Payment for a non-contract hearing aid may not exceed Medicaid's maximum allowable amount unless the documentation submitted with the MSA-1653-B supports the need for the more advanced technology found with a non-contract hearing aid. When documentation of the need for a non-contract hearing aid is provided, the payment is the acquisition cost for the non-contract hearing aid. Acquisition cost consists of the manufacturer's invoice price, minus any discounts, and includes actual shipping costs.

Medicaid requires all non-contract hearing aids to include a manufacturer's equipment warranty that covers parts and labor for all repairs and modifications for a 24-month period, and loss and/or damaged replacements for a 12-month period. The warranty is included in the hearing aid's acquisition cost and should not be charged separately.

SECTION 5 – HEARING AID SUPPLIES, ACCESSORIES, AND REPAIRS

5.1 STANDARDS OF COVERAGE

Hearing aid supplies and accessories are a covered benefit when medically necessary. A list of approved supplies, accessories, and maximums is available on the Hearing Aid Supplies and Accessories list located on the MDHHS website. (Refer to the Directory Appendix for website information.)

5.2 PRIOR AUTHORIZATION REQUIREMENTS

PA is required for the following hearing aid supplies and accessories:

- Any single item billed with requested payment amounts over the maximum fee as identified on the MDHHS Hearing Aid Dealers Fee Schedule.
- An item that exceeds the frequency standards of coverage.
- Items when the sum of all payments for supplies/accessories billed within the past year is over the maximum fee as identified on the MDHHS Hearing Aid Dealers Fee Schedule.
- Battery charger or rechargeable battery.

A list of supplies/accessories provided within the past year and a copy of the manufacturer's invoice showing the invoice price of the supplies/accessories, applicable discounts, and shipping charges must be submitted with the MSA-1653-B.

5.3 DOCUMENTATION

Applicable documentation to be maintained by the provider includes:

- A list of hearing aid supplies/accessories provided to the beneficiary within the past year.
- A copy of the manufacturer's invoice showing the invoice price of the supplies/accessories, applicable discounts, and shipping charges.

5.4 PAYMENT RULES

Refer to the MDHHS Hearing Aid Dealers Fee Schedule for maximum payment limits.

5.5 DISPOSABLE HEARING AID BATTERIES

5.5.A. STANDARDS OF COVERAGE

Medicaid covers replacement of disposable hearing aid batteries, as appropriate, up to a quantity of 36 batteries per hearing aid per DOS when dispensed by a hearing aid dealer, audiologist, hearing center, or medical supplier. A maximum of 72 batteries per aid per year is covered.

Disposable hearing aid batteries must be ordered by a Medicaid enrolled physician or qualified non-physician medical practitioner (e.g., physician assistant, nurse practitioner,

Medicaid Provider Manual

clinical nurse specialist). The dispensing supplier may require a written prescription from the prescribing provider. The prescription must contain all the following:

- Beneficiary's name;
- Beneficiary's date of birth;
- Prescribing practitioner's name, address, and telephone number;
- Prescribing practitioner's signature;
- Date the prescription was written;
- Description of the item prescribed, including the battery size;
- Quantity to be dispensed and number of applicable refills. Providers should note the item maximums when determining these amounts; and
- Diagnosis supporting the medical necessity of the item.

Prescriptions are valid for one year from the date that the prescription was written unless the termination date is otherwise stated by the authorized prescribing practitioner on the prescription.

All batteries must be dispensed in the original packaging and must be dispensed at least one year before the expiration date shown on the package. The establishment of a "battery club," where batteries are automatically mailed to a beneficiary regardless of need, is not allowed. Hearing aid dealers and medical suppliers may not bill for replacement of disposable batteries for cochlear implant devices.

5.5.B. PRIOR AUTHORIZATION REQUIREMENTS

PA is required for quantities exceeding the standards of coverage. Documentation must accompany the MSA-1653-B to substantiate the need for additional batteries.

5.5.C. PAYMENT RULES

Refer to the MDHHS Hearing Aid Dealers Fee Schedule for maximum payment limits.

5.6 REPLACEMENT EARMOLDS

Beneficiaries who use hearing aids that require custom earmolds are eligible for replacement earmolds after the 90-day dispensing period. PA is not required when the earmold standards of coverage are met.

5.6.A. STANDARDS OF COVERAGE

Age 3 Years or Under	Up to four times per 12 months
Age 3 to 21 Years	Up to two times per 12 months
Age 21 Years or Over	Once every 12 months

Medicaid Provider Manual

5.6.B. PRIOR AUTHORIZATION REQUIREMENTS

PA is required for replacements exceeding the standards of coverage. Documentation must accompany the MSA-1653-B to substantiate the need for additional earmold replacements.

5.6.C. PAYMENT RULES

Refer to the MDHHS Hearing Aid Dealers Fee Schedule for maximum payment limits.

5.7 HEARING AID REPAIRS AND MODIFICATIONS

5.7.A. STANDARDS OF COVERAGE

Providers may bill for repairs and modifications only to the most recently dispensed out-of-warranty hearing aid. Repairs required after the hearing aid repair warranty has expired are reimbursed based on the contracted rate and will have a new warranty period specified per the contract. MDHHS volume purchase contract vendors must continue to honor the repair pricing of the contract under which the hearing aid was sold for the life of the hearing aid. The vendor is responsible for all shipping costs related to warranty and non-warranty equipment repairs. When a warranty covered hearing aid requires a repair by the manufacturer, MDHHS will not reimburse the hearing aid dealer/audiologist for hearing aid fitting/checking services.

Repairs are not covered for back-up aids or devices.

The replacement of a hearing aid will be considered when the cost of the equipment repair is greater than the replacement. When submitting a PA request for the replacement, the provider must provide a statement regarding the cost to repair the aid/device versus replacement.

5.7.B. PRIOR AUTHORIZATION REQUIREMENTS

PA **is** required for repairs and modifications to out-of-warranty hearing aids if any of the following apply:

- The requested payment amount is over the maximum payment limit as published on the MDHHS Hearing Aid Dealers Fee Schedule. (Refer to the Directory Appendix for website information.)
- More than two separate repairs or modifications have been billed within the previous year.
- The hearing aid was not purchased under the MDHHS volume purchase contract.

Documentation must be submitted with the MSA-1653-B. If the manufacturer's invoice is not included with the initial PA request, the MDHHS determination letter will indicate an approved fee of \$0.01 for PA purposes; the reimbursement fee will be updated once the actual invoice is submitted to MDHHS for pricing. A repair processing fee of \$19.20 per

Medicaid Provider Manual

aid may be added to the repair cost for hearing aids that are not covered under any warranty.

The repair or modification of a hearing aid not purchased by Medicaid may be covered only when all the following apply:

- The beneficiary's hearing level, as supported by an audiogram, meets Medicaid coverage criteria; and
- The aid itself meets Medicaid coverage criteria.

The MSA-1653-B for this type of repair or modification must include the date of purchase, warranty expiration date, and the current audiogram.

5.7.C. DOCUMENTATION

Applicable documentation to be maintained in the beneficiary's record includes an itemization of materials used to repair the hearing aid and related labor costs.

5.7.D. PAYMENT RULES

Medicaid's payment for hearing aid repairs or modifications includes no more than the actual repair cost plus a \$19.20 processing fee per aid. Actual repair cost consists of acquisition cost of materials used for the repair, related labor costs, and shipping costs. The \$19.20 processing fee may only be added to repairs that are not covered under a warranty. The maximum payment limit is published on the MDHHS Hearing Aid Dealers Fee Schedule.

Non-warranty repair pricing for hearing aids purchased under the MDHHS volume purchase contract are fixed rates established by the contract under which the hearing aid was sold. These rates apply for the life of the hearing aid.

SECTION 6 – OTHER HEARING DEVICES

6.1 ASSISTIVE LISTENING DEVICES

An Assistive Listening Device (ALD) is defined as a special purpose electro-acoustic device designed to enhance receptive communication (e.g., Pocket Talker).

6.1.A. STANDARDS OF COVERAGE

All Ages	ALDs are a benefit for beneficiaries when all the following conditions are met: <ul style="list-style-type: none">▪ Patient management of a personal hearing aid is considered unrealistic and/or frequency specific audiometric data cannot be obtained in each ear;▪ The beneficiary has not received a Medicaid covered ALD within the last three years;▪ The ALD is provided for situations involving one-on-one conversation.
-----------------	--

6.1.B. PRIOR AUTHORIZATION REQUIREMENTS

PA is required for all ALDs.

All Ages	The following documentation must be submitted with the MSA-1653-B: <ul style="list-style-type: none">▪ A manufacturer's invoice showing the item acquisition cost;▪ A letter or other supporting medical documentation from the audiologist demonstrating why a personal hearing aid is inappropriate and the recommended type of ALD;▪ An audiogram signed and dated by the audiologist within six months prior to dispensing the device, or documentation showing that frequency-specific audiometric data could not be obtained in each ear within six months prior to dispensing the device.
-----------------	--

6.1.C. DOCUMENTATION

Applicable documentation to be maintained in the beneficiary's record includes all the following:

- A letter or other supporting medical documentation from the audiologist demonstrating why a personal hearing aid is inappropriate and the recommended type of ALD;
- An audiogram signed and dated by the audiologist within six months prior to dispensing the device, or documentation showing that frequency-specific audiometric data could not be obtained in each ear; and
- A copy of the manufacturer's invoice showing the ALD model, serial number, invoice price, applicable discounts, and shipping charges.

6.1.D. PAYMENT RULES

Medicaid's payment for an ALD includes the provider's acquisition cost plus a percentage over cost. Acquisition cost consists of the manufacturer's invoice price, minus any discounts, and includes actual shipping costs. Medicaid does not reimburse providers for a separate dispensing fee for ALDs.

6.2 COCHLEAR IMPLANTS

Cochlear implants are devices that replace the function of the cochlear structures and provide electrical energy to auditory nerve fibers. They require a surgically placed internal device and external hardware. The surgery must be performed by a licensed medical doctor (MD) or doctor of osteopathy (DO) who specializes in otolaryngology and has training and expertise in the surgical procedure.

Cochlear implantation may be an option to improve communication skills for adults with a moderate to profound hearing loss and for children with a severe to profound hearing loss who receive limited or no benefit from hearing aids.

6.2.A. STANDARDS OF COVERAGE

Unilateral and bilateral cochlear implantation is covered with PA for beneficiaries meeting the standards of coverage and audiological criteria. Implants must be FDA approved and used according to FDA labeled indications. Cochlear implants are covered for pre- or post-lingual deafness.

Hearing aids, hearing aid services, and accessories may be covered after the beneficiary has received a unilateral cochlear implant with PA. Documentation must be submitted to support improvement in speech perception abilities using a hearing aid in the opposite ear. Documentation of hearing aid audibility measures (i.e., speech mapping) on prescriptive hearing aid measurements may be submitted for beneficiaries who are unable to participate in speech perception testing.

All Ages	<p>In addition to meeting the cochlear implant audiological criteria, all the following requirements must be met for unilateral and bilateral implantation:</p> <ul style="list-style-type: none">▪ A letter from the treating otolaryngologist establishing medical necessity and recommending implantation.▪ For beneficiaries with bilateral sensorineural hearing loss, a minimum of a three-month trial of an appropriately-fitted hearing aid(s). The trial period may be waived or shortened with appropriate documentation of medical necessity.▪ For beneficiaries with single sided deafness/unilateral hearing loss or asymmetric hearing loss, a minimum of a one-month trial of appropriately-fitted CROS hearing aid or another suitable hearing device. The trial period may be waived with appropriate documentation of medical necessity.▪ Evidence of a functioning auditory nerve.▪ An accessible cochlear lumen structurally suited to implantation. No evidence of lesions in the auditory nerve and acoustic areas of the central nervous system. This may be demonstrated by an appropriate radiological evaluation.
-----------------	--

Medicaid Provider Manual

	<ul style="list-style-type: none">▪ Freedom from middle ear infection or any other active disease.▪ No medical or behavioral health contraindications for anesthesia or surgery.▪ Cognitive ability to use auditory cues.▪ Psychological development, motivation of the beneficiary, and/or commitment of the beneficiary and family/caregiver(s) to undergo a program of prosthetic fitting, training, and long-term rehabilitation.▪ Realistic expectations of beneficiary and/or family/caregiver(s) for post-implant educational/vocational rehabilitation, as appropriate.▪ Reasonable anticipation by treating providers that the cochlear implant(s) will confer awareness of speech at conversational levels.▪ Documented intervention or school placement, as appropriate. Documentation may include the Individualized Family Service Plan (IFSP) or Individualized Education Plan (IEP) involving individuals with specialization in the education of children who are deaf or hard of hearing.
--	--

6.2.A.1. AUDIOLOGICAL CRITERIA

Bilateral Sensorineural Hearing Loss Under Age 18 Years	<ul style="list-style-type: none">• Diagnosis of bilateral severe to profound sensorineural hearing loss defined as pure tone average (PTA) equal to or greater than 70 dB HL, or level appropriate for model to be implanted, averaged over 500-4000 Hz (ANSI 1989) in an unaided condition. For children under 24 months, electrophysiological assessment must corroborate behavioral testing.• Lack of auditory skills development or minimal hearing aid benefit documented by one of the following:<ul style="list-style-type: none">➢ Results or outcomes of parent questionnaire (i.e., Infant Toddler-Meaningful Auditory Integration Scale [IT-MAIS]).➢ Word recognition scores equal to or less than 60 percent under the best aided condition or score appropriate for model to be implanted, on open set tests (i.e., Multisyllabic Lexical Neighborhood Test or Lexical Neighborhood Test.➢ Other age-appropriate developmental tests.
Bilateral Sensorineural Hearing Loss Age 18 Years and Older	<ul style="list-style-type: none">▪ Diagnosis of bilateral moderate to profound sensorineural hearing loss defined as a PTA equal to or greater than 40 dB HL, or level appropriate for model to be implanted, averaged over 500-4000 Hz in an unaided condition.▪ Minimal hearing aid benefit documented by a score of equal to or less than 50 percent under best-aided conditions or score appropriate for model to be implanted, on an open-set sentence recognition test (i.e., Hearing in Noise Test [HINT] Sentences or AzBio Sentences).

Medicaid Provider Manual

Single Sided Deafness/Unilateral Hearing Loss Age 5 Years and Older	<ul style="list-style-type: none">▪ Diagnosis of severe to profound sensorineural hearing loss in the ear to be implanted defined as a PTA equal to or greater than 80 dB HL or level appropriate for model to be implanted, averaged over 500-4000 Hz.▪ In the contralateral ear, normal or near normal hearing as defined as a PTA equal to or better than or 30 dB HL averaged over 500-4000 Hz.▪ For beneficiaries age 18 years and older, limited hearing aid benefit from an appropriately fitted unilateral hearing device documented as a score of less than or equal to 5 percent on a Consonant Nucleus Consonant (CNC) word test.▪ For beneficiaries under age 18 years, insufficient functional access to sound in the ear to be implanted documented by an aided speech perception test score of 5 percent or less on developmentally appropriate monosyllabic word lists when tested in the ear to be implanted alone.
Asymmetric Hearing Loss Age 5 Years and Older	<ul style="list-style-type: none">▪ Diagnosis of profound sensorineural hearing loss in the ear to be implanted defined as a PTA equal to greater than 90 dB HL averaged over 500-4000 Hz in one ear▪ In the contralateral ear, mild to moderately severe sensorineural hearing loss defined as a PTA of equal to or up to 55 dB HL averaged over 500-4000 Hz.▪ Hearing loss difference of at least 15 dB in PTA between ears.▪ For beneficiaries age 18 years and older, limited hearing aid benefit from an appropriately fitted unilateral hearing device documented as a score of less than or equal to 5 percent on a Consonant Nucleus Consonant (CNC) word test.▪ For beneficiaries under age 18 years, insufficient functional access to sound in the ear to be implanted documented by an aided speech perception test score of 5 percent or less on developmentally appropriate monosyllabic word lists when tested in the ear to be implanted alone.

6.2.B. PRIOR AUTHORIZATION

Unilateral and bilateral cochlear implantation require PA. All audiological evaluations must be signed and dated by the audiologist and performed within one year of the date of the PA request unless otherwise specified.

Medicaid Provider Manual

All Ages	<p>The following documentation must be submitted with the MSA-1653-B:</p> <ul style="list-style-type: none">▪ Documentation of complete audiologic evaluation that defines the type and degree of hearing loss in each ear and applicable assessment results (e.g., speech recognition test scores and/or parent questionnaire) confirming the audiological criteria standards of coverage (as defined above) applicable to the beneficiary have been met.▪ A letter from the treating otolaryngologist, with evaluation supporting medical necessity and treatment recommendations.▪ Documentation of appropriately fitted hearing aids (for the trial period) verified through prescriptive measurements (e.g., aided audiograms).▪ Documentation of minimal or no benefit from appropriate amplification (e.g., hearing aids) following an adequate period of auditory training (minimally three months) using the best ear responses. The trial period may be waived or shortened with appropriately submitted medical documentation.▪ Documentation of an accessible cochlear lumen structurally suited to implantation (e.g., no evidence of lesions in the auditory nerve and acoustic areas of the central nervous system). This must be demonstrated by an appropriate radiological evaluation.▪ Identification of the cochlear manufacturer of the internal device, with the model of the external processor.▪ Identification of the anticipated side to be implanted (unilateral only).
Age 12 Months Through 17 Years	<p>In addition to the documentation for beneficiaries of all ages, the following must also be submitted for beneficiaries aged 12 months through 17 years:</p> <ul style="list-style-type: none">▪ Speech and language evaluation report; and▪ Documented intervention or school placement, as appropriate. Documentation may include the IFSP or IEP involving individuals with specialization in the education of children who are deaf or hard of hearing.

6.2.C. DOCUMENTATION

Applicable documentation to be maintained in the beneficiary's record includes:

- Complete audiologic evaluation that defines the type and degree of hearing loss in each ear and applicable assessment results (e.g., speech recognition test scores and/or parent questionnaire) confirming the audiological criteria standards of coverage applicable to the beneficiary have been met.
- A letter from the treating otolaryngologist, with evaluation supporting medical necessity and treatment recommendations.
- Documentation of appropriately fitted hearing aids verified through prescriptive measurements (e.g., aided audiograms).
- Aided speech perception test battery results.

Medicaid Provider Manual

- Documentation of minimal or no benefit from appropriate amplification (i.e., hearing aids) following an adequate period of auditory training (minimally three months) using the best ear responses. The trial period may be waived or shortened with medical documentation.
- Documentation of an accessible cochlear lumen structurally suited to implantation. No evidence of lesions in the auditory nerve and acoustic areas of the central nervous system. This must be demonstrated by an appropriate radiological evaluation.
- Identification of the cochlear manufacturer of the internal device and model of the external processor.
- Identification of the anticipated side to be implanted (unilateral only).

6.2.D. PROGRAMMING/MAPPING

Cochlear implant mapping is the programming of the speech processor to the specifications and needs of its user following cochlear implant surgery. Mapping is used to analyze sound and convert the speech information into electrical impulses to the implanted electrodes. An initial post-operative session may be billed once per beneficiary per implant. Subsequent programming/mapping sessions may be billed up to five per year per implant. If additional sessions are needed, PA is required.

6.2.E. REPAIRS, ACCESSORIES, AND REPLACEMENT PARTS STANDARDS OF COVERAGE

Cochlear implant repairs, accessories, replacement parts, internal implants, and external speech processors may be covered when dispensed by a cochlear implant manufacturer and the applicable standards of coverage have been met. Charges should reflect no more than the usual and customary (U&C) charge to the general public.

Replacement of the internal cochlear implant device is covered with PA in cases when the audiologist or physician (e.g., otolaryngologist) indicates the function of the internal device has failed and is no longer under warranty. A letter from the manufacturer corroborating the internal device failure is required.

Replacement of the cochlear implant external speech processor with a new same generation or new upgraded speech processor is covered with PA when documentation from the licensed audiologist or physician substantiates the need for the replacement processor. Payment for the speech processor includes an initial supply of batteries.

Internal Cochlear Implant or Speech Processor Repair or Replacement	<p>Internal cochlear implant devices and external speech processors may be repaired or replaced when all the following apply:</p> <ul style="list-style-type: none">▪ The device was in continuous use prior to the repair or replacement.▪ A licensed audiologist or physician substantiates the functional need for the repair or replacement.▪ The device is FDA approved.▪ Replacements only: the device is out of warranty and worn for at least four years, or the device is irreparable or lost.
--	--

Medicaid Provider Manual

	For replacement of a speech processor with an upgraded model, documentation must substantiate that the current model is obsolete or newer generation technology provides additional capacity for functional auditory-based improvement.
Accessories and Replacement Parts	<p>Accessories and replacement parts may be covered when all the following apply:</p> <ul style="list-style-type: none">▪ The accessory or replacement part is no longer covered by the manufacturer's warranty.▪ A licensed audiologist or physician substantiates the need for the item.▪ The item will be used on a cochlear implant device that was in continuous use prior to dispensing the item.▪ The item will be used on an FDA-approved cochlear implant device.

6.2.F. REPAIRS, ACCESSORIES, AND REPLACEMENT PARTS PRIOR AUTHORIZATION REQUIREMENTS

PA is required for the following repairs, accessories, and replacement parts:

- External sound processors;
- Cochlear repairs, accessories, or implant parts when the sum of all charges exceeds the daily reimbursement maximum published on the MDHHS Hearing Services Fee Schedule;
- Cochlear repairs, accessories, or implant parts when the sum of all charges within the past year exceeds the yearly reimbursement maximum published on the MDHHS Hearing Services Fee Schedule; and
- Items exceeding the frequency maximums published on the MDHHS Cochlear Implant Replacement Parts and Accessories list. (Refer to the Directory Appendix for website information.)

Some replacement parts are not subject to these reimbursement maximums. Refer to the MDHHS Cochlear Implant Replacement Parts and Accessories list. (Refer to the Directory Appendix for website information.)

All Ages	<p>When PA is required, the following documentation must be submitted with the MSA-1653-B:</p> <ul style="list-style-type: none">▪ Documentation from the licensed audiologist or physician, signed and dated within the previous six months, that substantiates the need for the part(s) and/or repair; and▪ Manufacturer's invoice itemizing the materials used to repair the device and the rationale for any related labor costs.
-----------------	--

6.2.G. REPLACEMENT PARTS AND ACCESSORIES LIST

A list of approved cochlear implant replacement parts and accessories is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

6.2.H. NON-COVERED ITEMS

Repair or replacement of spare equipment (e.g., old parts and accessories in working condition for back-up use in emergencies) is not covered.

6.3 BONE ANCHORED HEARING DEVICES

Some beneficiaries may have physical or medical conditions that prevent them from wearing traditional hearing aids. A BAHD is an alternative hearing instrument for those who can benefit when there is no other suitable aid.

6.3.A. IMPLANTABLE

A BAHD or aid, also known as an auditory osseointegrated device, is an implantable bone-conduction hearing aid that allows direct bone-conduction of sound through an implant. The device has both implanted and external components. The implanted component is attached to the skull bone behind the ear. The external component is a speech processor connected to an implanted abutment or internal magnet. The surgically implanted components and initial external speech processor are covered as a bundled procedure at the hospital benefit level.

All device repairs and replacements, including the processor and batteries, are covered as specified on the MDHHS Hearing Services Fee Schedule.

6.3.B. NON-IMPLANTABLE

BAHD sound processors can also be used without surgery when they are attached to the head by a headband device or adhesive adapter placed behind the ear. A headband system is the option for beneficiaries who meet the BAHD audiological criteria but are not appropriate surgical candidates and need hearing assistance via bone conduction.

6.3.C. STANDARDS OF COVERAGE

Unilateral and bilateral implantable and non-implantable BAHDs are covered for beneficiaries meeting the standards of coverage and audiological criteria. An air conduction hearing aid must also be contraindicated, failed, or not appropriate for the beneficiary's medical condition. Conditions not meeting these criteria are considered investigational/experimental and are not covered. Beneficiaries must be five years of age or older for surgically implanted BAHDs.

Medicaid Provider Manual

All Ages	<ul style="list-style-type: none">Has documented unilateral or bilateral conductive or mixed hearing loss or unilateral profound sensorineural hearing loss as defined under BAHD audiological criteria.Use of an FDA-approved device in accordance with its labeled indications.Has at least one of the following conditions:<ul style="list-style-type: none">Congenital malformation(s) of the middle/external ear or microtia;Severe chronic otitis externa and/or chronic suppurative otitis media with chronic drainage preventing use of conventional air conduction hearing aids;Conductive hearing loss due to ossicular disease and is not appropriate for surgical correction;Tumors of the external ear canal and/or tympanic cavity;Unilateral sensorineural hearing loss (single-sided deafness); orCondition that contraindicates an air conduction hearing aid.
-----------------	--

6.3.C.1. AUDIOLOGICAL CRITERIA [CHANGE MADE 7/1/2025]

Unilateral or Bilateral Conductive or Mixed Hearing Loss	<ul style="list-style-type: none">PTA bone conduction threshold less than or equal to 65 dB HL or level appropriate for model to be implanted using the four-frequency average of 500, 1000, 2000 and 4000 Hz in ear to be implanted.(text deleted per bulletin MMP 25-03)
Unilateral Sensorineural Hearing Loss	<ul style="list-style-type: none">Confirmed profound hearing loss (greater than or equal to 90 dB HL using the four-frequency average of 500, 1000, 2000 and 4000 Hz) in one ear, with normal hearing (defined as a PTA air-conduction hearing threshold of better than or equal to 20 dB HL) on the contralateral side.
Bilateral Implantation or Devices	<ul style="list-style-type: none">Bilateral symmetrical conductive or mixed hearing loss with a PTA bone conduction threshold less than or equal to 65 dB HL, or level appropriate for model to be implanted, in each ear using the four-frequency average of 500, 1000, 2000 and 4000 Hz; andBone conduction threshold of less than or equal to 15 dB HL average difference between ears.

6.3.D. PRIOR AUTHORIZATION

Bilateral device implantation or dispensing requires PA.

All Ages	<p>The following documentation, dated within six months prior to the surgical implantation or dispensing of the device, must be submitted with the MSA-1653-B:</p> <ul style="list-style-type: none">Complete audiology report (i.e., pure-tone audiogram) that defines the type and degree of hearing loss in each ear.History of hearing aid use or documentation supporting inability to use an air-conduction hearing aid.Letter from treating otolaryngologist stating medical need.
-----------------	---

Medicaid Provider Manual

6.3.E. DOCUMENTATION

Applicable documentation to be maintained in the beneficiary's record includes:

- Complete audiology report (e.g., pure-tone audiogram) that defines the type and degree of hearing loss in each ear.
- History of hearing aid use or documentation supporting inability to use an air-conduction hearing aid.
- Letter from treating otolaryngologist stating medical need.

6.3.F. REPAIRS, ACCESSORIES, AND REPLACEMENT PARTS STANDARDS OF COVERAGE

Replacement of the internal implanted BAHD or external sound processor is covered in cases when the audiologist or physician (i.e., otolaryngologist) indicates the function of the device has failed and is no longer under warranty. Documentation from the licensed audiologist or physician to substantiate the need for the replacement must be submitted with the MSA-1653-B. Payment for the sound processor includes an initial supply of batteries.

BAHD accessories, replacement parts, and repairs may be covered when dispensed by a cochlear implant manufacturer and applicable standards of coverage have been met. All charges for BAHD accessories, replacement parts, and repairs are to reflect no more than the usual and customary (U&C) charge to the general public.

Implant or Sound Processor Repair or Replacement	<p>Implants and external sound processors may be repaired or replaced when all the following apply:</p> <ul style="list-style-type: none">▪ The device was in continuous use prior to the repair or replacement.▪ A licensed audiologist or physician substantiates the functional need for the repair or replacement.▪ The device is FDA-approved.▪ Replacements only: the device is out of warranty and worn for at least four years, or the device is irreparable or lost. <p>For replacement of a sound processor with an upgraded model, documentation must substantiate that the current model is obsolete or newer generation technology provides additional capacity for functional auditory-based improvement.</p>
Accessories and Replacement Parts	<p>Accessories and replacement parts may be covered when all the following apply:</p> <ul style="list-style-type: none">▪ The accessory or replacement part is no longer covered by the manufacturer's warranty.▪ A licensed audiologist or physician substantiates the need for the item.▪ The item will be used on a BAHD that was in continuous use prior to dispensing the item.▪ The item will be used on an FDA-approved BAHD.

Medicaid Provider Manual

6.3.G. REPAIRS, ACCESSORIES, AND REPLACEMENT PARTS PRIOR AUTHORIZATION REQUIREMENTS

Replacement of a BAHD external sound processor is not covered more frequently than once every four years. Replacements are not covered during the warranty period.

PA **is** required for the following repairs, accessories, or replacement parts:

- Bilateral external sound processors;
- BAHD repairs, accessories, or replacement parts when the sum of all charges for parts and repairs exceeds the daily reimbursement maximum published on the MDHHS Hearing Services Fee Schedule;
- BAHD repairs, accessories, or replacement parts when the sum of all charges for parts and repairs within the past year exceeds the yearly reimbursement maximum published on the MDHHS Hearing Services Fee Schedule;
- Items exceeding the frequency maximums indicated on the Bone Anchored Hearing Device Replacement Parts and Accessories list. (Refer to the Directory Appendix for website information.)

Some replacement parts are not subject to these reimbursement maximums. Refer to the Bone Anchored Hearing Device Replacement Parts and Accessories list. (Refer to the Directory Appendix for website information.)

All Ages	<p>The following documentation, dated within six months prior to the dispensing of the part or repair, must be submitted with the MSA-1653-B:</p> <ul style="list-style-type: none">▪ Documentation from the licensed audiologist and/or other medical professional to substantiate the need for the part(s) and/or repair.▪ Manufacturer's invoice itemizing the materials used to repair the device and the rationale for any related labor costs.
-----------------	---

6.3.H. REPLACEMENT PART MAXIMUMS

A list of approved BAHD replacement parts and maximums is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

6.3.I. NON-COVERED ITEMS

Repair or replacement of spare equipment (e.g., old parts and accessories in working condition for back-up use in emergencies) is not covered.

SECTION 1 – GENERAL INFORMATION

1.1 OVERVIEW

On January 16, 2014, the Centers for Medicare & Medicaid Services (CMS) released the Home and Community Based Services (HCBS) Final Rule (CMS 2249-F/2296-F). The HCBS Final Rule specifies requirements for programs offering HCBS under the 1915(c), 1915(i), 1915(k), some 1915(b)(3) and 1115 authorities of the Social Security Act. These requirements, as further specified in this chapter, aim to improve the quality of the lives of individuals, allowing them to live and receive services in the least restrictive setting possible with full integration in the community. The Michigan Department of Health and Human Services (MDHHS) is responsible for ensuring all requirements are met.

The HCBS Final Rule includes the following:

- Requirements for the person-centered planning process to ensure individuals are involved in planning their services and supports to the maximum extent possible and that their wishes are reflected in the person-centered service plan.
- Requirements for HCBS and the settings in which they are provided. Settings in which individuals live (residential) and settings where individuals go to receive services (non-residential) are affected by the HCBS Final Rule. The settings requirements aim to ensure community integration and to ensure individuals receiving Medicaid HCBS have the same opportunities as individuals in those settings who are not receiving Medicaid HCBS.
- Allows CMS to approve or renew demonstration and waiver programs for five years if individuals are dually eligible for Medicare and Medicaid.
- Requires a 30-day public notice and comment period, including at least one non-electronic form of communication, for:
 - Substantive changes, including but not limited to, revisions to services available under the waiver including: elimination or reduction of services, or reduction in the scope, amount, and duration of any service; a change in the qualifications of service providers; changes in rate methodology; or a constriction in the eligible population; and
 - Any significant proposed change in its methods and standards for setting payment rates for services in accordance with federal law.
- Allows states to combine target groups based on diagnosis, disability, Medicaid eligibility groups, and/or age under one waiver authority.
- Provides requirements for independent assessment. This is a face-to-face assessment, conducted by a conflict-free individual or agency. The assessment is based on the individual's needs and strengths and is part of the person-centered planning process. Telemedicine is an acceptable method of assessment. Federal statute requires the State to provide for an independent assessment of need to establish a person-centered service plan. The assessment must be conducted at least every 12 months, or as requested by the individual or their representative, and/or as needed when there is a significant change in the individual's services or support needs. The individual's person-centered service plan must be updated to reflect this change in needs. For more information, refer to the federal regulation.

Medicaid Provider Manual

- Clarifies the scope of the term “individual representative.” An individual representative may be:
 - The individual’s legal guardian or other person authorized by state law to represent the individual in decision-making related to the individual’s care or well-being. CMS offers that, in instances where state law gives decision-making authority to an individual representative, the individual receiving services will lead the person-centered planning process where possible and the individual representative will participate as needed and desired by the individual receiving services;
 - Any other person authorized under federal law or state policy to represent the individual, including but not limited to a parent, family member, or other advocate; and
 - If the representative is authorized by the state, the state must have policies in place that describe the authorization process, the extent of the decision-making authority, and safeguards to ensure the representative is acting on behalf of the individual with exceptions in cases where the individual’s wishes cannot be determined or if the individual’s wishes would be harmful.

1.2 EFFECTIVE DATE

The HCBS Final Rule was effective March 17, 2014. With the exception of the Home and Community Based (HCB) settings requirements, all topics covered by the HCBS Final Rule were effective on this date. The HCBS Final Rule requires programs approved by CMS after March 17, 2014, to be in immediate compliance with the entire HCBS Final Rule, including the settings requirements. The MI Health Link HCBS Waiver was initially approved by CMS for January 1, 2015, and must be in immediate compliance with the HCBS Final Rule.

Programs in existence before March 17, 2014 must be compliant with the federal HCB Settings Requirement on or before March 17, 2022:

- MI Choice Waiver
- Habilitation Supports Waiver
- Children’s Waiver Program
- Children with Serious Emotional Disturbance Waiver Program
- Managed Specialty Services and Supports Waiver Program

Providers should refer to the relevant program chapter in this manual for requirements unique to that program.

SECTION 2 – PERSON-CENTERED PLANNING

The HCBS Final Rule provides guidance regarding the person-centered planning process. The HCBS Final Rule requires the individual to direct the process and lead it to the extent possible and desired by the individual, with participation of people chosen by the individual and to the extent desired by the individual. The individual's representative, if applicable, should have a participatory role as needed and defined by the individual unless decision-making authority has been granted to the representative by State law. The person-centered planning process must:

- Occur in a timely manner and at times and locations of the individual's choosing;
- Provide information and support to the individual in order to ensure maximum direction from the individual and to enable informed choice;
- Provide an informed choice of supports and identify who provides them;
- Include a mechanism to request updates in the plan;
- Document alternative(s) considered but not chosen;
- Include strategies for resolving disputes and identifying conflicts of interest; and
- Be free from conflict of interest, meaning those persons who have an interest in or are employed by a provider of HCBS for the individual must not be involved in case management or development of the person-centered service plan, except when the State demonstrates that the entity is the only willing and qualified entity available to complete these functions and also provide HCBS.

The person-centered service plan must be in written format and signed by the individual and their representative, as applicable, and providers responsible for the implementation of the plan (at a minimum, this includes the person or entity responsible for coordinating the individual's services and supports). The person-centered service plan must be distributed to the individual and any others involved in the plan. The plan must be reviewed at least every 12 months, or more frequently if the individual chooses or has a change in service needs.

The person-centered service plan must:

- Reflect the services and supports that are important for the individual to meet the needs identified through an assessment of functional need;
- Include what is important to the individual regarding their preferences for the delivery of the services and supports;
- Reflect that the individual has chosen the setting in which they reside, also including non-disability specific settings;
- Reflect the individual's strengths and preferences;
- Reflect the clinical and support needs as identified through an assessment of functional need;
- Include individually identified goals and desired outcomes;
- Reflect services and supports that will assist the individual to achieve the identified goals, and identify the providers of those services and supports;

Medicaid Provider Manual

- Reflect risk factors and measures in place to minimize them, including backup plans and strategies;
- Identify the person or entity responsible for monitoring the plan;
- Be finalized and agreed to with the informed consent of the individual;
- Include self-directed services;
- Prevent the provision of unnecessary or inappropriate services and supports;
- Document that any modifications of the HCB settings requirements are based upon a specific assessed health and safety need and justified in the person-centered service plan:
 - Identify the specific assessed need(s);
 - Document the positive interventions and supports used previously;
 - Document less intrusive methods that were tried and did not work, including how and why they did not work;
 - Include a clear description of the condition that is directly proportionate to the assessed need;
 - Include regular collection and review of data to measure the effectiveness of the modification;
 - Include established time limits for periodic review of the modification;
 - Include informed consent of the individual; and
 - Include assurances that the modifications will cause no harm to the individual.

The person-centered service plan must be written in plain language that is easily understood by the individual and others supporting them. The language in the service plan must also be understandable by individuals with disabilities and those with limited English proficiency, in accordance with federal law.

SECTION 3 – HOME AND COMMUNITY BASED SETTINGS

3.1 CHARACTERISTICS OF A HOME AND COMMUNITY BASED SETTING

Through the HCBS Final Rule, CMS imposed certain requirements for HCB settings which consist of those settings where individuals live (residential settings) and those where individuals go to receive services (non-residential settings). All HCB settings where people live or receive Medicaid HCBS must have the following characteristics to the same extent as those individuals not receiving Medicaid HCBS:

- Be integrated in, and support full access to, the greater community, including opportunities to seek competitive and integrated employment, control of personal resources, and access to community services;
- Be selected by the individual from among a variety of setting options and, for residential settings, consistent with the individual's available resources to pay for room and board;
- Ensure individuals have the right to privacy, dignity and respect, as well as freedom from coercion and restraint;
- Optimize but not regiment the individual's autonomy and independence in making life choices regarding what they participate in and with whom; and
- Facilitate the individual's choice of services and supports, as well as who provides them.

When an individual chooses to receive Medicaid HCBS in a provider-owned and/or -controlled setting where the provider is paid a single rate to provide a bundle of services, the individual is choosing that provider, and cannot choose an alternative provider, to deliver all services that are included in the bundled rate. For any services that are not included in the bundled rate, the individual may choose any qualified provider, including the provider who controls or owns the setting, if the provider offers the service separate from the bundle. Any home owned or leased by a provider must adhere to the additional requirements described in federal law.

Settings that are presumed to not meet the HCB settings requirements are:

- Those in a publicly- or privately-owned facility providing inpatient treatment;
- On the grounds of, or adjacent to, a public institution; or
- Any that otherwise have the effects of isolating individuals from the broader community of individuals who are not receiving Medicaid HCBS.

Settings that are on the grounds of, or adjacent to, a private institution are not automatically presumed to have the characteristics of an institution. However, if the setting isolates the individual from the broader community (or otherwise has the characteristics of an institution) or fails to meet the characteristics of an HCB setting, the setting would **not** be considered to be compliant with the regulation.

Medicaid Provider Manual

All settings, including facility- or site-based settings (e.g. pre-vocational services in a facility-based setting such as a sheltered workshop or dementia-specific adult day care centers) must demonstrate the qualities of HCB settings, ensure the individual's experience is HCB and not institutional in nature, and does not isolate the individual from the broader community. In particular, if the setting is designed specifically for people with disabilities, or individuals in the setting are primarily or exclusively people with disabilities and on-site staff provides many services to them, the setting may be isolating unless the setting facilitates and encourages people going out into the broader community.

3.1.A. REQUIREMENTS FOR RESIDENTIAL SETTINGS

The requirements for residential settings apply to provider-owned or controlled settings. An individual's private home is presumed to be compliant with the HCB requirements. Individuals receiving Medicaid HCBS shall enjoy the same rights, protections and assurances in all living arrangements as those not receiving Medicaid HCBS.

3.1.A.1. MEALS

Individuals must have access to food at any time. This does not mean the residential setting must be prepared to make a full meal at any time, but the individual must have access to some type of food when they choose. The type of food offered must be something that the individual likes to eat.

3.1.A.2. VISITORS

Individuals must be allowed to have visitors of their choosing at any time.

3.1.A.3. LOCKABLE DOORS

Residential settings must have bedroom and bathroom doors that are lockable by the individual, with only appropriate staff having keys to the doors. The doors must be lockable from the inside of the room and equipped with positive-latching, non-locking-against-egress hardware. This means the door should open from the inside in one single motion such as the turn of the knob or handle. If a setting has private bedrooms that include private bathrooms, only the main door to the bedroom/unit must be lockable, though MDHHS encourages that both the bedroom door and bathroom door be lockable.

3.1.A.4. FREEDOM TO FURNISH AND DECORATE ROOM

Individuals must have the freedom to furnish and decorate their room however they choose. In the case of a shared room, the furnishings and decor may be a collaborative effort with roommates.

3.1.A.5. CHOICE OF ROOMMATE

Individuals must have their choice of roommate if possible. In some circumstances, there may only be limited beds available at the residence so if the individual chooses that setting, they may also be choosing that bed without the ability to choose the roommate. Different arrangements may be made as the individual continues to live in that setting.

Medicaid Provider Manual

3.1.A.6. FREEDOM TO CONTROL SCHEDULE, ACTIVITIES AND RESOURCES

Individuals must have freedom to control their own schedules, activities and resources to the extent they desire. If they choose to receive assistance, that should be provided as needed and desired by the individual.

3.1.A.7. PRIVACY

Individuals must have privacy in their unit. This includes physical privacy as well as keeping any of the individual's confidential information private. Protected health information and other confidential personal information must not be kept in an open, common, unlocked area.

3.1.A.8. ACCESSIBILITY

Each setting must be physically accessible to the individuals residing there so the individuals may function as independently as they wish. Individuals must be able to move around in the setting without physical barriers getting in their way. This is especially true for individuals utilizing wheelchairs or who require walking aids. Furniture must be placed in such a way that individuals can easily move around it, with pathways large enough for a wheelchair, scooter or walking aids to navigate easily if individuals with these types of mobility aids reside in the setting.

3.1.A.9. EVICTIONS AND APPEALS

Individuals receiving services must have a lease or other legally enforceable agreement that offers comparable responsibilities and protections from eviction that tenants have under the landlord/tenant law of the state, county, city or other locality.

For settings in which landlord/tenant laws do not apply, MDHHS or its designee must ensure that a lease or other written agreement is in place for each individual and that the lease or agreement provides protections that address eviction processes and appeals similar to that of landlord/tenant laws.

3.1.A.10. HOUSE RULES

Although house rules are optional under State of Michigan licensing rules for Adult Foster Care and Homes for the Aged, for the purposes of the HCBS Final Rule, house rules will not be permitted.

3.1.A.11. CONTROL OF PERSONAL RESOURCES

The HCBS Final Rule requires that individuals be able to control their personal resources.

3.1.B. REQUIREMENTS FOR NON-RESIDENTIAL SETTINGS

The requirements of non-residential settings apply to provider-owned or -controlled settings. Individuals receiving Medicaid HCBS shall enjoy the same rights, protections and assurances as others receiving the same service.

Medicaid Provider Manual

3.1.B.1. SKILL-BUILDING ASSISTANCE

Skill-building assistance must provide opportunities for regular meaningful non-work activities in integrated community settings for the period of time desired by the individual. This service assists individuals in increasing their self-sufficiency or to develop the skills needed to engage in meaningful community-based activities such as school, work or volunteer activities.

3.1.B.2. COMMUNITY LIVING SUPPORTS

Community Living Supports (CLS) must promote community inclusion and participation and facilitate an individual's independence and productivity. Services should provide opportunities for integration with the community and participation in activities comparable to activities for individuals of similar age or with similar interests who do not receive Medicaid HCBS.

3.1.B.3. SUPPORTED EMPLOYMENT

Supported employment provides a combination of ongoing support and paid employment that enables the individual to work in the community. Setting options offered should include community-based, integrated work settings where individuals with disabilities work alongside other individuals who do not have disabilities.

3.1.B.4. ADULT DAY CARE

Adult day care programs must offer activities for individuals receiving Medicaid HCBS that are comparable to those tasks and activities for individuals of similar age and ability who are not receiving Medicaid HCBS. There also must be interaction between individuals receiving Medicaid HCBS and those not receiving Medicaid HCBS. Services must provide an opportunity for integration with the larger community. Individuals must not be kept from moving around inside or outside of the non-residential setting. If individuals require supervision to move about the setting or go outside, that supervision must be provided.

3.2 SETTINGS NOT COMPLIANT WITH THE HCBS FINAL RULE REQUIREMENTS

Some settings have been identified by CMS as not HCB due to institutional status and will never be considered HCB. These settings are:

- Nursing facilities
- Institutions for mental disease
- Intermediate care facilities for individuals with intellectual disabilities
- Hospitals
- Other locations that have characteristics of an institution (e.g., Child Caring Institutions)

3.3 REVERSE INTEGRATION

According to the HCBS Final Rule, reverse integration does not make a setting HCB. Reverse integration is when the setting brings providers into the setting from the community instead of taking the individual out to the provider. For example, medical providers, members of clergy, hairstylists, or nail artists, among others, are brought into the setting. While it is acceptable to have providers such as these come into the setting, this must not be the only contact with community providers allowed for individuals receiving services. Individuals must also have the option to go out into the community and participate with providers of their choosing.

3.4 REMEDIATION OF SETTINGS AND RELOCATION OF INDIVIDUALS

Based on review by MDHHS, some residential and non-residential settings that are not institutions may be considered to be non-compliant with the HCBS Final Rule due to not meeting the characteristics of an HCB setting as defined by CMS. The State and its contracted entities will work with these settings to bring them into compliance if the setting owner chooses to be compliant. If the setting owner declines to come into compliance with the HCBS Final Rule, the State and its contracted entities will work with affected individuals to transition to a different setting that is compliant. As applicable, individuals must be provided with compliant residential or non-residential options from which to choose. If the individual does not want to move to a different, compliant setting, they will be disenrolled from the Medicaid HCBS program.

Timeframes for relocation of individuals and continued program participation are dependent on the aforementioned CMS requirements for whether the specific program is considered new or existing as of the effective date of the HCBS Final Rule. Refer to the program chapter of this manual for specific requirements unique to that program.

3.5 HEIGHTENED SCRUTINY

The State and CMS have a process for "heightened scrutiny" which consists of further review of any settings that wish to participate and are considered compliant with the HCBS Final Rule with all characteristics except some, such as location of the setting close or connected to an institution. This will involve MDHHS and its contracted entities gathering evidence of potential compliance and submitting this to CMS for final approval.

MDHHS is responsible for determining if a setting qualifies for the "heightened scrutiny" process through its assessments of the setting that appears to have qualities which are HCB and does not have qualities that are institutional in nature. MDHHS will request that this type of setting go through the "heightened scrutiny" process with CMS. Only a setting that can comply 100 percent with the federal HCB Settings Requirement will be submitted to CMS for "heightened scrutiny" process.

A setting that will require heightened scrutiny has at least one of the following characteristics:

- Settings located in a building that is also a publicly- or privately-operated facility that provides inpatient institutional treatment.
- Settings in a building on the grounds of, or immediately adjacent to, a public institution.
- Any other setting that has the effect of isolating individuals receiving Medicaid HCBS from the broader community of individuals not receiving Medicaid HCBS.

3.6 NEW SETTINGS

All new settings (either newly established or new to the specific program) must be immediately compliant with the HCBS Final Rule. Determination of a new setting's compliance with the HCBS Final Rule must be determined after the setting is built and has been operational with residents or individuals receiving services in order for the evaluating entity to have a full understanding of the individual's experience while participating with the setting.

3.7 NEW PROVIDERS

Effective October 1, 2017, any new HCBS provider and their provider network must be in immediate compliance with the federal HCBS Final Rule in order to render services to Medicaid beneficiaries. This requirement does not apply to existing providers and their provider networks who rendered HCBS to Medicaid beneficiaries before the effective date of this requirement. The Michigan Department of Health and Human Services (MDHHS) will continue to work with existing providers towards coming into compliance with the federal HCBS Final Rule as specified in the State Transition Plan.

In order to comply with the federal HCBS Final Rule, new providers must:

- Ensure individual rights of privacy, dignity and respect, and freedom from coercion and restraint;
- Enhance independence;
- Enhance independence in making life choices;
- Enable choice regarding services and who provides them; and
- Ensure that the setting is integrated in, and supports full access to, the greater community.

New residential providers must demonstrate that services are delivered within a setting affording the beneficiary sufficient opportunity and choice to engage with the broader community by ensuring that the:

- Setting is selected by the individual from among setting options;
- Individual has a lease or other legally enforceable agreement providing similar protection;
- Individual has privacy in their unit, including lockable doors;
- Individual has a choice of roommates (if applicable) and freedom to furnish or decorate the unit;
- Individual controls their own schedule, including access to food at any time;
- Individual can have visitors at any time; and
- Setting is physically accessible.

New non-residential providers must demonstrate that services are delivered within a setting affording the beneficiary sufficient opportunity and choice to engage with the broader community by ensuring that the setting:

- Does not isolate the individual from the broader community; and
- Is not institutional in nature or has the characteristics of an institution.

Medicaid Provider Manual

3.8 ONGOING MONITORING

The State and its contracted entities are responsible for conducting ongoing monitoring activities to ensure settings remain in compliance with the HCBS Final Rule. Refer to the program chapter of this manual for specific requirements unique to that program.

SECTION 1 – GENERAL INFORMATION

This chapter applies to Home Health providers.

Home health is a covered Medicaid benefit for beneficiaries whose conditions do not require continuous medical/nursing and related care but do require health services on an intermittent basis for the treatment of an injury, illness, or disability. Medicaid covered services may be provided in any setting in which normal life activities take place. 'Normal life activities' refers to activities that could occur in or out of an individual's home. Except as detailed in this chapter, the beneficiary's primary need must be for nursing care, physical therapy and/or home health aide services rather than personal care or physician's care.

A Home Health Agency (HHA) is an organization that provides home care services, such as skilled nursing care, physical therapy (PT), occupational therapy (OT), speech therapy (ST) and care by home health aides. The HHA must be Medicare certified to enroll as a Medicaid provider and must comply with the Medicare/Medicaid Conditions of Participation (42 CFR § 484) and the policies outlined in this manual.

Services solely to prevent an illness, injury or disability are only covered for women/newborns following delivery. For postpartum/newborn follow-up nurse visits, a nursing diagnosis can be used to establish medical necessity. Otherwise, a medical diagnosis is required to establish medical necessity. Medicaid beneficiaries are expected to be an active participant in the planning for their home health care. For beneficiaries enrolled in a Medicaid Health Plan (MHP) or Integrated Care Organization (ICO), the HHA must contact that health plan for authorization to provide services to their members.

Medicaid home health services must be ordered, in writing, by the beneficiary's physician (MD, DO, DPM) as part of a written plan of care (POC). The POC must be reviewed by the physician or permitted non-physician practitioner (NPP) every 60 days, acting within the scope of their current medical practice and Medicaid guidelines.

Permitted NPPs include:

- A nurse practitioner or clinical nurse specialist (as defined in section 1861(aa)(5) of the Social Security Act) who is working in collaboration with the physician in accordance with State law.
- A physician assistant (as defined in section 1861(aa)(5) of the Social Security Act) under the supervision of the physician.

Ordering/referring, certifying, and attending physician for home health is defined as a physician with a Doctor of Medicine (MD), Doctor of Osteopathic Medicine (DO), or Doctor of Podiatric Medicine (DPM). Physicians must act within the scope of their current medical practice and Medicaid guidelines.

This chapter includes information about services covered for Medicaid and Children's Special Health Care Services (CSHCS) beneficiaries unless otherwise noted.

Private Duty Nursing (PDN) is not covered under the Home Health benefit.

1.1 FACE-TO-FACE ENCOUNTER

The physician or permitted non-physician practitioner (NPP) certifying eligibility for home health services must provide documentation of a face-to-face encounter with the beneficiary within 90-days prior to or 30-days after the start of care. The face-to-face encounter may occur through telehealth in compliance with Section 1834(m) of the Social Security Act.

NOTE: The face-to-face encounter requirement pertains only to initial certification for home health services.

The face-to-face encounter ensures that the orders and certification for home health services are based on current knowledge of the beneficiary's clinical condition, and will identify the primary reason for home health services.

In a situation where a physician or permitted NPP orders home health services based on a new condition that was not evident during a visit within the 90-days prior to the start of care, the certifying practitioner (e.g. physician or permitted NPP) must see the beneficiary within 30 days of admission to home health services.

The certifying practitioner must document the face-to-face encounter. When the face-to-face encounter is performed by a certified nurse-midwife (as defined in section 1861(gg) of the Social Security Act, as authorized by State Law), they must document the clinical findings of the face-to-face encounter and communicate those findings to the physician; the physician must then sign the certification. Permitted NPPs must not certify face-to-face encounters performed by a certified nurse-midwife.

Documentation of the face-to-face encounter must reflect the certifying practitioner's assessment of the beneficiary and include:

- Date of the encounter,
- Primary reason for the encounter (medical condition),
- Clinical findings that support the need for skilled nursing, therapy, or home health aide services, and
- Clinical findings that support home health eligibility.

An addendum may consist of clinical documents from a hospital or post-acute facility (e.g., emergency visit record or discharge summary). It is allowable for the certifying practitioner to use such a document as an addendum for the face-to-face encounter if:

- The addendum contains all the documentation requirements for face-to-face documentation; and
- The certifying practitioner signs and dates the addendum; or
- The certifying physician signs and dates the addendum, demonstrating that the certifying physician received that information from the certified nurse-midwife who performed the face-to-face encounter, and that the certifying physician is using the addendum document as their documentation of the face-to-face encounter.

While typically the same practitioner (e.g. physician or permitted NPP) will certify, establish and sign the POC, it is allowable for practitioners who attend to the beneficiary in the acute and post-acute settings to

Medicaid Provider Manual

certify the need for home health care based on their face-to-face contact, initiate the orders (POC) for home health services, and "hand off" the beneficiary's care to the community-based practitioner to review and sign off on the plan of care.

1.2 ELECTRONIC VISIT VERIFICATION

The 21st Century Cures Act (the Cures Act), enacted by the U.S. Congress in December 2016, added Section 1903(l) to the Social Security Act to require all states to use electronic visit verification (EVV) for personal care services (PCS) and home health care services (HHCS) provided under a Medicaid State Plan of the Social Security Act or under a waiver of the State Plan. HHCS provided through Home Health must meet EVV requirements. Refer to the Electronic Visit Verification chapter of this Manual for more information.

SECTION 2 – SERVICE SETTING

Home health services are intended for beneficiaries who are unable to access services (nursing, OT, PT, speech and language pathology therapy [ST]) in an outpatient setting. However, it is not required that beneficiaries be totally restricted to their home but may be provided, as appropriate, in any setting in which normal life activities take place. A determination and documentation are required by the HHA to validate the beneficiary's eligibility and need for home health services. Home health services are **not** provided solely on the basis of convenience.

All covered home health services may be rendered in a beneficiary's home or any setting in which normal life activities take place, except for those services listed below. Home may be the beneficiary's owned/rented home, an apartment, Assisted Living Facility, Adult Foster Care (AFC) facility, or home of another family member (secondary residence of the beneficiary, i.e., joint custody situation for a minor child).

- Home Health aide services are not a covered benefit for beneficiaries who reside in a Home for the Aged (HFA) or AFC facility as this would be duplication of personal care services already provided by staff of these facilities.
- Michigan Department of Health and Human Services (MDHHS) does not cover any Home Health services rendered to a beneficiary in a hospital, nursing facility, Intermediate Care Facility for Individuals with Intellectual Disabilities (ICF/IID), Intermediate Care Facility for the Mentally Ill (ICF/MI), school, adult day care, or any setting in which payment is or could be made under Medicaid for inpatient services that include room and board.

To determine if home health services, rather than outpatient services, are most appropriate, consider the following:

- Are home health services necessary for the adaptation, training or teaching of nursing or treatment procedures, plans, equipment, appliances or prosthetics?
- Are home health services necessary to prevent undue exposure to infection and/or stress for the beneficiary as identified and documented by a health care professional?
- Is leaving the home medically contraindicated, as identified and documented by a health care professional?
- Are home health services necessary to prevent a documented problem with access to services, continuity of care or provider, or coordination of services, as documented by a health care professional?
- Are home health services the most cost-effective method to provide care?

Services must be appropriate and medically necessary for the treatment of an identified illness, injury or disability. The services provided must be consistent with the nature and severity of the beneficiary's illness, injury or disability, particular medical needs, and accepted standards of medical practice. Beneficiaries with established frail conditions may need assessments by skilled nurses to prevent further decline of the frail condition.

SECTION 3 – PLAN OF CARE

The plan of care (POC) must include the mandatory elements required under Medicare CoP regulations at 42 CFR §484.60. The Medicare CoP POC elements represent the minimum information that must be included in each home health beneficiary's POC.

MDHHS requires home health providers must also include the following:

- Date of the first visit the HHA made for the new admission.
- Start date of care when the HHA began providing home care and the certification period. (This date remains the same on subsequent POCs until the beneficiary is discharged from home health care services.)
- Other identified resources used by the beneficiary (e.g., Area Agency on Aging, Protective Services, Home Help services, MI Choice Waiver).
- Name and address of the HHA, and the beneficiary's name, date of birth, and Medicaid ID number.
- The attending physician's or NPP's signature and date of signature. The POC must be signed and dated by the beneficiary's attending physician or NPP before the HHA submits a claim to MDHHS for payment.
- Specific circumstances, conditions, or situations that require services to be provided in the home and not in a physician's office or outpatient clinic.

If there is an order for Home Health aide services and the beneficiary is also receiving personal care through another entity (Home Help Program, MI Choice Waiver), there must be a coordination between the two entities and documentation in the POC to verify there is no duplication of services. (Refer to the Personal Care Section of this chapter for additional information.)

- Date of most recent hospitalization, if applicable.

If Home Health aide services are ordered, an assessment of the family's ability and willingness to perform the services must be made and included in the POC. If the family is unable to perform the services, the reason must be stated on the POC.

- Role of family or support person.
- Any additional items the home health agency, physician, or NPP chooses to include.

If the attending physician or NPP signs the POC after the service(s) is rendered, there must be a pre-existing written or verbal order for the service(s) to be covered by Medicaid. If the service(s) is rendered prior to the date the physician or NPP dated the POC and there is no pre-existing written or verbal order, Medicaid does not cover the service(s) provided. The verbal order obtained from the ordering physician must contain the signature of the HHA staff person who obtained the verbal order and the date the

Medicaid Provider Manual

verbal order was received. All verbal orders must be countersigned and dated by the ordering physician before the claim is submitted to MDHHS for payment.

Ordering physicians must determine that medical/health services are medically necessary and/or appropriate. The authorization and subsequent provision of home health services will continue to be based on medical necessity, not the setting. Any increase in the frequency of services, addition of new services, or modifications of treatment during a certification period must be authorized by the attending physician or NPP and documented in the beneficiary's medical record by way of a verbal order or written order prior to the provision of the increased, additional, or modified treatment.

The POC signed by the attending physician or NPP, along with any written or verbal orders as needed, and progress notes must be retained in the beneficiary's medical record.

SECTION 4 – TRANSFERS AND DISCHARGE PLANNING

The HHA must develop a transfer or discharge plan at the time of admission to home health services. As identified in the Medicare CoP (42 CFR §484.50), the beneficiary shall be discharged from the Home Health program by the admitting HHA under the following conditions:

- The beneficiary acuity exceeds the HHA's capabilities;
- The beneficiary or payer will no longer pay for home health services;
- The beneficiary no longer meets the criteria for medical necessity because the measurable outcomes and goals identified in the POC have been achieved;
- The beneficiary refuses services or elects to be transferred or discharged; OR
- The HHA provider cannot safely service the beneficiary in accordance with 42 CFR §484.50(d)(5).

It is the responsibility of the HHA to ensure continuity of care during transition or discharge to another HHA or entity (e.g., Home Help, MI Choice Waiver). The HHA's strategies for a safe transition or discharge must be documented in the beneficiary's medical record. The beneficiary's medical record must also identify the HHA or other entity from which the transition or discharge occurred.

In some cases, the beneficiary may receive home health aide services and start receiving services concurrently from other entities (e.g., Home Help, MI Choice Waiver). In such instances, the HHA must document in the medical record other resources used by the beneficiary in the POC.

SECTION 5 – COORDINATION OF SERVICES

The HHA must ensure coordination in the delivery of services through an integrated process across all aspects of home health services. Integrated services encompass communication from all physicians and disciplines (e.g., skilled nursing and therapy services) as well as other entities (e.g., Home Help, MI Choice Waiver). The HHA must also provide ongoing training and education for the beneficiary and caregiver with respect to the care and services identified in the POC, as well as for the safe transfer into or discharge from the community services.

Throughout the care planning process, it is the responsibility of the HHA to ensure coordination of care and to avoid duplication of services (e.g., Home Help, MI Choice Waiver).

SECTION 6 – OUTCOME AND ASSESSMENT INFORMATION SET

The Centers for Medicare & Medicaid Services (CMS) requires Medicare certified HHAs to use a standard assessment data set, referred to as the Outcome and Assessment Information Set (OASIS). The requirement to collect and submit OASIS clinical data applies to all beneficiaries receiving Medicare and/or Medicaid home health services. This means beneficiaries under Medicaid traditional fee-for-service (FFS), MHP, ICO, Children's Waiver, Home and Community Based Services Waiver for the Elderly and Disabled (MI Choice Waiver), Habilitation Supports Waiver, Healthy Michigan Plan, and CSHCS who receive home health services are to have OASIS information collected by the HHA. Assessments for all beneficiaries are to be conducted in compliance with Medicare certification requirements.

The OASIS requirements do not apply if the HHA is providing only housekeeping/ chore services, prepartum and postpartum services, or if the beneficiary is under 18 years of age.

HHAs are also required to electronically transmit the OASIS data to the designated state agency responsible for collecting OASIS data in accordance with CMS specifications. MDHHS contracts with a vendor to provide OASIS transmission assistance. HHAs needing assistance with transmitting data to the state repository should contact the MDHHS contractor. (Refer to the Directory Appendix for contact information.)

The CMS rules for OASIS are published in the Federal Registers that are available online at the OASIS website. (Refer to the Directory Appendix for website information.)

SECTION 7 – POST-PAYMENT REVIEW

Ordering physicians must determine that medical/health services are medically necessary and/or appropriate. All home health services ordered are subject to review for conformity with accepted medical practice and Medicaid coverage and limitations. Post-payment reviews of paid claims may be conducted to assure that the services provided, as well as the type of provider and setting, were appropriate, necessary, and compliant with Medicaid policy. Post-payment review also includes verification that appropriate procedure codes were used to bill the services provided.

Post-payment review includes verification that all third-party resources were utilized to their fullest extent prior to billing MDHHS. If post-payment review reveals that MDHHS was billed prior to utilizing these resources and the HHA knew the beneficiary had other insurance coverage for the service rendered, it may be considered fraud.

The General Information for Providers Chapter of this manual contains additional information regarding post-payment review and fraud.

SECTION 8 – NURSING SERVICES

Nursing services are covered on an intermittent (separated intervals of time) basis when provided by, or under the direct supervision of, a registered nurse (RN). Nursing care provided by a licensed practical nurse (LPN) must be under the supervision of an RN, and the RN must co-sign the LPN's documentation.

A nursing visit may include, but is not limited to, one or more of the following nursing services:

- Administering prescribed medications that cannot be self-administered.
- Changing an indwelling catheter.
- Applying dressings that require prescribed medications and aseptic techniques.
- Teaching the beneficiary, available family member, willing friend or neighbor, or caregiver (paid or unpaid) to carry out all or some of the services, as detailed below.
- Observation and evaluation, as detailed below.

Intermittent (separated intervals of time) nurse visits are intended for beneficiaries who generally require nursing services on a short-term basis (typically 60 days or less) for the treatment of an acute illness, injury, or disability and who cannot receive these services in an outpatient setting. Intermittent nursing visits may last from 15 minutes to one or two hours and are reimbursed at a flat rate (i.e., Medicaid fee screen for a visit) regardless of the length of the visit.

Intermittent nurse visits are not covered for a beneficiary receiving Private Duty Nursing Services.

Intensive care (for cases that require five or more visits per week or beyond 60 days) may be reviewed by MDHHS during post-payment audit to determine if home care was medically appropriate and a cost effective alternative to institutional care.

Nursing services must be provided through the State Plan Medicaid program in accordance with established policy. MI Choice nursing services shall not duplicate services available through the Medicaid State Plan home health benefit, and under no circumstance shall the beneficiary receive both MI Choice and State Plan services concurrently. Waiver agencies cannot authorize payment for services that are (already) offered under the State Plan.

8.1 COVERED NURSING SERVICES

The following nursing services are covered home health care services. Limitations, conditions and special considerations are noted when applicable. (Refer to the Billing & Reimbursement for Institutional Providers Chapter of this manual for billing information.)

8.1.A. BLADDER TRAINING

When use of a catheter is temporary, visits made by the nurse to change the catheter must also include instruction to the beneficiary in bladder training methods. The actual bladder training (e.g., forcing fluids or other measures) does not require the skills of a nurse. After the catheter is removed, a limited number of visits (maximum two visits per month) are allowed to observe and evaluate the effectiveness with which the bladder training has been accomplished (e.g., the degree to which the bladder is emptying).

8.1.B. ENEMAS

Giving enemas usually does not require the skills of a nurse, and Medicaid does not cover such visits unless the physician or NPP has ordered that a nurse give the enema because of clinical indications.

8.1.C. EYE DROPS AND TOPICAL OINTMENTS

Two nurse visits are allowed to teach the administration of eye drops and topical ointments. Nurse visits solely to perform these services are not covered.

8.1.D. INTRAVENOUS INFUSIONS

If the beneficiary is in need of intravenous infusion and an infusion clinic or ancillary Medicaid provider (who has no nurse) does not cover the service, or family member/care giver will not accept this task, the HHA may perform this service and bill accordingly. Medicaid will reimburse claims for professional services (e.g., nursing services) associated with the administration of Medicare Part D drug(s) to dually eligible Medicaid/Medicare beneficiaries.

8.1.E. NEONATAL JAUNDICE

Nurse visits related to neonatal jaundice require supporting documentation in the beneficiary's medical record that the nurse visits are required for a specific medical condition. Supporting documentation should include pertinent laboratory values.

8.1.F. OBSERVATION/EVALUATION

If the attending physician or NPP determines that the beneficiary's condition is unstable and that significant changes may occur, Medicaid covers nurse visits for observation/evaluation. Once the beneficiary's condition has stabilized and there has been no significant change (e.g., no change in medication or vital signs, no recent exacerbation in the beneficiary's condition) for a period of three weeks, and no other necessary nursing services are being furnished, nursing visits solely for observation/evaluation are no longer covered.

Visits for observation/evaluation to ensure stability of a beneficiary who has an established disability or frail condition are covered by Medicaid if circumstances, conditions, or situations exist that prevent the beneficiary from obtaining services from a physician's office or outpatient clinic as described in the Home Setting Section of this chapter. Such visits are limited to two visits per month.

Nurse visits for observation/evaluation to ensure stability of a beneficiary's condition cannot be billed within a 30-day period of an initial/subsequent postpartum/newborn follow-up nurse visit, suspected abuse nurse visit or aide visit.

If the beneficiary is enrolled in the MI Choice Waiver, a nurse visit for observation and evaluation to ensure stability is not a home health covered service but a responsibility of the waiver staff. (Refer to the Directory Appendix for the website containing the regional map and addresses of the MI Choice Waiver agents.)

8.1.G. ORAL MEDICATIONS

Administration of oral medications does not usually require the skills of a nurse in the home setting. Visits are covered only if the complexity of the beneficiary's condition and/or the number of drugs prescribed require the skill or judgment of a nurse to detect and evaluate side effects (adverse reactions) and/or provide necessary teaching and instruction.

Placing medication in envelopes/cups, giving reminders, etc., to assist the beneficiary in remembering to take them does not constitute a nursing service.

8.1.H. POSTPARTUM/NEWBORN FOLLOW-UP NURSE VISIT

Home visits for assessment, evaluation and teaching are covered for women and newborns following delivery when a physician or NPP has determined the mother or newborn may be at risk. The goals of these services include:

- Fostering a positive outcome for the mother and newborn by detecting medical complications manifested during the postpartum/newborn period;
- Instructing the mother in newborn care; and
- Identifying situations that may require intervention with medical and community resources.

The HHA must assess and document, in writing, that the beneficiary is receiving services by a Maternal Infant Health Program (MIHP) provider. If the HHA is also an enrolled MIHP provider, services for the mother and newborn cannot be billed as home health care but must be billed as MIHP services. If the beneficiary is receiving MIHP services from another provider and the HHA is also providing services, the POC must clearly identify why home health services are needed in addition to MIHP and that the two providers do not duplicate services.

Medicaid allows one initial postpartum visit, one initial newborn visit, and one subsequent visit to mother and newborn for a total of three visits per pregnancy.

- The initial postpartum visit must be billed using the mother's Medicaid ID number.
- The initial newborn visit must be billed using the newborn's Medicaid ID number.
- The subsequent visit may be billed under either the mother's ID number or newborn's ID number, based on the most time spent with each beneficiary.

8.1.I. PRENATAL NURSE VISIT

Medicaid covers home visits for a specific pregnancy related medical condition provided by a HHA.

Home visits provided for preventive health services which address psychosocial issues, provide education, provide transportation, etc. and that do not provide treatment for an illness or injury are a covered service of the MIHP, not Home Health.

8.1.J. ROUTINE PROPHYLACTIC AND PALLIATIVE SKIN CARE

The recognized stages of decubitus ulcers are classified as:

- Stage I - Inflammation or redness of the skin;
- Stage II - Superficial skin break with erythema of surrounding area;
- Stage III - Skin break with deep tissue involvement; and
- Stage IV - Skin break with deep tissue involvement with necrotic tissue present.

The existence of Stage III or IV decubiti or other widespread skin disorders may necessitate the skills of a nurse. The physician's or NPP's orders for treating the skin determine the need for this service.

The presence of Stage I or II decubiti, rash, or other relatively minor skin irritations do not indicate a need for nursing care unless ordered by a physician or NPP. Bathing the skin, applying creams, etc. are not covered nursing services.

8.1.K. SUSPECTED ABUSE/NEGLECT

If there is reasonable cause to suspect that a beneficiary may be in danger of abuse, neglect, exploitation, cruelty, or other hazards, the HHA must report the suspected abuse to the Adult or Child Protective Services Unit of the local MDHHS office. (Refer to the General Information for Providers Chapter of this manual for additional information.)

Once suspected abuse is reported, the local MDHHS office can request supplemental home health visits to complement the protective services from MDHHS. Medicaid covers up to two home health visits for this purpose. The HHA must document in the beneficiary's medical record the county and the name of the individual MDHHS staff member who approved the request.

Approved visits must be ordered by the attending physician or NPP and documented in the beneficiary's medical record.

A nursing visit for suspected abuse cannot be billed within 30 days of an aide visit, an observation/evaluation, or an established disability or frail condition visit.

8.1.L. TEACHING AND TRAINING ACTIVITIES

HHA services are not covered if the beneficiary has a willing, available, and competent designated caregiver (e.g., family member, friend, neighbor, Home Help provider) that can demonstrate the ability for the beneficiary and/or designated caregiver to provide appropriate care. Medicaid does cover HHA teaching and training activities to enable the beneficiary to become independent of skilled care. The teaching of a procedure or service is covered if it is reasonable and necessary for the treatment of a specific illness, injury or disability.

If a beneficiary or available family member is mentally/physically able to be taught and utilize a particular procedure, and the nurse has completed the teaching but the beneficiary or available family member is subsequently noncompliant, a maximum of three additional teaching visits are allowed for reinforcement teaching. (Medicaid defines noncompliance as the failure or refusal to follow instructions related to improving or stabilizing a condition.)

Teaching visits are not covered if a beneficiary, family member, friend, or neighbor is not mentally or physically able to be taught and utilize a procedure or service as documented in the POC. In these cases, as well as when a caregiver could be taught but is not available or willing to be taught, aide visits (not nurse visits) may be covered to perform these services as long as other Medicaid coverage criteria are met.

Teaching and training activities covered by Medicaid include, but are not limited to:

- Giving an injection
- Prefilling insulin syringes
- Inserting/irrigating a catheter
- Administering eyedrops/topical ointments
- Caring for a colostomy or ileostomy
- Administering oxygen
- Preparing and following of a therapeutic diet
- Applying dressings to wounds that require prescription medications and aseptic techniques
- Bladder training
- Bowel training (e.g., bowel incontinency, constipation due to beneficiary's immobility)
- Performing activities of daily living (e.g., dressing, eating, personal hygiene) for the beneficiary through use of special techniques and adaptive devices where the beneficiary has suffered a loss of function
- Aligning and positioning a bed-bound beneficiary
- Performing transfer activities (e.g., from bed to chair or wheelchair, wheelchair to bathtub)
- Ambulating by means of crutches, walker, cane, etc.

Medicaid Provider Manual

Medicaid reimbursement for teaching visits is based on whether the teaching provided in the home is a reinforcement of previous teaching or is initial instruction. If teaching constitutes reinforcement of training previously received, fewer visits should normally be required than for initial training.

Visits made solely to remind or emphasize to the beneficiary, family member, friend, or neighbor the need to follow the instructions are not covered services. However, visits to supervise and evaluate the practical application of training require the skills of a nurse and are considered reasonable and necessary where the complexity of the service being taught indicates such visits are warranted (e.g., insulin injections or preparation of formula feedings for gastrectomy beneficiaries).

Whether the teaching is reinforcement or initial, the nurse must establish the goal(s) or intended outcome(s) for the beneficiary and a reasonable period of time to attain them and document these in the POC. The beneficiary must be encouraged to become independent of skilled services in their home whenever feasible.

Visits for teaching and training activities solely to ensure stability or solely to prevent an illness, injury, or disability are only covered for beneficiaries who have an established or frail condition or for women/newborns following delivery, as detailed in previous sections.

Except as detailed above, visits solely for teaching designed to prevent an illness, injury, or disability are not covered. Visits for teaching must be necessary for the treatment of a specific illness. For example, instruction in the importance of good nutritional habits, exercise regimens, and good hygiene are not covered services in the absence of a specific supporting diagnosis of illness, injury, or disability.

8.2 NONCOVERED NURSING SERVICES

The following services are not covered as home health nursing services. As noted, they may be covered under another service.

8.2.A. BATHING

Bathing does not require the skills of a nurse and is not covered by the Medicaid home health benefit.

8.2.B. PREFILLING INSULIN SYRINGES

If the sole purpose of a nurse visit is to prefill insulin syringes, this service is not covered as a nursing visit.

This service is covered as an aide visit with a maximum of two visits per month. The Remarks section of the claim must state that the visit was for prefilling insulin syringes.

8.2.C. PSYCHIATRIC NURSING VISIT

Nursing visits for the primary purpose of providing a psychiatric nursing service are not a Home Health benefit covered by Medicaid, but may be covered under another Medicaid

Medicaid Provider Manual

program. Examples of noncovered nurse visits include psychiatric evaluation, psychotherapy, administration of psychotropic drugs, assessment of beneficiary's adjustment to a psychotropic drug, venipuncture to obtain specimen for psychiatric medication review, and nurse visit to refill medication cups/boxes, giving reminders, etc., to assist the beneficiary in remembering to take psychiatric medication.

8.2.D. ROUTINE FOOT CARE

Medicaid does not cover nursing visits solely to provide routine foot care (e.g., removal of corns, calluses, trimming of nails). Nursing visits for the debridement of mycotic nails are not covered by the Medicaid home health benefit.

SECTION 9 – THERAPIES (OCCUPATIONAL, PHYSICAL AND SPEECH)

Medicaid covers home occupational therapy (OT) and physical therapy (PT) when medically necessary, reasonable, and necessary to help the beneficiary return to a previous functional level or to a functional level that is appropriate to a stable medical status. Under certain circumstances, home speech therapy (ST) is covered for children enrolled in Children's Special Health Care Services (CSHCS). Refer to the Therapy Services Chapter of this manual for additional information.

SECTION 10 – HOME HEALTH AIDES

Home health aide services may be rendered independently, and not contingent upon the need of skilled nursing or therapy services. Home health aide services are covered only when ordered by the attending physician or NPP and authorized according to Medicaid policy. A physician must do the initial order and initial prior authorization for home health aide services. Subsequent orders and prior authorizations for continuation of services, decrease in services, or increase in services, may be ordered by a physician or NPP. The services provided by the home health aide must be medically necessary. Medicaid would not cover home health aide services solely for personal care needs, or for the convenience of the beneficiary. The POC must clearly outline the duties to be performed by the home health aide.

The HHA must identify the availability of other caregiver(s) (e.g., family member or another caregiver). The availability of the caregiver(s) must be identified in the POC. When a caregiver is providing services that adequately meet the member's needs, it is not medically necessary for the HHA to provide services. If the family or other entity is unable to perform the service, the reason must be fully documented in the POC. (Refer to the Personal Care Section in this chapter for additional information.)

10.1 HOME HEALTH AIDE PRIOR AUTHORIZATION

Home health aide services for Medicaid beneficiaries must be authorized by the MDHHS Program Review Division after the initial 90 days, and every 90 days thereafter if continued services are deemed medically necessary.

Prior authorization is required each time services are requested for:

- continuation of services beyond the initial 90 days;
- continuation of services beyond the end date of the current authorization period (renewal);
- an increase in services; or
- a decrease in services.

The first prior authorization must be ordered by a physician. Subsequent prior authorizations may be ordered by a physician or NPP. The continuation of services beyond the initial 90 days must be ordered by a physician. A renewal, an increase in services, or decrease in services may be ordered by a physician or NPP.

After the initial 90 days, home health aide services may be provided up to a maximum of 36 visits within 90 consecutive calendar days. If the beneficiary's attending physician or NPP orders home health aide services, the HHA must assess the availability of the family or another entity (e.g., Home Help Program or MI Choice Waiver) to perform the services. Physicians or NPPs ordering home health aide services must determine that medical services are medically necessary and appropriate for each PA request.

Medicaid Provider Manual

In some cases, the beneficiary's attending physician or NPP may order home health aide services that extend beyond the maximum of 36 visits within 90 consecutive calendar days. For requests that extend beyond 36 or more visits within 90 consecutive calendar days, the PA request will be reviewed for medical appropriateness, the availability of the family or another entity (e.g., Home Help Program or MI Choice Waiver), and the cost effectiveness of other programs available for the beneficiary.

Following receipt and review of the Home Health Aide Prior Approval Request/ Authorization form (MSA-181) and the required documentation by the Program Review Division, a determination notification is sent to the HHA and beneficiary or primary caregiver indicating the outcome of the review. (Refer to the Forms Appendix for a copy of MSA-181.) If approved, the notification letter will contain the PA number and approved authorization dates.

It is important to include this PA number on every claim and in all other communications to the MDHHS Program Review Division.

If a beneficiary receiving home health aide services continues to require the services after the initial authorization period, a new MSA-181 must be submitted by the HHA along with the required documentation to support medical necessity for continuation of services beyond the approved authorization dates. This request must be received by the Program Review Division no less than 15 business days before the end of the current authorization period. Failure to do so may result in a delay of authorization for continued services which, in turn, may result in delayed services or no payment for services rendered without authorization. The length of each subsequent authorization period will be determined upon review by the Program Review Division and will be specific to each beneficiary based on several factors, including the beneficiary's medical and functional needs, personal care services through another entity (e.g., Home Help Program, waiver services, or other community services), and family or caregiver support.

10.1.A. DOCUMENTATION REQUIREMENTS

The following documentation is required for all initial PA requests for home health aide services and must accompany the MSA-181:

- documentation of the face-to-face encounter;
- all components of the POC as identified in 42 CFR §484 and MDHHS policy;
- OASIS; and
- other documentation as requested by MDHHS.

The documentation listed above is also required at subsequent 12-month intervals. The anniversary date is the date 12 months from the date services were first provided.

- For services beyond the initial authorized 90 days and for subsequent requests, the MSA-181, an updated POC complete with all components, and other documentation as requested by MDHHS must be submitted to the Program Review Division for review.
- If a beneficiary's condition changes during an authorization period warranting an increase or decrease in the number of approved hours or discontinuation of services, the HHA must report the change to the Program Review Division. It is important that the HHA report all changes as soon as they occur, as well as properly update the POC and written instructions for the home health aide.

Medicaid Provider Manual

- To request an increase in hours, the following are required:
 - an updated MSA-181 indicating the increase in hours;
 - an updated and signed POC; and
 - documentation from the attending physician or NPP.
- To request a decrease in hours, the following are required:
 - an updated MSA-181 indicating the decrease in hours; and
 - an updated and signed POC.

PA and documentation requirements apply to all Medicaid beneficiaries.

10.1.B. MEDICAL NECESSITY

Home health aide services must be reasonable to support the beneficiary's medical and functional needs based on the beneficiary's medical condition and associated symptoms. Documentation to support medical necessity must include the beneficiary's progress or lack of progress, medical condition, functional losses, and treatment goals (e.g., the POC). MDHHS identifies criteria for medical necessity as one or more of the following that directly impact the beneficiary's medical and functional needs:

- New onset or acute exacerbation of diagnosis (supportive documentation must include the date of the new onset or acute exacerbation);
- New or changed prescription medications (e.g., newly prescribed medications within the last 30 days or changed dosage, frequency, or route of administration within the last 60 days, including but not limited to diagnosis such as diabetes or hypertension);
- Recent hospitalizations (must include the date and reason for the hospitalization);
- Recent discharge from an acute or post-acute setting (e.g., skilled nursing facility);
- Change in caregiver status, absence of a caregiver, or unstable caregiving situation; or
- Complicating factors (e.g., presence of Stage III or IV decubiti).

The beneficiary's medical necessity must be clearly identified by the physician or NPP and documented in the POC. All PA requests will be considered on an individualized basis to determine medical necessity, reasonableness for home health aide services, and consistency with MDHHS policy.

10.1.C. BENEFICIARY ELIGIBILITY

Approval of the MSA-181 confirms that the service is authorized for the beneficiary. The approval does not guarantee that the beneficiary is eligible for Medicaid. If the beneficiary is not eligible on the date of service, MDHHS will not reimburse the provider for services provided and billed. To ensure payment, the HHA must verify beneficiary eligibility monthly at a minimum.

10.1.D. RETROACTIVE PRIOR AUTHORIZATION

Services provided before PA is approved will not be covered unless the beneficiary was not Medicaid eligible on the date of service but became eligible retroactively. If MDHHS eligibility information does not demonstrate retroactive eligibility, then the request for retroactive PA will be denied.

10.2 SUPERVISORY VISIT

The supervisory visit of the home health aide must be completed every 14 days to provide a more reliable and frequent supervision schedule with documentation of the supervisory visit in the beneficiary's medical record. The HHA RN must assign a home health aide to each beneficiary. It is the responsibility of the RN or other appropriate skilled professional (e.g., physical therapist, [PT], occupational therapist [OT], speech therapist [ST]) to prepare written instructions for the beneficiary's care and to conduct home health aide supervisory visits every 14 days as follows:

- If the beneficiary is receiving skilled nursing services, the RN must complete the supervisory visit;
OR
- If the beneficiary is receiving only therapy services, the supervisory visit must be completed by the appropriate skilled professional (e.g., PT, OT, ST).

In some cases, the beneficiary may not be receiving skilled nursing or therapy services. In such cases, the RN must complete the supervisory visit of the home health aide no less than every 60 days. It is the responsibility of the supervising RN to co-sign all documentation completed by the Home Health aide. Each supervisory visit by the RN or other appropriate skilled professional must be documented in the beneficiary's medical record.

In accordance with 42 CFR §484.80, the HHA must ensure that the qualifications and training of the home health aide are sufficient to meet the individual needs of the beneficiary.

SECTION 11 – PERSONAL CARE

If there is an order for home health aide services and the beneficiary is also receiving personal care services through another entity (e.g., Home Help Program, MI Choice Waiver), there must be coordination between the two entities and documentation in the POC to verify that there is no duplication of services.

It is the responsibility of the HHA to identify other services the beneficiary may be receiving to ensure the services of the home health aide and personal care services through another entity (e.g., Home Help, MI Choice Waiver) and to assess the ability of the family or caregiver to perform personal care services. For beneficiaries enrolled with another entity (e.g., Home Help Program or MI Choice Waiver), the HHA must contact the adult services specialist or the waiver agent to ensure coordination and verify services are not duplicative in nature, nor occur simultaneously.

11.1 HOME HELP PROGRAM

The Home Help Program provides unskilled personal care services (i.e., assistance with ADL, IADL, and complex care tasks) to assist eligible beneficiaries with functional limitation(s) resulting from a medical or physical disability or cognitive impairment. The beneficiary's adult services worker at the local MDHHS office issues a provider-specific service authorization that includes the list of tasks the personal care provider is authorized to furnish to the client. (Refer to the Providers [Provider Payments] Section of the Home Help chapter for more information.) The Home Health POC must clearly identify why the HHA services are required along with Home Help. Medicaid covers occasional follow-up HHA visits made to observe, evaluate and document the beneficiary's progress if ordered by the attending physician or NPP.

11.2 HOME AND COMMUNITY BASED SERVICES WAIVER FOR THE ELDERLY AND DISABLED

Medicaid's Home and Community Based Services Waiver for the Elderly and Disabled (MI Choice Waiver) covers those services to aged and disabled individuals (age 18 and over) who, without the provision of waiver services, would require nursing facility care. Examples of services are chore, respite, and emergency response systems.

MI Choice beneficiaries are identified in the eligibility response with the Benefit Plan ID of MI Choice-MC. (Refer to the Beneficiary Eligibility chapter for additional information.)

SECTION 12 – DURABLE MEDICAL EQUIPMENT (DME)/SUPPLIES

Durable Medical Equipment (DME), certain medical supplies, orthotic and prosthetic appliances, shoe supplies, and oxygen (gas and equipment) are covered services for HHA beneficiaries when providing medically necessary skilled nursing or aide services. HHAs are required to provide medically necessary equipment and supplies either directly or through arrangement with DME providers. These items must be supplied and billed by a Medicaid enrolled medical supplier, orthotist, prosthetist, shoe supplier, or oxygen supplier, except as noted below. The beneficiary's attending physician (MD, DO, DPM) or NPP must order these items in writing. These providers may have to obtain PA for certain services, and the services provided must be in accordance with Medicaid policies.

MDHHS encourages the HHA to submit the beneficiary's POC to the medical supplier to help support the need for the item.

Routine medical supply items are included in the reimbursement for the HHA's nurse or aide visit. No separate reimbursement for such supplies is allowed. These supplies include, but are not limited to:

- Band-aids
- Enema kits (e.g., Fleet)
- Gloves (sterile, nonsterile), up to four pair
- Simple dressing (including 10 4x4's and one roll of tape)
- Skin cleansers - swabs or wipes (e.g., iodine, alcohol, Betadine)
- Sterile solutions (up to 30 ml.)
- Syringes and needles
- Thermometers
- Cotton swabs, balls
- Specimen cups
- Suture removal kits
- Gowns

If the treatment regimen requires quantities beyond those listed above for gloves, simple dressings, or sterile solutions, the HHA or the medical supplier may bill separately for the additional quantities. The need for additional supplies must be documented in the medical record. These are items that may be left in the beneficiary's home between visits where repeated applications are required, and the applications will be performed by the beneficiary, family member, nurse, etc. Supplies billed to Medicaid must be dispensed to a specific beneficiary and must be ordered by the attending physician or NPP as part of a written POC.

The MDHHS Home Health Database, available on the MDHHS website, contains a list of medical supply items that may be billed separately from the nurse or aide visit. If the quantity needed is beyond what is listed on the Home Health Database, the supplies must be billed by a DME/Medical Supplier. (Refer to the Directory Appendix for website information.) HHAs choosing to provide routine medical supplies beyond what is listed on the MDHHS Home Health Database and other medically necessary equipment

Michigan Department of Health and Human Services

Medicaid Provider Manual

and medical supplies directly to beneficiaries receiving home health services must enroll with Medicaid as DME providers. (Refer to the General Information for Providers chapter and the Medical Supplier chapter for additional information.)

SECTION 13 – NONCOVERED SERVICES

The services listed below are **not** covered under the home health program.

13.1 HOME UTERINE ACTIVITY MONITOR

Home health services related to the use of a home uterine activity monitor (HUAM) are not separately reimbursable. Reimbursement is made on a per diem rate to a medical supplier approved by MDHHS to provide this service. All equipment, perinatal nursing services, technical services, and supplies necessary for the provision of the HUAM are included in the rate.

13.2 DRUGS AND BIOLOGICALS

The cost of drugs and biologicals are not HHA benefits but may be covered by Medicaid. For information on PA for certain prescribed drugs, contact the MDHHS Pharmacy Benefits Manager (PBM). (Refer to the Directory Appendix for contact information.)

13.3 EVALUATION VISITS

Nursing or PT evaluation visits to assess the acceptance of the beneficiary by the HHA are not covered (e.g., adequacy of the environment for providing nursing care or PT in the home, ability and willingness of family members to meet the beneficiary's medical needs in the home setting, if the beneficiary meets Medicaid home health policy criteria). When the agency makes such an initial evaluation visit, the cost of the visit is considered an administrative cost of the agency and is not covered as a visit because the beneficiary has not been accepted for care by the HHA.

If, however, during the course of this initial evaluation visit the beneficiary is accepted by the HHA for care, and is also furnished the first service as ordered under the physician's or NPP's POC, the visit becomes the first billable visit.

13.4 HOSPICE

MDHHS does not separately reimburse HHAs for services related to the beneficiary's terminal illness when the beneficiary is enrolled in a hospice program. All HHA services related to the beneficiary's terminal illness are either arranged for (contractual agreement), or provided by, the hospice program.

13.5 MEDICAL SOCIAL SERVICES

Medical social services are not a Medicaid covered HHA service.

13.6 MISSED VISITS

Missed visits are not covered. If a beneficiary is not home when HHA staff arrives to provide a service, MDHHS does not reimburse the agency for the missed visit. The HHA may not charge the beneficiary for a missed visit unless it is the HHA's normal practice to charge everyone for missed visits. (The HHA must notify the beneficiary, in advance, that the beneficiary is required to pay for missed visits.)

Medicaid Provider Manual

13.7 OXYGEN

The administration of oxygen is included in the cost of the nurse or aide visit and is not separately reimbursable.

Oxygen gas and equipment are Medicaid benefits when supplied and billed by an enrolled pharmacy, oxygen supplier, or medical supplier in accordance with Medicaid policy.

Medicaid Provider Manual

SECTION 1 – GENERAL INFORMATION

1.1 OVERVIEW

Michigan's Medicaid state plan personal care services are provided through the Home Help program in accordance with 42 CFR §440.167. The program is administered by the Michigan Department of Health and Human Services (MDHHS) and provides personal care services to eligible Medicaid beneficiaries who need hands-on assistance with activities of daily living (ADLs) and instrumental activities of daily living (IADLs).

The purpose of the Home Help program is to support client well-being, safety, and choice. Home Help services enable clients with functional limitation(s) resulting from a medical or physical disability or cognitive impairment to live safely in the most independent setting. Authorized personal care services are based upon a comprehensive assessment conducted by an MDHHS adult services worker (ASW) and reflect the client's goals and preferences identified through a person-centered planning process. The Home Help program is designed to meet the following goals:

- Encourage and support the client's right and responsibility to make informed choices.
- Ensure necessary supports are offered to help the client live independently and with dignity.
- Recognize and encourage the client's natural support system.
- Empower the client to manage their services, respecting the client's right to determine what services are necessary, when they are completed, and how they are performed.

1.2 COMMON TERMS

Below are common terms used throughout this chapter:

Adult Services Worker (ASW)	This individual is an MDHHS employee and provides case management services for the Home Help program.
Agency Caregiver	A direct care worker employed by the agency provider. This individual provides Home Help personal care services to the client.
Agency Employee	An employee of the agency provider who has access to information regarding the client for the purposes of billing, answering phone calls, or assisting with setting up services for the client.
Agency Owner(s)	Possesses 5% or greater direct or indirect ownership interest of the agency provider and/or a person with control interest.
Agency Provider	<ul style="list-style-type: none">▪ A current Medicare certified home health agency; OR▪ An approved agency with a federal Employer Identification Number (EIN) that directly employs all (but not less than two) agency caregivers, not including the owner, who are providing services through the Home Help program and regularly receiving paychecks from the agency each month; OR▪ A Community Mental Health Services Program (CMHSP) that works with clients who use arrangements that support self-determination.

Medicaid Provider Manual

Agency Representative/ Resident Agent/Authorized Agency Representative	An individual who is authorized to act on behalf of the agency owner.
Board of Directors	A group of individuals elected or selected to act as representatives of the shareholders to establish corporate management-related policies and to make decisions on major company issues.
Client	A Medicaid beneficiary who is receiving personal care services through the Home Help program.
Individual Caregiver	A direct care worker employed directly by the client. This individual provides Home Help personal care services to the client.
Managing Employee	A general manager, business manager, administrator, director, or other individual who exercises operational or managerial control over, or who directly or indirectly conducts, the day-to-day operation of the institution, organization, or agency either under contract or through some other arrangement, whether or not the individual is a W-2 employee.
Unapproved Agency Provider	An agency provider that is enrolled in the Community Health Automated Medicaid Processing System (CHAMPS) but has not been approved to provide Home Help services or is earning the individual caregiver rate due to not being in full compliance with Home Help policy.

Medicaid Provider Manual

SECTION 2 – SERVICES

Medicaid funds are available for Home Help services provided to clients who meet the requirements outlined in the Eligibility Section of this chapter. The client's ASW can authorize up to 179.9 hours of Home Help services per month. Additional time may be authorized with approval from the MDHHS Home Help Policy Section. (Refer to the Directory Appendix for contact information.)

Home Help services eligible for Medicaid funding are limited to:

- Hands-on assistance with ADLs, IADLs, and complex care tasks.
- Contribution to the maintenance costs of a service animal. (Refer to Adult Services Manual [ASM] 137 for more information. A link to the ASM Table of Contents is available in the Directory Appendix.)

2.1 ASSISTANCE WITH ADLs

Home Help services are available to clients who require hands-on assistance with one or more ADLs, including:

- **Bathing:** Shampooing and drying the hair and cleaning the body or parts of the body using a tub, shower, or sponge bath. May include getting a basin of water; managing faucets; and soaping, rinsing, and drying the body.
- **Dressing:** Putting on and taking off garments; fastening and unfastening garments and undergarments; and assisting with special devices like back or leg braces, elastic stockings or garments, and artificial limbs or splints.
- **Eating:** Using utensils and a cup or glass; getting food and drink to the mouth; cutting up and manipulating food on the plate; swallowing food and drink; and cleaning the face and hands after a meal.
- **Grooming:** Maintaining personal hygiene and a neat appearance. May include combing and brushing the hair; brushing and cleaning the teeth; shaving; and fingernail and toenail care.
- **Mobility:** Walking or moving around inside the living area; changing locations in a room; climbing the stairs; maneuvering around pets; and managing obstacles like uneven floors.
- **Toileting:** Getting on and off the toilet, commode, or bed pan; emptying the commode, bed pan, or urinal; managing clothing; wiping and cleaning the body after toileting; cleaning ostomy or catheter tubes/receptacles; and applying diapers and disposable pads. May also include catheter, ostomy, or bowel programs.
- **Transferring:** Moving from one sitting or lying position to another; moving from the bed or wheelchair to the sofa; coming to a standing position; or repositioning the body.

Medicaid Provider Manual

2.2 ASSISTANCE WITH IADLS

Clients eligible to receive assistance with at least one ADL may receive assistance with one or more IADLs, including:

- **Laundry:** Gaining access to machines; sorting laundry; manipulating soap containers; reaching into the machine for laundry; operating the machine controls; hanging laundry to dry; and folding and putting away laundry.
- **Light housework:** Sweeping, vacuuming and washing floors; washing kitchen counters and sinks; cleaning the bathroom; changing bed linens; taking out garbage; dusting; cleaning the stove top; and cleaning the refrigerator.
- **Meal preparation or clean-up:** Planning menus; washing, peeling, slicing, and mixing ingredients; opening packages and cans; lifting pots and pans; reheating food; cooking; safely operating the stove; setting the table; serving the meal; and washing, drying, and putting away dishes.
- **Shopping:** Compiling a list; managing a cart or basket; identifying items needed; transferring items to the home and putting them away; and phoning in and picking up prescriptions. Limited to brief, occasional trips in the local area to shop for food, medical necessities, and household items required specifically for the health and maintenance of the client.
- **Taking medication:** Taking prescribed or over-the-counter medications.

2.2.A. MAXIMUM ALLOWABLE HOURS FOR IADLS

There are monthly maximum hour limits on all IADLs except taking medication. The limits are as follows:

IADL	Maximum Hours per Month
Shopping	5
Light housework	6
Laundry	7
Meal preparation	25

2.2.B. PRORATION OF IADLS

Time authorized for all IADLs except taking medication is prorated by one half in shared living arrangements with other adults unless it can be clearly documented that assistance with the client's authorized IADLs is solely for the benefit of the client. **NOTE:** Proration is not required in situations where others live in adjoining apartments or flats or in a separate home on shared property with no shared common living area.

Medicaid Provider Manual

2.3 COMPLEX CARE TASKS

Complex care tasks are performed for a client whose diagnosis or condition requires a higher level of care than what is provided in assistance with ADLs and IADLs. Complex care tasks may require special treatment and equipment. The provider may need specific instructions by a medical professional or the client.

Common complex care tasks include:

- **Bowel program:** Recommended by a medical professional to aid a client with having a bowel movement or to prevent chronic constipation complications. May be recommended for a client with paralysis, paraplegia, hemiplegia, or lesions or congenital anomalies of the intestinal tract. Assistance may include a combination of digital stimulation, manual removal of stool from the rectum, insertion of a suppository, or an enema. **NOTE:** A bowel program that requires greater than 60 minutes of hands-on assistance per day requires medical documentation from a physician or nurse practitioner verifying the bowel program is safe and meets the client's needs.
- **Catheters or leg bags:** A client needing assistance with urinary voiding due to bladder dysfunction may need assistance with insertion, emptying, and replacing of an indwelling (Foley) catheter, intermittent catheterization, or suprapubic catheter maintenance and emptying. Catheterization activities include cleaning, replacing, and switching between different types of urine drainage bags.
- **Colostomy care:** A client who has had a portion of their colon removed or requires their colon to be diverted, either permanently or temporarily, may have an opening in the abdominal wall (called a stoma) emptying the colon contents into a drainage appliance and bag. A client with a colostomy may need assistance with maintenance and cleaning of the stoma site, as well as maintenance, emptying, cleaning, and replacement of the appliance and bag.
- **Eating or feeding assistance:** A client may need assistance with a feeding tube or supplemental food bag. Assistance may include the following feeding methods: bolus, intermittent bolus by gravity bag or syringe, continuous drip by gravity or pump, or a combination of continuous drip and bolus feedings. Tasks may include preparing the formula, checking the placement of the feeding tube, and priming the tubing or pump.
- **Injections:** A client may need medication(s) to be delivered via subcutaneous or intramuscular injections as ordered by a physician or nurse practitioner. Assistance with this task may include preparing medication, cleaning the injection site, and administering the injection as ordered. Some medications require testing prior to injection, such as using a blood glucose monitor prior to injecting insulin.
- **Peritoneal dialysis:** A client may have an option to do in-home dialysis in place of hospitalization or treatment at a dialysis center. May include continuous ambulatory peritoneal dialysis (CAPD) performed by a machine or manually. Assistance may include setting up, initiation, and discontinuation of infusion, adjustments to infusion, and monitoring vital signs. May require time for maintenance and cleaning of the dialysis machine and equipment.
- **Range of motion exercises:** A client with limited or no mobility may require assistance with range of motion exercises to prevent stiffness and contractures and to improve flexibility and circulation in joints and extremities. **NOTE:** For requests greater than 60 minutes per day, documentation from a prescribing medical professional is needed to detail treatment and exercises.

Medicaid Provider Manual

- **Respiratory treatment:** A client with altered airway function may require the administration of oxygen, nebulizer, aerosol, or respiratory therapy, or the use of mechanical aids to facilitate lung inflation. Assistance may include the use of medical gases and administration apparatus; humidification, aerosol, medications, ventilator support, percussion and cough assist devices; and airway management.
- **Specialized skin care:** A client with limited or no mobility who is at risk for skin breakdown may require turning and repositioning of their body to prevent development of decubitus ulcers (also known as bed sores or pressure ulcers), the use of pressure-reducing devices, and the treatment of decubitus ulcers with pads, creams, or lotions.
- **Suctioning:** A client with a tracheostomy, altered airway function, or choking or aspiration risks may require oral or tracheal suctioning to keep their airway open and free of mucous. Oral suctioning involves removing mucous secretions and foreign material from the mouth and throat with the use of a Yankauer catheter. Tracheal suctioning involves clearing mucus from the tracheostomy tube. Assistance may also include maintenance and cleaning of the tracheostomy, dressings, and equipment.
- **Ventilator:** A client who needs mechanical ventilation to support their respiratory function may need assistance with putting on or removing the ventilator, adjustments to ventilator settings, managing ventilator humidification, and maintaining and cleaning the ventilator. Non-invasive ventilator support may include continuous positive airway pressure (CPAP) and bi-positive airway pressure (Bi-PAP).
- **Wound care:** A client with a pressure, surgical, or other wound(s) may need assistance with cleaning, dressing, packing, debridement, and irrigation of the wound(s) or assessment of the wound(s) for complications, such as infection or vascular compromise. Wound care is prescribed and monitored by a physician or nurse practitioner, usually on a weekly or monthly basis, but can be performed by a trained caregiver.

This is not an exhaustive list of complex care tasks eligible for payment. Specific tasks are determined through a comprehensive assessment. (Refer to the Eligibility [Comprehensive Assessment] Section in this chapter for more information.)

2.4 HOME HELP SERVICES IN THE WORKPLACE

Home Help services may be used to enable the client to be employed. Additional service hours are not authorized for this purpose. The client determines how to distribute the authorized service hours between the home and workplace. Home Help services in the workplace are limited to hands-on assistance with ADLs, IADLs, and complex care tasks and do not include other tasks that may need to be performed as part of the client's work duties.

2.5 HOME HELP SERVICES FOR A MINOR CHILD

Home Help services provided to a minor child must be a necessary supplement to usual parental care and justified by the high service needs of the family. High service needs are those that arise from a minor child's physical, medical, emotional, or mental impairment and require significantly higher levels of intervention than those required by a child of the same age without similar impairments.

When a responsible relative(s) is unable due to a medical condition to meet a minor child's care needs, or is unavailable due to employment, school, or other legitimate reason, the responsible relative(s) can hire

Medicaid Provider Manual

a provider to perform the ADLs, medication administration, and meal preparation required during their absence. (Refer to ASM 101 for more information. A link to the ASM Table of Contents is available in the Directory Appendix.)

A responsible relative cannot be the paid provider for a minor child. A responsible relative is defined as a client's spouse or the parent of an unmarried client under the age of 18.

Payments are only for time authorized to complete approved tasks and cannot include time for childcare, supervision, or monitoring.

Medicaid Provider Manual

SECTION 3 – NONCOVERED SERVICES

Noncovered services include, but are not limited to:

- Supervising, monitoring, reminding, guiding, teaching, or encouraging the client.
- Services provided for the benefit of people other than the client.
- Services a responsible relative is able and available to provide. A responsible relative is defined as a client's spouse or the parent of an unmarried client under the age of 18.
- Similar services provided by another resource at the same time (i.e., a duplication of services).
- Transportation other than authorized travel time for shopping and laundry.
- Money management, such as power of attorney or representative payee.
- Home delivered meals.
- Adult or child day care.
- Recreational activities.

SECTION 4 – SERVICE SETTING

4.1 ALLOWABLE SERVICE SETTINGS

Home Help services may be authorized for a client living in:

- Their own home or apartment, either alone or with roommates or relatives.
- The home of a family member.
- A room and board or CMHSP-supervised setting that does not meet the definition of an Adult Foster Care (AFC) or Home for the Aged (HFA) facility.

4.1.A. ROOM AND BOARD SETTING

A room and board setting is one where, in exchange for a fee, a person is provided with a place to live and meals. If the client's name is on the lease and the setting does not meet the definition of an AFC or HFA, Home Help services may be provided. The client is not eligible for assistance with meal preparation.

The following may provide Home Help services to a client residing in a room and board setting:

- A homeowner who is related to the client. A homeowner is defined as the person or entity that owns, leases, or rents the room and board setting. **NOTE:** A responsible relative cannot serve as the Home Help provider. A responsible relative is defined as a client's spouse or the parent of an unmarried client under the age of 18.
- A provider that is not affiliated with the homeowner or the room and board setting.

When the homeowner is **not** related to the client:

- The homeowner must not serve as the client's Home Help provider.
- The homeowner's employees and relatives must not serve as the client's Home Help provider(s).
- The homeowner must not benefit financially from the Home Help payment to the client's Home Help provider.
- The homeowner must not be legally affiliated with or otherwise connected to the client's Home Help provider.

4.1.B. CMHSP-SUPERVISED SETTING

Residents of a CMHSP-supervised setting who receive community mental health (CMH) services may also qualify for Home Help services if the setting does not meet the definition of an AFC or HFA. Home Help services cannot be provided by the person or agency provider that owns, rents, or leases the home. A client's assessed hours for IADLs other than taking medication must be reduced by 50 percent unless it can be clearly documented that IADLs for the client are completed separately from other adults in the home. The client's ASW will make this determination in consultation with the client and their representative as part of the person-centered planning process.

Medicaid Provider Manual

4.2 TEMPORARY RESIDENCE OUTSIDE OF MICHIGAN

A client with active Medicaid may remain eligible for Home Help services in a temporary residence outside the state if there is evidence of intent to return to Michigan. Payment can be authorized only for those services required by the client in any living arrangement (permanent or temporary) and only to the provider(s) authorized to provide Home Help services prior to the client's temporary absence. The client must have a demonstrated need for continuity of care during the temporary absence and must confirm with the ASW that the provider(s) is rendering services in the temporary residence.

An in-person comprehensive assessment with the ASW in the client's home is required to authorize an increase in services or the continuation of services beyond the client's six-month review date. (Refer to the Eligibility [Comprehensive Assessment] Section in this chapter for more information.)

4.3 PROHIBITED SERVICE SETTINGS

Home Help services cannot be authorized for a client who is an inpatient or resident of a(n):

- Hospital,
- Nursing facility,
- Institution for mental disease,
- AFC facility as defined in the Adult Foster Care Facility Licensing Act, Public Act 218 of 1979 (MCL 400.701 et seq.),
- HFA as defined in the Public Health Code, Public Act 368 of 1978 (MCL 333.20106), or
- Correctional institution, such as a state or federal prison or local jail.

4.3.A. DATE OF FACILITY ADMISSION

Providers are not eligible for payment for Home Help services provided on the day a client is admitted to a nursing facility, institution for mental diseases, AFC, HFA, or correctional institution. Payments for Home Help services provided on these days are subject to denial and recoupment.

Providers may be eligible for payment for Home Help services provided on the day a client is admitted to a hospital. Refer to the Provider Payments (Payment for Services Provided on the Client's Hospital Admission Date) subsection in this chapter for more information.

4.3.B. DATE OF FACILITY DISCHARGE

Providers are eligible for payment for Home Help services provided on the day a client is discharged from any of the facilities listed above.

4.3.C. REPORTING FACILITY STAYS

The client or provider must report a facility stay to the client's ASW within ten business days of the date of discharge to ensure proper Home Help payment.

Medicaid Provider Manual

SECTION 5 – ELIGIBILITY

Home Help services are available to an individual who:

- Meets Medicaid eligibility requirements,
- Has a certified medical need for services,
- Is determined through a comprehensive assessment to have a need for services,
- Does not have a responsible relative who is able or available to assist with ADL, IADL, and complex care tasks, and
- Is not concurrently enrolled in the MI Choice waiver program, MI Health Link, or the Program of All-Inclusive Care for the Elderly (PACE).

All criteria must be met to establish eligibility for Home Help services. The individual must continue to meet these eligibility requirements on an ongoing basis to remain eligible for services.

5.1 MEDICAID ELIGIBILITY

An individual may be eligible for Home Help services under one of the following conditions:

- All requirements for Medicaid have been met.
- The individual is a Medicaid deductible beneficiary, and their Medicaid deductible obligation has been met. (Refer to ASM 105 and the Medicaid Deductible Beneficiaries [Spenddowns] Section in the Beneficiary Eligibility chapter of this manual for more information. A link to the ASM Table of Contents is available in the Directory Appendix.)

5.2 MEDICAL ELIGIBILITY

The client's medical need for Home Help services must be certified using the Medical Needs form (DHS-54A). (Refer to the Forms Appendix for a copy of the DHS-54A.) The DHS-54A must be signed and dated by an approved Medicaid provider enrolled in CHAMPS who holds one of the following professional licenses:

- Physician (MD or DO)
- Physician assistant
- Nurse practitioner
- Occupational therapist
- Physical therapist

A Veterans Health Administration (VHA) medical provider may complete a DHS-54A or a VA Form 10-10M.

The client or their representative is responsible for obtaining the medical certification of need, but it must be completed by one of the medical professionals listed above. The medical professional must enter their National Provider Identifier (NPI) number on the DHS-54A or VA Form 10-10M and indicate whether they are a Medicaid-enrolled provider.

Medicaid Provider Manual

The medical professional certifies the client's need for services is related to an existing medical condition, physical disability, or cognitive disability. The medical professional does not prescribe or authorize personal care services. Needed services are determined by the comprehensive assessment conducted by the ASW.

5.3 COMPREHENSIVE ASSESSMENT

An ASW determines the client's need for Home Help services during a comprehensive assessment. The ASW issues a Time and Task to communicate to the client and provider the services that are authorized. (Refer to the Providers [Provider Payments] Section of this chapter for more information.)

5.3.A. INITIAL COMPREHENSIVE ASSESSMENT

Prior to case opening, an applicant must participate in an in-person comprehensive assessment with an ASW in the applicant's home. The purpose of the comprehensive assessment is to determine the applicant's eligibility for Home Help services.

5.3.B. SIX-MONTH REVIEW

Every six months, the client's comprehensive assessment must be updated during an in-person review with the ASW in the client's home.

5.3.C. REQUESTS FOR SERVICE CHANGES

A client requesting an increase in Home Help services must participate in a comprehensive assessment update with the ASW before the increase can be authorized. The update may take place in person or by phone. If the client is non-verbal or requests an in-person visit, the update must be conducted in person in the client's home.

5.3.D. CASE TRANSFER TO A NEW COUNTY

A client who moves to a new county must participate in an in-person comprehensive assessment with the ASW in the client's home before payment for Home Help services in the new county can be authorized.

5.3.E. REQUESTS FOR SERVICE CHANGES

A client who requests a change in Home Help services must participate in a new review and comprehensive assessment with the ASW before payment can be authorized. The review and comprehensive assessment may take place in person or by phone. If the client is non-verbal or requests an in-person visit, the review and comprehensive assessment must be conducted in person in the client's home.

5.4 STATUS OF RESPONSIBLE RELATIVES

A responsible relative is defined as a client's spouse or the parent of an unmarried client under the age of 18. Home Help services may only be authorized if a responsible relative is unable or unavailable to provide the services.

Medicaid Provider Manual

An **unable** responsible relative has disabilities of their own that prevent them from providing care. These disabilities must be documented and verified by a medical professional on a DHS-54A. (Refer to the Forms Appendix for a copy of the DHS-54A.)

An **unavailable** responsible relative is absent from the home for an extended period due to employment, school, or other legitimate reasons. The responsible relative must provide documentation – such as a work or school schedule – that verifies they are unavailable to provide care.

When a client and a responsible relative reside in the same home, the IADLs of shopping, laundry, and light housework may only be authorized if they must be completed during the time the responsible relative is unavailable. **Example:** A client's spouse works from 7:00 a.m. to 6:00 p.m., Monday through Friday. If the spouse is able and available to assist with shopping, laundry, and light housework outside their work schedule, these tasks will not be authorized for the client.

A client who is separated from their spouse must provide verification that they no longer reside in the same home. Verification may include a driver's license, rent receipt, or utility bill. The separated spouse cannot serve as the Home Help client's provider.

5.5 COORDINATION WITH OTHER SERVICES

Enrollment in the Home Help program is permitted if the client is enrolled in one or more of the following programs. For information about concurrent enrollment requirements, refer to the sections of this manual listed in the chart below.

Program / Services	Reference
Habilitation Supports Waiver for Persons with Developmental Disabilities	Habilitation Supports Waiver for Persons with Developmental Disabilities (Waiver Supports and Services) Section of the Behavioral Health and Intellectual and Developmental Disability Supports and Services chapter
Children's Waiver	Children's Waiver Community Living Support Services Appendix (Coverage Decisions Section) of the Behavioral Health and Intellectual and Developmental Disability Supports and Services chapter
Home Health	Personal Care (Home Help Program) Section of the Home Health chapter
Hospice	Hospice Services (Home Help/Personal Care) Section of the Hospice chapter
Medicaid Health Plans	General Information (Services Excluded from MHP Coverage but Covered by Medicaid) Section in the Medicaid Health Plans chapter

SECTION 6 – HOME HELP PROGRAM ENROLLMENT

Home Help program enrollment begins with one or more of the following contacts with a local MDHHS office:

- A referral received by phone, U.S. mail, fax, or in person. The referral source does not have to be the individual in need of services.
- The submission of a completed and signed Adult Services Application (DHS-390).
- The submission of a completed and signed Medical Needs form (DHS-54A).

(Refer to the Directory Appendix for local MDHHS office contact information and the Forms Appendix for copies of the DHS-54A and DHS-390.)

6.1 ELIGIBILITY DETERMINATION

When Home Help services are approved, MDHHS mails the client the Services Approval Notice (DHS-1210) and the client's Time and Task, which lists the client's authorized services. The client's Time and Task may be different from the provider's Time and Task due to client choice or provider availability. The client's Time and Task indicates the maximum authorized time based on the client's assessed need. With prior approval from the client's ASW, the provider authorization may exceed the provider's Time and Task but may not exceed the client's Time and Task.

When Home Help services are denied, MDHHS sends the Adequate Negative Action Notice (DHS-1212A) and the Request for Hearing form (DCH-0092) to the client through U.S. mail. The case denial is effective on the date the notice is mailed to the client. The client can submit the DCH-0092 to appeal the determination.

(Refer to the Appeals [Client Appeals] Section in this chapter and ASM items 110, 115, and 150 for more information. A link to the ASM Table of Contents is available in the Directory Appendix.)

Medicaid Provider Manual

SECTION 7 – DISENROLLMENT

Home Help services payments may be terminated, and the client's case closed, when the client:

- Fails to meet any of the eligibility requirements.
- Fails to participate in a six-month review. (Refer to the Eligibility [Comprehensive Assessment] Section of this chapter for more information.)
- Voluntarily disenrolls from the Home Help program.
- Receives services from another program that results in a duplication of services.

(Refer to ASM items 155 and 170 for more information. A link to the ASM Table of Contents is available in the Directory Appendix.)

Medicaid Provider Manual

SECTION 8 – PROVIDERS

Home Help services are provided by individual caregivers, agency providers and agency caregivers. (Refer to the General Information [Common Terms] Section in this chapter for more information.) The Home Help program supports the client in selecting and supervising the provider(s). The client is the employer of the individual caregiver and is responsible for selecting and overseeing the agency provider. The client has the right to terminate services with the provider at any time. All providers must meet minimum provider qualifications established by the Home Help program.

8.1 PROHIBITED PROVIDERS

Home Help services cannot be provided by a(n):

- Responsible relative. (Refer to the Eligibility [Status of Responsible Relatives] Section of this chapter for more information.)
- Minor (17 years of age or under).
- Financial management services vendor, such as a fiscal intermediary or fiscal/employer agent.
- Current Home Help client.
- Provider convicted of a crime(s) that excludes the provider from Medicaid participation. (Refer to the Denial of Enrollment, Termination and Suspension [Termination or Denial of Enrollment] Section in the General Information for Providers chapter of this manual for more information.)
NOTE: A client may be able to hire an individual caregiver with an excludable offense using the Personal Choice and Acknowledgement of Provider Selection process outlined below. An excluded provider not eligible for this process may request enrollment or reinstatement as a Medicaid provider. (Refer to the Denial of Enrollment, Termination and Suspension [Enrollment and Reinstatement After Termination or Denial] Section in the General Information for Providers chapter of this manual for more information.)

8.1.A. PERSONAL CHOICE AND ACKNOWLEDGEMENT OF PROVIDER SELECTION

A client may hire an individual caregiver who has been convicted of a crime that is not a federally mandated exclusion. The client must document their choice by signing and dating the Personal Choice and Acknowledgement of Provider Selection form (MSA-119). The MSA-119 verifies the client received notification of the criminal offense(s) that prompted the exclusion and affirmed their selection of the individual caregiver to deliver Home Help services.

The client receives the MSA-119 from their ASW or local MDHHS office. (Refer to the Directory Appendix for contact information.) After the signed acknowledgement is received, processed, and recorded by MDHHS, the effective start date for the selected individual caregiver is the date the client signs the MSA-119. Payment will not be authorized prior to the signature date on the form.

Medicaid Provider Manual

The client may only use the MSA-119 to select an individual caregiver who meets the following criteria:

- Does not have a disqualifying conviction that is one of the four exclusions under 42 USC 1320a-7(a). (Refer to the Denial of Enrollment, Termination and Suspension [Termination or Denial of Enrollment] Section in the General Information for Providers chapter of this manual for more information.)
- Is not legally responsible for the client.
- Meets the caregiver qualifications outlined in this chapter.

The MSA-119 cannot be used to select an agency provider or agency caregiver.

A personal choice selection may be applied for the limited purpose of providing Home Help services to the specific client identified on the MSA-119. A personal choice selection must not be construed as approval, authorization, or permission to provide services to other clients. If an individual caregiver with an exclusion wishes to work for multiple clients, an MSA-119 must be signed by each client. The approved date of payment is based on the date the client signed the MSA-119.

Individual caregivers selected through the personal choice provisions of this section must be registered in CHAMPS and other systems (if applicable) for the purposes of monitoring, contacting, and generating payments; however, such individuals are prohibited from either being placed in the provider referral database or receiving referrals for additional clients through that process.

8.2 CAREGIVER QUALIFICATIONS

Agency caregivers and individual caregivers must be:

- 18 years of age or older.
- Able to follow instructions and Home Help program procedures and perform the services required.
- Able to handle emergencies and know when to seek assistance from appropriate sources in the event of an emergency.
- In adequate health to perform the needed services.
- Dependable and able to meet job demands.
- Willing to participate in available training programs, as necessary.
- In compliance with provider enrollment requirements. (Refer to the Providers [Provider Enrollment] Section of this chapter for more information.)

Home Help payments may be terminated if the caregiver fails to meet any of the above criteria.

Medicaid Provider Manual

8.3 AGENCY PROVIDER QUALIFICATIONS

To qualify for payment at the agency provider rate, an entity must be approved by the MDHHS Home Help Policy Section and be one of the following:

- A current Medicare certified home health agency.
- An agency with a federal EIN that directly employs all – but not less than two – agency caregivers, not including the owner, who provide services through the Home Help program and regularly receive paychecks from the agency each month.
- A CMHSP that works with clients who use arrangements that support self-determination.

(Refer to the Providers [Agency Provider Approval Process] Section of this chapter for more information.)

8.4 PROVIDER ENROLLMENT

All Home Help providers must enroll in CHAMPS and undergo a criminal history screening. (Refer to the Provider Enrollment Section of the General Information for Providers chapter of this manual for more information.)

8.4.A. INDIVIDUAL CAREGIVER ENROLLMENT

Individual caregivers must be enrolled in CHAMPS prior to working with clients.

8.4.B. AGENCY PROVIDER ENROLLMENT

Agency providers must be enrolled in CHAMPS prior to working with clients. Additionally, agency owners must ensure agency employees and agency caregivers are properly enrolled in CHAMPS.

8.4.B.1. AGENCY CAREGIVER AND AGENCY EMPLOYEE ENROLLMENT

The agency owner(s) must ensure that:

- All agency caregivers are enrolled in CHAMPS as atypical individual providers and associated to the agency provider prior to providing Home Help services. The date of this association must not be earlier than the date the criminal history check was completed to protect client safety. **NOTE:** An agency owner who provides direct personal care services to clients must also enroll in CHAMPS as an atypical individual provider and associate to their agency.
- All agency employees are listed in the agency provider's CHAMPS enrollment in "Step 9: Provider Controlling Interest/Ownership Details" prior to accessing client information.

(Refer to the General Information [Common Terms] Section of this chapter to determine which agency personnel meet the definition of an agency caregiver and an agency employee.)

Medicaid Provider Manual

When a post-payment audit reveals that MDHHS paid for services provided by one or more agency caregivers or agency employees who were noncompliant with CHAMPS enrollment policy, MDHHS will recoup the overpayments from the agency provider.

8.4.B.2. HOME HELP AGENCY CAREGIVER ENROLLMENT AUTHORIZATION FORM (MSA-204)

The agency caregiver has the sole authority to submit their CHAMPS enrollment application but can use the Home Help Agency Caregiver Enrollment Authorization form (MSA-204) to delegate this responsibility to their employing agency provider. The MSA-204 documents that the agency caregiver:

- Permits the agency provider to complete the CHAMPS enrollment application in the agency caregiver's absence.
- Has read, understands, and agrees to all Home Help terms and conditions.

The agency provider must not enroll the agency caregiver in CHAMPS before the agency caregiver has completed the MSA-204 and submitted it to the agency provider. To protect client safety, the agency caregiver must not provide Home Help services until their CHAMPS enrollment application has been approved and the agency caregiver has associated to the agency provider in CHAMPS. A failure to comply with these requirements may result in recoupment from the agency provider of payments for services the agency caregiver provides. (Refer to the Forms Appendix for a copy of the MSA-204.)

8.5 AGENCY PROVIDER APPROVAL PROCESS

To apply to become an approved agency provider, a new agency must:

- Have a federal EIN and a Type 2 (Organization) National Provider Identifier (NPI).
- Register with the Michigan Department of Licensing and Regulatory Affairs (LARA) or the agency's local County Clerk office.
- Create a vendor account in the State of Michigan Statewide Integrated Governmental Management Application Vendor Self Service system (SIGMA VSS). (Refer to the Directory Appendix for more information.)
- Enroll in CHAMPS.
- Submit the following documents to the MDHHS Home Help Policy Section:
 - A copy of the county registration if the agency registered with its local County Clerk office.
 - A letter of intent on agency letterhead with the current date and the agency owner(s) written signature(s) that includes:
 - A list of the services the agency will provide and the county(ies) it intends to serve.
 - Names, email addresses, and phone numbers of the agency owner(s) and managing employee(s).

Medicaid Provider Manual

- A copy of Internal Revenue Service (IRS) correspondence confirming the agency's EIN.
- A completed, signed Home Help Agency Provider Employment Requirements form (HASA-2104). The MDHHS Home Help Policy Section includes the HASA-2104 in the agency application packet emailed to the agency. The HASA-2104 can also be accessed through the Forms Appendix.

Additional documents may be needed to clarify information received in the documents above. Applicants are encouraged to scan and email documents to the MDHHS Home Help Policy Section with the subject line of "Agency Application". Fax and mail are acceptable; however, confirmation that documents have been received is not available with these options. (Refer to the Directory Appendix for contact information.)

8.5.A. APPROVAL DETERMINATION

Within 30 calendar days of the receipt of all required documents, the MDHHS Home Help Policy Section notifies the applicant in writing of its approval, denial, or the need for additional information.

An applicant is denied enrollment if any of the agency owners, agency representatives/resident agents, or managing employees had direct or indirect ownership interest or control interest of an agency that was suspended or terminated from the Michigan Medicaid program within the preceding five years. (Refer to the Denial of Enrollment, Termination and Suspension [Termination or Denial of Enrollment] Section in the General Information for Providers chapter of this manual for more information.)

8.5.B. NEW AGENCY PROVIDER COMPLIANCE REVIEW

Once a new agency provider begins billing for Home Help services, it must undergo a compliance review. The MDHHS Home Help Policy Section will request the following documents three months after the first payment for Home Help services:

- A letter listing the agency owner(s) and managing employee(s), along with their email addresses and phone numbers, and the agency's correspondence address.
- A list of all agency caregivers currently providing Home Help services. The list must include each agency caregiver's name, individual CHAMPS provider ID, and the name(s) of the client(s) they serve.
- Three months of payroll records that must include agency caregiver names, pay period dates, payment amounts, Federal Insurance Contributions Act (FICA) withholdings, and proof of compliance with state unemployment insurance filings and payments. If payroll records do not verify tax payments, the agency provider may need to submit State of Michigan Form UIA 1028 and IRS Form 941.

Additional documents may be needed to clarify information received in the documents above. The MDHHS Home Help Policy Section will email the agency provider a letter listing the required documents. The agency provider is encouraged to scan and email documents to the MDHHS Home Help Policy Section with the subject line of "New Agency Compliance Review". Fax and

Medicaid Provider Manual

mail are acceptable; however, confirmation that documents have been received is not available with these options. (Refer to the Directory Appendix for contact information.)

8.5.C. REMOVAL OF APPROVED AGENCY PROVIDER STATUS

MDHHS may revoke an agency provider's approved status if any of the following conditions are met:

- An agency provider fails to comply with Home Help policies.
- A new agency provider has not received payments for Home Help services within 12 months of its date of approval.
- An established agency provider has not rendered Home Help services within the last six months.

An unapproved agency provider remains eligible to provide services at the individual caregiver rate. The agency provider may contact the MDHHS Home Help Policy Section to request reinstatement of its approved status and the agency provider rate. (Refer to the Directory Appendix for contact information.)

8.6 GENERAL PROVIDER OPERATING STANDARDS

Providers must adhere to the following operating standards as a condition of participation in the Home Help program:

- Sign and retain a copy of the Home Help Services Agreement (MSA-4676) for every client. (Refer to the Home Help Services Agreement (MSA-4676) subsection for additional information.)
- Meet ASW interview requirements.
- Provide proof of identity.
- Comply with recruitment and marketing policies.
- Meet reporting requirements.
- Cooperate with the State of Michigan and MDHHS, or their designee, regarding any audits, investigations, or inquiries related to Home Help services provided.
- Comply with the privacy, security, and confidentiality provisions of all applicable laws governing the use and disclosure of protected health information.
- Comply with Home Help provider policies.

8.6.A. HOME HELP SERVICES AGREEMENT (MSA-4676)

The Home Help Services Agreement form (MSA-4676) is an agreement between the client and the Home Help provider. It outlines the general service requirements and the Home Help provider's authorized tasks.

Individual caregivers and agency providers must sign an MSA-4676 for every Home Help client prior to delivering services. Payment cannot be authorized until the signed MSA-4676 is returned to the client's ASW or local MDHHS office.

Medicaid Provider Manual

The client must receive the MSA-4676 from the ASW and manages the form completion and submission. Once the client and provider sign and date the MSA-4676, it must be returned to the client's ASW or local MDHHS office. The form may be delivered in person or by fax, U.S. mail, or email. The client has the authority to decide how to return the completed MSA-4676 and may delegate the task to the provider.

An agency provider only needs to sign one MSA-4676 per client. A new MSA-4676 is not required when a new agency caregiver begins working with the client. The agency owner(s) may either sign the MSA-4676 or designate an authorized signer(s). Any individual who signs the MSA-4676 on the agency provider's behalf binds the agency provider to the terms outlined in the form. The agency owner(s) is responsible for ensuring the form is signed by an authorized signer. The authorized signer must be associated to the agency provider in CHAMPS or listed in "Step 9: Provider Controlling Interest/Ownership Details" of its CHAMPS enrollment.

The provider must retain a copy of the signed form in a secure location for seven years from the last date of services provided to the client.

8.6.B. CAREGIVER INTERVIEWS

Individual caregivers and agency caregivers must participate in an interview with the client's ASW at the start of service provision and every six months thereafter. At the start of service provision and at least once per year, the interview must be held in-person with the ASW. If phone or virtual (audio/visual only) contact was made at the last interview, an in-person contact with the ASW is mandatory for the next interview. (Refer to the Eligibility [Comprehensive Assessment] Section of this chapter for more information.)

Caregiver interviews are scheduled by the client's ASW and must occur during the review month. Follow-up by the caregiver may be needed if the ASW's initial attempt to schedule the review is unsuccessful.

NOTE: When an agency provider begins services with a client, the initial interview may be with the agency owner. Once services have begun, subsequent contact must be with the agency caregiver(s) providing the direct hands-on care to the client. Failure to cooperate with these requirements may result in suspension of payment to the agency provider.

8.6.C. PROOF OF IDENTITY

Providers who have direct contact with clients must carry and present a picture identification that includes their name for verification. Providers must show their identification whenever requested by the client's ASW or other MDHHS staff working in collaboration with the Home Help program. Picture identification may include a driver's license or other state-issued identification, passport, or employee identification. An expired form of identification is acceptable if identity can be verified by the ASW or other MDHHS staff.

Medicaid Provider Manual

8.6.D. RECRUITMENT AND MARKETING

Providers are prohibited from:

- Using materials developed by MDHHS in advertising, marketing, or recruitment in a manner that misrepresents the provider's relationship with the State of Michigan, MDHHS, or the Home Help program. The use of the MDHHS logo on provider documents is prohibited.
- Recruiting clients in MDHHS offices or anywhere on MDHHS premises. **NOTE:** Providers may conduct general advertising off MDHHS premises.
- Recruiting or directing advertising to clients currently receiving Home Help services.

Additionally, agency providers are prohibited from:

- Recruiting agency caregivers in MDHHS offices or anywhere on MDHHS premises. **NOTE:** Agency providers may conduct standard employee recruitment (e.g., posting job openings) off MDHHS premises.
- Recruiting or directing their advertising to individual caregivers who are currently providing Home Help services to one or more clients.
- Allowing an agency caregiver to provide services to a client who they were assisting as an individual caregiver for 90 days after commencement of employment with the agency provider or for 90 days after termination of services as the client's individual caregiver, whichever comes later.

8.6.E. REPORTING REQUIREMENTS

8.6.E.1. CHANGES AFFECTING PROVIDER ENROLLMENT

Providers must report all changes affecting their enrollment by updating their information in CHAMPS. This includes, but is not limited to, changes in address, contact name, or telephone number. Agency providers must also report changes in agency ownership, agency caregivers, and agency employees.

Failure to notify MDHHS within 10 calendar days of any changes may result in the termination of the provider's enrollment, denial of claims for services provided, and for agency providers, a reduction from the agency provider payment rate to the individual caregiver payment rate.

8.6.E.2. CHANGES AFFECTING PAYMENT AUTHORIZATION

Providers must notify MDHHS within 10 business days of any changes that affect the authorization of Home Help services payments, including but not limited to discontinuation of services, client hospitalization, or client admission to a nursing or AFC facility.

Medicaid Provider Manual

8.6.E.3. MANDATED REPORTER REQUIREMENTS

Pursuant to MCL 400.11a, all Home Help providers are mandated reporters and must report suspected abuse, neglect, or exploitation of adults to Centralized Intake for Abuse and Neglect. (Refer to the Directory Appendix for contact information.)

8.7 AGENCY PROVIDER OPERATING STANDARDS

8.7.A. ALL AGENCY PROVIDERS

In addition to the requirements in the General Provider Operating Standards subsection in this chapter, all agency providers must adhere to the following operating standards:

8.7.A.1. NON-COMPETITION CONDITIONS

The agency provider must neither have, nor enforce, any agreements or requirements prohibiting an agency caregiver or agency employee from becoming an individual caregiver or working for another agency during or after their employment with the agency provider.

8.7.A.2. RECORD RETENTION REQUIREMENTS

Agency providers must maintain supporting documentation verifying that services billed to MDHHS were provided to the client. At a minimum, this includes a copy of each client's Time and Task and verification of days and times worked, tasks completed, and names of clients that the agency provider worked with each day.

Records must be kept in a secure location for seven years from the date of service. Failure to produce supporting documentation for claims may result in recoupment of Home Help payments made to the agency provider. (Refer to the Record Keeping [Availability of Records] Section in the General Information for Providers chapter of this manual for more information.)

8.7.B. APPROVED AGENCY PROVIDERS

To retain approved agency provider status and remain eligible for the agency provider rate, agency providers must also adhere to the following operating standard:

8.7.B.1. DIRECT HIRE REQUIREMENT

Approved agency providers must directly employ all agency caregivers and agency employees who work with Home Help clients. Medicaid will not reimburse an agency provider for services that were provided by a contracted agency caregiver. Agency caregivers and agency employees may not subcontract services to someone not directly employed by the agency provider. All agency caregivers and agency employees must be enrolled in CHAMPS and associated to the agency provider prior to providing Home Help services so that a criminal history check is completed.

Medicaid Provider Manual

(Refer to the Agency Provider Approval Process [Removal of Approved Agency Provider Status] Section of this chapter for more information.)

8.8 SERVICE VERIFICATION

Providers must submit service verification monthly to receive payment. The service verification must be submitted on or after the last day services were provided for the month. Failure to submit a service verification within 365 days of the service date will result in non-payment. Providers are responsible for refunding overpayments resulting from the submission of an inaccurate service verification. Service verification may be reported through the following methods:

8.8.A. HOME HELP AGENCY INVOICE (MSA-1904)

The agency provider must use the Home Help Agency Invoice (MSA-1904) to verify authorized services were provided. The MSA-1904 must include an accurate record of the Home Help services provided on each day of the billing period. The record must include only the services authorized for the client. A separate MSA-1904 must be submitted for each client served in a billing period. (Refer to the Forms Appendix for a copy of the MSA-1904.)

Payment is not released until the MSA-1904 has been received and verified by the client's local MDHHS office. (Refer to the Directory Appendix for contact information.) The MSA-1904 can be delivered in person or by fax, U.S. mail, or email.

8.8.B. INDIVIDUAL CAREGIVER SERVICE VERIFICATION

8.8.B.1. ELECTRONIC SERVICE VERIFICATION (ESV)

An individual caregiver with CHAMPS access must verify authorized services provided by submitting an electronic service verification (ESV) through CHAMPS. The individual caregiver must:

- Submit the ESV monthly. A separate ESV must be submitted for each client served during the month.
- Accurately report the services provided on each day of the month.

In addition to submitting the ESV monthly, the individual caregiver must report any change in services to the client's ASW within 10 business days.

An individual caregiver will ONLY be paid for:

- The tasks they provide and check on the ESV.
- Travel time they spend on laundry and/or shopping and check on the ESV.

Medicaid Provider Manual

An ESV can be modified as follows:

Adding Provided Tasks to the ESV	<p>An individual caregiver who forgets to check a task(s) they provided or travel time they incurred before submitting the ESV may still be eligible for payment for these services. The individual caregiver must reopen the ESV, check the missed task(s) and/or travel time, then resubmit the ESV. MDHHS will issue a separate payment for the eligible tasks and/or travel time the individual caregiver added to the ESV.</p> <p>To be eligible for payment, tasks must be added and the ESV resubmitted within 365 days of the last date of service on the ESV. NOTE: If an individual caregiver receives a retroactive authorization for services and needs additional time to resubmit the ESV, they must contact the client's ASW.</p>
Removing Tasks from the ESV that were Checked but not Provided	<p>The ESV must include only the tasks an individual caregiver provided and can be corrected to remove tasks that were checked in error.</p> <p>An individual caregiver can only remove tasks from the ESV during the current month and before submitting the ESV. For previous months, the individual caregiver must provide the client's ASW with a list of tasks and/or travel time on the ESV that need to be removed. The ASW will use the information to recoup payment for services the individual caregiver did not provide.</p>

8.8.B.2. PAPER SERVICE VERIFICATION (PSV)

An individual caregiver may be eligible to use a paper service verification (PSV) if the following criteria are met:

- There is no computer or internet access in the client and individual caregiver residence(s).
- Internet access is unavailable within 15 minutes of the client and individual caregiver residence(s). The individual caregiver must have a valid reason for being unable to travel to internet access, such as a lack of transportation or an inability to leave the client alone.

In addition to submitting the PSV monthly, the individual caregiver must report any change in services to the client's ASW within 10 business days.

An individual caregiver approved to submit PSVs must request PSV forms from the client's ASW or MDHHS Provider Support for atypical providers. PSV forms will be mailed to the individual caregiver's correspondence address in CHAMPS.

Each PSV form includes a barcode that corresponds to a service month and year. A PSV submitted for services in the wrong month and year will be rejected. The individual caregiver must contact the client's ASW or MDHHS Provider Support for atypical providers to request a new PSV. Payment will not be issued until the correct PSV is submitted.

Completed PSVs can be submitted by mail or fax. (Refer to the Directory Appendix for contact information.)

NOTE: PSVs usually take longer than ESVs to receive and process, which may lead to delayed payments.

Medicaid Provider Manual

8.8.C. ELECTRONIC VISIT VERIFICATION

The 21st Century Cures Act (the Cures Act), enacted by the U.S. Congress in December 2016, added Section 1903(l) to the Social Security Act to require all states to use electronic visit verification (EVV) for personal care services (PCS) and home health care services (HHCS) provided under a Medicaid State Plan of the Social Security Act or under a waiver of the State Plan. PCS provided through Home Help must meet EVV requirements. Refer to the Electronic Visit Verification chapter of this Manual for more information.

8.9 PROVIDER PAYMENTS

Providers must accept the authorized Home Help payment as payment in full. Clients must not be required or solicited to supplement Home Help payments for the same services authorized by MDHHS.

8.9.A. PAYMENT AUTHORIZATION

The client's ASW issues a provider Time and Task that includes a list of tasks the provider is authorized to perform. Payment is authorized based on the provider Time and Task. A provider must not receive payment for time spent on a task beyond what is authorized. With prior approval from the client's ASW, the provider's payment authorization may exceed the provider's Time and Task but may not exceed the client's Time and Task. Any changes to the provider's Time and Task must be approved by the client's ASW.

8.9.B. PAYMENT FOR TRAVEL TIME

Providers authorized to assist with shopping or laundry may be eligible for payment for travel time up to:

- Two round trips each week for shopping.
- Two round trips each week for laundry.

Travel time is recorded as a separate item on the provider Time and Task and is in addition to the time authorized for shopping or laundry. Travel time is authorized only when the task is completed away from the client's or caregiver's residence. Payment for travel time cannot exceed the number of authorized trips on the provider Time and Task. The payment does not include the cost of mileage.

The amount allocated for travel time is based on normal, routine travel for the task being performed. Travel time must be incurred in the local area where the client's residence is located.

Travel time will be determined by the ASW at the client's initial comprehensive assessment and will be re-evaluated at each six-month review or when a change is reported. The amount of time approved by the ASW will be based on information obtained from the client and provider. Any change in the amount of travel time required must be reported to the client's ASW within 10 business days.

8.9.C. PAYMENT RATES

Payment rates are published in ASM 138 Individual Caregiver and Agency County Rates, which can be accessed on the Home Help webpage. (Refer to the Directory Appendix for webpage information.)

8.9.C.1. IMPACT OF APPROVAL STATUS ON AGENCY PROVIDER PAYMENT RATE

An agency must be designated an approved Home Help agency provider by MDHHS to be eligible for the agency provider rate. An unapproved agency provider is eligible to provide services at the individual caregiver rate. (Refer to the Agency Provider Approval Process [Removal of Approved Agency Provider Status] Section of this chapter for more information.)

8.9.D. PAYMENT FOR SERVICES PROVIDED ON THE CLIENT'S HOSPITAL ADMISSION DATE

A provider may be paid for Home Help services provided on the client's date of hospital admission if the client had active Medicaid on the date the services were provided and the provider:

- Provided the services on or after February 1, 2023.
- Provided the services before the time the client was admitted to the hospital.
- Provided the services in the client's home or workplace.

NOTE: Laundry and shopping authorized to be done outside the client's home may be eligible for payment if completed before the time the client was admitted to the hospital.

- Logs the services provided on the service verification.
- Submits a completed, signed and dated BPHASA-2207 Home Help Billing for Hospital Admission Date form to the client's ASW or local MDHHS office as soon as possible after learning the client was admitted to a hospital but no later than 365 days from the date of service.

Refer to the Forms Appendix for a copy of the BPHASA-2207. It can also be downloaded from the Home Help webpage. Refer to the Directory Appendix for webpage information.

If the BPHASA-2207 is approved, payment will be based on the total amount of authorized time for the tasks documented on the provider's service verification. It will not be based on the time in and time out documented on the BPHASA-2207.

8.9.D.1. SUBMITTING THE BPHASA-2207 WITH THE SERVICE VERIFICATION

The provider may send the BPHASA-2207 to the client's ASW or local MDHHS office when they submit the service verification. The provider may submit the BPHASA-2207 any time after the client's hospital admission date but no later than 365 days later. The

Medicaid Provider Manual

BPHASA-2207 may be submitted in person or by fax, U.S. mail, or email. (Refer to the Directory Appendix for contact information.)

- Agency providers may send the BPHASA-2207 with the MSA-1904.
- Individual caregivers who use the ESV will need to send the BPHASA-2207 to the client's ASW or local MDHHS office after they submit the ESV.
- Individual caregivers who use the PSV must send the BPHASA-2207 separately from the PSV. The fax number and mailing address on the PSV will not route the BPHASA-2207 to the client's local MDHHS office.

NOTE: Hospitalization data is not always available when the client's ASW processes payment. If MDHHS finds that the time span on the BPHASA-2207 overlaps with the time the hospital reports the client was admitted to the hospital, MDHHS may recoup the portion of the Home Help payment for this day of service.

8.9.D.2. SUBMITTING THE BPHASA-2207 AFTER THE SERVICE VERIFICATION

MDHHS will recoup payment for services provided on the client's hospital admission date if the service verification is not supported by a BPHASA-2207. A provider that does not submit the BPHASA-2207 with their service verification should send the BPHASA-2207 to the client's ASW or local MDHHS office as soon as possible. If a provider does not submit the BPHASA-2207 in time to avoid recoupment, they may use the form to request repayment of recouped funds.

8.9.E. INDIVIDUAL CAREGIVER PAYMENTS

8.9.E.1. WARRANTS PAYMENT SYSTEM

Home Help payments are issued as dual-party warrants to the client and individual caregiver and mailed to the client's address. Home Help warrants must only be endorsed by the person(s) listed on the warrant. If the individual caregiver named on the warrant does not provide services or provides services for only a portion of the authorized period, the warrant must be returned.

There are circumstances when a single-party warrant may be issued to the individual caregiver only. For example, a client may be physically or cognitively unable to endorse the warrant. Single-party warrants must be authorized by the client's ASW.

NOTE: All agency provider payments are issued as single-party warrants.

8.9.E.2. GARNISHMENT

Garnishment is a court process that allows a creditor to collect an individual caregiver's debt from the State of Michigan. Single-party warrants are considered earnings to the individual caregiver and are subject to garnishment. Dual-party warrants are considered a benefit to the client and are not subject to garnishment.

Medicaid Provider Manual

NOTE: Recoupment of overpayments for Home Help services is a different process from garnishment. MDHHS recoups overpayments from both single- and dual-party warrants.

8.9.E.3. IRS FORM W-2 WAGE AND TAX STATEMENT (W-2)

On behalf of the client, MDHHS issues a W-2 for the individual caregiver. The W-2 is based on wages paid in a calendar year. If inaccurate earnings have been reported, an individual caregiver can report this fact to the ASW or call MDHHS Provider Support for atypical providers. (Refer to the Directory Appendix, Provider Assistance, for more information.)

8.9.E.4. FICA TAX WITHHOLDING

As the client's filing agent, the State of Michigan withholds FICA taxes from the wages paid on the client's behalf to the individual caregiver(s). MDHHS pays the amount of FICA tax the client is responsible for and withholds the individual caregiver's portion from the Home Help payment. At the end of the calendar year, the State of Michigan issues a FICA tax rebate warrant to any individual caregiver who earns less than the gross income limit set by the federal government.

FICA tax is not withheld from payments, and the State of Michigan does not pay the FICA tax employer portion, when the individual caregiver is:

- The client's parent (including a step, adoptive, or foster parent).
- A child between the ages of 18 and 20 providing Home Help services to a parent.

NOTE: The State of Michigan can withhold FICA tax from payments to a parent serving as their child's individual caregiver. An individual caregiver interested in this option should speak with the client's ASW.

A client who is a Medicaid deductible beneficiary is responsible for the FICA taxes on any Home Help provider payments they make to meet their deductible. The State of Michigan does not withhold and pay the employer portion of FICA taxes on these payments. (Refer to the Eligibility [Medicaid Eligibility] Section in this chapter for more information.)

8.10 AGENCY PROVIDER AUDITS

The MDHHS Home Help Policy Section conducts desk audits of a sample of agency providers each year to monitor compliance with program requirements. The MDHHS Home Help Policy Section initiates the audit by emailing a letter to the agency provider outlining the required information. The agency provider must submit documents within 30 calendar days of the date of the letter and is encouraged to scan and email documents to the MDHHS Home Help Policy Section with the subject line of "Home Help Audit". Fax and mail are acceptable; however, confirmation that documents have been received is not available with these options. (Refer to the Directory Appendix for contact information.)

Failure to provide required information by the due date may result in a rate reduction. Failure to provide required information within 60 calendar days results in the agency provider losing its approved status for a minimum of 30 calendar days or until compliance, whichever is longer.

Medicaid Provider Manual

Other authorized areas within MDHHS may also request documents or other records needed for the Home Help program. Agency providers must follow the timelines specified in those requests.

8.11 PROVIDER DISENROLLMENT

8.11.A. VOLUNTARY DISENROLLMENT

A provider may choose to withdraw from participation in the Home Help program. To disenroll, the provider must email the MDHHS Home Help Policy Section or the MDHHS Provider Enrollment Unit with notice of intent to disenroll and the date of disenrollment. (Refer to the Directory Appendix for contact information.)

8.11.B. INVOLUNTARY DISENROLLMENT

When MDHHS disenrolls a provider, authorizations for Home Help payments are terminated. Notice is sent to the provider and the local MDHHS office within 10 calendar days of the determination of disenrollment. MDHHS may disenroll a provider who:

- Has been found guilty of Medicaid fraud or client abuse, exploitation, or neglect. **NOTE:** An agency provider may be disenrolled if an agency caregiver or agency employee meets this criterion.
- Falsifies information in the application documents, provider agreement, quarterly reporting, service verification, or billing.
- Has been convicted of a crime(s) that excludes the provider from Medicaid participation. (Refer to the Denial of Enrollment, Termination and Suspension [Termination or Denial of Enrollment] Section in the General Information for Providers chapter of this manual for more information.) **NOTE:** An agency provider may be disenrolled if an agency owner, agency representative/resident agent, or member of the Board of Directors meets this criterion.
- Fails to report changes or update CHAMPS enrollment within 10 calendar days of the change.
- Fails to comply with policies governing the Home Help program.

A provider may be suspended if they are being investigated for fraud, abuse, exploitation, or neglect, pending the outcome of the investigation.

SECTION 9 – APPEALS

Any questions regarding the following appeal processes should be directed to the Michigan Office of Administrative Hearings and Rules (MOAHR). (Refer to the Directory Appendix, Appeals, for contact information.)

9.1 CLIENT APPEALS

A client or their authorized hearing representative may appeal an eligibility determination, service approval or negative action by requesting an administrative hearing. A provider cannot request an administrative hearing on behalf of a client. (Refer to ASM 150 for more information. A link to the ASM Table of Contents is available in the Directory Appendix.)

9.2 PROVIDER APPEALS

All providers may appeal the following negative actions by requesting an administrative hearing:

- Enrollment suspension.
- Disenrollment.
- Payment recoupment.

Agency providers may also appeal the following negative actions by requesting an administrative hearing:

- Denial of a new agency application.
- Removal of approved agency provider status.
- Reduction in the payment rate.

Refer to the Provider Appeal Process Section in the General Information for Providers chapter of this manual for more information.

9.2.A. CURRENT PROVIDERS

MDHHS will inform a provider of a negative action through a negative action notice. The provider may appeal to MOAHR within 30 calendar days of the date on the notice. The provider may continue to provide services during the appeal period if it accepts responsibility for the repayment of funds should the MDHHS decision be upheld. The provider may not accept new clients during the appeal period. During this time, the client continues to have the right to terminate the provider at any time and without cause.

NOTE: The process described above may not reflect actions taken on behalf of MDHHS by the MDHHS Office of Inspector General (OIG). A provider suspended from the Home Help program by OIG cannot operate during the suspension and has 15 calendar days to appeal the OIG decision.

Medicaid Provider Manual

9.2.B. PROVIDER APPLICANTS

MDHHS will send a notice to the provider applicant that summarizes ineligibility factors identified through screening or evaluation. The provider applicant may appeal to MOAHR within 30 calendar days of the date of the notice. Provider applicants denied enrollment are not eligible to receive MDHHS payments for Home Help services during the appeal period.

Medicaid Provider Manual

SECTION 1 - INTRODUCTION

This chapter applies to Hospice providers.

Hospice is a health care program designed to meet the needs of terminally ill individuals when the individual decides that the physical and emotional toll of curative treatment is no longer in their best interest. These individuals choose palliative care, which is not a cure, but ensures comfort, dignity and quality of life. Hospice is intended to address the full range of needs of the individual with a terminal illness, while also considering family needs. Care must be consistent with the individual's values, regardless of the location where care is provided.

The primary objective of the Medicaid Hospice Program is to ensure that essential medical/health services are available to those who would not otherwise have the financial resources to purchase them. Medicaid policies are designed to achieve this objective with fiscal responsibility. Hospice providers must verify eligibility before providing services. Hospice beneficiaries are identified in the eligibility response with the Benefit Plan ID of Hospice. (Refer to the Beneficiary Eligibility chapter for additional information.)

SECTION 2 - PROVIDER REQUIREMENTS

Hospice providers are bound to all rules, regulations, and policies specified in this chapter for program participation/enrollment of Medicaid beneficiaries. Hospice providers must also comply with the Medicare Conditions of Participation (42 CFR § 418) which generally apply to non-Medicare beneficiaries as well as to Medicare beneficiaries.

Additional information regarding federal Hospice requirements and guidelines is contained in the Centers for Medicare & Medicaid Services (CMS) State Operations Manual 2083.

The exceptions are 42 CFR § 418.60 and 42 CFR § 418.98(c) conditions that apply only to Medicare beneficiaries.

Michigan Department of Health and Human Services (MDHHS) requires Hospice agencies to be licensed in Michigan by the state-licensing agency, certified by Medicare, and enrolled in Medicaid. (Refer to the General Information for Providers Chapter of this manual for additional information.)

Hospice providers cannot engage in any of the following marketing-related practices:

- Provide cash, gift incentives, or rebates to prospective covered persons;
- Claim superior medical care or provider skills; or
- Make untruthful statements regarding the merits of the hospice.

The use of marketing practices that mislead, confuse, or defraud either the beneficiary or MDHHS is considered grounds for terminating the hospice from participation in Medicaid. Such actions may also result in investigation leading to possible prosecution under applicable State and Federal statutes.

SECTION 3 - BENEFICIARY ADMISSION

3.1 BENEFICIARY ADMISSION DETERMINATION

A terminally ill Medicaid beneficiary who lives in a hospice service area and whose life expectancy is six months or less (if the illness runs its normal course), as determined by a licensed physician and the Hospice Medical Director, has the option for admission into a hospice program. A representative, such as a spouse, parent, legal guardian, or other authorized adult, may act on behalf of the beneficiary.

Medicaid does not cover Hospice services if the following conditions exist:

- The individual is not eligible for the Medicaid benefit.
- The beneficiary does not meet the hospice's admission criteria.
- If the beneficiary is currently enrolled in a Medicaid Health Plan (MHP), the hospice services must be arranged and reimbursed by the MHP.

All Hospice admission activities must be conducted according to MDHHS policies and in such a manner as to maximize the beneficiary's ability to make a choice between admission into hospice or maintaining current active treatment with Medicaid coverage. Such activities must assure that the beneficiary fully understands how to use hospice services and that all care must be received from or through the hospice (except those services not related to the terminal illness or services provided by their attending physician).

It is imperative that the Hospice provider review the Conditions of Admission with the beneficiary and answer any questions raised by the beneficiary and/or authorized representative.

3.2 BENEFICIARY ADMISSION PROCESS

Hospice providers are responsible for admitting beneficiaries for hospice services in the Admission Information Section in CHAMPS. The admission process must be electronically completed in CHAMPS. A downloaded copy of the beneficiary's admission must be signed by the beneficiary and/or authorized representative, with a copy given to the beneficiary and/or authorized representative and the original copy retained in the beneficiary's record. Completion of the hospice beneficiary's admission in CHAMPS will result in real-time changes to the National Provider Identification (NPI) and the beneficiary's Program Enrollment Type (PET).

Hospice providers have the ability to track their current beneficiaries in CHAMPS via the Member Enrollment/Admission List screen. This roster screen will allow the provider to view beneficiary admission information and Medicaid status. Hospice providers must complete the hospice admission in a timely manner in CHAMPS in order to maintain an accurate roster, and to ensure the beneficiary has the correct PET and benefit plan assigned for correct payment.

A copy of the following information must be retained in the beneficiary's record:

- The original, signed copy of the Admission Certification.
- Hospice identification card (if the hospice chooses to issue one to their beneficiaries).

3.3 BENEFICIARY NOTIFICATION

Hospice providers must provide Medicaid beneficiaries with the following materials and written information within ten days of the effective date of admission into hospice:

- Conditions of admission, including:
 - Scope, content, and duration of coverage;
 - Beneficiary grievance procedure; and
 - Beneficiary responsibility for reporting coverage by any other insurance.
- Procedures for obtaining health care, including:
 - Address, telephone number, and service hours of the health care providers;
 - Emergency medical care (other than for the treatment of the terminal illness); and
 - Health care provision outside of the hospice.

3.4 PLACE OF SERVICE

3.4.A. BENEFICIARY'S HOME

A beneficiary eligible for hospice may receive hospice services in their home. If the beneficiary is eligible for hospice services but does not have family or friends to provide the necessary home care, the beneficiary may live in a residential setting that may include an Adult Foster Care (AFC) facility, boarding home, Home for the Aged (HFA), or assisted living facility. The setting must be appropriate for the type of care required by the beneficiary. Medicaid does not pay room and board in these settings.

Beneficiaries may receive hospice services in these settings. The hospice is responsible for developing and implementing a coordinated plan of care to avoid duplication of services. These care settings are available for Medicare, Medicaid, and dually eligible beneficiaries.

3.4.B. NURSING FACILITY

When a dually enrolled Medicare/Medicaid beneficiary enters a nursing facility (NF), the beneficiary can elect the Medicare hospice benefit if that NF has hospice services available. In this case, the beneficiary revokes the 100 days of Medicare reimbursement for skilled NF care.

Revocation of the 100-day NF skilled care is a beneficiary's decision and should not be influenced by the NF's funding source for the bed.

The CHAMPS application process is used to complete the beneficiary's election for hospice and create the correct PET (e.g., HOS-NFAC) for Medicaid eligible beneficiaries. This does not mean that the beneficiary has revoked the Medicare benefit for services not related to their terminal illness. The beneficiary remains eligible for Medicare, but has elected to use only the hospice portion of the Medicare benefit.

Medicaid Provider Manual

If the NF contracts to make hospice services available, the hospice must complete the admission in CHAMPS for all Medicaid, Medicare and dually eligible beneficiaries. The facility must provide room and board for the beneficiary, and the hospice must provide its normal services.

The Pre-Admission Screening/Annual Resident Review (PASARR) form (DCH-3877) must be completed for a hospice patient entering a NF unless the hospice beneficiary is entering for a five-day respite period. The DCH-3877 is not required for the respite period. The DCH-3877 is to identify individuals who may have a mental illness, intellectual/developmental disability or a related condition. If the patient is on antipsychotic or antidepressant medications for purposes of pain control/symptom relief for end of life, it should be noted on the DCH-3877. This allows the Community Mental Health Services Program (CMHSP) worker to better evaluate the need for further (Level II) screening. If the patient is on any of the above mentioned psychotropic medications for a related mental illness, the CMHSP will determine the need for a Level II screening.

Medicaid will reimburse the hospice for room and board for a hospice beneficiary who resides in a NF (including a beneficiary for whom a complex care authorization has been approved) or in a Ventilator Dependent Care Unit (VDCU). The hospice then reimburses the NF. The Medicaid reimbursement to the hospice for NF room and board is equal to 95% of the total Medicaid NF rate. For Class I, III, and V facilities, reimbursement also includes 100% of the Quality Assurance Supplement (QAS) amount due the NF through the Quality Assurance Assessment Program (QAAP). QAS funds are not included in the reimbursement for Hospital Swing Beds as they are not eligible for that program.

Per Medicare guidelines, the term "room and board" in a NF includes the performance of personal care services that a family caregiver would provide if the individual were at home. This includes assistance in the activities of daily living such as bathing, grooming, toileting, dressing, meal service, socializing, companionship, hobbies, administration of medication, maintaining the cleanliness of the beneficiary's bed and room, and supervising/assisting in the use of durable medical equipment (DME) and prescribed therapies (e.g., range of motion, speech and language exercises). The NF may not include hospice staff to meet its staffing requirements.

Hospice covered beneficiaries residing in the NF must not experience any lack of NF services or personal care due to their status as a hospice beneficiary. NFs must offer the same drugs, services, medical supplies and DME to all residents who have elected the hospice benefit in the same manner that services are provided to other residents in the facility who have not elected hospice care. If a service is normally furnished as part of the facility's per diem, the service must also be provided to hospice beneficiaries. If services are provided for needs associated with a non-terminal illness and are normally furnished and billed by another provider, that practice would continue.

3.4.C. HOSPITAL INPATIENT CARE

Medicaid hospice reimbursement includes payment for any hospitalizations related to the terminal illness. The hospice must contract with, and reimburse, a hospital for medically necessary inpatient services related to the beneficiary's terminal illness. Medicaid does not reimburse the hospital separately unless the hospitalization is not related to the terminal illness.

3.5 DURATION OF COVERAGE

Based on hospice eligibility criteria, the duration of hospice services is generally six months or less. There is no minimum period of hospice admission. A change in the beneficiary's prognosis could eliminate the need for hospice care. A beneficiary may cancel their admission in the hospice at any time and without cause. Beneficiaries who become ineligible for Medicaid while admitted in a hospice also become ineligible for Medicaid reimbursement for hospice services.

SECTION 4 - BENEFICIARY DISCHARGE

A beneficiary may be discharged from hospice as noted below. The provider must complete the Discharge webpage in CHAMPS. The discharge must indicate the type of discharge, date of the discharge, reason, and details of the beneficiary's residence after discharge. A downloaded copy of the beneficiary's discharge (voluntary or involuntary) must be signed by the beneficiary and/or authorized representative as proof of notification (unless the beneficiary has expired). A copy must be given to the beneficiary and/or authorized representative after they sign it.

Terminations generated by the hospice are subject to the appeal procedures, as required by licensure requirements.

Completion of the hospice beneficiary's discharge in CHAMPS will result in real-time changes to the National Provider Identification (NPI) and the beneficiary's PET.

Hospice providers must complete the hospice discharge (voluntary or involuntary) in a timely manner in CHAMPS in order to maintain an accurate roster, and to ensure the beneficiary has the correct PET and benefit plan assigned for correct payment.

4.1 BENEFICIARY DIES

When a beneficiary dies while admitted in hospice, the hospice must complete the discharge in CHAMPS indicating the date the beneficiary expired.

4.2 BENEFICIARY ELECTS TO VOLUNTARY DISCHARGE/REVOKES THEIR HOSPICE BENEFIT

A beneficiary may elect voluntary discharge from, or revoke their election of, hospice care at any time during an election period. The hospice must obtain written documentation, signed and dated by the beneficiary or their authorized representative, stating they are revoking the hospice benefit for the remainder of that election period. The voluntary discharge or revocation is effective with the date of the beneficiary's/representative's signature. The hospice must complete the discharge in CHAMPS, give a copy of the discharge notice to the beneficiary or authorized representative after they sign it, and retain the original copy in the beneficiary's record.

4.3 HOSPICE REVOCATION OR DISCHARGE WHEN BENEFICIARY IS HOSPITALIZED

A beneficiary should **not** revoke or be discharged from hospice for the purpose of admission to the hospital for care related to the hospice diagnosis. Medicaid does not reimburse the hospital separately unless the hospitalization is **not** related to the terminal illness. When this is the case, the hospice may continue to provide care to the beneficiary under the routine hospice care benefit.

4.4 BENEFICIARY NO LONGER MEETS ADMISSION CRITERIA

A beneficiary may have a change in condition and no longer qualify for hospice services. If the beneficiary is discharged for this reason, the hospice must complete the discharge in CHAMPS, provide the date of the discharge, and indicate the reason in the Remarks section of the webpage for the

discharge. A copy of the discharge must be downloaded, printed, and provided to the beneficiary and/or their authorized representative.

4.5 BENEFICIARY BECOMES INELIGIBLE FOR MEDICAID

The hospice is responsible for verifying the beneficiary's continued Medicaid eligibility once they are enrolled. Medicaid does not reimburse hospice services rendered to a Medicaid ineligible beneficiary. Once the beneficiary is deemed no longer eligible for hospice services, the hospice must complete the discharge in CHAMPS and indicate in the Remarks section the reason why the beneficiary is no longer eligible for hospice services. A copy of the discharge must be downloaded, printed, and provided to the beneficiary and/or their authorized representative.

4.6 BENEFICIARY MOVES OUTSIDE THE HOSPICE SERVICE AREA

At the time of the hospice admission, beneficiaries must be told to notify the hospice and their local MDHHS worker if their place of residence changes. If the new residence is located in the hospice's normal service area, or if the hospice agrees to continue to provide services to the beneficiary, the move creates no changes except an address change. If the move is too far for the hospice to continue services for the beneficiary, the hospice must arrange a transfer of care for the beneficiary to another Medicaid enrolled hospice. The two hospices must work together to assure that no lapse occurs in services to the beneficiary.

The first hospice must complete the discharge webpage and indicate the planned date of admission for the second hospice in the Remarks section. It is then the responsibility of the second hospice to complete the admission application in CHAMPS. Each hospice must place an explanation in the Remarks section stating the reason for the transition.

4.7 HOSPICE ELECTS TO TERMINATE THE BENEFICIARY'S ADMISSION

The hospice may discharge a beneficiary if the beneficiary violates any of the conditions of membership in the hospice. The decision to discharge a beneficiary and the effective date of the discharge are determined on an individual basis by the hospice Medical Director.

The hospice may request discharge of a beneficiary for any of the following reasons:

- Fraud;
- Abuse (including repeated instances of willfully and knowingly obtaining health care services for the terminal illness from non-hospice providers); or
- Misconduct (including violence that interferes with or interrupts the provider's proper delivery of health care to the patient or other patients).

SECTION 5 - MEDICARE CONDITIONS OF PARTICIPATION

5.1 HOSPICE ELECTION PERIODS

The duration of hospice coverage is measured in election periods, also known as benefit periods. A beneficiary may elect to receive hospice care during one or more of the following election periods:

- An initial 90-day period;
- A subsequent 90-day period; or
- An unlimited number of subsequent 60-day periods.

5.2 CERTIFICATION OF THE TERMINAL ILLNESS

A hospice must obtain written certification of the terminal illness for each election period before a claim for services is submitted. If the hospice is unable to obtain a written certification within three days of initiation of hospice care, a verbal certification must be obtained, documented, and signed by the person receiving the certification. Statements covering a beneficiary's initial certification must be obtained from the hospice medical director or the physician member of the Interdisciplinary Group (IDG), and the beneficiary's attending physician if the beneficiary has an attending physician. The hospice medical director or the physician member of the IDG certifies the terminal illness for all subsequent election periods.

Each written certification must include:

- A statement that the beneficiary's life expectancy is six months or less if the terminal illness runs its normal course;
- Specific clinical findings and other documentation as needed to support the life expectancy of six months or less;
- A brief narrative summary;
- An explanation why the clinical findings of the face-to-face encounter support a life expectancy of six months or less (beginning with the third benefit period and thereafter); and
- Physician signature(s), date signed, and specific election period dates covered by the certification or recertification.

Documentation of all written/verbal certifications must be prepared no more than 15 calendar days prior to the effective date of election and must be kept in the beneficiary's medical record.

5.3 NARRATIVE SUMMARY

Each hospice certification and recertification must be accompanied by a brief narrative describing the clinical findings supporting the beneficiary's life expectancy of six months or less. Each narrative must reflect the clinical circumstances and should not contain checkboxes or non-specific, standard language.

5.4 FACE-TO-FACE ENCOUNTER

The physician or permitted non-physician practitioner (NPP) must have a face-to-face encounter with every hospice beneficiary prior to the 180th day of recertification of the beneficiary's terminal illness for the purpose of determining continued eligibility. The 180th day recertification is defined as the recertification that occurs at the start of the third benefit (election) period or the benefit period following the second 90-day benefit period. Additionally, a face-to-face must be conducted at each subsequent recertification (every 60 days thereafter) for as long as the beneficiary is in hospice. Face-to-face encounters must occur no more than 30 calendar days prior to the start of the third benefit period and no more than 30 calendar days prior to each subsequent benefit period thereafter.

Permitted NPPs include:

- A nurse practitioner or clinical nurse specialist (as defined in section 1861(aa)(5) of the Social Security Act) who is working in collaboration with the physician in accordance with State law.
- A physician assistant (as defined in section 1861(aa)(5) of the Social Security Act) under the supervision of the physician.

The physician or NPP must attest in writing to the face-to-face encounter with the beneficiary and include the date of the visit. An NPP is allowed to perform and attest to the face-to-face encounter; however, the initial certification for hospice must be completed by a physician.

Failure to meet the face-to-face encounter requirements results in a failure by the hospice to meet the recertification of the terminal illness requirement. This results in the beneficiary no longer being eligible for the hospice benefit. If this should occur, the hospice must complete the admission in CHAMPS, with the last date of the benefit period as the effective discharge date. A comment in the Remarks Section on the Discharge webpage is required to explain the reason for the discharge.

It is the responsibility of the first hospice to complete the discharge in CHAMPS before the second hospice can complete the admission in CHAMPS when:

- the beneficiary discharges from one provider for admission to a new provider;
- the beneficiary revokes the services of a provider; or
- the provider discharges the beneficiary.

The new hospice provider may begin their care within the beneficiary's first benefit period.

In the event a hospice provider is resuming care for a beneficiary formerly served by their hospice, the resuming hospice provider must have previously completed the discharge in CHAMPS at the time hospice services originally ended. To resume care, the hospice must complete a new admission in CHAMPS. The resumption of care starts in the next or subsequent benefit period.

SECTION 6 - HOSPICE SERVICES

6.1 CORE SERVICES

The hospice must provide all or substantially all of the core services applicable for the terminal illness in the beneficiary's home. (Home may include the beneficiary's private dwelling, apartment, boarding home, assisted living facility, AFC facility, HFA, NF or hospice-owned NF.)

These core services are:

- Physician care
- Nursing care
- Social work
- Counseling
 - Bereavement
 - Spiritual
 - Dietary

6.2 OTHER HOSPICE COVERED SERVICES

Other services that may be necessary due to the terminal illness and must be available but are not considered core services are:

- Drugs*/Biologicals
- Home Health Aide services
- Homemaker services
- Medical Supplies/Durable Medical Equipment (DME)
- Occupational Therapy
- Physical Therapy
- Short-Term Inpatient care
- Speech Therapy

***Although the drug AZT (Retrovir) is related to the terminal illness of AIDS, MDHHS reimburses the pharmacy separately for a hospice beneficiary receiving AZT.**

These other services may be provided by contractual agreement or provided by the hospice directly and are not reimbursed separately.

6.3 SUSPECTED ABUSE/NEGLECT

If there is reasonable cause to suspect that a beneficiary may be in danger of abuse, neglect, exploitation, cruelty, or other hazards, the hospice must report the suspected abuse to the Adult or Child Protective Services Unit of the local MDHHS office. (Refer to the General Information for Providers Chapter of this manual for additional information.)

6.4 TRANSPORTATION

6.4.A. HOME SETTING

Non-emergency transportation related to the terminal illness is the responsibility of the hospice agency.

Routine, non-emergency transportation to obtain Medicaid covered services not related to the terminal illness is available through the local MDHHS office for beneficiaries who do not reside in a nursing facility (NF). The beneficiary/responsible party should contact the MDHHS worker to determine the appropriate mode of non-emergency transportation and make the necessary arrangements. The transportation provider, not the hospice, bills the local MDHHS office for the transportation provided.

Non-emergency transportation by ambulance not related to the terminal illness requires a physician's signed order to allow the ambulance provider to bill Medicaid directly.

Emergency transportation related to the terminal illness is the responsibility of the hospice agency.

Emergency ambulance transportation not related to the terminal illness may be billed directly to Medicaid by the ambulance provider.

6.4.B. NURSING FACILITY SETTING

Non-emergency transportation related to the terminal illness is the responsibility of the hospice agency.

Routine, non-emergency transportation not related to the terminal illness must be provided by the NF as part of their per diem.

Non-emergency ambulance transportation not related to the terminal illness requires a signed physician's order and may be billed directly to Medicaid by the ambulance provider. If the NF does not have a physician's order, neither the NF nor the ambulance provider can bill Medicaid, the beneficiary, the beneficiary's family, or use the offset to the patient pay amount. Arrangement for payment is between the NF and the ambulance provider.

Emergency transportation related to the terminal illness is the responsibility of the hospice agency.

Emergency ambulance transportation not related to the terminal illness may be billed directly to Medicaid by the ambulance provider.

Medicaid Provider Manual

6.5 HOSPICE SERVICE LOG

The hospice must complete a detailed monthly service log that indicates the services provided to the beneficiary and whether an employee or a volunteer provided them. Each service (e.g., nursing, social work, hospice aide) must be logged by the date on which it took place.

The log must be retained as part of the beneficiary's medical record. However, if the hospice maintains this information electronically in a secure, yet readily understood format, it is not necessary to maintain a paper copy of the log.

6.6 CATEGORIES OF CARE

There are four categories of hospice care:

Routine Home Care	Routine Home Care is defined as hospice home care that is not continuous.
Continuous Home Care	Continuous Home Care is defined as short-term in-home care that is reflective of at least half of the hours predominantly being nursing care provided by either a registered nurse or licensed practical nurse in a crisis situation. Home health aide or homemaker services may be provided in addition to nursing care. A minimum of eight hours of care per day must be provided to qualify as continuous home hospice care. Payment is made for the hours of continuous care provided, up to 24 hours in one day.
Inpatient Respite Care	Inpatient Respite Care is defined as short-term inpatient care to relieve the primary caregiver(s) providing at-home hospice care for the beneficiary. Hospice care may be provided in a licensed hospice residence, hospital, or NF meeting hospice standards for staffing and patient areas. The length of stay may not exceed five consecutive days.
General Inpatient Care	General inpatient care is covered when the beneficiary's condition is such that their symptoms cannot be adequately treated under the routine hospice care benefit. It is defined as short-term inpatient care provided in a licensed hospice residence, hospital, or NF meeting hospice standards for staffing and patient areas. This brief episode of care is usually for pain control, or acute or chronic symptom management, that cannot be reasonably treated in another setting. General inpatient care is not to be used solely if a beneficiary requires care in a facility setting. Michigan Medicaid provides payment for room and board in a nursing facility if the beneficiary's hospice care would be more appropriately provided in this setting under the routine hospice benefit.

Guidelines for core and other services (as detailed above) apply to all categories of care.

6.7 PLAN OF CARE

After admission in the hospice, a person-centered plan of care (POC) must be developed before the beneficiary can receive services. It is also the responsibility of the hospice provider to determine if the beneficiary is receiving services from another program such as Home Help, MI Choice Waiver, or Private Duty Nursing (PDN). If another program is identified, the hospice provider must contact the other program(s) and develop a joint POC to coordinate services. The beneficiary and/or authorized representative or primary caregiver and the Interdisciplinary Group (IDG), as defined by federal

Medicaid Provider Manual

regulations, must also participate in the development of the plan. The beneficiary's attending physician or NPP should be encouraged to attend as well. The hospice is responsible for implementing the POC for hospice services.

6.7.A. ADULT FOSTER CARE FACILITY/HOME FOR THE AGED

The Adult Foster Care Facility/Home for the Aged (AFC/HFA) is responsible for care related to the non-terminal needs of the beneficiary who resides in their facility. There is to be no duplication of services by either staff.

6.7.B. ASSISTED LIVING FACILITY

The hospice is responsible for implementation of the POC for hospice services provided in this setting.

6.7.C. NURSING FACILITIES

The NF and hospice are responsible for performing their respective functions, which have been agreed upon and included in the jointly developed POC. The joint POC must include directives for managing pain and other uncomfortable symptoms, and be revised and updated as necessary to reflect the beneficiary's current status. The hospice retains overall professional management and responsibility for directing the implementation of the POC.

The joint POC should reflect the participation of the hospice, NF, and the beneficiary to the extent possible. The hospice and NF must communicate with each other when any changes to the POC are indicated, and each provider must be aware of the other's responsibilities in implementing the POC. There must be evidence of this coordination of care in the clinical records of both providers. All aspects of the joint POC must reflect the hospice philosophy. NF services must be consistent with the POC developed in coordination with the hospice.

6.7.D. ADULT HOME AND COMMUNITY BASED WAIVER BENEFICIARIES (MI CHOICE)

If the beneficiary is enrolled in the waiver program, the hospice must contact the beneficiary's waiver coordinator/agent. A joint POC must be retained in the beneficiary's record by both the hospice and the waiver coordinator. The hospice is the primary provider and manages the joint POC. The POC must clearly identify the services the beneficiary receives, which entity is responsible for providing the services, and the frequency of the services to be provided. Each waiver service included in the POC should be accompanied by documentation stating why the service is not covered under hospice. The waiver coordinator must understand the hospice philosophy so that the two agencies work for a common goal and eliminate duplicate services. Ongoing communication and coordination must occur regularly between the two providers during the time they are serving the same beneficiary. Written documentation of this ongoing communication and coordination must be kept in the beneficiary's record at each agency.

Beneficiaries may receive services from both types of providers concurrently as long as the services are not duplicative.

Medicaid Provider Manual

If the beneficiary is receiving hospice and becomes eligible to receive waiver services, the waiver agency contacts the hospice to establish the first date of service for the waiver services. It is the responsibility of the waiver agent to complete the beneficiary's MI Choice waiver enrollment in CHAMPS. However, if the beneficiary is receiving waiver services and becomes eligible for hospice, it is the responsibility of the hospice to complete the hospice admission in CHAMPS. The appropriate Program Enrollment Type (PET) identifies a beneficiary receiving hospice services and Adult Home and Community Based Waiver for the Elderly and Disabled (MI Choice Waiver) services concurrently (e.g., MIC-HSSP). The waiver agency and the hospice provider must discuss and coordinate services in order to prevent delays in access of care.

Hospice services must be used to the fullest extent before additional waiver services of the same type are provided. Post-payment review may be employed to monitor services. If inappropriate (e.g., duplicative) waiver services were provided, MDHHS will seek recovery of Medicaid funds paid for those services from the waiver coordinator.

MDHHS maintains a list of MI Choice waiver coordinators and contact information on the MDHHS website. (Refer to the Directory Appendix for website information.) Habilitation Supports waiver coordinators may be contacted through the local Prepaid Inpatient Health Plan (PIHP)/Community Mental Health Services Program (CMHSP) provider.

6.7.E. PRIVATE DUTY NURSING

If a beneficiary receiving private duty nursing (PDN) becomes eligible for hospice, the hospice is required to notify the MDHHS Program Review Division before a claim is submitted for the services. (Refer to the Directory Appendix for contact information.)

The hospice must provide the following information on agency letterhead to the Program Review Division:

- beneficiary name and Medicaid ID number;
- a request for a case review and approval of hospice services;
- a statement confirming that the beneficiary has been certified terminally ill with six months or less to live, signed by the hospice medical director and the beneficiary's attending physician; and
- name, e-mail address, and telephone number of the contact person.

Program Review Division staff may request additional medical record documentation for their review. If services are approved, the hospice must work with the PDN agency to develop a coordinated plan of care. Both the hospice and PDN staff must ensure that duplication of services does not occur. While hospice maintains the lead in coordinating the services, the PDN agency must continue to obtain prior authorization from MDHHS for the PDN services.

This does not apply to beneficiaries receiving PDN services under the Habilitation Supports Waiver (HSW) and over 21, or the MI Choice Waiver. For beneficiaries under the HSW, providers should contact the beneficiary's case manager to inform them of

Medicaid Provider Manual

hospice eligibility. If the beneficiary is under the MI Choice Waiver, providers should contact the MI Choice Waiver Supports Coordinator.

6.8 CONCURRENT HOSPICE AND CURATIVE CARE FOR CHILDREN

Children under 21 years of age may receive hospice care concurrently with curative treatment of the child's terminal illness. This allows the beneficiary or beneficiary's representative to elect the hospice benefit without forgoing any curative service to which the child is entitled under Medicaid for treatment of the terminal condition. The need for hospice care must be certified by a physician and the hospice medical director.

Under concurrent curative care policy, curative care is defined as medically necessary care that serves to eliminate the signs and symptoms of a disease with the goal of a cure or long-term disease-free state.

Medicaid will reimburse for the curative care separately from the hospice services. Medicaid will not reimburse for these types of treatments when they are used palliatively. Palliative care under hospice is defined as an active patient and family-centered interdisciplinary approach to pain and symptom management of the terminal illness. Palliative care is always a part of hospice and included in the hospice per diem reimbursement. The term "palliative care" cannot be separately billed or reimbursed by Medicaid.

A child receiving hospice will continue to receive appropriate early and periodic screening, diagnosis and treatment (EPSDT) services to the extent these services are medically necessary.

Pediatric Subspecialist	A pediatric subspecialist must direct the curative care related to the beneficiary's terminal diagnosis. For purposes of this policy, a pediatric subspecialist is a physician or permitted NPP who is board certified, or board eligible for subspecialty certification, in a pediatric subspecialty including, but not limited to, neurology, cardiology, pulmonology, endocrinology, or oncology. In most cases, a general pediatrician will not be considered a pediatric subspecialist relative to this policy, but a general pediatrician may assume the role of pediatric subspecialist and direct the child's curative care if they have acted as the primary care provider and treated the child's terminal condition prior to the election of hospice. NOTE: Beneficiaries with CSHCS-only coverage, meaning no Medicaid coverage and receiving hospice related to the CSHCS qualifying condition, must have a pediatric subspecialist for that condition manage the concurrent curative treatment of the terminal condition.
Coordination of Care	The hospice provider and pediatric subspecialist must work together to ensure a collaborative approach to the care of the beneficiary. The hospice Plan of Care (POC) must demonstrate coordination of care between the hospice and the pediatric subspecialist. It is the responsibility of each provider working collaboratively to determine whether a service is curative or palliative (hospice). The hospice record must contain a signed statement or attestation from the pediatric subspecialist explaining the course of treatment and acknowledging the physician is aware the beneficiary is receiving hospice services concurrently with curative treatment. The attestation must be dated and present in both the hospice and pediatric subspecialist records within 30 days after the beneficiary is admitted into hospice. The signature, printed name, and National Provider Identifier (NPI) number of the physician ordering and coordinating the concurrent curative treatment must be documented on the attestation. For a beneficiary enrolled in a Medicaid Health Plan (MHP), the hospice provider and pediatric subspecialist must also work with the MHP to ensure that the MHP authorization and documentation requirements are met.

Medicaid Provider Manual

Billing and Reimbursement	<p>Hospice services and curative treatment are billed and reimbursed separately under this policy. Prior to billing, it is important that providers differentiate between services that are palliative and therefore included in hospice reimbursement, and those that are curative and separately reimbursable under Medicaid. MDHHS recognizes the challenge this poses for providers, and each child's circumstances will need to be taken into consideration when making this distinction. The table below provides examples of treatment and related service categories but is not all-inclusive or intended to represent fixed parameters for decision making. Caution should be taken to avoid billing both the hospice and Medicaid for the same service as this represents double billing and may constitute fraud.</p>
----------------------------------	--

Examples of Treatment and Service Categories

Treatment	Hospice Service	Concurrent Curative Service	Both Hospice and Concurrent Curative Services	Comments
Pain/Symptom Management				
Narcotics, Analgesics	X			
Antiemetics	X			
Nutrition				
Tube Feeding			X	Hospice = Continuation of previous tube feedings. Concurrent = Tube placement; initiating feedings.
Intravenous (IV) Fluids		X		Concurrent = Surgical central line placement

6.9 SPECIAL PROGRAMS

6.9.A. HOME AND COMMUNITY BASED WAIVER BENEFICIARIES (CHILDREN'S WAIVER, HABILITATION SUPPORTS WAIVER)

If waiver services are not related to the terminal illness, the hospice should send the MDHHS waiver program coordinator an explanation of the situation when enrolling the beneficiary. The hospice agency should contact the waiver case manager or supports coordinator at the PIHP/CMHSP to coordinate care and to develop a combined POC.

6.9.B. CHILDREN'S SPECIAL HEALTH CARE SERVICES (TITLE V)

Refer to the Children's Special Health Care Services chapter, Hospice Benefit section, for policy information.

6.9.C. CHILDREN'S SPECIAL HEALTH CARE SERVICES/MEDICAID (TITLE V/XIX)

Hospice services for children covered under Children's Special Health Care Services (CSHCS) and determined Medicaid eligible (Title V/XIX) follow Medicaid policy outlined in this chapter.

6.9.D. MI HEALTH LINK

Beneficiaries enrolled in MI Health Link are dually eligible for both Medicare and Medicaid. While hospice is not a benefit offered by MI Health Link, beneficiaries in the program may still elect hospice and begin receiving hospice services at any time.

Effective November 1, 2016, individuals enrolled in the MI Health Link program who elect hospice services may remain enrolled in the MI Health Link program if they choose.

(Refer to the MI Health Link Chapter for additional details regarding hospice services under the MI Health Link program.)

6.10 HOME HELP/PERSONAL CARE

Home Help services may be available to the hospice beneficiary living at home (e.g., not residing in a hospice residence, NF, AFC, etc.). It is important that hospice services be utilized first, prior to Home Help services. Home Help services may be in addition to hospice care and must not duplicate hospice services. Home Help services include assistance with ADL, IADL, and complex care tasks. Some examples of when these services are appropriate are:

- The caregiver is too frail or otherwise unable to provide all of the needed personal care.
- There is no unpaid caregiver available and the beneficiary wishes to remain at home.
- The beneficiary is new to hospice but has been receiving personal care services through Home Help.

If hospice services duplicate or replace personal care services, payment is not approved for Home Help.

The hospice must contact the beneficiary's MDHHS adult services worker or ask for the assignment of an adult services worker if the beneficiary does not already have one. The adult services worker determines which personal care services may be provided in addition to hospice care. This determination may require the hospice to submit a POC for the worker's review.

SECTION 7 - BILLING & REIMBURSEMENT

7.1 MEDICARE/MEDICAID BENEFICIARIES

If a beneficiary is dually enrolled in Medicare and Medicaid, they must receive hospice coverage under the Medicare benefit. (Medicaid is the payer of last resort.) If the beneficiary resides in a NF, Medicare may pay hospice services, with NF room and board paid for by Medicaid. When a beneficiary is receiving services through the Medicare hospice benefit, Medicaid does not pay for curative or duplicative services.

The hospice provider must complete the admission in CHAMPS prior to submission of a Medicaid claim (i.e., coinsurance, deductibles, and room and board in the NF or hospice-owned NF). The hospice provider must also complete the beneficiary's discharge (voluntary or involuntary) or upon notification of the beneficiary's demise. (Refer to other applicable Sections for details regarding admission and discharge guidelines.)

If the hospice benefit is revoked under Medicare, the beneficiary cannot use the Medicaid hospice benefit as a replacement. Hospices should carefully explain this situation to the dually eligible beneficiary, especially during the fourth Medicare benefit period.* However, if the dually eligible beneficiary is no longer appropriate for hospice care and is discharged as a hospice beneficiary, that beneficiary is eligible for re-admittance with the hospice for the Medicaid benefit period if they become eligible for hospice again.

7.2 MEDICAID HEALTH PLAN ENROLLEES

Hospice services are included in the Medicaid Health Plan (MHP) covered services package for Medicaid enrollees. If the terminally ill enrollee requests and meets the criteria for hospice services, the MHP must cover the requested hospice services. If the terminally ill enrollee does not request hospice services, the MHP may provide its own array of services for the terminally ill. If the beneficiary is enrolled in a MHP (eligibility response indicates the Benefit Plan ID of CSHCS-MC, MA-HMP-MC, MA-MC or MME-MC), the hospice must contact the MHP immediately to receive prior authorization (PA) from the MHP before furnishing services. The MHP may require its enrollees to receive hospice services through a contracted hospice with which they have made arrangements. MHPs are responsible for the hospice care arrangement and payment if the eligibility response indicates a Benefit Plan ID of CSHCS-MC, MA-HMP-MC, MA-MC or MME-MC for the beneficiary.

If a fee-for-service (FFS) Medicaid beneficiary is automatically enrolled in a MHP while receiving hospice care, the beneficiary or their representative should contact the MDHHS Hospice Enrollment Coordinator if they wish to continue receiving services from their current hospice provider. (Refer to the Directory Appendix for contact information.) The Hospice Enrollment Coordinator initiates the process of disenrollment from the MHP. It is not the intent of MDHHS to disrupt a hospice beneficiary's care through automatic enrollment in a MHP. If the beneficiary is subsequently discharged from hospice care, the beneficiary may be offered the opportunity to join a MHP.

* The fourth Medicare benefit period is the subsequent extension period during the beneficiary's lifetime that occurs after the first two 90-day periods, and subsequent 60-day period, have been utilized.

Medicaid Provider Manual

If the MHP enrollee requires hospice services in a NF or hospice-owned NF, the MHP pays a negotiated rate for room and board in addition to the payment for the hospice services. The hospice must contact the MHP prior to admitting the beneficiary for hospice services to request authorization by the MHP.

7.3 REIMBURSEMENT

MDHHS employs the following standards when reimbursing for hospice care:

7.3.A. RATE METHODOLOGY

MDHHS uses the Medicaid hospice payment base rates established and provided by CMS and applies the appropriate local wage adjustors provided by CMS for the four categories of hospice care in each Core Based Statistical Area (CBSA). Effective for dates of service on or after January 1, 2016, a severity intensity add-on (SIA) rate will be reimbursed for a minimum of 15 minutes but not more than four hours daily during the last seven days of a beneficiary's life for in-person visits made by an RN and/or Social Worker when the beneficiary is receiving routine home care. (This payment is made in addition to the routine home care rate for the day.) However, the total of combined time rendered by an RN and Social Worker will not be reimbursed for more than four hours a day. Medicaid Fee for Service hospice providers who have not submitted required quality data to the Centers for Medicare & Medicaid Services (CMS) in compliance with the Hospice Quality Reporting Program (HQRP) will receive reduced reimbursement. Medicaid publishes and implements rate updates each fiscal year or when directed by CMS. (Refer to the MDHHS Hospice Reimbursement Rates on the MDHHS website.)

7.3.B. COINSURANCE

When a Medicaid beneficiary is receiving hospice services under Medicare, the hospice may bill Medicaid for the coinsurance, as well as room and board, if the beneficiary resides in a NF or hospice-owned NF. Coinsurance and/or room and board cannot be billed to a Medicaid beneficiary, their family, or their representative.

7.3.C. DATE OF DISCHARGE

Hospice services are reimbursable for day of discharge if services were rendered, regardless of the setting in which the services were provided. This includes the transfer of the beneficiary from one hospice provider to another as long as services were provided by both agencies. (This will be randomly verified by post payment audit and as indicated.) If the beneficiary has hospice as of 12:01 am, the hospice is responsible for the payment of services provided to the beneficiary until midnight. The hospice will continue, for payment purposes, as the primary provider for the full day of discharge.

Room and board for a hospice/nursing facility (NF) resident is reimbursable on the day of discharge if the discharge is due to resident death or the resident is discharged from hospice but remains in the NF. Room and board reimbursement for the day of discharge from the NF for any other reason is not covered.

7.3.D. PHYSICIAN OR NPP SERVICES

Reimbursement for administrative duties performed by the Medical Director is included in normal hospice rates. Direct patient care provided by the Medical Director, hospice-employed physician, NPP, or consulting physician may be billed by the hospice and is separately reimbursable based on the lesser of Medicaid's maximum allowable amount for the service or the charge. Claims must reflect the Healthcare Common Procedure Coding System (HCPCS) procedure codes for the physician's direct patient care.

7.3.E. PATIENT-PAY AMOUNT

If the Medicaid beneficiary residing in a NF has a patient-pay amount (PPA), the hospice must collect that amount each month and apply it toward the beneficiary's Medicaid covered services, and non-covered services as allowed by Medicaid. While the hospice is responsible for collecting the PPA, this duty may be delegated to the NF (via contract with the hospice) as long as the amount is applied to the room and board bill. The PPA must be exhausted each month (even if services do not span the entire month) before any Medicaid payment can be made. Whenever the hospice collects a PPA, a receipt must be given to the beneficiary (or family).

The provider must bill Medicaid for services rendered even if the PPA exceeds the Medicaid reimbursement rate resulting in a zero dollar payment. The Hospice Claim Completion Section of the Billing & Reimbursement for Institutional Providers Chapter contains examples of the application of the PPA.

CHAMPS handles the PPA in the following manner: When a beneficiary has a monthly PPA and a corresponding nursing facility and hospice PET (i.e., HOS-NFAC), the PPA will be deducted from the first claim received in CHAMPS, resulting in deduction of the higher PPA amount. If the PPA is greater than the amount of the first submitted claim, the difference will be applied to subsequent claims until the total PPA for that month is met. The PPA must be exhausted each month before any Medicaid payment will be made. The nursing facility and hospice must bill in sequence according to the location of the beneficiary at the first of the month. This will prevent the PPA from being deducted from the wrong claim.

Providers have the ability to verify the PPA on the Member Eligibility Detail page in CHAMPS.

7.3.F. PAYMENT FOR NONCOVERED SERVICES

For necessary medical or remedial care recognized under State law but not covered by Medicaid, the Medicare Catastrophic Coverage Act of 1988, Public Law 100-360, allows NF beneficiaries to access their patient-pay amount to pay for these services as allowed by Medicaid. If Medicare covers the beneficiary's need for medical services, then Medicaid continues to cover the Medicare deductible and coinsurance in the event it does not exceed the Medicaid fee screen.

7.3.G. MEDICAID DEDUCTIBLE

The hospice must verify eligibility before providing hospice services to the beneficiary in a home setting. (Refer to the Beneficiary Eligibility chapter for additional information.) If the eligibility response indicates a Benefit Plan ID of Spend-down, the hospice should ask the beneficiary or their responsible person for a copy of the MDHHS letter sent the first of each month which indicates the dollar amount the beneficiary must spend before becoming Medicaid-eligible for services. Medicaid may not be billed until the Medicaid deductible obligation is met and the eligibility response indicates a Benefit Plan ID of MA or MA-HMP.

7.3.H. ROOM AND BOARD TO NURSING FACILITIES

When Medicaid reimburses the hospice for room and board in a NF, the beneficiary must be placed in a bed certified by Medicaid (i.e., a Medicare/Medicaid certified bed or one certified Medicaid-only). If the beneficiary is not placed in a bed certified for Medicaid, MDHHS does not pay for any services. Except for State Veterans' Homes, MDHHS pays the hospice 95 percent of the individual or specific facility's Medicaid rate for room and board plus 100 percent of the nursing facility's Quality Assurance Supplement (QAS) rate. Hospice reimbursement to the NF for room and board must be outlined in the contract established between the hospice and the NF.

- **Holding a Bed (Hospital Leave and Therapeutic Leave).** For NF beneficiaries on hospice, Medicaid reimburses the hospice for holding a NF bed as indicated below.

Hospice reimbursement to the NF for bed holds must be outlined in the contract between the NF and the hospice.

Family members/responsible parties for the hospice/NF beneficiary must be informed of the bed hold and readmission policy of the NF. If the beneficiary refuses to have a family member/responsible party notified, this must be documented in the beneficiary's medical record.

- **Hospital Leave Days.** For Hospital Leave Days, Medicaid will pay to hold a beneficiary's bed only when the facility's total available bed occupancy is at 98 percent or more on the day the beneficiary leaves the facility. Facilities at 97.5 percent occupancy may round up to 98 percent. Medicaid reimburses during a beneficiary's temporary absence (up to 10 days) from the NF for admission to the hospital for emergency medical treatment as documented by the attending physician in the beneficiary's medical record. The facility must hold the bed, and the hospice may bill Medicaid, if the attending physician documents a reasonable expectation at the point of admission to the hospital that the beneficiary will return to the NF by the end of the 10th day.

The beneficiary must return to the NF within 10 days for the hospice to bill for hospital leave days. If the beneficiary is in the hospital for more than 10 days, the NF is released from its obligation to hold the bed and the hospice cannot bill Medicaid for any leave days. Reimbursement to the hospice is at 100 percent of the class wide NF hospital leave day rate. This rate, determined annually by MDHHS, is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

Medicaid Provider Manual

If the beneficiary is expected to be in the hospital for 10 days or fewer, and dies while in the hospital, the hospice may bill Medicaid for the hospital leave days up to the day before the beneficiary died.

If the beneficiary returns to the NF under Medicare coverage and still elects hospice care, the hospice may bill Medicaid for the hospital leave days if the emergency hospitalization was for no more than 10 consecutive days.

Patient-pay amounts and billing methods are not affected by this hospital leave day policy. The hospice/NF should continue to collect any patient-pay amount, typically on the first day of the month, and indicate the amount collected on the Medicaid claim. CHAMPS automatically deducts the patient-pay amount and reimburses the provider for the balance. If the hospice bills Medicaid for hospital leave days that occur at the beginning of the month, then the hospice should collect the patient-pay amount as usual. The hospice should charge the amount against the patient-pay that Medicaid pays for that day. For example, if a beneficiary has a patient-pay of \$200 and is in the hospital for an emergency condition for the first five days of the month (the stay totals no more than 10 consecutive days), the hospice should collect the patient-pay amount from the beneficiary and then submit a Medicaid claim. Medicaid reimburses the hospice for the hospital leave day per diem rate, minus the patient-pay amount.

There is no annual limit to the number of hospital leave days per beneficiary that may be billed to Medicaid as long as there are no more than 10 consecutive leave days per hospital stay.

- **Therapeutic Leave Days.** If the beneficiary has a temporary absence from the NF for therapeutic reasons approved by the attending physician or NPP, the hospice may be reimbursed by Medicaid to hold the bed open for up to a total of 18 days during a 365-day period. Therapeutic leave is for nonmedical reasons such as overnight stays with friends/relatives, Make-a-Wish Foundation trips, etc. The beneficiary's POC must provide for such absences. There is no limit to the number of therapeutic leave days that may be reimbursed at one time as long as the total does not exceed 18 days in a 365-day period. If a beneficiary does not return from a therapeutic leave, the beneficiary must be discharged on the date they left the facility. The date of admission and the date of discharge may not be billed as therapeutic leave days.

Reimbursement is at 95 percent of the individual or specific NF's daily per diem rate, just as the customary room and board rate is reimbursed.

- **Hospice Revocation or Decertification.** If a Medicaid hospice beneficiary who resides in a NF revokes their hospice services or is deemed no longer certifiable for the Medicaid hospice benefit, the hospice may bill for services on the day of revocation/decertification, as well as the hospice/NF room and board, as long as the beneficiary is in the facility at the midnight census.
- **Ventilator Dependent Care Unit (VDCU) or Complex Care Case.** Refer to the Place of Service subsection of this chapter for information regarding payment of room and board for these hospice beneficiaries.
- **State Veterans' Homes.** MDHHS pays the hospice 100 percent of the beneficiary-specific Patient Driven Payment Model (PDPM) Medicaid rate for room and board in a State Veterans' Home, and payments will be made through gross adjustments. In addition to standard billing practices, hospice providers must follow the State Veterans'

Medicaid Provider Manual

Homes billing policy found in the Billing & Reimbursement for Institutional Providers chapter. The hospice must submit a separate claim from other services for the room and board provided in a State Veterans' Home. Hospice reimbursement for room and board must be outlined in the contract established between the hospice and the State Veterans' Home.

7.3.I. ADULT FOSTER CARE FACILITIES/HOME FOR THE AGED FACILITIES

Medicaid does not reimburse for room and board in these settings. Reimbursement is made directly to the facility provider in the normal manner (i.e., Supplemental Security Income, Personal Care/Supplemental Payment). This payment is made in full. The AFC or HFA cannot seek additional restitution from the beneficiary or the hospice provider.

7.3.J. BOARDING HOMES

Medicaid does not reimburse for room and board in these settings.

7.3.K. ASSISTED LIVING FACILITY

Medicaid does not reimburse for room and board in these settings.

7.4 REIMBURSEMENT LIMITS

Medicaid does not apply an aggregate dollar capitation. (The Medicare program establishes the maximum total dollar amount per year that Medicare pays for hospice services. Medicaid does not apply this policy to beneficiaries receiving hospice care.)

Medicaid applies the same number of inpatient respite days as Medicare (i.e., no more than five consecutive days are allowed). If more than five consecutive days are billed, the number is reduced to five days, and the excess days must be billed as routine care by the hospice.

Reimbursement for routine, non-emergent transportation is included in the per diem (room and board amount) negotiated between the hospice and the NF.

SECTION 1 – GENERAL INFORMATION [CHANGE MADE 4/1/2025]

This chapter applies to services provided to Fee for Service (FFS) beneficiaries in an inpatient and/or outpatient hospital setting unless otherwise indicated. Medically necessary services provided to Medicaid beneficiaries by an enrolled hospital are generally covered by Medicaid, administered through the Michigan Department of Health and Human Services (MDHHS). The attending provider is the individual who has the primary responsibility for the treatment and care of the beneficiary. Depending on the setting and professional licensure regulations, the specific provider type can vary. **Services** described in this chapter must also be available to Medicaid Health Plan (MHP) enrollees; however, the MHPs may implement different authorization and service criteria. For billing purposes, a revenue code is identified as a specific accommodation, ancillary service or billing calculation for all institutional claims. **(correction made 4/1/2025)**

The appropriate revenue code from the National Uniform Billing Committee (NUBC) and/or State Uniform Billing Committee (SUBC) manuals must be used on each claim line for all institutional claims. If a procedure code is required, a Healthcare Common Procedure Coding System (HCPCS) code(s) must be used.

Prior authorization (PA) information in this chapter pertains to FFS Medicaid and FFS Children's Special Health Care Services (CSHCS) only. If the beneficiary is enrolled in a MHP, the hospital must obtain any required PA from the beneficiary's MHP when providing services.

1.1 INPATIENT HOSPITAL

An inpatient hospital is defined as a facility, other than psychiatric, which primarily provides medically necessary diagnostic, therapeutic (both surgical and nonsurgical) or rehabilitation services to inpatients. Services provided to inpatients include bed and board; nursing and other related services; use of facility; drugs and biologicals; supplies, appliances and equipment; diagnostic, therapeutic and ancillary services; and medical or surgical services. Services of professionals (e.g., physician, oral-maxillofacial surgeon, dental, podiatric, optometric) are not included and must be billed separately. Inpatient hospital services are:

- Ordinarily furnished in a facility for the care and treatment of inpatients.
- Furnished under the direction of a physician (MD or DO), podiatrist, oral/maxillofacial surgeon, certified nurse midwife, or a dentist.
- Furnished in a facility that is:
 - Maintained primarily for the care and treatment of inpatients with disorders other than mental diseases;
 - Licensed or formally approved as a hospital by an officially designated authority for State standard-setting; and
 - Medicare-certified to provide inpatient services.

An inpatient is an individual who has been admitted to a hospital for bed occupancy with the expectation that they will remain at least overnight, even when it later develops that they can be discharged or is transferred to another hospital and does not use the bed overnight. Days of care provided to a beneficiary are in units of full days, beginning at midnight and ending 24 hours later. Medicaid covers

the day of admission but not the day of discharge. If the day of admission and the day of discharge are the same, the day is considered an admission day and counts as one inpatient day.

1.2 OUTPATIENT HOSPITAL

An outpatient hospital (OPH) is defined as a portion of a hospital that provides diagnostic, therapeutic (both surgical and nonsurgical), and rehabilitation services to sick or injured persons who do not require inpatient hospitalization. Outpatient hospital services are:

- Furnished under the direction of the provider with the primary responsibility for the treatment and care of the beneficiary in the outpatient setting. The provider type varies according to the service provided. A complete list of allowed attending providers for outpatient services can be found on the MDHHS website. Refer to the Directory Appendix for website information.
- Furnished in a facility that is certified as a provider, or as having provider-based status, by Medicare.

To facilitate coordination of benefits, MDHHS follows Medicare's coverage policies as closely as possible and appropriate. Differences in coverage policy are described in this chapter.

1.3 THIRD PARTY LIABILITY

Federal regulations require that all identifiable financial resources available for payment, including Medicare, be billed prior to billing Medicaid. (Refer to the Coordination of Benefits chapter for additional information.)

1.3.A. MEDICARE-RELATED SERVICES

MDHHS reimburses for Medicare-covered services up to the beneficiary's financial obligation to pay or the Medicaid fee screen, whichever is less. This limitation also applies if the beneficiary is eligible for, but not enrolled in, Medicare. Medicare benefits must be used prior to billing MDHHS or any Medicaid-capitated plan (MHP, PIHP/CMHSP) for any portion of the claim.

MDHHS reimburses Medicare coinsurance and deductible amounts subject to Medicaid's reimbursement limitations on all Medicare-approved claims, even if Medicaid does not normally cover the service. Lifetime Reserve Days (LRD) must be used, if available.

1.3.B. OTHER INSURANCE

Medicaid and CSHCS beneficiaries may have insurance coverage, either traditional health insurance or a Health Maintenance Organization (HMO), through private and/or employer-based commercial policies. The other insurance is always primary, and the rules of that insurer must be followed. This includes, but is not limited to, PA requirements, provider qualifications, and receiving services through the insurer's provider network. MDHHS does not pay for services denied by the primary insurer because the primary insurer's rules were not followed.

Medicaid covers the appropriate copay and deductibles up to the beneficiary's financial obligation to pay or the Medicaid fee screen, whichever is less. If the primary insurer has

Medicaid Provider Manual

negotiated a rate for a service that is lower than the Medicaid fee screen, MDHHS cannot be billed more than the negotiated rate. MDHHS reimburses Medicaid-covered services that are not included in the primary insurer's plan up to the Medicaid fee screen if all Medicaid coverage rules have been followed. If a beneficiary is enrolled in a MHP or is receiving services through a PIHP/CMHSP, the MHP/PIHP/CMHSP is responsible for payment.

1.4 COPAYMENTS

Copayments may be required for inpatient hospital stays, outpatient hospital visits, and non-emergency visits to the Emergency Department for beneficiaries age 21 years and older. Refer to the General Information for Providers Chapter for information about copayments. Current copayment amounts are listed on the MDHHS website. (Refer to the Directory Appendix for website information.)

Copayments for the first day of an inpatient stay apply to the DRG or first day per diem payment. A copay will not be applied to emergent admissions, transfers between acute care hospitals, from acute care to rehab, or to readmits within 15 days for the same DRG/diagnosis.

Federal regulations at 42 CFR §447.54 specify the cost-sharing requirements for services provided in a hospital emergency department. To impose cost sharing for non-emergency services provided in a hospital emergency department, the hospital must:

- Perform appropriate medical screening under 42 CFR §489.24 Subpart G to determine the individual does not need emergency services.
- Before providing nonemergency services:
 - inform the individual of the amount of cost sharing responsibility for non-emergency service(s);
 - provide the individual with the name and location of an available and accessible alternative non-emergency services provider;
 - determine that the alternative provider can provide services in a timely manner with the imposition of a lesser cost sharing amount or no cost sharing if the person is otherwise exempt from cost sharing; and
 - provide a referral to coordinate scheduling for treatment with the alternative provider.

Hospitals providing emergency department services are expected to develop cost sharing policies and procedures consistent with the federal requirement.

Refer to the Billing Beneficiaries Section of the General Information for Providers Chapter of this manual for additional information regarding copayment requirements. Beneficiaries may not be denied care or services based on inability to pay a copayment, except as outlined in that section.

1.5 MISCELLANEOUS

1.5.A. ABUSE

Providers with reasonable cause to suspect that a child or vulnerable adult may have been abused or neglected are required by law to immediately report it to the appropriate Protective Services Unit of the local MDHHS office. Inpatient hospital stays for suspected abuse or neglect are covered if the attending provider determines the beneficiary requires further assessment and treatment. Inpatient stays for the sole purpose of custodial or protective care are not a covered benefit.

1.5.B. ADMINISTRATIVE SERVICES

Interns, resident physicians, dentists, or medical staff who are functioning in an administrative, teaching, or learning capacity for the hospital cannot bill MDHHS for their professional services as these costs are included in the hospital's Graduate Medical Education (GME) payments. This includes physician-owners or other staff paid by the hospital. Staff meetings for any purpose are not reimbursable. Reimbursement for administrative services is included in the Diagnosis Related Group (DRG) payment, as well as the MDHHS Outpatient Prospective Payment System (OPPS).

1.5.C. COMMUNICABLE DISEASE

Cases of communicable disease, such as tuberculosis, hepatitis, meningitis, and enteric disease, must be reported to the local health department (LHD). For additional information, contact the LHD.

1.5.D. EDUCATIONAL COSTS FOR PROFESSIONAL EDUCATION

Payments for educational costs are made directly to hospitals for health professional education in both the inpatient and outpatient hospital setting according to the requirements and formulas in the Hospital Reimbursement Appendix of this chapter.

1.5.E. HOSPITAL-BASED PROVIDER

A hospital-based provider (HBP) is defined as a hospital-employed MD, DO, Certified Registered Nurse Anesthetist (CRNA), physician's assistant (PA), advanced practice registered nurse (APRN) [including certified nurse practitioner (NP), certified clinical nurse specialist (CNS) or certified nurse midwife (CNM)], dentist, podiatrist, or optometrist. HBPs must be enrolled separately as Medicaid providers and bill MDHHS directly using their own provider NPI number for any covered professional service(s) that they provide. (Refer to the appropriate provider-specific chapter and the Billing & Reimbursement for Professionals Chapter of this manual for additional information.)

1.5.F. HOSPITAL PERSONNEL PROVIDING AMBULANCE TRANSPORT ASSISTANCE

Only enrolled ambulance, including hospital-owned ambulance service, providers may provide ambulance services. MDHHS does not reimburse hospitals for staff personnel who assist with an ambulance transport. The cost of all hospital personnel is considered part of the normal hospital operation (included in the cost center) and may not be billed to MDHHS or to the beneficiary.

1.5.G. PHARMACY

Pharmaceutical products (drugs and biologicals) provided to inpatients are covered as a component of the inpatient DRG and are not reimbursed separately.

MDHHS follows Medicare's coverage policies related to outpatient hospital pharmacy services.

Take-home drugs require a prescription or prescription order that includes the prescriber's NPI and are covered only when provided by a Medicaid-enrolled pharmacy. All prescriptions or prescription orders must comply with state and federal laws.

(Refer to the Pharmacy Chapter of this manual for additional information.)

An emergency room practitioner must report their individual NPI with a prescription order. Each practitioner at a teaching hospital must report their individual NPI with a prescription order that is submitted to the dispensing pharmacy.

1.5.H. OUTPATIENT AMBULATORY SURGERY AND EMERGENCY SERVICES PROVIDED ON DATE OF AN INPATIENT HOSPITAL ADMISSION

Outpatient ambulatory surgery and ED services provided at the same hospital resulting in an inpatient admission must be included as part of the inpatient stay and are reimbursed as part of the DRG payment. Charges for emergency services or ambulatory surgery that result in admission must be reflected on the inpatient claim for that episode of care. The date of admission should be reported as the date the physician wrote the order to admit the beneficiary.

1.5.I. SERVICES THAT MUST BE BILLED BY OTHER PROVIDERS

The following services may not be provided and billed as an outpatient hospital service. These services may be provided and billed by the appropriate enrolled provider:

- | | |
|---|------------------------|
| ▪ Advanced Practice Registered Nurse (APRN)* | ▪ Optical |
| ▪ Certified Registered Nurse Anesthetist (CRNA) | ▪ Oxygen (take-home) |
| ▪ Chiropractor | ▪ Orthotics |
| ▪ Dentist | ▪ Pharmacy (take-home) |
| ▪ Durable medical equipment | ▪ Physician |
| ▪ Hearing aids | ▪ Physician Assistant* |
| ▪ Home health | ▪ Podiatrist |
| ▪ Medical supplies (take-home) | ▪ Prosthetics |
| | ▪ Shoes |

* If not an employee of the hospital.

1.5.J. TECHNICIAN CALLS

Overtime or holiday pay to technicians who are required to be at the hospital outside of their normal work hours are not separately billable to beneficiaries or to Medicaid. These charges are included in the hospital's standard charge structure.

Medicaid Provider Manual

SECTION 2 - PRIOR AUTHORIZATION [CHANGE MADE 7/1/2025]

MDHHS requires prior authorization (PA) for certain procedures to validate the medical need for the service. The following chart, intended for reference only, indicates services provided in the hospital setting that require PA, who must obtain it, how to obtain the PA, and the documentation required when the claim is submitted. Hospital services requiring PA include:

Service	PA Obtained By	Obtained Via	Documentation for Claim
* Cosmetic Surgery	Attending Physician	Practitioner Special Services Prior Approval – Request/Authorization Form (MSA-6544-B)	Prior Authorization (PA) Number
Freestanding Rehabilitation	Hospital	MDHHS Program Review Division (PRD)	Billing Authorization Number
Long Term Acute Care Hospital (LTACH)	Hospital	MDHHS PRD	Billing Authorization Number
Inpatient Psychiatric Admissions/Continued Stay	Hospital or Attending Physician	Phone call to local PIHP/CMHSP	Reimbursed by the PIHP/CMHSP, not MDHHS
* Outpatient Occupational Therapy (OT) (after the initial 12 months of treatment or 144 units)	Hospital	Occupational Therapy - Physical Therapy – Speech Therapy Prior Approval Request/Authorization (MSA-115)	PA number and, in Remarks, the From and Through dates of the PA number
* Physical Therapy (PT) (after the initial 12 months of treatment or 144 units)	Hospital	Occupational Therapy - Physical Therapy – Speech Therapy Prior Approval Request/Authorization (MSA-115)	PA number and, in Remarks, the From and Through dates of the PA number
* Outpatient Speech-Language Pathology (after the initial 12 months of treatment or 36 visits)	Hospital	Occupational Therapy - Physical Therapy – Speech Therapy Prior Approval Request/Authorization (MSA-115)	PA number and, in Remarks, the From and Through dates of the PA number
Outpatient Psychiatric Partial Hospitalization	Hospital	Phone call to PIHP/CMHSP	Reimbursed by the PIHP/CMHSP, not MDHHS
* Services for Weight Reduction (e.g., Surgery)	Attending Physician	Practitioner Special Services Prior Approval – Request/Authorization Form (MSA-6544-B)	PA Number
* Organ Transplants	Attending Physician	Contact the Program Review Division	PA Number
* Pediatric Multi-Channel Recording (if more than two per year considered medically necessary)	Attending Physician	Practitioner Special Services Prior Approval – Request/Authorization Form (MSA-6544-B)	PA Number

Medicaid Provider Manual

Service	PA Obtained By	Obtained Via	Documentation for Claim
* Off Label Use of Non-Protected Drug Classes (revised per bulletin MMP 25-12)	Attending Physician	Practitioner Special Services Prior Approval – Request/Authorization form (MSA-6544-B) (revised 7/1/2025)	PA number
Laboratory Genetic or Molecular Testing	Hospital	Genetic and Molecular Laboratory Test Authorization Request (MSA-2081)	PA number
*If the beneficiary is enrolled in a MHP, providers must contact the individual MHP to verify PA requirements.			

PA does not guarantee payment or beneficiary eligibility. The provider must check the beneficiary's Medicaid eligibility prior to rendering services. (Refer to the General Information for Providers and the Beneficiary Eligibility Chapters of this manual for additional information.)

PA is not required if the beneficiary is receiving Medicare benefits for a Medicare-approved service.

2.1 INPATIENT HOSPITAL AUTHORIZATION REQUIREMENTS

The information in this section applies to in-state and borderland hospitals. Information regarding out-of-state hospital authorization requirements can be found in the Out-of-State/Beyond Borderland Providers subsection of the General Information for Providers chapter.

All inpatient admissions must be medically necessary and appropriate, and all services must relate to a specific diagnosed condition. In the event that an inpatient stay is deemed medically inappropriate or unnecessary, either through a pre-payment predictive modeling review or a post-payment audit, providers are allowed to submit an outpatient claim for all outpatient services and any inpatient ancillary services performed during the inpatient stay. Elective admissions, readmissions, and transfers for surgical and medical inpatient hospital services must be authorized through the MDHHS PRD. The physician/dentist should refer to the Prior Authorization Certification Evaluation Review (PACER) subsection of this chapter for specific requirements.

Medically inappropriate or unnecessary inpatient admissions may be resubmitted as outpatient claims for all outpatient services and any inpatient ancillary services performed during the inpatient stay. For claims with dates of discharge on or after October 1, 2014, when an inpatient claim is deemed medically inappropriate or unnecessary through a pre-payment predictive modeling review or a post-payment audit, hospitals are allowed to submit a hospital outpatient Type of Bill (TOB) 013X for all outpatient services and any inpatient ancillary services performed during the inpatient stay. Examples of services related to medically inappropriate or unnecessary inpatient admission include:

- all elective admissions, readmissions, and transfers that are not authorized through the PACER system;
- admissions or readmissions which have been inappropriately identified as emergent/urgent;

Medicaid Provider Manual

- selected ambulatory surgeries inappropriately performed on an inpatient basis; and
- any other inpatient admission determined to have not been medically necessary.

Medicaid does not cover inpatient hospital admissions for the sole purpose of:

- Cosmetic surgery (unless prior authorized)
- Custodial or protective care of abused children
- Diagnostic procedures that can be performed on an outpatient basis
- Laboratory work, electrocardiograms (ECGs), electroencephalograms (EEGs), and diagnostic x-rays
- Observation
- Occupational Therapy (OT)
- Patient education
- Physical Therapy (PT)
- Routine dental care
- Routine physical examinations not related to a specific illness, symptom, complaint, or injury
- Speech pathology
- Weight reduction or weight control (unless prior authorized)

If Medicaid does not cover the services of the physician/dentist or hospital, the physician/dentist or hospital must not bill the beneficiary, a member of the beneficiary's family, or other beneficiary representative.

2.1.A. PRIOR AUTHORIZATION CERTIFICATION EVALUATION REVIEW (PACER)

Elective admissions, all readmissions within 15 days of discharge, continued stays (when appropriate), and all transfers for surgical or medical inpatient hospital services to and from any in-state or borderland hospital enrolled in the Medicaid program require authorization through MDHHS PRD. This includes transfers between an acute care hospital, an enrolled distinct part rehabilitation unit of the same hospital, or a Long Term Acute Care Hospital (LTACH). Authorization requirements for out-of-state/beyond borderland hospitals can be found in the Out-of-State/Beyond Borderland Providers subsection of the General Information for Providers chapter. All cases are screened using industry standard evidence-based care guidelines and the clinical judgment of the review analyst and/or physician.

MDHHS PRD performs medical/surgical and rehabilitation admission, readmission, and transfer reviews through the PACER system and assigns PACER numbers.

The attending/admitting physician/dentist or representative is responsible for obtaining the PACER number before admitting, readmitting, or transferring the beneficiary, with exceptions as noted below. (Refer to the Directory Appendix for PACER authorization contact information.)

Medicaid Provider Manual

The physician/dentist is responsible for providing the PACER number to the admitting hospital. The PACER number is issued on the day that the admission is approved by the MDHHS PRD. This number is valid for the entire medical or surgical admission unless otherwise noted in this section. PACER authorization must be requested prior to the admission of the beneficiary.

Physicians/dentists are asked to provide the procedure code(s) when a surgical admission/readmission is requested.

Authorization through MDHHS PRD for the hospital admission does not remove the need for prior authorization (PA) required by Medicaid for specific services. The PA for the service must be obtained before MDHHS PRD authorization is requested.

NOTE: Do not report the PACER number on the professional claim.

Approval of an admission only confirms the need for services to be provided on an inpatient hospital basis. Payment for the admission is subject to eligibility requirements, readmission, and third party liability (TPL) reimbursement policy, along with any pre- and post-payment determinations of medical necessity.

If an admission, readmission, transfer, or continued stay is not approved, MDHHS does not reimburse for services rendered.

Reconsiderations	The attending physician/dentist or the hospital may request reconsideration of the adverse determination by MDHHS PRD regarding the need for admission, readmission, transfer, or continued stay. This reconsideration right applies regardless of the current hospitalization status of the beneficiary. Reconsiderations must be requested within three business days of the adverse determination. (Refer to the Directory Appendix for MDHHS PRD contact information.) If requested by MDHHS PRD, the provider must provide written documentation. A decision will be made by MDHHS within three (3) business days of receipt of the documentation. If the initial adverse determination is overturned, the adverse determination is considered null and void. If the initial adverse determination is upheld or is modified in such a manner that some portion of the hospital care is not authorized, the hospital is liable for the cost of care provided from the date of the initial determination, unless this determination is overturned in the Medicaid appeals process.
Technical Denials	If the provider fails to request a PACER number on a timely basis, the provider should make this request as soon as the omission is noted. When the provider contacts MDHHS PRD by telephone with an untimely request, the review analyst directs the provider to the appropriate form to complete, explaining the circumstances of the untimely request. If upon review of this written documentation the untimeliness is waived, the case is reviewed for medical necessity and the appropriateness of the admission, readmission, or transfer. If approved, MDHHS issues a PACER number. If the untimeliness issue is not approved, the attending physician/dentist and the hospital are notified in writing within three (3) business days of the decision. The physician/dentist or hospital may file an appeal through the MDHHS appeals process.

Medicaid Provider Manual

Continued Stay Denials

If MDHHS PRD does not authorize the admission or the continued stay for an admission and the beneficiary remains in the hospital for one or more days after Medicaid payment is not authorized, the hospital is at risk of Medicaid nonpayment for those days. Following discharge, the provider may request retrospective review by MDHHS, regardless of whether reconsideration was requested on the case, in writing within 30 calendar days of the discharge from the hospital. A copy of the medical record must accompany the retrospective review request.

Retrospective review is conducted for only those days that were not authorized during the telephone review. MDHHS informs the provider, in writing, of the decision within 14 business days of the receipt of the request and documentation. If some or all of the previously nonauthorized days are approved, a new PACER number is issued and included in the notification of the decision. If the initial adverse determination is upheld, the notification includes the previously issued PACER number. If the provider is dissatisfied with the decision, the decision may be appealed through the MDHHS appeals process.

The hospital may bill Medicaid only for the days authorized by MDHHS PRD. If MDHHS has made an adverse determination and issued a PACER number(s), the hospital may submit a claim with the PACER number(s) for only the authorized days while the case is in the reconsideration, retrospective review, or formal appeals process. Submission of such a claim does not imply acceptance of the determination.

2.1.A.1. ADMISSIONS/READMISSIONS/TRANSFERS THAT REQUIRE A PACER NUMBER

The following require a PACER number:

- All elective admissions.
- All readmissions within 15 days of discharge (including newborns). [NOTE: If a beneficiary is readmitted to the same hospital within 15 days for a related (required as a consequence of the original admission) condition, Medicaid considers the admission and the related readmission as one episode for payment purposes. The related admissions must be combined on a single claim. No PACER number is issued for continuation of care.]
- All transfers for medical/surgical services to and from any hospital enrolled in the Medicaid program (including newborns).
- Transfers between a medical/surgical unit and an enrolled distinct part rehabilitation unit of the same hospital.
- Transfer to an LTACH or admission from an LTACH to an acute care hospital.
- Authorization of continued stays in freestanding and distinct part rehabilitation units.

NOTE: If a newborn does not yet have a Medicaid ID number and a transfer or readmission occurs within 15 days, providers must request a retroactive PACER number when a newborn Medicaid ID number is issued.

Medicaid Provider Manual

2.1.A.2. ADMISSIONS/READMISSIONS/TRANSFERS THAT DO NOT REQUIRE A PACER NUMBER

The following do **not** require a PACER number:

- Emergent/urgent inpatient hospital admissions. (All transfers and 15-day readmissions to the same or a different hospital do require PACER through MDHHS PRD.)
- All admissions and transfers to distinct-part psychiatric units or freestanding psychiatric hospitals and all continued stays in a psychiatric unit/hospital. (Authorization must be obtained through the local Prepaid Inpatient Health Plan (PIHP)/Community Mental Health Services Program (CMHSP).)
- Obstetrical patients admitted for any delivery.
- Newborns admitted following delivery and newborns delivered within an emergency department and subsequently admitted to another facility.
- Admissions of beneficiaries who are eligible for CSHCS only.
- Medicaid beneficiaries enrolled in a Medicaid Health Plan (MHP). (Authorization must be obtained through the MHP.)
- When a beneficiary is admitted to a hospital that is not enrolled with the Michigan Medicaid Program.
- When a beneficiary becomes Medicaid eligible after the admission, readmission, transfer, or certification review period. (When Medicaid eligibility is determined retroactively, "Retroactive Eligibility" must be entered in the Remarks section of the inpatient hospital claim.)
- Medicare Part A beneficiaries.
- Commercial insurance coverage for admissions, readmissions, transfers, or continued stays.

2.1.A.3. PACER READMISSIONS

To be separately reimbursable, all readmissions (whether to the same or a different hospital) for hospital services must be prior authorized through MDHHS. The request for a PACER number for an elective readmission, whether to the same or a different hospital, must be made prior to readmission. The request for a PACER number for an emergent/urgent readmission to the same hospital must be made by the next business day following the readmission. The request for a PACER number for an emergent/urgent readmission to a different hospital must be made prior to the beneficiary's discharge from a transferring hospital. Medicaid defines readmission, for purposes of review, as any admission/hospitalization of a beneficiary within 15 days of a previous discharge, whether the readmission is to the same or a different hospital.

If the hospital intends to combine an admission and a readmission into a single episode for DRG payment purposes, MDHHS PRD should not be contacted for a separate PACER number for the readmission.

Medicaid Provider Manual

Before contacting MDHHS, the provider should assemble as much information as possible regarding the medical condition of the beneficiary upon the first discharge and at the time of the readmission. When contacted for a PACER number, MDHHS either:

- Agrees that the original admission and the readmission are unrelated, as well as medically necessary, and issues a PACER number so that the stays may be billed and paid separately by the same hospital;
- Authorizes a readmission to a different hospital as medically necessary and issues a PACER number;
- Asks the caller to obtain additional information and call back no later than the next business day; or
- Questions the relatedness of two stays at the same hospital or the medical necessity for the readmission and may approve and issue a PACER number or deny the request.

If a PACER number is not provided for a readmission due to relatedness (required as a consequence of the original admission), the hospital must combine the two stays into a single episode for DRG payment purposes (using the Leave of Absence revenue code 0180 for the time between discharge and readmission), or request reconsideration of the MDHHS decision within three business days. If the initial admission has already been billed, the hospital must submit a claim replacement to combine the two stays.

If it is determined a readmission is medically unnecessary, the hospital may only bill for the first admission.

2.1.A.4. PACER TRANSFERS

If a beneficiary needs to be transferred, authorization for the transfer must be obtained through MDHHS PRD. Authorization for a transfer is granted only if the transfer is medically necessary and the care or treatment is not available at the transferring hospital. Additionally, authorization may be granted if the beneficiary is a newborn returning to the originating hospital. Transfers for convenience are not considered. Transfers include the following situations:

- Transfer from one inpatient hospital to another.
- Transfer from one unit of an inpatient hospital to another unit of the same hospital (i.e., distinct-part rehabilitation unit).

Transfer to a distinct-part psychiatric unit of a general hospital or a freestanding psychiatric hospital is subject to review and approval by the beneficiary's PIHP/CMHSP. Do not contact MDHHS PRD for a PACER number. (Authorization must be obtained through the local PIHP/CMHSP.)

The following describes the appropriate requestor and timeframes for transfer authorization:

- Elective transfers – the transferring physician/dentist or designee must obtain authorization prior to transfer.

Medicaid Provider Manual

- Emergent/urgent transfers – the authorization must be obtained by the transferring physician/dentist no later than the next business day, or by the receiving physician/dentist or hospital before discharge.

If the transfer is approved, a PACER number is issued. The receiving hospital must use this PACER number when billing. The transferring hospital continues to use the original PACER number if a PACER number was required for the admission.

2.1.B. ADMISSIONS AND CONTINUED STAYS FOR DISTINCT PART REHABILITATION UNITS AND FREESTANDING REHABILITATION HOSPITALS

Admissions and continued stays require authorization through the MDHHS PRD. Continued stays beyond 30 days require additional inpatient authorization.

- The hospital must call MDHHS between the 27th and 30th day of the stay if the stay is expected to exceed 30 days. If the continued stay is certified, a PACER number is issued. The PACER number must appear on the hospital's claim if the stay is greater than 30 days but less than 60 days.
- The hospital must call MDHHS between the 57th and 60th day of the stay if the stay is expected to exceed 60 days. If the continued stay is approved, the hospital is given another PACER number. This PACER number must appear on the hospital's claim if the stay is greater than 60 days.

2.1.C. ADMISSION/TRANSFER FOR LONG-TERM ACUTE CARE HOSPITAL (LTACH)

A transfer or admission from an acute care hospital or inpatient rehabilitation unit to an LTACH requires a PACER number.

- The acute care hospital or inpatient rehabilitation unit is responsible for obtaining the PACER number before the discharge to an LTACH.
- If the LTACH admission meets InterQual LTACH criteria, a PACER number will be issued for no more than 30 days.
- Subsequent prior authorization and continued stay approvals must be obtained by the LTACH.
- A transfer from the LTACH to an acute care hospital will require an inpatient PACER number.

2.2 TERMINATION OF BENEFITS

The hospital's Utilization Review Committee may issue a notice of noncoverage to the beneficiary if it determines that the admission or continued stay in the hospital is not medically necessary; a copy of the notice should be sent to the MDHHS PRD – PACER Program. (Refer to the Directory Appendix for contact information.) The notice should be substantially similar to the sample letters contained in the Forms Appendix of this manual.

Medicaid Provider Manual

If issued, the notice is the responsibility of the hospital's Utilization Review Committee and is not related to any decision that may have been rendered by MDHHS on the case. The decision must be based on the findings of the Utilization Review Committee and not on the determination of MDHHS.

If the beneficiary or beneficiary's representative disagrees with the notice, the beneficiary or representative may contact MDHHS to appeal the decision. If MDHHS previously issued an adverse determination for the period of hospitalization covered by the notice, MDHHS informs the beneficiary of concurrence with the hospital decision. If MDHHS did not previously issue an adverse determination for the period, a review of the medical record is conducted. MDHHS will contact the hospital to obtain a copy of the medical record, review the medical necessity of the admission or continued stay, and issue a decision within three business days of receiving the hospital's Utilization Review Committee notice of noncoverage and the beneficiary's supporting medical records.

As with any benefit denial, the beneficiary or beneficiary's representative may request an administrative hearing. The Michigan Office of Administrative Hearings and Rules (MOAHR) provides an administrative hearing to appellants requesting a hearing who do not agree with a decision made by MDHHS or a MDHHS contracted agency (i.e., any agency, organization, or health plan contracted by MDHHS) that either determines eligibility for a MDHHS program, or delivers a service provided under a MDHHS program to a beneficiary, patient or resident. MOAHR issues timely, clear, concise and legally accurate hearing decisions and orders. The MOAHR Policy and Procedures Manual explains the process by which each different type of case is brought to completion. The MOAHR manual is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

SECTION 3 – COVERED SERVICES

Hospital services requiring additional information are listed below in alphabetical order. Some services have coverage limitations and/or PA requirements.

For outpatient hospital services, MDHHS follows Medicare's coverage policies as closely as possible and appropriate. Differences or clarifications of coverage are described in this section.

3.1 ABORTIONS

Medicaid only covers an abortion performed by a physician and related hospital charges (e.g., room, supplies) when it has been determined medically necessary to save the life of the mother or the pregnancy is the result of rape or incest. Medicaid funding is not available for any elective therapeutic abortion or service related to the performance of such abortion unless one of these criteria has been met.

Physicians must certify on a completed Certification for Induced Abortion form (MSA-4240) that, for medical reasons, an abortion was necessary to save the life of the mother or the beneficiary's medical history indicates that the terminated pregnancy was the result of rape or incest.

The physician who completes the MSA-4240 must also ensure completion of the Beneficiary Verification of Coverage form (MSA-1550) and is responsible for providing copies of the forms for billing purposes to any other provider (e.g., anesthesiologist, hospital, laboratory) that would submit claims for services related to the abortion.

Copies of the MSA-4240 and the MSA-1550 are not required for claims for ectopic pregnancies or spontaneous, incomplete, or threatened abortions.

Providers may attach copies of the MSA-4240 and the MSA-1550 to the claim or submit them via fax.

Federal regulations require that these forms be submitted to Medicaid before reimbursement can be made for any abortion procedure.

The medical record must include a complete beneficiary history, including the medical condition that made the abortion necessary to save the life of the mother. When the pregnancy is the result of rape or incest, the medical record must include the circumstances of the case and that the pregnancy was the result of rape or incest.

(Refer to the Forms Appendix for copies of MSA-4240 and MSA-1550. The forms are also available on the MDHHS website. Refer to the Directory Appendix for website and contact information.)

3.2 ACCOMMODATIONS

Medicaid covers private, semi-private, three-bed, or four-bed accommodations. The hospital's inpatient accommodation rate includes all charges associated with routine services (e.g., linens, nursing services, etc.) rendered during the inpatient stay. All dietary services, including special diets, are included in the accommodation rate and are not allowable under any other cost center.

3.2.A. INTENSIVE CARE

Intensive care provided in an intensive care unit(s) is covered for the treatment of critically ill beneficiaries. Neonatal intensive care unit accommodations may be billed only if medically necessary, the infant is treated in this setting, and the neonatal unit has been approved by MDHHS to provide this level of service.

3.3 AMBULANCE

MDHHS coverage policies related to hospital-owned ambulance services are contained in the Ambulance Chapter of this manual.

3.4 ANESTHESIA

Medicaid policy coverage includes anesthesia services when provided by qualified practitioners in conjunction with surgical services or other procedures when medically necessary.

Medicaid does not cover anesthesia services related to the treatment of infertility.

Physician, CRNA, or AA professional charges may not be billed on the outpatient hospital claim format. These professional charges must be billed on a CMS 1500 claim form. (Refer to the Billing & Reimbursement for Professionals and the Practitioner Chapters of this manual for additional information.)

3.5 APHERESIS

MDHHS follows Medicare's coverage and guidelines for therapeutic apheresis in an outpatient hospital. Therapeutic apheresis is defined as a continuous autologous procedure and is covered as follows:

- Plasma exchange for acquired myasthenia gravis;
- Leukapheresis in the treatment of leukemia;
- Plasmapheresis in the treatment of primary macro-globulinemia (Waldenstrom);
- Treatment of hyperglobulinemia, including (but not limited to) multiple myelomas, cryoglobulinemia, and hyperviscosity syndromes;
- Plasmapheresis or plasma exchange in the last resort treatment of thrombotic thrombocytopenic purpura (TTP);
- Plasmapheresis or plasma exchange in the last resort treatment of life-threatening rheumatoid vasculitis;
- Plasma perfusion of charcoal filters for treatment of pruritus of cholestatic liver disease;
- Plasma exchange in the treatment of life-threatening forms of Goodpasture's Syndrome;
- Plasma exchange in the treatment of glomerulonephritis associated with antiglomerular basement membrane antibodies and advancing renal failure or pulmonary hemorrhage;
- Treatment of chronic relapsing polyneuropathy for beneficiaries with severe or life-threatening symptoms who have failed to respond to conventional therapy;

Medicaid Provider Manual

- Treatment of life-threatening scleroderma and polymyositis when the beneficiary is unresponsive to conventional therapy;
- Treatment of Guillain-Barre Syndrome; and
- Treatment of life-threatening Systemic Lupus Erythematosus (SLE) when conventional therapy has failed to prevent clinical deterioration.

Apheresis is not a covered service when a beneficiary donates blood preoperatively and, at a later date, the blood is transfused back to the beneficiary.

3.6 APNEA MONITORS

Monitors must be provided by a Durable Medical Equipment (DME)/Medical Supply provider and may be covered on a rental basis without PA for up to three months from the date of discharge from the hospital for symptomatic infants discharged on a monitor. The hospital medical record must document that the infant was discharged on a monitor. The medical supplier must also note in their records that the child was discharged on a monitor, and a hospital discharge planner arranged for the apnea monitor rental. (Refer to the Medical Supplier Chapter of this manual for additional information.)

3.7 BENEFICIARY EDUCATION

Beneficiary education in the inpatient setting is included in the DRG payment. Beneficiary education services are covered in an outpatient setting as follows:

3.7.A. CHILDBIRTH EDUCATION

MDHHS covers childbirth education programs for pregnant women. The prenatal care provider must make written referrals for the pregnant woman, and the program must be provided by qualified educators in a Medicaid-enrolled outpatient hospital or by a certified Maternal Infant Health Program (MIHP) provider. This service is not covered if rendered by a prenatal care provider in the office setting. MDHHS covers childbirth education (also referred to as birthing education) as a complete program. MDHHS does not separately cover on-line (a type of distance learning) education classes.

Childbirth education includes, but is not limited to, the following topics:

Pregnancy	<ul style="list-style-type: none">▪ Health care during pregnancy▪ Physical and emotional changes during pregnancy▪ Nutrition
------------------	--

Medicaid Provider Manual

Labor and Delivery	<ul style="list-style-type: none">▪ Signs and symptoms of labor, including information regarding pre-term labor▪ Breathing and relaxation exercises▪ Analgesia and anesthesia▪ Avoiding complications▪ Coping skills▪ Types of deliveries▪ Episiotomy▪ Support techniques▪ Hospital tour
Infant Care	<ul style="list-style-type: none">▪ Preparation for breast feeding▪ Infant feeding▪ Immunizations▪ Infant carseat use▪ Parenting
Postpartum	<ul style="list-style-type: none">▪ Postpartum physical and emotional changes, including depression▪ Feelings of partner▪ Potential stress within the family▪ Sexual needs▪ Exercise▪ The importance of family planning

3.7.B. DIABETES SELF-MANAGEMENT EDUCATION (DSME) TRAINING PROGRAM

DSME is intended to educate beneficiaries in the successful self-management of their diabetes. MDHHS covers DSME when ordered by a physician or qualified non-physician medical practitioner responsible for the beneficiary's diabetic care and provided by diabetes educators (e.g., nurse, dietitian) in a Medicaid-enrolled outpatient hospital or Local Health Department (LHD) that meets one of the following requirements:

- Certified as a DSME program by MDHHS, Population Health Administration; or
- Association of Diabetes Care and Education Specialists (ADCES) accreditation by the Diabetes Education Accreditation Program (DEAP); or
- American Diabetes Association (ADA) recognition by the Education Recognition Program (ERP).

DSME program requirement information must be provided to MDHHS via the CHAMPS Provider Enrollment on-line system. (Refer to the Directory Appendix for contact information.) DSME services may not be rendered to eligible beneficiaries or billed for payment until the appropriate requirement information is on file and approved.

Medicaid Provider Manual

The physician or qualified non-physician medical practitioner treating the beneficiary's diabetes must maintain a documented diabetes diagnosis in the medical record for initial and follow-up education and training. They must also document any special needs supported by medical necessity.

MDHHS aligns with Medicare's DSME training billing guidelines when possible. Medical Nutrition Therapy (MNT) is not a separately covered or reimbursed DSME Medicaid covered service.

Medicaid-enrolled DSME programs are expected to submit the MDHHS Annual Statistical Data Report following the reporting requirements located on the MDHHS website. This information is used for statewide reporting of statistical information to the Centers for Disease Control and Prevention (CDC). (Refer to the Directory Appendix for website information.)

DSME is not covered if rendered by a physician in the office setting, rendered by a nonenrolled provider, or rendered by a provider who does not meet Michigan Medicaid DSME program requirements.

3.7.C. KIDNEY DISEASE EDUCATION (KDE) SERVICES

MDHHS covers kidney disease education (KDE) of beneficiaries diagnosed with stage IV chronic kidney disease (CKD). If KDE is done in the outpatient hospital (OPH), only the OPH or physician (qualified person) may bill for services on the same day, same beneficiary.

MDHHS follows Medicare's coverage and reimbursement policies related to KDE.

3.8 BLOOD PRODUCTS

MDHHS coverage aligns with Medicare OPPS coverage and billing guidelines as closely as possible for Blood Processing/Storage in an outpatient hospital. Providers must bill appropriately following the Medicare coding and reporting requirements.

3.9 CHEMOTHERAPY TREATMENT

MDHHS covers antineoplastic drugs. MDHHS does not cover antineoplastic agents that are investigational or experimental.

3.10 CLINIC SERVICES

Hospital Clinic services are covered if rendered in a clinic setting that is part of the licensed and Medicaid-enrolled hospital, and that satisfy Medicare requirements for provider-based status. Clinic services rendered in the outpatient hospital include non-emergency outpatient services that are provided to ambulatory beneficiaries.

MDHHS covers Urgent Care Clinics (as part of the Medicaid-enrolled hospital and that satisfy Medicare requirements for provider-based status) when the services provided are specific to urgent medical care

(i.e., suturing, most fracture care) and are medically necessary for a non-life threatening condition or injury, or illness that should be treated within 24 hours.

3.11 CLINICAL TRIALS

The program covers routine patient costs furnished in connection with participation in a qualifying clinical trial. Routine patient costs are defined as any item or service provided to prevent, diagnose, monitor, or treat complications resulting from participation in the qualifying clinical trial to the extent that the provision of such items or services to the beneficiary would otherwise be covered outside the course of participation in the qualifying clinical trial under the state plan or waiver. Routine patient costs also include any item or service required solely for the provision of the investigational item or service that is the subject of the qualifying clinical trial, including the administration of the investigational item or service.

Refer to the Billing & Reimbursement for Institutional Providers, the Billing & Reimbursement for Professionals, and the Practitioner chapters for information related to coverage of routine patient costs furnished in connection with participation in a clinical trial.

3.12 DENTAL SERVICES

Dental services are routinely rendered in the dental office unless the situation requires that the dental service be performed in the outpatient hospital setting. However, services are not covered in the outpatient hospital setting for the convenience of the dentist or beneficiary.

Non-emergency routine dental treatment provided in an outpatient hospital setting is covered only under the following conditions:

- A concurrent hazardous medical condition exists;
- The nature of the procedure requires hospitalization; or
- Other factors (e.g., behavioral problems due to mental impairment) necessitate hospitalization.

Hospitals should refer to the Dental Chapter of this manual for information regarding program limitations prior to rendering services.

The dentist/physician must document in the beneficiary's medical record the condition that required the dental service be done in the hospital setting.

3.13 DIALYSIS (HEMODIALYSIS AND PERITONEAL DIALYSIS)

MDHHS coverage and reimbursement is an all-inclusive rate for emergency ESRD dialysis services and maintenance outpatient dialysis services for beneficiaries receiving hemodialysis or peritoneal dialysis. MDHHS follows the Medicare billing guidelines for hemodialysis and peritoneal dialysis for both in-person and telemedicine visits. Individual services may not be billed separately. The rate is the same whether the beneficiary dialyzes in the facility or at home, and includes all necessary home and facility dialysis maintenance services, supplies, equipment and supportive services such as:

Medicaid Provider Manual

- Oxygen;
- Filters;
- Declotting of shunts;
- Staff time to administer blood or oxygen; and
- Routine parenteral items: Heparin, Protamine, Mannitol, saline, glucose, dextrose, topical anesthetics, and arrhythmics.

MDHHS reimburses the physician directly for professional services related to maintenance dialysis.

Nonroutine additional services must be billed using the appropriate supporting HCPCS code. The facility is responsible for making arrangements with a DME provider for supplies not available from the dialysis facility. MDHHS does not reimburse the medical supplier separately. The facility is responsible for payment to the supplier or independent lab for services provided.

3.13.A. DIALYSIS LABORATORY SERVICES

Payment for laboratory services related to maintenance dialysis is included in the composite rate regardless of whether the tests are performed in the facility or an independent laboratory. Laboratory services included in the composite rate should be billed to the dialysis facility when performed by an outside laboratory. The dialysis facility and the outside laboratory must coordinate billing to ensure duplicate payments do not occur. A freestanding dialysis center that performs its own laboratory tests and needs to bill for services outside of those included in the composite rate must enroll with Medicaid as an independent laboratory. Freestanding dialysis centers enrolled as independent laboratories are subject to the Out of State /Beyond Borderland Provider Medicaid policy.

The following laboratory tests are considered to be a routine part of maintenance dialysis (Hemodialysis, Peritoneal Dialysis, and Continuous Cycling Peritoneal Dialysis) and may not be billed separately unless it is medically necessary to perform them in excess of the frequencies indicated:

Per Treatment	Weekly	Monthly
<ul style="list-style-type: none">▪ All hematocrit or hemoglobin tests and clotting time tests	<ul style="list-style-type: none">▪ Prothrombin time for patients on anticoagulant therapy▪ Serum Creatinine▪ BUN	<ul style="list-style-type: none">▪ CBC, including platelet count and additional indices▪ Serum Calcium▪ Serum Chloride▪ Serum Potassium▪ Serum Bicarbonate▪ Serum Phosphorus▪ Total Protein▪ Serum Albumin▪ Alkaline Phosphatase

Per Treatment	Weekly	Monthly
		<ul style="list-style-type: none">▪ SGOT▪ LDH

Laboratory tests for Continuous Ambulatory Peritoneal Dialysis (CAPD) that are included in the composite rate on a monthly basis include:

- | | | |
|------------------------|---------------------|-----------------|
| ▪ Albumin | ▪ Creatinine | ▪ Potassium |
| ▪ Alkaline Phosphatase | ▪ Dialysate Protein | ▪ SGOT |
| ▪ AST | ▪ HCT | ▪ Sodium |
| ▪ BUN | ▪ Hgb | ▪ Total Protein |
| ▪ Calcium Magnesium | ▪ LDH | |
| ▪ CO2 | ▪ Phosphate | |

Laboratory tests not listed above may be separately billed by the dialysis facility or Clinical Laboratory Improvement Amendments (CLIA)-certified lab performing the test.

3.13.B. DIALYSIS SELF-CARE TRAINING

MDHHS reimburses for dialysis self-care training provided by outpatient dialysis clinics.

- A session is considered as one training day and a complete course is considered 10-15 sessions.
- Sessions must be documented in the beneficiary's medical record and are subject to post-payment review.

3.14 DIAGNOSTIC TESTING

MDHHS policy covers and reimburses for diagnostic testing to diagnose a disease or medical condition. Outcomes must be documented in the medical record. Diagnostic testing in an inpatient hospital is included in the inpatient DRG payment. Outpatient hospitals must bill appropriately under the MDHHS OPPS.

MDHHS policy coverage does not reimburse for:

- Routine screening, such as spirometry, holter monitor, Doppler flow-study or pelvic echography.
- Testing to establish baseline values.
- Testing for the general health and wellbeing of a beneficiary.
- Any test not generally recognized as relevant to the condition being investigated.

3.14.A. FETAL MONITOR - FETAL NONSTRESS TEST

A Fetal Nonstress Test is covered as a diagnostic test when performed as part of routine monitoring of an ongoing pregnancy. MDHHS does not cover a room charge in addition to the test when it is being performed as part of routine monitoring of an ongoing pregnancy.

3.14.B. PEDIATRIC MULTI-CHANNEL RECORDING

A pediatric multi-channel recording is a continuous and simultaneous recording of at least four channels and may include electrocardiogram (ECG), thoracic impedance, airflow measurements, oxygen saturation, esophageal pH, or strain gauge measurements. Additional channels may be appropriate and do not have to include an electroencephalogram (EEG).

MDHHS policy covers two multi-channel recordings per year per beneficiary under age 21 when provided by qualified personnel and interpreted by the physician. The physician must obtain PA if more than two tests per year are considered medically necessary and must provide a copy of the PA for the hospital's medical record.

Multi-channel recordings are not covered in the beneficiary's home.

3.15 EMERGENCY DEPARTMENT SERVICES

3.15.A. SCREENING EXAM AND STABILIZATION

MDHHS and its contracted health plans must follow the applicable requirements and definitions of the federal EMTALA 42USC§1395dd.

Medicaid policy covers the medical screening examination, any ancillary service(s) if performed in a hospital emergency department (ED) for the sole purpose of determining if an emergency medical condition exists, and any necessary stabilizing treatment.

For both Medicaid FFS and MHP beneficiaries, the screening examination and any physician-ordered procedures (e.g., x-rays, lab, etc.) necessary to determine the patient's condition are covered without PA. For Medicaid FFS beneficiaries, the screening examination and related diagnostic procedures are billed to MDHHS. For Medicaid beneficiaries enrolled in a MHP, these services are billed to the beneficiary's MHP.

Facility charges for the ED screening exam are included in the hospital inpatient admission when services occur at the same facility. If the patient is transported to another facility for a prior authorized inpatient admission, the first hospital's facility fees for the ED are reimbursed separately. In both instances, the professional fees for medical screening and stabilization in the emergency room are reimbursed separately from the facility fees.

3.15.B. TREATMENT OF EMERGENCY MEDICAL CONDITION

PA is not required for the treatment of emergency medical conditions.

An emergency medical condition is defined by the federal Balanced Budget Act of 1997 and its regulations.

An emergency may exist whether the patient is discharged from the ED or admitted to the inpatient hospital. This includes admissions where death occurs before a bed is occupied.

If an emergency medical condition exists, the medical findings must be fully documented in the patient's medical record.

3.15.C. TREATMENT OF NON-EMERGENCY MEDICAL CONDITION

If the medical findings from the screening determine that the patient's condition does not meet the definition of an emergency medical condition, but requires additional follow-up treatment, the following rules apply:

- MHP enrollees must be referred to their primary care provider for treatment, or the ED can contact the MHP to request authorization to provide the treatment. The hospital must document all telephone calls made to the enrollee's MHP for the purpose of requesting post-stabilization authorization. If the MHP fails to respond within one hour to the request for additional services beyond those required for stabilization, the request for authorization is deemed approved.
- FFS Medicaid beneficiaries with private health insurance must follow the rules of the private health insurance. Private insurances frequently require that the primary care provider for the private insurance perform follow-up treatment. If the private insurance refuses payment for treatment because their rules were not followed, MDHHS does not pay for services. Medically necessary services not covered by the primary insurer that are covered by Medicaid are reimbursed if the Medicaid coverage requirements are followed.
- FFS Medicaid beneficiaries without private health insurance should be encouraged to obtain treatment from their primary care provider. However, treatment may be rendered in the ED and does not require PA.

3.15.D. PSYCHIATRIC SCREENING AND STABILIZATION SERVICES

Screening and stabilization of a psychiatric emergency does not require PA. A psychiatric emergency is defined as a situation in which an individual must be treated to protect them from inflicting injury to self or others as the result of a serious mental illness, emotional disturbance, or developmental disability or could reasonably be expected to intentionally or unintentionally injure themselves or others in the near future. The emergency may result from an inability to provide food, clothing, or shelter for them or others, inability to attend to activities of daily living, or when judgment is so impaired the individual is unable to understand the need for treatment.

If the treating hospital determines that the beneficiary requires post-stabilization psychiatric services, the hospital must contact the Prepaid Inpatient Health Plan (PIHP)/Community Mental Health Services Program (CMHSP) for PA. The need for PA includes, but is not limited to, inpatient psychiatric care, partial hospitalization, and/or specialty mental health services. If a beneficiary requires inpatient psychiatric hospitalization and is admitted directly from the ED to the same facility, the local PIHP/CMHSP must prior authorize the admission.

If the beneficiary is transported to another facility for a prior authorized inpatient admission, the first hospital's facility fees for the ED are reimbursed separately.

In both instances, the professional fees for medical screening and stabilization in the ED are reimbursed separately.

3.16 HEARING SERVICES

Hospitals may bill for speech and hearing evaluations, testing, and therapy for beneficiaries of all ages.

Audiology services other than newborn hearing screening tests must be provided by:

- A licensed audiologist.
- An audiologist candidate (i.e., in their clinical fellowship year or having completed all requirements but has not obtained a license) supervised by a licensed audiologist.
- An audiology student completing their clinical affiliation under the direct supervision of (i.e., in the presence of) a licensed audiologist.

Standards of practice must conform to those published in ASHA Preferred Practice Patterns for the Profession of Audiology. Audiologic test equipment and hearing aid test equipment used must conform to applicable American National Standards Institute (ANSI) criteria.

The following equipment must be available to audiologists providing services to infants less than six months of age:

- Infant Diagnostic Testing
 - Tone Burst ABR; and
 - Bone Conduction ABR; and
 - High Frequency Immittance; and
 - Otoacoustic Emissions
- Infant Hearing Aid Evaluation, Selection, and Follow-Up
 - Infant Predictive Method (e.g., Desired Sensation Level); and
 - Real-Ear to Coupler Difference

MDHHS requires that all Medicaid-covered newborns be screened using the auditory brainstem response (ABR) method and/or evoked otoacoustic emissions (EOAE) method as recommended by the American Academy of Pediatrics (AAP).

Medicaid Provider Manual

- Hospitals with 15 or more Medicaid deliveries per year must provide newborn hearing screening using the policies and procedures recommended by the AAP.
- Hospitals with less than 15 Medicaid deliveries per year may provide the service or advise the physician, physician assistant or advanced practice registered nurse to refer the newborn for the hearing screening prior to age one month.

For hospitals that provide EOAE and/or ABR newborn hearing screening, reimbursement is included in the calculation for the DRG. MDHHS recommends hospitals that provide delivery services have qualified staff to:

- Develop screening protocol.
- Appropriately train staff to perform screenings and, in matters of confidentiality, recognition of psychological stress for the parents or guardians, infection control practices, and established policies and procedures for handling newborns in the hospital.
- Develop a system for monitoring the performance of screenings.
- Inform parents/guardians about the procedure(s), potential risks of hearing loss, and the benefits of early detection and intervention.
- Allow parents/guardians an opportunity to decline screening. (Providers must document in the medical record if screening was declined.)
- Delineate responsibility for documenting screening results.
- Develop methods for communicating results in a sensitive and timely manner to the parents/guardians and the physician. If repeat screening is recommended following discharge, establish procedures for appropriate follow-up.
- Report critical data to the State's monitoring program.

3.17 HYPERBARIC OXYGEN THERAPY

Medicaid covers hyperbaric oxygen therapy when provided in a hyperbaric chamber for selected indication (e.g., decompression illness, gas gangrene, etc.). MDHHS follows Medicare's billing guidelines. It is not to be used as a replacement for standard medical management.

3.18 HYSTERECTOMY

Federal regulations prohibit Medicaid reimbursement for hysterectomies solely for the purpose of sterilization. Hysterectomies are also prohibited when performed for family planning purposes even when there are medical indications which, alone, do not indicate a hysterectomy.

A hysterectomy is covered only if the beneficiary has been informed orally, prior to surgery, that a hysterectomy will render them permanently incapable of reproducing. The beneficiary or their representative must sign a written acknowledgment of receipt of that information using the Acknowledgment of Receipt of Hysterectomy Information form (MSA-2218). All items on the MSA-2218

must be completed. The beneficiary (or representative) and the physician (MD or DO) must sign the form. (Refer to the Forms Appendix for a sample form.)

The Acknowledgment of Receipt of Hysterectomy Information form is not required if the beneficiary was already sterile before the hysterectomy.

Refer to the Practitioner Chapter of this manual for instructions regarding the completion and submission of the MSA-2218.

3.19 INJECTIONS/INTRAVENOUS INFUSIONS

MDHHS covers intramuscular, subcutaneous or intravenous injections and intravenous (IV) infusions when medically necessary. In the inpatient hospital, reimbursement is included in the DRG payment. In the outpatient hospital (OPH) or Ambulatory Surgical Center (ASC), reimbursement generally follows CMS Outpatient Prospective Payment System (OPPS) guidelines. Injectables paid differently than CMS OPPS are listed on the MDHHS OPPS Wraparound Code List for OPH or ASC. (Refer to the Directory Appendix for website information.)

A list of outpatient physician-administered drugs and biological products carved out from MHPs is maintained on the MDHHS website. Information regarding prior authorization (PA) requirements is also available on the MDHHS website. (Refer to the Directory Appendix for website information. Refer to the Billing & Reimbursement for Institutional Providers chapter for billing instructions.)

Refer to the Pharmacy Chapter of this manual for information regarding Medicare Part D.

3.20 LABOR & DELIVERY/NURSERY

MDHHS covers the labor and/or delivery room(s) or when an active labor does not progress to delivery. During active labor, MDHHS covers a fetal contraction or fetal nonstress test in addition to the labor and delivery room charge. When there is no active labor, MDHHS does not cover labor and/or delivery room charges for fetal monitoring or treatment of other medical conditions.

In an inpatient hospital, services are included in the DRG payment. Inpatient newborn nursery services are covered and must be billed under the newborn's ID number. (Refer to the Billing & Reimbursement for Institutional Providers Chapter of this manual for additional information.)

3.20.A. ELECTIVE, NON-MEDICALLY INDICATED DELIVERY PRIOR TO 39 WEEKS COMPLETED GESTATION

To reduce the rate of elective, non-medically indicated delivery prior to 39 weeks completed gestation, it is the expectation of MDHHS that each Medicaid-enrolled birthing hospital in Michigan utilizes elective delivery evidence-based guidelines (EBGs).

To ensure that each Medicaid-enrolled birthing hospital in Michigan utilizes elective delivery EBGs, each hospital must have a completed Medicaid Enrolled Birthing Hospital Agreement for Elective, Non-Medically Indicated Delivery Prior to 39 Weeks Completed Gestation (MSA-1755) on file with MDHHS. A copy of the form is provided in the Forms

Appendix and is also available on the MDHHS website. (Refer to the Directory Appendix for website information.)

Providers are expected to report the appropriate NUBC condition codes for gestational age on the mother's hospital claim when the delivery is related to cesarean sections or inductions.

3.21 LABORATORY

Medicaid covers laboratory services performed by a clinical laboratory located in or as part of a hospital when it is certified to perform the specialties or subspecialties of tests billed. The laboratory must hold a CLIA certificate of registration, compliance (COC), or accreditation (COA) from the Centers for Medicare & Medicaid Services (CMS).

Medicaid covers hospital laboratory services and pathology procedures reasonable and necessary to guide detection, diagnosis, management, and/or treatment of a specific medical condition, illness, or injury and laboratory tests associated with preventive services assigned a grade A or B by the United States Preventive Services Task Force (USPSTF).

Covered laboratory and pathology services must be:

- Recommended and ordered by the beneficiary's treating physician, podiatrist, physician assistant, nurse practitioner, clinical nurse specialist, dentist, or CNM according to their scope of practice.
- Provided in accordance with evidence based generally accepted standards of medical practice.
- Clinically appropriate in terms of type, frequency, extent, site, and duration for the beneficiary's symptoms, diagnosis, illness, or injury.
- Used in the clinical management of the beneficiary's specific medical condition.
- Provided in accordance with all applicable Medicaid clinical criteria, requirements, policies, and/or provisions of coverage.
- Performed in a laboratory appropriately certified by the Clinical Laboratory Improvement Amendments (CLIA).

The beneficiary's medical record must include sufficient documentation to support the medical necessity of the laboratory service regardless of where the tests are performed. The documentation must include a description of the beneficiary's symptomatology and other findings that have led the practitioner to order the test(s). An explanation of the laboratory testing method or the results of diagnostic tests, whether normal or abnormal, is not considered documentation of medical necessity. For approval of payment, the laboratory procedure(s) must be specific and appropriate to the beneficiary's documented condition and diagnosis.

Generally, MDHHS follows Medicare's current OPPS laboratory coverage policies as closely as possible and appropriate. In those instances where program differences require coverage disparity, the differences will be reflected through the application of the MDHHS specific status indicator. Procedure codes associated with the identified services will appear on the MDHHS OPPS Wraparound Code List and reimbursement rates will appear on the Carrier Priced Laboratory Codes List. Both lists are available on the MDHHS website. (Refer to the Directory Appendix for website information.)

Refer to the Laboratory chapter for additional information regarding coverage parameters, ordering limitations, and prior authorization requirements.

3.21.A. BILLING AND REIMBURSEMENT

Laboratory services provided by outpatient hospitals are reimbursed through the Medicaid Outpatient Prospective Payment System (OPPS). Laboratory tests provided in conjunction with other hospital services are generally packaged as ancillary services and do not receive separate reimbursement unless otherwise indicated by the procedure code's OPPS payment status indicator and/or determined under OPPS claim processing rules. Laboratory services performed (either directly or under arrangement) for non-hospital patients (i.e., those who are neither a registered outpatient nor inpatient hospital patient) are considered performed by a hospital outreach laboratory and may be eligible for separate Medicaid reimbursement.

The laboratory's CLIA number must be present on the claim for laboratory services to be considered for reimbursement.

Outpatient laboratory services are billed using the appropriate HCPCS code and reimbursement includes the collection of the specimen(s), the analysis, and the lab test results. MDHHS performs pre- and/or post-payment reviews to monitor laboratory procedures for medical necessity and appropriate practitioner orders. Outpatient hospitals are subject to corrective action, including the recovery of funds, for laboratory services not specifically ordered by a practitioner.

Services performed by an outpatient hospital laboratory or its employees may not be billed to, or by, the ordering practitioner.

Medicaid covers laboratory services provided in a provider-based outpatient hospital clinic when they are appropriate to be performed in a clinic setting. Beneficiaries are treated as hospital outpatients for billing purposes and laboratory services must be reported using the institutional claim format. Refer to the Hospital chapter for complete billing and reimbursement information.

Laboratory reimbursement to the inpatient hospital is through the DRG payment.

3.22 MENTAL HEALTH AND SUBSTANCE ABUSE SERVICES

Most mental health services provided to Medicaid beneficiaries are covered through the local PIHP/CMHSP. PIHPs/CMHSPs are responsible for direct payment for inpatient psychiatric or partial hospitalization services, related physician services, and specialized community mental health clinical and rehabilitation services that the PIHP/CMHSP has prior authorized. Providers should not bill MDHHS for these services.

Medical/physical health care services (beyond the admission history and physical) and/or physician-ordered medical (nonpsychiatric) consultations required for Medicaid beneficiaries while they are receiving psychiatric inpatient or partial hospitalization services are not the responsibility of the PIHP/CMHSP. For FFS beneficiaries, these services are billed directly to MDHHS. For beneficiaries enrolled in a MHP, the services must be billed directly to the MHP. These services may require PA.

(Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter of this manual for additional information.)

3.22.A. ACUTE INPATIENT MEDICAL DETOXIFICATION

Medically necessary inpatient detoxification services are covered only in a life-threatening situation. Medicaid does not cover inpatient detoxification if the beneficiary is simply incapacitated and not in a life-threatening situation. Acute medical detoxification services may be provided by a Medicaid-enrolled hospital without authorization from a PIHP. Acute detoxification services are reimbursed directly by MDHHS for both MHP enrollees and FFS beneficiaries.

For additional substance abuse services, hospitals must refer beneficiaries seeking inpatient acute detox services to the regional PIHP.

3.22.B. INPATIENT PSYCHIATRIC SERVICES

Inpatient stays in a psychiatric unit of a general hospital are covered for beneficiaries of any age. Coverage for inpatient treatment, including related psychiatric visits, in a freestanding psychiatric hospital, both private and state-owned, is limited to eligible beneficiaries under age 21 and age 65 and older. If the beneficiary was an inpatient immediately prior to attaining age 21, they would be eligible to continue as an inpatient until age 22. If the beneficiary is discharged at some time following their 21st birthday, coverage terminates on the discharge date.

All psychiatric admissions and continued stays must be authorized by the local PIHP/CMHSP. (Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter of this manual for specific coverages and authorization requirements.)

3.22.C. PSYCHIATRIC PARTIAL HOSPITALIZATION

Psychiatric coverage includes partial hospitalization on a day-care or night-care plan for all beneficiaries, regardless of age. To be eligible for partial hospitalization, the beneficiary must be receiving active psychiatric treatment provided under the direction of a psychiatrist.

All partial hospitalization admissions and continued stays must be authorized by the local PIHP/CMHSP. (Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter of this manual for specific coverages and authorization requirements.)

3.22.D. SUBSTANCE ABUSE SERVICES

Medicaid covers acute care detoxification in the inpatient hospital as a FFS benefit. Reimbursement is made directly by MDHHS for both FFS beneficiaries and MHP enrollees.

Admission to the acute care setting for a diagnosis of substance abuse must meet at least one of the following criteria as reflected in the physician's orders and patient care plan:

- Vital signs, extreme and unstable.
- Uncontrolled hypertension, extreme and unstable.
- Delirium tremens, (e.g., confusion, hallucinations, seizures) or a documented history of delirium tremens requiring treatment.
- Convulsions or multiple convulsions within the last 72 hours.
- Unconsciousness.
- Occurrence of substance abuse with pregnancy and monitoring the fetus is vital to the continued health of the fetus.
- Insulin-treated diabetes complicated by diabetic ketoacidosis.
- Suspected diagnosis of closed head injury based on trauma injury.
- Congestive heart disease, ischemic heart disease, or significant arrhythmia as examples of active symptomatic heart disease.
- Suicidal ideation and gestures necessitating suicidal precautions as part of treatment.
- Blood alcohol level 350 mg/dl with a diagnosis of alcohol abuse.
- Blood alcohol level 400 mg/dl with diagnosis of alcohol dependence.
- Active presentation of psychotic symptoms reflecting an emergent/urgent condition.

3.22.E. OTHER SUBSTANCE ABUSE SERVICES

Medicaid covers other substance abuse services provided to beneficiaries. These services are covered under capitation payments to the PIHPs/CMHSPs. (Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter of this manual for specific coverages and authorization requirements.)

3.22.F. SUBSTANCE USE DISORDER SERVICES THROUGH PREPAID INPATIENT HEALTH PLANS

The regional PIHP may authorize the following specialized services:

- Outpatient Substance Abuse Treatment
- Assessment, Diagnosis, Beneficiary Placement and Referral
- Intensive Outpatient Counseling
- Approved Pharmacological Supports (Methadone)

Questions regarding substance abuse services should be directed to the regional PIHP.

3.23 ORGAN TRANSPLANTS

Organ and tissue transplant services are covered when the transplant is likely to prolong life and restore a range of physical and social function to activities of daily living. All other medical and surgical therapies expected to affect short- and long-term survival must have been tried or considered.

Refer to the Hospital Reimbursement Appendix for information about MDHHS reimbursement for Transplant Services.

For other organ transplant services not described by a specific DRG, the hospital must provide a note/remark on the claim of the type of transplant (i.e., small bowel transplant) performed. All organ transplant claims suspend for manual review of documentation. A copy of the PA letter must be submitted with the claims. Providers must note "PA Letter submitted" in the Remarks section of the claim.

3.23.A. COVERAGE CRITERIA

For purposes of this coverage, the term 'organ' is defined as kidney, liver, heart, lung, pancreas, intestine (including the esophagus, stomach, small and/or large intestine, or any portion of the gastrointestinal tract), any vascularized composite allograft, or other organ defined in the National Organ Transplant Act of 1984, as amended, and hematopoietic stem/poietic stem/progenitor cells, cornea, bone and skin. The following criteria must be satisfied for the coverage of organ transplant services:

- Transplant services meet the requirements of Section 1138(B) of the Social Security Act, hospital protocols for organ procurement, Food and Drug Administration regulations, standards for organ procurement agencies, and transplant services as defined under State law where applicable.
- In making the selection of beneficiaries undergoing the transplant procedure, similarly-situated individuals are treated alike.
- Transplant services must be reasonable in their amount, duration, and scope to achieve their purpose.

Organ and tissue transplant services, including inpatient and outpatient, pre- and post-operative medical, surgical, hospital, physician, behavioral health, and related transportation services, are covered for eligible beneficiaries when medically necessary.

Covered services include:

- Pre-operative care, including required dental services to facilitate appropriate perioral health and hygiene
- Transplant care, including facility and professional fees
- Organ procurement fees, including donor fees
- Post-transplant care, including immunosuppressant drugs
- Psychological assessment
- Living donor expenses provided throughout the procurement process

Medicaid Provider Manual

3.23.B. GENERAL REQUIREMENTS FOR TRANSPLANT PROGRAMS

Transplant services for organs defined in the National Organ Transplant Act of 1984, as amended, must be provided in a facility:

- That is a member of the Organ Procurement and Transplantation Network (OPTN) where applicable to the transplanted organ.
- For heart, lung, liver, and bone marrow transplants, has a current and approved Michigan Certificate of Need.

3.23.C. ORGAN SPECIFIC CRITERIA

The following organ-specific criteria lists program and prior authorization (PA) requirements. Other organ transplants may be covered with PA on an individual basis when the services performed are evidence-based and provided within generally accepted standards of medical practice. Combination of multiple organ transplantations will be considered on an individual basis and requires PA.

NOTE: Medicaid Health Plans and Integrated Care Organizations may develop PA requirements, utilization management, and review criteria that differ from Medicaid requirements. Beneficiaries who are enrolled in a Medicaid Health Plan or Integrated Care Organization must follow the plan's PA procedures to obtain approval for organ transplants.

Organ	Medical Necessity Criteria	Approval Duration	Required Documentation
Heart (May be done in combination with lung transplant)	End-stage heart disease not remediable by more conservative measures and amenable to surgical intervention, and diagnoses for which transplant provides best therapeutic potential.	<ul style="list-style-type: none">▪ Initial authorization: 1 year▪ Continuation of authorization: Request extended prior authorization as needed, and submitted with:<ul style="list-style-type: none">➢ Updated medical documentation➢ Updated psychological/social work assessment	<ul style="list-style-type: none">• Completed, signed, and dated Practitioner Special Services Prior Approval – Request/Authorization (MSA-6544-B) form. 3.23.D. PRIOR AUTHORIZATION

Prior authorization (PA) is required for beneficiary, donor, and potential donor services related to all organ transplants except cornea and kidney transplants. If transplantation of additional organ(s) is to occur during the same operative session as a cornea or kidney transplant, PA is required.

PA for transplant services, where applicable, is reviewed on a case-by-case basis. Approval is based on critical medical need for transplantation and a maximum likelihood of successful clinical outcomes with consideration for the following:

Medicaid Provider Manual

- All other medical and surgical therapies that might be expected to affect short- and long-term survival must have been tried or considered.
- The beneficiary is not in an irreversible terminal state and the transplant is likely to prolong life and/or restore a range of physical and social function to activities of daily living.

If the transplant occurs at a Medicaid-enrolled, in-state hospital, only the transplant services require PA. If the transplant is to be performed at an out-of-state hospital, both the psychosocial assessment and the transplant must be separately prior authorized.

In the event the organ transplantation is unable to be secured within the prior authorized timeframe, a request for continued authorization may be submitted and must include updated documentation. A Prior Authorization Certification Evaluation Review (PACER) for the hospital admission is still required per current policy. (Refer to the Hospital Chapter for more information.)

3.23.D.1. PSYCHOSOCIAL ASSESSMENT

For those transplants requiring PA, prior to the organ transplant, the beneficiary must have a psychosocial assessment at a qualified transplant center. The assessment is conducted to assist in determining a beneficiary's psychological and social readiness for the demands and stresses associated with transplant surgery, recovery, and rehabilitation. When the psychosocial assessment indicates the beneficiary may require additional supports to overcome perceived or identified challenges during the transplant process, MDHHS will require additional information to determine the beneficiary's ability to successfully achieve the necessary treatment and healthcare requirements pre-/post-transplant.

If the transplant center determines the beneficiary is a transplant candidate, the attending physician must submit the results from the psychosocial assessment and medical evaluation with the PA request to the MDHHS Program Review Division for evaluation by the Office of Medical Affairs (OMA). Requests for beneficiaries with Children's Special Health Care Services (CSHCS)-only coverage must also be submitted to the Program Review Division.

(Refer to the General Information for Providers chapter, Children's Special Health Care Services chapter, and the Directory Appendix for additional language and webpage location of Fee-for-Service Medicaid Prior Authorization Organ Transplant Criteria.)

3.23.D.2. THIRD PARTY LIABILITY (OR COORDINATION OF BENEFITS)

PA is not required if Medicare makes payment and Medicaid liability is limited to coinsurance and deductible. If a Medicare application is pending, the provider must indicate that on the PA request and notify MDHHS when the determination is made. All other insurance resources must be exhausted before Medicaid is billed. The denial notice(s) must be submitted with the claim. (Refer to the Coordination of Benefits chapter for additional policy on other insurance.)

3.23.E. DONOR AND DONOR SEARCH

Medically necessary expenses incurred by a Medicaid-eligible or non-eligible living donor that are directly associated with a Medicaid-covered transplant may be covered. The donor must exhaust all possible insurance sources before Medicaid is billed for the services.

Covered services include:

- Evaluation to determine if the person is a candidate for living donation
- Donation surgery
- Post-operative care through the procurement process
- Transportation and lodging for related medical services
- Paired organ donation

Expenses incurred for complications that arise with respect to the donor are covered only if they are directly and immediately attributed to the organ transplant surgery. Should the Medicaid-covered beneficiary expire or loses Medicaid eligibility, donor services will continue to be covered.

When the donor search does not result in an organ acquisition and transplant, MDHHS reimburses for a donor search and related charges when billed as an outpatient service. Providers are required to submit a copy of the PA letter for the transplant with the claim and include a comment on the claim that the donor search was unsuccessful.

If the beneficiary is Medicaid-eligible and the donor is not Medicaid-eligible, providers must bill all services under the beneficiary's ID Number and provide complete documentation. If the donor and beneficiary are both Medicaid-enrolled, providers must bill the services under their respective Medicaid ID numbers.

3.23.F. MEDICAID ORGAN DONOR FOR NON-MEDICAID RECIPIENT

When a Medicaid beneficiary is an organ donor for a non-Medicaid enrolled recipient, the acquisition of the organ is the responsibility of the recipient's health insurance. (Refer to the Billing & Reimbursement chapters for additional billing information.)

3.23.G. TRANSPORTATION AND LODGING

MDHHS reimburses for transportation and lodging expenses associated with the evaluation and transplant for the qualified organ recipient and one accompanying individual (e.g., spouse, parent, guardian).

(Refer to the Non-Emergency Medical Transportation Chapter for further information.)

3.24 OUTPATIENT OBSERVATION SERVICES

Observation is a defined set of clinically appropriate specific services that include ongoing short-term treatment, assessment and reassessment before deciding whether a beneficiary requires further

treatment as a hospital inpatient or discharge from the outpatient hospital. Observation services must also be reasonable and necessary to be covered.

MDHHS follows Medicare's coverage and reimbursement policies related to observation services.

3.25 PERSONAL ITEMS

Personal comfort and convenience items (e.g., toiletries, slippers, hospitality kits, etc.) cannot be billed to MDHHS.

3.26 PREADMISSION DIAGNOSTIC SERVICES

MDHHS follows Medicare policy for all preadmission diagnostic services and other preadmission services (outpatient services treated as inpatient) with a few exceptions in compliance with the law.

All non-diagnostic services rendered in the three-day window prior to the inpatient hospital admission may not be billed separately and must be bundled into the inpatient stay, unless the hospital can document they are unrelated services. MDHHS aligns with Medicare billing guidelines.

3.27 RADIOLOGY

MDHHS covers Medicaid enrolled hospitals for the following medically-necessary radiology services, including diagnostic imaging and radiation therapy and other imaging services:

- Necessitated by injury or disease, including benign or malignant conditions;
- Needed to diagnose a specific condition, illness, or injury; and
- Ordered by physicians (MD or DO), physician assistants, podiatrists, dentists, or advanced practice registered nurses.

The medical record must contain documentation of medical necessity to support all radiology services billed.

Reimbursement to the inpatient hospital is through the DRG payment.

Reimbursement for outpatient services follows Medicare Outpatient Hospital Prospective Payment System (OPPS) rules and includes the use of the facility, equipment, supplies, and attendant personnel required to provide the service. Prior authorization may be required. Refer to the CHAMPS Code Rate and Reference tool for guidance.

MDHHS reimburses for diagnostic imaging and radiation therapy services, including:

Computerized Axial Tomography (CT) Scanning	CT scanning is not covered for routine screening, nonspecific diagnoses, or in situations where less costly diagnostic methods are appropriate. CT scanning procedures must be provided on equipment that has an approved Certificate of Need (CON) on file with MDHHS.
Radiation Therapy	Treatment must be provided on equipment and in locations that meet Federal and State regulatory requirements.

Medicaid Provider Manual

Ultrasonography	<p>Ultrasound procedures are reimbursed when there is clinical evidence in the beneficiary's record to substantiate the medical need for such services. Ultrasound procedures are generally not covered when used as screening procedures or on a routine basis.</p> <p>When billing two ultrasound codes, the diagnosis must reflect the medical need for two procedures.</p> <p>Claims for diagnostic ultrasound procedures that are performed more than once must be documented for medical necessity. Documentation with the claim should clearly state the reason for the repeat procedure. Claims are rejected if the documentation does not support the need for the repeat diagnostic procedure.</p>
------------------------	--

3.28 REHABILITATION SERVICES

MDHHS follows Medicare's coverage and reimbursement policies related to Cardiac Rehabilitation (CR), Intensive Cardiac Rehabilitation (ICR), and Pulmonary Rehabilitation (PR).

MDHHS reimburses covered services for CR and ICR services for beneficiaries with chronic and specific medical (diagnosis code specific) conditions, respectively. Hospitals and physicians, any combination of services, may provide the rehabilitation sessions. ICR programs must be approved and certified.

MDHHS reimburses covered services for PR for beneficiaries with obstructive pulmonary disease and other specific medical diagnosis.

3.29 STERILIZATION

MDHHS covers sterilization procedures when specific requirements are met. A sterilization procedure is defined as any medical procedure, treatment, or operation for the sole purpose of rendering an individual (male or female) permanently incapable of reproducing. Surgical procedures performed solely to treat an injury or pathology are not considered sterilizations under Medicaid's definition of sterilization, even though the procedure may result in sterilization (e.g., oophorectomy). The physician is responsible for obtaining the signed Consent for Sterilization (MSA-1959/HHS-687). (Refer to the Forms Appendix for a sample form and to the Directory Appendix for website information.)

Sterilizations are reimbursed only if:

- The beneficiary is at least 21 years of age at time of informed consent.
- The beneficiary is not legally declared to be mentally incompetent.
- The beneficiary is not institutionalized in a corrective, penal, or mental rehabilitation facility.
- Informed consent is obtained.
- Informed consent is not obtained while the beneficiary is in labor or childbirth; seeking to obtain or obtaining an abortion; or under the influence of alcohol or other substances that affect the beneficiary's state of awareness.

- Informed consent must be obtained not less than 30 days nor more than 180 days prior to sterilization.

The only exception is in the case of premature delivery or emergency abdominal surgery. If the premature delivery or emergency abdominal surgery occurred before the 30-day waiting period is over, at least 72 hours must have passed between the time of obtaining informed consent and the sterilization procedure.

- In some cases of premature delivery, informed consent must have been given at least 30 days before the expected delivery date. The consent form must indicate the expected date of delivery.
- In cases of abdominal surgery, the emergency nature of the surgery must be clearly identified, e.g., diagnosis, physician's statement, or hospital summary. The nature of the emergency must be included on the consent form.

Federal regulations require that the completed MSA-1959/HHS-687 must be submitted to MDHHS before reimbursement can be made for any sterilization procedure. A copy must be attached to the claim form unless submitted via fax prior to filing the claim. MDHHS allows for submission of MSA-1959/HHS-687 forms via fax to encourage electronic billing and reduce administrative burden. This process can also pre-confirm the acceptability of the completed consent form and reduce costly claim rejections. (Refer to the Billing & Reimbursement for Professionals Chapter of this manual for information regarding the completion and submission of the MSA-1959/HHS-687.

3.30 SURGERY

MDHHS reimburses for surgeries performed in an inpatient hospital through the DRG payment.

When an ambulatory surgery is performed in the inpatient hospital setting, the physician/dentist must provide exception rationale justifying the need for an inpatient setting. Acceptable rationale includes:

- A medical condition that requires prolonged postoperative observation by skilled medical personnel (e.g., heart disease, severe diabetes);
- A pre-existing condition that significantly increases the risk of using anesthesia;
- The beneficiary has been admitted to a hospital for another procedure or condition, and the surgeon determines that additional surgical procedures are necessary;
- An unrelated procedure is being done simultaneously which, by itself, requires hospitalization;
- Another surgical procedure is expected to follow the initial procedure (e.g., gynecological laparoscopy followed by an oophorectomy);
- Technical difficulties, as documented by admission or operative notes; or
- Adequate outpatient facilities are not available within a reasonable distance (i.e., 40 miles) requiring the surgery to be rendered on an inpatient basis. In this case, MDHHS allows a one-day inpatient hospital stay, unless a longer stay is medically necessary.

If the physician planned to perform the surgery on an outpatient basis, but more extensive surgery was needed or complications developed and the beneficiary had to be admitted, a Prior Authorization Certification Evaluation Review (PACER) number is not needed for the admission. This type of admission is considered urgent or emergent. The need for the admission is, however, subject to post payment review by MDHHS.

MDHHS follows Medicare's Inpatient Only policy for outpatient surgeries.

MDHHS covers a second surgical opinion if the beneficiary or the physician/dentist requests one.

3.30.A. OPERATING ROOM

Inpatient coverage and reimbursement is through the DRG payment.

Outpatient providers must bill the appropriate HCPCS/CPT support code(s) operating room services and surgical supplies. The main payment methodology for the OPPS is the APC which is used by Medicare. Per Federal Regulations, the MDHHS OPPS uses Medicaid NCCI and Medically Unlikely Edit (MUE) values for OPH claims processing. Medicaid NCCI and MUE values are reviewed with the quarterly file updates.

3.30.B. RECOVERY ROOM

MDHHS policy covers routine supplies, anesthesia, and recovery room use. Most drugs are considered to be an integral part of a surgical procedure. Payment for these items is packaged into the APC payment for the surgical procedure.

Inpatient coverage and reimbursement is through the DRG payment.

Outpatient providers must bill appropriately for the Recovery Room. MDHHS follows Medicare's coverage and reimbursement policies for outpatient providers.

3.30.C. COSMETIC SURGERY

Hospital charges related to cosmetic surgery are not reimbursable without PA for the surgery. The physician/dentist must furnish the hospital with a copy of the PA letter for the surgery, as well as the PACER number for the admission.

3.31 OCCUPATIONAL THERAPY

Occupational Therapy services provided during an inpatient stay do not require PA for reimbursement. Refer to the Standards of Coverage and Service Limitations Section of the Therapy Services Chapter for criteria.

Refer to the Standards of Coverage and Service Limitations Section of the Therapy Services Chapter for therapy provided in the outpatient hospital setting. The MDHHS OPPS aligns as closely as possible with Medicare's billing and coverage guidelines for "sometimes therapy" services that may be reimbursed as non-therapy services for hospital outpatients. Refer to the therapy codes and their respective designations used for therapy services (i.e., "always therapy" and "sometimes therapy") found on the CMS website. (Refer to the Directory Appendix for website information.)

3.32 PHYSICAL THERAPY

Inpatient hospital physical therapy does not require PA for reimbursement. Refer to the Therapy Services Chapter of this manual for standards of coverage and service limitations for therapy provided in the outpatient hospital setting.

The MDHHS OPPS aligns as closely as possible with Medicare's billing and coverage guidelines for "sometimes therapy" services that may be reimbursed as non-therapy services for hospital outpatients. Refer to the therapy codes and their respective designations used for therapy services (i.e., "always therapy" and "sometimes therapy") found on the CMS website. (Refer to the Directory Appendix for website information.)

3.33 THERAPY, SPEECH-LANGUAGE PATHOLOGY

Speech-language pathology services provided during an inpatient admission do not require PA.

Refer to the Therapy Services Chapter of this manual for standards of coverage and service limitations for therapy provided in the outpatient hospital setting. The MDHHS OPPS aligns as closely as possible with Medicare's billing and coverage guidelines for "sometimes therapy" services that may be reimbursed as non-therapy services for hospital outpatients. Refer to the therapy codes and their respective designations used for therapy services (i.e., "always therapy" and "sometimes therapy") found on the CMS website. (Refer to the Directory Appendix for website information.)

3.34 TELEMEDICINE

A hospital can be either an originating or distant site for telemedicine services. Refer to the Billing & Reimbursement for Institutional Providers Chapter for specific billing instructions. Refer to the Telemedicine Chapter for additional information regarding telemedicine services.

Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.

3.35 WEIGHT REDUCTION

MDHHS policy covers obesity treatment when done for the purpose of controlling life-endangering complications such as hypertension and diabetes. This does not include treatment specifically for obesity, weight reduction and maintenance alone. The physician must request PA and document that other weight reduction efforts and/or additional treatment of conservative measures to control weight and manage the complications have failed.

Medicaid Provider Manual

The request for PA must include:

- The medical history;
- Past and current treatment and results;
- Complications encountered;
- All weight control methods that have been tried and failed; and
- Expected benefits or prognosis for the method being requested.

If surgical intervention is desired, a psychiatric evaluation of the beneficiary's willingness/ability to alter their lifestyle following surgical intervention must be included.

Mail requests to Office of Medical Affairs (OMA). (Refer to the Directory Appendix for contact information.)

If the request is approved, the provider receives an authorization letter for the service, including billing instructions. A copy of the authorization letter must be attached to all claims submitted to MDHHS for weight reduction services.

SECTION 4 – UTILIZATION REVIEW

4.1 NONCOVERED ADMISSIONS

For Medicaid reimbursement, all inpatient admissions must be medically necessary and appropriate. MDHHS does not cover inpatient hospital admissions for the sole purpose of:

- Cosmetic surgery (unless prior authorized)
- Custodial or protective care of abused children
- Diagnostic procedures that can be performed on an outpatient basis
- Laboratory work, electrocardiograms (ECGs), electroencephalograms (EEGs), diagnostic x-rays
- Observation
- Occupational therapy (OT)
- Patient education
- Physical therapy (PT)
- Routine dental care
- Routine physical examinations not related to a specific illness, symptom, complaint, or injury
- Speech pathology
- Weight reduction; weight control (unless prior authorized)

Inpatient claims with discharge date prior to October 1, 2014 where that stay has been denied as inappropriate or unnecessary may not be resubmitted to MDHHS as outpatient charges. Charges resubmitted as outpatient charges are monitored, and any payment made may be recovered during a post-payment audit. Any accommodations or ancillary services provided during nonallowable admissions or parts of stays will not be reimbursed.

Medically inappropriate or unnecessary admissions claims with dates of discharge on or after October 1, 2014 may be resubmitted as outpatient claims (Type of Bill 013x) for all outpatient services and any inpatient ancillary services performed during the inpatient stay.

Hospitals may not bill beneficiaries for any medical charges for goods and services provided during a nonallowable admission. The beneficiary is assumed to be following the physician's advice.

4.2 INPATIENT AND OUTPATIENT POST-PAYMENT REVIEWS

MDHHS and/or its audit contractor will perform automated reviews and medical record reviews on inpatient and outpatient services that have been paid. An automated review is a re-examination of a claim payment at the system level. These reviews will focus on errors in pricing, coverage, coding determinations and payment of duplicate claims. A medical record review is a more comprehensive comparison of a hospital's Medicaid claims against the hospital's medical records.

The objective of the MDHHS post-payment review process is to ensure that MDHHS reimbursement is for medically necessary care provided in the appropriate setting, that diagnostic and procedural information is valid, and that the care rendered meets current clinical and quality standards of practice. Cases are

Medicaid Provider Manual

reviewed using Medicaid-approved Severity of Illness/Intensity of Services (SI/IS) criteria, clinical judgment and generic quality screens.

All reviews include consideration of medical necessity, appropriateness of setting, coding validity/accuracy, and the quality and intensity of care provided to the beneficiary. The audit will also ensure that the quality and intensity of hospital services conform to current and acceptable standards of medical practice and Medicaid policies, procedures, and coding guidelines.

4.3 CONFIDENTIALITY

As an agent of the State, the MDHHS audit contractor may access all records related to care provided to Medicaid beneficiaries and is subject to the same state and federal confidentiality requirements as Medicaid staff. The failure of a hospital to make all records available to the contractor will result in denial of that case and subjects that hospital to Medicaid participation sanctions.

SECTION 5 – DISCHARGE PLANNING

As part of utilization review, the hospital should consider various alternatives for care of the beneficiary through discharge planning. The medical and social services personnel of the hospital should assist in this effort. If so requested by the hospital, the local MDHHS office assists in relocating the beneficiary. The following subsections explain possible alternatives for care.

5.1 HOME HELP

The beneficiary is able to remain in their own home. Home Help providers assist the beneficiary with activities of daily living (ADL), instrumental activities of daily living (IADL), and complex care tasks. Home Help, Home Health, Home for the Aged, Adult Foster Care, and MI Choice Waiver services may be provided singly or in combination (excluding the combination of Home Help and MI Choice Waiver services) as defined in Medicaid policy.

5.2 HOME HEALTH

The beneficiary resides in their own home or other place of residence (e.g., foster care, home for the aged), is under a physician's (MD, DO) care, and requires intermittent nursing care for a specified period of time. Home Help, Home Health, Home for the Aged, Adult Foster Care, and MI Choice Waiver services may be provided singly or in combination as defined in Medicaid policy.

5.3 HOME FOR THE AGED

The beneficiary (age 62 or older) receives supervision and non-nursing care in a licensed home. Home Help, Home Health, Home for the Aged, Adult Foster Care, and MI Choice Waiver services may be provided singly or in combination, as defined in Medicaid policy.

5.4 ADULT FOSTER CARE HOME

The beneficiary is in a licensed home that provides supervision, assistance, protection, and personal care, in addition to room and board. This type of home does not provide continuous medical care. Home Help, Home Health, Home for the Aged, Adult Foster Care, and MI Choice Waiver services may be provided singly or in combination, as defined in Medicaid policy.

5.5 HOME AND COMMUNITY BASED WAIVER FOR THE ELDERLY AND DISABLED (MI CHOICE WAIVER PROGRAM)

The beneficiary must meet the eligibility criteria in the Michigan Medicaid Nursing Facility Level of Care Determination and require two waiver services, one of which must be Supports Coordination. Referrals are made to regional waiver providers who are responsible for screening and assessing the beneficiary for waiver eligibility. Once determined eligible, services are provided in the beneficiary's home to help the beneficiary remain as independent as possible. These services may include skilled nursing, respite care, counseling, etc.

Home Help, Home Health, Home for the Aged, Adult Foster Care, and MI Choice Waiver services may be provided singly or in combination, as defined in Medicaid policy.

Michigan Medicaid Nursing Facility Level of Care Determination

The Michigan Medicaid Nursing Facility Level of Care Determination form must be completed for every Medicaid beneficiary prior to admission to the MI Choice Waiver. The MI Choice Waiver program agent must verify beneficiary appropriateness for services by completing the electronic web-based version of the form. Beneficiaries who do not demonstrate functional/medical eligibility through the electronic web-based tool are not eligible for the MI Choice Waiver Program.

Information regarding the Michigan Medicaid Nursing Facility Level of Care Determination process, the form, and the Field Definition Guidelines are on the MDHHS website. (Refer to the Directory Appendix for website information.)

While the MI Choice Waiver agent is the actual entity that must complete and submit the form, hospitals are encouraged to assess a beneficiary's functional/medical eligibility for the MI Choice Waiver using a copy of the form. A hospital may also use the Telephone Intake Guidelines to conduct an initial assessment of potential eligibility for the program. The Guidelines are also available on the MDHHS website.

5.6 PROGRAM OF ALL-INCLUSIVE CARE FOR THE ELDERLY (PACE)

The Michigan Medicaid Nursing Facility Level of Care Determination (LOCD) must be completed for every Medicaid beneficiary prior to admission to the PACE. The PACE agent must verify beneficiary appropriateness for services by completing the online version of the LOCD. Beneficiaries who do not demonstrate functional/medical eligibility through the online LOCD are not eligible for PACE.

Information regarding the LOCD process, the LOCD assessment, and the LOCD Field Definition Guidelines is on the MDHHS website. (Refer to the Directory Appendix for website information.)

While the PACE agency is the actual entity that must complete and conduct the online LOCD, hospitals are encouraged to assess a beneficiary's functional/medical eligibility for PACE using a copy of the LOCD. A hospital may also use the Telephone Intake Guidelines. The Guidelines are also available on the MDHHS website.

5.7 PRIVATE DUTY NURSING

The beneficiary requires more individualized and continuous care than is available from a visiting nurse or routinely provided by the nursing staff of a hospital or skilled nursing facility. Private duty nursing (PDN) enables the beneficiary to remain in their home. This service is a benefit for beneficiaries under age 21.

If the beneficiary is enrolled in or receiving case management services from one of the following programs, the applicable program authorizes the PDN:

- Habilitation Supports Waiver (the Community Mental Health Services Program) and over age 21
- Home and Community-Based Services Waiver for the Elderly and Disabled (the MI Choice Waiver)

For a Medicaid beneficiary who is not receiving services from one of the above programs, the Program Review Division reviews the request for authorization and authorizes the services if the medical criteria and general eligibility requirements are met.

Medicaid Provider Manual

The Private Duty Nursing Prior Authorization – Request for Services form (MSA-0732) must be submitted when requesting PDN services for persons with Medicaid coverage. A copy of the form is provided in the Forms Appendix and is also available on the MDHHS website. (Refer to the Directory Appendix for website information.) This form is not to be used for beneficiaries enrolled in, or receiving case management services from, the Children's Waiver, Habilitation Supports Waiver, or MI Choice Waiver. Private Duty Nursing is not a benefit under CSHCS. Individuals with CSHCS coverage may be eligible for PDN under Medicaid.

For beneficiaries age 21 and older, this service is a waiver service that may be covered for qualifying individuals enrolled in the MI Choice Waiver or the Habilitation Supports Waiver.

5.8 NURSING FACILITY

If the beneficiary requires less than acute, continuous medical care, a nursing facility (NF) may be appropriate. This includes a nursing home, medical care facility, or hospital long-term care unit. The Beneficiary Eligibility Chapter of this manual contains information about the facility admission and discharge process. (Any other alternatives for care (e.g., Home Help) may not be provided to the beneficiary while they are in the nursing facility.)

Medicaid's reimbursement (per diem rate) to a nursing facility includes non-emergency transport of beneficiaries being admitted to a nursing facility from the hospital setting.

There are necessary components for determining eligibility for Medicaid nursing facility reimbursement.

- A physician-written order for nursing facility admission is required. By renewing orders, the physician certifies the need for continuous nursing facility care. The order must be signed and dated by the physician. A stamped signature is not acceptable.
- With the exception of beneficiaries 21 years of age or under residing in a psychiatric facility, a physician (MD or DO) must approve a beneficiary's need for long-term care not more than 30 calendar days prior to the beneficiary's admission to a nursing facility.
- Verification of Medicaid financial eligibility for nursing facility care as determined by MDHHS.
- A Pre-admission Screening/Annual Resident Review (PASARR) process must be performed prior to admission to a nursing facility. The purpose of the screening is to prevent placement of beneficiaries with mental illness, intellectual/developmental disability or a related condition into a nursing facility unless their medical needs clearly indicate that they require the level of care provided by a nursing facility. Level I screening is documented on the Preadmission Screening (PAS)/Annual Resident Review (ARR) (Mental Illness/Intellectual/Developmental Disability/Related Conditions Identification) form (DCH-3877). The Level I screening is part of the hospital discharge planning process and must be completed by a registered nurse, licensed Bachelor's or Master's Social Worker, licensed professional counselor, psychologist, physician's assistant, nurse practitioner or physician.

The PASARR process is not required when:

- An individual is admitted to an Intermediate Care Facility for Individuals with Intellectual Disabilities (ICF/IID).

Medicaid Provider Manual

- An individual is admitted to, and residing in, a hospital swing bed. However, the PASARR process must be completed prior to admission if the individual transfers to a nursing facility.
- A resident is readmitted to a nursing facility after a hospital stay. If the Annual Resident Review date occurs during a period of hospitalization, the screening must be completed within 30 days of admission or readmission to the nursing facility.

All individuals identified by Level I screening as possibly having a mental illness, intellectual/developmental disability or a related condition (a "yes" response to any question on the DCH-3877) must receive a Level II evaluation, unless it is documented that they meet one of the exemption criteria outlined on the Mental Illness/Intellectual/Developmental Disability/Related Condition Exemption Criteria Certification form (DCH-3878) or MDHHS/CMHSP finds that the individual does not meet the criteria for a serious mental illness under the PASARR provisions.

(Refer to the Forms Appendix for a copy of the forms.)

- A Michigan Medicaid Nursing Facility Level of Care Determination (LOCD) must be completed for every Medicaid beneficiary prior to admission to a nursing facility. The nursing facility must verify beneficiary appropriateness for nursing facility care by completing the online version of the LOCD. Beneficiaries who do not demonstrate functional/medical eligibility through the online LOCD are not eligible for nursing facility care. Refer to the Coverages portion of the Nursing Facility Chapter for additional information regarding the LOCD.

While the nursing facility is the actual entity that must complete and submit the LOCD, hospitals are encouraged to assess a beneficiary's functional/medical eligibility for nursing facility care using a hard copy of the LOCD. A hospital may also use the Telephone Intake Guidelines. The Guidelines are also available on the MDHHS website.

5.9 SPECIAL NURSING FACILITY PLACEMENT

5.9.A. MEDICAID VENTILATOR-DEPENDENT CARE

There may be occasions when a beneficiary no longer requires acute hospital care but requires specialized care in a Ventilator Dependent Care Unit (VDCU). Medicaid authorizes admission of ventilator dependent Medicaid beneficiaries to hospital and nursing facility ventilator units with which it has agreements to provide VDCU services.

A request for placement must show that:

- The beneficiary is dependent on life-supporting mechanical ventilating equipment for at least six hours per day.
- The beneficiary stay normally meets or exceeds the hospital high-day outlier threshold for DRG 207.

Approval for admission to a VDCU will not be given for a beneficiary who is only on CPAP or BIPAP.

Medicaid Provider Manual

If a beneficiary has weaning potential or requires other rehabilitative services (in addition to the respiratory care) and is enrolled in a Medicaid Health Plan (MHP), the MHP is responsible for the first 45 days reimbursement in the post-acute setting. If there is no weaning potential and the beneficiary does not require rehabilitative services, disenrollment from the MHP may occur at the time the beneficiary is discharged from the hospital.

The MHP is responsible for initiating disenrollment of a beneficiary by submitting the Request for Disenrollment Long Term Care form (MSA-2007) to MDHHS.

In situations where a beneficiary cannot immediately be placed in a nursing facility or hospital VDCU, Medicaid will cover nursing days in the inpatient hospital. The hospital cannot charge a beneficiary the difference between the hospital's charge and the MDHHS payment for nursing days.

When the beneficiary is in the hospital setting because a nursing facility placement is not available, Medicaid will cover the ancillary services provided by the hospital.

If a beneficiary refuses an appropriate placement to a VDCU, the beneficiary is responsible for all hospital charges incurred after the date of referral.

To begin the prior authorization process once a VDCU has agreed to accept the beneficiary, the hospital discharge planner must provide the following documentation to the VDCU:

- History and physical from the current hospital admission;
- All consults from the current hospital admission;
- Any labs, diagnostic testing or procedures pertaining to or impacting the beneficiary's respiratory status; and
- Two to three days of current ventilator flow sheets.

For status of the authorization, the hospital discharge planner should contact the VDCU. The VDCU will initiate the actual prior authorization with Medicaid.

5.9.B. COMPLEX CARE

The Complex Care Prior Approval-Request/Authorization for Nursing Facilities form (MSA-1576) is used to request prior approval (PA) for the placement of a Medicaid beneficiary for whom placement from a hospital has been, or could be, hindered due to the cost and/or complexity of nursing care or special needs. Prior authorization covers an individually negotiated reimbursement rate for the placement. Special individualized placement requests and payment arrangements are based on medical necessity and/or service/supply needs exceeding those covered by Medicaid reimbursement for routine nursing facility care.

Medicaid Provider Manual

Examples include, but are not limited to:

- Ventilator dependent care (for nursing facilities not contracted with MDHHS to provide ventilator dependent care)
- Multiple skin decubiti utilizing several treatment modalities
- Tracheostomy with frequent suctioning needs
- Beneficiaries who require intensive nursing care or treatment

Program requirements:

- Referrals must come from the nursing facility.
- Hospitals must document that at least ten (10) Medicaid certified nursing facilities within a 50 mile radius of the hospital refused to admit the beneficiary due to the complexity of the patient's care needs.

If it appears that a beneficiary, upon discharge, will require intensive nursing care, the hospital's discharge planning coordinator should initiate nursing facility contact as early in the beneficiary's hospital stay as possible to ensure a smooth transition to the nursing facility.

5.10 DIAPERS FOR HOME USE

The hospital should contact the Volume Purchase Contract vendor to determine if the beneficiary is currently receiving diapers through the Volume Purchase Contract. (Refer to the Directory Appendix for contact information.) If so, then no further action is required.

For beneficiaries who are not currently receiving diapers, the hospital must obtain a complete physician prescription. The hospital must fax the complete prescription to the contract vendor no later than 72 hours prior to discharge. A complete prescription must include:

- Medical diagnosis of condition causing incontinence (primary and secondary diagnosis)
- Specific type of diaper to be dispensed
- Duration of need
- Quantity of diapers needed for the first 30 days after discharge
- Required beneficiary information:
 - Full name
 - Medicaid and Medicare identification numbers
 - Full home address, including city, state and zip code
 - Home phone number
 - Name and phone number of contact person other than beneficiary to ensure delivery if beneficiary is not present

Medicaid Provider Manual

Diapers are covered for individuals age three and older if the following criteria are both met:

- Beneficiary has a medical condition resulting in incontinence and has failed to respond to a bowel/bladder training program; and
- The medical condition being treated results in incontinence, and the beneficiary would not benefit from a bowel/bladder training program.

HOSPITAL REIMBURSEMENT APPENDIX

SECTION 1 – OUTPATIENT [CHANGES MADE 4/1/2025]

Reimbursement to outpatient hospitals, including off-campus satellite clinics, rural emergency hospitals, hospital-owned ambulance services, freestanding dialysis centers (ESRDs), comprehensive outpatient rehabilitation facilities (CORFs), and rehabilitation agencies for outpatient services is made in accordance with Medicaid's Outpatient Prospective Payment System (OPPS). Covered dental services provided in outpatient hospitals are reimbursed according to the Medicaid fee schedule. No facilities (i.e. critical access or children's hospitals) are excluded from Medicaid's Ambulatory Payment Classification reimbursement methodology. Payment made under OPPS is calculated utilizing current Medicare rates, with a MDHHS reduction factor applied, unless otherwise noted in this section. Separate OPPS reduction factors are established for Critical Access Hospitals (CAHs) and non-CAHs.

Dialysis services provided to an Emergency Services Only (ESO) beneficiary must include a diagnosis code for End Stage Renal Disease on Dialysis.

Reimbursement for outpatient hospital services will be monitored and adjustments will be made to the MDHHS reduction factor, as necessary, to ensure spending limits fall within the MDHHS appropriation. A wage index of 1.0 is applied for all hospitals. Medicare's APC weights are utilized. Services reimbursed at a percent of charges are paid a percentage of the individual hospital's charges for the service (i.e., pass-through payments). Updates of hospitals' Medicaid cost-to-charge ratios are done in conjunction with updates to the inpatient operating ratios. The default Medicaid cost-to-charge ratio is the average statewide Medicaid outpatient cost-to-charge ratio for out-of-state ratios. To maintain budget neutrality, CAHs that convert to rural emergency hospitals will retain the enhanced OPPS reduction factor for reimbursement. (revisions made 4/1/2025)

1.1 AMBULATORY PAYMENT CLASSIFICATION REIMBURSEMENT METHODOLOGY

The main payment methodology for the OPPS is the APC which is used by Medicare.

1.2 OUTPATIENT CODE EDITOR WITH AMBULATORY PAYMENT CLASSIFICATION

MDHHS uses Medicare's Outpatient Code Editor (OCE), including Medicaid National Correct Coding Initiative (NCCI), editing. Per Federal Regulations, the MDHHS OPPS uses Medicaid NCCI and MUE values for OPH claims processing. Medicaid NCCI and MUE values are reviewed with the quarterly file updates. The OCE is updated quarterly. The two main functions of the OCE are to identify errors and to assign APCs. In addition, the software performs the following functions when processing a claim:

- Edits a claim for accuracy of the submitted date;
- Assigns payment indicators;
- Determines if packaging is applicable;
- Determines the disposition of a claim based on generated edits;
- Computes discounts and outliers, if applicable;
- Determines payment adjustment, if applicable.

Medicaid Provider Manual

MDHHS uses proprietary edits that are not duplicated by the OCE to review beneficiary and provider eligibility, third party liability, quantity/frequency of services, diagnosis, and other information normally reviewed by the fiscal intermediary under the Medicare OPPS.

1.3 STATUS INDICATORS

MDHHS follows Medicare's single character status indicator assigned to each individual CPT or HCPCS code to identify if a code will be paid and how it will be paid.

For categories of codes that MDHHS covers differently than Medicare under its OPPS (wraparound codes), the following alpha-numeric status indicators are used.

MDHHS Specific Status Indicators

Status Indicator	Description	Comments
A1	MDHHS covered	
A2	Series-billed dialysis service (revenue codes 82x, 83x, 84x, 85x)	Paid based on associated MDHHS fee schedule
A3	Hospital-owned ambulance services	Paid based on associated MDHHS fee schedule
A4	Non-Medicare covered services (e.g., family planning, dental, sterilization, abortion, etc.)	Paid based on associated MDHHS fee schedule
A5	Non-Medicare covered adult vaccines	Paid based on associated MDHHS fee schedule
A6	Vaccines For Children	Zero payment; Vaccines For Children (VFC) program
A7	State Plan Reimbursement	
A8	Healthy Michigan Plan Only	
R1	MDHHS non-allowed item or service (e.g., aquatic therapy, infertility services, etc.)	Items, codes, and services that are not covered by MDHHS

1.4 PACKAGED/BUNDLED SERVICES

MDHHS follows Medicare guidelines for packaged/bundled service costs. Services having a status indicator of "N" are considered packaged or bundled into other services. The costs of these services are allocated to the APC but are not paid separately.

Reimbursement to hospitals for outpatient services is made in accordance with Medicaid's maximum fee screens, the hospital's usual and customary (U&C) charges, or Medicare's reasonable costs, whichever is less.

1.5 PAYMENT CALCULATION

Payments made under the MDHHS OPPS methodology are calculated utilizing the current Medicare conversion factors/rates with an MDHHS reduction factor (RF) applied to the calculated payment (Medicare fee x RF = Medicaid fee).

The MDHHS payment is the lesser of:

- the Medicaid fee screen/allowable amount, minus any Medicare or other insurance payments, and any applicable Medicaid copayment, patient-pay, and/or deductible; or
- (for fee schedule items) the provider's charge, reduced by any contractual adjustments, minus any Medicare or other insurance payments, and any applicable Medicaid copayment, patient-pay, or deductible amount; or
- the beneficiary's liability for coinsurance, copayments, and/or deductibles.

For claims when a provider bills charges less than the OPPS/APC amount for non-fee schedule items, the MDHHS payment liability is the APC amount minus any Medicare or other insurance payments up to the coinsurance, copayment, and/or deductible amount reported.

Additional billing and reimbursement information is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

1.6 DISCOUNTED PROCEDURES

MDHHS follows Medicare rules for discounting payment for multiple, bilateral or discontinued procedures (OPPS status indicator "T").

1.7 OUTLIER PAYMENTS [CHANGE MADE 4/1/2025]

MDHHS follows Medicare's APC outlier payment policy. The MDHHS reduction factor is not applied to outlier payments. Submitted charges are used for all lines on a claim, including the packaged lines, for outlier calculations. (text added 4/1/2025)

1.8 SERVICES PAID A PERCENT OF CHARGES [CHANGES MADE 4/1/2025]

Services that are paid a percent of charges are paid at a percentage of the hospital's charges for that service (e.g., pass-through payments). Each hospital's current Medicaid outpatient cost-to-charge ratio is used for the initial OPPS implementation. Updates of the Medicaid outpatient cost-to-charge ratios are done in step with inpatient operating ratio updates. For out-of-state hospitals, the default Medicaid cost-to-charge ratio is the average statewide Medicaid outpatient cost-to-charge ratio. The MDHHS reduction factor is not applied to services paid a percent of charge. (text added 4/1/2025)

1.9 PASS-THROUGH PAYMENTS

Pass-through payments are generally for new drugs, biologicals, radiopharmaceutical agents, and medical devices. Drugs and devices having a status indicator of "G" or "H" receive a pass-through payment. In some instances, the procedure code may have an APC code assigned. The MDHHS reduction factor is not applied to drugs or devices with a status indicator of "H".

1.10 FEE SCHEDULES

MDHHS utilizes Medicare fee schedules with the MDHHS reduction factor applied, except as described above.

SECTION 2 - INPATIENT

2.1 SERVICES INCLUDED IN THE INPATIENT PAYMENT

The following services are included in the inpatient payment:

- All routine services (e.g., room and board, nursing).
- All diagnostic/ancillary services (e.g., radiology, pharmacy, therapists, supplies, pathology).
- While a patient is in the inpatient setting, the facility charges for any services performed by persons or entities other than the patient's hospital (e.g., an independent lab, a second hospital where no transfer occurs) are covered in the payment to the patient's hospital and must not be billed separately. All charges must be included on the inpatient claim of the patient's hospital. Any payments due to the second party are the responsibility of the patient's hospital.
- All pathology services that are performed by the pathologist but do not directly relate to the specific patient's care.
- All emergency room services provided by the hospital that result in an inpatient admission to that hospital. All charges must be included on the inpatient claim.
- An orthosis or prosthesis that is required for inpatient treatment, a surgical postoperative procedure or as a routine service of the hospital should be included as a supply on the inpatient claim and is reimbursed under the appropriate DRG.

Examples of items that are included in the inpatient payment are:

- Pacemakers
- Hip replacements
- Made-to-measure braces for compression fractures
- Compression stockings (TED, Jobst)
- Halos
- Immediate post-surgical or early fitting of prosthetic devices, etc.

2.2 SERVICES EXCLUDED FROM THE INPATIENT PAYMENT

The following services are excluded in the inpatient payment:

- An orthosis or prosthesis that is required for rehabilitation and will be utilized after discharge, and/or is required to address a long term, lifetime, permanent need. An orthotist/prosthetist must bill these items separately to Medicaid. Prior authorization (PA) must first be obtained for appropriate procedure codes.
- Except as noted above, outpatient services may not be separately billed while a beneficiary is in the inpatient setting. All charges must be included on the inpatient claim.

- Any services that are covered by Medicaid and excluded from the inpatient payment may be separately billed if the provider of the service is properly enrolled in the program and a claim is submitted appropriately.

The following are examples of services excluded from the inpatient payment. This list may not be all-inclusive:

- Anatomic pathology services provided directly by a pathologist.
- Orthoses/prostheses required for rehabilitation that will be utilized after discharge, and/or are required to address a long term, lifetime, permanent need. Additional examples of items that are excluded from the inpatient payment are a knee-ankle-foot orthosis or an ankle-foot orthosis.
- Professional services (e.g., practitioner, dental, podiatric, optometric).
- Services provided by a certified nurse midwife (CNM).
- Services provided by a certified registered nurse anesthetist (CRNA).
- Ambulance services.

2.3 3M™ ALL PATIENT REFINED DIAGNOSIS RELATED GROUPS SYSTEM

Effective for inpatient discharges on or after October 1, 2015, the Medicaid diagnosis related grouper (DRG) reimbursement system uses the 3M™ All Patient Refined Diagnosis Related Groups (3M™ APR-DRG) system. The following sections apply to the 3M™ APR-DRG reimbursement system.

2.3.A. REIMBURSEMENT FOR MEDICAL AND SURGICAL HOSPITALS

2.3.A.1. DESCRIPTION OF MEDICAL/SURGICAL EPISODE FILE

The episode file is comprised of the underlying data used to calculate the statewide rate, relative weights, and alternate weights. The costs associated with episodes from the episode file are standardized as described below. The episode file is comprised of two years of Medicaid and Children's Special Health Care Services fee for service (FFS) paid claims and managed care encounters.

Each claim or encounter from the episode file is assigned a DRG value using the APR-DRG Grouper in effect nationally on October 1 of the applicable rate year. The data are adjusted to:

- Eliminate episodes for dual Medicare/Medicaid eligible beneficiaries, unless paid a full Medicaid DRG.
- Eliminate certain transplants and low day outlier episodes assigned to DRGs reimbursed by multiplying a hospital's operating cost-to-charge ratio by charges.
- Eliminate episodes without any charges or days.
- Assign alternate weights for neonatal services. Two sets of weights are calculated for the DRG classifications representing neonatal services (DRGs 580x-640x). These alternate weights are calculated based on episodes that are assigned to one of these DRGs and include charges for services in a Neonatal Intensive Care Unit (NICU). The

Medicaid Provider Manual

remaining claims assigned to these DRGs are used for the base weights. No other alternate weights are assigned.

- Limit episodes to those from Michigan hospitals, including hospitals that are no longer in operation (provided that hospital cost report data is available).
- Limit episodes to those with a valid discharge status.
- Eliminate episodes with a zero dollar Medicaid liability.
- Eliminate episodes that qualify for the Short Hospital Stay rate.
- Determine the low day trim point and average length of stay. (Refer to the Relative Weights section of the Reimbursement for Medical/Surgical Hospitals section of the State Plan for additional information.)
- Limit episodes ending in a transfer to another acute setting to those whose length of stay was at least equal to the published average length of stay for the DRG. (Since DRGs 580x and 581x are transfer DRGs, all transfer costs are included within those DRGs.)
- Inflate the first year of episodes to the second year through application of an inflation factor derived from IHS Global Insight.
- Recognize area cost differences by dividing the charges for each hospital by an area wage index. (Refer to the Area Wage Index section of the Reimbursement for Medical/Surgical Hospitals section of the State Plan for additional information regarding the area wage index.)
- Adjust charges for high cost outliers to remove the amount paid as an outlier. (Refer to the High Cost Outlier section of the Reimbursement for Medical/Surgical Hospitals section of the State Plan for additional information regarding cost outliers.)
- The adjusted cost for each episode is calculated by multiplying the adjusted charges for the episode by the inpatient operating cost-to-charge ratio. (Refer to the Cost-to-Charge Ratio section of the Reimbursement for Medical/Surgical Hospitals section of the State Plan for additional information regarding cost-to-charge ratios.)

2.3.A.2. STATEWIDE DRG RATES

Two statewide medical/surgical hospital DRG rates are developed by the state using the Episode File. For hospital DRG rate setting purposes, the medical/surgical Episode File is limited to those hospitals enrolled with the state as of October 1 of the applicable rate year. Two separate statewide rates are developed: one rate is developed for prospective payment system (PPS) hospitals and another rate is developed for hospitals designated as critical access by CMS as of October 1 of the applicable rate year. In the event a hospital status changes from PPS to critical access hospital (CAH), the state recognizes the hospital under CAH status as of the CMS effective date. The reverse is also true. If a hospital status changes from CAH to PPS, the state recognizes the hospital under PPS status as of the CMS effective date. Statewide rates are updated annually on October 1.

A budget neutrality factor is included in the hospital price calculation. Hospital prices are reduced by the percentage necessary so that total aggregate hospital payments using the new hospital prices and DRG relative weights do not exceed the total aggregate

Medicaid Provider Manual

hospital payments made using the prior hospital base period data and DRG Grouper relative weights. The estimate is based on one year's paid claims, including MHP encounter data with FFS rates applied. The calculated DRG prices are deflated by the percentage necessary for the total payments to equate to the amount paid prior to the change. Budget neutrality for CAHs is determined as a group, independent of PPS.

Hospitals' final DRG rates are calculated as follows:

- The case mix is calculated using the sum of all relative weights assigned to each hospital's claims during the base period, divided by the total number of episodes for the hospital during the same period.
- The case mix index adjusted cost for each hospital is summed.
- A hospital-specific standardized cost per discharge is computed.
 - Divide total adjusted costs by the total number of episodes.
 - Divide average costs by the case mix.
 - Multiply the result by the applicable inflation factor to bring costs to a common point in time. Costs are inflated through the rate period. For example, for FY 2015 rates, costs are inflated through September 30, 2016. Inflation factors are obtained from IHS Global Insight.
- The statewide rate per discharge is the weighted mean of all hospital-specific standardized costs.
- A rate adjustment is applied to designated level I and II trauma facilities.
- The statewide rate is adjusted by an Area Wage Index and Budget Neutrality Factor to determine the hospital's final DRG rate.

In developing the statewide DRG rate, the following data and calculations are used for each hospital:

- 1) Hospital's adjusted charges;
- 2) Inpatient cost-to-charge ratio;
- 3) Hospital's adjusted costs (line 1 x line 2);
- 4) Hospital's episodes;
- 5) Cost per discharge (line 3/line 4);
- 6) Hospital's case mix;
- 7) Standardized cost per discharge (line 5/line 6);
- 8) Establish statewide rate as weighted standardized cost per discharge $((\sum \text{line 7} \times \text{line 4}) / \sum \text{line 4})$;
- 9) Hospital's Area Wage Index;
- 10) Apply rate adjustment to designated level I and II trauma facilities;
- 11) Apply budget neutrality factor; and

- 12) Hospital's final DRG rate (line 8 x line 9 x line 10). The DRG rate is rounded to the nearest whole dollar amount.

The statewide rates are listed on the MDHHS website. (Refer to the Directory Appendix for website information.)

2.3.A.3. 3M™ APR-DRG RELATIVE WEIGHTS

Michigan-specific relative weights are developed utilizing the adjusted costs from the Episode File. The average cost for episodes within each DRG is calculated by dividing the sum of the costs for the episodes by the number of episodes within the DRG. The relative weight for each DRG is calculated by dividing the average cost for episodes within each DRG by the average cost per episode for all episodes. A table showing the relative weights, average lengths of stay, and low day outlier threshold for each DRG is available on the MDHHS website. (Refer to the Directory Appendix for website information.) Relative weights are updated annually on October 1.

The state establishes alternate weights for neonatal services from episodes that are assigned to one of the DRGs in the following range: 580x-640x. Effective, July 1, 2020, the NICU alternate weight reimbursement will apply to episodes with a DRG within 580x-640x and a minimum of one day with revenue code 0173 or 0174. Revenue codes reported should reflect the level of care provided to the patient in accordance with NUBC billing guidance. These weights are utilized for services rendered in a NICU. The remaining claims assigned to these DRGs are used for the base weights (non-alternate weights). No other alternate weights are assigned.

To ensure each relative weight adequately reflects resource utilization for a particular DRG in the state, the state requires that each DRG have a minimum of 10 episodes. If a DRG does not have at least 10 episodes, an alternative solution is applied as follows:

State-Specific Relative Weight Methodology:

- If the episode count for a DRG is 10 or more, use the relative weight setting methodology outlined. Otherwise:
 - For severity levels 1 through 3 where the targeted severity level is equal to n :
 - If the episode count for the next greater severity level is 10 or more, the following calculation is completed: $(\text{MI DRG Severity}_{n+1} \text{ Relative Weight}) \times (\text{National DRG Severity}_n \text{ Relative Weight}) / (\text{National DRG Severity}_{n+1} \text{ Relative Weight}) = (\text{MI Relative Weight Factor}_n)$
 - Otherwise, $(\text{National DRG Severity}_n \text{ Relative Weight}) \times (\text{MI Case Mix Factor}_n)$
 - For severity level 4:
 - If the episode count for the prior severity level is 10 or more, the following calculation is completed: $(\text{MI DRG Severity}_{n-1} \text{ Relative Weight}) \times (\text{National DRG Severity}_n \text{ Relative Weight}) / (\text{National DRG Severity}_{n-1} \text{ Relative Weight}) = (\text{MI Relative Weight Factor}_n)$
 - Otherwise, $(\text{National DRG Severity}_n \text{ Relative Weight}) \times (\text{MI Case Mix Factor}_n)$

Medicaid Provider Manual

- Where:
 - $(\text{MI Case Mix Factor}_n) = \frac{\text{sum of Michigan specific relative weights multiplied by the number of episodes if the number of episodes is 10 or more}}{\text{sum of National relative weights multiplied by the number of episodes if the number of episodes is 10 or more}}$
 - $(\text{MI Alternate Weight Case Mix Factor}) = \frac{\text{Average of (MI Alternate Weight DRG Severity)}}{(\text{MI DRG Severity Relative Weight})}$ for DRGs with an episode count of 10 or more.
- Further adjustments are necessary if the resulting adjustment described above is inconsistent with Michigan or National trends and data.
 - Example 1: If an episode count is between 10 and 20 and the alternate weight would be less than the standard relative weight, but other severity levels are not consistent with this, then apply the next severity level imputing method.
 - Example 2: If the episode count is between 10 and 20, the state may consider using the Alternate Weight Case Mix Factor applied to the National Alternate Weight if the alternate weight is not consistent with other severity levels of the same DRG.
 - All relative weights are subject to reasonableness testing.

Relative Weight Trim Points:

The following trim points are established for the relative weighting system. All relative weight trim points are subject to reasonableness testing.

- The low day trim point is used to determine whether an episode qualifies for a low day outlier and is established as follows.
 - If the episode count for a DRG is 10 or more, the low day trim point is set to the 3rd percentile of the length of stay for the DRG.
 - If the episode count for a DRG is less than 10, the low day trim point is set to the lesser of the national low day trim point or 3rd percentile of length of stay for the DRG.
 - If the episode count for a DRG is zero, the low day threshold is set to the national low day trim point for the DRG.
- The average length of stay (ALOS) is used to price claims episodes involving a transfer from a hospital and is established as follows.
 - If the episode count for a DRG is 10 or more, set the ALOS to the simple average length of stay for the DRG.
 - If the episode count for a DRG is less than 10, set the ALOS to the lesser of national ALOS or the simple average length of stay for the DRG.
 - If the episode count for a DRG is zero, set the ALOS to the national ALOS.

2.3.A.4. AREA WAGE INDEX

The area wage index described in this section is used to determine adjusted hospital costs as described in the Episode File section. In addition, it is used to adjust the statewide rate to recognize variances in area labor costs.

To calculate each hospital's area wage index, two years of Medicare-audited wage data, as published in the Medicare Inpatient Prospective Payment System (IPPS) Final Rule, are obtained for the most recent available hospital fiscal years. Contract labor costs, as defined by Medicare, are included in determining a hospital's wage costs. Hospitals are grouped by U.S. Census Core Based Statistical Areas (CBSAs) as determined by CMS for the Medicare program. Consistent with CMS, the cost report references are obtained from the Medicare Provider Manual, Worksheet S3, Part 3, Line 6 for wages and hours.

The following calculations are completed:

- Each hospital's wage costs are brought to a common point in time by multiplying the hospital's fiscal year end costs by inflation factors derived from IHS Global Insight and weighting factors.
- For hospitals with cost reporting periods ending other than the end of a quarter, the inflation update for the quarter in which the hospital's fiscal year ends is used.
- The cost reports do not differentiate salaries/hours by unit type.
- The wage adjustor is based on a two-year moving average with the most recent year weighted at 60 percent and the second year weighted at 40 percent.
- If two or more hospitals merge and are operating as a single hospital, salary and wages are computed using the combined cost report data from all hospitals involved in the merger. Salary data is inflated to a common point in time.
- The average wage for each CBSA is calculated with and without hospital reclassifications:
 - a) The average wage for each CBSA without reclassifications is determined. The statewide average wage for all hospitals in the state is calculated. Using these data, CBSA-specific area wage indices are calculated by dividing the average wage for the CBSA by the statewide average wage. This quotient is area wage index A.
 - b) The average wage for each CBSA with reclassifications is determined. Using these data and the statewide average wage for all hospitals in the state, CBSA-specific area wage indices are calculated by dividing the average wage for the CBSA by the statewide average wage. This quotient is area wage index B.
- For hospitals that did not reclassify:
 - If area wage index A is greater than one percent variation from its area wage index B, area wage index A will be used. Otherwise, area wage index B will be used.
- For hospitals that reclassified, area wage index B will be used.
- The state will apply a rural floor whereby no hospital will have an area wage index less than the rural index.

Medicaid Provider Manual

Only the labor share of the statewide rate is adjusted by the area wage index using the following formula:

$$\text{Medical/Surgical Area Wage Index Adjusted Rate} = 0.70 \times \text{Area Wage Index} + 0.30$$

2.3.A.5. COST-TO-CHARGE RATIO

The operating cost-to-charge ratios described in this section are used to determine adjusted hospital costs as described in the Episode File section. In addition, they are used to reimburse hospitals for transplant services, cost outliers and low-day outliers. The operating cost-to-charge ratios are updated annually on October 1 by rolling the data forward by one year.

The most recent two years of cost report data for hospitals are used to calculate hospital-specific operating cost-to-charge ratios. For example, for the one year rate that begins on October 1, 2015, data from cost reports with fiscal years ending between October 1, 2011 and September 30, 2013 are used. Data for the most recent year are weighted at 60 percent while data for the second previous year are weighted at 40 percent. Costs and charges for both FFS and managed care are combined so that a weighted operating cost-to-charge ratio is developed. Cost and charge data are inflated to a common point in time using inflation factors from IHS Global Insight. The cost-to-charge ratio will not exceed 1.0.

If two or more hospitals merge and are operating as a single hospital, a cost-to-charge ratio for the period is computed using the combined cost report data from all hospitals involved in the merger.

The operating cost-to-charge ratios are published on the MDHHS website. (Refer to the Directory Appendix for website information.)

2.3.A.6. SPECIAL CIRCUMSTANCES

Normal reimbursement for a medical/surgical inpatient hospital stay is equal to the applicable statewide rate multiplied by the DRG weight. However, for the following special circumstances, different reimbursement methodologies apply.

High Cost Outliers	<p>For unusually high cost stays, the State will use a special reimbursement methodology.</p> <p>An episode is a high cost outlier when costs (charges X the hospital's operating cost-to-charge ratio) exceed the computed cost threshold. Transplant claims cannot qualify as a high cost outlier.</p> <p>Reimbursement for cost outliers is dependent upon the cost threshold.</p> <p>The cost threshold is the greater of:</p> <ul style="list-style-type: none">▪ 2 x Hospital DRG Rate x Relative Weight (twice the regular payment for a transfer paid on a per day basis for episodes getting less than a full DRG); or
---------------------------	---

Medicaid Provider Manual

	<ul style="list-style-type: none"> ▪ \$35,000. <p>Cost outliers are reimbursed according to the following formula:</p> $(\text{Hospital DRG Rate} \times \text{Relative Weight}) + [(\text{Charges} \times \text{Operating Cost-to-Charge Ratio}) - (\text{Cost Threshold})] \times 85 \text{ percent} = \text{Reimbursement for Cost Outlier Claim}$
Low Day Outliers	<p>For services where the length of stay is less than the published low day threshold, reimbursement is charges multiplied by the individual hospital's operating cost-to-charge ratio, not to exceed the full DRG payment. Length of stay is calculated using the From and To dates of service. The specific low day outlier threshold for each DRG is listed on the MDHHS website. (Refer to the Directory Appendix for website information.)</p>
Transfers	<p>Payment to a hospital that receives a patient as a transfer from another inpatient hospital differs depending on whether the patient is discharged or is subsequently transferred again.</p> <ul style="list-style-type: none"> • <u>Payment to the Transferring Hospital</u> <p>Except in the cases where the DRG is defined as a transfer of a patient (for which a full DRG payment is made, plus an outlier payment, if appropriate) the transferring hospital is paid a DRG daily rate for each day of the patient's stay, not to exceed the appropriate full DRG payment, plus an outlier payment, if appropriate.</p> <ul style="list-style-type: none"> • <u>Payment to the Receiving Hospital</u> <p>If the patient is discharged, the receiving hospital is paid the full DRG payment, plus an outlier payment if appropriate.</p> <p>Reimbursement is based on discharge in the following situations. If the patient:</p> <ul style="list-style-type: none"> ➤ Is formally released from the hospital, or ➤ Is transferred to home health services, or ➤ Dies while hospitalized, or ➤ Leaves the hospital against medical advice, or ➤ Is transferred to a long-term care facility. <p>If the patient is transferred again, the hospital is paid as a transferring hospital.</p>
Readmissions	<p>Readmissions within 15 days for a related condition, whether to the same or a different hospital, are considered a part of a single episode for payment purposes.</p> <p>If the readmission is to a different hospital, full payment is made to the second hospital. The first hospital's payment is reduced by the amount paid to the second hospital. The first hospital's payment is never less than zero for the episode.</p> <p>Readmissions for an unrelated condition, whether to the same or a different hospital, are considered separate episodes for payment purposes.</p>

Medicaid Provider Manual

Transplant Services	<p>Transplant services are paid using the following formula:</p> $\text{Hospital Charges} \times \text{Hospital Operating Cost-to-Charge Ratio} = \text{Hospital Payment}$ <p>Transplant services are defined as claims which fall under the following DRGs:</p> <table border="1" data-bbox="505 474 1248 974"><thead><tr><th>DRG</th><th>Description</th></tr></thead><tbody><tr><td>001x</td><td>Liver Transplant and/or Intestinal Transplant</td></tr><tr><td>002x</td><td>Heart and/or Lung Transplant</td></tr><tr><td>006x</td><td>Pancreas Transplant</td></tr><tr><td>440x</td><td>Kidney Transplant</td></tr></tbody></table> <p>Organ acquisition within these DRGs is billed at acquisition cost and is reimbursed at 100% of acquisition cost.</p>	DRG	Description	001x	Liver Transplant and/or Intestinal Transplant	002x	Heart and/or Lung Transplant	006x	Pancreas Transplant	440x	Kidney Transplant
DRG	Description										
001x	Liver Transplant and/or Intestinal Transplant										
002x	Heart and/or Lung Transplant										
006x	Pancreas Transplant										
440x	Kidney Transplant										
Hospitals Outside Michigan	<p>Medical/surgical hospitals not located in Michigan are reimbursed under the DRG system. The DRG price is the statewide rate multiplied by an area wage index of 1.0. All other reimbursement policies apply.</p> <p>Hospitals that have charges that exceed \$250,000 during a single fiscal year (using the State of Michigan fiscal year – October 1st through September 30th) may be reimbursed the hospital's inpatient operating cost to charge ratio for those Michigan Medicaid DRGs reimbursed by percentage of charge. The hospital's chief financial officer must submit, and the Behavioral and Physical Health and Aging Services Administration (BPHASA) must accept, documentation stating the hospital's Medicaid cost to charge ratio in the state that the hospital is located. Once accepted, the hospital's actual cost to charge ratio is applied prospectively to those DRGs and claims subject to percentage of charge reimbursement using the Michigan DRG payment system.</p>										
New Hospitals	<p>A new medical/surgical hospital is one for which no Michigan Medicaid program cost or paid claims data exists during the period used to establish hospital rates or one which was not enrolled in the Medicaid program when hospital rates were last established. Hospitals that experience a change of ownership or that are created as the result of a merger are not considered new hospitals.</p> <p>The DRG rate for new general hospitals is the statewide rate multiplied by the applicable area wage index.</p>										

Long-Acting Reversible Contraception	Long Acting Reversible Contraceptives (LARCs) provided in the inpatient hospital setting immediately postpartum are excluded from the DRG payment. An additional payment for the LARC device will be made to a hospital when a LARC is provided immediately postpartum. Practitioners will receive payment for their professional services related to the immediate postpartum LARC insertion procedure when billed separately from the professional global obstetric procedure codes and the hospital facility. Costs associated with a LARC device are to be billed separately from the inpatient visit using the Medicaid fee schedule (insertion and device).
Rapid Whole Genome Sequencing	rWGS provided in the inpatient hospital setting prior to discharge is excluded from the DRG payment. An additional payment for the rWGS testing will be made to a hospital when clinical criteria are met and MDHHS authorization is obtained. Costs associated with the rWGS testing are to be billed separately from the inpatient visit using the 837P or CMS-1500 Professional claim format and are reimbursed according to the Medicaid laboratory fee screen.
Spinraza (Nusinersen)	Spinraza (Nusinersen) provided in the inpatient hospital setting is excluded from the DRG payment. An additional payment for medically necessary Spinraza will be made to a hospital when established clinical criteria is met. Costs associated with Spinraza are to be billed separately from the inpatient episode. Hospital reimbursement will be made according to the Medicaid fee schedule.
Outcomes-Based Contract Arrangements	Separate payment for drugs and therapeutics under an outcomes-based contract arrangement will be made to a hospital when established clinical criteria is met. Costs associated with these drugs and therapeutics are to be billed separately from the inpatient episode. Hospital reimbursement will be made according to the Medicaid fee schedule. Drugs and therapeutics that are carved out of the DRG will be published and maintained on the MDHHS billing and reimbursement webpage for Inpatient Hospitals. (Refer to the Directory Appendix for website information.)

2.3.B. REIMBURSEMENT FOR LONG TERM ACUTE CARE HOSPITALS (LTACHs) AND FREESTANDING REHABILITATION HOSPITALS/DISTINCT PART REHABILITATION UNITS

Episodes of care for LTACHs and Freestanding Rehabilitation Hospitals/Distinct Part Rehabilitation Units will be reimbursed using a statewide per diem rate.

2.3.B.1. DESCRIPTION OF LTACH AND FREESTANDING REHABILITATION HOSPITALS/DISTINCT PART REHABILITATION UNITS EPISODE FILE

The episode file is comprised of the underlying data used to calculate the statewide per diem rates. The costs associated with episodes from the episode file are standardized as described below. The episode file is comprised of two years of Medicaid and Children's Special Health Care Services FFS paid claims and managed care encounters.

The data is adjusted to:

- Eliminate episodes with any Medicare charges. (For dual Medicare/Medicaid eligible beneficiaries, only claims paid a full Medicaid payment are included.)
- Eliminate episodes without any charges or days.
- Eliminate episodes with a zero dollar Medicaid liability.

- Limit episodes to those from Michigan hospitals (provided that hospital cost report data is available).
- Limit episodes to those with a valid discharge status.

Total charges and days paid are summed by hospital.

The cost for each hospital is calculated by multiplying the charges for the hospital by the operating cost-to-charge ratio for the hospital. (Refer to the Cost-to-Charge section of the Reimbursement for Medical/Surgical Hospitals section of the State Plan for additional information.)

The cost per day by hospital is calculated by dividing the sum of the costs by the number of days for the hospital. To determine a statewide per diem base rate:

- Multiply the result by the applicable inflation factor to bring costs to a common point in time. Costs are inflated through the rate period. For example, for FY 2015 rates, costs are inflated through September 30, 2016. Inflation factors are obtained from IHS Global Insight.
- Recognize area cost differences by dividing the costs for each hospital by an area wage index. (Refer to the Area Wage Index section of the Reimbursement for Medical/Surgical Hospitals section of the State Plan for additional information.)
- Calculate the statewide operating rate (by provider type). A separate operating rate will be calculated for LTACHs and for Freestanding Rehabilitation Hospitals/Distinct Part Rehabilitation Units. This is a weighted mean of all hospitals' individual rates.
- The per diem rate for each provider type is the weighted mean adjusted by the area wage index specific to the hospital.

2.3.B.2. LTACH AND FREESTANDING REHABILITATION HOSPITALS/ DISTINCT PART REHABILITATION UNITS OUTSIDE OF MICHIGAN

LTACHs, freestanding rehabilitation hospitals, and distinct part rehabilitations units not located in Michigan are reimbursed using the per diem rate applicable to their provider type.

2.3.B.3. NEW LTACHs, FREESTANDING REHABILITATION HOSPITALS, AND DISTINCT PART REHABILITATION UNITS

If a hospital at least doubles the number of licensed beds in its distinct part unit and the number of licensed beds in the units increases by at least 20, the entire unit is treated as a new distinct part unit for determining the per diem rate. In order for this provision to apply, the hospital must request, in writing, that the unit is treated as a new unit. The new unit rate will become effective on the date that the number of licensed beds doubles and the increase is at least 20 beds, or the date on which the request is received by BPHASA, whichever is later.

New LTACHs, freestanding hospitals, and distinct part units are reimbursed using the per diem rate applicable to their provider type.

2.3.C. FREQUENCY OF UPDATES

The State will update area wage index, cost to charge ratio, relative weights, 3M™ APR-DRG grouper, DRG rates, and per diem rates on an annual basis.

2.3.D. MERGERS

2.3.D.1. GENERAL HOSPITALS

In the event of a merger between two or more hospitals, the DRG rate for the surviving hospital will be computed as follows:

- The statewide rate will be adjusted by applicable area wage index.
- The cost to charge ratios of the hospitals will be combined to create a new cost to charge ratio.

2.3.D.2. LTACHs, FREESTANDING PSYCHIATRIC AND REHABILITATION HOSPITALS/DISTINCT PART PSYCHIATRIC AND REHABILITATION UNITS

In the event of a merger between two or more hospitals, the resulting per diem rate for the surviving hospital will be computed as follows:

- The statewide rate will be adjusted by applicable area wage index.
- The cost to charge ratio of the hospitals will be combined to create a new cost to charge ratio.

2.3.E. HOSPITAL CHANGE OF OWNERSHIP

In accordance with 42 CFR 455.104 and the Provider Ownership and Control Disclosures subsection of the General Information for Providers Chapter of the Medicaid Provider Manual, hospitals are required to disclose ownership information to MDHHS within 35 days of a change of ownership. Failure to notify MDHHS of any change in identification information may result in the loss of Medicaid enrollment, lapse of provider eligibility, or nonpayment of services.

SECTION 3 - SPECIAL INPATIENT SITUATIONS

3.1 MEDICARE/MEDICAID CLAIMS

For patients treated in the inpatient setting with either Medicare Part A coverage or Medicare Part B coverage, no reimbursement is made for capital.

Exception: Where a patient is dually eligible for Medicare/Medicaid and their Medicare Part A benefits have exhausted, Medicaid reimburses the hospital for capital.

Prior to final settlement, hospitals must identify claims eligible to receive capital costs as a result of the patient's Medicare Part A benefits being exhausted. A copy of the Medicaid invoice and the Medicaid Remittance Advice (RA) page showing approval must be provided for these claims. The hospital must also provide a copy of the Medicare Explanation of Benefits (EOB) showing that the patient's Part A benefits have been exhausted. Failure by the hospital to provide this information results in these claims being excluded from its final settlement.

For patients with Medicare Part B coverage and no Medicare Part A coverage, the Medicaid payment amount is determined by subtracting the Medicare Part B payment from the Medicaid inpatient amount that would otherwise be approved (either under DRG or per diem).

For patients with Medicare Part A coverage, the Medicare payment is compared to the Medicaid inpatient amount that would otherwise be approved (either under DRG or per diem).

- If the Medicare amount is greater, no additional payment is made, even though a coinsurance or deductible amount may be due.
- If the Medicaid amount is greater, the difference is paid, up to a maximum of the Medicare coinsurance and deductible amounts due for the claim. If a beneficiary is in a Medicare Advantage Plan, Medicaid's liability never exceeds that of the beneficiary. In addition, if the provider accepts the payment from the Medicare Advantage Plan as payment in full, Medicaid has no further liability.

3.2 SUBACUTE VENTILATOR-DEPENDENT CARE

Payment for services provided to patients in Subacute Ventilator-Dependent Care Units (SVDCU) is made using a negotiated prospective per diem rate that includes capital and direct medical education costs. The per diem rate is based on cost estimates for the upcoming year. The negotiated per diem rate is not to exceed the average outlier per diem rate that would be paid for outlier days between DRG 004X and DRG 005X. The payment rate for patients in subacute ventilator-dependent care units is an all-inclusive facility rate. No additional reimbursement is made for capital or direct medical education costs. These units are not eligible for indigent volume adjustor or indirect medical education adjustor payments.

Medicaid Provider Manual

The provider agrees to maintain separate accounting records for all costs associated with the dedicated ventilator-dependent unit using special procedures and instructions provided by MDHHS.

- Providers must maintain a separate cost center consistent with the requirements of MDHHS for all costs directly associated with the SVDCU, such as salaries, ancillary costs and others. The capital costs and other indirect costs are to be allocated to SVDCU using the method in accordance with Medicaid Long Term Care Cost Reporting requirements.
- SVDCU patient days and discharges must be reported separately under an inpatient cost center identified as SVDCU patient care on the cost report.
- Cost reporting for this separate SVDCU must be consistent for Medicaid and Medicare cost reporting.

3.3 MICHIGAN STATE-OWNED HOSPITALS

Michigan state-owned hospitals are reimbursed for their services using a prospective per diem rate. Each facility, in aggregate, will not receive payments in excess of the costs it incurs providing services to its Medicaid patients. Reimbursement for Michigan state-owned hospitals is subject to Federal upper payment limits.

SECTION 4 - HOSPITAL REIMBURSEMENT BY MEDICAID HEALTH PLANS

4.1 MEDICAID HEALTH PLAN PAYMENTS TO OUT OF NETWORK HOSPITALS

Medicaid Health Plans are to reimburse out of network medical/surgical hospitals at Medicaid FFS DRG hospital prices. MHPs are to reimburse out of network freestanding rehabilitation hospitals and distinct-part rehabilitation units at Medicaid per diem rates. MHPs are to use the DRG Grouper in use by Medicaid for the date of service to process out of network inpatient hospital claims and assign DRGs to determine relative weights, outliers, and average lengths of stay.

The hospital's Medicaid operating cost to charge ratios in effect for the date of service are to be used in the calculation of low day outliers, cost outliers, and organ transplants. Refer to the Special Circumstances subsection of this Appendix for information about MDHHS reimbursement for Transplant Services.

In addition to the DRG or per diem payment, a separate capital payment must be made for each out of network medical/surgical admission at the per discharge rate. A separate capital payment must also be made for each day a patient receives care in an out of network freestanding rehabilitation hospital and distinct-part rehabilitation unit. Capital payments for acute care and rehabilitation units and for freestanding hospitals will be updated annually.

4.2 TERMS OF SERVICE AND PAYMENT BETWEEN NONCONTRACTING HOSPITALS AND MHPs

To assure that all Medicaid beneficiaries have universal access to medically necessary covered hospital services, MDHHS, in cooperation with Medicaid enrolled hospitals and MHPs, developed a set of mutually identified obligations and a process to assure these obligations are met.

To acknowledge the responsibilities of hospitals and MHPs in noncontracting circumstances, a Hospital Access Agreement and MHP Obligations document were developed. Each Hospital is encouraged to execute the Hospital Access Agreement. Although execution of this Agreement is voluntary on the part of each Hospital, MDHHS expects that substantially all Hospitals will sign and return the Agreement. Signed copies of the Hospital Access Agreement are to be submitted by hospitals to MDHHS. The Hospital Access Agreement is not a contract with a MHP.

Refer to the Medicaid Health Plans Chapter of this manual for additional information about noncontracting hospitals and MHPs.

4.2.A. DEFINITIONS

The definitions of terms used in this section and in the Hospital Access Agreement, MHP Obligations, and Rapid Dispute Resolution Process (RDRP) are as follows:

Authorization or Prior Authorization (PA)	Documented approval by a MHP for the medical services rendered to an enrollee by a hospital based on clinical information provided to the MHP and pursuant to the terms set forth in this chapter.
Beneficiary	An individual who has been determined eligible for Medicaid.

Medicaid Provider Manual

Certificate of Coverage	Certificate of Coverage means the written document approved by the Department of Insurance and Financial Services (DIFS) which explains the scope of benefits, limitations of coverage, and exclusions governing the enrollee's health care benefit coverage pursuant to the MHP's Medicaid Contract with the State of Michigan.
Clean Claims	Clean Claims as defined in PA 187 of 2000, being MCL 400.111i and OFIR bulletin 2000/09.
Covered Services	All required services for Medicaid enrollees as defined by: <ul style="list-style-type: none">▪ Section 400.105 of the Michigan Compiled Laws,▪ Title XIX of the federal Social Security Act, 42 USC 1395 et. seq.,▪ MDHHS Program Manuals and Bulletins,▪ The contract between MHPs and the Michigan Department of Technology, Management & Budget for services rendered to enrollees, and▪ The Certificate of Coverage.
Emergency Medical Condition	Emergency Medical Condition means a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain) such that a prudent layperson, with an average knowledge of health and medicine, could reasonably expect the absence of immediate medical attention to result in: <ul style="list-style-type: none">▪ Serious jeopardy to the health of the individual or, in the case of a pregnant woman, the health of the woman or their unborn child;▪ Serious impairment to bodily functions; or▪ Serious dysfunction of any bodily organ or part.
EMTALA	The Emergency Medical Treatment and Active Labor Act, 42 USC 1395dd that requires a hospital to perform a medical screening examination of any individual presenting in its emergency department (ED) to determine if an emergency medical condition exists and to stabilize the individual's medical condition.
Enrollee	A Medicaid-eligible beneficiary who is enrolled in a MHP and who is either eligible at the time of service or determined retroactively eligible.
Hospital	The licensed entity that executed the Hospital Access Agreement included below and which has the inpatient capacity that is necessary to provide covered services.
Medicaid Health Plan	A Medicaid managed care plan that provides medical assistance through the delivery of covered services to beneficiaries and that holds a Medicaid Contract with the State of Michigan.
Medicaid Rates	The entire amount payable by MDHHS to hospitals for covered medical services provided to Medicaid beneficiaries who are not enrolled in MHPs. It includes, without limitation, DRG payments, per diem payments for exempt units, outpatient fee screen payments and applicable pass-through payments. Any other available resources, such as Medicare or other insurances, reduce the amount payable.

Medicaid Provider Manual

Noncovered Service	A medical or health care service that is: <ul style="list-style-type: none">▪ Not covered by Medicaid,▪ Not medically necessary;▪ Not described in a MHP's Certificate of Coverage,▪ Provided before or after a beneficiary is an enrollee in a MHP, or▪ A non-emergency service for which the Hospital did not secure PA.
Rapid Dispute Resolution Process	The process implemented by MDHHS to administer and resolve claim disputes according to the terms set forth in the Rapid Dispute Resolution Process (RDRP).

4.2.B. HOSPITAL ACCESS AGREEMENT

The Hospital Access Agreement (HAA) is between MDHHS and the hospital, and applies when a hospital provides services to Medicaid beneficiaries who are enrolled in a MHP with which the hospital does not have a contract. Where a hospital and MHP have a contract, the terms of that contract govern each relationship, and the HAA does not apply. When a hospital and a MHP have a limited services contract, the HAA applies for all covered services outside the scope of the limited services contract. Since the HAA is not a contract between a hospital and MHP, it is expected that health plans will continue to use network-contracted providers where appropriate.

The HAA is based on the following principles:

- It is intended to provide access for all covered services that are available at a hospital for all Medicaid enrolled beneficiaries, and to provide for the payment and billing policies and procedures for those services where the hospital and the enrollee's MHP have not entered into a contract.
- MDHHS, hospitals, and MHPs believe that it is essential to encourage contracting as the preferred relationship between health plans and hospitals, and to preserve the freedom of contract between hospitals and MHPs.
- The hospital will be entitled to payment by a health plan for all covered services provided in accordance with the HAA at Medicaid rates.
- In the event a MHP does not make the payment to a hospital as required under the HAA, MDHHS will deduct the unpaid amount from future health plan capitation payments and make such payment to the hospital in accordance with the HAA.
- MDHHS requires that the contracts between the State and each MHP include a provision that each MHP will comply with the terms of the HAA.

The agreement covers:

- Provision of Covered Services
- Health Plan Payment
- MDHHS Payment

Medicaid Provider Manual

- Authorization Requests - Post Stabilization
- Prior Authorization - Elective Admissions and Services
- Data Coordination
- Quality, Utilization and Risk Management (Q/U/RM)
- Orderly Transfer
- Claims
- Disputed Claims
- Payment
- Enrollee Hold Harmless
- Termination of the Agreement
- Parties to This Agreement
- Governing Law
- Notice of Change

A copy of the Hospital Access Agreement is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

4.3 MHP OBLIGATIONS

The MDHHS contract with each MHP contains an amendment regarding the MHP's obligation to a hospital when the MHP does not have a contract with the hospital to provide services to the MHP's Medicaid beneficiaries and where the hospital has signed a Hospital Access Agreement with MDHHS.

The MHP makes efforts to utilize network-contracted services where appropriate.

The contract amendment specifies MHP requirements for:

- Timely processing of claims
- Authorization requests - post stabilization
- Disputed claims
- Claim payment
- Claims data coordination
- Quality, Utilization and Risk Management (Q/U/RM)
- Orderly transfers
- Dispute Resolution

A copy of the MHP contract and the Health Plan Obligation Amendment are available on the MDHHS website.

4.4 DISPUTED CLAIMS

A Rapid Dispute Resolution Process (RDRP) was developed to provide a method for hospitals and MHPs to resolve disputed claims when the parties cannot reach an agreement. The process is included with the Hospital Access Agreement.

SECTION 5 – CAPITAL

Effective January 1, 2015, MDHHS will reimburse inpatient capital using a hospital-specific prospective rate. A prospective per-discharge amount will be calculated for medical/surgical hospitals, including critical access hospitals and children's hospitals. Freestanding rehabilitation hospitals and distinct part rehabilitation units will be reimbursed a prospective per diem capital rate. Transfer claims will not receive a prospective capital payment.

When calculating the prospective capital rates, data from the second previous state fiscal year will be used. For example, to calculate January 1, 2015 capital rates, data from cost reports with fiscal years that end between October 1, 2012 and September 30, 2013 will be used. Fee-for-Service (FFS) data will be used to calculate capital amounts.

The capital amount for the medical/surgical component of the hospital is established using the following lines (or comparable lines from succeeding cost reports) from the hospital's cost report. The data for routine capital costs is obtained from the CMS 2552-10, Worksheet D, Part I, Title XIX, Column 7, Lines 30-35 and 43. The ancillary capital costs are obtained from the CMS 2552-10, Worksheet D, Part II, Title XIX, Column 5, Lines 50-77 and 90-92. The sum of routine and ancillary cost for FFS is then divided by the medical/surgical FFS discharges for the same period to calculate the hospital-specific prospective per discharge rate for Managed Care Organizations (MCOs) and FFS.

The capital amount for freestanding rehabilitation hospitals or distinct part rehabilitation units is established using the following lines from the hospital's cost report. The data for routine capital costs is obtained from the CMS 2552-10, Worksheet D, Part I, Title XIX, Line 41. The ancillary capital costs are obtained from the CMS 2552-10, Worksheet D, Part II, Title XIX, Column 5, Lines 50-76.99 and 90-92. The sum of the routine and ancillary cost for FFS is then divided by the FFS rehabilitation Medicaid days for the same period to calculate the hospital-specific prospective per diem rate for MCOs and FFS.

Current occupancy limits will remain when the hospital specific prospective capital rates are developed. Capital amounts will be set annually. Capital amounts may be adjusted due to significant changes in capital costs that are not reflected in the cost report utilized to set the rate. Hospitals may request a capital rate adjustment by submitting a written request to the MDHHS Hospital and Clinic Reimbursement Division (HCRD). (Refer to the Directory Appendix for contact information.)

Hospitals may continue to receive capital interim payments, but only if they receive Medicaid interim payments. Otherwise, the hospital will receive its prospective rate when the inpatient claim is adjudicated. If the hospital receives capital interim payments, amounts will be reconciled 15 months after the hospital's fiscal year ends, and again at final settlement 27 months after the hospital's fiscal year ends.

5.1 DISTINCT PART REHABILITATION UNITS AND FREESTANDING REHABILITATION HOSPITALS

For distinct part rehabilitation units and freestanding rehabilitation hospitals, a separate inpatient capital rate will be calculated. The sum of the Medicaid fee-for-service (FFS) and managed care organization (MCO) routine and ancillary costs are divided by the FFS and MCO rehabilitation Medicaid days to calculate the hospital-specific prospective per diem rate.

5.2 MEDICAL/SURGICAL HOSPITALS

For medical/surgical hospitals, a separate inpatient capital rate will be calculated. The sum of the Medicaid FFS and MCO routine and ancillary costs are divided by the medical/surgical FFS and MCO discharges to calculate the hospital-specific prospective per discharge rate.

5.3 NET LICENSED BEDS

Net licensed beds are used to determine net licensed bed days for capital reimbursement and include all beds temporarily delicensed, except for rural banked beds, with rural as defined below. Net licensed bed days are:

$$\text{Total Licensed Bed Days} - \text{Rural Banked Bed Days}$$

A hospital may apply for a reduction in net licensed bed days to subtract bed days unavailable due to construction or renovation. Such a reduction is only available for beds which are taken out of service for construction or renovation for a limited period of time and which are returned to active inpatient service at the end of the construction or renovation project. Documentation of the construction or renovation project is required.

Occupancy is:

$$\text{Total Inpatient Days (Including Nursery Days)} / \text{Net Licensed Bed Days}$$

5.3.A. SOLE COMMUNITY PROVIDER ELIGIBLE HOSPITALS

If the hospital is eligible for sole community provider status (as defined by Medicare standards), the Medicaid share of allowable capital costs is reimbursed in full.

5.3.B. RURAL HOSPITALS

If a hospital is located in a rural area, as defined below, capital reimbursement is limited if occupancy in the hospital is less than 60 percent during the hospital's fiscal year. A hospital is considered a rural hospital if it is located outside a city of 40,000 or more people by a distance of 10 miles or more (U.S. Census Bureau population data is used). For hospitals with occupancy less than 60 percent, the Medicaid reimbursement for capital is:

$$(\text{Occupancy} / 0.6) \times \text{Medicaid Share of Capital}$$

If occupancy is at least 60 percent, the Medicaid reimbursement for capital is 100 percent of the Medicaid share of capital.

5.3.C. OTHER HOSPITALS

If a hospital is not eligible to be a sole community provider and is not located in a rural area, capital reimbursement is limited if occupancy in the hospital is less than 75 percent

Medicaid Provider Manual

during the hospital's fiscal year. For hospitals with occupancy less than 75 percent, the Medicaid reimbursement for capital is:

$$(\text{Occupancy}/.75) \times \text{Medicaid Share of Capital}$$

If occupancy is at least 75 percent, the Medicaid reimbursement for capital is 100 percent of the Medicaid share of capital.

5.3.D. HOSPITALS OUTSIDE OF MICHIGAN

Medical/surgical hospitals not located in Michigan receive a per case add-on amount to cover capital cost.

Freestanding rehabilitation hospitals and distinct part rehabilitation units of hospitals not located in Michigan receive a per diem add-on amount to cover capital cost.

The add-on amounts are an estimate of the statewide average paid to hospitals located in Michigan. Capital payments to out-of-state hospitals are not cost settled.

SECTION 6 - MEDICAID INTERIM PAYMENTS

Medicaid Interim Payments (MIPs) are available on a voluntary basis to all inpatient hospitals. MIPs are paid on a monthly schedule (12 payments per year).

For hospitals electing MIP, at the beginning of each hospital's fiscal year, annual program liabilities are set for Title XIX and Title V. Separate amounts are computed for each of a hospital's inpatient units (e.g., acute care and rehabilitation).

6.1 DRG

6.1.A. TITLE XIX GROSS PROGRAM LIABILITY

If DRG-reimbursed, Title XIX calculation of gross program liability is as follows:

- Gross Liability = (Discharge Count x Case Mix Value x DRG) + (Calculated Outlier Amount) + (Capital Rate Per Discharge x Discharge Count).
- Discharges are from the four most recently filed Quarterly Cost Reports, less Outlier Count from MDHHS paid claims files.
- Case mix is a hospital specific value and is drawn from MDHHS paid claims files.
- Gross Liability is reduced by estimated other insurance and patient pay amounts.

6.1.B. TITLE V GROSS PROGRAM LIABILITY

If DRG-reimbursed, Title V calculation of gross program liability is as follows:

- Gross Liability = (Discharge Count x Case Mix Value x DRG) + (Capital Rate Per Discharge x Discharge Count).
- Discharges are from the four most recently filed Quarterly Cost Reports.
- Case mix is a hospital specific value and is drawn from MDHHS paid claims files.
- Gross liability is reduced by estimated other insurance and patient pay amounts.

6.2 PER DIEM

If per diem reimbursed, calculation of gross program liability is as follows:

- Gross Liability = (Days Count x Per Diem) + (Days Count x Capital Rate Per Diem).
- Days are from the four most recently filed Quarterly Cost Reports.
- Gross liability is reduced by estimated other insurance and patient pay amounts.

6.3 LIMITS

For both DRG and per diem reimbursed hospitals/units, the MIP amount is based on a percentage of inpatient charges approved to inpatient charges filed from the prior year. Further, the MIP amount is limited based on application of a charge ceiling.

6.4 RECONCILIATION

An initial MIP reconciliation is done for operating costs only. Fifteen months after a hospital's fiscal year ends, reconciliation is done to compare the amount paid by MDHHS to the claims approved amount for the fiscal year reviewed.

Capital cost settlements use filed Medicaid Cost Reports to complete a hospital desk review and settlement prior to issuing a Notice of Program Reimbursement. MDHHS does not wait for Medicare to complete its audit of a hospital's cost report before MDHHS does its cost settlement. In order to capture the maximum paid claims data, Medicaid final settlements and corresponding final reconciliations are not calculated earlier than 27 months after the end of a hospital's fiscal year end.

6.5 DATA CORRECTIONS

MIP is an estimate of the amount due a provider in the interim. There is no appeal process. If there is a calculation mistake, the hospital must notify the MDHHS HCRD in writing. (Refer to the Directory Appendix for contact information.)

6.6 MONITORING

Hospitals that wish to receive MIPs must file Quarterly Cost Reports. MDHHS specifies the format and time frames for the filing of these reports. MIP is monitored based on the quarterly reports submitted by the provider. These reports are due 30 calendar days after the end of the quarter. Hospitals may elect to be removed from MIP and receive payments for claims processed weekly. Hospitals removed from MIP are not allowed to reenter the MIP process. If the MIP payment significantly exceeds the amount approved for two consecutive years, the hospital may be removed from MIP. Hospitals under bankruptcy are automatically removed from MIP and are reimbursed for claims processed through CHAMPS.

SECTION 7 – SPECIAL PAYMENTS

7.1 DISPROPORTIONATE SHARE HOSPITAL PAYMENTS

Indigent volume data is taken from each hospital's Medicaid Cost Report and from supplemental forms that each hospital must file with its Medicaid Cost Report. Data from the most recently available filed Medicaid Cost Report are used to calculate a disproportionate share adjustor. New adjustors are calculated and become effective concurrently with annual inflation updates. Separate indigent volume data is collected for and separate adjustors are applied to distinct part psychiatric units and distinct part rehabilitation units.

Indigent volume is measured as the percentage of inpatient indigent charges to a hospital's net hospital charges as reported on the Medicaid Cost Report. Indigent charges are the annual charges for services rendered to patients eligible for payments under Medicaid, CSHCS, MICHild, MOMS, and Healthy Michigan Plan, plus uncompensated care charges. Uncompensated care is limited by Medicare standards and is offset by any recoveries.

No Medicare charges and no Medicaid obligation to cover premiums, copayments, coinsurance and/or deductibles for beneficiaries who are dually eligible for both Medicaid and Medicare are to be included as a Medicaid charge for the purpose of calculating the amount of indigent volume to be reported on any line of a hospital's Indigent Volume worksheet. Also excluded are charges for Medicaid patients who have other insurance coverage and for whom the full payment, except for copayment, coinsurance and/or deductible, comes from the insurance payer.

Uncompensated care, bad debt recovery, and/or Hill-Burton offset may be apportioned using the ratio of total inpatient medical-surgical charges to total charges, the ratio of total distinct part rehabilitation unit charges to total charges, the ratio of total distinct part psychiatric unit charges to total charges, and the total of outpatient charges to total charges.

7.1.A. INDIGENT VOLUME DATA AND DISPROPORTIONATE SHARE HOSPITAL ELIGIBILITY FORM [CHANGE MADE 4/1/2025]

Each hospital must complete the Indigent Volume (IV) worksheet and the Disproportionate Share Hospital (DSH) Eligibility Status Verification form to be eligible for Disproportionate Share Hospital (DSH) funds.

The Indigent Volume (IV) worksheet is to be completed as part of the hospital's annual Medicaid Cost Report and returned to MDHHS. The Medicaid Cost Report will not be accepted without the IV worksheet. Effective state fiscal year 2024, the DSH Eligibility Status Verification form for discontinued DSH pools is not required. (text added per bulletin MMP 24-56)

In order to receive a disproportionate share adjustor other than 1.00, hospitals must also meet at least one of the four criteria on the Disproportionate Share Hospital (DSH) Eligibility Status Verification form.

The Disproportionate Share Hospital (DSH) Eligibility Status Verification form is to be completed annually and is reported separately from the Medicaid Cost Report.

Medicaid Provider Manual

An example of the form follows.

Michigan Department of Health and Human Services
Disproportionate Share Hospital (DSH) Eligibility Status Verification

State Fiscal Year: _____
Medicare Number: _____
NPI: _____
Facility Name: _____

Prepared By: _____
Phone Number: _____
Fax Number: _____
Email Address: _____

To be considered valid, this form must be completed by the person authorized to sign the Medicaid Filed Cost Report.

I certify that the following DSH Eligibility Status applies for the above facility for the state fiscal year as of the date of submission of this form as it was entered on the DSH Eligibility Status Report.

☐ 1. At least two (2) obstetricians with staff privileges at this hospital have agreed to provide obstetric services to individuals who are eligible for Medicaid services.
First Physician Name and NPI: _____
Second Physician Name and NPI: _____

☐ 2. This hospital is located in a rural area (as defined for purposes of section 1886 of the Social Security Act) and at least two (2) physicians with staff privileges at this hospital have agreed to provide obstetric services to individuals who are eligible for Medicaid services.
First Physician Name and NPI: _____
Second Physician Name and NPI: _____

☐ 3. This hospital serves as inpatients a population predominantly comprised of individuals under 18 years of age.

☐ 4. On December 22, 1987, this hospital did not offer obstetric services to the general population, except in emergencies.

☐ 5. None of the above apply. The hospital is not eligible for a disproportionate share adjustor.

7.1.B. MEDICAID UTILIZATION RATE

In addition to the minimum requirements specified in the form, each hospital must have a Medicaid utilization rate of at least one percent. Medicaid utilization is measured as:

$$\frac{\text{Medicaid Inpatient Days (Whole Hospital, including Subproviders)}}{\text{Total Hospital Days (Whole Hospital, including Subproviders)}}$$

Days are taken from filed hospital Medicaid Cost Reports for fiscal years ending during the second previous state fiscal year. All charge, cost and payment data must be on an accrual basis for each hospital's cost reporting period ending during the second previous state fiscal year (e.g., DSH payments for state FY 2021 are calculated using data collected in state FY 2019).

7.2 REGULAR DSH PAYMENTS [CHANGE MADE 4/1/2025]

Effective State Plan rate year 2024, the DSH pools and methodology described in the Regular DSH Payments section are discontinued. (text added per bulletin MMP 24-56)

7.2.A. \$45 MILLION POOL

Medicaid inpatient DSH payments are made annually in a single distribution, based on charges converted to cost, using the hospital's cost to charge ratio. The payment will be made at the end of the state fiscal year.

Each hospital's indigent volume is taken from hospital cost reporting periods ending during the second previous state fiscal year.

Title XIX charges used for computing DSH payments are the sum of Title XIX charges and Title XIX MCO charges from hospital IV worksheets for cost periods ending during the second previous state fiscal year. Data for cost periods of more or less than one year is proportionately adjusted to one year.

Hospital total cost ratios are taken from hospital cost reporting periods ending during the second previous state fiscal year. If a hospital has more than one cost reporting period ending within this range, data from the two periods are added together and a single ratio is computed. If the ratio is greater than 1.00, a ratio of 1.00 is used.

1. DRG Reimbursed Hospitals (\$37,500,000 allocated)

The DSH payments for DRG reimbursed hospitals are split into two pools.

- A. Hospitals with at least 50 percent IV (\$7,300,000). The share of the DSH payment for hospitals with at least 50 percent IV is based on a DSH share computed as follows:

$$\text{Title XIX Charges} \times \text{Operating Ratio} \times (\text{IV} - 0.5)$$

- B. Hospitals with at least 20 percent IV (\$30,200,000). The share of the DSH payment paid to hospitals with at least 20 percent IV is based on the following DSH share amount. This is in addition to the amount from A. above.

$$\text{Title XIX Charges} \times \text{Operating Ratio} \times (\text{IV} - 0.2)$$

2. Per Diem Reimbursed Hospitals and Units (\$7,000,000 allocated)

The share of the DSH payment paid to hospitals with IV of at least 20 percent is based on a DSH share based on the following:

$$\text{Title XIX Charges} \times \text{Operating Ratio} \times (\text{IV} - 0.2)$$

3. Distinct-Part Rehabilitation Units (\$500,000 allocated).

The share of the DSH payment paid to hospitals with IV of at least 20 percent is based on a DSH share of the following:

$$\text{Title XIX Charges} \times \text{Operating Ratio} \times (\text{IV} - 0.2)$$

4. For items 1 through 3 above, the determination of the share of the allocated DSH pool is made using the DSH share of the following:

$$(\text{Hospital's DSH Share} / \Sigma \text{DSH Shares for the Group}) \times \text{Allocated DSH Pool}$$

5. The regular DSH payment amount for each hospital is determined by comparing the results of the pool's payment allocation formula at each component of the regular DSH Pool — Diagnosis Related Group (DRG) Reimbursed Hospitals, Per Diem Reimbursed Hospitals and Units and Distinct-Part Rehabilitation Units — to the individual hospital DSH ceiling. Any amount not paid to a hospital because of its DSH ceiling is returned to the pool and redistributed using the same formula as the initial distribution, with hospitals over the ceiling removed from the calculation. This process continues until the entire pool is distributed. For the DRG Reimbursed Hospitals component, any funds not exhausted from the 50 percent IV sub pool will be placed into the 20 percent IV sub pool.

7.3 SPECIAL DSH PAYMENTS [CHANGE MADE 4/1/2025]

Effective State Plan rate year 2024, the special DSH pools and methodology described in the Special DSH Payments section are discontinued. (text added per bulletin MMP 24-56)

7.3.A. GOVERNMENT PROVIDER DSH POOL

A special pool for non-state government-owned or -operated hospitals will be established and renewed annually. The purpose of the pool is to assure funding for costs incurred by public facilities providing inpatient hospital services which serve a disproportionate number of low-income patients with special needs. A historical list of Government Provider pool sizes is maintained on the MDHHS website. (Refer to the Directory Appendix for website information.) Allocations will be determined based upon non-reimbursed costs certified as public expenditures in accordance with 42 CFR 433.51.

To be eligible for the Government Provider DSH Pool, hospitals must:

- Meet minimum federal requirements for Medicaid DSH payments; and
- Be non-state government-owned or -operated.

Aggregate DSH expenditures will be made in accordance with Section 1923(g)(1)(A) of the Social Security Act. Prior to computing the amount of payment each individual hospital is eligible to receive from this pool, all other DSH and Medicaid payments that the hospital is scheduled to receive will be counted against the hospital's DSH limit.

7.3.B. UNIVERSITY WITH BOTH A COLLEGE OF ALLOPATHIC MEDICINE AND A COLLEGE OF OSTEOPATHIC MEDICINE

A separate \$3.5 million dollar pool will be created annually. The purpose of the pool is to:

- Assure continued access to medical care for indigents; and
- Increase the efficiency and effectiveness of medical practitioners providing services to Medicaid beneficiaries under managed care.

Only one agreement per year is approved by MDHHS for this purpose. To be eligible for the pool, a hospital must meet the following criteria:

- Meet minimum federal requirements for Medicaid DSH payments; and
- Have in place an approved agreement between itself and a university with both a college of allopathic medicine and a college of osteopathic medicine that specifies all services and activities to be conducted.

This agreement shall not require the hospital to donate money or service to the other party in the agreement.

7.3.C. OUTPATIENT UNCOMPENSATED CARE DSH POOL

A special pool will be created annually for the purpose of reimbursing hospitals for a portion of their uncompensated care. The Outpatient Uncompensated Care DSH Pool will be split into Small and Rural and Large-Urban components. A historical record of the pool amounts can be found on the MDHHS website. (Refer to the Directory Appendix for website information.) Payments from the pool will be made annually.

Funds will be distributed from the Outpatient Uncompensated Care DSH Pool to all qualifying Privately-Owned or -Operated and Non-State Government-Owned or -Operated DSH eligible hospitals in Michigan. DSH eligibility criteria are specified in the Disproportionate Share Hospital Payments, the Indigent Volume worksheet and Disproportionate Share Hospital Eligibility Form, and the Medicaid Utilization Rate subsections of this chapter. These criteria must be met for a hospital to receive an allocation from any component of the Outpatient Uncompensated Care DSH Pool.

For purposes of distributions from this pool, any DSH hospital located in Michigan with less than 100 acute care beds will be considered a small hospital. Also for purposes of distributions from this pool, any DSH hospital located in a Michigan rural or Micropolitan County will be considered a rural hospital. All hospitals meeting either of these criteria will be eligible to receive a proportional share of the small and rural components of the pool.

For purposes of distributions from this pool, any DSH hospital with 100 or more acute care beds located in an urban Michigan county will be considered a large-urban hospital. Only hospitals meeting both of these criteria will be eligible to receive a proportional share of the large-urban components of the pool. Hospitals meeting only one of these criteria are by definition eligible to receive a proportional share of the small and rural

Medicaid Provider Manual

components of the pool. No hospital is eligible to receive allocations from both the small and rural and the large-urban components of the Outpatient Uncompensated Care DSH Pool.

The determination of the number of acute care beds for a hospital will be based on data reported on hospital Medicaid Cost Reports for hospital fiscal years ending during the second previous state fiscal year. Specifically, data reported on Worksheet S-3, Part 1, Column 2, Line 14 (or comparable lines from succeeding Medicaid Cost Reports) will be assessed to determine the number of total hospital beds. The determination will apply to all components of the Outpatient Uncompensated Care DSH Pool regardless of the state fiscal year from which the DSH funds are drawn.

The distribution of funding from the Outpatient Uncompensated Care DSH Pool will be based on each hospital's proportion of outpatient uncompensated care relative to other hospitals in each component of the pool. The process will be repeated for each component of the pool until the entire pool has been distributed. The process to accomplish this is detailed below.

Beginning in FY 2015, \$5,000,000 of the Large-Urban Component of the pool will be distributed to reward and incentivize hospitals providing low cost and high quality Medicaid services. The Medicare Value Based Purchasing (VBP) Adjustment Factor will be obtained annually from the Federal Register. Each hospital's respective payment from the \$5,000,000 pool component will be calculated as follows:

- $(\text{Hospital's Outpatient Uncompensated DSH Hospital Pool Factor}) \times (\text{Hospital's VBP Adjustment Factor}) = (\text{Hospital's Outpatient Uncompensated DSH Value Adjustment Factor})$
- $(\text{Hospital Outpatient Uncompensated DSH Value Adjustment Factor}) / (\sum \text{All Hospital Outpatient Uncompensated DSH Value Adjustment Factors}) \times (\text{Total Pool Amount}) = (\text{Outpatient Uncompensated DSH Value Payment})$

1. A Medicaid outpatient payment to charge ratio will be calculated for each hospital as follows:

$$\frac{(\text{Hospital Title XIX Outpatient FFS Payments})}{(\text{Hospital Title XIX Outpatient FFS Charges})} = (\text{Hospital Title XIX Outpatient Payment to Charge Ratio})$$

2. Net uncompensated outpatient charges will then be computed for each hospital as follows:

$$(\text{Hospital Uncompensated Outpatient Charges}) - (\text{Hospital Uncompensated Outpatient Payments}) = (\text{Net Hospital Uncompensated Outpatient Charges})$$

3. The computed net hospital uncompensated outpatient charges will be standardized by converting them to a Medicaid fee-for-service payment equivalent. This will be done by multiplying the results of Step 1 by the results of Step 2 as follows:

$$(\text{Hospital Title XIX Outpatient Payment to Charge Ratio}) \times (\text{Net Hospital Uncompensated Outpatient Charges}) = (\text{Net Hospital Outpatient Uncompensated Title XIX Equivalent Payments})$$

4. Each hospital's proportion of the pool component being calculated (or hospital pool factor) is determined by dividing their Medicaid fee-for-service payment equivalent by the total of all Medicaid fee-for-service payment equivalents of hospitals in the pool component. This step is expressed as follows:

$$\frac{(\text{Net Hospital Outpatient Uncompensated Title XIX Equivalent Payments})}{(\sum \text{ of all Net Hospital Outpatient Uncompensated Title XIX Equivalent Payments})} = (\text{Outpatient Uncompensated DSH Hospital Pool Factor})$$

5. Each hospital's respective pool component payment is determined by multiplying their hospital pool factor from Step 4 by the total pool component amount being calculated as follows:

$$(\text{Outpatient Uncompensated DSH Hospital Pool Factor}) \times (\text{Outpatient Uncompensated DSH Pool Component Amount}) = (\text{Outpatient Uncompensated DSH Hospital Pool Component Payment})$$

Pool component payments calculated for individual hospitals that are in excess of an individual hospital DSH ceiling will be placed back into that component of the pool. These payments will then be reallocated to the remaining hospitals in that component of the pool which have not exceeded the room available under their individual hospital DSH ceiling. The reallocation will be based on the original five step funding formula specified above. Only hospitals with available DSH ceiling capacity will be included in the relevant portions of the formula. This reallocation process will be repeated as many times as necessary to expend all funds in each component of the pool.

7.4 CALCULATION OF DSH CEILING

Hospital data utilized to calculate hospital-specific DSH ceilings includes inpatient and outpatient data. All charge, cost and payment data must be on an accrual basis for each hospital's cost reporting period ending during the second previous state fiscal year. Data should be separated by subprovider.

1. DSH Ceiling Financial Elements

- Title XIX Charges – Base year Title XIX charges include Title XIX charges for those beneficiaries enrolled in MHPs and beneficiaries dually enrolled in Title V and Title XIX.
- Title XIX Costs – Multiply total base year Title XIX charges times the hospital's Title XIX cost to charge ratio for the cost reporting period to determine Title XIX Costs. (The cost to charge ratio should be inclusive of capital and medical education costs.)
- Uninsured Charges – Uninsured charges are charges for services provided to beneficiaries who do not have any insurance coverage or for services not covered by the patient's insurance coverage. (Services covered by Medicare and/or Medicaid are not included as uninsured charges.)
- Uninsured Costs – Multiply total base year uninsured charges times the hospital's cost to charge ratio to determine uninsured costs. (The cost to charge ratio should be inclusive of capital and medical education costs.)
- Title XIX Payments – Title XIX Payments made by MDHHS or MHPs for services are included in computing the base year Title XIX payments. (Payments must include capital and medical education payments.)

- Uninsured Payments – Uninsured payments are those made by or on behalf of an individual beneficiary for the services included in computing base year uninsured payments.

The DSH ceiling calculation is:

Title XIX charges x Title XIX cost to charge ratio = Title XIX costs

Uninsured charges x uninsured cost to charge ratio = uninsured costs

Title XIX payments + uninsured payments + pool payments = total payments

Title XIX costs + uninsured costs – total payments = DSH ceiling

The following trend factors will be applied to the financial elements used to calculate hospital DSH ceilings only during the Initial DSH Calculation for each year. These trend factors will not be applied during the DSH Settlement calculations.

- Base Year Cost Inflation – Inflation of base year costs (inpatient and outpatient) is computed using the Global Insight index of inflation for the entire hospital. Hospital costs are inflated from the hospital FYE to the current state FYE. Inflation of payments is computed from the hospital's rate change over time.
- Base Year Utilization Trend – Hospital costs and payments are also adjusted from the state base year to the state current year end by the percentage change in the projected annual average Medicaid enrollment between the two periods.

7.5 DISPROPORTIONATE SHARE HOSPITAL (DSH) PROCESS [CHANGE MADE 4/1/2025]

Effective State Plan rate year 2024, DSH payments will be limited to the Institute for Mental Diseases (IMD) pool. All other regular and special DSH Pools will be discontinued effective State Plan rate year 2024. (text added per bulletin MMP 24-56)

The DSH process is designed to mitigate DSH audit-related recoveries. It is a two-step process that allows hospitals to provide input into the DSH calculations, decline DSH funds, and reduce their DSH ceiling. The two-step DSH process is as follows.

Step 1: Initial DSH Calculation

MDHHS will calculate hospital-specific DSH ceilings, DSH payment allocations and Medicaid utilization rates as part of its Initial DSH Calculation. Inpatient and outpatient data from the hospital's cost reporting period ending during the second previous state FY will be used for the DSH ceiling, DSH payment and Medicaid utilization rate calculations. The data will be trended to the current FY for DSH ceiling calculation purposes. For example, data from hospital Medicaid Cost Reports with FYs ending between October 1, 2018 and September 30, 2019 will be used to complete the FY 2021 Initial DSH Calculation.

MDHHS will share Initial DSH Calculations with hospitals. Non-IMD hospitals (revised per bulletin MMP 24-56) will be able to decline DSH funds following the Initial DSH Calculation findings. If a hospital declines DSH funds during the Initial DSH Calculation step, the decision is irrevocable and the hospital is not eligible for any DSH funds for that state FY. Hospitals may also request a downward adjustment to their DSH ceiling during the Initial DSH Calculation step. Upon receipt of this feedback from hospitals, each

hospital's calculated DSH ceiling will be reduced to the requested amount. No hospital will receive a DSH payment in excess of its initial DSH ceiling.

DSH payments will be applied against a hospital's DSH ceiling in the following order:

1. Institutions for Mental Diseases Pool
2. \$45 Million Pool
3. Outpatient Uncompensated Care DSH Pool
4. University with Both a College of Allopathic Medicine and a College of Osteopathic Medicine Pool (University Pool)
5. Government Provider DSH Pool (GP DSH Pool)

Step 2: Final DSH Settlement Step

DSH ceilings, DSH payments and Medicaid utilization rates are recalculated during the final DSH settlement step. DSH funds will be reallocated in the following manner:

1. Institutions for Mental Diseases Pool
2. \$45 Million Pool
3. Outpatient Uncompensated Care DSH Pool
4. University with Both a College of Allopathic Medicine and a College of Osteopathic Medicine Pool (University Pool)
5. Government Provider DSH Pool (GP DSH Pool)
6. Unspent funds not applicable to Step 1

MDHHS will recalculate hospital-specific DSH limits, DSH payment allocations and Medicaid utilization rates upon completion of the DSH audit for the applicable DSH year. Inpatient and outpatient cost and payment data utilized from Step 1 will be refreshed to account for any cost report changes that occurred between steps during the cost report acceptance process. DSH limits and Medicaid utilization rates will be calculated using the final DSH audit. No hospital will receive a DSH payment in excess of its audited DSH Settlement limit.

Upon completion of the calculations for the first five pools outlined in the order above, any remaining unspent federal DSH allotment will be distributed through a new pool. The remaining allotment will be distributed to all remaining eligible hospitals proportionately based on their share of remaining audited hospital-specific DSH limit capacity adjusted to exclude the DSH payment amounts hospitals received from the university and GP DSH pools. No hospital will receive an allocation in excess of its remaining audited hospital-specific DSH limit capacity or other federal limits. The formulas to distribute these funds are as follows

1.
$$\frac{(\text{Eligible Hospital's Remaining Audited DSH Limit Capacity} + \text{University DSH Payment Amount} + \text{GP DSH Payment Amount})}{(\sum \text{of All Eligible Hospitals' Audited Remaining DSH Limit Capacity} + \text{University DSH Payment Amount} + \text{GP DSH Payment Amount})} = (\text{Hospital Pool Factor})$$
2.
$$(\text{Hospital Pool Factor}) \times (\text{Pool Amount}) = \text{Pool Payment}$$

7.5.A. DISTRIBUTION OF DSH PAYMENTS FOR MERGED HOSPITALS

When two or more hospitals merge, eligibility for DSH payments after the merger is based on the combined Medicaid Cost Report data of the merged hospitals.

7.6 MEDICAID ACCESS TO CARE INITIATIVE

To ensure continued access for Medicaid patients to high quality hospital care, MDHHS established special funding pools. The pool dollar amounts are renewed annually and posted on the MDHHS website.

To keep payments within the Medicare upper payment limits, separate pools are established for privately owned or operated hospitals and nonstate government-owned or operated hospitals for both inpatient and outpatient hospital services. Only hospitals located within Michigan, enrolled in Medicaid, open, treating, and admitting Medicaid FFS and MHP patients 10 days prior to a scheduled payment are eligible to receive distributions from these pools.

7.6.A. POOL DESCRIPTIONS

7.6.A.1. PRIVATELY-OWNED OR OPERATED INPATIENT HOSPITAL POOL

This inpatient pool is computed based upon the total number of privately owned DRG reimbursed hospitals and distinct part rehabilitation units. Privately owned freestanding rehabilitation hospitals with Medicaid FFS payments also participate in this pool.

Hospitals with Medicaid inpatient FFS payments share proportionately in this pool based on each hospital's total Medicaid FFS inpatient payments divided by the total Medicaid FFS inpatient payments for all privately owned or operated hospitals and units.

7.6.A.2. PRIVATELY-OWNED OR OPERATED OUTPATIENT HOSPITAL POOL

This outpatient pool is computed based upon the total number of privately owned outpatient units of DRG reimbursed hospitals and privately owned outpatient hospital rehabilitation units.

Hospitals with Medicaid outpatient FFS payments share proportionately in this pool based on each hospital's total Medicaid FFS outpatient payments divided by the total Medicaid FFS outpatient payments for all privately-owned or operated hospitals and units.

7.6.A.3. NONSTATE GOVERNMENT-OWNED OR OPERATED INPATIENT HOSPITAL POOL

This inpatient pool is computed based upon the total number of nonstate government-owned DRG reimbursed hospitals and distinct part rehabilitation units. Nonstate government-owned freestanding rehabilitation hospitals with Medicaid FFS payments participate in this pool also.

Hospitals with Medicaid inpatient FFS payments share proportionately in this pool based on each hospital's total Medicaid FFS inpatient payments divided by the total Medicaid

FFS inpatient payments for all nonstate government-owned or operated hospitals and units.

7.6.A.4. NONSTATE GOVERNMENT-OWNED OR -OPERATED OUTPATIENT HOSPITAL POOL

This outpatient pool is computed based upon the total number of nonstate government-owned outpatient units of DRG reimbursed hospitals and outpatient hospital rehabilitation units.

Hospitals with Medicaid outpatient FFS payments share proportionately in this pool based on each hospital's total Medicaid FFS outpatient payments divided by the total Medicaid FFS outpatient payments for all nonstate government-owned or operated hospitals and units.

7.6.B. POOL SIZES

A historical list of MACI pool sizes is maintained on the MDHHS website. (Refer to the Directory Appendix for website information.)

7.6.C. DISTRIBUTIONS

The distribution from these pools will supplement hospitals' regular DRG and per diem payments (for rehabilitation units and hospitals) and is not considered part of a hospital's FFS reimbursement. Medicaid payers that normally match MDHHS FFS payments to medical providers are not required to match the distribution payments from these pools as part of their FFS payments.

The MACI pool dollar amounts will be renewed annually. The dollar amounts of the new pools will be based on the calculated gap between the Medicare Upper Payment Limit and Medicaid fee-for-service payments.

7.6.D. PAYMENT SHARE

The inpatient and outpatient hospital files used to distribute MACI payments will include FFS payments made on behalf of both Medicaid and CSHCS eligible beneficiaries.

7.6.D.1. INPATIENT PAID CLAIMS FILE

To determine each hospital's share of a pool, MDHHS will use paid claims for the fiscal year ending two years prior to the current fiscal year. Claims will be restricted to those paid by June 30th of the following year (e.g., paid claims from FY 2019 paid by June 30, 2020 will be used to calculate the FY 2021 MACI payments). The paid claims file will include all FFS payments made through CHAMPS, including DRG and per diem payments, DRG outlier payments, and claims paid based on a percent of charge. Paid claims will include those with other insurance and patient-pay amounts. Inpatient services will include both acute and rehabilitation services provided through distinct part rehabilitation units, freestanding rehabilitation hospitals, and subacute ventilator-dependent care units. Services paid to LTC providers will not be included, with the

exception of services paid to subacute ventilator-dependent care units with beds licensed as hospital beds. Revenue from licensed hospital beds utilized at less than an acute or rehabilitation level of care will be excluded from the paid claims file, with the exception of revenue from subacute ventilator-dependent care beds licensed as hospital beds. Payments made outside CHAMPS, such as capital, graduate medical education (GME), and disproportionate share hospital (DSH), will not be included in the paid claims file used to distribute the MACI hospital pools.

7.6.D.2. OUTPATIENT DISTRIBUTION DATA

To determine each hospital's share of a pool, MDHHS will use paid claims for the fiscal year ending two years prior to the current fiscal year. Claims will be restricted to those paid by June 30 of the following fiscal year (e.g., paid claims from FY 2014 will be used to calculate payments in FY 2016 with claims limited to those paid by June 30, 2015). The paid claims file will include all Medicaid FFS payments made for both Medicaid and dual CSHCS eligible beneficiaries through the CHAMPS System. Outpatient services will include both acute and rehabilitation services. Payments made outside CHAMPS, such as capital, graduate medical education (GME), or disproportionate share hospital (DSH), will not be included in the payments used to distribute the MACI pools.

7.6.E. ALLOCATION OF POOLS

MACI distributions are made prospectively based on historical data. Eligible hospitals will share proportionately from each pool based upon a hospital's total paid claims divided by the total Medicaid paid claims for all eligible hospitals, times the dollar amount of the individual pool. If a hospital closes or is determined ineligible to receive distributions from a pool, its MACI distribution will be redistributed to the remaining eligible hospitals based on the original distribution formula. In the event the MACI distributions would result in aggregate Medicaid payments exceeding the UPL, the size of the pool(s) will be reduced to bring the aggregate Medicaid payments within the UPL.

7.6.F. LIMITS TO INDIVIDUAL HOSPITALS

Total Medicaid payments are limited by federal regulation to a hospital's charges for inpatient services and by state policy to the lower of charges or costs for outpatient services. These limits apply by hospital fiscal year for FFS reimbursed services. Hospitals may elect to receive less (but not more) than their calculated quarterly MACI payment. The amount by which a hospital elects to reduce its payment will be redistributed to the remaining eligible hospitals based on the original distribution formula until the respective MACI pools are empty. All MACI payments are final. If charge/cost limits are exceeded, the amounts in excess of the limits will be recovered from hospitals at the time of final settlement. Any funds recovered from hospitals at final settlement will not be redistributed.

Prior to the first quarterly MACI payment for each state fiscal year, each hospital will be notified of the amount of its calculated quarterly MACI payments. A hospital electing to reduce a portion of any MACI payment to avoid exceeding charge/cost limits must inform the state of the amount to be reduced by no later than two weeks prior to the scheduled payment date.

7.6.G. PAYMENT SCHEDULE

MACI payments are made within 45 days of the beginning of each quarter. Quarterly payments are made in four equal installments based on the annual amount each hospital is eligible to receive. However, if a hospital elects to reduce a portion of any MACI payment to avoid exceeding charge/cost limits, then that payment is reduced to the amount specified by the hospital.

7.7 SPECIAL PAYMENT ADJUSTMENTS

Effective August 1, 2007 and each subsequent fiscal year, MDHHS is directed to reduce hospital payments in each respective fiscal year. These reductions are pursuant to the budgetary savings included in the MDHHS annual appropriations act. The amount of the reductions and the distribution by hospital are posted on the MDHHS website. (Refer to the Directory Appendix for website information.) The calculation of the reductions by hospital is described below.

A calculated share of the total annual reductions will be assessed to all hospitals and units operating and enrolled in the Medicaid program on the date the reductions are processed. A hospital's annual reduction will be based on its inpatient hospital paid claims for hospital admissions from October 1 to September 30 of the second previous fiscal year. (The same paid claims file will be used to calculate the hospital MACI payments and the reductions for the fiscal year.) Paid claims include Title V, Title XIX, and Title V/XIX inpatient hospital claims. A hospital's share of the annual reductions is calculated by dividing the total of its paid claims by the total of the paid claims for all affected hospitals times the total amount of funds to be recovered.

Merged hospitals will have their reductions combined. Reductions will be taken from the surviving hospital. Should a hospital or distinct part unit close prior to the end of the fiscal year, its reduction will become part of the hospital's final settlement.

Each hospital's share of the reductions will be made by gross adjustments to the hospital's inpatient provider NPI number. Recoveries will be taken from the hospital's payments until the reductions are complete.

7.8 RURAL ACCESS POOL

The Rural Access Pool (RAP) is a pool for hospitals that provide Medicaid services to low-income rural residents and will be created and renewed annually. Effective state FY 2021, eligibility for RAP is limited to non-critical access hospitals. To be eligible for this pool, hospitals must be categorized by CMS as a sole community hospital, or meet both of the following criteria:

- A hospital must have 50 or fewer staffed beds. MDHHS will calculate staffed beds by dividing the total hospital days reported by the hospital on its Medicaid Cost Report with a FY ending between October 1, 2010 and September 30, 2011 by the number of days covered in the Medicaid Cost Report; and
- A hospital must be located in a county with a population of not more than 165,000 and within a city, village, or township with a population of not more than 12,000. The population threshold will be measured against population counts from the 2000 federal decennial census.

Medicaid Provider Manual

Each hospital's allocation from this pool will be calculated as the unreimbursed cost the hospital incurred providing inpatient and outpatient services to Michigan Medicaid beneficiaries during its cost period that ended during the second previous FY. (Example: To calculate the FY 2014 pool, hospital Medicaid Cost Reports with FYs ending between 10/1/2011 and 9/30/2012 will be used.) The following gross Medicaid payments from this Medicaid Cost Report period will be applied against cost to determine unreimbursed costs: operating, capital, graduate medical education (GME), executive order reductions, and Medicaid Access to Care Initiative (MACI). Payments from this pool will be issued quarterly in four equal installments based on the total amount the hospital is eligible to receive.

In the aggregate, MDHHS will reimburse hospitals up to the maximum allowable under the federal upper payment limits for inpatient and outpatient services provided to Medicaid beneficiaries. To keep total Medicaid Fee-For-Service payments to hospitals within the federal upper payment limits, MDHHS will reduce the size of the corresponding FY MACI pool each year by the amount of the RAP.

Payments made from the RAP will be applied against hospitals' inpatient and outpatient settlement limits. Funds paid in excess of these limits will be recovered during settlement, and the federal share returned to the federal government.

SECTION 8 - GRADUATE MEDICAL EDUCATION

8.1 SERVICE OF TEACHING PHYSICIANS

Medicaid uses the Medicare Principles of Reimbursement to determine Medicaid allowable costs in the hospital setting. The administrative costs associated with teaching physician services as well as payment for direct patient care services provided by an intern, resident, or fellow in a teaching setting and supervised by a teaching physician, are subject to guidelines and conditions developed and published by Medicare.

Teaching institutions and teaching physicians within those institutions must abide by the CMS physician guidelines which explain when services provided in a teaching setting can be billed to Medicaid on a FFS basis or must be reported as allowable medical education costs on the hospital's cost report. The most recent guidelines for when the program may be billed directly are found in 42 CFR §415.

The guidelines require the presence of the teaching physician during the key portion of the performance of a service in which a resident is involved for which payment is sought by the teaching physician (or the hospital on behalf of the physician). The medical record must fully support the physician presence and participation in the service provided. There are exceptions and other considerations that may apply. Consult the full text of the guidelines to be sure you are in compliance for both Medicare and Medicaid.

Medicaid covers preventative medicine services that Medicare does not cover. For Medicaid, preventative medicine evaluation and management services are identified by procedure codes 99381 through 99397. These preventative medicine services may be provided without the presence of the teaching physician as long as all other requirements for the "presence" exception for E/M services furnished in certain primary care centers are met. Follow-up for any abnormal findings during a preventative medicine visit is subject to the teaching physician guidelines for all E/M services.

8.2 DISTRIBUTION OF GME FUNDS

Distribution of graduate medical education funds is calculated annually for three formula pools: the Dental and Podiatry, the GME Funds and the Primary Care. In order to receive funds for GME, a hospital must have operated a nationally accredited medical education program(s) in the fiscal year that data is drawn from the hospital cost reports used to calculate the GME payments. Payments are made only to hospitals that provide requested information by the dates required.

Only intern and resident full time equivalents (FTEs) in approved programs as specified in Federal Regulations (see 42 CFR §413.75-83) are eligible for inclusion in the data used to calculate the distribution of the Dental and Podiatry, the GME Funds and the Primary Care Pools.

- To obtain an average FTE payment for dental and podiatry residents, the GME liability for hospitals operating dental and podiatry residency programs only are summed. The summed total of these liabilities is divided by the total number of dental and podiatry FTEs as reported by the same hospitals and from the same filed cost reports that the GME liability data is drawn. The product is an average dental and podiatry FTE payment that is made to all hospitals reporting these FTEs.
- Annually, each hospital reporting dental and podiatry FTEs is reimbursed the average dental and podiatry FTE payment, as calculated above, for each dental and podiatry FTE it reports. Data for each hospital's dental and podiatry FTE count is drawn from the hospital cost report (Worksheet

E-4, Title XVIII, Line 10, Column 2). If the cost report is changed, equivalent data is used. Dental and podiatry FTEs are drawn from hospital cost reports for the same state fiscal year that FTEs are drawn to distribute the GME Funds and the Primary Care Pools.

- The dental and podiatry FTE payments made to all hospitals are summed and the total is deducted from the GME Funds Pool before any other distributions are made from this pool.
- Once the dental and podiatry FTE payments have been deducted, the remaining funds in the GME Funds Pool are distributed as described later in this section.
- Each hospital's dental and podiatry FTE count and the total dollar amount allocated to pay hospitals for dental and podiatry FTEs is updated annually. The average dental and podiatry FTE dollar payment is not. The average dental and podiatry FTE dollar payment is adjusted only when the GME Funds and the Primary Care Pools are adjusted. Any adjustment to the average dental and podiatry FTE dollar payment is proportional to the changes in these two pools.

To distribute funds from the GME Funds and the Primary Care Pools, data is drawn from accepted hospital cost reports for the most recent fiscal year that data is available. For the GME Funds Pool, the unweighted FTE count is used (Worksheet E-4, Title XVIII, Line 6) + (Worksheet E-4, Title XVIII, Line 15.01). For the Primary Care Pool, the weighted FTE count for primary care physicians is used (Worksheet E-4, Title XVIII, Line 8, Column 1) + (Worksheet E-4, Title XVIII, Line 15.00). If the cost report is changed, equivalent data is used.

Both the hospital and its residency programs must be operating during the funding period in order to receive GME funds. Hospitals must notify MDHHS in writing at least 30 days prior to the termination date of any of its residency programs. Funds distributed to ineligible hospitals are subject to recovery.

GME payments to hospitals that merge are combined, provided that the surviving hospital continues to operate all residency programs that the pre-merger hospitals operated. The surviving hospital must notify MDHHS within 30 calendar days after the merger is completed of any reductions or terminations to its residency programs. The GME payments to the surviving hospital are reduced proportionately to the reduction in its GME programs. Overpayments to surviving hospitals based on reductions in GME programs are subject to recovery.

8.3 GME FUNDS POOL

Adjustments made to the amount of the GME Funds Pool due to legislative action or executive order are posted on the MDHHS website. (Refer to the Directory Appendix for website information.)

The dollar amount of this pool is appropriated annually by the legislature. To calculate each eligible hospital's share of the GME Funds Pool, the following formulas are used:

$$\begin{aligned} \text{FTEs} \times \text{Case Mix} \times (\text{Hospital's Title V \& Title XIX Days} / \text{Hospital's Total Days}) &= \text{Adjusted FTEs} \\ \text{Pool Size} \times (\text{Adjusted FTEs} / \Sigma \text{Adjusted FTEs}) &= \text{Hospital's Distribution} \end{aligned}$$

8.4 PRIMARY CARE POOL

Adjustments made to the amount of the Primary Care Pool due to legislative action or executive order are posted on the MDHHS website. (Refer to the Directory Appendix for website information.)

The dollar amount of this pool is appropriated annually by the legislature. To calculate each hospital's share of the Primary Care Pool, the following formula is used:

$$\text{FTEs} \times (\text{Hospital's Title V \& Title XIX Outpatient Charges} / \text{Hospital's Total Charges}) = \text{Adjusted FTEs}$$
$$\text{Pool Size} \times (\text{Adjusted FTEs} / \Sigma \text{Adjusted FTEs}) = \text{Hospital's Distribution}$$

8.5 DEFINITIONS/NOTES

Title V & Title XIX Days	Includes FFS days. Days include those from distinct-part psychiatric and distinct-part rehabilitation units.
Title V & Title XIX Outpatient Charges	Includes FFS outpatient charges. Charges include those from distinct-part psychiatric units.
# of Hospital Eligible Resident FTEs	Number of Hospital Eligible Resident FTEs for the GME Funds and the Primary Care Pools FTE data is drawn from hospital cost reports as indicated above.
Hospital's Non-Traditional Case Mix	The sum of the hospital's payments for all Medicaid admissions divided by the number of Medicaid admissions during the period covered. This figure is then divided by the hospital's price or rate.

8.6 PAYMENT SCHEDULE

Payments from the GME Funds and the Primary Care Pools will be made quarterly in four equal payments. Payments from the Dental and Podiatry Pool will be made once annually.

8.7 GME INNOVATIONS AGREEMENTS

8.7.A. GME INNOVATIONS HOSPITAL PROGRAM

GME Innovations Agreements support innovative GME programs that emphasize the importance of coordinated care, health promotions and psychiatric care in integrated systems. The purpose of this training is to develop the skills and experience necessary to provide psychiatric services utilized by Michigan Medicaid patient groups. Current single state agency agreements with innovative hospital GME programs include:

- Detroit Receiving Hospital for \$8,929,800 annually;
- Hurley Medical Center for \$2,018,078 in FY 2018 and \$4,381,078 in FY 2019 and future years;
- Pine Rest Christian Mental Health Services for \$3,960,000 in FY 17, \$6,336,000 in FY 18, and \$7,603,200 in FY 19 and future years.

Medicaid Provider Manual

MDHHS will approve three agreements statewide each fiscal year. To be eligible for the pool, a hospital must meet the following criteria:

- Be a Michigan Medicaid enrolled provider.
- Have in place an approved agreement between itself, a university psychiatric residency training program, and one or more community mental health services programs to provide accredited psychiatric residency training.
- Provide assurances that all training will take place in Michigan and prepare health care professionals to provide care to populations with the special characteristics of Michigan Medicaid patient groups.

8.7.B. GME INNOVATIONS SPONSORING INSTITUTION PROGRAM

The GME Innovations Sponsoring Institution Program supports limited non-hospital affiliated GME Programs that emphasize the importance of coordinated care, health promotions and psychiatric care in integrated systems. The purpose of this training is to develop the skills and experience necessary to provide psychiatric services utilized by Michigan Medicaid patient groups.

The GME Innovations Sponsoring Institution Program supports limited non-hospital affiliated GME programs that meet the requirements below. This includes sponsoring institutions whose primary purpose is to provide educational programs and/or health care services. A sponsoring institution assumes the financial and academic responsibility for a GME program.

The single state agency will approve one (1) agreement statewide each Fiscal Year (FY). This agreement will be with Authority Health for \$2.8 million for FY 2017 and \$3.1 million for FY 2018 and subsequent years. If GME distributions exceed the expenses incurred by the sponsoring institution in residency training, the size of the agreement will be reduced to bring these elements into alignment. To be eligible for the GME Innovations Program without a hospital partner, an organization must meet the following criteria:

- The organization must possess appropriate accreditation credentials.
- The organization must meet the requirements associated with receiving Medicaid payments.
- The organization must have an approved agreement with a sponsoring institution, a university psychiatric residency training program, and one or more community mental health services programs to provide accredited psychiatric residency training.
- The organization must provide assurances that all training will take place in Michigan and prepare health care professionals to provide care to populations with the special characteristics of Michigan Medicaid patient groups.

8.7.C. GME INNOVATIONS MICHIGAN DOCTORS (MIDocs) PROGRAM

The GME MIDocs program supports the expansion of residencies and subsequent retention efforts for approved high need specialties in underserved areas of the state where current and future physician shortages undermine the health and well-being of Medicaid beneficiaries. The MIDocs program offers physician training in integrated and

Medicaid Provider Manual

patient-centered care for underserved populations that will further the state's Medicaid quality goals. To be eligible for MIDocs GME funding, the MIDocs participating medical school must enter into an agreement with the state agency specifying the number of MIDocs residents to be supported, the total annual cost of such residencies, any post-residency expenditures to retain physicians in underserved areas of Michigan, and the amount of other sources of funding available for the program, if any. Sponsoring institutions may receive funding from other sources but Medicaid will act as a payer of last resort to only cover costs not reimbursed through other sources. The state agency will pay the MIDocs participating medical school an amount equal to the amount of otherwise unreimbursed costs.

The single state agency will approve four (4) agreements with MIDocs participating medical schools statewide each state fiscal year (SFY), covering residencies for the academic year (July-June (AY)) beginning within the SFY. The agreements will total \$1.52 million in fiscal year 2019, \$10.73 million in fiscal year 2020, \$19.98 million in fiscal year 2021, \$27.75 million in fiscal year 2022, \$28.5 million in fiscal year 2023, and \$22.8 million in fiscal year 2024.

In addition, the following requirements must be met:

- The MIDocs participating medical school must have submitted to the state agency its MIDocs program proposal for new or expanded residency program(s) to promote access in underserved areas of the state.
- The new or expanded program(s) must possess appropriate accreditation credentials.
- The new or expanded program(s) must meet the MIDocs curriculum standards, including those related to didactic education on patient centered medical homes, interprofessional education, behavioral and physical health integration, and continuous quality improvement.
- The MIDocs participating medical school must be the sponsoring institution of the residency program(s) or have an approved agreement with the sponsoring institution.
- The MIDocs participating medical school or the sponsoring institution (if not the medical school) must have agreements with all training sites for the MIDocs residents.
- If GME distributions exceed the expenses incurred by the MIDocs participating medical school, their affiliated sponsoring institution and/or the clinical training sites related to the MIDocs residencies, the size of the payment will be reduced to bring these elements into alignment.

SECTION 9 - COST REPORTING REQUIREMENTS

Each hospital, unless specifically exempt, is required to submit a MDHHS Facility Settlement Medicaid Cost Report to the MDHHS HCRD on or before the last day of the fifth month following the close of its cost reporting period. The HCRD grants extensions only when a hospital's operation is adversely affected due to circumstances beyond its control (e.g., staffing turnovers are considered within the control of the hospital, whereas fires and floods would be considered beyond its control). If a hospital fails to submit a completed Medicaid Cost Report via the MDHHS Facility Settlement system on time and has not been granted an extension of the time limit, a notice of delinquency is issued. If the Medicaid Cost Report is not submitted within 30 calendar days from the date of the notice of delinquency, the hospital's payments are terminated until the Medicaid Cost Report is received and accepted by MDHHS in the Facility Settlement system. Payments withheld due to late submission are paid upon acceptance of the Medicaid Cost Report.

The cost report covers a 12-month cost reporting period unless the Medicare and Medicaid Programs have granted prior approval. Approval for filing a cost report for a period other than 12 months may be granted when a hospital changes the end date of its cost reporting period. In such case, the hospital is required to file a Medicaid Cost Report for the period between the end of the original cost reporting period and the beginning of the new cost reporting period.

Hospitals with subacute ventilator dependent care units must obtain MDHHS approval to file Medicaid Cost Reports treating the unit as a subprovider in accordance with the HIM-15 2336, 2336.1, 2336.2, and 2336.3. MDHHS approval must be requested in writing from the HCRD and must be obtained prior to the start of the first hospital fiscal year during which the exemption applies.

Each hospital's Medicaid Cost Report data must include an itemized list of all expenses recorded from the formal and permanent accounting records of the facility. The accrual method of accounting is mandated for all facilities not owned by government. Generally accepted accounting principles must be followed. All of the hospital's accounting and related records, including the general ledger, books of original entry, and statistical data, must be maintained for at least three years after receipt of final settlement (42 CFR §413.20 and Provider Reimbursement Manual §2304; 42 CFR §405.1885). These records must be made available for verification during onsite visits by state or federal audit staff. All Medicaid Cost Reports are retained by MDHHS for at least three years following the date of settlement.

The Medicaid Cost Report must be sent to MDHHS HCRD via the Facility Settlement system. The Medicaid Cost Report must include:

- The CMS 2552 Medicare standardized electronic cost report (ECR) filed in the manner required by MDHHS for MDHHS programs reporting.
- MDHHS specific filed Medicaid Cost Report.
- The hospital's audited Financial Statements.
- Hospitals that participate in the Medicaid FFS 340B program must provide sufficient documentation to confirm the reasonableness of reported charges.

The Medicaid Cost Report is accepted only if all of the following conditions are met:

- All submitted documents are in a usable format.

Medicaid Provider Manual

- MDHHS can generate a full CMS 2552 cost report from the electronic cost report file. MDHHS uses the KPMG/CompuMax system to generate viewable cost reports.
- Data is provided for all authorized MDHHS units and programs (Medical/Surgical, Rehabilitation, Outpatient, Psychiatric, Clinic, Title V, Title XIX and Healthy Michigan Plan).
- Data meet a set of reasonableness checks, or variances are explained. Hospital charges on cost reports must be supported with approved Medicaid claims data. The DSH audit survey (42 CFR 455.301 and 42 CFR 455.304) allows hospitals to complete a reconciliation between MMIS and internal hospital data to assure that all eligible claims are accounted for during the audit.
- Hospitals that participate in the Medicaid FFS 340B program must provide sufficient documentation to confirm the reasonableness of reported charges.
- Hospitals must maintain an active NPI and accurate specialty enrollment information as described in the General Information for Providers chapter of the Medicaid Provider Manual.

SECTION 10 – AUDITS

The audit and settlement process determines the amount of reimbursement to which an individual hospital is entitled. Cost settlements are made to assure payment of the MDHHS share of reimbursable cost. The audit and settlement process begins with the receipt of the hospital's annual cost report and ends with the electronic issuance of the Notice of Amount of Program Reimbursement that conveys the results of the audit.

10.1 DESK AUDIT

The audit process includes desk audit procedures and audit scope determinations for both MDHHS program(s) audit verification purposes and determination of allowable costs. All cost reports are examined to:

- Verify the completeness and arithmetic accuracy of all schedules in the report;
- Reconcile reported hospital program data with MDHHS approved data; and
- Identify the need for supporting documentation and arrange to receive same.

SECTION 11 – SETTLEMENTS

11.1 INITIAL UPPER PAYMENT LIMIT

In aggregate, MDHHS limits hospital reimbursement to the maximum allowable under the Federal upper payment limits (UPL) for services provided to Medicaid beneficiaries. MDHHS calculates inpatient and outpatient UPLs by benefit plan using CMS 2552 and Medicaid Cost Reports. The UPL calculation is completed at the time MDHHS accepts a hospital's Medicaid Cost Report and recovers amounts in excess of calculated limits.

11.2 HOSPITAL UNDERPAYMENTS AND OVERPAYMENTS

11.2.A. UNDERPAYMENTS TO A HOSPITAL

MDHHS pays a determined amount of an initial settlement due a hospital after notice has been furnished to the hospital. However, MDHHS retains the right to withhold a portion of an initial payment based on individual circumstances.

11.2.B. OVERPAYMENTS TO A HOSPITAL

Once a determination of overpayment has been made, the amount so determined is a debt owed to the State of Michigan and is recovered by MDHHS after notice has been furnished to the hospital.

11.3 FINAL SETTLEMENT(S)

Settlement is based upon processed non-zero dollar MDHHS liability claims for services rendered to MDHHS beneficiaries during the Medicaid Cost Report period and remitted prior to the paid claim report run date. MDHHS calculates the final settlement amount to be reimbursed no earlier than 27 months after the period covered by the Medicaid Cost Report. MDHHS may approve requests for final settlement calculations prior to 27 months in the event of hospital bankruptcy or closure. Upon completion, the final settlement results are transmitted to the hospital via the Facility Settlement system, the Medicare/Medicaid CMS 2552 report and/or the Medicaid Cost Report and will not be amended unless specific cost report changes are approved by MDHHS. Facilities can appeal or request changes to the final settlement up to 30 calendar days from the final settlement completion date noted in the Facility Settlement system.

The total amount paid for inpatient capital is eligible to be settled 27 months after the hospital's fiscal year ends. For testing against the Medicaid upper payment limits, inpatient payments are limited by allowable inpatient charges and outpatient payments are limited by allowable outpatient costs. Total payments for inpatient services are limited to the lesser of operating amount approved (DRG, per diem, and the operating portion of any percent of charge payments), including capital less any limits that apply, or full charges. This limitation is applied separately by program against the aggregate operating payment amounts approved and capital payments. Final reimbursement is limited to the lesser of outpatient payment amounts approved, allowable outpatient charges, or allowable outpatient costs.

For the purpose of the hospital final settlement process only, hospitals that participate in the Medicaid FFS 340B program will have the option to have their 340B drug costs adjusted from actual acquisition cost to a hospital's normal and customary charge. Participation in the 340B final settlement adjustment

process is contingent on the provision of sufficient documentation to confirm the reasonableness of reported charges. This adjustment will not apply to drug reimbursement, and participating providers are required to continue to bill 340B actual acquisition cost and all applicable modifiers. This policy does not impact or require any additional action for providers that do not participate in the Medicaid FFS 340B program. This policy is effective for final settlements with fiscal year ends between October 1, 2015 and December 31, 2023, and does not apply to prior settlements or settlements reopened prior to this effective date. Hospitals that do not have December 31, 2023, fiscal year ends will have final settlements split based on claim date of service.

11.4 RESPONSES TO THE FINAL SETTLEMENT

The Facility Settlement system contains a descriptive list of all program data adjustments made to a Medicaid Cost Report by the MDHHS HCRD audit staff. The Notice of Amount of Program Reimbursement is the notice of final determination and is considered the offer of settlement for all reimbursement issues for the cost reporting period under consideration.

The process is initiated by the hospital after the receipt of the Facility Settlement system notification. The MDHHS HCRD concludes the process on the day the Notice of Amount of Program Reimbursement is electronically transmitted to the hospital.

The final settlement result must be accepted or rejected by the hospital within 30 calendar days of the Notice of Amount of Program Reimbursement being electronically transmitted to the hospital.

The hospital may take the following actions:

- **Hospital Accepts the Notice of Amount of Program Reimbursement**

If the hospital accepts the findings contained in the final settlement, an appropriate officer of the hospital must electronically sign the final settlement within the Facility Settlement system. The MDHHS Notice of Amount of Program Reimbursement will be electronically transmitted to the hospital. No further administrative appeal rights will be available for the adjustments contained in the final settlement.

- **Hospital Does Not Respond to the Notice of Amount of Program Reimbursement**

If the hospital does not respond within the 30 calendar day time period, MDHHS shall electronically transmit a Notice of Amount of Program Reimbursement, which is the final determination of an adverse action. No further administrative appeal rights are available.

- **Hospital Rejects the Notice of Amount of Program Reimbursement**

If the hospital rejects any or all of the findings contained in the final settlement within 30 calendar days of the transmit date of the Notice of Amount of Program Reimbursement, then an informal appeal can be requested. An informal appeal process involves the audit staff and the hospital working to resolve differences prior to a formal appeal. The hospital may request a formal appeal hearing through the administrative appeal process.

11.5 REOPENING OF SETTLEMENTS

For all MDHHS final settlement reopenings, MDHHS has adopted and follows all applicable provisions of the Medicare Provider Reimbursement Manual (HIM-15), Part 1, Sections 2931 and 2932, as well as all applicable provisions of 42 CFR Section 405.1885 et. seq.

For all reopenings, there is a three-year statute of limitations that begins on the date of the original MDHHS Notice of Amount of Program Reimbursement. The three-year time period ends on the third anniversary of that date. A separate Facility Settlement system notification regarding settlement recalculation will be required for each provider and each cost year. If MDHHS electronically notifies a provider of its settlement recalculation before the expiration of the three-year period, the three-year requirement will be considered met. After this point, the reopened settlement will be completed in a timely fashion.

A Medicare settlement reopening will not affect the application of the three-year time limit on MDHHS settlement reopenings. Once the final settlement has been calculated and sent to the hospital, the Medicare/Medicaid CMS 2552 report will not be amended without specific CMS 2552 changes being approved by MDHHS.

New laws, regulations, policy directives, or the interpretation of such issued subsequent to a settlement will not serve as basis to reopen a settlement. Additionally, the above cannot be introduced as part of a reopened settlement. The sole exception is when MDHHS is directed to do so by court order.

SECTION 12 - APPEALS

12.1 DATA CORRECTIONS

Once a hospital report (e.g., cost, indigent volume, and/or data) has been reviewed and provisionally accepted by MDHHS, the hospital is notified in writing of MDHHS acceptance of the report. The hospital then has 30 calendar days in which to notify MDHHS of any errors or corrections to the report/data. After the 30-day notification period, the report is deemed accepted by MDHHS and will be used to rebase or update the hospital's pricing components as appropriate.

Only those reports on file and accepted nine months prior to the beginning of a new rate period are used for rebasing.

12.2 PRICE APPEALS

MDHHS considers appeal requests received within 30 calendar days from the date of notice to the hospital advising it of a change in its pricing components. Appeal requests must be submitted in writing to MDHHS. Requests must clearly state the item(s) being appealed, the remedy being sought, and must include all necessary documentation to support the hospital's position. Appeal requests received after 30 calendar days are not accepted. Appeal requests may not be used as a means to delay submission or fail to produce cost reports in the format and within the time frame required. Failure to include all necessary documentation to support the hospital's position may result in a hospital's appeal request being rejected.

Items subject to appeal include:	Items not subject to appeal include:
<ul style="list-style-type: none">▪ Interpretations and/or application of program:<ul style="list-style-type: none">➤ Policy➤ Procedures➤ Formulas➤ Pertinent laws and regulations (e.g., Code of Federal Regulations, HIM-15, etc.)▪ Incorrect data and/or paid claims information used in price calculations – excluding data and paid claims information from the hospital's annual cost report previously submitted by it and accepted by MDHHS.	<ul style="list-style-type: none">▪ Data previously submitted by the hospital and accepted by MDHHS.▪ The establishment and use of DRGs.▪ The Medicare Principles of Reimbursement (e.g., 42 CFR, HIM-15, etc.) as adopted by MDHHS and used to reimburse providers.▪ The use of relative weights as part of the DRGs.▪ Interim payment rates which are in compliance with state and/or federal regulations.▪ Nonprogram related issues.

Appeal requests must be sent to the Michigan Office of Administrative Hearings and Rules (MOAHR). (Refer to the Directory Appendix for contact information.)

12.3 APPEAL PROCESS

Upon receipt of an appeal request, a conference is scheduled and conducted by MDHHS staff from MOAHR. During this conference, the MDHHS staff and hospital representatives discuss the issues related to the appeal.

Failure to appear at a scheduled conference without good cause and reasonable advance written or telephone notification to the MDHHS staff person assigned to the appeal is considered an abandonment of the appeal.

After the conference, a final determination notice is sent to the hospital outlining the MDHHS position on the item(s) appealed.

A price appeal decision may include a correction to the data used to set rates. If so, the corrected data is used beginning with the rate period for which the appeal was filed. Data corrections and any resultant price component changes that are accepted through pre-hearing conference or prevail at hearing are made for the current base period only for the hospital filing the appeal. MDHHS may make changes to price components that affect all providers in subsequent rebasing periods.

Hospitals may elect to appeal an adverse action by requesting an administrative hearing as provided in MDHHS Provider Hearing Rules, R 400.3402 through R400.3404. Requests for hearing must be sent to MOAHR. Appeal requests must be made in writing and received within 30 calendar days of the notice of adverse action. If an appeal is not made in a timely manner, the notice of adverse action is final.

12.4 ADMINISTRATIVE HEARINGS

Hearings conducted by MOAHR follow the MDHHS Provider Reviews and Hearings Rules found at R400.3406 through R400.3424.

SECTION 13 - ELECTRONIC HEALTH RECORD (EHR) INCENTIVE PROGRAM FOR HOSPITALS

The Health Information Technology for Economic and Clinical Health (HITECH) Act, enacted as part of the American Recovery and Reinvestment Act of 2009, authorized incentive payments through Medicare and Medicaid to eligible hospitals as they adopt, implement, and/or upgrade, or demonstrate meaningful use of certified Electronic Health Record (EHR) technology. The hospital incentive program is designed to support hospitals in a period of health information technology transition and instill the use of EHRs in meaningful ways to help improve the quality, safety, and efficiency of patient health care.

The purpose of EHRs and meaningful use is to:

- Improve quality, safety, efficiency, and reduction of health disparities;
- Engage patients and families in their health care;
- Improve care coordination;
- Improve public health; and
- Ensure adequate privacy and security protections for personal health information.

13.1 REGISTRATION AND INTERFACES WITH THE NATIONAL LEVEL REPOSITORY

All hospitals seeking an EHR incentive payment are required to register with the National Level Repository (NLR). The NLR is the federal database which verifies basic provider information prior to notifying State Medicaid programs of a provider's intent to participate in the Medicare and Medicaid EHR Incentive Program. To register with the NLR, all Eligible Hospitals (EHs) must have a National Provider Identifier (NPI) and be enrolled in the CMS Provider Enrollment, Chain, and Ownership System (PECOS). Registration requires an active user account in the National Plan and Provider Enumeration System (NPPES). Note that any revisions to information provided in the NLR must be modified at the NLR level.

MDHHS is notified upon successful registration with the NLR. EHs are directed to the Michigan Medicaid Community Health Automated Medicaid Processing System (CHAMPS) to begin the Michigan Medicaid EHR registration process. The EHR Incentive Program module was created within the CHAMPS system to collect and record EH data. All providers have up to 30 days from MDHHS receipt of the NLR file to submit completed registration information in the CHAMPS EHR module. Failure to do so in the allotted timeframe could require hospitals to re-register at the NLR level. Providers must be an enrolled Michigan Medicaid provider and have an active Payee-Tax Identification on record within SIGMA Vendor Self Service (VSS). EHs are only required to register once for the Medicare and Medicaid EHR Incentive Programs. However, they must successfully demonstrate that they have adopted, implemented and/or upgraded (first participation year for Medicaid) or meaningfully used certified EHR technology each year in order to receive an incentive payment for that year. Additionally, providers seeking the Medicaid incentive must annually re-attest to other program requirements, such as meeting the required patient volume thresholds.

Following EH data collection in the NLR and Medicaid EHR CHAMPS module, EH eligibility determinations are calculated.

Following a successful eligibility determination, EH payments are calculated. A final report is filed with the NLR following a processed EHR incentive payment.

13.2 REQUIREMENTS FOR PARTICIPATION

In order to participate in the Michigan Medicaid EHR Incentive Program, hospitals must be a Medicaid enrolled provider and have a completed Medicaid Quarterly Report, Medicaid Cost Report and CMS 2552 Cost Report on file with MDHHS that correlates with the specified timeframe from which data are pulled. In an effort to have the most complete and accurate information for program calculations, all revisions, amendments, and modifications to data sources used in eligibility and payment calculations must be complete prior to hospital registration in the EHR Incentive Program. Incomplete data sources or data that is under revision are not utilized; therefore, hospital eligibility determinations and payment calculations could be delayed as a result.

Hospitals must review and agree to the attestation requirements outlined in the Michigan Medicaid EHR CHAMPS module. EHs select their EHR status (e.g., Adopt, Implement, and/or Upgrade or Meaningful Use) and provide their EHR certification number. EHs attest that the information they are providing is true, accurate, and complete.

EHs may participate in both the Medicare EHR Incentive Program and the Medicaid EHR Incentive Program. Hospitals must choose only one state from which to register and receive a Medicaid EHR incentive payment.

13.3 ELIGIBLE HOSPITALS DEFINED

Per CMS, eligible hospitals are defined as follows:

- Acute care hospitals (includes critical access hospitals [CAH]) and cancer hospitals meeting the following requirements:
 - A health care facility where the average length of patient stay is 25 days or fewer,
 - CMS Certification Number (CCN) ending between 0001 and 0879 or 1300-1399, and
 - Meet a Medicaid patient volume threshold of at least 10%; or
- Children's hospitals (does not include children's wings of larger hospitals) which are separately certified children's hospitals with CCN ending between 3300 and 3399.

Children's hospitals do not have to meet a minimum Medicaid patient volume threshold.

13.4 ELIGIBILITY VERIFICATION

To verify hospital eligibility, data reported on the CMS 2552, Medicaid Quarterly Report, and the MMF are utilized. Eligibility requirements are calculated annually upon registration in the Medicaid EHR Incentive Program. Hospitals should confirm that all necessary data elements are complete and reported for EHR incentive calculation purposes.

13.4.A. AVERAGE LENGTH OF STAY (LOS)

Average LOS is calculated by reviewing the current CMS 2552 Cost Report and Medicaid Cost Report on file with MDHHS. The following calculation is used:

$$\text{Total Inpatient Days} / \text{Total Inpatient Discharges} = \text{Hospital Average LOS}$$

13.4.B. MEDICAID ELIGIBLE PATIENT VOLUME

A hospital's Medicaid eligible patient volume is calculated using the Medicaid Quarterly Report. Acute care hospitals must annually meet a 10% Medicaid eligible patient volume threshold to participate in the EHR Incentive Program. EH Medicaid eligible patient volumes are verified each year of a hospital's participation in the EHR Incentive Program. (Children's hospitals are exempt from the volume threshold requirement.) MDHHS will select the hospital quarter with the highest Medicaid eligible patient volume (90-day continuous period) from the applicable calendar year's Medicaid Quarterly Report to derive program eligibility. For purposes of measuring Medicaid eligible patient volume, an inpatient hospital day or hospital discharge with a Medicaid-enrolled patient, including those with no Medicaid payment liability, is considered an encounter. One of two calculation methods is utilized to determine Medicaid eligible patient volume. The quarter of the prior calendar year and calculation method that yields greater Medicaid eligible patient volume is utilized to determine hospital eligibility. Patient encounters include both Fee-for-Service (FFS) and Managed Care Organization (MCO) data.

One of the following calculations will be utilized to determine Medicaid Patient Volume:

$$\frac{\text{Total Medicaid Hospital Days}}{\text{Total Hospital Days}} \times 100 = \text{Medicaid Patient Volume}$$

OR

$$\frac{\text{Total Medicaid Hospital Discharges}}{\text{Total Hospital Discharges}} \times 100 = \text{Medicaid Patient Volume}$$

13.5 INCENTIVE PAYMENT CALCULATION

EHR Incentive Program payments are calculated in accordance with the formula outlined in the HITECH under Section 495.310. Payments are made over a total of three years and are paid 50% of the aggregate calculation in the first year, 40% in the second year, and 10% in the third year.

13.5.A. TIMING

EHRs that adopt, implement, and/or upgrade a certified EHR system or are meaningful users can begin receiving incentive payments in any year from 2011 to 2016. The Medicaid EHR Incentive Program operates on a calendar year (CY) reporting period (January 1 through December 31). While the statute defines a payment year in terms of a CY, a hospital does not have to begin receiving incentive payments in CY 2011. However, the last year a hospital can first receive an initial Medicaid incentive program payment is CY 2016.

EHRs are paid up to 100% of the calculated aggregate EHR hospital incentive payment amount over a three-year period. Data utilized to calculate the aggregate EHR hospital incentive amount is derived from filed hospital cost reports (CMS 2552 and Medicaid Cost Report) from the hospital CY that ends during the CY prior to the hospital CY that serves as the first payment year.

All revisions, amendments, and modifications to data sources must be completed prior to a hospital's registration for the EHR Incentive Program. This includes revisions to the filed cost reports (CMS 2552 and Medicaid Cost Report) used to calculate the aggregate EHR incentive amount. Incomplete hospital data sources will result in delays in eligibility determinations and payment calculations.

13.5.B. PAYMENT FORMULA

The aggregate EHR incentive amount is a one-time calculation based upon the sum of a theoretical four-year calculation period where the amount of each year is the product of the following factors:

- the overall EHR amount; and
- the Medicaid Share.

The overall EHR amount is also based upon the sum over a theoretical four-year calculation period where the amount of each year is the product of two factors:

- an Initial Amount; and
- the Transition Factor applicable to each of the four years.

(All data used in the payment calculation is derived from the same 12 month cost report period, other than discharge data used to calculate the annual growth rate.)

Initial Amount and Theoretical Four-Year Calculation Period

The Initial Amount is the sum of a base amount and a discharge-related amount. The base amount is \$2,000,000, and the discharge-related amount provides an additional \$200 for estimated discharges between 1,150 and 23,000. No discharge-related amount is made for discharges prior to the 1,150th discharge or for discharges after the 23,000th discharge.

Medicaid Provider Manual

For the first calculation year, data on hospital discharges from the hospital fiscal year that ends during the FFY prior to the hospital fiscal year that serves as the first payment year is used as the basis for determining the discharge-related amount. To determine the discharge-related amount for the three subsequent theoretical calculation years, the number of discharges is based on the average annual growth rate for the hospital over the most recent three years of available data. The growth rate is based on a three-year average of total discharges, beginning with the initial calculation year and including data from the three prior years. The annual growth rate is applied to the base year's discharges to arrive at the three subsequent year discharge amounts. If an EH's average annual rate of growth is negative over the three-year period, the rate is applied as such.

Transition Factor

For each of the four years of the calculation, a different transition factor applies. The aggregate Medicaid EHR Incentive Payment is calculated once and is then distributed over three actual payment years. The transition factors listed below are used to calculate the aggregate EHR amount but do not indicate that hospital payments will be recalculated on a yearly basis.

Theoretical Calculation Period	Transition Factor
Year 1	1.00
Year 2	0.75
Year 3	0.50
Year 4	0.25

Medicaid Share

The Medicaid Share is the percentage of a hospital's inpatient, non-charity care days that are attributable to Medicaid inpatients.

The numerator of the Medicaid Share is the sum of:

- The estimated number of Medicaid inpatient bed days; and
- The estimated number of Medicaid managed care inpatient bed days.

The denominator of the Medicaid Share is the product of:

- The estimated total number of inpatient bed days for the eligible hospital during that period; and
- The estimated total number of the eligible hospital's charges during that period, not including any charges that are attributable to charity care, divided by the estimated total amount of the hospital's charges during that period.

Medicaid Provider Manual

For the purposes of the EHR incentive payment calculation, charity care is calculated using data from the Medicaid Cost Report Indigent Volume worksheet as follows:

$$(\text{Total Uncompensated Charges} - \text{Third Party Bad Debts} - \text{Uninsured Payments from Charges} - \text{Recoveries for Uninsured Bad Debt}) = \text{Charity Care}$$

The removal of charges attributable to charity care in the formula, in effect, increases the Medicaid Share resulting in higher incentive payments for hospitals that provide a greater proportion of charity care.

Payment Calculation Summary

1. Calculate initial amount	$\$2 \text{ million base amount} + ((\text{discharge bonus}) \times 200) = \text{initial amount}$ \$200 per total discharge between 1,150 and 23,000
2. Calculate four theoretical years	Year 1: 100% of initial amount Year 2: 75% of initial amount (+ or – any change in discharge level based on annual growth rate) Year 3: 50% of initial amount (+ or – any change in discharge level based on annual growth rate) Year 4: 25% of initial amount (+ or – any change in discharge level based on annual growth rate)
3. Sum four theoretical year calculations	Year 1 + Year 2 + Year 3 + Year 4 = Aggregate Hospital EHR Incentive Amount
4. Calculate Medicaid Share	$\text{Medicaid inpatient days} / (\text{total inpatient days} \times ((\text{gross revenue} - \text{charity}) / \text{gross revenue}))$
5. Multiply Aggregate Hospital EHR Incentive Amount by Medicaid Share	$\text{Aggregate Hospital EHR Amount} \times \text{Medicaid Share} = \text{Total Hospital EHR Incentive Amount}$
6. Paid over three payment years	Payment Year 1 = 50% of Total Hospital EHR Incentive Amount Payment Year 2 = 40% of Total Hospital EHR Incentive Amount Payment Year 3 = 10% of Total Hospital EHR Incentive Amount

13.6 PAYMENT NOTIFICATION AND GROSS ADJUSTMENTS

EH Medicaid Incentive payments are made annually via gross adjustment. EHs cannot receive more than one incentive payment in each State CY.

Following the verification of hospital eligibility, an incentive payment is calculated and the EH is notified of the final amount. EHs have up to 30 days from receiving their payment notice to dispute payment calculations. If no communication is received or the EH agrees with the payment notice, the incentive payment is processed via gross adjustment in the CHAMPS system.

13.7 ADOPT, IMPLEMENT, AND/OR UPGRADE OR MEANINGFUL USE

To receive a first year's incentive payment, EHs must attest to adopting, implementing, and/or upgrading (AIU) a certified EHR system. EHs are required to provide the certification number of their EHR system within the EHR CHAMPS module during registration as part of AIU attestation. Eligible Medicaid hospitals can receive their first year's payment for AIU attestation and not meaningful use, but must meet the meaningful use requirement in all subsequent participation years.

If an EH is eligible for both Medicare and Medicaid EHR Incentive Programs and has achieved meaningful use standards under Medicare, they are recognized as a meaningful user for Medicaid purposes.

In order to continue to receive incentive payments after the first payment year, providers must achieve and maintain a set of meaningful use measures as defined by CMS. Meaningful use employs a three-stage approach, with each stage building on the preceding stage:

- Stage 1 – Data capture and sharing
- Stage 2 – Expand on Stage 1 criteria to encourage the use of health information technology for continuous quality improvement
- Stage 3 – Expand on Stage 2 with a focus on promoting outcomes in quality, safety, and efficiency

To demonstrate Stage 1 of meaningful use, an EH must comply with a set of "core" requirements and a selection of "menu" requirements. MDHHS has adopted the same requirements outlined by CMS without modification.

SECTION 14 – SHORT-STAY HOSPITAL REIMBURSEMENT

The State utilizes a Short Hospital Stay (SHS) rate of reimbursement for certain outpatient and inpatient hospital stays. The SHS encompasses funding for both operating and capital costs. The SHS rate will be identical for inpatient and outpatient services, and will apply to all services billed on the claim. The SHS rate is published on the MDHHS website. (Refer to the Directory Appendix for website information.)

The SHS rate of reimbursement does not modify billing requirements for hospitals. If the patient meets criteria for an inpatient admission, the claim must be submitted as an inpatient claim. Conversely, if the patient does not meet criteria for an inpatient admission, the claim must be submitted as an outpatient claim. In either case, if the criteria for the SHS rate are met, the hospital will receive the same reimbursement for services rendered. The SHS rate only applies to discharges from a facility, and does not apply to transfers, leaving against medical advice (AMA), or other discharge statuses.

The SHS logic will apply to both emergent and elective claims. For purposes of this reimbursement structure, SHSs will be defined using the following criteria.

14.1 DIAGNOSES

In order to qualify for a SHS rate, a claim must include one of the primary diagnosis codes listed on the SHS rate diagnosis code table. The SHS rate diagnosis code table is maintained on the MDHHS website. (Refer to MDHHS Institutional Billing Resource in the Directory Appendix for website information.) The list of eligible codes will be evaluated annually and updated as necessary.

14.2 OUTPATIENT HOSPITAL CLAIMS QUALIFICATION

An outpatient hospital claim will qualify for the SHS reimbursement if all of the following criteria are met:

- The primary diagnosis code billed on the outpatient claim is listed on the primary diagnosis codes list referenced above.
- The claim does not include a surgical revenue code (36x) billed on any line of the outpatient claim.
- The claim does not include cardiac catheterization lab revenue code 481.
- The claim includes observation revenue code 762.

14.3 INPATIENT HOSPITAL CLAIMS QUALIFICATION

An inpatient hospital claim will qualify for the SHS reimbursement if all of the following criteria are met:

- The primary diagnosis code billed on the inpatient claim is listed on the primary diagnosis codes list referenced above.
- The claim does not include a surgical revenue code (36x) billed on any line of the inpatient claim.
- The claim has a date of discharge equal to or one day greater than the date of admission.
- The claim does not include cardiac catheterization lab revenue code 481.

14.4 EXCLUSIONS

The SHS logic will not apply to inpatient or outpatient claims with the following conditions:

- Claims where Medicaid is the secondary payer. MDHHS will follow the rules of the primary payer, and MDHHS will be responsible for payment up to co-insurance and/or deductible.
- Hospital discharges with discharge status codes other than 1, 6, 9, 21, 30, 50, or 51.
- Claims for patients who leave the hospital AMA.
- Claims for deceased patients.
- Claims that include primary diagnoses that are not on the diagnosis list referenced above, including claims for births and deliveries, for example.

14.5 SHORT HOSPITAL STAY RATE AND METHODOLOGY

A single SHS rate will be developed for certain outpatient and inpatient hospital stays. This rate will encompass funding for both operating and capital costs, will be identical for inpatient and outpatient services, and will encompass all services billed on the claim.

The rate will be established using Medicaid hospital Fee-for-Service paid claims and managed care encounters that meet the SHS criteria. To calculate the rate, the following process will be employed:

- Aggregate Fee-for-Service operating payments on qualifying claims with dates of service during the second previous fiscal year will be identified.
- Aggregate Fee-for-Service capital payments will be calculated by multiplying the Fee-for-Service inpatient claims count for qualifying claims with dates of service during the second previous fiscal year by the current year statewide capital rate.
- Aggregate managed care operating and capital payments on qualifying encounters with dates of service during the second previous fiscal year will be identified.
- Fee-for-Service and managed care operating and capital payments will be aggregated and divided by the number of claims and encounters that meet the SHS criteria. The resulting quotient will be the SHS rate.

MDHHS will monitor the diagnosis code sets and reimbursement to ensure budget neutrality is maintained or to maintain consistency with future reimbursement changes.

INDEPENDENT DIAGNOSTIC TESTING FACILITIES AND PORTABLE X-RAY SUPPLIERS

TABLE OF CONTENTS

Section 1 - Introduction.....	1
1.1 General Information	1
Section 2 - General Information for IDTF and PXRS Billing and Reimbursement.....	2
Section 3 - Independent Diagnostic Testing Facilities (IDTF)	3
Section 4 – Portable X-ray Suppliers (PXRS)	4

SECTION 1 - INTRODUCTION

1.1 GENERAL INFORMATION

The Michigan Department of Health and Human Services (MDHHS) enrolls and reimburses Independent Diagnostic Testing Facilities (IDTF) and Portable X-ray Suppliers (PXRS) for Medicaid covered diagnostic services. An IDTF or PXRS may provide services in a mobile facility or portable unit and is independent of a physician's office or hospital. Providers and equipment must comply with all federal, state and local regulations applicable to the type of service(s) provided.

MDHHS aligns with Medicare's IDTF and PXRS policies whenever possible. IDTF and PXRS entities must be enrolled with Medicare before requesting to enroll with Michigan Medicaid. (For information on the MDHHS Provider Enrollment process, refer to the General Information for Providers Chapter in this manual).

SECTION 2 - GENERAL INFORMATION FOR IDTF AND PXRS BILLING AND REIMBURSEMENT

Claims for enrolled providers are submitted in the ASC X12N 837 5010 professional format to the MDHHS Community Health Automated Medicaid Processing System (CHAMPS).

- Michigan Medicaid reimbursement for IDTF and PXRS services is based upon the limits and rates associated with MDHHS physician professional services.
- Procedure codes and fee screens for the IDTF or PXRS are available on the MDHHS website and in the Medicaid Code and Rate Reference tool in CHAMPS. (Refer to the Directory Appendix for website information.)
- To bill transportation and set up codes for portable x-rays, an IDTF must qualify and be enrolled as a PXRS.

A referral or an order for a diagnostic test or x-ray is required from the provider treating the patient. Providers arranging or rendering services upon the order of another provider must maintain that order for a period of seven years.

When an enrolled IDTF or PXRS provides the professional component (PC) interpretation from a distant site, the Place of Service (POS) codes assigned by the physician or other provider will be the setting in which the patient received the technical component (TC) of the service.

Michigan policies regarding National Provider Identifier (NPI) Type, Global or Component Billing, and Referring/Ordering and Supervising Providers are available in this manual. Refer to the General Information for Providers, Billing & Reimbursement for Professionals, and Practitioner chapters for complete descriptions on required claim information.

SECTION 3 - INDEPENDENT DIAGNOSTIC TESTING FACILITIES (IDTF)

An IDTF is approved to provide specific diagnostic tests when performed by licensed, certified personnel (42 CFR 410.33). The IDTF must provide the appropriate amount of physician general supervision based on the number of enrolled locations.

The IDTF may have either a fixed or mobile location and different practice sites. Each practice location and/or mobile unit must be separately enrolled and meet all applicable requirements for the type of diagnostic test performed. A mobile IDTF can provide portable x-ray services if the provider is enrolled with Medicare for this service. To bill transportation and set up codes, the IDTF must also be a qualified and enrolled PXRS.

An IDTF does not provide therapeutic procedures. Test results from an enrolled IDTF are used by the referring provider in the medical management of the beneficiary.

SECTION 4 – PORTABLE X-RAY SUPPLIERS (PXRS)

In compliance with 42 CFR 410.32 (c) (i-ii), PXRS are limited to performing Medicaid covered x-rays of the extremities, pelvis, spine, skull, chest and abdomen. There must be one or more physicians who are responsible for the general supervision of the PXRS as described in 42 CFR 486.102.

An order from the provider treating the patient is required. The order must specify both the reason for the x-ray and the need for portable services.

PXRS claims may include up to four components:

- transportation when x-ray equipment is taken to the location where services are performed,
- set-up of the equipment,
- administration of the x-ray (technical component), and
- interpretation of the x-ray (the professional component).

Appropriate HCPCS and Level II HCPCS modifiers are required. If only one patient is served, report the appropriate HCPCS code. When more than one patient is served during a single trip to the same location, report the appropriate HCPCS code with the appropriate Level II HCPCS modifier (UN, UP, UQ, UR, US) relative to the number of patients served, irrespective of their insurance. The modifier determines the number of beneficiaries served at a location, and total payment for services is adjusted by the number of patients.

Portable x-rays furnished in a place of residence used as the patient's home, including a nursing facility, require the corresponding POS code.

For dual-eligible beneficiaries during a Medicare Part A-covered skilled nursing facility stay, transportation and set-up costs will follow Medicare-consolidated billing policy and are not separately billable to Medicare Part B or to Medicaid. No transportation charge is payable unless the portable x-ray equipment was actually transported to the location where the x-ray was taken.

SECTION 1 - GENERAL INFORMATION

This chapter applies to laboratory services performed in practitioner offices, hospital laboratories, and independent clinical laboratories.

Medicaid covers diagnostic laboratory services and pathology procedures reasonable and necessary to guide detection, diagnosis, management, and/or treatment of a specific medical condition, illness, or injury. Testing performed in a profile, panel, or battery is covered only when all the included tests are reasonable and necessary for the beneficiary.

Covered laboratory and pathology services must be:

- Recommended and ordered by the beneficiary's treating physician or other licensed practitioner working within their scope of practice as determined under State law.
- Provided in accordance with evidence based generally accepted standards of medical practice.
- Clinically appropriate in terms of type, frequency, extent, site, and duration for the beneficiary's symptoms, diagnosis, illness, or injury.
- Used in the clinical management of the beneficiary's specific medical condition.
- Provided in accordance with all applicable Medicaid clinical criteria, requirements, policies, and/or provisions of coverage.
- Not primarily for the convenience of the beneficiary or provider.
- Performed in a laboratory appropriately certified by the Clinical Laboratory Improvement Amendments (CLIA).

The beneficiary's medical record must include sufficient documentation to support the need for the laboratory service.

Medicaid covers a limited number of screening laboratory services including, but not limited to, those specified for the Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) Program, recommended as Grade A or B by the United States Preventive Services Taskforce, or identified in Medicaid policy. All other screening laboratory tests not reasonable or necessary for the diagnosis or management of the beneficiary's specific condition are not covered. This includes laboratory screening tests performed for investigational purposes only or as part of a clinical evaluation when the need for the test is not clinically indicated.

1.1 LABORATORY TYPES

1.1.A. PRACTITIONER'S OFFICE LABORATORY

Medicaid covers laboratory services provided in a physician's, physician assistant's (PA), nurse practitioner's (NP), clinical nurse specialist's (CNS), certified nurse midwife's (CNM), podiatrist's, or dentist's office laboratory when they are appropriate to be performed in the office. Practitioner's Office Laboratory (POL) reimbursement is limited to services listed on the applicable provider's fee schedule. Coverage includes procedures contained in the CLIA Physician Performed Microscopy list for appropriately

Michigan Department of Health and Human Services
Medicaid Provider Manual

certified physicians. For the purposes of Medicaid, a POL meets the following parameters:

- A physician, PA, NP, CNS, CNM, podiatrist, dentist, or group of practitioners maintains the laboratory.
- The laboratory performs testing only on specimens generated by the practitioners of the practice. The laboratory does not accept specimens from other physicians, clinics, or laboratories outside of the practice.
- Laboratory services are billed using the practitioner's or group practice's National Provider Identifier (NPI) number.
- The laboratory holds a CLIA certificate of registration, compliance (COC), accreditation (COA) waiver (COW) or a certificate of Physician Performed Microscopy Procedures (PPMP) from the Centers for Medicare & Medicaid Services (CMS).

A practitioner may not charge for laboratory tests when a specimen is obtained but sent out of the office (i.e., skin lesions, pap smears, etc.) for analysis.

1.1.A.1. PROVIDER-BASED OUTPATIENT HOSPITAL CLINICS

Medicaid covers laboratory services provided in a provider-based outpatient hospital clinic when they are appropriate to be performed in a clinic setting. Outpatient provider-based hospital clinics are not considered POLs by Medicaid and must meet the following parameters:

- Owned and operated by a hospital.
- May be located on the same campus as the main hospital or located off-campus.
- Holds a CLIA certificate of registration, COC, COA, COW, or PPMP from CMS separate from the hospital if located off campus.
- Beneficiaries are treated as hospital outpatients for billing purposes.

1.1.A.2. OTHER CLINICS

Medicaid covers medically necessary laboratory services provided in a variety of clinics including, but not limited to, family planning clinics, urgent care centers (UCCs), walk-in health clinics, school-based clinics, rural health clinics (RHC), federally qualified health centers (FQHC), and Indian health centers (i.e., tribal FQHCs and tribal health centers [THC]) when they are appropriate to be performed in these settings. These clinics are not considered POLs by Medicaid and covered laboratory services are limited to those appropriate for the clinic type. Providers should refer to the Family Planning Clinics, Urgent Care Centers, School Services Program, Tribal Health Centers, Rural Health Clinics, and Federally Qualified Health Centers chapters in this manual and Medicaid fee schedules for additional information related to these clinics.

1.1.B. INDEPENDENT CLINICAL LABORATORY

Medicaid covers laboratory services performed by an independent clinical laboratory. Independent laboratories are limited to providing only the laboratory services listed on the Medicaid Laboratory Fee Schedule. For the purposes of Medicaid, an independent clinical laboratory meets the following parameters:

- A freestanding clinical laboratory that is independent of a physician office, hospital, or hospital-based facility.
- May be owned by a physician, group practice, a pharmacy, or a non-physician.
- Laboratory services are billed using the independent clinical laboratory's NPI number.
- Holds a CLIA certificate of registration, COC, COA, or COW from CMS.

1.1.C. HOSPITAL OUTREACH LABORATORY

Medicaid covers laboratory services performed by a clinical laboratory located in or as part of a hospital. Laboratory services performed (either directly or under arrangement) for non-hospital patients (i.e., those who are neither a registered outpatient nor inpatient hospital patient) are considered performed by a hospital outreach laboratory.

For the purposes of Medicaid, a hospital outreach laboratory meets the following parameters:

- Furnishes laboratory tests to patients other than inpatients or registered outpatients of the hospital.
- Holds a CLIA certificate of registration, COC, or COA from CMS.
- Laboratory services are billed using either the hospital's NPI number or the hospital clinical laboratory's NPI number.
- Bills for services using Form CMS-1450 14x TOB.

1.2 ORDERING PRACTITIONER

Laboratory services provided to Medicaid beneficiaries can be ordered by the following Medicaid enrolled practitioners:

- Physicians (MD or DO)
- Physician assistant (PA)
- Advanced practice registered nurse (APRN) [including certified nurse practitioners (NP), certified clinical nurse specialists (CNS) and certified nurse midwives (CNM)]
- Certified Registered Nurse Anesthetists (CRNA)
- Podiatrist (DPM)
- Dentist (DDS or DMD)

Michigan Department of Health and Human Services
Medicaid Provider Manual

Providers should only order laboratory services that fall within the practitioner's scope of practice. To be eligible for Medicaid reimbursement, claims for laboratory services must indicate the Medicaid enrolled, allowable ordering provider.

Medicaid does not cover any laboratory tests ordered by a chiropractor.

The ordering practitioner must document the medical necessity of laboratory tests in the beneficiary's medical record, regardless of where the test(s) is performed. The ordering practitioner is held responsible if they order excessive or unnecessary laboratory tests, regardless of who actually renders the laboratory services. The ordering practitioner is also held responsible for the medical necessity of every laboratory test that is ordered as part of a custom- or laboratory-designed panel. The ordering practitioner may be subject to corrective action related to these services, including recoupment of funds. The laboratory also may be subject to corrective action, including the recoupment of funds, if it submits a claim for laboratory services not specifically ordered by a practitioner.

These ordering requirements apply to all Medicaid beneficiaries. Claims for beneficiaries with Medicare or private insurance coverage will not be exempt from this requirement. (Refer to the specific Billing & Reimbursement chapters for additional information.)

Laboratory services performed by a laboratory or its employees may not be billed to the ordering practitioner.

1.3 ORDER REQUIREMENT

A signed order, a signed requisition, or a signed medical record supporting the provider's intent to order tests satisfies the order requirement for laboratory tests.

1.4 STANDING ORDERS

Medically necessary laboratory services ordered and performed due to standing orders are eligible for reimbursement when they are based on clinical treatment protocols applicable to the specific beneficiary. Standing orders for routine screening tests are not covered unless the medical necessity is documented in the beneficiary's medical record. Ordering providers must maintain documentation of the standing order, medical necessity, duration, and frequency of the testing in the beneficiary's medical record.

1.5 SPECIMEN SOURCE

A tested laboratory specimen may be from any source unless the source is specified in the procedure code description.

1.6 OUT OF STATE/BEYOND BORDERLAND LABORATORIES

Medicaid reimburses enrolled out of state laboratories who are beyond the borderland area only if the service meets the criteria outlined in Medicaid policy. Laboratories should refer to the Out of State/Beyond Borderland Providers subsection located within the General Information for Providers chapter of this manual for more information. Non-emergent lab services performed by an out of state/beyond borderland laboratory must be prior authorized unless Medicare and/or private insurance has paid a portion of the service and the laboratory is billing Medicaid only for the coinsurance and/or deductible amounts.

Michigan Department of Health and Human Services

Medicaid Provider Manual

Managed Care Plans follow their own prior authorization criteria for out of network/out of state services. Laboratories participating in a Medicaid Health Plan (MHP) should contact the plan for prior authorization information.

1.7 REPEAT TESTS

Medicaid does not cover tests or services that are duplicated due to laboratory error.

SECTION 2 - BILLING INFORMATION

Refer to the Billing & Reimbursement chapters of this manual for additional information about billing.

2.1 DATE OF SERVICE

When billing Medicaid for services rendered, the date of service (DOS) indicated on the claim must be the date the specimen is collected. Laboratory tests performed on a stored specimen must use the date the specimen was obtained from storage as the specimen collection date.

2.2 MEDICAL NECESSITY

The beneficiary's medical record and claims (with applicable attachments when required) must contain documentation of the medical necessity of the laboratory service including, but not limited to, descriptions of the beneficiary's symptoms and other findings that led the practitioner to order the laboratory test(s). An explanation of the laboratory testing method or the results of the diagnostic tests, whether normal or abnormal, is not documentation of medical necessity. For approval of payment, the laboratory procedure(s) must be specific and appropriate to the beneficiary's documented condition and diagnosis.

2.3 CLINICAL LABORATORY IMPROVEMENT AMENDMENTS CERTIFICATION

All providers must have a Clinical Laboratory Improvement Amendments (CLIA) certification to perform laboratory testing on specimens. CLIA certification includes a certificate of waiver, certificate for provider-performed microscopy procedures, certificate of registration, certificate of compliance (COC), or a certificate of accreditation (COA). A CLIA certification is needed for each location where laboratory testing is performed unless one of the following exceptions applies:

- The laboratory is not at a fixed location.
- The laboratory is a not-for-profit or Federal, State, or local government laboratory engaged in limited public health testing.
- The laboratory is located within the same physical location or street address as a hospital. The lab must be in a contiguous building on the same campus as the hospital and must be under common direction.

To be eligible for Medicaid reimbursement, a clinical laboratory must be certified to perform the specialties or subspecialties of tests billed to Medicaid as of the date the tests are performed. A laboratory's CLIA number must be present on the claim and laboratory providers are limited to billing the lab services that they are CLIA certified to perform.

Procedure codes subject to CLIA certification change each year. Medicaid aligns with CMS' identification of laboratory services subject to CLIA waived and non-waived certification. When performing tests that use waived methodologies, laboratories must enter the QW modifier with the appropriate Current Procedural Terminology (CPT) code to denote the waived test when billing Medicaid for services rendered.

Michigan Department of Health and Human Services
Medicaid Provider Manual

Questions regarding CLIA certification should be addressed to the state licensing agency. (Refer to the Directory Appendix for contact information.)

2.4 PROCEDURE CODES

Laboratories should refer to the current edition of the CPT or Healthcare Common Procedure Coding System (HCPCS) manuals published by the American Medical Association (AMA) for the appropriate procedure code to use when billing Medicaid. The descriptor assigned to a code represents the definition of the item/service that can be billed using that code. The laboratory is also subject to any pathology and laboratory guidelines listed in the CPT/HCPCS manual that provide definitions and/or instructions for specific tests.

If no established procedure code adequately describes the item, use the appropriate Not Otherwise Classified (NOC) CPT/HCPCS procedure code. All laboratory NOC codes require prior authorization (PA).

For specifics regarding the CPT and HCPCS codes used to denote covered services, refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers chapter or the Medicaid Code and Rate Reference tool on the MDHHS website for more information. (Refer to the Directory Appendix for website information.)

2.5 COMPONENT BILLING

Most pathology procedures are billed together as a complete or global service, and a single charge is made for both professional and technical components. However, some pathology procedures are composed of professional and technical components that are billed separately by the laboratory facility and the practitioner. In these instances, the procedure code requires the use of a modifier to accurately identify the service component provided. Providers should not bill for component services when the entire procedure is performed.

Payment for the technical component to the laboratory includes personnel, materials, space, equipment, report of test results, and other items.

The professional component represents the professional services of a pathologist/hematologist. Medicaid covered professional components are limited to certain services as noted on the Practitioner and Medical Clinic Fee Schedule located on the MDHHS website. (Refer to the Directory Appendix for website information.) Payment for this component includes:

- Examination of the beneficiary, when indicated.
- Performance and supervision of the procedure.
- Reading, interpretation, and written report of the findings.
- Consultation with the ordering physician.

Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers chapter for additional information regarding coverage parameters.

When the laboratory performs services for hospital inpatients, only the pathologist/hematologist can bill the professional component (the pathologist's services) directly to Medicaid. The technical component is included in the reimbursement to the hospital for the inpatient services.

2.6 OTHER INSURANCE

If the beneficiary has another insurance plan (e.g., Medicare or commercial insurance) and the service is a covered benefit, the provider must follow the requirements of the other insurance plan(s) including, but not limited to, PA and standards of coverage. (Refer to the Coordination of Benefits chapter for more information.)

Medicaid reimburses laboratories for the coinsurance and deductible amounts subject to Medicaid's reimbursement limitations on all Medicare-approved claims even if Medicaid does not normally cover the service.

2.7 BILLING FOR SERVICES PERFORMED BY REFERENCE LABORATORIES UNDER ARRANGEMENT WITH ENROLLED HOSPITAL LABORATORIES

Following Medicare guidelines and applicable state and federal laws in situations where an enrolled hospital laboratory must refer a specimen to another laboratory for testing, the hospital laboratory will be allowed to bill Medicaid for the arranged services provided by the reference laboratory under the following conditions:

- The reference laboratory holds the required CLIA certification and state licensure, if required, to perform the test;
- The enrolled hospital laboratory and the reference laboratory have a contractual agreement (as defined as "arrangement" in section 1861(w)(1) of the Social Security Act) to provide such services, with the referring hospital laboratory responsible for reimbursing the reference laboratory for the services; and
- If the service requires PA, the enrolled hospital laboratory must request and receive PA approval for the service to be performed by the reference laboratory. The PA number must be included on the claim.

The definitions of reference laboratory and referring laboratory may be found in the Glossary Appendix.

2.8 BILLING FOR LABORATORY SERVICES PERFORMED IN A HOSPITAL CLINIC

Hospital owned or affiliated practices must bill for laboratory services performed in the office or clinic using the institutional claim format. Refer to the Hospital chapter for complete billing and reimbursement information.

2.9 TEST RESULTS

Reimbursement is made for tests performed using a method that yields quantitative results unless the nomenclature specifies a different method.

The mathematical calculation of two or more results to produce an index or ratio or any other result may not be billed as a separate independent test.

SECTION 3 - REIMBURSEMENT

Unless otherwise specified within Medicaid policy, Medicaid's reimbursement for laboratory services includes:

- collection, handling, and conveyance of the specimen(s);
- all supplies, reagents, equipment, and instrumentation used in the test's processing; and
- lab test results and analysis.

3.1 PRACTITIONER'S OFFICE OR INDEPENDENT CLINICAL LABORATORY

Reimbursement rates for laboratory services provided by a practitioner's office or independent clinical laboratory are established by MDHHS as a fee screen for each procedure. Medicaid uses the Medicare Clinical Laboratory Fee Schedule (MCLFS) prevailing fees as a guideline or reference in determining the maximum fee screens for individual laboratory procedures. Services are reimbursed at a maximum rate of 90% of the MCLFS. Minimally, the Medicaid Clinical Laboratory fee schedule is updated annually following the January release of the MCLFS.

A pathologist or hematologist, when billing separately, will be reimbursed for the professional component of pathology services. The professional component must be billed with the appropriate modifier and will be paid according to the rates established by the MDHHS Practitioner fee schedule.

3.2 OUTPATIENT HOSPITAL

Laboratory services provided by outpatient hospitals are reimbursed through the Medicaid Outpatient Prospective Payment System (OPPS). Laboratory tests provided in conjunction with other services are generally packaged as ancillary services and do not receive separate reimbursement unless otherwise indicated by the procedure code's OPPS payment status indicator and/or determined under OPPS claim processing rules. If the beneficiary is not considered a hospital patient, laboratory services provided by the hospital outreach laboratory are eligible for separate Medicaid reimbursement.

Generally, Medicaid follows Medicare's OPPS laboratory coverage and reimbursement policies whenever possible and appropriate. In instances where there are program differences, the differences will be reflected through the application of the MDHHS specific status indicator. Procedure codes associated with the identified laboratory services will appear on the MDHHS OPPS Wraparound Code List and reimbursement rates will appear on the Carrier Priced Laboratory Codes List. Both lists are available on the MDHHS website. (Refer to the Directory Appendix for website information.)

A beneficiary cannot be charged for any covered laboratory procedure, including those that are determined not to be medically necessary.

3.3 END STAGE RENAL DISEASE (ESRD) FACILITY

Reimbursement for routine laboratory services related to maintenance hemodialysis, peritoneal dialysis, and continuous cycling peritoneal dialysis (CCPD) dialysis are included in Medicaid's dialysis composite rate and may not be billed separately unless it is medically necessary to perform the services in excess of the frequencies indicated by Medicaid policy. This includes routine laboratory tests performed by either a

Michigan Department of Health and Human Services

Medicaid Provider Manual

dialysis facility or by an outside laboratory. Providers should refer to the Dialysis (Hemodialysis and Peritoneal Dialysis) subsection of the Hospital chapter for laboratory tests included in the composite rate.

Laboratory services included in the composite rate should be billed to the dialysis facility when performed by an outside laboratory. The dialysis facility and the outside laboratory must coordinate billing to ensure duplicate payments do not occur. A freestanding dialysis center that performs its own laboratory tests and needs to bill for services outside of those included in the composite rate must enroll with Medicaid as an independent laboratory. Freestanding dialysis centers enrolled as independent laboratories are subject to the Out of State/Beyond Borderland Provider Medicaid policy. Providers should refer to the Out of State/Beyond Borderland Providers subsection located within the General Information for Providers chapter of this manual for more information.

SECTION 4 - SPECIAL COVERAGE

4.1 CHILDREN'S SPECIAL HEALTH CARE SERVICES COVERAGE

For beneficiaries with Children's Special Health Care Services (CSHCS) coverage only, CSHCS covers laboratory services related to the beneficiary's qualifying diagnosis and related conditions. Services should be ordered by the beneficiary's authorized CSHCS specialty provider and performed by a CSHCS approved laboratory to be eligible for reimbursement.

4.2 ANATOMIC PATHOLOGY

Cryopreservation (frozen cell storage and thawing) is a covered service for bone marrow transplants only.

4.3 ARSENIC TESTING

Arsenic testing is not covered when performed on hair and nail specimens.

4.4 CREATININE BLOOD TESTS

Serum creatinine laboratory tests are Medicaid covered. Tests should calculate and report the estimated Glomerular Filtration Rate (eGFR) for beneficiaries. The eGFR may be calculated based on a formula that combines the creatinine level with the beneficiary's age, gender, and other factors.

4.5 EVOCATIVE/SUPPRESSION TESTING

Medicaid does not cover these panel codes. Providers should report the individual test codes on claims.

4.6 DRUG SCREENING/MONITORING

Drug monitoring is an important tool for a variety of reasons including, but not limited to, beneficiary compliance/adherence to a prescribed regimen, determination of substances prior to initiating pharmacologic treatment, and substance misuse or abuse. Medicaid covers presumptive and/or definitive drug testing when medically necessary. The beneficiary's medical record must include the testing frequency, rationale for the drugs/drug classes ordered, rationale for the type(s) of testing ordered (presumptive, definitive, or both), and the results. Laboratories performing validity testing on specimens utilized for drug testing should not separately bill for the validity testing.

4.7 NEWBORN LABORATORY SCREENING

Newborn laboratory screening (via heel stick) includes testing for rare genetic, metabolic, blood, or other disorders recommended by the Advisory Committee on Heritable Disorders in Newborns and Children and by Michigan's Newborn Screening Quality Assurance Advisory Committee. Blood samples should be sent by the birthing hospital, center, or other healthcare facility to the MDHHS Bureau of Laboratories Newborn Screening Section for processing. (Refer to the Directory Appendix for additional information.) If the birth occurs outside of these entities, then it is the responsibility of the attending provider to collect and send the sample to the MDHHS laboratory. In the event of an abnormal test result, the results shall be reported by the MDHHS laboratory to the newborn's physician or healthcare provider, parent or legal

guardian, and the appropriate Newborn Screening (NBS) Program coordinating center or specialty referral center.

Newborn screening reimbursement is included in Medicaid's payment to the birthing hospital, birthing center, or other healthcare facility through the facility's Diagnosis Related Group (DRG) rate and is not separately reimbursable.

If a NBS disorder is suspected, follow-up diagnostic laboratory testing is a Medicaid covered benefit.

4.8 ORGAN OR DISEASE ORIENTATED PANELS

Medicaid covers select AMA-approved organ-or disease-orientated panels. All tests within the panel must be medically necessary. When a complete panel is ordered and all the tests within the panel are performed on the same date of service, the laboratory must report a panel code. When some, but not all, tests identified in a panel are performed, the laboratory should report the services as individual tests. If a group of tests overlaps two or more panels, the laboratory must report the panel that incorporates the greater number of tests to fulfil the code definition and report the remaining tests as individual tests.

4.9 PAP SMEAR

Pap smear screening is a covered service when provided in accordance with Medicaid's preventive services policy as outlined in the Preventive Services subsection of the Practitioner chapter. More frequent pap smears may be covered when medically necessary. If a suspect smear requires additional interpretation by a pathologist, this service is also covered. Coverage for obtaining the cervical smear is included as a part of the pelvic examination and is not eligible for separate reimbursement.

4.10 PATHOLOGY CLINICAL CONSULTATION

Pathology clinical consultations are covered when billed by a hematologist/pathologist for the review of abnormal laboratory test results if:

- The abnormality relates to the beneficiary's medical condition and corresponding medical care.
- The referring provider orders the review and records the order in the beneficiary's medical record.
- Additional medical interpretative judgement is required.
- A detailed report is sent to the referring provider.

Consultations cannot be billed for routine quality control review. (Refer to the current CPT manual for the guidelines for the provision of this service.)

4.11 PREGNANCY RELATED LABORATORY SERVICES

Medicaid covers routine pregnancy testing (serum or urine human chorionic gonadotropin [hCG] qualitative method) and medically necessary prenatal or pregnancy related laboratory services required to support the health of the fetus or pregnant beneficiary.

4.12 PROSTATE SPECIFIC ANTIGEN (PSA) SCREENING

Medicaid covers prostate specific antigen (PSA) laboratory tests when used in the screening for prostate cancer and performed in accordance with current, generally accepted professional standards of medical practice or determined medically necessary for the diagnosis or management of the beneficiary by the ordering/treating provider.

4.13 SPECIMEN COLLECTION [CHANGES MADE 4/1/2025]

Specimen collection is the process of obtaining tissue, blood, urine, stool, or other bodily fluids for laboratory analysis. Specimen collection is considered to be an integral part of the laboratory testing procedure and is included in the reimbursement for the processing of the specimen. A separate specimen collection fee is allowed in special circumstances where the drawing, packaging, and mailing of a blood specimen are the only services provided. These situations are rare and include:

- A beneficiary is referred to a laboratory for the sole purpose of drawing, packaging, and mailing a blood sample to MDHHS for analysis (e.g., blood lead or human immunodeficiency virus (HIV) viral load). MDHHS provides specimen containers and mailing kits for the analysis. Requests for supplies and the samples for analysis should be sent to the MDHHS Bureau of Laboratories. (Refer to the Directory Appendix for contact information.)
- A beneficiary requires blood laboratory tests that are not performed in conjunction with other reimbursable services. Whenever possible, the beneficiary should be sent to the laboratory that is performing the test(s). If this is not practical (i.e., the laboratory is not a local facility) and the sole purpose of a visit is to draw, package, and mail the sample to a laboratory, the blood-handling fee may be billed by the practitioner. The blood-handling fee is not a benefit when any other service is reimbursable on the same date of service.
- Specimens obtained by the Local Health Department (LHD) for blood lead analysis sent to the State Laboratory or outside clinical laboratory that is CLIA-certified to perform blood lead analysis. Refer to the Local Health Department chapter for additional information. (text added 4/1/2025)

Procedure code 36415 (routine venipuncture for collection of specimen[s]) must be used when billing Medicaid for the drawing, packaging, and mailing of the blood sample. LHDs may report either capillary or venipuncture for blood lead draws. (text added 4/1/2025) Only one collection fee for each beneficiary encounter, regardless of the number of specimens drawn, will be allowed. Blood specimen collection may only be billed when the laboratory is not owned, operated, or financially associated with the provider site in which the specimen was collected.

4.14 URINALYSIS

The analysis of urine for the diagnosis and monitoring of illness and disease is covered by Medicaid.

If a single urine specimen is analyzed for the same chemical, element, compound, or substance by more than one method (i.e., automated, non-automated, qualitative, semi-qualitative, non-culture bacteriuria screen), only one method may be reported.

4.15 BLOOD COUNT

A practitioner's order for a complete blood count (CBC) with white blood cell (WBC) differential includes a red blood cell (RBC) count, WBC count; hemoglobin (Hgb); hematocrit (Hct); mean corpuscular volume (MCV), mean corpuscular hemoglobin (MCH), mean corpuscular hemoglobin concentration (MCHC), red cell distribution width (RDW), WBC differential, and a platelet count (PLT). If automated instrumentation yields additional test results, the additional tests are not separately reimbursable unless medically necessary and specifically ordered by a practitioner.

4.16 MICROBIOLOGY STUDIES

Definitive culture procedure codes may not be billed in combination with other microbiology codes that duplicate the identification of a microbe.

Coverage and reimbursement for gram fluorescent/acid fast is included in the reimbursement for microbiology when performed on the same date of service (DOS) for the same beneficiary.

SECTION 5 – GENETIC AND MOLECULAR TESTING

5.1 GENERAL INFORMATION

A genetic test or molecular test as defined in §17001 of Public Act 368 of 1978 means the analysis of human deoxyribonucleic acid (DNA), ribonucleic acid (RNA), chromosomes, and those proteins and metabolites used to detect inheritable or somatic disease related genotypes or karyotypes. These specialized diagnostic laboratory tests may identify increased risks of health problems, help choose treatments, or assess patient responses to treatments.

Medicaid covers genetic and molecular tests when clinically indicated by one or more of the following:

- The test is necessary to confirm a suspected genetic disease/condition when a definitive diagnosis remains uncertain, and the results will directly impact the beneficiary's treatment or management.
- The test will guide treatment and management of a beneficiary already diagnosed with a disease/condition by one or more of the following:
 - Predicting progression, aggressiveness, or recurrence.
 - Selecting specific medications, treatments, and interventions.
- The test will predict a risk of a genetic disease/condition or is necessary to detect an undiagnosed health condition in an asymptomatic beneficiary and the results will directly impact the beneficiary's treatment or management. Coverage of these screening tests is limited to tests recommended as Grade A or B by the United States Preventive Services Task Force (USPSTF) or tests specially identified in Medicaid policy (e.g., screening for fetal trisomy 13, trisomy 18, or trisomy 21 using noninvasive prenatal testing [NIPT]).

To be eligible for Medicaid reimbursement, the following requirements apply:

- The test must be ordered by a Medicaid-enrolled, licensed physician (MD or DO), physician assistant, or advanced practice registered nurse (e.g., Certified Nurse Practitioner [NP], Certified Clinical Nurse Specialist [CNS], and Certified Nurse-Midwife [CNM]), acting within their professional scope of practice.
- The beneficiary must have one or more of the following:
 - Documented clinical features symptomatic of a disease/condition.
 - A risk of inheriting the disease/condition based upon factors including, but not limited to, personal history, family history, documentation of a genetic mutation and/or ethnic background.
 - Other disease/condition-specific criteria that places them at risk.
- A physical examination, medical history, family history/pedigree analysis, and conventional diagnostic testing (when appropriate and applicable) must be completed prior to testing.

The clinical utility of all requested genes and gene variants must be established and documented in the beneficiary's medical record regardless of where the test(s) is performed.

Testing is allowed once during the beneficiary's lifetime per disease for diagnostic purposes. If medically necessary, and on a case-by-case basis, PA may be requested to allow for exceptions to this restriction.

Providers must follow state law (Public Act 368 of 1978, Section 333.17020 Genetic test; informed consent) regarding informed consent for predictive genetic testing. This includes any statutory requirements for pre- or post-testing genetic counseling. There must be made available, upon request, documentation of informed consent provided before testing. This documentation must include the limitations of the test, possible outcomes, and methods for communicating and maintaining confidentiality of results.

5.1.A. TEST REQUIREMENTS

A Medicaid-covered genetic or molecular test must:

- Be performed at a Medicaid-enrolled laboratory that is properly certified by CLIA to perform the test.
- Include detected genes, variants, or biomarkers that are shown, by sufficient evidence and scientifically valid methods, to be associated with the risk of, predisposition to, or occurrence of the disease.
- If applicable, utilize a laboratory technology that is a U.S. Food and Drug Administration (FDA)-approved method to identify or evaluate risk for the genetically linked disease/condition, genetic biomarker, or pharmacogenetic variant.
- Have established analytical validity, clinical validity, and clinical utility as evidenced by the following:
 - Clinical performance supported by scientific evidence, peer-reviewed medical literature, definitive or well-established evidence-based guidelines.
 - Test results that can be independently replicated and are attainable outside of investigational settings when used under the usual conditions of medical practice.
 - Test results that provide as much health benefit as established alternatives.
 - Test results that reduce the need for further diagnostic testing or treatment, allow for less intensive treatment due to earlier detection, or help avoid ineffective interventions.

5.2 AUTHORIZATION REQUIREMENTS

Authorization is required for most genetic and molecular laboratory tests. (Refer to the Community Health Automated Medicaid Processing System (CHAMPS) Code Rate and Reference tool for authorization necessity.) Authorization requests must be submitted to MDHHS within 30 days of the DOS. Specimen processing should not be completed until after the authorization request has been approved.

Authorization requests require supporting medical documentation relevant to the requested test or a Genetic and Molecular Laboratory Test Authorization Request form (MSA-2081) completed by the beneficiary's Medicaid enrolled treating/ordering provider (i.e., MD, DO, PA, NP). (Refer to the Forms Appendix for a copy of the form, including form completion instructions.) Medical necessity letters submitted as clinical documentation must be beneficiary specific and created and signed by the treating/ordering provider. Generic statements, letters, or order/requisition forms created by the

Michigan Department of Health and Human Services
Medicaid Provider Manual

performing laboratory will not be accepted as a substitute for clinical documentation from the medical record or completion of MSA-2081. The completed MSA-2081 and/or supporting clinical documentation must document the following:

- Indication for the test. Indications should be beneficiary specific and clinical in nature.
- The beneficiary's related signs and symptoms.
- Family history relevant to the beneficiary's condition and test being requested. A family pedigree analysis must be made available upon request.
- Other related testing or clinical findings of the beneficiary or family member.
- How the test results will be used to significantly alter the management or treatment of the disease. This definitive treatment or action plan should be specific to the beneficiary and completed by the provider who will manage the beneficiary using the test results.
- The name and NPI number of the laboratory performing the test.
- The name, specialty, and NPI number of the provider ordering the test.
- Treating/ordering provider signature. Alternatively, a signed laboratory order or requisition or signed medical documentation supporting the clinician's intent to order the test will satisfy the MSA-2081 signature requirement.

5.2.A. AUTHORIZATION SUBMISSION

Authorization requests must be submitted electronically to the MDHHS Program Review Division via Direct Data Entry (DDE) utilizing CHAMPS whenever possible. Providers should enter the request directly into the CHAMPS Prior Authorization Request List page. All authorization requests must include form MSA-2081 and/or supporting clinical documentation. Documents should be electronically uploaded within the Additional Documents section of the CHAMPS authorization request. If the supporting documentation is unable to be uploaded, items may be faxed separately to the MDHHS Program Review Division using the bar-coded fax cover sheet generated by CHAMPS when the fax option is selected. A notation that documentation has been separately faxed should be made in the Procedure Code Comment field of the electronic authorization request. If the correct bar-coded fax cover sheet is not used, faxed documentation may not be associated to the authorization request.

Providers unable to submit authorization requests electronically may submit authorization requests via fax or mail to the MDHHS Program Review Division using the MSA-2081. Providers must include only one authorization request per fax.

The MSA-2081 should be completed by the treating/ordering provider and submitted to MDHHS by the billing (laboratory) provider. The form must be:

- Typed – All information must be clearly typed in the designated boxes; and
- Thorough – Complete information, including the appropriate CPT/HCPCS diagnostic testing procedure codes with applicable modifiers, must be provided on the form. Form MSA-2081 and all documentation must include the beneficiary's name and other

identifying information (i.e., beneficiary identification [ID number] or date of birth [DOB]).

Providers may check the status of an authorization request on the CHAMPS Prior Authorization Request List page. An electronic copy of the determination letter may also be viewed within CHAMPS. A copy of the letter will be mailed to the provider and beneficiary. The letter must be retained in the beneficiary's medical record.

5.2.B. BENEFICIARY ELIGIBILITY

Approval of a laboratory test listed on form MSA-2081 confirms that the service is authorized for the beneficiary. Approval does not guarantee beneficiary eligibility or reimbursement. To ensure payment, the provider must verify the beneficiary's eligibility prior to processing the laboratory specimen.

5.2.C. BILLING AUTHORIZED SERVICES

After an authorization is issued, the information (e.g., authorization number, procedure code, modifier, and quantity) that was approved must match the information submitted on the claim form.

5.2.D. REIMBURSEMENT

Most laboratory services have established fee screens that are published in the MDHHS Laboratory Fee Schedule. For NOC procedure codes and procedure codes without established fee screens, the approved reimbursement amount is indicated on the authorized MSA-2081.

5.2.E. RETROACTIVE AUTHORIZATION

Laboratory authorizations must be requested within 30 days of the DOS unless the beneficiary was not eligible on the DOS and a subsequent eligibility determination was made retroactive to the DOS. If the MDHHS eligibility file does not show that retroactive eligibility was approved, requests for authorization received more than 30 days after the DOS will be denied.

5.3 GENETIC COUNSELING

Medicaid covers medically necessary genetic counseling services as defined in section 333.17001 (Act 368 of 1978) when ordered and performed by a Medicaid-enrolled physician, PA, or APRN (NPs, CNSs, and CNMs). Genetic counseling may also be provided by a Medicaid-enrolled licensed Genetic Counselor. Genetic Counselors should refer to the Practitioner chapter for additional information.

Counseling is covered when provided in consideration of, or in conjunction with, genetic testing, or provided in relation to a genetic or congenital condition. Services are considered medically necessary when there is an expectation that a genetically inherited or acquired condition exists, and the beneficiary displays clinical features or is at risk of inheriting the disease/condition based upon factors including, but not limited to, personal history, family history, documentation of a genetic mutation, and/or ethnic background.

5.4 MEDICAID HEALTH PLANS

The genetic and molecular testing standards of coverage, PA, and documentation requirements outlined within this chapter apply to beneficiaries served by Fee-for-Service (FFS) Medicaid. For beneficiaries enrolled in a Medicaid Health Plan (MHP), the provider must check with the beneficiary's plan for coverage and PA requirements.

5.5 MULTI-GENE PANELS

Medicaid defines multi-gene panels as any assay that simultaneously tests for more than one gene associated with a condition or symptom. The term "gene", when used throughout this section, will be used to indicate a gene, region of a gene, and/or variant(s) of a gene.

Genes assayed on the same DOS will be considered assayed in parallel if the result of one assay does not affect the decision to complete the assay on another gene, and the genes are being tested for the same indication. If a laboratory assays multiple genes simultaneously in parallel, then those genes will be considered part of the same panel. As a panel constitutes a single procedural service, one procedure code must be submitted for the panel. The laboratory should not report multiple individual procedure codes describing the gene component test results.

If a procedure code is available for the multi-gene panel test, this procedure code should be utilized. If no procedure code accurately describes the panel performed, an unlisted molecular pathology or unlisted molecular multi-analyte assay with algorithmic analysis procedure code (as applicable) may be used. When an unlisted procedure code is reported, providers should include the name of the panel test in box 21 of form MSA-2081. The test name should also be reported in the Procedure Code Comment field in the MDHHS CHAMPS authorization form.

Genes assayed on the same DOS will be considered assayed serially when the results of one or more gene analyses determines whether additional analyses are reasonable and necessary. When genes are serially assayed, the laboratory should submit claims with the genes reported individually.

5.6 RAPID WHOLE GENOME SEQUENCING

Medicaid covers medically necessary rapid whole genome sequencing (rWGS) testing for the evaluation of critically ill infants admitted to an inpatient intensive care unit with a complex illness of unknown etiology. rWGS is medically necessary when all the following apply:

- The beneficiary is one year of age or less;
- The beneficiary's signs or symptoms suggest a rare genetic condition that cannot be diagnosed by a standard clinical work-up;
- The beneficiary's signs and symptoms suggest a broad, differential diagnosis that could require multiple genetic tests if rWGS was not performed;
- Timely identification of a molecular diagnosis is necessary in order to guide clinical decision making, and the rWGS results will guide the treatment and/or management of the beneficiary's condition; and
- At least one of the following clinical criteria apply to the beneficiary:
 - Multiple congenital anomalies

Michigan Department of Health and Human Services
Medicaid Provider Manual

- Specific malformations highly suggestive of a genetic etiology
- An abnormal laboratory test suggests the presence of a genetic disease or complex metabolic phenotype (e.g., abnormal newborn screen, hyperammonemia, or lactic acidosis not due to poor perfusion)
- Refractory or severe hypoglycemia
- Abnormal response to therapy related to an underlying medical condition affecting vital organs or bodily systems
- Severe hypotonia
- Refractory seizures
- A high-risk stratification on evaluation for a Brief Resolved Unexplained Event (BRUE) with any of the following features:
 - Recurrent events without respiratory infection
 - Recurrent witnessed seizure-like events
 - Required cardiopulmonary resuscitation (CPR)
 - Abnormal chemistry levels (e.g., electrolytes, bicarbonate, lactic acid, venous blood gas, glucose) suggestive of inborn error of metabolism
 - Abnormal cardiac diagnostic testing results suggestive of possible channelopathies, arrhythmias, cardiomyopathies, myocarditis, or structural heart disease
 - Family genetic history related to beneficiary's condition

rWGS is not covered when one of the following reasons explains the beneficiary's admission:

- An infection or sepsis with normal response to therapy
- Confirmed prenatal/postnatal genetic diagnosis consistent with the beneficiary's condition
- Hypoxic-Ischemic Encephalopathy (HIE) with a clear precipitating event
- Isolated prematurity
- Isolated Transient Tachypnea of the Newborn (TTN)
- Isolated unconjugated hyperbilirubinemia
- Nonviable neonate
- Trauma
- Meconium aspiration

5.6.A. PROVIDER EVALUATION

Prior to ordering rWGS, the beneficiary must be evaluated by a medical geneticist or other physician sub-specialist with expertise in the conditions and/or genetic disorder for which testing is being considered. The consultation must be documented in the beneficiary's medical record and, if performed via telemedicine, should follow all the requirements specified in Medicaid's telemedicine policy.

5.6.B. TEST RESULTS

The purpose of rWGS is to identify a molecular diagnosis in a timely manner in order to directly support and impact both acute medical or surgical management and short- and long-term clinical outcomes. rWGS should be ordered when the beneficiary is critically ill and the results are intended to be used in the hospital management of the beneficiary. Generally, a preliminary test report from the performing laboratory should be provided to the beneficiary's ordering physician in less than seven days and a final report in less than 14 days. Hospitals should only utilize laboratories whose average expected turnaround time for rWGS processing meets these established time frames.

5.6.C. PRIOR AUTHORIZATION

rWGS requires MDHHS approval. Providers should refer to the Genetic and Molecular Testing section - Authorization Submission subsection in this chapter for submission instructions.

5.6.D. BILLING AND REIMBURSEMENT

Reimbursement for rWGS testing is available to Medicaid enrolled hospitals performing rWGS (directly or through a reference laboratory arrangement) when the test meets Medicaid's coverage guidelines and authorization is obtained. Costs associated with inpatient rWGS testing are excluded from the DRG payment and reimbursement will be made in accordance with the Medicaid laboratory fee screens.

For MHP enrolled beneficiaries, rWGS testing services provided in the inpatient hospital setting prior to discharge are carved-out of the MHPs contract. Such services will be reimbursed by FFS per Medicaid policy.

5.7 OUT OF STATE/BEYOND BORDERLAND LABORATORIES

Due to the specialty nature of genetic and molecular services, testing may not be readily available through an in-state laboratory. Genetic and molecular testing performed by an out-of-state or beyond borderland Independent Clinical laboratory is subject only to the clinical PA requirements that would apply if the provider were located in-state. Independent Clinical laboratories performing genetic and molecular testing must designate the "Clinical Laboratory Certified-Genetic Testing" specialty within their CHAMPS provider enrollment record in order to be exempt from Medicaid's out-of-state and beyond borderland provider requirements.

5.8 NON-COVERED SERVICES

Genetic and molecular testing is **not** a covered service for:

- Criteria other than those outlined above.
- Establishing a diagnosis or condition that can be diagnosed by conventional diagnostic methods unless conventional testing is not required by Medicaid, or the genetic test is identified as a Grade A or B recommendation by the USPSTF.

Michigan Department of Health and Human Services
Medicaid Provider Manual

- Confirming a diagnosis or condition that was previously diagnosed by another testing method (e.g., conventional testing).
- When the need for the test is not clinically indicated for the beneficiary's condition.
- Purposes where the test results would not directly influence the management or treatment of the disease or condition.
- Informational purposes or management of a beneficiary's family member.
- Testing performed by a second, independent laboratory solely to validate or confirm the beneficiary's previous test results using a methodology designed to detect the same genetic or molecular alteration as the original test.
- Screening or carrier testing for the sole purpose of family planning counseling and/or infertility services.
- Screening for medical research purposes.
- Minors under the age of 18 for adult-onset conditions that have no preventative or therapeutic treatments.
- Testing performed in a non-Clinical Laboratory Improvement Amendments (CLIA) certified laboratory.

Michigan Department of Health and Human Services
Medicaid Provider Manual

SECTION 6 – NONCOVERED SERVICES

Noncovered laboratory services and items include, but are not limited to, the following:

- Laboratory testing not reasonable or medically necessary for the diagnosis or management of the beneficiary's specific condition.
- Services not ordered by the beneficiary's treating provider.
- Laboratory services determined to be not medically necessary by a beneficiary's eligible other insurance benefits (i.e., Medicare).
- Laboratory services for the treatment of infertility, including embryo/sperm collection and banking.
- Repeat tests required because of technical or professional errors in performance of original test or interpretation of test results.
- Any laboratory service the laboratory is not CLIA certified to provide.
- "Profiles", "batteries" or "panels" of tests that include tests not necessary for the diagnosis or treatment of the beneficiary's specific condition.

SECTION 1 – GENERAL INFORMATION

This chapter applies to all Local Health Departments (LHDs).

1.1 REGULATORY AUTHORITY

A public facility is defined in the following Sections of the Michigan Public Health Code (PA 368 of 1978, as amended):

- Section 333.2413
- Section 333.2415
- Section 333.2421

Local health departments (LHDs) may participate as providers in the Medicaid Program as Public Clinics. Statutory basis for their participation is pursuant to 42 CFR 431.615 (Relations with State Health and Vocational Rehabilitation Agencies and Title V Grantees), thereby implementing Section 1902(a)(11) and (22)(C) of the Social Security Act.

A Title V grantee means an agency, institution, or organization that receives federal payments for part or all of the cost of any service program or project authorized by Title V of the Social Security Act, including:

- Children and youth projects;
- Children's Special Health Care Services (CSHCS);
- Maternal and child health services;
- Maternal and infant care projects; and
- Projects for the dental health of children.

1.2 PROVIDER ENROLLMENT

Michigan Department of Health and Human Services (MDHHS) requires all LHDs to have a Type 2 (Organization) National Provider Identification (NPI) number in order to receive the enhanced LHD reimbursement. For LHDs with multiple locations and multiple rates, an NPI number for each location may be necessary so that the proper reimbursement rate of all encounters can be determined. If the LHD fails to obtain and/or use the correct NPI number, the LHD reimbursement will be determined under fee for service rules. The NPI number must be reported to MDHHS via the on-line CHAMPS Provider Enrollment (PE) subsystem before billing Medicaid services.

Individual providers (doctors, dentists, optometrists, etc.) are required to obtain a Provider (Type 1 - Individual) NPI number and report the number to MDHHS.

SECTION 2 - BENEFITS

Covered services provided by LHDs include preventive, diagnostic, therapeutic, rehabilitative, or palliative services that are furnished by a public facility that is not part of a hospital but is organized and operated to provide medical care to outpatients.

2.1 COVERED SERVICES

LHDs receive full cost reimbursement for the following services:

- Breast and Cervical Cancer Control Program Services
- Child Health and Primary Care Services
- Communicable Disease Services (e.g., Tuberculosis [TB])
- Early and Periodic Screening, Diagnosis and Treatment (EPSDT) Services (including blood lead testing and follow-up services)
- Family Planning Clinic Services
- Hearing and Vision Screening
- Home Health (HH) Care Services
- Immunizations
- Maternal and Child Health Lab Services
- Maternal Infant Health Program (MIHP) Services
- Prenatal Care Clinic Services
- Sexually Transmitted Disease Services

2.2 ADDITIONAL INFORMATION ON BLOOD LEAD TESTING

2.2.A. INITIAL BLOOD LEAD TESTING

LHDs are not required to obtain a referral or receive PA to obtain a blood lead sample from Medicaid-covered children through six years of age, whether they are enrolled in a MHP or are FFS beneficiaries. To prevent duplication of services, the LHD must make reasonable effort to assure that a blood lead test has not been obtained by the child's primary care provider (PCP).

All blood lead draws must be provided in compliance with Medicaid policy. Refer to the Early and Periodic Screening, Diagnosis and Treatment Chapter for additional information regarding guidelines for age-appropriate blood lead testing intervals.

The LHD must instruct the laboratory completing the blood lead analysis to send all blood test results to the child's PCP and health plan, if enrolled in managed care. Should a positive test be found, the LHD must collaborate with the PCP to assure the appropriate follow-up care is provided. The PCP is responsible for any additional blood lead testing.

If a capillary blood specimen is obtained, the LHD may bill MDHHS using procedure code 36416 for both MHP enrolled and FFS beneficiaries.

The LHD may send the sample to the State Laboratory for analysis or to any clinical laboratory that is CLIA-certified to perform blood lead analysis. The information accompanying the sample to the laboratory must include the name of the PCP, if known, and the name of the health plan for those children enrolled in managed care.

The LHD may complete the blood lead analysis if they are CLIA-certified to do so. If the LHD completes the blood lead analysis, procedure code 83655 should be billed. The reimbursement includes payment for the capillary or venipuncture blood lead draw.

2.2.B. BLOOD LEAD POISONING FOLLOW-UP SERVICES

LHDs may provide blood lead poisoning follow-up services which consist of environmental investigations and case management services.

LHDs may provide blood lead poisoning follow-up services provided to any Medicaid-covered child, regardless if the child is enrolled with an MHP or is in the FFS program. Authorization for these services is not required by the MHP; however, LHDs must notify the plan of the service(s) provided and provide the plan with a summary of each.

Documentation of the child's blood lead poisoning level that initiated service must be maintained, as well as documentation of all environmental investigations and case management services.

2.2.B.1. CASE MANAGEMENT SERVICES

Case management services for children with a blood lead reference value (BLRV) of 3.5 µg/dL or greater are covered under the Children's Special Health Care Services (CSHCS) case management benefit. Beneficiaries are eligible for a maximum of six billing units per year. (Refer to the Children's Special Health Care Services Chapter, Case Management Benefit for more information.)

2.2.B.2. ENVIRONMENTAL INVESTIGATIONS

An environmental investigation of a beneficiary's home or primary residence is covered for the LHD. A beneficiary's home is defined as their legal address. The beneficiary's primary residence is a place other than their legal address where the beneficiary spends a significant amount of time. To be eligible for the service, the beneficiary must be under 21 years of age and have a confirmed BLRV of 3.5 µg/dL or greater.

If more than one child in the home has blood lead poisoning, the LHD must select one child's Medicaid ID number and report a single environmental investigation visit. An environmental investigation visit can be billed directly to Medicaid FFS regardless if the

Medicaid Provider Manual

beneficiary is enrolled in a MHP. Reimbursement is limited to the time and activities provided by certified assessors during the on-site investigation.

Environmental investigations must be performed by assessors certified by the Michigan Department of Health and Human Services (MDHHS) Healthy Homes Program. The home or primary residence to be investigated must meet one of the following criteria:

- The home or primary residence was built before 1978.
- A home or primary residence built after 1978 when identification of other possible sources of lead exposure such as a job, hobby, environmental, home remedies, or cultural practices that use lead are associated with the property in question.

The investigation must follow the Protocol for Environmental Investigations for Children with Elevated Blood Lead Levels and risk assessment activities per the Lead Abatement Act of 1998. The investigation must include testing of appropriate potential sources of paint, house dust, soil, water, and other household risk factors such as pottery and home remedies. Education must be provided regarding known and potential sources of lead poisoning, reduction of future exposures, and suggestions for specialized cleaning techniques.

Risk assessors must prepare a risk assessment report per rule R325.99404 promulgated pursuant to the Lead Abatement Act that includes lead hazard control recommendations and the potential relocation of the child depending upon the severity of the lead hazards found.

Discussion with the family must include agencies that may be able to provide assistance with lead hazard control recommendations provided in the risk assessment report.

An episode includes a venous blood sample indicating the child is at risk according to recommendations by the Centers for Disease Control and Prevention (CDC), and also includes resulting treatment and follow-up services.

When an environmental investigation of the home finds no sources of lead or insufficient evidence to justify the beneficiary's elevated blood lead level, a second site may be investigated (e.g., home of a family member, relative, or other informal child care where a child often visits). When billing for the second site, local health departments must report the TS modifier with the procedure code on the claim. A maximum of two sites may be investigated.

2.2.C. BLOOD LEAD RESOURCE DOCUMENTS

Providers may obtain the Protocol for Environmental Investigations for Children with Elevated Blood Lead Levels, a list of certified risk assessors, applications for training and certification, and education materials from the MDHHS Healthy Home Section. (Refer to the Provider Resources section of the Directory Appendix for contact information.)

Refer to the Early and Periodic Screening, Diagnosis and Treatment Chapter for additional information on blood lead.

2.3 ADDITIONAL INFORMATION ON OBJECTIVE HEARING & VISION SCREENING

To be eligible to provide and bill for services, all LHD screening staff must be qualified to administer preschool objective hearing and objective vision screening by the MDHHS Public Health Administration. This service coverage is limited to LHD providers when performed either on-site or in the community setting.

Objective hearing screening and objective vision screening may be performed on eligible Medicaid preschool-aged children from age three through six years of age by qualified LHD staff. LHDs may provide objective hearing and/or vision screening services and accept referrals for screening from physicians and from Head Start agencies. The objective hearing and/or vision screening results must be reported to the child's primary care provider (PCP). If the LHD is unable to report the results to the child's PCP, the LHD must clearly document why this could not be accomplished. Providers are strongly encouraged to share the results with the Head Start agency if that agency was the referral source, and if the provider receives authorization.

2.4 ADMINISTRATIVE SERVICES

Full cost reimbursement is not allowed for Medicaid administrative services and should not be included on the Medicaid Cost Report.

LHDs providing Medicaid administrative services should report costs for these services on their quarterly Financial Status Report in accordance with federal regulation to qualify for Federal matching funds. These reports must be submitted to the MDHHS Bureau of Purchasing, Grants Division/Electronic Grants Section. Questions regarding reimbursement of administrative services should be directed to the MDHHS Bureau of Purchasing, Grants Division/Electronic Grants Section. (Refer to the Directory Appendix for contact information.)

Refer to the Medicaid Outreach Activities section for reporting requirements, and billing and reimbursement information related to outreach activities.

2.5 MEDICAID HEALTH PLAN SERVICES

LHDs must obtain PA from a Medicaid Health Plan (MHP) for any Medicaid covered service provided to a Medicaid beneficiary enrolled in a health plan **except** for the following services:

- Immunizations
- Sexually Transmitted Disease (STD) services
- TB Diagnosis and Treatment
- Family Planning Services
- Blood lead draws for children through six years of age
- Hearing and vision screening

Except for blood lead draws, payment for covered services is based on the terms of the contract between the LHD and health plan if the LHD and a MHP have entered into a contract. In the absence of a contract, payment is based on the Medicaid fee-for-service (FFS) rates in effect on the date of service (DOS). Medicaid encourages contractual relationships between these entities.

Medicaid Provider Manual

LHDs must bill the MHP directly for immunizations provided to beneficiaries enrolled in managed care. Any claims billed to the Community Health Automated Medicaid Processing System (CHAMPS) for MHP members will be denied.

The following out-of-plan services performed by the LHD can be billed directly to Medicaid FFS regardless if the beneficiary is enrolled in a MHP:

- Blood lead draws
- Lead investigations and follow-up services
- Hearing and vision screenings

SECTION 3 – MEDICAID OUTREACH ACTIVITIES

3.1 ALLOWABLE ACTIVITY CATEGORIES

Local Health Departments may perform the following Medicaid outreach activities and receive reimbursement through their Comprehensive Planning, Budgeting and Contracting (CPBC) Grant Agreement with MDHHS.

All outreach activities must be specific to the Medicaid program. In addition, activities that are part of a direct service are not claimable as an administrative service.

3.1.A. MEDICAID OUTREACH AND PUBLIC AWARENESS

Informing Medicaid eligible and potentially Medicaid eligible children and families about the benefits and availability of services provided by Medicaid.

This category of outreach also includes coordinating and presenting information about Medicaid through media resources, health fairs and other community forums.

Examples of activities in this category include, but are not limited to:

- Developing, compiling, and/or distributing materials that inform individuals about the Medicaid program, Early and Periodic Screening, Diagnosis and Treatment (EPSDT) services, and how and where to obtain benefits.
- Contacting pregnant and parenting women about the availability of Medicaid services, including referral to family planning and well-baby care programs and services.

Examples of activities that are not appropriate for this category include, but are not limited to, Women, Infants, and Children (WIC) and Maternal Infant Health Program (MIHP) staff providing referral information about available health and community services. The State of Michigan mandates that these services be provided as a condition of operating the program.

3.1.B. FACILITATING MEDICAID ELIGIBILITY DETERMINATION

Activities related to assisting potentially Medicaid-eligible individuals in applying for Medicaid benefits.

This includes explaining the Medicaid program to individuals or families, providing a Medicaid application form, assisting an individual in completing a Medicaid application, and/or referring individuals to the local MDHHS office for determination of benefits. Community health workers may act as client advocates when additional assistance is needed to complete the application process. Community health workers can also help clients overcome other barriers such as linguistic, cultural, and cognitive challenges to the application and enrollment process.

Medicaid Provider Manual

Examples of activities in this category include, but are not limited to:

- Verifying an individual's current Medicaid eligibility status for purposes of the Medicaid eligibility process.
- Assisting the individual or family in collecting/gathering required information and documents for the Medicaid application.

Examples of activities that are not appropriate for this category include, but are not limited to:

- Verifying an individual's current Medicaid eligibility status for a direct service or billing of medical appointment.
- Explaining the eligibility process for non-Medicaid programs.

3.1.C. PROGRAM PLANNING, POLICY DEVELOPMENT, AND INTERAGENCY COORDINATION RELATED TO MEDICAL SERVICES

Development of health programs and services targeted to the Medicaid population and collaboration between the LHD and other agencies to ensure the delivery of Medicaid-covered services.

Activities in this category only apply to LHD staff whose position descriptions include program planning, policy development and interagency coordination, and/or those staff specifically appointed to appropriate committees/programs performing required activities. This includes planning and developing procedures to track requests for referrals and coordinating services with the Medicaid Health Plans.

Examples of activities in this category include, but are not limited to:

- Working with other agencies and/or providers that provide medical/dental/mental health services to improve the coordination and delivery of services, to expand access to additional Medicaid populations, increase provider participation, and improve provider relations.
- Enhancing, improving, or streamlining health care service delivery systems in the community.
- Representing the LHD on a committee or task force that is intended to improve access to Medicaid programs and services.

Examples of activities that are **not appropriate** for this category include, but are not limited to:

- Developing procedures for tracking families' requests for assistance with non-Medicaid services and the providers of such services.
- Creating a collaborative of health professionals to provide consultation and advice on the delivery of health care services to the non-Medicaid population.

Medicaid Provider Manual

3.1.D. REFERRAL, COORDINATION AND MONITORING OF MEDICAID SERVICES

Making referrals for, coordinating access to, and/or monitoring the delivery of Medicaid services. Working with Medicaid providers to improve the coordination and delivery of clinical health care services, expand access to specific Medicaid populations, and improve collaboration around early identification of medical/dental problems.

Examples of activities in this category include, but are not limited to:

- Making referrals for and/or scheduling appropriate Medicaid-covered services for Medicaid-enrolled individuals.
- Developing referral sources for the LHD, such as a list or brochure of the physicians, dentists or Health Maintenance Organizations (HMOs) in the area who accept Medicaid patients for evaluation or treatment, or a list of other health agencies providing Medicaid services.
- Monitoring or coordinating the completion of the prescribed services, the termination of services, and the referral of the individual to other Medicaid services as necessary.

Examples of activities that are **not appropriate** for this category include, but are not limited to:

- Conducting quality assurance reviews when MDHHS requires the reviews as a condition of operating the program.
- Making referrals for, and coordinating access to, non-Medicaid services, such as child care, employment, job training, food assistance, and housing.
- Activities that are an integral part of or an extension of a direct medical service.

3.1.E. MEDICAID-SPECIFIC TRAINING ON OUTREACH ELIGIBILITY AND SERVICES

Outreach activities that focus on coordinating, conducting, or participating in training and seminars for staff and/or contractors regarding the Medicaid program and available services, the benefits of the program, and how to assist families in accessing Medicaid services.

These include trainings that enhance early identification, screening, and referral of children and adolescents for Early and Periodic Screening, Diagnosis and Treatment (EPSDT) services. This category also includes development and presentation of training modules regarding Medicaid eligibility and benefits to LHD staff.

Examples of activities in this category include, but are not limited to:

- Participating in or coordinating training that improves the delivery of Medicaid services.
- Attending or participating in a Medicaid Outreach inservice or webinar.
- Developing, participating in, or presenting training that addresses the clinical importance of pediatric or other clinical standards for preventive care offered through the Medicaid program.

Examples of activities that are **not appropriate** for this category include, but are not limited to:

- Participating in or coordinating training that improves the delivery of general LHD services.
- The time spent determining if a specific task can be considered Medicaid outreach.

3.1.F. ARRANGING FOR MEDICAID-RELATED TRANSPORTATION

Assisting an individual in obtaining transportation for Medicaid-related services. NOTE: This does **not** include activities that contribute to the actual billing of transportation as a medical service.

Examples of activities in this category include, but are not limited to:

- Scheduling or arranging transportation to and from Medicaid-covered services for a Medicaid-enrolled individual.
- Assisting or arranging for transportation for the parent/guardian of a Medicaid-enrolled individual in support of the referral and evaluation activities.

Examples of activities that are **not appropriate** for this category include, but are not limited to:

- Transporting or accompanying a Medicaid-enrolled individual to a medical appointment.
- Assisting an individual in obtaining transportation for non-Medicaid services.

3.1.G. ARRANGING FOR OR PROVIDING MEDICAID-RELATED TRANSLATION SERVICES

Arranging for or providing translation services related to a Medicaid-covered service when translation services are not included and/or paid for as part of a direct medical assistance service.

Examples of activities in this category include, but are not limited to:

- Arranging for or providing translation services (oral or signing services) to assist an individual with completing a Medicaid application.
- Arranging translation services that assist an individual in understanding the Medicaid services available.

Examples of activities that are **not appropriate** for this category include, but are not limited to:

- Developing translation materials that assist individuals in accessing and understanding non-Medicaid programs and services.
- Arranging for or providing translation services (oral or signing services) that assist the individual in accessing non-Medicaid services.

Medicaid Provider Manual

- Providing translation services to assist a Medicaid-enrolled individual in communicating as part of a direct medical service.

3.2 DOCUMENTATION AND REPORTING REQUIREMENTS

Documentation maintained in support of administrative claims must be sufficiently detailed to allow determination of whether the activities were necessary for the proper and efficient administration of the Medicaid State Plan. The LHD is responsible for all claiming determinations.

LHDs that bill for Medicaid Outreach Activities are expected to provide a quarterly summary report of Medicaid outreach activities. Guidelines and reporting requirements are described in the Comprehensive Agreement.

3.3 BILLING AND REIMBURSEMENT

3.3.A. GRANT AGREEMENT

The CPBC Grant Agreement includes the Medicaid Outreach Activities provision. This provision is part of the standard CPBC Grant Agreement language.

Each fiscal year, MDHHS will identify Medicaid outreach priorities. LHDs that bill for Medicaid outreach activities must focus, at a minimum, on one of the identified outreach priorities.

3.3.B. BILLING

The LHDs bill for these outreach activities on a quarterly basis in a single column on a Financial Status Report (FSR). The column should be titled Medicaid Outreach Activities. The FSR is part of the LHDs quarterly CPBC FSR submission to MDHHS. MDHHS aggregates all of the quarterly amounts billed for LHD Medicaid outreach activities and submits a claim for the federal portion of the costs. MDHHS reimburses the LHDs after MDHHS receives the reimbursement of the federal claim.

These Medicaid Outreach Activities are claimed at the 50% administrative match rate.

Full cost reimbursement is not allowed for Medicaid administrative services and should not be included on the Medicaid Cost Report.

3.3.C. COST ALLOCATION PLANS

MDHHS requires LHDs to certify that their existing cost allocation plan is in compliance with OMB Title 2 CFR Part 200 and that the plan identifies Medicaid outreach activities as a specific element of the plan. The certification is accepted by MDHHS as documentation to continue this administrative claiming. Each cost allocation plan is subject to MDHHS review for compliance with OMB Title 2 CFR Part 200.

3.3.D. CERTIFICATIONS

The LHD Cost Allocation Plan certifications are kept on file and should be submitted to the MDHHS Bureau of Purchasing, Grants Division/Electronic Grants Section. (Refer to the Directory Appendix for contact information.)

New certifications are required if a modification occurs in the LHD's cost allocation plan that impacts the Medicaid Outreach Activities element or upon a Department review that results in a finding of non-compliance. If neither of these conditions exist, the certification remains valid in subsequent fiscal years.

SECTION 4 – ENCOUNTERS

Encounters are counted and reported by LHDs on the Michigan Medicaid Local Health Department (LHD) Cost Report in order to receive full cost reimbursement. The reported encounters include the health department's total facility encounters, minus dental encounters and, as a subset of total encounters, the total Medicaid encounters at the LHD clinic.

In order to determine a rate per encounter, the total costs of facility services are divided by the total encounters, resulting in a rate per encounter. The rate per encounter is multiplied by the number of Medicaid encounters to determine the total Medicaid costs to be reimbursed.

4.1 DEFINITION OF ENCOUNTER

An encounter is a face-to-face contact between a patient and the provider of health care services who exercises independent judgment in the provision of health care services. For a health service to be defined as an encounter, the health service must be recorded in the patient's record.

The following examples help to understand and define an encounter:

- To meet the encounter criterion for independent judgment, the provider must be practicing within the scope of practice defined in the Michigan Public Health Code. The provider must be acting independently and not be assisting another provider. For example, a nurse assisting a physician during a physical examination by taking vital signs, taking a history or drawing a blood sample is not credited with a separate encounter.
- Services such as drawing blood, collecting urine specimens, performing laboratory tests, taking x-rays, filling and/or dispensing prescriptions, in and of themselves, do not constitute encounters. However, these procedures may accompany professional services performed by medical or other health providers which do constitute encounters.
- A provider may be credited with no more than one encounter with a given patient during a single day, except when the patient, after the first encounter, suffers illness or injury requiring additional diagnosis or treatment. For example, when a patient sees a physician for flu symptoms early in the day and then later the same day sees the same physician for a broken leg, then visits may be classified as two encounters.

The encounter criteria are not met in the following circumstances:

- When a provider participates in a community meeting or group session that is not designed to provide health services.
- When the only service provided is part of a large-scale effort, such as a mass immunization program, screening program, or community-wide service program.

Medicaid Provider Manual

- The following services are not classified as encounters:
 - Allergy injection(s)
 - Collecting urine specimens
 - Dispensing prescriptions
 - Drawing a blood sample
 - Filling out insurance forms, etc.
 - Performing laboratory tests
 - Refilling prescriptions
 - Taking a history
 - Taking vital signs
 - Taking x-rays

4.2 MEDICARE/MEDICAID ENCOUNTERS

Services for Medicare and Medicaid dual beneficiaries are eligible for full cost reimbursement, and these encounters are considered Medicaid encounters.

4.3 OTHER INSURANCE ENCOUNTERS

Medicaid services provided to beneficiaries with other commercial health insurance carriers are eligible for full cost, and the encounters are considered Medicaid encounters. Medicaid requires beneficiaries' other insurance resources and their network providers to be utilized for all services covered under the private coverage before billing Medicaid. Even if the other insurance payment for a specific service exceeds the amount Medicaid would pay, providers must still bill the procedure code and enter the other insurance payment on the claim. The claim showing other insurance reimbursement or zero payment must be processed through the claim system in order to be counted as a Medicaid encounter. (Refer to the Billing & Reimbursement for Professionals and the Coordination of Benefits Chapters of this manual for additional information.)

SECTION 5 – PUBLIC DENTAL CLINIC ENHANCED REIMBURSEMENT RATE

5.1 GENERAL INFORMATION

Public Dental Clinics are paid at the average commercial rate for Medicaid dental services. Qualifying providers include any Public Dental Clinic as identified in one of the following sections of the Michigan Public Health Code (PA 368 of 1978 as amended): 333.2413, 333.2415, or 333.2421.

5.2 RATE DETERMINATION

The average commercial rate is determined by MDHHS staff through information supplied by the commercial dental insurers and paid to providers eligible for this supplemental payment. If this information is not available from the commercial carriers, MDHHS may determine the rate from other sources.

5.3 PAYMENT METHODOLOGY

Public dental clinics submit claims and receive payment based on MDHHS fee-for-service (FFS) rates throughout the year. MDHHS identifies services and payments from Medicaid paid claims records at the end of the public dental clinic's fiscal year. An annual settlement calculation is performed to determine the difference between the Medicaid fee screen payments and the average commercial rate.

This calculation and a notice are sent to the public dental clinic indicating the amount of local share that must be received from the public dental clinic. The local share must be received prior to the submission of the federal claim. The local share is sent from the public dental clinic to MDHHS via the Intergovernmental Transfer process. After receipt of the local share, MDHHS will process a payment to the public dental clinic for the entire amount of difference between the FFS payments and the average commercial rate. The settlements are performed for each public dental clinic for each fiscal year.

MDHHS may pay interim payments for the estimated difference between Medicaid FFS payments and the average commercial rate. Interim payments will be reconciled at the time of annual settlement.

Settlements do not apply to services for which primary reimbursement is the responsibility of the Dental Health Plan (DHP) through the *Healthy Kids Dental* contract or any other third party payer.

The enhanced reimbursement rate process is in place of the cost-settlement process for dental encounters.

SECTION 6 – COST REPORTING REQUIREMENTS

6.1 FULL COST METHODOLOGY

The term full cost reimbursement, as used in this chapter, means the cost of providing Medicaid services as determined by information provided on the Michigan Medicaid Cost Report for LHDs. Full cost is derived from the amounts the LHD receives from Medicaid Fee-for-Service and Medicaid Health Plan payments, other third party insurers, quarterly payments from MDHHS, and initial and final settlements. A combination of local and state general funds provides the basis for full cost reimbursement and is used for claiming federal financial participation. MDHHS will reimburse the LHD for its services, other than dental services, at reasonable and allowable actual incurred costs according to 42 CFR § 431.615(c)(4).

To receive full cost reimbursement, qualified providers must supply the MDHHS Hospital and Clinic Reimbursement Division (HCRD) with a Michigan Medicaid cost report.

6.2 COST SETTLEMENTS

Cost settlements are performed annually to ensure that the payments were made at reasonable and allowable full cost. As necessitated by the cost settlement process, any financial adjustments are made with the LHD. Settlements are performed for each LHD for each fiscal year.

6.3 REASONABLE AND ALLOWABLE COSTS

Reasonable and allowable costs are determined using the applicable Medicare cost reimbursement principles detailed in 42 CFR, Part 413.

6.4 FILING COST REPORTS

LHDs must file a Michigan Medicaid cost report with the MDHHS HCRD annually. The authorized individual must sign the cost report and related Medicaid supplemental documents. The LHD cost report is due five months after the end of the normal fiscal period.

- A 30-day extension of the due date may, for good cause, be granted if a written request is received by the HCRD prior to the expiration of the original five months.
- The LHD cost report may be filed for more or less than an annual period only when necessitated by facilities terminating their agreement with MDHHS, by a change in ownership, or by a change in fiscal period.

Improperly completed or incomplete filings are returned to the LHD for proper completion and must be resubmitted to MDHHS within 30 days of receipt of the cost report.

If the required cost report and supplemental documents are not submitted within the required time limit (including approved extensions), no cost settlement for full cost reimbursement occurs for that fiscal period. By not submitting a cost report, it is understood that the LHDs are withdrawing from the full cost program. This action remains in effect until proper submission of all the required documents in a subsequent fiscal period.

Medicaid Provider Manual

If LHDs do not file a cost report, any interim payments are recovered for the year in which the LHD did not participate in the full cost reimbursement program.

6.5 AMENDING COST REPORTS

LHDs may amend a cost report by requesting the amendment in writing and submitting a revised cost report to the MDHHS HCRD. The revised cost report must be submitted no later than one year from the original filing date. The letter must explain why the cost report requires revision, and how it was changed.

6.6 ACCOUNTING AND RECORD KEEPING

Each LHD operating a clinic in the State of Michigan and seeking payment under the LHD provisions must complete LHD cost reports.

Medicaid supplemental documents must be filed using the modified accrual method of accounting. These documents must be forwarded to MDHHS Bureau of Purchasing, Grants Division/Electronic Grants Section. (Refer to the Directory Appendix for contact information.)

The LHD must maintain, for a period of not less than seven years from the end of the fiscal year of the LHD cost report, financial and clinical records for the period covered by the cost report which are accurate and in sufficient detail to substantiate the cost data reported. If there are unresolved issues at the end of this seven-year period, the records must be maintained until these issues are resolved. Expenses reported as reasonable costs must be adequately documented in the financial records of the LHD or they are disallowed.

The MDHHS HCRD maintains each required LHD cost report and supplemental documents submitted by the provider for seven years following the date of submission of the report. In the event there are unresolved issues at the end of this seven-year period, the cost report is maintained until such issues are resolved.

Financial and clinical records of the LHD must be available for review by authorized personnel of MDHHS, the Health Care Fraud Division of the Michigan Department of Attorney General, or the U.S. Department of Health & Human Services (HHS) in conformity with the provisions of the Social Security Act.

SECTION 7 – INTERIM PAYMENTS, SETTLEMENTS AND APPEALS

7.1 SETTLEMENT(S) OF LOCAL HEALTH DEPARTMENTS

An initial settlement is calculated annually from the cost of providing Medicaid covered services to Medicaid beneficiaries enrolled in the FFS program and MHPs. Calculations are determined from the filed Medicaid LHD cost report.

FFS encounters are verified for the cost settlement from the MDHHS paid claims data. Encounters for MHP or private HMO enrollees are recorded in the cost report. An initial settlement generally is completed within three months of the receipt of a complete and acceptable cost report. MDHHS retains the right to withhold a portion of an initial payment based on individual circumstances.

Final settlements for LHDs generally are completed within one year of the fiscal year end using updated Medicaid data for the period covered by the LHD cost report. This allows sufficient time for all claims to clear the MDHHS payment system. Medicaid data is updated using MDHHS approved claims payment data, all other payments for Medicaid services, and Medicaid visits.

Settlements with amounts due to the LHD are paid with a payment voucher. Settlements showing an overpayment to the LHDs must be repaid to the State of Michigan as noted in the settlement letter.

7.2 AUDIT ADJUSTMENT REPORT

An Audit Adjustment Report showing adjustments to the filed cost report is sent with the final settlement. If the LHD accepts the findings contained in the Audit Adjustment Report, an appropriate officer of the LHD signs the report and mails the report to the MDHHS HCRD. (Refer to the Directory Appendix for contact information.)

7.3 MEDICAID PROVIDER APPEALS

Medicaid providers have the right to appeal any adverse action taken by MDHHS unless that adverse action resulted from an action over which MDHHS had no control (e.g., Medicare termination, license revocation). Appeals must be submitted in writing and mailed to the Michigan Office of Administrative Hearings and Rules (MOAHR). (Refer to the Directory Appendix for contact information.)

The appeals process is outlined in the MDHHS Medicaid Provider Reviews and Hearings rules, Michigan Administrative Code R400.3402 through R400.3425, amended. Any questions regarding the appeal process should be directed to MOAHR.

-------------------------------------	----

Medicaid Provider Manual

SECTION 1 - GENERAL INFORMATION

This chapter applies to certified Maternal Infant Health Program (MIHP) providers servicing Medicaid and Maternity Outpatient Medical Services (MOMS) beneficiaries. The purpose of MIHP is to reduce infant mortality and morbidity. This is an objective of both the State of Michigan and the federal government who fund this program. The goal of the MIHP is to promote healthy pregnancies, positive birth outcomes, and healthy infant growth and development.

Accordingly, MIHP services are intended to help pregnant Medicaid beneficiaries who are most likely to experience serious psychosocial or nutritional issues. Services are intended to supplement regular prenatal/infant care and to assist the following providers in managing the beneficiary's health and well-being:

- Physicians (MD, DO)
- Certified Nurse Midwives
- Pediatric Nurse Practitioners
- Family Nurse Practitioners
- Medicaid Health Plans
- Physician Assistants

This chapter is designed to work with the Maternal Infant Health Program Operations Guide, developed and maintained by the MDHHS Division of Family & Community Health. The Guide is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

1.1 PROGRAM SERVICES

MIHP services are preventive health services provided by an agency that is certified by the Michigan Department of Health and Human Services (MDHHS). MIHP services are provided by a licensed social worker and a licensed registered nurse. Licensed social workers and licensed registered nurses who are certified as an Internationally Board Certified Lactation Consultant (IBCLC) may provide services. An infant mental health specialist with an Infant Mental Health endorsement may be included. A registered dietitian may also provide services with a physician order. All physician orders for MIHP services must be in compliance with state and federal laws prohibiting self-referral. All physician orders for MIHP services must be in compliance with state and federal laws prohibiting self-referral.

Program services include social work, nursing services (including health education and nutrition education), breast feeding support, nutritional counseling, and beneficiary advocacy services. MIHP services include:

- Psychosocial and nutritional assessment
- Plan of care development
- Professional intervention services

Medicaid Provider Manual

- Maternal and infant health and nutrition education
- Arranging transportation as needed for health care, substance abuse treatment, support services, and/or pregnancy-related appointments
- Referral to community services (e.g., mental health, substance abuse)
- Coordination with other medical care providers and Medicaid Health Plans (MHPs)
- Family Planning education and referral
- Coordinating or providing childbirth or parenting education classes

1.2 STAFF CREDENTIALS

MIHP staff consists of registered nurses and licensed social workers with the following qualifications:

Nurses	All nurses must possess: <ul style="list-style-type: none">▪ current Michigan licensure as a registered nurse by the Michigan Department of Licensing and Regulatory Affairs; and▪ at least one year of experience providing community health, pediatric or maternal/infant nursing services.
Social Workers	All social workers must possess: <ul style="list-style-type: none">▪ current Michigan licensure as a licensed social worker by the Michigan Department of Licensing and Regulatory Affairs; and▪ at least one year of experience providing Social Work services to families.

Other professionals who may provide services must have the following qualifications:

Infant Mental Health Specialist	<ul style="list-style-type: none">▪ Current Michigan licensure as a psychologist, master social worker, or professional counselor by the Michigan Department of Licensing and Regulatory Affairs;▪ Infant Mental Health Endorsement by the Michigan Association for Infant Mental Health (MI-AIMH), demonstrating competency at the Infant Mental Health Specialist level; and▪ At least one year of experience in an infant health program.
Internationally Board Certified Lactation Consultant (IBCLC)	All IBCLCs must possess: <ul style="list-style-type: none">▪ current Michigan licensure as a registered nurse or licensed social worker by the Michigan Department of Licensing and Regulatory Affairs; and▪ credentialing by the International Board of Lactation Consultant Examiners (IBCLE) and a valid and current IBCLC certification.

Medicaid Provider Manual

Registered Dietitian	<ul style="list-style-type: none">▪ A Master's Degree in Public Health with emphasis in nutrition or a Master's Degree in human nutrition; or▪ a Bachelor's Degree and registration as a dietitian (RD); or▪ a Bachelor's Degree and RD-eligible with examination pending in six months or less; and▪ at least one year of experience providing community health, pediatric, and/or maternal/infant nutrition services. <p>A physician order is needed before the dietitian may provide services.</p>
-----------------------------	--

A physician order must be obtained before a registered dietitian may visit with the beneficiary. The physician order must be included in the beneficiary record. If community resources are available, such as a hospital dietitian, the MIHP may coordinate with the physician to refer the beneficiary to the hospital dietitian. The MIHP may also coordinate nutrition services with the MHP. When nutrition counseling is needed, the documentation must indicate how services were provided. All physician orders for MIHP services must be in compliance with state and federal laws prohibiting self-referral.

1.3 ELIGIBILITY

Maternal Services	Pregnant Medicaid beneficiaries qualify for MIHP services at any time during the pregnancy. After delivery, a new maternal MIHP case cannot be opened. Maternal services remaining after birth may be provided up to 12 months postpartum and are dependent on maternal eligibility.
Infant Services	MIHP services for an infant begin after the infant's birth and hospital discharge. Infant services are exclusively for the benefit of the infant on Medicaid, primarily by working with the infant's family.
Both Maternal and Infant Services	An infant case and a maternal case can both be open at the same time in some incidences. If the MIHP is seeing an infant and the mother becomes pregnant, a maternal risk identifier assessment visit can be completed and billed as such. After this initial risk identifier assessment visit is completed, all subsequent professional visits for that family should be blended visits and billed under one Medicaid ID. The program is based on the family dyad, and both the infant and parent are to be assessed at each visit and billed as "blended visits" under either the parent's or the infant's Medicaid ID.

1.4 MEDICAID HEALTH PLANS (MHP)

MIHP services provided to individuals enrolled in a MHP are administered by the MHP in adherence to the program components as outlined in this chapter. All MIHP services provided to MHP enrollees are coordinated and reimbursed by the MHPs.

1.4.A. CONTRACTUAL AGREEMENTS

MIHP providers must establish and maintain provider contractual agreements with the MHPs in their service area to receive payment for in-network services provided to MHP

Medicaid Provider Manual

enrollees unless the MHP indicates otherwise. MIHP providers are encouraged to contract with the MHPs in their service area.

1.4.B. CARE COORDINATION AGREEMENTS

MIHP providers are encouraged to establish Care Coordination Agreements (CCAs) with all MHPs in their service area. MIHP providers and MHPs must also establish and maintain a CCA for in-network and out-of-network services. The intent of the CCA is to explicitly describe the services to be coordinated and essential aspects of collaboration between the MHP and the MIHP provider. (Refer to the Forms Appendix for an example of a Care Coordination Agreement.)

1.4.C. FREEDOM OF CHOICE

MIHP services are voluntary and participants must be allowed the freedom of choice of MIHP providers, including the opportunity to: select an in-network provider; maintain a current service relationship which extends services to the infant by the same provider who rendered maternal services; change providers within the MHP network of providers; or decline services.

1.4.D. REFERRAL TO AN MIHP

Within one month of when the MHP determines a pregnant or infant enrollee is eligible for MIHP services, the MHP must refer the enrollee to an MIHP provider. MHPs are not required to refer enrollees to an MIHP provider if the enrollee is already participating in an MDHHS approved equivalent evidence-based home visiting program that provides pregnancy-related or infant support services. This may be evidenced by enrollee self-attestation. MHPs may be required to present MDHHS evidence of MIHP referral and care coordination, evidence of participation in an equivalent evidence-based home visiting program, or refusal of MIHP services upon request.

1.4.E. PRIOR AUTHORIZATION OF SERVICES

MHPs may not require prior authorization for the Initial Risk Assessment visit, professional visits, drug-exposed infant visits, MIHP lactation support visits, childbirth education classes, or parenting education classes when provided within the criteria and limits established in policy. MIHP services in excess of limits established in policy may be subject to MHP prior authorization requirements.

1.4.F. OUT-OF-NETWORK MIHP SERVICES

It is incumbent upon MIHP providers to check eligibility and MHP enrollment at every visit. Relationships established during previous pregnancies with out-of-network MIHP providers are not required to be covered by the MHP. Non-contracted MIHP providers, including those who have a current MIHP relationship with a pregnant woman or infant, are required to contact the enrollee's MHP to discuss operational details before providing out-of-network services.

SECTION 2 - PROGRAM COMPONENTS

The assessment visit is the initial visit with the beneficiary. It is conducted with the beneficiary by either a registered nurse or licensed social worker. The assessment visit should be billed using the appropriate place of service code.

The Risk Identifier is a mandatory tool utilized during the assessment visit. The Risk Identifier assures all appropriate services are identified prior to initiation of professional visits, child birth education, parenting education or transportation services. If a Risk Identifier indicates a need for MIHP services, an appropriate Plan of Care (POC) must be developed that clearly outlines the beneficiary's problems/needs, objectives/outcomes, and the intervention(s) to address the problem(s). The Risk Identifier and the POC must be completed and the Risk Identifier entered into the MIHP database before further MIHP services are initiated.

If the Risk Identifier does not indicate the need for MIHP services or when, after completion of the Risk Identifier the beneficiary refuses services, then the POC is not developed and the Discharge Summary is completed accordingly. No follow-up services should be provided; however, the beneficiary should receive the informational packet. (Refer to the Maternal Infant Health Program Operations Guide for additional information.)

2.1 MATERNAL RISK IDENTIFIER

The Maternal Risk Identifier covers multiple domains, including basic care, drug and alcohol use, smoking, shelter, depression, transportation needs, intent to breast feed, and support systems. The Maternal Risk Identifier can be found in the Maternal Infant Health Program Operations Guide. It must be completed for each pregnant woman to determine the services needed through the MIHP. Either the licensed social worker or the registered nurse must work with the beneficiary to complete the form. MIHP services will be provided based on the beneficiary's responses to the various questions on the Maternal Risk Identifier. The Maternal Risk Identifier must be completed to assure all appropriate services are identified. Reimbursement for the Maternal Risk Identifier is limited to one Maternal Risk Identifier for each eligible Medicaid beneficiary for each pregnancy.

The Maternal Risk Identifier results must be entered into the MIHP database. (Refer to the Maternal Infant Health Program Operations Guide for additional information.) The MIHP database will score each risk as high, medium, low, or no risk. Based on the risks identified and professional observation, the registered nurse and the licensed social worker, working together, must write a plan of care to determine appropriate interventions. The initial assessment visit and up to nine professional visits per woman per pregnancy are billable. The MIHP provider must respond to all referrals promptly to identify the beneficiary's needs. Documentation must indicate attempts to visit or contact the pregnant woman within 14 calendar days after the referral is received.

MIHP serves the maternal/infant dyad. When infant services are initiated, an Infant Risk Identifier must be completed.

2.2 INFANT RISK IDENTIFIER

The Infant Risk Identifier, as found in the Maternal Infant Health Program Operations Guide, must be completed for each infant entering the MIHP to determine the services needed. Either the licensed social worker or the registered nurse must work with the beneficiary and primary caregiver to complete the

Medicaid Provider Manual

form. The Infant Risk Identifier is made up of many domains, including health and safety, feeding and nutrition, family support, child care, and general growth and development. MIHP services will be provided based on the responses to the various questions on the Infant Risk Identifier.

The MIHP provider must respond to all referrals promptly to identify the beneficiary's needs. Documentation must indicate attempts to visit or contact the beneficiary within a maximum of seven calendar days for the infant. For referrals received prior to the infant's discharge from the inpatient setting, the Risk Identifier should be conducted within two (2) business days following the hospital discharge. If the MIHP provider is unable to visit the beneficiary within the stated time frame, documentation must clearly support all attempts to contact or visit the infant beneficiary.

When infant services are initiated, an Infant Risk Identifier may be billed as a separate visit from a maternal postpartum professional visit when these services are performed on the same date of service. Documentation must substantiate why it was necessary to perform both visits on the same date of service. Servicing the maternal/infant dyad, all subsequent visits for that family should be "blended visits" and billed as "blended visits" under either the mother's or the infant's Medicaid ID.

The Infant Risk Identifier must be entered into the MIHP database. The system will score each risk as high, medium, low, or no risk. Based on the risks identified and professional observation, the registered nurse and the licensed social worker, working together, must write a plan of care for each beneficiary.

The initial assessment visit and up to nine professional visits per infant/family are billable. An additional nine infant visits may be provided when requested in writing by the medical care provider. All visits beyond the original nine visits must have a written physician order. The reason for and purpose of additional visits must be well documented in the medical record.

2.3 MULTIPLE BIRTHS

In cases of multiple births, each infant should have a separate risk identifier visit completed. This also applies to infants in foster care where there are two infants in the same home. These separate risk identifier visits can be billed separately under each individual infant Medicaid identification number. Subsequent professional visits should be billed under each infant ID if the infants are from different families, such as with foster care families. If the infants are siblings, the visits should be "blended visits" and billed under one Medicaid ID only. The risk identifier visit and up to nine professional visits can be made to the family. A physician order is needed if more than nine infant visits are needed per family.

2.4 PSYCHOSOCIAL AND NUTRITIONAL ASSESSMENT-RISK IDENTIFIER

The MIHP consists of many interventions in multiple domains designed to educate and inform the beneficiary, both as a pregnant woman and as the parent of an infant. Domains include basic care, physical abuse, substance abuse, social behavior and health history. The Risk Identifiers are designed to determine if there is high, medium, low, or no risk for each domain. Based on the Risk Identifier and professional observation, the MIHP provider will determine interventions specific to each beneficiary. Refer to the Maternal Infant Health Program Operations Guide for more information and interventions related to the domains.

If the Risk Identifier does not indicate the need for MIHP services, then no follow-up services should be provided; however, the beneficiary should receive the informational packet. (Refer to the Maternal Infant Health Program Operations Guide for additional information.) If a need is indicated, an appropriate POC

Medicaid Provider Manual

must be developed that clearly outlines the beneficiary's problems/needs, objectives/outcomes, and the intervention(s) to address the problem(s). If a MIHP prenatal case subsequently becomes an MIHP infant case, the Infant Risk Identifier must be completed to determine eligibility for the infant before professional visits are made.

The beneficiary must be assessed (Risk Identifier completed) for the need for transportation assistance, childbirth/parenting education classes, health education, breast feeding support, and family planning services. The completion of the Risk Identifier must precede any professional or IBCLC visits. The Risk Identifier must be completed by the licensed registered nurse or the licensed social worker.

2.5 PLAN OF CARE

The registered nurse and the licensed social worker, working together, must develop a comprehensive POC to provide identified services to the beneficiary and/or referrals to community agencies. The POC must indicate the specific domains at risk, the specific objectives, specific intervention(s) to be implemented, and the number of visits that are required for actualizing the plan. The POC must be updated whenever a significant change occurs. Documentation must support the changes made. The MIHP provider must determine how best to involve the registered nurse and the licensed social worker in implementing the POC based on the needs identified.

The POC must identify if a beneficiary would benefit from a visit with a registered dietitian based on the needs identified. If the services of a registered dietitian are needed, the necessary physician order must be obtained. The beneficiary may be referred to their MHP or local hospital for nutritional counseling.

The beneficiary's exit from the program is expected to occur when the objectives of the POC are complete, or when the MIHP provider determines that continued interventions are no longer needed.

2.6 CARE COORDINATOR

A specific registered nurse or licensed social worker will be identified as the care coordinator assigned to monitor and coordinate all MIHP care, referrals, and follow-up services for the beneficiary. The care coordinator must assure the family is appropriately followed and referred for needed services. The name of the care coordinator must be documented in the beneficiary's record. The care coordinator must refer all beneficiaries to the Women, Infants and Children (WIC) Program if they are not receiving WIC.

For the infant, MIHP providers are encouraged to participate in local Children's Protective Services (CPS) Interdisciplinary Team meetings, Part C/Early On Interagency Coordinating Council meetings, and in similar efforts to coordinate the infant's care. This assures the use of and coordination with other community resources to avoid duplication of services, identify gaps, and to assure ongoing support when the MIHP case is closed. When appropriate, MIHP referrals to CPS must be made. Appropriate family planning education and referrals must be made and documented.

2.7 PROFESSIONAL VISITS

A professional visit is an encounter with a beneficiary conducted by a licensed professional (i.e., licensed social worker, registered nurse, or infant mental health specialist) for the specific purpose of implementing the beneficiary's plan of care. A registered dietitian may conduct a visit when ordered by a physician.

Medicaid Provider Manual

The professional visit, additional home visit, and discharge visit are one-on-one visits that must be scheduled to accommodate the beneficiary's situation and be appropriate to the beneficiary's level of understanding. Visits lasting less than 30 minutes or provided in a group setting are not billable.

Medicaid reimbursement for a professional visit includes related care coordination activities. MIHP providers are eligible for Medicaid reimbursement for one professional visit per beneficiary on the same date of service, regardless of the place of service. When beneficiary needs arise, the MIHP provider must coordinate all necessary MIHP related services with the appropriate community agencies. Visits beyond the established limit cannot be billed to the beneficiary or Medicaid.

All professional visit records must include the place of service, time the visit began and ended, risk factors discussed, and actions taken. Coordination of agency and community services and arranging transportation for the beneficiary are part of each professional visit. The MIHP provider must assure the beneficiary has been referred to the WIC program.

Family planning options must be discussed throughout the course of care, giving the woman time to consider their options.

The MIHP must provide directly or arrange bilingual services and/or services for the visually impaired and/or hearing impaired when needed so all beneficiaries may fully participate in the MIHP.

MDHHS does not reimburse for missed visits/appointments. A beneficiary may not be billed for a missed visit/appointment.

2.8 ENHANCED CARE COORDINATION TIME

This time must only be reported by the care coordinator. Enhanced care coordination time includes all hours spent on provider office-based phone calls, referrals, and non-face-to-face interactions concerning beneficiary services and support. This time must be reported when at least 30 minutes of MIHP home visitor time is dedicated to care management activities within a single calendar month.

2.9 DRUG-EXPOSED INFANT

A drug-exposed infant is an infant born with the presence of an illegal drug(s) and/or alcohol in their circulatory system, or who is living in an environment where substance abuse and/or alcohol is a danger or is suspected. Due to the complex nature of these cases, additional visits may be required. A separate drug-exposed procedure code is assigned for additional visits. The beneficiary's record must contain documentation to support the use of the drug-exposed procedure code.

The initial assessment and up to nine professional visits for a drug-exposed infant are billable by the MIHP. An additional nine infant visits may be provided when requested in writing by the medical care provider. In these cases, the reason for and purpose of additional visits must be well documented in the beneficiary record.

The maximum of 36 professional visits and the initial assessment visit may be reimbursed for a drug-exposed infant. The provider must use the professional visit code for the first 18 visits; the drug-exposed procedure code may then be billed for up to an additional 18 visits. Refer to the MDHHS website for additional code information. (Refer to the Directory Appendix for website information.)

Medicaid Provider Manual

In instances where a request is made for additional visits for a drug-exposed infant, the MIHP provider may, when deemed necessary and substantiated by appropriate documentation, substitute the drug-exposed procedure code with the complex home visit code. This substitution will still be considered one of the 18 allowable additional visits for the beneficiary and must be drug exposure related. Furthermore, the total number of professional visits, in addition to the initial assessment visit, shall not exceed the maximum limit of 36 visits.

2.10 PLACE OF SERVICE

Reimbursement for professional visits is based on the place of service. A clinic/office visit and a home visit pay different amounts; therefore, the place of service must be documented in each professional visit note.

Typically, all visits are performed at the beneficiary's home or at the MIHP provider's office. On rare occasions when a visit cannot be completed in the beneficiary's home, in the provider's office or via telehealth, the provider may work with the beneficiary to identify a mutually agreeable site to conduct a visit. These types of visits are referenced as visits occurring in the community setting.

For a community visit to be reimbursable, the beneficiary record must clearly identify the reason(s) why the beneficiary could not be seen in their home or in the MIHP office setting. This documentation must be completed for each visit occurring in the community setting. Visits occurring in buildings contiguous with the provider's office, in the provider's satellite office, or rooms arranged or rented for the purpose of seeing beneficiaries are considered to be in an office setting rather than in a community setting. Visits should never be conducted in the MIHP provider's home.

2.10.A. MATERNAL SERVICES

- Professional visits may be provided in a clinic/office setting, the beneficiary's home/place of residence, including homeless shelter, via telehealth, or at a mutually agreed upon community location. Efforts must be made to visit the beneficiary in the home.
- Professional visits may not be provided in the inpatient hospital setting.

2.10.B. INFANT SERVICES

- MIHP is a home-visiting program.
- If a home visit is not feasible, services may be provided any place other than an inpatient hospital setting.
- The infant and primary caregiver must be present at all visits.

2.10.C. TELEHEALTH SERVICES

MIHP agencies may conduct initial assessment visits and professional visits via telehealth. Agencies will be allowed to provide a maximum of up to 40 percent of their total caseload of visits as telehealth, while 60 percent of visits must remain as in-person visits. This percentage is applied to the agency and not per beneficiary to allow for telehealth visit flexibility dependent on beneficiary needs.

Medicaid Provider Manual

Telehealth visits must include a dual audio/visual platform. Providers must ensure the privacy of the beneficiary and the security of any information shared via telehealth. MDHHS requires either direct or indirect beneficiary consent for all services provided via telehealth. This consent must be properly documented in the beneficiary's chart in accordance with applicable standards of practice. Telehealth visits must follow policy guidelines and program requirements for typical MIHP initial assessment and professional visits.

Appropriate use of telehealth will be determined by a combination of beneficiary preference and MIHP provider judgement. Examples of when telehealth is an appropriate option may include, but are not limited to, circumstances such as when a beneficiary:

- Refuses an in-person visit and would benefit from receiving MIHP services,
- Has an illness in their household, or
- Needs to share sensitive information that cannot be discussed in the home environment and a transportation barrier exists for an office visit.

All audio-visual and audio-only MIHP telehealth services must be reported with:

- Modifier 93 for audio-only services
- Modifier 95 for audio-visual services
- Report the place of service (POS) code that would be reported as if the beneficiary were in-person for the visit (e.g., home or office)

Inappropriate use of telehealth may include, but is not limited to, circumstances such as when a beneficiary has no barrier for an in-person visit and does not request a telehealth visit.

Telehealth visits that occur via telephone-only are allowable only when a beneficiary barrier exists for use of an audio/visual platform (e.g., lack of smart phone or internet access). Documentation in the beneficiary's chart must include the reason for a telephone-only visit.

MIHP providers are required to follow current Medicaid telemedicine policy requirements as applicable.

2.11 TRANSPORTATION

Transportation services are available to help MIHP-enrolled pregnant and infant beneficiaries access their health care and pregnancy-related appointments and for a mother to visit their hospitalized infant. Pregnancy-related appointments include those for oral health services, WIC services, behavioral or substance use disorder treatment services, and childbirth and parenting education classes. Through the completion of the Risk Identifier, the MIHP provider must assess each MIHP beneficiary's need for transportation services.

Beneficiaries in the Nurse Family Partnership (NFP) do not need a Risk Identifier completed to receive transportation services. Transportation is the only MIHP service available to NFP beneficiaries.

2.11.A. TRANSPORTATION FOR MIHP MEDICAID HEALTH PLAN ENROLLEES

MHPs are responsible for providing transportation for pregnancy-related appointments for MHP enrolled MIHP and NFP participants. MIHPs are subject to the MHP's internal processes for the coordination of transportation services for MHP enrollees.

2.11.B. TRANSPORTATION FOR MIHP FEE FOR SERVICE BENEFICIARIES

The MIHP may provide transportation to MIHP Fee-for-Service (FFS) beneficiaries for medical/health care services and pregnancy related appointments when no other means of transportation are available, including transportation from the local MDHHS office. Transportation services provided to the pregnant beneficiary should be billed utilizing the Medicaid ID number of the pregnant woman, and transportation services provided for infant services should be billed utilizing the infant's Medicaid ID number.

Reimbursement for transportation services provided to Medicaid FFS beneficiaries is made according to the allowable amount established by MDHHS and aligns with rates established for Non-Emergency Medical Transportation (NEMT) services. Refer to the MDHHS Non-Emergency Transportation Database located on the MDHHS website. (Refer to the Directory Appendix for website information.)

MDHHS reimburses the MIHP provider an administrative fee equal to six percent of the cost of transportation provided to MIHP FFS beneficiaries. When billing, the six percent fee should be calculated and included in the amount charged, not to exceed the maximum amount allowed. The MIHP provider must determine the most appropriate and cost effective method of transportation. MDHHS reimburses transportation costs at the lesser of actual cost or the maximum/upper limit for:

- Bus
- Mileage (personal, including beneficiary, relative or friend).
- Taxi

If other methods of transportation are not available or appropriate, the MIHP provider may make arrangements with local cab companies to provide taxi service for MIHP beneficiaries. Since this is a more expensive service, MDHHS reimburses a maximum of 20 trips per beneficiary through the MIHP.

The MIHP provider must maintain documentation of transportation for each beneficiary for each trip billed. The record must specify:

- The name and address of the beneficiary;
- The date of service (DOS);
- The trip's starting point and destination (address, city);
- The purpose of the trip;
- The number of tokens or miles required for the trip;
- The amount that the beneficiary or transportation vendor was reimbursed;

Medicaid Provider Manual

- The provider identification information for the individual or business providing transportation; and
- Verification of transportation provider enrollment in CHAMPS.

The MIHP provider must ensure the beneficiary kept the appointments for which transportation tokens or funds were provided. Medicaid does not pay for transportation not provided.

The MIHP provider may give transportation tokens or funds to the pregnant woman or to the caregiver of the infant. In situations where funds are provided, it is recommended that the pregnant woman or the caregiver sign a receipt and that the receipt be retained in the case records. The MIHP may also contract for transportation services. Transportation services should be billed for each date of service it was provided. MDHHS contracts with a transportation brokerage company to arrange and provide NEMT for beneficiaries residing in Wayne, Oakland and Macomb counties. Transportation may be provided when the beneficiary qualifies for service and has no other means of transportation. (Refer to the Directory Appendix for contractor contact information.)

2.12 CHILDBIRTH EDUCATION [CHANGE MADE 4/1/2025]

Childbirth education is a series of group classes intended to help:

- Understand the changes in the body during pregnancy;
- Understand the delivery process, including information regarding pre-term labor;
- Understand the postpartum period;
- Care for the infant (classes may include information on developing positive parenting skills);
- Interact with other pregnant women; and
- Build a support network.

First-time mothers must be encouraged to complete the course.

The medical care provider or the MIHP provider may make a referral for childbirth education classes. MIHP providers may provide this service directly or have a contract with a local hospital's outpatient clinic. An outpatient hospital clinic that provides this service may bill Medicaid directly for FFS beneficiaries. The contract must indicate which provider is to bill and receive payment. These services are provided to a group in a classroom situation.

MIHP childbirth education includes, but is not limited to, the following topics:

- Pregnancy,
- Labor and delivery,
- Infant care and feeding,
- Postpartum care, and
- Family planning.

Medicaid Provider Manual

In unusual circumstances (e.g., beneficiary entered prenatal care late or is homebound due to a medical condition), childbirth education may be provided in the beneficiary's home as a separately billable service. Case records must document the need for one-on-one childbirth education and where services were provided. (Refer to the Education Reimbursement subsection of this chapter for additional billing information.)

Refer to the Hospital Chapter for additional information regarding coverage requirements for childbirth education. **(text added 4/1/2025)**

2.13 PARENTING EDUCATION

Parenting education is intended to develop positive parenting skills and attitudes, provide interaction with other parents, and possibly build a support network. Parenting education may be billed once per infant or, in the case of multiple births, once per family.

The infant's medical care provider or the MIHP provider may make a referral for parenting education classes. The services may be provided by the MIHP provider or by contract with an outpatient hospital or community-based organization. The contract must indicate which provider is to bill and receive payment. These services are provided to a group in a classroom situation.

Parenting education classes should include, but are not limited to,:

- General feeding recommendations throughout the first year of life,
- Normal and abnormal patterns of elimination,
- Common signs and symptoms of infant illness,
- Common childhood injuries and how to care for them,
- Normal range of sleep, rest, activity and crying patterns,
- General hygiene needs of infants,
- Normal developmental milestones of infants throughout the first year,
- Basic emotional needs,
- Basic protection from toxic and/or hazardous waste,
- Basic immunizations and health maintenance, and
- General day-to-day living with children.

(Refer to the Education Reimbursement subsection of this chapter for additional billing information.)

2.14 LACTATION SUPPORT AND COUNSELING SERVICES

Medicaid will reimburse for evidence-based lactation support services provided to post-partum women in the outpatient setting up to and through 12 months post-delivery when services are provided by a qualified licensed MIHP registered nurse or licensed social worker in possession of a valid and current IBCLC certification. A maximum of two visits per pregnancy will be reimbursed for either a single or multiple gestation pregnancy. One visit is reimbursable per date of service.

Medicaid Provider Manual

Before initiating MIHP IBCLC services, the initial assessment visit, appropriate Risk Identifier (infant or maternal), and Plan of Care (infant or maternal) must be completed and the Risk Identifier entered into the MIHP database.

Although MIHP serves the mother-infant dyad, a distinction is made between maternal and infant services for billing purposes. IBCLC services are considered a component of pregnancy related services. Claims for IBCLC services are to be submitted utilizing the mother's Medicaid beneficiary identification number. Documentation must include the need for maternal lactation support, a begin time and end time of services provided, and a comprehensive description of the professional interventions provided.

For all IBCLC rendered services, a copy of the current, valid IBCLC certification is to be maintained by the MIHP organization in accordance with the record keeping requirements of the Medicaid program.

Refer to the Billing & Reimbursement for Professionals Chapter of this manual for additional billing information. Refer to the Practitioner Chapter of this manual for additional information related to the service component requirements.

2.15 TRANSFER OF CARE/RECORDS

During the course of care, the beneficiary may require services from a different provider due to a move to another area or otherwise request a change of MIHP providers. When an MIHP provider is aware of a planned change in provider, information about the MIHP provider at the new location should be provided to the beneficiary. The referring provider must consult with the new provider about the case and transfer necessary information or records in compliance with the privacy and security requirements of Health Insurance Portability and Accountability Act of 1996 (HIPAA) regulations. A copy of the completed Risk Identifier, POC, and visit notes must be shared with the new provider. Close coordination between providers should avoid duplication of services. A release of information from the beneficiary is necessary.

2.16 IMMUNIZATIONS

Immunization status must be discussed throughout the course of care. Providers must determine the status of the MIHP beneficiary's (i.e., mother and/or child) immunizations. The parent(s) should be encouraged to obtain immunizations and be assisted with appointments and transportation as needed. Before closing an MIHP case, the provider must have assessed immunization status, provided immunization education, and documented accordingly in the case record.

2.17 SPECIAL ARRANGEMENTS FOR CHILD PROTECTIVE SERVICES

Because of the serious nature of MIHP cases, some beneficiaries need the assistance of the MDHHS Children's Protective Services (CPS) program. The MIHP provider must work cooperatively and continuously with the local CPS office. Contact persons for MIHP and CPS must be identified. Referral protocol and a working relationship must be developed and maintained. MIHP is a valuable resource for the CPS program. The MIHP provider must seek CPS assistance in a timely manner. MIHP and CPS work concurrently on at least some referred cases. CPS is not to be viewed as a resource of last resort for the agency to call when all else fails.

The Michigan Child Protection Law (Act No. 238, Public Acts of 1975) requires health care professionals and others to report cases of suspected child abuse/neglect to CPS. When and how the MIHP provider

Medicaid Provider Manual

must refer can best be determined by discussions with the local CPS agency. MIHP activity does not replace the need for required CPS referrals.

2.18 COMMUNICATIONS WITH THE MEDICAL CARE PROVIDER

When an MIHP case is opened, the MIHP provider must notify the medical care provider within 14 calendar days. When an MIHP case is opened for a pregnant woman with no medical care provider, the MIHP must assist the woman in finding a medical care provider.

The MIHP provider must keep the medical care provider informed of services provided as directed by the medical care provider or when a significant change occurs. The initial assessment visit is the first visit when the Risk Identifier is completed. The communication identifying risks must be sent to the medical care provider within 14 calendar days after the initial assessment visit is completed. The discharge summary, including the services provided, outcomes, current status, and ongoing needs of the beneficiary, must be completed and forwarded to the medical care provider when the MIHP case is closed.

2.19 AUTHORIZATION FOR PROGRAM EXCEPTIONS [CHANGES MADE 4/1/2025]

In limited situations, when beneficiary needs surpass outlined MIHP program parameters, the MIHP Operations Team may recommend additional visits for MIHP services, as required, in the following circumstances:

- Initiation of services for a child over 12 months of age;
- Continuation of services beyond 18 months of age (e.g., to assist beneficiaries facing end-of-life concerns (mother or infant) or in cases where an alternative program is unfeasible);
- Professional observation indicating that a beneficiary will benefit from MIHP services after being assessed with no risks using the appropriate program assessment tool (Risk Identifier); and
- Maternal professional visit during a NICU stay following the mother's discharge from labor and delivery stay. (text revised/added 4/1/2025)

MIHP providers seeking program exceptions for all beneficiaries must submit documentation to the MIHP Operations Team that supports any identified risks and how the beneficiary may benefit from services. As a reminder, program screening tools and educational materials utilized by the MIHP are designed for maternal and infant use only.

The MIHP Operations Team will be responsible for direct authorization of program exceptions for FFS beneficiaries. For beneficiaries enrolled in MHPs, the MIHP Operations Team will recommend exception visits to the MHPs. MHPs will be responsible for the review and processing of the prior authorization request for the services in accordance with their utilization management processes. All approved written authorizations are to be kept in the beneficiary's MIHP provider file and must be available upon request. Additionally, as applicable, the MIHP provider is required to note any granted authorizations in the program approved communication tool for a beneficiary enrolled in a Medicaid Health Plan.

SECTION 3 – REIMBURSEMENT

To receive reimbursement for services, the MIHP billing National Provider Identifier (NPI) must be a facility, agency, or organization. A MIHP specialty must be indicated when enrolling as a MIHP provider through CHAMPS. Claims should include a primary diagnosis code for an infant-related or pregnancy-related condition. Providers are encouraged to report a secondary diagnosis reflecting a social determinant of health (SDOH) utilizing the ICD-10 codes in the category range Z55-X65. The MIHP provider must bill only the procedure codes listed in the MDHHS Maternal Infant Health Program Database located on the MDHHS website. (Refer to the Directory Appendix for website information.)

All services provided by MIHP providers to MHP enrollees should be billed directly to the MHP. All services provided by MIHP providers to Fee-for-Service beneficiaries should be billed directly to MDHHS. MIHP services are a Medicaid only benefit. MIHP providers are not required to secure other insurance adjudication response(s) for claims for MIHP services prior to billing Medicaid FFS or MHPs, as the parameters of other carriers would never cover MIHP services. (Refer to the Billing & Reimbursement for Professionals Chapter of this manual for additional billing information.)

The Risk Identifier is required to be completed and entered into the MIHP database before the service is billed. (Refer to the Maternal Infant Health Program Operations Guide for additional information.) MIHP providers receive separate reimbursement for each Risk Identifier form completed and entered into the MIHP database even if it is determined the beneficiary does not need MIHP services. The Risk Identifier is billed and reimbursed based on place of service. As with all Medicaid services, documentation must support the services billed and paid.

Reimbursement is limited to one Maternal Risk Identifier per pregnant woman during their pregnancy and one Infant Risk Identifier per infant. Due to factors such as premature termination of a pregnancy or a subsequent pregnancy in the same year, an MIHP provider may do a Risk Identifier on a pregnant woman and receive reimbursement twice in the same year. In such instances, the provider must indicate "second pregnancy" in the remarks section of the claim when billing for the service.

Reimbursement for a professional visit is based on the place of service. The place of service must be documented in each professional visit note and billed accordingly. Medicaid reimbursement for a professional visit includes related care coordination and monitoring of activities.

Services scheduled but not provided to the beneficiary are not billable. This includes all MIHP services. The beneficiary must not be billed for visits provided beyond the established limit.

3.1 EDUCATION REIMBURSEMENT

Reimbursement for MIHP childbirth education classes and/or parenting education classes are for the complete course, regardless of the number of classes needed to complete the course. At a minimum, the course outline found in the Maternal Infant Health Program Operations Guide must be covered. Additional items may be added at the discretion of the provider. The pregnant woman or caregiver must attend at least one-half of the classes or cover at least one-half of the curriculum for the service to be billed. Dates of attendance must be documented in the beneficiary's record. If the class is offered in the community, but not all items on the outline are covered, the missed items should be covered during a professional visit and not billed separately as education.

- MIHP childbirth education may be billed one time per beneficiary per pregnancy.

Medicaid Provider Manual

- MIHP parenting education may be billed one time per infant. In the case of twins or other multiple births, parenting education may be billed only once for the family.

If the MIHP provider refers the beneficiary to a local hospital to provide the classes, the hospital must bill the appropriate MHP to receive payment. If the MIHP provider contracts with an outpatient hospital or community based organization for childbirth education, the contract must indicate which provider is to bill and receive payment. If the classes are available at no charge to the public from a community-based organization, the MIHP cannot bill the Medicaid Fee-for-Service program or the beneficiary for the service.

Medicaid Provider Manual

SECTION 4 - FORMS

MIHP providers must use standardized forms developed by MDHHS. Copies of the forms are located in the Maternal Infant Health Program Operations Guide and/or on the MDHHS website. (Refer to the Directory Appendix for website information.) At a minimum, the data elements included in these forms must be maintained. If additional data elements are needed, it is suggested the agency develop a separate form to accommodate their needs, to be used in addition to the state forms. The goal is to have standardized forms statewide.

SECTION 5 - OPERATIONS AND CERTIFICATION

MDHHS certifies MIHP providers. To become an MIHP provider, the criteria in the Michigan Medicaid Provider Manual and the Maternal Infant Health Program Operations Guide must be met. Provider participation criteria includes, but is not limited to, required staffing and the capacity to provide services, including outreach, and weekend and after-hours coverage. MIHP providers must follow all policies and procedures in the Michigan Medicaid Provider Manual in addition to the Maternal Infant Health Program Operations Guide.

5.1 CRITERIA

Providers must meet the following participation criteria.

- The provider must meet program requirements to qualify for enrollment in Medicaid.
- In cases where services are provided through a contract with another agency, the contract or letter of agreement must be on file for review by MDHHS. It must specify the time period of the agreement, the names of the individuals providing services, and where the billing responsibility lies.
- The provider's physical facilities for seeing beneficiaries must be comfortable, safe, clean, and meet legal requirements.
- The provider must have experience in the delivery of services to the target population and demonstrate understanding of the concept and delivery of maternal and infant services.
- The provider must demonstrate linkages to relevant services and health care organizations in the area to be served.
- The organization must demonstrate a capacity to conduct outreach activities to the target population and to medical providers in the geographic area to be served.

5.2 STAFFING

Required staff for the MIHP is comprised of licensed registered nurses and licensed social workers. Optional staff may include a registered dietitian, infant mental health specialist, or an IBCLC. All staff must meet the qualifications as stated in the Staff Credentials subsection of this chapter.

5.3 OPERATIONS AND CERTIFICATION REQUIREMENTS

Providers must demonstrate their ability to validate the need for, and delivery of, MIHP services appropriate to each beneficiary's individual need. The MIHP must:

- Deliver services appropriate to the beneficiary's level of understanding.
- Schedule services to accommodate the beneficiary's situation.
- Complete appropriate Risk Identifier by a licensed social worker or a registered nurse.
- Develop the plan of care by a licensed social worker and a registered nurse (jointly).
- Complete the Risk Identifier based on a home visit as required for the infant and, if possible, for the pregnant woman.

Medicaid Provider Manual

- Demonstrate a system for handling beneficiary grievances.
- Provide for weekend and after-hours emergencies.
- Provide directly or arrange for bilingual services, and services for the visually impaired and/or hearing impaired, as indicated.
- Maintain all physician orders in the medical record.
- Coordinate agency and community services for the beneficiary.
- Arrange transportation services when appropriate.
- Respond to referrals promptly to identify the beneficiary's needs (within a maximum of 7 calendar days for the infant and 14 calendar days for the pregnant woman).
- Respond to referrals received prior to the infant's discharge from the inpatient setting within two business days of hospital discharge.
- Notify the medical care provider of the beneficiary's enrollment within 14 days.
- Document and report disposition of the referral (i.e., initiation of services, inability to locate, or refusal of services) to the referring source.
- Provide ongoing communication with the beneficiary's medical care provider.
- Provide, directly, the services of at least a registered nurse or licensed social worker. Infant mental health specialist and/or registered dietitian services may be provided through a subcontractor or services may be accessed in other ways.
- Not bill for services provided by community resources.
- Provide services in a clinic, an office, a home setting and/or community setting, as appropriate.
- Maintain a current list of local Public Health programs such as WIC Nutrition, Early and Periodic Screening, Diagnosis, and Treatment (EPSDT), Community Mental Health (CMH), Children's Special Health Care Services (CSHCS), and other agencies that may have appropriate services to offer the beneficiary, and agree to work cooperatively with these agencies.
- Have written protocols that comply with the reporting requirements mandated by the Michigan Child Protection Law (Act No. 238, Public Acts of 1975). Include protocols on coordination with the CPS unit of the local MDHHS office that specify how the MIHP provider will make CPS referrals, initiate follow-up contacts with CPS, and participate in local CPS multidisciplinary team meetings involving infants served by the MIHP.
- Maintain an adequate and confidential beneficiary records system, including services provided under a subcontractor. (HIPAA standards must be met.)
- Have written internal protocols to include all aspects of the program.
- Be actively linked to or a member of the Great Start Collaborative. When providing infant services, in addition to the Great Start Collaborative, providers must also be actively linked to or be a member of the local Part C/Early On Interagency Coordinating Council.
- Report all new MHP enrollees to the appropriate MHP on a monthly basis or as agreed to in the Care Coordination Agreement.
- Follow all procedures as written in the Maternal Infant Health Program Operations Guide.

Medicaid Provider Manual

- Follow all Medicaid policies as published in the MDHHS Medicaid Provider Manual, Behavioral and Physical Health and Aging Services Administration (BPHASA) Bulletins, and the Maternal Infant Health Program Operations Guide.

5.4 ISSUANCE OF CERTIFICATION

Based upon satisfactory application, MDHHS provides a provisional MIHP certification. After an agency is provisionally certified and providing services, MDHHS conducts a provider site visit. The site visit must occur within six months of the provisional certification. The site visit is to observe how the program is being implemented and to assist in resolving any problems experienced in the implementation of the program. Based upon the site visit, MDHHS grants the agency either a six-month certification, a three-year certification, or discontinues certification. MDHHS makes a formal certification visit every three years, with informal site visits at more frequent intervals.

If at any time after receiving certification the provider becomes deficient in any of the qualifying criteria, including staffing, the provider must notify the MDHHS Division of Family & Community Health immediately. (Refer to the Directory Appendix for contact information.) MDHHS then determines whether the agency may continue providing services given the deficiency(ies). The MDHHS decision is based on the evaluation of many factors, including the number of deficiencies, the specific deficiency(ies) involved, the availability of other providers in the area, impact on caseload, etc.

If at any time the MIHP provider fails to meet the program policies or certification requirements, Medicaid reimbursement can be jeopardized. The MIHP provider is subject to audit by Medicaid and if any discrepancy(ies) is found, appropriate follow-up action may be taken, such as recoupment of payments, holding reimbursement on claims, or termination of Medicaid enrollment. If a negative action is imposed, the MIHP provider is given an opportunity for appeal.

Agencies wishing to become a MIHP provider may contact the MDHHS Division of Family & Community Health. (Refer to the Directory Appendix for contact information.)

Medicaid Provider Manual

MATERNITY OUTPATIENT MEDICAL SERVICES PROGRAM

TABLE OF CONTENTS

Section 1 – General.....	1
1.1 Eligibility Determination	1
1.2 Period of Coverage.....	1
1.3 Verifying Eligibility	1
Section 2 – Services	2
2.1 Covered Services.....	2
2.2 Noncovered Services [Change Made 7/1/2025]	3
2.3 Prior Authorization	3
Section 3 – Billing & Reimbursement	4
3.1 Submitting Medical Claims	4
3.2 Submitting Pharmacy Claims	4

SECTION 1 – GENERAL

The Maternity Outpatient Medical Services (MOMS) program covers outpatient pregnancy-related services for the unborn child of an undocumented pregnant woman during the prenatal and postpartum period as well as inpatient delivery-related services. MOMS will also cover family planning services for the mother during the postpartum period.

1.1 ELIGIBILITY DETERMINATION

Women who are pregnant and meet the following criteria may apply for MOMS coverage:

- Income at or below 195 percent of the Federal Poverty Level.
- Covered by the Medicaid Emergency Services Only (ESO) program.

Women who are incarcerated in any institution where residents are precluded from using their Medicaid coverage are not eligible for this program.

1.2 PERIOD OF COVERAGE

The MOMS enrollment period is from the date of application, once eligibility is determined, through 60 days after the pregnancy ends. The maximum period of retroactive eligibility for MOMS is 90 days from date of application.

1.3 VERIFYING ELIGIBILITY

MOMS beneficiaries are identified in the eligibility response with the Benefit Plan ID of MOMS. (Refer to the Beneficiary Eligibility chapter for additional information.) When a woman is determined eligible for the MOMS program via the presumptive eligibility process, a presumptive eligibility decision notice is shared. This notice includes the MOMS coverage dates.

SECTION 2 – SERVICES

2.1 COVERED SERVICES

The following services are covered consistent with current MOMS policy:

- Prenatal period services, including:
 - Prenatal care and pregnancy-related care
 - Condoms (covered in the prenatal period for sexually transmitted infection [STI] prevention)
 - Pharmaceuticals and prescription vitamins
 - Laboratory services
 - Radiology and ultrasound
 - Maternal Infant Health Program (MIHP) - for prenatal services only
 - Childbirth education
 - Outpatient hospital care
 - ACIP recommended vaccines and their administration
- Labor and delivery services (including all professional and inpatient hospital services) are covered.
- Postpartum care is limited to medically necessary ambulatory postpartum services.
- Doula services through 60 days postpartum.
- Family planning services, including:
 - Office visits for family planning related services, including preventive evaluation and management office visits and other outpatient visits for family planning services.
 - Contraceptives, including oral contraceptives and injectables.
 - Contraceptive supplies and devices for voluntarily preventing or delaying pregnancy.
 - Diagnostic evaluation and pharmaceuticals related to contraceptive management or the initial treatment of sexually transmitted infections.
 - Sterilizations completed in accordance with current Medicaid policy.
 - Counseling for family planning services, including sterilization, as a part of the family planning visit.
- Behavioral health and substance use disorder (SUD) services and supports are covered during the prenatal period and through 60 days postpartum. Covered services include, but are not limited to:
 - Appropriate screenings and preventive services
 - Behavioral health treatment services and validated clinical assessment tools

Medicaid Provider Manual

- Perinatal depression screening, counseling, and intervention
- Medication-Assisted Treatment (MAT) for SUD
- Tobacco use interventions for smoking cessation
- Inpatient, outpatient, and residential treatment
- Emergency services, crisis intervention and stabilization
- Behavioral health and SUD-related case management services
- Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services chapter for information on coverage details of the specialty supports and services provided through the local Prepaid Inpatient Health Plans (PIHPs). For services not included in the capitation payments to the PIHPs, services are covered through Medicaid Fee For Service.

2.2 NONCOVERED SERVICES [CHANGE MADE 7/1/2025]

The following services are not covered under the MOMS benefit:

- Postpartum outpatient lactation support and counseling services provided by an IBCLC
- Postpartum MIHP coverage
- Dental services (revised 7/1/2025)

2.3 PRIOR AUTHORIZATION

If a service does not meet the definition of the pregnancy-related services noted above or if the service normally requires prior authorization (PA) by the Medicaid program, a PA request must be submitted to MDHHS. Requests of authorization of pharmaceuticals must be made to the MDHHS Pharmacy Benefits Manager (PBM). (Refer to the Directory Appendix for contact information.)

Medicaid Provider Manual

SECTION 3 – BILLING & REIMBURSEMENT

Billing and coordination of benefits policies and procedures, as well as reimbursement rates, parallel Medicaid. (Refer to the Billing & Reimbursement and the Coordination of Benefits Chapters of this manual for additional information.)

3.1 SUBMITTING MEDICAL CLAIMS

MOMS claims should be held until the beneficiary's eligibility can be verified using:

- CHAMPS Eligibility Inquiry
- HIPAA 270/271 (Eligibility Inquiry/Response) transactions
- Web-based options

(Refer to the Beneficiary Eligibility Chapter for additional information.)

Providers must use the appropriate Z30 International Classification of Diseases (ICD) diagnosis code as the primary diagnosis on claims for family planning services.

3.2 SUBMITTING PHARMACY CLAIMS

Pharmacy services provided to MOMS beneficiaries must be billed to the MDHHS Pharmacy Benefits Manager (PBM). (Refer to the Directory Appendix for contact information.)

Family planning supplies not furnished by the practitioner as part of the medical services must be prescribed by a Medicaid enrolled practitioner and dispensed by a pharmacy. Exceptions include condoms and similar supplies that do not require a prescription.

Medicaid Provider Manual

SECTION 1 – GENERAL INFORMATION

The Michigan Department of Health and Human Services (MDHHS) contracts with Medicaid Health Plans (MHPs), selected through a competitive bid process, to provide services to Medicaid beneficiaries. The selection process is described in a Request for Proposal (RFP) released by the Office of Purchasing, Michigan Department of Technology, Management & Budget. The MHP contract, referred to in this chapter as the Contract, specifies the beneficiaries to be served, scope of the benefits, and contract provisions with which the MHP must comply. Nothing in this chapter should be construed as requiring MHPs to cover services that are not included in the Contract. A copy of the MHP contract is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

MHPs must operate consistently with all applicable published Medicaid coverage and limitation policies. (Refer to the General Information for Providers and the Beneficiary Eligibility chapters of this manual for additional information.) Although MHPs must provide the full range of covered services listed below, MHPs may also choose to provide services over and above those specified. MHPs are allowed to develop prior authorization requirements and utilization management review criteria that differ from Medicaid requirements. The following subsections describe covered services, excluded services, and prohibited services as set forth in the Contract.

1.1 SERVICES COVERED BY MEDICAID HEALTH PLANS (MHPs)

The following services must be covered by MHPs:

- Ambulance and other emergency medical transportation
- Blood lead services for individuals under age 21
- Breast pumps; personal use, double-electric
- Certified Clinical Nurse Specialist services
- Certified nurse-midwife services
- Certified pediatric and family nurse practitioner services
- Childbirth and parenting classes
- Chiropractic services
- Community Health Worker (CHW)/Community Health Representative (CHR) services
- Dental services for adults
- Diagnostic lab, x-ray and other imaging services
- Doula services
- Durable medical equipment and medical supplies
- Emergency services
- End Stage Renal Disease (ESRD) services
- Family planning services
- Health education

Medicaid Provider Manual

- Hearing and speech services
- Hearing aids
- Home health services
- Hospice services (if requested by enrollee)
- Immunizations
- Inpatient and outpatient hospital services
- Intermittent or short-term restorative or rehabilitative nursing care (in or out of a facility) for up to 45 days
- Long-term care acute hospital services (LTACH)
- Maternal Infant Health Program (MIHP)
- Medically necessary weight reduction services
- Mental health care
- Out-of-state services authorized by the MHP
- Outreach for included services, especially pregnancy-related and well-child care
- Pharmacy services
- Podiatry services
- Practitioner services (such as those provided by physicians, optometrists, or oral-maxillofacial surgeons)
- Prosthetics and orthotics
- Therapies (speech, language, physical, occupational)
- Tobacco cessation treatments, including pharmaceutical and behavior support
- Transplant services
- Transportation for all medically necessary Medicaid covered services
- Treatment for sexually transmitted disease (STD)
- Vision services
- Well child/EPSTD for individuals under age 21

The covered services provided to Healthy Michigan Plan enrollees under the contract include all those listed above and the following additional services:

- Additional preventive services required under the Patient Protection and Affordable Care Act as outlined by MDHHS

Medicaid Provider Manual

1.2 SERVICES EXCLUDED FROM MHP COVERAGE BUT COVERED BY MEDICAID

The following Medicaid services are not covered by MHPs:

- Custodial care in a licensed nursing facility; restorative or rehabilitative nursing care in a licensed nursing care facility beyond 45 days
- MDHHS also maintains a list of specific Medicaid program-covered physician-administered drugs and biological products that are not covered by MHPs. This list of physician-administered drugs and biological products, carved out from MHP coverage, will be reimbursed as a Fee-for-Service (FFS) benefit for all beneficiaries in FFS and for those enrolled in an MHP. (Refer to the Physician-Administered Drugs and Biological Products Not Covered by Medicaid Health Plans subsection of the Practitioner chapter of this manual for additional information. Refer to the Directory Appendix for website information for the physician-administered drugs and biological products list.)
- Home and Community Based Waiver program services
- Inpatient hospital psychiatric services (MHPs are not responsible for the physician cost related to providing a psychiatric admission physical and histories. However, if physician services are required for other than psychiatric care during a psychiatric inpatient admission, the MHP would be responsible for covering the cost, provided the service has been prior authorized and is a covered benefit.)
- Mental health services outside the MHP's contractual responsibility
- Outpatient partial hospitalization psychiatric care
- Personal care or home help services
- Private Duty Nursing services
- Services provided to persons with developmental disabilities and billed through the Community Mental Health Services Program (CMHSP)
- Services provided by a school district and billed through the Intermediate School District
- Substance abuse services through accredited providers, including:
 - Screening and assessment;
 - Detoxification;
 - Intensive outpatient counseling and other outpatient services; and
 - Methadone treatment
- Beneficiaries diagnosed with inborn errors of metabolism that have been authorized for and use metabolic formulas (B4157 and B4162) will receive all of their Medicaid services through the Medicaid Fee-For-Service Program.
- Services provided to an individual with Medicaid who resides in a State Veterans' Home
- Pediatric Outpatient Intensive Feeding Program services

Medicaid Provider Manual

1.3 SERVICES THAT MHPs ARE PROHIBITED FROM COVERING

- Elective therapeutic abortions and related services. Abortions and related services are covered when medically necessary to save the life of the mother or if the pregnancy is a result of rape or incest;
- Experimental/Investigational drugs, procedures or equipment;
- Elective cosmetic surgery; and
- Services for treatment of infertility.

SECTION 2 - SPECIAL COVERAGE PROVISIONS

This section provides general information regarding MHP coverage requirements for certain services. Additional information regarding the MHP requirements related to these services is contained in the MHP contract. A copy of the contract is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

2.1 COMMUNICABLE DISEASE SERVICES

MHPs must allow enrollees to receive treatment services for communicable diseases from local health departments without prior authorization. For purposes of this section, communicable diseases are HIV/AIDS, STDs, tuberculosis, and vaccine-preventable communicable diseases.

2.2 DENTAL SERVICES

Adult beneficiaries enrolled in a health plan will receive their dental coverage through their health plan. Each health plan contracts with a dental provider group or vendor to provide dental services administered according to the contract. The contract is between the health plan and the dental provider group or vendor, and beneficiaries must receive services from a participating provider to be covered. Questions regarding eligibility, prior authorization or the provider network should be directed to the beneficiary's health plan. It is important to verify eligibility at every appointment before providing dental services. Dental services provided to an ineligible beneficiary will not be reimbursed. For those beneficiaries who are not enrolled in a health plan, dental services will be provided by enrolled dental providers through the Medicaid FFS program. For dental program coverage policy, refer to the Dental Chapter of this manual. The Dental Chapter also contains information on the Healthy Kids Dental benefit, as applicable.

2.3 EMERGENCY SERVICES

MHPs are responsible for emergency services, including the medical screening exams, consistent with the Emergency Medical Treatment and Active Labor Act (EMTALA) (41 USCS 1395 dd (a)) and the Federal Balanced Budget Act of 1997. MHPs may not require prior authorization for emergency screening and stabilization services provided to enrollees.

MHPs are not responsible for paying for non-emergency treatment services beyond screening that are not authorized by the MHP. Coverage for emergency services includes emergency transportation, hospital emergency room services, and professional services.

2.4 FAMILY PLANNING SERVICES

MHP enrollees have full freedom of choice of family planning providers, both in-plan and out-of-plan. MHPs may not require prior authorization for family planning services, including the detection and treatment of STDs. MHPs may advise out-of-network family planning providers, including public providers, to communicate with primary care providers (PCPs) once any form of medical treatment is undertaken.

2.5 FEDERALLY QUALIFIED HEALTH CENTERS (FQHCs)

MHP enrollees may access services provided through a Federally Qualified Health Center (FQHC).

Medicaid Provider Manual

FQHC providers must obtain prior authorization from the MHP. However, the MHP may not refuse to authorize medically necessary services if the MHP does not have a FQHC in the network in the county. The MHP may require FQHC providers to share information and data with the MHP and to provide appropriate referrals to providers in the MHP's network.

2.6 MATERNAL INFANT HEALTH PROGRAM (MIHP)

Effective for dates of service on or after January 1, 2017, MIHP services provided to individuals enrolled in an MHP are administered by the MHP as outlined in the Maternal Infant Health Program Chapter of this manual. All MIHP services provided to MHP enrollees are coordinated and reimbursed by the MHPs. Only MDHHS certified providers may deliver MIHP services to MHP enrollees.

To maintain fidelity of the program and to facilitate compliance with the reporting requirements of Public Act 291 of 2012, it is the expectation that MIHP providers and MHPs will adhere to program components, including but not limited to: MDHHS program certification, the required professional qualifications of staff, and the use of MDHHS MIHP forms. MHPs must establish and maintain a Care Coordination Agreement (CCA) with MIHP providers for both in-network and out-of-network services.

Within one month of when the MHP determines a pregnant or infant enrollee is eligible for MIHP services, the MHP must refer the enrollee to an MIHP provider. MHPs are not required to refer enrollees to an MIHP provider if the enrollee is already participating in an MDHHS approved equivalent evidence-based home visiting program that provides pregnancy-related or infant support services.

MHPs work cooperatively with the local MDHHS office to maintain a referral protocol for those enrollees who need the assistance of MDHHS Children's Protective Services. MIHP providers must work with the MHP and MDHHS Children's Protective Services to ensure appropriate care for MHP enrollees. (Refer to the Maternal Infant Health Program Chapter of this manual for additional information.)

2.7 OUT-OF-NETWORK SERVICES

2.7.A. PROFESSIONAL SERVICES

With the exception of the following services, MHPs may require out-of-network providers to obtain plan authorization prior to providing services to plan enrollees:

- Emergency services (screening and stabilization);
- Family planning services;
- Immunizations;
- Communicable disease detection and treatment at local health departments;
- Child and Adolescent Health Centers and Programs (CAHCP) services;
- Tuberculosis services; and
- Certain MIHP services (refer to the Maternal Infant Health Program Chapter for additional information).

MHPs reimburse out-of-network (non-contracted) providers at the Medicaid fee-for-service (FFS) rates in effect on the date of service.

Medicaid Provider Manual

2.7.B. HOSPITAL SERVICES

MHPs reimburse hospitals according to the terms of the contract between the MHP and the hospital. If a hospital does not have a contract with an MHP but has signed a hospital access agreement with MDHHS, the following conditions apply:

- The hospital agrees to provide emergent services and elective admission services, arranged by a physician who has admitting privileges at the hospital, to Medicaid beneficiaries enrolled in MHPs with which the hospital does not have a contract.
- MHPs agree to continue to use network-contracted providers when available and appropriate.
- The hospital will be entitled to payment by MHPs for all covered and authorized (if required) services provided in accordance with their obligations under the agreement.
- A rapid dispute resolution process will be available for hospitals and MHPs who are unable to achieve reconciliation solutions for outstanding accounts through usual means.
- MHPs reimburse out-of-network (non-contracted) hospital providers at the Medicaid fee-for-service (FFS) rates in effect on the date of service. The payment for inpatient stays includes the relevant DRG and capital costs.

Copies of the Hospital Access Agreement, Health Plan Obligations, and Rapid Dispute Resolution are available on the MDHHS website. (Refer to the Directory Appendix for website information.) Hospitals that have signed the Hospital Access Agreement and the MHPs are required to abide by the terms and conditions of the Agreement.

2.7.C. POST-STABILIZATION AUTHORIZATION DETERMINATIONS

Non-contracted hospitals are required to obtain a patient post-stabilization authorization determination from the beneficiary's MHP prior to any treatment and after stabilization. A post-stabilization authorization determination refers to the process in which inpatient hospital admission or admission to observation status is authorized by the MHP after the beneficiary has been stabilized. (Note: This applies only to MHP beneficiaries who are not dually Medicare and Medicaid eligible. MHPs may not utilize prior authorization (PA) requirements for hospital services for dual Medicare and Medicaid eligible beneficiaries enrolled in an MHP and Medicare fee-for-service.)

Hospitals are required to make and document all post-stabilization authorization requests by telephone call to the beneficiary's MHP prior to providing any treatment after stabilization. Hospitals must provide the MHP with all requested, necessary and current information, including the clinical status upon initial presentation, the clinical status after stabilization, and the initial treatment plan. This information must be provided in accordance with the Emergency Medical Treatment & Active Labor Act (EMTALA). The MHP is required to respond to post-stabilization requests within one hour of receipt of the telephone call and may not require hospitals to make additional phone calls if the initial phone call included all necessary and current clinical information. If the MHP does not respond within one hour, authorization for inpatient admission, payment and additional services is automatic.

Medicaid Provider Manual

Within one hour of the phone call in which the hospital provides the required clinical information noted above, the MHP must make an authorization decision which specifies the service authorized. The decision must be based on the information presented by the hospital at the time of the request rather than a list of pre-determined diagnoses that automatically authorize the patient for admission to observation status and not admission to the inpatient hospital. The MHP may not indicate that observation or admission will be authorized depending upon the clinical outcomes, and the MHP may not subsequently reverse an authorization decision based upon the clinical outcomes or length of time the patient remains in inpatient status. If the hospital and MHP are unable to reach agreement on an authorization decision at the time of the request, the hospital and the MHP must arrange a discussion between physicians in order to resolve the dispute.

The MHP contract requires MHPs to provide twenty-four (24) hour, seven (7) days-a-week availability for post-stabilization authorization requests. Hospitals may not wait until the next business day after stabilization to call for authorization. If the hospital does not call for authorization after stabilization prior to providing additional services, the MHP may review the clinical record at the time of request for authorization or payment to determine if inpatient hospital admission or admission to observation status was clinically appropriate.

2.8 MENTAL HEALTH

MHPs are required to provide behavioral health services not included under the Prepaid Inpatient Health Plan (PIHP) specialty services and supports benefit. The Non-Physician Behavioral Health Appendix of the Behavioral Health and Intellectual and Developmental Disability Supports and Services chapter provides coverage policies and procedures related to these outpatient behavioral health services. Services should be provided through appropriate providers within the service area and may include contracted Community Mental Health Service Program (CMHSP) providers.

For specialty behavioral health needs, MHPs must coordinate with the appropriate PIHP/CMHSP to ensure that medically necessary mental health services are provided to the beneficiary. The Behavioral Health and Intellectual and Developmental Disability Supports and Services chapter provides coverage policies for PIHPs/CMHSPs.

2.9 CHILD AND ADOLESCENT HEALTH CENTERS AND PROGRAMS (CAHCP)

2.9.A. REQUIREMENTS

MHPs must allow enrollees to obtain services from a CAHCP without prior authorization from the MHP. In order to receive payment for covered services, CAHCPs must follow the MHP's billing policies and procedures.

If the CAHCP is in the MHP's provider network, the following conditions apply:

- Covered services must be administered or arranged by a designated primary care physician (PCP).
- The CAHCP must meet the MHP's written credentialing and re-credentialing policies and procedures.

Medicaid Provider Manual

- The CAHCP must meet the MHP's criteria for ensuring quality of care and ensuring that all providers are licensed by the State of Michigan and practice within their scope of practice as defined in Michigan's Public Health Code.

2.9.B. OUTREACH SERVICES

MHPs contract with CAHCPs to provide outreach services to school-aged children on behalf of the respective plans. The following represent categories of outreach activities that CAHCPs must provide under the contracts:

- Medicaid outreach and public awareness
- Facilitating Medicaid eligibility determination
- Program planning, policy development, and interagency coordination related to Medicaid services
- Referral, coordination, and monitoring of Medicaid services
- Medicaid-specific training on outreach eligibility and services

2.10 SUBSTANCE ABUSE, INPATIENT AND OUTPATIENT

MHPs are not responsible for either inpatient or outpatient substance abuse services. Acute medical detoxification services for Medicaid beneficiaries are reimbursed directly by MDHHS. (Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services chapter of this manual for information on substance abuse services provided through PIHPs/CMHSPs.)

2.10.A. INPATIENT

FFS covers an inpatient hospitalization designed for the purpose of detoxification in an inpatient setting. The primary diagnosis on the claim must document that the hospitalization was for the sole purpose of providing an inpatient setting for detoxification. Inpatient detoxification is only allowed under Medicaid policy under limited conditions described in the Acute Inpatient Medical Detoxification subsection of the Hospital Chapter of this manual.

MHPs cover inpatient hospitalization if the beneficiary is hospitalized for medical complications due to substance abuse. In these cases, the primary diagnosis will reflect the medical problem for which the beneficiary was admitted; substance abuse may be a secondary diagnosis. The existence of substance abuse as a secondary diagnosis does not render the admission payable by FFS under the inpatient acute detoxification exception; the MHP is responsible for the claim.

2.10.B. EMERGENCY SERVICES

If the beneficiary is subsequently admitted to an inpatient facility, the emergency services are covered as part of the DRG payment.

Medicaid Provider Manual

If the beneficiary is not admitted, payment for screening and stabilization is covered by the MHP. Hospitals must comply with authorization requirements for services beyond screening and stabilization.

If the beneficiary is not admitted and the services provided in the emergency room (beyond screening and stabilization) are for the sole purpose of treating the substance abuse, e.g., conducting an intake interview for substance abuse treatment, the regional PIHP is responsible for those services. The PIHP is not responsible for the screening and stabilization or other medical treatment provided in the emergency room even if a beneficiary's substance abuse is the underlying cause of the medical problem.

2.10.C. Co-Occurring Mental Health and Substance Use Disorders

For beneficiaries eligible for mental health services under the MHP contract, MHPs may not deny mental health treatment due to the existence of a co-occurring substance use disorder. MHPs must provide the medically necessary mental health services whether the substance abuse diagnosis is the beneficiary's primary diagnosis or a secondary diagnosis.

While MHPs are not required to provide substance abuse treatment, the MHP should direct the plan's mental health providers to identify potential substance abuse issues. If a substance abuse issue is identified, the MHP must provide the medically necessary mental health treatment and coordinate with the appropriate Pre-Paid Inpatient Health Plan (PIHP) regarding the member's substance abuse treatment. MHPs must provide medically necessary mental health services without consideration of the member's decision to seek, or not seek, substance abuse services or on the success or failure of substance abuse treatment.

MHPs must educate providers regarding screening and referral for substance abuse issues. A document that lists the MHP and PIHP available in each county to facilitate coordination among the PIHP and MHP, as well as a listing of available telephone numbers, is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

2.11 TUBERCULOSIS SERVICES

MHP enrollees may obtain testing for tuberculosis from Local Health Departments (LHDs) without MHP prior authorization. Treatment may also be provided by the LHD without prior MHP authorization and regardless of whether a contractual or coordinating relationship exists between the MHP and the LHD. In the absence of a contract or other coordinating agreement, MHPs will reimburse the LHD at Medicaid fee-for-service (FFS) rates in effect on the date of service.

2.12 HOSPITAL 15-DAY READMISSIONS

MDHHS developed a set of readmission guidelines for hospitals and Medicaid Health Plans to utilize in determining whether a 15-day readmission should be treated as a separate admission or a combined admission for payment purposes. The guidelines and suggested discharge documentation elements provide clarification of the policy specified in this manual. The guidelines do not replace or revise the 15-day readmission policy detailed in the Hospital Chapter.

Medicaid Provider Manual

Accurate and complete documentation and discharge planning is vital to successfully implementing the readmission grid which enables the hospital and MHP to agree on whether a readmission should be separate or combined for payment purposes. The guidelines are available on the MDHHS website. (Refer to the Directory Appendix for website information.)

Hospitals and MHPs are encouraged to work together to develop discharge documentation and planning processes that are mutually agreeable. If a hospital system utilizes discharge documentation and planning processes that provide all necessary information, MHPs should not require the hospital system to replace the existing processes with a specific documentation template developed by the MHP.

Alternatively, if a hospital system's discharge documentation and planning processes do not provide all necessary information, the hospital system should revise their existing documentation processes to include the necessary information. If the hospital system does not have a discharge documentation and planning process, the MHP and hospital should work together to develop mutually agreeable documentation processes.

SECTION 3 – CLAIMS, COPAYMENTS AND REIMBURSEMENT

MHP claim completion requirements must be consistent with MDHHS claim completion requirements as detailed in the Billing and Reimbursement chapters of this manual.

3.1 BLOOD LEAD TESTING

MHPs are encouraged to establish contractual or other coordinating relationships with local health departments (LHDs) that provide blood lead testing services. LHDs must conduct blood lead testing consistent with Medicaid policy. Similarly, MHPs must reimburse LHDs for blood lead testing as directed by Medicaid policy.

3.2 COPAYMENTS

Beneficiaries enrolled in an MHP may have different copayment requirements through the MHP than through FFS. The MHP copayment amount must be less than or equal to the Medicaid FFS copayment amount for the same service. Beneficiaries excluded from Medicaid FFS copayments are also excluded from MHP copayment requirements. A list of current copayments is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

3.3 PAYMENT RESPONSIBILITY WHEN ENROLLMENT STATUS CHANGES

MHPs should refer providers to the Billing and Reimbursement chapters of this manual for clarification of payment responsibility if a Medicaid or CSHCS beneficiary changes enrollment status during a course of treatment.

3.4 REIMBURSEMENT FOR NONCONTRACTED PROVIDERS

Reimbursement for providers who are contracted with the MHP is governed by the terms of the contract. MHPs are required to pay noncontracted providers at Medicaid FFS rates for all properly authorized, medically necessary services for which a clean claim is submitted. Noncontracted providers must comply with all applicable authorization requirements of the MHP and uniform billing requirements.

SECTION 4 - MEDICAID HEALTH PLAN RATES

4.1 GENERAL INFORMATION

Federal regulations (42 CFR 438.6) require rates paid by the State of Michigan to MHPs to be actuarially sound. The State of Michigan contracts with a certified actuary to develop actuarially sound rates for the MHPs. Rates are not included in the MHPs competitive bid process and, therefore, the MHPs are not required to certify rates as actuarially sound. Under this methodology, the State's Actuary establishes a rate range for each rate cell covered under the Comprehensive Health Care Program. As mandated by the federal requirement, the State's Actuary certifies these rates are actuarially sound. There is no federal requirement that rates be actuarially sound for a particular MHP.

Actuarially sound rates for MHPs are capitation rates that meet the following requirements:

- Developed in accordance with generally accepted actuarial principles and practices.
- Appropriate for the populations included and services covered under the State's contract with the MHPs.
- Certified as meeting all requirements for actuarial soundness by actuaries who meet the qualification standards established by the American Academy of Actuaries and who follow the practice standards established by the Actuarial Standards Board.

4.2 RATE CATEGORIES

In order to establish actuarially sound rates, MDHHS establishes separate rate cells based on the following classifications:

- Aid program category
- Age
- Gender
- Region
- Maternity case rate

For enrollees in the Blind and Disabled program category, Michigan utilizes the Chronic Illness and Disability Payment System (CDPS) to adjust the MHP capitation rates. Under CDPS, diagnosis coding (as reported on claim and encounter transactions) is used to compute a score for each individual. Individuals with inadequate eligibility history are excluded from these calculations. For qualifying individuals, these scores are aggregated into an average case-mix value for each contractor based on its enrolled population. The regional rate for the Blind and Disabled program category is multiplied by the average case mix value to produce a unique case mix adjusted rate for each MHP. The aggregate impact is budget or rate neutral. MDHHS fully re-bases the risk adjustment system annually.

4.3 DATA METHODOLOGY

MDHHS has a generally consistent approach to the rate development and certification methodology. The approach incorporates the factors recommended by the American Academy of Actuaries, including the following criteria:

- Base utilization and cost data are derived from the population covered under the MHP contract to the extent that adequate accurate information on this population is available to the State's Actuary at the time of rate development and certification.
- Base utilization and cost data are derived from the population comparable to the population covered under the MHP contract.
- Base utilization and cost data are derived from the set of covered services under the MHP contract.
- Adjustments may be made to smooth data and account for factors such as incomplete data.
- Assumptions may be made related to medical trend inflation, MHP administration, and projected utilization.
- Rate cells are specific to the enrolled population.
- Assumptions may be made related to payment mechanism, utilization, and cost appropriate for individuals with chronic illness, disability, risk adjustment or other appropriate cost-neutral methods.
- Assumptions are based on the State Actuary's professional judgment regarding the appropriateness of adjustments to the base year data.

4.4 DATA SOURCES

The annual rate development methodology for the establishment of actuarially sound rates utilizes some or all of the following data sources:

- Fee for service (FFS) data for individuals eligible for Medicaid.
- FFS data for the 12 months preceding the individual's enrollment into the MHP.
- Aggregate MHP financial and/or encounter data.
- MHP annual financial filings reported to the Department of Insurance and Financial Services (DIFS) up to 36 months preceding the date that the proposed rates were established by MDHHS.
- Other data available to MDHHS that is for the covered population and which is identified in the report produced by MDHHS.

MDHHS utilizes the data source deemed most appropriate by the State's Actuary dependent upon data availability and data accuracy.

Medicaid Provider Manual

4.5 PUBLIC REVIEW OF DATA METHODOLOGY

MDHHS shall produce for public review a report that includes the proposed MHP rates, documentation of the rate development, and actuarial certification prior to formal submission to the federal government. As recommended by the American Academy of Actuaries, the report shall include a description of the relevant data, sources of data, material assumptions, and methodology by which the rates were developed.

SECTION 5 – MEDICAID HEALTH PLAN PROVIDER ENROLLMENT

MHPs are prohibited from making payments to all typical network and out-of-network Michigan providers who appear on a claim and are not enrolled in CHAMPS. Typical providers are professional health care providers who provide health care services to beneficiaries. Typical providers must meet education and state licensure requirements and have assigned National Provider Identifiers (NPIs). Examples of typical provider types include, but are not limited to, physicians, physician assistants, certified nurse practitioners, dentists and chiropractors.

A list of currently allowed typical provider enrollment information is available on the MDHHS Provider Enrollment website. Providers not included on the allowed list are not required to enroll. The Provider Enrollment website is updated periodically. Any updates to the MDHHS Provider Allowed Enrollment lists will be subject to provider enrollment requirements. (Refer to the Directory Appendix for website information.)

MDHHS does not prohibit payment to out-of-state, out-of-network pharmacies and providers who provide Medicaid beneficiaries with emergency medical services. Payment for out-of-state, out-of-network medical services are subject to Medicaid policy and applicable health policies and procedures. (Refer to the Out-of-Network Services subsection of this chapter for additional information.)

Refer to the General Information for Providers Chapter, Provider Enrollment section of this manual for additional provider enrollment information.

Michigan Department of Health and Human Services
Medicaid Provider Manual

SECTION 1 – PROGRAM OVERVIEW [CHANGE MADE 4/1/2025]

This chapter applies to Medical Suppliers/Durable Medical Equipment and Orthotists/Prosthetists.

The primary objective of the Medicaid Program is to ensure that medically necessary services are made available to those who would not otherwise have the financial resources to purchase them.

The primary objective of the Children's Special Health Care Services (CSHCS) Program is to ensure that CSHCS beneficiaries receive medically necessary services that relate to the CSHCS qualifying diagnosis.

This chapter describes policy coverage for the Medicaid Fee-for-Service (FFS) population and the CSHCS population. Throughout the chapter, use of the terms Medicaid and Michigan Department of Health and Human Services (MDHHS) includes both the Medicaid and CSHCS Programs unless otherwise noted.

Medicaid covers the least costly alternative that meets the beneficiary's medical need for medical supplies, durable medical equipment or orthotics/prosthetics.

Below are common terms used throughout this chapter:

Medical Supplies	<p>Health care related items that are required to address an individual's illness, injury or disability; are consumable, disposable or have a limited life expectancy, cannot withstand repeated use, and are suitable for use in any non-institutional* setting in which normal life activities take place. Examples are: hypodermic syringes/needles, ostomy supplies, and dressings necessary for the medical management of the beneficiary. Medical supplies are items covered that:</p> <ul style="list-style-type: none">▪ Treat a medical condition.▪ Prevent unnecessary hospitalization or institutionalization.▪ Support Durable Medical Equipment (DME) used by the beneficiary.
Durable Medical Equipment (DME)	<p>Equipment that can withstand repeated use, is reusable or removable, is suitable for use in any non-institutional* setting in which normal life activities take place, is primarily and customarily used to serve a medical purpose, and is generally not useful to an individual in the absence of illness, injury or disability. Examples are: hospital beds, wheelchairs, and ventilators. DME is a benefit for beneficiaries when:</p> <ul style="list-style-type: none">▪ It is medically and functionally necessary to meet the needs of the beneficiary.▪ It may prevent frequent hospitalization or institutionalization.▪ It is life sustaining.
Complex Rehabilitation Technology (CRT) Equipment	<p>CRT equipment is a subcategory of DME that can be individually configured to meet the medical/functional needs of beneficiaries with complex physical or functional limitations (e.g., traumatic brain injury, amyotrophic lateral sclerosis, spina bifida, etc.). CRT equipment includes specialized manual and power wheelchairs with additional options/accessories, adaptive seating and positioning, standing frames, gait trainers.</p> <p>Individually configured means the equipment has various sizes, features, and modifications that a qualified CRT provider can apply specific to the beneficiary by measuring, fitting, programming, adjusting or adapting the equipment consistent with the beneficiary's medical/functional needs as identified by the evaluation of a qualified health care professional (QHCP). (text added per bulletin MMP 24-58)</p>

Michigan Department of Health and Human Services Medicaid Provider Manual

Mobility Related Activities of Daily Living (MRADL)	Daily activities (e.g., grooming, dressing, toileting, etc.) the beneficiary is able to perform with the aid of mobility equipment.
Orthotics	Orthotics assist in correcting or strengthening a congenital or acquired physical anomaly or malfunctioning portion of the body. Orthotics are a benefit to: <ul style="list-style-type: none"> Improve and/or restore the beneficiary's functional level. Prevent or reduce contractures. Facilitate healing or prevent further injury.
Prosthetics	Prosthetics artificially replace a portion of the body to prevent or correct a physical anomaly or malfunctioning portion of the body. Prosthetics are a benefit to: <ul style="list-style-type: none"> Improve and/or restore the beneficiary's functional level. Enable a beneficiary to ambulate or transfer.

*MDHHS considers an institution to be a nursing facility, hospital or intermediate care facility for individuals with intellectual disabilities.

Durable medical equipment, medical supplies and orthotics must be registered with the Food and Drug Administration, except for custom-fabricated items. (Refer to the Standard Equipment and Custom-Fabricated Seating and the Noncustom versus Custom-Fabricated subsections for additional information.)

1.1 PROVIDER TYPES [CHANGE MADE 4/1/2025]

Services provided must be appropriate for the specified provider types according to the CHAMPS Provider Enrollment (PE) on-line application. The provider types and the services they may provide are as follows:

Orthotist and Prosthetist	<ul style="list-style-type: none"> Prefabricated, custom-fitted and custom-fabricated orthoses and prostheses Medical supplies related to orthotics and prosthetics (e.g., stump socks, etc.) Shoes
Medical Supplier	<ul style="list-style-type: none"> Durable medical equipment (including oxygen) <p>Medical supplies</p> <ul style="list-style-type: none"> Prefabricated and specific custom-fitted orthoses (custom-fitting may only include simple or minor intervention) Shoes
Complex Rehabilitation Technology (CRT) Supplier	<p>Medical Supplier with a CRT subspecialty that supplies CRT and accessories. Examples:</p> <ul style="list-style-type: none"> Specialized manual and power wheelchairs Gait trainers Standing systems/frames Adaptive seating and positioning equipment (text added per bulletin MMP 24-58)
Shoe Store	<ul style="list-style-type: none"> Shoes, selected shoe inserts and additions

1.1.A. PROVIDER ENROLLMENT

Providers of Durable Medical Equipment, Prosthetics, Orthotics and Supplies (DMEPOS) must be enrolled as a Medicare provider. Each DMEPOS provider must enter their Medicare Provider Transaction Access Number (PTAN) in the CHAMPS Provider Enrollment subsystem. (Refer to the General Information for Providers chapter for provider enrollment policy that applies to all providers.)

To be eligible to enroll as a Medicaid DMEPOS provider, applicants must be compliant with policy indicated in the General Information for Providers chapter and all of the following:

- The provider must be compliant with all federal and state licensing, certification and regulatory requirements.
- The provider must have a national provider identifier (NPI) for each location and may not allow another entity to use that billing NPI (separate enrollment is required for each location serving Medicaid beneficiaries).
- The provider must be accredited (separate accreditation per location) by one of the Centers for Medicare & Medicaid Services (CMS) approved accreditation organizations (AOs) and must indicate the specific DMEPOS items approved under that accreditation for that location (CMS-determined pharmaceutical exemptions apply).
- The provider must permit MDHHS to conduct on-site inspections to evaluate the provider's compliance with State and Federal DMEPOS standards.
- The provider must have a primary business telephone listed under the business name in a local directory or a toll-free number available through directory assistance. The exclusive use of a beeper, answering machine, answering service or cell phone during business hours is prohibited.
- The provider must fill orders from its own inventory or contract with other companies for the purchase of items necessary to fill orders. The provider may not contract with any entity that is excluded from Medicare, Medicaid or any other federally funded program. Provider use of distributors or contracted supply companies is acceptable if the provider follows Medicare DMEPOS standards and Medicaid policy regarding delivery, record keeping and education on the use of the item(s).
- The provider must accept beneficiary returns of substandard, defective or unsuitable items.
- The provider must notify the beneficiary of warranty coverage, honor all warranties under applicable State law, and repair or replace free of charge Medicaid-covered items under that warranty.
- The provider must provide maintenance, replacement or repair at no charge to the beneficiary or Medicaid, either directly or through a service contract with another company, during the Medicaid rental period.
- The provider is responsible for delivery, set-up and education on the use of the DMEPOS item(s) and must maintain proof of delivery and education in the beneficiary file. The delivery ticket must include the beneficiary's (or beneficiary guardian/appointee's) signature and date as confirmation of receipt. Provider use of courier or shipping

Michigan Department of Health and Human Services

Medicaid Provider Manual

services is acceptable if the DMEPOS provider follows current policy requirements for delivery, record keeping and education on the use of the item(s).

- The provider must answer beneficiary questions, respond to complaints, and maintain documentation of such contact(s) in the beneficiary file.
- The provider must have a complaint resolution protocol to address beneficiary complaints. Records of complaints must be maintained at the physical location. The complaint record must include the name, address, telephone number and Medicaid ID number of the beneficiary, complaint summary, and actions taken to resolve the complaint.
- All provider locations, whether owned or subcontracted, must meet the Medicare DMEPOS Supplier Standards (including, but not limited to, surety bond and liability insurance requirements) and Medicare quality standards.
- The provider must display on-site all licensing, certifications and accreditations, as applicable (out-of-state and borderland providers must be licensed and/or certified by the appropriate standard-setting authority in the state they are practicing).
- To be considered "in-state," the provider must have a physical storefront located within Michigan (or within the borderland areas of adjoining states). The location must be accessible to the public (including handicap accessible), be open for business for no less than 30 hours a week, be staffed during business hours, and maintain a visible sign with posted hours of business. Occupational therapists, physical therapists, and orthotic and prosthetic providers of custom orthotics and prosthetics are exempt from the 30 hour per week business rule but must comply with the accessibility and signage portions of the rule. (Out-of-state providers should refer to the Out of State/Beyond Borderland Providers subsection in the General Information for Providers Chapter for additional information.)
- The location must contain space for and have beneficiary records on site. For electronic health records, it is preferred that electronic health record systems be contained on the Certified Health IT Product List (CHPL) as published and maintained by the Office of the National Coordinator for Health Information Technology (ONC). Records must be made available upon MDHHS request.
- The location must display equipment/supplies provided and have inventory on site (custom-made items are exempt).
- The provider may not share space with other Medicare or Medicaid healthcare entities except for the following:
 - The provider is also enrolled as a pharmacy and owned by the same entity; or
 - The provider is hospital-owned and located within the hospital or a hospital-owned clinic.

NOTE: Separately identified physical space (e.g., clearly identified suites) within the same building is not considered "sharing space" if each space/location is recognized by the United States Postal Service (USPS) as a separate physical address.

Michigan Medicaid does not enroll warehouses or distribution centers as the function of these entities is to ship/store products and are not considered a storefront.

Michigan Department of Health and Human Services

Medicaid Provider Manual

1.1.B. COMPLEX REHABILITATION TECHNOLOGY (CRT) PROVIDER [SUBSECTION ADDED 4/1/2025]

In addition to the DME requirements in the Provider Enrollment subsection, CRT providers must be enrolled as a CRT provider and accredited with one of the Medicare Accreditation Organizations (AO) as a CRT provider. The CRT provider must have at least one employee who is a qualified CRT provider and is:

- Certified as a CRT professional by the Rehabilitation Engineering and Assistive Technology Society of North America (RESNA) or by the National Registry of Rehabilitation Technology Suppliers (NRRTS).
- Participates in evaluations performed by a QHCP and the selection of appropriate CRT equipment/accessories.
- Provides beneficiary training in the proper use of the CRT equipment/accessories.
- Has the capability to provide servicing and repair for all CRT equipment/accessories the CRT provider offers.
- Upon delivery of CRT equipment/accessories, provides the beneficiary with written information regarding how to obtain service and repair.

The CRT provider is responsible for renewing their accreditation with the AO as required by the Centers for Medicare and Medicaid Services (CMS).

Non-CRT DME providers are approved on a case-by-case basis to provide CRT equipment and accessories when a CRT provider is not available in the beneficiary's geographic location. Non-CRT DME providers must comply with all the requirements indicated in the Provider Enrollment subsection. **(text added per bulletin MMP 24-58)**

1.2 MDHHS MEDICAL SUPPLIER/DME/PROSTHETICS AND ORTHOTICS DATABASE

For specifics regarding the Healthcare Common Procedure Coding System (HCPCS) codes used to denote covered services, refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter or the Medicaid Code and Rate Reference tool for more information. (Refer to the Directory Appendix for website information.) Information includes the HCPCS codes, short description, designated modifiers, quantity limits, prior authorization (PA) indicator, fee screens, ICD diagnosis codes, and whether the item may be billed by a medical supplier if the beneficiary resides in a nursing facility. If there is no established procedure code that adequately describes the item, use the appropriate Not Otherwise Classified (NOC) HCPCS procedure code.

1.2.A. HEALTHCARE COMMON PROCEDURE CODING SYSTEM (HCPCS) CODES

The Health Insurance Portability and Accountability Act of 1996 (HIPAA) requirement, as defined by the Code of Federal Regulations (CFR) under 45 CFR 162.10002 for standardized coding systems, established HCPCS level II codes as the standardized coding system for describing and identifying health care equipment and supplies in health care transactions that are not identified by HCPCS level I or Current Procedural Terminology (CPT) codes.

Michigan Department of Health and Human Services

Medicaid Provider Manual

HCPCS is a system for identifying items and services. It is not a system for making coverage or payment determinations, and the existence of a code does not determine coverage or non-coverage of an item or service. Decisions regarding the addition, deletion, or revision of HCPCS codes are made independent of the process for determination of coverage and payment.

National permanent codes are maintained by the Centers for Medicare & Medicaid Services (CMS) HCPCS Workgroup. The Workgroup is responsible for making decisions about additions, revisions, and deletions to the permanent national alpha-numeric codes. The permanent national codes serve the function of providing a standardized coding system that is managed jointly by private and public insurers.

National codes also include miscellaneous/not otherwise classified (NOC) codes. These codes are used when a medical supplier submits a bill or request for an item or service where there is no existing national code that adequately describes the item or service. Before using a miscellaneous/NOC code, the medical supplier should check with the Medicare Pricing, Data Analysis and Coding (PDAC) contractor to determine whether there is a specific code that should be used. (Refer to the Directory Appendix for contact and website information.)

When submitting a bill or request, medical suppliers are required to use HCPCS codes to identify items. The descriptor assigned to a code represents the definition of the item/service that can be billed using that code. MDHHS reserves the right to determine and apply correct HCPCS codes used for the purpose of reimbursement.

1.3 FACE-TO-FACE (F2F) VISIT REQUIREMENTS

Section 6407 of the Patient Protection and Affordable Care Act (ACA) of 2010 and Section 504 of the Medicare Access and Children's Health Insurance Program (CHIP) Reauthorization Act (MACRA) of 2015 require a face-to-face (F2F) visit with a physician or non-physician practitioner (NPP) prior to the initial written order for specific durable medical equipment and medical supplies. The Centers for Medicare & Medicaid Services maintains the list of specified items that require a face-to-face visit. The Durable Medical Equipment Face-to-Face List is posted on the MDHHS website. (Refer to the Directory Appendix for provider-specific webpage information.)

1.3.A. F2F VISIT

Prior to the initial written order and delivery of selected durable medical equipment and medical supplies (some accessories), the beneficiary must have a face-to-face visit with a physician or NPP within six months prior to the initial written order. The visit must be related to the primary condition that supports the medical need for the equipment or supply. Telemedicine visits (refer to the Telemedicine Chapter) qualify as face-to-face visits. A new face-to-face visit is required for the following:

- Initial order for rental/purchase;
- New prescription/order,
- Replacement of the base equipment;
- When there is a change in the prescription/order of the item;

Michigan Department of Health and Human Services

Medicaid Provider Manual

- When there is a change in the supplier of the item and the new supplier is unable to obtain a copy of the original order and documentation from the original supplier; and
- When there is change in state or federal law, policies or regulations.

1.3.B. PRACTITIONERS WHO MAY PERFORM THE FACE-TO-FACE VISIT

The face-to-face evaluation may be provided by a physician (MD or DO) or any of the following NPPs:

- Physician Assistant (PA)
- Certified Nurse Practitioner (NP)
- Certified Clinical Nurse Specialist (CNS)

Effective March 1, 2020, Interim Final Rule CMS-5531 permanently amends 42 CFR 440.70 (a)(2) to allow NPPs (i.e., PA, NP, and CNS), within their scope of practice, to perform face-to-face encounters, and document, certify and order Medicaid Home Health Services (including durable medical equipment, prosthetics, orthotics and medical supplies). The NPP is not required to communicate the clinical findings of the face-to-face encounter with the physician. Physician certification of the face-to-face encounter performed by an NPP is not required.

1.3.C. PHYSICIAN OR NPP CERTIFICATION OF THE FACE-TO-FACE VISIT

The ordering physician or ordering NPP must certify that a face-to-face visit occurred within six months prior to the written order whether they performed the visit or another treating or attending physician or NPP performed the visit. The physician or NPP must document the date of the face-to-face visit and specify the name of the practitioner who performed the evaluation, document the clinical findings that support the need for the item(s), and confirm the primary reason for the visit that relates to the need for the item(s).

A treating or attending physician (e.g., inpatient hospital physician) or NPP may conduct the face-to-face visit and order the item(s) if all criteria of the face-to-face rules are met. If the treating or attending physician or NPP performs the face-to-face evaluation but does not write the initial order; they must communicate the details of the visit to the ordering physician or ordering NPP.

Documentation of the face-to-face visit may be indicated on the prescription/order, the certificate of medical necessity (CMN), or other medical record. A copy of the face-to-face visit must be kept in the beneficiary's file and the original sent to the durable medical equipment (DME) supplier. Upon receipt, the DME supplier must date stamp the face-to-face documentation and maintain the documentation in the beneficiary file. The face-to-face documentation must be available upon MDHHS request. For items requiring a prior authorization, the documentation of the face-to-face visit must accompany other required documentation with the prior authorization request.

Michigan Department of Health and Human Services **Medicaid Provider Manual**

1.3.D. FACE-TO-FACE PRESCRIPTIONS/ORDERS

MDHHS recommends the ordering physician or NPP include the face-to-face visit information on the written order or CMN; however, it is acceptable for this information to be indicated on other medical documentation (e.g. discharge summary). If the ordering physician or NPP chooses to document the face-to-face visit on the order, they must include the date of the visit, the name of the physician or NPP that performed the evaluation, and document the visit was related to the primary condition that supports the need for the item(s).

The face-to-face visit requirement applies to initial orders and not to supply refills, equipment repairs, the servicing of equipment, or to accessories (except for those accessories indicated on the CMS list). The ordering physician or NPP must assess the continued need for the medical supply or equipment on an annual basis. For refills of supplies, the ordering physician must indicate "renewal" on the order.

1.3.E. BILLING FACE-TO-FACE ITEMS

For items requiring a face-to-face visit, the KX modifier must be appended to the HCPCS code on the claim. The KX modifier indicates that policy requirements have been met and that documentation is on file and available upon request. Adding the KX modifier on the claim if the face-to-face documentation has not been received and/or is not in the beneficiary file is incorrect billing and could result in post-payment recovery of funds or provider audit.

1.3.F. HOME HEALTH AGENCIES PROVIDING DURABLE MEDICAL EQUIPMENT, PROSTHETICS, ORTHOTICS AND SUPPLIES

The ACA requires home health agencies (HHAs) to provide medically necessary durable medical equipment, prosthetics, orthotics and supplies (DMEPOS) either directly or through arrangement with DME providers when providing home health nursing or aide services.

Except for items identified in the Home Health chapter as routine medical supplies, and those items listed on the Home Health database as separately reimbursed to HHAs, HHAs choosing to provide DMEPOS must enroll with Medicaid as DME providers. HHAs must comply with all federal and state DMEPOS provider rules, policies, and regulations. (Refer to the General Information for Providers chapter and the Home Health chapter for additional information.)

1.4 PLACE OF SERVICE

Medicaid covers medical supplies, durable medical equipment (DME), orthotics, and prosthetics for use in any non-institutional setting in which normal life activities take place except for skilled nursing facilities, nursing facilities, or intermediate care facilities for individuals with intellectual disabilities.

For residents in a skilled nursing or nursing facility, most medical supplies and/or DME are considered as part of the facility's per diem rate. Wheelchair requests for the primary purpose of meeting resident nursing care needs that are the responsibility of the nursing facility are not covered. Wheelchairs for

Michigan Department of Health and Human Services
Medicaid Provider Manual

social or recreational purposes are the responsibility of the nursing facility. The Nursing Facility Chapter further describes coverage policy in the nursing facility. The following items are exempt from the per diem rate and must be billed by the medical supplier:

- Air-fluidized beds
- Bariatric beds
- Custom-fabricated seating systems may be covered outside of the nursing facility per diem rate when a standard item will not meet the medical and functional needs of the user and standards of coverage are met.
- Gaseous oxygen and equipment if required by the beneficiary for frequent or prolonged use (eight or more hours of use on a daily basis)
- Orthotics and Prosthetics
- Parenteral nutrition, including all supplies, equipment, and solutions
- Powered air flotation bed (low air loss therapy)
- Selected surgical dressings
- Shoes and Additional Components

The medical supplier may deliver durable medical equipment, prosthetics, orthotics and medical supplies (DMEPOS) for beneficiary use in the beneficiary's home and community on the date of discharge from the skilled nursing facility (SNF) or nursing facility (NF). The SNF/NF is required to report the beneficiary date of discharge in the CHAMPS admission record. (Refer to the Beneficiary Eligibility Chapter for additional information.) To ensure DMEPOS items are not delivered prior to the facility discharge date and prevent beneficiary access to care issues, it is recommended that the SNF/NF and medical supplier coordinate the facility discharge date and DMEPOS delivery date.

To determine the acceptable place of service (POS) codes allowed for billing purposes, refer to the Billing & Reimbursement for Professionals Chapter of this manual.

In an outpatient facility, all equipment and services required for treatment during an emergency room or clinic visit are included in the reimbursement to the hospital (e.g., cervical collar, air cast).

In an inpatient hospital setting, services provided as part of the hospital care and treatment would be part of the DRG payment to the hospital (e.g., cervical collar or cast). Services provided to be used after discharge and delivered to the hospital to facilitate discharge may be reimbursed to the medical supplier (e.g., oxygen, walker, wheelchair).

MDHHS does not separately reimburse DMEPOS providers for services related to the beneficiary's terminal illness when the beneficiary is enrolled in a hospice program. All DMEPOS services related to the beneficiary's terminal illness are either arranged for (via contract agreement) and reimbursed by, or provided by, the hospice program. Refer to the Hospice chapter for additional information about hospice services.

1.5 AGE FACTORS

Coverage of durable medical equipment, prosthetics, orthotics and supplies (DMEPOS) may differ based on the beneficiary's age. When age factors exist, the DMEPOS provider can submit a prior authorization

Michigan Department of Health and Human Services

Medicaid Provider Manual

request for consideration of coverage beyond the policy standards of coverage. For specifics of HCPCS codes and age parameters, refer to the Coverage Conditions and Requirements section and the Healthcare Common Procedure Coding System (HCPCS) Codes subsection of this chapter and to the Medicaid Code and Rate Reference tool. (Refer to the Directory Appendix for website information.)

1.6 MEDICAL NECESSITY

Medicaid covers medically necessary durable medical equipment, prosthetics, orthotics and supplies (DMEPOS) for beneficiaries of all ages. DMEPOS are covered if they are the least costly alternative that meets the beneficiary's medical/functional need and meet the Standards of Coverage stated in the Coverage Conditions and Requirements Section of this chapter.

The medical record must contain sufficient documentation of the beneficiary's medical condition to substantiate the necessity for the type and quantity of items ordered and for the frequency of use or replacement. The information should include the beneficiary's diagnosis, medical condition, and other pertinent information including, but not limited to, duration of the condition, clinical course, prognosis, nature and extent of functional limitations, other therapeutic interventions and results, and past experience with related items. Neither a physician, clinical nurse specialist (CNS), nurse practitioner (NP) or physician assistant (PA) order nor a certificate of medical necessity by itself provides sufficient documentation of medical necessity, even though it is signed by the treating/ordering physician, CNS NP or PA. Information in the medical record must support the item's medical necessity and substantiate that the medical device needed is the most appropriate economic alternative that meets MDHHS standards of coverage.

Medical equipment may be determined to be medically necessary when all of the following apply:

- The service/device meets applicable federal and state laws, rules, regulations, and MDHHS promulgated policies.
- It is medically appropriate and necessary to treat a specific medical diagnosis, medical condition, or functional need, and is an integral part of the nursing facility daily plan of care or is required for the community residential setting.
- The safety and effectiveness of the product for age-appropriate treatment has been substantiated by current evidence-based national, state and peer-review medical guidelines.
- The function of the service/device:
 - meets accepted medical standards, practices and guidelines related to:
 - type,
 - frequency, and
 - duration of treatment; and
 - is within scope of current medical practice.
- It is inappropriate to use a nonmedical item.
- It is the most cost effective treatment available.
- The service/device is ordered by the treating physician, NP or PA (for CSHCS beneficiaries, the order must be from the pediatric subspecialist) and clinical documentation from the medical

Michigan Department of Health and Human Services

Medicaid Provider Manual

record supports the medical necessity for the request (as described above) and substantiates the practitioner's order.

- The service/device meets the standards of coverage published by MDHHS.
- It meets the definition of Durable Medical Equipment (DME) as defined in the Program Overview section of this chapter.
- Its use meets FDA and manufacturer indications.

MDHHS does not cover the service when Medicare determines that the service is not medically necessary.

Medicaid will not authorize coverage of items because the item(s) is the most recent advancement in technology when the beneficiary's current equipment can meet the beneficiary's basic medical/functional needs.

Medicaid does not cover equipment and supplies that are considered investigational, experimental or have unproven medical indications for treatment.

Refer to the Prior Authorization subsection of this chapter for medical need of an item beyond the MDHHS Standards of Coverage.

NOTE: Federal EPSDT regulations require coverage of medically necessary treatment for children under 21 years of age, including medically necessary habilitative services. Refer to the Early and Periodic Screening, Diagnosis and Treatment Chapter for additional information.

The Healthy Michigan Plan (HMP) covers habilitative services for all ages. Refer to the Healthy Michigan Plan Chapter for additional information.

1.6.A. PRESCRIPTION REQUIREMENTS

A prescription must contain all of the following:

- Beneficiary's name;
- Beneficiary's date of birth (DOB);
- Beneficiary ID number or Social Security Number (SSN) (if known);
- Prescribing physician's, NP's or PA's name, address, and telephone number;
- Prescribing physician's, NP's or PA's signature (a stamped or co-signature will not be accepted);
- The date the prescription was written;
- The specific item prescribed;
- The amount and length of time that the service is needed; and
- Start date of order if different from the physician's, NP's or PA's signature date.

Michigan Department of Health and Human Services
Medicaid Provider Manual

The prescription must meet the following timeframes:

- For medical supplies, refills may be allowed up to one year from the original physician's signature date on the prescription.
- For oxygen, ventilators, and other long-term use, up to one year from the original physician signature date.
- For purchase of DME, the original physician signature date must be within the last 180 days.
- For orthotics and prosthetics, the original physician signature date for an initial service must be within the last 60 days. For replacement of an orthosis or prosthesis, the physician signature date must be within the last 180 days.

A new prescription will be required when there is a change in the beneficiary's condition causing a change in the item or the frequency of its use.

The provider may complete a detailed description of the item with applicable HCPCS procedure codes, but the treating physician must review this description and personally sign and date the order to indicate agreement. The provider may not change or modify a prescription, certificate of medical necessity (CMN), or any other physician or healthcare practitioner's signed documentation.

For beneficiaries eligible for CSHCS coverage only, the following additional requirements apply:

- The prescription must be related to the CSHCS qualifying diagnosis. (Providers must verify this information by referring to the beneficiary's eligibility letter received from CSHCS.)
- A physician subspecialist must sign the prescription if it is stated as required by the CSHCS Program in the Coverage Conditions and Requirements Section of this chapter.

MDHHS reserves the right to request additional documentation from a specialist for any beneficiary and related service on a case-by-case basis if necessary to determine coverage of the service.

Note: Refer to the Face-to-Face (F2F) Visit Requirements subsection for timelines, additional documentation requirements, and ordering/prescribing/evaluation requirements.

1.6.B. AUTOMATIC REFILLS

Automatically issuing refills of medical supplies to beneficiaries results in unnecessary expenditures and/or unused products.

The standard physician order for medical supplies is written for monthly refills. The beneficiary or their representative must verify that the refill is necessary and confirm any changes/modifications at the time the monthly refill is ordered.

Michigan Department of Health and Human Services Medicaid Provider Manual

Automatic refills of medical supplies without receiving prior customer approval or a request for a refill is considered program abuse. Subsequent refills should not be confirmed or issued any earlier than five to seven days prior to the end of the last monthly order.

For audit purposes, provider records should document this contact for products shipped to the beneficiary's home.

1.6.C. DOCUMENTATION

The Coverage Conditions and Requirements Section of this chapter specifies the documentation requirements for individual service areas. Additional information other than what is required on the prescription may be required. To provide this information, Medicaid accepts a certificate of medical necessity (CMNs will be mandatory for electronic PA), a letter or a copy of applicable medical record. The prescribing physician must sign all documentation and the documentation (if a letter or applicable medical records) must state the beneficiary's name, DOB and ID number (if known) or SSN (if known).

1.6.D. CERTIFICATE OF MEDICAL NECESSITY REQUIREMENTS

A CMN must contain all of the following:

- Beneficiary's name and address;
- Beneficiary's date of birth (DOB);
- Beneficiary ID number (if initiated by the provider) or SSN;
- Prescribing physician's signature, date of signature, telephone number;
- The suppliers' name and address;
- The expected start date of the service (if different from the prescription date);
- A complete description of the item;
- The amount and length of time the item is needed;
- Beneficiary's diagnosis; and
- The medical necessity of the item.

For specifics, refer to the Coverage Conditions and Requirements section and the Face-to-Face (F2F) Visit Requirements subsection of this chapter.

MDHHS will accept a CMN initiated by a medical supplier, orthotist or prosthetist. However, only the beneficiary identifier fields and the areas detailing the description of the item with applicable HCPCS procedure codes are to be completed by the provider. The physician must complete the CMN by writing the medical reason or necessity for the specific item being requested. A medical supplier, orthotist, or prosthetist may not alter or write the medical reason or necessity for the item requested.

Michigan Department of Health and Human Services
Medicaid Provider Manual

Additional documentation (including the CMN) must be current and within the timeframe stated in the Coverage Conditions and Requirements Section of this chapter, under Documentation for each item.

1.7 DOCUMENTATION IN BENEFICIARY FILE

The medical supplier must maintain clean, reproducible copies of all required documentation for the specific medical device, including the physician's order, the MSA-1656 (and Addendum A and/or Addendum B, as applicable), the MSA-1653-B, and the MSA-1653-D in the beneficiary's file for seven years. For audit purposes, the supplier's records or beneficiary's medical record must contain the prescription and required documentation that substantiates the medical necessity of the item supplied. In addition to the prescription and any applicable documentation required, the provider must maintain on file:

- Equipment use logs or other provider required documentation as stated in the Coverage Conditions and Requirements Section of this chapter under Documentation for the item.
- For items purchased, proof of purchase (e.g., delivery slips, sales slips, vouchers).
- For items rented, set-up slips and pick-up slips with signature of beneficiary or legal representative, and maintenance records.
- For items shipped directly to the beneficiary, the date of delivery must be maintained in the records with delivery slip. It is the provider's responsibility to replace a service for which the beneficiary states was not received without additional cost to MDHHS or the beneficiary.
- Proof of education and instruction to beneficiary and/or caregiver regarding the proper usage of equipment and/or supplies when applicable (e.g., delivery slip signed by beneficiary).
- Documentation of the face-to-face visit (if applicable).

1.8 PRIOR AUTHORIZATION

Prior authorization (PA) is required for certain items before the item is provided to the beneficiary or, in the case of custom-fabricated DME or prosthetic/orthotic appliances, before the item is ordered. To determine if a specific service requires PA, refer to the Coverage Conditions and Requirements Section of this chapter and the Medicaid Code and Rate Reference tool. (Refer to the Directory Appendix for website information.)

PA will be required in the following situations:

- Services that exceed quantity/frequency limits or established fee screens.
- Medical need for an item beyond the MDHHS Standards of Coverage.
- Use of a Not Otherwise Classified (NOC) code.
- More costly service for which a less costly alternative may exist.
- Procedures indicating PA is required as noted in the Medicaid Code and Rate Reference tool.

Michigan Department of Health and Human Services
Medicaid Provider Manual

Prior authorization coverage determinations are based on the evaluation of the documentation received and all of the following:

- The beneficiary's benefit plan scope and coverages (e.g., Emergency Services Only);
- Food and Drug Administration (FDA) and manufacturer product intended usage(s);
- Healthcare Common Procedure Coding System (HCPCS) Level II code definitions as deemed by the American Medical Association; and
- The safety and effectiveness of the product for age-appropriate treatment as substantiated by current evidence-based national, state and peer-review medical guidelines.

MDHHS reserves the right to a final determination of whether the practitioner's submitted medical documentation sufficiently demonstrates the medical necessity for the services requested.

Beneficiaries may request a fair hearing in accordance with 42 CFR Part 431 Subpart E for any MDHHS coverage denials. (Refer to the General Information for Providers chapter for additional information.)

1.8.A. PRIOR AUTHORIZATION FORM

Requests for PA must be submitted on the Special Services Prior Approval-Request/Authorization form (MSA-1653-B) or, for mobility and custom seating items, submit the Complex Seating and Mobility Device Prior Approval-Request/Authorization form (MSA-1653-D). (Refer to the Forms Appendix for a copy of the PA form and completion instructions.) In addition, the medical documentation specific to each type of device requested must accompany the form. The information on the PA request form must be:

- Typed – All information must be clearly typed in the designated boxes of the form.
- Complete – The provider must use the specific HCPCS code and the code description. A NOC code may not be used unless the use of a NOC code for the item has been approved by the PDAC. The brand, model, product or part number must be stated on MSA-1653-B or MSA-1653-D with the appropriate HCPCS code and description. The prescription and medical documentation must be submitted with the request. (Refer to the Coverage Conditions and Requirements section of this chapter for additional information regarding standards of coverage and payment rule requirements.)

PA request forms and attached documentation may be mailed or faxed to the MDHHS Program Review Division. (Refer to Directory Appendix for contact information.)

Instructions for the electronic submission of PA requests and the HIPAA 278 transaction code set are available on the MDHHS website. (Refer to the Directory Appendix for website information.)

1.8.B. EVALUATION AND MEDICAL JUSTIFICATION FOR COMPLEX SEATING SYSTEMS AND MOBILITY DEVICES FORM [CHANGE MADE 4/1/2025]

CRT equipment and accessories requires the complex needs beneficiary to be evaluated by:

- A QHCP*:
- Physiatrist; or
- Licensed Physical Therapist; or
- Licensed Occupational Therapist; or
- A rehabilitation Registered Nurse (RN), who has at least two-years' experience in rehabilitation seating (if applicable); or
- Other licensed health care professional (e.g., physician, nurse practitioner, physician assistant, etc.) working within their scope of practice; and
- A qualified CRT professional (the CRT professional must be present at the time of the evaluation).

If a CRT professional is not available in the beneficiary's geographic location, the QHCP may perform the evaluation and coordinate provision of the equipment through an MDHHS-authorized non-CRT DME provider.

*The QHCP must not have a financial relationship with the CRT provider, unless the CRT provider is owned by a hospital and the QHCP is employed by the same hospital to work in the inpatient or outpatient setting. **(text added per bulletin MMP 24-58)**

The Evaluation and Medical Justification for Complex Seating Systems and Mobility Devices form (MSA-1656) provides a standard assessment tool for a licensed medical professional to use when performing assessments for wheelchairs, seating systems, and pediatric standing systems. The form is required for all ages and covered settings. (Refer to the Forms Appendix for a copy of the form and form completion instructions.)

The MSA-1656 serves as a baseline evaluation for the beneficiary and is a clinical assessment that also includes an assessment of current technology options available to meet the beneficiary's medical and functional goals. The evaluation process assists the evaluator in determining the most appropriate level of equipment that will aid the beneficiary in completing mobility related activities of daily living (MRADL). Once problems and goals are determined, the process includes a patient simulation trial using comparable loaner or demonstration technology. The patient simulation is performed jointly by the clinician and a qualified assistive technology practitioner.

The initial MSA-1656 is retained on file by MDHHS. A new MSA-1656 is not required for additions or revisions to a seating system or mobility item unless there is a change in the beneficiary's functional status.

- Addendum A: Mobility/Seating – This form must be completed and submitted with MSA-1656 and MSA-1653-D when requesting complex seating, a manual wheelchair with

Michigan Department of Health and Human Services

Medicaid Provider Manual

accessory add-ons, power wheelchairs, scooters, and power accessories. The evaluator must complete only the sections that apply to the requested equipment and accessories.

- Addendum B: Strollers, Gait Trainers, Standers, Car Seats, and Children's Positioning Chairs – This form must be completed and submitted with MSA-1656 and MSA-1653-D when requesting these items. The evaluator must complete only the sections that apply to the requested equipment and accessories.

Form completion instructions describe the responsibilities of the treating physician, the physical and occupational therapist, the medical supplier, and the nursing facility staff (when appropriate).

The MSA-1656 must be submitted within 90 days of the date the evaluation was completed. Completion/submission of the MSA-1656 without supporting documentation from the medical record is not acceptable. The use of medical supplier-created mobility forms or "canned" documentation statements are not acceptable and may not be used as a substitute for information from the medical record or for completion of required MDHHS forms.

The outpatient therapy provider or the nursing facility may bill for the mobility and seating assessment performed by the licensed medical professional using HCPCS code 97542.

1.8.C. EMERGENCY PRIOR AUTHORIZATION

A provider may contact MDHHS to obtain a verbal PA when the prescribing physician has indicated that it is medically necessary to provide the service within a 24-hour time period.

To obtain a verbal PA, the provider may call the Program Review Division or fax a request. (Refer to the Directory Appendix for contact information. Refer to the Forms Appendix for copies of forms MSA-1653-B and MSA-1653-D and completion instructions.)

If an emergency service is required during nonworking hours (i.e., after 4:00 p.m., weekends, and State of Michigan holidays), the provider must contact the Program Review Division on the next available working day.

The following steps must still be completed before an actual PA number is issued for billing purposes:

- Submission of the PA request to MDHHS within 30 days of the verbal authorization. (Refer to the Forms Appendix for copies of forms MSA-1653-B and MSA-1653-D and completion instructions.)
- Submission of the supporting documentation (e.g., prescription and CMN, physician letter, or applicable medical record).

Michigan Department of Health and Human Services
Medicaid Provider Manual

The PA number will not be given for billing MDHHS and the provider will not be reimbursed if:

- The beneficiary was not eligible when the service was provided.
- A completed PA request (MSA-1653-B) is not received within 30 days of the verbal authorization.
- Required prescription and documentation is not received.
- The prescription and/or documentation are not signed within 30 days of the effective date.
- The prescription and/or documentation are not received within 30 days of the date of service (DOS).
- The medical need for the service is different than what was verbally given and does not fall within the Standards of Coverage.

Verbal authorization does not guarantee payment or eligibility.

1.8.D. RETROACTIVE PRIOR AUTHORIZATION

Services provided before PA is requested will not be covered unless the beneficiary was not eligible on the DOS and the eligibility was made retroactive. If the MDHHS record does not show that retroactive eligibility was provided, then the request for retroactive PA will be denied.

1.8.E. BENEFICIARY ELIGIBILITY

Approval of a service on MSA-1653-B or MSA-1653-D confirms that the service is authorized for the beneficiary. The approval does not guarantee that the beneficiary is eligible for Medicaid. If the beneficiary is not eligible on the DOS or is enrolled in a Medicaid Health Plan (MHP) and the provider orders or delivers the service, MDHHS will not reimburse the provider. To assure payment, the provider must verify eligibility prior to ordering or delivering the service. (Refer to the Beneficiary Eligibility Chapter of this manual for additional information.)

When equipment is prior authorized (if required) and ordered but not delivered before the loss of eligibility, MDHHS will pay for the service if the product is delivered within 30 days after the loss of eligibility.

Michigan Department of Health and Human Services

Medicaid Provider Manual

1.8.F. CHANGES IN ENROLLMENT (FFS/MHP)

When beneficiaries change enrollment status (e.g., from managed care to FFS or FFS to managed care), the following applies:

- When custom-fabricated equipment (prosthetic or orthotic) is ordered for a beneficiary during a hospital stay but not delivered until discharge and enrollment changes, the payment must be made by the party responsible for the hospital stay.
- When a custom-fabricated, -fit, or -modified service is prior authorized and ordered by the provider before a change of enrollment, the party that authorized the service is responsible for payment. This responsibility only applies if the service is delivered within 30 days of the change of eligibility.

This policy does not apply to prefabricated, mass-produced, or ready-made items that can be used by a person other than for whom it is ordered. It also excludes rental items, all expendable/disposable medical supplies, or any item that does not require a length of time (days or weeks) to special order for a specific person.

1.8.G. REIMBURSEMENT AMOUNTS

Most items have established fee screens that are published in the MDHHS Medical Supplier/DME/Prosthetics and Orthotics Fee Schedule. The approved reimbursement amount of the fees for NOC codes and all codes without established fee screens will be indicated on the authorized PA request. For items that do not have established fee screens or are custom fabricated, refer to the Medicaid Code and Rate Reference tool for payment rules. (Refer to the Directory Appendix for website information.) The provider must provide a manufacturer's invoice that states the acquisition cost for the service on the PA request form. Manufacturer quotes or dealer list prices are not accepted as documentation of cost. Modified manufacturer invoices will not be accepted. If the manufacturer's actual invoice is not included, medical review will assign a penny screen to the code until the actual invoice is received. If the provider is requesting reimbursement for labor, the specific time must be stated on the request form. MDHHS reserves the right to set a dollar limit on how much MDHHS will reimburse for a NOC code or any manually priced procedure code for a specific range of products.

Medicaid payment rates may not exceed those paid by Medicare. MDHHS will adjust its Medicaid fee schedule when Medicare rate changes result in noncompliance with this requirement. The changes will be reflected on the MDHHS Medical Supplier/DME/Prosthetics and Orthotics Fee Schedule and in the Medicaid Code and Rate Reference tool. No notice will be issued directly to providers.

Michigan Department of Health and Human Services

Medicaid Provider Manual

1.8.H. BILLING AUTHORIZED SERVICES

After an authorization is issued, the information (e.g., PA number, procedure code, modifier, and quantity) that was approved on the authorization must match the information on the invoice. (Refer to the Billing & Reimbursement for Professionals Chapter of this manual for complete billing instructions.)

1.8.I. HOSPITAL DISCHARGE WAIVER SERVICES

Hospital Discharge Waiver Services are DME items rented for the beneficiary in which the PA requirement is waived for up to the first three months after hospital discharge. If the beneficiary still requires these items after three months from hospital discharge, the PA requirement would still apply.

These items are as follows: HCPCS codes E0163, E0165, E0181, E0255, E0256, E0260, E0292, E0293, E0565, E0619, E0910, and E0940

1.8.J. BENEFICIARY DEATH PRIOR TO DELIVERY

Reimbursement may be made for custom fabricated durable medical equipment, prosthetics, and orthotics (e.g. custom wheelchair seating system) not supplied due to the beneficiary's death prior to delivery or product completion. To be considered for reimbursement, the provider may contact the MDHHS Program Review Division (PRD) to request authorization for reimbursement of incurred costs. (Refer to the Directory Appendix for contact information.) Reimbursement will not be considered for prefabricated or off-the-shelf DMEPOS items.

Requests are made through the PRD Director and are determined on a case-by-case basis upon provider submission of supporting documentation including:

- original PA tracking number,
- beneficiary date of death,
- date the provider learned of beneficiary's death,
- invoice with itemized cost for materials, number of hours of labor (up to date the provider learned of the beneficiary's death) and any salvage value*, and
- provider statement of stage of fabrication completed.

*Salvage value applies when the provider can gain further profit by reusing materials/components for another device or by returning the materials/components to the manufacturer for credit. The salvage value must be clearly documented on the provider's invoice and deducted from the provider's usual and customary charge for the item. An example of an item with salvage value would be a prefabricated component such as a joint for a knee/ankle/foot orthosis.

MDHHS reserves the right to request other supporting documentation to substantiate provider incurred costs. The beneficiary must have been Medicaid eligible throughout

Michigan Department of Health and Human Services
Medicaid Provider Manual

the original PA period, up to and including the date of death. The provider must submit an official invoice to receive reimbursement and not a quote.

The PRD Director will determine the date of service within the date range of the initial approved PA up to the beneficiary's date of death. MDHHS will not approve requests past the authorization period of the original approved PA request.

1.9 DURABLE MEDICAL EQUIPMENT

1.9.A. STANDARD EQUIPMENT AND CUSTOM-FABRICATED SEATING

Standard equipment and custom-fabricated seating must be medically necessary and meet the medical and/or functional needs of the beneficiary.

- Standard equipment and accessories are products ordered from manufacturer stock. Measuring and custom-fitting a medical device to a beneficiary or custom-assembling a medical device to fit a beneficiary's needs using manufactured stock pieces is not considered to be custom-fabricated.
- Custom-fabricated seating is made from clinically derived, rectified castings, tracings, and other images (such as x-rays) of the beneficiary's body part.

It also includes computer-aided design/computer-aided manufacturing (CAD/CAM) technology used for the seating system. Computer-aided design/manufacturing must be performed by an experienced clinician along with a Certified Rehabilitation Technology Supplier (CRTS) or Assistive Technology Professional (ATP) who has completed the training course offered by the manufacturer. The outcome should be created jointly by the clinician and the CRTS/ATP. The cost for performing these activities is included in the Medicaid payment rate for the custom-fabricated seating system.

MDHHS will only consider coverage of custom-fabricated seating when a standard item will not meet the medical or functional needs of the beneficiary. All custom-fabricated equipment requires prior authorization. Once the custom-fabricated equipment is purchased, it becomes the property of the beneficiary. To be covered as custom-fabricated, the item must meet the MDHHS definition of custom-fabricated. A manufacturer's use of the term custom-fabricated for an item that does not meet the MDHHS definition will not be reimbursed as custom-fabricated. MDHHS reserves the right to determine and apply HCPCS codes used for the purpose of reimbursement.

1.9.B. PAYMENT RULES: RENTAL AND/OR PURCHASE

Generally, equipment will be purchased when a beneficiary requires the equipment for an extended period of time. For prior authorized services, the PA consultant may change the authorization request from a rental to a purchase or a purchase to a rental based on the documentation submitted. If DME items are purchased, the provider must indicate whether the DME item provided is new or used, as appropriate. The provider should refer to the Payment Rules described in the Coverage Conditions and Requirements Section of this chapter for MDHHS policy on specific services.

Michigan Department of Health and Human Services Medicaid Provider Manual

<p>Purchase (New or Used) - Items may be purchased if they are inexpensive accessories for other DME equipment or the equipment itself will be used for an extended period of time.</p>	<p>To be reimbursed for new equipment, the provider must:</p> <ul style="list-style-type: none"> Adhere to all aspects of the manufacturer's warranty, including all routine servicing; Deliver, set-up and install the equipment in the home, if applicable; Instruct the beneficiary or caregiver in the use and general care of the item; and Complete all adjustments and/or modifications needed to make the item functional. <p>To be reimbursed for used equipment, the provider must:</p> <ul style="list-style-type: none"> Ensure that the used equipment is fully serviced and in good operating condition; Include all routine servicing for the equipment into the purchase price of the item for a minimum of one year; Instruct the beneficiary or caregiver in the use and general care of the item; and Not allow the cost of its maintenance to exceed the cost of new equipment.
<p>Rental - The rental payment includes routine servicing and all necessary repairs or replacements to make the rented item functional.</p>	<p>Rental Only – Items that require regular and ongoing servicing/maintenance would be rented for the duration indicated by the physician's order. Examples are oxygen, apnea monitors, and volume ventilators.</p> <p>Capped Rental – Items rented until purchase price is reached. For Medicaid, items may be rented for a maximum period of 10 months. If the provider has been reimbursed for 10 months of rental, the item is considered purchased. (If used equipment is issued to the beneficiary, the usual and customary charge reported to Medicaid must accurately reflect that the item is used.)</p> <p>Converting Rental to Purchase – The majority of DME items can be rented as a capped rental for up to a maximum of 10 months. If the purchase of an item is requested after an initial rental period has occurred, the provider must subtract the amount already paid for the rental item from the total purchase price.</p>

Michigan Department of Health and Human Services

Medicaid Provider Manual

1.9.C. REPAIRS AND REPLACEMENT PARTS [CHANGE MADE 4/1/2025]

Repairs and the replacement of component parts for DME owned by the beneficiary are reimbursable if MDHHS purchased the item. If MDHHS did not purchase the original item, it must be medically necessary, meet the Standards of Coverage detailed in this chapter, and include the required supporting documentation.

For purchased items, all conditions of the warranty must be followed prior to requesting any repairs or replacement parts. Routine periodic servicing, such as cleaning, testing, regulating, and checking of equipment, is also included in the cost of the equipment. If equipment is found to be defective or not operating properly, it must be removed from service and cannot be placed into use again until it is brought up to manufacturer's operating standards and specifications. It is the responsibility of the provider to supply loaner equipment while the beneficiary-owned item is being serviced at no charge to MDHHS. For audit purposes, all suppliers must maintain protocols and records defining how the maintenance of equipment is to be achieved.

MDHHS will consider reimbursement for a replacement when it is more costly to repair than replace. When submitting a PA request for a replacement, the provider must provide a statement regarding the cost to repair the service versus replacement.

The repair and/or replacement of CRT equipment and accessories is limited to DME providers that are enrolled with Medicaid as a CRT provider. Non-CRT providers are approved on a case-by-case basis when an enrolled CRT provider is not available in the beneficiary's geographic location. (Refer to the Complex Rehabilitation Technology (CRT) Equipment/Accessories subsection for additional information.) (text added per bulletin MMP 24-58)

Repairs and the replacement of component parts for DME do not apply to an item that is currently being reimbursed by MDHHS as a rental.

Modifiers to be used when requesting replacements/repairs are as follows:

Modifier	Description
RA	Replacement of a DME, orthotic or prosthetic item
RB	Replacement of a part of a DME, orthotic or prosthetic item furnished as part of a repair

Repair of DME involving the replacement of a component part includes the cost of the part and the labor associated with its removal, replacement and finishing. For repairs to wheelchairs, refer to the Wheelchair Repair/Labor Guide posted on the MDHHS website, and to the Prior Authorization for Purchase, Rentals, Repairs, and/or Replacement of Mobility Devices subsection of this chapter. The RB modifier is required.

Michigan Department of Health and Human Services Medicaid Provider Manual

For a repair in which no specific HCPCS code is appropriate, report HCPCS code K0739 (for the labor charge) and HCPCS code E1399 (for the replacement part). For wheelchairs, HCPCS code K0108 is to be used in place of HCPCS code E1399. The RB modifier is reported for the replacement part of the DME furnished as part of the repair. PA is required. The provider must provide a manufacturer's invoice that states the acquisition cost for the service with the PA request form. If the provider is requesting reimbursement for labor, the specific time must be stated on the request form.

The replacement of a DME item will be considered when a significant change in the patient's condition has occurred or the cost of the equipment repair is greater than replacement. If the DME item cannot be restored to a serviceable condition and there has been no change in the medical condition of the beneficiary, MDHHS will consider replacement if the existing equipment meets coverage criteria or was purchased by the program. In these cases, a current prescription will meet documentation requirements for the equipment. If there has been a change in the medical condition that would reflect a change in equipment need, then all documentation requirements in the Coverage Conditions and Requirements Section of this chapter apply. Replacement of DME for youth will be evaluated on an individual basis due to the expected growth pattern.

The RA modifier should be reported with the appropriate HCPCS code of the DME to be replaced and should be reported when replacing a DME item with an identical or nearly identical item.

MDHHS will not replace an item due to damage to the item as a result of misuse or abuse by the beneficiary or the caregiver. If damage to an item is the result of theft or car accident, attempts should be made to collect the full or partial payment from the third party's insurance company, if applicable. A copy of the police or fire report must be submitted with the PA request form.

The provider may not provide or substitute a service of lesser quality or provide a different brand or type than what was authorized through prior authorization.

The provider may not add additional component HCPCS codes or bill for a more complex code (e.g., custom versus prefabricated) to increase the amount of reimbursement. The provider may not bill for a HCPCS code describing a custom-fabricated service in lieu of the availability of a code to cover a prefabricated item.

1.9.D. USED EQUIPMENT

Definition	Used durable medical equipment is defined as non-customized equipment previously purchased or rented by one or more users, or equipment utilized as floor models, demonstration equipment or loaner equipment prior to current purchase or rental.
Standards of Coverage	Used equipment may be covered when all of the following are met: <ul style="list-style-type: none">▪ The provider determines the item to be the least costly alternative that meets the beneficiary's medical/functional needs; and▪ The equipment and components are non-customized items; and▪ The equipment is not intended or labeled as a single user item; and

Michigan Department of Health and Human Services Medicaid Provider Manual

	<ul style="list-style-type: none"> ▪ The equipment is in good working condition and comparable to new equipment quality standards; and ▪ The equipment has been sanitized, repaired and reconditioned between each user. <p>Prior to the provision of used equipment, the beneficiary/parent/legal guardian must be given a choice to accept or refuse used equipment. If the beneficiary chooses to not accept the used equipment, the provider must provide new equipment following the standards of coverage and payment rules indicated in policy.</p> <p>MDHHS suggests that used equipment be identified by affixing a tag to the item with the equipment age and make/model/serial number or other identifying information.</p> <p>Providers offering used equipment are responsible to clean, repair and recondition used items between users to assure the equipment is safe and in good working condition. The provider must remove used items from service when such items no longer meet quality standards.</p>
Documentation	<p>In addition to documentation requirements listed in this chapter, documentation for used equipment must include:</p> <ul style="list-style-type: none"> ▪ Equipment service log <ul style="list-style-type: none"> ➤ Confirmation that the equipment has been fully serviced and is in good working condition; ➤ Repair(s) and sanitization dates, with signature(s) of person(s) performing these functions; ➤ Age of item (if known); ➤ Serial number/make/model (or other identifying information); and ➤ Warranty information. <p>The above information must be incorporated into the beneficiary's file upon rental/purchase of the item.</p> <ul style="list-style-type: none"> ▪ Beneficiary file <ul style="list-style-type: none"> ➤ Signed and dated agreement from the beneficiary/parent/legal guardian stating they understand the equipment is used; ➤ Indication that a manufacturer's owner's manual was provided to the beneficiary; and ➤ Provider attestation that the used equipment is durable enough to meet Medicaid minimum frequency limits for replacement equipment. <p>Documentation must be available upon MDHHS request.</p> <p>Refer to the specific policy standards of coverage and documentation requirements listed in this chapter.</p>
PA Requirements	<p>Prior authorization is not required for used equipment if PA is not required for a new item with the same HCPCS code assignment.</p> <p>PA is required for coverage beyond the standards of coverage, repair/replacement rules, and frequency limits indicated for the specified equipment.</p>

Michigan Department of Health and Human Services

Medicaid Provider Manual

Payment Rules	<p>Used equipment may be purchased or rented (up to specified rental periods listed in policy).</p> <p>Repairs/reconditioning/sanitizing and labor costs are included in the initial purchase and rental period per each beneficiary.</p> <p>All warranties must be exhausted prior to requesting prior authorization for repair or replacement of the equipment per beneficiary.</p> <p>MDHHS has identified specific items that must have either the NU or UE modifier appended to the HCPCS code when requesting PA or submitting a claim. Failure to append the correct modifier(s) may result in denied claims or inaccurate payment.</p> <ul style="list-style-type: none">▪ NU - New Equipment▪ UE - Used Equipment <p>Refer to the Medical Supplier database and/or the Medicaid Code and Rate Reference tool for HCPCS codes requiring the NU or UE modifier.</p>
----------------------	---

1.10 PROSTHETICS AND ORTHOTICS

For custom-fabricated prosthetics and orthotics (P&O), MDHHS reserves the right to request a recommendation from an appropriate physician subspecialist, physical therapist (PT) or occupational therapist (OT) evaluation when necessary to determine the functional and/or medical need for the item requested.

1.10.A. NONCUSTOM VERSUS CUSTOM-FABRICATED

Noncustom orthotics are prefabricated, available off the shelf for use, require basic measurements, and could include simple or minor custom fitting if necessary. Any delivery or service charges, fitting and preparatory procedures are considered part of the total purchase charge. Custom-fabricated P&O require measurements, fitting, casting or recasting, or molding to allow the appliance to meet the specific functional needs of the beneficiary. It may involve the incorporation of some prefabricated components. Adding prefabricated components to a prefabricated item is not considered custom-fabricated. Selection of the procedure code should be based on the service provided. Custom codes should not be used for prefabricated services.

All orthotist and prosthetist providers must have facility accreditation through any of the CMS-approved AOs in order to furnish and bill for custom-fabricated P&O appliances. Providers must maintain their accreditation and be able to provide proof upon request. Orthotic and prosthetic providers must only bill specific prefabricated and custom-fitted orthotics that may include simple or minor intervention.

Medicaid will consider coverage of these services when provided by other types of practitioners in which the service is within their scope of current medical practice.

1.10.B. HCPCS MODIFIERS - LEFT AND RIGHT SIDE OF THE BODY

The LT or RT modifier must be reported for orthoses and prostheses to designate either the left or right side of the body, if applicable. The frequency limits are based on the individual item being replaced. If the same code is used bilaterally on the same date of service, the modifiers LT and RT must be entered on the same line of the claim listing the appropriate combined quantities. To determine whether a procedure code requires the LT or RT modifier, refer to the Medicaid Code and Rate Reference tool. (Refer to the Directory Appendix for website information.)

The provider may not provide or substitute a service of lesser quality or provide a different brand or type than what was authorized through prior authorization.

The provider may not add additional component HCPCS codes or bill for a more complex code (e.g., custom versus prefabricated) to increase the amount of reimbursement. The provider may not bill for a HCPCS code describing a custom-fabricated service in lieu of the availability of a code to cover a prefabricated item.

1.10.C. ADJUSTMENTS, REPLACEMENTS AND REPAIRS

Adjustments related to the delivery of orthoses are considered as part of the purchase price and are not separately reimbursable up to 90 days following placement. Providers are still responsible for the replacement, modification, and adjustment of any orthotic or prosthetic item that they placed but was not fitted properly. It is expected that the provider will adjust the device if possible before billing the program for modifications or replacements when there is unexpected growth spurt, substantial weight loss or gain, or post surgery.

Replacement of a component part of an orthosis includes the cost of the part and the labor associated with its removal, replacement and finishing.

For a repair in which no specific HCPCS code is appropriate, bill for the actual time it takes to repair or adjust the device and for the minor materials used. Report the labor charge by using HCPCS code L4205 (for orthoses) or HCPCS code L7520 (for prostheses). For minor materials used in repairing the item, report HCPCS code L4210 (for orthoses) or HCPCS code L7510 (for prostheses). MDHHS will cover the acquisition cost of material, not the provider's charge.

1.11 NONCOVERED ITEMS

Items that are not covered by Medicaid include, but are not limited to:

- Adaptive equipment (e.g., rocker knife, swivel spoon, etc.)
- Air conditioner
- Air purifier
- Custom seating for secondary and/or transport chairs

Michigan Department of Health and Human Services
Medicaid Provider Manual

- Devices used for play, pre-mobility development, or exercise are not considered pediatric mobility devices for the purpose of reimbursement and are not covered (e.g., jet mobile, ready racer, creepster crawler)
- Enteral formula to accommodate psychological or behavioral conditions, food preferences, allergies, loss of appetite, or noncompliance with a specialized diet
- Environmental Control Units
- Equipment not used or not used properly by the beneficiary
- Equipment for social or recreational purposes
- Exam tables/massage tables
- Exercise equipment (e.g., tricycles, exercise bikes, weights, mat/mat tables, etc.)
- Generators
- Hand/body wash
- Heating pads
- Home modifications
- Hot tubs
- House/room humidifier
- Ice packs
- Items for a beneficiary who is non-compliant with a physician's plan of care (or) items ordered for the purpose of solving problems related to noncompliance (e.g., insulin pump)
- Items that are not defined by the American Medical Association (AMA), the Food and Drug Administration (FDA), and the Pricing, Data Analysis, and Coding (PDAC) contractor as medical devices or dedicated durable medical equipment (e.g., personal tablets, computers, iPads, iPhones, Smart devices, etc.)
- Items used solely for the purpose of restraining the beneficiary for behavioral or other reasons
- Lift chairs, reclining chairs, vibrating chairs
- More than one pair of shoes on the same date of service
- New equipment when current equipment can be modified to accommodate growth
- Nutritional puddings/bars
- Over-the-counter shoe inserts
- Padded footplates
- Peri-wash
- Portable oxygen, when oxygen is ordered to be used at night only
- Power tilt-in-space or reclining wheelchairs for a long-term care resident because there is limited staffing
- Pressure gradient garments for maternity-related edema
- Prosthetic appliances for a beneficiary with a potential functional level of K0

Michigan Department of Health and Human Services
Medicaid Provider Manual

- Regular or dietetic foods (e.g., Slimfast, Carnation instant breakfast, etc.)
- Room dehumidifiers
- School Items (e.g., computers, writing aids, book holder, mouse emulator, etc.)
- Second units for school use
- Second wheelchair for beneficiary preference or convenience
- Sensory Devices (e.g., games, toys, etc.)
- Sports drinks/juices
- Stair lifts
- Standard infant/toddler formula
- Therapy modalities (bolsters, physio-rolls, therapy balls, jett mobile)
- Toothettes
- Transcutaneous Nerve Stimulator when prescribed for headaches, visceral abdominal pain, pelvic pain, or temporal mandibular joint (TMJ) pain
- UV lighting for Seasonal Affective Disorder
- Vacu-brush toothbrushes
- Weight loss or "light" products
- Wheelchair lifts or ramps for home or vehicle (all types)
- Wheelchair accessories (e.g., horns, lights, bags, special colors, etc.)
- Wigs for hair loss

For specific procedure codes that are not covered, refer to the Coverage Conditions and Requirements Section of this chapter or the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information.

1.12 CHARGING THE BENEFICIARY

The provider may not charge the beneficiary for failure to provide sufficient documentation to support coverage or failure to obtain PA. The provider may charge the beneficiary if the beneficiary waives their right to PA. The provider must maintain on file a document that demonstrates that the beneficiary knew and understood that the waiver of PA would result in the beneficiary's responsibility for payment. In addition, the provider may not charge the beneficiary any copayments (unless permitted by Medicaid) or charges above the Medicaid allowable amount.

1.13 UNIFORM REPORTING OF SERVICES

MDHHS follows the American Medical Association's manual and guidelines for Current Procedural Terminology (CPT) numeric codes, and the Healthcare Common Procedure Coding System (HCPCS). In conjunction with the CPT/HCPCS coding systems to describe services rendered, MDHHS utilizes the Medicaid National Correct Coding Initiative (NCCI) coding policies and edits as developed by the Centers for Medicare & Medicaid Services (CMS) to promote national correct coding methodologies.

SECTION 2 – COVERAGE CONDITIONS AND REQUIREMENTS

2.1 APNEA MONITOR

Definition	An apnea monitor measures both heart rate and respirations and meets all of the Equipment Control Regulatory Industry (ECRI) Standards for home monitors.
Standards of Coverage	<p>A Newborn Infant Following Hospital Discharge – Units are covered for a newborn infant up to three months following hospital discharge if one of the following diagnoses or medical conditions applies:</p> <ul style="list-style-type: none"> ▪ Apnea of newborn ▪ Apnea of prematurity ▪ Apparent life threatening event (ALTE) ▪ Sibling of Sudden Infant Death Syndrome (SIDS) ▪ Bronchopulmonary Dysplasia
	<p>A Sibling of Sudden Infant Death Syndrome (SIDS) Following Hospital Discharge –</p> <ul style="list-style-type: none"> ▪ Units are covered for up to one month past the age of the sibling who died from SIDS; or ▪ Up to three months past the age of the sibling who died if the child was a twin of the beneficiary being monitored.
	<p>An Acute Respiratory Illness - Short-term coverage of a unit (up to two months) is a benefit when the beneficiary has a respiratory illness/diagnosis such as Pertussis, Respiratory Syncytial Virus (RSV), or Pneumonia.</p>
	<p>As a Diagnostic Tool - Short-term coverage of a unit (up to three months) used as a diagnostic tool is a benefit if the infant is under three months of age at set-up, and the parent and/or guardian reports suspected events.</p>
	<p>Beneficiaries with Tracheostomy – Units are generally not covered for beneficiaries who have a tracheostomy. Units may be considered for coverage only if, after careful evaluation of current treatment plan and equipment already in the home, the beneficiary's medical needs are still not met. Documentation explaining the medical need must be submitted with a detailed plan of management.</p>
	<p>Beneficiaries who are Ventilator Dependent - Units are considered to be included in the ventilator reimbursement to function as a backup alarm for the ventilator low-pressure alarm.</p>

Medicaid Provider Manual

Noncovered Conditions	<p>Units are not covered for the following diagnoses/medical conditions unless documentation justifies medical necessity and usage meets the established Standards of Coverage above:</p> <ul style="list-style-type: none"> ▪ Chromosomal abnormalities ▪ Congenital heart defects with or without arrhythmias ▪ Cerebral palsy ▪ Asymptomatic prematurity ▪ Developmental delay/intellectual disability ▪ Seizure disorder ▪ Hydrocephaly with or without Arnold-Chiari Syndrome ▪ Irreversible terminal conditions ▪ Distant family history of SIDS (other than immediate sibling)
Documentation	<p>The documentation must be less than 30 days old and include all of the following:</p> <ul style="list-style-type: none"> ▪ A statement from an appropriate subspecialist trained in the treatment of apnea (i.e., apnea clinic, neonatologist, pediatric intensivist, pediatric pulmonologist, or neurologist) medically substantiating the continued need for the unit. ▪ Download interpretation of the monitor data documenting continued apnea or bradycardia events. ▪ For a sibling of SIDS, the age of the sibling at death.
PA Requirements	<p>PA is not required for any of the following if the Standards of Coverage are met:</p> <ul style="list-style-type: none"> ▪ Up to three months usage for newborn infants following a hospital discharge. ▪ Up to three months usage for siblings of SIDS following a hospital discharge. ▪ Used up to two months due to a respiratory illness (e.g., Pertussis, Respiratory Syncytial Virus (RSV), or Pneumonia). ▪ Used up to three months as a diagnostic tool for the following diagnoses or medical conditions: <ul style="list-style-type: none"> ➤ Apnea of newborn ➤ Apnea of prematurity ➤ Apparent life threatening event (ALTE) ➤ Sibling of Sudden Infant Death Syndrome (SIDS) ➤ Bronchopulmonary Dysplasia <p>PA is required for the following:</p> <ul style="list-style-type: none"> ▪ Continuation of the monitor beyond the initial two or three months. ▪ Other diagnoses/medical conditions or applications not indicated in the Standards of Coverage.

Medicaid Provider Manual

Payment Rules	<p>An Apnea Monitor is considered a rental only item and includes all of the following:</p> <ul style="list-style-type: none"> ▪ All accessories needed to use the unit (e.g., electrodes, lead wires, belts, cables, etc.). ▪ Education on the proper use and care of the equipment. ▪ Routine servicing and all necessary repairs or replacements to make the unit functional. ▪ Periodic downloading/interpretation of recorded data.
----------------------	---

2.2 BI-LEVEL POSITIVE AIRWAY PRESSURE DEVICE

Definition	The bi-level positive airway pressure (BIPAP) device delivers a noninvasive positive air pressure into the upper airway to assist spontaneous respiratory efforts. The device has two pressure levels (one for breathing in and one for breathing out).
Standards of Coverage	<p>A BIPAP device without the backup rate feature may be covered for the following conditions for up to four months:</p> <ul style="list-style-type: none"> ▪ For Obstructive Sleep Apnea (OSA), if the sleep study (polysomnogram) performed in an accredited Sleep Center or Sleep Laboratory documents the following: <ul style="list-style-type: none"> ➢ Continuous airway pressure of 13-15 cm water does not adequately control/eliminate obstructive/hypopneic events; or ➢ The beneficiary cannot tolerate continuous positive airway pressures of greater than or equal to 12 cm water, in addition to evidence that the sleep lab has worked with the beneficiary to try different application devices, ramp times, relaxation techniques, etc. ▪ For respiratory failure if there are lab values (i.e., arterial blood gas [ABG], venous blood gas [VBG] or capillary blood gas) indicating respiratory failure and follow-up lab values documenting improvement with the use of a BIPAP. ▪ For a diagnosis/medical condition for which a CPAP is inappropriate for use (e.g., cardiomyopathy, cor pulmonale, primary pulmonary hypertension, left ventricular hypertrophy, etc.). <p>A BIPAP device with the backup rate feature may be covered if the beneficiary requires the backup feature due to insufficient spontaneous respiratory efforts (e.g., inadequate negative respiratory force due to central apnea, neuromuscular diseases such as muscular dystrophy, etc.).</p>
Documentation	<p>Documentation must be less than 90 days old and include:</p> <ul style="list-style-type: none"> ▪ Diagnosis related to the need for BIPAP. ▪ BIPAP settings and number of hours per day used. ▪ Other medical conditions ruling out the appropriate use of a CPAP if present (e.g., cardiomegaly, left ventricular hypertrophy, primary pulmonary hypertension, etc.). ▪ For diagnosis of OSA, results of a sleep study (polysomnogram) including CPAP/BIPAP titration. ▪ For diagnosis of respiratory failure, test results substantiating the condition (e.g., ABG, VBG, or capillary blood gas) as well as test results showing improvement on BIPAP.

Medicaid Provider Manual

	<ul style="list-style-type: none"> Negative inspiratory force measurement, if appropriate. <p>For continued coverage beyond the initial four months, the following additional information must be provided:</p> <ul style="list-style-type: none"> Medical statement indicating beneficiary is stable and the BIPAP device settings are adequate. Documentation of beneficiary compliance through the review of equipment use logs.
PA Requirements	PA is required for all BIPAP requests.
Payment Rules	<p>BIPAP units are considered a capped rental item and are inclusive of all of the following:</p> <ul style="list-style-type: none"> All accessories needed to use the unit (e.g., tubing, application devices, chinstrap, headgear, etc.). Education on the proper use and care of the equipment. Routine servicing and all necessary repairs or replacements to make the unit functional.

2.3 BLOOD PRESSURE MONITORING

Definition	Blood pressure monitoring includes manual (sphygmomanometer/blood pressure apparatus with cuff and stethoscope) and automatic blood pressure devices.
Standards of Coverage	<p>Manual or automatic blood pressure monitors are covered for beneficiaries of any age with uncontrolled blood pressure when all the following are met:</p> <ul style="list-style-type: none"> The treatment plan requires the beneficiary to self-monitor and record blood pressure readings at a minimum of once daily; The beneficiary has any of the following conditions: <ul style="list-style-type: none"> History of heart disease, congenital heart defects, or stroke A neurological condition that affects blood pressure A medication regimen is present that affects blood pressure Blood pressure fluctuations due to renal disease Medications are titrated based on daily blood pressure readings Hypertensive disorders in pregnancy, childbirth, or the puerperium period (e.g., pre-eclampsia) Hypertension, despite beneficiary compliance with the treatment plan (i.e., adherence to medication regimen, dietary changes, smoking cessation, etc.); The ordering practitioner or practitioner's nursing staff have educated the beneficiary on self-measurement of blood pressure, recording blood pressure readings, have fit the beneficiary with the appropriate cuff size, and have provided or referred the beneficiary for follow-up education as necessary; and

Medicaid Provider Manual

	<ul style="list-style-type: none"> The medical supplier has provided further education regarding use of the monitor/cuff, cleaning/maintenance, warranty information, troubleshooting errors, and the medical supplier's contact information for repairs/replacement or assistance for equipment malfunction. <p>An automatic blood pressure monitor is recommended rather than a manual blood pressure monitor unless the beneficiary has an adult family member/caregiver available to assist the beneficiary in taking blood pressure using a manual blood pressure monitor. The family member/caregiver must be instructed by the beneficiary's practitioner or practitioner's staff regarding proper use of the blood pressure monitor.</p> <p>The blood pressure monitor must be registered with the U.S. Food & Drug Administration. Reference the American Medical Association (AMA), U.S. Blood Pressure Validated Device Listing of blood pressure monitors that meet the AMA's criteria for clinical accuracy. The list is available on the AMA website; refer to the Directory Appendix for website information. Provision of the link to the AMA validated device list is for provider informational purposes only. Medicaid blood pressure monitor coverage is not contingent upon the requested device being validated by the AMA.</p>
Non-Covered Items	<ul style="list-style-type: none"> Finger and wrist monitors
Documentation	<p>The documentation must be less than 30 days old and include:</p> <ul style="list-style-type: none"> Diagnosis/medical condition pertaining to the need for the blood pressure monitor. Complete practitioner's treatment plan, including current blood pressure medications, frequency of checks, lifestyle changes (i.e., diet, exercise, etc.), and specific patient protocol in case of an abnormal reading. Prescription from a pediatric nephrologist when daily titration of medications is required for renal disease (required for coverage under CSHCS).
Frequency	<p>One blood pressure monitor (manual or automatic) may be purchased within a five-year period. The blood pressure cuff may be replaced once every two years.</p>
PA Requirements	<p>Prior authorization is not required for the following when Standards of Coverage are met, and the beneficiary has one of the following diagnoses/conditions:</p> <ul style="list-style-type: none"> renal disease; or hypertensive disorders in pregnancy, childbirth, or the puerperium period (e.g., pre-eclampsia). <p>Prior authorization is required for the following:</p> <ul style="list-style-type: none"> Medical need beyond the standards of coverage. Diagnoses/conditions other than those listed above. Replacement of the monitor and/or accessories prior to frequency limitations.
Warranty	<p>Manual and automatic blood pressure monitors must have a minimum of a one-year warranty.</p>
Payment Rules	<p>A blood pressure monitor is considered a purchase only item and includes all accessories necessary for operation of the monitor. Any warranties must be expired prior to requesting replacement of the monitor or accessories.</p> <p>Refer to the Medicaid Code and Rate Reference tool for HCPCS code coverage parameters. (Refer to the Directory Appendix for website information.)</p>

**2.4 BREAST PUMPS**

Medicaid covers hospital-grade electric, personal use double electric, and manual breast pumps.

2.4.A. HOSPITAL-GRADE ELECTRIC BREAST PUMP

Definition	A hospital grade electric breast pump is heavy duty, piston-operated, and is capable of being used frequently on a daily basis.
Standards of Coverage	<p>A hospital grade electric breast pump may only be covered for a beneficiary with a Neonatal Intensive Care Unit (NICU) infant, up to three months of age, when one of the following applies:</p> <ul style="list-style-type: none">▪ The infant has a severe feeding problem secondary to cleft lip and/or palate.▪ The infant has a severe feeding problem due to oral motor dysfunction, secondary to prematurity.▪ The infant is hospitalized resulting in a physical separation of the mother and infant.▪ The infant or mother is hospitalized, resulting in a physical separation of the mother and infant; and all of the following applies:<ul style="list-style-type: none">➤ The pump has an adjustable suction pressure at the breast shield during use between 30 mm Hg and 250 mm Hg (suction just at the low or high end is not acceptable);➤ The pump has a mechanism to prevent suction beyond 250 mm Hg to prevent nipple trauma;➤ The pump has an adjustable/varying pumping speed no less than 30 cycles per minute and capable of reaching up to a maximum of 60 cycles per minute;➤ The pump must be able to operate on a 110-volt household current and be UL listed;➤ The pump must not weigh over 12 pounds; and➤ The pump is registered and cleared with the FDA. <p>For continued coverage beyond the initial three months, additional documentation must be provided.</p>
Documentation	<p>Documentation must be less than 30 days old and include:</p> <ul style="list-style-type: none">▪ Diagnosis/medical condition of the infant relating to the need for a breast pump.▪ Infant's age (gestational age, if premature).▪ Mother's discharge date.▪ Anticipated duration of need.▪ An order signed by the treating physician or non-physician practitioner.▪ The International Classification of Diseases (ICD) diagnosis code(s) related to birth or pregnancy.▪ Documentation of mother's intent to breastfeed. <p>Documentation must be kept in the beneficiary's file and made available upon request.</p>

Medicaid Provider Manual

PA Requirements	PA is not required when the Standards of Coverage are met.
	PA is required for coverage beyond three months.
Payment Rules	<p>A breast pump is considered a rental only item and is inclusive of the following:</p> <ul style="list-style-type: none"> ▪ All related accessories necessary to use the equipment. (To obtain additional reimbursement for the initial breast pump kit, report the "KH" modifier with HCPCS code E0604 for the first month of rental only.) ▪ Education on the proper use and care of the equipment. ▪ Routine servicing and all necessary repairs or replacements to make the unit functional. <p>The rental pump may be billed using the infant's Medicaid ID number if the need for the hospital grade pump meets the standards of coverage and the mother loses Medicaid eligibility.</p> <p>Rental of the hospital-grade electric breast pump will not be made if a personal use double electric breast pump or a manual breast pump was purchased for the beneficiary within the Standards of Coverage frequency limitations.</p>

2.4.B. PERSONAL USE DOUBLE ELECTRIC BREAST PUMP

Definition	A personal use double electric breast pump is defined as a double electric (AC and/or DC) pump, intended for a single user, capable of being used frequently on a daily basis.
Standards of Coverage	<p>A personal use double electric breast pump may be covered once per five years for a beneficiary when all of the following criteria are met:</p> <ul style="list-style-type: none"> ▪ The mother expresses the desire to breastfeed; ▪ The pump has been registered and cleared by the FDA; ▪ The pump has a minimum of a one-year manufacturer's warranty; ▪ The pump has an adjustable suction pressure at the breast shield during use between 30 mm Hg and 250 mm Hg (suction just at the low or high end is not acceptable); ▪ The pump has a mechanism to prevent suction beyond 250 mm Hg to prevent nipple trauma; ▪ The pump has an adjustable/varying pumping speed no less than 30 cycles per minute and capable of reaching up to a maximum of 60 cycles per minute; ▪ The pump must be able to operate on a 110-volt household current and be UL listed; ▪ The pump must not weigh over 12 pounds; and ▪ The pump collection bottle must be bisphenol-A (BPA) and DHEP-free.

Medicaid Provider Manual

Documentation	<p>Must be less than 30 days old and include all of the following:</p> <ul style="list-style-type: none"> ▪ An order signed by the treating physician or non-physician practitioner. ▪ The International Classification of Diseases (ICD) diagnosis code(s) related to birth or pregnancy. ▪ Infant's age (gestational age, if premature). ▪ Mother's hospital discharge date or infant's hospital discharge date. ▪ Documentation of mother's intent to breastfeed. <p>Documentation must be kept in the beneficiary's file and made available upon request.</p>
PA Requirements	<p>PA is not required when the Standards of Coverage are met. PA is required for circumstances beyond the Standards of Coverage and Payment Rules.</p>
Payment Rules	<p>All personal use double electric breast pumps are purchase only. Payment includes:</p> <ul style="list-style-type: none"> ▪ Education for the proper use, care of the equipment, and storage of breast milk. ▪ Supplies necessary for operation of the pump (pump, adapter/charger, breast shields, bottles, lids, tubing, locking ring, connectors, valves, filters and membranes). <p>The pump may be billed using the infant's Medicaid ID number if the need for the pump meets the Standards of Coverage and the mother loses Medicaid eligibility. Medicaid will not purchase a personal use double electric breast pump during the rental period of a hospital-grade electric breast pump or if a manual breast pump was purchased within the Standards of Coverage frequency limitations.</p> <p>Replacement parts are covered after the manufacturer's warranty has expired for included parts. Refer to the Medical Supplier database and the Medicaid Code and Rate Reference tool for covered replacement parts, code descriptions, coverage limitations and reimbursement.</p>

2.4.C. MANUAL BREAST PUMP

Definition	<p>A manual breast pump typically consists of a single breast shield, a collection device, and a hand-controlled lever to create suction and express milk. Manual breast pumps are intended for a single user.</p>
Standards of Coverage	<p>A manual breast pump may be covered once per birth. For a beneficiary who has had a multiple birth delivery, only one pump is covered. Coverage of a manual breast pump may be provided when all of the following criteria have been met:</p> <ul style="list-style-type: none"> ▪ The mother expresses the desire to breastfeed. ▪ The pump has been registered with the FDA. ▪ The pump has a minimum of a one year manufacturer's warranty. ▪ The pump has a mechanism to prevent suction beyond 250 mm Hg to prevent nipple trauma. ▪ The pump collection bottle must be bisphenol-A (BPA) and DHEP-free.

Medicaid Provider Manual

Documentation	<p>Documentation must be less than 30 days old and include all of the following:</p> <ul style="list-style-type: none"> ▪ An order signed by the treating physician or non-physician practitioner. ▪ The International Classification of Diseases (ICD) diagnosis code(s) related to birth or pregnancy. ▪ Infant's age (gestational age, if premature). ▪ Mother's hospital discharge date or infant's hospital discharge date. ▪ Documentation of mother's intent to breastfeed. <p>Documentation must be kept in the beneficiary's file and made available upon request.</p>
PA Requirements	<p>PA is not required when the Standards of Coverage are met. PA is required for circumstances beyond the Standards of Coverage and Payment Rules.</p>
Payment Rules	<p>All manual breast pumps are purchase only. Purchase includes:</p> <ul style="list-style-type: none"> ▪ Education for the proper use, care of the equipment, and storage of breast milk. ▪ Supplies necessary for the operation of the pump (pump, breast shields, bottles, lids, tubing, locking ring, connectors, valves, filters and membranes). <p>The pump may be billed using the infant's Medicaid ID number if the need for the pump meets the Standards of Coverage and the mother loses Medicaid eligibility. Medicaid will not purchase a manual breast pump during the rental period of a hospital-grade electric breast pump or if a personal use double electric breast pump was purchased within the Standards of Coverage frequency limitations.</p> <p>Replacement parts are covered after the manufacturer's warranty has expired for included parts. Refer to the Medical Supplier database and the Medicaid Code and Rate Reference tool for covered replacement parts, code descriptions, coverage limitations and reimbursement.</p>

2.4.D. NON-COVERED BREASTFEEDING ITEMS

Non-covered breastfeeding items:

- Personal use single electric breast pumps
- Breastfeeding pillows
- Breastfeeding comfort items and clothing
- Accessories not necessary for the operation of the breast pump

2.5 CANES AND CRUTCHES

Definition	<p>Canes or crutches include, but are not limited to, adjustable or fixed canes, quad or three prong canes, forearm crutches and underarm crutches.</p>
Standards of Coverage	<p>Canes or crutches are covered if:</p> <ul style="list-style-type: none"> ▪ The diagnosis/medical condition results in instability in ambulation or inability to ambulate. ▪ The beneficiary requires the stability of a cane or crutch to ambulate.

Medicaid Provider Manual

Documentation	<p>Documentation must be less than 180 days old and include the following:</p> <ul style="list-style-type: none"> ▪ Diagnosis/medical condition related to instability or inability to ambulate. ▪ Type of item requested. ▪ Medical reason for replacement (when appropriate).
PA Requirements	<p>PA is not required when Standards of Coverage are met.</p> <p>PA is required when:</p> <ul style="list-style-type: none"> ▪ The beneficiary is over the age of 21, and replacement is required within five years. ▪ The beneficiary is under the age of 21, and replacement is required within one year. <p>For replacement of pads, handgrips or tips, the provider may call for a verbal authorization. The provider must provide acquisition cost supported by a manufacturer's invoice. A prescription is not required if the program has covered the cane and/or crutch. The original prescription for the item must be kept on file.</p>
Payment Rules	Canes and crutches are considered purchase only items.

2.6 CHILDREN'S/ADOLESCENT PRODUCTS [CHANGE MADE 7/1/2025]

Definition	<p>Children's/adolescent products are specialized equipment used in the home or vehicle for children with disabilities or medical conditions for the purposes of positioning, safety during activities of daily living, or assisted mobility. Specialized children's products include, but are not limited to, the following: activity chairs, bath supports, adaptive specialized car seats, corner chairs, standers, gait trainers, walkers, commodes, and toileting supports.</p> <p>The terms "child", "children", "children's", "adolescent", and "adolescents" are used interchangeably throughout this policy but apply to both age groups.</p>
Standards of Coverage (All Children's/Adolescent Products)	<p>Children's/adolescent products are covered when the following are met:</p> <ul style="list-style-type: none"> ▪ Commercial products or other less supportive positioning/mobility aids cannot address the child's medical/functional need. ▪ The requested product(s) can accommodate growth for a minimum of two years (e.g., fit and/or adapt for growth). ▪ The parent(s)/legal guardian has received training on safe use, care of the product, and is willing and able to follow the treatment plan (for adaptive specialized car seats, training must include proper vehicle installation/removal of the car seat). ▪ The product is for use in the family home (exceptions: car seats are intended for use in the family vehicle, gait trainers and walkers are intended for use in the home and in the community [where functionally appropriate]). ▪ The product(s) is the least costly alternative that meets the child's medical/functional need. <p>Refer to the subsections of this policy for additional product-specific standards of coverage.</p>

Medicaid Provider Manual

Parent(s)/Legal Guardian Agreement/Consent	<p>The parent(s)/legal guardian (as applicable) must approve of all equipment prior to delivery or if prior authorization is required before the durable medical equipment (DME) provider submits the prior authorization request. All children's products (e.g., activity chairs, bath, and toileting equipment) are expected to be used within the child's primary residence (except mobility items as these items are intended to be used in all environments the child frequents).</p> <p>The parent(s)/legal guardian's approval of equipment is especially important when recommending multiple pieces of equipment to be used within the home. Providers must ensure the equipment can fit in the home and be used within the intended space (e.g., the shower chair can fit through the bathroom door, can be moved, or leave ample space if other family members use the same bathroom). If the delivered equipment does not fit in the intended space, the child is unable to use the equipment, or it does not properly fit the child, the item is considered unsuitable and the DME provider must accept return of the item(s). Refer to the Provider Enrollment subsection of this chapter regarding beneficiary returns. The DME provider must obtain the parent(s)/legal guardian's approval for each piece of equipment via the parent(s)/legal guardian's signed and dated written statement or on the DME provider's generated document. The parental/legal guardian signature may be either handwritten or digitally drawn. The signed and dated approval must be kept in the beneficiary file and, if prior authorization is required, submitted with the prior authorization request. (text revised per bulletin MMP 25-05)</p>
Documentation (Applies to All Children's/ Adolescent Products)	<p>Documentation must be less than 180 days old and include the following:</p> <ul style="list-style-type: none">▪ Diagnosis appropriate for the equipment requested.▪ Any adaptive or assistive devices currently used in the home.▪ Statement of functional need from an appropriate pediatric subspecialist, occupational or physical therapist.▪ Signed and dated parent(s)/legal guardian agreement/consent.▪ Beneficiary-specific explanation of why the requested equipment is required, the child's medical/functional limitations during activities in which the equipment will be used, and what similar economic alternatives have been trialed, considered, and ruled out. <p>Medicaid will consider requests for multiple devices on a case-by-case basis; however, documentation submitted with the prior authorization request must indicate the reason why one device alone will not meet the child's medical/functional need.</p> <p>Note: Children's Special Health Care Services (CSHCS) beneficiaries require a prescription from a CSHCS-authorized physician subspecialist. Refer to the Children's Special Health Care Services chapter of this Manual for additional information.</p> <p>All required documentation indicated in this chapter and in the children's/adolescent products policy must be kept in the beneficiary's file and be available upon request. Failure to keep required documentation in the beneficiary's file may result in audit and/or post payment recovery of funds.</p>
Warranty	All children's/adolescent products must have a minimum one-year warranty. The warranty period must be expired prior to requesting repair or replacement of the product.
PA Requirements	Refer to the subsections of this policy for additional product-specific prior authorization requirements.
Payment Rules	Refer to the subsections of this policy for product-specific payment rules.

2.6.A. SPECIALIZED ADAPTIVE CAR SEATS [CHANGE MADE 4/1/2025]

Definition	A specialized adaptive car seat is a non-standard children's car seat that is designed specifically for children with special needs to address positioning and safety during vehicle transport when the child cannot be safely transported or positioned using a standard commercial car seat/booster seat.
Standards of Coverage	<p>A specialized adaptive car seat may be covered for the purpose of safety and supportive positioning in the family vehicle when one or more of the following applies to the child/adolescent:</p> <ul style="list-style-type: none"> Has unstable head and/or trunk control. Is unable to independently maintain a seated position. Is in a spica cast and cannot fit in a commercial infant/child car seat/booster seat. Has a condition that results in uncontrolled movement (e.g., seizure) or positioning change, and the following: <ul style="list-style-type: none"> Has outgrown or cannot be positioned or safely transported using a standard commercial infant/child car seat/booster seat (federal and state age-related vehicle seating safety laws apply). the child's weight and height meet the manufacturer's product weight/height requirements. <p>The provision of specialized adaptive car seats is limited to DME providers enrolled as CRT providers. (Refer to the Complex Rehabilitation Technology (CRT) Equipment/Accessories subsection for additional information.) (text added per bulletin MMP 24-58)</p>
Documentation	<p>Documentation must be less than 180 days old and include all the following:</p> <ul style="list-style-type: none"> Diagnosis appropriate for the requested car seat. Other adaptive equipment or assistive devices currently used for mobility/transport and why those items do not meet the child's transport needs. The MSA-1656 (Evaluation and Medical Justification for Complex Seating Systems and Mobility Devices) and corresponding Addendum B. (Refer to the MSA-1656 Instructions in the Forms Appendix of this Manual.)
PA Requirements	Prior authorization is required for all specialized adaptive car seats.
Non-Covered	<ul style="list-style-type: none"> An additional car seat for use in other family vehicles. Bases to make the car seat "mobile." Accessories/options not part of the safety features of the car seat, do not assist with positioning, or that are not related to modifying the car seat for growth purposes. A car seat for use beyond its intended function as a car seat.
Payment Rules	Specialized car seats are considered purchase only items.

2.6.B. ACTIVITY/POSITIONING CHAIRS [CHANGE MADE 4/1/2025]

Definition	Activity/positioning chairs are specially designed equipment for use in the home for children with disabilities or medical conditions who are unable to maintain a seated
-------------------	---

Medicaid Provider Manual

	position independently without support to perform activities of daily living. Examples of activity/positioning chairs include, but are not limited to, the following: corner chairs, feeder seats, hi-lo chairs, floor sitters and adjustable highchairs.
Standards of Coverage	<p>Activity/positioning chairs are covered for children when one or more of the following applies:</p> <ul style="list-style-type: none"> ▪ The child is unable to independently maintain a seated position; ▪ The child has physical anomalies that require support to allow a functional position or prevent further disability; ▪ It is unsafe or the child is unable to sit in a regular chair, commercial highchair, booster chair, or other conventional seat; and/or ▪ The child must be in an upright supported position for safe and effective feeding and without this chair would have to be held by the parent/caregiver for feeding. <p>Activity/positioning chairs with tilt/recline features are covered when the above standards are met and at least one of the following apply:</p> <ul style="list-style-type: none"> ▪ The child is unable to maintain head control in an upright seated position; ▪ Requires pressure relief; ▪ Tilt positioning is required to compensate for tonal changes; and/or ▪ Tilt positioning is required for proper feeding/digestion. <p>A mobile base may be covered when medically/functionally necessary to move the child to different areas of the home for safety and/or to complete activities of daily living.</p> <p>Hi-Lo functions are covered when height adjustments are needed to complete activities of daily living or when needed to assist in transferring into/out of the chair.</p> <p>Hi-Lo activity/positioning chairs are covered for children with more severe disabilities requiring maximal support when the above standards are met and at least one of the following applies:</p> <ul style="list-style-type: none"> ▪ Has non-functioning head or trunk control; ▪ Has poor static dynamic seating balance; ▪ Requires varying sitting heights to complete medical/functional activities of daily living; ▪ Positioning cannot be accommodated by use of other mobility devices or commercial products; and/or ▪ Mobility products with interchangeable bases and seating systems have been ruled out as economic alternatives. <p>Hi-Lo indoor/outdoor base frames are covered for children who have a wheelchair seating system that can be interchanged with an indoor/outdoor base frame to use as an activity/positioning chair, and it meets the above activity/positioning standards of coverage.</p> <p>The provision of activity/positioning chairs is limited to DME providers enrolled as CRT providers. (Refer to the Complex Rehabilitation Technology (CRT) Equipment/Accessories subsection for additional information.) (text added per bulletin MMP 24-58)</p>

Medicaid Provider Manual

Documentation	Documentation must be less than 180 days old and include all the following: <ul style="list-style-type: none"> ▪ Diagnosis appropriate for the equipment requested. ▪ Any adaptive or assistive devices currently used in the home. ▪ The MSA-1656 (Evaluation and Medical Justification for Complex Seating Systems and Mobility Devices) and corresponding Addendum B. (Refer to the MSA-1656 Instructions in the Forms Appendix of this Manual.)
PA Requirements	PA is required for all activity/positioning chairs.
Non-Covered	<ul style="list-style-type: none"> ▪ Accessories/add-ons not required for supportive positioning. ▪ Activity/positioning chairs to be used strictly in the school setting. ▪ Back-up or secondary activity/positioning chairs. ▪ Activity/positioning chairs (including feeding chairs) when the child uses a mobility device in the home that has additional positioning accessories.
Payment Rules	Activity/positioning chairs and accessories are purchase only items.

2.6.C. STANDERS [CHANGE MADE 4/1/2025]

Definition	A children's stander is a device that supports the child in a standing position for the purpose of weight bearing when the child is unable to stand independently due to a disability or medical condition. Standers can aid in increased bone growth/density, muscle strength, improve digestion, decrease contractures, and prevent pressure ulcers in non-ambulatory children. Types of standers include prone, supine, multi-positional, sit-to-stand, and dynamic standers.
Standards of Coverage	<p>Children's standers are covered for use in the family home when all the following apply:</p> <ul style="list-style-type: none"> ▪ The child is non-ambulatory (without the aid of a mobility device) and unable to stand independently due to a disability or medical condition. ▪ The stander is for use in the child's home (not for use in a school). ▪ The equipment requested can accommodate the child's skeletal alignment. ▪ The child has been trialed in a stander and can use or have the potential to use the stander a minimum of one hour per day (does not have to be a continuous hour). ▪ The child's height and weight meet the manufacturer's product height/weight requirements. <p>The provision of standers is limited to DME providers enrolled as CRT providers. (Refer to the Complex Rehabilitation Technology (CRT) Equipment/Accessories subsection for additional information.) (text added per bulletin MMP 24-58)</p>
Documentation	Documentation must be less than 180 days old and include all the following: <ul style="list-style-type: none"> ▪ Diagnosis appropriate for the requested equipment. ▪ Any adaptive or assistive devices currently used in the home. ▪ Outcome of the stander trial(s). ▪ Standing treatment plan (include school standing program, if applicable).

Medicaid Provider Manual

	<ul style="list-style-type: none"> The MSA-1656 (Evaluation and Medical Justification for Complex Seating Systems and Mobility Devices) and corresponding Addendum B. (Refer to the MSA-1656 Instructions in the Forms Appendix of this Manual.) <p>Additionally, if the child is participating in a school or therapy standing program, submit the current treatment plan including the frequency and duration of standing, the child's standing tolerance, and the make and model of stander used in that setting.</p>
PA Requirements	PA is required for all standers.
Non-Covered	<ul style="list-style-type: none"> Use of a stander as a mobility device. A stander for use in school. Accessories/options not integral to the operation of the stander (e.g., gliders, power lift option, etc.). A stander for recreational purposes. A back-up or secondary stander.
Payment Rules	All standers are considered purchase only items

2.6.D. GAIT TRAINERS/WALKERS [CHANGE MADE 4/1/2025]

Definition	<p>A walker is a mobility device used to assist a child with impaired ambulation who can fully bear weight but needs the support of a walker for safe and independent ambulation. Walkers include, but are not limited to, rigid, wheeled, and folding.</p> <p>A gait trainer is a mobility device like a walker but provides more postural support for children with partial weight-bearing capabilities to ambulate independently. Types of gait trainers include upright anterior and posterior support.</p>
Standards of Coverage	<p>Children's walkers are covered when all the following apply:</p> <ul style="list-style-type: none"> The child is unable to ambulate independently due to a disability or medical condition. The child can functionally weight bear through their legs but requires the support of a walker to safely ambulate. Other less supportive mobility aids cannot meet the child's medical/functional mobility needs. The walker is for use in the home and community (where functionally appropriate). <p>Children's gait trainers are covered when all the following apply:</p> <ul style="list-style-type: none"> A children's walker (including a standard front, reverse, or enclosed frame) does not provide enough postural support for the child to safely ambulate. The child can functionally propel using their legs but requires more postural support than a walker. The child is unable to ambulate independently due to a disability or medical condition. The gait trainer is for use in the home and community (where functionally appropriate).

Medicaid Provider Manual

	The provision of gait trainers is limited to DME providers enrolled as CRT providers. (Refer to the Complex Rehabilitation Technology (CRT) Equipment/Accessories subsection for additional information.) (text added per bulletin MMP 24-58)
Documentation	Documentation must be less than 180 days old and include all the following: <ul style="list-style-type: none"> ▪ Diagnosis appropriate for the equipment requested. ▪ Any adaptive or assistive devices currently used in the home and community. ▪ Copy of the school mobility plan (if applicable). ▪ Gait trainers require completion of the MSA-1656 (Evaluation and Medical Justification for Complex Seating Systems and Mobility Devices) and corresponding Addendum B. (Refer to the MSA-1656 Instructions in the Forms Appendix of the Manual.)
PA Requirements	PA is required for all children's walkers and gait trainers.
Non-Covered	<ul style="list-style-type: none"> ▪ Multiple pieces of equipment for standing/gait purposes without distinct justification for each item. ▪ Items for pre-mobility development. ▪ Accessories/add-ons not necessary to use the walker or gait trainer or to support positioning. ▪ Back-up walker or gait trainer.
Payment Rules	Walkers and gait trainers are purchase only items.

2.6.E. CHILDREN'S BATH/SHOWER/TRANSFER EQUIPMENT

Definitions	<p>Children's bath/shower chairs and transfer equipment are devices that provide seated support to children with disabilities or medical conditions who are unable to or cannot safely sit or stand in a bathtub or shower. Examples of these items include, but are not limited to, bathtub/shower chairs, stools, benches, and bathtub transfer benches.</p> <p>Standard bath/shower chairs may be mobile or stationary with a folding or fixed frame, with or without padding, with height adjustable or fixed legs and seat backs, with or without fixed, removable, height-adjustable or drop arms.</p> <p>Non-standard bath/shower chairs are like standard bath/shower chairs but include more significant positioning support and/or dual functions for children with more complex needs including, but not limited to, tilt/recline, head/neck/trunk/pelvic supports, footrests, and combination shower/commode chairs.</p> <p>A standard bathtub or combination bath/commode transfer bench is a stationary (freestanding with legs or that affixes to the bathtub/wall) seat that sits partially inside the bathtub and extends to the outside of the bathtub to assist the child to transfer in a seated position into the bathtub (some have commode openings or attached commodes). Standard bathtub transfer benches come with or without fixed, adjustable, or removable backs and arm rests, and may come with a commode opening.</p> <p>Non-standard bathtub or combination bath/commode transfer benches are like standard transfer benches but include more significant positioning support than standard bathtub or combination bath/commode transfer benches.</p>
--------------------	---

Medicaid Provider Manual

Standards of Coverage	<p>Standard bath/shower chairs, transfer benches or combination bath/commode chairs are covered for children with a disability or medical condition when one or more of the following apply:</p> <ul style="list-style-type: none"> ▪ The child cannot sit for baths or stand for showers without support; ▪ The child cannot be safely lifted into/out of the bathtub due to size or weight; ▪ The child cannot independently or with the assistance of a caregiver safely transfer into/out of the bathtub or shower without the support of the device and/or ▪ The child's age, weight and height meet the manufacturer's specifications for the device. <p>Non-standard bath/shower chairs, transfer benches or combination bath/commode chairs are covered for children with medical conditions when the above standards of coverage are met, and the child has at least one of the following:</p> <ul style="list-style-type: none"> ▪ Has contractures, decreased head/neck/trunk control, and/or abnormal tone requiring additional positional support. ▪ Requires significant assistance to transfer into/out of the bathtub or shower. <p>Tilt/recline bath/shower chairs, transfer benches or combination bath/ commode chairs are covered when the above standards of coverage are met, and the child has one or more of the following:</p> <ul style="list-style-type: none"> ▪ Has significant: <ul style="list-style-type: none"> ➢ contractures, ➢ decreased head/neck/trunk control, and/or ➢ abnormal tone requiring additional positional support; ▪ Requires maximum to total assistance for transfers and bathing; ▪ Cannot sit upright and must be tilted or reclined for safe positioning while bathing; ▪ Has a medical need that requires the tilted or reclined position when upright; and/or ▪ Requires pressure relief while bathing/showering/toileting. <p>The policy standards of coverage for both bath/shower chairs/transfer benches and for commodes must be met when requesting combination bath/shower/commode chairs/transfer benches.</p>
Documentation	<p>Documentation must be less than 180 days old and include the following:</p> <ul style="list-style-type: none"> ▪ Diagnosis or medical condition related to the need for the equipment. ▪ Current adaptive or assistive devices used for bathing/showering and, if applicable, transferring.
PA Requirements	<p>PA is not required for standard bath/shower chairs or standard bathtub transfer benches or standard combination bathtub/commode transfer benches if the standards of coverage are met.</p> <p>PA is required for non-standard bath/shower chairs/benches, non-standard bathtub transfer benches, non-standard combination bath/commode transfer benches, and tilt/recline shower/commode chairs.</p>

Medicaid Provider Manual

Non-Covered	<ul style="list-style-type: none">▪ Hand-held shower attachments or faucet adapters.▪ Commercial baby bathtubs.▪ Secondary or back-up bath/shower equipment.
Payment Rules	All bath/shower equipment are purchase only items.

2.6.F. CHILDREN'S/ADOLESCENT COMMODES

Definition	<p>A commode is a chair with an enclosed pan or pail that may be stationary or mobile, with fixed or removable arms, and footrest, or that may be a combination bath/shower commode.</p> <p>Standard commodes may be mobile or stationary with a folding or fixed frame, with or without padding, with or without a chest strap, with height-adjustable or fixed legs and seat backs, with or without fixed, removable or drop arms.</p> <p>Non-standard commodes are like standard commodes but include more significant positioning support and/or dual functions for children with more complex needs including, but not limited to, the following: tilt/recline, head/neck/trunk/pelvic supports, footrests, and non-standard combination shower/commode chairs.</p>
Standards of Coverage	<p>Standard children's size commodes are covered when the child has a disability or temporary injury (see hospital discharge*) and one of the following applies:</p> <ul style="list-style-type: none">▪ The child is unable to safely use a conventional toilet;▪ The child is confined to a single room;▪ The child is confined to one level of the home that does not have an accessible bathroom; or▪ The child's age, weight, and height meet the manufacturer's product indications for age appropriateness, weight, and height. <p>Detachable or drop arm commodes may be covered for children requiring transfer assistance.</p> <p>Non-standard commodes or combination shower/commode chairs are covered when one of the following applies:</p> <ul style="list-style-type: none">▪ Requires significant assistance to transfer for toileting and/or bathing.▪ Has contractures, decreased head/neck/trunk control and/or abnormal tone requiring additional positional support. <p>Tilt/recline shower/commode chairs are covered when the above criteria and one of the following applies:</p> <ul style="list-style-type: none">▪ Is unable to sit upright with/without support accessories;▪ Requires tilt or recline positioning for safe bathing; or▪ Requires pressure relief while sitting for toileting/bathing/showering. <p>The policy standards of coverage for both bath/shower chairs/transfer benches and for commodes must be met when requesting combination bath/shower/commode chairs/transfer benches.</p>

Medicaid Provider Manual

	<p>*Prior authorization is waived for the first three months following hospital discharge for temporary rental of a standard commode. (Refer to the Hospital Discharge Waiver Services subsection of this chapter for additional information.)</p>
Documentation	<p>Documentation must be less than 180 days old and include:</p> <ul style="list-style-type: none"> ▪ Diagnosis related to the need for the equipment. ▪ Functional limitations requiring the equipment. ▪ Child's weight and height. ▪ Discharge date from the hospital, if applicable.
PA Requirements	<p>PA is not required for a standard commode or standard combination bath/shower/commode chair/transfer bench for any of the following if the Standards of Coverage are met:</p> <ul style="list-style-type: none"> ▪ Rental up to three months following hospital discharge. ▪ Purchase or rental of a standard stationary, mobile, commode chair with fixed or detachable arms for the following diagnoses: <ul style="list-style-type: none"> ➢ Amyotrophic Lateral Sclerosis ➢ Multiple Sclerosis ➢ Cerebral Palsy, Unspecified ➢ Congenital and Progressive Hereditary Muscular Dystrophy ➢ Fracture of Vertebral Column with Spinal Cord Injury (cervical and dorsal) ▪ Replacement of pail or pan for use with commode chair (frequency rules apply). <p>PA is required for the following:</p> <ul style="list-style-type: none"> ▪ Medical need beyond the Standards of Coverage. ▪ Non-standard commodes or non-standard combination shower/commode chairs/transfer benches or tilt/recline shower/commode chairs. ▪ Commodes with footrests and/or seat mechanisms. ▪ Continued coverage after the three-month rental following hospital discharge for a diagnosis not removed from PA. ▪ Replacement is required within two years of purchase.
Non-Covered	<ul style="list-style-type: none"> ▪ Back-up/secondary commodes. ▪ Potty chairs or other potty-training devices.
Payment Rules	<p>Standard commodes may be considered a capped rental or purchase item. Reimbursement for all standard commodes includes the pail/pan and all accessories (except footrest).</p> <p>If the unit is billed as a capped rental, the rental payment would be inclusive of the following:</p> <ul style="list-style-type: none"> ▪ Education on the proper use and care of the equipment. ▪ Routine servicing and all necessary repairs or replacement to make the unit functional.

Medicaid Provider Manual

	Non-standard commodes, combination shower/commode and tilt/recline shower/commode chairs are purchase only items and include all accessories necessary to use the commode (except footrests).
--	---

2.7 COMMODES

Definition	A commode is a chair with an enclosed pan or pail that may be stationary or mobile, with fixed or removable arms, a seat lift, and footrest.
Standards of Coverage	A standard commode may be covered if the beneficiary is unable to safely use home toileting facilities, is confined to a single room, or is confined to one level of the home in which no toileting facilities are available.
	A heavy-duty commode may be covered for a beneficiary weighing 300 pounds or greater and the beneficiary is unable to safely use home toileting facilities, is confined to a single room, or is confined to one level of the home in which no toileting facilities are available.
	A shower commode chair may be covered if required to enable the beneficiary to shower independently or with assistance in the home setting and there are no cost effective alternatives.
Documentation	Documentation must be less than 180 days old and include: <ul style="list-style-type: none"> ▪ Diagnosis appropriate for the equipment requested. ▪ Functional limitations requiring the equipment. ▪ Weight (if a heavy-duty commode is required). ▪ Discharge date from hospital, if applicable.
PA Requirements	PA is not required for any of the following if the Standards of Coverage are met: <ul style="list-style-type: none"> ▪ Up to Three Months Following Hospital Discharge - rental of a stationary commode chair with fixed arms (or) stationary commode chair with detachable arms for a diagnosis not already removed from PA. ▪ Purchase or rental of a stationary, mobile, extra wide, or heavy duty commode chair with fixed or detachable arms for the following diagnoses: <ul style="list-style-type: none"> ➤ Amyotrophic Lateral Sclerosis ➤ Multiple Sclerosis ➤ Cerebral Palsy, Unspecified ➤ Congenital and Progressive Hereditary Muscular Dystrophy ➤ Fracture of Vertebral Column With Spinal Cord Injury (cervical and dorsal) ▪ Replacement of pail or pan for use with commode chair.

Medicaid Provider Manual

	<p>PA is required for the following:</p> <ul style="list-style-type: none">▪ Medical need beyond the Standards of Coverage.▪ Commodes with footrests and/or seat mechanisms.▪ Continued coverage after the three-month rental following hospital discharge for a diagnosis not removed from PA.▪ Replacement is required within five years if the beneficiary is over 21.▪ Replacement is required within two years if the beneficiary is under 21.
Payment Rules	<p>A commode may be considered a capped rental or purchase item. Reimbursement for all commodes includes pail/pan and accessories (except footrest).</p> <p>If unit is billed as a capped rental, the rental payment would be inclusive of the following:</p> <ul style="list-style-type: none">▪ Education on the proper use and care of the equipment.▪ Routine servicing and all necessary repairs or replacement to make the unit functional.

2.8 COMPLEX REHABILITATION TECHNOLOGY (CRT) EQUIPMENT/ACCESSORIES [SUBSECTION ADDED 4/1/2025]

Pursuant to Public Act 103 and Public Act 104 of 2024, effective January 1, 2025, MDHHS established a CRT equipment/accessories DME benefit by identifying specific Healthcare Common Procedure Coding System (HCPCS) codes as CRT equipment and accessories. Per Public Acts 103 and 104 of 2024, Medicaid fee-for-service (FFS) and Medicaid Health Plans (MHPs) are prohibited from including CRT equipment and accessories into competitive bidding, selective contracting, or similar initiatives.

CRT Definition	<p>CRT equipment is a subcategory of DME that can be individually configured to meet the medical/functional needs of beneficiaries with complex physical or functional limitations (e.g., traumatic brain injury, amyotrophic lateral sclerosis, spina bifida, etc.). CRT equipment includes specialized manual and power wheelchairs with additional options/accessories, adaptive seating and positioning, standing frames, gait trainers, etc. (Refer to the Complex Rehabilitation Technology (CRT) Healthcare Common Procedure Coding System (HCPCS) Codes list posted on the Medical Suppliers/Orthotists/ Prosthetists/DME Dealers webpage. Refer to the Directory Appendix for website information.)</p> <p>Individually configured means the equipment has various sizes, features, and modifications that a qualified CRT provider can apply specific to the beneficiary by measuring, fitting, programming, adjusting or adapting the equipment consistent with the beneficiary's medical/functional needs as identified by the evaluation of a QHCP.</p>
Standards of Coverage	<p>The provision of CRT equipment and accessories (including repairs to and replacement of) is limited to DME providers who are enrolled with Medicaid as CRT providers. (Refer to the Provider Enrollment subsection and the Complex Rehabilitation Technology (CRT) Equipment/Accessories subsection for CRT/non-CRT DME provider enrollment information.)</p> <p>Refer to product-specific sections of this chapter for standards of coverage and documentation requirements.</p>

Medicaid Provider Manual

Evaluation	<p>In addition to the documentation and evaluation requirements indicated in the specific DME equipment subsections of this chapter, all CRT equipment requires the complex needs beneficiary to be evaluated by a QHCP. (Refer to the Evaluation and Medical Justification for Complex Seating Systems and Mobility Devices Form subsection for additional information.) A qualified CRT professional must be present at the time of the evaluation.</p> <p>The QHCP must not have a financial relationship with the CRT provider, unless the CRT provider is owned by a hospital and the QHCP is employed by the same hospital to work in the inpatient or outpatient setting.</p> <p>If a CRT professional is not available in the beneficiary's geographic location, the QHCP may perform the evaluation and coordinate provision of the equipment through an MDHHS-authorized non-CRT DME provider.</p>
PA Requirements	All CRT equipment and accessories require PA.
Non-CRT DME Providers	<p>MDHHS may approve a non-CRT DME provider to supply CRT equipment and accessories on a case-by-case basis through PA if an enrolled CRT provider is not available in the beneficiary's geographic location. MDHHS will consider the experience, education and training of the non-CRT DME provider's technician to determine whether the non-CRT DME provider may provide CRT equipment/accessories to individual beneficiaries.</p> <ul style="list-style-type: none">▪ Delivery of CRT equipment prior to January 1, 2025:<ul style="list-style-type: none">➤ Non-CRT DME providers may perform repairs to base CRT equipment for the life of the equipment if the provider is the same provider who delivered the original equipment to the beneficiary prior to January 1, 2025.➤ For future PA repair requests of the base equipment, the non-CRT DME provider must include in the documentation submitted with the PA request the original PA number and the make/brand/model and serial number of the base equipment.➤ If PA is not required for the part, the non-CRT DME provider must report the original PA number and the make/brand/model and serial number of the base equipment in the claim notes section on direct data entry (DDE) claims or loop/segment 2300/NTE on the ASC X12N 837P 5010 electronic claim.▪ PA of CRT equipment prior to January 1, 2025:<ul style="list-style-type: none">➤ Non-CRT DME providers who received PA approval for CRT base equipment and accessories with an authorization start date before January 1, 2025, may supply the approved equipment if it is delivered to the beneficiary within six months of the authorization period start date. Repairs to this equipment may be performed by the non-CRT DME provider for the life of the base equipment. Refer to the above repair instructions for CRT base equipment provided prior to January 1, 2025. (text added per bulletin MMP 24-58)

2.9 COMPRESSOR (LARGE VOLUME) [RE-NUMBERED 4/1/2025]

Definition	A compressor is an electrical device that provides humidity to a tracheostomy and is capable of continuous operation.
Standards of Coverage	A compressor is covered to provide humidity for a tracheostomy.

Medicaid Provider Manual

Documentation	Documentation must be less than 90 days old and include all of the following: <ul style="list-style-type: none"> ▪ Diagnosis/medical condition related to the need for the equipment. ▪ Specific unit requested.
PA Requirements	PA is not required for rental of a large volume compressor if the Standards of Coverage are met and documentation details one of the following diagnoses: <ul style="list-style-type: none"> ▪ Artificial Opening Status – Tracheostomy ▪ Attention to Artificial Openings – Tracheostomy
	PA is required for: <ul style="list-style-type: none"> ▪ Purchase of a large volume compressor (if not rented for 10 months). ▪ Medical need beyond the Standards of Coverage. ▪ Replacement within five years.
Payment Rules	A unit may be considered a capped rental item or purchased item. If unit is billed as a capped rental, the rental payment would be inclusive of the following: <ul style="list-style-type: none"> ▪ All accessories needed to use the equipment. ▪ Education on the proper use and care of the equipment. ▪ Routine servicing and all necessary repairs or replacements to make the unit functional.

2.10 CONTINUOUS POSITIVE AIRWAY PRESSURE DEVICE [RE-NUMBERED 4/1/2025]

Definition	The continuous positive airway pressure (CPAP) device delivers a noninvasive positive air pressure into the upper airway to assist spontaneous respiratory efforts.
Standards of Coverage	<p>A CPAP device may be covered for Obstructive Sleep Apnea (OSA) if a sleep study (polysomnogram) performed in an accredited Sleep Center or Sleep Laboratory documents the following:</p> <ul style="list-style-type: none"> ▪ Apnea-Hypopnea Index (AHI) documents a minimum of 15 events per hour, or ▪ AHI documents 5 to 14 events per hour with related symptoms such as: <ul style="list-style-type: none"> ➢ Excessive daytime sleepiness, impaired cognition, mood disorders; and/or ➢ Hypertension, ischemic heart disease, or history of stroke, or morbid obesity. <p>For beneficiaries under the age of 21 only, tracheomalacia, tracheostomy complications or other anomalies of larynx, trachea, and bronchus may be covered when a particular CPAP setting improved and maintained airway patency and oxygenation.</p>

Medicaid Provider Manual

Documentation	<p>Documentation must be less than 90 days old and include:</p> <ul style="list-style-type: none"> ▪ Diagnosis and/or medical condition related to the need for the CPAP device. ▪ A copy of the sleep study (polysomnogram) for a diagnosis of OSA. The recorded sleep study must contain at least two hours of recorded sleep and the AHI must be calculated using actual recorded hours of sleep. ▪ For continued coverage beyond the initial four months, documentation must substantiate that the beneficiary has been compliant with the use of the CPAP and the device continues to be effective in treating the condition. If a unit log is maintained, the information must be submitted. ▪ Prescription from an appropriate pediatric subspecialist is required for coverage under the CSHCS Program.
PA Requirements	<p>PA is not required if the Standards of Coverage are met and:</p> <ul style="list-style-type: none"> ▪ The beneficiary is over the age of 21 and has one of the following diagnoses: <ul style="list-style-type: none"> ➢ Obstructive Sleep Apnea (Adults) ➢ Tracheostomy Complications ➢ Tracheomalacia ➢ Other Anomalies of Larynx, Trachea, and Bronchus ➢ Insomnia with Sleep Apnea ➢ Hypersomnia with Sleep Apnea ➢ Other and Unspecified Sleep Apnea ▪ For unobstructive sleep apnea, use diagnosis description of other and unspecified sleep apnea. ▪ The beneficiary is under the age of 21, has one of the above diagnoses, and the device is prescribed by the appropriate pediatric subspecialist.
	<p>PA is required for:</p> <ul style="list-style-type: none"> ▪ Medical need beyond the Standards of Coverage. ▪ Replacement within five years. <p>PA is given for the initial four months and then for the final six months.</p>
Payment Rules	<p>A CPAP device is considered a capped rental item and is inclusive of the following:</p> <ul style="list-style-type: none"> ▪ All accessories needed to use the unit (e.g., tubing, application devices, filters, chinstrap, headgear, etc.). ▪ Education on the proper use and care of the equipment. ▪ Routine servicing and all necessary repairs or replacements to make the unit functional. <p>After the first 10 months of use, necessary repairs and/or replacements of accessories are separately reimbursable. (Replacement parts for the full CPAP mask should be considered prior to replacement of the entire mask.)</p>

Medicaid Provider Manual

2.11 DIABETIC EQUIPMENT AND RELATED SUPPLIES [RE-NUMBERED 4/1/2025]

2.11.A. BLOOD GLUCOSE MONITORING EQUIPMENT AND SUPPLIES [RE-NUMBERED 4/1/2025]

Definition	Blood glucose monitoring supplies and equipment are defined as those items necessary to monitor blood glucose levels. The equipment and supplies include, but are not limited to, blood glucose monitors, testing strips, lancets, and calibrator solution/chips.
Standards of Coverage	<p>A home blood glucose monitor and related supplies are covered when a beneficiary has been diagnosed with diabetes and it is medically necessary to monitor fluctuations of blood glucose levels on a daily basis. Diabetes includes:</p> <ul style="list-style-type: none">▪ Gestational diabetes▪ Insulin-treated diabetes▪ Non-insulin treated diabetes <p>Diabetes medications (i.e., metformin, Januvia, etc.) do not qualify as insulin treatment.</p> <p>Quantity limits for lancets, blood glucose test strips/reagent test strips, and urine test/reagent strips/tablets are based upon insulin-treated or non-insulin-treated diabetes. Refer to the Medicaid Code and Rate Reference tool in CHAMPS for quantity and frequency information. (Refer to the Directory Appendix for website information.)</p>
Documentation	<p>Documentation must be less than 90 days old and include all of the following:</p> <ul style="list-style-type: none">▪ Diagnosis/condition related to the need for the blood glucose monitoring.▪ Items to be dispensed.▪ Quantity of items to be dispensed for 30 days usage.▪ Frequency of testing.▪ For beneficiaries under 21, treatment plan for treating abnormal blood glucose levels (if pediatric endocrinologist did not order the monitor/supplies).▪ For CSHCS beneficiaries, a prescription from a Pediatric Endocrinologist is required. <p>For beneficiaries 21 years of age and older with medical need to test blood glucose more frequently than established quantity limits, the physician must indicate the medical need and duration ("PRN" or "as needed" is not sufficient documentation to support medical need) for the additional quantities.</p>

Medicaid Provider Manual

PA Requirements	<p>PA is not required when the Standards of Coverage are met and the beneficiary has one of following diagnoses:</p> <ul style="list-style-type: none">▪ Diabetes Mellitus Without Mention of Complications▪ Diabetes with Ketoacidosis▪ Diabetes with Hyperosmolarity▪ Diabetes with Other Coma▪ Diabetes with Renal Manifestations▪ Diabetes with Ophthalmic Manifestations▪ Diabetes with Neurological Manifestations▪ Diabetes with Peripheral Circulatory Disorders▪ Diabetes with Other Specified Manifestations▪ Diabetes with Unspecified Complications▪ Diabetes Mellitus Complicating Pregnancy▪ Abnormal Glucose Tolerance (Gestational Diabetes Only) <p>In addition to the above, PA will not be required if physician documentation substantiates the medical need for an adult (insulin or non-insulin treated) to test more frequently than standardized MDHHS limits. For such circumstances, the provider must append the KX modifier to the A4253 and to the A4259 on the claim. (Refer to the Medicaid Code and Rate Reference tool for quantity limits when using modifier KX with lancets and test strips.)</p>
	<p>PA is required for:</p> <ul style="list-style-type: none">▪ Home blood glucose monitors with special features such as voice synthesis.▪ Medical need not within the Standards of Coverage if it exceeds quantity limits and/or a diagnosis that has not been removed from PA.▪ Replacement within three years.
Payment Rules	<p>All items (including the monitor) are considered purchase only items.</p> <p>To report date of service (DOS) for blood glucose test or reagent strips, lancets, and normal, low and high calibrator solution, use a span date in the "From" and "To" fields, not to exceed 90 days.</p>

2.11.B. CONTINUOUS GLUCOSE MONITORING EQUIPMENT AND SUPPLIES [RE-NUMBERED 4/1/2025]

Definition	<p>Continuous glucose monitoring systems (CGMS) are devices that measure glucose levels taken from interstitial fluid continually throughout the day and night, providing real-time data to the beneficiary or physician. The CGMS is comprised of three parts:</p> <ol style="list-style-type: none">1) A disposable sensor (attaches to the skin and inserts a tiny wire into the subcutaneous tissue to measure glucose levels),2) The transmitter (attaches to the sensor and sends the data to a wireless receiver/monitor), and3) A receiver/monitor (records and stores the data and alerts the beneficiary when glucose levels are too high or too low).
-------------------	--

Medicaid Provider Manual

	<p>CGMS may be non-adjunctive/therapeutic (CGMS can be used to make treatment decisions without the need to confirm test results using a blood glucose monitor [BGM]); or adjunctive/non-therapeutic (beneficiary must use a BGM to test the results displayed on the CGMS prior to making a treatment decision).</p>
Standards of Coverage	<p>A personal use CGMS and supplies are covered for persons with diabetes when all the following are met:</p> <ul style="list-style-type: none">▪ The beneficiary is under the care of one of the following:<ul style="list-style-type: none">➢ An endocrinologist; or➢ A physician or non-physician practitioner (nurse practitioner, physician assistant or clinical nurse specialist) who is managing the beneficiary's diabetes.▪ The beneficiary has diabetes requiring the administering of insulin or is currently using an insulin pump.▪ The beneficiary or their caregiver is educated on the use of the device and is willing and able to use the CGMS. <p>Note: CGMS reduce the frequency of fingerstick blood glucose testing but do not eliminate the need to fingerstick test entirely. Glucometers and testing supplies must be made available. These supplies are billed separately (following frequency rules) for adjunctive/non-therapeutic CGMS. Glucometers and testing supplies are included in the monthly supply HCPCS code for non-adjunctive/therapeutic CGMS. Refer to the Payment Rules section of this policy.</p> <p>Although not required for coverage consideration, physicians/non-physician practitioners are encouraged to refer patients who are willing and able to attend a certified diabetes self-management education training program. A map identifying Medicaid enrolled diabetes self-management education and support (DSME) providers can be found on the MDHHS website. (Refer to the Directory Appendix for website information.)</p>

Medicaid Provider Manual

Documentation	<p>Documentation must be less than 90 days old and include all the following:</p> <ul style="list-style-type: none"> ▪ A written order by the treating physician/non-physician practitioner; ▪ Diagnosis related to the need for the CGMS; ▪ Length of need; ▪ Frequency of insulin administered per day or if the beneficiary is using an insulin pump; ▪ Records of hypoglycemic events, HbA1c levels, uncontrolled ketoacidosis, coexistent morbidity having occurred with hypoglycemia or the presence of a microvascular complication(s), as applicable; and ▪ Current treatment plan. <p>The initial order must be written for six months. If the beneficiary continues to utilize the CGMS, the practitioner may write an order for an additional six months. After the first year, an order(s) for replacement sensors, transmitters, receivers and other separately billed supplies used with the CGMS (following frequency rules) may be written for a 12-month period.</p> <p>Note: Children's Special Health Care Services (CSHCS) beneficiaries require a prescription from a CSHCS authorized physician subspecialist. Refer to the Children's Special Health Care Services chapter for additional information.</p>
PA Requirements	<p>Prior authorization is not required for the following if standards of coverage and documentation requirements are met.</p> <ul style="list-style-type: none"> ▪ Type I diabetes. ▪ Infants and toddlers (age 5 and under*). ▪ Diabetes in pregnancy, childbirth, and the puerperium period (insulin or non-insulin treated). <p>*It is assumed that hypoglycemic unawareness is common within this age group.</p> <p>Prior authorization is required for all other conditions and clinical scenarios where use of CGMS may be beneficial, including but not limited to, Type II diabetes.</p>
External Insulin Pump Combined with CGMSs	<p>An external insulin pump combined with a CGMS is covered when the external insulin pump and the CGMS policy standards of coverage are met. To be considered for coverage, the device must be approved by the Food and Drug Administration (FDA) as a combined insulin pump/CGMS.</p>
Non-Covered	<p>Smart devices (e.g., smart phones, iPads, tablets, personal computers) used with a CGMS are not classified as durable medical equipment and are not covered by Medicaid.</p>

Medicaid Provider Manual

Payment Rules	<p>The sensor, transmitter and receiver are purchase-only items, except for Healthcare Common Procedure Coding System (HCPCS) codes E2102 and E2103 may be purchased, rented or used item).</p> <p>Adjunctive/non-therapeutic CGMS (E2102) require the beneficiary to use a BGM to test the results shown on the CGMS prior to making a treatment decision. The BGM and BGM supplies are not included in the allowance for the adjunctive/non-therapeutic CGMS supply (A4238) and may be billed separately (within BGM policy limits). HCPCS code A4238 is comprised of all items necessary to use the device (E2102), including CGMS sensors and transmitters.</p> <p>The following HCPCS codes are included in the allowance for A4239 and may not be billed separately: A4233, A4234, A4236, A4244, A4245, A4246, A4247, A4250, A4253, A4255, A4256, A4257, A4258, A4259, E0607, E2100 and E2101.</p> <p>The product warranty must be expired prior to replacement of the transmitter and/or receiver.</p> <p>Providers must use the most appropriate HCPCS code for each brand/make/model of CGMS by reviewing the Food and Drug Administration (FDA) product approvals and the Pricing, Data Analysis and Coding (PDAC) contractor website for coding assignment. Upcoding a product to receive higher reimbursement is incorrect billing and could result in post-payment recovery of funds or provider audit.</p> <p>Refer to the Medicaid Code and Rate Reference tool for HCPCS code coverage parameters.</p>
----------------------	--

2.11.C. EXTERNAL INFUSION (INSULIN) PUMP AND SUPPLIES [RE-NUMBERED 4/1/2025]

Definition	Insulin pumps deliver a constant and continuous infusion of insulin, driven by mechanical force, into the subcutaneous space via a needle or soft cannula.
Standards of Coverage	<p>Insulin pumps are covered when other methods to control blood glucose levels have been ineffective and one of the following applies:</p> <ul style="list-style-type: none">▪ Blood glucose levels demonstrate poor glycemic control despite monitoring at least four times per day and multiple daily insulin injections with a persistently elevated glycosylated hemoglobin level greater than seven percent.▪ There is a history of severe glycemic excursions, brittle diabetes, hypoglycemic/hyperglycemic reaction, nocturnal hypoglycemia, any extreme insulin sensitivity, and/or very low insulin requirements.▪ There is evidence of the "dawn" phenomenon where fasting blood glucose level often exceeds 200 mg/dl.

Medicaid Provider Manual

Documentation	<p>Documentation must be less than 90 days old and include:</p> <ul style="list-style-type: none"> ▪ Diagnosis/medical condition pertaining to the need for the pump. ▪ Lab values of blood glucose levels. ▪ Medical history documenting the need for the pump. ▪ Any medical complications experienced by the beneficiary related to the need for blood glucose monitoring. <p>CSHCS requires a prescription from an appropriate pediatric subspecialist.</p>
PA Requirements	<p>PA is not required if the Standards of Coverage are met, and:</p> <ul style="list-style-type: none"> ▪ The beneficiary is over the age of 16 and has one of the diagnoses indicated below: <ul style="list-style-type: none"> ➢ Diabetes Mellitus without Complication ➢ Diabetes with Ketoacidosis ➢ Diabetes with Hyperosmolarity ➢ Diabetes with Other Coma ➢ Diabetes with Renal Manifestations ➢ Diabetes with Ophthalmic Manifestations ➢ Diabetes with Neurological Manifestations ➢ Diabetes with Peripheral Circulatory Disorders ➢ Diabetes with Other Specified Manifestations ➢ Diabetes with Unspecified Complication ➢ Diabetes Mellitus Complicating Pregnancy ▪ The beneficiary is under the age of 16, has one of the diagnoses above, and the pump is ordered by a pediatric endocrinologist.
	<p>PA is required for the following:</p> <ul style="list-style-type: none"> ▪ Medical need beyond the Standards of Coverage. ▪ Diagnoses/conditions other than those listed above. ▪ Replacement of pump within five years.
Payment Rules	<p>Insulin pumps are considered a purchase only item.</p> <p>The purchase payment is inclusive and includes all of the following:</p> <ul style="list-style-type: none"> ▪ A 30-day trial period at no cost to Medicaid or the beneficiary prior to purchase of device. ▪ Comprehensive care coordination, including a plan for follow-up monitoring by the physician after installation of the pump.

Medicaid Provider Manual

2.12 DIABETIC SHOES AND INSERTS [RE-NUMBERED 4/1/2025]

Definition	Diabetic shoes, inserts and related modifications include, but are not limited to, depth inlay shoes, multi-density inserts, roller or rocker bottoms, wedges, metatarsal bar, and offset heel.
Standards of Coverage	<p>Diabetic shoes, inserts, and/or modifications may be covered for individuals who have, due to complications with diabetes mellitus, one of the following conditions:</p> <ul style="list-style-type: none"> History of previous foot ulcerations or pre-ulcerative calluses. Established peripheral neuropathy or sensory impairment. Peripheral Vascular Disease with an ankle brachial index at rest of 0.5 or less following exercise. Loss of a toe or portion of the foot due to amputation arising from diabetes. <p>A custom-molded diabetic shoe is covered only if the depth shoe cannot accommodate a foot anomaly.</p> <p>Inserts are covered if the beneficiary requires a depth shoe or custom-molded diabetic shoe. For a depth shoe, three inserts would be separately reimbursable in addition to the noncustomized one included with the shoe. For a custom-molded shoe, two inserts would be separately reimbursable. Modifications to a custom-molded or depth shoe may be covered rather than an additional insert.</p>
Documentation	<p>Documentation must be less than 30 days old and include all of the following:</p> <ul style="list-style-type: none"> Diagnosis/medical condition related to the service requested. Medical reasons for specific shoe type and/or modification.
PA Requirements	<p>PA is not required for the following inserts if the Standards of Coverage are met:</p> <ul style="list-style-type: none"> Multiple density insert, direct formed, molded to foot with external heat source. Multiple density insert, direct formed, compression molded to patient's foot without external heat source. Multiple density insert, custom fabricated and custom-molded from model of patient's foot. Depth inlay shoes. Modifications if an additional insert is not provided. <p>PA is required for:</p> <ul style="list-style-type: none"> Medical need beyond the Standards of Coverage. Replacement within one year. Quantity beyond established limits. Custom-fabricated shoes and other inserts not included above.
Payment Rules	All items are considered purchase only .

2.13 ENCLOSED BED SYSTEMS [RE-NUMBERED 4/1/2025]

Definition	An Enclosed Bed System includes the mattress, bed frame, and enclosure as one unit.
Standards of Coverage	An Enclosed Bed System may be covered if the following applies: <ul style="list-style-type: none">▪ There is a diagnosis/medical condition (e.g., seizure activity) which could result in injury in a standard bed, crib, or hospital bed; and▪ There are no economic alternatives to adequately meet the beneficiary's needs.
Documentation	The documentation must be less than six months old and include: <ul style="list-style-type: none">▪ Diagnosis/medical condition requiring use of the bed and any special features (if applicable).▪ Safety issues resulting from the medical condition and related to the need for an Enclosed Bed System.▪ Other products or safety methods already tried without success (e.g., bumper pads/rails).▪ Type of bed requested.▪ Type of special features requested, if applicable.
Noncovered Conditions	Enclosed Bed Systems are not covered when the purpose is to restrain the beneficiary due to behavioral conditions, caregiver need or convenience, etc.
PA Requirements	PA is required for all Enclosed Bed Systems.
Payment Rules	The Enclosed Bed System is considered a purchase only item. For Youth Beds, refer to the Hospital Beds subsection of this chapter.

2.14 ENTERAL NUTRITION [RE-NUMBERED 4/1/2025]

Enteral nutrition is nutrition administered by tube or orally into the gastrointestinal tract. Enteral nutrition is classified into categories that possess similar characteristics. Categories for enteral nutrition are listed by HCPCS codes on the MDHHS Medical Supplier/DME/Prosthetics and Orthotics Fee Schedule on the MDHHS website. For the appropriate HCPCS code, products are listed on the enteral nutrition product classification list on the website for the Medicare Pricing, Data Analysis and Coding (PDAC) contractor. If the formula is not listed in the covered HCPCS codes, the provider must contact the PDAC contractor for a coding determination. (Refer to the Directory Appendix for website and contact information.)

2.14.A. ENTERAL NUTRITION (ADMINISTERED ORALLY) [RE-NUMBERED 4/1/2025]

Standards of Coverage	<p>Enteral nutrition (administered orally) may be covered for beneficiaries under the age of 21 when:</p> <ul style="list-style-type: none">▪ A chronic medical condition exists resulting in nutritional deficiencies, and a three-month trial is required to prevent gastric tube placement; or▪ Supplementation to regular diet or meal replacement is required, and the beneficiary's weight-to-height ratio has fallen below the fifth percentile on standard growth grids; or▪ Physician documentation details low percentage increase in growth pattern or trend directly related to the nutritional intake and associated diagnosis/medical condition. <p>For CSHCS coverage, a nutritionist or appropriate pediatric subspecialist must indicate that long-term enteral supplementation is required to eliminate serious impact on growth and development.</p> <p>For Healthcare Common Procedure Coding System (HCPCS) code B4162, the beneficiary must have a specified inherited disease of metabolism identified by the International Classification of Diseases (ICD).</p> <p>For beneficiaries age 21 and over:</p> <ul style="list-style-type: none">▪ The beneficiary must have a medical condition that requires the unique composition of the formula nutrients that the beneficiary is unable to obtain from food; or▪ The nutritional composition of the formula represents an integral part of treatment of the specified diagnosis/medical condition; or▪ The beneficiary has experienced significant weight loss. <p>For Healthcare Common Procedure Coding System (HCPCS) code B4157, the beneficiary must have a specified inherited disease of metabolism identified by the International Classification of Diseases (ICD).</p>
------------------------------	---

Medicaid Provider Manual

Documentation	<p>Documentation must be less than 30 days old and include:</p> <ul style="list-style-type: none"> Specific diagnosis/medical condition related to the beneficiary's inability to take or eat food. Duration of need. Amount of calories needed per day. Current height and weight, as well as change over time. (For beneficiaries under 21, weight-to-height ratio.) Specific prescription identifying levels of individual nutrient(s) that is required in increased or restricted amounts. List of economic alternatives that have been tried. The ordering practitioner or practitioner's designated clinical staff (e.g., dietitian, registered nurse, or other appropriate hospital clinical staff) completed BPHASA-2401 Medical Justification for Enteral Therapy form. (Refer to the Forms Appendix of this manual for a copy of the form.) <p>For continued use beyond 3-6 months, the CSHCS Program requires a report from a nutritionist or appropriate pediatric subspecialist.</p>
PA Requirements	<p>PA is required for all enteral formula for oral administration.</p> <p>For emergency prior authorization of initial orders for beneficiaries discharging from the inpatient hospital setting, the medical supplier may call the Program Review Division to request a verbal authorization. (Refer to the Directory Appendix for contact information.)</p>

2.14.B. ENTERAL NUTRITION (ADMINISTERED BY TUBE) [RE-NUMBERED 4/1/2025]

Standards of Coverage	<p>Enteral formula are covered when the diagnosis/medical condition requires placement of a gastric tube and nutrition is administered by syringe, gravity, or pump.</p>
Documentation	<p>Documentation must be less than 30 days old and include:</p> <ul style="list-style-type: none"> Specific diagnosis/medical condition requiring tube feeding. Duration of treatment. Amount needed per day. If a pump is required, the medical reason why syringe or gravity method could not be used. The ordering practitioner or practitioner's designated clinical staff (e.g., dietitian, registered nurse, or other appropriate hospital clinical staff) completed BPHASA-2401 Medical Justification for Enteral Therapy form. (Refer to the Forms Appendix of this manual for a copy of the form.)
PA Requirements	<p>PA is not required for standard formula for enteral tube feedings provided up to the program's established quantity limits per month. (Applies only to specific enteral formula and related supplies and equipment. Refer to the Medicaid Code and Rate Reference tool for additional information.)</p> <p>PA is required for the following:</p> <ul style="list-style-type: none"> All specialized enteral formula requests for tube feedings.

Medicaid Provider Manual

	<ul style="list-style-type: none"> Over-quantity requests for standard formula enteral tube feedings. Medical need beyond Standards of Coverage. <p>For emergency prior authorization of initial orders for beneficiaries discharging from the inpatient hospital setting, the medical supplier may call the Program Review Division to request a verbal authorization. (Refer to the Directory Appendix for contact information.)</p>
--	--

2.14.C. ENTERAL NUTRITION PAYMENT RULES [RE-NUMBERED 4/1/2025]

When billing for enteral formula (administered orally or by tube), the appropriate formula HCPCS code should be billed on a monthly basis with total calories used (divided by 100) as the unit amount. (To calculate the appropriate number of caloric units, combine total calories of all cans to be used and divide by 100.) Medicaid will reimburse for a maximum quantity of up to 900 units for any combination of approved formula.

Providers should refer to the following chart for additional assistance:

Formula	100 calories = 1 unit (u)	6 (8 oz) cans a day	1 month = 30 days	6 months = 180 days	\$5.00 cost/8 oz liquid or packet or can
Standard @ 250 calories/8 oz	250 cals/100 =2.5 units	2.5 u x 6 = 15 units a day	15 u x 30 = 450 units a month	15 u x 180=2700 units for 6 months	\$5.00 ÷ 2.5 u = \$2.00 per unit
Caloric Dense @ 355 calories/8 oz	355 cals/100 =3.55 units	3.55 u x 6= 21 units a day	21 u x 30 = 630 units a month	21 u x 180 = 3780 units for 6 months	\$5.00 ÷ 3.55 u = \$1.41 per unit
Powder, 1 package = 150 calories	150 cals/ 100 = 1.5 units	1.5 u x 6 = 9 units a day	9 u x 30 = 270 units a month	9 u x 180 =1620 units for 6 months	\$5.00 ÷ 1.5 u = \$3.33 per unit
Powder, 1# can = 112 oz when mixed @ 20 calories/oz* = 2240 calories for the entire can (*can vary with physician orders)	2240 cals/100 = 22.4 units		6 cans per month = 22.4 u x 6 = 134 units a month	134 u x 6 months = 804 units for 6 months	\$5.00 ÷ 22.4 u = \$0.30 per unit

The necessary equipment and supply code for enteral tube feedings should be billed up to specified quantity limits. Feeding bags, anchoring devices, syringes, drain sponges, cotton tip applicators, tape, adaptors, and connectors used in conjunction with a gastrostomy or enterostomy tube are included in the supply kit codes and should not be billed separately.

Dietary formula for oral feedings may be obtained from either a medical supplier or a pharmacy.

Dietary formula for tube feedings are covered only through the medical supplier.

2.15 HIGH FREQUENCY CHEST WALL OSCILLATION DEVICE [RE-NUMBERED 4/1/2025]

Definition	<p>A high frequency chest wall oscillation (HFCWO) system is an airway clearance device consisting of an inflatable vest connected by two tubes to a small air-pulse generator that is easy to transport. The air-pulse generator rapidly inflates and deflates the vest, gently compressing and releasing the chest wall to create mini-coughs that dislodge mucus from the bronchial walls, increase mobilization, and facilitates it along toward central airways.</p>
Standards of Coverage	<p>An HFCWO device may be covered up to four months for the following when all other treatment modalities have not been effective (e.g., chest physiotherapy, medication, mechanical in-exsufflation device, etc.):</p> <ul style="list-style-type: none">▪ Cystic Fibrosis (CF)▪ Bronchiectasis that has been confirmed by a high resolution, spiral, or standard CT scan and which is characterized by:<ul style="list-style-type: none">➢ Daily productive cough for at least six continuous months; or➢ Frequent (i.e., more than two per year) exacerbations requiring antibiotic therapy.▪ Neuromuscular and/or neurological disorders affecting ability to mobilize secretions (e.g., muscular dystrophy, spastic quadriplegic cerebral palsy, spinal muscular atrophy, quadriplegia, etc.) <p>Chronic bronchitis and chronic obstructive pulmonary disease (COPD) in the absence of a confirmed diagnosis of bronchiectasis do not meet the policy standards of coverage criteria.</p>
Documentation	<p>Submitted documentation must be from a Neurology, Physical Medicine & Rehabilitation, or a Pulmonology practitioner. Documentation must be less than 180 days old and include:</p> <ul style="list-style-type: none">▪ Diagnosis pertaining to the need for the HFCWO device.▪ Severity of condition (e.g., frequency of hospitalizations, pulmonary function tests, etc.).▪ Current treatment modalities and others already tried, including why those treatments did not meet the beneficiary's medical need.▪ Plan of care by the authorized physician subspecialist substantiating need for the device is required under the CSHCS Program.▪ For continuation beyond the initial four months, the following information must be provided:<ul style="list-style-type: none">➢ Documentation of any change in the prescribed treatment plan;➢ Documentation from equipment use logs (includes a meter that measures daily use; a cumulative hours meter does not meet this requirement) demonstrating ongoing utilization in accordance with the current, prescribed treatment plan; and➢ For CSHCS beneficiaries, the CSHCS program requires a medical statement from the authorized physician subspecialist substantiating the continued effectiveness of the vest.

Medicaid Provider Manual

PA Requirements	<p>PA is not required for the diagnosis of cystic fibrosis (CF) if the standards of coverage are met.</p> <p>PA is required for:</p> <ul style="list-style-type: none"> ▪ All other medical conditions. ▪ Replacement of the device or accessories (e.g., vest, hose, etc.). ▪ Repairs to the device. <p>Although PA is not required for CF beneficiaries when the standards of coverage are met, all required documentation indicated above and in the MDHHS Medicaid Provider Manual must be kept in the beneficiary's file and be available upon request. Failure to keep required documentation in the beneficiary's file may result in provider audit and/or post-payment recovery of funds.</p>
Payment Rules	<p>The HFCWO device is considered a capped rental item and is inclusive of the following during the rental period:</p> <ul style="list-style-type: none"> ▪ All accessories necessary to use the equipment (hoses, vest, electrical components, etc.). ▪ Education on the proper use and care of the equipment. ▪ Routine servicing and all necessary repairs and replacements to make the equipment functional. <p>For purchased items, the manufacturer's warranty must be exhausted prior to requesting a repair to the device or for replacement of the device or part(s).</p>

2.16 HOME INTRAVENOUS INFUSION THERAPY [RE-NUMBERED 4/1/2025]

Definition	Intravenous infusion therapy, administered in the home, is medicine injected directly into a vein.
Standards of Coverage	<p>Coverage of home infusion therapy, its expected course, and duration of treatment is based on the plan of care prescribed by the physician. Only the days involving active infusion will be considered for payment. The medical supplier facilitating the administration of home infusion therapy must:</p> <ul style="list-style-type: none"> ▪ Be accredited through The Joint Commission or other appropriate accrediting body. ▪ Maintain logs detailing proper equipment maintenance consistent with manufacturer's requirements. ▪ Provide education and training to the beneficiary or caregiver related to proper care techniques. ▪ Provide comprehensive care coordination involving the pharmacist, nurses, physician or any other infusion therapy professional.
Documentation	<p>Documentation must be less than 30 days old and include the following:</p> <ul style="list-style-type: none"> ▪ Diagnosis appropriate for specified therapy ▪ Dosage, frequency, route and duration of medication(s) being infused

Medicaid Provider Manual

	<p>Documentation for antibiotic, antiviral and/or antifungal therapies must include at least one of the following tests results to support the diagnosis:</p> <ul style="list-style-type: none"> ▪ Positive culture from appropriate site (e.g., a blood culture for diagnosis of sepsis, wound culture for diagnosis osteomyelitis, etc.) ▪ Bone scan showing osteomyelitis ▪ X-ray showing osteomyelitis or abscess ECHO/ultrasound showing endocarditis ▪ Vegetations or abscess ▪ CT or MRI scan showing osteomyelitis or abscess ▪ Minimum of three of the following: <ul style="list-style-type: none"> ➢ Fever of 101° F or more, pain, warmth, redness, edema in affected area ➢ Elevated C-reactive protein ➢ Elevated white blood cell count ➢ Elevated erythrocyte sedimentation rate (ESR) ➢ A trial course of oral antibiotic therapy with no improvement or worsening of symptoms ▪ For the diagnoses of cellulitis, pneumonia, urinary tract infection, and otitis media, documentation must indicate a failure of oral antibiotic therapy, unless a culture shows bacteria that is not sensitive to oral antibiotic medications available. This does not apply to cystic fibrosis pneumonia; PA is not needed with a positive sputum culture or a history of positive sputum cultures.
	<p>Documentation for electrolyte replacement therapy (condition unrelated to hydration status) must include a copy of the appropriate abnormal laboratory level (e.g., low potassium level for diagnosis hypokalemia, etc.).</p>
	<p>Documentation for steroid therapy must indicate exacerbation of multiple sclerosis or diagnosis related to transplant rejections.</p>
	<p>Documentation for chemotherapy and pain management therapy must include a cancer diagnosis and a copy of the treatment protocol to which the beneficiary has been assigned.</p>
	<p>Documentation for hydration therapy for hyperemesis gravidarum must include laboratory results indicating current dehydration level, estimated delivery date, and must address a trial of anti-emetics.</p>
	<p>Documentation for gammaglobulin therapy must include abnormal IGG, IGM, IGA or IGE levels prior to the beneficiary receiving an IVIG. If beneficiary has been receiving IVIG infusion therapy in an outpatient or physician office setting, these laboratory tests may not be current.</p>
	<p>Documentation for iron overload therapy must indicate a diagnosis of Sickle Cell Anemia and support the need for the requested therapy.</p>
	<p>Documentation for factor products must indicate a clotting disorder diagnosis and support the need for requested therapy.</p>
	<p>Documentation for anti-emetic infusion must indicate a diagnosis of cancer or hyperemesis gravidarum and include a trial of oral anti-emetics.</p>

Medicaid Provider Manual

	<p>The provider must keep verification of equipment maintenance on file that includes:</p> <ul style="list-style-type: none">▪ Name of the manufacturer▪ Dates the equipment was checked for proper use, care and function according to the manufacturer's requirements																												
PA Requirements	<p>PA is not required for specific HCPCS "S" codes if all of the following apply:</p> <ul style="list-style-type: none">▪ Standards of Coverage are met▪ Beneficiary is age five or older (for factor products, beneficiaries of all ages)▪ Medical need for the therapy is related to one of the diagnoses/conditions that do not require PA. (For details regarding covered HCPCS "S" codes, PA requirements and related ICD diagnosis exception code ranges, and quantity limits, refer to the Medicaid Code and Rate Reference tool.)																												
	<p>PA is required for the following:</p> <ul style="list-style-type: none">▪ Medical need beyond the Standards of Coverage.▪ The beneficiary is under the age of five.▪ Infusion days exceed the established Medicaid limits.																												
	<p>When PA is required, the following HCPCS codes are authorized via a telephone authorization process:</p>																												
	<table><tr><td>S5498</td><td>S5501</td><td>S5502</td><td>S5520</td></tr><tr><td>S5521</td><td>S9326</td><td>S9327</td><td>S9330</td></tr><tr><td>S9331</td><td>S9338</td><td>S9345</td><td>S9346</td></tr><tr><td>S9348</td><td>S9351</td><td>S9355</td><td>S9374</td></tr><tr><td>S9375</td><td>S9376</td><td>S9377</td><td>S9379</td></tr><tr><td>S9490</td><td>S9497</td><td>S9500</td><td>S9501</td></tr><tr><td>S9502</td><td>S9503</td><td>S9504</td><td>S9537</td></tr></table>	S5498	S5501	S5502	S5520	S5521	S9326	S9327	S9330	S9331	S9338	S9345	S9346	S9348	S9351	S9355	S9374	S9375	S9376	S9377	S9379	S9490	S9497	S9500	S9501	S9502	S9503	S9504	S9537

	<p>Refer to the Directory Appendix for MDHHS Program Review Division telephone prior authorization of specified DME and medical supplies information.</p>																												

Medicaid Provider Manual

Payment Rules

Reimbursement for the HCPCS "S" codes related to home intravenous infusion therapy is calculated on a per diem basis as defined by the code descriptions.

Costs included within the per diem rate:

- All infusion related supplies and equipment, such as the infusion pump, needles, syringes, gauze, sterile tubing, catheters, etc. (For pump-related infusion, the per diem rate payment includes routine servicing and all necessary repairs or replacements to make the rented DME functional.)
- The compounding of medications compliant with standards of pharmaceutical practice, including a medication profile set-up with recommendations of dosage or medication changes if needed.
- Patient educational activities related to receiving home infusion therapy and the coordination of care with physicians, nurses and other caregivers.

Costs not associated with the per diem rate:

- Medications (drugs) must be billed as pharmacy services.
- Nursing visits are covered through a Home Health Agency.
- PICC and Midline insertion procedures and associated supplies may be billed separately.

HCPCS "S" codes must be reported as a daily rate by reporting the total number of days used as units unless otherwise noted. Routine catheter care is included within the daily rate for the active infusion. For interim maintenance of an infusion line not currently in use, report the appropriate catheter care code and bill as a daily rate by reporting the total number of days used as units. For catheter maintenance of an implanted port, bill the appropriate HCPCS code with modifier "22". Details regarding the type and frequency of catheter maintenance completed must be reported in the Remarks area of the claim.

If multiple drugs are being administered concurrently for the same therapy, report modifier "SH" for two drugs or "SJ" for three or more drugs. If multiple therapies are needed, more than one therapy code may be reported.

For chemotherapy and pain management, the specific HCPCS code will designate either continuous or intermittent administration. If the therapy is provided without interruption for 24 hours or more, report the continuous therapy code. For less than 24 hours of therapy, use the intermittent code.

For antibiotic, antiviral, or antifungal therapy, report the code that best describes the frequency of administration. Only one therapy code of this series may be reported on the same date of service. If multiple drugs are administered, report modifier "SH" or "SJ".

With the administration of Medicare Part D drug(s) to dual eligibles (Medicaid/Medicare), report the appropriate HCPCS "S" code for medical supplies and/or equipment (e.g., IV poles, tubing) associated with home intravenous infusion therapy. For dual eligibles residing in a nursing facility, the equipment and supplies are part of the facility's per diem rate.

Medicaid Provider Manual

2.17 HOME UTERINE ACTIVITY MONITOR [RE-NUMBERED 4/1/2025]

Definition	A home uterine activity monitor (HUAM) is used to record the frequency of uterine contractions for the purpose of predicting pre-term delivery. The monitor is worn on a belt and records the uterine contractions that are transmitted across modem lines to a central monitoring office that contacts the physician's office for interpretation.
Standards of Coverage	<p>A HUAM may be covered for up to 90 days in the home setting for a beneficiary at high risk for pre-term delivery during the 24th through the 36th gestational week, and one of the following medical conditions applies:</p> <ul style="list-style-type: none">▪ Pre-term labor on tocolytics.▪ History of pre-term labor or delivery in previous pregnancies.▪ Incompetent cervix (cerclage).
Documentation	<p>Documentation must be less than 90 days old and include:</p> <ul style="list-style-type: none">▪ Diagnosis and/or medical condition pertaining to the need for the monitor.▪ Expected date of birth.▪ Last day of the 36th week of gestation.▪ Involvement with a regional perinatal center.
PA Requirements	<p>PA is required for all monitors.</p> <p>HCPCS code S9001 requires authorization via a telephone prior authorization process. (Refer to the Directory Appendix for MDHHS Program Review Division telephone prior authorization of specified DME and medical supplies information.)</p>
Payment Rules	<p>A HUAM is a rental only item and is inclusive of the following:</p> <ul style="list-style-type: none">▪ The monitor and other related supplies required to use the equipment properly.▪ Education on proper use and care of the equipment.▪ Routine servicing and all necessary repairs or replacements to make the unit functional.▪ Periodic downloading and interpretation of the data.▪ Perinatal nursing services related to oversight of the use of the monitor. <p>To provide a HUAM, the medical supplier must complete the CHAMPS Provider Enrollment (PE) on-line application process, selecting a subspecialty of Home Uterine Monitor. (Refer to the Directory Appendix for CHAMPS PE information.)</p>

2.18 HOSPITAL BEDS [RE-NUMBERED 4/1/2025]

Definition	A hospital bed has a special construction, consisting of a frame and an innerspring mattress, with a head and/or leg elevation adjustment mechanism for the purpose of repositioning.
Standards of Coverage	<p>A standard hospital bed may be covered if:</p> <ul style="list-style-type: none"> The diagnosis/medical condition requires a specific elevation or positioning of the body not possible with a standard bed (elevation of 30 degrees or greater). The body requires positioning in a hospital bed to alleviate pain. <p>For other beds, the above Standards of Coverage must be met, and one of the following applies:</p> <ul style="list-style-type: none"> Variable height hospital bed may be covered if different heights are medically necessary for assisting beneficiary transfers from the chair, wheelchair or standing position. Heavy-duty extra-wide hospital bed may be covered if a beneficiary weighs more than 350 pounds but does not exceed 600 pounds. Extra heavy-duty bed may be covered if a beneficiary weighs more than 600 pounds. A fully electric hospital bed may be covered when frequent and/or immediate changes in body position are required and there is no caregiver. A Youth bed may be covered if the beneficiary is under the age of 21 and the bed is required to have crib style side rails. <p>Hospital Bed Accessories</p> <ul style="list-style-type: none"> The trapeze bar may be covered when required by the beneficiary to assist with transfers or frequent changes in body position. Side rails are covered when required for safety. A replacement innerspring mattress or foam rubber mattress may be covered for replacement when the beneficiary owns the bed.
Noncovered Condition	Youth beds are not covered for the sole purpose of age appropriateness.
Documentation	<p>Documentation must be less than 90 days old and include the following:</p> <ul style="list-style-type: none"> Diagnosis/medical condition related to the service requested. Medical and/or functional reasons for the specific type of hospital bed and/or accessory. Any alternatives tried or ruled out.

Medicaid Provider Manual

PA Requirements	<p>PA is not required if the Standards of Coverage are met and the following applies:</p> <ul style="list-style-type: none"> For fixed height, variable height, semi-electric beds, side rail, and trapeze for one of the following diagnoses/medical conditions: <ul style="list-style-type: none"> ➤ Multiple Sclerosis ➤ Infantile Cerebral Palsy ➤ Congenital or Hereditary Progressive Muscular Dystrophy ➤ Fracture of the Cervical or Dorsal Areas (open or closed) Procedure codes E0255, E0256, E0260, E0292, E0293, E0910, E0940 up to three months for hospital discharge when required for diagnoses not removed from PA.
	<p>PA is required for:</p> <ul style="list-style-type: none"> Medical need beyond the Standards of Coverage. Full electric beds or any other hospital beds and/or accessories requiring PA as specified in the Medicaid Code and Rate Reference tool. Replacement of a fixed height, variable height, or semi-electric bed and/or accessory within five years.
Payment Rules	<p>A bed may be a capped rental or purchase item.</p> <p>If unit is billed as a capped rental, the rental payment would be inclusive of the following:</p> <ul style="list-style-type: none"> All accessories needed to use the equipment except for trapezes, side rails, and mattresses where appropriate. Education on the proper use and care of the equipment. Routine servicing and all necessary repairs or replacements to make the unit functional.

2.19 INCONTINENT SUPPLIES [RE-NUMBERED 4/1/2025]

Definition	<p>Incontinent supplies are items used to assist individuals with the inability to control excretory functions.</p> <p>The type of coverage for incontinent supplies may be dependent on the success or failure of a bowel/bladder training program. A bowel/bladder training program is defined as instruction offered to the beneficiary to facilitate:</p> <ul style="list-style-type: none"> Independent care of bodily functions through proper toilet training. Appropriate self-catheter care to decrease risk of urinary infections and/or avoid bladder distention. Proper techniques related to routine bowel evacuation.
-------------------	--

Medicaid Provider Manual

Standards of Coverage (Not Applicable to CSHCS Only Beneficiaries)

Diapers, incontinent pants, liners, and belted/unbelted undergarments without sides are covered for individuals age three or older if both of the following applies:

- A medical condition resulting in incontinence and there is no response to a bowel/bladder training program.
- The medical condition being treated results in incontinence, and beneficiary would not benefit from or has failed a bowel/bladder training program.

Pull-on Briefs are primarily considered a short-term transitional product for beneficiaries with a medical condition causing incontinence of bowel and/or bladder.

Pull-on brief coverage for ages 3 through 20:

Pull-on briefs are covered when there is the presence of a medical condition causing bowel/bladder incontinence and one of the following applies:

- **For short term use:** The beneficiary is actively participating in a bowel/bladder training plan and is demonstrating consistent measurable progress in the plan (i.e., consistent reduction in the amount of pull-on briefs used, successful completion of the bowel/bladder training in three years or less, etc.); **or**
- **For long term use:** The beneficiary has a permanent medical condition (such as Muscular Dystrophy, Spina Bifida, etc.) that will prevent the beneficiary from ever achieving bowel and bladder continence; however, the beneficiary has the cognitive and physical ability to care for their toileting needs independently or with minimal assistance.

Bowel/Bladder Training Plan

A bowel/bladder training plan must be designed and implemented within the school and home environments in order to achieve optimum success.

Initial Nursing Assessment and Reassessment

The use of pull-on briefs requires an initial nursing assessment and reassessment every six months thereafter or a time determined by the Michigan Department of Health and Human Services (MDHHS). Reassessments must detail measurable progress the beneficiary has made in the training plan since the last assessment. Long-term use requires an initial nursing assessment and reassessment every 24 months thereafter or a time determined by MDHHS. Documentation of the initial nursing assessment and reassessment(s) must be kept in the beneficiary file.

If the beneficiary no longer has a medical condition causing bowel/bladder incontinence and they have not achieved continence within three years of the start of the bowel/bladder training program, the pull-on briefs will no longer be a covered benefit.

Pull-on brief coverage for ages 21 and older:

Pull-on briefs are covered when there is the presence of a medical condition causing bowel/bladder incontinence and the beneficiary is able to care for their toileting needs independently or with minimal assistance from a caregiver and one of the following applies:

- **For short term use:** The beneficiary has a temporary medical condition (including recent discharge from a nursing home or hospital) causing bowel/bladder incontinence; **or**

Medicaid Provider Manual

	<ul style="list-style-type: none"> ▪ For long term use: The beneficiary has a permanent medical condition (such as Muscular Dystrophy, Spina Bifida, etc.) that will prevent the beneficiary from ever achieving bowel and bladder continence. <p>Initial Nursing Assessment and Reassessment</p> <p>The use of pull-on briefs requires an initial nursing assessment. Reassessment is required whenever there is a prior authorization request for a change in quantity or a medical condition resulting in continued need beyond established policy timelines. Recent discharge from a nursing home or hospital is considered a qualifying condition for short-term use of pull-on briefs. Beneficiaries with medical conditions which result in permanent incontinence or who have product needs over established policy quantities must be re-assessed every 12 months or a time determined by MDHHS. Documentation of the initial nursing assessment and reassessment(s) must be kept in the beneficiary file.</p> <p>Pull-on briefs are not covered for the following:</p> <ul style="list-style-type: none"> ▪ Beneficiaries under 3 years of age. ▪ A medical condition causing incontinence of bowel/bladder is not present. ▪ For children who have an occasional bowel or bladder accident. ▪ Night time incontinence of bowel or bladder. <p>Incontinent wipes are covered when necessary to maintain cleanliness outside of the home.</p> <p>Disposable underpads are covered for beneficiaries of all ages with a medical condition resulting in incontinence.</p>
<p>Standards of Coverage (Applicable to All Programs)</p>	<p>Intermittent catheters are covered when catheterization is required due to severe bladder dysfunction. Hydrophilic-coated intermittent catheters are considered for individuals that have Mitrofanoff stomas, partial stricture or small, tortuous urethras.</p> <p>Intermittent catheters with insertion supplies are covered for beneficiaries who have a chronic urinary dysfunction for which sterile technique is clinically required.</p>
<p>Documentation</p>	<p>Documentation must be less than 30 days old, kept in the beneficiary file, and include the following:</p> <ul style="list-style-type: none"> ▪ Diagnosis of condition causing incontinence (primary and secondary diagnosis). ▪ Item to be dispensed. ▪ Duration of need. ▪ Quantity of item and anticipated frequency the item requires replacement. <p>In addition to the above documentation requirements, pull-on briefs require the following:</p> <ul style="list-style-type: none"> ▪ An initial nursing assessment for all ages, regardless of whether the pull-on briefs will be used short or long term. ▪ A six-month reassessment is required for under 21 years of age or a time determined by MDHHS.

Medicaid Provider Manual

	<ul style="list-style-type: none"> If the beneficiary has a medical condition that results in permanent incontinence, reassessment is required annually or a time determined by MDHHS. For under age 21 and attending school, a copy of the teacher's continence report or a letter from the school detailing the bowel/bladder plan. The reassessment must have a copy of the teacher's plan or school letter detailing any changes to the plan and progress made since the last assessment.
PA Requirements	<p>PA is required for:</p> <ul style="list-style-type: none"> Hydrophilic type urinary catheters. usage over the established quantities.
	<p>PA is not required for all other incontinent items unless usage exceeds established quantity limitations.</p>
Payment Rules	<p>Volume Purchase Agreement - Through a competitive bid process, the State of Michigan has contracted with a volume purchase contractor for selected incontinent supplies for beneficiaries enrolled in Medicaid FFS and CSHCS.</p> <p>Beneficiaries Exempt from the MDHHS Volume Purchase Contract - Based on dual eligibility, specific beneficiaries may be exempt from obtaining services from the MDHHS Volume Purchase Contractor as described below:</p> <ul style="list-style-type: none"> Beneficiaries dually enrolled in Medicaid and Medicare are not required to obtain Medicare-covered incontinence items from the contractor but may choose to if preferred. Beneficiaries enrolled in a MHP will receive coverage of these products through the medical supplier contracted by the health plan. This medical supplier could be the Contractor if negotiated by the MHP. Beneficiaries enrolled in either a commercial FFS plan or HMO if its coverage includes incontinence supplies are expected to follow the primary payer's rules first. If these products are not covered by the plan, the beneficiary must obtain these items through the MDHHS Volume Purchase Contractor.
Services Covered Through the Contract	<p>The following list details the selected incontinent supply items that must be obtained from the MDHHS Volume Purchase Contractor for Medicaid and CSHCS Programs. Beneficiaries dually eligible for Medicaid and Medicare are required to obtain the contracted incontinent items (designated with an X) from the MDHHS Volume Purchase Contractor.</p>

<p>* Use HCPCS code A4335 only to report belted/unbelted undergarments w/o sides. PA is not required up to the established quantity limit of 150 per month.</p> <p>** Use HCPCS code A4520 only for moisture resistant reusable incontinence pants.</p>			
Quantity Limitations Based on Combination of Items Used		<p>Diapers and Pull-on Briefs - For a beneficiary using both diapers and pull-on briefs, the combined total quantity of these items cannot exceed 300 per month. (The maximum amount of pull-on briefs is 150 per month even if the beneficiary is not using diapers.)</p> <p>Diapers of Different Sizes - For a beneficiary using a combination of different sized diapers, the total quantity must not exceed 300 per month.</p>	

2.20 LIFTS (HYDRAULIC AND ELECTRIC) [RE-NUMBERED 4/1/2025]

Definition	Lifts include, but are not limited to, hydraulic and electric, and accessories include slings and/or seats.
Standards of Coverage	<p>A standard hydraulic lift may be covered when the beneficiary requires assistance in transfers, provision of the lift will allow the beneficiary to be transferred safely, and one of the two conditions stated below are met:</p> <ul style="list-style-type: none"> ▪ The beneficiary requires a one-person assist but the weight or size of the beneficiary prohibits safe transfers or could cause harm to the caregiver. ▪ The beneficiary requires a two-person assist and there are not two caregivers in the home. <p>An electric lift may be covered when the above Standards of Coverage are met and the hydraulic lift cannot be used safely or when the beneficiary's medical condition results in increased tone (e.g., spasticity).</p>
Documentation	<p>Documentation must be less than 90 days old and include the following:</p> <ul style="list-style-type: none"> ▪ Diagnosis/condition requiring use of the lift. ▪ Functional level of assistance required to complete activities of daily living (ADLs). ▪ Type of transfer required. ▪ Weight and height of the beneficiary. ▪ Type of lift requested. ▪ An occupational or physical therapy evaluation and recommendation. ▪ Number of caregivers in the home and number of hours during the 24-hour period that each caregiver is present.
PA Requirements	<p>PA is not required if Standards of Coverage are met for:</p> <ul style="list-style-type: none"> ▪ Hydraulic lifts ▪ Replacement slings or seats
	<p>PA is required for:</p> <ul style="list-style-type: none"> ▪ Electric lifts ▪ Replacement within ten years
Payment Rules	<p>A lift may be a capped rental or purchase item.</p> <p>If unit is billed as a capped rental, the rental payment would be inclusive of the following:</p> <ul style="list-style-type: none"> ▪ All accessories needed to use the equipment. ▪ Education on the proper use and care of the equipment. ▪ Routine servicing and all necessary repairs or replacements to make the unit functional.

2.21 MECHANICAL IN-EXSUFFLATION DEVICE [RE-NUMBERED 4/1/2025]

Definition	A mechanical in-exsufflation device is a portable electric device that utilizes a blower and a valve to alternately apply a positive and then a rapid negative pressure to an individual's airway to assist the person to cough more effectively.
Standards of Coverage	<p>A mechanical in-exsufflation device may be covered for up to four months if the following applies:</p> <ul style="list-style-type: none">▪ Diagnosis of respiratory failure due to neuromuscular deficits.▪ Beneficiary is unable to cough or clear secretions effectively due to reduced peak expiratory force.▪ Other treatment modalities have not been effective (e.g., inhalers, PEP mask therapy, or flutter devices). <p>For coverage beyond four months, continued use of a mechanical in-exsufflation device may be covered when there is continued effectiveness.</p>
Documentation	<p>Documentation must be less than 180 days old and include the following:</p> <ul style="list-style-type: none">▪ Diagnosis/medical condition related to the service requested.▪ Current treatment modalities and any others already tried.▪ Documentation of beneficiary's ability to use.▪ Plan of care from a pulmonologist substantiating need for this device is required under the CSHCS program.▪ For coverage beyond the first four months, medical statement substantiating continued effectiveness.
PA Requirements	PA is required for all requests.
Payment Rules	<p>A mechanical in-exsufflation device is a capped rental item and is inclusive of the following:</p> <ul style="list-style-type: none">▪ All accessories needed to use the unit (e.g., circuits, filters etc.).▪ Education on the proper use and care of the equipment.▪ Routine servicing and all necessary repairs or replacements to make the unit functional.

2.22 NEBULIZER [RE-NUMBERED 4/1/2025]

Definition	A nebulizer is a powered device that allows a medication to be changed from a liquid to a mist so it may be effectively inhaled into the lungs. Types of nebulizers include, but are not limited to, standard and ultrasonic.
-------------------	---

Medicaid Provider Manual

Standards of Coverage	<p>A standard nebulizer device may be covered if:</p> <ul style="list-style-type: none"> ▪ The beneficiary has a diagnosis related to an obstructive airway disease (e.g., asthma, bronchopulmonary dysplasia, chronic obstructive pulmonary disease [COPD], etc.). ▪ The physician has already considered use of a metered dose inhaler and it was insufficient to meet the needs of the beneficiary. <p>An ultrasonic nebulizer is covered when a standard nebulizer is ineffective.</p>
Documentation	<p>Documentation must be less than 90 days old and include the following:</p> <ul style="list-style-type: none"> ▪ Diagnosis/condition requiring use of the nebulizer. ▪ Medications prescribed. ▪ Frequency of administration. ▪ Medical reason economic alternatives are ineffective. ▪ For an ultrasonic nebulizer, pulmonary function testing done after use of a standard nebulizer and after use of an ultrasonic nebulizer showing the ultrasonic is more efficacious.
PA Requirements	<p>PA is not required if Standards of Coverage are met for standard nebulizer and associated accessories up to established quantity limits.</p> <p>PA is required for:</p> <ul style="list-style-type: none"> ▪ Ultrasonic nebulizer. ▪ Replacement of standard nebulizer within five years. ▪ When the Standards of Coverage are not met.
Payment Rules	<p>A nebulizer is considered either a capped rental or purchase item. Accessories are separately reimbursable.</p> <p>If the unit is billed as a capped rental, the rental payment would be inclusive of the following:</p> <ul style="list-style-type: none"> ▪ Education on the proper use and care of the equipment. ▪ Routine servicing and all necessary repairs or replacements to make the unit functional.

2.23 NEGATIVE PRESSURE WOUND THERAPY (PUMP AND ACCESSORIES) [RE-NUMBERED 4/1/2025]

Definition	<p>Negative pressure wound therapy (NPWT) utilizes a sub-atmospheric (negative) pressure technique to reduce edema, increase localized blood flow and granulation tissue formation, and remove exudates from the wound. The NPWT pump must be able to apply pressure intermittently or continuously in a range from 25 - 125 mm HG and accommodate multiple wounds.</p>
-------------------	---

Medicaid Provider Manual

Standards of Coverage	<p>Negative pressure wound therapy is covered for short-term therapy (7 to 14 days) if one of the following conditions applies and failure of several less expensive treatment modalities has occurred:</p> <ul style="list-style-type: none"> ▪ Stage III or IV pressure ulcer(s) - <ul style="list-style-type: none"> ➢ Beneficiary has been part of a comprehensive ulcer management program (e.g., appropriately turned and positioned, appropriately managed for either moisture or incontinence, received adequate nutritional support, etc.) for at least the last 30 days. ➢ Beneficiary has used either a Group 2 or 3 Support Surface for at least the last 30 days. ▪ Diabetic Ulcers - Beneficiary has been on a comprehensive diabetic management program. ▪ Venous stasis ulcers - <ul style="list-style-type: none"> ➢ Compression bandages have been applied consistently. ➢ Mobility and leg elevation have been encouraged. ▪ Dehisced incisions or traumatic wounds - Wound care clinical protocols have been ineffective.
Documentation	<p>All documentation, except wound measurements, must be less than 30 days old. Documentation of wound measurements must be less than seven days old and include the following:</p> <ul style="list-style-type: none"> ▪ Evaluation, care and wound measurements by a licensed medical professional. ▪ All previous dressings tried. ▪ Debridement of necrotic tissue, if applicable. ▪ Evaluation and provision of adequate nutritional status. ▪ Appropriate turning/repositioning schedule. ▪ Incontinence management, if applicable. ▪ Appropriate pressure reduction addressed if wound is pressure related.
Continued Coverage	<p>For continued coverage beyond the initial 7 to 14 days, documentation must be submitted detailing updated wound measurements and substantiate continued effectiveness.</p>
PA Requirements	<p>PA is required for all requests.</p> <p>HCPCS codes A6550, A7000 and E2402 require authorization via a telephone prior authorization process. (Refer to the Directory Appendix for MDHHS Program Review Division telephone prior authorization of specified DME and medical supplies information.)</p>
Payment Rules	<p>A negative pressure wound therapy pump is a rental only service. Payment for the pump is considered as a daily rental rate by reporting total number of days used as units.</p> <p>The canister and dressing set are considered purchase items and may be separately reimbursed from the pump code.</p>

2.24 ORTHOPEDIC FOOTWEAR [RE-NUMBERED 4/1/2025]

Definition	Orthopedic footwear may include, but are not limited to, orthopedic shoes, surgical boots, removable inserts, Thomas heels, and lifts.
Standards of Coverage	<p>Orthopedic shoes and inserts may be covered if any of the following applies:</p> <ul style="list-style-type: none"> Required to accommodate a leg length discrepancy of ¼ inch or greater or a size discrepancy between both feet of one size or greater. Required to accommodate needs related to a partial foot prosthesis, clubfoot, or plantar fascitis. Required to accommodate a brace (extra depth only are covered). <p>Surgical Boots or Shoes may be covered to facilitate healing following foot surgery, trauma or a fracture.</p>
Noncovered Items	<p>Shoes and inserts are noncovered for the conditions of:</p> <ul style="list-style-type: none"> Pes Planus or Talipes Planus (flat foot) Adductus metatarsus Calcaneus Valgus Hallux Valgus <p>Standard shoes are also noncovered.</p>
Documentation	<p>Documentation must be less than 60 days old and include the following:</p> <ul style="list-style-type: none"> Diagnosis/medical condition related to the service requested. Medical reasons for specific shoe type and/or modification. Functional need of the beneficiary. Reason for replacement, such as growth or medical change. <p>CSHCS requires a prescription from an appropriate pediatric subspecialist.</p>

PA Requirements	<p>PA is not required for the following items if the Standards of Coverage are met:</p> <ul style="list-style-type: none"> ▪ Surgical boots or shoes. ▪ Shoe modifications, such as lifts, heel wedges, or metatarsal bar wedges up to established quantity limits. ▪ Orthopedic shoe to accommodate a brace. ▪ Orthopedic shoes and inserts when the following medical conditions are present: <ul style="list-style-type: none"> ➢ Plantar Fascial Fibromatosis ➢ Unequal Leg Length (Acquired) ➢ Talipes Equinovarus (Clubfoot) ➢ Longitudinal Deficiency of Lower Limb, Not Elsewhere Classified ➢ Unilateral, without Mention of Complication (Partial Foot Amputation) ➢ Unilateral, Complicated (Partial Foot Amputation) ➢ Bilateral, without Mention of Complication (Partial Foot Amputation) ➢ Bilateral, Complicated (Partial Foot Amputation)
	<p>PA is required for:</p> <ul style="list-style-type: none"> ▪ All other medical conditions related to the need for orthopedic shoes and inserts not listed above. ▪ All orthopedic shoes and inserts if established quantity limits are exceeded. ▪ Medical need beyond the Standards of Care. ▪ Beneficiaries under the age of 21, replacement within six months. ▪ Beneficiaries over the age of 21, replacement within one year.
Payment Rules	These are purchase only items.

2.25 ORTHOTICS (CERVICAL) [RE-NUMBERED 4/1/2025]

Definition	Cervical orthotics include, but are not limited to, cervical collars and cranial helmets.
Standards of Coverage	<p>Cervical collars may be covered to facilitate healing and/or restrict mobility for the following indications:</p> <ul style="list-style-type: none"> ▪ Pre- and post-surgery ▪ Pre- and post-cervical fusion ▪ Cervical trauma ▪ Post fractures

Medicaid Provider Manual

	<p>Cervical helmets may be covered to prevent head injury for beneficiaries with medical conditions affecting balance that predisposes them to fall.</p> <p>For the medical condition of plagiocephaly, a custom fabricated cranial remolding orthosis is covered and must include the following:</p> <ul style="list-style-type: none"> ▪ Proper measurements including topography, casting, etc. ▪ The use of a FDA registered helmet. ▪ All necessary follow-up visits, including fitting and adjustments, for 18 months after placement.
Documentation	<p>Documentation must be less than 60 days old and include the following:</p> <ul style="list-style-type: none"> ▪ Diagnosis/medical condition related to the service requested. ▪ Medical reasons for appliance requested. ▪ Functional needs of the beneficiary. ▪ Reason for replacement, such as growth or medical change. ▪ Prescription from an appropriate pediatric subspecialist is required under the CSHCS program. <p>For repairs, a copy of the physician's prescription at the time of original placement and itemization of materials used to repair appliance or rationale for related labor costs must be documented.</p>
PA Requirements	<p>PA is not required when the Standards of Coverage are met for:</p> <ul style="list-style-type: none"> ▪ Cervical collars. ▪ Nonmolded cranial helmets. ▪ Molded cranial helmets for a beneficiary under the age of one year with diagnosis of plagiocephaly when prescribed by an appropriate pediatric subspecialist. ▪ Repairs as follows: <ul style="list-style-type: none"> ➤ The total repair cost equals one hour of labor or less ➤ The cost of minor parts equals \$50 or less <p>PA is required for:</p> <ul style="list-style-type: none"> ▪ Custom molded cranial helmets for conditions other than plagiocephaly. ▪ Replacement of a cranial nonmolded helmet or cervical collar within one year. ▪ Repair costs exceed the maximum limits as stated above.
Payment Rules	<p>These are covered as purchase only items.</p>

2.26 ORTHOTICS (LOWER EXTREMITY) [RE-NUMBERED 4/1/2025]

Definition	Lower extremity orthotics includes, but is not limited to, hip, below knee, above knee, knee, ankle, and foot orthoses, etc.
Standards of Coverage	<p>Lower extremity orthotics (including night splints), regardless of diagnosis, are covered for the following manifestations:</p> <ul style="list-style-type: none"> ▪ To promote healing and/or proper alignment/positioning following injury, procedure (e.g. serial casting), or surgery of the lower extremity. ▪ To support lower extremities due to muscle weakness or abnormal muscle tone (e.g. high/low fluctuating tone) of permanent or long-standing duration (six months or longer). ▪ To support, correct or improve: <ul style="list-style-type: none"> ➢ Biomechanical alignment (e.g. pronation, supination, varus or valgus). ➢ Static or dynamic contractures. ➢ Congenital or acquired deformities of the lower extremities.
Documentation	<p>Documentation must be less than 60 days old and include the following:</p> <ul style="list-style-type: none"> ▪ Diagnosis/medical condition related to the service requested. ▪ Medical reasons for appliance requested including current functional level. ▪ A physical therapy evaluation may be required on a case-by-case basis when PA is required. ▪ Reason for replacement, such as growth or medical change. ▪ Prescription from an appropriate pediatric subspecialist is required under the CSHCS program. ▪ Medical justification for each additional component required. <p>For repairs, a new prescription is not required if the original orthotic was covered by MDHHS. A copy of the original prescription for the orthotic and itemization of materials used to repair appliance and rationale for related labor costs must be documented.</p>
PA Requirements	<p>PA is not required for the following if the Standards of Coverage are met:</p> <ul style="list-style-type: none"> ▪ Fracture orthosis for fractures. ▪ Hip orthosis for Legg Perthes. ▪ Prefabricated knee appliances. ▪ Custom-fabricated knee orthosis for Old Disruption of Anterior Cruciate Ligament. ▪ Prefabricated ankle foot orthosis (AFO) and knee ankle foot orthosis (KAFO). ▪ Custom-fabricated plastic AFOs if up to four additional components with the base code as indicated in the Medicaid Code and Rate Reference tool (add-ons include double action joints, t-strap or malleolar pad, varus/valgus modification and soft interface).

Medicaid Provider Manual

	<ul style="list-style-type: none">▪ Custom-fabricated metal AFOs if up to six additional components with the base code as indicated in the Medicaid Code and Rate Reference tool (add-ons include double action joints, noncorrosive finish, t-strap or malleolar pad, extended steel shank, long tongue stirrup and growth extensions). Shoes are not considered an add-on and would be considered in addition to the other items.▪ Custom-fabricated plastic KAFOs if up to eight additional components with the base code as indicated in the Medicaid Code and Rate Reference tool (add-ons include double action joints, t-strap or malleolus pad, drop lock, varus/valgus modification, noncorrosive finish, knee cap, soft interface and growth extensions).▪ Custom-fabricated metal KAFOs if up to eight additional components with the base code as indicated in the Medicaid Code and Rate Reference tool (add-ons include double action joints, t-strap or malleolus pad, drop lock, growth extensions, noncorrosive finish, knee cap, extended steel shank and long tongue stirrup). Shoes are not considered an add-on and would be considered in addition the other items. <p>If other add-on items not listed above or a greater number of components are medically necessary, PA is required for the entire appliance. Additional components are not covered simply to add reimbursement value to the appliance.</p> <p>For repairs, up to two episodes per year, as follows:</p> <ul style="list-style-type: none">▪ The total repair cost equals one hour of labor or less.▪ The cost of minor parts equals \$50 or less. <p>PA is required for:</p> <ul style="list-style-type: none">▪ Custom fabricated knee orthoses for all other diagnoses/medical conditions.▪ Hip Knee Ankle Foot Orthosis (HKAFO) for all other diagnoses/medical conditions.▪ Fracture orthosis for all other diagnoses/medical conditions.▪ Other base codes or additional codes indicated as requiring PA in the Medicaid Code and Rate Reference tool.▪ Repair costs exceed the maximum limits as stated above.▪ Replacement within six months for a beneficiary under the age of 21, from the original service date.▪ Replacement within two years for a beneficiary over the age of 21, from the original service date.
Payment Rules	These are covered as purchase only items.

2.27 ORTHOTICS (SPINAL) [RE-NUMBERED 4/1/2025]

Definition	Spinal orthotics include, but are not limited to, cervical, thoracic, lumbar, sacral, spinal, thoracic mid belt lumbar sacral, and sacroiliac orthotics.
Standards of Coverage	<p>Spinal orthotics are covered to:</p> <ul style="list-style-type: none"> ▪ Facilitate healing following a spinal injury. ▪ Arrest or correct the curvature of the spine or spondylolisthesis greater than grade 1. ▪ Support weak spinal muscles due to atrophy and/or a deformed spine. ▪ Facilitate healing following spinal surgery.
Documentation	<p>Documentation must be less than 60 days old and include the following:</p> <ul style="list-style-type: none"> ▪ Diagnosis/medical condition related to the service requested. ▪ Medical reasons for appliance. ▪ Functional needs of the beneficiary. ▪ Reason for replacement, such as growth or medical change. ▪ Prescription from an appropriate pediatric subspecialist is required under the CSHCS program. <p>For repairs, a new prescription is not required if the original orthotic was covered by MDHHS. A copy of the original prescription for the orthotic, itemization of materials used to repair the appliance, and rationale for related labor costs must be documented.</p>
PA Requirements	<p>PA is not required for the following if the Standards of Coverage are met:</p> <ul style="list-style-type: none"> ▪ Prefabricated thoracic-lumbar-sacral orthosis (TLSO) ▪ Prefabricated lumbar sacral orthosis (LSO) ▪ Prefabricated sacroiliac supports ▪ Cervical-Thoracic-Lumbar -Sacral Orthosis (CTLSO) for the treatment of curvature of the spine

Medicaid Provider Manual

	<ul style="list-style-type: none"> Custom-fabricated TLSOs, LSOs, and sacroiliac supports for the base code and up to three additional components indicated in the Medicaid Code and Rate Reference tool and with one of the following diagnoses: <ul style="list-style-type: none"> Neurofibromatosis, Type 1 Scoliosis (and Kyphoscoliosis), Idiopathic Progressive Infantile Idiopathic Scoliosis Curvature of Spine (Scoliosis) ** Certain Congenital Musculoskeletal Deformities of the Spine Spondylolisthesis <p>**Curvature of the spine (scoliosis) must be listed in conjunction with the other conditions of Charcot-Marie-Tooth Disease or Neurofibromatosis to not require PA.</p> For repairs, up to two episodes per year, as follows: <ul style="list-style-type: none"> The total repair cost equals one hour of labor or less. The cost of minor parts equals \$50 or less.
	<p>PA is required for:</p> <ul style="list-style-type: none"> Diagnoses/medical conditions not removed from PA. Repair costs exceed the maximum limits as stated above. Replacement within one year, for a beneficiary under the age of 21, from the original service date. Replacement within two years, for a beneficiary over the age of 21, from the original service date.
Payment Rules	These are covered as purchase only items.

2.28 ORTHOTICS (UPPER EXTREMITY) [RE-NUMBERED 4/1/2025]

Definition	Upper extremity orthotics include, but are not limited to, shoulder, elbow, wrist, and hand orthotics.
Standards of Coverage	<p>Upper extremity orthoses are covered:</p> <ul style="list-style-type: none"> Following an acute cerebral vascular accident. To support weak muscles due to a neuromuscular condition. Facilitate healing immediately following surgery. Improve function due to a congenital paralytic syndrome (e.g., Muscular Dystrophy).

Medicaid Provider Manual

Documentation	<p>Documentation must be less than 60 days old and include the following:</p> <ul style="list-style-type: none"> ▪ Diagnosis/medical condition related to the service requested. ▪ Medical reasons for appliance requested. ▪ Functional needs of the beneficiary. ▪ Reason for replacement such as growth or medical change. ▪ Prescription from an appropriate pediatric subspecialist is required under the CSHCS program. <p>For repairs, a new prescription is not required if the original orthotic was covered by MDHHS. A copy of the original prescription for the orthotic and itemization of materials used to repair appliance and rationale for related labor costs must be documented.</p>
PA Requirements	<p>PA is not required for the following if the Standards of Coverage are met:</p> <ul style="list-style-type: none"> ▪ Prefabricated shoulder orthosis (SO), elbow orthosis (EO) and shoulder-elbow-wrist-hand orthosis (SEWHO). ▪ Custom fabricated SOs, EOs and SEWHOs if the base code and up to two additional components are needed. ▪ Prefabricated upper extremity fracture orthosis if the treatment is related to a fracture related condition. ▪ Custom fabricated upper extremity fracture orthosis if the base code and up to two additional components are needed. ▪ Prefabricated wrist-hand-finger orthosis (WHFO) and hand-finger orthosis (HFO). ▪ For repairs as follows: <ul style="list-style-type: none"> ➢ The total repair cost equals one hour of labor or less. ➢ The cost of minor parts equals \$50 or less. <p>PA is required for:</p> <ul style="list-style-type: none"> ▪ Custom fabricated WHFOs and HFOs. ▪ Repair costs that exceed the maximum limits as stated above. ▪ Replacement within one year, for a beneficiary under the age of 21, from the original service date. <p>Replacement within two years, for a beneficiary over the age of 21, from the original service date.</p>
Payment Rules	These are covered as purchase only items.

2.29 OSTEOGENESIS STIMULATORS [RE-NUMBERED 4/1/2025]

Definition	<p>An Osteogenesis Stimulator is a device that provides electrical or ultrasonic signal stimulation to augment bone repair. Osteogenesis stimulators include:</p> <ul style="list-style-type: none"> ▪ Noninvasive electrical stimulator characterized by an external power source which is attached to a coil or electrodes placed on the skin or on a cast or brace over a fracture or fusion site; or
-------------------	---

Medicaid Provider Manual

	<ul style="list-style-type: none"> Noninvasive electrical multi-level spinal stimulator which involves three or more vertebrae (e.g., L3-L5, L4-S1, etc.); or Noninvasive low intensity ultrasound stimulator which produces pulsed ultrasonic signals rather than electricity to stimulate bone repair by applying the signal to the skin surface at the fracture site. <p>A long bone is limited to the clavicle, humerus, radius, ulna, femur, tibia, fibula, metacarpal, or metatarsal.</p> <p>The FDA classifies osteogenesis stimulators as Class III devices.</p>
Standards of Coverage	<p>A noninvasive, nonspinal electrical or low intensity ultrasonic osteogenesis stimulator may be covered when other treatment methods have been ineffective and when one of the following applies:</p> <ul style="list-style-type: none"> There is a nonunion of a long bone fracture with radiographic evidence which indicates that the fracture healing has ceased for three or more months prior to starting treatment with the osteogenesis stimulator. There is a nonunion of a nondisplaced scaphoid fracture. If there is failed fusion of a joint, other than in the spine, where a minimum of nine months has elapsed since the surgery. Congenital Pseudoarthrosis not due to lack of skeletal maturity. The fracture gap is ≤ 1 cm. A nonunion of a long bone fracture as described by the appropriate ICD code. <p>Treatment using the above stimulators may not be provided concurrently.</p> <p>A spinal electrical osteogenesis stimulator may be covered when other treatment methods have been ineffective and when one of the following applies:</p> <ul style="list-style-type: none"> There is a failed spinal fusion where a minimum of nine months has elapsed since the last surgery. Following multi-level (three or more vertebrae) spinal fusion surgery without instrumentation. Clinical indication in cervical spine fusions with instrumentation (reviewed on case by case basis). Following spinal fusion surgery where there is a history of a previously failed spinal fusion at the same level(s). How long ago was the failure? May also be indicated as an adjunct to high-risk fusion; cases that meet one or more of the following criteria: <ul style="list-style-type: none"> Smoking (cessation attempts) Diabetes Metabolic disease where bone healing is likely to be compromised Grade III or greater spondylolisthesis <p>Treatment using the above stimulator may not be provided concurrently with nonspinal osteogenesis stimulators.</p>

Medicaid Provider Manual

Covered Conditions	<p>The current International Classification of Diseases (ICD) code related to the type and location of the fracture must be reported by the physician on the prescription/order and in the medical documentation.</p> <table border="1" data-bbox="508 428 1425 961"> <tr> <td data-bbox="508 428 776 730"> Long Bone Fractures </td><td data-bbox="776 428 1425 730"> <ul style="list-style-type: none"> • Clavicle • Humerus • Radius* and ulna • Femur • Fracture of other and unspecified parts of femur • Tibia* and fibula • Metacarpal bones (hands) • One or more tarsal and metatarsal* bones </td></tr> <tr> <td data-bbox="508 730 776 961"> Other Fractures </td><td data-bbox="776 730 1425 961"> <ul style="list-style-type: none"> • Ankle • Closed navicular (scaphoid*) of wrist • Malunion of fracture • Nonunion of fracture • Acquired spondylolisthesis • Congenital spondylolisthesis </td></tr> </table> <p>*Coverage of fresh fractures is limited to tibia, radius, scaphoid, and fifth metatarsal.</p>	Long Bone Fractures	<ul style="list-style-type: none"> • Clavicle • Humerus • Radius* and ulna • Femur • Fracture of other and unspecified parts of femur • Tibia* and fibula • Metacarpal bones (hands) • One or more tarsal and metatarsal* bones 	Other Fractures	<ul style="list-style-type: none"> • Ankle • Closed navicular (scaphoid*) of wrist • Malunion of fracture • Nonunion of fracture • Acquired spondylolisthesis • Congenital spondylolisthesis
Long Bone Fractures	<ul style="list-style-type: none"> • Clavicle • Humerus • Radius* and ulna • Femur • Fracture of other and unspecified parts of femur • Tibia* and fibula • Metacarpal bones (hands) • One or more tarsal and metatarsal* bones 				
Other Fractures	<ul style="list-style-type: none"> • Ankle • Closed navicular (scaphoid*) of wrist • Malunion of fracture • Nonunion of fracture • Acquired spondylolisthesis • Congenital spondylolisthesis 				
Non-Covered Conditions	<p>Medicaid does not cover the use of a bone growth stimulator for any of the following indications as it is considered experimental, investigational, or unproven (not all inclusive):</p> <ul style="list-style-type: none"> ▪ Fresh fractures (other than when using ultrasound bone stimulation for the tibia or radius) ▪ Toe fractures ▪ Sesamoid fractures ▪ Avulsion fractures ▪ Osteochondral lesions ▪ Stress fractures ▪ Displaced fractures with malalignment ▪ Synovial pseudoarthrosis ▪ Fractures related to malignancy ▪ The bone gap is either > 1 cm or > one-half the diameter of the bone ▪ Primary surgeries with current internal fixation techniques (i.e., pedical screw fixation and variants) ▪ Lack of skeletal maturity (refer to congenital pseudoarthrosis) 				
Documentation	<p>Documentation must be less than 90 days old and include all of the following:</p> <ul style="list-style-type: none"> ▪ Diagnosis/medical condition related to the need for the device. ▪ Alternative treatment methods tried and results. 				

Medicaid Provider Manual

	<ul style="list-style-type: none"> For a diagnosis of fracture nonunion, reports of sequential x-ray results for a period of no less than 90 days and office records, including previous treatments and operative procedures (if any). For a spinal fusion procedure, pertinent office and/or hospital records as well as a legible, complete description of indications for electrical stimulation. A copy of the operative report(s) may be required. Other modalities still to be used (include type and location).
PA Requirements	<p>PA is required and approved for three months at a time for up to a maximum of ten months.</p> <p>For consideration of rental beyond the initial three months, a new MSA-1653-B must be submitted, along with physician documentation establishing medical reason(s) for continued need.</p>
Payment Rules	<p>Osteogenesis stimulators are considered a capped rental item and are inclusive of the following:</p> <ul style="list-style-type: none"> All accessories needed to use the unit (e.g., electrodes, wires, cables, coupling gel, etc.). Education on the proper use and care of the equipment. Routine servicing and all necessary repairs or replacements to make the unit functional based on manufacturer warranty. <p><u>After purchase:</u></p> <p>Accessories needed to use the device, or the replacement of the stimulator, require prior authorization. The manufacturer's warranty must be exhausted prior to requesting a replacement osteogenesis stimulator.</p>

2.30 OSTOMY SUPPLIES [RE-NUMBERED 4/1/2025]

Definition	Ostomy supplies are those products necessary to maintain and care for a temporary or permanent stoma and include, but are not limited to, belts, barriers, adhesive remover, filters and pouches.
Standards of Coverage	<p>Standard wear ostomy products are changed daily and are covered for specified quantities when the beneficiary has an ostomy.</p> <p>Extended wear ostomy products may be covered when change is not required on a daily basis. The quantities must match manufacturers' recommendations for use.</p>
Documentation	<p>Documentation must be less than 90 days old and include the following:</p> <ul style="list-style-type: none"> Diagnosis/medical condition. Appliance required. Quantity of item. Frequency of change. Type and location of ostomy. Condition of the skin surface surrounding the stoma.

Medicaid Provider Manual

PA Requirements	PA is not required for ostomy supplies up to established quantity limits.
	PA is required for quantities above established program limits.
Payment Rules	These are purchase only items.

2.31 OXYGEN, OXYGEN EQUIPMENT AND ACCESSORIES [RE-NUMBERED 4/1/2025]

Definition	Oxygen therapy includes, but is not limited to, stationary compressed systems, portable gaseous systems, stationary liquid systems, portable liquid systems, and concentrators.
Standards of Coverage	<p>Stationary oxygen equipment and accessories may be covered in the home setting for either short-term (less than six months) or long-term (six months or greater) use.</p> <p>For beneficiaries under age 21, oxygen therapy may be covered when oxygen is required during a variety of activities (e.g., sleeping, feeding, resting) and there is an oxygen saturation rate of 93 percent or below or PO2 level of 65 mm HG or below.</p>
	<p>For beneficiaries age 21 and older, when the beneficiary requires oxygen for continuous use (test taken while the beneficiary is at rest, breathing room air), nocturnal use (test taken while sleeping), or exercise use (test taken during exercise) and the oxygen saturation rate is 88 percent or below or the PO2 level is 55 mm HG or below.</p> <p>Once the Standards of Coverage are met, the type of equipment covered is determined by the following:</p> <ul style="list-style-type: none"> Medical diagnosis and/or condition related to the need for oxygen. Activity level. Amount of liter flow needed. <p>The three main types of oxygen systems are:</p> <ul style="list-style-type: none"> Compressed Oxygen System – Used primarily for intermittent use or low liter flow requirements (less than one liter per minute). A portable unit may be authorized if activities cannot be accomplished by the use of a stationary unit alone. Concentrators - Used for higher liter flows, usually one liter or more. A portable compressed oxygen unit may be authorized if activities cannot be accomplished by the use of a concentrator alone. Liquid Oxygen System - Used for high liter flow requirements. Liter flow must be ordered at more than four liters per minute. In cases where liquid oxygen is inappropriate, a compressed gas or concentrator system could be covered if criteria for that unit are met.

Medicaid Provider Manual

Documentation	<p>Documentation must be less than 30 days old and include the following:</p> <ul style="list-style-type: none">▪ Diagnosis/medical condition appropriate for the need of oxygen.▪ Required liter flow (e.g., two liters per minute). An order for "Oxygen PRN" or "Oxygen as Needed" does not meet this requirement.▪ Hours used per day (e.g., eight hours a day). For intermittent use (less than eight hours per day), indicate activity or time of day. An order for "Oxygen PRN" or "Oxygen as Needed" does not meet this requirement.▪ Duration of need (e.g., three months, six months or lifetime).▪ Delivery system to be used (e.g., concentrator, compressed gas, liquid).▪ Current PO₂ or oxygen saturation level while on room air.▪ For liquid oxygen, total number of pounds required per month.▪ A prescription from a pediatric pulmonologist, a neonatologist, a pediatrician intensivist, and/or pediatric cardiologist is required under the CSHCS program. <p>Equipment Maintenance - Verification of the proper use, care and function (e.g., verification that the equipment delivers the proper percentage of liter flow) must be performed according to the manufacturer's requirements.</p> <p>The following information must also be maintained in the patient's file:</p> <ul style="list-style-type: none">▪ The name of the manufacturer.▪ The manufacturer's requirements for verification of proper use, care and function of the equipment.▪ The date that each equipment verification was performed. <p>Six-Month Recertification - After the initial prescription for home oxygen therapy, a six-month follow-up certificate of medical necessity (CMN) must be obtained. At this time, a new pO₂ or oxygen saturation test with the beneficiary on room air must be obtained and indicated on the CMN, along with the date of the test, to substantiate continued need for treatment.</p> <p>Annual Recertification - Following the first year of oxygen treatment, a new CMN and prescription are required annually. An updated lab test is not required unless there is a change in the level of oxygen usage or type of delivery system required. The most recent pO₂ or oxygen saturation level and the date of the test must be documented on each annual CMN.</p>
----------------------	--

Medicaid Provider Manual

<p>PA Requirements</p>	<p>PA is not required for gaseous stationary, concentrators, and portable oxygen systems if the Standards of Coverage are met and the beneficiary has one of the following diagnoses descriptions:</p> <ul style="list-style-type: none"> ▪ Bronchiectasis ▪ Bronchopulmonary Disease ▪ Chronic Airway Obstruction ▪ Chronic Bronchitis ▪ Chronic Pulmonary Heart Disease ▪ Coccidioidomycosis ▪ Congenital Central Alveolar Hypoventilation Syndrome ▪ Congenital Heart Disease ▪ Heart Failure ▪ Idiopathic Sleep Related Nonobstructive Alveolar Hypoventilation ▪ Malignant Neoplasm of Trachea, Bronchus, and Lung ▪ Muscular Dystrophies and other Myopathies ▪ Myoneural Disorders ▪ Other Alveolar and Parietoalveolar Pneumonopathy ▪ Other and Unspecified Disorders of Metabolism (Cystic Fibrosis) ▪ Other Diseases of Blood and Blood -Forming Organs (Secondary Polycythemia, Familial Polycythemia) ▪ Other Emphysema ▪ Pneumoconioses and other Lung Diseases due to External Agents ▪ Postinflammatory Pulmonary Fibrosis ▪ Primary Central Sleep Apnea ▪ Pulmonary Eosinophilia ▪ Pulmonary Tuberculosis ▪ Secondary Malignant Neoplasm of Respiratory and Digestive Systems ▪ Sleep Related Hypoventilation Hypoxemia in Conditions Classified Elsewhere ▪ Tracheomalacia ▪ PA is not required for gaseous stationary or concentrators for the condition of obstructive sleep apnea (adult) (pediatric). <p>PA is required for:</p> <ul style="list-style-type: none"> ▪ Oxygen required for short-term use only ▪ Liquid oxygen systems ▪ Liquid oxygen contents only ▪ Medical need for long-term oxygen use does not meet Standards of Coverage
-------------------------------	---

Medicaid Provider Manual

Payment Rules	<p>All oxygen equipment is a rental only and is inclusive of the following:</p> <ul style="list-style-type: none"> ▪ All necessary accessories (e.g., regulator, tubing, mask or cannula, contents base, etc.). Stationary gaseous or liquid oxygen contents are separately payable only when the patient owns the equipment and the coverage criteria has been met. ▪ The rental payment includes routine servicing and all necessary repairs or replacements to make the rented DME functional. The equipment should be checked according to manufacturer's specifications.
	<p>Combination of Equipment Covered:</p> <ul style="list-style-type: none"> ▪ Only one delivery method is covered per month (i.e., gaseous, gaseous/concentrator or liquid). ▪ A portable compressed gaseous system or liquid system will only be provided in addition to an existing stationary system, unless oxygen is needed for ambulation only. ▪ A backup cylinder is considered part of the inclusive reimbursement for the oxygen system.
	<p>Nursing Facility Residents:</p> <ul style="list-style-type: none"> ▪ For a nursing facility resident, the DME provider may bill for oxygen gas, equipment, and supplies only when used for prolonged daily use. Intermittent or infrequent use of these items is included in the nursing facility per-diem rate. Based on this site of service, the monthly rental payment issued to the DME provider for the oxygen concentrator will be reduced compared to the payment for equipment used in the home. ▪ For a County Medical Care Facility or Hospital Long Term Care Unit, the DME provider cannot bill for oxygen gas, equipment and supplies for any resident. <p>NOTE: The rental of a concentrator is billable by a Medical Supplier.</p> <p>Frequent or prolonged use is defined as:</p> <ul style="list-style-type: none"> ▪ Long-term daily basis. ▪ At least eight hours duration or more per day.

2.32 PARENTERAL NUTRITION [RE-NUMBERED 4/1/2025]

Definition	Parenteral nutrition is the provision of nutrition intravenously.
Standards of Coverage	<p>Parenteral nutrition may be covered when:</p> <ul style="list-style-type: none"> ▪ There is an impairment or disease of the gastrointestinal tract that impairs the ability of nutrients to be digested and absorbed. ▪ Post-surgical nonabsorption from a recent massive small bowel resection leaving less than five feet of small bowel remaining beyond the ligament of Treitz or short bowel syndrome with severity that involves a net gastrointestinal fluid and electrolyte malabsorption in which the enteral losses exceed 50 percent of oral/enteral intake.

Medicaid Provider Manual

Documentation	<p>Documentation must be less than 30 days old and include the following:</p> <ul style="list-style-type: none">▪ Specific diagnosis related to the beneficiary's inability to take or eat regular food.▪ Amount of nutrients needed per day.▪ Duration of treatment.▪ Current height, weight, and recent weight loss.▪ Identification of levels of individual nutrient(s) that are required in increased or restricted amounts.										
PA Requirements	<p>PA is not required for parenteral equipment, supplies, and solutions when the Standards of Coverage have been met and one of the following diagnoses exists:</p> <ul style="list-style-type: none">▪ Noninfectious Enteritis of the Small Intestine▪ Noninfectious Enteritis of the Large Intestine▪ Unspecified Intestinal Obstruction▪ Fistula of Intestine, Excluding Rectum and Anus▪ Acute Pancreatitis▪ Chronic Pancreatitis▪ Cyst and Pseudocys of Pancreas▪ Other and Unspecified Post-Surgical NonAbsorption <p>When PA is required, the following HCPCS codes are authorized via a telephone authorization process:</p> <table><tr><td>B4185</td><td>B4189</td><td>B4193</td><td>B4197</td><td>B4199</td></tr><tr><td>B4220</td><td>B4224</td><td>B9004</td><td>B9006</td><td>B9999</td></tr></table> <p>Refer to the Directory Appendix for MDHHS Program Review Division telephone prior authorization of specified DME and medical supplies information.</p>	B4185	B4189	B4193	B4197	B4199	B4220	B4224	B9004	B9006	B9999
B4185	B4189	B4193	B4197	B4199							
B4220	B4224	B9004	B9006	B9999							
Payment Rules	<p>Parenteral nutrition must be billed as a daily rate by reporting total number of days used as units. The parenteral lipids, the parenteral pre-mix solution, the infusion pump, supply kit, and the administration kit may be billed in combination with each other. If reporting parenteral lipids without one of the parenteral pre-mix solutions, only the pump code is separately reimbursable. The administration kit includes all items necessary for the administration of the solution (e.g., the extension sets, pump cassettes, clamps, containers, and connectors). The supply kit includes all necessary medical supplies such as dressings, tape, alcohol wipes, filters, syringes, needles, and injection caps.</p> <p>For Medicaid beneficiaries residing in a nursing facility, the parenteral solution, equipment and supplies may be billed by the medical supplier.</p>										

2.33 PEAK FLOW METER [RE-NUMBERED 4/1/2025]

Definition	A peak flow meter is a small device used to measure the airflow out of the lungs.
Standards of Coverage	A peak flow meter may be covered if the beneficiary has a diagnosis related to an obstructive airway disease (e.g., asthma, COPD).

Medicaid Provider Manual

Documentation	Documentation must be less than 90 days old and include the following: <ul style="list-style-type: none"> ▪ Diagnosis/condition related to the need for the meter. ▪ Frequency of use.
PA Requirements	PA is not required if the Standards of Coverage have been met. PA is required when: <ul style="list-style-type: none"> ▪ Medical need is beyond Standards of Coverage. ▪ Replacement is required within one year.
Payment Rules	This is a purchase only item.

2.34 PHOTOTHERAPY (BILIRUBIN) LIGHT WITH PHOTOMETER [Re-NUMBERED 4/1/2025]

Definition	A phototherapy light with photometer is an ultraviolet light source used to reduce bilirubin levels.
Standards of Coverage	A phototherapy light may be covered if: <ul style="list-style-type: none"> ▪ The beneficiary is being treated for the diagnosis of neonatal jaundice. ▪ The treatment is limited to seven consecutive days and occurs during the first 30 days of life.
Documentation	Documentation must be less than 24 hours old and include: <ul style="list-style-type: none"> ▪ Diagnosis/condition related to the need for the device. ▪ Duration of need.
PA Requirements	PA is not required if the Standards of Coverage are met and there is one of the following diagnoses: <ul style="list-style-type: none"> ▪ Optic Papillitis ▪ Hemolytic Disease due to Other and Unspecified Isoimmunization ▪ Perinatal Jaundice from Other Excessive Hemolysis ▪ Neonatal Jaundice Associated with Pre-term Delivery ▪ Neonatal Jaundice due to Delayed Conjugation from Other Cases ▪ Unspecified Fetal and Neonatal Jaundice ▪ Kernicterus not due to Isoimmunization PA is required for: <ul style="list-style-type: none"> ▪ Diagnosis/medical condition other than those listed above. ▪ Medical need is beyond the Standards of Coverage.

Medicaid Provider Manual

Payment Rules	<p>A phototherapy light with photometer is a rental only item, and is inclusive of the following:</p> <ul style="list-style-type: none">▪ All accessories needed to use the unit (e.g., ultraviolet light source, a fiberoptic system with fiberoptic blanket if needed, etc.).▪ Education on the proper use and care of the equipment.▪ Routine servicing and all necessary repairs or replacements to make the unit functional.
----------------------	--

2.35 PNEUMATIC/NON-PNEUMATIC COMPRESSORS AND APPLIANCES (LYMPHEDEMA PUMP) [RE-NUMBERED 4/1/2025]

Definition	<p>Pneumatic/non-pneumatic compressors (lymphedema pumps) and appliances (sleeve/garment) apply pressure to a limb to remove excess fluid from the limb. The compressor may be pneumatic (uses air to compress) or non-pneumatic (other compression mechanism used such as nickel-titanium shape-memory alloy). The compressor and appliance may be either non-segmented (single chamber) or segmented (multiple chambers) with or without calibrated gradient pressure. An integral part of treatment, along with the pneumatic/non-pneumatic compression device, is leg or arm elevation and the use of custom fabricated gradient pressure stockings or sleeves, compression bandaging, etc.</p>
Standards of Coverage	<p>A pneumatic/non-pneumatic compression device may be covered only as a treatment of last resort (e.g., other less intensive treatment has not been effective).</p> <p>A nonsegmented device or segmented device without manual control of the pressure in each chamber may be covered for up to 90 days for any of the following:</p> <ul style="list-style-type: none">▪ Radical surgical procedures with removal of regional groups of lymph nodes (e.g., radical mastectomy)▪ Post-radiation fibrosis▪ Metastasis of malignant tumors to regional lymph nodes with lymphatic obstruction▪ Scarring of lymphatic channels if:<ul style="list-style-type: none">➢ There is significant ulceration of the lower extremity(ies); and➢ The beneficiary has received repeated, standard treatments from a physician using such methods as a compression bandage system or its equivalent.▪ Treatment of chronic venous insufficiency with edema and/or venous ulcers▪ Milroy's Disease▪ Congenital anomalies▪ Refractory lymphedema related to venous insufficiency complicated by recurrent cellulitis (scarring of the lymphatic channels) <p>A segmented device with calibrated gradient pressure may be covered when there is a painful focal lesion (e.g., significant sensitive skin scar or contracture) of the extremity that requires a reduction in pressure over the affected segment.</p>

Medicaid Provider Manual

Documentation	<p>The documentation must be less than 30 days old and include the following:</p> <ul style="list-style-type: none"> ▪ Diagnosis/condition appropriate for the equipment requested ▪ Location and size of the painful focal lesion(s) which necessitates the use of the device, if applicable ▪ Length of time each lesion has been continuously present ▪ Plan of treatment, including the frequency and duration of each treatment episode, and anticipated prognosis ▪ Type of unit to be used, the necessary pressure in each chamber, and why the specific features of the equipment are needed ▪ Description of other treatments that have been tried
Continued Use After the Initial 90 Days	<p>For continued coverage beyond the initial 90 days, the following additional information must be provided:</p> <ul style="list-style-type: none"> ▪ Bilateral limb measurements before and after the approved treatment ▪ Results of the treatment provided
PA Requirements	<p>PA is required for all requests. Coverage will only be provided for one type of compressor (pneumatic or non-pneumatic).</p>
Payment Rules	<p>A unit may be a capped rental or purchase item. If unit is billed as a capped rental, the rental payment would be inclusive of the following:</p> <ul style="list-style-type: none"> ▪ All accessories needed to use the equipment ▪ Education on the proper use and care of the equipment ▪ Routine servicing and all necessary repairs or replacements to make the unit functional <p>For purchased items, the manufacturer's warranty must be exhausted prior to requesting a repair or replacement part.</p>

2.36 PRESSURE GRADIENT PRODUCTS [RE-NUMBERED 4/1/2025]

Definition	<p>Pressure gradient products include, but are not limited to, sleeves, wrist gauntlets, vests, legs, etc.</p>
Standards of Coverage	<p>Pressure gradient products may be covered to reduce edema, promote circulation, reduce scarring or reduce retention of fluid in the extremities due to the following conditions:</p> <ul style="list-style-type: none"> ▪ Lymphedema ▪ Chronic venous insufficiency ▪ Thrombophlebitis ▪ Burns

Medicaid Provider Manual

	<p>Up to two garments may be covered when the items must be worn for 24 hours.</p> <p>Gradient compression stockings are custom-fabricated or custom-measured support and are covered when ordered by a physician to treat one of the above conditions and deliver at least 18 mm HG or greater compression. For custom burn garments, refer to HCPCS codes A6501- A6512.</p> <p>Surgical stockings, such as heavy elastic or anti-embolism stockings, are covered when ordered by a physician as a short-term treatment (up to three months) after a surgical event (e.g., prevent blood clots for non-ambulatory individuals after hospital discharge). If required for treatment during an inpatient hospital stay or outpatient hospital visit, the service will not be reimbursed to the medical supplier.</p>
Documentation	<p>Documentation must be less than 60 days old and include the following:</p> <ul style="list-style-type: none"> ▪ Diagnosis of condition being treated ▪ Item to be dispensed ▪ Number of hours to be worn ▪ Location and number of extremities involved
PA Requirements	<p>PA is not required for ready-made pressure gradient products up to established quantity limits.</p> <p>PA is required for:</p> <ul style="list-style-type: none"> ▪ All custom-measured products and special features such as a zipper, enclosed toe, open pubis, etc. ▪ Replacement within three months
Payment Rules	All pressure gradient products are considered a purchase only item.

2.37 PROSTHESES [TITLE REVISED 7/1/2025]

2.37.A. LOWER EXTREMITY PROSTHESES [RE-NUMBERED 4/1/2025; TITLE REVISED & RE-NUMBERED 7/1/2025]

Definition	Lower extremity prosthetics include, but are not limited to, partial foot, below knee, above knee, hip and hemi-pelvectomy prostheses.
Standards of Coverage	A lower extremity prosthesis may be covered to restore mobility for a beneficiary who demonstrates the ability to transfer and/or ambulate, and the beneficiary's potential functional level is between the ranges of K1 through K4.
Documentation	<p>Documentation must be less than 60 days old and include the following:</p> <ul style="list-style-type: none"> ▪ Diagnosis/medical condition related to the service requested. ▪ Current functional "K" level. ▪ An occupational or physical therapy evaluation may be required on a case-by-case basis when PA is required.

Medicaid Provider Manual

<p>PA Requirements</p>	<p>Below Knee Prosthesis</p> <ul style="list-style-type: none"> ▪ Preparatory prosthesis - PA is not required for a BK preparatory prosthesis when the Standards of Coverage are met and it consists of a base procedure code (e.g., L5510, L5520, or L5530) and the following add-ons: <ul style="list-style-type: none"> ➤ one test socket ➤ insert ➤ suspension system (e.g., L5666 or L5670) ➤ total contact ➤ distal cushion <p>The SACH foot is included with the BK preparatory base code. If any prosthetic foot other than a SACH foot is placed on a preparatory prosthesis, it will require prior authorization and must be transferred to the definitive prosthesis.</p> ▪ Definitive Exoskeletal BK prosthesis – PA is not required for a BK definitive exoskeletal prosthesis when the Standards of Coverage are met and it consists of a base procedure code (e.g., L5100, L5105, L5050) and the following add-ons: <ul style="list-style-type: none"> ➤ up to two test sockets ➤ socket material ➤ total contact ➤ distal cushion ➤ foot ➤ suspension locking system ➤ insert ➤ liner (e.g., gel, silicone, etc.) ▪ Definitive Endoskeletal BK Prosthesis - PA is not required for a BK definitive endoskeletal prosthesis when the Standards of Coverage are met and it consists of a base procedure code (e.g., L5301) and the following add-ons: <ul style="list-style-type: none"> ➤ up to two test sockets ➤ socket material ➤ total contact ➤ distal cushion ➤ pylon ➤ foot ➤ suspension locking system ➤ insert ➤ liner (e.g., gel, silicone, etc.) ➤ cover <p>Socks and sheaths are not considered as add-ons and would be considered in addition to the other add-on items for either the preparatory or definitive prosthesis.</p>
-------------------------------	--

Medicaid Provider Manual

	<p>Above Knee Prosthesis</p> <p>PA is not required for:</p> <ul style="list-style-type: none"> an above knee preparatory prosthesis when the Standards of Coverage are met and it consists of a base code and the following add-ons: one test socket, foot, knee, socket design and/or suspension system. Socks and sheaths are not considered as add-ons and would be considered in addition to the other items. an exoskeletal above knee definitive prosthesis when the Standards of Coverage are met and it consists of a base code and the following add-ons: up to two test sockets, foot, knee, insert, socket material, socket design, and/or suspension system. Socks and sheaths are not considered as add-ons and would be considered in addition to the other items. an endoskeletal above knee definitive prosthesis when the Standards of Coverage are met and it consists of a base code and the following add-ons: up to two test sockets, foot, insert, socket material, socket design, and/or suspension system. Socks and sheaths are not considered as add-ons and would be considered in addition to the other others. <p>Refer to the Medicaid Code and Rate Reference tool for the specific codes removed from PA.</p> <p>For repairs, up to two episodes per year, as follows:</p> <ul style="list-style-type: none"> The total repair cost equals one hour of labor or less. The cost of minor parts equals \$50 or less. <p>PA is required for either a below knee or above knee prosthesis when:</p> <ul style="list-style-type: none"> The standards of coverage are not met. Any component part of the prosthesis requires PA. The beneficiary is over the age of 21 and replacement is required within five years. The beneficiary is under the age of 21 and replacement is required within two years.
Payment Rules	These are purchase only items.

Medicaid Provider Manual

2.37.A.1. MICROPROCESSOR KNEE-SHIN SYSTEMS [RE-NUMBERED 4/1/2025; RE-NUMBERED 7/1/2025]

Standards of Coverage	<p>A microprocessor prosthetic knee-shin system may be covered for a beneficiary with a knee disarticulation amputation, a trans-femoral amputation, a hip disarticulation amputation, or congenital deformity of the lower limb when the following are met:</p> <ul style="list-style-type: none">▪ The beneficiary is motivated to ambulate using a microprocessor knee-shin system;▪ The beneficiary has the current or potential functional level of K3 or K4;*▪ The requested system will be the primary mode of ambulation to perform activities of daily living and to access their community;▪ The beneficiary has the cognitive ability to use the system, understands and can respond to system errors and alerts;▪ The beneficiary has the physical strength with sufficient pulmonary and cardiovascular reserve to ambulate using the system;▪ The beneficiary's age and weight meet the manufacturer's system indications; and▪ The beneficiary has access to a power source to charge the device. <p>A powered and programmable flexion/extension assist control endoskeletal knee-shin system (L5859) is only covered when the beneficiary meets all the following:</p> <ul style="list-style-type: none">▪ Functional level of K3 only;▪ The beneficiary has a microprocessor swing and stance phase (L5856) knee;▪ The beneficiary has a comorbidity of the spine or the sound limb that affects the function of hip extension and/or the quadriceps that impairs K3 level function with the use of the microprocessor knee alone;▪ The beneficiary can charge the system daily; and▪ The beneficiary can understand and respond to errors and alerts. <p>Note: L5859 is not intended for high impact sports or heavy-duty use.</p> <p>Prior to recommending a microprocessor knee-shin system, providers must consider environmental factors (e.g., high levels of dust, dirt, moisture, etc.) a beneficiary may frequent that may be contraindicated for use of the system.</p> <p>Refer to the above knee definitive prostheses for add-on, sock and sheath information.</p> <p>*Refer to the Billing & Reimbursement for Professionals chapter of this manual for K level definitions.</p>
------------------------------	--

Medicaid Provider Manual

Documentation	<p>Documentation must be less than 60 days old and include the following:</p> <ul style="list-style-type: none">▪ Diagnosis/medical condition related to the service requested.▪ Current functional "K" level.▪ Ordering practitioner documentation substantiating beneficiary physical ability (including ample cardiovascular and pulmonary reserve) to use the device.▪ Manufacturer warranty for the knee-shin system and componentry (e.g., life of warranty, componentry included in warranty, and include warranty number if the manufacturer issues warranty numbers).▪ An occupational or physical therapy evaluation may be required on a case-by-case basis when prior authorization (PA) is required.
PA Requirements	<p>PA is required for all microprocessor knee-shin systems. Coverage will only be provided for one type of definitive knee-shin system (e.g., microprocessor, fluid or pneumatic). All conditions of the warranty must be exhausted prior to requesting replacement/repair of the microprocessor knee-shin system and components.</p>
Warranty	<p>The warranty period begins on the date the beneficiary receives the knee-shin system. The warranty information (include life of warranty, items included in the warranty, and warranty number if the manufacturer issues a warranty) must be kept in the beneficiary file and available upon request.</p>
Non-Covered	<ul style="list-style-type: none">▪ Microprocessor knee-shin systems for recreational and/or athletic purposes only.▪ Back-up/secondary prosthetic devices.▪ Smart devices (e.g., smart phones, iPads, tablets, etc.). These items do not meet the definition of a dedicated medical device.▪ Prosthetic knees and components covered under the manufacturer warranty.▪ Upgrades to a microprocessor knee-shin system when the beneficiary's current prosthesis is in good repair, is under Medicaid frequency limits, and continues to meet the beneficiary's medical/functional need.
Payment Rules	<p>Microprocessor knee-shin systems are purchase only items.</p>

Medicaid Provider Manual

2.37.B. UPPER EXTREMITY PROSTHESES [SUBSECTION ADDED 7/1/2025]

Definition	<p>Upper extremity (UE) prostheses are devices used to artificially restore or replace missing, malfunctioning, or congenital limb deficiency/absence of the upper body. Types of UE prostheses include passive, body-powered, myoelectric, and hybrid. The terms prosthetic, prostheses, and prosthesis are used interchangeably, as appropriate, throughout this policy.</p> <p>Passive prostheses are not functionally activated, can be lightweight, often require repositioning, can be locked into place (typically by the opposing limb) and are primarily cosmetic but offer postural balance, anatomical symmetry, and can be used for specific activities requiring use of two limbs (e.g., to steady objects).</p> <p>Body-powered prostheses use mechanical linkage and/or cable(s), and a body suspension (e.g., body harness) system or method activated by the residual limb, shoulder, or opposite limb to activate the prosthetic device to control extremity movement, positioning and grasping movements.</p> <p>Myoelectric (electric) prostheses use surface electrodes (of the residual limb or other strategic body surface) to detect electromyographic signals from the muscle, sending signals to a battery powered controller to control and move the prosthesis.</p> <p>Hybrid prostheses utilize a combination of myoelectric and body-powered components to activate the prosthesis for functional movement. This type of prosthetic allows movement of two joints at one time. Hybrids are mainly used for amputations at or above the elbow.</p>
Standards of Coverage	<p>UE prostheses may be covered for beneficiaries of all ages who are physically and cognitively able to utilize a prosthesis at a developmentally age-appropriate level to restore function to a missing or partially missing limb due to amputation or a congenital limb deficiency/absence.</p> <p>Passive UE Prostheses</p> <p>A passive UE prosthesis may be covered when the following are met:</p> <ul style="list-style-type: none">▪ The beneficiary has had an amputation or has a congenital limb deficiency or absence of limb.▪ The beneficiary is physically, developmentally, or cognitively unable or unwilling to use a more advanced (e.g., body-powered) prosthesis and is able and willing to use the passive prosthesis.▪ The beneficiary can lock the prosthesis in place or, if a child, with the assistance of a parent/caregiver.▪ For infants (typically between four to six months of age) when developmentally learning to prop sit.▪ The beneficiary has been evaluated by a clinical team comprised of a physician/non-physician practitioner, prosthetist, occupational therapist (OT) or physical therapist (PT).▪ The device is the least costly alternative that meets the beneficiary's medical/functional need.

Body-powered UE Prostheses

A body-powered UE prosthesis may be covered when the following are met:

- The beneficiary has the cognitive and musculoskeletal ability to perform activities of daily living (ADLs) using the prosthesis.
- The beneficiary has had an evaluation by a clinical team and will achieve anticipated functional goals using the prosthesis to accomplish daily living tasks (appropriate to their chronological, developmental, or medical/functional status) in a reasonable time period as identified in the clinical team's (physician/non-physician practitioner, prosthetist, and OT or PT) evaluation and treatment plan.
- The beneficiary does not have a comorbidity that may interfere with functional use of the prosthesis.
- The device is the least costly alternative that meets the beneficiary's medical/functional need.

Myoelectric or Hybrid UE Prostheses

A myoelectric or hybrid UE prosthesis may be covered when all the above passive and body-powered standards are met, and all the following are met:

- A passive or traditional body-powered prosthesis does not meet the beneficiary's functional need to perform ADLs.
- The muscle or other body surface to which the electrode is attached can generate sufficient electromyographic signals to operate the prosthesis.
- The beneficiary has the endurance to achieve the anticipated functional goals using the prosthesis.
- The beneficiary has been evaluated by a clinical team comprised of a physician/non-physician practitioner, prosthetist, OT or PT.
- The beneficiary is willing and able to complete training with an OT/PT that specializes in myoelectric UE prostheses and componentry.
- Prior to recommending a myoelectric or hybrid prosthesis, the prosthetist must consider environmental factors (e.g., wet environments) a beneficiary may frequent that may be contraindicated for use of the system.

Electric Hand (L6880)

An electric hand may be covered when all the standards for passive, body-powered, myoelectric and hybrid UE prosthesis are met; and all the following requirements are met:

- The prosthetist's documentation substantiates the beneficiary requires the electric hand to independently perform ADLs (including, but not limited to, dressing, personal hygiene, toileting, and feeding); and
- The beneficiary is willing and able to complete training with an OT/PT that specializes in myoelectric UE prostheses, componentry, and electric hands.

Up to two test sockets per limb are permitted prior to the terminal device being delivered. Submitted documentation must establish the medical reason for two test sockets.

The prosthesis must be guaranteed to fit for a period of 90 days after delivery of the device (any modifications to the terminal device or componentry within 90 days of delivery are part of the overall service and may not be separately billed).

Medicaid Provider Manual

Documentation	<p>Documentation must be less than 90 days old and include the following:</p> <ul style="list-style-type: none"> ▪ Diagnosis/medical condition related to the need for the prosthesis. ▪ The clinical team's (physician/non-physician practitioner, prosthetist, and OT or PT) evaluation and treatment plan. ▪ If the beneficiary has a current prosthesis, documentation of why that prosthesis no longer meets the beneficiary's medical/functional need. ▪ Manufacturer warranty for the prosthesis and componentry (e.g., life of warranty, componentry included in warranty, and include warranty number if the manufacturer issues warranty numbers). ▪ If requesting two test sockets (per limb) for the preparatory prosthesis, documentation must establish the medical reason for two sockets.
PA Requirements	<p>PA is required for all UE prostheses. The manufacturer's warranty must be exhausted prior to requesting repair.</p>
Warranty	<p>The warranty period begins on the date the prosthesis is delivered to the beneficiary. The warranty information (include life of warranty, items included in the warranty, and warranty number if the manufacturer issues a warranty) must be kept in the beneficiary file and available upon request.</p>
Non-Covered	<p>The following are not covered:</p> <ul style="list-style-type: none"> ▪ Back-up or a second prosthesis. ▪ Devices used solely for recreational purposes. ▪ Upgrades to a myoelectric prosthesis when the beneficiary's current passive or body-powered prosthesis is in good repair, is under Medicaid frequency limits, and continues to meet the beneficiary's medical/functional need. ▪ Replacement of a UE prosthesis and componentry covered under the manufacturer warranty. ▪ Partial hand myoelectric prostheses (e.g., L6026). ▪ More than two liners per year, per prosthesis. ▪ More than two socket inserts per prosthesis.
Payment Rules	<p>UE prostheses are purchase only items. Coverage is provided for accessories or componentry integral to the operation of the device (e.g., hinges, harness, socket).</p> <p>The following are included in the overall prostheses service and not separately reimbursed: evaluation of the member, measurement and/or casting, fabrication, and fitting/adjustments of the prosthesis.</p> <p>There is no separate payment if CAD-CAM technology is used to fabricate the prosthesis as this is included in the code allowance. (text added per bulletin MMP 25-08)</p>

2.38 PULSE OXIMETER [RE-NUMBERED 4/1/2025]

Definition	<p>A pulse oximeter is a noninvasive device that measures arterial oxygen saturation levels and pulse rate. The device consists of a sensor attached to the patient's finger or ear lobe that is linked to a processing unit that delivers a read-out.</p>
-------------------	--

Medicaid Provider Manual

Standards of Coverage	<p>Pulse oximeter may be covered:</p> <ul style="list-style-type: none"> ▪ For beneficiaries 21 or over as a diagnostic tool for short-term rental (one month) if ordered for oxygen or ventilator weaning in the home. ▪ For beneficiaries under 21: <ul style="list-style-type: none"> ➢ As a diagnostic tool for short-term rental (one month) when there are suspected desaturations during sleep, stress, or feeding. ➢ Up to six months with a diagnosis requiring oxygen use. ➢ Up to six months for beneficiaries with a tracheostomy.
Documentation	<p>Documentation must be less than 90 days old and include the following:</p> <ul style="list-style-type: none"> ▪ Diagnosis/medical condition related to the need for the unit. ▪ Treatment plan addressing what is to be done for abnormal readings. ▪ Current oxygen orders, if applicable. ▪ For coverage beyond the initial six-month period, an evaluation by an appropriate pediatric subspecialist (e.g., pediatric pulmonologist, pediatric cardiologist, neurologist, ENT, or pediatric internist) is required under the CSHCS program.
PA Requirements	<p>PA is not required when the Standards of Coverage are met, the beneficiary is under 21, and has one of the following diagnoses:</p> <ul style="list-style-type: none"> ▪ Tracheostomy (Artificial Opening Status) ▪ Tracheostomy (Attention to Artificial Openings)
	<p>PA is required:</p> <ul style="list-style-type: none"> ▪ For all beneficiaries over the age of 21. ▪ When the Standards of Coverage are not met.
Payment Rules	<p>A pulse oximeter is a capped rental item and is inclusive of the following:</p> <ul style="list-style-type: none"> ▪ All accessories needed to use the unit (e.g., nondisposable infant or adult oximeter probes, cables, etc.). ▪ Education on the proper use and care of the equipment. ▪ Routine servicing and all necessary repairs or replacements to make the unit functional. ▪ Periodic downloading of recorded data. <p>If needed for continuous use beyond the 10 months of rental, the item is considered purchased and necessary repairs and/or replacements of accessories are separately reimbursable if not covered under the manufacturer warranty. Replacement of one non-disposable probe annually is separately reimbursable without prior authorization.</p>

2.39 SPEECH GENERATING DEVICES [RE-NUMBERED 4/1/2025]

Definition	<p>Speech generating devices (SGD) are defined as durable medical equipment (electric or nonelectric) that provide an individual with a severe speech impairment, who is unable to communicate using natural means (e.g., spoken, written, gestures, sign language), the ability to meet their daily communication needs.</p> <p>Other terms used interchangeably with SGD include augmentative and alternative communication (AAC) device or augmentative communication device (ACD).</p>
Standards of Coverage	<p>To be considered for coverage, documentation must substantiate medical need for beneficiaries whose needs cannot be met using natural communication methods and demonstrate the comprehension and physical skills necessary to communicate using the requested device. An SGD will be considered medically necessary when supporting documentation demonstrates all of the following:</p> <ul style="list-style-type: none">▪ The prognosis for developing and using oral speech as a primary method of communication is considered guarded;▪ The requested SGD is an integral part of the communication plan of care; and▪ The beneficiary will be able to use the device in all environments they frequent (e.g., home, school, job, etc.). <p>Software intended for augmentative communication purposes may be considered upon review of documentation supporting medical necessity. If the beneficiary intends to download augmentative communication software onto their personal laptop, computer, or iPad, it is the responsibility of the beneficiary and/or their legal guardian to check with the vendor of the personal device for licensing, compatibility, repair, warranty and proprietary information.</p>
Standards of Coverage – Eye Control	<p>An eye control is a type of mechanism that helps the beneficiary access the SGD. The eye control may or may not be integrated within the speech generating device. Eye control mechanisms will be covered when all of the following apply:</p> <ul style="list-style-type: none">▪ All other methods to operate the SGD have been evaluated and ruled out and the eye control is the most appropriate method that provides a functional level of communication (speed, accuracy, etc.);▪ Documentation specifies medical, functional and physical necessity that supports the need for the eye control; and▪ The evaluation(s) has documented evidence of the beneficiary's ability to physically activate the system and demonstrate meaningful use of the device with minimal assistance from others.

Medicaid Provider Manual

Non-covered	<p>The following are non-covered:</p> <ul style="list-style-type: none">▪ Items that do not meet the definition of durable medical equipment and are not dedicated speech devices.▪ Software to play games, create spreadsheets or documents or is not specific to augmentative communication.▪ Environmental control units.▪ More than one SGD per beneficiary.▪ Registering the device.▪ Extended warranties.▪ SGDs used solely for education, vocational or recreational purposes. It is expected that the beneficiary will be able to use the device in all environments they frequent (e.g., home, school, job, etc.).▪ Replacements based on manufacturer recommended replacement schedules.▪ SGD requests for devices that do not match the beneficiary's current and reasonably foreseeable communication abilities and needs.▪ Separate billing for interfaces, cables, adapters or interconnects and switches (with the exception of accessing switches) necessary to interface with the SGD.▪ Requests for replacement due to new technology when the beneficiary's current SGD continues to meet their medical and functional needs.▪ Items that are not defined by the American Medical Association, the Food and Drug Administration, and the Pricing, Data Analysis, and Coding (PDAC) contractor as medical devices or dedicated durable medical equipment (e.g., personal tablets, computers, iPads, iPhones, etc.).
--------------------	--

Medicaid Provider Manual

Evaluation Components

A speech-language pathologist, in conjunction with other disciplines such as occupational therapists, physical therapists, psychologists, and seating specialists as needed, must provide a thorough and systematic evaluation of the beneficiary's receptive and expressive communication abilities.

Ancillary professionals must possess proper credentials (certification, license and registration, etc.) as appropriate.

SGD vendors (manufacturers, distributors) may not submit assessment information or justification for any requested SGD.

An objective evaluation (using objective functional baseline measures and/or standardized testing) of the beneficiary's receptive and expressive communication abilities by a speech-language pathologist (SLP), in conjunction with other applicable disciplines (e.g., occupational therapist, physical therapist, psychologists, and seating specialists, etc.) as needed, has been performed and the SLP has documented the following:

- The beneficiary's functional ability to use the device throughout their daily activities.
- The consideration of alternative access and positioning devices, as appropriate.
- The device is appropriate to the beneficiary's current comprehension, abilities and skills.
- The beneficiary demonstrates the cognitive, physical, visual and hearing skills necessary to communicate using the requested device.
- The SGD is the least costly device that meets the beneficiary's basic communication needs (in the home and in their community). Include in the evaluation supporting documentation substantiating the requested device as the least costly alternative that meets the beneficiary's current functional needs.
- Assessment of the beneficiary on more than one device, by more than one manufacturer, and documenting why the requested device is more appropriate than the other device(s). Include the following in the evaluation:
 - Device(s) evaluated;
 - The beneficiary's performance on each device evaluated;
 - The device requested (brand, make/model and type); and
 - Reasons why other evaluated devices did not meet the beneficiary's needs.
- A trial period using the requested device must be provided for initial device authorization requests. The trial period must be a least one month in length (the SLP may submit a prior authorization request for up to three months). The SLP must document a description of the trial period with the requested device, including length of trial, settings, outcome, and additional training needs identified.

Medicaid Provider Manual

Documentation	<p>Documentation must be within 180 days and include:</p> <ul style="list-style-type: none">▪ the physician's order with the diagnosis directly related to the beneficiary's communication deficit. The order must be based on the SLP's evaluation of the beneficiary's communication abilities and medical needs.▪ the date of onset, progress made and a comprehensive summary of the beneficiary's communication goals. (Refer to criteria outlined in the Therapy Services Chapter, Speech-Language Therapy subsection.)▪ the assessment by a physical therapist (PT) or occupational therapist (OT) to address functional mobility and postural control.▪ the SLP's documentation of hearing and vision status.▪ a copy, if available, of the hearing (audiologist) or vision (ophthalmologist or optometrist) test if the beneficiary has had a hearing or vision test within the past 12 months.▪ a plan of care (POC) identifying other disciplines involved in the care and goals for therapy and training. For beneficiaries under the age of 21 attending school, the POC must include other disciplines and parents/legal guardian as appropriate (i.e., OT, PT, psychologist, school therapist, etc.).▪ specifications for the SGD. (Refer to the Therapy Services Chapter).▪ necessary therapy and training to allow the beneficiary to meet functional needs.▪ the speech and language evaluation results. <p>All SGD evaluation documentation must be submitted following the established criteria stated within the Evaluations and Follow-up for Speech Generating Devices/Voice Prostheses subsection of the Therapy Services Chapter.</p> <p>Documentation for modifications/upgrades must describe the changes in the beneficiary's physical, medical, cognitive, vision or hearing status that necessitates the need for the requested modifications/upgrades for the system or parts.</p> <p>A video of the beneficiary using the SGD and/or eye control is a useful tool in establishing the beneficiary's ability to use either item, but is not required. The SLP may submit a video with the prior authorization request if all of the following are met:</p> <ul style="list-style-type: none">▪ The beneficiary or beneficiary's legal guardian has dated and signed an authorization for the video documentation as additional documentation of the beneficiary's ability to use the device;▪ The video is current (within the past 12 months); and▪ The provider encrypts the video prior to sending it in with the prior authorization request (following HIPAA compliance regulations).
----------------------	---

Medicaid Provider Manual

PA Requirements	<p>The speech-language pathologist performs the functional communication assessment and SGD evaluation and initiates the prior authorization request with a medical supplier that has a specialty enrollment with MDHHS to provide SGDs. To improve beneficiary access to low-end devices, a medical supplier without a SGD specialty enrollment with MDHHS may provide SGDs with eight minutes or less of speech capability, basic SGD accessories such as switches, buttons, etc., or SGD wheelchair mounting systems. A SGD vendor must enroll through the MDHHS CHAMPS PE on-line system as a medical supplier with a subspecialty of Speech Generating Devices in order to provide the full range of SGDs. (Refer to the Directory Appendix for contact information.)</p> <p>PA is required for all SGDs, eye control mechanisms, upgrades, modifications, accessories, repairs, replacements and device trials. Required documentation must accompany the Special Services Prior Approval—Request/Authorization (MSA-1653-B) when requesting authorization for all original and replacement/upgrade SGD requests.</p> <p>A copy of the physician prescription must be submitted with the request for an SGD. The prescription must be based on the evaluation of an individual's communication abilities and medical needs made by a speech-language pathologist and other evaluation team members (as appropriate).</p>
	<p>Modifications/Upgrades - Indicate the procedure code that defines the modification(s) or upgrades.</p> <p>Providers have six months from the prior authorization approval date to provide all approved items, including the SGD, mount and accessories. After six months, a new prior authorization request must be submitted.</p>
	<p>Repairs - For a repair, report HCPCS code K0739 (for the labor charge) and HCPCS code E1399 (for the replacement part). PA is required for all repairs. If repair charges exceed \$150, a speech-language pathologist, occupational therapist, or physical therapist must conduct an evaluation. A statement must be included in the evaluation indicating whether the current SGD continues to meet the beneficiary's functional needs. If the beneficiary's needs are being met with the current system, PA may be granted.</p> <p>Each repair must consist of a thorough assessment of the general working condition of the entire system so that frequent repairs may be avoided. If additional repairs to the system are needed, PA for those additional services must be obtained.</p> <p>In some cases, it may be more costly to repair the SGD than to replace it. When requesting PA for a repair, provide the cost of the repair and the cost of the replacement so that determination can be made by MDHHS whether to repair or replace the device.</p>
	<p>Replacements - All replacements (identical, upgrades, downgrades) of an SGD require PA.</p>
Follow-Up Services	<p>The provision of speech therapy services for training following the purchase of an SGD is expected to occur within the 12 months following the beneficiary's receipt of the device. (Refer to the Therapy Services Chapter and the Medicaid Code and Rate Reference tool for PA and coverage parameters.) During this time, the SLP and SGD provider are required to ensure that a support team is in place to assist the beneficiary and/or their family with all follow-up SGD needs and therapy.</p>

Medicaid Provider Manual

Frequency	The program will purchase new equipment only. Only one SGD will be purchased within a three-year period for beneficiaries under age 21. Only one SGD will be purchased within five years for beneficiaries age 21 and older. Exceptions may be considered in situations where there has been a recent and significant change in the beneficiary's medical or functional status relative to the beneficiary's communication skills.
Warranty	The warranty period begins at the point when the device is in the beneficiary's home and the beneficiary has received adequate training to use the system for functional communication.
Repairs	<p>Repairs for speech generating devices (SGD) are covered after the warranty expires for no more than one SGD per beneficiary. Additionally, repair of an SGD not purchased by MDHHS is covered only if the SGD is determined to be necessary to meet basic functional communication needs in accordance with the criteria for SGD coverage.</p> <p>For a repair, report HCPCS code K0739 (for the labor charge) and HCPCS code E1399 (for the replacement part). PA is required for all repairs. If repair charges exceed \$150, a speech-language pathologist, occupational therapist, or physical therapist must conduct an evaluation. A statement must be included in the evaluation indicating whether the current SGD continues to meet the beneficiary's functional needs. If the beneficiary's needs are being met with the current system, PA may be granted.</p> <p>Each repair must consist of a thorough assessment of the general working condition of the entire system so that frequent repairs may be avoided. If additional repairs to the system are needed, PA for those additional services must be obtained.</p> <p>In some cases, it may be more costly to repair the SGD than to replace it. When requesting PA for a repair, provide the cost of the repair and the cost of the replacement so that determination can be made by MDHHS whether to repair or replace the device.</p> <p>Technological improvements and upgrades are not considered repairs and must not be requested as such.</p> <p>The prior authorization request for repair must include:</p> <ul style="list-style-type: none"> Documentation from the SLP (or if not currently receiving speech services, a physician, a PT or OT, or teacher) confirming the current device is used by the beneficiary on a regular basis and continues to meet the beneficiary's needs; Part number(s), description(s), manufacturer name, Healthcare Common Procedure Coding System (HCPCS) codes; and Warranty information and catalog number(s) for the part number(s) to be used for the repair. <p>Repairs must extend the useful lifetime of the SGD by at least one year from the date of the repair request.</p>

Medicaid Provider Manual

Replacements	<p>All replacements (identical, different, upgrades, downgrades) of an SGD require PA.</p> <p>Replacements may be covered when there has been a significant medical/functional change in the beneficiary's ability to use the SGD, the device is no longer repairable, or the cost of repairs exceeds the cost of replacement. Limits for replacement are based on medical/functional need and the operating condition of the beneficiary's current device.</p> <p>Manufacturer suggested replacement schedules are not considered a reason for replacement.</p> <p>When a current SGD needs replacement and the replacement is identical to the SGD previously purchased by MDHHS, the documentation required to be submitted with the prior authorization request is:</p> <ul style="list-style-type: none">▪ Clinical confirmation by the speech-language pathologist the device continues to be suitable for the beneficiary's needs;▪ The SLP, OT or PT confirmation of the beneficiary's functional ability to use the SGD; and▪ Cost to repair and cost to replace. <p>If an identical SGD is no longer available, a new unit that is equivalent to the original in function, utility and user adaptability will be furnished.</p> <p>When a current SGD needs replacement with an SGD that is different than the SGD previously purchased by the program, the documentation to be submitted with the prior authorization is:</p> <ul style="list-style-type: none">▪ A new speech and language evaluation; and▪ A statement (to be included with the evaluation) indicating why and how the current SGD no longer meets the beneficiary's functional communication needs. <p>All other standards of coverage requirements must be met for coverage consideration.</p> <p>Replacement requests due to loss, damage or theft must include the policy or fire marshal report, as applicable, and a plan to prevent recurrence. MDHHS does not cover replacement of SGDs due to misuse or abuse.</p>
Payment Rules	<p>Purchase - MDHHS will purchase new equipment only. The serial number of the device purchased must be maintained on file by the vendor for audit purposes.</p> <p>Shipping and handling fees relating to the SGD equipment are not separately reimbursed.</p> <p>Reimbursement includes the charges for the SGD and all approved components.</p> <p>The provider's charge for an SGD must be based on the usual and customary charge. Reimbursement will be the lesser of the provider's charge and/or the Medicaid fee screen.</p>

Medicaid Provider Manual

	<p>Rental – Equipment will not be rented for a period of less than 30 days and may be rented for a maximum period of 90 days. The monthly rental reimbursement rate will be 1/10 of the maximum purchase reimbursement. The amount reimbursed for rental will be deducted from the total purchase price.</p> <p>MDHHS will apply the trial period rental to the purchase of the SGD. For an SGD device(s) approved for a trial period and ruled out (by the SLP, the beneficiary and/or legal guardian, DME provider, etc.) at some point during the trial period (first, second or third month), MDHHS will reimburse the SGD provider for the period of time the device was trialed. (Refer to the Medical Supplier Database and the Medicaid Code and Rate Reference tool for specific HCPCS codes and rental rates.)</p>
--	---

2.40 SUPPORT SURFACES – GROUP 1 [RE-NUMBERED 4/1/2025]

Definition	Pressure Reducing Support Surfaces – Group 1 includes, but is not limited to, alternating pressure pad and pump; water, air, or dry pressure mattresses; or gel or gel-like pressure pads. A Group 1 support surface must provide both a waterproof cover and adequate support to prevent the beneficiary from "bottoming out" with the use of the item.
Standards of Coverage	<p>A Group 1 mattress overlay or mattress may be covered if one of the following applies. The beneficiary:</p> <ul style="list-style-type: none"> ▪ Is completely immobile (i.e., cannot make changes in body position without assistance). ▪ Has limited mobility (i.e., cannot independently make changes in body position significant enough to alleviate pressure) with the presence of at least one of these additional conditions: <ul style="list-style-type: none"> ➤ Impaired nutritional status; ➤ Fecal or urinary incontinence; ➤ Altered sensory perception; or ➤ Compromised circulatory status. ▪ Has any stage pressure ulcer on the trunk or pelvis with the presence of at least one of these additional conditions: <ul style="list-style-type: none"> ➤ Impaired nutritional status; ➤ Fecal or urinary incontinence; ➤ Altered sensory perception; or ➤ Compromised circulatory status.
Documentation	<p>Documentation must be less than 30 days old and include the following:</p> <ul style="list-style-type: none"> ▪ Education of the beneficiary and/or caregiver on the prevention and/or management of pressure ulcers. ▪ Diagnosis/medical condition related to need for the item. ▪ Regular assessment by a nurse, physician, or other licensed healthcare practitioner. ▪ Appropriate turning and positioning.

Medicaid Provider Manual

	<ul style="list-style-type: none"> ▪ Appropriate wound care (for a Stage II, III, or IV ulcer). ▪ Appropriate management of moisture/incontinence. ▪ Wound size, stage and location (for a Stage II, III or IV ulcer). ▪ Nutritional assessment and intervention consistent with the overall plan of care.
PA Requirements	<p>PA is not required for HCPCS codes A4640, E0184, E0185, E0186, E0187 or E0197 if the Standards of Coverage are met and one of the following diagnoses is present:</p> <ul style="list-style-type: none"> ▪ Alteration of Consciousness, Coma or Transient Alteration of Awareness ▪ Anoxic Brain Damage ▪ Anterior Horn Cell Disease ▪ Cerebral Degenerations Usually Manifested in Childhood ▪ Cerebral Edema ▪ Compression of Brain ▪ Congenital or Hereditary Progressive Muscular Dystrophy, Myotonic Disorders, Familial Periodic Paralysis ▪ Decubitus Ulcer ▪ Encephalopathy, Unspecified ▪ Fracture of the Cervical or Dorsal Areas (open or closed) ▪ Hemiplegia and Hemiparesis ▪ Huntington's Chorea ▪ Infantile Cerebral Palsy ▪ Multiple Sclerosis ▪ Neurofibromatosis ▪ Other Congenital Anomalies of Nervous System ▪ Other Demyelinating Disease of Central Nervous System ▪ Other Paralytic Syndromes ▪ Parkinson's Disease ▪ Spina Bifida ▪ Spinocerebellar Disease <p>PA is required for:</p> <ul style="list-style-type: none"> ▪ Medical need beyond the Standards of Coverage. ▪ All other diagnoses. ▪ Replacement in less than three years.

Medicaid Provider Manual

Payment Rules	<p>A Group 1 support surface may be a capped rental or purchase depending on the specific HCPCS code. Only a single Group 1 support surface will be considered for a purchase/rental at any given time.</p> <p>If unit is billed as a capped rental, the rental payment would be inclusive of the following:</p> <ul style="list-style-type: none"> ▪ All accessories needed to use the equipment (e.g., pump, pad, cards etc.). ▪ Education on the proper use and care of the equipment. ▪ Routine servicing and all necessary repairs or replacement to make the unit functional.
----------------------	--

2.41 SUPPORT SURFACES – GROUP 2 [RE-NUMBERED 4/1/2025]

Definition	<p>Pressure Reducing Support Surfaces - Group 2 includes, but is not limited to, powered air flotation beds; powered pressure-reducing air mattresses; powered air overlay for mattress; or nonpowered advance pressure reducing mattress. A Group 2 support surface must provide both a waterproof cover and adequate support to prevent the beneficiary from "bottoming out" with the use of the item.</p>
Standards of Coverage	<p>A Group 2 mattress support may be covered up to three months when one of the following applies:</p> <ul style="list-style-type: none"> ▪ Multiple Stage II pressure ulcers are located on the trunk or pelvis and the beneficiary has participated with a comprehensive ulcer treatment program for at least the past month which has included the use of an appropriate Group 1 support surface, and the wound has worsened or had no change. ▪ Large or multiple Stage III or IV pressure ulcer(s) on the trunk or pelvis. ▪ Recent myocutaneous flap or skin graft for a pressure ulcer on the trunk or pelvis (surgery within the past 60 days) and the beneficiary has been on a Group 2 or 3 surface immediately after a recent discharge from a hospital or nursing facility (discharge within the past 30 days). <p>Continued Use of a Group 2 support surface - Continued use of a Group 2 support surface on a monthly basis may be covered for restorative purposes only when healing continues to progress.</p> <p>Continued use of a Group 2 support surface on a monthly basis will not be reauthorized for coverage if:</p> <ul style="list-style-type: none"> ▪ The beneficiary is noncompliant with care plan; or ▪ The documentation in the medical record demonstrates that other aspects of the plan of care are not being modified to promote healing.
Documentation	<p>Documentation must be less than 14 days old and include the following:</p> <ul style="list-style-type: none"> ▪ Diagnosis/medical condition related to need for item. ▪ Size, stage and location of the ulcer. ▪ Other treatment modalities/surfaces already tried.

Medicaid Provider Manual

	<ul style="list-style-type: none"> Education of the beneficiary and caregiver on the prevention and/or management of pressure ulcers. Regular assessment by a nurse, physician, or other licensed healthcare practitioner. Appropriate turning and positioning. Current appropriate wound care (for a Stage II, III, or IV ulcer). Appropriate management of moisture/incontinence. Nutritional assessment and intervention consistent with the overall plan of care.
PA Requirements	PA is required for all Group 2 support surfaces.
Payment Rules	<p>A Group 2 support surface may be a capped rental or purchase depending on the specific HCPCS procedure code. A powered air flotation bed is a rental only and must be billed as a daily rate by reporting total number of days used as units. If the unit is billed as a capped rental, the rental payment would be inclusive of the following:</p> <ul style="list-style-type: none"> All accessories needed to use the equipment. Education on the proper use and care of the equipment. Routine servicing and all necessary repairs or replacements to make the unit functional. <p>For a powered air flotation bed, if use exceeds a ten-month time frame, report the "MS" modifier after six months of continued maintenance and servicing of the item. (MS - six-month maintenance and servicing fee for reasonable and necessary parts and labor that are not covered under any manufacturer or supplier warranty)</p>

2.42 SUPPORT SURFACES – GROUP 3 [RE-NUMBERED 4/1/2025]

Definition	Pressure Reducing Support Surfaces – Group 3 are fully integrated air fluidized beds for the purpose of alleviating pressure. The surface uses the circulation of filtered air through silicone coated ceramic beads that creates the characteristics of fluid.
Standards of Coverage	<p>A Group 3 air-fluidized bed is covered for up to 90 days if all of the following applies:</p> <ul style="list-style-type: none"> The beneficiary has a Stage III (full thickness tissue loss) or Stage IV (deep tissue destruction) pressure ulcer. The beneficiary is bedridden or chairbound as a result of severely limited mobility. The beneficiary's attending physician orders in writing an air-fluidized bed based on a comprehensive assessment and evaluation of the beneficiary after conservative treatment has been tried without success. A trained adult caregiver is available to assist the beneficiary with ADLs, fluid balance, dry skin care, repositioning, recognition and management of altered mental status, dietary needs, prescribed treatments and management of the air-fluidized bed. A physician directs the home treatment regimen and re-evaluates the need for the air-fluidized bed on a monthly basis. All other conservative treatment methods have been tried without success (e.g., Group 1 or Group 2 support surfaces).

Medicaid Provider Manual

	<p>Continued Use of a Group 3 support surface - Continued use of a Group 3 support surface may be covered for restorative purposes only when healing continues to progress.</p> <p>Continued use of a Group 3 support surface will not be reauthorized for coverage if:</p> <ul style="list-style-type: none"> ▪ Beneficiary is noncompliant with care plan; or ▪ Documentation in the medical record demonstrates that other aspects of the plan of care are not being modified to promote healing.
Noncovered Support Services	<p>Group 3 support surfaces are noncovered if:</p> <ul style="list-style-type: none"> ▪ Beneficiary requires treatment with wet soaks or moist wound dressings that are not protected with an impervious covering such as plastic wrap or other occlusive material. ▪ Caregiver is unwilling or unable to provide the type of care required by the beneficiary on a air-fluidized bed. ▪ Structural support is inadequate to support the weight of the air-fluidized bed system. ▪ Electrical system is insufficient for the anticipated increase in energy consumption. ▪ Other known contraindications exist.
Documentation	<p>Documentation must be less than 14 days old and include the following:</p> <ul style="list-style-type: none"> ▪ Diagnosis/medical condition related to the need for the bed. ▪ Size, stage and location of the ulcer. ▪ Other treatment modalities already tried. ▪ Education of the beneficiary and/or caregiver on the prevention and/or management of pressure ulcers. ▪ Monthly assessment by a nurse, physician, or other licensed healthcare practitioner. ▪ Appropriate turning and positioning. ▪ Current appropriate wound care (for a Stage II, III, or IV ulcer). ▪ Appropriate management of moisture/incontinence. ▪ Nutritional assessment and intervention consistent with the overall plan of care.
PA Requirements	<p>PA is required for all Group 3 support surface requests.</p>
Payment Rules	<p>A Group 3 support surface or air fluidized bed is a rental only item and must be billed as a daily rate by reporting total number of days used as units. The rental payment is considered to include the following:</p> <ul style="list-style-type: none"> ▪ All accessories needed to use the equipment. ▪ Education on the proper use and care of the equipment. ▪ Routine servicing and all necessary repairs or replacements to make the unit functional. <p>If use exceeds a 10-month timeframe, report the "MS" modifier after six months of continued maintenance and servicing of the item.</p>

2.43 SURGICAL DRESSINGS [RE-NUMBERED 4/1/2025]

Definition	Surgical dressings include a primary dressing (used as a protective covering applied directly to the wound or lesion) and/or a secondary dressing (used to secure a primary dressing in place). Many of the primary dressings covered by MDHHS are self-adhesive and would not require a secondary dressing to be placed as well. Examples of surgical dressing are adhesive tape, roll gauze, and elastic bandages.
Standards of Coverage	<p>Surgical dressings are covered for one or more of the following:</p> <ul style="list-style-type: none"> To treat a wound or opening in the skin. To debride a wound or lesion. To treat pressure ulcers.
	<p>Coverage of the quantity or type of dressing is based on:</p> <ul style="list-style-type: none"> Size, stage, location and current status of the wound/lesions being treated. Number of wounds/lesions. Number of body locations involved. Frequency of dressing change.
Documentation	<p>Documentation must be less than 30 days old and include the following:</p> <ul style="list-style-type: none"> Diagnosis/medical condition related to the need for the item(s). Item to be dispensed. Quantity of item needed per dressing change. Anticipated frequency of dressing change. Size, stage, location, and number of wounds/lesions. <p>For dressing requests of quantities over established limits, documentation to substantiate medical need is required.</p>
PA Requirements	<p>PA is required for:</p> <ul style="list-style-type: none"> Collagen dressings or wound fillers. Silicone gel sheets. Composite dressings. Quantities beyond Medicaid's established limits.
	PA is not required for all other types of surgical dressings unless usage exceeds established quantity limitations.
Payment Rules	<p>All items are considered a purchase up to the allowable quantities. Modifiers A1 through A9 must be reported in addition to the HCPCS code to report the appropriate number of wounds being treated. The modifiers are as follows:</p> <ul style="list-style-type: none"> A1 - Dressing for one wound A2 – Dressing for two wounds A3 – Dressing for three wounds

Medicaid Provider Manual

	<ul style="list-style-type: none"> ▪ A4 – Dressing for four wounds ▪ A5 – Dressing for five wounds ▪ A6 – Dressing for six wounds ▪ A7 – Dressing for seven wounds ▪ A8 – Dressing for eight wounds ▪ A9 – Dressing for nine or more wounds <p>Dressings related to infusion pumps, parenteral/enteral nutrition, tracheostomy, or gastrostomy are included in either the daily rate or in established all-inclusive kit codes and are not separately reimbursable.</p>
--	---

2.44 TRACHEOSTOMY CARE SUPPLIES [RE-NUMBERED 4/1/2025]

Definition	Tracheostomy care supplies include, but are not limited to, tracheostomy filters, tubes, masks, care kits, cleaning brushes, shower protectors and suction catheters.
Standards of Coverage	<p>Tracheostomy care supplies are covered to support the care of a beneficiary with a tracheostomy.</p> <p>A tracheostomy starter kit may be covered for the four weeks following the initial tracheostomy surgery. The kit code includes the following items: Plastic tray, basin, sterile gloves, tube brush, pipe cleaners, a pre-cut tracheostomy dressing, a roll of gauze, drain sponges, cotton tip applicators, tracheostomy tube ties, or twill tape.</p> <p>After the initial four weeks, the established tracheostomy kit may be covered. The kit code includes the following items: Tube brush, pipe cleaners, cotton tip applicators, tracheostomy tube ties or twill tape, and drain sponges.</p>
Documentation	<p>Documentation must be less than 90 days old and include the following:</p> <ul style="list-style-type: none"> ▪ Diagnosis/medical condition. ▪ Specific items required.
PA Requirements	<p>PA is not required when the Standards of Coverage are met and established quantity limits are not exceeded.</p> <p>PA is required when:</p> <ul style="list-style-type: none"> ▪ Standards of Coverage are not met. ▪ Quantities requested exceed the established limits. ▪ Other items not part of one of the kit codes may be considered for separate reimbursement. (Refer to the Medicaid Code and Rate Reference tool for additional information.)
Payment Rules	Payment is purchase only . All quantities reported should reflect a 30-day supply.

2.45 TRANSCUTANEOUS ELECTRICAL NERVE STIMULATOR [RE-NUMBERED 4/1/2025]

Definition	A Transcutaneous Electrical Nerve Stimulator (TENS) is a device that utilizes electrical current delivered through electrodes placed on the surface of the skin to decrease the beneficiary's perception of pain by inhibiting the transmission of afferent pain nerve impulses and/or stimulating the release of endorphins.
-------------------	---

Medicaid Provider Manual

Standards of Coverage	<p>A TENS unit is covered for reduction of pain for beneficiaries with either chronic, intractable pain of at least three months duration, or acute post-operative pain limited to 30 days from the date of surgery, or pain related to cancer, when:</p> <ul style="list-style-type: none">▪ The beneficiary is able to use the TENS device.▪ There is effective control of pain.▪ Other treatment modalities have been ineffective.
Documentation	<p>Documentation must be less than 30 days old and must include all of the following:</p> <ul style="list-style-type: none">▪ Diagnosis/medical condition related to the need for a TENS (including type and location of pain).▪ Alternative treatments for pain tried and the results.▪ Other modalities of treatment still being used (type and duration must be detailed). <p>For coverage beyond 90 days, include documentation addressing continued effective pain control.</p> <p>Continued Use after the initial 90 days - The documentation must be included with the PA request to describe the effectiveness of the treatment received. For continued coverage for chronic intractable pain, the documentation must be within 30 days and include the following:</p> <ul style="list-style-type: none">▪ Medication regimen, before and after use.▪ Functional level (affected by pain) before and after.
PA Requirements	<p>PA is required for all requests.</p>
Payment Rules	<p>A TENS unit may be considered as a capped rental. The rental payment is inclusive of the following:</p> <ul style="list-style-type: none">▪ All accessories needed to use the equipment (e.g., electrodes, lead wires, cables, etc.).▪ Education on the proper use and care of the equipment.▪ Routine servicing and all necessary repairs or replacements to make the unit functional.

Medicaid Provider Manual

2.46 WALKERS [RE-NUMBERED 4/1/2025]

Definition	Walkers include, but are not limited to, rigid, wheeled, heavy duty, and folding.
Standards of Coverage	Walkers may be covered when the beneficiary has impaired ambulation and requires a walker for safe and independent ambulation.
Documentation	<p>Documentation must be less than six months old and include:</p> <ul style="list-style-type: none"> ▪ Diagnosis/medical condition related to the need for the service. ▪ Functional level possible with use of walker. ▪ Medical reason for type of attachment or modification, if applicable. ▪ Medical reason for heavy-duty walker (e.g., obesity, severe neurological disorder, or restricted use of hands). ▪ Duration of need and frequency of use. ▪ Identification of other specific economic alternatives ruled out. ▪ Identification of make, model, serial number, and warranty information. ▪ Statement of medical need for the specific walker requested. <p>In addition, for each walker type, the following must be included:</p> <ul style="list-style-type: none"> ▪ Standard Walkers <ul style="list-style-type: none"> ➢ Medical/functional reason a cane would not meet the beneficiary's ability to perform MRADL ▪ Walker with Trunk Support <ul style="list-style-type: none"> ➢ Medical/functional reason a standard walker would not meet the beneficiary's ability to perform MRADL ▪ Enclosed Walker with Posterior Seat <ul style="list-style-type: none"> ➢ Medical/functional reason a standard walker would not meet the beneficiary's ability to perform MRADL ▪ Heavy-Duty Walker <ul style="list-style-type: none"> ➢ Medical/functional reason for a heavy-duty walker (e.g., obesity, severe neurological disorder, restricted use of hands)
PA Requirements	PA is not required for walkers if the Standards of Coverage and Documentation are met.
	<p>PA is required for:</p> <ul style="list-style-type: none"> ▪ Replacement within five years. ▪ Additional attachments (e.g., arm troughs). ▪ Replacement within five years for age 21 and over. ▪ Replacement within two years for under age 21.
Payment Rules	Walkers may be a capped rental or purchase item. After the first ten months of rental, necessary repairs and/or replacements of accessories are separately reimbursable.

Medicaid Provider Manual

2.47 WEARABLE CARDIOVERTER-DEFIBRILLATORS [RE-NUMBERED 4/1/2025]

Definition	<p>A wearable cardioverter-defibrillator (WCD) is an external device intended to perform the same tasks as an implantable cardioverter-defibrillator (ICD) without requiring an invasive procedure. It is considered a bridge to permanent ICD placement.</p> <p>The WCD consists of a vest, worn continuously underneath clothing, and contains cardiac monitoring electrodes that deliver a counter shock. The vest is connected to a monitor with a battery pack and alarm module that interprets the cardiac rhythm and determines when a counter shock is necessary. An alarm module alerts the patient to certain conditions by lights or voice messages.</p>
Standards of Coverage	<p>The WCD may be considered medically necessary only as an interim treatment for patients at high risk of sudden cardiac arrest who:</p> <ul style="list-style-type: none">▪ Have a left ventricular ejection fraction of 35% or less; and▪ Have a temporary contraindication to receiving an ICD (i.e., a systemic infection) at the current time; and▪ Have experienced a documented episode of ventricular fibrillation or sustained (lasting 30 seconds or longer) ventricular tachyarrhythmia that was not due to a transient or reversible cause and did not occur during the first 48 hours of an acute myocardial infarction; and▪ Are tentatively scheduled for an ICD placement procedure based on one of the following:<ul style="list-style-type: none">➢ Received treatment with the goal of an ICD placement and have been scheduled for the ICD placement within three months; or➢ Had an ICD removed and have been scheduled for placement of another ICD once the contraindication has been treated. <p>WCDs will not be covered for investigational procedures or patient preference.</p>
Documentation	<p>Documentation must include the following and be made available upon request unless otherwise noted in the Standards of Coverage and PA Requirements sections of this policy:</p> <ul style="list-style-type: none">▪ Diagnosis/medical condition related to the need for the item.▪ Specific item(s) required.▪ Medical reason why receiving an ICD is not currently plausible.▪ Current treatment plan and updated recommendations.▪ Tentative scheduled date for ICD placement and/or date other ICD removed. <p>In addition to the above documentation requirements, for continued need beyond the initial 60-day approval period, compliance download data for the previous 60-day initial authorization period, or if submitting a prior authorization request 15 days prior to the end of the initial approval period; there must be a minimum of 45 days wear time download data.</p>
PA Requirements	<p>Food and Drug Administration (FDA)-registered WCDs are covered under the Medicaid and CSHCS programs with prior authorization (PA). Requests for PA (form MSA-1653-B) may only be submitted by the beneficiary's managing cardiologist and must include a current treatment plan and updated recommendations.</p> <p>PAs are approved for 60 days at a time for a maximum of four months.</p>

Medicaid Provider Manual

	<p>For continued medical need beyond the initial 60 days, a new PA request must be submitted documenting all of the following:</p> <ul style="list-style-type: none"> ▪ The beneficiary's response to and continued need for the WCD; ▪ The anticipated date of the ICD procedure; and ▪ Documentation of the beneficiary's compliance with wearing the WCD. The compliance report should demonstrate a compliance rate of at least 92% for the previous 60-day period. <p>The provider may submit an authorization request 15 days prior to the end of the initial approval period; however, there must be a minimum of 45 days wear time download data submitted with the authorization request.</p> <p>Requests for continued PA beyond the maximum of four months will be considered on a case-by-case basis. Subsequent approvals will be for month-to-month periods.</p>
Payment Rules	<p>WCDs are rental only items. The rental fee includes the vest, monitoring electrodes, therapy electrodes and batteries. The batteries, garments and electrodes may be replaced due to normal use and wear of the WCD and require PA.</p>

2.48 WHEELCHAIRS, PEDIATRIC MOBILITY, AND SEATING SYSTEMS [RE-NUMBERED 4/1/2025]

2.48.A. DEFINITIONS [RE-NUMBERED & CHANGES MADE 4/1/2025]

Wheelchair	<p>A wheelchair has special construction consisting of a frame and wheels with many different options and includes, but is not limited to, standard, light-weight, high-strength, powered, etc.</p> <p>Some wheelchairs are classified as CRT equipment. Refer to the Complex Rehabilitation Technology (CRT) Equipment/Accessories subsection and the Complex Rehabilitation Technology (CRT) Healthcare Common Procedure Coding System (HCPCS) Codes document posted on the MDHHS website. (Refer to the Directory Appendix for website information.) (text added per bulletin MMP 24-58)</p>
Pediatric Mobility Product	<p>Pediatric mobility products are pediatric-sized mobility and wheelchair seating systems that have a special light-weight construction consisting of a frame and wheels/base with many different options. Pediatric mobility devices include pediatric wheelchairs, transport chairs, specialized strollers, and wheelchair seating systems designed specifically for children with special needs. These products must meet the definition of Durable Medical Equipment (DME) (refer to the Program Overview section of this chapter) and are not available as a commercial product or for which a commercial product can be used as an economic alternative. Refer to the Children's/Adolescent Products section of this chapter for other pediatric specific products.</p> <p>Some pediatric mobility products are classified as CRT equipment. Refer to the Complex Rehabilitation Technology (CRT) Equipment/Accessories subsection and the Complex Rehabilitation Technology (CRT) Healthcare Common Procedure Coding System (HCPCS) Codes document posted on the MDHHS website. (Refer to the Directory Appendix for website information.) (text added per bulletin MMP 24-58)</p>
Licensed Medical Professional	<p>A licensed medical professional is defined as an occupational or physical therapist or a rehabilitation RN who has at least two years' experience in rehabilitation seating and is not an employee of the medical supplier.</p> <p>Medicaid policy requires that assessments must be performed by a licensed medical professional. A physical therapy assistant (PTA) or a licensed occupational therapy</p>

Medicaid Provider Manual

	<p>assistant (OTA) may not perform any part of the assessment or evaluation and may not complete or sign the MSA-1656.</p> <p>CRT equipment and accessories require an evaluation by a QHCP. Refer to the Complex Rehabilitation Technology (CRT) Equipment/Accessories subsection for additional information. (text added per bulletin MMP 24-58)</p>
Pediatric Subspecialist	<p>A pediatric subspecialist is a physician who is board-certified in a pediatric subspecialty (such as a physiatrist, neurologist, or orthopedist). A pediatrician is not considered a pediatric subspecialist relative to this policy.</p>
Institutional Residential Setting	<p>An institutional residential setting refers to a nursing facility, State Veterans' Home, hospital long-term care unit, or county medical care facility.</p>
Community Residential Setting	<p>A community residential setting is defined as a non-institutional setting in the community, i.e., beneficiary's own home, Adult Foster Care (AFC), Assisted Living or Group Home.</p>

2.48.B. STANDARDS OF COVERAGE [RE-NUMBERED & CHANGES MADE 4/1/2025]

Some wheelchairs, pediatric mobility and seating systems are classified as CRT equipment and may only be provided by a DME provider enrolled as a CRT provider. Refer to the Complex Rehabilitation Technology (CRT) Equipment/Accessories subsection of this chapter and the Complex Rehabilitation Technology (CRT) Healthcare Common Procedure Coding System (HCPCS) Codes document posted on the MDHHS website for additional information. (Refer to the Directory Appendix for website information.) All CRT equipment and accessories require prior approval. **(text added per bulletin MMP 24-58)**

Medicaid Provider Manual

Manual Wheelchair in Community Residential Setting	<p>May be covered if all of the following are met:</p> <ul style="list-style-type: none">▪ Has a diagnosis/medical condition that indicates a lack of functional ambulatory status and ambulates less than 150 feet within one minute with or without an assistive medical device.▪ Must be able to regularly use the wheelchair throughout the day.▪ Must be able to be positioned in the chair safely and without aggravating any medical condition or causing injury.▪ Purchase of a wheelchair is required for long-term use (greater than 10 months).▪ Must be able to use the wheelchair in the home environment (e.g., wheelchair must be able to fit through doorways and cross thresholds)▪ Must identify other economic alternatives considered.▪ Must have a method to propel wheelchair, which may include:<ul style="list-style-type: none">➢ Ability to self-propel for at least 60 feet over hard, smooth, or carpeted surfaces.➢ The beneficiary has a willing and able caregiver to push the chair if needed. <p>In addition:</p> <p>A standard hemi-wheelchair may be covered when a lower seat to the floor is required.</p> <p>A standard light-weight wheelchair may be covered when the beneficiary is unable to propel a standard wheelchair due to decreased upper extremity strength or secondary to a medical condition that affects endurance.</p> <p>A heavy-duty standard wheelchair may be covered if the beneficiary's weight is more than 250 pounds but does not exceed 300 pounds. (Include patient's weight in the beneficiary's file.)</p> <p>An extra heavy-duty standard wheelchair is covered if the beneficiary's weight exceeds 300 pounds. (Include patient's weight in the beneficiary's file.)</p> <p>A high-strength light-weight or ultra-light standard wheelchair may be covered when required for a specific functional need.</p> <p>A back-up or secondary standard manual wheelchair may be considered when:</p> <ul style="list-style-type: none">▪ The beneficiary is primarily a power wheelchair user but needs a manual wheelchair to have access to the community or independent living.▪ The beneficiary's medical condition requires a power wheelchair that cannot accommodate public transportation and, therefore, requires another transport device.
Manual Wheelchair in Institutional Residential Setting	<p>Coverage and reimbursement for all standard manual wheelchairs for an institutional residential setting is included in the per diem rate.</p>

Medicaid Provider Manual

Manual Wheelchair with Custom-Fabricated Seating System in both Community Residential and Institutional Residential Settings	<p>May be covered if all of the following are met, in addition to the Standards of Coverage listed under Manual Wheelchair in Community Residential Setting:</p> <ul style="list-style-type: none">▪ Medical documentation provides a clinical assessment of the specific functional/clinical need for a custom-fabricated seating system. Documentation must specifically rule out other standard seating systems. The seating system must also meet standards of coverage.▪ Must accommodate growth and adjustments for custom-fabricated seating systems a minimum of 3" in depth and 2" in width.▪ Is an integral part of the care regimen in the community residential setting or the daily nursing plan of care in an institutional residential setting.
Power Wheelchair or Power-Operated Vehicle (POV) in Both Community Residential and Institutional Residential Settings	<p>May be covered if the beneficiary meets all of the following:</p> <ul style="list-style-type: none">▪ Lacks ability to propel a manual wheelchair, or has a medical condition that would be compromised by propelling a manual wheelchair, for at least 60 feet over hard, smooth, or carpeted surfaces with or without rest intervals.▪ Requires use of a wheelchair for at least four hours throughout the day.▪ Is able to safely operate, control and maneuver the wheelchair in their environmental setting, including through doorways and over thresholds up to 1½", as appropriate.▪ Has a cognitive, functional level that permits safe operation of a power mobility device with or without training.▪ Has visual acuity that permits safe operation of a power mobility device.▪ For a three-wheeled power mobility device, has sufficient trunk control and balance.
Pediatric Mobility Devices and Wheelchairs	<p>May be covered if all of the following are met for each type of device. For CSHCS beneficiaries, a medical referral from an appropriate board-certified pediatric subspecialist or an Office of Medical Affairs (OMA)-approved physician is required. MDHHS also reserves the right to require a medical referral from an appropriate board-certified pediatric subspecialist for Medicaid beneficiaries.</p> <p>For manual pediatric wheelchairs:</p> <ul style="list-style-type: none">▪ Has a diagnosis/medical condition that indicates a lack of functional ambulatory status with or without an assistive medical device or has a willing and able caregiver to push the chair and the wheelchair is required in a community residential setting.▪ Is required for long-term use (greater than 10 months).▪ Must accommodate growth and adjustments for seating systems a minimum of 3" in depth and 2" in width.▪ Is designed to be transportable.▪ Is the most economical alternative available to meet the beneficiary's mobility needs.

Medicaid Provider Manual

	<p>For power wheelchairs:</p> <ul style="list-style-type: none"> ▪ Lacks ability to propel a manual wheelchair, or has a medical condition that would be compromised by propelling a manual wheelchair, for at least 60 feet over hard, smooth, or carpeted surfaces (this includes the need to rest at intervals). ▪ Is able to safely control the wheelchair through doorways and over thresholds up to 1½". ▪ Has a cognitive, functional level that is adequate for power wheelchair mobility. ▪ Has visual acuity that permits safe operation of a power mobility device. ▪ Must accommodate growth and adjustments for custom-fabricated seating systems a minimum of 3" in depth and 2" in width. ▪ For a three-wheeled power mobility device, has sufficient trunk control and balance. <p>For transport mobility medical devices (e.g., strollers):</p> <ul style="list-style-type: none"> ▪ Is over three years of age or has a medical condition that cannot be accommodated by commercial products. ▪ Will be the primary mobility device due to inability to self-propel a manual wheelchair or operate a power wheelchair. ▪ Is required as a transport device when the primary wheelchair cannot be designed to be transportable. ▪ Must accommodate growth and adjustments for seating systems a minimum of 3" in depth and 2" in width. ▪ Is the most economical alternative available to meet the beneficiary's mobility needs. ▪ Is required for use in the community residential setting.
<p>Standard Seating System in Community Residential Setting</p>	<p>May be covered when required to assure safe mobility and functional positioning when the beneficiary has postural deformities, contractions, tonal abnormalities, functional impairments, muscle weakness, pressure points, and seating balance difficulties.</p> <p>May be covered if all of the following are met:</p> <ul style="list-style-type: none"> ▪ Two or more of the above clinical indications are documented in the medical record and in the mobility assessment. ▪ Must accommodate growth and adjustments a minimum of 3" in depth and 2" in width. ▪ Must document the reason for the selection when the system cannot be used in more than one mobility device. ▪ Is the most economical alternative available to meet the beneficiary's mobility needs. <p>For CSHCS pediatric beneficiaries, a written order from an appropriate board-certified pediatric subspecialist or an Office of Medical Affairs (OMA)-approved physician is required. MDHHS also reserves the right to require a written order from an appropriate board-certified pediatric subspecialist for Medicaid beneficiaries.</p>

Medicaid Provider Manual

Custom-Fabricated Seating Systems	<p>May be covered when required to assure safe mobility and functional positioning when the beneficiary has postural deformities, contractions, tonal abnormalities, functional impairments, muscle weakness, pressure points, and seating balance difficulties. May be covered if all of the following are met:</p> <ul style="list-style-type: none">▪ Two or more of the above clinical indications are documented in the medical record and in the mobility assessment, and the severity of the clinical indications cannot be accommodated by a standard seating system.▪ Must accommodate growth and adjustments a minimum of 3" in depth and 2" in width.▪ Must document the reason for the selection when the system cannot be used in more than one mobility device.▪ Is the most economical alternative available to meet the beneficiary's mobility needs. <p>For CSHCS pediatric beneficiaries, a written order from an appropriate board-certified pediatric subspecialist or an Office of Medical Affairs (OMA)-approved physician is required. MDHHS also reserves the right to require a written order from an appropriate board-certified pediatric subspecialist for Medicaid beneficiaries.</p>
Manual or Power Recline Feature	<p>May be covered when needed for relief of pressure on the seat and/or back, and one of the following applies:</p> <ul style="list-style-type: none">▪ History of skin breakdown or current indication of imminent skin breakdown that cannot be controlled (or has not in the past) by less costly modalities (such as pressure relief cushions or manual pressure relief techniques).▪ Has ability to tolerate a 90-135 degree range of motion at the hip, needed for reclining without triggering excessive abnormal tone.▪ Is unable to tolerate an upright position in a wheelchair for long periods of time due to fatigue, shortness of breath, increased tone, or discomfort related to pressure that cannot be manually relieved. <p>A low shear recline back is covered when the beneficiary does not have the ability to reposition themselves in the wheelchair following reclining and the shearing would result in skin breakdown.</p>
Manual Tilt-in-Space or Recline Function in Community Residential Setting	<p>Manual tilt-in-space function allows the seat and back of the wheelchair to move as a unit, such that the angle of the back to the floor changes from approximately 90 degrees to 45 degrees or less. This change in position does not affect the hip-to-knee angle. The seat may be tilted manually.</p>

Medicaid Provider Manual

	<p>The tilt-in-space function for a wheelchair may be covered if one or more of the following apply:</p> <ul style="list-style-type: none"> History of skin breakdown or current indication of imminent skin breakdown that cannot be controlled (or has not in the past) by less costly modalities (such as pressure relief cushions or manual pressure relief techniques). Excessive extensor or flexor muscle tone that is exacerbated by change in hip angle and makes positioning in any upright chair ineffective. State reason why changing angles of position is medically necessary. Very low muscle tone that cannot maintain upright positioning against gravity, causing spinal anomalies. Beneficiary has knee contractures and a custom-molded seating system. <p>Coverage of both a manual tilt-in-space and recline function for a wheelchair requires medical need (such as high probability of the development of hip contractures) if only a tilt-in-space without recline is used. Also, there is a medical contraindication to using recline-only without the tilt-in-space function.</p>
Power Tilt-in-Space or Recline Function in Both Community Residential and Institutional Residential Settings	<p>Power tilt-in-space or recline function may be covered if all of the following exist:</p> <ul style="list-style-type: none"> An existing medical condition results in the inability to reposition self without the use of a power tilt or recline mechanism. The frequency of repositioning is clinically indicated and is an integral part of the nursing facility plan of care. Beneficiary requires assistance to use a manual tilt-in-space or recline system, and there are regular periods of time that the beneficiary is without assistance. Beneficiary requires assistance to use a manual tilt-in-space or recline system, and is able to independently care for themselves when provided a power tilt-in-space or recline modification. <p>For CSHCS pediatric beneficiaries, a written order from an appropriate board-certified pediatric subspecialist or an Office of Medical Affairs (OMA)-approved physician is required. MDHHS also reserves the right to require a written order from an appropriate board-certified pediatric subspecialist for Medicaid beneficiaries.</p>
Wheelchair Accessories	<p>Reimbursement may be made for separate wheelchair accessories that have designated HCPCS codes. Separate reimbursement may be considered for specific wheelchair accessory codes when provided in conjunction with the purchase of a manual wheelchair, power wheelchair, or an addition to an existing wheelchair if:</p> <ul style="list-style-type: none"> It is required to provide safety. It is required for appropriate positioning. It is the most economical alternative. <p>For additions to an existing wheelchair, the physician or the occupational or physical therapist must address the status/condition of the current wheelchair and include the brand, model, serial number, and age of the current wheelchair. If MDHHS did not purchase the wheelchair being modified, all documentation requirements must be provided as if the request is for a new or initial wheelchair. Refer to the Non-Covered Items section of this chapter for information on accessories that are not covered.</p>

Medicaid Provider Manual

2.48.C. PRIOR AUTHORIZATION FOR PURCHASE, RENTALS, REPAIRS, AND/OR REPLACEMENT OF MOBILITY DEVICES [RE-NUMBERED & CHANGES MADE 4/1/2025]

Prior Authorization	<p>The Medicaid Utilization Analyst (Program Review Division) is the authorized Medicaid representative who determines if the service requested falls within the standards of coverage. A prior authorization request may be returned or denied if the documentation is incomplete and not specific to the beneficiary and device requested.</p> <p>MDHHS reserves the right to request additional documentation to determine medical necessity. For CSHCS beneficiaries, a medical referral from an appropriate board-certified pediatric subspecialist or an Office of Medical Affairs (OMA)-approved physician is required. MDHHS also reserves the right to require a medical referral from an appropriate board-certified pediatric subspecialist for Medicaid beneficiaries.</p> <p>For beneficiaries in the community residential setting, the decision notice is sent to the medical supplier with a copy to the beneficiary.</p> <p>For beneficiaries in the institutional residential setting, the decision notice is sent to the institutional residence with a copy to the beneficiary.</p> <p>Prior authorization is required for:</p> <ul style="list-style-type: none">▪ Power wheelchairs, power-operated vehicles, seating, and accessories.▪ New and replacement custom-fabricated seating systems, and the addition of functions for tilt-in-space and/or recline (power or manual).▪ All CRT equipment and accessories. (Refer to the Complex Rehabilitation Technology (CRT) Equipment/Accessories subsection for additional information.) (text added per bulletin MMP 24-58)▪ Diagnosis/medical conditions that are not listed as approved to bypass prior authorization for pediatric mobility items.▪ Replacement of standard wheelchairs beyond established timeframes. <p>Standard wheelchairs with specified accessories/add-ons do not require prior authorization if the Standards of Coverage and Documentation requirements are met. Consult the Medicaid Code and Rate Reference tool and the Wheelchair/Power-Operated Mobility Accessory Reimbursement document on the MDHHS website for accessories/add-on items that require prior authorization and/or are included in the wheelchair base. (Refer to the Directory Appendix for website information.)</p>
Clinical Documentation	<p>The evaluation and clinical documentation (MSA-1656) must be submitted within 90 days of the date the evaluation was completed. Clinical documentation must include how the requested seating or mobility device is the most appropriate to assist in performing MRADL.</p> <p>For CSHCS beneficiaries, a medical referral from an appropriate board-certified pediatric subspecialist or an Office of Medical Affairs (OMA)-approved physician is required. MDHHS also reserves the right to require a medical referral from an appropriate board-certified pediatric subspecialist for Medicaid beneficiaries.</p>

Medicaid Provider Manual

Prior Authorization Exceptions	<p>Prior authorization is not required for the following if standards of coverage are met:</p> <ul style="list-style-type: none">▪ Specific accessory codes and/or repair codes.▪ Specific pediatric mobility devices that do not include any accessories if the related diagnosis/condition is one of the following:<ul style="list-style-type: none">➤ Spinal Muscular Atrophy➤ Motor Neuron Disease➤ Anterior Horn Cell Disease, Unspecified➤ Other Anterior Horn Cell Disease➤ Hemiplegia and Hemiparesis➤ Infantile Cerebral Palsy➤ Myoneural Disorders, Unspecified➤ Other Specified Myoneural Disorders➤ Spina Bifida with Hydrocephalus➤ Spina Bifida without Mention of Hydrocephalus➤ Spina Bifida (Other Congenital Anomalies of Nervous System)➤ Microcephalus➤ Reduction Deformities of Brain➤ Congenital Hydrocephalus➤ Muscular Dystrophies and Other Myopathies <p>NOTE: All CRT equipment and accessories require PA regardless of diagnosis. (Refer to the Complex Rehabilitation Technology (CRT) Equipment/Accessories subsection for additional information.) (text added per bulletin MMP 24-58)</p> <p>NOTE: If prior authorization is required for any component of the mobility device (including accessories), then PA is required for the device as well. For example, if a custom-fabricated seating system is required, then prior authorization for the pediatric mobility device is also required.</p>
Rentals, Repairs and Replacement	<p>A wheelchair can be considered a capped rental or a purchase item.</p> <p>Repairs</p> <p><u>Labor (K0739):</u> MDHHS developed a Wheelchair Repair/Labor Guide for providers to use to determine the maximum allowed number of units of labor for repairs to wheelchairs using replacement parts/accessories with identified HCPCS codes. The guide is posted on the Provider Specific (Medical Supplier) page of the MDHHS website. (Refer to the Directory Appendix for website information.)</p> <p>To request labor, report HCPCS code K0739 and the total number of units on the prior authorization request. Providers may request no more than the allowable number of labor units listed in the Wheelchair Repair/Labor Guide for each replacement part regardless of actual repair time.</p> <p>All repairs include screws, nuts and bolts unless otherwise stipulated in the Guide.</p>

Medicaid Provider Manual

Labor associated with the removal of the original component part, replacement with a new component, and finishing is included in the total number of labor units indicated in the Wheelchair Repair/Labor Guide.

All costs to repair the wheelchair must be included on the PA request, including cost for parts and labor.

The estimated cost to repair versus replace the wheelchair must be included on the PA request when requesting repairs using multiple component parts/accessories.

Beneficiary-owned and purchased by MDHHS:

- Covered only after the manufacturer's warranty has been exhausted.
- If the DME provider is the same provider that originally supplied the wheelchair, a new certificate of medical necessity (CMN) and/or physician's order is not necessary.
- The treating physician or the DME provider must document the repair is reasonable and necessary. Generalized statements (e.g. "item worn out") are not specific enough to confirm the need for the repair(s).
- The DME provider must document the reason for the repair(s), submit this information with the PA request, and keep a copy of the documentation in the beneficiary file.

MDHHS did not purchase the original wheelchair:

- Covered only after the manufacturer's warranty has expired.
- Requires a new physician order, CMN, and required documentation indicated in the wheelchair and repair policies must be completed and submitted with the PA request.
- The DME provider must document the repair is reasonable and necessary. Generalized statements (e.g. "item worn out") are not specific enough to confirm the need for the repair(s).
- The DME provider must document the reason for the repair(s), submit this information with the PA request, and keep a copy of the documentation in the beneficiary file.

It is the responsibility of the provider to supply loaner equipment while the original item is being serviced.

MDHHS will not pay for repairs to parts/accessories that are not typically covered by Medicaid or that were not approved for the initial purchase of the wheelchair/accessory.

The repair of a second (older) manual or power wheelchair used as a back-up wheelchair is not covered.

Routine cleaning of wheelchairs or parts is not covered.

MDHHS does not reimburse for labor and repairs:

- For initial purchases;
- During rental periods; or
- For items under warranty.

Refer to the Repairs and Replacement Parts subsection of this chapter for further repair policy.

Medicaid Provider Manual

	<p>Replacement of a mobility device is subject to the manufacturer's warranty and/or cost of repairs. The replacement may also be considered when a significant change in the beneficiary's condition has occurred or the item cannot be restored to a serviceable condition. Replacement of wheelchairs for youth will be evaluated on an individual basis due to the expected growth pattern. Based on these conditions, a wheelchair may be considered for replacement every five years for adults and every two years for children.</p> <p>Medicaid will not authorize coverage of replacement of any DME item or accessory that is requested solely because new technology is available. Replacement or modifications must be medically necessary and required as a result of a change in the medical condition that makes the covered service unusable or contraindicated.</p>
Prior Authorization Process for Beneficiaries in the Community Residential Setting	<p>The prior authorization process for beneficiaries in the community residential setting is initiated by the treating physician's written order for a seating/mobility evaluation that includes the reason for the referral. The evaluation must be completed by a licensed medical professional using the Evaluation and Medical Justification for Complex Seating Systems and Mobility Devices form (MSA-1656).</p> <p>(Refer to the Prior Authorization Form subsection and the Evaluation and Medical Justification for Complex Seating Systems and Mobility Devices Form subsection of this chapter for additional information.)</p>
Prior Authorization Process for Beneficiaries in the Institutional Residential Setting	<p>Prior authorization is required for Medicaid coverage and separate reimbursement for medically necessary power-operated vehicles and power or manual wheelchairs with custom-fabricated seating systems. The request for a resident assessment must be initiated by the treating physician with the stated medical reason for the referral. Facility clinicians who are responsible for the overall nursing plan of care and treatment of the resident will prepare and submit prior authorization requests and medical documentation directly to the MDHHS Program Review Division.</p> <p>Refer to the Nursing Facility Coverages chapter for additional information regarding prior authorization of wheelchairs and custom-fabricated seating systems for beneficiaries in an institutional residential setting.</p> <p>(Refer to the Prior Authorization Form subsection and the Evaluation and Medical Justification for Complex Seating Systems and Mobility Devices Form subsection of this chapter for additional information.)</p>

2.49 VENTILATORS [RE-NUMBERED 4/1/2025]

Definition	<p>A ventilator is a device designed to intermittently or continuously assist or control pulmonary ventilation.</p> <ul style="list-style-type: none">▪ A negative pressure ventilator exerts negative (subatmospheric) pressure on the exterior chest wall.▪ A positive pressure ventilator ventilates the lungs as the result of a positive pressure applied to the airway.
Standards of Coverage	<p>Negative and positive pressure ventilators may be covered when there is a respiratory related diagnosis (e.g., neuromuscular disease, thoracic restrictive disease, chronic respiratory failure) and the beneficiary requires ventilator assistance.</p>

Medicaid Provider Manual

Documentation	Documentation must be less than 90 days old and include the following: <ul style="list-style-type: none">▪ Respiratory diagnosis/medical condition related to the need for the ventilator.▪ Type of ventilator ordered.▪ Ventilator settings.▪ Number of hours beneficiary is required to use the ventilator.
PA Requirements	PA is required for all ventilators.
Payment Rules	<p>All ventilators are a rental only item and are inclusive of the following:</p> <ul style="list-style-type: none">▪ All accessories needed to use the unit (e.g., circuits, water feed sets, adaptors, temperature probes, filters, heated or nonheated humidifier, oxygen analyzer, water or saline for humidifier, etc.).▪ Education on the proper use and care of the equipment.▪ Routine servicing and all necessary repairs or replacements to make the unit functional. <p>An additional ventilator may only be covered to allow a beneficiary access to the community. When billing more than one vent, the additional vent must be reported using a NOC code. A backup ventilator in case of a power failure is not separately reimbursable.</p>

Medicaid Provider Manual

SECTION 1 – GENERAL INFORMATION

MI Choice is a waiver program operated by the Michigan Department of Health and Human Services (MDHHS) to deliver home and community-based services to elderly persons and persons with physical disabilities who meet the Michigan nursing facility level of care criteria. The waiver is approved by the Centers for Medicare & Medicaid Services (CMS) under sections 1915(b) and 1915(c) of the Social Security Act. MDHHS carries out its waiver obligations through a network of enrolled providers that operate as Prepaid Ambulatory Health Plans (PAHPs). These entities are commonly referred to as waiver agencies. MDHHS and its waiver agencies must abide by the terms and conditions set forth in the approved waivers.

MI Choice services are available to qualified participants throughout the state, and all provisions of the program are available to each qualified participant unless otherwise noted in this policy and approved by CMS. MDHHS will not enact any provision to the MI Choice program that prohibits or inhibits a participant's access to a person-centered service plan, discourages participant direction of services, interferes with a participant's right to have grievances and complaints heard, or endangers the health and welfare of a participant. The program must monitor and actively seek to improve the quality of services delivered to participants. Safeguards are utilized to ensure the integrity of payments for waiver services and the adequacy of systems to maintain compliance with federal requirements.

Waiver agencies are required to provide oral and written assistance to all Limited English Proficient applicants and participants. Agencies must arrange for translated materials to be accessible or make such information available orally through bilingual staff or the use of interpreters.

Medicaid Provider Manual

SECTION 2 – ELIGIBILITY

The MI Choice program is available to persons who are either elderly (age 65 or older) or adults with disabilities age 18 or older and meet the following eligibility criteria:

- An applicant must establish their financial eligibility for Medicaid services as described in the Financial Eligibility subsection of this chapter.
- Must be categorically eligible for Medicaid as aged or disabled.
- The applicant must meet functional eligibility requirements through the online version of the Michigan Medicaid Nursing Facility Level of Care Determination (LOCD).
- It must be established that the applicant requires at least two waiver services, one of which must be supports coordination, and that the service needs of the applicant cannot be fully met by existing State Plan or other services.

All criteria must be met to establish eligibility for the MI Choice program. MI Choice participants must continue to meet these eligibility requirements on an ongoing basis to remain enrolled in the program.

2.1 FINANCIAL ELIGIBILITY

Medicaid reimbursement for MI Choice services requires a determination of Medicaid financial eligibility for the applicant by MDHHS. As a provision of the waiver, MI Choice applicants benefit from an enhanced financial eligibility standard compared to basic Medicaid eligibility. Specifically, MI Choice is available to participants in the special home and community-based group under 42 CFR §435.217 with a special income level up to 300% of the Supplemental Security Income (SSI) Federal Benefit Rate. Medicaid eligibility rules stipulate that participants are not allowed to spend-down to the income limit to become financially eligible for MI Choice.

To initiate a financial eligibility determination, MI Choice waiver agencies must enter enrollment notifications electronically in the Community Health Automated Medicaid Processing System (CHAMPS). Once the electronic enrollment is completed in CHAMPS, the participant will be assigned an associated MI Choice Program Enrollment Type (PET) code. MI Choice waiver agencies must enter disenrollment notifications electronically in CHAMPS to notify MDHHS of participants who are no longer enrolled in MI Choice. Once an electronic disenrollment is completed in CHAMPS, the participant's PET code will end to reflect a disenrollment date. Proper recordkeeping requirements must be followed and reflected in the applicant's or participant's case record.

2.2 FUNCTIONAL ELIGIBILITY

The MI Choice waiver agency must verify an applicant's functional eligibility for program enrollment using the LOCD application in CHAMPS. Waiver agencies must conduct an LOCD in person with an applicant and submit that information in the LOCD application in CHAMPS, or the agency may adopt an existing LOCD conducted by another provider. The information submitted is put through an algorithm within the application to determine whether the applicant meets LOCD criteria. Only the LOCD application in CHAMPS can determine functional eligibility for the nursing facility level of care. Additional information can be found in the Nursing Facility Level of Care Determination Chapter and is applicable to MI Choice applicants and participants.

Medicaid Provider Manual

2.2.A. FREEDOM OF CHOICE

Prior to MI Choice enrollment, all applicants and their legal representatives must be given information regarding all Medicaid long-term services and supports options for which they qualify through the LOCD, including MI Choice, Nursing Facility, MI Health Link, and the Program of All-Inclusive Care for the Elderly (PACE). Qualified applicants may only enroll in one long-term services and supports program at any given time. Nursing facility, PACE, MI Choice, MI Health Link, and Home Help services cannot be chosen in combination with each other. Applicants must indicate their choice, subject to the provisions of the Need for MI Choice Services subsection of this chapter, and document via their signature and date that they have been informed of their options through the Freedom of Choice (FOC) form that is provided to an applicant at the conclusion of any LOCD process. Applicants must also be informed of other service options that do not require Nursing Facility Level of Care, including Home Health and Home Help State Plan services, as well as other local public and private service entities. The FOC form must be signed and dated by the supports coordinator and the applicant (or their legal representative) seeking services and is to be maintained in the applicant's case record and a copy provided to the applicant or participant upon request. Additional information can be found in the Nursing Facility Level of Care Determination Chapter.

The FOC form must be completed with each conducted LOCD and any time an LOCD is adopted. Waiver agencies must make a considerable effort to obtain all necessary signatures. If the waiver agency is unable to obtain signatures from the beneficiary, or their representative, the attempts to get signatures must be documented. While informing the beneficiary of available choices for the receipt of long-term services and supports is the main reason for the FOC form, this form also serves to verify that the waiver agency conducted an LOCD. Should there be any issues with the LOCD being uploaded and saved in CHAMPS, the FOC form will provide verification that the LOCD was conducted and whether the beneficiary met LOCD.

2.3 NEED FOR MI CHOICE SERVICES

In addition to meeting financial and functional eligibility requirements and to be enrolled in the program, MI Choice applicants must demonstrate the need for a minimum of two covered services, one of which must be supports coordination, as determined through an in-person assessment and the person-centered planning process. Applicants must also agree to receive MI Choice services on a regular basis, at least every 30 days.

An applicant cannot be enrolled in MI Choice if their service and support needs can be fully met through the intervention of State Plan or other available Medicaid services. State Plan and MI Choice services are not interchangeable. MI Choice services differ in nature and scope from similar State Plan services and often have more stringent provider qualifications.

2.4 EXCLUDED FROM ELIGIBILITY

The MI Choice population specifically excludes the following groups:

- Medicaid-eligible persons who reside in intermediate care facilities for individuals with intellectual disabilities (ICF/IID) or a state psychiatric hospital,

Medicaid Provider Manual

- Medicaid-eligible persons enrolled in a qualified health plan (e.g., health maintenance organization) or managed care organization,
- Persons enrolled in PACE,
- Persons enrolled in the Habilitation Supports Waiver program,
- Persons enrolled in the MI Health Link program,
- Persons enrolled in the Home Help Services program whose service and support needs are fully met by that program,
- Persons enrolled in the Healthy Michigan Plan,
- Nursing facility residents, and
- Medicaid-eligible persons admitted to a hospice or palliative care facility.

Medicaid Provider Manual

SECTION 3 – ENROLLMENT

MI Choice waiver agencies determine the enrollment dates upon MDHHS financial eligibility verification, and termination dates for each participant for whom they provide waiver services. No applicant shall be granted enrollment status without fully meeting all eligibility requirements. MI Choice applicants require at least two waiver services on a continual basis, one of which must be supports coordination, in order to be enrolled in MI Choice. When a potentially eligible applicant cannot be enrolled due to the waiver agency being at capacity, the applicant is placed on a waiting list. Refer to the Waiting Lists subsection for additional information. MDHHS reviews and provides final approval for determinations that result in enrollment, denials or terminations for MI Choice.

3.1 GENERAL PROVISIONS OF PARTICIPATION

There are a number of circumstances that play a role in the eligibility status of MI Choice participants. The following subsections define these impacts.

3.1.A. ENROLLMENT IN OTHER PROGRAMS AND PROGRAM ENROLLMENT TYPES

A program participant cannot be simultaneously enrolled in both MI Choice and a Medicaid Health Plan, PACE, MI Health Link, or any other §1915(c) waiver program. Applicants must choose one program in which they wish to enroll. It is not necessary to either delay MI Choice enrollment or withhold MI Choice services pending the disenrollment process from any of the Medicaid Health Plans, but some programs require the individual to enroll on the first day of the month and disenroll only on the last day of the month. Enrollment and disenrollment policies for other programs must be followed to determine when to enroll someone in MI Choice.

Waiver agencies submit enrollment information directly to CHAMPS and CHAMPS will assign the appropriate MI Choice PET code once all information required is verified.

3.1.A.1. HOSPICE ENROLLMENT

A participant in the MI Choice program may receive Hospice services simultaneously when in a home and community-based setting. The individual must not be residing in a nursing facility or hospice residential facility while receiving MI Choice services. Individuals who are enrolled in both MI Choice and Hospice will have a PET code indicating this. For additional information regarding Hospice services, refer to the Hospice Chapter of this Manual. Participants who receive both MI Choice and Hospice or Palliative Care services must have a coordinated person-centered plan (PCP). MDHHS may employ a post-payment review to monitor services. If MDHHS finds that inappropriate (i.e., duplicative) services were authorized, MDHHS will seek recovery of Medicaid funds paid for duplicative services from the waiver agency.

Medicaid Provider Manual

3.1.A.2. MEDICAID QUALIFIED HEALTH PLANS (QHP)

An applicant enrolled in a Medicaid Qualified Health Plan (QHP) must choose between MI Choice services or the QHP. A Medicaid recipient cannot receive MI Choice services and enroll in the Medicaid QHP. When an applicant chooses MI Choice, the waiver agency will enter MI Choice enrollment information directly in CHAMPS.

3.1.A.3. NURSING FACILITY ADMISSIONS

When a MI Choice participant is admitted to a nursing facility from MI Choice, the waiver agency will enter the MI Choice disenrollment information in CHAMPS. The MI Choice end date will be the day before the nursing facility admission. Waiver agencies are encouraged to verify nursing facility admission dates with the nursing facility. When a previous MI Choice participant is discharged from the nursing facility, the waiver agency may reenroll the participant on the day of the nursing facility discharge through the enrollment process in CHAMPS. This change does not affect the LOCD requirements.

3.1.A.4. HOSPITAL ADMISSIONS

A hospital admission is not an enrollment in a Benefit Plan or PET. Generally, waiver agencies do not provide MI Choice services, other than supports coordination (SC) and possibly continuation of a personal emergency response system (PERS), to participants while hospitalized.

A MI Choice participant admitted to a hospital may remain enrolled in MI Choice for up to 30 days. The waiver agency must provide the participant with an adverse benefit determination upon notification of a hospitalization if it is necessary for the agency to suspend MI Choice services during the hospitalization. When the participant is hospitalized for less than 30 days, the participant's services may restart upon discharge from the hospital. If the participant is discharged after 30 days, the participant may re-enroll in MI Choice using standard enrollment procedures. If a participant is admitted to a nursing facility from a hospital before the 30th day of hospital stay, the last MI Choice eligibility date is the day before the date of nursing facility admission.

3.1.A.5. ENROLLMENT IN MI HEALTH LINK

Individuals enrolled in MI Health Link cannot also enroll in MI Choice. Individuals should be referred to a Medicare/Medicaid Assistance Program counselor for options counseling before deciding to opt-out or disenroll from MI Health Link. Michigan ENROLLS handles all enrollments, disenrollments and opt-outs for MI Health Link. All MI Health Link disenrollments are effective on the last day of a month. Normally, this is the last day of the month of the request. For requests made later in the month, the disenrollment may not take effect until the last day of the month following the month of the request. Eligible individuals may enroll in MI Choice after the effective date of the MI Health Link disenrollment.

MI Health Link has nine PET codes depending upon the living arrangement of the individual.

Medicaid Provider Manual

Waiver agencies will need to coordinate enrollments with the MI Health Link discharge to ensure the proper MI Choice PET sets on the day of MI Choice enrollment. MI Health Link discharges will be effective on the last day of the month. Therefore, MI Choice must not enroll until the first day of the following month.

3.1.B. INSTITUTIONAL STAYS

There are occasions when a MI Choice participant requires a short-term admission to an institutional setting for treatment. The impact of such an institutional stay is dependent on the type of admission and the length of the stay.

A short-term hospital admission does not necessarily impact a participant's MI Choice enrollment status. The participant's supports coordinator must temporarily suspend the delivery of MI Choice waiver services during the hospital stay to avoid duplication of services from the hospital and MI Choice; however, the participant may remain enrolled in MI Choice. A participant who is hospitalized for more than 30 consecutive days must be disenrolled.

A participant admitted to a nursing facility for rehabilitation services or for any reason other than an approved short-term out-of-home respite stay must be disenrolled from MI Choice on the date prior to the nursing facility admission. The individual may be re-enrolled into MI Choice upon discharge from the nursing facility as long as the individual meets eligibility criteria as described in the Eligibility section of this chapter.

3.2 MI CHOICE INTAKE GUIDELINES

The MI Choice Intake Guidelines (MIG) is a list of questions designed to screen applicants for eligibility and further assessment. Additional probative questions are permissible when needed to clarify eligibility. The MIG does not, in itself, establish program eligibility. A properly completed MIG is mandatory for MI Choice waiver agencies prior to placing applicants on a MI Choice waiting list when the waiver agency is operating at its capacity. Individuals who score as Level C, Level D, Level D1 or Level E are those applicants determined potentially eligible for program enrollment and will be placed on the waiver agency's MI Choice waiting list. The date of the MIG contact establishes the chronological placement of the applicant on the waiting list. The MIG may be found on the MDHHS website. (Refer to the Directory Appendix for website information.)

When the waiver agency is at capacity, applicants requesting enrollment in MI Choice must either be screened by telephone or in person using the MIG at the time of their request for proper placement on the waiting list. If a caller is seeking services for another individual, the waiver agency will either contact the applicant for whom services are being requested or complete the MIG to the extent possible using information known to the caller. For applicants who are deaf, hearing impaired, or otherwise unable to participate in a telephone interview, the waiver agency must use the applicant's preferred means of communication. It is acceptable to use an interpreter, a third-party in the interview, or assistive technology to facilitate the exchange of information.

As a rule, nursing facility residents who are seeking to transition into MI Choice are not contacted by telephone but rather are interviewed in the nursing facility. For the purposes of establishing a point of reference for the waiting list, the date of the initial nursing facility visit (introductory interview) shall be considered the same as conducting a MIG, so long as the functional objectives of the MIG are met.

Medicaid Provider Manual

(Refer to the Waiting Lists subsection of this chapter for additional information.) Specifically, the introductory meeting must establish a reasonable expectation that the applicant will meet the functional and financial eligibility requirements of the MI Choice program within the next 60 days.

Applicants who are expected to be ineligible based on MIG information may request a face-to-face evaluation using the LOCD and financial eligibility criteria. Such evaluations should be conducted as soon as possible, but must be done within 10 business days of the date the MI Choice Intake Guidelines was administered. MI Choice waiver agencies must issue an adverse action notice advising applicants of any and all appeal rights when the applicant appears ineligible either through the MIG or a face-to-face evaluation.

When an applicant appears to be functionally eligible based on the MIG but is not expected to meet the financial eligibility requirements, the MI Choice waiver agency must place the applicant on the waiting list if it is anticipated that the applicant will become financially eligible within 60 days.

The MIG is the only recognized tool accepted for telephonic screening of MI Choice applicants and is only accessible to MI Choice waiver agencies. It is not intended to be used for any other purpose within the MI Choice program, nor any other Medicaid program. MI Choice waiver agencies must collect MI Choice Intake Guidelines data electronically using software through the MDHHS contracted vendor.

3.3 ENROLLMENT CAPACITY

MI Choice capacity is limited to a maximum number of participants served at any point in the fiscal year as specified in the approved waiver application. Waiver agencies are allocated a specific number of slots each fiscal year and are responsible for managing enrollment so as not to exceed the maximum number of participants served at any point in the fiscal year. MDHHS reserves the right to reallocate slots as necessary to best meet MI Choice program demands.

3.4 WAITING LISTS

Whenever the number of participants receiving services through MI Choice exceeds the existing program capacity, any screened applicant must be placed on the MI Choice waiting list. The waiting list must be actively maintained and managed by each MI Choice waiver agency. The enrollment process for the MI Choice program is not ever actually or constructively closed. The applicant's place on the waiting list is determined by priority category in the order described below. Within each category, an applicant is placed on the list in chronological order based on the date of their request for services. This is the only approved method of accessing waiver services when the waiver program is at capacity.

3.4.A. PRIORITY CATEGORIES

Applicants will be placed on the waiting list by priority category and then chronologically by date of request of services. Enrollment in MI Choice is assigned on a first-come/first-served basis using the following categories, listed in order of priority given.

Waiver agencies are required to conduct follow-up phone calls to all applicants on the waiting list. The calls are to determine the applicant's status, offer assistance in accessing alternative services, identify applicants who should be removed from the list, and identify applicants who might be in crisis or at imminent risk of admission to a nursing facility. Each applicant on the waiting list is to be contacted at least once every

Medicaid Provider Manual

90 days. Applicants in crisis or at risk require more frequent contacts. Each waiver agency is required to maintain a record of these follow-up contacts.

3.4.A.1. STATE PLAN PRIVATE DUTY NURSING AGE EXPIRATIONS

This category includes only those applicants who continue to require Private Duty Nursing services at the time such coverage ends due to age restrictions.

3.4.A.2. NURSING FACILITY TRANSITIONS

Nursing facility residents who desire to transition to the community and will otherwise meet enrollment requirements for MI Choice qualify for this priority status. Priority status is not given to applicants whose service and support needs can be fully met by existing State Plan services.

3.4.A.3. ADULT PROTECTIVE SERVICES (APS) AND DIVERSIONS

An applicant with an active Adult Protective Services (APS) case is given priority when critical needs can be addressed by MI Choice services. It is not expected that MI Choice waiver agencies solicit APS cases, but priority is given when necessary.

An applicant is eligible for diversion priority if they are living in the community or are being released from an acute care setting and are found to be at imminent risk of nursing facility admission. Imminent risk of placement in a nursing facility is determined using the Imminent Risk Assessment (IRA), an evaluation developed by MDHHS. Use of the IRA is essential in providing an objective differentiation between those applicants at risk of a nursing facility placement and those at imminent risk of such a placement. Only applicants found to meet the standard of imminent risk are given priority status on the waiting list. Applicants may request that a subsequent IRA be performed upon a change of condition or circumstance.

Supports coordinators must administer the IRA in person. The design of the tool makes telephone contact insufficient to make a valid determination. Waiver agencies must submit a request for diversion status for an applicant to MDHHS. (Refer to the Directory Appendix for details.) A final approval of a diversion request is made by MDHHS.

3.4.A.4. CHRONOLOGICAL ORDER BY SERVICE REQUEST DATE

This category includes applicants who do not meet any of the above priority categories or for whom prioritizing information is not known. As stated, applicants will be placed on the waiting list in the chronological order that they requested services as documented by the date of MIG completion or the initial nursing facility introductory meeting.

3.4.B. REMOVING APPLICANTS FROM WAITING LIST

Each waiver agency must follow these waiting list removal guidelines when removing an applicant from the MI Choice waiting list. A MI Choice waiver agency may remove an applicant from the MI Choice waiting list if the applicant:

Medicaid Provider Manual

- Enrolled in MI Choice;
- Enrolled in another community-based service or program and that program is meeting the individual's needs;
- Was admitted to a nursing facility and is no longer interested in MI Choice;
- Is deceased;
- Moved out of state;
- Is not eligible for MI Choice;
- Is no longer interested in or refuses MI Choice enrollment; or
- Is unable to be contacted by the waiver agency using all of the following methods:
 - The waiver agency called at least three times with a varied day of week and time of day.
 - If the waiver agency was able to leave a message, and the applicant did not return the call within 10 business days.
 - The waiver agency sent a letter to the applicant with a deadline to contact the waiver agency within 12 business days, and the applicant either did not respond or mail was returned.

An Adequate Action Notice must be sent to the applicant no later than the date of removal from the MI Choice waiting list. MI Choice waiver agencies can obtain a template for the Adequate Action Notice on the MDHHS website. (Refer to the Directory Appendix for website information.)

3.5 ENROLLMENT SLOTS

CMS approves a given number of enrollment slots for the MI Choice program in the waiver application process. A slot consists of the enrollment of a participant for the duration of the fiscal year or, in other words, the total number of slots used is an unduplicated count of participants for the fiscal year. Therefore, a participant who might be enrolled and disenrolled from MI Choice numerous times throughout a given fiscal year utilizes only a single slot. Similarly, a participant might be disenrolled from the program at any given time, yet continues to occupy a slot until the conclusion of the fiscal year. It is an important distinction between that which constitutes enrollment and what is counted as a slot. Having a slot does not infer current enrollment.

3.6 ENROLLMENT IN MI CHOICE

After eligibility is determined, waiver agencies manage applicant enrollment into MI Choice. Waiver agencies develop written procedures for managing enrollment activities that are consistent with MDHHS policy.

3.6.A. FIRST DAY OF ENROLLMENT

The waiver agency establishes MI Choice enrollment and termination dates. The waiver agency is responsible for providing written notification to the MDHHS Field Office of these dates (refer to the Bridges Eligibility Manual, number 106); the MDHHS Field Office will

Medicaid Provider Manual

confirm eligibility for the dates specified. The waiver agency must enter enrollment and disenrollment information directly in CHAMPS. CHAMPS will then notify the MDHHS Field Office of the enrollment and disenrollment dates and will update other systems as necessary. The MI Choice enrollment date is on or following the assessment date. The enrollment date usually coincides with the date of assessment. However, the following situations may delay enrollment for a MI Choice participant:

- The waiver agency assesses an applicant in a nursing facility or hospital, or the applicant has another Medicaid PET code assigned at the time of the assessment.
 - On a date following assessment, the applicant returns home, to the community, or terminates participation in the other Medicaid program. MI Choice enrollment may begin only after the individual returns home or terminates participation in the other program.
 - Waiver agencies coordinate with the MDHHS Field Office or the other program to ensure termination from the other program before enrolling the participant in MI Choice. As a reminder, individuals transferring from MI Health Link, PACE, or the Habilitation Supports Waiver may only do so on the first of the month. Waiver agencies submit enrollment information in CHAMPS.
 - The waiver agency establishes the applicant's enrollment date on a date following discharge from the nursing facility, hospital, or other program. MI Choice enrollments can occur on the day of discharge from the nursing facility or hospital. The enrollment date must not be the assessment date when the individual was assessed while in the nursing facility or hospital unless the assessment date was the day of discharge from the nursing facility or hospital.
- An applicant is hospitalized after the waiver agency conducts an assessment. The waiver agency must delay establishing the enrollment date until after the applicant is discharged from the hospital.
- The applicant currently participates in the Home Help Services program. The waiver agency verifies and documents that the Home Help Services program no longer meets the service and support needs of the applicant. Waiver agencies may only make this determination through an in-home assessment and evaluation of the applicant. Waiver agencies MAY NOT require the individual to request and have additional Home Help Services benefits denied before making this determination.
 - The waiver agency requests termination of the Home Help Services program before MI Choice enrollment and asks the applicant to notify the MDHHS Field Office of this decision to terminate the Home Help Services program enrollment.
 - Participants are entitled to receive State Plan services while in MI Choice; however, MI Choice will meet all personal care needs so that the individual does not require Home Help Services when enrolled in MI Choice. The supports coordinators (SCs) should fully explain this choice to applicants requesting to switch from the Home Help Services program to MI Choice.
- An applicant is assessed at the end of a month. The waiver agency, with approval from the applicant, may establish the MI Choice enrollment date on the first day of the following month.

Medicaid Provider Manual

- The waiver agency assesses the applicant and determines the applicant meets LOCD criteria but has excess assets. The waiver agency shall delay enrollment into MI Choice until the MDHHS Field Office determines the applicant financially eligible.
- The applicant is enrolled in another managed long term services and supports (LTSS) program, including MI Health Link, PACE and Habilitation Supports Waiver, at the time of assessment. These are managed care programs where disenrollment is effective at the end of the month. The waiver agency will have to coordinate the MI Choice enrollment date to be the first day of the month after the effective date of the MI Health Link, PACE or Habilitation Supports Waiver disenrollment.
- The applicant does not have Medicaid at the time of assessment. Before the waiver agency can presume the applicant eligible for MI Choice, the applicant must submit a Medicaid application to the MDHHS Field Office. The waiver agency has several choices once the Medicaid application is in the approval process.
 - Do not enroll until Medicaid eligibility is confirmed. The waiver agency may wait to determine the MI Choice enrollment date. The waiver agency notifies the MDHHS Field Office that it has assessed the applicant and determined the applicant meets all eligibility criteria, except Medicaid eligibility. This means the applicant has been approved for the waiver. The waiver agency will not enroll the applicant in MI Choice until the MDHHS Field Office confirms Medicaid eligibility. The waiver agency should not enter enrollment information into CHAMPS until Medicaid eligibility is determined and the enrollment date is verified. MI Choice enrollment occurs when all eligibility criteria has been confirmed and the waiver agency starts providing MI Choice services. In this situation, the first date of MI Choice enrollment cannot be sooner than the date the MDHHS Field Office confirms Medicaid eligibility, regardless of any retroactive Medicaid eligibility dates. It may be necessary to complete an additional LOCD or interRAI Home Care (iHC) assessment depending on the length of time it takes the MDHHS Field Office to make this determination. The waiver agency cannot assign the applicant a status of Waiver/Pending or Waiver/Yes from the date of assessment to the date of Medicaid eligibility confirmation. The applicant may have an eligibility status of Waiver/Ineligible or Waiver Financially Ineligible while waiting for the Medicaid confirmation.
 - Presume eligible and MDHHS confirms Medicaid eligibility. The waiver agency may presume the MDHHS Field Office will approve the applicant's Medicaid application. The waiver agency notifies the MDHHS Field Office that it has assessed the applicant and determined the applicant meets all eligibility criteria, except Medicaid eligibility, and has determined the applicant "approved" for the waiver. The waiver agency may enter the MI Choice enrollment date in CHAMPS. The MI Choice PET will set once CHAMPS is able to verify Medicaid eligibility via data transfers from Bridges. The waiver agency implements the full array of services identified in the applicants' person-centered service plan (PCSP) and proceeds as if the applicant met all eligibility criteria. In this situation, the waiver agency may assign a status of Waiver/Pending to the applicant. Once the MDHHS Field Office confirms Medicaid eligibility, the waiver agency may change the Waiver/Pending status to Waiver/Yes as of the date of the initial assessment or the first day of Medicaid eligibility, whichever is later. If the first day of Medicaid eligibility is later than the initial assessment date, the waiver agency

Medicaid Provider Manual

reclassifies the days from the initial assessment date to the first date of Medicaid eligibility to Waiver/Ineligible in the status tables. The waiver agency will need to notify MDHHS Home and Community Based Services Staff to correct the initial MI Choice enrollment date in CHAMPS.

- Presume eligible, but MDHHS denies Medicaid eligibility. The waiver agency may presume the MDHHS Field Office will approve the applicant's Medicaid application. The waiver agency notifies the MDHHS Field Office that it has assessed the applicant and determined the applicant meets all eligibility criteria, except Medicaid eligibility, and has determined the applicant "approved" for the waiver. The waiver agency implements the full array of services identified in the applicant's PCSP and proceeds as if the applicant met all eligibility criteria. In this situation, the waiver agency may assign a status of Waiver/Pending to the applicant. The waiver agency may enter the MI Choice enrollment date in CHAMPS. The MI Choice PET will set once CHAMPS is able to verify Medicaid eligibility via data transfers from Bridges. Once the MDHHS Field Office denies Medicaid eligibility, the waiver agency must change the Waiver/Pending status to Waiver/Ineligible as of the date of the initial assessment. The waiver agency will need to notify MDHHS Home and Community Based Services Staff to delete the MI Choice enrollment date in CHAMPS.

3.7 MI CHOICE ENROLLMENT NOTIFICATION TO THE MDHHS FIELD OFFICE

The waiver agency notifies the MDHHS Field Office of MI Choice participant enrollment and disenrollment dates, as well as subsequent changes made to MI Choice enrollment and disenrollment dates. Waiver agencies are required to do the following:

- Waiver agencies must enter all enrollments in CHAMPS. Waiver agencies must enter enrollments in CHAMPS within five business days of knowing and verifying the actual date of enrollment. If the enrollment date changes, the waiver agency must contact the appropriate MDHHS staff to make a correction.
- Waiver agencies must enter all participant disenrollments in CHAMPS within five business days of knowing and verifying the actual disenrollment date. The MI Choice end date is the last day of the participant's enrollment in MI Choice.
- When the waiver agency needs to change a previously reported MI Choice start (enrollment) or stop (disenrollment) date, the waiver agency must notify MDHHS staff of the new date and the reason for altering the original date.
- The participant's record must clearly identify all enrollment and disenrollment dates for MI Choice participants.
- Waiver agencies must develop processes for confirming PET enrollment and disenrollment dates and verifying these dates correspond with Waiver/Yes dates in their Health Information Systems.

3.8 PARTICIPANT CLASSIFICATION AND STATUS TYPE

Most waiver agencies have more than one funding source for services provided by the agency. Waiver agencies utilize the COMPASS system, or a compatible data system, to track several types of care management programs. Waiver agencies assign a Program Classification Type to participant data records to permit accuracy in reporting and to avoid unnecessary duplication of participant counts within various

Medicaid Provider Manual

Medicaid and non-Medicaid funded LTSS programs. Restrictions in PET coding and MI Choice program eligibility may make it necessary to change a participant's program classification among care management program types.

3.8.A. PARTICIPANT PROGRAM CLASSIFICATIONS

The following participant program classifications are used in Michigan's Data Warehouse Database:

WA = Waiver

The participant is or is expected to be eligible for and enrolled in MI Choice.

Waiver Eligible Status Classifications

Y (Yes)	The participant meets LOCD criteria, the MDHHS Field Office determined financial eligibility, the participant requires at least one MI Choice service in addition to supports coordination, and the participant agrees to enroll in MI Choice. The participant must not be residing in a nursing facility or hospital for this classification.
N (No)	The participant is not enrolled in or does not qualify for MI Choice.
P (Pending)	The participant meets NFLOC and requires at least one MI Choice service in addition to supports coordination, but the waiver agency is awaiting confirmation of financial eligibility from the MDHHS Field Office. Waiver agencies can use the "Pending" status only when the Medicaid application has been completed and submitted to the MDHHS Field Office, and the waiver agency has preliminarily determined (presumed) the participant is likely to meet financial eligibility requirements.
I (Ineligible)	The participant did not meet at least one of the eligibility criteria for MI Choice.

Transition/Diversion Case Status

No	The participant was not transitioned from the nursing facility.
Diverted	The participant met Imminent Risk Criteria as approved by MDHHS in the Community Transition Services Portal and has enrolled in the MI Choice program.
Transitioned	The waiver agency submitted and MDHHS approved the appropriate information in the Community Transition Services Portal, the participant transitioned from a nursing facility, and the participant has enrolled in the MI Choice program.

Self-Determination (SD)

Yes	Indicates the participant is enrolled in the MI Choice program and has chosen the self-determination option for delivery of services.
No	Indicates the participant has not chosen the self-determination option for the delivery of services.

Medicaid Provider Manual

Memorandum of Understanding (MOU)/Special Memorandum of Understanding (SMOU)

No	Indicates the participant does not qualify for a MOU or a SMOU.
SMOU	Indicates this person meets the significant support participant criteria for the purposes of capitation rates as specified in Attachment Q of the MI Choice Contract.

Case or Open Status Classifications

A	Indicates the participant is on open maintenance status.
0	Indicates the participant is on open active status.

Requirements:

- The waiver agency is responsible for confirming participant case classifications for program participants and to monitor the accuracy of participant data records.
- Waiver agencies must track MI Choice eligibility dates and statuses accurately in MI Choice Information System (MICIS), COMPASS, or a compatible database.
- Participants have one program classification, eligibility, transition, self-determination, and case status classification during a single duration of time, with the exception of individuals who are in the process of transitioning from the nursing facility, and are expected to enroll in MI Choice.
- Waiver agencies have written procedures to establish program status for MI Choice participants and to maintain and monitor the accuracy of participant data records.
- When a waiver agency uses "Pending" waiver eligible status classification, the waiver agency must provide the participant with the full array of MI Choice services as specified in the PCSP. When the MDHHS Field Office confirms the participant's eligibility for Medicaid, the waiver agency may then reclassify the participant with "Yes" waiver eligibility status. The waiver agency may choose to begin the "Yes" waiver eligibility status from either the MI Choice assessment date or the start date of MI Choice services when the MDHHS Field Office grants Medicaid eligibility retroactive to the assessment date. If Medicaid eligibility begins after the assessment date, the waiver agency must use the first date of Medicaid eligibility as the start date of "Yes" waiver eligibility status.
- When the waiver agency is unable to presume financial eligibility for the participant, the agency must use the "Ineligible" waiver eligibility status classification. The waiver agency cannot begin MI Choice services until it receives confirmation from the MDHHS Field Office of the participant's eligibility for Medicaid. When the MDHHS Field Office confirms the participant's eligibility for Medicaid, the waiver agency may then reclassify the participant with "Yes" waiver eligibility status. The waiver agency may choose to begin the "Yes" waiver eligibility status from either the date of the MDHHS Field Office notification of Medicaid eligibility or the start date of MI Choice services.
- Waiver "Pending" status should not remain on closed cases. Once a case is closed and the MDHHS Field Office has made a Medicaid determination, the participant is either waiver eligible or not. The eligibility is no longer "Pending". Waiver agencies must have

Medicaid Provider Manual

policies and procedures in place for periodically reviewing all participants with waiver "Pending" status and making adjustments to that status as indicated. Waiver "Pending" is only used for participants whose eligibility status has not yet been determined.

3.9 RE-ENROLLMENT

A re-enrollment occurs when a previous MI Choice participant seeks enrollment in the MI Choice program again. This happens every time the participant's status changes from Waiver/Yes to a non-waiver program, Waiver/Ineligible, Waiver/No, Waiver Financially Ineligible, or Closed and then back to Waiver/Yes.

- The waiver agency must either adopt an existing LOCD or conduct the LOCD according to the requirements set forth in the Nursing Facility Level of Care Determination chapter of this Manual for each re-enrollment, regardless of the reason for the original discharge or program termination.
- The participant must meet all eligibility requirements for the MI Choice program.
- A reassessment may be required before the waiver agency can re-enroll the participant. A reassessment is required if:
 - The waiver agency completely closed the participant to all agency services, regardless of the length of time between closing and re-enrolling the participant.
 - The participant experienced a change in status. A change in status includes, but is not limited to, a medical event (such as a heart attack, stroke, broken bone, or organ transplant) that changed the participant's functional ability, a change in the availability of the participant's informal supports, a noticeable change in the participant's cognitive ability, or a change in the participant's financial situation.
 - The participant has been ineligible for or otherwise out of the MI Choice program for more than one month but remains an open participant with the waiver agency.
- Supports Coordinators (SCs) may perform assessments for a re-enrollment alone or using a team of a registered nurse (RN) and social worker (SW). However, MDHHS requires an RN/SW team in the following situations:
 - The waiver agency completely closed the participant to all agency services, regardless of the length of time between closing and re-enrolling the participant.
 - The participant experienced a change in status related to a decline in the participant's functional ability, informal support availability, or cognitive ability.
 - The participant has been ineligible for or otherwise out of the MI Choice program for at least 90 days.
 - In emergency situations (i.e., when a re-enrollment is to occur within the next three days) when the waiver agency cannot schedule a team reassessment, one SC may start the reassessment process to ensure the participant meets MI Choice eligibility requirements and to develop a temporary PCSP. A SC of the other discipline shall complete the in-person reassessment within seven days of the time the reassessment process began.

Medicaid Provider Manual

3.10 CASE CLOSURE

Closed cases are those that SCs determine no longer require intervention. SCs must document this status change in the case records. SCs designate closed case status for the following reasons:

- Death. The SCs shall close the waiver case upon the death of the participant. The last date of waiver enrollment cannot exceed the date of death.
- Moved, Transferred
- Moved, Not Transferred
- Not Eligible
- Nursing Facility Placement
- Refused Service
- ICF/IID Placement
- Transferred to Another Waiver Agency
- Transferred to Another Agency
- Moved to Case Management with other programs
- Hearing
- For Cause
- Administrative
- Other

SCs must document a reason for closure of a case in the participant case record. The waiver agency must notify the participant or proxy in writing of the decision to close the waiver case 10 days before closure, unless an exception to the provision of advanced notice for an adverse benefit determination applies.

Medicaid Provider Manual

SECTION 4 – SERVICES

The array of services provided by the MI Choice program is subject to the prior approval of CMS. Waiver agencies are required to authorize all approved waiver services that a participant needs to live successfully in the community that are:

- indicated by the current assessment;
- detailed in the person-centered service plan (PCSP); and
- authorized in accordance with the provisions of the approved waiver.

Services must not be authorized unless they are defined in the PCSP and must not precede the establishment of a PCSP. Waiver agencies cannot limit in aggregate the number of participants receiving a given service or the number of services available to any given participant. Participants have the right to receive services from any willing and qualified provider within the waiver agency's provider network. When the waiver agency does not have a willing and qualified provider within their network, the waiver agency must utilize an out-of-network provider at no cost to the participant until an in-network provider can be secured. (Refer to the Providers section of this chapter for information on qualified provider standards.)

MDHHS, waiver agencies, and direct service providers must not impose a copayment or any similar charge upon participants for waiver services. MDHHS and waiver agencies do not impose a premium, enrollment fee, or similar cost-sharing arrangement on waiver participants.

Although MI Choice participants must have services approved by the waiver agency, participants have the option to select any participating provider in the waiver agency's provider network, thereby ensuring freedom of choice.

Services paid for with MI Choice funds must not duplicate nor replace services available through the State Plan. Where applicable, the participant must use State Plan, Medicare, or other available payers first. MI Choice is the funding source of last resort. The participant's preference for a certain provider is not grounds for declining another payer in order to access waiver services.

Providers must have previous relevant experience or training for the tasks specified and authorized in the PCSP. The waiver agency must deem the chosen provider capable of performing the required tasks.

For services involving transportation paid for with MI Choice funds, the Secretary of State must appropriately license all drivers and vehicles, and all vehicles must be appropriately insured as required by law.

Healthcare Common Procedure Coding System (HCPCS) codes for each service can be found in the Directory Appendix of the Medicaid Provider Manual.

4.1 COVERED WAIVER SERVICES

In addition to regular State Plan coverage, MI Choice participants may receive services outlined in the following subsections.

Medicaid Provider Manual

4.1.A. ADULT DAY HEALTH

Definition	<p>Adult Day Health services are furnished four or more hours per day on a regularly scheduled basis, for one or more days per week, or as specified in the PCSP, in a non-institutional, community-based setting, encompassing both health and social services needed to ensure the optimal functioning of the participant. Meals provided as part of these services shall not constitute a "full nutritional regimen" (i.e., three meals per day). Physical, occupational and speech therapies may be furnished as component parts of this service.</p> <p>All Adult Day Health providers must comply with the federal Home and Community Based Settings Final Rule. Requirements are described in the Home and Community Based Services chapter of this Manual.</p>
Requirements	<p>Each program must keep all participant files confidential in controlled access files. Each program must use a standard release of information form that is time limited and specific as to the released information. Each program must maintain comprehensive and complete files that include, at a minimum:</p> <ul style="list-style-type: none">▪ Details of the participant's referral to the adult day health program,▪ Intake records,▪ A copy of the MI Choice assessment (and reassessments),▪ A copy of the MI Choice PCSP,▪ Listing of participant contacts and attendance,▪ Progress notes in response to observations (at least monthly),▪ Notation of all medications taken on premises, including:<ul style="list-style-type: none">➢ The medication;➢ The dosage;➢ The date and time of administration;➢ The initials of the staff person assisting with administration; and➢ Comments▪ Notation of basic and optional services provided to the participant,▪ Notation of all releases of information about the participant, and▪ A signed release of information form. <p>Each program must provide directly, or arrange for, the provision of the following services. If the program arranges for provision of any service at a place other than program-operated facilities, a written agreement specifying supervision requirements and responsibilities must be in place. For MI Choice participants, the waiver agency must provide supports coordination.</p> <ul style="list-style-type: none">▪ Transportation.▪ Personal Care.▪ Nutrition: One hot meal per eight-hour day which provides one-third of the recommended daily allowances and follows the meal pattern specified in the home-delivered meals service standard. Participants attending from 8-14 hours per day must receive an additional meal to meet a combined two-thirds of the recommended daily allowances. Modified diet menus should be provided where

Medicaid Provider Manual

feasible and appropriate. Such modifications must take into consideration participant choice, health, religious and ethnic diet preferences.

- Recreation: Consisting of planned activities suited to the needs of the participant and designed to encourage physical exercise, maintain or restore abilities and skill, prevent deterioration, and stimulate social interaction.

Each program may provide directly, or arrange for the provision of, the following optional services. If the program arranges for provision of any service at a place other than program-operated facilities, a written agreement specifying supervision requirements and responsibilities must be in place.

- Rehabilitative: Physical, occupational, speech, and hearing therapies provided by licensed professionals under order from a physician.
- Medical Support: Laboratory, x-ray, or pharmaceutical services provided by licensed professionals under order from a physician.
- Services within the scope of the Nursing Practice Act (PA 368 of 1978).
- Dental: Under the direction of a dentist.
- Podiatric: Provided or arranged for under the direction of a physician.
- Ophthalmologic: Provided or arranged for under the direction of an ophthalmologist.
- Health counseling.
- Shopping assistance/escort.

Transportation between the participant's residence and the Adult Day Health center is provided when it is a standard component of the service. Not all Adult Day Health centers offer transportation to and from their facility. Additionally, some of those that offer transportation only offer this service in a specified area. When the center offers transportation, it is a component part of the Adult Day Health service. If the center does not offer transportation or does not offer it to the participant's residence, then MI Choice would pay for the transportation to and from the Adult Day Health center separately.

If the provider operates its own vehicles for transporting participants to and from the program site, the provider must meet the following transportation minimum standards:

- All paid drivers must be physically capable and willing to assist persons requiring help to get in and out of vehicles. The provider must make such assistance available unless expressly prohibited by either a labor contract or an insurance policy.
- All paid drivers must be trained to cope with medical emergencies unless expressly prohibited by a labor contract.
- Each program must operate in compliance with PA 1 of 1985 regarding seat belt usage.

A referral from a waiver agency for a MI Choice participant must replace any screening or assessment activities performed for other program participants. The adult day health service provider must accept copies of the MI Choice assessment and PCSP to eliminate duplicate assessment and service planning activities.

Each program must establish written procedures (reviewed and approved by a consulting pharmacist, physician, or registered nurse) that govern the assistance

Medicaid Provider Manual

given by staff to participants taking their own medications while participating in the program. The policies and procedures must minimally address:

- Written consent from the participant or participant's representative to assist in taking medications.
- Verification of the participant's medication regimen, including the prescriptions and dosages.
- The training and authority of staff to assist participants with taking their own prescribed or non-prescription medications and under what conditions such assistance may take place.
- Procedures for medication set-up.
- Secure storage of medications belonging to, and brought in by, participants.
- Disposal of unused medications for participants that no longer participate in the program.
- Instructions for entering medication information in participant files, including times and frequency of assistance.

Each provider must employ a full-time program director with a minimum of a bachelor's degree in a health or human services field or be a qualified health professional. The provider must continually provide support staff at a ratio of no less than one staff person for every 10 participants. The provider may only provide health support services under the supervision of a registered nurse. If the program acquires either required or optional services from other individuals or organizations, the provider must maintain a written agreement that clearly specifies the terms of the arrangement between the provider and the other individual or organization.

Staff must have basic first-aid training as well as other training as described in the Providers Section of this chapter.

Each provider must have first-aid supplies available at the program site. The provider must make a staff person knowledgeable in first-aid procedures, including Cardiopulmonary Resuscitation (CPR), present at all times when participants are at the program site.

Each provider must post procedures to follow in emergencies (fire, severe weather, etc.) in each room of the program site. Providers must conduct practice drills of emergency procedures once every six months. The program must maintain a record of all practice drills.

The provider must maintain all equipment and furnishings used during program activities or by program participants in safe and functional condition. Each day care center must have the following furnishings:

- At least one straight back or sturdy folding chair for each participant and staff person.
- Lounge chairs or day beds as needed for naps and rest periods.
- Storage space for participants' personal belongings.
- Tables for both ambulatory and non-ambulatory participants.
- A telephone accessible to all participants.
- Special equipment as needed to assist persons with disabilities.

Medicaid Provider Manual

	<p>Each day care center must document that it is in compliance with:</p> <ul style="list-style-type: none">▪ Barrier-free design specifications of Michigan and local building codes.▪ Fire safety standards.▪ Applicable Michigan and local public health codes.
Limitations	<p>Participants cannot receive Community Living Supports (CLS) while at the Adult Day Health center. Payment for Adult Day Health services includes all services provided while at the center. CLS may be used in conjunction with Adult Day Health services but cannot be provided at the exact same time.</p> <p>Participants must require regular supervision to live in their own homes or the homes of a relative. Participants with caregivers must require a substitute caregiver while their regular caregiver is at work, in need of respite, or otherwise unavailable. Participants must have difficulty performing activities of daily living (ADL) without assistance. Participants must be capable of leaving their residence with assistance to receive service. Participants are in need of intervention in the form of enrichment and opportunities for social activities to prevent or postpone deterioration that would likely lead to institutionalization.</p> <p>HCPCS codes S5101 and S5102 are limited to one unit per day.</p>

4.1.B. CHORE SERVICES

Definition	<p>Chore Services are needed to maintain the home in a clean, sanitary and safe environment. This service includes heavy household chores such as washing floors, windows and walls, securing loose rugs and tiles, and moving heavy items of furniture in order to provide safe access and egress. Other covered services might include yard maintenance (mowing, raking and clearing hazardous debris such as fallen branches and trees) and snow plowing to provide safe access and egress outside the home. These types of services are allowed only in cases when neither the participant nor anyone else in the household is capable of performing or financially paying for them, and where no other relative, caregiver, landlord, community or volunteer agency, or third party payer is capable of, or responsible for, their provision. In the case of rental property, the responsibility of the landlord, pursuant to the lease agreement, will be examined prior to any authorization of service.</p>
Requirements	<p>Waiver funds used to pay for chore services may include materials and disposable supplies used to complete the chore tasks. The waiver agency may also use waiver funds to purchase or rent the equipment or tools used to perform chore tasks for waiver participants.</p> <p>Only properly licensed suppliers may provide pest control services.</p>

4.1.C. COMMUNITY HEALTH WORKER

Definition	<p>The Community Health Worker (CHW) works with participants who are re-enrolling in MI Choice, enrolling after a nursing facility or hospital discharge, or otherwise assists participants with obtaining access to community resources. The CHW may also perform the duties of a supports broker, providing assistance throughout the planning and implementation of the PCSP, assist the participant in making informed decisions about what works best for the participant, and assists with access to housing and employment. The CHW may offer practical skills training to enable participants to remain independent, including information for recruiting, hiring and managing workers</p>
-------------------	--

Medicaid Provider Manual

	<p>as well as effective communication and problem solving. The CHW may also coach participants in managing health conditions, assist with scheduling appointments, facilitate coordination between various providers, and assist participants with completion of applications for programs for which they may be eligible. The CHW must work in close collaboration with the participant's Supports Coordinator as the Supports Coordinator has ultimate responsibility for the participant's case.</p>
Requirements	<p>The CHW service is not limited to nursing facility or hospital transitions. The service is available to any participant who may benefit from additional hands-on support to obtain assistance in the community.</p> <p>The CHW visits the participant at home within three days of hospital or facility discharge to review the discharge paperwork and any other documentation, reviews any medications received or orders that need to be filled, reminds the participant of the importance of filling the medications, and talks with the participant about the importance of following up with the physician. If needed, the CHW may make calls for medication to be filled, or to arrange for the follow-up appointment with the physician. The CHW also trains the participant about anything to be aware of and what to do if their condition worsens.</p> <p>The CHW does another follow-up visit within 30 days to determine whether the participant followed up with the physician, took the prescribed medications, and followed any other discharge recommendations.</p> <p>The CHW must thoroughly document what was discussed and discovered during the contacts with the participant so the Supports Coordinator is aware of what occurred. If there are medication discrepancies, the CHW will follow up with the RN Supports Coordinator to get those issues addressed.</p> <p>The CHW may also visit the individual in the nursing facility or hospital to ensure the staff knows who to contact to coordinate the discharge home. The CHW ensures the nursing facility or hospital staff has the contact of the Supports Coordinator with whom the discharge should be coordinated.</p> <p>If the Supports Coordinator wishes and the participant agrees, the CHW will be in contact with the nursing facility if a participant goes from a hospital to a nursing facility for temporary rehab before returning to the Waiver. The CHW may assist with coordinating any supplies, services, etc. the participant requires at home after rehabilitation.</p> <p>Providers for the CHW service may be unlicensed but must be trained in the duties of the job.</p>

4.1.D. COMMUNITY LIVING SUPPORTS

Definition	<p>Community Living Supports (CLS) facilitate an individual's independence and promote participation in the community. CLS can be provided in the participant's residence or in community settings. CLS includes assistance to enable participants to accomplish tasks that they would normally do for themselves if able. The services may be provided on an episodic or a continuing basis. The participant oversees and supervises individual providers on an ongoing basis when participating in self-determination options. These services are provided only in cases when neither the participant nor anyone else in the household is capable of performing or financially paying for them, and where no other relative, caregiver, landlord, community/volunteer agency, or third party payer is capable of or responsible for their provision.</p>
-------------------	--

Medicaid Provider Manual

Requirements	<p>CLS includes:</p> <ul style="list-style-type: none">▪ Assisting, reminding, cueing, observing, guiding and/or training in:<ul style="list-style-type: none">➢ Activities of Daily Living (ADL) such as bathing, eating, dressing, personal hygiene, toileting, transferring, etc. *➢ Laundry and other household activities➢ Non-medical care (not requiring nurse or physician intervention) *➢ Meal preparation (does not include the cost of the meals themselves)➢ Money management➢ Shopping for food and other necessities of daily living➢ Social participation, relationship maintenance, and building community connections to reduce personal isolation➢ Training and assistance on activities that promote community participation such as using public transportation, using libraries, or volunteer work *➢ Transportation from the participant's residence to medical appointments, community activities, among community activities, and from the community activities back to the participant's residence➢ Routine, seasonal, and heavy household care and maintenance➢ Attendance at medical appointments➢ Participation in regular community activities incidental to meeting the individual's community living preferences▪ Reminding, cueing, observing or monitoring of medication administration.*▪ Dementia care including, but not limited to, redirection, reminding, modeling, socialization activities, and activities that assist the participant as identified in the individual's PCSP.*▪ Staff assistance with preserving the health and safety of the participant in order that they may reside and be supported in the most integrated independent community setting.*▪ Observing and reporting any change in the participant's condition and the home environment to the supports coordinator.* <p>As applicable to the tasks being performed, the direct service provider furnishing CLS must have previous relevant experience or training and skills in housekeeping, household management, good health practices, observation, reporting, and recording information. Additionally, skills, knowledge, and experience with food preparation, safe food handling procedures, and reporting and identifying abuse and neglect are highly desirable.</p> <p>When the CLS services provided to the participant include tasks identified with an asterisk (*) above, the direct service providers furnishing CLS must also:</p> <ul style="list-style-type: none">▪ Be supervised by a RN licensed to practice nursing in Michigan. At the State's discretion, other qualified individuals may supervise CLS providers. For licensed residential settings, persons employed as facility owners or managers qualify to provide this supervision. The direct care worker's supervisor must be available to the worker at all times the worker is furnishing CLS services.
---------------------	---

Medicaid Provider Manual

- Develop in-service training plans and ensure all workers providing CLS services are confident and competent in the following areas before delivering CLS services to MI Choice participants, as applicable to the needs of that participant: safety, body mechanics, and food preparation including safe and sanitary food-handling procedures.
- Provide an RN to individually train and supervise CLS workers who perform higher-level, non-invasive tasks such as maintenance of catheters and feeding tubes, minor dressing changes, and wound care for each participant who requires such care. The supervising RN must ensure each worker's confidence and competence in the performance of each task required.
- MDHHS strongly recommends each worker delivering CLS services complete a certified nursing assistant (CNA) training course, first aid, and CPR training.

When the CLS services provided to the participant include transportation, the following standards apply:

- Waiver agencies may not use waiver funds to purchase or lease vehicles for providing transportation services to waiver participants.
- All paid drivers for transportation providers supported entirely or in part by MI Choice funds must be physically capable and willing to assist persons requiring help to and from and to get in and out of vehicles. The provider must offer such assistance unless expressly prohibited by either a labor contract or insurance policy.
- The provider must train all paid drivers for transportation programs supported entirely or in part by MI Choice funds to cope with medical emergencies unless expressly prohibited by a labor contract or insurance policy.
- Each provider must operate in compliance with PA 1 of 1985 regarding seat belt usage.
- When transportation incidental to the provision of CLS is included, it shall not also be authorized as a separate waiver service for the participant.

Individuals providing CLS must be at least 18 years old, and able to communicate effectively both orally and in writing and follow instructions.

Members of a participant's family may provide CLS to the participant. However, waiver agencies must not directly authorize MI Choice funds to pay for services furnished to a participant by that person's spouse.

Family members who provide CLS must meet the same standards as providers who are not related to the participant.

The waiver agency or provider agency must train each worker to perform properly each task required for each participant the worker serves before delivering the service to that participant. The supervisor must ensure that each worker competently and confidently performs every task assigned for each participant served.

Medicaid Provider Manual

Each direct service provider who chooses to allow staff to assist participants with self-medication must establish written procedures that govern the assistance given by staff to participants with self-medication. These procedures must be reviewed by a consulting pharmacist, physician, or RN and must include, at a minimum:

- The provider staff authorized to assist participants with taking their own prescription or over-the-counter medications and under what conditions such assistance may take place. This must include a review of the type of medication the participant takes and its impact upon the participant.
- Verification of prescription medications and their dosages. The participant must maintain all medications in their original, labeled containers.
- Instructions for entering medication information in participant files.
- A clear statement of the participant's and participant's family's responsibility regarding medications taken by the participant and the provision for informing the participant and the participant's family of the provider's procedures and responsibilities regarding assisted self-administration of medications.

CLS providers may only administer medications in compliance with Michigan Administrative Rule 330.7158:

- A provider must only administer medication at the order of a physician and in compliance with the provisions of section 719 of the act, if applicable.
- A provider must ensure that medication use conforms to federal standards and the standards of the medical community.
- A provider must not use medication as punishment, for the convenience of the staff, or as a substitute for other appropriate treatment.
- A provider must review the administration of a psychotropic medication periodically as set forth in the participant's PCSP and based upon the participant's clinical status.
- If a participant cannot administer their own medication, a provider must ensure that medication is administered by or under the supervision of personnel who are qualified and trained.
- A provider must record the administration of all medication in participant's clinical record.
- A provider must ensure that staff report medication errors and adverse drug reactions to the participant's physician immediately and properly, and record the incident in the participant's clinical record.

CLS provided in a residential setting like assisted living, Adult Foster Care, or Homes for the Aged, includes only those services and supports that are in addition to, and must not replace, usual and customary supports and services furnished to residents in the licensed setting. CLS does not include the costs associated with room and board. Documentation in the participant's record must clearly identify the participant's need for additional supports and services not covered by licensure. The PCSP must clearly identify the portion of the participant's supports and services covered by CLS. Homemaking tasks incidental to the provision of assistance with ADL may also be included in CLS but must not replace usual and customary homemaking tasks required by licensure.

When CLS services are provided to the participant under a self-determination arrangement, the individual furnishing CLS must also be trained in cardiopulmonary

Medicaid Provider Manual

	<p>resuscitation. This training may be waived when the provider is furnishing services to a participant who has a "Do Not Resuscitate" order.</p> <p>These service needs differ in scope, nature, supervision arrangements, or provider type (including provider training and qualifications) from services available in the State Plan. The differences between the waiver coverage and the State Plan are that the provider qualifications and training requirements are more stringent for CLS tasks as provided under the waiver than the requirements for these types of services under the State Plan.</p>
Limitations	<p>CLS does not include the costs associated with room and board.</p> <p>When transportation incidental to the provision of CLS is included, the waiver agency must not also authorize transportation as a separate waiver service for the participant.</p> <p>CLS excludes nursing and skilled therapy services.</p> <p>The phrase "These services are provided only in cases when neither the participant nor anyone else in the household is capable of performing or financially paying for them, and where no other relative, caregiver, landlord, community/volunteer agency, or third party payer is capable of or responsible for their provision" included in the definition of this service shall be interpreted as follows:</p> <ul style="list-style-type: none">▪ All informal supports must agree to provide the uncompensated (informal) services and supports to the participant as specified in the PCSP. Specifically, the record must show the following:<ul style="list-style-type: none">➤ All persons providing informal services and supports included on the PCSP are aware of and capable of performing the tasks assigned to them for the benefit of the participant as included in the person-centered service plan.➤ All informal supports agree to any financial liability related to the informal services and supports assigned to them on the person-centered service plan. This includes uncompensated or voluntary transportation of the participant.➤ Supports coordinators or other waiver agency staff did not arbitrarily assign the completion of services and supports that could otherwise be included as CLS to informal supporters. Rather, both the participant (or their responsible party) and the informal support agree in writing (by their signature on the person-centered service plan) to the provision of the identified services and supports as discussed during a person-centered planning meeting. <p>Relatives, caregivers, landlords, community or volunteer agencies, or other third-party payers have been contacted on behalf of the participant and agree to provide services and supports to the participant because they are both capable of and responsible for the provision of the identified services and supports. This agreement is noted by an authorized signature on the person-centered service plan from a representative of the entity identified as responsible for the services and supports.</p>

4.1.E. COMMUNITY TRANSPORTATION

Definition	<p>Community transportation (CT) service includes both non-emergency medical transportation and non-medical transportation.</p> <p>Community transportation services are offered to enable waiver participants to access waiver services and other community services, activities, and resources as specified in</p>
-------------------	--

Medicaid Provider Manual

	<p>the person-centered service plan. The community transportation service may also include expenses related to transportation and other travel expenses determined necessary to secure medical examinations, appointments, documentation, or treatment for participants.</p>
Requirements	<p>Waiver agencies will ensure MI Choice participants have access to community transportation as needed to obtain medical services. Utilization of family, friends, or community agencies who provide transportation services without charge must be explored before MI Choice will authorize community transportation.</p> <p>Community transportation services include, but are not limited to, transportation to obtain the following medical services:</p> <ul style="list-style-type: none">▪ Chronic and ongoing treatment;▪ Prescriptions;▪ Medical supplies and devices;▪ One-time, occasional and ongoing visits for medical care; and▪ Services received at a Veterans' Affairs hospital. <p>Travel expenses related to the provision of community transportation include:</p> <ul style="list-style-type: none">▪ The cost of transportation for the MI Choice participant by wheelchair vans, taxis, bus passes and tickets, secured transportation containing an occupant protection system that addresses safety needs of disabled or special needs individuals, and other forms of transportation;▪ Mileage reimbursement for individuals or volunteers with a valid driver's license utilizing personal vehicles to transport the MI Choice participant;▪ The cost of meals and lodging en route to and from medical care, and while receiving medical care;▪ The cost of an attendant to accompany the MI Choice participant, if necessary;▪ The cost of the attendant's transportation, meals, and lodging when transporting to or from medical care; and▪ The attendant's salary if the attendant is not a volunteer or a member of the MI Choice participant's family who is not already a paid caregiver. <p>Delivery services for medical items, such as medical supplies or prescriptions, should be utilized before authorizing community transportation services through the MI Choice program.</p> <p>When authorizing CT, waiver agencies are to authorize the least expensive available means suitable to the participant's needs.</p> <p>Waiver agencies may only authorize CT to provide transportation assistance to the participant. The participant must travel away from home to other locations within the community. CT does not include reimbursement for caregivers of the participant to run errands or otherwise travel on behalf of the participant.</p> <p>Each provider must operate in compliance with PA 1 of 1985 regarding seat belt usage unless the provider is a volunteer driver only seeking mileage reimbursement.</p> <p>Additionally, delivery services for medical items, such as medical supplies or prescriptions, should be utilized before authorizing CT through the MI Choice program.</p>

Medicaid Provider Manual

	<p>Waiver agencies must use the SC modifier when billing for ancillary items that are only available for specific medically-related travel. This includes meals (A0190, A0210), lodging (A0180, A0200), and waiting time for air ambulances and non-emergency vehicles (T2007).</p> <p>Waiver agencies may utilize a process to prior authorize requests for the following:</p> <ul style="list-style-type: none">▪ All outstate travel that is non-borderland for medical treatment.▪ Overnight stays if within 50 miles one-way from the participant's home for medical treatment.▪ Overnight stays beyond five nights, including meals and lodging, when traveling for medical treatment.▪ An attendant in addition to the driver of a wheelchair lift/medivan vehicle.▪ Mileage and meal expenses for daily long-distance trips for medical treatment.
Limitations	<p>When the costs of transportation are included in the provider rate for another waiver service (e.g., Adult Day Health or CLS), there must be mechanisms to prevent the duplicative billing of CT.</p> <p>Waiver agencies must not authorize MI Choice CT services to reimburse caregivers (paid or informal) to run errands for participants when the participant does not accompany the driver in the vehicle. The purpose of the CT service is to enable MI Choice participants to gain access to medical services and community activities/outings.</p> <p>Reimbursement for CT DOES NOT include the following:</p> <ul style="list-style-type: none">▪ Waiting time, unless for an air ambulance or non-emergency vehicle.<ul style="list-style-type: none">➢ Waiting times may be covered if built into the transportation reimbursement rate. Waiting times are also covered if the participant cannot wait for the transportation vehicle after outings due to medical conditions (i.e., cannot stay in wheelchair for long periods of time due to swelling or pain, etc.).▪ Transportation for medical services that have already been provided.▪ Transportation costs to meet a participant's personal choice of provider for routine medical care outside the community when comparable care is available locally. Participants are encouraged to obtain medical care in their own community unless referred elsewhere by their local health care professional.▪ Reimbursement for meals or lodging when the purpose of travel is not related to the receipt of Medicaid-covered medical services. Meals and lodging are only reimbursed when the participant and attendant are traveling to seek Medicaid-covered medical services. <p>All paid drivers for transportation providers supported entirely or in part by MI Choice funds must be physically capable and willing to assist persons requiring help to and from and to get in and out of vehicles. The provider must offer such assistance unless expressly prohibited by either a labor contract or insurance policy.</p> <p>The provider must train all paid drivers for transportation programs supported entirely or in part by MI Choice funds to cope with medical emergencies, unless expressly prohibited by a labor contract or insurance policy.</p>

Medicaid Provider Manual

4.1.F. COUNSELING

Definition	Counseling services seek to improve the participant's emotional and social well-being through the resolution of personal problems or through changes in a participant's social situation.
Requirements	<p>Counseling services must be directed to participants who are experiencing emotional distress or a diminished ability to function. Family members, including children, spouses or other responsible relatives, may participate in the counseling session to address and resolve the problems experienced by the participant and to prevent future issues from arising. Counseling services are typically provided on a short-term basis to address issues such as adjusting to a disability, adjusting to community living, and maintaining or building family support for community living. Counseling services are not intended to address long-term behavioral or mental health needs.</p> <p>Providers receiving waiver funds for counseling services must provide the following service components, at a minimum:</p> <ul style="list-style-type: none">▪ Psychosocial evaluation to determine appropriateness of counseling options.▪ Treatment plan that states goals and objectives, and projects the frequency and duration of service.▪ Individual, family, and/or group counseling sessions.▪ Home visits and on-site counseling.▪ Case conferencing with a waiver supports coordinator at least once every six weeks with participant's release. <p>Persons providing counseling services must:</p> <ul style="list-style-type: none">▪ Have a master's degree or higher in social work, psychology, psychiatric nursing, or counseling, or▪ Have a bachelor's degree in one of the above areas and be under the supervision of a mental health professional with a master's degree or higher, AND▪ Be licensed in the State of Michigan.

4.1.G. ENVIRONMENTAL ACCESSIBILITY ADAPTATIONS

Definition	Environmental Accessibility Adaptations (EAA) include physical adaptations to the home required by the participant's person-centered service plan that are necessary to ensure the health and welfare of the participant or that enable the participant to function with greater independence in the home, without which the participant would require institutionalization.
Requirements	<p>Adaptations may include:</p> <ul style="list-style-type: none">▪ Installation of ramps and grab bars;▪ Widening of doorways;▪ Modification of bathroom facilities;▪ Modification of kitchen facilities;

Medicaid Provider Manual

- Installation of specialized electrical and plumbing systems that are necessary to accommodate the medical equipment and supplies necessary for the welfare of the participant; and
- Environmental control devices that replace the need for paid staff and increase the participant's ability to live independently, such as automatic door openers.

Assessments and specialized training needed in conjunction with the use of such environmental adaptations are included as a part of the cost of the service.

The case record must contain documented evidence that the adaptation is the most cost-effective and reasonable alternative to meet the participant's need(s). An example of a reasonable alternative, based on the results of a review of all options, may include changing the purpose, use or function of a room within the home or finding alternative housing. The participant must agree to the reasonable alternative prior to starting the modifications.

Environmental adaptations required to support proper functioning of medical equipment, such as electrical upgrades, are limited to the requirements for safe operation of the specified equipment and are not intended to correct existing code violations in a participant's home.

The waiver agency must ensure there is a signed contract or bid proposal with the licensed builder or contractor prior to the start of an environmental adaptation. It is the responsibility of the waiver agency to work with the participant and the licensed builder or contractor to ensure the work is completed as outlined in the contract or bid proposal. The waiver agency must document approval of all EAA in the participant's record. This documentation must minimally include dates, tasks performed, materials used, and cost.

All services must be provided in accordance with applicable state or local building codes.

The existing structure must have the capability to accept and support the proposed changes.

The environmental adaptation must incorporate reasonable and necessary construction standards, excluding cosmetic improvements. The adaptation cannot result in valuation of the structure significantly above comparable neighborhood real estate values.

Under the EAA service, waiver agencies may use MI Choice funds to purchase materials and labor used to complete the modifications to prevent or remedy a sub-standard condition or safety hazard. The direct service provider must provide equipment or tools needed to perform modifications or adaptations unless another source can provide the tools or equipment at a lower cost or free of charge and the provider agrees to use such equipment or tools. The waiver agency may purchase supplies for the modification or adaptation, such as grab bars, lumber, or plumbing supplies, and provide them to the direct service provider at their discretion.

The participant, with the direct assistance of the waiver agency's supports coordinator when necessary, must make a reasonable effort to access all available funding sources such as housing commission grants, Michigan State Housing Development Authority (MSHDA), and community development block grants. Before approving MI Choice payment for each modification or adaptation, each waiver agency must determine whether a participant is eligible to receive services through a program supported by other funding sources. The participant's case record must include

Medicaid Provider Manual

	<p>evidence of efforts to apply for alternative funding sources and the acceptances or denials of these funding sources.</p> <p>Adaptations may be made to rental properties when the lease or rental agreement does not indicate that the landowner is responsible for such adaptations and the landowner agrees to the adaptation in writing. A written agreement between the landowner, the participant, and the waiver agency must specify any requirements for restoration of the property to its original condition if the occupant moves.</p> <p>Providers of EAA must be licensed in the State of Michigan.</p>
Limitations	<p>Excluded are those adaptations or improvements to the home that:</p> <ul style="list-style-type: none"> Are of general utility. Are considered to be standard housing obligations of the participant or homeowner. Are not of direct medical or remedial benefit. <p>Examples of exclusions include, but are not limited to:</p> <ul style="list-style-type: none"> Carpeting Roof repair Sidewalks and driveways Heating Central air conditioning (except under exceptions noted in the service definition) Garages and raised garage doors Storage and organizers Hot tubs, whirlpool tubs, and swimming pools Landscaping General home repairs <p>MI Choice does not cover general construction costs in a new home or additions to a home purchased after the participant is enrolled in the waiver. If a participant or the participant's family purchases or builds a home while receiving waiver services, it is the participant's or family's responsibility to ensure the home will meet basic needs, such as having a ground floor bath or bedroom if the participant has mobility limitations. MI Choice funds may be authorized to assist with the adaptations noted above (e.g., ramps, grab bars, widening doorways, bathroom modifications, etc.) for a home recently purchased. If modifications are needed to a home under construction that require special adaptation to the plan (e.g., roll-in shower), the MI Choice program may be used to fund the difference between the standard fixture and the modification required to accommodate the participant's need.</p> <p>The infrastructure of the home involved in the funded adaptations (e.g., electrical system, plumbing, well or septic, foundation, heating and cooling, smoke detector systems, or roof) must be in compliance with any applicable local codes. Environmental adaptations shall exclude costs for improvements exclusively required to meet applicable state or local building codes.</p> <p>The existing structure must have the capability to accept and support the proposed changes.</p>

Medicaid Provider Manual

4.1.H. FISCAL INTERMEDIARY

Definition	<p>Fiscal Intermediary (FI) services assist participants who choose the self-determination option in acquiring and maintaining services defined in the participant's person-centered service plan, controlling a participant's budget, and choosing staff authorized by the waiver agency. The Fiscal Intermediary helps a participant manage and distribute funds contained in an individual budget. Funds are used to purchase waiver goods and services authorized in the participant's person-centered service plan. Fiscal Intermediary services include, but are not limited to, the facilitation of the employment of MI Choice service providers by the participant (including federal, state, and local tax withholding or payments, unemployment compensation fees, wage settlements), fiscal accounting, tracking and monitoring participant-directed budget expenditures and identifying potential over- and under-expenditures, and ensuring compliance with documentation requirements related to management of public funds.</p> <p>The Fiscal Intermediary may also perform other supportive functions that enable the participant to self-direct needed services and supports. These functions may include verification of provider qualifications, including reference and criminal history reviews, and assisting the participant to understand billing and documentation requirements.</p>
Requirements	<p>Each FI must be bonded and insured. The insured amount must exceed the total budgetary amount the FI is responsible for administering.</p> <p>Each FI must demonstrate the ability to manage budgets and perform all functions of the FI, including all activities related to employment taxation, worker's compensation, and state, local, and federal regulations.</p> <p>Each FI must demonstrate competence in managing budgets and performing other functions and responsibilities of a fiscal intermediary.</p> <p>Each FI will provide four basic areas of performance:</p> <ul style="list-style-type: none">▪ Function as the employer agency for participants directly employing workers to ensure compliance with payroll tax and insurance requirements;▪ Ensure compliance with requirements related to management of public funds, the direct employment of workers by participants, and contracting for other authorized goods and services;▪ Facilitate successful implementation of the self-determination arrangements by monitoring the use of the budget and providing monthly budget status reports to each participant and waiver agency; and▪ Offer supportive services to enable participants to self-determine and direct the services and supports they need. <p>The waiver agency and FI must abide by the principles set forth in the Self-Determination Technical Advisory "Choice Voucher System" available in the Directory Appendix.</p> <p>Participants choosing self-determination and utilizing the Agency with Choice option do not have to utilize a fiscal intermediary. Participants using the Agency with Choice option may choose to have the agency perform the four basic areas of performance outlined above.</p>

Medicaid Provider Manual

Limitations	FI services are only available to those participants choosing the self-determination option for service delivery. Providers of other covered services to the participant, family, or guardians of the participant may not provide FI services to the participant.
--------------------	--

4.1.I. GOODS AND SERVICES

Definition	Goods and Services are services, equipment or supplies not otherwise provided through either the MI Choice Waiver or the State Plan that address an identified need in the person-centered service plan (including improving and maintaining the participant's opportunities for full membership in the community) and meet the following requirements.
Requirements	<p>Each item or service specified in the PCSP must meet the following requirements:</p> <ul style="list-style-type: none">▪ Decrease the need for other Medicaid services.▪ Promote inclusion in the community.▪ Increase the participant's safety in the home environment.▪ The participant does not have the funds to purchase them or they are not available through another source. <p>Goods and Services are only approved by CMS for participants choosing the self-determination option. Self-directed Goods and Services are purchased from the participant-directed budget. Experimental or prohibited treatments are excluded. Goods and Services must be documented in the person-centered service plan.</p>
Limitations	<p>This service is only available to those participants choosing self-determination.</p> <p>This service excludes experimental or prohibited treatments.</p>

4.1.J. HOME DELIVERED MEALS

Definition	Home Delivered Meals (HDM) is the provision of one to two nutritionally sound meals per day to a participant who is unable to care for their own nutritional needs. The unit of service is one meal delivered to the participant's home or to the participant's selected congregate meal site that provides a minimum of one-third of the current recommended dietary allowance (RDA) for the age group as established by the Food and Nutritional Board of the National Research Council of the National Academy of Sciences. Allowances must be made in HDMs for specialized or therapeutic diets as indicated in the person-centered service plan. A HDM cannot constitute a full nutritional regimen.
Requirements	<p>Each waiver agency must have written eligibility criteria for persons receiving home delivered or congregate meals authorized through the waiver program which include, at a minimum:</p> <ul style="list-style-type: none">▪ The participant must be unable to consistently obtain food or prepare complete meals.▪ The participant does not have an adult living at the same residence or in the vicinity who is able and willing to prepare all meals.▪ The participant does not have a paid caregiver who is able and willing to prepare meals for the participant.

Medicaid Provider Manual

- The provider can appropriately meet the participant's special dietary needs, and the meals available will not jeopardize the participant's health.
- The participant must be able to feed themselves.
- The participant must agree to be home when meals are delivered, or contact the program when an absence is unavoidable.

Federal regulations prohibit the MI Choice program from providing three meals per day to waiver participants. Providers must vary the level of meal service for an individual in response to varying availability of help from allies and formal caregivers, and changes in the participant's status or condition. When MI Choice provides home delivered meals less than seven days per week, the waiver agency must identify and document in the case record the usual source of all meals for the participant that are not provided by the program.

HDM providers and waiver agencies must follow the home delivered meals guidelines provided in the Directory Appendix.

When developing menus, MDHHS encourages every attempt to include key nutrients and to follow other dietary recommendations that relate to lessening chronic disease and improving the health of MI Choice participants. Diabetes, hypertension, and obesity are three prevalent chronic conditions among all adults in Michigan. Providers should pay special attention to nutritional factors that can help prevent and manage these and other chronic conditions. Providers must use person-centered planning principles when doing menu planning. Examples of person-centered menu planning include offering rather than serving food and providing choices of food as often as possible.

Key recommendations from the United States Department of Agriculture (USDA) Dietary Guidelines for Americans (DGA) should be considered when planning meals and minimally contain 33 1/3 percent of the current DRI as established by the Food and Nutrition Board of the National Academy of Science, National Research Council.

Each provider must have written policies and procedures that integrate person-centered planning into the home delivered and congregate meals program. This includes allowing participants to attend congregate meals sites when they have transportation or help to the site and providing diet modifications, as requested by the participant when the provider is able to do so while following established nutritional guidelines.

Each home delivered or congregate meals provider must have the capacity to provide three meals per day, which together meet the dietary reference intake (DRI) as established by the Food and Nutrition Board of the Institute of Medicine of the National Academy of Sciences. Each provider must have meals available at least five days per week.

The provider may offer liquid meals to participants when ordered by a physician. The regional dietitian must approve all liquid meals products used by the provider. The provider or supports coordinator must provide instruction to the participant, the participant's caregiver, and participant's family in the proper care and handling of liquid meals. The waiver agency and provider must meet the following requirements when liquid meals are the sole source of nutrition:

- Diet orders must include participant weight and specify the required nutritional content of the liquid meals.
- The supports coordinator must ensure the participant's physician renews the diet orders every three months, and

Medicaid Provider Manual

- The MI Choice RN supports coordinator and participant must develop the PCSP for participant receiving liquid meals in consultation with the participant's physician.

The provider may supply liquid nutritional supplements ordered by a supports coordinator where feasible and appropriate. When liquid nutrition supplements a participant's diet, the supports coordinator must ensure the physician renews the order for liquid nutritional supplements every six months. However, liquid nutritional supplements are classified as a specialized medical supply for purposes of the MI Choice program and must be billed accordingly.

The supports coordinator or provider must verify and maintain records that indicate each participant can provide safe conditions for the storage, thawing, and reheating of frozen foods. Frozen foods should be kept frozen at 0 degrees Fahrenheit thawing for consumption. Unless otherwise preferred by the participant, providers must not furnish more than a two-week supply of frozen meals to a participant during one home delivery visit.

Each provider must develop and have available written plans for continuing services in emergencies such as short-term natural disasters (e.g., snow and/or ice storms), loss of power, physical plant malfunctions, etc. The provider must train staff and volunteers on procedures to follow in the event of severe weather or natural disasters and the county emergency plan. The emergency plan shall address, but not be limited to:

- Uninterrupted delivery of meals to HDM participants, including, but not limited to use of families and friends, volunteers, shelf-stable meals and informal support systems;
- Provision of at least two, and preferably more, shelf-stable meals and instructions on how to use for participants. Every effort should be made to assure that the emergency shelf-stable meals meet the nutrition guidelines. If it is not possible, shelf-stable meals will not be required to adhere to the guidelines.
- MI Choice participants may receive two emergency meals.
- Back-up plan for food preparation if usual kitchen facility is unavailable;
- Agreements in place with volunteer agencies, individual volunteers, hospitals, long-term care facilities, other nutrition providers, or other agencies/groups that could be on standby to assist with food acquisition, meal preparation, and delivery;
- Communications system to alert congregate and home-delivered meals participants of changes in meal site/delivery;
- The plan shall cover all the sites and participants for each provider, including sub-contractors of the provider.

A record of the menu actually served each day shall be maintained for each fiscal year's operation.

Monthly nutrition education sessions must be offered at each meal site and as appropriate to home-delivered meal participants. Emphasis should focus on giving the participant the information and tools to make food choices in relation to health and wellness, and to any chronic diseases they may have, including making choices at the meal site, at home, and when they eat out.

Medicaid Provider Manual

	<p>Topics shall include, but not be limited to, food, nutrition, and wellness issues. Nutrition education materials must come from reputable sources. Questions pertaining to appropriateness of materials and presenters are to be directed to the staff dietitian, regional dietitian or Dietetic Technician, Registered (DTR). Program materials distributed must take into consideration the level of literacy, living alone status, caregiver support and translation of materials as appropriate for older adults with limited English proficiency. At least once per year, the following topics must be covered:</p> <ul style="list-style-type: none">▪ How food choices affect chronic illnesses▪ Food safety at home and when dining out▪ Food choices at home▪ Emergency preparedness- what to have on hand <p>Each provider must operate according to the Michigan Food Code and must have a copy of the most recent version of the Code available for reference.</p> <p>Complaints from participants should be referred to the provider that hosts the site or manages the HDMS. Each provider shall have a written procedure for handling complaints. The provider and waiver agency must develop a plan for what type of complaints need to be referred to the waiver agency.</p> <p>Home Visit Safety. Assessors, HDM drivers, delivery people and other staff are not expected to be placed in situations that they feel unsafe or threatened. Providers must work with their waiver agency to create a "Home Visit Safety Policy" that addresses verbal and physical threats made to the assessor(s), drivers or other program persons, by participants, family members, pets (animals) or others in the home during the assessment. This policy should include, but is not limited to:</p> <ul style="list-style-type: none">▪ Definition of a verbal or physical threat;▪ How a report should be made/who investigates the report;▪ What actions should be taken by the assessor or driver if they are threatened;▪ What warnings should be given to the participant;▪ What actions should be taken for repeated behaviors;▪ What information gets recorded in the chart; and▪ Situations requiring multiple staff/volunteers.
Limitations	<p>The meals authorized under this service must not constitute a full nutritional regimen. Providers must not solicit donations from waiver participants.</p> <p>Providers must not use waiver funds to purchase dietary supplements such as vitamins and minerals.</p> <p>When the participant has informal supports or paid caregivers available during meal times, the case record must clearly document the need for a home delivered meal.</p>

4.1.K. NURSING SERVICES

Definition	Nursing Services are covered on an intermittent (separated intervals of time) basis for a participant who requires nursing services for the management of a chronic illness or physical disorder in the participant's home. These services are provided by a
-------------------	--

Medicaid Provider Manual

	<p>registered nurse (RN) or a licensed practical nurse (LPN) under the direct supervision of an RN. Nursing Services are for participants who require more periodic or intermittent nursing than available through the State Plan or third party payer resources for the purpose of preventive interventions to reduce the occurrence of adverse outcomes for the participant, such as hospitalizations and nursing facility admissions.</p>
Requirements	<p>When the participant's condition is unstable, could easily deteriorate, or significantly changes, MI Choice covers nurse visits for observation and evaluation. The purpose of the observation and evaluation is to monitor the participant's condition and report findings to the participant's physician or other appropriate health professional to prevent additional decline, illness, or injury to the participant. The supports coordinator must communicate with both the nurse providing this service and the participant's health professional to ensure the nursing needs of the participant are being addressed.</p> <p>Participants must meet at least one of the following criteria to qualify for this service:</p> <ul style="list-style-type: none">▪ Be at high risk of developing skin ulcers or have a history of resolved skin ulcers that could easily redevelop.▪ Require professional monitoring of vital signs when changes may indicate the need for modifications to the medication regimen.▪ Require professional monitoring or oversight of blood sugar levels, including participant-recorded blood sugar levels, to assist with effective pre-diabetes or diabetes management.▪ Require professional assessment of the participant's cognitive status or alertness and orientation to encourage optimal cognitive status and mental function, or identify the need for modifications to the medication regimen.▪ Require professional evaluation of the participant's success with a prescribed exercise routine to ensure its effectiveness and identify the need for additional instruction or modifications when necessary.▪ Require professional evaluation of the participant's physical status to encourage optimal functioning and discourage adverse outcomes.▪ Have a condition that is unstable, could easily deteriorate, or experience significant changes AND a lack of competent informal supports able to readily report life-threatening changes to the participant's physician or other appropriate health professional. <p>In addition to the observation and evaluation, a nursing visit may also include, but is not limited to, one or more of the following nursing services:</p> <ul style="list-style-type: none">▪ Administering prescribed medications that cannot be self-administered (as defined under Michigan Compiled Law (MCL) 333.7103(1)).▪ Setting up medications according to physician orders.▪ Monitoring participant's adherence to their medication regimen.▪ Applying dressings that require prescribed medications and aseptic techniques.▪ Providing refresher training to the participant or informal caregivers to ensure the use of proper techniques for health-related tasks such as diet, exercise regimens, body positioning, taking medications according to physician's orders, proper use of medical equipment, performing ADL, or safe ambulation within the home.

Medicaid Provider Manual

Limitations	<p>This service is limited to no more than two hours per visit unless a reason for a longer visit is clearly documented in the participant's record (such as requiring three hours to complete a complicated dressing change). Participants receiving Private Duty Nursing/Respiratory Care services are not eligible to receive MI Choice Nursing Services.</p> <p>All providers furnishing this service must be licensed as either a Registered Nurse or a Licensed Practical Nurse in the State of Michigan.</p>
--------------------	---

4.1.L. PERSONAL EMERGENCY RESPONSE SYSTEM

Definition	<p>A Personal Emergency Response System (PERS) is an electronic device that enables a participant to summon help in an emergency. The participant may also wear a portable "help" button to allow for mobility. The system is often connected to the participant's phone and programmed to signal a response center once a "help" button is activated. Installation, upkeep and maintenance of devices and systems are also provided.</p>
Requirements	<p>The provider may offer this service for cellular or mobile phones and devices. The device must meet industry standards. The participant must reside in an area where the cellular or mobile coverage is reliable. When the participant uses the device to signal and otherwise communicate with the PERS provider, the technology for the response system must meet all other service standards. The response center must maintain the monitoring capacity to respond to all incoming emergency signals 24 hours per day, 365 days per year. The response center will provide accommodations for persons with limited English proficiency.</p> <p>The response center must have the ability to accept multiple signals simultaneously. The response center must not disconnect calls for a return call or put in a first call, first serve basis.</p> <p>The provider will furnish each responder with written instructions and provide training, as appropriate.</p> <p>The provider will verify the responder and contact names for each participant on a semi-annual basis to ensure current and continued participation.</p> <p>The provider will ensure at least monthly testing of each PERS unit to ensure continued functioning.</p> <p>The provider will furnish ongoing assistance, as necessary, to evaluate and adjust the PERS instrument or to instruct participants and caregivers in the use of the devices, as well as to provide performance checks.</p> <p>The provider will maintain individual client records that include the following:</p> <ul style="list-style-type: none">▪ Service order,▪ Record of service delivery, including documentation of delivery and installation of equipment, participant/caregiver orientation, and monthly testing,▪ List of emergency responders for each participant, and▪ A case log documenting participant and responder contacts. <p>The Federal Communication Commission must approve the equipment used for the response system. The equipment must meet UL® safety standards 1637 specifications for Home Health Signaling Equipment.</p>

Medicaid Provider Manual

Limitations	<p>PERS does not cover monthly telephone charges associated with phone service.</p> <p>PERS is limited to persons who either live alone or who are left alone for significant periods on a routine basis and who could not summon help in an emergency without this device. Waiver agencies may authorize PERS units for persons who do not live alone if both the participant and the person with whom they reside would require extensive routine supervision without a PERS unit in the home. The supports coordinator must clearly document in the case record the reason for provision of a PERS.</p> <p>Waiver agencies may provide a purchased unit like a PERS device. This type of unit does not require an installation or monthly fee but is a one-time cost. These units are covered under the Specialized Medical Equipment and Supplies service. Participants should not have both a purchased and a rented unit.</p>
--------------------	---

4.1.M. PRIVATE DUTY NURSING/RESPIRATORY CARE [CHANGE MADE 7/1/2025]

Definition	<p>Private Duty Nursing/Respiratory Care (PDN/RC) services are skilled nursing or respiratory care interventions provided to a participant age 21 and older on an individual and continuous basis to meet health needs directly related to the participant's physical disorder. PDN/RC includes the provision of skilled assessment, treatment, and observation provided by licensed nurses within the scope of the State's Nurse Practice Act, consistent with physician's orders and in accordance with the participant's person-centered service plan. RC may be provided by a licensed respiratory therapist to a participant who is ventilator dependent. To be eligible for PDN/RC services, the waiver agency must find the participant meets either Medical Criteria I or Medical Criteria II, and Medical Criteria III. Regardless of whether the participant meets Medical Criteria I or II, the participant must also meet Medical Criteria III.</p> <p>The participant's PCSP must provide reasonable assurance of participant safety. This includes a strategy for effective backup in the event of an absence of providers. The backup strategy must include informal supports or the participant's capacity to manage their care and summon assistance.</p> <p>PDN/RC for a participant between the ages of 18-21 is covered under the State Plan.</p>
Requirements	<p>Through a person-centered planning process, the waiver agency must determine the length and duration of services provided.</p> <p>The direct service provider must maintain close contact with the authorizing waiver agency to promptly report changes in each participant's condition and/or treatment needs upon observation of such changes.</p> <p>The direct service provider must send case notes to the supports coordinator on a regular basis, preferably monthly, but no less than quarterly, to update the supports coordinator on the condition of the participant.</p> <p>This service may include medication administration as defined under Michigan law.</p> <p>The waiver agency is responsible for assuring there is a physician order for the PDN services authorized. The physician may issue this order directly to the provider furnishing PDN/RC services. However, the waiver agency is responsible for assuring the PDN/RC provider has a copy of these orders and delivers PDN/RC services according to the orders.</p> <p>The waiver agency must maintain a copy of the physician orders in the case record.</p>

Medicaid Provider Manual

Medical Criteria	<p>To be eligible for PDN/RC services, the waiver agency must find the participant meets either Medical Criteria I or Medical Criteria II, and Medical Criteria III. Regardless of whether the participant meets Medical Criteria I or II, the participant must also meet Medical Criteria III.</p> <p>Medical Criteria I – The participant is dependent daily on technology-based medical equipment to sustain life. “Dependent daily on technology-based medical equipment” means:</p> <ul style="list-style-type: none">▪ Mechanical rate-dependent ventilation (four or more hours per day) or assisted rate-dependent respiration (e.g., some models of bi-level positive airway pressure [Bi-PAP]); or▪ Deep oral (past the tonsils) or tracheostomy suctioning eight or more times in a 24-hour period; or▪ Nasogastric tube feedings or medications when removal and insertion of the nasogastric tube is required, associated with complex medical problems or medical fragility; or▪ Total parenteral nutrition delivered via a central line, associated with complex medical problems or medical fragility; or▪ Continuous oxygen administration (eight or more hours per day), in combination with a pulse oximeter and a documented need for skilled assessment, judgment, and intervention in the rate of oxygen administration. This would not be met if oxygen adjustment is done only according to a written protocol with no skilled assessment, judgment or intervention required. Continuous use of oxygen therapy is a covered Medicaid benefit for beneficiaries age 21 and older when tested at rest while breathing room air and the oxygen saturation rate is 88 percent or below, or the P02 level is 55 mm HG or below. <p>Medical Criteria II – Frequent episodes of medical instability within the past three to six months requiring skilled assessments, judgments, or interventions (as described in III below) as a result of a substantiated medical condition directly related to the physical disorder.</p> <p>Definitions of Medical Criteria II:</p> <ul style="list-style-type: none">▪ “Frequent” means at least 12 episodes of medical instability related to the progressively debilitating physical disorder within the past six months, or at least six episodes of medical instability related to the progressively debilitating physical disorder within the past three months.▪ “Medical instability” means emergency medical treatment in a hospital emergency room or inpatient hospitalization related to the underlying progressively debilitating physical disorder.▪ “Emergency medical treatment” means covered inpatient and outpatient services that are furnished by a provider who is qualified to furnish such services and that are needed to evaluate or stabilize an emergency medical condition.▪ “Emergency medical condition” means a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain) such that a prudent layperson who possesses an average knowledge of health and medicine could reasonably expect that the absence of immediate medical attention would result in placing the health of the individual in serious jeopardy, serious impairment to bodily functions, or serious dysfunction of any bodily organ or part.
-------------------------	---

Medicaid Provider Manual

- "Directly related to the physical disorder" means an illness, diagnosis, physical impairment, or syndrome that is likely to continue indefinitely, and results in significant functional limitations in three or more ADL.
- "Substantiated" means documented in the clinical or medical record, including the progress notes.

Medical Criteria III – The participant requires continuous skilled care on a daily basis during the time when a licensed nurse or respiratory therapist is paid to provide services.

Definitions of Medical Criteria III:

- "Continuous" means at least once every three hours throughout a 24-hour period, and when delayed interventions may result in further deterioration of health status, in loss of function or death, in acceleration of the chronic condition, or in a preventable acute episode.
- Equipment needs alone do not create the need for skilled services.
- "Skilled" means assessments, judgments, interventions, and evaluations of interventions requiring the education, training, and experience of a licensed nurse or respiratory therapist. Skilled care includes, but is not limited to:
 - Performing assessments to determine the basis for acting or a need for action, and documentation to support the frequency and scope of those decisions or actions.
 - Managing mechanical rate-dependent ventilation or assisted rate-dependent respiration (e.g., some models of Bi-PAP) that is required by the participant four or more hours per day.
 - Deep oral (past the tonsils) or tracheostomy suctioning.
 - Injections when there is a regular or predicted schedule, or prn injections that are required at least once per month (insulin administration is not considered a skilled intervention).
 - Nasogastric tube feedings or medications when removal and insertion of the nasogastric tube is required, associated with complex medical problems or medical fragility.
 - Total parenteral nutrition delivered via a central line and care of the central line.
 - Continuous oxygen administration (eight or more hours per day) in combination with a pulse oximeter, and a documented need for adjustments in the rate of oxygen administration requiring skilled assessments, judgments and interventions. This would not be met if oxygen adjustment is done only according to a written protocol with no skilled assessment, judgment or intervention required. Continuous use of oxygen therapy is a covered Medicaid benefit for beneficiaries age 21 and older when tested at rest while breathing room air and the oxygen saturation rate is 88 percent or below, or the P02 level is 55 mm HG or below.
 - Monitoring fluid and electrolyte balances where imbalances may occur rapidly due to complex medical problems or medical fragility. Monitoring by a skilled nurse would include maintaining strict intake and output, monitoring skin for edema or dehydration, and watching for cardiac and respiratory signs and symptoms.

Medicaid Provider Manual

	<p>➤ Taking routine blood pressure and pulse once per shift that does not require any skilled assessment, judgment or intervention at least once every three hours during a 24-hour period, as documented in the nursing notes, would not be considered skilled nursing.</p>
Limitations	<p>Participants receiving MI Choice Nursing Services are not eligible to receive PDN/RC services.</p> <p>All PDN/RC services authorized must be medically necessary as indicated through the MI Choice assessment and meet the medical criteria described above.</p> <p>The participant's physician, physician assistant, or nurse practitioner must order PDN/RC services and work in conjunction with the waiver agency and provider agency to ensure services are delivered according to that order. Orders should be updated on an annual basis unless the order states otherwise due to ongoing medical need that is unlikely to improve over time.</p> <p>PDN is limited to persons age 21 or older. PDN is a State Plan benefit for persons under the age of 21 who qualify for the service.</p> <p>It is not the intent of the MI Choice program to provide PDN/RC services on a continual 24-hours-per-day/7-days-per-week basis. MI Choice services are intended to supplement informal support services available to the participant. Only under extreme circumstances should 24/7 PDN/RC be authorized for a participant. These circumstances must be clearly described on the person-centered service plan and approved by MDHHS.</p> <p>PDN/RC services provided 24/7 cannot be authorized for participants who cannot direct their own services and supports, make informed decisions for themselves, or engage their emergency backup plan without assistance. These participants must have informal caregivers actively involved in providing some level of direct services to them on a routine basis. A need for 24/7 PDN/RC cannot be used as a primary reason for denying MI Choice eligibility or enrollment as there are circumstances when 24/7 PDN/RC may be appropriate for MI Choice participants. For all individuals requiring 24/7 PDN/RC, an assessment, person-centered service plan, backup/contingency plan, and order from a medical professional must be submitted to MDHHS for review and decision. (text added 7/1/2025)</p> <p>Providers of PDN/RC must be licensed by the State of Michigan.</p>

4.1.N. RESPITE

Definition	<p>Respite services are provided to participants unable to care for themselves and are furnished on a short-term basis due to the absence of, or need of relief for, those unpaid individuals normally providing services and supports for the participant. Respite services may be provided in the participant's home, in the home of another, or in a Medicaid-certified hospital, nursing facility, or a licensed Adult Foster Care (AFC) facility. Respite does not include the cost of room and board, except when provided as part of respite furnished in a facility approved by MDHHS that is not a private residence. Respite can only be provided in the home of another when the participant is using the self-determination option for service delivery. Each out-of-home respite service provider must be either a Medicaid-certified hospital or a licensed group home as defined in Michigan law, which includes AFC homes and Homes for the Aged. Properly licensed nursing facilities may be providers of out-of-home respite services.</p>
-------------------	--

Medicaid Provider Manual

Requirements	<p>Each waiver agency must establish and follow written eligibility criteria for in-home respite that includes, at a minimum:</p> <ul style="list-style-type: none">▪ Participants must require continual supervision to live in their own homes or the home of a primary caregiver, or require a substitute caregiver while their primary caregiver needs relief or is otherwise unavailable.▪ Participants have difficulty performing or are unable to perform ADL without assistance. <p>Respite services include:</p> <ul style="list-style-type: none">▪ Attendant Care (participant is not bed-bound), such as companionship, supervision, and assistance with toileting, eating, and ambulation.▪ Basic Care (participant may or may not be bed-bound), such as assistance with ADL, a routine exercise regimen, and self-medication. <p>The direct service provider must obtain a copy of appropriate portions of the assessment conducted by the waiver agency before initiating service. The assessment information must include a recommendation made by the assessing RN describing the respite support services the participant needs. Each waiver agency or direct service provider must ensure the skills and training of the respite care worker assigned coincide with the condition and needs of the participant.</p> <p>With the assistance of the participant or participant's caregiver, the waiver agency or direct service provider must determine an emergency notification plan for each participant, pursuant to each visit.</p> <p>Each direct service provider must establish written procedures that govern the assistance given by staff to participants with self-medication. These procedures must be reviewed by a consulting pharmacist, physician, or RN and must include, at a minimum:</p> <ul style="list-style-type: none">▪ The provider staff authorized to assist participants with taking their own prescription or over-the-counter medications and under what conditions such assistance may take place. This must include a review of the type of medication the participant takes and its impact upon the participant.▪ Verification of prescription medications and their dosages. The participant must maintain all medications in their original, labeled containers.▪ Instructions for entering medication information in participant files.▪ A clear statement of the participant's and participant's family's responsibility regarding medications taken by the participant and the provision for informing the participant and the participant's family of the provider's procedures and responsibilities regarding assisted self-administration of medications. <p>Each direct service provider must employ a professionally qualified supervisor that is available to staff during their shift while providing respite care.</p> <p>There is a 30-days-per-calendar-year limit on respite services provided outside the home. Respite services cannot be scheduled on a daily basis, except for longer-term stays at an out-of-home respite facility. Respite should be used on an intermittent basis to provide scheduled relief of informal caregivers.</p> <p>Members of a participant's family who are not the participant's regular caregiver may provide respite for the regular caregiver. However, waiver agencies must not authorize MI Choice funds to pay for services furnished to a participant by that</p>
---------------------	---

Medicaid Provider Manual

	<p>person's spouse. Family members who provide respite services must meet the same standards as providers who are unrelated to the individual.</p> <p>The waiver agency must not authorize respite services to relieve a caregiver that receives waiver funds to provide another service to the waiver participant. This requirement may be waived if:</p> <ul style="list-style-type: none">▪ The case record demonstrates the participant has a medical need for services and supports in excess of the authorized amount of MI Choice services (i.e., the participant has a medical need for 50 hours per week of services); and▪ The case record demonstrates the paid caregiver furnishes unpaid services and supports to the participant (i.e., the caregiver is paid for 30 hours per week, but actually delivers 50 hours per week of services); and▪ The paid caregiver is requesting respite for the services and supports not usually authorized through the MI Choice program (i.e., for all or part of the 20 hours of medically necessary, but unpaid services the caregiver regularly furnishes).
Limitations	<p>MDHHS does not intend to furnish respite services on a continual basis. Respite services should be utilized for the sole purpose of providing temporary relief to an unpaid caregiver. When a caregiver is unable to furnish unpaid medically necessary services on a regular basis, waiver agencies should work with the participant and caregiver to develop a PCSP that includes other MI Choice services, as appropriate.</p> <p>The costs of room and board are not included.</p> <p>Waiver agencies cannot authorize respite services on a continual daily basis. Waiver agencies may authorize respite services on a daily basis for a short period, such as when informal supports are on vacation.</p> <p>Respite should be used on an intermittent basis to provide scheduled relief of informal caregivers.</p> <p>The waiver agency must not authorize waiver funds to pay for respite services provided by the participant's usual caregiver.</p>

4.1.O. SPECIALIZED MEDICAL EQUIPMENT AND SUPPLIES

Definition	<p>Specialized Medical Equipment and Supplies includes devices, controls, or appliances which enable participants to increase their abilities to perform ADL, or to perceive, control, or communicate with the environment in which they live. This service also includes items necessary for life support or to address physical conditions, along with ancillary supplies and equipment necessary to the proper functioning of such items. This includes durable and non-durable medical equipment and medical supplies not available under the State Plan that are necessary to address the participant's functional limitations. All items must be specified in the PCSP.</p> <p>This service excludes those items that are not of direct medical or remedial benefit to the participant. Durable and non-durable medical equipment and medical supplies not available under the State Plan that are necessary to address the participant's functional limitations may be covered by this service. Medical equipment and supplies furnished under the State Plan must be procured and reimbursed through that mechanism and not through MI Choice. All items must be specified in the participant's PCSP.</p> <p>All items must meet applicable standards of manufacture, design and installation. Coverage includes training the participant or caregiver(s) in the operation and</p>
-------------------	--

Medicaid Provider Manual

	<p>maintenance of the equipment or the use of a supply when initially purchased. Waiver funds may also be used to cover the maintenance costs of equipment.</p>
Requirements	<p>Waiver agencies may obtain some items directly from a retail store that offers the item to the public (i.e., Wal-Mart, Meijer, Costco, etc.). When utilizing retail stores, the waiver agency must ensure the item purchased meets the service standards. The waiver agency may choose to open a business account with a retail store for such purchases. The waiver agency must maintain the original receipts and maintain accurate systems of accounting to verify the specific participant who received the purchased item.</p> <p>The waiver agency must document the medical or remedial benefit the equipment or supply provides to the participant in the participant's case record.</p> <p>Where feasible, the waiver agency or direct service provider must seek affirmation of the need for the item provided from the participant's physician.</p> <p>The waiver agency may provide liquid nutritional supplements as a specialized medical supply. The participant's physician or other health care professional must first order liquid nutritional supplements as described in the HDM service standards. When liquid nutrition supplements a participant's diet, the supports coordinator must ensure the physician or other health care professional renews the order for liquid nutritional supplements every six months.</p>
Limitations	<p>The waiver agency may not authorize MI Choice payment for prescription medications not found on the Medicaid prescription drug formulary. If a participant requires a medication not found on the formulary, the waiver agency, participant, or pharmacy must seek prior authorization of payment through the State Plan. Regardless of approval or denial of State Plan prior authorization, MI Choice funds must not pay for the medication.</p> <p>The waiver agency must not authorize MI Choice payment for herbal remedies or other over-the-counter medications for uses not authorized by the Food and Drug Administration (FDA).</p>

4.1.P. SUPPORTS COORDINATION

Definition	<p>Supports coordination is provided to ensure the provision of supports and services required to meet the participant's health and welfare needs in a home and community-based setting. Without these supports and services, the participant would otherwise require institutionalization. The supports coordination functions to be performed and the frequency of face-to-face and other contacts are specified in the PCSP. The frequency and scope of supports coordination contacts must take into consideration health and welfare needs of the participant. Supports coordination does not include the direct provision of other Medicaid services. Supports coordinators perform all functions described in the Supports Coordination Section of this Chapter.</p>
Requirements	<p>Each supports coordinator must have a valid Michigan license as a Registered Nurse (RN) or Social Worker (SW), and be trained and knowledgeable about the program requirements for MI Choice as well as other available community resources.</p> <p>Functions performed by a supports coordinator include:</p> <ul style="list-style-type: none"> ▪ Ensure the participant meets the LOCD per MDHHS policy. ▪ Conduct the initial assessment and periodic reassessments.

Medicaid Provider Manual

	<ul style="list-style-type: none">Facilitate person-centered planning that is focused on the participant's preferences. Includes family and other allies as determined by the participant, identifies the participant's goals, preferences and needs, provides information about options, and engages the participant in monitoring and evaluating services and supports.Develop a PCSP, including revisions to the PCSP at the participant's initiation or as changes in the participant's circumstances may warrant.Communication with the participant is a requirement and must be incorporated into the person-centered service plan.Make referrals to and coordinate with providers of services and supports, including non-Medicaid services and informal supports. This may include providing assistance with access to entitlements or legal representation.
Limitations	<p>Participant must need and agree to accept at least one additional MI Choice service every 30 days to qualify for the program.</p> <p>Supports coordinators must not also provide Transition Navigation under the Transition Services benefit.</p>

4.1.Q. TRAINING

Definition	<p>Training services consist of instruction provided to a MI Choice participant or caregiver(s) in either a one-to-one situation or a group basis to teach a variety of independent living skills, including the use of specialized or adaptive equipment or medically-related procedures required to maintain the participant in a community-based setting. The training needs must be identified in the comprehensive assessment or in a professional evaluation and included in the participant's person-centered service plan. Training is covered for areas such as ADL, adjustment to home or community living, adjustment to mobility impairment, adjustment to serious impairment, management of personal care needs, the development of skills to deal with service providers and attendants, and effective use of adaptive equipment. For participants self-directing services, training services may also include the training of independent supports brokers, developing and managing individual budgets, staff hiring and supervision, or other areas related to self-direction.</p>
Requirements	<p>Direct service providers must possess credentials required by Michigan laws or federal regulations, including:</p> <ul style="list-style-type: none">MCL 333.17801...333.17831 (physical therapist),MCL 333.18301...333.18311 (occupational therapist),MCL 333.18501...333.18518 (social worker), and/orMCL 333.17201...333.17242 (nursing) <p>The waiver agency must identify the training needs in the comprehensive assessment or in a professional evaluation and include them in the PCSP. The waiver agency must provide a description of these needs to the direct service provider.</p> <p>The waiver agency must maintain verification of training provided to self-determined workers in the participant's case record.</p>

Medicaid Provider Manual

4.2 STATE PLAN SERVICES

MI Choice services are designed to address the unique needs and circumstances of program participants. Some waiver services appear to be the same as services offered in the State Plan; however, they differ in terms of key elements, such as scope of coverage or provider qualifications. Inasmuch as waiver services are designed to meet the specific demands of participants, it is expected that a waiver service will be more appropriate for a participant than a similar State Plan service. Under no circumstances shall the participant receive both services. As a Prepaid Ambulatory Health Plan (PAHP), waiver agencies have authority to authorize payment only for MI Choice services for which they receive a capitated payment. Payments to the waiver agency for State Plan services may occur when the waiver agency is a properly enrolled provider for the specified service and conforms to conflict of interest protections.

4.3 HOSPICE OR PALLIATIVE CARE

MI Choice participants may receive State Plan hospice or palliative care services while participating in MI Choice. Participants must meet all hospice or palliative care eligibility requirements outlined in the Hospice Chapter of this Manual. If the beneficiary is receiving hospice or palliative care and becomes eligible to receive waiver services, the waiver agency contacts the hospice or palliative care provider to establish the first date of service for the waiver services.

State Plan hospice or palliative care services must be used to the fullest extent before similar MI Choice services are authorized. Inappropriate services (e.g., duplicative, non-covered) are subject to MDHHS recovery of the amounts paid for those services from the waiver agency.

A joint plan of service for Hospice or palliative care and MI Choice must be developed and maintained by both the waiver agency and the hospice or palliative care provider. It is important that the waiver agency understand the hospice or palliative care philosophy so the two entities work for a common goal and avoid redundant services. Ongoing communication and coordination must occur between the MI Choice supports coordinator and the hospice or palliative care provider during the time they are serving the participant. Written documentation of this communication and coordination must be kept in the participant's record at each agency.

4.4 SERVICES IN LICENSED OR PROVIDER CONTROLLED SETTINGS

Licensing rules for residential setting providers reflect an attempt to make residing in these settings much like it would be in a home. Providers of licensed residential settings must meet the standards of providing a non-institutional setting licensed by the State of Michigan. For further details on what constitutes a home and community-based setting, refer to 42 CFR §441.530. Both licensed and non-licensed settings in which the provider has control over staffing arrangements and where MI Choice services are furnished must comply with the requirements of the Home and Community Based Services Chapter of this Manual.

4.5 SERVICE NEED LEVELS

Waiver agencies must classify each MI Choice participant into a service need level based upon the participant's immediacy of need for the provision of services and the availability of informal supports. Waiver agencies must establish and utilize written procedures consistent with the service need levels specified below to ensure each participant's needs are met in the event of an emergency. Waiver agencies must make direct service providers aware of the service need levels and the classification of

Medicaid Provider Manual

each participant served by that provider so that the service provider can target services to the highest priority participants in emergencies.

- Immediacy of need for the provision of services
 1. Immediate – the participant cannot be left alone
 2. Urgent – the participant can be left alone for a short time (less than 12 hours)
 3. Routine – the participant can be left alone for a day or two
- Availability of Informal Supports
 1. No informal supports are available for the participant
 2. Informal supports are available for the participant
 3. The participant resides in a supervised residential setting (SRS)

4.5.A. GRID OF SERVICE NEED LEVELS

Immediacy	Informal Supports	Service Need Level	Service Need Level Description
Immediate	None	1A	This means the participant cannot be left alone. If services are not delivered as planned, the backup plan needs to start immediately.
Immediate	Available	1B	This means the participant cannot be left alone. If services are not delivered as planned, family or friends need to be contacted immediately.
Immediate	SRS	1C	This means the participant cannot be left alone. Staff at the place of residence must be available as planned or follow established emergency procedures.
Urgent	None	2A	This means the participant can be left alone for a short time. If services are not delivered as planned, the backup plan needs to start within 12 hours.
Urgent	Available	2B	This means the participant can be left alone for a short time. If services are not delivered as planned, family or friends need to be contacted within 12 hours.
Urgent	SRS	2C	This means the participant can be left alone for a short time. Staff at the place of residence must check on the participant periodically each day. Follow established emergency procedures if no staff is present in the home.
Routine	None	3A	This means the participant can be left alone for a day or two. If services are not delivered as planned, the backup plan needs to start within a couple of days.
Routine	Available	3B	This means the participant can be left alone for a day or two. If services are not delivered as planned, family or friends need to be contacted within a couple of days.
Routine	SRS	N/A	There is not a 3C service need level because participants in supervised residential settings typically require 24-hour supervision and cannot be left alone for long periods.

Medicaid Provider Manual

4.6 SELF-DETERMINATION

Self-Determination provides MI Choice participants the option to direct and control their own waiver services. Not all MI Choice participants choose to participate in self-determination. For those that do, the participant (or chosen representative[s]) has decision-making authority over staff who provide waiver services, including:

- Recruiting staff
- Referring staff to an agency for hiring (co-employer)
- Selecting staff from worker registry
- Hiring staff (common law employer)
- Verifying staff qualifications
- Obtaining criminal history review of staff
- Specifying additional service or staff qualifications based on the participant's needs and preferences so long as such qualifications are consistent with the qualifications specified in the approved waiver application and the Minimum Operating Standards
- Specifying how services are to be provided and determining staff duties consistent with the service specifications in the approved waiver application and contract attachments
- Determining staff wages and benefits, subject to State limits (if any)
- Scheduling staff and the provision of services
- Orienting and instructing staff in duties
- Supervising staff
- Evaluating staff performance
- Verifying time worked by staff and approving timesheets
- Discharging staff (common law employer)
- Discharging staff from providing services (co-employer)
- Reallocating funds among services included in the participant's budget
- Identifying service providers and referring for provider enrollment
- Substituting service providers
- Reviewing and approving provider invoices for services rendered

Participant budget development for participants in self-direction occurs during the person-centered planning (PCP) process and is intended to involve individuals the participant chooses. Planning for the person-centered service plan precedes the development of the participant's budget so that needs and preferences can be accounted for without arbitrarily restricting options and preferences due to cost considerations. A participant's budget is not authorized until both the participant and the waiver agency have agreed to the amount and its use. In the event that the participant is not satisfied with the authorized budget, they may reconvene the PCP process. The waiver services of Fiscal Intermediary and Goods and Services are available specifically to self-determination participants to enhance their abilities to more fully exercise control over their services.

Medicaid Provider Manual

Participants choosing the self-determination model for service delivery may also choose to utilize a supports broker to assist with developing the person-centered plan and securing other services (regardless of payer source) that may contribute to the participant's success in home and community-based living and improvements in their quality of life. Supports coordinators should inform all participants of this option and may assist the participant with selecting a supports broker, as needed.

The participant may, at any time, modify or terminate the self-determination option. The most effective method for making changes is the PCP process in which individuals chosen by the participant work with the participant and the supports coordinator to identify challenges and address problems that may interfere with the success of self-determination. The decision of a participant to terminate participation in self-determination does not alter the services and supports identified in the person-centered service plan, with the exception of the termination of the self-determination only services, Fiscal Intermediary, and Goods and Services. When the participant terminates self-determination, the waiver agency has an obligation to assume responsibility for ensuring the provision of all other services identified in the person-centered service plan through its provider network.

A waiver agency may terminate self-determination for a participant when problems arise due to the participant's inability to effectively direct services and supports. Prior to terminating self-determination (unless it is not feasible), the waiver agency informs the participant in writing of the issues that have led to the decision to terminate this option. The waiver agency will continue efforts to resolve the issues that led to the termination.

4.6.A. SELF-DETERMINED PROVIDERS

Participants choosing the self-determination option may directly manage service providers for the following home and community-based MI Choice waiver services: chore, community health worker, community living supports, environmental accessibility adaptations, fiscal intermediary, goods and services, community transportation, private duty nursing/respiratory care, respite services provided inside the participant's home, and respite services provided in the home of another.

4.6.A.1. SUPERVISION OF DIRECT-CARE WORKERS

The MI Choice participant, or designated representative, acts as the employer and provides direct supervision of the chosen workers for self-determined services in the participant's PCSP. The participant, or designated representative, directly recruits, hires, and manages employees.

4.6.A.2. USE OF A FISCAL INTERMEDIARY

MI Choice participants choosing the self-determination option must use an approved fiscal intermediary agency. The fiscal intermediary agency will help the individual manage and distribute funds contained in the participant's budget. The participant uses the funds in the budget to purchase waiver goods, supports, and services authorized in the participant's PCSP. Refer to the Fiscal Intermediary service standard for more information about this MI Choice service.

Medicaid Provider Manual

4.6.A.3. REFERENCE AND CRIMINAL HISTORY SCREENING CHECKS

Each MI Choice participant, or fiscal intermediary chosen by the participant, must conduct reference checks and a criminal history screening through the Michigan State Police for each paid staff person who will be entering the participant's home. The MI Choice participant or fiscal intermediary must conduct the criminal history screening before authorizing the employee to furnish services in the participant's home. Waiver agencies must also check the Michigan Medicaid sanctioned provider list to determine if the provider is on the list; these providers must be excluded from providing any MI Choice services.

4.6.A.4. PROVIDER QUALIFICATIONS

Providers of self-determined services must minimally:

- Be 18 years old.
- Be able to communicate effectively both orally and in writing and follow instructions.
- Be trained in universal precautions and blood-borne pathogens. The waiver agency must maintain a copy of the employee's training record in the participant's case file.
- Providers of self-determined services cannot also be the participant's spouse, guardian, legally responsible person, or designated representative.

Medicaid Provider Manual

SECTION 5 – NURSING FACILITY TRANSITIONS

Serving individuals who require long-term supports and services in the least restrictive setting of their choice is a priority of MDHHS. The tenet of rebalancing the spectrum of long-term services and supports in Michigan was given impetus by the 1999 United States Supreme Court decision in *Olmstead v. L. C.*. Waiver agencies must enroll individuals who are transitioning or discharging from an institutional setting and who qualify for and choose the MI Choice program as slot capacity allows and according to waiting list prioritization. Waiver agencies will work with the Transition Services Transition Navigator or discharge planner to ensure MI Choice enrollment occurs on the date of transition or discharge for the individual to ensure the continuation of services for the individual.

Medicaid Provider Manual

SECTION 6 – SUPPORTS COORDINATION

Supports coordination facilitates access to, and arrangement of, services and supports needed and chosen by MI Choice participants. These are detailed and documented in the person-centered service plan.

Supports coordinators (SCs) use a person-centered approach in working with a participant to determine how their needs will be met. SCs also monitor the quality of services received by the participant and explore other funding options and service opportunities when personal goals exceed the scope of available MI Choice services. For participants choosing the self-determination option for service delivery, the SC assists in the selection, coordination, and management of those services and providers.

Waiver agency staff respects each participant's cultural background.

SCs must receive ongoing training and supervision, as appropriate.

The SCs ensure the participant's rights. This includes the right to participate actively in SC services including the development of the PCSP, the right to use a supports broker, the right to receive or refuse services, the right to choose providers, and the right to participate in a PCP process.

Every MI Choice participant signs a Freedom of Choice form to receive services from MI Choice. CHAMPS will generate this form for each participant once the completed LOCD is entered online. Waiver agencies follow the requirements defined in the Nursing Facility Level of Care Determination Chapter of this Manual. Participants must be informed of the following:

- Services available in MI Choice, PACE, MI Health Link, and nursing facilities. Participants or their legal representative must sign the Freedom of Choice form to indicate their preference for MI Choice. Waiver agencies maintain properly completed, signed, and dated forms in the participant's case record. Waiver agencies must make attempts to get the participant or legal representative to sign the Freedom of Choice form, but a refusal or inability to sign the form is not a reason to deny MI Choice services. If the participant or legal representative refuses to or is unable to sign the form, and the waiver agency has attempted to obtain the signature with documentation of attempts in progress notes, the waiver agency should document this on the Freedom of Choice form. The form should then be maintained in the participant's file. (Refer to additional Freedom of Choice requirements within this chapter.)
- Services available through the State Plan which may meet their needs. Examples include the Home Help program available through the MDHHS Field Office. Persons who qualify for the Home Help program and for whom this program will fully meet their services and support needs do not qualify for the MI Choice program because they do not have the need for a waiver service.

SCs instruct participants regarding how to contact SCs when needed for service and supports changes.

SCs provide all of the following functions: social emotional support, advocacy, assessment, person-centered service planning and development, service access, follow-up and monitoring, and reassessment.

Medicaid Provider Manual

6.1 SOCIAL EMOTIONAL SUPPORT

SCs provide support to participants and their allies to facilitate life adjustments and reinforce the participant's circle of support. SCs also conduct case conferencing as determined necessary and approved by the participant.

6.2 ADVOCACY

SCs provide support to ensure participants and their families receive benefits and services they need and to which they are entitled. SCs also provide assistance with accessing Medicare, Medicaid, and other third party benefits and services.

6.3 ASSESSMENT

The MI Choice program has established the Resident Assessment Instrument – Home Care (iHC) as the approved assessment instrument for assessing the functional status of participants. The iHC Assessment System, consisting of the iHC and Clinical Assessment Protocols (CAPs), is the basis for the MI Choice assessment. SCs perform a comprehensive evaluation including assessment of the individual's unique preferences; physical, social, and emotional functioning; medication; physical environment; natural supports; and financial status. The SC must fully engage the participant in the interview to the extent of the participant's abilities and tolerance. The initial assessment must be conducted in person.

Specific iHC items identify applicants who could benefit from further evaluation of particular problems and risks for functional decline. These items, called "triggers," link the iHC to a series of problem-oriented CAPs. The CAPs are procedures that guide the SCs through further assessment and individualized service and support planning with participants.

SCs also conduct the LOCD tool to determine if the individual meets functional eligibility.

Qualified SCs perform the initial MI Choice assessment function as a team. Qualified staff includes a RN or SW, both with valid Michigan licenses to practice their profession.

The MI Choice Intake Guidelines, LOCD, and iHC are not interchangeable tools.

6.4 PERSON CENTERED PLANNING AND SERVICE PLAN DEVELOPMENT

SCs and participants plan interventions from both allies and community resources that will meet each participant's identified needs. A written person-centered service plan (PCSP) documents the issues, concerns, conditions, and specific supports and interventions needed. The SC and participant base the PCSP upon participant preferences and needs identified during a PCP assessment process. The PCSP must be completed and approved by the participant within 90 days.

6.4.A. PERSON-CENTERED PLANNING

Person-centered planning (PCP) is a process for planning and supporting a participant receiving services that builds on the participant's desire to engage in lawful activities that promote community life and that honor the participant's preferences, choices, and abilities. The PCP process involves families, friends, and professionals as the participant desires or requires. Waiver agencies and direct service providers must utilize a PCP

Medicaid Provider Manual

process, informing the participant of service options in ways that are meaningful to the participant. This includes assessing the needs and desires of the participant, developing the person-centered service plan, and continuously updating and revising those plans as needs and desires change. The participant and their chosen representative(s) must be provided with written information from the waiver agency detailing the right to participate in the PCP process. Waiver agencies and direct service providers implement PCP in accordance with the MDHHS Person-Centered Planning Guideline document that may be found in the Directory Appendix of this Manual.

Waiver agencies shall have policy and procedures acknowledging the participant's authority to make decisions about the planning process and evaluate the PCSP and its outcomes.

SCs follow the principles of PCP, including providing opportunities for participants to express goals, desires, and expectations and supporting the involvement of allies to participate in planning activities.

SCs identify and discuss all potential supports and service options and emphasize participant choices and preferences.

The participant directs the PCP process. The process:

- Includes people chosen by the individual.
- Provides necessary information and support to ensure the participant directs the process to the maximum extent possible, and is enabled to make informed choices and decisions.
- Is timely and occurs at times and locations of convenience to the participant.
- Reflects cultural considerations of the participant and is conducted by providing information in plain language and in a manner that is accessible to individuals with disabilities and persons who are limited English proficient.
- Includes strategies for solving conflict or disagreement within the process, including clear conflict of interest guidelines for all planning participants.
- Offers choices to the participant regarding the services and supports the participant receives and from whom.
- Includes a method for the participant to request updates to the plan, as needed.
- Records the alternative home and community-based settings that were considered by the participant.

PCP meetings are conducted when the participant is not in crisis and at a time of the participant's choice. The participant has authority to determine who will be involved in the PCP process as well as a time and location that meets the needs of all individuals involved in the process. An interim plan of service may be developed by the supports coordinator when the participant is experiencing a crisis situation that requires immediate services and the participant is not ready to fully participate in PCP. Interim care plans are authorized for no more than 30 days without a follow-up visit (or planning meeting) to determine the participant's status.

Medicaid Provider Manual

6.4.A.1. PARTICIPANT MANAGEMENT OF RISK

Participant management of risk embraces all the decisions one makes and activities one undertakes with the intent of improving one's health and safety and the environment. Each risk involves the possibility of detrimental consequences and their likelihoods. The management component of risk management involves decisions about these risks. State and federal government legislation and regulations make thousands of such decisions; families and individuals make millions of these decisions (National Quality Inventory Project, MS HCBS Waiver Programs for Individuals with Developmental Disabilities., Glossary). In MI Choice, effective risk management builds upon the service planning and monitoring processes.

CMS and MDHHS require waiver agencies to assist MI Choice participants in managing the risks associated with choosing home and community-based service programs over institutionalization. Risk management is part of assuring the health and welfare of MI Choice participants. "The identification of potential risks to waiver participants and the development of strategies to mitigate such risks are integral to enabling participants to live as they choose in the community while assuring their health and welfare. Critical risks should be addressed during the PCSP development process by incorporating strategies into the plan to mitigate whatever risks may be present" (CMS Instructions, Technical Guide and Review Criteria, Version 3.5 HCBS Waiver Application).

The SCs identify potential risks to the participant during all assessments and fully discuss these risks with the participant and their allies upon identification. During the PCP process, the participant specifies risks and preferred methods of monitoring their potential impact. Some participants may be in at-risk situations because of the absence of scheduled services that put the participant in a vulnerable state by compromising their health and welfare. Other risk situations include (but are not limited to) a structurally damaged or unsanitary environment or non-compliance with medical care. The iHC assessment system will automatically elicit some participant risks through the CAPs and triggers reports.

Waiver agencies may require participants to acknowledge when their choices pose risks for their health and welfare. MDHHS does not obligate the waiver agency to authorize services believed to be harmful to the participant. The SCs initiate negotiations of such issues in the PCP process. The SCs educate the participant to ensure the participant makes informed choices concerning their risks. The SCs inform service providers of a participant's risk status when ordering services in the traditional MI Choice program. The participant or, if preferred, the SC informs service providers of the participant's risk status when the participant chooses the self-determination. MDHHS requires agency providers, including waiver agencies, to have a contingency plan for emergencies that pose a serious threat to participant health and welfare (i.e., inclement weather, natural disasters, and unavailable caregiver.)

Each PCSP describes backup plans to implement when selected service providers are unable to furnish services as planned. This may involve developing lists of alternative qualified providers, using a provider agency or informal supports, or contacting the SC when planned services are unavailable. Additionally, the waiver agency develops an emergency plan with each participant that clearly describes a preferred course of action

Medicaid Provider Manual

when the participant has an emergency. SCs discuss and incorporate contingency plans into the individual PCSP during the PCP process.

MDHHS staff reviews a random sample of contingency plans during the clinical quality assurance review (CQAR) to ensure they meet participant needs and there is proper documentation for emergency, backup planning, and risk management procedures. The MI Choice Quality Improvement Strategy requires waiver agencies to monitor and track the activation of backup plans, including how well the plans worked in an effort to improve the development of backup plans with participants.

Clinical Assessment Protocols (CAPs) and Triggers

The iHC includes 27 CAPs that contain general guidelines for further assessment and individualized planning for participants when the iHC indicates problematic or "trigger" conditions. The iHC items identify participants who could benefit from further evaluation of specific problems and risks for functional decline. These items, known as triggers, link the iHC to a series of problem-oriented CAPs. Inter-RAI designed all CAPs to inform the clinical process. An average participant may trigger 10-14 of the 27 CAPs. Some of the CAPs form the core of the PCSP when relevant to the participant's existing problems and risks, others will not.

Waiver agencies may use a computerized report called the CAPs and Triggers Report (C&T report) that is generated following each assessment of a participant. SCs use the information on the C&T report to identify problems, evaluate causes and associated conditions for the problems, and to assist in the development of necessary goals and related approaches to services and referrals for services and supports. C&T reports also assist SCs with addressing and managing risks based upon the participant's identified individual risk factors. The in-depth evaluation of problems following the routine assessment helps SCs think through why a problem exists or why the participant is at risk, providing the necessary foundation on which to base the next steps in care planning to reduce risk.

The review of the C&T report requires SCs to evaluate a wide variety of triggered problems. The focus is not just on simple maintenance services or planning a response to an immediate problem. While these are included, the system also helps SCs to assess for opportunities to rehabilitate function, prevent decline, and maintain participant strengths. In responding to urgent needs, the participant and their SCs can identify service and support priorities. In looking at chronic problems, the participant and their SC can maintain comprehensive well-being. All risk planning and management is contingent on the participant and the participant's family agreeing with the assessment and SC recommendations in care planning.

It is important to note that not all conditions triggered apply to every participant. The SC or participant may have already planned for, ameliorated, or determined a specific condition is not a problem to the participant. Conversely, the CAPs do not include every problem that the participant needs to have addressed in care planning and risk management. However, the CAPs are sound starting points covering most frequent problem situations that SCs need to address in care planning and risk management.

Medicaid Provider Manual

Service Need Levels Based on Identified Risks

SCs fully discuss strategies to mitigate risk with the participant and their allies, family, and relevant others during PCP. The SCs inform the participant of risks and educate the participant about consequences of chosen risks, as necessary. SCs document the participant's informed choice in the case record. SCs document participant-approved risk strategies and write them into the PCSP.

When a participant makes decisions that are self-injurious or jeopardize the safety of others, SCs determine if an appropriate substitute decision-maker can act informally or if they should seek a guardian to protect the participant. Waiver agencies must define a local procedure for taking such action.

SCs identify the service need level of each participant according to the Special Need Levels subsection of this chapter. SCs inform service providers of a participant's service need level when ordering services.

Waiver agencies maintain policy and procedures that address the use of restraints and seclusion of participants. SCs do not encourage the use of restraints by allies, but educate allies regarding alternative methods to address issues. Waiver agencies establish procedures that include:

- The use of alternative methods to avoid the use of restraints and seclusion;
- Methods used by SCs to detect the use of restraints;
- The protocols that SCs, service providers, and allies must follow when the use of restraints or seclusion are identified;
- The practices that must be employed to ensure the health and welfare of individuals; and
- Documentation that is required concerning the use of restraints or seclusion.

Contingency Planning

MDHHS requires direct providers of MI Choice services to have a contingency plan for emergencies that pose a serious threat to participant health and welfare (i.e., inclement weather, unavailable personal caregivers, etc.).

The development of contingency plans is one way to address some of the risks encountered by MI Choice participants. MDHHS identifies both emergency plans and backup plans as contingency plans for MI Choice participants. Contingency plans may be a single document that incorporates both the emergency plan and the backup plan. Waiver agencies assist all participants in the development of an effective contingency plan crafted to meet the unique needs and circumstances of each MI Choice participant. Waiver agencies must use the service need levels as identified and required in this chapter.

Waiver agencies retain a copy of each participant's contingency plan in the participant record and provide additional copies to the participant, service providers, and other allies included in the plan, as preferred by the participant. The contingency plan is updated as

Medicaid Provider Manual

needed, and the waiver agency sends the participant, service providers, and other allies a copy of the contingency plan after each update.

Emergency Plans

- An emergency is a situation or event that places participant health or life in danger and requires immediate action or medical attention to prevent physical harm or hospitalization. Emergencies include natural disasters (tornados, floods, drought, heat waves, blizzards, etc.), unnatural disasters (fires, bomb threats, terrorism, etc.), and sudden onset of medical crises.
- The waiver agency encourages participants to use a PERS or dial "911" during an emergency.
- Participants whose life depends upon equipment that requires electricity have an emergency plan that addresses what to do during a power outage, or clearly states the participant's preference not to include such measures.
- Participants who need assistance to ambulate have an emergency plan that includes the notification of someone who will assist them in evacuating their residence if necessary, or clearly state the participant's preference not to include such measures.
- MDHHS urges all participants to have escape routes defined for various disasters.
- MDHHS urges all waiver agencies to be involved with law enforcement officials and other disaster preparedness agencies at the local level to help these agencies identify and assist MI Choice participants during emergencies.

Backup Plans

- Backup plans provide for alternative arrangements for the delivery of services that are critical to participant well-being in the event that the provider responsible for furnishing the services fails or is unable to deliver them (CMS Instructions, Technical Guide, and Review Criteria, Version 3.5 HCBS Waiver Application). Backup plans are employed when scheduled providers do not show up as expected.
- Each contracted service provider shall have established policies and procedures that reasonably ensure the delivery of services to participants in the event that the regularly scheduled provider is unable to furnish the service.
- The waiver agency notifies providers of the participant's service need level. This information shall also be included in the backup plan for each participant.
- Backup plans should minimally include contact information for all providers furnishing critical services to the participant. A critical service is a service the participant must receive as planned and as specified in the service need level of the participant.
- Backup plans should include methods for the participant and provider agency to contact the SC if a provider does not deliver a service as planned.
- Backup plans should include provisions for furnishing services when an unpaid caregiver is unable to provide a service that is critical to the participant and usually provided by that ally.

Medicaid Provider Manual

- Backup plans should clearly state the participant's preferences for receiving services and supports if the regularly scheduled provider cannot furnish the services and supports. Waiver agencies develop policies and procedures to track the following:
 - When backup plans are activated;
 - When the backup service provider furnished services; and
 - When service is not provided following activation of backup plans.

6.4.B. PERSON-CENTERED SERVICE PLAN [CHANGE MADE 7/1/2025]

The participant's PCSP is an individualized, comprehensive document developed by the participant, their chosen representative(s), and the supports coordinator prior to the provision of services. Using a person-centered process, waiver agencies must establish a written PCSP for each participant that identifies the participant's strengths, weaknesses, needs, goals, expected outcomes, and planned interventions. This document includes all services provided to, or needed by, the participant regardless of funding source. An initial PCSP must be completed within 10 days of the program enrollment date. The full PCSP is developed when the participant is not in crisis and may build upon an interim care plan, but should be completed within 90 days of MI Choice enrollment. The participant must approve all services and interventions before implementation and the waiver agency must document participant approval. MI Choice services must be stipulated in the PCP process and the participant assessment. Requirements for the PCSP are defined in the Home and Community Based Services Chapter of this Manual.

Using a person-centered planning process, each waiver agency must establish a written person-centered service plan (PCSP) for each participant based upon the assessment of needs, goals, and preferences. The waiver agency and participant must develop the PCSP before providing services. The participant must approve of all services in the PCSP. The waiver agency must document participant approval on the PCSP.

The PCSP must contain, at a minimum:

- The individual chose the setting in which they reside
- The services and supports that are important to the individual to meet the needs identified during the individual's assessment
- The individual's strengths and preferences
- The clinical and support needs identified by a functional assessment
- The amount of service authorized
- The frequency and duration of each service, and the individual's preference for receiving those services and supports
- Units of each service per visit and per week
- Cost per unit
- Total cost of service plan
- Start and stop dates for each service

Medicaid Provider Manual

- The type of provider to furnish each service
- Participant-focused goals and outcomes
- For participants receiving home-delivered meals, notations regarding the number of meals served per day, the days of service, and special diet orders or requests
- Risk factors and measures identified to mitigate them
- Individuals responsible for monitoring the plan
- The informed consent of the individual in writing, and signed by all individuals and providers responsible for its implementation

Informal Supports are unpaid supports that choose to volunteer their time to assist participants in lieu of MI Choice services and supports. (text added 7/1/2025) If informal supports are involved as providers of services, they are not required to sign the PCSP, but must be notified about the duties they are expected to perform for the participant. The participant or legal representative takes responsibility for ensuring these duties are completed and must sign the PCSP indicating they are accepting the responsibility. If the participant or legal representative has not had the discussion with the informal support(s), and prefers the supports coordinator to follow up with the informal support(s), the supports coordinator must do so and document this in the PCSP. If the informal supports are unable to carry out their responsibilities, or the supports coordinator notices during a home visit that the duties have not been performed, the supports coordinator will notify the informal support(s) of the duty to be performed. If the informal support cannot be reached, or refuses to perform the duty, the supports coordinator will discuss other arrangements (formal or informal) with the participant and legal representative. Documentation in the PCSP must be done in a place that is carried from one PCSP update to the next.

The PCSP reflects the SC's authorization to implement participant-approved services. The SC updates the PCSP as frequently as necessary or preferred, but at least every 90 days after the initial assessment, then 180 days after that or as desired by the participant and documented in the PCSP.

6.5 SERVICE ACCESS

SCs and participants arrange and/or purchase in-home health and social services and supports established in the approved PCSP. SCs provide education of participant options in receiving services and supports.

6.6 FOLLOW-UP AND MONITORING

Follow-up and monitoring include contact between SCs, the participant or service providers to ensure providers deliver services as planned and to the satisfaction of the participant. SCs use follow-up and monitoring to evaluate the timeliness, appropriateness, and quality of services implemented under the PCSP. SCs monitor all services implemented on behalf of participants as a function of care planning and participant reassessment activities.

Waiver agencies must maintain local policy and procedures, assuring that participants have a continuous opportunity to provide feedback about services, supports, interventions, and treatments.

Medicaid Provider Manual

SCs must contact participants as determined by the participant in their PCSP (usually about every 30 days) to monitor the participant's health and welfare, the provision of services (including verification of the delivery of one-time services), and the participant's satisfaction with the current PCSP. SCs and participants can adjust services at this time to serve the participant better. SCs should contact the participant no less frequently than every 90 days, unless the participant chooses otherwise.

SCs must contact newly enrolled participants within 14 days of the agreed upon service start date to verify the providers deliver services in the manner arranged and to the satisfaction of the participant. SCs may contact the service provider in addition to contacting the participant to verify the provision of services and any issues identified by the provider. This requirement does not apply to changed services or participants who are re-enrolling in the MI Choice program after a brief disenrollment period.

For participants who enroll in MI Choice upon discharge from a nursing facility or hospital, the supports coordinator must ensure the participant's necessary services or supplies are in place prior to discharge. After the participant's discharge, the supports coordinator must contact the participant within 24 hours of discharge to ensure immediate needs are being met. Within seven (7) days of the discharge, the supports coordinator must conduct an in-person meeting (home visit) with the participant to ensure the previous assessment is still valid, and update as necessary. A full reassessment may be done at that time if the situation warrants it.

An in-person meeting (home visit) must be completed within seven (7) days of a participant moving/transferring from one residence to another (not nursing facility or hospital) to ensure that the participant's needs are being met and to update any assessments as necessary.

SCs must record changes in services negotiated during follow-up and monitoring on behalf of participants in the participant's PCSP.

SCs must provide oral or written feedback to providers regarding services furnished according to the PCSP when the SC receives complaints from participants.

When SCs attempt to arrange a service that cannot start within 30 days, they must contact the provider agency every 30 days until a provider can implement the service. When a network provider is not available, the waiver agency must use an out-of-network provider to furnish approved services until an in-network provider is secured.

SCs must contact participants to ensure that responsible parties implement plans of service as written and according to participant preferences.

Waiver agencies have written complaint procedures to monitor, investigate, and follow-up on concerns expressed by participants. The primary objective of the complaint procedure is for the waiver agency to resolve concerns to the satisfaction of the participant. Each waiver agency maintains a complaint file separate from complaint content logged into individual case records.

Follow-up and monitoring must be conducted by a SC or someone who otherwise meets the qualifications to be a SC (i.e., is a licensed nurse or social worker) and is acting as a SC in the absence of the participant's assigned SC. Examples of acting in the absence of the participant's assigned SC include situations where the assigned SC is on vacation, sick leave, medical leave, or has permanently left the waiver agency and another SC has not yet been assigned.

Medicaid Provider Manual

6.7 REASSESSMENT

Reassessment provides a scheduled, periodic face-to-face reexamination of participant functioning for the purpose of identifying changes that may have occurred since the previous assessment and to measure progress toward meeting specific goals outlined in the participant PCSP. Either an interdisciplinary SC team or an individual SC can perform reassessments using the iHC. A team is not required to perform reassessments.

SCs must provide a face-to-face reassessment to program participants within 90 days of the initial assessment or sooner when there are significant changes in the participant's health or functional status, or significant changes in the participant's network of allies (i.e., death of a primary caregiver). Reassessments may be completed virtually (audiovisual) only if the participant chooses that method.

SCs must provide a subsequent face-to-face annual reassessment to participants or sooner when there are significant changes in the participant's health or functional status, or significant changes in the participant's network of allies (i.e., death of a primary caregiver).

The reassessment is comprehensive and includes review of the same items evaluated during the previous assessment.

The SC may only copy and paste information that has not changed from a previous assessment to the new assessment when the information is still relevant.

The case record must reflect documentation that the participant continually meets the LOCD. The record must indicate the appropriate door through which the participant meets the LOCD criteria based upon the current assessment. If the SC does not complete a paper copy of the LOCD determination tool, the corresponding iHC assessment data MUST support the door through which the SC indicates the participant meets LOCD criteria.

The SC reviews reassessment findings with the participant. The SC and the participant update the PCSP, if necessary, based on mutually agreed upon service changes. The participant approves each service change. The SC sends appropriate notice to the participant and, when necessary, obtains a clearly written, signed statement from the participant that acknowledges the agreed upon change before service changes can be put into place.

When one SC completes an assessment, that SC should consult with an SC of the other discipline to ensure all relevant issues have been updated and properly addressed.

When one SC completes an assessment and identifies participant issues that would be better addressed by the other discipline, OR when the other discipline reviewed the assessment completed by a single SC and identified additional issues, a SC from the other discipline shall do the following in collaboration with the other SC and discuss with a supervisor:

- Perform follow up with the first SC to ensure the record properly addresses the issues, AND
- When indicated by professional judgment as the best course of action, contact the participant to ensure the issues are properly captured within the record and update the PCSP as needed, OR
- When indicated by professional judgment as the best course of action, conduct another in-person reassessment within the next seven days to verify the first SC's findings and ensure the record properly reflects and addresses all issues.

Medicaid Provider Manual

The SC includes reassessments in the participant case record.

Participants may refuse reassessment. SCs document this refusal in the case record. However, to maintain program eligibility, the waiver agency must assess all program participants on an annual basis.

MDHHS requires electronic data collection for all assessments completed for MI Choice participants. SCs must input all assessment data into an electronic system, such as COMPASS. The data system must record the date of and person responsible for any additional information put in the record or changes made to the original assessment data collected.

The SC also documents that the participant continues to meet the nursing facility level of care within the case record, specifying the appropriate "door" through which the participant meets level of care criteria. If a supports coordinator suspects the participant no longer meets the nursing facility level of care, the supports coordinator must conduct a face-to-face LOCD and input the data into the LOCD application in CHAMPS. When CHAMPS confirms the individual no longer meets LOCD criteria, the supports coordinator initiates program discharge procedures and provides the participant with notice and information on appeal rights. A refusal which prevents a timely redetermination is cause for termination from the program.

Medicaid Provider Manual

SECTION 7 – ADMINISTRATION

MDHHS serves as the single state agency in the operation of the MI Choice program. MDHHS contracts with entities to administer the program throughout the state. Certain administrative functions are assigned to the local agencies as defined in the Medicaid waiver application to CMS, as renewed and amended. To assist MDHHS in operating MI Choice, agencies are required to submit periodic reports as detailed in this section.

7.1 WAIVER AGENCIES AS PREPAID AMBULATORY HEALTH PLANS

MDHHS contracts with waiver agencies that operate as PAHPs to perform administrative functions. They are responsible for disseminating waiver information to applicants, assisting applicants with waiver enrollment (which includes assisting applicants with completion of the Medicaid application to secure financial eligibility), managing waiver enrollment against approved limits, monitoring expenditures against approved limits, conducting assessments and LOCD evaluations, reviewing person-centered service plans to ensure that waiver requirements are met, conducting utilization reviews and quality management reviews, recruiting providers, and executing Medicaid provider agreements.

Each waiver agency must sign a provider contract with MDHHS assuring that it meets all program requirements.

Waiver agencies are responsible for securing qualified service providers to deliver services. Eligible provider applicants include public, private non-profit or for-profit organizations that provide services meeting established service standards, certifications or licensure requirements. Participants may only use providers in the waiver agency's provider network, unless no willing provider is available within the waiver agency's network. Waiver agencies must ensure MI Choice services identified in the person-centered service plan are furnished according to the plan, which may include utilizing providers outside of the provider network, as specified in 42 CFR §438.206, until such time as a network provider is able to furnish the service.

7.2 WAITING LIST REPORTING

Waiting list data is collected and maintained on a secure, web-based application. Waiver agencies must complete all required fields for each qualified MI Choice applicant. Waiting list data must be entered online within one business day after completion of the MI Choice Intake Guidelines. If an applicant is removed from the MI Choice waiting list, the data must be completed online within five business days and include the reason for removal.

7.3 HEALTH INSURANCE PORTABILITY AND ACCOUNTABILITY ACT (HIPAA)

All MI Choice waiver agencies and providers are required to comply with the provisions of the Health Insurance Portability and Accountability Act of 1996 (HIPAA) and any subsequent revisions. Compliance is required in areas that include privacy and security rules, data sharing, and disclosure.

7.4 TRANSFERRING MI CHOICE PARTICIPANTS TO ANOTHER WAIVER AGENCY

MDHHS ensures participants have a choice of a waiver agency, as available, to coordinate MI Choice services. A participant may choose to transfer enrollment from one waiver agency to another, as available within the region where they live, or a participant may move to another region of the State.

Medicaid Provider Manual

Waiver agencies are responsible for managing transfers of participants to other agencies or accepting transfers from another agency and are required to:

- Ensure that participants are transferred from one agency to another, preserving continuity of care and the integrity of the participant's preferences and PCSP.
- The new waiver agency must perform an initial assessment. This may include an LOCD if an active LOCD is not available in CHAMPS or the participant has significant changes. The new waiver agency must either enter an LOCD in CHAMPS or adopt the current LOCD as specified in LOCD policy for the transferred participant within 14 calendar days after the date of the participant's enrollment in the new waiver agency's program, or otherwise according to MDHHS LOCD policy.
- The new waiver agency for each transferred participant must not reimburse providers for delivered MI Choice services authorized by a previous waiver agency. The new waiver agency reviews PCSP activity and authorizes a new PCSP with the participant.

The waiver agency the participant transferred from is responsible for closing the participant enrollment at that agency so that the new agency can enroll the participant in its MI Choice program. The waiver agency the participant transferred from is responsible for entering disenrollment information in CHAMPS so that the waiver agency the participant is transferring to may enter enrollment information in CHAMPS.

7.5 RELEASE OF INFORMATION AND CONSENT

The participant shall authorize the use or disclosure of PHI under HIPAA by signing a Release of Information and Consent Form (ROI). The ROI shall include the following information:

- Permission to use or disclose PHI for purposes beyond treatment, payment, or health care operations.
- A description of the PHI to be disclosed.
- The purpose for the disclosure.
- The intended recipient(s).
- The participant's right to withdraw consent of release at any time.
- The date the authorization expires, not to exceed one year from the date of participant signature.
- Participant or legal representative signature and date. A relative or other representative may only sign the release when the participant is determined legally incompetent or is physically unable. The case record must clearly document why participants cannot sign the ROI themselves.
- The signature and date of SC completing the form.

7.6 CASE RECORD REQUIREMENTS

Waiver agencies and their service providers maintain participant records, including assessments, plans of service, service or contact logs, reassessment, and quality assurance records for a period of not less than ten years to support an audit trail. This includes maintenance of a Health Information System (HIS) that will collect, analyze, integrate, and report data as required within the MI Choice Contract and all attachments. The case record may exist in an electronic format. MDHHS does not require waiver

Medicaid Provider Manual

agencies that maintain case information in electronic format to maintain hard copy case records. However, the waiver agency must make electronic case records available to MDHHS or other reviewers when conducting audits and other authorized reviews.

7.6.A. CASE RECORDS

Each enrolled MI Choice participant has an individual case record. All forms required in the case record must be properly completed according to policy or form instructions. The case record shall include, but is not limited to, the following required information:

- NF LOC determination results
- Assessments and reassessments
- Freedom of choice form, participant consent to enroll
- Participant consents to release confidential information
- Plans of service and service plans
- Work orders and instructions to providers
- Progress notes, contact logs or other notes that serve as a log-in documenting pertinent contacts with participants, providers and others involved with furnishing services and supports to the participant
- Any correspondence pertaining to the services and supports provided to a participant
- Transfer and closure documentation

Additional requirements for case records include:

- Waiver agencies maintain MI Choice case records in a manner that conforms to good professional practice, permits effective professional review and audit, and facilitates an adequate system for follow up.
- Writers enter hard copy case record information in ink.
- Electronic Health Records (EHR) or Health Information Systems (HIS) (such as MICIS, COMPASS, or other systems for collecting case record documentation electronically) must have a method to lock records upon submission of data into the EHR that conforms to industry standards. The system must track all changes made to all information entered into the system including the date, time, and user making the change.
- Waiver agency staff either signs or initials each entry in the case record. When using initials, the waiver agency maintains a signature log sheet with employees' names and initials. EHR shall record the user information for data entered in the case record.
- Writers make corrections to case record entries by drawing a line through the incorrect information and entering corrected information above, below or adjacent to the previous entry. Whether written or electronic, under no circumstances shall information included in the case record be permanently erased. Electronic records shall include a method to correct information without erasing that information, such as using a strikethrough font. Additionally, electronic records shall include a backup system to retrieve any lost data due to system errors.

Medicaid Provider Manual

- Writers identify late entries. MDHHS allows waiver agencies to make late entries in the case record as long as the writer notes that they made the entry sometime after the contact occurred. Writers may not enter previously omitted information as a late entry more than seven (7) days after the contact occurred (see how to amend a record below).
- Writers may amend the record at any time by identifying an entry as a record amendment and describing previously omitted information. This type of entry should describe why the entry is being made (i.e., after peer or supervisory review) and who is making the amendment.
- Writers may add entries to the record to correct earlier entries of electronic records that contained erroneous or inaccurate information.
- Only the person that entered the original data into the EHR may edit that data. If this is not possible, other users may include a corrective note in the EHR that explains the error in the original data but may not change the original data.
- The system must date and time stamp all EHR entries and include the username under which the entry was made. The agency must keep a list of all usernames and the identification of the individual associated with that username.
- Waiver agencies maintain a copy of participant enrollment files to support capitated payments made through CHAMPS.
- Waiver agencies maintain a record of payments made to providers.
- Waiver agencies monitor contractors and subcontractor activity and maintain records and reports of the reviews and findings.
- Waiver agencies maintain necessary records that disclose fully the extent of service provided to each participant for a period of ten (10) years for the purpose of subsequent audit.

Medicaid Provider Manual

SECTION 8 – FINANCING AND REIMBURSEMENT

Annual funding levels for MI Choice are subject to appropriation allocations made by the Michigan Legislature. MDHHS contracts annually with waiver agencies to operate the MI Choice program, and all waiver agency budget and reimbursement requirements and considerations must be defined in the contract, as amended. Any additional consideration or compensation to the waiver agency must also be included in the annual contract, as amended. Waiver agencies are paid through capitation payments and are required to submit all encounter data to MDHHS as outlined in the Encounter Data Reporting subsection of this chapter. Encounter data is processed through CHAMPS. Waiver agencies are required to submit all financial reports as detailed in the annual contract. Each agency is subject to review or audit by MDHHS, the State of Michigan, or their designee.

Medicaid is established as the payer of last resort. Waiver agencies must pursue and secure all third party liability (TPL) sources possible. Agencies must make every effort to enroll and utilize dually certified (Medicare and Medicaid) providers. Agencies cannot use waiver funds for services that are covered through another payment source.

8.1 STATE REIMBURSEMENT TO WAIVER AGENCIES

The State reimburses waiver agencies based on the rates and conditions stated in the contract. MDHHS establishes, and CMS approves, capitation rates for MI Choice participants. The capitation payment is comprehensive and covers both administrative and service costs associated with each person enrolled in MI Choice.

Capitation payments will be processed through files generated in CHAMPS on a monthly basis. This file contains an electronic listing of individuals who are enrolled in the MI Choice program with each waiver agency. The Medicaid Management Information System (MMIS) then performs quality checks, including:

- Verification of current Medicaid eligibility;
- A valid LOCD indicating the participant meets nursing facility level of care; and
- The participant is not enrolled in any other long-term care program.

Payment to waiver agencies will occur through an electronic funds transfer on the fourth Wednesday of the month. This payment will be available to waiver agencies on the Thursday following the fourth Wednesday of the month.

Waiver agencies and providers accept Medicaid payment as payment in full for services rendered, unless the State makes an exception to this requirement. In addition, MDHHS requires waiver agencies to have policies and procedures to ensure that waiver agencies and their providers do not seek or accept additional or supplemental payment from participants and their allies or representatives for MI Choice services.

8.2 ENCOUNTER DATA REPORTING

Each waiver agency must submit all encounter data to MDHHS within 180 calendar days of the date that services were rendered. Waiver agencies must resolve issues related to encounters that are rejected by CHAMPS within 30 calendar days of notification by MDHHS or its designee. Agencies have 10 calendar days after the expiration of the 30-day resolution window to report on issues that cannot be resolved.

Medicaid Provider Manual

8.3 ADMINISTRATIVE EXPENSE AND OTHER FINANCIAL REPORTING

Each waiver agency must submit an Administrative Expense Report (AER) to MDHHS as specified in the Contract. The expenses reported must be actual expenses incurred by the waiver agency. Each AER shall cover one calendar month and is due within 30 calendar days after the conclusion of that month. Waiver agencies must submit additional financial reports and information as requested by MDHHS. MDHHS must communicate requirements for such additional information to the waiver agency in writing and allow sufficient time for a response.

8.4 FINANCIAL AUDIT REQUIREMENTS

MI Choice waiver agencies are contractually obligated to comply with, and ensure compliance by, its subcontractors with all requirements of the Single Audit Act and any amendments to this act. Waiver agencies must submit to MDHHS a Single Audit, Financial Statement Audit, or Audit Status Notification Letter. If submitting a Single Audit or Financial Statement Audit, waiver agencies must also submit a Corrective Action Plan for any audit findings that impact MDHHS-funded programs and a management letter (if issued) with a response.

Waiver agencies that expend \$750,000 or more in federal awards during the agency's fiscal year must submit to MDHHS a Single Audit that is consistent with the Single Audit Act Amendments of 1996 and Office of Management and Budget (OMB) Title 2 CFR Subpart F and include all components described in 2 CFR §200.512(c).

Waiver agencies exempt from the Single Audit requirements that receive \$750,000 or more in total funding from MDHHS in state and federal grant funding must submit to MDHHS a Financial Statement Audit prepared in accordance with Generally Accepted Auditing Standards (GAAS). Waiver agencies exempt from the Single Audit requirements that receive less than \$750,000 of total MDHHS grant funding must submit to MDHHS a Financial Statement Audit prepared in accordance with GAAS if the audit includes disclosures that negatively impact MDHHS-funded programs including, but not limited to, fraud, financial statement misstatements, and violations of contract and grant provisions.

Waiver agencies exempt from both the Single Audit and Financial Statement Audit requirements (sections a and b) must submit an Audit Status Notification Letter that certifies these exemptions. The template for the Audit Status Notification Letter and further instructions are available on the MDHHS website. (Refer to MI Choice Waiver Resources in the Directory Appendix for additional information.)

The required audit and any other required submissions (i.e., Corrective Action Plan and management letter with a response, or Audit Status Notification Letter) must be submitted within nine months following the end of the contractor's fiscal year to MDHHS.

Waiver agencies and each of their contractors are subject to the provisions of, and must comply with, the cost principles set forth in OMB Title 2 CFR Part 200 titled Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards Subparts A, B, and E.

Medicaid Provider Manual

SECTION 9 – PROVIDERS

Authorization for provision of waiver services is the responsibility of the waiver agencies. They determine the status of the qualifications and certifications (if applicable) for all direct service providers, negotiate and enter into contracts with the providers, and reimburse providers.

9.1 ENROLLMENT OF SERVICE PROVIDERS

Waiver agencies must use written contracts meeting the requirements of 42 CFR §434.6 to purchase services. Entities or individuals under subcontract with the waiver agencies must meet provider standards defined in this Chapter and the MI Choice Contract. Only providers meeting the requisite waiver requirements are permitted to participate in the waiver program.

To ensure network capacity, as well as choice of providers, each waiver agency must have a provider network with capacity to service at least 125% of their monthly slot utilization for each MI Choice service and at least two providers for each MI Choice service. When waiver agencies cannot ensure this choice within 30 miles or 30 minutes travel time for each participant, they may request a rural area exception from MDHHS.

9.2 FAMILY MEMBERS AS SERVICE PROVIDERS

Waiver agencies may pay relatives of MI Choice participants to furnish services. This authorization excludes legally responsible individuals and legal guardians. The MI Choice participant must specify their preference for a relative to render services. The relative must meet the same provider standards as established for non-related caregivers. All waiver services furnished shall be included in the person-centered service plan and authorized by the supports coordinator. The supports coordinator must periodically evaluate the effectiveness of the relative in rendering the needed service. If the supports coordinator finds that the relative fails to meet established goals and outcomes or fails to render services as specified in the person-centered service plan, the supports coordinator must rescind the authorization of that relative to provide waiver services to the participant. When the supports coordinator finds the relative has failed to render services, payments must not be authorized.

9.3 REIMBURSEMENT RATES FOR PROVIDERS

Each waiver agency is responsible for sub-contracting with provider entities and for ensuring access to services. The process of rate determination for providers resides in the contract negotiation between the waiver agency and the provider. MDHHS does not play a role in this process.

Rates paid for services provided through the waiver must be adequate to ensure access to services needed by participants.

9.4 CRIMINAL HISTORY REVIEWS

Each waiver agency and direct provider of home-based services must conduct a criminal history review through the Michigan State Police for each paid staff or volunteer who will be entering a participant's residence. The waiver agency and direct provider shall have completed reference and criminal history checks before authorizing an employee or volunteer to furnish services in a participant's residence. The scope of the investigation is statewide.

Medicaid Provider Manual

Both waiver agencies and MDHHS conduct administrative monitoring reviews of providers annually to verify that mandatory criminal history checks have been conducted in compliance with operating standards. Waiver agencies must comply with additional criminal history reviews mandated by the State for home and community-based services providers.

Waiver agencies must also check the MDHHS Sanctioned Providers List and must not contract with any providers on this list for the duration of the sanction period until approved by MDHHS to resume providing services. The MDHHS Sanctioned Provider List is located on the MDHHS website. (Refer to the Directory Appendix for website information.)

9.5 USE OF RESTRAINTS, SECLUSION OR RESTRICTIVE INTERVENTIONS

Providers are prohibited from using seclusion or restrictive interventions in addition to using restraints. Qualified reviewers conduct Clinical Quality Assurance Reviews and home visits which include a discovery process to examine the use of restraints, seclusion or restrictive interventions by family or caregivers. Supports coordinators have the primary responsibility for identifying and addressing the use of restraints, seclusion or restrictive interventions.

An exception to restraints or restrictive intervention is bed rails or bed canes. If bed rails or bed canes are used, this must be based upon assessed need for the participant and documented in the person-centered service plan. If the participant resides in a provider-controlled setting, there must be an order from a licensed medical professional, and this must be kept on file in the participant's case record at the waiver agency. As per requirements in federal law and the Home and Community-Based Services Chapter in this Manual, the use of bed rails or bed canes must be reviewed on an annual basis to ensure they are still required. If no longer required, the bed rail or bed cane must be removed.

9.6 CONTRIBUTIONS

Neither the waiver agency nor any service provider under contract with the waiver agency may require monetary donations from participants of the MI Choice waiver program as a condition of participation in the MI Choice waiver.

The waiver agency and each direct service provider must accept MI Choice payments for services as payment in full for such services. Consistent with the Code of Federal Regulations, Chapter 42, Section 438.60 (42 CFR §438.60), service providers must not seek nor receive payment other than payment from the waiver agency for services covered under the Contract between MDHHS and the waiver agency, except when these payments are specifically required to be made by the State in Title XIX of the Social Security Act, in 42 CFR chapter IV, or when MDHHS makes direct payments to service providers for graduate medical education costs approved under the State Plan.

No paid or volunteer staff person of a direct service provider may solicit contributions from program participants, offer for sale any type of merchandise or service, or seek to encourage the acceptance of any particular belief or philosophy by any program participant.

9.7 CONFIDENTIALITY

Each waiver agency and direct service provider must have procedures to protect the confidentiality of information about participants or persons seeking services collected in the conduct of its responsibilities. The procedures must ensure that no information about a participant or person seeking services, or

Medicaid Provider Manual

obtained from a participant or person seeking services by a service provider, is disclosed in a form that identifies the person without the informed consent of that person or of their legal representative. However, disclosure may be allowed by court order, or for program monitoring by authorized federal, state, or local agencies (which are also bound to protect the confidentiality of the client information), so long as access is in conformity with the Privacy Act of 1974 and the Health Insurance Portability and Accountability Act of 1996. Waiver agencies and direct service providers must maintain all client information in controlled access files. This requirement applies to all protected information whether written, electronic, or oral.

9.8 COMPLIANCE WITH HOME AND COMMUNITY BASED SERVICES SETTINGS REQUIREMENTS

Each waiver agency and direct service provider must comply with the Federal Home and Community Based Services Settings Requirements as specified in 42 CFR §441.301(c)(4) as well as in the Home and Community-Based Services Chapter of this Manual. Direct service providers with subcontracts secured prior to March 17, 2019 must be fully compliant with this regulation by March 17, 2019, unless they are included in the heightened scrutiny process. All direct service providers added to the waiver agency's provider network after March 17, 2019 must be compliant with this ruling before the direct service provider may furnish services to a waiver participant.

MDHHS will use the following process to ensure compliance to this requirement:

- Each waiver agency will assess all applicable providers annually using a MDHHS-approved survey. In some situations described below within this section, the results of the surveys will be submitted electronically to MDHHS for a determination of compliance to the requirements.
- MDHHS will notify both the provider and the MI Choice waiver agency regarding the provider's compliance based upon the completed survey tool that was submitted to MDHHS.
- For providers who are non-compliant, the provider will have one to two weeks to correct all issues that cause the non-compliance.
- Once the issues are corrected, the provider will notify the waiver agency and schedule another on-site survey.
- The waiver agency will have one to two weeks to complete another on-site survey and submit the survey to MDHHS for review within 10 days of the visit.
- If a provider does not contact the waiver agency within one to two weeks, the waiver agency will contact the provider to determine progress on the corrective action and schedule another on-site visit accordingly.
- If the provider has not satisfactorily resolved the compliance issues, the waiver agency will suspend the provider from receiving new MI Choice participants until such time as the provider comes into compliance.
- Some providers may require Heightened Scrutiny to determine compliance. These providers will follow the Heightened Scrutiny Process defined by MDHHS to ensure compliance and to continue participation with the MI Choice program.
- Regardless of the original notification date, all providers in all MI Choice provider networks will be compliant with the ruling no later than March 17, 2019, or the date approved in the State Transition Plan, whichever is sooner.

Medicaid Provider Manual

- Waiver agencies must have completed person-centered transition plans with individuals served by non-compliant providers before March 17, 2019.
- By March 17, 2019, no MI Choice participants will be served by non-compliant providers, and all non-compliant providers will be removed from the MI Choice provider network.
- For MI Choice participants residing in a provider-owned and controlled setting, the waiver agency must keep a copy of the lease agreement and resident care agreement on file.

9.9 NOTIFYING PARTICIPANT OF RIGHTS

Each waiver agency or direct provider of home-based services must notify each participant, in writing, at the initiation of service of their right to comment about service provision or appeal the denial, reduction, suspension, or termination of services. Such notice must also advise the participant that they may file complaints of discrimination with the respective waiver agency, the Department of Health and Human Services Office of Civil Rights, or the Michigan Department of Civil Rights. The MI Choice Participant Handbook meets this requirement.

9.10 SELECTION OF A PROVIDER TO FURNISH SERVICES

The waiver agency works with participants to select service providers as needed on an individual basis according to the following criteria:

- Participant Preference: Participant has a provider preference.
- Cost: The cost of services is a factor in selecting a service provider.
- Accessibility: Practical considerations involved in selecting a provider include the provider's geographic area of service and ease of service delivery to the participant.
- Ability to provide quality service: The waiver agency considers the provider's past performance in furnishing quality services as authorized in the participant's PCSP. Quality includes performance, participant outcome, and accountability as monitored by the waiver agency.
- Comprehensive Care: The waiver agency makes a reasonable effort to minimize the number of different agencies involved in providing services to each participant to limit participant and family stress. The waiver agency considers the ability of the provider to furnish the different types of services needed by each participant when ordering services.

9.11 ADDITIONAL GENERAL REQUIREMENTS FOR PROVIDERS

- Waiver agencies have policies and procedures to identify and prevent problems with access to MI Choice services. Access issues include, but are not limited to, problems with provider availability and adherence to the participant approved PCSP.
- Waiver agencies and service providers enter into contractual agreements that include required assurances for nondiscrimination, minimum provider service standards, and contract requirements included in 42 CFR §434, 42 CFR §438, and the MDHHS Medical Services Administration (MSA) provider enrollment agreement.
- The waiver agency maintains written minimum service standards for MI Choice services that fulfill licensure and certification requirements mandated by CMS and that comply with the CMS-

Medicaid Provider Manual

approved MI Choice waiver application and the MDHHS Minimum Operating Standards for MI Choice Services.

- The waiver agency has written procedures to secure competitive, per unit rate agreements from qualified service providers.
- The provider enrollment process includes a description of the frequency and method of verifying and monitoring staff qualifications and how the waiver agency documents this verification. MDHHS defines a willing provider as a provider who agrees to accept Medicaid payment as payment in full for rendering a service, abides by all other Medicaid provider requirements, including executing provider agreements, and adheres to the required service standards.
- Waiver agencies must allow Medicaid beneficiaries to select from any qualified provider within the waiver agency's provider network.
- Waiver agencies must provide MI Choice services to any participant who needs the service. Waiver agencies may not limit the number of MI Choice participants who receive a service or deny a needed MI Choice service for any reason (e.g., lack of funds). Waiver agencies must make MI Choice services available on a comparable basis to all MI Choice participants based on need.
- The 21st Century Cures Act (the Cures Act), enacted by the U.S. Congress in December 2016, added Section 1903(l) to the Social Security Act to require all states to use electronic visit verification (EVV) for personal care services (PCS) and home health care services (HHCS) provided under a Medicaid State Plan of the Social Security Act or under a waiver of the State Plan. PCS provided through MI Choice must meet EVV requirements. Refer to the Electronic Visit Verification chapter of this Manual for more information.

Waiver agencies have policy and procedures for identifying, documenting, and addressing noncompliance by providers. This includes identification of the persons responsible for taking appropriate action with providers who continually demonstrate poor performance or who are not qualified to provide services.

9.12 HOME-BASED SERVICES PROVIDERS

MI Choice waiver home-based services include community living supports, respite services provided in the home, chore services, personal emergency response systems, private duty nursing/respiratory care, nursing services, counseling, home delivered meals, training services, and community health workers.

9.12.A. PARTICIPANT ASSESSMENTS

Direct providers of home-based services must avoid duplicating assessments of individual participants to the maximum extent possible. Home-based service providers must accept assessments conducted by waiver agencies and initiate home-based services without having to conduct a separate assessment unless there is a legitimate reason to conduct the separate assessment. Waiver agencies must make every attempt to supply direct providers of home-based services with enough information about each participant served by that organization to provide needed services properly.

9.12.B. SUPERVISION OF DIRECT-CARE WORKERS

Home-based service providers must always have a supervisor available to direct care workers while the worker is furnishing services to MI Choice participants. The provider

Medicaid Provider Manual

may offer supervisor availability by telephone. Home-based service providers must conduct in-home supervision of their staff at least twice each fiscal year. A qualified professional must conduct the supervisory visit.

9.12.C. PARTICIPANT RECORDS

Each direct provider of home-based services must maintain comprehensive and complete participant records that contain, at a minimum:

- Details of the request to provide services.
- A copy of the waiver agency's evaluation of the participant's need (this may be appropriate portions of the MI Choice assessment or reassessment).
- Service authorizations or work orders.
- Providers with multiple sources of funding must specifically identify waiver participants; records must contain a listing of all dates of service for each participant and the number of units provided during each visit.
- Notes in response to participant, family, and agency contacts (not required for home-delivered meal programs).
- A record of release of any personal information about the participant and a copy of a signed release of information form.

Direct providers of home-based services must keep all participant records (written, electronic, or other) confidential in controlled access files for a minimum of 10 years.

9.12.D. IN-SERVICE TRAINING

Staff of waiver agencies and direct providers of home-based services must receive in-service training at least twice each fiscal year. Waiver agencies and providers must design the training so that it increases staff knowledge and understanding of the program and its participants, and improves staff skills at tasks performed in the provision of services. Waiver agencies and direct providers of home-based services must maintain comprehensive records identifying dates of training and topics covered in an agency training log or in each employee's personnel file. The employer must develop an individualized in-service training plan for each employee when performance evaluations indicate a need.

9.12.E. ADDITIONAL CONDITIONS AND QUALIFICATIONS

Each waiver agency and direct provider of home-based services will assure MDHHS that employees or volunteers who enter and work within participant homes abide by the following additional conditions and qualifications:

- Service providers must have procedures in place for obtaining participant signatures on the time sheets (or similar document) of direct care workers to verify the direct service worker provided the work ordered by the waiver agency. Electronic Visit Verification (EVV) systems may take the place of this requirement as long as the verification is

Medicaid Provider Manual

available to the waiver agency. If providers are utilizing EVV systems, paper time sheets are not needed.

- Direct service workers are prohibited from smoking in participant's homes.
- Direct service workers must demonstrate the ability to communicate adequately and appropriately, both orally and in writing, with their employers and the MI Choice participants they serve. This includes the ability to follow product instructions properly in carrying out direct service responsibilities (i.e., read grocery lists, identify items on grocery lists, and safely use cleaning and cooking products).
- Direct service workers must not use their cell phones for personal use while in a participant's home. Exceptions may be made in cases of emergency. Direct service workers should engage with the participants while furnishing the services specified on the person-centered service plan.
- Direct service workers must not threaten or coerce participants in any way. Failure to meet this standard is grounds for immediate discharge.
- Waiver agencies will inform service contractors and direct service workers promptly of new service standards or any changes to current services standards.

9.13 INSURANCE COVERAGE

Each waiver agency and direct service provider must have sufficient insurance to indemnify loss of federal, state, and local resources due to casualty or fraud. Insurance coverage sufficient to reimburse MDHHS or the waiver agency for the fair market value of the asset at the time of loss must cover all buildings, equipment, supplies, and other property purchased in whole or in part with funds awarded by MDHHS. The following insurances are required for each waiver agency or direct service provider:

- Worker's compensation
- Unemployment
- Property and theft coverage
- Fidelity bonding (for persons handling cash)
- No-fault vehicle insurance (for agency-owned vehicles)
- General liability and hazard insurance (including facilities coverage)

MDHHS recommends the following insurances for additional agency protection:

- Insurance to protect the waiver agency or direct service provider from claims against waiver agency or direct service provider drivers and/or passengers
- Professional liability (both individual and corporate)
- Umbrella liability
- Errors and Omission Insurance for Board members and officers
- Special multi-peril
- Reinsurance/Stop-loss insurance

Medicaid Provider Manual

9.14 VOLUNTEERS

Each waiver agency or direct service provider utilizing volunteers must have a written procedure governing the recruiting, training, and supervising of volunteers. Volunteers must receive a written position description, orientation, training, and a yearly performance evaluation, if appropriate.

9.15 STAFFING

Each waiver agency or direct service provider must employ competent personnel who have the necessary skills to provide quality supports and services to participants at levels sufficient to provide services pursuant to the contractual agreement. Each waiver agency or direct service provider must demonstrate an organizational structure including established lines of authority. Each direct service provider must identify a contact person with whom the waiver agency can discuss work orders and service delivery schedules or problems.

9.16 STAFF IDENTIFICATION

Every waiver agency or direct service provider staff person, paid or volunteer, who enters a participant's home must display proper identification. Proper identification may consist of either an agency picture card or a Michigan driver's license and some other form of agency identification.

9.17 ORIENTATION AND TRAINING PARTICIPATION

New waiver agency or direct service provider staff must receive an orientation training that includes, at a minimum:

- Introduction to the MI Choice waiver;
- The waiver agency's grievance and appeal process;
- Maintenance of records and files (as appropriate);
- Emergency procedures;
- Assessment and observation skills; and
- Ethics, specifically:
 - Acceptable work ethics
 - Honoring the MI Choice participant's dignity
 - Respect of the MI Choice participant and their property
 - Prevention of theft of the MI Choice participant's belongings.

Employers must maintain records detailing dates of training and topics covered in employee personnel files.

Waiver agencies and/or direct service providers must ensure that each employee has the support and training needed to competently and confidently deliver services to participants prior to working with each participant. Waiver agency or direct service provider staff must participate in relevant in-service training as appropriate and feasible. Some MI Choice services have specific requirements for in-service training. When applicable, the service standard stipulates the required in-service training topics.

Medicaid Provider Manual

9.18 RECORD RETENTION

Each waiver agency and direct service provider must keep all records related to or generated from the provision of services to waiver participants for not less than 10 years.

9.19 WAIVER AGENT BILLING AND PAYMENTS

9.19.A. BILLING PROCEDURES

- Providers of MI Choice services submit bills to the waiver agency detailing the date of service, the type of service, the unit cost, and the total number of units provided for each MI Choice participant served.
- Waiver agencies specify in provider contracts the acceptable amount of time from date of service that providers may send bills to the waiver agency in order to receive payment for services rendered.
- Waiver agencies match and verify provider bills against the participant's approved PCSP using MICIS, COMPASS, or a compatible data system.
- Waiver agencies have written procedures regarding the billing process.

9.19.B. PROVIDER PAYMENTS

- Waiver agencies process payment for all verified bills submitted by providers.
- Waiver agencies make payments only for services authorized within the PCSP and delivered to the participant.
- Waiver agencies submit MI Choice encounter data to CHAMPS electronically. Encounter data for MI Choice services meets CHAMPS requirements (including CHAMPS edits) for processing.
- The CHAMPS system records encounter data detail.
- Waiver agencies use MICIS, COMPASS, or compatible software to maintain an audit trail for funds expended.
- MICIS, COMPASS, or compatible software produces claims detailing provider and participant identification, date of service, specific procedure, and payment data.
- Waiver agencies have written procedures ensuring full payment to providers who furnish MI Choice services according to the authorized PCSP.

9.20 COMPLIANCE WITH RULES AND LAWS

9.20.A. CIVIL RIGHTS COMPLIANCE

Each waiver agency or direct service provider must not discriminate against any employee or applicant for employment, or against any MI Choice applicant or participant, pursuant to the Federal Civil Rights Act of 1964, the Elliot-Larsen Civil Rights Act (P.A. 453 of 1976), and Section 504 of the Federal Rehabilitation Act of 1973. Each waiver agency or direct service provider must complete an appropriate Federal Department of Health and Human Services form assuring compliance with the Civil Rights Act of 1964.

Medicaid Provider Manual

Each waiver agency or direct service provider must clearly post signs at agency offices and public locations where services are provided in English, and other languages as appropriate, indicating non-discrimination in hiring, employment practices, and provision of services.

9.20.B. NONDISCRIMINATION (SECTION 1557: PATIENT PROTECTION AND AFFORDABLE CARE ACT)

Section 1557 of the Patient Protection and Affordable Care Act (ACA) applies to the MI Choice program and provides that, except as provided in Title I of the ACA, an individual shall not, on the grounds prohibited under Title VI of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, the Age Discrimination Act of 1975, or Section 504 of the Federal Rehabilitation Act of 1973, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any health program or activity, any part of which is receiving Federal financial assistance, including credits, subsidies, or contracts of insurance, or under any program or activity that is administered by an Executive Agency or any entity established under Title I of the ACA. This part applies to health programs or activities administered by recipients of Federal financial assistance from the Department, Title I entities that administer health programs or activities, and Department-administered health programs or activities.

9.20.C. EQUAL EMPLOYMENT

Each waiver agency and direct service provider must comply with equal employment opportunity principles in keeping with Executive Order 1979-4 and Civil Rights Compliance in state and federal contracts.

9.20.D. DRUG FREE WORKPLACE

MDHHS prohibits the unlawful manufacture, distribution, dispensing, possession, or use of controlled substances in all waiver agency and direct service provider workplaces. Each waiver agency and direct service provider must operate in compliance with the Drug-Free Workplace Act of 1988.

9.20.E. AMERICANS WITH DISABILITIES ACT

Each program must operate in compliance with the Americans with Disabilities Act (PL 101-336).

9.20.F. STANDARD PRECAUTIONS

Each waiver agency and direct service provider must evaluate the occupational exposure of employees to blood or other potentially infectious materials that may result from the employee's performance of duties. Each waiver agency and direct service provider must establish appropriate standard precautions based upon the potential exposure to blood or infectious materials. Each waiver agency and direct service provider with employees who may experience occupational exposure must also develop an exposure control plan that complies with the Federal regulations implementing the Occupational Safety and Health Act.

Medicaid Provider Manual

9.21 PROVIDER MONITORING REQUIREMENTS FOR WAIVER AGENCIES

9.21.A. ON-SITE PROVIDER REVIEWS

Waiver agency staff conducts annual on-site monitoring reviews for a minimum of 20% of enrolled providers of recurrent services. This includes adult day health, chore, community living supports, counseling, fiscal intermediary, home delivered meals, transportation, nursing facility transition, nursing services, personal emergency response systems, private duty nursing, in-home and out-of-home respite, supports coordination when not using agency employees, and training. This monitoring plan is to ensure:

Provider compliance to minimum service standards and conditions of participation. This includes compliance to the CMS regulations regarding home and community-based services settings as defined in 42 CFR §441.301(c)(4) and the Home and Community-Based Services Chapter of this Manual.

- Delivery of services according to the authorized MI Choice participant PCSP.
- Provider maintenance of adequate staff recruitment, training plans and staff supervision.
- Provider maintenance of participant case record documentation to support provider claims.

Waiver agency staff evaluates providers of non-recurrent services (durable medical equipment, medical supplies, goods and services, and home modifications) based on frequency and volume of usage at least once every two years to ensure:

- Provider compliance to minimum service standards and conditions of participation
- Delivery of services according to the authorized MI Choice participant PCSP
- Provider maintenance of participant case record documentation to support provider claims

9.21.B. METHODOLOGY

The waiver agency assigns one or two staff with primary responsibility for conducting provider reviews using the standardized monitoring tool developed for this purpose (refer to the Directory Appendix). The waiver agency notifies providers in writing at least two weeks in advance of the date scheduled for the review. The waiver agency selects a sample of 10 participant case records or 20% of the provider case records (whichever is greater) to evaluate. The waiver agency staff reviews three months of provider billings to payments for each case record. The waiver agency may choose to monitor more providers as necessary to ensure the quality of services delivered to MI Choice participants. Additionally, not included in the sample indicated above, the waiver agency must perform monitoring of 100% of provider-owned/controlled settings and must utilize the Residential and Non-residential surveys provided by MDHHS.

Provider records to review include participant case record documentation, service claims, and reimbursements. The waiver agency compares payment records to MI Choice person-centered service plan authorizations and MI Choice case record documentation.

Medicaid Provider Manual

Waiver agency reviewers evaluate provider records for date of service, time of service delivery, staff providing the service, supervision of staff providing the service, and any discrepancies noted during the review.

The waiver agency reviewers provide written findings of the review and corrective action requirements (as necessary) to the provider within 30 days following completion of the initial review. The waiver agency sends all provider monitoring reports to MDHHS within 30 days of completion of the monitoring process. The written review includes citations of both positive findings and areas needing corrective action.

When results of the initial case record/bill review indicate any irregularities, the reviewer and waiver agency financial staff conducts further review of provider case records covering a specified time. Waiver agency staff may opt to conduct a complete audit of all case records. Following a second review, a written report of the findings is prepared with appropriate corrective actions and sent to the provider and MDHHS within 30 business days following completion of the review. Waiver agency staff schedules a follow-up review within a three to six month timeframe for providers deficient in any part of the review to ensure that the provider initiates and implements corrective action.

Service issues/activities identified for corrective action require the waiver agency to:

- Clearly identify formal findings, state compliance issues, and provide recommendations for corrective action.
- Establish due dates when the provider is scheduled to be in full compliance with the standards and conditions for continued participation.
- Monitor the provider's performance in completing the necessary corrective action.
- Suspend new referrals to the provider agency or transfer participants to another provider when findings warrant immediate action to protect the participant's health or welfare.
- Adjust provider billings on the agency's information system using individual adjustments to date of service or gross adjustment. Deduct overpayments made to a provider from the next warrant issued the provider from the waiver agency. Adjust encounter data submitted to CHAMPS to accurately reflect adjustments made to provider billing.
- Suspend or terminate the providers who demonstrate a failure to correct deficiencies following a second review. The waiver agency can reinstate providers after verifying the provider corrected deficiencies and/or changed procedural practices as required.

Additionally, not included in the sample indicated above, the waiver agency must perform monitoring of 100% of provider-owned/controlled settings and must utilize the Residential and Non-Residential surveys provided by MDHHS. If the setting remains compliant, the waiver agency only needs to maintain the surveys in a file at the waiver agency. The waiver agency must send to MDHHS the completed home and community-based settings survey in the following circumstances:

- The setting is a new setting and has not had a previous survey completed and reviewed by MDHHS and deemed compliant.
- There has been a change in ownership for the setting.

Medicaid Provider Manual

- There have been major changes in how the setting operates their business.

The waiver agency notifies MDHHS immediately of any provider-owned setting that is no longer compliant with the home and community-based services settings regulations as assessed using the Residential Survey for MI Choice Waiver or the Non-Residential Survey for MI Choice Waiver as appropriate. Provider-owned settings include licensed and non-licensed assisted living, AFCs or Homes for the Aged, and adult day health providers. The notification will include the corrective action plan and timeline for implementing the corrective action plan. The waiver agency will be responsible for ensuring the corrective actions have been implemented in a subsequent in-person visit to the setting. The waiver agency will forward the results of the subsequent in-person visit to MDHHS within one to two weeks of completing the visit. The waiver agency will immediately notify MDHHS if the subsequent visit indicates the provider continues to be non-compliant with the ruling and will require MI Choice participants to transition from the setting.

9.21.C. IN-HOME PARTICIPANT VISITS

To gauge the effectiveness of service delivery accurately, it is necessary to obtain comments regarding service provision from the perspective of the participant and caregiver. From the sample of participant case records reviewed, the waiver agency reviewer selects a minimum of two waiver participants with which they shall conduct home visits. These visits determine participant satisfaction with supports coordination activities and services and verify that providers deliver services as planned.

The in-home visit may correspond to a time when the provider is working in the participant's home. The scheduling of a participant home visit in tandem with the actual service provision allows the waiver agency reviewer to observe the provider at work and the interaction between the worker and the participant. The reviewer interviews the provider to determine their understanding of the tasks they should perform as specified in the PCSP and MI Choice work order. The reviewer also verifies with the participant and caregiver that the provider is delivering services as planned.

The waiver agency reviewer ensures the participant's supports coordinator is aware of pertinent information such as concerns regarding service delivery that the reviewer gathers during the home visit interviews. Supports coordinators follow-up with participant concerns identified during the home visits.

For participants who reside in provider-owned settings (assisted living, AFC, HFA, etc.), waiver agencies complete the additional questions at the end of the participant survey. Any "No" answers provided by the participant (or their authorized representative) require follow-up with the provider to ensure continued compliance to the home and community based services setting requirements.

9.21.D. COORDINATION WITH SUPPORTS COORDINATORS

Before or immediately after conducting the on-site provider review, the waiver agency reviewer meets with supports coordinators to discuss utilization of the provider and any problems encountered in using the provider. Additionally, the waiver agency reviews

Medicaid Provider Manual

MI Choice participant case records and other documentation to evaluate the interaction with the provider and determine the frequency of "missed" visits or "no shows" by the provider as related to the plan of service and the MI Choice work order. The review of MI Choice case records assists the waiver agency reviewer to measure provider adherence to the authorized PCSP.

9.21.E. COORDINATION WITH OTHER WAIVER AGENCIES

To the extent feasible and possible, waiver agencies should coordinate monitoring visits to providers that contract with more than one waiver agency. MDHHS encourages waiver agencies to combine efforts to monitor providers under contract with more than one waiver agency. Any time a waiver agency finds rationale to terminate a provider from the provider network, the waiver agency must notify other waiver agencies of the findings and the reason for terminating the contract. This is to mitigate potential harm to other MI Choice participants. Waiver agencies must also notify MDHHS of any contract terminations and the reasons for doing so.

9.21.F. MONITORING SCHEDULE

The waiver agency develops a yearly schedule of provider monitoring reviews to conduct monthly throughout the fiscal year, October 1 to September 30. The schedule is submitted to MDHHS by December 1 each year.

9.22 PROVIDER ENROLLMENT IN CHAMPS

Waiver agencies and providers must be compliant with all provider enrollment background and screening requirements as required by the MI Choice program. Any individual or entity that provides applicable MI Choice services and are included in a waiver agency's provider network are required to be screened and enrolled in the Michigan Medicaid Program. Individuals and entities are considered to be included in the provider network when they have a contract with a waiver agency to furnish any of the applicable services, or when they have a contract with a beneficiary enrolled in the MI Choice program to furnish services through a self-determination arrangement.

9.23 PROVIDER CASE RECORDS

Waiver agencies assure that agreements with direct service providers contain the following minimum record keeping requirements. The participant case record includes:

- Service work orders or authorizations.
- Assessment, parts or the entire assessment provided by the waiver agency.
- Types of services provided to each participant, i.e., a description of tasks completed by date of service, worker notes describing the tasks completed for each shift, and in-home service logs. Worker time sheets without tasks performed do not meet these criteria.
- Ranges of time that each service is provided (i.e., 10:00 a.m. – 12:00 p.m.); times are subject to change according to participant preferences and waiver agency authorization.
- Date of service delivery.
- Progress notes and supervisory notes.

Medicaid Provider Manual

- Identification of the worker providing each service and that worker's signature.

Additionally, providers are required to maintain the following:

- A worker service record (in-home log) is a daily account of services furnished. The worker providing the service documents tasks accomplished each day. This log may be electronic as long as one is able to indicate all of the tasks performed during a shift. (Telephonic systems that record this information are considered electronic.)
- Service workers maintain a record of services furnished by date of service, description of service provided on each date, and time of service provision each day.
- Service provider agencies may not use worker time sheets as worker service records. Worker time sheets that do not include the tasks performed do not meet the requirement of worker service documentation.
- Absence of a worker service record at a review for any date of service for which the provider makes a claim is equivalent to having no record that the service was rendered and could be subject to Medicaid recovery.
- Service workers must sign each service entry. Electronic systems must include a method to identify the worker providing the information and rendering the service.
- Counseling Records: Providers furnishing MI Choice counseling services maintain ongoing case records for each participant, recording assessed needs, treatment plan, and progress achieved at each counseling session.

Medicaid Provider Manual

SECTION 10 – PROGRAM QUALITY

The process of ensuring the highest quality program involves a continuous cycle of discovery, intervention, and evaluation. MDHHS is resolute about ensuring and improving the quality of services and protections it provides. To ensure that level of service, MDHHS operates a comprehensive quality management system that incorporates reviews of the administrative operations of the waiver agencies, clinical reviews of participant records, home reviews with participants, participant satisfaction surveys, continuous quality management and planning, and timely and effective responses to critical incidents.

Through the course of doing business, MDHHS may identify potential areas of concern with administration of the MI Choice program as specified in the contract between MDHHS and the waiver agency. This includes but is not limited to Clinical and Administrative Quality Assurance Reviews, receipt of complaints from participants or other stakeholders and review of State Fair Hearing Decisions and Orders. MDHHS will investigate all issues to determine their scope. When the scope of an issue is widespread (meaning not isolated to a single participant, supports coordinator, or scenario) or has the potential to impinge upon the rights of participants or applicants, MDHHS will initiate a formal corrective action process. This process begins with identifying the scope of the issue identified and discussing the issue in person with the waiver agency. MDHHS or its designee may require corrective action from the waiver agency. Failure to implement a corrective action plan that addresses the issue identified may lead to implementation of sanctions as identified in the contract between MDHHS and the waiver agencies.

10.1 ADMINISTRATIVE QUALITY ASSURANCE REVIEWS

MDHHS conducts periodic on-site Administrative Quality Assurance Reviews (AQAR) of each waiver agency, ensuring MDHHS reviews each waiver agency at least once every two to three years. MDHHS seeks evidence of compliance to the AQAR standards during the on-site review through examination of waiver agency policies and procedures, provider contracts, financial systems, encounter accuracy, and quality management plans.

Each waiver agency shall adhere to the MDHHS MI Choice Waiver Program Provider Monitoring Plan (known as the Monitoring Plan). The document defines the procedures and standards used by the waiver agency in reviewing providers included in the waiver agency's provider network. It includes the required protocols used to identify provider deficiencies and identifies timelines for remediation. MDHHS will review each waiver agency's process in detail during the AQAR.

MDHHS notifies each waiver agency in writing of deficiencies requiring corrective action and provides a date for the waiver agency to provide a corrective action plan to MDHHS. In the event of a continued deficiency, MDHHS has the authority to take action toward the waiver agency, including the imposition of sanctions as defined in the MI Choice Contract. MDHHS has the option to suspend or terminate the Contract of any waiver agency that fails to correct stated deficiencies identified on a second review.

10.2 QUALITY MANAGEMENT PLANS

Each waiver agency must have a written quality management plan that meets requirements specified in the MDHHS Quality Management Plan. The Quality Management Plan addresses quality assurance and improvement using measurable goals and quality performance indicators.

Medicaid Provider Manual

MDHHS reviews quality management plans annually. Waiver agencies are required to submit an annual report to MDHHS highlighting their quality management plan activities and improvements. (Refer to MI Choice Waiver Resources in the Directory Appendix for additional information.)

Waiver agencies have a written local quality management plan for its SC operations that includes supervisory oversight procedures, clinical review of SC functions, methods used to identify programmatic deficiencies, and methods used to provide feedback to effect improvements. These plans must also include CMS and MDHHS requirements as specified in 42 CFR §438.608 and Attachment C of the MI Choice Contract. MDHHS annually reviews the internal SC quality management plan, Quality Management Plan (QMP) outcomes, and accomplishments as cited in annual reports.

10.3 CLINICAL QUALITY ASSURANCE REVIEWS

MDHHS contracts with an External Quality Assurance Review agency to conduct an annual Clinical Quality Assurance Review (CQAR) of each waiver agency. The review is to determine whether the authorized services in the person-centered service plan are sufficient to protect the health and welfare of the participant and to determine whether the waiver agency is abiding by the laws, rules, and regulations that govern the MI Choice program. The primary means of gathering information for the CQAR include reviewing case records and interviewing waiver agencies and participants.

Randomly selected records are reviewed. Samples are derived using federally-approved sampling techniques with a minimum of 10 records reviewed at each agency. In addition, a minimum of five home visits are conducted to verify information in the records. The review is conducted by a team of trained and qualified reviewers.

10.4 CRITICAL INCIDENT RESPONSE AND REPORTING

MI Choice is required to track and to report certain events that might indicate exceptional risk to the participant. Not only are these requirements defined in regulation, but also in law. A "critical incident" is any actual, alleged, or suspected event or situation that occurs as a result of abuse, neglect, exploitation, or any event that creates a significant or potential risk of substantial or serious harm to the physical or mental health, safety or well-being of a waiver participant.

10.4.A. TYPES OF CRITICAL INCIDENTS AND SERIOUS EVENTS

The following are specific critical incidents or serious events that must be reported to MDHHS:

- Exploitation
- Illegal activity in the home with potential to cause a serious or major negative event
- Neglect
- Physical abuse
- Provider no-shows, particularly when the participant is bed-bound all day or there is a critical need for the service to be provided as indicated by a 1A, 1B, or 1C service need level and no successful backup plan
- Sexual abuse

Medicaid Provider Manual

- Theft – of anything
- Verbal abuse
- Worker consuming drugs/alcohol on the job
- Suspicious or unexplained death that the waiver agency, or other entity, reports to law enforcement and that is related to providing services, supports, or care
- Medication errors resulting in emergency medical treatment or hospitalization
- Injuries requiring medical treatment
- Restraints, seclusion or restrictive interventions
- Hospitalization or emergency department visits within 30 days of previous hospitalization due to neglect or abuse
- Other – other event that creates a significant or potential risk of substantial or serious harm to the physical or mental health, safety or well-being of a waiver participant not already listed (fire, drive by shooting, car accident, etc.).

10.4.B. CRITICAL INCIDENT RESPONSE

MI Choice waiver agencies have the initial responsibility for identifying, investigating, evaluating and responding to critical incidents that occur with participants as listed above. All suspected incidents of abuse, neglect and exploitation require reporting to MDHHS Adult Protective Services (MDHHS-APS) for investigation and follow-up. Agencies shall begin investigating and evaluating critical incidents within two business days of the date that it was noted that an incident occurred. Unexplained death that is also reported to law enforcement agencies must be reported to MDHHS within two business days.

Each waiver agency is required to maintain written policy and procedures defining appropriate action to take upon suspicion or determination of abuse, neglect or exploitation. The policies and procedures must include procedures for follow-up activities with MDHHS-APS to determine the result of the reported incident and the steps to be taken if the results are unsatisfactory. All reports to MDHHS-APS must be maintained in the participant's case record.

10.4.C. CRITICAL INCIDENT REPORTING

Waiver agencies are responsible for tracking and responding to individual critical incidents using the Critical Incident Reporting web-based system. The online system allows MDHHS to review the reports in real time and ask questions or address concerns with the waiver agencies. MDHHS must receive notification from waiver agencies of suspicious deaths within two business days. Waiver agencies submit critical incident reports to the MDHHS, MSA, Home and Community Based Services Section as they occur using the Critical Incident Management System.

Waiver agencies must require contracted providers to report unexpected deaths to the waiver agency within two business days of the unexpected death. For all other Critical Incidents, contracted providers must report to the waiver agency within 30 calendar days

Medicaid Provider Manual

of the Critical Incident. Once the waiver agency is notified of the Critical Incident, MDHHS requires waiver agencies to enter, report, and provide updates to critical incidents within two business days of the waiver agency becoming aware of the incident.

Once the waiver agency is notified of the Critical Incident, MDHHS requires waiver agencies to enter, report, and provide updates to critical incidents within two business days of the waiver agency becoming aware of the incident.

Waiver agencies report to MDHHS all critical incidents including:

- A description of each incident;
- Investigations and strategies implemented to reduce, ameliorate, and prevent future incidents from occurring; and
- Follow-up activities conducted through the resolution of each incident. Critical Incidents should be resolved within two months unless there are extenuating circumstances, or an investigation is ongoing. If the Critical Incident is not resolved within two months, the notes should be updated frequently until the Critical Incident is resolved.

Medicaid Provider Manual

SECTION 11 – GRIEVANCES AND APPEALS

Waiver agencies have written appeal processes consistent with MDHHS policy and 42 CFR §438. The participant has the right to request an appeal for any action, failure to act, or undue delay by the waiver agency. The participant initiates an appeal with the MDHHS Field Office when the participant disagrees with a financial eligibility determination. The participant initiates an appeal with the waiver agency when the participant disagrees with any other decision or action made by the program other than LOCD. The participant initiates an appeal with MDHHS Michigan Office of Administrative Hearings and Rules (MOAHR) when the participant disagrees with an action made related to the LOCD. Waiver agency staff may assist participants with filing the appropriate appeal documents.

MDHHS has established participant and provider appeal processes that are applicable to MI Choice. The participant appeals process conforms to the Medicaid fair hearing requirements found in federal law.

All Medicaid applicants and recipients have the right to a fair hearing. Waiver agencies, as a Medicaid managed care provider, have certain responsibilities related to the rights of persons applying for or receiving MI Choice services. This includes providing the applicant or participant with appropriate notice of their right to request an appeal when the waiver agency takes an adverse action against them, or a grievance when they are dissatisfied with the quality of services received. For applicants and participants of MI Choice, an adverse action occurs when, but is not limited to, situations where the waiver agency does any of the following:

- Suspends or terminates participation in MI Choice;
- Denies an applicant's request for participation in MI Choice;
- Reduces, suspends, terminates, or adjusts MI Choice services currently in place;
- Denies an applicant's or participant's request for MI Choice services that are not currently provided; or
- Denies a participant's request for additional amounts of currently provided services.

Attachment C of the MI Choice Contract specifies requirements for the waiver agency's Grievance and Appeal system, including time frames for making decisions and the individual's right to a Medicaid Fair Hearing after exhausting the waiver agency's process.

11.1 PARTICIPANT GRIEVANCES

Waiver agencies must establish their own internal grievance process. Participants may file a grievance orally or in writing when they are dissatisfied with the quality of services received. A grievance may be submitted to the waiver agency at any time. Waiver agencies must address grievances according to the time frames and requirements set in federal law and in the MI Choice Contract.

11.2 PARTICIPANT INTERNAL APPEALS

Waiver agencies must establish their own internal appeal process for participants to file an appeal with the agency. The internal appeal process must conform to requirements and time frames set by federal law and the MI Choice Contract. The internal appeal process applies only to MI Choice enrolled participants and in the following situations:

Medicaid Provider Manual

- The waiver agency is denying a requested service that is not already in place,
- The waiver agency is terminating, suspending or reducing a service that is already in place,
- The waiver agency is taking action or making an adverse determination based on suspicion of fraud, or
- In areas with only one waiver agency, the denial of a participant's request to exercise their right to obtain services outside the network.

Waiver agencies must send the participant an Adverse Benefit Determination notice when making any of the adverse decisions listed above. The Adverse Benefit Determination notice must meet the requirements specified in federal law and the MI Choice Contract. CMS requires managed care providers to send an Adverse Benefit Determination notice to MI Choice participants when the waiver agency makes decisions regarding their access to MI Choice services. Each Adverse Benefit Determination sent to the participant must be in writing and meet the language needs of the individual so the recipient understands the content (i.e., the format meets the needs of those with limited English proficiency and/or limited reading proficiency). Participants have 60 calendar days from the date of the Adverse Benefit Determination to request an internal appeal.

If the internal appeal decision upholds the action described in the Adverse Benefit Determination and the participant remains unsatisfied, the participant or legal representative may request a State Fair Hearing.

When an applicant or participant does not meet the LOCD, waiver agencies will bypass the Internal Appeal process and provide the individual with the necessary State Fair Hearing request forms pertaining to LOCD. Waiver agencies must use the version of the State Fair Hearing request form (DCH-0092-MOAGR) with the "EDW-LOCD" code entered in the "State Program or Service being provided to this client" field. Waiver agencies must also utilize the Adequate Action Notices on the LOCD website instead of the Notice of Adverse Benefit Determination. Applicants or participants must be made aware that they have the option to request a Secondary Review as identified on the hearing notice.

11.3 STATE FAIR HEARING

Applicants for MI Choice may request a State Fair Hearing when the waiver agency makes an adverse determination. MI Choice participants may request a State Fair Hearing when the waiver agency issues an internal appeal decision that upholds the action described in the Adverse Benefit Determination or when the waiver agency does not adhere to the time frames required for making a decision in an internal appeal.

Waiver agencies must provide adequate or advance notice to the applicant or participant that conforms to the requirements and time frames specified in federal law and the MI Choice Contract.

11.4 PROVIDER AND WAIVER AGENCY APPEALS

Medicaid providers, including waiver agencies, are afforded appeal rights under the Michigan Social Welfare Act (Public Act 280 of 1939, as amended) and the Michigan Administrative Code. Adverse actions that may be appealed by providers include, but are not limited to, the suspension or termination of participation in the Medicaid program or a reduction, suspension, or adjustment of provider payments.

Information regarding the MDHHS appeal process is available in the General Information for Providers chapter and on the MDHHS website. (Refer to the Directory Appendix for website information.)

Michigan Department of Health and Human Services
Medicaid Provider Manual

SECTION 1 – GENERAL INFORMATION

Effective March 1, 2015, the Michigan Department of Health and Human Services (MDHHS), in partnership with the Centers for Medicare & Medicaid Services (CMS), implemented a new managed care program called MI Health Link. This program integrates into a single coordinated delivery system all physical health care, pharmacy, long term supports and services, and behavioral health care for individuals who are dually eligible for full Medicare and full Medicaid. The goals of the program are to improve coordination of supports and services offered through Medicare and Medicaid, enhance quality of life, improve quality of care, and align financial incentives.

MDHHS and CMS have signed a three-way contract with managed care entities called Integrated Care Organizations (ICOs) to provide Medicare and Medicaid covered acute and primary health care, pharmacy, dental, and long term supports and services (nursing facility and home and community based services). The MI Health Link program also includes a home and community-based services (HCBS) waiver for MI Health Link enrollees who meet nursing facility level of care, choose to live in the community rather than an institution, and have a need for at least one of the waiver services as described in this chapter. This waiver is called the MI Health Link HCBS Waiver.

The Michigan Prepaid Inpatient Health Plans (PIHPs) in the four demonstration regions are responsible for providing all Medicare and Medicaid behavioral health services for individuals who have mental illness, intellectual/developmental disabilities, and/or substance use disorders. The Eligibility and Service Areas section provides a list of the regions and related counties.

1.1 ELECTRONIC VISIT VERIFICATION

The 21st Century Cures Act (the Cures Act), enacted by the U.S. Congress in December 2016, added Section 1903(l) to the Social Security Act to require all states to use electronic visit verification (EVV) for personal care services (PCS) and home health care services (HHCS) provided under a Medicaid State Plan of the Social Security Act or under a waiver of the State Plan. PCS provided through MI Health Link must meet EVV requirements. Refer to the Electronic Visit Verification chapter of this Manual for more information.

SECTION 2 – ELIGIBILITY AND SERVICE AREAS

Individuals who are eligible to participate are those who are age 21 or older, eligible for Medicare and Medicaid, and reside in one of the four demonstration regions:

Region	Counties in the Region
1	Alger, Baraga, Chippewa, Delta, Dickinson, Gogebic, Houghton, Iron, Keweenaw, Luce, Mackinac, Marquette, Menominee, Ontonagon, and Schoolcraft
4	Barry, Berrien, Branch, Calhoun, Cass, Kalamazoo, St. Joseph, and Van Buren
7	Wayne
9	Macomb

Excluded populations:

- Individuals under age 21
- Individuals previously disenrolled due to special disenrollment from Medicaid managed care as defined in 42 CFR 438.56
- Individuals not living in one of the four demonstration regions
- Individuals with Additional Low Income Medicare Beneficiary/Qualified Individual (ALMB/QI) program coverage
- Individuals without full Medicaid coverage (they have spenddowns or deductibles)
- Individuals with Medicaid who reside in a state psychiatric hospital
- Individuals with commercial Health Maintenance Organization (HMO) coverage
- Individuals with elected hospice services prior to MI Health Link program enrollment
- Individuals with Medicaid who reside in a State Veterans' Home

SECTION 3 – ENROLLMENT PROCESS

Enrollment in the MI Health Link program occurs in two ways: 1) voluntary enrollment, and 2) passive enrollment. For voluntary enrollment, the eligible individual must call the enrollment broker contracted by the state for Medicaid managed care programs. The individual selects the ICO in which they wish to enroll, using the ICO provider networks and drug formularies to assist in making choices.

Eligible individuals who do not voluntarily enroll in the program will receive a notification letter at least 60 days prior to the enrollment effective date informing them they will be passively enrolled. Eligible individuals will have a period of 60 days to opt out of the program if they choose to do so prior to the enrollment effective date. Individuals may opt out by calling the entities as indicated in the notification letter. Individuals who do not opt out of the program prior to the effective date will be passively enrolled and an ICO will be assigned to them. Prior to the enrollment effective date, and at any time thereafter, individuals will have the opportunity to select a different ICO than the one assigned to them if there is another ICO option in the region.

After enrollment, individuals are issued an identification (ID) card that is specific to the MI Health Link program. This ID card is used instead of the traditional Medicare and Medicaid ID cards, and identifies the name of the ICO responsible for coverage along with the MI Health Link logo. Individuals will be enrolled in the benefit plan called ICO-MC, which is a benefit plan specific to the MI Health Link program. (Refer to the Beneficiary Eligibility Chapter for additional information.)

Individuals who are enrolled in the MI Choice waiver or the Program of All-Inclusive Care for the Elderly (PACE) are not passively enrolled into MI Health Link. These individuals may enroll in MI Health Link voluntarily, but must disenroll from MI Choice or PACE before the MI Health Link enrollment is effective. MDHHS will assist in this process to ensure a smooth transition between programs. Individuals who are enrolled in MI Choice or PACE and wish to enroll in MI Health Link must call the enrollment broker to start the enrollment process. The enrollment broker will send a message to MDHHS notifying MDHHS that the individual has chosen to enroll in MI Health Link. MDHHS staff will contact the appropriate MI Choice waiver agency or PACE organization to obtain current information and assessments for the individual. MDHHS will review the information received to determine if the individual's needs can be met through MI Health Link. MDHHS will contact the individual to discuss whether their needs can be met in MI Health Link. If the individual still chooses to join MI Health Link at that time, MDHHS will initiate the formal enrollment in the program and will notify the ICO accordingly.

Individuals may choose to disenroll from MI Health Link at any time. Disenrollment is effective on the first day of the following month.

SECTION 4 – PROGRAM ENROLLMENT TYPES

For individuals enrolled with an ICO and who are residing in a NF or County Medical Care Facility (CMCF), the ICO-NFAC or ICO-CMCF PET codes will be updated in CHAMPS when the NF or CMCF completes the Nursing Facility Admission in CHAMPS. The ICO-NFAC or ICO-CMCF PET code will be removed upon the facility completing the NF discharge information in CHAMPS when the individual is discharged from the facility.

Similarly, when a MI Health Link enrollee elects hospice services, the ICO-HOSC, ICO-HOSW, ICO-HOSN, ICO-HOSR or ICO-HOSH PET codes will be updated in CHAMPS when the hospice provider completes the Hospice Admission in CHAMPS. When the individual expires or otherwise is discharged from hospice services, the hospice provider must complete the Hospice Discharge in CHAMPS, which then removes the hospice-related PET codes.

When the MI Health Link enrollee receives hospice services while residing in a NF or CMCF, the hospice provider must indicate the facility of residence on the Hospice Admission in CHAMPS so the ICO can receive the appropriate capitation rate.

SECTION 5 – COVERED SERVICES

MI Health Link offers the following services:

- Medicare covered services, including pharmacy
- Medicaid State Plan services, including personal care services and hearing aid coverage
- Dental services
 - Equivalent to the Medicaid adult dental benefit as described in the Dental Chapter of this manual.
- Long Term Supports and Services (LTSS)
 - Nursing facility services
 - State Plan personal care services
 - Supplemental Services for individuals who live in the community and do not meet nursing facility level of care as determined by the LOCD.
 - MI Health Link HCBS Waiver services for individuals who live in the community and meet nursing facility level of care as determined by the LOCD
- Services provided through PIHPs for individuals' needs related to behavioral health (BH), intellectual/developmental disability (I/DD) and substance use disorders (SUD)

The MI Health Link program waives the requirement for a three-day hospital stay prior to receiving rehabilitation or skilled care in a Michigan licensed nursing facility. Admission requirements include a physician-written order for nursing facility services, a completed LOCD, and a completed Pre-Admission Screening and Resident Review (PASRR).

5.1 STATE PLAN PERSONAL CARE SERVICES

For individuals enrolled in the MI Health Link program, State Plan personal care services will be provided and paid for by the ICO and will no longer be provided through the Medicaid Home Help program. Personal care services are available to individuals who require hands-on assistance in activities of daily living (ADLs) (i.e., eating, toileting, bathing, grooming, dressing, mobility, and transferring) as well as hands-on assistance in instrumental activities of daily living (IADLs) (i.e., personal laundry, light housekeeping, shopping, meal preparation and cleanup, and medication administration).

Personal care services are available to individuals living in their own homes or the home of another. Services may also be provided outside the home for the specific purpose of enabling an individual to be employed.

Providers shall be qualified individuals who work independently, contract with, or are employed by an agency. The ICO may directly hold provider agreements or contracts with independent care providers of the individual's choice, if the provider meets MDHHS qualification requirements, to provide personal care services. Individuals who currently receive personal care services from an independent care provider may elect to continue to use that provider. The individual may also select a new provider if that provider meets State qualifications. Paid family caregivers will be permitted to serve as a personal care provider in accordance with the state's requirements for Medicaid State Plan personal care services.

5.1.A. PROVIDER QUALIFICATIONS

A criminal history screen must be conducted for all personal care providers. In addition, the provider must meet the following qualifications:

- Be 18 years of age or older;
- Be able to follow instructions, personal care procedures, perform the services required and handle emergencies;
- Be physically able to perform the needed services;
- Be knowledgeable about when to seek assistance from appropriate sources in the event of an emergency;
- Be dependable and able to meet job demands; and
- Be willing to participate in available training programs if necessary.

5.1.B. ASSESSMENT REQUIREMENTS

During the Level I Assessment, ICO Care Coordinators (or designee who meets the qualifications for an ICO Care Coordinator) must consider if the individual may need personal care services. If the ICO Care Coordinator believes the individual may be eligible for MI Health Link personal care services, the ICO Care Coordinator will conduct the Personal Care Assessment. The in-person, comprehensive assessment is the basis for determining and authorizing the amount, scope and duration, and payment of services. The individual needs to be reassessed at least quarterly or with a change of functional and/or health status to determine and authorize the amount, scope and duration, and payment of services. The reassessment must be in-person.

ADLs and IADLs are ranked by the ICO Care Coordinator during the Personal Care Assessment. Through the assessment, ADLs and IADLs are assessed according to the following five point scale, where 1 is totally independent and 5 requires total assistance.

Independent	The individual performs the activity with no human assistance.
Verbal assistance	The individual performs the activity with verbal assistance such as reminding, guiding or encouraging.
Minimal human assistance	The individual performs the activity with some direct physical assistance and/or assistance technology.
Moderate human assistance	The individual performs the activity with a great deal of human assistance and/or assistive technology.
Dependent	The individual does not perform the activity even with human assistance and/or assistance technology.

An individual must be assessed with need for assistance with at least one ADL to be eligible to receive personal care services. Payment for personal care services may only be authorized for needs assessed at the level three (3) ranking or greater. In addition, the individual must have an ADL functional ranking of three (3) or greater to be eligible

Michigan Department of Health and Human Services

Medicaid Provider Manual

for IADL services. Once an individual is determined eligible for personal care services, their authorized ADL and IADL services and the amount, scope and duration must be included in the Individual Integrated Care and Supports Plan (IICSP).

5.1.C. PERSONAL CARE SERVICES AND THE MI HEALTH LINK HCBS WAIVER

If an individual ranks at a level 1 or 2, they will not be eligible for State Plan Personal Care Services through MI Health Link. If an individual ranks at a level 2, they may be eligible for ADL assistance through the MI Health Link HCBS waiver Expanded Community Living Supports (ECLS) benefit if the individual requires prompting, cueing, guiding, teaching, observing, or reminding to complete ADLs. Through the MI Health Link HCBS waiver, an individual may receive IADL assistance if they receive prompting, cueing, guiding, etc. to complete ADLs.

ECLS may be provided in addition to State Plan Personal Care Services if the individual requires hands-on assistance with some ADLs, as covered under Personal Care Services, but requires prompting, cueing, guiding, teaching, observing, reminding, or other support (not hands-on) to complete other ADLs and IADLs independently to ensure safety, health, and welfare of the individual.

5.1.D. REASONABLE TIME AND TASK

When a task (activity) is assigned to a specific provider, the rank of the activity is used against a Reasonable Time Schedule (RTS) table to determine the recommended time that activity should be assigned. Providers should use the RTS table provided by MDHHS to record and report minutes spent delivering services. The maximum amount is across all assigned providers for an individual, so these are case maximums. When an individual's needs exceed the hours recommended by the RTS, a rationale must be provided and maintained in the individual's record.

5.1.E. COMPLEX CARE NEEDS

Complex care refers to conditions requiring intervention with special techniques and/or knowledge. These complex care tasks are performed for individuals whose diagnoses or conditions require more management. The conditions may also require special treatment and equipment for which specific instructions by a health professional or individual may be required in order to perform.

- Eating and feeding
- Catheters or legs bags
- Colostomy care
- Bowel program
- Suctioning
- Specialized skin care
- Range of motion exercises
- Peritoneal dialysis

Michigan Department of Health and Human Services Medicaid Provider Manual

- Wound care
- Respiratory treatment
- Ventilators
- Injections

The ICO Care Coordinator will allocate time for each task assessed a rank of 3 or greater based on interviews with the individual and provider, observation of the individual's abilities, and use of the RTS as a guide. When hours exceed the RTS, a rationale must be provided and maintained in the individual's record.

An assessment of need at a ranking of 3 or greater does not automatically guarantee the maximum allotted time allowed by the RTS. The ICO Care Coordinator must assess each task according to the actual time required for its completion.

5.1.F. REIMBURSEMENT AND RATES

After enrollment and according to the requirements of the three-way contract, the ICO must maintain the individual's current personal care providers and amount, scope and duration of services until the IICSP is reviewed and updated and providers are secured with individual approval. An ICO should use the Medicaid Home Help Payment Schedule to continue paying providers as scheduled. (Refer to the Directory Appendix for additional information.) An ICO should follow this schedule until the ICO and personal care provider agree upon a new payment schedule, which should be defined in the contract between the ICO and the personal care provider. The ICO must publish a pay cycle and must pay these claims on the next available pay cycle date.

Furthermore, an ICO should use the Individual and Agency County Rates to determine payment rates for the transition period until the ICO and personal care provider agree upon a rate that is defined in the ICO and personal care provider contract. (Refer to the Directory Appendix for additional information.)

After the transition period, payment rates for personal care services are established by the ICO. Tasks are assigned minute values which are converted to hours and billed as a total at the end of the ICO's preferred pay period. Reimbursement is subject to any state or federal laws that may be applicable in the future.

A request for higher or lower hours than shown on the RTS is permissible. A textual rationale is required if the amount of services needed is different than the RTS. Possible reasons for using higher hours include incontinence, severely impaired speech, paralysis and obesity. Possible reasons for lower hours include shared living arrangements (specifically for IADLs, except for administering medications) and responsible relatives able and available to assist.

If the individual does not require the maximum allowable hours for IADLs, only the amount of time needed for each task shall be authorized. Assessed hours for IADLs (except medication administration) must be **prorated by one half** in shared living arrangements where other adults reside in the home as personal care services are only for the benefit of the individual. This does not include situations where others live in

Michigan Department of Health and Human Services **Medicaid Provider Manual**

adjoined apartments, flats or in a separate home on shared property and there is no shared common living area. In shared living arrangements where it can be clearly documented that IADLs for the enrolled individual are completed separately from others in the home, hours for IADLs do not need to be prorated.

5.1.G. RESPONSIBLE RELATIVES AND GUARDIANS

Adult children (18 years of age or older) may provide personal care services to a parent. An individual's spouse cannot be paid to provide personal care services to the individual as they are considered responsible relatives. Couples who are separated must provide verification that they are no longer residing in the same home. Verification may include a driver's license, rent receipt or utility bill reflecting their separate mailing address. A spouse who is legally separated from a spouse cannot be paid to provide personal care services. ADLs may be approved when an individual's spouse is unavailable or unable to provide these services. "Unavailable" means absence from the home for an extended period due to employment, school or other legitimate reasons. The responsible relative must provide a work or school schedule to verify they are unavailable to provide care. "Unable" means the responsible person has disabilities of their own which prevent them from providing care.

Shopping, laundry, or light housecleaning shall not be approved when a responsible relative of the individual resides in the home unless they are unavailable or unable to provide these services. These findings must be documented.

5.1.H. INDIVIDUALS IN ADULT FOSTER CARE FACILITIES AND HOME FOR THE AGED

For individuals in adult foster care facilities or home for the aged, a flat monthly supplement rate is established annually by the state legislature for those Medicaid beneficiaries who, according to a standardized assessment, have a documented need for personal care services. The supplement rate is included in the ICO rates, and the ICOs must pay this rate to adult foster care homes and homes for the aged providers for individuals enrolled in MI Health Link. ICOs and Adult Foster Care facilities and Homes for the Aged must use the billing invoice provided by MDHHS.

5.2 SUPPLEMENTAL SERVICES

MI Health Link supplemental services are available for any individuals who live in the community, wish to move from a nursing facility to the community, do not meet LOCD and are not enrolled in the MI Health Link HCBS waiver. The four supplemental services are Adaptive Medical Equipment and Supplies, Community Transition Services, Personal Emergency Response System, and Respite.

5.2.A. ADAPTIVE MEDICAL EQUIPMENT AND SUPPLIES

This service includes devices, controls, or appliances specified in the IICSP that enable individuals to increase their abilities to perform activities of daily living, or to perceive, control, or communicate with the environment in which they live. Also included are items necessary for life support or to address physical conditions, along with ancillary supplies and equipment necessary to the proper functioning of such items, and durable and non-durable medical equipment and medical supplies not available under the Medicaid State

Michigan Department of Health and Human Services

Medicaid Provider Manual

Plan and Medicare that are necessary to address individual functional limitations. This will also cover the costs of equipment maintenance. The coverage includes training the individual and/or caregivers in the operation and/or maintenance of the equipment and the use of a supply when initially purchased. The ICO shall not authorize payment for herbal remedies, nutraceuticals, and/or other over-the-counter medications for uses not approved by the United States Food and Drug Administration (FDA).

All items shall meet applicable standards of manufacture, design, and installation. Each direct service provider must enroll in Medicare and/or Medicaid as a Durable Medical Equipment (DME) provider, pharmacy, etc., as appropriate. This must be verified at the beginning of service delivery and annually thereafter. The ICO may obtain some items directly from a retail store that offers the item to the general public. When utilizing retail stores, the ICO must ensure the item purchased meets the service standards. The ICO may choose to open a business account with a retail store for such purchases. The ICO must maintain the original receipts and maintain accurate systems of accounting to verify the specific individual who received the purchased item. Items must be of direct medical or remedial benefit to the individual, and this benefit must be documented in the individual's record.

It must be documented on the IICSP or Care Bridge Record that the item is the most cost-effective alternative to meeting the individual's needs. There must be documentation on the IICSP or Care Bridge record that the best value in warranty coverage was obtained at the time of purchase. Liquid nutritional supplement orders must be renewed every six months by a physician, physician's assistant, or nurse practitioner (in accordance with Michigan Scope of Practice laws). Where feasible, the ICO and/or direct service provider shall seek confirmation of the need for the item from the individual's physician.

5.2.B. COMMUNITY TRANSITION SERVICES

Community Transition Services (CTS) include non-reoccurring expenses for individuals transitioning from a nursing facility to another residence where the individual is responsible for their own living arrangement. Person-centered planning must be used throughout the entire community transition process. The ICO shall begin CTS no more than six months before the expected discharge from the nursing facility. Allowable transition costs include the following:

- Housing or security deposit: A one-time expense to secure housing or obtain a lease.
- Utility hook-ups and deposits: A one-time expense to initiate and secure utilities (television service and internet are excluded).
- Furniture, appliances, and moving expenses: One-time expenses necessary to occupy and safely reside in a community residence (diversion or recreational devices are excluded).
- Cleaning: A one-time cleaning expense to ensure a clean environment, including pest eradication, allergen control, and over-all cleaning.
- Coordination and support services: To facilitate transitioning of an individual to a community setting.

Michigan Department of Health and Human Services
Medicaid Provider Manual

- Other services deemed necessary and documented within the individual's plan of service to accomplish the transition into a community setting.

Ongoing monthly rental or mortgage expense, ongoing utility charges, or items that are intended for purely diversional or recreational purposes are excluded under this service.

5.2.C. PERSONAL EMERGENCY RESPONSE SYSTEM

A Personal Emergency Response System (PERS) is an electronic device that enables individuals to secure help in an emergency. The individual may also wear a portable "help" button to allow for mobility. The system is connected to the individual's phone and programmed to signal a response center once the "help" button is activated. The PERS provider may offer this service for cellular or mobile phones and devices. The device must meet industry standards. The individual must reside in an area where cellular or mobile coverage is reliable. When the individual uses the device to signal and otherwise communicate with the PERS provider, the technology for the response system must meet all other service standards. The PERS provider must ensure at least monthly testing of each PERS unit to maintain proper functioning.

PERS does not cover monthly telephone charges associated with phone service. This service is limited to persons who either live alone or who are left alone for significant periods of time on a routine basis and who could not summon help in an emergency without this device. The ICO may authorize PERS units for individuals who do not live alone if both the waiver individual and the person with whom they reside would require extensive routine supervision without a PERS unit in the home. An example of this is two individuals who live together and both are physically and/or cognitively unable to assist the other individual in the event of an emergency.

The Federal Communication Commission (FCC) must approve the equipment used for the response system. The equipment must meet UL® safety standards 1637 specifications for Home Health Signaling Equipment.

The provider must staff the response center with trained personnel 24 hours per day, 365 days per year. The response center will provide accommodations for persons with limited English proficiency. The response center must maintain the monitoring capacity to respond to all incoming emergency signals. The response center must have the ability to accept multiple signals simultaneously. The response center must not disconnect calls for a return call or put on a first call, first serve basis. The provider will furnish each responder with written instructions and provide training, as appropriate.

5.2.D. RESPITE

Respite services may be provided at the individual's home, in the home of another person, or at another setting outside the individual's home. Respite service criteria are different depending on the setting. Respite services are limited to a total of 14 overnight stays per 365 days regardless of the setting. The ICO may provide more respite services as an optional benefit. For individuals receiving respite services through the PIHP, they

Michigan Department of Health and Human Services

Medicaid Provider Manual

must first exhaust the respite benefit through the PIHP before using this respite service as an ICO supplemental service.

5.2.D.1. RESPITE PROVIDED AT THE INDIVIDUAL'S HOME OR IN THE HOME OF ANOTHER PERSON

Respite care services are provided on a short-term, intermittent basis to relieve the individual's family or other primary caregiver(s) from daily stress and care demands during times when they are providing unpaid care. Relief needs of hourly or shift staff workers should be accommodated by staffing substitutions, plan adjustments, or location changes and not by respite care.

Respite services include:

- Attendant care (individual is not bed-bound), such as companionship, supervision, and/or assistance with toileting, eating, and ambulation.
- Basic care (individual may or may not be bed-bound), such as assistance with ADLs, a routine exercise regimen, and self-medication.

Members of an individual's family who are not the individual's regular caregiver may provide respite for the regular caregiver. However, the ICO shall not authorize funds to pay for services furnished to an individual by that person's spouse. Family members who provide respite services must meet the same standards as providers who are unrelated to the individual.

Respite services cannot be scheduled on a long term daily basis. Respite should be used on an intermittent basis to provide scheduled relief of informal caregivers. Respite is not intended to be provided on a continuous, long-term basis where it is a part of daily services that would enable an unpaid caregiver to work elsewhere full time. The costs of room and board are not included in the payment for respite services.

5.2.D.2. RESPITE PROVIDED OUTSIDE THE HOME

Respite care services are provided on a short-term, intermittent basis to relieve the individual's family or other primary caregiver(s) from daily stress and care demands during times when they are providing unpaid care. Relief needs of hourly or shift staff workers should be accommodated by staffing substitutions, plan adjustments, or location changes and not by respite care.

Each out of home respite service provider must be a licensed group home as defined in Michigan Compiled Law (MCL) 400.701ff, which includes adult foster care homes and homes for the aged. Respite may include the cost of room and board if the service is provided in a licensed Adult Foster Care home or licensed Home for the Aged.

Respite services include:

- Attendant care (individual is not bed-bound) such as companionship, supervision and/or assistance with toileting, eating, and ambulation.

Michigan Department of Health and Human Services
Medicaid Provider Manual

- Basic care (individual may or may not be bed-bound) such as assistance with ADLs, a routine exercise regimen, and self-medication.

Out-of-home respite may be scheduled for several days in a row depending upon the needs of the individual and the individual's caregivers.

5.3 MI HEALTH LINK HCBS WAIVER SERVICES

These services are intended for individuals who meet all of the following criteria:

- are enrolled in the MI Health Link program,
- meet nursing facility level of care as determined by the Michigan Medicaid Nursing Facility Level of Care Determination (LOCD) tool,
- demonstrate a need for one or more of the services listed below, which must be identified in the IICSP.

Individuals must receive at least one waiver service each month to remain on the waiver. The ICO and direct service providers must adhere to the service definition and operating standards to be eligible to receive payment of waiver expenses.

5.3.A. ADAPTIVE MEDICAL EQUIPMENT AND SUPPLIES

For the definition of the Adaptive Medical Equipment and Supplies service, refer to the Supplemental Services section, Adaptive Medical Equipment and Supplies.

5.3.B. ADULT DAY PROGRAM

Adult Day Program services are furnished four or more hours per day on a regularly scheduled basis, for one or more days per week, or as specified in the IICSP, in a non-institutional, community-based setting, encompassing both health and social services needed to ensure the optimal functioning of the individual. Meals provided as part of these services shall not constitute a "full nutritional regimen," i.e., three meals per day. Physical, occupational and speech therapies may be furnished as component parts of this service.

Transportation between the individual's residence and the Adult Day Program center is provided when it is a standard component of the service. Not all Adult Day Program centers offer transportation to and from their location. Adult Day Program centers that do offer transportation may only offer it in a specified area. When the Adult Day Program center offers transportation, it is a component part of the Adult Day Program service. If the center does not offer transportation, then the ICO will pay for the transportation to and from the Adult Day Program center separately.

Individuals cannot receive personal care services or Expanded Community Living Supports during the time spent at the Adult Day Program facility. Payment for Adult Day Program includes all services provided while at the facility. Personal care services and Expanded Community Living Supports may be used in conjunction with Adult Day Program services, but cannot be provided at the same time unless the specific

Michigan Department of Health and Human Services
Medicaid Provider Manual

component of the service includes laundry, housecleaning, etc., that does not require the individual to be present.

Adult Day Program may be authorized only if the individual meets at least one of the following criteria:

- Requires regular supervision to live in their own home or the home of a relative.
- If they have a caregiver, the individual must require a substitute caregiver while their regular caregiver is unavailable.
- Has difficulty or is unable to perform ADLs without assistance.
- Capable of leaving the residence with assistance to receive services.
- In need of intervention in the form of enrichment and opportunities for social activities to prevent and/or postpone deterioration that may lead to institutionalization.

A referral from an ICO for a waiver individual shall replace any screening or assessment activities performed for other Adult Day Program individuals at the setting. The direct Adult Day Program service provider shall accept copies of the ICO's assessments and IICSP to eliminate duplicate assessment and service planning activities.

Each program shall provide directly, or coordinate with the ICO to arrange for the provision of the following services:

- Transportation
- Personal Care
- Nutrition: one hot meal per eight-hour day which provides one-third of the recommended daily allowances and follows the meal pattern specified in the home delivered meals service standard. Individuals in attendance from eight to fourteen hours per day shall receive an additional meal to meet a combined two-thirds of the recommended daily allowances. Modified diet menus should be provided where feasible and appropriate. Such modifications shall take into consideration individual choice, health, religious and ethnic diet preferences.
- Recreation: consisting of planned activities suited to the needs of the individual and designed to encourage physical exercise, to maintain or restore abilities and skill, to prevent deterioration, and to stimulate social interaction.

If the program arranges for provision of any service at a place other than program-operated facilities, a written agreement specifying supervision requirements and responsibilities shall be in place. The ICO shall provide care coordination.

Each program shall keep all individuals' files confidential in controlled access files. Each program shall use a standard release of information form that is time limited and specific as to the released information.

Each provider shall employ a full-time program director with a minimum of a bachelor's degree in a health or human services field or be a qualified health professional. The provider shall continually provide support staff at a ratio of no less than one staff person

Michigan Department of Health and Human Services

Medicaid Provider Manual

for every ten participants. The provider may only provide health support services under the supervision of a Registered Nurse (RN). If the program acquires either required or optional services from other individuals or organizations, the provider shall maintain a written agreement that clearly specifies the terms of the arrangement between the provider and other individual or organization.

Each program shall establish written procedures (reviewed and approved by a consulting pharmacist, physician, or RN) that govern the assistance given by staff to individuals taking their own medications while participating in the program. The policies and procedures must minimally address:

- Written consent from the individual or individual's representative to assist with medications.
- Verifications of the individual's medication regimen, including prescriptions and dosages.
- The training and authority of staff to assist individuals with taking their own prescribed or non-prescription medications and under what conditions such assistance may take place.
- Procedures for medication set up.
- Secure storage of individuals' medications. Medications must be returned to the individual.
- Instructions for entering medication information in individual files, including times and frequency of assistance.

Program staff shall have basic first-aid training and any other training as required by MDHHS and the ICO.

If the provider operates its own vehicles for transporting individuals to and from the program site, the provider shall meet the following transportation minimum standards:

- The Secretary of State shall appropriately license all drivers and vehicles and all vehicles shall be appropriately insured.
- All paid drivers shall be physically capable and willing to assist persons requiring help to get in and out of vehicles. The provider shall make such assistance available unless expressly prohibited by either a labor contract or an insurance policy.
- All paid drivers shall be trained to cope with medical emergencies unless expressly prohibited by a labor contract.
- Each program shall operate in compliance with P.A. 1 of 1985 regarding seat belt usage.

The provider shall maintain all equipment and furnishings used during program activities or by program participants in safe and functional condition. Each Adult Day Program center must have the following furnishings:

- At least one straight back or sturdy folding chair for each individual and staff person.
- Lounge chairs and/or day beds as needed for naps and rest periods.
- Storage space for individuals' personal belongings.

Michigan Department of Health and Human Services

Medicaid Provider Manual

- Tables for both ambulatory and non-ambulatory individuals.
- A telephone accessible to all individuals.
- Special equipment as needed to assist persons with disabilities.

Each provider shall post emergency procedures (fire, severe weather, etc.) in each room of the program site. Practice drills of emergency procedures must occur once every six months. The program shall maintain a record of all practice drills.

Each Adult Day Program center must document that it is in compliance with:

- Barrier-free design specification of Michigan and local building codes.
- Fire safety standards.
- Applicable Michigan and local public health codes.

Adult Day Program settings must be compliant with the HCBS Final Rule as indicated in the Home and Community-Based Residential and Non-Residential Settings subsection.

5.3.C. ASSISTIVE TECHNOLOGY

The Assistive Technology service includes technology items used to increase, maintain, or improve an individual's functioning and promote independence. The service may include assisting the individual in the selection, design, purchase, lease, acquisition, application, or use of the technology item. This service also includes vehicle modifications to the vehicle that is the individual's primary method of transportation. This service includes repairs and maintenance of assistive technology devices. Vehicle modifications must be of direct medical or remedial benefit to the individual and specified under the IICSP. Some examples of assistive technology include, but are not limited to, van lifts, hand controls, computerized voice system, communication boards, voice activated door locks, power door mechanisms, adaptive or specialized communication devices, assistive dialing device, adaptive door opener and specialized alarm or intercom.

Cost limits for this service are as follows:

- \$15,000 maximum for van lifts, including tie-downs, for the duration of the 5-year waiver period
- \$5,000 yearly (waiver year) maximum for all other assistive technology devices

Items must be of direct medical or physical benefit to the individual. Where feasible, the ICO and/or direct service provider must seek confirmation of the need for the item from the individual's physician. It must be documented in the IICSP that the item is the most cost-effective alternative to meeting the individual's needs. Items must meet applicable standards of manufacture, design, and installation. There must be documentation that the best value in warranty coverage was obtained at the time of purchase.

Modifications will only be made to vehicles with proper insurance coverage, with the exception of new vehicles coming directly from an automotive factory to the entity performing the modification.

Michigan Department of Health and Human Services

Medicaid Provider Manual

Direct service providers must enroll in Medicare and Medicaid as a Durable Medical Equipment, Prosthetics, Orthotics and Supplies (DMEPOS) provider, pharmacy, etc., as appropriate. Verification of provider qualifications must be conducted prior to service delivery and annually thereafter. Other contracted or subcontracted providers must have written policies and procedures compatible with requirements as specified in the contract between MDHHS and the ICO and/or the three-way contract. Contracted/subcontracted providers must have appropriate state licensure or certification required to complete or provide the service or item. Verification of provider qualifications must be conducted prior to service delivery and annually thereafter.

Items like cell phones, internet service, and full-home wiring systems are excluded from this benefit. This service also does not include paying for or leasing vehicles, vehicle insurance and vehicle repairs.

5.3.D. CHORE SERVICES

Chore Services include those duties needed to maintain the home in a clean, sanitary, and safe environment to provide safe access inside the home, and yard maintenance and snow plowing to provide access to and egress outside of the home. This service includes tasks such as heavy household chores (washing floors, windows, and walls), tacking loose rugs and tiles, moving heavy items of furniture, mowing, raking, cleaning hazardous debris such as fallen branches and trees, weatherization, and pest control. The service may include materials and disposable supplies used to complete chore tasks. The ICO may also use waiver funds to purchase or rent the equipment or tools used to perform chore tasks for waiver individuals.

Chore services are covered only in cases when neither the individual nor anyone else in the household is capable of performing or financially paying for them, and where no other relative, caregiver, landlord, community or volunteer agency, or third party payer is capable of, or responsible for, their provision. In the case of rental property, the responsibility of the landlord, pursuant to the lease agreement, will be examined prior to any authorization of service.

Verification of provider qualifications must be conducted prior to service delivery and annually thereafter. Providers must have previous relevant experience and/or training for the tasks specified and authorized in the IICSP. The ICO must deem the chosen provider capable of performing the required tasks. Pest control suppliers must be properly licensed.

5.3.E. COMMUNITY TRANSITION SERVICES

For the definition of Community Transition Services (CTS), refer to Community Transition Services in the Supplemental Services subsection.

For persons expected to enroll in the MI Health Link HCBS waiver, when a transitioning individual requires a home modification (ramp, widened doorways, etc.) before the transition can take place, the ICO shall authorize only those modifications immediately necessary for community transition as CTS. The ICO shall authorize all other needed

Michigan Department of Health and Human Services **Medicaid Provider Manual**

modifications as Environmental Modifications services or Chore services through the waiver, as appropriate.

5.3.F. ENVIRONMENTAL MODIFICATIONS

The Environmental Modifications service covers physical adaptations to the home, required in the individual's IICSP, that are necessary to ensure the health and welfare of the individual or that enable the individual to function with greater independence in the home. Such adaptations include the installation of ramps and grab bars, widening of doorways, modification of bathroom facilities, or installation of specialized electric and plumbing systems that are necessary to accommodate the medical equipment and supplies necessary for the welfare of the individual. Complex kitchen and bathroom modifications may be completed if medically necessary for the individual. Environmental modifications are those which are installed in the residence versus enhanced equipment or assistive technology which are portable from residence to residence. A ramp or lift will be covered for only one exterior door or other entrance.

The modification/adaptation must be for a primary residence, but may include additional residences subject to prior authorization by the ICO. Examples of additional residences might be a family member's cottage or the individual's second home or cottage so the individual can go there to be with family.

The modification/adaptation must be the most cost-effective and reasonable alternative. Any modifications/adaptations shall only be used to modify existing spaces or structures. The existing structure must have the capability to accept and support the proposed changes. Repairs, modifications, or adaptations shall not be performed on a condemned structure. Modifications must comply with local building codes. The infrastructure of the home involved in the funded adaptations (e.g., electrical system, plumbing, well or septic, foundation, heating and cooling, smoke detector systems, or roof) must be in compliance with any applicable local codes.

Environmental modifications/adaptations required to support proper functioning of medical equipment, such as electrical upgrades, are limited to the requirements for safe operation of the specified equipment and are not intended to correct existing code violations in an individual's home.

The ICO may use MI Health Link funds for labor costs and to purchase materials used to complete the modification to prevent or remedy a safety hazard. The direct service provider shall provide the equipment or tools needed to perform the tasks unless another source can provide the equipment or tools at a lower cost or free of charge and the provider agrees to use those tools.

Prior to the start of the modification of a rental property or unit, the landlord must approve the modification plan. A written agreement between the landlord, the individual, and the ICO must specify that the ICO and individual are not responsible for any costs to restore the property to the original condition.

Michigan Department of Health and Human Services
Medicaid Provider Manual

Excluded from this service are those adaptations or improvements to the home that:

- Are of general utility.
- Are considered to be standard housing obligations of the individual or homeowner.
- Are not of direct medical or remedial benefit to the individual. For example, kitchen modifications must be required for the individual to prepare their own meals.
- Modifications to rental properties if the rental agreement states that it is the responsibility of the landlord to provide such modifications.
- Are used for upgrades to the home or for additions to homes (adding square footage, etc.).
- Are improvements exclusively required to meet local building codes and not directly related to an individual's medical or physical condition.

Some examples of exclusions include, but are not limited to, carpeting, roof repair, sidewalks, driveways, heating, central air conditioning (unless it is the most cost effective and reasonable alternative), garages, raised garage doors, storage and organizers, hot tubs, whirlpool tubs, swimming pools, landscaping and general home repairs.

The ICO shall not cover general construction costs in a new home or additions to a home purchased after the individual is enrolled in the waiver. If an individual or the individual's family purchases or builds a home while receiving waiver services, it is the individual's or family's responsibility to ensure the home will meet basic needs, such as having a ground floor bath or bedroom if the individual has mobility limitations. However, MI Health Link funds may be authorized to assist with the adaptations noted above (e.g. ramps, grab bars, widening of doorways, bathroom modifications, etc.) for a home recently purchased. If modifications are needed to a home under construction that require special adaptation to the plan (e.g. roll-in shower), the ICO may fund the difference between the standard fixture and the modification required to accommodate the individual's need.

Contracted providers (such as licensed building contractors) must have appropriate certification or licensure under Michigan regulations and law such as MCL 339.601(1), MCL 339.601.2401, or MCL 339.601.2403(3). Verification of certification, licensure, or other provider qualifications must be done prior to execution of the contract related to the modification project to be done.

5.3.G. EXPANDED COMMUNITY LIVING SUPPORTS

To receive ECLS, individuals **MUST** need prompting, cueing, observing, guiding, teaching, and/or reminding to independently complete ADLs. ECLS does not include hands on assistance for ADLs unless something occurs incidental to this service. ECLS includes social/community participation, relationship maintenance, and attendance at medical appointments.

Michigan Department of Health and Human Services
Medicaid Provider Manual

ECLS includes:

- Assisting, reminding, cueing, observing, guiding and/or training in the following activities:
 - Meal preparation
 - Laundry
 - Routine, seasonal, and heavy household care and maintenance
 - ADLs such as bathing, eating, dressing, and personal hygiene
 - Shopping for food and other necessities of daily living
- Assistance, support, and/or guidance with activities such as:
 - Money management
 - Non-medical care (not requiring nursing or physician intervention)
 - Social participation, relationship maintenance, and building community connections to reduce personal isolation
 - Transportation (excluding to and from medical appointments) from the individual's residence to community activities, among community activities, and from the community activities back to the individual's residence
 - Participation in regular community activities incidental to meeting the individual's community living preferences
 - Attendance at medical appointments
 - Acquiring or procuring goods and services necessary for home and community living
- Reminding, cueing, observing, and/or monitoring of medication administration.
- Staff assistance with preserving the health and safety of the individual in order that they may reside and be supported in the most integrated independent community setting.
- Training or assistance on activities that promote community participation, such as using public transportation, using libraries, or volunteer work.
- Dementia support, including but not limited to redirection, reminding, modeling, socialization activities, and activities that assist the individual as identified in the individual's IICSP.
- Observing and reporting to the ICO Care Coordinator any changes in the individual's condition and the home environment.

If the individual has an exposure or condition for which a federal, state, or local public health or government official(s) has released applicable quarantine or isolation guidelines, ECLS services that only require verbal cueing may be provided via a HIPAA compliant virtual method (audio and video only; cannot be only audio) in lieu of in-person during the quarantine or isolation period only. Approval of remote support must be reflected on the individual's integrated care and support plan.

Michigan Department of Health and Human Services

Medicaid Provider Manual

Individual providers chosen by the individual must meet the following provider qualifications (qualifications must be verified prior to initial service delivery and annually thereafter):

- Providers must be at least 18 years of age, have ability to communicate effectively both orally and in writing and follow instructions, be trained in first aid and cardiopulmonary resuscitation, be able to prevent transmission of communicable disease and be in good standing with the law as validated by a criminal history review. If providing transportation related to this service, the provider must possess a valid Michigan driver's license.
- Providers of ECLS must have previous relevant experience or training and skills in housekeeping, household management, good health practices, observation, reporting, recording information, and reporting and identifying abuse and neglect. The individual(s) must also be trained on the individual's specific needs as identified in the IICSP. Additionally, skills, knowledge, and experience with food preparation, safe food handling procedures are highly desirable.
- Previous relevant experience and training to meet MDHHS operating standards. Refer to the Three-Way Contract, supporting documentation, and agreements within the provider's contract with the ICO.
- Must be deemed capable of performing the required tasks by ICO.

Home Care agency providers must meet the following provider qualifications (qualifications must be verified prior to initial service delivery and annually thereafter):

- Providers must be at least 18 years of age, have the ability to communicate effectively both orally and in writing and follow instructions, be trained in first aid, be trained in universal precautions and blood-borne pathogens, and be in good standing with the law as validated by a criminal history review.
- A RN licensed to practice nursing in the State shall furnish supervision of ECLS providers. At the State's discretion, other qualified individuals may supervise ECLS providers. The direct care worker's supervisor shall be available to the worker at all times the worker is furnishing ECLS services.
- The ICO and/or provider agency must train each worker to properly perform each task required for each individual the worker serves before delivering the service to that individual. The supervisor must ensure that each worker can competently and confidently perform every task assigned for each individual served. MDHHS strongly recommends each worker delivering ECLS services complete a certified nursing assistance training course.
- ECLS providers may prompt, cue, or supervise the individual to perform higher-level, non-invasive tasks such as maintenance of catheters and feeding tubes, minor dressing changes, and wound care if the direct care worker has been individually trained and supervised by an RN for each individual who requires such care. The supervising RN must ensure each worker's confidence and competence in the performance of each task required.
- ECLS service providers must have previous relevant experience or training and skills in housekeeping, household management, good health practices, observation, reporting,

Michigan Department of Health and Human Services

Medicaid Provider Manual

and recording information. Additionally, skills, knowledge, and/or experience with food preparation, safe food handling procedures, and reporting and identifying abuse and neglect are highly desirable.

- Previous relevant experience and training to meet MDHHS operating standards. Refer to the Three-Way Contract, supporting documentation, and agreements within the provider's contract with the ICO.

When the ECLS services include transportation, the following standards apply:

- The ICO may not use MI Health Link funds to purchase or lease vehicles for providing transportation services to waiver individuals.
- The Secretary of State must appropriately license all drivers and register all vehicles used for transportation supported all or in part by MI Health Link funds. The provider must cover all vehicles used with liability insurance.
- All paid drivers for transportation providers supported entirely or in part by MI Health Link funds shall be physically capable and willing to assist persons requiring help to and from and to get in and out of vehicles. The provider shall offer such assistance unless expressly prohibited by either a labor contract or insurance policy.
- The provider shall train all paid drivers for transportation programs supported entirely or in part by MI Health Link funds to cope with medical emergencies, unless expressly prohibited by a labor contract or insurance policy.
- Each provider shall operate in compliance with P.A. 1 of 1985 regarding seat belt usage.

If the individual has an exposure or condition for which a federal, state, or local public health or government official(s) has released applicable quarantine or isolation guidelines, transportation on behalf of the individual during the quarantine or isolation period to allow others to obtain items required for the individual is acceptable. Plans may use this service to authorize MI Health Link HCBS funds to reimburse individuals (ECLS providers) to run errands for enrollees when the enrollee does not accompany the driver of the vehicle during only an applicable quarantine or isolation period. The purpose of expanding the ECLS service is for the enrollee to gain access to the community as needed during these temporary periods.

Each direct service provider who chooses to allow staff to assist individuals with self-medication shall establish written procedures that govern the assistance given by staff. These procedures shall be reviewed by a consulting pharmacist, physician, or RN and shall include, at a minimum:

- The provider staff authorized to assist individuals with taking their own prescription or over-the-counter medications and under what conditions such assistance may take place. This must include a review of the type of medication the individual takes and its impact upon the individual.
- Verification of prescription medications and their dosages. The individual shall maintain all medications in their original, labeled containers.
- Instructions for entering medication information in individual files.

Michigan Department of Health and Human Services
Medicaid Provider Manual

- A clear statement of the individual's and their legal representative's responsibility regarding medications taken by the individual and the provision for informing the individual and their legal representative of the provider's procedures and responsibilities regarding assisted self-administration of medications.

ECLS providers may only administer medications in compliance with Michigan Administrative Rule 330.7158:

- A provider shall only administer medication at the order of a physician and in compliance with the provisions of section 719 of the act, if applicable.
- A provider shall ensure that medication use conforms to federal standards and the standards of the medical community.
- A provider shall not use medication as punishment, for the convenience of the staff, or as a substitute for other appropriate treatment.
- A provider shall review the administration of a psychotropic medication periodically as set forth in the individual's IICSP and based upon the individual's clinical status.
- If an individual cannot administer their own medication, a provider shall ensure that medication is administered by or under the supervision of personnel who are qualified and trained.
- A provider shall record the administration of all medication in the individual's record. The ICO may do this electronically or via paper format, but the records must be readily available if requested by MDHHS.
- A provider shall ensure that medication errors and adverse drug reactions are immediately and properly reported to a physician and recorded in the individual's record.

ECLS cannot be provided in circumstances where they would be a duplication of services available through MI Health Link. The distinction must be apparent by unique hours and units in the approved IICSP.

ECLS may be furnished outside the individual's home.

The individual oversees and supervises individual providers on an on-going basis when participating in arrangements that support self-determination. This may also include transportation to allow people to get out into the community when it is incidental to the IICSP. When transportation incidental to the provision of ECLS is included, the ICO shall not also authorize transportation as a separate waiver service for the individual.

Members of an individual's family may provide ECLS to the individual. However, the ICO shall not directly authorize funds to pay for services furnished to an individual by that person's spouse or legal guardian or other financially responsible person. Family members who provide this service must meet the same standards as providers who are unrelated to the individual. Roommates or other individuals who live with the individual may provide ECLS services, but payment for services must be pro-rated by one-half if the service will also benefit the person performing the service (i.e., meal preparation, laundry, housecleaning, etc.). Paid ECLS services are only for the benefit of the individual receiving the services.

Michigan Department of Health and Human Services
Medicaid Provider Manual

In shared living arrangements where there is more than one person in the home receiving the service by the same caregiver, payment for services must be based on a pro-rated percentage/fraction relative to the care each person receives. When services can be clearly documented separately from other individuals in the home, payment need not be pro-rated. Providers must be trained to perform each required task prior to service delivery. The supervisor must ensure the provider can competently and confidently perform each assigned task.

With the assistance of the individual and/or individual's caregiver, the ICO or direct service provider shall determine an emergency notification plan for each individual, pursuant to each visit for emergencies and provider no-shows or late arrivals.

ECLS does not include the cost associated with room and board. ECLS also excludes nursing and skilled therapy services.

ECLS provided in a licensed setting includes only those supports and services that are in addition to, and shall not replace, usual and customary care furnished to residents in the licensed setting. Documentation in the individual's record must clearly identify the individual's need for additional supports and services not covered by licensure. The IICSP must clearly identify the portion of the individual's supports and services covered by ECLS. The setting must comply with the requirements of the Home and Community-Based Services (HCBS) Final Rule as described in the Home and Community-Based Residential and Non-Residential Settings subsection.

5.3.H. FISCAL INTERMEDIARY

Fiscal Intermediary (FI) services assist the individual to live independently in the community while controlling their individual budget and choosing the staff to work with them. The FI helps the individual to manage and distribute funds contained in the individual budget. The individual uses funds to purchase home and community based services authorized in the IICSP. FI services include, but are not limited to, the facilitation of the employment of service workers by the individual, including federal, state, and local tax withholding/payments, unemployment compensation fees, wage settlements; fiscal accounting; tracking and monitoring individual-directed budget expenditures and identify potential over and under expenditures; ensuring compliance with documentation requirements related to management of public funds. The FI helps the individual manage and distribute funds contained in the individual budget. The FI also assists with training the individual and providers, as necessary, in tasks related to the duties of the FI including, but not limited to, billing processes and documentation requirements.

FI services are available only to individuals participating in arrangements that support self-determination. Additionally, FI services may not be provided by the individual's family, guardian, or providers of other services for the same individual. The ICO and fiscal intermediary must abide by the Self-Determination Implementation Technical Advisory and any other requirements provided by MDHHS. FI services through the MI Health Link HCBS waiver must only be used for MI Health Link HCBS services as identified in the CMS-approved 1915(c) waiver application.

Michigan Department of Health and Human Services

Medicaid Provider Manual

Each FI must:

- Be bonded and insured. The insured amount must exceed the total budgetary amount the FI is responsible for administering.
- Demonstrate the ability to manage budgets and perform all functions of the FI including all activities related to employment taxation, worker's compensation, and state, local, and federal regulations.
- Demonstrate competence in managing budgets and performing other functions and responsibilities of a fiscal intermediary.
- Provide four basic areas of performance:
 - Function as the employer agency for individuals directly employing workers to ensure compliance with payroll tax and insurance requirements;
 - Ensure compliance with requirements related to management of public funds, the direct employment of workers by individuals, and contracting for other authorized supports and services;
 - Facilitate successful implementation of the self-determination arrangements by monitoring the use of the budget and providing monthly budget status reports to each individual and ICO; and
 - Offer supportive services to enable individuals to self-determine and direct the supports and services they need.

5.3.I. HOME DELIVERED MEALS

This service is the provision of one to two nutritious meals per day to individuals who are unable to care for their nutritional needs. This service must include and prioritize healthy meal choices that meet any established criteria under state or federal law. Meal options must meet individual preferences in relation to specific food items, portion size, dietary needs, and cultural and/or religious preferences. ICOs must follow the minimum operating standards for this service as well as ensure provider qualifications as provided by MDHHS are met prior to delivery of services and annually thereafter.

Each ICO must have written eligibility criteria for persons receiving home delivered meals through the waiver which include, at a minimum:

- The individual must be unable to obtain food or prepare complete meals.
- The individual does not have an adult living at the same residence or in the vicinity that is able and willing to prepare all meals.
- The individual does not have a paid caregiver that is able and willing to prepare meals for the individual.
- The provider can appropriately meet the individual's special dietary needs, and the meals available would not jeopardize the health of the individual.
- The individual must agree to be home when meals are delivered. For any unavoidable absence, the provider or ICO must be contacted. If the ICO is contacted, they must contact the provider.

Michigan Department of Health and Human Services

Medicaid Provider Manual

If the individual has an exposure or condition for which a federal, state, or local public health or government official(s) has released applicable quarantine or isolation guidelines, home delivered meals may be left at the enrollee's door in lieu of in-person during the quarantine or isolation period only. Approval of door drop-off must be reflected on the individual's integrated care and support plan.

Meal Delivery Kit providers are an acceptable provider of Home Delivered Meals in addition to traditional Home Delivered Meal Agencies.

5.3.J. NON-MEDICAL TRANSPORTATION

This service is offered to enable individuals to gain access to waiver and other community services, activities, and resources, specified by the Individual Integrated Care and Supports Plan (IICSP). Whenever possible, the ICO shall utilize family, neighbors, friends, or community agencies that can provide this service free of charge. Need for this service and details as to whom and how it will be provided should be discussed in the person-centered planning meeting and documented in the IICSP.

Direct service providers shall be a centrally organized transportation company or agency. Transportation may be provided by any of the following methods:

- Demand/Response: Characterized by scheduling of small vehicles to provide door-to-door or curb-to-curb service on demand. The provider may include a passenger assistance component and either or both of the following variations:
 - Route Deviation Variation: A normally fixed-route vehicle leaves the scheduled route upon request to pick up the individual.
 - Flexible Routing Variation: Providers constantly modify routes to accommodate service requests.
- Public Transit: Characterized by partial or full payment of the cost for an individual to use an available public transit system. (This can be either a fixed route or demand/response). The provider may include a passenger assistance component.
- Volunteer: Characterized by reimbursement of out-of-pocket expenses for individuals who transport individuals in their private vehicles. The provider may include a passenger assistance component.
- Ambu-cab: Characterized by a wheelchair-equipped van to provide door-to-door service on demand. The provider shall include a passenger assistance component.

Transportation vehicles must be properly licensed and registered by the State and must be covered with liability insurance. MI Health Link funds may not be used to purchase or lease vehicles for providing transportation services to waiver individuals. All paid drivers for transportation providers supported entirely or in part by MI Health Link funds shall be physically capable and willing to assist persons requiring help to and from and to get in and out of vehicles. The provider shall offer such assistance unless expressly prohibited by either a labor contract or insurance policy. The provider shall train all paid drivers for transportation programs supported entirely or in part by waiver funds to cope with

Michigan Department of Health and Human Services

Medicaid Provider Manual

medical emergencies, unless expressly prohibited by a labor contract or insurance policy. Each provider shall operate in compliance with P.A. 1 of 1985 regarding seat belt usage.

MI Health Link funds shall not be used to reimburse caregivers (paid or informal) to run errands for individuals when the individual does not accompany the driver of the vehicle.

5.3.K. PERSONAL EMERGENCY RESPONSE SYSTEM

For the definition of the Personal Emergency Response System (PERS) definition, refer to Personal Emergency Response System in the Supplemental Services subsection.

5.3.L. PREVENTIVE NURSING SERVICES

Preventive Nursing Services are covered on a part-time, intermittent (separated intervals of time) basis for an individual who generally requires nursing services for the management of a chronic illness or physical disorder in the individual's home and are provided by a RN or a licensed practical nurse (LPN) under the supervision of a RN. Nursing services are for individuals who require more periodic or intermittent nursing than otherwise available for the purpose of preventive interventions to reduce the occurrence of adverse outcomes for the individual such as hospitalizations and nursing facility admissions. An individual using this service must demonstrate a need for observation and evaluation.

When the individual's condition is unstable, could easily deteriorate, or when significant changes occur, the ICO covers nurse visits for observation and evaluation. The purpose of the observation and evaluation is to monitor the individual's condition and report findings to the individual's physician or other appropriate health care professional such as the ICO Care Coordinator to prevent additional decline, illness, or injury to the individual. The ICO Care Coordinator shall communicate with both the nurse providing this service and the individual's health care professional to ensure the nursing needs of the individual are being addressed.

Individuals must meet at least one of the following criteria to qualify for this service:

- Be at high risk of developing skin ulcers, or have a history of resolved skin ulcers that could easily redevelop.
- Require professional monitoring of vital signs when changes may indicate the need for modifications to the medication regimen.
- Require professional monitoring or oversight of blood sugar levels, including individual-recorded blood sugar levels, to assist with effective pre-diabetes or diabetes management.
- Require professional assessment of the individual's cognitive status or alertness and orientation to encourage optimal cognitive status and mental function or identify the need for modifications to the medication regimen.
- Require professional evaluation of the individual's success with a prescribed exercise routine to ensure its effectiveness and identify the need for additional instruction or modifications when necessary.

Michigan Department of Health and Human Services

Medicaid Provider Manual

- Require professional evaluation of the individual's physical status to encourage optimal functioning and discourage adverse outcomes.
- Have a condition that is unstable, could easily deteriorate, or experience significant changes AND a lack of competent informal supports able to readily report life-threatening changes to the individual's physician or other health care professional.

In addition to observation and evaluation, a nursing visit may also include, but is not limited to, one or more of the following nursing services:

- Administering prescribed medications that cannot be self-administered (as defined under Michigan Compiled Law (MCL) 333.7103(1)).
- Setting up medications according to physician orders.
- Monitoring individual adherence to their medication regimen.
- Applying dressings that require prescribed medications and aseptic techniques.
- Providing refresher training to the individual or informal caregivers to ensure the use of proper techniques for health-related tasks such as diet, exercise regimens, body positioning, taking medications according to physician's orders, proper use of medical equipment, performing ADL, or safe ambulation within the home.

This service is limited to **no more than two hours per visit**.

Individuals receiving Private Duty Nursing services are not eligible to receive Preventive Nursing Services.

All providers must be licensed in the State of Michigan as a RN or LPN.

5.3.M. PRIVATE DUTY NURSING

Private Duty Nursing (PDN) services are skilled nursing interventions provided to an individual age 21 or older on an individual and continuous basis, **up to a maximum of 16 hours per day**, to meet the individual's health needs directly related to the individual's physical disability.

Medical Criteria

To be eligible for PDN services, the ICO must find the individual meets either Medical Criteria I or Medical Criteria II, and Medical Criteria III (see criteria below). Regardless of whether the individual meets Medical Criteria I or II, the individual must also meet Medical Criteria III.

- **Medical Criteria I** – The individual is dependent daily on technology-based medical equipment to sustain life. "Dependent daily on technology-based medical equipment" means:
 - Mechanical rate-dependent ventilation (four or more hours per day), or assisted rate dependent respiration (e.g., some models of Bi-PAP); or

Michigan Department of Health and Human Services
Medicaid Provider Manual

- Deep oral (past the tonsils) or tracheostomy suctioning eight or more times in a 24-hour period; or
 - Nasogastric tube feedings or medications when removal and insertion of the nasogastric tube is required, associated with complex medical problems or medical fragility; or
 - Total parenteral nutrition (TPN) delivered via a central line, associated with complex medical problems or medical fragility; or
 - Continuous oxygen administration (eight or more hours per day), in combination with a pulse oximeter and a documented need for skilled nursing assessment, judgment, and intervention in the rate of oxygen administration. This would not be met if oxygen adjustment is done only according to a written protocol with no skilled assessment, judgment or intervention required. Continuous use of oxygen therapy is a covered Medicaid benefit for individuals 21 years of age or older when tested at rest while breathing room air and the oxygen saturation rate is 88 percent or below, or the PO₂ level is 55 mm HG or below.
- **Medical Criteria II** – Frequent episodes of medical instability within the past three to six months, requiring skilled nursing assessments, judgments, or interventions (as described in III below) as a result of a substantiated medical condition directly related to the physical disorder. Definitions:
- "Frequent" means at least 12 episodes of medical instability related to the progressively debilitating physical disorder within the past six months, or at least six episodes of medical instability related to the progressively debilitating physical disorder within the past three months.
 - "Medical instability" means emergency medical treatment in a hospital emergency room or inpatient hospitalization related to the underlying progressively debilitating physical disorder.
 - "Emergency medical treatment" means covered inpatient and outpatient services that are furnished by a provider that is qualified to furnish such services and are needed to evaluate or stabilize an emergency medical condition.
 - "Emergency medical condition" means a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain) such that a prudent layperson who possesses an average knowledge of health and medicine could reasonably expect the absence of immediate medical attention would result in placing the health of the individual in serious jeopardy, serious impairment to bodily functions, or serious dysfunction of any bodily organ or part.
 - "Directly related to the physical disorder" means an illness, diagnosis, physical impairment, or syndrome that is likely to continue indefinitely, and results in significant functional limitations in three or more ADL.
 - "Substantiated" means documented in the clinical or medical record, including the nursing notes.

Michigan Department of Health and Human Services
Medicaid Provider Manual

- **Medical Criteria III** – The individual requires continuous skilled nursing care on a daily basis during the time when a licensed nurse is paid to provide services. Definitions:
 - "Continuous" means at least once every three hours throughout a 24-hour period, and when delayed interventions may result in further deterioration of health status, in loss of function or death, in acceleration of the chronic condition, or in a preventable acute episode. Equipment needs alone do not create the need for skilled nursing services.
 - "Skilled nursing" means assessments, judgments, interventions, and evaluations of interventions requiring the education, training, and experience of a licensed nurse. Skilled nursing care includes, but is not limited to:
 - ◆ Performing assessments to determine the basis for acting or a need for action, and documentation to support the frequency and scope of those decisions or actions;
 - ◆ Managing mechanical rate-dependent ventilation or assisted rate-dependent respiration (e.g., some models of Bi-PAP) that is required by the individual four or more hours per day;
 - ◆ Deep oral (past the tonsils) or tracheostomy suctioning;
 - ◆ Injections when there is a regular or predicted schedule, or injections that are required as the situation demands (prn), but at least once per month (insulin administration is not considered a skilled nursing intervention);
 - ◆ Nasogastric tube feedings or medications when removal and insertion of the nasogastric tube is required, or is associated with complex medical problems or medical fragility;
 - ◆ TPN delivered via a central line and care of the central line;
 - ◆ Continuous oxygen administration (eight or more hours per day), in combination with a pulse oximeter, and a documented need for adjustments in the rate of oxygen administration requiring skilled nursing assessments, judgments and interventions. This would not be met if oxygen adjustment is done only according to a written protocol with no skilled assessment, judgment or intervention required. Continuous use of oxygen therapy is a covered Medicaid benefit for beneficiaries age 21 or older when tested at rest while breathing room air and the oxygen saturation rate is 88 percent or below, or the PO₂ level is 55 mm HG or below;
 - ◆ Monitoring fluid and electrolyte balances where imbalances may occur rapidly due to complex medical problems or medical fragility. Monitoring by a skilled nurse would include maintaining strict intake and output, monitoring skin for edema or dehydration, and watching for cardiac and respiratory signs and symptoms. Taking routine blood pressure and pulse once per shift that does not require any skilled assessment, judgment or intervention at least once every three hours during a 24-hour period, as documented in the nursing notes, would not be considered skilled nursing.

Michigan Department of Health and Human Services

Medicaid Provider Manual

All nurses providing PDN to waiver individuals must maintain a current State of Michigan nursing license, and meet licensure requirements and standards according to Michigan laws found under MCL 333.17201-17242. PDN may include medication administration according to MCL 333.7103(1).

This service must be ordered by a physician, physician's assistant, clinical nurse specialist, or nurse practitioner. The ICO is responsible for ensuring there is a physician order for the PDN services authorized. The physician may issue this order directly to the provider furnishing PDN services. However, the ICO is responsible for ensuring the PDN provider has a copy of these orders and delivers PDN services according to the orders. The ICO shall maintain a copy of the physician orders in the Care Bridge Record. The individual's physician, physician's assistant, clinical nurse specialist, or nurse practitioner must order PDN services and work in conjunction with the ICO and provider agency to ensure services are delivered according to that order.

Through a person-centered planning process, the ICO shall determine the amount, scope and duration of services provided. The direct service provider shall maintain close contact with the authorizing ICO to promptly report changes in each individual's condition and/or treatment needs upon observation of such changes. The direct service provider shall send case notes to the care coordinator on a regular basis, preferably monthly, but no less than quarterly, to update the care coordinator on the condition of the individual.

Individuals receiving Preventive Nursing Services are not eligible to receive PDN services.

All PDN services authorized must be medically necessary as indicated through the assessment and meet the medical criteria described above.

5.3.N. RESPITE

5.3.N.1. RESPITE PROVIDED AT THE INDIVIDUAL'S HOME OR IN THE HOME OF ANOTHER PERSON

Respite services are provided on a short-term, intermittent basis to relieve the individual's family or other primary caregiver(s) from daily stress and care demands during times when they are providing unpaid care. Relief needs of hourly or shift staff workers should be accommodated by staffing substitutions, plan adjustments, or location changes and not by respite care.

Respite services include:

- Attendant care (individual is not bed-bound), such as companionship, supervision, and/or assistance with toileting, eating, and ambulation.
- Basic care (individual may or may not be bed-bound), such as assistance with ADLs, a routine exercise regimen, and self-medication.

Members of an individual's family who are not the individual's regular caregiver may provide respite for the regular caregiver. However, the ICO shall not authorize funds to pay for services furnished to an individual by that person's spouse. Family members who

provide respite services must meet the same standards as providers who are unrelated to the individual.

Respite services cannot be scheduled on a long term daily basis. Respite should be used on an intermittent basis to provide scheduled relief of informal caregivers. Respite is not intended to be provided on a continuous, long-term basis where it is a part of daily services that would enable an unpaid caregiver to work elsewhere full time. The costs of room and board are not included in payment for respite services.

5.3.N.2. RESPITE PROVIDED OUTSIDE OF THE HOME

Respite care services are provided on a short-term, intermittent basis to relieve the individual's family or other primary caregiver(s) from daily stress and care demands during times when they are providing unpaid care. Relief needs of hourly or shift staff workers should be accommodated by staffing substitutions, plan adjustments, or location changes and not by respite care.

Each out of home respite service provider must be a licensed group home as defined in MCL 400.701ff, which includes AFC homes and HFA. Respite may include the cost of room and board if the service is provided in a licensed AFC or licensed HFA.

Respite services include:

- Attendant care (individual is not bed-bound), such as companionship, supervision and/or assistance with toileting, eating, and ambulation.
- Basic care (individual may or may not be bed-bound), such as assistance with ADLs, a routine exercise regimen, and self-medication.

Out of home respite may be scheduled for several days in a row, depending upon the needs of the individual and the individual's caregivers.

5.4 HOSPICE

Effective November 1, 2016, individuals enrolled in the MI Health Link program who elect hospice services may remain enrolled in the MI Health Link program if they choose.

When a MI Health Link beneficiary elects hospice services, the hospice agency must notify the beneficiary's Integrated Care Organization (ICO) for initiation of care management and authorization of nursing facility room and board, if indicated. The hospice agency will bill Medicare for hospice services and other Medicare Part A and Part B services not related to the terminal illness and bill the ICO for room and board when hospice is rendered in a nursing home setting.

A beneficiary has the option of disenrolling from MI Health Link at any time by contacting Michigan's contracted enrollment broker. During the month when disenrollment occurs, the beneficiary will remain with MI Health Link until the first day of the following month, at which time Fee-for-Service (FFS) Medicaid will become effective. Hospice agencies will need to monitor MI Health Link beneficiary enrollment status.

SECTION 6 – CONTINUITY OF CARE

Individuals enrolled in the MI Health Link program must maintain their current Medicare and Medicaid providers, supports and services for the following timeframes after enrollment: Individuals have the right to continue to see providers who are not in the ICO's network during the Continuity of Care period. Communication between the individual, providers, and the ICO is essential to ensure providers are identified so services can be provided and covered by the ICO. The ICO must work to bring individuals' current providers into the plan's network.

ICO Transition Requirement for Individuals receiving services through the HAB waiver and Managed Specialty Services and Supports Program through the PIHPs	
Provider Type	Timeframe for continuing current services
Physician/Other Practitioners	Maintain current provider at the time of enrollment for 180 calendar days. (ICO must honor existing plans of care and prior authorizations (PAs) until the authorization ends or 180 calendar days from enrollment, whichever is sooner).
DME	Must honor PAs when item has not been delivered and must review ongoing PAs for medical necessity.
Scheduled Surgeries	Must honor specified provider and PAs for surgeries scheduled within 180 calendar days of enrollment.
Chemotherapy/Radiation	Treatment initiated prior to Enrollment must be authorized through the course of treatment with the specified provider.
Organ, Bone Marrow, Hematopoietic Stem Cell Transplant	Must honor specified provider, PAs and plans of care.
Dialysis Treatment	Maintain current level of service and same provider at the time of enrollment for 180 calendar days.
Vision and Dental	Must honor PAs when an item has not been delivered.
Medicaid Home Health	Maintain current level of service and same provider at the time of enrollment for 180 calendar days.
State Plan Personal Care	Maintain current provider and level of services at the time of enrollment for 180 calendar days. The IICSP must be reviewed and updated and providers secured within 180 calendar days of enrollment.

Michigan Department of Health and Human Services
Medicaid Provider Manual

ICO Transition Requirements for All Other Individuals	
Provider Type	Timeframe for continuing current services
Physician/Other Practitioners	Maintain current provider at the time of Enrollment for 90 calendar days. (ICO must honor existing plans of care and prior authorizations (PAs) until the authorization ends or 180 calendar days from enrollment, whichever is sooner).
DME	Must honor PAs when item has not been delivered and must review ongoing PAs for medical necessity.
Scheduled Surgeries	Must honor specified provider and PAs for surgeries scheduled within 180 calendar days of enrollment.
Chemotherapy/Radiation	Treatment initiated prior to enrollment must be authorized through the course of treatment with the specified provider.
Organ, Bone Marrow, Hematopoietic Stem Cell Transplant	Must honor specified provider, PAs and plans of care.
Dialysis Treatment	Maintain current level of service and same provider at the time of enrollment for 180 calendar days.
Vision and Dental	Must honor PAs when an item has not been delivered.
Medicaid Home Health	Maintain current level of service and same provider at the time of enrollment for 90 calendar days.
Medicaid Nursing Facility Services	Individual may remain at the facility through contract with the ICO or via single case agreements or on an out-of-network basis for the duration of the Demonstration or until the individual chooses to relocate.
Waiver Services	MI Choice HCBS waiver individuals: Maintain current providers and level of services at the time of enrollment for 90 calendar days unless changed during the Person-Centered Planning Process. Not applicable to other individuals.
State Plan Personal Care	Maintain current provider and level of services at the time of enrollment for 90 calendar days. The Individual IICSP must be reviewed and updated and providers secured within 90 calendar days of Enrollment. Not applicable for individuals transitioning from the MI Choice program.

The ICO is required to review Medicare and Medicaid utilization data provided by CMS and MDHHS to determine which providers have existing relationships with individuals. Continuity of care protection is automatic for providers which are verified through utilization data to meet the prior relationship requirement.

Michigan Department of Health and Human Services

Medicaid Provider Manual

The individual must have a relationship with a provider to establish continuity of care. A relationship is deemed to exist in the following circumstances:

- **Specialists:** The individual must have seen the specialist at least once within the 12 months prior to enrollment into a ICO for a nonemergency visit.
- **Primary Care Provider:** The individual must have seen the primary care provider at least twice within the 12 months prior to enrollment into a ICO for a non-emergency visit.
- **Other Covered Providers:** The individual must have received services from other providers within the past 12 months prior to enrollment into a ICO.

If the ICO cannot determine if a relationship exists based on the available data, the ICO shall ask the provider and individual to provide documentation of the visit from the medical record or proof of payment to establish the relationship. An attestation that a relationship exists is not sufficient.

The ICO must ask the individual about any upcoming appointments to ensure agreements are in place with out-of-network providers. If data is not available to establish relationship with the individual's provider, the individual or their appointed/legal representative may request continuity of care. The individual's out-of-network provider may also request continuity of care on behalf of the individual. Requests for continuity of care should be made by contacting the ICO's member services department or the individual's ICO Care Coordinator. Requests can be made verbally or in writing. When requesting continuity of care, the name of the provider, contact person, phone number, service type and appointment date, if applicable, should be shared with the ICO.

Generally, ICOs must start processing a request for continuity of care within five working days after the request is received. The ICO has a maximum of 30 days to complete the request. However, if the individual's medical condition requires more immediate attention (e.g., an upcoming appointment); the ICO must complete the request within 15 days. If there is a risk of harm to the individual or rescheduling of the appointment would be required, the request must be completed within three days of the request. The ICO may verbally convey Continuity of Care approval with the requester and record such approval in the individual's record.

If the criteria for the prior relationship as outlined above are satisfied, an out-of-network provider can be reimbursed retroactively for services provided without an approved continuity of care request as long as the provider submits the request for payment within 30 days of the first date of service.

The ICO must cover services during the continuity of care period for providers that do not have documented quality of care concerns that would cause the ICO to exclude the provider based on state or federal requirements.

Pharmacy

ICOs are required to maintain current prescriptions for medications for 180 days if medications are not on the ICO's formulary unless directed otherwise by CMS and MDHHS. The individual can ask the ICO to make an exception to cover a drug that is not on the ICO's formulary.

Michigan Department of Health and Human Services **Medicaid Provider Manual**

Nursing Facilities

Out-of-network nursing facilities must be offered Single Case Agreements by the ICO to continue to care for the individual through the life of the program if the nursing facility does not participate in the ICO's network and the individual: 1) resides in the nursing facility at the time of enrollment; 2) has a family member or spouse that resides in the nursing facility; or 3) requires nursing facility care and resides in a retirement community that includes a nursing facility. This continuity of care protection is available as long as the individual resides in the nursing facility. Continuity of care in a nursing facility is automatic. The individual does not have to make a request for continuity of care. The ICO must refill prescriptions for individuals in a nursing facility for a minimum of 91 days and the ICO must refill the drug multiple times during the first 90 days of enrollment, as needed. This allows the prescriber time to change the drugs to those on the drug list or ask for an exception.

Personal Care Providers

The ICO must allow choice of personal care service providers, including non-financially responsible family members or friends, to provide the service if they meet the criteria to enroll in the ICO's network.

The ICO may enter into an agreement for non-agency personal care providers when a permissible exclusion is identified through a background check. The ICO may allow for this exclusion if the individual is informed of the details of the permissible exclusion and agrees, in writing, to allow the person to provide personal care to the individual during the continuity of care period. During this time period, the individual can seek alternatives to receiving personal care services if the ICO does not continue the agreement beyond the required continuity of care period.

Under no circumstance must the ICO enter into an agreement if it is discovered the personal care services provider falls under the policy for mandatory exclusion from providing personal care services.

Other Providers

Continuity of care does not extend to DME providers or ancillary service providers (e.g. suppliers of medical supplies or laboratories). Although continuity of care does not extend to these types of providers, the ICO must still provide continuity of care for services and the ICO is responsible for finding an in-network provider to deliver services without disruption.

SECTION 7 – CARE COORDINATION, ASSESSMENT AND PERSON-CENTERED PLANNING

The MI Health Link program requires coordination of services for all individuals to ensure effective integration and coordination between providers of medical services and supplies, BH, SUD and/or I/DD, pharmacy, and LTSS. This requires coordination between the ICO and the Pre-paid Inpatient Health Plan (PIHP) or the LTSS entities, where applicable. The ICO shall contract with the PIHP to deliver Medicare BH, SUD and/or I/DD services to individuals. This contract and any other downstream contracts related to care coordination activities will be monitored by the CMS and MDHHS contract management team to ensure all delivery system requirements of MI Health Link are met and all individuals receive the appropriate care coordination services. To accomplish this, the ICO must:

- Develop and implement a strategy that uses a combination of initial screenings, assessments, referrals, administrative claims data, and other available information to help prioritize and determine the care coordination needs of each individual.
- Focus on providing services in the most integrated and least restrictive setting.
- Maintain flexibility to use innovative care delivery models and to provide a range of community-based services as a way to promote independent living and alternatives to high-cost institutionally based services.
- Exhaust the use of community-based services before utilizing institutional settings for LTSS.
- Wherever possible, include a person familiar with the needs, circumstances and preferences of the individual when the individual is unable to participate fully in or report accurately to the Integrated Care Team (ICT).
- Ensure that the individual has a primary care provider (PCP) appropriate to meet their needs and assist the individual in accessing services.

7.1 THE CARE BRIDGE

The care coordination model for MI Health Link is the Care Bridge, which includes both technology and people through the person-centered planning process. The ICO is required to utilize a care coordination platform supported by web-based technology that is discussed in this section and referred to as the Care Bridge.

The Care Bridge allows secure access to information and enables all individuals and members of the ICT to use and (where appropriate) update information. Through the electronic Care Bridge, the members of the individual's ICT facilitate access to formal and informal supports and services identified in the individual's Individual Integrated Care and Supports Plan (IICSP) developed through a Person-Centered Planning process.

The Care Bridge includes an electronic care coordination platform which will support an Integrated Care Bridge Record (ICBR) to facilitate timely and effective information flow between the members of the ICT. The electronic Care Coordination platform will include a mechanism to alert ICT members of emergency department use or inpatient admissions. The ICBR will allow ICO Care Coordinators, PIHP and LTSS coordinators, where applicable, and providers to post key updates and notify ICT members of changes.

This platform will be compliant with the Health Insurance Portability and Accountability Act of 1996 (HIPAA) and other relevant laws, and provide for the exchange of data in a standard format.

Michigan Department of Health and Human Services

Medicaid Provider Manual

The approved electronic care coordination platform will generate and maintain an individualized individual record referred to as ICBR including:

- Current integrated condition list;
- Contact information for the ICO Care Coordinator and ICT members;
- Current medications list;
- The date of service and the name of the provider for the most recently provided services;
- Historical and current utilization and claims information;
- Historic Medicaid and Medicare utilization data: MDHHS will provide the ICO with access to the CareConnect360 (CC360) system to view and extract historic utilization data.
- MDHHS will initially provide the ICO with extract files containing historical data for all individuals for the previous 24 months. Updates thereafter are available on a monthly basis or by the frequency identified by the ICO.
- Initial screening, Assessments (Level I and Level II), nursing facility LOCD and Personal Care Assessment results;
- Service outcomes, including specialty provider reports, lab results, and emergency room visits;
- IICSP; and
- Notes and correspondence across provider settings.

7.2 HEALTH PROMOTION AND WELLNESS ACTIVITIES

The ICO must provide a range of health promotion and wellness informational activities for individuals, their family members, and other informal caregivers. The focus and content of this information must be relevant to the specific health status needs and high-risk behavior in the Medicare-Medicaid population. Interpreter services must be available for individuals who are not proficient in English. Examples of health promotion and wellness topics include, but are not limited to, the following:

- Chronic condition self-management;
- Smoking cessation;
- Nutrition; and,
- Prevention and treatment of alcohol and substance abuse.

7.3 INTEGRATED CARE TEAM (ICT)

Every individual shall have access to and input in the development of an ICT to ensure the integration of all the individual's supports and services, including medical, behavioral, psychosocial, and LTSS. The ICT will be person-centered, respecting and incorporating the individual's specific preferences and needs. The ICT will deliver services with transparency, individualization, accessibility, respect, linguistic and cultural competence, and dignity. The ICT will honor the individual's choice about their level of participation and interaction with the ICT. This choice will be periodically revisited with the individual by the ICO Care Coordinator.

7.3.A. INTEGRATED CARE TEAM MEMBERS

The ICO Care Coordinator will lead the ICT. It will be the responsibility of the ICO Care Coordinator to set and lead ICT meetings as well as facilitate communication among ICT members. LTSS and PIHP Supports Coordinators will be members of ICTs (as applicable) to encourage communication and collaboration between ICOs, PIHPs and other providers. While the ICO Care Coordinator will be the ICT lead, the individual may request the LTSS or PIHP Supports Coordinator remain their main point of contact regarding the ICT.

ICT membership will include the individual and the individual's chosen allies, ICO Care Coordinator, primary care physician, and LTSS Supports Coordinator or PIHP Supports Coordinator (as applicable). Additional membership on the ICT may vary at each meeting depending on the changing needs of the individual. PCPs may designate a licensed medical professional on their staff who has personal knowledge of the enrollee's condition(s) and health care needs to attend in place of the PCP. The ICT may also include the following persons as needed and available:

- Family caregivers and natural supports
- Primary care nurse care manager
- Specialty providers
- Personal care providers
- Hospital discharge planner
- Nursing facility representative
- Others as appropriate

7.3.B. INTEGRATED CARE TEAM RESPONSIBILITIES

The role of ICT is to work collaboratively with the individual to meet goals identified in the IICSP and ensure the best possible health care outcomes. The ICO Care Coordinator is responsible to ensure the completion of tasks listed below for the ICT. ICT members will:

- Ensure the IICSP is developed, implemented, and revised according to the person-centered planning process and the individual's stated goals, including making whatever accommodations are appropriate for individuals whose disabilities create obstacles to full participation with the ICT.
- Participate in the Person-Centered Planning process at the individual's discretion to develop the IICSP;
- Collaborate with other ICT members to ensure the Person-Centered Planning process is maintained;
- Assist the individual in meeting their goals;
- Monitor and ensure that their part of the IICSP is implemented in order to meet the individual's goals;

Michigan Department of Health and Human Services **Medicaid Provider Manual**

- Update the ICBR as needed pertinent to the ICT member's role on the ICT;
- Review assessment, test results and other pertinent information in the ICBR;
- Address transitions of care when a change between care settings occur;
- Ensure continuity of care requirements are met; and
- Monitor for issues related to quality of care and quality of life.

The operations of ICTs will vary depending on the needs and preferences of the individual. An individual with extensive service needs may warrant periodic meetings with all ICT members. An individual with less intense needs may warrant fewer meetings with selected members of the ICT. Communication among the ICT members will be maintained by the ICO Care Coordinator and other direct communication with ICT members. The ICO Care Coordinator is responsible for facilitating communication among the ICT members.

The ICT will adhere to an individual's determination about the appropriate involvement of their medical providers and caregivers at each meeting according to HIPAA and, for individuals in SUD treatment, 42 CFR Part 2.

7.4 ICO CARE COORDINATOR

ICO Care Coordinators must have the experience, qualifications and training including MDHHS required training appropriate to the needs of the individual, and the ICO must establish policies for appropriate assignment of ICO Care Coordinators.

ICO Care Coordinators must have knowledge of physical health, aging and loss, appropriate support services in the community, frequently used medications and their potential negative side-effects, depression, challenging behaviors, Alzheimer's disease and other disease-related dementias, behavioral health, substance use disorder, physical and developmental disabilities, issues related to accessing and using durable medical equipment as appropriate, available community services and public benefits, quality ratings and information about available options such as nursing facilities, applicable legal non-discrimination requirements such as the ADA, person-centered planning, cultural competency, and elder abuse and neglect.

The ICO Care Coordinator must be a Michigan:

- Licensed registered nurse;
- Licensed clinical nurse specialist;
- Licensed nurse practitioner;
- Licensed physician's assistant;
- Limited license Bachelor's prepared social worker;
- Licensed Bachelor's prepared social worker;
- Limited license Master's prepared social worker; or
- Licensed Master's prepared social worker.

ICO Care Coordinator Training

The ICO Care Coordinator will participate in train-the-trainer Person-Centered Planning and Self-Determination educational opportunities offered by MDHHS. The ICO will be responsible for training any new ICO Care Coordinator staff. The ICO will report participation of its ICO Care Coordinators in the MDHHS and ICO trainings as required.

The ICO will participate, train and report on any other training required or offered by MDHHS or its designee.

ICO Care Coordinator Responsibilities

The ICO Care Coordinator will be responsible for care coordination for each individual. The ICO Care Coordinator will conduct the Level I Assessment, ensure the person-centered planning process is complete, prepare the IICSP, coordinate care transitions, and lead the ICT.

The ICO Care Coordinator will be responsible to:

- Support an on-going person-centered planning process;
- Assess clinical risk and needs by conducting an assessment process that includes an Initial Screening, a Level I Assessment, and completion of or referral for a Level II Assessment (as appropriate);
- Facilitate timely access to primary care, specialty care, LTSS, BH, SUD, and I/DD services, medications, and other health services needed by the individual, including referrals to address any physical or cognitive barriers or referrals to the PIHP;
- Create and maintain an ICBR for each individual to manage communication and information regarding referrals, transitions, and care delivery;
- Facilitate communication among the individual's providers through the use of the care coordination platform and other methods of communication including secure e-mail, fax, telephone, and written correspondence;
- Notify the ICT of the individual's hospitalization (psychiatric or acute), and coordinate a discharge plan if applicable;
- Facilitate face-to-face meetings, conference calls, and other activities of the ICT as needed or requested by the individual;
- Facilitate direct communication between the provider and the individual or the individual's authorized representative and/or family or informal supports as appropriate;
- Facilitate individual and family education;
- Coordinate and communicate, as applicable, with the PIHP Supports Coordinator and/or the LTSS Supports Coordinator to ensure timely, non-duplicative supports and services are provided;
- Develop, with the individual and ICT, following the person-centered planning process, an IICSP specific to individual needs and preferences, and monitor and update the IICSP at least annually or following a significant change in needs or other factors;
- Coordinate and make referrals to community resources (e.g., housing, home delivered meals, energy assistance programs) to meet IICSP goals;

Michigan Department of Health and Human Services

Medicaid Provider Manual

- Perform ongoing care coordination;
- Monitor the implementation of the IICSP with the individual, including facilitating the individual's evaluation of the process, progress and outcomes and identifying barriers and facilitate problem resolution and follow-up;
- Advocate with or on behalf of the individual, as needed, to ensure successful implementation of the IICSP;
- Support transitions in care when the individual moves between care settings including:
 - The ICO Care Coordinator will contact the individual once notified of an emergency room visit to review discharge orders, schedule follow-up appoints, review any medication changes, and evaluate the need for revising the IICSP to include additional supports and services to remain in or return to the community.
 - The ICO Care Coordinator will ensure immediate and continuous discharge planning, including electronic and verbal communication, with the individual and ICT members following an individual's admission to a hospital or nursing facility. Discharge planning will ensure that necessary care, supports and services are in place in the community for the individual when discharged. This includes scheduling an outpatient appointment, ensuring the individual has all necessary medications or prescriptions upon discharge, and conducting follow-up with the individual and/or caregiver.
 - The Care Coordinator shall make every effort to ensure that home and community based services are in place upon hospital discharge to avoid unnecessary nursing facility placements. The ICO Care Coordinator shall be able to arrange for expedited assessments and other mechanisms to ensure prompt initiation of appropriate HCBS. If the individual is being discharged from a nursing facility or hospital, the Care Coordinator shall coordinate efforts with the nursing facility social worker, discharge planner, or other staff to ensure a smooth transition.
 - Evaluating Section Q of the Minimum Data Set (MDS) for individuals currently in a nursing facility and discussing options for returning to the community, revising the IICSP, and transitioning the individual to the most integrated setting.
 - The ICO Care Coordinator will inform the individual of their right to live in the most integrated setting, inform the individual of the availability of services necessary to support their choices, and record the home and community-based options and settings considered by the individual.
 - Engage in other activities or services needed to assist the individual in optimizing their health status, including assisting with self-management skills or techniques; health education; referrals to support groups, services, and advocacy agencies, as appropriate; and other modalities to improve health status.
 - Ensure the Medicaid eligibility redetermination process is completed timely to prevent the loss of benefits.
 - If the individual is receiving services that require meeting the Michigan Medicaid Nursing Facility Level of Care Determination (LOCD) standards, ensure through required Level I and/or Level II assessments that the individual continues to meet the criteria or transitions to services that do not require LOCD standards. The ICO Care Coordinator will ensure appropriate assessments are conducted for individuals

Michigan Department of Health and Human Services
Medicaid Provider Manual

with identified long term care needs, and MDHHS will make final eligibility determinations, unless otherwise directed by the State and CMS.

Individual ICO Care Coordinator Assignments and Change Requests

- The ICO shall allow the individual or their authorized representative choice in ICO Care Coordinator.
- The ICO shall ensure every individual has an ICO Care Coordinator with the appropriate experience and qualifications based on the individual's assigned risk level and individual needs (e.g., communication, cognitive, or other barriers).
- The ICO must have a process to ensure that an individual or their authorized representative is able to request a change in their ICO Care Coordinator at any time, including a process for the transition from one ICO Care Coordinator to another.
- The ICO must establish policies for appropriate assignment of ICO Care Coordinators to align with the individual's known or expressed cultural, religious and ethnic preferences by considering the knowledge and experience of the ICO Care Coordinator.

7.5 COORDINATION WITH PIHP AND LTSS SUPPORTS COORDINATORS

The ICO Care Coordinator must collaborate with the applicable PIHP Supports Coordinator or identified behavioral health representative as defined in the contract between the ICO and the PIHP when:

- The individual has received services through a PIHP within the last 12 months, or
- A new individual requests, or is identified as having potential need for, BH, I/DD, or SUD services.

If the individual has need of LTSS, the ICO Care Coordinator will collaborate with the individual's chosen LTSS Supports Coordinator when:

- The individual has received LTSS within the last 12 months, or
- A new individual requests or is identified as having potential need for LTSS.

7.5.A. LTSS SUPPORTS COORDINATOR

LTSS Supports Coordinator will be offered to all individuals who have needs for long term supports and services. The LTSS Supports Coordinator must be a Michigan:

- Licensed registered nurse;
- Licensed clinical nurse specialist;
- Licensed nurse practitioner;
- Licensed physician's assistant;
- Limited license Bachelor's prepared social worker;
- Licensed Bachelor's prepared social worker;
- Limited license Master's prepared social worker; or

Michigan Department of Health and Human Services

Medicaid Provider Manual

- Licensed Master's prepared social worker.

The LTSS Supports Coordinator must:

- Have knowledge of HCBS;
- Have completed a person-centered planning and person-centered direction training;
- Be culturally competent;
- Be able to provide information regarding the quality ratings and licensure status, if applicable, of available options;
- Be knowledgeable about risk factors and indicators of, and resources to respond to, abuse and neglect;
- Be familiar with applicable long term care facility licensing requirements and resources such as the long term care ombudsman program; and
- Have experience conducting LTSS needs assessments.

LTSS Supports Coordinator Responsibilities

The ICO will be responsible to provide, directly or contractually, the following LTSS Supports Coordination services:

- Support an on-going person-centered planning process;
- Assist the individual to take a lead role in the person-centered planning process;
- Provide information to the individual and ICT;
- Communicate and collaborate with the PIHP when BH, SUD, or I/DD needs are identified in the Level I Assessment;
- Participate in the assessment process as needed, including conducting the Level II Assessment specific to the individual's needs;
- Participate on the individual's ICT;
- Develop, with the individual and the ICT, an IICSP;
- Ensure optimal utilization of information and community supports;
- Arrange services as identified in the IICSP;
- Update the ICBR with current individual status information to manage communication and information flow regarding referrals, transitions, and care delivery;
- Monitor service implementation, service outcomes, and the individual's satisfaction;
- Collaborate with the ICO Care Coordinator to assist the individual during transitions between care settings, including full consideration of all community options; and
- Advocate for the individual and support self-advocacy by the individual.

The ICO Care Coordinator may serve as the LTSS Supports Coordinator and complete the required functions of both roles.

7.6 ASSESSMENT TOOLS AND PROCESS

7.6.A. INDIVIDUAL STRATIFICATION

The ICO will develop and implement a strategy that uses a combination of initial screenings, assessments, assessment tools, functional assessments, referrals, administrative claims data, etc. to help prioritize and determine the level of care coordination needed by each individual.

The ICO must review program level data through CHAMPS and CareConnect360 or through file extracts provided by MDHHS as part of the initial screening process. CareConnect360 contains past Medicare and Medicaid utilization data from the MDHHS Data Warehouse. The ICO must review program level data and utilization data within 15 calendar days of enrollment.

Levels of stratification should be based on:

- Individual demographics, medical conditions, functional status, care patterns, resource utilization data.
- The individual's risk for long term care institutionalization or avoidable hospitalization.
- Individuals receiving services in the Habilitation Supports Waiver (HSW) or an individual transitioning to MI Health Link from the MI Choice waiver are automatically stratified as high risk.
- The ICO will determine the parameters and definitions for other individuals defined as high risk as well as definitions for low or moderate risk individuals.

The ICO may also choose to use existing predictive modeling software to support the screening and assessment requirements are not be required to do so.

7.6.B. INITIAL SCREENING

The purpose of the initial screening is to identify individuals with immediate needs in order to prioritize in-person Level I Assessments. The initial screening is a series of individual reported yes/no questions related to historical and current service usage. This screening is conducted via telephone when individuals call the enrollment broker to enroll in MI Health Link.

For those individuals passively enrolled into the ICO or those not completing the screen during the enrollment call, the ICO must make its best efforts to administer the initial screening within 15 calendar days of enrollment.

The ICO must document attempts in the ICBR to contact the individual for the purpose of scheduling or conducting the initial screening on different days of the week and at different times during the day, including times outside of standard work hours. If the initial contact is not made within 15 calendar days of enrollment, the ICO must continue efforts to contact the individual and document such in the ICBR.

Michigan Department of Health and Human Services

Medicaid Provider Manual

The ICO will review the individual's responses to the initial screening questions to identify current utilization of PIHP services, nursing facility care, community-based supports and services, and hospital care (inpatient or emergency room treatment).

The ICO must document the individual's responses to the initial screening questions in the ICBR.

7.6.C. LEVEL I ASSESSMENTS

Each individual must receive, and be an active participant in (to the extent they desire), a timely Level I Assessment of medical, behavioral health, psychosocial, and LTSS needs completed by the ICO Care Coordinator unless one of the following circumstances applies:

- An individual declines an assessment. Should that occur, the ICO will honor the individual's decision and will only contact the individual regarding an assessment if the individual requests one or a new assessment is needed according to the reassessment requirements.
- An individual is not reachable through the contact information provided by MDHHS or CMS. The ICO must document its attempts to reach the individual and what means of communication were used.
 - The ICO shall attempt to contact the individual at least five times within the first 60 days of enrollment. Attempts must be on different days of the week and at different times during the day, including times outside of standard work hours.
 - ICO shall use community resources where possible to identify and engage individuals.
- The ICO Care Coordinator will identify, through the Level I Assessment, individuals who may require institutional level of care or personal care services.
- The ICO will perform the Level I Assessment using its tool approved by MDHHS to assess each individual's current health, welfare, functional needs and risks.
- The ICO will use the DSM-5 screening tool as part of or in addition to its Level I Assessment tool to identify Individuals with BH, SUD, and/or I/DD needs.

The ICO Care Coordinator may complete the Level I Assessment in lieu of the initial screening if the Level I Assessment is completed within 15 calendar days of enrollment.

Level I Domains

Level I Assessment domains must include, but not be limited to, the following:

- Individual preferences, strengths, and goals including Self-Determination arrangements;
- Natural supports, including family and community caregiver capacity, and social strengths and needs;
- Communication needs, including hearing, vision, cultural and linguistic needs and preferences, and individual health literacy;

Michigan Department of Health and Human Services

Medicaid Provider Manual

- Current services, including those covered by Medicare and Medicaid, community supports, and care transition needs;
- Medical health risk, status, and history, including but not limited to medications (prescription, over-the-counter, and herbal supplements), frequent falls, and treatment for recurring urinary tract infections;
- BH and SUD risk status; BH, SUD, and I/DD history and needs, including medications;
- Nutritional strengths and needs;
- ADL and IADL, including any assistive technology used or needed and immediate environmental or housing needs;
- Cognitive strengths and needs;
- LTSS;
- Quality of life including physical, mental, and psycho-social well-being;
- Discussion and education related to abuse, neglect, and exploitation; and
- Advance Directives

The ICO may include State-approved domains as appropriate. Additional domains should be included in the ICO's Level I Assessment tool when submitting the tool for approval by MDHHS.

Involvement in the Level I Assessment

The Level I Assessment will be completed by the ICO Care Coordinator (see qualifications above) employed or contracted with the ICO who is accountable for providing Care Coordination services. The ICO may delegate through contract with entities or individuals meeting the Care Coordinator qualifications for performance of Initial Screenings, Level I Assessments and LTSS Level II Assessments, as well as Care Coordination functions. The ICO retains responsibility and accountability for utilization management functions, appeals, and approval of services. The Care Coordinator role cannot be delegated through contract or other means to Long Term Supports and Services providers who are otherwise responsible for providing services to individuals, such as nursing facilities.

- The ICO will include the appropriate PIHP or LTSS Supports Coordinator or nursing facility staff in conducting the Level I Assessment if the individual has been active in the PIHP or LTSS system during the previous 12 months or is currently residing in a nursing facility.
- Family members or other individuals may also be included in the Level I Assessment process to the extent desired by the individual.

Level I Results and Referral

The ICO will use the results of the Level I Assessment to confirm the appropriate acuity or risk stratification level for individual Care Coordinator assignments. The Level I Assessment and the DSM-5 screening tool for BH, SUD, I/DD, will be used to determine need for a Level II Assessment, referral for PIHP services, or development of the IICSP.

Michigan Department of Health and Human Services **Medicaid Provider Manual**

The ICO will make referrals according to the process identified in ICO/PIHP contract to the PIHP/BH system for individuals identified as having BH, SUD, and/or I/DD needs.

The PIHP will conduct in person or adopt current Level II Assessments for individuals identified as receiving services from the Habilitation Supports Waiver and/or the Specialty Services and Supports Program. The PIHP will conduct a telephonic screen using the MDHHS approved tool to determine:

- If the individual has mild to moderate needs that can be met through referral for additional services; or
- If the individual has needs that require the Level II Assessment.

The PIHP will coordinate service referrals to ICO or PIHP network providers or conduct further assessment as needed. The PIHP will document the results from the telephonic screen and referral in the ICBR.

The ICO Care Coordinator is responsible for ensuring completion of further assessment for individuals with medically complex conditions. The ICO will coordinate with the primary care provider to ensure that further follow-up relevant to these needs is provided to the individual.

The individual will continue to receive any services in any existing care plan prior to the Level I Assessment. The ICO will adhere to all transition requirements for services, as outlined in the Continuity of Care section and any other documentation provided by CMS or MDHHS.

Level I Assessments will be documented in the ICBR and results will be used in the development of the IICSP.

Timing of Level I Assessments

Level I Assessments will be completed within 60 calendar days of enrollment. ICOs approved by CMS and MDHHS to conduct early Level I Assessment may start the assessment no earlier than 20 days before the enrollment effective date. Early assessment does not impact the time frames for completing other assessments. Other Assessments cannot be completed before the enrollment effective date. Individuals identified with immediate needs or as having high risk should have Level I Assessments completed earlier than 60 calendar days from enrollment, as appropriate.

In-person Level I Assessments

The ICO Care Coordinator is encouraged to conduct the Level I Assessment in person. Individuals identified with immediate needs or as having high risk will have assessments completed in person.

Locating Individuals

The ICO shall identify individuals through referrals, transition information, service authorizations, alerts, memos, assessment results, and from families, caregivers, providers, community organizations and ICO personnel. The ICO shall notify the primary

care provider (PCP) of an individual who has not completed a Level I Assessment within the time period set forth above and whom the ICO has been unable to contact. The ICO shall encourage the PCPs to conduct outreach to these individuals and to schedule visits. The ICO shall collaborate with clinics, hospitals, or urgent care centers to identify individual contact information for individuals the ICO has not been able to contact.

7.6.D. TRIGGERS FROM THE LEVEL I ASSESSMENT

Michigan Medicaid Nursing Facility Level of Care Determination (LOCD)

The Michigan Medicaid Nursing Facility Level of Care Determination tool must be conducted for all individuals according to the Michigan Medicaid Nursing Facility Level of Care Determination requirements in the Medicaid policy (refer to the Nursing Facility Level of Care Determination Chapter of the Medicaid Provider Manual) and additional guidance provided by MDHHS. For the MI Health Link program only, the Nursing Facility Level of Care Frailty Review criteria will be applied at the time the LOCD is conducted for the individual if the individual does not meet LOCD criteria under Doors one through seven. Additionally, for the MI Health Link program, the LOCD must be conducted by a Care Coordinator holding a credential as described in the ICO Care Coordinator subsection of this chapter.

PIHP Telephonic Screen

The ICO shall refer individuals identified in the Level I screen as having BH, SUD or I/DD needs to the PIHP for additional assessment. Of this population, those individuals without a known history of PIHP services will receive a telephonic screen to determine service needs. The PIHP will determine if the individual has mild to moderate needs which can be addressed through additional assessment or referral to providers (PIHP or ICO). For all other individuals, the PIHP will complete the appropriate Level II assessment. The PIHP has flexibility to perform the telephonic screening function within the current intake system as long as identification of needs is completed using the prescribed tool.

7.6.E. LEVEL II ASSESSMENT

The ICO Care Coordinator will collaborate with the PIHP to ensure that the Level II Assessment is conducted for individuals identified through the telephonic screen as needing referral to the PIHP for Level II Assessment. The ICO Care Coordinator will ensure that the Level II Assessment is conducted for individuals demonstrating LTSS needs identified in the Level I Assessment.

Level II assessments must be completed using the tools approved by MDHHS.

Qualifications for Completing Level II Assessment

Level II Assessments will be conducted by professionally knowledgeable and trained LTSS Supports Coordinators or PIHP Supports Coordinators or behavioral health case managers, who have experience working with the population. Each Level II Assessment tool has specific qualifications for the person completing the tool.

Timing of Level II Assessments

Any Level II Assessment completed prior to enrollment by the PIHP Supports Coordinator, a trained LTSS Supports Coordinator or a behavioral health case manager may be adopted if it is not past the reassessment date. The Level II Assessment should be reviewed to determine if it is complete, accurate and appropriate for the individual's current status. Level II Assessments will be conducted in person within 15 calendar days of completion of the Level I Assessment. Level II Assessments will be documented in the ICBR and results will be used in the development of the IICSP.

7.6.F. REASSESSMENTS

7.6.F.1. LEVEL I REASSESSMENTS

The ICO is responsible to ensure that an annual Level I reassessment for each individual (including analysis of medical, LTSS, BH, and I/DD utilization data) is completed within 12 months of the last Level I Assessment. If prior to the annual reassessment, the individual experiences a major change impacting health status, the ICO is required to reassess the individual and review and revise the IICSP with members of the ICT as needed. The ICO must ensure that a reassessment and an IICSP update are performed:

- As warranted by the individual's condition but at least every 12 months after the Level I Assessment completion date;
- When there is a change in the individual's health status or needs; and
- As requested by the individual, their caregiver or authorized representative, or their provider.

The ICO will analyze utilization data of all individuals monthly to identify acuity and risk level changes. As acuity and risk levels change, reassessments will be completed as necessary and IICSP and interventions updated and documented in the ICBR.

The ICO is responsible to complete a reassessment as often as desired by the individual and update the IICSP with members of the ICT as needed. The ICO is encouraged to conduct reassessments in person.

7.6.F.2. LEVEL II REASSESSMENTS

Level II reassessments will be completed according to the reassessment timeframe of each assessment tool utilized. For assessments adopted at the time of enrollment, the next assessment date will follow the annual scheduled described above for each tool unless the individual has a significant change of conditioning requiring a new assessment.

For individuals receiving nursing facility level of care services, the reassessment must confirm that the individual continues to meet the Michigan Medicaid Nursing Facility LOCD standards. If the standards are not met, a new LOCD tool must be completed to allow the individual rights to an appeal. The ICO will initiate planning for transitioning

the individual to more appropriate supports and services. Reassessments will be documented in the ICBR and results will be used in the development of the IICSP.

7.7 CARE PLANNING

Individual Integrated Care and Supports Plan (IICSP)

The ICO Care Coordinator, individual, providers, and other ICT members develop a comprehensive, person-centered, written IICSP for each individual. The person-centered planning process must be conducted in-person unless the individual chooses otherwise. The individual may choose to participate in person-centered planning to the extent they desire.

Every individual must have an IICSP. The IICSP should be developed based on the outcome of the person-centered planning meeting unless the individual chooses not to participate and the refusal to participate is documented in the IICSP and ICBR. At a minimum the ICO Care Coordinator or Supports Coordinator must provide their contact information to the individual and re-visit the opportunity to participate in person-centered planning and development of the IICSP at the time of reassessment, a change of condition, or upon the individual's request.

The ICO must complete the initial IICSP within 90 calendar days of enrollment. Existing person-centered service plans or plans of care may be incorporated into the IICSP. The ICO must review the adopted plan with the individual to determine if revisions are necessary to address the individual's goals and meet the individual's needs. The IICSP must be contained in the ICBR and shared with the individual and the ICT.

The ICO must discuss advance directives with the individual including the choice to execute a directive, its incorporation in the IICSP, and assurance of provider knowledge of the individual's directive.

The IICSP must:

- Focus on supporting the individual to achieve personally defined goals in the most integrated setting;
- Be developed following MDHHS principles for person-centered planning;
- Include the individual's preferences for care, services, and supports;
- Include the individual's prioritized list of concerns, goals and objectives, and strengths;
- Include specific providers, supports and services including amount, scope, and duration;
- Include a summary of the individual's health status;
- Include the plan for addressing concerns or goals and measures for achieving the goals;
- Include person(s) responsible for specific interventions, monitoring, and reassessment; and
- Include the due date for the interventions and reassessment.

IICSP Monitoring

The ICO will review the individual's IICSP to ensure the IICSP continues to meet the individual's needs and is updated accordingly.

Michigan Department of Health and Human Services

Medicaid Provider Manual

- The ICO must review IICSPs of high-risk individuals least every 30 calendar days.
- The ICO must review IICSPs of moderate-risk individuals at least every 90 calendar days.
- The ICO must review IICSPs of low-risk individuals at least every 180 calendar days.

The ICO will make contact with the individual to inquire if the IICSP continues to meet the individual's needs. This contact may be telephonic, unless in-person contact is requested by the individual. For high-risk enrollees, the IICSP review must be completed in person at least quarterly. For moderate-risk enrollees, at least every other IICSP review must be completed in person. Low-risk enrollees must be offered the opportunity for an in-person IICSP review. If the low-risk enrollee does not wish to have an in-person IICSP review, the ICO Care Coordinator may conduct a telepresence or telephonic visit with the enrollee. The ICO must update the individual's IICSP at least annually and more frequently if conditions warrant, or if an individual requests a change.

SECTION 8 – CRITICAL INCIDENT REPORTING

The ICO must report critical incidents to MDHHS and other authorities as required by CMS and the State.

8.1 TYPES OF CRITICAL INCIDENTS THAT NEED TO BE REPORTED

ICOs must report the following:

- Exploitation
- Illegal activity in the home
- Medication Errors
- Neglect
- Physical Abuse
- Provider no shows
- Restraints, Seclusion, or restrictive interventions
- Sexual Abuse
- Suspicious or Unexpected Death
- Theft
- Verbal Abuse
- Worker consuming drugs or alcohol on the job

SECTION 9 – MI HEALTH LINK HCBS WAIVER

The MI Health Link HCBS waiver offers home and community-based services to allow MI Health Link individuals to remain in the community instead of an institution. MI Health Link individuals who require services through this waiver must apply to MDHHS and be approved for enrollment. ICOs or their subcontractors, according to a contractual agreement, must submit an application to MDHHS for review and approval. Waiver eligibility must be re-determined on an annual basis.

Waiver enrollment is limited to a certain number of individuals that has been approved by CMS.

9.1 APPLICATION PROCESS

When a MI Health Link individual is interested in participating in the MI Health Link HCBS waiver, the ICO must submit an application packet to MDHHS for review and approval prior to an individual participating in the waiver. Applications may be submitted to MDHHS electronically via the Waiver Support Application system or via hard copy paper format using U.S. Mail, United Postal Service, FedEx, or fax as directed by MDHHS.

The ICO will be notified by MDHHS of the outcome of the application review, approval, or rejection via telephone, email, U.S. Mail, or the electronic Waiver Support Application system.

9.2 PERSON-CENTERED PLANNING

The person-centered planning process and IICSP for MI Health Link HCBS waiver individuals must be compliant with the Home and Community-Based Services (HCBS) Final Rule (CMS-2249F; CMS- 2296-F) that was released by CMS on January 16, 2014. At a minimum, the IICSP must include the following components:

- The ICO must develop the IICSP before providing services.
- The individual must approve of all services in the service plan.
- The ICO must document individual approval and participation on the IICSP, including:
 - Individual's preferences for care, services, supports, residential settings, and non-residential settings.
 - Supports and services options that were discussed with the individual and their (or legal representative's) choice of those services and providers.
 - When the individual selects controlled residential settings such as licensed AFC or HFA, the following must be included in the IICSP:
 - ◆ The chosen setting.
 - ◆ The individual's resources.
 - ◆ Whether or not the individual chooses to have a roommate as well as any specific preferences for roommates, bathroom schedules, etc.
 - ◆ Preference for engaging in community activities outside the home, and whether or not the individual needs assistance with arranging transportation, finding work, or otherwise getting involved in the community outside the home and how to make that happen.

Michigan Department of Health and Human Services

Medicaid Provider Manual

- ◆ Personal safety risks and any interventions that may affect the individual's ability to engage in community activities outside the home without supervision.
 - ◆ Any modifications to existing policy and procedure and home and community-based setting requirements (including HCBS Final Rule) at the home to accommodate an individual's assessed needs; indicate established timeframes for periodic review of these modifications.
- Individual's health and safety risks.
 - Individual's prioritized list of concerns, goals and objectives, strengths.
 - Summary of the individual's health status.
 - The plan for addressing concerns or goals, actions for achieving the goals, and specific providers, supports and services, including amount, scope and duration.
- The individual's (or legal representative's) rights and choices of specific providers (and alternative providers, if necessary).
 - A contingency (backup) plan for providers in the event of unscheduled absence of a caregiver, severe weather, or other emergencies.
- Person(s) responsible for specific monitoring, reassessment, and evaluation of health and well-being outcomes.
 - Individual's informed consent.
 - Due date for interventions and reassessment.

The IICSP clearly identifies the types of services needed from both paid and non-paid providers of supports and services. The amount (units), frequency, and duration of each waiver service to be provided are included in the IICSP. The individual chooses the supports and services that best meet their needs and whether to use the option to self-direct applicable services or rely on a ICO Care Coordinator and/or LTSS Supports Coordinator to ensure the services are implemented and provided according to the IICSP. When an individual chooses to participate in arrangements that support self-determination, information, support and training are provided by the ICO Care Coordinator and/or LTSS Supports Coordinator and others identified in the IICSP and according to the Self-Determination Implementation Technical Advisory. When an individual chooses not to participate in self-determination, the ICO Care Coordinator or LTSS Supports Coordinator ensures that supports and services are implemented as planned. The ICO Care Coordinator and/or LTSS Supports Coordinators, as applicable, oversee the coordination of State Plan and waiver services included in the IICSP. This oversight ensures that waiver services in the IICSP are not duplicative of similar State Plan services available to or received by the individual.

An electronic method of signing off on required documents such as the person-centered service plan is acceptable. When this method is utilized, the signature must be newly obtained each time the signature is required. The electronic signature cannot be stored and re-used at will.

In-person visits are valued as a means to support the health and welfare of enrollees as well as integration into the community. All assessments and reassessments, and at least one monthly contact a quarter, are to be completed in-person. If the enrollee has an exposure or condition for which a federal, state, or local public health or government official(s) has released applicable quarantine or isolation guidelines, care coordination contact and activities may be made via a HIPAA-compliant virtual method

Michigan Department of Health and Human Services
Medicaid Provider Manual

(video only) in lieu of in-person during the quarantine or isolation period only. If assessments are completed via virtual method (audio and video only; cannot be only audio) during quarantine/isolation, any sections of the assessment(s) related to physical function that normally require in-person observation by the assessor must be reviewed at the next in-person visit to ensure accuracy. Additionally, the enrollee's privacy must be protected during virtual visits. Video recording is not allowed. The Integrated Care Organization (ICO) should support enrollees who need assistance with using the technology required for virtual video contacts through education and training. Written or electronic consent must be obtained from the enrollee for use of the virtual option. Consent and education for virtual visits (during quarantine/isolation) may be obtained at any point ahead of the virtual method being utilized.

9.3 HOME AND COMMUNITY-BASED RESIDENTIAL AND NON-RESIDENTIAL SETTINGS

The HCBS Final Rule (CMS-2249F; CMS-2296-F) applies to 1915(c) waiver programs. The ICO has been provided with the HCBS Final Rule Federal Register, CMS webinars, and other information regarding the rule. The ICO, and its subcontractors as appropriate, must be familiar with all aspects of the HCBS Final Rule as it applies to the MI Health Link HCBS waiver. All residential settings in which MI Health Link HCBS waiver individuals live must comply with the requirements of the HCBS Final Rule. Similarly, non-residential settings, such as Adult Day Program settings, must comply with the HCBS Final Rule. Residential and non-residential settings must be immediately compliant with the HCBS Final Rule for the MI Health Link program. This compliance will be assessed prior to the individual's enrollment in the waiver. The ICO must utilize the standard statewide Provider Survey tool produced by MDHHS, and this survey must be conducted in-person with the provider and as directed otherwise by MDHHS. Licensed settings used for the Respite service do not need to be assessed unless the individual stays in the setting for more than 30 days.

9.4 SELF-DETERMINATION

Self-Determination provides MI Health Link HCBS waiver individuals the option to direct and control their own waiver services. For those MI Health Link HCBS waiver individuals who choose to participate in arrangements that support self-determination, the individual (or chosen representative(s)) has decision-making authority over providers of waiver services, including:

- Recruiting staff
- Referring staff to an agency for hiring
- Hiring staff
- Verifying staff qualifications
- Obtaining criminal history review of staff
- Specifying additional service or staff qualifications based on the individual's needs and preferences so long as such qualifications comply with those described in the 1915(c) waiver application approved by CMS, and any additional guidance provided by MDHHS
- Specifying how services are to be provided and determining staff duties consistent with the service guidelines as indicated in the CMS-approved waiver application and additional guidance provided by MDHHS
- Determining staff wages and benefits, subject to State and federal limits if applicable
- Scheduling staff and the provision of services

Michigan Department of Health and Human Services

Medicaid Provider Manual

- Orienting and instructing staff in duties
- Supervising staff
- Evaluating staff performance
- Verifying time worked by staff and approving timesheets
- Discharging staff from providing services
- Reallocating funds among services included in the individual's budget
- Identifying service providers and referring for provider enrollment
- Substituting service providers
- Reviewing and approving provider invoices for services rendered

Budget development for individuals using arrangements that support self-determination occurs during the person-centered planning process and is intended to involve any persons chosen by the individual. Planning for the individual's IICSP precedes the development of the individual's budget so that needs and preferences can be accounted for without arbitrarily restricting options and preferences due to cost considerations. An individual's budget is not authorized until the individual and the ICO have agreed to the amount and its use. In the event that the individual is not satisfied with the authorized budget, they may reconvene the person-centered planning process. Fiscal Intermediary services are available through the waiver to help individuals more fully exercise control over their services.

At any time, the individual may modify or terminate the arrangements that support self-determination.

The individual, their chosen allies, the ICO Care Coordinator and LTSS Supports Coordinator must all work together to identify challenges and address problems that may be a barrier to a successful self-determination arrangement. The decision of an individual to terminate participation in self-determination does not alter the supports and services identified in the IICSP. When the individual no longer wishes to participate in self-determination, the ICO must assume responsibility for ensuring the provision of those services through its network of contracted provider agencies while still maintaining and honoring the individual's choice of providers to extent possible.

An ICO may terminate self-determination for an individual when problems arise due to the individual's inability to effectively direct supports and services. Prior to terminating a self-determination agreement (unless it is not feasible), the ICO informs the individual in writing of the issues that have led to the decision to terminate the arrangement. The ICO will continue efforts to resolve the issues that led to the termination.

9.5 WAIVER SUPPORT APPLICATION SYSTEM

The ICO must utilize the waiver management database in the Waiver Support Application (WSA) system for anything related to MI Health Link HCBS Waiver enrollments, application submission, slot management, and disenrollments. The ICO is required to submit a list of users for this system, and the ICO must keep the list updated on a regular basis as staff come onboard or leave. When approved users leave the organization, the organization must notify the appropriate person as directed by MDHHS.

Michigan Department of Health and Human Services
Medicaid Provider Manual

SECTION 10 – CRIMINAL HISTORY REVIEWS

Each ICO and direct provider of home-based services must conduct a criminal history review through the Michigan State Police (ICHAT), at a minimum, for any paid or volunteer individuals who will be entering the individual's residence. The ICO and direct provider must have completed reference and criminal history reviews before authorizing the person providing services in an individual's residence. At a minimum, the scope of the reference and criminal history investigation is statewide.

ICOs and MDHHS will conduct annual reviews to ensure mandatory criminal history reviews have been conducted in compliance with direction given by MDHHS or otherwise required by federal and state law, policy or operating standards.

Michigan Department of Health and Human Services
Medicaid Provider Manual

SECTION 11 – USE OF RESTRAINTS, SECLUSION, AND RESTRICTIVE INTERVENTIONS

Providers are prohibited from using methods of seclusion, restraint, and/or other restrictive interventions. MDHHS will conduct site reviews to ensure these methods are not used. ICO Care Coordinators and LTSS Supports Coordinators, as applicable, have the primary responsibility for identifying and addressing the use of seclusion, restraints, and/or restrictive interventions.

Michigan Department of Health and Human Services
Medicaid Provider Manual

SECTION 12 – PROVIDER PARTICIPATION

Providers have the opportunity to participate in MI Health Link by joining the provider networks of the ICOs. ICOs are encouraged to contract with existing service providers for individuals eligible for and enrolling in the program to ensure continuity of care. Likewise, service providers are encouraged to participate in ICO networks to provide choice, continuity of care and high quality service. The ICO will be responsible for authorizing and paying for Medicare and Medicaid services. Additional information regarding how providers may participate in MI Health Link can be found on the MI Health Link website. (Refer to the Directory Appendix for website information.)

Michigan Department of Health and Human Services
Medicaid Provider Manual

SECTION 13 – MEDICAID POLICY

Current and future Medicaid policies are applicable to the Medicaid portion of the MI Health Link benefit package unless otherwise specified in this chapter or other policies or guidance.

Michigan Department of Health and Human Services
Medicaid Provider Manual

SECTION 14 – QUALITY ASSURANCE

ICOs and PIHPs, as applicable, must comply with requirements set forth in the three-way contract, MI Health Link waiver applications approved by CMS, any other supporting documentation, and the contracts between the ICOs and PIHPs.

Michigan Department of Health and Human Services
Medicaid Provider Manual

SECTION 15 – APPEALS

The three-way contract establishes individual notice and appeal rights that must be adhered to when any grievable or adverse action is taken by the ICO or contracted entities that would fall under the grievance or appeals processes available to individuals through Medicare and Medicaid guidelines.

Michigan Department of Health and Human Services
Medicaid Provider Manual

SECTION 16 – OMBUDSMAN

ICOs and providers must work with the MI Health Link Ombudsman to resolve enrollment and service issues. ICOs must provide the Ombudsman contact information in their member materials.

SECTION 1 – INTRODUCTION

This chapter applies to non-emergency medical transportation (NEMT) providers and authorizing parties. The Medicaid NEMT benefit is covered for Medicaid, MICHild, and Healthy Michigan Plan (HMP) beneficiaries, and for Children's Special Health Care Services (CSHCS) beneficiaries who also have Medicaid coverage.

Federal law at 42 CFR 431.53 requires Medicaid to ensure necessary transportation for beneficiaries to and from services that Medicaid covers. The NEMT benefit must be administered to beneficiaries in an equitable and consistent manner.

Beneficiaries are assured free choice in selecting a Medicaid medical provider to render services. A beneficiary's free choice of medical provider selection does not require the Medicaid program to cover transportation beyond the standards of coverage described in this policy in order to meet a beneficiary's personal choice of medical provider.

Forms referenced in this chapter are accessed via the beneficiary's case worker and are maintained on MI Bridges.

Medicaid Provider Manual

SECTION 2 – COMMON TERMS

Authorizing Party	An affiliated entity of the Medicaid program (e.g., local MDHHS office or Medicaid-contracted transportation broker) responsible for verifying Medicaid eligibility, maintaining a network of transportation subcontractors, and scheduling the least-costly mode of appropriate transportation to medical appointments/services.
Commercial Provider	A transportation provider who uses a motor vehicle that belongs to a company or corporation to provide transportation services to a beneficiary.
Daily Long Distance Trip	A daily trip that exceeds 50 miles one-way from the beneficiary's home.
Demand Response (Dial A Ride) Public Transportation	Public transportation characterized by the following: <ul style="list-style-type: none">▪ The vehicles do not operate over a fixed route or on a fixed schedule except, perhaps on a temporary basis, to satisfy a special need, and▪ Typically, the vehicle may be dispatched to pick up several passengers at different pick-up points before taking them to their respective destinations and may even be interrupted en route to these destinations to pick up other passengers.
Fixed Route Public Transportation	Services provided on a repetitive, fixed schedule basis along a specific route with vehicles stopping to pick up and deliver passengers to specific locations.
Individual With a Vested Interest	A transportation provider who is a relative or friend of a beneficiary and who has a personal stake or interest in the livelihood of a beneficiary.
Long-Term Care Resident	A beneficiary who resides in a Medicaid-certified nursing facility, State Veterans' Home, county medical care facility, or hospital long-term care unit.
Medi-Van	A vehicle owned by a commercial or nonprofit provider used to transport a beneficiary who is able to ambulate and transfer into and out of the vehicle, but requires door-to-door or curb-to-curb service due to their medical condition. Drivers of these vehicles are expected to assist and escort the beneficiary. This definition also includes demand response paratransit transportation services.
Medically Necessary Attendant	An individual, other than the driver of the vehicle or an individual with a vested interest, who assists a beneficiary due to their physical, mental, or developmental status on trips to and from a service or appointment that Medicaid covers.
Nonprofit Provider	A transportation provider who utilizes a motor vehicle that belongs to an entity that has been organized to carry out a charitable, educational, religious, or scientific purpose, and meets specific tax-exempt purposes to provide transportation services to a beneficiary.
Paratransit Transportation	Wheelchair-accessible, demand response services provided by public transportation agencies.
Prolonged Treatment	Medical treatment that is required to treat a medical condition which lasts more than 12 weeks.

Medicaid Provider Manual

Public Transportation Provider	An individual employed by a public entity that provides regular or special continuing transportation available for use by the general public. This does not include school bus, charter, or intercity bus or passenger rail transportation.
Round Trip	When a beneficiary is transported from their residence, or another location, to a Medicaid-covered service and then returned to their original point of origin.
Transportation Provider	An individual (e.g., an employee of a public, commercial, or nonprofit transportation entity, volunteer driver, individual with a vested interest, or medically necessary attendant) who provides transportation services to beneficiaries.
Trip	One-way transportation of a beneficiary from their residence, or another location, to a Medicaid-covered service.
Unloaded Mileage	Mileage traveled when the beneficiary is not in the vehicle.
Volunteer Driver	A transportation provider who utilizes their personal motor vehicle to provide NEMT services to a beneficiary. Volunteer drivers do not have a personal stake or interest in the livelihood of the beneficiary.
Waiting Time	The time that a vehicle is waiting at a Medicaid-enrolled provider's facility in order to transport the beneficiary to another location during the same trip.
Wheelchair Lift Equipped Vehicle	A vehicle owned by a commercial or nonprofit provider that is equipped for a beneficiary who requires a wheelchair and that provides door-to-door service due to their inability to ambulate. Drivers of these vehicles are expected to assist and escort the beneficiary. This definition also includes demand response paratransit transportation services.

SECTION 3 – TRANSPORTATION AUTHORIZATION [CHANGES MADE 4/1/2025]

Medicaid authorizes fee-for-service (FFS) NEMT services via local MDHHS offices, except in Wayne, Oakland, and Macomb counties. FFS transportation services in Wayne, Oakland, and Macomb counties are administered through a contracted transportation broker. (Refer to the Directory Appendix for transportation broker information.)

The Medicaid program contracts with Medicaid Health Plans (MHPs) and Integrated Care Organizations (ICOs), selected through a competitive bid process, to provide services to Medicaid beneficiaries. MHPs and ICOs are responsible for providing NEMT services to their enrollees for all Medicaid covered services. **(revised per bulletin MMP 24-33)** (For additional information, refer to the Medicaid Health Plans and MI Health Link chapters of this manual.)

MHPs and ICOs may have different prior authorization and documentation requirements from those described in this chapter. Providers, beneficiaries or authorizing parties should contact the specific MHP/ICO for further information regarding NEMT. Transportation services for managed care enrollees may vary depending on the beneficiary's benefit plan. For additional information regarding benefit plans, refer to the Beneficiary Eligibility chapter of this manual.

Reimbursement for special allowances requires a completed Medical Verification for Transportation (DHS-5330) to serve as documentation of medical need and must be retained in the beneficiary's file. Special allowances includes medically needing a wheelchair lift-equipped vehicle, Medi-Van vehicle, attendant, and other special circumstances supported by medical documentation. **(revised 4/1/2025)** Medicaid FFS authorizing parties may accept the submission of a complete DHS-5330 form via fax and secure email. Transportation providers and beneficiaries may submit original forms if they choose, but sending original forms is not required for authorization. Providers and beneficiaries are encouraged to keep an original or copy of forms submitted to MDHHS for reimbursement.

A DHS-5330 must be completed annually. A local MDHHS office can authorize NEMT without a DHS-5330 for beneficiaries who do not require special allowances. Additionally, verification of medical need is not required when the transportation is to obtain medical evidence (i.e., employability, incapacity, or disability) or to meet the needs of children for protective services.

An initial verification of medical need for special allowances **(revised 4/1/2025)** is required by the beneficiary's primary care physician (PCP). A completed DHS-5330 signed by the beneficiary's PCP, or a physician's assistant or nurse practitioner working under the supervision of the PCP, serves as documentation of medical need and must be retained in the beneficiary's file. In situations when a beneficiary's PCP, or a physician's assistant or nurse practitioner working under the supervision of the PCP, is unavailable and unable to complete a DHS-5330 in a timely manner, another licensed provider may complete the form. Example providers include, but are not limited to, a physician specialist, clinical nurse specialist, certified nurse midwife, registered nurse, social worker, dentist, and other licensed providers. The licensed provider must be knowledgeable about the beneficiary's medical needs, capable of accurately completing the form, and providing direct medical, behavioral or dental services to the beneficiary.

In situations when a completed DHS-5330 cannot be secured prior to a beneficiary's scheduled Medicaid-covered appointment, authorizing parties may approve and reimburse all necessary NEMT services if the DHS-5330 is completed and returned to the authorizing party within 10 business days of the

Medicaid Provider Manual

appointment. Allowable circumstances include, but are not limited to, the beneficiary's first trip to their PCP or medical appointment, or an inability by the beneficiary's physician's office to complete the form and secure the necessary signatures in a timely manner.

Authorizing parties must retain the completed DHS-5330 in the beneficiary's file and make it available upon request. Authorizing parties are responsible for verifying Medicaid eligibility, maintaining a network of transportation subcontractors, and scheduling the least-costly mode of appropriate transportation to medical appointments/services.

The beneficiary's need for NEMT must be evaluated before services are authorized. This includes assessing all of the following:

- The beneficiary's eligibility;
- The transportation requested is for a service Medicaid covers; and
- The beneficiary has no other means of transportation available. Availability is not dependent on whether the beneficiary previously provided their own transportation.

SECTION 4 – TRANSPORTATION PROVIDER QUALIFICATIONS

All individual and agency transportation providers must adhere to specific qualifications in order to receive Medicaid reimbursement for providing NEMT services. In accordance with the Consolidated Appropriations Act of 2021, a transportation provider who is a beneficiary's family member, or foster parent, or a taxicab driver must meet the following qualifications:

- Provider must not be excluded from participating in any federal health care program.
- Provider must not be listed on the MDHHS sanctioned provider list or U.S. Department of Health and Human Services (HHS) exclusion list.
- Provider must not have been convicted under a federal or state law after August 21, 1996 for a felony criminal offense relating to unlawful manufacture, distribution, prescription, or dispensing of a controlled substance.

The provider will report any felony conviction relating to a controlled substance or traffic violations. A transportation network company (also known as a rideshare company) and its individual drivers must meet these qualifications in order to provide NEMT services and receive reimbursement by the Medicaid NEMT Contractor, health plan or waiver agency.

Procedures must be in place to document and verify that vehicles used by providers meet the safety needs of the beneficiary including, but not limited to:

- Seatbelts and child safety seat requirements, if appropriate; and
- Functional heating and air conditioning.

NEMT individual and agency providers must consent to required screenings to determine eligibility in order to receive Medicaid reimbursement for providing NEMT services. Individual providers are those persons who provide transportation to a Medicaid beneficiary they are not related to and include, but may not be limited to, volunteer drivers or friends, colleagues, or neighbors of a Medicaid beneficiary. Provider screening is conducted through the CHAMPS provider enrollment process. (Refer to the General Information for Providers chapter of this manual for additional information.)

Beneficiaries who transport themselves or individuals providing NEMT services to a Medicaid-enrolled family member will not be required to enroll in CHAMPS. Self-attestation is sufficient when determining the familial relationship between the driver and the Medicaid beneficiary. Foster parents who transport their foster children are not required to enroll in CHAMPS and are exempt from mandated provider screening requirements.

Public transportation providers (demand response and fixed route) and commercially hailed or street taxicabs are also exempt from CHAMPS enrollment and screening requirements. These providers and their drivers presumptively meet the criteria to provide transportation for Medicaid beneficiaries as they are licensed or registered through the appropriate state authority (e.g., Secretary of State, Licensing and Regulatory Affairs, Michigan Department of Transportation) or equivalent(s) in the state in which they are operating.

4.1 BENEFICIARIES

The minimum requirements for individuals who transport themselves include:

- Valid driver's license appropriate to the class of vehicle being operated;
- Compliant with Sections 304 and 319 of the Michigan Vehicle Code related to restricted driver's licenses as issued by the Michigan Secretary of State (MDHHS reserves the right to deny or revoke reimbursement of a provider due to a restricted or suspended license);
- Motor vehicle insurance; and
- Adherence to all public laws, ordinances, and regulations applicable to drivers and the vehicles that are used.

Authorizing parties must confirm a beneficiary's eligibility to receive mileage reimbursement through an established process, including but not limited to, documented verbal attestation.

4.2 VOLUNTEER DRIVERS

The minimum volunteer driver requirements are:

- 18 years of age and older;
- Cannot physically reside in the same household as the beneficiary they are transporting;
- Must be able to read and communicate effectively in English;
- Valid driver's license appropriate to the class of vehicle being operated;
- Compliant with Sections 304 and 319 of the Michigan Vehicle Code related to restricted driver's licenses as issued by the Michigan Secretary of State (MDHHS reserves the right to deny or revoke enrollment of a provider due to a restricted or suspended license);
- Motor vehicle insurance;
- Adherence to all public laws, ordinances, and regulations applicable to drivers and the vehicles that are used;
- Compliant with all applicable confidentiality laws as required by the Medicaid program; and
- Compliant with all provider enrollment background and screening requirements as required by the Medicaid program. (Refer to the General Information for Providers Chapter of this manual for additional information.)

4.3 INDIVIDUALS WITH A VESTED INTEREST

The minimum requirements for individuals with a vested interest are:

- Valid driver's license appropriate to the class of vehicle being operated;
- Compliant with Sections 304 and 319 of the Michigan Vehicle Code related to restricted driver's licenses as issued by the Michigan Secretary of State (MDHHS reserves the right to deny or revoke enrollment of a provider due to a restricted or suspended license);
- Motor vehicle insurance;

Medicaid Provider Manual

- Adherence to all public laws, ordinances, and regulations applicable to drivers and the vehicles that are used;
- Compliant with all applicable confidentiality laws as required by the Medicaid program; and
- Compliant with all provider enrollment background and screening requirements as required by the Medicaid program. (Refer to the General Information for Providers Chapter of this manual for additional information.)

4.4 COMMERCIAL AND NONPROFIT PROVIDERS

The minimum requirements for commercial and nonprofit providers are:

- 18 years of age and older;
- Must be able to read and communicate effectively in English;
- Valid driver's license appropriate to the class of vehicle being operated;
- Compliant with Sections 304 and 319 of the Michigan Vehicle Code related to restricted drivers licenses as issued by the Michigan Secretary of State (MDHHS reserves the right to deny or revoke enrollment of a provider due to a restricted or suspended license);
- Maintenance of all necessary licensure and certification required by all transportation public laws, ordinances, and regulations applicable to the transportation provider, including any that may require liability insurance;
- Compliant with the Americans with Disabilities Act (ADA) of 1990, as amended;
- Operation of vehicles that meet the safety and medical needs of the beneficiary;
- Compliant with any state or federal statutes applicable to commercial and nonprofit transportation providers;
- Compliant with all applicable confidentiality laws as required by the Medicaid program; and
- Compliant with the General Information for Providers Chapter of this manual.

NOTE: Taxicab carriers are exempt from CHAMPS enrollment and screening requirements.

4.5 PUBLIC TRANSPORTATION PROVIDERS

The minimum requirements for public transportation providers are:

- 18 years of age and older;
- Must be able to read and communicate effectively in English;
- Commercial Driver's License (CDL) if operating a vehicle having a gross vehicle weight of 26,001 pounds or more, or designed to transport 16 or more people (including driver);
- Compliant with Michigan state statutes: Michigan Motor Bus Transportation Act of 1990, as amended; Michigan Motor Carrier Safety Act of 1963, as amended; and Michigan Vehicle Code, as amended;
- Compliant with the Americans with Disabilities Act (ADA) of 1990, as amended;
- Operation of vehicles that meet the safety and medical needs of the beneficiary;
- Compliant with all applicable confidentiality laws as required by the Medicaid program; and
- Compliant with the General Information for Providers Chapter of this manual.

NOTE: Public transit services (demand response and fixed route) are exempt from CHAMPS enrollment and screening requirements.

SECTION 5 – USE OF PERSONAL CHOICE AND ACKNOWLEDGEMENT OF PROVIDER SELECTION

A beneficiary receiving transportation services through the NEMT program may select a transportation provider who has been convicted of certain crimes by signing a personal acknowledgement form. The beneficiary must submit their request on the Personal Choice and Acknowledgement of Provider Selection form (MSA-119) that indicates receipt of notification of the criminal offense(s) that prompted the exclusion and must indicate their selection of that provider to deliver services. After the signed acknowledgement is received, processed, and recorded by MDHHS, the effective start date for the selected individual is the date the client signs the MSA-119. The MSA-119 form will be provided by the local MDHHS office. Payment will not be authorized prior to the signature date on the form.

NEMT personal choice selections are subject to the following restrictions:

- The provider does not have a disqualifying conviction that is one of the four exclusions under 42 USC 1320a-7.
- The provider must be capable of providing the required services and must be otherwise qualified to do so.
- The provider has complied with the criminal history screening conducted by MDHHS.
- The provider is not an agency or associated with an agency.

A personal choice selection may be applied for the limited purpose of providing NEMT services to the specific beneficiary identified on the MSA-119. A personal choice selection shall not be construed as approval, authorization or permission to provide services to other beneficiaries. Providers selected through the personal choice provisions of this section must be registered in the Community Health Automated Medicaid Processing System (CHAMPS) and other systems (if applicable) for the purposes of monitoring, contacting, and generating payments.

SECTION 6 – COVERED SERVICES

NEMT expenses, regardless of whether there is a corresponding medical claim on the date of service, may be covered for trips to and from:

- Treatment Medicaid covers (one-time or ongoing);
- Ancillary service providers (e.g., pharmacies, durable medical equipment, prosthetics, orthotics, and supplies [DMEPOS] providers) to obtain a service or item Medicaid covers;
- Medical care, treatment or services that have been prior authorized;
- Appointments to obtain medical evidence (for eligibility verification purposes only); and
- Facilities providing services Medicaid covers that do not charge for care.

Transportation from a service Medicaid covers is only covered when it is from the provider's location to the beneficiary's residence or to another service Medicaid covers. The least costly mode of transportation appropriate for the beneficiary's medical needs must be used.

Medicaid authorizes and reimburses transportation providers directly for the following NEMT services:

- Long-term lodging for approved transplant hospitals.
- Transportation to and from pregnancy-related services for Medicaid beneficiaries enrolled in the Maternity Outpatient Medical Services (MOMS) program.
- Transportation to and from day treatment provided by a Community Mental Health Services Program (CMHSP) (as part of its treatment package) for children enrolled in the Children's Waiver Program (CWP).

Transportation providers and beneficiaries may be reimbursed for mileage, tolls, parking fees, approved meals and lodging expenses, Medi-Van and wheelchair lift equipped transportation, and medically necessary attendants. The transportation provider or beneficiary must submit a complete MSA-4674 (Medical Transportation Statement) for all trip-associated costs to the authorizing party to receive reimbursement. Medicaid FFS authorizing parties may accept the submission of a complete MSA-4674 form and receipts via fax and secure email. Transportation providers and beneficiaries may submit original forms and receipts if they choose, but sending original forms and receipts is not required for reimbursement. Authorizing parties receiving a completed MSA-4674 may obtain missing information, including signatures, via telephone conversation with the appropriate party. This verification method should only be used to obtain missing information related to a submitted form and not as a method for completing the full MSA-4674. Providers and beneficiaries are encouraged to keep an original or copy of forms and receipts submitted to MDHHS for reimbursement.

NEMT reimbursement must reflect the total incurred cost to the transportation provider(s) and to the beneficiary, and must be verified with itemized, unaltered receipts. All receipts must be legible and included with the MSA-4674. Transportation providers must be enrolled in CHAMPS on the date of service to receive Medicaid NEMT reimbursement unless the provider is exempt from enrollment.

In order to assure appropriate reimbursement for NEMT, MDHHS maintains a database of provider rates which is available on the MDHHS website. The database is reviewed and updated as applicable. (Refer to the Directory Appendix for website information.) NEMT providers must bill MDHHS the usual and

customary fee charged to the public. Customary charge means the amount the provider charges another third party payer or the general public (except in cases where the general public receives free or reduced charges) for the same or a similar service. This definition does not include negotiated or contracted payment rates. If the provider renders a covered service to a beneficiary that the provider offers for free or for a reduced fee to the general public, the provider may only bill Medicaid up to that customary charge as long as all other Medicaid requirements are met.

6.1 MILEAGE

The Medicaid program covers the least-costly available mode of transportation suitable to the beneficiary's medical condition. The following modes of transportation are commonly utilized:

- Commercial and nonprofit transportation
- Fixed route, demand response and deviated route public transportation
- Volunteer drivers
- Individuals with a vested interest
- Beneficiaries providing their own NEMT in their personal vehicle

Volunteer drivers will not be reimbursed for driving a vehicle owned by the beneficiary or a member of the beneficiary's family.

When available, medical providers or entities that offer transportation or medical delivery services at no charge (e.g., prescription delivery services offered by the beneficiary's pharmacy) should be utilized.

Mileage is reimbursed according to transportation provider type at the appropriate rate as indicated on the MDHHS NEMT Database. Total round-trip mileage must be rounded up to the nearest mile and must be verifiable using an online mapping service or a Global Positioning System device.

6.2 MEALS

Authorized meals for beneficiaries, volunteer drivers, or individuals with a vested interest are reimbursed at cost or at the maximum allowable amount, whichever is less. To be entitled to meal reimbursement, meals must meet one of the following:

- For breakfast: The vehicle must depart before 6:00 AM and must return after 8:30 AM.
- For lunch: The vehicle must depart before 11:30 AM and must return after 2:00 PM.
- For dinner: The vehicle must depart before 5:30 PM and must return after 8:00 PM.

A vehicle's departure and return times cannot include non-medically related travel including, but not limited to, personal errands or business. Meals are not eligible for reimbursement if they are purchased within the requester's official city of residence.

Meal reimbursement requires itemized, unaltered receipts which must include the business name, address, date, time, and itemized list of items purchased with cost of each item. However, if the restaurant or place of business omits any necessary items from their receipt, the information may be hand-written by the individual incurring that expense.

Medicaid Provider Manual

Bulk purchases of groceries and shared meals are not reimbursable. Meals must be purchased and consumed on the day and within the time of travel. Reimbursement for alcoholic beverages is not permitted. If a lodging reservation or other travel includes a complimentary breakfast or other meals, Medicaid does not provide any additional reimbursement for that meal.

6.3 FEES AND TOLLS

Travel-related fees and tolls (e.g., parking, toll road, and bridge fare) are reimbursed at actual cost and require original, unaltered receipts. In situations when it is necessary for a Medicaid beneficiary to traverse the Mackinac Bridge and the original, unaltered receipt(s) is unavailable, the authorizing party may still approve reimbursement for the toll when supported by documentation on the MSA-4674. Documentation must include the origin and destination points, and a notation regarding the reason an original receipt is unavailable. This exception is not intended to eliminate the requirement that necessary Mackinac Bridge tolls require original, unaltered receipts and may be subject to post-payment review. Per leg reimbursement for passenger vehicles crossing the Mackinac Bridge will be consistent with rates included on the Mackinac Bridge Authority website.

6.4 LODGING

Medically necessary overnight stays that include meals and lodging may be authorized for a beneficiary and transportation provider for up to 14 consecutive nights. In addition, one medically necessary attendant (or individual with a vested interest) may be authorized if documented by the beneficiary's provider on the DHS-5330. Medically necessary overnight stays beyond 14 nights require prior authorization (PA) from the MDHHS Program Review Division (PRD). (Refer to the Directory Appendix for contact information.)

Medically necessary overnight stays which include meals and lodging at a Level IV Neonatal Intensive Care Unit (NICU) may be authorized for a beneficiary, a transportation provider, and if documented by the beneficiary's provider on the DHS-5330, one medically necessary attendant (or individual with a vested interest) for no more than 14 nights. Necessary overnight stays at a Level IV NICU beyond 14 nights require PA from PRD.

The least expensive, sufficiently maintained lodging available must be utilized. The availability of nonprofit accommodations (i.e., Ronald McDonald House or accommodations available through the visiting medical facility) must be explored before commercial lodging is considered. Lodging expenses are reimbursed at cost or the maximum allowable amount, whichever is less. Original, itemized, unaltered receipts are required. Reimbursement beyond an accommodation's suggested donation amount or per night rate as charged to the public will not be made.

6.5 SPECIAL ALLOWANCES

Special allowances (i.e., wheelchair lift-equipped or Medi-Van vehicles, or medically necessary attendants) are reimbursed at the rate listed on the MDHHS NEMT Database. The beneficiary's physician must document the medical necessity of all special allowances on the DHS-5330.

6.5.A. WHEELCHAIR LIFT-EQUIPPED VEHICLES

Beneficiaries may be eligible for specialized NEMT provided by wheelchair lift equipped vehicles when at least one of the following conditions is met:

- Beneficiary is wheelchair dependent; or
- Beneficiary is medically dependent on life sustaining equipment which cannot be accommodated by standard transportation.

Drivers of wheelchair lift equipped vehicles are expected to assist and escort the beneficiary.

6.5.B. MEDI-VAN VEHICLES

Beneficiaries may be eligible for specialized NEMT provided by Medi-Van vehicles when they require door-to-door or curb-to-curb assistance. Drivers of Medi-Van vehicles are expected to assist and escort the beneficiary.

6.5.C. MEDICALLY NECESSARY ATTENDANTS

Beneficiaries may be eligible to receive assistance from one attendant in addition to the driver of a wheelchair lift equipped or Medi-Van vehicle. The attendant must be medically necessary due to the beneficiary's physical, mental, or developmental status. If more than one attendant is needed, prior authorization is required. For additional information, refer to the Prior Authorization (PA) section of this chapter.

6.6 HOSPITAL FACILITY MEAL AND LODGING REIMBURSEMENT

Some hospital facilities (e.g., University of Michigan Health System [Michigan Medicine]) provide advance expenses for meals or lodging on a per diem basis to Medicaid beneficiaries securing inpatient or outpatient treatment at their facility and their medically necessary attendant (or individual with a vested interest). These facilities seek reimbursement directly from an authorizing party or local MDHHS office after the treatment's end. For these facilities to receive reimbursement of their advance expenses, they must provide to the local MDHHS office, or authorizing party, an invoice or general authorization of services documenting the name of the facility, the name of the Medicaid beneficiary, the date(s) of service, the service(s) requesting reimbursement (i.e., meals or lodging), and the cost of each service. Requests made by the facilities for reimbursement must be received by the local MDHHS office, or authorizing party, within 12 months of the incurred expense. The current maximum per-day rates for these services are indicated on the MDHHS NEMT Database.

SECTION 7 – MANAGED CARE PROGRAMS

The Medicaid program contracts with Medicaid Health Plans (MHPs) and Integrated Care Organizations (ICOs), selected through a competitive bid process, to provide services to beneficiaries. These entities are responsible for providing NEMT services to their enrollees for all Medicaid services. (For additional information, refer to the Medicaid Health Plans and the MI Health Link chapters of this manual.)

For services provided to managed care enrollees in an FQHC, the MHP covers NEMT when:

- the service is Medicaid covered and the FQHC is in the MHP's provider network; or
- the MHP has prior authorized the FQHC for the service.

MHPs and ICOs may have different prior authorization and documentation requirements from those described in this chapter. Providers, beneficiaries or authorizing parties should contact the specific MHP or ICO for further information regarding NEMT for their beneficiary. Transportation services for these enrollees may vary depending on the beneficiary's benefit plan. For additional information regarding benefit plans, refer to the Beneficiary Eligibility chapter of this manual.

If a beneficiary was admitted to an inpatient hospital setting prior to the date of enrollment into an MHP or ICO, that entity will not be responsible for the inpatient stay or any travel-related expenses (e.g., miles, meals, or lodging) incurred by the beneficiary or transportation provider until the beneficiary's date of discharge. This includes transportation expenses incurred as a result of the beneficiary's return trip from the hospital to their residence or other outpatient setting. The MHP or ICO will be responsible for all care, including travel expenses, from the date of discharge forward (excluding expenses incurred as result of the beneficiary's return trip to their residence).

For beneficiaries whose MHP or ICO enrollment status has changed, transportation may be authorized and reimbursed retroactively in the following situations:

- The beneficiary's Medicaid eligibility was made retroactive, and the beneficiary received NEMT during the retroactive eligibility time period; or
- Transportation was authorized while enrolled in an MHP or ICO, and then the beneficiary was disenrolled retroactively by the program and enrolled into FFS.

MDHHS contracts with dental health plans (DHPs) for the administration of dental services for Healthy Kids Dental (HKD) beneficiaries. The DHP is responsible for providing, arranging, and reimbursing covered dental services to enrolled Medicaid beneficiaries. Providers must contact the DHP for specific information about covered HKD benefits. (For additional information about HKD, refer to the Dental chapter of this manual.) The MHP is responsible for NEMT to HKD covered dental appointments for their enrollees.

SECTION 8 – PRIOR AUTHORIZATION (PA) [CHANGE MADE 4/1/2025]

Transportation may require PA in certain situations. The PA request must be submitted in writing before the service is provided unless an urgent situation exists and the circumstances are documented. Payment authorization will not be given for PA requests submitted more than 30 days after the service is provided. The PA request, along with the DHS-5330 (when required), (text added 4/1/2025) must be submitted to the PRD for review. (Refer to the Directory Appendix for contact information.) Prior authorization may be requested for up to six months for prolonged treatment requiring multiple transports.

Reimbursement for travel expenses related to the following situations requires PA:

- All travel to and from out-of-state/beyond borderland medical providers. (Refer to the Out of State/Beyond Borderland Providers subsection of the General Information for Providers chapter of this manual for additional information.);
- Transportation reimbursement requests for medical care outside a beneficiary's community when comparable care is available locally;
- Meals and lodging for overnight stays if the medical facility is within 50 miles of the beneficiary's residence;
- Necessary meals and lodging for overnight stays beyond 14 consecutive nights;
- Requests for advance payment of travel costs; and
- Travel expenses for two or more individuals with a vested interest or medically necessary attendants.

The PA request must include:

- Beneficiary name and Medicaid identification number
- Case number
- Beneficiary address
- Explanation of medical necessity of the services requiring PA
- Travel origin and destination
- Effective travel date(s)
- Diagnosis
- Name and telephone number of the individual requesting PA
- Documentation supporting the request

Based on the documentation submitted, the PA request is either approved, denied, or returned for more information. Authorizing parties are informed of the decision in writing, and a copy of the decision must be retained in the beneficiary's file. The authorizing party must then immediately inform the transportation provider and beneficiary of the approval or denial of the PA request. Approval of a PA does not guarantee beneficiary eligibility or payment. It is the authorizing party's responsibility to verify beneficiary eligibility for the date of service prior to NEMT services being rendered.

SECTION 9 – SPECIAL SITUATIONS

9.1 UNLOADED MILEAGE

Unloaded mileage incurred by commercial and nonprofit providers is not reimbursable by the Medicaid program.

9.2 MINORS TRAVELING ALONE

The following travel circumstances apply for minor (under 18 years of age) beneficiaries:

- Children under 12 years of age must be escorted to medically necessary appointments by a parent, foster parent, caregiver or legal guardian.
- For children between the ages of 12 and 18 years, a consent letter signed by a parent, foster parent, caregiver or legal guardian is required for a child to be transported without accompaniment unless access to the service does not require parental consent by the Medicaid program.

The above policy is waived for beneficiaries who have been emancipated or are seeking transportation for health care services for which a minor is legally able to consent (i.e., pregnancy-related, sexually transmitted/venereal disease, HIV/AIDS, substance use disorder, or outpatient CMHSP care).

9.3 MEDICAL REVIEW TEAM APPOINTMENTS

Transportation is a Medicaid-covered benefit and may be authorized for beneficiaries seeking financial or medical assistance due to a disability or blindness. Transportation is limited to one trip for examination and one trip per Disability Determination Services recommendation. A completed DHS-49-F (Medical – Social Questionnaire) serves as documentation and must be retained in the beneficiary's file.

SECTION 10 – REFERRALS

An NEMT referral is not considered a denial of transportation and, as such, a DHS-301 (Medical Transportation Notice) must not be issued when an NEMT referral is made.

The following circumstances are considered referrals:

- Referring a beneficiary to their MHP (for additional information, refer to the Managed Care Programs section of this chapter);
- Referring a beneficiary to the CMHSP; and
- Referring a beneficiary to medical providers who bill Medicaid directly for services (for additional information, refer to the Covered Services section of this chapter).

SECTION 11 – DENIALS AND BENEFICIARY APPEALS

Beneficiaries who have Medicaid coverage have a right to an administrative hearing when services have been denied, reduced, changed or terminated. When a request for NEMT is denied, a beneficiary will be notified with a written denial notice (DHS-301), provided by the authorizing party, which explains the reason for the negative action and informs the beneficiary of their right to appeal. The following requirements must also be met when a beneficiary is denied transportation services:

- The DHS-301 and postage-paid return envelope must be mailed to the beneficiary within one business day of the service being denied;
- A copy of the DHS-301 must be kept in the beneficiary's file and made available upon request; and
- An employee with knowledge of the denial must be available to testify at an administrative hearing, if required.

The beneficiary or beneficiary's authorized representative may request an administrative hearing. The Michigan Office of Administrative Hearings and Rules (MOAHR) arranges and conducts the appeal process. Any questions regarding the appeal process should be directed to MOAHR. (Refer to the Directory Appendix for contact information.)

SECTION 12 – NON-COVERED SERVICES

The following transportation services are not reimbursable:

- Waiting time
- Trips that were provided prior to approval from the authorizing party
- Multiple trips for a single Medicaid service
- When a beneficiary failed to keep their appointment
- Trips to and from services that are not covered (e.g., grocery store, non-Medicaid covered medical services)
- Routine medical care outside a beneficiary's community when comparable care is available locally, unless prior authorized
- Transportation to and from services for individuals who have not met their spend-down
- Expenses for services that have already occurred
- Services for long-term care beneficiaries. Routine, non-emergency medical transportation provided for long-term care residents in a van or other non-emergency vehicle is included in the facility's per diem rate. This includes transportation for medical appointments, dialysis, therapies, or other treatments not available in the facility. (Refer to the Nursing Facility Coverages chapter of this manual for additional information regarding NEMT for long-term care beneficiaries.)
- Transportation for managed care program enrollees for services covered under the program contract. (Refer to the Managed Care Programs section of this chapter for additional information.)
- Transportation for services provided in FQHCs
- Transportation for Emergency Services Only beneficiaries
- Transportation for Plan First beneficiaries

Michigan Department of Health and Human Services
Medicaid Provider Manual

NURSING FACILITY

This chapter is comprised of three parts:

The [**COVERAGES**](#) portion of the chapter outlines nursing facility requirements for beneficiary eligibility and admission, for providing services, and for informing beneficiaries of their rights and responsibilities.

The [**CERTIFICATION, SURVEY, & ENFORCEMENT APPENDIX**](#) includes information regarding Medicaid certification of nursing facilities, staff certification, the survey process, and enforcement remedies.

The [**COST REPORTING & REIMBURSEMENT APPENDIX**](#) contains Medicaid policy pertaining to nursing facility ownership, reimbursement, costs, and financial reporting.

SECTION 1 – GENERAL INFORMATION

This chapter discusses Medicaid nursing facility coverage which is intended to assist beneficiaries in attaining or maintaining the highest practical physical, mental, and psychosocial well-being and maximize independence and decision-making. The chapter outlines nursing facility requirements for beneficiary eligibility and admission, for providing services, and for informing beneficiaries of their rights and responsibilities.

Nursing facilities provide services to many of the state's most vulnerable citizens. Medicaid, as the primary payer for beneficiaries who reside in nursing facilities, adheres to all State and Federal regulations that govern care provided in these facilities. Governing regulations include, but are not limited to:

- Americans with Disabilities Act (ADA)
- 42 CFR §431, §438, §440, §441, §448, §483, §485, §488
- State Medicaid Operations Manual
- Medicare Catastrophic Coverage Act of 1988, Public Law 100-360
- Certificate of Need Commission Act 368 of 1978, as amended – Part 222
- Social Security Act
- Omnibus Reconciliation Act of 1987 (Public Law 100-203), 1988, 1989, 1990, and 1994
- Michigan Medicaid State Plan

Only those services covered by the Medicaid Program, as outlined in this chapter, are reimbursable. Included is a full description of:

- Covered Services:
 - Services covered by the facility's per diem rate; and
 - Ancillary services that must be billed separately by the service provider.
- Non-Covered Services that the beneficiary may purchase with their patient-pay amount.

A Medicaid-certified nursing facility is defined as a nursing home, State Veterans' Home, county medical care facility, or hospital long-term care unit with Medicaid certification. Also included are swing beds as defined in the Federal State Operations Manual (SOM) and/or State Medicaid Policy.

Beneficiary is defined as a Medicaid beneficiary, or a person legally sanctioned to make medical decisions on their behalf (i.e., guardian, conservator, activated Durable Power of Attorney).

Resident is defined as a nursing facility resident (irrespective of payer source) or a person legally sanctioned to make medical decisions on their behalf (i.e., guardian, conservator, activated Durable Power of Attorney).

Individual, as used in this chapter, means any person.

Medicaid Provider Manual

SECTION 2 – MEDICAID HEALTH PLAN

The Medicaid Health Plan (MHP) is responsible for restorative or rehabilitative care in a nursing facility up to 45 days in a rolling 12-month period. If nursing facility services will exceed this coverage, the health plan may initiate the disenrollment process by submitting the Request for Disenrollment Long Term Care form (MSA-2007). The nursing facility may bill Medicaid after the disenrollment is processed.

Beneficiaries who reside in a nursing facility are excluded from subsequent enrollment in a MHP. If a beneficiary is in a facility prior to enrollment in a health plan and the nursing facility does the admission record in CHAMPS correctly, CHAMPS will automatically remove the health plan and set the NH benefit plan.

SECTION 3 – QUALITY

MDHHS is committed to a quality long-term care system that supports people with long-term care needs, regardless of the setting in which the individual receives those services, including nursing facilities, supported living settings, and their own home. Medicaid supports a system that moves away from the traditional medical model for care to one of enhanced beneficiary participation. Nursing facilities with Medicaid certification are expected to assess and plan care with resident participation and to provide services in ways that promote and support person-centered planning and quality service delivery.

3.1 QUALITY INDICATORS

Quality is indicated by the following components:

- Regular, ongoing, and systematic monitoring and revision of individualized plans of care, progress and outcomes by the beneficiary and their support system. In order to participate, beneficiaries may require support, such as regular opportunities and assistance in reviewing key considerations. Planning results should be documented in ways that are meaningful to the beneficiary and useful to people with responsibilities for implementing the plan.
- Risk and safety concerns are considered and plans developed to minimize risk of harm while promoting independence and safety.
- Behavioral interventions and medication management are used only when necessary and are appropriately managed and monitored.
- Care coordination must support the individual's participation in their care.
- Support for personal responsibility and community relationships that avoid the unintended and detrimental consequences of organizational involvement. Facilities should minimize the disempowerment of beneficiaries or displacement of family members by professional decision-makers and/or service providers, assume the beneficiary is competent and capable of participating in their relationships and the community, and provide assistance and support only when there are unmet needs.
- Individual freedom to exercise civic rights and decision-making authority exists to the maximum extent possible.
- Individuals are free to exercise their due process and grievance rights, and are provided the information necessary to do so.
- Individuals and their support system express satisfaction and the care leads to positive outcomes.
- Diverse cultural and ethnic backgrounds are supported.
- A system of continuous quality improvement that includes input from residents and families.

Current models that utilize person-centered planning and introduce the systems/culture change to support ongoing quality in nursing facilities include, among others, The Eden Alternative™, Wellspring™, and Gentlecare™.

Medicaid Provider Manual

3.2 QUALITY OF LIFE

Nursing facilities must provide services for residents in a manner and in an environment that promotes maintenance or enhancement of the resident's quality of life. Elements of quality of life include dignity, self-determination, participation in community life and in other activities, participation in resident and family groups, and accommodation of needs through the end of life. Quality of life is defined, measured, and evaluated by residents and their support systems, and may include quality of care outcomes.

3.3 QUALITY OF CARE

Nursing facilities must meet the needs of residents in compliance with State and Federal laws, rules, codes, and established clinical guidelines and practices.

Complaints regarding the quality of care in any Michigan nursing facility can be made to the Health Facility Complaint Line. (Refer to the Nursing Facility Section of the Directory Appendix for contact information.)

SECTION 4 – BENEFICIARY RIGHTS

All nursing facility residents have the right to:

- A dignified existence;
- Self-determination; and
- Communication with, and access to, persons and services inside and outside the facility.

In accordance with Federal and State rules and regulations, nursing facilities are required to protect and promote beneficiary rights. These rights include, but are not limited to:

- The right to exercise their rights as citizens of the United States;
- The right to be free of interference, coercion, discrimination, and reprisal from the facility in exercising their rights;
- The right to receive notice of their rights, rules and regulations, both orally and in writing, in a language that the resident understands;
- Access to their medical records and information;

(In accordance with Federal regulations, a beneficiary [or their representative] must be allowed to inspect their records within 24 hours [excluding weekends and holidays] of such request. Also, in accordance with Michigan Public Health Code, a beneficiary [or their representative] is entitled to receive and examine an explanation of their bill or an itemized statement setting forth services paid for and services rendered, regardless of the source of payment.)

- The right to be informed about their health status;
- The right to refuse treatment;
- The right to non-discrimination, including non-discrimination based on payment source;
- Notification of covered and noncovered services, and any additional costs;
- Notification of any changes in room, policies, physician, health status, and treatment;
- Protection and appropriate management of resident funds;
- The right to covered services;
- Notification of transfer or relocation;
- The right to pain and symptom management at the end of life; and
- The right to re-admission to the nursing facility and to have their bed held during an emergency hospital stay, as defined in the Holding a Bed subsection of this chapter.

In general, beneficiaries cannot be charged for Medicaid-covered services, except for patient-pay amounts, copays or deductibles. This applies to whether they are enrolled as a fee-for-service beneficiary, MDHHS is paying their Health Maintenance Organization (HMO) premium to a contracted health plan, or services are provided under Community Mental Health Services Program (CMHSP) or Pre-paid Inpatient Health Plan (PIHP) capitation. However, beneficiaries may be charged if they choose to obtain a service from an out-of-network or non-participating provider, as long as they have prior

Medicaid Provider Manual

knowledge they will be obligated to pay the entire charge and, with that knowledge, they request the service.

Medicaid beneficiaries may not be charged the difference between the provider's charge and the Medicaid payment for a service, nor can they be charged for missed appointments.

Medicaid beneficiaries cannot be charged for the copying of medical records for the purpose of providing them to another health care provider.

SECTION 5 – BENEFICIARY ELIGIBILITY AND ADMISSION PROCESS

5.1 NURSING FACILITY ELIGIBILITY

There are five components that determine beneficiary eligibility and Medicaid nursing facility reimbursement.

- Verification of financial Medicaid eligibility
- PASARR Level I screening
- Physician-written order for nursing facility services
- A determination of medical/functional eligibility based upon a web-based version of the Michigan Medicaid Nursing Facility Level of Care Determination (LOCD) prior to or the day of admission to a nursing facility. (Refer to the Nursing Facility Level of Care Determination Chapter for additional information.)
- Computer-generated Freedom of Choice (FOC) form signed and dated by the beneficiary or the beneficiary's representative as described in the Nursing Facility Level of Care Determination Chapter.

These components are defined below.

5.1.A. VERIFICATION OF MEDICAID FINANCIAL ELIGIBILITY

Medicaid reimbursement for nursing facility services for an individual requires a determination of Medicaid financial eligibility for that individual by MDHHS. When a nursing facility enters admission information for an individual who does not have active or pending Medicaid eligibility, a Medicaid Application for Health Care Coverage Patient of Nursing Facility (DHS-4574) will be automatically mailed to the individual.

Federal regulations require annual recertification that residents meet Medicaid financial eligibility requirements. The annual recertification process is performed by MDHHS.

In order for Medicaid to reimburse for nursing facility services from the date of admission of a Medicaid-eligible beneficiary, the Medicaid beneficiary must be in a Medicaid-certified bed, and the LOCD must be conducted as indicated in the Nursing Facility Level of Care Determination Chapter.

Medicaid Provider Manual

5.1.B. CORRECT/TIMELY PREADMISSION SCREENING/ANNUAL RESIDENT REVIEW (PASARR)

The Level I Preadmission Screening/Annual Resident Review (PASARR) must be performed prior to admission as described in the PASARR Process Section of this chapter.

A Level I Preadmission Screen must be performed for all individuals admitted to a Medicaid-certified nursing facility regardless of payer source. The Level I screening form (Preadmission Screening [PAS]/Annual Resident Review [ARR] (Mental Illness/Intellectual/Developmental Disability/Related Conditions Identification); DCH-3877 is available on the MDHHS website. (Refer to the Directory Appendix for website information.) The nursing facility is required to ensure that the PASARR Level I screening has been completed and passed (does not trigger a PASARR Level II) by the individual prior to admission.

Placement options for beneficiaries who were determined through Level II Preadmission screening to have a mental illness, intellectual/developmental disability or a related condition are determined through the federal PASARR screening process requirements as to whether or not they need nursing facility services, specialized services, and/or mental health services.

MDHHS performs retrospective reviews, randomly and when indicated, to determine that the nursing facility has complied with federal PASARR requirements. MDHHS reviews retrospectively to determine that the Level I screening was performed, and that the Level II evaluation was performed when indicated.

MDHHS is required to recover any payments made to nursing facilities for the period that a participant may have been admitted to a nursing facility when the PASARR screening process was not completed.

5.1.C. PHYSICIAN ORDER FOR NURSING FACILITY SERVICES

A physician-written order for nursing facility admission is required. By renewing orders, the physician certifies the need for continuous nursing facility care. The order must be signed and dated by the physician. The physician's degree must appear with the signature. A stamped signature is not acceptable.

With the exception of beneficiaries 21 years of age or under residing in a psychiatric facility, a physician (MD or DO) must approve a beneficiary's need for long-term care not more than 30 calendar days prior to the beneficiary's admission to a nursing facility.

For an individual who applies for Medicaid financial eligibility while a resident in a nursing facility, the physician must reaffirm the need for long-term care not more than 30 calendar days prior to the submission of the application for Medicaid financial eligibility.

Medicaid Provider Manual

5.1.D. APPROPRIATE PLACEMENT BASED ON MICHIGAN MEDICAID NURSING FACILITY LEVEL OF CARE DETERMINATION

5.1.D.1. MICHIGAN MEDICAID NURSING FACILITY LEVEL OF CARE DETERMINATION

Financially eligible Medicaid residents must meet medical/functional eligibility for Medicaid reimbursed nursing facility services. To verify medical/functional eligibility, the nursing facility (i.e., hospital long term care unit, county medical care facility, ventilator dependent unit, hospital swing bed, State Veterans' Home) must complete the online LOCD as described in the Nursing Facility Level of Care Determination Chapter.

Change of Ownership (CHOW)

If a new National Provider Identification (NPI) will be issued to a provider who is going through a CHOW, the provider must conduct the hard copy version of the LOCD and Freedom of Choice (FOC). Hard copies of the LOCD and FOC must be conducted in accordance with the policies in the Nursing Facility Level of Care Determination Chapter. Once the provider is given access to CHAMPS under their new NPI, the provider must enter all of the information from the hard copy LOCD into the online version of the LOCD in CHAMPS under their new NPI. The hardcopy LOCDs must be entered in CHAMPS within 30 days of the new NPI's approval date with Provider Enrollment. The records meeting this requirement will have the start date modified to equal the record's conducted date. To ensure proper payments, CHAMPS will then check if the conducted date of the LOCD and enrollment date of the new NPI are within the last six months. Both conditions must be met during a CHOW for CHAMPS to process payments. If the new owner will not be issued a new NPI, the new owner must continue to conduct online LOCDs according to the policies within the Nursing Facility Level of Care Determination Chapter.

5.1.D.2. RETROSPECTIVE REVIEW AND MEDICAID RECOVERY

At random and whenever indicated, the MDHHS designee will perform retrospective reviews of a sample of residents. The purpose is to validate the medical/functional eligibility of the beneficiary. The provider must submit all medical documentation requested by the MDHHS designee. If the resident is found to be ineligible for nursing facility services, MDHHS will recover all Medicaid payments made for nursing facility services rendered during the period of ineligibility.

5.2 ADMISSION PROCESS

Prior to or upon admission, the nursing facility must provide beneficiaries and their representatives the following information. The information must be provided both orally and in a written language that the beneficiary understands. Beneficiaries must be provided copies of those items noted with an asterisk (*).

- Rights as identified in federal regulations;
- All rules and regulations governing beneficiary conduct and responsibilities during their stay in the facility; *

Medicaid Provider Manual

- Rights as a Medicaid beneficiary and a list of Medicaid-covered services (services for which the resident may not be charged) as published in the Medicaid "Know Your Rights" booklet; *
- Noncovered items and services, as well as the costs, for which the beneficiary may be charged (admission to a facility cannot be denied because the beneficiary is unable to pay in advance for noncovered items/services); *
- Facility policies regarding protection and maintenance of personal funds; *
- A description of the facility's policies to implement advance directives; *
- Facility policies regarding the availability of hospice care; *
- The name, specialty and contact information of the physician responsible for their care;
- Information about how to apply for Medicare and Medicaid; * and
- How to file a complaint.

Facilities must notify residents and their representatives (both orally and in a written language that the beneficiary understands) of any changes to the information listed above.

Receipt of the above information and any amendments must be acknowledged, in writing, by the beneficiary or their representative. Individual facilities may develop their own documentation for this process.

5.3 PREADMISSION CONTRACTS

Nursing facilities must abide by all state and federal regulations regarding preadmission contracts.

Nursing facilities are prohibited from requiring a Medicaid-eligible person or a Medicaid beneficiary, their family, or their representative to pay the private-pay rate for a specified time before accepting Medicaid payment as payment in full. Nursing facilities violating this prohibition are subject to the appropriate penalties (i.e., revocation of their Medicaid provider agreement).

SECTION 6 – MEDICAL RECORDS

Nursing facilities are required to maintain a medical record for all residents as outlined in State and Federal statutes and regulations.

Nursing facilities are required to comply with all State and Federal requirements regarding medical record confidentiality, including compliance with all Health Insurance Portability and Accountability Act (HIPAA) requirements regarding privacy.

Nursing facilities must maintain all resident assessments completed within the previous 15 months in the resident's active record. Facilities with a "paperless" system in which clinical records are electronically maintained must be able to produce a paper copy if requested for record review by State surveyors.

Nursing facilities must respect the resident's access to their medical records as required by State and Federal laws and regulations.

SECTION 7 – CARE PLANNING PROCESS

Nursing facility care planning is a continuous and ongoing process of assessment, planning, evaluation, and revision. The purpose of the care planning process is to gather information from a variety of sources, and develop a written strategy to ensure that the resident receives services and supports necessary to attain or maintain the highest practical physical, mental, and psychosocial well-being. Sources of information to support care planning include the resident, their family and friends, physicians, specialists, nurses, nurse aides, dietitians, therapists and assessment tools (including the Minimum Data Set [MDS] for Nursing Facility Resident Assessment and Care Screening). A comprehensive plan identifies and addresses all aspects of the resident's health and well-being (physical/medical, emotional, mental, spiritual), not just those services that will be provided by the facility or covered by insurance. Using the principles and essential elements of person-centered planning, facilities are expected to involve residents and their designated support system throughout the entire process.

7.1 PERSON-CENTERED PLANNING

Person-centered planning is an ongoing process that recognizes the worth and dignity of each individual and their ability to choose how supports, services and/or treatment may be used to improve their life. The following principles apply:

- **Participation in planning** – Each individual has unique strengths, abilities and preferences and is able to express preferences and make choices. Each individual can participate in planning their life, with appropriate support if needed.
- **Support for planning** – People trusted by the individual and committed to supporting the individual's choices must be involved in planning for long-term care. The process is dependent on the participation of supportive relationships, such as family members and friends, and encourages their involvement, to the extent that the choices of the individual are reflected. These relationships support the individual's right to choose, even the right to take risks.
- **Outcome orientation** - Person-centered planning is outcome-oriented. The planning should lead to positive outcomes in the individual's life, i.e., helping to attain or maintain the highest practicable physical, mental, and psychosocial well-being. The individual determines what constitutes a positive outcome. For a younger adult with a disability, this may include building a career. For an older person near the end of life, the positive outcomes may include deciding where one dies and who is present.

Evidence of person-centered planning includes:

- An assessment process that offers the opportunity for gathering information concerning each resident's preferences, personal goals, needs and abilities, health status, and other available supports. This information should be used in developing an individualized plan of care. The individual's life plans should give direction to plans with service providers, such as discharge planning from nursing facilities into community-based settings. Nursing facilities should not exclude residents in the care planning process in order to meet facility requirements for writing care plans, obtaining signatures, and so forth.
- An assessment process that includes input from professionals and others chosen by the individual. In addition to the professionals required to participate in care planning, individuals should have support for making informed choices about the additional people and professionals

Medicaid Provider Manual

they invite to their person-centered planning meetings. For example, federal guidelines require an interdisciplinary team that includes a registered nurse who has responsibility for caring for the resident and prepares care plans. In addition, the resident may choose to invite a favorite nurse aide and a former neighbor/caregiver to participate in care planning.

- A plan of care that comprehensively addresses each individual's need for health care and other services in accordance with the individual's preferences and goals.
- Services delivered in accordance with the individualized plan of care.
- Informed choice, which includes, but is not limited to, choosing among covered services and enrolled service providers, decisions about the planning process, and evaluation of the planning and its outcomes. Informed choice means knowing the options in ways that are meaningful to the individual and having information when it is useful, not only at admission, but throughout the care process.
- Support for informed choice, which requires an organizational commitment to provide information and/or experiences that sufficiently inform an individual of their options. This commitment should be met through multiple and flexible means of providing information. These might include alternative forms of communication (e.g., Braille, sign language, audio-recorded documents), hands-on experiences with options, peer support from experienced participants, and so forth.

7.2 ASSESSMENT

In collaboration with the resident and individuals identified by the resident, appropriate facility staff must assess residents regularly and as needed to identify their preferences, wishes, goals, outcomes, capabilities, and medical and psychosocial needs. Nursing facilities should use assessment tools that are accessible (e.g., large print, verbal, appropriate language, etc.) to residents and individuals identified by the resident.

Assessment tools must include, but are not limited to, the Minimum Data Set (MDS) for Nursing Facility Resident Assessment and Care Screening. Nursing facilities are expected to use assessment tools and methods that accommodate the needs and preferences of individuals (e.g., mental health assessment tools, self-assessment tools in large print, etc.).

7.3 MINIMUM DATA SET (MDS)

Nursing facilities must conduct a comprehensive, accurate, standardized, and reproducible assessment of each resident's functional capacity. The use of the current federally specified Resident Assessment Instrument (RAI), which includes the MDS, Care Area Assessment (CAA) process, and utilization guidelines, is mandatory. Michigan has made a determination not to have a state-specific Section-S, but reserves the right to develop and require its data collection as need arises.

The MDS assessment must be conducted:

- Promptly upon admission, but no later than 14 days of admission;
- Promptly after a significant change in the resident's physical or mental condition or within two weeks, whichever is sooner; and
- Not less than once every twelve months.

Medicaid Provider Manual

The facility must examine each resident once every three months, revising the assessment as appropriate to ensure its continuing accuracy.

Results of the MDS assessment must be used, in addition to other information gathered and in collaboration with the resident, for developing, reviewing, and revising the resident's plan of care. The assessment must be maintained in the resident's medical record and kept confidential.

NOTE: The Michigan Medicaid MI Choice Waiver Agencies are the designated Local Contact Agency (LCA) relative to Section Q of the MDS. (Refer to the Directory Appendix for contact information.)

Each MDS assessment must be conducted or coordinated (with the appropriate participation of other health professionals) by a licensed, registered nurse who signs and certifies the completion of the assessment. Each person who completes a portion of the assessment must sign and certify the accuracy of that portion. Data accuracy resides with the nursing facility as the source of the data.

A facility must electronically transmit to the State, at least monthly, encoded, accurate, complete MDS data for all assessments conducted since the previous transmission. A facility that fails to transmit electronic RAI data to the State is considered out of compliance and, therefore, subject to enforcement actions. (Refer to the Nursing Facility Certification, Survey and Enforcement Appendix of this chapter.)

An individual who willfully and knowingly certifies a material and false statement, or causes another individual to do so, is subject to a civil money penalty.

Questions about the Resident Assessment Instrument should be directed to the Department of Licensing and Regulatory Affairs, Bureau of Survey and Certification, RAI Coordinator. (Refer to the Directory Appendix for contact information.)

Federal regulations require that facilities coordinate the PASARR process and MDS. MDHHS recommends that nursing facility administrators establish mechanisms to track completion dates of PAS and ARR evaluations so that, to the maximum extent practicable, they are coordinated with resident assessments and completion of the MDS.

7.4 PREADMISSION SCREENING/ANNUAL RESIDENT REVIEW (PASARR)

The Preadmission Screening and Annual Resident Review (PASARR) must be completed for all individuals seeking to enter a nursing facility regardless of payer source. Although not federally mandated, Michigan has elected to require the Annual Resident Review (ARR) for all residents in Medicaid-certified nursing facilities regardless of payer source.

The purpose of the PASARR process is to encourage community care by supporting the placement of individuals with Mental Illness (MI) or Intellectual/Developmental Disability (I/DD) or a related condition in a nursing facility only when their medical needs clearly indicate that they require the level of care provided by a nursing facility. For individuals with mental illness or an intellectual/developmental disability or having a related condition, the PASARR process ensures the appropriate determination of the need for nursing facility services and the need for specialized services. The PASARR process also includes an appeals system for individuals who wish to dispute a PASARR determination.

Medicaid Provider Manual

Screening and evaluations performed under PASARR and all PASARR notices must be adapted to the cultural background, language, ethnic origin, and means of communication used by the individual being evaluated.

(Refer to the PASARR Process section of this chapter for additional information.)

7.5 PLAN OF CARE

Nursing facilities are required to provide services and activities to attain or maintain the highest practicable physical, mental, and psychosocial well being of each resident. A written individualized plan of care must be developed in the context of a person-centered planning process in order to specify services and activities, and to accommodate individual needs and preferences. The plan outlines the goals, strengths and needs of the resident and how those will be addressed. A comprehensive plan identifies and addresses all aspects of the resident's health and well being (physical/medical, emotional, mental, spiritual), not just those services that will be provided by the facility or covered by insurance. The plan also identifies the resident's wishes and capabilities regarding the potential of relocation to a lesser level of care and includes discharge planning.

The comprehensive plan of care must be developed with direct involvement of:

- The beneficiary, family and/or their representative;
- The attending physician;
- An RN who has assessed the beneficiary, or who is familiar with the assessment;
- Other appropriate staff disciplines; and
- Any other trusted individuals that the beneficiary might wish to include.

Medicaid requires that a nursing facility ensure that a licensed physician supervises a beneficiary's medical care. The physician must review the entire individualized plan of care on an on-going basis. The entire plan of care may include sections for:

- Nursing care;
- Rehabilitative services (if required);
- Medication;
- Treatment;
- Restorative services;
- Diet;
- Activities;
- Special plans for health and safety;
- Continuing care, measurable objectives and timetables;
- Discharge (as appropriate); and
- Mental health services.

All services rendered must be documented and consistent with the written individualized plan of care.

Medicaid Provider Manual

7.6 EVALUATION/RE-ASSESSMENT/PLAN REVISION

Care planning is a continuous and ongoing process that requires regular re-assessment and revision of the plan of care. Federal guidelines require that the facility examine each resident not less than once every three months, and revise the resident's assessment as appropriate to ensure its continuing accuracy. Re-assessment should also occur with significant changes in the resident's condition and at the request of the resident or their representative. Once the re-assessment is completed, the current plan should be evaluated and revised to meet current goals and needs.

SECTION 8 – PASARR PROCESS

Pre-admission Screening/Annual Resident Review (PASARR) in Michigan is a two-level screening and evaluation process. The Level I screening and Level II evaluation procedures and forms are the same for Pre-admission Screening (PAS) and Annual Resident Review (ARR). The forms may be obtained from the MDHHS website.

The PASARR process must be completed:

- Prior to admission to a nursing facility;
- Promptly after a significant change in a resident's physical or mental condition; and
- Not less than annually.

The PASARR process is not required in the following situations:

- When an individual is admitted to and resides in a hospital swing bed. However, the PASARR process must be completed prior to admission if the individual transfers to a nursing facility.
- When an individual is readmitted to a nursing facility after a hospital stay. If the Annual Resident Review date occurs during a period of hospitalization, the screening must be completed within 30 days of admission or readmission to the nursing facility.
- For an individual transferring from one nursing facility to another, with or without an intervening hospital stay, unless a Level I screen has not been performed previously. If a Level I screening or Level II evaluation has been completed, the screening evaluation should accompany the beneficiary to the receiving nursing facility.
- For an individual returning to the nursing facility from therapeutic leave, unless the resident's condition has changed. Therapeutic leave does not change the due date for Annual Resident Review. Advance planning may be necessary to ensure timeliness of review.
- A beneficiary receiving Medicaid hospice services (Benefit Plan ID of Hospice) entering a nursing facility for the five-day hospice respite benefit. A Level I screening must be completed if the beneficiary enters the facility for a length of time beyond the five-day respite period.

The purpose of the Level I screening is to identify individuals who may have a mental illness, intellectual/developmental disability or a related condition. If the patient is on psychotropic or antidepressant medications for purposes of pain control/symptom relief for end of life, note that information on the DCH-3877. This allows the Community Mental Health Services Program (CMHSP) to better evaluate the need for Level II screening. If the patient is on any of the above mentioned psychotropic medication groups for a related mental illness, the CMHSP will determine the need for Level II screening.

- An individual assessed by adult protective services, requiring protective services, may be granted provisional admission to a nursing facility pending further assessment due to this emergent situation. Placement in a nursing facility is not to exceed seven (7) days.

Medicaid Provider Manual

The following table outlines screening requirements.

Pre-Admission Screening (PAS)	A Level I screening is required for all individuals seeking to enter a nursing facility regardless of payer source, except as noted above. The Level I screening, and the Level II evaluation when indicated, must be completed prior to admission to a nursing facility.
Annual Resident Review (ARR)	<p>All residents in Medicaid-certified nursing facilities must be reviewed at least annually to determine if the resident is in need of mental health services and/or continued nursing care. Annually means within every fourth quarter after the previous Level I screening or Level II evaluation, whether it was completed for admission, condition change, or annual review. The Level I screening must be completed for all residents, and a Level II evaluation must be performed if indicated.</p> <p>If a resident was hospitalized when an ARR was due, the Level I screening must be completed within 30 days of readmission, and any subsequent Level II evaluation must be completed within the quarter following readmission to the nursing facility.</p>
Change in Condition	A Level I screening must be completed immediately or, at most, within 14 days when there is a significant change in the resident's mental health, or a physical change that may impact the resident's mental health needs. Federal regulations define a "significant change" as a major decline or improvement in the resident's status that will not normally resolve itself without further intervention by staff or by implementing standard disease-related clinical interventions, that has an impact on more than one area of the resident's health status, and requires interdisciplinary review or revision of the care plan or both. Changes to the Minimum Data Set (MDS), Section E (indicators of depression, anxiety, mood) would indicate a significant change for PASARR purposes. A change in condition would also be done if the consumer is in a facility in any state other than Michigan and transfers into a Michigan nursing facility. This should be done as soon as the consumer arrives at the Michigan nursing facility, no later than the 14th day after arrival. The nursing facility must notify their local CMHSP via a DCH-3877 for a Level II evaluation.
30-Month Rule	<p>During the PASARR process, a nursing facility resident may be identified as no longer in need of nursing services but in need of specialized services. In this situation, if the resident has lived in a nursing facility for 30 continuous months, the CMHSP must advise the individual of their options, which may include community placement with specialized services or continued residence in the nursing facility with specialized services. Under these circumstances, no appeal needs to be filed in order to maintain nursing facility residency. The individual's status as a long-term resident must be evident in their nursing facility medical record.</p> <p>Individuals determined to need specialized services, who have resided in a nursing facility for less than 30 months, and who are found to no longer need nursing services must be assisted to transition to a more appropriate setting.</p>
Borton vs. Califono Transfer Trauma	Transfer trauma protections apply to individuals with mental illness, intellectual/developmental disability or a related condition who were determined during a PASARR Level II evaluation to not need nursing facility services. Transfer Trauma is defined as any adverse psychological and/or physical effects occasioned by the transfer of a nursing facility patient that would be materially detrimental to the physical or mental health of the patient.

Medicaid Provider Manual

8.1 LEVEL I SCREENING

The purpose of the Level I Screening is to identify individuals who may have a mental illness, intellectual/developmental disability or a related condition. Level I Screening is documented on the "Preadmission Screening (PAS)/Annual Resident Review (ARR) (Mental Illness/Intellectual/Developmental Disability/Related Conditions Identification)" form (DCH-3877). (Refer to the Forms Appendix for a sample form.) The DCH-3877 must be completed and signed by a registered nurse, licensed Bachelor's or Master's Social Worker, licensed professional counselor, psychologist, physician's assistant, nurse practitioner or physician.

The professional who completes the Level I Screening must provide a copy of the DCH-3877 to the prospective nursing facility resident or their legal representative. Notification must also be adapted to the cultural background, language, ethnic origin and means of communication of the person being evaluated. (For the distribution of forms and documentation, refer to the Distribution of PASARR Documentation subsection later in this section.)

The following table contains a list of psychopharmacological drugs that may indicate the presence of a mental illness. Included are examples of anti-depressant and psychotropic medications, defined as any drug that affects brain activities associated with mental processes and behavior.

The list is not meant to be all-inclusive.

Anti-Depressant Medications	
Generic Name	Brand Name
Amitriptyline Hydrochloride	Elavil
Bupropion Hydrochloride	Wellbutrin
Citalopam	Celexa
Doxepin Hydrochloride	Sinequan
Fluoxetine Hydrochloride	Prozac
Fluvoxamine	Luvox
Imipramine Hydrochloride	Tofranil
Mirtazapine	Remeron
Netazodone Hydrochloride	Serzone
Nortriptyline Hydrochloride	Aventyl, Pamelor
Paroxetine	Paxil
Sertraline Hydrochloride	Zoloft
Trazodone Hydrochloride	Desyrel
Venlafaxine Hydrochloride	Effexor

Psychotropic Medications	
Generic Name	Brand Name
Chlorpromazine Hydrochloride	Thorazine
Clozapine	Clozaril
Fluphenazine Hydrochloride	Prolixin
Haloperidol	Haldol
Loxapine Hydrochloride	Loxitane
Mesoridazine Besylate	Serentil
Olanzapine	Zyprexa
Quetiapine Fumarate	Seroquel
Risperidone	Risperdal
Thioridazine Hydrochloride	Mellaril
Thiothixene	Navane
Trifluoperazine Hydrochloride	Stelazine
Ziprasidone	Geodon

Medicaid Provider Manual

Miscellaneous Products	
Generic Name	Brand Name
Lithium Citrate	Cibalith-S
Lithium Carbonate	Eskalith, Lithobid

8.2 LEVEL II EVALUATION

The purpose of the Level II evaluation is to assess individuals who are identified as having a mental illness, intellectual/developmental disability or a related condition to determine the need for nursing facility services, specialized services, and/or mental health services. All individuals identified by Level I screening as possibly having a mental illness, intellectual/developmental disability or a related condition (a "yes" response to any question on the Level I screening form, DCH-3877) must receive a Level II evaluation unless it is documented that they meet one of the exemption criteria outlined in the next subsection, or the MDHHS/CMHSP finds that the individual does not meet the criteria for a serious mental illness under the PASARR provisions. The CMHSP is responsible for providing the nursing facility and the individual and/or legal representative with written documentation that the individual does not meet the PASARR criteria for a serious mental illness. If the individual is seeking admission to a nursing facility, the Level II evaluation, when indicated, must be completed prior to admission.

8.3 LEVEL II EVALUATION EXEMPTION

If the individual qualifies for an exemption to the Level II evaluation based on the criteria outlined below, the DCH-3878, "Mental Illness/Intellectual/Developmental Disability/Related Condition Exemption Criteria Certification" form must be completed. (Refer to the Forms Appendix for a sample form.) The DCH-3878 must be completed, signed, and dated by a physician's assistant, nurse practitioner, or a physician.

Exemptions to the Level II evaluation may be requested based on the following criteria:

- The individual is in a coma. If the individual is in a coma at the time the Level II evaluation is to be performed, the individual may be exempted from the Level II evaluation process. A physician must certify that the individual is in a coma. The individual may then be admitted to the nursing facility without a Level II evaluation. When the individual is no longer in a coma, the nursing facility must complete a Level I screening and refer for a Level II evaluation, if indicated.
- The individual has a primary diagnosis of dementia (such as Alzheimer's disease or another dementing illness). An exemption due to dementia cannot be claimed for any individual who is also identified as having an intellectual/developmental disability or a related condition, or for any individual with another primary psychiatric diagnosis. For example, an individual diagnosed with dementia and a primary diagnosis of depression may not be exempted. A physician's assistant, nurse practitioner or physician must certify that the individual meets the clinical criteria for dementia and does not have another primary psychiatric diagnosis, intellectual/developmental disability, or a related condition.
- The individual is convalescing after hospitalization for an acute illness and meets all of the following conditions:
 - The individual will be admitted to a nursing facility directly from a hospital after receiving acute inpatient care at the hospital. Treatment in an emergency room is not considered a hospital stay. An individual who received inpatient treatment in a

Medicaid Provider Manual

psychiatric facility cannot be admitted to a nursing facility claiming this exemption, nor can an individual who comes directly from home or any other community placement (i.e., Adult Foster Care [AFC] and assisted living).

- The individual requires nursing facility services for the condition for which they received care in the hospital.
- The attending physician, physician's assistant, or nurse practitioner has certified before admission to the nursing facility that the individual is likely to require less than 30 days nursing facility services.

Medicaid approves payment for a hospital discharge/convalescent care stay up to 30 days only. If the individual needs nursing care beyond 30 days, the nursing facility must notify the local CMHSP at least five working days before the end of the 30-day stay that a Level II evaluation is needed. The local CMHSP completes the Level II evaluation within 14 days of the date of notification and forwards the evaluation to MDHHS. The entire determination process must be completed within 40 days of the individual's admission from the hospital. If MDHHS determines that the individual no longer requires nursing facility services, Medicaid reimburses up to five days beyond the date of the determination to allow for appropriate discharge planning. It is expected that a nursing facility will begin discharge planning for residents at the time of admission from the hospital and discontinue this planning only when a determination is made that the resident will not be discharged from the nursing facility.

The person completing the Level II evaluation exemption must provide a copy of the DCH-3877 to the prospective nursing facility resident or their legal representative. Notification must also be adapted to the cultural background, language, ethnic origin and means of communication of the person being evaluated. (Refer to the Distribution of PASARR Documentation subsection of this chapter for additional information.)

8.4 LEVEL II EVALUATION COMPLETION

Individuals who are identified at the Level I screening as having a mental illness or intellectual/developmental disability or a related condition, and who do not meet exemption criteria outlined previously, must be referred to the local CMHSP for a Level II evaluation. Level II evaluations are conducted by mental health professionals through the local CMHSP under contract with MDHHS. The evaluation involves an interview with the individual, review of medical records, and consultation with nursing facility and/or hospital staff. The mental health professional must conduct the Level II evaluation in accordance with the MDHHS OBRA Operations Manual. A copy of this manual may be requested from the MDHHS OBRA Office or the local CMHSP.

When a Level II Evaluation is required, it must be completed prior to nursing facility admission.

When a Level II evaluation is indicated for an Annual Resident Review (ARR), the nursing facility must notify the local CMHSP of the need for the Level II evaluation at least 30 days prior to the due date of the ARR by sending them a new DCH-3877 (Level I screening form). For example, if the initial Level II evaluation was completed on April 15, 2004, the ARR is due April 15, 2005, and the facility must notify the local CMHSP that a new Level II is due by March 15, 2005. The local CMHSP is responsible for timely completion of Level II evaluations and for providing facilities with written documentation of PASARR determinations in a timely manner.

Medicaid Provider Manual

Once completed, the CMHSP forwards all documentation of the Level II evaluation to MDHHS. Based on this documentation, MDHHS determines whether the individual requires nursing facility services or can be served in an alternate setting. MDHHS also determines whether specialized services or other mental health services are needed to treat the individual's mental illness, intellectual/developmental disability or a related condition.

The MDHHS decision regarding the need for nursing facility services and the need for specialized services is forwarded to the referring CMHSP. It is the responsibility of the CMHSP to explain the evaluation and determination to the individual and their legal representative. The CMHSP must provide a copy of the evaluation and the MDHHS determination letter to the individual and their legal representative and explain the appeal rights to the individual and their legal representative. This information must also be adapted to the cultural background, language, ethnic origin and means of communication of the individual being evaluated.

The local CMHSP notifies the attending physician, nursing facility, and discharging hospital of the results of the evaluation and the MDHHS determination in writing within five (5) days of the review. A copy of this notification must be retained in the individual's record. (Refer to the Distribution of PASARR Documentation subsection of this chapter for additional information.)

If the facility does not receive a written determination as follow-up to a verbal determination within 30 days of an admission, the facility must send a written reminder to the CMHSP and the MDHHS OBRA Office within 45 days of the admission. (Refer to the Directory Appendix for contact information.)

The nursing facility is responsible for verifying that required PAS and ARR processes are completed and documented in the resident's record. The nursing facility medical record must include the determinations of the level of care, the need for specialized services, the original DCH-3877 and DCH-3878 forms, and the Level II evaluation report and supporting documents.

8.5 DISTRIBUTION OF PASARR DOCUMENTATION

The following chart shows the correct distribution of copies of PASARR forms (DCH-3877, DCH-3878) and Level II evaluation documentation. All originals must be fully completed and signed.

Level I Screening Documentation (DCH-3877)		
Original	Nursing facility record	All nursing facility admissions
Copy	Individual or their legal representative	All nursing facility admissions
Copy	CMHSP	If "yes" answer(s)
Copy	MDHHS via local CMHSP	If "yes" answer(s) and no exemption criteria met

Documentation of Exemption to Level II Evaluation (DCH-3878)	
Original	Nursing facility record
Copy	Individual or their legal representative
Copy	CMHSP
Copy	MDHHS via local CMHSP

Level II Evaluation Documentation	
Electronic Record	MDHHS OBRA Office
Copy	CMHSP
Copy	Individual or their legal representative
Copy	Nursing facility
Copy	Hospital, attending physician

MDHHS Determination	
Electronic Record	MDHHS OBRA Office
Copy	CMHSP
Copy	Individual or their legal representative
Copy	Hospital, attending physician
Copy	Nursing facility

8.6 COMPLIANCE

Failure of a nursing facility to comply with OBRA PASARR requirements will result in the loss of Medicaid reimbursement to the facility for services provided for that resident for any period during which a correct and timely screening or review was not completed for that resident. A claim should not be submitted for dates of services provided during periods for which required Pre-admission Screening or Annual Resident Review has not been completed.

The resident or parties responsible for the resident cannot be charged for the loss of reimbursement caused by the facility's failure to meet PASARR requirements.

The Level I screening is considered completed when the DCH-3877 has been filled out, signed, and distributed or, if exemption criteria are met, both the DCH-3877 and DCH-3878 have been filled out, signed, and dated with appropriate credentials noted, and distributed. The Level II evaluation process is completed when the CMHSP has completed the evaluation and the individual has been notified of the MDHHS determination.

For a screening or evaluation to be correct, the completed forms must contain information consistent with documentation in the resident's nursing facility medical record.

Compliance is monitored through the survey process, complaint investigations, and audits. Retrospective payment adjustments through interim gross adjustments and/or final settlements are made to recover funds as necessary. A nursing facility is not penalized for failures to meet PASARR provisions for which it is not responsible and/or could not prevent.

8.7 APPEALS OF PASARR DETERMINATIONS

Individuals adversely affected by PASARR determinations may appeal the determination or another person may appeal the determination on their behalf. Examples may include the determination that the individual no longer requires specialized services when they have received those services in the past and

Medicaid Provider Manual

wish to continue. An individual may decline nursing facility admission or specialized services without appeal.

Information regarding the MDHHS administrative hearing (appeal) process is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

8.8 COMPLAINTS

Complaints or concerns regarding a nursing facility's implementation of the PASARR regulations should be directed to the Health Facility Complaint Line. (Refer to the Directory Appendix for contact information.)

Complaints or concerns about local CMHSP implementation of PASARR policy should be sent to the MDHHS OBRA Office. (Refer to the Directory Appendix for contact information.)

SECTION 9 – MEDICAID COVERED AND NON-COVERED SERVICES

Determination of medical necessity and appropriateness of Medicaid services is the responsibility of the attending physician (MD or DO) and is subject to MDHHS review. Services must be within the scope of currently accepted medical practice, limitations of the Medicaid Program, and State and Federal requirements.

9.1 MEDICARE-COVERED SERVICES

For Medicare Part B covered services, MDHHS only pays up to a Medicare-enrolled beneficiary's obligation to pay (i.e., coinsurance and deductibles) or the Medicaid fee screen, whichever is less. In addition, Medicaid covers the coinsurance and deductible amounts on any Medicare-covered service not normally covered by Medicaid.

Medicaid co-insurance payments for Part A are the lower of the co-insurance charge or the current maximum co-insurance rate established under the formula stated in the Social Security Act. The facility's total payments from Medicare, Medicaid and other insurance may be up to, but cannot exceed, the amount established by Medicare as reasonable (i.e., the amount allowed by Medicare).

If the beneficiary has a Medicare benefit available, that benefit must be utilized before Medicaid pays any portion of the claim. If a beneficiary who has Medicare coverage is receiving services under CMHSP or PIHP capitation, the PIHP/CMHSP assumes the MDHHS payment liability described in this section.

For Medicare coinsurance days billed to Medicaid, the beneficiary may be in either a Medicare certified or Medicare/Medicaid dually certified bed.

Prior authorization is not required for billing the Medicare deductible and coinsurance amounts, even if the service would require prior authorization if Medicaid were the payer. However, if the facility is uncertain of Medicare coverage, prior authorization from Medicaid should still be obtained. This allows the facility to render the service, bill Medicare and then, if appropriate, bill Medicaid for its share of the service. If Medicare Part B covers an item or service that is included in the Medicaid per diem, the nursing facility is responsible for any coinsurance or deductible, even when billed by an ancillary provider.

Services for which Medicare has made a payment may not be used to offset the patient-pay amount.

If a beneficiary has Medicare Part B coverage, and Medicare does not cover a service, Medicaid considers the service to be included in the Medicaid reimbursement for routine nursing care.

9.2 MEDICARE DENIAL OF BASIC CARE

Medicare covers only skilled care. Medicaid covers both basic and skilled care. In the event a dually eligible Medicare/Medicaid beneficiary requires basic care, Medicaid will cover the service if all other admission criteria are met (e.g., physician order for nursing facility care and beneficiary meets the Medicaid Nursing Facility LOC Determination for NF care).

Medicaid Provider Manual

9.3 MEDICAID REIMBURSEMENT FOR A NURSING FACILITY BED FOLLOWING A QUALIFYING MEDICARE HOSPITAL STAY

A dually eligible beneficiary who resides in a Medicaid-only certified bed and is admitted to a hospital for acute care services may be eligible for Medicare-reimbursed Skilled Nursing Facility (SNF) benefits at the time of hospital discharge. If that beneficiary wants to return to the Medicaid NF bed they originally occupied, they may refuse their Medicare SNF benefit and Medicaid will reimburse for all medically necessary nursing facility days and other medically necessary services. The days billed to Medicaid must be included in the Medicaid census statistics.

The nursing facility must advise beneficiaries of their right to refuse their Medicare SNF benefit in order to return to their Medicaid NF bed. This notice must be in a manner that the beneficiary, family member, or beneficiary's legal representative can understand or have clearly explained to them as needed.

9.3.A. REQUIRED DOCUMENTATION

The facility must maintain, in the beneficiary's clinical and fiscal record, documentation that supports the beneficiary made the choice to forego Medicare-reimbursed services and return to their Medicaid-only certified bed. This documentation must be signed and dated by the beneficiary (or their authorized representative) and a nursing facility representative.

9.3.B. MEDICARE PART B

Required outpatient physical or occupational therapy, or outpatient speech pathology for NF beneficiaries must be provided and billed under Medicare Part B where applicable, even if no payments are made under Medicare Part A for the nursing facility stay.

9.4 OTHER INSURANCE

Many Medicaid beneficiaries have insurance coverage (either traditional health insurance or an HMO) through private and/or employer-based commercial policies. That insurance is always primary, and the rules of that insurer must be followed. This includes, but is not limited to, prior authorization requirements, qualifications of providers, and providing services through the insurer's provider network. MDHHS does not pay for services denied by the primary insurer because the primary insurer's rules were not followed.

MDHHS pays appropriate copays and deductibles up to the beneficiary's financial obligation to pay or the Medicaid fee screen, whichever is less. If the primary insurer has negotiated a rate for a service that is lower than the Medicaid fee screen, MDHHS cannot be billed more than the negotiated rate. Medicaid-covered services not included in the primary insurer's plan are reimbursed by MDHHS up to the Medicaid fee screen if all MDHHS coverage rules are followed. If a beneficiary with other insurance coverage is enrolled in a MHP or is receiving services under CMHSP or PIHP capitation, the MHP/PIHP/CMHSP assumes the MDHHS payment liabilities described in this section.

Medicaid Provider Manual

9.5 PAYMENT FOR NON-COVERED SERVICES

For necessary medical or remedial care recognized under State law but not covered by the Medicaid Program, the Medicare Catastrophic Coverage Act of 1988, Public Law 100-360, allows nursing facility beneficiaries to access their patient-pay amount to pay for these services. The services would include services rendered by providers not enrolled in the Medicaid program. The offset to the patient-pay amount must be reported for the month that services were provided. If Medicare covers the medical service, then Medicaid will continue to cover the Medicare deductible and coinsurance in the event it does not exceed the Medicaid fee screen.

Medicaid Provider Manual

SECTION 10 - MEDICAID SERVICE DESCRIPTIONS

The following table outlines those services that are included in the facility's per diem rate or are an ancillary service that may be provided to beneficiaries in a nursing facility. Following the table is a more detailed description of each service.

The nursing facility should contact the ancillary provider or Medicaid Provider Inquiry Line to confirm Medicaid coverage of ancillary services.

All services required as a condition of licensure/certification are included in the per diem rate.

Service Description	Covered		Non-Covered
	Included in Per Diem	Ancillary Service	
Administrative Services	X

10.1 ADMINISTRATIVE SERVICES

Nursing facilities must be administered in a manner that effectively and efficiently uses its resources to attain or maintain the highest practicable physical, mental and psychosocial well-being of each resident in compliance with all applicable State and Federal licensure and certification laws, codes and regulations. Services rendered in the general administration of the facility are included in the facility's per diem rate. Services include, but are not limited to:

- Arranging appointments;
- Building, equipment, and grounds maintenance;
- Development, adoption, and posting of patient rights;
- Development of disaster plans;
- Development of patient councils;
- Infection control;
- Insect and vermin control;
- Management of patient trust funds;
- Nursing care determinations;
- Quality control;
- Record keeping; and
- Utilization control.

Medicaid Provider Manual

10.2 ADMISSION KITS

Routine personal hygiene items in an admission kit are included in the per diem rate. Nonroutine personal hygiene items in an admission kit are not reimbursable and are not allowable costs.

10.3 ANCILLARY SERVICES

Ancillary services (i.e., services other than daily care services), excluding physician services, must be ordered and documented, in writing, by the beneficiary's attending physician, and the documentation must be retained in the beneficiary's medical record. The physician's signature on prior authorization forms, treatment plans, etc., certifies the necessity of ancillary services. The physician must review the beneficiary's progress resulting from the ancillary service not less than every 60 days and summarize the progress resulting from the ancillary service provided.

The orders must be for a specific beneficiary (no blanket orders) and prior to the service being rendered. Orders may be received by telephone but must be written in the beneficiary's medical record. Such services must be provided and billed by the appropriate enrolled provider. It is suggested that the facility contact the ancillary provider or the Medicaid Provider Inquiry Line to ascertain whether the service is covered prior to arranging for the provision of the service. (Refer to the Directory Appendix for contact information.)

The facility is responsible for arranging all ancillary and non-covered medical services. Arranging appointments and transportation for these services is included in the per diem rate.

The beneficiary or beneficiary's representative may choose to purchase non-covered services directly from an ancillary provider. The beneficiary pays the ancillary provider directly for the services provided. The nursing facility must retain, in the beneficiary's fiscal record, receipts showing that the beneficiary paid for the particular non-covered service. Medicaid post-payment reviews will be conducted to assure that the beneficiary's fiscal record contains the receipts.

Nursing facilities may not bill Medicaid for ancillary services except for therapies, oxygen, and the Medicare coinsurance or deductible for ancillary services. Otherwise, the ancillary provider must bill for the service. The Billing & Reimbursement for Institutional Providers Chapter contains the allowable nursing facility provider types that can bill for ancillary services.

Therapies may be billed by the facility regardless of coverage by Medicare. However, Medicaid remains the payer of last resort.

Ancillary services (e.g., physical therapy) provided to a beneficiary on the day of discharge may be billed to Medicaid, even if the beneficiary was admitted and discharged on the same date.

10.4 BEAUTY AND BARBER SERVICES

Any services of a professional beautician or barber are not included in the per diem rate and are not covered by the Medicaid Program. The beneficiary may purchase such services from personal funds. A beneficiary's patient-pay amount may not be used to cover these costs.

10.5 CHIROPRACTIC SERVICES (MEDICALLY-NECESSARY)

Chiropractic services, such as x-rays and treatment, are an ancillary service and are not included in the facility's per diem rate.

10.6 DENTAL SERVICES

The facility's per diem rate includes providing assistance with, and supplies for, daily oral hygiene. Dental supplies include, but are not limited to:

- Dental floss
- Mouthwash
- Mouthwash cups
- Denture adhesive
- Denture cleaner
- Denture cups
- Toothbrushes
- Toothpaste

Routine and emergency dental services are an ancillary service and are not included in the facility's per diem rate.

10.7 DIETARY SERVICES AND FOOD

Residents must be provided nourishing, palatable, well-balanced meals that meet their daily nutrition and special dietary needs. Dietary services must also meet the preferences of residents and offer substitutes of similar nutritional value.

Nutrition appropriate for each resident's condition is included in the facility's per diem rate. This includes, but is not limited to:

- Daily nutritious meals and snacks
- Reasonable food substitutes of a similar nutritive value
- Dietary supplements
- Enteral formulas, supplies, equipment, and associated nursing services
- Infant formulas
- Nursing services associated with total parenteral nutrition (TPN) *
- Special diets
- Therapeutic diets
- Water solutions

Medicaid reimburses non-profit nursing facilities that incur costs resulting from the purchase of raw food and food preparation associated with special dietary needs for religious reasons. (Refer to the Cost Reporting and Reimbursement Appendix of this chapter for more information.)

* The formula, equipment, and supplies required for the TPN feedings are an ancillary service and are not included in the facility's per diem rate.

10.8 DURABLE MEDICAL EQUIPMENT

10.8.A. STANDARD EQUIPMENT

Standard durable medical equipment is included in the facility's per diem rate. The durable medical equipment supplier and the nursing facility must make arrangements for purchasing or renting required equipment. Standard durable medical equipment includes, but is not limited to:

- Adaptive Activities of Daily Living (ADL) equipment
- Air mattresses
- Autoclaves
- Bed boards
- Bed cradles
- Bed pans
- Bed rails
- Beds (including hospital beds)
- Bedside safety rails
- Bedside stands
- Blood pressure apparatus
- Canes
- Comfortable cushioned chair
- Commodes
- Crutches
- Emesis basins
- Food pumps
- Footboards
- Footrails
- Footstools
- Freestanding trays for meals
- Geriatric chairs
- Infrared lamps
- Lap and half-lap trays
- Lifts
- Oxygen equipment and supplies
- Pads, water-circulating devices to apply heat or cold therapy (e.g., hot/cold packs, heating pads)
- Positioning pillows
- Pressure-relief positioning cushions
- Reading lights
- Sitz baths
- Splints
- Standard manual wheelchairs
- Suction machines
- Traction equipment
- Trapeze equipment
- Tub lifts
- Urinals
- Walkers
- Wash basins
- Wheelchairs for transport in or out of the facility

Such equipment must be available for all the residents demonstrating need. Previously acquired equipment should be adapted to meet the beneficiary's needs, if appropriate.

Medicaid Provider Manual

The facility is required to repair/maintain standard equipment, and this expense is included in the per diem rate. This may not be billed separately to Medicaid, the beneficiary, their family, or representative.

Replacement, repair and maintenance of standard equipment owned or rented by the beneficiary is not a Medicaid-covered benefit.

Medicaid policy has historically established that standard wheelchairs and other specified durable medical equipment are included in the Medicaid facility per diem rate in accordance with federal standards and state licensure requirements. The following describes what is meant by standard wheelchairs relative to current types of wheelchair products that are routinely prescribed and commonly available in the marketplace, and routinely prescribed and required for patient use in the long-term care environment.

In addition, nursing services include positioning and body alignment and preventive skin care. The nursing facility is responsible for proper pressure relief and positioning. The use of medical equipment as a substitute for responsible patient care is inappropriate and not covered.

Standard manual wheelchairs are included in the facility's Medicaid per diem rate. A standard manual wheelchair is any wheelchair that is routinely prescribed and required for patient use in the long-term care environment. Standard manual wheelchairs that must be available to meet health and care standards include wheelchairs and accessories that are manufactured stock items, including heavy-duty, light- or ultra-light -weight and/or -strength; hemi chairs; wheelchairs with adjustable or reclining backs; manual tilt-in-space; removable/adjustable arms; variable seat height, width or depth; anti-thrust seats; laterals, abductors, and adductors; or other non-custom positioning options. In addition, pressure-relief positioning cushions, positioning pillows, trochanter rolls, etc. required for proper beneficiary use of the wheelchair or the provision of nursing services are the responsibility of the facility.

10.8.B. CUSTOM-FABRICATED SEATING AND/OR POWER WHEELCHAIRS

Custom-fabricated seating and/or power wheelchairs for nursing facility residents may be covered when the established standards of coverage are met and the severity and intensity of the disease process requires custom-fabricated seating or a power-operated wheelchair as medically necessary and is an integral part of the facility's daily nursing plan of care.

Repairs to custom-fabricated equipment by the durable medical equipment provider are covered only when it is necessary to make the equipment serviceable. Extensive repairs and maintenance by authorized technicians are covered if the warranty has expired. The durable medical equipment provider may bill for authorized repairs. Routine periodic servicing, such as cleaning, testing, regulating, and checking of the equipment, is not separately reimbursable.

Medicaid Provider Manual

10.8.B.1. MEDICAL NECESSITY

A physician's order by itself is not sufficient documentation of medical necessity, even when it is signed by the treating physician. Clinical documentation from the medical record must support the medical necessity for the request and substantiate the physician's order. In addition, Medicaid coverage is not based solely on a physician's order; the request must also meet the standards of coverage published by MDHHS. (Refer to the Medical Necessity subsection of the Medical Supplier chapter for a complete description of medical necessity requirements.)

The nursing facility's responsibility for each resident's health care needs and other services, including patient care, transfers, safety, skin care, equipment, medical supplies, etc., are described in federal regulations and state licensure requirements. The use of medical equipment as a substitute for responsible patient care is inappropriate and not covered.

Refer to the Medical Supplier chapter for additional information regarding Medicaid definitions and standards of coverage for mobility and custom-fabricated seating systems.

10.8.B.2. NONCOVERED

Power wheelchairs and custom-fabricated seating systems, including add-on components, are not covered outside the facility per diem rate when:

- There is an appropriate economic alternative.
- The devices are not related to, or an integral part of, the nursing facility daily plan of care.
- The accessory or add-on component is deemed to be standard under the definition of a standard manual wheelchair.
- The wheelchair is used as a restraint or for the purpose of treating aberrant behaviors.
- The need for the wheelchair is a substitute for appropriate clinical nursing services, as defined in federal regulations.
- The wheelchair is inappropriate for the beneficiary's cognitive level or behavioral level.
- The beneficiary is unable to safely operate the wheelchair.
- A standard wheelchair meets functional need or outcome as defined in the plan of care.
- The device is ordered for nonstandard use (e.g., therapeutic modality or exercise).
- The device is ordered to increase sitting tolerance that exceeds acceptable medical guidelines for skin care and pressure.

10.8.C. PRIOR AUTHORIZATION

Prior authorization is required for Medicaid coverage of medically-necessary power wheelchairs, custom-fabricated seating, and manual wheelchairs with custom-fabricated seating systems outside of the facility per diem rate. The treating physician must initiate

Medicaid Provider Manual

the referral for custom-fabricated seating or a power-operated vehicle (POV) based on an identified medical need in the plan of care. Facility clinicians who are responsible for the overall nursing plan of care for, and treatment of, the resident prepare and submit prior authorization requests, medical documentation, and the Evaluation and Medical Justification for Complex Seating Systems and Mobility Devices form (MSA-1656) within 90 days of the date the evaluation was completed. (Refer to the Prior Authorization subsection of the Medical Supplier chapter for additional information, and to the Forms Appendix for a copy of the form and form completion instructions.)

10.9 END OF LIFE CARE

Facilities are expected to have systems and policies in place to address appropriate advance care planning and end of life care. Facilities must notify residents at admission of their policies regarding the implementation of advance directives and the availability of hospice care. Residents are entitled to adequate and appropriate pain and symptom management as a basic and essential part of their medical treatment.

10.10 ENRICHMENT PROGRAMS

Facilities are required to provide or arrange for an ongoing program of activities designed to meet the interests and physical, mental and social well-being of each resident. An individualized program may be developed as part of the person-centered care planning process. Programs designed to maintain the resident's quality of life are included in the facility's per diem rate. Such services include, but are not limited to:

- Social services;
- Books;
- Current periodicals (e.g., newspapers, magazines) [If the beneficiary personally subscribes to a periodical (e.g., newspaper, magazine) for their own use, they are responsible for payment of that subscription.];
- Diversional programs;
- Motivational programs;
- Reality-oriented programs; and
- Recreational programs.

10.11 FAMILY PLANNING SERVICES

Family planning services are an ancillary service and are not included in the facility's per diem rate.

10.12 HEARING SERVICES

Hearing evaluations are an ancillary service and are not included in the facility's per diem rate.

A Medicaid copayment is not required for nursing facility beneficiaries.

10.13 HOSPICE SERVICES

Upon admission to a nursing facility, residents must be advised of the facility's policies regarding the availability of hospice care.

Nursing facility beneficiaries (including Medicaid-approved complex care cases) are eligible for Medicaid hospice services if determined by a hospice provider to meet hospice level of care. Additionally, in certain situations (such as lack of a caregiver in the home), a hospice beneficiary, in consultation with the hospice provider, may elect to enter a nursing facility to receive end of life care. Medicare beneficiaries receiving or eligible for the 100-day skilled nursing benefit have the right to choose hospice instead. This decision should not be influenced by differences between hospice and Medicare skilled nursing facility reimbursement rates.

If the beneficiary is enrolled in a MHP and is admitted to the nursing facility with the hospice benefit, the MHP is responsible for reimbursement of hospice services.

For nursing facilities that elect to contract with hospice providers, a written contract is required between the hospice provider and the nursing facility that specifically outlines the responsibilities of each. Additionally, the contract must specify how the hospice provider will reimburse the nursing facility for room and board.

Nursing facilities **cannot** bill Medicaid directly for room and board or any other services for hospice beneficiaries. A hospice is responsible for all costs for a person receiving hospice care. The hospice bills Medicaid for room and board, then reimburses the nursing facility at the rate specified in the contract between the providers.

MDHHS reimburses the hospice for its daily rate, for room and board, and QAS for beneficiaries in Medicaid or Medicaid/Medicare dually certified beds. The room and board rate is 95% of the facility's Medicaid per diem rate, plus 100% of the QAS amount. Although the rate paid to the hospice by Medicaid is set, it is not necessarily the rate that the hospice must pay the facility. It is expected that some services may be purchased or traded between the facility and the hospice, so the negotiated room and board rate must be stipulated in the contract.

Hospice services are reimbursable for day of discharge if services were rendered, regardless of the setting in which the services were provided. This includes the transfer of the beneficiary from one hospice provider to another as long as services were provided by both agencies. (This will be randomly verified by post payment audit and as indicated.) If the beneficiary has hospice as of 12:01 a.m., the hospice is responsible for the payment of services provided to the beneficiary until midnight. The hospice will continue, for payment purposes, as the primary provider for the full day of discharge.

Room and board for a hospice/nursing facility (NF) resident is reimbursable on the day of discharge only if the discharge is due to resident death. Room and board reimbursement for the day of discharge from the NF for any other reason is not covered as the resident is not there at the midnight census to be counted as a resident.

Because Medicaid is making a payment for room and board (even though it is paid to the hospice), beneficiaries must be treated as all other Medicaid beneficiaries. For example, the facility cannot seek or accept additional or supplemental payment from the beneficiary, their family, or representative in addition to the amount paid for the covered service, even when a beneficiary has signed an agreement to do so.

10.13.A. NURSING FACILITY RESPONSIBILITIES

Nursing facilities must adhere to all State licensure requirements, even though some of the components of care are provided by the hospice rather than the nursing facility. An example of a licensure component completed by the hospice is that, upon admission, the hospice provides the facility with copies of the beneficiary's history and physical, interdisciplinary assessment, and plan of care. For purposes of licensure, these copies are accepted as appropriate.

If a beneficiary is already receiving hospice services and elects admission to a nursing facility, it is the responsibility of the hospice provider to update the beneficiary's location of service in CHAMPS. To update the beneficiary's location of service in CHAMPS, the hospice provider must discharge the beneficiary and complete an admission with the updated location of service in CHAMPS. (Refer to the Beneficiary Admission and the Beneficiary Discharge sections of the Hospice chapter for additional information.) The new admission will result in real-time changes to the beneficiary's Program Enrollment Type (e.g., HOS-NFAC) and the National Provider Identification (NPI).

Hospice staff cannot be utilized to meet staffing patterns required for licensure (i.e., the facility cannot include hospice staff on staffing reports).

Although the hospice is responsible for developing the coordinated plan of care, the nursing facility, as well as the beneficiary, must be an active participant in its development.

If the hospice beneficiary in a nursing facility has a patient-pay amount, it is the hospice's responsibility to collect that amount from the beneficiary. The nursing facility cannot collect the patient-pay amount from a hospice beneficiary unless the contract with the hospice specifically delegates that responsibility to the facility.

Services that must be provided by the nursing facility include:

- Room and board;
- Laundry (including facility items as well as personal items); and
- All other non-terminal illness-related services afforded other Medicaid beneficiaries (e.g., services included in the per diem rate).

Hospice covered beneficiaries residing in the nursing facility must not experience any lack of nursing facility services or personal care due to their status as a hospice beneficiary. Facilities must offer the same drugs, services, medical supplies and equipment to all beneficiaries who have elected the hospice benefit in the same manner that services are provided to other beneficiaries in the facility who have not elected hospice care. If a service is normally furnished as part of the facility's per diem rate, the service must also be provided to hospice beneficiaries. If services are provided for needs associated with a non-terminal illness and are normally furnished and billed by another provider, that practice would continue.

10.13.B. HOSPICE RESPONSIBILITIES

Hospice must certify/re-certify the beneficiary's need for hospice care.

If a beneficiary already living in a nursing facility elects the hospice benefit, it is the responsibility of the hospice to admit the beneficiary for hospice services, indicating the nursing facility NPI in the Admission Information Section in CHAMPS. A completed admission will result in real-time changes to the National Provider Identification (NPI) and the beneficiary's PET code. (Refer to the Beneficiary Eligibility chapter for additional information.)

The hospice, in collaboration with the beneficiary and/or family and nursing facility, will establish a coordinated plan of care for the beneficiary. The plan must specify the overall care to be provided and indicate, in detail, which services will be provided by the hospice and which will be provided by the facility.

If the hospice beneficiary has a patient-pay amount, it is the hospice's responsibility to collect that amount from the beneficiary. The nursing facility cannot collect the patient-pay amount from a hospice beneficiary unless the contract with the hospice specifically delegates that responsibility to the facility.

10.13.C. SERVICE PROVISION

The following is intended for use as a guideline only. It identifies services for which the hospice is responsible, services that the hospice may arrange, and services that are "negotiable."

10.13.C.1. SERVICES THAT HOSPICE MUST PROVIDE (RELATED TO THE TERMINAL ILLNESS)

- A coordinated plan of care outlining the responsibilities of each provider;
- Intermittent (i.e., less than eight hours per day) nursing care of the hospice beneficiary;
- Counseling (defined as bereavement, nutritional, and spiritual); and
- Social work services.

10.13.C.2. SERVICES THAT HOSPICE MAY ARRANGE (RELATED TO THE TERMINAL ILLNESS)

- Spiritual care; and
- Home health aide/homemaker services. This applies only for services not provided during the facility's normal provision of care. For example, if the facility normally provides baths five times a week but the hospice plan of care calls for a bath each day, the hospice aide would provide baths on the days the facility does not.

10.13.C.3. NEGOTIABLE SERVICES

Services that must be available for hospice beneficiaries but appropriate contracted providers may render, as related to the terminal illness and as included in the patient plan of care, include the following. These services are the responsibility of the hospice and **cannot** be billed to Medicaid by the contracted provider.

- Inpatient care for acute episodes of pain and symptom control;
- Inpatient respite care (not available for beneficiaries residing in a nursing facility);
- Laboratory;
- Pharmacy;
- Durable medical equipment, medical devices, and supplies;
- Radiology;
- Medical;
- Up to 24 hours of continuous care (at least eight hours of which must be nursing care) during periods of crisis;
- Physical therapy;
- Occupational therapy;
- Speech/language pathology; and
- Emergency ambulance transportation (if the service is included as part of the hospice plan of care).

10.14 HOSPITAL SERVICES

A nursing facility must have in effect a transfer agreement with one or more hospitals.

10.14.A. PLANNED INPATIENT HOSPITAL ADMISSION

When a hospital admission is planned, the beneficiary must be discharged from the nursing facility. The nursing facility must not count the day of discharge as reimbursable by Medicaid. This day is included on the hospital's claim when billing. The facility may not bill Medicaid for hospital leave days for a planned admission. (Refer to Holding a Bed [Hospital Leave and Therapeutic Leave] subsection of this chapter for more information.)

10.14.B. EMERGENCY INPATIENT HOSPITAL ADMISSION

When a resident is admitted to the hospital on an emergency basis, the nursing facility may receive Medicaid reimbursement for holding their bed. (Refer to Holding a Bed [Hospital Leave and Therapeutic Leave] subsection of this chapter for more information.)

10.14.C. OUTPATIENT AND EMERGENCY ROOM

Outpatient and emergency room services are an ancillary service and are not included in the facility's per diem rate.

Medicaid Provider Manual

A beneficiary who goes to the hospital for outpatient or emergency room services is not discharged from the nursing facility because the beneficiary is not admitted to the inpatient hospital. The beneficiary should be included in the census of the nursing facility, and this day may be billed to Medicaid even if the beneficiary was being treated at midnight in the hospital outpatient or emergency room.

10.15 HOUSEKEEPING AND MAINTENANCE

Facility and room/bed maintenance necessary to maintain a sanitary, orderly, and comfortable environment are a required service and included in the nursing facility's per diem rate.

10.16 INTRAVENOUS THERAPY

Intravenous therapy nursing services, supplies and equipment (including all pumps) are included in the facility's per diem rate.

Pharmaceuticals used in IV therapy are an ancillary service and are not included in the facility's per diem rate.

10.17 LABORATORY SERVICES

Any nursing facility that performs laboratory services must be certified/accredited under the Clinical Laboratory Improvement Amendments (CLIA).

Laboratory tests that are listed as waived tests under CLIA are included in the facility's per diem rate (e.g., Testrip). A list of these tests and the instrumentation needed to perform them can be found on the CMS website. (Refer to Clinical Laboratory Improvement Amendments under Provider Resources in the Directory Appendix for website information.)

Laboratory services that can only be performed with special laboratory equipment by professional laboratory staff may be provided and billed by the appropriate enrolled ancillary provider (e.g., independent laboratory, outpatient hospital). Such services are not included in the facility's per diem rate.

Drawing, collecting and delivery of laboratory specimens are routine nursing services. As such, they are included in the facility's per diem rate regardless of who actually performs the service (i.e., nursing facility or ancillary provider).

10.18 LAUNDRY SERVICES

Facilities are responsible for general laundry services (e.g., bedding) and the beneficiary's personal laundry (e.g., clothing). Such services are included in the facility's per diem rate.

Dry cleaning services may be billed to the beneficiary if the beneficiary requests the service in writing, they have prior knowledge that the service is not covered by Medicaid, and they agree to accept the cost. A beneficiary's patient-pay amount may not be used to cover these costs.

10.19 MEDICALLY-RELATED SOCIAL SERVICES

Nursing facilities must provide medically related social services to attain or maintain the highest practicable physical, mental and psychosocial well-being of each resident. These services may include, for example, information and referral, resident and family support, discharge planning, and are included in the facility's per diem rate.

10.20 MENTAL HEALTH SERVICES

Nursing facilities are required to have a written agreement with the local CMHSP outlining their working relationship to provide screening, evaluation and specialized services to nursing facility residents. The agreement must include a description of the process to be used to ensure the annual review of residents previously identified as having a mental illness, intellectual/developmental disability or a related condition. The agreement must also specify the means through which the facility and the CMHSP will deliver mental health services for nursing facility residents.

Completion of required Pre-admission Screening and Annual Resident Review is included in the facility's per diem rate. Prior to admission to a nursing facility, all individuals, regardless of payment source, must receive the Level I Pre-admission Screening (PAS) to identify the need for mental health and specialized services. Additional screening for mental health and specialized services is done as an Annual Resident Review (ARR), or more frequently in response to a change in a beneficiary's condition. (Refer to the PASARR Process section of this chapter for more information.)

Mental health services provided by the nursing facility staff, as specified in the resident's plan of care, are included in the facility's per diem rate. Nursing facilities must provide mental health, intellectual/developmental disability or related condition services that are of lesser intensity than specialized services to all residents who need such services.

10.20.A. SPECIALIZED SERVICES

Specialized services are those identified by the PASARR Level II and are provided or arranged by the CMHSP. These services must be available to nursing facility individuals regardless of whether they are identified and required by the PASARR process, or whether the individual is determined to require additional services to be provided or arranged for by the State as specialized services. Individuals with a primary diagnosis of dementia are also covered by this requirement, even though the PASARR process exempts individuals with a primary diagnosis of dementia.

The PASARR Level II evaluation may provide recommendations regarding the specialized services and programs needed by the resident. Recommendations are based on evaluation of the resident's impairment in functional skills and the severity of those deficits. Nursing facilities must meet the responsibilities as outlined in this section for providing specialized services.

"Specialized Services" are defined as those mental health services for residents who have a mental illness, intellectual/developmental disability or a related condition which are:

- Of greater intensity than those normally required from a nursing facility;
- Provided in conjunction with usual nursing facility services;

Medicaid Provider Manual

- Determined through the PASARR process;
- Provided or arranged for by the local CMHSP acting on behalf of the State; or
- Result in the continuous and aggressive implementation of an individualized plan of care.

Specialized services for residents with **mental illness** may include, for example, individual, group and family psychotherapy, crisis intervention services, and formal behavior modification programs.

Specialized services for residents with a **intellectual/developmental disability or related condition** include specialized professional involvement because the service need is related to the resident's intellectual/developmental disability or related condition. Evaluators must carefully distinguish between those service needs that require the involvement of an intellectual/developmental disability professional and those which are "generic" and do not require specifically-trained professionals. For example, administering medication is a "generic" service, while teaching a resident to self-administer may be a "specialized service" because it requires the involvement of an intellectual/developmental disability professional to design and monitor the program.

For residents with **multiple diagnoses**, such as intellectual disability and mental illness or intellectual disability and dementia, evaluators may recommend either specialized services or other mental health services, depending on the interrelationship of the two diagnoses.

10.20.B. NURSING FACILITY RESPONSIBILITIES

Responsibilities of the nursing facility include:

- Providing all of the usual and customary services (refer to the Medicaid Covered Services subsection) and as required by licensing and certification. This includes specialized mental health rehabilitation services as defined in 42 CFR 483.120.
- Monitoring the need for PASARR evaluations and ensuring that they are completed on time (refer to the PASARR Process section). The nursing facility must notify the CMHSP when a Level II evaluation is indicated.
- Collaborating with the resident or their legal representative and the CMHSP to develop an individualized plan of care for specialized services based on the needs identified during the PASARR Level II evaluation. The plan of care must outline the responsibilities of each provider for the specialized services.
- Coordinating the identified services (which may be obtained from the local CMHSP) and implementing and monitoring the services recommended in the individualized plan of care. Nursing facilities must also provide interventions which complement, reinforce and are consistent with any specialized services the individual is receiving or is required to receive by the State through the CMHSP. The individualized plan of care must specify how the facility will integrate relevant activities throughout all hours of the day at the facility to achieve consistency and enhancement of the goals identified in the individualized plan of care.

10.20.C. CMHSP RESPONSIBILITIES

Responsibilities of the CMHSP include:

- Performing the comprehensive evaluation (Level II evaluation) when required by the PASARR Screening.
- Collaborating with the resident or their legal representative and the nursing facility to develop an individualized plan of care for specialized services based on the needs identified during the PASARR Level II evaluation. The plan of care must outline the responsibilities of each provider for the specialized services.
- Providing specialized services to nursing facility residents who have been determined to need them through the PASARR process. MDHHS has allocated funds to local CMHSPs for this purpose.
- Providing training to nursing facility direct care staff to implement and monitor the programs as designed, and participating in the evaluation and modification of the plan of care as needed.
- Providing services to nursing facility residents on the same basis as to all other persons in the region. A nursing facility may use the local CMHSP as a mental health service provider in order to fulfill the nursing facility's obligation to provide specialized mental health rehabilitation services. Services for residents with a primary diagnosis of dementia are also available from a local CMHSP on the same basis.

Every year, funds are made available to local CMHSPs to provide specialized services and other mental health services to individuals residing in nursing facilities. Priority for use of these funds is for individuals with the most severe mental health problems who need specialized services. To the extent there are funds remaining after this priority group is served, MDHHS has given local CMHSPs authorization to serve individuals who need mental health services other than specialized services.

Ancillary providers of mental health services may bill Medicaid directly.

10.21 NURSING CARE

Nursing facilities must have nursing staff sufficient to provide nursing and other related services to attain or maintain the highest practicable physical, mental, and psychosocial well-being of each resident.

Nursing care includes the responsibility for development, implementation and oversight of a plan of care that remains consistent with on-going observation, assessment and intervention by licensed nurses. The following are examples of custodial and rehabilitative nursing care that may be performed by, or under the supervision of, licensed nurses and are included in the per diem rate. Nursing services include, but are not limited to:

- Observing vital signs and recording the findings in the beneficiary's medical record
- Administration of topical, oral, or injectable medications, including monitoring for proper dosage, frequency, or method of administration, including observation for adverse reactions

Medicaid Provider Manual

- Treatment of skin irritations or small superficial or deep skin lesions requiring application of medication, irrigation, or sterile dressings
- Routine changing of dressings in chronic, non-infected skin conditions and uncomplicated postoperative incisions
- Nursing observation and care of beneficiaries with unstable or complex medical conditions which can only be provided by, or under the immediate direction of, licensed nursing personnel
- Proper positioning in bed, wheelchair, or other accommodation to prevent deformity and pressure sores
- Provision of bed baths
- Routine prophylactic and palliative skin care (e.g., application of creams and lotions) for the prevention of skin irritation and pressure sores
- Administration of intravenous solutions on a regular and continuing basis
- Administration of tube feedings
- Nasopharyngeal aspiration required for maintenance of a clear airway
- Care of a colostomy or ileostomy during early postoperative period, on an on-going basis, and conducting colostomy training
- Use of protective restraints, bed rails, binders, and supports (if ordered by a physician and in compliance with state and federal regulations) provided in accordance with written patient-care policies and procedures
- Use of intermittent positive pressure breathing equipment and nebulizers
- Care of catheters
- Care of tracheostomies, gastrostomies, and other indwelling tubes
- Administration of oxygen or other medicinal gases on a regular and continuing basis in the presence of an unstable medical condition or when nursing assessment is required to determine frequency and necessity of administration
- Identifying the need for, and ensuring arrangements for, prompt and convenient clinical, laboratory, x-ray, and other diagnostic services
- Use of heat as a palliative and comfort measure, such as whirlpool and hydrocolator
- Training and assistance in transfer techniques (bed to wheelchair, wheelchair to commode, etc.)
- Training, assistance, and encouragement of self-care as required for feeding, grooming, toileting activities (including toilet routine to encourage continence), and other activities of daily living
- Normal range-of-motion exercises as part of routine maintenance nursing care
- Pain assessment and management

10.22 ORTHOTICS

Orthotics are an ancillary service and are not included in the facility's per diem rate.

Medicaid Provider Manual

10.23 OXYGEN

The administration of oxygen and the related nursing services are included in the per diem rate.

Oxygen gas, equipment, and supplies for intermittent and infrequent use are included in the facility's per diem rate.

If a beneficiary requires frequent or prolonged oxygen on a daily basis (i.e., at least 8 hours per day):

- As a resident in the Nursing Facility, the oxygen gas, equipment, and supplies must be billed by an enrolled medical supplier, not the nursing facility.
- As a resident in a County Medical Care Facility or a Hospital Long Term Care Unit, the oxygen gas, equipment, and supplies must be billed by the facility. A DME provider cannot bill for oxygen gas, equipment, and supplies for these residents.

NOTE: The rental of a concentrator **is** billable by a Medical Supplier and should not be confused as needing to be billed by the facility.

(Refer to the Billing & Reimbursement for Institutional Providers Chapter in this manual for billing instructions.)

Oxygen services (i.e., gas, equipment, and supplies) are not covered by Medicaid if Medicare is paying for the stay. Medicare's per diem reimbursement rate includes the oxygen services.

10.24 PERSONAL COMFORT ITEMS

Medicaid does not cover individual personal comfort items (e.g., telephone, television, radio, guest trays). Such services are not included in the facility's per diem rate. Beneficiaries may purchase individualized services with personal funds. A beneficiary's patient-pay amount may not be used to cover these services.

If the facility provides personal comfort items to all its beneficiaries (e.g., a television in the recreation room), the service is included in the facility's per diem rate.

10.25 PERSONAL HYGIENE ITEMS

Items needed for personal hygiene are included in the facility's per diem rate. Such items include, but are not limited to, the following:

- | | | |
|-----------------------------|--------------------------------------|--------------------|
| ▪ Bacteriostatic soaps | ▪ Hair conditioners (as appropriate) | ▪ Safety razors |
| ▪ Body lotions | ▪ Incontinence supplies | ▪ Sanitary napkins |
| ▪ Combs and brushes | ▪ Medicine cups | ▪ Shampoo |
| ▪ Cotton swabs | ▪ Oral hygiene supplies | ▪ Shaving cream |
| ▪ Deodorant/ antiperspirant | ▪ Patient gowns | ▪ Soaps |
| ▪ Facial tissues | ▪ Personal hygiene preparations | |

Medicaid Provider Manual

10.26 PHARMACY

Nursing facilities must provide pharmaceutical services to meet the needs of each resident.

Prescriptions must be ordered and documented, in writing, in the beneficiary's medical record by the attending physician. These prescriptions comply with the federally mandated tamper resistant prescription pad policy as long as the beneficiary does not have the opportunity to handle the medical record. Additional information on the tamper resistant prescription pad policy can be found in the Pharmacy Chapter of this manual.

A Medicaid copayment is not required for prescription pharmaceuticals for nursing facility beneficiaries.

The Michigan Pharmaceutical Product List (MPPL) contains the over-the-counter and prescription pharmaceutical products covered by Medicaid and any restrictions placed on those products, including when prior authorization is required. The prior authorization process is outlined in the MPPL and may be obtained by the physician or their designee. The Michigan Pharmaceutical Products List is available online. (Refer to the Directory Appendix for website information.)

Pharmaceuticals dispensed in nursing facilities must be billed through a pharmacy (unless pharmacy is included in the per diem rate, i.e., ICF/IID).

10.26.A. OVER-THE-COUNTER PRODUCTS (OTCs)

- The MPPL designates when an OTC drug is included in the facility's per diem rate. It is the responsibility of the facility to provide these products. Examples of OTCs in the per diem include mouthwash, topical antiseptics, analgesics, cough and cold preparations, ointments (both generic and brand name [e.g., Vaseline, Gold Bond]), and vitamins and minerals. The pharmacy or supplier must make arrangements with the nursing facility for reimbursement.
- OTCs not included in the per diem rate that may be billed to Medicaid, as outlined in the MPPL, are reimbursable to the pharmacy for nursing facility beneficiaries. Examples include Diphenhydramine and Insulin.

10.26.B. MEDICATION REVIEWS

Medication reviews, as required by federal regulations, are the responsibility of the facility and are included in the per diem rate. The pharmacist must make arrangements with the facility for reimbursement of such services.

10.26.C. RETURN OF UNUSED DRUGS

Nursing facilities must, with a few exceptions for drugs such as controlled substances that are prohibited from being reused, properly credit Medicaid by returning unused prescription medications to the pharmacy. This policy applies to Medicaid beneficiaries where Medicaid is paying for the prescription medication. This does not apply to residents who have Medicare Part D.

Medicaid Provider Manual

The nursing facility must maintain documentation of:

- The quantity of medications dispensed and consumed by a beneficiary; and
- The return of all unused medications to the pharmacy so the pharmacy can credit Medicaid.

The nursing facility is required to return all prescription drugs that can be appropriately returned to the pharmacy due to the following reasons:

- Discontinuation in use by the prescriber
- Transfer to another facility (e.g., hospital or nursing facility)
- Discharge from nursing facility
- Death of beneficiary

The nursing facility and pharmacy may be subject to post-payment review to ensure the unused prescription drugs (as allowed by Federal and State law) are being returned by the nursing facility, and Michigan Medicaid is properly credited for the returned unused prescription drugs.

The nursing facility provider must not return prescription drugs to the pharmacy which are unsuitable for return according to State and Federal law.

The returned prescription drugs must:

- Have been properly stored
- Be returned unopened
- Not be a compounded product
- Be dispensed in the original packaging
- Be a non-controlled substance

The nursing facility should contact its contracted pharmacist consultant for assistance regarding which prescription drugs are not appropriate for return.

10.26.D. BENEFICIARY PHARMACY INSURANCE DEDUCTIBLE, COINSURANCE, COPAYS AND PREMIUMS

10.26.D.1. BENEFICIARY LIABILITY UNDER MEDICARE PART D

Beneficiaries who are enrolled in Medicaid and Medicare are considered dual eligibles. Dual eligibles who reside in nursing facilities do not have to pay premiums, coinsurance, deductibles and copays for prescription drugs if they are enrolled in a Medicare Part D plan. However, the Medicare Part D benefit requires that Medicaid make a payment(s) for nursing facility care for one full calendar month before the dual eligible is exempt from prescription drug copays.

Medicaid Provider Manual

Under either Medicare or Medicaid, a nursing facility is not responsible for paying the pharmacy for a beneficiary's liability (copays, deductibles, and/or coinsurance) unless the facility has assumed this obligation by contract or such payment is required by state law.

10.26.D.2. COORDINATION WITH MEDICARE PART D

Medicaid does not coordinate benefits with the Medicare Part D benefit. Medicaid does not reimburse a pharmacy for the beneficiary's liability for prescription drugs if the beneficiary is:

- Enrolled in a Medicare Part D plan and the prescription drugs are covered under the Medicare Part D benefit.
- Eligible to join a Medicare Part D plan but chooses to retain their commercial insurance in place of joining a Medicare Part D plan.

If a beneficiary joins a Medicare Part D plan that has a premium more than the Medicare standard premium established for Michigan, the beneficiary must pay the difference in the cost that Medicare does not pay.

10.26.D.3. CONDITIONS WHEN NURSING FACILITIES CAN OFFSET THE PATIENT-PAY AMOUNT

The following table gives conditions on when a nursing facility can offset the patient-pay amount for the beneficiary's liability for prescription drugs.

If	Then
Beneficiary recently enters a nursing facility and their liability is not exempt under the Medicare Part D benefit until Medicaid has made a payment for one month, and it is established that the beneficiary will reside in the nursing facility for one month or more.	Nursing facility can offset the patient-pay amount for the beneficiary's liability during the initial month of the nursing facility stay.
Beneficiary is retroactively enrolled in Medicaid and their liability exemption under the Medicare Part D benefit has not yet taken effect.	The offsetting of the patient-pay amount for the beneficiary's liability can only occur for the first month if the retroactive enrollment in Medicaid is more than one month. The beneficiary's liability for subsequent months must be billed to the Medicare Part D plan by the pharmacy.
Beneficiary is prescribed drugs not covered by Medicare Part D, Medicaid or commercial insurance.	Nursing facility can offset the patient-pay amount.
Beneficiary has pharmacy copays, coinsurance, and deductibles from their commercial/private insurance.	Nursing facility can offset the patient-pay amount.

Nursing facilities cannot offset the patient-pay amount for insurance premiums.

Medicaid Provider Manual

Instructions for offsetting the patient-pay amount are contained in the Offset to Patient-Pay Amount for Noncovered Services section in the Billing & Reimbursement for Institutional Providers chapter.

10.26.D.4. RETROACTIVE MEDICAID AND MEDICARE PART D ENROLLMENT

If a beneficiary becomes retroactively enrolled in Medicaid and a Medicare Part D plan, a pharmacy can bill the Medicare Part D plan for the beneficiary's liability during the retroactive period in which the drugs were dispensed. However, in order for the pharmacy to bill Medicare Part D retroactively, the pharmacy must receive proof that Medicare Part D was made retroactive. The nursing facility can assist in getting the appropriate information to the pharmacy by obtaining the proof of retroactive eligibility from the beneficiary or the beneficiary's representative (this could be the facility). The pharmacy cannot make the decision of retroactive eligibility on its own. Hence, it is important that the nursing facility communicate with the pharmacy about the retroactive information so that the pharmacy can bill the Medicare Part D plan.

10.26.D.5. BENEFICIARIES INELIGIBLE FOR MEDICARE PART D

For beneficiaries who are not eligible for the Medicare Part D benefit, Medicaid will continue to coordinate benefits with their commercial/private insurance.

10.26.D.6. QUESTIONS ON MEDICARE PART D

Questions regarding a beneficiary's eligibility for Medicare Part D, specific Medicare Part D drug coverage, or retroactive enrollment in Medicare Part D must be directed to Medicare. Also, the Michigan Medicare/Medicaid Assistance Program (MMAP) provides free education and personalized assistance to people with Medicare and Medicaid, their families, and caregivers (including the nursing facility). (Refer to the Directory Appendix for contact information.)

Beneficiaries must contact their/their spouse's employer human resources department for questions concerning the coordination of their commercial/private insurance and Medicare Part D.

10.27 PHYSICIAN SERVICES

Physician services must be provided and are an ancillary service. Such services are not included in the facility's per diem rate. In accordance with federal requirements, residents have the right to choose an attending physician.

A physician must initially examine a resident within 48 hours of admission to the nursing facility, unless the resident has been examined by a licensed physician within five days before admission and a copy of that examination is available in the facility at the time of the resident's admission. If the admission occurs on a Friday, the exam must be completed within 72 hours.

A physician must evaluate a beneficiary every 30 days for the first 90 days after admission. The resident must then be evaluated every 60 days unless otherwise justified and documented by the physician. At a minimum, the resident must be evaluated at least once every 90 days on an ongoing basis.

Medicaid Provider Manual

A physician visit is considered timely if it occurs no later than ten days after the required visit. After the initial visit, the physician may alternate personal visits between the physician and a physician assistant, clinical nurse specialist or nurse practitioner.

10.28 PODIATRY SERVICES

Palliative treatment and routine foot care (e.g., trimming of the nails, removal of corns and calluses) are included in the facility's per diem rate.

Medically necessary podiatry physician services are an ancillary service and are not included in the facility's per diem rate.

10.29 PRIVATE DUTY NURSING

Private duty nurses are not covered in a nursing facility by the Medicaid Program nor are they included in the facility's per diem rate. The beneficiary may use personal funds to purchase private duty nursing services. A beneficiary's patient-pay amount may not be used to cover the cost of private duty nursing.

10.30 PRIVATE ROOM

When a Medicaid beneficiary requires a private room due to medical necessity, the nursing facility is reimbursed at the usual per diem rate. Private rooms required for medical necessity are included in the facility's per diem rate. Written documentation of medical necessity must be part of the beneficiary's medical record.

Medical necessity is defined as a documented medical condition that creates the need to isolate the resident for their safety and/or the safety of others (i.e., infection control). This also includes behavioral conditions related to a medical condition (i.e., aggression related to dementia). The medical necessity must be documented, as well as addressed, in care planning and treatment.

In cases where a Medicaid resident needs to be in a private room because they require isolation due to an infection or illness, but no Medicaid-certified private rooms are available, the MDHHS Long-Term Care Operations section may provide a written exception to this policy. This exception is provided to allow the residents to reside in a non-Medicaid-certified bed within their facility on a short-term, temporary basis. Form MSA-0823 (Nursing Facility Isolation Bed Request) may be completed by the NF in need of isolating a Medicaid resident in a private room using a non-Medicaid-certified bed. Only forms approved by MDHHS may result in Medicaid reimbursement for Medicaid beneficiaries residing in a non-Medicaid-certified bed on a temporary basis. (Refer to the Forms Appendix for a sample form.)

If a beneficiary requests a private room and there is no medical necessity, the beneficiary may elect to pay privately. The nursing facility must advise the beneficiary that a private room is not a Medicaid-covered service unless it is medically necessary, and that the beneficiary or family is responsible for paying the difference between the cost of a semi-private and private room. The facility may only charge the difference between what it would normally charge a private-pay resident for a semi-private and a private room. Facilities may not charge beneficiaries the difference between the Medicaid per diem rate and the rate charged a private-pay resident for a private room. For example, if the facility charges \$98.00/day for a semi-private room and \$112.00/day for a standard private room, the charge is \$14.00/day. The beneficiary's patient-pay amount may not be used for this purpose.

Medicaid Provider Manual

If the beneficiary agrees to pay the difference between the semi-private and private room rate, the beneficiary or family member must request permission, in writing, from MDHHS. The Request for Authorization of Private Room Supplemental Payment for Nursing Facility form (MSA-1580) is used to obtain the permission. The MSA-1580 is completed by the beneficiary or family member. (Refer to the Forms Appendix for a copy of MSA-1580.) Requests to supplement the cost of a private room are reviewed for cost and reason for request on a case-by-case basis. A response will be sent to the requestor, the beneficiary (if different), and the facility within ten working days.

This response must be retained as part of the beneficiary's medical record. Subsequently, these charges are subject to audit by MDHHS, CMS or designated representatives of either of those entities. These charges must be reported by the nursing facility as revenue received. This response, however, does not guarantee that the beneficiary will be provided a private room. The agreement to provide a private room is given by the nursing facility.

If a Medicaid beneficiary is in a private room (either Medicaid-certified or dually-certified) because the private room is the only bed available, the facility cannot request the beneficiary or beneficiary's family pay the difference between the semi-private and the private room rate, nor can the facility transfer or discharge the beneficiary due to non-payment of the difference.

10.31 PROSTHETICS

Prosthetic services are an ancillary service and are not included in the facility's per diem rate.

10.32 RADIOLOGY

Radiology services are an ancillary service and are not included in the facility's per diem rate.

10.33 SUBSTANCE ABUSE SERVICES AND TREATMENT

Services rendered for the treatment of alcohol and drug abuse are an ancillary service and are not included in the facility's per diem rate.

10.34 SUPPLIES, ACCESSORIES AND EQUIPMENT

Supplies, accessories, and equipment necessary to achieve the goals of the beneficiary's plan of care are included in the facility's per diem rate and must be available to the beneficiary. Medical supplies, accessories, and equipment include, but are not limited to:

- Atomizers
- Bandage products
- Bed linens
- Bib or protective cover
- Catheters/accessories and irrigation solution
- Cloth diapers
- Cotton balls
- Cotton swabs

Medicaid Provider Manual

- Deodorizers
- Diagnostic agents (e.g., Testape, Kyotest)
- Disposable diapers
- Disposable gloves
- Dressings (e.g., surgical pads, cellulose wadding, tape)

Note: Some supplies for complex wound care are not included in the per diem rate and must be obtained through a medical supplier or pharmacy. Supplies that must be billed by a medical supplier, including information for interpreting the list of supplies, are on the MDHHS website. (Refer to the Directory Appendix for additional information.)

- Elastic hose
- Enema kits
- Finger cots
- First aid trays
- Flameproof cubicle curtains
- Foot soaks
- Hot water bottles
- Hypodermic needles/syringes
- Ice bags
- Incontinence pads, pants, and liners
- IV supplies and equipment; related supplies (including IV infusion pump)
- Minor medical/surgical supplies
- Miscellaneous applicators
- Nebulizers (hand-held or used with a compressor)
- Ostomy supplies
- Plastic waste bags
- Recreational/therapeutic equipment and supplies to conduct ongoing activities
- Safety pins
- Sheepskin, devices and solutions for preventing/treating decubiti
- Slings
- Stethoscopes
- Straws
- Syringes/needles
- Thermometers
- Tongue blades (depressors)
- Towels/washcloths

Medicaid Provider Manual

- Tracheostomy care kits and cleaning supplies
- Trochanter rolls
- Water carafes/glasses

Note: This list is not complete. Generic equivalents and products in the same family (i.e., same general use) are also included in the facility's per diem rate.

10.35 TELEMEDICINE

A nursing facility can be either an originating or distant site for telemedicine. Refer to the Billing & Reimbursement for Institutional Providers Chapter for information regarding billing the originating site facility fee. Refer to the Telemedicine Chapter for additional information regarding telemedicine services.

Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.

10.36 THERAPIES

Routine maintenance therapy consists of the repetitive services required to maintain function. The development of the therapy and treatment are included in the per diem rate. Such therapy does not require the therapist to perform the service, nor does it require complex and sophisticated procedures.

Nursing facilities must provide or obtain specialized rehabilitative services if required by the beneficiary's plan of care. Non-routine occupational therapy (OT), physical therapy (PT) and speech therapy (ST) are ancillary services that are covered separately from the per diem rate if the following conditions are met:

- The therapy must be billed by the facility;
- There must be a written order by the attending physician/licensed physician's assistant for each calendar month of therapy; and
- The written orders must be signed by the attending physician/licensed physician's assistant or other licensed practitioner practicing within their scope of practice as defined in State law for OT, PT, and SLT and retained in the beneficiary's medical record.

Non-routine therapies do not require prior authorization (PA) for Medicaid beneficiaries residing in a skilled nursing facility within 60 days of their admission to the facility. Providers must obtain PA for any non-routine therapy services that are provided after the initial 60-day post-admission period. This change only applies to new admissions to a nursing facility. Subsequent emergency or planned hospitalizations do not impact the requirements for PA. A copy of the physician prescription or documented clearance to resume therapy must be retained in the beneficiary's medical record. Refer to Prior Authorization within the Therapy Services chapter of this Manual for additional information.

Refer to the Therapy Services Chapter of this manual for additional information.

Non-routine OT, PT and SLP services are included in the Patient Driven Payment Model (PDPM) rates paid to State Veterans' Homes. State Veterans' Home providers are to bill for non-routine therapies on the same claims as daily care. All therapy services require prior authorization.

10.37 TRANSPORTATION

10.37.A. NON-EMERGENCY NON-AMBULANCE TRANSPORTATION

The nursing facility is responsible for non-emergency non-ambulance transportation for all Medicaid beneficiaries, including Medicare/Medicaid beneficiaries when Medicare is covering the cost of the care. This transportation includes transport to medical appointments/treatment not available in the facility (e.g., dialysis treatment), as well as when the facility arranges for services to be provided at the facility (e.g., hearing aid dealer). The facility must either arrange or provide transportation. Reimbursement for non-emergency non-ambulance transportation, whether the beneficiary is transported to the appointment or the services are provided at the facility, is included in the facility per diem rate. The per diem rate also includes transportation for newly-admitted beneficiaries from a hospital or another residence.

Excluded from the per diem rate are charges for the transportation of equipment for portable x-ray services by an enrolled Portable X-ray Supplier. (Refer to the Independent Diagnostic Testing Facilities and Portable X-ray Suppliers chapter of this manual for additional information.)

Travel to out-of-state medical providers (other than Michigan Medicaid-enrolled "borderland" providers as defined in the General Information for Providers chapter of this manual) is not the responsibility of the facility and must be prior authorized by MDHHS.

The facility must select the most appropriate, cost-effective mode of transportation. Whenever possible, a facility-owned vehicle should be used. This vehicle must comply with the Americans with Disabilities Act (ADA).

In rare situations, the condition of a beneficiary needing non-emergency transport requires an attendant in addition to the driver. In such cases, it is appropriate for a nurse aide to accompany the beneficiary and this cost should be reflected in the annual cost report as "staffing costs associated with providing needed medical care." Sending a nurse aide or other staff member with the beneficiary being transported must not negatively impact the care of residents remaining in the facility.

The need for a nurse aide to accompany a beneficiary must not be confused with the responsibility of the family or legal guardian "to attend the beneficiary if escort is needed to sign consent forms, decide treatment options, sign insurance forms, provide histories, etc." A nurse aide is not to be responsible for these legal and medical decisions and knowledge.

10.37.B. EMERGENCY AMBULANCE

Nursing facilities must have contractual arrangements for ambulance services for emergencies. When there is an emergency, an ambulance provider renders the service and bills Medicaid.

10.37.C. NON-EMERGENCY AMBULANCE

When a physician issues a written order for non-emergency ambulance transportation, usually due to the need for a stretcher or other emergency equipment, the ambulance provider may only bill Medicaid directly and must maintain the physician's order as documentation of medical necessity. The written order must contain, at a minimum, the following information:

- Beneficiary's name and Medicaid identification (ID) number;
- Attending physician's NPI number and attending physician or provider signature;
- Type of transport necessary;
- Explanation of the medical necessity for ambulance transport (i.e., why other means of transport could not be used);
- Origin and destination;
- Diagnosis;
- Frequency of needed transports (required for ongoing, planned treatment); and
- Type of ongoing treatment (required for ongoing, planned treatment).

A separate physician's order is required for each individual transport, unless a beneficiary has a chronic medical condition that requires planned treatment. For chronic conditions, a physician may order non-emergency transportation for a maximum time period of up to 60 days in a single order. The physician's order for ongoing treatment must state the frequency of the transport and the type of ongoing treatment necessary. If non-emergency ambulance transport is not ordered by the beneficiary's physician, arrangements for payment must be between the facility and the ambulance provider, and cannot be charged to the beneficiary, beneficiary's family or used to offset the patient-pay amount. The cost of non-emergency ambulance transports not ordered by the beneficiary's physician must be identified and removed on Worksheet 1-B by the nursing facility.

10.38 VACCINES

Reimbursement for any vaccination ordered by the attending physician and administered in the nursing facility is included in the per diem rate. The invoiced purchase cost of the vaccine should be included as an allowable medical supply expense on the facility's cost report.

10.39 VISION

Vision services (examinations and glasses) are ancillary services and are not included in the facility's per diem.

A Medicaid copayment is not required for nursing facility beneficiaries.

SECTION 11 – SPECIAL PLACEMENTS AND AGREEMENTS

11.1 DEMENTIA UNITS

A nursing facility may elect to designate beds or units to address the special needs of beneficiaries with Alzheimer's disease or other dementing illnesses. Care for Medicaid beneficiaries in dementia specialty beds is reimbursed as defined for any other nursing facility bed.

11.2 HOLDING A BED (HOSPITAL LEAVE AND THERAPEUTIC LEAVE)

Medicaid reimburses the nursing facility for holding a bed while the beneficiary is admitted to a hospital for emergency medical treatment (hospital leave) or takes a therapeutic leave from the facility for non-medical reasons.

Prior to therapeutic leave or transfer to a hospital, providers must give written notice of the facility's bed hold and readmission policy to the beneficiary and a family member or legal representative. This must include information about Medicaid coverage for therapeutic and hospital leave. In an emergency, notice must be given to the beneficiary and family or legal representative within 24 hours. If the beneficiary refuses to have a family member notified, this must be documented in the beneficiary's record.

The hospital leave portion of this policy only applies when Medicaid is the primary payer for room and board for the nursing facility stay at the time of the emergency hospital admission. For beneficiaries who are dually eligible for Medicare/Medicaid or have other insurance, Medicaid will not reimburse for holding a bed if Medicare or the other insurance is the primary payer for room and board for the nursing facility stay at the time of hospital admission. Medicaid will reimburse for the bed, however, if the resident who was Medicaid at the time of the hospitalization returns to the facility within the ten-day period with Medicare or other insurance coverage for the subsequent stay.

The written notice must specify:

- The Medicaid bed hold policy under which the beneficiary is permitted to return and resume residence in the facility; and
- The facility's written policy under which a beneficiary is readmitted to the facility when their absence is in excess of the Medicaid-reimbursed leave days.

The beneficiary must be readmitted immediately to the first available bed if the beneficiary still requires nursing facility services and is still Medicaid eligible.

NOTE: This readmission policy also applies to Medicaid residents admitted before the effective date of the Denial of Payment for New Admissions (DPNA) who take temporary leave before, on, or after the effective date of the DPNA and are not considered new admissions upon return and, therefore, are not subject to the denial of payment.

Medicaid Provider Manual

11.2.A. HOSPITAL LEAVE DAYS

Medicaid reimburses a nursing facility to hold a bed for up to ten days during a beneficiary's temporary absence from the facility due to admission to the hospital for emergency medical treatment only when the facility's total available bed occupancy* is at 98 percent or more on the day the beneficiary leaves the facility. "On the day" is defined as the facility's census at midnight (i.e., 12:01 a.m. – the first minute of the day).

Facilities at 97.50 percent occupancy or more may round up to 98 percent. Facilities may not round up 97.45 percent – 97.49 percent to 98 percent.

Occupancy includes all licensed beds (e.g., Medicaid-certified, dual Medicare/Medicaid certified, licensed only). The 98 percent or more occupancy does not include beds held open for hospital or therapeutic leave day(s).

In cases where a facility's available bed occupancy is below 98 percent on the day the beneficiary leaves for an emergency admission to the hospital, but rises to 98 percent or more during their hospital stay, no hospital leave days can be billed for the beneficiary. Hospital leave days are only billable for a beneficiary if the occupancy rate is 98 percent or more on the day the beneficiary leaves the hospital.

In cases where the available bed occupancy is at 98 percent on the day the beneficiary leaves and drops below 98 percent during their hospital stay, the facility may bill up to 10 hospital leave days.

In instances where a facility is enrolled with Medicaid and has more than one provider NPI number, the available bed occupancy must be calculated separately for each provider NPI number.

Examples of Worksheet for Determining % of Occupancy

		Example 1	Example 2
A.	Total Licensed Beds (excluding beds in an approved non-available bed plan and/or beds disapproved by LARA for occupancy)	179	140
B.	Number of Total Licensed Beds Not Occupied (unoccupied beds available for a new resident)	2	7
C.	Beds for Residents on Hospital Leave (Medicaid or private pay is paying to hold the bed)	6	8
D.	Beds for Residents on Overnight Therapeutic Leave	0	10
E.	Total Residents on Leave (C + D = E)	6	18
F.	Adjusted Licensed Beds (A – E = F)	173	122
G.	Number of Residents Physically in Facility (total occupancy minus total residents on leave) (A – B – E = G)	171	115

* Calculation of available bed occupancy for purposes of Medicaid reimbursement for hospital leave days is different than calculation of occupancy for cost reporting purposes.

Medicaid Provider Manual

Examples of Worksheet for Determining % of Occupancy

		Example 1	Example 2
H.	Occupancy (number of residents physically in facility divided by adjusted bed capacity) (G / F = H)	171 / 173 = 99%	115 / 122 = 94%

Facilities billing for Hospital Leave Days must document in the beneficiary's medical (clinical) record what the facility's census was at the time the beneficiary left the facility for a hospital leave.

The facility must hold the bed and may bill Medicaid if there is reasonable expectation by the attending physician at the point of admission to the hospital that the beneficiary will return to the nursing facility by the end of the tenth day. The hospital admission must be for emergency medical treatment, as documented by the attending physician in the beneficiary's medical record.

An "emergency medical condition" is defined as a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain) such that the absence of immediate medical attention could reasonably be expected to result in placing the health of the beneficiary (or, with respect to pregnant women, the health of the woman or their unborn child) in serious jeopardy, serious impairment to bodily functions, or serious dysfunction of any bodily organ or part.

The beneficiary must return to the nursing facility in ten or fewer days in order for the nursing facility to bill Medicaid for hospital leave days.

If the beneficiary is in the hospital for more than ten days, the nursing facility is released from its obligation to hold the bed and cannot bill Medicaid for any hospital leave days. The resident may be charged to hold the bed for those days if they agree in advance. (See Medicaid Non-Covered Leave Days subsection.) The facility is encouraged to monitor the resident during the hospital stay to determine the likely length of hospitalization.

If the resident is expected to be in the hospital for ten days or fewer and dies while in the hospital, the nursing facility may bill Medicaid for the hospital leave days up to the day before the resident died.

If the resident returns to the nursing facility under Medicare coverage, and was Medicaid eligible prior to the emergency admission, the facility may bill Medicaid for the hospital leave days if the emergency hospitalization was for ten days or fewer.

A resident is counted in the facility census if they are in the facility at midnight. If the resident is out of the facility on hospital leave at midnight, that day must be counted as a hospital leave day. If the resident returns to the nursing facility from the hospital, then is re-admitted to the hospital for the same condition that they were hospitalized for previously, the 10-day period of Medicaid reimbursed hospital leave days continues if the

Medicaid Provider Manual

resident was not counted in the facility census for that day. If, given the circumstances above, the resident was counted in the facility census, a new 10-day period of Medicaid reimbursed hospital leave days may begin.

The resident need not be shown on the Medicaid claim as discharged from the nursing facility unless the hospital admission was a planned admission (not an emergency) or was longer than 10 days. NOTE: If the claim does show discharged, the facility is reminded of Medicaid's readmission policy. The beneficiary must be readmitted immediately to the first available bed if the beneficiary still requires nursing facility services and is still Medicaid eligible. This readmission policy also applies to Medicaid residents admitted before the effective date of the Denial of Payment for New Admissions (DPNA) who take temporary leave before, on, or after the effective date of the DPNA and are not considered new admissions upon return and, therefore, are not subject to the denial of payment.

Patient-pay amounts and billing methods are not affected by this hospital leave day policy. The nursing facility should continue to collect any patient-pay amount, typically on the first day of the month, and indicate the amount collected on the Medicaid claim. CHAMPS automatically deducts the patient-pay amount and reimburses the provider for the balance. If the facility bills Medicaid for hospital leave days that occur at the beginning of the month, then the nursing home should collect the patient-pay amounts as usual. The facility should charge the amount against the patient-pay that Medicaid will pay for that day. For example, if a resident has a patient-pay of \$200 and is in the hospital for an emergency condition for the first five days of the month (the stay is 10 days or fewer), the nursing facility should collect the patient-pay amount from the resident, then submit a Medicaid claim. Medicaid would reimburse the facility the hospital leave day per diem rate, minus the patient-pay amount. Using 2002 figures, the facility reimbursement would be \$150.30 $[(\$70.06 \times 5) - \$200]$.

There is no limit to the number of hospital leave days per resident that may be billed to Medicaid annually as long as there are no more than 10 consecutive leave days per hospital stay.

Medicaid hospital leave days are not included in the Medicaid census statistics. Leave days reimbursed by other payer sources must be included in the census statistics.

11.2.B. THERAPEUTIC LEAVE DAYS

If the beneficiary has a temporary absence from the nursing facility for therapeutic reasons as approved by a physician, Medicaid reimburses the facility to hold the bed open for up to a total of 18 days during a 365-day period. Therapeutic leave is for non-medical reasons, such as overnight stays with friends or relatives. A resident is counted in the facility census if they are in the facility at midnight. If the beneficiary is out of the facility on therapeutic leave at midnight, that day must be counted as a therapeutic leave day.

Medicaid Provider Manual

The Medicaid Program covers up to 18 therapeutic leave days in a 365-day period for each beneficiary if:

- The facility reserves the bed for the beneficiary during their absence; and
- The beneficiary's written plan of care provides for out-of-facility visits; and
- The beneficiary returns to the facility.

There is no limit to the number of therapeutic leave days that may be reimbursed at one time as long as the total does not exceed 18 days in a 365-day period (not the calendar year). For example, if a resident goes on a 5-day family vacation beginning April 10, 2003, that resident has 13 therapeutic leave days remaining until April 9, 2004.

If a beneficiary does not return from a therapeutic leave, the beneficiary must be discharged on the date they left the facility. The date of admission and the date of discharge may not be billed as therapeutic leave days.

Therapeutic leave days must be included in the Medicaid census statistics if the therapeutic leave day is being paid by the beneficiary or Medicaid.

11.2.C. MEDICAID NON-COVERED LEAVE DAYS

Medicaid does not reimburse providers to hold a bed for reasons other than emergency transfer to a hospital (10-day maximum per hospital admission), or therapeutic leave (18-day maximum per 365-day period). However, the facility may hold the beneficiary's bed for other reasons and for leave days not covered by Medicaid, and bill the beneficiary if the beneficiary:

- Has prior knowledge that the service is not a Medicaid benefit; and
- Desires to have the bed reserved; and
- Agrees, in writing, to pay the facility to hold the bed at a specified rate. (The beneficiary's patient-pay amount may not be used for this purpose.)

If the beneficiary elects to not pay privately, the beneficiary has the option to return to the next available, equivalent bed. A beneficiary cannot be involuntarily transferred/discharged after a temporary absence, including discharge to obtain acute care in an inpatient hospital, unless the appropriate criteria are met and the appropriate regulations, policies, and procedures are followed.

Medicaid Provider Manual

Except for Medicaid-covered leave days and when beneficiaries have paid to hold a bed, the beneficiary must be discharged from the facility and then readmitted upon return to the first available bed.

All paid bed hold days (excluding Medicaid hospital leave days) must be included in the Medicaid cost report census statistics.

11.3 INVOLUNTARY TRANSFER OR DISCHARGE

11.3.A. CONDITIONS

A nursing facility must not involuntarily transfer or discharge a beneficiary unless:

- It is necessary for the welfare of the beneficiary, and the beneficiary's needs cannot be met in the facility; *
- The beneficiary's health has improved sufficiently so the beneficiary no longer needs the services provided by the facility; *
- It is necessary to protect the safety of individuals in the facility;
- It is necessary to protect the health of individuals in the facility; *
- The beneficiary has failed, after reasonable and appropriate notice, to pay (or to initiate payment under Medicaid) for a stay at the facility; or
- The facility ceases to operate.

The facility must include documentation in the beneficiary's clinical record for any of the above circumstances.

11.3.B. TRANSFER TRAUMA

For certain residents (defined below), transfer trauma must be considered when that resident may be moved due to a change in the level of nursing need.

Transfer trauma is defined as "any adverse psychological and/or physical effects occasioned by the transfer of a nursing home patient that would be materially detrimental to the physical or mental health of the patient."

Residents for whom transfer trauma must be considered include all those who have resided in the current nursing facility for at least one year, or who have been involuntarily transferred within the previous year. (A discharge to obtain acute care in an inpatient hospital, followed by an immediate readmission within three weeks to the same nursing facility, does not interrupt the continuity of a resident's stay.)

The SSA evaluates transfer trauma. This evaluation considers the social, mental and emotional adjustment of the resident, including the length of time that the resident has

* Items require documentation of medical necessity by the attending physician.

Medicaid Provider Manual

been in the nursing facility and the relationships that the resident has formed in the facility. This evaluation may also consider the resident's age, history and success of previous placements, and history of adapting to change. Consideration must also be given to the opinion of the attending physician regarding the resident's social and emotional adjustment and the physical effects of the proposed transfer.

Transfer trauma must be considered before the resident is notified of a nursing level of care change. When Medicaid is the payer source, Medicaid payment at the current level continues while transfer trauma is being considered.

If Medicaid was not the payer source immediately prior to the transfer trauma issue being raised, then Medicaid payment is not made until a decision is reached.

If the transfer trauma decision upholds the beneficiary's medical need to remain in a bed not certified for their present level of care, then the beneficiary's prior level of care will be retained to provide for continued Medicaid coverage.

If it is determined that there is no issue of transfer trauma, the beneficiary must be transferred to a bed or setting appropriate for the new level of care. MDHHS will change the Benefit Plan Assignment, which can be appealed by the beneficiary or their designated representative.

Concerns about involuntary transfer and/or transfer trauma should be reported to the Health Facility Complaint Line. (Refer to the Directory Appendix for contact information.)

11.3.C. BENEFICIARY NOTIFICATION

Nursing facilities must give beneficiaries a 30-day written notice regarding transfer unless:

- The transfer or discharge is a health care emergency;
- The safety or health of beneficiaries or staff is endangered;
- The beneficiary agrees to the transfer/discharge;
- The beneficiary's health has improved sufficiently so the beneficiary no longer needs the services provided by the facility; or
- The facility ceases to operate.

The notice must include:

- The reason for the transfer or discharge;
- The effective date of the transfer or discharge;
- The location to which the beneficiary will be transferred or discharged;
- The name, address, and (toll-free) telephone number of the State Long Term Care Ombudsman;

Medicaid Provider Manual

- For beneficiaries with developmental disabilities (DD), the mailing address and telephone number of the agency responsible for the protection and advocacy of DD individuals, established under the Developmental Disabilities Assistance and Bill of Rights Act;
- For nursing facility beneficiaries with mental illness (MI), the mailing address and telephone number of the agency responsible for the protection and advocacy of MI individuals, established under the Protection and Advocacy for Mentally Ill Individuals Act; and
- Appeal rights.

The facility must also provide:

- Sufficient preparation and orientation to beneficiaries to ensure safe and orderly transfer or discharge from the facility, as required by state and federal regulations; and
- Notice of the facility's bed-hold and re-admission policy, including the Medicaid bed-hold policy.

If a nursing facility elects to discontinue operations (voluntary closure) or withdraw from the Medicaid program, the facility must provide notice to the beneficiary as outlined above not less than 30 days before the closure or withdrawal. The notice must be sufficient to allow for suitable relocation arrangements.

11.4 MARRIED COUPLES

When married beneficiaries or blood relatives live in the same Medicaid nursing facility, they may share a room if both spouses or their relatives consent. (This policy applies only to beneficiaries who both require nursing facility services. It does not apply when one beneficiary does not require nursing facility services. For example, if both spouses wish to share a room in a nursing facility, in order for Medicaid to cover both of them in the facility, they must both require nursing facility services. If only one of them requires nursing facility services, Medicaid only covers services for that person.)

11.5 COMPLEX CARE

The Complex Care Prior Approval-Request/Authorization for Nursing Facilities form (MSA-1576) is used to request prior approval (PA) for the placement of a Medicaid beneficiary for whom placement from a hospital has been, or could be, hindered due to the cost and/or complexity of nursing care or special needs. The authorization covers an individually negotiated reimbursement rate for the placement. Special individualized placement requests and payment arrangements are based on medical necessity and/or service/supply needs exceeding those covered by Medicaid reimbursement for routine nursing facility care.

Examples include, but are not limited to:

- Ventilator dependent care (for nursing facilities not contracted with MDHHS to provide ventilator dependent care)
- Multiple skin decubiti utilizing several treatment modalities

Medicaid Provider Manual

- Tracheostomy with frequent suctioning needs
- Beneficiaries who require intensive nursing care or treatment.

Program requirements:

- Referrals must come from the nursing facility.
- Hospitals must document that at least ten (10) Medicaid certified nursing facilities within a 50 mile radius of the hospital refused to admit the beneficiary due to the complexity of the patient's care needs.
- Nursing facilities may request approval after admitting a beneficiary if the hospital failed to accurately document the beneficiary's condition and needs prior to transfer to the nursing facility. The nursing facility must request approval within 30 days from the date of admission to the nursing facility.

The following information must be submitted:

- A completed MSA-1576, including any requests for additional nursing, CENA, supplies or equipment. **NOTE:** The only supplies or equipment that will be considered are those not included in the facility's per diem rate or not separately billable by a Medicaid-enrolled medical supplier. An electronic copy of the form is available on the MDHHS website. (Refer to the Directory Appendix for website information.) (Refer to the Medicaid Service Descriptions Section of this chapter for information regarding what services are to be provided by the NF as part of the daily per diem reimbursement.)
- The beneficiary's medical background, including:
 - current medical status;
 - admitting history and physical;
 - a copy of all consultations;
 - most recent three-day physician progress notes;
 - treatment/nursing care plan; and
 - justification for any additional nursing hours and/or special equipment requested.

(This information should be included on the MSA-1576.)

- Recent (within the past 30 days) lab, x-ray, and diagnostic or therapeutic test results or reports.
- A list of 10 nursing facilities (as documented by the hospital) within a 50-mile radius that have denied admission, including:
 - Name, address, and telephone number of the nursing facility
 - Contact person's name and title
 - Date of contact
 - Reason for denial
- Documentation of the financial resources available to the beneficiary, including:
 - Medicaid coverage

Medicaid Provider Manual

- Medicare Parts A and B
- Other commercial insurance coverage.
- Name and telephone number of a contact person at the nursing facility seeking the additional reimbursement for complex care.

It may take up to 15 business days for the MSA-1576 to be processed. If it appears that a beneficiary, upon discharge, will require intensive nursing care, the hospital's discharge planning coordinator should initiate the MSA-1576 as early in the beneficiary's hospital stay as possible to ensure a smooth transition to the nursing facility.

MDHHS will make a determination and return to the provider a letter indicating approved, denied, insufficient data, no action, or approved as amended. If approved, the approval letter will contain a PA number with start and end dates. To renew a request, the facility must submit another MSA-1576 at least 15 business days prior to the expiration/end date.

A beneficiary residing in a nursing facility with an active complex care prior authorization for vent care for two consecutive years must receive a pulmonary evaluation at the beginning of the third year and annually thereafter. A beneficiary may be exempt from the annual pulmonary evaluation if, at the time the scheduled evaluation is due, the beneficiary elects not to have the evaluation, the physician documents a medical reason to not perform it, or the beneficiary received a pulmonary evaluation within the current year, such as during a hospital stay. If the beneficiary chooses not to have the evaluation, the nursing facility must notify the beneficiary's physician of that decision. Documentation of the decision to decline the evaluation by either the beneficiary or the physician must be in the beneficiary's medical record.

11.6 ONE-DAY STAY

A nursing facility is reimbursed for a one-day stay if a Medicaid beneficiary is admitted to the facility and, the same day, is discharged from the facility due to death, return home, or transfer to another institution that is not a Medicaid-enrolled provider. The one-day stay does not apply to a beneficiary admitted to a nursing facility if, later that day, the beneficiary is discharged and transferred to another nursing facility or an inpatient hospital and, at midnight, the second facility or hospital claims the beneficiary in its daily census.

A one-day stay must be included in the Medicaid census statistics.

Medicaid Provider Manual

11.7 RELIGIOUS NON-MEDICAL HEALTH CARE CENTER

Religious Non-medical Health Care Centers may be licensed as nursing facilities and certified for Medicaid. Beneficiaries in Medicaid-certified facilities, under the care of a practitioner, may be determined to be in need of nursing care and, therefore, covered by Medicaid.

SECTION 12 – SPECIAL PROVIDER TYPE COVERAGES AND LIMITATIONS

12.1 HOSPITAL SWING BEDS

In order to address the shortage of rural nursing facility beds, federal requirements allow rural hospitals to provide post-hospital extended care services. Such a hospital, known as a swing bed hospital, can "swing" beds between hospital and nursing facility levels of care on an as-needed basis. In order to receive Medicaid reimbursement, hospital swing beds must meet all applicable state and federal requirements and provide all required services.

Providers of hospital swing bed services may bill Medicaid for hospital swing bed days only when the combined length of stay in the acute care bed and swing bed exceeds the average length of stay for the Medicaid inpatient diagnosis related group (DRG) of the admission. Hospitals that are exempt from the DRG reimbursement system may bill for Medicaid-covered swing bed days beginning the day of admission to the swing bed.

The total number of Medicaid-reimbursed hospital swing bed days is limited to 100 days per beneficiary per calendar year.

A hospital swing bed provider must not provide extended care services if the hospital owns or operates a hospital long-term care unit that has beds available at the time a patient requires admission for extended care services.

Medicaid does not require the MDS for clinical assessment purposes or reimbursement for beneficiaries in hospital swing beds. The PASARR process must be completed, as outlined earlier in this chapter, prior to placement in a nursing facility.

(Refer to the Billing & Reimbursement for Institutional Providers Chapter of this manual for additional swing bed billing instructions.)

12.2 VENTILATOR-DEPENDENT CARE UNITS

There may be occasions when a beneficiary no longer requires acute hospital care but requires specialized care in a Ventilator Dependent Care Unit (VDCU). Medicaid authorizes admission of ventilator dependent Medicaid beneficiaries to hospital and nursing facility ventilator units with which it has agreements to provide VDCU services, and for which there is an enhanced Medicaid reimbursement.

12.2.A. PLACEMENT CRITERIA

A request for placement must show that the:

- Beneficiary is dependent on life-supporting mechanical ventilating equipment for at least six hours per day.
- Beneficiary stay normally meets or exceeds the hospital high-day outlier threshold for DRG 207.

Medicaid Provider Manual

Approval for admission to a VDCU will not be given for a beneficiary who is only on CPAP or BIPAP. If a beneficiary has weaning potential or requires other rehabilitative services (in addition to the respiratory care) and is enrolled in a Medicaid Health Plan (MHP), the MHP is responsible for the first 45 days reimbursement in the post-acute setting. If there is no weaning potential and the beneficiary does not require rehabilitative services, disenrollment from the MHP may occur at the time the beneficiary is discharged from the hospital.

The MHP is responsible for initiating disenrollment of a beneficiary by submitting the Request for Disenrollment Long Term Care form (MSA-2007) to MDHHS.

In situations where a beneficiary cannot immediately be placed in a nursing facility or hospital VDCU, Medicaid will cover nursing days in the inpatient hospital. When the beneficiary is in a hospital setting because a nursing facility placement is not available, Medicaid will cover the ancillary services provided by the hospital.

The hospital cannot charge a beneficiary the difference between the hospital's charge and the MDHHS payment for nursing days.

If a beneficiary refuses an appropriate placement to a VDCU, the beneficiary is responsible for all hospital charges incurred after the date of referral.

12.2.B. AUTHORIZATION FOR VDCU PLACEMENT

To begin the prior authorization process once a VDCU has agreed to accept the beneficiary, the VDCU must contact (by telephone) the MDHHS Program Review Division (PRD) for authorization. MDHHS will consider the request for ventilator-dependent unit care based on current Medicaid policy. The request will be approved or denied immediately during the telephone call. (Refer to the Directory Appendix for contact information.)

Note: If the PA request is approved, MDHHS will:

- request the VDCU's National Provider Identifier (NPI) for inclusion in the prior authorization record; and
- provide the VDCU with a prior authorization number for billing purposes.

The nursing facility must report any change of condition, such as weans from ventilators, transfers, discharges, re-hospitalizations and deaths of these complex care residents to MDHHS.

Residents who are weaned from their ventilators will be allowed a 14-day stay in the VDCU from the date they are removed from the ventilator, at the allotted VDCU reimbursement rate, in order to assure complete wean is maintained. Once the 14 days of successful wean has been maintained, it is then the responsibility of the VDCU to transfer the resident to a Medicaid LTC bed within the facility, transfer the resident to

Medicaid Provider Manual

another nursing facility, or discharge the resident home with appropriate care planning involving family, responsible party, and community resources. Once successful wean has been maintained, the PA number will be end-dated.

If a beneficiary is in need of therapy, prior authorization for the therapy must be obtained under the VDCU's NPI. (Refer to the Nursing Facility Claim Completion section of the Billing & Reimbursement for Institutional Providers chapter for additional information.)

12.2.C. NON-AUTHORIZATION OF NEW ADMISSIONS TO A MEDICAID APPROVED VDCU IF FACILITY HAS A SURVEY CITATION OF ACTUAL HARM

New admissions to a VDCU will not be approved from the date a nursing facility receives the CMS-2567 (written survey report) containing the survey citation at a level of actual harm or higher on the scope and severity grid (G, H, I, J, K or L) pertaining to a resident or residents of the VDCU. Authorizations of new admissions will resume when the Department of Licensing and Regulatory Affairs, State Survey Agency notifies the State Medicaid Agency that all deficiencies have been corrected and the facility has been found to be in substantial compliance. This policy does not apply to the renewal of authorizations for Medicaid beneficiaries residing in a VDCU prior to the survey citation of actual harm.

SECTION 1 – INTRODUCTION

Michigan Department of Health and Human Services (MDHHS), under an approved State Plan as required by the Social Security Act, is responsible for annual Medicaid certification of all nursing facilities (other than State-owned facilities, such as a State Veterans' Home). Michigan Department of Licensing and Regulatory Affairs (LARA) is responsible for ensuring all Medicaid-certified nursing facilities are in compliance with Health Survey and Life Safety Code Survey requirements.

As required by federal law, the State Medicaid Agency (MDHHS, Behavioral and Physical Health and Aging Services Administration [BPHASA]) has entered into an interagency agreement with the State Survey Agency (Michigan Department of Licensing and Regulatory Affairs [LARA], Bureau of Survey and Certification [BSC]) to conduct surveys of Medicaid providers and applicants. The State Medicaid Agency (SMA) accepts State Survey Agency (SSA) certification decisions as final, but exercises its own determination whether to enter into agreements with providers.

For the purposes of this appendix, a Medicaid-certified nursing facility (NF) is defined as a non-state-owned nursing home, county medical care facility, or hospital long term care unit with Medicaid certification. This appendix includes information regarding Medicaid certification of nursing facilities, staff certification, the survey process, and enforcement remedies when facilities are not in compliance with applicable requirements.

SECTION 2 - MEDICAID CERTIFICATION AND DE-CERTIFICATION OF NURSING FACILITY BEDS AND MEDICAID PROVIDER ENROLLMENT

This Section describes Medicaid certification requirements for nursing facilities, certification and de-certification of nursing facility beds, and how nursing facility providers enroll in Medicaid.

The SMA is responsible for initial certification and annual certification of beds for nursing facilities seeking Medicaid reimbursement. In order for a provider to receive Medicaid reimbursement for nursing care, the nursing facility beds must be Medicaid certified by the SMA and the provider must be enrolled with Medicaid. The SSA is responsible for conducting any required certification surveys for the SMA.

2.1 DUAL CERTIFICATION

MDHHS requires all new Medicaid-certified nursing facility beds to also be certified for Medicare. Applications for certification of new Medicaid beds that are not Medicare-certified will be denied. Applications for initial Medicare certification may be made to the LARA-BSC. Facilities must meet state and federal regulations for certification.

Providers may seek annual certification of nursing facility beds currently certified as Medicaid-only. Beds that were certified as Medicaid-only as of August 1, 2004 are not required to become Medicare-certified. This exception also applies to Medicaid-only certified beds that were designated as unavailable for occupancy on August 1, 2004. However, MDHHS strongly encourages Medicare and Medicaid (dual) certification of all nursing facility beds in order to maximize access for beneficiaries.

A nursing facility that has certified beds that were granted an exception under this policy, and that is subsequently involved in circumstances that would require it to enroll with Medicaid (such as a change in ownership), must secure Medicare certification for Medicaid beds within one year. A provider's failure to secure dual certification for all Medicaid-certified beds will result in denial of Medicaid certification and termination of Medicaid enrollment.

A provider that applies for new Medicaid certification for some beds in a nursing facility must dually certify all Medicaid beds in the facility before any new Medicaid bed certifications will be approved for the facility, even if the existing Medicaid-certified beds were granted an exception under this policy. For example, a nursing facility has a distinct part or unit that is certified as Medicaid-only and is granted an exception under this policy. The provider adds a new wing and applies for Medicaid certification for the new beds. The new beds will be approved for Medicaid certification only if all Medicaid beds in the nursing facility are also certified for Medicare, including the beds in the historically Medicaid-only unit.

A licensed nursing facility entity that becomes a provider as a result of the purchase of a previously closed or currently operating Medicaid-only nursing facility must receive Medicare certification for all Medicaid-certified beds in that nursing facility within one year from the date of purchase of an operating nursing facility or the date of reopening of a previously closed nursing facility. The provider will receive a provisional Medicaid provider agreement while pursuing Medicare certification of the Medicaid-certified beds. This provisional agreement is time limited and holds the provider to the loss of Medicaid certification and disenrollment without appeal if Medicare certification is denied. If warranted, the SMA may grant an additional grace period contingent upon evidence that substantial progress has been made toward Medicare certification. Failure to meet this requirement will result in de-certification of the Medicaid beds and termination of Medicaid enrollment.

Michigan Department of Health and Human Services
Medicaid Provider Manual

A nursing facility that currently has Medicare certification of its Medicaid beds must maintain the dual certification. A nursing facility that voluntarily disenrolls or decertifies beds from Medicare will lose Medicaid certification of those beds. A nursing facility that loses its Medicare certification through the Centers for Medicare & Medicaid Services (CMS) regulatory enforcement actions will automatically lose its Medicaid certification. An exception or exemption to this dual certification may be made pursuant to the provisions contained in Section 21718 of P.A. 368 of 1978 (MCLA 333.21718). Any exception or exemption granted to a nursing facility under Section 21718 of P.A. 368 of 1978 prior to August 1, 2004 will be recognized.

Facilities granted a Certificate of Need (CON) for special population beds, as defined in the Certificate of Need Review Standards for Nursing Home and Hospital Long-Term Care Unit (HLTCU) beds, are also required to dually certify these special population beds (e.g., ventilator dependent care beds, behavioral, acquired or traumatic brain injury/spinal cord injury [ABI/TBI/SCI]). ICF/IID or MI beds need not be dually certified.

A provider must apply for and receive dual Medicaid and Medicare certification for new Medicaid beds acquired through the CON process, e.g. new construction or the redistribution of certified beds.

All beds approved pursuant to CON Review Standards for nursing home and HLTCU beds must be dually certified for Medicare and Medicaid. Beds approved under this subsection shall not be converted to or utilized as general nursing home use without a CON for nursing home and hospital long-term care unit beds; and shall not be offered to individuals other than the special populations they were initially approved for.

2.2 MEDICAID BED CERTIFICATION LIMITS

Individual facilities seeking to enroll in the Medicaid program or seeking to increase the number of Medicaid-certified beds must apply as outlined in the Medicaid Nursing Facility Bed Certification Process subsection of this appendix. Applications to the SMA will be reviewed in date order and must be received 45 days before the first of the month beginning the next quarter of the provider's cost reporting year. MDHHS will authorize Medicaid-certified beds, limited by the aggregate Upper Bed Limit (set in 1996 at 47,542), based on the criteria outlined in the Criteria for Evaluation of Medicaid Bed Certification Applications subsection. Preference will be given to facilities that are applying for Medicaid certification in order to dually certify beds, to facilities that are creating innovative living environments for beneficiaries who choose nursing facility care, and to facilities in geographic areas with limited Medicaid accessibility. Changes in bed certifications will take place after approval is granted effective on the first of the month beginning the next quarter of the provider's cost reporting year. Changes in bed certifications will not be approved on a retroactive basis.

2.3 CRITERIA FOR EVALUATION OF MEDICAID BED CERTIFICATION APPLICATIONS [CHANGE MADE 4/1/2025]

The State Medicaid Agency (SMA) (MDHHS Behavioral and Physical Health and Aging Services Administration [BPHASA]) will collaborate with the State Survey Agency (SSA) (Department of Licensing and Regulatory Affairs [LARA]) when making a determination regarding the approval or denial of any application for Medicaid bed certification and provider enrollment. MDHHS will grant Medicaid bed certification if the application meets all the following:

- A verification from the SSA that the beds listed in the applications are Medicare-certified.

- The SSA finds that the facility named in the application is in substantial compliance with federal regulations at the time of application.
- If there is an accepted submitted plan of correction for any survey activity occurring following the date of the application submission, the facility named in the application will be deemed to have satisfactory survey performance. **(text revised per bulletin MMP 24-54)**

2.4 MEDICAID NURSING FACILITY BED CERTIFICATION PROCESS

Current providers who wish to change their Medicaid-certified beds (increase, decrease, relocate) and providers who wish to enroll in the Medicaid Program may do so as outlined in this subsection. A written application to change Medicaid-certified beds must contain the following:

- Number and location of facility beds.
- Current certification designation of all facility beds by unit or wing.
- Requested number and proposed location of increased, decreased, or relocated Medicaid beds, with an attached layout of the facility showing the current and proposed distribution of beds.

A provider may apply for a change in Medicaid bed certifications any time throughout the year up to once per quarter.

The change in bed certifications will take place after approval is granted effective on the first of the month beginning the next quarter of the provider's cost reporting year. Changes in bed certifications will not be approved on a retroactive basis.

In addition to the process outlined below, nursing facilities must abide by the procedures outlined in the State Operations Manual, Chapter 3, Section 3202, Change in Size or Location of Participating SNF and/or NF.

MDHHS will respond to Medicaid bed certification applications with a determination within 45 days of receipt of all requested information.

2.4.A. BED CERTIFICATION PROCESS FOR MEDICAID ENROLLED PROVIDERS

Nursing facilities that are currently enrolled with Medicaid and want to change their number of Medicaid-certified beds must file a written application to both LARA (BSC) and MDHHS (SMA). (Refer to the Directory Appendix for application mailing instructions related to Medicaid bed certification changes.) The SMA and the SSA will collaborate regarding the consideration and disposition of applications for additional Medicaid beds. The SSA will conduct surveys as needed. Medicaid approval or denial of the application will be based on the considerations outlined in the Criteria for Evaluation of Medicaid Bed Certification Applications and the Dual Certification subsections of this appendix.

Once the SMA makes a determination regarding the application for additional Medicaid bed certifications, the provider, the SSA, MDHHS Provider Enrollment, and the MDHHS LTC Reimbursement and Rate Setting Section (RARSS) will be notified, in writing, by the SMA. If the application is denied, the provider will be notified of their appeal rights in writing. If the application is approved, the SSA will be notified by the SMA of the change. The SSA will also notify the provider of the change.

2.4.B. BED CERTIFICATION PROCESS FOR NURSING FACILITIES NOT ENROLLED IN MEDICAID

This subsection applies to providers operating existing facilities that have not previously participated in the Medicaid Program, or providers seeking to certify Medicaid beds following the loss of certification due to a regulatory action.

Non-Medicaid providers seeking to receive Medicaid certification for nursing facility beds and receive Medicaid payment must file a written application with both the SSA and with the SMA. The SMA and the SSA will collaborate regarding the consideration and disposition of the application for Medicaid bed certifications. The SSA will conduct surveys as needed. Medicaid approval or denial of the application will be based on the considerations outlined in the Criteria for Evaluation of Medicaid Bed Certification Applications subsection of this appendix.

Once the SMA makes a determination regarding the application for Medicaid bed certifications, the provider, the SSA, MDHHS Provider Enrollment, and RARSS will be notified, in writing, by the SMA. If the application is denied, the SMA will notify the provider of their appeal rights in writing. If the application is approved, the SMA will notify the provider and the SSA of the change. The SSA will also notify the provider of the change.

The provider must also enroll in Medicaid as outlined in the Medicaid Provider Enrollment subsection of this appendix.

2.4.C. BED CERTIFICATION PROCESS DURING A CHANGE IN OWNERSHIP (CHOW)

A provider seeking a change in ownership of a nursing facility must first receive approval through the CON process within MDHHS. The new provider can avoid a delay in payment and address any potential certification issues by submitting a written 90-day advance notice, plus a copy of the sale and/or lease agreement, to the SSA, the SMA/Long Term Care Policy Section and RARSS. (Refer to the Directory Appendix for contact information.)

The following are changes in ownership that must be reported to the SMA and the SSA, regardless of whether a CON is required:

- A change from sole proprietorship to partnership or corporation,
- A change from partnership to sole proprietorship or corporation,
- A change from corporation to sole proprietorship, partnership or corporation,
- Sale or lease of a nursing facility,
- Transfer or sale of stock resulting in a change of the controlling interest in a privately held company,
- Consolidation or merger of two or more corporations that results in the creation of a new corporation.

If the new owner does not want to make any changes in bed certifications, no additional action regarding certifications is required and the certifications continue as they were.

Michigan Department of Health and Human Services
Medicaid Provider Manual

under the previous owner. However, if the facility has beds designated as Medicaid-only, the new owner must dually certify all Medicaid beds within one year as outlined in the Dual Certification subsection. As part of the CHOW approval process, the SMA may deny bed certifications and recommend against Medicaid enrollment based on the criteria in the Criteria for Evaluation of Medicaid Bed Certification Applications subsection. In addition, dual certification requirements apply as outlined in the Dual Certification subsection.

If the new owner wants to change the bed certifications, a written application must be filed with the SSA and with the SMA/Long Term Care Policy Section. The SMA and the SSA will collaborate regarding the consideration and disposition of the application for changes in the Medicaid bed certifications. The SSA will conduct surveys as needed. Medicaid approval or denial of the application will be based on the considerations outlined in the Criteria for Evaluation of Medicaid Bed Certification Applications subsection.

Once the SMA makes a determination regarding the application for changes in the Medicaid bed certifications, the provider, the SSA, MDHHS Provider Enrollment, and the RARSS will be notified, in writing, by the SMA. If the application is denied, the SMA will notify the provider of appeal rights in writing. If the application is approved, the SMA will notify the SSA of the change. The SSA will also notify the provider of the change.

A new owner is considered a new provider and must enroll in Medicaid as outlined in the Medicaid Provider Enrollment subsection, regardless of whether any bed certification changes are made.

Under a change of ownership (CHOW), a nursing facility must not notify the local MDHHS office if there is a change in the facility's NPI/Medicaid Provider ID number. Rather, the change of ownership submission completed by the facility in the CHAMPS Provider Enrollment subsystem will automatically update the admission or discharge data for these beneficiaries in CHAMPS by moving them to the new NPI once the change of ownership is approved by MDHHS staff. Nursing facilities will not be required to update the admission or discharge data in CHAMPS for these beneficiaries when a change in ownership occurs.

2.4.D. BED CERTIFICATION PROCESS FOR A NEW NURSING FACILITY OR NEWLY LICENSED NURSING FACILITY BEDS [CHANGE MADE 4/1/2025]

A provider seeking to build a new nursing facility, build a new section of a nursing facility, significantly remodel, or newly license nursing facility beds must first receive approval through the CON process within MDHHS.

Providers seeking to receive Medicaid certification for new nursing facility beds and receive Medicaid payment must file a written application with both the SMA and the SSA. The SMA and the SSA will collaborate regarding the consideration and disposition of the application for Medicaid bed certifications. Medicaid approval or denial of the application

Michigan Department of Health and Human Services
Medicaid Provider Manual

for additional bed certifications will be based on the Criteria for Evaluation of Medicaid Bed Certification Applications.

Once the SMA makes a determination regarding the application for new or additional Medicaid bed certifications, the provider, the SSA, MDHHS Provider Enrollment, and RARSS will be notified in writing. If the application is denied, the SMA will notify the provider of appeal rights in writing. If the application is approved, the SMA will notify the SSA of the change. The SSA will also notify the provider of the change.

If not already enrolled, the provider must enroll in Medicaid as outlined in the Medicaid Provider Enrollment subsection.

Medicaid may enter into a provisional enrollment with a provider (or the owner or management company) that does not meet the above criteria if:

- The applicant and the owner or management company take actions acceptable to MDHHS to correct, improve or remedy any conditions or concerns that would result in denial of the application; and
- The applicant and the owner or management company attains and maintains compliance with the criteria above during the period of the provisional Medicaid enrollment. Failure of the provider to comply with the terms of the conditional agreement will result in termination without appeal of the provisional Medicaid enrollment. **(text added per bulletin MMP 24-54)**

2.5 MEDICAID ENROLLMENT AS A VENTILATOR DEPENDENT CARE UNIT (VDCU) AND ADDITIONAL VDCU BEDS

Medicaid approval or denial of Medicaid enrollment as a VDCU and applications to increase the number of VDCU beds is based on Medicaid policies in the Dual Certification and the Criteria for Evaluation of Medicaid Bed Certification Applications sections of this appendix. In addition, VDCU applications will be coordinated with LARA-BCHS, Health Facility Licensing, Permits and Support Division.

2.6 MEDICAID PROVIDER ENROLLMENT

To enroll with Medicaid, a nursing facility must:

- Receive CON approval of the beds (new providers and CHOW).
- Receive written notice from the SMA approving the Medicaid bed certifications.
- Complete a New Provider Information Packet to establish data with the RARSS. (A New Provider Information Packet may be obtained from RARSS or the MDHHS website. Refer to the Directory Appendix for contact and website information.)
- Complete the on-line CHAMPS Provider Enrollment application process. (Refer to the Provider Enrollment Section of the General Information for Providers Chapter for additional information.)

A provider will not be enrolled with Medicaid until all of the above requirements are met.

NOTE: The provider's employer identification or tax identification number (EIN/TIN) registered with the Vendor Registration System must agree with the EIN/TIN on file with the RARSS and in the nursing facility enrollment information in the CHAMPS Provider Enrollment system.

2.7 NOTIFICATION PROCESS FOR REGULATORY ACTIONS

MDHHS or CMS may make decisions that result in the loss or reduction of a provider's Medicaid-certified beds. Loss of certification, or de-certification, means that Medicaid will no longer pay for any service in the nursing facility related to the de-certified beds.

MDHHS or its designee notifies the following entities, in writing, of the loss of Medicaid certification at least 30 days prior to the effective date of payment termination:

- The affected nursing facility,
- The local MDHHS office, and
- The public by means of public notice in a local newspaper.

This notification of the nursing facility's loss of certification will state that residents must either:

- Make other arrangements for payment to the nursing facility; or
- Relocate to a setting that is Medicaid certified.

The provider may request assistance from MDHHS to coordinate relocation for those beneficiaries who wish to transfer. MDHHS may choose to apply the Nursing Facility Closure Protocol described in the Nursing Facility Closure Protocol subsection to protect the best interests of residents faced with transfer.

2.8 NURSING FACILITY CLOSURE PROTOCOL

An interagency agreement exists between MDHHS and LARA to delineate the roles and responsibilities of the respective agencies when residents of licensed/certified nursing facilities must be relocated due to nursing facility involuntary or voluntary closure. The agreement applies to all nursing facilities, including those that are county medical care facilities or hospital long-term care units. At the time of a closure, the nursing facility will be provided with a copy of this agreement and contact information for the agency representatives who will be involved in the closure.

2.9 VOLUNTARY WITHDRAWAL FROM PARTICIPATION IN THE MEDICAID PROGRAM OR VOLUNTARY NURSING FACILITY CLOSURE

A provider may choose to close voluntarily, not as a result of regulatory action. A provider may also choose to continue operating as a nursing facility, but withdraw from participation in the Medicaid Program. In both situations, the nursing facility must follow established guidelines to assure safe and appropriate care of residents.

When a provider decides to close voluntarily, the administrator of the nursing facility must provide written notification prior to the impending closure to the:

- State Survey Agency (SSA),
- State Medicaid Agency (SMA) /Long Term Care Policy Section,

Michigan Department of Health and Human Services
Medicaid Provider Manual

- LTC Ombudsman,
- Residents of the nursing facility, and
- Legal representatives of such residents or other responsible parties.

Written notice must be provided at least 60 days before the date of closure. Note: In cases where the Secretary of the U.S. Department of Health & Human Services (HHS) terminates the facility's participation in either the Medicare and/or Medicaid programs, notice must be provided no later than the date that the Secretary of the U.S. Department of Health & Human Services (HHS) determines appropriate for such notification.

This 60-day notice requirement begins before any attempt to transfer a resident out of the facility in anticipation of a facility closure/withdrawal. The provider must ensure that no new residents are admitted on or after the date on which such written notification is submitted.

The written notice of a voluntary closure must include the plan for closure. The plan must be approved by the SSA and the SMA/Long Term Care Policy Section prior to notification of residents of the closure. The plan must outline the transfer and adequate relocation of residents that assures placement in the most appropriate facility or other setting in terms of quality, services, and location, taking into consideration the needs, choice, and best interests of each resident.

Upon approval of the plan by the SSA and the SMA/ Long Term Care Policy Section, actual notice of closure must be given, which means that the notice must be given to the resident and a family member or legal representative in a form that they can understand and must be explained to them as needed. The notice must include the plan as approved by the State for the transfer and adequate relocation of the residents by the date specified by the State prior to closure. It must also include assurances that the residents would be transferred to the most appropriate facility or other setting in terms of quality, services, and location, including home or community-based settings, taking into consideration the needs, choice, and best interests of each resident. The notice must include contact information for the LTC Ombudsman and the Area Agency on Aging.

In the event of a voluntary closure, the nursing facility remains Medicaid-certified until all residents are relocated.

If the nursing facility chooses to withdraw from Medicaid but remain open as a licensed nursing facility, residents who are Medicaid eligible at the time of facility disenrollment may remain in the facility and receive Medicaid payment. The nursing facility's Medicaid enrollment will continue for purposes of payment for state plan services as long as Medicaid residents remain in the facility.

The interagency agreement referenced in the Nursing Facility Closure Protocol subsection of this appendix addresses voluntary closures as well as regulatory closures, and outlines the responsibilities of the state agencies involved. The SSA monitors the withdrawal or closure of a nursing facility. The provider may request MDHHS assistance with resident relocation if needed.

If the provider does not fulfill their responsibilities for the safe and appropriate relocation of residents, as reported by the SSA, the State Closure Team may change the closure into a regulatory action. At that point, the closure becomes non-voluntary and the State Closure Team may request the assistance of a closure agent or take other measures to ensure a safe and orderly transfer of residents. The interagency agreement referenced in the Nursing Facility Closure Protocol subsection of this appendix would apply.

2.10 NURSING FACILITY FILING OF BANKRUPTCY

Medicaid-enrolled providers are required to notify the MDHHS Long Term Care Operations section manager and the RARSS manager immediately upon filing for bankruptcy. (Refer to the Directory Appendix for contact information.)

2.11 RE-ENTRY AFTER DE-CERTIFICATION

A nursing facility may re-enter the Medicaid Program after decertification (whether voluntary or involuntary) if the following conditions are met:

- Submission of a request to the SSA for re-entry, including documentation indicating that the factors leading to a regulatory termination no longer exist.
- Evidence that all of the applicable statutory and regulatory requirements have been met.
- There is reasonable assurance that the deficiencies that caused the regulatory termination will not reoccur.
- The facility is concurrently pursuing Medicare certification.
- The facility meets all enrollment criteria outlined in this section.

Upon re-entry into the Medicaid Program, all Medicaid beds must also be Medicare certified.

The process for re-entering the Medicaid Program includes:

ACTION	DESCRIPTION OF PROCESS
Application	The nursing facility must make application for program re-entry to the SSA. The SSA forwards the completed application and evidentiary confirmation to CMS and the SMA for review and processing. A nursing facility may apply for re-certification at any time; however, the Criteria for Evaluation of Medicaid Bed Certification Applications apply as outlined in this section.
Departmental Review	The SMA makes a formal review of the nursing facility's financial status and requests confirmation of compliance with all civil rights requirements from the Office of Civil Rights (OCR). If financial responsibility and compliance with the civil rights requirements are confirmed, a reasonable assurance period (not subject to appeal) is set and the SSA is asked to conduct an initial survey.

Michigan Department of Health and Human Services
Medicaid Provider Manual

ACTION	DESCRIPTION OF PROCESS
Survey Activity	<p>There will be at least two surveys during the reasonable assurance period.</p> <ul style="list-style-type: none"> ▪ Initial Survey - A survey is conducted at the beginning of the reasonable assurance period to document compliance with previously cited deficiencies. The initial survey may be a partial or full survey at the discretion of LARA. A finding of substantial compliance at this survey will allow the nursing facility to begin the reasonable assurance period. If the nursing facility is found to not be in substantial compliance, then it must re-apply. ▪ Second Survey - A full survey must be conducted and the nursing facility must be in substantial compliance in order for the reasonable assurance period to end. The SSA will schedule the survey to coincide with the end of the established reasonable assurance period. If the nursing facility has maintained compliance during the reasonable assurance period, it may be approved for Medicaid enrollment. If the nursing facility is not in substantial compliance at the second survey, it must enter another reasonable assurance period if it continues to seek re-entry into Medicaid. ▪ General Survey Protocol - Facilities are afforded the same rights for challenging survey results as in the standard certification process, which is through the administrative review process within the SSA. During the reasonable assurance period, the SSA may conduct as many surveys as approved by Medicaid to document compliance with state and federal requirements. Surveys are unannounced; therefore, the nursing facility will only receive acknowledgement of receipt of the approved application and that Medicaid enrollment is based on the outcomes of the surveys conducted. All survey reports (CMS-2567L) are forwarded to the SMA within 10 working days to determine the significance of any findings and the resultant action plan. The results of each survey are evaluated to ensure that the reasons for the termination no longer exist or are at the level of substantial compliance (Level One – Cells A, B or C). Facilities are notified of the determination, in writing, by the SMA. If the SSA determines that the conditions for re-entry are met, Medicaid enrollment will be approved. If the SSA determines that the conditions for re-entry have not been met, the SSA will send the provider a denial letter. The nursing facility may correct the deficiencies and re-apply for certification, resulting in another reasonable assurance period.

Michigan Department of Health and Human Services
Medicaid Provider Manual

ACTION	DESCRIPTION OF PROCESS
Reasonable Assurance Period	<p>The reasonable assurance period is designed to assure that a nursing facility can operate for a certain period of time without the re-occurrence of the deficiencies that led to termination from participation in the program(s). The SMA contacts the SSA to conduct surveys during the reasonable assurance period.</p> <p>The reasonable assurance period begins when the initial survey is completed, which assures LARA that the nursing facility is complying with requirements for which they were originally de-certified. The SMA will establish a reasonable assurance period, typically from one to six months duration. The length of the reasonable assurance period is not subject to appeal. The time frame for reasonable assurance is based upon criteria, which may include:</p> <ul style="list-style-type: none"> ▪ A history of maintaining compliance ▪ Absence of a pattern of repeat citations ▪ Timely submission of plans of correction and implementation of approved plans of correction when needed ▪ Number of adverse actions initiated in the past three years ▪ History of termination and re-admission to the program ▪ Current compliance status ▪ Existence of other factors that may affect compliance, e.g., staffing concerns, turnover of key personnel, pay scale <p>The SMA will not approve Medicaid enrollment until the reasonable assurance period has been satisfied.</p> <p>During the reasonable assurance period, the nursing facility must:</p> <ul style="list-style-type: none"> ▪ Employ adequate management and care staff to provide care in accordance with all applicable federal, state and local regulations. ▪ Limit admissions to two residents per day or four residents in a seven-day period, regardless of payment source. ▪ Develop an admissions informed consent document that is acceptable to the SMA and that explains the re-entry process. The document should further explain to the resident (or authorized representative) that their residency in the nursing facility could be temporary and a transfer to another setting may be necessary if the nursing facility fails to meet all of the requirements for certification. This notice must be explained to, and signed by, the resident or their authorized representative. A signed copy of this document must be placed in the resident's record.
Appeals Procedure	<p>An applicant may appeal a denial of Medicaid enrollment by submitting a written request within 60 days of the date of the denial decision. The appeal should be addressed to the Michigan Office of Administrative Hearings and Rules (MOAHR). (Refer to the Directory Appendix for contact information.) The written appeal must include documentation to support the appeal. If the applicant fails to submit documentation within the 60 days, then the denial decision remains in effect.</p>

Michigan Department of Health and Human Services
Medicaid Provider Manual

ACTION	DESCRIPTION OF PROCESS
Payment	Providers are eligible for Medicaid reimbursement when the nursing facility has been found to meet the conditions for re-entry and is an enrolled Medicaid provider. Under extraordinary circumstances, the SMA may elect to enter into a provisional Medicaid provider agreement during the reasonable assurance period. In most cases, Medicaid reimbursement is not available until the facility has met all required conditions.

2.12 NON-AVAILABLE BEDS

Any nursing facility bed is considered available for occupancy if the bed is licensed and Medicaid certified, unless it is removed from service due to a regulatory ban on admissions or removed voluntarily using the SMA's non-available bed policy.

The SMA allows nursing facilities to designate beds as non-available, thereby removing them from the occupancy and rate setting calculations. For more information on this policy, refer to the Cost Reporting & Reimbursement Appendix of this chapter.

SECTION 3 - STAFF CERTIFICATION

All health care professionals performing duties within Medicaid-certified nursing facilities must possess the licensure and certification credentials required for their individual disciplines.

3.1 NURSE AIDE CERTIFICATION AND TRAINING

A nurse aide employed in a Medicaid-certified nursing facility must be a Certified Nurse Aide (CNA). Medicaid reimburses facilities through the annual cost settlement process for the Medicaid share of documented costs directly related to meeting the nurse aide training and testing requirements. Training programs and testing sites must be approved by the SSA in order for those costs to be reimbursed by Medicaid. A nursing facility may not charge its employed aides for training, testing, and registry costs related to meeting these requirements. (Refer to the Cost Reporting & Reimbursement Appendix of this chapter for additional information.)

The SSA is responsible for approval of programs that train and certify nurse aides for employment in all Medicaid-certified nursing facilities.

- For information about training requirements, programs or facilities, or concerns regarding the testing program or information placed on the Nurse Aide Registry, contact the LARA Bureau of Community and Health Systems.
- For testing registration information or assistance, or test site concerns, contact the LARA BCHS Nurse Aide Section or refer to their website.
- To inquire about a nurse aide's listing on the Registry, name and good standing, contact the LARA BCHS Nurse Aide Section or refer to their website.

(Refer to the Directory Appendix for contact information.)

3.2 EMPLOYEE SCREENING (CRIMINAL BACKGROUND CHECKS)

Nursing facilities are prohibited from employing, independently contracting with, or granting clinical privileges to any individual making application or being offered privileges who has been convicted of certain crimes. Michigan Public Act 28 of 2006 requires nursing facilities to facilitate and bear the cost of criminal background checks, either through the Michigan State Police or the Federal Bureau of Investigation (depending on defined criteria), on all individuals seeking to perform direct services to residents. The law also provides for the sharing of criminal background information with other member agencies of the provider community for the purpose of applicant screening.

An overview of Michigan Public Act 28 of 2006 and template forms for use by nursing facilities conducting criminal history checks on applicants are available on the MDHHS website. (Refer to the Directory Appendix for website information.)

SECTION 4 - NURSING FACILITY SURVEY

The purpose of surveying nursing facilities in the State of Michigan is to ensure quality of life and quality of care for residents. In order to fully comply with the applicable federal and state statutes, the SMA has contracted with the SSA to conduct nursing facility certification surveys. This contract represents the intent and purpose of both agencies to promote high quality health care and services for beneficiaries under the Medicaid Program to:

- comply with state and federal statutes, regulations and guidelines requiring the proper expenditure of public funds for the administration of the Medicaid Program and certification of health care providers;
- assure that the services provided under Title XIX and Title V of the Social Security Act are consistent with the needs of beneficiaries and the programs' objectives and requirements.

Reports generated as a function of this process are used by MDHHS to assure proper payment of claims submitted, to facilitate enforcement actions, and to assess continued certification under the current Medicaid enrollment.

4.1 SURVEY PROCESS

The basic survey protocol, including criteria and procedures, is the same for participation in both the Medicaid and Medicare Programs. The SSA:

- At appropriate intervals as prescribed by federal and state regulations, conducts on-site surveys, re-surveys and other necessary monitoring of the providers applying to or already participating in the Medicaid Program to determine compliance with program requirements.
- Recommends to the SMA certification of those providers that meet applicable federal and state statutes and regulations. The methodology of survey, evaluation and certification complies with applicable statutes, regulations, the provisions of the intra-agency agreement and is subject to review and comment by the SMA.
- Notifies the SMA and the individual provider within five working days of a certification determination and 30 calendar days prior to the expiration or automatic cancellation date of a time limited certification. Such notifications shall be made by a document process mutually agreed upon by both agencies and shall include information sufficient in detail to allow Medicaid to carry out appropriate provider agreement action. This document process shall also allow for extensions of existing certifications as provided for in federal regulations.
- Annually provides to Medicaid a complete listing of all certifications in effect on January 1st of that year.
- Determines and authorizes any waiver of provider requirements granted, the conditions of the waiver, and the time period such waiver will be in effect.

Michigan Department of Health and Human Services
Medicaid Provider Manual

4.2 SURVEY REVIEW

The SSA sends all survey reports with enforcement recommendations to the SMA for review. Reports and subsequent enforcement recommendations include information sufficient in detail to allow the SMA to carry out appropriate provider agreement action. Following review and authorization by the SMA, the SSA may be designated to generate any or all of the necessary certification and enforcement documentation pertaining to a participating provider.

SECTION 5 - NURSING FACILITY ENFORCEMENT

This enforcement policy applies when the State Survey Agency (SSA) or the Centers for Medicare & Medicaid Services (CMS) determines, on the basis of a standard, abbreviated, extended, or partial extended survey, that a provider is or was out of compliance with the federal certification requirements as stated in 42 CFR Part 488, Survey, Certification and Enforcement Procedures. In Michigan, the LARA Bureau of Survey and Certification (BSC) functions as the SSA.

5.1 AUTHORITY

The Omnibus Budget Reconciliation Act (OBRA) of 1987, as amended, incorporated specific provisions for nursing home reform into the Social Security Act, including revised requirements for survey, certification, and enforcement of providers participating in the Medicare and Medicaid programs. Applicable regulations are found at 42 CFR Part 488.

5.2 GUIDING PRINCIPLES OF ENFORCEMENT

5.2.A. PHILOSOPHY

- All long term care providers have the **responsibility** to provide person-centered quality care and services appropriate to the needs of the residents they serve.
- Long term care providers are an essential **resource** for communities, providing health care services, education, and employment.
- LARA, as the licensing and certification authority, must ensure that all Michigan long term care providers fulfill their responsibility to provide **quality** services.

5.2.B. PURPOSE

To develop, implement, and support an enforcement system that:

- **Promotes** continuous provision of quality care and the highest practicable physical, mental and psychosocial functioning of each resident.
- **Protects** the health, welfare, rights, and choices of long term care residents, as defined by law and regulation, without infringing upon the rights of the resident.
- **Promptly corrects** noncompliance through effective application of appropriate regulatory remedies.

5.3 ENFORCEMENT PRINCIPLES

- The enforcement system must reflect a philosophy of serving resident needs by providing quality care.

Michigan Department of Health and Human Services
Medicaid Provider Manual

- The SSA and the SMA must both strive for consistency in identifying deficiencies and in decision-making for selection and application of remedies. This enforcement principle is consistent with the intent of federal enforcement regulations, the State Operations Manual, and the CMS evaluation process for SSA performance.
- The SMA's enforcement plan contains a range of remedies. This allows an appropriate remedy scheme tailored to the facility and the cited deficiencies.
- Repeat noncompliance or failure to obtain compliance will result in the application of progressively stronger remedies.
- Remedies that displace residents from their homes will only be used as a last resort; such remedies include facility closure, termination of Medicaid or Medicare provider agreements, or transfer of residents. These remedies will not be used unless the health, safety and/or welfare of the residents is seriously affected, other remedies have not resulted in the facility's ability to achieve and maintain substantial compliance, and/or the physical plant is not a viable setting for quality care and services.
- State enforcement remedies for nursing facilities must include, at a minimum, statutorily specified remedies for skilled nursing facilities and may include additional or alternative remedies approved by CMS.

5.4 FACILITY COMPLIANCE AND DEFICIENT PRACTICE

The SSA or CMS, on the basis of a standard, abbreviated, extended or partial extended survey, will determine whether a participating provider is in compliance with the federal regulations governing Medicaid certification. Based on this determination, one or more remedies (corrective actions) may be selected based on the seriousness of the deficiency, facility history, welfare of the residents, and the likelihood that the remedy will promote prompt and sustained compliance. Enforcement remedies include both federal and state enforcement options. Criteria have been designed to minimize the time between identification of the deficiencies and application of remedies. Repeated or uncorrected deficiencies will be assessed progressively stronger remedies. If the SSA finds that a provider currently meets the requirements, but previously was noncompliant, the SSA may impose a remedy for the days it finds that the facility was not in compliance. Nothing in this paragraph shall be construed as restricting the remedies available to the LARA to address a nursing facility's deficiencies.

5.5 DETERMINING THE SERIOUSNESS OF DEFICIENCIES

To determine the seriousness of deficiencies for the purpose of selecting enforcement remedies, LARA will consider the factors of scope and severity. Scope represents how much of the facility, or how many residents, are or may be affected by a specific deficient practice. Severity represents the potential for harm, or the level of harm that has occurred. Scope and severity are assigned an alphabetic and numeric level on the remedy determination grid. The most serious deficiency cited (based on level of scope and severity) determines the category or categories of remedies to be applied. Other factors in the selection of remedies include:

- whether the deficiencies immediately jeopardize the health, safety, or welfare of the facility's residents
- the relationship of one deficiency to other deficiencies
- the facility's compliance history

Michigan Department of Health and Human Services
Medicaid Provider Manual

- the likelihood that the selected remedy will promote correction and continued compliance
- the provider's culpability, i.e., whether noncompliance is the result of neglect, indifference or disregard
- the relationship of one remedy to other remedies

5.5.A. SEVERITY

LEVEL OF SEVERITY	DEFINITION
No actual harm with a potential for minimal harm	The deficiency has the potential for causing no more than a minor negative impact on the resident(s).
No actual harm with a potential for more than minimal harm, but not Immediate Jeopardy	Noncompliance that results in minimal physical, mental, and/or psychosocial discomfort to the resident and/or has the potential (not yet realized) to compromise the resident's ability to maintain and/or reach their highest practicable physical, mental and psychosocial wellbeing as defined by an accurate and comprehensive resident assessment, plan of care, and provision of services.
Actual harm that is not Immediate Jeopardy	Noncompliance that results in a negative outcome that has compromised the resident's ability to maintain and/or reach their highest practicable physical, mental, and psychosocial wellbeing as defined by an accurate and comprehensive resident assessment, plan of care, and provision of services.
Immediate jeopardy to resident health or safety	A situation in which immediate corrective action is necessary because the provider's noncompliance with one or more requirements of participation has caused, or is likely to cause, serious injury, serious harm, impairment, or death to a resident receiving care in the facility.

5.5.B. SCOPE

SCOPE OF IMPACT	DEFINITION
Isolated	Scope is isolated when one or a very limited number of residents are affected and/or one or a very limited number of staff are involved, and/or the situation has occurred only occasionally or in a very limited number of locations.
Pattern	Scope is a pattern when more than a very limited number of residents are affected, and/or more than a very limited number of staff are involved, and/or the situation has occurred in several locations, and/or the same resident(s) has been affected by repeated occurrences of the same deficient practice. The effect of the deficient practice is not found to be pervasive throughout the facility.
Widespread	Scope is widespread when the problems causing the deficiencies are pervasive in the facility or represent systemic failure.

5.6 ENFORCEMENT REMEDIES

A remedy is a corrective action. Remedies available to LARA are specified in federal and state law. When the scope and severity increase, the deficiencies repeat, or the facility fails to maintain substantial compliance, selected remedies may also increase.

Michigan Department of Health and Human Services
Medicaid Provider Manual

5.6.A. FEDERAL ENFORCEMENT REMEDIES

Each federal remedy listed below is described in rules as stated in 42 CFR Part 488 et. seq., and further discussed in the CMS State Operations Manual for Medicaid and/or Medicare certified facilities. Federal remedies available to LARA or CMS include, but are not limited to:

- Denial of payment for new Medicare and/or Medicaid admissions
- State monitoring
- Temporary management
- Directed plan of correction
- Directed inservice training
- Civil money penalties
- Transfer of residents
- Closure of facility with transfer of residents
- Termination of Medicaid enrollment
- Denial of payment for all Medicare and/or Medicaid residents imposed by CMS
- Alternative or specified state remedies approved by CMS
- Administrative/Clinical Advisor

5.6.B. STATE ENFORCEMENT REMEDIES

The SSA has the option of imposing any state or federal remedy based on the facility's failure to maintain compliance, deficiencies cited within the same regulatory grouping that repeat within the last 24 months (or two standard survey cycles), and the degree of culpability of the facility. In addition to federal remedies, the SMA may accept one or more of the following enforcement actions taken by the SSA under state licensure authority. Also see Michigan Enforcement Rules for Long Term Care Facilities at R 330.11001-330.11017.

- Emergency Order Limiting, Suspending or Revoking a License
- Notice of Intent to Revoke Licensure
- Correction Notice to Ban Admissions or Readmissions
- Transfer Selected Patients; Reduce Licensed Capacity; or Comply with Specific Requirements
- Appointment of a Temporary Manager or Clinical/Administrative Advisor
- State Patient Rights Penalties, if applicable

5.7 DENIAL OF PAYMENT FOR NEW ADMISSIONS (DPNA)

Denial of payment for new admissions may be imposed at any time a provider is not in substantial compliance and must be imposed when a provider is not in substantial compliance within three months of being found out of compliance.

The DPNA enforcement remedy stops Medicaid payment for any new residents admitted to the facility after the effective date of the DPNA. The resident's status on the effective date of the denial of payment is the controlling factor in determining whether readmitted residents are subject to the denial of payment.

Guidelines for the definition of new admission are:

- Medicaid residents admitted to the facility on or after the effective date of the denial of payment for new admissions are considered new admissions. If Medicaid residents are discharged and readmitted to the facility, they continue to be considered new admissions, and are subject to the denial of payment.
- Medicaid residents admitted to the facility and discharged before the effective date of the DPNA are considered new admissions if they are readmitted to the facility on or after the effective date of the DPNA. Therefore, they are subject to the denial of payment.
- Medicaid residents admitted before the DPNA and discharged on or after the effective date of the DPNA are not considered new admissions if subsequently readmitted. Therefore, they are not subject to the denial of payment.
- Medicaid residents admitted before the effective date of the DPNA who take temporary leave before, on, or after the effective date of the DPNA are not considered new admissions upon return and, therefore, are not subject to the denial of payment.
- Medicaid residents admitted on or after the effective date of the DPNA who take temporary leave (e.g., hospital or therapeutic leave) are not considered new admissions when they return. If they were subject to the DPNA before their leave, they continue to be subject to it after their return.
- Private pay residents admitted to the facility after the effective date of the DPNA who then become eligible for Medicaid are subject to the denial of payment.
- Private pay residents in the facility prior to the effective date of the DPNA who then become eligible for Medicaid after the effective date of the DPNA are not subject to the denial of payment.

5.8 RECOVERY OF MEDICAID FUNDS FOR ADMISSIONS DURING DPNA

Under federal regulations, no federal funds will be paid to a nursing facility or to a state for any resident admitted when the facility is under a Denial of Payment for New Admissions sanction. Nursing facilities will be subject to Medicaid post-payment review to determine if any new residents were admitted during a period of time when the facility was under a DPNA sanction and, if so, Medicaid funds will be recovered from the facility. Facilities will be notified in advance of any recovery action and given the opportunity to produce documentation indicating that the admission was not a new resident and/or to appeal the MDHHS determination.

Michigan Department of Health and Human Services
Medicaid Provider Manual

5.9 MINIMUM DATA SET - RESIDENT ASSESSMENT INSTRUMENT

A nursing facility is required to submit resident assessments to the QIES ASAP system using the Medicare Data Communication Network (MDCN). Comprehensive assessments must be transmitted electronically within 14 days of the Care Plan Completion Date (V0200C2). All other MDS assessments must be submitted within 14 days of the MDS Completion Date (Z0500B). Failure to comply will result in citations and imposition of remedies, including requirement of a plan of correction. Continued failure to comply will result in increasingly severe remedies up to and including termination of Medicaid enrollment.

An individual who willfully and knowingly certifies a material and false statement in a resident assessment will be subject to civil money penalty fines as outlined in 42 CFR § 483.20(f)(5)(j)(1).

5.10 TERMINATION

This remedy may be imposed at any time when appropriate, but must be imposed when a provider has been out of substantial compliance for six months.

5.11 PURPOSE OF REMEDIES

TYPE OF REMEDY	PURPOSE
Directed Plan of Correction	The purpose of the directed plan of correction is to achieve correction and continued compliance with federal requirements. It is used when specific corrective action is required or the corrective action must be accomplished within a specified time, e.g., when a facility's heating system fails and specific repairs or replacement must be made within a specific period of time; when a provider has had difficulty attaining compliance after a revisit; or when assistance with a plan of correction is needed to ensure an effective revisit prior to imposition of a denial of payment or termination of provider status.
Directed In-Service Training	The purpose of directed in-service training is to provide basic knowledge to achieve compliance and remain in compliance with federal requirements. Directed in-service training is used when education is likely to correct deficiencies and help the provider achieve substantial compliance.
State Monitoring	The purpose of state monitoring is to oversee correction of cited deficiencies as a safeguard against further harm to residents when harm or a situation with a potential for harm has occurred. State monitoring must be used if the provider has had three consecutive standard health surveys with substandard quality of care; poor compliance history, pattern of poor quality of care, and/or many complaints; immediate jeopardy without a temporary manager appointment; concern that conditions in a facility have potential to worsen; the provider refuses to accept appointment of a temporary manager; the provider is unwilling or unable to take corrective action for cited substandard quality of care. LARA BSC, with CMS approval, may impose state monitoring without notice.
Denial of Payment for New Admissions	<p>The purpose of Denial of Payment for New Admissions (DPNA) is to encourage prompt and sustained compliance.</p> <p>DPNA may be imposed any time the provider is found out of substantial compliance and must be imposed when a provider is out of compliance three months after a determination of noncompliance. DPNA may be imposed alone or in combination with other remedies.</p>

Michigan Department of Health and Human Services

Medicaid Provider Manual

TYPE OF REMEDY	PURPOSE
Denial of Payment for All Medicare and Medicaid Residents	The purpose of Denial of Payment for All Medicare and Medicaid Residents is to encourage prompt and sustained compliance. This remedy may be imposed any time the provider is out of substantial compliance, but only by CMS. Factors considered in imposing this remedy include the seriousness of current survey findings, noncompliance history of the facility, and failure of other remedies to achieve or sustain compliance.
Temporary Management	The purpose of a temporary manager is to oversee correction of deficiencies and ensure the health and safety of the facility's residents while corrections are being made. A temporary manager may be imposed as a federal remedy any time a provider is not in substantial compliance; when a facility's deficiencies constitute immediate jeopardy or widespread actual harm and is imposed as an alternative to termination; or to oversee the orderly closure of a facility. The authority and qualifications of the temporary manager are described in the State Operations Manual at Section 7550.
Temporary Administrative and/or Clinical Advisor	The purpose of a Temporary Administrative and/or Clinical Advisor is to monitor and mentor the facility administrative and/or clinical staff through the period of corrective action. This is an additional federal Category 2 enforcement remedy defined in the State Plan and MDHHS Rule 330.11007(6). Authority for this remedy is found at §488.303(e) and §488.406(a)(8)&(9).

5.12 REVISIT POLICY

Revisits are not assured and, depending on the circumstances of any given situation, termination can occur any time for any level of facility noncompliance without regard to revisits. Facilities have the responsibility to correct their deficiencies and notify the SSA when corrections will be completed. It is expected that revisit requests will be made prudently so that the likelihood of additional revisits is reduced. If correction is not achieved at the expected time, the facility should notify the SSA that correction has been delayed so that the revisit can be delayed. LARA's expectation is that the facility has achieved compliance status as alleged in the Plan of Correction. Revisits may be conducted for any level of noncompliance. Remedies may be imposed for any level of noncompliance. Revisits are not assured before imposition of denial of payment for new admissions or termination.

The SSA is authorized, at its discretion, to perform up to three revisits to verify compliance. A fourth revisit may be conducted by the SSA only with the authorization of the SMA. An approved Plan of Correction must be received by the SSA with each revisit request. A fourth revisit requires justification.

5.13 CHOOSING THE COMPLIANCE DATE

LARA follows CMS policy related to revisits. On any revisit, the compliance date is the accepted Plan of Correction completion date if it is determined at the time of the revisit that the deficiencies were corrected and the facility is in substantial compliance. If a revisit survey identifies that the facility had a deficiency after the completion date that was corrected before the revisit date, the actual correction date is used.

5.14 EVIDENCE OF COMPLIANCE IN LIEU OF A REVISIT

Revisits may be conducted at any time for any level of noncompliance. Revisits are required whenever a survey finds noncompliance at Level F (Substandard Quality of Care), Harm, or Immediate Jeopardy (IJ)

Michigan Department of Health and Human Services

Medicaid Provider Manual

and must continue for all citations at that level until compliance is achieved with F (SQC), Harm, or IJ citations. In other cases, appropriate to the type of deficiency, acceptable evidence of compliance may be allowed in lieu of a revisit at the SSA's discretion. Evidence of compliance is not acceptable after a second revisit has been conducted within an enforcement cycle. When a facility is allowed to present acceptable evidence in lieu of a revisit, the compliance date is the date the evidence indicates the facility was in substantial compliance.

5.15 SETTING THE MANDATORY THREE- AND SIX-MONTH REMEDY TIME FRAMES

The three-month mandatory denial of payment for new admissions and the six-month mandatory termination dates will be set based on full months rather than on a number of days. With few exceptions, these dates will coincide with the same numerical date of the month of survey exit that identified the noncompliance. For example, if a survey ended on 1/15, the three-month effective date for mandatory denial of payment for new admissions is 4/15, and the six-month termination date is 7/15. Exceptions involve those cases for which a three-month or six-month numerical date is not on the calendar. In these cases, the effective date of the remedy will be the next calendar day.

Immediate Jeopardy situations generally have 23-day termination cycles.

5.16 FAILURE TO READMIT A QUALIFIED MEDICAID RESIDENT

A daily civil money penalty (CMP) of \$400 will be imposed when an enrolled Medicaid facility refuses to readmit a qualified Medicaid resident (as defined by CMS) following hospitalization. An opportunity to correct will not be provided. This daily CMP will start on the date validated by LARA that nursing home readmission should have occurred. The daily \$400 CMP continues until the resident is offered the next qualifying available Medicaid bed at the refusing facility, or the resident is placed in another suitable facility. The refusing facility will be notified by the SSA when an allegation of failure to readmit a qualified Medicaid resident is being investigated.

5.17 DEFINITIONS

TERM	DEFINITION
Administrative and/or Clinical Advisor	An alternative federal Category 2 remedy imposed upon a facility for the purpose of mentoring facility administrative and/or clinical staff through the period of corrective action.
Ban on Admissions	Admissions to the facility are suspended on the date specified in the LARA Correction Notice Order. Includes readmissions if stated in the order.
CMS	The Centers for Medicare & Medicaid Services.
Culpability	The extent to which the facility is responsible for the cited deficient practice. This is often related to occasions when the noncompliance is determined by the SSA to be intentional, or a product of neglect, indifference, or disregard.
Deficiency	A facility's failure to meet any participation requirement specified in the Social Security Act or in 42 CFR, Subpart B, 483.5 - 485.75.
Failure to Maintain Compliance	Inability of the facility to maintain substantial compliance for at least three months, or a facility having three or more survey cycles in a 12-consecutive month period.

Michigan Department of Health and Human Services
Medicaid Provider Manual

TERM	DEFINITION
Immediate Jeopardy	Immediate Jeopardy to resident health or safety means a situation in which immediate corrective action is necessary because the nursing facility's noncompliance with one or more requirements of participation has caused, or is likely to cause, serious injury, serious harm, impairment, or death to a resident receiving care in the facility. Such a finding is made in accordance with the criteria and definitions in the CMS State Operations Manual Appendix Q - Guidelines For Determining Immediate Jeopardy.
Noncompliance	Any deficiency that causes a facility to not be in substantial compliance.
No Opportunity to Correct	The facility will have remedies imposed immediately after a determination of noncompliance has been made.
Opportunity to Correct	The facility is allowed an opportunity to correct identified deficiencies before remedies are imposed.
Past Noncompliance	Past noncompliance is noncompliance that occurred between two certifications of compliance, against which a civil money penalty is imposed. If past noncompliance is cited, a civil money penalty must be imposed.
Plan of Correction (POC)	Mandatory for all deficiencies of scope and severity levels B through L on the remedy determination grid. A POC must be provided to the SSA within 10 days of the receipt of the survey report (CMS-2567). The POC must be approved by the SSA; if disapproved, remedies may be imposed immediately.
Remedy	A corrective action. Some remedies are specified in federal law; others are specified in state law.
Repeat Deficiency	When deficiencies in the same regulatory grouping of requirements are found more than once within 24 months or two standard survey cycles.
Repeated Noncompliance	For purposes of enforcement action, this term refers to findings of Substandard Quality of Care on three (3) consecutive standard surveys but does not refer to citations in which the substance of a deficiency or the exact tag number of a deficiency is repeated.
Substandard Quality of Care	Deficiencies at 42 CFR 483.13 (Resident Behavior and Facility Practices, F tags 221-226); 483.15 (Quality of Life, F tags 240-258); or 483.25 (Quality of Care, F tags 309-333) on the remedy determination grid in cells F, H, I, J, K, or L.
Substantial Compliance	Survey findings or acceptable evidence of compliance in lieu of revisit indicate that no actual harm has occurred and there is a potential for no more than minimal harm.

5.18 SUBSTANDARD QUALITY OF CARE (SQC)

When a standard or abbreviated survey identifies substandard quality of care (SQC), an extended or partial extended survey is conducted. In addition to the imposition of remedies, the SSA takes the following actions:

- Notifies the attending physicians of residents identified during the survey process as having been affected by the substandard quality of care.

Michigan Department of Health and Human Services
Medicaid Provider Manual

- Notifies the state licensure board responsible for licensing the facility's administrator of all findings of substandard quality of care.
- Prohibits the facility from providing nurse aide training and competency evaluation programs for two years.

If a facility has been found to have provided SQC on the last three (3) consecutive standard surveys, along with other remedies, LARA will impose:

- Mandatory denial of payment for new admissions;
- State monitoring.

5.19 IMMEDIATE JEOPARDY [CHANGES MADE 4/1/2025]

When the SSA identifies that Immediate Jeopardy to resident health or safety exists, the provider is notified and directed to submit as soon as possible an allegation that the Immediate Jeopardy has been removed. Within two calendar days of the last day of the survey during which Immediate Jeopardy was identified, the SSA will notify the provider that the SMA must terminate Medicaid enrollment within 23 calendar days of the last day of survey if the Immediate Jeopardy has not been removed. At its discretion, the SMA may appoint a temporary manager who must remove the Immediate Jeopardy within 23 days to avoid termination.

In order for a 23-day termination timeclock to be stopped, the provider must submit an acceptable Plan of Correction to the SSA. A subsequent revisit must then be conducted to verify removal of the Immediate Jeopardy, even if the underlying deficiencies have not been fully corrected.

Adjusted annually, Civil Money Penalties (CMP) of \$3,050 to \$10,000 per day will be imposed for each day an Immediate Jeopardy was identified before removal. Following removal of the Immediate Jeopardy, CMPs will continue until the facility is found to be in substantial compliance but will be selected from a lower fine range of \$50 to \$3,000 per day. The upper range of CMPs will apply for a minimum of one day, even if the Immediate Jeopardy is removed immediately after identification and notification. No CMP will apply on the day the facility is determined to be in substantial compliance.

The SSA may consider using a Per Instance Civil Money Penalty of \$1,000 to \$10,000, **adjusted annually**, when the beginning date of the deficiency cannot be determined, or when a Civil Money Penalty is combined with other enforcement actions, e.g., a discretionary denial of payment for new admissions, directed plan of correction, or directed in-service training.

Pursuant to 42 CFR §488.430(a), multiple per instance CMPs may be imposed for the same type of noncompliance and per instance CMPs (PI-CMPs) and per day CMPs (PD-CMPs) to be imposed on the same survey. **(text added 4/1/2025)**

5.20 NO OPPORTUNITY TO CORRECT

Providers will not be given an opportunity to correct deficiencies before remedies are imposed when they have deficiencies of actual harm (or higher) on the current survey event, as well as on the previous standard survey or any intervening survey. The previous harm (or higher) level deficiency must have been in a completed survey cycle with compliance verified. LARA will impose either a Civil Money Penalty or Denial of Payment for New Admissions, or both. LARA may impose other optional federal remedies.

5.21 OPPORTUNITY TO CORRECT [CHANGE MADE 4/1/2025]

An opportunity to correct deficiencies before remedies are imposed is not assured. The SSA has no obligation to give a provider an opportunity to correct deficiencies prior to imposing remedies and must only meet the minimum notice requirements that are applicable to the imposition of remedies. At the SSA's discretion, it may provide facilities an opportunity to correct deficiencies before remedies are imposed when they do not meet the criteria for "No Opportunity to Correct."

When an opportunity to correct deficiencies before remedies are imposed is offered, the SSA will request an acceptable plan of correction, provide initial notice of possible enforcement action, conduct a revisit (if applicable), and provide formal notice of other remedies if noncompliance continues at revisit. While formal notice of denial of payment for new admissions is generally provided in the first revisit letter, the SSA may provide it to the facility in the initial deficiency notice.

LARA must impose DPNA no later than three months after the last day of the survey that identified the noncompliance if substantial compliance is not achieved.

LARA may impose a per day Civil Money Penalty, a per instance Civil Money Penalty, or both (revised 4/1/2025) for past noncompliance, for days of noncompliance after the finding is made, or a combination thereof. Amounts will be determined by LARA based on facility history, repeating deficiencies, high numbers of deficiencies, culpability of the provider, failure to achieve or maintain substantial compliance, and for increasing noncompliance.

5.22 PROHIBITION OF APPROVAL OF NURSE AIDE TRAINING AND COMPETENCY EVALUATION PROGRAMS

Federal law, as specified in the Social Security Act at Sections 1819(f)(2)(B) and 1919(f)(2)(B), prohibits approval of nurse aide training and competency evaluation programs and nurse aide competency evaluation programs offered by, or in, a facility which, within the previous two years, has operated under a Section 1819(b)(4)(C)(ii)(II) or Section 1919(b)(4)(C)(ii) waiver; has been subject to an extended or partial extended survey as a result of a finding of substandard quality of care; has been assessed a total civil money penalty of not less than \$5,000; has been subject to a denial of payment, the appointment of a temporary manager or termination; or, in the case of an emergency, has been closed and/or had its residents transferred to other facilities. Exceptions to this, as specified in Public Law 105-15, Permitting Waiver of Prohibition of Offering Nurse Aide Training and Competency Evaluation Programs in Certain Facilities, will apply.

5.23 NEW OWNER

A new owner may apply to the SSA to have approval of the facility's nurse aide training and competency evaluation program restored before a two-year lockout period has expired.

5.24 NOTICE OF CMP ASSESSMENT

Prior notice is not required before the imposition of CMPs. A penalty equivalent to a one-day penalty will apply in all circumstances even if the violation(s) is immediately corrected. The daily penalty will end on the day prior to the determination of substantial compliance, or on the day prior to the determination that a civil money penalty is no longer warranted. The SSA determines compliance. CMP amounts may be increased to reflect changes in levels of noncompliance at revisit. CMP amounts may increase for repeat deficiencies.

Michigan Department of Health and Human Services
Medicaid Provider Manual

The SSA has developed a CMP schedule for Immediate Jeopardy and Harm or Potential Harm occurrences to promote a consistent application of penalties. The CMP schedule conforms to 42 CFR 488.408 and is intended to cover the majority of cases of CMP imposition. Situations may occur that justify exception to the guidelines. The CMP schedule is subject to change without notice. For further information, contact LARA Bureau of Survey and Certification (BSC). (Refer to the Directory Appendix for contact information.)

Accrual of CMPs ceases when one of the following situations occurs:

- the facility is determined by the SSA to have achieved substantial compliance
- the appointment of a receiver by a circuit court
- closure of a facility
- appointment of a temporary manager for the purpose of overseeing the orderly closure of the facility
- termination of a provider agreement

5.25 USE OF CMP FUNDS

Money collected by the SMA as a result of civil money penalties is held in a special fund to be applied to the protection of the health or property of residents of any nursing facility that LARA finds deficient. Money recovered by the SMA from funds due a facility (because of lack of payment of civil money penalties by the facility) is also deposited into this fund.

5.26 COST REPORTING FOR REMEDIATION EXPENSES

Temporary manager and (limited) other remediation expenses incurred by the provider as a result of an enforcement action are a Medicaid allowable routine nursing care cost as part of the owner/administrator cost classification. Total owner/administrator compensation is subject to established program cost limitations and allowable cost principles. Civil money penalties are not allowable Medicaid costs. (Refer to the Cost Reporting & Reimbursement Appendix of this chapter for additional information.)

5.27 APPEAL RIGHTS

The provider is notified of appeal rights at the time of remedy imposition. Providers may only appeal the existence of a deficiency and/or the number of days considered in violation. The established daily amount of the CMP is not subject to appeal. Appeals are through MDHHS. (Refer to the Directory Appendix for contact information.)

MDHHS has developed an informal review process for resolution of disputes regarding deficiencies cited by surveyors. Information regarding this process can be found on the MDHHS website. (Refer to the Directory Appendix for website information.)

The provider is also notified of waiver rights at the time of remedy imposition. Within 60 calendar days of the notice of appeal rights, the provider may elect to waive the right to appeal. The waiver must be in writing and be received by the SSA Enforcement Unit and by MOAHR within 60 days of the notice of appeal rights. Waiver of the right to appeal will reduce the total CMP amount by 35%.

Michigan Department of Health and Human Services

Medicaid Provider Manual

5.28 PENALTY COLLECTION

Collection of civil money penalties will be made by voluntary transmittal, in a check payable to the State of Michigan, within 30 calendar days of notice of penalty amount due or within 15 days of issuance of appeal results. If voluntary transmittal does not occur, the CMP will be recovered by gross adjustment against the next available Medicaid warrant or as a component of final cost settlement in a change of ownership. No repayment schedules will be allowed for any penalty assessments. Civil money penalties are not allowable Medicaid costs.

SECTION 1 – INTRODUCTION

This appendix outlines Medicaid policy pertaining to nursing facility ownership, nursing facility reimbursement, nursing facility costs, and nursing facility financial reporting. Cost reporting, rate determination, financial settlement, audit, and appeal processes are addressed in this appendix. Costs classifications (such as plant, variable, allowable and non-allowable, add-ons) used to determine nursing facility reimbursement are defined.

Throughout the appendix references will be made to the State Medicaid Agency (SMA) and the State Survey Agency (SSA). The Michigan Department of Health and Human Services (MDHHS), Behavioral and Physical Health and Aging Services Administration (BPHASA), is the designated SMA, and is responsible for administration of the Medicaid program. The Michigan Department of Licensing and Regulatory Affairs (LARA), Bureau of Survey and Certification (BSC) is the designated SSA.

1.1 REIMBURSEMENT RATE METHODOLOGY – GENERAL

The Medicaid nursing facility reimbursement rate is prospectively determined based on the nursing facility's historical or acquisition costs, which are subject to limitations put forth in policy. Participating Medicaid providers' nursing facility resident days and cost information are reported to the SMA on an annual cost report submitted by the nursing facility. The nursing facility industry aggregate cost data is used to analyze and determine facility class reimbursement limits and related cost levels necessary for calculating nursing facility per diem rates and other analysis. The facility's routine nursing care per diem rate includes plant and variable cost based on the facility's audited allowable costs, measured against class wide rate limitations. Additional reimbursement for specific services outside of the routine nursing care per diem rate are also analyzed and determined from the facility's annual cost report and included in the Medicaid annual reimbursement settlement.

The intent of the Medicaid nursing facility reimbursement system is to:

- Assure high quality services at reasonable costs.
- Encourage the efficient use of nursing care resources.
- Provide reimbursement for allowable costs incurred by prudent, cost-conscious facility managers.
- Provide a review and appeal mechanism to assure that nursing facility providers receive fair and equitable treatment.

Reductions may be implemented to the variable cost portion of the NF rate due to Executive Order, legislative mandate, or cost savings initiatives. Notice of a reduction, or continuation of a reduction, will be issued via a policy bulletin. A record of recent NF variable rate reductions will be maintained on the MDHHS website. (Refer to the Directory Appendix for website information.)

1.2 MEDICARE PRINCIPLES OF REIMBURSEMENT

Unless stated otherwise in this appendix, Medicaid reimbursement rates are determined for nursing facilities in accordance with the federal Principles of Reimbursement established for the Medicare Program. Nursing facility providers are expected to comply with applicable provisions in these Principles, with policies published by the SMA, and with all relevant federal and state statutes, rules and regulations.

Medicaid Provider Manual

When reviewing the Principles of Reimbursement, any references to "intermediary" should be interpreted as referring to the SMA.

Medicare Principles of Reimbursement appear in the Code of Federal Regulations (CFR), at Title 42, Part 413, and in manuals published by the federal Centers for Medicare & Medicaid Services (CMS). The Provider Reimbursement Manual, also referred to as PRM-15 and Pub. 15, may be obtained from CMS electronically or by contacting CMS. (Refer to the Directory Appendix for website and contact information.)

Medicaid Provider Manual

SECTION 2 – DEFINITIONS

General definitions are provided in this section. More detailed explanations are provided in relevant sections related to cost, audit or rate setting.

Abuse	Provider practices that are inconsistent with sound fiscal, business, or medical practices and result in an unnecessary cost to the Medicaid program or in reimbursement for services that are not medically necessary or that fail to meet professionally recognized standards for health care.
Acceptable Cost Report	A complete and accurate accounting of the financial and statistical activities of a nursing facility provider prepared in accordance with Medicaid policy and cost reporting instructions on the electronic format required by the SMA. The cost report must include the certification statement signed by an authorized representative of the nursing facility certifying the cost report as a true, correct and complete statement of facility financial and statistical activities prepared from the nursing facility provider's books and records.
Administrator	A nursing facility administrator is a person(s) who is on site and responsible for the professional administration, supervision and management of the nursing facility and operations as they relate to resident care. The nursing facility administrator must be licensed in accordance with the law in Michigan.
Allowable Costs	Costs incurred in the provision of nursing facility services subject to guidelines and limitations set forth in Medicare Principles of Reimbursement, as they appear in federal regulations and in manuals published by the federal Centers for Medicare & Medicaid Services, unless stated to the contrary in policies and procedures issued by the SMA.
Ancillary Services	Services for which charges are customarily made in addition to routine service charges. Services are defined in the Coverages portion of this chapter.
Asset Acquisition Cost	<p>The cost or value for a nursing facility asset determined in accordance with Medicare Principles of Reimbursement. Medicaid further defines acquisition cost as the cost incurred by the present owner in acquiring the asset.</p> <p><u>For Class I, II, III and IV Nursing Facilities</u></p> <p>For depreciable assets acquired after July 31, 1970, the historical cost may not exceed the lower of current reproduction cost adjusted for straight-line depreciation over the life of the asset to the time of purchase, or the fair market value of the asset at the time of its purchase.</p> <p><u>For Class III and IV Nursing Facilities</u></p> <p>For depreciable assets acquired on or after December 1, 1997, the allowable historical cost of the asset may not exceed the historical cost less depreciation allowed to the owner of record as of August 5, 1997 or, if the asset did not exist as of August 5, 1997, the first owner of record after August 5, 1997.</p>
Audit	Review of the financial records used to complete a Medicaid cost report for compliance with allowable cost principles and other policy contained in the Medicaid Provider Manual. An audit includes, but is not limited to, a limited-scope audit or an on-site audit.

Medicaid Provider Manual

Audit Adjustment	An adjustment to the cost report after an audit to correct items that are noncompliant with allowable cost principles or other policy contained in the Medicaid Provider Manual. Adjustments can be a direct adjustment (i.e., an adjustment only for the noncompliant item[s]), an extrapolation adjustment, or a combination of the two adjustment methods.
Audit Disallowance	See Audit Adjustment definition.
Authorized Representative	An individual who has legal authority to obligate the nursing facility entity. The individual may be an officer, senior or majority partner, possess controlling ownership interest or an appropriate management employee of the licensed nursing home business entity. For purpose of signatures required for cost reporting and reimbursement request actions, individuals not included in these positions must have designated legal right to act on behalf of the subject business entity.
Available Bed	<p>A bed considered available for occupancy. Beds are considered available except in the following situations:</p> <ul style="list-style-type: none"> ▪ Unoccupied beds when the facility is under a regulatory Ban on Admissions (does not include beds unoccupied when the facility is under a Denial of Payment for New Admissions action). ▪ Beds covered under a SMA-approved Non-Available Bed Plan. ▪ Beds temporarily unoccupied due to renovation or construction where the SSA has deemed the beds unacceptable for occupancy, for example beds which are a part of a Building Program Agreement.
Available Bed Days	The number of available bed days for a facility is the number of available beds in the facility multiplied by the number of days in the cost reporting period that they are available.
Average of Variable Costs	See Class Average of Variable Costs.
Ban on Admissions	<p>A regulatory/enforcement sanction, imposed by the SSA, prohibiting the admission of any new resident(s) into the nursing facility, regardless of payment type, while the prohibition is in effect. Readmissions are allowed during this period on an individual case basis at the discretion of the SSA. A modified ban on admissions is a regulatory/enforcement sanction, imposed by the SSA, which may be imposed for a period of time after a ban on admissions has ended. The length of the modified ban on admissions is at the discretion of the SSA and may limit the number of new admissions for a designated period of time.</p> <p>Note: A Ban on Admissions is different from a Denial of Payment for New Admissions.</p>
Base Costs	Costs that cover activities associated with direct patient care. Major items under these categories are payroll and payroll-related costs (salaries, wages, related payroll taxes, fringe benefits) for departments of nursing, nursing administration, dietary, laundry, diversional therapy, and social services; food; linen (does not include mattress and mattress support unit); workers compensation; utility costs; consultant costs from related party organizations for services relating to base cost activity, nursing pool agency contract service for direct patient care nursing staff, and medical and nursing supply costs included in the base cost departments. With the exception of nursing pool services, purchased services and contract labor from unrelated parties or from related organizations, incurred in lieu of base costs as previously defined, are separated into base and support costs using the industry-wide average base-to-variable cost ratio.

Medicaid Provider Manual

Base Costs Per Day	Facility base costs divided by the total number of resident days for the same period.
Base Cost Component, Indexed	See Indexed Base Cost Component.
Base Period	An interval of time for which cost data is obtained and used in the calculation of a prospective reimbursement rate.
Capital Expenditure	Expenditure not limited to cost of construction, engineering, and equipment, which, under Generally Accepted Accounting Principles, is not properly chargeable as an expense of operation.
Case-Mix Category	System that categorizes residents based on their clinical conditions and resource consumption into different groupings. Residents with similar clinical conditions and resource consumption are grouped into the same case-mix category.
Census	See Resident Days/Occupancy.
Census Day	<p>A census day is counted when a resident is occupying a nursing facility bed at midnight. A census day is counted if:</p> <ul style="list-style-type: none"> the resident is away from the facility for therapeutic leave and the facility is paid by any payer source to hold the bed; the resident is on a one-day stay and the nursing facility is paid for the day; the resident is discharged due to death and the nursing facility is paid for the day; the leave days (bed holds) are paid for by non-Medicaid sources; or it is a resident's day of discharge that qualifies as a late discharge by the Medicare program. <p>A resident is counted for census purposes if the resident is admitted to the hospital, except when the facility may be reimbursed by Medicaid to hold the bed or when a Medicaid beneficiary is hospitalized and the facility is ineligible for reimbursement because it is not at 98% occupancy (unless the facility is reimbursed by another payer source to hold the bed). If a resident is hospitalized and the facility is not paid by any source to hold the bed, the day is not included in the census. A resident is counted for census purposes on the day of admission, but not on the day of discharge except as noted above.</p>
Chain Organization	A group of two or more nursing care facilities, or at least one nursing care facility and another business or entity, that is owned, leased, or through any other device controlled or operated by one organization. Chain nursing facility organizations include, but are not limited to proprietary organizations and various religious, charitable, and governmental organizations, any of which may be engaged in other activities not directly related to health care.
Change of Ownership (CHOW)	Any ownership change, including any sale or transfer conducted during a bankruptcy or receivership proceeding, that affects the provider/licensed operator of a nursing facility, including an exchange of real property, through either sale or lease, e.g., a sale of real estate, including a sale of a building housing a nursing facility provider as a lessee, or a change in corporate structure for a nursing facility, e.g., a change from a sole proprietorship to a corporation.
Class I Facilities	Proprietary and nonprofit nursing facilities that do not fall under the Class II, Class III, Class IV or Class V definitions.

Medicaid Provider Manual

Class II Facilities	Proprietary nursing facilities for the mentally ill or developmentally disabled (intellectual disability), with a different variable cost limit than Class I facilities.
Class III Facilities	Proprietary nursing facilities, hospital long term care units, and nonprofit nursing facilities that are county-operated medical care facilities.
Class IV Facilities	State-owned and operated institutions for individuals with intellectual disabilities (developmentally disabled), Intermediate Care Facilities for Individuals with Intellectual Disabilities (ICF/IID), and nonprofit nursing facilities for individuals with intellectual disabilities.
Class V Facilities	A distinct part of a special nursing facility for the care of ventilator-dependent residents.
Class VI Facilities	Hospitals that provide a program of short-term nursing care (Swing Beds) not exceeding 100 days per stay.
Class VII Facilities	State-owned and-operated veterans' homes as established under Michigan Public Act 152 of 1885.
Class Average of Variable Costs (AVC)	The total indexed variable costs for all facilities in a class divided by the total resident days for all facilities in the class. An AVC is calculated for each nursing facility class. For example, the AVC for October 1, 2018, which is used for rate year October 1, 2018 to September 30, 2019, is based on variable costs reported in cost reports for facility fiscal years ending in 2017, indexed to October 1, 2017.
Class Variable Cost Limit (VCL)	A limit set at the 80th percentile of the Indexed Variable Costs (IVC) for facilities in a particular class during the current calendar year. The 80th percentile is determined by rank ordering facilities from the lowest to the highest IVC, then accumulating Medicaid resident days of the rank-ordered facilities, beginning with the lowest, until 80% of the total Medicaid resident days for the class are reached. The Variable Cost Limit for the class of facilities equals the IVC of the nursing facility in which the 80th percentile of accumulated Medicaid resident days occurs. A VCL is calculated for Class I and Class III nursing facilities. For example, the VCL for October 1, 2018, which is used for rate year October 1, 2018 through September 30, 2019, is based on variable costs reported in cost reports for facility fiscal years ending in 2017, indexed to October 1, 2017.
Common Ownership	A situation in which more than one individual possesses significant (5% or greater) ownership or equity in a nursing facility or an organization serving the nursing facility provider.
Compensation	The total monetary, fringe, and/or benefits received by an employee or owner for services rendered to the nursing facility.
Completed Audit	Issuance of the Preliminary Summary of Adjustment Notice. Completed audit includes the Exit Meeting with the nursing facility provider unless the Exit Meeting is waived.
Control	A situation where an individual or organization has the power, directly or indirectly, to significantly influence and/or direct the actions or policies of a nursing facility or an organization serving the nursing facility provider.
Corporate Official or Employee	An individual representing an organization with the authority to exercise control over a nursing facility.
Cost Center	A division, department, or subdivision thereof; a group of services; or any other unit or type of activity into which functions of an organization or nursing facility are divided for purposes of cost assignment and allocation.

Medicaid Provider Manual

Cost Index	An indicator used to adjust nursing facility cost levels. The cost index used by Medicaid is Global Insight's Skilled Nursing Facility Market Basket Without Capital Index, which is published quarterly in the Global Insight DRI-WEFA Health Care Cost Review. The cost index is used to adjust reported costs from the facility's cost report period end date to October 1 of the year that is one year prior to the rate year being calculated. For example, cost report data used to set rates for the October 1, 2018 to September 30, 2019 nursing facility rate year are indexed to October 1, 2017.
Cost Report	Reports submitted annually by a nursing facility that is participating in the Medicaid program at a utilization rate on average of at least six Medicaid residents must be on MDHHS cost reporting forms. A nursing facility provider with fewer than six Medicaid residents per day must file a "less than complete cost report" and is not subject to audit or rate setting purposes.
Current Provider	The provider that operated the nursing facility during the period of the last cost report on which normal rate setting would occur. Also see Provider.
DEFRA	Deficit Reduction Act of 1984
Denial of Payment for New Admissions (DPNA)	A regulatory/enforcement action, imposed by the CMS or the SMA, prohibiting payment for new Medicare and/or Medicaid admissions. Medicaid will not pay for services provided to a resident admitted during a DPNA. Note: A Denial of Payment for New Admissions is different from a Ban on Admissions.
Economic Inflation Rate	The annual economic inflation percentage for Class I and Class III nursing facilities established by the state legislature through the appropriations process.
Economic Inflation Update	The Economic Inflation Rate (EIR) for the facility class applied to the lesser of the Variable Rate Base for the facility or the class Variable Cost Limit.
Extrapolation	An audit adjustment methodology that projects an error rate (using valid statistical procedures) for expenses reported on the cost report through the audit of statistically sampled items. The error rate will solely or partially determine the provider's audit adjustments.
Facility	An entire nursing facility or a distinct part thereof being considered for rate setting. The entire building may be considered a distinct part unit for rate setting purposes. A unit smaller than the entire building may also be considered a distinct part unit for rate setting purposes if the identified facility space area meets required certification requirements.
Fair Market Value	The price that an asset would bring by bona fide bargaining between well-informed buyers and sellers at the date of acquisition, generally comparable to the price at which other sales have been consummated for assets of like type, quality and quantity in a particular market at the time of acquisition.

Medicaid Provider Manual

Filed Cost Report	<p>A cost report package is only considered filed when all the following conditions are met:</p> <ul style="list-style-type: none"> the package is complete; the cost report calculations are mathematically accurate, reasonable, and consistent; the completed electronic cost report (ECR) data uses the required software and specified format; MDHHS audit staff can generate a full cost report applicable to the cost year from the ECR file; an electronic copy of the Certification Statement is completed and signed, and agrees with the submitted ECR file; the data meets a set of validation checks contained within the ECR, plus the appropriate bed size and certification reporting requirements; the submitted ECR file includes proper reporting of costs and related cost report allocations in accordance with prior year(s) audit adjustment determinations for like costs or cost reporting issues; and the cost report preparation complies with Medicaid policy and cost reporting instructions.
Fiscal Year - Facility	For purposes of cost reporting, a nursing facility provider's financial reporting year for tax purposes, normally a 12-month period unless approved for exception. Exceptions include, but are not limited to, a change in provider ownership, fiscal period end date change, or facility relocation to a replacement facility.
Fiscal Year – State	October 1 through September 30.
Fixed Equipment (Major)	Equipment that is affixed to or constitutes a structural component of the nursing facility as defined by the current version of the American Hospital Association Chart of Accounts.
Hold A Bed Day	See Leave Day.
Home Office	The central office of a chain organization. (see Chain Organization)
Hospital Long Term Care Unit (HLTCU)	A distinct part of a general hospital licensed as a nursing facility.
Hospital Leave Day	See Leave Day - Hospital.
Indexed Base Cost Component	A facility's total per resident day allowable base costs indexed to October 1 of the year that is one year prior to the rate year being calculated.
Indexed Support Cost Component	A facility's indexed base cost component multiplied by the lesser of the facility's support-to-base ratio or the support-to-base ratio limit for that facility's bed-size group.
Indexed Variable Costs	The sum of a facility's allowable base and support costs per resident day indexed to October 1 of the year that is one year prior to the rate year being calculated.
Leave Day – Hospital	A day for which a facility may be reimbursed by Medicaid to hold a resident's bed for their return. (Medicaid policy pertaining to reimbursement is contained in the Coverages portion of this chapter.) Leave days reimbursed by other payer sources must be included in the facility census for cost reporting purposes.

Medicaid Provider Manual

Leave Day – Therapeutic	A day where a facility may be reimbursed by any payer source to hold a resident's bed for their return. Medicaid policy pertaining to reimbursement is contained in the Coverages portion of this chapter. The day is counted as a census day of care for resident occupancy on the nursing facility's cost report.
Management Company	An entity contracted by a licensed and Medicaid-enrolled nursing facility provider to manage one or more of the daily operations of the facility.
Medical Care Facility (MCF)	A county-operated nursing facility.
Minimum Data Set (MDS) Assessment	Clinical assessment tool required for all Medicaid-or-Medicare certified long-term care facilities. The federally required Omnibus Budget Reconciliation Act (OBRA) MDS assessments listed in A0310A of the MDS 3.0 Resident Assessment Instrument (RAI) Manual are the only assessments that may be used to determine rates for Class VII facilities.
Net Quality Assurance Supplement (Net QAS)	The QAS minus the non-Quality Measure Initiative share of the Medicaid Quality Assurance Assessment Program tax.
Net Quality Measure Initiative Amount (Net QMI Amount)	The Quality Measure Initiative payment amount minus the Quality Measure Initiative share of the Medicaid Quality Assurance Assessment Program tax.
New Facility (for rate-setting purposes)	A nursing facility provider that does not have a current Medicaid historical cost, including a newly constructed facility, an existing facility that has never before participated in the Medicaid program, a facility that has participated in Medicaid in a different provider class, or an existing facility that qualified as a "No Medicaid" or "Low Medicaid" activity cost reporting provider for two consecutive fiscal years. The consecutive fiscal years must cover a period of at least 24 months in total and may only cover dates in which the facility was enrolled in Medicaid and averaged six or more Medicaid residents per day. A nursing facility that has made physical plant additions or renovations, including a total replacement or a facility that has been sold or resold is not considered a new facility.
New Provider in a Medicaid-Enrolled Facility	A person or business entity that has purchased or is purchasing a nursing facility that previously had Medicaid participation and whose new ownership individual(s) or business entity are not related through family or business ties to the owner's business entity of the previous owner. Under certain circumstances, a sale between family members may be approved by the SMA and the new owner may be considered a new provider.
Non-Medicare Nursing Facility Days	Nursing Facility days for which Medicare (Part A [Fee for Service] and Part C [Medicare Advantage, including MI Health Link days where Medicare is the primary payer]) is not the primary source of reimbursement.
Non-statistical Sampling	An audit sampling method that does not meet the definition of statistical sampling. Under an audit using solely non-statistical sampling methods, extrapolation methods may not be used to determine audit adjustments.
Nursing Facility or Nursing Home	A facility (or distinct part of a facility) that is licensed and certified by the State of Michigan or certified by CMS to provide nursing care and related medical services for residents who require such care above the level of room and board.

Medicaid Provider Manual

OBRA	The federal Omnibus Budget Reconciliation Act, initially passed in 1987 as Public Law 100-203, with amendments in 1988, 1989, 1990 and 1994. This law incorporated specific provisions for nursing facility reform, including revised requirements for the survey and certification process and for the enforcement process.
Occupancy	See Resident Days/Occupancy.
Occupancy Rate	The total number of resident days in a given period divided by the number of available bed days in the facility for the same period.
Owner/Administrator	A person who is employed and functions as the administrator, assistant administrator, business manager, or in any other administrative capacity in the nursing facility, and who is also part or full owner of the nursing facility operating entity, i.e., the provider and/or the nursing facility's real property. If a Director of Nursing is an owner and acts occasionally in an administrator capacity, the time acting in an administrative capacity is allocated to the owner/administrator salary.
Ownership/Corporate Interest	<p>A person, partnership, or corporation that:</p> <ul style="list-style-type: none"> Has ownership interest totaling 5% or more in a nursing facility, i.e., in the disclosing entity, or in the corporate entity owning the facility; or Has an indirect ownership interest equal to 5% or more in a nursing facility, i.e., in the disclosing entity, or in the corporate entity owning the facility; or Has a combination of direct and indirect ownership interests equal to 5% or more in a nursing facility, i.e., in the disclosing entity, or in the corporate entity owning the facility; or Owns an interest of 5% or more in any mortgage, deed of trust, note, or other obligation secured by a nursing facility, i.e., in the disclosing entity, or in the corporate entity owning the facility, if that interest equals at least 5% of the value of the property or assets of the facility/disclosing entity; or Is an officer or director of a nursing facility, i.e., in the disclosing entity, that is organized as a corporation; or Is a partner in a nursing facility, i.e., in the disclosing entity, which is organized as a partnership. <p>Examples:</p> <ul style="list-style-type: none"> If Ms. C owns 10% of a note secured by 60% of the nursing facility provider's assets, Ms. C's interest in the provider's assets equates to 6% and must be reported. Conversely, if Mr. S owns 40% of a note secured by 10% of the provider's assets, Mr. S's interest in the provider's assets equates to 4% and need not be reported. If Mr. F owns 10% of the stock in a corporation that owns 80% of the nursing facility, Mr. F's interest equates to an 8% indirect ownership interest and must be reported. Conversely, if Ms. N owns 80% of the stock of a corporation that owns 5% of the stock of the nursing facility, Ms. N's interest equates to 4% indirect ownership interest and need not be reported.
Patient	See Resident.

Medicaid Provider Manual

Patient Driven Payment Model (PDPM)	Classification system used to place nursing facility (NF) residents into different case-mix categories as determined by the Minimum Data Set (MDS) and used to set payment rates for Class VII facilities. PDPM consists of four case-mix categories and six rate components. The physical therapy (PT) and occupational therapy (OT) component, the speech-language pathology (SLP) component, the non-therapy ancillary (NTA) component, and the nursing component represent the four case-mix categories. PDPM rates are comprised of a PT component, OT component, a SLP component, an NTA component, a Nursing component and a Non-Case-Mix component.
Per Resident Day Cost	The total cost for a cost component divided by the total number of resident days. The number of resident days used is the greater of the number of resident days listed in the facility's cost report or 85% of the total number of available bed days for the cost reporting period.
Plant Costs	Plant costs include depreciation, interest expense (incurred for either working capital or capital indebtedness, mortgage discount points), property taxes, amortization costs associated with loan financing costs (e.g., letters of credit), letter of credit application or commitment fees, amortization of legal fees pertaining to acquisition, recording fees or other fees relating to the capital asset acquisition, and specific lease expenses.
Preceding Owner	The person, partnership, or corporation that owns a nursing facility and is selling it through the CHOW process.
Property Owner	A person, partnership, corporation, organization, or entity, other than the nursing facility provider, having the property rights to the building in which a nursing facility operates or to the land on which a nursing facility sits.
Proprietary Provider	A provider or organization that is organized and operated with the expectation of earning profit for its owner[s], as distinguished from providers organized and operated on a nonprofit basis. Proprietary providers may be sole proprietorships, partnerships, or corporations.
Provider	A legal entity (person, partnership, corporation, or organization) that has been approved to participate in the Michigan Medicaid Program. Some conditions of provider participation continue after enrollment in Medicaid has ended, e.g., record retention.
Purchase Allowance	A deduction granted for damage, delay, shortage, imperfection, or other causes, excluding discount and return.
Purchase Discount	A reduction (off the original price for property, goods or services) granted for the settlement of debts (e.g., 5/10 days which means a 5% discount if paid within 10 days).
Purchase Price	The total price agreed upon between a buyer and a seller for property, goods or services.
Quality Assurance Assessment Factor (QAAF)	The percentage increase determined and implemented by Medicaid for a class of nursing facilities.
Quality Assurance Supplement (QAS)	The product of the QAAF for the class times the lesser of the Variable Rate Base for the facility or the class Variable Cost Limit. Class III publicly-owned facilities basis is the lesser of the Class III VCC or the Class I VCL.
Quality Measure Initiative (QMI)	Quality Assurance Assessment Program funded payments to nursing facilities based on their average quality measure domain rating on the Nursing Home Compare (NHC) website, along with a resident satisfaction survey factor.

Medicaid Provider Manual

Related Entity or Organization	An entity having a business relationship with a nursing facility provider that has 5% or greater beneficial interest or common ownership in or has control of the facility or the facility owner, whether such control has legal standing or is utilized. Also see Chain Organization and Ownership/Corporate Interest.															
Related Party	An individual, group of individuals, or business entity that meets criteria similar to that defining a related entity or organization.															
Resident	An individual who has been admitted to the provider's facility and has not been discharged.															
Resident Days/Occupancy	<p>Resident days or occupancy for nursing facility Medicaid cost reporting is the sum of the census days in a specified period of time. To calculate the resident days for a particular day, total the census days for that day. (Medicaid residents who are hospitalized are not counted in the census).</p> <p>Example:</p> <table><tr><td>Residents occupying beds in facility</td><td>=</td><td>100</td></tr><tr><td>Residents on therapeutic leave</td><td>=</td><td>5</td></tr><tr><td>Hospitalized Medicaid residents</td><td>=</td><td>3</td></tr><tr><td>Paid bed hold days</td><td>=</td><td>1</td></tr><tr><td>Total resident days</td><td>=</td><td>106</td></tr></table>	Residents occupying beds in facility	=	100	Residents on therapeutic leave	=	5	Hospitalized Medicaid residents	=	3	Paid bed hold days	=	1	Total resident days	=	106
Residents occupying beds in facility	=	100														
Residents on therapeutic leave	=	5														
Hospitalized Medicaid residents	=	3														
Paid bed hold days	=	1														
Total resident days	=	106														
Restricted Revenue	Revenue that is designated or earmarked, by law, to finance some specific activity or group of related activities.															
Routine Nursing Costs	Costs including, but not limited to, necessary medical, nursing, and mental health services, and all items of expense that nursing facility providers incur in the provision of routine nursing services. Costs must be included in the nursing facility provider's Medicaid cost reporting in accordance with established cost classifications.															
Routine Nursing Services	Organized nursing care and activities for the resident, under the observation and assessment of licensed nurses, who enable the resident to attain or to maintain the highest practicable physical, mental, and psychosocial well being in accordance with a written plan of care.															
Settlement	The process of reconciling a nursing facility's interim rates based on filed cost report data to audited cost report data. A final settlement is computed after the cost report has been audited, a final rate based on audited data is issued, and all appeals have been adjudicated.															
State Medicaid Agency (SMA)	The Michigan Department of Health and Human Services (MDHHS). The work unit within MDHHS with administrative responsibility for the Medical Assistance (Medicaid) Program is the Behavioral and Physical Health and Aging Services Administration (BPHASA).															
State Survey Agency (SSA)	The Michigan Department of Licensing and Regulatory Affairs (LARA). The work unit within LARA with administrative responsibility for nursing facility survey and certification is the Bureau of Community and Health Systems (BCHS) and the Bureau of Survey and Certification (BSC).															

Medicaid Provider Manual

Statistical Sampling	<p>An audit sampling method that has the following characteristics:</p> <ul style="list-style-type: none"> random selection of the sampled items; the use of probability theory to evaluate sample results; and the use of valid statistical procedures. <p>Under an audit that solely or partially uses the statistical sampling method, extrapolation methods may be used to determine audit adjustments.</p>
Successive Owner	The person, partnership, or corporation that is purchasing a nursing facility through the CHOW process.
Support Costs	Costs that are payroll and benefit-related (salaries, wages, related payroll taxes, fringe benefits) for the departments of housekeeping, maintenance of plant operations, medical records, medical director, and administration; administrative costs; all consultant costs not specifically identified as base; all equipment maintenance and repair costs; purchased services; and contract labor not specified as base costs.
Support Costs Per Day	A facility's support costs divided by the total number of resident days for the same period.
Support Cost Component, Indexed	See Indexed Support Cost Component.
Support-to-Base Ratio	A facility's allowable support costs divided by allowable base costs. A facility's support-to-base ratio is limited to the 80th percentile support-to-base ratio for the facility's bed-size group. The bed-size groups are defined as 0-50, 51-100, 101-150, and 151+ nursing care beds in the facility. Group bed size is based on the number of licensed beds in a facility regardless of bed type or whether the bed is available. This includes all types of licensed nursing beds, Home for the Aged beds, or any other type of licensed bed where nursing care is provided. A facility's support-to-base ratio is rebased annually from the most recent audited base period, regardless of ownership.
Support-to-Base Ratio Limit for Bed Size Group	The support-to-base ratio limit for a bed-size group is set at the 80th percentile of the support-to-base ratios for facilities in the same bed-size group. The bed-size groups are defined as 0-50, 51-100, 101-150, and 151+ nursing care beds in the facility. The 80th percentile is determined by rank-ordering facilities within the same bed-size group from the lowest to the highest support-to-base ratio, then accumulating Medicaid resident days of the rank-ordered facilities, beginning with the lowest, until 80% of the total Medicaid resident days for the group are reached. The support-to-base ratio limit for the bed-size group equals the support-to-base ratio of the nursing facility in which the 80th percentile of accumulated Medicaid resident days occurs.
Swing Beds	A program of short-term nursing care not exceeding 100 days, provided to patients in a hospital as defined in federal law and Michigan statute.
Therapeutic Leave Day	See Leave Day – Therapeutic.
Variable Costs	A facility's total allowable base and support costs for providing routine nursing services to residents, as determined in the Allowable Costs Section of this appendix. Also see definitions for Base Costs and Support Costs.
Variable Cost Component	The lesser of a facility's Variable Rate Base or the Class Variable Cost Limit, plus the Economic Inflation Update.
Variable Cost Limit	See Class Variable Cost Limit.

Medicaid Provider Manual

Variable Costs Per Day	A facility's variable costs (total base and support costs) divided by the total number of resident days for the same period.
Variable Costs, Indexed	See Indexed Variable Costs.
Variable Rate Base	The sum of a facility's indexed base cost component and indexed support cost component. For rate setting purposes, the figure used as the facility's Variable Rate Base is the lesser of the facility's calculated Variable Rate Base or the Class Variable Cost Limit.

SECTION 3 - OWNERSHIP CHANGES AND MEDICAID TERMINATION

3.1 PREREQUISITE

During a nursing facility CHOW, the successive owner must complete any Certificate of Need (CON) or provider screening and enrollment activities to complete the CHOW process. The CON requirement must be satisfied before Medicaid enrollment can occur. MDHHS administers the CON Program through the CON Evaluation Section. (Refer to the Directory Appendix for contact information.) The provider screening and enrollment requirements can be found in the General Information for Providers chapter of the MDHHS Medicaid Provider Manual.

On the CMS-established effective date of a nursing facility CHOW, the preceding owner's provider agreement shall automatically assign to the successive owner. The Medicaid assignment of the provider agreement binds the successive owner to all terms and conditions of the preceding operator's provider agreement including, but not limited to, liabilities such as Medicaid overpayments and debts, sanctions, and penalties related to the Medicaid program regardless of when they arose.

3.2 OWNERSHIP CHANGES

When an ownership change is anticipated, the proposed Seller(s) and the proposed Purchaser(s) must provide written notice to both the State Medicaid Agency (SMA) and the State Survey Agency (SSA) at least 90 calendar days prior to the anticipated ownership change. The written notice to the SMA must be sent to the MDHHS LTC Reimbursement and Rate Setting Section (RARSS) and to the Provider Enrollment Unit. (Refer to the Directory Appendix for contact information.) The written notice to the SSA must be sent to the nursing facility's team manager. Failure to provide written notice to either agency could result in payment and settlement delays.

Prior to the ownership change date, the new ownership must complete a New Provider Information Packet to provide RARSS with the necessary information for the rate setting and reimbursement process. Failure to provide this information prior to or immediately upon completion of the purchase will delay the rate setting and reimbursement processing for the new ownership. For New Facility/Owner Requirements, refer to the Cost Reporting Section of this appendix.

If a nursing facility changes ownership, the facility must register the NPI for the successive owner through the on-line CHAMPS Provider Enrollment (PE) subsystem. If the provider tax identification number (TIN) did not change, the NPI can be reported through the CHAMPS PE maintenance function. If the change involves a new TIN, the successive owner provider must complete a new enrollment application. The successive owner must not use the preceding owner's NPI for reporting and billing Medicaid services. In the event that the successive owner does not register the new provider NPI number in CHAMPS, the successive owner is still responsible for the liabilities associated with the provider agreement. Refer to the Provider Enrollment Section of the General Information for Providers Chapter for additional information.

The Seller(s) and the Purchaser(s) will be notified by RARSS and advised of any requirements related to cost reporting and rate setting, including final settlement for the former owner. For information regarding reimbursement settlement, refer to the Cost Report Reimbursement Settlement Section of this appendix.

3.3 NURSING FACILITY SALE BETWEEN FAMILY MEMBERS

The sale of a family owned nursing facility between family members is allowable and recognized as a transfer of ownership and a recognized sale transaction for Medicaid reimbursement within allowable cost and reimbursement limits if all of the following requirements are met. However, if it is subsequently determined control is not relinquished by the prior entity or interested parties, asset values will revert back to the values prior to the recognized sale and any additional reimbursement paid will be recovered.

- A purchase contract or agreement must be present. The transaction must terminate the seller's interest in the business. The seller must not have any recourse or ownership protection to retain or have a security interest in obtaining future ownership of that nursing facility in the event of the termination of the new ownership (purchaser) at a later date.
- Borrowing or financing for the sale transaction must be between the purchaser and a non-related third party (i.e., a financial institution). Financial loans from the family-related seller individual or entity to the family-related purchaser are not allowable for reimbursement. The finance instrument must not be a land contract from the seller.
- Total dollar amount of allowable borrowings cannot exceed the purchase price (allowable asset value). The Capital Asset Value (CAV) limit applicable to the nursing facility immediately prior to the sale, appropriately adjusted for nursing facility asset items that are excluded from the sale transaction, is the maximum reimbursable borrowing balance applicable to the asset transaction.
- The nursing facility property appraisal must be obtained. The facility appraisal value must support the purchase price negotiated between the sales parties. Refer to the Appraisal Guidelines Section of this appendix for additional information.
- The new ownership operation must be a different legal entity in which the family-related seller is not an officer or board member exercising control over the new operation. The nursing facility entity may remain as an ongoing business entity in a situation where the real estate sale does not involve the licensed nursing facility operator. This occurs where a related party lease exists between the nursing facility entity prior to the real estate transaction, and the real estate transaction of the leased nursing facility is between the family-related parties. The requirement that the family-related lessor/seller cannot exercise active interest or control in the management of the nursing facility after the sale must be met.

The following will be applied to a change in ownership as a result of a sale between family members:

- The allowable asset value to the purchaser is limited to the allowable historical capital asset cost of the seller party (or nursing facility entity owned by the family member) minus the dollar amount of depreciation expense allowed and reimbursed under the Medicaid Program. There is no increase in nursing facility asset values. MDHHS considers Medicaid reimbursement to the nursing facility for depreciation expense was zero dollars during the period that the seller provider was reimbursed by Medicaid for plant cost based upon capital asset value tenure reimbursement rate.
- The tenure factor for the nursing facility following the sale will revert to zero due to the capital asset transaction affecting a plant cost increase.
- The Medicaid program plant cost reimbursement limitations of the Deficit Reduction Act (DEFRA) of 1984 will not apply to the transaction as a result of the purchase limitation to the historical asset cost base of the seller.

Medicaid Provider Manual

- The seller may be subject to depreciation recapture dependent on the sale price of the assets and the depreciation reimbursement made to the seller during the period in which the seller was reimbursed a plant cost component under the depreciation cost method. The reimbursement period of depreciation recapture is limited to Medicaid services reimbursed during the period from October 1, 1984 through the date in which the nursing facility transferred to the tenure plant cost component reimbursement. The dollar amount of depreciation recapture may impact the asset acquisition allowable dollar amount for the purchaser.

3.4 FACILITY ASSET CHANGE OF OWNERSHIP

In the event of a binding agreement and/or sale occurring on or after July 18, 1984, the Plant Cost Component for the nursing facility, attributable to the agreement and/or sale, is limited to the Medicaid Program policy provisions applying federal reimbursement limits of the DEFRA. Refer to the plant cost component rate determination provisions in the Rate Determination Section of this appendix for additional information.

At the time of the facility asset ownership change, the Provider must complete a Plant Cost Certification and submit a copy of the purchase and/or lease agreement, along with plant cost information, to the MDHHS LTC Reimbursement and Rate Setting Section (RARSS). The information is necessary to establish the reimbursement rate for the Plant Cost Component due to the asset ownership change. For Plant Cost Certification requirements and timeframes for filing the data, refer to the Plant Cost Certification Section of this appendix.

For an explanation of the effect of the sale of assets on the Tenure Factor, refer to the Rate Determination Section of this appendix.

In the event of a sale after March 31, 1985, Medicaid will recapture from the selling provider any reimbursement received in the form of depreciation expense, through the date of either the sale and transfer of assets or, for a Class I facility, that provider's conversion to a "Return on Current Asset Value Component" reimbursement, whichever is earlier. This reimbursement provision does not apply to Class I nursing facility providers whose ownership began after March 31, 1985. For information regarding depreciation reimbursement adjustment, refer to the Cost Report Reimbursement Settlements Section of this appendix.

3.5 TERMINATION OF MEDICAID PARTICIPATION

A nursing facility that loses its Medicaid certification as a result of regulatory action, irrespective of whether that action requires facility closure, or a nursing facility that chooses to terminate its participation in the Medicaid program without closing must comply with notice and cost reporting requirements. Refer to the Cost Reporting Section in this appendix and to the Notification Process for Regulatory Actions, Nursing Facility Closure Protocol, or Voluntary Withdrawal From Participation in the Medicaid Program or Voluntary Nursing Facility Closure subsections in the Certification, Survey & Enforcement Appendix of this chapter for relevant information.

When Medicaid participation is terminated voluntarily or involuntarily, payment for at least one month of services rendered is retained for Final Settlement.

SECTION 4 - COST REPORTING

A nursing facility participating in the Medicaid program must submit a Medicaid cost report to MDHHS annually as a condition of participation. An electronic copy of the cost report, the cost report completion instructions, completion and submission checklists, and related information are available on the MDHHS website. (Refer to the Directory Appendix for website information.)

4.1 EXCEPTIONS

4.1.A. EXCEPTION FOR HOSPICE PROVIDER OWNED NURSING FACILITY

A hospice provider that owns and operates a nursing facility is not required to file an annual cost report to Medicaid. The nursing facility industry aggregate cost data is used in place of individual facility cost data to establish a Medicaid reimbursement rate for this type of nursing facility. Rate determination procedures are addressed in the Rate Determination Section of this appendix.

4.1.B. EXCEPTION FOR SWING BEDS

Hospitals providing short term nursing services (swing beds) are not required to submit a Medicaid nursing facility cost report. Costs associated with swing beds are combined with those of the hospital and submitted on the hospital cost report. Refer to the Hospital Chapter of this manual for information regarding cost reporting requirements related to swing beds.

4.1.C. STATE VETERANS' HOMES

A State Veterans' Home is not required to submit a Medicaid NF cost report. The Medicare SNF cost report is used in place of the Medicaid cost report. The Medicare cost report is to be submitted electronically to the MDHHS Reimbursement and Rate Setting Section (RARSS) through the MDHHS File Transfer application. The Medicare Principles of Reimbursement apply for cost reporting purposes rather than the allowable cost principles described in the Allowable and Non-Allowable Costs section of this Appendix. The cost reporting requirements in the Less Than Complete Cost Report, Cost Report Due Date, New Facility/Owner Requirements, Changing a Cost Reporting Period, and Cost Report Delinquency subsections of this Appendix are still applicable.

4.2 NURSING FACILITY COST REPORT

An annual cost report is required for the cost reporting period which is based on the nursing facility's fiscal reporting year end. Each cost report must include an itemized list of all expenses as recorded in the formal and permanent accounting records of the facility. These records must be maintained in a manner consistent with the Medicare Principles of Reimbursement, except where modified by Medicaid policy. Records must also be kept in a manner consistent with previous cost reporting periods. The accrual method of accounting is mandated for all providers. For any cost situation that is not covered by the Medicare Principles of Reimbursement guidelines or Medicaid policy, Generally Accepted Accounting Principles (GAAP) should be applied.

Medicaid Provider Manual

Related organizations and costs to related organizations, as defined in federal policies and regulations, must be disclosed on the nursing facility cost report. Related organization costs claimed for Medicaid reimbursement through the nursing facility's rate determination process must be documented to RARSS on a completed home office cost report or on alternative cost reporting schedules as defined in the Home Office, Chain Organization, or Related Party Cost Reporting subsection of this appendix.

RARSS retains the filed nursing facility cost reports for a minimum of three years from the date of receipt. Nursing facilities are required to retain documentation supporting filed cost reports for a minimum of seven years from the end of the applicable cost reporting period, or beyond the seven year period if audit determinations have not been resolved.

4.3 COST REPORT REQUIREMENTS

The RARSS will send a notice electronically through the File Transfer application to the facility or business office as designated by the provider soon after the end date of the nursing facility's cost reporting period on record. The notice specifies the nursing facility's county and license number coding, fiscal reporting period end date, cost report due date, and other pertinent data necessary for the completion of the cost report. The provider will have access to the specific information required to file an acceptable Medicaid Cost Report package in File Transfer. File Transfer has the applicable electronic cost report template, completion instructions, construction cost index for asset acquisitions, and other pertinent information in downloadable form.

The completed cost report package submitted to RARSS must include:

- The standardized electronic cost report (ECR) data in accordance with specified formatting and software.
- An electronic copy of the Certification Statement (Worksheet A), which has been prepared and printed from the completed ECR file, and physically signed by an authorized representative of the nursing facility certifying to the accuracy of the prepared cost report.
- A copy of the nursing facility's detailed general ledger and complete (no grouping or summary) trial balance of revenues and expenses. Both documents must be submitted as electronic Excel files.
- A completed cost report submission checklist.
- Copies of supporting workpapers for all Worksheet 1-A and Worksheet 1-B adjustments as electronic Word or Excel files (invoices may be submitted as PDF files).

The completed cost report package must be delivered electronically through File Transfer to RARSS as indicated in the notice.

4.4 COST REPORT ACCEPTANCE

Each cost report submitted to RARSS is verified prior to its acceptance. The cost report package will only be accepted if all of the following conditions are met:

- The package is complete.
- The cost report calculations are mathematically accurate, reasonable and consistent.

Medicaid Provider Manual

- The completed electronic cost report (ECR) data uses the required software and specified format.
- MDHHS audit staff can generate a full cost report applicable to the cost year from the ECR file.
- An electronic copy of the Certification Statement is completed and signed, and agrees with the submitted ECR file.
- The data meets a set of validation checks contained within the ECR plus the appropriate bed size and certification reporting requirements.
- The submitted ECR file includes proper reporting of costs and related cost report allocations in accordance with prior year(s) audit adjustment determinations for like costs or cost reporting issues.
- The cost report preparation complies with Medicaid policy and cost reporting instructions.

Prior to acceptance of the submitted cost report, RARSS may adjust inaccurate data reported on the cost report if correct data is available to RARSS and the adjustment would not impact the computation of the per diem reimbursement rate. For example, RARSS may adjust the Title XIX Routine Nursing Days reported on the cost report if there is large discrepancy between the reported days and actual billed Medicaid days from the reporting period.

A cost report is considered not filed until it is accepted by RARSS. If the submitted cost report is determined to be unacceptable, RARSS will return the cost report to the nursing facility for correction and provide notice of the date the corrected cost report is due. The returned cost report will include information that indicates the reason(s) for the unacceptable report.

A corrected cost report – a revision of the most recently submitted cost report – may be submitted to RARSS for acceptance upon approval by RARSS. The provider should contact RARSS to obtain the acceptance status of that reporting period's most recent cost report ECR file prior to submission of a corrected cost report. A corrected cost report that is accepted by RARSS defaults as the original cost report.

MDHHS shall accept a non-delinquent cost report no more than 60 calendar days after the cost report is filed.

4.5 LESS THAN COMPLETE COST REPORT

With written approval from the RARSS, a nursing facility may submit a less than complete cost report.

4.5.A. NO MEDICAID UTILIZATION

A nursing facility with no Medicaid utilization during a cost reporting period is required to submit a less than complete cost report.

4.5.B. LOW MEDICAID UTILIZATION

A nursing facility with low Medicaid utilization during a cost reporting period is required to submit a less than complete cost report. "Low utilization" is defined as an average of less than six Medicaid residents per day in the facility for the cost year, i.e., fewer than 1,825 Medicaid nursing days. The nursing facility must submit a written request to RARSS for approval to file a less than complete cost report for the specific cost reporting

Medicaid Provider Manual

period. The request must be signed by an authorized representative of the nursing facility, identify the reporting period the request applies to, include the facility's name and provider NPI number, and:

- Indicate the reason(s) for the request.
- Indicate Medicaid utilization and the approximate Medicaid dollar amount of payments received for the year.

The written request must be submitted to the RARSS within 30 calendar days following the date of the nursing facility cost report filing notice.

After RARSS reviews the filed utilization and payment information, RARSS will send a written response to approve or deny the facility's request to submit a less than complete cost report. If approved, the facility will be required to furnish the following information using the required formats (ECR file worksheets):

- Information and Certification page.
- Statistical and Fiscal Data page.
- Ownership Information and Questionnaire.

In addition, the facility must prepare and submit the following information for the cost reporting period:

- Balance Sheet, and
- Prepared Financial Statements.

The nursing facility must submit the data within the same period required for complete cost reports. Medicaid reserves the right to require the facility to file a complete cost report.

4.6 COST REPORT DUE DATE

The RARSS will notify the nursing facility of the cost report due date by letter mailed to the nursing facility or designated business office. An acceptable cost report must be received by RARSS within five months following the nursing facility's cost reporting period end date. Subsequent notice of the cost report due date is addressed in the Cost Report Delinquency subsection of this appendix.

A cost report is considered filed timely if the acceptable cost report is submitted to the RARSS on or before the last day of the fifth month following the cost report period end date. Late submission of an acceptable cost report may cause a delay in determination of the provider's annual reimbursement rate and the rate notice to the provider. Refer to the Rate Determination subsection of this appendix for additional information.

4.6.A. CORRECTED COST REPORT DUE DATE

If a cost report is returned to the provider as unacceptable by the LTC Reimbursement and Rate Setting Section (RARSS), the provider is given five business days from the date of the RARSS cost report return letter to submit a corrected cost report via File Transfer. A

Medicaid Provider Manual

written request for an extension may be made to RARSS for additional days (not to exceed 30 calendar days from the return date). The RARSS will notify the provider in writing of the extension decision. If a corrected cost report is not received by the correction due date, the nursing facility is subject to cost report delinquency and payment termination notification and a cost report late file penalty may be applied. Refer to the Cost Report Delinquency subsection of this appendix for additional information.

4.6.B. COST REPORT FOR FACILITY CLOSURE OR CHANGE OF OWNERSHIP

A nursing facility that has terminated its Medicaid program participation, either voluntarily or as the result of regulatory action, is required to submit a final cost report within five months following termination date.

The former owner of a nursing facility that has undergone a change of ownership is required to submit a final cost report within five months following the effective date of the ownership change.

4.7 NEW FACILITY/OWNER REQUIREMENTS

A new Medicaid provider (either a new owner or a new Medicaid participating provider) must notify RARSS of its fiscal year, cost reporting period, and other pertinent information regarding the nursing facility. In order for RARSS to establish the facility's Medicaid reimbursement rate, this notice must be submitted to MDHHS at least 30 calendar days prior to the begin date of Medicaid participation. Untimely submission of the data will result in delaying Medicaid payment to the nursing facility.

The new provider information packet is available by request to the RARSS. An electronic copy of the packet may also be accessed on the MDHHS website. (Refer to the Directory Appendix for contact and website information.)

The new provider information data must include the following items:

- Medicaid operations begin date.
- Fiscal year reporting period.
- Federal employer identification number.
- Facility business name.
- Corporate name (if different from business name).
- Facility address.
- Business mail address (if different from facility address).
- Affiliation to a home office chain or related nursing facility group, including corporate organization, address, fiscal reporting period, federal employer identification number and contact person information.
- Nursing facility Medicare Program status.

The new provider information data packet must be signed and submitted by an authorized representative of the nursing facility.

4.8 CHANGING A COST REPORTING PERIOD

An annual cost report is required for the reporting period based on the nursing facility's fiscal reporting year. A nursing facility must file an annual cost report in accordance with the cost reporting period established with RARSS. However, under certain circumstances, RARSS may authorize a change in the nursing facility cost reporting period. The new cost reporting period must concur with the period of the nursing facility financial reporting year.

4.8.A. NEW FACILITY/NEW OWNERSHIP INITIAL COST REPORT

A new Medicaid provider (either a new owner or a new Medicaid participating provider) must notify RARSS of its fiscal year and cost reporting period, and other pertinent information regarding the nursing facility. The initial cost report and any related home office cost reports must cover a period of at least two months but may not exceed 13 months.

4.8.B. WRITTEN REQUEST FOR COST REPORTING PERIOD CHANGE

A nursing facility owner interested in changing a cost reporting period must submit a written request to RARSS. The request for such a change must be filed at least two months prior to the first day of the new fiscal reporting period being requested. The request must include documentation supporting the change, such as a copy of an approval of Medicare Program reporting change or Internal Revenue Service reporting year change notice. If the reporting year change is not yet approved by these agencies, a copy of notice to Internal Revenue Service reporting or application for Medicare Program reporting change may be submitted. The request must also include a copy of the nursing facility director or governing board approval resolution or minutes adopting the fiscal reporting revision.

RARSS will notify the provider in writing of the approval or denial of the request and cost report period requirements resulting from the request.

4.8.C. APPROVAL FOR TRANSITION PERIOD COST REPORTING

If the change is approved, the nursing facility will be required to file a cost report for the period between the end date of the original cost reporting period and the beginning date of the new cost reporting period. This cost report must cover a period not less than two months and not more than 13 months. Cost report periods that cover a period less than seven months may be used for Medicaid reimbursement for retrospective cost settlement determination for specific cost items, but are not used for prospective rate setting determinations affecting a subsequent rate setting year.

4.8.D. EXTENDED PERIOD COST REPORT

A provider may submit a request for a cost reporting period of more than 12 months but not greater than 13 months if:

Medicaid Provider Manual

- the provider is terminating Medicaid Program participation; or
- the facility is closing.

Written request must be made to the RARSS and must outline the exceptional circumstances. The provider will be notified in writing of approval or denial.

The RARSS may approve such requests if the Medicaid program or the nursing facility is not significantly adversely affected. Examples include requests in which:

- the request is not made for purpose to gain access to higher ceiling rates or economic inflation adjusters;
- the cost report data will have limited use for reimbursement determinations, i.e., not used for annual rate setting;
- the report is not used for subsequent period rate determination; and
- it is used solely for retrospective settlement items.

4.9 COST REPORT DELINQUENCY

The nursing facility cost report is considered delinquent if:

- The cost report is not received by RARSS within five business days of the date on the Delinquency and Medicaid Payment Termination Notice.
- A corrected cost report has not been received by RARSS by the cost report due date or correction period due date and the cost report remains not filed with RARSS.

If the nursing facility cost report is delinquent, RARSS will share a delinquency and Medicaid payment termination notice with the nursing facility or the provider's designated business office through File Transfer. The notice will indicate the date (not less than ten business days from the notice date) on which Medicaid payment will be terminated unless a cost report is received by the RARSS. If the cost report is not received after ten calendar days, a notice will be sent that the Medicaid payment will be terminated, and the following penalty will be assessed.

Upon delinquency, the provider's interim payments will be reduced by 100 percent and the provider may be assessed a late-file penalty of ten percent of any claims for dates of service beginning on the 15th of the month after the cost report was due until a complete and acceptable cost report is received.

If an acceptable cost report is received after payment termination, payments will be reinstated through the normal pay cycle(s) process. Medicaid will remove the payment termination entry pertaining to the cost report delinquency action allowing the release of all payments withheld for the cost report delinquency action. However, the ten percent late-file penalty will apply to these claims. Even when a complete and acceptable cost report is received, the late-file penalties will be applied through the gross adjustment process. No repayment schedules will be allowed for any penalty assessments. This penalty does not apply to Class VII facilities.

For providers with licensed-only beds and Medicare-only facilities, a penalty of \$20 per bed, per day, will be assessed beginning on the 15th of the month after the census data is due until the data is received. This penalty may be assessed even if MDHHS has provided a written notice of termination to a facility.

Medicaid Provider Manual

For providers who still do not submit a complete and acceptable cost report or the appropriate census data 60 days after delinquency, the total number of licensed beds, multiplied by 365 days, will be used as the number of taxable days for the calculation of the Quality Assurance Assessment Program. This will apply to both Medicaid and non-Medicaid providers.

4.10 AMENDED COST REPORT

An amended cost report to adjust a previously accepted cost report may be permitted or required by Medicaid.

An amended cost report is accepted by Medicaid to:

- Correct material errors detected subsequent to the filing of the original cost report.
- Comply with health insurance policies or regulations.
- Reflect the settlement of a contested liability.

Before completing and submitting an amended cost report, the nursing facility should contact the RARSS by verbal or written communication to determine the appropriate mode for making the necessary amendment(s). Amended cost report data will be effective for reimbursement rate determination and payment for nursing facility services rendered beginning in the month following the receipt of the provider's notice to RARSS of the need to amend the cost report.

The provider must include a disclosure letter with the amended cost report identifying the reason for the amended report and citing the cost report Worksheet(s) and the data input cell(s) within the Worksheet(s) that have been revised.

Providers cannot amend an audited cost report or amend a filed cost report after the reimbursement rate period has ended (i.e., a 2017 year-end cost report cannot be amended after it is audited or after September 30, 2019, whichever comes first). Amended cost reports will not be accepted by RARSS after the completion of an audit except in cases where the filed and audited cost report continues to be the basis for the nursing facility's current reimbursement rate. An amended cost report must properly reflect any audit adjustments made to the original cost report. Amended data will be used, as appropriate, to compute future rates but will not be used to retroactively change a previously paid prospective rate. Use of amended cost report data for retroactive application to prior services will only be made in cases related to fraud or failure to disclose required information in the cost reporting. Situations where retroactive changes are permissible are described in the Cost Report Reimbursement Settlements Section of this appendix.

4.11 HOME OFFICE, CHAIN ORGANIZATION, OR RELATED PARTY COST REPORTING

Nursing facilities that have costs applicable to services, facilities, and supplies furnished to the provider by organizations or entities related to the nursing facility by common ownership or control may include the costs in the nursing facility cost report. These costs may arise from arrangements involving a home office of a chain organization or services provided to the nursing facility or purchased by the nursing facility from related party businesses.

For facilities that are operated as part of a chain organization, home office costs claimed on the individual nursing facility's cost report must be reported using the Medicaid Nursing Facility Home Office Cost Statement (MSA-1578).

Medicaid Provider Manual

For nursing facilities reporting costs of services provided by a related party organization, the MSA-1578 must be used for reporting costs. An electronic copy of MSA-1578 will be available to providers in File Transfer. Alternative cost reporting worksheets or accounting schedules may be substituted for the Home Office Cost Statement if RARSS agrees that the alternative format provides supporting documentation to adequately identify expenses and the allocation of costs to the nursing facility. RARSS will approve the format as submitted, require additional data or revisions to the reporting format, or disapprove the alternative reporting.

When the fiscal year for the home office or related organization coincides with the nursing facility's fiscal year, the due date for the home office or related party organization cost report must coincide with the nursing facility's annual cost report due date. In cases where the fiscal years do not coincide, the nursing facility must submit the cost report of the home office or related party organization for the most recently completed fiscal year of that entity. If the report was previously submitted to RARSS, it must be resubmitted by the same due date as the nursing facility's cost report. Exception: Participation in the cost allocation option (as outlined in the Related or Chain Organization Cost Allocation subsection of this chapter) supersedes this requirement. (Refer to the Related or Chain Organization Cost Allocation subsection in this appendix for additional information.)

4.11.A. HOME OFFICE COSTS - CHAIN ORGANIZATION

For Medicaid purposes, a chain organization consists of a group of two or more nursing facilities, or at least one nursing facility and any other business or entity owned or operated and controlled by one organization.

For Medicaid policy regarding allowable costs, refer to the Cost Classification and Cost Finding Section of this appendix.

4.11.B. RELATED PARTY BUSINESS TRANSACTIONS

The operating costs of a related ownership organization are allocated to the individual nursing facility as a purchased service. This cost must be identified within the appropriate cost center in the Medicaid cost report. Identification of the type of service determines if the costs qualify to be apportioned between base and support cost using the industry-wide base and support cost percentages. If the service does not qualify to be apportioned by this method, the allocated costs are classified as support costs in the individual nursing facility.

The related party organization cost reporting is required for the specific related party organization business entity in the following cases:

- If the dollar amount of routine nursing care costs to the individual nursing facility exceeds \$25,000 in aggregate, regardless of the number or type of services provided.
- If the sum (total dollar amount) of routine nursing care costs to multiple nursing facilities exceeds \$125,000 in aggregate, regardless of the number or type of services provided and number of nursing facilities served.

These dollar limits apply to related party business transactions whether they are routine or ancillary nursing services. The dollar thresholds only apply to costs allocated to a Medicaid routine care unit, either directly or through the stepdown process (i.e., if

Medicaid Provider Manual

\$25,000 in costs are allocated to a nursing facility from a related party, but none of the costs are allocated to the Medicaid routine care unit, then no home office cost report is required). Beginning October 1, 2018 and biennially thereafter, these amounts are updated based on the Centers for Medicare & Medicaid Services (CMS) Skilled Nursing Facility (SNF) Market Basket. Amounts are posted on the Long-Term Care Reimbursement and Rate Setting Section (RARSS) website. (Refer to the Directory Appendix for website information.)

Facility lease arrangements between related parties must be separately reported in the cost report as described in the Allowable and Non-Allowable Cost Section of this appendix.

Related party expenses must remain on the individual nursing facility cost report for the proper allocation of overhead costs regardless of whether they are ancillary or routine. This provision applies even if a home office cost report is not required.

4.11.B.1. EXCEPTION PROCESS

An exception to the related party home office cost reporting requirements may be granted if all or part of the expenses are directly allocated to the nursing facility or facilities. If only part of the expenses are directly allocated, the sum of all other expenses allocated to a facility or facilities must be less than the dollar thresholds established in policy. Exceptions must be approved by RARSS prior to or on the due date of the home office cost report. Examples of expenses that would qualify for an exception include, but are not limited to, health insurance benefits, administrator and other staff salaries, retirement benefits, payroll taxes, other fringe benefits, contracted health services, medical supplies, office supplies, utilities, legal fees, etc.

4.12 COST REPORT FILED UNDER PROTEST

As part of the cost settlement and cost report audit process, a nursing facility provider may dispute a Medicaid regulatory or policy interpretation. (Refer to the Appeal Process Section of this appendix for additional information.) If the provider has a dispute regarding the annual cost report, the nursing facility must submit a separate cost report, referred to as a "protest cost report" to establish their reporting of the dispute issue. In order to preserve the nursing facility cost report claim, this separate cost report must be identified as under protest for the disputed issues that remain under appeal or are subject to an appeal. The protest cost report filing must include an accompanying letter, signed by the nursing facility authorized representative, listing the disputed issue(s) and respective dollar amount(s) for the basis of the protest cost report filing. Protest cost reporting issues will be addressed in the cost report audit process dependent upon resolution of the disputed issues. The cost report filed under protest will not be used for rate determination, but will provide information for audit consideration relative to disputed issues. The auditor will address necessary audit adjustments to the accepted cost report to reflect the appeal resolution.

Protest cost report filing is not for general disagreement with promulgated Medicaid policy. The RARSS will not accept protest cost reports filings that include items considered as disagreement or dissatisfaction with promulgated policy.

SECTION 5 - PLANT COST CERTIFICATION

Medicaid reimburses nursing facilities for costs associated with capital asset ownership. The costs are referred to as plant costs and are reimbursed as the Plant Cost Component of the per diem reimbursement rate. The Plant Cost Component is based on the cost report data submitted by the nursing facility for the previous calendar year. The Plant Cost Component includes costs associated with capital asset acquisition, depreciation, interest expense (either working capital or capital indebtedness), property taxes, amortization costs associated with loan financing costs (letters of credit, asset acquisition legal fees) and specific lease expenses. The Plant Cost Component of the reimbursement rate determined for a nursing facility remains consistent throughout the State's fiscal year period (October through September), unless the facility qualifies for an interim reimbursement rate.

Example: Plant cost data from cost report year-end December 31, 2017 is the basis for the Plant Cost Component for the October 2018 through September 2019 rate period. Refer to the Cost Classification and Cost Finding, and the Rate Determination sections of this appendix for additional information.

The process used to determine if a facility qualifies for an interim reimbursement rate is called Plant Cost Certification. Special rate setting provisions qualify facilities to use current year costs associated with capital ownership instead of the prior year's cost report data to determine the Plant Cost Component of the reimbursement rate. Rate setting provisions are available for facilities incurring exceptional changes in the facility's plant costs during the current year. Qualifying situations such as new construction or renovation, new asset acquisition, new ownership, or changes in the nursing facility's bed size or the type of resident services are considered to determine eligibility for Plant Cost Certification.

5.1 PLANT COST CERTIFICATION ELIGIBILITY CRITERIA

A facility may plant cost certify when there is no plant cost data available or when the plant cost data inadequately reflects the current rate period plant costs. Plant Cost Certification is available in the following situations:

- The nursing facility provider is constructing a new building or incurring physical plant improvements with Certificate of Need (CON) approval, or the asset costs are, on average, \$5,000 or more per licensed bed for a Class I or Class V facility or \$3,000 or more per licensed bed for a Class III facility in capital expenditures in a single cost reporting period. Medicaid will update the capital expenditure per licensed bed amounts effective October 1, 2020 and biennially thereafter based on a construction cost index for steel frame buildings and rounded to the nearest \$500 (i.e., \$5,150 would round to \$5,000, \$5,250 would round to \$5,500, etc.).
- There is an approved CON ownership change for an existing facility, or the nursing facility assets have changed ownership in a manner that requires CON review.
- The SSA has changed the class level of the facility, change in Medicaid certified beds, or the type of nursing or resident care services provided in the nursing facility.
- The nursing facility has an approved non-available bed plan in the cost report period.
- The nursing facility is in the first full cost report year following the termination of an approved non-available bed plan.

5.2 PLANT COST CERTIFICATION SUBMISSION

The provider must complete the Plant Cost Certification process and qualify in order to receive an interim reimbursement rate. The RARSS must receive a compilation of the nursing facility's expected allowable plant costs and a statement signed by the nursing facility's authorized representative attesting to the data's accuracy and adherence to the Plant Cost Certification policy. The provider must use the MDHHS required format for document preparation. A provider having a nursing facility license and leasing the facility must report facility costs of the lessor in accordance with Medicaid's reimbursement policy. Refer to the Allowable Cost and Non-Allowable Cost, and Cost Classification and Cost Finding sections in this appendix for additional information.

A provider requesting an interim reimbursement rate must provide the information in the Medicaid Long Term Care Plant Cost Certification format and submit copies of supporting documentation. A copy of the format is available on the MDHHS website. (Refer to the Directory Appendix for website information.) The Plant Cost Certification packet of accepted sample formats is available by request to RARSS. An electronic copy of the packet can also be accessed on the MDHHS website.

Supporting documentation must include the following items for a transfer of ownership of a license, acquisition, or lease that requires CON approval:

- Purchase Agreement
- Mortgage and Loan Agreements
- At least 36 months of Interest Amortization Schedules for Financing prepared by the lender
- Property Tax Statements
- Capital Asset Cost Appraisal
- Purchase Closing Statement or Recording

Supporting documentation must include the following items, where applicable, for a renovation, addition, or new construction:

- Licensed Bed Notice issued by the State Survey Agency (SSA)
- Mortgage and Loan Agreements, if applicable
- At least 36 months of Interest Amortization Schedules for Financing prepared by the lender
- Property Tax Statements
- Construction Contract Statement or Summary

RARSS must receive the provider's completed Plant Cost Certification prior to the cost reporting period filing deadline, and providers must meet the qualifications to receive an interim reimbursement rate. The completed information and supporting documentation may be sent to RARSS by mail, delivery, or File Transfer. Inquiries relating to the submission of the data should be directed to the RARSS office. (Refer to the Directory Appendix for contact information.)

If RARSS determines that the plant certification eligibility criteria are met, the submitted cost data will be desk reviewed, adjusted if necessary, and used to calculate the nursing facility's Plant Cost Component. If the fiscal year cost report filing and subsequent cost report audit determine the data used to calculate

the reimbursement for the Plant Cost Component resulted in an overpayment or underpayment to the provider, the Medicaid recovery or additional reimbursement due the provider is included in the cost report reimbursement settlement. (Refer to the Cost Report Reimbursement Settlement section of this appendix for additional information.)

5.2.A. PLANT COST CERTIFICATION REQUIREMENT FOR REIMBURSEMENT – BUILDING AND EQUIPMENT CHANGES

A new or existing provider or business entity operating a nursing facility that is incurring a change involving the nursing facility's building and equipment must complete a Plant Cost Certification. A provider that obtains ownership of the nursing facility building and equipment or enters a lease agreement for the facility must submit a completed Plant Cost Certification. In the instance that a lease change is the result of a facility ownership change where the provider has a different landlord, a plant cost certification is required if any terms of the lease agreement changes, such as lease amount, duration, etc.

The Plant Cost Component of the reimbursement rate will be zero until the Plant Cost Certification is received by the RARSS. In order to be eligible for retroactive reimbursement, the provider must submit a completed Plant Cost Certification on or before the date of the initial filing of cost report for the year in which the ownership change or asset transaction occurred. The effective date of the Plant Cost Certification will be the month that new ownership becomes the licensed entity or the asset transaction. Plant Cost Certification requests received by RARSS subsequent to the cost report filing will not be eligible for retroactive reimbursement, and future plant cost reimbursement rates will be effective as outlined under the effective period policy.

5.2.B. PLANT COST CERTIFICATION SUBMISSION WAIVER

If the provider qualifies for Plant Cost Certification under the approved non-available bed plan or because it is the first cost report year after the non-available bed plan termination, the data submission requirement is waived. The provider has the option to file during the rate year or to defer the plant cost rate revision until the cost report reimbursement settlement. Settlement adjustments for plant costs for the cost reporting period will automatically apply to non-available bed plan periods. If a Plant Cost Certification is not filed, the nursing facility's interim Plant Cost Component will continue to be based on the previous year's cost report, and the cost report reimbursement settlement will be adjusted to the allowable plant cost level for the cost report period. Refer to the Cost Report Reimbursement Settlement section of this appendix for additional information.

5.3 PLANT COST CERTIFICATION EFFECTIVE PERIOD

The effective period of the plant cost certification will be determined by the RARSS. A completed Medicaid Long Term Care Plant Cost Certification request in required format, with documentation, received by the RARSS prior to the 16th of the month is effective and included in the reimbursement rate as of the first day of the following month (e.g., a request received between September 16 and October 16 will be reflected for days of care beginning November 1).

Medicaid Provider Manual

The effective date of the plant cost certification cannot be prior to the month in which the facility experienced the change of ownership or the qualifying asset change. The rate is not revised for partial months. For interim rate setting, the revised reimbursement rate due to the Plant Cost Certification will not be applied to prior service dates except in instances where a provider meets certification eligibility under the nursing facility ownership change or lease provisions. If a plant cost certification is filed prior to the provider's cost report year end, an interim reimbursement rate is effective on a prospective basis for service dates after filing date. Retroactive reimbursement due to the plant cost change for that cost report year services will be addressed in the initial and final settlement determination of the cost report. Refer to the Cost Report Reimbursement Section of this appendix for additional information.

If a Plant Cost Certification is filed after the provider's cost report year end filing deadline but prior to the rate year beginning immediately after the filing deadline, the plant cost reimbursement rate change is only effective on a prospective basis in accordance with the period established by the Plant Cost Certification request receipt date. Plant Cost Certifications filed on or after the rate year beginning after the applicable cost report filing deadline will not be accepted (i.e., if a provider has a December 31, 2018 cost report year end and made a qualifying capital change in 2018, then the provider would need to submit a Plant Cost Certification prior to October 1, 2019 for it to be accepted).

The Plant Cost Certification interim reimbursement ends when the nursing facility's prospective Plant Cost Component is based on the first complete cost report year that reflects the plant costs which qualified the nursing facility for Plant Cost Certification.

Example: A nursing facility with a cost report period of January 1, 2019 through December 31, 2019 completes an eligible renovation project in June 2019, and submits a Plant Cost Certification before June 16, 2019 to be effective July 1, 2019. (Note: Rate Year refers to a period coinciding with the state fiscal year rate period. The periods listed below the Rate Year identify the period during which the rate will be paid and the cost report year on which the rate is based.)

Nursing Facility Initial Period Interim Rates for Plant Cost Reimbursement

Rate Year: October 2018 – September 2019	October 2018 – June 2019: Plant cost for the cost year end December 2017	July 2019 – September 2019: Plant cost based on plant cost certification reflecting expected cost for the cost report year end December 2019
--	--	--

Nursing Facility Final Rates for Plant Cost Reimbursement

Rate Year: October 2018 – September 2019	October 2018 – December 2018: Plant cost for the cost report year end December 2017	January 2019 – September 2019: Plant cost for the cost report year end December 2019
Rate Year: October 2019 – September 2020	October 2019 – December 2019: Plant cost for the cost report year end December 2019	January 2020 – September 2020: Plant cost for the cost report year end December 2020

Medicaid Provider Manual

Rate Year: October 2020 – September 2021	October 2020 – December 2020: Plant cost for cost report year end December 2020	January 2021 – September 2021: Plant cost for the cost report year end December 2021
Rate Year: October 2021 – September 2022	October 2021 – September 2022: Plant cost for cost report year end December 2020	

5.4 PLANT COST CERTIFICATION UPDATES AND REVISIONS

The nursing facility's initial Plant Cost Certification will continue to be used for the interim Plant Cost Component unless the nursing facility submits a revision to the Plant Cost Certification.

Following the initial submission of the Plant Cost Certification, the nursing facility is responsible to submit an updated or revised Plant Cost Certification to assure the interim Plant Cost Component reimbursement is representative of the current rate period plant costs.

The nursing facility provider may revise its submitted Plant Cost Certification at the beginning of subsequent fiscal year rate periods or the beginning of a calendar quarter, but not more than two times per year. The effective timeframes for payment based on the updated information are the same as noted above.

The overpayment penalty provisions, if applicable, remain in effect regardless of payment based on initial submission or revised data.

5.5 PLANT COST CERTIFICATION OVERPAYMENT PENALTY

At the time of the MDHHS audit of the provider's fiscal year cost report, if the interim reimbursement payments resulting from Plant Cost Certification exceed cost report settlement plant cost reimbursement, all excess funds paid as a result of the Plant Cost Certification request will be recovered by Medicaid. The provider will be assessed a penalty for overpayments resulting from Plant Cost Certification. The penalty will be 10 percent of the aggregate dollar amount difference between the interim reimbursement payments resulting from the Plant Cost Certification and the cost report settlement plant cost reimbursement. The penalty will be waived if the aggregate dollar amount difference is equal to or less than 10 percent of the provider's aggregate Plant Cost Component reimbursement amount for the cost settlement period. Overpayment recovery and penalty determination are included in the Cost Report Reimbursement Settlements Section.

SECTION 6 – AUDIT

The goal of the cost report audit is to provide the MDHHS assurances that the cost report information is accurate for the determination of Medicaid reimbursement rates, and includes the following objectives:

- To review, analyze, and test the nursing facility's Statement of Reimbursable Cost and underlying financial records to confirm that only reasonable and allowable costs have been included.
- To confirm that the methods used to calculate the required statistical information are adequate and that the statistical data is recorded accurately.
- To confirm that the cost finding and cost apportionment have been accurately and fairly computed.
- To confirm the accuracy of the costs allocated to Medicaid by independently applying the method approved for the provider's use in computing reimbursable cost.
- To confirm that, in all material aspects, the nursing facility provider is in compliance with the reimbursement policies and regulations.
- To review, analyze and test the nursing facility's revenue and billings to determine the propriety of billing practices and identify potential errors and financial risk to Medicaid.
- To identify the underlying causes of significant errors or problems noted during the audit and to suggest improvements.
- To follow up on significant problem areas identified in previous audits.
- To confirm consistent and uniform application of federal and state laws, rules, and regulations for reimbursable costs.

The audit process described in this section is not applicable to State Veterans' Homes.

6.1 AUDIT PROCESS

The annual audit process may include a desk audit/review, a computer check, and/or an onsite audit. This process may be performed by MDHHS audit staff or by a qualified designee.

An audit of either limited or full scope will be performed on the records of each participating nursing facility provider to ensure that the expenses attributable to allowable cost items are accurately reported in accordance with established principles and guidelines.

A Preliminary Summary of Audit Adjustments Notice is issued to the facility upon completion of the audit.

6.1.A. REQUIRED INFORMATION [CHANGE MADE 4/1/2025]

Each provider must allow access or arrange for access by MDHHS staff, or their designees, to required financial records and statistical data including:

- Records required by the Medicare Principles of Reimbursement
- Complete financial records of related organizations

Medicaid Provider Manual

- Complete records of lessors necessary to determine underlying costs of leasing facilities and items of equipment

These records include, but are not limited to, the following:

- Census records and numbers and types of leave days for each Medicaid beneficiary/resident (i.e., hospital, therapeutic)
- Resident medical records, with details of medical services received by each resident
- Resident service charge schedules
- Resident trust fund account records, with evidence of quarterly reporting to each resident
- Medicaid Cost Report with supporting documentation for cost finding statistics utilized on the report, including appropriate approved time study information where applicable (text added 4/1/2025)
- Supporting documentation for Nurse Aide Training and Competency Evaluation Program activity and cost data
- Documentation to support the cost and activity level for special Medicaid reimbursement provisions beyond the scope of services included in routine nursing care
- Total and Medicaid ancillary charge summaries and logs
- Medicare Cost Report, if applicable
- Medicare and other health insurance billing and payment records for each resident
- Books of original entry, including standard/special journals, payroll journals, disbursement journals, etc.
- Employee records, including detailed payroll records, personnel files, employee wage scales, shift schedules, union contracts, agreements, fringe benefits (e.g., deferred compensation, pension plans, insurance, personal use of assets, special allowances), individual accounts of leave days, job descriptions, and payroll tax returns.
- Facility policy and procedure manuals and related materials
- Plans for internal control
- Minutes of meetings of the governing body
- General and subsidiary ledgers, including stock ledgers, cash receipts, etc.
- Purchase requisitions and orders
- Vouchers and invoices in detail to support services and goods purchased
- Records related to management fees, executive services or personal services contracts, and contracts for services under arrangement
- Charts of accounts
- Checking account registers, canceled checks, and bank statements
- Vehicle mileage and use logs
- Fixed asset records

Medicaid Provider Manual

- Capital expenditure records and depreciation lapse schedules
- Copies of long-term debt obligations, mortgages, notes payable/receivable, amortization schedules, year-end statements, and loan histories
- Tax returns, or federal informational returns for tax-exempt facilities
- Provider organization ownership disclosure records, e.g., Articles of Incorporation, Partnership Agreement, and other similar documentation
- Records regarding chain organizations, including corporate home office costs
- Work papers and records regarding the preparation of cost reports
- Audit reports of financial statements
- Work papers of internal and external accountants used in the preparation of the cost report(s)
- Records regarding working capital. Analysis of source and use of funds, which includes working capital loan principle payments
- Leases and all related records
- Accounts receivable Aging Schedule
- Accounts payable Aging Schedule

6.1.B. AUDIT TIMELINE

MDHHS shall ensure that an audit of a cost report is completed no later than 21 months after the final acceptance of a cost report, and that the 21-month period does not include any time associated with any appeal or a charge of fraud filed against the provider. A cost report not audited within the 21 months will be accepted as filed and move to settlement.

6.1.C. ON-SITE AUDIT

MDHHS shall complete an on-site audit on an as-needed basis. The on-site audit shall not last more than 30 calendar days per cost report year for an individual nursing facility, and not more than 30 calendar days per cost report year per nursing facility for two or more commonly owned or controlled facilities up to a maximum of 180 calendar days per cost report year (i.e., the on-site audit could last 60 days per cost report year for two facilities, 90 days for three facilities, etc. up to a maximum of 180 days for six or more facilities), unless MDHHS and the nursing facility agree in writing to extend the timeline. An on-site audit will occur where the nursing facility's records are located, regardless of whether those records are located on the nursing facility's premises or elsewhere. A limited-scope audit shall be performed for cost reports in which an on-site audit is not performed.

6.1.D. AUDIT SAMPLING

MDHHS shall use statistical sampling, non-statistical sampling, or a combination of sampling methods for selecting items to audit. If a combination of sampling methods is used, then the items that could be selected under the statistical sample cannot be

included in the non-statistical sample and vice versa (i.e., if 29 items are selected through a statistical sample out of a possible 500 items, then the other 471 items cannot be included in a non-statistical sample).

6.1.E. SCHEDULING AN AUDIT

MDHHS will submit an Intent to Audit – Scheduling Notice at least 30 calendar days prior to the intended audit start date. The audit start date may take place no more than 10 business days after the intended audit start date or on a date prior to the intended audit start date. The provider must provide a response to the notice within five business days, otherwise the audit will begin on the intended audit start date. If the intended audit start date does not work for the provider, then they must notify MDHHS within five business days of the notice and provide alternative dates for the audit. If a mutually agreed upon audit start date cannot be selected, then the audit will commence on the intended audit start date.

6.1.F. AVAILABILITY OF INFORMATION

The nursing facility must have an accounting and records maintenance system to provide accurate cost, revenue and statistical data, and other information that can be verified by MDHHS Bureau of Audit staff or their designees. Documentation must be provided to support the actual expenditure of costs; non-actuarial estimates are not allowable supporting documentation.

Prior to the audit start date, MDHHS staff will submit an Audit Engagement Notice to the provider via File Transfer. This notice will include a list of the required documentation and the consequences for unavailable documentation. The documentation required by the Audit Engagement Notice must be available to MDHHS within 15 business days. If none of the documentation requested in the notice is available within 15 business days, then MDHHS will move to schedule an Exit Meeting. If some of the documentation is available, then the provider will have two or five business days to submit the unavailable documentation; two business days for an individual facility and five business days for two or more commonly owned or controlled facilities. If documentation is not released within the timeframes described in this paragraph, then the costs in question will be preliminarily disallowed and the provider may not submit the unavailable documentation until the Exit Meeting.

While reviewing available documentation, MDHHS may determine that additional documentation is necessary to support an expense. MDHHS will submit a written request to the provider, and the provider will have two or five business days to submit the additional documentation; two business days for an individual facility and five business days for two or more commonly owned or controlled facilities. If the documentation is not released within the timeframes described in this paragraph, then the costs associated with the item in question will be preliminarily disallowed and the provider may not submit the unavailable documentation until the Exit Meeting.

MDHHS will move to schedule an Exit Meeting or audit other expenses after the timeframes described in this subsection have passed, even if requested documentation is

Medicaid Provider Manual

not made available. (Refer to the Appeal Process Section of this appendix for additional information.)

6.1.G. EXTRAPOLATION

MDHHS may use extrapolation methods to determine audit adjustments for expenses included in the sampling universe (i.e., all items that have a chance to be sampled in a random sampling process) in a statistical sample. The provider will be notified if extrapolation methods were used in the Exit Meeting Summary of Audit Adjustments Notice, the Preliminary Summary of Audit Adjustments Notice, and the Final Summary of Audit Adjustments Notice. The notice will include the sampling selection methodology, the sample size, the disallowed expenses, and the extrapolation formulas and calculations. The Preliminary Summary of Audit Adjustments Notice will also include the provider's appeal rights, which include the ability to appeal the extrapolation methods used to determine the audit adjustment.

6.1.H. EXIT MEETING

An Exit Meeting is a meeting offered to the provider to be held within five business days after the completion of the audit work to communicate the audit results to the provider and to obtain the provider's comments on the proposed findings of the audit prior to the issuance of the Preliminary Summary of Audit Adjustments Notice. The offer to schedule an Exit Meeting will be sent to the provider in the Exit Meeting Summary of Audit Adjustments Notice. To schedule an Exit Meeting, a provider must specify dates and times for the meeting to take place that are within five business days of the written offer to schedule a meeting. An Exit Meeting may be scheduled prior to the issuance of the Exit Meeting Summary of Audit Adjustment Notice, but if the scheduled Exit Meeting does not occur within five business days of the issuance of the Exit Meeting Summary of Audit Adjustments Notice, then the meeting date must change to occur within five business days of the notice. An Exit Meeting may be held in person, via telephone, or via electronic correspondence (i.e., email, video chat, etc.). If a provider does not attend a scheduled Exit Meeting, then the provider forfeits their right to an Exit Meeting. The provider may designate an authorized representative to attend the Exit Meeting (e.g., their cost report preparer, etc.).

In addition to the offer to schedule an Exit Meeting, the Exit Meeting Summary of Audit Adjustments Notice will contain a summary of MDHHS' proposed audit adjustments. The provider may submit additional information related to a proposed audit adjustment at the Exit Meeting and for up to two business days after the Exit Meeting (or within five business days of the Exit Meeting Summary of Audit Adjustments Notice if an Exit Meeting is not held). MDHHS will not consider any additional information related to a proposed audit adjustment after two business days have passed from the date of the Exit Meeting (or five business days from the issuance of the Exit Meeting Summary of Audit Adjustments Notice if an Exit Meeting is not held).

6.1.I. COMPLETED AUDIT

A completed audit is represented by the issuance of the Preliminary Summary of Audit Adjustments Notice. The Preliminary Summary of Audit Adjustments Notice will be issued after the Exit Meeting is held or waived.

6.1.J. RETROACTIVE RATE CHANGES [CHANGE MADE 4/1/2025]

A retroactive change in a nursing facility's rate and reimbursement may be made after completion of an audit in the following situations:

- For those providers that are retrospectively settled.
- For those providers that had an interim rate set prior to completion of the cost report audit.
- (text deleted per bulletin MMP 24-55)
- For audit adjustments required as a result of a hearing decision.

Refer to the Reimbursement Rate Determination section of this appendix for detailed information regarding retroactive effective periods for rate determination and reimbursement actions.

6.1.K. REOPENING AUDIT DETERMINATIONS

MDHHS may elect to reopen an audit determination following completion and closing of the audit of a nursing facility cost report. MDHHS will provide notice to the nursing facility of the audit reopening and the issues for which the audit is under review. Results of the audit reopening will be submitted to the provider, who will be given the opportunity to review the findings and appeal in accordance with Medicaid policy. If it is determined that the audited cost report contains incorrect data, MDHHS will use corrected data to compute future rates. The audit revisions will be effective for reimbursement rate determination and payment for nursing facility services rendered beginning the month following notice to the provider that the subject audit is being reopened.

The results of audit reopening actions will only be effective for retroactive reimbursement revision in cases of fraud or when the provider's failure to disclose required information was pertinent to the determination of allowable cost.

MDHHS will not reopen an audit determination for any reason other than fraud beyond the 21-month period described in the Audit Timeline subsection of this appendix.

6.1.L. RECORD RETENTION

Each nursing facility's accounting and related records must be kept for a period of not less than seven years. This obligation does not end if a provider closes or sells a facility. All records, source documents, contractual agreements, and corporate minutes must be available onsite, or at a readily accessible location, for verification and inspection by MDHHS staff or their designees. When accounting personnel, books and records are

located out of state, the provider is required to pay auditor travel expenses if MDHHS staff or their designees deem it necessary to access documentation during the course of an audit.

6.2 FINANCIAL FRAUD AND ABUSE

Federal Medicaid law and regulations require the Medicaid program to establish and maintain methods and criteria for the identification, investigation, and referral of potential fraud and abuse. In accordance with federal and state requirements, MDHHS will authorize the suspension of Medicaid payments (in whole or in part) to a nursing facility provider on receipt of reliable evidence that the provider committed fraud or willful misrepresentation while enrolled as a Medicaid provider. The provider will receive written notice of such suspension and may request an administrative review. (Refer to the Appeal Process Section of this appendix for additional information.)

A MDHHS auditor or designee who observes potential fraud or financial abuse will prepare a separate report of observations. Observations of potential fraud or abuse include, but are not limited to, the following:

- Recording of personal expenses
- Overutilization of services to inflate charges
- Unauthorized use of resident trust funds
- Payroll entries of personnel who provide no services
- Concealment of business activities
- Falsifying records
- Charging Medicaid for costs not incurred
- Duplicate billing
- Billing beneficiaries inappropriately for Medicaid services
- Soliciting, offering, or receiving a kickback, bribe, or rebate
- Knowingly failing to disclose required information in the Medicaid cost report

Reports of observations will be reviewed by MDHHS staff and appropriate actions taken. This may include forwarding a copy of the report and supporting documentation to the state Attorney General's Health Care Fraud Division.

SECTION 7 - COST REPORT REIMBURSEMENT SETTLEMENTS

The nursing facility reimbursement rate is determined in accordance with the policy provisions outlined in the Rate Determination Section of this appendix. The reimbursement rate may include routine nursing care services and various rate add-on amounts depending on the Medicaid reimbursement policy effective at the time. The facility rate is a per diem amount. Rate determination may be based on filed cost report data, audited cost report data, cost data submissions and projections for specific reimbursement activity, or interim reimbursement provisions in accordance with Medicaid policies. The reimbursement rate is determined at the beginning of the rate year and the nursing facility is provided notice of the rate determination prior to implementation of the rate. The reimbursement rate may be revised any time during the rate year in accordance with rate determination policies. Rate revisions can result from the following actions as detailed in the Rate Determination Section:

- More recent Fiscal Year filed cost report
- Audited cost report
- Plant Cost Certification
- Nurse Aide Training and Competency Evaluation Program
- Special Dietary Cost Allowance
- Special Reimbursement policy actions

Reimbursement for ancillary services provided to Medicaid-eligible residents will be made in accordance with policies identified in the Coverage portion of this chapter and in the Billing & Reimbursement for Institutional Providers Chapter.

7.1 INTERIM REIMBURSEMENT AND RATE REVISIONS

The Rate Determination Section in this appendix outlines the process for determining the nursing facility's annual reimbursement rate. If RARSS determines that a reimbursement rate must be revised, the rate change may affect payment for future and/or previous dates of service. RARSS will notify the provider of the rate change and the rate's applicable period.

If a rate revision applies to future dates of service, RARSS will send written notice to the provider's designated address specifying the revised rate and the applicable period for the rate.

If a rate revision must be applied to previous dates of service in the current cost report year, RARSS will notify the provider of the applicable period and the reimbursement rate. If the rate revision applies to previous dates of service in the current cost report year, RARSS will make the determination of an underpayment or overpayment amount, and RARSS will notify the provider of the process for implementing the payment adjustment(s).

If the rate revision applies to a prior cost report year's dates of service, the payment adjustment process is addressed in the Initial Settlement Section of this appendix.

7.2 INITIAL SETTLEMENT

The SMA may determine that a retroactive adjustment to the nursing facility reimbursement rate and payments is needed after the end of the provider's rate year. The retroactive adjustment may be due to a previous interim rate revision or to implement a rate based on actual cost report data. After the filing and acceptance of the cost report, the RARSS will determine if an Initial Settlement adjustment is necessary to make a retroactive payment adjustment for the rate period covered by the cost report. The Initial Settlement uses the most recent accepted cost report data to calculate the retroactive reimbursement and paid Medicaid claims and other payment data. (Refer to the Rate Determination Section of this appendix for additional information.)

The RARSS will consider provider requests for Initial Settlements on an exception basis in the following situations:

- The provider anticipates a significant amount due them by Medicaid and requests an Initial Settlement in writing. The provider may make the request with the filing of the cost report.
- A payment adjustment is necessary for several months of the cost report period, and the current date is beyond the cost report period end date.
- The review of a filed cost report identifies that the interim rate add-on amount, plant cost certification amount, or other special reimbursement interim amount included in the interim rate exceeds the amounts filed in the cost report.
- The provider has terminated Medicaid participation and has failed to file an acceptable cost report. An overpayment determination will be made for the payments to the provider during the period that cost report data is required for determining final reimbursement.

If the RARSS determines that the Initial Settlement is an underpayment amount to the nursing facility, additional payment will be made to the provider for not less than 70 percent and not more than 80 percent of the determined settlement amount due the provider based on a review of the provider's financial situation and the effect of the filed cost report data on the reimbursement settlement determination. Effective January 1, 2024, the nursing facility FY21, FY22 and FY23 Initial Settlement payment amount will be increased to 100 percent. All other parts of the FY21, FY22 and FY23 Initial Settlement process remain unchanged. Although the provider may request a review of the Initial Settlement amount, the Initial Settlement payment level percentage is not subject to appeal.

If RARSS determines there is an overpayment to the nursing facility, the SMA will recover the overpayment amount as outlined in the Medicaid Recovery of Overpayments subsection.

Before making any payment adjustment, the RARSS will notify the provider in advance using a Notice of Program Reimbursement letter. The provider is given 15 calendar days for review of the settlement determination. After the period afforded the provider to review the Notice of Program Reimbursement, a notice stating the payment adjustment date(s) is shared with the provider through File Transfer. A provider may request up to an additional 30 days to review an Initial Settlement. The provider must submit a written request stating the reason and the amount of the additional time needed (up to 30 days) for review. RARSS will review the request and notify the provider in writing of the approval or denial for additional time.

If the settlement action requires correction following the review, a new notification and review period will apply to the corrected settlement. After the period afforded the provider to review the Notice of Program

Reimbursement, a notice stating the recovery payment date(s) is shared with the provider through File Transfer.

The RARSS may process a Revised Initial Settlement for the cost report period if it determines that additional payment adjustment is necessary after processing an original Initial Settlement and before completing a final settlement. A Revised Initial Settlement will be completed when there are significantly more approved claims, rate revisions or errors in the prior determination and a final settlement action cannot yet be completed. The notification and payment processing actions identified with the original Initial Settlement procedures also apply to the Revised Initial Settlement process. The payment criteria will be applicable to the aggregate dollar amount of the Initial and Revised Settlements for the reimbursement period.

7.3 FINAL SETTLEMENT

The RARSS may determine that withholding of payment is necessary or that a retroactive adjustment to the nursing facility reimbursement rate and payments is needed after the end of the provider's rate year. A retroactive adjustment may be due to a previous interim rate revision or to implement a rate based on actual cost report data. After a cost report is audited, RARSS will determine if a Final Settlement adjustment is necessary to make a retroactive payment adjustment for the rate period covered by the cost report. The Final Settlement uses the audited cost report data to calculate the retroactive reimbursement and paid Medicaid claims and other payment data. Final Settlements determine if additional payment is due to the nursing facility or Medicaid.

When Medicaid participation is terminated voluntarily or involuntarily, payment for at least one month of services rendered is retained for Final Settlement.

RARSS shares a Notice of Program Reimbursement with the provider through File Transfer. The notice explains the:

- Settlement adjustment(s) and the process prior to RARSS taking the payment action.
- Provider's appeal rights.

The provider is allowed 15 calendar days for review of the settlement determination. After the period afforded the provider to review the Notice of Program Reimbursement, a notice stating the payment adjustment date(s) is shared with the provider through File Transfer.

To obtain an extension, RARSS will review written requests from the provider stating the exceptional reason and the amount of additional time needed for the review (up to 30 calendar days). RARSS will review the exceptional circumstances stated in the request and notify the provider in writing of the approval or denial for additional time. If approved, an extended period of up to an additional 30 calendar days may be granted to the provider for review. After the period afforded the provider to review the Notice of Program Reimbursement, a notice stating the recovery payment date(s) is shared with the provider through File Transfer.

If the settlement action is corrected following a review, a new notification and review period will apply to the revised determination. After the period afforded the provider to review the Notice of Program Reimbursement, a notice stating the payment adjustment date(s) is shared with the provider through File Transfer.

Medicaid Provider Manual

RARSS may process a Revised Final Settlement for the cost report period if RARSS determines that additional adjustments are necessary subsequent to processing the Final Settlement. The adjustment(s) will be processed if significant adjustments or errors exist in the prior settlement calculation. Notification and payment processes outlined in the Final Settlement process also apply to the Revised Final Settlement process.

7.3.A. FINAL SETTLEMENT TIMELINE

MDHHS shall issue a Notice of Program Reimbursement for a final settlement not more than 60 calendar days after the issuance of the Final Summary of Audit Adjustments Notice or no more than 60 calendar days after the Preliminary Summary of Audit Adjustments Notice becomes the Final Summary of Audit Adjustments Notice.

7.4 DEPRECIATION RECAPTURE REIMBURSEMENT ADJUSTMENT

If a provider has been reimbursed for asset depreciation expense in the Plant Cost Component and has sold the nursing facility assets, the sold assets may be subject to a depreciation recapture reimbursement adjustment in the reimbursement settlement for the cost report period in which the nursing facility assets are sold. The depreciation reimbursement adjustment uses reimbursement rates paid for services between October 1, 1984 and the date the facility was sold, or the date the Plant Cost Component of the per diem rate was converted to the tenure plant cost reimbursement method. (Refer to the Rate Determination Section of this appendix for additional information.)

The depreciation recapture adjustment is only applicable to the reimbursement rate periods the provider was paid a rate that specifically included depreciation expense in the Plant Cost Component of the Medicaid per diem rate. If the provider has never received Plant Cost Component reimbursement that specifically includes depreciation expense as a cost element of the rate calculations, the provider is not subject to the depreciation recapture reimbursement adjustment and is not required to complete the Medicaid Program Depreciation Recapture reporting.

A nursing facility provider that was reimbursed for depreciation in the Plant Cost Component and sells the nursing facility's assets must complete the Medicaid Program Depreciation Recapture reporting schedules for each applicable cost reporting year where depreciation was reimbursed. The Medicaid Program Depreciation Recapture schedule must be submitted with the cost report for the year that the asset sale occurs. Reporting schedules and instructions will be provided to the provider with the final period cost reporting request or may be requested from RARSS. The reporting schedules (Excel file) and completion instructions (Word file) are available in electronic format or hard copy format.

If the Medicaid Program Depreciation Recapture is not applicable, the schedules must indicate N/A (not applicable) and be submitted with the cost report filing. If RARSS does not receive completed reporting schedules, RARSS will apply a 100 percent depreciation expense reduction rate to calculations for each cost report period used to calculate the settlement.

The net depreciation reimbursement adjustment for each cost report year the provider was reimbursed by Medicaid will be included in the settlement calculation. The depreciation adjustment will be limited to the amount Medicaid reimbursed for depreciation expense in each cost report year. Plant cost reimbursement allowances will be included in the calculation of the depreciation adjustment, and may result in reducing the net depreciation adjustment if the provider had not previously qualified for the

incentive allowances prior to the depreciation reduction. The cost report reimbursement settlement notice will include the determination of depreciation recapture reimbursement adjustment.

7.5 MEDICAID RECOVERY OF OVERPAYMENTS

Overpayment(s) due from a participating provider will first be offset against other settlements, payment adjustments, claims processing or any amounts due to the provider through lump sum or sequential installments until the overpayment amount is satisfied. If the provider is not participating in Medicaid, the overpayment amount must be paid to the State of Michigan for the Medicaid program immediately upon notification.

For recovery of overpayments during a CHOW, the successive owner will be held responsible for Medicaid overpayments, debts, and/or other liabilities regardless of sales agreement language between the successive owner and the preceding owner. Enforcement of sales agreement language is to be between the parties of that contract, and Medicaid will recover from the successive owner.

7.5.A. REQUEST FOR SETTLEMENT EXTENDED PAYMENT OF SCHEDULE

If a participating provider alleges inability to repay the total overpayment amount in a lump sum or in sequential offset(s), the provider may request consideration for an extended repayment schedule. Extension requests for Settlement repayments must be received by RARSS within 15 calendar days of the Notice of Program Reimbursement date sent to the provider from RARSS. RARSS will notify the provider in writing of the decision. Requests received after 15 calendar days will be considered at the discretion of RARSS.

7.5.B. CRITERIA FOR DETERMINING EXTENDED PAYMENT ARRANGEMENTS

Extended settlement repayment schedules will only be considered if the net dollar amount of the current settlement notice reflects an overpayment amount of more than 10 percent of the provider's normal monthly Medicaid reimbursement payment(s). The provider's request must demonstrate that lump-sum recovery will create extraordinary financial hardship on the provider, and that the cash flow need of the nursing facility prevents the immediate repayment of the overpayment amount. Other factors that must not be present in creating financial hardship to the provider are significant expenditures for unallowable costs, ownership and management compensation exceeding Medicaid allowable cost limits, or significant dollar amounts for unallowable related party business transactions.

RARSS will share the notification of the provider's repayment schedule and the repayment recovery dates and dollar amounts through File Transfer. Requests for longer than three months will only be considered under exceptional circumstances, e.g., the monthly recovery schedule amount would be greater than 50 percent of the provider's normal monthly Medicaid reimbursement payment.

SECTION 8 - ALLOWABLE AND NON-ALLOWABLE COSTS

Unless stated to the contrary in this section, Medicaid allowable costs for nursing facilities are determined in accordance with provisions in the federal Principles of Reimbursement established for the Medicare program. This section does not propose to set reimbursement standards or reimbursement methodology. The focus here is the determination of allowable costs. Reasonable costs associated with nursing facility services included in the provider's per diem rate, as identified in the Coverages portion of this chapter, are allowable costs within the parameters of the Principles.

NOTE: Definitions for the principal terms used in this section may be found in the Definitions Section of this appendix. A copy of the cost report referenced in this section, completion instructions for the report and related information are available on the MDHHS website. (Refer to the Directory Appendix for website information.)

8.1 ADVERTISING

Allowable advertising costs are considered those costs incurred by the nursing facility for an informational objective to inform the public about its services. Costs incurred for a promotional objective to increase patient utilization are not properly related to patient care and are not allowable. Examples of advertising costs incurred for a promotional objective include, but are not limited to, television ads, radio ads, restaurant placemats, billboards, and placing a facility's name on items without contact information. Advertising in the Yellow Pages is an allowable cost, except that Medicaid limits the cost to that associated with a black ink Yellow Pages ad listing not to exceed 2" x 2" in size.

8.2 APPRAISALS

Appraisal expenses incurred by providers may be allowable costs (administrative and general) if the appraisal is of assets related to resident care and if it meets the Medicaid Appraisal Guidelines. Expense for an appraisal of assets not related to resident care is not an allowable expense. Refer to the Appraisal Guidelines Section of this appendix for additional information.

8.3 ATTORNEY AND LEGAL FEES

The provider must maintain documentation and evidence of expenses incurred for legal fees and related costs as being related to the nursing facility's furnishing of patient care in order for such expenses to be allowable costs. Attorney fees are considered allowable costs incurred in the course of providing patient care, except as noted below.

Where MDHHS or the Centers for Medicare & Medicaid Services (CMS) takes action against the provider by initiating an enforcement action or issuing an audit finding, then the legal costs of responding to the action are allowable only in the following circumstances.

8.3.A. AUDIT FINDINGS AND RATE ACTIONS

- The provider prevails and the action is reversed.
Example: The audit finding is not upheld and the audit adjustment or rate action is reversed.

Medicaid Provider Manual

- The provider prevails as defined by reduction of the contested audit finding by 50 percent or more.

Example: An audit finding for an adjustment of \$50,000 is reduced to \$25,000.

8.3.B. ENFORCEMENT ACTIONS

- The provider prevails and the action is reversed.
Example: A DPNA is rescinded and does not go into effect, or when a provider is not in compliance before the effective date of the DPNA but succeeds in disputing the imposition and the DPNA is rescinded with no interruption in payment for the covered service.
- The period of imposition of a DPNA is reduced by 50 percent or more due to a change in the date that a nursing facility is determined to have been in compliance.
Example: The length of a DPNA is reduced from 20 days to 10 days.
- The provider prevails as defined by reduction of a fine by 50 percent or more.
Example: A Civil Money Penalty fine is reduced from \$5,000 to \$2,500.
- A federal enforcement action (F tag) is reduced in scope or severity.
Example: An H-level citation reduced to a G-level citation, an F (SQOC)-level citation reduced to an E-level citation, or an Informal Dispute Resolution decision results in a reduction from an E-level citation to a D-level citation. Abatement of an Immediate Jeopardy or correction of a deficiency does not constitute a reduction.
- A state enforcement action is eliminated.
- A settlement agreement is reached between the provider and the state and federal government prior to a Hearing.

8.3.C. GENERAL ADMINISTRATION OF THE FACILITY

- Attorney fees incurred in connection with facility acquisition, mortgage or finance transactions are allowable if Medicaid determines the fees reasonable. The fees must be reported under plant cost and capital asset cost reporting. Legal expenses incurred relative to a nursing facility or capital asset acquisition are considered allowable if they are capitalized and amortized over the loan for up to a five-year period.
- Legal fees incurred in the process of securing financing or refinancing of facility loans must be amortized over the life of the mortgage.
- Attorney fees relating to employer activities, labor negotiation, or in response to employment related issues or allegations, to the extent that the engaged services or actions are not prohibited under federal principles of allowable cost.
- Legal and attorney fees associated with a legal settlement negotiated by the provider or court-ordered damages are allowable, provided the fees are not covered by any of the provider's liability insurance (examples of liability insurance include, but are not limited to, auto liability insurance, general liability insurance, professional liability insurance, etc.). The fees must also meet all other Medicaid and federal allowable cost principles and policies.

8.4 BAD DEBTS, CHARITY AND COURTESY ALLOWANCES

Bad debts, charity, and courtesy allowances, as defined in the Medicare Principles, are deductions from revenue and are not allowable costs.

Bad debts are amounts considered to be uncollectable from accounts and notes receivable that were created or acquired in providing services. Charity allowances are reductions in charges made by the nursing facility provider due to the indigence of a resident. Courtesy allowances indicate a reduction in charges in the form of an allowance to physicians, clergy, members of religious orders, and others as approved by the governing body of the nursing facility, for services received by the provider.

Uncollected revenue for Medicare coinsurance and deductible billing amounts and patient payments for Medicaid eligible residents, and for non-covered services for Medicaid are not allowable costs.

8.5 CIVIL MONEY PENALTIES

Costs incurred for fines or money penalties for violation of federal, state, or local laws are not allowable.

8.6 EDUCATIONAL ACTIVITIES AND IN-SERVICE TRAINING

Medicaid has established credentials/requirements for educational activities to be recognized as allowable costs. Educational activities outside the continental United States are not allowable.

Approved educational activities are formally organized or planned programs of study engaged in by nursing facility providers in order to enhance the quality of resident care in a facility. These activities must be licensed where required by state law. Where licensing is not required, those presenting the educational activity must be recognized as a professional for the particular activity. Examples of allowable educational activities costs are:

- Part-time education for a facility's employee at properly accredited academic or technical institutions (including other providers) devoted to undergraduate or graduate work to enhance the quality of medical care or the operating efficiency of the nursing facility.
- Costs, including associated travel expense within the continental United States, for employees to participate in educational seminars and workshops to enhance the quality of medical care or the operating efficiency of the nursing facility that does not lead to the ability to practice and begin employment in a nursing or allied health specialty.

The costs of the following in-service training activities are recognized as routine nursing care costs and are allowable costs:

- Orientation and on-the-job-training.
- Mandatory in-service education for Medicaid and Medicare certification.
- Maintenance of a medical library.
- Training of a resident or resident's family in the use of medical appliances.

Costs incurred for activities related to an approved Nurse Aide Training and Competency Evaluation Program (NATCEP) are not allowed under routine nursing care, except as provided in the Medicaid

allowable cost and reimbursement policy outlined in the Cost Classifications and Cost Finding Section of this appendix.

8.7 FACILITY VEHICLES AND TRAVEL

The cost of operating a facility-owned or leased vehicle must be adequately documented and differentiated between resident care use, business use or personal use. Only the costs for resident care and costs related to the conducting of facility business are allowable vehicle and travel costs. Use of a facility vehicle by facility personnel to commute from home to the facility and to return home at the end of the daily work period or other personal travel activity is considered personal use. Cost related to personal use travel activity is not allowable. Vehicle personal use is only allowable if the costs are reported employee compensation and satisfies Internal Revenue Service individual compensation tax reporting requirements.

The minimum documentation that must be retained and be available to auditors for all vehicles is:

- A Mileage log for each vehicle.
 - The log must contain at least the date, total miles for business use, name of driver, origination and destination, and the reason(s) for the vehicle use.
 - The log must report the monthly beginning and ending odometer reading.
- Business mileage and total mileage use of the vehicle to support the dollar allocation for determining allowable cost.
- Charge slips or invoices for fuel, maintenance, and other similar items.

If the reason for a trip is to transport a resident for medical care or treatment, the medical condition necessitating the trip must be documented. If the reason is to attend a seminar, convention, or meeting is related to nursing facility operation, invoices must document proof of attendance and mileage logs must be documented to identify the reason for the trip. Vehicle use for general business travel or other activity must include the reason in the mileage log.

Medicaid considers mileage that is not logged as not related to resident care or facility operation. The cost relating to unrecorded or non-supported as business use mileage is not allowable.

Travel by nursing facility personnel via personal vehicle use is an allowable expense if the travel is consistent with the aforementioned purpose criteria. Medicaid will allow such documented mileage at the State of Michigan, Department of Technology, Management & Budget (DTMB), approved private vehicle rate. The mileage rate includes all vehicle costs and is treated as a variable support cost. The approved private vehicle mileage rate information can be accessed on the DTMB website. (Refer to the Directory Appendix for website information.)

8.8 INTEREST

Interest is the cost incurred for the use of borrowed funds. Necessary and proper interest on both current and capital indebtedness is an allowable cost in accordance with Medicare Principles of Reimbursement. The allowance for interest expense is determined using one of the following principles:

- Allowable interest expense is determined in accordance with current Medicare Principles. Medicaid applies the following guidelines, although not fully inclusive, in determining allowable

Medicaid Provider Manual

interest expense. Interest expense must be reduced by all investment income, except where such income is from:

- Gifts, grants, and endowments held separately or pooled with other funds.
- Qualifying deferred compensation and/or self-insurance trust funds.
- Income from a provider's qualified pension fund.
- The rate of interest on a loan must not be in excess of what a prudent borrower would have had to pay in the marketplace at the time the loan was made.
- Interest expense, to be allowable, must be paid to a lender not related through control, ownership, or personal relationship to the borrowing organization. Interest paid by the provider to partners, stockholders, or related organizations of the provider is, therefore, not allowable.

Exception: A nursing facility operated by a religious order is allowed to borrow funds from the order and claim necessary interest expense for those funds.

- Interest on loans in excess of asset value acquisitions (after July 1970) is not an allowable cost. In a situation where the purchase price exceeds the historical cost or the cost basis, the interest expense on that portion of the loan used to finance the excess is not allowable.
- Interest expense applicable to borrowings principle balance for a nursing facility acquisition must be separately identified and reported from interest expense applicable to working capital or miscellaneous capital asset acquisitions (assets that are not part of or related to a facility acquisition). See Cost Finding and Cost Classifications for borrowing principle balance descriptions.
- Working capital borrowings are considered funds borrowed for 12 months or less to meet current normal operating expenses. For lines of credit, the borrowing shall be compliant with the 12 month requirement if the provider repays the entire amount withdrawn within 12 months of the date of the first draw. If the entire amount of the working capital borrowing is not repaid within 12 months, then all the interest expense associated with the borrowing is unallowable.
 - The loan must meet allowable cost principles. The rules on working capital borrowings do not apply to loans on capitalized assets. Interest on current indebtedness meeting the 12 month requirement and other program working capital criteria is allowable, whereas interest expense for long-term working capital indebtedness is not considered allowable.
 - The nursing facility must document the need and due date for the working capital loan. The need must be to meet normal operating expenses and must be supported by an application of funds analysis demonstrating the use of loan proceeds for nursing facility expenses.
 - For the application of funds analysis, the provider must show that current cash receipts are not sufficient to meet the accounts payable, payroll, and other financial obligations. The provider must also demonstrate that the loan proceeds went directly into the appropriate cash account. The provider must document when each withdrawal was used, how each withdrawal was used, and how the funds are being applied to a purpose related to patient care. If the Home Office is the recipient of funds and intends to transfer funds to a provider under the Home Office, the provider must demonstrate the financial need for the funds, how the money was used, and how the use is related to patient care.

Medicaid Provider Manual

- The loan must include/require repayment of the principal balance within a prescribed period, including regular scheduled repayment amounts applying to the principal borrowings amount. The provider may repay the principal balance of the loan on a monthly, quarterly, or annual basis. If the provider repays the entire principal balance before the expiration of the loan term, the interest expense on that loan is considered allowable. If the provider has a line of credit, the provider must repay the entire amount withdrawn within 12 months of the date of the first draw for the interest expense to be considered allowable.
- Interest income is applied first as a reduction to mortgage related borrowing allowable interest expense, and then to other borrowings allowable interest expense.
- Interest expense is distinguished from penalty or finance late fees by the existence of a lender and borrower relationship pertaining to the financed amount. Penalty and finance fee assessments relating to late payment of liabilities are not considered borrowing costs and are not allowable.
- Interest expense includes the cost of finance charges associated with borrowed funds. If the interest expense on borrowed funds is allowable or unallowable, this would include any applicable finance charges. Finance charges include, but are not limited to, expenses related to the maintenance of records, account maintenance fees, related transaction fees, administration, etc.
- For loans issued on or after October 1, 2019, the minimum payment amount on the principal balance or a payment amount totaling at least 0.1 percent of the total outstanding loan balance, whichever is greater, must be made at least annually for any loan that has a loan period of greater than four years in order for interest to be considered an allowable expense. Refinancing of a loan or refinancing of multiple loans is not considered a principal balance payment, nor is a refinanced loan considered a new loan for purposes of this section. This includes when a short-term loan balance is paid off with borrowed funds, including bridge and balloon type loans.
- For loans issued on or after October 1, 2019, if a provider is prohibited from making principal payments or is unable to restructure/negotiate the payment of principal, the Department will calculate allowable interest expense based on an audited amortization schedule with monthly principal payments of 0.1 percent of the declining loan balance amount.
- Any loan costs related to obtaining or negotiating principal payment compliant loans will be deemed allowable and amortized for the life of the loan. Pre-payment penalties will also be allowable for the initial conversion to a loan with compliant principal payments and amortized for the life of the loan.
- Loans that are refinanced into Federal Housing and Urban Development (HUD) loans are exempt from the principal payment requirement. If the loan is denied or the provider chose to withdraw from the Federal HUD financing process, all interest expense reported in the preceding years will be removed in the current audit year.
- All related party loan costs, including interest expense, are unallowable regardless of any principal payment requirements.

8.8.A. INTEREST CLASS I AND CLASS II NURSING FACILITIES

For the Class I and Class II facility, interest on borrowed funds related to the facility acquisition allowable interest expense is determined in accordance with the Principles in

Medicaid Provider Manual

effect on July 17, 1984, prior to the changes associated with the mandates of the DEFRA of 1984 and its limitations on the revaluation of assets.

- The dollar amount of facility acquisition financing is limited to the lesser of:
 - the purchase price of the nursing facility,
 - the current reproduction cost adjusted for straight-line depreciation over the life of the asset to the time of purchase, or
 - fair market value at the time of purchase; minus the purchase down payment.
- Interest expense on the dollar amount of a facility acquisition loan principle in excess of the financing limit is not allowable.
- Depreciated replacement cost is defined as the current reproduction cost adjusted for straight-line depreciation over the life of the asset.
- Depreciated replacement cost must be determined by an independent appraiser, chosen and paid for by the nursing facility provider, in accordance with the "Appraisal Guidelines" in the Principles.

Note: For Class I and Class II facilities that choose to forego increased reimbursement for interest expense, they must adopt the prior owner's financing and acquisition costs, interest expense schedule of borrowings, principal amortization, and interest expense recognized for reimbursement by the Medicaid program prior to the sale. Annual cost reporting must continue to be based on the prior owners.

8.9 LEASE COSTS

The Medicaid allowable cost provisions for asset lease transactions depend on the type of asset. Generally, asset lease transactions require that the lease expense be removed from cost and replaced by the underlying ownership cost of the property owner. Lease or long-term rental agreement (more than twelve months duration) transactions must be reported in the Medicaid cost report Statement of Leased Capital Assets. Cost reporting disclosure of lease costs is required to properly classify ownership costs for determining Medicaid reimbursement. There are also specific asset lease transactions that must be reported in the cost report statement but are an exception to the underlying ownership disclosure requirement. Specific types of lease expenses are discussed in the following sections.

Maintenance costs for leased capital assets, other than lease situations qualifying under "pass-through lease" criteria, are classified as variable costs. The nursing facility must determine and report these costs in the appropriate cost center or department. This requirement may necessitate the breakout of the maintenance costs for the lease contract.

Lease costs are differentiated from incidental or non-recurring rental expenses incurred to address a limited need of the facility. Rental expense incurred for incidental or limited time rental items, or non-recurring rental transactions, are allowable operating costs in the applicable cost center or department requiring the rental action. Limited time rental is considered as not longer than twelve months, non-recurring, and prohibits several/numerous sequential transactions for the same or similar rental items.

Exception: An extended period up to 24 months may be approved by RARSS in instances related to construction or renovation. The provider must submit an extension request to RARSS in writing at least

Medicaid Provider Manual

45 calendar days prior to the effective date of the extension. The request requires disclosure of item, duration, and action that precipitated the need to extend the project. RARSS will respond in writing.

8.9.A. FACILITY LEASE

Cost reporting and reimbursement for capital assets relating to the nursing facility premises are under the same methods whether the items are owned or leased. For items to be considered allowable costs, the acquisition dates and asset costs, interest expense and other applicable ownership costs must be reported. Allowable lease costs are determined using one of the following principles:

- A nursing facility provider that entered into an acceptable, arm's-length lease prior to September 1, 1973, where the lessor has refused to open its books, is allowed an actual lease cost up to a maximum of \$2.50 per resident day. This limit was developed from the average lease/rental costs for facilities leased prior to September 1, 1973, at which time the current method of calculation was effected. The pre-September 1, 1973, lessee has the right of appeal of an acceptable, arm's-length lease agreement for costs that exceed the \$2.50 limit.
- A nursing facility provider that entered into, or amended, an acceptable, arm's-length lease agreement on or after September 1, 1973, is allowed a plant cost component determined in accordance with the Rate Determination section of this appendix, as applicable to an owner-provider, if the lessee discloses the allowable cost information required for rate setting. Leased assets are treated as though the lessor and the lessee are one and the same. Without full disclosure, lease expenses are not an allowable cost.

Interest expense allowed in the case of the lessor is also limited by Medicare Principles of Reimbursement. Further, interest income of the provider (lessee) is offset against all interest expense, including interest expense allowed on rental properties.

8.9.B. PLANT COST LEASE OTHER THAN FACILITY SPACE

Lease expense for nursing facility equipment or other activity that does not qualify for pass through lease expense is not allowable and must be reported utilizing the ownership underlying cost reporting requirement. If a lease is a virtual purchase and the lessee becomes the property owner at the termination of the lease, or for a nominal buyout amount, ownership cost reporting must be applied. The definition criteria of a virtual purchase are addressed in the federal Principles of Reimbursement.

Office space costs incurred in a home office or related party administrative service transaction are allowable under application of allowable depreciation, interest and property tax underlying ownership cost principles. Reasonable and necessary lease expenses incurred by a home office or related party for administrative services office space are allowable. Ownership underlying cost reporting is not required for leased business office space or similar leased space except in rental transactions involving a related party landlord. Related party transactions for office space are limited to ownership underlying costs applicable to allowable depreciation cost principles. The cost of office space is included in the cost of the home office or related party administrative services space cost and must be reported in accordance with Medicaid policy identified in the Cost Classification and Cost Finding Section of this appendix.

8.9.C. PLANT COST PASS THROUGH LEASES

A select group of rental and lease situations are exceptions to the requirement for disclosure of the underlying ownership costs. The lease or rental cost of qualifying items is allowed as plant cost in the lease rental cost classification to the extent that the asset use and cost is related to patient care. The pass through lease allowance applies to the following:

- Vehicle lease to a maximum of \$425/month or \$5,100/year, per vehicle
- Photocopiers
- Postage meters
- Telecommunications systems (including fax machines)
- Desktop or notebook computers and printers
- Parking lots and off-site record storage for rental from an unrelated party ownership and arm's length transaction
