progress; ▪ Assessment of the student's performance components (strength, dexterity, range of motion, sensation, perception) directly affecting the student's ability to function; ▪ Assessment of the student's cognitive skill level (e.g., ability to follow directions, including auditory and visual, comprehension); and ▪ Evaluation of the needs related to ATD services, including a functional evaluation of the student in the school environment and home.
Assessments for DME	<p>If an ISD/LEA audiologist or SLP performs assessments for DMEPOS that are billed by a Medicaid medical supplier, the clinician must comply with all prior authorization policies and procedures regarding that DMEPOS item. For example, a physician must order the assessment. The clinician must comply with all requirements for the assessments specified in the Medical Supplier Chapter of this manual. The clinician must perform and write their own evaluation and may not sign evaluations completed by a medical supplier. Three appropriate economical alternatives must be ruled out for some items. (Refer to the Medical Supplier Chapter of this manual for details.) If the student is also receiving physical therapy, occupational therapy, or speech pathology or audiology services in another outpatient setting, it may be more appropriate for the outpatient clinician to perform the assessment. The ISD/LEA clinician must coordinate with all clinicians in other settings.</p>
Services	<p>ATD services are intended to directly assist a student with a disability in the selection, coordination of acquisition, or use of an ATD. The direct acquisition of medical equipment is covered under the Medicaid Medical Supplier benefit.</p> <p>ATD services include:</p> <ul style="list-style-type: none"> ▪ Coordinating and using other therapies, interventions, or services with the ATD. ▪ Training or technical assistance for the student or, if appropriate, the student's parent/guardian. ▪ Training or technical assistance for professionals providing other education or rehabilitation services to the student receiving ATD services. ▪ Evaluating the needs of the student, including a functional evaluation of the student. ATD services are intended to directly assist a student with a disability in the selection, coordination of acquisition, or use of an ATD.

Medicaid Provider Manual

	<ul style="list-style-type: none">▪ Selecting, providing for the acquisition of the device, designing, fitting, customizing, adapting, applying, retaining or replacing the ATD.
Procedure Codes	For a complete listing of procedure codes, refer to the SSP CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)

2.5 PSYCHOLOGICAL, COUNSELING AND SOCIAL WORK SERVICES

NOTE: Telemedicine Services are covered in the Telemedicine Chapter of this manual.

Definitions	<p>Psychological, counseling, and social work services include planning, managing and providing a program of face-to-face services for students with diagnosed psychological conditions. Psychological, counseling, and social work services must require the skills, knowledge and education of a psychologist, counselor, social worker, or other qualified behavior health professional to provide treatment.</p> <p>Psychotherapy is the treatment of a mental disorder or behavioral disturbance for which the clinician provides services through definitive therapeutic communication, attempts to alleviate the emotional disturbances, reverses or changes maladaptive patterns of behavior, and encourages personality growth and development. The codes for reporting psychotherapy are divided into two broad categories: Interactive Psychotherapy, and Insight-Oriented, Behavior-Modifying and/or Supportive Psychotherapy.</p> <p>Interactive psychotherapy refers to the use of physical aids and nonverbal communication to overcome barriers to therapeutic interaction between the clinician and a student who has not yet developed, or has lost, either the expressive language communication skills to explain their symptoms and response to treatment, or the receptive communication skills to understand the clinician if they would use ordinary adult language for communication.</p> <p>Insight-oriented, behavior-modifying and/or supportive psychotherapy refers to the development of insight or affective understanding, the use of behavior modification techniques, the use of supportive interactions, and the use of cognitive discussion of reality or any combination of the above to provide therapeutic change.</p>
--------------------	--

Medicaid Provider Manual

Provider Qualifications	<p>Psychological, counseling and social work services may be reimbursed when provided by:</p> <ul style="list-style-type: none"> ▪ A licensed physician or psychiatrist ▪ A fully-licensed psychologist ▪ A limited-licensed psychologist under the supervision of a licensed psychologist ▪ A temporary limited-licensed psychologist under the supervision of a licensed psychologist ▪ A certified school psychologist ▪ A board-certified behavior analyst (BCBA) ▪ A board-certified assistant behavior analyst (BCaBA) under the supervision of a BCBA ▪ A licensed professional counselor ▪ A limited-licensed counselor (under the supervision of a licensed professional counselor) ▪ A licensed master's social worker ▪ A limited licensed master's social worker under the supervision of a licensed master's social worker ▪ A licensed marriage and family therapist
Evaluations	<p>Evaluations or assessments include tests, interviews and behavioral evaluations that appraise cognitive, emotional, social functioning and self-concept. These may also include interpretations of information about a student's behavior and conditions relating to functioning. A qualified psychologist, counselor or licensed master's social worker must complete them.</p>
Psychological Testing	<p>Psychological testing includes tests, interviews, evaluations and recommendations for treatment. This may also include interpretations of information about a student's behavior and conditions relating to functioning. A fully-licensed psychologist or a limited-licensed psychologist may perform psychological testing. Medicaid covers psychological testing that is reasonable and necessary for diagnosing the student's condition. Medicaid does not cover the time that a student spends alone in testing. The student's clinical record must be signed and dated by the staff that administered the tests, and include the actual tests administered and completed reports. The protocols for testing must be available for review. Psychological testing may be billed per hour with a five-hour maximum per year, and a report must be generated from the results of the tests. In accordance with CPT guidelines, the service includes testing time only; it does not include writing a report. Writing the report is considered a part of the testing process and is a requirement for billing.</p> <p>The psychological testing report must include all of the following:</p> <ul style="list-style-type: none"> ▪ Student name and birth date; ▪ Psychological tests administered; ▪ Summary of testing results; ▪ Treatment recommendations; and ▪ Psychologist name and dated signature.

Medicaid Provider Manual

Procedure Codes	For a complete listing of procedure codes, refer to the SSP CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)
Crisis Intervention	Crisis intervention services are unscheduled activities performed for the purpose of resolving an immediate crisis situation. Activities include crisis response, assessment, referral and direct therapy. Since these services are unscheduled activities, they are not listed in the student's POC.

2.6 DEVELOPMENTAL TESTING

Definition	Developmental testing is medically related testing (not performed for educational purposes) provided to determine if motor, speech, language, and psychological problems exist or to detect the presence of any developmental delays. Testing is accomplished by the combination of several testing procedures and includes the evaluation of the student's history and observation. Whenever possible and when age-appropriate, standardized objective measurements are to be used (e.g., Denver II) for children under the age of six. Administering the tests must generate material that is formulated into a report. Developmental testing done for educational purposes cannot be billed to Medicaid.
Documentation	The developmental testing report must include all of the following: <ul style="list-style-type: none">▪ Student name and birth date;▪ Tests administered;▪ Treatment recommendations; and▪ The dated signature of the person administering the tests.
Provider Qualifications	Developmental testing services may be reimbursed when provided by the following qualified staff in accordance with their professional credentials: <ul style="list-style-type: none">▪ A fully-licensed psychologist▪ A limited-licensed psychologist under the supervision of a licensed psychologist▪ A licensed master's social worker▪ A limited-licensed master's social worker under the supervision of a licensed master's social worker▪ A licensed physician or psychiatrist
Procedure Codes	For a complete listing of procedure codes, refer to the SSP CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)

2.7 NURSING SERVICES

NOTE: Telemedicine Services are covered in the Telemedicine Chapter of this manual.

Medicaid Provider Manual

Definition	<p>Nursing services are professional services relevant to the medical needs of the student provided through direct intervention. Direct service interventions must be medically-based services that are within the scope of the professional practice of the Nurse Practitioner (NP), Clinical Nurse Specialist (CNS), School Nurse, Registered Nurse (RN), and Licensed Practical Nurse (LPN), provided during a face-to-face encounter, and provided on a one-to-one basis.</p> <p>Medicaid policy will follow current Michigan Public Health Code scope of practice guidelines for nursing practices.</p> <p>Services include, but are not limited to:</p> <ul style="list-style-type: none"> ▪ Care coordination ▪ Catheterizations or catheter care ▪ Maintenance of tracheotomies ▪ Medication administration ▪ Oxygen administration ▪ Tube feeding ▪ Suctioning ▪ Ventilator care <p>Services considered observation or stand-by in nature are not covered.</p> <p>LPN services can only be billed if performed under the supervision of an RN or physician.</p>
Prescription	<p>Direct service interventions require a physician's, physician assistant, nurse practitioner's, or clinical nurse specialist's written order when the initial need for services is determined. Direct service interventions must be reviewed and revised annually or as medically necessary by the student's attending physician. The nurse is responsible for notifying the attending physician of any change in the student's condition which may result in a change or modification to the POC. All prescriptions must conform to the standards outlined in the Prescriptions, Referrals, and Authorizations subsection of this chapter.</p>
Provider Qualifications	<p>Nursing services may be reimbursed when provided by:</p> <ul style="list-style-type: none"> ▪ A licensed Nurse Practitioner (NP); ▪ A licensed Clinical Nurse Specialist (CNS); ▪ A certified School Nurse; ▪ A licensed Registered Nurse (RN) in Michigan; or ▪ A Licensed Practical Nurse (LPN) in Michigan.
Evaluations	<p>A NP, CNS, RN, or School Nurse must complete the evaluations/assessments and prepare a nursing POC. An evaluation/assessment may be performed when a change in the student's medical condition occurs. LPNs cannot bill for evaluations/assessments.</p>
Procedure Codes	<p>For a complete listing of procedure codes, refer to the SSP CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)</p>

Medicaid Provider Manual

2.8 PHYSICIAN AND PSYCHIATRIST SERVICES

NOTE: Telemedicine Services are covered in the Telemedicine Chapter of this manual.

Definition	<p>Physician and psychiatrist services are services provided with the intent to diagnose, identify or determine the nature and extent of a student's medical or other health-related condition. Physician/psychiatrist services include:</p> <ul style="list-style-type: none">▪ Evaluation and consultation with providers of covered services for diagnostic and prescriptive services; includes participation in multi-disciplinary team assessment.▪ Record review for diagnostic and prescriptive services. <p>Only the services provided by a physician or psychiatrist (MD or DO) through SSP may be billed and reimbursed through the enrolled ISD.</p> <p>Other physician or psychiatrist services, including those which may be delivered through other Medicaid-enrolled providers, are to be billed separately and may not be billed through the enrolled ISD.</p>
Provider Qualifications	<p>A licensed physician or psychiatrist (MD or DO) in Michigan.</p>
Procedure Codes	<p>For a complete listing of procedure codes, refer to the SSP CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)</p> <p>Procedure codes that replicate the services of other billed codes, either in part or in total, will not be reimbursed for the same date of service.</p> <p>If a physician order/referral is written as a result of a physician medical conference, the order/referral is considered to be a part of that service and is not separately reimbursable.</p>

2.9 PERSONAL CARE SERVICES

Definition	<p>Personal Care Services (PCS) are a range of human assistance services provided to students with disabilities and chronic conditions which enables them to accomplish tasks that they would normally do for themselves if they did not have a disability. Assistance may be in the form of hands-on assistance or cueing so that the student performs the task by themselves.</p> <p>PCS may be provided when:</p> <ul style="list-style-type: none">▪ The service is medically necessary. <p>PCS is not covered if they are:</p> <ul style="list-style-type: none">▪ Provided by a family member. A family member is described by CMS to be "legally responsible relatives"; thus, spouses of students and parents or guardians of minor students (including step-parents who are legally responsible for minor students).▪ Not documented in the POC.▪ Educational in focus, such as tutoring, preparation of educational materials or Braille interpretation.▪ Performed as a group service; however, one or more students may be served one-at-a-time sequentially. <p>PCS may include, but is not limited to, assisting with the following:</p> <ul style="list-style-type: none">▪ Eating/feeding▪ Respiratory assistance▪ Toileting▪ Grooming▪ Dressing▪ Transferring▪ Ambulation▪ Personal hygiene▪ Mobility/Positioning▪ Meal preparation▪ Skin care▪ Bathing▪ Maintaining continence▪ Assistance with self-administered medications▪ Re-direction and intervention for behavior▪ Health-related functions through hands-on assistance, supervision, and cueing
-------------------	--

Medicaid Provider Manual

Personal Care Paraprofessional Provider Qualifications	<p>Personal care paraprofessional personnel are employed by the ISD/LEA and shall be qualified under the requirements established by their respective POC. Providers must be trained in the skills needed to perform covered services and must be under the direction of a qualified professional as designated in the POC. Paraprofessional personnel may include, but are not limited to:</p> <ul style="list-style-type: none"> ▪ Teacher Aides ▪ Health Care Aides ▪ Instructional Aides ▪ Bilingual Aides ▪ Program Assistants ▪ Trainable Aides ▪ Behavioral Health Aides
Prescription	<p>In accordance with 42 CFR 440.167, authorization for PCS may be done by a physician or "other licensed practitioner" operating within the scope of their practice. The State definition of "other licensed practitioner" consists of Registered Nurse (RN), Licensed Occupational Therapist (OT), Licensed Physical Therapist (PT), Licensed Master's of Social Work (MSW), or fully-licensed Speech-Language Pathologist (SLP). It is expected that PCS will be authorized by the appropriate practitioner and updated annually. All authorizations must conform to the standards outlined in the Prescriptions, Referrals, and Authorizations subsection of this chapter.</p>
Documentation	<p>PCS must be medically necessary and the need for the service must be documented in the student's POC. Each student's school clinical record must contain a completed, signed and dated monthly activity log. Any days where the student is absent must be documented on the monthly activity log. Days where the student was present and services were not provided must also be documented on the monthly activity log. The monthly activity log may be in an electronic format; however, all services provided to the student must be listed. Service categories (i.e., toileting, feeding, transferring, etc.), times, and frequencies must be documented either in the POC, in an attached document, or in the student's treatment authorization.</p>
Procedure Codes	<p>For a complete listing of procedure codes, refer to the CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)</p>

2.10 TARGETED CASE MANAGEMENT (TCM) SERVICES – PUPILS WITH AN IEP/IFSP ONLY

Definition	<p>Targeted Case Management (TCM) services are only allowable when provided to students with an IEP/IFSP.</p> <p>TCM services are services furnished to assist students in gaining access to needed medical, social, educational, or other services. TCM services include the following assistance:</p> <ul style="list-style-type: none"> ▪ A comprehensive assessment and periodic reassessment of a student to determine the need for medical, social, educational, or other services. These assessment activities include: <ul style="list-style-type: none"> ➤ Taking student history;
-------------------	--

Medicaid Provider Manual

- Identifying the student's needs and completing related documentation; and
- Gathering information from other sources, such as family members, medical providers, social workers, and educators (if necessary), to form a complete assessment of the student.
- Development (and periodic revision) of a POC that:
 - Is based on the information collected through the assessment;
 - Specifies the goals and actions to address the medical, social, educational or other services needed by the student;
 - Includes activities such as ensuring the active participation of the eligible student, and working with the student (or the student's parent/guardian) and others to develop those goals; and
 - Identifies a course of action to respond to the assessed needs of the eligible student.
- Referral and related activities:
 - To help an eligible student obtain needed services, including activities that help link a student with medical, social, and educational providers or other programs and services that are capable of providing needed services, such as making referrals to providers for needed services and scheduling appointments for the student;
 - Monitoring and follow-up activities;
 - Activities and contacts that are necessary to ensure the POC is implemented and adequately addresses the student's needs, and which may be with the student, family member, providers, or other entities or individuals, and conducted as frequently as necessary, including at least one annual monitoring, to determine whether the following conditions are met:
 - ◆ Services are being furnished in accordance with the student's POC;
 - ◆ Services in the POC are adequate.

If there are changes in the needs or status of the student, necessary adjustments are made to the POC and service arrangements.

TCM services may be reimbursed when provided by a Designated Case Manager.

Providers must maintain case records that document, for all students receiving case management services, the following:

- the name of the student,
- the dates of the case management services,
- name of the person providing the case management services, and
- the nature and content.

The case record must also reflect:

- whether the goals specified in the POC have been achieved,
- whether the student has declined services in the POC,
- the need for, and occurrences of, coordination with other case managers,

Medicaid Provider Manual

	<ul style="list-style-type: none"> the timeline for obtaining needed services, and a timeline for re-evaluation of the POC.
Provider Qualifications	<p>The Designated Case Manager is the person responsible for the implementation of the POC. The Designated Case Manager must be an individual who meets one of the following criteria:</p> <ul style="list-style-type: none"> A licensed RN in Michigan; A bachelor's degree with a major in a specific special education area; Has earned credit in coursework equivalent to that required for a major (30 hours) in a specific special education area; or Has a minimum of three years' personal experience in the direct care of a student with special needs. <p>In addition to meeting at least one of the above, the Designated Case Manager must also demonstrate knowledge and understanding of all of the following:</p> <ul style="list-style-type: none"> Services for infants and toddlers who are eligible under IDEA, as appropriate; Part C of IDEA and the associated regulations; The nature and scope of services covered under IDEA, as well as systems of payments for services and other pertinent information; Provision of direct care services to students with special needs; and Provision of culturally competent services within the community being served.
Targeted Case Management Services	<p>TCM services include:</p> <ul style="list-style-type: none"> Ensuring that standard re-examination and follow-up of the student are conducted on a periodic basis to ensure that the student receives needed diagnosis and treatment; Assisting families in identifying and choosing the most appropriate providers of care and services, scheduling appointments, and helping families to maintain contact with providers; Follow-up to ensure that the student receives needed diagnostic and treatment services; Ensuring that case records are maintained and indicate all contacts with, or on behalf of, a student in the same manner as other covered services; Coordinating SSP services and treatment with parents/guardians and the student; Monitoring and recommending a plan of action; Coordinating performance of evaluations, assessments and other services that the student needs; Facilitating and participating in the development, review, modification and evaluation of the multi-disciplinary team POC; Activities that support linking and coordinating needed health services for the student;

Medicaid Provider Manual

	<ul style="list-style-type: none">▪ Providing a summary of provider, parents/guardians and student health and behavioral consultation; and▪ Coordinating with staff/health professionals to establish continuum of health and behavioral services in the school setting.
Procedure Code	For a complete listing of procedure codes, refer to the SSP CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)

2.11 SPECIALIZED TRANSPORTATION

Definition	<p>Specialized transportation services include transport to and from the student's pick-up and drop-off site where Medicaid services are provided. It includes no more than two one-way trips on a date of service.</p> <p>The medical need for special education transportation must be specified in the student's IEP/IFSP/NPSP POC. Medicaid may reimburse for special education transportation when a student receives a Medicaid-covered service on the same day as the day transportation is provided.</p> <p>Medicaid does not reimburse for transportation provided in a regular or general education school bus. There is no additional payment for an attendant.</p> <p>Specialized transportation is limited to students receiving services through an IEP/IFSP.</p>
Documentation	Federal requirements include documentation for transportation service claims that must be maintained for purposes of an audit trail, such as an ongoing trip log maintained by the provider of the special education transportation. Ridership must be documented for each one-way trip.
Procedure Codes	For a complete listing of procedure codes, refer to the SSP CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)

Medicaid Provider Manual

Taxi and Private Vehicle Transportation

For a taxi or private vehicle transportation expense to be reimbursed, the following documentation must be on file at the ISD/LEA:

- Specialized transportation must be included in the IEP/IFSP/NPSP POC.
- A Medicaid-covered medical service must be provided on the same day as the transportation.
- Dates and times of each trip must be listed on the ISD/LEA trip log.
- Documentation from the student's physician or ISD/LEA treating the student stating the reason taxi or private vehicle transportation is required must be retained in the student's file.
- For transportation by taxi, an additional statement justifying the need for a taxi and the reason other less costly means of transportation cannot be used must be retained in the student's file.
- For ongoing transportation needs, documentation is only required once per student per school year.
- For one-time or occasional use transportation, documentation is required for each trip or trip period per student.

The total number of trips claimed for taxi and private vehicle transportation must be included in the Special Education trip count on the LEA Cost Report.

Claims must be filed through CHAMPS within one year from the date of service according to Medicaid timely filing requirements.

Transportation by stretcher car is not covered. The term "stretcher car" is defined as a vehicle capable of transporting a student in a prone or supine position (e.g., Ambucab).

SECTION 3 – QUALITY ASSURANCE AND COORDINATION OF SERVICES

3.1 QUALITY ASSURANCE

SSP providers must have a written quality assurance plan on file. SSP costs will be reviewed/audited by MDHHS for determination of medical necessity and to verify that all services were billed and paid appropriately. The purpose of the quality assurance plan is to establish and maintain a process for monitoring and evaluating the quality and documentation of covered services, and the impact of Medicaid enrollment on the school environment.

An acceptable quality assurance plan must address each of the following quality assurance standards:

- Covered services are medically necessary, as determined and documented through appropriate and objective testing, evaluation and diagnosis.
- The POC identifies which covered services are to be provided and the service frequency, duration, goals and objectives.
- A monitoring program exists to ensure that services are appropriate, effective and delivered in a cost-effective manner consistent with the reduction of physical or mental disabilities and assisting the beneficiary to benefit from education services.
- Billings are reviewed for accuracy.
- Staff qualifications meet current license, certification and program requirements.
- Established coordination and collaboration exists to develop POCs with all other providers (i.e., Public Health, MDHHS, Community Mental Health Services Programs [CMHSPs], Medicaid Health Plans [MHPs], Hearing Centers, Outpatient Hospitals, etc.).
- Parent/guardian and beneficiary participation exists outside of the POC team process in evaluating the impact of SSP on the educational setting, service quality and outcomes.

3.2 SERVICE COORDINATION AND COLLABORATION

Students with special needs have access to services available in both outpatient and school-based treatment settings. If treatment is provided in both settings, the goals and purpose for the two must be distinct. SSP services are provided to assist a student with a disability to benefit from special education. Outpatient services are provided to optimize the student's functional performance in relation to needs in the home or community setting and must not duplicate those provided in the school setting. Collaboration between the school and community providers is mandated to coordinate treatment and to prevent duplication of services. This collaboration may take the form of phone calls, written communication logs, or participation in team meetings such as the IEP/IFSP meeting and POC development. If coordination cannot be established, the ISD/LEA should retain documentation of their coordination attempts.

3.3 ISD RESPONSIBILITIES

Each ISD must establish an implementation plan that includes explicit quality control review mechanisms to ensure full staff training and compliance, accuracy, and completeness of the Random Moment Time Study (RMTS) sample frame (designated employees), adherence to MDHHS-published methodology, editing of all moments for completeness and consistency, and accurate financial and staffing reports. Claiming entities must also fully cooperate with any review requested by the U.S. Department of Health & Human Services (HHS), maintaining all necessary records for a minimum of seven (7) years after submission of each quarterly claim or final settlement of the Medicaid LEA cost report.

3.3.A. SANCTIONS

It is the intent of the State to pursue, when necessary, remedial action or implement a corrective action plan if the ISDs or their vendors are not in compliance with Medicaid policy and procedures. If these actions are not successful, a payment freeze will be implemented, and sanctions put in place until the matter is resolved. ISDs are responsible for the actions of their vendors.

The following are examples of causes for sanctions. The list is not all-inclusive.

- Repeated errors in completing the RMTS forms or filing of the claims.
- Providing insufficient data or incomplete reports to the State Claims Development Contractor.
- Failure to submit requested information, reports, or data to the State Claims Development Contractor, CMS, MDHHS, MDE, or MiLEAP, or failure to cooperate with representatives of these agencies during site visits, reviews or audits.
- Failure to comply with the federal mandate to submit procedure-specific claims through CHAMPS.

SECTION 4 – PROVIDER ENROLLMENT

4.1 ENROLLMENT

The 56 Michigan Intermediate School Districts (ISDs) and their associated local education agencies (LEAs), Detroit Public Schools Community District (DPSCD), and Michigan School for the Deaf (MSD) are the only providers eligible to bill Medicaid for SSP services. Providers must be enrolled and/or revalidated via the CHAMPS Provider Enrollment subsystem. Any applications or updates must be made through the CHAMPS system.

4.2 CERTIFICATION OF QUALIFIED STAFF

MDE must provide MDHHS with documentation that enrolled ISDs meet the regulatory requirements set forth for all staff providing services in the school setting.

Enrollment as a provider is predicated on certification to MDE that the educational and experiential requirements and credentials of all staff (i.e., licensure, certification, registration, etc.) who may be performing claimable activities have been met and are current. MDE will assist any ISD/LEA in this certification process and verify the status of its certification in writing, along with recommendations, with a copy sent to MDHHS.

4.3 MEDICAID ELIGIBILITY RATE

Michigan's RMTS activity codes are designed to reflect the actual direct medical and behavioral health services activities that occur in an ISD/LEA on any given day. Since these services are provided for students who are both Medicaid and non-Medicaid eligible, it is necessary to develop and apply a formula that properly allocates which students are being supported and what services are being provided. For this reason, it is necessary to calculate two separate Medicaid eligibility rates.

4.3.A. C4S MEDICAID ELIGIBILITY RATE (MER)

The C4S Medicaid Eligibility Rate (MER) percentage is determined by the percentage of the public student population that are Medicaid eligible in each ISD in comparison to the total student population in the ISD. The eligibility rate is determined once each year utilizing the Student Count Report. The calculation for the C4S eligibility rate is as follows:

$$\frac{\text{Medicaid Eligible Students}}{\text{Total Student Population}}$$

4.3.B. DSC MER

The DSC MER percentage is determined by the percentage of the special education student population with a health-related support service in their IEP/IFSP/NPSP that are Medicaid eligible in each ISD in comparison to the total special education student population with a health-related support service in the ISD. The MER is determined once each year utilizing the Student Count Report. The calculation for the DSC eligibility rate is as follows:

$$\frac{\text{Medicaid eligible Special Education Students with a health-related support service in their IEP}}{\text{Total Special Education Students with a health-related support service in their IEP}}$$

SECTION 5 – FINANCIAL DATA REQUIREMENTS AND UNALLOWABLE COSTS

5.1 FINANCIAL DATA

The financial data reported for Direct Medical Services (salaries, benefits, supplies, etc.) must be based on actual detailed expenditure reports obtained directly from the participating ISD's financial accounting system and be directly attributable to staff that are included on the staff pool lists. The financial accounting system data is applied using generally accepted governmental accounting standards and principles or applicable administrative rules. The expenditures accumulated for calculating the Direct Medical Services allowable costs are to include actual non-federal expenditures incurred during the claiming period. These allowable expenditures include such things as salaries, wages, fringe benefits, medically-related supplies, purchased services and materials.

5.2 UNALLOWABLE COSTS

Providers are not allowed to report any costs that are federal funds, State flow-through funds, or non-federal funds that have been committed as local match for other federal or State funds or programs.

Claims for approved Medicaid SSP functions may not include expenditures of:

- Federal funds received by the ISD/LEA directly
- Federal funds that have been passed through a State or local agency
- Non-federal funds that were previously committed as local match for other federal or State funds or programs

Funds received by an ISD for SSP direct medical services are not federal funds. These funds are reimbursement for prior expenditures and become, upon receipt, local funds.

SECTION 6 – SCHOOL SERVICES PROGRAM REIMBURSEMENT

6.1 METHOD OF REIMBURSEMENT FOR DIRECT MEDICAL SERVICES, PERSONAL CARE SERVICES AND TARGETED CASE MANAGEMENT

Payment for Michigan's SSP is a cost-based, provider-specific, annually reconciled, and cost settled reimbursement methodology.

CMS also requires Michigan SSP providers to submit procedure-specific direct medical services claims for all Medicaid allowable services. These claims do not generate a payment but are required by CMS in order to monitor the services provided, the eligibility of the student, and provide an audit trail. Interim monthly payments are tied to the submission of the direct medical services claims. If claim volume decreases significantly or drops to zero in any two consecutive months, all interim payments will be held until the provider is contacted and the issue resolved. MDHHS will monitor provider claim volume to make sure that this mandate is followed.

Claims are submitted and processed through CHAMPS; however, the procedure code fee screens are set to pay zero. SSP providers receive their cash flow from the interim monthly payment process described below.

The interim monthly payments are based on prior year actual costs and reconciled on an annual basis to the current year costs. Cost reporting and reconciliation are based on the school fiscal year which is July 1 through June 30 of each year.

The reimbursement process for direct medical services is comprised of the following parts:

- The SSP direct medical services procedure code-specific billing process;
- The RMTS component;
- The interim payment process; and,
- The cost reconciliation and cost settlement process.

6.1.A. DIRECT MEDICAL SERVICES PROCEDURE CODE-SPECIFIC BILLING

Providers must continue to submit procedure-specific claims in addition to the expenditure reports. The procedure-specific process is described in the Covered Services Section of this chapter.

Claim documentation must be sufficient to identify the student clearly, justify the diagnosis and treatment, and document the results accurately. Documentation must be adequate to demonstrate that the service was provided and that the service followed the student's POC.

The ISD may either purchase software for the claims submission function or it may utilize the services of a billing agent. The cost of claim submission is the responsibility of the ISD.

6.1.B. RANDOM MOMENT TIME STUDY (RMTS)

For the RMTS, all ISDs are required to utilize the services of the State Contractor who will conduct the statewide time studies.

The quarterly RMTS sampling results are produced by the State Contractor who converts the results to percentages. This percentage is applied to program costs to determine reimbursement. Once complete, the time study results are provided to MDHHS where they are uploaded into the cost settlement program.

Costs are reported for direct medical services and specialized transportation services on the LEA Cost Report and collected via financial worksheets for PCS and TCM.

The MDHHS Hospital and Clinic Reimbursement Division combines all cost information and the RMTS results, the indirect cost rate, and the MER to calculate the total allowable costs. The MDHHS Hospital and Clinic Reimbursement Division performs the reconciliation and cost settlement process.

The ISD and/or State Contractor must comply with all conditions set forth by MDHHS as SSP policy.

The cost for the State Contractor is charged back to the ISDs based on the State Contractor's projected cost per ISD (after federal match).

For detailed description and instructions regarding the Random Moment Time Study, refer to the School Services Program Random Moment Time Study Appendix of this chapter.

Summer Quarter Process

A weighted average of the three time study results for the staff pool periods listed below is applied to the LEA Cost Report total costs. The LEA Cost Report costs include the annual costs associated with the direct medical services, PCS, and TCM services.

The direct medical services time study application is comprised of the following elements:

Cost Pool	The costs from the annual LEA Cost Report (direct medical services, TCM, and PCS).
RMTS	A weighted average of the October–December, January–March, April–June and the summer time study results as described above.

6.1.C. INTERIM PAYMENT PROCESS

Interim payments are calculated based on an estimated monthly cost formula. The monthly cost formula utilizes prior year costs plus any inflation or program changes to calculate a monthly interim reimbursement amount. After the final cost reports have been reviewed and reported to MDHHS, reconciliation will be performed and settlements will be made to make the ISDs whole.

Medicaid Provider Manual

Interim payments are issued on the first pay cycle of each month based on prior year costs.

To justify an increase in the interim payment, ISDs must submit written documentation of significant changes in coverage, service utilization or staff costs.

ISDs may request an increase or decrease in their interim payment amount at any time throughout the year. Instructions and contact information will be included with the LEA Cost Report. Any written inquiries should be addressed to the MDHHS Hospital and Clinic Reimbursement Division (HCRD). (Refer to the Directory Appendix for contact information.)

All payments and adjustments are issued by the MDHHS Hospital and Clinic Reimbursement Division. Once the payments are issued to ISDs, how the interim payment revenue is distributed to the respective LEAs and how the initial and final settlements are handled is at the discretion of the ISD.

6.1.D. COST RECONCILIATION AND SETTLEMENT

Allowable cost will be based on the following components:

- Costs from the LEA Cost Report
- TCM and PCS Financial Worksheets
- MDE Indirect Cost Rate
- RMTS Percentage
- Health-Related IEP Medicaid Eligibility Rate (IEP MER)
- Federal Medical Assistance Percentage (FMAP)

The LEA Cost Report is utilized to collect allowable costs for the medical professional staff. Costs for staff providing TCM services and PCS that are not included in the direct medical costs are obtained from the participating ISD's financial accounting system via financial information submitted by the ISD/LEA.

To report direct service-related costs, ISDs will utilize the LEA Cost Report. The LEA Cost Report is available in CHAMPS within the Facility Settlement (FS) subsystem. Documentation and instructions are available by accessing the information button and worksheets within the FS subsystem. Worksheets may be extracted through an Excel extract at any time. After submission of the LEA Cost Report, the ISD shall review and approve the submission. Once approved, the ISD may calculate the ISD Cost Report

which, using the LEA Cost Reports, will compile and calculate the data used to reimburse for SSP costs. Access and authorization are administered through CHAMPS and also maintained through MiLogin user access. MiLogin registration instructions are also available on the SSP Provider Specific webpage. (Refer to the Directory Appendix for website information.)

The filed cost data is used to calculate an initial settlement within 90 days after the receipt of the initial cost report data. The initial settlement may result in either an over- or under-adjustment to the provider interim payment.

The final settlement process will begin within 12-18 months after the close of the school fiscal year. Settlements may take several months for completion.

ISDs may submit revisions until the final settlements are processed.

6.2 METHOD OF REIMBURSEMENT FOR SPECIALIZED TRANSPORTATION

6.2.A. REIMBURSEMENT

Specialized transportation costs reported on the MDE Transportation Expenditure Report (form SE-4094) are only the costs associated with the special education buses, taxis or private vehicles used for the specific purpose of transporting only special education children. This report does not include any federal dollars.

Medicaid-allowable specialized transportation costs include the following costs from the SE-4094:

- Salaries [Sec. 52 & Sec. 53a]
 - Bus Drivers
 - Aides
 - Employee Benefits (Bus Drivers and Aides only)
- Purchased Services – Staff (Bus Drivers and Aides only)
- Purchased Services – Vehicle-Related Costs [Sec. 52 & Sec. 53a]
 - Pupil Transportation by Carrier
 - Pupil Transportation by Carrier (b/y)
 - Family Vehicle Cost
 - Contracted Taxis
 - Pupil Transportation Fleet Insurance
 - Contracted/Leased Buses
- Supplies [Sec. 52 & Sec. 53a]
 - Gasoline/Fuel
 - Oil/Grease

Medicaid Provider Manual

- Tires/Batteries
- Other Expense/Adjustments, only the costs associated with adjustments to allowable costs
- Bus Amortization

For reimbursement purposes, Bus Aides are defined as aides who ride on the bus providing care to those students being transported, assisting with the specific health concerns documented in the student's IEP/IFSP.

6.2.B. SPECIALIZED TRANSPORTATION RECONCILIATION AND SETTLEMENT

On an annual basis, the cost per trip is calculated by dividing the total Medicaid allowable costs (including indirect cost) by the total ISD-reported special education (specialized) one-way transportation trips. The cost per trip is multiplied by the quantity of Medicaid "allowable" one-way trips gleaned from CHAMPS to arrive at the Medicaid allowable cost.

An "allowable" one-way trip is one that is provided to a Medicaid-eligible student and fulfills all of the following requirements:

- Documentation of ridership is on file;
- The need for the specialized transportation service is identified in the student's IEP/IFSP; and
- A Medicaid-covered service (other than transportation) is provided on the same date of service. The Medicaid-covered service must also be documented in the IEP/IFSP.

The cost settlement is accomplished by comparing the interim monthly payment totals to the annual Medicaid allowable specialized transportation cost. The cost settlement amount for specialized transportation is combined with the cost settlement amounts for Direct Medical Services, TCM, and PCS; any over-/under-adjustments are processed as one transaction.

Medicaid Provider Manual

SECTION 7 – INDIRECT COST RATE (ICR)

7.1 INDIRECT COSTS

The ISD/LEA unrestricted indirect cost rate is calculated using the Federal Office of Management and Budget (OMB) Title 2 CFR Part 200. The methodology used to determine the indirect cost rate specific to each ISD is approved by the Federal cognizant agency. The indirect cost rates are updated annually by MDE.

SECTION 8 – COST CERTIFICATION

8.1 COST CERTIFICATION

Once all cost reports and financial worksheets have been received by MDHHS, the summary report of the LEA Cost Report will be completed. The summary report will combine the allowable cost data submitted by the ISDs for each LEA for all four cost pools (Direct Medical, Specialized Transportation, Personal Care and Targeted Case Management). The total will be entered into the cost certification form as the "Total Computable Expenditure". The ISD is responsible for annually certifying that the total amount of expenditures for covered services has been expended and that none of the expenditures were used as match for other programs or services. This is accomplished in CHAMPS when submitting cost in the LEA Cost Report or may be submitted manually if requested by the State of Michigan.

SECTION 9 – COST ALLOCATION FACTORS

9.1 FEDERAL MEDICAL ASSISTANCE PERCENTAGE (FMAP) RATE

Federal regulations allow for payments to states on the basis of a FMAP for part of their expenditures for services under an approved State Plan. The formula for calculating this annual percentage is described in section 1905(b) of the Social Security Act. Under the formula:

- If a state's per capita income is equal to the national average per capita income, the federal share is 55%.
- If a state's per capita income exceeds the national average, the federal share is lower, with a statutory minimum of 50%.
- If a state's per capita income is lower than the national average, the federal share is increased, with a statutory maximum of 83%.

9.2 ALLOCATION OF SALARIES AND BENEFITS OF PERSONNEL PROVIDING DIRECT CARE SERVICES

Actual expenditures for salaries and benefits of all personnel are to be obtained from each participating ISD's financial accounting system. Expenditures related to the performance of approved Medicaid contracted service providers (e.g., OTs, PTs) who also provide direct care services must also be obtained from each participating ISD's financial accounting system.

SECTION 10 – DOCUMENTATION

10.1 DIRECT MEDICAL SERVICES DOCUMENTATION

For covered services, the student's school clinical record must include all of the following:

- Student name and birth date;
- Attendance records, confirming that services requiring the student to be in attendance have supporting documentation on file;
- Date of service/treatment;
- Type (modality) of service/treatment;
- The response to the service/treatment; and
- The name and title of the person providing the service/treatment and a dated signature, including electronic signature.

For services that have time-specific procedure codes, the provider must indicate the actual begin and end times of the service in the student's school clinical record. The record must indicate the specific findings or results of the diagnostic or therapeutic procedures. The student's school clinical record should include documentation of the implementation and coordination of services for the special education student.

Progress notes must be written monthly, or more frequently as appropriate, and must include:

- Evaluation of progress;
- Changes in medical or mental status; and
- Changes in treatment, with rationale for change when determined to be necessary.

(Refer to the General Information for Providers Chapter of this manual for additional information regarding clinical record requirements.)

10.2 RMTS DOCUMENTATION

Each participating ISD/LEA must maintain a separate audit file for each quarter billed. The following minimum documentation is required:

- Financial data generated by the ISD/LEA's financial accounting system to establish cost pools and factors.
- A copy of the quarterly sample results produced by the State Contractor.
- A copy of the warrant, remittance advice or Electronic Funds Transfer (EFT) documentation verifying that payment from MDHHS was received.

ISDs/LEAs must cooperate fully with any reviews requested by MDHHS and CMS, and maintain all necessary records for a minimum of seven (7) years.

Michigan Department of Health and Human Services

Medicaid Provider Manual

Any changes in federal regulations related to claims for administrative expenditures are incorporated by reference into this document.

SECTION 11 – AUDIT AND RECOVERY PROCEDURES

11.1 DIRECT SERVICE/TRANSPORTATION PROGRAM AUDIT ACTIVITIES TO BE PERFORMED BY MDHHS AUDIT DIVISION

MDHHS audit review of selected ISD cost reports for the SSP may include the following activities:

- Verification that the LEA Cost Report accurately reports the allowable costs incurred for the appropriate period.
- Verification that the salaries and benefits listed for employees/positions included in the RMTS staff pool match the payroll records for the same period as the time study.
- A review of the salaries and benefits of employees who changed positions during the time study period.
- If a replacement was hired/transferred, the auditor will verify that only the salary earned while working in a position on the LEA Cost Report staff pool list was reported, and that salaries and benefits for both the original and replacement employees were not duplicated on the report for the same time period.
- Confirmation that none of the direct costs reported were also claimed as an indirect cost, that the proper indirect cost rate was used, and the rate was applied only to costs in the base. Employees in non-standard job categories are the most likely to be considered indirect type employees; therefore, documentation will be reviewed for these individuals.
- Verification that no federal funds were claimed on LEA Cost Reports and that LEA Cost Report costs were not accepted for cost-sharing.
- A standard review of other areas, such as confirmation that reported costs were actually paid, support documentation was maintained as required, and costs were properly charged to the correct accounts should also be expected.
- Any other area deemed necessary.

The ISD should be prepared to direct the auditor to any document used to support and identify the reported LEA Cost Report costs.

11.2 STUDENT CLAIMS AUDIT ACTIVITIES TO BE PERFORMED BY MDHHS AUDIT DIVISION

MDHHS audit review of selected ISDs for approved SSP student claims may include the following activities:

- Verification that appropriate prescriptions/referrals/authorizations are updated annually and ordered by the appropriate individual.
- Verification that occupational, physical, and speech, language and hearing therapy address a student's medical need that affects their ability to learn in the classroom environment.
- Confirmation that services requiring the student to be in attendance have support documentation (i.e., attendance records) on file.
- Confirmation that the providers performing the service have the required licensure/certification.

Medicaid Provider Manual

- Verification that the providers requiring supervision, both "under the direction of" and "under the supervision of", have the necessary support documentation on file.
- Verification that the student receiving special education transportation also received a Medicaid-covered service on the same day. In addition, the support documentation for specialized transportation includes an ongoing trip log maintained by the provider of the special education transportation.
- Confirmation that support documentation for PCS includes a completed, signed and dated monthly activity log.
- Verification that group therapy or treatment was provided in groups of two to eight, including noting the specific number of students in the group therapy session.
- A standard review of the POC areas, such as the inclusion of a description of the student's qualifying diagnosis and medical condition, time-related goals that are measurable and significant to the student's function and/or mobility, and anticipated frequency and duration of treatment required to meet the time-related goals.
- Any other area deemed necessary.

The ISD should be prepared to direct the auditor to any document used to support and identify the reported student claims.

11.3 AUDIT ACTIVITIES TO BE PERFORMED BY MDHHS AUDIT DIVISION STAFF

MDHHS audit review of selected ISD cost reports for the Administrative Outreach Program (AOP) may include the following activities:

- Verification that the salaries and benefits listed for employees/positions included in the RMTS staff pool match the payroll records for the same period as the time study.
- A review of the salaries and benefits of employees who changed positions during the time study period.
- If a replacement was hired/transferred, the auditor will verify that only the salary earned while working in a position on the AOP staff pool list was reported, and that salaries and benefits for both the original and replacement employees were not duplicated on the report for the same time period.
- Verification that any other salaries, benefits, and costs for supplies, etc. are of direct benefit to the employees on the staff pool list and, therefore, allocable to the AOP in the same percentage as the AOP-eligible employees.
- Confirmation that none of the direct costs reported were also claimed as an indirect cost, that the proper indirect cost rate was used, and the rate was applied only to costs in the base. Employees in non-standard job categories are the most likely to be considered indirect type employees; therefore, documentation will be reviewed for these individuals.
- Verification that no federal funds were claimed on AOP cost reports and that AOP costs were not accepted for cost sharing.

Medicaid Provider Manual

- A standard review of other areas, such as confirmation that reported costs were actually paid, support documentation was maintained as required, and costs were properly charged to the correct accounts should also be expected.
- Any other area deemed necessary.

The ISD should be prepared to direct the auditor to any document used to support and identify the reported AOP costs.

11.4 AUDIT FINDINGS AND RESOLUTION

Audit findings and resolution will include the following:

- Identified overstatement of expenditures on the LEA Cost Report will require the revision of the LEA Cost Report and a revised final settlement for all specifically identified overstatements.
- For claim error rates in excess of the materiality threshold percentage, as established by MDHHS, the recovery will be any excess percentage greater than materiality threshold multiplied by total Medicaid paid to the ISD during the period covered by the audit.

Recoveries and re-filings are limited to fiscal years considered within three years from the last date of payment for that period.

SECTION 1 - CLAIMS DEVELOPMENT OVERVIEW

Using the State of Michigan's competitive bid process, MDHHS will select one State Claims Development Contractor to implement and administer the random moment time study (RMTS). The State Claims Development Contractor will also provide the intermediate school districts (ISDs) the option of performing certain time study responsibilities and claims development activities on behalf of those ISDs that choose to participate in this portion of the State contract and pay for these services.

1.1 CLAIMS DEVELOPMENT ENROLLED PROVIDERS

All participating ISDs will be required to utilize the services of the State Claims Development Contractor, who will conduct statewide time studies and develop and submit claims on the ISD's behalf each quarter.

The State Claims Development Contractor will develop an implementation plan on behalf of the ISDs to conduct the statewide time studies each quarter utilizing the claims development software, as well as complete all other key functions required for valid claim development.

The cost for the State Claims Development Contractor will be charged back to providers who participate in this option based on the State Claims Development Contractor's projected cost per ISD (after federal match).

1.2 OVERVIEW OF CLAIMS DEVELOPMENT PROCESS

Based on federal and state statutes and regulations, below is a partial list of specific functions and tasks that must be accomplished for reimbursement of SSP Administrative Outreach Program services. Additional details appear in subsequent sections of this chapter.

Claims will be developed by the State Claims Development Contractor utilizing the claims development software following these basic steps:

- The quarterly RMTS sampling results are produced by the State Claims Development Contractor, who converts them to percentages. The percentages are applied to program costs to determine reimbursement.
- The cost/claim generation component of the claims development software uses ISD costs and other claim factors to calculate and produce the claim.
- The claim is submitted to MDHHS.
- The ISD or ISD contractor must comply with all conditions set forth by MDHHS as School Services Program (SSP) policy.

SECTION 2 - CLAIM CALCULATIONS

2.1 SANCTIONS

It is the intent of the State Medicaid Agency to pursue, when necessary, remedial action or implement a corrective action plan if the State Claims Development Contractor or the ISD are not in compliance with SSP Administrative Outreach Program published policy. If this is not successful, a contract payment freeze will be implemented, and sanctions will be put in place until the matter is resolved. Those independent ISDs not participating in the State's claims development contract will be held accountable for their vendor's actions.

The following are examples of causes for implementation of sanctions for all ISDs. The list is not all-inclusive.

- Failure to complete minimum threshold of sampled moments each quarter.
- Repeated errors in filing of the claims.
- Providing insufficient data or incomplete reports to the State Claims Development Contractor.
- Failure to cooperate with, or submit requested information, reports, or data to, the State Claims Development Contractor, CMS, MDHHS, MDE, and other staff involved during site visits, reviews or audits.

2.2 FACTORS FOR CLAIMS DEVELOPMENT

MDHHS will submit quarterly claims on behalf of all participating ISDs to CMS. Each claim will be based on the following factors: The allowable financial expenditures, percentage of time claimable to SSP Administrative Outreach Program administration, the Federal Financial Participation (FFP) rate, the Medicaid indirect cost rate, and the Medicaid eligibility rate for that individual ISD.

2.2.A. ALLOWABLE FINANCIAL EXPENDITURES

These expenditures consist of the actual costs incurred for the quarter being claimed, such as salaries, benefits, and contracted staff costs for staff included in RMTS staff pools for the corresponding time period. Each participating ISD must certify that the claim submitted to MDHHS contains sufficient non-Federal (State, county, or local) funds to match requirements and that the claim only includes actual costs.

2.2.B. FEDERAL FINANCIAL PARTICIPATION RATE

Federal regulations allow for a reimbursement rate of 50 percent for most Medicaid administrative activities. (Note that Medicaid-related translation has a 75 percent FFP.)

2.2.C. MEDICAID ELIGIBILITY RATE

The Medicaid eligibility rates (MER) are determined by the percentage of the population in each ISD who are actual Medicaid beneficiaries. The MER will be determined once each year and applied to certain activities in the claim calculation formula. To calculate the MER, the claiming entity will obtain the Fall pupil count report list from the Center for

Medicaid Provider Manual

Educational Performance and Information (CEPI). The pupil count list will include the pupil's name and date of birth. MDHHS will provide a method for using the list to verify the number of Medicaid-eligible pupils. This number will be used in a calculation with the total pupil count to determine the percentage of Medicaid-eligible pupils in the ISD.

Based on the above factors, the claim that is sent to Medicaid is calculated as follows:

Fall, Winter and Spring Quarter Formulas for Calculating Administrative Outreach Claims

Allowable Financial Expenditures, Including Indirect Costs (salaries, overhead, etc.)	X	% time claimable for Medicaid outreach activities from time studies	X	Discounted by the Medicaid eligibility rate (MER)	X	% Federal Financial Participation (FFP) rate	=	The amount of the claim submitted for Medicaid reimbursement
---	---	---	---	---	---	--	---	--

Summer Quarter Formulas

Allowable Financial Expenditures, Including Indirect Costs (salaries, overhead, etc.)	X	Average % of time claimable for Medicaid outreach activities from the previous three quarters	X	Discounted by the Medicaid eligibility rate (MER)	X	% Federal Financial Participation (FFP) rate	=	The amount of the claim submitted for Medicaid reimbursement
---	---	---	---	---	---	--	---	--

- Salary and related costs of all staff eligible for the time study are included in the cost pool, along with other allowable overhead.

2.3 FINANCIAL DATA

The financial data reported on employee basis (salaries, benefits, contracted staff costs, supplies, etc.) must be based on actual detailed expenditure reports obtained directly from the participating ISD's financial accounting system. The financial accounting system data is applied using generally accepted governmental accounting standards and principles or applicable administrative rules. The expenditures accumulated for calculating the Administrative Outreach claim are to be reported using cash-basis accounting. Include only actual expenditures incurred during the claiming period.

Medicaid Provider Manual

2.4 RMTS DOCUMENTATION AND RECORDKEEPING/AUDIT FILE REQUIREMENTS

Each participating ISD will maintain a separate audit file for each quarter billed. The following minimum documentation is required:

- Financial data used to establish cost pools and financial data at the employee level with accounting detail.
- A copy of the warrant, remittance advice or Electronic Funds Transfer (EFT) documentation verifying that reimbursement from MDHHS was received.

ISDs must cooperate fully with any review requested by MDHHS and CMS, and maintain all necessary records and supporting documentation for a minimum of seven (7) years after submission of each quarterly claim.

2.5 NON-PUPIL SPECIFIC/PRE-MEDICAID ELIGIBILITY DETERMINATION

Additional Administrative Outreach activities and expenditures not related to a specific pupil are approved by Medicaid for claiming. These activities are:

- Provided to the entire "at-risk" population,
- Not identifiable to individual pupils, and
- Provided before Medicaid eligibility is determined.

These activities are to be allocated to the approved Medicaid Administrative Outreach claim based on the results of the time study conducted during the claiming period.

2.6 PUPIL-SPECIFIC ADMINISTRATIVE OUTREACH FUNCTIONS EXPENDITURES

There are some Administrative Outreach functions that are identifiable to individual pupils after Medicaid eligibility has been determined. These functions are to be allocated in the administrative claim based on both the time study results conducted during the claiming period and the applicable discounted MER.

2.7 NON-SALARY EXPENDITURES

Expenditures for materials and supplies related to the approved Medicaid Administrative Outreach activities may be included in the claim if they can be attributed directly to staff members who are claimed. The principles for claiming expenditures and cost allocation, including correct depreciation of assets as published in the Federal Office of Management and Budget (OMB) Title 2 CFR Part 225, must be followed. Examples include conference fees, registration fees, mileage, printing fees (i.e., for business cards), furniture, equipment, copy machine expenses, etc. Such expenditures are to be based on actual detailed departmental expenditure reports obtained directly from the participating ISD's financial accounting system. These expenditures may not include items identified as indirect costs, such as central business office operations, general building maintenance and repair costs, or any other costs classified as an indirect cost.

Medicaid Provider Manual

2.8 INDIRECT COSTS

Allocable indirect costs are the product of the ISD aggregate, calculated, approved Medicaid Administrative Outreach claim amount, multiplied by the ISD and LEA Medicaid indirect cost rate, as approved annually by the Michigan State Board of Education (MSBE). The ISD/LEA Medicaid indirect cost rate is calculated using the Federal Office of Management and Budget (OMB) Title 2 CFR Part 225. The methodology used to determine the indirect cost rate is specific to each ISD, as approved by the Federal cognizant agency. Indirect cost rates are updated annually by MDE.

2.9 CLAIM CERTIFICATION

The accuracy of submitted claims must be certified by the chief financial officer, the superintendent of the ISD, or the ISD designee. Such certification is accomplished when the quarterly claim meets the requirements of 42 CFR 433.51. Detailed claim analyses and supporting documentation will be maintained by the ISD for audit or future reference purposes according to the terms identified in the State Claims Development Contractor and interagency agreement between the ISD and MDHHS.

Reimbursement will be paid after the claim has been submitted to, reviewed by, and determined to be acceptable and accurate by MDHHS and CMS.

2.10 CLAIM AMENDMENTS

In the event that an error in the claim process has been identified, it is the responsibility of the ISD to notify the State Claims Development Contractor. The State Claims Development Contractor will open an amendment to the quarterly claim for which the error was identified. The ISD will correct the error by amending the previously filed financial data. After the data is submitted, a new claim will be calculated for the period. The ISD will review and certify the claim using the same process as the original submission. The adjustment will be filed with the next claim submission to MDHHS and the adjustment will be processed with the current quarterly submission. The current reimbursement will reflect the current reimbursement and any adjusted reimbursements.

2.11 FISCAL PROVISIONS

ISDs must use an appropriate revenue code to identify Medicaid Administrative Outreach Program funds within their accounting records.

2.12 SUBMISSION OF CLAIMS

All claims are to be submitted in accordance with the reporting requirements established by MDHHS. It is imperative that ISDs work closely with the State Claims Development Contractor to provide pertinent financial, enrollment, and personnel data and meet their deadlines and any other technical specifications.

Medicaid Provider Manual

2.13 PERIODICITY OF REPORTING

The ISD must submit claims for expenditures related to approved Medicaid Administrative Outreach activities to MDHHS on a quarterly basis. The claim is due to MDHHS on or before 120 calendar days after the end of the reporting quarter.

Timeframes to Submit Administrative Outreach Claims to MDHHS

	REPORTING PERIOD		CLAIM DUE TO MDHHS	CLAIM SUBMITTED TO CMS BY MDHHS
	BEGIN DATE	ENDING DATE

SECTION 1 – GENERAL TIME STUDY INFORMATION

This chapter describes the random moment time study (RMTS) process for the School Services Program (SSP) direct medical services program.

In accordance with the Centers for Medicare & Medicaid Services (CMS) reimbursement policy, some activities performed by medical professionals and Intermediate School District (ISD) staff in a school-based setting are eligible for federal matching funds. These activities may be performed by staff with multiple responsibilities. CMS reimbursement requirements include the use of RMTS as a component of the Medicaid reimbursement methodology. The time study results are used to determine the amount of staff time spent on Medicaid-allowable activities. One statewide time study per staff pool is performed each quarter.

1.1 ADMINISTRATIVE OUTREACH PROGRAM ACTIVITIES

The School Services Program Administrative Outreach Program (AOP) offers reimbursement for the cost of administrative activities that support efforts to identify and enroll potentially eligible students into Medicaid and that are in support of the state Medicaid plan.

The activities fall into several categories:

- Medicaid Outreach
- Facilitating Medicaid Eligibility Determinations
- Health-related Referral Activities
- Medical Service Program Planning, Policy Development, and Interagency Coordination
- Programmatic Monitoring and Coordination of Medical Services
- Transportation and Translation Services

1.2 DIRECT MEDICAL SERVICES

Medicaid-covered services that are medically necessary and specified in the beneficiary's Individualized Education Program (IEP), Individualized Family Service Plan (IFSP), Non-Public Service Plan (NPSP), or other plans in which medical necessity has been established include:

- Occupational Therapy Services
- Orientation and Mobility Services
- Physical Therapy Services
- Assistive Technology Device Services
- Speech, Language and Hearing Services
- Psychological, Behavioral Health, Counseling and Social Work Services
- Developmental Testing Services
- Nursing Services

Medicaid Provider Manual

- Physician and Psychiatric Services
- Personal Care Services
- Targeted Case Management Services (Direct Service Claiming [DSC] only)

1.3 STAFF POOLS AND CONFIDENCE LEVELS

The RMTS is carried out utilizing customized claims development software that automates aspects of the school district time study process. The claims development software is comprised of three components: sampling/staff pool lists, training, and cost/claim generation. All ISDs are required to utilize the services of the State's RMTS and Claims Development Contractor (hereafter referred to as the Contractor). The Contractor conducts the statewide time studies, produces the implementation plans and reports, and develops and submits the claims on behalf of the 56 ISDs, Detroit Public Schools Community District (DPSCD) and Michigan School for the Deaf (MSD) [hereafter referred to as "ISDs"].

Time studies will be carried out over the following staff pools:

- AOP Only Staff – This staff pool consists of individuals who perform only administrative outreach activities. They do not perform any direct medical activities.
- AOP & Direct Medical Staff – This staff pool consists of individuals who perform both direct medical activities and AOP activities.
- Personal Care Services Staff – This direct medical only staff pool consists of individuals who perform direct care Personal Care Services.
- Targeted Case Management Services Staff – This direct medical only staff pool consists of individuals who perform Targeted Case Management (TCM) Services and pertains to the DSC component of the program only.

The RMTS results identifying the percentage of claimable time are applied to the allowable correlating cost pool. All staff pools are mutually exclusive.

The sample size of each cost pool ensures a quarterly level of precision of +/- 2 percent with at least a 95 percent confidence level, and an annual level of precision of +/- 2 percent with at least a 95 percent confidence level.

Valid moments are completed moments that have been received by the Contractor and determined to be complete and accurate. Invalid moments are moments that are assigned to staff who are no longer in the position as selected, moments that are outside of paid work hours, and moments not returned for any other reason.

As long as the completed observation rate meets or exceeds 85 percent, missing observations will be dropped from all calculations. Should the completion rate fall below 85 percent, missing observations will be included as non-matchable.

Medicaid Provider Manual

SECTION 2 – CENTRALIZED CODING

The Contractor is responsible for coding the time study moments. MDHHS oversees the Contractor and ISDs participating to ensure their compliance with all aspects of program policy and federal regulations.

SECTION 3 – TIME STUDY METHODOLOGY

3.1 RANDOM MOMENT TIME STUDY OVERVIEW

The time study design logs only what the participant is doing at one moment in time. A random moment consists of one minute of work done by one employee, both chosen at random, from among all such minutes of work that have been scheduled for all designated staff statewide.

The RMTS measures the work effort of each group of approved participants involved in the time study process by sampling and analyzing the work efforts of a randomly selected cross-section of each staff pool. The RMTS methodology employs a technique of polling participants at random moments over a given time period and tallying the results of the polling over that period. The method provides a statistically valid means of determining the work effort being accomplished in each program of services. The sampling period is defined as the three-month period comprising each federal quarter of the year, except for the summer quarter (July through September) which uses the RMTS averages of the other three quarters.

The Contractor will use the claims development software to conduct the statewide time studies each quarter. This software produces random moments concurrent with the entire reporting period which are then paired with randomly selected participants of the designated staff pool population. The sampling is constructed to provide each participant in the pool with an equal opportunity or chance to be included in each sample moment. Sampling occurs with replacement so that after a staff person and a moment are selected, the staff person is returned to the potential sampling universe. Therefore, each staff person has the same chance as any other participant to be selected for each moment, which ensures true independence of sample moments.

Once the random sample of staff moments has been generated, the sample is printed in the form of master and location control lists for sample administration purposes, and as time study forms for collecting the moment data. Each sampled moment is identified on its respective control list in chronological order by the name of the staff person to be sampled and the date and time at which the recording should take place.

3.1.A. LONG-TERM SUBSTITUTES

Long-term substitute staff replacing permanent staff on leave may be added to the staff pool lists. The following criteria apply when long-term substitutes are utilized:

- A long-term substitute staff must be employed by the ISD/Local Educational Agency (LEA) for at least 30 calendar days within the quarter.
- The ISD/LEA may report the name of the long-term substitute staff any time after the sampling moments are distributed.
- The long-term substitute staff must meet all of the program requirements and provider qualifications necessary to participate in the Medicaid School Services Program staff pool.
- If listed on the staff pool list, the substitute staff must complete the time study moment.
- The cost reflected should be the sum of the cost of the regular staff on leave and the long-term substitute staff.

Medicaid Provider Manual

- All audit liability for the financial data reported and the tracking of the moments is the responsibility of the ISD/LEA reporting entity.
- All staff whose costs are included in the cost pool, including long-term substitutes, must be included in the sample universe for the time study.

3.2 RANDOM MOMENT TIME STUDY FORM COMPLETION

There are two steps to completing a time study form:

- In the first step, for the designated moment, the time study participant provides the answers to the questions. These questions relate to their activities at the time of their randomly selected moment.
- In the second step, the time study forms are collected from the participants, and the Contractor assigns the appropriate activity code for that moment based on the answers to the study questions.

The Contractor conducts the statewide time studies each quarter for all ISDs and produces a report detailing the results. This involves importing clinician information from the ISDs to compile the statewide pool of all eligible time study participants for each staff pool list. There are four separate staff pools sampled for the RMTS each quarter: 1) the AOP only staff pool, 2) the AOP and Direct Medical Services staff pool, 3) the Personal Care Services staff pool, and 4) the Targeted Case Management Services staff pool. Currently, the Direct Medical Services and the Targeted Case Management Services staff pools have 3,000 moments randomly selected per quarter, and the Personal Care Services staff pool has 3,200 moments randomly selected per quarter. The State and the Contractor review compliance every quarter and may adjust sample sizes as necessary for compliance purposes. The participant's name that is associated with each moment is placed on a time study form. The Contractor distributes the control lists of their selected staff and the time study forms to the ISDs prior to the beginning of the reporting period. The Contractor is also responsible for the collection of all time study forms for the ISDs.

The Contractor monitors the status of each time study form so that appropriate follow-up emails are made for delinquent moments or missing data. The ISD is responsible for monitoring time study completion. The time study is electronically completed in the Contractor's system. At the end of the sampling period after all data has been collected and tabulated, statistical validity reports will be produced by the Contractor. These reports will verify that a sufficient number of personnel were sampled to ensure time study results that have a confidence level of at least 95 percent quarterly, with a precision level of +/- 2 percent annually.

3.3 TIME STUDY STAFF POOLS

To preserve the integrity of the RMTS process and to allow for timely process flow, school staff are given four weeks to review and return the staff pool lists and financials to the Contractor for those staff eligible to participate in each time study group. The staff pool lists must be returned as a complete file with all updates reflected. No partial staff pool list files will be accepted by the Contractor.

If staff pool lists or financials for the Direct Services, the Personal Care Services, the Targeted Case Management, or the Administrative Outreach Program (AOP) time studies are not returned to the Contractor on or before the published deadline, the ISD/LEA staff pool lists and correlating financials will

Medicaid Provider Manual

be removed from the time study and claim calculation for the affected quarter. ISD coordinators and LEA financial contact staff will be notified.

When providing the staff pool list of those eligible to participate in the time studies, school districts must certify the list of participants and activities to be claimed to ensure that all appropriate participants are submitted and that appropriate credentials are in place for billing Medicaid.

3.3.A. AOP ONLY STAFF POOL

AOP Only Staff Pool:

- Administrators
- Counselors
- Early Identification/Intervention Personnel
- Teacher Consultants
- Direct Medical Personnel who do not meet the Medicaid qualifications for direct medical service claiming

3.3.B. AOP & DIRECT MEDICAL SERVICES STAFF POOL

AOP & Direct Medical Services Staff Pool:

- Fully-Licensed Speech-Language Pathologists
- Limited-Licensed Speech-Language Pathologists under the direction of a Fully-Licensed Speech-Language Pathologist
- Limited-Licensed Speech-Language Pathologists in their Clinical Fellowship Year under the direction of a Fully-Licensed Speech-Language Pathologist
- Audiologists
- Licensed Professional Counselors
- Limited-Licensed Professional Counselors under the supervision of a Licensed Professional Counselor
- Occupational Therapists
- Occupational Therapist Assistants
- Orientation and Mobility Specialists
- Board Certified Behavior Analysts
- Board Certified Assistant Behavior Analysts
- Physical Therapists
- Physical Therapist Assistants
- Physician and Psychiatrists
- Physician Assistants

Medicaid Provider Manual

- Nurse Practitioners
- Clinical Nurse Specialists
- MDE Credentialed School Psychologist
- Fully-Licensed Psychologists
- Limited-Licensed Psychologists under the supervision of a Fully-Licensed Psychologist
- Temporary Limited-Licensed Psychologists under the supervision of a Fully-Licensed Psychologist
- Registered Nurses
- Qualified School Nurses as defined by Public Health Act 269 of 1955 as amended
- Licensed Practical Nurses
- Marriage and Family Therapists
- Licensed Master's Social Workers
- Limited-Licensed Master's Social Workers under the supervision of a Licensed Master's Social Worker

3.3.C. PERSONAL CARE SERVICES STAFF POOL

The following staff may be appropriate for inclusion in time studies if they are involved in Personal Care activities in the school setting:

- Bilingual Aides
- Health Aides
- Instructional Aides
- Paraprofessionals
- Program Assistants
- Teacher Aides
- Trainable Aides
- Behavioral Health Aides

3.3.D. TARGETED CASE MANAGEMENT SERVICES STAFF POOL – PUPILS WITH AN IEP/IFSP/NPSP ONLY

Staff with appropriate credentials, as defined in the Targeted Case Management (TCM) Services – Pupils with an IEP/IFSP Only subsection of the School Services Program Chapter, may be appropriate for inclusion in time studies if they are involved in Targeted Case Management activities in the school setting. Targeted Case Management services are only allowable when provided to students with an IEP/IFSP/NPSP.

**SECTION 4 – ADMINISTRATIVE OUTREACH AND DIRECT MEDICAL ACTIVITY CODE SUMMARY**

This section summarizes the code categories utilized for the RMTS and indicates whether they are claimable for reimbursement under the AOP only, the AOP & Direct Medical Services program (including Personal Care Services and Targeted Case Management Services), allocated across all programs, or "unallowable" (not claimable). The "unallowable" activities are those that are purely educational in nature.

These codes represent activities that may be performed by any time study participants during a typical workday. Some of these activities may be claimed under Medicaid and some may not. In the following section, examples and clarifications of each code are provided to assist with the appropriate coding of the activities.

4.1 ACTIVITY CODES

Staff Activity and Codes – the indicators below, which follow each code, provide the application of the Federal Financial Participation (FFP) rate, the allowability or non-allowability designation, and the proportional Medicaid share status of the code. In order to maintain coding objectivity by time study participants, time study sheets used by participants should not include references to rates of FFP, proportional or total Medicaid, or whether such codes are allowable or unallowable under Medicaid.

Application of FFP Rate	
50 percent	Refers to an activity that is allowable as administration under the Medicaid program and claimable at the 50 percent non-enhanced FFP rate.
75 percent	Refers to an activity that is allowable as administration under the Medicaid program and claimable at the 75 percent enhanced FFP rate.
Unallowable Activities	
U	Refers to an activity that is unallowable as administration under the Medicaid program. This is regardless of whether or not the population served includes Medicaid eligible individuals.
Application of Medicaid Share	
TM	(Total Medicaid) Refers to an activity that is 100 percent allowable as administration under the Medicaid program.
PM	(Proportional Medicaid) Refers to an activity which is allowable as administration under the Medicaid program, but for which the allowable share of costs must be determined by the application of the proportional Medicaid share (the Medicaid eligibility rate [MER] or the IEP Ratio). The Medicaid share is then determined by applying the MER or the IEP Ratio to the appropriate pupil populations.

Medicaid Provider Manual

Reallocated Activities	
R	Refers to those general administrative activities performed by time study participants which must be reallocated across the other activity codes on a pro rata basis. These reallocated activities are reported under Code 10 - General Administration. Note that certain functions, such as payroll, maintaining inventories, developing budgets, executive direction, etc., are considered overhead and, therefore, are only allowable through the application of an approved unrestricted indirect cost rate.*

4.2 UNIFORM CODES

State contractor staff should document time spent on each of the following coded activities:

Code 1.a.	Non-Medicaid Outreach – U
Code 1.b.	Medicaid Outreach – TM/50 Percent FFP
Code 2.a.	Facilitating Application for Non-Medicaid Programs - U
Code 2.b.	Facilitating Medicaid Eligibility Determination – TM/50 Percent FFP
Code 3.	School Related and Educational Activities – U
Code 4.a.	Direct Medical Services – Not Covered on a Medical Plan of Care (FFS – Non-IEP) - U
Code 4.b.	Direct Medical Services – Covered as IDEA/IEP Services (FFS – IEP) - IEP Ratio
Code 4.c.	Direct Medical Services – Covered on a Medical Plan of Care, Not Covered as IDEA/IEP Service – Medical Plan Ratio
Code 5.a.	Transportation for Non-Medicaid Services – U
Code 5.b.	Transportation-Related Activities in Support of Medicaid Covered Services – PM/50 Percent FFP
Code 6.a.	Non-Medicaid Translation – U
Code 6.b.	Translation Related to Medicaid Services – PM/75 Percent FFP
Code 7.a.	Program Planning, Policy Development, and Interagency Coordination Related to Non-Medical Services – U
Code 7.b.	Program Planning, Policy Development and Interagency Coordination Related to Medical/Medicaid Services – PM/50 Percent FFP

* Moments from Code 10. General Administration are reallocated to codes 1.b., 2.b., 5.b., 6.b., 7.b., 8.b. and 9.b. proportionally for the Administrative Outreach Program Claim. Moments from Code 10. are also proportionally reallocated to codes 4.b. and 4.c. for the annual cost report.

Medicaid Provider Manual

Code 8.a.	Non-Medical/Medicaid Training – U
Code 8.b.	Medical/Medicaid Related Training – PM/50 Percent FFP
Code 9.a.	Referral, Coordination, and Monitoring of Non-Medicaid Services – U
Code 9.b.	Referral, Coordination, and Monitoring of Medicaid Services – PM/50 Percent FFP
Code 10.	General Administration – R
Code 11.	Not Scheduled to Work- Not Included in the distribution or invalid

4.2.A. CODE 1.A. - NON-MEDICAID OUTREACH – U

This code should be used for all ISD/LEA staff when performing activities that inform individuals about non-Medicaid social, vocational and educational programs (including special education) and how to access them; describing the range of benefits covered under these non-Medicaid social, vocational and educational programs and how to obtain them. Both written and oral methods may be used. Includes related paperwork, clerical activities, and staff travel required to perform these activities.

- Informing families about wellness programs and how to access these programs.
- Scheduling and promoting activities that educate students about the benefits of healthy lifestyles and practices.
- Conducting general health education programs or campaigns that address lifestyle changes in the general population (e.g., dental prevention, anti-smoking, alcohol reduction, etc.).
- Conducting outreach campaigns that encourage students to access social, educational, legal or other services not covered by Medicaid.
- Assisting in early identification of students with special medical/dental/mental health needs through various child find activities.
- Outreach activities in support of programs that are 100 percent funded by State general revenue.
- Developing outreach materials such as brochures or handbooks for these programs.
- Distributing outreach materials regarding the benefits and availability of these programs.

4.2.B. CODE 1.B. - MEDICAID OUTREACH – TM/50 PERCENT FFP

This code should be used for staff performing activities that inform eligible or potentially eligible students about Medicaid and how to access it. Activities include bringing potentially eligible students into the Medicaid system for the purpose of determining eligibility and arranging for the provision of Medicaid services. ISDs/LEAs may only conduct outreach for the populations served by their affiliated schools, i.e., students and their parents or guardians. Examples include:

Medicaid Provider Manual

- Informing Medicaid eligible and potentially Medicaid eligible students and their parents or guardians about the benefits and availability of services provided by Medicaid (including preventive treatment and screening), including services provided through the Early and Periodic Screening, Diagnosis and Treatment (EPSDT) program.
- Developing and/or compiling materials to inform individuals about the Medicaid program (including EPSDT) and how and where to obtain those benefits. NOTE: This activity should not be used when Medicaid-related materials are already available to the schools (such as through the Medicaid agency). As appropriate, school-developed outreach materials should have prior approval of the Medicaid agency.
- Distributing literature about the benefits, eligibility requirements, and availability of the Medicaid program, including EPSDT.
- Assisting the Medicaid agency to fulfill the outreach objectives of the Medicaid program by informing individuals, students and their parents or guardians about health resources available through the Medicaid program.
- Providing information about Medicaid EPSDT screening (e.g., dental, vision) in schools that will help identify medical conditions that can be corrected or improved by services offered through the Medicaid program.
- Contacting pregnant and parenting students about the availability of Medicaid prenatal and well-baby care programs and services.
- Providing information regarding Medicaid managed care programs and health plans to students and their parents or guardians and how to access that system.
- Encouraging parents or guardians to access medical/dental/mental health services provided by the Medicaid program.

Activities which are not considered Medicaid outreach under any circumstances are: (1) general preventive health education programs or campaigns addressing lifestyle changes, and (2) outreach campaigns directed toward encouraging individuals to access social, educational, legal or other services not covered by Medicaid.

4.2.C. CODE 2.A. - FACILITATING APPLICATION FOR NON-MEDICAID PROGRAMS – U

This code should be used for staff when informing a student or their parents or guardians about programs such as Temporary Assistance for Needy Families (TANF), Food Stamps, Women, Infants, and Children (WIC), day care, legal aid and other social or educational programs and referring them to the appropriate agency to make application. The following are examples:

- Explaining the eligibility process for non-Medicaid programs, including IDEA.
- Assisting the student or their parents or guardians in collecting/gathering information and documents for the non-Medicaid program application.
- Assisting the student or their parents or guardians in completing the application, including necessary translation activities.
- Developing and verifying initial and continuing eligibility for the Free and Reduced Lunch Program.

Medicaid Provider Manual

- Developing and verifying initial and continuing eligibility for non-Medicaid programs.
- Providing necessary forms and packaging all forms in preparation for the non-Medicaid eligibility determination.

4.2.D. CODE 2.B. - FACILITATING MEDICAID ELIGIBILITY DETERMINATION - TM/50 PERCENT FFP

This code should be used for staff when assisting a student in becoming eligible for Medicaid. Includes related paperwork, clerical activities, and staff travel required to perform these activities. This activity does not include the actual determination of Medicaid eligibility. Examples include:

- Verifying a student's current Medicaid eligibility status for purposes of the Medicaid eligibility process.
- Explaining Medicaid eligibility rules and the Medicaid eligibility process to prospective applicants.
- Assisting student or their parents or guardians in completing a Medicaid eligibility application.
- Gathering information related to the application and eligibility determination for a student, including resource information and third-party liability (TPL) information, as a prelude to submitting a formal Medicaid application.
- Providing necessary forms and packaging all forms in preparation for the Medicaid eligibility determination.
- Referring a student or their parents or guardians to the local assistance office to make application for Medicaid benefits.
- Assisting the student or their parents or guardians in collecting/gathering required information and documents for the Medicaid application.
- Participating as a Medicaid eligibility outreach outstation (does not include determining eligibility).

4.2.E. CODE 3. - SCHOOL RELATED AND EDUCATIONAL ACTIVITIES – U

This code should be used for any other school related activities that are not health related, such as social services, educational services and teaching services, employment and job training. These activities include the development, coordination and monitoring of a student's education plan. Includes related paperwork, clerical activities and staff travel required to perform these activities. Examples include:

- Providing classroom instruction (including lesson planning).
- Testing or correcting papers.
- Developing, coordinating, and monitoring the academic portion of the IEP for a student, which includes ensuring annual reviews of the IEP are conducted, parental or guardian signoffs are obtained, and the academic portion of the actual IEP meetings with the parents or guardians. (If appropriate, this would also refer to the same activities performed in support of an IFSP or NPSP.)

Medicaid Provider Manual

- Compiling attendance reports.
- Performing activities that are specific to instructional, curriculum, and student-focused areas.
- Reviewing the education record for students who are new to the school district.
- Providing general supervision of students (e.g., playground, lunchroom).
- Monitoring student academic achievement.
- Providing individualized instruction (e.g., math concepts) to a special education student.
- Conducting external relations related to school educational issues/matters.
- Compiling report cards.
- Carrying out discipline.
- Performing clerical activities specific to instructional or curriculum areas.
- Activities related to the educational aspects of meeting immunization requirements for school attendance.
- Compiling, preparing, and reviewing reports on textbooks or attendance.
- Enrolling new students or obtaining registration information.
- Conferring with student or their parents or guardians about discipline, academic matters or other school related issues.
- Evaluating curriculum and instructional services, policies, and procedures.
- Participating in or presenting training related to curriculum or instruction (e.g., language arts workshop, computer instruction).
- Translating an academic test for a student.

4.2.F. CODE 4.A. - DIRECT MEDICAL SERVICES – NOT COVERED ON A MEDICAL PLAN OF CARE (FFS – NON-IEP) - U

This code should be selected when ISD/LEA staff members (employees or contracted staff) are providing direct student care services for which medical necessity has not been determined. This code includes pre- and post-activities associated with the actual delivery of the direct student care services, e.g., paperwork or staff member's travel required to perform these services.

Examples of activities reported under this code:

- All non-IDEA and/or non-IEP direct student care services as follows:
 - Administering first aid
 - Screening services conducted by non-qualified providers
 - Mental health services conducted by non-qualified providers
 - Nursing services conducted by non-qualified providers

Medicaid Provider Manual

4.2.G. CODE 4.B. - DIRECT MEDICAL SERVICES – COVERED AS IDEA/IEP SERVICE (FFS – IEP) – IEP RATIO

This code should be selected when ISD/LEA staff members (employees or contracted staff) provide direct student services as covered services delivered by ISDs/LEAs under the Fee for Service (FFS) Program for students with an IEP/IFSP/NPSP. These direct student services may be delivered to an individual and/or group in order to ameliorate a specific condition and are performed in the presence of the student(s). This code includes the provision of all IDEA/IEP medical (i.e., health-related) services. It also includes functions performed pre- and post-actual direct student services (when the student may not be present); for example: paperwork, or staff travel directly related to the direct student services.

Examples of activities reported under this code:

4.2.G.1. ALL IDEA/IEP DIRECT STUDENT SERVICES WITH THE STUDENT PRESENT

Includes:

- Providing health/mental health services as covered in the student's IEP/IFSP/NPSP.
- Conducting medical/health assessments/evaluations and diagnostic testing and preparing related reports as covered in the student's IEP/IFSP/NPSP.

4.2.G.2. DIRECT MEDICAL SERVICES COST POOL

The list of services corresponds to all of the services outlined in the State Plan. This includes:

- Audiologist services, including evaluation and therapy services (only if included in the student's IEP/IFSP/NPSP).
- Physical Therapy services and evaluations (only if included in the student's IEP/IFSP/NPSP).
- Occupational Therapy services and evaluations (only if included in the student's IEP/IFSP/NPSP).
- Speech/Language Therapy services and evaluations (only if included in the student's IEP/IFSP/NPSP).
- Psychological, Counseling and Social Work services, including therapy services (only if included in the student's IEP/IFSP/NPSP).
- Orientation and Mobility services and evaluations (only if included in the student's IEP/IFSP/NPSP).
- Nursing services and evaluations (only if included in the student's IEP/IFSP/NPSP), including skilled nursing services on the IEP/IFSP/NPSP and time spent administering/monitoring medication (only if it is included as part of an IEP/IFSP and documented in the IEP/IFSP).

Medicaid Provider Manual

- Physician and Psychiatrist services (only if included in the student's IEP/IFSP/NPSP).
- Assistive Technology Device Services.

4.2.G.3. PERSONAL CARE SERVICES

This code is used for providing a range of human assistance services to students with disabilities and chronic conditions which enable them to accomplish tasks that they would normally do for themselves if they did not have a disability or chronic condition. Assistance may be in the form of hands-on assistance or cueing so that the student performs the task by themselves. The need for services must be documented in the student's POC. Services are not covered when provided by a family member or if they are educational in nature.

Personal care services include related paperwork, clerical activities, and staff travel required to perform the following activities:

- Eating/feeding
- Respiratory assistance
- Toileting
- Grooming
- Dressing
- Transferring
- Ambulation
- Intervention for seizure disorder
- Personal hygiene
- Mobility/Positioning
- Meal preparation
- Skin care
- Muscle strengthening
- Bathing
- Maintaining continence
- Medical equipment maintenance
- Assistance with self-administered medications
- Re-direction and intervention for behavior
- Health-related functions through hands-on assistance, supervision and cueing

4.2.G.4. TARGETED CASE MANAGEMENT SERVICES

This code is used for providing services which are a part of the IEP/IFSP/NPSP treatment plan. These services identify and address special health problems and needs that affect

Medicaid Provider Manual

the student's ability to learn and assist the student to gain and coordinate access to a broad range of medically necessary services covered under the Medicaid program.

Targeted Case Management Services include related paperwork, clerical activities, and staff travel required to perform the following activities:

- Ensure that standard re-examination/follow-up of the student is periodically conducted to ensure the student receives needed diagnosis and treatment.
- Assist families in identifying/choosing appropriate care providers and services.
- Maintain case records and indicate all contact for pupil in the same manner as other covered services.
- Coordinate performance evaluations/assessments and other service needs for the pupil.
- Prevention of duplicate services.
- Facilitation/participation in development, review and evaluation of the multi-disciplinary assessment.
- Supporting activities that link or coordinate needed health services for the pupil.
- Meeting with teachers and other professional staff to discuss testing, planning, treatment, coordinating effective interventions, and pupil progress.
- Coordinating school-based services and treatment with parents or guardians and student.
- Monitoring and recommending a plan of action.
- Providing modifications to the multi-disciplinary, pupil-centered treatment plan.
- Coordinating with staff/health professionals to establish continuum of physical and behavioral health services in the school setting.
- Provide summary of provider, parents or guardian and student consultation.

This code also includes pre- and post-time directly related to providing direct student care services when the student is not present. Examples of pre- and post-time activities when the pupil is not present include: time to complete all paperwork related to the specific direct client care service, such as preparation of progress notes, translation of session notes, review of evaluation testing/observation, planning activities for the therapy session, travel to/from the therapy session, or completion of billing activities.

General examples that are considered pre- and post-time:

- Pre- and post-time activities associated with physical therapy services; for example: time to build a customized standing frame for a pupil or time to modify a pupil's wheelchair desk for improved freedom of movement for the pupil.
- Pre- and post-activities associated with speech-language therapy services; for example: preparing lessons for a student to use with an augmentative communicative device (ACD) or preparing worksheets for use in group therapy sessions.
- Updating the medical/health-related service goals and objectives of the IEP.
- Travel to the direct service/therapy.

Medicaid Provider Manual

- Paperwork associated with the delivery of the direct care service, as long as the student is not present. Such paperwork could include the preparation of progress notes, translation of session notes, or completion of billing activities.
- Interpretation of the evaluation results and/or preparation of written evaluations when pupil is not present. (Assessment services are billed for testing time when the pupil is present, for interpretation time when the pupil is not present, and for report writing when the pupil is not present.)

4.2.H. CODE 4.C. - DIRECT MEDICAL SERVICES – COVERED ON A MEDICAL PLAN OF CARE, NOT COVERED AS IDEA/IEP SERVICE – MEDICAL PLAN RATIO

This code should be selected when ISD/LEA staff members (employees or contracted staff) provide direct client services as covered services delivered by ISDs/LEAs under the FFS program when documented on a medical plan other than an IEP/IFSP/NPSP or for services in which medical necessity has been determined. These direct client services may be delivered to a student and/or group in order to ameliorate a specific condition and are performed in the presence of the student(s). This code includes the provision of medical (i.e., health-related) services outlined in a medical plan other than an IEP/IFSP/NPSP or for which medical necessity has been determined. It also includes functions performed pre- and post-actual direct client services (when the pupil may not be present); for example: paperwork, or staff travel directly related to the direct client services.

Examples of activities reported under this code:

4.2.H.1. ALL MEDICAL PLAN DIRECT STUDENT SERVICES WITH THE STUDENT PRESENT

Includes:

- Providing health/mental health services as covered in the pupil's medical plan other than an IEP/IFSP/NPSP.
- Conducting medical/health assessments/evaluations and diagnostic testing and preparing related reports as covered in the pupil's medical plan other than an IEP/IFSP/NPSP.
- Services for which medical necessity has been determined.

The list of services corresponds to all of the services outlined in the State Plan. This includes:

- Audiologist services, including evaluation and therapy services (only if included in the pupil's medical plan).
- Physical Therapy services and evaluations (only if included in the pupil's medical plan).
- Occupational Therapy services and evaluations (only if included in the pupil's medical plan).
- Speech-Language Therapy services and evaluations (only if included in the pupil's medical plan).

Medicaid Provider Manual

- Counseling services, including therapy services (only if included in the pupil's medical plan or when medical necessity has been determined).
- Orientation and Mobility services and evaluations (only if included in the pupil's medical plan).
- Nursing services and evaluations (only if medical necessity has been determined, including skilled nursing services in the medical plan, and time spent administering/monitoring medication only if it is included as part of a medical plan of care and documented in the medical plan of care).
- Nutrition services, including the management and counseling for pupils on special diets for genetic metabolic disorders, prolonged illness, deficiency disorders or other complicated medical problems. Nutritional support through assessment and monitoring of the nutritional status and teaching related to the dietary regimen.
- All EPSDT covered services, such as screenings, immunizations, etc., or services in which medical necessity has been determined.

This code also includes pre- and post-time directly related to providing direct client care services when the student is not present. Examples of pre- and post-time activities when the pupil/client is not present include: time to complete all paperwork related to the specific direct client care service such as preparation of progress notes, translation of session notes, review of evaluation testing/observation, planning activities for the therapy session, travel to/from the therapy session, or completion of billing activities.

General examples that are considered pre- and post-time:

- Pre- and post-time activities associated with physical therapy services; for example: time to build a customized standing frame for a pupil or time to modify a pupil's wheelchair desk for improved freedom of movement for the pupil.
- Pre- and post-activities associated with speech language pathology services; for example: preparing lessons for a client to use with an ACD or preparing worksheets for use in group therapy sessions.
- Updating the medical/health-related service goals and objectives of the medical plan of care.
- Travel to the direct service/therapy.
- Paperwork associated with the delivery of the direct care service as long as the pupil/client is not present. Such paperwork could include the preparation of progress notes, translation of session notes, or completion of billing activities.
- Interpretation of the evaluation results and/or preparation of written evaluations when pupil/client is not present. (Assessment services are billed for testing time when the pupil is present, for interpretation time when the pupil is not present, and for report writing when the pupil is not present.)

Medicaid Provider Manual

4.2.I. CODE 5.A. - TRANSPORTATION FOR NON-MEDICAID SERVICES – U

This code should be used for staff when assisting a student to obtain transportation to services not covered by Medicaid or accompanying the individual to services not covered by Medicaid. Includes related paperwork, clerical activities and staff travel required to perform these activities:

- Scheduling or arranging transportation to social, vocational, and/or educational programs and activities.

4.2.J. CODE 5.B. – TRANSPORTATION-RELATED ACTIVITIES IN SUPPORT OF MEDICAID-COVERED SERVICES – PM/50 PERCENT FFP

This code should be used for staff when assisting a student to obtain transportation to services covered by Medicaid. This does not include the provision of the actual transportation service or the direct cost of the transportation, but rather the administrative activities involved in providing transportation. Includes related paperwork, clerical activities, and staff travel required to perform these activities. An example is:

- Scheduling or arranging transportation to Medicaid covered services.

NOTE: Staff that may arrange transportation that may be included in the RMTS include, but are not limited to, Program Administrators, Special Education Support or other staff at the district who are responsible for arranging specialized transportation for students to receive medical services; however, job titles of staff that provide these types of services vary by district.

4.2.K. CODE 6.A. - NON-MEDICAID TRANSLATION – U

This code should be used for staff when providing translation services related to social, vocational or educational programs and activities as an activity separate from the activities referenced in other codes. Includes related paperwork, clerical activities and staff travel required to perform these activities. Examples include:

- Arranging for or providing translation services (oral or signing services) that assist the student to access and understand social, educational, and vocational services.
- Arranging for or providing translation services (oral or signing services) that assist the individual to access and understand State education or State-mandated health screenings (e.g., vision, hearing, and scoliosis) and general health education outreach campaigns intended for the student population.
- Developing translation materials that assist students to access and understand social, educational, and vocational services.

4.2.L. CODE 6.B. - TRANSLATION RELATED TO MEDICAID SERVICES - PM/75 PERCENT FFP

Translation may be allowable as an administrative activity if it is not included and paid for as part of a medical assistance service. However, it must be provided by separate units

Medicaid Provider Manual

or separate staff members performing solely translation functions for the ISD/LEA and it must facilitate access to Medicaid covered services.

This code should be used by ISD/LEA employees who provide translation services related to Medicaid covered services as an activity separate from the activities referenced in other codes. This includes related paperwork, clerical activities and staff member travel required to perform these activities. Examples include:

- Arranging for or providing translation services (oral and signing) that assist the student to access and understand necessary care or treatment covered by Medicaid.
- Developing translation materials that assist the student to access and understand necessary care or treatment covered by Medicaid.
- Developing translated materials, including Braille transcriptions, that assist the student to access and understand necessary care or treatment covered by Medicaid.
- Translation while the school nurse provides covered services to a student whose primary language is not English.
- Sign language interpretation during provision of covered services to a deaf/hearing impaired student.
- Transcribing into Braille the fact sheet that school nurses use to explain/practice steps/proper technique for using an inhaler.
- Translation to help a school psychologist follow up with a student's non-English speaking parent or guardian on a mental health referral.

4.2.M. CODE 7.A. - PROGRAM PLANNING, POLICY DEVELOPMENT AND INTERAGENCY COORDINATION RELATED TO NON-MEDICAL SERVICES – U

This code should be used for staff when performing activities associated with the development of strategies to improve the coordination and delivery of non-medical services to school age pupils and when performing collaborative activities with other agencies. Non-medical services may include social, educational and vocational services. Only staff members whose position descriptions include program planning, policy development and interagency coordination should use this code. Includes related paperwork, clerical activities and staff travel required to perform these activities. Examples include:

- Identifying gaps in or duplication of non-medical services (e.g., social, vocational, educational and state-mandated general health care programs) to school age pupils and developing strategies to improve the delivery and coordination of these services.
- Developing strategies to assess or increase the capacity of non-medical school programs.
- Monitoring the non-medical delivery systems in schools.
- Developing procedures for tracking parent or guardian requests for assistance with non-medical services and the providers of such services.
- Evaluating the need for non-medical services in relation to specific populations or geographic areas.

Medicaid Provider Manual

- Analyzing non-medical data related to a specific program, population, or geographic area.
- Working with other agencies providing non-medical services to improve the coordination and delivery of services and to improve collaboration around the early identification of non-medical problems.
- Defining the relationship of each agency's non-medical services to one another.
- Developing advisory or work groups of professionals to provide consultation and advice regarding the delivery of non-medical services and state-mandated health screenings to the school populations.
- Developing non-medical referral sources.
- Coordinating with interagency committees to identify, promote and develop non-medical services in the schools.

4.2.N. CODE 7.B. - PROGRAM PLANNING, POLICY DEVELOPMENT AND INTERAGENCY COORDINATION RELATED TO MEDICAL/MEDICAID SERVICES - PM/50 PERCENT FFP

This code should be used for staff members when performing activities associated with the development of strategies to improve the coordination and delivery of medical/dental/mental health services to school age pupils, and when performing collaborative activities with other agencies and/or providers. Staff members whose position descriptions include program planning, policy development and interagency coordination may use this code. However, it is a state option whether or not the position descriptions need to be explicit with respect to these specific functions. This code refers to activities such as planning and developing procedures to track requests for services; the actual tracking of requests for Medicaid services would be coded under Code 9.b. - Referral, Coordination and Monitoring of Medicaid Services. This includes related paperwork, clerical activities and staff member travel required to perform these activities. Examples include:

- Identifying gaps in or duplication of medical/dental/mental health services to school age pupils and developing strategies to improve the delivery and coordination of these services.
- Developing strategies to assess or increase the capacity of school medical/dental/mental health programs.
- Monitoring the medical/dental/mental health delivery systems in schools.
- Developing procedures for tracking parent or guardian requests for assistance with medical/dental/mental health services and providers, including Medicaid. (This does not include the actual tracking of requests for Medicaid services.)
- Evaluating the need for medical/dental/mental health services in relation to specific populations or geographic areas.
- Analyzing Medicaid data related to a specific program, population, or geographic area.
- Working with other agencies and/or providers that provide medical/dental/mental health services to improve the coordination and delivery of services, to expand access to specific populations of Medicaid eligible, and to increase provider participation and improve provider relations.

Medicaid Provider Manual

- Working with other agencies and/or providers to improve collaboration around the early identification of medical/dental/mental health problems.
- Developing strategies to assess or increase the cost effectiveness of school medical/dental/mental health programs.
- Defining the relationship of each agency's Medicaid services to one another.
- Working with Medicaid resources, such as the Medicaid agency and Medicaid managed care plans, to make good faith efforts to locate and develop EPSDT health services referral relationships.
- Developing advisory or work groups of health professionals to provide consultation and advice regarding the delivery of health care services to the school populations.
- Working with the Medicaid agency to identify, recruit and promote the enrollment of potential Medicaid providers.
- Developing medical referral sources, such as directories of Medicaid providers and managed care plans, which will provide services to targeted population groups, e.g., EPSDT pupils.
- Coordinating with interagency committees to identify, promote and develop EPSDT services in the school system.

4.2.O. CODE 8.A. - NON-MEDICAL/MEDICAID TRAINING – U

This code should be used for staff coordinating, conducting, or participating in training events and seminars for school-based services staff regarding the benefit of the programs, other than the Medicaid program, such as educational programs; for example: how to assist parents or guardians to access the services of the relevant programs and how to refer pupils more effectively for those services. Includes related paperwork, clerical activities and staff travel required to perform these activities. Examples include:

- Participating in or coordinating training that improves the delivery of services for programs other than Medicaid.
- Participating in or coordinating training that enhances IDEA child find programs.

4.2.P. CODE 8.B. - MEDICAL/MEDICAID RELATED TRAINING – PM/50 PERCENT FFP

This code should be used for staff when coordinating, conducting or participating in training events and seminars for Direct Medical Services and AOP staff regarding the benefits of the Medicaid program, how to assist parents or guardians in accessing Medicaid services, and how to more effectively refer pupils for services. Includes related paperwork, clerical activities and staff travel required to perform these activities. Examples include:

- Participating in or coordinating training that improves the delivery of medical/Medicaid related services.
- Participating in or coordinating training that enhances early identification, intervention, and screening of pupils with special health needs to such services (e.g., Medicaid EPSDT services). (This is distinguished from IDEA child find programs.)

Medicaid Provider Manual

4.2.Q. CODE 9.A. - REFERRAL, COORDINATION AND MONITORING OF NON-MEDICAID SERVICES –U

This code should be used for staff when making referrals for coordinating and/or monitoring the delivery of non-medical, such as educational, services. Includes related paperwork, clerical activities and staff travel required to perform these activities. Examples include:

- Making referrals for, and coordinating access to, social and educational services such as childcare, employment, job training, and housing.
- Making referrals for, coordinating, and/or monitoring the delivery of state education agency mandated child health screens (e.g., vision, hearing, and scoliosis).
- Making referrals for, coordinating, and monitoring the delivery of scholastic, vocational, and other non-health related examinations.
- Gathering any information that may be required in advance of these non-Medicaid related referrals.
- Participating in a meeting/discussion to coordinate or review a pupil's need for scholastic, vocational, and non-health related services not covered by Medicaid.
- Monitoring and evaluating the non-medical components of the plan of care as appropriate.

Case Management: Note that case management as an administrative activity involves the facilitation of access and coordination of program services. Such activities may be provided under the term Case Management or may also be referred to as Referral, Coordination, and Monitoring of Non-Medicaid Services.

Case management may also be provided as an integral part of the service and would be included in the service cost. This code should be used for school staff when making referrals for, coordinating, and/or monitoring the delivery of non-Medicaid covered services.

4.2.R. CODE 9.B. - REFERRAL, COORDINATION AND MONITORING OF MEDICAID SERVICES – PM/50 PERCENT FFP

This code should be used for staff when making referrals for, coordinating, and/or monitoring the delivery of medical (Medicaid covered) services. Referral, coordination and monitoring activities related to services in an IEP/IFSP/NPSP are reported in this code. Activities that are part of a direct service are not claimable as an administrative activity. Furthermore, activities that are an integral part of, or an extension of, a medical service (e.g., student follow-up, student assessment, student counseling, student education, student consultation, billing activities) should be reported under codes 4.a. - Direct Medical Services - Not Covered on a Medical Plan of Care (FFS – Non-IEP); 4.b. - Direct Medical Services - Covered as IDEA/IEP Services (FFS – IEP); or 4.c. - Direct Medical Services – Covered on a Medical Plan of Care, Not Covered as IDEA/IEP Service. Examples include:

- Identifying and referring pupils who may be in need of Medicaid family planning services.

Medicaid Provider Manual

- Making referrals for and/or coordinating medical or physical examinations and necessary medical/dental/mental health evaluations.
- Making referrals for and/or scheduling EPSDT screens, interperiodic screens, and appropriate immunization, but NOT to include the state-mandated health services.
- Referring pupils for necessary physical health, mental health, or substance abuse services covered by Medicaid.
- Arranging for any Medicaid covered medical/dental/mental health diagnostic or treatment services that may be required as the result of a specifically identified medical/dental/mental health condition.
- Gathering any information that may be required in advance of medical/dental/mental health referrals.
- Participating in a meeting/discussion to coordinate or review a pupil's needs for health-related services covered by Medicaid.
- Developing, coordinating, and monitoring the medical portion of the IEP for a pupil which includes the medical portion of the actual IEP meetings with the parents or guardians, time spent developing the medical services plan on the IEP, and writing of the medical service goals of the IEP. (If appropriate, this would also refer to the same activities performed in support of an IFSP or other medical plan.)
- Providing follow-up contact to ensure that a pupil has received the prescribed medical/dental/mental health services covered by Medicaid.
- Coordinating the delivery of community based medical/dental/mental health services for a pupil with special/severe health care needs.
- Coordinating the completion of the prescribed services, termination of services, and the referral of the pupil to other Medicaid service providers as may be required to provide continuity of care.
- Providing information to other staff on the pupil's related medical/dental/mental health services and plans.
- Monitoring and evaluating the Medicaid service components of the IEP and/or medical plan as appropriate.
- Coordinating medical/dental/mental health service provision with managed care plans as appropriate.

NOTE: A "referral" is considered appropriate when made to a provider who can provide the required service, will accept the pupil as a patient, and will accept the pupil's source of payment for services.

Case Management: Note that case management as an administrative activity involves the facilitation of access and coordination of program services. Such activities may be provided under the term Case Management or may also be referred to as Referral, Coordination, and Monitoring of Non-Medicaid Services.

Case management may also be provided as an integral part of the service and would be included in the service cost. This code should be used for school staff members when

Medicaid Provider Manual

making referrals for, coordinating, and/or monitoring the delivery of non-Medicaid covered services.

4.2.S. CODE 10. - GENERAL ADMINISTRATION – R

This code should be used for staff when performing activities that are not directly assignable to program activities. Includes related paperwork, clerical activities and staff travel required to perform these activities. Note that certain functions such as payroll, maintaining inventories, developing budgets, executive direction, etc. are considered overhead and, therefore, are only allowable through the application of an approved indirect cost rate.

Below are typical examples of general administrative activities; however, they are not all inclusive.

- Taking lunch, breaks, leave, or other paid time not at work.
- Establishing goals and objectives of health-related programs as part of the school's annual or multi-year plan.
- Reviewing school procedures and rules.
- Attending or facilitating school staff meetings, training, or board meetings.
- Performing administrative or clerical activities related to general building or district functions or operations.
- Providing general supervision of staff members, including supervision of student teachers or classroom volunteers, and evaluation of staff member performance.
- Reviewing technical literature and research articles.
- Other general administrative activities of a similar nature as listed above that cannot be specifically identified under other activity codes.

4.2.T. CODE 11. - NOT SCHEDULED TO WORK – NOT INCLUDED IN THE DISTRIBUTION OR INVALID

This code should be used if the random moment occurs at a time when a part-time, temporary or contracted employee is not scheduled to be at work. NOTE: This code should not be used for full-time school staff.

Medicaid Provider Manual

SECTION 5 – CONFIDENTIALITY

Aggregate time study data may occasionally be useful for other administrative tasks (i.e., planning) and may be used in that way. However, any individually identifiable information must be protected as required by all applicable state and federal statutes and regulations to ensure confidentiality and protection of privacy. Aggregate data is defined as data at the state level. That data may be broken down by cost pool as well.

Medicaid Provider Manual

SECTION 6 – TIME STUDY TRAINING

6.1 TRAINING

The approved training methods, materials, information, and instructions are tailored to each group involved in the time studies.

The Contractor, along with MDHHS, is responsible for developing training programs and materials and, along with the ISD coordinator, providing follow-up assistance as needed. For training, there are some services the Contractor will provide statewide and other services that will be provided to the individual ISDs.

6.1.A. LOCAL ISD COORDINATOR TRAINING

All ISDs have an ISD coordinator/representative who receives training that ensures a thorough understanding of their coordinator responsibilities, the approved time study and cost reporting activities. These individuals must understand their role as the liaison between the Medicaid Program, the Contractor, and other staff. They must understand and be able to convey to others the basic purpose of the program, assist the Contractor with follow-up as needed, and serve as a facilitator for the Contractor to "navigate" the district as necessary.

6.1.B. TIME STUDY PARTICIPANT TRAINING

For time study participants, it is essential that these individuals understand the purpose of the time studies, that time is of the essence related to completion of the form, and that their role is crucial to the success of the time study. The Contractor develops and provides detailed written information and instructions for completing the time study forms as a coversheet attached to each time study form. The coversheet provides a "tutorial" with the aforementioned basics of the program as well as information about the Medicaid covered services provided in the school setting.

SECTION 7 – SUMMARY OF TIME STUDY STEPS

The Contractor duties are to:

- Import eligible school district staff information to create the RMTS staff pools.
- Randomly select staff/moments to be sampled.
- Generate electronic RMTS forms for each moment.
- Generate and distribute a master list of selected moments to the ISD Coordinators as a local control list.
- Code the time study responses.
- Calculate activity percentages for each of the activity codes.
- Scan completed and coded time study moments.
- Transfer raw data from submitted RMTS responses to the claims development software to calculate activity percentages for each of the activity codes.
- Produce quarterly reports summarizing the results of the RMTS and RMTS compliance reporting. (Both reports are forwarded to the MDHHS Program Policy Division for posting on the MDHHS website. Refer to the Directory Appendix for website information.)
- Produce periodic and special RMTS reports that provide data and information sorted by ISD/LEA that are provided to CMS, MDHHS, MDE, ISDs and their auditors.
- Create and verify the eligible staff pools for time studies from the quarterly information provided by the ISDs.
- Distribute time study moments and collect completed time study moments.
- Code the activity forms received from the ISDs.
- Initiate and complete the ISD claim workbooks by obtaining the financial data from each ISD/LEA and compiling data to complete the workbook.

SECTION 8 – SUMMER QUARTER TIME STUDY METHODOLOGY

8.1 AOP QUARTERLY CLAIM (OTHER THAN SUMMER QUARTER)

The claim consists of the results of the quarterly RMTS of the approved staff pool for the quarter and the correlating allowable costs applied to the reimbursement methodology.

8.2 AOP SUMMER QUARTER FORMULA AND RANDOM MOMENT TIME STUDY

The summer quarter months are July, August and September. There is a break period between the end of one regular school year and the beginning of the next regular school year during which only a few staff are working. The majority of school staff work during the school year and do not work for part of the summer quarter (9-month staff). However, there are some 9-month staff that opt to receive their pay over a 12-month period. Therefore, different factors must be applied to the summer formula in order to accurately reflect the activities that are performed by the staff. Currently, a time study is not conducted during the July – September period.

8.2.A. JULY - SEPTEMBER CLAIM

The summer quarter is comprised of the following elements:

- Staff Pool – those eligible staff in the April through June staff pool define the positions for which costs can be claimed during the summer period.
- Costs – July - September allowable staff pool costs
- A weighted average of the October-December, January-March, April-June, and the summertime study results.

8.3 DIRECT MEDICAL SUMMER QUARTER FORMULA AND RANDOM MOMENT TIME STUDY

A weighted average of the three time study results for the staff pool periods listed below is applied to the LEA Cost Report total costs. The LEA Cost Report costs include the annual costs associated with direct medical services, personal care services and targeted case management services.

The direct medical services time study application is comprised of the following elements:

- Staff Pools – Those individuals eligible to participate in the following three staff pool periods:
 - October through December
 - January through March
 - April through June
- Cost Pool – The costs from the annual LEA Cost Report (direct medical services, personal care services and targeted case management services).
- RMTS – A weighted average of the October–December, January–March, April–June and the summertime study results as described above.

Medicaid Provider Manual

8.4 FINANCIAL REPORTING COMPLIANCE REQUIREMENTS

The financial data reported (salaries, benefits, supplies, purchased services, and other expenditures) must be based on actual detailed expenditures from ISD/LEA payroll and financial systems. Payroll and financial systems data must be applied using generally accepted governmental accounting standards and principles or applicable administrative rules. The expenditures accumulated must correlate to the claiming period.

SECTION 9 – AUDIT AND QUALITY ASSURANCE

9.1 STATEMENT ON STANDARDS FOR ATTESTATION ENGAGEMENTS (SSAE) 18 AUDIT REQUIREMENTS

In accordance with the *State of Michigan Financial Management Guide (FMG) Part VII: Internal Control, Chapter 1, Section 1000: Managing and Evaluating Controls for Third Party Risks*, the state contractor must annually provide the State, at the state contractor's expense, a Service Organization Control (SOC) 2 Type II report performed by an independent auditor in accordance with standards (currently SSAE18) issued by the American Institute of Certified Public Accountants (AICPA). The SOC 2 provides reporting on internal controls at a service organization relevant to security, availability, processing integrity, confidentiality, and privacy. The state contractor must also provide the State annually a SOC 1 Type II report performed by an independent auditor using the same applicable standards.

Within 60 days of the SOC report issue date, the Contractor must submit the SOC report along with a "Bridge" letter covering the "gap" between the Contractor's SOC report period and the State's fiscal year: 9/30/yy. The "Bridge" letter must assert that the control environment described in the SOC report has not changed and that tested controls continued to operate effectively during gaps between the SOC reporting period and the State of Michigan's fiscal year.

9.2 QUALITY ASSURANCE, OVERSIGHT AND MONITORING

Quality assurance, oversight and monitoring activities include:

9.2.A. MDHHS PROGRAM POLICY – OVERSIGHT OF ADMINISTRATION AND OPERATIONS

MDHHS policy staff responsibilities are:

- Review quarterly time study results against historical benchmarks according to:
 - Overall results and matchable percentages
 - Benchmarks by activity code and by staff category
- Detailed investigation of anomalies in results.
- Determination of policy or procedure changes based on results of anomaly review.
- Overall statistical requirements in terms of confidence and precision levels on a quarterly basis and an annual basis.
- Sampling to review coding activities performed by the Contractor.
- Disseminate CMS guidance.
- Monitor ISDs processing of claims for compliance with State and Federal regulations and program guidelines.
- Ensure that billing entities have the processes in place to correct any claims paid in error.
- Provide information and training to billing entities as needed for program compliance.
- Provide operational oversight and technical assistance.
- Assist ISDs with quality assurance and compliance monitoring.

Medicaid Provider Manual

- Provide oversight of ISD quality assurance and compliance plans to ensure that they provide oversight and monitoring of such things as documentation, provider credentials, record retention, and confidentiality.

9.2.B. MDHHS OFFICE OF INSPECTOR GENERAL – POST-PAYMENT REVIEW AND COMPLIANCE

MDHHS Office of Inspector General staff responsibilities are:

- Post-payment review for the purpose of adherence to provider policy, provider credentials and appropriate billing practices.
- Post-payment review for the purpose of reported fraud or abuse.

For more detailed information regarding the Fraud and Abuse and Post Payment Review, refer to the Post-Payment Review and Fraud/Abuse section of the General Information for Providers chapter.

9.2.C. MDHHS RATE REVIEW SECTION – COST SETTLEMENT REVIEW

MDHHS Rate Review Section staff responsibilities are:

- Import and create a database of the cost report data submitted by ISDs.
- Perform reviews of the data for accuracy and completeness.
- Summarize the data and forward to ISDs for final approval.
- Compile cost settlement summaries and prepare over/under adjustments.

9.2.D. CONTRACTOR OVERSIGHT AND QUALITY ASSURANCE

There are several levels of quality assurance and validation built into the RMTS process.

- In terms of coding, the Contractor has a coding process in place in which centralized coders code all moments, and then a second coder reviews all moments coded as matchable for verification of accurate and consistent application of activity codes. The second coder also reviews a random sample of 10 percent of all non-matchable moments for quality assurance purposes.
- Quality assurance and validation includes the quarterly review which includes the Contractor meeting with MDHHS staff specifically to review time study results and other procedural issues. Each quarter, MDHHS reviews detailed reports which outline the current quarter time study results benchmarked against past quarter results. The results are reviewed by activity code as well as by matchable/non-matchable categories. Comparisons are made of the variances in the overall quarterly results from the same quarter in the previous year, as well as variances of the current quarter against the average of the past four quarters. Results are reviewed and discussed in terms of results by staff category. Any anomalies identified are pursued through a detailed investigation of the moments which produced the anomaly. The Contractor, in conjunction with MDHHS, then determines how to handle any issues in terms of additional communication or training for RMTS participants, policy or procedural changes, etc.

Medicaid Provider Manual

- ISDs may view compliance reporting online.

9.2.E. ISD OVERSIGHT

ISD responsibilities are to:

- have systems in place to monitor service delivery, claim documentation, claim billing, and payments received.
- verify that the credentials of all clinicians are current and appropriate for Medicaid billing and that services rendered are within the scope of the clinician's practice.

Medicaid Provider Manual

SECTION 1 – GENERAL INFORMATION

This chapter applies to all providers.

The Michigan Department of Health and Human Services (MDHHS) administers the Medicaid Program, Children's Special Health Care Services (CSHCS), Maternity Outpatient Medical Services (MOMS) and other special programs described elsewhere in this manual. In addition to these traditional programs, MDHHS administers many other programs/coverages to meet the healthcare needs of Michigan's medically indigent population. Programs vary in scope and eligibility requirements and are funded through various sources, including federal, state, and/or private. Some of the programs offer comprehensive or reduced Medicaid benefits as indicated. Additional information regarding these programs may be available on the MDHHS website.

Contact information for the various programs is listed in the Directory Appendix.

SECTION 2 – PROGRAMS THAT TARGET SPECIFIC MEDICAL CONDITIONS

2.1 BREAST AND CERVICAL CANCER CONTROL PROGRAM

2.1.A. ELIGIBLE BENEFICIARIES

The Breast and Cervical Cancer Control Program (BCCCP) covers uninsured low-income women of all ages especially, but not limited to, women aged 40-64. Certain income restrictions do apply. Enrollees in the Breast and Cervical Cancer Control Program (BCCCP) are exempt from co-pays.

- Insured women may apply if certain insurance, age, and income requirements are met.
- Women who are enrolled in a managed care program, health maintenance organization (HMO) or have Medicare Part B are not eligible.

2.1.B. COVERED SERVICES

Covered services include:

- Clinical breast exams
- Pap smears
- Pelvic exams
- Screening mammogram, and
- Appropriate referral to community providers for follow-up of abnormalities.

Breast biopsy, colposcopy-directed services, colposcopy service, diagnostic mammograms, and loop electrosurgical excision procedure (LEEP) may be provided based upon medical needs, financial and insurance status, and availability of federal grant funds or Michigan tobacco tax dollars.

SECTION 3 – GENERAL COVERAGE PROGRAMS

3.1 FREEDOM TO WORK

3.1.A. ELIGIBLE BENEFICIARIES

Medicaid-eligible disabled adults aged 16 through 64 years old with earned income may be eligible. SSI beneficiaries whose SSI eligibility may end due to financial factors are among those eligible to be considered for this program.

To be eligible, the beneficiary must be employed on a regular and continuing basis. There may be temporary breaks in employment up to 24 months if they are the result of involuntary layoff or are determined to be medically necessary.

For a married beneficiary, the spouse's income and assets are not considered when determining eligibility for this Medicaid category. The beneficiary's total countable unearned income cannot exceed 250 percent of the Federal Poverty Level (FPL) for ongoing eligibility. The beneficiary's countable assets are limited to \$75,000. In addition, the beneficiary is allowed to have IRS-recognized retirement accounts (including IRAs and 401Ks) of unlimited value.

3.1.B. COVERED SERVICES

Freedom To Work beneficiaries receive regular Medicaid coverage.

3.1.C. PREMIUMS

If the beneficiary's Modified Adjusted Gross Income (MAGI) is below 138 percent of the FPL, there is no premium required for coverage. If the beneficiary's MAGI is between 138 percent of the FPL and \$75,000 per year, the premium is 2.5 percent of MAGI. If the total countable earned income exceeds \$75,000 per year, the beneficiary must pay a premium equal to 100 percent of the cost of Medicaid coverage.

3.2 MEDICAID FOR SUPPLEMENTAL SECURITY INCOME BENEFICIARIES

3.2.A. ELIGIBLE BENEFICIARIES

Supplemental Security Income (SSI) covers disabled children whose families have low income, and low-income adults who are aged, disabled or blind. The Social Security Administration determines eligibility and awards monthly SSI payments based on income and assets requirements. Beneficiaries awarded SSI are automatically eligible for regular Medicaid coverage.

3.2.B. COVERED SERVICES

SSI beneficiaries are eligible for regular Medicaid. In some cases, Medicare premiums are paid by Medicaid based upon certain individual situations and previous work histories.

Medicaid Provider Manual

3.3 MEDICARE SAVINGS PROGRAM

3.3.A. ELIGIBLE BENEFICIARIES

Low income Medicare beneficiaries and those individuals who are eligible for Medicare but do not enroll due to the cost may participate in the Medicare Savings Program (MSP). Financial and nonfinancial requirements and restrictions do apply.

3.3.B. COVERED SERVICES

The MSP pays Medicare coinsurance, deductible, and premiums.

3.4 SPECIAL N SUPPORT

3.4.A. ELIGIBLE BENEFICIARIES

Families that received the low-income families (LIF) Medicaid but are no longer eligible due to an increase in child support may qualify for Special N Support. Most of the health coverage is provided by Medicaid Health Plans (MHPs), and the majority of the beneficiaries are already enrolled in a MHP.

3.4.B. COVERED SERVICES

Special N Support beneficiaries receive regular Medicaid coverage for four months.

3.5 TRANSITIONAL MEDICAL ASSISTANCE

3.5.A. ELIGIBLE BENEFICIARIES

Transitional Medical Assistance (TMA) covers families who are U.S. citizens that are no longer eligible for the low-income family (LIF) Medicaid because the parent(s) has too much income from employment. The family must have received low-income family Medicaid for at least three months of the previous six months to be eligible for TMA. Most of the health coverage is provided by HMOs contracted by MDHHS. The majority of the beneficiaries are already enrolled in a MHP. A renewal of the application to TMA is not necessary.

3.5.B. COVERED SERVICES

TMA provides regular Medicaid coverage, or a comprehensive health care package that includes vision, dental and mental health services, if the beneficiary has been enrolled in a MHP for 12 months.

Medicaid Provider Manual

SECTION 4 – CHILD AND ADOLESCENT HEALTH CENTERS AND PROGRAMS

Under an agreement with MDHHS, Child and Adolescent Health Centers and Programs (CAHCPs) provide medical services and outreach on behalf of the Medicaid Health Plans (MHPs) to school-aged children. (Refer to the Medicaid Health Plan Chapter of this manual for additional information.)

SECTION 5 – COMMUNITY-BASED LONG TERM CARE

5.1 MI CHOICE WAIVER (HOME AND COMMUNITY-BASED WAIVER FOR THE ELDERLY AND DISABLED)

The MI Choice Waiver provides services to aged and physically disabled individuals 18 years old and over who are eligible for full Medicaid and want to stay in their homes or another residential setting but, without the provision of waiver services, would require the level of care only available in a nursing facility. Income and assets requirements and restrictions apply. Applicants must also meet the Michigan Medicaid Nursing Facility Level of Care Determination criteria. Individuals must be currently Medicaid approved or be Medicaid eligible if they were to enter a nursing facility. MDHHS contracts with local agencies to administer this program. (Refer to the MI Choice Waiver Chapter for additional information.)

5.2 PROGRAM OF ALL-INCLUSIVE CARE FOR THE ELDERLY (PACE)

PACE is a comprehensive service delivery system for frail, elderly individuals who meet the Michigan Medicaid Nursing Facility Level of Care criteria. Refer to the PACE Chapter of this manual for additional information.

SECTION 6 - FLINT FAMILY SUPPORTS COORDINATION SERVICES

Family Supports Coordination services are part of a comprehensive health benefit available to pregnant women and children who were served by the Flint water system who meet the Medicaid eligibility requirements.

Family Supports Coordination services assist individuals in gaining access to appropriate medical, educational, social, and/or other services. Family Supports Coordination services include assessments, planning, linkage, advocacy, care coordination, referral, monitoring, and follow-up activities.

In addition to Family Supports Coordination services, eligible beneficiaries will receive the full array of Medicaid-covered benefits. This includes the provision of Early and Periodic Screening, Diagnosis and Treatment (EPSDT) services for children up to age 21, Non-Emergency Medical Transportation (NEMT), and Maternal Infant Health Program (MIHP) services.

6.1 ELIGIBILITY

Providers may verify beneficiary eligibility for Family Supports Coordination services through a Community Health Automated Medicaid Processing System (CHAMPS) online eligibility inquiry or via a Health Insurance Portability and Accountability Act (HIPAA) 270 transaction. The CHAMPS or 271 eligibility response for beneficiaries eligible for Family Supports Coordination services will show:

- a current MAGI category beginning with "F"; and
- a current benefit plan of "TCMF" in addition to their assigned Medicaid or Children's Health Insurance Program (CHIP)-related benefit plans.

6.2 CORE ELEMENTS OF FAMILY SUPPORTS COORDINATION

The purpose of Family Supports Coordination services is to provide a comprehensive array of services that are appropriate to the conditions of the individual. At a minimum, Family Supports Coordination services must include:

- a comprehensive assessment, history, re-assessments, and identification of a course of action to determine the specific needs of the beneficiary and to develop an individual Plan of Care;
- planning, linking, coordinating, follow-up, and monitoring to assist the beneficiary in gaining access to services;
- coordination with the beneficiary's primary care provider (PCP), other providers, and Medicaid Health Plan (MHP), as applicable; and
- any other service approved by MDHHS.

6.2.A. INITIAL/ ANNUAL COMPREHENSIVE ASSESSMENT VISIT

All comprehensive assessment visits, including the initial in-person comprehensive assessment visit, must be conducted by a qualified licensed nurse or social worker with the beneficiary in the beneficiary's home or primary place of residence. The purpose of the comprehensive assessment visit is to gather sufficient information to develop an

Medicaid Provider Manual

individualized Plan of Care for the beneficiary and to ensure that all other eligible individuals in the household are identified for further screening. Initial comprehensive assessments must be conducted in person while re-assessments may be conducted face-to-face.

It is expected that face-to-face re-assessments are performed annually; however, the frequency should be based on the needs and circumstances of the beneficiary and/or family. Active participation by the beneficiary and/or parent(s)/legal guardian(s) is necessary. Comprehensive assessment activities include:

- obtaining client history;
- identifying the beneficiary's needs and completing related documentation; and
- gathering information from other sources, such as family members, medical providers, social workers, and educators (if necessary), to form a complete assessment of the beneficiary.

At a minimum, the comprehensive assessment visit shall assess:

- the growth and development of beneficiaries up to age 21;
- the behavioral profile of beneficiaries up to the age of 21, including the notation of aggressive or hyperactive behavior;
- the beneficiary's access to a PCP and other health care providers;
- whether the beneficiary's PCP has conducted a developmental and social-emotional screen(s) utilizing a standardized and validated tool, such as the Ages & Stages Questionnaire: Social-Emotional (ASQ:SE) or the Pediatric Symptom Checklist (PSC) as indicated by the American Academy of Pediatrics (AAP) Periodicity Schedule, and documenting the results of any screenings performed;
- whether the beneficiary's PCP has assessed the beneficiary for sources of toxic stress and for sources of strength using nationally recognized tools, such as the Adverse Childhood Experiences (ACEs) and Resiliency questionnaires, and documenting the results of any screenings performed;
- the beneficiary's access to prenatal care, potential for pregnancy complications, pica activities, and intent to breastfeed (pregnant beneficiaries);
- the beneficiary's educational and nutritional needs, including participation in the Women, Infants and Children (WIC) program and/or the Food Assistance Program (FAP);
- the beneficiary's environment and typical family practices that may pose a lead risk;
- lead hazards within the family's dwelling; and
- access to NEMT.

6.2.B. DEVELOPMENT OF THE PLAN OF CARE AND DOCUMENTATION

During or immediately following the initial comprehensive assessment visit, a Plan of Care must be developed for beneficiaries who agree to participate in Family Supports Coordination services, with the active participation of the parent(s)/legal guardian(s)

Medicaid Provider Manual

when applicable. The development (and periodic revision) of a specific Plan of Care that is based on the information collected through the comprehensive assessment must specify the goals and actions to address the medical, educational, social, and/or other services needed by the beneficiary. The supports coordinator must ensure the active participation of the beneficiary, and work with the beneficiary (or the beneficiary's parent[s]/legal guardian[s]) and others to develop those goals, and to identify a course of action to respond to the assessed needs of the beneficiary. The Plan of Care is to be shared with the beneficiary's MHP and PCP, if applicable. Beneficiaries must consent to share the Plan of Care with the MHP and other providers identified in the Plan of Care. At a minimum, the Plan of Care must:

- identify a course of action to respond to the assessed needs of the beneficiary (e.g., plan for the testing of family members at risk for lead hazard exposure);
- provide education and information regarding lead hazards, including the impact of lead exposure on the developing fetus of pregnant beneficiaries; and
- facilitate blood lead testing and follow-up testing and treatment as recommended by the PCP.

Family Supports Coordination providers are required to document the following information for all beneficiaries receiving Family Supports Coordination services:

- the name of the beneficiary;
- the dates of the supports coordination services;
- the name of the Family Supports Coordination provider and the qualified professional (i.e., licensed nurse or social worker) providing the supports coordination services;
- the nature and content of the supports coordination visits received, and whether goals specified in the Plan of Care have been achieved;
- whether the beneficiary has declined services within the Plan of Care;
- the need for, and occurrences of, coordination with other providers;
- a timeline for obtaining needed services;
- a timeline for re-evaluation of the Plan of Care; and
- the beneficiary's consent to share information.

6.2.C. REFERRALS AND RELATED ACTIVITIES

In collaboration with the PCP and the MHP, it is expected that the supports coordinator will facilitate and coordinate referral and related activities to assist the beneficiary in obtaining needed services. Activities such as scheduling appointments or linking the beneficiary with medical, educational, social, and/or other programs and services to address identified needs and achieve goals specified in the Plan of Care are primary components of Family Supports Coordination services. Referral activities include, but are not limited to, the coordination of age-appropriate services such as:

- health care related services, including physical and specialty behavioral health services;

Medicaid Provider Manual

- nutritional services, such as coordinating referrals to the Special Supplemental Nutrition Program, WIC program, or FAP;
- educational services, such as age-appropriate referrals to Early On, Great Start Readiness Programs, and Head Start;
- additional social supports (including home visiting programs) to assist the beneficiary in obtaining other assistance, such as financial, housing, and transportation assistance, and lead assessment and abatement resources; and
- blood lead testing and re-testing for family members at risk for lead exposure, and education regarding lead hazards including the impact of lead exposure on young children and the developing fetus.

6.2.D. MONITORING AND FOLLOW-UP ACTIVITIES

Monitoring and follow-up activities include activities and contacts that are necessary to ensure the Plan of Care is implemented and adequately addresses the eligible beneficiary's needs, and which may be conducted with the beneficiary, family members, service providers, or other entities or individuals. Monitoring and follow-up activities are conducted as frequently as necessary by the supports coordinator.

A maximum of five (5) face-to-face monitoring visits are billable per year for each eligible beneficiary. To be reimbursed, the visit must be face-to-face. Additional monitoring and follow-up activities are likely between face-to-face visits but are not reimbursable. At least one annual face-to-face monitoring visit should be conducted to determine whether the following conditions are met:

- services are being furnished in accordance with the beneficiary's Plan of Care;
- services in the Plan of Care are adequate; and
- changes in the needs or status of the beneficiary are reflected in the Plan of Care.

Monitoring and follow-up activities include making necessary adjustments in the Plan of Care and service arrangements with providers.

6.3 ACCESSING SERVICES

Accessing Family Supports Coordination services may occur a number of ways. If the beneficiary is an MHP member, the MHP may initiate the initial contact with the beneficiary and identify those beneficiaries that may benefit from Family Supports Coordination services. Fee-for-Service (FFS) and MHP beneficiaries may also access Family Supports Coordination services either through a referral from their PCP or through a self-referral.

6.4 COVERED SUPPORTS AND SERVICES

A maximum of six (6) visits per year will be reimbursed for each eligible beneficiary as follows:

- one (1) visit for the initial/annual comprehensive assessment.
- a maximum of five (5) visits for monitoring and follow-up.

Medicaid Provider Manual

For additional visits, MDHHS requires the provider to obtain prior authorization before the service is rendered. (Refer to the Directory Appendix for contact information regarding prior authorizations.)

Reimbursement for assessment and monitoring visits is inclusive of all related care coordination and monitoring activities. MDHHS does not reimburse for missed appointments/visits. A beneficiary may not be billed for a missed appointment/visit.

Medicaid reimbursement for Family Supports Coordination services may not duplicate payments made to public agencies or private entities under other program authorities for the same purpose.

Supports coordination includes contacts with non-eligible beneficiaries when the contact is:

- directly related to identifying the eligible beneficiary's needs and care for the purpose of assisting the beneficiary in accessing services;
- identifying needs and supports to assist the beneficiary in obtaining services;
- providing supports coordinators with useful feedback; and
- alerting supports coordinators to changes in the beneficiary's needs.

Family supports coordination does not include activities that constitute the direct delivery of underlying medical, educational, social, and/or other services to which an eligible beneficiary has been referred, including foster care programs and services such as, but not limited to, the following:

- research gathering and completion of documentation required by the foster care program;
- assessing adoption placements;
- recruiting or interviewing potential foster care parents;
- serving legal papers;
- home investigations;
- providing transportation;
- administering foster care subsidies; and
- making placement arrangements.

6.5 TRANSFER OF CARE/RECORDS

During the course of care, the beneficiary may require services from a different supports coordinator due to relocation of the beneficiary's primary residence or due to a request of the beneficiary to change supports coordinators. When there is a planned change of the supports coordinator, information about the new supports coordinator (e.g., contact information) should be provided to the beneficiary. The referring supports coordinator must consult with the new supports coordinator about the case and transfer all applicable information and records, including all completed assessment visits and the updated Plan of Care, to the new supports coordinator in compliance with the privacy and security requirements of federal and state laws and regulations including, but not limited to, the HIPAA and the Michigan Mental Health Code.

6.6 FAMILY SUPPORTS COORDINATION CLOSURE

Family Supports Coordination services are available to all eligible beneficiaries up to age 21, or for pregnant women up to and through 12 months post-delivery. Family Supports Coordination services will be discontinued:

- if the beneficiary is no longer eligible;
- when the beneficiary parent(s) or guardian(s) refuses the service; or
- if CMS does not extend the Flint, Michigan Section 1115 Demonstration Waiver.

When services are refused, Family Supports Coordination services may be resumed at any point during the defined period of eligibility. A discharge summary, including the services provided, outcomes, current status, and ongoing needs of the beneficiary, must be completed and provided to the PCP when the Family Supports Coordination case is closed.

6.7 PROVIDER QUALIFICATIONS

Genesee Health System, the local community mental health (CMH) serving Genesee County, serves as the Designated Provider Organization (DPO) for Family Supports Coordination services. The DPO:

- has a sufficient number of qualified staff to meet the service needs of the target population and has the administrative capacity to ensure the provision of quality services in accordance with state and federal requirements;
- has experience in the coordination and linkage of community services;
- has the willingness and capabilities to coordinate with the beneficiary's PCP and MHP as applicable; and
- must seek approval by MDHHS of all subcontractors for the provision of Family Supports Coordination services.

The DPO will provide Family Supports Coordination services primarily through the use of a supports coordinator. The supports coordinator must meet one of the following professional qualifications:

- licensure as a registered nurse by the Michigan Department of Licensing and Regulatory Affairs (LARA), and at least one year of experience providing community health, pediatric or maternal infant health nursing services; or
- licensure as a social worker by LARA, and at least one year of experience providing social work services to families.

6.8 CLAIMS SUBMISSION AND PAYMENT

All claims submitted and accepted are processed through CHAMPS. Claims must be submitted on the ASC X12N 837 5010 professional format when submitting electronic claims or on the CMS 1500 claim form for paper claims. (Refer to the Billing & Reimbursement for Professionals Chapter for additional billing information.)

6.8.A. INITIAL/ANNUAL ASSESSMENTS

Assessment visits are to be billed using HCPCS code T2024 for an individual or family. This includes reimbursement for the development of a Plan of Care for one individual. HCPCS code T2024 with modifier TT (additional patient) should be billed for each additional individual Plan of Care that is developed from the assessment visit. For informational/reporting purposes, use modifier UN (two patients served), UP (three patients served), UQ (four patients served), UR (five patients served), or US (six or more patients served).

Assessment visits must be in the home or "home-like" environment. One initial/annual assessment visit per year per family/household is allowed. Additional assessment visits beyond one per year per family/household require prior authorization.

6.8.B. FOLLOW-UP/MONITORING

Face-to-face follow-up/monitoring visits are to be billed using HCPCS code T1017 for an individual or family. For informational/reporting purposes, use modifier UN (two patients served), UP (three patients served), UQ (four patients served), UR (five patients served), or US (six or more patients served), and enter the Medicaid beneficiary ID numbers of the family members served during the follow-up visit in the claim notes.

Follow-up visits must last at least 30 minutes and ideally take place in the home or "home-like" environment but may be performed in the office. A maximum of five face-to-face follow-up/monitoring visits per year per family/household is allowed. Additional follow-up visits beyond five per year per beneficiary require prior authorization.

SECTION 7 – MICHIGAN DIABETES PREVENTION PROGRAM (MiDPP)

Michigan Diabetes Prevention Program (MiDPP) is an evidence-based program based on the Centers for Disease Control and Prevention Diabetes Prevention Program (CDC DPP). It is a unique Medicaid preventive benefit that provides a formal behavioral modification approach to preventing type 2 diabetes.

Medicaid Health Plans (MHPs) and Integrated Care Organizations (ICOs) must provide the MiDPP benefit and may provide services over and above the FFS program. For beneficiaries enrolled in an MHP or ICO, MiDPP providers should check with the beneficiary's health plan for prior authorization or referral requirements.

7.1 GENERAL INFORMATION

Prediabetes is a precursor to type 2 diabetes. Type 2 diabetes predisposes people to additional health problems, such as heart disease, kidney disease, vision loss, and amputation.

MiDPP is a unique Medicaid preventive benefit that provides a formal behavioral modification approach to preventing type 2 diabetes. To support the MDHHS commitment to reducing health disparities for Michigan Medicaid beneficiaries, MiDPP is available in a variety of languages and tailored to meet the cultural needs of participants through a variety of delivery modes. In addition, beneficiaries receive support through interactions with others with similar goals and challenges.

The CDC curriculum for MiDPP uses healthy eating, physical activity, and behavior modifications for stress management and problem-solving. Participants learn healthy behaviors, set goals for weight loss, and are encouraged to work up to 150 minutes of physical activity per week.

7.2 MiDPP COVERED SERVICES

The MiDPP structured one-hour sessions for health behavior change are provided by a Medicaid-enrolled lifestyle coach associated with an enrolled MiDPP provider. As required by federal regulations in CFR 440.130(c), MiDPP for a qualified beneficiary must be recommended by a licensed healthcare provider. Examples of healthcare providers qualified to recommend MiDPP are those licensed in Michigan such as a practical nurse, registered nurse, midwife, pharmacist, social worker, physician assistant or physician. Documentation of the MiDPP recommendation must be noted in the beneficiary's program record.

7.3 BENEFICIARY ELIGIBILITY

Medicaid covers MiDPP for beneficiaries who meet the following criteria:

- Current Medicaid eligibility and aged 18 years or over
- Overweight or obese as defined by Body Mass Index (BMI) and have one of the following:
 - elevated blood glucose levels according to CDC Diabetes Prevention Recognition Program (DPRP) Standards and Operating Procedures;
 - history of gestational diabetes mellitus (GDM); or
 - score at "high risk" on CDC prediabetes risk test.

Medicaid Provider Manual

A beneficiary with previously diagnosed type 1 or type 2 diabetes or who is currently pregnant is not eligible to enroll in MiDPP. The beneficiary should be referred to their healthcare provider and is eligible for Medicaid Diabetes Self-Management Education Services (DSME). (Refer to the Billing & Reimbursement for Institutional Providers chapter, Diabetes Self-Management Education (DSME) Training Program subsection, for information on the DSME benefit.) A beneficiary whose prediabetes diagnosis changes to diabetes during a MiDPP session may continue upon recommendation of their healthcare provider. A beneficiary may repeat the MiDPP as long as they meet the eligibility guidelines identified above.

7.4 MiDPP PROVIDER AND LIFESTYLE COACH

A MiDPP provider is the organizational and billing entity, and the MiDPP lifestyle coach is the session leader and rendering provider. Each must meet CDC recognition standards, including educational and experience requirements, as well as meet MDHHS provider enrollment requirements. It is the responsibility of the enrolled MiDPP provider to ensure the lifestyle coaches affiliated with their programs meet CDC program requirements and are enrolled in Medicaid.

The Diabetes & Kidney Unit (DKU) within the MDHHS Public Health Administration (PHA) will monitor MiDPP providers and lifestyle coaches for compliance to CDC recognition requirements. This includes provider qualifications, required training, and necessary data collection. Information regarding the approval process to become a MiDPP provider is available through the DKU. (Refer to the Directory Appendix for contact information.)

Once the MiDPP provider, including lifestyle coaches, are approved by the DKU, enrollment may be initiated in the Michigan Medicaid Community Health Automated Medicaid Processing System (CHAMPS). An enrolling MiDPP provider must have a Type 2 (Organization) National Provider Identification (NPI) number and the lifestyle coach must have a Type 1 (Individual) NPI number before enrolling in CHAMPS. (Refer to the Directory Appendix for CHAMPS Provider Enrollment website information.)

MiDPP providers and lifestyle coaches are subject to all relevant policy found in the General Information for Providers chapter in this manual.

7.5 BILLING AND REIMBURSEMENT

MiDPP claims are submitted only by the Medicaid enrolled MiDPP provider. Claims are submitted on a professional claim format and must include an approved MiDPP Healthcare Common Procedure Coding System (HCPCS) code and must include the diagnosis code of Z71.89: Other Specified Counseling. Weight loss that meets a coding requirement for reimbursement must be documented on the MiDPP beneficiary's program record.

Currently covered MiDPP procedure codes, rates and code descriptions are maintained on the MiDPP fee schedule located on the MDHHS website. (Refer to the Directory Appendix for website information.)

Medicaid will follow CMS Medicare coding and reimbursement guidelines as closely as possible. Providers with questions or needing assistance with MiDPP billing should contact the MDHHS PHA Diabetes & Kidney Unit. (Refer to the Directory Appendix for contact information.)

7.5.A. OTHER BILLING CONSIDERATIONS [CHANGE MADE 4/1/2025]

The enrolled provider's lifestyle coach engages with the MiDPP beneficiary to determine the best learning situation for the individual and their ability to access sessions.

Sessions may take place in the following modalities and make-up sessions are encouraged:

- In-person.
- Distance Learning (synchronous audio-visual or audio-only telemedicine): Lifestyle coaches deliver sessions where the coach is present in one location and participants are participating from another location.
- Online: An asynchronous mode of delivery where participants log into course sessions via a computer, tablet, or smart phone. Per CDC requirements and Medicaid policy, MiDPP lifestyle coach interaction (in person or via synchronous telemedicine) is required and must be no less than once per week during the first six months and once per month during the second six months.

When billing for a telemedicine session, synchronous or asynchronous, MiDPP providers are expected to adhere to current MDHHS **telemedicine policy (revised 4/1/2025)** as found in the Telemedicine Chapter of this manual. Refer to the Michigan Medicaid Telemedicine Fee Schedule for the list of current codes acceptable for MiDPP telemedicine claims. (Refer to the Directory Appendix for fee schedule website information.)

Claims for an asynchronous session must include the appropriate procedure code and the remark "Service provided via an asynchronous telemedicine platform".

7.6 FEDERALLY QUALIFIED HEALTH CENTER (FQHC), RURAL HEALTH CLINIC (RHC), TRIBAL HEALTH CENTER (THC) AND TRIBAL FQHC REIMBURSEMENT

MiDPP services are reimbursed at the Medicaid Fee Screen reimbursement rate and are not eligible for the Prospective Payment System (PPS) or the All-Inclusive Rate (AIR). Claims for sessions are submitted on the professional claim form with NPI numbers specific to the clinic MiDPP provider and lifestyle coaches.

7.7 PROGRAM OVERSIGHT

The DKU and the Michigan Medicaid policy area will monitor the MiDPP through quality checks of documentation and required data reporting. CDC recognition status and delivery mode capabilities of each MiDPP provider and associated lifestyle coaches will be tracked to ensure continued Medicaid provider enrollment eligibility.

MiDPP records will be used to verify that a Medicaid beneficiary has met requirements for billed MiDPP codes. Documentation for review must be available. For information on Medicaid post-payment review, refer to the General Information for Providers chapter of this Manual, Post-Payment Review and Fraud/Abuse section.

SECTION 8 – MICHILD

8.1 ELIGIBLE BENEFICIARIES

The MICHild Medicaid program provides health care coverage for children who:

- Are age 0 through 18
- Have income at or below 212% of the Federal Poverty Level under the Modified Adjusted Gross Income (MAGI) methodology
- Do not have other comprehensive medical insurance (this includes insurance that covers inpatient and outpatient hospital services, laboratory, x-ray, pharmacy and physician services)
- Do not qualify for other MAGI related Medicaid programs
- Are residents of the State of Michigan

The child's eligibility for MICHild is determined through the MAGI methodology. All criteria for MAGI eligibility must be met to be eligible for MICHild.

Children enrolled in MICHild are exempt from copay for services.

8.2 COVERED SERVICES

Children enrolled in MICHild are considered Medicaid beneficiaries and are entitled to all Medicaid covered services.

SECTION 9 – PEDIATRIC OUTPATIENT INTENSIVE FEEDING PROGRAM SERVICES

Pediatric Outpatient Intensive Feeding Program services are for beneficiaries with significant feeding and swallowing difficulties and are part of the Early and Periodic Screening, Diagnosis and Treatment (EPSDT) benefit. (Refer to the Early and Periodic Screening, Diagnosis and Treatment Chapter for additional information.)

Pediatric Outpatient Intensive Feeding Program services may be reimbursed through Medicaid Fee-for-Service (FFS). Covered services that are carved out of the Medicaid Health Plan (MHP) delivery system will be reimbursed through FFS consistent with applicable Medicaid policy.

9.1 GENERAL INFORMATION

Pediatric feeding disorders are a complex set of feeding and swallowing problems that disrupt the acquisition of functional age-appropriate feeding habits. To resolve complex pediatric feeding issues, clinical evidence indicates that both medical and behavioral interventions are needed. Failure to address feeding issues in young children can be severe and include growth failure, susceptibility to chronic illness, and/or death.

A Pediatric Outpatient Intensive Feeding Program is an onsite day program that is delivered by a team of medical, behavioral health and other professionals who address complex feeding issues through integrated, individualized care.

9.2 PROGRAM SERVICES

Medicaid covers medically necessary Pediatric Outpatient Intensive Feeding Program services for eligible beneficiaries. Pediatric Outpatient Intensive Feeding Program services primarily focus on children who have been diagnosed by a medical professional to have significant feeding difficulties that have not been resolved or treated adequately through less intensive therapies. Pediatric Outpatient Intensive Feeding Program services utilize a multi-disciplinary team to assist the beneficiary and their parents/guardians in improving the beneficiary's ability to eat and swallow and improve nutritional outcomes. Pediatric Outpatient Intensive Feeding Program services include an initial comprehensive assessment, individualized plan of care (POC), on-going monitoring, and incorporate appropriate behavioral modification techniques and parent/guardian education/training. Pediatric Outpatient Intensive Feeding Program services offer an intensive focus on oral-motor skill development with attention to nutritional markers for the most therapeutic outcome.

Medicaid covers medically necessary Pediatric Outpatient Intensive Feeding Program services for eligible beneficiaries. Pediatric Outpatient Intensive Feeding Program services:

- Primarily focus on children who have been diagnosed by a medical professional to have significant feeding difficulties that have not been resolved or treated adequately through less intensive therapies;
- Utilize a multi-disciplinary team to assist the beneficiary and their parents/guardians in improving the beneficiary's ability to eat and swallow and improve nutritional outcomes;

Medicaid Provider Manual

- Include an initial comprehensive assessment, individualized POC, ongoing monitoring, and incorporate appropriate behavioral modification techniques and parent/guardian education/training; and
- Offer an intensive focus on oral-motor skill development with attention to nutritional markers for the most therapeutic outcome.

Pediatric Outpatient Intensive Feeding Program services are designed to evaluate, diagnose and treat beneficiaries with significant feeding and swallowing difficulties. The initial comprehensive evaluation is performed by a multi-disciplinary team who meets with the beneficiary and their parents/guardians to assess the beneficiary's current status and potential for improvement. The initial comprehensive evaluation should include:

- Assessment of medical history and physical exam;
- Nutritional history and evaluation of growth and nutritional parameters;
- Psychological assessment of developmental, cognitive, emotional and behavioral function;
- Psychosocial evaluation;
- Evaluation of oral-motor function (may include videofluoroscopy swallow study, Fiberoptic Endoscopic Evaluation of Swallowing (FEES), clinical swallowing evaluation, and sensory evaluation);
- Standardized tests and/or objective functional baseline measures to assist with planning short- and long-term goals and to document progress;
- Observation of a simulated meal/snack time; and
- Development of an individualized POC.

Following the initial comprehensive evaluation, the beneficiary and their parents/guardians commit to an outpatient program which may typically be held five days per week, six to eight hours per day, for a period up to six weeks. The goals of Pediatric Outpatient Intensive Feeding Program services are to:

- Promote consistent mealtime acceptance;
- Promote good nutrition;
- Increase the variety of foods the beneficiary will eat;
- Promote development of oral-motor skills for feeding;
- Promote developmental feeding skills, such as cup drinking and self-feeding;
- Transition from tube to oral feeding; and
- Assist the beneficiary and/or parents/guardians in acquiring feeding skills through education/training.

Beneficiaries should be routinely monitored, and one-on-one consultations and/or conferences with team members should be routinely scheduled to discuss progress. Supportive services provided during this time may include speech therapy, occupational therapy, physical therapy and/or social work. Progress is assessed regularly and the POC is updated, if continuation is necessary.

Medicaid Provider Manual

9.3 INDICATIONS FOR SERVICES

Pediatric Outpatient Intensive Feeding Program services may be considered medically necessary for individuals with anatomical, physiological, congenital, or cognitive conditions and/or complications of severe illness who experience significant feeding difficulties. Eligible beneficiaries must meet all the following criteria:

- Significant oral-motor problems and/or chronic medical condition exist;
- Normal feeding milestones have not been met through previous therapies and treatment;
- Suboptimal nutritional status has been determined; and
- Inadequate responsiveness to less intensive treatment has been clinically documented.

Examples of feeding disorders treated in these programs include, but are not limited to:

- Oral-motor dysfunction (including swallowing, oral and/or pharyngeal dysphagia);
- Severe pathology in the perception of, or response to, sensory input to the extent that it significantly limits the ability to function;
- Gastrointestinal disorders; and
- Feeding tube dependency.

Pediatric Outpatient Intensive Feeding Program services are not covered for individuals with specific eating disorders (e.g., binge eating, bulimia, anorexia or obesity-related disorders).

9.4 PROVIDER QUALIFICATIONS

Pediatric Outpatient Intensive Feeding Programs are provided under the delegation and supervision of a Medical Director and delivered by a multi-disciplinary team of medical, behavioral health and other professionals who are licensed, certified and/or registered to provide health-related services within the scope of practice for their discipline. The multi-disciplinary team should integrate and coordinate an individualized, comprehensive POC to address complex feeding issues. Each Pediatric Outpatient Intensive Feeding Program must have the following staff actively involved in the assessment process and/or development/implementation of the POC.

Provider Type	Required Qualifications
Pediatrician	A Medicaid-enrolled and CSHCS-approved physician who possesses or is eligible for Pediatric Specialty Board Certification. Physicians are expected to remain familiar with current developments and standards of treatment in their respective fields. May serve in the required role as Medical Director.
Subspecialist	A Medicaid-enrolled and CSHCS-approved physician who possesses or is eligible for Pediatric Subspecialty Board Certification, including physicians with special training and demonstrated clinical experience related to pediatric feeding clinic issues. Physicians are expected to remain familiar with current developments and standards of treatment in their respective fields. May serve in the required role as Medical Director.
Licensed Behavioral Health Professional	A Licensed Behavioral Health Professional, such as a licensed psychologist or licensed Master's Social Worker, with at least two years of professional experience in providing services to children/youth and their families.

Medicaid Provider Manual

Provider Type	Required Qualifications
Occupational Therapist	A Licensed Occupational Therapist with at least one year of professional pediatric experience.
Registered Dietitian (RD) or Registered Dietitian Nutritionist (RDN)	An RD or RDN in possession of a Master's degree in human nutrition, public health, or a health-related field with an emphasis on nutrition, and one year of pediatric nutrition experience in providing nutrition assessment, education and counseling.
Speech-Language Pathologist	A Licensed Speech-Language Pathologist in possession of a Master's degree, and at least one year of professional pediatric experience.
Other staff	Other staff may include registered nurses, physical therapists, etc.
Parent/Guardian and/or Beneficiary	The parent/guardian and/or the beneficiary must be an active, participating team member in the development of the beneficiary's comprehensive POC.

9.5 SERVICE PROVIDER ENROLLMENT

CSHCS-approved, Medicaid-enrolled program sites must be certified by the Michigan Department of Health and Human Services (MDHHS). MDHHS certification will be based upon adherence to the following requirements:

- Existence of a program schedule of services and supports.
- Assessment and POC services must be delivered by professional staff, as identified.
- If an aide under professional supervision delivers direct services, that supervision must be documented in the beneficiary's medical record.

Certification of new program sites will be contingent upon submission of acceptable enrollment information to MDHHS or upon a site visit by MDHHS.

9.6 PRIOR AUTHORIZATION

Pediatric Outpatient Intensive Feeding Program services require prior authorization. Requests for prior authorization must be submitted utilizing form MSA-6544-B (Practitioner Special Services Prior Approval – Request/Authorization) and include documentation to support medical necessity such as height/weight measurements and previously attempted therapeutic interventions. (Refer to the Prior Authorization subsection of the Practitioner Chapter for additional information.) Medicaid forms can be accessed on the MDHHS website. (Refer to the Directory Appendix for website information.)

A copy of the prior authorization must be retained in the beneficiary's medical record.

Pediatric Outpatient Intensive Feeding Program services must request prior authorization to continue intensive treatment services beyond the current authorization period, even if a beneficiary changes providers. A copy of the latest re-evaluation must be submitted with the prior authorization request.

Requests for continued treatment must be supported by all of the following:

- Summary of previous treatment period (not to exceed 90 days prior to that time period for which prior authorization is being requested), including measurable progress on each short- and long-term goal, rate of progress, statement of the beneficiary's response to treatment, and any factors that have affected progress during the therapy period. Do not send daily treatment notes.

Medicaid Provider Manual

- Revised goals and justification for any change in the treatment plan for the requested period of treatment.
- Statement detailing any parent/guardian education and training.

9.7 BILLING AND REIMBURSEMENT

Reimbursement for Pediatric Outpatient Intensive Feeding Program services is a bundled payment rate based on the covered services provided by a multi-disciplinary team. This service is reimbursed as a daily rate comprised of all costs associated with the services provided within the day program, including: facility-related costs; medical care services provided by the physician and other licensed practitioners; services provided by clinical staff working under the delegation and supervision of a licensed medical practitioner; and diagnostic, screening and rehabilitative services. Services are billed as FFS claims through the Community Health Automated Medicaid Processing System (CHAMPS) regardless of beneficiary health plan status. Providers are to bill using Healthcare Common Procedure Coding System (HCPCS) code S0317 (disease management; per diem).

SECTION 10 – TARGETED CASE MANAGEMENT SERVICES FOR RECENTLY INCARCERATED BENEFICIARIES

10.1 GENERAL INFORMATION

Targeted case management (TCM) services are part of a comprehensive health benefit available to individuals with chronic or complex physical or behavioral health care needs and were recently released from an incarcerated setting. TCM services assist individuals in gaining access to appropriate medical, educational, social, and/or other services. TCM services include assessments, planning, linkage, advocacy, care coordination, referral, monitoring, and follow-up activities (e.g., education and supports).

10.2 BENEFICIARY ELIGIBILITY

TCM services are available to any beneficiary who is 18 years of age and older; meets Medicaid eligibility requirements; has a chronic or complex physical or behavioral health care need; and was a recent inmate or was involuntarily residing in a state prison or county jail. A recent inmate is an individual who was in custody and held involuntarily through operation of law enforcement authorities in an institution which is the responsibility of a governmental unit or over which a governmental unit exercises administrative control.

Eligible beneficiaries will be offered the choice of receiving the TCM services benefit. An initial in-reach visit may occur by a licensed registered nurse (RN), a fully licensed clinical social worker (LMSW), a community health worker (CHW), a peer support specialist (PSS), a peer recovery coach (PRC), or other licensed medical or behavioral health professionals operating within their state law defined scope of practice. The TCM services benefit includes a comprehensive assessment visit, development of a care plan, referrals and related activities, monitoring, and follow-up activities. Beneficiaries are eligible for TCM services for a period of 12 months. In addition to TCM services, eligible beneficiaries will receive the full array of Medicaid-covered benefits.

10.3 ACCESSING SERVICES VIA IN-REACH

TCM providers should conduct an in-reach visit in person when feasible. In-reach is a service provided to individuals prior to their release from an incarcerated setting to establish a relationship with a provider, identify health conditions, transition medical records, and set up community-based care. The TCM provider should review the information provided by prison or county jail personnel to verify the beneficiary's current Medicaid benefit plan and determine the appropriate process and team members (e.g., CHW, PSS, PRC, LMSW, or RN) to fulfill the in-reach service.

The in-reach visit should occur at least 7-14 calendar days, and no more than 30 calendar days, prior to the beneficiary's release from the incarcerated setting. The in-reach visit is to be provided face-to-face. Face-to-face is defined as either in-person or via telehealth (i.e., simultaneous audio and visual technology). Efforts should be made ahead of time to identify and address any accommodations needed by the beneficiary to support their access of the in-reach visit. The TCM provider must document the date of release and the date of the in-reach/initial contact in the beneficiary's medical record. The purpose of in-reach includes, but is not limited to:

- further educating the beneficiary regarding the TCM services program and answer any questions;

Medicaid Provider Manual

- collecting the beneficiary's demographic information, family contact information, criminal history, parole/probation officer information, current legal status, anticipated release date, and medical, behavioral health, and substance use disorder (SUD) history;
- collecting information regarding where the beneficiary plans to reside upon release from incarceration and how they can be contacted;
- coordinating medication-assisted treatment (MAT) to continue needed prescriptions and other immediate needs upon release from incarceration; and
- scheduling the initial in-person comprehensive assessment visit with the qualified case manager within 90 days of release from the prison or county jail.

10.3.A. PRISON AND COUNTY JAIL IN-REACH PROCESS

The qualified health professional (QHP) or qualified mental health professional (QMHP) from the prison, or the county jail medical and/or behavioral health staff, will identify Medicaid-eligible beneficiaries that may qualify for the TCM benefit. The recommendation for a beneficiary to participate in the TCM benefit should be based on an assessment of their chronic and/or complex physical and/or behavioral health care needs.

The QHP, QMHP, or county jail personnel should share information regarding the details of the TCM services program with the beneficiary and offer them a choice to participate in the benefit. The beneficiary should be provided with a list of available choices of TCM providers in the area they plan to reside once released.

Once the beneficiary chooses a TCM provider, the QHP, QMHP, or county jail personnel will reach out to the provider to coordinate a face-to-face in-reach visit with a qualified case manager, CHW, PSS, or PRC that the TCM provider has identified to furnish the visit. The TCM provider should follow-up with the prison or county jail within three (3) business days of being contacted.

Referrals for TCM should be coordinated among the available TCM providers in the community, and these services should be rendered in the most appropriate setting. For example, a referral to a federally qualified health center (FQHC) or other clinic setting may be a more appropriate setting to address a medical or physical health care need; whereas a certified community behavioral health clinic (CCBHC) or community mental health services program (CMHSP) may be more appropriate to address a beneficiary's behavioral health care need.

Prior to the in-reach visit, the QHP or QMHP from the prison or the county jail personnel should verify the beneficiary's Medicaid status and forward a pre-screen form that includes the beneficiary's name, Medicaid ID number, date of birth, contact information, family contact information, demographics, parole/probation officer contact information, anticipated release date, and health history to the TCM provider. In addition, visiting staff from the TCM provider are required to complete a Law Enforcement Information Network (LEIN) security clearance form prior to entering the prison setting.

10.4 CORE ELEMENTS OF TCM SERVICES

TCM services must include coordination with the beneficiary's primary care provider (PCP), other providers, and Medicaid health plan (MHP), as applicable. The purpose of TCM services is to provide a comprehensive array of services that are appropriate to the conditions of the beneficiary. At a minimum, TCM services must include:

- an in-person comprehensive assessment, history, re-assessments, and identification of a course of action to determine the specific needs of the beneficiary and to develop an individualized care plan;
- referral, linking, coordinating, follow-up, and monitoring to assist the beneficiary in gaining access to services; and
- coordination with the beneficiary's PCP, other providers, and MHP, as applicable.

10.4.A. COMPREHENSIVE ASSESSMENT VISIT

The beneficiary must be offered the choice to participate in the TCM services benefit program or any another program that provides a similar case management benefit that they may qualify for. Beneficiaries are not restricted from receiving case management services from any qualified Medicaid provider.

A qualified case manager (e.g., licensed nurse or clinical social worker) should perform an in-person comprehensive assessment visit within 90 days after the beneficiary is released from the prison or county jail. The comprehensive assessment visit is limited to one (1) visit per beneficiary throughout each 12-month period of eligibility following release from an incarcerated setting.

During the initial visit, the qualified case manager must verify the beneficiary's Medicaid eligibility and coverage by utilizing the Benefit Plan ID(s) provided in the Community Health Automated Medicaid Processing System (CHAMPS) eligibility response. (Refer to the Verifying Beneficiary Eligibility section of the Beneficiary Eligibility chapter for additional information.) The qualified case manager should contact MDHHS Provider Support to have the benefit plan updated to end the Medicaid incarceration benefit plan restrictions, if needed. (Refer to the Directory Appendix for Targeted Case Management Services for Recently Incarcerated Beneficiaries for contact information.) Information should include the following:

- beneficiary's name, Medicaid ID number, and date of birth;
- beneficiary's incarceration release date;
- incarceration facility name;
- claims information, if applicable; and
- information regarding documentation/proof of discharge that was uploaded into the Document Management Portal (DMP) (e.g., release paper or Offender Tracking and Information System (OTIS) screenshot).

Medicaid Provider Manual

The DMP is a tool in CHAMPS that allows providers and billers to upload documents and submit supporting documentation electronically for Medicaid electronic claims. (Refer to the Directory Appendix for more information and tutorials regarding the Document Management Portal.)

The purpose of the comprehensive assessment visit is to gather sufficient information to develop an individualized care plan for the beneficiary. Initial comprehensive assessment activities include, but are not limited to, the following:

- taking a beneficiary's history;
- identifying the beneficiary's needs and completing related documentation;
- gathering information from the beneficiary and other chosen sources, such as family members, medical providers, social workers, and educators (if necessary), to form a complete assessment of the beneficiary;
- assessment of the beneficiary's access to a PCP and other healthcare providers;
- assessment of the beneficiary's dental needs;
- assessment of the beneficiary's access to transportation;
- supporting the beneficiary in the timely completion of MHP enrollment using the Michigan ENROLLS established process;
- identifying available community-based resources;
- facilitating and coordinating referrals and related activities;
- scheduling a medical visit with a physician to address immediate health care needs if necessary, or coordinating with the beneficiary's chosen MHP to schedule a medical visit with their PCP within 30 days of the beneficiary's release from an incarcerated setting; and
- coordinating any necessary substance abuse or behavioral health assessments and related services needed with the prepaid inpatient health plan (PIHP)/CMHSP.

10.4.B. DEVELOPMENT OF THE CARE PLAN AND DOCUMENTATION

During or immediately following the in-person initial comprehensive assessment visit, a specific care plan that is based on the information collected through the initial comprehensive assessment must be developed for beneficiaries who agree to participate in the TCM services program. The care plan must specify the goals and actions to address the medical, educational, social, and/or other services needed by the beneficiary. The qualified case manager must work with the beneficiary and others chosen by the beneficiary to develop those goals, and to identify a course of action to respond to the assessed needs of the beneficiary. The care plan should address the physical and behavioral health needs of the beneficiary, along with any other needed resources such as housing, energy assistance, food and nutrition, vocational training, cultural and spiritual needs, and transportation needs. The care plan should be shared with the beneficiary's MHP, PCP and PIHP, as applicable, to the extent permitted under all applicable state and federal laws.

Medicaid Provider Manual

TCM providers are required to document the following information for all beneficiaries receiving TCM services:

- name of the beneficiary;
- dates of the TCM services;
- name of the TCM provider and qualified case manager providing TCM services;
- nature and content of the TCM service visits conducted, and whether goals specified in the care plan were achieved;
- whether the beneficiary has declined services proposed within the care plan;
- plan monitoring and follow-up to include activities and contacts that are necessary to ensure the care plan is implemented and adequately addresses the eligible beneficiary's needs;
- estimating the frequency of the monitoring and follow-up visits to adequately meet the needs and wants of the beneficiary during the 12 months of eligibility;
- the need for, and occurrences of, coordination with other providers;
- timeline for obtaining needed services;
- timeline for re-evaluation of the care plan; and
- update of the care plan as needed.

10.4.C. REFERRALS AND RELATED ACTIVITIES

In collaboration with the PCP and the MHP, it is expected that the qualified case manager will facilitate and coordinate referral and related activities to assist the beneficiary in obtaining needed services of their choosing. Activities such as scheduling appointments or linking the beneficiary with medical, educational, social, and/or other providers, programs, and services to address identified needs and achieve goals specified in the care plan are primary components of TCM services. Referral activities include, but are not limited to, the coordination of the following:

- medical/physical and behavioral healthcare services;
- dental services;
- SUD services;
- transportation services;
- nutritional and food services and resources (e.g., diabetes education, obesity reduction and prevention, and/or coordinating referrals to the Supplemental Nutrition Assistance Program [SNAP], Women, Infants, and Children [WIC] Program or Food Assistance Program [FAP]);
- housing and energy assistance;
- education resources;
- employment, job training, vocational rehabilitation, or other financial services; and

Medicaid Provider Manual

- any additional social supports and services to assist the beneficiary in obtaining other needed services and assistance.

10.4.D. MONITORING AND FOLLOW-UP ACTIVITIES

Monitoring and follow-up activities include activities and contacts that are necessary to ensure the care plan is implemented and adequately addresses the eligible beneficiary's needs, and which may be conducted with the beneficiary, family members, service providers, or other entities or other beneficiaries of their choosing. Monitoring and follow-up activities are conducted as frequently as necessary throughout each 12-month period of eligibility following release from an incarcerated setting.

Monitoring and follow-up activities include making necessary adjustments in the care plan and service arrangements with providers. The case manager must determine, on an ongoing basis, if the services and supports have been delivered, and if they are adequate to meet the needs/wants of the beneficiary. Frequency and scope of case management monitoring activities must reflect the intensity of the beneficiary's physical health, behavioral health, and welfare needs identified in the beneficiary's care plan.

10.4.D.1. MONITORING VISITS

Monitoring visits are provided by a qualified case manager and may or may not require face-to-face interaction. Monitoring visits are limited to 11 visits throughout each 12-month period of eligibility following release from an incarcerated setting.

Monitoring visits are provided to ensure the beneficiary's needs are being met. Monitoring activities include, but are not limited to, addressing that:

- services are being furnished in accordance with the beneficiary's care plan;
- services in the care plan are adequate;
- changes in the needs or status of the beneficiary are reflected in the care plan;
- the beneficiary has received a medical/physical health visit by a physician or non-physician practitioner (NPP) and is receiving appropriate follow-up services, if necessary;
- the beneficiary has received a behavioral health assessment visit by a behavioral health specialist and is receiving appropriate follow-up services, if necessary;
- the beneficiary has been screened for SUD and has been referred to the PIHP for any treatment services, if necessary;
- the beneficiary's dental needs are being met;
- the beneficiary's transportation needs are being met;
- the beneficiary is residing in a safe and accessible environment (e.g., house, apartment, etc.);
- the beneficiary has access to daily food and nutritional needs;
- the beneficiary has been offered or is engaging in some type of education, vocational rehabilitation, and/or job training; and/or
- the beneficiary is being facilitated in a job search.

10.4.D.2. FOLLOW-UP ACTIVITIES

Follow-up activities include education and support visits that may be provided by a qualified case manager or another professional under the supervision of the qualified case manager, such as a CHW, PSS, or a PRC. Education and support visits may or may not require face-to-face interaction and they are limited to 11 visits throughout each 12-month period of eligibility following release from an incarcerated setting. Education and support services include activities that are necessary to ensure the beneficiary receives personalized assistance and guidance in navigating the healthcare system and numerous other needed resources and services. Education and support services include activities to support the beneficiary in attaining their goals identified in the care plan and include, but are not limited to, the following:

- verify the beneficiary's Medicaid eligibility and coverage by utilizing the Benefit Plan ID(s) provided in the CHAMPS eligibility response. (Refer to the Verifying Beneficiary Eligibility section of the Beneficiary Eligibility chapter for additional information.) The qualified case manager, or another professional under the supervision of the qualified case manager, should contact MDHHS Provider Support to have the benefit plan updated to end the Medicaid incarceration benefit plan restrictions, if needed. (Refer to the Directory Appendix for Targeted Case Management Services for Recently Incarcerated Beneficiaries for contact information.)
- facilitate the care plan;
- encourage the beneficiary to receive a medical/physical health visit by a physician or NPP, as well as appropriate follow-up services if necessary;
- encourage the beneficiary to receive a dental visit;
- meet regularly with the TCM provider healthcare team to plan care, and exchange information with other healthcare team members;
- follow-up with the beneficiary one to two weeks following the medical visit with the PCP;
- coordinate with the beneficiary's parole/probation officer to identify and assist the beneficiary in accessing community resources and social services (e.g., smoking cessation programs, food assistance, energy assistance, transportation, legal services, etc.);
- coordinate with the beneficiary's parole/probation officer to identify housing assistance and provide support locating and acquiring appropriate housing for achieving independent living (e.g., assisting with Section 8 Housing voucher applications);
- provide vocational assistance and support by aiding the beneficiary in seeking education and/or training opportunities, job seeking, developing self employment opportunities, etc.
- facilitate health education and support groups;
- provide support in accessing religious services and/or cultural services;
- provide support in accessing veteran services;
- provide support in accessing assistive technologies and services;
- develop, implement, and provide health, wellness, and prevention initiatives to address preventable risk factors for chronic conditions;

Medicaid Provider Manual

- provide education on health conditions and strategies to implement care plan goals, including both clinical and non-clinical needs;
- reduce barriers to care coordination;
- promote healthy lifestyle interventions;
- encourage routine preventive care, such as immunizations and screenings;
- educate the beneficiary in the management of chronic conditions;
- track test results;
- facilitate adherence to treatment;
- inquire if there are any issues taking medications or getting prescriptions filled;
- assist the beneficiary in making informed decisions;
- facilitate coordination between various services and providers;
- notify the MHP case manager when visits have been scheduled;
- assist with scheduling appointments, including coordinating transportation;
- coordinate and track referrals to community and social supports; and
- advocate for any of the beneficiary's needs.

10.5 TARGETED CASE MANAGEMENT (TCM) PROVIDER QUALIFICATIONS

The TCM provider must be enrolled as a Michigan Medicaid provider and have the ability to demonstrate the following criteria:

- the capacity to provide all core elements of case management services, including:
 - comprehensive beneficiary assessment;
 - comprehensive care plan development;
 - linking/coordination of services;
 - monitoring and follow-up of services; and
 - reassessment of the beneficiary's status and needs;
- case management experience in coordinating and linking such community resources as required by the target population;
- experience with the target population;
- the sufficient number of staff to meet the case management service needs of the target population;
- an administrative capacity to ensure quality of services in accordance with state and federal requirements;
- a financial management capacity and system that provides a record of services and costs;
- the capacity to document and maintain beneficiary case records in accordance with state and federal requirements; and

Medicaid Provider Manual

- has the willingness and capabilities to coordinate with the beneficiary's PCP and MHP as applicable.

Providers that may enroll through CHAMPS as a TCM provider for recently incarcerated beneficiaries may be a:

- Community Mental Health Services Program (CMHSP);
- Federally Qualified Health Center (FQHC);
- Rural Health Clinic (RHC);
- Tribal Health Center (THC); or
- Tribal Federally Qualified Health Center (Tribal FQHC).

CCBHCs can provide similar TCM services for beneficiaries; however, CCBHCs will not enroll through CHAMPS as a TCM provider for recently incarcerated beneficiaries. CCBHCs are certified by MDHHS to provide a robust set of coordinated, integrated, and comprehensive services (including TCM) to beneficiaries with any mental or SUD diagnosis. A CMHSP may be enrolled as both a CCBHC and as a TCM provider; however, any similar case management services cannot be furnished by more than one organization or program for a single beneficiary.

The TCM provider must have the capability to coordinate with the beneficiary's health plan and the individual facilitating the re-entry from the prison or county jail. The TCM provider must employ a qualified case manager who is licensed to practice in accordance with Michigan law. Documentation of the provider's qualifications and credentials must be maintained by the TCM provider. The documentation indicates that the provider is qualified to furnish TCM services based on education and experience. The TCM provider must have a health information technology (HIT) record system, policies, procedures, and practices to create, document, execute, and update plans of care for the beneficiary.

Michigan Medicaid enrolled providers are required to sign an attestation document indicating they are able to meet the requirements of the TCM provider qualifications to be officially recognized as a TCM provider. Providers must sign the attestation agreeing to adhere to this policy and all applicable laws and return the attestation form to MDHHS. A provider may become designated as a TCM provider only after MDHHS receives, and approves, the signed attestation which may be returned through the "Upload Documents" section of the CHAMPS Provider Enrollment subsystem. (Refer to the Provider Enrollment section of the General Information for Providers chapter for additional information.) (Refer to the Directory Appendix for Targeted Case Management Services for Recently Incarcerated Beneficiaries for the attestation document located on the website.)

10.5.A. QUALIFIED CASE MANAGERS

Qualified case managers may provide all components of TCM within their scope of practice. A qualified case manager must meet one of the following criteria:

- licensure as a Registered Nurse by LARA and at least one year of experience providing community health or case management services; or
- licensure as a fully licensed Clinical Social Worker by LARA and at least one year of experience providing social work or case management services.

Medicaid Provider Manual

In collaboration with the treating physician or NPP, the qualified case manager provides an assessment of needs; develops and maintains a care plan; manages care transitions; provides education and support to the beneficiary; identifies community mental health, SUD, and physical health resources; and facilitates access to care, supports, and services. TCM services are provided by a multi-disciplinary team of licensed medical and behavioral health professionals operating within their state law defined scope of practice. Licensed providers assume professional responsibility for the services provided by any unlicensed practitioner (e.g., CHW, PSS, PRC, etc.).

10.5.B. PHYSICIAN OR NON-PHYSICIAN PRACTITIONER (NPP)

A Medicaid-enrolled physician or NPP licensed by LARA must provide general supervision of the qualified case manager. An NPP is a healthcare professional licensed as a nurse practitioner, physician assistant, or a clinical nurse specialist.

10.5.C. COMMUNITY HEALTH WORKERS (CHWs)

The TCM provider may include the services of a CHW. CHWs are professionals who are defined by the American Public Health Association (APHA) as frontline public health workers who understand the community they serve. The CHW serves as a liaison/link/intermediary between health/social services and the community to facilitate access to services and improve the quality and cultural competence of service delivery. CHWs also work to increase a beneficiary's health knowledge and self-sufficiency through a range of activities such as outreach, community education, informal counseling, social support and advocacy.

CHWs may serve as a liaison between the penal system, the healthcare system, and the community, and they work to facilitate access to services and improve the quality and cultural competence of service delivery. The CHW may also coach beneficiaries in managing health conditions, assist with scheduling appointments, facilitate coordination between various providers, and assist beneficiaries with completion of applications for programs for which they may be eligible. A CHW must work in collaboration with the beneficiary's qualified case manager and must:

- be at least 18 years of age;
- possess a high school diploma or equivalent;
- be supervised by licensed professional members of the care team; and
- complete a CHW Certificate Program or equivalent.

10.5.D. PEER SUPPORT SPECIALISTS (PSS) AND PEER RECOVERY COACHES (PRC)

The TCM provider may include the services of PSSs and/or PRCs. A PSS and/or PRC must work in collaboration with the beneficiary's qualified case manager, and must:

- be supervised by licensed professional members of the care team;
- be freely chosen by the beneficiary; and

Medicaid Provider Manual

- meet the MDHHS application approval process for specialized training and certification requirements;

Refer to the Covered Services section of the Behavioral Health and Intellectual and Developmental Disability Supports and Services chapter for more information. (Refer to the Directory Appendix for Peer Recovery Information website information.)

10.6 TRANSFER OF CARE/RECORDS

During the course of care, the beneficiary may require services from a different TCM provider due to relocation of the beneficiary's primary residence or due to a request of the beneficiary to change TCM providers. The referring TCM provider must consult with the new TCM provider about the case and transfer all applicable information and records, including all completed assessment visits and the updated care plan, to the new TCM provider in compliance with the privacy and security requirements of federal and state laws and regulations including, but not limited to, the Health Insurance Portability and Accountability Act (HIPAA) and the Michigan Mental Health Code.

10.7 TCM CLOSURE

TCM services are considered complete when any of the following occurs:

- the beneficiary's eligibility of 12 months has expired;
- the beneficiary has received the allowable number of TCM services over a 12-month time period;
- the beneficiary communicates the desire to terminate or refuse TCM services to the TCM provider; or
- the beneficiary becomes non-adherent or non-compliant with the care plan or TCM provider.

When services are terminated or refused, TCM services may be resumed at any point during the defined 12-month period of eligibility. Upon completion of TCM services, a completed care plan, including discharge summary (including the services provided, outcomes, current status, and ongoing needs of the beneficiary) must be shared with the PCP, PIHP, MHP case manager, and beneficiary in alignment with confidentiality laws and regulations when the TCM case is closed.

10.8 COVERED SUPPORTS AND SERVICES

A maximum of 23 visits per year will be reimbursed for each eligible beneficiary as follows:

- one in-person visit for the initial comprehensive assessment;
- a maximum of 11 face-to-face and/or non-face-to-face monitoring visits; and
- a maximum of 11 face-to-face and/or non-face-to-face follow-up (patient education and supports) visits.

If the beneficiary returns to incarceration and is then once again released, their period of eligibility will start over, but the remainder of their monitoring and follow-up visits will not be renewed. For additional visits, MDHHS requires the provider to obtain prior authorization before the service is rendered. (Refer to the Directory Appendix for contact information regarding prior authorizations.)

Medicaid Provider Manual

Reimbursement for assessment, monitoring, and follow-up visits is inclusive of all related care coordination and monitoring activities. MDHHS does not reimburse for missed appointments/visits. A beneficiary may not be billed for a missed appointment/visit. Medicaid reimbursement for TCM services may not duplicate payments made to public agencies or private entities under other program authorities for the same purpose. To avoid duplication of services, TCM services should not be provided to beneficiaries receiving the following Medicaid program services:

- MI Care Team Health Home benefit;
- Behavioral Health Home benefit;
- Substance Use Disorder Health Home benefit;
- Collaborative Care Management services; or
- Other case management benefit programs that provide similar services.

The TCM provider must have an established process to coordinate services for beneficiaries who may be covered under another program which offers components of case management or coordination similar to TCM. TCM does not include activities that constitute the direct delivery of underlying medical, educational, social, and/or other services to which an eligible beneficiary has been referred.

TCM coordination includes contacts with non-eligible beneficiaries when the contact is:

- directly related to identifying the eligible beneficiary's needs and care for the purpose of assisting the beneficiary in accessing services;
- identifying needs and supports to assist the beneficiary in obtaining services;
- providing case managers with useful feedback; and
- alerting case managers to changes in the beneficiary's needs.

10.9 CLAIMS SUBMISSION AND PAYMENT

Providers may verify beneficiary eligibility for TCM services through a CHAMPS online eligibility inquiry or via a HIPAA 270 transaction. The CHAMPS or 271 eligibility response for beneficiaries eligible for TCM services will show a current benefit plan of "TCM-INC" in addition to their assigned Medicaid-related benefit plans. All claims submitted and accepted are processed through CHAMPS. TCM services are carved out of the MHP's capitation and are billed and reimbursed as a fee-for-service benefit.

CMHSPs furnishing TCM services must submit claims on the professional format. FQHCs, RHCs, THC, and Tribal FQHCs must submit claims on the institutional format. FQHCs, RHCs, THC, and Tribal FQHCs furnishing TCM services will be reimbursed outside of the Prospective Payment System (PPS) or All-Inclusive Rate (AIR) methodology at the Medicaid fee schedule reimbursement rates for TCM services for recently incarcerated beneficiaries. All providers reported on claims for services must be Medicaid-enrolled. (Refer to the Targeted Case Management for Recently Incarcerated Fee Schedule in the Special Programs database on the MDHHS website. Refer to the Directory Appendix for website information.)

Providers participating as an MDHHS-certified CCBHC do not enroll through CHAMPS as a TCM service provider for recently incarcerated beneficiaries. CCBHCs enroll in a separate program and are reimbursed through a PPS methodology in which they receive a daily clinic-specific rate based on the average expected daily cost to deliver core CCBHC services which includes TCM services for recently incarcerated

Medicaid Provider Manual

beneficiaries. (Refer to the Certified Community Behavioral Health Clinic Demonstration section of the Behavioral Health and Intellectual and Developmental Disability Supports and Services chapter for more information.)

Upon release of the beneficiary from a county jail setting, the benefit plan should update to end the Medicaid incarceration restrictions. If this update does not occur, the TCM provider (e.g., qualified case manager) should contact MDHHS Provider Support to end the Medicaid incarceration benefit plan restrictions. The TCM provider may also coordinate with the corrections personnel to contact the local MDHHS office to ensure the Living Arrangement page within MI Bridges is correctly updated to end the program enrollment type (PET) code of "INC-Jail". Once the "INC-Jail" PET code ends, the TCM PET code of "TCMR-INC" will be automatically added to the beneficiary's benefit plan. Upon release of the beneficiary from a prison setting, the benefit plan should switch to the new TCM benefit plan and be updated automatically. The TCM provider should verify that the switch has occurred prior to rendering services.

10.9.A. INITIAL COMPREHENSIVE ASSESSMENT

The initial comprehensive assessment is to be provided in-person by a qualified case manager. The initial comprehensive assessment visit should require at least 60 minutes. Only one initial comprehensive assessment visit is allowed. Reimbursement includes time for the development of a care plan. Federal law prohibits the use of Medicaid funds to cover services, including in-reach, for inmates of public institutions (with the exception of inpatient hospital services).

10.9.B. MONITORING VISITS

Monitoring visits are to be provided face-to-face and/or non-face-to-face by a qualified case manager. Monitoring visits should require at least 60 minutes. A maximum of 11 face-to face and/or non-face-to-face monitoring visits per year are allowed. Additional monitoring visits which may be needed require prior authorization.

10.9.C. FOLLOW-UP ACTIVITIES/PATIENT EDUCATION AND SUPPORTS

Follow-up activities, including patient education and support visits, are to be provided face-to-face and/or non-face-to-face by a qualified case manager, CHW, PSS, or PRC. Follow-up visits should require at least 30 minutes. A maximum of 11 in-person face-to face and/or non-face-to-face follow-up visits per year are allowed. Additional follow-up visits which may be needed require prior authorization. Qualified case managers assume professional responsibility and supervision for follow-up visits that are provided by a CHW, PSS, or PRC.

SECTION 11 – TARGETED CASE MANAGEMENT – RECUPERATIVE CARE

11.1 GENERAL INFORMATION

Targeted Case Management (TCM) – Recuperative Care (RC) is a transitional program for Medicaid beneficiaries meeting eligibility requirements who are experiencing homelessness and discharging from an inpatient hospital admission. RC is a short-term program that allows these beneficiaries to recover post-hospitalization, receive case management services, access medical care or other Medicaid services, and receive supportive services.

11.2 PROVIDER REQUIREMENTS

The RC provider must be an enrolled Medicaid provider. The RC provider must meet the National Institute for Medical Respite Care (NIMRC) standards for medical respite care. (Refer to the Directory Appendix for website information.)

The RC provider must have:

- Private or semi-private rooms for Medicaid beneficiaries;
- Allow 24-hour access to rooms;
- Clean linens for each beneficiary upon admission;
- At least three meals per day must be provided;
- Secure place to store personal belongings;
- Secure medication storage accessible by the beneficiary;
- Appropriate storage for all durable medical equipment (DME);
- On-site access to laundry and shower facilities;
- 24-hour access to staff, and staff on-site who are minimally trained in first aid and basic life support on-site at all times;
- Written policies to allow beneficiary visitors to enter the facility/room;
- Written policies and procedures for life-threatening emergencies; and
- A facility that is compliant with local and state fire safety standards.

11.2.A. PROVIDER ENROLLMENT

Recuperative care (RC) providers seeking reimbursement for their services to Medicaid beneficiaries are required to be Medicaid-enrolled providers. To enroll as a Medicaid provider, an RC provider must obtain a Type 2 (Organization) National Provider Identifier (NPI) and complete an online application in the Community Health Automated Medicaid Processing System (CHAMPS).

The RC provider must meet NIMRC standards for medical respite care programs. The RC provider must complete the Michigan Recuperative Care Provider Attestation form (BPHASA-2428) attesting to meeting these requirements and provide any requested documentation to MDHHS to enroll as an RC provider. RC providers must complete the

Medicaid Provider Manual

attestation every three years. RC providers must revalidate every five years. Failure to complete these requirements will result in the RC provider being terminated as a Medicaid RC provider. (Refer to the Forms Appendix for a copy of the form.)

CHAMPS enrollment instructions can be found on the MDHHS website Provider Enrollment page. RC providers are subject to all relevant policy provisions outlined in the MDHHS Medicaid Provider Manual, including the General Information for Providers chapter.

11.3 BENEFICIARY ELIGIBILITY

RC is covered for Medicaid-enrolled homeless beneficiaries over 18 years old enrolled in fee-for-service (FFS) Medicaid, Healthy Michigan Plan and Managed Care. Emergency Services Only Medicaid, Plan First, and other limited coverage plans are excluded from coverage for recuperative care.

To be eligible for RC services, the beneficiary must be homeless and discharging from an inpatient hospital stay. The beneficiary must have a need for ongoing case management and support but is not eligible for continued hospitalization or another inpatient or higher acuity setting (such as a nursing facility).

The beneficiary must meet all the following for services to be authorized:

- The beneficiary must be homeless as defined by Housing and Urban Development, homeless category 1, literally homeless (24 CFR §578.3).
- Beneficiaries must be discharging from an inpatient hospital admission with an acute condition that can be addressed in less than 90 days.
- Beneficiaries must be medically stable, independently mobile, and be able to manage and perform their own activities of daily living (ADLs).
 - The beneficiary is able to complete ADLs (such as transfers, bed mobility, eating, toileting, etc.) without physical assistance, cueing, or supervision.
 - If a beneficiary does not meet this requirement, they may be eligible for other Medicaid services (e.g. nursing facility) and should be referred for these services.
- Beneficiaries must be able to manage medications, durable medical equipment, and medical supplies independently.
- Beneficiaries must have a need for case management and supportive services.
- Beneficiaries must be at risk for re-hospitalization or severe complications without the support of RC services.
- The beneficiary is not eligible for continued hospital admission, skilled nursing facility admission, in-patient psychiatric admission, or other Medicaid inpatient services.

Recuperative Care is not to supplant skilled nursing admission, behavioral health services, or other higher acuity settings for which the beneficiary is eligible.

11.4 PRIOR AUTHORIZATION

Recuperative services must be authorized by the MDHHS Program Review Division (PRD) prior to the start of services for all beneficiaries. RC providers must contact PRD Recuperative Care to complete a telephonic request for prior authorization (PA) and receive authorization before the start of services. (Refer to the Directory Appendix for contact information.)

RC services are authorized and billed per day. RC coverage will not exceed 90 days per hospital discharge.

RC providers must complete the Recuperative Care (RC) Prior Authorization (PA) Request Data form (BPHASA-2427) prior to requesting PA for Medicaid beneficiaries and maintain it in the beneficiary's record. (Refer to the Forms Appendix for a copy of the form.)

The following documents must be readily accessible for reference by the provider during the telephonic review:

- Completed Recuperative Care Prior Authorization Request Data form (BPHASA-2427);
- Most recent history and physical examination;
- Social work notes/assessment, including status as it relates to ineligibility for nursing facility, inpatient psychiatric, or other inpatient Medicaid services;
- Hospital consultation reports;
- Emergency department notes, if applicable;
- Most recent updated plan of care (POC) signed and dated by the ordering/managing physician;
- Most recent signed and dated nursing assessment, including a summary of the beneficiary's current status compared to their baseline status, completed by a registered nurse;
- Physical therapy and/or occupational therapy assessment, including a summary of the beneficiary's current functional status or level of functional independence with ADLs, DME and medication management;
- Hospital discharge plan (completed within two days of the PA request), including anticipated discharge orders for services such as medical follow-up, durable medical equipment/supplies, medications, and pharmaceuticals;
- Documentation that the beneficiary is homeless as defined by Housing and Urban Development, homeless category 1, literally homeless (24 CFR §578.3); and
- Anticipated admission date and discharge date from the RC facility.

For FFS beneficiaries, the PA must be obtained from PRD for care coordination (G9002) and room & board (S9976).

For Medicaid Health Plan (MHP) beneficiaries, the PA must be obtained from PRD for room & board (S9976) and the MHP must be contacted for PA for care coordination (G9002).

Medicaid Provider Manual

11.4.A. PA APPROVAL

If RC services are approved by PRD, the provider will be issued an authorization number and end date at the conclusion of the telephonic request. The approval does not guarantee that the beneficiary is eligible for Medicaid. If the beneficiary is not eligible on the date of service, MDHHS will not reimburse the provider for services provided and billed. To ensure payment, the provider must verify beneficiary eligibility monthly at a minimum.

If a beneficiary is re-hospitalized during a PA period, upon discharge, RC services may be resumed with the same RC provider without requiring a new PA. Extension of a PA interrupted by a re-hospitalization will be reviewed and considered on an individual basis. Extension of a PA beyond 90 days will be considered on an individual basis.

11.4.B. PA DENIAL

If services are denied by PRD, the RC provider will be informed of the denial. The beneficiary will be sent a letter notifying them of the denial with an explanation of their appeal rights. The denial letter will be sent to the beneficiary's address on record in CHAMPS, and a copy of the letter will be sent to the RC provider.

11.5 COVERED SERVICES

The purpose of RC services is to provide a comprehensive array of case management services that are appropriate to the conditions of the beneficiary, and to provide room and board. At a minimum, RC services must include:

- An in-person comprehensive assessment, history, re-assessments, and identification of a course of action to determine the specific needs of the beneficiary and to develop an individual POC;
- Planning, linking, coordinating, follow-up, and monitoring to assist the beneficiary in gaining access to services;
- Assistance in establishing permanent housing;
- Coordination with the beneficiary's primary care provider (PCP), other providers, and MHP, as applicable; and
- Room and Board.

11.5.A. COMPREHENSIVE ASSESSMENT

The comprehensive initial assessment, and periodic reassessment, must be completed in-person by a qualified case manager. The initial assessment must be completed within two days of admission to the RC provider. In-person reassessment must be completed at least quarterly, or when there is a significant change in the beneficiary's condition or significant changes within the beneficiary's support network.

The comprehensive assessment must include, but is not limited to:

- Beneficiary's history;

Medicaid Provider Manual

- Identifying beneficiary's needs and completing related documentation;
- Identifying community-based resources the beneficiary currently accesses;
- Gathering information from the beneficiary and other chosen sources, such as family members, medical providers, social workers, to form a complete assessment of the beneficiary;
- Assessment of the beneficiary's current access to a PCP and other health care providers;
- Assessment of the beneficiary's current access to transportation; and
- Assessment of the beneficiary's living arrangement prior to admission.

11.5.B. PLAN OF CARE

During or within two calendar days following the in-person initial comprehensive assessment visit, a specific POC that is based on the information collected through the assessment must be developed. The POC must specify the goals and actions to address the medical, educational, social, and/or other services needed by the beneficiary. The qualified case manager must work with the beneficiary and others chosen by the beneficiary to develop those goals, and to identify a course of action to respond to the assessed needs of the beneficiary.

The POC should address the physical and behavioral health needs of the beneficiary, along with any other needed resources such as housing, energy assistance, food and nutrition, vocational and training, cultural and spiritual needs, and transportation needs. The POC must be updated when the beneficiary is reassessed or has a significant change in condition. The POC should be shared with the beneficiary's MHP, PCP and Prepaid Inpatient Health Plan (PIHP), as applicable, to the extent permitted under all applicable state and federal laws.

11.5.C. REFERRALS AND RELATED ACTIVITIES

The qualified case manager will facilitate and coordinate referral and related activities to assist the beneficiary in obtaining needed services of their choosing. Activities such as scheduling appointments or linking the beneficiary with medical, educational, social, and/or other providers, programs, and services to address identified needs and achieve goals specified in the POC are primary components of RC services. Referral activities include, but are not limited to, the coordination of the following:

- medical/physical and behavioral healthcare services;
- dental services;
- Substance use disorder (SUD) services;
- transportation services;
- housing support and services;
- nutritional and food services and resources (e.g., diabetes education) and/or coordinating referrals to the Supplemental Nutrition Assistance Program (SNAP), Women, Infants, and Children (WIC) or Food Assistance Program (FAP);

Medicaid Provider Manual

- education resources;
- employment, job training, vocational rehabilitation, or other financial services; and
- any additional social supports and services to assist the beneficiary in obtaining other needed services and assistance.

11.5.D. MONITORING AND FOLLOW-UP ACTIVITIES

Monitoring and follow-up activities include activities and contacts that are necessary to ensure the POC is implemented and adequately addresses the beneficiary's needs, and which may be conducted with the beneficiary, family members, service providers, or other entities or individuals. Monitoring and follow-up activities are conducted at least once in the six months following discharge, or as frequently as necessary as determined by the qualified case manager, and may be completed in-person or virtually. Monitoring and follow-up activities should determine whether the following conditions are met:

- Services are being furnished in accordance with the beneficiary's POC; and
- Services in the POC are adequate.

Referrals to appropriate community providers should be made if current services in the POC are not adequate.

11.6 QUALIFIED CASE MANAGER

Qualified case managers may provide all components of RC services within their scope of practice. A qualified case manager must meet one of the following criteria:

- Licensure as a Registered Nurse by the Michigan Department of Licensing and Regulatory Affairs (LARA) and at least one year of experience providing community health or case management services; or
- Licensure as a fully licensed Clinical Social Worker by LARA and at least one year of experience providing social work or case management services.

A Medicaid-enrolled physician or non-physician practitioner (NPP) licensed by LARA must provide general supervision of the case manager. An NPP is a healthcare professional licensed as a nurse practitioner, physician assistant, or a clinical nurse specialist.

11.7 NON-COVERED SERVICES

The services listed below are not covered through RC services:

11.7.A. PROFESSIONAL SERVICES

Professional services are not covered by RC. Professional services or other Medicaid-covered services must be provided and billed by the appropriately enrolled Medicaid provider.

11.7.B. DURABLE MEDICAL EQUIPMENT AND MEDICAL SUPPLIES

Durable medical equipment (DME) and medical supplies are not covered by RC. DME and medical supplies must be ordered and provided as if the beneficiary was in their own home. RC providers are required to provide safe storage for all necessary DME and medical supply items.

11.8 COORDINATION OF SERVICES

The RC provider must ensure coordination in the delivery of services through an integrated process across all aspects of Medicaid services. Integrated services encompass communication from all physicians and disciplines (e.g., skilled nursing and therapy services) as well as other entities (e.g., Home Health, MI Choice Waiver). The RC provider must also provide ongoing training and education for the beneficiary and caregiver with respect to the care and services identified in the POC, as well as for the safe transfer into or discharge from community services. Throughout the care planning process, it is the responsibility of the RC provider to ensure coordination of care and to avoid duplication of services (e.g., Home Health, MI Choice Waiver).

11.9 DISCHARGE FROM SERVICE

RC providers must ensure either one of the following before discharging a beneficiary from RC services:

- The beneficiary's medical condition has improved.
- The beneficiary is being discharged to another setting that can meet their needs.

Note: The beneficiary may choose to discharge at any time or with no housing option if that is their choice.

11.10 BILLING REQUIREMENTS

RC claims are submitted by the Medicaid-enrolled RC provider. Claims are submitted on a professional claim format and must include an approved RC Healthcare Common Procedure Coding System (HCPCS) code.

Covered RC procedure codes, rates and code descriptions are listed below and maintained on the RC fee schedule located on the MDHHS website. (Refer to the Directory Appendix for website information.)

RC services are to be billed as follows:

- S9976 (lodging per diem), 1 unit/visit per day
- G9002 (care coordination), 1 unit/visit per day

The PA number must be recorded on the claim.

RC services must be billed based upon the beneficiary's enrollment.

For care coordination (G9002), if the beneficiary is enrolled in a MHP, it should be billed to the MHP. If the beneficiary is FFS, it should be billed through CHAMPS as an FFS claim.

Medicaid Provider Manual

For room and board (S9976), both MHP and FFS enrolled beneficiary claims should be submitted through CHAMPS for Medicaid FFS reimbursement.

PA requirements apply to MHP and FFS claims for RC services.

11.10.A. BILLED DAYS OF ADMISSION

Day of Admission Medicaid reimburses the day of admission if the beneficiary is in the facility prior to midnight.

Day of Discharge Medicaid does not reimburse the day of discharge.

SECTION 12 - TARGETED CASE MANAGEMENT - SERVICES FOR CHILDREN WITH MEDICAL COMPLEXITY [SECTION ADDED 4/1/2025]

12.1 GENERAL INFORMATION [SUBSECTION ADDED 4/1/2025]

The Children with Medical Complexity – Targeted Case Management (CMC TCM) program provides intensive, targeted case management services to eligible beneficiaries with medical complexity. This integrated case management model improves access to services for eligible beneficiaries with chronic physical and mental health conditions and addresses their social determinants of health. The core elements of CMC TCM services include assessment, individualized plan of care (IPOC), referral and coordination services, and monitoring/follow-up activities.

These services are made available through a case management entity. The CMC TCM case management entity offers outpatient, case management to eligible beneficiaries with medical complexity. The CMC TCM case management entity must be enrolled in Medicaid and not otherwise funded to provide similar services to the same population. The CMC TCM case management entity must be willing, qualified, and certified by the Michigan Department of Health and Human Services (MDHHS) to offer these services to a broad cross section of the eligible population.

The CMC TCM core team is the multi-disciplinary team based at the enrolled CMC TCM case management entity that delivers the CMC TCM services. Eligible beneficiaries work with the CMC TCM core team to receive the intensive case management services. **(text added per bulletin MMP 24-61)**

12.2 BENEFICIARY ELIGIBILITY [SUBSECTION ADDED 4/1/2025]

CMC TCM services are voluntary services available to children under 21 years of age who are determined dually eligible for Children's Special Health Care Services (CSHCS) and Medicaid, are enrolled in the CSHCS program only, or are eligible for Medicaid or Children's Health Insurance Program (CHIP). Additionally, they must meet all the following specified chronicity, complexity, and fragility criteria:

- have at least one CSHCS medically eligible condition that involves three or more organ systems; and
- have functional limitations, and are technologically dependent and/or a transplant candidate; and
- receive treatment from three or more different medical and/or surgical specialties at a hospital or medical university.

Eligible beneficiaries must also have experienced at least one of the following utilization criteria during the previous 12 months:

- one or more hospital admissions, with at least one hospital stay of five or more days; or
- ten or more visits with a medical or surgical specialist at a pediatric specialty clinic.

Beneficiaries who are too young to have met the utilization criteria may be eligible if they meet the above-stated chronicity, complexity, and fragility criteria and both of the following:

- a stay in the hospital totaling five or more days; and

Medicaid Provider Manual

- clinicians' anticipation that the beneficiary will be an intensive user of health resources (i.e., is expected to meet utilization criteria described above).

Non-eligible beneficiaries include incarcerated individuals in public institutions, beneficiaries receiving hospice services, or beneficiaries receiving case management services from another provider. **(text added per bulletin MMP 24-61)**

12.3 ENROLLMENT [SUBSECTION ADDED 4/1/2025]

12.3.A. PROVIDER REFERRALS [SUBSECTION ADDED 4/1/2025]

Eligible beneficiaries will be identified through a referral and screening process that is completed by the CMC TCM core team.

Providers knowledgeable about chronic complex physical health conditions, understand the benefits of intensive case management services, and/or have treated the beneficiary may submit referrals. The CMC TCM core team will consider referrals made by the following qualified health professionals:

- specialists/subspecialists
- emergency room physicians
- primary care physicians
- non-physician practitioners (NPPs) **(text added per bulletin MMP 24-61)**

12.3.B. ELIGIBILITY DETERMINATION [SUBSECTION ADDED 4/1/2025]

Upon receipt of the referral, the CMC TCM core team confirms the beneficiary's eligibility for CMC TCM services through a review of the beneficiary's medical records and utilization data. The CMC TCM core team notifies both the referring provider and the beneficiary and/or parent/guardian of their eligibility status. Eligible beneficiaries and their parents/guardians are offered a choice to receive the CMC TCM services.

All eligibility notifications must be in writing and provide information about the beneficiary's right to appeal decisions regarding eligibility.

To assist beneficiaries and their parents/guardians in making an informed choice concerning these services, MDHHS will provide a website where interested persons can learn more about the CMC TCM program and its state-certified case management entities. **(text added per bulletin MMP 24-61)**

12.3.B.1. PRIMARY POINT OF CONTACT AND INTAKE MEETING [SUBSECTION ADDED 4/1/2025]

Upon completion of the eligibility determination process, eligible beneficiaries will be provided a CMC TCM primary point of contact who is a member of the CMC TCM core team. The primary point of contact schedules the intake meeting with the beneficiary, the beneficiary's parents, or legal guardians. The intake meeting should be a face-to-face contact.

Medicaid Provider Manual

The purpose of the intake meeting includes, but is not limited to:

- confirming voluntary enrollment and CMC TCM case management entity selection;
- educating the beneficiary and/or parent/guardian about the CMC TCM services and answering questions;
- collecting the beneficiary's demographic and contact information, current legal status, medical and behavioral health history;
- completing needed authorizations related to the sharing of protected health information; and
- scheduling the initial in-person, comprehensive assessment with the CMC TCM core team. **(text added per bulletin MMP 24-61)**

12.3.C. BENEFICIARY CONSENT [SUBSECTION ADDED 4/1/2025]

Prior to receiving the CMC TCM services, beneficiaries and/or parents/guardians must select the CMC TCM case management entity of their choice and sign the CMC TCM Informed Consent form (BPHASA-2412). The CMC TCM medical director adds their signature to the form to acknowledge that the beneficiary has been accepted and maintains the form in the beneficiary's case record.

Once accepted into the CMC TCM program, the CMC TCM core team will notify MDHHS of the new CMC TCM beneficiary by submitting a beneficiary-specific CMC TCM Authorization form (BPHASA-2409) through the Community Health Automated Medicaid Processing System (CHAMPS) Document Management Portal (DMP). Upon receipt of the BPHASA-2409, MDHHS will add the CMC TCM case management entity and their unique National Provider Identifier (NPI) number to the beneficiary's file. It is incumbent upon the CMC TCM case management entities to verify their authorization in CHAMPS prior to rendering billable services. CMC TCM case management entities who are not authorized to provide services for a beneficiary will not be eligible for CMC TCM payment. **(text added per bulletin MMP 24-61)**

12.3.D. TRANSFER OF CARE [SUBSECTION ADDED 4/1/2025]

A beneficiary or parent/guardian may change CMC TCM case management entities based on beneficiary/parent/guardian preference. The current CMC TCM case management entity on record must consult with the new CMC TCM case management entity about the case and transfer all applicable information and case records, including all completed assessments and the updated comprehensive IPOC, to the new CMC TCM case management entity.

Protected health information (PHI), personally identifiable information (PII), and sensitive or confidential information should only be shared in compliance with the privacy and security requirements of federal and state laws and regulations including, but not limited to, the Health Insurance Portability and Accountability Act (HIPAA) and the Michigan Mental Health Code, and using the most secure method and appropriate encryption standards. Only the minimum amount of PHI, PII, sensitive and/or confidential information necessary should be shared with the new CMC TCM case management entity.

Medicaid Provider Manual

To institute the change in case management entities, the current CMC TCM case management entity on record must submit a CMC TCM Deauthorization Form (BPHASA-2410) to MDHHS to request disenrollment of a CMC TCM beneficiary from their program. Then, the new CMC TCM case management entity must submit a beneficiary-specific BPHASA-2409 through the CHAMPS DMP to add the beneficiary. It is incumbent upon the new CMC TCM case management entity to verify their authorization in CHAMPS prior to rendering a CMC TCM billable service. CMC TCM case management entities who are not authorized to provide services for a beneficiary will not be eligible for CMC TCM payment. **(text added per bulletin MMP 24-61)**

12.3.E. ONGOING CMC TCM SERVICE PARTICIPATION [SUBSECTION ADDED 4/1/2025]

The beneficiary's involvement in CMC TCM services is contingent upon their continued enrollment in Medicaid/CHIP and/or CSHCS. After the initial comprehensive assessment, the CMC TCM core team will offer the beneficiary and/or parent/guardian the opportunity to discuss and assess the beneficiary's continued need for intensive case management services, including: the beneficiary's needs and goals, progress and outcomes, case complexity (i.e., medical, social, psychological, and financial), support systems and resource availability, self-management capabilities, risk factors, and beneficiary's preferences. If the CMC TCM core team and beneficiary and/or parent/guardian mutually agree that the beneficiary continues to need and benefit from these services, enrollment can continue. Decisions and reasons to continue CMC TCM services should be noted in the beneficiary's case record. **(text added per bulletin MMP 24-61)**

12.3.F. CMC TCM DISENROLLMENT [SUBSECTION ADDED 4/1/2025]

CMC TCM program disenrollment is indicated if any of the following events occur:

- the beneficiary's Medicaid/CHIP and/or CSHCS enrollment ends
- the beneficiary transitions into hospice
- the beneficiary dies
- the beneficiary reaches age 21 years
- the beneficiary moves out of state
- the beneficiary chooses to opt out by:
 - requesting to end services
 - participating in a different case management program
 - failing to participate in a comprehensive assessment and/or the development of the comprehensive IPOC as requested by the CMC TCM core team
 - failing to participate in a CMC TCM billable service for a continuous period lasting more than three months
- the medical director terminates the beneficiary's participation in services for fraud, abuse, misconduct, or other reasons

Medicaid Provider Manual

If the CMC TCM core team needs to terminate CMC TCM services for any reason, the CMC TCM core team is required to notify the beneficiary and/or parent/guardian in writing 45 days before their disenrollment from the program, document the reason for the disenrollment in the beneficiary's comprehensive IPOC, offer a meeting to discuss, and advise the beneficiary of their appeal rights for any service termination.

Additionally, CMC TCM case management entities are required to submit a BPHASA-2410 to MDHHS to request the disenrollment of a CMC TCM beneficiary from the program. Forms are submitted via the CHAMPS DMP. Once services are terminated, the beneficiary will need to have their CMC TCM eligibility redetermined to resume CMC TCM services, unless otherwise approved by MDHHS. **(text added per bulletin MMP 24-61)**

12.3.G. DUPLICATION OF SERVICES [SUBSECTION ADDED 4/1/2025]

Beneficiaries must not receive case management services from more than one case management program. If, while receiving CMC TCM services, non-CMC TCM case management programs are identified as providing case management services to the CMC TCM beneficiary, the preferences of the beneficiary/parent/guardian concerning which agency provides services must be considered when roles overlap. **(text added per bulletin MMP 24-61)**

12.3.G.1. MEDICAID HEALTH PLAN (MHP) COORDINATION [SUBSECTION ADDED 4/1/2025]

The CMC TCM services are carved out of the MHP contract. CMC TCM case management entities must establish a process for the CMC TCM core team to provide written communication with MHP staff on a quarterly basis to share assessments and comprehensive IPOCs for MHP beneficiaries receiving CMC TCM services, and to ensure no service duplication occurs for mutually served beneficiaries. **(text added per bulletin MMP 24-61)**

12.4 CORE ELEMENTS OF CMC TCM SERVICES [SUBSECTION ADDED 4/1/2025]

CMC TCM services are intensive, comprehensive, and fully integrated case management services, designed for children with medical complexity. To achieve their intended purpose, these services must not be implemented sporadically but should be delivered consistently by staff dedicated to the program, and at a minimum every month.

CMC TCM services are multi-disciplinary, team-based services that may be accessed in multiple settings, including the clinic or home, and either in-person or via telemedicine and include:

- assessment;
- IPOC;
- referral and coordination services; and
- monitoring/follow-up activities.

CMC TCM services focus on the completion of a comprehensive assessment to identify CMC needs. The comprehensive assessment is completed by the CMC TCM core team after the CMC TCM case

Medicaid Provider Manual

management entity is added to the beneficiary's record. Guided by the outcome of this assessment, the CMC TCM core team works with the beneficiary and/or parent/guardian to develop a comprehensive IPOC that reflects the input and involvement of the beneficiary and/or parent/guardian. Ongoing care coordination, comprehensive transitional care, support, and/or referrals to medical, behavioral, school and/or community-based support services, as well as monitoring and follow-up activities, are provided through the collaborative efforts of the CMC TCM core team.

Beneficiary participation in CMC TCM is voluntary. Once enrolled, beneficiaries may opt out at any time. The beneficiary and/or parent/guardian indicates their desire to participate by signing the BPHASA-2412 and maintaining contact with and receiving services from the CMC TCM core team.

If a beneficiary and/or their parent/guardian declines CMC TCM services, the CMC TCM core team is required to document that in the beneficiary's case record. Beneficiaries who are notified of CMC TCM eligibility and choose not to receive CMC TCM services at that time may elect to receive CMC TCM services in the future if they continue to meet the eligibility criteria.

Beneficiaries may not be compelled to accept CMC TCM services. Beneficiaries who decline or choose not to receive services may do so without jeopardizing their access to other necessary medical services. If a beneficiary and/or their parent/guardian declines CMC TCM services or decides to opt out of services after services have been initiated, the CMC TCM core team is required to document that event in the beneficiary's case record.

The CMC TCM core team is required to maintain beneficiary case records for all beneficiaries who are referred to the program for CMC TCM eligibility determination. For all enrolled beneficiaries, the CMC TCM core team must document the date of all contacts in the beneficiary's case record. Specifically, the case record must include the following information:

- The name of the individual;
- The dates of the case management services;
- The name of the case management entity (if relevant) and the person providing the case management service;
- The nature and content of the case management services provided and whether goals specified in the IPOC have been achieved;
- Whether the individual had declined services in the IPOC;
- The need for, and occurrences of, coordination with other case managers;
- A timeline for obtaining needed services; and
- A timeline for reevaluation of the IPOC. **(text added per bulletin MMP 24-61)**

12.4.A. COMPREHENSIVE ASSESSMENT [SUBSECTION ADDED 4/1/2025]

Case management services include a comprehensive assessment to determine the beneficiary's need for medical, educational, social, and/or other services. The assessment must be a written document. Comprehensive assessments are covered no more than once per year from the date of the initial comprehensive assessment, unless otherwise approved by MDHHS.

Medicaid Provider Manual

The entire CMC TCM core team assigned to the beneficiary is required to be part of the initial, comprehensive assessment with the beneficiary and/or parent/guardian. The initial comprehensive assessment is conducted as an in-person encounter with at least two members of the core team present in-person. Subsequent comprehensive assessments can be conducted face-to-face. The purpose of the comprehensive assessment is to gather sufficient information to develop a comprehensive IPOC for the beneficiary. (text added per bulletin MMP 24-61)

12.4.B. COMPREHENSIVE INDIVIDUALIZED PLAN OF CARE (IPOC) DEVELOPMENT [SUBSECTION ADDED 4/1/2025]

The CMC TCM core team must develop and document a comprehensive IPOC based on the information collected from the comprehensive assessment. At a minimum, the IPOC must:

- specify goals and objectives that address the medical, social, educational and any other identified needs, including social determinants of health;
- identify a course of action to respond to the beneficiary's assessed needs;
- include the duration, scope, and amount of services needed, as well as identify the service provider and timeframes for initiating and/or completing the identified actions;
- describe the responsibilities of the beneficiary/parent/guardian associated with accomplishing the comprehensive IPOC; and
- at least quarterly, document progress toward achieving specified goals and objectives.

The CMC TCM core team must work with the beneficiary and/or their parent/guardian to develop the IPOC's goals/objectives and to identify a course of action to respond to the beneficiary's assessed needs. The comprehensive IPOC should address the physical and behavioral health needs of the beneficiary, along with any other needed resources such as housing, energy assistance, food and nutrition, vocational training, cultural and spiritual needs, and transportation needs. The IPOC should also address emergency situations and/or determine the steps to take during the exacerbation of symptoms.

Development of the comprehensive IPOC with the beneficiary/parent/guardian is conducted as a face-to-face encounter. To the maximum extent possible, the CMC TCM core team is required to ensure that the beneficiary and/or parent/guardian are actively involved in the development of the IPOC.

The CMC TCM core team should share the IPOC with the beneficiary/parent/guardian, and others, including medical and social service providers, as applicable and allowable. At a minimum, the comprehensive IPOC must be reviewed and/or updated quarterly depending on the needs of the beneficiary. Periodic reviews and updates of the IPOC are covered as monitoring and follow-up activities. (text added per bulletin MMP 24-61)

12.4.C. REFERRALS AND CARE COORDINATION SERVICES [SUBSECTION ADDED 4/1/2025]

Working collaboratively with the beneficiary/parent/guardian, their specialists/subspecialists, and their primary care and/or other health care providers,

Medicaid Provider Manual

members of the CMC TCM core team will facilitate and coordinate the services detailed in the comprehensive IPOC. The CMC TCM core team will also assist with referrals and other related activities to support the beneficiary in obtaining needed services. Ongoing referral and service coordination activities include face-to-face and/or reciprocal telephonic or written contacts with, or on behalf of, the beneficiary/parent/guardian. (text added per bulletin MMP 24-61)

12.4.D. MONITORING AND FOLLOW-UP ACTIVITIES [SUBSECTION ADDED 4/1/2025]

Monitoring and follow-up activities include actions and contacts necessary to ensure the comprehensive IPOC adequately addresses the beneficiary's needs and is implemented. Monitoring activities may be conducted with the beneficiary/parent/guardian, service providers, or other entities. These activities also include ensuring that changes in the needs or status of the beneficiary are reflected in the IPOC, and that the beneficiary can access services contained in the IPOC and/or is receiving these services.

Monitoring and follow-up activities include face-to face encounters and/or reciprocal telephonic or written contact with, or on behalf of, the beneficiary/parent/guardian. Telemedicine encounters may be provided at the discretion of the beneficiary and/or the beneficiary's parents/guardians. (text added per bulletin MMP 24-61)

12.4.D.1. FREQUENCY OF MONITORING AND FOLLOW-UP ACTIVITIES [SUBSECTION ADDED 4/1/2025]

Monitoring shall occur monthly, or more often if needed, to ensure the beneficiary's needs are met and to maintain a continuing relationship between the beneficiary, their parent/guardian, and any providers responsible for services. Frequency and scope of case management monitoring and follow-up activities must reflect the intensity of the beneficiary's physical health, behavioral health, and welfare needs identified in the comprehensive IPOC. The CMC TCM core team is required to discuss and document the proposed frequency of contacts with the beneficiary and/or their parent/guardian. The discussion must include the frequency of contacts with the beneficiary, any providers instrumental to the implementation of the IPOC, and any other individuals directly related to implementing services and supports on behalf of the beneficiary.

If the frequency of contacts is less than a monthly, reciprocal encounter, the CMC TCM core team documents the reason in the beneficiary's case record. (text added per bulletin MMP 24-61)

12.4.E. SERVICE AVAILABILITY AND ACCESSIBILITY [SUBSECTION ADDED 4/1/2025]

A CMC TCM core team member must be available and accessible 24 hours per day to a beneficiary and/or their parent/guardian. (text added per bulletin MMP 24-61)

12.4.F. TYPES OF ENCOUNTERS [SUBSECTION ADDED 4/1/2025]

The initial comprehensive assessment is conducted as an in-person encounter with the beneficiary, parent/guardian, and the entire team assigned to the beneficiary. Upon completion of the initial assessment, the beneficiary must be seen in-person at least once per year. This encounter can occur during any of the CMC TCM core services

Medicaid Provider Manual

administered by members of the CMC TCM core team assigned to the beneficiary. Subsequent comprehensive assessments and IPOC development encounters must be face-to-face and involve CMC TCM core team members assigned to the beneficiary. Referrals and service coordination services and monitoring and follow-up activities can include face-to-face encounters and/or reciprocal telephonic or written contact with, or on behalf of, the beneficiary/parent/guardian conducted by any member of the CMC TCM core team. **(text added per bulletin MMP 24-61)**

12.4.G. EXCLUDED SERVICES [SUBSECTION ADDED 4/1/2025]

CMC TCM does not include activities that constitute the direct delivery of underlying medical, educational, social, and/or other services to which a beneficiary has been referred. Furthermore, case management services do not include activities that are an integral and inseparable component of another Medicaid-covered service.

Medical services provided by the CMC TCM core team members must be within their scope of practice, in consultation with the beneficiary's specialist(s), and at the request of the beneficiary and/or their parent/guardian. Allowable medical services are billed separately and in accordance with established Medicaid policy. **(text added per bulletin MMP 24-61)**

12.5 CMC TCM CASE MANAGEMENT QUALIFICATIONS [SUBSECTION ADDED 4/1/2025]

The CMC TCM case management entity must be enrolled in Michigan Medicaid and demonstrate their willingness and qualifications to provide the CMC TCM services, as described herein. All case management entities must be certified by MDHHS prior to providing CMC TCM services. Additionally, the approved CMC TCM case management entity must obtain a separate NPI number that will be used when submitting claims specifically for CMC TCM services.

CMC TCM case management entities will be required to complete a CMC TCM Program Application form (BPHASA-2411). By signing and submitting the BPHASA-2411, the CMC TCM case management entity attests they are able to meet both the CMC TCM case management entity and core team requirements and adhere to this policy, the State Plan, and other applicable MDHHS policies and procedures. A CMC TCM case management entity is designated as a service provider only after MDHHS receives and certifies the signed attestation. (Refer to the Provider Enrollment Section of the General Information for Providers chapter within the MDHHS Medicaid Provider Manual for additional enrollment information). **(text added per bulletin MMP 24-61)**

12.5.A. CMC TCM CORE TEAM [SUBSECTION ADDED 4/1/2025]

Case management services must be provided by a multi-disciplinary team working under the authority of a CMC TCM case management entity that consists of licensed and unlicensed staff and licensed health professionals operating within their state law defined scope of practice. Teams must have adequate knowledge and experience to provide comprehensive and specialized case management services to children with very complex medical needs. Required CMC TCM core team members are as listed and include the following:

- pediatrician (Medical Director);

Medicaid Provider Manual

- non-physician practitioner (NPP);
- registered nurse (RN);
- licensed clinical social worker (LCSW);
- program coordinator; and
- administrative staff.

A licensed pediatric behavioral health provider is recommended to be part of the CMC TCM core team as the CMC TCM core team identifies and is required to provide case management for all needs, including psychosocial needs. Additional team members may be added to consult regarding specific health concerns (i.e., dietician, respiratory and other therapists, etc.).

Qualifications of individual CMC TCM core team members, with dedicated time to the program, are as listed:

- At least one provider with medical/surgical experience with delivering pediatric hospital or specialty clinic services to medically complex individuals under the age of 21 who regularly experience hospitalization and/or surgery;
- At least one Medicaid-enrolled, licensed pediatrician in possession of or eligible for pediatric specialty board certification. Experience and/or training in palliative care recommended;
- At least one Medicaid-enrolled, licensed NPP with at least two years of professional pediatric experience. A NPP is a healthcare professional licensed as a nurse practitioner, physician assistant, or a clinical nurse specialist;
- At least one licensed master's prepared Clinical Social Worker with at least two years of professional pediatric experience;
- At least one licensed RN with at least two years of professional pediatric experience;
- At least one individual with a Bachelor of Arts or Science in an academic, business, or medical discipline with experience as a hospital or clinic coordinator with a background in health care who is knowledgeable about case management or care coordination services for individuals with very complex health needs who have hospital admissions or have had/need surgery; and
- A program assistant with a background in health care operations, referrals, scheduling, and patient services.

Additionally, the CMC TCM core team is required to have:

- the ability to support full integration of psychosocial and clinical care;
- sufficient documentation that demonstrates staff has adequate knowledge and experience to provide comprehensive and intensive case management services to beneficiaries with very complex medical and psychosocial needs;
- referral and/or effective working relationships with specialists/subspecialists and other key health care and social service providers who are essential to the care of beneficiaries

Medicaid Provider Manual

with complex medical and psychosocial needs (e.g., primary care, private duty nurses, and state and community-based organizations); and

- 24/7 on-call coverage to respond to medical and care coordination needs.

CMC TCM case management entities must enroll through the online MDHHS CHAMPS' Provider Enrollment (PE) subsystem to be reimbursed for fees for services rendered to beneficiaries.

CMC TCM core team members, whose services are directly reimbursable per MDHHS policy, must be separately enrolled in CHAMPS and authorized and approved to bill for services. (text added per bulletin MMP 24-61)

12.5.B. TELEMEDICINE [SUBSECTION ADDED 4/1/2025]

Services specified as "face-to-face" per MDHHS telemedicine policy can either be performed in-person or via simultaneous audio/visual telemedicine. CMC TCM case management entities are required to follow Medicaid telemedicine policy requirements, as applicable. (Refer to the Telemedicine chapter of the MDHHS Medicaid Provider Manual.) (text added per bulletin MMP 24-61)

12.6 REPORTING REQUIREMENTS [SUBSECTION ADDED 4/1/2025]

12.6.A. CMC TCM CASE MANAGEMENT ENTITY REPORTING [SUBSECTION ADDED 4/1/2025]

CMC TCM case management entities are responsible for reporting encounter, clinical outcomes, quality, cost, and other data as requested by MDHHS and/or its designee. MDHHS will require the CMC TCM case management entity to collect, maintain, and organize CMC TCM reporting data. MDHHS will also require the CMC TCM case management entity to send all requested reports to MDHHS in accordance with state defined timelines.

Additionally, CMC TCM case management entities may be requested to submit staffing reports, participate in site visits/audits, and assist in facilitating annual patient experience surveys. CMC TCM case management entities are required to respond to data requests as a condition of continued participation as a CMC TCM program. To the extent possible, MDHHS paid claims data will be utilized for monitoring and evaluation and MDHHS will rely on the CMC TCM case management entity for data not available through the claims system. (text added per bulletin MMP 24-61)

12.7 CLAIMS SUBMISSION [SUBSECTION ADDED 4/1/2025]

CMC TCM claims are billed according to instructions contained in the Billing & Reimbursement for Professionals Chapter of the MDHHS Medicaid Provider Manual. CMC TCM claims adhere to the Uniform Billing (UB) guidelines on the professional CMS-1500 claim format or the electronic Health Care Claim Professional (837) ASC X12N version 5010 information. CMC TCM claims must be submitted under the CMC TCM services unique NPI number. CHAMPS NPI claim editing will be applied to the billing, rendering, supervising, attending, servicing, and referring providers as applicable for payment.

Medicaid Provider Manual

Medicaid reimbursement for CMC TCM services may not duplicate payments made to public agencies or private entities under other program authorities for the same purpose.

CMC TCM services are carved out of the MHPs and are billed and reimbursed as a FFS benefit. All providers submitting claims for services must be Medicaid-enrolled. (Refer to the Billing & Reimbursement for Professionals chapter and the Billing & Reimbursement for Institutional Providers chapter of the MDHHS Medicaid Provider Manual for additional billing information.) **(text added per bulletin MMP 24-61)**

12.7.A. ALLOWABLE PROCEDURE CODES [SUBSECTION ADDED 4/1/2025]

All claims submitted for CMC TCM services provided to beneficiaries must include the following Healthcare Common Procedure Coding System (HCPCS) procedure codes:

- G0506 – Comprehensive assessment and care planning for patients requiring chronic case management services. This code must be used when billing the comprehensive assessment and comprehensive IPOC services. This code is limited to one unit of service each year, per CMC TCM case management entity, per beneficiary, unless otherwise approved by MDHHS. This code is not reimbursable for dates of service (DOS) in the same calendar month for the same CMC TCM case management entity and beneficiary as T2023.

Case management entities receive a flat fee per beneficiary for the completion of a comprehensive assessment and comprehensive IPOC that meets the coverage criteria. The rate of reimbursement for comprehensive assessment and care planning (G0506) under the CMC TCM program can be found on the Children's Special Health Care Services (CSHCS) webpage of the MDHHS website. (Refer to the Directory Appendix for website information.)

- T2023 – Targeted case management per month. This code must be used to bill ongoing referral and care coordination services and monitoring and follow-up activities. This code is limited to one unit of service per calendar month, per CMC TCM case management entity, per beneficiary. This code is not reimbursable for DOS in the same calendar month for the same CMC TCM case management entity and beneficiary as G0506.

Ongoing referral and care coordination services and monitoring and follow-up activities are reimbursable for beneficiaries who have a completed comprehensive assessment and comprehensive IPOC. Periodic reassessments, reviews, and updates of the IPOC are reimbursable as part of the monitoring and follow-up activities.

Services are reimbursable only if a member of the CMC TCM core team has at least one face-to-face or reciprocal contact with the beneficiary and/or their parent/guardian during the billable month. The rate of reimbursement for targeted case management per month (T2023) under the CMC TCM program can be found on the Children's Special Health Care Services (CSHCS) webpage of the MDHHS website. (Refer to the Directory Appendix for website information.) **(text added per bulletin MMP 24-61)**

Medicaid Provider Manual

12.7.B. DATE OF SERVICE (DOS) [SUBSECTION ADDED 4/1/2025]

Case management entities should adhere to the following guidelines when determining the DOS:

- For activities related to the comprehensive assessment and comprehensive IPOC development (indicated by HCPCS procedure code G0506), the DOS is the date the IPOC is completed.
- For activities related to ongoing referral and coordination services and monitoring and follow-up activities (indicated by HCPCS procedure code T2023), indicate the last day of the month as the DOS on the claim form. The actual DOS for each case management service provided must be documented in the beneficiary's case record. **(text added per bulletin MMP 24-61)**

12.7.C. PLACE OF SERVICE (POS) [SUBSECTION ADDED 4/1/2025]

Case management entities should use a valid place of service (POS) code to indicate the setting in which services were provided. If services occurred in multiple settings, case management entities may bill using the most frequently occurring POS code; however, the actual POS must be indicated when documenting each case management activity in the beneficiary's case record. **(text added per bulletin MMP 24-61)**

12.7.D. THIRD PARTY LIABILITY [SUBSECTION ADDED 4/1/2025]

Federal regulations require that all identifiable financial resources available for payment be billed prior to billing Medicaid. If a Medicaid-eligible child is presently covered by another resource and the CMC TCM case management entity does not bill the other resource, Medicaid cannot be billed for the services. (Refer to the Coordination of Benefits chapter of the MDHHS Medicaid Provider Manual for additional information.) **(text added per bulletin MMP 24-61)**

----------------------------------	----

SECTION 1 – GENERAL TELEMEDICINE POLICY

1.1 GENERAL INFORMATION

Telemedicine is the use of telecommunication technology to connect a beneficiary with a Medicaid enrolled health care professional in a different location. The Michigan Department of Health and Human Services (MDHHS) covers both synchronous (real-time interactions) and asynchronous (over separate periods of time) telemedicine services. MDHHS requires that all telemedicine policy provisions within this policy and other current policy are established and maintained within all telemedicine services.

Along with general telemedicine policy, specific program considerations (as listed within this chapter) must be upheld during all telemedicine visits unless otherwise stated. The specific program section provides additional requirements and offers further clarification as needed. These should always be considered in combination with all general telemedicine policy.

1.2 MDHHS DEFINITION OF TELEMEDICINE

MDHHS aligns the definition of telemedicine with Section 3476 of the Insurance Code of 1956, 1956 PA 218 MCL 500.3476, as updated on December 20, 2017. Therefore, "Telemedicine" means the use of an electronic media to link beneficiaries with health care professionals in different locations. To be considered telemedicine under this section, the health care professional must be able to examine the beneficiary via a real-time, interactive audio or video (or both) telecommunications system, and the beneficiary must be able to interact with the off-site health care professional at the time the services are provided.

1.3 AUTHORIZED PROVIDERS

In alignment with the Michigan Insurance Code of 1956 (Act 218 of 1956), telemedicine services must be provided by a health care professional who is licensed, registered, or otherwise authorized to engage in their health care profession in the state where the beneficiary is located. The provider at the distant site who is licensed under State law to furnish a covered telemedicine service (as described in telemedicine policy) may bill, and receive payment for, the service when it is delivered via a telecommunications system.

Telemedicine providers must be enrolled in Michigan Medicaid and must have the ability to refer the beneficiary to another provider of the same type or specialty who can see the beneficiary in-person when necessary. If rendering services within a managed care plan, providers must refer beneficiaries to resources within the plan for additional services as needed.

1.3.A. OUT-OF-STATE/BEYOND BORDERLAND PROVIDERS

Michigan Medicaid telemedicine policy permits providers who are licensed in another state to render/be reimbursed for telemedicine services for Michigan Medicaid-enrolled beneficiaries if the beneficiary is in the state where the provider is licensed.

Unless otherwise specified in policy, telemedicine providers associated to a billing provider located outside of Michigan must obtain prior authorization (PA) for services.

Medicaid Provider Manual

Providers should refer to the Out-of-State/Beyond Borderland Providers subsection in the General Information for Providers chapter for situations where PA could be approved.

Refer to the PSYPACT subsection for specific situations where an out-of-state licensed provider is otherwise authorized to render/be reimbursed for telemedicine services.

1.3.B. VIRTUAL-ONLY PROVIDERS

Telemedicine providers who do not have a physical location for treatment, but are Michigan licensed and meet all other Medicaid enrollment requirements, are considered “virtual-only” and are permitted to render services for Michigan Medicaid-enrolled beneficiaries.

Virtual-only providers not associated to a Michigan billing provider within the Community Health Automated Medicaid Processing System (CHAMPS) will be subject to out-of-state provider PA requirements. Providers should refer to the Out-of-State/Beyond Borderland Providers subsection in the General Information for Providers chapter for situations where PA could be approved.

Virtual-only providers must report Place of Service (POS) 02 or 10 along with the appropriate modifier when submitting claims/encounters for telemedicine.

1.3.C. PSYPACT

Telemedicine providers who have an Authority to Practice Interjurisdictional Telepsychology (APIT) certificate from the Psychology Interjurisdictional Compact (PSYPACT) Commission are eligible to render/be reimbursed for telemedicine services for Medicaid beneficiaries as authorized under PSYPACT and allowed by Medicaid telemedicine policy.

PSYPACT providers must abide by the same telemedicine requirements as all other telemedicine providers. Services performed by PSYPACT providers are subject to PA requirements that would apply if the provider were located in-state. Providers should refer to the CHAMPS Code Rate and Reference tool for service-specific in-state authorization requirements.

PSYPACT providers must report POS 02 or 10 along with the appropriate modifier when submitting claims/encounters for telemedicine.

1.4 PRINCIPLES OF TELEMEDICINE

Recognizing that telemedicine can never fully replace in-person care, MDHHS has established the following principles to be used by MDHHS-enrolled providers during the provision of telemedicine services:

- Effectual services – a service provided via telemedicine should be as effective as its in-person equivalent, ensuring convenient and high-quality care.

Medicaid Provider Manual

- Improved and appropriate access – the right visit, for the right beneficiary, at the right time by minimizing the impact of barriers to care, such as transportation needs or availability of specialty providers in rural areas.
- Appropriate beneficiary choice – the beneficiary is an active participant in the decision for telemedicine as a means for service delivery as appropriate (e.g., Does the beneficiary prefer telemedicine to an in-person visit? What is the optimal combination of ongoing service delivery for the individual? etc.).
- Appropriate utilization – ensure providers are utilizing telemedicine appropriately and that items listed above are taken into consideration when offering these services.
- Value considerations – telemedicine visits should yield the desired outcomes and quality measures; health outcomes should be improving and remain consistent with in-person care at a minimum.
- Privacy and security measures – providers must ensure the privacy of the beneficiary and the security of any information shared via telemedicine in accordance with the Health Insurance Portability and Accountability Act of 1996 (HIPAA) and other privacy/security regulations as applicable.

1.5 DETERMINATION OF APPROPRIATENESS/DOCUMENTATION

Telemedicine must only be utilized when there is a clinical benefit to the beneficiary. Examples of clinical benefit include:

- Ability to diagnose a medical condition in a beneficiary population without access to clinically appropriate in-person diagnostic services.
- Treatment option for a beneficiary population without access to clinically appropriate in-person treatment options.
- Decreased rate of subsequent diagnostic or therapeutic interventions (for example, due to reduced rate of recurrence of the disease process).
- Decreased number of future hospitalizations or physician visits.
- More rapid beneficial resolution of the disease process treatment.
- Decreased pain, bleeding, or another quantifiable symptom.

Furthermore, telemedicine must only be utilized when the beneficiary's goals for the visit can be adequately accomplished, there exists reasonable certainty of the beneficiary's ability to effectively utilize the technology, and the beneficiary's comfort with the nature of the visit is ensured. Telemedicine must be used as appropriate regarding the best interests/preferences of the beneficiary and not merely for provider ease. Appropriate guidance must be provided to the beneficiary to ensure they are prepared and understand all steps to effectively utilize the technology prior to the first visit. Beneficiary consent must be obtained prior to service provision (see policy for "Consent for Telemedicine Services" for further information).

In-person visits remain the preferred method of service delivery for most healthcare services; however, in cases where this option is not available or in-person services are not ideal or are challenging for the beneficiary, telemedicine may be used as a complement to in-person services. Applicable beneficiary

Medicaid Provider Manual

records must contain documentation regarding the reason for the use of telemedicine and the steps taken to ensure the beneficiary was provided utilization guidance in an appropriate manner.

In special situations, depending upon the needs of the beneficiary, providers may opt to deliver the majority of or all services for a specific condition via telemedicine. If this situation occurs, it must be documented in the beneficiary's record or in their individual plan of service (IPOS). This situation should be the exception, not the norm. (Refer to the program-specific subsections of this policy for specific guidance regarding this benefit.)

All services provided via telemedicine must meet all the quality and specifications as would be if performed in-person. Furthermore, if while participating in the visit the desired goals of the beneficiary and/or the provider are not being accomplished, either party must be provided the opportunity to stop the visit and schedule an in-person visit instead (refer to "Contingency Planning" for such instances). This follow-up visit must be provided within a reasonable time and be as easy as possible to schedule.

1.6 CONSENT FOR TELEMEDICINE SERVICES

MDHHS requires either direct or indirect beneficiary consent for all services provided via telemedicine. This consent must be properly documented in the beneficiary's medical record in accordance with applicable standards of practice. This requirement aligns with Section 16284 of State of Michigan Public Act No. 359, effective March 29, 2017.

1.7 PRIVACY AND SECURITY REQUIREMENTS

MDHHS requires a HIPAA compliant real-time interactive system at both the originating and distant sites, allowing instantaneous interaction between the beneficiary and provider via the telecommunication system. When providing services via telemedicine, sufficient privacy and security measures must be in place and documented to ensure confidentiality and integrity of beneficiary-identifiable information. This includes, but is not limited to, ensuring any tracking technologies used by websites, mobile applications, or any other technology used comply with applicable law regarding use or disclosure of beneficiary-identifiable information. Transactions, including beneficiary email, prescriptions, and laboratory results, must be secure within existing technology (i.e., password protected, encrypted electronic prescriptions, or other reliable authentication techniques). All beneficiary-provider email, as well as other beneficiary-related electronic communications, should be stored and filed in the beneficiary's medical record consistent with transitional recordkeeping policies and procedures.

1.8 CONTINGENCY PLANNING

A contingency plan, including referral to an acute care facility or Emergency Room (ER) for treatment as necessary for the safety of the beneficiary, is required when utilizing telemedicine technologies. This plan must include a formal protocol appropriate to the services being rendered.

1.9 PRIOR AUTHORIZATION REQUIREMENTS

There are no prior authorization (PA) requirements when providing services via telemedicine for Fee-for-Service (FFS) beneficiaries or for those accessing Behavioral Health Services through PIHPs/CMHSPs unless the equivalent in-person service requires PA. Authorization requirements for beneficiaries enrolled in Medicaid Health Plans (MHPs) may vary. Providers must refer to individual MHPs for any authorization or coverage requirement.

Medicaid Provider Manual

1.10 FACE-TO-FACE DEFINITION

When referenced within MDHHS Telemedicine Policy, face-to-face refers to either an in-person visit or a visit performed via simultaneous audio/visual technology.

1.11 ORIGINATING SITE

Originating site is defined as the location of the eligible beneficiary at the time of the telemedicine service.

Authorized originating sites include:

- County mental health clinic or publicly funded mental health facility
- Federally Qualified Health Center (FQHC)
- Hospital (inpatient, outpatient, or critical access hospital)
- Office of a physician or other provider (including medical clinics)
- Hospital-based or Critical Access Hospital (CAH)-based Renal Dialysis Centers (including satellites)
- Rural Health Clinic (RHC)
- Skilled nursing facility
- Tribal Health Center (THC)
- Local Health Department (LHD) as defined in Sections 333.2413, 333.2415 and 333.2421 of the Michigan Public Health Code (PA 368 of 1978 as amended)
- Home, as defined as a location, other than a hospital or other facility, where the beneficiary receives care in a private residence
- Other established site considered appropriate by the provider (in accordance with clinical judgement)

1.12 DISTANT SITE

Distant site is defined as the location of the provider providing the professional service at the time of the telemedicine visit. This definition encompasses the provider's office, or any established site considered appropriate by the provider, so long as the privacy of the beneficiary and security of the information shared during the telemedicine visit are maintained.

1.13 AUDIO-ONLY TELEMEDICINE

MDHHS supports the use of simultaneous audio/visual telemedicine service delivery as a primary method of telemedicine service; however, in situations where the beneficiary cannot access services via a simultaneous audio/visual platform, either due to technology constraints or other concerns, MDHHS will allow the provision of audio-only services for a specific set of procedure codes.

Medicaid Provider Manual

Additional guidelines for audio-only service include:

- Visits that include an assessment tool -- the tool must be made available to the beneficiary and the provider must ensure the beneficiary can access the tool.
- When a treatment technique or evidence-based practice requires visualization of the beneficiary, it must be performed via simultaneous audio/visual technology.
- Audio-only must be performed at the preference of the beneficiary, not the provider's convenience.
- Privacy and security of beneficiary information must always be established and maintained during an audio-only visit.

To effectuate this in perpetuity, MDHHS will publish audio-only databases that will include all codes MDHHS is permitting via audio-only. These databases will be created for both FFS/MHP providers and for those providers within the PIHP/CMHSP system and will be maintained on the MDHHS website. (Refer to the Directory Appendix for website information.) MDHHS will, on a regular and ongoing basis, assess the audio-only databases and will add/remove codes as needed. Some of the criteria used to determine addition/removal from the audio-only database include provider/stakeholder feedback, new coding guidelines, utilization data and quality reports.

1.14 ASYNCHRONOUS TELEMEDICINE SERVICES

Asynchronous telemedicine services include the transmission of a beneficiary's medical or other personally identifiable information through a secure, HIPAA-compliant, electronic communications system to a provider, often a specialist, at a distant site without the beneficiary present. Such communications, including store and forward services, interprofessional telephone/Internet/electronic health record consultations, and remote patient monitoring (RPM) services, involve contact between two parties (beneficiary to provider or provider to provider) in a way that does not require real-time interaction. Services must be medically necessary or essential for behavioral health and part of a provider-directed treatment plan.

Asynchronous telemedicine services must be performed under the general or direct supervision of a Medicaid-enrolled physician or practitioner who has an active role in the management of the beneficiary's physical and/or behavioral health. The analysis and interpretation of the beneficiary's data must contribute to the development and/or monitoring of the beneficiary's treatment plan. Asynchronous telemedicine services do not include telephone calls, images transmitted via facsimile machines, and text messages without visualization of the beneficiary. Photographs visualized by a telecommunications system must be specific to the beneficiary's physical and/or behavioral health condition and adequate for furnishing or confirming a diagnosis and/or treatment plan.

Asynchronous telemedicine services generally may not be separately reported on the same day the beneficiary presents for an evaluation and management (E/M) or other related service to the same provider. These services are typically considered part of the E/M or other related service and are not separately reimbursed. Activities performed in the facility setting under the general or direct supervision of the provider are bundled with the facility services on the UB-04 claim form and cannot be reported on the CMS 1500 claim form or billed under the provider's National Provider Identifier (NPI). Refer to the Medicaid Code and Rate Reference tool in the Community Health Automated Medicaid Processing System (CHAMPS) for service code parameters and limits.

Medicaid Provider Manual

In accordance with Section 16284 of Public Act No. 359 of 2016, telemedicine services, including asynchronous telemedicine, must be provided only with direct or indirect beneficiary consent and this consent must be properly documented in the beneficiary's medical record in accordance with applicable standards of practice.

1.14.A. STORE AND FORWARD SERVICES

Store and forward services are asynchronous electronic transmissions of physical and/or behavioral health information from the beneficiary to a Medicaid-enrolled physician or practitioner at the distant site when video or face-to-face contact is not necessary. Information transmitted to the provider is analyzed and used in the diagnosis, development, or maintenance of an individualized treatment plan. Information may include, but is not limited to, digital images, documents, video clips, still images, x-rays, magnetic resonance images (MRIs), electrocardiograms (EKGs) and electroencephalograms (EEGs), and audio clips.

Store and forward services include interpretation and follow-up with the beneficiary. Services must not originate from or result in a related E/M service.

1.14.B. INTERPROFESSIONAL TELEPHONE/INTERNET/ELECTRONIC HEALTH RECORD CONSULTATIONS

Interprofessional consultations (including e-Consults) are defined as a type of asynchronous telemedicine service in which the beneficiary's Medicaid-enrolled treating provider (e.g., attending or primary) requests the opinion and/or treatment advice of a Medicaid-enrolled consulting provider with the specialty expertise to assist in the diagnosis and/or management of the beneficiary's condition without beneficiary face-to-face contact with the consulting provider. The service must be for the direct benefit of the beneficiary, directly relevant to the individual beneficiary's original evaluation, diagnosis, and/or treatment, and must conclude with a written report from the consulting provider to the treating provider, when applicable.

The beneficiary for whom the service is requested may be either a new or established patient to the consulting provider. Service time is based on the total review and interprofessional communication time. The review of beneficiary information, including but not limited to medical records, laboratory studies, imaging studies, medications, and pathology reports, is included in the service and should not be separately reported. The written or verbal request for the consultation must be documented in the beneficiary's medical record by the treating provider. Additional documentation requirements (within the medical record of the beneficiary) include date of service; name of provider agency or person providing the service; nature, extent, or units of service; and the place of service, along with all record keeping requirements as outlined in the MDHHS Medicaid Provider Manual. Providers must also consult with the American Medical Association (AMA) coding guidelines to ensure appropriate reporting of these services. Providers should not report interprofessional telephone/Internet/electronic health record consultations when the sole purpose of the communication is to arrange a transfer of care or other face-to-face service. In consultations that cross state lines, consulting providers must be an enrolled Medicaid provider in the state in which the beneficiary resides, though they need only be licensed/credentialed in the state in which they are

Medicaid Provider Manual

practicing. Interprofessional consultations that occur across state lines require prior authorization. Refer to the General Information for Providers chapter for further information regarding out-of-state/beyond borderland providers and the prior authorization process.

1.14.C. REMOTE PATIENT MONITORING (RPM)

Remote Patient Monitoring (RPM) is a covered service under Michigan Compiled Law (MCL) 400.105g. RPM means using digital technology to collect medical and other forms of health data from an individual in one location and electronically transmit that information via a secure, HIPAA-compliant system to a provider in a different location for assessment and recommendations. RPM is covered for both acute and chronic conditions.

RPM devices include (1) non-invasive remote monitoring devices that measure or detect common physiological parameters and (2) non-invasive monitoring devices that wirelessly transmit the beneficiary's medical information to their health care provider or other monitoring entity. The device must be reliable and valid, and the beneficiary must be trained or sufficiently knowledgeable in the proper use/wearing of the device to ensure appropriate recording of medical information. Medical information may include, but is not limited to, blood pressure and heart rate and rhythm monitoring.

All RPM devices, including mobile medical applications, must meet the U.S. Food & Drug Administration (FDA) definition of a medical device. Personal tablets, computers, cell phones, software intended for administrative support or support of healthy lifestyles/general wellness, and electronic health records are not medical devices or durable medical equipment and are not covered as part of RPM services.

Reimbursement for the device used for remote monitoring, and programming of the device, is generally included in the reimbursement of RPM services and not separately reimbursable. For items or devices separately reimbursed to a medical supplier, such as personal use continuous glucose monitoring systems (CGMs), refer to the Medical Supplier chapter of this Manual.

1.15 TELEMEDICINE REIMBURSEMENT RATE

The reimbursement rate for allowable telemedicine services will be the same (also known as "at parity") as in-person services. This means that all providers will be paid the equivalent amount, no matter the physical location of the beneficiary during the visit. To effectuate this policy, the provider must report the place of service as they would if they were providing the service in-person. See the "Telemedicine Billing Requirements" section of this policy for further details.

1.16 TELEMEDICINE BILLING REQUIREMENTS

All telemedicine visits are required to ascribe to correct coding requirements equivalent to in-person services, including ensuring that all aspects of the code billed are performed during the visit.

Medicaid Provider Manual

1.16.A. ALLOWABLE SERVICES

Allowable telemedicine services for synchronous telemedicine are listed on the telemedicine fee schedules which can be accessed on the MDHHS website.

Asynchronous telemedicine service codes are listed on the corresponding provider-specific fee schedules. Additional program-specific coverage will be represented on individual program fee schedules and will be indicated in the program-specific sections below as indicated.

For End Stage Renal Disease (ESRD), MDHHS aligns with Medicare policy regarding the delivery of telemedicine and frequency of in-person services.

For PIHP/CMHSP service providers where in-person visits are required, the telemedicine service may be used in addition to the required in-person visit but cannot be used as a substitute. Refer to the MDHHS Bureau of Specialty Behavioral Health Services Telemedicine Database for services allowed via telemedicine. (Refer to the Directory Appendix for website information.)

1.16.B. TELEHEALTH FACILITY FEE

Allowable originating sites are permitted to submit claims for the telehealth facility fee. This fee is intended to reimburse the provider for the expense of hosting the beneficiary at their location. To submit this code, the originating site must ensure the technology is functioning, the privacy of the beneficiary is secured, and that the information is shared confidentially.

Telemedicine services where "home" or another "established site considered appropriate by the provider" are utilized as the originating site are not eligible to receive the telehealth facility fee. Distant site providers in these situations are instructed to bill the appropriate Current Procedural Terminology (CPT)/Healthcare Common Procedure Coding System (HCPCS) code (as represented by the Telemedicine database) for the service(s) provided.

Neither the originating site nor the distant site is permitted to bill **both** the telehealth facility fee and the code for the professional service for the same beneficiary at the same time.

1.16.C. PLACE OF SERVICE (POS), MODIFIER 95 AND MODIFIER 93

All audio/visual telemedicine services, as allowable on the Telemedicine fee schedule and submitted on the professional invoice, must be reported with the Place of Service (POS) code that would be reported as if the beneficiary were in-person for the visit along with modifier 95—"Synchronous Telemedicine Service rendered via a real-time interactive audio and video telecommunications system".

All audio-only telemedicine services, as represented on the audio-only telemedicine fee schedule and submitted on the professional invoice, must be reported with the POS code that would be reported as if the beneficiary were in-person for the visit along with

Medicaid Provider Manual

modifier 93 - "Synchronous Telemedicine Service rendered via telephone or other real-time interactive audio-only telecommunications system".

For services submitted on the institutional invoice, the appropriate National Uniform Billing Committee (NUBC) revenue code, along with the appropriate telemedicine CPT/HCPCS procedure code and modifier 95 or modifier 93, must be used.

PIHP/CMHSP providers must submit encounters for audio/visual telemedicine with POS 02 or 10 (as applicable) and for audio-only POS 02 or 10 (as applicable) and Modifier 93.

Covered asynchronous telemedicine services must be billed with applicable POS and modifiers as standard practice.

For PIHP/CMHSP service providers, refer to the MDHHS Bureau of Specialty Behavioral Health Services Telemedicine Database and the Audio-Only Telemedicine Database on the MDHHS website for services allowed via both audio/visual and audio-only telemedicine.

This information should be used in conjunction with the Billing & Reimbursement for Professionals and the Billing & Reimbursement for Institutional Providers Chapters as well as the Medicaid Code and Rate Reference tool and other related procedure databases/fee schedules located on the MDHHS website.

SECTION 2 – SPECIFIC PROGRAM/SERVICE SITE CONSIDERATIONS

2.1 OUTPATIENT HOSPITAL

When the outpatient facility provides administrative support for a telemedicine service, the outpatient hospital facility may bill the hospital outpatient clinic visit on the institutional claim with modifier 95 or modifier 93 and the appropriate revenue code.

2.2 BEHAVIORAL HEALTH

2.2.A. PIHP/CMHSP

The MDHHS Bureau of Specialty Behavioral Health Services requires all the requirements of Telemedicine policy are attained and maintained during all beneficiary visits. In addition to the Determination of Appropriateness/Documentation section of this policy, the Bureau of Specialty Behavioral Health Services would like to reiterate that services delivered to the beneficiary via telemedicine be done at the convenience of the beneficiary, not the convenience of the provider. In addition, these services must be a part of the person-centered plan of service and available as a choice, not a requirement, to the beneficiary.

Telemedicine providers who are rendering services within the specialty behavioral health system must follow all PIHP/CMHSP enrollment procedures. These PIHP/CMHSP providers are required to be affiliated to the beneficiary's care team (via a shared medical record or a referral relationship) to ensure that the beneficiary has reasonably frequent and periodic in-person evaluations to personally reassess and update the beneficiary's medical treatment/history, effectiveness of treatment modalities, and current medical/behavioral condition and/or treatment plan.

If the individual (beneficiary) is not able to communicate effectively or independently, they must be provided appropriate on-site support from natural supports or staff. This includes the appropriate support necessary to participate in assessments, services, and treatment.

The PIHP/CMHSP must guarantee the individual is not being influenced or prompted by others when utilizing telemedicine.

Use of telemedicine should ensure and promote community integration and prevent isolation of the beneficiary. Evidence-based practice policies must be followed as appropriate for all services. For services within the community, in-person interactions must be prioritized.

2.2.A.1. REQUIREMENTS FOR VISIT

Telemedicine is allowed for all services indicated in the Bureau of Specialty Behavioral Health Services Telemedicine Database. The features of what will be counted as a telemedicine visit need to align with the same standards of an in-person visit. Any phone call or web platform used to schedule, obtain basic information or miscellaneous work that would have been billed as a non-face-to-face and therefore non-billable contact, will

Medicaid Provider Manual

remain non-billable. Telemedicine visits must include service provision as indicated in the IPOS and should reflect work towards or review of goals and objectives indicated forthwith.

2.2.A.2. POPULATIONS

This policy applies to all populations served within PIHPs/CMHSPs and does not supersede any federal regulations that must be followed for substance use disorder (SUD) treatment.

2.2.B. OUTPATIENT MENTAL HEALTH SERVICES PROVIDERS

Medicaid beneficiaries whose needs do not render them eligible for specialty services and supports through the PIHPs/CMHSPs may receive outpatient mental health services through Medicaid FFS or MHPs as applicable. These FFS/MHP enrolled non-physician behavioral health services may be provided via telemedicine when performed by Medicaid-enrolled psychologists, social workers, counselors, and marriage and family therapists. Services are covered when performed in a non-facility setting or outpatient hospital clinic. All applicable services are listed in the telemedicine audio/visual and audio-only fee schedules.

2.3 PHYSICAL THERAPY, OCCUPATIONAL THERAPY, AND SPEECH THERAPY SERVICES

MDHHS will allow select therapy services to be provided via telemedicine when performed by Medicaid-enrolled private practice and outpatient hospital physical therapy (PT), occupational therapy (OT) and speech therapy (ST) providers. PT, OT and ST services allowed via telemedicine will be represented by applicable CPT/HCPCS codes on the telemedicine fee schedule. Therapy services provided via telemedicine are intended to be an additional treatment tool and complement in-person services where clinically appropriate for the individual beneficiary.

Documentation re-evaluation, performance, and treatment elements that typically require hands-on contact for measurement or assessment must include a thorough description of how the assessment or performance findings were established via telemedicine. This includes, but is not limited to, such elements as standardized tests, strength, range of motion, and muscle tone.

Initial PT and OT evaluations and oral motor/swallowing services are not allowed via telemedicine and should be provided in-person.

Services that require utilization of equipment during treatment and/or physical hands-on interaction with the beneficiary cannot be provided via telemedicine.

Therapy re-evaluations performed via telemedicine must be provided by a therapist whose facility/clinic has previously evaluated and/or treated the beneficiary in-person.

Durable Medical Equipment (DME) re-assessments performed via telemedicine must be provided by a therapist who has previously evaluated and/or treated the beneficiary in-person, otherwise an in-person visit is required.

This policy supplements existing PT, OT, and ST services policy. All current therapy referral, PA, documentation requirements, standards of care, and limitations remain in effect regardless of whether

Medicaid Provider Manual

the service is provided through telemedicine. All telemedicine therapy services will count toward the beneficiary's therapy service limits. (Refer to the Therapy Services chapter for additional information.)

2.3.A. BILLING CONSIDERATIONS

Modifier 95 should be used in addition to the required modifiers for therapy services as outlined in therapy policy.

2.3.B. SCHOOL SERVICES PROGRAM CONSIDERATIONS

School Services Program (SSP) PT and OT services, as outlined in this policy, will also be allowed via telemedicine. These services must meet all other telemedicine policies as outlined.

2.4 AUDIOLOGY SERVICES

MDHHS will allow speech therapy, auditory rehabilitation, select hearing device adjustments, programming, device performance evaluations, and education or counseling to be performed via telemedicine (simultaneous audio/visual). Remote device programming must be provided in compliance with current U.S. Food and Drug Administration (FDA) guidelines. Auditory brainstem response (ABR) and auditory evoked potential (AEP) testing may also be conducted via telemedicine when performed using remote technology located at a coordinating clinical site with appropriately trained staff (i.e., mobile unit, office/clinic, or hospital).

Reimbursable procedure codes are limited to the specific set of audiology codes listed in the telemedicine fee schedule. Audiology services provided via telemedicine are intended to be an additional treatment tool and complement in-person services where clinically appropriate.

Audiological diagnostic tests (other than those mentioned above), hearing aid examinations, surgical device candidacy evaluations, and other audiology and hearing aid services conducted via telemedicine are not reimbursable by Michigan Medicaid and should be provided in-person.

This policy supplements the existing audiology, hearing aid dealer and speech therapy services policies. All current referral, PA, documentation requirements, standards of care, and limitations remain in effect regardless of whether the service is provided through telemedicine. Providers should refer to the Hearing Services chapter of this Manual for complete information.

2.5 DENTISTRY

MDHHS will allow dentists to provide the limited oral evaluation (Current Dental Terminology [CDT] code D0140) via telemedicine (simultaneous audio/visual) technology so long as all other telemedicine policy is followed.

All requirements of the general telemedicine policy must be followed when providing the limited oral evaluation via telemedicine, including scope of practice requirements, contingency plan, and the use of both audio/visual service delivery unless otherwise indicated by federal guidance.

Services delivered to the beneficiary via telemedicine must be done for the convenience of the beneficiary, not the convenience of the provider. Services must be performed using simultaneous

Medicaid Provider Manual

audio/visual capabilities. All services using telemedicine must be documented in the beneficiary's record, including the date, time, and duration of the encounter, and any pertinent clinical documentation required per CDT code description. The provider is responsible for ensuring the safety and quality of services provided with telemedicine technologies.

Billing instructions depend upon the claim format used:

- American Dental Association (ADA) Claim Format: Use POS 02 or POS 10.
- Institutional Claim Format: POS 02 and POS 10 are not required; Use modifier 95.

2.6 VISION

Telemedicine vision services can be provided through a Medicaid-enrolled provider who can report E/M services as listed in the telemedicine fee schedules.

An intermediate ophthalmological exam can be provided via telemedicine for an established patient with a known diagnosis. The provider must have a previous in-person encounter with the beneficiary to ensure the provider is knowledgeable of the beneficiary's current medical history and condition. For cases in which the provider must refer the beneficiary to another provider, a consulting provider is not required to have a pre-existing provider-patient relationship if the referring provider shares medical history, past eye examinations, and any related beneficiary diagnosis with the consulting provider. Intermediate ophthalmological exam codes should not be used to diagnose eye health conditions (an initial diagnosis). When medically necessary, providers must refer beneficiaries for an in-person encounter to receive a diagnosis and/or care. Telemedicine cannot act as a replacement for recommended in-person interactions.

2.7 SCHOOL SERVICES PROGRAM (SSP)

Because of the unique circumstances regarding the delivery of services within the School Services Program (SSP), telemedicine may be the primary delivery modality for some beneficiaries; however, the decision to use telemedicine should be based on the needs or convenience of the beneficiary, and not those of the provider.

In cases where the beneficiary is unable to use telemedicine equipment without assistance, an attendant must be provided by the provider. The attendant must be trained in the use of the telemedicine equipment to the point where they can provide adequate assistance. The attendant must also be available for the entire telemedicine session; however, they should also ensure the beneficiary's privacy to the greatest extent possible. When the originating site for the service is the student's home, any cost for an attendant is not reimbursable.

Billing and reimbursement for telemedicine services are accomplished using the same methodology as other services; however, the service must be billed using POS 03—school and modifier 95 or modifier 93. Telemedicine claims for SSP are paid according to the Centers for Medicare & Medicaid Services (CMS) approved cost-based methodology used for other services provided within the program and not the information provided previously in this policy. SSP providers are not eligible for the facility fee as the facility is an integral part of the service provided and is covered under the service claim. A database of allowable telemedicine services for SSP can be found on the MDHHS website. (Refer to the Directory Appendix for website information.)

2.8 DURABLE MEDICAL EQUIPMENT (DME) PROVIDERS

All DME providers must reference the Medical Supplier chapter of this Manual for specific requirements in the provision of services via telemedicine.

2.9 FQHCs AND RHCs

2.9.A. GENERAL INFORMATION

All current Medicaid policy for telemedicine services, including definitions, requirements and parameters of telemedicine, apply to FQHCs and RHCs. FQHCs and RHCs are responsible for ensuring compliance with all telemedicine policy.

2.9.B. DISTANT SITE PROVIDERS

Distant site services provided by qualified Medicaid enrolled providers may be covered when the qualified provider is employed by the clinic or working under the terms of a contractual agreement with the clinic. FQHCs and RHCs must maintain all practitioner contracts and provide them to MDHHS upon request.

2.9.C. BILLING, REIMBURSEMENT, AND PROSPECTIVE PAYMENT SYSTEM (PPS)

Claims for telemedicine services must be submitted using the ASC X 12N 837 5010 form using the appropriate telemedicine HCPCS or CPT code. All telemedicine claims must include the corresponding modifier 95- "Synchronous Telemedicine Service rendered via a real-time interactive audio and video telecommunications system" or 93 - "Synchronous Telemedicine Service rendered via telephone or other real-time interactive audio-only telecommunications system" and the appropriate revenue code.

During the Medicaid provider enrollment process, contracted providers must associate to the FQHC or RHC billing NPI. Refer to the Billing & Reimbursement for Institutional Providers chapter of this Manual for further information.

The telehealth facility fee does not qualify as a face-to-face visit and does not generate the PPS payment. Telemedicine service(s) provided at the distant site that qualify as a face-to-face visit may generate the PPS payment. All current PPS rules and encounter criteria apply to telemedicine visits. Refer to the Federally Qualified Health Centers and the Rural Health Clinics chapters of this Manual and the FQHC and RHC reimbursement lists on the MDHHS website for further information. (Refer to the Directory Appendix for website information.)

Medicaid Provider Manual

PPS is reimbursed according to the billing rules described below.

FQHC/RHD Telemedicine Services Billing			
Originating Site	Distant Site	Billing Rules	PPS for Qualifying Visit
FQHC #1/RHC #1	FQHC #2/RHC #2	FQHC #1/RHC #1 bills the telehealth facility fee (for tracking purposes only) and FQHC #2/RHC #2 bills for professional services provided at their site.	FQHC #2/RHC #2
FQHC/RHC	Provider is employed by/contracted with the originating site FQHC/RHC	Originating site bills for the distant site provider's services per the contract.	Originating site FQHC/RHC
FQHC/RHC	Provider is not located at an FQHC/RHC site and is not employed by/contracted with the originating site FQHC/RHC	Each provider bills for services provided at their site.	No PPS
Site is not an FQHC/RHC	FQHC/RHC	Each provider bills for services provided at their site.	FQHC/RHC

If both the originating and distant sites submit identical procedure code(s) for a telemedicine visit for the same beneficiary on the same date of service, it is considered duplicate billing. MDHHS will recover payment from the appropriate FQHC, RHC, or contracted provider. Recovery will be based on the terms specified in the contract.

2.9.D. AUDIO-ONLY SERVICES

MDHHS will allow FQHCs and RHCs to be reimbursed for identified audio-only services (those represented on the audio-only database and that are identified as qualifying visits) to generate the PPS. Clinics will be permitted to submit for reimbursement allowable audio-only service codes, as indicated above, if appropriate for the interaction with the beneficiary. Medicaid clinic billing and reimbursement requirements apply. The provider must be employed by or contracted with the FQHC or RHC, and the procedure code billed must appear on the clinic reimbursement list as a qualifying visit. The clinic reimbursement list is located on the MDHHS website.

SECTION 1 – GENERAL INFORMATION

This chapter applies to enrolled Private Practice, Outpatient, Nursing Facility, and Home Health Agency therapy providers.

The term Medicaid throughout this chapter refers to all programs administered by MDHHS unless specifically stated otherwise. The primary objective of Medicaid is to ensure that essential health care services are made available to those individuals who would not otherwise have the financial resources to purchase them. Policies are aimed at maximizing medically necessary health care services available to eligible Medicaid beneficiaries.

The primary objective of the Children's Special Health Care Services (CSHCS) Program is to ensure that CSHCS beneficiaries receive medically necessary services related to a CSHCS qualifying diagnosis as recommended by a CSHCS authorized subspecialist. Providers should refer to the Children's Special Health Care Services chapter of this manual for information specific to CSHCS only beneficiaries.

1.1 SERVICE PROVISION

Therapy may be provided by Medicaid-enrolled providers when performed by properly credentialed/licensed or appropriately supervised professionals in the following settings:

- Occupational Therapy (OT) and Physical Therapy (PT)
 - Outpatient Hospital
 - Comprehensive Outpatient Rehabilitation Facility (CORF)
 - Outpatient Rehabilitation Agency (Rehab Agencies)
 - Commission on Accreditation of Rehabilitation Facilities (CARF)-Accredited Outpatient Medical Rehabilitation Program
 - Physical Therapist or Occupational Therapist in Private Practice
 - Physician's Office/Clinic
 - Optometrist's Office
 - Nursing Facility
 - Home Health Agency
- Speech-Language Therapy (ST)
 - Outpatient Hospital
 - Comprehensive Outpatient Rehabilitation Facility (CORF)
 - Outpatient Rehabilitation Agency (Rehab Agencies)
 - CARF-Accredited Outpatient Medical Rehabilitation Program
 - Council on Academic Accreditation (CAA)-Accredited University Graduate Education Program
 - Speech-Language Pathologist in Private Practice

Medicaid Provider Manual

- Physician's Office/Clinic
- Nursing Facility
- Home Health Agency

Medicaid covers medically necessary rehabilitative therapy services for beneficiaries of all ages. Rehabilitative services include teaching or training someone to perform or develop a level of reasonable functional proficiency of tasks or skills that were previously learned, with or without compensatory strategies. Examples may include, but are not limited to:

- PT to regain functional ambulation using a cane following a stroke, or to advance from ambulation with an assistive device/physical assistance to ambulation without an assistive device or physical assistance;
- OT to achieve independent dressing following a spinal cord injury, or to develop dressing independence without an assistive device or physical assistance;
- Speech-Language Pathology (SLP) to improve articulation and fluency following an acquired or traumatic brain injury or develop communication skills utilizing an augmentative communication strategy.

Medicaid beneficiaries under 21 years of age and Healthy Michigan Plan beneficiaries may be eligible for medically necessary habilitative therapy services. Habilitation therapy includes teaching/training someone to perform/develop a level of reasonable functional proficiency of a task that was not previously learned/achieved at a typically expected age or without compensatory techniques or processes. Examples may include, but are not limited to:

- PT for a child who is not walking at a typically expected age.
- OT teaching normal dressing skills beyond the typically expected age of learning.
- SLP for communication skills including articulation errors beyond the typically expected age of learning or syntax and semantics for a person with significant hearing impairment.

Documentation must objectively support the request for rehabilitative and/or habilitative therapy.

1.2 THERAPY DATABASE

For specifics regarding Medicaid coverage of the Healthcare Common Procedure Coding System (HCPCS), refer to the MDHHS Therapies Database on the MDHHS website or the Medicaid Code and Rate Reference tool in the Community Health Automated Medicaid Processing System (CHAMPS). (Refer to the Directory Appendix for website information.) The database includes covered private practice, outpatient, nursing facility, and home health therapy codes, applicable limits, and prior authorization requirements.

1.3 DOCUMENTATION IN BENEFICIARY MEDICAL RECORD

Therapy providers must retain all applicable documentation in the beneficiary's medical record for seven years. For audit purposes, the beneficiary's medical record must substantiate the medical necessity of the service performed. Documentation must also include the treatment time of the services performed.

Medicaid Provider Manual

1.4 PRACTITIONER SIGNATURES

In all documentation requiring a signature, the signature must be hand written by the practitioner or submitted electronically. A stamped signature, second party signature, or statement of “signature on file” will not be accepted. NOTE: An electronic signature must specifically identify and authenticate the individual practitioner. This applies to signatures for ordering, referring, and treating practitioners.

1.5 MODIFIERS

Therapy claims must be submitted using the appropriate procedure code and therapy modifier to distinguish the plan of care under which the service is delivered. To differentiate between habilitative and rehabilitative therapy, when services are habilitative report with the appropriate modifier that represents the nature of the therapy being performed. Only Medicaid beneficiaries under 21 years of age and Healthy Michigan Plan beneficiaries may be eligible for medically necessary habilitative therapy services. In addition to these modifiers, maintenance therapy services should be billed with the MDHHS identified modifier to categorize the service as maintenance related. Therapy services submitted without these modifiers may be denied.

Outpatient hospital facility providers must also report the appropriate therapy assistant modifier when services are furnished in whole or in part by a physical therapy or occupational therapy assistant. In cases where both a physical or occupational therapist and a physical or occupational therapist assistant (PTA/OTA) provide a portion of the same untimed service or 15-minute timed unit of service, Medicaid will utilize Medicare’s de minimis standard in determining if the service/unit is considered to be furnished in whole or in part by a PTA or OTA.

Refer to the Billing and Reimbursement chapters in this manual for additional modifier information.

1.6 REIMBURSEMENT

Reimbursement structure is based on the provider’s enrollment type. Reimbursement methodologies include the MDHHS Outpatient Prospective Payment System or the Medicaid fee screens. (Refer to the Medicaid Code and Rate Reference tool in CHAMPS or the MDHHS Therapies Database on the MDHHS website.) For Not Otherwise Classified codes or covered codes without established fee screens, the authorized reimbursement amount is indicated on the approved prior authorization request.

Students, graduates, educational limited temporary licensed therapists, and assistants are not eligible to enroll or be directly reimbursed by Medicaid. Services performed by these individuals are required to be reported under the National Provider Identifier (NPI) of the supervising therapist.

1.7 OTHER INSURANCE [SUBSECTION ADDED 4/1/25]

If the beneficiary has another insurance plan (e.g. Medicare or commercial insurance) and the service is a covered benefit, the provider must follow the requirements of the other insurance plan(s), including but not limited to, prescription, prior authorization, and provider qualifications. Providers should refer to the Coordination of Benefits chapter for more information. Medicaid is not liable for payment of services denied because coverage rules of the primary health insurance were not followed. (text added 4/1/25)

SECTION 2 – PROVIDER REQUIREMENTS

2.1 OUTPATIENT HOSPITALS

Outpatient OT, PT and ST services may be provided to beneficiaries of all ages in the outpatient hospital.

2.2 COMPREHENSIVE OUTPATIENT REHABILITATION FACILITIES AND OUTPATIENT REHABILITATION AGENCIES

Comprehensive Outpatient Rehabilitation Facilities (CORFs) and rehab agencies may enroll with Medicaid for reimbursement of outpatient OT, PT and ST services provided by qualified professionals. All CORFs and rehab agencies must provide proof of Medicare certification when enrolling in Medicaid.

2.3 COMMISSION ON ACCREDITATION OF REHABILITATION FACILITIES-ACCREDITED OUTPATIENT MEDICAL REHABILITATION PROGRAMS

Commission on Accreditation of Rehabilitation Facilities (CARF)-accredited outpatient medical rehabilitation programs may enroll with Medicaid for reimbursement of outpatient OT, PT and ST services provided by qualified professionals. The program must not be part of, or owned by, a hospital, CORF or rehab agency. All CARF-accredited outpatient medical rehabilitation programs must provide proof of their current CARF accreditation when enrolling in Medicaid.

2.4 NURSING FACILITY

A Medicaid-certified nursing facility (NF) is defined as a nursing home, county medical care facility, or hospital long term care unit with Medicaid certification. Nursing facilities must provide or obtain specialized rehabilitative services if required by the beneficiary's plan of care.

In situations where the therapist is not an employee of the facility, the facility must establish a valid contract with a therapist/speech-language pathologist who meets applicable licensure/certification/accreditation requirements. A valid contract allows the facility to retain professional and administrative control over the services provided. Therefore, an agreement that stipulates only the use of facility space does not constitute a valid contract.

2.5 HOME HEALTH AGENCY

A Home Health Agency (HHA) is an organization that provides home care services, such as skilled nursing care, OT, PT, ST and home health aide services. The HHA must be Medicare certified to enroll as a Medicaid provider and must comply with the Medicare/Medicaid Conditions of Participation.

OT, PT, and ST services may be provided by an HHA if Medicare/Medicaid Conditions of Participation, including medical necessity, are met. A therapist in the home health setting may be responsible for supervision of the home health aide. Refer to the Home Health chapter for additional information.

2.6 UNIVERSITY AFFILIATED SPEECH-LANGUAGE PATHOLOGY GRADUATE EDUCATION PROGRAMS

University graduate education programs accredited by the American Speech-Language-Hearing Association's (ASHA) Council on Academic Accreditation (CAA) in Audiology and Speech-Language Pathology may enroll with Medicaid for reimbursement of outpatient speech-language therapy provided

Medicaid Provider Manual

by qualified professionals. The university program must be freestanding and not part of, or owned by, a hospital, CORF or rehab agency. All university programs must provide proof of their current ASHA-CAA when enrolling in Medicaid.

2.7 PHYSICAL THERAPISTS, OCCUPATIONAL THERAPISTS, AND SPEECH-LANGUAGE PATHOLOGISTS' PRIVATE PRACTICE [CHANGE MADE 4/1/25]

PT, OT, and ST services may be provided to beneficiaries of all ages when provided by a Medicaid enrolled physical therapist, occupational therapist, or speech-language pathologist employed by an individual/sole proprietor, (text added 4/1/25) partnership, or group practice. These providers are eligible for direct reimbursement.

2.8 PHYSICIAN'S OFFICE OR CLINIC

PT, OT, and ST services may be provided to beneficiaries of all ages in a physician's office or one of the following clinics: Federally Qualified Health Center, Rural Health Clinic, Tribal Health Center, or Local Health Department.

Medicaid Provider Manual

SECTION 3 – PRIOR AUTHORIZATION REQUESTS [CHANGE MADE 4/1/25]

Prior authorization is required for certain therapy services before the services are rendered, dependent upon the Standards of Coverage for each provider type. To determine which therapy services require prior authorization, and when, refer to the Standards of Coverage and Service Limitations Section of this chapter, the Medicaid Code and Rate Reference tool in CHAMPS, and/or (revised 4/1/25) the MDHHS Therapies Database on the MDHHS website. (Refer to the Directory Appendix for website information.)

Home Health Therapy	<p>Prior authorization (PA) is not required for the initiation of home health physical and occupational therapy services for up to a maximum of 24 visits within one 60 consecutive-day period per calendar year. The first date of therapy service during the calendar year starts the 60-day period. PA is required if therapy is needed beyond the 24 visits within the 60-day period, or if the beneficiary has previously received home health therapy within the calendar year. PA is needed when therapy limits are exceeded regardless of diagnosis. Continued therapy may be authorized for periods not to exceed 60-days.</p> <p>Home Health speech therapy is only covered for CSHCS beneficiaries and requires PA for visits beyond initial evaluation.</p>
Nursing Facility Therapy	<p>Providers must obtain PA for therapy services that are provided after the initial 60-day post-admission period. This includes new episodes of therapy or continuations of therapy already in progress and is not dependent on the amount of therapy performed during the admission period. Continued therapy may be authorized for periods not to exceed 60-days.</p> <p>Subsequent emergency or planned hospitalizations do not impact the requirements for PA. A copy of the physician prescription or documented medical clearance to resume therapy must be retained in the beneficiary's medical record.</p> <p>Nursing facilities participating in Medicare are not required to obtain PA for the deductible and/or coinsurance amounts when Medicare approves the services.</p> <p>If a beneficiary is approved for ventilator care and requires therapy, PA for the therapy must be obtained under the Ventilator Dependent Care Unit (VDCU) National Provider Identification (NPI).</p>
Outpatient/ Private Practice Therapy	<p>PA is needed when therapy limits are exceeded regardless of diagnosis. Continued therapy may be authorized for periods not to exceed six months.</p>

3.1 FORM AND COMPLETION INSTRUCTIONS [CHANGES MADE 4/1/25]

Prior authorization requests must be submitted on the Occupational Therapy-Physical Therapy-Speech Therapy Prior Approval Request/Authorization form (MSA-115). (Refer to the Forms Appendix or the MDHHS website for a copy of the form.) Required medical documentation must accompany the form.

The information on the MSA-115 must be:

- Typed – All information must be clearly typed in the designated boxes of the form.
- Thorough – Complete information, including the required signatures and appropriate procedure codes, must be provided on the form. The form and all documentation must include the beneficiary's name and mihealth card ID number, provider name and facility address, and the provider's billing NPI number. (revised 4/1/2025)

Medicaid Provider Manual

Whenever a beneficiary is admitted to a nursing facility directly from a general hospital or from another nursing facility where the beneficiary was receiving reimbursable therapy services, the name of that facility and the date of discharge from that facility should be included on the prior authorization request.

Prior authorization requests **must** be submitted with the appropriate therapy modifier to distinguish the discipline under which the service is being requested. When the therapy is habilitative, a modifier that represents the nature of the therapy being requested must also be reported. Requests for maintenance therapy services should also contain the appropriate maintenance modifier. Refer to the Billing & Reimbursement Chapters for additional modifier information.

For all Medicaid Fee-for-Service (FFS) beneficiaries, prior authorization requests should be submitted electronically via FFS Direct Data Entry (DDE) in CHAMPS. (Refer to the General Information for Providers chapter of this manual for additional information.) A copy of the MSA-115 must be attached to each electronic PA request. Prior authorization requests (MSA-115) may also be faxed or mailed to the MDHHS Program Review Division.

Providers can check the status of a PA request in CHAMPS or by contacting the MDHHS Program Review Division via telephone. (Refer to the Directory Appendix for website and contact information.) **(text revised 4/1/2025)**

A copy of the prior authorization determination letter must be retained in the beneficiary's medical record.

3.2 EMERGENCY/VERBAL PRIOR AUTHORIZATION [CHANGES MADE 4/1/25]

A provider may contact MDHHS to obtain a verbal prior authorization when the prescribing practitioner (practicing within their scope of practice as defined by state law) has indicated that it is medically necessary to provide therapy services without delay. If the initiation of a therapy service is required during MDHHS nonworking hours, providers may perform the service and call the Program Review Division by the end of the next working day.

To obtain verbal prior authorization, providers may call the Program Review Division. (Refer to the Directory Appendix for contact information. Refer to the Forms Appendix for a copy of form MSA-115 and completion instructions.) **(revised 4/1/2025)**

The following steps must be completed before a prior authorization number is issued for billing purposes:

- The verbal authorization date must be entered on the MSA-115 or electronically in CHAMPS via FFS DDE.
- The MSA-115 or FFS DDE prior authorization request must be submitted to the Program Review Division within 30 days of the verbal authorization.
- Supporting documentation must be submitted with the prior authorization request.

The verbal authorization does not guarantee reimbursement for the services if:

- The beneficiary was not eligible for Medicaid when the therapy service was provided.
- The Program Review Division does not receive the completed MSA-115 and documentation within 30 days of the verbal authorization.

- The prescription is dated after the date the verbal authorization was requested.

3.3 RETROACTIVE PRIOR AUTHORIZATION

Therapy services provided before prior authorization is requested will not be covered unless the beneficiary was not eligible on the date of service and a subsequent eligibility determination was made retroactive to the date of service. If the MDHHS eligibility file does not show that retroactive eligibility was approved, then the request for retroactive prior authorization will be denied.

3.4 BENEFICIARY ELIGIBILITY

Approval of a therapy service on the prior authorization request confirms that the service is authorized for the beneficiary. Approval of a prior authorization request does not guarantee beneficiary eligibility or payment. It is the provider's responsibility to verify the beneficiary's eligibility prior to rendering the service.

3.5 BILLING AUTHORIZED SERVICES

After prior authorization is issued, the information (e.g., prior authorization number, HCPCS/ CPT procedure code, modifier, and quantity) that was approved on the prior authorization must match the information on the claim form.

Therapy rendered to a nursing facility beneficiary must be billed by the nursing facility.

Refer to the Billing & Reimbursement Chapters of this manual for complete billing instructions.

SECTION 4 – SPECIAL COVERAGE CONSIDERATIONS [SECTION ADDED 4/1/25]

Services under this section must also meet the requirements outlined within the occupational, physical, and speech-language therapy sections of this chapter. **(text added 4/1/2025)**

4.1 DUPLICATION OF SERVICES [SUBSECTION ADDED 4/1/25]

Medicaid does not cover two disciplines working concurrently on similar goals/areas (e.g., dysphagia, assistive technology, sitting and standing balance/tolerance, hand therapy, transfers, etc.). Collaboration between treating therapists is required to coordinate therapy and prevent duplication of services. Documentation of the collaboration must be retained in the beneficiary's medical record for audit purposes. **(text relocated/revised 4/1/2025)**

4.2 TELEMEDICINE [SUBSECTION ADDED 4/1/25]

Medicaid allows select therapy services to be provided via telemedicine when performed by private practice and outpatient hospital therapy providers. Services allowed via telemedicine will be represented by applicable CPT/HCPCS codes from the telemedicine fee schedule. Therapy services provided via telemedicine are intended to be an additional treatment tool and complement in-person services where clinically appropriate for the individual beneficiary. Refer to the Telemedicine Chapter, Physical Therapy, Occupational Therapy, and Speech Therapy Services subsection, for additional information regarding telemedicine services. **(text added 4/1/2025)**

4.3 SERIAL CASTING [SUBSECTION ADDED 4/1/25]

Serial casting is a process in which a joint(s) that lacks full range of motion is immobilized with a rigid or semi-rigid cast. During this procedure, the affected joint(s) is gradually and progressively set in a more anatomically correct alignment to improve joint alignment, increase muscle length, or to achieve a decrease in abnormal tone, resulting in an increase in the range of motion. Casts are applied and removed in succession, usually every week, until full range of motion, flexibility, or plateau is reached. Upon removal of each cast, the limb is stretched, and a new cast is applied to hold the limb in place.

Serial casting is a covered benefit when performed by, or under the direct supervision of, a qualified therapist and defined in a treatment plan as a medically necessary therapy service for improving range of motion or reducing abnormal tone. The referral for therapy services must specifically indicate that the beneficiary is being referred for serial casting, or the referring provider must provide written concurrence, via signature, of any treatment plan that includes serial casting. **(text relocated/revised 4/1/2025)**

4.4 SUPPLIES, EQUIPMENT, AND ROOM COSTS [SUBSECTION ADDED 4/1/25]

Therapy services are considered all-inclusive charges. Medicaid does not reimburse for a clinic room charge in addition to therapy services unless the room charges are unrelated.

MDHHS does not allow separate reimbursement for supplies and equipment used as part of a therapy treatment or for trials/training in the use of complex durable medical equipment when required to establish competency for a prior authorization request. The cost of supplies and equipment used are included in the reimbursement for the therapy. **(text relocated/revised 4/1/2025)**

4.5 THERAPY FOR BENEFICIARIES WITH AUTISM SPECTRUM DISORDER [RE-NUMBERED 4/1/25]

Beneficiaries diagnosed with autism spectrum disorder (ASD) who have been determined eligible by the Prepaid Inpatient Health Plan (PIHP) for specialty Behavioral Health Treatment (BHT) services may also have any related OT, PT, and ST services covered through the PIHP when the therapy will result in a functional improvement that is significant to the beneficiary's ability to perform daily living tasks appropriate to their chronological, developmental or functional status. These functional improvements should be able to be achieved in a reasonable amount of time and should be durable (i.e., maintainable). Therapy services covered by the PIHP must meet the criteria outlined within the Program Requirements section (Medical Necessity Criteria subsection) of the Behavioral Health and Intellectual and Developmental Disability Supports and Services chapter. Providers should also refer to the Covered Services section in the Behavioral Health and Intellectual and Developmental Disability Supports and Services chapter for additional information.

Medicaid does not require beneficiaries to be referred to or access therapy services through the Medicaid Health Plan (MHP) or Medicaid Fee-for-Service (FFS) program prior to, or in lieu of, accessing therapy through the PIHP when the therapy is related to the beneficiary's ASD diagnosis.

4.6 ACCESS TO SERVICES FOR SCHOOL-AGED BENEFICIARIES [SUBSECTION ADDED 4/1/25]

School-based therapy services are covered by Medicaid when they assist a child/youth with a disability to benefit from special education. This includes beneficiaries up to the age of 21 who are eligible under the provisions of the Individuals with Disabilities Education Act (IDEA) of 1990 as amended, and those enrolled in programs that require an Individualized Education Program (IEP) or an Individualized Family Service Plan (IFSP). Therapy provided solely for educational purposes (e.g., pre-academic goals such as improved attention span, catching/throwing/kicking balls, etc.) is not covered by Medicaid.

Beneficiaries receiving school-based therapy may also receive medically based therapy services in an outpatient setting, nursing facility, or through a home health agency. Medically based therapy services are provided to optimize the child's/youth's maximum functional performance in relation to needs in the home or community setting and must not directly duplicate those provided in the school setting. Medicaid does not require a school-aged beneficiary to be referred to or access therapy services through the School Services Program (SSP) benefit prior to, or in lieu of, accessing medically based therapy in the community. Participation in therapy in one setting is not intended to replace services in the other setting.

If therapy is provided in more than one setting, the goals and purpose for each must be distinct. Collaboration between the school and community providers is required to coordinate therapy and prevent direct duplication of services. Documentation of the collaboration must be retained in the beneficiary's medical record for audit purposes.

Beneficiaries receiving school-based therapy services with medically related goals may be eligible for the continuation of services in an outpatient setting during the summer months to maintain function. Prior authorization is required if standard coverage limitations have been exceeded. (Refer to the Requirements of Continued Therapy for additional information.) **(text relocated/revised 4/1/2025)**

4.7 AQUATIC THERAPY [SUBSECTION ADDED 4/1/25]

Medicaid does not cover aquatic therapy as a separately reimbursable treatment or modality. A covered therapeutic procedure performed in a pool may be reimbursed when billed using the HCPCS code

Medicaid Provider Manual

describing the covered procedure if the service meets all Medicaid coverage requirements. **(text relocated/revised 4/1/2025)**

4.8 GROUP THERAPY [SUBSECTION ADDED 4/1/25]

PT and/or OT are not covered by Medicaid when provided concurrently to a group of two or more individuals by the same therapist. Covered therapeutic procedures require direct (one- to-one) contact between the beneficiary and the therapist.

Speech group therapy requires documentation justifying the benefit of group therapy in addition to, or in place of, individual therapy. No more than one session of individual speech-language therapy and one session of group speech-language therapy may be provided on the same date of service. Group therapy is not covered in the home setting. **(text relocated/revised 4/1/2025)**

4.9 CO-TREATMENT THERAPY [SUBSECTION ADDED 4/1/25]

Co-treatment is a single treatment session in which two therapists from different disciplines work together as a team to address a beneficiary's condition and meet their treatment goals. Medicaid covers outpatient and nursing facility co-treatment therapy when medically necessary for the beneficiary to receive multi-disciplinary therapy during the same treatment session. The two therapists must not work on duplicate treatment goals. Standards of coverage and service limitations for each discipline participating in the co-treatment are identical to those applicable to therapy provided on an individual basis.

The decision to co-treat should be made on a case-by-case basis and be provided solely for the medical benefit of the beneficiary. Co-treatment therapy is not covered when provided for convenience purposes or when the assistance of an additional therapist is requested solely for safety reasons. **(text relocated/revised 4/1/2025)**

4.9.A. PRIOR AUTHORIZATION [SUBSECTION ADDED 4/1/25]

Co-treatment therapy must be prior authorized (PA). Each therapist requesting co-treatment must submit a separate PA to MDHHS; however, both requests should be submitted at the same time. If a PA request includes both individual and co-treatment therapy, the therapist must designate which procedure code, units, frequency, or service dates will be utilized in the co-treatment intervention. Documentation of the beneficiary's evaluation/re-evaluation, individualized treatment plan and short- and long-term goals, and progress should be discipline-specific and submitted with each of the therapist's PA requests.

In addition, the documentation must:

- Support the discipline-specific clinical need and appropriateness of the co-treatment services;
- Demonstrate how the co-treatment will help achieve the therapist's goals more effectively than separate, individual treatment sessions;
- Identify the co-treating discipline; and

Medicaid Provider Manual

- Indicate the anticipated length of time (in sessions or weeks/months) that the beneficiary will require co-treatment rather than individual sessions. **(text relocated/revised 4/1/2025)**

4.9.B. BILLING REQUIREMENTS [SUBSECTION ADDED 4/1/25]

Refer to the Billing & Reimbursement chapters of this manual for specific billing guidelines related to co-treatment therapy. **(text relocated/revised 4/1/2025)**

Medicaid Provider Manual

(Section 4 – Standards of Coverage and Service Limitations was re-formatted. Text was re-formatted into three (3) individual sections:

- **Section 5 – Occupational Therapy**
- **Section 6 – Physical Therapy**
- **Section 7 – Speech Language Therapy)**

SECTION 5 – OCCUPATIONAL THERAPY [SECTION RE-FORMATTED/ADDED 4/1/25]

5.1 STANDARDS OF COVERAGE AND SERVICE LIMITATIONS [RE-NUMBERED, RE-TITLED AND CHANGES MADE 4/1/25]

MDHHS uses the terms Occupational Therapy, OT, and therapy interchangeably. OT is covered when furnished by a Medicaid-enrolled therapy provider and the documentation is signed by the treating therapist. Medicaid reimburses for occupational therapy services when provided by any of the following:

- A licensed occupational therapist.
- A licensed occupational therapy assistant under the supervision of an occupational therapist (i.e., the occupational therapy assistant services must follow the evaluation and treatment plan developed by the occupational therapist, and the occupational therapist must supervise and monitor the occupational therapy assistant's performance with continuous assessment of the beneficiary's progress). All documentation must be reviewed and co-signed by the supervising occupational therapist.
- A student completing their clinical affiliation under the direct supervision of (i.e., in the presence of) an occupational therapist. All documentation must be reviewed and co-signed by the supervising occupational therapist.

MDHHS expects occupational therapists and occupational therapy assistants to utilize the most ethically appropriate therapy within their scope of practice as defined by state law or the appropriate national professional association.

Rehabilitative OT must be medically necessary, reasonable and required to achieve one or more of the following:

- Return the beneficiary to the functional level prior to illness or disability;
- Return the beneficiary to a functional level that is appropriate to a stable medical status;
- Prevent a reduction in medical or functional status had the therapy not been provided.

Habilitative OT must be medically necessary, reasonable and required to develop a reasonable functional status that was not previously learned/achieved at a typically expected age or without compensatory techniques or processes.

Therapies provided to nursing facility beneficiaries outside the nursing facility premises must be provided in the outpatient department of a general hospital or medical care facility.

Therapies provided to county medical care facility, hospital long term care unit, or hospital swing bed beneficiaries outside their respective facilities must be provided in the outpatient department of a general hospital.

Medicaid Provider Manual

Medicaid's standard of coverage for **rehabilitative and habilitative** therapy allows the following:

Outpatient/Private Practice Occupational Therapy	Nursing Facility Occupational Therapy	Home Health Occupational Therapy
<ul style="list-style-type: none">Up to 144 units of OT per calendar year period.Prior authorization is required for treatment that exceeds this unit limitation.	<ul style="list-style-type: none">OT performed within 60 days of the beneficiary's admission to the facility.Prior authorization is required for continued treatment beyond the initial 60-day post admission period.	<ul style="list-style-type: none">Up to 24 visits of OT in one 60-consecutive day period.Prior authorization (PA) is required for treatment that exceeds this visit limitation or for continued treatment beyond the initial 60 days.

OT is expected to result in measurable improvement that is significant to the beneficiary's ability to perform daily living tasks appropriate to their chronological, developmental, or functional status. Functional improvements must be achieved in a reasonable, and generally predictable, amount of time as specified in the short- and long-term goals identified on the evaluation/re-evaluation and treatment plan. Functional improvements must be maintainable. Medicaid does not cover therapy if the beneficiary's maximum functional potential has been realized, the beneficiary has plateaued, or the therapy has no impact on the beneficiary's ability to perform age-appropriate tasks. However, medically necessary habilitative therapy services may be covered under Early and Periodic Screening, Diagnosis and Treatment (EPSDT) or Healthy Michigan Plan.

Medicaid covers maintenance therapy when the skills of a therapist are required for training, review of previously achieved skills, monitoring of a maintenance program being carried out by the beneficiary, family or caregivers, or continued follow-up for the fit and function of orthotic, prosthetic, or assistive technology devices.

Medicaid's standard of coverage for **maintenance therapy** allows the following:

Outpatient/Private Practice Maintenance Occupational Therapy	Nursing Facility Maintenance Occupational Therapy	Home Health Maintenance Occupational Therapy
<ul style="list-style-type: none">Up to four sessions/visits per 90-consecutive day period. The four sessions should not total more than 16 units.Prior authorization is required for treatment that exceeds visit or unit limitations.	<ul style="list-style-type: none">Up to four sessions/visits per 60-consecutive day period. The four sessions should not total more than 16 units.Prior authorization is required for treatment that exceeds visit or unit limitations.	<ul style="list-style-type: none">Up to four sessions/visits per 60-consecutive day period.Prior authorization is required for treatment that exceeds visit limitation.

Medicaid only covers OT services that require the skills, knowledge, and education of an occupational therapist. Medicaid does not cover interventions provided by another practitioner or caregiver (e.g., registered nurse, physical therapist, family member, teacher, etc.).

Medicaid Provider Manual

<p>Occupational therapy may be covered for one or more of the following:</p>	<ul style="list-style-type: none"> ▪ Therapeutic use of everyday life activities/occupations*. ▪ Adaptation of environments and processes to enhance functional performance in occupations*. ▪ Graded tasks (performance components) in activities as prerequisites to an engagement in occupations*. ▪ Oral function (including swallowing, oral and/or pharyngeal dysphagia, and increasing nutrition/hydration). ▪ Design, fabrication, application, or training in the use of assistive technology or orthotic/prosthetic devices. ▪ Skilled services that are designed to develop, train, monitor, and modify a maintenance program to be carried out by the beneficiary, family or caregivers. ▪ Severe pathology in the perception of, or response to, sensory input to the extent that it significantly limits the ability to function. ▪ Federal EPSDT regulations require coverage of medically necessary treatment for beneficiaries under 21 years of age, including medically necessary habilitative therapy services. (Refer to the Early and Periodic Screening, Diagnosis and Treatment chapter for additional information.) <p>*Covered occupations include:</p> <ul style="list-style-type: none"> ▪ Activities of daily living (self-care activities). ▪ Instrumental activities of daily living (multistep activities to care for self and others, such as household management and childcare).
<p>Occupational therapy is not covered for the following:</p>	<ul style="list-style-type: none"> ▪ If provided solely for educational, vocational, or recreational purposes. ▪ If therapy services are required to be provided by another public agency (e.g., community mental health services provider, school-based services, etc.). ▪ If a therapy service requires prior authorization and the service is rendered before prior authorization is approved. ▪ Habilitative therapy designed to facilitate the normal progression of development without compensatory techniques or processes. (Refer to the Early and Periodic Screening, Diagnosis and Treatment and the Healthy Michigan Plan chapters for coverage exceptions.) ▪ If therapy is rote practice of achieved skills. ▪ Development of perceptual motor skills and sensory integrative functions to follow a normal sequence. (Refer to the Early and Periodic Screening, Diagnosis and Treatment and the Healthy Michigan Plan chapters for coverage exceptions.) ▪ If therapy is designed to facilitate the normal progression of development without compensatory techniques or processes. (Refer to the Early and Periodic Screening, Diagnosis and Treatment and the Healthy Michigan Plan chapters for coverage exceptions.) ▪ Non-diagnostic, non-therapeutic, routine, or repetitive tasks without skilled feedback (e.g., sitting with a beneficiary needing prompting to swallow or take small bites which does not require the skills of a therapist, etc.).

Medicaid Provider Manual

	<ul style="list-style-type: none">▪ Feeding for a beneficiary whose status is nothing per oral cavity (NPO), with physician orders to continue NPO.▪ Feeding for a beneficiary who does not demonstrate the potential to improve oral and/or pharyngeal phases of swallowing (i.e., pleasure eating).▪ Continuation of therapy that is maintenance in nature, except as described under Maintenance Visits.▪ If Medicare determines the service is not medically necessary.▪ Additionally for nursing facility beneficiaries:<ul style="list-style-type: none">➢ Therapy provided by a physician (MD or DO).➢ Services covered by the facility's per diem rate, including diversional OT, reality orientation, restorative nursing functions, routine maintenance, or the development of the therapy and treatment plan. (text relocated/revised 4/1/2025)
--	--

5.2 PRESCRIPTION REQUIREMENTS [RE-NUMBERED & CHANGES MADE 4/1/25]

Outpatient hospital, private practice, and nursing facility therapy requires a prescription from a physician or other licensed practitioner practicing within their scope of practice as defined in State law for occupational therapy. Home Health requires a prescription from a physician, physician assistant, nurse practitioner, or clinical nurse specialist for occupational therapy.

A treatment plan meeting all the requirements below is considered a prescription. The prescription/treatment plan must contain all the following:

- Beneficiary's name;
- Beneficiary's date of birth;
- Prescribing practitioner's name, address, and telephone number;
- Prescribing practitioner's signature;
- The date the prescription was written;
- The frequency and duration of the therapy services;
- Diagnosis; and
- For swallowing or oral motor evaluation/treatment, the documentation must clearly specify allowance of trial feeds and/or oral intake during therapy). All documentation, including the prescription, current plan of care, and prior authorization, must consistently substantiate this allowance.

A copy of the prescription must be retained in the beneficiary's medical record. A prescription is valid for 90 days from the date that the prescription was written unless the termination date is otherwise stated by the authorized prescribing practitioner on the prescription. **(text relocated/revised 4/1/2025)**

Medicaid Provider Manual

5.3 SERVICE REQUIREMENTS [NEW SUBSECTION/RE-FORMATTED & CHANGES MADE 4/1/25]

Evaluations/ Re-evaluations	<p>An evaluation is formalized testing at the initiation of the beneficiary's treatment plan. Evaluations may be provided up to two times in a 365-day period. Evaluations of swallowing function may be provided up to four times in a 365-day period. Objective and periodic re-evaluations and reports are utilized to determine the measurable functional change resulting from the treatment plan. Re-evaluations may be provided up to two times in a 365-day period. Prior authorization is required if an evaluation or re-evaluation is needed more frequently. An evaluation/re-evaluation is required for the initiation of therapy and continued therapy.</p> <p>OT evaluations/re-evaluations must be completed and signed by the occupational therapist and include all the following:</p> <ul style="list-style-type: none">▪ Standardized tests and/or objective functional baseline measures to establish short- and long-term goals and to document progress;▪ Corresponding baseline measures for all short- and long-term goals;▪ Treatment diagnosis(es);▪ Medical diagnosis(es), if different from treatment diagnosis;▪ Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable;▪ Medical history as it relates to the current course of therapy;▪ The beneficiary's current functional status (functional baseline);▪ Assessment of the beneficiary's performance components (e.g., strength, dexterity, range of motion, sensation, perception, muscle tone, etc.) directly affecting the beneficiary's ability to function or make progress toward goals; and▪ Assessment of the beneficiary's cognitive skill level (e.g., ability to follow directions, including auditory and visual comprehension). <p>Oral function/swallowing evaluations must also include:</p> <ul style="list-style-type: none">▪ Presence/absence of coughing;▪ History of recent respiratory illness;▪ Current diet, documenting difficulties with food consistencies;▪ Aversion/sensitivity during eating;▪ Objective oral motor assessment addressing labial, glossal, laryngeal, and pharyngeal stages;▪ Report or copy of a video fluoroscopy and any other formal testing, if available; and▪ Voice quality (i.e., pre- and post-feeding and natural voice), if applicable.
--	---

Medicaid Provider Manual

Treatment Plan/Plan of Care	<p>The OT treatment plan that results from the evaluation/re-evaluation must be medically necessary, signed and dated by the occupational therapist, and include all the following:</p> <ul style="list-style-type: none">▪ Time-related short-term goals that are measurable, functional, and significant to the beneficiary's function or mobility;▪ Long-term goals that are measurable, functional, and identify specific maximum functional achievement for the requested authorization period;▪ Functional outcome measures specific to maximum functional achievement for the current course of therapy (up to 12 consecutive months);▪ Anticipated type, frequency and duration of therapy required to meet short- and long-term goals;▪ Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable;▪ Plan for discharge from service; and▪ Signature of the prescribing practitioner confirming agreement with the treatment plan. <p>A treatment plan, including all the criteria established above, must be submitted with each prior authorization request.</p>
Initiation of Services	<p>OT may be initiated upon completion of the evaluation (current within 12 months) and development of a treatment plan that is medically necessary as documented in the beneficiary's medical record. The initiation of therapy services may begin if all the following have been met:</p> <ul style="list-style-type: none">▪ The beneficiary is Medicaid-eligible;▪ A copy of the signed and dated (no more than 90 days prior to the initiation of services) prescription for occupational therapy is retained in the beneficiary's medical record;▪ The standard coverage limitations have not been exceeded;▪ Therapy is provided by the evaluating discipline (e.g., a speech-language pathologist may not provide treatment under an occupational therapist's evaluation); and▪ There is a change in medical status resulting in decreased activities of daily living skills, oral motor skills, or functional ability.

Medicaid Provider Manual

Requirements of Continued Therapy	<p>The occupational therapist must request prior authorization to continue therapy beyond standard coverage limitations, even if the beneficiary changes providers. A copy of the latest evaluation/re-evaluation (completed no more than 12 months prior to the prior authorization request) must be submitted with the prior authorization request.</p> <p>Requests for continued therapy must be supported by all the following:</p> <ul style="list-style-type: none">▪ Summary of previous treatment period (not to exceed the 90 days prior to that period for which prior authorization is being requested), including measurable progress on each short- and long-term goal, rate of progress, a statement of the beneficiary's response to treatment, and any factors that have affected progress during the therapy period. Do not send daily treatment notes.▪ Revised goals and justification for any change in the treatment plan for the requested period of therapy.▪ Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable.▪ Statement detailing any family/caregiver services being provided in a maintenance program, if appropriate.▪ A copy of the prescription indicating the date range of the requested treatment period must be provided with each prior authorization request. The prescription must meet all the requirements established under this subsection. A treatment plan meeting all the prescription requirements is considered a prescription.▪ The anticipated plan of discharge for the current course of therapy (up to 12 consecutive months).▪ If more than 12 months of therapy is anticipated, a new course of therapy with a new evaluation/re-evaluation and treatment plan is required.
Maintenance Visits	<p>The skills of an occupational therapist may be required for training, review of previously achieved skills, monitoring of a maintenance program being carried out by the beneficiary, family or caregivers, or continued follow-up for the fit and function of orthotic, prosthetic, or assistive technology devices. The occupational therapist must request prior authorization to continue maintenance therapy beyond the standard coverage limitations, even if the beneficiary changes providers.</p> <p>The occupational therapist must complete the MSA-115 or FFS DDE plus MSA-115 prior authorization request, and include all the following:</p> <ul style="list-style-type: none">▪ Summary of previous treatment period, including measurable progress on each short- and long-term goal. This must include the treating occupational therapist's analysis of the therapy, rate of progress, and justification for any change in the treatment plan. Documentation must relate to the 90-day period immediately prior to that period for which prior authorization is being requested.▪ A statement of the beneficiary's response to treatment, including factors that have affected progress during the therapy period.▪ A copy or description of the maintenance program.▪ A statement detailing the reason(s) additional maintenance visits are medically necessary.▪ Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable.

Medicaid Provider Manual

	<ul style="list-style-type: none">▪ The anticipated frequency and duration of maintenance visits.▪ The anticipated plan of discharge for the current course of therapy (up to 12 months). <p>A treatment plan signed by the prescribing practitioner that includes all the criteria established under Treatment Plan/Plan of Care above.</p>
Discharge Summary	<p>MDHHS requires the occupational therapist to document a discharge summary to identify the completion of OT services and the discharge status. The discharge summary must be retained in the beneficiary's medical record and include all the following:</p> <ul style="list-style-type: none">▪ Dates of service (i.e., initial and discharge dates);▪ Description of therapy services provided;▪ Functional status at discharge related to treatment areas/goals/maximum functional achievement over the course of therapy;▪ Analysis of the effectiveness of the therapy program, including reasons for goals not met or changes in the treatment plan necessitated by changes in medical status;▪ A copy or description of the maintenance program, if appropriate;▪ Identification of assistive technology devices (e.g., walker) and its current utilization, if appropriate; and▪ Recommendations/referral to other services, if appropriate. (text relocated/revised 4/1/2025)

SECTION 6 – PHYSICAL THERAPY [SUBSECTION ADDED FOR RE-FORMATTED TEXT 4/1/25]

6.1 STANDARDS OF COVERAGE AND SERVICE LIMITATIONS [RE-NUMBERED, RE-TITLED AND CHANGES MADE 4/1/25]

MDHHS uses the terms Physical Therapy, PT, and therapy interchangeably. PT is covered when furnished by a Medicaid-enrolled therapy provider and the documentation is signed by the treating therapist. Medicaid reimburses for physical therapy services when provided by any of the following:

- A licensed physical therapist.
- A licensed physical therapy assistant under the supervision of a physical therapist (i.e., the physical therapy assistant services must follow the evaluation and treatment plan developed by the physical therapist, and the physical therapist must supervise and monitor the physical therapy assistant's performance with continuous assessment of the beneficiary's progress). All documentation must be reviewed and co-signed by the supervising physical therapist.
- A student completing their clinical affiliation under the direct supervision of (i.e., in the presence of) a physical therapist. All documentation must be reviewed and co-signed by the supervising physical therapist.

MDHHS expects physical therapists and physical therapy assistants to utilize the most ethically appropriate therapy within their scope of practice as defined by state law or the appropriate national professional association.

Rehabilitative PT must be medically necessary, reasonable and required to achieve one or more of the following:

- Return the beneficiary to the functional level prior to illness or disability;
- Return the beneficiary to a functional level that is appropriate to a stable medical status;
- Prevent a reduction in medical or functional status had the therapy not been provided.

Habilitative PT must be medically necessary, reasonable and required to develop a reasonable functional status that was not previously learned/achieved at a typically expected age or without compensatory techniques or processes.

Therapies provided to nursing facility beneficiaries outside the nursing facility premises must be provided in the outpatient department of a general hospital or medical care facility.

Therapies provided to county medical care facility, hospital long term care unit or hospital swing bed beneficiaries outside their respective facilities must be provided in the outpatient department of a general hospital.

Medicaid Provider Manual

Medicaid's standard of coverage for **rehabilitative and habilitative** therapy allows the following:

Outpatient/Private Practice Physical Therapy	Nursing Facility Physical Therapy	Home Health Physical Therapy
<ul style="list-style-type: none">Up to 144 units of PT per calendar year period.Prior authorization is required for treatment that exceeds this unit limitation.	<ul style="list-style-type: none">PT performed within 60 days of the beneficiary's admission to the facility.Prior authorization is required for continued treatment beyond the initial 60-day post admission period.	<ul style="list-style-type: none">Up to 24 visits of PT in one 60-consecutive day period.Prior authorization (PA) is required for treatment that exceeds this visit limitation or for continued treatment beyond the initial 60 days.

PT is expected to result in measurable improvement that is significant to the beneficiary's ability to perform mobility skills appropriate to their chronological, developmental, or functional status. Functional improvements must be achieved in a reasonable, and generally predictable, amount of time as specified in the short- and long-term goals identified on the evaluation/re-evaluation and treatment plan. Functional improvements must be maintainable. Medicaid does not cover therapy if the beneficiary's maximum functional potential has been realized, the beneficiary has plateaued, or the therapy has no impact on the beneficiary's ability to perform age-appropriate tasks. However, medically necessary habilitative therapy services may be covered under EPSDT or Healthy Michigan Plan.

Medicaid covers maintenance therapy when the skills of a therapist are required for training, review of previously achieved skills, monitoring of a maintenance program being carried out by the beneficiary, family or caregivers, or continued follow-up for the fit and function of orthotic, prosthetic, or assistive technology devices.

Medicaid's standard of coverage for **maintenance therapy** allows the following:

Outpatient/Private Practice Maintenance Physical Therapy	Nursing Facility Maintenance Physical Therapy	Home Health Maintenance Physical Therapy
<ul style="list-style-type: none">Up to four sessions/visits per 90-consecutive day period. The four sessions should not total more than 16 units.Prior authorization is required for treatment that exceeds visit or unit limitations.	<ul style="list-style-type: none">Up to four sessions/visits per 60-consecutive day period. The four sessions should not total more than 16 units.Prior authorization is required for treatment that exceeds visit or unit limitations.	<ul style="list-style-type: none">Up to four sessions/visits per 60-consecutive day period.Prior authorization is required for treatment that exceeds visit limitation.

Medicaid only covers PT services that require the skills, knowledge, and education of a physical therapist. Medicaid does not cover interventions provided by another practitioner or caregiver (e.g., registered nurse, licensed occupational therapist, family member, teacher, etc.).

Medicaid Provider Manual

Physical therapy may be covered for one or more of the following:	<ul style="list-style-type: none">▪ If expected to result in the restoration or amelioration of the anatomical or physical basis for the restriction in performing age-appropriate functional mobility skills.▪ PT service that is diagnostic.▪ For a temporary condition that creates decreased mobility and/or function.▪ Training in functional mobility skills (e.g., ambulation, transfers, floor mobility, transitions, wheelchair mobility, etc.).▪ Stretching for improved flexibility.▪ Modalities to allow gains of function, strength, or mobility.▪ Training in the use of orthotic/prosthetic devices and assistive technology devices.▪ Severe pathology in the perception of, or response to, sensory input to the extent that it significantly limits the ability to function.▪ Skilled services that are designed to develop, train, monitor, and modify a maintenance program to be carried out by the beneficiary, family or caregivers.▪ Federal EPSDT regulations require coverage of medically necessary treatment for beneficiaries under 21 years of age, including medically necessary habilitative therapy services. (Refer to the Early and Periodic Screening, Diagnosis and Treatment chapter for additional information.)
Physical therapy is not covered for the following:	<ul style="list-style-type: none">▪ If provided solely for educational, vocational, or recreational purposes.▪ If therapy services are required to be provided by another public agency (e.g., community mental health services provider, school-based services, etc.).▪ If a therapy service requires prior authorization and the service is rendered before prior authorization is approved.▪ Habilitative therapy designed to facilitate the normal progression of development without compensatory techniques or processes. (Refer to the Early and Periodic Screening, Diagnosis and Treatment and the Healthy Michigan Plan chapters for coverage exceptions.)▪ If therapy is rote practice of achieved skills.▪ Development of perceptual motor skills and sensory integrative functions to follow a normal sequence. (Refer to the Early and Periodic Screening, Diagnosis and Treatment and the Healthy Michigan Plan chapters for coverage exceptions.)▪ Continuation of therapy that is maintenance in nature, except as described under Maintenance Visits.▪ If Medicare determines the service is not medically necessary.▪ Additionally for nursing facility beneficiaries:<ul style="list-style-type: none">➢ Therapy provided by a physician (MD or DO);➢ Services covered by the facility's per diem rate, including routine maintenance and the development of the therapy and treatment. (text relocated/revised 4/1/2025)

Medicaid Provider Manual

6.2. PRESCRIPTION REQUIREMENTS [RE-NUMBERED & CHANGE MADE 4/1/25]

Outpatient hospital, private practice, and nursing facility therapy requires a prescription from a physician or other licensed practitioner practicing within their scope of practice as defined in State law for physical therapy. Home Health requires a prescription from a physician, physician assistant, nurse practitioner, or clinical nurse specialist for physical therapy.

A treatment plan meeting all of the requirements below is considered a prescription. The prescription/treatment plan must contain all the following:

- Beneficiary's name;
- Beneficiary's date of birth;
- Prescribing practitioner's name, address, and telephone number;
- Prescribing practitioner's signature;
- The date the prescription was written;
- The frequency and duration of the therapy services; and
- Diagnosis.

A copy of the prescription must be retained in the beneficiary's medical record. A prescription is valid for 90 days from the date that the prescription was written unless the termination date is otherwise stated by the authorized prescribing practitioner on the prescription. (text relocated/revised 4/1/2025)

6.3 SERVICE REQUIREMENTS [NEW SUBSECTION/RE-FORMATTED & CHANGES MADE 4/1/25]

Evaluations/ Re-evaluations	<p>An evaluation is formalized testing at the initiation of the beneficiary's treatment plan. Evaluations may be provided up to two times in a 365-day period. Objective and periodic re-evaluations and reports are utilized to determine the measurable functional change resulting from the treatment plan. Re-evaluations may be provided up to two times in a 365-day period. Prior authorization is required if an evaluation or re-evaluation is needed more frequently. An evaluation/re-evaluation is required for the initiation of therapy and continued therapy.</p> <p>PT evaluations/re-evaluations must be completed and signed by the physical therapist and include all the following:</p> <ul style="list-style-type: none">▪ Standardized tests and/or objective functional baseline measures to establish short- and long-term goals and to document progress;▪ Corresponding baseline measures for all short-and long-term goals;▪ Treatment diagnosis(es);▪ Medical diagnosis(es), if different from treatment diagnosis;▪ Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable;
--	---

Medicaid Provider Manual

	<ul style="list-style-type: none"> Medical history as it relates to the current course of therapy; The beneficiary's current functional status (functional baseline); Assessment of the beneficiary's performance components (e.g., strength, dexterity, range of motion, sensation, perception, muscle tone, etc.) directly affecting the beneficiary's ability to function or make progress toward goals; and Assessment of the beneficiary's cognitive skill level (e.g., ability to follow directions, including auditory and visual comprehension).
Treatment Plan/Plan of Care	<p>The PT treatment plan that results from the evaluation must be medically necessary, signed and dated by the physical therapist, and include all the following:</p> <ul style="list-style-type: none"> Time-related short-term goals that are measurable, functional, and significant to the beneficiary's function or mobility; Long-term goals that are measurable, functional, and identify specific maximum functional achievement for the requested authorization period; Functional outcome measures specific to maximum functional achievement for the current course of therapy (up to 12 consecutive months); Anticipated type, frequency, and duration of therapy required to meet short- and long-term goals; Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable; Plan for discharge from service; and Signature of the prescribing practitioner confirming agreement with the treatment plan. <p>A treatment plan, including all the criteria established above, must be submitted with each prior authorization request.</p>
Initiation of Services	<p>PT may be initiated upon completion of the evaluation (current within 12 months) and development of a treatment plan that is medically necessary as documented in the beneficiary's medical record. The initiation of therapy services may begin if all the following have been met:</p> <ul style="list-style-type: none"> The beneficiary is Medicaid-eligible; A copy of the signed and dated (no more than 90 days prior to the initiation of services) prescription for physical therapy is retained in the beneficiary's medical record; The standard coverage limitations have not been exceeded; Therapy is provided by the evaluating discipline (e.g., occupational therapist cannot provide treatment under a physical therapist's evaluation); and There is a change in medical status resulting in decreased mobility skills or functional ability.

Medicaid Provider Manual

Requirements of Continued Therapy	<p>The physical therapist must request prior authorization to continue therapy beyond standard coverage limitations, even if the beneficiary changes providers. A copy of the latest evaluation/re-evaluation (completed no more than 12 months prior to the authorization request) must be submitted with the prior authorization request.</p> <p>Requests for continued therapy must be supported by all the following:</p> <ul style="list-style-type: none">▪ Summary of previous treatment period (not to exceed the 90 days prior to that period for which prior authorization is being requested), including measurable progress on each short- and long-term goal, rate of progress, a statement of the beneficiary's response to treatment, and any factors that have affected progress during the therapy period. Do not send daily treatment notes.▪ Revised goals and justification for any change in the treatment plan for the requested period of therapy.▪ Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable.▪ Statement detailing any family/caregiver services being provided in a maintenance program, if appropriate.▪ A copy of the prescription indicating the date range of the requested treatment period must be provided with each prior authorization request. The prescription must meet all the requirements established in this subsection. A treatment plan meeting all the prescription requirements is considered a prescription.▪ The anticipated plan of discharge for the current course of therapy (up to 12 months).▪ If more than 12 months of therapy is anticipated, a new course of therapy with a new evaluation/re-evaluation and treatment plan is required.
Maintenance Visits	<p>The skills of a physical therapist may be required for training, review of previously achieved skills, monitoring of a maintenance program being carried out by the beneficiary, family or caregivers, or continued follow-up for the fit and function of orthotic, prosthetic, or assistive technology devices. The physical therapist must request prior authorization to continue maintenance therapy beyond the standard coverage limitations, even if the beneficiary changes providers.</p> <p>The physical therapist must complete the MSA-115 or FFS DDE plus MSA-115 prior authorization request, and include all the following:</p> <ul style="list-style-type: none">▪ Summary of previous treatment period, including measurable progress on each short- and long-term goal. This must include the treating physical therapist's analysis of the therapy, rate of progress, and justification for any change in the treatment plan. Documentation must relate to the 90-day period immediately prior to that period for which prior authorization is being requested;▪ A statement of the beneficiary's response to treatment, including factors that have affected progress during the therapy period;▪ A copy or description of the maintenance program;▪ A statement detailing the reason(s) additional maintenance visits are medically necessary;▪ Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable;▪ The anticipated frequency and duration of the maintenance visits;

Medicaid Provider Manual

	<ul style="list-style-type: none">▪ The anticipated plan of discharge for the current course of therapy (up to 12 consecutive months); <p>A treatment plan signed by the prescribing practitioner that includes all the criteria established under Treatment Plan/Plan of Care (above).</p>
Discharge Summary	<p>MDHHS requires the physical therapist to document a discharge summary to identify the completion of PT services and the discharge status. The discharge summary must be retained in the beneficiary's medical record and include all the following:</p> <ul style="list-style-type: none">▪ Dates of service (i.e., initial and discharge dates);▪ Description of therapy services provided;▪ Functional status at discharge related to treatment areas/goals/maximum functional potential over the course of therapy;▪ Analysis of the effectiveness of the therapy program, including reasons for goals not met or changes in the treatment plan necessitated by changes in medical status;▪ A copy or description of the maintenance program, if appropriate;▪ Identification of assistive technology devices (e.g., walker) and its current utilization, if appropriate; and▪ Recommendations/referral to other services, if appropriate. (text relocated/revised 4/1/2025)

SECTION 7 – SPEECH-LANGUAGE THERAPY [SUBSECTION ADDED FOR RE-FORMATTED TEXT 4/1/25]

7.1 STANDARDS OF COVERAGE AND SERVICE LIMITATIONS [RE-NUMBERED, RE-TITLED AND CHANGES MADE 4/1/25]

MDHHS uses the terms speech therapy, SLP, speech-language pathology, speech-language therapy (ST), and therapy to mean speech and language services and speech-language therapy. Speech-language therapy is covered when furnished by a Medicaid-enrolled therapy provider and the documentation is signed by the treating therapist. Medicaid reimburses services for speech-language therapy when provided by any of the following:

- A speech-language pathologist with a current license. Out-of-state therapists must be licensed and/or be certified by the appropriate standard-setting authority in the state in which they are practicing. (Refer to the Out of State/Beyond Borderland Providers subsection of the General Information for Providers chapter for more information.)
- An appropriately supervised speech-language pathologist Educational Limited Temporary licensee completing their postgraduate clinical experience or having completed all requirements but has not yet obtained a full license. All documentation must be reviewed and co-signed by the appropriately credentialed supervising speech-language pathologist.
- A student completing their clinical affiliation under the direct supervision of (i.e., in the presence of) a licensed speech-language pathologist. All documentation must be reviewed and co-signed by the appropriately credentialed supervising speech-language pathologist.

MDHHS expects speech-language pathologists to utilize the most ethically appropriate therapy within their scope of practice as defined by state law or the appropriate national professional association.

Rehabilitative ST must be medically necessary, related to a medical diagnosis, reasonable, and required to achieve one or more of the following:

- Return the beneficiary to the functional level prior to illness or disability;
- Return the beneficiary to a functional level that is appropriate to a stable medical status; and
- Prevent a reduction in medical or functional status had the therapy not been provided.

Speech-Language therapy is limited to services for:

- Articulation
- Language
- Fluency
- Oral function (including swallowing, oral and/or pharyngeal dysphagia, and increasing nutrition/hydration)
- Training in the use of a speech-generating device (SGD)/Augmentative and Alternative Communication (AAC) device/Augmentative Communication Device (ACD)
- Evaluation and instruction in the use of an oral-pharyngeal prosthesis

Medicaid Provider Manual

- Voice
- Rehabilitation of executive skills function status post neurological insult (examples may include reasoning, decision making, judgement, and language)
- Audiologic/Aural Rehabilitation

Habilitative Speech-Language therapy must be medically necessary, reasonable and required to develop a reasonable functional status that was not previously learned/achieved at a typically expected age or without compensatory techniques or processes.

ST provided to nursing facility beneficiaries outside the nursing facility premises must be provided in the outpatient department of a general hospital or medical care facility.

Therapies provided to county medical care facility, hospital long term care unit, or hospital swing bed beneficiaries outside their respective facilities must be provided in the outpatient department of a general hospital.

Medicaid's standard of coverage for **rehabilitative and habilitative** therapy allows the following:

Outpatient/Private Practice Speech-Language Therapy	Nursing Facility Speech-Language Therapy	Home Health Speech-Language Therapy
<ul style="list-style-type: none">• Up to 36 visits of ST per calendar year period.• Prior authorization is required for treatment that exceeds this unit limitation.	<ul style="list-style-type: none">• ST performed within 60 days of the beneficiary's admission to the facility.• Prior authorization is required for continued treatment beyond the initial 60-day post admission period.	<ul style="list-style-type: none">• Home Health ST is covered for CSHCS beneficiaries only.• Prior authorization is required.

ST is expected to result in a measurable improvement that is significant to the beneficiary's ability to demonstrate communication and/or oral motor function appropriate to their chronological, developmental, cognitive, or functional status. Functional improvements must be achieved in a reasonable, and generally predictable, amount of time as specified in the short- and long-term goals identified on the evaluation/re-evaluation and treatment plan. Functional improvements must be maintainable. Medicaid does not cover therapy if the beneficiary's maximum functional potential has been realized, the beneficiary has plateaued, or the therapy has no impact on the beneficiary's ability to perform age-appropriate tasks. However, medically necessary habilitative therapy services may be covered under EPSDT or Healthy Michigan Plan.

Medicaid covers maintenance therapy when the skills of a speech-language pathologist are required for training, review of previously achieved skills, monitoring of a maintenance program being carried out by the beneficiary, family or caregivers, or continued follow-up for the fit and function of orthotic, prosthetic, or assistive technology devices.

Medicaid Provider Manual

Medicaid's standard of coverage for **maintenance therapy** allows the following:

Outpatient/Private Practice Maintenance Speech-Language Therapy	Nursing Facility Maintenance Speech-Language Therapy	Home Health Maintenance Speech-Language Therapy
<ul style="list-style-type: none">Up to four sessions/ visits per 90-consecutive day period. The four sessions should not total more than 16 units.Prior authorization is required for treatment that exceeds visit or unit limitations.	<ul style="list-style-type: none">Up to four sessions/ visits per 60-consecutive day period. The four sessions should not total more than 16 units.Prior authorization is required for treatment that exceeds visit or unit limitations.	<ul style="list-style-type: none">Home Health ST is covered for CSHCS beneficiaries only.Up to four sessions/ visits per 60-consecutive day period.Prior authorization is required.

Medicaid only covers ST services that require the skills, knowledge, and education of a speech-language pathologist. MDHHS does not cover interventions provided by another practitioner or caregiver (e.g., registered nurse, licensed physical therapist, family member, teacher, etc.).

Speech-Language therapy that is related to a medical diagnosis may be covered for one or more of the following:	<ul style="list-style-type: none">It is expected to result in the restoration or amelioration of the beneficiary's ability to communicate wants, needs, and desires to their previous level of function following illness or injury.A temporary condition that results in decreased comprehension and expression, fluency, and/or oral function.Training to improve articulation.Training to improve receptive and expressive language.Training to improve fluency.Training to improve oral and/or pharyngeal phases of swallowing.Training in the use of a SGD/AAC/ACD device.Training in the use of an oral-pharyngeal prosthesis.Training in voice disorders.Training in the use of compensatory communication strategies.Training in restoration of executive skill functions.Skilled services that are designed to develop, train, monitor, and modify a maintenance program to be carried out by the beneficiary, family or caregivers.Federal EPSDT regulations require coverage of medically necessary treatment for beneficiaries under 21 years of age, including medically necessary habilitative therapy services. (Refer to the Early and Periodic Screening, Diagnosis and Treatment chapter for additional information.)
--	---

Medicaid Provider Manual

Speech-Language therapy is not covered for the following:

- If provided solely for educational, vocational, social/emotional, or recreational purposes.
- If therapy services are required to be provided by another public agency (e.g., community mental health services provider, school-based services, etc.).
- If a therapy service requires prior authorization and the service is rendered before prior authorization is approved.
- Habilitative therapy designed to facilitate the normal progression of development without compensatory techniques or processes. (Refer to the Early and Periodic Screening, Diagnosis and Treatment and the Healthy Michigan Plan chapters for coverage exceptions.)
- If therapy is rote practice of achieved skills.
- Feeding for a beneficiary whose status is NPO, with physician orders to continue NPO.
- Feeding for a beneficiary who does not demonstrate the potential to improve oral and/or pharyngeal phases of swallowing (i.e., pleasure eating).
- Non-diagnostic, non-therapeutic, routine, or repetitive tasks without skilled feedback (e.g., sitting with a beneficiary needing prompting to swallow or take small bites which does not require the skills of a therapist, etc.).
- Continuation of therapy that is maintenance in nature, except as described under Maintenance Visits.
- If Medicare determines the service is not medically necessary.
- Additionally for nursing facility beneficiaries:
 - Therapy provided by a physician (MD or DO) is not a covered benefit for beneficiaries in a nursing facility.
 - Services covered by the facility's per diem rate, including routine maintenance and the development of the therapy and treatment. **(text relocated/revised 4/1/2025)**

7.2 PRESCRIPTION REQUIREMENTS [RE-NUMBERED & CHANGES MADE 4/1/25]

Outpatient hospital, private practice, and nursing facility therapy requires a prescription from a physician or other licensed practitioner practicing within their scope of practice as defined in State law for speech-language therapy. Home health therapy requires a prescription from a physician for speech-language therapy.

A treatment plan meeting all the requirements below is considered a prescription. The prescription/treatment plan must contain all the following:

- Beneficiary's name;
- Beneficiary's date of birth;
- Prescribing practitioner's name, address, and telephone number;
- Prescribing practitioner's signature;
- The date the prescription was written;

Medicaid Provider Manual

- The frequency and duration of the therapy services;
- Diagnosis; and
- For swallowing or oral motor evaluation/treatment, the documentation must clearly specify allowance of trial feeds and/or oral intake during therapy. All documentation, including the prescription, current plan of care, and prior authorization, must consistently substantiate this allowance.

A copy of the prescription must be retained in the beneficiary's medical record. A prescription is valid for 90 days from the date that the prescription was written unless the termination date is otherwise stated by the authorized prescribing practitioner on the prescription. **(text relocated/revised 4/1/2025)**

7.3 SERVICE REQUIREMENTS [NEW SUBSECTION/RE-FORMATTED & CHANGES MADE 4/1/25]

Evaluations/ Re-evaluations	<p>An evaluation is formalized testing at the initiation of the beneficiary's treatment plan. Evaluations may be provided up to two times in a 365-day period. Oral function or swallowing evaluations may be provided up to four times in a 365-day period. Objective and periodic re-evaluations and reports are utilized to determine the measurable functional change resulting from the treatment plan. Re-evaluations may be provided up to two times in a 365-day period. Prior authorization is required if an evaluation or re-evaluation is needed more frequently. An evaluation/re-evaluation is required for the initiation of therapy and continued therapy.</p> <p>Speech-Language therapy evaluations/re-evaluations must be completed and signed by the speech-language pathologist and include all the following:</p> <ul style="list-style-type: none">▪ Standardized tests and/or objective functional baseline measures used to establish short- and long-term goals and to document progress;▪ Corresponding baseline measures for all short-and long-term goals;▪ Treatment diagnosis(es);▪ Medical diagnosis(es), if different from treatment diagnosis;▪ Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable;▪ Medical history as it relates to the current course of therapy;▪ Assessment of the beneficiary's performance components (e.g., functional communication, receptive, expressive, articulation, fluency, voice, oral function, muscle tone, etc.) directly affecting the beneficiary's ability to function or make progress toward goals;▪ Assessment of the beneficiary's cognitive skill level (e.g., ability to follow directions, including auditory and visual comprehension).
--	--

Medicaid Provider Manual

	<p>Oral function/swallowing evaluations must also include:</p> <ul style="list-style-type: none"> ▪ Presence/absence of coughing; ▪ History of recent respiratory illness; ▪ Current diet, documenting difficulties with food consistencies; ▪ Aversion/sensitivity during eating; ▪ Report or copy of a video fluoroscopy and any other formal testing, if available; ▪ Objective oral motor assessment addressing labial, glossal, laryngeal, and pharyngeal stages; ▪ Voice quality (i.e., pre- and post-feeding and natural voice), if applicable.
Treatment Plan/Plan of Care	<p>The ST treatment plan that results from the evaluation must be medically necessary, signed and dated by the speech-language pathologist, and include all the following:</p> <ul style="list-style-type: none"> ▪ Time-related short-term goals that are measurable, functional, and significant to the beneficiary's communication and/or oral motor function needs; ▪ Long-term goals that are measurable, functional, and identify specific maximum functional achievement for the requested authorization period; ▪ Functional outcome measures specific to maximum functional achievement for the current course of therapy (up to 12 consecutive months); ▪ Anticipated type, frequency and duration of therapy required to meet short- and long-term goals; ▪ Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable; ▪ Plan for discharge from service; and ▪ Signature of the prescribing practitioner confirming agreement with the treatment plan. <p>A treatment plan, including all the criteria established above, must be submitted with each prior authorization request.</p>
Initiation of Services	<p>Speech-Language therapy may be initiated upon completion of the evaluation (current within 12 months) and development of a treatment plan that is medically necessary as documented in the beneficiary's medical record. The initiation of therapy services may begin if all the following have been met:</p> <ul style="list-style-type: none"> ▪ The beneficiary is Medicaid eligible; ▪ A copy of the signed and dated (no more than 90 days prior to the initiation of services) prescription for speech-language therapy is retained in the beneficiary's medical record; ▪ The standard coverage limitations have not been exceeded; ▪ Therapy is provided by the evaluating discipline (e.g., an occupational therapist cannot provide treatment under a speech-language pathologist's evaluation); and ▪ If there is a change in medical status resulting in decreased communication skills, oral motor skills, or functional ability.

Medicaid Provider Manual

Requirements of Continued Therapy	<p>The speech-language pathologist must request prior authorization to continue therapy beyond standard coverage limitations, even if the beneficiary changes providers. A copy of the latest evaluation/re-evaluation (completed no more than 12 months prior to the prior authorization request) must be submitted with the prior authorization request.</p> <p>Requests for continued therapy must be supported by all the following:</p> <ul style="list-style-type: none">▪ Summary of previous treatment period (not to exceed the 90 days prior to that period for which prior authorization is being requested), including measurable progress on each short- and long-term goal, rate of progress, a statement of the beneficiary's response to treatment, and any factors that have affected progress during the therapy period. Do not send daily treatment notes.▪ Revised goals and justification for any change in the treatment plan for the requested period of therapy.▪ Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable.▪ Statement detailing any family/caregiver services being provided in a maintenance program, if appropriate.▪ A copy of the prescription indicating the date range of the requested treatment period must be submitted with each prior authorization request. The prescription must meet all the requirements established under this subsection. A treatment plan meeting all the prescription requirements is considered a prescription.▪ The anticipated plan of discharge for the current course of therapy (up to 12 months).▪ If more than 12 months of therapy is anticipated, a new course of therapy with a new evaluation/re-evaluation and treatment plan is required.
Maintenance Visits	<p>The skills of a speech-language pathologist may be required for training, review of previously achieved skills, monitoring of a maintenance program being carried out by the beneficiary, family or caregivers, or continued follow-up for the fit and function of orthotic, prosthetic, or assistive technology devices. The speech-language pathologist must request prior authorization to continue maintenance therapy beyond the standard coverage limitations, even if the beneficiary changes providers.</p> <p>The speech-language pathologist must complete the MSA-115 or FFS DDE plus MSA-115 prior authorization request, and include all the following:</p> <ul style="list-style-type: none">▪ Summary of previous treatment period, including measurable progress on each short- and long-term goal. The summary must include the treating speech-language pathologist's analysis of the therapy, rate of progress, and justification for any change in the treatment plan. Documentation must relate to the 90-consecutive day period immediately prior to that period for which prior authorization is being requested.▪ A statement of the beneficiary's response to treatment, including factors that have affected progress during the therapy period.▪ A copy or description of the maintenance program.▪ A statement detailing the reason(s) additional maintenance visits are medically necessary.

Medicaid Provider Manual

	<ul style="list-style-type: none">Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable.The anticipated frequency and duration of the maintenance visits.The anticipated discharge plan for the current course of therapy (up to 12 consecutive months).A treatment plan signed by the prescribing practitioner that includes all the criteria established under Treatment Plan/Plan of Care (above).
Discharge Summary	<p>MDHHS requires the speech-language pathologist to document a discharge summary to identify the completion of speech-language therapy services and the discharge status. The discharge summary must be retained in the beneficiary's medical record and include all the following:</p> <ul style="list-style-type: none">Dates of service (i.e., initial and discharge dates);Description of therapy services provided;Functional status at discharge related to treatment areas/goals/maximum functional achievement over course of therapy;Analysis of the effectiveness of the therapy program, including reasons for goals not met or changes in the treatment plan necessitated by changes in medical status;A copy or description of the maintenance program, if appropriate;Identification of assistive technology devices provided (e.g., SGD/AAC, switches) and its current utilization, if appropriate; andRecommendations/referrals to other services, if appropriate. (text relocated/revised 4/1/2025)

7.4 EVALUATIONS AND FOLLOW-UP FOR SPEECH-GENERATING DEVICES/VOICE PROSTHESES [RE-NUMBERED & CHANGES MADE 4/1/25]

Speech generating devices (SGDs) provide an individual with a severe speech impairment, who is unable to communicate using natural means (e.g., spoken, written, gestures, sign language), the ability to meet their daily communication needs. To be considered for SGD coverage, a SLP must provide a thorough and systematic evaluation of the beneficiary's receptive and expressive communication abilities. The SLP SGD evaluation should be conducted in conjunction with other disciplines including an occupational therapist and/or physical therapist to address functional abilities that impact the ability to utilize an SGD. These functional abilities include, but are not limited to, motor skills, accessing, positioning needs, and vision. The results of the PT/OT evaluation must be shared with the SLP so that it can be included with the SLP's evaluation.

Prior authorization is required for all SGDs. The Special Services Prior Approval-Request/Authorization form (MSA-1653-B) must be submitted for all original, replacement, upgrade, or repair of SGDs. (Refer to the Forms Appendix for additional information.) The SLP evaluation must be shared with the provider submitting the SGD prior authorization request. Refer to the Speech Generating Devices subsection of the Medical Supplier Chapter for additional coverage and PA information regarding SGDs.

The speech-language pathologist evaluation for recommendation of a SGD may be billed once in three years. Prior authorization is required for evaluations exceeding standard coverage limitations.

Medicaid Provider Manual

SGD set-up, programming, and modification services that require the skills of a speech-language pathologist (beyond those provided by the SGD vendor) are covered as part of the beneficiary's ST benefit and may be billed up to 36 visits per calendar year.

An evaluation for the use and/or fitting of a voice prosthetic device to supplement oral speech may be billed only if the evaluation was done to determine the need for an electro-larynx. The evaluation may be provided once in three years. **(text relocated/revised 4/1/2025)**

Medicaid Provider Manual

Section 9 – Alternative Payment Methodology for Prescriptions	16
9.1 Encounters	16
9.2 Quarterly Payments.....	16

SECTION 1 – GENERAL INFORMATION

Under the Indian Self-Determination and Education Assistance Act (Public Law 93-638), tribal facilities, including Tribal Health Centers (THCs), are those owned and operated by American Indian/Alaska Native tribes and tribal organizations under contract or compact with the Indian Health Service (IHS).

The Michigan Department of Health and Human Services (MDHHS), which administers the State Medicaid Agency (SMA), has the authority to enter into reimbursement agreements with THCs to establish a payment mechanism for Medicaid beneficiaries receiving outpatient services through a THC.

Under the Michigan Medicaid State Plan, THCs have the option of choosing from one of four reimbursement mechanisms. The THC may elect to be reimbursed under only one of the options listed below, and the selected option applies to all beneficiaries receiving services at the THC. The options are:

- A THC may choose to be certified as an IHS facility and receive the IHS outpatient all-inclusive rate (AIR) for eligible encounters. The AIR applies to encounters for both native and non-native Medicaid beneficiaries. THCs are reimbursed at the AIR unless the THC chooses a different payment option and informs MDHHS of this choice in writing.
- If a THC chooses to be reimbursed as a FQHC, the entity would be required to adhere to the same requirements specified in the Federally Qualified Health Centers Chapter.
- A Tribal facility may choose to enroll as a Tribal FQHC and be reimbursed for outpatient face-to-face visits within the FQHC scope of services provided to Medicaid beneficiaries, including telemedicine and services provided by contracted employees. Tribal FQHCs are eligible to receive the IHS outpatient AIR for eligible encounters.
- A THC may be reimbursed as a fee-for-service provider. THCs choosing this option receive payment for covered services. No additional reimbursement or settlement is made.

In addition, eligible prescriptions dispensed by THC and Tribal FQHC pharmacies constitute a separate encounter per prescription and are reimbursed the IHS outpatient AIR. The AIR applies to prescriptions for both native and non-native Medicaid beneficiaries.

Upon federal approval by the Health Resources and Services Administration, THCs may be reimbursed as a Federally Qualified Health Center (FQHC) by signing the FQHC Memorandum of Understanding (MOU). THCs choosing this option will receive the FQHC encounter rate set by the State in accordance with the Michigan Medicaid State Plan and federal regulations. The FQHC encounter rate applies to encounters for both native and non-native Medicaid beneficiaries. A THC electing to be reimbursed as an FQHC is not required to have a contract with the managed care entity.

SECTION 2 – MEDICAID ENROLLMENT

2.1 PROVIDER ENROLLMENT

MDHHS requires all THC's to have a Type 2 (Organization) National Provider Identification (NPI) number in order to receive the enhanced THC reimbursement. For THC's with multiple locations and multiple rates, an NPI number for each location may be necessary so that the proper reimbursement rate of all encounters can be determined. If the THC fails to obtain and/or use the correct NPI number, the THC reimbursement will be determined under fee for service rules. The NPI number must be reported to MDHHS before billing Medicaid services.

Individual providers (doctors, dentists, optometrists, etc.) are required to obtain a Provider (Type 1 - Individual) NPI number and report the number to MDHHS.

In accordance with 42 CFR 455.104 and the Provider Ownership and Control Disclosures subsection of the General Information for Providers chapter of this Manual, clinics are required to disclose ownership information to MDHHS within 35 days of a change of ownership. Failure to notify MDHHS of any change in identification information may result in the loss of Medicaid enrollment, lapse of provider eligibility, or nonpayment of services.

2.1.A. NON-PHYSICIAN BEHAVIORAL HEALTH SERVICES

Licensed psychologists (Master's Limited or Doctoral level), social workers (Master's level), professional counselors (Master's or Doctoral level), and marriage and family therapists who serve Medicaid beneficiaries are required to enroll as Medicaid providers. Services must be billed using the appropriate evaluation and management (E/M) codes listed in the American Medical Association's Current Procedural Terminology (CPT) Book or Healthcare Common Procedure Coding System (HCPCS) codes. Providers should refer to the Non-Physician Behavioral Health provider database on the MDHHS website for the current list of covered procedure codes. The list of allowable services is reviewed annually and updated as applicable. Refer to the Additional Code/Coverage Resource Materials Section of the General Information for Providers Chapter for additional information regarding coverage parameters.

2.2 NONENROLLED PROVIDERS

Professional services performed by limited licensed psychologists (except as noted in Section 333.18223 of the Public Health Code), social workers, professional counselors, marriage and family therapists or student interns must be performed under the supervision of an enrolled, fully-licensed provider of the same profession. Since MDHHS does not directly enroll these providers, claims for their services must be billed using the NPI of the supervising provider responsible for ensuring the medical necessity and appropriateness of the services. Claims submitted with the non-enrolled provider's NPI in the rendering provider field will reject.

Medicaid Provider Manual

SECTION 3 – BENEFITS

3.1 COVERED SERVICES [CHANGE MADE 7/1/2025]

THC services are reimbursed at the current Medicaid fee screens and reconciled annually, if applicable, for services provided to Medicaid fee-for-service (FFS) or managed care beneficiaries. THC Medicaid services include:

- Physician (MD, DO) services
- Podiatrist (DPM) services
- Chiropractor (DC) services
- Optometrist (OD) services
- Dental (DDS, DT, RDH) services
- Advanced practice registered nurse (APRN) services
- Physician assistant (PA) services
- Services and supplies incident to the services rendered by the provider:
 - Pharmacy services administered by the provider and billed under the provider's NPI number
 - Laboratory services billed under the provider's NPI number
 - Diagnostic services billed under the provider's NPI number
- Therapies (i.e., Occupational, Physical, and Speech, Hearing, and Language Evaluation and Therapy) rendered under the physician's NPI number

The services listed may be modified in accordance with benefits covered under the Medicaid State Plan. MDHHS notifies providers of changes (additions/deletions) in Medicaid covered services through the Medicaid bulletin process. Providers should refer to these documents to verify that benefits are covered prior to rendering services.

For clarification of covered services:

Physician Services	Physician services must comply with coverages and limitations published in the Practitioner Chapter of this manual and in MDHHS Bulletins.
Podiatrist Services	Podiatrist services must comply with coverages and limitations published in the Practitioner Chapter of this manual and in MDHHS Bulletins.
Chiropractor Services	Chiropractor services must comply with the coverages and limitations published in the Chiropractor Chapter of this manual and MDHHS Bulletins.

Medicaid Provider Manual

Maternal Infant Health Program (MIHP)	<p>THCs providing Maternal Infant Health Program (MIHP) services must be certified through MDHHS. Information specific to the coverages and limitations for MIHP services are detailed in the Maternal Infant Health Program Chapter of this manual. MIHP related services rendered to fee-for-service beneficiaries must be billed on the ASC X12N 837 5010 professional format. Refer to the Billing & Reimbursement for Professionals Chapter of this manual for specific billing guidelines.</p> <p>If the THC subcontracts any MIHP services, no duplicate billing is permitted.</p>
Physician's Assistant	<p>Physician's assistant services must comply with coverages and limitations published in the Practitioner Chapter of this manual and in MDHHS Bulletins.</p>
Advanced Practice Registered Nurse (APRN)	<p>APRN services must comply with the coverages and limitations published in the Practitioner Chapter of this manual and in MDHHS Bulletins.</p>
Pharmacy Services	<p>Pharmacy services billed under the practitioner NPI number are included in the encounter rate but do not constitute a separate encounter as they are considered part of the office visit.</p> <p>Practitioner pharmacy services do not include drugs provided by a pharmacy. THCs with enrolled pharmacy providers may continue to bill prescription claims for FFS beneficiaries to the MDHHS Pharmacy Benefits Manager (PBM). For beneficiaries enrolled in a health plan, prescription claims are billed to the health plan's PBM. (text added 7/1/2025)</p> <p>Medication Therapy Management (MTM) services are face-to-face consultations provided by pharmacists to optimize drug therapy and improve therapeutic outcomes for beneficiaries. MTM services provided according to Medicaid policy may be eligible to receive the encounter rate. (Refer to the Pharmacy Chapter of this manual for additional information.)</p> <p>MDHHS contracts with a PBM for processing of all fee-for-service (FFS) pharmacy claims for Medicaid. (Refer to the Pharmacy Chapter of this manual for an explanation of coverages and limitations.)</p>
Laboratory Services	<p>The Laboratory Chapter of this manual explains the coverages and limitations of the Medicaid laboratory benefit. Laboratory services billed under the practitioner's NPI number are included in the THC encounter rate but do not constitute a separate encounter for reimbursement purposes as they are considered part of the office visit.</p> <p>THCs cannot bill for any services rendered by an outside laboratory provider or for an outside laboratory's employees performing tests.</p>
Diagnostic Services	<p>Diagnostic testing performed as part of an office visit must be directly related to the presenting condition and substantiated in the medical records. (Refer to the Billing & Reimbursement for Professionals Chapter of this manual for billing information.)</p> <p>Diagnostic testing services do not constitute a separate encounter. These services are regarded as part of the office visit and are included in the encounter reimbursement. Examples of diagnostic tests are allergy testing, audiologic function tests, x-rays, and EKGs.</p>

Medicaid Provider Manual

Telemedicine	<p>A THC can be either an originating or distant site for telemedicine services. Refer to the Billing & Reimbursement for Institutional Providers Chapter for specific billing instructions. Refer to the Telemedicine Chapter for additional information regarding telemedicine services.</p> <p>Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.</p>
Therapies	<p>Physical therapy, speech therapy, and occupational therapy are covered when performed at the THC. Refer to the appropriate chapter of this manual and MDHHS Bulletins for an explanation of current coverages and limitations. The Billing & Reimbursement for Professionals Chapter of this manual describes the billing requirements for services provided. Therapies provided on the same date of service as a physician visit are included in the encounter reimbursement.</p>

3.2 DENTAL COVERAGES AND LIMITATIONS

THC dental services are covered if provided in the THC and must comply with coverages and limitations for dental services as specified in the Dental Chapter of this manual. Dental benefits covered for beneficiaries under the age of 21 differ from those covered for beneficiaries age 21 and over.

Information for billing dental services is published in the Billing & Reimbursement for Dental Providers Chapter of this manual.

MDHHS contracts with Dental Health Plans (DHPs) for the administration of dental services for *Healthy Kids Dental* (HKD) beneficiaries. Claims for services provided to beneficiaries enrolled in the HKD program should be submitted to the beneficiary's DHP. Payment is made based on the DHP fee schedule. No additional reimbursement is made by MDHHS.

(Refer to the Directory Appendix for DHP contact information.)

3.3 VISION COVERAGES AND LIMITATIONS

Vision services are covered if provided at the THC. Vision providers are ophthalmologists and optometrists. The vision services provided by an ophthalmologist or optometrist must comply with coverages and limitations published in the Vision Chapter of this manual.

MDHHS contracts for the volume purchase of frames and lenses from an optical house. Frames and lenses covered by the program must be ordered through the contractor and are listed in the Vision Chapter of this manual.

Some vision services require prior authorization (PA) before they can be rendered. The Vision Services Approval/Order Form (DCH-0893) is used to obtain PA. (Refer to the Vision Chapter for information on services that require PA and to the Forms Appendix for a copy of the form.)

3.4 SERVICES PROVIDED TO MEDICAID HEALTH PLAN ENROLLEES

For Medicaid-covered services provided to Medicaid beneficiaries enrolled in a Medicaid Health Plan (MHP), THCs receive payment from the MHP based on an agreement or contract with the MHP. In the absence of an agreement or contract, payment is based on the Medicaid fee-for-service (FFS) rates in

Medicaid Provider Manual

effect on the date of service (DOS). Approved services provided to MHP enrollees are then recognized as encounters.

3.5 MEDICARE AND MEDICAID BENEFICIARIES

For dually eligible Medicare and Medicaid beneficiaries, Medicaid reimburses coinsurance and deductible amounts on Medicare-approved claims up to Medicare's IHS encounter rate.

SECTION 4 – SUBSTANCE ABUSE

Outpatient substance abuse services provided by physicians, clinical social workers, clinical psychologists, and substance abuse treatment specialists are reimbursed. These services may include:

- Initial complete physical
- Medical history
- Social history
- Psychiatric history
- Individual, family, and group counseling
- Outpatient substance abuse treatment
- Intensive outpatient counseling
- Therapies (i.e., Psychiatric occupational/recreational therapy) in a Tribal-operated substance abuse treatment center are covered services provided they are active, restorative, and designed to prevent, correct, or compensate for a specific medical problem.
- Methadone

4.1 REQUIREMENTS FOR PARTICIPATION

All programs must meet the following criteria to bill Medicaid for services:

- Accredited as an alcohol and/or drug abuse program by one of the six national accreditation bodies:
 - The Joint Commission
 - Commission on Accreditation of Rehabilitation Facilities (CARF)
 - American Osteopathic Association (AOA)
 - Council on Accreditation of Services for Families and Children (CASFC)
 - National Committee on Quality Assurance (NCQA)
 - Accreditation Association for Ambulatory Health Care (AAHC)

4.2 AUTHORIZATION

Services provided at the THC to American Indian and Alaska Native beneficiaries do not require the authorization of the regional Prepaid Inpatient Health Plan (PIHP).

4.3 AMERICAN INDIAN AND ALASKA NATIVE SERVICES

American Indians and Alaska Natives who are Medicaid beneficiaries can obtain substance abuse services directly from the THC. These services are not included in the MDHHS §1915(b) Managed Specialty Services and Supports Waiver for PIHPs and substance use disorder services. THCs should contact their regional PIHP to determine the appropriate process for accessing other funding sources or other service providers for those individuals requiring substance abuse services not covered by the THC.

4.4 SERVICES PROVIDED TO NON-AMERICAN INDIANS AND ALASKA NATIVES

The MDHHS Prepaid Inpatient Health Plan (PIHP) for Specialty Developmental Disabilities, Mental Health and Substance Abuse services assumes responsibility for certifying admission/continuing stays and reimbursing claims for the specialized substance abuse services of non-American Indians and Alaska Natives. Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter of this manual for further information on PIHPs, Mental Health and Substance Abuse Services. Substance abuse services for non-American Indians and Alaska Natives must not be billed under CPT and HCPCS codes.

4.5 SERVICE LIMITS

THCs may exceed the substance abuse treatment limits for American Indian and Alaska Native beneficiaries as long as the medical record and plan of care documents the medical necessity.

4.6 NONCOVERED SERVICES

The following substance abuse services are not covered when provided through THCs:

- Emergency and non-emergency transportation
- Initial emergency screening and medical stabilization
- Acute medical detoxification services
- Medications prescribed in the management or treatment of methadone
- Room and Board

SECTION 5 – MENTAL HEALTH

Outpatient mental health services provided by physicians, clinical social workers, and clinical psychologists are covered. These services may include:

- Health assessment
- Psychiatric evaluation
- Psychological testing
- All other assessments and testing
- Case management
- Child therapy
- Crisis interventions
- Crisis residential services
- Intensive crisis stabilization services
- Individual psychotherapy
- Family psychotherapy
- Group psychotherapy
- Interpretation or explanation of data to family
- Medication administration
- Medication review
- Therapies (i.e., psychiatric occupational/recreational therapy) in a mental health treatment center are a covered service provided they are active, restorative, and designed to prevent, correct, or compensate for a specific medical problem.

5.1 NONENROLLED PROVIDERS

Professional services provided by limited licensed psychologists (except as noted in Section 333.18223 of the Public Health Code), social workers, professional counselors, marriage and family therapists or student interns are covered but must be performed under the supervision of an enrolled, fully-licensed provider of the same profession. Individuals who meet Michigan licensure/certification requirements for social workers and psychologists may provide services.

5.2 AUTHORIZATION

Mental health services provided at the THC to American Indian and Alaska Native beneficiaries do not require the authorization of PIHPs/CMHSPs.

5.3 AMERICAN INDIAN AND ALASKA NATIVE SERVICES

American Indians and Alaska Natives who are Medicaid beneficiaries can obtain mental health services directly from the THC. THC services are not included in the MDHHS §1915(b) Managed Specialty Services and Supports Waiver for PIHPs and substance use disorder services. THCs may refer tribal members to the PIHP/CMHSP for mental health services not provided at the THC.

5.4 NON-AMERICAN INDIAN SERVICES

PIHPs/CMHSPs assume responsibility for community-based mental health and developmental disability services covered through Medicaid for non-American Indians. Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter of this manual for policies and procedures. Non-American Indian mental health services must not be billed under CPT or HCPCS codes.

5.5 NONCOVERED SERVICES

Mental Health services that are **not** the responsibility of the THC are as follows:

- Home-based mental health services
- Nursing facility (NF) mental health monitoring
- Emergency and non-emergency transportation

SECTION 6 – ENCOUNTERS

THCs are eligible to receive an encounter (per visit) rate as reimbursement for Medicaid covered services provided at the THC for native and non-native Medicaid beneficiaries.

The IHS outpatient all-inclusive rate (AIR) is determined by the Centers for Medicare & Medicaid Services (CMS) and is published in the Federal Register. The FQHC encounter rate under the FQHC MOU is an alternative methodology that was based on the prospective payment system (PPS) outlined in section 1902(bb) of the Social Security Act.

6.1 DEFINITION

An encounter is a face-to-face visit between a Medicaid beneficiary and the THC provider of health care services who exercises independent judgment in the provision of Medicaid-covered services. The THC provider may be credited with no more than one face-to-face encounter with a given beneficiary per day, except when the beneficiary, after the first encounter, suffers a separate or different illness or injury requiring additional diagnosis or treatment.

For a service to be defined as an encounter, the Medicaid-covered service must be recorded in the patient's record.

6.2 SERVICES BUNDLED IN THE ENCOUNTER

Ancillary Medicaid services (e.g., labs, x-rays, injections, etc.) are included in the per visit encounter. These ancillary services are described as being provided incident to the office visit. For example, lab services billed under the physician's NPI number would not be considered a separate encounter.

Ancillary services provided at another facility are not bundled under the office visit encounter. For example, services provided by the local hospital are not included in the encounter.

SECTION 7 – BILLING

The Type 2 (Organization) NPI number must be used as the billing provider on all electronic and paper claims submitted to Medicaid. Do not use Provider (Type 1 - Individual) as the billing provider. The billing provider loop or field is mandatory to complete.

The NPI (Type 1 – Individual) number of the practitioner overseeing the beneficiary's care must be entered as the attending provider. The attending provider field is mandatory to complete. The following providers may be reported in the attending provider field:

- Physicians (includes dentists, podiatrists, optometrists, and chiropractors)
- Nurse Practitioners
- Physician Assistants
- Certified Nurse Midwives
- Clinical Psychologists
- Clinical Social Workers
- Clinical Nurse Specialists
- Licensed Psychologists (Doctoral Level)
- Social Workers (Master's Level)
- Professional Counselors (Master's or Doctoral levels)
- Marriage and Family Therapists
- Limited Licensed Psychologists (Master's or Doctoral Level)

Additionally, the NPI (Type 1 – Individual) number of the practitioner who performed the service should be entered as the rendering provider. Do not enter a Type 2 (Organization) NPI number as the attending or rendering provider.

MDHHS will use the billing provider NPI field (Type 2 - Organization) to determine the number of encounters and calculate the settlement for the year-end reconciliation.

7.1 CLINICAL TRIALS

The program covers routine patient costs furnished in connection with participation in a qualifying clinical trial. Refer to the Practitioner Chapter for additional coverage information.

All THC claims for routine patient costs associated with participation in a clinical trial must adhere to the inpatient hospital claim guidelines for reporting covered services using the CMS UB04/8371 institutional claim format. In addition, THC claims must include:

- A completed and signed Attestation to the Appropriateness of the Qualified Clinical Trial form (BPHASA-2210). (Refer to the Forms Appendix to review the form and to the Directory Appendix for form access on the MDHHS website.)

Medicaid Provider Manual

- Clinical trial and non-clinical trial services on separate line items when claims are submitted for both types of services on the same claim.
- Each line identified with the appropriate Healthcare Common Procedure Coding System (HCPCS) Modifier Q0 or Q1.
 - HCPCS Modifier Q0 - **investigational clinical service** provided in a clinical research study that is in an approved clinical research study.
 - HCPCS Modifier Q1 – **routine clinical service** provided in a clinical research study that is in an approved clinical research study.

7.1.A. REPORTING NON-COVERED SERVICES

Generally, services, investigational drugs, or items that are part of the clinical trial and considered experimental or investigational should not be reported on a claim. In instances when claims processing edits require non-covered services be billed with their associated procedures, or when it is necessary for a provider to show the items and services provided free-of-charge to receive payment for the covered routine costs, providers are instructed to report non-covered services with the appropriate modifier and a charge of \$0.

7.2 OTHER INSURANCE

Billing instructions related to coordination of benefits are published in the Coordination of Benefits Chapter of this manual. Other insurance and all other payments received for services rendered to a Medicaid beneficiary must be reported. If payment received from other insurance exceeds the amount Medicaid would have paid, the THC must still submit a claim to Medicaid with the appropriate procedure code in order for the visit to be counted as an encounter.

7.3 MEDICARE AND MEDICAID CLAIMS

Refer to the Billing & Reimbursement Chapters of this manual for specific instructions regarding Medicare and Medicaid claims. If the Medicare payment exceeds the Medicaid fee screen, the appropriate procedure code should still be billed to Medicaid for encounter and reconciliation purposes.

7.4 PAYER OF LAST RESORT

The IHS is the payer of last resort for persons defined as eligible for contract health services under the regulations in 42 CFR, Part 36a, Subpart G, Section 36.61, notwithstanding any State or local law or regulation to the contrary.

7.5 COPAYMENTS

Medicaid copayments for chiropractic, dental, physician, podiatry and vision services are waived under the THC benefit as part of the reconciliation. (Refer to the General Information for Providers chapter for a list of services requiring copayments.)

Refer to the Billing Beneficiaries Section of the General Information for Providers Chapter of this manual for additional information regarding copayment requirements. Beneficiaries may not be denied care or services based on inability to pay a copayment, except as outlined in that section.

7.6 TIMELY FILING BILLING LIMITATION

The same timely filing billing limitations explained in the General Information for Providers Chapter of this manual pertain to encounters as well as claim submission.

7.7 PLACE OF SERVICE

Place of service codes are not applicable to institutional billing. However, if the THC performs a service that must be billed on the professional claim form within the clinic, THC's must use place of service (POS) code 07. For services provided outside the THC, bill with the appropriate POS code noted in the Billing & Reimbursement for Professionals Chapter of this manual.

THC services provided to beneficiaries at the THC are reconciled annually, if applicable.

The THC may bill for covered services that are not provided at the THC. These services must be billed with the appropriate Place of Service (POS) code in compliance with the coverages and limitations specified in the Practitioner Chapter of this manual. A complete list of POS codes can be found in the Billing & Reimbursement for Professionals Chapter of this manual.

Services billed to Medicaid are subject to audit and verifications.

7.8 BILLING FOR MATERNITY CARE

Global codes for maternity care are used to reimburse a package of services (prenatal visits and delivery) at different places of services (THC and hospital). In order for the THC to be reimbursed for prenatal visits under the PPS methodology, the THC should not bill for global maternity care. The claims for delivery and prenatal care should be billed separately. The claim for delivery should show a hospital place of service and will be paid under the FFS methodology. The claim for prenatal care will be reimbursed under the PPS methodology.

If the THC elects to bill for global maternity care, all services will be reimbursed under the FFS rules.

7.8.A. BILLING REQUIREMENTS FOR GROUP PRENATAL CARE SERVICES

Centering Pregnancy™ group services will be reimbursed outside of the Prospective Payment System (PPS) or All-Inclusive Rate (AIR) methodology at the Medicaid fee screen reimbursement rates for these services. THC's should use appropriate Healthcare Common Procedure Coding System (HCPCS) codes as identified in the Billing & Reimbursement for Professionals chapter of this manual.

SECTION 8 – MEDICAID PAYMENTS, ANNUAL RECONCILIATION AND APPEALS

8.1 QUARTERLY PAYMENTS

Quarterly payments are made to the THC at the beginning of each quarter. The payment is based on an estimate of the difference between the amount the THC receives for Medicaid services from FFS claims, managed care encounters, and other third party payments (including Medicare) during the year and the amount due the center based on the THC encounter rate. This quarterly amount may be adjusted periodically by MDHHS to account for changes in the payment limits, cost, utilization, and other factors that affect Medicaid reimbursement to THC's. The THC may request a change in the quarterly payment through the MDHHS HCRD.

8.2 INITIAL RECONCILIATION AND SETTLEMENT

An annual reconciliation, if applicable, ensures that reimbursement is made according to the payment option selected by the THC. The initial reconciliation and settlement is calculated approximately six months after the THC's fiscal year end. The number of encounters is determined from Medicaid fee-for-service (FFS) and managed care approved claims. Any difference between the THC rate and the amount paid to the THC from FFS and managed care payments, other insurance and quarterly payments is paid to or recovered from the THC. Future quarterly payments are adjusted based on the information in the initial reconciliation.

8.3 FINAL RECONCILIATION AND SETTLEMENT

A final reconciliation and settlement is calculated approximately one year after the THC's fiscal year end. This will allow time for all claims to clear the payment system.

8.4 APPEALS

A Medicaid provider has the right to appeal any adverse action taken by MDHHS unless that adverse action resulted from an action over which MDHHS had no control (e.g., Medicare termination, license revocation). The appeals process is outlined in MDHHS Medicaid Provider Reviews and Hearings rules, Michigan Administrative Code R400.3402 through R400.3425, amended, and filed with the Secretary of State on May 19, 2016. Any questions regarding this appeal process should be directed to the Michigan Office of Administrative Hearings and Rules (MOAHR). (Refer to the Directory Appendix for contact information.)

SECTION 9 – ALTERNATIVE PAYMENT METHODOLOGY FOR PRESCRIPTIONS

All prescriptions will be reimbursed at the IHS per visit outpatient AIR determined annually by CMS and published in the Federal Register. Reimbursement at the AIR will be allowed for each prescription provided to Medicaid and Healthy Michigan Plan beneficiaries served at a THC or Tribal FQHC pharmacy. The AIR applies to encounters for both native and non-native beneficiaries.

9.1 ENCOUNTERS

There is no limit on the number of prescription encounters that may be reimbursed in a single day, and each prescription constitutes a separate encounter. The encounter rate includes dispensing services and drug costs. All THC and Tribal FQHC pharmacies are paid the encounter rate by Michigan Medicaid regardless of their method of purchasing. All drugs on the Michigan Pharmaceutical Product List (MPPL) and drugs with Medicaid prior authorization will be reimbursed the AIR. No drugs will be excluded from the AIR except for drugs on the Children's Special Health Care Services (CSHCS) drug list. All THC and Tribal FQHC pharmacies must have a mechanism to dispense all necessary medications and, if a medication is not available, pharmacies must coordinate and transfer the prescription to a local pharmacy that carries the drug to minimize any disruption to the beneficiary. All other existing Medicaid policies and coverage limitations apply.

9.2 QUARTERLY PAYMENTS

MDHHS will adjudicate and reimburse the AIR for Medicaid FFS claims and cost-settle Medicaid Health Plan (MHP) and Integrated Care Organization (ICO) prescription encounters at an agreed upon frequency. A cost settlement payment is based on an estimate of the difference between (1) the AIR and (2) the amount the Tribal 638 facility receives for managed care encounters and third-party payments (including Medicare Part B covered drugs). Medicare Part D covered drugs will be excluded from AIR reimbursement. (Refer to the Coordination of Benefits Chapter for information on Medicare Part D coverage.)

When payment determination is made, correspondence will be sent to the THC or Tribal FQHC with overall reimbursement and the non-federal match due. If the THC or Tribal FQHC disagrees with the amount, the facility may request reconsideration within 14 calendar days of the date of the correspondence. Requests must be supported with sufficient details and examples for MDHHS to render a determination. (Refer to the Appeals subsection of this chapter for information on appealing an adverse action.)

URGENT CARE CENTERS

TABLE OF CONTENTS

Section 1 – General Information.....	1
1.1 Staff Credentials	1
1.2 Hours of Operation.....	1
Section 2 - Covered Services	2
Section 3 – Provider Enrollment.....	3
3.1 NPI Edits	3
Section 4 – Billing & Reimbursement	4
4.1 Copay Requirements	4

SECTION 1 – GENERAL INFORMATION

An Urgent Care Center (UCC) is a medical clinic or office, not located in a hospital emergency department, whose purpose is to provide unscheduled diagnosis and treatment of illnesses for ambulatory beneficiaries requiring immediate medical attention for non-life-threatening conditions. It is expected that UCCs will provide access to a place of service (POS) more appropriate than a hospital emergency department for addressing non-emergency medical needs when a beneficiary's primary care provider (PCP) is not available.

1.1 STAFF CREDENTIALS

The UCC medical director must be a Michigan-licensed physician. The UCC medical director is responsible for the medical management of the UCC. All Medicaid-covered physician services must be performed by the physician, the physician's employee, or an employee of the same legal entity that employs the physician under the physician's delegation and supervision. Only persons currently licensed/certified in an appropriate health occupation/profession (e.g., physician assistant, nurse practitioner), as authorized by Public Act 368 of 1978 as amended, may provide direct patient care under the delegation and supervision of a physician when the physician is not physically present on the premises.

1.2 HOURS OF OPERATION

UCCs must be open seven days a week, and include evening hours, weekends and holidays. Hours of operation must be posted in the facility. UCCs must accept walk-in patients of all ages during all hours the facility is open to see patients.

SECTION 2 - COVERED SERVICES

Unscheduled, non-emergency, medically necessary services that are a non-life threatening condition or injury or illness that can be treated appropriately in a UCC are Medicaid covered services.

Michigan Department of Health and Human Services (MDHHS) covered services are based on the level of care that can be appropriately rendered in an urgent care place of service.

MDHHS will not cover separate facility charges.

Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.

All facilities must provide clinical documentation for services rendered and complete a discharge summary which must be sent to the appropriate PCP. If a beneficiary does not have a PCP, the facility must document assistance with arranging a medical home for follow-up care.

SECTION 3 – PROVIDER ENROLLMENT

Providers must be enrolled with Medicaid and have a valid Type 2 (Organization) National Provider Identifier (NPI) for MDHHS claim adjudication.

Claims must also include the appropriate Type 1 (Individual) NPI of the specific provider performing the service(s) as the rendering provider. A valid MDHHS-enrolled rendering provider number is required for claim adjudication. Providers must not enter a Type 2 (Organization) NPI as the rendering provider. The Organization NPI must be reported as the billing provider.

3.1 NPI EDITS

MDHHS NPI claim editing will be applied to attending, billing, referring, rendering and supervising providers, as applicable. A claim cannot be paid if the NPI is missing or the reported NPI is invalid as it does not check digit and/or correctly crosswalk to the Provider Enrollment files for these provider loops or fields.

SECTION 4 – BILLING & REIMBURSEMENT

UCC providers must follow uniform billing guidelines using the professional CMS-1500 claim format or electronic Health Care Claim Professional (837) ASC X12N Version 5010 information. All providers are encouraged to bill electronically. Refer to the Billing & Reimbursement for Professionals chapter for additional CMS-1500 or 837P Professional claims submission and billing information.

If ancillary services are provided by UCC staff using hospital-owned equipment (i.e., done in the same building where urgent care is located), the hospital may bill that service on the institutional claim format for the technical service.

Reimbursement is based on the practitioner fee schedule. Services performed in a UCC are reimbursed at the non-facility rate based on the non-facility relative value unit (RVU). MDHHS utilizes the Medicaid National Correct Coding Initiative (NCCI) coding policies and edits as developed by the Centers for Medicare & Medicaid Services (CMS) to promote national correct coding methodologies. To avoid duplicate payments, UCC providers must submit only one non-facility service claim per beneficiary per DOS. Separate physician service claims should not be submitted.

4.1 COPAY REQUIREMENTS

A copayment may be required for office evaluation and management (E&M) visits for beneficiaries age 21 years and older.

Refer to the General Information for Providers Chapter for information about copayments. Current copayment amounts are listed on the MDHHS website. (Refer to the Directory Appendix for website information.)

SECTION 1 – GENERAL GUIDELINES AND REQUIREMENTS

The Michigan Department of Health and Human Services (MDHHS) contracts for the volume purchase of frames and lenses from an optical laboratory, referred to in this chapter as the contractor.

Vision providers (e.g., opticians, dispensing ophthalmologists, optometrists) must order frames and lenses from the contractor. A list of lenses is available in the MDHHS Vision Services Fee Schedule located on the MDHHS website. A list of available frames is available from the contractor, currently Classic Optical Laboratories. (Refer to the Directory Appendix for contact information.)

Orders placed with the contractor must be postmarked no later than 30 days after the date of order. If orders are placed beyond the 30 days, the contractor returns the order to the provider, who must explain to Medicaid why submission was delayed and request an exception from the time limit.

Procurement of contact lenses, low vision aids, and prosthetic eyes must be obtained from the vision provider's own source and are subject to prior authorization (PA) requirements as described in this chapter.

1.1 BENEFICIARY ELIGIBILITY AND COPAYMENTS

Providers must verify beneficiary eligibility prior to rendering services or ordering materials. If a beneficiary's eligibility expires prior to the date the material is delivered, reimbursement is made **only** if the beneficiary was eligible on the date the material was ordered by the vision provider and the date of order is used when billing. (Refer to the Beneficiary Eligibility Chapter of this manual for additional information.)

A copayment may be required for Medicaid beneficiaries age 21 and older for each separately reimbursable:

- Ophthalmological service performed by an optometrist or ophthalmologist; and
- Dispensing service for glasses or contact lenses billed by dispensing ophthalmologists or optometrists.

Refer to the General Information for Providers Chapter for information about copayments. Current copayment amounts are listed on the MDHHS website. (Refer to the Directory Appendix for website information.)

1.2 PRIOR AUTHORIZATION

Some vision services and materials require PA before they can be rendered. Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.

The Vision Services Approval/Order Form (DCH-0893) is used to obtain PA. A copy of the DCH-0893 and completion instructions can be found in the Forms Appendix of this manual. Complete and mail or fax the DCH-0893 to the MDHHS Program Review Division. (Refer to the Directory Appendix for contact information.) PA requests must be postmarked no later than 30 calendar days after the date of order. If

beyond the 30 days, the provider must include a detailed explanation of why the submission was delayed.

When requesting prior approval, providers should make a photocopy of the completed form for the beneficiary file. Upon completion of the PA process, MDHHS returns one copy of the DCH-0893 to the provider.

An electronic copy of the DCH-0893 is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

1.3 CODING OF SERVICES

The American Medical Association's (AMA) Current Procedural Terminology (CPT) is the national coding standard for health care professional services. Vision providers must use CPT codes in effect on the date of service to describe and identify the services and procedures performed. Optometrists must be Therapeutic Pharmaceutical Agent certified in order to use many of these codes. All prescriptions or prescription orders must comply with state and federal laws. (Refer to the Pharmacy Chapter of this manual for additional information.)

Providers must use the International Classification of Diseases (ICD) for diagnostic coding of diseases, injuries, and conditions. Codes must be used at the highest level of specificity.

Healthcare Common Procedure Coding System (HCPCS) is a system developed by the Centers for Medicare & Medicaid Services (CMS) to report materials, supplies, and certain services not covered by the CPT codes. HCPCS codes are to be used when applicable.

1.4 MEDICARE

All vision services are subject to editing for Medicare coverage. MDHHS reimburses vision providers for coinsurance and deductible amounts on Medicare-approved claims up to Medicaid's reimbursement limit.

If a service requires PA by Medicaid and is covered by Medicare, vision providers do not have to obtain PA, nor does the vision provider have to obtain lenses or frames through the volume purchase program.

(Refer to the Billing & Reimbursement for Professionals Chapter of this manual for additional information.)

1.5 CONTRACTOR GUARANTEE

Frames and lenses furnished by the contractor are guaranteed for 90 days. If any material is found to be unsatisfactory due to contractor error or defective workmanship or materials, the materials and work order form should be returned to the contractor. The contractor is required to correct, adjust, or replace the materials.

If the vision provider supplies the contractor with incorrect specifications that results in eyeglasses being fabricated which the beneficiary cannot use, the vision provider is responsible for payment to the contractor for the remake. The contractor may not charge the vision provider more than what they would charge MDHHS for the remake. MDHHS does not pay for the remake (e.g., eyeglasses, lenses, or frames) due to vision provider error.

1.6 COMPLAINT PROCESS

To resolve problems (such as an overdue shipment, error in an order, or defective workmanship), vision providers should first contact the contractor.

If the lenses and/or frames are not received from the contractor within 21 days from the date they were ordered, vision providers are responsible for contacting the contractor to determine the cause of the delay.

If difficulties are encountered with the contractor in resolving a problem, vision providers should call the Vision Contract Manager. (Refer to the Directory Appendix for contact information.) Vision providers must be prepared to report the beneficiary's name and Medicaid ID number, and a detailed explanation of the problem(s) they have experienced.

MDHHS reviews the complaint, takes necessary action to correct the problem, and notifies the vision provider of the resolution.

SECTION 2 – DIOPTR CRITERIA

2.1 INITIAL LENSES

Initial lenses are considered to be the first prescription lenses ever worn by a person regardless of how they were obtained (e.g., through Medicaid, other insurance, or private pay). Initial lenses are a Medicaid benefit and do not require PA if the following minimum diopter criteria are met:

Age Group 42 Years and Younger		Age Group 43 Years and Older	
▪ 0.50D myopia	▪ 0.75D anisometropia	▪ 0.50D myopia	▪ 0.50D hyperopia
▪ 0.50D astigmatism	▪ 0.75D hyperopia	▪ 0.50D astigmatism	▪ 0.50D presbyopia
		▪ 0.75D anisometropia	

2.2 SUBSEQUENT LENSES

Regardless of age group, subsequent lenses are medically necessary lenses that are provided after initial lenses. Subsequent lenses are a Medicaid benefit and do not require PA if there is a change in the refractive error of 0.75D or more in the meridian of greatest change, or a change in the cylinder axis of at least 10 degrees for cylinders of 1.00D or more. These lenses must also meet minimum dioptric criteria as specified above. The change need only be present in one eye.

The following example illustrates how this requirement is assessed for a new correction (+2.75-0.75 ax 092) and a previous correction (+2.25-0.25 ax 090). The dioptric power in each meridian can be portrayed in the form of cross diagrams.

This is an example of where the change in dioptric power for subsequent lenses has not been met. Note that the resultant powers in the vertical meridians of the "new" and "previous" correction are +2.75 and +2.25 respectively. There is only a 0.50D change in the vertical meridian and no change in the horizontal.

For periods greater than 24 months from the date of the previous prescription, subsequent lenses may be ordered for diopter changes less than those specified above.

SECTION 3 – SERVICES

This section provides information on both Medicaid covered and noncovered services.

3.1 DIAGNOSTIC SERVICES

In providing services, it is the responsibility of the optometrist or ophthalmologist to determine that the services are medically necessary, appropriate, and within the scope of current medical practice and Medicaid limitations. The prescribing optometrist or ophthalmologist is held responsible if they order excessive or unnecessary services, regardless of who actually renders the services. The prescribing optometrist or ophthalmologist may be subject to corrective action related to these services, including recovery of funds.

Documentation Guidelines for Evaluation and Management Services, as described in the latest version developed jointly by CMS and the AMA, must be adhered to when using the CPT/HCPCS procedure codes.

Eye Examinations	<ul style="list-style-type: none">▪ A routine eye examination once every two years is a Medicaid benefit and does not require PA. Examinations include, but are not limited to, case history, determination of visual acuity (each eye), ophthalmoscopy, biomicroscopy, ocular motility, tonometry, refraction, diagnosis, treatment program and disposition. (Use appropriate CPT/HCPCS procedure codes for routine eye exam and applicable ICD diagnosis codes.)▪ Nonroutine eye examinations are a Medicaid benefit for the purpose of evaluation and treatment of chronic, acute, or sudden onset of abnormal ocular conditions. (Use appropriate CPT/HCPCS procedure codes.)
Glaucoma Screenings	<p>Glaucoma screenings are covered without PA on an annual basis for beneficiaries who:</p> <ul style="list-style-type: none">▪ Have no ocular complaints or prior history of glaucoma and who have diabetes;▪ Have a family history of glaucoma; or▪ Are African-American, age 50 or older. <p>This screening entails a dilated eye examination, tonometry, and direct ophthalmoscopy or slit lamp examination. If this screening is provided as part of another billable service, separate reimbursement for this screening is not allowed. Use the appropriate CPT/HCPCS procedure code for glaucoma screening and the applicable ICD diagnosis code.</p> <p>If the beneficiary presents with a visual or ocular complaint, the glaucoma screening code should not be used. The procedure code which best describes the visit should be selected from the CPT Evaluation and Management (E/M) codes or General Ophthalmological procedure codes.</p>

3.2 DISPENSING SERVICES

Dispensing services are a Medicaid benefit and do not require PA. Vision providers may bill a dispensing fee for dispensing prescription lenses, prescription lenses with frames, or replacing a complete frame.

Reimbursement for the dispensing service includes the vision provider's services in selecting, ordering, verifying, and aligning/fitting of eyeglasses as described above. Routine follow-up and post-prescription visits (e.g., for minor adjustments) are considered part of the dispensing service and are not separately reimbursable.

3.3 NURSING FACILITY BENEFICIARIES

Covered and noncovered vision services, as well as PA requirements, apply to vision services provided to beneficiaries residing in a nursing facility (NF).

Performance of vision services (except replacement of a frame part for eyeglass repair) must be upon the written request of the beneficiary, a member of the beneficiary's family, or other beneficiary representative and upon the written order of the beneficiary's attending physician (MD, DO) prior to the date of the vision provider's visit.

If service is provided in the NF, a copy of the request and written order must be retained by the facility as part of the beneficiary's record.

Vision services are not considered a part of the facility's per diem rate. The vision provider or contractor must bill MDHHS for vision services rendered.

No additional payments are made to vision providers for a visit(s) to the NF. Appropriate procedure codes must be utilized.

3.4 OPHTHALMIC FRAMES AND LENSES

A complete pair of eyeglasses is a Medicaid benefit and does not require PA when:

- The eyeglasses being prescribed are the beneficiary's first pair of eyeglasses ever worn. These eyeglasses are considered to be initial eyeglasses and must meet minimum diopter criteria for initial lenses.
- The beneficiary's correction meets diopter criteria for subsequent lenses and the frames are unusable.
- A previously used frame requires oversized lenses. (Oversized lenses are not a Medicaid benefit, therefore, a complete pair of eyeglasses must be ordered.)
- Prescription lenses remain usable, but the original frame is broken beyond repair and the original frame is not a Medicaid benefit.
- The beneficiary's correction meets diopter criteria for subsequent lenses and the frames remain usable, but the vision provider or beneficiary elects not to send the frames to the contractor or the contractor feels that the previously used frames will break or otherwise be damaged during lens insertion.

- The beneficiary's eyeglasses have been lost, stolen, or broken beyond repair and the number of replacements have not exceeded Medicaid limits which are:
 - For beneficiaries age 21 and over, one pair of replacement eyeglasses per year.
 - For beneficiaries under age 21, two pair of replacement eyeglasses per year.
- One year is defined as 365 days from the date the first pair of eyeglasses (initial or subsequent) was ordered.

The DCH-0893 must be used when ordering frames and/or lenses. A copy of the form and instructions for completing the form are available in the Forms Appendix of this manual and on the MDHHS website. (Refer to the Directory Appendix for website information.) These orders must be sent directly to the contractor. Orders may be mailed, faxed, or entered directly online at the contractor's website. (Refer to the Directory Appendix for contact information. The contractor must be contacted directly to register for on-line access.) The contractor fills the vision provider's order in accordance with the lens and frame specifications indicated on the DCH-0893. The order form is returned to the provider if the eligibility information is not completed.

Procedures identified as requiring PA must first receive approval from the MDHHS Program Review Division. (Refer to the Prior Authorization subsection in this chapter for instructions on obtaining PA.)

The contractor monitors orders to assure that Medicaid replacement limitations, diopter criteria, and PA requirements are being maintained. The contractor returns an order if the order exceeds the replacement limits, does not meet diopter criteria, or requires PA.

The contractor bills MDHHS for the frames and/or lenses ordered by vision providers. Vision providers subsequently bill for a dispensing service for dispensing the frames and/or lenses.

If the beneficiary has other insurance that covers frames and/or lenses, the material may still be obtained through the contractor. (Refer to the Billing & Reimbursement for Professionals and the Coordination of Benefits Chapters of this manual when billing for the dispensing service if other insurance is involved.)

3.4.A. LENSES

Lenses must conform to the latest edition of the *American National Standard Recommendations for Prescription Ophthalmic Lenses*.

Plastic and glass lenses are a Medicaid benefit. Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.

- Plastic and glass bifocals are available in Round 22, FT-28, FT-35, and Executive style.
- Plastic and glass trifocals are available in FT-7x28 segments.

Photochromic, Tinted and Dyed Lenses	PA is required for these lens features. Appropriate documentation of medical necessity must be attached to the DCH-0893 when submitted to the MDHHS Program Review Division.
Polycarbonate Lenses	For beneficiaries under age 21, polycarbonate lenses may be inserted into any covered Medicaid frame and do not require PA. For beneficiaries 21 and over, polycarbonate lenses are a Medicaid benefit when lenses are inserted into a safety frame marked "Z 87" or "Z 87-2" or if prior authorized.

Oversized lenses, no-line, or progressive style multi-focals are not Medicaid benefits.

3.4.B. OPHTHALMIC FRAMES

Frames must conform to the latest edition of the *American National Standard Requirements for the Dress Ophthalmic Frames*.

Ophthalmic frame styles that are a Medicaid benefit are available from the contractor. Vision providers may order sample frames directly from the contractor, and a list of available frames is available from the contractor. (Refer to the Directory Appendix for contact information.) The vision provider is charged for sample frames at the same price stated in the current contract. Neither the provider nor the contractor may charge Medicaid for sample frames.

Vision providers must offer a beneficiary the opportunity to select a frame from a minimum of 100 authorized frame samples. Additionally, a vision provider must offer beneficiaries the contractor's brochure of frames which includes all available styles so beneficiaries can select from more than the vision provider's inventory of sample frames. A vision provider who fails to comply with these requirements is subject to termination of enrollment in Medicaid.

If a frame manufacturer discontinues production of a frame that is listed as a benefit, vision providers may utilize the discontinued frame from their sample kit. If lenses are required, they must be ordered from the contractor. Submit the DCH-0893 to the MDHHS Program Review Division for approval. (Refer to the Directory Appendix for contact information.)

Safety Frames	Safety frames are a Medicaid benefit. A list of authorized safety frame styles is available from the contractor. These frames conform to ANSI Z87.1-2003 standards, and samples can be purchased from the contractor at contract prices. Only polycarbonate lenses of 2 millimeter minimum thickness shall be used in frames marked "Z 87" or "Z 87-2".
Frame Repairs	Frame repairs (e.g., aligning temples, insertion of screws, adjusting frames) are not a separately reimbursable service and cannot be billed.

3.4.C. SUBSEQUENT LENSES PLACED IN PREVIOUSLY USED FRAMES

Subsequent lenses that are to be placed in a beneficiary's previously used frame are a Medicaid benefit and do not require PA. Previously used frames are defined as ophthalmic frames in which the beneficiary has had previous corrective lenses incorporated and which were previously worn.

All noncontract previously used frames require PA.

To order subsequent lenses for insertion into a previously used frame, vision providers must complete the DCH-0893, indicating all information necessary for proper fabrication. Vision providers have the option of having the contractor insert the lenses, in which case the provider must supply the previously used frame to the contractor, or inserting the newly fabricated lenses into the frames in their office.

If the previously used frames are sent to the contractor for lens insertion, the contractor is required to fabricate the lenses and mail the frames and lenses to the vision provider within nine working days after receiving the frames. If a special prescription requires more than nine working days to complete, the contractor must notify the vision provider. If the provider does not receive the materials within three weeks from the date the order was sent, they should contact the contractor.

If the vision provider or beneficiary elects not to send the previously used frames as might be requested by the contractor, or if the contractor feels that the previously used frames may break or otherwise be damaged during lens insertion, the vision provider is requested to order a complete pair of eyeglasses.

If frames are sent to the contractor, either at the contractor's request or the vision provider's preference, the vision provider is responsible for paying the postage necessary to ship the frames. Also, vision providers are responsible for paying for frames lost or damaged in transit.

If a previously used frame requires lenses that are not a Medicaid benefit (e.g., oversized lenses), a complete pair of eyeglasses that are a benefit must be ordered.

3.4.D. REPLACEMENT OR REPAIR

Eyeglasses	<p>Eyeglass repairs are a separately reimbursed service when the repair is considered major (e.g., reinsertion of a lens, repair of a sheared screw, shortening or replacing temples, etc.) and when the glasses are deemed repairable. Minor repairs (e.g., insertion of screw, adjustments of nose pads or temples, etc.) that occur as a result of the beneficiary's typical wear patterns are not separately reimbursed. The appropriate HCPCS code(s) must be reported for the component part that is being replaced. The reason for the repair must be documented in the beneficiary's file and made available upon request.</p> <p>If a provider determines that eyeglasses are repairable, the provider must guarantee the repair for a minimum of 30 days. Subsequent repair for the same issue within 30 days is the responsibility of the provider. If replacement eyeglasses are needed within the 30 day time frame following a repair, the provider must return the reimbursement received for the repair to MDHHS.</p> <p>Eyeglasses that are broken beyond repair may be eligible for replacement by the contractor. Eyeglass replacement requires prior authorization if replacement limits have been exceeded.</p>
Lenses Only	<p>Replacement of a corrective lens(es), without frames, for one that is damaged or broken is a benefit if that lens(es) is covered by Medicaid and the replacement limits have not been exceeded. A replacement lens(es) must be an identical copy of the damaged or broken lens. It does not require PA. Vision providers must order the lens(es) directly from the contractor.</p> <p>For periods greater than 24 months from the date of the previous prescription when ordering subsequent lenses or complete eyeglasses, see Subsequent Lenses subsection above for appropriate diopter criteria.</p>
Frames Only	<p>Replacement of a complete frame (front and temples) is a Medicaid benefit only when the original frame is broken beyond repair, the prescription lenses remain usable, and the replacement limits have not been exceeded. The replacement frame must be an identical replacement. If an identical frame is not listed as a Medicaid benefit, the beneficiary must select a frame that is a covered benefit.</p> <p>The contractor bills Medicaid for the complete frame. The vision provider inserts the lenses into the frame and bills Medicaid for the dispensing service.</p>

3.4.E. TWO PAIRS OF EYEGLASSES

Two pairs of single vision eyeglasses (one for near visual tasks and the other for distance visual tasks) are a Medicaid benefit in either of the following instances:

- When the beneficiary has clearly demonstrated the inability to adjust to bifocals after a reasonable trial period.
- When the beneficiary's physical condition does not allow bifocal usage.

PA is required when requesting two pairs of eyeglasses. Appropriate documentation must be attached to the DCH-0893 and submitted to the MDHHS Program Review Division.

Providing both multi-focal and single vision eyeglasses for interchangeable usage is not a Medicaid benefit.

3.4.F. NONDELIVERABLE EYEGLASSES

If a beneficiary fails to return to the vision provider for dispensing of eyeglasses, the vision provider should make every effort to locate the beneficiary, including contacting the local MDHHS office in the beneficiary's area.

If the beneficiary still cannot be located, the eyeglasses should be sent to the local MDHHS office (or local nonprofit agency if the MDHHS office refuses to accept them) in the beneficiary's area within 90 days of placing the order with the contractor. Do not send the nondelivered lenses and/or frames to MDHHS unless requested to do so by MDHHS.

To bill for dispensing, the provider must use the date of order for the lenses and/or frames.

Medicaid does not reimburse vision providers for postage and handling.

3.4.G. EYEGLASS CASE

One eyeglass case for every complete pair of eyeglasses ordered is a Medicaid benefit and must be provided by the contractor. Vision providers cannot bill for eyeglass cases.

3.5 LOW VISION SERVICES

Evaluation	<p>A low vision evaluation is a benefit when the beneficiary presents with moderate visual impairment, severe visual impairment, or profound visual impairment. Under these conditions, a low vision evaluation does not require PA.</p> <p>This evaluation includes, but is not limited to, a detailed case history, effectiveness of any low vision aids in use, visual acuity in each eye with best spectacle correction, steadiness of fixation, assessment of aids required for distance vision and near vision, evaluation of any supplemental aids, evaluation of therapeutic filters, development of treatment, counseling of beneficiary, and advice to family (if appropriate).</p> <p>The CPT E/M or General Ophthalmological procedure code which best describes this service should be utilized.</p>
-------------------	---

Aids	<p>High add bifocals do not require PA. For high add bifocals, complete the DCH-0893 and submit to the contractor.</p> <p>The prescription and fitting of low vision optical aids (such as telescopes, microscopes, and certain other low vision aids) require PA. Only basic and essential low vision aids are a Medicaid benefit.</p> <p>The Provision of Low Vision Services and Aids Support Documentation (MSA-0891) form outlines the information required when requesting PA for low vision services and aids. A sample of this form is provided in the Forms Appendix. It can also be obtained through the MDHHS website. (Refer to the Directory Appendix for website information.)</p> <p>This form must be attached to DCH-0893 and submitted as part of the PA process. (Refer to the Prior Authorization subsection above.)</p> <p>Reimbursement for a low vision aid is based on the manufacturer's charge for the aid plus a professional fee. Procurement of the low vision aid is done through the vision provider's own source. The professional fee includes procurement, verification, and fitting of the aid.</p> <p>Only an enrolled optometrist or a dispensing ophthalmologist can bill for a low vision aid.</p>
Rehabilitative Services	<p>Low vision rehabilitative services include instructions, training, and assistance to the beneficiary in the most effective use of the low vision aid. Documentation for these services should be included when requesting the low vision aid.</p>

3.6 CONTACT LENSES

3.6.A. EVALUATION

A comprehensive contact lens evaluation is a Medicaid benefit when the beneficiary presents with one of the following conditions (use appropriate HCPCS comprehensive contact lens evaluation code):

- Aniridia
- Anisometropia or Antimetropia (of two diopters or greater that results in Aniseikonia)
- Aphakia
- Irregular cornea
- Keratoconus (if vision cannot be improved to 20/40 or better with eyeglasses)
- Other conditions which have no alternative treatment (e.g., Aniseikonia with documentation and severe Keratoconjunctivitis sicca)

3.6.B. PRESCRIPTION AND FITTING

The prescription and fitting of contact lenses is a Medicaid benefit and requires PA, except for beneficiaries who are under six years of age with a diagnosis of aphakia.

3.6.B.1. PRESCRIPTION

The prescription for contact lenses requires the complete description of contact lens specifications. The following must be included on a prescription for contact lenses:

- complete description of the contact lens(es) parameters
- material of the contact lens(es)
- manufacturer of the contact lens(es)
- material discard and replacement schedule
- number of lenses required to provide a one-year supply
- prescription expiration date

3.6.B.2. FITTING

The fitting of the contact lens(es) must include:

- determination of appropriate initial contact lens parameters based on clinical observation, and measurements of the eye with or without a trial (sample) contact lens.
- a trial or adaption period of one to three months, including a fitting warranty that provides for adjustments in the contact lens parameters either by exchange or by modification of existing materials.

Note: Certain custom contact lens designs may not be warranted by the manufacturer. This type of custom contact lens design will be considered on a case-by-case basis. The provider must provide a detailed explanation of need, initial cost, and potential re-fitting cost.

- instruction of proper insertion, removal, disinfection, and care of the contact lens(es).
- initial supply of contact lenses, storage case, and solutions sufficient to last until the fitting is complete.

3.6.C. REPLACEMENT AND SUPPLIES

Procurement of contact lenses is to be done through the vision provider's own source.

The Documentation of Medical Necessity for the Provision of Contact Lenses form (MSA-0892) outlines the information required when requesting contact lens PA. A sample of this form is provided in the Forms Appendix and can also be obtained through the MDHHS website. (Refer to the Directory Appendix for website information.)

This form must be attached to the Vision Services Approval/Order form (DCH-0893) and submitted to MDHHS as part of the PA process. (Refer to the Prior Authorization subsection in this chapter for additional information.)

Requests for contact lens replacements due to loss or damage will require PA and will be reviewed on an individual basis.

Except as previously indicated, contact lens supplies (e.g., wetting and cleaning solutions, carrying cases) are not Medicaid benefits.

3.7 STRABISMUS AND AMBLYOPIA EXAMINATION

Strabismus and amblyopia examinations (sensorimotor examination) are Medicaid benefits and do not require PA.

3.8 ORTHOPTICS AND PLEOPTICS TRAINING

Orthoptics and Pleoptics Training	<p>Orthoptics and Pleoptics (O & P) training is a Medicaid benefit only when there is a diagnosis of one of the following conditions:</p> <ul style="list-style-type: none">▪ Amblyopia▪ Esotropia▪ Exotropia▪ Heterotropia▪ Strabismus▪ Ocular Motor and Fusion Dysfunction <p>PA is not required for O & P training for beneficiaries under age 21. PA is required for beneficiaries age 21 and older for O & P training.</p> <p>When requesting PA, the following documentation must be attached to the DCH-0893 and submitted to the Program Review Division:</p> <ul style="list-style-type: none">▪ Visual acuity, each eye, with best spectacle correction;▪ Magnitude and direction of the subjective and objective angle of strabismus at distance and near;▪ Refractive error of each eye;▪ Degree of fusion;▪ History of strabismus, including onset, duration, prior treatment; and▪ Other relevant information. <p>In addition to the above documentation, a detailed plan indicating the training procedures and equipment to be employed, frequency of office visits, home training aids, and prognosis must be attached to the DCH-0893. This training plan may be authorized for a period of up to three calendar months.</p> <p>O & P training is limited to a maximum of 13 visits within the first three calendar months of therapy without PA. PA will be required for additional necessary visits.</p> <p>If continued training beyond the period that was authorized is necessary, a new request for PA must be submitted with the following information:</p> <ul style="list-style-type: none">▪ Update of the above-listed items;▪ Report of the results of previous training; and▪ Indication for further treatment with a detailed plan.
--	---

Orthoptic Training Aids

Orthoptic training aids are a Medicaid benefit when incorporated in an orthoptics or pleoptics training plan (as described above) and require PA. The following documentation must be included with the vision provider's detailed plan when requesting the purchase of an aid:

- How the aid is to be used;
- Complete description of the aid;
- Name of the manufacturer; and
- Manufacturer's charge.

Reimbursement for a training aid is based on the manufacturer's charge to the vision provider plus a professional fee. The professional fee includes procurement, instruction in use, and fitting when applicable. Procurement of the training aid is done through the vision provider's own source.

Purchase of orthoptic training aids must be billed only by an enrolled optometrist or dispensing ophthalmologist.

3.9 PROSTHETIC EYES

A prosthetic eye (plastic/custom) or shell is a Medicaid benefit and does not require PA.

For an enlargement or reduction of an ocular prosthesis, PA is required. PA is also required when requesting a prosthesis other than a plastic/custom eye. When requesting PA, the DCH-0893 should be completed, with documentation attached, and submitted to the MDHHS Program Review Division. Procurement of the prosthesis should be obtained from the provider's own source.

Reimbursement for a prosthesis is made on a per case basis which includes, but is not limited to:

- Trial fitting
- Supply of prosthesis
- Solutions
- Training in insertion and removal
- Instruction in care
- Subsequent office visits to achieve maximum wearing time and optimal cosmetic fit
- Any necessary modification during the adaptation period of six months

ACRONYM APPENDIX

Acronym	Meaning
3M™ APR-DRG	3M™ All Patient Refined Diagnosis Related Groups
AA	Anesthesiologist Assistant
AAAAASF	American Association for Accreditation of Ambulatory Surgery Facilities
AAAHHC	Accreditation Association for Ambulatory Health Care
AAP	American Academy of Pediatrics
AAPD	American Academy of Pediatric Dentistry
AAR	Access Assessment and Referral
ABA	Applied Behavior Analysis
ABAS-III	Adaptive Behavior Assessment System-III
ABC	American Board for Certification in Orthotics, Prosthetics and Pedorthics, Inc.
ABGC	American Board of Genetic Counseling
ABI	Applied Behavioral Intervention; Acquired Brain Injury
ABLLS-R	Assessment of Basic Language and Learning Skills - Revised
ABMG	American Board of Medical Genetics
ABR	Auditory Brainstem Response
ACA	Affordable Care Act
ACBIS	Academy of Certified Brain Injury Specialists
ACD	Augmentative communication device
ACEs	Adverse Childhood Experiences
ACHC	Accreditation Commission for Health Care
ACIP	US Public Health Service Advisory Committee on Immunization Practices
ACT	Assertive Community Treatment
ACVREP	Academy for Certification of Vision Rehabilitation and Education Professionals
ADA	American Dental Association; Americans with Disabilities Act; American Diabetes Association
ADCES	Association of Diabetes Care and Education Specialists

Michigan Department of Health and Human Services
Medicaid Provider Manual

Acronym	Meaning
ADHD	attention deficit hyperactivity disorder (added 4/1/2025)
ADI-R	Autism Diagnostic Interview - Revised
ADL	Activities of Daily Living
ADOS-2	Autism Diagnostic Observation Schedule - Second Edition
AEP	auditory evoked potential
AER	Administrative Expense Report
AFC	Adult Foster Care
AFC/HFA	Adult Foster Care Facility/Home for the Aged
AFLS	Assessment of Functional Living Skills
AFO	Ankle-Foot Orthosis
AHI	Apnea-Hypopnea Index
AHRQ	Agency for Healthcare Research and Quality
AI	Assessment Indicator
AICPA	American Institute of Certified Public Accountants
AIMS	Attachment-Interaction-Mastery-Support
AIR	All-Inclusive Rate
ALD	Alternative Listening Device
ALMB	Additional Low Income Medicare Beneficiary
ALS	Advanced Life Support
ALTE	Apparent Life Threatening Event
AMA	American Medical Association; against medical advice
ANSI	American National Standards Institute
AO	Accreditation Organization
AOA	American Osteopathic Association
AOD	alcohol and other drug
APA	American Psychological Association
APC	Ambulatory Payment Classification

Michigan Department of Health and Human Services
Medicaid Provider Manual

Acronym	Meaning
APHA	American Public Health Association
API	Active Pharmaceutical Ingredients
APIT	Authority to Practice Interjurisdictional Telepsychology
APRN	Advanced Practice Registered Nurse
APS	Adult Protective Services
APTA	American Physical Therapy Association
AQAR	Administrative Quality Assurance Review
ARD	Assessment Reference Date
ARR	Annual Resident Review
ASAM	American Society of Addiction Medicine
ASC	Ambulatory Surgical Center
ASD	Autism Spectrum Disorder
ASHA	American Speech-Language-Hearing Association
ASM	American Society for Microbiology; Adult Services Manual
ASQ	Ages and Stages Questionnaire
ASQ-SE	Ages and Stages Questionnaire – Social-Emotional
ASW	adult services worker
ATD	Assistive Technology Device
ATP	Assistive Technology Professional
ATR-BC	Registered Art Therapist – Board Certified
AUAM	Ambulatory Uterine Activity Monitor
AUD	Alcohol Use Disorder
BACB	Behavioral Analyst Certification Board
BAHD	Bone Anchored Hearing Device
BCaBA	Board Certified Assistant Behavior Analyst
BCBA	Board Certified Behavior Analyst
BCBA-D	Board Certified Behavior Analyst-Doctoral

Michigan Department of Health and Human Services
Medicaid Provider Manual

Acronym	Meaning
BCCCP	Breast and Cervical Cancer Control Program
BCCHPS	Bureau of Children’s Coordinated Health Policy and Supports
BHT	Behavioral Health Treatment
BICROS	Bilateral Contralateral Routing of Signals
BIPA	Section 702 of the Medicare, Medicaid, and CHIP Benefits Improvement and Protection Act of 2000. Section 702 of BIPA created a new section 1902(bb) in the Social Security Act.
BIS	Brain Injury Services
BLRV	blood lead reference value
BLS	Basic Life Support
BMI	Body Mass Index
BMP	Benefits Monitoring Program
BOP	bleeding on probing
BPHASA	Behavioral and Physical Health and Aging Services Administration
BPS	Behavioral and Psychological Services
BRUE	Brief Resolved Unexplained Event
BSBP	Bureau of Services for Blind Persons
BSN	Bachelor of Science in Nursing
BSW	Bachelor of Social Work
BTP	Behavior Treatment Plan
BTPRC	Behavior Treatment Plan Review Committee
BY	Base Year
C3 Project	Community Health Worker Core Consensus Project
C4S	Caring for Students
CAA	Council on Academic Accreditation; Care Area Assessment
CADC	Certified Alcohol and Drug Counselor
CAFAS	Child and Adolescent Functional Assessment Scale
CAH	Critical Access Hospitals

Michigan Department of Health and Human Services
Medicaid Provider Manual

Acronym	Meaning
CAHCP	Child and Adolescent Health Center and Program
CALOCUS	Child and Adolescent Level of Care Utilization System
CAMTS	Commission on Accreditation of Medical Transport Systems
CAP	College of American Pathologists
CAPD	Continuous Ambulatory Peritoneal Dialysis (hospital)
CARES	Coronavirus Aid, Relief, and Economic Security Act of 2020
CARF	Commission on Accreditation of Rehabilitation Facilities
CBC	Complete Blood Count
CBIS	Certified Brain Injury Specialist
CBSA	Core Based Statistical Area
CC PPS-1	certified clinic prospective payment system
CCA	Care Coordination Agreement
CCBHC	Certified Community Behavioral Health Clinic
CCI	Child Caring Institution
CDC	Centers for Disease Control and Prevention
CDL	Commercial Driver's License
CDT	Current Dental Terminology
CENA	Competency Evaluated Nurse Aide
CEPI	Center for Educational Performance and Information
CF	Cystic Fibrosis
CFR	Code of Federal Regulations
CFY	Clinical Fellowship Year
CHAMPS	Community Health Automated Medicaid Processing System
CHAP	Community Health Accreditation Program
CHI	Centering Healthcare Institute
CHIP	Children's Health Insurance Program
CHPL	Certified Health IT Product List

Michigan Department of Health and Human Services
Medicaid Provider Manual

Acronym	Meaning
CHR	Community Health Representative
CHW	Community Health Worker
CIP	Capital Interim Payment
CKD	Chronic Kidney Disease
CLIA	Clinical Laboratory Improvement Amendments
CLS	Community Living Supports
CMC TCM	Children with Medical Complexity – Targeted Case Management (added per bulletin MMP 24-61)
CMCF	County Medical Care Facilities
CMCFSP	County Medical Care Facilities Special Payments
CMCS	Center for Medicaid and CHIP Services (added 4/1/2025)
CMHC	Community Mental Health Center
CMHP	Child Mental Health Professional
CMHSP	Community Mental Health Services Program
CMN	Certificate of Medical Necessity
CMP	Civil Money Penalty
CMS	Centers for Medicare & Medicaid Services
CNA	Certified Nurse Aide
CNM	Certified Nurse Midwife
CNP	Certified Nurse Practitioner
CNS	Clinical Nurse Specialist
COA	Council on Accreditation of Services for Families and Children
COB	Coordination of Benefits
CON	Certificate of Need
CORF	Comprehensive Outpatient Rehabilitation Facility
CPAP	Continuous Positive Airway Pressure
CPH	Community Public Health
CPRC	Certified Peer Recovery Coach

Michigan Department of Health and Human Services
Medicaid Provider Manual

Acronym	Meaning
CPS	Children's Protective Services
CPSS	Certified Peer Support Specialist
CPT	Current Procedural Terminology
CQAR	Clinical Quality Assurance Review
CR	Cardiac Rehabilitation
CRNA	Certified Registered Nurse Anesthetist
CROS	Contralateral Routing of Signals
CRP	Collaborative Remediation Project
CRT	Cognitive Rehabilitation Therapy
CRTS	Certified Rehabilitation Technology Supplier
CSHCS	Children's Special Health Care Services
CSW	Certified Social Worker
CT	Computerized Axial Tomography
CTLSO	Cervical-Thoracic-Lumbar-Sacral Orthosis
CTS	Community Transition Services
CWP	Children's Home and Community Based Services Waiver Program
CY	Current Year
DABS	Diagnostic Adaptive Behavior Scale
DAS-II	Differential Ability Scales-II
DCO	designated collaborating organization
DD	Developmental Disabilities
DDS	Dentist
DEA	Drug Enforcement Administration
DEAP	Diabetes Education Accreditation Program
DECA	Devereux Early Childhood Assessment
DEG	Data Exchange Gateway
DESI	Drug Efficacy Study Implementation

Michigan Department of Health and Human Services
Medicaid Provider Manual

Acronym	Meaning
DHP	Dental Health Plan
DIFS	Department of Insurance and Financial Services
DIT	Directed In-Service Training
DKU	Diabetes and Kidney Unit [Michigan Department of Health and Human Services, Public Health Administration (PHA)]
DME	Durable Medical Equipment
DMEPOS	Durable Medical Equipment, Prosthetics, Orthotics & Supplies
DMP	Document Management Portal
DO	Doctor of Osteopathy
DOB	Date of Birth
DOS	Date of Service
DPM	Doctor of Podiatric Medicine
DPNA	Denial of Payment for New Admissions
DPO	Designated Provider Organization
DPOA	Durable Power of Attorney
DPOC	Directed Plan of Correction
DPP	Diabetes Prevention Program [Centers for Disease Control and Prevention]
DPRP	Diabetes Prevention Recognition Program [Centers for Disease Control and Prevention]
DPSCD	Detroit Public Schools Community District
DPT/CSAT	Division of Pharmacologic Therapies/Center for Substance Abuse Treatment
DQ	Developmental Quotient
DRG	Diagnosis Related Group
DSC	Direct service claiming
DSH	Disproportionate Share Hospital
DSM	Diagnostic and Statistical Manual of Mental Disorders
DSM-5	Diagnostic and Statistical Manual of Mental Disorders, 5th Edition
DSM-IV	Diagnostic and Statistical Manual of Mental Disorders, Fourth Edition
DSME	Diabetes Self-Management Education

Michigan Department of Health and Human Services
Medicaid Provider Manual

Acronym	Meaning
DT	Dental Therapist
DTMB	Department of Technology, Management & Budget
DTT	Discrete Trial Training
DUB	Designated Unavailable Beds
DUR	Drug Utilization Review
E/M	Evaluation and Management
EAA	Environmental Accessibility Adaptations
EBG	Evidence-Based Guidelines
EBP	evidence-based practice
ECG	Electrocardiogram
ECR	Electronic Cost Report
ED	Emergency Department
EDI	Electronic Data Interchange
EEG	Electroencephalogram
EFL	Essential for Living
EFT	Electronic Funds Transfer
EGrAMS	Electronic Grants Administration and Management System
EH	eligible hospital (NOTE: Term applies to EHR Incentive Program only.)
EHR	Electronic Health Record
EIBI	Early Intensive Behavioral Intervention
EIN	Federal Employee ID number
EMT	Emergency Medical Technician
EMTALA	Emergency Medical Treatment and Active Labor Act
EOAE	Evoked Otoacoustic Emissions
EOB	Explanation of Benefit
EP	eligible professional (NOTE: Term applies to EHR Incentive Program only.)
EPSDT	Early and Periodic Screening, Diagnosis and Treatment

Michigan Department of Health and Human Services
Medicaid Provider Manual

Acronym	Meaning
ERP	Education Recognition Program
ESO	Emergency Services Only
ESRD	End Stage Renal Disease
ESR	Erythrocyte Sedimentation Rate
ESV	electronic service verification
EVS	Eligibility Verification System
EVV	Electronic visit verification
F/T	Full Time
FAO	Facility/agency/organization
FAP	Food Assistance Program
FAQ	frequently asked question
FDA	Food and Drug Administration
FFP	Federal Financial Participation
FFS	Fee-for-Service
FICA	Federal Insurance Contributions Act
FMAP	Federal Medical Assistance Percentage
FNP	Family Nurse Practitioner
FOC	Freedom of Choice
FPL	Federal Poverty Level B67
FQHC	Federally Qualified Health Center
FSR	Financial Status Report
FTE	Full-Time Equivalent
FYE	Fiscal Year End
GAAS	Generally Accepted Auditing Standards
GAF	Global Assessment of Functioning
GDM	gestational diabetes mellitus
GED	General Educational Development; General Education Diploma

Michigan Department of Health and Human Services
Medicaid Provider Manual

Acronym	Meaning
GLAD-PC	Guidelines for Adolescent Depression in Primary Care
GME	Graduate Medical Education
GPS	Global positioning service
HAA	Hospital Access Agreement
HBP	Hospital Based Provider
HBsAG	Hepatitis B Surface Antigen tests
HBV	hepatitis B virus
HCAC	Health Care Acquired Condition
HCBS	Home and Community Based Services
HCPCS	Healthcare Common Procedure Coding System
HCRD	Hospital and Clinic Reimbursement Division (Michigan Department of Health and Human Services)
HCV	Hepatitis C virus
HDM	Home Delivered Meals
HELP	Hawaii Early Learning Profile
HFA	Home for the Aged
HFCWO	High Frequency Chest Wall Oscillation
HHA	Home Health Agency
HHCS	Home health care services
HHCT	Health Home Care Team
HHP	Health Home Partner; Health Home Provider
HHS	Health & Human Services (U.S. Department of)
HICN	Health Insurance Claim Number
HIE	Health Information Exchange; Hypoxic-Ischemic Encephalopathy
HIPAA	Health Insurance Portability and Accountability Act of 1996
HIPPS	Health Insurance Prospective Payment System
HIS	Health Information System
HIT	Health Information Technology

Michigan Department of Health and Human Services
Medicaid Provider Manual

Acronym	Meaning
HITECH	Health Information Technology for Economic and Clinical Health Act
HKAFO	Hip-Knee-Ankle-Foot Orthosis
HKD	Healthy Kids Dental
HLTCU	Hospital Long Term Care Unit
HMO	Health Maintenance Organization
HMP	Healthy Michigan Plan
HRSA	Health Resources and Services Administration
HSW	Habilitation Supports Waiver
HUAM	Home Uterine Activity Monitor
HUD	Housing and Urban Development
IADL	Instrumental Activities of Daily Living
IBCLC	Internationally Board Certified Lactation Consultant
IBCLE	International Board of Lactation Consultant Examiners
ICA	Indigent Care Agreement
ICCD	International Center for Clubhouse Development (d/b/a Clubhouse International)
ICCW	Intensive Care Coordination with Wraparound
ICD	International Classification of Diseases
ICF/IID	Intermediate Care Facility for Individuals with Intellectual Disabilities [previously known as Intermediate Care Facility for the Mentally Retarded (ICF/MR)]
ICO	Integrated Care Organization
ICR	Intensive Cardiac Rehabilitation
ICSS	Intensive Crisis Stabilization Services
ID	Identification
IDA	Infant-Toddler Developmental Assessment
IDD	Intellectual/Developmental Disabilities
IDEA	Individuals with Disabilities Education Act
IDG	Interdisciplinary Group
IDTF	Independent Diagnostic Testing Facilities

Michigan Department of Health and Human Services
Medicaid Provider Manual

Acronym	Meaning
IE	Independent Employment
IECMHC	Infant and Early Childhood Mental Health Consultation (added 4/1/2025)
IEP	Individualized Education Program
IFDSH	Indigent Fund Disproportionate Share Hospital
IFSP	Individualized Family Service Plan
IGT	Intergovernmental Transfer
IHCP	Individualized Health Care Plan
IME	Indirect Medical Education
INS	Immigration and Naturalization Services (INS)
IOP	Intensive outpatient
IPOS	Individual Plan of Service
IQ	Intelligence Quotient
IRA	Imminent Risk Assessment
IRS	Internal Revenue Service
IS	Intensity of Service
ISD	Intermediate School District
ITFI	Infant-Toddler Family Instrument
IV	Intravenous; Indigent Volume
IVR	Interactive Voice Response
KAFO	Knee-Ankle-Foot Orthosis
KDE	Kidney Disease Education
LARA	Licensing and Regulatory Affairs (Department of)
LARC	Long Acting Reversible Contraceptive
LBSW	Licensed Bachelor of Social Work
LCD	Local Code Determination
LEA	Local Education Agency
LEIN	Law Enforcement Information Network

Michigan Department of Health and Human Services
Medicaid Provider Manual

Acronym	Meaning
LEEP	Loop Electrosurgical Excision Procedure
LHD	Local Health Department
LIF	Low-Income Families
LLBSW	Limited License Bachelor of Social Work
LLMSW	Limited License Master of Social Work
LLP	Limited Licensed Psychologist
LMSW	Licensed Master of Social Work
LOA	Leave of Absence
LOC	Level of Care
LOCD	(Michigan Medicaid Nursing Facility) Level of Care Determination
LOCM	Low Osmolar Contrast Material
LOCUS	Level of Care Utilization System
LP	Licensed Psychologists
LPC	Licensed Professional Counselor
LPN	Licensed Practical Nurse
LRD	Lifetime Reserve Days
LSD	Local School District
LSO	Lumbar-Sacral Orthosis
LTACH	Long Term Acute Care Hospital
LTC	Long Term Care
LTE	Less Than Effective
LTSS	Long Term Services and Supports
MA	Medicaid
MAC	Monitored Anesthesia Care; Maximum Allowable Cost; Master Addictions Counselor
MACI	Medicaid Access to Care Initiative
MAER	Medicaid Allowable Expenditure Report
MAPS	Michigan Automated Prescription System

Michigan Department of Health and Human Services
Medicaid Provider Manual

Acronym	Meaning
MAT	Medication-Assisted Treatment
MBI	Medicare Beneficiary Identifier
MCBAP	Michigan Certification Board for Addiction Professionals
MCC	Managed Care Carriers
MCF	Medical Care Facility
MCI	Michigan Children's Institute
MCIR	Michigan Care Improvement Registry
MCL	Michigan Compiled Law
MCLFS	Medicare Clinical Laboratory Fee Schedule
MCM	Medicare Carrier's Manual
MCO	Managed Care Organization
MD	Medical Doctor
MDCN	Medicare Data Communication Network
MDE	Michigan Department of Education
MDHHS	Michigan Department of Health and Human Services (formerly Michigan Department of Community Health [MDCH] and Michigan Department of Human Services [DHS])
MDM	medical decision making
MDS	Minimum Data Set
MDS-HC	Minimum Data Set for Home Care
MEI	Medicare Economic Index
MER	Medicaid Eligibility Rate
MERF	Medical Eligibility Report Form
MHC	Mental Health Code
MHNP	Mental Health Nurse Practitioner
MHP	Medicaid Health Plan
MI	Mental Illness
MI Choice	Home and Community Based Waiver for the Elderly and Disabled
MI Enrolls	Michigan Enrolls

Michigan Department of Health and Human Services
Medicaid Provider Manual

Acronym	Meaning
MICAS	Michigan Intensive Child and Adolescent Services
MichiCANS	Michigan Child and Adolescent Needs and Strengths
MICIS	MI Choice Information System
MI DPP	Michigan Diabetes Prevention Program
MIHP	Maternal Infant Health Program
MI LEAP	Michigan Lifelong Education, Advancement, and Potential
MIP	Medicaid Interim Payment
MI-VRP	Michigan Vaccine Replacement Program
	(text deleted 4/1/2025)
MMAP	Michigan Medicare/Medicaid Assistance Program
MMF	Michigan Medicaid Forms
MMHC	Michigan Mental Health Code
MMIS	Medicaid Management Information System
MNT	Medical Nutrition Therapy
MOA	Memorandum of Agreement
MOAHR	Michigan Office of Administrative Hearings and Rules
MOMS	Maternity Outpatient Medical Services
MOU	Memorandum of Understanding
MOUD	Medications for Opioid Use Disorder (added 4/1/2025)
MPH	Masters of Public Health
MPHI	Michigan Public Health Institute
MPPL	Michigan Pharmaceutical Product List
MPR	market penetration rate

MRS	Michigan Rehabilitation Services
MSA	Metropolitan Statistical Area
MSBE	Michigan State Board of Education

Michigan Department of Health and Human Services
Medicaid Provider Manual

Acronym	Meaning
MSD	Michigan School for the Deaf
MSHDA	Michigan State Housing Development Authority
MSP	Medicare Savings Program
MSW	Master of Social Work
MT-BC	Music Therapist - Board Certified
MTF	Military Treatment Facility
MTU	Miscellaneous Transaction Unit
MUE	Medically Unlikely Edit
NAC	National Autism Center
NADAC	National Average Drug Acquisition Cost
NCC	National Certified Counselor
NCCA	National Commission for Certifying Agencies
NCCI	Medicaid National Correct Coding Initiative
NCD	National Coverage Determination
NCHS	National Center for Health Statistics
NCPDP	National Council for Prescription Drug Program
NCQA	National Committee for Quality Assurance
NCT	National Clinical Trial
NCTRC	National Council for Therapeutic Recreation Certification
NDC	National Drug Code
NEMT	Non-Emergency Medical Transportation
NF	Nursing Facility
NFT	Nursing Facility Transition
NHC	Nursing Home Compare
NICU	Neonatal Intensive Care Unit
NIH	National Institutes of Health
NIMRC	National Institute for Medical Respite Care

Michigan Department of Health and Human Services
Medicaid Provider Manual

Acronym	Meaning
NIPT	noninvasive prenatal testing
NLR	National Level Repository
NMNET	Non-medical (non-emergency) transportation
NMTR	National Music Therapy Registry
NOC	Not Otherwise Classified
NP	Nurse Practitioner
NPA	National PACE Association
NPE	Neuropsychological Evaluation
NPI	National Provider Identifier
NPP	Non-Physician Practitioner
NPPES	National Plan and Provider Enumeration System
NPSP	Non-Public Service Plan
NRC	Nuclear Regulatory Commission
NREPP	National Registry of Evidence-based Programs and Practices
NRRTS	National Registry of Rehabilitation Technology Suppliers (added per bulletin MMP 24-58)
NTA	Non-therapy ancillary-
NUBC	National Uniform Billing Committee
O & M	Orientation and mobility
OASIS	Outcome and Assessment Information Set
OB Profile	Routine prenatal laboratory services
OBAT	Office Based Alcohol Treatment
OBOT	Office Based Opioid Treatment
OBRA 90	Omnibus Budget Reconciliation Act of 1990
OBSUT	Office-Based Substance Use Treatment
OCD	obsessive-compulsive disorder (added 4/1/2025)
OCE	Outpatient Code Editor
OCR	Office of Civil Rights; Optical Character Reader

Michigan Department of Health and Human Services
Medicaid Provider Manual

Acronym	Meaning
OFIR	Office of Financial and Insurance Regulation
OIG	Office of Inspector General
OMA	Office of Medical Affairs
OMB	Office of Management and Budget
ONC	Office of the National Coordinator for Health Information Technology
OPH	Outpatient Hospital
OPPC	Other Provider Preventable Condition
OPPS	Outpatient Prospective Payment System
OR	Operating Room
ORR	Office of Recipient Rights
OSA	Obstructive Sleep Apnea
OT	Occupational Therapy; Occupational Therapist
OTA	Occupational Therapy Assistant
OTC	Over the Counter
OTIS	Offender Tracking and Information System
OTP	Opioid Treatment Program
UD	Opioid Use Disorder
P&O	Prosthetics and Orthotics
P&T	Pharmacy & Therapeutics
P/T	Part Time
PA	Prior Authorization; Physician's Assistant; Public Act
PACE	Program of All-Inclusive Care for the Elderly
PACER	Prior Authorization Certification Evaluation Review
PAHP	Prepaid Ambulatory Health Plan
PAMA	Protecting Accessing to Medicare Act of 2014
PAS	Pre-admission Screening
PASARR	Pre-admission Screening/Annual Resident Review

Michigan Department of Health and Human Services
Medicaid Provider Manual

Acronym	Meaning
PBM	Pharmacy Benefits Manager
PBRHC	Provider Based Rural Health Clinic
PC	Professional Component
PC Pool	Primary Care Pool
PCP	Primary Care Physician; Person-Centered Planning; Primary Care Provider
PCS	Personal care services
PCSP	person-centered service plan
PCTP	person-centered transition plan
PDAC	Pricing, Data Analysis, and Coding
PD-CMP	per day Civil Money Penalty (added 4/1/2025)
PDD-NOS	Pervasive Developmental Disorder - Not Otherwise Specified
PDL	Preferred Drug List
PDN	Private Duty Nursing
PDPM	Patient Driven Payment Model
PECFAS	Preschool and Early Childhood Functional Assessment Scale
PECOS	Provider Enrollment, Chain and Ownership System
PEDS	Parent's Evaluation of Developmental Status
PEME	Pre-Eligibility Medical Expenses
PERS	Personal Emergency Response System
PET	Program Enrollment Type

GLOSSARY APPENDIX

Glossary Term	Definition
Acquisition Costs	The manufacturer's invoice price, minus primary discount, plus a percentage over cost, plus actual shipping costs. Acquisition cost does not include handling fees. (For the specific percentage over cost, refer to the archived policy bulletin MSA 09-62 posted on the MDHHS website.)
Ambulatory Payment Classification (APC)	The Outpatient Prospective Payment System (OPPS) Ambulatory Payment Classification (APC) is a reimbursement method representing groups of outpatient visits according to clinical characteristics and costs associated with the diagnoses and the procedures rendered known as APCs.
Borderland	A county that is contiguous to the Michigan border and includes several major cities beyond the contiguous county lines.
Durable Medical Equipment (DME)	Equipment that can withstand repeated use, is reusable or removable, is suitable for use in any non-institutional setting in which normal life activities take place, is primarily and customarily used to serve a medical purpose and is generally not useful to an individual in the absence of illness, injury or disability.
The Emergency Medical Treatment and Active Labor Act (EMTALA)	42 USC 1395dd, that requires a Hospital to perform a medical screening examination of any individual presenting in its emergency department to determine if an emergency medical condition exists and to stabilize the individual's medical condition.
Encounter	A face-to-face contact between a patient and the provider of health care services who exercises independent judgment in the provision of health care services.
Face-to-Face	An encounter that can be either in person or using telehealth (simultaneous audio and visual technology).
Hospital	Hospital means the licensed entity that executed the Hospital Access Agreement, which has the inpatient capacity necessary to provide covered services.
Hospital Based Provider (HBP)	A hospital-employed MD, DO, Certified Registered Nurse Anesthetist (CRNA), dentist, podiatrist, optometrist, or nurse-midwife.
In-Person	An encounter that must be completed with beneficiary and provider physically together in the same location and is not allowed through telehealth.
Medicaid Deductible	Beneficiary must incur medical expenses each month equal to, or in excess of, an amount determined by the local MDHHS worker to qualify for Medicaid. Previously referred to as Medicaid Spend-down.

Michigan Department of Health and Human Services
Medicaid Provider Manual

Glossary Term	Definition
Medicaid Health Plan (MHP)	A Medicaid managed care plan that provides medical assistance through the delivery of Covered Services to Beneficiaries and that holds a Comprehensive Health Care Program Medicaid Contract with the State of Michigan.
Medical Supplies	Health care related items that are required to address an individual's illness, injury or disability; are consumable, disposable or have a limited life expectancy, cannot withstand repeated use, and are suitable for use in any non-institutional setting in which normal life activities take place. Examples are: hypodermic syringes/needles, ostomy supplies, and dressings necessary for the medical management of the beneficiary.
Mobility Related Activities of Daily Living (MRADL)	Daily activities (e.g., grooming, dressing, etc.) the beneficiary is capable of performing with the aid of mobility equipment.
Noncompliance	Failure or refusal to follow instructions related to improving or stabilizing a condition.
Noncovered Service	A medical or health care service that is: <ul style="list-style-type: none"> ▪ Not covered by Medicaid; ▪ Not medically necessary; ▪ Not described in a MHP's Certificate of Coverage; ▪ Provided before or after a beneficiary is an Enrollee in a MHP; or ▪ Non-emergency services for which the Hospital did not secure PA.
Nursing Facility	A nursing home, county medical care facility, State Veterans' Home, or hospital long-term care unit, with Medicaid certification.
Orthotics	Orthotics assist in correcting or strengthening a congenital or acquired physical anomaly, or malfunctioning portion of the body.
Outpatient Hospital	A portion of a hospital, which provides diagnostic, therapeutic (both surgical and non-surgical), and rehabilitation services to sick or injured persons who do not require inpatient hospitalization or institutionalization.
Outpatient Prospective Payment System (OPPS)	A Prospective Payment System (PPS) is a method of reimbursement in which Medicare payment is made based on a predetermined, fixed amount. The payment amount for a particular service is derived based on the classification system of that service (i.e., DRGs for inpatient hospital services, APCs for outpatient hospital services). All services paid under the PPS are classified into groups called Ambulatory Payment Classifications (or APCs). Services in each APC are similar clinically and in terms of the resources they require. A payment rate is established for each APC.
Physician (MD or DO)	An individual licensed under the Michigan Public Health Code (P.A. 368 of 1978) to engage in the practice of medicine or osteopathic medicine and surgery.

Michigan Department of Health and Human Services
Medicaid Provider Manual

Glossary Term	Definition
Practitioner	An MD, DO, Podiatrist, Dentist, Oral-Maxillofacial Surgeon, Physician's Assistant, Advanced Practice Registered Nurse (Certified Nurse Practitioner, Certified Clinical Nurse Specialist, Certified Nurse-Midwife), Certified Registered Nurse Anesthetist, Anesthesiologist Assistant, Physical Therapist, Psychologist, Occupational Therapist, Optometrist, Speech Therapist, and Audiologist.
Prosthetics	Prosthetics artificially replace a portion of the body to prevent or correct a physical anomaly or malfunctioning portion of the body.
Provider	An individual, firm, corporation, association, agency, institution, or other legal entity which is providing, has formerly provided, or has been approved to provide medical assistance to a beneficiary pursuant to the medical assistance program.
Public Facility	A public facility is defined at one of the following sections of the Michigan Public Health Code (PA 368 of 1978, as amended): Section 333.2413, Section 333.2415, or Section 333.2421.
Rapid Dispute Resolution Process	The process implemented by MDHHS to administer and resolve claim disputes.
Readmission	Any admission/hospitalization of a beneficiary within 15 days of a previous discharge, whether the readmission is to the same or different hospital.
Reference Laboratory	An enrolled laboratory that receives a specimen from another referring laboratory for testing and that actually performs the test.
Referring Laboratory	A laboratory that receives a specimen to be tested and that refers the specimen to another laboratory for performance of the laboratory test.
Sanctioned Provider	A provider who has been suspended, terminated or excluded from furnishing, ordering, or prescribing items or services to Medicaid beneficiaries.
Spend-down	See Medicaid Deductible.
Sterilization	Any medical procedure, treatment, or operation for the sole purpose of rendering an individual (male or female) permanently incapable of reproducing.
Third Party Liability	A payment resource available from both private and public insurance and other liable third parties that can be applied toward the beneficiary's health care expense.
Transfer Trauma	Any adverse psychological and/or physical effects occasioned by the transfer of a nursing home patient who would be materially detrimental to the physical or mental health of the patient.

Michigan Department of Health and Human Services

Medicaid Provider Manual

Glossary Term	Definition
U & C Charge	The usual and customary charge to the general public. Customary charge means the amount the provider charges another third party payer or the general public (except in cases where the general public receives free or reduced charges) for the same or a similar service. This definition does not include negotiated or contracted payment rates. If the provider renders a covered service to a beneficiary that the provider offers for free or for a reduced fee to the general public, the provider may only bill Medicaid up to that customary charge as long as all other Medicaid requirements are met.

FORMS APPENDIX

INTRODUCTION

The Forms Appendix contains all MDHHS forms referenced within the Michigan Medicaid Provider Manual. Detailed instructions are provided for forms that are not self-explanatory (refer to the table below). The bookmarks link to each form. The Forms field in the table below also links to the appropriate forms. Hold the cursor over form number (the hand cursor will turn into a pointing finger). Double click the cursor to access the form directly from the table. Use the navigation arrows to move from page to page and form to appendix.

All forms are also available on the MDHHS website (refer to the Directory Appendix for website information). Most forms are available in PDF format as well as in a downloadable Word-enabled format.

Form Number	Form Name
MSA-2218	Acknowledgment of Receipt of Hysterectomy Information
DHS-390	Adult Services Application
BPHASA-2210	Attestation to the Appropriateness of the Qualified Clinical Trial

ACKNOWLEDGMENT OF RECEIPT OF HYSTERECTOMY INFORMATION

Michigan Department of Health and Human Services

RECIPIENT STATEMENT:

I, _____, was told before the
(Print or Type Recipient Name)
hysterectomy was done that after the hysterectomy I would not be able to become pregnant.

(Recipient or Representative Signature)

(Date)

(Interpreter Signature, if required to inform the recipient of the above information)

(Date)

PHYSICIAN STATEMENT:

The hysterectomy for the above named recipient is solely for medical indications. This hysterectomy is not primarily or secondarily for family planning reasons, to render the above named recipient permanently incapable of reproducing, i.e. sterilization. It was explained to the above named recipient prior to the hysterectomy that the hysterectomy will render her permanently incapable of reproducing.

(Physician Signature)

(Date)

Authority: Title XIX of the Social Security Act Completion: Is Voluntary, but is required if Medical Assistance program payment is desired.	The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person's eligibility.

SECTION A – DEPARTMENT PROGRAMS: Below is a brief description of the services provided by the Department. Check the box or boxes which describe the services you need or problems where you desire help.

1. ☐ **Home Help**
Services to help pay for someone to assist with personal care and housekeeping.
2. ☐ **Adult Community Placement**
Services for adults who can no longer remain in their own homes. Includes help finding an adult foster home or home for the aged and services for people living in these settings.
3. ☐ **Other Services**
Nonpayment services to help adults stay safe in their own homes. Services may include information and referral to other community resources.

IF YOU OR SOMEONE YOU KNOW IS IN NEED OF PROTECTIVE SERVICES, CONTACT CENTRALIZED INTAKE FOR ABUSE OR NEGLECT AT 855-444-3911.

SECTION B – CURRENT SITUATION: Check all boxes that apply to you.

1. Your Status as a Recipient
- a. ☐ Medicaid (MA) recipient
 - b. ☐ Medicaid application pending
 - c. ☐ Supplemental Security Income (SSI) recipient
 - d. ☐ MI Choice Waiver recipient
 - e. ☐ PACE recipient
 - f. ☐ MI Health Link recipient

- g. ☐ Community Mental Health (CMH) recipient
 - h. ☐ Food Assistance recipient
 - i. ☐ Family Independence Program (FIP) recipient
 - j. ☐ State Disability Assistance (SDA) recipient
 - k. ☐ Veteran Affairs recipient
 - l. ☐ Other
-

2. Living Arrangement (Check all boxes that apply to you and answer related questions)

- a. ☐ Alone
 - b. ☐ With spouse (If married answer questions below.)
 - Is spouse disabled? ☐ Yes ☐ No
 - Is spouse working? ☐ Yes ☐ No
 - Full name of spouse _____
 - c. ☐ With children under age 18. How many? _____
 - d. ☐ With others (relatives and non-relatives) How many? _____
 - e. ☐ Live in adult foster care facility, home for the aged.
 - f. Is client in a hospital or nursing home? ☐ Yes ☐ No
 - g. Does the recipient have a guardian? ☐ Yes ☐ No
 - Name of guardian _____
 - h. Is a caregiver/provider already identified? ☐ Yes ☐ No
-

Date of Birth

Read the following statement, sign, and date the application.

I wish to apply for one of the adult services programs. I certify that the information I have given is correct. By signing, I acknowledge that I have read and agree to the rights, responsibilities, and important things to know described in Section C of this application.

Signature of Client or Authorized Representative

Date

SECTION C – SERVICES APPLICATION RIGHTS, RESPONSIBILITIES, AND IMPORTANT THINGS TO KNOW

Instructions:

- Be sure to read this information. It describes your rights and responsibilities.
 - **Keep this copy for your records.**
 - If you have any questions regarding your rights and responsibilities or any information provided in this section, contact the adult services worker.
-

1. YOU HAVE THE FOLLOWING RIGHTS:

Application: You have the right to apply for adult services programs at any time. Your application must be approved or denied within 45 days from the day your referral is received by MDHHS. When applying for Medicaid funded programs such as Home Help, you will not be approved until you have active Medicaid. If you need financial or medical assistance, another application is needed. You have the right to be notified in writing of the approval or denial of services and to be treated fairly and with dignity in all dealings with the department.

Non-discrimination: If you believe you have been discriminated against because of race, sex, religion, age, national origin, color, height, weight, marital status, gender identification or expression, sexual orientation, partisan considerations, or disability or genetic information that is unrelated to the person's eligibility, you have the right to file a complaint with the following:

- Michigan Department of Civil Rights: 800-482-3604
- U.S. Department of Health and Human Services: 202-619-0403

Hearings: If you believe you have been treated unfairly or a mistake has been made concerning your case, you have a right to request an administrative hearing with the Michigan Office of Administrative Hearings and Rules (MOAHR) within 90 days of the action. You will be given the opportunity to explain your case to an impartial administrative law judge. You may request a hearing in any written form or you may submit the DCH-0092, Request for Hearing form, which is available online at https://www.michigan.gov/mdhhs/0,5885,7-339-71547_4860_78446_78448-16825--,00.html. All requests must be signed and dated by you or your authorized representative.

Voter Registration: If you are not registered to vote, you have the right to register.

Explanation About the Food Assistance Program (FAP):

- You may be eligible to receive food benefits.
 - You may apply for the Food Assistance Program at your local MDHHS office. If you have questions, contact the Eligibility Specialist assigned to your Medicaid case.
-

2. YOU HAVE THE FOLLOWING RESPONSIBILITIES:

- You must provide MDHHS with correct and complete information about your situation. The information you give may need to be verified.
 - You must report **any** changes regarding your case to your adult services worker **within ten business days** of the change. This includes, but is not limited to, changes in your medical condition or care needs, living arrangements, marital status, change in providers, hospitalizations or nursing home stays (services cannot be paid while you are in the hospital or nursing home) or any other change which may affect your eligibility or the amount of benefits.
 - If you neglect or refuse to report required changes, or make false or misleading statements, you can be prosecuted for fraud. If you have any doubt about whether you should report a change, contact your adult services worker at the local MDHHS office.
-

Repayment of Benefits: I understand that if benefits are overpaid for any reason, the overpayment amount received will have to be repaid. In addition, if intentional misrepresentation or concealment of material information caused the overpayment, the responsible party/parties, including the provider of care, may be prosecuted for fraud.

Release of Information: I authorize the MDHHS to provide notice to my care provider(s) when Home Help services or Adult Community Placement has been authorized, when there are changes in the authorization amount previously given to the provider or when my case is closed.

3. IMPORTANT THINGS TO KNOW:

- a. Home Help and Adult Community Placement are Medicaid funded programs. As a Home Help recipient, I am responsible for any costs not paid by MDHHS, including benefits which may have been authorized but for which I no longer qualify due to Medicaid ineligibility. Adult Foster Care/Home for the Aged providers are responsible for returning supplemental payments they receive when a client is not eligible.
- b. I am not eligible for Home Help services prior to being certified by a Medicaid medical professional. Certification of need is provided on the DHS-54A, Medical Needs form.
- c. I understand that my Home Help provider must be enrolled in the Community Health Automated Medicaid Processing System (CHAMPS) and undergo a criminal history screening. Payment will only be made to the provider who is enrolled and approved by MDHHS to provide services for me.

Adult Foster Care/Homes for the Aged providers must register in the Statewide Integrated Governmental Management Application (SIGMA) and enrolled in the Bridges system to receive payment.
- d. Payment for Home Help services cannot be approved prior to (1) the medical professional's signature date on the DHS-54A and (2) the provider enrollment and approval date.
- e. I understand that my Home Help or Adult Community Placement case will be reviewed every six months to determine if I continue to qualify for services.
- f. I have the right to choose my Home Help provider. I understand that my provider is not employed by the State of Michigan or MDHHS. I am considered the employer and have the right to hire or fire my provider.
- g. I understand that Home Help services and Adult Community Placement are benefits to me and earnings to my provider. Home Help checks may be addressed to both the client and provider (dual party). I am responsible to endorse the check and give it to my provider. If I hire an agency or reside in an adult foster care home, checks will be sent directly to the agency on my behalf.
- h. I understand that payments cannot be approved for periods of time that I am in a hospital, nursing home or rehabilitation facility as this is considered duplication of Medicaid services. Payment can be approved for services provided on the day I am discharged from the hospital, nursing home or rehabilitation facility but not the day I am admitted.
- i. If a reported change results in a reduction or termination of benefits, I will be notified in writing of the negative action.
- j. I understand that my individual Home Help provider must record the tasks they provide for me electronically in CHAMPS. An exception may be granted for my provider to submit a paper services verification if they meet certain criteria.
- k. I understand that my individual Home Help provider must submit an electronic or paper services verification before they can be paid. The Adult Foster Care/Homes for the Aged provider must submit a monthly claim electronically in the Adult Services Authorized Payment system.

Call 517-241-2112 (TTY 771).

5

The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person’s eligibility.

Further, MDHHS:

- Provides free aids and services to people with disabilities to communicate with us, such as:
 - Qualified sign language interpreters
 - Written information in other formats (large print, audio, accessible electronic formats, other formats); and
- Provides free language services to people whose primary language is not English, such as:
 - Qualified interpreters
 - Information written in other languages

If you need these services, contact the Section 1557 Coordinator. The contact information is found below.

If you believe that MDHHS has not provided the above services, or discriminated in another way, you can file a grievance with the Section 1557 Coordinator. You can file a grievance in person or by mail, fax, or email. If you need help filing a grievance, the Section 1557 Coordinator is available to help you.

Attestation to the Appropriateness of the Qualified Clinical Trial

Instructions for BPHASA-2210

General Information

BPHASA-2210 is a mandatory attestation form on the appropriateness of a qualified clinical trial in which a Medicaid beneficiary is participating. This form is required for coverage of routine patient costs for items and services furnished in connection with the beneficiary's participation in a clinical trial.

The completed BPHASA-2210 must be submitted with:

- Claims - Submit via CHAMPS, Document Management Portal, with claims for routine patient costs furnished in connection with a qualifying clinical trial (Refer to the Billing & Reimbursement for Professionals Chapter of the MDHHS Medicaid Provider manual for additional information)
- Prior Authorization (PA) Requests - Submit via CHAMPS direct data entry with PA requests for items and services provided in connection with a qualifying clinical trial that require PA (Refer to the General Information for Providers Chapter of the MDHHS Medicaid Provider Manual for additional information)

For additional information on how to submit documentation with claims or requests for prior authorization, refer to [Community Health Automated Medicaid Processing System \(CHAMPS\) \(michigan.gov\)](https://michigan.gov/CHAMPS)

Completion Instructions

BPHASA-2210 must be signed by both:

- Principal investigator of the specified clinical trial, AND
- Health care provider
 - May also be the principal investigator,
 - Qualified health care providers include licensed providers that are part of the beneficiary's health care team such as, but not limited to, the beneficiary's primary care, specialty, treating, referring, or ordering provider.

Questions should be directed to Provider Support at ProviderSupport@michigan.gov

PRA Disclosure Statement - This information is being collected to assist the Centers for Medicare & Medicaid Services in implementing Section 210 of the Consolidated Appropriations Act of 2021 amending section 1905(a) of the Social Security Act (the Act), by adding a new mandatory benefit at section 1905(a)(30). Section 210 mandates coverage of routine patient services and costs furnished in connection with participation by Medicaid beneficiaries in qualifying clinical trials effective January 1, 2022. Section 210 also amended sections 1902(a)(10)(A) and 1937(b)(5) of the Act to make coverage of this new benefit mandatory under the state plan and any benchmark or benchmark equivalent coverage (also referred to as alternative benefit plans, or ABPs). Under the Privacy Act of 1974 any personally identifying information obtained will be kept private to the extent of the law. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. The OMB control number for this project is 0938-0193. Public burden for all of the collection of information requirements under this control number is estimated to take about 56 hours per response. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to CMS, 7500 Security Boulevard, Attn: Paperwork Reduction Act Reports Clearance Officer, Mail Stop C4-26-05, Baltimore, Maryland 21244-1850.

AUTHORITY: Title XIX of the Social Security Act
 COMPLETION: Is Voluntary, but is required if payment from applicable program is sought.

The Department of Health and Human Services is an equal opportunity employer, services and programs provider.

The Michigan Department of Health and Human Services (MDHHS) does not discriminate against any individual or group because of race, religion, age, national origin, color, height, weight, marital status, political beliefs or disability.

BENEFITS MONITORING PROGRAM REFERRAL

SECTION 1 – Purpose of Submission

☐ PCP Designation ☐ Specialty Referral ☐ Discharge from Practice

SECTION 2 – Beneficiary Information

Beneficiary Name (Last, First, Middle)			mihealth Card Number
Street Address			Home Telephone Number
City	State	ZIP Code	Work or Other Telephone Number

SECTION 3 – Referring Provider Information

Provider Name			Individual NPI Number	Specialty
Organization Name (If applicable)			Organization NPI Number	
Business Address			Are you the PCP? <input type="checkbox"/> YES <input type="checkbox"/> NO	
City	State	ZIP Code	Telephone Number	Fax Number

SECTION 4 – Referred Provider Information

Provider Name			Individual NPI Number	Specialty
Organization Name (If applicable)			Organization NPI Number	
Business Address			Telephone Number	Fax Number
City	State	ZIP Code	Anticipated Duration of Need <input type="checkbox"/> Acute/Short-Term <input type="checkbox"/> Chronic/Long-Term	

SECTION 5 – Drugs Subject to Abuse

MDHHS must authorize all prescribers of drugs subject to abuse for BMP-enrolled beneficiaries. Do you anticipate a need for the referred provider to prescribe medications in these classes?

☐ YES ☐ NO ☐ Unable to determine

Include the beneficiary's current medication list with form submission.

SECTION 6 – Additional Information/Comments (including diagnoses)

--------------------	-----------------------

Benefits Monitoring Program Referral (MSA-1302) Instructions for Completion and Submission

General Instructions

This form should ONLY be used for beneficiaries enrolled in the Benefits Monitoring Program (BMP). Enrollment may be verified through the CHAMPS Eligibility Inquiry response as additional information. The form is to be completed by the beneficiary's BMP Authorized Provider(s). For additional program information, refer to the Michigan Medicaid Provider Manual (Beneficiary Eligibility Chapter, Benefits Monitoring Program Section) available on the MDHHS website.

MDHHS requests that the MSA-1302 be typewritten to facilitate processing.

Form Completion

Section 1	Check the appropriate box to communicate purpose of the submission.
Section 2	Beneficiary Information.
Section 3	Referring (or Primary Care) Provider Information.
Section 4	Referred Provider Information. Note: This section may be left blank when making a PCP designation only.
Section 5	Check the appropriate box to communicate the anticipated need for MDHHS to authorize the referred provider to write prescriptions for drugs subject to abuse for this beneficiary. Include the beneficiary's current list of medications with form submission.
Section 6	Fill in the reason for referral, including diagnosis. Include any additional information that would assist in MDHHS review. When using this form to communicate a discharge from practice, include a copy of the communication from your office to the patient for MDHHS records.

Copy Distribution

- Original – Referring Provider File
- Copy – Referred Provider
- Copy – Michigan Department of Health and Human Services (MDHHS), Behavioral and Physical Health and Aging Services Administration, Benefits Monitoring Program

Form Submission

The MSA-1302 and any supplemental information (e.g. medication list, medical records, forged prescriptions, etc.) must be mailed or faxed to:

**MDHHS – Behavioral and Physical Health and Aging Services Administration
Benefits Monitoring Program
PO Box 30170
Lansing, MI 48909**

Fax Number: (517) 335-0075

The MDHHS Program Review Division may be reached via telephone at (800) 622-0276.

AUTHORITY: Title XIX of the Social Security Act.

COMPLETION: Is Voluntary, but is required if Medical Assistance program payment is desired.

The Michigan Department of Health and Human Services (MDHHS) does not discriminate against any individual or group on the basis of race, national origin, color, sex, disability, religion, age, height, weight, familial status, partisan considerations, or genetic information. Sex-based discrimination includes, but is not limited to, discrimination based on sexual orientation, gender identity, gender expression, sex characteristics, and pregnancy.

BENEFICIARY VERIFICATION OF COVERAGE

Michigan Department of Health and Human Services
Behavioral and Physical Health and Aging Services Administration

I understand that Medicaid, Healthy Michigan Plan, or MIChild only covers payment for elective abortions under limited circumstances.

These are:

- ☐ Elective abortion to terminate a pregnancy to save the life of the mother,
- ☐ Elective abortion to terminate a pregnancy that was the result of rape, or
- ☐ Elective abortion to terminate a pregnancy that was the result of incest.

I certify that I am eligible for Medicaid, Healthy Michigan Plan, or MIChild coverage for an elective abortion based upon the circumstance that I have checked above. I understand that if I have given false information to obtain coverage for an elective abortion I can be prosecuted for fraud. I also understand that a copy of this verification will be sent to the local Michigan Department of Health and Human Services (MDHHS) office or to a police agency when appropriate.

Beneficiary Name (typed or printed)			Beneficiary Signature

CERTIFICATION FOR INDUCED ABORTION
Michigan Department of Health and Human Services
Behavioral and Physical Health and Aging Services Administration

Medicaid, Healthy Michigan Plan, or MIChild payments for abortion services are limited to cases in which the life of the mother would be endangered if the pregnancy were continued or cases in which the pregnancy was the result of rape or incest. To receive payment for abortion services, a physician must determine and certify that the abortion is necessary to save the life of the mother or is to terminate a pregnancy that resulted from rape or incest.

INSTRUCTIONS:

- TYPE or PRINT ALL Information below.
- The Physician completing this form is responsible for providing a copy of the completed form to any other provider assisting in this procedure (e.g., hospital, anesthesiologist, laboratory) for billing purposes.
- Send a copy of the completed form with the claim. (Refer to the Medicaid Provider Manual, Directory Appendix, Claim Submission/Payment.)

Any questions regarding this form should be referred to Provider Inquiry at 800-292-2550 or e-mail ProviderSupport@michigan.gov.

Authority: Title XIX of the Social Security Act
Completion: Completion is required for Medicaid reimbursement.

The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person's eligibility.

Complex Seating and Mobility Device Prior Approval - Request/Authorization Completion Instructions

The MSA-1653-D must be used by Medicaid enrolled DME Providers. Note: Requests for new complex seating or mobility devices submit with a completed Evaluation and Medical Justification for Complex Seating Systems and Mobility Devices" form (MSA-1656).

MDHHS requests that the MSA-1653-D be typewritten to facilitate processing. A Word fill-in enabled version of this form can be downloaded from the MDHHS website www.michigan.gov/medicaidproviders >> Policy, Letters & Forms. The form is generally self-explanatory. For complete information on required modifiers, documentation, and appropriate quantity amounts, refer to the following documents:

- Standards of Coverage portion of the provider-specific chapters of the Medicaid Provider Manual.
- Billing & Reimbursement for Professionals Chapter of the Medicaid Provider Manual.
- Provider-specific databases on the MDHHS website. www.michigan.gov/medicaidproviders >> Billing and Reimbursement >> Provider Specific Information.

Completion of this form is as follows:

Box 1	MDHHS Use Only
Box 11	Beneficiary address. If beneficiary resides in Nursing Facility include the Nursing Facility name, address and phone number.
Box 17	Complete this box ONLY for wheelchair requests. <ul style="list-style-type: none"> • For repairs or parts, complete MSA-1653-D. (Do not include MSA-1656.) • For new or replacement (due to a change in beneficiary basic medical functional status requests), stop at this point and complete MSA-1656. Both forms must be submitted for Prior Authorization consideration.
Box 20	Enter brand name, model catalog or part number. DME, orthotics and prosthetics, must provide the brand name, model, and catalog or part number.
Box 21	Enter a complete description of the item requested.
Box 22	Enter the HCPCS Procedure Code.
Box 23	Enter the applicable HCPCS Modifier.
Box 28	Enter the beneficiary's primary and secondary diagnoses or the CSHCS qualifying diagnosis (list both the code and description). DME/POS providers must submit the prescription/CMN with this form.
Box 29	Any additional remarks regarding the request should be listed in this box such as verbal authorization date, retroactive date of service if being requested. Provide other insurance coverage for services requested.
Box 31	Must be completed for all requests.

Form Submission

PA request forms and required documentation for all eligible Medicaid beneficiaries must be mailed or faxed to:

**MDHHS – Behavioral and Physical Health and Aging Services Administration
Program Review Division
P.O. Box 30170
Lansing, Michigan 48909**

Fax Number: (517) 335-0075

To check the status of a PA request, contact the MDHHS – Behavioral and Physical Health and Aging Services Administration, Program Review Division via telephone at **1-800-622-0276**.

AUTHORITY: Title XIX of the Social Security Act
COMPLETION: Is voluntary, but is required if payment from applicable programs is sought.

The Michigan Department of Health and Human Services is an equal opportunity employer, services and programs provider.

The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person's eligibility.

CONSENT FOR STERILIZATION

Michigan Department of Health and Human Services

NOTICE: YOUR DECISION AT ANY TIME NOT TO BE STERILIZED WILL NOT RESULT IN THE WITHDRAWAL OR WITHHOLDING OF ANY BENEFITS PROVIDED BY PROGRAMS OR PROJECTS RECEIVING FEDERAL FUNDS.

CONSENT TO STERILIZATION

I have asked for and received information about sterilization from

_____. When I first asked for the
(Doctor or Clinic)

information, I was told that the decision to be sterilized is completely up to me. I was told that I could decide not to be sterilized. If I decide not to be sterilized, my decision will not affect my right to future care or treatment. I will not lose any help or benefits from programs receiving Federal funds, such as A.F.D.C. or Medicaid that I am now getting or for which I may become eligible.

I UNDERSTAND THAT THE STERILIZATION MUST BE CONSIDERED **PERMANENT AND NOT REVERSIBLE**. I HAVE DECIDED THAT I DO NOT WANT TO BECOME PREGNANT, BEAR CHILDREN OR FATHER CHILDREN.

I was told about those temporary methods of birth control that are available and could be provided to me which will allow me to bear or father a child in the future. I have rejected these alternatives and chosen to be sterilized.

I understand that I will be sterilized by an operation known as a _____. The discomforts, risks and benefits associated with the operation have been explained to me. All my questions have been answered to my satisfaction.

I understand that the operation will not be done until at least thirty days after I sign this form. I understand that I can change my mind at any time and that my decision at any time not to be sterilized will not result in the withholding of any benefits or medical services provided by federally funded programs.

I am at least 21 years of age and was born on _____
(Month / Day / Year)

I, _____
(Name of Individual Being Sterilized)

hereby consent of my own free will to be sterilized by

(Name of Doctor and Professional Degree)
by a method called _____.

My consent expires 180 days from the date of my signature below.

I also consent to the release of this form and other medical records about the operation to:

Representatives of the Department of Health and Human Services OR Employees of programs or projects funded by that Department but only for determining if Federal laws were observed. I have received a copy of this form.

(Signature of Person Giving Consent) Date: _____
(Month / Day / Year)

You are requested to supply the following information, but it is not required: *Ethnicity and race designation (please check)*

Ethnicity:

Race (mark one or more):

- | | |
|---|--|
| <input type="checkbox"/> Hispanic or Latino | <input type="checkbox"/> American Indian or Alaska Native |
| <input type="checkbox"/> Not Hispanic or Latino | <input type="checkbox"/> Asian |
| | <input type="checkbox"/> Black or African American |
| | <input type="checkbox"/> Native Hawaiian or Other Pacific Islander |
| | <input type="checkbox"/> White |

INTERPRETER'S STATEMENT

If an interpreter is provided to assist the individual to be sterilized:

I have translated the information and advice presented orally to the individual to be sterilized by the person obtaining this consent. I have also read him/her the consent form in _____

language and explained its contents to him/her. To the best of my knowledge and belief he/she understood this explanation.

(Interpreter's Signature) Date: _____
(Month / Day / Year)

STATEMENT OF PERSON OBTAINING CONSENT

Before _____ signed the

(Name of Individual)

consent form, I explained to him/her the nature of the sterilization operation _____, the fact that it is intended to be a final and irreversible procedure and the discomforts, risks and benefits associated with it.

I counseled the individual to be sterilized that alternative methods of birth control are available which are temporary. I explained that sterilization is different because it is permanent.

I informed the individual to be sterilized that his/her consent can be withdrawn at any time and that he/she will not lose any health services or any benefits provided by Federal funds.

To the best of my knowledge and belief the individual to be sterilized is at least 21 years old and appears mentally competent. He/she knowingly and voluntarily requested to be sterilized and appears to understand the nature and consequences of the procedure.

(Signature of person obtaining consent)

(Date)

(Facility)

(Facility Address)

PHYSICIAN'S STATEMENT

Shortly before I performed a sterilization operation upon

_____ on _____
(Name of individual to be sterilized) (Date of sterilization)

I explained to him/her the nature of the sterilization operation _____, the fact that it is intended
(specify type of operation)

to be a final and irreversible procedure and the discomforts, risks and benefits associated with it.

I counseled the individual to be sterilized that alternative methods of birth control are available which are temporary. I explained that sterilization is different because it is permanent.

I informed the individual to be sterilized that his/her consent can be withdrawn at any time and that he/she will not lose any health services or benefits provided by Federal funds.

To the best of my knowledge and belief the individual to be sterilized is at least 21 years old and appears mentally competent. He/she knowingly and voluntarily requested to be sterilized and appeared to understand the nature and consequences of the procedure.

(Instructions for use of alternative final paragraphs: Use the first paragraph below except in the case of premature delivery or emergency abdominal surgery where the sterilization is performed less than 30 days after the date of the individual's signature on the consent form. In those cases, the second paragraph below must be used. Cross out the paragraph which is not used.)

(1) At least thirty days have passed between the date of the individual's signature on this consent form and the date the sterilization was performed.

(2) This sterilization was performed less than 30 days but more than 72 hours after the date of the individual's signature on this consent form because of the following circumstances (check applicable box and fill in information requested):

- ☐ Premature delivery
Individual's expected date of delivery: _____
- ☐ Emergency abdominal surgery: _____
(describe circumstances)

(Signature of Physician and Professional Degree) Date: _____
(Month / Day / Year)

INSTRUCTIONS TO COMPLETE CONSENT FOR STERILIZATION FORM

1. Name of the physician or clinic giving information to the beneficiary. The "M.D." or "D.O." designation must be included.
2. Name of the sterilization procedure to be performed (e.g., Tubal Ligation or Vasectomy).
3. Beneficiary's complete birth date (month, day, and year). The beneficiary must be 21 years of age at the time they sign the form.
4. Beneficiary's full name. If a name change is indicated on the Medicaid card by the time surgery is performed, both names must be indicated.
5. Name of physician performing the sterilization. If the physician is unknown, "doctor on call" may be indicated.
6. Name of surgery to be performed (e.g., Tubal Ligation or Vasectomy).
7. Beneficiary's handwritten signature. A beneficiary who cannot write should sign with an "X." The "X" signature must be witnessed. The witness' handwritten signature must appear below item 7.
8. Date the consent form was signed (month, day and year). This date must be more than 30 days and less than 180 days before the date the sterilization is performed. If it is less than 30 days, see instructions for "alternative final paragraphs."
9. Race and ethnicity designation is optional.
10. Interpreter's Statement. This information is only required if the beneficiary is unable to understand English. The language used for interpretation must be specified (e.g., Spanish). The interpreter's handwritten signature and date must appear. The date must be the same date the beneficiary signed the form.
11. Name of beneficiary.
12. Name of sterilization procedure (e.g., Tubal Ligation or Vasectomy).
13. The handwritten signature of the person obtaining consent.
14. Date consent is taken (month, day and year). This date must be before the date sterilization is performed (#18).
15. Name of provider or clinic (e.g., office of John Doe, M.D., doctor's office, ABC Clinic, XYZ Hospital).
16. Street address, city, state, and zip code. No P.O. boxes allowed.
17. Beneficiary's full name.
18. Date of sterilization (month, day, and year). The surgery date must be the same as indicated on the claim.
19. Name of sterilization procedure (e.g., Tubal Ligation, Vasectomy).
20. Instructions for use of alternative final paragraphs.
21. If at least 30 days have passed since the date the beneficiary signed the consent form and the date of sterilization, paragraph "1" applies and paragraph "2" should be crossed out.
22. If the date the sterilization was performed is less than 30 days and more than 72 hours of the beneficiary signing the consent form, paragraph "2" applies and paragraph "1" should be crossed out. The applicable box should be checked.
23. For premature delivery, the expected date of delivery must be given.
24. Physician's signature. This can be a stamped signature if counter initialed.
25. Date physician signed the consent form. This date must be on or after the date of surgery. This can be typed or stamped.

If abdominal surgery was performed, the circumstances must be explained and operative notes submitted with the claim.

AUTHORITY: Title XIX of the Social Security Act
COMPLETION: Is Voluntary, but is required if Medical Assistance program payment is desired.

The Michigan Department of Health and Human Services is an equal opportunity employer, services and programs provider.

The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person's eligibility

Application for Payment of Health Insurance Premiums

Please complete as many fields as possible in the application. In addition, a complete application will include:

- ☐ Copy of the billing statement from the insurance carrier or a statement from the employer verifying the cost of the insurance premium.
- ☐ Copies of Explanation of Benefit (EOB) statements or expenditure summaries from the private health insurance carrier or Medicare.
- ☐ Copy of the completed COBRA election form if health insurance coverage is to be maintained under the provisions of COBRA.
- ☐ Pharmacy report documenting the cost of the prescriptions and the amount paid by the private health insurance carrier or Medicare if the coverage includes a prescription benefit.

MDHHS is an equal opportunity provider.

MICHIGAN DEPARTMENT OF HEALTH AND HUMAN SERVICES
DENTAL PRIOR APPROVAL AUTHORIZATION REQUEST
Instructions for MSA-1680-B

The Dental Prior Approval Authorization Request form (MSA-1680-B) must be used by dental practices and community-based dental clinics (e.g., local health departments, Federally Qualified Health Centers) to request prior authorization (PA) for individuals enrolled in **Medicaid Fee-for-Service** and/or **Children's Special Health Care Services (CSHCS)**. For beneficiaries enrolled in Healthy Kids Dental, Medicaid Health Plans, or Integrated Care Organizations, providers must contact the assigned plan for authorization requirements.

The status of a PA request may be reviewed in CHAMPS. Additionally, providers will receive a PA determination letter. Approved services must be completed before the PA period ends. To request an extension, the provider must submit a copy of the determination letter and required documentation within 15 days prior to the end date of the current authorization. If the original PA is over one year old, a new PA request must be submitted.

For complete information on covered services, PA and documentation requirements, refer to the Dental chapter of the MDHHS Medicaid Provider Manual, and Michigan Medicaid Approved Policy Bulletins located at www.michigan.gov/medicaidproviders >> Policy, Letters & Forms.

Form Completion: MDHHS requires that the MSA-1680-B be typewritten.

BOX #	INSTRUCTIONS
1 - 5	If submitting a request via CHAMPS direct data entry (DDE), the provider may skip #1 – 5, and start form at box #6.
1 - 2	Enter the Medicaid enrolled provider's organization name and NPI. Previously referred to as Group NPI.
3	Enter the servicing location to which PA correspondence should be mailed, including determination letters and requests for additional clinical information.
4 - 5	Enter the Medicaid enrolled rendering/servicing provider's name and NPI.
6	Enter contact information for an individual in the provider's office that the Program Review Division can contact with questions regarding the PA request.
7 - 11	Enter the beneficiary's name, mihealth card number, phone number, date of birth, and sex. The information should be taken directly from the mihealth card and verified in CHAMPS.
12	Enter the beneficiary's diagnosis code(s) and description(s) that relate to the service being requested. For CSHCS covered services, dental providers are required to submit the beneficiary's CSHCS qualifying diagnosis.
13	Indicate the dental service category being requested; if not listed, describe under Other. If CSHCS services are being requested, refer to the CSHCS Section, Dental Chapter of the MDHHS Medicaid Provider Manual.
14	Complete the dental chart for each tooth using the Charting Key. For CSHCS requests, additionally document whether each tooth is erupted, partially erupted, or unerupted, as well as the presence of supernumerary teeth. Refer to American Dental Association (ADA) guidelines for designation of supernumerary teeth.
15	If diagnostic images are required by policy, confirm that they are attached to the request. Additionally, enter the date the images were taken and specific tooth number(s) for crowns, dental implants, impacted teeth, bridges, and teeth extracted since the images were taken. To determine services requiring dental images/radiographs, refer to the Dental chapter of the MDHHS Medicaid Provider Manual, and Michigan Medicaid Approved Policy Bulletins located at www.michigan.gov/medicaidproviders >> Policy, Letters & Forms.
16 – 17	Complete for requests for periodontal services. Confirm attachment of a comprehensive periodontal charting, periodontitis staging and grading. Refer to American Academy of Periodontology (AAP) guidelines for periodontal diagnosis and classification. Thorough completion of sections 16 – 17 satisfies the requirement for inclusion of the beneficiary's clinical record.
18 – 19	Document any other pertinent dental or medical history. Use box #19 for additional PA related comments.
20 – 23	Complete one line for each CDT procedure code requested. For periodontal services, each quadrant must be entered on a separate line.
24	Printed name, signature and date are required, attesting to the Provider Certification. Signature of a licensed dentist or dental therapist is required.

Form Submission:

PA request forms for all eligible Medicaid and CSHCS beneficiaries must be submitted via direct data entry, faxed, or mailed to:

Michigan Department of Health and Human Services, Dental Prior Authorization
P.O. Box 30154
Lansing, MI 48909
Fax: (517) 335-0075

If submitting electronically, the completed MSA-1680-B must be uploaded along with the supporting clinical documentation required and diagnostic dental images/radiographs if required by policy.

The status of a PA request can be checked via the **CHAMPS Provider Portal** located at <https://milogintp.michigan.gov>. Questions regarding PA should be directed to the Program Review Division at **1-800-622-0276**.

DENTAL PRIOR APPROVAL AUTHORIZATION REQUESTSubmit in CHAMPS via Direct Data Entry (DDE) <https://milogintp.michigan.gov> or FAX: 517-335-0075

The provider is responsible for eligibility verification. Authorization does not guarantee beneficiary eligibility or payment.

NOTE: IF SUBMITTING VIA CHAMPS DIRECT DATA ENTRY, SKIP TO BOX #6

I understand that any false claims, statements or documents or concealment of material fact may be prosecuted under applicable Federal and State Law. Signature of a licensed dentist or dental therapist is required. Provider's Name (typed/printed): _____ Provider's Signature: _____ Date: _____																																																																																																																																	

AUTHORITY: Title XIX of the Social Security Act
COMPLETION: Is Voluntary, but is required if payment from applicable program is sought.

The Michigan Department of Health and Human Services (MDHHS) does not discriminate against any individual or group on the basis of race, national origin, color, sex, disability, religion, age, height, weight, familial status, partisan considerations, or genetic information. Sex-based discrimination includes, but is not limited to, discrimination based on sexual orientation, gender identity, gender expression, sex characteristics, and pregnancy.

Documentation of Medical Necessity for the Provision of Contact Lenses

(This form is to be completed and attached to DCH-0893 when requesting prior authorization for the provision of contact lenses. Prior authorization is NOT required for beneficiaries with aphakia who are under six years of age.)

Beneficiary's Name

Medicaid ID Number

Indicate the diagnosis(es) which best describes the beneficiary's condition:

- ☐ Anirida
- ☐ Anisometropia or Antimetropia
- ☐ Aphakia
- ☐ Irregular Corneas *
- ☐ Keratoconus * (If vision can not be improved to 20/40 or better with eyeglasses.)
- ☐ Other conditions with no alternative treatment (e.g., Aniseikonia (with documentation), Keratoconjunctivitis Sicca)

Diagnosis(es) Code:

Current spectacle correction:

R _____ VA _____

L _____ VA _____

ADD _____

Best spectacle correction:

R _____ VA _____

L _____ VA _____

ADD _____

Has the beneficiary previously worn contact lenses? ☐ YES ☐ NO

If yes, explain:

Is the beneficiary currently wearing contact lenses? ☐ YES ☐ NO

If yes, indicate reason for new lenses:

Keratometry (diopters)

R _____ @ _____ ; _____ @ _____

L _____ @ _____ ; _____ @ _____

Mire Quality

R _____

L _____

* A corneal topography for Keratoconus and Irregular Cornea diagnoses may be requested.

Type of contact lens requested:**A. Hydrogels**

Power
Series (Brand Name)
Additional Specifications
Manufacturer
Manufacturer's wholesale cost

Michigan Department of Health and Human Services

Genetic and Molecular Laboratory Test Authorization Request - Completion Instructions

The MSA-2081 is used by Medicaid-enrolled medical practitioners and laboratory providers to request genetic and molecular laboratory testing services that require MDHHS approval. Authorization must be requested within 30 days of the specimen collection date. Specimen processing should not be completed until after the authorization has been approved.

Authorization requests will be reviewed for medical necessity based on the genetic and molecular testing standards of coverage available in the Laboratory chapter of the MDHHS Medicaid Provider Manual. Authorization requests require medical documentation from the beneficiary's Medicaid-enrolled treating provider. Medical necessity letters or test request forms created by the performing laboratory and signed by the treating provider will not be accepted as a substitute for clinical documentation or completion of the MSA-2081.

The completed MSA-2081 and/or clinical records from the treating provider must document the following:

- Indication for the test. This should be beneficiary-specific and medical in nature.
- Beneficiary's related signs and symptoms and/or family history relevant to the requested test.
- Other related testing or clinical findings of the beneficiary or family member relevant to the requested test.
- How the test results will be utilized to significantly alter the medical management or treatment of the disease.

For complete information on coverage, documentation, claims completion, and reimbursement, refer to the following documents:

- Laboratory Chapter of the MDHHS Medicaid Provider Manual.
- Billing & Reimbursement for Professionals chapter of the MDHHS Medicaid Provider Manual.
- Laboratory databases on the MDHHS website:
www.michigan.gov/medicaidproviders >> Billing and Reimbursement >> Provider Specific Information.

The MSA-2081 must be typewritten to facilitate processing. A Word fill-in enabled version of this form can be downloaded from the MDHHS website www.michigan.gov/medicaidproviders >> Policy, Letters & Forms.

Completion of this form is as follows:

Box 1	MDHHS Use Only
Box 2	Enter the laboratory name.
Box 3	Enter the laboratory NPI number.
Box 19	Enter the date of service. This should be the date the specimen was collected.
Box 21	Enter a complete description of the laboratory test requested.
Box 22	Enter the HCPCS/CPT Procedure Code.
Box 26	Enter the beneficiary's primary and secondary diagnoses or the CSHCS qualifying diagnosis (list both the code and description) necessitating the requested test.
Box 29	The definitive treatment or action plan should be specific to the beneficiary.
Box 30	List other insurance coverage available for services requested and additional remarks pertinent to the request.
Box 31	Must be completed for all requests.

Form Submission

This form and required documentation must be submitted electronically utilizing the CHAMPS Prior Authorization Request List page. Providers unable to submit electronically may submit the form and documentation via fax or mail to:

**MDHHS
Program Review Division
P.O. Box 30170, Lansing, Michigan 48909**

Fax Number: (517) 335-0075

Providers may check the status of an authorization request on the CHAMPS Prior Authorization Request List page or by contacting the MDHHS, Program Review Division via telephone at **1-800-622-0276**.

The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person's eligibility.

Michigan Department of Health and Human Services
Completion Instructions for MSA-181
Home Health Aide Prior Approval Request/Authorization

General Instructions

The MSA-181 must be used by Medicaid enrolled and home health agencies to request Prior Authorization (PA) for home health aide services. MDHHS requires that the MSA-181 be typewritten; handwritten forms will not be accepted. A Word fill-in enabled version of this form can be downloaded from the MDHHS website www.michigan.gov/medicaidproviders >> Policy, Letters & Forms >> Forms.

This form must be used to request Prior Authorization (PA) for home health aide services for beneficiaries with Medicaid. A request to begin services may be submitted by a person other than the home health agency such as the hospital Discharge Planner or physician. When this is the case, the person submitting the request must do so in consultation with the beneficiary (parent or guardian if applicable), and home health agency who will be assuming responsibility for the care of the beneficiary.

PA may be authorized for a period not to exceed ninety days. If need for home health aide services are medically necessary, a subsequent request for PA must be submitted. The provider should retain a copy of the PA form until the approval or denial is returned.

Refer to the Medicaid Provider Manual, Home Health Chapter, Prior Authorization Subsection, for the listing of required documentation to accompany each request.

Completion of this form is as follows:

Item#	Instructions
1	Prior Authorization Number. MDHHS use only.
2	The Home Health Agency Provider Name.
3	The Medicaid enrolled provider's name and National Provider Identifier (NPI).
4-9	The Home Health Agency provider's telephone number (including area code), address and fax number (including area code).
10	Initial: The authorization request is the initial prior authorization request for the beneficiary under this treatment plan. Continuing: The treatment authorization request is to continue treatment for additional calendar month(s) of service under this treatment plan.
11-19	Beneficiary information. Provide complete name, sex, mi health card number, date of birth, complete address (including city, state, and zip code), and phone number.
20-21	Enter the beneficiary's diagnosis(es) code(s) and onset date that relate to the service being requested.
22	The beneficiary's most recent hospital discharge date for the requesting prior authorization period.
23-25	Hospital information including complete address and phone number, anticipated discharge date, and name and contact information of Discharge Planner, if beneficiary is currently hospitalized.
26	The start date of the last approved authorization period.
27	The previous total number of home health aide visits rendered (since services were first started).
28	The date home health services were first started.
29	For this current request being submitted, indicate requested start and end dates, total quantity of procedure code G0156 (i.e. visits) requested, and the planned visit frequency during the requested authorization period.
30	Indicate if the current authorization request is an increase or decrease from previous authorization, or if a change is being requested for the currently approved authorization period.
31	List the beneficiary's current medications relevant to the medical diagnosis.
32	Documentation of the beneficiary's cognitive status.
33	Identify the beneficiary's ability to complete range of motion for upper and lower extremities.

34	<p>Evaluation includes OASIS coding of the beneficiary.</p> <p>OASIS Coding</p> <p>06 Independent – Patient completes the activity by him/herself with no assistance from a helper.</p> <p>05 Setup or clean-up assistance – Helper SETS UP or CLEANS UP; patient completes activity. Helper assists only prior to or following the activity.</p> <p>04 Supervision or touching assistance – Helper provides VERBAL CUES or TOUCHING/STEADYING assistance as patient completes activity. Assistance may be provided throughout the activity or intermittently.</p> <p>03 Partial/moderate assistance – Helper does LESS THAN HALF the effort. Helper lifts, holds or supports trunk or limbs, but provides less than half the effort.</p> <p>02 Substantial/maximal assistance – Helper does MORE THAN HALF the effort. Helper lifts or holds trunk or limbs and provides more than half the effort.</p> <p>01 Dependent – Helper does ALL the effort. Patient does none of the effort to complete the activity. Or, the assistance of 2 or more helpers is required for the patient to complete the activity.</p> <p>If activity was not attempted, code reason:</p> <p>07 Patient refused</p> <p>09 Not applicable</p> <p>88 Not attempted due to medical condition or safety concerns</p>
35	Indicate the service and frequency of the service for this authorization request.
36	Identify the medical need for additional services. Service request must be specific, include supportive documentation of the beneficiary's current level of function and the medical necessity of requested service(s).
37	List all other services in the home. Must include the frequency of the service(s) and payer(s). Failure to disclose all services in the home may result in recoupment of Medicaid dollars for home health aide reimbursement.
38	Signature certifies that Parent/Guardian of beneficiary attests that information provided on this form is accurate and complete to the best of their ability. All unsigned requests will be returned for signature.
39	The physician, nurse practitioner, clinical nurse specialist, or physician assistant's signature certifies that (1) the Home Health agency requesting the services understands the medical necessity for obtaining prior authorization for Home Health services and; (2) the information provided on this form is accurate and complete. All unsigned requests will be returned for signature.
40	The licensed supervising professional's signature certifies that (1) the licensed, registered nurse, physical therapist, occupational therapist, or speech/language therapist provides supervision of the home health aide; (2) the services are medically necessary for obtaining prior authorization for Home Health aide services and; (3) the information provided on this form is accurate and complete. All unsigned requests will be returned for signature.
41-42	MDHHS use only

RETURN COMPLETED FORM AND REQUIRED DOCUMENTATION TO:

MDHHS
Program Review Division
PO Box 30170
Lansing, MI 48909

OR

Fax to: 517-335-0075

Questions should be directed to MDHHS – Behavioral and Physical Health and Aging Services Administration, Program Review Division via telephone at **1-800-622-0276**.

Authority: Title XIX of the Social Security Act.	Completion: Is voluntary but is required if payment from applicable programs is sought.
The Michigan Department of Health and Human Services (MDHHS) does not discriminate against any individual or group on the basis of race, national origin, color, sex, disability, religion, age, height, weight, familial status, partisan considerations, or genetic information. Sex-based discrimination includes, but is not limited to, discrimination based on sexual orientation, gender identity, gender expression, sex characteristics, and pregnancy.

Michigan Department of Health and Human Services
HOME HELP AGENCY CAREGIVER ENROLLMENT AUTHORIZATION

This form must be used to document an agency caregiver's consent to be enrolled in the Community Health Automated Medicaid Processing System (CHAMPS). The form is needed only when the agency caregiver will be absent during the submission of their CHAMPS enrollment application.

To protect client safety, the agency caregiver must not provide Home Help services until their CHAMPS enrollment application has been approved and the agency caregiver has associated to the agency provider in CHAMPS. A failure to comply with these requirements may result in recoupment of payments for services the agency caregiver provides.

COMPLETION INSTRUCTIONS:

The agency caregiver has the sole authority to submit their CHAMPS enrollment application. If they choose to delegate that authority to the agency provider, the following steps are required:

- 1. The agency provider completes Section 1 of the form.**
- 2. The agency caregiver completes Sections 2 through 5 of the form and returns it to the agency provider.** The agency caregiver's signatures in Sections 3 and 5 must be handwritten. The agency provider must not enroll the agency caregiver in CHAMPS before this step is completed.
- 3. The agency provider creates a unique MILogin user ID and password for the agency caregiver and enters the agency caregiver's responses from Section 4 of the form into CHAMPS.** The agency provider must not use the MILogin user ID and password for any purpose other than to enroll the agency caregiver.
- 4. The agency provider enters the agency caregiver's MILogin user ID and password and CHAMPS provider ID into Section 6 of the form and gives a copy of the completed form to the agency caregiver.** The form should be returned promptly to the agency caregiver to ensure they have the information needed to manage their MILogin account and CHAMPS enrollment. If the agency caregiver's CHAMPS enrollment is not approved, the agency provider should still provide the agency caregiver with their MILogin user ID and password.
- 5. The agency provider retains the signed form in a secure environment for seven years after the agency caregiver's last date of service.** The form should only be submitted to MDHHS if requested by MDHHS staff. Failure to retain or provide MDHHS with the form during an investigation or audit may result in recoupment.

The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person's eligibility.

AUTHORITY:	Title XIX of the Social Security Act and Administrative Rule 400.1104(a)
COMPLETION:	Is voluntary, but is required if Medical Assistance program payment is desired.

HOME HELP AGENCY CAREGIVER ENROLLMENT AUTHORIZATION

Michigan Department of Health and Human Services

SECTION 1 – AGENCY PROVIDER INFORMATION

Agency Name	Provider ID Number
-------------	--------------------

SECTION 2 – AGENCY CAREGIVER INFORMATION

Name (First, Last)	Address (Number and Street, Apartment/Lot Number)		
City	State	Zip Code	Date of Birth
Home Telephone Area Code and Number		Cell Phone Area Code and Number	
Social Security Number		Email Address	

SECTION 3 – CONSENT TO BE ENROLLED IN CHAMPS

Home Help is a Medicaid-funded program. Only Medicaid-approved providers may work with Home Help clients. MDHHS uses CHAMPS to enroll and approve Medicaid providers. **You must be enrolled in CHAMPS as a Medicaid-approved provider before you work with Home Help clients.**

You will enter CHAMPS through the MILogin website. With MILogin, you only need one user ID and password to enter many State of Michigan websites.

You have chosen to have the agency provider in Section 1 of this form create your MILogin user ID and enroll you in CHAMPS. The agency provider may use your MILogin user ID to check on your CHAMPS enrollment application. The agency provider will give you your MILogin user ID. If your CHAMPS enrollment application is approved, the agency provider will also give you your CHAMPS Provider ID.

You will own your MILogin account and CHAMPS enrollment. As the owner, you will be responsible for any actions taken with your MILogin account and CHAMPS enrollment. You must not share your MILogin user ID and password and your CHAMPS Provider ID.

You should protect your MILogin account and CHAMPS enrollment by changing your MILogin password. If you need help changing your password, call Provider Support at 1-800-979-4662.

By signing below, I agree to have the agency provider create my MILogin user ID and enroll me in CHAMPS. I know the agency provider may need to use my MILogin user ID to check on my CHAMPS enrollment application. I know I am responsible for actions taken with my MILogin account and CHAMPS enrollment. Once I receive my MILogin user ID and password and my CHAMPS Provider ID, I agree not to share them. I know I am responsible for protecting this information by changing my MILogin password.

Agency Caregiver Signature	Date Signed
----------------------------	-------------

SECTION 4 – FINAL ADVERSE LEGAL ACTIONS/CONVICTIONS

1. Have you ever been convicted of a felony or misdemeanor crime? If yes, please explain.	<input type="checkbox"/> Yes <input type="checkbox"/> No
2. Have you ever been removed from or told you cannot participate in a state or federally funded program? If yes, please tell us what program and why.	<input type="checkbox"/> Yes <input type="checkbox"/> No

SECTION 5 – HOME HELP PROGRAM TERMS AND CONDITIONS

By signing below, I agree that I have read the following statements and agree to follow all federal, state and MDHHS rules.

1. I know I work for the agency provider. I am not employed by MDHHS or the State of Michigan.
2. I know MDHHS will use my CHAMPS enrollment to run criminal history screenings. The results of these screenings may prevent me from working as a Medicaid-approved provider. The results will be shared when needed with MDHHS staff, agency provider staff and Home Help clients.
3. I agree to keep my CHAMPS enrollment current. I will update my CHAMPS enrollment within 10 days of any change in my information. This includes but is not limited to a change in my address, phone number or email.
4. I agree to provide the services to the Home Help client that the agency provider assigns to me. I know the hours of services I provide to the Home Help client may not go over the total approved hours listed on the Home Help client's Time and Task.
5. I know I can only receive wages from the agency provider for the services I provide. I will not seek or accept payments from the Home Help client or any other source.

6. I agree to give the agency provider all records needed to show the services I provided to Home Help clients. I know that listing services I did not provide is fraud and could result in criminal charges.
7. I agree to cooperate with MDHHS and/or the agency provider on any audits, investigations or requests for information about Home Help services provided.
8. I know I must tell the agency provider if I am arrested or convicted of a crime.
9. I agree to let the agency provider know of any changes with the Home Help client. This includes but is not limited to the Home Help client being admitted to a hospital, staying in a nursing home or ending Home Help services.
10. I agree to follow the laws on the use and sharing of the Home Help client's protected health information (PHI). This includes the privacy rules in the Health Insurance Portability and Accountability Act of 1996 (HIPAA) and Public Acts 104-191 (45 CFR Parts 106 and 164, Subparts A, C, and E).
11. I agree to follow the rules for Medicaid providers in 42 CFR 431.107, Act No. 280 of the Public Acts of 1939 and the MDHHS Medicaid Provider Manual.

MILogin User ID	MILogin Password	CHAMPS Provider ID

Michigan Department of Health and Human Services
HOME HELP AGENCY INVOICE

Instructions for Completing the Home Help Agency Invoice

NOTE: Total time billed must not exceed the agency provider's approved Time and Task amount. Authorized payments will not include billed time in excess of the approved amount.

1. The agency provider completes the following sections of the Home Help Agency Invoice to document the provision of personal care services for each day in the month and year indicated.

A. BILLING INFORMATION

1. **AGENCY NAME:** Enter the complete name of the agency provider.
2. **AGENCY PROVIDER NUMBER:** Enter the CHAMPS ID number of the agency provider.
3. **AGENCY PHONE NUMBER:** Enter the phone number where the agency representative can be reached.
4. **CONTACT PERSON:** Enter the first and last name of the agency representative.
5. **BILLING PERIOD:** Enter the Billing Month and Year (MM/YYYY).
6. **DATE SUBMITTED:** Enter the date the invoice is submitted to the client's local county MDHHS office (MM/DD/YYYY).
7. **HOURLY RATE:** Enter the agency provider's MDHHS-approved hourly rate for the client.
8. **CLIENT NAME:** Enter the first and last name of the client.
9. **CLIENT MEDICAID ID NUMBER:** Enter the client's Medicaid Identification Number.
10. **BILL TO:** Enter the name of the client's local county MDHHS office.
11. **ATTENTION:** Enter the name of the client's adult services worker.

B. VERIFICATION OF SERVICES AND HOSPITAL/NURSING FACILITY STAYS

1. For each day of the billing month, check all the approved tasks completed.
2. If the client stayed in a hospital or nursing facility, check the day(s) the client was admitted, the day(s) the client stayed in the facility and the day(s) the client was discharged.
3. When Laundry is checked and was completed at a laundry facility, check Travel Time for Laundry. When Shopping is checked and required travel to one or more stores, check Travel Time for Shopping. **NOTE:** The frequency of travel must not exceed the agency provider's approved Time and Task amount.
4. Enter total hours and minutes of service provision in the Total Time for Services Above field.

C. VERIFICATION OF COMPLEX CARE TASKS: For each day of the billing month, check all the approved tasks completed. Enter total hours and minutes of service provision in the Total Time for Services Above field. **NOTE:** Complete only if complex care tasks were provided.

D. TOTAL TIME FOR BILLING PERIOD: Add together the times in the Total Time for Services Above and the Total Time from the Previous Page fields. Record the total time in hours and minutes. **NOTE:** Complete only if complex care tasks were provided.

E. SIGNATURE OF AUTHORIZED REPRESENTATIVE / DATE: Sign and date the invoice to certify provision of the approved tasks. **NOTE:** If complex care tasks were provided, sign and date both pages of the invoice.

2. The agency provider sends the completed Home Help Agency Invoice to the client's local county MDHHS office – Attention: Adult Services Unit. The invoice should not be submitted before the last day of the services billing period. The invoice must be submitted to the Adult Services Unit of the client's local county MDHHS office **no later than 365 days from the service date. Failure to submit the invoice within 365 days of the service date will result in non-payment.**

APPROVED PERSONAL CARE TASKS

NOTE: Approved time for items 1 through 13 is for hands-on care only.

1. **Eating/Feeding** – helping with use of utensils, cup/glass, getting food/drink to mouth, cutting up/manipulating food on plate, cleaning face and hands, as needed after a meal.
2. **Toileting** – helping on/off toilet, commode/bed pan, emptying commode/bed pan, managing clothing, wiping and cleaning body after toileting, cleaning ostomy and/or catheter tubes/receptacles, applying diapers and disposable pads; may include doing catheter, ostomy or bowel programs.
3. **Bathing** – helping with cleaning the body or parts of the body, shampooing hair, using tub or shower, sponge bathing, including getting a basin of water, managing faucets, soaping, rinsing and drying.
4. **Grooming** – helping to maintain personal hygiene and neat appearance, including hair combing, brushing, oral hygiene, shaving, fingernail and toe nail care (unless a physician advises not to do so).
5. **Dressing** – helping with putting on/taking off, fastening/unfastening garments/undergarments, special devices such as back/leg braces, corsets, artificial limbs or splints.
6. **Transferring** – helping to move from one position to another, such as from a bed to a wheelchair or sofa, to come to a standing position and/or repositioning to prevent skin breakdown.
7. **Mobility** – helping with walking or moving around inside the living area, changing locations in a room, moving from room to room or climbing stairs.
8. **Medication** – helping with administering prescribed or over-the-counter medication.
9. **Meal Preparation** – helping with planning menus, washing, peeling, slicing, opening packages, cans and bags, mixing ingredients, lifting pots/pans, reheating food, cooking, operating stove/microwave, setting the table, serving the meal, washing/drying dishes and putting them away.
10. **Shopping** – helping to compile a list identifying needed items, picking up items at the store, managing cart/baskets, transferring items to home and storing them away.
11. **Laundry** – helping by getting laundry to machines, sorting, handling soap containers, placing laundry into machines, operating machine controls, handling wet laundry, drying, folding and storing laundry.
12. **Light Housework** – helping with sweeping, vacuuming, washing floors, washing kitchen counters and sinks, cleaning the bathroom, changing bed linen, taking out trash, dusting and picking up, bringing in fuel for heating/cooking purposes if necessary.
13. **Complex Care tasks** – require special techniques/knowledge; may replace most or all 1-9 tasks when approved by specialist. Complex care tasks include bowel program, catheter or leg bags, colostomy care, eating or feeding assistance, peritoneal dialysis, range of motion exercises, specialized skin care, suctioning and wound care.

INSTRUCTIONS FOR ADULT SERVICES WORKER

1. When the invoice is returned, review for accuracy. If invoice is correct, authorize payment.
2. Resolve inaccuracies immediately. Once invoice is corrected, authorize payment.
3. Maintain the invoice in the client's case record.

The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person's eligibility.

AUTHORITY: Title XIX of the Social Security Act and Administrative rule 400.1104(a)
COMPLETION: Is Voluntary, but is required if Medical Assistance program payment is desired.

HOME HELP AGENCY PROVIDER EMPLOYMENT REQUIREMENTS

Michigan Department of Health and Human Services

The purpose of this form is to help agency applicants understand and comply with Home Help employment policies. The form contains a subset of the policies that an approved agency provider must follow. For a full list of Home Help policies, see the Home Help chapter in the Michigan Department of Health and Human Services (MDHHS) Medicaid Provider Manual.

Instructions for Completing this Form

SECTION 1: Enter the agency's full legal name and Employer Identification Number and the first and last name of the person completing the form. The form must be completed by an agency owner or managing employee. For definitions of these terms, see the Common Terms Section of the Home Help chapter in the MDHHS Medicaid Provider Manual.

SECTION 2: Review the policies and sign and date this section to affirm the agency's understanding of and agreement to comply with the policies. The signature must be handwritten. If the agency has questions about the policies, contact the MDHHS Home Help Policy Section at mdhhs-hhnewagencyproviderapplications@michigan.gov.

SECTION 3: Complete this section only if the agency currently employs at least two directly hired agency caregivers other than the agency owner who will provide Home Help services. All the agency's directly hired agency caregivers should be listed. Do not include the agency owner(s). If additional space is needed, submit a separate document listing the additional agency caregiver names and provider ID numbers (if available). ***If the agency does not employ a minimum of two directly hired agency caregivers, skip to Section 4.***

SECTION 4: ***Complete this section only if the agency is unable to complete Section 3.*** In the space provided, briefly summarize the agency's plan for recruiting and directly hiring at least two agency caregivers other than the agency owner.

SUBMISSION INSTRUCTIONS: The completed form should be emailed with agency application documents to mdhhs-hhnewagencyproviderapplications@michigan.gov.

DOCUMENT RETENTION REQUIREMENTS: Retain a copy of the completed form in a secure location for seven years after the signature date in Section 2 of the form.

HOME HELP AGENCY PROVIDER EMPLOYMENT REQUIREMENTS
Michigan Department of Health and Human Services

SECTION 1 – AGENCY APPLICANT INFORMATION

Agency Name	Employer Identification Number
Name of Agency Owner or Managing Employee Completing the Form	

SECTION 2 – ACKNOWLEDGEMENT OF AGENCY PROVIDER EMPLOYMENT POLICIES

By signing below, I affirm I understand and agree to ensure full agency compliance with the following agency provider employment policies:

- Agency caregivers who provide Home Help services must be enrolled in the Community Health Automated Medicaid Processing System (CHAMPS) as atypical individual providers and associated to the agency prior to providing Home Help services. The date of association must not be earlier than the date the criminal history check was completed.
- An agency caregiver who provides Home Help services must be present during the submission of their CHAMPS enrollment application or complete the MSA-204 Home Help Agency Caregiver Enrollment Authorization form prior to the agency provider enrolling them in CHAMPS.
- Agency employees who have access to client information for the purposes of billing, answering phone calls, or assisting with setting up services for the client must be listed in the agency provider's CHAMPS enrollment in "Step 9: Provider Controlling Interest/Ownership Details" prior to accessing the information.
- The agency provider must directly employ all agency caregivers and agency employees who work with Home Help clients. Agency caregivers and agency employees may not subcontract services to persons who are not directly employed by the agency provider. Medicaid will not reimburse an agency provider for services that were provided by a contracted agency caregiver.
- The agency provider must directly employ a minimum of two agency caregivers, not including the owner, who provide services through the Home Help program and regularly receive a monthly paycheck.
- The agency owner(s) must ensure all agency caregivers and agency employees who work with Home Help clients know and comply with Home Help policy.
- When MDHHS determines it paid for services provided by one or more agency caregivers and/or agency employees who were not in compliance with Home Help policy, MDHHS will recoup the overpayments from the agency provider.

Agency Owner or Managing Employee Signature	Date Signed

SECTION 3 – CURRENT AGENCY CAREGIVERS

Complete this section only if the agency currently employs at least two directly hired agency caregivers **other than the agency owner** who will provide Home Help services. If the agency does not meet this staffing level, skip to Section 4. See the instructions page for more guidance on completing this section.

Names of Directly Hired Agency Caregivers	Provider ID Numbers (If available)

SECTION 4 – AGENCY CAREGIVER RECRUITMENT PLAN

Complete this section only if the agency is unable to list directly hired agency caregivers in Section 3 of this form. See the instructions page for more guidance on completing this section.

The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person’s eligibility.

AUTHORITY: Title XIX of the Social Security Act and Administrative Rule 400.1104(a)
COMPLETION: Is voluntary, but is required if Medical Assistance program payment is desired.

Michigan Department of Health and Human Services
HOME HELP BILLING FOR HOSPITAL ADMISSION DATE

A Home Help provider may be paid for services on the day the Home Help client was admitted to a hospital if:

- The services were provided on or after February 1, 2023.
- The services were provided before the time the Home Help client was admitted to the hospital.
- The services were provided in the Home Help client's home or workplace. **NOTE:** Laundry and shopping authorized to be done outside the Home Help client's home may be eligible for payment if completed before the time the Home Help client was admitted to the hospital.
- The Home Help client has active Medicaid.
- The provider logs the tasks they provided on the service verification. Individual caregivers must log the tasks on the Electronic Service Verification (ESV) or Paper Service Verification (PSV). Agency providers must log the tasks on the MSA-1904 Home Help Agency Invoice.
- The provider fills out, signs and dates this form and sends it to the Home Help client's adult services worker or local MDHHS office within 365 days of the date of service.

How to Complete and Submit this Form

SECTION 1: Fill in the Home Help client's first and last name. Fill in the Home Help client's Medicaid identification (ID) number if available.

SECTION 2: Fill in the Home Help provider's information. An individual caregiver fills in their first and last name and provider ID number. A Home Help agency provider fills in:

- The name of the agency.
- The agency's provider ID number.
- The first and last name of the agency caregiver who provided services to the Home Help client on the hospital admission date.
- The agency caregiver's provider ID number.

SECTION 3: Fill in the date and time the services were provided, including:

- The date the Home Help client was admitted to the hospital.
- The time Home Help services began and the time Home Help services ended. Times must be recorded in an hh:mm format. "AM" or "PM" must be checked.

SECTION 4: This section must only be signed by an individual caregiver employed by the Home Help client or an authorized Home Help agency representative. An authorized Home Help agency representative is a person who is authorized to act on behalf of the agency owner. The signature must be handwritten.

The Michigan Department of Health and Human Services (MDHHS) does not discriminate against any individual or group on the basis of race, national origin, color, sex, disability, religion, age, height, weight, familial status, partisan considerations, or genetic information. Sex-based discrimination includes, but is not limited to, discrimination based on sexual orientation, gender identity, gender expression, sex characteristics, and pregnancy.

AUTHORITY: Title XIX of the Social Security Act and Administrative rule 400.1104(a)
COMPLETION: Is Voluntary, but is required if Medical Assistance program payment is desired.

HOSPITAL NEWBORN NOTICE

INSTRUCTIONS

The MSA-2565-C serves as notice of birth of a newborn for the purposes of obtaining a Medicaid ID number. It must be completed only if the hospital is unable to submit notice of the birth through the Michigan Electronic Birth Certificate system.

- The hospital must retain **THE ORIGINAL** of the Hospital Newborn Notice in the beneficiary's file. A copy **MUST** be sent to the local MDHHS office.
- A copy of the MSA-2565-C will be returned to the hospital, noting the eligibility status of the newborn.
- Item 6 must state the name of the mother.
- A copy of the CHAMPS Eligibility Inquiry or HIPAA 271 transaction response with the mother's Benefit Plan ID information should be attached to the form; or the form must contain the county, district, unit, worker, and case number data from the eligibility response separated by slashes (e.g., 33/01/01/08/1234567890).

The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person's eligibility.

AUTHORITY: P.A. 280 of 1939 and Federal 42 CFR of 435
Title XIX of the Social Security Act

LIVE-IN CAREGIVER ATTESTATION
Michigan Department of Health and Human Services

Live-in caregivers employed by beneficiaries or agency providers are exempt from using Electronic Visit Verification (EVV). Exemptions must be approved by MDHHS or an Approving Entity. An "Approving Entity" is designated by MDHHS but is not an agency provider. The following criteria must be met for the caregiver to qualify for the EVV live-in caregiver exemption:

- The caregiver must live in the same home as the beneficiary; and
- The home must be the caregiver's permanent and primary residence.

Live-in caregivers who do not meet the above criteria must use EVV to document personal care services.

INSTRUCTIONS

1. Use **two** of the following proofs of residency to verify the caregiver and beneficiary live at the same permanent, primary residence. Documents must include the live-in caregiver's name and current home address. Electronic copies are acceptable. For annual renewals if the caregiver and beneficiary reside in the same address, these proofs of residency are not required.

- Valid Michigan driver's license
- Valid Michigan state identification
- Utility bill or credit card bill issued within the last 90 days
- Account statement from a bank or other financial institution issued within the last 90 days
- Mortgage, lease or rental agreement (Lease and rental agreements must include the landlord's telephone number)
- Pay stub or earnings statement issued within the last 90 days
- Life, health, auto or home insurance policy
- Michigan title and registration
- Federal, state or local government documents, such as receipts, licenses or assessments

2. Complete this form using the following instructions.

SECTION 1: Fill in the caregiver's first and last name, email address, phone number, CHAMPS Provider ID Number, if applicable, and home address. The address must be the caregiver's current, primary and permanent address.

SECTION 2: Fill in the beneficiary's first and last name, Medicaid ID number and home address. Check the box of the program of which the beneficiary is enrolled in and receives services. The address must be the beneficiary's current, primary and permanent address.

SECTION 3: The caregiver must provide a handwritten signature and the date of signature. The MDHHS or Approving Entity representative must review the form and attached documentation, sign and date the attestation form and check "Approved" or "Denied" with a reason for denial, if applicable.

HOW TO SUBMIT THIS FORM: Complete this form and submit it along with the documents to your program's Approving Entity or MDHHS representative. This form can be submitted in person, by email, mail, or fax. Contact your beneficiary's adult services worker, supports/care coordinator, or case manager for assistance turning this form in.

HOW TO RETAIN THIS FORM: Keep a copy of the completed form in a secure place for seven years after the approved signature date in Section 3 of the form. The MDHHS or Approving Entity representative must comply with the privacy, security, and confidentiality provisions of all applicable laws governing the use and disclosure of protected health information (PHI).

LIVE-IN CAREGIVER ATTESTATION
Michigan Department of Health and Human Services

*This Attestation must be completed annually to renew live-in caregiver status

**MEDICAID ENROLLED BIRTHING HOSPITAL AGREEMENT FOR
ELECTIVE, NON-MEDICALLY INDICATED DELIVERY PRIOR TO 39 WEEKS COMPLETED GESTATION**

Instructions for MSA-1755

The Medicaid Enrolled Birthing Hospital Agreement for Elective, Non-Medically Indicated Delivery Prior to 39 Weeks Completed Gestation form (MSA-1755) is to be completed by all Medicaid enrolled birthing hospitals in the State of Michigan.

The purpose of this form is to serve as an attestation that each Medicaid enrolled birthing hospital utilizes evidence-based guidelines (EBGs) to address elective, non-medically indicated delivery prior to 39 weeks completed gestation for Medicaid beneficiaries.

To complete the form, hospitals must indicate whether they have elective delivery EBGs in place. If the hospital utilizes guidelines that are not listed on the form, hospitals may use the space provided on the form to explain. Hospitals may also submit copies of their elective delivery policies.

The form must be signed by both the Chief Executive Officer (CEO) and the Chief Medical Officer (CMO) of the facility.

The completed MSA-1755 must be mailed or emailed to:

Attn: Inpatient Hospital Policy
Michigan Department of Health and Human Services
Behavioral and Physical Health and Aging Services Administration, Program Policy Division
PO Box 30479
Lansing, Michigan 48909-7979
ProviderSupport@michigan.gov

Questions should be directed to Provider Support at ProviderSupport@michigan.gov.

AUTHORITY:	Title XIX of the Social Security Act	Michigan Department of Health and Human Services is an equal opportunity employer, services and programs provider.
COMPLETION:	Is Required.	
The Michigan Department of Health and Human Services (MDHHS) does not discriminate against any individual or group on the basis of race or national origin, color, sex, disability, religion, age, height, weight, familial status, partisan considerations, or genetic information. Sex-based discrimination includes, but is not limited to, discrimination based on sexual orientation, gender identity, gender expression, sex characteristics, and pregnancy.		

**MEDICAID ENROLLED BIRTHING HOSPITAL AGREEMENT FOR
ELECTIVE, NON-MEDICALLY INDICATED DELIVERY PRIOR TO 39 WEEKS COMPLETED GESTATION**

The purpose of this agreement is to certify that Medicaid enrolled birthing hospitals utilize evidence-based guidelines (EBGs) to address elective, non-medically indicated delivery prior to 39 weeks completed gestation for Medicaid beneficiaries.

NOTE: This agreement must be signed by both the Chief Executive Officer (CEO) and the Chief Medical Officer (CMO) of the facility.

Complete the following:

Hospital Name

National Provider
Identifier

attests that the following elective delivery EBGs are utilized:

Yes No (Indicate Yes or No for each statement)

- | | | |
|--------------------------|--------------------------|---|
| <input type="checkbox"/> | <input type="checkbox"/> | Medical indications for elective, non-medically indicated delivery prior to 39 weeks completed gestation are defined in hospital policy. |
| <input type="checkbox"/> | <input type="checkbox"/> | Hospital staff is not authorized to schedule an elective, non-medically indicated delivery prior to 39 weeks completed gestation. |
| <input type="checkbox"/> | <input type="checkbox"/> | Providers are required to obtain permission from physician leadership (e.g., the head of the obstetrics department) before performing an elective, non-medically indicated delivery prior to 39 weeks completed gestation. |
| <input type="checkbox"/> | <input type="checkbox"/> | Provider education materials are used to educate providers on the risks of elective, non-medically indicated delivery prior to 39 weeks completed gestation. |
| <input type="checkbox"/> | <input type="checkbox"/> | Patient education materials are used to educate patients on the risks of elective, non-medically indicated delivery prior to 39 weeks completed gestation. |
| <input type="checkbox"/> | <input type="checkbox"/> | Hospital involvement in an initiative that addresses elective, non-medically indicated delivery prior to 39 weeks completed gestation (e.g., Michigan Health & Hospital Association [MHA] Keystone Center's initiative in obstetrics, Trinity Health System's Perinatal Patient Safety Initiative [PPSI], Ascension Health System's Handling All Neonatal Deliveries Safely [HANDS]). |
| <input type="checkbox"/> | <input type="checkbox"/> | Other. Explain in the space provided below. If more space is needed, attach explanation on a separate document. |

Along with this completed agreement, MDHHS will also accept a copy of each facility's elective delivery policy.

I certify that the responses in this attestation agreement are accurate, complete and current as of the date signed.

CSHCS MEDICAL ELIGIBILITY REPORT

Instructions for Form MSA-4114

Purpose:

This form is used to determine if an individual is medically eligible for the Children's Special Health Care Services (CSHCS) program. The condition must require the services of a medical and/or surgical sub-specialist at least annually, as opposed to being managed exclusively by a primary care physician. A current list of covered diagnoses is maintained on the MDHHS website at www.michigan.gov/mdhhs. In addition, some diagnoses must meet severity or chronicity criteria (e.g. asthma).

This form should be completed for the following persons:

- Anyone **UNDER 21** years of age with a potentially eligible condition. Psychiatric, emotional and behavioral disorders, attention deficit disorder, developmental delay, intellectual disability, autism, or other mental health diagnoses are **not** conditions covered by the CSHCS program.
- Anyone, regardless of age, with cystic fibrosis or hereditary coagulation defects commonly known as hemophilia.

Completion Instructions:

- Read this instruction page thoroughly. Then separate attached forms.
- **TYPE** or **PRINT** clearly in INK.
- The **Physician's Signature** (or the Attending Physician if a Hospital) and the **Date Signed** are **REQUIRED**.
- Attach supporting medical documentation.
- If desired, make a photocopy for your records.
- **FAX** the completed form to **the CSHCS Division at 517-335-9491**.

Other Information:

- If this request is approved, the client is medically eligible for the CSHCS program.
- For actual program coverage, the client or the client's family **MUST APPLY** to join the CSHCS program by completing form **MSA-0737, APPLICATION FOR CHILDREN'S SPECIAL HEALTH CARE SERVICES**.
- If the family does **NOT** receive an application after notification of approval, call **1-800-359-3722**.

The Michigan Department of Health and Human Services (MDHHS) does not discriminate against any individual or group on the basis of race, national origin, color, sex, disability, religion, age, height, weight, familial status, partisan considerations, or genetic information. Sex-based discrimination includes, but is not limited to, discrimination based on sexual orientation, gender identity, gender expression, sex characteristics, and pregnancy.

AUTHORITY: Title V of the Social Security Act

COMPLETION: Completion is voluntary but is required if coverage under the Children’s Special Health Care Services program is desired.

Further, MDHHS:

- Provides free aids and services to people with disabilities to communicate with us, such as:
 - Qualified sign language interpreters
 - Written information in other formats (large print, audio, accessible electronic formats, other formats); and
- Provides free language services to people whose primary language is not English, such as:
 - Qualified interpreters
 - Information written in other languages.

If you need these services, contact the Section 1557 Coordinator. The contact information is found below.

If you believe that MDHHS has not provided the above services, or discriminated in another way, you can file a grievance with the Section 1557 Coordinator. You can file a grievance by mail, fax, or email. If you need help filing a grievance, the Section 1557 Coordinator is available to help you.

**DCH-3878, MENTAL ILLNESS/INTELLECTUAL/DEVELOPMENTAL
DISABILITY/RELATED CONDITION EXEMPTION CRITERIA CERTIFICATION**

(For Use in Claiming Exemption Only)

Michigan Department of Health and Human Services

Level II Screening

(Revised 3-22)

SECTION 1 - INSTRUCTIONS

- Must be completed, signed, and dated by a nurse practitioner, physician's assistant, or physician.
- The patient being screened shall require a comprehensive LEVEL II evaluation UNLESS any of the exemption criteria below is met and certified by a physician's assistant, nurse practitioner or physician. Indicate which exemption applies.

SECTION 2 – GENERAL INFORMATION

Patient Name	Date of Birth
--------------	---------------

Name of Referring Agency	Referring Agency Telephone Number
--------------------------	-----------------------------------

Referring Agency Address (Number, Street, Building, Suite Number, etc.)

City	State	Zip Code
------	-------	----------

SECTION 3 – EXEMPTION CRITERIA

☐ **COMA**

Yes, I certify the patient under consideration is in a coma/persistent vegetative state.

☐ **DEMENTIA**

Yes, I certify the patient under consideration has dementia as established by clinical examination and evidence of meeting ALL 5 criteria below.

Yes, I certify the patient under consideration does not have another primary psychiatric diagnosis of a serious mental illness.

Yes, I certify the patient under consideration does not have an intellectual disability, developmental disability, or a related condition.

Specify the type of dementia

1. Has demonstrable evidence of impairment in short-term or long-term memory as indicated by the inability to learn new information or remember three objects after five minutes, and the inability to remember past personal information or facts of common knowledge.
2. Exhibits at least one of the following:
 - Impairment of abstract thinking, as indicated by the inability to find similarities and differences between related words; has difficulty defining words, concepts, and similar tasks.
 - Impaired judgment, as indicated by inability to make reasonable plans to deal with interpersonal, family, and job-related issues.
 - Other disturbances of higher cortical function, i.e., aphasia, apraxia, and constructional difficulty.
 - Personality change: altered or accentuated premorbid traits.

3. Disturbances in items 1 or 2 above significantly interfere with work, usual activities, or relationships with others.
4. The disturbance has NOT occurred exclusively during the course of delirium.
5. **EITHER**
 - a. Medical history, physical exam and/or lab tests show evidence of a specific organic factor judged to be etiologically related to the disturbance, **OR**
 - b. An etiologic organic factor is presumed in the absence of such evidence if the disturbance cannot be accounted for by any non-organic mental disorder.

☐ **HOSPITAL EXEMPTED DISCHARGE**

Yes, I certify that the patient under consideration:

1. is being admitted after an inpatient medical hospital stay, AND
2. requires nursing facility services for the condition for which he/she received hospital care, AND
3. is likely to require less than 30 days of nursing services.

Physician/Physician Assistant/Nurse Practitioner Signature and Credentials Date

Name (Typed or Printed)

Telephone Number

The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person's eligibility.

AUTHORITY: Title XIX of the Social Security Act

COMPLETION: Is voluntary, however, if NOT completed, Medicaid will not reimburse the nursing facility.

COPY DISTRIBUTION:

ORIGINAL- Nursing Facility retains in patient file

COPY - Attach to form DCH-3877 and send to Local Community Mental Health Services Program (CMHSP)

COPY - Patient Copy or Legal Representative

INSTRUCTIONS FOR COMPLETING LEVEL II SCREENING

The **DCH-3878** is to be used ONLY when the individual identified on a **DCH-3877, Preadmission Screening (PAS)/Annual Resident Review (ARR)** as needing a LEVEL II evaluation meets one of the specified exemptions from LEVEL II screening. If the individual under consideration meets one of the following exemptions, he/she may be admitted or retained at a nursing facility without additional evaluation. However, a completed copy of the DCH-3878 must be attached to the **DCH-3877** and sent to the local Community Mental Health Services Program (CMHSP).

Must be completed, signed, and dated by a nurse practitioner, physician's assistant, or physician.

Complete the following information to match the **DCH-3877**: Patient Name, DOB, and Referring Agency (including agency address and telephone number).

Use an "X" to indicate which exemption applies to the individual under consideration.

DEMENTIA:

- Review the 5 criteria listed under the dementia exemption category. Do NOT check this exemption unless the individual meets all 5 criteria. Any individual who meets some, but not all 5 criteria will be subject to a LEVEL II evaluation. If the individual under consideration meets this exemption category, specify the type of dementia.
- Do not mark the Dementia Exemption if there is a primary diagnosis of a serious mental illness. Do not mark Dementia Exemption if there is a diagnosis of intellectual disability, developmental disability, or a related condition.

Dementia diagnoses include the following:

1. Dementia of the Alzheimer's Type
2. Vascular Dementia
3. Dementia due to Other General Medical Conditions
4. Substance - Induced Persisting Dementia
5. Dementia Not Otherwise Specified
6. Lewy Body Dementia

Michigan Recuperative Care Provider Attestation Form

Michigan Department of Health and Human Services

Provider Information

Provider Name		Provider National Provider Identifier (NPI) Number	
Service Location Address	City	State	Zip Code

Contact Name
Office Phone Number
Office Fax Number

Recuperative care is a transitional program for eligible Medicaid beneficiaries who are experiencing homelessness and are too ill or frail to return to their living environment, but are not ill enough to continue to need hospital-level care or skilled nursing care. Recuperative care is a short-term program that allows these beneficiaries to recover post-hospitalization, receive case management services, room and board, access medical care or other Medicaid services, and supportive services.

The recuperative care provider must meet all the following to enroll, participate and bill Michigan Medicaid for recuperative care services.

I attest that our setting meets the following criteria to administer a recuperative care program in the State of Michigan.

Initials (do not use Xs or checkmarks) are required.

Our setting has the following:

- _____ Meets the National Institute for Medical Respite Care (NIMRC) standards for medical respite care programs (<https://nimrc.org/standards-for-medical-respite-programs/>).
- _____ Private or semi-private rooms for beneficiaries.
- _____ Allow 24-hour access to rooms.
- _____ Clean linens for each beneficiary upon admission.
- _____ At least three meals per day provided.
- _____ Secure place to store personal belongings.
- _____ Secure medication storage accessible by the beneficiary.
- _____ Appropriate storage for all durable medical equipment.

Michigan Recuperative Care Provider Attestation Form

Michigan Department of Health and Human Services

- _____ On-site access to laundry and shower facilities.
- _____ 24-hour access to staff, and staff on-site that are minimally trained in first aid and basic life support on-site always.
- _____ Written policies to allow beneficiary visitors to enter the facility/room.
- _____ Written policies and procedures for life-threatening emergencies.
- _____ A facility that is compliant with local and state fire safety standards.
- _____ A facility that is compliant with federal Americans with Disabilities Act (ADA) requirements and that meets the individual beneficiary's functional needs.
- _____ I attest that we will have the appropriate providers available based on the member's plan of care (POC). These will include one or more of the following: registered nurse, licensed practical nurse, case manager, mental health counselor, social worker, or community health worker.

An administrator, manager, director, or other person authorized to sign must initial each applicable statement. Write the name and title of the person signing this attestation statement. This person must be disclosed to MDHHS on the Disclosure of Ownership and Control Interest of an Entity or in the Owners and Authorized Persons section of the Michigan Provider Screening and Enrollment application.

I attest to the accuracy of all information on this form.

Check if signing electronically:

☐ I am signing this form electronically. My name as typed in the signature field is my legally binding signature. I understand that my electronic signature has the same legal effect and can be enforced in the same way as a handwritten signature.

Authorized Officer Name (Print or Type)	Authorized Officer Title
Authorized Officer Signature	Date
AUTHORITY: Title XIX of the Social Security Act COMPLETION: Is Voluntary but is required if payment from applicable program is sought.	
The Michigan Department of Health and Human Services (MDHHS) does not discriminate against any individual or group on the basis of race, national origin, color, sex, disability, religion, age, height, weight, familial status, partisan considerations, or genetic information. Sex-based discrimination includes, but is not limited to, discrimination based on sexual orientation, gender identity, gender expression, sex characteristics, and pregnancy.	

Evaluation and Medical Justification for Complex Seating Systems and Mobility Devices Completion Instructions

This form should be completed for **NEW** or **REPLACEMENT** mobility device(s) and seating systems. It must be submitted with the **Complex Seating and Mobility Device Prior Approval - Request/Authorization (MSA-1653-D)**. The evaluation and justification must be submitted within **90 days** of the date the evaluation was completed.

The appropriate Addendum(s) must accompany the **MSA-1656 & MSA-1653-D**.

BENEFICIARY INFORMATION: Complete beneficiary name, date of birth, sex, **mihealth** number, ordering physician and physician specialty. The beneficiary name and **mihealth** number must be entered at the top of each subsequent page.

SECTIONS 1 THROUGH SECTION 11 MUST BE COMPLETED BY A LICENSED/CERTIFIED MEDICAL PROFESSIONAL.

NOTE: A licensed/certified medical professional means an occupational or physical therapist, a physiatrist or rehabilitation RN who has at least two years' experience in rehabilitation seating; and is not an employee of, or affiliated in any way with, the Medical Supplier with the exception of hospitals with integrated delivery models that include the supplier of the equipment and the provider of the clinical evaluation. A PTA or OTA may not evaluate for, complete or sign this document.

SECTION	INSTRUCTIONS																																																	
1	Indicate the beneficiary name, mihealth number, ordering/referring physician name, specialty and National Provider Identifier (NPI).																																																	
2	Medical history is used to gather information in regards to the beneficiary's physical status and progression of disease. Estimate weight if unable to weigh at time of evaluation. The acronym "WFL" means "within functional limits."																																																	
3	Home Environment questions reflect the current setting in which the beneficiary lives.																																																	
4	Community Activities of Daily Living (ADL) reflects the beneficiary's transportation situation to the community and/or school, if applicable. Indicate if the mobility equipment fits into the vehicle and if the family can lift the mobility equipment into a vehicle.																																																	
5	This information reflects the need for pressure relief. If the beneficiary has current decubiti, the evaluator should indicate the stage as defined by the National Pressure Ulcer Advisory Panel (NPUAP) at www.npuap.org .																																																	
6	Mandatory for all requests. Describes the beneficiary's ADL functional ability without mobility devices. The acronym "UE" means "upper extremity." Answer the items regarding visual perception, problem solving and comprehension only if requesting a power mobility item.																																																	
7	<p>Evaluation includes measurements of the beneficiary. Relevant measures include adjustments for clothing. Complete the Manual Muscle Test (MMT) for hand only if requesting a power mobility item. This measurement should be of the appropriate hand/digits that will be used to operate specialty controllers.</p> <table><tr><th colspan="2">Modified Ashworth Scale</th><th colspan="5">Manual Muscle Evaluation</th></tr><tr><td>0</td><td>No increase in muscle tone</td><td>100%</td><td>5</td><td>N</td><td>Normal</td><td>Complete ROM against gravity with full resistance</td></tr><tr><td>1</td><td>Slight increase in muscle tone, manifested by a catch and release or by minimal resistance at the end of the range of motion when the attached part is moved in flexion or extension</td><td>75%</td><td>4</td><td>G</td><td>Good</td><td>Complete ROM against gravity with some resistance</td></tr><tr><td>1+</td><td>Slight increase in muscle tone, manifested by a catch, followed by minimal resistance throughout the remainder (less than half) of the ROM</td><td>50%</td><td>3</td><td>F</td><td>Fair</td><td>Complete ROM against gravity</td></tr><tr><td>2</td><td>More marked increase in muscle tone through most of the ROM, but affected part easily moved</td><td>25%</td><td>2</td><td>P</td><td>Poor</td><td>Complete ROM with gravity eliminated</td></tr><tr><td>3</td><td>Considerable increase in muscle tone, passive movement difficult</td><td>10%</td><td>1</td><td>T</td><td>Trace</td><td>Evidence of contractibility but no joint motion</td></tr><tr><td>4</td><td>Affected part rigid in flexion or extension</td><td>0%</td><td>0</td><td>O</td><td>Zero</td><td>No evidence of contractility</td></tr></table> <p>C = Complete; IC = Incomplete; * = Pain</p> <p>H = Hypotonia O = Observation</p>	Modified Ashworth Scale		Manual Muscle Evaluation					0	No increase in muscle tone	100%	5	N	Normal	Complete ROM against gravity with full resistance	1	Slight increase in muscle tone, manifested by a catch and release or by minimal resistance at the end of the range of motion when the attached part is moved in flexion or extension	75%	4	G	Good	Complete ROM against gravity with some resistance	1+	Slight increase in muscle tone, manifested by a catch, followed by minimal resistance throughout the remainder (less than half) of the ROM	50%	3	F	Fair	Complete ROM against gravity	2	More marked increase in muscle tone through most of the ROM, but affected part easily moved	25%	2	P	Poor	Complete ROM with gravity eliminated	3	Considerable increase in muscle tone, passive movement difficult	10%	1	T	Trace	Evidence of contractibility but no joint motion	4	Affected part rigid in flexion or extension	0%	0	O	Zero	No evidence of contractility
Modified Ashworth Scale		Manual Muscle Evaluation																																																
0	No increase in muscle tone	100%	5	N	Normal	Complete ROM against gravity with full resistance																																												
1	Slight increase in muscle tone, manifested by a catch and release or by minimal resistance at the end of the range of motion when the attached part is moved in flexion or extension	75%	4	G	Good	Complete ROM against gravity with some resistance																																												
1+	Slight increase in muscle tone, manifested by a catch, followed by minimal resistance throughout the remainder (less than half) of the ROM	50%	3	F	Fair	Complete ROM against gravity																																												
2	More marked increase in muscle tone through most of the ROM, but affected part easily moved	25%	2	P	Poor	Complete ROM with gravity eliminated																																												
3	Considerable increase in muscle tone, passive movement difficult	10%	1	T	Trace	Evidence of contractibility but no joint motion																																												
4	Affected part rigid in flexion or extension	0%	0	O	Zero	No evidence of contractility																																												

SECTION	INSTRUCTIONS	
	If evaluator is not able to test beneficiary due to cognition, age, etc., then information for MMT can be based on observation (not on self-report).	
8	Check all items that apply for mobility goals. Section is to be used if evaluator has any other comments to establish medical need, functional goals, etc.	
9	Evaluator should list all equipment the beneficiary currently owns or uses. Include brand, model, serial number, description and date of purchase/rental.	
10	To be completed if beneficiary is in a nursing facility. This section should be completed and signed by the Director of Nursing, Facility Administrator or Ordering/referring Physician. This page must accompany the MSA-1653-D and appropriate Addendum(s) when submitting to the MDHHS Program Review Division.	
11	To be completed by the evaluator and, if applicable, all team members involved in the evaluation. Enter date of evaluation, evaluator's name, title, telephone number, place of employment and address. If team evaluation, in Section 11, list all participants and titles (attach additional pages if necessary). The attestation page must accompany the MSA-1653-D and appropriate Addendum(s) when submitting to the Michigan Department of Health and Human Services (MDHHS) Program Review Division.	
Notes	The applicable addendums must accompany the MSA-1656 & MSA-1653-D when requesting the authorization. Failure to include the appropriate addendum(s) may cause a delay in the authorization process.	
	Addendum A: To be completed when requesting new or replacement manual wheelchairs with accessories, power mobility devices, and/or seating systems.	Addendum B: To be completed when requesting new or replacement strollers, standers, gait trainers and children's positioning chairs.
	Note: For beneficiaries residing in a nursing facility, return the completed MSA-1656, addendum(s) and MSA-1653-D to the requesting nursing facility. For beneficiaries in the community, the MSA-1656, addendum(s) and MSA-1653-D are forwarded to the ordering physician for their review.	

SUBMIT TO:

**Michigan Department of Health and Human Services
Program Review Division

Lansing, Michigan 48909**

Fax: (517) 335-0075

MICHIGAN DEPARTMENT OF HEALTH AND HUMAN SERVICES

Evaluation and Medical Justification for Complex Seating Systems and Mobility Devices

This form must be completed by physical therapist, occupational therapist, physiatrist, or rehabilitation registered nurse. Incomplete information will result in the form being returned to the evaluator for completion.

SECTION 1: BENEFICIARY INFORMATION

Beneficiary Name: _____	mihealth Number: _____
Ordering/Referring Physician: _____	NPI: _____
Physician Specialty: _____	

SECTION 2: MEDICAL HISTORY

Primary Diagnosis: _____		Secondary Diagnosis: _____	
Onset date: _____		Onset date: _____	
If spinal cord injury or spina bifida indicate the level of injury/impairment: _____			
Relevant past and future surgeries: _____			
Bowel Mgmt: <input type="checkbox"/> Continent <input type="checkbox"/> Incontinent <input type="checkbox"/> Colostomy (Indicate type): _____			
Bladder Mgmt: <input type="checkbox"/> Continent <input type="checkbox"/> Incontinent <input type="checkbox"/> Catheter (Indicate type): _____			
Cardio Status: <input type="checkbox"/> WFL <input type="checkbox"/> Impaired	Neuro Status: Seizures <input type="checkbox"/> YES <input type="checkbox"/> NO If YES, Frequency/Duration: _____ / _____		Respiratory Status: <input type="checkbox"/> WFL <input type="checkbox"/> Impaired
Baclofen pump present? <input type="checkbox"/> YES <input type="checkbox"/> NO If YES, date Implanted: _____		Sip 'N Puff controller requested? <input type="checkbox"/> YES <input type="checkbox"/> NO	
Botox? <input type="checkbox"/> YES <input type="checkbox"/> NO If YES, date of last injection: _____		If YES, additional information maybe be required: _____	
Other explain: _____			
Height: _____	Weight: _____	Explain recent changes or trends in weight: _____	
List medication(s) currently prescribed: _____			
How does the management or severity of the above conditions/impairments affect the need for the equipment requested? _____			

SECTION 3: HOME ENVIRONMENT

Beneficiary resides in: <input type="checkbox"/> House <input type="checkbox"/> Condo/town home <input type="checkbox"/> Apartment <input type="checkbox"/> Assisted Living /AFC/Group Home <input type="checkbox"/> Nursing Facility
Does beneficiary live alone? <input type="checkbox"/> YES <input type="checkbox"/> NO If NO, does beneficiary have a caregiver? <input type="checkbox"/> YES <input type="checkbox"/> NO
If YES, who provides the care? <input type="checkbox"/> Family member <input type="checkbox"/> RN <input type="checkbox"/> LPN <input type="checkbox"/> Other (explain) _____
How many hours per day are provided by the caregiver? _____

SECTION 4: COMMUNITY ADL (Transportation)

What is the beneficiary's mode of transportation? (Check all that apply.) <input type="checkbox"/> Car <input type="checkbox"/> Van/SUV <input type="checkbox"/> Van w/ Lift <input type="checkbox"/> Truck <input type="checkbox"/> Taxi Cab <input type="checkbox"/> Bus <input type="checkbox"/> School Bus <input type="checkbox"/> Ambulance <input type="checkbox"/> Other _____
Does the beneficiary attend school or work? <input type="checkbox"/> YES <input type="checkbox"/> NO
Is the beneficiary transported in the current or requested wheelchair? <input type="checkbox"/> YES <input type="checkbox"/> NO If NO, explain why the beneficiary cannot be transported in the current or requested chair? Explain: _____

SECTION 5: SENSATION AND SKIN ISSUES

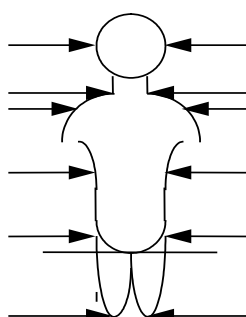

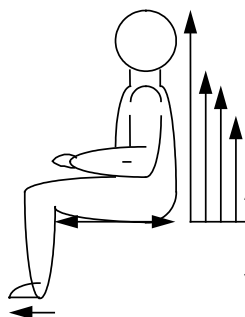

Sensation <input type="checkbox"/> Intact <input type="checkbox"/> Impaired <input type="checkbox"/> Absent <input type="checkbox"/> Hypersensitive	Pressure Relief <input type="checkbox"/> Dependent <input type="checkbox"/> Independent <input type="checkbox"/> Type of assistance needed How does the beneficiary perform pressure relief? _____	
Does beneficiary have a history of skin decubiti and/or flap surgery? <input type="checkbox"/> YES <input type="checkbox"/> NO If YES, indicate location: _____	Does beneficiary have a current decubiti? <input type="checkbox"/> YES <input type="checkbox"/> NO If YES, describe: _____	Does beneficiary have other skin issues? <input type="checkbox"/> YES <input type="checkbox"/> NO If YES, describe: _____

SECTION 6: MOBILITY ASSESSMENT *(Mandatory for all requests)*

Functional Ability Without Mobility Device(s)		
Sitting: <div style="display: flex; justify-content: space-between;"> <div> WFL <input type="checkbox"/> Uses UE for balance <input type="checkbox"/> Contact guard assist <input type="checkbox"/> Standby assist <input type="checkbox"/> Minimum assist <input type="checkbox"/> Moderate assist <input type="checkbox"/> Maximum assist <input type="checkbox"/> Dependent/unable <input type="checkbox"/> </div> <div style="text-align: center;"> Static Dynamic <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> </div> </div>	Standing: <div style="display: flex; justify-content: space-between;"> <div> WFL <input type="checkbox"/> Uses UE for balance <input type="checkbox"/> Contact guard assist <input type="checkbox"/> Standby assist <input type="checkbox"/> Minimum assist <input type="checkbox"/> Moderate assist <input type="checkbox"/> Maximum assist <input type="checkbox"/> Dependent/unable <input type="checkbox"/> </div> <div style="text-align: center;"> Static Dynamic <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> </div> </div>	Transfers: <input type="checkbox"/> Independent <input type="checkbox"/> Type of assistance needed: How does beneficiary transfer: <input type="checkbox"/> Pivot <input type="checkbox"/> Sliding <input type="checkbox"/> Mechanical Lift <input type="checkbox"/> Other: (Explain)
Ambulation within 1 minute: <input type="checkbox"/> Independent > or = 150 ft. <input type="checkbox"/> Unable to ambulate <input type="checkbox"/> Ambulates with assist > or = 150 ft. <input type="checkbox"/> Limited due to endurance - Explain: Explain type of assistance: <input type="checkbox"/> Ambulates with device > or = 150 ft. <input type="checkbox"/> Ambulates short distance only ____ ft. Explain how this affects equipment ordered?		
Complete only if power mobility item is requested (e.g., power wheelchair, scooter, power assisted wheels, etc.)		
Visual perception: Has visual acuity and perception that permits safe and independent operation of the equipment requested. <input type="checkbox"/> YES <input type="checkbox"/> NO		
Problem solving: Has problem solving skills appropriate to operate requested power mobility item. <input type="checkbox"/> YES <input type="checkbox"/> NO If beneficiary is unable, who will complete? Explain:		
Comprehension: Understands and is able to follow directions and conversations that are complex or abstract; understands either spoken or written language. <input type="checkbox"/> YES <input type="checkbox"/> NO If NO, explain:		

SECTION 7: MODIFIED ASHWORTH SCALE AND MANUAL MUSCLE EVALUATION INFORMATION

See Form Completion Instructions for Modified Ashworth Scale and Manual Muscle Evaluation.

Width at the:	Height:	
 <div style="margin-top: 10px;"> Head: _____ Neck: _____ Shoulder: _____ Trunk: _____ Hips: _____ Feet: _____ </div>		<div style="display: flex; justify-content: space-between;"> <div></div> <div style="text-align: center;">L</div> <div style="text-align: center;">R</div> </div> <div style="margin-top: 10px;"> Crown: _____ Occiput: _____ Shoulder: _____ Axilla: _____ Elbow: _____ Seat Depth: _____ Leg Length: _____ Foot Length: _____ </div>

Primitive reflexes present: <input type="checkbox"/> Asymmetrical Tonic Neck Reflex <input type="checkbox"/> Symmetrical Tonic Neck Reflex <input type="checkbox"/> Startle Reflex <input type="checkbox"/> Other; Explain:	Explain how this relates to equipment ordered:
---	--

Beneficiary Name: _____ mihealth Number: _____

Head & Neck	<input type="checkbox"/> Maintains upright without support <input type="checkbox"/> Rotated		<input type="checkbox"/> Maintains upright with support <input type="checkbox"/> Laterally Flexed		<input type="checkbox"/> Flexed <input type="checkbox"/> Cervical Hyperextension		<input type="checkbox"/> Extended <input type="checkbox"/> Absent head control

SECTION 8: GOALS

Check all that apply.

☐ Independence with mobility in the home and mobility related activities of daily living (MRADLs) in the community (independence is - no help or oversight provided, and has physically demonstrated independence in operating requested equipment)
 ☐ Assisted mobility/occasional assistance with wheelchair propulsion (e.g., verbal cueing, pushing up a ramp or onto a bus, over curbs, etc.)
 ☐ Dependent mobility
 ☐ Optimize pressure relief
 ☐ Proper positioning and/or correction of a physiological condition. Explain:
 ☐ Other: (Explain)

SECTION 9: LIST TYPE OF EQUIPMENT PRESENTLY OWNED OR USED BY THE BENEFICIARY

Brand	Model	Serial Number	Description	Date of Purchase

Beneficiary Name: _____ mihealth Number: _____

SECTION 10: MOBILITY ASSESSMENT - FOR BENEFICIARIES IN A NURSING FACILITY ONLY

This section is to be completed by the Nursing Facility Director of Nursing, Nursing Facility Administrator or ordering/referring physician.

Nursing Facility Name:		NPI:	Date of Admission:
Mobility History: <input type="checkbox"/> Uses nursing facility per diem chair <input type="checkbox"/> Uses own personal chair			
Wheelchair Description: (Currently used or owned)	Brand:	Model No:	Serial No:
Components:			

Customized Wheelchair Documentation (Required documentation to accompany this form)

☐ Most Recent MDS ☐ Past Two Months of Nursing Notes ☐ Current Plan of Care that relates to the equipment ordered

Director of Nursing Signature _____ Date _____

Print Name _____

Ordering Physician Signature _____ Date _____

Print Name _____

SECTION 11: EVALUATOR (PT, OT, PHYSIATRIST OR REHAB RN) ATTESTATION AND SIGNATURE/DATE

I certify that I conducted the evaluation and have completed the information presented in Sections 1 - 9, and that there is no financial arrangement with the selected durable medical equipment provider and/or the evaluating clinician. I certify that the equipment requested is the most economical alternative that meets the beneficiary's basic medical and functional needs. I certify that the information contained in this form is true, accurate, and complete to the best of my knowledge, and I understand that any falsification, omission, or concealment of material fact may subject me to civil or criminal liability.

COMPLETION: Is voluntary, but is required if payment from applicable.

The Michigan Department of Health and Human Services is an equal opportunity employer, services and programs provider.

The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person's eligibility.

Evaluation and Medical Justification for Complex Seating Systems and Mobility Devices

Addendum A: Mobility/Seating

This form must be completed by a physical therapist, occupational therapist, physiatrist, or rehabilitation registered nurse. The evaluator must complete requested and/or current equipment, warranty information and economic alternative information.

NOTE: Only complete sections that apply to the requested equipment/accessories.

Incomplete information will result in the form being returned to the evaluator for completion.

Beneficiary Name: _____ Mihealth Number: _____

SECTION(s)	<input type="checkbox"/> Requested	<input type="checkbox"/> Current <input type="checkbox"/> None
Manual wheelchair with accessory add-ons.	<input type="checkbox"/> Propels a wheelchair 60 feet, turns around, maneuvers the chair to a table, bed, toilet, negotiates at least a 3% grade, maneuvers on rugs and over door sills <input type="checkbox"/> Cannot propel manual wheelchair without caregiver assist. <input type="checkbox"/> Cannot propel manual wheelchair, used for transport only. <input type="checkbox"/> Medical reason for power assisted wheels: Chair width _____ inches. Chair depth _____ inches. <input type="checkbox"/> Tilt <input type="checkbox"/> Tilt & Recline Medical reasons for function indicated: Hours of continuous wheelchair use per day: <input type="checkbox"/> > 4 hours <input type="checkbox"/> < 4hours; if < 4 hours, how many? _____	Specify brand, model and serial numbers, age of current base: Chair width _____ inches. COMPLETION: Is voluntary, but is required if payment from applicable.

The Michigan Department of Health and Human Services is an equal opportunity employer, services and programs provider.

The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person's eligibility.

Michigan Department of Health and Human Services
NURSE AIDE TRAINING AND TESTING PROGRAM INTERIM REIMBURSEMENT REQUEST

Interim reimbursement request data is used to establish the amount of per diem add-on reimbursement to be included in the Medicaid Program per diem payment rate. The total amount of add-on reimbursement for the nurse aide training and testing program during the fiscal year will be adjusted through the annual settlement determination of the training and testing costs apportioned to Medicaid inpatient days.

Information included in this request may reflect estimated costs and projections for the time period indicated.

Send completed request to: DARS@michigan.gov

NOTE: Review detailed "Instructions" on page 3.

1. Provider Cost Period From: _____ To: _____		3. Name of Training Contractor (if used)

MSA-1324 INSTRUCTIONS (REQUEST)

PURPOSE

This form is for the provider to obtain Medicaid Program reimbursement outside the routine nursing care rate per diem for OBRA nurse aide training and testing programs. The form must be completed in order to receive interim reimbursement for those providers that have been determined to be a lockout facility, or for those facilities incurring costs in excess of interim reimbursement. Costs will be retrospectively settled to reflect the Medicaid Program's appropriate share of actual allowable training and testing costs.

Training and testing program costs claimed for services and supplies furnished to or purchased by the facility from organizations related to the provider by common ownership or control must adhere to the related party allowable cost principles. Expenses for such transactions should not exceed expenses for like items or services in an arms-length transaction with other non-related organizations, or the cost to the related organization.

Administrative overhead costs and space costs in nursing facilities conducting in-house training are not considered training and testing program costs. The costs reported must be specifically incurred in conducting the approved nurse aide training and testing program.

Supporting accounting records such as class attendance rosters or training participation logs, purchase orders, vendor invoices, contracts, documentation verifying amounts reimbursed to employees for approved training program expenses incurred by the employee prior to employment at the facility (e.g., canceled check, training program receipt) must be maintained for audit purposes. Supporting materials should be readily identifiable as training related cost documentation and must indicate the type of training involved.

Training Program Approval Requirement - Only costs incurred relative to a Department of Licensing And Regulatory Affairs (LARA) Bureau of Community and Health Systems approved Nurse Aide Training Program may be claimed on this schedule. An approved program may be conducted by the provider's facility or by a separate entity from the provider. The provider **must not report and make a claim** for Medicaid Program reimbursement on this schedule for any costs incurred and associated with providing training **by the lockout facility** during the lockout time period. Allowable nurse aide training program costs during the lockout time period are limited to the costs incurred in obtaining training and testing outside the facility from an approved nurse aide training program.

Note: If the facility maintains separate cost center reporting for the training program, enter the appropriate costs as identified.

ITEM EXPLANATION

1. Provider's Cost Reporting Period
Enter the fiscal period coinciding with the provider's cost reporting period.
2. Mode of Training
It is possible that providers may utilize both in-house staff and outside contractors. If a chain organization or group home ownership uses an approved central training program, indicate the training as "in-house" and check "centralized training." If multiple outside contractors are used, indicate each contractor and the time periods utilized.
6. Lockout Facility
A facility identified by LARA as a "lockout facility" cannot conduct a approved training and testing program, cannot be a training/clinical practice site for another approved program, and cannot conduct clinical skills testing. The facility is notified of the lockout determination action by LARA.
8. Estimated Total Inpatient Days for the Period
Indicate the appropriate number of LTC total inpatient days of care estimated to be rendered during the time period reported on this form.
13. Name of Facility
Enter the provider name under which Medicaid payments are issued to the provider.
15. County Number
Enter the two-digit county number.
- 14-16. Provider Location
Enter street address, city (village and/or township) and zip code of the facility's physical location.
17. Provider NPI Number
Enter the Nursing Facility's ten-digit provider NPI number.
18. Provider's License Number
Enter the three-digit license number.

MSA-1324 INSTRUCTIONS (WORKSHEET)

1. Facility Training Staff

Payroll-related costs for facility employees incurred by the approved program's direct training time or the nurse aide training program's preparation time.

2. Nurse Aide Training Consultants

Costs incurred for non-facility staff engaged to provide instruction or consultation for the facility's approved nurse aide training program.

3. Nurse Aide Student Staff

Payroll costs for facility employees incurred while the student is engaged in the approved training program or traveling to and from the off-site approved training location, or is engaged in off-site testing or traveling to and from the off-site testing location.

4. Training Program Supplies

Cost incurred for supplies and materials used in conducting an approved training program.

5. Training Program Transportation

Travel or transportation costs incurred by facility staff conducting the approved training program activity and testing, or for off-site nurse aide training and testing. Identify costs separately for training staff and student staff.

6. Outside Contracted Approved Nurse Aide Training Program

Paid Directly By Facility - Costs incurred to obtain nurse aide training through an outside entity approved training program. Payment for subject training is made directly from the nursing facility to the training entity and the nurse aide trainees are employed by the nursing facility

Reimbursed To Employee Staff - Costs incurred to reimburse a facility employee who had personally paid for an approved nurse aide training program prior to becoming an employee at the facility. Reasonable and necessary expenses incurred by the employee through participation and completion of a Bureau of Community and Health Systems approved training program for which the aide has made payment are eligible for remuneration. Only the cost of tuition and books are reimbursed. The aide must be hired by a facility within 12 months after incurring this expense. The facility must obtain receipts and retain documentation from the employee to verify the expense.

7. Nurse Aide Testing Fees

Paid Directly By Facility - Costs incurred for State-run testing. Payment for testing fees is made directly from the nursing facility to the testing authority for aides employed at the facility.

Reimbursed To Employee Staff - Costs incurred to reimburse a facility employee who had personally paid for State-run testing prior to becoming an employee at the facility. The aide must be hired by a facility within 12 months after paying the testing fee. The facility must obtain receipts and retain documentation from the employee to verify the expense.

8. Other Training Program Costs

Costs incurred that are not classified in the identified cost categories 1-7.

Rental costs for space located off-site of the facility are reimbursable under training and testing only if the space is used solely for the training and testing program. Space costs not meeting this requirement are reimbursable within the plant cost component of Michigan's prospective reimbursement system. Reasonable rental expense for training equipment necessary to the approved training program is an eligible cost.

Enter the detail and cost of these individual expenses in the yellow shaded cells. The total of these items will be automatically calculated by use of the F9 key.

9. Total Training Program Cost Before Equipment Allowance

Subtotal of Lines 1 through 8b costs. This total will be automatically calculated by use of the F9 key.

10. Training Program Equipment Use Allowance

An annual cost allowance is made for equipment purchased specifically for the Bureau of Community and Health Systems approved nurse aide training program. Such equipment purchases are not included in the plant asset costs of the facility for routine nursing care. An annual allowance of 15 percent of the equipment purchase price is reported as a cost of the training program for as long as the equipment is used in the program, but cannot exceed seven years.

The use allowance is an annual percentage adjustment made to the 15 percent amount if the cost report period differs from 12 months. Line 10.a. and Line 10.b. will automatically be calculated.

Enter Line 10.c. the cost of the equipment purchased as required in the yellow shaded cells.

**MICHIGAN DEPARTMENT OF HEALTH AND HUMAN SERVICES
NURSING FACILITY ISOLATION BED REQUEST FORM**

INSTRUCTIONS: Fill out the below table with the facility information and for each beneficiary that you are requesting bed isolation for. This form must be submitted within 5 business days of the return of the isolated individual to their dually certified Medicaid Bed. The request must include the physicians' orders or other relevant documentation to substantiate the need for isolation. This form must be signed at the bottom and sent to MDHHS-NFISOLATION@michigan.gov or by fax to 517-241-0066 if the facility is unable to send an encrypted email. Any questions may be sent to the above email address.

MSA-0832 (1/2024)

The Michigan Department of Health and Human Services (MDHHS) does not discriminate against any individual or group on the basis of race, national origin, color, sex, disability, religion, age, height, weight, familial status, partisan considerations, or genetic information. Sex-based discrimination includes, but is not limited to, discrimination based on sexual orientation, gender identity, gender expression, sex characteristics, and pregnancy.

Further, MDHHS:

- Provides free aids and services to people with disabilities to communicate with us, such as:
 - Qualified sign language interpreters
 - Written information in other formats (large print, audio, accessible electronic formats, other formats); and
- Provides free language services to people whose primary language is not English, such as:
 - Qualified interpreters
 - Information written in other languages

If you need these services, contact the Section 1557 Coordinator. The contact information is found below.

If you believe that MDHHS has not provided the above services, or discriminated in another way, you can file a grievance with the Section 1557 Coordinator. You can file a grievance by mail, fax, or email. If you need help filing a grievance, the Section 1557 Coordinator is available to help you.

MDHHS Section 1557 Coordinator
Compliance Office, Suite 411
PO Box 30037
Lansing, MI 48909

517-284-1018 (Main), (TTY number—if covered entity has one), 517-335-6146 (Fax),
MDHHS-Section-1557@michigan.gov (Email).

You can also file a civil rights complaint with the responsible federal agency.

If your grievance or complaint is about your Medicaid application, benefits or services you can file a civil rights complaint with the U.S. Department of Health and Human Services at <https://bit.ly/2pBS4YG>, or by mail or phone at:

U.S. Department of Health and Human Services
200 Independence Avenue, SW
Room 509F, HHH Building
Washington, D.C. 20201
800-368-1019, 800-537-7697 (TDD)

Complaint forms are available at <https://bit.ly/2IKsHMS>.

If your grievance or complaint is about your application for or current food assistance benefits, you can file a discrimination complaint with the U.S. Department of Agriculture (USDA) Program by:

Completing a Complaint Form, (AD-3027) found online at: <https://bit.ly/2g9zzpU> or at any USDA office, or write a letter addressed to USDA at the address below. In your letter, provide all the information requested in the form.

To request a copy of the complaint form, call 866-632-9992. Send your completed form or letter to USDA by mail:
U.S. Department of Agriculture
Office of the Assistant Secretary for Civil Rights

Washington, D.C. 20250-9410

Fax: 202-690-7442; or Email: program.intake@usda.gov

MDHHS is an equal opportunity provider.

Michigan Department of Health and Human Services
Completion Instructions for MSA-115
Occupational Therapy - Physical Therapy - Speech Therapy
Prior Approval Request/Authorization

General Instructions

The MSA-115 must be used by Medicaid-enrolled outpatient hospitals, outpatient therapy providers, nursing facilities and home health agencies to request prior authorization (PA) for therapy services. MDHHS requires that the MSA-115 be typewritten, handwritten forms will not be accepted. Fill-in enabled copies of this form can be downloaded from the Michigan Department of Health and Human Services (MDHHS) website www.michigan.gov/medicaidproviders >> Policy, Letters & Forms. The PA request must be complete and of adequate clarity to permit a determination of the appropriateness of the service without examination of the beneficiary.

PA may be authorized for a period not to exceed six months for outpatient therapy providers and outpatient hospitals, or two months for home health agencies and nursing facilities. If continued treatment is necessary, a subsequent request for PA must be submitted. The provider should retain a copy of the PA form until the approval or denial is determination is received.

For complete information on covered services, PA, and documentation requirements, refer to the Therapy Services Chapter of the Michigan Medicaid Provider Manual located at the MDHHS website www.michigan.gov/medicaidproviders >> Policy, Letters & Forms >> Medicaid Provider Manual.

Attachments/Additional Documentation

All additional attachments/documentation submitted with the request must contain the beneficiary name and **mihealth** card number, provider name and address, and the provider's National Provider Identifier (NPI) number.

When requesting the initial PA, the provider must attach a copy of the initial evaluation and treatment plan to the PA request.

Form Completion

The following fields must be completed unless stated otherwise:

Box Number(s)	Instructions
Box 1	MDHHS use only.
Box 2 - 3	The Medicaid enrolled provider's name and NPI.
Box 4 - 6	The provider's telephone number (including area code), address and fax number (including area code).
Box 7- 10	The beneficiary's name (last, first, and middle initial), sex, mihealth card number, and birth date (in the eight-digit format: MM/DD/YYYY). The information should be taken directly from the mihealth card and should be verified through the Community Health Automated Medicaid Processing System (CHAMPS) (Eligibility Inquiry and/or 270/271 transaction).
Box 11	The date the beneficiary was most recently admitted to the hospital or facility.
Box 12	Enter the beneficiary's diagnosis(es) code(s) and description(s) that relate to the service being requested.
Box 13	The date of onset must be entered. The approximate date of exacerbation must be cited if the beneficiary has a chronic disease (e.g., arthritis) and recently suffered such exacerbation.
Box 14 -16	The therapist's name, office telephone number (including area code), and applicable license/certification number.
Box 17	Initial: The treatment authorization request is the initial prior authorization request for the beneficiary under this treatment plan. Continuing: The treatment authorization request is to continue treatment for additional calendar month(s) of service under the treatment plan.
Box 18	The date MDHHS approved the last approved prior authorization request for the given diagnosis.
Box 19	The requested date range for which treatment is to be rendered, in a eight-digit format (e.g mm/dd/yyyy to mm/dd/yyyy).

Box Number(s)	Instructions
Box 20	The date treatment was started for the given diagnosis (if treatment was initiated previously).
Box 21	The total number of sessions rendered since the development of the treatment plan.
Box 22	Goals must be measurable. In functional terms, the provider's expectation for the beneficiary's ultimate achievement and the length of time it will take (e.g., ambulation unassisted for 20 feet; able to dress self within 15 minutes; oral expression using 4-5 word phrases to express daily needs). See Medicaid Provider Manual for additional documentation requirements.
Box 23	Documentation of the beneficiary's progress from the prior period to the current time in reference to the measurable and functional goals stated in the treatment plan. Documentation of the beneficiary's nursing and family education may be included. The final month of anticipated treatment should include the discharge plan for the carry-over of achieved goals to supportive personnel. See Medicaid Provider Manual for additional documentation requirements.
Box 24	Indicate if the beneficiary is receiving therapy services through the School Services Program.
Box 25	Indicate the treatment plan frequency (e.g., 1x/week, 3x/week, 1x/month, etc.) and duration per visit in 15-minute increments, i.e., units (e.g. 2 units/visit, 4 units/visit, etc.).
Box 26	Complete a separate line for each unique HCPCS code/modifiers combination.
Box 27	The Therapies Database on the MDHHS website lists the HCPCS codes that describe covered services. The database is located at the MDHHS website www.michigan.gov/medicaidproviders >> Billing and Reimbursement >> Provider Specific Information.
Box 28	The Billing & Reimbursement Chapter in the Medicaid Provider Manual list the required modifiers used to describe covered services for therapy providers. The Medicaid Provider Manual is located at the MDHHS website www.michigan.gov/medicaidproviders >> Policy, Letters, & Forms >> Medicaid Provider Manual.
Box 29	The total number of units the service is to be provided during the requested treatment period.
Box 30	The authorized prescribing practitioner must indicate if this is an initial certification or a re-certification and sign and date. Signature is required each time a request is made.
Box 31	The therapist certification is the signature of an authorized representative. The business office of a hospital may designate the director of the department providing the service as its representative. All unsigned requests will be returned for signature.
Box 32-35	MDHHS use only.

Form Submission:

PA request forms for all eligible Medicaid beneficiaries must be submitted electronically*, mailed or faxed to:

MDHHS – Program Review Division
P.O. Box 30170
Lansing, Michigan 48909
Fax Number: **(517) 335-0075**

If submitting electronically, the completed MSA-115 must be uploaded along with the supporting clinical documentation required.

To check the status of a PA request, contact the Program Review Division via telephone at **1-800-622-0276** or electronically via the **CHAMPS Provider Portal** located at <https://milogintp.michigan.gov>.

Authority: Title XIX of the Social Security Act.	Completion: Is voluntary but is required if payment from applicable programs is sought.
The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person's eligibility.	

OCCUPATIONAL THERAPY - PHYSICAL THERAPY – SPEECH THERAPY PRIOR APPROVAL REQUEST/AUTHORIZATION

Michigan Department of Health and Human Services
Practitioner Special Services Prior Approval - Request/Authorization
Completion Instructions

The MSA-6544-B must be used by Medicaid enrolled providers to request provider services that require prior authorization (PA) (e.g. out-of-state care).

MDHHS requests that the MSA-6544-B be typewritten to facilitate processing. A Word fill-in enabled version of this form can be downloaded from the MDHHS website www.michigan.gov/medicaidproviders >> Policy, Letters & Forms. For information on required procedure codes, modifiers, documentation, and appropriate quantity amounts, refer to the following documents:

- Standards of Coverage portion of the provider-specific chapters of the Medicaid Provider Manual.
- Billing & Reimbursement for Professionals Chapter of the Medicaid Provider Manual.
- Provider-specific databases on the MDHHS website. www.michigan.gov/medicaidproviders >> Billing and Reimbursement >> Provider Specific Information.
- CHAMPS Medicaid Code and Rate Reference Tool available in CHAMPS via the External Links menu.

Completion of this form is as follows:

Box 1	MDHHS Use Only
Box 22	Indicate whether this is the first request for services or if this is a renewal request for ongoing services.
Box 24	Enter a complete description of the services, procedures, etc. requested.
Box 25	Enter the HCPCS Procedure Code.
Box 26	Enter the applicable HCPCS Modifier.
Box 27	Enter the quantity of the services requested. If an injectable drug is requested, indicate the number of billing units requested.
Box 28	Enter the dates for which the requested procedure or service will take place. Include the dates of travel, if travel assistance will be needed.
Box 29	Enter the beneficiary's primary and secondary diagnoses or the CSHCS qualifying diagnosis (list both the code and description).
Box 30	Any additional remarks regarding the request should be listed in this box such as verbal authorization date, retroactive date of service if being requested. Provide other insurance coverage for services requested.
Box 31	Check each box that corresponds to documentation included in the request. No request should leave all boxes unchecked.
Box 32	Must be completed for all requests.

Form Submission

PA request forms and required documentation for all eligible Medicaid beneficiaries must be mailed or faxed to:

**MDHHS – Behavioral and Physical Health and Aging Services Administration
Program Review Division
P.O. Box 30170
Lansing, Michigan 48909**

Fax Number: (517) 335-0075

The status of a PA request may be reviewed in CHAMPS. For additional questions, contact the MDHHS – Behavioral and Physical Health and Aging Services Administration, Program Review Division via telephone at **1-800-622-0276**.

COMPLETION: Is Voluntary but is required if Medical Assistance program payment is desired.

The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person's eligibility.

**DCH-3877, PREADMISSION SCREENING (PAS)/
ANNUAL RESIDENT REVIEW (ARR)**
(Mental Illness/Intellectual Developmental
Disability/Related Conditions Identification)
Michigan Department of Health and Human Services
Level I Screening
(Revised 3-22)

SECTION 1 – LEVEL I SCREENING

☐ **PAS** ☐ **ARR** ☐ **Change in Condition** ☐ **Hospital Exempted Discharge**

SECTION 2 – PATIENT, LEGAL REPRESENTATIVE AND AGENCY INFORMATION

Patient Name (First, MI, Last) Date of Birth (MM/DD/YY) Gender
☐ Male ☐ Female

Address (number, street, apt., or lot #) City State Zip Code

County of Residence Social Security Number Medicaid Beneficiary ID Number Medicare ID Number

Does this patient have a court-appointed guardian or other legal representative?
☐ No ☐ Yes If yes, give Name of Legal Representative

County in which the legal representative was appointed Legal Representative Telephone Number

Address (number, street, apt., or lot #) City State Zip Code

Referring Agency Name Telephone Number Admission Date (actual or proposed)

Nursing Facility Name (proposed or actual) County Name

Nursing Facility Address (number and street) City State Zip Code

Sections 3 and 4 of this form must be completed by a registered nurse, licensed bachelor, or master social worker, licensed professional counselor, psychologist, physician's assistant, nurse practitioner or a physician.

SECTION 3 – SCREENING CRITERIA (All 6 items must be completed.)

1. The person has a current diagnosis of ☐ **Mental Illness** or ☐ **Dementia** (Check one or both) ☐ No ☐ Yes
2. The person has received treatment for ☐ **Mental Illness** or ☐ **Dementia** (within the past 24 months) (Check one or both) ☐ No ☐ Yes
3. The person has routinely received one or more prescribed antipsychotic or antidepressant medications within the last 14 days. ☐ No ☐ Yes
4. There is presenting evidence of mental illness or dementia, including significant disturbances in thought, conduct, emotions, or judgment. Presenting evidence may include, but is not limited to, suicidal ideations, hallucinations, delusions, serious difficulty completing tasks, or serious difficulty interacting with others. ☐ No ☐ Yes

5. The person has a diagnosis of an intellectual/developmental disability or a related condition including, but not limited to, epilepsy, autism, or cerebral palsy and this diagnosis manifested before the age of 22. ☐ No ☐ Yes
6. There is presenting evidence of deficits in intellectual functioning or adaptive behavior which suggests that the person may have an intellectual/developmental disability or a related condition. These deficits appear to have manifested before the age of 22. ☐ No ☐ Yes

Note: If you checked "Yes" to items 1 and/or 2, checked the word "**Mental Illness**" and/or "**Dementia**."

If yes, please explain

Note: The person screened shall be determined to require a comprehensive Level II OBRA evaluation if any of the above items are "Yes" UNLESS a physician, nurse practitioner or physician's assistant certifies on form DCH-3878 that the person meets at least one of the exemption criteria.

SECTION 4 - CLINICIAN'S STATEMENT: I certify to the best of my knowledge that the above information is accurate.

Clinician Signature Date Name (type or print)

Degree/License Telephone Number

The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person's eligibility.

AUTHORITY: Title XIX of the Social Security Act

COMPLETION: Is voluntary, however, if NOT completed, Medicaid will not reimburse the nursing facility.

DISTRIBUTION: If any answer to items 1 – 6 in SECTION 3 is "Yes", send ONE copy to the local Community Mental Health Services Program (CMHSP), **with a copy of form DCH-3878** if an exemption is requested. The nursing facility must retain the original in the patient record and provide a copy to the patient or legal representative.

PREADMISSION SCREENING (PAS)/ANNUAL RESIDENT REVIEW (ARR)

Mental Illness/Intellectual Developmental Disability/Related Conditions Identification

Instructions for Completing Level I Screening

This form is used to identify prospective and current nursing facility residents who meet the criteria for possible mental illness or intellectual/developmental disability, or a related condition and who may be in need of mental health services.

Sections II and III must be completed by a registered nurse, licensed bachelor, or master social worker, licensed professional counselor, psychologist, physician's assistant, nurse practitioner or physician.

Preadmission Screening or Hospital Exempted Discharge: The referral source completing the Level I Screening (DCH-3877), must complete and provide a copy to the proposed nursing facility **prior to admission. Check the appropriate box in the upper right-hand corner.**

Annual Resident Review or Change in Condition: This form must be completed by the nursing facility. **Check the appropriate box in the upper right-hand corner.**

Section II – Screening Criteria – All 6 items in this section must be completed. The following provides additional explanation of the items.

1. **Mental Illness:** A current primary diagnosis of a mental disorder as defined in the American Psychiatric Association Diagnostic and Statistical Manual of Mental Disorders.
Current Diagnosis means that a clinician has established a diagnosis of a mental disorder within the past 24 months. Do NOT mark "Yes" for an individual cited as having a diagnosis "by history" only.
2. **Receipt of treatment for mental illness or dementia within the past 24 months** means any of the following: inpatient psychiatric hospitalization; outpatient services such as psychotherapy, day program, or mental health case management; or referral for psychiatric consultation, evaluation, or prescription of psychopharmacological medications.
3. **Antidepressant and antipsychotic medications** mean any currently prescribed medication classified as an antidepressant or antipsychotic, plus Lithium Carbonate and Lithium Citrate.
4. **Presenting evidence** means the individual currently manifests symptoms of mental illness or dementia, which suggests the need for further evaluation to establish causal factors, diagnosis, and treatment recommendations. Further evaluation may need to be completed if evidence of suicidal ideation, hallucinations, delusion, serious difficulty completing tasks or serious difficulty interacting with others.
5. **Intellectual/Developmental Disability/Related Condition:** An individual is considered to have a severe, chronic disability that meets ALL 4 of the following conditions:
 - a. It is manifested before the person reaches **age 22**.
 - b. It is likely to continue indefinitely.
 - c. It results in substantial functional limitations in **3 or more** of the following areas of major life activity: self-care, understanding and use of language, learning, mobility, self-direction, and capacity for independent living.
 - d. It is attributable to:
 - Intellectual/Developmental Disability such that the person has significant subaverage general intellectual functioning existing concurrently with deficits in adaptive behavior and manifested during the developmental period;
 - cerebral palsy, epilepsy, autism; or

- any condition other than mental illness found to be closely related to Intellectual/ Developmental Disability because this condition results in impairment in general intellectual functioning OR adaptive behavior similar to that of persons with Intellectual/Developmental Disability and requires treatment or services similar to those required for these persons.
6. **Presenting evidence** means the individual manifests deficits in intellectual functioning or adaptive behavior, which suggests the need for further evaluation to determine the presence of a developmental disability, causal factors, and treatment recommendations. These deficits appear to have manifested before the age of 22.

Note: When there are one or more "Yes" answers to items 1 – 6 under SECTION II, complete form DCH-3878, Mental Illness/Intellectual/Developmental Disability/Related Condition Exemption Criteria Certification only if the referring agency is seeking to establish exemption criteria for a dementia, state of coma, or hospital exempted discharge.

Michigan Department of Health and Human Services
Completion Instructions for MSA-0732
Private Duty Nursing Prior Authorization – Request for Services

The MSA-0732 form (page 2) must be submitted every time services are requested, i.e., before services can begin and for each specified authorization period thereafter, no less than 15 days prior to the end of the current authorization period. MDHHS requests that the MSA-0732 be typewritten to facilitate processing.

This form must be used to request Prior Authorization (PA) for Private Duty Nursing (PDN) services for beneficiaries with Medicaid coverage under 21 years of age. Private Duty Nursing is not a benefit under Children's Special Health Care Services (CSHCS). Beneficiaries with CSHCS coverage may be eligible for PDN under Medicaid. A request to begin services may be submitted by a person other than the PDN such as the hospital Discharge Planner, CSHCS case manager, physician, or physician's staff person. When this is the case, the person submitting the request must do so in consultation with the PDN who will be assuming responsibility for the care of the beneficiary. If services are being requested for more than one beneficiary in the home, a separate form must be completed for each beneficiary.

Refer to the Medicaid Provider Manual, Private Duty Nursing Chapter, Prior Authorization Subsection, for the listing of required documentation to accompany each request.

Completion of this form is as follows:

Item#	Instructions
1	Prior Authorization Number. MDHHS use only.
2	Check specific box as to whether this is an initial or renewal request. If a renewal, check the INCREASE UNITS or DECREASE UNITS box only if this request demonstrates an increase or decrease in time from the previous authorization period. Time is authorized and billed in 15-minute incremental units (1 unit = 15 minutes).
3 - 7	PDN provider information. Provide complete agency name, or name of individual (last, first, and middle initial). Designate whether RN or LPN. Include NPI number, phone number, address, and fax number.
8 - 14	Beneficiary information. Provide complete name and birth date (month, day, and year), sex, mihealth card number, complete address, county, and primary diagnosis using the appropriate ICD code only.
15 - 18	Other insurance information if applicable, including name of company and beneficiary's group/policy and certificate/contract numbers.
19 - 25	Hospital information including complete address and phone number, anticipated discharge date, and name and contact information of Discharge Planner if beneficiary is currently hospitalized.
26 - 30	Ordering physician information. Provide complete name (including MD or DO), NPI number, phone number, address, and fax number.
31 - 35	Description of the service(s) to be provided utilizing HCPCS code T1000 and modifier TD for RN or TE for LPN. Use modifier TT if caring for more than one beneficiary. Include the number of total units per month required to provide the service(s) with the start date and end date, if known.
36 - 40 43 - 49	Home environment information, including number of siblings residing in the home (include step and foster child(ren) if applicable) and if they receive PDN. Provide child's name and mihealth card number if receiving PDN. Also provide the number of other individuals in the home requiring care (e.g., elderly parent, grandparent, disabled spouse, sibling), name(s) and number of caregivers for the beneficiary for whom services are being requested, and whether the caregiver(s) either work and/or attends school outside of the home. If so, how many hours are spent working and/or attending school. (Additional pages may be required.)
41 - 42	Current school information if child is or will be attending school during the authorization period when PDN services are being provided. Include number of hours per day and per week, including travel time.
50 - 56	If more than one PDN or PDN agency is involved, their name(s), NPI, phone number(s), fax number(s), and which PDN will be managing the care plan (i.e., the provider named in items 3 – 7, or the provider named in this space).
57	List all other services in the home. Failure to disclose all services in the home may result in recoupment of Medicaid dollars for PDN reimbursement.
58	The Provider's signature certifies that (1) the individual PDN or agency requesting the services understands the necessity for obtaining prior authorization for PDN and; (2) the information provided on this form is accurate and complete.
59	Signature certifies that Parent/Guardian of beneficiary attests that information provided on this form is accurate and complete to the best of their ability.
60	MDHHS use only

Form Submission

The completed MSA-0732 (page 2) and required documentation must be mailed or faxed to:

Michigan Department of Health and Human Services **Fax:** (517) 241-7813
Program Review Division
P.O. Box 30170
Lansing, MI 48909

Questions should be directed to MDHHS – Behavioral and Physical Health and Aging Services Administration, Program Review Division via telephone at
1-800-622-0276.

Authority: Title XIX of the Social Security Act	COMPLETION: Is voluntary, but is required if payment from applicable programs is sought.
The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person's eligibility.

COMPLETE INSTRUCTIONS FOR DCH-0078, REQUEST TO ADD, TERMINATE OR CHANGE OTHER INSURANCE

DCH-0078 is a formal request for change in other insurance status and must be submitted by the Medicaid provider, Medicaid Health Plan, Local Health Department or the Michigan Department of Health and Human Services caseworker to add, terminate, or change beneficiary insurance information other than Medicaid.

INSTRUCTIONS:

To add, terminate or change other insurance on-line, visit <https://www.Michigan.gov/ReportTPL> to access the form and instructions.

To submit the form via fax or mail:

- PRINT or TYPE to complete the form
- Place a check mark in the appropriate "Add," "Terminate," or "Change" field
- Sections denoted by * are mandatory to be completed
- Attach clear copy of insurance card (front and back) when adding insurance (if available)
- Retain a COPY in beneficiary file
- Submit form and applicable attachments
via: Fax Number: 517-346-9817

Mail to:

Michigan Department of Health and Human Services
Third Party Liability Division
Bureau of Medicaid Policy, Operations & Actuarial Services
PO Box 30479
Lansing MI 48909

Allow 7-10 business days for the request to be completed. To verify the request has been completed, view the beneficiary eligibility information in the Community Health Automated Medicaid Processing System (CHAMPS).

The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person's eligibility.

AUTHORITY: Title V and Title XIX of the Social Security Act

COMPLETION: Is voluntary.

SAMPLE NOTICE OF NON-COVERAGE

(Hospital Letterhead)

(Name of Patient)
(Address)
(City, State, Zip)

(Date of Notice)

(Medical Record Number)
(Beneficiary Number)
(Attending Physician's Name)
(Admission Date)

Dear (Name of Patient)

SUBJECT: CONTINUED STAY NOTICE OF NON-COVERAGE

As a Medicaid beneficiary, it is important for you to understand that there are circumstances when Medicaid does not pay for hospital care or certain services provided in the hospital. Medicaid pays for hospital care when the services are medically necessary and delivered in the most appropriate setting.

The Utilization Review Committee of (Name of Hospital) has reviewed the medical services you have received for (Specify services or condition) from (Date of Admission) to (Date of Notice). The Review Committee has determined that your continued stay in an acute care hospital is not medically necessary, and the medical services you are receiving for (Specify services or condition) could be safely rendered in another less costly setting. You should discuss with your attending physician the arrangements for the health care you may require.

You will not be responsible for payment of the services which are rendered by this hospital from (Date of Admission) through the date you receive this notice, except for payment of deductible, coinsurance, or any convenience services or items not covered by Medicaid. If you decide to stay in the hospital, you will be responsible for payment of all services provided to you by this hospital beginning the day after you receive this notice.

For example: If you receive this notice on _____ you will be responsible for payment of services provided beginning_____.

MDHHS Program Review Division reviews on behalf of the patient or his/her physician any hospital care denied to Medicaid patients in the State of Michigan.

If you disagree with this decision and you remain in the hospital, you or your representative may request an immediate review by MDHHS Program Review Division. You may request this by calling:

MDHHS Program Review Division, PACER Program
Toll Free Telephone Number: 1-844-PACERMI (1-844-722-3764)

cc: MDHHS Program Review Division - PACER Program

NOTICE OF NON-COVERAGE

(Hospital Letterhead)

(Name of Patient)
(Address)
(City, State, Zip)

(Date of Notice)

(Medical Record Number)
(Beneficiary Medicaid Number)
(Attending Physician's Name)
(Admission Date – *if applicable*)

Subject: NOTICE OF NON-COVERAGE FOR
INPATIENT HOSPITAL ADMISSION

Dear (Name of Patient):

As a Medicaid beneficiary, it is important for you to understand that there are circumstances when Medicaid does not pay for hospital care or inpatient services provided in the hospital. Medicaid pays for hospital care when the services are medically necessary and delivered in the most appropriate setting.

NOTICE OF NON-COVERAGE

(Name of Hospital) Utilization Review (UR) Committee has reviewed your physician's request for your hospital admission. The request has been denied. The hospital's UR Committee has determined that your admission to (Name of Hospital) for treatment of (Specify services or condition) is either: 1) not medically necessary, or 2) that the medical services you may require for the treatment of your condition can be safely rendered in another less costly setting. You should discuss arrangements for any health care treatment you may require with your physician.

APPEAL RIGHTS

MDHHS Program Review Division reviews on behalf of the patient or his/her physician any hospital care denied to Medicaid patients in the State of Michigan.

If you disagree with this decision and you remain in the hospital, you or your representative may request an immediate review by MDHHS Program Review Division. You may request this by calling:

MDHHS Program Review Division, PACER Program
Toll Free Telephone Number: 1-844-PACERMI (1-844-722-3764)

If MDHHS Program Review Division confirms the hospital's initial decision, you will be notified in writing of this decision. If you decide to proceed with the admission to the hospital, you will be responsible for the payment of all services provided to you by the hospital beginning with the date of admission.

If MDHHS Program Review Division overturns the hospital's decision, you will also be notified in writing of this decision. The hospital will contact your physician and make arrangements for your admission to the hospital. Medicaid will cover the cost of your hospital stay except for the payment of any deductible, coinsurance, or convenience services or items not covered by Medicaid.

Maternal Infant Health Program Provider and Medicaid Health Plan Care Coordination Agreement

This agreement is made and entered into this _____ day of _____, in the year _____ by and between _____ (Medicaid Health Plan) and _____ (Maternal Infant Health Program provider).

A. Legal Basis

Whereas, in order to expand enrollment, the Michigan Department of Health and Human Services (MDHHS) has established a competitive bid process that has resulted in contracts with Medicaid Health Plans (MHPs) that are deemed to be qualified to provide specified health care services to Medicaid beneficiaries; and

Whereas, Medicaid-covered maternal and infant health services will be provided through arrangements between MDHHS, MDHHS contracted MHPs, and selected Maternal Infant Health Program (MIHP) providers.

Now, therefore, the MHP and the MIHP provider agree as follows:

B. Terms of Agreement

This agreement will be effective _____ in the year _____. This agreement will be subject to amendment due to changes in the contract between MDHHS and the MHP or changes to the MIHP Medicaid policy certification requirements.

This agreement is effective upon execution and will continue for the length of MHP and MDHHS contract period. Either party may cancel this agreement for cause upon 30 days written notice. Reasons for cause include: breach of duty or obligation; fraud or abuse; federal or state sanctions; and failure to comply with state law or rules the Medicaid Provider Manual, or the MIHP Operations Guide. The terminating party is required to notify MDHHS at least 30 days prior to termination. This agreement will automatically terminate when an MIHP provider fails to maintain the certification requirements of MDHHS.

Once a signed agreement is obtained from both parties, the provisions of this agreement will be extended for a timeframe consistent with the MHP and MDHHS contract period, and the MIHP provider maintaining certification with MDHHS. Either party may cancel this agreement upon 30 days written notice. MDHHS must be notified of the termination of this agreement.

C. Purpose, Administration and Point of Authority

MIHP services are home-visiting preventive services provided to pregnant women, mothers, and their infants to promote healthy pregnancies, positive birth outcomes, and healthy infant growth and development. These support services are to be provided by a multidisciplinary team of health care professionals consisting of a qualified licensed registered nurse, licensed social worker and, if available, a registered dietitian and/or infant mental health specialist.

MIHP services are intended to supplement regular prenatal/infant care and to assist physicians (MD, DO), certified nurse midwives (CNMs), and nurse practitioners (NPs) contracted with MHPs. In compliance with MIHP and MHP guidelines, MIHP providers are to coordinate care with medical care providers, mental health providers, and the MHPs, as well as assist in the coordination of transportation services as needed for health care, support services and pregnancy-related appointments.

MDHHS/MHP Contracts and MHP/MIHP Care Coordination Agreements will be available for review upon request by MDHHS. The intent of the Care Coordination Agreement is to explicitly describe the services to be coordinated and the essential aspects of collaboration between the MHP and the MIHP provider.

The MHP shall designate in writing to the MIHP provider the person who has authority to administer this agreement. The MIHP provider shall designate in writing to the MHP the person who has authority to administer this agreement.

D. Areas of Responsibility

Mutually Served Consumers

Mutually served consumers refers to MHP beneficiaries who also qualify for MIHP services. All pregnant and infant Medicaid beneficiaries may qualify for MIHP services. The intent of establishing written procedures between the MHP and the MIHP provider is to assure service coordination and continuity of care for persons receiving services from both entities.

Services to be Provided by the MHP

The MHP will provide Medicaid covered services to Medicaid beneficiaries as required by the MHP contract with MDHHS. MIHP services are voluntary. Beneficiaries may refuse MIHP services at any time.

The MHP will notify all Medicaid beneficiaries enrolled in the MHP of the availability of MIHP services at the time of enrollment. The MHP shall provide a referral for MIHP services for those pregnant and infant Medicaid beneficiaries who are not currently receiving MIHP services or receiving equivalent maternal or infant support services from an evidence-based home visiting program. Referrals can be made in person, by letter, email, fax, or telephone.

Services to be Provided by the MIHP Provider

The MIHP provider will provide the following services:

- Psychosocial and nutritional screening and assessment;
- Plan of care development;
- Professional intervention services by a multidisciplinary team consisting of a qualified licensed registered nurse and licensed social worker and, when available, a registered dietitian and/or an infant mental health specialist;
- Coordination with the MHP for transportation services as needed for health care, substance use disorder treatment, support services, oral health services, and/or pregnancy-related appointments.
- Referral to community services (e.g. mental health, substance use disorder);
- Referral to or provision of childbirth or parenting education classes;
- Coordination with medical care providers; and
- Coordination with the MHP.

MIHP providers will bill and receive reimbursement for MIHP services provided to MHP members as noted in the provider contract established with the applicable MHP.

E. Medical Coordination

Both parties agree to establish a process for clinical staff to communicate on a regular basis to review the care coordination plans and status of mutually served beneficiaries in accordance with applicable privacy laws such as HIPAA, the Mental Health Code and 42 CFR Part 2. This may involve the sharing of written documents and verbal reports. Both parties will collaborate on development of referral procedures and effective means of communicating the need for individual referrals. The MIHP provider will provide the MHP with names of MHP beneficiaries receiving MIHP services on a regular basis, utilizing a standardized form. Communication may include assessment/screening results, the plan of care, and discharge summaries upon request.

The MIHP and MHP will accept and use the MDHHS behavioral health consent form (Consent to Share Behavioral Health Information form [MDHHS-5515]) to disclose medical information protected under the Mental Health Code or substance use disorder information under 42 CFR Part 2.

F. Grievance and Appeals

MIHP providers and MHPs are required to establish internal processes for resolution of grievances and appeals from Medicaid beneficiaries. Medicaid beneficiaries may file a grievance or appeal on any aspect of service provided to them by the MIHP or the MHP in accordance with MIHP and MHP grievance and appeal policies.

The MIHP provider is required to direct beneficiaries to the MHP's grievance and appeal process as appropriate. The MHP is required to direct beneficiaries to the MIHP provider's grievance and appeal process as appropriate.

Both parties will participate in grievance and appeal policies and shall cooperate in identifying, processing, and promptly resolving all grievances and appeals. Both parties are responsible for informing the other about their grievance and appeal process.

G. Dispute Resolution

Both parties agree to participate in a dispute resolution process in the event that the MHP or the MIHP provider contests a decision or action by the other party related to the terms of this agreement.

The dispute resolution process should include:

- Request to the other party for reconsideration of the disputed decision or action.
- Appeal to MDHHS regarding a disputed decision by an MHP, or for a disputed decision by an MIHP provider.

H. Transportation

The MHP and the MIHP provider each have specific requirements for coordinating transportation services for Medicaid beneficiaries. These responsibilities are outlined in the MHP contract with MDHHS, the contract between the MIHP and the MHP and in the Maternal Infant Health Program Chapter of the Medicaid Provider Manual.

The MIHP provider may coordinate transportation in accordance with the established MIHP/MHP provider agreement or refer the Medicaid beneficiary to utilize the MHP transportation benefit to access MHP covered services, substance use disorder treatment, oral health services, support services and/or pregnancy-related appointments.

Transportation must be arranged and provided within a reasonable timeframe to meet the needs of the beneficiary. The provision or arrangement of transportation may not be delayed due to disagreements between the MIHP and MHP regarding financial responsibility for transportation. Disputes as to payment of transportation services may be handled through the dispute resolution process.

I. Quality Improvement

Both parties agree to have mechanisms in place to conduct Quality Improvement activities to monitor the coordination of services. The MIHP provider and the MHP shall participate in quality improvement programs and shall cooperate in conducting reviews and audits of care.

J. Governing Laws

Both parties agree that performance under this agreement will be conducted in compliance with all federal, state and local laws, regulations, guidelines, and directives.

Notification of Upcoming End Date for Electronic Visit Verification Live-In Caregiver Attestation Documentation Letter

Dear <live-in caregiver's first and last name>

You are receiving this letter because your live-in caregiver exemption is set to end on <end date>. According to Michigan Medicaid policy for electronic visit verification (EVV), the live-in status must be renewed at least annually.

If you are still living with <enter beneficiary's first and last name> and want to keep the exemption from electronic visit verification (EVV), you must complete and submit another Live-In Caregiver Attestation form, BPHASA-2421, no later than <enter due date (the end date of the existing Attestation)>. In the "Purpose of Attestation" area on the form, check the box for "Renewal." If there has not been a change of address from the approved Attestation form on file, no additional documentation for proof of address is needed for the renewal.

If there has been a change in the existing address on file, new proof of address documentation is needed (see BPHASA-2421 instructions page for a list of acceptable documentations).

Once the BPHASA-2421 Attestation form is complete with documentation (if needed), submit it to:

<enter Approving Entity's information>

Sincerely,

<enter Approving Entity signature>

Michigan Department of Health and Human Services
Special Services Prior Approval - Request/Authorization
Completion Instructions

The MSA-1653-B must be used by Medicaid enrolled DME, Medical Suppliers, Orthotists, Prosthetists, Hearing Aid Dealers, Audiologists and Cochlear Manufacturers.

MDHHS requests that the MSA-1653-B be typewritten to facilitate processing. A Word fill-in enabled version of this form can be downloaded from the MDHHS website www.michigan.gov/medicaidproviders >> Policy, Letters & Forms. The form is generally self-explanatory. For information on required modifiers, documentation, and appropriate quantity amounts, refer to the following documents:

- Standards of Coverage portion of the provider-specific chapters of the Medicaid Provider Manual.
- Billing & Reimbursement for Professionals Chapter of the Medicaid Provider Manual.
- Provider-specific databases on the MDHHS website. www.michigan.gov/medicaidproviders >> Billing and Reimbursement >> Provider Specific Information.

Completion of this form is as follows:

Box 1	MDHHS Use Only
Box 12	Check Yes if beneficiary is in a Nursing Facility or No if the beneficiary is not in a Nursing Care Facility. If Yes, include the Nursing Facility name, address and phone number.
Box 20	Enter a complete description of the item requested, including manufacturer, model, style, etc. DME, orthotics and prosthetics, must provide the brand name, model, and catalog or part number.
Box 21	Enter the HCPCS Procedure Code.
Box 22	Enter the applicable HCPCS Modifier.
Box 25	Enter the beneficiary's primary and secondary diagnoses or the CSHCS qualifying diagnosis (list both the code and description). DME/POS providers must submit the prescription/CMN with this form.
Box 26	Any additional remarks regarding the request should be listed in this box such as verbal authorization date, retroactive date of service if being requested. Provide other insurance coverage for services requested.
Box 28	Must be completed for all requests.

Form Submission

PA request forms and required documentation for all eligible Medicaid beneficiaries must be mailed or faxed to:

MDHHS – Behavioral and Physical Health and Aging Services Administration
Program Review Division
P.O. Box 30170
Lansing, Michigan 48909

Fax Number: (517) 335-0075

To check the status of a PA request, contact the MDHHS – Behavioral and Physical Health and Aging Services Administration, Program Review Division via telephone at **1-800-622-0276**.

Initials and Date

The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person's eligibility.

DCH-0893, VISION SERVICES APPROVAL/ORDER INSTRUCTIONS

GENERAL INSTRUCTIONS

The DCH-0893 must be used by Medicaid enrolled vision providers to request Prior Approval (PA) and/or order optical hardware for vision services. MDHHS requests that the DCH-0893 be typewritten to facilitate processing. A fill-in enabled copy of this form can be downloaded from the MDHHS website www.michigan.gov/medicaidproviders >> Policy, Letters & Forms. The request for PA must be complete and of adequate clarity to permit a determination of the appropriateness of the service without examination of the beneficiary. The form is generally self-explanatory. The following instructions are to assist in completing the DCH-0893.

Note

- If prior authorization is required, attach documentation of medical necessity and the detailed training plan (if applicable) pursuant to the Medicaid Provider Manual.
- If applicable, complete and attach form MSA-0891, Provision of Low Vision Services and Aids Support Documentation.
- If applicable, complete and attach form MSA-0892, Documentation of Medical Necessity for the Provision of Contact Lenses.

Items	Instructions
1	MDHHS use only
2 – 3	Related to the ordering provider.
4	Provide the date the service and/or hardware is being ordered.
5 – 7	Related to the ordering provider
8 – 9	Related to the prescribing provider
10	Ordering Provider Signature requires a hand-written signature (i.e., a stamped signature is unacceptable).
11 – 15	Beneficiary information which can be obtained from the mihealth card or, for Children's Special Health Care Services (CSHCS) enrollees, from the Client Eligibility Notice.
16	The diagnosis(es) code(s) reflecting the greatest specificity for the diagnosis(es) from the International Classification of Diseases (ICD). If appropriate, each eye's diagnosis(es) must be included.
17 – 21	Relate to services and materials being requested and applicable charges. <ul style="list-style-type: none">• Lines 01 through 07 are available for lenses, frames, and/or special characteristics (e.g., prisms, high adds) or other services (e.g., contact lens, orthoptics), if applicable.• Item 18 (Procedure Code) must reflect the appropriate CPT/HCPCS procedure code.• Item 19 (Modifier) must reflect a valid modifier applicable for the listed procedure code.• Item 20 (Quantity) must reflect the appropriate quantity for each procedure code. Each spectacle lens procedure code represents one lens. When requesting approval for, or ordering, a pair of spectacle lenses using the same procedure code, use a quantity of "2."• Item 21 (Charge) is completed only for items without fee screens requiring prior approval. Enter your usual and customary charge.
22 – 24	Relate to the type/style of lens(es) and frame requested.
25	Enter all lens specifications. The width and style must be consistent with the procedure code appearing in Item 18.
26	Additional instructions to the vision contractor necessary for proper fabrication.

27 Specifications from the beneficiary's previous lens(es). This is applicable for diopter changes or replacements, as well as when requesting frames only. **Note:** The only time this item is left blank is for initial spectacles.

28 – 29 MDHHS use only.

SUBMISSION INSTRUCTIONS

Prior Approvals (PA) requests should be received by the MDHHS Vision Contract Manager no more than 30 calendar days from the date of order. If received beyond 30 days, the provider must include a detailed explanation of why the form submission was delayed.

The provider should retain a copy of the completed form for their file and mail or fax the DCH-0893 to:

**MDHHS Vision Contract Manager
Program Review Division
PO Box 30170
Lansing, MI 48909
Fax: 517-335-0075**

Upon completion of the PA process, a copy of the DCH-0893 is returned to the provider.

Optical Hardware Order - Orders placed with the vision contractor must be received no more than 30 calendar days after the date of order. If beyond the 30 days, the contractor will return the order to the provider who must explain to the Medicaid Program Review Division why the form submission was delayed and request an exception from the time limit.

When placing an order with the contractor, the provider should retain a copy of the completed form for their file and submit the DCH-0893 to:

**Classic Optical Laboratories
3710 Belmont Avenue
PO Box 1341
Youngstown, OH 44501-1341**

**Telephone: 888-522-2020
Fax: 888-522-2022**

Online Address: <http://www.classicoptical.com>

Note: Optical hardware orders may also be submitted through an online process with the vision contractor. To utilize on-line submission, contact Classic Optical Laboratories for additional information.
