- The new ownership operation must be a different legal entity in which the family-related seller is not an officer or board member exercising control over the new operation. The nursing facility entity may remain as an ongoing business entity in a situation where the real estate sale does not involve the licensed nursing facility operator. This occurs where a related party lease exists between the nursing facility entity prior to the real estate transaction, and the real estate transaction of the leased nursing facility is between the family-related parties. The requirement that the family-related lessor/seller cannot exercise active interest or control in the management of the nursing facility after the sale must be met.

The following will be applied to a change in ownership as a result of a sale between family members:

- The allowable asset value to the purchaser is limited to the allowable historical capital asset cost of the seller party (or nursing facility entity owned by the family member) minus the dollar amount of depreciation expense allowed and reimbursed under the Medicaid Program. There is no increase in nursing facility asset values. MDHHS considers Medicaid reimbursement to the nursing facility for depreciation expense was zero dollars during the period that the seller provider was reimbursed by Medicaid for plant cost based upon capital asset value tenure reimbursement rate.

- The tenure factor for the nursing facility following the sale will revert to zero due to the capital asset transaction affecting a plant cost increase.

- The Medicaid program plant cost reimbursement limitations of the Deficit Reduction Act (DEFRA) of 1984 will not apply to the transaction as a result of the purchase limitation to the historical asset cost base of the seller.
3.4 FACILITY ASSET CHANGE OF OWNERSHIP

In the event of a binding agreement and/or sale occurring on or after July 18, 1984, the Plant Cost Component for the nursing facility, attributable to the agreement and/or sale, is limited to the Medicaid Program policy provisions applying federal reimbursement limits of the DEFRA. Refer to the plant cost component rate determination provisions in the Rate Determination Section of this appendix for additional information.

At the time of the facility asset ownership change, the Provider must complete a Plant Cost Certification and submit a copy of the purchase and/or lease agreement, along with plant cost information, to the MDHHS LTC Reimbursement and Rate Setting Section (RARSS). The information is necessary to establish the reimbursement rate for the Plant Cost Component due to the asset ownership change. For Plant Cost Certification requirements and timeframes for filing the data, refer to the Plant Cost Certification Section of this appendix.

For an explanation of the effect of the sale of assets on the Tenure Factor, refer to the Rate Determination Section of this appendix.

In the event of a sale after March 31, 1985, Medicaid will recapture from the selling provider any reimbursement received in the form of depreciation expense, through the date of either the sale and transfer of assets or, for a Class I facility, that provider's conversion to a "Return on Current Asset Value Component" reimbursement, whichever is earlier. This reimbursement provision does not apply to Class I nursing facility providers whose ownership began after March 31, 1985. For information regarding depreciation reimbursement adjustment, refer to the Cost Report Reimbursement Settlements Section of this appendix.

3.5 TERMINATION OF MEDICAID PARTICIPATION

A nursing facility that loses its Medicaid certification as a result of regulatory action, irrespective of whether that action requires facility closure, or a nursing facility that chooses to terminate its participation in the Medicaid program without closing must comply with notice and cost reporting requirements. Refer to the Cost Reporting Section in this appendix and to the Notification Process for Regulatory Actions, Nursing Facility Closure Protocol, or Voluntary Withdrawal From Participation in the Medicaid Program or Voluntary Nursing Facility Closure subsections in the Certification, Survey & Enforcement Appendix of this chapter for relevant information.

When Medicaid participation is terminated voluntarily or involuntarily, payment for at least one month of services rendered is retained for Final Settlement.
SECTION 4 - COST REPORTING

A nursing facility participating in the Medicaid program must submit a Medicaid cost report to MDHHS annually as a condition of participation. An electronic copy of the cost report, the cost report completion instructions, completion and submission checklists, and related information are available on the MDHHS website. (Refer to the Directory Appendix for website information.)

4.1 EXCEPTIONS

4.1.A. EXCEPTION FOR HOSPICE PROVIDER OWNED NURSING FACILITY

A hospice provider that owns and operates a nursing facility is not required to file an annual cost report to Medicaid. The nursing facility industry aggregate cost data is used in place of individual facility cost data to establish a Medicaid reimbursement rate for this type of nursing facility. Rate determination procedures are addressed in the Rate Determination Section of this appendix.

4.1.B. EXCEPTION FOR SWING BEDS

Hospitals providing short term nursing services (swing beds) are not required to submit a Medicaid nursing facility cost report. Costs associated with swing beds are combined with those of the hospital and submitted on the hospital cost report. Refer to the Hospital Chapter of this manual for information regarding cost reporting requirements related to swing beds.

4.1.C. STATE VETERANS’ HOMES

A State Veterans’ Home is not required to submit a Medicaid NF cost report. The Medicare SNF cost report is used in place of the Medicaid cost report. The Medicare cost report is to be submitted electronically to the MDHHS Reimbursement and Rate Setting Section (RARSS) through the MDHHS File Transfer application. The Medicare Principles of Reimbursement apply for cost reporting purposes rather than the allowable cost principles described in the Allowable and Non-Allowable Costs section of this Appendix. The cost reporting requirements in the Less Than Complete Cost Report, Cost Report Due Date, New Facility/Owner Requirements, Changing a Cost Reporting Period, and Cost Report Delinquency subsections of this Appendix are still applicable.

4.2 NURSING FACILITY COST REPORT

An annual cost report is required for the cost reporting period which is based on the nursing facility's fiscal reporting year end. Each cost report must include an itemized list of all expenses as recorded in the formal and permanent accounting records of the facility. These records must be maintained in a manner consistent with the Medicare Principles of Reimbursement, except where modified by Medicaid policy. Records must also be kept in a manner consistent with previous cost reporting periods. The accrual method of accounting is mandated for all providers. For any cost situation that is not covered by the Medicare Principles of Reimbursement guidelines or Medicaid policy, Generally Accepted Accounting Principles (GAAP) should be applied.
Related organizations and costs to related organizations, as defined in federal policies and regulations, must be disclosed on the nursing facility cost report. Related organization costs claimed for Medicaid reimbursement through the nursing facility's rate determination process must be documented to RARSS on a completed home office cost report or on alternative cost reporting schedules as defined in the Home Office, Chain Organization, or Related Party Cost Reporting subsection of this appendix.

RARSS retains the filed nursing facility cost reports for a minimum of three years from the date of receipt. Nursing facilities are required to retain documentation supporting filed cost reports for a minimum of seven years from the end of the applicable cost reporting period, or beyond the seven year period if audit determinations have not been resolved.

4.3 COST REPORT REQUIREMENTS

The RARSS will send a notice electronically through the File Transfer application to the facility or business office as designated by the provider soon after the end date of the nursing facility's cost reporting period on record. The notice specifies the nursing facility's county and license number coding, fiscal reporting period end date, cost report due date, and other pertinent data necessary for the completion of the cost report. The provider will have access to the specific information required to file an acceptable Medicaid Cost Report package in File Transfer. File Transfer has the applicable electronic cost report template, completion instructions, construction cost index for asset acquisitions, and other pertinent information in downloadable form.

The completed cost report package submitted to RARSS must include:

- The standardized electronic cost report (ECR) data in accordance with specified formatting and software.
- An electronic copy of the Certification Statement (Worksheet A), which has been prepared and printed from the completed ECR file, and physically signed by an authorized representative of the nursing facility certifying to the accuracy of the prepared cost report.
- A copy of the nursing facility's detailed general ledger and complete (no grouping or summary) trial balance of revenues and expenses. Both documents must be submitted as electronic Excel files.
- Copies of supporting workpapers for all Worksheet 1-A and Worksheet 1-B adjustments as electronic Word or Excel files (invoices may be submitted as PDF files).

The completed cost report package must be delivered electronically through File Transfer to RARSS as indicated in the notice.

4.4 COST REPORT ACCEPTANCE

Each cost report submitted to RARSS is verified prior to its acceptance. The cost report package will only be accepted if all of the following conditions are met:

- The package is complete.
- The cost report calculations are mathematically accurate, reasonable and consistent.
The completed electronic cost report (ECR) data uses the required software and specified format.

- MDHHS audit staff can generate a full cost report applicable to the cost year from the ECR file.
- An electronic copy of the Certification Statement is completed and signed, and agrees with the submitted ECR file.
- The data meets a set of validation checks contained within the ECR plus the appropriate bed size and certification reporting requirements.
- The submitted ECR file includes proper reporting of costs and related cost report allocations in accordance with prior year(s) audit adjustment determinations for like costs or cost reporting issues.
- The cost report preparation complies with Medicaid policy and cost reporting instructions.

Prior to acceptance of the submitted cost report, RARSS may adjust inaccurate data reported on the cost report if correct data is available to RARSS and the adjustment would not impact the computation of the per diem reimbursement rate. For example, RARSS may adjust the Title XIX Routine Nursing Days reported on the cost report if there is large discrepancy between the reported days and actual billed Medicaid days from the reporting period.

A cost report is considered not filed until it is accepted by RARSS. If the submitted cost report is determined to be unacceptable, RARSS will return the cost report to the nursing facility for correction and provide notice of the date the corrected cost report is due. The returned cost report will include information that indicates the reason(s) for the unacceptable report.

A corrected cost report – a revision of the most recently submitted cost report – may be submitted to RARSS for acceptance upon approval by RARSS. The provider should contact RARSS to obtain the acceptance status of that reporting period’s most recent cost report ECR file prior to submission of a corrected cost report. A corrected cost report that is accepted by RARSS defaults as the original cost report.

MDHHS shall accept a non-delinquent cost report no more than 60 calendar days after the cost report is filed.

4.5 LESS THAN COMPLETE COST REPORT

With written approval from the RARSS, a nursing facility may submit a less than complete cost report.

4.5.A. NO MEDICAID UTILIZATION

A nursing facility with no Medicaid utilization during a cost reporting period is required to submit a less than complete cost report.

4.5.B. LOW MEDICAID UTILIZATION

A nursing facility with low Medicaid utilization during a cost reporting period is required to submit a less than complete cost report. "Low utilization" is defined as an average of less than six Medicaid residents per day in the facility for the cost year, i.e., fewer than 1,825 Medicaid nursing days. The nursing facility must submit a written request to RARSS for approval to file a less than complete cost report for the specific cost reporting...
period. The request must be signed by an authorized representative of the nursing facility, identify the reporting period the request applies to, include the facility's name and provider NPI number, and:

- Indicate the reason(s) for the request.
- Indicate Medicaid utilization and the approximate Medicaid dollar amount of payments received for the year.

The written request must be submitted to the RARSS within 30 calendar days following the date of the nursing facility cost report filing notice.

After RARSS reviews the filed utilization and payment information, RARSS will send a written response to approve or deny the facility's request to submit a less than complete cost report. If approved, the facility will be required to furnish the following information using the required formats (ECR file worksheets):

- Information and Certification page.
- Statistical and Fiscal Data page.
- Ownership Information and Questionnaire.

In addition, the facility must prepare and submit the following information for the cost reporting period:

- Balance Sheet, and
- Prepared Financial Statements.

The nursing facility must submit the data within the same period required for complete cost reports. Medicaid reserves the right to require the facility to file a complete cost report.

4.6 COST REPORT DUE DATE

The RARSS will notify the nursing facility of the cost report due date by letter mailed to the nursing facility or designated business office. An acceptable cost report must be received by RARSS within five months following the nursing facility's cost reporting period end date. Subsequent notice of the cost report due date is addressed in the Cost Report Delinquency subsection of this appendix.

A cost report is considered filed timely if the acceptable cost report is submitted to the RARSS on or before the last day of the fifth month following the cost report period end date. Late submission of an acceptable cost report may cause a delay in determination of the provider's annual reimbursement rate and the rate notice to the provider. Refer to the Rate Determination subsection of this appendix for additional information.

4.6.A. CORRECTED COST REPORT DUE DATE

If a cost report is returned to the provider as unaccepted by the LTC Reimbursement and Rate Setting Section (RARSS), the provider is given five business days from the date of the RARSS cost report return letter to submit a corrected cost report via File Transfer. A
written request for an extension may be made to RARSS for additional days (not to exceed 30 calendar days from the return date). The RARSS will notify the provider in writing of the extension decision. If a corrected cost report is not received by the correction due date, the nursing facility is subject to cost report delinquency and payment termination notification. Refer to the Cost Report Delinquency subsection of this appendix for additional information.

4.6.B. COST REPORT FOR FACILITY CLOSURE OR CHANGE OF OWNERSHIP

A nursing facility that has terminated its Medicaid program participation, either voluntarily or as the result of regulatory action, is required to submit a final cost report within five months following termination date.

The former owner of a nursing facility that has undergone a change of ownership is required to submit a final cost report within five months following the effective date of the ownership change.

4.7 NEW FACILITY/OWNER REQUIREMENTS

A new Medicaid provider (either a new owner or a new Medicaid participating provider) must notify RARSS of its fiscal year, cost reporting period, and other pertinent information regarding the nursing facility. In order for RARSS to establish the facility’s Medicaid reimbursement rate, this notice must be submitted to MDHHS at least 30 calendar days prior to the begin date of Medicaid participation. Untimely submission of the data will result in delaying Medicaid payment to the nursing facility.

The new provider information packet is available by request to the RARSS. An electronic copy of the packet may also be accessed on the MDHHS website. (Refer to the Directory Appendix for contact and website information.)

The new provider information data must include the following items:

- Medicaid operations begin date.
- Fiscal year reporting period.
- Federal employer identification number.
- Facility business name.
- Corporate name (if different from business name).
- Facility address.
- Business mail address (if different from facility address).
- Affiliation to a home office chain or related nursing facility group, including corporate organization, address, fiscal reporting period, federal employer identification number and contact person information.
- Nursing facility Medicare Program status.

The new provider information data packet must be signed and submitted by an authorized representative of the nursing facility.
4.8 CHANGING A COST REPORTING PERIOD

An annual cost report is required for the reporting period based on the nursing facility's fiscal reporting year. A nursing facility must file an annual cost report in accordance with the cost reporting period established with RARSS. However, under certain circumstances, RARSS may authorize a change in the nursing facility cost reporting period. The new cost reporting period must concur with the period of the nursing facility financial reporting year.

4.8.A. NEW FACILITY/NEW OWNERSHIP INITIAL COST REPORT

A new Medicaid provider (either a new owner or a new Medicaid participating provider) must notify RARSS of its fiscal year and cost reporting period, and other pertinent information regarding the nursing facility. The initial cost report must cover a period of at least two months but may not exceed 13 months.

4.8.B. WRITTEN REQUEST FOR COST REPORTING PERIOD CHANGE

A nursing facility owner interested in changing a cost reporting period must submit a written request to RARSS. The request for such a change must be filed at least two months prior to the first day of the new fiscal reporting period being requested. The request must include documentation supporting the change, such as a copy of an approval of Medicare Program reporting change or Internal Revenue Service reporting year change notice. If the reporting year change is not yet approved by these agencies, a copy of notice to Internal Revenue Service reporting or application for Medicare Program reporting change may be submitted. The request must also include a copy of the nursing facility director or governing board approval resolution or minutes adopting the fiscal reporting revision.

RARSS will notify the provider in writing of the approval or denial of the request and cost report period requirements resulting from the request.

4.8.C. APPROVAL FOR TRANSITION PERIOD COST REPORTING

If the change is approved, the nursing facility will be required to file a cost report for the period between the end date of the original cost reporting period and the beginning date of the new cost reporting period. This cost report must cover a period not less than two months and not more than 13 months. Cost report periods that cover a period less than seven months may be used for Medicaid reimbursement for retrospective cost settlement determinations for specific cost items, but are not used for prospective rate setting determinations affecting a subsequent rate setting year.

4.8.D. EXTENDED PERIOD COST REPORT

A provider may submit a request for a cost reporting period of more than 12 months but not greater than 13 months if:

- the provider is terminating Medicaid Program participation; or
- the facility is closing.
Written request must be made to the RARSS and must outline the exceptional circumstances. The provider will be notified in writing of approval or denial.

The RARSS may approve such requests if the Medicaid program or the nursing facility is not significantly adversely affected. Examples include requests in which:

- the request is not made for purpose to gain access to higher ceiling rates or economic inflation adjustors;
- the cost report data will have limited use for reimbursement determinations, i.e., not used for annual rate setting;
- the report is not used for subsequent period rate determination; and
- it is used solely for retrospective settlement items.

4.9 COST REPORT DELINQUENCY

The nursing facility cost report is considered delinquent if:

- The cost report is not received by RARSS within five business days of the date on the Delinquency and Medicaid Payment Termination Notice.
- A corrected cost report has not been received by RARSS by the cost report due date or correction period due date and the cost report remains not filed with RARSS.

If the nursing facility cost report is delinquent, RARSS will share a delinquency and Medicaid payment termination notice with the nursing facility or the provider’s designated business office through File Transfer. The notice will indicate the date (not less than ten business days from the notice date) on which Medicaid payment will be terminated unless a cost report is received by the RARSS.

If an acceptable cost report is received after payment termination, payments will be reinstated through the normal pay cycle(s) process. Medicaid will remove the payment termination entry pertaining to the cost report delinquency action allowing the release of all payments withheld for the cost report delinquency action.

4.10 AMENDED COST REPORT

An amended cost report to adjust a previously accepted cost report may be permitted or required by Medicaid.

An amended cost report is accepted by Medicaid to:

- Correct material errors detected subsequent to the filing of the original cost report.
- Comply with health insurance policies or regulations.
- Reflect the settlement of a contested liability.

Before completing and submitting an amended cost report, the nursing facility should contact the RARSS by verbal or written communication to determine the appropriate mode for making the necessary amendment(s). Amended cost report data will be effective for reimbursement rate determination and
payment for nursing facility services rendered beginning in the month following the receipt of the provider's notice to RARSS of the need to amend the cost report.

The provider must include a disclosure letter with the amended cost report identifying the reason for the amended report and citing the cost report Worksheet(s) and the data input cell(s) within the Worksheet(s) that have been revised.

Providers cannot amend an audited cost report or amend a filed cost report after the reimbursement rate period has ended (i.e., a 2017 year-end cost report cannot be amended after it is audited or after September 30, 2019, whichever comes first). Amended cost reports will not be accepted by RARSS after the completion of an audit except in cases where the filed and audited cost report continues to be the basis for the nursing facility's current reimbursement rate. An amended cost report must properly reflect any audit adjustments made to the original cost report. Amended data will be used, as appropriate, to compute future rates but will not be used to retroactively change a previously paid prospective rate. Use of amended cost report data for retroactive application to prior services will only be made in cases related to fraud or failure to disclose required information in the cost reporting. Situations where retroactive changes are permissible are described in the Cost Report Reimbursement Settlements Section of this appendix.

4.11 HOME OFFICE, CHAIN ORGANIZATION, OR RELATED PARTY COST REPORTING

Nursing facilities that have costs applicable to services, facilities, and supplies furnished to the provider by organizations or entities related to the nursing facility by common ownership or control may include the costs in the nursing facility cost report. These costs may arise from arrangements involving a home office of a chain organization or services provided to the nursing facility or purchased by the nursing facility from related party businesses.

For facilities that are operated as part of a chain organization, home office costs claimed on the individual nursing facility's cost report must be reported using the Medicaid Nursing Facility Home Office Cost Statement (MSA-1578).

For nursing facilities reporting costs of services provided by a related party organization, the MSA-1578 must be used for reporting costs. An electronic copy of MSA-1578 will be available to providers in File Transfer. Alternative cost reporting worksheets or accounting schedules may be substituted for the Home Office Cost Statement if RARSS agrees that the alternative format provides supporting documentation to adequately identify expenses and the allocation of costs to the nursing facility. RARSS will approve the format as submitted, require additional data or revisions to the reporting format, or disapprove the alternative reporting.

When the fiscal year for the home office or related organization coincides with the nursing facility's fiscal year, the due date for the home office or related party organization cost report must coincide with the nursing facility's annual cost report due date. In cases where the fiscal years do not coincide, the nursing facility must submit the cost report of the home office or related party organization for the most recently completed fiscal year of that entity. If the report was previously submitted to RARSS, it must be resubmitted by the same due date as the nursing facility's cost report. Exception: Participation in the cost allocation option (as outlined in the Related or Chain Organization Cost Allocation subsection of this chapter) supersedes this requirement. (Refer to the Related or Chain Organization Cost Allocation subsection in this appendix for additional information.)
4.11.A. HOME OFFICE COSTS - CHAIN ORGANIZATION

For Medicaid purposes, a chain organization consists of a group of two or more nursing facilities, or at least one nursing facility and any other business or entity owned or operated and controlled by one organization.

For Medicaid policy regarding allowable costs, refer to the Cost Classification and Cost Finding Section of this appendix.

4.11.B. RELATED PARTY BUSINESS TRANSACTIONS

The operating costs of a related ownership organization are allocated to the individual nursing facility as a purchased service. This cost must be identified within the appropriate cost center in the Medicaid cost report. Identification of the type of service determines if the costs qualify to be apportioned between base and support cost using the industry-wide base and support cost percentages. If the service does not qualify to be apportioned by this method, the allocated costs are classified as support costs in the individual nursing facility.

The related party organization cost reporting is required for the specific related party organization business entity in the following cases:

- If the dollar amount of routine nursing care costs to the individual nursing facility exceeds $25,000 in aggregate, regardless of the number or type of services provided.
- If the sum (total dollar amount) of routine nursing care costs to multiple nursing facilities exceeds $125,000 in aggregate, regardless of the number or type of services provided and number of nursing facilities served.

These dollar limits apply to related party business transactions whether they are routine or ancillary nursing services. The dollar thresholds only apply to costs allocated to a Medicaid routine care unit, either directly or through the stepdown process (i.e., if $25,000 in costs are allocated to a nursing facility from a related party, but none of the costs are allocated to the Medicaid routine care unit, then no home office cost report is required). Beginning October 1, 2018 and biennially thereafter, these amounts are updated based on the Centers for Medicare & Medicaid Services (CMS) Skilled Nursing Facility (SNF) Market Basket. Amounts are posted on the Long-Term Care Reimbursement and Rate Setting Section (RARSS) website. (Refer to the Directory Appendix for website information.)

Facility lease arrangements between related parties must be separately reported in the cost report as described in the Allowable and Non-Allowable Cost Section of this appendix.

Related party expenses must remain on the individual nursing facility cost report for the proper allocation of overhead costs regardless of whether they are ancillary or routine. This provision applies even if a home office cost report is not required.
4.11.B.1. Exception Process

An exception to the related party home office cost reporting requirements may be granted if all or part of the expenses are directly allocated to the nursing facility or facilities. If only part of the expenses are directly allocated, the sum of all other expenses allocated to a facility or facilities must be less than the dollar thresholds established in policy. Exceptions must be approved by RARSS prior to or on the due date of the home office cost report. Examples of expenses that would qualify for an exception include, but are not limited to, health insurance benefits, administrator and other staff salaries, retirement benefits, payroll taxes, other fringe benefits, contracted health services, medical supplies, office supplies, utilities, legal fees, etc.

4.12 Cost Report Filed Under Protest

As part of the cost settlement and cost report audit process, a nursing facility provider may dispute a Medicaid regulatory or policy interpretation. (Refer to the Appeal Process Section of this appendix for additional information.) If the provider has a dispute regarding the annual cost report, the nursing facility must submit a separate cost report, referred to as a "protest cost report" to establish their reporting of the dispute issue. In order to preserve the nursing facility cost report claim, this separate cost report must be identified as under protest for the disputed issues that remain under appeal or are subject to an appeal. The protest cost report filing must include an accompanying letter, signed by the nursing facility authorized representative, listing the disputed issue(s) and respective dollar amount(s) for the basis of the protest cost report filing. Protest cost reporting issues will be addressed in the cost report audit process dependent upon resolution of the disputed issues. The cost report filed under protest will not be used for rate determination, but will provide information for audit consideration relative to disputed issues. The auditor will address necessary audit adjustments to the accepted cost report to reflect the appeal resolution.

Protest cost report filing is not for general disagreement with promulgated Medicaid policy. The RARSS will not accept protest cost reports filings that include items considered as disagreement or dissatisfaction with promulgated policy.
SECTION 5 - PLANT COST CERTIFICATION

Medicaid reimburses nursing facilities for costs associated with capital asset ownership. The costs are referred to as plant costs and are reimbursed as the Plant Cost Component of the per diem reimbursement rate. The Plant Cost Component is based on the cost report data submitted by the nursing facility for the previous calendar year. The Plant Cost Component includes costs associated with capital asset acquisition, depreciation, interest expense (either working capital or capital indebtedness), property taxes, amortization costs associated with loan financing costs (letters of credit, asset acquisition legal fees) and specific lease expenses. The Plant Cost Component of the reimbursement rate determined for a nursing facility remains consistent throughout the State’s fiscal year period (October through September), unless the facility qualifies for an interim reimbursement rate.

Example: Plant cost data from cost report year-end December 31, 2017 is the basis for the Plant Cost Component for the October 2018 through September 2019 rate period. Refer to the Cost Classification and Cost Finding, and the Rate Determination sections of this appendix for additional information.

The process used to determine if a facility qualifies for an interim reimbursement rate is called Plant Cost Certification. Special rate setting provisions qualify facilities to use current year costs associated with capital ownership instead of the prior year’s cost report data to determine the Plant Cost Component of the reimbursement rate. Rate setting provisions are available for facilities incurring exceptional changes in the facility's plant costs during the current year. Qualifying situations such as new construction or renovation, new asset acquisition, new ownership, or changes in the nursing facility’s bed size or the type of resident services are considered to determine eligibility for Plant Cost Certification.

5.1 PLANT COST CERTIFICATION ELIGIBILITY CRITERIA

A facility may plant cost certify when there is no plant cost data available or when the plant cost data inadequately reflects the current rate period plant costs. Plant Cost Certification is available in the following situations:

- The nursing facility provider is constructing a new building or incurring physical plant improvements with Certificate of Need (CON) approval, or the asset costs are, on average, $5,000 or more per licensed bed for a Class I or Class V facility or $3,000 or more per licensed bed for a Class III facility in capital expenditures in a single cost reporting period. Medicaid will update the capital expenditure per licensed bed amounts effective October 1, 2020 and biennially thereafter based on a construction cost index for steel frame buildings and rounded to the nearest $500 (i.e., $5,150 would round to $5,000, $5,250 would round to $5,500, etc.).
- There is an approved CON ownership change for an existing facility, or the nursing facility assets have changed ownership in a manner that requires CON review.
- The SSA has changed the class level of the facility, change in Medicaid certified beds, or the type of nursing or resident care services provided in the nursing facility.
- The nursing facility has an approved non-available bed plan in the cost report period.
- The nursing facility is in the first full cost report year following the termination of an approved non-available bed plan.
5.2 PLANT COST CERTIFICATION SUBMISSION

The provider must complete the Plant Cost Certification process and qualify in order to receive an interim reimbursement rate. The RARSS must receive a compilation of the nursing facility's expected allowable plant costs and a statement signed by the nursing facility's authorized representative attesting to the data's accuracy and adherence to the Plant Cost Certification policy. The provider must use the MDHHS required format for document preparation. A provider having a nursing facility license and leasing the facility must report facility costs of the lessor in accordance with Medicaid's reimbursement policy. Refer to the Allowable Cost and Non-Allowable Cost, and Cost Classification and Cost Finding sections in this appendix for additional information.

A provider requesting an interim reimbursement rate must provide the information in the Medicaid Long Term Care Plant Cost Certification format and submit copies of supporting documentation. A copy of the format is available on the MDHHS website. (Refer to the Directory Appendix for website information.) The Plant Cost Certification packet of accepted sample formats is available by request to RARSS. An electronic copy of the packet can also be accessed on the MDHHS website.

Supporting documentation must include the following items for a transfer of ownership of a license, acquisition, or lease that requires CON approval:

- Purchase Agreement
- Mortgage and Loan Agreements
- At least 36 months of Interest Amortization Schedules for Financing prepared by the lender
- Property Tax Statements
- Capital Asset Cost Appraisal
- Purchase Closing Statement or Recording

Supporting documentation must include the following items, where applicable, for a renovation, addition, or new construction:

- Licensed Bed Notice issued by the State Survey Agency (SSA)
- Mortgage and Loan Agreements, if applicable
- At least 36 months of Interest Amortization Schedules for Financing prepared by the lender
- Property Tax Statements
- Construction Contract Statement or Summary

RARSS must receive the provider's completed Plant Cost Certification prior to the cost reporting period filing deadline, and providers must meet the qualifications to receive an interim reimbursement rate. The completed information and supporting documentation may be sent to RARSS by mail, delivery, or File Transfer. Inquiries relating to the submission of the data should be directed to the RARSS office. (Refer to the Directory Appendix for contact information.)

If RARSS determines that the plant certification eligibility criteria are met, the submitted cost data will be desk reviewed, adjusted if necessary, and used to calculate the nursing facility's Plant Cost Component. If the fiscal year cost report filing and subsequent cost report audit determine the data used to calculate
the reimbursement for the Plant Cost Component resulted in an overpayment or underpayment to the provider, the Medicaid recovery or additional reimbursement due the provider is included in the cost report reimbursement settlement. (Refer to the Cost Report Reimbursement Settlement section of this appendix for additional information.)

5.2.A. PLANT COST CERTIFICATION REQUIREMENT FOR REIMBURSEMENT – BUILDING AND EQUIPMENT CHANGES

A new or existing provider or business entity operating a nursing facility that is incurring a change involving the nursing facility's building and equipment must complete a Plant Cost Certification. A provider that obtains ownership of the nursing facility building and equipment or enters a lease agreement for the facility must submit a completed Plant Cost Certification. In the instance that a lease change is the result of a facility ownership change where the provider has a different landlord, a plant cost certification is required if any terms of the lease agreement changes, such as lease amount, duration, etc.

The Plant Cost Component of the reimbursement rate will be zero until the Plant Cost Certification is received by the RARSS. In order to be eligible for retroactive reimbursement, the provider must submit a completed Plant Cost Certification on or before the date of the initial filing of cost report for the year in which the ownership change or asset transaction occurred. The effective date of the Plant Cost Certification will be the month that new ownership becomes the licensed entity or the asset transaction. Plant Cost Certification requests received by RARSS subsequent to the cost report filing will not be eligible for retroactive reimbursement, and future plant cost reimbursement rates will be effective as outlined under the effective period policy.

5.2.B. PLANT COST CERTIFICATION SUBMISSION WAIVER

If the provider qualifies for Plant Cost Certification under the approved non-available bed plan or because it is the first cost report year after the non-available bed plan termination, the data submission requirement is waived. The provider has the option to file during the rate year or to defer the plant cost rate revision until the cost report reimbursement settlement. Settlement adjustments for plant costs for the cost reporting period will automatically apply to non-available bed plan periods. If a Plant Cost Certification is not filed, the nursing facility's interim Plant Cost Component will continue to be based on the previous year's cost report, and the cost report reimbursement settlement will be adjusted to the allowable plant cost level for the cost report period. Refer to the Cost Report Reimbursement Settlement section of this appendix for additional information.

5.3 PLANT COST CERTIFICATION EFFECTIVE PERIOD

The effective period of the plant cost certification will be determined by the RARSS. A completed Medicaid Long Term Care Plant Cost Certification request in required format, with documentation, received by the RARSS prior to the 16th of the month is effective and included in the reimbursement rate as of the first day of the following month (e.g., a request received between September 16 and October 16 will be reflected for days of care beginning November 1).
The effective date of the plant cost certification cannot be prior to the month in which the facility experienced the change of ownership or the qualifying asset change. The rate is not revised for partial months. For interim rate setting, the revised reimbursement rate due to the Plant Cost Certification will not be applied to prior service dates except in instances where a provider meets certification eligibility under the nursing facility ownership change or lease provisions. If a plant cost certification is filed prior to the provider’s cost report year end, an interim reimbursement rate is effective on a prospective basis for service dates after filing date. Retroactive reimbursement due to the plant cost change for that cost report year services will be addressed in the initial and final settlement determination of the cost report. Refer to the Cost Report Reimbursement Section of this appendix for additional information.

If a Plant Cost Certification is filed after the provider’s cost report year end filing deadline but prior to the rate year beginning immediately after the filing deadline, the plant cost reimbursement rate change is only effective on a prospective basis in accordance with the period established by the Plant Cost Certification request receipt date. Plant Cost Certifications filed on or after the rate year beginning after the applicable cost report filing deadline will not be accepted (i.e., if a provider has a December 31, 2018 cost report year end and made a qualifying capital change in 2018, then the provider would need to submit a Plant Cost Certification prior to October 1, 2019 for it to be accepted).

The Plant Cost Certification interim reimbursement ends when the nursing facility’s prospective Plant Cost Component is based on the first complete cost report year that reflects the plant costs which qualified the nursing facility for Plant Cost Certification.

**Example:** A nursing facility with a cost report period of January 1, 2019 through December 31, 2019 completes an eligible renovation project in June 2019, and submits a Plant Cost Certification before June 16, 2019 to be effective July 1, 2019. (Note: Rate Year refers to a period coinciding with the state fiscal year rate period. The periods listed below the Rate Year identify the period during which the rate will be paid and the cost report year on which the rate is based.)

### Nursing Facility Initial Period Interim Rates for Plant Cost Reimbursement

### Nursing Facility Final Rates for Plant Cost Reimbursement

5.4 PLANT COST CERTIFICATION UPDATES AND REVISIONS

The nursing facility's initial Plant Cost Certification will continue to be used for the interim Plant Cost Component unless the nursing facility submits a revision to the Plant Cost Certification.

Following the initial submission of the Plant Cost Certification, the nursing facility is responsible to submit an updated or revised Plant Cost Certification to assure the interim Plant Cost Component reimbursement is representative of the current rate period plant costs.

The nursing facility provider may revise its submitted Plant Cost Certification at the beginning of subsequent fiscal year rate periods or the beginning of a calendar quarter, but not more than two times per year. The effective timeframes for payment based on the updated information are the same as noted above.

The overpayment penalty provisions, if applicable, remain in effect regardless of payment based on initial submission or revised data.

5.5 PLANT COST CERTIFICATION OVERPAYMENT PENALTY

At the time of the MDHHS audit of the provider's fiscal year cost report, if the interim reimbursement payments resulting from Plant Cost Certification exceed cost report settlement plant cost reimbursement, all excess funds paid as a result of the Plant Cost Certification request will be recovered by Medicaid. The provider will be assessed a penalty for overpayments resulting from Plant Cost Certification. The penalty will be 10 percent of the aggregate dollar amount difference between the interim reimbursement payments resulting from the Plant Cost Certification and the cost report settlement plant cost reimbursement. The penalty will be waived if the aggregate dollar amount difference is equal to or less than 10 percent of the provider's aggregate Plant Cost Component reimbursement amount for the cost settlement period. Overpayment recovery and penalty determination are included in the Cost Report Reimbursement Settlements Section.
SECTION 6 – AUDIT

The goal of the cost report audit is to provide the MDHHS assurances that the cost report information is accurate for the determination of Medicaid reimbursement rates, and includes the following objectives:

- To review, analyze, and test the nursing facility's Statement of Reimbursable Cost and underlying financial records to confirm that only reasonable and allowable costs have been included.
- To confirm that the methods used to calculate the required statistical information are adequate and that the statistical data is recorded accurately.
- To confirm that the cost finding and cost apportionment have been accurately and fairly computed.
- To confirm the accuracy of the costs allocated to Medicaid by independently applying the method approved for the provider's use in computing reimbursable cost.
- To confirm that, in all material aspects, the nursing facility provider is in compliance with the reimbursement policies and regulations.
- To review, analyze and test the nursing facility's revenue and billings to determine the propriety of billing practices and identify potential errors and financial risk to Medicaid.
- To identify the underlying causes of significant errors or problems noted during the audit and to suggest improvements.
- To follow up on significant problem areas identified in previous audits.
- To confirm consistent and uniform application of federal and state laws, rules, and regulations for reimbursable costs.

The audit process described in this section is not applicable to State Veterans’ Homes.

6.1 AUDIT PROCESS

The annual audit process may include a desk audit/review, a computer check, and/or an onsite audit. This process may be performed by MDHHS audit staff or by a qualified designee.

Onsite audits will be conducted no less than once every four years. An audit of either limited or full scope will be performed on the records of each participating nursing facility provider to ensure that the expenses attributable to allowable cost items are accurately reported in accordance with established principles and guidelines.

A Preliminary Summary of Audit Adjustments Notice is issued to the facility upon completion of the audit.

6.1.A. REQUIRED INFORMATION

Each provider must allow access or arrange for access by MDHHS staff, or their designees, to required financial records and statistical data including:

- Records required by the Medicare Principles of Reimbursement
- Complete financial records of related organizations
Complete records of lessors necessary to determine underlying costs of leasing facilities and items of equipment

These records include, but are not limited to, the following:

- Census records and numbers and types of leave days for each Medicaid beneficiary/resident (i.e., hospital, therapeutic)
- Resident medical records, with details of medical services received by each resident
- Resident service charge schedules
- Resident trust fund account records, with evidence of quarterly reporting to each resident
- Medicaid Cost Report with supporting documentation for cost finding statistics utilized on the report
- Supporting documentation for Nurse Aide Training and Competency Evaluation Program activity and cost data
- Documentation to support the cost and activity level for special Medicaid reimbursement provisions beyond the scope of services included in routine nursing care
- Total and Medicaid ancillary charge summaries and logs
- Medicare Cost Report, if applicable
- Medicare and other health insurance billing and payment records for each resident
- Books of original entry, including standard/special journals, payroll journals, disbursement journals, etc.
- Employee records, including detailed payroll records, personnel files, employee wage scales, shift schedules, union contracts, agreements, fringe benefits (e.g., deferred compensation, pension plans, insurance, personal use of assets, special allowances), individual accounts of leave days, job descriptions, and payroll tax returns.
- Facility policy and procedure manuals and related materials
- Plans for internal control
- Minutes of meetings of the governing body
- General and subsidiary ledgers, including stock ledgers, cash receipts, etc.
- Purchase requisitions and orders
- Vouchers and invoices in detail to support services and goods purchased
- Records related to management fees, executive services or personal services contracts, and contracts for services under arrangement
- Charts of accounts
- Checking account registers, canceled checks, and bank statements
- Vehicle mileage and use logs
- Fixed asset records
- Capital expenditure records and depreciation lapse schedules
• Copies of long-term debt obligations, mortgages, notes payable/receivable, amortization schedules, year-end statements, and loan histories
• Tax returns, or federal informational returns for tax-exempt facilities
• Provider organization ownership disclosure records, e.g., Articles of Incorporation, Partnership Agreement, and other similar documentation
• Records regarding chain organizations, including corporate home office costs
• Work papers and records regarding the preparation of cost reports
• Audit reports of financial statements
• Work papers of internal and external accountants used in the preparation of the cost report(s)
• Records regarding working capital. Analysis of source and use of funds, which includes working capital loan principle payments
• Leases and all related records
• Accounts receivable Aging Schedule
• Accounts payable Aging Schedule

6.1.B. AUDIT TIMELINE

MDHHS shall ensure that an audit of a cost report is completed no later than 21 months after the final acceptance of a cost report, and that the 21-month period does not include any time associated with any appeal or a charge of fraud filed against the provider. A cost report not audited within the 21 months will be accepted as filed and move to settlement.

6.1.C. ON-SITE AUDIT

MDHHS shall complete an on-site audit on an as-needed basis. The on-site audit shall not last more than 30 calendar days per cost report year for an individual nursing facility, and not more than 30 calendar days per cost report year per nursing facility for two or more commonly owned or controlled facilities up to a maximum of 180 calendar days per cost report year (i.e., the on-site audit could last 60 days per cost report year for two facilities, 90 days for three facilities, etc. up to a maximum of 180 days for six or more facilities), unless MDHHS and the nursing facility agree in writing to extend the timeline. An on-site audit will occur where the nursing facility’s records are located, regardless of whether those records are located on the nursing facility’s premises or elsewhere. A limited-scope audit shall be performed for cost reports in which an on-site audit is not performed.

6.1.D. AUDIT SAMPLING

MDHHS shall use statistical sampling, non-statistical sampling, or a combination of sampling methods for selecting items to audit. If a combination of sampling methods is used, then the items that could be selected under the statistical sample cannot be included in the non-statistical sample and vice versa (i.e., if 29 items are selected
through a statistical sample out of a possible 500 items, then the other 471 items cannot be included in a non-statistical sample).

6.1.E. SCHEDULING AN AUDIT

MDHHS will submit an Intent to Audit – Scheduling Notice at least 30 calendar days prior to the intended audit start date. The audit start date may take place no more than 10 business days after the intended audit start date or on a date prior to the intended audit start date. The provider must provide a response to the notice within five business days, otherwise the audit will begin on the intended audit start date. If the intended audit start date does not work for the provider, then they must notify MDHHS within five business days of the notice and provide alternative dates for the audit. If a mutually agreed upon audit start date cannot be selected, then the audit will commence on the intended audit start date.

6.1.F. AVAILABILITY OF INFORMATION

The nursing facility must have an accounting and records maintenance system to provide accurate cost, revenue and statistical data, and other information that can be verified by MDHHS Bureau of Audit staff or their designees. Documentation must be provided to support the actual expenditure of costs; non-actuarial estimates are not allowable supporting documentation.

Prior to the audit start date, MDHHS staff will submit an Audit Engagement Notice to the provider via File Transfer. This notice will include a list of the required documentation and the consequences for unavailable documentation. The documentation required by the Audit Engagement Notice must be available to MDHHS within 15 business days. If none of the documentation requested in the notice is available within 15 business days, then MDHHS will move to schedule an Exit Meeting. If some of the documentation is available, then the provider will have two or five business days to submit the unavailable documentation; two business days for an individual facility and five business days for two or more commonly owned or controlled facilities. If documentation is not released within the timeframes described in this paragraph, then the costs in question will be preliminarily disallowed and the provider may not submit the unavailable documentation until the Exit Meeting.

While reviewing available documentation, MDHHS may determine that additional documentation is necessary to support an expense. MDHHS will submit a written request to the provider, and the provider will have two or five business days to submit the additional documentation; two business days for an individual facility and five business days for two or more commonly owned or controlled facilities. If the documentation is not released within the timeframes described in this paragraph, then the costs associated with the item in question will be preliminarily disallowed and the provider may not submit the unavailable documentation until the Exit Meeting.

MDHHS will move to schedule an Exit Meeting or audit other expenses after the timeframes described in this subsection have passed, even if requested documentation is not made available. (Refer to the Appeal Process Section of this appendix for additional information.)
6.1.G. EXTRAPOLATION

MDHHS may use extrapolation methods to determine audit adjustments for expenses included in the sampling universe (i.e., all items that have a chance to be sampled in a random sampling process) in a statistical sample. The provider will be notified if extrapolation methods were used in the Exit Meeting Summary of Audit Adjustments Notice, the Preliminary Summary of Audit Adjustments Notice, and the Final Summary of Audit Adjustments Notice. The notice will include the sampling selection methodology, the sample size, the disallowed expenses, and the extrapolation formulas and calculations. The Preliminary Summary of Audit Adjustments Notice will also include the provider's appeal rights, which include the ability to appeal the extrapolation methods used to determine the audit adjustment.

6.1.H. EXIT MEETING

An Exit Meeting is a meeting offered to the provider to be held within five business days after the completion of the audit work to communicate the audit results to the provider and to obtain the provider’s comments on the proposed findings of the audit prior to the issuance of the Preliminary Summary of Audit Adjustments Notice. The offer to schedule an Exit Meeting will be sent to the provider in the Exit Meeting Summary of Audit Adjustments Notice. To schedule an Exit Meeting, a provider must specify dates and times for the meeting to take place that are within five business days of the written offer to schedule a meeting. An Exit Meeting may be scheduled prior to the issuance of the Exit Meeting Summary of Audit Adjustment Notice, but if the scheduled Exit Meeting does not occur within five business days of the issuance of the Exit Meeting Summary of Audit Adjustments Notice, then the meeting date must change to occur within five business days of the notice. An Exit Meeting may be held in person, via telephone, or via electronic correspondence (i.e., email, video chat, etc.). If a provider does not attend a scheduled Exit Meeting, then the provider forfeits their right to an Exit Meeting. The provider may designate an authorized representative to attend the Exit Meeting (e.g., their cost report preparer, etc.).

In addition to the offer to schedule an Exit Meeting, the Exit Meeting Summary of Audit Adjustments Notice will contain a summary of MDHHS’ proposed audit adjustments. The provider may submit additional information related to a proposed audit adjustment at the Exit Meeting and for up to two business days after the Exit Meeting (or within five business days of the Exit Meeting Summary of Audit Adjustments Notice if an Exit Meeting is not held). MDHHS will not consider any additional information related to a proposed audit adjustment after two business days have passed from the date of the Exit Meeting (or five business days from the issuance of the Exit Meeting Summary of Audit Adjustments Notice if an Exit Meeting is not held).

6.1.I. COMPLETED AUDIT

A completed audit is represented by the issuance of the Preliminary Summary of Audit Adjustments Notice. The Preliminary Summary of Audit Adjustments Notice will be issued after the Exit Meeting is held or waived.
### 6.1.J. RETROACTIVE RATE CHANGES

A retroactive change in a nursing facility's rate and reimbursement may be made after completion of an audit in the following situations:

- For those providers that are retrospectively settled.
- For those providers that had an interim rate set prior to completion of the cost report audit.
- For those providers that were retrospectively settled because they were granted Rate Relief.
- For audit adjustments required as a result of a hearing decision.

Refer to the Reimbursement Rate Determination section of this appendix for detailed information regarding retroactive effective periods for rate determination and reimbursement actions.

### 6.1.K. REOPENING AUDIT DETERMINATIONS

MDHHS may elect to reopen an audit determination following completion and closing of the audit of a nursing facility cost report. MDHHS will provide notice to the nursing facility of the audit reopening and the issues for which the audit is under review. Results of the audit reopening will be submitted to the provider, who will be given the opportunity to review the findings and appeal in accordance with Medicaid policy. If it is determined that the audited cost report contains incorrect data, MDHHS will use corrected data to compute future rates. The audit revisions will be effective for reimbursement rate determination and payment for nursing facility services rendered beginning the month following notice to the provider that the subject audit is being reopened.

The results of audit reopening actions will only be effective for retroactive reimbursement revision in cases of fraud or when the provider's failure to disclose required information was pertinent to the determination of allowable cost.

MDHHS will not reopen an audit determination for any reason other than fraud beyond the 21-month period described in the Audit Timeline subsection of this appendix.

### 6.1.L. RECORD RETENTION

Each nursing facility's accounting and related records must be kept for a period of not less than seven years. This obligation does not end if a provider closes or sells a facility. All records, source documents, contractual agreements, and corporate minutes must be available onsite, or at a readily accessible location, for verification and inspection by MDHHS staff or their designees. When accounting personnel, books and records are located out of state, the provider is required to pay auditor travel expenses if MDHHS staff or their designees deem it necessary to access documentation during the course of an audit.
6.2 FINANCIAL FRAUD AND ABUSE

Federal Medicaid law and regulations require the Medicaid program to establish and maintain methods and criteria for the identification, investigation, and referral of potential fraud and abuse. In accordance with federal and state requirements, MDHHS will authorize the suspension of Medicaid payments (in whole or in part) to a nursing facility provider on receipt of reliable evidence that the provider committed fraud or willful misrepresentation while enrolled as a Medicaid provider. The provider will receive written notice of such suspension and may request an administrative review. (Refer to the Appeal Process Section of this appendix for additional information.)

A MDHHS auditor or designee who observes potential fraud or financial abuse will prepare a separate report of observations. Observations of potential fraud or abuse include, but are not limited to, the following:

- Recording of personal expenses
- Overutilization of services to inflate charges
- Unauthorized use of resident trust funds
- Payroll entries of personnel who provide no services
- Concealment of business activities
- Falsifying records
- Charging Medicaid for costs not incurred
- Duplicate billing
- Billing beneficiaries inappropriately for Medicaid services
- Soliciting, offering, or receiving a kickback, bribe, or rebate
- Knowingly failing to disclose required information in the Medicaid cost report

Reports of observations will be reviewed by MDHHS staff and appropriate actions taken. This may include forwarding a copy of the report and supporting documentation to the state Attorney General's Health Care Fraud Division.
SECTION 7 - COST REPORT REIMBURSEMENT SETTLEMENTS

The nursing facility reimbursement rate is determined in accordance with the policy provisions outlined in the Rate Determination Section of this appendix. The reimbursement rate may include routine nursing care services and various rate add-on amounts depending on the Medicaid reimbursement policy effective at the time. The facility rate is a per diem amount. Rate determination may be based on filed cost report data, audited cost report data, cost data submissions and projections for specific reimbursement activity, or interim reimbursement provisions in accordance with Medicaid policies. The reimbursement rate is determined at the beginning of the rate year and the nursing facility is provided notice of the rate determination prior to implementation of the rate. The reimbursement rate may be revised any time during the rate year in accordance with rate determination policies. Rate revisions can result from the following actions as detailed in the Rate Determination Section:

- More recent Fiscal Year filed cost report
- Audited cost report
- Plant Cost Certification
- Nurse Aide Training and Competency Evaluation Program
- Special Dietary Cost Allowance
- Special Reimbursement policy actions

Reimbursement for ancillary services provided to Medicaid-eligible residents will be made in accordance with policies identified in the Coverage portion of this chapter and in the Billing & Reimbursement for Institutional Providers Chapter.

7.1 INTERIM REIMBURSEMENT AND RATE REVISIONS

The Rate Determination Section in this appendix outlines the process for determining the nursing facility's annual reimbursement rate. If RARSS determines that a reimbursement rate must be revised, the rate change may affect payment for future and/or previous dates of service. RARSS will notify the provider of the rate change and the rate's applicable period.

If a rate revision applies to future dates of service, RARSS will send written notice to the provider's designated address specifying the revised rate and the applicable period for the rate.

If a rate revision must be applied to previous dates of service in the current cost report year, RARSS will notify the provider of the applicable period and the reimbursement rate. If the rate revision applies to previous dates of service in the current cost report year, RARSS will make the determination of an underpayment or overpayment amount, and RARSS will notify the provider of the process for implementing the payment adjustment(s).

If the rate revision applies to a prior cost report year's dates of service, the payment adjustment process is addressed in the Initial Settlement Section of this appendix.
7.2 INITIAL SETTLEMENT

The SMA may determine that a retroactive adjustment to the nursing facility reimbursement rate and payments is needed after the end of the provider's rate year. The retroactive adjustment may be due to a previous interim rate revision or to implement a rate based on actual cost report data. After the filing and acceptance of the cost report, the RARSS will determine if an Initial Settlement adjustment is necessary to make a retroactive payment adjustment for the rate period covered by the cost report. The Initial Settlement uses the most recent accepted cost report data to calculate the retroactive reimbursement and paid Medicaid claims and other payment data. (Refer to the Rate Determination Section of this appendix for additional information.)

The RARSS will consider provider requests for Initial Settlements on an exception basis in the following situations:

- The provider anticipates a significant amount due them by Medicaid and requests an Initial Settlement in writing. The provider may make the request with the filing of the cost report.
- A payment adjustment is necessary for several months of the cost report period, and the current date is beyond the cost report period end date.
- The review of a filed cost report identifies that the interim rate add-on amount, plant cost certification amount, or other special reimbursement interim amount included in the interim rate exceeds the amounts filed in the cost report.
- The provider has terminated Medicaid participation and has failed to file an acceptable cost report. An overpayment determination will be made for the payments to the provider during the period that cost report data is required for determining final reimbursement.

If the RARSS determines that the Initial Settlement is an underpayment amount to the nursing facility, additional payment will be made to the provider for not less than 70 percent and not more than 80 percent of the determined settlement amount due the provider based on a review of the provider's financial situation and the effect of the filed cost report data on the reimbursement settlement determination. Although the provider may request a review of the Initial Settlement amount, the Initial Settlement payment level percentage is not subject to appeal.

If RARSS determines there is an overpayment to the nursing facility, the SMA will recover the overpayment amount as outlined in the Medicaid Recovery of Overpayments subsection.

Before making any payment adjustment, the RARSS will notify the provider in advance using a Notice of Program Reimbursement letter. The provider is given 15 calendar days for review of the settlement determination. After the period afforded the provider to review the Notice of Program Reimbursement, a notice stating the payment adjustment date(s) is shared with the provider through File Transfer. A provider may request up to an additional 30 days to review an Initial Settlement. The provider must submit a written request stating the reason and the amount of the additional time needed (up to 30 days) for review. RARSS will review the request and notify the provider in writing of the approval or denial for additional time.

If the settlement action requires correction following the review, a new notification and review period will apply to the corrected settlement. After the period afforded the provider to review the Notice of Program Reimbursement, a notice stating the recovery payment date(s) is shared with the provider through File Transfer.
The RARSS may process a Revised Initial Settlement for the cost report period if it determines that additional payment adjustment is necessary after processing an original Initial Settlement and before completing a final settlement. A Revised Initial Settlement will be completed when there are significantly more approved claims, rate revisions or errors in the prior determination and a final settlement action cannot yet be completed. The notification and payment processing actions identified with the original Initial Settlement procedures also apply to the Revised Initial Settlement process. The payment criteria will be applicable to the aggregate dollar amount of the Initial and Revised Settlements for the reimbursement period.

7.3 FINAL SETTLEMENT

The RARSS may determine that withholding of payment is necessary or that a retroactive adjustment to the nursing facility reimbursement rate and payments is needed after the end of the provider's rate year. A retroactive adjustment may be due to a previous interim rate revision or to implement a rate based on actual cost report data. After a cost report is audited, RARSS will determine if a Final Settlement adjustment is necessary to make a retroactive payment adjustment for the rate period covered by the cost report. The Final Settlement uses the audited cost report data to calculate the retroactive reimbursement and paid Medicaid claims and other payment data. Final Settlements determine if additional payment is due to the nursing facility or Medicaid.

When Medicaid participation is terminated voluntarily or involuntarily, payment for at least one month of services rendered is retained for Final Settlement.

RARSS shares a Notice of Program Reimbursement with the provider through File Transfer. The notice explains the:

- Settlement adjustment(s) and the process prior to RARSS taking the payment action.
- Provider's appeal rights.

The provider is allowed 15 calendar days for review of the settlement determination. After the period afforded the provider to review the Notice of Program Reimbursement, a notice stating the payment adjustment date(s) is shared with the provider through File Transfer.

To obtain an extension, RARSS will review written requests from the provider stating the exceptional reason and the amount of additional time needed for the review (up to 30 calendar days). RARSS will review the exceptional circumstances stated in the request and notify the provider in writing of the approval or denial for additional time. If approved, an extended period of up to an additional 30 calendar days may be granted to the provider for review. After the period afforded the provider to review the Notice of Program Reimbursement, a notice stating the recovery payment date(s) is shared with the provider through File Transfer.

If the settlement action is corrected following a review, a new notification and review period will apply to the revised determination. After the period afforded the provider to review the Notice of Program Reimbursement, a notice stating the payment adjustment date(s) is shared with the provider through File Transfer.
RARSS may process a Revised Final Settlement for the cost report period if RARSS determines that additional adjustments are necessary subsequent to processing the Final Settlement. The adjustment(s) will be processed if significant adjustments or errors exist in the prior settlement calculation. Notification and payment processes outlined in the Final Settlement process also apply to the Revised Final Settlement process.

7.3.A. FINAL SETTLEMENT TIMELINE

MDHHS shall issue a Notice of Program Reimbursement for a final settlement not more than 60 calendar days after the issuance of the Final Summary of Audit Adjustments Notice or no more than 60 calendar days after the Preliminary Summary of Audit Adjustments Notice becomes the Final Summary of Audit Adjustments Notice.

7.4 DEPRECIATION RECAPTURE REIMBURSEMENT ADJUSTMENT

If a provider has been reimbursed for asset depreciation expense in the Plant Cost Component and has sold the nursing facility assets, the sold assets may be subject to a depreciation recapture reimbursement adjustment in the reimbursement settlement for the cost report period in which the nursing facility assets are sold. The depreciation recapture adjustment uses reimbursement rates paid for services between October 1, 1984 and the date the facility was sold, or the date the Plant Cost Component of the per diem rate was converted to the tenure plant cost reimbursement method. (Refer to the Rate Determination Section of this appendix for additional information.)

The depreciation recapture adjustment is only applicable to the reimbursement rate periods the provider was paid a rate that specifically included depreciation expense in the Plant Cost Component of the Medicaid per diem rate. If the provider has never received Plant Cost Component reimbursement that specifically includes depreciation expense as a cost element of the rate calculations, the provider is not subject to the depreciation recapture reimbursement adjustment and is not required to complete the Medicaid Program Depreciation Recapture reporting.

A nursing facility provider that was reimbursed for depreciation in the Plant Cost Component and sells the nursing facility's assets must complete the Medicaid Program Depreciation Recapture reporting schedules for each applicable cost reporting year where depreciation was reimbursed. The Medicaid Program Depreciation Recapture schedule must be submitted with the cost report for the year that the asset sale occurs. Reporting schedules and instructions will be provided to the provider with the final period cost reporting request or may be requested from RARSS. The reporting schedules (Excel file) and completion instructions (Word file) are available in electronic format or hard copy format.

If the Medicaid Program Depreciation Recapture is not applicable, the schedules must indicate N/A (not applicable) and be submitted with the cost report filing. If RARSS does not receive completed reporting schedules, RARSS will apply a 100 percent depreciation expense reduction rate to calculations for each cost report period used to calculate the settlement.

The net depreciation reimbursement adjustment for each cost report year the provider was reimbursed by Medicaid will be included in the settlement calculation. The depreciation adjustment will be limited to the amount Medicaid reimbursed for depreciation expense in each cost report year. Plant cost reimbursement allowances will be included in the calculation of the depreciation adjustment, and may result in reducing the net depreciation adjustment if the provider had not previously qualified for the
incentive allowances prior to the depreciation reduction. The cost report reimbursement settlement notice will include the determination of depreciation recapture reimbursement adjustment.

7.5 MEDICAID RECOVERY OF OVERPAYMENTS [CHANGE MADE 7/1/23]

Overpayment(s) due from a participating provider will first be offset against other settlements, payment adjustments, claims processing or any amounts due to the provider through lump sum or sequential installments until the overpayment amount is satisfied. If the provider is not participating in Medicaid, the overpayment amount must be paid to the State of Michigan for the Medicaid program immediately upon notification.

For recovery of overpayments during a CHOW, the successive owner will be held responsible for Medicaid overpayments, debts, and/or other liabilities regardless of sales agreement language between the successive owner and the preceding owner. Enforcement of sales agreement language is to be between the parties of that contract, and Medicaid will recover from the successive owner. (text added per bulletin MMP 23-12)

7.5.A. REQUEST FOR SETTLEMENT EXTENDED PAYMENT OF SCHEDULE

If a participating provider alleges inability to repay the total overpayment amount in a lump sum or in sequential offset(s), the provider may request consideration for an extended repayment schedule. Extension requests for Settlement repayments must be received by RARSS within 15 calendar days of the Notice of Program Reimbursement date sent to the provider from RARSS. RARSS will notify the provider in writing of the decision. Requests received after 15 calendar days will be considered at the discretion of RARSS.

7.5.B. CRITERIA FOR DETERMINING EXTENDED PAYMENT ARRANGEMENTS

Extended settlement repayment schedules will only be considered if the net dollar amount of the current settlement notice reflects an overpayment amount of more than 10 percent of the provider's normal monthly Medicaid reimbursement payment(s). The provider's request must demonstrate that lump-sum recovery will create extraordinary financial hardship on the provider, and that the cash flow need of the nursing facility prevents the immediate repayment of the overpayment amount. Other factors that must not be present in creating financial hardship to the provider are significant expenditures for unallowable costs, ownership and management compensation exceeding Medicaid allowable cost limits, or significant dollar amounts for unallowable related party business transactions.

RARSS will share the notification of the provider's repayment schedule and the repayment recovery dates and dollar amounts through File Transfer. Requests for longer than three months will only be considered under exceptional circumstances, e.g., the monthly recovery schedule amount would be greater than 50 percent of the provider's normal monthly Medicaid reimbursement payment.
SECTION 8 - ALLOWABLE AND NON-ALLOWABLE COSTS

Unless stated to the contrary in this section, Medicaid allowable costs for nursing facilities are determined in accordance with provisions in the federal Principles of Reimbursement established for the Medicare program. This section does not propose to set reimbursement standards or reimbursement methodology. The focus here is the determination of allowable costs. Reasonable costs associated with nursing facility services included in the provider's per diem rate, as identified in the Coverages portion of this chapter, are allowable costs within the parameters of the Principles.

NOTE: Definitions for the principal terms used in this section may be found in the Definitions Section of this appendix. A copy of the cost report referenced in this section, completion instructions for the report and related information are available on the MDHHS website. (Refer to the Directory Appendix for website information.)

8.1 ADVERTISING

Allowable advertising costs are considered those costs incurred by the nursing facility for an informational objective to inform the public about its services. Costs incurred for a promotional objective to increase patient utilization are not properly related to patient care and are not allowable. Examples of advertising costs incurred for a promotional objective include, but are not limited to, television ads, radio ads, restaurant placemats, billboards, and placing a facility's name on items without contact information. Advertising in the Yellow Pages is an allowable cost, except that Medicaid limits the cost to that associated with a black ink Yellow Pages ad listing not to exceed 2” x 2” in size.

8.2 APPRAISALS

Appraisal expenses incurred by providers may be allowable costs (administrative and general) if the appraisal is of assets related to resident care and if it meets the Medicaid Appraisal Guidelines. Expense for an appraisal of assets not related to resident care is not an allowable expense. Refer to the Appraisal Guidelines Section of this appendix for additional information.

8.3 ATTORNEY AND LEGAL FEES

The provider must maintain documentation and evidence of expenses incurred for legal fees and related costs as being related to the nursing facility's furnishing of patient care in order for such expenses to be allowable costs. Attorney fees are considered allowable costs incurred in the course of providing patient care, except as noted below.

Where MDHHS or the Centers for Medicare & Medicaid Services (CMS) takes action against the provider by initiating an enforcement action or issuing an audit finding, then the legal costs of responding to the action are allowable only in the following circumstances.

8.3.A. AUDIT FINDINGS AND RATE ACTIONS

- The provider prevails and the action is reversed.

Example: The audit finding is not upheld and the audit adjustment or rate action is reversed.
The provider prevails as defined by reduction of the contested audit finding by 50 percent or more.

**Example:** An audit finding for an adjustment of $50,000 is reduced to $25,000.

### 8.3.B. ENFORCEMENT ACTIONS

- The provider prevails and the action is reversed.
  **Example:** A DPNA is rescinded and does not go into effect, or when a provider is not in compliance before the effective date of the DPNA but succeeds in disputing the imposition and the DPNA is rescinded with no interruption in payment for the covered service.

- The period of imposition of a DPNA is reduced by 50 percent or more due to a change in the date that a nursing facility is determined to have been in compliance.
  **Example:** The length of a DPNA is reduced from 20 days to 10 days.

- The provider prevails as defined by reduction of a fine by 50 percent or more.
  **Example:** A Civil Money Penalty fine is reduced from $5,000 to $2,500.

- A federal enforcement action (F tag) is reduced in scope or severity.
  **Example:** An H-level citation reduced to a G-level citation, an F (SQOC)-level citation reduced to an E-level citation, or an Informal Dispute Resolution decision results in a reduction from an E-level citation to a D-level citation. Abatement of an Immediate Jeopardy or correction of a deficiency does not constitute a reduction.

- A state enforcement action is eliminated.

- A settlement agreement is reached between the provider and the state and federal government prior to a Hearing.

### 8.3.C. GENERAL ADMINISTRATION OF THE FACILITY

- Attorney fees incurred in connection with facility acquisition, mortgage or finance transactions are allowable if Medicaid determines the fees reasonable. The fees must be reported under plant cost and capital asset cost reporting. Legal expenses incurred relative to a nursing facility or capital asset acquisition are considered allowable if they are capitalized and amortized over the loan for up to a five-year period.

- Legal fees incurred in the process of securing financing or refinancing of facility loans must be amortized over the life of the mortgage.

- Attorney fees relating to employer activities, labor negotiation, or in response to employment related issues or allegations, to the extent that the engaged services or actions are not prohibited under federal principles of allowable cost.

- Legal and attorney fees associated with a legal settlement negotiated by the provider or court-ordered damages are allowable, provided the fees are not covered by any of the provider’s liability insurance (examples of liability insurance include, but are not limited to, auto liability insurance, general liability insurance, professional liability insurance, etc.). The fees must also meet all other Medicaid and federal allowable cost principles and policies.
8.4 BAD DEBTS, CHARITY AND COURTESY ALLOWANCES

Bad debts, charity, and courtesy allowances, as defined in the Medicare Principles, are deductions from revenue and are not allowable costs.

Bad debts are amounts considered to be uncollectable from accounts and notes receivable that were created or acquired in providing services. Charity allowances are reductions in charges made by the nursing facility provider due to the indigence of a resident. Courtesy allowances indicate a reduction in charges in the form of an allowance to physicians, clergy, members of religious orders, and others as approved by the governing body of the nursing facility, for services received by the provider.

Uncollected revenue for Medicare coinsurance and deductible billing amounts and patient payments for Medicaid eligible residents, and for non-covered services for Medicaid are not allowable costs.

8.5 CIVIL MONEY PENALTIES

Costs incurred for fines or money penalties for violation of federal, state, or local laws are not allowable.

8.6 EDUCATIONAL ACTIVITIES AND IN-SERVICE TRAINING

Medicaid has established credentials/requirements for educational activities to be recognized as allowable costs. Educational activities outside the continental United States are not allowable.

Approved educational activities are formally organized or planned programs of study engaged in by nursing facility providers in order to enhance the quality of resident care in a facility. These activities must be licensed where required by state law. Where licensing is not required, those presenting the educational activity must be recognized as a professional for the particular activity. Examples of allowable educational activities costs are:

- Part-time education for a facility’s employee at properly accredited academic or technical institutions (including other providers) devoted to undergraduate or graduate work to enhance the quality of medical care or the operating efficiency of the nursing facility.
- Costs, including associated travel expense within the continental United States, for employees to participate in educational seminars and workshops to enhance the quality of medical care or the operating efficiency of the nursing facility that does not lead to the ability to practice and begin employment in a nursing or allied health specialty.

The costs of the following in-service training activities are recognized as routine nursing care costs and are allowable costs:

- Orientation and on-the-job-training.
- Mandatory in-service education for Medicaid and Medicare certification.
- Maintenance of a medical library.
- Training of a resident or resident's family in the use of medical appliances.

Costs incurred for activities related to an approved Nurse Aide Training and Competency Evaluation Program (NATCEP) are not allowed under routine nursing care, except as provided in the Medicaid
allowable cost and reimbursement policy outlined in the Cost Classifications and Cost Finding Section of this appendix.

8.7 FACILITY VEHICLES AND TRAVEL

The cost of operating a facility-owned or leased vehicle must be adequately documented and differentiated between resident care use, business use or personal use. Only the costs for resident care and costs related to the conducting of facility business are allowable vehicle and travel costs. Use of a facility vehicle by facility personnel to commute from home to the facility and to return home at the end of the daily work period or other personal travel activity is considered personal use. Cost related to personal use travel activity is not allowable. Vehicle personal use is only allowable if the costs are reported employee compensation and satisfies Internal Revenue Service individual compensation tax reporting requirements.

The minimum documentation that must be retained and be available to auditors for all vehicles is:

- A Mileage log for each vehicle.
  - The log must contain at least the date, total miles for business use, name of driver, origination and destination, and the reason(s) for the vehicle use.
  - The log must report the monthly beginning and ending odometer reading.
- Business mileage and total mileage use of the vehicle to support the dollar allocation for determining allowable cost.
- Charge slips or invoices for fuel, maintenance, and other similar items.

If the reason for a trip is to transport a resident for medical care or treatment, the medical condition necessitating the trip must be documented. If the reason is to attend a seminar, convention, or meeting related to nursing facility operation, invoices must document proof of attendance and mileage logs must be documented to identify the reason for the trip. Vehicle use for general business travel or other activity must include the reason in the mileage log.

Medicaid considers mileage that is not logged as not related to resident care or facility operation. The cost relating to unrecorded or non-supported as business use mileage is not allowable.

Travel by nursing facility personnel via personal vehicle use is an allowable expense if the travel is consistent with the aforementioned purpose criteria. Medicaid will allow such documented mileage at the State of Michigan, Department of Technology, Management & Budget (DTMB), approved private vehicle rate. The mileage rate includes all vehicle costs and is treated as a variable support cost. The approved private vehicle mileage rate information can be accessed on the DTMB website. (Refer to the Directory Appendix for website information.)

8.8 INTEREST

Interest is the cost incurred for the use of borrowed funds. Necessary and proper interest on both current and capital indebtedness is an allowable cost in accordance with Medicare Principles of Reimbursement. The allowance for interest expense is determined using one of the following principles:

- Allowable interest expense is determined in accordance with current Medicare Principles. Medicaid applies the following guidelines, although not fully inclusive, in determining allowable
interest expense. Interest expense must be reduced by all investment income, except where such income is from:

- Gifts, grants, and endowments held separately or pooled with other funds.
- Qualifying deferred compensation and/or self-insurance trust funds.
- Income from a provider's qualified pension fund.

- The rate of interest on a loan must not be in excess of what a prudent borrower would have had to pay in the marketplace at the time the loan was made.

- Interest expense, to be allowable, must be paid to a lender not related through control, ownership, or personal relationship to the borrowing organization. Interest paid by the provider to partners, stockholders, or related organizations of the provider is, therefore, not allowable.

**Exception:** A nursing facility operated by a religious order is allowed to borrow funds from the order and claim necessary interest expense for those funds.

- Interest on loans in excess of asset value acquisitions (after July 1970) is not an allowable cost. In a situation where the purchase price exceeds the historical cost or the cost basis, the interest expense on that portion of the loan used to finance the excess is not allowable.

- Interest expense applicable to borrowings principle balance for a nursing facility acquisition must be separately identified and reported from interest expense applicable to working capital or miscellaneous capital asset acquisitions (assets that are not part of or related to a facility acquisition). See Cost Finding and Cost Classifications for borrowing principle balance descriptions.

- Working capital borrowings are considered funds borrowed for 12 months or less to meet current normal operating expenses. For lines of credit, the borrowing shall be compliant with the 12 month requirement if the provider repays the entire amount withdrawn within 12 months of the date of the first draw. If the entire amount of the working capital borrowing is not repaid within 12 months, then all the interest expense associated with the borrowing is unallowable.

- The loan must meet allowable cost principles. The rules on working capital borrowings do not apply to loans on capitalized assets. Interest on current indebtedness meeting the 12 month requirement and other program working capital criteria is allowable, whereas interest expense for long-term working capital indebtedness is not considered allowable.

- The nursing facility must document the need and due date for the working capital loan. The need must be to meet normal operating expenses and must be supported by an application of funds analysis demonstrating the use of loan proceeds for nursing facility expenses.

- For the application of funds analysis, the provider must show that current cash receipts are not sufficient to meet the accounts payable, payroll, and other financial obligations. The provider must also demonstrate that the loan proceeds went directly into the appropriate cash account. The provider must document when each withdrawal was used, how each withdrawal was used, and how the funds are being applied to a purpose related to patient care. If the Home Office is the recipient of funds and intends to transfer funds to a provider under the Home Office, the provider must demonstrate the financial need for the funds, how the money was used, and how the use is related to patient care.
The loan must include/require repayment of the principal balance within a prescribed period, including regular scheduled repayment amounts applying to the principal borrowings amount. The provider may repay the principal balance of the loan on a monthly, quarterly, or annual basis. If the provider repays the entire principal balance before the expiration of the loan term, the interest expense on that loan is considered allowable. If the provider has a line of credit, the provider must repay the entire amount withdrawn within 12 months of the date of the first draw for the interest expense to be considered allowable.

- Interest income is applied first as a reduction to mortgage related borrowing allowable interest expense, and then to other borrowings allowable interest expense.

- Interest expense is distinguished from penalty or finance late fees by the existence of a lender and borrower relationship pertaining to the financed amount. Penalty and finance fee assessments relating to late payment of liabilities are not considered borrowing costs and are not allowable.

- Interest expense includes the cost of finance charges associated with borrowed funds. If the interest expense on borrowed funds is allowable or unallowable, this would include any applicable finance charges. Finance charges include, but are not limited to, expenses related to the maintenance of records, account maintenance fees, related transaction fees, administration, etc.

- For loans issued on or after November 1, 2019, interest on loans, to be allowable, must reflect a principal balance payment on at least an annual basis if the loan is greater than four years old. For loans issued prior to November 1, 2019, interest on loans, to be allowable, must reflect a principal balance payment on at least an annual basis starting on November 1, 2023. Refinancing of a loan or refinancing of multiple loans is not considered a principal balance payment, nor is a refinanced loan considered a new loan for purposes of this section.

### 8.8.A. INTEREST CLASS I AND CLASS II NURSING FACILITIES

For the Class I and Class II facility, interest on borrowed funds related to the facility acquisition allowable interest expense is determined in accordance with the Principles in effect on July 17, 1984, prior to the changes associated with the mandates of the DEFRA of 1984 and its limitations on the revaluation of assets.

- The dollar amount of facility acquisition financing is limited to the lesser of:
  - the purchase price of the nursing facility,
  - the current reproduction cost adjusted for straight-line depreciation over the life of the asset to the time of purchase, or
  - fair market value at the time of purchase; minus the purchase down payment.

- Interest expense on the dollar amount of a facility acquisition loan principle in excess of the financing limit is not allowable.

- Depreciated replacement cost is defined as the current reproduction cost adjusted for straight-line depreciation over the life of the asset.

- Depreciated replacement cost must be determined by an independent appraiser, chosen and paid for by the nursing facility provider, in accordance with the "Appraisal Guidelines" in the Principles.
Note: For Class I and Class II facilities that choose to forego increased reimbursement for interest expense, they must adopt the prior owner's financing and acquisition costs, interest expense schedule of borrowings, principal amortization, and interest expense recognized for reimbursement by the Medicaid program prior to the sale. Annual cost reporting must continue to be based on the prior owners.

8.9 LEASE COSTS

The Medicaid allowable cost provisions for asset lease transactions depend on the type of asset. Generally, asset lease transactions require that the lease expense be removed from cost and replaced by the underlying ownership cost of the property owner. Lease or long-term rental agreement (more than twelve months duration) transactions must be reported in the Medicaid cost report Statement of Leased Capital Assets. Cost reporting disclosure of lease costs is required to properly classify ownership costs for determining Medicaid reimbursement. There are also specific asset lease transactions that must be reported in the cost report statement but are an exception to the underlying ownership disclosure requirement. Specific types of lease expenses are discussed in the following sections.

Maintenance costs for leased capital assets, other than lease situations qualifying under "pass-through lease" criteria, are classified as variable costs. The nursing facility must determine and report these costs in the appropriate cost center or department. This requirement may necessitate the breakout of the maintenance costs for the lease contract.

Lease costs are differentiated from incidental or non-recurring rental expenses incurred to address a limited need of the facility. Rental expense incurred for incidental or limited time rental items, or non-recurring rental transactions, are allowable operating costs in the applicable cost center or department requiring the rental action. Limited time rental is considered as not longer than twelve months, non-recurring, and prohibits several/numerous sequential transactions for the same or similar rental items.

Exception: An extended period up to 24 months may be approved by RARSS in instances related to construction or renovation. The provider must submit an extension request to RARSS in writing at least 45 calendar days prior to the effective date of the extension. The request requires disclosure of item, duration, and action that precipitated the need to extend the project. RARSS will respond in writing.

8.9.A. FACILITY LEASE

Cost reporting and reimbursement for capital assets relating to the nursing facility premises are under the same methods whether the items are owned or leased. For items to be considered allowable costs, the acquisition dates and asset costs, interest expense and other applicable ownership costs must be reported. Allowable lease costs are determined using one of the following principles:

- A nursing facility provider that entered into an acceptable, arm's-length lease prior to September 1, 1973, where the lessor has refused to open its books, is allowed an actual lease cost up to a maximum of $2.50 per resident day. This limit was developed from the average lease/rental costs for facilities leased prior to September 1, 1973, at which time the current method of calculation was effected. The pre-September 1, 1973, lessee has the right of appeal of an acceptable, arm's-length lease agreement for costs that exceed the $2.50 limit.
A nursing facility provider that entered into, or amended, an acceptable, arm's-length lease agreement on or after September 1, 1973, is allowed a plant cost component determined in accordance with the Rate Determination section of this appendix, as applicable to an owner-provider, if the lessee discloses the allowable cost information required for rate setting. Leased assets are treated as though the lessor and the lessee are one and the same. Without full disclosure, lease expenses are not an allowable cost.

Interest expense allowed in the case of the lessor is also limited by Medicare Principles of Reimbursement. Further, interest income of the provider (lessee) is offset against all interest expense, including interest expense allowed on rental properties.

8.9.B. PLANT COST LEASE OTHER THAN FACILITY SPACE

Lease expense for nursing facility equipment or other activity that does not qualify for pass through lease expense is not allowable and must be reported utilizing the ownership underlying cost reporting requirement. If a lease is a virtual purchase and the lessee becomes the property owner at the termination of the lease, or for a nominal buyout amount, ownership cost reporting must be applied. The definition criteria of a virtual purchase are addressed in the federal Principles of Reimbursement.

Office space costs incurred in a home office or related party administrative service transaction are allowable under application of allowable depreciation, interest and property tax underlying ownership cost principles. Reasonable and necessary lease expenses incurred by a home office or related party for administrative services office space are allowable. Ownership underlying cost reporting is not required for leased business office space or similar leased space except in rental transactions involving a related party landlord. Related party transactions for office space are limited to ownership underlying costs applicable to allowable depreciation cost principles. The cost of office space is included in the cost of the home office or related party administrative services space cost and must be reported in accordance with Medicaid policy identified in the Cost Classification and Cost Finding Section of this appendix.

8.9.C. PLANT COST PASS THROUGH LEASES

A select group of rental and lease situations are exceptions to the requirement for disclosure of the underlying ownership costs. The lease or rental cost of qualifying items is allowed as plant cost in the lease rental cost classification to the extent that the asset use and cost is related to patient care. The pass through lease allowance applies to the following:

- Vehicle lease to a maximum of $425/month or $5,100/year, per vehicle
- Photocopiers
- Postage meters
- Telecommunications systems (including fax machines)
- Desktop or notebook computers and printers
- Parking lots and off-site record storage for rental from an unrelated party ownership and arm's length transaction
8.10 LIFE INSURANCE PREMIUMS

Life insurance premiums are allowable when the premium is a fringe benefit for the insured employee when the beneficiary of the employee’s insurance is not the provider. The cost of life insurance premiums for insurance on the lives of officers and employees, including provider-based physicians, is an allowable cost only within the provisions of Medicare Principles of Reimbursement.

8.11 LIQUIDATION OF SHORT-TERM LIABILITIES

A short-term liability must be liquidated within one year after the end of the cost reporting period in which the liability is incurred. The liquidation of liabilities requirement for Medicaid applies the federal Principles of Reimbursement for the determination of allowable costs. In instances where a nursing facility provider does not liquidate a short-term liability within the period specified in the federal requirements, the costs for the related goods and services are not allowed in the cost reporting period in which the liability was incurred, but are allowable in the cost report period when the liability is paid.

Exception to the one-year time limit to liquidate a short-term liability will be considered in accordance with the federal Principles of Reimbursement. A provider may request an extension for good cause to liquidate short-term liability. The provider must submit a written request at the time of submission of the Medicaid cost report to RARSS identifying the liability amount(s) and an explanation for the nonpayment of the liabilities and expected payments to liquidate the liability. RARSS will review the request and notify the Provider of the approval of an extension, not to exceed three years after the end of the cost report period that the request is filed, or of the denial of the request.

8.12 LOBBYING AND POLITICAL ACTIVITY COSTS

A provider’s costs incurred to support or oppose decisions of the federal Congress or state Legislature, costs related to campaigns for particular candidates or issues, and contributions to political action committees involving partisan elections are not allowable. Costs incurred, whether directly or indirectly through organization membership dues, fees or assessments, for these activities or to influence legislation are not allowable. Contacts with federal or state agencies in the course of business operations of the nursing facility and general comment on proposed policies are not considered lobbying activity.

8.13 MAINTENANCE OF EFFORT CONTRIBUTIONS BY COUNTY GOVERNMENT

In accordance with Public Act 408 of 1984, as amended, county governments that own and operate a nursing facility are responsible for maintenance of effort funding levels for the operation of that facility. The county government contributions to the nursing facility operations specifically due to the provisions of the Act, as amended, are not allowable costs of the county medical care facility Medicaid cost reporting.

8.14 MEDICAL SUPPLIES, DURABLE MEDICAL EQUIPMENT (DME), ORTHOTICS, AND PROSTHETICS

The cost of medical supplies or DME are generally considered an allowable cost. However, the following items are not allowable and must be billed by the medical supplier:

- Air-fluidized beds
- Bariatric beds
- Bilevel positive airway pressure (BiPAP) device
- Custom-fabricated seating systems may be covered outside of the nursing facility per diem rate when a standard item will not meet the medical and functional needs of the user and standards of coverage are met.
- Negative pressure wound therapy pump and accessories (wound VAC)
- Orthotics and Prosthetics
- Parenteral nutrition, including all supplies, equipment, and solutions
- Powered air flotation bed (low air loss therapy)
- Selected surgical dressings
- Shoes and additional components

The Nursing Facility Coverages chapter further describes the services included in the Medicaid per diem rate.

8.15 MEMBERSHIP FEES

Reasonable costs of memberships in professional, technical, or business-related organizations are allowable if the organization's mission or objectives are primarily related to resident care and/or long term care services activities. Costs of memberships in civic organizations for the purpose of implementing civic objectives are also allowable for Medicaid purposes (e.g., Chamber of Commerce). Any portion of membership fees used for lobbying, supporting political candidates and campaigning, or in social, fraternal, and other such organizations are not allowable. Awareness of an organization's ongoing lobbying and political activities requires identification of the portion of the organization's fees, dues, assessments or other allocations of costs to members or associated nursing facility providers. If an amount of non-allowable cost is not identified relating to this purpose, all costs associated with the fees or dues are non-allowable, unless the provider can document the appropriate unallowable portion.

8.16 MEDICAL DIRECTOR/PHYSICIAN SERVICES

The nursing facility must have a designated medical director that maintains responsibility for the implementation of resident care policies, for coordinating medical care, and is directly accountable to nursing facility management. The cost(s) applicable to the provision of the duties and responsibilities of the medical director is allowable routine nursing care. The nursing facility must maintain adequate records to document the level and type of services rendered by the medical director as a facility employee, or under a service contract or some other designated capacity. The cost(s) relating to the medical director duties and responsibilities must be distinguished from physician services activities that are not allowable routine nursing care. Refer to the Practitioner Chapter for discussion regarding physician services.

8.17 NON-PAID WORKERS/VOLUNTEERS

The value of services of non-paid workers is an allowable cost. The services must be performed on a regular, scheduled basis. The services must be of the type customarily performed by full-time employees and necessary to enable the nursing facility provider to carry out the functions of normal resident care and the operation of the facility. The value of services of a type for which providers generally do not remunerate individuals performing such services is not an allowable cost.
Example: Donated services of individuals in distributing books and magazines to residents, administering a provider canteen or cafeteria or a provider gift shop are not allowable/reimbursable.

8.18 Owner and Administrator Compensation

The cost for compensation to nursing facility owners is determined in accordance with Medicare Principles of Reimbursement, except the compensation to administrators, owner/administrators, or owners who function as administrators or assistant administrators, and corporate office executive management compensation is subject to specific dollar amount cost limits. Allowable cost limits are applied to nursing facilities based upon the bed size of the facility. Allowable cost limits are applied to individuals based upon the aggregate number of beds in nursing facilities being served or within the corporate organization. Compensation is remuneration to the individual for job performance and includes the costs of salary and wages, fringe benefits, director fees, and costs of services or items provided to the individual.

The compensation limit schedule is available on the MDHHS website. MDHHS annually adjusts the Owner/Administrator Compensation Limits to include cost-of-living changes as reflected by the United States Department of Labor Consumer Price Index for the metropolitan Detroit area. (Refer to the Directory Appendix for the website address.) Owner/Administrator Compensation Limits are expressed as facility annual compensation amounts and must be pro-rated on a monthly basis in situations where the cost reporting period is not 12 months.

8.18.A. Compensation Limit for Individual Nursing Facility

The allowable cost limit for compensation to nursing facility administrators, owner/administrators, or owners who function as administrators or assistant administrators is determined according to the following criteria.

- Facility bed size includes licensed beds for nursing home, home for the aged and hospital services beds. Other categories of resident beds or housing arrangement beds are not included in determining the facility bed size for determining the appropriate compensation limit.
- The owner/administrator compensation limit used must coincide with the number of beds available for occupancy. The measurement criteria for determining the facility bed size is the number of beds available for resident or patient care at the beginning of the cost reporting period.
- Each nursing facility having 50 licensed beds or more must have a full-time licensed facility administrator. As required under State law, this individual is expected to be in the facility directing, conducting, or participating in activities directly related to the nursing facility during the normal 40-hour business week. A current position description that adequately defines the duties and responsibilities for the administrator position must be retained at the facility.
- The total compensation amount claimed for allowable costs for the facility administrator and related positions must not exceed amounts established by the SMA. These amounts are established by facility bed size: 1-49 beds, 50-99 beds, 100-149 beds and 150 beds or more.
The owner/administrator compensation limits apply to the costs for the positions of administrator, assistant administrator, and/or other administrative employees performing functions or having work responsibilities normally considered nursing facility administrator work activity. If an individual is functioning in a position that requires a nursing facility administrator's license, that person's compensation must be subjected to the limit. However, if a person does not have a license, but is performing the job functions and work activity of an administrator, that individual's compensation must also be included in the amount subjected to the limit. Inclusion of an individual's compensation in the total amount subjected to the limit is not only based on the individual having a license, it is also based on the job functions and work activity. Compensation paid by a related party or central office and charged directly to the nursing facility for individuals performing these activities must be included in the individual nursing facility compensation amount subject to the limit.

The compensation limit schedule does not apply to the salary of owners employed in capacities other than administration of the nursing facility provider's operation. The allowable salary level of an owner employed in a non-administration position cannot exceed the market value salary for that position, e.g., director of nursing, social services director. The allowable salary level must be commensurate with the amount of time the owner spends working in the non-administration position. If the owner also participates in facility administration, the portion of the payroll costs attributed to the administrative work must be included in the owner/administrator salary compensation and subject to the appropriate salary limits. The individual's administrative work must be appropriately documented with a position description and job responsibilities, and the allowable salary level for the administrative work must not exceed salary levels for similar administrative positions.

8.18.B. COMPENSATION LIMIT FOR OWNER AND/OR ADMINISTRATOR SERVING MULTIPLE NURSING FACILITIES

Where an individual is involved in the administration of more than one nursing facility, the maximum compensation allowed for allocation per facility and the allowable facility compensation is computed as follows:

- Total the number of beds, as defined in the individual nursing facility section, in all facilities served by the owner and/or administrator.
- Determine the appropriate compensation limit from the published schedule for the total number of beds.
- Compare the appropriate compensation limit with the actual allowable total salary and fringe benefits paid to the individual. The compensation limit is expressed as an annual amount (12-month period) and applicable to a full time position defined as a minimum of 40 hours per week committed to nursing home related management and administrative activity. Adequate work activity records must be available for verification of time expended for nursing facility related activity. Time commitment for less than full time requires the compensation limit be prorated to reflect the portion of time committed to this activity. Example, if 30 hours per week during an annual period is attributed to this activity, the adjusted limit for the individual is 75 percent of the appropriate compensation limit.
The lesser of total allowable compensation or the compensation limit per the schedule is then allocated to all the facilities served by the owner and/or administrator based on a ratio of the number of beds in the individual facility to the total number of beds in all facilities served. The hours directly devoted to individual homes may be used as the allocation basis if verified by auditable records.

Combine the allocated owner and/or administrator compensation with the allowable compensation of the facility's administrator/assistant administrator/co-administrator.

Compare the combined compensation amount to the compensation limit schedule maximum allowable for the number of beds for that particular sized facility. The lesser of the facility's combined compensation or the facility's compensation limit is the allowable compensation to be used in the determination of allowable cost related to resident care.

The following illustrates an example of the allowable owner/administration compensation limit application for a group of four facilities of varying sizes with a total of 400 beds, and the allowable facility compensation. The owner and/or administrator total compensation is $250,000 for full time nursing facility related activity for a cost reporting period ending December 31, 2017. The compensation is $31,354 greater than the limit ($250,000 minus $218,646 equals $31,354).

| Total number of beds in all facilities served | 400 |
| Compensation Cost Limit for 150+ bed facility as of 12/31/2017 | $218,646 |
| Owner and/or Administrator Total Compensation | $250,000 |
| Amount allowed for allocation to individual facilities (lesser of bed size limit or actual compensation) | $218,646 |
| Amount of compensation not allowed | $31,354 |

¹ The percentage of the facility's beds of the total across all four facilities is multiplied by the compensation limit, e.g., 40/400 x $218,646.

² Total compensation equals the sum of the allocation amount and the individual nursing facility administrator compensation.

#### 8.18.C. COMPENSATION LIMITATION FOR HOME OFFICE EXECUTIVE/MANAGEMENT

Salary and wages, fringe benefits and other related compensation costs for home office executive and management staff are included in the provider's home office cost report, and costs are allocated to the individual nursing homes and other business activities conducted by the organization. The allocation of the compensation costs is made to the operating entities of the corporation through the home office cost statement, and these costs are not included in the limit imposed on the individual nursing facility owner/administrator compensation.

The compensation limit for high-level management employees at the corporate home office level is enhanced to acknowledge increased scope of the business activity and corporate responsibility. The enhanced compensation limit is applicable in chain organization or related party management services situations where home office cost statement reporting exists, and full management oversight and administrative services are being provided to the nursing facilities and other business activities of the organization. Compensation costs for corporate office individuals under the enhanced compensation limit must be documented by a current position description, employment contract or other verifiable documentation that adequately defines the position, duties and responsibilities for the individual, and demonstrates the presence of services provided to the organization. Compensation to an individual employee of the corporate or central office, regardless of employment position or job activity function, is subject to the enhanced compensation limit to determine allowable cost. The enhanced
compensation limit is expressed as an annual amount (12-month period) and is applicable to a full time position.

Employees paid by the corporate or central office but charged directly to the individual nursing facility for administrator or assistant administrator work functions at that facility are not eligible for the enhanced compensation limit. Allowable cost limits for such employees are addressed under individual nursing facility compensation limit.

The enhanced Medicaid allowable compensation for individual corporate office official and executive management employee personnel is applicable only to organizations greater than 150 beds. The enhanced compensation limit is based on the total number of beds owned and operated by and under full management control of the corporate organization and determined in accordance with the following schedule:

<table>
<thead>
<tr>
<th>Number of Beds in the Chain Organization</th>
<th>Enhanced Compensation Limit</th>
</tr>
</thead>
<tbody>
<tr>
<td>151 to 500 beds</td>
<td>100% of the 150+ bed facility limit</td>
</tr>
<tr>
<td>501 to 1,000 beds</td>
<td>120% of the 150+ bed facility limit</td>
</tr>
<tr>
<td>1,001 to 2,000 beds</td>
<td>130% of the 150+ bed facility limit</td>
</tr>
<tr>
<td>Over 2,000 beds</td>
<td>150% of the 150+ bed facility limit</td>
</tr>
</tbody>
</table>

The total number of beds includes all types of nursing home, home for the aged, hospital services, resident and other housing arrangement beds. If the business activity for the beds is not included in the allocation of the home office costs, the beds must not be counted for determining the number of beds in the chain organization. The 150+ bed facility limit used to determine the enhanced compensation limit amount is the MDHHS published limit for the year end corresponding to the reporting period end date of the home office cost statement.

8.19 Oxygen

Medicaid coverage of oxygen services for residents in nursing facilities is addressed in the Medicaid Services Descriptions Section of the Coverages portion of this chapter. The costs of oxygen gas, equipment, and supplies for intermittent and infrequent use are allowable in the routine nursing care cost and are included in the per diem reimbursement rate. Oxygen equipment rental costs for a limited period for purposes of providing this service are allowable in accordance with the incidental rental cost provisions addressed in the Lease Cost subsection of this appendix.

The costs of oxygen related services for frequent or prolonged use on a daily basis (i.e., at least 8 hours per day), regardless of payer source, is an ancillary services cost and is not an allowable routine nursing care cost. For residents requiring frequent and prolonged oxygen use who are in a nursing facility, the oxygen gas, equipment, and supplies must be billed by an enrolled medical supplier, not the nursing facility. For residents requiring frequent and prolonged oxygen use in a County Medical Care Facility or a Hospital Long Term Care Unit, the oxygen gas, equipment, and supplies must be billed by the nursing facility, not the medical supplier. These costs must be separately identified in the facility's accounting records or adequately compiled and verifiable for audit and excluded from Medicaid cost report routine nursing care unit cost.
8.20 PATIENT TRANSPORTATION

The Transportation Section of the Coverages portion of this chapter addresses the nursing facility's responsibility to arrange or provide for non-emergency patient transportation. The cost for this transportation is a routine nursing care cost included in the nursing facility's annual cost report, and any reimbursement for the services is included in the routine nursing care per diem rate. Patient transportation costs are classified as support costs for Medicaid cost reporting.

The nursing facility must select the most efficient and cost effective mode of transportation for resident care which may include utilizing a facility owned vehicle or contracted outside service. Whenever possible, a facility-owned vehicle should be used. Costs relating to the nursing facility vehicle operation are addressed under the Facility Vehicles and Capital Asset Cost subsections of this appendix.

Costs incurred for contracted outside service for patient transportation must be included in the Medicaid cost reporting under the following reporting procedures:

- Administration and General Transportation – when the expense is not directly identified for specific residents or the care unit in which the resident resides in the facility; or
- Routine Nursing Care, Miscellaneous Support Cost
  - when there is only one routine nursing care unit in the facility and all resident transportation is for residents in that unit, or
  - when there are multiple nursing or residential care units in the facility, and the expense is directly identified by individual resident and location unit where the individual resides in the facility. Costs must be allocated to the corresponding nursing unit cost center identified in the Medicaid cost report.

8.20.A. NON-EMERGENCY AMBULANCE

When a physician issues a written order for non-emergency ambulance transportation, usually due to the need for a stretcher or other emergency equipment, the ambulance provider may bill Medicaid directly and must maintain the physician's order as documentation of medical necessity. If non-emergency ambulance transport is not ordered by the beneficiary's physician, arrangements for payment must be between the facility and the ambulance provider and cannot be charged to the beneficiary, beneficiary's family, or used to offset the patient-pay amount. The cost of non-emergency ambulance transports not ordered by the beneficiary's physician must be identified and removed on Worksheet 1-B by the nursing facility.

8.21 PERSONAL COMFORT ITEMS

The costs of services and items that do not contribute primarily to the resident's treatment of an illness or the resident's ability to function are not allowable. Direct costs, and the appropriate share of indirect costs, relating to such items as telephones, televisions and/or radios that are located in the patient's accommodations and furnished solely for the personal comfort of the resident, are not allowable. The cost of television and radio services furnished to residents generally is allowable if furnished in common use areas of the facility such as day rooms, recreation rooms or similar purpose area of the facility for the common benefit of facility residents. The cost of nurse-patient communications system that has no capability other than nurse and patient communication is allowable.
The costs of systems, including nurse-patient communications, television and telephone services, and similar items, may have the capability of providing residents with outside entertainment and providing nurse-patient communications. Only the cost of the component for nurse-patient communication is allowable routine nursing care. Direct distinction of cost related to the nurse-patient communication must be made for proper cost reporting, or an appropriate allocation must be established for Medicaid approval for the purpose of identifying the patient related and personal comfort related cost portions of combined systems.

8.22 PRIVATE DUTY NURSES

Costs for nursing staff services provided by or under the supervision of a registered professional nurse are allowable; however, the costs of services of a private-duty nurse or other private-duty attendant are not allowable routine nursing care. Private-duty nurses or private-duty attendants are registered professional nurses, licensed practical nurses, or any other trained attendant whose services ordinarily are rendered to, and restricted to, a particular patient under arrangement between the patient and the private-duty nurse or attendant.

A patient, or someone acting on their behalf, may arrange and pay for a private-duty nurse, or the nursing facility that initially incurs the requested costs may look to the patient for payment of the non-covered nursing facility service. Where the nursing facility acts on behalf of the resident, the services of the private-duty nurse or other attendant(s) under this arrangement are not allowable routine nursing care services regardless of the payment process to the private duty or other personnel or the control which the nursing facility may exercise with respect to the services rendered by the private-duty nurse or attendant.

8.23 PROVIDER Donations FOR OutSTATIONED State Staff

For cost reporting periods beginning prior to April 1, 2019, provider donations and administrative costs and incidental costs (workspace and telephone), incurred by the provider for outstationed staff are allowable costs. Costs are allowable to the amount contractually determined with the State.

For cost reporting periods beginning on or after April 1, 2019, provider donations for outstationed state staff and any associated costs paid to the State of Michigan for outstationed state staff are non-allowable costs. These costs must be reported on the provider’s cost report and then adjusted from the cost report to be excluded from the rate setting process. A provider that utilizes an outstationed state worker(s) must submit a copy of their contract(s) for the use of that worker with their cost report.

8.24 PURCHASE Discounts

All discounts, allowances, and refunds of expenses are reductions in the cost of goods or services purchased and are not income. When they are received in the same accounting period in which the purchases were made or expenses were incurred, they will reduce the purchases or expenses of that period. However, when they are received in a later accounting period, they will reduce the comparable purchases or expenses in the period in which they are received.

Purchase discounts have been classified as cash, trade, or quantity. Cash discounts are reductions granted for the settlement of debts before they are due. Trade discounts are reductions from list prices granted to a class of customers before consideration of credit terms. Quantity discounts are reductions
from list prices granted because of the size of individual or aggregate purchase transactions. Whatever the classification of purchase discounts, like treatment in reducing allowable costs is required.

As with discounts, allowances and rebates received from purchases of goods or services and refunds of previous expense payments are clearly reductions in costs and must be reflected in the determination of allowable costs. In addition, late charges on purchases are not an allowable expense. These would be in addition to regular costs authorized.

8.25 Rebates Larger Than One Year’s Expense and Extraordinary Expense

Normal refund or rebate amounts are reported as a reduction offset to current operating costs in accordance with federal Principles of Reimbursement. A refund or rebate amount of previous years’ allowable expenses must not be reported in total in the current fiscal year-end cost report where the refund or rebate amount pertains to more than one prior year reported expense. Likewise, extraordinary expense pertaining to more than one prior year must not be reported in total in the current fiscal year-end cost report. Refund or rebate and the extraordinary expense amounts pertaining to more than one prior year must be equally spread over as many subsequent years as the number of years represented by the refund or rebate or the extraordinary expense amount not to exceed three years. In the instance of a sale, the selling provider must include 100 percent of the remaining rebate balance in the final cost report. The apportionment will start in the cost-reporting year in which the refund amount is received or the extraordinary expense is discovered. These provisions are limited to Medicaid cost reporting requirements and do not change the applicable accounting principles for financial reporting.

8.26 Research Activities

The cost of research activities is allowable in accordance with Medicare Principles. If research is conducted in conjunction with, and as a part of, the care of residents, the costs of usual resident care are allowable to the extent that such costs are not met by funds provided for the research.

8.27 Routine Nursing Services

A provider’s costs associated with the provision of necessary medical, nursing and mental health services, within the provisions of Medicare Principles of Reimbursement and requirements specified in the Coverages portion of this chapter, are allowable expenses. This includes costs incurred for meeting state federal requirements associated with specialized mental health rehabilitation services, e.g., monitoring the necessity for Annual Resident Reviews and coordinating or providing required services. The medical supply costs associated with routine nursing services and reimbursed by Medicare Part B are not allowable routine costs for Medicaid if the provider is reimbursed by Medicare.

8.28 Sick Leave

The reasonable cost of sick leave taken (or payment in lieu of sick leave taken) by an employee is recognized as a fringe benefit and is included in allowable costs in the cost reporting period when paid. If the sick leave is vested and refunded, contributions to the fund are allowed under applicable provisions of the Medicare Principles. However, where the nursing facility provider’s sick pay plan grants employees the right to demand cash payment for unused sick leave at the end of each year, the pertinent accruals are includable, without funding, in the cost reporting period when earned.
8.29 **TAXES AND FEES**

Taxes, including employee payroll taxes, sales taxes, and state imposed sales and use taxes, are allowable variable costs. The Michigan Business Tax and the Michigan Corporate Income Tax are allowable variable support costs.

8.29.A. **GENERAL TAXES**

Real and personal property taxes are allowable plant costs.

8.29.B. **QUALITY ASSURANCE ASSESSMENT PROGRAM (QAAP) TAX**

A nursing facility's QAAP tax, including the Quality Measure Initiative (QMI) share of the tax, is an allowable cost and must be reported in the nursing facility Medicaid annual cost report. The tax must be reported on the provider's cost report as assessed and accounted for on the accrual basis. The QAAP tax cost is adjusted through the cost reporting process to be segregated from use in rate setting. The QMI share of the QAAP tax must be reported on a separate account on the provider’s cost report than the rest of the QAAP tax.

8.29.C. **FEES AND ASSESSMENTS**

Costs incurred for late payments, or for violation of federal, state, or local laws, are not allowable.

8.29.D. **PENALTY TAXES UNDER THE PATIENT PROTECTION AND AFFORDABLE CARE ACT**

Penalty taxes that may be assessed on employers under the employer-shared responsibility provisions in the Patient Protection and Affordable Care Act (PPACA) are not allowable costs used to calculate the Medicaid room and board rate. As such, the facility must remove these penalty taxes from allowable costs via a Worksheet 1-B adjustment.

8.30 **THERAPY AND PATHOLOGY SERVICES**

A nursing facility provider must establish accounting procedures to reflect individual cost centers for reimbursable ancillary services, including physical therapy, occupational therapy, speech pathology and other services not classified as routine nursing care. Whether the therapist/pathologist is salaried, under contract, or an independent provider, a nursing facility provider must record Medicaid program payments as income and all expenditures for therapist/pathologist supportive personnel, equipment and its maintenance, supplies, and other costs directly attributable to rendering services in these cost centers.

The service is considered ancillary if the complexity of the service prescribed for the resident is such that it can be performed safely and/or effectively only under the general supervision of skilled rehabilitation personnel. Ancillary therapy services are evidenced by the presence of the following conditions:

- A written physician order.
- The skills of qualified technical or professional health personnel, such as physical therapists, occupational therapists, speech pathologists or audiologists, are required.
- Services are provided directly by, or under the general supervision of, the skilled personnel to assure the safety of the patient and to achieve medically desired results. General supervision requires that initial direction and periodic inspection of the actual activity is necessary.

- Services are rendered as part of an active treatment for a specific condition that has resulted in a loss or restriction of mobility or function.

Therapy services considered routine nursing care are services rendered under circumstances where the general supervision of exercises, which have been taught to the patient, can be performed repetitively without skilled rehabilitation personnel. This includes maintenance programs where the performances of repetitive exercises, which may be required to maintain functions, do not require the involvement and services of skilled rehabilitation personnel, but may require the assistance of a trained nurse aide. Routine nursing care may include repetitive exercises to improve gait, maintain strength or endurance, passive exercises to maintain range of motion in paralyzed extremities, and assistive walking.

The cost of the development of the maintenance plan when prepared by a licensed therapist is allowable. A provider must maintain documentation, which includes the amount of time required by the therapist to develop the maintenance plan. Medicaid considers maintenance plan development as routine nursing care included in the per diem rate.

The cost of the MDS assessment is allowable. A provider must maintain documentation, which includes the amount of time required by the therapist to complete the MDS assessment. Medicaid considers the MDS assessment as routine nursing care included in the per diem rate.

Depreciation for equipment and facility space assigned to these services must be included as an expense in the ancillary cost centers and computed in accordance with Medicaid guidelines for allowable depreciation. A uniform charge structure must be applied to the entire facility population receiving the services.
**SECTION 9 - COST CLASSIFICATIONS AND COST FINDING**

Medicaid-enrolled providers must develop and adopt a uniform Chart of Accounts that meets the minimum requirements established by Medicaid for classifying and reporting costs incurred in providing care to nursing facility residents. A nursing facility’s accounting system will normally include more detailed accounts for recording facility costs. However, for cost reporting purposes, the detailed accounts are compiled into aggregate cost classification centers in accordance with program policies.

The following cost descriptions are guidelines to provide consistency in nursing facility provider cost reporting. Reimbursement classifications are identified for individual cost elements in examples available on the MDHHS website. (Refer to the Directory Appendix for website information.) More detailed discussions of cost categories are in the Allowable and Non-Allowable Costs section of this appendix.

### 9.1 NURSING FACILITY BED DAYS AND RESIDENT OCCUPANCY

A provider must report nursing facility bed days and resident occupancy statistics in the annual cost report. Policy related to facility census is presented in the Definitions section of this appendix. Specific attention should be directed to the following definitions: available bed, available bed days, ban on admissions, census, census day, denial of payment for new admissions, hold a bed day, leave day – hospital, leave day – therapeutic, occupancy, occupancy rate, per resident day cost, resident, resident days/occupancy, therapeutic leave day.

The nursing facility’s resident occupancy statistics and cost reporting requirements will be significantly affected in cases where the provider requests, and is granted, approval for designating non-available beds as outlined in the Non-Available Beds subsection of this appendix.

### 9.2 VARIABLE COSTS – BASE AND SUPPORT

Variable costs include the total allowable base and support costs in a facility’s routine nursing service units. A provider must allocate variable costs (support or base) depending on the activity for which the cost was incurred. The provider must also report direct costs for ancillary service costs and other non-reimbursable service costs. The direct costs incurred or attributed to these activities will not specifically be identified as base or support costs, however, the cost report cost finding process will allocate general services cost activities as base or support costs depending on the activity for which the cost was incurred.

#### 9.2.A. BASE COSTS

Base costs cover activities associated with direct patient care. Major activities under these categories are payroll and payroll-related costs for departments of nursing, nursing administration, dietary, laundry, diversional therapy and social services, food, linen (excluding mattress and mattress support unit), workers compensation, utility costs, consultant costs from related party organizations for services relating to base cost activity, nursing pool agency contract service for direct patient care nursing staff, and medical and nursing supply costs included in the base cost departments.
9.2.B. SUPPORT COSTS

Support costs cover allowable activities not associated with direct patient care. Major items under these categories are payroll and payroll-related costs for the departments of housekeeping, maintenance of plant operations, medical records, medical director, and administration, administrative costs, all consultant costs not specifically identified as base, all equipment maintenance and repair costs, purchased services, and contract labor not specified as base costs. Contract services costs for these departments are also support costs.

9.2.C. BASE/SUPPORT COSTS — PAYROLL RELATED

Nursing facility expenses related to payroll taxes and employee health and welfare are classified as base/support costs. These costs include fringe benefits such as employer contributions to FICA, FUTA, MESC, employee life and health insurance, retirement, physicals, and all other insurance provided to employees as fringe benefits. If a nursing facility’s accounting records do not separately reflect the payroll taxes and employee health and welfare expenses for "base" and "support" personnel by cost center identification, the total amount of these costs must be reported in the appropriate "base/support" cost category. Workers compensation is a base cost and not divided between base and support.

If the nursing facility's accounting system allows the allocation of costs to specific personnel or activities, the specified costs must be used on the cost report. If the nursing facility accounting system does not allow for this specificity, then a reclassification of costs must be made to the appropriate service areas. In these cases, it will be necessary to reclassify such costs on the basis of salary and wage costs distribution.

9.2.D. BASE/SUPPORT COSTS — CONTRACT SERVICES FOR DIRECT PATIENT CARE

A provider that purchases direct care services as an alternative to employing personnel may apportion the contract services costs between base and support cost by applying the industry-wide average base-to-variable cost ratio. The nursing facility must appropriately report these costs in the annual cost report. Medicaid reviews the industry-wide average base-to-variable cost ratio annually and revises it if a difference of two percent or greater exists between the current calendar year cost report aggregate average industry data and the previously promulgated industry-wide base-to-variable cost ratio. If a revision is applicable, the revised cost ratio will be effective for subsequent year cost reporting.

9.3 PLANT COSTS

Plant costs include depreciation, interest expense (either working capital or capital indebtedness), real estate and personal property taxes, amortization costs associated with loan financing costs (amortization of legal fees, recording fees or other fees relating to the capital asset acquisition points, letters of credit), and specific lease expenses.
9.4 CAPITAL ASSET EXPENDITURE

Medicaid limitations on capital expenditure costs are determined in accordance with Medicare Principles except as modified by Medicaid policy.

A nursing facility provider anticipating capital expenditures should contact the CON Evaluation Section to make application for a CON. (Refer to the Directory Appendix for contact information.)

If a CON is approved, the provider may be eligible for increased reimbursement, subject to Plant Cost Component limits. If a new capital expenditure required CON review and was denied, the provider's reimbursement rate must exclude the costs of the denied capital expenditure. The provider's cost report must identify capital expenditures approved and denied by CON.

The nursing facility must have written policies and procedures that establish dollar level thresholds beyond which an asset acquisition is considered a capital asset. Medicaid sets the thresholds at having an estimated useful life of at least two years and a historical cost of at least $5,000. The nursing facility capital asset policy may have lower dollar level threshold than the Medicaid limit, but may not have a higher limit. If the provider's capitalization policy sets lower thresholds than Medicaid, then the provider's established policy must be followed for cost reporting. A provider may not have separate capitalization policies for Medicaid cost reporting and for other financial statements and reports.

Assets that are acquired as part of an integrated system must be considered as a single asset for capitalization purposes. Assets that have a stand-alone functional capability may be considered on a single item basis. Individual asset items that do not meet the dollar and useful life threshold are classified as minor equipment and will be reported as minor equipment expense in the cost report of the year of acquisition.

Example: An office workspace with connecting portions dependent upon other portions for support and stability; a communication system installed in the facility and in resident rooms to allow the full functioning of two-way communication system.

Repair and improvement costs related to assets that result in extending useful life or increased productivity must be capitalized for Medicaid if they are capitalized under Generally Accepted Accounting Principles. Providers must demonstrate consistency in financial reporting.

Providers must follow Generally Accepted Accounting Principles (GAAP) in reporting repairs to capital assets. Repairs that should be capitalized under GAAP must not be an expense item on the cost report.

9.4.A. CAPITAL ASSET COST DATA FOR CLASS I FACILITIES

9.4.A.1. CAPITALIZED ASSET ACQUISITION COSTS

Capitalized asset acquisition costs are used to determine the Current Asset Value for the Plant Cost Component in the Class I nursing facility reimbursement rate. The Medicare Principles of Reimbursement are used to determine the acquisition costs allowable to the original provider/owner of the asset. The SMA uses only the acquisition cost incurred by the original owner to determine the capital asset value cost data. Asset acquisition costs are allowed for related party transactions in accordance with Medicare’s interpretation for costs to related organizations.
The cost basis for capital assets is the CAV value determination of the original owner's audited historical acquisition cost. It is the responsibility of the current owner to provide the audited historical cost and purchase year of the original owner; otherwise, the assets are assumed obsolete for payment determination purposes, i.e., of no current asset value. The current provider must annually report the cost and the applicable year's depreciation for newly purchased assets and value changes to previously acquired assets. Cost reporting for asset acquisition costs related to a capital asset that is traded-in for a new replacement item must also report the value of the capital assets.

Capital costs related to assets that are no longer used in the facility operation and assets that are not necessary for resident care, e.g., excessive land not allowed under the Principles, are not allowable in the nursing facility capital asset value cost data.

To ensure that Medicaid does not pay for assets that are no longer being used to provide resident care, the original acquisition costs, or an estimate thereof, are removed from the current capital asset cost data. The costs of retirement or replacement of buildings, building improvements, building additions, fixed building equipment, land improvements, or movable equipment are removed from the capital asset cost data for the corresponding year of the original acquisition of that retired or replaced asset.

When the original value can be ascertained through such methods as component part depreciation records, the provider must remove the original costs of the retired or replaced assets from the year of the original acquisition, and report the new asset item cost for the year purchased.

Building components, building services equipment or other fixed equipment assets or land improvements may have historically been included within the asset price of the building to which they are attached and, as a result, are not separable for purposes of calculating depreciation or the capital asset cost data. However, in the determination of the Current Asset Value, an asset must exist in the nursing facility for it to have a value. Therefore, if a fixed asset has been retired or replaced and the asset cost cannot be determined from the provider's Medicaid/Medicare asset cost schedule, construction records, or tax records, the provider must determine and report the original asset cost based on the cost of a similar asset.

If a nursing facility provider is unable to report the original asset cost by either individual asset cost or component basis, the new asset will be assumed as a replacement of a similar asset for determining the necessary revisions to the capital asset cost data using the asset trade-in provisions.

When a capital asset is traded-in for a new replacement item, either the original owner's cost or a derived value of the item traded in is removed from the capital asset cost data. The purchase price of the new asset, prior to consideration of the value of any trade-in, is added into the capital asset cost data for the current year of purchase. If the original cost of the item is unknown, the provider must derive a value by backdating the purchase price amount for the new replacement asset. If the asset being replaced is of a different quality or type than the new asset, the amount to be backdated may be based on the expected current cost of a similar asset of like quality and type. The derived value calculation is made by applying a construction cost index (exclusive of the annual obsolescence adjustment) to the value of the new asset item cost, then subtracting the
derived value from the previous capital asset cost data historical cost for that original acquisition year. An electronic copy of the annual economic index compilation and the derived application process used for nursing facility cost reporting can be accessed on the MDHHS website. (Refer to the Directory Appendix for website information.)

Capital assets that are leased or rented are treated as obsolete assets for rate determination purposes when the underlying historical acquisition cost to the original owner has not been disclosed, or when the underlying information cannot be verified through audit.

Capital assets recorded in the central office, home office, or related organization financial records that are identifiable to a specific nursing facility are included in that facility's capital asset cost data determination process. The asset values, interest, and property taxes identified with these assets must be charged directly to the nursing facility and will be reimbursed in accordance with the applicable policy.

Costs of capital assets associated with the operation of related organizations are not included in the capital asset cost data determination for a specific nursing facility. The plant and variable costs of such organizations are treated as purchased services. (Refer to the Variable Costs – Base and Support subsections for discussion regarding purchase and contract services.)

9.4.A.2. EXCEPTIONS TO ASSET ACQUISITION COST CAPITALIZATION

Exceptions to the acquisition cost basis for assets may be allowed in the following situations:

- For the occasional purchase of used, movable equipment for ongoing nursing facility operations when the purchase is not related to a change in facility ownership. For the purchase of used replacement equipment, e.g., re-manufactured beds, a used lawn tractor, or used vehicles, the asset acquisition is treated as if new items were purchased. The allowable cost of acquisition is included in the year the asset is put into service by the current purchaser.

- For the nursing facility land value. The land value to be included in the Current Asset Value is based on the current owner's allowable acquisition cost determined in accordance with Medicare Principles, and not to exceed the amount reported to the Internal Revenue Service for federal tax purposes. The cost of the prior owner's land improvement asset, which is an integral part of the nursing facility land component and is included in the new or current owner's land acquisition cost, must be excluded from the historical capital asset cost data. The current facility ownership capital asset cost data cannot include both the land purchase price and the original owner's land improvement cost data.

- When equipment is purchased as "used" equipment as part of a facility change of ownership, or only a change of ownership of the facility equipment has occurred, the prior owner's (seller) computation of value at the time of sale is continued to the new owner.
9.4.B. CAPITAL ASSET CATEGORIES (FIXED ASSETS)

Capital asset classifications and asset useful life for depreciation purposes are determined in accordance with the American Hospital Association (AHA) guidelines in effect at the time of the asset acquisition.

General descriptions of the asset cost categories for cost reporting are:

**Land** – includes the land owned and used in the provider operations and includes off-site sewer and water lines, public utility costs necessary to service the land, government assessments for street paving and sewers, cost of permanent roadways and grading of a non-depreciable nature, cost of curbs and sidewalks where the replacement is not the responsibility of the nursing facility, and other land expenditure of a non-depreciable nature.

**Land Improvement** – improvements of a depreciable nature including paving, tunnels, underpasses, on-site sewer and water lines, parking lots, shrubbery, fences, walls, etc. where replacement is the responsibility of the nursing facility.

**Building** – includes the basic building structure, shell or frame, and additions thereto, building components, exterior walls, interior framing, walls, floors and ceiling, architectural, consulting, and interest expense associated with new construction or acquisition.

**Building Improvement** – includes building equipment attachments to buildings, such as wiring, electrical fixtures, plumbing, elevators, heating and air conditioning systems, etc. The general characteristics of fixed equipment are: (a) attached to or installed in the building structure, and (b) fairly long life but may be less than the building.

**Leasehold Improvement** – includes betterments and additions made by the lessee to the leased property, whereby the improvements become the property of the lessor after expiration of the lease. These items generally meet the requirements of building improvement assets.

**Department Equipment** – includes assets generally assigned to a specific department within the nursing facility with relatively fixed location but capable of being moved; as distinguished from building equipment. (Refer to Building Improvement.)

**Furniture and Fixtures** – includes assets similar in characteristic to department equipment, however, normally with no fixed location or used by various departments within the facility.

**Transportation Equipment** – includes vehicles used in conducting nursing facility operations relative to resident transportation, plant operations and maintenance, or general means of transport.

Capital asset costs incurred by a landlord who is leasing facility assets to a provider must be disclosed and reported in the provider’s annual cost report. Capital asset cost reporting and allowable cost policies are applicable to the reporting of the leased assets in the same manner as if the assets were owned by the provider.
9.4.C. DEPRECIATION

Class I and Class II nursing facilities are under the tenure plant cost reimbursement methodology, and potential reimbursement is not based on depreciation expense for the nursing facility capital assets. The costs of services provided from home office or related party transactions, other than for capital assets related to the nursing facility physical plant, may include depreciation expense for asset costs applicable to the operations of the home office or related party business. Allowable depreciation costs for the home office or related party will be determined in accordance with Medicare Principles. These costs will be included in the home office or related party administrative services space costs and must be reported in accordance with Medicaid policy identified in the Related or Chain Organization Cost Allocation subsection of this appendix. Class III and Class IV nursing facilities reimbursed under the depreciation plant cost reimbursement methodology will have depreciation costs determined in accordance with allowable cost principles defined in this policy. The allowance for depreciation is determined in accordance with Medicare Principles except that only the straight-line method of depreciation may be used. The historical asset cost basis and the depreciation basis for nursing facility sales is subject to the limitation on the valuation of assets mandated by the Medicare Principles.

In addition to the depreciation standards in the Medicare Principles, Medicaid also requires adherence to the following standards:

- Consistent use of either component or composite asset depreciation schedules. Component depreciation is permitted in the case of a newly constructed facility and for recognized building improvements where the costs can be separated and acceptable useful lives determined. Composite depreciation must be used in the case of a newly purchased, existing facility.
- All abandonment losses are considered as a depreciation expense item.

9.4.D. DISPOSAL OF DEPRECIABLE ASSETS

9.4.D.1. CLASS I NURSING FACILITIES

Class I nursing facilities will account for asset acquisition and disposal in accordance with the Capital Asset Cost Data for Class I Facilities subsection of this appendix.

A Class I nursing facility purchased on or after March 31, 1985 is not subject to depreciation adjustment. In the event of a sale, the assets of Class I facilities whose ownership began prior to March 31, 1985, amounts included in the Medicaid per diem rate as an explicit depreciation expense item are subject to recapture in the event of a gain on the disposal of assets. The selling Provider must complete Medicaid Program Depreciation Recapture reporting schedules along with the applicable fiscal year cost report. Refer to the Cost Report Reimbursement Settlement, Depreciation Recapture Reimbursement Adjustment subsection of this appendix for additional information.
9.4.D.2. CLASS III NURSING FACILITIES

Class III providers whose Medicaid rate includes depreciation expense must adhere to the Medicare Principles of Reimbursement to account for the disposal of depreciable assets. If the disposal of depreciable assets in the reporting year results in a gain or aggregate loss below $5,000, the adjustment will be made in the nursing facility provider’s current year cost reporting allowable cost. The allowable gain is limited to the amount of depreciation previously included in the provider’s allowable costs for the disposed assets.

In the event of a sale of the entire nursing facility and the termination of Provider participation in the Medicaid program, the terminating Provider must complete Medicaid Program Depreciation Recapture reporting schedules along with the applicable fiscal period cost report. Refer to the Cost Report Reimbursement Settlement, Depreciation Recapture Reimbursement Adjustment section of this appendix for additional information.

9.5 LOANS/BORROWINGS BALANCE REPORTING

Necessary and proper interest on current and capital debt is a Medicaid allowable cost. All interest expense, whether on current or long term debt, is classified as a plant cost. Determination of allowable interest expense will be in accordance with Medicare allowable cost principles. However, there are reimbursement limits for determining the Plant Cost Component specific to Medicaid which are addressed in the Rate Determination section of this appendix.

Medicaid requires nursing facilities to report the loans and borrowings balance in the annual cost report. The cost report instructions identify the schedules that must be used to report borrowing principle balances. The nursing facility must report the beginning balance and monthly end balance of outstanding allowable loans and borrowings for the period corresponding to the cost report year. The loans and borrowings in the borrowing balance report must only include the outstanding loans or other liability obligations for which the nursing facility is claiming interest expense related to that borrowing principle. If the nursing facility is filing a cost report claim for interest expense as an allowable cost, the nursing facility must document the corresponding borrowing obligation related to the interest expense. The outstanding borrowing balance is defined as the allowable borrowing principle amount on which the interest rate, normally expressed as an "interest rate percentage", is applied for the purpose of calculating the interest expense applicable to the specific cost report period.

Loans from related parties or unallowable borrowings must be excluded from the cost report borrowing balance schedule. The interest incurred on excluded borrowings must be removed from incurred interest costs in a like manner. Interest income or investment income which is required to be offset to interest expense in the cost report period must not be considered a reduction in the outstanding borrowing balance principle.

Mortgage principle balances or similar finance arrangements for the purpose of nursing facility or business acquisition must be separately identified from other loan balances in the cost report borrowing balance schedule. Examples of other loan balances include working capital and miscellaneous asset acquisition purpose loans. In the event of refinancing and co-mingling of separate loan balances into a single finance arrangement, the nursing facility must identify the appropriate portions of the combined financed amount used for different purposes and maintain the separation for cost reporting. Likewise, multiple loans for the same purpose must be combined for the appropriate category for cost reporting.
Borrowing principle obligations incurred by a home office must be reported on the individual nursing facility cost report borrowing balance worksheet only for loans directly associated with financing the individual nursing facility asset purchases or facility acquisition costs. The interest expense applicable to such loans must also be identified, directly charged to the individual nursing facility, and reported as interest expense for the nursing facility. Working capital and other loans incurred directly under the home office operation and not related to nursing facility acquisition are considered general administrative costs and are included, to the extent determined necessary and reasonable, in the home office cost allocation to the individual nursing facilities and other business operations of the corporate chain.

Allowable outstanding loan balances of landlord entities that are leasing nursing home facility assets to a provider must be disclosed and reported in the provider's annual cost report. Borrowings balance cost reporting and allowable cost policies are applicable to the reporting of the underlying cost of the landlord entity in the same manner had the borrowings been recorded on the financial records of the provider.

9.6 COST FINDING

Cost finding is the process of recasting the data from the accounts kept by a provider to determine the cost of services rendered, allocating direct costs, and prorating indirect costs in accordance with Medicare Principles of Reimbursement, except where modified by Medicaid policy. Medicaid determines reimbursement rates for nursing facility providers based on specific categories of cost, as addressed in other sections of this appendix.

9.6.A. COST ALLOCATION BASIS

The Medicaid cost reporting process establishes the cost finding process. Indirect and non-revenue producing cost centers are allocated using a statistical basis that reflects an equitable measurement of the services provided to, or benefits derived by, a revenue producing or non-reimbursable activity. The nursing facility must develop and maintain adequate statistical data to corroborate the basis of the cost allocation. Adequacy requires that the data be accurate and include sufficient detail to accomplish the purpose for which it is intended. When completing the allocation of the general service cost centers, the nursing facility provider should first allocate those cost centers that render the most services to, and receive the least services from, other cost centers.

9.6.A.1. FACILITY SQUARE FOOTAGE AND SPACE REPORTING

A facility space cost allocation is based on square footage identified with specific service areas or activities occupying and using that space. Square footage is an allocation base that may be applicable for multiple indirect cost center activities. However, for cost centers where the basis is the same (e.g., square feet), the total statistical basis over which the costs are to be allocated will differ because of the prior elimination of cost centers that have been allocated.

A consistent and uniform process must be used by the nursing facility for compiling and charging the square footage to each service activity that is primarily benefitting from or using that space. Facility space that is used for multiple activities must be documented and connected to each applicable activity based upon current data that reflects actual use and is available for audit verification. Hallway space located within a specific department or service area is considered usable space for that department. Areas of the
facility for general use, such as connecting hallways, reception areas, lobby, and elevator, used or benefiting all service activities are considered common space. Identifying and counting common space must be consistent for all service areas of the facility.

For example, common space in one service department cannot be excluded from space allocated to that service activity, while similar common space located in other service departments is included in the space allocation of other service activities. The allocation basis must apply either the gross method, where all common area is included and charged to the specific services activity, or the net method, where common space located within the identified service area is not charged to the service activity. The nursing facility’s handling of common space area in the cost report allocation must result in equitable distribution of costs associated with the common space to appropriate activities. A change in the process or methodology that the nursing facility uses for allocating space is a change in allocation basis, so appropriate notice and a request must be made to the SMA.

9.6.A.2. ANCILLARY/Therapy SERVICES SPACE REPORTING

Facility space used for ancillary services delivery must be identified and charged to the appropriate ancillary services cost center. For example, space used for skilled rehabilitation services provided based on a physician’s order must be allocated to the appropriate ancillary cost center.

Accounting procedures must be established and implemented to reflect individual cost centers for reimbursable therapy and pathology services. Irrespective of the therapist or pathologist’s status as an employee, contractor or independent provider, the nursing facility must record all charges as income and all expenditures for supportive personnel, equipment and its maintenance, supplies and other costs directly attributable to reimbursable expenses in these cost centers.

9.6.A.3. ANCILLARY/Therapy SERVICES ADMINISTRATIVE OVERHEAD

Medicaid requires that administrative overhead associated with ancillary services be allocated to the ancillary services cost center. The required basis for distribution of administrative costs to the benefiting activities of the nursing facility is accumulated costs. The accumulated costs base generally includes all service activities of the nursing facility.

In specific situations, the nursing facility may request exclusion of certain ancillary service groups from the administrative cost overhead allocation in the Medicaid cost report. The determination applies only to those service items where the billing to the third party only allows for the recovery of the direct cost of the service. The provider must demonstrate considerable inequity of the overhead cost allocation to these service activities that have been identified as excluded groups under the Medicare Principles of Reimbursement and that it is not incurring additional costs beyond the activity for arranging for the services. The incidental costs for inclusion of the ancillary service bill preparation must be as follows:
The facility representatives arrange for the services to be performed by an agency or entity that is not part of the nursing facility operation.

- The nursing facility is not directly involved in providing the ancillary service.
- The nursing facility does not incur any costs for supplies and equipment necessary to perform the service.
- The ancillary service is being recorded through the accounting records and billing system of the nursing facility for the consolidated billing of the services provided to the nursing facility resident.
- The nursing facility does not have physical space dedicated for the purpose of delivery or rendering of the ancillary service. Dedicated space is considered space that is used predominantly for the purpose of the ancillary service delivery.
- The nursing facility is not charging a mark-up related to the billing of the service.

If the nursing facility is allowed to bill for, or recover revenue in excess of, the direct cost of the services, the statistical and fiscal worksheet of the cost report may be adjusted to reflect the revenue received. The amount of revenue exceeding the direct cost will be considered the overhead amount that must be reflected as an adjustment to the "miscellaneous expense" in the Administrative and General cost center, in addition to the direct cost adjustment to exclude the ancillary service cost from the cost allocation step-down. The nursing facility must demonstrate that the excess revenue is a fair representation of the overhead cost or activity associated with providing the service. If this requirement is not met, the ancillary services activity must be included in the administrative cost allocation basis for the apportionment of overhead to the activity.

A provider may request an ancillary group exclusion. The exclusion request must be approved by RARSS. The request must include the parameters under which the exception is requested. If the request is approved by RARSS and it is later determined non-applicable, the exclusion is void for that entire cost report period.

If a CHOW occurs, the prior owner's ancillary group exclusion is no longer applicable. The new owner may submit an ancillary group exclusion request to RARSS for approval. The exclusion process is outlined in the Ancillary Group Exclusion subsection of this appendix.

**9.6.B. Change in Cost Allocation Basis**

A provider who wishes to change the allocation basis for a particular cost center, or the order in which the cost centers are allocated, must submit a written request to the RARSS. (Refer to the Directory Appendix for contact information.) The request must include reasonable justification and supporting documentation that the new basis is more accurate and appropriate for allocation of the cost activity for Medicaid reimbursement determination. The request must be made prior to the beginning of the cost-reporting period in which the change is to apply. The effective date of the change will be the
beginning of the cost-reporting period for which the request has been made. Failure to
submit a timely written request will result in an audit adjustment. The nursing facility
provider must maintain both prior and proposed statistics base data until the change is
approved.

Medicaid may reject a submitted cost report if a request to change the allocation basis
has not been submitted and approved by RARSS. If the previous allocation basis
methodology has not been maintained for the current year, Medicaid may accept
previous year’s statistics for the current year cost reporting.

9.6.C. RELATED OR CHAIN ORGANIZATION COST ALLOCATION

The Medicare Principles of Reimbursement define a related organization as an
organization linked to a nursing facility provider by common ownership or control,
including a chain organization. Medicaid extends an option for cost allocation for related
or chain organizations. An immediate family relationship establishes an irrefutable
presumption of relatedness.

For Medicaid purposes, a chain organization consists of a group of two or more nursing
facilities, or at least one nursing facility and any other business or entity owned or
operated and controlled by one organization. To the extent that the home office
furnishes services related to patient care to the nursing facility, the reasonable costs of
the services are included in the nursing facility’s cost report. Medicaid policy for related
organization costs is determined in accordance with provisions in the federal Provider
Reimbursement Manual for related organization costs. Exceptions to the application of
federal provisions are addressed in the Cost Classifications and Cost Finding and the
Allowable and Non-Allowable Costs sections of this appendix.

Home office costs apportioned to individual nursing facilities through the Home Office
Cost Statement are classified as support costs. Cost report requirements for home office
are addressed in the Cost Reporting section of this appendix.

Costs incurred by a nursing facility for services furnished by a related organization are
allowable. The cost allocated to the nursing facility cannot exceed the price of
comparable services, facilities, or supplies that could be purchased in competitive market
conditions. The principles of reimbursement applied for the determination of allowable
cost to the nursing facility are also applicable to the related organization. If a cost would
be unallowable to the nursing facility, it would be unallowable to the related organization.

The operating costs of a related ownership organization are allocated to an individual
nursing facility as a "purchased service" and must be identified within the appropriate
cost center for Medicaid cost reporting. The type of service determines if the costs
qualify to be apportioned between base and support cost using the industry-wide base
and support cost percentages. If the service does not qualify to be apportioned by this
method, the allocated costs are classified as support costs in the individual nursing
facility. Refer to the Cost Classifications and Cost Finding section of this appendix for
additional information.

For cost reports where the home office and the individual nursing facility’s fiscal year
ends are different, a provider must elect to forego the inclusion of an allocation of the
current year’s home office costs in the current year’s individual provider cost report. A written request must be submitted annually to RARSS, with the individual provider’s cost report signed by the appropriate corporate official acknowledging that the cost report is being submitted with the prior fiscal year’s home office costs. The written request must also indicate that the corporation is waiving the right to inclusion of any allocation of the current year’s home office costs in the current year’s individual provider cost report.

For example, a home office fiscal year end (FYE) is December 31 and the individual facility's FYEs are May 31, August 31, September 30 and December 31. For individual facility cost reporting for fiscal year 2018 ending in May, August, September and October, the individual facility must elect to report only the home office costs from the FYE December 31, 2017 home office cost report. The home office allocation of costs from FYE December 31, 2017 to the individual facility would be reported and audited. During the audit of the individual facility cost report, adjustments to allocate actual FYE December 31, 2018 home office costs would not be made. For individual facilities with FYE December 31, 2018, the home office costs from the FYE December 31, 2018 cost report would be reported.

9.7 DISTINCT PART UNIT REPORTING

For reimbursement purposes, the Nursing Facility is defined as the unit that is certified for participation in the Medicaid program, whether that unit comprises all of, or a distinct part of, a larger institution.

Certification regulations require that a distinct part be physically distinguishable from the larger institution and fiscally separate for cost reporting purposes. The provider must demonstrate to Medicaid that the system used for recording the hours of nursing services can be audited and equitably allocates the nursing services costs between the distinct part and other parts of the facility. The nursing services costs are only the gross salaries and wages of nursing and related personnel, such as RNs, LPNs, and CNAs. Costs applicable to general services areas of the institution must be allocated in accordance with the Cost Finding section of this appendix.

Nursing services costs allocated to that distinct part of the facility must relate only to services provided to those residents. While a provider may choose the record keeping method used to allocate these costs, the system must be capable of accurately reflecting the hours of nursing service applicable to the distinct part and other parts of the institution. Various systems may be employed to record and accumulate the hours of nursing services such as actual time spent taken from payroll records, assignment schedules, sign-in sheets, etc. Providers wishing to use any other method that does not identify actual time must obtain written approval from the RARSS prior to changing its cost allocation method. The request must identify the reason for the change and must demonstrate that the proposed method is representative of actual nursing staffing within the facility and results in an equitable and accurate allocation of nursing services costs.

A nursing services cost allocation alternative may be applied only with the prior written permission from RARSS.

An institution may have more than one Medicaid distinct unit in specific cases where Medicaid has certified beds as special use for specialized nursing care. The specialized nursing care beds must be physically distinguishable, within a designated area, and identified as a separate nursing bed class for Medicaid reimbursement. Requirements for reporting nursing services costs also apply to nursing
services for residents in specialized nursing care beds. The nursing facility must have prior approval from Medicaid for participation in a program for specialized nursing care.

9.8 DAY CARE SERVICES PROVIDED IN THE NURSING FACILITY

According to federal principles, day care services provided to an employee's dependent are not a fringe benefit when furnished for the convenience of the provider. Medicaid considers day care services provided to an employee's dependent a convenience to the provider due to potential support of staff recruitment and retention.

9.8.A. EMPLOYEE DEPENDENTS

According to federal principles, the costs of operating a day care center for the children of a facility's or related facility's employees must not be reported as an employee fringe benefit. The costs are allowable to the extent that the amount is reasonable. "Reasonableness" means that the services are provided in accordance with the policies and regulations established for the provision of such services and must take into account both direct and indirect costs. The provision of services must also be considered reasonable in that the costs of operating a facility demonstrate sufficient benefits. For example, the number of children participating justifies the provision of services.

Total cost must not exceed what a prudent and cost conscious buyer pays for like services. If costs are determined to exceed such level and the nursing facility cannot provide clear evidence that the higher costs were unavoidable, the excess costs are not allowable. The day care center operations must be provided in accordance with, and satisfy applicable regulatory requirements governing the operations of, such activities. The nursing facility must maintain accounting records and documentation to demonstrate the total cost and utilization of day care services.

The following costs are non-allowable:

- diapers
- towelettes
- lotions
- oils
- similarly used hygiene products

9.8.B. SERVICES PROVIDED TO NON-EMPLOYEE DEPENDENTS

If a provider renders services to non-employee dependents, the day care center must be established as a separate entity even if services are also provided to employee dependents. Medicaid will allow costs relative to intergenerational activities as an offset when the day care center suffers a financial loss, which is limited to the lesser of total documented intergenerational activities or the amount of the loss. Intergenerational activities must be documented, organized activities between the children attending the day care and the nursing facility residents.

The nursing facility must maintain accounting records and documentation to demonstrate the total cost and utilization of day care services.
9.9 NURSE AIDE TRAINING AND COMPETENCY EVALUATION PROGRAM (NATCEP) AND COMPETENCY EVALUATION PROGRAM (CEP)

The Omnibus Budget Reconciliation Act (OBRA) of 1987 and 1990 requires that any nurse aide employed in a nursing facility complete a competency evaluation program. Medicaid will reimburse a Medicaid certified nursing facility for the Medicaid share of allowable costs directly related to meeting the nurse aide training and competency evaluation requirements. Reimbursement includes only costs incurred with a NATCEP or CEP approved by the SSA. Medicaid reimbursement applies only to Certified Nurse Aides (CNA) working in a Medicaid certified nursing facility and are not available to CNAs in other residential or patient care settings.

A nurse aide who is employed by a nursing facility or who has received an offer of employment from a nursing facility on the date on which the nurse aide begins a NATCEP may not be charged for any portion of the cost of the program. The nursing facility must reimburse newly employed CNAs who have personally paid for NATCEP or CEP costs prior to employment in the facility, in accordance with criteria identified in the Nurse Aide Reimbursement section of this appendix. Medicaid in turn reimburses the nursing facility.

Providers may obtain reimbursement from Medicaid for CNA costs. The reimbursement process and necessary forms are available on the MDHHS website. (Refer to the Directory Appendix for website information.)

9.9.A. NURSE AIDE COMPETENCY EVALUATION PROGRAM AND NURSE AIDE REGISTRY

Nurse aide candidates must pass both a clinical skills test and a knowledge test in order to become certified. Fees for the individual nurse aide to take the tests, and retake each test up to three times, are allowable costs for nursing facility reimbursement. Refer to the Nursing Facility Reimbursement and Nurse Aide Reimbursement subsections of this appendix.

When a nurse aide has successfully passed the CEP, their name is placed on the Michigan Nurse Aide Registry. Fees relating to initial registration and biennial registry renewal are allowable costs for nursing facility reimbursement. For currently employed nurse aides, the nursing facility is responsible for the direct payment of biennial registry renewal fees. Refer to the Nursing Facility Reimbursement and Nurse Aide Reimbursement subsections of this appendix.

Information about training requirements, competency evaluation program and registry data is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

9.9.B. NURSING FACILITY REIMBURSEMENT

Reimbursement to the nursing facility for NATCEP related costs is calculated as an add-on to the routine per diem rate. The Nurse Aide Training and Testing Program Interim Reimbursement Request (MSA-1324) and instructions are available on the MDHHS website. The total NATCEP add-on amount will be adjusted through the annual cost report settlement process. The Medicaid share of the costs is computed based on the ratio of Medicaid resident days to total resident days for all nursing care provided in the
facility during the cost report period. Refer to the Cost Report Reimbursement Settlement section and the Rate Determination section of this appendix for additional information.

The NATCEP cost center on the Medicaid cost report must be used to report the following:

- Costs of conducting a nursing facility based NATCEP.
- Costs of having employees participate in an approved NATCEP outside the nursing facility.
- Costs of employee competency testing by a regional testing facility.

The costs and staffing levels relating to and charged to the NATCEP cost center must not be included in the nursing facility determination of routine nursing care costs.

The determination of allowable NATCEP costs is made in accordance with provisions in the federal Principles of Reimbursement established for the Medicare Program, and cost limitations in Medicaid policy. Training and evaluation program costs claimed for services and supplies furnished to or purchased by the facility from related organizations must adhere to related party allowable cost principles. The cost of such transactions must not exceed the cost of like items or services in an arms-length transaction with a non-related organization, or the actual cost to the related organization, whichever is lower.

The following are not NATCEP costs and must be classified as routine nursing care costs on the cost report:

- Administrative overhead in a facility-based training program.
- Space costs in a facility-based training program.
- Uniform allowance costs.
- Required in-service training.

NATCEP and CEP allowable cost must only include the costs of activities or items that are directly related to providing approved training and the competency evaluation process. The following table contains eligible training and evaluation activities.

| Training Staff | Salaries and wages, employee benefits and payroll taxes for conducting training and evaluation activities, including supervised practical training, and direct time devoted to development and preparation for conducting the NATCEP. Payroll costs allowed for NATCEP do not include the cost of time that the training staff devote to routine in-service training activities, general nursing administration or direct patient care, except for supervised practical training. These costs must be classified as routine nursing care cost for consideration in the routine per diem rate. |
| Training Consultants | Costs incurred for non-facility staff to assist in developing and conducting the facility's NATCEP. |
| **Student Staff** | Salaries and wages, employee benefits and payroll taxes incurred for the time the student is enrolled in the approved training program, i.e., classroom and required supervised practical training. A reasonable time allowance for student employees traveling to and from the off-site training location or competency evaluation, in accordance with a nursing facility's established and documented travel policy, is allowable as NATCEP cost. Payroll costs allowed for NATCEP do not include the cost of staff time for patient care activities that the nurse aide is performing during the period the student is completing the training program. These costs must be classified as routine nursing care cost for consideration in the routine per diem rate. |
| **Training Program Supplies** | Costs of supplies and materials used in conducting an approved NATCEP. |
| **Training Program Transportation** | Travel or transportation costs incurred by facility staff in conducting the NATCEP activity, and for transportation or travel reimbursement to student staff for off-site NATCEP or CEP attendance. Refer to the Facility Vehicle and Transportation, Allowable and Non-Allowable Cost section of this appendix for mileage allowance provisions. Use of a facility owned vehicle for staff transportation for training is not charged to NATCEP. Facility vehicle operation cost must be classified as administrative overhead and is considered in the routine per diem rate. |
| **Outside Contracted NATCEP Paid Directly by the Facility** | Cost to obtain approved nurse aide training of facility employees by an outside entity approved NATCEP. The nursing facility is responsible to ensure that the contractor is an approved NATCEP. |
| **Outside Contracted NATCEP Costs Reimbursed to Employee** | Cost for reimbursement to an employed CNA who had personally paid for an approved NATCEP participation and completion prior to being employed in the facility. Refer to the Nurse Aide Reimbursement subsection of this appendix for additional information. |
| **Competency Evaluation Fees Paid Directly by the Facility** | Fees paid by the nursing facility to a State-approved competency evaluator. This includes testing and retesting fees, rescheduling fees, and nurse aide registry. |
| **Competency Evaluation Fees Reimbursed to Employee** | Cost for reimbursement to an employed CNA who had personally paid for State-approved competency evaluation and registration fee prior to being employed in the facility. Refer to the Nurse Aide Reimbursement subsection of this appendix for additional information. |
| **Miscellaneous Costs** | Allowable costs that are not specifically identified in another category include, but are not limited to, the following items:  
  - Rental costs for space located out of the facility are allowable only if the space is used solely for the training and competency evaluation program. Space costs not meeting this requirement are reimbursable with the Plant Cost Component of the routine per diem.  
  - Reasonable rental expense for training equipment necessary for conducting an approved training program.  
  - Nurse aide biennial Registry Document renewal fees for current employees. |
9.9.C. NURSE AIDE REIMBURSEMENT

A nursing facility must reimburse a newly hired CNA if the CNA paid for nurse aide training, competency evaluation and registry, and completed the approved training program within 12 months prior to employment in that facility. The nursing facility is not required to reimburse the CNA in cases where the expenses were paid by an employment or education training program or were reimbursed by the CNA’s previous employer. The nurse aide should not be reimbursed for more than 100 percent of the NATCEP or CEP costs they paid.

The nursing facility is responsible to ensure that a newly hired CNA who requests reimbursement of training and testing expenses has not already received payment for these costs. An aide who paid for any of these eligible costs and received payment of a portion of the expenses from prior facility employment is eligible for only the remaining balance from the new employer.

The CNA must request reimbursement by submitting to the nursing facility the Nurse Aide Training and Competency Evaluation Program, Certified Nurse Aide Training Reimbursement form (MSA-1326), available in the Forms Appendix and on the MDHHS website. The reimbursement should be requested within the first six months of employment or work as a certified CNA.

NATCEP costs that are eligible for reimbursement to the individual nurse aide include:

- Training program cost including fees for textbooks and required course material up to a maximum of $650. Medicaid will update the maximum allowable reimbursement limit effective October 1, 2006 and biennial thereafter, based on the Global Insight’s Skilled Nursing Facility Market Basket Without Capital Index corresponding to that update period. The training program maximum reimbursement amount will be updated biennially on the RARSS website.
- Competency Evaluation Program testing fees, including retesting fees; CEP testing required due to the nurse aide registry document expiration; and rescheduling fees.
- Registry or Registry Renewal Document fees that the CNA personally paid within 24 months prior to being employed in the nursing facility.

For cost reporting and audit purposes, the nursing facility must maintain a copy of the MSA-1326 signed by the employee and documentation reflecting reimbursement to the employee. This documentation must include a copy of a receipt for cash payment, a copy of a cancelled check, or a credit card receipt showing the amount paid by the nurse.
The nursing facility has the option to reimburse the individual via a one-time payment or payment installments. The reimbursement to the individual, regardless of full-time or part-time employee status, must be fully paid within six months of the individual's date of employment, or must be prorated based on their dates of employment in the facility if employed for less than six months. If the nursing facility fails to reimburse a CNA employed in the facility within this timeframe, the unpaid balance will not be an allowable NATCEP or routine nursing care cost. This determination does not relieve the nursing facility of its obligation to reimburse the nurse aide. Wages may not be reduced to offset the facility's obligation to pay the nurse aide for training, competency evaluation, and registry costs.

The nursing facility is not obligated to pay the remaining balance of nurse aide training costs at the time an employee who has worked less than six months leaves facility employment. The CNA has the opportunity to recoup the non-reimbursed costs through subsequent employment at other nursing facilities. The facility should properly record payments so that the unpaid amount is not carried as a payment obligation.

**9.9.D. NURSING FACILITY LOCKOUT AND LOSS OF NATCEP APPROVAL**

A provider with a facility-based training CNA program is not eligible for Medicaid reimbursement of training costs when it has been issued a final notice from CMS or the SSA of the withdrawal of NATCEP approval, or of a NAT prohibition (lockout). For Medicaid reimbursement purposes, the lockout effective period coincides with the SSA period notice to the nursing facility. The nursing facility must not claim Medicaid reimbursement for costs associated with any facility-based training class beginning after the withdrawal or lockout effective date identified in the final notice. Nurse aide students beginning training prior to the withdrawal effective date are allowed to complete training, and the related costs to complete that training class are eligible for NATCEP reimbursement. Nurse aide training costs incurred for that facility based program subsequent to completion of that student class are not allowable NATCEP costs. This disallowed cost is also not allowable under routine nursing care cost.

Although the nursing facility experiencing approval withdrawal or lockout status cannot conduct its own training, the nursing facility must provide and reimburse for training and competency evaluation of its new nurse aide employees at approved sites. Such costs are eligible for Medicaid cost reporting and reimbursement in the annual cost report under the appropriate NATCEP cost categories. Nurse aide reimbursement for eligible training and competency evaluation personally paid expenses are allowable to be reported as NATCEP cost in the nursing facility annual cost report.

In the event that the nursing facility has been granted a waiver for a NAT program prohibition or lockout by the SSA, the nursing facility must comply with the provisions of the nursing facility waiver request and the requirements set forth by the SSA in the waiver approval. The facility-based NATCEP operating under a waiver is subject to audit by Medicaid for compliance with these requirements. If the nursing facility fails to conduct the program in accordance with these requirements, the training program
expenses are not allowable costs for NATCEP or routine nursing cost reimbursement by Medicaid.

9.10 BEAUTY AND BARBER SERVICE COST CENTER

Personal services for residents, such as simple barber and beautician services (e.g., shaves, haircuts, shampoos, and simple hair sets), that residents need are considered routine patient care. The provision of such services is reimbursed in the routine per diem rate when provided routinely without charge to the resident in the nursing facility. Personal services provided by a professional beautician or barber are unallowable costs.

If the nursing facility designates an area for providing non-routine personal hygiene services, such as professional manicures, or hair styling, costs must be separately reported and accounted for in the cost report. Direct and overhead costs related to these services must be separately accounted for in this special services cost center and should not be included in the cost of providing routine nursing care.

9.11 SPECIAL DIETARY COST CENTER

Medicaid provides for reimbursement outside the per diem rate to non-profit nursing facilities for the cost of meeting residents’ special dietary needs for religious reasons. Nursing facilities requesting reimbursement must report these costs as a separate cost center in the Medicaid annual cost report. Direct costs may include food purchase, salary and wages for the extra staff time for preparation, supplies and kitchen utensils necessary for preparation and service. The costs applicable to plant operations costs related to the special dietary needs will be determined through the Medicaid cost finding process.

9.12 HOSPITAL LEAVE DAYS

A separate accounting of costs incurred due to hospital leave days is not necessary.

9.13 NON-AVAILABLE BEDS

In special circumstances, nursing facility beds may be designated "non-available for occupancy" for Medicaid cost reporting when the patient care rooms in which the beds are located are not used for resident care. Beds with a "non-available" designation remain licensed or certified; the designation is for Medicaid cost reporting and reimbursement determinations only. An approved non-available bed plan reduces the total number of beds used for calculating available bed days for the annual cost report period coinciding with the period of the non-available bed plan. Non-available beds must be located in a discrete area and readily identified for statistical cost reporting. During the period the area is designated non-available for patient care, Medicaid does not reimburse for variable and plant costs attributed to the area designated as having non-available beds.

9.13.A. QUALIFYING CRITERIA

A non-available bed plan must include all of the licensed beds in a patient care room. The rooms must be a discrete area and primarily consist of a contiguous physical arrangement of rooms. Rooms may not be a random collection of individual rooms or beds located throughout the nursing facility.
Common physical space located adjacent to or within the designated rooms area will normally be included in the designated non-available bed area. Planned use of any common areas within the designated non-available bed area must be disclosed in the written notice to the RARSS.

Rooms with non-available beds may not be used for resident care service regardless of payer source nor can the space be used for any other normally reimbursable purpose.

Resident rooms that are not used for resident care do not qualify for non-available bed designation. Although the rooms may be used for alternative services, the beds located within the room area must continue to be counted as available for resident care. Physical plant area used for alternative use must appropriately be charged to the applicable alternative services cost center if the services activity results in ancillary care services or other revenue services.

The written request must be submitted within 30 calendar days of the date that the provider removes the beds from service.

9.13.B. WRITTEN NOTICE AND REQUEST FOR PLAN APPROVAL

The provider must submit a written request for a non-available bed plan to RARSS. The RARSS must receive the request within 30 calendar days of the date that the beds are to be removed from resident care service. Non-available bed plan requests will not be approved on a retroactive basis. (Refer to the Directory Appendix for contact information.)

The written notice from the provider to RARSS must:

- Indicate the date that the beds will be removed from resident care service and the expected duration of the non-available plan.
- Indicate the reason for the request.
- Include a floor plan of the facility that marks the beds to be designated as non-available.

The RARSS will review the request and provide a written response of approval, denial or a request for additional information. If approved, the RARSS will notify the SSA of the non-available bed designated rooms and effective period.

9.13.C. LIFE OF AN APPROVED PLAN

Beds must remain non-available for not less than the balance of the provider’s fiscal cost reporting year in which the beds are deemed non-available plus the entire following fiscal year. An exception is when the non-available bed plan is effective on the first day of the provider’s fiscal year. The cost report year may qualify as the entire period of the non-available bed plan if the cost report period is not less than twelve months.

Non-available bed designations will be effective on the first day of the month. If the notice is not received within the required 30 calendar day period, the plan will become effective on the first of the month in which RARSS received the notice if the beds have not been utilized during that month.
The initial period of the non-available bed plan expires upon completion of the minimum required period.

The nursing facility may request up to two extensions of 12 months each following this minimum period. The agreement may be extended on the basis of the provider's fiscal year. A request for extension must be submitted in writing to the RARSS 30 calendar days prior to expiration of the initial plan. The request for a second extension must be submitted to RARSS 30 calendar days prior to expiration of the first extension. The requests must include at least one of the following items:

- The same rooms and bed area.
- A revision to bring some, but not all, of the beds back into service (if applicable).
- A revision to increase the number of non-available beds that includes all of the beds already designated as non-available.
- A change in the room and bed designation area that is equal to the number of beds designated as non-available in the initial plan.

Requests for a revision to bring some, but not all, beds back into service must include:

- The same rooms and the same bed area.
- If applicable, the change in room and bed designation area that is equal to the number of beds designated as non-available in the initial plan.

The extensions must meet the elements of the qualifying criteria, notice requirements and related policy for initial non-available bed requests.

Non-available bed plans expiring on or after April 1, 2005 are limited to two 12-month extensions. When a provider's initial or extended non-available bed plan ends, the nursing facility must return the beds to service or decertify the beds from Medicaid participation. Medicaid will not approve a non-available bed plan that substitutes beds elsewhere in the facility for the formerly non-available beds.

The nursing facility will not be eligible to submit a new non-available bed plan for 24 months following the expiration of the previously approved plan.

A provider may only request a grace period after the final extension period if the provider can demonstrate progress to place the non-available beds into resident care service. The request for a grace period must be made to LTC Services 30 calendar days prior to the expiration of the final extension period. (Refer to the Directory Appendix for contact information.) The request for a grace period must be submitted before expiration of the final extension period, and must meet the elements of the qualifying criteria, notice requirements and related policy for initial non-available bed requests. The request must specify the date that the beds will be available for occupancy and may not exceed 12 months. An example for such action is gradual facility renovation involving periodic non-available beds in a nursing unit and replacement with non-available beds in another unit as renovation plans progress.
Nursing facilities holding a written agreement with an accredited medical school instructing students in providing geriatric care may request consideration for an exception to policy in this subsection (Life of an Approved Plan). Requests must be submitted in writing to the MDHHS LTC Reimbursement and Rate Setting Section (RARSS) and should outline the provisions of the agreement, stating that the medical school staff determines admissions into the program and facility. The request must establish an area in the facility that is a distinct unit for the purpose of conducting the educational program, and the area must continue to meet all other non-available bed plan requirements. A copy of the agreement or contract between the facility and the medical school must be provided to RARSS with the exception request. If the agreement or contract undergoes change, a copy of the new terms of agreement must be submitted for approval prior to implementation.

All requests for an exception to policy will include a review of the facility’s historical and current survey performance. Criteria regarding survey history (found in the Criteria for Evaluation of Medicaid Bed Certification Applications subsection of the Nursing Facility Certification, Survey & Enforcement Appendix of this manual) are also applicable to this exception request.

The provider must meet all appropriate certification requirements for distinct part units for the remaining Medicaid beds. Additional beds may have to be decertified in order to meet the distinct nursing unit requirements. The nursing facility may request re-certification of these beds for Medicaid participation after a 24-month period. A request to re-certify must meet all current Medicaid certification requirements.

9.13.D. CHANGE OF OWNERSHIP (CHOW)

The non-available bed plan approval expires with a change of ownership of the nursing facility. If the new owner wishes to continue the non-available bed plan, they must submit a written request to the RARSS within 90 calendar days of the CHOW. A non-available bed plan submitted after the 90-day period will be considered a new request and must satisfy the qualifying criteria and related policy requirements. If the new owner does not request continuation of the existing plan, the beds will be deemed available for occupancy effective with the date of ownership change.

The new owner may apply to extend the plan to coincide with its cost reporting period by following the extension request policy outlined in the Life of an Approved Plan subsection. The nursing facility change of ownership does not relieve the nursing facility from the restrictions for non-available bed designation limitations for plan extensions other than allow for coinciding with the cost report year of the new ownership.

9.13.E. AMENDING A PLAN

The nursing facility may amend an approved non-available beds designation by submitting a written request to the RARSS. (Refer to the Directory Appendix for contact information.) A non-available bed plan may be amended only one time during the life of the non-available bed plan. A request for an amendment must include the same information as an initial request and will be reviewed using the same criteria. A plan amendment increasing the number of non-available beds is subject to the minimum
period requirement and the designation of all the beds must be effective for the period of not less than the balance of the provider's current fiscal cost reporting year in which the beds are deemed non-available plus the following fiscal cost report year.

A nursing facility holding a written agreement with an accredited medical school that instructs students in providing geriatric care may be permitted to amend a non-available plan more than once in the plan’s approved period. Requests to amend a plan under these circumstances must adhere to the requirements outlined in the Life of an Approved Plan subsection of this appendix. As noted, all requests will include a review of the facility’s historical and current survey performance consistent with the Criteria for Evaluation of Medicaid Bed Certification Applications subsection of the Nursing Facility Certification, Survey & Enforcement Appendix of this manual.

9.13.F. PENALTY FOR USE OF NON-AVAILABLE BEDS

Admitting residents to any beds in the area designated non-available for occupancy, regardless of payer source, before the end of the plan negates the non-available bed agreement. All beds covered by a non-available bed agreement that is negated during the initial period of the plan will be considered available for patient care for the plan’s entire initial period.

All beds covered by a non-available bed agreement that is negated during a plan’s extension period will be considered available for patient care beginning with the first day of that cost reporting period of the extension.

9.13.G. RETURNING BEDS TO SERVICE

All of the beds in the non-available bed plan will be considered returned to service and available for occupancy when the non-available bed plan expires.

In special circumstances, such as a sudden increase in demand due to closure of a nearby facility, non-available beds may be returned to service before the end of the approved plan with prior approval of the RARSS. A nursing facility with an approved non-available beds plan may submit a written request to return beds to nursing care if the individual nursing facility experiences the need for the beds due to the exception circumstances. The request must identify the reason for the need and the specific beds and room designations being made available. RARSS will provide immediate review and response to the nursing facility request.
9.13.H. PLANT COST CERTIFICATION

A provider with an approved non-available beds plan has the option to submit to a Plant Cost Certification for the cost report fiscal period in which the beds are approved as non-available for occupancy or the termination of the plan. Refer to the Plant Cost Certification Section in this appendix for additional information.

9.13.I. COST REPORTING

The variable and plant costs attributed to the area designated as non-available and the related capital asset cost are not Medicaid reimbursable costs. The non-available rooms and bed numbers must be reported as a Non-Available Beds cost center on the provider’s Medicaid cost report.

Each general service cost center must be evaluated separately to determine if the non-available bed area benefits from the service. The nursing facility may charge specific costs to the Non-Available Beds cost center only when the dollar amount is identifiable. Costs that cannot be specifically identified must be apportioned to the non-available beds cost center using the Medicaid cost report allocation methodology. The statistic or measure used for the general services cost center must also be used to allocate costs to the non-available bed cost center.

**Example:** If square feet are used to allocate costs to the housekeeping activity, the general services cost center, then square feet must also be used to allocate costs to the non-available bed area. The allocation to the non-available bed cost center is zero when the non-available bed area receives no benefit from the general service.

**Example:** If a wing is designated as non-available and does not receive any housekeeping services, then the allocation to the non-available cost center is zero.

The reduction in available beds is included in the provider’s cost report effective for the fiscal period in which the non-available bed plan is approved by the RARSS. For Medicaid reimbursement determination of tenure and allowable average borrowings, the percentage of the total plant asset costs applicable to available beds must equal the percentage of the facility remaining available for resident nursing care.

9.14 COMPLEX CARE

Medicaid-approved complex care cases provide an enhanced reimbursement rate to the facility due to the cost and/or complexity of nursing care or special needs of the beneficiary. Separate cost records are not required for identifying these costs. The Program has designated the special care revenue amount equal to cost. Providers with an approved complex care case must adjust the annual Medicaid cost report by removing the dollar amount of the total difference between reimbursement at the complex care rate and the established routine Medicaid rate from the appropriate nursing care costs. The approved complex care rate is identified on the Complex Care Prior Approval-Request/Authorization for Nursing Facilities form (MSA-1576) issued to the facility for the specific beneficiary.
9.15 QUALITY MEASURE INITIATIVE (QMI) SPECIAL COST REPORTING REQUIREMENTS

The nursing facility QMI provides payments to facilities based on their average quality measure domain rating on the Nursing Home Compare (NHC) website. For additional information about the QMI, refer to the Nursing Facility Quality Measure Initiative (QMI) subsection of the Rate Determination section of this Appendix.

The Quality Assurance Assessment Program (QAAP) tax levied for the QMI and the payment amount of the QMI are to be reported on the cost report the year they are applicable and in the following manner:

- The QAAP tax assessed during the cost reporting period is to be reported on the "Quality Measure Initiative Assessment" line of the cost report under the Administrative & General cost center.
- The amount of QMI payments in a cost reporting period are to be reported on the "Quality Measure Initiative Payment" line of the cost report under Routine Services Revenue.

The QAAP tax assessed is adjusted from the cost report in accordance with the Quality Assurance Assessment Tax subsection of the Allowable and Non-Allowable Costs section of this Appendix. An adjustment is also made to the cost report to remove the Net QMI Amount. The QMI adjustment may not exceed zero (i.e., the adjustment is either a negative amount or zero), and the adjustment amount is made to "Miscellaneous – Base" in the Medicaid Routine Care Unit #1 and Medicaid Routine Care Unit #2 cost center of the cost report.

Example: Facility A had $150,000 in QMI QAAP tax assessed and $250,000 in QMI payments during their 2019 cost reporting period, so Facility A would apply a -$100,000 adjustment to the "Miscellaneous – Base" line in the Medicaid Routine Care Unit #1 cost of their 2019 cost report.

Example: Facility B had $150,000 in QMI QAAP tax assessed and $100,000 in QMI payments during their 2019 cost reporting period, so Facility A would not apply an adjustment to the "Miscellaneous – Base" line in the Medicaid Routine Care Unit #1 cost of their 2019 cost report.
SECTION 10 - RATE DETERMINATION

There are six classes of nursing care facilities for which there are specific reimbursement methods. For a definition of the six classes, refer to the Definitions section in this appendix. Providers reimbursed for care using a special reimbursement calculation or method are addressed at the end of this section.

The determination of a nursing facility's class is made by the SSA. If a nursing facility changes ownership or the services it provides such that a change in class is appropriate, the facility will be reimbursed according to the respective facility class to which it has been changed. The effective date of the reimbursement change is the effective date of the SSA's determination. Nursing facility providers other than Class IV are reimbursed under a methodology that pays the lower of the customary charge to the general public or a prospective payment rate determined by Medicaid.

Payment rates described in this section refer to the provider's prospective per resident per diems and are generally set 30 calendar days in advance of the State's fiscal year, which is October 1 through September 30. (Rate determination timing is dependent on legislative approval of the MDHHS budget.)

NOTE: An illustration of the timeline and calculations for per diem rate setting is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

Prospective payment rates are calculated using the facility's cost report ending in the previous calendar year. If the cost reporting period of the Medicaid routine unit is less than seven months, the cost report used for rate setting is the most recent cost report available prior to the previous calendar year that covers a period of at least seven months. The cost reporting period may only cover dates the facility was enrolled in Medicaid and averaged six or more Medicaid residents per day.

The reimbursement rate determination process uses a provider's most recent fiscal period audited cost data to calculate the routine nursing care per diem rate. If audited data is not available, an interim prospective rate is calculated using the filed cost report, if the cost report was acceptable and was filed with Medicaid within five months from the end date of the cost reporting period. If an acceptable cost report was not filed within this period, Medicaid is not required to set the prospective payment rate in advance of the State's fiscal year. If the nursing facility did not file within the five month period, or has amended an original cost report subsequent to the five month period, Medicaid will calculate the prospective rate for an effective date for services no later than the beginning of the fourth month (January 1) of the State fiscal year. Nursing facilities that are required to file an amended cost report in order to include home office costs that were not included in the original cost report due to the difference in cost reporting period from the home office are exempt from this provision. The amended cost report, if filed timely following the completion of the home office cost statement, will be considered filed timely if the original cost report had met the five month filing requirement. Refer to the Cost Classification and Cost Finding section of this appendix for home office cost statement and nursing facility amended cost reports.

10.1 RATE DETERMINATION PROCESS

The per diem reimbursement rate for Class I and Class III nursing facility providers is made up of three components: a plant cost component, a variable cost component, and add-ons.
For Class I facilities, the plant cost component is made up of the Property Tax/Interest Expense/Lease Component plus the Return on Current Asset Value Component.

For Class III facilities, the Plant Cost Component is the lesser of the Facility Per Patient Day Plant Cost or the Facility Plant Cost Limit. The Facility Plant Cost Component is the depreciation, interest and lease expenses calculated on a per patient day basis.

For Class I and Class III facilities, the Variable Cost Component is made up of the facility’s Variable Rate Base plus the Economic Inflationary Update.

Class II facilities, being proprietary nursing facilities for individuals with mental illness or intellectual disability, are reimbursed an all-inclusive prospective payment rate negotiated with the MDHHS State Mental Health Agency on an annual basis. Final reimbursement is a retrospective cost settlement, not to exceed a ceiling limit. The provider may be eligible for a reimbursement efficiency allowance in the final rate if total allowable costs do not exceed the prospectively established ceiling limit.

Class IV facilities, being state-owned and -operated institutions, Intermediate Care Facilities for Individuals with Intellectual Disabilities (Developmentally Disabled), and non-profit nursing facilities for individuals with intellectual disabilities, are reimbursed allowable costs determined in accordance with Medicare Principles of Reimbursement and are retrospectively cost settled.

Per diem rates for Class V facilities, Ventilator Dependent Care Units, are set prospectively. Services included in the per diem rate are outlined by contract with Medicaid.

Payment rates for Class VI Hospital Swing Beds are set prospectively as a flat per resident day rate determined by Medicaid.

**10.2 RETROACTIVE RATE CHANGES**

A retroactive rate change may be made for facilities that have interim prospective rates based on filed cost reports. Retroactive rate changes may be made for, but are not limited to, the following:

- audit adjustments to a filed cost report that was used for setting an interim rate;
- facilities that filed timely and were approved for Plant Cost Certification due to capital cost changes, an approved non-available bed plan, a plant rate affected by a DEFRA rate limitation for the cost report period, or when an interim rate was incorrectly calculated;
- audit adjustments that are required because of an appeal;
- audit adjustments that are required because of fraud or facility failure to disclose required financial information; and
- Class I nursing facilities approved for Rate Relief for the rate year period.

The Plant Cost Component of a rate for the nursing facility that experiences a change of ownership will be retroactively adjusted under the Plant Cost Certification process. The DEFRA Reimbursement Limit application will continue to apply to each rate year until a fiscal year retrospective rate change results in zero DEFRA limit. The nursing facility Plant Cost Component will be calculated on a prospective basis for the year following the zero DEFRA limit rate year.
10.3 PLANT COST COMPONENT CLASS I NURSING FACILITIES

The prospectively established Plant Cost Component for each Class I nursing facility provider is the sum of the facility Net Property Tax/Interest Expense/Lease Component and Return on Current Asset Value Component. The Plant Cost Component is expressed as a per patient day amount.

10.3.A. NET PROPERTY TAX/INTEREST EXPENSE/LEASE COMPONENT PER PATIENT DAY

The Net Property Tax/Interest Expense/ Lease Component per patient day is calculated under the following formula:

\[
\text{Net Property Tax/Interest Expense/ Lease Plant Cost} = \text{Property Tax/Interest Expense/Lease Plant Cost} - \text{CAV Excess Borrowings Limit} + \text{DEFRA Reimbursement Limit (not to exceed zero)}
\]

\[
\text{Net Property Tax/Interest Expense/ Lease Plant Cost Per Patient Day} = \frac{\text{Net Property Tax/Interest Expense/Lease Plant Cost} + \text{Nursing Facility Resident Days}}{\text{Nursing Facility Resident Days}}
\]

10.3.A.1. PROPERTY TAX/INTEREST EXPENSE/LEASE PLANT COSTS

These plant costs consist of allowable costs for real estate and personal property taxes, interest expense, and lease expense defined under the Allowable and Non-Allowable Cost section and the Cost Classification section of this appendix. The aggregate dollar amount for these plant costs is obtained from the nursing facility cost report. The period of the cost report will correspond with the cost basis period identified for the respective State rate year.

10.3.A.2. CAV EXCESS BORROWINGS LIMIT

The CAV excess borrowings limit is unreimbursable interest due to excess borrowings. An example of the calculation is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

The dollar amount of allowable interest expense included in the reimbursable plant cost will be reduced if the nursing facility loan balance applicable to the nursing care unit exceeds the facility reimbursement limit. The nursing facility's average allowable borrowing balance cannot exceed the lesser of the "Nursing Facility Current Asset Value" or the "Nursing Facility Capital Asset Value Limit." If the nursing facility borrowing balance exceeds the limit, a reduction is made to the allowable plant cost for the portion of the excess borrowing. The amount of the reduction is based on the ratio of the limit amount to the average borrowings balance times the dollar amount of allowable interest expense. The following formula is applied to calculate the reduction:
A nursing facility that has undergone a change of ownership and is incurring interest costs relating to the acquisition financing will be subject to a DEFRA Reimbursement Limit disallowance. The DEFRA Reimbursement Limit calculation will determine if the nursing facility acquisition and financing costs exceed the Medicaid allowable reimbursement increase limit. Reductions to the facility total borrowing balance are made to avoid including the borrowings balance in the reimbursable interest, and to avoid including the total allowable interest expense amount in both the DEFRA limit and the CAV excess borrowing limit.

If the nursing facility has a DEFRA Reimbursement Limit due to the nursing facility acquisition, the nursing facility's total average borrowing balance used in the calculation for CAV excess borrowings limit will be reduced by a calculated dollar amount of borrowings corresponding with the DEFRA Reimbursement Limit. The borrowing amount corresponding with the DEFRA Reimbursement Limit is calculated under the following formula:

\[
\text{Dollar Amount of DEFRA Reimbursement Limit} \div \text{Nursing Facility Total Allowable Interest Expense} \times \text{Nursing Facility Total Borrowing Balance} = \text{Reduction to NF Average Borrowing Balance}
\]

### 10.3.A.3. DEFRA REIMBURSEMENT LIMIT

Increases in reimbursement for tenure and interest expense subsequent to a sale or resale (after July 18, 1984) are limited under provisions of the Deficit Reduction Act (DEFRA) of 1984 as defined in federal Medicaid law. The Medicaid application of DEFRA provisions is a limit on the dollar amount of plant cost component reimbursement increase to the provider due to the nursing facility change of ownership. An established formula calculation is used to determine the new ownership's eligible increase reimbursement for tenure and interest (DEFRA Application Limit). If the new ownership tenure and interest increase before application of the DEFRA Reimbursement Limit does not exceed the DEFRA Application Limit, the DEFRA Reimbursement Limit is not applicable. If the new ownership tenure and interest increase before application of the DEFRA Reimbursement Limit exceeds the DEFRA Application Limit allowable increase, the DEFRA Reimbursement Limit reduction will be made to the allowable plant costs.
The calculation is made as follows:

\[
\text{DEFRA Application Limit} - \text{Increase in tenure and interest for new ownership prior to DEFRA Limit} = \text{DEFRA Reimbursement Limit (not applicable if greater than zero)}
\]

DEFRA Application Limit is determined as:

\[
\text{Allowable historical capital asset cost to the asset original owner (excluding land) for assets in the NF at the time of sale} \times 3.33\% + \text{Allowable land value to the seller} + \text{Historical capital asset cost of the asset's original owner for assets in the nursing facility at the time of sale} - \text{Purchaser down payment} \times \text{Purchase Mortgage interest rate} - \text{Allowable interest expense of the seller for the rate period prior to the sale} = \text{DEFRA Application Limit}
\]

For purposes of the DEFRA Reimbursement Limit calculation, allowable acquisition cost is the cost to the original owner of the asset. An example of this calculation is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

Increase in tenure and interest for the new ownership prior to DEFRA Limit is determined as:

\[
\text{Purchaser tenure and allowable interest after acquisition} - \text{Seller tenure and allowable interest in the Medicaid rate prior to the sale} = \text{Increase in tenure and interest for new ownership prior to DEFRA Limit}
\]

The calculation formula is defined for application when using annualized cost data (reflective of 12-month period). Tenure refers to the purchaser's initial ownership year. Allowable interest refers to interest associated with a facility acquisition. If all of the data elements needed in the calculation do not include data for a 12-month period, the data
elements must be adjusted to reflect a period of equal duration to the cost report base period used in determining the "purchaser tenure and allowable interest after the sale."

The DEFRA Reimbursement Limit continues to apply to the new ownership annual Property Tax/Interest Expense/Lease Component rate using the Plant Cost Certification reimbursement settlement procedure until the limit amount is zero.

**10.3.B. RETURN ON CURRENT ASSET VALUE (CAV) COMPONENT**

The Return on Current Asset Value Component is a per resident day amount representing a use allowance on facility assets. The return amount is determined by multiplying the "tenure factor" times a CAV calculated for the nursing facility. A nursing facility's CAV is determined by a formula using historical costs of the nursing facility's capital assets, as identified in the Allowable and Non-Allowable Costs section in this appendix, times the difference between an asset value update factor and an obsolescence factor. Assets purchased prior to 1960 are treated as assets brought into service in 1960. A nursing facility's CAV for rate reimbursement calculation cannot exceed the "current asset value upper limit" and will not be less than the "current asset value floor."

The calculation for the return on current asset value component is:

\[
\text{Lesser of NF CAV or NF CAV Limit} \times \text{Tenure Factor} = \text{Total NF Return on CAV}
\]

\[
\text{Total NF Return on CAV} ÷ \text{NF Resident Days} = \text{Return on CAV Component Per Resident Days}
\]

**10.3.B.1. ASSET VALUE UPDATE FACTOR**

The asset value update factor used to calculate CAV depends on the type of capital asset. Land improvements, buildings, building improvements, and fixed building equipment are updated using a construction cost index for steel frame buildings in the central United States from the fiscal year the asset was brought into service until the most recent period for which cost report data is available for the respective rate year calculation. The asset value update factor is not applied to land and other assets not specifically listed above.

**10.3.B.2. ASSET VALUE OBSOLESCENCE FACTOR**

The obsolescence factor is applied based on the classification category of the capital asset. Land has an obsolescence factor of zero. Land improvements, buildings, building improvements, and fixed building equipment have an obsolescence factor of .03 for each year the asset has been in service. Movable equipment and other capital assets have an obsolescence factor of .10 for each year the asset has been in service up to a maximum of 10 years. The number of years that the asset has been in service is determined by subtracting the year the asset was put into service from the most recent fiscal year for which data is available under the standard rate setting timeframe.
10.3.B.3. CURRENT ASSET VALUE FORMULA

A nursing facility's CAV is determined by a formula using historical costs of capital assets. The current asset value for each asset is the historical cost of that asset times the difference between its Asset Value Update Factor and its Asset Value Obsolescence Factor. Assets purchased prior to 1960 are recorded as assets brought into service in 1960. Current asset values are updated annually based on the most recent audited or reviewed cost report. A nursing facility's current asset value is the sum of current asset values for the various asset types.

Example: Building assets with historical cost of $100,000 in service for 10 years through the cost report year used in the rate calculation; the update factor for the 10 years is 1.50; the obsolescence factor is .30 (10 years times .03); the amount included in the CAV compilation for the nursing facility for these assets is $120,000 [$100,000 times (1.50 minus .30)].

If the nursing facility Plant Cost Component is calculated based on Plant Cost Certification data, the new capital assets acquired in the current cost report year and the immediate prior cost report year will be included in the nursing facility historical asset costs for compiling the CAV. The update factor for these assets will be 1.0, and the obsolescence factor will be zero.

10.3.B.4. NURSING FACILITY CURRENT ASSET VALUE

The current asset value calculation process determines the CAV for the entire nursing facility since capital assets are used for all types of service delivery in that facility. Only the portion of the nursing facility assets having a use related to routine nursing resident care are included for reimbursement under the return on current asset value component. The reference to Nursing Facility CAV is defined as the nursing unit portion of the nursing facility's total current asset value applicable to routine nursing care. The apportionment, expressed as a percentage, of a total facility that is applicable to the routine nursing care unit is determined by means of the facility's annual cost report. The SMA cost reporting process apportions the nursing facility asset costs into the appropriate cost centers for reimbursement purposes.

The Nursing Facility CAV is calculated as:

$$\text{Total CAV for the NF} \times \frac{\text{Percentage representing the nursing unit apportionment}}{} = \text{NF CAV}$$

10.3.B.5. CLASS I NURSING FACILITY CURRENT ASSET VALUE LIMIT PER BED

The current asset value upper limit is a maximum per bed dollar amount that will be used for calculating the individual Nursing Facility CAV. The per bed value of the upper limit is based on the historical costs of construction and other asset acquisition costs for nursing facilities opened on or after January 1, 1975. The historical costs are updated through
1983 using the U.S. Department of Commerce Composite Construction Index, and annual updates after 1983 are made using a construction cost index for steel frame buildings. The update index does not apply an obsolescence factor. The current asset value limit is the sum of the updated historical costs for the facilities included in this calculation divided by the total number of beds in those facilities. The current asset value limit is recalculated annually to include construction costs of new facilities reported on the most recent calendar year filed cost report and the construction index update. The per bed upper limit is effective for the period corresponding to the State rate year.

The current asset value floor is 30 percent of the current asset value upper limit.

Class I nursing facility current asset value limits per bed for each rate year are available on the MDHHS website. Refer to the Directory Appendix for website information.

**10.3.B.6. NURSING FACILITY CURRENT ASSET VALUE LIMIT**

A current asset value limit is determined by the individual nursing facility and is dependent on the number of beds in the Medicaid nursing unit for the period corresponding with the respective rate effective date. The current asset value upper limit is a maximum dollar amount for the individual Nursing Facility CAV that will be used for calculating the return on current asset value. The Nursing Facility CAV Limit is the number of available beds in the nursing unit times the Class Current Asset Value Limit Per Bed.

The current asset value floor limit is a minimum dollar amount for CAV that will be used for calculating the return on current asset value for that nursing facility. The individual Nursing Facility CAV floor is the Nursing Facility CAV Limit times 30 percent.

**10.3.B.7. TENURE FACTOR**

The tenure factor is dependent on the nursing facility provider's number of full years of continued Medicaid certification as of the beginning of the Medicaid rate year (i.e., months of continuous Medicaid certification divided by 12 and disregarding fractions). The continuous Medicaid certification is based on the current ownership of the nursing facility.

Continued Medicaid certification is based on the number of full years that have elapsed from the effective date of a provider's initial Medicaid certification to the beginning of the Medicaid rate year. For example, a provider that has been Medicaid certified for 42 continuous months has, for purposes of the tenure factor, been certified for three full years. The provider's years of ownership are translated into a tenure rate, and applicable rates are identified in the following table.

<table>
<thead>
<tr>
<th>Years of Ownership at Start of Provider Fiscal Year</th>
<th>Rate of Return on Current Asset Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>0-1</td>
<td>.0250</td>
</tr>
<tr>
<td>2</td>
<td>.0275</td>
</tr>
</tbody>
</table>
The rate of return on current asset value is expressed as an annual return rate. Qualification for the total return rate requires that the period included in the nursing facility cost report used as the basis for the facility plant cost rate include twelve calendar months. In cases where the nursing facility cost report does not include twelve calendar months, the following formula is used to calculate the return rate:

\[
\text{Return Rate} = \frac{\text{Number of calendar days in the cost report period}}{365} \times \text{Rate of return on CAV (for the respective years of ownership)}
\]

**Example:** A nursing facility has seven years of ownership and the cost report period used for plant costs in the rate calculation is for a nine-month period (275 days). The adjusted return rate is .030 (275/365 times .0400).

If a nursing facility is sold or totally replaced (regardless of facility ownership), years of ownership return to zero. If a facility is remodeled or expanded and facility ownership remains unchanged, the years of ownership remain continuous.

When licensure has changed but there has been no effective change in operator/provider, and there has been no transaction that would affect Medicaid reimbursement other than the tenure factor, the provider may request that Medicaid recognize the continuous tenure such that the tenure schedule would not revert to zero years at the time of the licensure change. The provider’s written request must be submitted at the time licensure is changed.

**Exception:** Where licensure does not change after a sale of nursing facility assets, the nursing facility provider (new owner) must choose either to retain the original tenure schedule and forego increased reimbursement for interest expense, or to receive...
increased reimbursement for interest expense, subject to the DEFRA Reimbursement Limit, and allow the tenure schedule to revert to zero years and a tenure factor of .0250. Should the provider elect to retain the previous tenure schedule, Medicaid will not recognize, for allowable cost and per diem rate determination purposes, any interest expense beyond the schedule of borrowings, principal amortization, and interest expenses that would have been incurred were the former owner’s loans maintained or assumed by the new owner. This provision applies to all property transactions between lessors, lessees, and/or operators.

10.4 PLANT COST COMPONENT CLASS III NURSING FACILITIES

The prospectively established plant cost component for each county medical care facility provider and hospital long term care unit provider is the lesser of the allowable per resident day facility plant cost or the per resident day facility plant cost limit. Proprietary providers are permitted to retain, as part of the plant cost component, up to $.50 of the difference between allowable per resident day plant costs and the per resident day plant costs in effect on March 31, 1985 ($5.66 per resident day).

10.4.A. FACILITY PLANT COST PER RESIDENT DAY

The allowable per resident day plant cost is the sum of depreciation expense, interest expense, property taxes, and allowable lease costs divided by total resident days as determined from the provider’s cost report. A facility with a change in facility asset costs may qualify for plant cost limit updates.

10.4.B. FACILITY PLANT COST LIMIT PER RESIDENT DAY

The individual provider facility Plant Cost Limit is dependent upon when facility beds were constructed and brought into service for Medicaid residents. Nursing facilities existing prior to July 1, 1978 were initially assigned the facility Class Plant Cost Limit for new construction as of that date. A nursing facility constructed after that date is initially assigned the facility Class Plant Cost Limit effective in the year facility beds are constructed and brought into service for Medicaid.

A facility’s Plant Cost Limit, expressed as per resident day, is the sum of the per resident day component limits for depreciation expense, interest expense, financing fees and property taxes. The individual nursing facility Plant Cost Limit is updated for a nursing facility that undergoes a significant change in facility asset costs. The nursing facility must meet the filing requirements and complete the plant cost certification process to qualify for consideration of the update to the individual facility plant cost limit. A plant cost certification filed after the applicable period’s cost report will not be accepted for calculation of an updated facility plant cost limit. The provider must meet the qualifying provisions for Plant Cost Certification eligibility, other than non-available bed designation or returning non-available beds to service, to be eligible for a revised plant cost limit. The non-available bed plan designation criteria does not qualify the nursing facility for an update to the facility plant cost limit. An existing provider with a change of facility class, major addition, renovation or new construction may be eligible for a Plant Cost Limit update to reflect the change in facility asset costs. An existing facility that chooses to become a Medicaid-participating provider may also qualify for an updated plant cost limit.
The updated plant cost limit is applicable to a nursing facility dependent upon the facility’s capital asset project. A nursing facility that is a total new construction, a facility that incurs major capital asset renovation and/or addition, a facility newly participating in the Medicaid program, or a facility that experiences a change in facility class are eligible for updated depreciation, interest, finance fees and property tax components for the facility Plant Cost Limit. The update in the limit is based on a compilation of the facility limit prior to the capital asset change and the Class Plant Cost Limit.

The individual facility updated Plant Cost Limit effective with the completion of the capital asset project is a weighted average of the historic individual facility Plant Cost Limit for the portion of the facility prior to the new construction, addition or renovation project and the current Class Plant Cost Limit applicable to the new capital asset project. The weighting factors used are the respective ratios of the allowable historic asset costs of the facility prior to the new construction addition or renovation project, and the allowable asset costs of the new capital asset project, to the combined allowable old and new asset costs of the nursing facility after completion of the capital asset project. The current Class Plant Cost Limit used in the weighted calculation applicable to the new capital cost portion will be the class limit in effect for the year corresponding to the new asset acquisitions being placed into service.

Nursing facility providers that incur a capital asset change resulting from a facility sale of assets will use, as a plant cost basis, only those allowable costs identified in the Allowable and Non-Allowable Costs section in this appendix. The individual nursing facility updated Plant Cost Limit after the sale is only eligible for an update for the interest expense component limit to reflect changes in interest rates.

10.4.C. FACILITY CLASS PLANT COST LIMIT PER RESIDENT DAY

The Class Plant Cost Limit is the maximum reimbursement rate, expressed as per resident day amount, for a nursing facility's new construction. The Class Plant Cost Limit is applicable to new construction nursing facilities dependent upon when facility beds were constructed and brought into service for Medicaid residents. The Class Plant Cost Limit is the sum of the per resident day component limits for depreciation expense, interest expense, financing fees and property taxes. The Class Plant Cost Limit components are updated annually to reflect changes in industry construction cost, interest rates and corresponding effect on financing fees and real estate taxes due to changes in capital costs. The new construction limit is used in determining the individual nursing facility limit in cases where the nursing facility is an entire new construction or an existing nursing facility has completed a significant capital improvement.

The per resident day Class Plant Cost Limit is the amount that would be paid for a recently constructed and prudently financed facility. Calculation of the plant cost limit is based on a survey of nursing facilities constructed between January 1, 1975 and December 31, 1977, and initially updated to June 30, 1978. The original Class Plant Cost limit individual components are updated annually using published economic indicators identified in the subsections addressing the specific component of the limit. The Class Plant Cost Limit annual updates are available on the MDHHS website. (Refer to the Directory Appendix for website information.)
10.4.C.1. FACILITY CLASS PLANT COST LIMIT DEPRECIATION EXPENSE COMPONENT

The value for the depreciation expense component is a sum based on the mean of the surveyed values of depreciable assets (referenced above) and the mean depreciation rate for assets of similar type using straight-line depreciation with useful lives determined in accordance with Medicare Principles of Reimbursement. The per resident day depreciation expense component is updated each calendar quarter to reflect the change in costs of construction and changes in standards and regulations which have a direct impact on plant costs. The depreciation component is updated using the economic index release as published under U.S. Department of Commerce, Bureau of Economic Analysis, National Income and Product Accounts Tables for Nonresidential Structures.

10.4.C.2. FACILITY CLASS PLANT COST LIMIT INTEREST EXPENSE COMPONENT

The value for interest expense is based on the surveyed mean of interest rates paid (referenced above) and the mean asset values for facilities constructed during the initial three-year survey period. The per resident day interest component is updated annually based on the changes in interest rates. The interest rate data used to calculate the interest component limit is updated by applying an index of change in interest rates for home mortgage loans (reflected in conventional new home mortgage rates, as published by the Federal Housing Finance Board for Newly Built Homes) to the interest rate used to calculate the original interest component limit.

A nursing facility that undergoes a change of ownership is eligible for an update to the individual facility Plant Cost Limit. The update will only include an adjustment to the interest component of the individual facility Plant Cost Limit in effect prior to the sale. The adjustment will be made to the interest component of that prior limit to reflect the change in the interest rate index between the period reflected in the prior limit calculation and the date of the facility sale.

10.4.C.3. FACILITY CLASS PLANT COST LIMIT FINANCING FEES COMPONENT

The value for financing fees is based on the mean of financing fees of the surveyed construction (referenced above). The per resident day financing fees component limit is updated using the same update factor used for the depreciation expense component limit update. The update factor is applied to the original financing fees component limit.

10.4.C.4. FACILITY CLASS PLANT COST LIMIT TAX EXPENSE COMPONENT

The value for property taxes is based on the mean of property taxes of the surveyed taxable properties (referenced above). The per resident day property tax component limit is updated using the same update factor used for the depreciation expense component limit update. The update factor is applied to the original property tax component limit.
10.5 VARIABLE COST COMPONENT (VCC) – CLASS I AND CLASS III FACILITIES

The variable cost component of the nursing facility per resident day rate reflects the Medicaid determination for reimbursement for the nursing facility base and support costs incurred for routine nursing care. Base and support cost classifications are discussed in detail in the Cost Classifications and Cost Finding subsection of this appendix. The calculation of the component uses nursing facility historical costs and economic index application to adjust cost levels to coincide with the State rate year periods. The support costs and total variable (base plus support) costs are separately subjected to rate ceiling reimbursement limits dependent on individual facility bed size and facility class.

For Class I and Class III nursing facility rate setting periods beginning on or after October 1, 2003, the Variable Cost Component is a per resident day rate and is equal to the lesser of the facility's Variable Rate Base (VRB) or the Class Variable Cost Limit (VCL), plus the Economic Inflationary Update (EIU).

\[
VCC = (\text{lesser of VRB or Class VCL}) + \text{EIU}
\]

10.5.A. VARIABLE RATE BASE (VRB)

The facility Variable Rate Base is the sum of the facility's indexed base cost component and the facility's indexed support cost component. For rate setting purposes, the per resident day amount used for the provider's Variable Rate Base is the lesser of the calculated Variable Rate Base or the Class Variable Cost Limit.

\[
VRB = \text{Base Cost Component} + \text{Support Cost Component}
\]

10.5.A.1. BASE COST COMPONENT (BCC)

A facility's BCC is the facility per patient day allowable base costs indexed to October 1 of the year that is one year prior to the rate year being calculated.

\[
BCC = \left( \frac{\text{base costs}}{\text{total number of resident days}} \right) \times \text{Cost Index}
\]

- Facility's base cost per day - the facility base costs divided by the total number of resident days for the cost reporting period.

10.5.A.2. SUPPORT COST COMPONENT (SCC)

A facility's support cost component is the facility's BCC multiplied by the lesser of the facility's support-to-base ratio or the support-to-base ratio limit for that nursing facility bed-size group.

\[
SCC = BCC \times \text{applicable S/B ratio (Facility or Bed-Size Group Limit)}
\]

- Facility's support cost per day - the facility support costs divided by the total number of resident days for the cost reporting period.

- Facility Support-to-Base Ratio (S/B-Facility) - the nursing facility's allowable support costs divided by the allowable base costs for the cost reporting period. The individual provider's S/B ratio for rate calculation is limited to the Support-to-Base Ratio Bed Size Group Limit for the provider's bed-size group. The individual nursing facility bed-size group classification is based on the number of nursing home licensed beds, Home for the...
Aged beds, or any other type of licensed beds where nursing care is provided. The provider's S/B ratio is rebased annually from the most recent audited cost period, regardless of ownership.

- Support-to-Base Ratio – Bed Size Group Limit (S/B-Group) – the 80th percentile of the support-to-base ratios for nursing facilities in the same bed-size group for a cost reporting year. The bed-size groups are defined as 0-50, 51-100, 101-150, and 151+ nursing care beds in the nursing facility. The nursing facility bed-size group classification is based on the number of nursing home licensed beds, Home for the Aged beds, or any other type of licensed beds where nursing care is provided. The 80th percentile is determined by rank ordering the provider nursing facilities within the same bed-size group from the lowest to highest S/B ratio, then accumulating nursing facility Medicaid resident days of the rank ordered providers, beginning with the lowest, until 80 percent of the total Medicaid resident days for this group of providers is reached. The S/B ratio limit for the bed-size group equals the support-to-base ratio of the nursing facility in which the 80th percentile of accumulated Medicaid days occurs.

10.5.B. COST INDEX (CI)

A facility cost index is the Global Insight's Skilled Nursing Facility Market Basket Without Capital Index, which is published quarterly in the Global Insight DRI-WEFA Health Care Cost Review. The cost index will be used to index reported costs from the end of the facility's cost report period to October 1 of the year that is one year prior to the rate year being calculated.

Example: Cost report data used to set reimbursement rates for the October 1, 2018 to September 30, 2019 rate year will be indexed to October 1, 2017.

10.5.C. CLASS AVERAGE VARIABLE COSTS (AVC)

The Class Average Variable Cost is defined as the total indexed variable costs for all facilities in the Class divided by the total resident days for all facilities in the class for a cost reporting year. An AVC is calculated for Class I and Class III nursing facilities. The Class AVC is used for rate calculations for nursing facilities that meet the qualifying criteria as a new provider for Medicaid participation and determining provider eligibility for Class I nursing facility rate relief.

\[
\text{AVC} = \frac{\text{total Indexed Variable Costs for all NF's in the class}}{\text{total resident days for all NF's in the class}}
\]

- Facility's Variable Costs (VC) - the total allowable base and support costs for a facility to provide routine nursing care services to residents, as determined in accordance with Medicaid allowable costs and reporting requirements.
- Indexed Variable Costs (IVC) – the facility's total VC indexed to October 1 of the year that is one year prior to the rate year being calculated.

Example: The AVC for October 1, 2018, which is used for the rate year October 1, 2018 to September 30, 2019, is based on variable costs reported in cost reports ending in calendar year 2017 indexed to October 1, 2017.
10.5.D. CLASS VARIABLE COST LIMIT (VCL)

The Variable Cost Limit for a class of nursing facilities is set at the 80th percentile of the Indexed Variable Costs (IVC) per resident day for facilities in the class during the current calendar year. The 80th percentile is determined by rank ordering providers from the lowest to the highest IVC per resident day, then accumulating nursing facility Medicaid resident days of the rank ordered providers, beginning with the lowest, until 80 percent of the total Medicaid resident days for the facility class of providers is reached. The VCL for the class of providers equals the IVC per resident day of the nursing facility in which the 80th percentile of accumulated Medicaid resident days occurs. A VCL is calculated for Class I and Class III nursing facilities.

- Facility’s Variable Cost per resident day (VC/pd) - the facility VC divided by the total number of resident days for the cost reporting period.
- Indexed Variable Costs Per Resident Day (IVC/pd) – the facility’s VC/pd indexed to October 1 of the year that is one year prior to the rate year being calculated.

Example: The VCL for October 1, 2018, which is used for the rate year October 1, 2018 to September 30, 2019, is based on variable costs per resident day reported in cost reports ending in calendar year 2017 indexed to October 1, 2017.

10.5.D.1. CLASS I NURSING FACILITY VCL EXCEPTION – NEW PROVIDER RATE RELIEF

A Class I nursing facility that qualifies for rate relief as a new provider, as defined for rate relief, in a Medicaid enrolled nursing facility with a VRB less than or equal to 80 percent of the class AVC will have an exception VCL in the rebasing rate year. The rate Variable Cost Component for the initial rate year of accelerated rebasing is limited to the Class I Average of Variable Costs. Refer to the Rate Relief for Class I Nursing Facilities subsection in this appendix for additional information.

10.5.D.2. CLASS III NURSING FACILITY VCL EXCEPTION – NEW HOSPITAL LONG TERM CARE UNITS AFTER JULY 1, 1990

Class III nursing facilities that are new long term care units of a hospital, and have a Certificate of Need (CON) approval from the Michigan Department of Health and Human Services (MDHHS) [formerly Michigan Department of Community Health (MDCH) and Michigan Department of Public Health] dated on or after July 1, 1990, are reimbursed according to the method for Class III facilities except that the facility Variable Cost Component is determined as the lesser of the facility Variable Rate Base or the Class I Variable Cost Limit (VCL).

10.5.E. ECONOMIC INFLATIONARY UPDATE (EIU)

The economic inflationary update for a facility is the Economic Inflation Rate (EIR) for the class applied to the lesser of the Variable Rate Base or the Class Variable Cost Limit.

$$EIU = EIR \times (\text{lesser of VRB or Class VCL})$$
Economic Inflation Rate (EIR) - the State legislative appropriations process will determine the annual economic inflation percentage for Class I and Class III nursing facilities.

10.6 CLASS V NURSING FACILITIES – VENTILATOR DEPENDENT CARE (VDC) UNITS

The reimbursement rate for special nursing facilities caring for ventilator-dependent residents (Class V) is set prospectively by Medicaid as an individual nursing unit rate per resident day and is based on actual occupancy.

Reimbursement is made for prior authorized ventilator-dependent services/care for residents who have been transferred to a Medicaid contracted facility. The prospective rate covers all ventilator care requirements of the residents, including all the costs of benefits associated with Medicare Parts A and B while the resident resides in the special nursing facility. This includes, but is not limited to, all routine, ancillary, physician, and other services.

Factors used in the determination of the per diem rate include audited costs of facilities providing similar services, the inflationary factor for the effective period of the prospective rate, the supply response of providers, and the number of residents for whom beds are needed. The prospective rate does not exceed 85 percent, nor fall below 15 percent, of an estimated average inpatient hospital rate for currently placed acute care Medicaid residents who are ventilator-dependent. The prospective rate is periodically re-evaluated to ensure reasonableness of supply and demand for special care. A new VDC unit that has not previously participated in Medicaid for VDC services will have a reimbursement rate in the initial two years (24 months) of Medicaid operations (from the date of admitting the first Medicaid beneficiary) based upon the statewide average VDC unit reimbursement rate for the current year. The reimbursement rate period beginning on the October 1 after the initial two years of Medicaid operations will utilize the most recent Medicaid cost report ending in the prior calendar year. If this cost report covers a period that is less than seven months or there was no cost report filed in the prior calendar year, the cost report used for rate setting is the most recent cost report available prior to the previous calendar year that covers a period of at least seven months.

10.7 NURSING FACILITY QUALITY ASSURANCE ASSESSMENT PROGRAM (QAAP)

The QAAP was implemented by Medicaid in compliance with Michigan and Federal law. The QAAP provides a QAS payment and Quality Measure Initiative payment to nursing facilities by incorporating funds from the quality assurance assessment tax. When a provider sells a nursing facility, the provider is responsible for all QAAP assessments billed and incurred prior to the date of the sale. The purchaser(s) must assure escrow of any outstanding QAAP amounts owed, or the purchaser(s) becomes responsible for payment of the QAAP and penalty amounts owed before Medicaid participation is granted. If the provider quits the business, the provider is responsible for all QAAP assessments billed and prorated as of the date MDHHS determines the facility closed. The QAAP applies to Class I, Class III and Class V nursing facilities.

10.7.A. QUALITY ASSURANCE SUPPLEMENT (QAS) FOR CLASS I AND CLASS III NURSING FACILITIES

The nursing facility will receive a QAS payment as a monthly gross adjustment. The monthly gross adjustment for an individual nursing facility will be determined based on one-twelfth of the facility's annual historical Medicaid utilization (resident days) multiplied
by the facility's QAS per resident day. The facility's historical Medicaid utilization will include all routine nursing care and therapeutic leave days billed to Medicaid by the facility. A nursing facility that is experiencing a significant increase or decrease in its Medicaid utilization for the current rate year resulting in a difference of greater than five percent in the nursing facility's total QAS payments for the year must contact the SMA for consideration of adjustment to the facility's monthly QAS payment. Current year Medicaid resident census data must be provided to MDHHS to document the change in order to revise the monthly QAS payment amounts. It is the desired intent of MDHHS to assure accuracy of total QAS monthly payments and to approximate the annual reimbursement due the facility. MDHHS reserves the right to adjust the individual nursing facility monthly QAS payment to reflect the current year Medicaid activity to achieve this goal.

A facility’s QAS is equal to the lesser of the facility’s Variable Rate Base or Class Variable Cost Limit times the Quality Assurance Assessment Factor (QAAF) determined by MDHHS, except for Class III publicly owned facilities, in which the QAAF is multiplied by the lesser of the facility’s Variable Cost Component or the Class I Variable Cost Limit. A provider's QAS will be reconciled at the end of the fiscal year to accommodate the actual Medicaid utilization, changes to the variable rate from filed to audited cost report data, and to adjust the increase initially estimated to accommodate the fixed pool of funds established by the QAAP and any legislative offsets to that pool.

The QAAF is determined based on the estimated pool of funds created by the quality assurance assessment tax as well as the projected number of Medicaid nursing facility days for the fiscal year. In aggregate, the quality assurance assessment fee may not exceed 6 percent of total industry revenue for the fiscal year.

QAS payments to Class I, III and V providers will be reduced by the amount of restricted funding revenue written off during the current fiscal year. This reduction will be allocated across Class I, III and V providers participating in the QAAP program that receive QAS payments. QAS payments will be reduced by both the state and federal share of the uncollected restricted revenue. Any restricted revenue that is subsequently collected after being included in a QAS reduction will be restored to providers. The QAS reduction will be equal to the total QAAP shortage divided by the total number of Medicaid days used in the QAS payment calculation multiplied by the number of Medicaid days in each facility.

It is the intent of MDHHS that nursing facilities that provide hospice care for residents by contracting with a hospice provider also benefit from this quality program. Medicaid will reimburse hospice providers 100 percent of a nursing facility's QAS rate add-on for Medicaid beneficiaries provided hospice care in Medicaid participating nursing facilities. It is the responsibility of the hospice provider to pay the room and board rate to the nursing facility as specified in their contract for services.

10.7.B. QUALITY ASSURANCE SUPPLEMENT (QAS) FOR CLASS V NURSING FACILITIES - VENTILATOR DEPENDENT CARE (VDC) UNITS

Qualifying VDC units will receive a QAAP payment as a monthly gross adjustment. The monthly gross adjustment for an individual unit will be determined based on one-twelfth
of the VDC unit's annual historical Medicaid utilization (resident days) multiplied by the unit's QAS per resident day basis. The unit's Medicaid utilization will include all days billed to Medicaid by the VDC unit. A nursing unit that is experiencing a significant increase or decrease in its current rate year Medicaid utilization which will cause a difference of greater than five percent in the nursing unit's total QAS payments for the year must contact MDHHS for consideration of adjustment to the unit's monthly QAS payment. Current year Medicaid resident census data must be provided to the SMA to document the change in order to make revision to the monthly QAS payment amounts. It is the desired intent of MDHHS to assure accuracy of total QAS monthly payments to approximate the annual reimbursement due the VDC unit. MDHHS reserves the right to adjust the individual VDC unit monthly QAS payment to reflect the current year Medicaid activity to achieve this goal.

The VDC unit QAS is equal to the Class I Variable Cost Limit times the Quality Assurance Assessment Factor (QAAF) determined by MDHHS. A provider's QAS will be reconciled at the end of the fiscal year to accommodate the actual Medicaid utilization and to adjust the total increase initially estimated to accommodate the fixed pool of funds established by the QAAP and any legislative offsets to that pool.

The QAAF is determined based on the estimated pool of funds created by collection of the quality assurance assessment tax and the projected number of Medicaid nursing facility days for the fiscal year. In aggregate, the quality assurance assessment tax may not exceed six (6) percent of total industry revenue for the fiscal year.

**10.7.C. ANNUAL RECONCILIATION [CHANGE MADE 4/1/23]**

The reconciliation of approved Medicaid days, changes to the variable rate from filed to audited cost report data, and QAS payments is completed on an annual basis within 90 calendar days after the end of the State's fiscal year. For State Fiscal Year 2022, this reconciliation will take place at least 365 days after the end of the fiscal year. (text added 4/1/23)

The Reimbursement and Rate Setting Section (RARSS) will reconcile the QAS payments to the provider against the provider’s approved Medicaid days and filed and audited cost report data. If RARSS determines that an underpayment has been made, the provider will receive a gross adjustment payment. If RARSS determines that an overpayment has been made, recovery will be made by gross adjustment recovery against future payments. The gross adjustment process follows the Initial Settlement and Final Settlement practices described in the Cost Report Reimbursement Settlements section of this chapter. A provider may submit a written request to RARSS for an extended repayment schedule to repay the Program. The request must include a written justification of the need for extended payment.

The provider will be given advance notice of the actions taken on QAS payments and has 30 calendar days from the date of the advance notice to request a review of the determination with RARSS. The provider’s request for a review must cite specific concerns with the determination.
10.7.D. NURSING FACILITY QUALITY MEASURE INITIATIVE (QMI)

Eligible nursing facilities may receive a supplemental QMI payment. Payments to individual nursing facilities will be determined by their average 5-star quality measure rating on the CMS Nursing Home Compare (NHC) website, Medicaid utilization rate, number of licensed beds, and resident satisfaction survey data as described in this section. In cases of a change of ownership, the new owner’s QMI payment will continue to be calculated based off the prior owner’s average quality measure rating, Medicaid utilization rate, number of licensed beds, and resident satisfaction survey data.

The average 5-star quality measure rating will be based upon the average rating from July of the prior calendar year to June of the current calendar year (e.g., for the rate year beginning October 1, 2018, the average 5-star quality measure rating would be based on the average rating between July 1, 2017 to June 30, 2018).

For special cost reporting requirements related to the QMI, refer to the Quality Measure Initiative (QMI) Special Cost Reporting Requirements subsection of the Cost Classifications and Cost Finding section of this Appendix.

Refer to the Nursing Facility Resources section of the Directory Appendix for NHC website information, and for additional QMI resources and contact information.

10.7.D.1. ELIGIBILITY FOR QMI PAYMENT

To be eligible to receive a QMI payment, a provider must meet the following conditions:

- The provider must be a Class I or III nursing facility.
- The provider must have a 1, 2, 3, 4 or 5-star quality measure rating on the NHC website.
- The provider must be a Medicaid-certified nursing facility.
- The provider must not be closed for business. That includes a voluntary closure, or an action by MDHHS, CMS or LARA to decertify or delicense a provider.
- The provider must not be designated as a Special Focus Facility (SFF) by CMS. (Refer to the Directory Appendix for SFF list website information.)
- If the provider has an average quality measure rating below 2.5 stars, they must submit an action plan to the Long Term Care Policy Section as described in the QMI Action Plan subsection.
- The provider must deliver at least one day of Medicaid nursing facility services at the room and board level during the state fiscal year in which they receive QMI payments and in their immediate prior year-end cost reporting period. QMI payments made to a provider found to have no days of Medicaid nursing facility services during the state fiscal year shall be recouped by the Michigan Department of Health and Human Services (MDHHS).

MDHHS will generally check in August prior to the beginning of a rate year and approximately every three months thereafter to see which facilities are designated as SFFs or have closed. A provider designated as a SFF will not be eligible to receive any
QMI payments until they graduate from the SFF list. A SFF that graduates after the rate year begins will only be eligible for prorated QMI payments for the balance of the remaining months of the rate year (e.g., a provider that graduates from the SFF list would not receive reimbursement equal to what they would have received had they been eligible for the entire rate year). If a provider has closed or graduated from the SFF list, MDHHS may recalculate some or all QMI payments depending on the amount of available funds.

10.7.D.2. QMI ACTION PLAN

A provider with an average quality measure rating below 2.5 stars must file an acceptable QMI action plan with the Long Term Care Policy Section to be eligible for a QMI payment. The action plan will need to provide specific details reflecting how a provider intends to use QMI funds to increase quality outcomes. The Long Term Care Policy Section will electronically provide written notice to providers with a rating below 2.5 stars and will provide the expectations for the action plan. A plan that does not provide the specific details required in the notice will not be accepted by the Long Term Care Policy Section.

The Long Term Care Policy Section will set a due date in the notice for a provider to submit the action plan. A provider that fails to submit an action plan by the due date cannot receive payment until an action plan is sent to and accepted by the Long Term Care Policy Section. If a provider fails to submit an acceptable action plan within 30 days of the due date, they will be unable to receive a QMI payment for the remainder of the fiscal year. Unless directed otherwise by the Long Term Care Policy Section, the action plan must be sent electronically as specified in the notice.

10.7.D.3. QMI PAYMENT METHODOLOGY

The Medicaid utilization rate will be determined from the immediate prior year-end cost report covering a period of at least seven months (e.g., 2016 year-end cost reports will set the utilization rate for the fiscal year beginning October 1, 2017). For the purposes of this section, a cost report refers to the uniform Medicaid nursing facility cost report or a less than complete cost report. The sum of the total Title XIX patient days in the Medicaid Routine Care Unit #1, Medicaid Routine Care Unit #2, and the Medicaid Special Care Unit #1 over the sum of the total inpatient days in all nursing facility units on the cost report will set the utilization rate (e.g., if the sum of the Title XIX inpatient days in the Medicaid Routine Care Unit #1, Medicaid Routine Care Unit #2, and the Medicaid Special Care Unit #1 is 1,000, while the sum of total inpatient days in all units is 1,500, the Medicaid utilization rate would be 66.7%). If the immediate prior year-end cost report does not cover a period of at least seven months, then the Medicaid utilization rate will be determined as follows:

- If the prior year-end cost report covers a period of less than seven months, and if multiple cost reports were filed by the current or prior facility owner, then all cost reports submitted for the prior year-end will be used in calculating the Medicaid utilization rate (i.e., if the current owner and the prior owner each submitted a 2016 year-end cost report, then both cost reports would be used to determine the Medicaid utilization rate).
If no cost report was filed for the prior year-end because the current or prior owner submitted an extended period cost report, then the most recent cost report filed prior to the previous calendar year that covers a period of at least seven months will be used in calculating the Medicaid utilization rate.

If the immediate prior year-end cost report is the only cost report the provider has ever filed, then that cost report will be used in calculating the Medicaid utilization rate even if it covers a cost reporting period of less than seven months.

A provider that has not filed an immediate prior year-end cost report will be assumed to have no Medicaid utilization.

Per-bed QMI payment amounts are multiplied by a Medicaid utilization scale. The Medicaid utilization scale will be applied as follows:

- For nursing facilities with a Medicaid utilization rate of above 63%, the facility shall receive 100% of the QMI payment.
- For nursing facilities with a Medicaid utilization rate between 50% and 63%, the facility shall receive 75% of the QMI payment.
- For nursing facilities with a Medicaid utilization rate of less than 50%, the facility shall receive a payment proportionate to their Medicaid utilization rate.

**Example:** Facility A has a Medicaid utilization rate of 64% while Facility B has a Medicaid utilization rate of 35%, so Facility A would receive 100% of their QMI payment while Facility B would receive 35% of their payment.

Effective for rate years beginning on or after October 1, 2018, an adjustment is made for the submission of resident satisfaction survey data from recently performed surveys. The Long Term Care Policy Section will provide notice to facilities prior to the fiscal year on how to submit the data, what documentation is necessary, and where to submit resident satisfaction survey data by a due date specified in the notice. Per-bed QMI payments will be multiplied by 100% for facilities that submit acceptable resident satisfaction survey data and documentation, but payments will be multiplied by a percentage set by MDHHS for facilities that do not submit the data and documentation. The resident satisfaction survey must have been conducted no more than 12 months before the submission of the notice, and survey data submitted for prior year QMI payments will not be accepted.

The following formula demonstrates the monthly adjusted QMI payment (for rate years prior to October 1, 2018, the resident satisfaction survey factor is not included in the formula):

\[
\text{QMI Gross Adjustment} = \left( \frac{[\text{NHC Per-Bed Amount}] \times [\text{Medicaid Utilization Scale}] \times [\text{Resident Satisfaction Survey Factor}]) \times [\text{Number of Licensed Nursing Facility Beds}]}{[\text{Number of Eligible Payment Months}]} \right)
\]

**Examples:**

- For rate year October 1, 2017, Nursing Facility A has an average NHC rating of 5 stars, a Medicaid utilization rate of 55%, 100 licensed nursing facility beds, and meets all the
payment eligibility requirements. The NHC per-bed amount for a 5-star rating is $2,000, so the QMI Gross Adjustment = (($2,000) x (75%) x (100))/12 = $12,500/month.

- For rate year October 1, 2017, Nursing Facility B has an average NHC rating of 2 stars, a Medicaid utilization rate of 32%, 45 licensed nursing facility beds, and meets all the payment eligibility requirements. The NHC per-bed amount for a 2-star rating is $1,250, so the QMI Gross Adjustment = (($1,250) x (32%) x (45))/12 = $1,500/month.

- For rate year October 1, 2018, Nursing Facility C has an average NHC rating of 3 stars, a Medicaid utilization rate of 78%, 200 licensed nursing facility beds, has not submitted resident satisfaction survey data, and meets all the payment eligibility requirements. The NHC per-bed amount for a 4-star rating is $1,750 and the resident satisfaction survey factor for facilities with no survey is 85%, so the QMI Gross Adjustment = (($1,750) x (100%) x (85%) x (200))/12 = $24,791.67/month.

All values in the examples above are for example purposes only and do not reflect actual rates.

10.8 CLASS II NURSING FACILITIES – PROPRIETARY NURSING FACILITY FOR INDIVIDUALS WITH MENTAL ILLNESS OR INTELLECTUAL DISABILITIES

The Class II proprietary nursing facilities for individuals with mental illness or intellectual disabilities are reimbursed an all-inclusive prospective payment rate negotiated with the MDHHS State Mental Health Agency on an annual basis. Rate ceiling limits are prospectively set for allowable costs and resident occupancy for determining final reimbursement for the annual services. Final reimbursement is retrospective cost settlement, not to exceed the ceiling limit. Nursing facility allowable costs included for reimbursement are determined in accordance with Medicaid cost reporting requirements and allowable and non-allowable cost policies, including plant cost based on allowable depreciation expense. The provider is paid a reimbursement efficiency allowance equal to the lesser of $2.50 per resident day or the difference between the prospective ceiling limit and the nursing facility actual allowable cost.

10.9 CLASS IV NURSING FACILITIES – INSTITUTIONS FOR INDIVIDUALS WITH DEVELOPMENTAL DISABILITIES

State-owned and -operated institutions, Intermediate Care Facilities for Individuals with Intellectual Disabilities (ICF/IID), and non-profit nursing facilities for individuals with intellectual disabilities are retrospectively cost settled.

The State Mental Health Agency must submit rate information regarding the facility's expected costs for the prospective year in an Interim Rate Request letter to Medicaid at the beginning of the Medicaid rate year. Subsequent requests may be submitted during the rate year if rate adjustments are necessary. The reimbursement rate for the new Medicaid rate year will not be updated until the State Mental Health Agency submits the Interim Rate Request letter.

The provider is reimbursed an interim per diem rate based on the cost information submitted. The interim reimbursement is adjusted to actual allowable costs through annual cost settlement. Refer to the Cost Reporting and the Rate Setting sections of this appendix for additional information.
10.10 CLASS VI NURSING FACILITIES – HOSPITAL SWING BEDS

The reimbursement rate for hospital Swing Beds (Class VI) is set prospectively as a flat per diem rate determined by Medicaid. Swing bed reimbursement occurs after the combined length of stay in an acute care bed and a swing bed exceeds the average length of stay for the Medicaid diagnosis related group (DRG) for the admission.

The rate is the weighted statewide average per diem rate paid for routine nursing care. The rate calculation sums Medicaid per diem payments and divides the sum by the number of Medicaid service days paid to Class I and Class III facilities as reflected on the State’s prior fiscal year’s Medicaid report of services and payments.

10.11 CLASS VII NURSING FACILITIES – STATE VETERANS’ HOMES

Reimbursement rates to State Veterans’ Homes will be prospective, per patient day, and based on the PDM classification of each resident. MDHHS will utilize the PDM classifications used under the Medicare skilled nursing facility (SNF) prospective payment system (PPS) as calculated by the MDS 3.0. PDPM consists of four case-mix categories and six rate components. The PT and OT component, the SLP component, the NTA component and the Nursing component represent the four case-mix categories. PDPM rates are comprised of a PT component, OT component, a SLP component, an NTA component, a Nursing component and a Non-Case-Mix component. The Variable Per Diem adjustment and the add-on payment for residents with AIDS under the Medicare SNF PPS are not included in this rate methodology.

The formula for PDPM payments is as follows:

\[
PDPM \text{ rate} = PT \text{ rate} + OT \text{ rate} + SLP \text{ rate} + NTA \text{ rate} + Nursing \text{ rate} + Non-Case-Mix \text{ rate}
\]

Refer to the Directory Appendix for website information regarding PDPM.

The rate associated with an individual PDPM component will be set as a percentage of the rate paid by the Medicare SNF PPS. The percentage used to set rates will not exceed 100% of the corresponding Medicare PPS rate. MDHHS will notify the State Veterans’ Homes of the percentage and specific payment rates by October 1 of each year.

The PDPM categories used for payments will be based on the applicable MDS assessment(s) to the billing period. Example: Services were rendered from April 1 through April 30, and MDS assessments were conducted on January 15 and April 15. The payment to the provider would be based on the January 15 assessment for dates of services from April 1 through April 14, and would be based on the April 15 assessment for dates of services April 15 through April 30.

State Veterans’ Homes are excluded from the reimbursement policy that requires Medicaid to pay the lower of the customary charge to the general public or the prospective rate determined by Medicaid.

In conformance with the Veterans’ Health Programs Improvement Act of 2004, per diem payments received by State Veterans’ Homes from the federal Department of Veterans Affairs will not be considered a third-party liability or otherwise used to directly reduce Medicaid payments to these providers.

State Veterans’ Homes are excluded from the NF QAAP and all supplemental payments funded by the QAAP.
State Veterans’ Homes will receive payment for services through gross adjustments.

**10.12 ADD-ONS**

Add-ons are items that provide reimbursement to a provider for costs that are not previously included in the provider’s variable cost component.

**10.12.A. SPECIAL DIETARY**

The Coverages portion of this chapter, Dietary Services and Food subsection, provides for program reimbursement to non-profit nursing facilities for special dietary needs for religious reasons. Interim payment reimbursement to the nursing facility will be made by inclusion of a per diem rate add-on amount to the nursing facility routine nursing care rate. The total special dietary add-on reimbursement to the nursing facility during the reimbursement year will be adjusted through the annual cost report reimbursement settlement. Refer to the Cost Report Reimbursement Settlement section of this appendix for additional information.

A qualifying nursing facility that has previous year cost history of special dietary costs will have the interim payment rate add-on based on special dietary cost center allocated cost and nursing facility resident census data determined in the nursing facility cost report. The most recent annual filed or audited cost report that is used for determining the nursing facility current routine nursing care rate will be the source of the cost data for the current interim rate add-on.

A qualifying nursing facility that does not have previous year cost history of special dietary costs will have an interim reimbursement rate add-on based on estimated cost data. The nursing facility must submit a written request identifying the estimated costs to be incurred in food purchase and preparation associated with special dietary needs for religious reasons. The request must be submitted to the RARSS and must include a certification statement attesting to the accuracy of the data and signed by the nursing facility authorized representative. (Refer to the Directory Appendix for contact information.) The written request must present the following data for the current cost report year:

- Estimated resident days (not less than 85% occupancy rate for all nursing facility resident units)
- Estimated raw food purchase costs, including a detailed listing of the types of food to be purchased for special dietary needs for religious reasons.
- Estimated cost for supplies, tableware, cooking utensils, etc. for food preparation and service associated with special dietary needs for religious reasons.

The submitted data will be subject to review and adjustment by Medicaid for consideration and calculation of the interim rate and the add-on reimbursement rate to the facility. The submitted data will be utilized for interim rate determination until annual cost reporting data has been filed and accepted by Medicaid.
10.12.B. **NURSE AIDE TRAINING AND COMPETENCY EVALUATION PROGRAM (NATCEP) ADD-ON**

Certification, Survey & Enforcement Appendix, Staff Certification section provides for nursing facility Medicaid reimbursement for Medicaid's share of costs incurred by the nursing facility for approved Nursing Aide Training and Competency Evaluation Program (NATCEP) expenditures. Interim payment reimbursement to the nursing facility will be made by inclusion of a per diem rate add-on amount to the nursing facility routine nursing care rate. The total NATCEP add-on reimbursement paid to the nursing facility during the nursing facility's cost report reimbursement year will be adjusted through the annual cost report reimbursement settlement. Refer to the Cost Classifications and Cost Finding section and Cost Report Reimbursement Settlement section of this appendix for additional information.

The interim rate add-on amount is limited to a maximum per diem of $1.00 per resident day; however, the nursing facility cost reimbursement settlement for these training costs is not subject to a per diem limit. The interim payment rate add-on will reflect the nursing facility's prior year cost history of NATCEP costs utilizing the NATCEP cost center allocated cost and nursing facility resident census data determined in the nursing facility cost report. The most recent annual filed or audited cost report that is used for determining the nursing facility current routine nursing care rate is the source of the cost data for the current interim rate add-on, except where a more recent interim reimbursement request has been submitted by the nursing facility.

A nursing facility that is notified by the SSA of loss of NATCEP or CEP, has been placed on NATCEP lockout status, or has a NATCEP withdrawal of program approval will be notified by Medicaid that its interim reimbursement NATCEP add-on amount will be deleted from the reimbursement rate. The nursing facility must submit a completed interim reimbursement request identifying expected NATCEP allowable costs, in accordance with policy provisions referenced above, for consideration of an interim reimbursement add-on amount for allowable NATCEP costs incurred during the lockout period.

A nursing facility is eligible to submit an interim reimbursement request for a change in the interim payment rate add-on amount in the following situations:

- The nursing facility is experiencing a change in its current year NATCEP cost level that would cause a per diem increase or decrease in excess of $.25 per day in the current period reimbursement rate add-on.
- The nursing facility does not have previous year cost history of NATCEP cost.
- The nursing facility has been identified a lockout facility for NATCEP or CEP, or has loss of approval of its NATCEP, and has made acceptable arrangements for securing approved nurse aide training for nursing facility staff.

The nursing facility must submit a completed Nurse Aide Training and Testing Program Interim Reimbursement Request (form MSA-1324) identifying the estimated costs to be incurred in providing approved NATCEP training for the nursing facility staff and projected resident census data. The request must be submitted to RARSS and must include the signed certification statement attesting to the accuracy of the data and
signed by the nursing facility authorized representative. (Refer to the Directory Appendix for contact information.) Electronic copies of the request form and completion instructions can be accessed on the MDHHS website. (Refer to the Directory Appendix for website information.)

The submitted data is subject to review and adjustment by Medicaid for consideration and calculation of the interim rate add-on payment to the facility. Medicaid will issue the provider a rate notice indicating the accepted cost level for interim rate determination, or a request denial and reason for such action. The submitted data will be utilized for interim rate determination until annual cost reporting data has been filed and accepted by Medicaid.

10.13 SPECIAL CIRCUMSTANCES – RATE DETERMINATION

10.13.A. NEW FACILITY AND PROVIDER

A new facility is a provider operating a nursing facility where there is not Medicaid historical cost. Examples include:

- A newly constructed (non-replacement) facility.
- An existing facility that has never before participated in Medicaid.
- A facility that has participated in Medicaid in a different provider class.
- An existing nursing facility that has not provided nursing care for Medicaid beneficiaries or billed Medicaid in the past two years (24 months).

10.13.A.1. NEW PROVIDER NURSING FACILITY PER RESIDENT DAY PLANT COST

A new provider in the Medicaid program is eligible for the Plant Cost Certification process to reflect the facility asset costs and related plant costs. The Plant Cost Certification data submission will be used for calculation of the nursing facility Plant Cost Component as outlined in the policy for the respective nursing facility class. Refer to the Plant Cost Certification section of this appendix for additional information.

10.13.A.2. NEW PROVIDER NURSING FACILITY VARIABLE COST COMPONENT

The Variable Rate Base for the new facility and provider will be determined using special methods. During the first two cost reporting periods, new facilities and facilities with a change of class will have a Variable Rate Base equal to the Class Average of Variable Costs. The first two cost reporting periods must cover a period of at least 19 months (the first cost reporting period must cover a period of at least seven months, and the second cost reporting period must cover a period of 12 months) and the facility must have averaged six or more Medicaid residents per day. This rate base will be used in the calculation of the nursing facility Variable Cost Component as outlined in the policy for the respective nursing class. In subsequent periods, the nursing facility's Variable Rate Base will be determined using the methods described in the Rate Determination section of this appendix.
A new provider that purchases an existing facility participating in the Medicaid program or a provider with an existing, participating facility that makes major additions, renovations, or new construction does not qualify for these special methods because there are historical variable costs on which to base rates. The Variable Rate Base will be determined in accordance with Medicaid policy identified in applicable subsections of this appendix.

This section does not apply to Class V providers.

10.13.B. COMPLEX CARE

The Nursing Facility Coverages chapter of this manual details Medicaid policy on complex care cases. Complex care cases are those requiring specialized care beyond services covered by the usual Medicaid per diem rate. The payment rate for specially-placed residents is a negotiated prospective rate per resident day.

Reimbursement is made for prior authorized services/care to residents who have specialized and concentrated nursing and support service needs and who have been transferred from an acute care hospital setting to an approved nursing facility. The negotiated rate provides reimbursement adequate to meet the unusual needs of this type of resident in a less costly and more appropriate environment than an acute care hospital setting.

Factors used in Medicaid's negotiation of the per resident day prospective rate include, but are not limited to, complexity, type of equipment and supplies required, the resident's condition, and the marketplace availability of placement. Any authorized increase in the per diem rate represents only the cost of the service. The negotiated prospective rate is re-evaluated, in consideration of the resident's needs, prior to the last day of the approval period.

10.13.C. HOSPITAL LEAVE DAYS

The Hospital Leave Days Section in the Coverages portion of this chapter identifies the parameters for program reimbursement.

Reimbursement for a hospital leave day is a single rate paid to all nursing facility providers regardless of facility class. The rate is determined annually with an effective period coinciding with the State fiscal year. The rate determination utilizes the Class I nursing facility Class Average Variable Cost (AVC) for the State fiscal year. The hospital leave day reimbursement rate represents a calculated salary and wage component of the room and board cost portion of the total AVC. The room and board portion is equal to 95 percent of the Class I nursing facility AVC, and the salary and wage component is determined as 66 percent of the room and board cost. The formula for calculating the hospital leave day rate is:

\[
\text{AVC (Class I NF)} \times \frac{95\%}{100} \times \frac{66\%}{100} = \text{Hospital Leave Day Rate}
\]
Hospital Leave Day rate information is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

10.13.D. THERAPEUTIC LEAVE DAY

The Therapeutic Leave Days section in the Coverages portion of this chapter identifies the parameters for program reimbursement.

The reimbursement rate for a therapeutic leave day is the nursing facility’s established per diem rate in effect for the period coinciding with the leave day.

10.13.E. ONE-DAY STAY

The One-Day Stay section of the Coverages portion of this chapter identifies the parameters for program reimbursement.

The reimbursement rate for an approved one-day stay is the nursing facility’s established per diem rate in effect for the period coinciding with the stay.

10.13.F. FACILITY INNOVATIVE DESIGN SUPPLEMENTAL (FIDS) PROGRAM

Effective for dates of service on and after October 1, 2007, Medicaid providers participating in the Facility Innovative Design Supplemental (FIDS) program are eligible to receive supplemental reimbursement for room and board services provided to Medicaid beneficiaries when the beneficiary resides in a FIDS bed. FIDS participating facilities are eligible for the reimbursement supplement for up to 20 consecutive years beginning in the fiscal year of the project completion date. For projects completed on or after January 1, 2008, providers must plant cost certify or forgo the FIDS reimbursement supplement.

The FIDS facility standards and required culture change must be maintained throughout the Medicaid supplemental payment program. FIDS participating facilities will be reviewed annually by BPHASA to certify continued participation in the culture change. Reimbursement of the FIDS payment will be terminated if it is determined that a facility is not compliant with the culture change requirement. FIDS participating nursing facilities receive increased capital reimbursement for FIDS construction and renovation projects. The increased reimbursement is paid through the claims reimbursement process. Reimbursement of the supplement amount is contingent upon sufficient appropriation to the Medicaid budget.

10.13.F.1. CHANGE OF OWNERSHIP

A new owner may receive reimbursement for the balance of the facility’s eligible years of participation in the FIDS program. The new owner must notify RARSS via File Transfer within 45 calendar days of the change of ownership if the facility is going to continue participation in the FIDS program, or RARSS will assume participation has been discontinued and end FIDS reimbursement supplemental payments. In order to receive the supplemental Medicaid payment, the new owner must continue the FIDS facility standards and culture change. If the new owner initially decides to discontinue
participation as a FIDS facility and subsequently decides to participate as a FIDS facility, the provider must notify the LARA, Bureau of Community and Health Systems (BCHS) team manager and BPHASA. MDHHS will notify the provider of the supplemental payment amount upon reinstatement of participation in FIDS. MDHHS will notify the provider of the terminated supplemental payment if the facility is determined ineligible for the supplemental payment because the new owner has discontinued or plans to discontinue the FIDS facility standards or culture change.

10.13.F.2. FIDS PROGRAM REIMBURSEMENT METHODOLOGY

FIDS participating facilities that have received approval from LARA for construction or renovation design plans that complied with quality goals of the FIDS program to improve nursing facility quality of life and nursing facility structures are eligible for reimbursement. If a provider chooses to discontinue participation in the design and/or culture change aspects of the FIDS program, the provider must contact the MDHHS LTC Reimbursement and Rate Setting Section (RARSS) 30 days prior to the discontinuance. (Refer to the Directory Appendix for contact information.) The FIDS reimbursement supplement will be discontinued when the facility no longer participates in the design and/or culture change.

MDHHS confirmation and approval that a FIDS participating facility has completed the pre-approved construction or renovation project(s) allows the facility to be eligible for the capital reimbursement supplement. The reimbursement supplement only applies to qualifying FIDS costs above the nursing facility’s Capital Asset Value (CAV) Limit for Class I and the Plant Cost Limit (PCL) for Class III. Qualifying costs are the cost of capital assets such as land, land improvement, building, building improvement, and equipment that meet the MDHHS capital asset classification. Providers submitting for plant cost certification can identify all costs for certification but must distinguish FIDS qualifying costs on the certification request. As FIDS qualifying costs fall below the nursing facility’s CAV or the nursing facility’s PCL, the supplement amount is adjusted. The reimbursement supplement reflects qualifying costs prorated over 20 consecutive years. Medicaid reimbursement methodology for the FIDS program follows current MDHHS nursing facility cost-based principles and rate determination guidelines and policy, including plant cost certification, except as identified below for Class I and Class III providers.

10.13.F.3. CLASS I NURSING FACILITY REIMBURSEMENT FOR FIDS

For Class I nursing facilities participating in the FIDS program, the supplement amount, up to five dollars ($5) per Medicaid day, is added to the Return on Current Asset Value Component (RCAV) for qualifying FIDS construction or renovation project costs above the nursing facility’s CAV Limit. Medicaid reimbursement methodology for the FIDS program follows current Medicaid nursing facility reimbursement guidelines and policy with the exceptions noted below:

- Up to five dollars ($5) per Medicaid day is added to the nursing facility’s RCAV.
- The supplement amount is based on qualifying costs above the nursing facility’s CAV Limit determined by MDHHS either by plant cost certification or by cost reporting. When the plant cost certification estimate is used, the amount of the supplement is subject to
10.13.F.4. CLASS III NURSING FACILITY REIMBURSEMENT FOR FIDS

For Class III nursing facilities participating in the FIDS program, MDHHS will increase the Plant Cost Component (PCC) up to five dollars ($5) per Medicaid day for FIDS construction or renovation project costs above the nursing facility's PCL. MDHHS reimbursement methodology for the FIDS program follows current MDHHS nursing facility reimbursement guidelines and policy with the exceptions noted below.

- Up to five dollars ($5) per Medicaid day is added to the nursing facility's PCC.
- The supplement amount is based on qualifying costs above the re-determined PCL determined by MDHHS either by plant cost certification or by cost reporting. When the plant cost certification estimate is used, the amount of the supplement is subject to an adjustment following the completion of an audit to the applicable period's cost report in which the FIDS project is initially reported.
- To determine the amount of the FIDS supplement, MDHHS will apply the following to qualifying project costs:
  - For FIDS renovation projects, the supplement is determined using qualifying costs to calculate the plant cost per resident day above the facility’s PCL per resident day.
  - For a newly constructed facility, the calculation will be based on plant cost per resident day above the Class PCL per resident day effective the quarter the new construction is placed into service.

10.13.F.5. FIDS PROGRAM BILLING AND REIMBURSEMENT PROCESS

Participating FIDS providers are reimbursed per Medicaid day when claims are submitted for services provided in the FIDS area. FIDS facilities compliant with facility standards and culture change are eligible for the supplemental payment. Only participating FIDS providers billing for room and board in a FIDS area are to use the following revenue codes:

- For a single occupancy/private room, bill revenue code 0119
- For a double occupancy/semi-private room, bill revenue code 0129
- For Therapeutic Leave Day claims, bill revenue code 0189
- For hospice room and board, bill revenue code 0659
FIDS reimbursement is subject to post-payment audit action, including the prospective elimination of a provider’s supplemental payment if the provider submits claims for FIDS services not provided in an approved FIDS area.

10.14 RATE RELIEF FOR CLASS I NURSING FACILITIES

Medicaid reimbursement rate relief for current and new nursing facility providers is determined on a case-by-case basis in accordance with specific criteria for evaluating eligibility for relief and rate methodology for determining the rate level. The following definitions of nursing facility providers are applied in this rate relief policy for Class I nursing facilities:

- **Current provider** is defined as the provider that operated the facility during the period of the last cost report on which the normal rate setting would occur, and will operate the facility during the period for which rate relief is requested.
- **New provider** is defined as a person or business entity that has purchased or is purchasing a nursing facility that had immediate prior Medicaid participation, and the new provider ownership individual(s) or business entity is not related through family or business ties to the ownership individual(s) or business entity of the previous provider. A nursing facility sale between family members may be approved by Medicaid and the new owner may be considered a new provider under certain circumstances, as outlined in the Ownership Changes and Medicaid Termination section of this appendix.

10.14.A. ELIGIBILITY CRITERIA

The provider must be a Class I nursing facility:

- The provider must demonstrate that the current Medicaid reimbursement (Rate + QAS) does not provide adequate funding to deliver a level of care to Medicaid beneficiaries in the facility that assures “each resident attains and maintains the highest practicable physical, mental, and psycho-social well-being” as required by the Omnibus Budget Reconciliation Act (OBRA) of 1987.
- The nursing facility Variable Rate Base amount must meet the following criteria:
  - For a Current Provider – The facility's Variable Rate Base is at or below the corresponding Class Average Variable Cost. The Average Variable Cost used for the class is the one that corresponds with the October 1 to September 30 rate year for which rate relief has been requested.
  - For a New Provider in a Medicaid-enrolled nursing facility – The facility's current Variable Rate Base is at or less than 80 percent of the corresponding Class Average Variable Cost. The Average Variable Cost used for the class is the one that corresponds with the October 1 to September 30 rate year for which rate relief has been requested. A new provider in a facility with a Variable Rate Base between 80 and 100 percent of the corresponding Class Average Variable Cost is eligible for accelerated rebasing and is treated as a current provider.
- A current Medicaid provider agreement for the facility is in effect. The rate relief period is applied to the facility and not the owner, provider, or licensee. A change of ownership, provider, or licensee during the rate relief period does not end the agreement for rate
relief under this policy as long as the new owner, provider, or licensee fully complies with the requirements of the rate relief agreement.

- The nursing facility provider must also meet at least one of the following six criteria:
  - The sum of the provider's Variable Rate Base, Economic Inflation Update, and other associated rate add-ons (excluding Nurse Aide Training and Testing reimbursement), plus the Net QAS, must be less than the provider's audited Medicaid variable cost per resident day for the provider's two fiscal cost reporting periods (not rate setting periods) of not less than seven months immediately prior to the first period of rate relief. This comparison to cost is a measurement to normal reimbursement rate calculation methodology and excludes the effect of Executive Order reimbursement actions. The provider must submit a per diem cost analysis using the outline format presented as a reference titled "Worksheet to Establish Criteria for Nursing Facility Class I Rate Relief". The required cost analysis information is available in electronic file format on the MDHHS website. (Refer to the Directory Appendix for website information.)
  - The provider is required, as a result of a survey by the SSA, to correct one or more substandard quality of care deficiencies to attain or sustain compliance with Medicaid certification requirements. The survey must have occurred within six months prior to the provider's request for rate relief. The provider must submit a copy of the citation and an approved Plan of Correction outlining the action being taken by the provider to address the requirement(s). The provider must submit to the MDHHS LTC Reimbursement and Rate Setting Section (RARSS) a copy of the citation and an approved Plan of Correction outlining the action being taken by the provider to address the deficiencies. A copy of facility staffing levels before and after the survey citation must be provided to RARSS to demonstrate the staffing increase is sustained and is not for short-term training purposes only.
  - The provider has experienced a significant change in the level of care needed for current Medicaid residents in the nursing facility. Significant change is defined as an increase of ten minutes per patient day, as demonstrated by Minimum Data Set (MDS) data, which results in a corresponding increase in direct care staffing equal to or greater than the increase in patient minutes per day. The provider must submit an analysis comparing resident acuity levels from the rate base year to current resident acuity levels. Minimum Data Set (MDS) data must be used for this comparison. The data is subject to a clinical review by Medicaid. The analysis must also include a comparison of the previous and current nurse staffing levels required based on actual residential census or actual patient days and other nursing related costs or requirements likely to increase the operational costs. This does not include nursing administration staff.
  - The provider is new in a Medicaid-enrolled facility and the facility's most recent cost report submitted to Medicaid was incomplete, undocumented or had unsubstantiated cost data by the previous provider. Inadequate cost reporting includes non-payment of accrued liabilities due to the previous provider's bankruptcy as determined by Medicaid auditors or their designees in accordance with Medicaid allowable costs, or inadequate records to support the filed cost report. Proof of the change of ownership must be submitted along with an explanation of why the cost report data is inadequate to calculate the provider's reimbursement rate.
Rate relief is needed to prevent closure of a Medicaid-enrolled facility due to a regulatory action by the SSA, where the facility’s closure would result in severe hardship for its residents and their families due to the distance to other nursing facilities, and no new provider would operate the facility at its current reimbursement rate. A facility would meet this hardship criterion only if a new owner has agreed to take over its operation and it is either the only nursing facility in the county or the facility has at least 65 percent of the Medicaid nursing facility (Class I, III and V) certified beds in that county.

A nursing facility may qualify for rate relief if all other applicable criteria is met and if their current actual variable costs are less than or equal to 60 percent of the corresponding rate year’s Variable Cost Limit. A facility is not eligible under this criterion if an owner’s or administrator’s compensation is above the current compensation limit. A provider with non-allowable related party transaction costs or non-allowable related party lease costs is not eligible under this criterion.

10.14.B. RATE RELIEF PETITION PROCESS

All petitions for rate relief must be in writing and submitted to RARSS. An authorized representative from the entity that holds the nursing facility license must sign the petition. A petition is not considered filed or complete unless all required supporting documentation is filed with the petition request.

It is the provider’s responsibility to submit supporting documentation with the rate relief petition. A petition from the provider must include:

- Identification of the criterion under which rate relief is requested.
- Supporting documentation for the criterion.
- Detail of the circumstances causing the need for the rate relief request.
- A requested effective date (the actual effective date of the rate relief is based on the date that the petition is received by Medicaid). The earliest effective date would be the first day of the next month (i.e., a petition received on August 31 may be effective as soon as September 1).
- The services period that is the basis for which rate relief is requested.
- Detail of the expenses that are not in the base period for the current or subsequent fiscal year Medicaid rate and how these expenditures relate to the provision of resident care. NOTE: Increases in cost per day due to changes in resident occupancy or changes in the application of rate limitations do not constitute additional expenses.
- Plans on how these changes will ensure the required level of resident care.

Medicaid will make the final determination for the approval or disapproval of the rate relief request. Medicaid will provide a written response within 60 calendar days of Medicaid's receipt of the rate relief request. The response may include a request for additional information. The 60 calendar day period does not begin until the provider has submitted all of the necessary documentation for Medicaid to evaluate the rate relief request. Once the nursing facility provider has complied with the request(s) for
additional information, a written notice of the approval or disapproval is given within 30 calendar days of Medicaid’s receipt of the additional information.

If Medicaid requests additional or supporting documentation needed to complete the evaluation of the rate relief request, the provider must submit the documentation within 30 calendar days of the request. If Medicaid does not receive the documentation or the provider has not received a one-time extension for 30 additional calendar days, the SMA will issue a denial notice for rate relief. Appropriate time allowances will be made in cases where the needed data is for a period that is not yet concluded. Subsequent rate relief requests by the provider will only be effective on a prospective basis following receipt of the new requests and documentation for rate relief.

10.14.C. RATE RELIEF AGREEMENT

If RARSS issues a written notice of approval for rate relief, an authorized representative from the nursing facility must sign and submit the rate relief approval agreement included in the letter to RARSS via File Transfer within 30 calendar days of the issuance of the notice. If the signed rate relief approval agreement is not submitted to RARSS within this time frame, then the rate relief approval is rescinded. Once the agreement is approved, the provider’s Medicaid rate is adjusted consistent with the relief granted. The agreement outlines the rate relief granted, the effective date, and any conditions or requirements.

Requirements may include, but are not limited to:

- Annual and interim cost reporting requirements during the period of rate relief.
- Appointment of a monitor, at facility cost, for oversight if, after consultation with staff in the SSA, such action is deemed appropriate.
- Follow-up surveys by the SSA.

10.14.D. RATE RELIEF PERIOD

Rate relief is effective on a prospective basis beginning in the month after receipt of the request and all required supporting documentation by RARSS. No retroactive rate relief will be approved.

Nursing facility providers may apply and receive rate relief under this policy once every seven years, i.e., 84 months. This seven-year period begins on the effective date of rate relief.

**Example:** If rate relief takes effect January 1, 2018, the facility would not be eligible for rate relief again until on or after January 1, 2025.

The rate relief period is based on the facility, not on the owner or licensee. A change of ownership does not void the seven-year period under this policy.
10.14.E. WITHDRAWAL OF RATE RELIEF AGREEMENT

Medicaid may withdraw the rate relief agreement if the facility is cited by the SSA for serious certification violations while receiving rate relief. If the citation(s) is for immediate jeopardy or substandard quality of care, or the provider is not spending the money in accordance with the plan filed for special rate relief, the rate relief agreement may be withdrawn. Medicaid will review the nursing facility actions to determine if rate relief termination is warranted. If Medicaid terminates the agreement, the nursing facility's Medicaid rate will be recalculated in accordance with existing Medicaid reimbursement policy without rate relief. The rate change would take effect at the beginning of the month following issuance of a 30-calendar day notice to the provider.

10.14.F. RATE RELIEF APPEALS

Nursing facility providers that receive notices of denial for rate relief or are notified that a rate relief agreement has been withdrawn may file an appeal. Appeals are handled in accordance with the existing appeals process. Additional information appears in the Appeal Process section in this appendix.

10.14.G. RATE RELIEF FOR A NEW PROVIDER IN A MEDICAID-ENROLLED NURSING FACILITY WITH A VARIABLE RATE BASE LESS THAN OR EQUAL TO 80 PERCENT OF THE CLASS AVERAGE VARIABLE COST

A new provider in a Medicaid enrolled nursing facility with a Variable Rate Base less than or equal to 80 percent of the Class Average Variable Cost may request an increase in the current facility rate. The new provider must be operating in a facility that has previously participated with Medicaid.

10.14.G.1. RATE RELIEF METHODOLOGY

A new rate is calculated using the Class I Average Variable Cost for the appropriate year as the Variable Rate Base for the calculation of the facility Variable Cost Component, thereby increasing the facility per diem rate. This Variable Rate Base is in effect through the current State fiscal year rate period ending September 30.

Effective October 1 of the State fiscal year rate period starting after the new provider begins operation, the Variable Rate Base is determined using accelerated rebasing. The accelerated rebasing utilizes the new provider's first cost reporting period that reflects at least seven months of nursing facility operation. The cost reporting period is based on the new provider's established fiscal year. The nursing facility allowable variable cost is indexed to October 1 of the year that is one year prior to the new rate year being calculated by applying the appropriate cost index. The new provider Variable Rate Base is limited to the Class I Average Variable Cost for the corresponding rate year period.

The new provider receiving rate relief in this category must utilize the standardized data to file a Class I Rate Relief Interim Cost Statement prior to September 15. The Interim Cost Statement excerpted worksheets from the Medicaid annual cost report (Medicaid cost reporting formats identified below) must reflect actual or expected costs incurred by the nursing facility for the new provider's first cost reporting period (as referenced...
above). The facility’s annual cost report may be used in lieu of the Interim Cost Statement if the cost report will be filed with Medicaid prior to September 15.

The Rate Relief Interim Cost Statement must contain the following completed schedules of the cost report in the MDHHS required electronic format:

- Checklist
- Worksheet A
- Worksheet B
- Worksheet 1
- Worksheet 1-C (only if claiming allocated related party costs)
- Worksheet 2

The Interim Cost Statement is used to determine the interim rate utilizing the accelerated rebasing provisions. The interim rate is revised when the acceptable annual cost report is submitted and used for accelerated rebasing.

The subsequent rate year calculation is in accordance with standard reimbursement methodology.

**Example:** A new nursing facility provider begins operations on January 1, 2019 and selects a September 30 year-end cost reporting period. Following request, the provider is approved for rate relief for rate year October 1, 2018 to September 30, 2019. The facility per diem rate is set using the Class I Average Variable Costs effective for the rate year beginning October 1, 2018 (effective for the new provider on January 1, 2019). The provider must complete an interim cost statement for variable costs for the period January 1, 2019 through September 30, 2019 that must be filed by September 15, 2019. Effective October 1, 2019, the Variable Rate Base is the lesser of the variable costs from the interim cost statement indexed to October 1, 2018 or the Class Average Variable Cost effective October 1, 2019. Following the filing of the annual cost report, the variable costs from the annual report are indexed to October 1, 2018, and the interim Variable Rate Base is recalculated.

Rate relief is subject to audit and settlement with reimbursement adjustment using the principles and guidelines outlined in Medicaid policy. Rate relief reimbursement cannot exceed the appropriate cost and rate limitations. The provider is reimbursed by Medicaid for any underpayment, and the provider must reimburse Medicaid for any overpayment. If the interim Variable Rate Base determined for rate relief reimbursement to the provider exceeds the audited Variable Rate Base reimbursement by more than three percent, the provider will be assessed a penalty equal to 10 percent of the total overpayment amount.

A nursing facility provider receiving rate relief is allowed to participate in any other add-on reimbursement programs at their election. These programs are handled under the Medicaid policy applicable to the program. The costs associated with these add-on programs are not included in the cost settlement of the variable costs for rate relief as previously described.
10.14.H. RATE RELIEF FOR A CURRENT PROVIDER OR A NEW PROVIDER IN A MEDICAID ENROLLED NURSING FACILITY WITH A VARIABLE RATE BASE BETWEEN 80 PERCENT AND 100 PERCENT OF THE CLASS AVERAGE VARIABLE COST

A current or new provider in a Medicaid enrolled nursing facility with a Variable Rate Base between 80 percent and 100 percent of the Class Average Variable Cost may request accelerated rebasing.

Rate relief applies only to the nursing facility's Variable Rate Base. The facility's qualification for adjustment of the Plant Cost Component in the Medicaid rate and Nurse Aide Training and Testing costs is handled in accordance with current Medicaid policy.

10.14.H.1. RATE RELIEF METHODOLOGY

Accelerated rebasing is the use of the Medicaid cost report data from the period ending in the current calendar year in the rate setting process, rather than using cost report data from the period ending in the previous calendar year under the standard reimbursement methodology. The nursing facility's allowable variable cost is indexed to October 1 of the year that is one year prior to the rate year being calculated by applying the appropriate cost index.

Example: The provider's cost report for the period ending December 31, 2019 could be used to set the October 1, 2019 rate if approved for rate relief under the criteria established in the Eligibility Criteria Section of this Appendix. The provider would be allowed to participate in any add-on reimbursement programs at their election.

The cost reporting is based on the provider's established fiscal year and must not cover a period of less than seven months. The cost report period used for accelerated rebasing must have a reporting period end date prior to January 1 of the State rate year. This example is applicable to the third and fourth criteria for rate relief qualifications as stated in the Eligibility Criteria Section of this Appendix.

Example: A cost report period ending after January 1, 2019 could not be used for accelerated rebasing of a rate effective during the State rate year October 1, 2018 through September 30, 2019.

10.14.I. RATE RELIEF FOR A CURRENT PROVIDER IN A MEDICAID ENROLLED NURSING HOME FACILITY WITH A VARIABLE RATE BASE LESS THAN OR EQUAL TO 60 PERCENT OF THE VARIABLE COST LIMIT

A current provider in a Medicaid enrolled nursing facility with a Variable Rate Base of less than or equal to 60 percent may request rate relief.

10.14.I.1. RATE RELIEF METHODOLOGY

A new Variable Rate Base of the rate is calculated that will be no more than 50 percent of the difference between the Class I Average Variable Cost and the existing Variable Rate Base for the current rate year. The resulting new Variable Cost Component will
thereby adjust the facility’s per diem rate. This Variable Rate Base will remain in effect through the current State fiscal year rate period ending September 30.

Example: A nursing facility has a current Variable Rate Base of $96, the Variable Cost Limit is $160, and the Class I Average Variable Cost is $150 (none of the figures are based on actual data, they are used for example purposes). Based on the facility’s request for rate relief, they are found eligible for the maximum 50 percent of the difference between their current Variable Rate Base and the Average Variable Cost. Their Variable Rate Base will then increase from $96 to $123.

The provider receiving rate relief in this category must utilize the standardized data to file a Class I Rate Relief Interim Cost Statement at the time of application for relief. The Interim Cost Statement excerpted worksheets from the Medicaid annual cost report (Medicaid cost reporting formats identified below) must reflect actual or expected costs incurred by the nursing facility for the provider’s cost reporting period. A facility with less than seven months remaining in its cost reporting period may file a second Interim Cost Statement at the end of that fiscal year.

The Rate Relief Interim Cost Statement must contain the following completed schedules of the cost report in the MDHHS required electronic format:

- Checklist
- Worksheet A
- Worksheet B
- Worksheet 1
- Worksheet 1-C (only if claiming allocated related party costs)
- Worksheet 2

The Interim Cost Statement is used to determine the interim rate for the remainder of the rate period. The interim rate is revised when the acceptable annual cost report is submitted and used for accelerated rebasing.

Effective October 1 of the following State fiscal year rate period, MDHHS determines the Variable Rate Base using accelerated rebasing. The accelerated rebasing utilizes the provider’s first cost reporting period that reflects at least seven months of nursing facility operation after rate relief. The cost reporting period is based on the provider’s established fiscal year. The nursing facility allowable variable cost is indexed to October 1 of the year that is one year prior to the new rate year being calculated by applying the appropriate cost index.

The subsequent rate year calculation is in accordance with standard reimbursement methodology.

**Example 1 - Request Received with Less Than Seven Months in the Cost Reporting Period:** A provider has a cost reporting period ending on December 31 of each year. The provider is approved for rate relief for rate year October 1, 2018 to September 30, 2019. The facility per diem rate is set using a new Variable Rate Base of
no more than 50 percent of the difference between the Variable Rate Base and Class I Average Variable Costs effective for the rate year beginning October 1, 2018. The provider must complete an Interim Cost Statement for variable costs for their cost report period that must be filed with their rate relief request. In this instance, they may submit a revised Interim Cost Statement for the provider’s cost reporting period January 1, 2019 through December 31, 2019. The rate year beginning October 1, 2019 would then utilize the accelerated rebasing to determine the rate for that period based on the December 31, 2019 fiscal year.

**Example 2 - Request Received with Seven Months or More in the Cost Reporting Period:** A provider has a cost reporting period ending December 31 of each year. The provider is approved for rate relief and submits their Interim Cost Statement ending on February 1, 2018. The facility per diem rate is set using a new Variable Rate Base of no more than 50 percent of the difference between the Class I Average Variable Cost and the Variable Base Cost effective for the rate period February 1, 2018 through September 30, 2018. The rate relief would be effective through the end of the rate relief period of September 30, 2018. The rate year beginning October 1, 2018 would then utilize the accelerated rebasing to determine the rate for that period based on the December 31, 2018 fiscal year.

Rate relief is subject to audit and settlement, with reimbursement adjustment using the principles and guidelines outlined in Medicaid policy. Rate relief reimbursement cannot exceed the appropriate cost and rate limitations. The provider is reimbursed by Medicaid for any underpayment, and the provider must reimburse Medicaid for any overpayment. If the interim Variable Rate Base determined for rate relief reimbursement to the provider exceeds the audited Variable Rate Base reimbursement by more than three percent, the provider will be assessed a penalty equal to 10 percent of the total overpayment amount.

A nursing facility provider receiving rate relief is allowed to participate in any other add-on reimbursement programs at their election. These programs are defined under the Medicaid policy applicable to the program. The costs associated with these add-on programs are not included in the cost settlement of the variable costs for rate relief as previously described.

**10.15 COUNTY MEDICAL CARE FACILITIES SPECIAL PAYMENTS (CMCFSP) PROGRAM**

Eligible County Medical Care Facilities (CMCF) may receive special payments for unreimbursed costs incurred for services to Medicaid beneficiaries. Allocations to individual facilities will be determined based upon unreimbursed costs certified as public expenditures in accordance with the Code of Federal Regulations (CFR) 42 CFR 433.51. MDHHS will make special payments to CMCFs who provided services to Medicaid beneficiaries for dates of service on and after January 1, 2009.
10.15.A. ELIGIBILITY FOR CMCFSP PROGRAM

To be eligible for participation in the CMCFSP Program, each provider must meet the following conditions:

- The provider must be a county-owned and -operated licensed CMCF.
- The provider must be certified to serve Medicaid beneficiaries.
- The provider must have reported Medicaid bed days during the fiscal year covered.
- The provider must have incurred allowable costs in excess of Medicaid reimbursement for Medicaid bed days reported during the fiscal year covered.

10.15.B. ENROLLMENT IN CMCFSP PROGRAM

To participate in the CMCFSP Program, a Medicaid-participating CMCF must submit a signed copy of the Attestation of Participation form to the MDHHS LTC Reimbursement and Rate Setting Section (RARSS). (Refer to the Directory Appendix for contact information.) Providers must acknowledge and agree to the terms of participation in the CMCFSP Program as outlined in this section and in the attestation form.

If a provider desires to receive interim payments during their fiscal year, the request to participate in the CMCFSP Program must be received prior to that fiscal year for which participation is desired. A provider may also wait to submit a request to participate until the filing of their annual Medicaid cost report. If a provider opts to participate when they file their annual cost report, the provider may receive payments for unreimbursed costs through the initial and final reconciliation, but will not receive interim payments.

If participation is approved, RARSS will enroll the provider in the CMCFSP Program in the provider's fiscal year following the approval of RARSS. The provider must submit an attestation form for each year that the provider desires to participate in the CMCFSP Program.

10.15.C. CALCULATION OF CMCFSP PAYMENT

An interim payment and reconciliation process will be employed to make payments to qualifying facilities. Allowable unreimbursed costs for services provided to Medicaid beneficiaries will be determined from information reported on the most recently filed cost report. Allowable unreimbursed costs are defined as total allowable Medicaid routine costs before formula limitations minus total Medicaid routine services revenue received. Medicaid routine services revenue includes all revenues received for Medicaid routine services, including all supplemental/enhanced payments (e.g., Net QAS, Net QMI Amount, etc.) from the State and all payments received from residents and other payers for the same services. Costs will be trended to the current state fiscal year using an inflation factor, without capital, taken from the Health Care Cost Review, which is published quarterly by Global Insight. Interim payments will then be made to qualifying CMCFs.
10.15.D. RECONCILIATION PROCESS

Interim payments will be reconciled twice. First, an interim reconciliation of the original payments will be conducted based on allowable Medicaid costs. Information needed to reconcile initial payments will be obtained from the cost report filed with MDHHS for the applicable reporting period. Second, payments will be readjusted based on changes to the filed cost report for the applicable reporting period, resulting from an audit of that cost report conducted by MDHHS.

Facilities receiving special payments for unreimbursed Medicaid costs are liable for any overpayment amount identified in the reconciliation process. Providers must repay any overpayment amount within 120 days of the date of notification of overpayment.
SECTION 11 - APPEAL PROCESS

A nursing facility participating in the Medicaid program may appeal an adverse action and certain determinations made by Medicaid. The provider will be given a written notice of the determination or action that outlines the proposed action, the provider’s appeal rights, and the appeal process.

Adverse actions include, but are not limited to:

- A suspension or termination of a provider’s Medicaid program participation.
- A reduction, suspension, or adjustment of provider payments.
- A retroactive adjustment following an audit or review of a facility's daily reimbursement rate or other services reimbursement.
- The prospective reimbursement rate determination.

Some elements of the Medicaid nursing facility reimbursement determination methodology are not appealed through an administrative process, but may be appealed to a court of appropriate jurisdiction. These are elements where an administrative remedy, if permitted for a single provider, would imply or necessitate a change for all providers or for all providers in a class and include, but are not limited to:

- The formula for the determination of the nursing facility cost factor.
- The Principles of Reimbursement and guidelines that define allowable costs.
- Medicaid Interim Payment (MIP) Program normal payment amount or reconciliation of payments and approved service billings.
- Non-Medicaid issues.
- Cost limits established in program policy.
- Medicaid’s determination of allowable items and costs until an audit has been completed.

The provider retains their right to an administrative hearing regardless of the outcome of the internal conference. The provider may waive the internal conference and directly request an administrative hearing. The review and hearings process for providers has been promulgated in the administrative rules located on LARA’s website. The process is explained in more detail in the MDHHS Administrative Hearing pamphlet on the MDHHS website. (Refer to the Directory Appendix for website information.)

11.1 AUDIT APPEALS

Each nursing facility cost report is audited to ensure that expenses were reported in adherence with Medicaid policy. Once the Exit Meeting is completed or waived, the provider is given a Preliminary Summary of Audit Adjustments Notice via File Transfer. This notice outlines audit results, serves as the adverse action notice, and advises the nursing facility of subsequent appeal rights, up to and including an administrative hearing. The provider or their designee has 30 calendar days from the date of the Preliminary Summary of Audit Adjustments Notice to request a formal hearing in accordance with MDHHS rules for hearings.
If the provider or the provider's designee does not respond to the Preliminary Summary of Audit Adjustments Notice within 30 calendar days of the date of the notice, then the Preliminary Summary of Audit Adjustments Notice will serve as the Final Summary of Audit Adjustments Notice. If the appeal process is exhausted, the provider will receive a Final Summary of Audit Adjustments Notice. The Final Summary of Audit Adjustments Notice outlines the final audit results and may not be appealed. A Preliminary Summary of Audit Adjustments Notice that serves as a Final Summary of Audit Adjustments Notice is also not appealable.

To ensure faster processing of final settlements, a provider should notify MDHHS via File Transfer if they are not appealing any of the audit adjustments in the Preliminary Summary of Audit Adjustments Notice.

If a provider does not appeal or does not respond to the Preliminary Summary of Audit Adjustments Notice or other notices or processes related to a conference or hearing within the allotted timeframe, the provider has waived the right to any further administrative review.

11.2 Rate Appeals

Providers are notified in writing of their Medicaid reimbursement rate(s) at least 30 calendar days prior to the rate's effective date. The provider is given an opportunity for informal review of the rate determination by RARSS. The provider may also formally appeal issues of disagreement or dispute regarding the determined reimbursement rate. A notice of appeal rights, with instructions on how to request an appeal, is included in the final settlement Notice of Medicaid Reimbursement.

11.3 Reimbursement Settlement Appeals

A final settlement reimbursement determination is made to determine the aggregate Medicaid reimbursement to the nursing facility for the period covered by the cost report. Providers are notified in writing of the final reimbursement settlement and given an opportunity for informal review of the settlement determination. The provider may formally appeal issues of disagreement or dispute of the reimbursement settlement determination. A notice of appeal rights, with instructions on how to request an appeal, is included in the final settlement Notice of Program Reimbursement.

11.4 Provisional Rates

A provider will be given a provisional rate for the new rate year if:

- Medicaid is responsible for a delay in determination procedures.
- An Area Office Conference or Administrative Conference is in progress.
- The potential for an Area Office Conference or an Administrative Conference is still open at the beginning of the rate year that begins a year and a day after the end of the rate year that is being processed.
For this purpose, "delay in the procedures" means (if applicable):

- Medicaid failed to issue the Preliminary Summary of Audit Adjustments in a timely manner.
- Medicaid failed to conduct the Area Office Conference in a timely manner.
- Medicaid failed to issue the Final Summary of Audit Adjustments Notice, including a final determination notice, in a timely manner.

11.5 PROVIDER PAYMENT ADJUSTMENT RESULTING FROM APPEAL DECISION

If the appeal result requires a change in a provider's rate or reimbursement level, the change will be made retroactively for service periods coinciding with the effective dates of the original reimbursement rate notice. Payment adjustments will be made by an aggregate adjustment rather than by individual claim adjustments.
SECTION 12 - MEDICAID INTERIM PAYMENT PROGRAM

A nursing facility has the option of selecting one of two payment methods:

- payment directly related to claims submitted to and processed by CHAMPS, or
- enrollment in the Medicaid Interim Payment (MIP) Program.

Providers enrolled in MIP receive a pre-determined dollar amount in cycled payments. MIP payments represent the expected dollar amount that Medicaid would have paid to the nursing facility in claims reimbursement during a period of time. The MIP payment calculation is based on historical approved billings, current reimbursement rate and claims data. MDHHS may perform interim reconciliation(s) if a significant amount is due the program. After the end of the quarter, a comparison is made of the most recent pre-determined payment and the approved days activity billed. The result of the comparison could result in an increase or a decrease to the MIP payment amount. A reconciliation is done at the end of the provider's fiscal year.

12.1 ENROLLMENT IN MIP

To participate in MIP, a Medicaid participating provider must submit a written request to RARSS. New providers must submit the necessary information outlined in the New Provider Information Data format. Established providers may submit a written request. Providers must acknowledge and agree to the terms of participation in the MIP as outlined in this section. Requests to enroll in MIP must be received one month prior to the beginning of the calendar quarter for which enrollment is desired.

If enrollment is approved, RARSS will enroll the provider in MIP in the calendar quarter following the approval of RARSS. Once MIP payments begin, claims approved through CHAMPS, regardless of date of service, will not generate a separate or additional payment.

12.2 DISENROLLMENT IN MIP

To disenroll in MIP, the provider must submit a written request to RARSS. The request to disenroll must be received by RARSS one month prior to the end of a calendar quarter. Disenrollment is effective at the beginning of the calendar quarter following the receipt of the request by RARSS.

Providers terminating participation in the Medicaid Program will not receive a MIP payment in the final month of participation.

The final month's MIP payment is subject to reconciliation to determine the status of MIP. Special arrangements may be made where there is guaranteed assurance the State can recover any payment difference that may exist as the result of MIP participation. A provider interested in a special arrangement must contact RARSS for consideration.

Providers interested in re-enrollment in the MIP program must wait at least one full quarter before reapplying.
12.3 CLAIMS SUBMISSION

Providers are expected to submit claims for services rendered in a timely manner. Although a provider enrolled in MIP does not receive payment directly from claims submission, future MIP payments are affected by claims submission. MIP payments are calculated for expected days to be reimbursed.

12.4 CALCULATION OF MIP PAYMENT

The MIP amount is recalculated on a quarterly basis. The recalculation is to update the MIP amount to reflect the current Medicaid billing activity for the facility and the provider’s Medicaid per diem rate when necessary. A recalculation may occur any time during a calendar quarter due to a change in the provider’s per diem rate. The quarterly recalculation is based on the approved claims activity over the most recent twelve months, regardless of the date of service, and Medicaid utilization during the same period. At the end of each quarter, the recently completed quarter's approved claims are used to update the MIP payment calculation.

The annually projected State liability to the provider (total reimbursement less other insurance and patient payments) will be divided by 24 to determine the regularly scheduled payment amount that will be made twice a month. The other insurance and patient payment amounts are based on the most recent quarter payment data projected to an annual amount.

In the case of major problems to Medicaid data system where a significant change has occurred in the approved claims data for a quarter as a result of Medicaid data system, the MIP amount would continue as previously calculated or the provider may request that RARSS perform a recalculation. If a significant reduction in the MIP amount is due to a problem outside the provider's control, such as a payment system error, the provider may request that RARSS perform a recalculation as a special consideration. RARSS staff will analyze and review the request to determine if special consideration is warranted.

Interim recalculations requests as a result of provider delays in billing must be submitted to RARSS for approval or denial. Providers that have demonstrated repeated occurrences of delays in billing may not receive an interim recalculation.

12.5 FREQUENCY OF MIP PAYMENT

The biweekly MIP payment is an estimate of one-half of the Medicaid liability for reimbursable services rendered in the previous month. The MIP payment will be paid on the first and third Thursday of each month. This means a provider could receive 100 percent of the monthly payment as early as the 15th day of the month and no later than the 21st day. Providers enrolled in MIP will receive six regularly scheduled payments during a calendar quarter.

12.6 ANNUAL RECONCILIATION

The reconciliation of approved claims and MIP payments is done annually, generally 90 calendar days after the end of the provider's fiscal year. If a provider changes their cost-reporting fiscal year, they must notify RARSS in advance in writing. Any change in a fiscal year could adversely affect a provider in the reconciliation.
If an underpayment has been made, the provider will receive a gross adjustment payment. If an overpayment is determined, recovery will be made by gross adjustment recovery against future payments. The gross adjustment process follows the Initial and Final Settlement practices in the respective subsections of this appendix. A provider may submit a written request to RARSS for an extended repayment schedule to repay the Program. The request must provide adequate justification for the need for extended repayment.

MIP amount determination, reconciliation and adjustments are not subject to appeal under the administrative rules. The MIP Program does not determine the reimbursement rate; it is an interim payment mechanism substituting for CHAMPS payments. The provider is given advance notice of the MIP actions and can request a review with RARSS. The provider's action must be timely and specific to the problem.

12.7 NEW PROVIDERS

New providers, resulting from a change in facility ownership, may request MIP at the time of Medicaid Program enrollment by submitting the information in the New Provider Information Data format to RARSS.

New providers in facilities without historical Medicaid Program billing data are not eligible for MIP.
SECTION 13 – APPRAISAL GUIDELINES

Where historical cost records of a purchased asset are not available or are incomplete, or where fair market value or current reproduction cost must be established, a timely appraisal of the historical costs, fair market value, or depreciated reproduction cost (as appropriate) of the asset made by an independent, recognized expert is acceptable for depreciation and owner's equity capital purposes. The appraisal of the historical cost of assets should produce a value approximating the cost of reproducing substantially identical assets of like type, quality, and quantity at a price level in a bona fide market as of the date of acquisition. The appraisal must be conducted in accordance with "The Principles of Appraisal Practices and Code of Ethics" of the American Society of Appraisers.

For Medicaid program purposes, the term "appraisal" refers primarily to the process of establishing or reconstructing the historical cost, fair market value, or current reproduction cost of an asset. It includes a systematic, analytic determination and the recording and analyzing of property facts, rights, investments, and values based on a personal inspection and inventory of the property.

<table>
<thead>
<tr>
<th>Appraisal Date</th>
<th>The date selected for establishing the value of fixed assets. For example, if December 31, 2017 was established as the appraisal date and the actual physical inventory of fixed assets was taken on February 1, 2018, any additions or dispositions of fixed assets between December 31, 2017 and February 1, 2018 must be taken into account in the appraisal values.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Appraised Book Value</td>
<td>The book value of an asset's appraised cost as of the date of acquisition less accumulated depreciation computed on an approved basis up to the appraisal date.</td>
</tr>
<tr>
<td>Appraisal Expert</td>
<td>An individual or firm that is experienced and specialized in multi-purpose appraisals of plant assets involving the establishment or reconstruction of the historical cost, fair market value, or current reproduction cost of such assets. The appraisal expert must employ a specially trained and well supervised staff with a complete range of appraisal and cost construction techniques; be experienced in appraisals of plant assets used by providers; and demonstrate a knowledge and understanding of the reimbursement principles, particularly those pertinent to depreciation.</td>
</tr>
</tbody>
</table>

13.1 APPROVAL

Medicaid does not require the nursing facility representatives to get prior approval before an appraisal is made for Medicaid purposes. Medicaid requirements are that the appraisal be conducted in accordance with the provisions of these guidelines. Questions regarding the appraisal of the nursing facility should be directed to the MDHHS LTC Reimbursement and Rate Setting Section (RARSS). (Refer to the Directory Appendix for contact information.) The provider must make the appraisal agreement and final report available to Agency staff for audit review. The scope of the appraisal must conform to Medicare Principles of Reimbursement as modified by Michigan Medicaid for provider costs in effect on the appraisal date.

13.2 NEED FOR APPRAISAL

An appraisal for Medicaid purposes should be made only where the nursing facility provider has no historical cost records, has incomplete records of the depreciable fixed assets, or needs to determine an asset's fair market value or depreciated reproduction cost. The appraisal should develop the historical cost and related information that will assist in the construction, reconstruction, or revision of accounting
records to enable the provider to make proper distribution of depreciation expense in cost reports. Normally, a proprietary provider will not need a historical cost basis of its assets. Where an appraisal is being performed to determine the current reproduction of an asset, the appraisal should represent the cost to reproduce the actual facility in like kind and should not be inflated by such factors as current or anticipated space needs or different construction types, e.g., masonry versus wood frame. Appraisals must be performed within the time limit specified in the proposed agreement and not on a piecemeal or intermittent basis.

13.3 PURCHASE OF ONGOING FACILITY

In establishing the historical cost of assets where an ongoing nursing facility is purchased through a bona fide sale after July 1, 1966 and prior to August 1, 1970, the purchase price or portion thereof attributable to the asset must not exceed the fair market value of the asset at the time of the sale. For depreciable assets acquired after July 1970, the cost basis of the depreciable assets must not exceed the lower of the current reproduction cost adjusted for straight-line depreciation over the life of the assets to the time of the sale or the fair market value of the tangible assets purchased.

If the nursing facility was participating in the Medicaid program at the time of sale, the sale price used by the seller in computing gain or loss for the final cost report must agree with the historical cost used by the new facility owner (the purchaser) in computing depreciation. However, where the basis for depreciation to the purchaser for an asset acquired after July 1970 is limited to the lower of current reproduction cost (adjusted for straight-line depreciation from the time of asset acquisition to the time of the sale) or the fair market value, the basis for computing gain or loss to the seller is the sale price. The gain or loss on the sale of each depreciable asset must be determined by allocating the lump sum sale price among all the assets sold (including land, goodwill, and any assets not related to resident care) in accordance with the fair market value of each asset as it was used by the seller at the time of sale. If the purchaser and seller cannot agree on an allocation of sale price, or if they do agree but there is insufficient documentation of the current fair market value of each asset, the SMA will require an appraisal by an independent appraisal expert to establish the fair market value of each asset and will make an allocation of the sale price in accordance with the appraisal. In any case, the sale price must be allocated among all the assets sold, even if some of the assets will be disposed of shortly after the sale.

If a purchaser cannot demonstrate that the sale is bona fide, the seller's net book value will be used by the purchaser as the basis for depreciation of the asset. In such cases, the purchaser must record the historical cost and accumulated depreciation of the seller recognized under the Medicaid program, and these must be considered as incurred by the purchaser for Medicaid purposes.

The cost basis for the depreciable assets of a nursing facility purchased in a bona fide sale on or after August 1, 1970 is limited to the lowest of the following:

- The total price paid for the facility by the purchaser as allocated to the individual assets;
- The total fair market value of the facility at the time of the sale as allocated to the individual assets;
- The combined fair market value of the individually identified assets at the time of the sale; or
- The current reproduction costs of the depreciable assets, depreciated on a straight-line basis over the life of the assets to the time of the sale.
The purchaser has the burden of proving that the transaction was a bona fide sale, and if the burden is not met, the cost basis may also not exceed the seller's cost basis less accumulated depreciation.

### 13.4 Fixed Assets Included in Appraised Values

Fixed asset values established by an appraisal must include all plant assets owned by the nursing facility provider that are used in resident care or in the overall operation and administration of the facility. Fixed assets used in research and other non-allowable cost areas or functions should be included so that depreciation is reflected in those departmental costs to provide a proper basis for allocating administrative and general expense. Fixed assets of a related organization not used by a provider in rendering resident care, assets acquired in anticipation of expansion, and assets held for investment and not used in the plant operation should not be included as a part of the appraised values.

Generally accepted accounting principles relating to improvements or betterments must be followed in determining the asset values established by the appraisal. Repair or maintenance of a nature that restores an asset to its original condition but does not extend its useful life is not betterment or improvement but an expense of that period.

The pricing of assets to establish historical costs is based on such actual supporting documents as vendor invoices and construction contractor completion statements. In the absence of invoices, such other records as revenue stamps, board minutes, contracts of purchase, and deeds recorded with the county's Recorder of Deeds may be used.

Other methods, such as manufacturer's catalogs, libraries of material prices, or techniques involving reverse trending and price indices may be used to establish acquisition costs and dates. Such methods may be used only when actual supporting documents are not available. When these sources and techniques are used, consideration must be given to the manufacturers and to quantity discounts. The determined value should closely approximate the actual historical cost of an asset at the date of acquisition.

### 13.5 Minor Equipment

Where minor equipment is concerned, the SMA recognizes that the inventory costs of such equipment may not truly reflect the cost of equipment purchased and in use by the nursing facility provider. Differences in the capitalization policies of providers and their desire to limit property record controls over certain classes of small assets cause variations in the recorded costs of assets generally considered depreciable. Medicaid will only recognize an appropriate amount for minor equipment costs where the original equipment acquisition cost was recorded in the accounting records as capital asset cost and had not previously recorded the minor equipment acquisition as current period operations expense.

Minor equipment includes, but is not limited to, such items as wastebaskets, bedpans, syringes, catheters, silverware, mops, and buckets. The general characteristics of this type of equipment are as follows:

- The equipment is in no fixed location and is subject to use by various departments in the nursing facility;
- The items are comparatively small in size and unit cost;
- The equipment is subject to inventory control;
There is a fairly large quantity of the items in use; and
The equipment has a useful life of approximately three years or less.

However, where all other depreciable assets are concerned, such as buildings, building equipment, major movable equipment, land improvements, and leasehold improvements, the Medicaid program will not recognize a historical cost of such assets in excess of the historical cost used for federal income tax purposes. Nursing facility providers should be able to support this historical cost by reference to original documents such as contracts, vouchers, checks and other evidence. If the provider does not have such original documentation constituting primary evidence of the historical cost of assets, the SMA will consider the provider's federal income tax returns as secondary evidence to be used in establishing and verifying the historical cost of the assets. Further, it is possible that because of the effects of other provisions within the Medicare Principles of Reimbursement, such as "cost to related organizations," the historical cost under Medicaid might be less than that allowed and used for income tax purposes.

Under the Principles, nursing facility providers may change the useful lives of assets where this can be justified and appropriately adjust the accumulated depreciation applicable to the historical cost of the assets involved. The effect of such adjustments is to change the undepreciated amount of the historical cost for Medicaid purposes. The Principles do not permit providers to increase the historical cost basis of their assets to recognize elements of costs or expenditures that were not capitalized but were considered as expense items.

**Example:** If a provider determines that a physical modification of the building was a repair, and thus an item of expense not capitalized, and uses the historical cost so determined for federal income tax purposes, the provider may not change the historical cost basis to include that expenditure previously determined a repair and capitalize it, i.e., increase the historical cost basis of the building for Medicaid purposes.

**Example:** If a provider builds a facility and, in establishing the historical cost of the building, determines that material and labor used were not part of the historical cost of the building and charges the cost of such material and labor into expenses for federal income tax purposes, the provider may not then include such expenditures in the historical cost of the building for Medicaid purposes.

Costs in excess of the cost basis used for federal income tax purposes will not be recognized under Medicaid. Further, for cost reporting periods beginning on or after January 1, 1970, the SMA will also require a redetermination of allowable costs for the reporting period covered to reflect the effects of the adjustment in the historical cost basis of the assets. For cost reporting periods beginning before January 1, 1970, however, no redetermination of such allowable costs need be made for the reporting periods covered. Accumulated depreciation applicable to the depreciable assets under the Medicaid program will include the full amount allowed during those periods in which an increased historical cost basis was used. The net book value will be used for computations of gain or loss on the sale of assets and for any other reimbursement purposes under Medicaid.

### 13.6 DONATED ASSETS

The fair market value for a donated asset is the price that the asset would bring by bona fide bargaining between well-informed purchasers and sellers at the date of acquisition. Usually, the fair market price is the price at which bona fide sales have been consummated for assets of like type, quality, and quantity in a particular market at the time of acquisition.
Exception: In cases where an asset has been used or depreciated under the Medicaid program and then donated to a provider, the basis of depreciation will be the lesser of the fair market value or the net book value of the asset in the hands of the owner last participating in the program.

If the nursing facility provider’s records do not include the fair market value of the donated assets as of the date of donation, an appraisal of such fair market value by a recognized appraisal expert will be acceptable for depreciation and owner's equity capital purposes.

Where material, labor, and services are donated in the construction of an asset, the asset value is the sum of the appraised cost of the material, labor, or services actually donated and the incurred cost of that part which was not donated. Labor costs should be determined in accordance with both the rates prevailing in the community at the time of construction and the type of labor incurred, i.e., if the labor donated was non-union labor, the cost would be at the non-union labor rate rather than at a union labor rate. If records are not available as to the actual labor, services, or material donated, the fair market value at the time of donation may be determined by the other methods shown in Medicare Principles of Reimbursement. Estimated labor costs provided by an owner or shareholder of a facility are not includable in the historical cost of constructed assets.

13.7 Assets Costing Less Than $100

Individual major movable assets costing less than $100, whether or not purchased in quantity prior to the appraisal date, may be capitalized at the time of appraisal at the purchase cost less accumulated depreciation from the date of acquisition regardless of the provider’s past accounting practices. If an election is made to capitalize such assets, this policy must be applied consistently.

Nursing facility providers that have expensed such items while in the Medicaid program may not decide later to capitalize them. This also applies to those providers that eventually decide to have appraisals. The appraisal expert may group major movable equipment with a unit cost of $100 or less. However, the book value assigned to such grouped assets at appraisal may not exceed the book value of the assets if individually appraised. Identification of the individual assets comprising the group must be available.

13.8 Tagging of Equipment

For Medicaid program purposes, tagging of equipment is not mandatory. In the absence of tagging, however, alternate records must be maintained to satisfy audit verification of the existence and location of the assets.

13.9 Appraisal Programs

Since the condition of nursing facility provider asset records varies significantly, an appraisal program may be comprehensive or partial. For instance, a provider may engage an appraisal expert to appraise a part of its facility for which no historical records have been maintained, or a provider may need to have an appraisal made on a particular class of assets in a specific identified location.

Comprehensive appraisal programs are usually appropriate because of such complexities as lump-sum purchases of assets or a complete lack of historical cost records for all assets.
An appraisal program should include:

- A physical inventory and listing of pertinent data for all applicable assets in use or in standby status as of the appraisal date or report date. The physical inventory may be made by the provider or by the appraiser. If made by the provider, the appraiser must verify the inventory.

- The acquisition cost of each item or unit of property including, but not limited to, architect fees, installation costs, and freight.

- A classification of each item or unit of property in accordance with the American Hospital Association (AHA) Health Data and Coding Standards Group, Estimated Useful Lives of Depreciable Hospital Assets. These classifications are:
  - Land improvements;
  - Buildings, including building improvement, fixed equipment, building services equipment and other fixed equipment;
  - Major movable equipment;
  - Minor equipment; and
  - Leasehold equipment.

  **Note:** Refer to the Cost Classifications and Cost Finding section of this appendix for a comprehensive description for capital assets by category.

- Establishing an estimated useful life for each asset. The estimated useful life for purposes of the appraisal must be consistent with the estimated useful life for each asset used by the provider for depreciation purposes.

- Determining a salvage value for each asset.

- Selecting a depreciation method for each asset.

- Calculating depreciation provisions for the current reporting period.

- Calculating accumulated depreciation using an approved basis, from the date of acquisition to the start of the Medicaid reporting period in which actual depreciation is first claimed.

- Determining square footage for each cost center to identify all rooms on a floor or within a building if the provider did not previously do this. This should be accomplished as explained in the AHA Cost Finding and Rate Setting for Hospitals publication.

- Reconciling appraisal results with provider records. For assets acquired prior to January 1, 1966, the provider's plant asset records, if any, and accounting records must be considered even though they may be inaccurate. This reconciliation must be made for land improvements, buildings, building services equipment and, where possible, for other major asset classifications.

  Where applicable, differences discussed by the reconciliation must be reflected as adjustments in the provider's accounting and plant asset records.

**13.10 APRAISAL REPORT**

The appraisal expert must prepare a letter of certification. The letter should state that, in the appraisal expert's judgment, the appraisal results were determined in conformity with Medicaid program regulations and requirements. This letter will include such information as:
Michigan Department of Health and Human Services

Medicaid Provider Manual

- Name of the nursing facility provider for which the appraisal was conducted;
- Location(s) of the facility included in the appraisal;
- Appraisal date, the date up to which accumulated depreciation was calculated (if other than the appraisal date), and the period for which current depreciation is calculated;
- Contents of data supplied to the provider, i.e., summaries, schedules, plans, etc.;
- Appraisal program descriptions, including:
  - The extent of asset appraisal, i.e., assets physically inventoried,
  - Pricing basis, and
  - Other pertinent information not readily apparent in the detail results, such as depreciation methods.
- Policy for determining capitalizable assets;
- Depreciation policy in the year of acquisition and disposal; and
- Identification of material items included in the appraisal where the values of such items were obtained from outside sources without independent verification by the appraisal expert.

13.11 LISTING OF ASSETS APPRAISED

If a listing of assets that constitutes the nursing facility provider's Medicaid property records is supplied, it must contain all necessary and pertinent information, even if portions were determined solely by the provider. A listing of assets should include the following information for each asset:

- Building location;
- Cost center or department;
- Asset description, usually including manufacturer's name, model number, serial number, etc.;
- AHA asset classification;
- Historical cost;
- Acquisition date;
- Estimated useful life to provider;
- Salvage value;
- Depreciation provision for current reporting period;
- Accumulated depreciation provision for current reporting period; and
- Pricing method necessary for adequate disclosure, where more than one method was used for various assets.

Reconciliations and comparisons with provider records must also be included, as well as square footage and other allocation basis information for buildings and cost centers within buildings.
13.12 Records

Appraisal work papers must be made available to SMA staff or their designee upon reasonable request.

13.13 Appraisal Expense

The expense of an appraisal to establish plant records for Medicaid program purposes, including the expense for appraisal of research and other non-resident departments incurred by a nursing facility provider after entrance into the program, may be included as an allowable cost. The expenses will be considered as administrative costs in the period incurred, subject to apportionment to the Medicaid program. Appraisal expenses incurred relative to assets not connected with provider operations are not allowable costs.

Where providers have appraisals made for other business purposes, such as insurance coverage, tax values or financing, the incurred expenses for such appraisals may be included in allowable costs as part of administrative and general costs. However, appraisal expenses incurred to establish values for the sale or anticipated sale of the nursing facility or provider organization are not allowable costs.

Where the SMA determines that a provider has incurred appraisal expenses to establish the historical cost of assets which were already adequately reflected in its books, records, or tax returns, the cost of performing the appraisal is not allowable.
**SECTION 14 – COST REPORTING AND REIMBURSEMENT DESCRIPTIONS AND CLASSIFICATIONS**

14.1 GENERAL

Refer to Cost Classifications and Cost Finding section of this appendix for detailed discussion and description of program cost categories for Plant, Variable Base, Support and Base/Support.

SECTION 1 – GENERAL INFORMATION [CHANGE MADE 7/1/23]

The Michigan Department of Health and Human Services (MDHHS) is required to assess all individuals seeking Medicaid-funded long-term services and supports (LTSS) that require level of care eligibility to determine their functional need for those services. The determination is an essential component of eligibility for services provided in nursing facilities, the MI Choice Waiver Program, the Program of All-Inclusive Care for the Elderly (PACE), and the MI Health Link Home and Community Based Services (HCBS) Waiver Program. Policies contained herein apply equally and consistently to each of these programs except as noted.

MDHHS uses a standard assessment and process for all programs and services that require an individual meet the nursing facility level of care. Programs may not use any other assessment in place of the Level of Care Determination (LOCD) tool for this determination. The LOCD assures a consistent and reliable process for determining that individuals meet the functional eligibility requirements.

Providers may access the LOCD online in the Community Health Automated Medicaid Processing System (CHAMPS) through the MILogin application. (Refer to the Directory Appendix for website information.) LOCD assessment data is entered and processed in CHAMPS.

The LOCD is a “point in time” assessment; that is, it determines the individual’s functional eligibility at the time of the assessment. MDHHS assumes that beneficiaries will maintain functional eligibility until they are determined otherwise through a reassessment or the LOCD’s End Date. An LOCD is an in-person meeting between the qualified and licensed health professional and the individual seeking functional eligibility. (revised per bulletin MMP 23-20)
SECTION 2 – ELIGIBILITY REQUIREMENTS

Individuals seeking Medicaid-funded services from nursing facilities, MI Choice Waiver Program, PACE, or the MI Health Link HCBS Waiver Program must meet eligibility criteria. These criteria must be met before Medicaid payment is made for services rendered. Each beneficiary must be eligible for Medicaid services, demonstrate a need for nursing facility level of care, and meet all additional program-specific requirements. Medicaid reimbursement for covered services is only appropriate when both financial and functional eligibility have been established, and the individual meets other program-specific eligibility criteria.

2.1 BASIC MEDICAID ELIGIBILITY

Eligibility for Medicaid is determined by a variety of factors including, but not limited to, financial rules, age, health status, state residency and citizenship status. Providers are instructed to refer individuals who are not yet Medicaid eligible to a local MDHHS office or the MDHHS website for assistance. (Refer to the Directory Appendix for website information.)

2.2 NEED FOR NURSING FACILITY LEVEL OF CARE

An individual’s need for nursing facility level of care is determined through the Nursing Facility Level of Care Determination (LOCD) assessment tool. The LOCD is a scientifically-validated and reliability-tested tool utilized during initial application and program eligibility redeterminations. This chapter describes the criteria and processes for administering the LOCD.

2.3 PROGRAM SPECIFIED ELIGIBILITY REQUIREMENTS

In addition to meeting Medicaid financial and functional eligibility requirements, individuals must also meet all program specific requirements before they can be determined eligible for that program. (Refer to the Nursing Facility Coverages, the MI Choice Waiver, the Program of All-Inclusive Care for the Elderly, and the MI Health Link chapters or to provider contracts for specific program requirements.) This chapter applies only to the LOCD process and is not intended to replace program-specific requirements.
SECTION 3 – NURSING FACILITY LEVEL OF CARE DETERMINATION PROCESS

3.1 LOCD ASSESSMENT REQUIREMENT FOR REIMBURSEMENT [Change Made 7/1/23]

The LOCD must be conducted prior to or on the day of an individual’s admission to a nursing facility or enrollment in MI Choice Waiver Program, PACE, or MI Health Link HCBS Waiver Program to ensure reimbursement for a Medicaid eligible beneficiary. The LOCD must be conducted in person (revised per bulletin MMP 23-20) by a qualified and licensed health professional. The qualified and licensed health professional conducting the LOCD or a designated employee of the organization must enter the assessment findings online in the CHAMPS system. Except where otherwise noted, only LOCDs entered in CHAMPS are considered valid for establishing functional eligibility.

The LOCD is considered payable when all the following conditions are met:

- the beneficiary meets LOCD criteria;
- the LOCD is entered online in CHAMPS;
- the LOCD is active on the date of service (meaning the date of service is on or after the LOCD Start Date and before the LOCD End Date); and
- the beneficiary is receiving LTSS and meets all program-specific eligibility criteria.

3.2 PERSONS AUTHORIZED TO CONDUCT THE LOCD

A qualified and licensed health professional must be a physician, registered nurse, licensed practical nurse, licensed social worker (Limited License Bachelor of Social Work, Limited License Master Social Worker, Licensed Bachelor Social Worker, or Licensed Master Social Worker), physician’s assistant, nurse practitioner, licensed psychologist, physical therapist, respiratory therapist, occupational therapist or speech therapist. Once the LOCD is completed by a qualified and licensed health professional, a clinical or non-clinical staff person may enter the LOCD information in CHAMPS. When the LOCD data are entered, CHAMPS applies the MDHHS algorithm to determine eligibility.

3.3 INITIAL LOCD ASSESSMENT [Change Made 7/1/23]

The LOCD must be conducted in person (revised per bulletin MMP 23-20) by a qualified and licensed health professional (as defined in the Persons Authorized to Conduct the LOCD subsection) before the provider is eligible for Medicaid reimbursement for services rendered to the beneficiary. The LOCD must be conducted prior to or on the day of admission or enrollment. The LOCD assessment findings for all LOCDs conducted, including Door 0 (zero), which indicate the individual does not meet LOCD criteria must be entered online in CHAMPS. (LOCD Doors are described in the Nursing Facility Level of Care Determination Criteria section.)

All LOCD determinations must be entered in CHAMPS. This is regardless of whether the individual or beneficiary meets LOCD criteria.
The provider may conduct LOCDs for individuals without Medicaid eligibility and enter the LOCD in CHAMPS prior to Medicaid eligibility being established. NOTE: Medicaid reimbursement for covered services is only appropriate when both financial and functional eligibility have been established, and the individual meets other program-specific eligibility criteria.

3.4 ADOPTION OF AN EXISTING LOCD BY ANOTHER PROVIDER

The LOCD is associated with the beneficiary, rather than the provider serving the beneficiary. Therefore, if a beneficiary is seeking admission to or enrollment in a program and has a current LOCD in CHAMPS, the provider may adopt that LOCD to confirm functional eligibility. When adopting a current LOCD, the provider must print out the computer-generated FOC from that LOCD record and complete the form with proper signatures and date. A qualified and licensed health professional from the admitting or enrolling provider must sign and date the CHAMPS-generated FOC from the adopted LOCD record. The FOC must also be signed by the beneficiary or their legal representative.

The provider may also choose to conduct a new LOCD. A new LOCD must be conducted if the current LOCD is no longer an accurate representation of the beneficiary’s current functional status.

3.5 LOCD START AND END DATES [CHANGE MADE 7/1/23]

All LOCDs must be entered in CHAMPS within 14 calendar days from the date the qualified and licensed health professional conducted the in person LOCD. (revised per bulletin MMP 23-20) Functional eligibility is valid for 365 days from the conducted date unless the provider conducts a new LOCD because a beneficiary had a significant change of condition. If a subsequent LOCD is conducted prior to the LOCD End Date and confirms the individual meets LOCD criteria, the new LOCD will have a 365-day end-date. Providers should refer to their specific program policies and procedures regarding the definition of a significant change of condition.

Each beneficiary must have a current LOCD in CHAMPS to establish eligibility for Medicaid reimbursement. The provider is responsible for:

- confirming that a current LOCD demonstrating eligibility is in CHAMPS;
- monitoring the beneficiary’s LOCD End Date to avoid an interruption in functional eligibility; and
- conducting another LOCD for the beneficiary prior to the current LOCD End Date or when there is a significant change of condition.

The LOCD Start Date will be the date the LOCD was conducted if the LOCD is entered in CHAMPS within 14 days of the conducted date. If the LOCD is entered in CHAMPS more than 14 days from the date the LOCD was conducted, CHAMPS will set the LOCD Start Date as the date the LOCD was entered in the system. The End Date of an LOCD will be 365 days from the date the LOCD was conducted. LOCDs are payable from the Start Date through the End Date. (Refer to the Nursing Facility Level of Care Determination Criteria section for an explanation of each Door.)

3.6 VERIFICATION REVIEW OF LOCD

The purpose of the verification review (LOCD-VR) is to determine if the LOCD was conducted properly according to policy and resulted in the correct determination of eligibility. A randomly selected sample of LOCDs will be reviewed by MDHHS or its designee. CHAMPS will randomly select a statistically significant
sample of LOCDs entered in the system. Upon submission of the LOCD in the system, CHAMPS will immediately notify the provider if the LOCD was selected for review with a pop-up message. The provider is required to submit all relevant documentation used to support the LOCD including, but not limited to, observation notes, assessment reports, physician orders or notes, caregiver reports, cognitive test results, time studies, nursing or case management notes, intervention reports, or evidence of other medical or community services provided. The related CHAMPS LOCD Application ID must be indicated on all documents for tracking purposes. Documents must be uploaded electronically in CHAMPS within one business day of the LOCD being selected for verification review in CHAMPS.

MDHHS or its designee will review the documentation furnished by the provider and make a determination within two business days of receiving the required documentation. Upon conclusion of the review, MDHHS or its designee will inform the provider of the results of the review in CHAMPS. When an LOCD is selected for review, the determination of eligibility is not complete until MDHHS or its designee notifies the provider of the results of the verification review.

When the individual is found to not meet LOCD criteria, MDHHS or its designee will provide to the individual an Adequate Action Notice including appeal rights per Medicaid policy. Services provided to the individual during the verification review process will not be eligible for Medicaid reimbursement.

### 3.7 ONGOING FUNCTIONAL ELIGIBILITY [CHANGE MADE 7/1/23]

Medicaid LTSS providers are required to ensure the individual continues to meet eligibility requirements on an ongoing basis. The functional eligibility that is assessed by the LOCD is one of the eligibility requirements. Therefore, Medicaid LTSS providers must ensure that individuals meet LOCD criteria on an ongoing basis. The LTSS provider is responsible for conducting a new LOCD if there is a significant change in the beneficiary’s condition. When a provider possesses information that a beneficiary may no longer meet eligibility, the provider must conduct an in person reassessment. (revised per bulletin MMP 23-20) Such information may come in the form of progress notes, routine assessments, staff observations, or any other documentation that might call into question the continued functional eligibility of the beneficiary.

### 3.8 PASSIVE REDETERMINATION OF FUNCTIONAL ELIGIBILITY

Providers are responsible for reassessing LOCD eligibility prior to the End Date of the current LOCD or when there is a significant change in the beneficiary’s condition. The Minimum Data Set (MDS) for nursing facility residents and interRAI Home Care Assessment System (iHC) for MI Choice Waiver Program participants contain items that correspond to the items in the LOCD. Under certain conditions, MDHHS will use a passive redetermination process based upon information from the beneficiary’s most recent assessment. When this assessment data is available, MDHHS will apply an algorithm that uses the common assessment items to allow CHAMPS to generate a new LOCD for the beneficiary.

Currently, passive redetermination is only available to nursing facility residents, including those in the MI Health Link program, and MI Choice Waiver program participants because MDHHS does not have electronic assessment data available for PACE or the MI Health Link HCBS waiver program. When MDHHS has electronic assessment data from those programs, MDHHS will use the passive redetermination process to allow CHAMPS to generate a new LOCD for the beneficiary. An LOCD generated by CHAMPS can be adopted by all LTSS programs.
3.8.A. LOCD DOORS ADDRESSED BY PASSIVE ASSESSMENT

The correspondence between MDS and iHC assessment items and LOCD items is extensive but not complete. Therefore, the algorithm used for the passive redetermination process is not able to verify eligibility through all LOCD doors. The passive redetermination process may confirm LOCD eligibility as follows:

Door 1: The passive redetermination process can confirm all criteria.

Door 2: The passive redetermination process can confirm all criteria.

Door 3: The passive redetermination process can confirm criteria from the MDS (nursing facilities). The passive redetermination process cannot confirm criteria from the iHC (MI Choice).

Door 4: The passive redetermination process cannot confirm criteria.

Door 5: The passive redetermination process can confirm all criteria.

Door 6: The passive redetermination process can confirm criteria from the MDS (nursing facilities). The passive redetermination process can partially confirm criteria from the iHC (MI Choice).

Door 7: The passive redetermination process cannot confirm the criteria.

Door 8: The passive redetermination process cannot confirm the criteria.

3.8.B. PASSIVE REDETERMINATION PROCESS [CHANGE MADE 7/1/23]

The initial LOCD for a beneficiary must be conducted in an in-person (revised per bulletin MMP 23-20) meeting by a qualified and licensed health professional. When a current LOCD exists for a beneficiary, MDHHS will use the passive redetermination process to allow CHAMPS to generate a new LOCD for the beneficiary. The amount of time from the provider conducting an assessment to MDHHS having access to the assessment data varies, affecting when the passive redetermination process will be applied.

When this process confirms continued functional eligibility, the Start Date of the CHAMPS-generated LOCD will be the date of the MDS or iHC assessment. CHAMPS will set the End Date at 365 days from the newly established Start Date. This process will repeat with each new MDS or iHC when the passive redetermination process confirms the beneficiary meets LOCD criteria and allows CHAMPS to generate a new LOCD.

When a beneficiary is currently eligible through a door that the passive redetermination process cannot confirm, the LOCD will be bypassed from the passive redetermination process and the current End Date will remain in effect.

The passive redetermination process will not determine ineligibility. If an individual previously met LOCD criteria through a Door the passive redetermination process can assess, and the process cannot establish eligibility from the most recent MDS or iHC, CHAMPS will issue a notice to the provider. Additionally, CHAMPS will generate a new
LOCD using Door 87 with a Start Date equal to the date the passive redetermination process was applied to the MDS or iHC assessment. Door 87 LOCD will have an End Date of 45 days from the Door 87 Start Date, or the End Date of the previous LOCD, whichever is earlier.

The provider must conduct a face-to-face LOCD before the Door 87 End Date to confirm the beneficiary continues to meet LOCD criteria. If the provider does not conduct a face-to-face LOCD before the Door 87 End Date, the provider will not be eligible for Medicaid reimbursement. Door 87 is not sufficient basis for issuing an Adverse Action Notice to the beneficiary. An Adverse Action Notice must be based upon a face-to-face LOCD.

### 3.8.C. PASSIVE REDETERMINATION DECISIONS

<table>
<thead>
<tr>
<th>If the face-to-face LOCD results are:</th>
<th>And the Passive Redetermination results are:</th>
<th>Then the LOCD results are as follows:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Eligible through a Door assessed by Passive Redetermination e.g. Door 1</td>
<td>Confirmed by Passive Redetermination e.g. confirm Door 1</td>
<td>New LOCD created with End Date 365 days from date of the MDS or iHC assessment.</td>
</tr>
<tr>
<td>Eligible through a Door not assessed by Passive Redetermination e.g. Door 4</td>
<td>Passive Determination is not applied</td>
<td>No change to existing LOCD or its End Date.</td>
</tr>
<tr>
<td>Eligible through any Door e.g. Door 7</td>
<td>Eligible through a different Door e.g. Door 2</td>
<td>New LOCD created with the Passive Redetermination Door and an End Date 365 days from the date of the MDS or iHC assessment.</td>
</tr>
<tr>
<td>Eligible through a Door assessed by Passive Redetermination e.g. Door 2</td>
<td>Passive Redetermination does not determine eligibility through any Door</td>
<td>LOCD Door 87 created with an End Date of 45 days from the date the passive redetermination ran.</td>
</tr>
</tbody>
</table>

**Note:** For the passive redetermination process to occur, a current LOCD must be in CHAMPS and the MDS or iHC must be conducted prior to the End Date of the LOCD.

### 3.8.D. NEED TO CONDUCT A NEW LOCD [CHANGE MADE 7/1/23]

For the Doors that the passive determination is unable to assess, the provider must conduct an in-person LOCD prior to the current LOCD End Date. The provider must conduct a new LOCD prior to the End Date and enter it in CHAMPS within 14 days of the conducted date.

When the passive redetermination applies but the process cannot confirm eligibility based upon MDS or iHC assessment data, CHAMPS will create a LOCD Door 87 with an End Date 45 days from the date that record is loaded in CHAMPS, or until the current End Date, whichever is earlier. When the passive redetermination process continuously...
confirms that the beneficiary meets LOCD criteria, it is possible that the beneficiary will not require another in-person LOCD because the passive redetermination process confirms LOCD eligibility and creates a new LOCD with a new 365-day End Date. In addition, providers must conduct an in-person LOCD when there is a significant change in the beneficiary’s condition, as defined by the program.  *(revised per bulletin MMP 23-20)*
SECTION 4 – NURSING FACILITY LEVEL OF CARE DETERMINATION CRITERIA [CHANGE MADE 7/1/23]

The Michigan Nursing Facility Level of Care Determination criteria includes seven domains of need, called Doors. The Doors include: (1) Activities of Daily Living; (2) Cognitive Performance; (3) Physician Involvement; (4) Treatments and Conditions; (5) Skilled Rehabilitation Therapies; (6) Behaviors; and (7) Service Dependency. The Doors and the assessment items are listed below. Guidance on administering the LOCD, including definitions and methods, is provided in the Michigan Medicaid Nursing Facility Level of Care Determination Field Definition Guidelines.

The LOCD should be an accurate reflection of an individual’s current functional status. This information is gathered in an in-person (revised per bulletin MMP 23-20) meeting by speaking to the individual and those who know the individual well, observing the individual’s activities, and reviewing an individual’s medical documentation. Refer to the Michigan Medicaid Nursing Facility Level of Care Determination Field Definition Guidelines on the MDHHS website for more information. (Refer to the Directory Appendix for website information.)

4.1 Door 1: Activities of Daily Living

Door 1 assesses four ADLs: (1) Bed Mobility; (2) Transfers; (3) Toilet Use; and (4) Eating.

4.2 Door 2: Cognitive Performance

Door 2 assesses short-term memory, cognitive skills for daily decision-making and making self-understood.

4.3 Door 3: Physician Involvement

Door 3 assesses the frequency of physician visits and physician order changes.

4.4 Door 4: Treatments and Conditions

Door 4 assesses a set of nine treatments and conditions that may be a predictor of potential frailty or increased health risk. The treatments and conditions include: Stage 3-4 Pressure Sores; Intravenous or Parenteral Feeding; Intravenous Medications; End-stage Care; Daily Tracheostomy Care, Daily Respiratory Care, Daily Suctioning; Pneumonia within the Last 14 Days; Daily Oxygen Therapy; Daily Insulin with Two Order Changes in the Last 14 Days; and Peritoneal or Hemodialysis.

4.5 Door 5: Skilled Rehabilitation Therapies

Door 5 assesses the presence of rehabilitation interventions, including physical therapy, occupational therapy, and speech therapy.

4.6 Door 6: Behavior

Door 6 assesses behavioral challenges. It includes five behavioral symptoms: wandering, verbal abuse, physical abuse, socially inappropriate or disruptive behavior, and resistance to care. Door 6 also assesses for the presence of delusions and hallucinations.
4.7 **DOOR 7: SERVICE DEPENDENCY**

Door 7 applies to beneficiaries currently receiving other services and supports in nursing facilities, MI Choice, PACE, or the MI Health Link HCBS Waiver program. It assesses the beneficiary’s dependence on services to maintain the current level of functioning and whether there are options for maintaining the level of functioning with services and supports available in the community.

4.8 **DOOR 8: FRAILTY**

MDHHS or its designee determined that the beneficiary is eligible for Medicaid LTSS services based upon the Frailty Criteria. Individuals who exhibit certain behaviors and treatment characteristics that indicate frailty may be admitted or enrolled to LTSS programs requiring an LOCD. The individual needs to trigger one element of this criteria to be considered for Frailty. Refer to the Michigan Medicaid Nursing Facility Level of Care Determination Exception Process on the MDHHS website for more information. (Refer to the Directory Appendix for website information.) For the MI Health Link program, the Frailty Criteria are applied by the Integrated Care Organization.

4.9 **DOOR 0: INELIGIBLE**

The LOCD was conducted and the beneficiary did not meet the criteria for any of the doors. The beneficiary is not eligible for Medicaid LTSS services at this time. (Refer to the Individual Does Not Meet LOCD Criteria, Action Notices, and Appeal Rights section for additional information.)

4.10 **DOOR 87: ELIGIBLE PENDING IN-PERSON REASSESSMENT [TITLE REVISED & CHANGE MADE 7/1/23]**

The passive redetermination process could not confirm eligibility. The provider has 45 days from the date of the passive redetermination or until the current End Date, whichever is earlier, to conduct a new in-person assessment. (revised per bulletin MMP 23-20)
SECTION 5 – INFORMED CHOICE [CHANGE MADE 7/1/23]

Informed choice is important for the MDHHS admission or enrollment process for LTSS. It is essential that individuals and their legal representatives fully understand all available options for receiving Medicaid LTSS. When an individual meets LOCD criteria, they automatically meet the functional eligibility requirement for nursing facility care, MI Choice Waiver Program, PACE, and MI Health Link HCBS Waiver Program. The Freedom of Choice form confirms that these options and referral processes have been explained to the individual. All Medicaid-funded LTSS programs are required to make program information available to individuals at admission/enrollment, at an in-person (revised per bulletin MMP 23-20) reassessment, and upon request from the individual or their legal representative.

Program providers must explain all Medicaid LTSS options as well as other available LTSS to the individual in a language the individual understands, as well as culturally and linguistically appropriate. It is important that individuals understand their options and that they have ongoing access to information about all settings and programs. As the functional ability of the individual may change over time and program options may change, it is important to continue to update their options and discharge plan.

5.1 FREEDOM OF CHOICE FORM

A properly completed Freedom of Choice (FOC) form documents the individual's choice of where to receive LTSS. It is required that all LTSS programs use this form to confirm the individual was made aware of their choices and to document the individual's preference. It is critical that individuals understand their options and have ongoing access to information about settings and programs. This requires providing the information using methods that are effective for the individual and in the individual's primary language. The individual (or their legal representative) must be informed of Medicaid LTSS available through the MI Choice Waiver Program, nursing facilities, PACE, and MI Health Link HCBS Waiver Program. An explanation regarding each program must be provided in a manner and using language that the individual understands. A hard copy of the form must be printed so signatures can be provided, and the signed form retained in the beneficiary's case record. The FOC form must be completed each time the beneficiary changes programs or providers, whether a new LOCD is conducted or not.

A CHAMPS-generated FOC form is automatically created online (and available to print) for every individual for whom an online LOCD was completed, regardless of the individual's determination of eligibility.

When adopting a current LOCD, the provider must print out the computer-generated FOC from that LOCD record and complete the form with proper signatures and date. A qualified and licensed health professional from the admitting or enrolling provider must sign and date the CHAMPS-generated FOC for the adopted LOCD record. The FOC must also be signed by the individual or their legal representative.

The information in Section I of the FOC is automatically populated by CHAMPS when the LOCD is entered. The individual's name, date of birth, conducted date of the LOCD, eligibility status, and, if determined eligible, the door through which the individual qualified is entered by the system. If the individual is found ineligible, a Door 0 will populate. The system also enters the provider's information and the date the LOCD was created. The qualified and licensed health professional who conducted or adopted the LOCD must sign, provide their title, and date the FOC under Section I. If using an FOC form not generated by CHAMPS, the provider must complete the appropriate fields in Section 1 and sign and date the form.
Section II of the FOC provides a list of LTSS options available to individuals who meet LOCD criteria, including nursing facility care, MI Choice Waiver Program, PACE, or MI Health Link HCBS Waiver Program. Individuals must also be informed of service options that do not require nursing facility level of care, including Home Health, Home Help State Plan services, and other services available locally that are not Medicaid-funded.

Section III of the FOC is completed when an individual does not meet the LOCD criteria. The individual, or their legal representative, must sign their name and provide the date they were notified of their LOCD ineligibility and appeal rights. Appeal rights must be provided according to Michigan Medicaid policy.

The form is completed when the above steps have been taken and it is signed and dated by the qualified and licensed health professional who conducted the LOCD and by the individual or their legal representative. The completed FOC form must be maintained in the individual’s record and provided to the individual or their legal representative upon request. A copy of the completed FOC form for non-qualifying individuals must be retained for at least three years.
SECTION 6 – INDIVIDUAL DOES NOT MEET LOCD CRITERIA, ACTION NOTICES, AND APPEAL RIGHTS

If an individual does not meet LOCD criteria for Doors 1 through 7, the provider must provide notice to the individual. The individual may request a Secondary Review from MDHHS or its third-party designee and request a Medicaid Fair Hearing before an Administrative Law Judge.

6.1 ISSUING AN ADVERSE ACTION NOTICE

When a qualified and licensed health professional determines that an individual does not qualify for nursing facility level of care services based on the online LOCD, and the provider does not contact the MDHHS designee to request a Secondary Review, the provider must issue an adverse action notice to the individual or their legal representative. The provider must also offer the individual referral information about other services that may meet the individual’s needs.

6.2 ADEQUATE ACTION NOTICE

For individuals who are not currently receiving LTSS in a program or setting that requires an LOCD, an adequate action notice is provided when the initial LOCD determines the individual does not meet LOCD criteria. The adequate action notice must include all the language in the sample adequate action notices for LTSS available on the MDHHS LOCD website. (Refer to the Directory Appendix for website information.)

6.3 ADVANCE ACTION NOTICE

The advance action notice is applicable to beneficiaries who met their initial LOCD, but based upon a significant change in condition, did not meet their subsequent LOCD. The advance action notice must include all of the language in the sample advance action notices for LTSS available on the MDHHS LOCD website. (Refer to the Directory Appendix for website information.)

When a current LTSS beneficiary is determined to not meet LOCD criteria, the provider must follow program-specific procedures for the provision of notice to the beneficiary.

6.4 LOCD SECONDARY REVIEW

The provider or the individual (or their legal representative) may request an LOCD Secondary Review. This review is completed by MDHHS or its designee to ensure full consideration of LOCD eligibility options. The Secondary Review is available only when an LOCD is entered in CHAMPS and results in a Door 0, indicating ineligibility. The review is a secondary review of documentation for all LOCD Doors, including Door 8.

The LOCD Secondary Review Process is conducted as follows:

- A Secondary Review may be initiated by the provider, individual or their legal representative after the qualified and licensed health professional issues an adverse action notice based on a finding of ineligibility. The provider, individual or their legal representative may request a Secondary
Review from MDHHS or its designee. The individual will have three business days to make a request following written notice of the adverse action.

- In the action notice, the provider who conducted the ineligible LOCD must provide the individual with information on how to timely request a Secondary Review following an ineligible LOCD.
- Following the individual’s request for review, the MDHHS designee will contact the provider who conducted the LOCD and inform them to upload documentation in CHAMPS for review.
- The provider who conducted the LOCD will upload the relevant documentation in CHAMPS within one business day of being notified to do so.
- The MDHHS designee will review the documentation, obtain information from the individual or their legal representative, if requested, and notify the provider and the individual or their legal representative of the decision.
- If the Secondary Review determines that the individual is eligible, MDHHS or its designee will contact the provider and the individual or their legal representative.
- If the Secondary Review determines that the individual is ineligible, MDHHS or its designee will issue an adverse action notice and inform the individual of their appeal rights.
- MDHHS or its designee will enter the appropriate LOCD in CHAMPS.

6.5 APPEAL RIGHTS AND MEDICAID FAIR HEARING

When an individual is determined ineligible for services and an appeal is requested, it is an adverse action for the individual. If the individual or their legal representative disagrees with the denial, they may request an administrative hearing.

The Michigan Office of Administrative Hearings and Rules (MOAHR) Administrative Hearings Pamphlet explains the process by which an administrative hearing and a preliminary conference are brought to completion. The pamphlet is available for review on the MDHHS website. (Refer to the Directory Appendix for website information.) Both a provider representative and a MDHHS Long Term Care Policy Section representative must be present at the hearing.

When a current LTSS beneficiary is determined to not meet LOCD criteria, the provider must follow program-specific procedures for the provision of notice to the beneficiary.

When a beneficiary is determined to no longer be eligible for Medicaid-funded services and an appeal is requested, Medicaid will continue to pay for services if the beneficiary appeals within required program timeframes. If the beneficiary does not appeal the decision, the provider is eligible for Medicaid-reimbursement through the effective date of the advanced action notice, or the date in which the beneficiary stopped receiving services, whichever is first. When the beneficiary appeals the decision in compliance with MDHHS policy, MDHHS will reimburse the provider for services throughout the appeal process. If the beneficiary’s appeal is denied, MDHHS will reimburse the provider for up to 30 days from the date of issuance of the hearing decision and order.

**SECTION 1 – GENERAL INFORMATION**

Michigan Department of Health and Human Services (MDHHS) administers the fee-for-service (FFS) programs for Medicaid, Healthy Michigan Plan, Children’s Special Health Care Services (CSHCS), and Maternity Outpatient Medical Services (MOMS). This chapter, the Michigan Pharmaceutical Product List (MPPL), and the Michigan Preferred Drug List (PDL)/Single PDL comprise program policies and explain coverage and reimbursement for the services dispensed and billed by enrolled pharmacies.

Throughout this chapter the terms Medicaid and MDHHS are used to refer to the Michigan Medicaid FFS, Healthy Michigan Plan, CSHCS, and MOMS programs unless otherwise noted.

**1.1 MDHHS PHARMACY BENEFITS MANAGER AND OTHER VENDOR CONTRACTORS**

MDHHS retains all decisions for policy, coverage, and reimbursement, and contracts with a pharmacy benefits manager (PBM). PBM services provided include pharmacy claims payment (paper and electronic), claims instruction, prior authorization (PA), prospective drug utilization, retrospective drug utilization, clinical consultation, provider information lines, and Maximum Allowable Cost (MAC) rate setting. (Refer to the Directory Appendix for PBM contact information.)

The PBM website contains the:

- Pharmacy Claims Processing Manual for Michigan Medicaid
- Michigan Pharmaceutical Product List (MPPL)
- Michigan Preferred Drug List (PDL)/Single PDL
- Drug Utilization Review (DUR) Meeting Notices
- Dose Optimization Program
- Pharmacy and Therapeutics (P&T) Committee Meeting Notices
- Pharmacy Forms
- Maintenance Drug List

Pharmacies may call the PBM for questions or concerns. Beneficiaries may call the PBM Beneficiary Helpline. (Refer to the Directory Appendix for contact information.)

MDHHS contracts with other vendors to perform financial, program or provider audits on behalf of the State of Michigan. (Refer to the Provider Resources portion of the Directory Appendix for additional information.)

**1.2 DEFINITIONS**

The following definitions have specific meaning in the Pharmacy program:

<p>| Brand-Name Drug | A single-source drug, a cross-licensed drug or an innovator drug for which a lower-cost generic equivalent is available. |</p>
<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Compounded Prescription</td>
<td>The combination of two or more ingredients extemporaneously mixed in usually accepted therapeutic doses. This requires the pharmacist's skill in weighing, measuring, levigating, etc., at the time of dispensing. The allowable compounding fee applies to the preparation of an individual prescription. It does not apply to prescriptions dispensed from a previously prepared stock supply (i.e., premaking a special lotion, cream, or ointment in gallons or pounds).</td>
</tr>
<tr>
<td>Dispensing Fee</td>
<td>Payment for filling a prescription and all related services performed by a pharmacist.</td>
</tr>
<tr>
<td>Drug Efficacy Study Implementation (DESI) Drugs</td>
<td>FDA designations related to &quot;substantial evidence&quot; of effectiveness. These products are also known as proposed less than effective.</td>
</tr>
<tr>
<td>Drug Rebate Program</td>
<td>Administered by the Centers for Medicare &amp; Medicaid Services’ Center for Medicaid and State Operations. It was created by the Omnibus Budget Reconciliation Act of 1990 (OBRA '90) and requires drug manufacturers to enter into and have in effect a national rebate agreement with the Secretary of the U.S. Department of Health &amp; Human Services (HHS) for states to receive Federal funding for outpatient drugs dispensed to Medicaid patients. To receive rebates, States must identify the drugs by their national drug code.</td>
</tr>
<tr>
<td>Drug Utilization Review (DUR)</td>
<td>A process designed to ensure that prescriptions are appropriate, medically necessary and not likely to result in adverse medical outcomes.</td>
</tr>
<tr>
<td>Drug Utilization Review Board (DUR Board)</td>
<td>An advisory board to the State’s Medicaid Program that includes physicians and pharmacists.</td>
</tr>
<tr>
<td>Fraud</td>
<td>Deliberate, intentional, and willful act with the specific purpose of deceiving MDHHS with respect to any material fact, condition, or circumstance affecting eligibility or need.</td>
</tr>
<tr>
<td>Generic Drug</td>
<td>Refers to a nonproprietary drug or class of drugs. The generic name refers to the official chemical composition of the drug as published in the latest edition of a nationally recognized pharmacopoeia or drug compendium. Generics do not refer to a particular brand name product.</td>
</tr>
<tr>
<td>Labeler</td>
<td>Any firm that manufactures (including repackers or relabelers) or distributes (under its own name) the drug.</td>
</tr>
<tr>
<td>Long Term Care Pharmacy</td>
<td>Refers to pharmacies specializing in provision of drugs and services in an institutional setting such as a nursing facility, medical care facility or hospital long term care unit.</td>
</tr>
<tr>
<td>Maximum Allowable Cost (MAC)</td>
<td>The maximum cost allowed by MDHHS for certain multiple source brands, generics, cross-licensed drugs and sometimes for sole-source drugs or classes.</td>
</tr>
<tr>
<td>Multiple Source Drug (Multi-Source)</td>

</tbody>
</table>
### National Drug Code (NDC)

The 11-digit code assigned to all prescription and over-the-counter products by the labeler/manufacturer of the product under Food and Drug Administration (FDA) regulations.

### Out of State Pharmacy

An entity not housed within the state of Michigan but registered by the Michigan Board of Pharmacy. An Out of State Pharmacist is required to be licensed in the state the pharmacy is located in.

### Over-the-Counter (OTC) Drug

A drug that can normally be purchased without a physician’s prescription, although it may require a prescription if covered by Medicaid.

### Pharmacist

A person licensed under Michigan statutes to provide services within the scope of pharmacy practice.

### Pharmacy

An entity registered by the Michigan Board of Pharmacy.

### Pharmacy and Therapeutics (P&T) Committee

An advisory committee to MDHHS on issues affecting prescription drug coverage for its various health care programs. The committee recommends guidelines for prescription drugs covered in its various health care programs.

### Point of Sale (POS)

Real-time on-line adjudication of pharmacy claims to the PBM. Point of Sale provides participating pharmacies real-time access to beneficiary eligibility, drug coverage, pricing information, guidelines for drug use, and dispensing fees.

### Prescribed Drug

A drug, either legend or over-the-counter, that is ordered by a prescriber to be used by a patient to treat a disease or condition.

### Prescriptions Not Picked Up

Retail prescriptions filled but not dispensed or picked up by the beneficiary or his representative.

### Prospective Drug Utilization Review (ProDUR)

Detection, evaluation, and counseling components of pre-dispensing drug therapy screening. ProDUR is required at the point of sale before each prescription is delivered to a Medicaid beneficiary. ProDUR screening is the responsibility of each Medicaid participating pharmacy and is a requirement of Medicaid participation.

### Retrospective Drug Utilization Review (RetroDUR)

Program that analyzes and interprets patterns of prescribing and dispensing beneficiary drug usage through periodic examinations of claims data to identify patterns of fraud and abuse, gross overuse, and inappropriate or medically unnecessary care.

### Tamper Resistant Prescription Pad

A tamper resistant prescription pad must contain all three of the following characteristics:

- Prevent unauthorized copying of a completed or blank prescription form.
- Prevent the erasure or modification of information written on the prescription by the prescriber.
- Prevent the use of a counterfeit prescription form.

### Wholesale Acquisition Cost (WAC)

The list price determined by a manufacturer for a pharmaceutical sold by a manufacturer to a wholesaler.

---

### 1.3 CHILDREN’S SPECIAL HEALTH CARE SERVICES

Pharmacy coverage for beneficiaries who only have CSHCS coverage is limited to those pharmaceutical products that are required for the treatment of the CSHCS qualifying diagnosis. The beneficiary’s CSHCS qualifying diagnosis is listed on his eligibility letter by ICD code. Pharmacies may not bill for...
pharmaceutical products not required for the treatment of the CSHCS qualifying diagnosis. Also, the MPPL specifies other coverages unique to this program.

1.4 PLACE OF SERVICE

Coverage and payment policies for products dispensed in the settings listed below are not contained in this chapter or the MPPL. Healthcare providers should refer to the provider-specific chapter for Hospital, Practitioner, Nursing Facility, or Laboratory in this manual for these services:

- Physician’s office or clinic: Injectable products used in physician offices or clinics are reimbursed to the healthcare provider administering the drug, not a pharmacy. If a pharmacy sells injectable products to a physician or clinic, a pharmacy must obtain payment directly from the purchasing provider and not MDHHS. Injectable products are not to be dispensed to the beneficiary for the purpose of administration at the physician’s office.

  Exception: Beneficiaries with a Benefit Plan ID of NH (Nursing Home) can receive injectable drugs as a pharmacy benefit due to the relationship between the nursing facility and its contracted providers.

- Inpatient hospital.

- Mental health, hospital long term care, and medical care facilities with in-house pharmacies.

- Laboratory.

1.5 OUTPATIENT HOSPITAL

Outpatient hospitals with pharmacies enrolled with MDHHS as pharmacy providers must bill for take-home pharmaceutical products in compliance with policies of this chapter and the MPPL. Such services cannot be billed under the outpatient hospital’s NPI number.

Injectable drugs and single doses given on the premises, including products used in conjunction with lab, radiology, and other medical procedures, must be billed using the outpatient hospital’s NPI number, not the pharmacy’s NPI number.

1.6 HOSPICE

Services, including drugs and nutritional supplements related to a beneficiary’s terminal illness, are provided by the hospice (Benefit Plan ID of Hospice). The hospice reimburses pharmacies for these services. Coverage, payment amounts, and billing procedures of the particular hospice must be followed. To confirm that a product is not related to the terminal illness, the pharmacist must contact the hospice regarding coverage before billing. A pharmacy must not bill MDHHS for prescription services related to the terminal illness.

The MDHHS PBM messages back to the pharmacy when claims are submitted for beneficiaries with a Benefit Plan ID of Hospice. It is the pharmacy’s responsibility to assure that the claim submitted is not related to the beneficiary’s terminal illness. If billings contrary to this policy are found in post-payment review, MDHHS will recover inappropriate payment.
1.6.A. EXCEPTION FOR SELECTED HIV DRUGS

MDHHS separately reimburses a pharmacy for selected HIV drugs that the beneficiary had previously used to prevent the terminal illness. These HIV drugs include Protease Inhibitors, Nucleoside/tide Reverse Transcriptase Inhibitors, and Non-Nucleoside Reverse Transcriptase Inhibitors, even though the product is related to the terminal illness.

1.6.B. PRODUCTS NOT RELATED TO THE TERMINAL ILLNESS

Covered drug products not related to the terminal illness may be separately billed by the pharmacy. For example: A hospice beneficiary has leukemia and a lifelong condition of diabetes. Products related to the diabetes can be separately billed by a pharmacy provider.

1.7 MEDICAID HEALTH PLANS

Providers should verify eligibility to determine if the beneficiary is enrolled in a MHP (Benefit Plan ID of CSHCS-MC, MA-HMP-MC, MA-MC or MME-MC) for the DOS. (Refer to the Beneficiary Eligibility chapter for additional information.)

Coverage criteria (including PA) and reimbursement limits for members of MDHHS contracted Medicaid Health Plans (MHPs) may not follow the policies specified in this chapter applicable to FFS.

Each health plan enrolls its own providers and structures its own billing system. All plan providers are required to enroll/register in CHAMPS. Providers must contact the contracted plan for information regarding reimbursement issues.

Pharmacy Aspects of MHP: Quick Reference

</table>
Drugs covered by Medicare Part D, but not included in the beneficiary's Medicare Part D Plan’s formulary, will not be covered by Medicaid.

Medicaid does not cover Part D drugs for beneficiaries who are enrolled in Medicare Part A and/or Part B and elect to opt out of a Medicare Prescription Drug Plan (PDP). Pharmacies should refer to the Pharmacy Benefits Manager (PBM) website for information on billing Medicare Part D when eligible beneficiaries have not yet enrolled in a Part D plan. (Refer to the Directory Appendix for website information.)

Drugs excluded from coverage by Medicare Part D will not be covered by Medicaid, except for the following:

- Over-the-counter (OTC) drugs listed on the MPPL
- Over-the-counter agents used to promote smoking cessation
Select group of vitamins and minerals prescribed at therapeutic doses for deficiency diagnoses that meet Medicaid coverage criteria.

Questions concerning the Medicare Part D benefit must be directed to Medicare. (Refer to the Directory Appendix for contact information.)
SECTION 2 – PRESCRIBER REQUIREMENTS

All MDHHS-covered legend and over-the-counter drugs (OTCs), except condoms, require a prescription order by a licensed professional acting within their scope of practice as defined by state and federal laws, rules, and regulations.

Coverage of pharmaceutical products is based on limitations stated in this chapter, the MPPL, and medical necessity. Determination of medical necessity and appropriateness of service is the responsibility of the prescribing physician/provider (prescriber) within the scope of currently accepted medical practice and MDHHS limitations. Participating providers must observe applicable State and Federal laws, rules, regulations, and policies. Providers or designees of such providers who prescribe a controlled substance are required to check the Michigan Automated Prescription System (MAPS) for the beneficiary’s 12-month prescription drug history before prescribing controlled substances. Documentation of the required MAPS check should be retained in accordance with the Medicaid record retention policy. Exemptions to this requirement include:

- Beneficiaries who are receiving cancer treatment or hospice/palliative care in long-term care facilities described in 1396d of Title XIX or other facilities with a single pharmacy contract, and
- Prescriptions provided during declared natural disasters or emergency services. (Refer to the Directory Appendix for MAPS information.)

MDHHS may impose additional constraints to reduce misuse.

2.1 SCOPE OF PRACTICE

MDHHS only reimburses for products prescribed by a licensed prescriber that are within the prescriber’s scope of currently accepted medical practice and MDHHS limitations.

2.2 PRESCRIBER IDENTIFICATION

Pharmacy providers must provide the individual prescriber’s National Provider Identifier (NPI) on the submitted claim. MDHHS will deny pharmacy claims where the prescriber is not enrolled in CHAMPS.

Refer to the General Information for Providers chapter and the Practitioner chapter for additional information.

2.3 SANCTIONED PRESCRIBERS

MDHHS does not reimburse for pharmaceuticals prescribed by providers sanctioned by the Federal Government, the State of Michigan, or for prescribers having a limited, expired (lapsed), or revoked license. A list of sanctioned providers is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

2.4 OTHER PERTINENT SECTIONS

Prescribers should refer to other pertinent sections in this chapter for policies and procedures related to Drug Utilization Review, Prior Authorization, and the MPPL.
SECTION 3 — PHARMACY REQUIREMENTS

3.1 COMPLIANCE WITH APPLICABLE STATE, FEDERAL, AND MDHHS PROVISIONS

A provider who complies with all licensing and regulation laws applicable to the practice of pharmacy in Michigan may enroll as a Medicaid provider. Applicable State and Federal laws, rules, regulations, and policies must be observed by participating pharmacies. MDHHS does not enroll dispensing physicians as Medicaid providers for pharmacy services. (Refer to the General Information for Providers Chapter of this manual for additional information.)

3.2 ENROLLMENT

Pharmacy enrollment is processed through CHAMPS. Refer to the General Information for Providers Chapter, Provider Enrollment section, for additional information.
SECTION 4 – COUNSELING REQUIREMENTS

Pharmacies must follow the counseling requirements mandated in State and Federal statutes and regulations. These requirements do not apply to drugs dispensed in nursing facilities that are in compliance with the drug regimen review procedures specified by the licensing authority.

4.1 OFFER TO DISCUSS [CHANGE MADE 7/1/23]

For every new prescription presented by the beneficiary, the pharmacy’s representative must offer the beneficiary the opportunity to discuss/receive counseling from the pharmacist regarding the new prescription. The offer for counseling must be in a positive, helpful manner. If practical, the offer to counsel must be in person (revised per bulletin MMP 23-20) and verbal. Otherwise, it is permissible for the offer to be made in writing or by telephone. Pharmacies are required to provide toll-free access for beneficiary inquiries related to products dispensed. A pharmacist is not required to provide counseling when a beneficiary or representative refuses the offer for counseling.

4.2 DISCUSSION

When the beneficiary (or representative) accepts the offer for counseling, it must be provided by the pharmacist in person (whenever practical) or by telephone and may include written materials. Information must be in a language that can be understood by the beneficiary (or representative) and must include an opportunity for questions.

In addition to discussing interactions with drugs previously dispensed by the pharmacist, the discussion should also include the potential interaction with any other drugs the beneficiary indicates he is taking. The beneficiary (or representative) must be counseled in a confidential manner, consistent with any State or Federal regulations. Federal law requires that the pharmacist must discuss all the items indicated below, and any others deemed significant in the pharmacist’s professional judgment. If an interpreter is required, the provider must provide one free of charge.

- The name and description of the medication.
- The dosage form, dosage, route of administration, and duration of drug therapy.
- Special directions and precautions for preparation and use by the beneficiary.
- Common side effects or interactions and therapeutic contraindications that may be encountered, including their avoidance, and the action required if they occur.
- Techniques for self-monitoring drug therapy.
- Proper storage.
- Prescription refill information.
- Action to be taken in the event of a missed dose.
SECTION 5 – SIGNATURE LOG, DATA COLLECTION AND DOCUMENTATION

NOTE: The requirements in the following subsection are waived in accordance with Letter L 20-20 beginning March 26, 2020 and until MDHHS issues policy notifying providers of their termination.

5.1 SIGNATURE LOG

Pharmacy providers must document receipt or delivery of new or refilled medications to the intended Medicaid beneficiary. This documentation serves as verification of the beneficiary receiving the prescription billed. The absence of the appropriate verification indicates the beneficiary did not receive the prescription, and funds will be recouped from the pharmacy. Documentation described below must be retained for review by MDHHS or the MDHHS agent for seven years and is subject to audit. Any method of reproducing past signatures is not acceptable.

5.1.A. SIGNATURE LOG

Pharmacy providers must maintain a log containing the following information:

- Beneficiary’s name;
- The manual or electronic signature of the beneficiary or that of their representative; and
- The date of receipt of the prescription.

The log must effectively differentiate between prescriptions received by a beneficiary for which counseling was accepted and provided, and those for which counseling was offered and was declined.

5.1.B. PROOF OF DELIVERY

Pharmacy providers must maintain a log verifying proof of delivery for all prescriptions delivered by common carrier (i.e., FedEx, UPS, USPS, etc.). Pharmacies should be able to link the tracking information to the prescription record through supporting documents if requested. Pharmacies must validate the member’s address prior to mailing the prescription. A tracking number alone is not considered a valid proof of member receipt. The tracking number must be accompanied by either:

- the tracking detail from the carrier showing medication was delivered, including date and time of delivery; or
- the manual or electronic signature of the member or that of their representative at the time of delivery.
5.2 Beneficiary Information and Data Collection Requirements

To meet specified State and Federal requirements, pharmacies must make a reasonable effort to obtain, record, and maintain on file at least the following information:

- Name, address, telephone number, date of birth (or age), and gender of the beneficiary.
- Pharmacist notes on the beneficiary’s drug therapy.
- Beneficiary history when significant, including:
  - Disease state(s);
  - Known allergies and drug reactions; and
  - Comprehensive list of drugs and relevant devices.
- Whether the offer to counsel was made and whether this offer was accepted or rejected by the beneficiary or the beneficiary’s representative.

5.3 Documentation Requirements

To assure that pharmacy counseling and other data collection requirements were performed, pharmacies must record the required information in the beneficiary’s manual or electronic profile, in the prescription signature log, or any other system of records. Regardless of the format used, the associated documentation must be retained electronically or otherwise for a period of seven years, or longer if specified by law.

5.3.A. Non-Controlled Electronically Transmitted Prescriptions

If a prescription is created, signed, transmitted and received electronically, all records related to that prescription must be retained electronically. Records must be retained electronically for a period of seven years, or longer if specified by law. Records must be made available within 72 hours or as requested. The electronically transmitted prescription must include all of the following information:

- The name, address, and telephone number of the prescriber;
- The full name of the patient for whom the prescription is issued;
- An electronic signature or other identifier that specifically identifies and authenticates the prescriber;
- The time and date of the transmission;
- The identity of the pharmacy intended to receive the transmission; and
- Any other information required by the federal act or state law.

The electronic equipment or system utilized in the transmission and communication of prescriptions must provide adequate confidentiality safeguards and be maintained to protect patient confidentiality as required under any applicable federal and state law and to ensure against unauthorized access. The electronic transmission of a prescription must be communicated in a retrievable, recognizable form acceptable to the intended
recipient. The electronic form utilized in the transmission of a prescription must not include "dispense as written" or "d.a.w." as the default setting.

Prior to dispensing a prescription that is electronically transmitted, the pharmacist must exercise professional judgment regarding the accuracy, validity, and authenticity of the transmitted prescription. An electronically transmitted prescription that meets the above requirements is the original prescription.
SECTION 6 – GENERAL NONCOVERED SERVICES

This section specifies general coverage restrictions. However, drugs in other classes may not be covered. Pharmacies should review the MPPL for specific coverage. When possible, pharmacies are encouraged to suggest alternative covered therapy to the prescriber if a product is not covered.

The following drug categories are not covered as a benefit:

- Agents used for anorexia
- Agents used for weight gain
- Agents used for cosmetic purposes or hair growth
- Agents used for symptomatic relief of cough and colds
- Experimental or investigational drugs
- Agents used to promote fertility
- Agents used to promote smoking cessation not on the MPPL
- Vitamin/Mineral combinations not for prenatal care, end stage renal disease or pediatric fluoride supplementation
- Covered outpatient drugs that the Labeler seeks to require as a condition of sale that associated tests or monitoring services be purchased exclusively from the Labeler or their designee
- Covered outpatient drugs where the Labeler limits distribution
- Proposed less-than-effective (LTE) drugs identified by the Drug Efficacy Study Implementation (DESI) program
- Over-the-counter drugs not on the MPPL
- Drugs of Labelers not participating in the Rebate Program
- Drugs prescribed for "off label" use if there is no generally accepted medical indication in peer reviewed medical literature (Index Medicus), or listing of such use in standard pharmaceutical references such as Drug Facts and Comparisons, AMA Drug Evaluations, American Hospital Formulary Service Drug Information, or DRUGDEX Information Systems
- Drugs prescribed specifically for medical studies
- Drugs recalled by Labelers
- Drugs past CMS termination dates (Refer to the Directory Appendix for CMS website information.)
- Lifestyle agents
- Standard Infant Formulas
- Drugs covered by the Medicare Part D benefit
- Drugs not FDA approved or licensed for use in the United States
- Agents used for treatment of sexual or erectile dysfunction
**SECTION 7 - MICHIGAN PHARMACEUTICAL PRODUCT LIST**

The Michigan Pharmaceutical Product List (MPPL) identifies the pharmaceutical products that are covered by MDHHS. The MPPL pharmaceutical product coverages may vary by MDHHS program or be limited by age, clinical parameters, and/or gender. The Point of Sale pharmacy claim adjudication also provides coverage information related to a specific beneficiary or prescription.

The MPPL is posted on the PBM’s website. (Refer to the Directory Appendix for website information.) Providers must refer to the MPPL for the additions and deletions of drug products. Specific notification of changes will not be issued.

**7.1 NOTIFICATION OF NEW OUTPATIENT DRUGS**

MDHHS receives weekly, comprehensive new information about outpatient drugs from First DataBank. Manufacturers are not required to submit notification of new drug products. New drug products are required to be reviewed by the Pharmacy and Therapeutics (P&T) committee.

Most drug products are required to be on the market for six months prior to review. Products with a “priority” FDA rating may be reviewed earlier than the six month requirement.

**7.2 APPROVED LABELERS**

MDHHS reimburses MPPL products distributed by approved Labelers who have signed rebate agreements with the Centers for Medicare & Medicaid Services (CMS). A list of these approved Labelers is located on the CMS website and identification is by the first five digits of a National Drug Code (NDC). (Refer to the Pharmacy portion of the Directory Appendix for CMS website information.)

Alcohol swabs, condoms, diaphragms, lancets, syringes, aerochambers, spacers, and peak flow meters provided by a pharmacy are covered regardless of the manufacturer’s rebate agreement.
SECTION 8 — PRIOR AUTHORIZATION

8.1 PRIOR AUTHORIZATION PROCESSOR

The MDHHS PBM processes prior authorizations (PAs). Refer to PBM’s Pharmacy Claims Processing Manual for PA procedures. (See Directory Appendix for contact information.) Authorization to override denial edits must be obtained from the PBM.

Do not call the PBM’s Call Centers for:

- Supplies billed by Medical Suppliers, including enteral formula and Total Parenteral Nutrition (TPN), since these are only reimbursed to a Medical Supplier provider. Contact the MDHHS Program Review Division for PA. (Refer to the Directory Appendix for contact information.)
- Information about the member’s MHP. The provider must contact the MHP to obtain their policies.

8.2 PRIOR AUTHORIZATION REQUIREMENTS

PA is required for:

- Products as specified in the MPPL. Pharmacies should review the information in the Remarks as certain drugs may have PA only for selected age groups, gender, etc. (e.g., over 17 years).
- Payment above the Maximum Allowable Cost (MAC) rate.
- Prescriptions that exceed MDHHS quantity or dosage limits.
- Medical exception for drugs not listed in the MPPL.
- Medical exception for noncovered drug categories.
- Acute dosage prescriptions beyond MDHHS coverage limits for H2 Antagonists and Proton Pump Inhibitor medications.
- Dispensing a 100-day supply of maintenance medications that are beneficiary-specific and not on the maintenance list.
- Pharmaceutical products included in selected therapeutic classes. These classes include those with products that have minimal clinical differences, the same or similar therapeutic actions, the same or similar outcomes, or have multiple effective generics available.

8.3 RESPONSIBILITY FOR OBTAINING AUTHORIZATION

8.3.A. PHARMACY RESPONSIBILITY

Pharmacies may call the PBM Technical Call Center for exceptions on:

- Quantity;
- Early refills; and
- 72-hour supply of medication for emergency needs only when the prescriber is not available to obtain PA.
Pharmacies may call the PBM Clinical Call Center for exceptions on payment for brand name over the MAC.

The PBM Technical Call Center is available 24 hours per day/seven days a week.

Refer to the Directory Appendix for PBM’s Call Center contact information.

8.3.B. PRESCRIBER RESPONSIBILITY

Prescribers or their designees may call the PBM Clinical Call Center for any PA, but must call for any request that falls outside the categories noted above as applying to pharmacies.

The PBM Clinical Call Center is available after hours by telephone and by pager. The PBM may also be contacted by fax or in writing via U.S. mail.

Refer to the Directory Appendix for the PBM Clinical Call Center contact information, PA contact information and hours of operation.

8.4 DOCUMENTATION REQUIREMENTS [CHANGE MADE 4/1/23]

For all requests for PA, the following documentation is required:

- Pharmacy name and phone number
- Beneficiary diagnosis and medical reason(s) why another covered drug cannot be used
- Drug name, strength, and form
- Other pharmaceutical products prescribed
- Results of therapeutic alternative medications tried
- MedWatch Form or other clinical information may be required

If prior authorization is being submitted for an item related to a clinical trial, PA requests must also include a completed and signed Attestation to the Appropriateness of the Qualified Clinical Trial form (BPHASA-2210). Refer to the Forms Appendix for a copy of BPHASA-2210.  (text added per bulletin MMP 22-42)

8.5 ADDITIONAL DOCUMENTATION

Depending on the specific drug being prescribed, additional medical documentation may be required. The most common categories requiring additional documentation are:

8.5.A. BRAND OVERRIDE

Provide documentation of the therapeutic trial and failure reasons of the generic.
8.5.B. ANTI-OBESEITY

Prior authorization criteria can be found on the PBM vendor website as ‘Clinical and PDL PA Criteria’. (Refer to the Directory Appendix for website information.)

8.5.C. CLINICAL TRIAL ATTESTATION FORM [SUBSECTION ADDED 4/1/23]

For items and services that require prior authorization and were provided in connection with a beneficiary’s participation in a qualified clinical trial, a completed Attestation to the Appropriateness of the Qualified Clinical Trial form (BPHASA-2210) is required to be submitted with the pharmacy prior authorization request. Refer to the Forms Appendix for a copy of the form. Refer to the Prior Authorization section of the Directory Appendix for Pharmacy Prior Authorization contact information. (text added per bulletin MMP 22-42)

8.6 PRIOR AUTHORIZATION DENIALS

PA denials are conveyed to the requester. PA is denied if:

- The medical necessity is not established.
- Alternative medications are not ruled out.
- Evidence-based research and compendia do not support it.
- It is contraindicated, inappropriate standard of care.
- It does not fall within MDHHS clinical review criteria.
- Documentation required was not provided.

The PBM reviews the information submitted to determine whether the clinical criteria have been met. If the submitted information does not indicate that the criteria have been met, the PA is then sent to the Office of Medical Affairs in MDHHS for final determination on whether the clinical criteria have been met.
SECTION 9 — H2 ANTAGONIST AND PROTON PUMP INHIBITOR POLICY

For high dose use greater than 102 days in a 365-day period, PA is required for H2 Antagonists and Proton Pump Inhibitors (PPIs). MDHHS defines high dose use as:

<table>
<thead>
<tr>
<th>H2 Receptor Antagonists</th>
<th>Proton Pump Inhibitors</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cimetidine: 800 mg per day or more</td>
<td>Omeprazole: 40 mg per day or more</td>
</tr>
<tr>
<td>Famotidine: 40 mg per day or more</td>
<td>Esomeprazole (Nexium): 40 mg per day or more</td>
</tr>
<tr>
<td>Nizatidine: 300 mg per day or more</td>
<td>Lansopazole (Prevacid): 30 mg per day or more</td>
</tr>
<tr>
<td>Ranitidine: 300 mg per day or more</td>
<td>Rabeprazole (Aciphex): 20 mg per day or more</td>
</tr>
<tr>
<td></td>
<td>Pantoprazole (Protonix): 40 mg per day or more</td>
</tr>
</tbody>
</table>

Nonpreferred H2 Antagonists or PPIs require PA for both high and low dose use. Compliance with the H2 Antagonists and PPI Policy is monitored with POS or post-payment review.

Prescribers may request PA for high dose therapy over the 102 days through the PBM Clinical Call Center. (Refer to the Directory Appendix for contact information.) The following information is required for PA determination:

- Diagnosis
- Drug and dose for which PA is requested
- Date and results of GI testing
- All alternative H2 Antagonists and PPIs tried, including dose and duration
- Other prescribed medications relating to this diagnosis
- Reason patient cannot endure testing
- Health education or other counseling employed for this condition
SECTION 10 – DRUG UTILIZATION REVIEW

10.1 PROSPECTIVE DRUG UTILIZATION REVIEW

MDHHS utilizes Prospective Drug Utilization Review (ProDUR) edits in its Point of Sale (POS) system. ProDUR encompasses drug therapy screening, including problem detection, evaluation, and counseling components of pre-dispensed drugs.

In the POS system, MDHHS limits the number of messages to providers that concern potential drug problems to those that are critical to quality of care and appropriate dispensing. It is the provider’s responsibility to provide ProDUR screening and to adhere to beneficiary information and data collection requirements.

10.1.A. PRODUR SCREENING REQUIREMENT

Before prescriptions are filled or delivered, pharmacists must review the consequences of the drug therapy based on the appropriate standards and guidelines.

The review must screen for potential therapy problems due to:

- Therapeutic duplication
- Drug-disease contraindications (to the extent diagnosis information is available)
- Drug-drug interactions (including interactions with known over-the-counter drugs)
- Incorrect drug dosage or duration of drug treatment
- Drug-allergy interactions
- Clinical abuse/misuse
- Under-utilization or over-utilization

10.1.B. PRODUR ALERT MESSAGES

The PBM’s POS system provides online assistance for the dispensing pharmacist. Incoming drug claims are compared to a beneficiary’s pharmacy claims history file to detect potential therapeutic problems. ProDUR alert messages are returned to the pharmacist when significant problems are discovered by this review.

10.2 RETROSPECTIVE DRUG UTILIZATION REVIEW

Medicaid utilizes pharmacy data for retrospective drug utilization review (RetroDUR) as required by Federal law and the following compendia:

- American Hospital Formulary Service Drug Information
- United States Pharmacopoeia Drug Information
DRUGDEX Information System
Peer-reviewed medical literature

RetroDUR is intended to be an educational tool to reduce costs resulting from drug-induced illnesses and hospitalizations. The purpose of retrospective drug utilization review is:

- To identify high-risk cases for drug-induced illness.
- To communicate risk factors to prescribers and dispensing pharmacists for evaluation.
- To improve patient healthcare outcomes and quality of care.

RetroDUR alerts providers to a beneficiary’s medical condition and total drug usage from all prescribers and pharmacies. The MDHHS PBM reviews utilization data on a monthly basis and makes recommendations to the Michigan DUR Board for interventions and educational seminars.

10.3 MICHIGAN DRUG UTILIZATION REVIEW BOARD

The Michigan Drug Utilization Review (DUR) Board includes both physicians and pharmacists. After post-payment review, the DUR vendor sends appropriate intervention letters to pharmacies and prescribers. Based on the DUR intervention information, prescribers may choose to modify therapy. However, prescribers or pharmacists may also choose to correct beneficiary negative patterns by counseling, or provide background for re-evaluation by the DUR vendor or the DUR Board.

As needed, the PBM or DUR Board follows up on re-occurring patterns that have not been justified. Provider education or academic detailing may be provided to address re-occurring patterns.

10.4 CLINICAL CONSULTATION

MDHHS provides feedback to providers through its academic detailing program. Administered by PBM, Medicaid targets topics related to drug therapy where direct educational intervention to medical providers may prove beneficial in improving outcomes. The Michigan DUR Board approves the topics for academic detailing. Clinical consultants are Michigan-licensed pharmacists who are recruited and trained through the Michigan Pharmacists Association under the direction of PBM. Whenever possible, clinical consultants are assigned to call on medical providers who practice in the same geographical area as the detailing pharmacist to provide a personal and professional connection between the healthcare providers. Providers are encouraged to give the clinical consultants feedback on both topics presented and the overall program.
**SECTION 11 – DISPENSING POLICY**

**11.1 DAYS SUPPLY**

Prescription quantities are limited to the quantity specified by the prescriber. MDHHS covers up to a 34-day supply for acute medications, up to a 102-day supply for maintenance medications, and up to a 12-month supply of contraceptives, including oral, vaginal ring, and contraceptive hormonal patches.

The pharmacy must submit accurate days supply information. Submitting incorrect days supply information can cause false ProDUR messages and claim denials. It could also result in a pharmacy being targeted for a post-payment audit.

**11.2 ACUTE AND MAINTENANCE SUPPLIES**

Providers must bill and dispense as follows:

- For acute illness: The amount dispensed must be limited to the quantity required for the desired therapy during that episode of illness or up to a 34-day supply.
- For chronic illness:
  - Maintenance drugs must be dispensed in quantities as ordered by the physician and to achieve optimum therapy and economy of dispensing, or up to a 102-day supply.
  - If a prescription for a product on the maintenance list is for more than a month's supply and less than a 102-day supply, only one dispensing fee is allowed.
  - A maximum of 13 dispensing fees are paid for the same drug dispensed to the same beneficiary within a 365-day billing period.

A list of maintenance medications is posted on the PBM’s website. (Refer to the Directory Appendix for website information.) This list does not exclude medications from other standard therapeutic class codes from being supplied in maintenance quantities. PA is necessary when a maintenance quantity of other medications is required for specific beneficiaries.

**11.3 REFILLS**

Refills must conform to the current Administrative Rules of the Michigan Board of Pharmacy, Michigan Public Health Code, state and federal statutes, rules, regulations, and policies. Claims will deny at point-of-sale if the utilization requirements have not been met.

For non-controlled substances, a FFS beneficiary cannot obtain a refill of the prescription until at least 75 percent of the drug quantity limit has been consumed in compliance with the prescribed dose, amount, frequency, and time intervals established by MDHHS. (Refer to the Narcotic Analgesics subsection for additional information regarding refill thresholds for narcotic analgesics.)

Early refill overrides may be granted once per drug per 12 months for any of the following circumstances:

- To replace medication that has been lost, stolen or destroyed.
- For the purposes of vacation or travel.
The early refill will not exceed a 34-day supply. MDHHS or its designee may limit the number of instances early refill overrides are approved in cases of suspected fraud or abuse, and may request additional documentation before an override is authorized.

The pharmacy may contact the MDHHS PBM Technical Call Center to request an override for an instance where an early refill is warranted. (Refer to the Directory Appendix for contact information.)

### 11.4 PRESCRIPTIONS NOT PICKED UP

MDHHS does not reimburse for retail prescriptions filled but not dispensed or picked up by the beneficiary or his representative, and does not allow restocking fees. For prescriptions not picked up, pharmacies must claim adjust or reverse the claim for any payments received, including the dispensing fee. The pharmacy should reverse claims in a timely manner. However, MDHHS policy allows claim adjustments or reversals to be submitted up to twelve months after the original date of service. For example, if the Medicaid beneficiary does not pick up a prescription from the pharmacy within 14 calendar days from the date the prescription claim was submitted by the pharmacy, the prescription claim should be reversed on the 15th calendar day and must have been reversed by the 365th day. For audit purposes, a record of processed reversals must be retained by the pharmacy for seven years.

### 11.5 TAMPER RESISTANT PRESCRIPTIONS

A pharmacist can only fill a written prescription for a Medicaid FFS beneficiary or POS carveout drugs for MHP enrollees when executed on a tamper resistant prescription pad. (See the following subsections for special considerations.)

Additional information on the tamper resistant prescription pad policy can be found in CMS guidelines which are available online. (Refer to the Directory Appendix for website information.)

#### 11.5.A. EXEMPTIONS

- A compliant pad is not required if the prescription is transmitted verbally or electronically by telephone, facsimile, or modem to the pharmacy per federal and state laws.
- MHP enrollee if the MHP is reimbursing the prescriptions.
- Medicaid FFS beneficiaries receiving prescription drugs not separately reimbursable to a pharmacy. This includes drugs provided incident to, or part of, another service or as part of a per diem payment in the following settings:
  - Nursing facilities
  - ICF/IIDs
  - Inpatient/Outpatient Hospitals
  - Clinical Settings (hospice, dental, physician office/clinic, laboratory and x-ray, renal dialysis)
11.5.B. EMERGENCY PRESCRIPTIONS

In the event a pharmacy receives a non-compliant emergency prescription, the prescribed drug may be dispensed. However, the prescriber must provide to the pharmacy a compliant prescription within 72 hours of the date the emergency prescription was filled.

11.6 EMERGENCY SERVICES ONLY (ESO) AND END STAGE RENAL DISEASE (ESRD)

For coverage of medications related to ESRD for an ESO beneficiary, practitioners must identify the appropriate ESRD diagnosis code on prescriptions. Pharmacies should report both the ESRD diagnosis code and required level of service value of ‘3’.
SECTION 12 – QUANTITY AND BILLING UNITS

MDHHS uses standard metric billing units and the provider may not round fractions. For example, if the product is 2.500 ml, it must be billed as 2.500 ml, not 3 ml. The PBM’s processing allows a quantity entry up to 999,999.999.

12.1 QUANTITY LIMITS

Dispensing quantities are limited according to accepted standards of practice, Food and Drug Administration (FDA)-approved Labeler recommendations and the recommendations of the Michigan DUR Board.

12.2 COMMON UNIT BASES

Quantities are based on the amount dispensed for the unit of the product. Thus, quantity field entries must be based on the amount dispensed for the unit specified in the MPPL. The most common unit bases are EACH, ML, or GM. Following are examples.

SECTION 13 – REIMBURSEMENT, COPAYMENTS, AND COORDINATION OF BENEFITS

Prescriptions dispensed by Tribal 638 facility pharmacies are reimbursed at the Indian Health Services per visit outpatient rate. Refer to the Tribal Health Centers chapter for additional information.

13.1 USUAL AND CUSTOMARY CHARGE

Reimbursement is the lower of the usual and customary (U&C) charge or the MDHHS product cost payment limits and a dispensing fee minus the beneficiary copayment, with the exception of condoms. If a beneficiary has other insurance or Medicare coverage, the related other insurance or Medicare payments are subtracted from the MDHHS payment.

U&C charge is defined as a pharmacy's charge to the general public. If the provider renders a covered service to a beneficiary that the provider offers for free or for a reduced fee to the general public, the provider may only bill Medicaid up to that customary charge as long as all other Medicaid requirements are met. The sum of charges for both the product cost and dispensing fee must not exceed a pharmacy's U&C charge for the same or similar service. The U&C charge must reflect all advertised discounts, special promotions, or other programs initiated to reduce prices for product costs available to the general public or to a special population.

If a pharmacy discounts prescriptions to an inclusive category of customers (e.g., over 60 years), the pharmacy must reflect this discount in its billings for MDHHS program beneficiaries in the same category.

13.2 OVER-THE-COUNTER DRUGS

The U&C charge for prescription-ordered OTC drugs may be different, but not greater, than the retail pharmacy's shelf price of the same product sold without a prescription.

13.3 SALES TAX

Sales tax must not be added to a pharmacy's U&C charge. MDHHS does not reimburse for sales tax.

13.4 PRODUCT COST PAYMENT LIMITS

Product Cost Payment Limits are based on the NDC the pharmacy identifies as the product that was dispensed. Reimbursement is the lower of the National Average Drug Acquisition Cost (NADAC), the Wholesale Acquisition Cost (WAC), the MAC, or the provider's charge. Misrepresentation of the product's NDC results in denied payment and fraud/abuse sanctions subject to applicable Federal and State laws.

Entities that dispense drugs purchased through the Federal 340B program to beneficiaries must bill the 340B price as the actual acquisition cost.

NADAC rates are posted on the CMS website. (Refer to the Pharmacy Resources portion of the Directory Appendix for website information.)

13.4.A. MAXIMUM ALLOWABLE COST

Maximum Allowable Cost (MAC) reimbursement levels for Michigan Medicaid are established and managed by an MDHHS contractor. MAC reimbursement levels are generally applied to
multi-source brand and generic products. However, MAC reimbursement may also be applied to single source drugs or drug classifications where appropriate. New or changed MAC prices are posted on the contractor’s website the next business day after they are determined. A monthly online MAC list is also available on the contractor’s website. MAC reimbursement reviews will take place on an on-going basis. In addition to the website, specific MAC reimbursement levels are also available by contacting the MAC vendor by US mail, e-mail, fax or telephone. (Refer to the Directory Appendix for the MAC vendor website and contact information.)

All requested MAC price reviews require the following information:

- The brand and generic name, strength, form, and NDC requested for review
- Reason for requested review (availability, price, or other)
- Supporting documentation that the MAC is below cost or the product is not available (wholesaler invoice to support a request)
- Date of service to identify the difference between reimbursement and actual cost
- Prescription number
- Company or pharmacy name, NPI, telephone number, and contact person

13.4.B. MAC OVERRIDES

Specific brand products have a MAC reimbursement level. To receive payment above the MAC reimbursement level, PA through the PBM is required. (Refer to the Directory Appendix for contact information.)

13.5 PROFESSIONAL DISPENSING FEES

The professional dispensing fee is defined as the fee charged for filling a prescription and all related services performed by a pharmacy. MDHHS dispensing fees are posted on the MDHHS website. (Refer to the Directory Appendix for website information.)

13.6 BENEFICIARY COPAYMENTS

13.6.A. MEDICAID COPAYMENTS

A copayment for each generic/preferred drug dispensed, and for each brand name/non-preferred drug dispensed, may apply for Medicaid beneficiaries age 21 years and older. A copayment may apply to certain brand name drugs that are preferred. Refer to the General Information for Providers Chapter for information about copayments. Current copayment amounts are listed on the MDHHS website. (Refer to the Directory Appendix for website information.)

Copayments cannot be discounted for promotional purposes.
**Copayment Exemptions**

<table>
<thead>
<tr>
<th>Over Age 21 Exclusions</th>

</tr>
</tbody>
</table>

Claims for drugs related to the treatment of the following chronic conditions are exempt from copayments for Healthy Michigan Plan beneficiaries:

- Alcohol Use Disorder
- Asthma
- Chronic Kidney Disease
- Chronic Obstructive Pulmonary Disease and Bronchiectasis
- Deep Venous Thrombosis (while on anticoagulation)/Pulmonary Embolism (chronic anticoagulation)
- Depression
- Diabetes
- Heart Failure
- HIV
- Hyperlipidemia
- Hypertension
- Ischemic Heart Disease
- Obesity
- Schizophrenia
- Stroke/Transient Ischemic Attack
- Substance Use Disorder
- Tobacco Use Disorder

Claims for the following drugs related to the treatment of Mental Health Conditions and Substance Use Disorders are exempt from copayments:

- Central Nervous System Drugs
- Psychotherapeutic Drugs
13.6.B. **MEDICARE PART D COPAYMENTS**

Refer to the Billing Beneficiaries Section of the General Information for Providers Chapter of this manual for additional information regarding co-payment requirements. Beneficiaries may not be denied care or services based on inability to pay a co-payment, except as outlined in that section.

Medicaid will not reimburse:

- Copays, deductibles, or coinsurance for Medicare Part D drugs.
- Commercial insurance drug copays, deductibles, or coinsurance for Medicare/Medicaid beneficiaries who chooses to retain their creditable drug coverage offered by the commercial insurance in place of joining a Medicare Part D plan.
- Copays, deductibles, or coinsurance that exceed the standard Medicare Part D benefit for Medicare/Medicaid beneficiaries.

13.7 **NONALLOWABLE CHARGES TO THE BENEFICIARY**

A pharmacy must not charge a beneficiary for a prescription if the pharmacy or prescriber fails to request prior authorization (PA). For all products listed in the MPPL indicating PA is required, the pharmacy may contact the PBM for PA or notify the prescriber that a PA is needed.

A pharmacy may charge the beneficiary its U&C charge for a product requiring PA only if the pharmacy has written documentation that the beneficiary was informed of the attempt and failure to obtain PA and of the resultant desire to purchase the drug privately. The pharmacy must not charge any portion of this claim to Medicaid.

The beneficiary must be made aware that PA and reimbursement cannot be obtained later.
13.8 ALLOWABLE CHARGES TO THE BENEFICIARY

A pharmacy may only charge a beneficiary the MDHHS established copayment for covered services. A beneficiary may not be charged for any cost of the prescription above the MDHHS reimbursement level. A pharmacy may only charge a beneficiary its usual and customary charge if the service is a noncovered service and the beneficiary has indicated a desire to purchase the service privately. Furthermore, a beneficiary may not be charged for a prescription in lieu of the pharmacy accepting the reimbursement paid by MDHHS, or in lieu of obtaining PA when indicated.

13.9 ADVERTISING

Advertisements must convey only participation in Medicaid. Advertising must not be used to influence the free choice of a pharmacy by a beneficiary. Promotions offering beneficiaries free goods, gift certificates, or shopping sprees in exchange for filled prescriptions are prohibited. No pharmacy may discount the copayment for promotional purposes.

13.10 COORDINATION OF BENEFITS

Coordination of Benefits (COB) (also referred to as Third Party Liability [TPL]) requires providers to bill other insurances, including Medicare Part B, before billing MDHHS. Pharmacy providers should submit both the primary insurer payment amount and the beneficiary’s liability (copayment, coinsurance, and/or deductible) under the primary insurer’s plan to MDHHS. Regardless of participation by the pharmacy provider with the other insurance and/or Medicare, MDHHS only reimburses for the coinsurance and deductible amounts up to the Medicaid allowable fee screen. If the other insurance’s (including Medicare) reimbursement exceeds the reimbursement level of Medicaid, no additional monies are paid. Providers must submit the charge as the amount allowed by the other insurance, indicating the other insurance payment (including the professional dispensing fee) and the other insurance copayment. In addition, the provider is to use the drug list established by the beneficiary’s other insurance carrier. If the other insurance carrier’s drug list covers a drug not on the MPPL, the prescriber must obtain PA from MDHHS. (For complete information on MDHHS policy regarding other insurance, refer to the Coordination of Benefits Chapter of this manual.)

If a provider receives payment from another insurance and/or Medicare after MDHHS has made full payment, the payment must be returned to MDHHS through a claim adjustment. Failure to reimburse MDHHS may be construed as fraud under the Medicaid False Claim Act. For billing information on COB, refer to the PBM Pharmacy Claims Processing Manual, the PBM website, or contact the PBM Technical Call Center. (Refer to the Directory Appendix for website and contact information.)
SECTION 14 – SPECIAL PRODUCT COVERAGE

14.1 AMPHETAMINE

Some drugs used to treat narcolepsy or hyperkinesis may be covered for beneficiaries over 17 years of age. The prescriber or designee must obtain PA before the pharmacy dispenses these products.

14.2 ANTIHEMOPHILIC DRUGS

A Medical Supplier must bill for infusion kits necessary for administration. (Refer to the Medical Supplier Chapter of this manual for additional information.)

Antihemophilic drugs are a Medicare Part B benefit. For beneficiaries who are eligible for both Medicare and Medicaid, the pharmacy must bill Medicare prior to billing Medicaid as explained in the Coordination of Benefits Chapter of this manual.

14.3 ANTINEOPLASTIC DRUGS

Covered chemotherapeutic agents are listed in the MPPL. Most injectable chemotherapy forms are not listed in the MPPL as reimbursement is made to the administering healthcare provider (e.g., physicians, outpatient hospitals). A dosage intended for parenteral infusion (continuous or intermittent), perfusion, or intracavity administration in an office, clinic, or outpatient hospital is not a reimbursable Medicaid benefit to a pharmacy. The pharmacy should bill the ordering provider of service.

Injectable chemotherapy and topical uses for these products may be reimbursed to a pharmacy for home use. Some of these agents may require PA. Refer to the MPPL for verification of PA requirements.

14.4 CLOZAPINE [RE-NUMBERED 4/1/23]

Clozapine may be billed in weekly cycles. A professional dispensing) fee may be reimbursed each week when billed in accordance with other MDHHS and FDA product licensure guidelines.

14.5 COMPOUNDED DRUGS [RE-NUMBERED 4/1/23]

Medicaid defines a compounded drug as the combination of two or more ingredients not available from any Labeler in the combination prescribed. Compounded prescriptions must contain at least one product manufactured by an approved Labeler. The following compounded drug policies do not apply to infusion therapy. Additionally, certain Active Pharmaceutical Ingredients (APIs) and excipients utilized in compounded drug claims are covered. MDHHS maintains a list of these covered products on the Michigan Medicaid Pharmacy Benefits Manager (PBM) website. (Refer to the Directory Appendix for PBM website information to obtain the list of covered products.)

14.5.A. EXCLUSIONS [RE-NUMBERED 4/1/23]

Compounded drugs are not covered if active ingredients include:

- A noncovered legend drug or drug class (e.g., cough/cold, DESI);
- Only OTC drugs;
• Reconstitution of a product only; or
• Pre-mixed infusion solutions (Refer to the Directory Appendix for PBM website information to obtain the list of pre-mixed infusion solutions)

A compounded prescription is not covered if it contains noncovered products and is prescribed solely to circumvent program limitations.

14.5.B. PROFESSIONAL DISPENSING FEES [RE-NUMBERED 4/1/23]

Professional dispensing fees for compounded drugs are available on the MDHHS website. (Refer to the Pharmacy Resources portion of the Directory Appendix for website information.) To receive the compounded fee, a prescription must involve extemporaneous compounding and dispensing prepared only when orders for specific beneficiaries are received.

Medicaid monitors its compounded drug policy on a pre- and post-payment basis.

14.6 FAMILY PLANNING SUPPLIES [RE-NUMBERED 4/1/23]

14.6.A. CONDOMS [RE-NUMBERED 4/1/23]

Condoms do not require a prescription. A pharmacy may provide condoms at the beneficiary’s request. Both males and females are eligible to receive condoms. Condoms are not a covered benefit for participants in the CSHCS program.

• **Payment Limit** – Payment is the lesser of the pharmacy’s retail price or the MAC listed in the MPPL. A dispensing fee is not paid for condoms.

• **Dispensing Limits** – The following quantity requirements are monitored by pre- and post-payment reviews. A pharmacy is not reimbursed for more than:
  - 12 condoms at one time to a beneficiary; or
  - 36 condoms in 30 days to a beneficiary.

• **Documentation** – Pharmacies are responsible for maintaining adequate documentation to substantiate which beneficiaries received condoms. Documentation can be collected on a prescription blank or a log entry. Either form of documentation must contain:
  - An assigned control number (e.g., prescription number);
  - Beneficiary name;
  - Beneficiary Medicaid ID number;
  - Brand name of condom dispensed;
  - Quantity dispensed; and
  - Date dispensed.

14.6.B. DIAPHRAGMS AND CERVICAL CAPS [RE-NUMBERED 4/1/23]

A dispensing fee is not paid for diaphragms and cervical caps.
14.7 Infusion Therapy

Infusion therapy, except for Total Parenteral Nutrition (TPN) used in the home setting, is covered for a pharmacy. If a specific drug is not listed in the MPPL, PA must be obtained. A Medical Supplier must bill for infusion-related expendable supplies and durable medical equipment, such as pumps or IV stands and TPN.

MDHHS will reimburse an additional single all-inclusive fee, above the standard dispensing fee, for the diluent and vehicle that is administered with the active ingredient. MDHHS dispensing fees are posted on the MDHHS website. (Refer to the Directory Appendix for website information.)

Daily billing for infusion therapy is not allowed. Drugs for infusion therapy must not be billed more frequently than seven days.

14.8 Inhalers

Depending on the beneficiary's condition, several inhalers per month may be necessary. If dispensing limitations allow and the prescriber writes accordingly, the beneficiary may obtain more than one inhaler per prescription. A dispensing fee for inhalers is not paid to pharmacies.

14.9 Methadone

Methadone is only covered when used as an analgesic for severe intractable pain such as that produced by some types of terminal illnesses.

14.10 Narcotic Analgesics

A FFS beneficiary cannot obtain a new prescription or refill of an existing narcotic analgesic, whether the drug is prescribed by the same or different healthcare provider or for a different drug in the same class, until 90 percent (95 percent for Benefits Monitoring Program beneficiaries) of the drug quantity limit has been consumed in compliance with the prescribed dose, amount, frequency and time intervals established by MDHHS.

Hospice (Benefit Plan ID of Hospice) beneficiaries are exempt from refill tolerance restriction. Benefits Monitoring Program beneficiaries are also exempt from refill tolerance restriction.

The refill restriction also does not apply if payment from the other insurance is reported on the claim.

The pharmacy may contact the MDHHS PBM Technical Call Center to request an override for an instance where an early refill is warranted. (Refer to the Directory Appendix for contact information.)

14.11 Opioid Withdrawal Agents, Opioid Type [Subsection Added 4/1/23]

Opioid withdrawal agents may be billed in weekly cycles. Professional dispensing fee limits are extended for this category only. (text added 4/1/23)

14.12 Oral Contraceptives [Re-numbered 4/1/23]

Prescriptions for oral contraceptives may be dispensed for a 12-month supply when the prescriber writes the prescription accordingly.
14.13 OVER THE COUNTER DRUGS [RE-NUMBERED 4/1/23]

Covered OTC drugs are listed in the MPPL. A prescription is required. The refill policy is the same as for legend drugs. OTC supply or test kit items that remain in their original packaging should not have a professional dispensing fee requested in the provider’s usual and customary charge.

14.13.A. OTC DRUGS FOR END STAGE RENAL DISEASE [RE-NUMBERED 4/1/23]

Certain OTC drugs are covered only for End Stage Renal Disease (ESRD) (that is, prescribed for the treatment of a beneficiary with a kidney transplant or one undergoing maintenance dialysis). Documentation must be kept on file by the pharmacy to substantiate the beneficiary’s ESRD condition and must include:

- The date of the transplant (month and year); or
- The name of the facility performing dialysis; or
- An indication that the beneficiary is on Continuous Ambulatory Peritoneal Dialysis (CAPD).

14.13.B. OTC DRUGS FOR NURSING FACILITIES [RE-NUMBERED 4/1/23]

The MPPL designates when a covered OTC drug is included in the NF per diem. These products and noncovered OTC drugs are included in the per diem rate paid to a nursing facility. It is the responsibility of the nursing facility to provide these products for its beneficiaries. Reimbursement must be obtained from the nursing facility.

Covered OTC drugs, such as insulin (except if covered by the Medicare Part D benefit) and those not designated as included in the NF rate, are reimbursable to a pharmacy for NF beneficiaries.

14.14 PEAK FLOW METERS, SPACERS, AND AEROCHAMBERS [RE-NUMBERED 4/1/23]

Peak flow meters, spacers, and aerochambers listed in the MPPL may be billed by pharmacies. A dispensing fee is not reimbursed to pharmacies that bill for these supplies. Coverage is limited to four (4) peak flow meters per year, and four (4) spacers and/or aerochambers combined total per year.

Spacers and aerochambers cannot be billed by the pharmacy for NF beneficiaries. These items are included in the NF per diem rate.

14.15 PHYSICIAN-ADMINISTERED INJECTABLE DRUGS [RE-NUMBERED 4/1/23; CHANGE MADE 7/1/23]

Pharmacy claims for the following physician-administered injectable drugs are reimbursable under Michigan Medicaid and the Healthy Michigan Plan:

- Mental health and substance abuse injectable drugs, as listed on the Prepaid Inpatient Health Plan (PIHP)/Community Mental Health Services Program (CMHSP) Physician Injectable Drug Coverage database available on the MDHHS website, administered in an outpatient setting or residential treatment center. (Refer to the Directory Appendix for website information.)
17 Alpha Hydroxyprogesterone Caproate (17P), administered in an outpatient setting. *(revised 7/1/23)*

Pharmacy providers may be reimbursed for these injectable drugs for administration using a rate based on the National Drug Code (NDC). The rates for drug product reimbursement are outlined in the Michigan Medicaid State Plan. Professional or institutional claims for physician-administered injectable drugs are also a covered benefit. Pharmacies and prescribing practitioners must ensure that claims are not duplicated. This policy applies to Fee-for-Service claims.

Pharmacy providers may not dispense a physician-administered injectable drug directly to the beneficiary. To ensure the content and integrity of the drug administered to the beneficiary, the drug must be delivered from the pharmacy directly to the physician for administration. The method of delivery of the injectable drug to the physician should be agreed upon by the pharmacy and physician. The refrigeration, stabilization, and other storage and handling requirements of the drug must be met during delivery and at all points of the transaction. The costs associated with the delivery of the injectable drug to the physician are not reimbursable by MDHHS.

The injectable drug must be administered to the beneficiary within 14 days of the arrival of the drug to the physician’s office. For multi-dose vials, the first dose must be administered to the beneficiary within 14 days of the arrival of the drug to the physician’s office. For the safety of beneficiaries and to minimize waste, procedures should be established to return unused medications to the pharmacy when appropriate. Restocking returned products should be compliant with Michigan Board of Pharmacy guidelines.

**14.15.A. SYNAGIS [RE-NUMBERED 4/1/23]**

Enrolled pharmacy providers may bill for the injectable drug Synagis.

**14.16 VACCINES [RE-NUMBERED 4/1/23]**

The cost of the vaccine and administration of all vaccines recommended by the Advisory Committee on Immunization Practices (ACIP), including seasonal influenza vaccines, administered by pharmacists are covered for adults aged 19 years and older for Fee-For-Service Medicaid, Healthy Michigan Plan, and MOMS program beneficiaries. Additionally, pharmacies approved to participate in the Vaccines for Children (VFC) program may administer ACIP recommended vaccines to Medicaid, Healthy Michigan Plan, and MOMS beneficiaries ages 3 through 18 years. The cost of the VFC vaccine is at no cost to participating pharmacies. VFC enrolled pharmacies can bill administration fees for VFC vaccines as a Medicaid Fee-For-Service pharmacy benefit, including for beneficiaries ages 3 through 18 years of age who are enrolled in a Medicaid Health Plan. (Refer to the Directory Appendix for information on the Vaccines For Children program.)

Pharmacies may submit a claim for COVID-19 and seasonal influenza vaccines and their administration for CSHCS beneficiaries. For beneficiaries 19 years and older who are enrolled in a Medicaid Health Plan, the pharmacy provider must confirm coverage of pharmacist-administered vaccines with the plan.

Pharmacists must be in compliance with State of Michigan rules and regulations and have received the appropriate training for vaccine administration in order to be eligible to administer vaccines. Standing orders are required from a Michigan-licensed physician who is responsible for the clinical practice of the vaccine operations. This documentation must be readily available onsite in the event of an audit.
Pharmacists who administer vaccines must register with the Michigan Care Improvement Registry (MCIR). This database provides a complete record of immunizations for Michigan residents. Pharmacists must review the beneficiary's immunization history in MCIR prior to administering the vaccine. MCIR must be updated within 72 hours of administering the vaccine.

In order to receive reimbursement for vaccine administration, pharmacies must submit claims through the MDHHS Pharmacy Benefits Manager (PBM). (Refer to the Directory Appendix for contact information.)

The pharmacy must submit the National Drug Code (NDC) for the product administered and the appropriate values in the Drug Utilization Review (DUR)/Professional Pharmacy Services (PPS) segment and the Professional Service Code respectively. MDHHS allows pharmacies to bill the cost of the vaccine when not purchased through the VFC program. The pharmacy should submit the allowed administrative fee in the incentive fee submitted field.

Dispensing fees are not allowed for the administration of vaccines.

The pharmacy must develop an appropriate mechanism for purposes of properly documenting the identification of the administering pharmacist.

Either a pharmacy or physician can bill for the vaccine administration, but not both. Copayments for vaccine administration services do not apply.
SECTION 15 – NURSING FACILITY

Because of the uniqueness of pharmacy services provided in the nursing facility (NF) setting, separate billing policies were established. Other policies listed in this chapter also apply to NF beneficiaries.

15.1 BENEFIT PLANS

NF beneficiaries typically reside in a nursing home, hospital long term care (LTC) unit, or county-operated medical care facility (MCF). The Benefit Plan ID of NH will be indicated in the eligibility response for beneficiaries who reside in a nursing home.

15.2 DISPENSING FEE

A pharmacy may receive a maximum of 13 dispensing fees for the same drug entity per 365-day billing period.

15.3 COPAYMENT

Medicaid beneficiaries residing in NFs have no pharmacy copayment.

15.4 PHARMACY CONSULTANT SERVICES

Medication reviews and other pharmacy consultant services are the responsibility of the facility and are included in the facility’s per diem rate. The pharmacy must make arrangements with the facility for reimbursement of such services.

15.5 PRODUCTS INCLUDED IN THE NURSING FACILITY PER DIEM RATE

MDHHS does not directly reimburse a pharmacy for items included in a facility’s per diem rate. If provided, no additional or separate charges may be made to a beneficiary, a member of the beneficiary’s family, or other beneficiary representative. If a pharmacy is requested to dispense any of the following, arrangements for payment must be between the pharmacy and the facility.

- Medical Supplies - Examples of medical supplies included in the facility’s per diem rate are insulin syringes, reagent strips, aerochambers, spacers, peak flow meters, etc.

- Enteral Formulas – Enteral Formulas are included in the facility’s per diem rate.

- OTC products not listed in the MPPL as in the NF’s per diem rate may be paid directly to a pharmacy by MDHHS. Noncovered OTCs are included in the NF’s per diem rate. Examples of OTCs in the per diem include, but are not limited to:

<table>

- Milk of Magnesia
- Mineral Oil or Emulsions of Mineral Oil
- Povidone Douches
- Sterile Lubricant
- Vinegar Douches
- Stool Softeners and stool softeners/laxative combinations

---

### 15.6 Drug Returned From Nursing Facility

MDHHS does not reimburse for prescriptions that are not consumed by the beneficiary. The quantity of drug(s) consumed is determined by subtracting the quantity of drug(s) that is returned for the beneficiary from the quantity that was dispensed for the beneficiary. A pharmacy must credit MDHHS for those drugs that are not consumed, except for controlled, adulterated, compromised or unusable. The pharmacy must maintain documentation of the quantity dispensed and consumed by the beneficiary, showing a credit to MDHHS for drugs not consumed.

MDHHS does not allow restocking fees.
SECTION 16 – PUBLIC HEALTH SERVICE AND DISPROPORTIONATE SHARE HOSPITALS

With enactment of Section 602 of the Veterans Healthcare Act of 1992, Public Health Service (PHS) covered entities and selected disproportionate share hospitals (DSH) became eligible for contract drug prices from Labelers (340B Program). A list of participating entities is located on the Bureau of Primary Health Care - Health Resources and Services Administration (HRSA) website. (Refer to the Directory Appendix for website information.)

In addition to these product cost discounts, entities participating in this contract drug program are required by Federal policies to bill drugs covered in the PHS program using the actual acquisition cost for a drug plus a professional dispensing fee. Actual acquisition cost is defined as the actual invoice cost for a drug product to the pharmacy or company, organization, corporation, or affiliate with which it is associated.

Actual acquisition cost must reflect trade and quantity discounts, rebates, free goods, and price concessions.

On a post-payment basis, MDHHS reviews billings from PHS participating entities to track compliance with this requirement.

Covered entities or their contracted pharmacies, or disproportionate share hospital participating entities that are enrolled as Medicaid pharmacy providers who bill 340B prices, must indicate on the claim that the drug was purchased through the 340B program so their claims can be excluded from the drug rebates. Professional/institutional claims for drugs purchased through the 340B program must be indicated on the claim using the modifier U6. Pharmacy claims for outpatient drugs purchased through the 340B program must be indicated on the claim using a Submission Clarification Code of 20.
SECTION 17 – DRUG REBATE PROGRAM

17.1 APPROVED LABELERS AND MPPL

MDHHS covers only those drugs produced by Labelers who have signed rebate agreements with the federal government. Products distributed by companies or a division within a company that did not enroll are not covered.

Approved Labelers are located on the CMS website and are identified by the specific five-digit labeler code (the first five digits of the NDC). (Refer to the Directory Appendix for CMS website information.)

17.2 NATIONAL DRUG CODE ACCURACY

MDHHS invoices pharmaceutical Labelers for rebates quarterly from the pharmacy paid claims history. Pharmacies must bill the actual NDC for a product dispensed. Pharmacies may be contacted periodically to verify product utilization and cost. Contact can include phone or written verification requests. Documentation requirements for verification can include, but are not limited to:

- Copies of the product invoice
- Copies of original prescriptions
- Compounding records
SECTION 18 – BENEFITS MONITORING PROGRAM

The purpose of the Benefits Monitoring Program (BMP) is to monitor and control inappropriate utilization of covered services, including prescribed drugs. (Refer to the Beneficiary Eligibility Chapter for additional information regarding the BMP.)
SECTION 19 – PHARMACY AUDIT AND DOCUMENTATION

19.1 DOCUMENTATION REQUIREMENTS

MDHHS monitors for compliance with Medicaid policy, the Administrative Rules of the Michigan Board of Pharmacy, the Public Health Code, and other applicable federal and state regulations.

The following information serves as a general guide for compliance monitoring during post-payment pharmacy reviews and audits. Additional information regarding audits can be found on the MDHHS post-payment auditor’s website. (Refer to the Directory Appendix for website and contact information.) Non-compliance, especially continued non-compliance, may result in payment recovery, sanctions, or referral to the Michigan Attorney General’s Office.

| 340B Drug Pricing Program | Billing ingredient costs may not be higher than actual acquisition costs for drugs procured under the 340B Drug Pricing Program. Pharmacy claims for outpatient drugs purchased through the 340B program must be indicated on the claim using a Submission Clarification Code of 20. |
| Changing Claim Information | Providers may not falsely alter the NDC number, date of service, prescription number, days supply, or any other claim requirement that would allow payment. |
| Compounds | The compounding of prescription products to gain coverage of noncovered OTC, noncovered legend drugs, or other noncovered categories is prohibited (e.g., the use of injectable Sodium Bicarbonate to compound a Sodium Bicarbonate foot irrigation). Medicaid recovers inappropriate payments for billings found in violation of policy. |
| CSHCS Only | Pharmaceutical products must relate to the qualifying diagnosis. Payment is recouped for billings for products not related to the qualifying diagnosis. |
| Days Supply | Accurate days supply information is required. Altering days supply information for purposes of payment will be considered fraud and will be reported to the appropriate unit for investigation. Dosages outside the normal dosage range based on the days supply submitted may prompt a verification request of product usage on reported utilization. |
| Drug(s) Returned From Nursing Facility | MDHHS does not reimburse for prescriptions that are not consumed by the beneficiary. MDHHS does not allow restocking fees. |
| Hospice | Pharmacies must not bill MDHHS for prescription services related to the terminal illness except for selected HIV drugs. (Refer to the General Information Section of this chapter for additional information.) |
| Inaccurate Billing | All claim submission requirements outlined in the PBM Pharmacy Claims Processing Manual must be followed including, but not limited to, accurate Prescription Origin Code, NDC, and NDC unit of measure reporting. The Pharmacy Claims Processing Manual is available on the PBM website. (Refer to the Directory Appendix for website information.) |
| Medicare Part D | Pharmacies cannot bill Medicaid for drugs covered by Medicare Part D. The Medicaid Program does not coordinate benefits with Medicare Part D. |
| Other Insurance Payments | Pharmacies must bill other insurances before billing Medicaid. This also applies to Medicare Part B eligible beneficiaries. Failure to bill Medicaid the total due less the amount paid by another insurance or by Medicare Part B may be construed as fraud under the Medicaid False Claim Act. |
Prescriber Information

Accurate prescriber information must be provided as required by MCL 400.111b(21). Submitting incorrect prescriber identification numbers can cause false ProDUR messages and claim denials. It could also cause a pharmacy to be targeted for post-payment audit. Pharmacies are audited for inappropriate identification of prescribers.

Prescription Documentation

Original written prescriptions must be executed on tamper resistant prescription pads. If a prescription is created, signed, transmitted, and received electronically, all records related to that prescription must be readily accessible and maintained for seven years. Prescriber medical record documentation may be provided to validate prescriptions. Prescriber affidavits, attestations, and retroactively dated prescriptions will not be accepted for pharmacy documentation. Notation on a pharmacy’s database is not considered a written form of the prescription. For originals and all refills, accurate prescription documentation must be readily accessible and maintained for seven years. All of the following information must be entered in the record for each prescription:

- prescription number
- full name and address of patient for whom the drug is prescribed
- prescriber’s printed name and address
- prescriber’s individual NPI
- prescriber’s DEA (for controlled substance only)
- drug name and strength
- quantity prescribed
- directions for use
- number of refills authorized

Prescriptions Filled But Not Picked Up

Retail prescriptions filled but not dispensed or picked up by the beneficiary or his representative. Restocking fees are not allowed. A record of the reversal log must be maintained for seven years for audit purposes.

Professional Dispensing Fees

Pharmacies may not bill in a pattern that would lead to more than 13 professional dispensing fees in a 365-day billing period for the same drug entity. Splitting prescriptions to increase the number of fees paid is considered fraud and will be reported to the appropriate unit for investigation.

Signature Requirement

Providers must maintain and have accessible the signature log indicating beneficiary’s pick-up of prescription and acceptance or denial of beneficiary counseling. Missing signatures indicate the prescription was not picked-up or the beneficiary was not offered counseling as required. Pharmacies are required to maintain this log for seven years.

Usual & Customary (U&C) Charge

For specified products, the submitted charge is compared to the cash price to the general public.

19.2 INVOICE AND INVENTORY RECORDS

In addition to all other documentation required under state law, federal law, and MDHHS policy, pharmacy providers must maintain invoices, manufacturer and/or wholesaler sales records, distributor delivery records to the provider, inventory transfer records, provider payment records, and all other records necessary to support the size and quantity of the goods paid for by Medicaid during the audit/review period. Failure to do so will result in the recoupment of pharmacy funds related to unsupported Medicaid claims. In the event inventory for any such product cannot be substantiated
through reliable documentation for the beginning of the audit/review period, MDHHS may assume that the beginning and ending inventory quantities are the same for that product. For the purposes of this policy, the "audit/review period" shall be a period defined by MDHHS.

19.3 Medication Therapy Management Documentation Requirements [Change Made 7/1/23]

Pharmacists must document each Medication Therapy Management (MTM) service provided. Documentation must include, but is not limited to, the following:

- **Beneficiary information**
  - Name
  - Address and telephone number
  - Medicaid identification number
  - Gender
  - Date of birth

- **Beneficiary’s consent for the MTM service, indicated by the beneficiary’s signature and date**
  - If the beneficiary is a child who is younger than the age of consent per state law, or has physical or cognitive impairments that preclude the beneficiary from managing his or her own medications, a caregiver (e.g., caretaker relative, legal guardian, power of attorney, licensed health professional) may provide written consent on the beneficiary’s behalf.

- **Pharmacist information**
  - Name
  - Pharmacist National Provider Identifier (NPI)
  - Pharmacy Name and NPI

- **Date of Service**

- **Place of Service**

- **Indication of how the beneficiary meets the criteria to receive an MTM service (e.g., meets the chronic condition requirement)**

- **Indication if this is an initial assessment or follow-up assessment**

- **Current medical conditions**

- **Allergies**

- **Primary physician and contact information**
Other information may include the following (items are required if relevant):

- Date of documentation
- Location of beneficiary if service is provided through telemedicine (revised per bulletins MSA 20-09, MSA 21-24, MMP 23-10)
- Time spent with beneficiary
- Resolved medical conditions
- List of all prescription drugs, along with prescriber information and name of dispensing pharmacy
- List of nonprescription drugs with their indications
- List of drug doses, directions and intended use
- List of all relevant medical devices
- List of all dietary supplements and herbal products
- Alcohol and tobacco use history
- List of environmental factors that impact the beneficiary
- Assessment of drug problems identified, including but not limited to:
  - Determining that the medications are appropriately indicated
  - Determining if the beneficiary needs additional medications
  - Determining if the medications are the most effective products available for the conditions
  - Determining if the medications are dosed appropriately to meet goals of therapy
  - Identifying adverse effects caused by medications
  - Determining if the medications are dosed excessively and causing toxicities
  - Determining if the beneficiary is taking the medications appropriately to meet goals of therapy
  - Evaluating effectiveness and safety of current drug therapy
  - Written plan, including goals and actions needed to resolve issues of current drug therapy
  - Evaluation of success in meeting goals of medication treatment plan
  - Information, instructions and resources delivered to the beneficiary
  - Content of pharmacist’s communications to beneficiary’s other health care providers
- Description of what was discussed with the beneficiary during the assessment, and whether that information was communicated to the beneficiary’s primary care providers

This documentation must be made available to MDHHS upon request. In addition, this documentation and any other relevant documentation may be collected by MDHHS or its designee on an annual basis for the purposes of program evaluation.
SECTION 20 – MEDICAL SUPPLIES

20.1 GENERAL INFORMATION

Covered medical supply items payable (minus a dispensing fee) to a pharmacy are listed in the MPPL. A prescription is required for medical supplies. Covered products include insulin syringes, alcohol swabs, etc.

MDHHS does not separately reimburse a pharmacy for medical supplies dispensed to beneficiaries in nursing facilities, hospital long term care units, or medical care facilities. These items are considered a part of the facility’s per diem rate. If provided, no additional or separate charges may be made to a beneficiary, a member of the beneficiary’s family, or other beneficiary representative. If a pharmacy is requested to dispense any of these items, arrangements for payment must be between the pharmacy and the facility.

Except for those items listed in the MPPL, medical supplies and equipment are covered only when billed by a Medical Supplier or Orthotist/Prosthetist. These items include equipment (e.g., canes), orthotics (e.g., arch supports), prosthetics, oxygen dispensers, wound care dressings (e.g., transparent film, hydrocolloid absorptive dressings, alginate and gel dressing), splints, ace bandages, TPN, enteral and oral nutritional supplements, etc.

When billing as a Medical Supplier or Orthotist/Prosthetist, refer to the Medical Supplier and the Billing & Reimbursement for Professionals Chapters of this manual for additional information.

To enroll as a Medical Supplier, providers must complete an on-line application through the CHAMPS Provider Enrollment subsystem. (Refer to the Provider Enrollment Section of the General Information for Providers Chapter for additional enrollment information, and the Directory Appendix for contact information.)

20.2 SUPPLIES FOR ADMINISTRATION OF PART D DRUGS

MDHHS will reimburse (minus a dispensing fee) a pharmacy for medical supplies and/or equipment (e.g., IV poles, tubing) associated with the administration of Medicare Part D drug(s) to the dual eligibles (except those residing in a nursing facility) for home infusion therapy.
SECTION 21 - MEDICATION THERAPY MANAGEMENT

21.1 OVERVIEW OF MEDICATION THERAPY MANAGEMENT (MTM)

Medication Therapy Management (MTM) services are face-to-face consultations provided by pharmacists to optimize drug therapy and improve therapeutic outcomes for beneficiaries. Beneficiaries may elect MTM as an optional service provided by participating pharmacists. (Refer to the Eligible Providers subsection for information on enrolling as an MTM provider.) These services are paid through the Fee-for-Service program for beneficiaries enrolled either in FFS or in a Medicaid Health Plan. There is no cost-sharing responsibility to the beneficiary for the MTM service.

The requirements outlined in the Counseling Requirements section may not be billed as an MTM service.

21.2 COVERED SERVICES

MTM services include the following:

- Obtaining necessary assessments of the beneficiary’s health status
- Formulating a medication treatment plan
- Monitoring and evaluating the beneficiary’s response to therapy, including safety and effectiveness
- Performing a comprehensive medication review to identify, resolve, and prevent medication-related problems, including adverse drug events
- Documenting the care delivered and communicating essential information to the beneficiary’s other primary care providers
- Referring the beneficiary to his/her primary care provider or specialist, if necessary
- Providing verbal education and training designed to enhance the beneficiary’s understanding and appropriate use of medications
- Providing information, support services, and resources designed to enhance adherence with the beneficiary’s therapeutic regimens
- Providing an updated personal medication record and medication action plan for the beneficiary
- Coordinating and integrating MTM services within the broader health care management services being provided to the beneficiary

Any recommended changes to the beneficiary’s drug therapy must be approved by the original prescriber(s) of the affected drugs.

Refer to the Medication Therapy Management Documentation Requirements subsection for requirements on documenting MTM services.

21.3 NON-COVERED SERVICES

The following are not eligible to be covered as MTM services:

- Services provided by telephone, email or US Postal Service mail
Services provided in skilled nursing facilities
- Services provided to more than one beneficiary at a time (i.e., group services)
- Services provided in an inpatient, institutional, or incarceration setting

### 21.4 Eligible Recipients [Change Made 7/1/23]

Beneficiaries are eligible for MTM services if they are not eligible for Medicare Part D and are taking a medication to treat or prevent one or more chronic conditions as identified in the List of Chronic Conditions for MTM Eligibility. (Refer to the Directory Appendix for website information.)

MTM services must be provided in person (revised per bulletin MMP 23-20) with the beneficiary whenever possible. If the beneficiary is a child who is younger than the age of consent per state law, or has physical or cognitive impairments that preclude the beneficiary from managing his or her own medications, MTM services may be provided face-to-face to a caregiver (e.g., caretaker relative, legal guardian, power of attorney, licensed health professional) on the beneficiary’s behalf.

### 21.5 Eligible Providers

To provide MTM services, a pharmacist must be licensed and have successfully completed either the American Pharmacists Association’s “Delivering Medication Therapy Management Services” certificate training program or other MTM program(s) approved by the Accreditation Council of Pharmacy Education.

Pharmacists who meet these requirements must enroll in the Community Health Automated Medicaid Processing System (CHAMPS) with an Individual (Type 1) National Provider Identifier (NPI) Number as a Rendering/Servicing-Only provider. Under this type of enrollment, pharmacists are required to affiliate themselves with the billing NPI of a pharmacy, Federally Qualified Health Center (FQHC), Tribal Health Center (THC), or Rural Health Clinic (RHC). The pharmacist must enroll as a Non-Physician, with a Pharmacist specialty and the subspecialty of Medication Therapy Management. Individual pharmacists are not eligible for direct Medicaid reimbursement; payment for MTM services will be issued to the affiliated pharmacy, FQHC, THC and/or RHC NPI. Refer to the Provider Enrollment section of the General Information for Providers chapter for more information on this process.

These services may not be delegated by pharmacists to pharmacy technicians or other healthcare professionals.

### 21.6 Location Requirements [Change Made 7/1/23]

MTM services may be provided in the following settings:
- Ambulatory care outpatient setting
- Clinic
- Pharmacy
- Beneficiary’s home if the beneficiary does not reside in a non-covered services setting

These services must be provided in person (revised per bulletin MMP 23-20) in a private or semiprivate patient care area that is separate from the commercial business that also occurs in the setting, or in home settings.
21.7 TELEMEDICINE FOR MTM SERVICES [TITLE REVISED & CHANGES MADE 7/1/23]

In the event that the beneficiary is unable to physically access an in-person care setting, an eligible pharmacist may provide MTM services via telemedicine. Telemedicine is the use of telecommunications and information technologies for the exchange of encrypted patient data for the provision of services. Telemedicine must be obtained through real-time interactions between the beneficiary’s physical location (originating site) and the pharmacist provider’s physical location (distant site). MTM telemedicine audio/visual services are provided to beneficiaries through hardwire or internet connection. It is the expectation that providers and facilitators involved in telemedicine are trained in the use of equipment and software prior to servicing beneficiaries. The arrangements for telemedicine will be made by the pharmacist. The administration of telemedicine services is subject to the same provision of services that are provided to a beneficiary in person. Providers must ensure the privacy of the beneficiary and secure any information shared via telemedicine. Refer to the Telemedicine chapter for additional information regarding telemedicine service provision.

Refer to the Billing Instructions subsection (of this section) for instructions on indicating the MTM service was provided through telemedicine. (revised per bulletins MSA 20-09, MSA 21-24, MMP 23-10)

21.8 BILLING INSTRUCTIONS

21.8.A PROFESSIONAL CLAIMS [CHANGE MADE 7/1/23]

Pharmacy-based MTM claims must be submitted on the professional claim format (HIPAA 837P). The Billing Provider reported on the claim must be the Pharmacy’s (Type 2) NPI and be actively enrolled in CHAMPS to be paid. The Rendering Provider reported on the claim must be the Pharmacist’s (Type 1) NPI and be actively enrolled in CHAMPS.

For services provided through telemedicine, each procedure code must include the modifier 95. Providers can submit HIPAA 837P electronic claims to CHAMPS through a billing agent, through a batch upload process, or through Direct Data Entry (DDE). Providers can also view claims online and complete claim replacements or voids within CHAMPS. (revised per bulletins MSA 20-09, MSA 21-24, MMP 23-10)

21.8.B. INSTITUTIONAL CLAIMS

The Billing Provider NPI reported on the claim must be the FQHC, RHC, or THC and be actively enrolled in CHAMPS. The Pharmacist (Type 1) NPI must be reported on the Institutional MTM claim as the Rendering Provider and must be actively enrolled in CHAMPS and associated to the Billing FQHC, RHC, or THC for the date of service. The NPI (Type 1 – Individual) number of the physician (MD or DO) overseeing the patient’s care must be entered as the attending provider. The attending provider field is mandatory to complete.
## Table of Contents

**Section 1 – General Information**
- 1.1 Administrative Services
- 1.2 Component Services
- 1.3 Copayments
- 1.4 Facility and Nonfacility Reimbursement
- 1.5 Hospital-Based Provider
- 1.6 Medicare Related Services
- 1.7 Physician Delegation and Supervision
- 1.8 Physician Responsibility
- 1.9 Prior Authorization
- 1.9.A. To Obtain Prior Authorization
- 1.9.B. Special Authorizations
- 1.10 Services in a Teaching Setting
- 1.11 Services to Newborns
- 1.12 Uniform Reporting of Services

**Section 2 – Anesthesia Services**
- 2.1 Medically Directed Anesthesia Services
- 2.2 Nonmedically Directed Anesthesia Services by the CRNA
- 2.3 Monitored Anesthesia Care
- 2.4 Medical and Surgical Services Furnished in Addition to Anesthesia Services
- 2.4.A. Allowable Services
- 2.4.B. Post-Operative Pain Management
- 2.5 Anesthesia Time
- 2.6 Electro-Convulsive Therapy [Change Made 7/1/23]
- 2.7 Prior Authorization for Anesthesia Services
- 2.8 Hysterectomies and Sterilization Procedures
- 2.9 Using Modifiers
- 2.10 Anesthesia Add-On Codes
- 2.11 Labor and Delivery

**Section 3 – General Practice**
- 3.1 Allergy Testing and Immunotherapy
- 3.2 Ambulance Services
- 3.3 Audiological and Hearing Services
- 3.3.A. Newborn Hearing Screening Examination
- 3.3.B. Local Health Department Screenings
- 3.4 Care of Abused Children [Changes Made 7/1/23]
- 3.5 Childbirth/Parenting Education
- 3.6 Clinical Trials
- 3.6.A. Covered Items and Services
- 3.6.B. Non-covered Items and Services
- 3.6.C. Qualifying Clinical Trial
- 3.6.D. Determination for Coverage [Change Made 4/1/23]
- 3.6.E. Attestation to the Appropriateness of the Qualified Clinical Trial [Subsection Added 4/1/23]

SECTION 1 – GENERAL INFORMATION

This chapter applies to physicians (MD, DO), Oral-Maxillofacial Surgeons (MD, DO), Doctors of Podiatric Medicine (DPM), Physician Assistants (PAs), Medical Clinics, Advanced Practice Registered Nurses (APRNs) [including Certified Nurse Practitioners (NPs), Certified Clinical Nurse Specialists (CNSs), and Certified Nurse-Midwives (CNMs)], Certified Registered Nurse Anesthetists (CRNAs), Anesthesiologist Assistants (AAs), and Genetic Counselors.

Generally, medically necessary services provided to a Medicaid beneficiary by an enrolled practitioner are covered. This includes, but is not limited to, medically necessary health care services that are evidence-based and provided within generally accepted standards of medical practice to prevent, diagnose or treat an illness, injury, condition, disease or its symptoms. The services addressed in this chapter include services that require explanation or clarification, have special coverage requirements, require prior authorization (PA), or must be ordered by a physician (MD or DO).

Information is included to assist the practitioner in determining how the Michigan Department of Health and Human Services (MDHHS) covers specific services. This information should be used in conjunction with the Billing & Reimbursement for Professionals Chapter of this manual, as well as the Medicaid Code and Rate Reference tool, MDHHS Practitioner and Medical Clinic Fee Schedule and other related procedure databases/fee schedules located on the MDHHS website. (Refer to the Directory Appendix for website information.)

1.1 ADMINISTRATIVE SERVICES

Services of physicians, medical staff or other licensed or certified health professionals functioning in an administrative or teaching capacity for a hospital or nursing facility (including physician-owners or other staff paid by the physician) are not covered separately as physician services.

Pathology services or interpretive studies done for hospital or nursing facility quality improvement purposes or other reasons which do not directly assist with the specific care of a specific beneficiary are considered to be administrative services and are not separately covered as physician services. These services are included in the facility's allowable costs and are paid to the facility.

1.2 COMPONENT SERVICES

Many physician services are covered as global services. A global service includes all resources necessary to perform the procedure (e.g., office overhead, equipment, supplies, and staff) and the services provided by the physician (e.g., interpretation of results and preparation of a report of findings).

Some services are divided into a professional component and a technical component for coverage purposes. The professional component includes the services provided by the physician while the technical component includes equipment, supplies, and technical staff.

Coverage for the professional component or the technical component generally depends on where the service is provided and who provides that portion of the service. Services for which the components are covered for the physician are identified in the Medicaid Code and Rate Reference tool or on the MDHHS Practitioner and Medical Clinic Fee Schedule. (Refer to the Directory Appendix for website information.)
Global services are covered for the physician in non-facility settings or the professional component is covered for the physician in any setting. The technical component is only covered when the service is provided in an appropriate non-facility setting. The global service and its professional component service cannot both be covered for the same service since the professional component is included in the global service.

1.3 COPAYMENTS

A copayment may be required for physician office (evaluation and management) visits for beneficiaries age 21 years and older.

The office visit copayment applies to services provided in the physician’s office, urgent care center, or other appropriate setting. It does not apply to professional services provided in the outpatient hospital or inpatient hospital settings. Refer to the General Information for Providers Chapter for information about copayments. Current copayment amounts are listed on the MDHHS website. (Refer to the Directory Appendix for website information.)

Podiatrists should refer to the Podiatrist Section of this chapter for information regarding beneficiary copayments for podiatry services.

Ophthalmologists providing routine vision services should also refer to the Vision Chapter for information regarding beneficiary copayments for vision services.

Refer to the Billing Beneficiaries Section of the General Information for Providers Chapter of this manual for additional information regarding copayment requirements. Beneficiaries may not be denied care or services based on inability to pay a copayment, except as outlined in that section.

1.4 FACILITY AND NONFACILITY REIMBURSEMENT

Medicaid reduces payment for specified procedures provided in a facility setting. This policy is consistent with the Centers for Medicare & Medicaid Services (CMS) facility and nonfacility reimbursement determination. When a provider performs services in a facility setting, costs for certain procedures are reduced because the practitioner does not incur certain overhead expenses (such as clinical staff, supplies, equipment) necessary to provide the service. When a service is performed in a nonfacility setting, the payment rate is based on the nonfacility relative value units (RVUs). When the service is provided in a facility setting, the payment rate is based on the facility RVUs. The payment difference takes into account the higher expenses for the provider in the nonfacility setting. For the purpose of this payment policy, a facility includes the following:

- Hospital inpatient and outpatient facilities
- Psychiatric facilities
- Skilled nursing facilities
- Ambulatory surgery centers
- Rehabilitation facilities
1.5 Hospital-Based Provider

Medicaid covers services by hospital-based providers (HBPs). A hospital-based provider is employed by the hospital. Each HBP is assigned his own NPI number.

For purposes of Medicaid, a HBP includes physicians (MD, DO, DPM). Some nonphysician practitioners, such as physician assistants (PAs), certified registered nurse anesthetists (CRNAs), and advanced practice registered nurses (APRNs), can also be considered HBPs under certain circumstances.

Medicaid follows Medicare guidelines for the coverage of HBP services provided by physicians. Generally, professional services provided by nonphysician providers that are employed by a hospital are included in the hospital cost report and are reimbursed to the hospital.

(The HBP should refer to their provider-specific section of this chapter for policies, procedures, and coverage information.)

1.6 Medicare Related Services

MDHHS reimburses practitioners for the coinsurance and deductible amounts subject to Medicaid reimbursement limitations on all Medicare approved claims even if Medicaid does not normally cover the service. (Refer to the Billing & Reimbursement for Professionals and the Coordination of Benefits Chapters of this manual for additional information.)

1.7 Physician Delegation and Supervision

Physician services covered by Medicaid must be performed by the physician personally, the physician’s employee, or an employee of the same legal entity that employs the physician, under the physician’s delegation and supervision in accordance with State law, professional scope of practice, and program and organizational policy. Only persons currently licensed/certified in an appropriate health occupation/profession (e.g., advanced practice registered nurse or physician assistant) as authorized by Public Act 368 of 1978, as amended, may provide direct patient care under the delegation and supervision of a physician when the physician is not physically present on the premises. The delegating/supervising physician must be continuously available through direct communication such as telephone, radio, or telecommunication when not on the premises. Delegated and supervised services rendered by non-physician practitioners (e.g., advanced practice registered nurses, physician assistants) must be billed under the non-physician practitioner’s NPI and include the NPI of the supervising physician as applicable.

In the physician's absence, licensed persons who are under the physician’s delegation and supervision at the medical care site where the physician regularly sees beneficiaries may provide medical services. Records must demonstrate that the licensed physician is regularly available and provides medical care to beneficiaries at the site on a routine basis. This does not preclude licensed persons under the physician’s delegation and supervision from making calls or going on rounds to private homes, public institutions, hospitals, or other health care facilities, as long as the care is a supplement to and does not replace the physician’s personal services.

Medicaid covers services delegated to unlicensed/certified persons only when the delegating physician or licensed non-physician practitioner is physically present and providing direct supervision. For information related to services provided by an advanced practice registered nurse or physician assistant under the
terms of a valid collaborative, practice or alliance agreement, refer to the provider-specific section of this chapter.

1.8 PHYSICIAN RESPONSIBILITY

Determination of medical necessity and appropriateness of services is the responsibility of the physician within the scope of currently accepted medical practice and Medicaid limitations. The physician is held responsible if he orders excessive or unnecessary services (e.g., diagnostic tests, prescriptions) regardless of who actually renders or who receives payment for the service. The physician may also be subject to any corrective action related to these services, including recovery of funds.

Services generally must be ordered by a physician to be covered by Medicaid. Some services provided by other providers, such as medical supplies, lab services, and prescriptions, may require the physician to provide written documentation to support the need for the service. For specifics regarding whether a service is a covered benefit, refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter or the Medicaid Code and Rate Reference tool for more information. (Refer to the Directory Appendix for website information.)

1.9 PRIOR AUTHORIZATION

Medicaid requires prior authorization (PA) to cover certain services before those services are rendered to the beneficiary. The purpose of PA is to review the medical need for certain services. It does not serve as an authorization of fees or beneficiary eligibility. Different types of services requiring PA include:

- Procedures identified as requiring PA in the Medicaid Code and Rate Reference tool. (Refer to the Directory Appendix for website information.)
- Procedures/items that are normally noncovered but may be medically necessary for select beneficiaries (e.g., surgery normally cosmetic in nature, obesity surgery, off-label use drugs, etc.).
- Referrals for elective services by out-of-state nonenrolled providers.

1.9.A. TO OBTAIN PRIOR AUTHORIZATION

Requests for PA for practitioner services such as surgeries, procedures, office-administered pharmaceuticals, biologicals, and out-of-state-care must be submitted utilizing the Practitioner Special Services Prior Approval – Request/Authorization form (MSA-6544-B). (Refer to the Forms Appendix for a copy of the form or download the form from the MDHHS website.) The form must be completed in its entirety. Supportive medical documentation must accompany the form.

Providers receive a written response from MDHHS. If the authorization is granted, the provider receives a PA number to report on the claim. The physician obtaining PA must make the PA number available to other providers, such as other practitioners or the hospital, for billing purposes.

If the beneficiary has Medicare and Medicare covers the service, the provider does not have to obtain PA from Medicaid. If Medicare denies a service as not medically necessary, Medicaid does not cover the service even if a PA has been obtained. If
Medicare identifies a service as an excluded benefit under Medicare and Medicaid requires PA, the provider must pursue PA from Medicaid and a coverage determination is made. If the beneficiary has commercial insurance that covers the service and the provider reports the coverage correctly on the claim, the provider does not have to obtain PA from Medicaid. If a primary insurer covers a service but requires PA and the provider does not follow the primary insurance PA process, Medicaid does not make payment for the service either.

1.9.B. SPECIAL AUTHORIZATIONS

Special authorization requirements must be met for selected surgeries performed in the inpatient setting, all elective inpatient admissions, all readmissions within 15 days, and all transfers to an inpatient hospital/unit. Physicians should refer to the Hospital Inpatient Physician Services and the Surgery Sections of this chapter for specific information.

Some beneficiaries may need authorization of services because they are enrolled in special programs, such as the Benefits Monitoring Program. (Refer to the Beneficiary Eligibility Chapter of this manual for additional information.)

1.10 SERVICES IN A TEACHING SETTING

Administrative costs associated with teaching physician services, as well as payment for direct patient care services provided by a resident (including interns or fellows) in a teaching setting and supervised by a teaching physician, are subject to guidelines and conditions developed and published by CMS for Medicare. Services covered by Medicaid under these guidelines must be identified with the appropriate modifier.

Teaching institutions and teaching physicians within those institutions must abide by the CMS teaching physician guidelines which explain when services provided in teaching settings can be covered by Medicaid or must be included as allowable medical education costs in the hospital’s cost report.

Guidelines require the presence of the teaching physician during the key portion of the performance of the service in which a resident is involved and the teaching physician seeks payment (or the hospital on the behalf of the physician). The medical record must fully support the physician's presence and participation in the service provided. There are exceptions and other considerations that may apply; therefore, the full text of the guidelines must be consulted to ensure compliance.

CMS provides an exception to the physician presence requirement for some low- and mid-level Evaluation and Management (E/M) services furnished within a teaching setting when specified conditions are met. For Medicaid, the preventive medicine E/M visits are also included under the primary care exception for primary care services provided by residents. Under the CMS primary care exception, time cannot be used to select a visit level, only medical decision making (MDM). The appropriate modifier must be reported using the primary care exception when residents provide E/M services. The E/M services that can be reported with this modifier include office or other outpatient visits requiring straightforward or low complexity medical decision making and comprehensive preventive medicine visits. For higher-level services and all invasive procedures, the teaching physician must be present.

Services of residents or physicians/medical staff functioning in an administrative, teaching or learning capacity in the hospital or long term care facility that are covered as individual physician services are
subject to post payment review and recovery of funds unless the provider can present proof that the services were not included in the allowable facility costs.

1.11 SERVICES TO NEWBORNS

Physician services provided to newborns are covered under the newborn’s Medicaid ID number. The mother’s Medicaid ID number cannot be used.

If the delivering physician performs the newborn’s care and circumcision during the mother’s inpatient stay, these services can be covered under the mother’s Medicaid ID number if they are billed on the same claim as the services to the mother.

1.12 UNIFORM REPORTING OF SERVICES

MDHHS follows the American Medical Association’s manual and guidelines for Current Procedural Terminology (CPT) numeric codes, and the Healthcare Common Procedure Coding System (HCPCS). In conjunction with the CPT/HCPCS coding systems to describe services rendered, MDHHS utilizes the Medicaid National Correct Coding Initiative (NCCI) coding policies and edits as developed by the Centers for Medicare & Medicaid Services (CMS) to promote national correct coding methodologies.
SECTION 2 – ANESTHESIA SERVICES

Medicaid covers anesthesia services provided by qualified practitioners in conjunction with covered surgeries and other procedures. Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter or the Medicaid Code and Rate Reference tool for more information regarding coverage parameters. (Refer to the Directory Appendix for website information.) Medicaid does not cover any anesthesia service related to the treatment of infertility.

2.1 MEDICALLY DIRECTED ANESTHESIA SERVICES

Medicaid covers anesthesia services provided by physicians, Certified Registered Nurse Anesthetists (CRNAs), and Anesthesiologist Assistants (AAs) for medically directed anesthesia services consistent with anesthesia team practice. (Refer to the Certified Registered Nurse Anesthetist Section and/or the Anesthesiologist Assistant Section of this chapter for additional information). Medicaid recognizes medical direction of general anesthesia, regional anesthesia, and reasonable and medically necessary Monitored Anesthesia Care (MAC). Physicians cannot medically direct more than four concurrent anesthesia cases at one time and cannot perform any other services during the same period of time except as outlined below. In all cases in which medical direction is furnished, the physician must be physically present in the operating suite.

NOTE: Anesthesiologist assistants must be medically directed by a Medicaid enrolled anesthesiologist and must comply with the requirements for the delegation and supervision of services in the Michigan Public Health Code.

All of the following conditions must be met for medically directed anesthesia services to be reimbursed to the physician. For each beneficiary, the physician must:

- Perform a pre-anesthetic examination and evaluation;
- Prescribe the anesthesia plan;
- Personally participate in the most demanding procedures in the anesthesia plan including, if applicable, induction and emergence;
- Ensure that a qualified individual performs any procedures in the anesthesia plan that he does not personally perform;
- Monitor the course of anesthesia administration at frequent intervals;
- Remain physically present and available for immediate diagnosis and treatment of emergencies; and
- Provide indicated post-anesthesia care.

A medical direction service furnished by a physician is not covered if the physician directs a nonqualified individual. A qualified individual is a CRNA, a student anesthetist, an anesthesiologist assistant, or an intern or resident.

Physicians must document in the beneficiary’s medical record that he performed the pre-anesthetic exam and evaluation, provided indicated post-anesthesia care, was present during some portion of the anesthesia monitoring, and present during the most demanding procedures, including induction and emergence, where indicated. Total anesthesia time must be documented in the medical record.
If anesthesiologists are in a group practice, one physician member may provide the pre-anesthesia examination and evaluation while another physician member fulfills the other criteria. Similarly, one physician member of the group may provide post-anesthesia care while another member of the group furnishes the other component parts of the anesthesia service. The medical record must indicate the services were furnished by physicians and identify the physician(s) who rendered them.

A physician who is directing the concurrent administration of anesthesia to four or fewer surgical patients should not be involved in furnishing additional services to other patients. If the physician is addressing an emergency of short duration in the immediate area, or administering an epidural or caudal anesthetic to ease labor pain, or providing periodic rather than continuous monitoring of an obstetrical patient, it does not constitute a separate service for the purpose of determining whether the medical direction criteria are met. A physician may also receive patients entering the operating suite for subsequent surgeries, may check on or discharge patients from the recovery room, and may handle scheduling matters while directing concurrent anesthesia procedures without affecting coverage for medical direction.

If the physician leaves the immediate area of the operating suite for other than short durations, devotes extensive time to an emergency case, or is not available to respond to the immediate needs of the surgical patients, the physician’s services are considered supervisory and are not covered as medical direction.

Medically directed anesthesia services are covered when provided by an anesthesiologist who is monitoring more than four concurrent anesthesia procedures, or who is performing other services while directing the concurrent procedures, in select instances. The physician must personally provide the pre-anesthesia exam and evaluation, prescribe the anesthesia plan, and be in the operating suite during the entire procedure. A flat rate payment is made to cover the physician’s involvement in pre-surgical anesthesia services. Medically supervised CRNA services are covered and are reported with the appropriate modifier.

Medicaid covers anesthesia services consistent with Medicare guidelines when provided under an attending physician relationship in a teaching hospital and/or in accordance with the coverage guidelines established by the Medicare policies for teaching physicians.

### 2.2 Nonmedically Directed Anesthesia Services by the CRNA

Anesthesia services provided by a CRNA under the supervision of the surgeon or another physician who is immediately available if needed are covered as nonmedically directed anesthesia services. MDHHS reimburses CRNAs for these services if all of the following conditions are met:

- The facility in which the services are rendered ensures that the anesthesia services are provided in a well-organized manner under the supervision of a physician (MD or DO).
- The facility is responsible for all anesthesia administered in the facility.
- A physician (MD or DO) or a CRNA under the supervision of a physician provided a pre-anesthetic exam and evaluation within 48 hours prior to the surgery.
- An intra-operative anesthesia record identifies the CRNA providing the anesthesia service and the supervising physician.
• For inpatients, the person administering the anesthesia writes a post-anesthesia follow-up report within 48 hours after surgery.
• For outpatients, a post-anesthesia evaluation for proper anesthesia recovery is performed in accordance with the policies and procedures approved by the medical staff.

There is no separate coverage for physicians for any portion of nonmedically directed anesthesia services. The physician’s supervisory service is covered as part of the facility charge where the surgery is performed. The pre-anesthetic exam and post-anesthesia evaluation is included in the anesthesia coverage for the nonmedically directed CRNA care and is not separately covered. Payment for the nonmedically directed anesthesia service provided by the CRNA is made to the CRNA or the legal entity employing the CRNA.

There is no separate coverage for anesthesia services performed by physicians who are also performing the medical or surgical service requiring the anesthesia. Any anesthesia service provided personally by the surgeon is included in the coverage for the surgical procedure itself.

2.3 MONITORED ANESTHESIA CARE

Monitored Anesthesia Care (MAC) is covered on the same basis as other anesthesia services as long as it is reasonable and medically necessary. MAC involves intra-operative monitoring by a physician, or by a qualified anesthesia provider under the medical direction of a physician, or by a CRNA under the supervision of a physician of the beneficiary’s vital physiological signs, in anticipation of the need for administration of general anesthesia or the development of adverse physiological patient reaction to the surgical procedure. It also includes the performance of a pre-anesthetic examination and evaluation, prescription of the anesthesia care required, administration of any necessary oral or parenteral medications (e.g., Atropine, Demerol, Valium) and provision of indicated post-operative anesthesia care.

2.4 MEDICAL AND SURGICAL SERVICES FURNISHED IN ADDITION TO ANESTHESIA SERVICES

2.4.A. ALLOWABLE SERVICES

Separate coverage is available for certain medical or surgical services furnished by a physician while furnishing anesthesia services to the beneficiary. The services may be furnished in conjunction with the anesthesia procedure to the beneficiary or as single services (e.g., the day of or the day before the anesthesia service). These services include insertion of a Swan Ganz catheter, insertion of central venous pressure lines, emergency intubation, and critical care. Separate coverage is not available for medical or surgical services, such as the pre-anesthetic examination of the beneficiary, pre- or post-operative visits, or usual monitoring functions, that are ordinarily included in the anesthesia service.

2.4.B. POST-OPERATIVE PAIN MANAGEMENT

Post-operative pain management is the responsibility of the surgeon (except in special circumstances) and is covered as part of the global service provided by the surgeon.

Placement of a continuous epidural to manage post-operative pain is separately covered under the appropriate CPT/HCPCS code for a continuous epidural when the physician (or CRNA under a physician’s supervision) performed the service for post-operative pain.
management and the procedure was not used as the mode of anesthesia for the surgery. Daily management of a continuous epidural on subsequent post-operative days is covered under the appropriate procedure code.

2.5 Anesthesia Time

Anesthesia time means the time during which the anesthesia provider (physician, CRNA, or AA providing anesthesia) is furnishing continuous anesthesia care to the beneficiary. It starts when the anesthesia provider begins to prepare the beneficiary for induction of anesthesia and ends when the beneficiary may be safely placed under post-operative supervision and the anesthesia provider is no longer in personal attendance. In counting anesthesia time when an interruption in the anesthesia service occurs, only the actual anesthesia time is counted. The anesthesia start and stop times must be documented in the medical record.

2.6 Electro-Convulsive Therapy [Change Made 7/1/23]

Anesthesia services related to electro-convulsive therapy are covered by the beneficiary’s Prepaid Inpatient Health Plan (PIHP)/Community Mental Health Services Program (CMHSP) or Medicaid Health Plan (MHP). The attending provider (revised 7/1/23) must obtain authorization from the PIHP/CMHSP or the MHP. Payment is made by the PIHP/CMHSP or MHP that authorized the service.

2.7 Prior Authorization for Anesthesia Services

If a surgical procedure requires PA, the operating surgeon is responsible for obtaining the authorization to perform the service. The anesthesia provider is not responsible for providing proof that the surgical procedure was authorized.

2.8 Hysterectomies and Sterilization Procedures

By federal statute, all services, including anesthesia services related to hysterectomies or sterilization procedures, must be supported by an informed consent that meets Medicaid’s consent requirements before the service can be covered. It is the responsibility of the operating surgeon to obtain this consent.

2.9 Using Modifiers

Anesthesia services must be coded using the appropriate CPT/HCPCS anesthesia codes with the appropriate modifiers. Anesthesia services for multiple surgeries are reported under the anesthesia procedure code with the highest base unit value with the total anesthesia time, in minutes, including all surgical procedures. (Refer to the MDHHS website for specific modifiers required for use with anesthesia services.)

2.10 Anesthesia Add-On Codes

Anesthesia add-on codes are covered in addition to the primary anesthesia code. Coverage for anesthesia add-on codes is based on the anesthesia base units (ABUs) established by CMS for the specific anesthesia add-on code.

Obstetrical anesthesia add-on codes are covered based on the ABUs assigned by CMS plus the anesthesia time units associated with the anesthesia add-on code.
2.11 LABOR AND DELIVERY

Coverage of anesthesia services associated with labor and delivery is based on the type of anesthesia provided. If anesthesia is provided by placement of an epidural catheter, it is covered under the appropriate anesthesia code depending on the type of delivery. The coverage for this service includes any needle placement, drug injection, and any replacement of the epidural catheter during labor. If endotracheal or general anesthesia is provided for the delivery, it is covered under the appropriate anesthesia code. If an epidural catheter is inserted for labor and delivery but it is later necessary to provide endotracheal anesthesia for the delivery, the surgical code for the epidural insertion is covered in addition to the anesthesia service code for the delivery. The medical record must fully document the circumstances requiring both types of anesthesia.
SECTION 3 – GENERAL PRACTICE

3.1 ALLERGY TESTING AND IMMUNOTHERAPY

Medicaid covers allergy testing and immunotherapy services. Testing is covered under the appropriate CPT/HCPCS code with the appropriate quantity as indicated by the code description. A visit is covered in addition to the testing. Coverage of the testing includes the interpretation of the test results in relation to the history and physical examination of the beneficiary.

Immunotherapy services are covered under the appropriate CPT/HCPCS component codes. The services of the provider who actually prepares and provides the antigens/venoms are covered on a per dose basis. Services of the provider who parenterally administers the antigen/venom are covered under the appropriate injection codes. The injection and the antigen/venom preparation services are covered separately.

Allergy injection services are not covered in addition to the visit unless the visit represents another significant, separately identifiable service above and beyond the antigen/venom immunotherapy and the appropriate modifier is reported.

MDHHS assumes antigens are prepared for administration over a period of time in increasing doses. Antigens are covered at the same rate per dose regardless of whether multiple or single dose vials are used. Medicaid covers the dose administered and the preparation of the dose administered.

Any allergy testing and treatments that have not been proven to be effective are not covered.

3.2 AMBULANCE SERVICES

Coverage for ambulance services is restricted to medically necessary and appropriate services when medical/surgical or psychiatric emergencies exist or no other effective or less costly mode of transportation for medical treatment can be used because of the beneficiary's medical condition.

Emergency ambulance services do not require a physician's order.

The physician must order all non-emergency, medically necessary ambulance transportation. Refer to the Ambulance Chapter for order requirements and additional information related to ambulance services.

3.3 AUDIOLOGICAL AND HEARING SERVICES

Medicaid covers hearing evaluations and other audiological function testing by a physician, physician assistant, or advanced practice registered nurse. Hearing evaluations are covered when they include pure-tone audiometry, speech audiometry, and a report of findings.

A hearing aid is covered if all of the following criteria are met:

- The practitioner performs a medical evaluation within six months prior to the beneficiary obtaining a hearing aid. For beneficiaries under age 18, an otolaryngologist or other appropriate specialty physician must complete the evaluation.
- The evaluation reveals that the beneficiary needs a hearing aid and that there is no contraindication to the use of a hearing aid.
The practitioner prescribes a hearing aid.

The beneficiary presents the prescription and a written statement of the medical clearance to an enrolled hearing center or audiologist for audiological testing and a hearing aid exam.

The beneficiary is referred to an enrolled hearing aid dealer, hearing center, or audiologist for the selection and provision of the aid.

3.3.A. NEWBORN HEARING SCREENING EXAMINATION

MDHHS requires that all Medicaid-covered newborns be screened using the automated auditory brainstem response (ABR) method and/or the automated evoked otoacoustic emissions (EOAE) method.

Results must be reported to the child’s primary care provider in a timely manner.

If the birthing hospital has the appropriate equipment, the screening must be done at the hospital. When this occurs, the screening is covered as a part of the inpatient stay.

If the hospital is not equipped for ABR or EOAE, the child’s physician, CNM, or NP must refer the newborn to a Medicaid enrolled hearing center where screening must be completed prior to one month of age.

Refer to the Hearing Services subsection of the Hospital Chapter for additional information.

3.3.B. LOCAL HEALTH DEPARTMENT SCREENINGS

The primary care provider or Head Start agency (with approval from the child’s primary care provider) may refer preschool-aged children to the local health department (LHD) for objective hearing screening. The results of the screening must be reported to the child’s primary care provider. If the LHD is unable to report the results to the child’s primary care provider, the LHD must clearly document why this was not accomplished. Providers are strongly encouraged to share the results with the Head Start agency if that agency was the referral source, and if the provider receives authorization.

MDHHS monitors the number of MHP referrals reported by LHDs, and may initiate charge-backs to the plans.

Refer to the Additional Information on Objective Hearing & Vision Screening subsection of the Local Health Department Chapter for additional information.

3.4 CARE OF ABUSED CHILDREN [CHANGES MADE 7/1/23]

Medicaid covers physician services related to the diagnosis and treatment of suspected abused or neglected children. When the physician has reasonable cause to suspect that a child may have been abused or neglected, he must immediately contact the appropriate Protective Services Unit of the local MDHHS office to report his suspicions.
Medicaid covers the inpatient stay of an abused or neglected child when, upon admission, the attending provider (revised 7/1/23) determines that the child requires further assessment and treatment which is best provided on an inpatient basis.

**Healthcare providers (revised 7/1/23) cannot admit a child to the hospital for the sole purpose of custodial or protective care.**

### 3.5 Childbirth/Parenting Education

Medicaid covers childbirth/parenting education for pregnant women when referred in writing by the prenatal care provider and provided by qualified educators in a Medicare certified outpatient hospital or by a certified Maternal Infant Health Program (MIHP) program provider.

This service is not covered if rendered by the prenatal care provider in the office setting.

### 3.6 Clinical Trials

The program covers routine patient costs furnished in connection with participation in a qualifying clinical trial. Routine patient costs are any item or service provided to the beneficiary under the qualifying clinical trial.

#### 3.6.A. Covered Items and Services

Routine patient costs include any item or service provided to prevent, diagnose, monitor, or treat complications resulting from participation in the qualifying clinical trial to the extent that the provision of such items or services to the beneficiary would otherwise be covered outside the course of participation in the qualifying clinical trial under the state plan or waiver. Routine patient costs also include any item or service required solely for the provision of the investigational item or service that is the subject of the qualifying clinical trial, including the administration of the investigational item or service. Examples of routine costs include otherwise covered physician services or laboratory or medical imaging services that assist with prevention, diagnosis, monitoring, or treatment of complications arising from clinical trial participation.

#### 3.6.B. Non-Covered Items and Services

Items and services considered experimental or investigational are not a covered benefit. This includes the experimental or investigational drug, item, or service that is the subject of the qualifying clinical trial. Other non-covered items and services include:

- Items and services not otherwise covered by the Medicaid program;
- Items and services provided to the beneficiary solely to satisfy data collection and analysis for the qualifying clinical trial that are not used in the direct clinical management of the beneficiary; and
- Items and services provided by the trial sponsor without charge.
3.6.C. QUALIFYING CLINICAL TRIAL

A qualifying clinical trial is defined to include a clinical trial in any clinical phase of development that is conducted in relation to the prevention, detection, or treatment of any serious or life-threatening disease or condition. A qualifying clinical trial must also be one or more of the following:

- A study or investigation that is approved, conducted, or supported (including funding through in-kind contributions) by one or more of the following:
  - the National Institutes of Health (NIH);
  - the Centers for Disease Control and Prevention (CDC);
  - the Agency for Healthcare Research and Quality (AHRQ);
  - the Centers for Medicare & Medicaid Services (CMS);
  - a cooperative group or center of any of the entities described above, or the Department of Defense or the Department of Veterans Affairs; and
  - a qualified non-governmental research entity identified in the guidelines issued by NIH for center support grants.

- A clinical trial, approved or funded by any of the following entities, that has been reviewed and approved through a system of peer review in compliance with Section 210 of the Consolidated Appropriations Act:
  - the Department of Energy
  - the Department of Veterans Affairs
  - the Department of Defense

- A clinical trial that is one conducted pursuant to an investigational new drug exemption under section 505(i) of the Federal Food, Drug, and Cosmetic Act or an exemption for a biological product undergoing investigation under section 351(a)(3) of the Public Health Service Act; or

- A clinical trial that is a drug trial exempt from being required to have one of the exemptions in the prior bullet.

3.6.D. DETERMINATION FOR COVERAGE [CHANGE MADE 4/1/23]

Determination for coverage of costs associated with a beneficiary participating in a qualifying clinical trial shall be made with the following considerations:

- Expedited and completed within 72 hours;
- Made without limitation on the geographic location of where the clinical trial is conducted or based on the network affiliation of the principal investigator or provider treating the beneficiary in connection with the clinical trial;
- Based on attestation of the principal investigator or provider regarding the appropriateness of the qualifying clinical trial via the Attestation to the Appropriateness of the Qualified Clinical Trial form (BPHASA-2210); and **(added per bulletin MMP 22-42)**
Shall not require the submission of protocols of the qualifying clinical trial or any other documentation that may be proprietary.

3.6.E. ATTESTATION TO THE APPROPRIATENESS OF THE QUALIFIED CLINICAL TRIAL [SUBSECTION ADDED 4/1/23]

A completed and signed Attestation to the Appropriateness of the Qualified Clinical Trial form (BPHASA-2210) must be submitted with all claims and PA requests for routine patient costs for items and services furnished in connection with a beneficiary’s participation in a qualified clinical trial. The form represents the attestation by the principal investigator and health care provider to the appropriateness of the clinical trial.

The BPHASA-2210 must be signed by both the principal investigator of the clinical trial and a qualified health care provider. Qualified health care providers include licensed providers who are part of the beneficiary’s health care team such as, but not limited to; the beneficiary’s primary care, specialty, treating, referring, or ordering provider, pharmacist, or the principal investigator of the clinical trial. The completed form must be submitted with all claims and PA requests for routine patient costs for items and services furnished in connection with a beneficiary’s participation in a qualified clinical trial. (Refer to the Forms Appendix for form BPHASA-2210.) (text added per bulletin MMP 22-42)

3.6.F. PRIOR AUTHORIZATION [RE-NUMBERED AND CHANGES MADE 4/1/23]

Not all items and services associated with a clinical trial require prior authorization (PA). All PA requirements that apply to services provided outside of a clinical trial apply to routine services within a clinical trial. PA requests for routine patient costs for items and services furnished in connection with a beneficiary’s participation in a qualified clinical trial must include a completed and signed Attestation to the Appropriateness of the Qualified Clinical Trial form (BPHASA-2210). (text revised and added 4/1/23) Refer to the General Information for Providers Chapter for additional PA requirements.

3.6.G. CLAIMS FOR SERVICES [RE-NUMBERED AND CHANGES MADE 4/1/23]

All claims for routine patient costs associated with participation in a clinical trial must include a completed and signed Attestation to the Appropriateness of the Qualified Clinical Trial form (BPHASA-2210), (text added per bulletin MMP 22-42) the National Clinical Trial (NCT) number and an ICD-10 diagnosis code indicating the services are associated with a clinical trial, such as Z00.6 (encounter for examination for normal comparison and control in clinical research program). Claims may also include any future ICD-10 diagnosis code(s) that falls within the structure and conventions of the classification and general guidelines applicable to clinical trial services as established by CMS and National Center for Health Statistics (NCHS) services.

Refer to the Billing & Reimbursement for Institutional Providers and the Billing & Reimbursement for Professionals chapters for additional claim requirements for services associated with participation in a clinical trial.
3.7 COMMUNICABLE DISEASE TREATMENT

Medicaid covers the diagnosis and treatment of communicable diseases, including tuberculosis (TB), hepatitis, meningitis, and enteric disease. Cases of communicable disease must be reported to the LHD. Providers may obtain additional information regarding communicable disease prevention and control from the LHD.

3.8 DIABETES PATIENT EDUCATION

Medicaid covers diabetes self-management education for beneficiaries diagnosed with diabetes when ordered by an enrolled physician or qualified non-physician medical practitioner responsible for the beneficiary’s diabetic care. Services must be provided by diabetes educators (e.g., nurse, dietitian) in a Medicaid enrolled outpatient hospital or LHD that meets Michigan Medicaid DSME program requirements.

The physician or qualified non-physician medical practitioner treating the beneficiary’s diabetes must maintain a documented diabetes diagnosis and any special needs supported by medical necessity in the medical record.

Refer to the Hospital Chapter of this manual for information about DSME program requirements.

3.9 DIAGNOSTIC TESTS

Medicaid covers tests to diagnose a disease or a medical condition. Diagnostic testing must be directly related to the presenting condition of the beneficiary. The ordering or referring of specific diagnostic tests may be restricted to physicians (MD or DO) by program policy.

3.10 FAMILY PLANNING

Medicaid covers family planning services (e.g., examination, sterilization procedures, limited infertility screening, and diagnosis). A visit for family planning typically includes a complete physical examination, including a pelvic examination.

Separately identifiable services provided in addition to the examination are covered separately. Counseling for family planning services, including sterilization, is covered as a part of the family planning visit.

Medicaid covers contraceptives including:

- Oral contraceptives (must be prescribed by a physician and dispensed by an enrolled pharmacy or Family Planning Clinic)
- Diaphragms
- Intrauterine devices
- Condoms (available from a pharmacy without a prescription, or from a family planning clinic)
- Foams, gels, sponges (must be prescribed by a physician and dispensed by a pharmacy or family planning clinic)
3.11 FOOT CARE

3.11.A. ROUTINE FOOT CARE

Medicaid covers these services when provided by a physician or podiatrist and when the beneficiary manifests signs and symptoms from a specific systemic disease of sufficient severity that care by a nonprofessional would be hazardous. The medical necessity for these services must be documented in the beneficiary’s medical record, and the beneficiary must be receiving regular care from a physician for the systemic disease.

3.11.B. MYCOTIC NAILS, DEBRIDEMENT

Medicaid covers debridement of mycotic nails once in a 60-day period when provided during or following any appropriate course of medical treatment for the causative fungal infection. Documentation in the beneficiary’s medical record must support clinical evidence of the mycosis, identification of the toenail(s) affected, and evidence that the mycosis is likely to result in significant medical complications if appropriate antifungal treatment is not rendered.

The debridement of mycotic nails is covered for beneficiaries in the nursing facility only on the written order of the attending physician (MD or DO). The order must be patient-specific and not for routine care only.

3.12 FRACTURE CARE

Medicaid covers medically necessary fracture care. Coverage includes the initial traction, cast application and removal, and routine follow-up care. Additional reductions are independent procedures not included in the original treatment and are covered separately.

Fracture care includes the insertion and removal of necessary wires, pins, etc. If the wire, pins, etc., are the types that are not normally removed but the removal is medically necessary, Medicaid also covers such removal. Documentation of the need must be included on the claim.

Coverage also includes subsequent recasting required during the course of fracture treatment (i.e., following initial cast application). Medicaid covers cast removal as a separate service only when performed by a physician who was not involved in the fracture care and who is not reapplying another cast.

3.13 GENDER AFFIRMATION SERVICES

The Medicaid program covers medically necessary gender affirmation/confirming medical, surgical, and pharmacologic treatments and procedures for beneficiaries clinically diagnosed with gender dysphoria. Treatment and procedures for the health management of individuals with gender dysphoria are not considered to be elective or cosmetic when determined to be medically necessary. Medical and mental health services, determination of medical necessity, as well as the relevant qualifications and clinical experience requirements of treating providers, must adhere to the most current clinical practice guidelines, including those established by the World Professional Association for Transgender Health (WPATH) and the Endocrine Society, as applicable.
For coverage of gender affirmation surgical procedures, the medical necessity determination must include a mental health evaluation indicating the individual meets diagnostic and readiness criteria in accordance with current WPATH standards of care. The mental health evaluation must be conducted by a fully licensed mental health professional who possesses, at a minimum, a master’s degree or equivalent in a clinical behavioral science field and has experience in the treatment and assessment of gender dysphoria. The evaluation must be documented in the beneficiary’s medical record and included in requests for coverage of surgical interventions that require prior authorization.

3.14 GENETIC COUNSELING

Medicaid covers medically necessary genetic counseling services as defined in section 333.17001 (Act 368 of 1978) when provided by a Medicaid-enrolled physician, PA, or APRN (NPs, CNSs, and CNMs). Genetic counseling may also be provided by a licensed Medicaid-enrolled Genetic Counselor when ordered by a physician, PA, or APRN.

Counseling is covered when provided in consideration of, or in conjunction with, genetic testing, or provided in relation to a genetic or congenital condition. Counseling is considered medically necessary when there is an expectation that a genetically inherited or acquired condition exists, and the beneficiary displays clinical features or is at risk of inheriting the disease/condition based upon factors including, but not limited to, personal history, family history, documentation of a genetic mutation, and/or ethnic background.

Genetic tests recommended as a result of genetic counseling may be covered when provided in accordance with Medicaid’s Genetic and Molecular Testing policy. Providers should refer to the Genetic and Molecular Testing subsection of the Laboratory Chapter for information on genetic testing.

3.15 IMMUNIZATIONS (VACCINES AND TOXOIDS)

Immunizations* are covered when given according to Advisory Committee on Immunization Practices (ACIP) recommendations. MDHHS encourages providers to immunize all Medicaid beneficiaries according to the accepted immunization schedule.

- For Medicaid children 18 years and younger, the Vaccine for Children (VFC) Program provides covered immunizations at no cost to the provider.
- Medicaid covers immunizations for beneficiaries 19 years of age or older.
- Any Local Health Department (LHD) in the state can be contacted for specifics about the VFC program, what immunizations are available, and instructions on enrolling and obtaining immunizations.

Medicaid does not pay for immunization costs for any product that is available free of charge for Medicaid beneficiaries. An administration fee is covered separately for immunizations given to Medicaid beneficiaries whether the immunization is free or not, and without regard to other services provided on the same day. The administration fee is set for each immunization.

For immunizations available free under the VFC program, the amount a provider may charge for vaccine administration may be limited. Providers cannot charge more for services provided to Medicaid beneficiaries than for services provided to their general patient population. For example, if the charge for

* An immunization administered for travel to a foreign country is not a Medicaid-covered benefit.
administering a vaccine to a private-pay patient is $5.00, then the charge for immunization administration to the Medicaid patient cannot exceed $5.00.

For Medicaid beneficiaries enrolled in an MHP, the health plan must ensure that the beneficiary has access to receive complete and timely immunizations. When a provider contracts with a health plan to provide primary care (which includes immunizations), the provider should immunize the beneficiaries assigned to him by the plan. MHP providers enrolled in the VFC program are encouraged to immunize and are discouraged from referring beneficiaries to a LHD for these services.

If a beneficiary is in a nursing facility, the facility is responsible for appropriately immunizing the beneficiary. Coverage of the immunizations is included in the per diem payment made to the facility.

3.16 INJECTABLE DRUGS AND BIOLOGICAL PRODUCTS

3.16.A. COVERAGE OF THE INJECTABLE

Medicaid covers injectable drugs and biological products administered by a physician in the office, clinic setting, and in the beneficiary’s home. The drug or biological product must be Food and Drug Administration (FDA) approved and reasonable and necessary according to accepted standards of medical practice for the diagnosis or treatment of the illness or injury of the beneficiary. There must be sufficient clinical evidence demonstrating the effectiveness and safety of the drug or biological product.

An injectable drug is covered if the drug is:

- Specific and effective treatment for the condition for which it is being given.
- Given for the treatment of a particular documented diagnosis, illness, or condition (e.g., vitamin injections which are not specific replacement therapy for a documented deficiency or disease and are given simply for the general good and welfare of the patient).
- Administered by the recommended or accepted administration method for the condition being treated.
- Administered according to the recommended dosing schedule and amount for the condition being treated.

For any injectable drug that a practitioner purchases directly through a pharmacy, distributor or wholesaler which is administered in the office, clinic setting, or the beneficiary’s home, the injectable drug is considered a physician service rather than a pharmacy benefit. The physician must not send the beneficiary to a pharmacy to obtain an injectable drug. If a pharmacy sells injectable drug products to a physician, the pharmacy must obtain payment directly from the purchasing physician.

MDHHS allows a select list of physician-administered drugs to be covered through the pharmacy benefit as identified in the Special Product Coverage section of the Pharmacy Chapter. If the practitioner uses a pharmacy to acquire the drug for administration, the pharmacy must submit the claim as a pharmacy claim. (Refer to the Special Product Coverage section of the Pharmacy chapter for additional information.)
If the beneficiary has other insurance that allows the injectable drug product to be obtained at the pharmacy by the beneficiary, then the other insurance rules (e.g., Medicare Part D) must be followed; however, the reimbursement of the beneficiary’s liability (i.e., coinsurance/deductible/copay) may be covered as a physician service.

When administering a dose drawn from a multidose vial, only the amount administered to the beneficiary is covered. If a drug is only available in a single use vial and any drug not administered must be discarded, the amount of the drug contained in the vial is covered.

3.16.B. PHYSICIAN-ADMINISTERED DRUGS AND BIOLOGICAL PRODUCTS NOT COVERED BY MEDICAID HEALTH PLANS

MDHHS will maintain a list of specific Medicaid program covered physician-administered drugs and biological products that are not covered by MHPs. This list of physician-administered drugs and biological products, carved out from MHP coverage, will be reimbursed as a Fee-for-Service (FFS) benefit for all beneficiaries in FFS and for those enrolled in an MHP.

A list of the specific drugs covered under this policy will be maintained on the MDHHS website. The list may be modified as new drugs are approved or added to the physician-administered carve-out. No notice of changes to the list will be issued directly to providers. (Refer to the Directory Appendix for website information.)

3.16.B.1. PRIOR AUTHORIZATION REQUIREMENTS FOR CARVE-OUT INJECTABLE DRUGS AND BIOLOGICAL PRODUCTS

Certain drugs on the carve-out list of physician-administered drugs and biological products not covered by MHPs may require prior authorization (PA). The purpose of PA is to review the medical need for certain services. It does not serve as an authorization of fees or beneficiary eligibility.

When indicated on the MDHHS-maintained list, PA requests will require a completed Practitioner Special Services Prior Approval-Request/Authorization form (MSA-6544-B), a Program Review Division (PRD) documentation checklist, and all supporting documentation. Providers are to contact the PRD to obtain the PRD documentation checklist for drugs and biological products that require PA. Once all required documentation is collated, information must be submitted according to form MSA-6544-B completion and submission instructions. (Refer to the Forms Appendix for a copy of the form and completion instructions and to the Directory Appendix for PRD contact information.)

3.16.B.2. BILLING CONSIDERATIONS FOR CARVE-OUT INJECTABLE DRUGS AND BIOLOGICAL PRODUCTS FOR MEDICAID HEALTH PLAN ENROLLEES

When multiple medical services are provided in conjunction with a carve-out physician-administered drug, FFS claims will process for payment of the carve-out drug service line only; all other claim lines will be denied with Claim Adjustment Reason Code (CARC) 24 – Charges are covered under a capitation agreement/managed care plan. The associated
services that are denied by FFS are to be billed to the beneficiary’s health plan for payment.

3.16.C. ADMINISTRATION OF THE INJECTABLE

Medicaid covers the injectable drug and the administration of the drug. If the administration of the drug is an integral component of the procedure, the administration is considered a part of that service and is not separately reimbursed.

Payment for administration of injectables provided through a PIHP/CMHSP clinic or affiliated physician practice is included in the capitation rate to the PIHP/CMHSP and is not separately reimbursable to the physician.

Injections in the office/clinic/beneficiary’s home may be administered by appropriate non-physician staff who are employed by the physician or are employed by the same clinic/group as the physician. Administration of the injectable drug by non-physician staff must be under the physician's personal supervision or under the delegation and supervision of the physician as required by the Public Health Code. Providers should refer to the Coordination of Benefits Chapter of this manual for additional requirements that apply when a beneficiary has Medicare or commercial insurance coverage. For a list of the drugs administered under this policy, refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information. Physician-administered drugs and biologicals are included on the Practitioner and Medical Clinic Fee Schedule. (Refer to the Directory Appendix for website information.)

3.16.D. INJECTABLES ADMINISTERED THROUGH PIHP/CMHSP FOR MHP ENROLLEES

Specific injectable drugs administered by a physician or non-physician practitioner (e.g., physician assistant and nurse practitioner) through a PIHP/CMHSP clinic to Medicaid Health Plan (MHP) enrollees are reimbursable by MDHHS on a fee-for-service basis when the following criteria are met:

- The beneficiary has an open case with the PIHP/CMHSP;
- The beneficiary receives the injections on a scheduled or routine basis as part of the PIHP/CMHSP treatment/supports regimen; and
- The PIHP/CMHSP clinic notifies the beneficiary’s MHP or primary care physician that this service is being rendered.

A list of the specific drugs covered under this policy is maintained on the MDHHS website. (Refer to the Directory Appendix for website information.) The list may be modified as new drugs are approved for Medicaid coverage. No notice of changes to the list will be issued directly to providers. Drugs on this list may be billed using the provider's NPI number(s) associated with the PIHP/CMHSP.
3.16.E. PSYCHOTROPIC INJECTABLES ADMINISTERED BY PHYSICIANS NOT ASSOCIATED WITH A PIHP/CMHSP

Physicians not associated with a PIHP/CMHSP who are administering psychotropic injectable carve-out drugs in an outpatient setting to MHP enrollees must comply with the following criteria:

 Physicians administering psychotropic injectable carve-out drugs must notify the beneficiary’s MHP or primary care physician that this service is being rendered.
 Injectable carve-out drugs covered by MDHHS through FFS must be billed through CHAMPS using the physician’s NPI.
 FFS reimbursement by MDHHS to physicians not associated with a PIHP/CMHSP is limited to psychotropic injectable carve-out drugs only. Physicians may not bill MDHHS for additional services rendered during the visit, including any injectable administration cost. Physicians should bill the MHP for any additional services, if necessary, after obtaining MHP prior authorization as per the "Out-of-Network Services" policy located in the Medicaid Health Plan chapter.

3.17 LABORATORY

Medicaid covers diagnostic laboratory services and pathology procedures reasonable and necessary to guide detection, diagnosis, management, and/or treatment of a specific medical condition, illness, or injury and a limited number of screening laboratory tests, including but not limited to, those associated with preventive services assigned a grade A or B by the United States Preventive Services Task Force (USPSTF).

Covered laboratory and pathology services must be:

 Recommended and ordered by the beneficiary’s treating physician, podiatrist, physician assistant, nurse practitioner, clinical nurse specialist, dentist, or CNM according to their scope of practice.
 Provided in accordance with evidence based generally accepted standards of medical practice.
 Clinically appropriate in terms of type, frequency, extent, site, and duration for the beneficiary’s symptoms, diagnosis, illness, or injury.
 Used in the clinical management of the beneficiary's specific medical condition.
 Provided in accordance with all applicable Medicaid clinical criteria, requirements, policies, and/or provisions of coverage.
 Performed in a laboratory appropriately certified by the Clinical Laboratory Improvement Amendments (CLIA).

Refer to the Laboratory chapter for additional information regarding coverage parameters, ordering limitations, and prior authorization requirements.

3.17.A. MEDICAL NECESSITY

The beneficiary’s medical record must include sufficient documentation to support the medical necessity of the laboratory service regardless of where the tests are performed. The documentation must include a description of the beneficiary’s symptomatology and
other findings that led the practitioner to order the test(s). An explanation of the laboratory testing method or the results of diagnostic tests, whether normal or abnormal, is not considered documentation of medical necessity. For approval of payment, the laboratory procedure(s) must be specific and appropriate to the beneficiary's documented condition and diagnosis.

3.17.B. REFERRED SERVICES

If a practitioner refers a beneficiary to an outside laboratory (e.g. independent clinical lab or hospital outreach lab) for testing, the practitioner must indicate their NPI number on the referral. A practitioner may not charge for laboratory tests when a specimen is obtained but sent out of the office (i.e., skin lesions, pap smears, etc.) for analysis.

3.17.C. PRACTITIONER’S OFFICE LABORATORY

Medicaid covers laboratory services provided in a practitioner’s office laboratory (POL) when they are appropriate to be performed in the office and the POL is certified to perform the specialties or subspecialties of tests billed. The laboratory must hold a CLIA certificate of registration, compliance (COC), accreditation (COA), waiver (COW) or a certificate of Physician Performed Microscopy Procedures (PPMP) from the Centers for Medicare & Medicaid Services (CMS). The POL’s CLIA number must be present on the claim for laboratory services to be considered for reimbursement. POL reimbursement is limited to services listed on the applicable provider’s fee schedule.

3.18 NERVE BLOCK

Nerve blocks are covered as a surgical procedure when performed for diagnostic or therapeutic purposes. As a surgical procedure, a complete description of the services rendered must be documented in the beneficiary’s medical record. When used as anesthesia for another procedure, the anesthesia guidelines apply. Nerve blocks are not separately covered when used as a local anesthetic for another surgical procedure.

A nerve block is the injecting of a local anesthetic or neurolytic agent around a nerve to produce a block of that specific nerve. It is not injecting a painful area under the skin or a trigger point, or an injection into the general muscle mass of subcutaneous tissue that does not follow the anatomy of a specific nerve, to produce temporary relief of pain in that area.

Nerve blocks are payable in the hospital or office setting as appropriate. No more than three nerve blocks to the same area are covered within a six-month period without documentation of medical necessity. Documentation must include the diagnosis or condition, the management/treatment plan, specific nerve(s) affected, indications, and expected benefits. A medical visit is not covered separately on the same day unless documentation is supplied to justify the separate services.

3.19 ORTHOPTIC SERVICES

Strabismus surgeries are covered for beneficiaries of any age and do not require PA. Providers are reminded that these surgeries must be medically necessary and not performed solely for cosmetic purposes.

Refer to the Vision chapter of this manual for other specific orthoptic coverages.
3.20 Oxygen

Medicaid covers oxygen and the equipment necessary for the administration of oxygen therapy.

A pharmacy or a medical supplier may provide gaseous cylinder oxygen. Portable cylinder oxygen is allowable if the cylinder can be refilled and if the flow rate is adjustable.

Only a medical supplier may provide concentrators, liquid oxygen, and oxygen tents, and PA is required.

All oxygen and equipment requires a physician's prescription and a CMN. The initial prescription is valid for six months. The first follow-up prescription is valid for six months, and each subsequent prescription is valid for one year.

The written prescription for oxygen must include all of the following:

- The date the oxygen was prescribed;
- The beneficiary's diagnosis(es);
- The flow rate (liters per minute);
- The number of hours to be used per day;
- Duration of need;
- Delivery system to be used; and
- PO2 level or oxygen saturation.

(Refer to the Medical Supplier Chapter of this manual for additional information related to face-to-face and PA requirements.)

3.21 Substitute and Locum Tenens Physicians [Changes Made 7/1/23]

Medicaid covers substitute physicians or locum tenens physicians and allows payment to be made to the beneficiary's regular physician for these services. Federal statutes and CMS requirements determine parameters for these arrangements.

Medicaid coverage under the beneficiary’s regular (revised 7/1/23) physician for the services of a substitute physician can only occur under the following substitute physician billing arrangements:

- An informal reciprocal arrangement for a period not to exceed 14 days; or
- A locum tenens or temporary arrangement for 90 continuous days in the case of a per diem or other fee-for-time compensation.

Coverage for services provided by a substitute physician under either a reciprocal billing or a locum tenens arrangement must follow Medicaid policy for the service(s) rendered. Documentation in the beneficiary’s medical record must identify the physician actually providing the service.

3.22 Supplies in the Office Setting

RVU-based payment to practitioners includes payment for the office overhead expense associated with the service. In most cases, the overhead includes the supplies used or provided by the practitioner in connection with the service, and the supplies are not separately reimbursed.
Providers must not require beneficiaries to purchase an item in advance from a pharmacy or medical supplier that is an integral component of the service. Surgical dressings applied by a physician in the office or other nonfacility setting are not covered separately.

Medicaid does not cover take-home supplies dispensed from the office setting. If a beneficiary requires in-home supplies, a written prescription must be presented to the pharmacy or medical supplier and supplies dispensed accordingly.

In keeping with the RVU-based fee schedule, Medicaid separately covers a limited number of supplies used in the office setting (such as intrauterine devices and casting supplies) because an allowance for these supplies is not typically included in the respective treatment procedure codes. Casting and splinting supplies are covered separately when used with the fracture and dislocation or casting, splinting or strapping procedure codes listed in the musculoskeletal surgery section of the CPT coding manual.

(Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding separately covered supplies.)

### 3.23 **Tuberculosis Testing**

Medicaid covers TB testing according to the guidelines established by the AAP and USPSTF which are based on risk. A risk assessment may be completed at each visit. Coverage for the TB test includes any return visit to read the results of the TB test.

For assistance in determining high risk, providers may contact the MDHHS Division of Communicable Diseases, the AAP, or the USPSTF. (Refer to the Directory Appendix for contact information.)

### 3.24 **Vision Services**

Refer to the Vision chapter of this manual for specific coverage information.

### 3.25 **Weight Reduction**

Medicaid covers treatment of obesity when done for the purpose of controlling life-endangering complications, such as hypertension and diabetes. If conservative measures to control weight and manage the complications have failed, other weight reduction efforts may be approved. The physician must obtain PA for this service. Medicaid does not cover treatment specifically for obesity or weight reduction and maintenance alone.

The request for PA must include the medical history, past and current treatment and results, complications encountered, all weight control methods that have been tried and have failed, and expected benefits or prognosis for the method being requested.

Medicaid policy is generally based on CMS guidelines for Medicare coverage of bariatric surgery. If surgical intervention is desired, a psychiatric evaluation of the beneficiary's willingness/ability to alter his lifestyle following surgical intervention must be included.

If the request is approved, the physician receives an authorization letter for the service. A copy of the letter must be supplied to any other provider, such as a hospital, that is involved in providing care to the beneficiary.
SECTION 4 – GENERAL PRACTICE - SPECIAL CONSIDERATIONS

4.1 APERESIS, THERAPEUTIC

Therapeutic apheresis is covered for the following indications:

- Plasma exchange for acquired myasthenia gravis;
- Leukapheresis in the treatment of leukemia;
- Plasmapheresis in the treatment of primary macro-globulinemia (Waldenstrom);
- Treatment of hyperglobulinemia, including (but not limited to) multiple myelomas, cryoglobulinemia and hyperviscosity syndromes;
- Plasmapheresis or plasma exchange in the last resort treatment of thrombotic thrombocytopenic purpura (TTP);
- Plasmapheresis or plasma exchange in the last resort treatment of life-threatening rheumatoid vasculitis;
- Plasma perfusion of charcoal filters for treatment of pruritis of cholestatic liver disease;
- Plasma exchange in the treatment of life-threatening forms of Goodpasture’s Syndrome;
- Plasma exchange in the treatment of glomerulonephritis associated with antiglomerular basement membrane antibodies and advancing renal failure or pulmonary hemorrhage;
- Treatment of chronic relapsing polyneuropathy for beneficiaries with severe or life-threatening symptoms who have failed to respond to conventional therapy;
- Treatment of life-threatening scleroderma and polymyositis when the beneficiary is unresponsive to conventional therapy;
- Treatment of Guillain-Barre Syndrome; and
- Treatment of life-threatening Systemic Lupus Erythematosus (SLE) when conventional therapy has failed to prevent clinical deterioration

Coverage is limited to the following settings:

- In a hospital setting (either inpatient or outpatient). Nonphysician services furnished to hospital patients are covered as hospital services. When covered services are provided to hospital patients by an outside provider/supplier, the hospital is responsible for paying the provider/supplier for the services.
- In a nonhospital setting, such as a physician directed clinic, when all of the following conditions are met:
  - A physician is present to perform medical services and to respond to medical emergencies at all times during patient care hours.
Each patient is under the care of a physician.
All nonphysician services are furnished under the personal supervision of a physician.

When the physician provides direct supervision of the procedure or personally performs any services, professional services are covered as therapeutic apheresis (plasma and/or cell exchange).

4.2 CHEMOTHERAPY ADMINISTRATION

Medicaid covers the services of a physician who administers antineoplastic chemotherapy to beneficiaries with a cancer diagnosis in the office setting and in the beneficiary’s home. The chemotherapy drugs administered by the physician are covered separately.

Administration of other drugs for diagnoses other than cancer is covered under therapeutic, diagnostic, or prophylactic injection/infusion services.

Chemotherapy administration by push and by infusion techniques is covered on the same day; however, only one push administration is covered on a single day.

Physicians must personally administer the drug or be present when a qualified employee of the physician administers the drug. If chemotherapy is administered without face-to-face contact between the physician and the beneficiary, the services are covered if furnished in the physician’s office by a qualified employee under the physician’s supervision and the medical record reflects the physician’s active participation in and management of the course of treatment.

In the hospital setting, chemotherapy administration is only covered when the physician personally administers the drug.

Refilling and maintenance of an implantable pump or reservoir is covered. Chemotherapy administration by IV push, infusion, or intra-arterial technique is not covered in addition to refilling the implantable pump or reservoir. Flushing of a vascular port prior to chemotherapy is included in the administration and is not covered separately. If a special visit is made to the physician’s office only for port flushing, the service is covered under the appropriate E/M code.

Hydration therapy intravenous (IV) infusion is covered as a part of the chemotherapy IV infusion service when administered simultaneously. Hydration therapy is covered separately when administered sequentially or as separate procedures. The distinct procedural service modifier should be reported with the hydration therapy code when performed sequentially.

Supplies necessary to administer chemotherapy in the office setting are included in the overhead expense portion of the administration services and are not covered separately. (Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters for chemotherapy drugs.)

4.3 HEMODIALYSIS AND PERITONEAL DIALYSIS

Medicaid covers physician services required to manage care of beneficiaries with end-stage renal disease (ESRD) who are receiving outpatient and emergency dialysis.
Professional services for emergency dialysis must include an ESRD diagnosis and the “Y” Emergency Indicator.

Most physician services are covered through a monthly capitation payment (MCP) to the managing physician. The MCP covers ESRD related physician services in all settings necessary to manage the beneficiary’s dialysis care, except declotting of shunts, dialysis training, and nonrenal-related medical services.

Self-dialysis training services provided by the physician are covered.

4.4 HOME HEALTH CARE

Medicaid covers home health care subject to the requirements in this section.

Home Health services include intermittent nursing care, home health aide services, and physical therapy provided in the beneficiary's home by a Medicaid enrolled Home Health Agency (HHA). The service must be reasonable and necessary for the treatment of a specific illness, injury, or disability, and must be consistent with the nature and severity of the beneficiary’s condition, particular medical need and accepted standards of medical practice. Limited services to ensure stability of beneficiaries with an established disability or frail condition, or to prevent an illness, injury or disability for women and newborns during the postpartum period are covered.

Home health is intended for beneficiaries whose conditions require intermittent rather than continuous medical/nursing care. In special instances, intensive nursing care in the home may be approved if MDHHS determines that home care is appropriate and is a cost-effective alternative to institutional care.

4.4.A. PHYSICIAN ORDER FOR CARE

The beneficiary's physician must order covered home health services as part of a written plan of care (POC), and must review the POC every 60 days for continuing need. A HHA should not provide home care prior to the date of the physician's order for the care. The agency must maintain a patient plan of treatment form which must be signed and dated by the physician, or a narrative summary of the POC which must have the physician's signed and dated order attached. The HHA is responsible for obtaining necessary authorization from MDHHS for special or extended care which may be provided.

For initial certification, a physician certifying eligibility for home health services must provide documentation of a face-to-face encounter with the beneficiary within 90 days prior to or 30 days after the start of care. Refer to the Face-to-Face Encounter section in the Home Health Chapter for additional information.

Home health services are not to replace the services of a physician and are not covered solely for the lack of transportation or as a convenience to the beneficiary. Home health services may be appropriate when leaving the home is medically contraindicated or special transportation or effort is required.

4.4.B. MEDICAL SUPPLIES AND EQUIPMENT

Medical supplies, durable medical equipment, orthotic and prosthetic appliances, shoe supplies, and oxygen are covered for beneficiaries receiving services from an enrolled
HHA. The physician (MD, DO, DPM, NP, PA) must prescribe these items. (Refer to the Home Health and the Medical Supplier Chapters of this manual for specific information concerning which equipment/supplies are covered for the medical supplier and which are covered for the HHA.) Face-to-face visits and prior authorization may apply.

4.4.C. PERSONAL CARE

If beneficiaries are not in need of nursing care or physical therapy, but have a need for nonspecialized, unskilled personal care or chore services, such services are available through the MDHHS Home Help Program. The local MDHHS office should be contacted for information.

4.5 HOSPICE SERVICES

Medicaid covers hospice services which include palliative and supportive services to meet physical, psychological, social, and spiritual needs of terminally ill beneficiaries and their families in the home, adult foster care facility, home for the aged, nursing facility, or an inpatient hospice setting. Medicaid enrolled Hospice programs are responsible for providing all physician services related to a beneficiary’s terminal illness as part of its core services.

To enroll in hospice, the beneficiary must have a life expectancy of six months or less, have knowledge of the illness and life expectancy, and elect to receive hospice services rather than active treatment for the illness. Both the referring physician and the hospice medical director must certify the life expectancy.

If the physician is not familiar with Medicaid-enrolled hospices in his area, hospice names, addresses, and telephone numbers may be obtained from MDHHS Provider Inquiry. (Refer to the Directory Appendix for contact information.)

Refer to the Billing & Reimbursement for Institutional Providers and the Hospice chapters of this manual for specific requirements related to the provision of hospice services.

4.6 IMPLANTABLE INFUSION PUMPS

Medicaid covers the refill and reprogramming of implantable infusion pumps by physicians in the physician’s office. The refill kit and the electronic analysis of the pump are covered as a part of the refill and reprogramming procedure. Injectable drugs used during this procedure are covered separately in the physician’s office.

4.7 PEDIATRIC MULTICHANNEL RECORDINGS

Multichannel recording is covered for a child under age 21 when provided in the inpatient or outpatient hospital setting by qualified personnel and interpreted by a physician. Multichannel recordings are not covered in the beneficiary’s home.

A pediatric multichannel recording is a continuous and simultaneous recording of at least four channels that may include ECG, thoracic impedance, airflow measurements, oxygen saturation, esophageal pH, or strain gauge measurements. Other additional recording parameters may be included. A multichannel recording does not have to include an electroencephalogram (EEG). When an EEG is performed in addition to the four or more channels, it is covered separately. Payment for the multichannel recording is
the same regardless of the number of channels or the length of time required. Use of a video camera is not separately covered.

Two multichannel recordings may be covered in one year for the same beneficiary. If more than two are medically justified for CSHCS beneficiaries, the physician must obtain PA. The PA number must be included on the claim for payment. (Refer to the General Information for Providers Chapter for additional prior authorization information.)

A multichannel recording is covered as a professional service to the physician and as a technical service to the hospital. The professional service includes the interpretation with written report, and the scanning and scoring.

**4.8 PREVENTIVE SERVICES [CHANGES MADE 4/1/23]**

The program covers preventive services assigned a grade A or B by the USPSTF and all adult vaccines and their administration recommended by ACIP for beneficiaries age 21 years and older. (Refer to the Directory Appendix for USPSTF and ACIP website information.)

Vaccine counseling services, including stand-alone vaccine counseling services, are covered for all adult Medicaid beneficiaries when they are counseled regarding the importance of vaccines. Stand-alone vaccine counseling refers to when a beneficiary and/or caregiver receives counseling about a vaccine from a health care practitioner, but the beneficiary does not actually receive the vaccine on the same date of service as the counseling. (revised per bulletin MMP 22-35)

Preventive services, including vaccine counseling services, (text added per bulletin MMP 22-35) for beneficiaries under 21 years of age are covered as part of the Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) benefit. (Refer to the Early and Periodic Screening, Diagnosis, and Treatment Chapter for specific information.)

Providers submitting claims for services in accordance with the USPSTF grade A and B recommendations are to identify the service with the appropriate International Classification of Diseases (ICD) diagnosis code(s). To identify the service as a preventive service, providers are encouraged to include HCPCS Modifier 33, Preventive Services. (Refer to the Billing & Reimbursement for Professionals Chapter for specific information.)
SECTION 5 – EVALUATION AND MANAGEMENT SERVICES

Medicaid covers medically necessary evaluation and management (E/M) services provided by a physician or other practitioner authorized by the State. Providers should refer to the CPT explanations, coding conventions, and definitions for E/M services.

Most E/M services are covered once per day for the same beneficiary. In these cases, only one office or outpatient visit is covered on a single day for the same beneficiary unless the visits were for unrelated reasons and at different times of the day (e.g., office visit for blood pressure medication evaluation, followed five hours later by a visit for evaluation of leg pain following an accident).

Coverage of an E/M service includes related activities such as coordination of care, telephone calls, writing prescriptions, completing insurance forms, review and explanation of diagnostic test reports to the beneficiary.

Do not report the modifier for increased procedural services with E/M services in order to request individual consideration, unless specifically directed by this manual. This does not follow CPT coding guidelines and causes longer delays in processing the claims for payment.

5.1 PREVENTIVE MEDICINE SERVICES

The program covers one preventive visit annually. For beneficiaries under 21 years of age, EPSDT screening services are covered according to the AAP periodicity schedule and CMS requirements. (Refer to the Early and Periodic Screening, Diagnosis, and Treatment Chapter for specific information.)

A preventive medicine E/M visit and another E/M visit on the same date are covered separately if, during the preventive visit, a problem or abnormality is detected which requires additional work which meets the key component requirements of a problem oriented E/M visit. When this occurs, the office/outpatient E/M procedure code is covered using the modifier for a separately identifiable service, and the preventive E/M visit is covered without using a modifier. (Refer to CPT guidelines for additional information.)

5.2 E/M VISITS IN RELATION TO GLOBAL SURGERY PACKAGE

An E/M service that results in the decision for surgery is covered separately when provided by the surgeon on the day before or the day of a procedure with a 90-day global period and the decision for surgery modifier is reported. This same E/M service provided the day before or the day of a procedure with a 0-day or 10-day global period is not covered separately.

An E/M service is not covered separately on the same day as a procedure with any global surgery period unless the beneficiary's condition requires a significant, separately identifiable E/M service that is above and beyond the pre- and post-operative care associated with the procedure or service performed.

If the surgeon performs E/M services during the post-operative global surgery period for a reason unrelated to the surgical procedure, report the appropriate modifier with the E/M service. All care provided during the inpatient stay in which the surgery is performed is compensated through the global surgery package and is not covered separately.
5.3 CONSULTATIONS [CHANGE MADE 7/1/23]

Medicaid covers consultations rendered by a physician whose opinion or advice is requested by another appropriate practitioner (e.g., physician, CNM, dentist) for the further evaluation and management of the patient. A consultation includes preparation of a report of findings that is provided to the referring provider for the referring provider’s use in the treatment of the beneficiary. A consultant may initiate diagnostic and/or therapeutic services. If the referring provider transfers complete responsibility for treatment either orally or in writing to the consultant at the time of the request for consultation, the receiving physician’s services are covered as normal E/M services rather than as a consultation.

If the referring provider transfers responsibility for the beneficiary’s care to the consultant after the consultation is completed, the consultant’s service is covered as a consultation. After the consulting physician assumes responsibility for the beneficiary’s care, subsequent visits are covered as established patient office visits or subsequent hospital care, depending on the setting.

A consultation is covered if one provider in a group practice requests a consultation from a physician of a different specialty in the same group practice as long as all of the requirements for use of the CPT/HCPCS consultation codes are met. A provider’s request for a consultation (revised 7/1/23) and the need for consultation must be documented in the beneficiary’s medical record. In an inpatient setting, the request may be documented as part of a plan written in the requesting physician’s progress notes, an order in the hospital record, or a specific written request for the consultation.

Medicaid covers second opinions for surgery. The second opinion is covered as a consultation as long as all requirements for a consultation are met.

Ancillary services provided to a beneficiary in a nursing facility must be ordered by the attending physician and are not covered as consultations unless a specific request for opinion and advice is documented. Requests for services by another physician are covered as the actual service provided (e.g., nursing facility visit or eye examination).

5.4 INITIAL VISITS

Medicaid covers one new patient visit for a physician or a group practice for the same beneficiary, regardless of the type of new patient visit billed (e.g., office visit, clinic visit, long term care visit, home visit).

5.5 OBSERVATION CARE

Medicaid covers physician services for beneficiaries admitted and discharged from observation status in the hospital setting for a stay less than 24 hours. Coverage is based on CPT coding conventions to report observation stays occurring on a single date and observation stays which start on one date and end on the subsequent date. It is expected that the beneficiary would be discharged from the hospital at the end of observation care. The medical record must include the following documentation:

- the length of time of the observation stay
- the physician was present and personally performed the services
- the physician wrote the observation admission and/or discharge notes
For outpatient surgical procedures, the global surgery rules apply. The surgeon is responsible for all post-operative care in the hospital and observation care is not covered separately.

Observation care for psychiatric reasons must be authorized by the PIHP/CMHSP. The PIHP/CMHSP is responsible for coverage of authorized psychiatric observation care services.

5.6 NURSING FACILITY SERVICES

Visits necessary to perform Medicare and Medicaid required assessments are covered under the appropriate E/M services involving comprehensive resident assessments.

Visits required to monitor and evaluate residents at the frequencies detailed in the coverage portion of the Nursing Facility chapter of this manual are also covered under the appropriate E/M service for subsequent nursing facility care.

Additional visits for the diagnosis or treatment of illness or injury, or to improve the functioning of a malformed body member, are only covered when documentation of the medical necessity for the visit is included on, or attached to, the claim. Documentation must include diagnoses describing the acute illness or injury; or remarks documenting the necessity for the additional visit recorded on the claim; or documentation such as notes from the visit supporting the above criteria attached to the claim. Providers may report modifier 22. Additional visits which repeatedly reflect the same chronic diagnoses and additional visits for the purpose of routine monitoring are not covered.

Refer to the Coverages portion of the Nursing Facility chapter of this manual for timeframes and additional details for required nursing facility visits.
SECTION 6 — EMERGENCY SERVICES

Medicaid covers all medically necessary emergency services. Federal statutes prohibit prior authorization (PA) for coverage of emergency services. Emergency services include covered inpatient and outpatient services that are furnished by a provider that is qualified to furnish such services and the services are necessary to evaluate or stabilize an emergency medical condition. All professional services must be identified as either an emergency or not an emergency.

6.1 SCREENING EXAM AND STABILIZATION IN THE EMERGENCY DEPARTMENT

MDHHS and its contracted health plans must follow the applicable requirements and definitions of the federal Emergency Medical Treatment and Active Labor Act (EMTALA).

Medicaid covers the medical screening examination, any ancillary service(s) when performed in a hospital emergency department (ED) for the sole purpose of determining if an emergency medical condition exists, and any necessary stabilizing treatment.

For both Medicaid FFS and MHP beneficiaries, the screening examination and any physician-ordered procedures (e.g., x-rays, lab, etc.) necessary to determine the beneficiary's condition are covered without PA. For Medicaid FFS beneficiaries, the screening examination and related diagnostic procedures are covered by MDHHS. For Medicaid MHP beneficiaries, these services are covered by the beneficiary's MHP.

Professional services for the medical screening and stabilization in the ED are covered separately from the facility fees.

6.2 TREATMENT OF EMERGENCY MEDICAL CONDITION IN THE EMERGENCY DEPARTMENT

PA is not required for the treatment of emergency medical conditions.

An emergency medical condition is defined by the federal Balanced Budget Act of 1997 and its regulations.

An emergency medical condition may exist whether the beneficiary is discharged from the ED or admitted to the inpatient hospital. This includes admissions where death occurs before a bed is occupied.

If an emergency medical condition exists, the medical findings must be fully documented in the beneficiary's medical record.

6.3 NON-EMERGENCY MEDICAL CONDITIONS IN THE EMERGENCY DEPARTMENT

If the medical findings from the screening indicate the beneficiary's condition does not meet the definition of an emergency medical condition, but requires additional, follow-up treatment, the following rules apply:

- FFS Medicaid beneficiaries without private health insurance should be referred to their primary care provider to obtain treatment. However, treatment may be rendered in the ED and does not require PA.
• FFS Medicaid beneficiaries with private health insurance must follow the rules of the private health insurance. Private insurers frequently require that the primary care provider perform the follow-up care.

• MHP enrollees must be referred to their primary care provider for treatment, or the MHP can be contacted to request authorization to provide the treatment. If the MHP fails to respond within one hour to the request to provide additional services beyond those required for stabilization, the request for authorization is deemed approved.

6.4 **Psychiatric Emergency Services in the Emergency Department**

Screening and stabilization of a psychiatric emergency does not require PA. These services are covered in the same manner as other emergency services provided in the ED detailed above. If it is determined that the beneficiary requires post-stabilization psychiatric services, the PIHP/CMHSP must be contacted for PA. The need for PA from the PIHP/CMHSP includes, but is not limited to, inpatient psychiatric admission, psychiatric partial hospitalization, and specialty mental health services.

A psychiatric emergency is defined as a situation in which an individual must be treated to protect him from inflicting injury to self or others as the result of a serious mental illness, emotional disturbance, or developmental disability, or could reasonably be expected to intentionally or unintentionally injure himself or others in the near future. The emergency may result from an inability to provide food, clothing, or shelter for him or others, inability to attend to activities of daily living, or when judgment is so impaired the individual is unable to understand the need for treatment.

6.5 **Urgent Care Settings**

Physician services rendered in urgent care centers or similar settings that are not part of a licensed hospital are covered. Coverage is based on the appropriate office or other outpatient services E/M procedure codes. Coverage for any additional professional services rendered in these settings follows CPT guidelines.
SECTION 7 – MATERNITY CARE AND DELIVERY SERVICES

Medicaid covers maternity care and delivery services. The services normally provided in uncomplicated maternity cases include antepartum care, delivery, and postpartum care. These services are included in the global obstetrical package. The global obstetrical package is covered when one physician or physician group practice provides the obstetric care to a beneficiary. The global obstetrical package is covered as long as the provider or group has provided seven or more antepartum visits, the delivery, and the postpartum care. If less than seven antepartum visits are provided, report the global package with the modifier for reduced services and indicate the number of antepartum visits on the claim.

7.1 ANTEPARTUM CARE

Includes the initial and any subsequent history, physical examinations, recording of weight, blood pressures, fetal heart tones, routine chemical urinalysis, and monthly visits up to 28 weeks gestation, biweekly visits to 36 weeks gestation, and weekly visits until delivery. Typically, if a beneficiary enrolls in the first trimester and delivers at term, she has about 13 antepartum visits. This varies depending on the actual start of antepartum care and the delivery date. If the total number of antepartum visits exceeds 13 due to a high-risk condition, the additional visits are covered when using the appropriate E/M codes with the diagnosis for the high-risk condition.

7.2 DELIVERY

Includes admission to the hospital, the admission history and physical examination, management of uncomplicated labor, and delivery. All hospital visits within 24 hours of delivery are generally considered part of the global package. If the beneficiary is admitted more than 24 hours before delivery and stays more than 24 hours, then hospital care rendered prior to the day of delivery is covered separately as an E/M code. Medical problems complicating labor and delivery management that require additional resources are also covered separately.

7.3 POSTPARTUM

Includes all the visits following a delivery, both in the hospital and in the office. Services provided by physicians within the same group practice are considered as provided by the primary physician responsible for the beneficiary’s overall obstetrical care.

7.4 OBSTETRICAL PACKAGE VS. COMPONENTS

If the same physician or group practice does not provide all of the obstetric care, Medicaid covers the portion of the care provided by each provider. Postpartum care or antepartum care is covered separately if provided by a different physician or group than the physician providing the delivery services. To be consistent with some commercial payers and Medicare, the physician or group providing the entire global obstetrical package may choose to report either the entire global package or may report the antepartum care, delivery, and postpartum care separately as each of these services is provided. Combinations of these components must be allowable under Medicaid NCCI editing. Components such as the antepartum care or postpartum care cannot be unbundled into individual visits.
Services that are not included in the global package include:

- Maternal or fetal echography or fetal echography procedures
- Fetal biophysical profile
- Chorionic villus sampling, any method
- Fetal contraction stress test
- Fetal nonstress test
- Hospital and observation care visits for premature labor (prior to 36 weeks gestation)

7.5 **HIGH-RISK PREGNANCY**

High-risk pregnancies are those with complicating conditions that are life-threatening to either the mother or fetus and, therefore, require more services than those provided in a routine pregnancy. When high-risk pregnancies require more visits than described for routine obstetrical care and more laboratory data than normally required, the additional services are covered in addition to the global obstetrical package. If beneficiary visits are required due to conditions unrelated to the pregnancy, they are also covered in addition to the global obstetrical package. Medicaid follows CPT guidelines for reporting high-risk pregnancy services.

7.6 **MULTIPLE GESTATION**

In the case of multiple gestation, Medicaid covers the services provided. Payment follows the multiple procedure rules. (Refer to the Billing & Reimbursement for Professionals Chapter, Maternity Care Services subsection, for additional information.) Providers must use a diagnosis code representing multiple gestation.

7.7 **OB ENHANCED PAYMENTS**

MDHHS provides an enhanced payment for each Medicaid delivery performed. This additional reimbursement is added to the fee reimbursed under FFS for the global maternity and delivery procedure codes. The maternity case rate paid to MHPs is also enhanced.

7.8 **MATERNITY OUTPATIENT MEDICAL SERVICES PROGRAM**

Under the Maternity Outpatient Medical Services (MOMS) program, pregnant women can enroll and receive pregnancy related care early in the pregnancy. Refer to the MOMS Chapter for additional information.

7.9 **LACTATION SUPPORT SERVICES**

Medicaid will reimburse for evidence-based lactation support services provided to Medicaid eligible postpartum women in the outpatient setting up to and through 12 months post-delivery. Services must be rendered by a licensed, qualified health professional as outlined. A maximum of two visits per pregnancy will be reimbursable for either a single or multiple gestation pregnancy. One visit is reimbursable per date of service.
7.9.A. PROVIDER CRITERIA

Lactation support and counseling services must be rendered by an Internationally Board Certified Lactation Consultant (IBCLC) credentialed by the International Board of Lactation Consultant Examiners (IBLCE) with possession of a valid and current IBCLC certification.

Rendering IBCLC providers must be Medicaid-enrolled physicians, physician assistants or advanced practice registered nurses. When a Medicaid-enrolled practitioner provides delegation and supervision within the confines of his/her scope of practice to an individual with possession of a valid and current IBCLC certification, that Medicaid-enrolled health professional may bill for comprehensive lactation support services.

For all IBCLC rendered services, a copy of the current, valid IBCLC certification is to be maintained by the supervising physician or employing organization, where applicable, in accordance with the record keeping requirements of the Medicaid program.

7.9.B. COVERED SUPPORTS AND SERVICES

Comprehensive lactation counseling services must include the following:

- A face-to-face encounter with the beneficiary lasting a minimum of 30 minutes.
- Comprehensive maternal, infant and feeding assessment related to lactation.
- Provision of evidence-based interventions that, at a minimum, include:
  - Instruction in positioning techniques and proper latching to the breast;
  - Counseling in nutritive suckling and swallowing, milk production and release, frequency of feedings, and reasons to contact a health care professional; and
  - The provision of community support resource referrals, such as the Women, Infants, and Children (WIC) program, as indicated.
- Evaluation of outcomes from interventions.

Documentation must include a begin time and end time of services and a comprehensive description of the professional interventions provided. Documentation may be subject to review and post-payment audit.

Prenatal lactation education and support services are provided as part of the curriculum of childbirth education programs and will not be separately reimbursed. Reimbursement for lactation education and support received by beneficiaries post-delivery in the inpatient hospital is included in the inpatient hospital payment and will not be separately reimbursed.

Refer to the Billing & Reimbursement for Professionals Chapter of this manual for additional billing information.
7.10 MATERNAL INFANT HEALTH PROGRAM

Maternal Infant Health Program (MIHP) provides preventive health services that are delivered by certified MIHP agencies to high-risk pregnant women and infants born to high risk mothers. The purpose of MIHP is to reduce infant morbidity and mortality. The goal is to deliver a healthy, full term infant. Refer to the Maternal Infant Health Program Chapter for additional information about this program.

7.11 DOULA SERVICES [SUBSECTION ADDED 4/1/23]

MDHHS certified doulas typically provide non-clinical physical, emotional, and educational support services to pregnant individuals during the prenatal, labor and delivery, and postpartum periods. Evidence indicates doula services are associated with improved birth outcomes. Refer to the Doula Services Chapter for additional information. (text added per bulletin MMP 22-47)
SECTION 8 – PHARMACY

A practitioner must report his individual National Provider Identifier (NPI) with a prescription order. An emergency room practitioner must report his individual NPI with a prescription order. Each practitioner at a teaching hospital must report his individual NPI with a prescription order that is submitted to the dispensing pharmacy. A prescription or prescription order must comply with state and federal laws.

Refer to the Pharmacy Chapter of this manual for additional information.
SECTION 9 – RADIOLOGY, RADIATION THERAPY AND NUCLEAR MEDICINE

9.1 RADIOLOGY AND DIAGNOSTIC IMAGING SERVICES

Medically necessary radiological services are covered when ordered by a qualified practitioner to diagnose or treat a specific condition based on the beneficiary’s signs, symptoms, and past history as documented in the medical record. Radiology services include diagnostic imaging services and therapeutic radiology services such as proton beam therapy, nuclear medicine, computed tomography (CT) procedures, magnetic resonance imaging (MRI) services, diagnostic ultrasound, and other diagnostic and therapeutic services. Practitioners are required to perform or interpret radiologic services within their professional expertise and education within the confines of federal and State law. It is the expectation that practitioners conform with professional practice parameters and technical standards to ensure the most efficacious use of radiology and the delivery of safe, quality care. Medical need for all services must be documented in the medical record and is subject to post-payment review.

9.1.A. GLOBAL/COMPONENT SERVICES [CHANGES MADE 7/1/23]

Global services are covered for the physician or qualified healthcare provider in non-facility settings or the professional component is covered for the provider in any setting. The technical component is only covered when the service is provided in an appropriate non-facility setting. The global service and its professional component service cannot both be covered for the same service since the professional component is included in the global service.

When a physician or qualified healthcare provider reports a global procedure, the provider is responsible for the overall performance and quality of the test. The provider must either personally perform the test or it must be performed under a physician’s supervision and direction when applicable. The provider must personally interpret the results and complete the written report. While some radiology procedures and diagnostic tests may not require the presence of a supervising physician on the premises, other procedures dictate that a physician be present and may even need to be directly involved in the performance of the procedure.

Interpretation of radiology services are covered for any physician or qualified healthcare provider trained in the interpretation of the study. The provider who interprets the study must be the one who evaluates the study and prepares and signs the written report for the medical record. Review of results and explanation to the beneficiary are part of the attending provider’s E/M service and are not considered as interpretation of the study.

9.1.B. MULTIPLE SERVICES ON SAME DAY [CHANGE MADE 7/1/23]

Medicaid covers bilateral x-rays when medically necessary. Bilateral services are studies done on the same body area, once on the right side and once on the left side. Comparison films obtained for routine purposes are not covered. Providers should use a bilateral code when available. Medicaid also covers multiple studies of both areas if reported with the appropriate modifier. Examples would include bilateral wrist studies done before and after fracture care on both wrists the same day for the same patient or
doing films to assess a patient’s response to medical care, such as multiple chest films to monitor the cardiopulmonary status of a critically ill patient.

<table>
<thead>
<tr>
<th>Contiguous Areas</th>
<th>Studies of contiguous areas, such as the wrist and hand, lumbosacral spine and pelvis, ankle and foot, are covered on the same day when medically necessary to visualize each space. The medical record must support the need for individual studies. If cervical, lumbosacral and thoracic views are performed, an entire spine study should be reported.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Screening Mammography</td>
<td>Screening mammography, including clinically indicated digital breast tomosynthesis, is covered for individuals in accordance with current, evidence-based, generally accepted standards of medical practice. A practitioner referral or order is not required. (revised 7/1/23)</td>
</tr>
<tr>
<td>Transrectal or Prostate Ultrasound</td>
<td>Transrectal or prostate ultrasound is covered when the patient is considered at high risk for prostate cancer. It is also covered for pathologic indications that include evaluation of prostatic nodule(s) or abnormalities of the seminal vesicles, staging of prostatic cancer, and monitoring of response to therapy for prostatic cancer.</td>
</tr>
</tbody>
</table>
| CT, MRI, PET Scans                       | For CT, MRI and PET scans to be covered, all conditions of Certificate of Need (CON) must be met. These services are subject to standards for provision of the service that include specific staff and designation of who is qualified to interpret the results. Radiographic images, including CT or MRI studies of the same anatomical area, are covered on the same day when medically indicated. The provider is responsible for using the most appropriate diagnostic test(s) according to current standards of practice. A CT and a myelogram may be covered on the same day; however, an MRI and a myelogram are not covered separately if done on the same day. Coverage of a CT of the spine is limited to one level per day, and coverage of an MRI is limited to two levels of the spine on the same day. Providers should be directing the study at the area of the suspected problem. CT and MRI scans may be done with or without contrast media or both. When a scan is done without contrast followed by another with contrast, only the full service is covered. The global RVUs for CT and MRI contrast scans include allowance for high osmolar contrast media, and the RVUs for global MRIs include allowance for paramagnetic contrast media. In certain instances, the use of low osmolar contrast media (LOCM) is separately covered. In the case of intra-arterial and intravenous radiological procedures, LOCM is covered separately for nonhospital patients with one or more of the following:
  - A history of previous adverse reaction to contrast material, with the exception of a sensation of heat, flushing, or a single episode of nausea or vomiting;
  - A history of asthma or allergy;
  - Significant cardiac dysfunction, including recent or imminent cardiac decompensation, severe arrhythmia, unstable angina pectoris, recent myocardial infarction, and pulmonary hypertension;
  - Generalized severe debilitation;
  - Sickle cell disease.

If the patient does not meet any of these criteria, the contrast media is considered bundled into the global service and is not covered separately.

When high dose contrast technique is used with MRI, the global service is covered for the procedure designated without contrast, then with contrast. The third MRI (again with contrast) is not covered separately. The contrast material used in the second MRI procedure is not covered separately; however, the contrast material for the third MRI procedure is covered separately.
Obstetrical ultrasound studies are covered in addition to the global obstetrical package. More than two studies are covered only for high-risk conditions such as bleeding, placental abnormalities, fetal post-maturity, etc. The need for the additional studies, including the change in clinical symptoms, must be documented. Pelvic ultrasounds are not covered to diagnose pregnancy or vaginal infections. The use of ultrasound studies for routine fetal age determination in or preparatory for pregnancy termination procedures is considered part of the termination procedure and is not covered separately.

9.2 Radiation Therapy

Medicaid covers medically necessary radiation therapy services provided to beneficiaries. CPT/HCPCS guidelines for radiation therapy services are followed.

Following the Medicare guidelines, many services are bundled into the treatment management codes and are not covered separately when the diagnosis is related to the weekly treatment diagnosis and the services are provided by the radiation oncologists or in conjunction with the therapy. The following services are included in the weekly treatment management service:

- Anesthesia
- Care of infected skin
- Checking treatment charts
- Continuing-care patient evaluation and examination
- Final medical examination
- Nutritional counseling
- Pain management
- Medical prescription
- Review and revision of the treatment plan
- Routine medical management of related problems
- Special care of ostomy
- Verification of dosage
- Written reports, progress notes
- Follow-up examination and care 90 days after the last treatment

Medicaid separately covers services furnished by a radiation physicist only when provided to a nonhospital beneficiary in a freestanding facility.

Professional services provided to hospital patients are covered only when personally performed by a physician.

Global physician services are only covered if provided in a freestanding, nonhospital setting.
9.3 NUCLEAR MEDICINE

Medicaid covers medically necessary nuclear medicine procedures. Providers are responsible for complying with Federal and State law requirements. Only professional services rendered to hospital patients are covered for the practitioner.

Medicaid covers global services when provided in a freestanding, nonhospital setting. Radionuclides used in the procedures are covered separately.

When specific nuclear medicine diagnostic procedures are performed, multiple procedure coverage rules apply. Generation and interpretation of automated data is covered as a part of the primary procedure.

9.4 TRANSPORTATION AND SET-UP OF PORTABLE X-RAY EQUIPMENT

The transportation of portable x-ray equipment, set-up, and personnel may be covered when furnished in a place or residence used as the patient’s home, including a nursing facility, as reported by the corresponding HCPCS code. (Refer to the Independent Diagnostic Testing Facilities and Portable X-ray Suppliers chapters of this manual for additional information.)
SECTION 10 – HOSPITAL INPATIENT PHYSICIAN SERVICES

Medicaid covers physician services to hospital inpatients that are medically necessary and follow the requirements in this section.

10.1 VENTILATION MANAGEMENT

Ventilation management provided in the inpatient hospital setting is covered separately unless an E/M service is provided on the same day.

10.2 CRITICAL CARE

Medicaid covers critical care consistent with the CPT/HCPCS definitions and guidelines. Each day that critical care is provided, the medical record must support the level of service provided. The actual time spent with the patient delivering critical care services must be documented in the medical record.

10.3 RESPIRATORY CARE

Medicaid covers respiratory care as a separate service in the inpatient hospital setting for the anesthesiologist/physician who initiates respiratory care by setting up the respirator, placing the beneficiary on the respirator, and providing daily supervision of the beneficiary for the respiratory care alone.

10.4 STANDBY SERVICES

Medicaid does not cover the services of a standby surgeon, anesthesiologist or surgical team. Only direct beneficiary care is covered. Physician standby services are covered as a part of the hospital services.
SECTION 11 – SURGERY – GENERAL

Medicaid covers medically necessary surgical procedures.

11.1 GLOBAL SURGERY

Coverage for the global surgery package includes related services that are furnished by the physician who performs the surgery or by members of the same group with the same specialty. Medicaid policy is based on CMS guidelines for Medicare services for the global surgery package.

11.1.A. SERVICES INCLUDED IN THE GLOBAL SURGERY PACKAGE

- Pre-operative visits beginning with the day before the surgery for major surgeries and the day of the surgery for minor surgeries.
- Intra-operative services that are a usual and necessary part of a surgical procedure.
- Complications following surgery. This includes all additional medical or surgical services required of the surgeon during the post-operative period due to complications that do not require return to the operating room. The surgeon’s visits to a patient in an intensive care or critical care unit are also included.
- Follow-up visits within the post-operative period related to recovery from the surgery.
- Post-surgical pain management by the surgeon.
- Supplies for certain services furnished in a physician's office.
- Miscellaneous services and items such as dressing changes, local incisional care, removal of operative pack, removal of cutaneous sutures and staples, lines, wires, tubes, drains, casts, and splints; insertion, irrigation and removal of urinary catheters, routine peripheral intravenous lines, nasogastric and rectal tubes, and changes and removal of tracheostomy tubes.

11.1.B. SERVICES NOT INCLUDED IN THE GLOBAL SURGERY PACKAGE

- The surgeon’s initial consultation or evaluation of the problem to determine the need for surgery.
- The office or hospital visit to decide upon surgery if it occurs on the day before or the day of a major surgery.
- Other physicians’ services, except when the surgeon and the other physician(s) agree on the transfer of care. (The transfer of care agreement may be in the form of a letter or an annotation in the discharge summary, hospital records, or ambulatory surgical center records.)
- Visits unrelated to the diagnosis for which the surgical procedure was performed.
- Treatment of the underlying condition or an added course of treatment that is not part of the normal recovery from surgery.
- Diagnostic tests and procedures, including diagnostic radiology procedures.
Clearly distinct surgical procedures that are not repeat procedures, or treatment for complications during the post-operative period. A new post-operative period begins with the subsequent procedure.

Staged procedures done in two or more parts for which the decision to stage the procedure is made prospectively or at the time of the first procedure. Examples include procedures to diagnose and treat epilepsy in succession within 90 days of each other.

Laser eye surgeries (and all other services whose CPT/HCPCS description includes one or more sessions) performed in a series over a period of weeks or months are not considered staged procedures. All sessions during the post-operative period of the first session are covered as a part of the global package.

Chemotherapy and/or radiation therapy following cancer surgery.

Treatment for post-operative complications that requires a return to the operating room. For this purpose, an operating room is a place of service specially equipped and staffed for the sole purpose of performing surgical procedures, including a cardiac catheterization suite, a laser suite, and an endoscopy suite. Not included is a patient's room, a minor treatment room, a recovery room, or intensive care unit unless the patient's condition is so critical there is insufficient time for transportation to an operating room.

A second, more extensive procedure when a less extensive procedure fails.

A therapeutic service that is required during the post-operative period of a diagnostic service. Example: A D&C followed by a therapeutic hysterectomy performed during the D&Cs global period.

Immunosuppressive therapy for organ transplants.

Critical care services unrelated to the surgery when a seriously injured or burned patient is critically ill and requires constant attendance of the physician.

Visits that are a significant, separately identifiable service on the same day as a minor surgery or endoscopy. For example, a visit for a full evaluation of a lump in the breast on the same day as a removal of a lesion on the back.

When a beneficiary is returned to the operating room for treatment of complications, only the intra-operative portion of the service is covered.

11.2 PARTIAL GLOBAL PACKAGE

Services of physicians furnishing less than the full global surgery package are covered. Modifiers are used to identify the portion of the global surgery package that is covered separately when performed by different physicians under certain circumstances. Only procedures with 10- or 90-day global periods are eligible for partial global surgery package coverage.

Surgeons should use the modifier for surgical care only when another physician provides all or part of the outpatient post-operative care. MDHHS assumes that the surgeon is responsible for pre-operative, intra-operative and inpatient hospital post-operative care at a minimum. The modifier for post-operative management only is used when a second physician provides all or part of the post-operative care after hospital discharge in the global package. Surgeons must transfer care to the second physician, and both must keep a copy of the written transfer agreement in the beneficiary's medical record.
11.3 BILATERAL SURGERY

Bilateral surgeries are procedures performed on both sides of the body during the same operative session or on the same day. The descriptions for some procedure codes include the terms "bilateral" or "unilateral or bilateral". The RVUs for these codes reflect the work involved if done bilaterally as the description states. Other procedure code descriptions do not include bilateral but may be performed bilaterally. The bilateral procedure modifier is used with these procedure codes.

Reimbursement for a bilateral procedure reported appropriately with modifier 50 is based on the lower of the amount billed or 150 percent of the fee screen for the procedure.

11.4 MULTIPLE SURGICAL PROCEDURES

Multiple surgeries are separate procedures performed by a physician on the same beneficiary during the same operative session or on the same day for which separate coverage may be allowed. Co-surgeons, surgical teams, or assistants at surgery may participate in performing multiple surgeries on the same beneficiary on the same day.

When the same physician performs multiple surgical procedures during one operative session, all services are covered separately. MDHHS follows CMS multiple surgery guidelines for coverage of the procedures. If an integral procedure (one that is part of a larger surgery and is necessary to perform the larger surgery) is performed, it is covered as a part of the larger procedure. If two or more physicians each perform distinctly different, unrelated surgeries on the same patient on the same day (e.g., in some multiple trauma cases), the procedures are covered separately.

Multiple surgery reimbursement policy applies to procedures performed during the same operative session or on the same day by the same physician or physicians of the same specialty in the same group practice. Medicaid reimburses up to 100 percent of the fee screen for the most complex surgical procedure and up to 50 percent of the fee screens for the second through the fifth surgical procedures. If more than five multiple procedures are performed, an operative report must be provided with the claim.

11.5 MULTIPLE ENDOSCOPY PROCEDURES

Multiple endoscopy procedures are reimbursed based on the full fee for the highest paid service, plus the difference between the next highest and the base endoscopy. When related endoscopies are performed on the same day as other endoscopies or other surgical procedures, the standard multiple surgery rules apply. The multiple surgery rules consider the coverage for the related endoscopies as one service, and any other unrelated endoscopy or procedure as another service.

11.6 MULTIPLE SURGEONS

Under some circumstances, the individual skills of two or more surgeons are required to perform surgery on the same beneficiary during the same operative session. This may be required due to the complex nature of the procedures or the beneficiary’s condition. Medicaid reimbursement policy is based on CMS guidelines for Medicare services for multiple surgeons.
11.7 CO-SURGEONS

Two surgeons who work together as primary surgeons performing distinct parts of a total service are considered co-surgeons. The medical record must contain sufficient documentation supporting the medical necessity for co-surgeons. Report the modifier indicating two surgeons for the services furnished by each co-surgeon. The primary procedure is reimbursed at the full screen times 62.5 percent. Second and subsequent services are paid at 50 percent of the full-allowed amount times 62.5 percent.

11.8 TEAM SURGEONS

Three or more surgeons who work together as primary surgeons to perform a specific procedure are considered team surgeons. Sufficient documentation must be submitted with the claim to establish that a team was medically necessary. If two or more surgeons are of the same specialty, the reason each was needed must be documented also. Report the surgical team modifier when billing for services rendered by each team surgeon. Each surgeon’s dictated operative report must be included with the claims. Reimbursement is based on individual consideration.

11.9 ASSISTANT AT SURGERY/ASSISTANT SURGEON

Medicaid covers assistant at surgery services for designated surgical procedures. Assistant at surgery services must be considered reasonable and necessary for the surgery performed. An assistant at surgery actively assists the primary surgeon during the surgical procedure. Coverage for assistant at surgery services is not allowed when co-surgeons or team surgeons are utilized.

Medicaid does not cover assistant surgeon services in a teaching hospital setting unless a qualified resident is not available. The medical record must document the circumstances causing the unavailability of a qualified resident. The surgical procedure is reported with appropriate modifier identifying use of an assistant surgeon.

Medicaid covers assistant at surgery services performed by a second physician, a physician’s assistant (PA), a certified nurse practitioner (NP), a certified clinical nurse specialist (CNS) and, in limited instances, a certified nurse midwife (CNM). PA, NP, CNS and CNM services as assistant at surgery must be under the delegation and supervision of the physician employing the PA, NP, CNS or CNM, or a physician employed by the same group practice that employs the PA, NP, CNS or CNM. If the PA, NP, CNS and/or CNM are employees of the hospital, their services are covered as a part of the hospital charges.

11.10 SURGEONS PERFORMING DISTINCTLY DIFFERENT UNRELATED PROCEDURES

If two or more physicians each perform distinctly different, unrelated surgeries on the beneficiary on the same day, the payment adjustment rules for multiple surgeries or co-surgeons do not apply. In such cases, the multiple procedures modifier should not be used unless one of the surgeons individually performs multiple surgeries.

11.11 VISION PROCEDURES AND CARE

Ophthalmologists may transfer post-operative care associated with cataract removal or insertion of intraocular lens prosthesis to an optometrist. In this case, the ophthalmologist who performs eye surgery but does not provide the post-surgical care must report the surgical care only modifier with the surgery procedure code. This includes the pre-operative care, the surgery, and any in-hospital post-operative
care. Post-operative care after hospital discharge is covered separately for the provider that the care was transferred to using the surgery code with the post-operative management only modifier.

Surgical procedure descriptions that include the phrase "one or more sessions" include all sessions. These procedures include the 90-day global period during which the procedure(s) can be completed in one or more session(s). These procedures include trabeculoplasty by laser surgery, iridotomy/iridectomy by laser or photocoagulation, repair of retinal detachment, destruction of retinal or choroid lesions. The code description in CPT identifies when one or more sessions are included. Separate coverage for a second or subsequent session of the same procedure during the global period of the initial service is limited to cases where the modifier reported with the procedure code indicates that services were performed on different eyes.
SECTION 12 – SURGERY - SPECIAL CONSIDERATIONS

12.1 ABORTIONS

Medicaid only covers an abortion performed by a physician and related hospital charges (e.g., room, supplies) when it has been determined medically necessary to save the life of the mother or the pregnancy is the result of rape or incest. Medicaid funding is not available for any elective therapeutic abortion or service related to the performance of such abortion unless one of these criteria has been met.

Physicians must certify on a completed Certification for Induced Abortion form (MSA-4240) that, for medical reasons, an abortion was necessary to save the life of the mother or the beneficiary’s medical history indicates that the terminated pregnancy was the result of rape or incest.

The physician who completes the MSA-4240 must also ensure completion of the Beneficiary Verification of Coverage form (MSA-1550) and is responsible for providing copies of the forms for billing purposes to any other provider (e.g., anesthesiologist, hospital, laboratory) that would submit claims for services related to the abortion.

Copies of the MSA-4240 and the MSA-1550 are not required for claims for ectopic pregnancies or spontaneous, incomplete, or threatened abortions.

Providers may attach copies of the MSA-4240 and the MSA-1550 to the claim or submit them via fax.

Federal regulations require that these forms be submitted to Medicaid before reimbursement can be made for any abortion procedure. This process can eliminate submitting paper attachments for abortion claims and pre-confirms the acceptability of the completed forms, as well as reduces costly claim rejections.

The medical record must include a complete beneficiary history, including the medical conditions that made the abortion necessary to save the life of the mother. When the pregnancy is the result of rape or incest, the medical record must include the circumstances of the case and that the pregnancy was the result of rape or incest.

(Refer to the Forms Appendix for copies of MSA-4240 and MSA-1550. The forms are also available on the MDHHS website. Refer to the Directory Appendix for website information.)

12.2 BREAST RECONSTRUCTION SURGERY

Medicaid covers breast reconstruction surgery following the diagnosis and treatment of breast cancer. Covered services include procedures related to the affected and the contralateral unaffected breast following a medically necessary mastectomy. The prior authorization requirements for these specified breast reconstruction procedure codes are waived when billed with appropriate ICD breast cancer diagnosis codes. The specified CPT codes subject to this PA waiver are identified in the Medicaid Code and Rate Reference tool. (Refer to the Directory Appendix for website information.)
12.3 COSMETIC SURGERY

Medicaid only covers cosmetic surgery if PA has been obtained. The physician may request PA if any of the following exist:

- The condition interferes with employment.
- It causes significant disability or psychological trauma (as documented by psychiatric evaluation).
- It is a component of a program of reconstructive surgery for congenital deformity or trauma.
- It contributes to a major health problem.

The physician must identify the specific reasons any of the above criteria are met in the PA request.

Physicians should refer to the General Information for Providers Chapter for specific information for obtaining authorization.

12.4 DESTRUCTION OF LESIONS

Medicaid covers destruction of lesions by methods such as electrocautery, cryocautery, laser, and surgery.

Coverage of the surgical destruction of lesions that involves more extensive procedures is limited to the hospital/facility setting. Less extensive procedures are covered in the office/non-facility setting. (Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding which procedures require a hospital/facility setting for coverage and which procedures are covered in the office/non-facility setting.) If a repeat procedure to the same lesion is necessary, it is covered as an office visit.

Chemocautery or chemical destruction of any lesion, such as the use of a nitrate stick or podophyllin, is covered as a part of the office visit.

12.5 HYSTERECTOMY

Hysterectomies are covered only if the beneficiary has been informed orally, prior to surgery, that a hysterectomy will render her permanently incapable of reproducing. The beneficiary or her representative must sign a written acknowledgment of receipt of that information. The Acknowledgment of Receipt of Hysterectomy Information (MSA-2218) serves as the written acknowledgment.

All items on the MSA-2218 must be completed and the form must be signed by the beneficiary (or representative) and the physician (MD or DO).

Federal regulations prohibit Medicaid coverage for hysterectomies performed solely for the purpose of sterilization. Hysterectomies are also prohibited when performed for family planning purposes even when there are medical indications, which alone do not indicate a hysterectomy.
12.5.A. EXCEPTIONS

The MSA-2218 is not required in the following situations:

- The beneficiary was already sterile before the hysterectomy.
- The beneficiary requires a hysterectomy because of a life-threatening emergency situation. It was not possible for the physician to inform the beneficiary in advance that the surgery would make her permanently incapable of reproducing.
- The hysterectomy (as covered according to Medicaid policy) was performed during a period of retroactive eligibility.

12.5.B. ACKNOWLEDGEMENT OF RECEIPT OF HYSTERECTOMY INFORMATION

Providers may attach a copy of the MSA-2218 to the claim or submit the MSA-2218 via fax.

Federal regulations require that this form be submitted to Medicaid before reimbursement can be made for any hysterectomy procedure. This process can eliminate submitting paper attachments for hysterectomy claims and pre-confirms the acceptability of the completed acknowledgement form, as well as reduces costly claim rejections.

(Refer to the Forms Appendix for a copy of MSA-2218. The form is also available on the MDHHS website. Refer to the Directory Appendix for website and contact information.)

12.5.C. PROCEDURE FOR ACKNOWLEDGEMENT OF RECEIPT OF HYSTERECTOMY INFORMATION APPROVAL

- The provider who obtains the required Acknowledgement completes a cover sheet (typed or printed) which must include: beneficiary name, beneficiary Medicaid ID number, provider’s contact person, provider fax number, and provider phone number.
- Fax the cover sheet and completed acknowledgement form to the Medicaid Payments Division, Hysterectomy Acknowledgement Form Approval. (Refer to the Directory Appendix for contact information.) Do not fax invoices.
- The form is reviewed within five working days, and a notice of errors or acceptance is returned to the provider. When notified that the acknowledgement form has been accepted and is on file, inform the other providers via a copy of the response. All invoices related to the service may be submitted without attachments.
- If there is no response within five working days:
  - Confirm that the fax is working.
  - Be sure that the cover sheet included the necessary information for Medicaid staff to respond to the provider.
  - Resend the information if necessary.
12.6 ORGAN TRANSPLANTS [CHANGES MADE 4/1/23]

Medicaid covers organ transplants and related services if all requirements for these services are met. PA is required for all beneficiary, donor, and potential donor services related to all organ transplants except cornea and kidney transplants. *(text deleted per bulletin MMP 22-44)*

Refer to the Hospital Chapter for further information. *(text added per bulletin MMP 22-44)* *(text deleted per bulletin MMP 22-44)*

12.7 STERILIZATION

Medicaid covers sterilization procedures when specific requirements are met. Medicaid defines a sterilization procedure as any medical procedure, treatment, or operation for the purpose of rendering an individual (male or female) permanently incapable of reproducing. Surgical procedures performed solely to treat an injury or pathology are not considered sterilizations under Medicaid’s definition of sterilization, even though the procedure may result in sterilization (e.g., oophorectomy). The physician is responsible for obtaining the signed Consent for Sterilization (MSA-1959/HHS-687).

Sterilizations are only covered if all of the following are met:

- The beneficiary is at least 21 years of age at time of informed consent.
- The beneficiary is not legally declared to be mentally incompetent.
- The beneficiary is not institutionalized in a corrective, penal, or mental rehabilitation facility.
- Informed consent is obtained.
- Informed consent is not obtained while the beneficiary is in labor or childbirth; seeking to obtain or obtaining an abortion; or under the influence of alcohol or other substances that affect the beneficiary's state of awareness.
- Informed consent must be obtained not less than 30 days nor more than 180 days prior to sterilization.

The only exception is in the case of premature delivery or emergency abdominal surgery. If the premature delivery or emergency abdominal surgery occurred before the 30-day waiting period is over, at least 72 hours must have passed between the time of obtaining informed consent and the sterilization procedure.

- In cases of premature delivery, informed consent must have been given at least 30 days before the expected delivery date. The consent form must indicate the expected date of delivery.
- In cases of abdominal surgery, the emergency nature of the surgery must be clearly identified (e.g., diagnosis, physician’s statement, or hospital summary). The nature of the emergency must be included on the consent form.
12.7.A. INFORMED CONSENT PROCESS

The following procedures must be included in the process of informed consent:

- The beneficiary must be advised that the sterilization will not be performed for at least 30 days after the MSA-1959/HHS-687 is signed, except in cases of emergency abdominal surgery or premature delivery.
- The person who obtains informed consent must offer to answer any questions the beneficiary may have concerning the procedure.
- Suitable arrangements must be made to ensure that information is effectively communicated to the deaf, blind, or otherwise handicapped.
- An interpreter must be provided if the beneficiary does not understand the language used on the consent form or the language used by the person obtaining informed consent.
- The beneficiary is permitted to have a witness of his choice present when informed consent is obtained.
- At the time of the informed consent, a copy of the consent form must be given to the beneficiary.

All of the following sterilization information and advice must be presented orally to the beneficiary both at the time the beneficiary signs the MSA-1959/HHS-687 and again by the physician performing the sterilization shortly before the procedure (e.g., during the pre-operative examination):

- Advice that the beneficiary is free to withhold or withdraw consent to the procedure at any time before the sterilization without affecting the right to future care or treatment and without loss or withdrawal of any federally funded program benefits to which the beneficiary might be otherwise entitled.
- A description of available alternative methods of family planning and birth control.
- Advice that the sterilization procedure is considered to be irreversible.
- A thorough explanation of the specific sterilization procedure to be performed.
- A full description of the discomforts and risks that may accompany or follow the procedure, including an explanation of the type and possible effects of any anesthetic to be used.
- A full description of the benefits or advantages that may be expected as a result of the sterilization.

The beneficiary, the person who obtained the consent, and the interpreter (if required) must sign the MSA-1959/HHS-687 not less than 30 days nor more than 180 days prior to the sterilization. The physician performing the sterilization must also sign and date the MSA-1959/HHS-687 after the sterilization has been performed.

No additional reimbursement is allowed for the examination or the sterilization explanation.
If the procedure occurs in a place other than that in which the consent form is signed (e.g., forms were signed in the physician's office, but the procedure will be rendered in the hospital), the person obtaining consent must send a copy of the completed form to the place of surgery. The second provider (e.g., hospital) is responsible for acquiring the physician's statement (if not previously documented) and for photocopying the signed form and supplying copies to any other Medicaid provider who is billing as a participant in the sterilization.

A copy of the completed MSA-1959/HHS-687 is required for coverage of charges related to a sterilization procedure. This form may be faxed or attached to the claim form.

### 12.7.B. CONSENT FOR STERILIZATION FORM

Providers may attach a copy of the Consent for Sterilization (MSA-1959/HHS-687) form to the claim or submit the MSA-1959/HHS-687 via fax.

Federal regulations require that this form be submitted to MDHHS before reimbursement can be made for any sterilization procedure. This process can eliminate submitting paper attachments for sterilization claims, and pre-confirms the acceptability of the completed consent form.

(Refer to the Forms Appendix for a copy of MSA-1959/HHS-687. Refer to the Directory Appendix for website and contact information.)

### 12.7.C. PROCEDURE FOR CONSENT FOR STERILIZATION FORM APPROVAL

- The provider who obtains the required Consent and completed MSA-1959/HHS-687 completes a cover sheet (typed or printed) which must include: beneficiary name, beneficiary Medicaid ID number, provider's contact person, provider fax number, and provider phone number.
- Fax the cover sheet (according to Document Management Portal instructions) and completed MSA-1959/HHS-687 to the Medicaid Payments Division, Sterilization Consent Form Approval. (Refer to the Directory Appendix for contact information.) Do not fax invoices.
- The MSA-1959/HHS-687 is reviewed within five working days, and a notice of errors or acceptance is returned to the provider. When notified that the MSA-1959/HHS-687 has been accepted and is on file, inform the other providers via a copy of the response. All invoices related to the service may be submitted without attachments.
- Providers may then submit claims (either electronic or hard copy) to Medicaid. The remarks section or appropriate electronic segment must include the statement "Consent on File."
- When sterilization claims are received with this information in the remarks section, consent form edit requirements are forced if the submitted invoice matches the consent form on file.
- If there is no response within five working days:
  - Confirm that the fax is working.
Be sure that the cover sheet included the necessary information for Medicaid staff to respond to the provider.

Resend the information if necessary.

12.7.D. REVERSAL OF STERILIZATION

Services to reverse a previous sterilization are not covered by Medicaid.
SECTION 13 – DURABLE MEDICAL EQUIPMENT/ORTHOTICS/PROSTHETICS

Refer to the Medical Supplier Chapter of this manual for additional information.
SECTION 14 – BEHAVIORAL HEALTH AND SUBSTANCE USE DISORDER SERVICES

14.1 BEHAVIORAL HEALTH SERVICES

Medicaid covers behavioral health services for diagnostic or active treatment purposes. Behavioral health services are covered by the local PIHP/CMHSP for services included under the capitation payments to the PIHPs/CMHSPs. (Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter for additional information.) For services not included in the capitation payments to the PIHP/CMHSP, behavioral health services are covered through Medicaid Health Plans or FFS Medicaid. Under FFS, behavioral health services may be provided by a physician (MD or DO), psychologist, social worker, professional counselor, or marriage and family therapist (as defined in the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter, Non-Physician Behavioral Health Appendix). (Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding covered services.)

Beneficiaries enrolled in an MHP will receive behavioral health services through the health plan. (Refer to the Medicaid Health Plans Chapter of this manual for additional information.)

(Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter of this manual for services covered by the PIHPs/CMHSPs and authorization requirements.)

<table>
<thead>
<tr>
<th>Psychological Testing</th>
</tr>
</thead>
<tbody>
<tr>
<td>Medicaid covers psychological testing that is reasonable and necessary for diagnosing the beneficiary's mental or developmental status and strengths and needs. If a beneficiary requires psychological testing more than once per year, documentation of medical necessity must be maintained in the medical record. Psychological testing must be ordered by a physician (MD or DO) and may be performed by a psychologist who is fully licensed, limited-licensed, or temporary limited-licensed. This order must be kept in the beneficiary’s clinical record. Supervision of limited-licensed and temporary limited-licensed psychologists must comply with the requirements of Michigan Public Act 368 of 1978, as amended.</td>

<tr>
<th>Inpatient Psychiatric Admissions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Inpatient stays in a psychiatric unit of a general hospital are covered for beneficiaries of any age. Inpatient treatment, including related psychiatric visits, in a freestanding psychiatric hospital, both private and state owned, is limited to eligible beneficiaries under age 21, and age 65 and older. If the beneficiary was an inpatient immediately prior to attaining age 21, he would be eligible to continue as an inpatient until age 22. If the beneficiary is discharged at some time following his 21st birthday, coverage terminates on the discharge date. All psychiatric admissions and continued stays must be authorized by the local PIHP/CMHSP. (Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter of this manual for specific coverages and authorization requirements.)</td>
</tr>
</tbody>
</table>

Version Date: July 1, 2023

Page 60
Psychiatric Partial Hospitalization

Psychiatric coverage includes partial hospitalization on a day-care or night-care plan for all beneficiaries, regardless of age. To be eligible for partial hospitalization, the beneficiary must be receiving active psychiatric treatment provided under the direction of a psychiatrist.

All partial hospitalization admissions and continued stays must be authorized by the local PIHP/CMHSP. (Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter of this manual for specific coverages and authorization requirements.)

14.2 SUBSTANCE USE DISORDER SERVICES

Most substance use disorder (SUD) services provided to Medicaid beneficiaries are covered through the local PIHP/CMHSP. PIHPs/CMHSPs are responsible for direct payment for inpatient psychiatric or partial hospitalization services, related physician services, and specialized community mental health clinical and rehabilitation services that the PIHP/CMHSP has prior authorized. Providers should not bill MDHHS for these services. All providers are encouraged to utilize this system when and wherever possible.

14.2.A. ACUTE CARE DETOXIFICATION

Acute detoxification services are reimbursed directly by MDHHS for both MHP enrollees and FFS beneficiaries.

Admission to the acute care setting for a diagnosis of substance use must meet at least one of the following criteria as reflected in the physician's orders and patient care plans:

- Vital signs, extreme and unstable
- Uncontrolled hypertension, extreme and unstable
- Delirium tremens, (e.g., confusion, hallucinations, seizures) or a documented history of delirium tremens requiring treatment
- Convulsions or multiple convulsions within the last 72 hours
- Unconsciousness
- Occurrence of substance abuse with pregnancy and monitoring the fetus is vital to the continued health of the fetus
- Insulin treated diabetes complicated by diabetic ketoacidosis
- Suspected diagnosis of closed head injury based on trauma injury
- Congestive heart disease or ischemic heart disease, or significant arrhythmia as examples of active symptomatic heart disease
- Suicidal ideation and gestures necessitating suicidal precautions as part of treatment
- Blood alcohol level 350 mg/dl with a diagnosis of alcohol abuse
- Blood alcohol level 400 mg/dl with diagnosis of alcohol dependence
- Active presentation of psychotic symptoms reflecting an emergent/urgent condition
14.2.B. Medication-Assisted Treatment

MAT is the use of medications often used in combination with counseling and behavioral therapies to provide a whole-patient approach to the treatment of substance use disorders (SUDs). Medications used in MAT are approved by the Food and Drug Administration (FDA). MAT programs are clinically driven and tailored to meet each patient’s needs. For additional information regarding MAT, refer to the Medication-Assisted Treatment (MAT) subsection of the Behavioral Health and Intellectual and Developmental Disability Supports and Services chapter.

14.2.C. Office-Based Alcohol Treatment (OBAT)/Office-Based Opioid Treatment (OBOT)

OBAT/OBOT services may be reimbursed directly by MDHHS when provided to MHP enrollees and FFS beneficiaries. Primary healthcare providers (which encompasses the following healthcare providers: Physicians [MD/DO], Nurse Practitioners, Physician Assistants, Clinical Nurse Specialists, Certified Nurse Midwives, Obstetricians/Gynecologists, and Pediatricians) in an office-based setting who are licensed or otherwise trained to provide SUD services and behavioral health providers (Licensed Psychologist [doctoral level], Licensed Social Worker [master’s level], Licensed Marriage and Family Therapist [master’s or doctoral level], Licensed Professional Counselor [master’s or doctoral level], Limited Licensed Psychologist [master’s or doctoral educational level] under the supervision of an enrolled, fully-licensed psychologist [except as noted in Section 333.18223 of the Public Health Code] who are associated with them, and who do not have a specialty SUD benefit services contract with a PIHP) may be reimbursed through the Medicaid Fee for Service (FFS) program. OBAT/OBOT services provided by qualified providers, as identified above, will be considered for reimbursement through the FFS program when the beneficiary meets the American Society of Addiction Medicine (ASAM) criteria for outpatient treatment.

Providers are required to provide services consistent with clinical practice guidelines established by the Substance Abuse and Mental Health Services Administration (SAMHSA) and ASAM.

The following services related to opioid use disorder (OUD) and alcohol use disorder (AUD) treatment will qualify for FFS reimbursement when a beneficiary meets ASAM criteria for outpatient treatment and has a primary diagnosis of opioid use, abuse and dependence or alcohol use, abuse and dependence as classified by the International Classification of Diseases, Version 10 (ICD-10):

- Evaluation and Management services
- Consultation services
- Psychotherapy services
- Psychiatric Collaborative Care Management services
- Behavioral Health Care Management
- Drug Testing services
Other Laboratory services

Screening, Brief Intervention and Referral to Treatment (SBIRT)

Medications for the treatment of AUD/OUD

The treatment of AUD/OUD requires a multi-faceted and individualized approach to reach full treatment potential that may include screening and assessment, medications and medication management, and counseling and/or other psychosocial supports.

To reach optimal treatment, beneficiaries must be actively involved in their treatment and, as such, it is important that all providers coordinate care. Beneficiaries with significant AUD or OUD may require assistance with transportation, housing, job resources, and other important life aspects that impact a beneficiary’s recovery. Primary healthcare providers must ensure beneficiaries have access and receive referral to PIHPs for further assessment and treatment, and any of the other supports and services that are available (i.e., PIHP specialty services, community-based services, and natural supports) as needed to ensure desired treatment results.

PIHPs/CMHSPs, FFS and MHPs must partner as needed in overseeing and coordinating the treatment plan, knowing that office-based AUD/OUD treatment may be only part of the services necessary to achieve successful outcomes.

Participating providers must observe applicable State and Federal laws, rules, regulations, and policies, including Michigan Automated Prescription System (MAPS) prescribing requirements. Refer to the Directory Appendix for website information regarding MAPS.

(Refer to the General Information for Providers Chapter for additional information on enrollment in CHAMPS.)

14.2.D. ADDITIONAL SUBSTANCE USE DISORDER SERVICES

Medicaid covers additional substance use disorder services through capitation payments to the PIHPs/CMHSPs. (Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter of this manual for coverage details and authorization requirements.)

14.3 PSYCHIATRIC COLLABORATIVE CARE MODEL (CoCM) SERVICES

14.3.A. GENERAL INFORMATION

CoCM is a model of integrated behavioral health service which is typically provided within the primary care setting. The evidence-based model includes a person-centered care team, weekly and/or monthly monitoring of person-centered goals, and referral to behavioral health support services if goals are unmet after an initial six-month episode of care. CoCM uses team-based collaborative and management services which are provided under the direction and supervision of a treating physician or other qualified healthcare professional and utilizes a measurement-based treatment-to-target approach. The CoCM team includes the primary care provider, a behavioral health care manager, a psychiatric
consultant and the FFS or MHP beneficiary. The model requires the use and maintenance of a patient registry, typically maintained by the behavioral health care manager, which is to be accessible by the primary care provider and psychiatric consultant. CoCM allows for behavioral health integration services to be delivered in a familiar setting that helps engage beneficiaries in care, adapts to their changing needs over time, and reduces the likelihood of duplication of services by addressing both physical and behavioral health care in one setting.

14.3.B. TARGET POPULATION

CoCM is intended for beneficiaries who typically have behavioral signs and/or symptoms of a newly diagnosed behavioral health condition, need help engaging in treatment, have not responded to care delivered in a non-psychiatric setting or require further assessment, engagement and management prior to consideration of a referral to a psychiatric care setting.

These services are not intended to manage severe and/or persistent conditions which require specialty care. Eligible conditions include, but are not limited to, mild to moderate depression, anxiety, bipolar disorder, attention deficit disorder, substance use disorder (SUD), and individuals who may not be deemed eligible for specialty services through CMHSP.

14.3.C. PSYCHIATRIC COLLABORATIVE CARE MODEL

Medicaid enrolled providers must be able to demonstrate they are following the evidence-based best practices of CoCM. The model is most effective when all five core principles are in place and incorporated into service delivery. These principles include:

- **Person-centered care:** The beneficiary is part of the team and makes the ultimate decisions regarding their treatment and based on their own goals.

- **Measurement-based treatment-to-target strategy:** The use of validated tools allows measurement of beneficiary signs and symptoms.

- **Population-based care:** The patient registry allows monitoring of beneficiary outcomes by the care team over time and can be utilized in conjunction with, or alongside, existing beneficiary health records.

- **Evidence-based treatment:** Beneficiaries are offered evidence-based treatment that may include medications and brief therapeutic interventions.

- **Accountable care:** The CoCM team of providers is accountable for all beneficiary care, including quality and clinical outcomes for beneficiaries receiving CoCM support services.

14.3.C.1. EPISODE OF CARE

An episode of care begins when a beneficiary starts CoCM and an episode of care ends when a beneficiary either:

- Fulfills treatment goals and the beneficiary returns to usual primary care follow-up;
 Fails to attain treatment goals, fails to improve or their condition worsens and requires referral to specialty services, or
 A break in services for six consecutive months or more occurs, at which point a new episode of care begins.

14.3.C.2. MEASUREMENT-BASED TREATMENT TO TARGET STRATEGY

The model utilizes validated tools which allows for measurement of beneficiary signs and symptoms. At a minimum, the POC for each beneficiary should be adjusted every 10-12 weeks based on the goal of reducing measured symptoms. Outcome measures are tracked in a patient registry. For example, if a beneficiary is recommended to engage in evidence-based therapy and does not exhibit symptom measurement improvement after 10 weeks, the psychiatric consultant may recommend an adjustment to treatment in an effort to reach person-centered goals.

14.3.C.3. REQUIRED DOCUMENTATION

CoCM is a data-driven service delivery model that requires the use of a patient registry and corresponding POC for each beneficiary. The registry can be part of, or maintained alongside, an already existing Electronic Health Record (EHR). Typically, the behavioral health care manager is responsible for maintaining these tools and ensuring all documentation is included. CoCM services are most effective when the psychiatric consultant has direct access. Documentation must support the services provided and follow Medicaid documentation requirements, including consent for treatment. Services must be provided within the confines of state and federal law. Behavioral health care managers are required to ensure all aspects of registry/POC are included in the documentation.

Documentation requirements, at a minimum:

 Beneficiary information,
 Assessment, treatment plan, including evidence-based treatment interventions,
 Monitoring of individual beneficiary progress,
 Referrals, and
 Medication management.

The patient registry, at a minimum, must include the following key components:

 Date of enrollment and date of most recent contact with care team,
 Initial and most recent validated outcome measure,
 Prompt treatment-to-target strategies for treatment adjustment according to changes in validated tool scores, such as a flagging/alert system or systematic weekly review of the patient registry, and
 Facilitation of efficient, systematic psychiatric caseload review.
14.3.D. COLLABORATIVE CARE TEAM CRITERIA

All team members must participate in the care and treatment of the beneficiary to be considered as a covered CoCM service. Services are reported by the primary care provider and include the services of the treating physician, behavioral health care manager and the psychiatric consultant who is contracted to provide consultative services to the primary care provider. Psychiatric consultants typically make recommendations to the behavioral health care manager who will then convey recommendations to the treating physician. The psychiatric consultant does not typically provide direct consultation to the treating physician or direct treatment to beneficiaries, but instead works through the behavioral health care manager.

</tbody>
</table>
### Psychiatric Consultant

Medical professional (MD, DO or Mental Health Nurse Practitioner [MHNP]) who is trained in psychiatry or behavioral health and qualified to prescribe the full range of medications. The psychiatric consultant will:

- Recommend treatment strategies,
- Recommend medication and changes in medication based on beneficiary status,
- Recommend referral to specialty services when needed,
- Consult weekly with the behavioral health care manager,
- Consult with and advise the treating primary care provider as clinically indicated,
- Have infrequent contact with beneficiaries (refer to the Reimbursement subsection within the Psychiatric Collaborative Care Model [CoCM] Services subsection of this chapter for additional information), and
- On rare occasions, directly prescribe medications to a beneficiary.

### Beneficiary

The beneficiary is an active member of the care team and participation in care has proven to increase motivation, adherence to treatment plan, satisfaction with care and positive beneficiary outcomes.

---

### 14.3.E. COVERAGE OF COCM SERVICES

CoCM is a covered service for beneficiaries who are diagnosed with a psychiatric disorder that requires behavioral health care assessment; establishing, implementing, revising, or monitoring a care plan; and brief interventions. For primary medical care practices that meet all CoCM team criteria, Medicaid will cover CoCM services provided by the care team and rendered by the primary care provider for six months of care. After the initial 12 months, prior authorization is required for 12 additional calendar months if the beneficiary shows improvement and there is a need for continued care. If no improvement occurs after the initial six months or their condition worsens, the beneficiary is to be referred to specialty services. An episode of care does not have to be six consecutive months. A beneficiary can be absent from services for five months and still return to their initial episode of care. After a six-month break in service, a new episode of care begins and prior authorization is not required.

CoCM services are based on reaching person-centered goals through the planning and management of the behavioral health care manager and primary care provider all in consultation with the psychiatric consultant.

CoCM services must include:

- **Initial assessment:** Visit occurring either in-person or via audio-visual telemedicine in which the beneficiary sets goals and is screened by a diagnosis-appropriate and consistent validated clinical rating scale, such as the PHQ-9 or GAD-7, which also must be done prior to subsequent CoCM services.

- **Continued monitoring:** Face-to-face or non-face-to-face weekly to monthly follow-up by the behavioral health care manager that must include monthly screening with validated rating scale, monitoring of goals and/or medication, and may include recommended evidence-based therapies.
• Monthly monitoring: Continues until goals are met, the beneficiary stops participating or the beneficiary is referred to specialty services.

14.3.F. NON-COVERED SERVICES

Psychiatric CoCM services do not include:

- Treatment related to severe and persistent behavioral health conditions that require specialty care beyond the intent of CoCM services.
- Direct interaction between the beneficiary and the psychiatric consultant, either in person or by telephone. CoCM services typically include the psychiatric consultant as recommending treatment to the behavioral health care manager and are ultimately directed by the primary care provider.
- SUD-related Medication Assisted Treatment (MAT) is not covered under CoCM services and should be reported separately.

14.3.G. PRIOR AUTHORIZATION

After the initial 12 months of care, prior authorization is required for an additional 12 months. Prior authorization requests must include documentation showing progress toward beneficiary goals through validated screening tool scores and an explanation for the medical necessity of continued services. (Refer to the Prior Authorization subsection of this chapter for additional information.)

14.3.H. REIMBURSEMENT

CoCM is a bundled monthly payment that represents a model of care rendered by all team members. The primary care provider is the sole biller for CoCM and services are not to be billed by the psychiatric consultant. The primary care provider agency is expected to have its own contract with the psychiatric consultant and will pay for his or her services as part of the CoCM. Providers are expected to adhere to the American Medical Association’s CPT coding guidelines for Psychiatric Collaborative Care Management Services.

Direct consultant services delivered to beneficiaries by the psychiatric consultant outside of CoCM, such as evaluation and management or therapeutic interventions, may be reported separately.

To avoid duplication of services, CoCM services should not be provided to beneficiaries receiving the following Medicaid program services:

- MI Care Team benefit,
- Behavioral Health Home benefit,
- Opioid Health Home benefit, or
- Other care management services that include mental health treatment.

Providers may check the beneficiary’s assigned benefit plan information in CHAMPS
14.3.I. **FEDERALLY QUALIFIED HEALTH CENTER AND RURAL HEALTH CLINIC REIMBURSEMENT**

CoCM services provided by a FQHC or RHC provider (e.g., MD/DO, certified NP, certified CNS, PA) do not qualify as an encounter. It may, however, be reimbursed outside of the Prospective Payment System.

14.3.J. **INDIAN HEALTH CENTER REIMBURSEMENT**

CoCM services provided by a Tribal Health Center (THC) or Tribal Federally Qualified Health Center (FQHC) provider (e.g., MD/DO, certified NP, certified CNS, PA) do not qualify as an encounter. It may, however, be reimbursed outside of the All Inclusive Rate (AIR).

14.3.K. **SUBSTANCE USE DISORDER COCM REIMBURSEMENT**

For MHP-enrolled beneficiaries, CoCM services provided for a primary diagnosis of SUD are carved-out of the MHPs. Such services will be reimbursed by the PIHPs, or FFS as applicable, per Medicaid policy.
SECTION 15 – PRIVATE DUTY NURSING

Refer to the Private Duty Nursing Chapter of this manual for additional information.
SECTION 16 — OUTPATIENT THERAPY

Refer to the Therapy Services Chapter of this manual for additional information.
SECTION 17 – TELEMEDICINE [CHANGES MADE 7/1/23]

Refer to the Telemedicine chapter for additional information. *(revised per bulletins MSA 20-09, MSA 21-24, MMP 23-10)*

The following subsections were deleted per bulletins MSA 20-09, MSA 21-24, MMP 23-10:

- 17.1 Telemedicine Services
- 17.2 Authorization Requirements
- 17.3 Authorized Originating Sites
- 17.4 Distant Site
- 17.5 Authorized Practitioners
SECTION 18 – ANESTHESIOLOGIST ASSISTANT

Medicaid covers anesthesia services provided by qualified anesthesiologist assistants (AAs). AA services are covered for the AA or for the entity with which the AA has an employment or contract relationship that provides for payment to be made to the entity.

For specific coverage parameters, refer to the Anesthesia Services section of this chapter.

To enroll as a Medicaid provider, an AA must meet all of the following requirements:

- Works under the delegation and direction of a Medicaid enrolled anesthesiologist.
- Is in compliance with all applicable requirements of State law.
- Is a graduate of a medical (MD or DO) school-based anesthesiologist assistant education program that:
  - Is accredited by the Committee on Allied Health Education and Accreditation; and
  - Includes approximately two years of specialized basic science and clinical education in anesthesia at a level that builds on a premedical undergraduate science background.
- Is currently certified by the National Commission for Certification of Anesthesiologist Assistants.
SECTION 19 – CERTIFIED REGISTERED NURSE ANESTHETIST

Medicaid covers anesthesia services provided by a Medicaid enrolled Certified Registered Nurse Anesthetist (CRNA). CRNA services are covered for the CRNA or for the entity with which the CRNA has an employment or contract relationship that provides for payment to be made to the entity. CRNAs must comply with Michigan scope of practice licensing laws and regulations.

If a rural hospital elects reasonable cost reimbursement for CRNA services under Medicare, the CRNA costs are included in the facility payments to the hospital and are not covered separately by Medicaid.

For specific coverage parameters, refer to the Anesthesia Services Section of this chapter.

To enroll as a Medicaid provider, a CRNA must meet all of the following requirements:

- be currently licensed in Michigan as a registered professional nurse;
- be certified by the State as a CRNA; and
- complete an on-line application through the CHAMPS Provider Enrollment subsystem.

(Refer to the Provider Enrollment Section of the General Information for Providers Chapter for additional enrollment information, and the Directory Appendix for contact information.)
SECTION 20 – CERTIFIED NURSE PRACTITIONER

Medicaid covers services provided by qualified Medicaid enrolled nurse practitioners (NPs). Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter or the Medicaid Code and Rate Reference tool for additional information regarding coverage parameters.

20.1 COVERED SERVICES

Medicaid covers medically necessary services provided by a NP, as defined in Public Act 368 of 1978 as amended, when all of the following requirements are met:

- the services are the type that are considered physician’s services if furnished by a Doctor of Medicine or Osteopathy (MD/DO);
- the services are performed by a person who is licensed as an advanced practice registered nurse (APRN) under state law with the NP specialty certification granted by the Michigan Board of Nursing;
- the NP is legally authorized to perform the service in compliance with state law;
- the services are performed in collaboration with or under the terms of a valid practice agreement with a Medicaid-enrolled MD/DO; and
- the services are not restricted to physicians or otherwise excluded by Medicaid program policy or federal and state statutes.

NP services are subject to the limitations that apply to physician services. Certain services may be restricted to physicians by program policy or federal and state statutes and may not be covered for NPs. Professional services are only covered when the NP has personally performed the service and no other provider or entity has been paid for the service. Services provided jointly by the NP and physician are covered for a single practitioner only.

20.2 ENROLLMENT OF NURSE PRACTITIONERS

A NP who provides professional services to Medicaid beneficiaries is required to be a Medicaid-enrolled provider and uniquely identified on claims. To enroll as a Medicaid provider, the NP must complete an on-line application in the Community Health Automated Medicaid Processing System (CHAMPS) and enroll with an Individual (Type 1) National Provider Identifier (NPI) as either a Rendering/Servicing-Only or Individual/Sole Provider.

20.2.A. RENDERING/SERVICING-ONLY PROVIDER

A physician-employed NP who renders services only under the physician’s delegation and supervision under an employment relationship or agreement is required to be an enrolled provider and uniquely identified on claims for services. He/she may enroll as a Rendering/Servicing-Only Provider, and payment for services will be made to the employing, supervising physician or physician group.
20.2.B. INDIVIDUAL/SOLE PROVIDER

NPs enrolled as Individual/Sole Providers may receive direct reimbursement for services. Claims for services provided to FFS beneficiaries may be directly submitted to MDHHS. For beneficiaries enrolled in a MHP, the NP must negotiate provider terms and payment arrangements with each MHP.

During enrollment and enrollment revalidation processes, the NP must report the NPI of their Medicaid enrolled collaborating physician by including the collaborating physician’s NPI on the checklist and associating to the collaborating physician in the "Associate to Billing Provider/Other Association" step in CHAMPS. Disenrollment of the collaborating physician from the program may prompt disenrollment of the NP. To avoid interruption in enrollment, the NP must ensure his/her CHAMPS enrollment information reflects current collaborating physician information. Additional provider enrollment information can be found on the MDHHS website (refer to the Directory Appendix for website information) and in the General Information for Providers Chapter of this manual.

20.3 NURSE PRACTITIONER COLLABORATIVE PRACTICE AGREEMENT

As part of the enrollment and enrollment revalidation processes, the NP must attest to having a valid collaborative practice agreement with a Medicaid enrolled physician. Determination of medical necessity and appropriateness of services is the responsibility of the practitioner and physician based on the terms of the collaborative practice agreement. The collaborating physician does not have to be physically on the premises where the services are provided.

The collaborative practice agreement is a written document that the practitioner and physician utilize to outline the performance of medical care services or the prescribing of schedule 2 to 5 controlled substances, or both. The agreement shall not include an act, task, or function that the practitioner or collaborating physician is not qualified to perform by education, training, or experience and that is not within the scope of the license held by the practitioner or physician. The agreement must include the effective date of delegation and subsequent review dates. The NP must maintain the collaborative practice agreement at his/her primary place of practice and provide the agreement to MDHHS upon request.

The terms of the agreement, at a minimum, must include the following:

- A process between the practitioner and collaborating physician for communication, availability, and decision making, including an emergency plan;
- A protocol for designating an alternative physician for consultation in situations in which the collaborating physician is not available;
- A description of the duties and responsibilities of the practitioner and collaborating physician based upon their education, training and experience;
- A provision that allows the practitioner or collaborating physician to terminate their agreement; and
- The signatures of the practitioner and physician.
The NP must notify MDHHS if the collaborative practice agreement is terminated. Termination or suspension of the agreement by either professional, or termination of the collaborating physician’s enrollment, may lead to disenrollment of the NP from the program.

20.4 Nurse Practitioner Billing and Reimbursement

Professional claims must include the NPI of the NP in the Rendering Provider field and the supervising or collaborating physician in the Supervising Provider field as applicable. Refer to the Billing & Reimbursement for Professionals and the Billing & Reimbursement for Institutional Providers Chapters for additional Information.

Fee-for-Service reimbursement for NP services is based upon the limits and rates associated to physician professional services and are published on the NP/CNS fee schedule located on the MDHHS website. Provider specific information may be located utilizing the Medicaid Code and Rate Reference tool within CHAMPS. Refer to the Billing & Reimbursement Chapters for additional information.

MHPs are responsible for reimbursing contracted providers or subcontractors for their services according to the conditions stated in the subcontract established between the practitioner and the MHP. Noncontracted providers must comply with all applicable authorization requirements of the MHP and uniform billing requirements. Refer to the Medicaid Health Plans Chapter for additional information.

(Refer to the Surgery-General section of this chapter for information on an NP functioning as an assistant at surgery.)
SECTION 21 – CERTIFIED CLINICAL NURSE SPECIALIST

Medicaid covers services provided by qualified Medicaid enrolled clinical nurse specialists (CNSs). Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter or the Medicaid Code and Rate Reference tool for additional information regarding coverage parameters.

21.1 COVERED SERVICES

Medicaid covers medically necessary professional services provided by a CNS, as defined in Public Act 368 of 1978 as amended, when all of the following requirements are met:

- the services are the type that are considered physician’s services if furnished by a Doctor of Medicine or Osteopathy (MD/DO);
- the services are performed by a person who is licensed as an advanced practice registered nurse (APRN) under state law, with the CNS specialty certification granted by the Michigan Board of Nursing;
- the CNS is legally authorized to perform the service in compliance with state law;
- the services are performed in collaboration with or under the terms of a valid practice agreement with a Medicaid enrolled MD/DO; and
- the services are not restricted to physicians or otherwise excluded by Medicaid program policy or federal and state statutes.

CNS services are subject to the limitations that apply to physician services. Certain services may be restricted to physicians by program policy or federal and state statutes and may not be covered for CNSs. Professional services are only covered when the CNS has personally performed the service and no other provider or entity has been paid for the service. Services provided jointly by the CNS and physician are covered for a single practitioner only.

21.2 ENROLLMENT OF CLINICAL NURSE SPECIALISTS

The CNS who provides professional services to Medicaid beneficiaries is required to be an enrolled provider and uniquely identified on claims for services to be considered eligible for reimbursement. To enroll, the CNS must complete an on-line application in the Community Health Automated Medicaid Processing System (CHAMPS) and enroll with an Individual (Type 1) National Provider Identifier (NPI) as either a Rendering/Servicing-Only or Individual/Sole Provider.

21.2.A. RENDERING/SERVICING-ONLY PROVIDER

A physician-employed CNS who renders services only under the physician’s delegation and supervision under an employment relationship or agreement is required to be an enrolled provider and uniquely identified on claims for services. He/she may enroll as a Rendering/Servicing Only Provider, and payment for services will be made to the employing, supervising physician or physician group.
21.2.B. INDIVIDUAL/SOLE PROVIDER

CNSs enrolled as Individual/Sole Providers may receive direct reimbursement for services. Claims for services provided to FFS beneficiaries may be directly submitted to MDHHS. For beneficiaries enrolled in an MHP, the CNS must negotiate provider terms and payment arrangements with each MHP.

During enrollment and enrollment revalidation processes, the CNS must report the NPI of their Medicaid-enrolled collaborating physician by including the collaborating physician’s NPI on the checklist and associating to the collaborating physician in the "Associate to Billing Provider/Other Association" step in CHAMPS. Disenrollment of the collaborating physician from the program may prompt disenrollment of the CNS. To avoid interruption in enrollment, the CNS must ensure his/her CHAMPS enrollment information reflects current collaborating physician information. Additional provider enrollment information can be found on the MDHHS website (refer to the Directory Appendix for website information) and in the General Information for Providers Chapter of this manual.

21.3 COLLABORATIVE PRACTICE AGREEMENT

As part of the enrollment process, the CNS must attest to having a valid collaborative practice agreement with a Medicaid enrolled physician. Determination of medical necessity and appropriateness of services is the responsibility of the practitioner and physician based on the terms of the collaborative practice agreement. The collaborating physician does not have to be physically on the premises where the services are provided.

The collaborative practice agreement is a written document that the practitioner and physician utilize to outline the performance of medical care services or the prescribing of schedule 2 to 5 controlled substances, or both. The agreement shall not include an act, task, or function that the practitioner or collaborating physician is not qualified to perform by education, training, or experience and that is not within the scope of the license held by the practitioner or physician. The agreement must include the effective date of delegation and subsequent review dates. The CNS must maintain the collaborative practice agreement at his/her primary place of practice and provide the agreement to MDHHS upon request.

The terms of the agreement, at a minimum, must include the following:

- A process between the practitioner and collaborating physician for communication, availability, and decision making, including an emergency plan;
- A protocol for designating an alternative physician for consultation in situations in which the collaborating physician is not available;
- A description of the duties and responsibilities of the practitioner and collaborating physician based upon their education, training and experience;
- A provision that allows the practitioner or collaborating physician to terminate their agreement; and
- The signatures of the practitioner and physician.
The CNS must notify MDHHS if the collaborative practice agreement is terminated. Termination or suspension of the agreement by either professional, or termination of the collaborating physician’s enrollment, may lead to disenrollment of the CNS from the program.

21.4 BILLING & REIMBURSEMENT

Professional claims must include the NPI of the CNS in the Rendering Provider field and the supervising or collaborating physician in the Supervising Provider field as applicable. Refer to the Billing & Reimbursement for Professionals and the Billing & Reimbursement for Institutional Providers Chapters for additional information.

Fee-for-Service reimbursement for CNS services is based upon the limits and rates associated to physician professional services and is published on the NP/CNS fee schedule located on the MDHHS website. Provider specific information may be located utilizing the Medicaid Code and Rate Reference tool within CHAMPS. Refer to the Billing & Reimbursement Chapters for additional information.

MHPs are responsible for reimbursing contracted providers or subcontractors for their services according to the conditions stated in the subcontract established between the practitioner and the MHP. Noncontracted providers must comply with all applicable authorization requirements of the MHP and uniform billing requirements. Refer to the Medicaid Health Plans Chapter for additional information.

(Refer to the Surgery-General section of this chapter for information on a CNS functioning as an assistant at surgery.)
SECTION 22 – CERTIFIED NURSE MIDWIFE

Medicaid covers services provided by qualified Medicaid enrolled certified nurse midwives (CNMs). (Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter or the Medicaid Code and Rate Reference tool for additional information regarding coverage parameters.)

22.1 COVERED SERVICES

Medicaid covers medically necessary professional services provided by a CNM, as defined in Public Act 368 of 1978 as amended, when all the following requirements are met:

- the services are the type that are considered physician’s services if furnished by a Doctor of Medicine or Osteopathy (MD/DO);
- the services are performed by a person who is licensed as an advanced practice registered nurse (APRN) under state law, with the CNM specialty certification granted by the Michigan Board of Nursing;
- the CNM is legally authorized to perform the service in compliance with state law; and
- the services are not restricted to physicians or otherwise excluded by Medicaid program policy or federal and state statutes.

Covered services include those within the CNM’s scope of practice as defined in state law. Services focus on inpatient and outpatient obstetric, gynecologic and women’s primary health care. Services must be administered within the framework of an alliance agreement that provides for physician consultation and referral as indicated by the health of the beneficiary. Covered CNM services include the following:

- Maternity care, including antepartum care, hospital delivery and postpartum care;
- Newborn care;
- Primary care services for women throughout their lifespan, including physical exams;
- Diagnosis and treatment of common health problems;
- Gynecological services;
- Reproductive health services;
- Contraceptive services;
- Treatment of male partners for sexually transmitted infection and reproductive health; and
- The prescribing of pharmacological and nonpharmacological interventions and treatments that are within the CNM’s specialty role, scope of practice, and state law.

22.2 MATERNITY CARE

Medicaid covers antepartum care, delivery, and postpartum care rendered by a CNM when provided in compliance with Medicaid policy.
### Antepartum Care
Coverage for antepartum care includes all usual and customary antepartum services provided prior to delivery and referral to MIHP when there are psychosocial or nutritional factors that could adversely affect the pregnancy or the health and well-being of the mother or infant.

If the provider initiated prenatal care within the first six months of pregnancy through the month of delivery, the appropriate antepartum care CPT code is covered. If the beneficiary is seen by multiple CNMs or physicians within a group practice, the antepartum care package may be covered. (Refer to the Maternity Care and Delivery Services Section of this chapter for details on coverage of antepartum care and when individual E/M services are covered.

### Delivery
Deliveries performed by a CNM are covered in a licensed hospital setting only. Home deliveries and services associated with these deliveries are not covered. Coverage of the delivery includes the usual and customary services associated with the hospital admission, management of labor, monitoring, vaginal delivery, and resuscitation of the newborn infant when necessary.

### Post-partum Care
Medicaid covers usual and customary inpatient and outpatient post-partum services provided after the delivery. Routine post-partum hospital care for the mother is covered as a part of the delivery. Routine care of the newborn in the hospital is covered for the provider who examines and provides the total hospital care of the newborn regardless of whether he or she performed the delivery. (Refer to the Services to Newborns subsection in this chapter for additional coverage information.)

#### 22.3 Office Visits

Visits not directly related to antepartum care or follow-up to a delivery, such as family planning visits, are covered under the appropriate office visit procedure code. (Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters. Refer to the Evaluation and Management Services Section of this chapter for specific coverage information related to office visits.)

#### 22.4 Enrollment of Certified Nurse Midwives

The CNM who provides professional services to Medicaid beneficiaries is required to be an enrolled provider and uniquely identified on claims for services to be considered eligible for reimbursement. To enroll, the CNM must complete an on-line application in the Community Health Automated Medicaid Processing System (CHAMPS) and enroll with an Individual (Type 1) National Provider Identifier (NPI). Additional provider enrollment information can be found on the MDHHS website (refer to the Directory Appendix for website information) and in the General Information for Providers Chapter of this manual.

Practitioners who wish to provide services to Medicaid Health Plan (MHP) enrollees are encouraged to contact the individual MHP for additional enrollment, credentialing, and contract requirements.

#### 22.5 Billing & Reimbursement

Professional claims must include the NPI of the CNM in the Rendering Provider field and the supervising or collaborating physician in the Supervising Provider field as applicable. Refer to the Billing & Reimbursement for Professionals and the Billing & Reimbursement for Institutional Providers Chapters for additional Information.
Professional services are only covered when the CNM has personally performed the service and no other provider or entity has been paid for the service. Services provided jointly by the CNM and physician are covered for a single practitioner only.

Fee-for-Service reimbursement for CNM services is based upon the limits and rates associated to physician professional services and are published on the CNM fee schedule located on the MDHHS website. Provider specific information may be located utilizing the Medicaid Code and Rate Reference tool within CHAMPS. Refer to the Billing & Reimbursement Chapters for additional information.

MHPs are responsible for reimbursing contracted providers or subcontractors for its services according to the conditions stated in the subcontract established between the practitioner and the MHP. Noncontracted providers must comply with all applicable authorization requirements of the MHP and uniform billing requirements. Refer to the Medicaid Health Plans Chapter for additional information.

(Refer to the Surgery-General section of this chapter for information on a CNM functioning as an assistant at surgery.)
SECTION 23 – PHYSICIAN ASSISTANT

Medicaid covers physician assistant (PA) services provided by qualified, Medicaid enrolled practitioners in conjunction with covered surgeries and other procedures. Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter or the Medicaid Code and Rate Reference tool available through CHAMPS for more information regarding coverage parameters. (Refer to the Directory Appendix for CHAMPS access information.)

23.1 COVERED SERVICES

Medicaid covers medically necessary services provided by a PA, as defined in Public Act 368 of 1978 as amended, when all the following requirements are met:

- the services are the type that are considered physician’s services if furnished by a Doctor of Medicine or Osteopathy (MD/DO);
- the services are performed by a person who is licensed as a PA under state law;
- the PA is legally authorized to perform the service in compliance with state law;
- the services are performed under the terms of a valid practice agreement with a Medicaid-enrolled MD/DO; and
- the services are not restricted to physicians or otherwise excluded by Medicaid program policy or federal and state statutes.

23.2 ENROLLMENT OF PHYSICIAN ASSISTANTS

PAs who provide professional services to Medicaid beneficiaries are required to be enrolled providers in the Medicaid program and uniquely identified on claims for their services to be considered eligible for reimbursement. To enroll, the PA must complete an online application in the Community Health Automated Medicaid Processing System (CHAMPS) with an Individual (Type 1) National Provider Identifier (NPI) as a Rendering/Servicing-Only provider. Additional provider enrollment information can be found on the MDHHS website and in the General Information for Providers Chapter of this manual. (Refer to the Directory Appendix for website information.)

23.2.A. PARTICIPATING PHYSICIAN

Professional services rendered by a PA will be covered when provided under the terms of a valid practice agreement established with a participating physician as defined in state law. A group of physicians practicing other than as sole practitioners may designate one or more physicians in the group to enter into a practice agreement.

During enrollment and enrollment revalidation, the PA must report the NPI of their Medicaid-enrolled participating physician by including the participating physician’s NPI on the checklist and associating to the participating physician in the “Associate to Billing Provider/Other Association” step in CHAMPS. Disenrollment of the participating physician from the program may prompt disenrollment of the PA. To avoid interruption in enrollment, the PA must ensure his/her CHAMPS enrollment information reflects current/accurate participating physician information.
Practitioners who wish to provide services to Medicaid Health Plan (MHP) enrollees are encouraged to contact the individual MHP for additional enrollment, credentialing, and contract requirements.

23.2.B. PRACTICE AGREEMENT

As part of the enrollment process, the PA must attest to having a valid practice agreement with a participating physician that complies with applicable state law requirements. Determination of medical necessity and appropriateness of services is the responsibility of the PA and participating physician based on the terms of the practice agreement. The participating physician does not have to be physically on the premises where the services are provided. The PA shall maintain the practice agreement at his/her primary place of practice and provide the agreement to MDHHS upon request.

23.3 BILLING & REIMBURSEMENT

23.3.A. CLAIMS

Professional claims must include the NPI of the PA in the Rendering Provider field and the participating or supervising physician in the Supervising Provider field as applicable. Refer to the Billing & Reimbursement for Professionals and the Billing & Reimbursement for Institutional Providers Chapters for additional information.

23.3.B. REIMBURSEMENT

As a Rendering/Servicing-Only provider, PAs are not eligible to receive direct reimbursement. Payment for PA services will be issued to the participating physician, physician group or billing provider. Professional services are only covered when the PA has personally performed the service and no other provider or entity has been paid for the service. Services provided jointly by the PA and physician are covered for a single practitioner only.

Fee-for-Service reimbursement for PA services is based upon the limits and rates associated to physician professional services and are published on the Practitioner fee schedule located on the MDHHS website. Provider specific information may be located utilizing the Medicaid Code and Rate Reference tool within CHAMPS. Refer to the Billing & Reimbursement Chapter for additional information.

MHPs are responsible for reimbursing contracted providers or subcontractors for their services according to the conditions stated in the subcontract established between the practitioner and the MHP.

Noncontracted providers must comply with all applicable authorization requirements of the MHP and uniform billing requirements.

(Refer to the Surgery - General section of this chapter for information on a PA functioning as an assistant at surgery.)
SECTION 24 – PHYSICAL THERAPIST

Refer to the Therapy Services Chapter for additional therapy information.
SECTION 25 – PODIATRIST

Medicaid covers the medically necessary services of a podiatrist. (Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.)

Podiatrists should refer to the appropriate sections of this chapter for specific information related to the coverage of specific services.

25.1 COPayment

A copayment is required for each separately covered visit for beneficiaries age 21 and older. If more than one separately covered service is rendered on the same day, such as an office visit and laboratory services, only one copayment is required. If a procedure such as a surgery with a global period is rendered, only one copayment is required. Refer to the General Information for Providers Chapter for information about copayments. Current copayment amounts are listed on the MDHHS website. (Refer to the Directory Appendix for website information.)

25.2 CONSULTATIONS [CHANGE MADE 7/1/23]

Medicaid covers limited and intermediate level consultations if requested by a physician or qualified healthcare provider. (text added 7/1/23)

25.3 NURSING FACILITY SERVICES

Podiatry services provided to a beneficiary in a nursing facility are considered an ancillary service and require the written order of the beneficiary’s attending physician. All terms and conditions related to Medicaid covered and non-covered services, including PA and billing requirements, apply to services provided to beneficiaries in a nursing facility.
SECTION 26 – GENETIC COUNSELORS

26.1 COVERED SERVICES

Medicaid covers medically necessary genetic counseling services, as defined in section 333.17001 (Act 368 of 1978), when provided by a licensed Genetic Counselor and ordered by a Medicaid-enrolled physician, PA, or APRN (NPs, CNSs, and CNMs).

Genetic counseling is covered when provided in consideration of, or in conjunction with, genetic testing, or provided in relation to a genetic or congenital condition. Counseling is considered medically necessary when there is an expectation that a genetically inherited or acquired condition exists, and the beneficiary displays clinical features or is at risk of inheriting the disease/condition based upon factors including, but not limited to, personal history, family history, documentation of a genetic mutation, and/or ethnic background.

Services are only covered when the genetic counselor has personally performed the genetic counseling and no other provider or entity has billed or been paid for the service. Genetic counseling services provided jointly by the genetic counselor and a collaborating physician or qualified non-physician medical practitioner are covered for a single practitioner only.

Genetic tests recommended as a result of genetic counseling may be covered when provided in accordance with Medicaid’s Genetic and Molecular Testing policy. Providers should refer to the Genetic and Molecular Testing subsection of the Laboratory Chapter for information on genetic testing.

26.2 ENROLLMENT OF GENETIC COUNSELORS

Licensed genetic counselors may enroll with Medicaid for reimbursement of genetic counseling services. To enroll as a Medicaid provider, the Genetic Counselor must complete an online application in the Community Health Automated Medicaid Processing System (CHAMPS) and enroll with an Individual (Type 1) National Provider Identifier (NPI) as either a Rendering/Servicing-Only or Individual/Sole Provider. Genetic counselors in Michigan must be currently licensed by the Department of Licensing and Regulatory Affairs (LARA) and certified by the American Board of Genetic Counseling (ABGC) or American Board of Medical Genetics (ABMG). Out-of-state counselors must be currently licensed by the appropriate standard-setting authority in the state where they are practicing and must comply with Michigan Medicaid policy requirements regarding the provision of out-of-state services.

Individuals holding temporary genetic counselor licenses are not eligible to enroll as providers or be directly reimbursed by Medicaid. Services performed by these individuals must be performed under the supervision of a fully licensed, qualified genetic counselor as defined in section 333.6109 (Act 368 of 1978). Services must be billed to Medicaid under the NPI of the supervising genetic counselor.

Licensed genetic counselors may not be employed by or contracted with a commercial genetic testing laboratory. Genetic counselors working within an integrated, comprehensive health care delivery system that operates a laboratory but also routinely delivers health care services beyond laboratory testing are not excluded from enrollment.
**PRACTITIONER REIMBURSEMENT APPENDIX**

**SECTION 1 – REIMBURSEMENT METHODOLOGY**

**1.1 PRACTITIONER FEE SCREENS**

Practitioner payment rates are established by MDHHS as a fee screen for each procedure. The Medicare prevailing fees, the Resource Based Relative Value Scale (RBRVS) and other relative value information, other state Medicaid fee screens, and providers’ charges may be utilized as guidelines or references in determining the maximum fee screens for individual procedures. The Practitioner fee schedule is updated annually following the CMS January release of the RBRVS. Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.

Any rate discrepancies will be resolved by using the policy language describing reimbursement methodology for the established fee schedules.

**1.2 EMERGENCY DEPARTMENT SERVICES [CHANGE MADE 4/1/23]**

Physician services provided in the ED are covered as individual services. Critical care services are covered according to the CPT/HCPCS definitions and coding conventions for critical care. If critical care is required for a beneficiary in the ED, then only the critical care codes are covered. ED E/M or visit codes are not covered on the same day as critical care for the same provider.

When a beneficiary is seen in the ED, the appropriate level of ED E/M service is covered unless another E/M service is more appropriate (e.g., observation care, initial inpatient hospital care, or critical care). The ED E/M service which includes the medical screening exam is covered without regard to whether the medical screening results in the medical condition being deemed an emergency or not. The results of the medical screening examination, along with any medically necessary appropriate diagnostic services, determine if further treatment must be provided. If the attending physician determines that an emergency medical condition does exist, all subsequent medically appropriate services to stabilize the patient must be provided and are covered in addition to the ED E/M service. CPT/HCPCS coding conventions and Medicaid guidelines must be followed.

The medical record must support the need for the type and extent of diagnostic services performed based on the presenting symptoms of the beneficiary. The ED physician’s review of x-rays and EKGs performed on the beneficiary are covered as a part of the E/M service. Professional component services are covered only for the physician who prepares a complete, written report of the findings for the medical record. If a specialist in the field prepares this, then the ED physician’s review of the findings does not meet the conditions for separate coverage of the service.

The ED E/M services provided by the attending physician, regardless of the level of the service, are covered using a two-tiered rate based on whether the beneficiary was released or admitted. If the beneficiary was released from the ED, a single rate is used as the fee screen. If the beneficiary was admitted to the hospital or transferred to another hospital from the ED, a higher single rate is used as the fee screen.

The two-tiered fee screen applies only to the attending ED physician E/M service. The standard Medicaid fee screens continue to be applied to other separately billable attending ED physician services and the
services of other physicians (e.g. specialists) who provide E/M or other services in the ED. When billing for these additional services, CPT/HCPCS coding conventions and Medicaid program guidelines must be followed.  (text added 4/1/23)

1.3 **NEONATAL AND PEDIATRIC CRITICAL CARE SERVICES [CHANGES MADE 4/1/23]**

Effective for dates of service on and after October 1, 2022, practitioner rates for inpatient neonatal and pediatric critical and intensive care services will be reimbursed at 100% *(revised per bulletin MMP 22-34)* of the Medicare annual rate.

1.4 **OBSTETRICAL SERVICES**

Effective for dates of service on and after October 1, 2014, practitioner rates for obstetric care, including antepartum, delivery, and postpartum services, will be reimbursed at 95% of Medicare rates.

1.5 **PSYCHIATRIC SERVICES FOR INDIVIDUALS <21 YEARS OF AGE**

Effective for dates of service on and after February 1, 2020, practitioner rates for psychiatric diagnostic evaluation services provided to individuals less than 21 years of age will be reimbursed at 100% of the Medicare annual rate.

Effective for dates of service on and after January 1, 2021, practitioner rates for psychotherapy and other psychiatric services provided to individuals less than 21 years of age will be reimbursed at 63% of Medicare.
SECTION 2 – ENHANCED PRACTITIONER PAYMENTS

MDHHS makes payment adjustments for practitioner services payable under Medicaid Fee-For-Service (FFS) through entities identified in the Medicaid State Plan, Attachment 4.19-B, page 1a. (The Medicaid State Plan is available on the MDHHS website; refer to the Directory Appendix for website information.)

2.1 QUALIFYING PRACTITIONERS

Adjustments apply to both public and private practitioners and practitioner groups who are either employees of the public entities identified in the state plan, or are under contract with one or more of the public entities, and include the following:

- University medical and dental faculty, employed practitioners, and private practice groups with contractual arrangements with one or more of the above universities and provide services to Medicaid beneficiaries in a variety of settings.
- Hurley Hospital-employed or -contracted physicians, dentists, and other practitioners who provide services to Medicaid beneficiaries in a variety of settings.

Services eligible for the payment adjustments are billed under the federal employer identification number of the public entity or under the federal employer identification number of the practitioner/practitioner group.

Inpatient and outpatient services provided by the following practitioners, when not included in facility payments to the public entity, are included:

- Physicians (MD and DO)
- Ophthalmologists
- Oral-Maxillofacial Surgeons
- Dentists
- Podiatrists
- Physician Assistants
- Nurse Practitioners
- Clinical Nurse Specialists
- Certified Nurse Midwives
- Certified Registered Nurse Anesthetists
- Anesthesiologist Assistants
- Optometrists
2.2 PAYMENT ADJUSTMENT AMOUNT

The payment adjustment amount for services provided to Medicaid beneficiaries who do not have other insurance coverage will be the lesser of:

- The difference between the practitioner Medicaid fee-for-service fee screen and the practitioner’s customary charge; or,
- Up to 100% of the Average Commercial Rate for the service rendered.

The payment adjustment amount for services provided to Medicaid beneficiaries with other insurance coverage will be the lesser of:

- The difference between the total of the Medicaid, Medicare, and commercial insurance payments and the practitioner’s customary charge; or,
- The difference between the total of the Medicaid, Medicare, and commercial insurance payments and up to 100% of the Average Commercial Rate.

2.3 FINANCING THE PAYMENT ADJUSTMENTS

The public entities must certify to MDHHS that they will provide the non-federal share of the payment adjustments established by this policy. These public entities must also certify to MDHHS that the financial arrangements used to offset the non-federal share of these Medicaid payment adjustments do not violate Title XIX of the Social Security Act, §1903 Payment to States, Subsection (W) Prohibition on Use of Voluntary Contributions, and Limitation on Use of Provider-Specific Taxes to Obtain Federal Financial Participation Under Medicaid.

No additional state funds are available beyond the amount needed to pay designated providers up to the standard Medicaid fee screens for these services. The non-federal share of the Medicaid payment adjustments is supplied by the public entity through an intergovernmental transfer (IGT) to MDHHS.

2.4 PAYMENT ADJUSTMENT PROCESS

Upon receipt of the provider information from the public entity, MDHHS will generate a report which will include the federal employer identification numbers and utilization data for the providers affected by this policy for each covered period. The public entity must review the report and acknowledge the completeness and accuracy of the report. After receipt of this confirmation, MDHHS will make the payment adjustment. The payment adjustments will be made for the federal employer identification number used to bill Medicaid under the FFS program. The payment adjustments will be processed quarterly. Each quarterly payment adjustment will include a reconciliation that takes into account all claims submitted to MDHHS and paid after the prior Physician Adjustor payment quarter cut-off date.
SECTION 3 – PRIMARY CARE PRACTITIONER SERVICES INCENTIVE PAYMENT

For dates of service on and after January 1, 2015, MDHHS applies an increased payment rate to enrolled providers for primary care services delivered by a physician with a specialty designation of family medicine, general internal medicine, or pediatric medicine and, for dates of service on and after January 1, 2018, physicians with the specialty designation of general practice. The increase applies to a set of designated primary care services.

3.1 PROVIDER ELIGIBILITY [CHANGES MADE 4/1/23]

Physicians with primary specialty designations of family medicine, general internal medicine, pediatric medicine, and general practice may qualify as primary care practitioners for purposes of increased payment. Eligibility for this payment is limited to being board certified or board eligible in one of the three designated primary care specialties as recognized by the American Board of Medical Specialties, American Osteopathic Association, and the American Board of Physician Specialists. Primary care physicians may also be determined eligible by conducting a thorough review of the physician’s practice characteristics as identified through their billing history.

Physician practitioners whose CHAMPS Provider Enrollment profile information reflects that they provide specialty or subspecialty (e.g., cardiology, endocrinology, or oncology, etc.) services are not eligible for the adjusted payment. Providers with multiple subspecialties are also not eligible for the adjusted payment. Exceptions will be made for practitioners who have subspecialty practices in adolescent and geriatric medicine.

Before enhanced payments are made, MDHHS will verify that a practitioner meets the eligibility criteria which are identified as the following:

- Board Certification: A primary care physician who has designated their primary specialty in their CHAMPS enrollment file as one of the eligible specialties and has provided applicable Board certification information will be validated by MDHHS prior to any enhanced payment.
- Board Eligible: A primary care physician who has designated their primary specialty in their CHAMPS enrollment file as one of the eligible specialties and has provided applicable documentation to support board eligibility status is also eligible for the enhanced payment. MDHHS will recognize physicians as board eligible for the period of time as defined by the applicable medical board following completion of their medical residency training program in one of the defined specialties.
- Review of Practice Characteristics: For non-board certified or non-board eligible primary care physicians, MDHHS will review an enrolled practitioner’s billing history for the previous calendar year. At least 60 percent of the physician’s codes paid by Medicaid must be for the evaluation and management (E/M) codes specified in this policy, including the preventive medicine E/M codes. This review of practice characteristics will be done by MDHHS only for providers who have self-attested by designating in their CHAMPS enrollment file that their primary specialty is one of the eligible specialties.
- Non-physician Practitioners: Nurse practitioners (NPs) and physician assistants (PAs) who provide primary care services while working in collaboration with a physician who is one of the designated primary care specialty types may be reimbursed at the enhanced rate. Claims submitted by NPs and PAs must include their own NPI as the rendering provider and the NPI of their supervising/delegating physician. If the collaborating (revised per bulletin MMP 22-33)
A physician has not been identified as an eligible provider for the primary care rate, as verified by CHAMPS enrollment, services performed by the NP or PA will not receive the enhanced rate.

Practitioners delivering primary care services at Federally Qualified Health Centers (FQHCs), Rural Health Clinics (RHCs) and Local Health Departments (LHDs) are not eligible for these enhanced payments. Practitioner services in these settings are reimbursed using a payment methodology designed to reimburse those providers at cost and are made on a facility basis, not specific to the physician’s services.

Practitioners who participate in the MDHHS Physician Adjustor Program are eligible for the primary care practitioner services incentive payment. For these participating providers, MDHHS calculates the Physician Adjustor Program payment adjustment consistent with the existing methodology.

Physicians with primary specialty designations of family medicine, general internal medicine, pediatric medicine, and general practice who are affiliated with Medicaid Health Plans (MHP) are eligible for the primary care practitioner rate increase as identified by their Primary Care Provider status within the MHP network.

### 3.2 Eligible Primary Care Services [Changes Made 4/1/23]

Primary care practitioner services subject to the enhanced primary care rate are defined as Healthcare Common Procedure Coding System (HCPCS) codes:

- 99202 through 99215 for new and established patient office or outpatient evaluation and management (E/M) visits
- 99304 through 99318 for initial, subsequent, discharge and other nursing facility E/M services
- 99324 through 99337 for new and established patient domiciliary, rest home or custodial care E/M services
- 99341 through 99350 for new and established patient home E/M visits
- 99381 through 99397 for new and established patient preventive medicine services
- 99421 through 99423 for online digital E/M services
- 99441 through 99443 for non-face-to-face telephone E/M services *(added per bulletin MMP 22-33)*

### 3.3 Enhanced Rates for Primary Care

For primary care practitioners identified as eligible for the primary care rate, payment will be made on the qualified procedure codes as published in a separate fee schedule as published on the MDHHS website. The Primary Care Fee Schedule reflects rates that have been adjusted in compliance with funding levels established by state law. *(Refer to the Directory Appendix for website information.)*

SECTION 1 – GENERAL INFORMATION

This chapter applies to Independent and Agency Private Duty Nurses.

Private duty nursing (PDN) is a Medicaid benefit when provided in accordance with the policies and procedures outlined in this manual. Providers must adhere to all applicable coverage limitations, policies and procedures set forth in this manual.

PDN is covered for beneficiaries under age 21 who meet the medical criteria in this section. If the beneficiary is enrolled in or receiving case management services from the Habilitation Supports Waiver (the Community Mental Health Services Program) and over 21 years of age, that program authorizes the PDN services.

For a Medicaid beneficiary who is not receiving services from the Habilitation Supports Waiver (the Community Mental Health Services Program), the MDHHS Program Review Division (PRD) reviews the request for authorization and authorizes the services if the medical criteria and general eligibility requirements are met.

For beneficiaries 21 and older, PDN is a waiver service that may be covered for qualifying individuals enrolled in the Habilitation Supports Waiver or MI Choice Waiver. When PDN is provided as a waiver service, the waiver agent must be billed for the services.

Beneficiaries who are receiving PDN services through one Medicaid program cannot seek supplemental PDN hours from another Medicaid Program (i.e., Habilitation Supports Waiver, MI Choice Waiver).

1.1 DEFINITION OF PDN

Private Duty Nursing is defined as nursing services for beneficiaries who require more individual and continuous care, in contrast to part-time or intermittent care, than is available under the home health benefit. These services are provided by a registered nurse (RN), or licensed practical nurse (LPN) under the supervision of an RN, and must be ordered by the beneficiary’s physician. Beneficiaries requiring PDN must demonstrate a need for continuous skilled nursing services, rather than a need for intermittent skilled nursing, personal care, and/or Home Help services. The terms "continuous" and "skilled nursing" are further defined in the Medical Criteria subsection for beneficiaries under age 21.
1.2 Enrollment Requirements

</tbody>
</table>

1.3 Provision of Private Duty Nursing

PDN must be ordered by a physician and provided by a Medicaid enrolled private duty nursing agency, a Medicaid enrolled registered nurse (RN), or a Medicaid enrolled licensed practical nurse (LPN) who is working under the supervision of an RN (per Michigan Public Health Code). It is the responsibility of the LPN to secure the RN supervision.
Supervision of a Medicaid enrolled LPN must be by an RN who has at least one year of experience in any of the following areas:

- Community health nursing,
- Pediatric nursing,
- Maternal and child health nursing, or
- A similar nursing practice.

MDHHS requires an onsite supervisory visit by the supervising RN at least once every two months. The Medicaid enrolled LPN must maintain documentation that identifies the supervising RN.

If a beneficiary’s services are performed exclusively by LPNs, the supervisory RN is responsible for completing a physical assessment for each beneficiary the LPN is caring for, and is required to participate in the development of the beneficiary’s plan of care (POC). The above assessments and supervisory visits are not covered by Medicaid, including when provided by a home health agency.

PDN is not covered when rendered in a hospital or nursing facility, including an intermediate care facility for individuals with intellectual disabilities (ICF/IID) or licensed adult foster care facility (AFC).

PDN is not covered when provided by an RN or LPN who is the beneficiary’s spouse, legally responsible relative, stepparent, adoptive parent, legal guardian, or foster parent.

When more than one agency is authorized to provide PDN for a beneficiary, the hours rendered by each must be reported to the PRD on a monthly basis in order to permit the adjustment of authorized hours as necessary between the providers. Payment cannot be made until all utilized hours are reported. The primary agency on the case (the first agency involved) is responsible for contacting the other PDN provider(s) caring for the beneficiary to obtain the actual number of hours rendered during the preceding month, and must fax the total hours provided by each to the PRD. The authorization letter will detail all PDN providers that are caring for a beneficiary during the authorization period.

### 1.4 PRIOR AUTHORIZATION [CHANGE MADE 7/1/23]

PDN services must be authorized by the PRD, before services are provided. (Refer to the Directory Appendix for contact information.) PDN services are authorized and billed in 15-minute incremental units (1 unit = 15 minutes). Prior authorization of a particular PDN provider to render services considers the following factors:

- Available third party resources.
- Beneficiary/family choice.
- Beneficiary’s medical needs and age.
- The knowledge and appropriate nursing skills needed for the specific case.
- The understanding of the concept and delivery of home care and linkages to relevant services and health care organizations in the area served.

The Private Duty Nursing Prior Authorization – Request for Services form (MSA-0732) must be submitted when requesting PDN for persons with Medicaid coverage before services can begin and at regular
intervals thereafter if continued services are determined to be necessary. A copy of the form is provided in the Forms Appendix and is also available on the MDHHS website. (Refer to the Directory Appendix for website information.) The parent or guardian signature certification on MSA-0372 may be electronically generated. Each MSA-0732 form requires a new electronic signature and date. **(text added per bulletin MMP 23-22)** This form is not to be used for beneficiaries enrolled in the MI Choice Waiver. Private Duty Nursing is not a benefit under CSHCS. Individuals with CSHCS coverage may be eligible for PDN under Medicaid.

The MSA-0732 must be submitted every time services are requested for the following situations:

- for initial services when the beneficiary has never received PDN services under Medicaid, such as following a hospitalization or when there is an increase in severity of an acute or chronic condition;
- for continuation of services beyond the end date of the current authorization period (renewal);
- for an increase in services; or
- for a decrease in services.

Following receipt and review of the MSA-0732 and the required documentation by the PRD, a notice is sent to the PDN provider and beneficiary or primary caregiver, either approving or denying services, or requesting additional information. The provider must maintain this notice in the beneficiary’s medical record. For services that are approved, the Notice of Authorization will contain the prior authorization number and approved authorization dates. It is important to include this PA number on every claim and in all other communications to the PRD.

If a beneficiary receiving PDN continues to require the services after the initial authorization period, a new MSA-0732 must be submitted along with the required documentation supporting the continued need for PDN. This request must be received by the PRD no less than 15 business days prior to the end of the current authorization period. Failure to do so may result in a delay of authorization for continued services which, in turn, may result in delayed or no payment for services rendered without authorization. The length of each subsequent authorization period will be determined by the PRD and will be specific to each beneficiary based on several factors, including the beneficiary’s medical needs and family situation.

MDHHS will not reimburse PDN providers for services that have not been prior authorized. All forms and documentation must be completed according to the procedures provided in this chapter. If information is not provided according to policy (which includes signatures and correct information on the MSA-0732, POC and nursing assessment), requests will be returned to the provider. Authorization cannot be granted until all completed documentation is provided to MDHHS. Corrected submissions will be processed as a new request for PDN authorization and no backdating will occur.

If during an authorization period a beneficiary’s condition changes warranting an increase or decrease in the number of approved units or a discontinuation of services, the provider must report the change to the PRD. (Refer to the Directory Appendix for contact information.) It is important that the provider report all changes as soon as they occur, as well as properly updating the POC. The request to increase or decrease units must be accompanied by an updated and signed POC; and documentation from the attending physician addressing the medical need if the request is for an increase in PDN units.

Often the request to begin services will be submitted by a PDN agency or individual PDN; however, a person other than the PDN provider (such as the hospital discharge planner, CSHCS case manager,
physician, or physician’s staff person) may submit the MSA-0732. When this is the case, the person submitting the request must do so in consultation with the PDN agency or individual PDN who will be assuming responsibility for the care of the beneficiary.

If services are requested for more than one beneficiary in the home, a separate MSA-0732 must be completed for each beneficiary.

When a parent/guardian requests a transfer of care from one PDN provider to another, a completed MSA-0732 must be submitted to the PRD along with signed and dated documentation from the parent/guardian indicating that they are requesting a change in providers. The balance of hours authorized to a previous PDN provider will not be automatically transferred to a new provider. The new PDN provider is responsible for submitting the MSA-0732 to the PRD along with documentation from the parent/guardian requesting a new provider.

The PA number is for private duty nursing only. Any CMHSP prior authorized respite services must be billed to the authorizing CMHSP.

Other services provided in the home by community-based programs may affect the total care needs and the amount of PDN authorized. These other services must be disclosed on the MSA-0732 and documented in the POC. Although the amount of PDN authorized considers the beneficiary’s medical needs and family circumstances, community-based services provided in the home are also part of this assessment. Disclosure is necessary to prevent duplication of services to allow for an accurate calculation of authorized PDN hours. Providers are advised that failure to disclose all community resources in the home may be cause for recoupment of funds.

1.4.A. DOCUMENTATION REQUIREMENTS

The following documentation is required for all PA requests for PDN services and must accompany the MSA-0732:

- Most recent signed and dated nursing assessment, including a summary of the beneficiary’s current status compared to their status during the previous authorization period, completed by a registered nurse;
- Nursing notes for two (2) four-day periods, including one four-day period that reflects the most current medically stable period and another four-day period that reflects the most recent acute episode of illness related to the PDN qualifying diagnosis/condition;
- Most recent updated POC signed and dated by the ordering/managing physician, RN, and the beneficiary's parent/guardian. The POC must support the skilled nursing services requested, and contain dates inclusive of the requested authorization period.

The POC must include:

- Name of beneficiary and Medicaid ID number
- Diagnosis(es)/presenting symptom(s)/condition(s)
- Name, address, and telephone number of the ordering/managing physician
- Frequency and duration of skilled nursing visits, and the frequency and types of skilled interventions, assessments, and judgments that pertain to and support the PDN services to be provided and billed
- Identification of technology-based medical equipment, assistive devices (and/or appliances), durable medical equipment, and supplies
- Other services being provided in the home by community-based entities that may affect the total care needs must be documented.
- List of medications and pharmaceuticals (prescribed and over-the-counter)
- Statement of family strengths, capabilities, and support systems available for assisting in the provision of the PDN benefit (for renewals, submit changes only)

- If the beneficiary was hospitalized during the last authorization period, include documentation related to the PDN qualifying diagnosis/condition, i.e., all hospital discharge summaries, history and physical examination, social worker notes/assessment, consultation reports (pulmonary; ears, nose and throat [ENT]; ventilator clinic; sleep study; etc.), and emergency department reports (if emergency services were rendered during the last authorization period).
- Teaching records pertaining to the education of parents/caregivers on the child’s care.
- Other documentation as requested by MDHHS.

1.4.B. BENEFICIARY ELIGIBILITY

Approval of the MSA-0732 confirms that the service is authorized for the beneficiary. The approval does not guarantee that the beneficiary is eligible for Medicaid. If the beneficiary is not eligible on the date of service, MDHHS will not reimburse the provider for services provided and billed. To assure payment, the provider must verify beneficiary eligibility monthly at a minimum.

1.4.C. RETROACTIVE PRIOR AUTHORIZATION

Services provided before PA is requested will not be covered unless the beneficiary was not Medicaid eligible on the date of service but became eligible retroactively. If the MDHHS eligibility information does not demonstrate retroactive eligibility, then the request for retroactive PA will be denied.

1.5 OTHER INSURANCE

It is the responsibility of the family, private duty nursing agency, RN or LPN to assess, investigate and exhaust all commercial insurance for the beneficiary prior to billing Medicaid. A private duty nursing agency, RN, or LPN should not accept any Medicaid PDN case until it has been determined what, if any, commercial insurance a beneficiary may have.

For any Medicaid case accepted in which the beneficiary has other insurance, the provider must first follow the rules of the other insurance. Such rules may include obtaining a physician's order, obtaining prior authorization, and being a participating provider with the other insurance carrier. Failure to follow the rules of the other insurance may result in nonpayment from Medicaid.
If a beneficiary’s commercial insurance does not cover PDN, the PDN agency, RN or LPN must inform the PRD prior to billing MDHHS. (Refer to the Directory Appendix for contact information.) A copy of the letter of explanation or explanation of benefits (EOB) must be kept in the beneficiary’s medical record. Once it has been established that the commercial insurance does not cover PDN, a letter of explanation or EOB is valid as long as the insurance coverage remains unchanged. On an annual basis, the policyholder and provider should confirm with the commercial insurance that PDN coverage has not changed.

(Refer to the Coordination of Benefits Chapter of this manual for additional information.)

1.6 GENERAL ELIGIBILITY REQUIREMENTS

The beneficiary is eligible for PDN coverage when all of the following requirements are met:

- The beneficiary is eligible for Medicaid in the home/community setting (i.e., in the noninstitutional setting).
- The beneficiary is under the age of 21 and meets the medical criteria for PDN.
- PDN is appropriate, considering the beneficiary’s health and medical care needs.
- PDN can be provided safely in the home setting.
- The beneficiary, his family (or guardian), the beneficiary’s physician, the Medicaid case manager, and RN (i.e., from the PDN agency or the Medicaid enrolled RN, or the supervising RN for the Medicaid enrolled LPN) have collaborated and developed an integrated POC that identifies and addresses the beneficiary’s need for PDN. The PDN must be under the direction of the beneficiary’s physician; the physician must prescribe/order the services. The POC must be signed and dated by the beneficiary’s physician, RN (as described above), and by the beneficiary or beneficiary’s parent/guardian. The POC must be updated at least annually or more frequently as needed based on the beneficiary’s medical needs.

1.7 BENEFIT LIMITATIONS

The purpose of the PDN benefit is to assist the beneficiary with medical care, enabling the beneficiary to remain in their home. PDN is intended as a transitional benefit to support and teach family members to function as independently as possible. Authorized hours will be modified as the beneficiary’s condition and living situation stabilizes or changes. A decrease in hours will occur, for example, after a child has been weaned from a ventilator or after a long term tracheostomy no longer requires frequent suctioning, etc. The benefit is not intended to supplant the caregiving responsibility of parents, guardians, or other responsible parties (e.g., foster parents). There must be a primary caregiver (i.e., parent, guardian, significant other adult) who resides with a beneficiary under the age of 18, and the caregiver must provide a monthly average of a minimum of eight hours of care during a typical 24-hour period. The calculation of the number of units authorized per month includes eight hours or more of care that will be provided by the caregiver during a 24-hour period, which are then averaged across the time authorized for the month. The caregiver has the flexibility to use the monthly-authorized units as needed during the month. Substantial alterations to the scheduled allotment of daily PDN hours due to family choice (i.e., vacations) unrelated to medical need or emergent circumstances require advance notice to the PRD. The remaining balance of authorized hours will not be increased to cover this type of utilization. Authorized time cannot be carried over from one authorization period to another.
The time a beneficiary is under the supervision of another entity or individual (e.g., in school, in day/child care, in work program) cannot be used to meet the eight hours of obligated care as discussed above, nor can the eight hours of care requirement for beneficiaries under age 18 be met by other public funded programs (e.g., MDHHS Home Help Program) or other resources for hourly care (e.g., private health insurance, trusts, bequests, private pay).

PDN providers are encouraged to work with families to assist in developing a backup plan for care of their child in the event that a PDN shift is delayed or cancelled, and the parent/guardian is unable to provide care. The parent/guardian is expected to arrange backup caregivers that they will notify, and the parent/guardian remains responsible for contacting these backup caregivers when necessary.

1.8 SERVICE LOG

If PDN is prior approved and care is initiated, a detailed log for each date of service must be maintained. The service log must be beneficiary specific, with the beneficiary's name and birth date in the header portion of the document and must clearly identify the specific time worked by each PDN in the home and for each date of service. In cases where the nurse is caring for two or more beneficiaries in the same home, a separate service log for each beneficiary must be maintained. This log must be kept in the beneficiary's record and may be documented in electronic or paper format. The medical record itself or nursing flow sheets containing other information are not considered a service log for the purposes of this policy. Failure to maintain a log or to submit this information to MDHHS upon request may result in recoupment of PDN reimbursement.

The following service log provides an example of the required fields.

<table>
<thead>
<tr>
<th>Name</th>
<th>Date of Service</th>
<th>Start Time</th>
<th>Stop Time</th>

</tr>
</tbody>
</table>

PDN agencies should refer to the Billing & Reimbursement for Institutional Providers chapter for instructions on claim completion and requirements for the processing of claims. Medicaid-enrolled Registered Nurses (RN) or Licensed Practical Nurses (LPN) should refer to the Billing & Reimbursement for Professionals Chapter for instructions on claim completion and requirements for the processing of claims.

Each signature must be accompanied by a date. The date of the nurse's signature must be the same as the date of service. The date of the parent/caregiver signature should be within one week of the date of service. A claim must not be submitted before the service log is completed for those dates of service.
1.9 CLINICAL RECORD

In addition to the Service Log, the provider must maintain clinical records as detailed in the General Information for Providers Chapter of this manual. The clinical record must be sufficiently documented to allow another professional to reconstruct what transpired during each hour of nursing service and billed to Medicaid in 15-minute incremental units.

1.10 PDN IN CONJUNCTION WITH HOME HELP OR PERSONAL CARE SERVICES

If the beneficiary receiving PDN demonstrates a need for personal care or Home Help services in addition to PDN, there must be coordination between the delivery of personal care or Home Help services and the PDN services, as well as documentation in the POC to verify there is no duplication of services.

1.11 HOLIDAYS

MDHHS allows additional reimbursement for holidays. Currently recognized holidays are: New Year’s Day, Easter, Memorial Day, July 4th, Labor Day, Thanksgiving and Christmas Day.

A holiday begins at 12:00 a.m. and ends at 12:00 midnight of that holiday day.

1.12 MILEAGE

Staff mileage to the beneficiary’s home is covered as a part of the PDN service and may not be billed separately.

1.13 CARING FOR MORE THAN ONE PATIENT AT A TIME

For ratios of more than two patients per nurse, the provider must contact the entity authorizing the beneficiary’s PDN services: Children’s Waiver (the Community Mental Health Services Program), Habilitation Supports Waiver (the Community Mental Health Services Program), Home and Community-Based Services Waiver for the Elderly and Disabled (MI Choice Waiver) or the PRD. These ratios are considered exceptional cases and require prior approval.

When two Medicaid beneficiaries less than 21 years of age reside in the same home and require PDN services, one nurse will be authorized to provide care for both individuals. (The PDN rate is adjusted to accommodate this ratio.) In the event of an exceptional and emergent circumstance, a ratio of 1:1 nursing will be authorized for a limited period of time when two PDN beneficiaries reside in the same home. During this time period, PDN services must be reassessed on at least a monthly basis, documented in the POC, and submitted to the PDN authorizing entity to demonstrate the need for continuation of 1:1 nursing services. The POC must document efforts being made to wean the beneficiaries from 1:1 care.

A PDN authorized to provide services to two children at the same location may find that, at times, only one child is present to receive services. This may occur when one child is in school, at a medical appointment, hospitalized, or on a family outing. The beneficiary record must document why only one child was present to receive services, as well as the beginning and ending time of the services. (Refer to the appropriate Billing and Reimbursement chapter for billing instructions.)
1.14 BILLING FOR PRIVATE DUTY NURSING

For billing instructions, nurses should refer to the Billing & Reimbursement for Professionals Chapter of this manual and agencies should refer to the Billing & Reimbursement for Institutional Providers Chapter of this manual.
SECTION 2 — CARE REQUIREMENTS

2.1 PLAN OF CARE

A written plan of care (POC) guides all services provided to the beneficiary by the PDN provider. The POC identifies and addresses the beneficiary's need for PDN. The POC and the process for developing it reflect the beneficiary's and family's basic rights of self-determination and autonomy.

- Family members and the beneficiary (as appropriate to his maturity) participate in developing the POC. They are provided with accurate information and support appropriate to informed decision-making. They must give informed consent for the planned services by signing and dating the POC annually and when updating the POC as needed based on the beneficiary's medical needs.
- Beneficiary/family strengths, including cultural and ethnic identity, are respected and utilized in the delivery of care. Services delivered in the home accommodate beneficiary/family life activities.
- The plan includes goals directed toward increasing beneficiary/family capability, effectiveness, and control.
- The plan includes compensatory services to support the growth and developmental potential of each beneficiary, given his disability or illness.
- Appointments are coordinated and services are scheduled with the goals of minimizing inconvenience to the beneficiary/family, and of facilitating the family's participation in the beneficiary's care.
- If the services are provided by LPNs, the POC must identify the frequency of the supervisory RN visits.

The written POC must be retained in the beneficiary's medical record.

2.2 SUSPECTED ABUSE/NEGLECT

If there is reasonable cause to suspect that a beneficiary may be in danger of abuse, neglect, exploitation, cruelty, or other hazards, the PDN must report the suspected abuse to the Adult or Child Protective Services Unit of the local MDHHS office. (Refer to the General Information for Providers Chapter of this manual for additional information.)

2.3 MEDICAL CRITERIA

To qualify for PDN, the beneficiary must meet the medical criteria of either I and III below or II and III below:
Medical Criteria I

The beneficiary is dependent daily on technology-based medical equipment to sustain life. "Dependent daily on technology-based medical equipment" means:

- Mechanical ventilation four or more hours per day, or assisted respiration does not automatically include ventilation through Bi-level Positive Airway Pressure (Bi-PAP) or Continuous Positive Airway Pressure (CPAP). Use of these devices to satisfy this criteria will be evaluated on a case-by-case basis; or
- Oral or tracheostomy suctioning 8 or more times in a 24-hour period; or
- Nasogastric tube feedings or medications when removal and insertion of the nasogastric tube is required, associated with complex medical problems or medical fragility; or
- Total parenteral nutrition delivered via a central line, associated with complex medical problems or medical fragility; or
- Continuous oxygen administration, in combination with a pulse oximeter and a documented need for observations and adjustments in the rate of oxygen administration.

Medical Criteria II

Frequent episodes of medical instability within the past three to six months, requiring skilled nursing assessments, judgments or interventions as described in III below, due to a substantiated progressively debilitating physical disorder.

- "Frequent" means at least 12 episodes of medical instability related to the progressively debilitating physical disorder within the past six months, or at least six episodes of medical instability related to the progressively debilitating physical disorder within the past three months;
- "Medical instability" means emergency medical treatment in a hospital emergency room or inpatient hospitalization related to the underlying progressively debilitating physical disorder;
- "Emergency medical treatment" means covered inpatient and outpatient services that are furnished by a provider who is qualified to furnish such services and which are needed to evaluate or stabilize an emergency medical condition. "Emergency medical condition" means a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain) such that a prudent layperson who possesses an average knowledge of health and medicine could reasonably expect the absence of immediate medical attention to place the health of the individual in serious jeopardy, serious impairment to bodily functions, or serious dysfunction of any bodily organ or part.
- "Progressively debilitating physical disorder" means an illness, diagnosis, or syndrome that results in increasing loss of function due to a physical disease process, and that has progressed to the point that continuous skilled nursing care (as defined in III below) is required; and
- "Substantiated" means documented in the clinical/medical record, including the nursing notes.

For beneficiaries described in II, the requirement for frequent episodes of medical instability is applicable only to the initial determination of medical necessity for PDN. Determination of continuing eligibility for PDN for beneficiaries defined in II is based on the original need for skilled nursing assessments, judgments, or interventions as described in III below.
Medical Criteria III

The beneficiary requires continuous skilled nursing care on a daily basis during the time when a licensed nurse is paid to provide services.

- "Continuous" means at least once every three hours throughout a 24-hour period, and/or when delayed interventions may result in further deterioration of health status, in loss of function or death, in acceleration of the chronic condition, or in a preventable acute episode.
- Equipment needs alone do not create the need for skilled nursing services.
- "Skilled nursing" means assessments, judgments, interventions, and evaluations of interventions requiring the education, training, and experience of a licensed nurse. Skilled nursing care includes, but is not limited to, performing assessments to determine the basis for acting or a need for action; monitoring fluid and electrolyte balance; suctioning of the airway; injections; indwelling central venous catheter care; managing mechanical ventilation; oxygen administration and evaluation; and tracheostomy care.

2.4 Determining Intensity of Care and Maximum Amount of PDN

As part of determining the maximum amount of PDN a beneficiary is eligible for, his Intensity of Care category must be determined. This is a clinical judgment based on the following factors:

- The beneficiary's medical condition;
- The type and frequency of needed nursing assessments, judgments and interventions; and
- The impact of delayed nursing interventions.

Equipment needs alone do not determine intensity of care. Other aspects of care (e.g., administering medications) are important when developing a plan for meeting the overall needs of the beneficiary, but do not determine the number of hours of nursing for which the beneficiary is eligible.

Medicaid uses the "Decision Guide for Establishing Maximum Amount of Private Duty Nursing to be Authorized on a Daily Basis" (below) to establish the amount of PDN that is approved. The Decision Guide is used to determine the appropriate range of nursing hours (prior authorized and billed in 15-minute increments) that can be authorized under the Medicaid PDN benefit and defines the "benefit
There is a "time limitation" for individual beneficiaries. The Decision Guide is used by the authorizing entity after it has determined the beneficiary meets both general eligibility requirements and medical criteria as stated above. The amount of PDN (i.e., the time) that can be authorized for a beneficiary is based on several factors, including the beneficiary's care needs which establish medical necessity for PDN, the beneficiary's and family's circumstances, and other resources for daily care (e.g., private health insurance, trusts, bequests, private pay). To illustrate, the number of hours covered by private health insurance is subtracted from the hours approved under Medicaid PDN. These factors are incorporated into the Decision Guide. The higher number in the range is considered the maximum number of hours that can be authorized. Except in emergency circumstances, Medicaid does not approve more than the maximum hours indicated in the guide.

Only those factors that influence the maximum number of hours that can be authorized are included on this decision matrix. Other factors (e.g., additional dependent children, additional children with special needs, and required nighttime interventions) that impact the caregiver's availability to provide care should be identified during an assessment of service needs. These factors have implications for service planning and should be considered when determining the actual number of hours (within the range) to authorize.

### Decision Guide for Establishing Maximum Amount of Private Duty Nursing to be Authorized on a Daily Basis

<td>Significant health issues</td>
</tr>
<tr>
<td></td>
<td>Some health issues</td>
</tr>
<tr>
<td>Factor III - School *</td>
<td>Beneficiary attends school 25 or more hours per week, on average</td>
</tr>
</tbody>
</table>

* Factor III limits the maximum number of hours which can be authorized for a beneficiary:
  - Of any age in a center-based school program for more than 25 hours per week; or
  - Age six and older for whom there is no medical justification for a homebound school program.

In both cases, the lesser of the maximum "allowable" for Factors I and II, or the maximum specified for Factor III, applies.
When using the Decision Guide, the following definitions apply:

- "Caregiver": legally responsible person (e.g., birth parents, adoptive parents, spouses), paid foster parents, guardian or other adults who are not legally responsible or paid to provide care but who choose to participate in providing care.
- "Full-time (F/T)": working at least 30 hours per week for wages/salary, or attending school at least 30 hours per week.
- "Part-time (P/T)": working at least 15 hours per week for wages/salary, or attending school at least 15 hours per week.
- "Significant" health issues: one or more primary caregiver(s) has a health or emotional condition that prevents the caregiver from providing care to the beneficiary (e.g., beneficiary weighs 70 pounds and has no mobility and the primary caregiver just had back surgery and is in a full-body cast).
- "Some" health issues: one or more primary caregiver(s) has a health or emotional condition, as documented by the caregiver’s treating physician, that interferes with, but does not prevent, provision of care (e.g., caregiver has lupus, alcoholism, depression, back pain when lifting, lifting restrictions, etc.).
- "School" attendance: The average number of hours of school attendance per week is used to determine the maximum number of hours that can be authorized for the individual of school age. The average number of hours is determined by adding the number of hours in school plus transportation time. Authorization of PDN hours will not automatically be increased during breaks from school (vacations) or adjusted beyond the limits of factors I and II.

The Local School District (LSD) or Intermediate School District (ISD) is responsible for providing such "health and related services" as necessary for the student to participate in his education program. Unless medically contraindicated, individuals of school age should attend school. Factor III applies when determining the maximum number of hours to be authorized for an individual of school age. The Medicaid PDN benefit cannot be used to replace the LSD’s or ISD’s responsibility for services (either during transportation to/from school or during participation in the school program) or when the child would typically be in school but for the parent’s choice to home-school the child.

2.5 Exception Process

Because each beneficiary and his family are unique and because special circumstances arise, it is important to maintain an exception process to ensure the beneficiary’s safety and quality of care. PDN services that exceed the beneficiary’s benefit limitation, as established by the Decision Guide, must be prior authorized by the appropriate Medicaid case management program. Limited authority to exceed the published PDN benefit limitations may be granted on a time-limited basis as detailed below.

The beneficiary or his primary care giver must initiate the request for an exception. The applicable Medicaid case management program’s representative is responsible for facilitating the request and documenting the necessity for an exception. Factors underlying the need for additional PDN must be identified in the beneficiary’s POC, which must include strategies directed toward resolving the factors necessitating the exception, if applicable. Documentation must substantiate all of the following:
- Current medical necessity for the exception;
- Current lack of natural supports required for the provision of the needed level of support; and
- Additional PDN services are essential to the successful implementation of the beneficiary’s written POC, and are essential to maintain the beneficiary within the least restrictive, safe, and humane environment suitable to his condition.

Exceptions are time-limited and must reflect the increased identified needs of the beneficiary. Consideration for an exception is limited to situations outside the beneficiary’s or family’s control that place the beneficiary in jeopardy of serious injury or significant deterioration of health status. Exceptions may be considered for either of the following general situations:

<table>
<thead>
<tr>
<th>A temporary alteration in the beneficiary’s care needs following a hospitalization, resulting in one or both of the following:</th>
<th>The temporary inability of the primary caregiver(s) to provide required care as the result of one of the following:</th>
</tr>
</thead>
</table>
| - A temporary increase in the intensity of required assessments, judgments, and interventions.  
- A temporary need for additional training to enable the primary caregiver(s) to identify and meet the beneficiary’s care needs.  
The total number of additional PDN hours cannot exceed two hours per day, for a maximum of six months. | - An acute illness or injury of the primary caregiver(s). The total number of additional PDN hours cannot exceed two hours per day for the duration of the caregiver’s inability, not to exceed six months. In the event there is only one caregiver living in the home and that caregiver is hospitalized, a maximum of 24 hours per day can be authorized for each day the caregiver is hospitalized.  
- The death of the primary caregiver(s) or an immediate family member. "Immediate family member" is defined as the caregiver’s spouse, partner, parent, sibling, or child. The maximum number of hours allowable under this exception criterion is 24 hours per day for a maximum of seven days.  
- The home environment has been determined to be unstable, as evidenced by MDHHS protective or preventive services involvement.  
The written POC and community-based care coordination activities must include strategies directed toward stabilizing service supports and/or the family situation. The maximum number of hours varies by the beneficiary’s Intensity of Care category: High = maximum of 18 hours per day; Medium = maximum of 14 hours per day; Low = maximum of 10 hours per day. The length of time for this exception is three months or the time needed to stabilize service supports and/or family situation, whichever is less. A one-time extension of up to three months may be made if there is documented progress toward achieving the stabilized home environment. |
2.6 CHANGE IN BENEFICIARY’S CONDITION/PDN AS A TRANSITIONAL BENEFIT

Medicaid policy requires that the integrated POC be updated as necessary based on the beneficiary's medical needs. Additionally, when a beneficiary's condition changes, warranting a decrease in the number of approved hours or a discontinuation of services, the provider must report the change to the appropriate authorizing agent (i.e., the PRD, Children's Waiver, or Habilitation Supports Waiver) in writing. Changes such as weaning from a ventilator or tracheostomy decannulation can occur after months or years of services, or a beneficiary's condition may stabilize to the point of requiring fewer PDN hours or the discontinuation of hours altogether. It is important that the provider report all changes resulting in a decrease in the number of hours to the authorizing agent as soon as they occur, as well as properly updating the POC. MDHHS will seek recovery of monies inappropriately paid to the provider if, during case review, the authorizing agent determines that a beneficiary required fewer PDN hours than was provided and MDHHS was not notified of the change in condition.

In some cases, the authorized PDN services may be considered a transitional benefit. In cases such as this, one of the primary reasons for providing services should be to assist the family or caregiver(s) to become independent in the care of the beneficiary. The provider, in collaboration with the family or caregiver(s), may decide that the authorized number of hours should be decreased gradually to accommodate increased independence on the part of the family, caregiver(s), and/or beneficiary. A detailed exit plan with instructions relating to the decrease in hours and possible discontinuation of care should be documented in the POC. The provider must notify the authorizing agent that hours are being decreased and/or when the care will be discontinued.

2.7 HOSPICE SERVICES

If a beneficiary receiving private duty nursing (PDN) becomes eligible for hospice, the hospice is required to notify the PRD before a claim is submitted for the services. (Refer to the Directory Appendix for contact information.)

The hospice must provide the following information on agency letterhead to the PRD.

- beneficiary name and Medicaid ID number;
- a request for a case review and approval of hospice services;
- a statement confirming that the beneficiary has been certified terminally ill with six months or less to live, signed by the hospice medical director and the beneficiary’s attending physician; and
- name, e-mail address, and telephone number of the contact person.

PRD staff may request additional medical record documentation for their review. PDN authorization cannot occur unless the hospice submits the requested documentation to the PRD. If services are approved, the hospice must work with the PDN agency to develop a coordinated POC. Both the hospice and PDN staff must ensure that duplication of services does not occur. While hospice maintains the lead in coordinating the services, the PDN agency must continue to obtain prior authorization from MDHHS for the PDN services. Hospice services must be utilized to the fullest extent before PDN services will be authorized.
This does not apply to beneficiaries receiving PDN services under the Habilitation Supports Waiver (HSW) and over 21 years old, or the MI Choice Waiver. For beneficiaries under the HSW (over 21 years old), providers should contact the beneficiary's case manager to inform them of hospice eligibility. If the beneficiary is under the MI Choice Waiver, providers should contact the MI Choice Waiver Supports Coordinator.

SECTION 1 – GENERAL INFORMATION

The Program of All-Inclusive Care for the Elderly (PACE) is an innovative model of community-based care that enables elderly individuals, who are certified by their state as needing nursing facility care, to live as independently as possible.

PACE provides an alternative to traditional nursing facility care by offering pre-paid, capitated, comprehensive health care services designed to meet the following objectives:

- Enhance the quality of life and autonomy for frail, older adults;
- Maximize the dignity of, and respect for, older adults;
- Enable frail, older adults to live in the community as long as medically and socially feasible; and
- Preserve and support the older adult’s family unit.

The PACE capitated benefit was authorized by the federal Balanced Budget Act of 1997 and features a comprehensive service delivery system with integrated Medicare and Medicaid financing.

An interdisciplinary team, consisting of professional and paraprofessional staff, assesses beneficiary needs, develops a plan of care, and monitors delivery of all services (including acute care services as well as nursing facility services, when necessary) within an integrated system for a seamless provision of total care. Typically, PACE organizations provide social and medical services in an adult day health center supplemented by in-home and other services as needed.

The financing model combines payments from Medicare and Medicaid, allowing PACE organizations to provide all needed services rather than be limited to those reimbursable under the Medicare and Medicaid fee-for-service systems. PACE organizations assume full financial risk for beneficiary care without limits on amount, duration, or scope of services.

Physicians currently treating Medicaid patients who are in need of nursing facility care may consider PACE as an option. Hospital discharge planners may also identify suitable candidates for referral to PACE as an alternative to a nursing facility. (Refer to the Directory Appendix for PACE contact information.)
SECTION 2 – SERVICES

The PACE organization becomes the sole source of services for Medicare and Medicaid beneficiaries who choose to enroll in a PACE organization.

The PACE organization is able to coordinate the entire array of services to older adults with chronic care needs while allowing elders to maintain independence in the community for as long as possible. The PACE service package must include all Medicare and Medicaid covered services, in addition to other services determined necessary by the interdisciplinary team for the individual beneficiary. Services must include, but are not limited to:

- Adult day care that offers nursing, physical, occupational and recreational therapies, meals, nutritional counseling, social work and personal care
- All primary medical care provided by a PACE physician familiar with the history, needs and preferences of each beneficiary, all specialty medical care, and all mental health care
- Interdisciplinary assessment and treatment planning
- Home health care, personal care, homemaker and chore services
- Restorative therapies
- Diagnostic services, including laboratory, x-rays, and other necessary tests and procedures
- Transportation for medical needs
- All necessary prescription drugs and any authorized over-the-counter medications included in the plan of care
- Social services
- All ancillary health services, such as audiology, dentistry, optometry, podiatry, speech therapy, prosthetics, durable medical equipment, and medical supplies
- Respite care
- Emergency room services, acute inpatient hospital and nursing facility care when necessary
- End-of-Life care
SECTION 3 – ELIGIBILITY AND ENROLLMENT

3.1 ELIGIBILITY REQUIREMENTS

To be eligible for PACE enrollment, applicants must meet the following requirements:

- Be age 55 years or older.
- Meet applicable Medicaid financial eligibility requirements. (Eligibility determinations will be made by the Michigan Department of Health and Human Services (MDHHS).)
- Reside in the PACE organization’s service area.
- Be capable of safely residing in the community without jeopardizing health or safety while receiving services offered by the PACE organization.
- Receive a comprehensive assessment of participant needs by an interdisciplinary team.
- A determination of functional/medical eligibility based upon the online version of the Michigan Medicaid Nursing Facility Level of Care Determination (LOCD) that was conducted online within fourteen (14) calendar days from the date of enrollment into the PACE organization.
- Be provided timely and accurate information to support Informed Choice for all appropriate Medicaid options for Long Term Care.
- Not concurrently enrolled in the MI Choice program.
- Not concurrently enrolled in an HMO.

3.2 COMPLETION OF THE MEDICAID NURSING FACILITY LOC DETERMINATION

A PACE applicant’s eligibility for coverage of nursing facility services and enrollment in the PACE organization is determined by the online application of the Michigan Medicaid Nursing Facility Level of Care Determination (LOCD). The PACE organization will not be reimbursed for nursing facility services rendered when the applicant is determined not to meet the LOCD criteria. Providers must submit the LOCD information into its online version no later than fourteen (14) calendar days following the start of services. Instructions and required forms related to the completion of the Medicaid Nursing Facility Level of Care Determination are available on the MDHHS website. (Refer to the Directory Appendix for website information.)

The LOCD must be completed by a health professional (physician, registered nurse, licensed practical nurse, clinical social worker (BSW or MSW), or physician assistant) representing the proposed provider. Nonclinical staff may perform the evaluation when clinical oversight by a professional is performed. The PACE organization will be held responsible for enrolling only those participants who meet the criteria outlined in this section.
The Michigan Medicaid Nursing Facility Level of Care Determination must be completed using the online version in the following situations:

- all new enrollments of Medicaid-eligible beneficiaries.
- re-enrollment of Medicaid-eligible beneficiaries.
- significant change in condition of a current PACE Medicaid-eligible beneficiary.

The online LOCD must be completed only once for each admission or readmission to the program.

3.3 INFORMED CHOICE

When a beneficiary is determined eligible for nursing facility level of care through completion of the online LOCD, he must be provided timely and accurate information to support informed choice for all appropriate Medicaid options for long-term care.

Process Guidelines available on the MDHHS website define the required process. (Refer to the Directory Appendix for website information.)

3.4 NURSING FACILITY LEVEL OF CARE EXCEPTION PROCESS - EXCEPTION REVIEW

A Nursing Facility (NF) Level of Care (LOC) Exception Process is a review that is available for financially eligible beneficiaries who have demonstrated a significant level of long-term care need but do not meet the LOCD. The NF LOC Exception Process is initiated when the PACE organization telephones the MDHHS designee and requests the NF LOC Exception Review on the date that the applicant was determined ineligible based on the online version of the LOCD. The NF LOC Exception criteria and information on how to request an Exception Review is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

3.5 TELEPHONE INTAKE GUIDELINES

The Telephone Intake Guidelines are questions that identify potential PACE participants for further assessment. The Telephone Intake Guidelines do not determine program eligibility. Use of the Telephone Intake Guidelines is at the discretion of the PACE organization. The guidelines are available on the MDHHS website. (Refer to the Directory Appendix for website information.)

3.6 DEEMING PROCESS

MDHHS may deem a participant who no longer meets the State Medicaid nursing facility level of care requirements to continue to be eligible for the PACE program if, in the absence of continued coverage under the program, MDHHS determines the participant reasonably would be expected to meet the nursing facility level of care requirement in the next six months.

To be eligible for deeming, a participant must meet the following requirements:

- Participant must have been receiving PACE services for at least the past six months and no longer than one year.
- Participant no longer meets nursing facility level of care requirements.
In the absence of continued coverage under PACE, the participant reasonably would be expected to meet the nursing facility level of care requirement in the next six months.

When a deemed PACE participant has been in the program for one year, the PACE organization must conduct an in-person annual reassessment to determine if the participant meets nursing facility level of care.

### 3.7 Enrollment and Disenrollment

PACE provider staff must submit PACE enrollment and disenrollment forms electronically within the Community Health Automated Medicaid Processing System (CHAMPS) by the end of card cut-off.

#### 3.7.A. Enrollments

PACE providers must upload and submit the following signed enrollment materials with the electronic enrollment.

- Enrollment Agreement Benefits and Coverages
- Nursing Facility Level of Care Freedom of Choice Form
- If necessary, Durable Power of Attorney (DPOA) or guardianship documents

Once completed and all eligibility requirements have been checked, CHAMPS will assign the participant a PET code and enrollment start date.

#### 3.7.B. Disenrollments

<table>
<thead>
<tr>
<th>Voluntary</th>
<th>A signed disenrollment form must be uploaded to CHAMPS.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Involuntary</td>
<td>Once the electronic form has been completed, PACE providers will submit appropriate supporting documentation to their MDHHS contract manager. MDHHS will review and approve or deny the electronic disenrollment in CHAMPS and determine the appropriate date of disenrollment.</td>
</tr>
<tr>
<td>Death</td>
<td>Providers will enter the date of death with the electronic disenrollment. A completed disenrollment will end-date the corresponding PET code.</td>
</tr>
</tbody>
</table>

### 3.8 Annual Recertification

MDHHS must annually certify that PACE participants continue to meet PACE financial eligibility requirements. PACE organizations must also ensure that participants continue to meet the LOCD criteria on an ongoing basis. If the participant continues to meet the LOCD criteria, it must be demonstrated in the medical record by way of initial comprehensive assessments, reassessments and progress notes. Additional online LOCDs are not conducted for the purpose of determining ongoing LOCD eligibility.
If the PACE participant no longer meets the LOCD criteria, federal regulations may deem the participant to be eligible for the PACE program until the next annual reevaluation if, in the absence of continued coverage under PACE, the participant reasonably would be expected to again meet the nursing facility level of care criteria within the next six months.

3.9 RETROSPECTIVE REVIEW AND MEDICAID RECOVERY

At random and whenever indicated, MDHHS will perform retrospective reviews to validate the Michigan Medicaid Nursing Facility Level of Care Determination. If the participant is found to be ineligible for PACE services, MDHHS will recover all Medicaid payments made for PACE services rendered during the period of ineligibility. The Retrospective Review process (defined in the Beneficiary Eligibility and Admission Process Section of the Nursing Facility Coverages Chapter) is applicable to PACE organizations.

3.10 ADVERSE ACTION NOTICE

When the provider determines that the beneficiary does not qualify for services based on the Michigan Medicaid Nursing Facility Level of Care Determination, the organization must immediately issue an adverse action notice to the beneficiary or his authorized representative. The action notice must include all of the language of the sample letters for long term care. Copies of the letters are available on the MDHHS website. (Refer to the Directory Appendix for website information.)

As with any benefit denial, the beneficiary may request an administrative hearing. The Michigan Office of Administrative Hearings and Rules (MOAHR) Policies and Procedures Manual explains the process by which each different case is brought to completion. The manual is available for review on the MDHHS website. (Refer to the Directory Appendix for MOAHR contact and website information.)

3.11 NURSING FACILITY LEVEL OF CARE PROCESS - IMMEDIATE REVIEW UPON ISSUANCE OF AN ADVERSE ACTION NOTICE

The MDHHS designee may conduct a Nursing Facility (NF) Level of Care (LOC) Process Immediate Review for a Medicaid pending/eligible beneficiary who was determined functionally/medically ineligible based on the online Michigan Medicaid Nursing Facility Level of Care Determination. The beneficiary, or their representative, must request an Immediate Review before noon of the first working day after the date of receipt of the notice as follows:

- The MDHHS designee will request the PACE organization to provide medical documentation by close of business of the first business day after the date the beneficiary requests an Immediate Review.
- The MDHHS designee will review the medical documentation, obtain information from the beneficiary and/or their representative, and notify the beneficiary and the provider of the determination within three business days of receipt of the medical documentation.

The beneficiary (or representative) may still request an MDHHS appeal of the Michigan Medicaid Nursing Facility Level of Care Determination. (Refer to the Directory Appendix for contact information.)
3.12 FREEDOM OF CHOICE

When an applicant has been determined eligible for nursing facility level of care through completion of the online LOCD, the beneficiary must be informed of his benefit options and elect to receive services in a specific program. This election must take place prior to initiating PACE services.

The applicant (or legal representative) must be informed of the following:

- services available under PACE
- services available in other community settings, such as the MI Choice Program
- services available through Medicaid-reimbursed nursing facilities

If applicants are interested in nursing facility or MI Choice Program care, the PACE organization must provide appropriate referral information using the Access Guidelines to Medicaid Services for Persons with Long Term Care Needs. These guidelines are available on the MDHHS website. (Refer to the Directory Appendix for website information.)

Applicants must acknowledge that they have been informed of their program options in writing by signing the Freedom of Choice form that is witnessed by the applicant's representative when appropriate. A copy of the completed form for non-participants must be retained for a period of three years. The completed form must be kept in the medical record if the applicant chooses to receive PACE services.

A copy of the Freedom of Choice form is included with the Michigan Medicaid Nursing Facility Level of Care Determination on the MDHHS website. (Refer to the Directory Appendix for website information.)

3.13 APPLICANT APPEALS

3.13.A. FINANCIAL ELIGIBILITY

A determination that an applicant is not financially eligible for Medicaid is an adverse action. Applicants may appeal to MDHHS. (Refer to the Directory Appendix for contact information.)

3.13.B. FUNCTIONAL/MEDICAL ELIGIBILITY

A determination that a beneficiary is not functionally/medically eligible for PACE services is an adverse action. If the beneficiary and/or representative disagrees with this determination, they have the right to request an administrative hearing before an administrative law judge. Information regarding the appeal process may be found on the MOAHR website. (Refer to the Directory Appendix for website information.)

3.13.C. PACE SERVICES

Noncoverage or nonpayment of services by the PACE organization for a beneficiary enrolled in PACE is an adverse action. If the beneficiary and/or representative disagrees with the noncoverage or nonpayment of services by the PACE organization, they have the right to request an administrative hearing before an administrative law judge. Information regarding the appeal process may be found on the MOAHR website. (Refer to the Directory Appendix for website information.) The beneficiary may request
continuation of the disputed service with the understanding that he may be liable for the cost of the disputed service if the determination is not made in his favor.

### 3.14 Provider Appeals

A Retrospective Review of the Michigan Medicaid Nursing Facility Level of Care Determination that results in a denial is an Adverse Action for PACE when MDHHS proposes to recover payments made for services rendered to the beneficiary for whom the Retrospective Review was conducted. If the PACE organization disagrees with the MDHHS Adverse Action Notice, the PACE organization may appeal if their written request is received by MOAHR within 30 calendar days from the date of the MDHHS Adverse Action Notice.

Information regarding the MDHHS appeal process is available in the General Information for Providers Chapter and on the MDHHS website. (Refer to the Directory Appendix for website information.)
SECTION 4 – PACE ORGANIZATION EVALUATION CRITERIA

4.1 INITIAL APPLICATIONS [CHANGE MADE 4/1/23]

Initial applications are for applicants seeking to become a PACE organization for the first time.

A prospective PACE organization can be a not-for-profit or for profit private or public entity that is primarily engaged in providing PACE services and participates in both Medicare and Medicaid. Michigan licensure as a health care entity is not required; however, unlicensed entities may only serve Medicare and Medicaid beneficiaries. Federal regulations (42 CFR Part 460) describe administrative requirements for PACE. At a minimum, prospective entities must meet the federal requirements for PACE organizations to enroll as a Michigan Medicaid provider and complete a feasibility study. Prospective entities will not be considered if the prospective entity has active sanctions in other states, as defined in the Federal regulations (42 CFR Part 460 Subpart D). (text added per bulletin MMP 22-39) (text deleted per bulletin MMP 22-39)

4.1.A. LETTER OF INTENT [SUBSECTION ADDED 4/1/23]

A prospective PACE entity must submit a letter of intent to MDHHS that includes:

- Name of organization
- Location of potential PACE center
- Service area that is being requested by county and/or zip code
- Capacity

For budget consideration, a letter of intent must be received by MDHHS prior to August 1 (14 months) in advance of the fiscal year in which the program plans to open.

If MDHHS receives multiple letters of intent for the same service area, the feasibility studies will be reviewed in the order in which the letters of intent are received.

If MDHHS receives a letter of intent for a service area that is already being serviced by a PACE provider, MDHHS will begin the unmet need process. (Refer to the Unmet Need subsection in this chapter for additional information.)

Within 14 business days of receiving the letter of intent, MDHHS will send a letter to the prospective PACE entity to confirm the receipt of their letter of intent and notify the prospective PACE entity that a feasibility study must be submitted to MDHHS within 90 calendar days from the date of the letter. (text added per bulletin MMP 22-39)

4.1.B. FEASIBILITY STUDY [SUBSECTION ADDED 4/1/23]

MDHHS will evaluate potential PACE organizations using the following criteria:

- Submission of a feasibility study that:
  - identifies the proposed service area;
shows evidence of demand for PACE services in the proposed service area (the potential pool of PACE beneficiaries should be sufficient to have, at minimum, 125 participants);

documents the organization’s timeline for development and anticipated costs;

identifies the anticipated source of referrals for potential beneficiaries and assesses the availability of long-term care services already in existence in the community;

demonstrates organizational commitment to principles consistent with the PACE model;

shows evidence of experience in providing primary, acute and/or long-term care services to the target population and evidence of positive community support;

shows evidence that the organization has the depth in leadership and experience required to develop and implement PACE successfully;

shows evidence that the PACE organization will either be cost neutral or save money for long-term care services provided by MDHHS in the PACE organization’s service area (i.e., total Medicaid expenditures for services in the service area will not increase and may decrease);

includes assurance of adequate financial capacity to fund program development and start-up costs, including identification of patient capacity and break-even consideration;

shows evidence of the proposed provider network and assurance that the organization will have staff and professionals experienced in providing care to the target population;

shows evidence that the Executive (Program) Director position will be staffed with a full-time employee;

shows evidence that the key positions of Executive Director, Medical Director, Center Manager, Financial Manager, and Quality Improvement Manager are sufficiently staffed, as determined by MDHHS, to meet the needs of the PACE organization;

shows evidence that the key positions will be staffed on-site; and

demonstrates ability to meet state and federal PACE requirements.

Other evaluation criteria may be considered and will be available to organizations that file a letter of intent with MDHHS to become a PACE organization.

Once MDHHS has approved the prospective PACE entity’s feasibility study, MDHHS will send an approval letter and the entity will have one year from the date of the letter to submit a PACE application to MDHHS and the Centers for Medicare & Medicaid Services (CMS). Prior to the submission, MDHHS will provide a State Assurance document in support of the application. (text added per bulletin MMP 22-39)
4.2 EXPANSION APPLICATIONS [CHANGE MADE 4/1/23]

An expansion application is for existing PACE organizations who are seeking to expand.

Types of expansions include:

- A PACE organization requests to expand its geographic service area without building additional sites.
- A PACE organization requests to open another physical site in the existing geographic service area.
- A PACE organization requests to expand its geographic service area and open another physical site in the expanded area.
- A PACE organization requests to expand its current building.

Expansion applications will not be accepted by MDHHS until the first CMS audit has been completed with good standing and the organization is fiscally sound. A PACE organization will not be considered if the PACE organization has active sanctions, as defined in the Federal regulations (42 CFR Part 460 Subpart D). (text added per bulletin MMP 22-39)

4.2.A. LETTER OF INTENT [SUBSECTION ADDED 4/1/23]

An existing PACE provider must submit a letter of intent to MDHHS that includes:

- Name of organization
- Location of potential PACE center (if applicable)
- Service area that is being requested by county and/or zip code (if applicable)
- Capacity increase

For budget consideration, a letter of intent must be received by MDHHS prior to August 1 (14 months) in advance of the fiscal year in which the program plans to open. If MDHHS receives multiple letters of intent for the same service area, the feasibility studies will be reviewed in the order in which the letters of intent are received.

Within 14 business days of receiving the letter of intent, MDHHS will send a letter to the PACE program to confirm the receipt of their letter of intent and notify the PACE program that a feasibility study must be submitted to MDHHS within 90 calendar days from the date of the letter. (text added per bulletin MMP 22-39)

4.2.B. FEASIBILITY STUDY [SUBSECTION ADDED 4/1/23]

MDHHS will evaluate PACE organizations using the following criteria:

- Submission of a feasibility study that:
  - identifies the proposed service area;
shows evidence of demand for PACE services in the proposed service area (the potential pool of PACE beneficiaries should be sufficient to have, at minimum, 125 participants);

documents the organization’s timeline for development and anticipated costs;

identifies the anticipated source of referrals for potential beneficiaries;

assesses the availability of long-term care services already in existence in the community;

demonstrates organizational commitment to principles consistent with the PACE model;

shows evidence of experience in providing primary, acute and/or long-term care services to the target population and evidence of positive community support;

shows evidence that the organization has the depth in leadership and experience required to develop and implement PACE successfully;

shows evidence that the PACE organization will either be cost neutral or save money for long-term care services provided by MDHHS in the PACE organization’s service area (i.e., total Medicaid expenditures for services in the service area will not increase and may decrease);

includes assurance of adequate financial capacity to fund program development and start-up costs, including identification of patient capacity and break-even consideration;

shows evidence of the proposed provider network and assurance that the organization will have staff and professionals experienced in providing care to the target population;

shows evidence that the Executive (Program) Director position will be staffed with a full-time employee;

shows evidence that the key positions of Executive Director, Medical Director, Center Manager, Financial Manager, and Quality Improvement Manager are sufficiently staffed, as determined by MDHHS, to meet the needs of the PACE organization;

shows evidence that the key positions will be staffed on-site; and

demonstrates the ability to meet state and federal PACE requirements.

Other evaluation criteria may be considered and will be available to organizations that file a letter of intent with MDHHS to become a PACE organization.

Once MDHHS has approved the PACE program’s feasibility study, MDHHS will send an approval letter and the PACE program will have one year from date of the letter to submit a PACE application to MDHHS and CMS. Prior to the submission, MDHHS will provide a State Assurance document in support of the application. *(text added per bulletin MMP 22-39)*
4.3 ALTERNATIVE CARE SETTINGS

To be eligible to request an ACS, the following guidelines must be met:

- The PACE organization must have successfully completed their first trial period audit and be in good standing with CMS, per CMS audits.
- An ACS participant must belong to a PACE organizations center.
- The PACE organization’s enrollment limit must have adequate space to accommodate projected ACS attendants.
- MDHHS must tour the proposed ACS location prior to approval.
- The ACS must be less than one (1) hour travel time from PACE Center.

The ACS is subject to MDHHS Readiness Review and will be included in the PACE organization’s annual audits. ACSs are also subject to all state and federal regulations.

The following documents must be submitted to MDHHS when an ACS is requested:

- Previous year’s annual financial report for the PACE organization;
- The PACE organization’s business plan for ACS;
- Financial projection for ACS site (to include cost of ACS site, renovations, staff, equipment, etc.);
- Description of what population of participants will attend the ACS;
- Description of what and how services will be provided at the ACS:
  - ACS services must include, but are not limited to, meals, activities, personal care, laundry, and nursing (triage);
- Description of how services that are not provided at the ACS will be available to participants; and
- Description of plan for participants to attend a PACE Center, at least quarterly or more often, as determined by the PACE organization interdisciplinary team.

MDHHS may request additional information when necessary.

4.4 UNMET NEED

<table>
<thead>
<tr>
<th>Definition</th>
<th>An unmet need is established when the number of true potential PACE beneficiaries (TPPB) is greater than zero.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Methodology</td>
<td>Data from the Michigan Department of Health and Human Services (MDHHS) Data Warehouse will be used to determine unmet need when a prospective PACE entity is requesting an area being served by an existing PACE organization. MDHHS will pull the following data on a quarterly basis:</td>
</tr>
<tr>
<td></td>
<td>- The number of beneficiaries in each county with an active Level of Care Determination (LOCD) and the number of beneficiaries currently in a PACE organization within each county.</td>
</tr>
<tr>
<td></td>
<td>- To determine if there is unmet need, MDHHS will multiply the number of beneficiaries with an active LOCD by 11.25%.</td>
</tr>
</tbody>
</table>
• MDHHS will remove current PACE beneficiaries and subtract the remaining enrollment capacity assigned to the current PACE organization to find the TPPB.

• If the number of TPPB is greater than zero, there is an unmet need; if not, the need is met.

The National PACE Association (NPA) indicates 9% as the average national PACE market penetration rate (MPR). This rate is defined as the percentage of dual Medicare and Medicaid and Medicaid-only eligible beneficiaries needing long-term services and supports (LTSS) in the service area of a PACE organization who are enrolled in PACE according to the NPA. While the NPA indicates 9% as the MPR, MDHHS will use a higher MPR than the national average.

\[
\text{Number of beneficiaries who meet nursing facility level of care times 11.25\% (MPR)} \times 11.25\% \text{ (MPR)} = \text{number of potential PACE beneficiaries (PPB)}
\]

\[
\text{Number of (PPB)} \quad \text{minus current PACE organization capacity} \quad = \quad \text{number of (TPPB)}
\]

Numerical example:

5,000 beneficiaries who meet nursing facility level of care times 11.25\% (MPR)
563 (PPB)

563 (PPB)
minus 200 capacity of current organization
363 (TPPB)

= unmet need of 363 (TPPB)

• If the number of TPPB is greater than zero = unmet need.
• If the number of TPPB is less than zero = no unmet need.

The data used in the methodology described above will be pulled quarterly and posted on the MDHHS PACE website. MDHHS will also conduct an ongoing analysis to determine the effectiveness of the methodology.

If an unmet need is determined, the current PACE organization will have the opportunity to submit expansion plans for review. If the current PACE organization fails to submit a plan for expansion, MDHHS will allow proposals from other organizations.
4.4.A. UNMET NEED PROCESS

A prospective PACE entity must submit a letter of intent to MDHHS that includes:

- Name of organization
- Location of the PACE center
- Service area by county and/or zip code (if applicable)

MDHHS will confirm whether there is an unmet need by utilizing existing methodology.

If an unmet need is determined:

- Upon determination of unmet need, MDHHS will send a letter within 14 business days to the prospective PACE entity to confirm the receipt of their letter of intent. The letter will confirm whether there is an unmet need and the next steps for right of refusal.
- MDHHS will send a letter to the current PACE provider within 14 business days that an unmet need was determined, and a prospective PACE entity has requested their current service area. The current PACE provider will be given the opportunity to submit a plan to expand capacity sufficient to accommodate need and will have six (6) months from the notice of determination of unmet need to submit an expansion plan.
- An expansion plan from a current PACE provider must include:
  - Letter of Intent
  - Location (if applicable)
  - Service Area
  - Capacity increase
  - Estimated timeline
- If the current PACE provider’s expansion plan is approved by MDHHS, they will have 90 calendar days from approval to submit a feasibility study. Once the feasibility study is received, current policy timelines will be followed. Refer to the Initial Applications subsection of this chapter for additional information regarding expansion timelines.
  - The current PACE provider must provide quarterly updates to MDHHS to ensure that the organization is making progress on the plan they submitted to address the unmet need.
- If the current PACE provider chooses to not submit an expansion plan within six (6) months, MDHHS will move forward with requesting the prospective PACE entity’s submission of a feasibility study within 90 calendar days of notice.

If an unmet need is not determined:

- MDHHS will send a letter within 14 business days of notice to the prospective PACE entity that an unmet need was not determined and, therefore, will not accept their letter of intent.
SECTION 5 – BECOMING A PACE ORGANIZATION

Information regarding the process to become a PACE organization is available on the MDHHS website. Any entity seeking to become a PACE organization in Michigan may contact MDHHS regarding state-specific requirements. (Refer to the Directory Appendix for contact and website information.)

SECTION 1 – GENERAL INFORMATION

1.1 RURAL HEALTH CLINIC CERTIFICATION

This chapter provides policy and reimbursement information specific to Rural Health Clinics (RHCs) and is to be used in combination with other chapters of the Medicaid Provider Manual.

In compliance with the Rural Health Clinic Services Act of 1977 (Public Law 95-210), the Medicaid program reimburses certified and enrolled RHCs for services provided to Medicaid beneficiaries in the State of Michigan. To become certified as a RHC in Michigan, clinics must make application for RHC status through the designated state-certifying agency. (Refer to the Directory Appendix for contact information.) Based on information in the application, the certifying agency determines if an applicant clinic meets the staffing and location requirements for certification. If a clinic appears eligible, an on-site visit is conducted. If a clinic meets all the requirements, the certifying agency makes a recommendation for certification to the Centers for Medicare & Medicaid Services (CMS). CMS makes the final determination as to a clinic’s eligibility for RHC status and notifies the Michigan Department of Health and Human Services (MDHHS) when eligibility is granted.

RHCs may be provider-based or independently operated. Provider-based RHCs may be operated by a hospital, skilled nursing facility (SNF) or home health agency (HHA). An independent RHC is permitted to occupy a permanent structure or be located in a mobile unit. RHCs may be publicly or privately held clinics and they may be operated on a profit or not-for-profit basis.

1.2 GENERAL REIMBURSEMENT INFORMATION

Medicaid-enrolled RHCs are reimbursed with a prospective payment system (PPS) in compliance with Medicare, Medicaid and SCHIP Benefits Improvement and Protection Act (BIPA) of 2000. Section 702 of BIPA created a new section 1902(bb) in the Social Security Act. Specific information related to RHC reimbursement is contained in the Rate Setting Section of this chapter.
SECTION 2 – MEDICAID ENROLLMENT

2.1 PROVIDER ENROLLMENT [CHANGE MADE 4/1/23]

MDHHS requires all RHCs to have a Type 2 (Organization) National Provider Identification (NPI) number in order to receive the enhanced RHC reimbursement. For RHCs with multiple locations and multiple rates, an NPI number for each location may be necessary so that the proper reimbursement rate of all encounters can be determined. If the RHC fails to obtain and/or use the correct NPI number, the RHC reimbursement will be determined under fee for service rules. The NPI number must be reported to MDHHS before billing Medicaid services.

Individual providers (doctors, dentists, optometrists, etc.) are required to obtain a Provider (Type 1 - Individual) NPI number and report the number to MDHHS.

In accordance with 42 CFR 455.104 and the Provider Ownership and Control Disclosures subsection of the General Information for Providers chapter of this Manual, clinics are required to disclose ownership information to MDHHS within 35 days of a change of ownership. Failure to notify MDHHS of any change in identification information may result in the loss of Medicaid enrollment, lapse of provider eligibility, or nonpayment of services.

All inquiries related to provider enrollment should be directed to the MDHHS Provider Enrollment Unit. (Refer to the Directory Appendix for contact information.)

2.1.A. NON-PHYSICIAN BEHAVIORAL HEALTH SERVICE

Licensed psychologists (Master’s Limited or Doctoral level), social workers (Master’s level), professional counselors (Master’s or Doctoral level), and marriage and family therapists who serve Medicaid beneficiaries are required to enroll as Medicaid providers. The NPI of the psychologist, social worker, professional counselor, or marriage and family therapist is reimbursed under the RHC PPS. These services must be billed using the appropriate evaluation and management (E/M) codes listed in the American Medical Association’s Current Procedural Terminology (CPT) Book or Healthcare Common Procedure Coding System (HCPCS) codes. Providers should refer to the Non-Physician Behavioral Health provider database on the MDHHS website for the current list of covered procedure codes. The list of allowable services is reviewed annually and updated as applicable. Refer to the Additional Code/Coverage Resource Materials Section of the General Information for Providers Chapter for additional information regarding coverage parameters.

For information relating to service coverage and authorization requirements, refer to the Practitioner and the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapters of this manual.

2.2 NONENROLLED PROVIDERS

Professional services performed by limited licensed psychologists (except as noted in Section 333.18223 of the Public Health Code), social workers, professional counselors, marriage and family therapists, or student interns must be performed under the supervision of an enrolled, fully-licensed provider of the same profession. These services are reimbursed under the RHC PPS. Since MDHHS does not directly
enroll these providers, claims for their services must be billed using the NPI of the supervising provider responsible for ensuring the medical necessity and appropriateness of the services. Claims submitted with the non-enrolled provider’s NPI in the rendering provider field will reject.
SECTION 3 – BENEFITS

RHC services subject to PPS reimbursement are RHC services defined at Section 1861 (aa)(1)(A)-(C) of the Social Security Act.

- Physician (MD, DO), podiatrist, chiropractor, and optometrist professional services, and services and supplies incidental to physician services, including certain drugs and biologicals that cannot be self-administered, immunizations and their administration.
- Licensed physician’s assistant and advanced practice registered nurse (NP, CNS, CNM) services, and the services and supplies incidental to these services as would otherwise be furnished by, or incidental to, physician services.
- Clinical psychologist and clinical social worker services, and services and supplies incidental to these services as would otherwise be furnished by, or incidental to, physician services.
- Dental services, and services and supplies incidental to dental services.

Primary care services that are covered and reimbursed under the PPS are defined as the above listed services provided in a place of service that is the RHC’s office or clinic, patient’s home, skilled NF, domiciliary facility or NF.

3.1 SERVICES AND SUPPLIES INCIDENTAL TO AN RHC VISIT

RHC services and supplies incidental to an RHC visit are included in the PPS reimbursement if the service or supply is:

- Of a type commonly furnished in a physician’s office.
- Of a type commonly rendered either without charge or included in the professional bill.
- Furnished as an incidental, although integral part of professional services furnished by a physician (MD, DO), dentist, optometrist, podiatrist, chiropractor, NP or CNS (under the terms of a collaborative agreement with a physician), CNM or licensed physician’s assistant (under the terms of a practice agreement).
- Furnished under the direct personal supervision of a physician (MD, DO), dentist, optometrist, podiatrist, chiropractor, NP or CNS (under the terms of a collaborative agreement with a physician), CNM or licensed physician’s assistant (under the terms of a practice agreement).
- In the case of a service, furnished by a member of the clinic’s health care staff who is an employee of the clinic.

The direct personal supervision requirement is met in the case of a NP, CNS, CNM, or licensed physician’s assistant only if such a person is permitted to supervise such services under the written policies governing the RHC.

3.2 SERVICES EXCLUDED FROM RHC REIMBURSEMENT

Payment for any other Medicaid covered services not defined as a primary care service are Medicaid-covered under fee-for-service (FFS) policies. Services not listed as primary care services are excluded from the RHC prospective payment rate (PPR).
3.3 **Teledermicine [Change Made 7/1/23]**

An RHC can be either an originating or distant site for teledermicine services. Refer to the Billing & Reimbursement for Institutional Providers Chapter for specific billing instructions. Refer to the Teledermicine Chapter for additional information regarding teledermicine services. (revised per bulletins MSA 20-09, MSA 21-24, MMP 23-10)

Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.

3.4 **Children’s Health Insurance Program Services**

Section 503 of the Children’s Health Insurance Program Reauthorization Act (CHIPRA) of 2009 authorizes states to incorporate a PPS rate for reimbursement of services provided to children receiving health care services through RHCs when covered by the Children’s Health Insurance Program (CHIP). Reimbursement for eligible services must comply with the requirements of section 1902 (bb) of the Social Security Act.

For beneficiaries enrolled in state CHIP-funded programs (MIChild, Healthy Kids–Expansion, and Maternity Outpatient Medical Services [MOMS]), providers must bill the program according to their existing processes. For beneficiaries enrolled in a health plan, the MDHHS HCRD will perform an annual reconciliation of these encounters provided by RHCs. (Refer to the Eligibility Groups Subject to PPS Methodology subsection of this chapter for additional information.)

For Healthy Kids–Expansion, MIChild and MOMS beneficiaries, the HCRD will perform an annual reconciliation of these encounters provided by RHCs. The RHC PPS rates established for eligible CHIP services are equivalent to those applicable to Medicaid for each respective year they are in effect.
SECTION 4 – ENCOUNTERS

4.1 DEFINITION [CHANGE MADE 7/1/23]

Reimbursement to RHCs under the PPS requires that each office visit that meets the following definition of an encounter be counted for payment purposes.

An encounter is a face-to-face visit or an interaction using a qualifying telemedicine modality (audio/visual or audio-only) between a patient and the provider of health care services who exercises independent judgment in the provision of health care services. For a health service to be defined as an encounter, the provision of the health service must be recorded in the patient’s medical record. Encounters may be classified as medical or behavioral health. (revised per bulletins MSA 20-09, MSA 21-24, MMP 23-10)

An RHC may be credited with one encounter for each different type of visit provided to a beneficiary during a single day, regardless of the number of services provided at the visit. A maximum of two encounters are allowed per beneficiary per day (one medical and one behavioral health). In cases where the beneficiary, after the first visit, suffers illness or injury requiring additional diagnosis or treatment, these visits may be classified as two encounters.

- Example 1: A beneficiary sees a physician at the RHC to treat bronchitis and then sees an optometrist on the same day for an eye exam. These visits count as one encounter (medical).
- Example 2: A beneficiary sees a physician at the RHC, and then later sees a social worker on the same day. These visits may be classified as two encounters (one medical and one behavioral health).
- Example 3: A beneficiary sees a physician for flu symptoms early in the day, and then later the same day sees the same physician for a broken leg. These visits may be counted as two encounters (both medical – subsequent injury).

Encounters include provision of service by the following professionals:

- Licensed physicians (MD, DO), dentists, optometrists, podiatrists, chiropractors, CNPs (who have a collaborative agreement with a physician), CNMs, physician assistants, dental hygienists, or dental therapists.
- Clinical psychologists or clinical social workers.

The following examples help to define an encounter:

- To meet the encounter criterion for independent judgment, the provider must be acting independently and not be assisting another provider. For example, a nurse assisting a physician during a physical examination by taking vital signs, taking a history, or drawing a blood sample is not credited with a separate encounter.
- Such services as drawing blood, collecting urine specimens, performing laboratory tests, taking x-rays, filling/dispensing prescriptions, in and of themselves, do not constitute encounters. However, these procedures may accompany professional services performed by physicians, dentists, or other health providers that do constitute encounters.
An RHC may be credited for more than one encounter by the same health professional on the same day. For example, a beneficiary suffers illness or injury requiring additional diagnosis or treatment on the same date of service, or a patient sees a physician for flu symptoms early in the day and then later the same day sees the same physician for a broken leg. These visits are classified as two encounters, and the patient’s medical record must document the circumstances of the two encounters.

An RHC may be credited for encounters by different health professionals on the same day. For example, if a patient first sees a physician at the RHC and then sees a clinical psychologist, these visits are classified as two encounters.

An encounter may take place in the RHC or at another approved location.

The encounter criteria are **not** met in the following circumstances:

- Provider participation in a community meeting or group session that is not designed to provide health services.
- When the only service provided is part of a large-scale effort, such as a mass immunization program, screening program, or community-wide service program.
- Nursing services such as taking vital signs, taking a history, drawing a blood sample, collecting urine specimens, performing laboratory tests, taking x-rays, and/or filling or dispensing prescriptions.
- Calling in prescriptions, filling out insurance forms, etc.
- Allergy injection(s).

### 4.2 Eligibility Groups Subject to PPS Methodology

The following list identifies Medicaid eligibility groups that are subject to the PPS methodology:

<table>
<thead>
<tr>
<th>Medicaid</th>
<th>RHC primary care services constitute encounters covered by Medicaid.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Qualified Medicare Beneficiaries</td>
<td>Medicaid is billed coinsurance and deductibles for Qualified Medicare Beneficiaries (QMBs), and the services covered by Medicare are included as encounters.</td>
</tr>
</tbody>
</table>
| Medicaid Health Plan Enrollees | Medicaid-covered services provided by a RHC to Medicaid-eligible beneficiaries enrolled with a Medicaid Health Plan (MHP) are Medicaid encounters if the following conditions are met:  
  - The RHC and MHP must have a signed contract outlining payment provisions in order for the RHC to provide Medicaid-covered services to the MHP enrollee.  
  - The contract must provide for the MHP to reimburse the RHC at a fair market rate for similarly situated beneficiaries served by a non-RHC provider. The MHP must implement a level of payment equal to, or above, that of other subcontracting arrangements when entering into a subcontract with a RHC.  
  - The RHC must file information with the MDHHS HCRD in a format determined by MDHHS showing encounters and payments of Medicaid beneficiaries enrolled with MHP.  
  - RHCs may not bill Medicaid for MHP beneficiaries. |
- After verification of the fair market rate by the HCRD, the difference between the RHC prospective payment rate and MHP payments are reconciled by MDHHS annually.
- The contract between RHCs and MHP services is subject to review and verification by MDHHS.

### Healthy Kids Dental

Dental services provided to Medicaid beneficiaries enrolled in the *Healthy Kids Dental* program are eligible for the PPR. RHCs should report Medicaid information on encounters and revenue in the annual reconciliation report. The RHC receives the difference between the PPR and the revenue received as part of the annual reconciliation.

### Medicare/Medicaid

Medicaid covered primary care services provided to Medicare/Medicaid dual eligibles are considered Medicaid encounters and are reimbursed under the PPS methodology.

### 4.3 Eligibility Groups Not Subject to PPS Methodology

If an individual does not have Medicaid eligibility (i.e., is eligible for CSHCS-Title V), the services and costs are not Medicaid RHC services. CSHCS may be paid FFS rates only.
SECTION 5 – RATE SETTING

The RHC is reimbursed on a per visit basis for RHC services. In accordance with section 1902(bb) of the Social Security Act, the PPS per visit payment is equal to 100 percent of the average of the RHC’s reasonable costs of providing Medicaid services during fiscal years 1999 and 2000. MDHHS defines reasonable costs as the per-visit amount approved and paid by Medicare. For RHCs that have a fiscal year ending other than September 30, the PPR is prorated based on the number of months in each period covered by a different prospective rate.

The per visit amount is adjusted each year (beginning on October 1, 2001) by 100 percent of the Medicare Economic Index for the prior calendar year (i.e., the adjustment effective October 1, 2001 reflects the index for calendar year 2000).

The per visit amount may also be adjusted to reflect changes in the scope of services provided to Medicaid beneficiaries by the RHC. An adjustment to the per-visit amount based upon a change in the scope of services becomes effective as determined by MDHHS.

Any rate setting/cost settlement related questions should be directed to the MDHHS HCRD. (Refer to the Directory Appendix for contact information.)

5.1 ESTABLISHING RATES FOR NEW CLINICS

An entity that initially qualifies as an RHC after fiscal year 2000 will be paid as follows:

- Upon enrollment, an interim prospective payment rate (PPR) will be established for new RHCs equal to the facility type average rate for the county in which they are located or the statewide average (if no previous average exists for the county subject to any limit applied to the specific facility type). The RHC will be cost settled at the end of its first fiscal year of operation.
- After the facility has been in operation for two full cost reporting periods, the average rate per visit for those two periods will be considered the revised PPR for the facility, subject to the following criteria:
  - The first year will be inflated to the second fiscal year end using the appropriate Medicare Economic Index (MEI) factors.
  - For independent RHCs, the rebased PPR shall not exceed the Medicare limit.
  - For provider-based RHCs (associated with a hospital with fewer than 50 enrolled beds), the PPR shall not exceed the statewide average cost per visit. The limit will increase annually at a minimum of the MEI factor.
  - For provider-based RHCs (associated with a hospital with 50 or more beds), the PPR shall not exceed the Medicare limit.

5.2 ALTERNATE PAYMENT METHODOLOGY

In accordance with State Plan authority, MDHHS may enter into an alternative payment methodology with an RHC, referred to as a Memorandum of Understanding (MOU). Reimbursement for Medicaid primary care services provided by an RHC to Medicaid beneficiaries is subject to the terms of the signed MOU. For an RHC paid under the MOU, the PPS base methodology described within this chapter will be maintained to ensure compliance with Section 1902(bb)(6)(B) of the Social Security Act.
The MOU is effective when both MDHHS and an RHC are signatories to the document. CMS, rather than the State, is the final arbiter of the permissibility of this agreement. The MOU does not supersede any corresponding policy in the MDHHS Medicaid Provider Manual but documents the clinic’s acceptance of the terms outlined in the Michigan Medicaid State Plan. If an RHC does not sign the MOU, reimbursement and corresponding policy defaults to that which is described under the PPS methodology and outlined in this manual.

5.3 Quarterly Payments

RHCs receive a quarterly payment. This payment is an estimate of the difference between the payment the RHC receives from various sources (FFS, MHP, Medicare and other insurance) and the amount the RHC should receive under the PPS. These quarterly payments are included in the annual reconciliation. This quarterly amount may be adjusted periodically by MDHHS to account for changes in the payment limits, cost, utilization, and other factors that affect Medicaid reimbursement to RHCs. The RHC may request a change in the quarterly payment through the MDHHS HCRD.
SECTION 6 — BILLING

6.1 BILLING RURAL HEALTH CLINIC SERVICES [CHANGES MADE 4/1/23]

RHC services must be billed according to instructions contained in the Billing & Reimbursement for Institutional Providers Chapter of this manual. RHCs must refer to that chapter for information needed to submit claims for Medicaid services, as well as information about how MDHHS processes claims and notifies the RHC of its action. If the RHC performs a service that must be billed on the professional claim form, refer to the Billing & Reimbursement for Professionals Chapter of this manual. Policies for specific services are found in the provider-specific chapters of this manual.

It is the responsibility of the RHC to properly bill all Medicaid FFS claims. Incorrect or improper billing may adversely affect reimbursement since the annual reconciliation and final reimbursement is based on approved claims.

The Type 2 (Organization) (revised 4/1/23) NPI number must be used as the billing provider on all electronic and paper claims submitted to Medicaid. Do not use Provider (Type 1 - Individual) as the billing provider. The billing provider loop or field is mandatory to complete.

The NPI (Type 1 – Individual) number of the practitioner overseeing the beneficiary’s care must be entered as the attending provider. The attending provider field is mandatory to complete. The following providers may be reported in the attending provider field:

- Physicians (includes dentists, podiatrists, optometrists, and chiropractors)
- Nurse Practitioners
- Physician Assistants
- Certified Nurse Midwives
- Clinical Psychologists
- Clinical Social Workers
- Clinical Nurse Specialists
- Licensed Psychologists (Doctoral Level)
- Social Workers (Master’s Level)
- Professional Counselors (Master’s or Doctoral levels)
- Marriage and Family Therapists
- Limited Licensed Psychologists (Master’s or Doctoral Level)

Additionally, the NPI (Type 1 – Individual) number of the practitioner who performed the service should be entered as the rendering provider. Do not enter a Type 2 (Organization) (revised 4/1/23) NPI number as the attending or rendering provider.

MDHHS will use the billing provider NPI field (Type 2 - Organization) to determine the number of encounters and calculate the settlement for the year-end reconciliation.
6.2 Place of Service Requirements

Place of service codes are not applicable to institutional billing. However, if the RHC performs a service that must be billed on the professional claim form within the clinic, RHCs must use place of service (POS) code 72. For services provided outside the RHC, bill with the appropriate POS code noted in the Billing & Reimbursement for Professionals Chapter of this manual.

RHCs may provide Medicaid covered services in settings other than the RHC office, beneficiary’s home, nursing facility or domiciliary facility, but these services are not included in the PPS reimbursement methodology. Services provided outside of the settings noted here are reimbursed at FFS rates.

6.3 Clinical Trials [Change Made 4/1/23]

The program covers routine patient costs furnished in connection with participation in a qualifying clinical trial. Refer to the Practitioner Chapter for additional coverage information.

All RHC claims for routine patient costs associated with participation in a clinical trial must adhere to the inpatient hospital claim guidelines for reporting covered services using the CMS UB04/8371 institutional claim format. In addition, RHC claims must include:

- A completed and signed Attestation to the Appropriateness of the Qualified Clinical Trial form (BPHASA-2210). (Refer to the Forms Appendix to review the form and to the Directory Appendix for form access on the MDHHS website.) (added per bulletin MMP 22-42)
- Clinical trial and non-clinical trial services on separate line items when claims are submitted for both types of services on the same claim.
- Each line identified with the appropriate Healthcare Common Procedure Coding System (HCPCS) Modifier Q0 or Q1.
  - HCPCS Modifier Q0 - investigational clinical service provided in a clinical research study that is in an approved clinical research study.
  - HCPCS Modifier Q1 – routine clinical service provided in a clinical research study that is in an approved clinical research study.

6.3.A. Reporting Non-Covered Services

Generally, services, investigational drugs, or items that are part of the clinical trial and considered experimental or investigational should not be reported on a claim. In instances when claims processing edits require non-covered services be billed with their associated procedures, or when it is necessary for a provider to show the items and services provided free-of-charge to receive payment for the covered routine costs, providers are instructed to report non-covered services with the appropriate modifier and a charge of $0.

6.4 Billing for Maternity Care

Global codes for maternity care are used to reimburse a package of services (prenatal visits and delivery) at different places of service (RHC and hospital). In order for the RHC to be reimbursed for prenatal visits under the PPS methodology, the RHC should not bill for global maternity care. The claims for
delivery and prenatal care should be billed separately. The claim for delivery should show a hospital place of service and will be paid under the FFS methodology. The claim for prenatal care will be reimbursed under the PPS methodology.

If the RHC elects to bill for global maternity care, all services will be reimbursed under the FFS rules.

6.5 OTHER INSURANCE

Billing instructions related to coordination of benefits are published in the Coordination of Benefits Chapter of this manual. Other insurance and all other payments received for services rendered to a Medicaid beneficiary must be reported. Even if the other insurance payment for a specific service exceeds the amount Medicaid would have paid, the RHC must still bill the procedure code to receive credit for the encounter. (Refer to the Billing & Reimbursement Chapters of this manual for specific billing guidelines.)

6.6 MEDICARE AND MEDICAID CROSSOVER CLAIMS

Refer to the Billing & Reimbursement Chapters of this manual for specific instructions regarding Medicare and Medicaid claims. If the Medicare payment exceeds the Medicaid fee screen, the appropriate FFS procedure code should still be billed to Medicaid for encounter and reconciliation purposes.

6.7 COPAYMENTS

Medicaid copayments for chiropractic, dental, physician, podiatry, and vision services are waived under the RHC benefit as part of the reconciliation. (Services requiring copayments are listed in the General Information for Providers Chapter of this manual.)

6.8 DENTAL CLAIMS

RHCs providing dental services must refer to the Dental and to the Billing & Reimbursement for Dental Providers Chapters of this manual for information regarding program coverages, prior authorization requirements, claims completion and billing instructions.
SECTION 7 – RISK CONTRACTS

RHCs may enter into risk contracts with MHPs for nonprimary care services. However, these contracts are not included in the reconciliation process. All RHC reconciliations are for primary care services only.

7.1 SCOPE OF SERVICE

The prospective payment rate may be adjusted for an increase or decrease in scope of service. Any facility approved for rebasing due to a change in scope of services shall be treated as a new facility. In order to qualify for a scope of service change, the cost related to the specific change must account for an increase or decrease to the existing PPR of five percent or greater. A facility that changes classification to a system utilizing a different rate limit or methodology shall be considered a change of scope (by default). For example, an independent RHC that changes ownership to a provider-based RHC when the hospital has less than 50 beds is considered to have a change of scope.

7.1.A. INCREASE IN SCOPE OF SERVICE

An increase in scope of service results from the addition of a new professional staff member (i.e., contracted or employed) who is licensed to perform medical services that are approved RHC benefits that no current professional staff is licensed to perform.

7.1.B. DECREASE IN SCOPE OF SERVICE

A decrease in scope of service results when no current professional staff member is licensed to perform the medical services currently performed by a departing professional staff member.

7.1.C. CHANGES THAT DO NOT CHANGE THE SCOPE OF SERVICE

An increase or decrease in scope of service does not result from any of the following (although some of these changes may occur in conjunction with a change in scope of service):

- an increase, decrease or change in number of staff working at the clinic.
- an increase, decrease or change in office hours.
- an increase, decrease or change in office space or location.
- the addition of a new site that provides the same set of services.
- an increase, decrease or change in equipment or supplies.
- an increase, decrease or change in the number or type of patients served.
7.2 NOTICE OF INTENT TO CHANGE SCOPE OF SERVICE

If a RHC intends to change its scope of service, the MDHHS HCRD must be notified 90 days before any financial commitments (i.e., money paid or committed to be paid, contracts signed, etc.) have been made. Notification should include the following documentation:

- Complete description of the service to be changed (addition or deletion).
- A listing of procedure codes to be billed as a result of this new service.
- A budget for the fiscal year showing an estimate of the total increase or decrease in cost resulting from change.
- An estimate of the change in number of encounters.
- Estimates of the cost change on the current Medicaid encounter rate.
- The proposed customary charges for this service by the RHC.
- The customary charges for this service by other providers in the area served by this RHC.
- The amount to be paid by an MHP for this service for various programs (Medicare/Medicaid).
- The current Medicare encounter rate.
- Medicare fee screen for this service for non-full cost providers.
- Total encounters for last two years by program (Medicaid, Medicare, uninsured, etc.), and type (MHP, fee screen/contracted amount).
- Estimated change in encounters by program for two fiscal periods following the change in scope of service.
- Copies of notices, certifications, applications, approvals and other documentation from the state-licensing agency, CMS, Medicare intermediary, or other organizations documenting the change in scope of service.
- Other information showing cost, encounters or approvals/denials of the change.
- Other information as requested by the HCRD.

After a review of the information submitted, the HCRD notifies the RHC of its determination regarding a rate change, including the effective date of any change.
SECTION 8 – RECONCILIATION REPORTING

Medicaid Reconciliation Reports must be completed by each RHC in order to receive reimbursement under the PPS.

The RHC must file the following documents at the end of its fiscal year for PPS reimbursement:

- A copy of its filed Medicare Cost Report and Trial Balance
- A completed copy of the Medicaid Reconciliation Report

Encounter data for RHC services provided to beneficiaries through Medicaid Health Plans, Healthy Kids Dental, and/or regional Prepaid Inpatient Health Plans (PIHP) is accessible through the Community Health Automated Medicaid Processing System (CHAMPS).

No individual payment information is needed if payments are made on a capitated basis; however, a separate summary of the monthly payments must be provided.

Upon review and audit, MDHHS will reimburse the difference between the RHC PPS rate and the amount received from the Medicaid Health Plans, Healthy Kids Dental, and/or the regional Prepaid Inpatient Health Plan (PIHP).

8.1 REPORT FILING

RHCs must file Reconciliation Reports and supplemental documents to the MDHHS HCRD annually. Due dates are consistent with the Medicare Cost Report filing requirement. If the required reconciliation report and supplemental documents are not submitted within the required time limit, the RHC waives its right to the PPS reimbursement for that year.

The reconciliation report is the basis for determining future quarterly payments and the current year’s reconciliation. The report must be an original(s) and signed by the authorized individual who normally signs the RHC’s federal income tax return or similar reports and should be for the same fiscal period and cover the same sites as the Medicare Cost Report. Improperly completed or incomplete filings are returned to the facility for proper completion and must be resubmitted to MDHHS within 30 days of date of receipt.

8.2 ACCOUNTING AND RECORD KEEPING

RHCs must maintain, for a period of not less than seven years from the end of the fiscal year of the Reconciliation Report, financial and clinical records for the period covered by the reconciliation report that are accurate and in sufficient detail to substantiate the information reported. If there are unresolved issues at the end of this seven-year period, the records must be maintained until these issues are resolved.

The MDHHS HCRD retains each required Reconciliation Report and supplemental documents submitted by the RHC for seven years after issuance of a final decision. In the event there are unresolved issues at the end of this seven-year period, the report is maintained until such issues are resolved.
SECTION 9 – AUDIT, SETTLEMENTS AND APPEALS

An annual reconciliation is performed to assure that the prospective payment rate is paid to the RHC for all eligible encounters. The reconciliation process begins with the receipt of the Reconciliation Report and supplemental documents and ends with the issuance of the Notice of Amount of Program Reimbursement.

9.1 DESK REVIEWS AND FIELD AUDITS

The desk review may include procedures that:

- Verify the completeness and mathematical accuracy of all schedules in the report.
- Compare the Reconciliation Report with MDHHS paid claim and encounter data.
- Identify the need for supporting documentation and arrange to receive same.
- Identify the need for a field audit examination necessary to conclude final reconciliation calculations.
- Compare reported data with industry norms as an aid to the audit scope determination.

Field audits may be conducted to verify information on the Reconciliation Report.

9.2 MEDICARE AUDIT

The Medicare intermediary may perform audits of the RHC. These audit results may be used to verify information or for statistical purposes.

9.3 INITIAL RECONCILIATION AND SETTLEMENT

An initial reconciliation is calculated after the annual reconciliation report is received. The initial reconciliation is processed approximately four months after the reconciliation report is received, with the payment or recovery made at that time. Future quarterly payments are adjusted based on the information in the initial reconciliation.

9.3.A. UNDERPAYMENTS TO AN RHC

Based on the annual reconciliation, MDHHS reimburses any underpayment due an RHC through a gross adjustment. This gross adjustment is shown in a Remittance Advice (RA). MDHHS retains the right to withhold a portion of any initial payment based on individual circumstances.

9.3.B. OVERPAYMENTS TO AN RHC

Once a determination of overpayment has been made, the amount so determined is a debt owed to the State of Michigan and will be recovered by MDHHS. The recovery starts approximately 30 days after notification to the RHC. The gross adjustment stops all payments to the RHC’s physician(s) until the full amount is recovered.
9.4 Audit Adjustment Report

The Audit Adjustment Report contains a list of all Program data adjustments made to the Medicaid Reconciliation Report by MDHHS audit staff.

9.4.A. Audit Adjustment Report

The Audit Adjustment Report must be accepted or rejected by the RHC within 30 calendar days of its mailing date.

If the RHC accepts the findings contained in the Audit Adjustment Report, an appropriate officer of the RHC should sign the report and mail it to MDHHS HCRD. (Refer to the Directory Appendix for contact information.) A Notice of Amount of Program Reimbursement is then mailed to the RHC. No further administrative appeal rights are available for the adjustments contained in the Audit Adjustment Report.

If the RHC has not responded within this time period, MDHHS shall issue a Notice of Amount of Program Reimbursement that is the final determination of an adverse action. No further administrative appeal rights are available.

9.4.B. Notice of Amount of Program Reimbursement

The Notice of Amount of Program Reimbursement is the notice of final determination of an adverse action and is considered the offer of settlement for all reimbursement issues for the reporting period under consideration.

9.4.C. RHC Rejection of the Audit Adjustment Report

Within 30 calendar days of the mailing date of the Audit Adjustment Report, the RHC may reject any or all of the findings in the Audit Adjustment Report and request a post-audit conference.

The Post-Audit Conference is an informal process where the MDHHS HCRD staff and the RHC may resolve differences prior to an appeal and/or formal hearing. The process is initiated by the RHC after the receipt of the Audit Adjustment Report. The RHC must request in writing a Post-Audit Conference with the HCRD and indicate in that letter the area(s) of disagreement. The letter must state the appropriate regulation and/or other appropriate decisions that support the RHC’s position and be sent to MDHHS HCRD. (Refer to the Directory Appendix for contact information.)

The RHC or its representative must present, either before or at the time of the Post-Audit Conference, the audit staff with the documents and arguments that support its position relative to the disputed issue(s). The audit staff will explain to the RHC the basis for its findings. This step does not stop the recovery of monies due Medicaid.
9.5 APPEALS

RHCs have the right to appeal any adverse action taken by MDHHS, unless that adverse action resulted from an action over which MDHHS had no control (e.g., Medicare termination, license revocation). The appeal must be submitted in writing and mailed to the Michigan Office of Administrative Hearings and Rules (MOAHR). (Refer to the Directory Appendix for contact information.)

The appeal process is outlined in the MDHHS Medicaid Provider Reviews and Hearings administrative rules, Michigan Administrative Code R400.3402 through R400.3425. Any questions regarding the appeal process should be directed to MOAHR.

RHCs may appeal their respective Notice of Program Reimbursement if the contested issue(s) is other than those precluded due to failure to appeal rate adjustment(s) in the Audit Adjustment Report according to established time frames. Appeals accepted as appropriate are also governed by the aforementioned MDHHS Medicaid Provider Reviews and Hearings rules.

11.3 Audit Activities to be Performed by MDHHS Office of Audit Staff

11.4 Audit Findings and Resolution
SECTION 1 – GENERAL INFORMATION

This chapter applies to enrolled Intermediate School Districts, Detroit Public Schools Community District, and Michigan School for the Deaf.

This chapter describes the coverage and reimbursement policy for direct medical services, targeted case management, and personal care services. Coverage applies to individuals up to the age of 21 who are eligible under the provisions of the Individuals with Disabilities Education Act (IDEA) of 1990 as amended in 2004 and to those enrolled in programs that require an Individualized Education Program (IEP) or an Individualized Family Service Plan (IFSP). The Centers for Medicare & Medicaid Services (CMS) has determined that services provided in the "school" setting include services provided by qualified school staff in the "home" setting when necessary.

These services assist students with a disability to benefit from special education and related services. Medicaid reimbursement, through the Michigan Department of Health and Human Services (MDHHS), addresses the medical service needs of beneficiaries receiving special education and related services and provides funding for those services. The Social Security Act, as amended in 1988 by the Medicare Catastrophic Coverage Act, specifically provides for medical assistance (Medicaid) to cover "related services" which are specified in Federal Medicaid statute as medically necessary and "included in the child’s IEP established pursuant to Part B of the IDEA or furnished to a handicapped infant or toddler because such services are included in the child’s IFSP adopted pursuant to Part C (formerly called Part H) of such Act."

Section 504 of the Rehabilitation Act of 1973 requires local school districts to provide or pay for certain services to make education accessible to handicapped children. These services are described in an individualized service plan and provided free of charge to eligible individuals. Medicaid reimbursement is not allowed for these services.

Medicaid school based services are not covered for beneficiaries involuntarily residing in a detention setting with a Benefit Plan ID of INCAR-ESO, INCAR-MA, INCAR-MA-E, or MA-HMP-INC.

Coverage is based on medically necessary, Medicaid-covered services already being provided in the school setting and enables these services provided to Medicaid-eligible beneficiaries to be billed to Medicaid. This ensures federal participation in the funding of these Medicaid covered services. Enrollment as a Michigan Medicaid provider for services delivered in the school setting is limited to the Intermediate School Districts (ISDs), Detroit Public Schools Community District, and Michigan School for the Deaf. For the purpose of this document, the ISDs, Detroit Public Schools Community District, and Michigan School for the Deaf will be referred to as "ISDs" for simplicity.

Enrolled providers are required to establish an interagency agreement to facilitate coordination and cooperation with other human service agencies operating within the same service area. Medicaid services provided by the ISDs are to be provided as outlined in the IEP/IFSP treatment plan and are not expected to replace or substitute for services already provided by other agencies. If services are being provided by another program, ISDs are expected to coordinate the services to prevent service overlap and to assure continuity of care to the Medicaid beneficiary. Enrollment as a SBS provider is not expected to result in any change in the education agency’s set of existing services or service utilization. MDHHS periodically evaluates the impact of Medicaid enrollment on special education programs through review of service utilization and other program data and information.
Covered services do not require prior authorization but must be documented and provided by qualified personnel as specified in the Covered Services Section of this chapter.

The following terms have specific meanings in the school setting:

<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Assistive Technology Device (ATD)</td>
<td>Per IDEA, Section 602, the term &quot;assistive technology device&quot; means any item, piece of equipment or product system, whether acquired commercially off the shelf or modified or customized, that is used to increase, maintain, or improve functional capabilities of a child with a disability.</td>
</tr>
<tr>
<td>Assistive Technology Service</td>
<td>The term &quot;assistive technology service&quot; means any service that directly assists a child with a disability in the selection, acquisition or use of an assistive technology device.</td>
</tr>
<tr>
<td>Certified Public Expenditure</td>
<td>A certified public expenditure is an expenditure of a governmental unit whose state share is supported by tax dollars, or a mix of tax dollars and appropriated dollars, and is certified as eligible for federal match.</td>
</tr>
<tr>
<td>Claims Development Software</td>
<td>The claims development software is a custom-developed software that automates the school district claiming process. The claims development process is comprised of three components: sampling, training, and costs/claim generation.</td>
</tr>
<tr>
<td>Direct Medical Services Program</td>
<td>Direct medical services, specialized transportation, targeted case management and personal care services provided in the school setting and reimbursed by Medicaid.</td>
</tr>
</tbody>
</table>
| Durable Medical Equipment, Supplies, Prosthetics and Orthotics (DMEPOS) | - DME items are those that can stand repeated use, are primarily and customarily used to serve a medical purpose, are not useful to a person in the absence of an illness or injury, and can be used in the beneficiary’s home. DME is a covered benefit when:  
  - It is medically and functionally necessary to meet the needs of the beneficiary.  
  - It may prevent frequent hospitalization or institutionalization.  
  - It is life sustaining.  
- Medical Supplies are those items that are required for medical management of the beneficiary, are disposable or have a limited life expectancy, and can be used in the beneficiary’s home. Medical supplies are items that:  
  - Treat a medical condition.  
  - Prevent unnecessary hospitalization or institutionalization.  
  - Support DME used by the beneficiary.  
- Prosthetics artificially replace a portion of the body to prevent or correct a physical anomaly or malfunctioning portion of the body. Prosthetics are a benefit to:  
  - Improve and/or restore the beneficiary’s functional level.  
  - Enable a beneficiary to ambulate or transfer.  
- Orthotics assist in correcting or strengthening a congenital or acquired physical anomaly or malfunctioning portion of the body. Orthotics are a benefit to:  
  - Improve and/or restore the beneficiary’s functional level.  
  - Prevent or reduce contractures.  
  - Facilitate healing or prevent further injury. |
<table>
<thead>
<tr>
<th>Term</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Enrolled Medicaid Provider</td>
<td>The 56 Michigan Intermediate School Districts, Detroit Public Schools Community District, and Michigan School for the Deaf that have enrolled and revalidated with the MDHHS CHAMPS Provider Enrollment subsystem.</td>
</tr>
<tr>
<td>HT Modifier (Multi-disciplinary team)</td>
<td>The HT modifier is used when billing for an assessment, evaluation or test performed for the IDEA Assessment. Each qualified staff bills using the appropriate procedure code followed by the modifier HT (multi-disciplinary team).</td>
</tr>
<tr>
<td>IEP (Individualized Education Program)</td>
<td>A written plan for services for eligible students between the ages of 4 and 26 in Michigan as determined by the federal IDEA statute. Medicaid funds are available to reimburse for health and medical services that are a part of a student's IEP for beneficiaries up to the age of 21.</td>
</tr>
<tr>
<td>IFSP (Individualized Family Service Plan)</td>
<td>A written plan for a child with a disability who is between the ages of zero and three years that is developed jointly by the family and appropriate qualified personnel, and is based on multi-disciplinary evaluation and assessment of the child's unique strengths and needs, as well as a family-directed assessment of the priorities, resources and concerns. Medicaid funds are available to reimburse for health and medical services that are a part of a child's IFSP.</td>
</tr>
<tr>
<td>IDEA (Individuals with Disabilities Education Act)</td>
<td>The federal statute, IDEA of 1990 as amended in 2004, which requires public schools to determine whether a child has a disability, develop a plan that details the education and support services that the student will receive, provide the services, and evaluate the plan at least annually. There may be federal funding available for some of these responsibilities.</td>
</tr>
<tr>
<td>IDEA Assessment</td>
<td>An IDEA assessment is a formal evaluation that includes assessments, evaluations, tests and all related activities performed to determine if an individual is eligible under provisions of the IDEA of 1990, as amended in 2004, and are related to the evaluation and functioning of the individual.</td>
</tr>
<tr>
<td>ISD (District)</td>
<td>A corporate body established by statute in the Michigan Revised School Code (PA 451 of 1976) that is regulated by an intermediate school board. Michigan has 56 intermediate school districts.</td>
</tr>
<tr>
<td>MDE (Michigan Department of Education)</td>
<td>A department within the State of Michigan.</td>
</tr>
<tr>
<td>Random Moment Time Study</td>
<td>A random moment sampling to determine the extent to which Medicaid-reimbursable activities are being performed by capturing what is done during a specific moment in time.</td>
</tr>
<tr>
<td>School-Based Services</td>
<td>A program which provides medically necessary Medicaid covered services in the school setting. All Michigan ISDs, Detroit Public Schools Community District, and Michigan School for the Deaf participate in the Direct Medical Services Program.</td>
</tr>
<tr>
<td>School Clinical Record</td>
<td>All the written or electronic information that has been created and is necessary to fully disclose and document the services requested for reimbursement.</td>
</tr>
<tr>
<td>Special Education Transportation</td>
<td>Transport to and from the student's pick-up and drop-off site where school based services are provided.</td>
</tr>
<tr>
<td>TL Modifier (Re-evaluation of Existing Data (REED))</td>
<td>The TL modifier is used with the appropriate procedure codes to identify when a re-evaluation of existing data (REED) was used in the determination of the child's eligibility for special education services.</td>
</tr>
</tbody>
</table>
The TM modifier is used when billing for the multi-disciplinary team assessment for the development, review and revision of an IEP/IFSP treatment plan. Each qualified staff bills for this assessment using the appropriate procedure code with the modifier TM (Individualized Education Program [IEP]).

If an evaluation indicates that Medicaid-covered services are required, the qualified staff must develop and maintain a treatment plan for the student. The student's IEP/IFSP form may suffice as the treatment plan as long as the IEP/IFSP contains the required components described under the Treatment Plan subsection of this section.

1.1 CHILDREN’S SPECIAL HEALTH CARE SERVICES

The Medicaid School Based Services program covers services provided to children who are determined either dually eligible for Children’s Special Health Care Services (CSHCS) and Medicaid (Title V/XIX), or those eligible for only Medicaid (Title XIX). SBS providers are not reimbursed for beneficiaries enrolled only in the CSHCS program (Title V only), and must not submit claims for these beneficiaries.

1.2 THIRD PARTY LIABILITY

Federal regulations require that all identifiable financial resources available for payment be billed prior to billing Medicaid. If a Medicaid-eligible child is presently covered by another resource and the school district does not bill the other resource, Medicaid cannot be billed for the services. (Refer to the Coordination of Benefits chapter for additional information.)

1.3 MEDICAL NECESSITY

A Medicaid service provided by an ISD is determined medically necessary when all of the following criteria are met:

- Addresses a medical or mental disability;
- Needed to attain or retain the capability for normal activity, independence or self care;
- Is included in the student’s IEP/IFSP treatment plan; and
- Is ordered, in writing, by a physician or other licensed practitioner acting within the scope of his/her practice under State law. Students who require speech, language and hearing services must be referred. The written order/referral must be updated at least annually. A stamped signature is not acceptable.

1.4 UNDER THE DIRECTION OF AND SUPERVISION

Certain specified services may be provided under the direction of or under the supervision of another clinician. For the supervising clinician, "under the direction of" means that the clinician is supervising the individual's care which, at a minimum, includes seeing the individual initially, prescribing the type of care to be provided, reviewing the need for continued services throughout treatment, assuring professional responsibility for services provided, and ensuring that all services are medically necessary. "Under the direction of" requires face-to-face contact by the clinician at least at the beginning of treatment and periodically thereafter.
"Supervision of" limited-licensed mental health professionals consists of the practitioner meeting regularly with another professional, at an interval described within the professional administrative rules, to discuss casework and other professional issues in a structured way. This is often known as clinical or counseling supervision or consultation. The purpose is to assist the practitioner to learn from his or her experience and expertise, as well as to ensure good service to the client or patient.

1.5 COVERED SERVICES

Medicaid covered services billed by ISDs include:

- Evaluations and tests performed for assessments
- Occupational Therapy Services
- Orientation and Mobility Services
- Assistive Technology Device Services
- Physical Therapy Services
- Speech, Language and Hearing Therapy Services
- Psychological, Counseling and Social Work Services
- Developmental Testing Services
- Nursing Services
- Physician and Psychiatrist Services
- Personal Care Services
- Targeted Case Management (TCM) Services
- Specialized Transportation Services

1.6 SERVICE EXPECTATIONS

The IEP/IFSP treatment plan must include the appropriate annual goals and short-term objectives, criteria, evaluation procedures, and schedules for determining whether the objectives are being achieved within an appropriate period of time (at least annually). All therapy services must be skilled (i.e., require the skills, knowledge, and education of a licensed occupational therapist, licensed physical therapist, or fully licensed speech-language pathologist or licensed audiologist). Interventions expected to be provided by another practitioner (e.g., teacher, registered nurse), family member or caregiver are not reimbursable as occupational, physical, or speech, language and hearing therapy by this program.

To be covered by Medicaid, occupational, physical, and speech, language and hearing therapy must address a beneficiary’s medical need that affects his/her ability to learn in the classroom environment. MDHHS does not reimburse for therapies that do not have medically related goals (i.e., handwriting, increasing attention span, identifying colors and numbers, enhancing vocabulary, improving sentence structure, and reading).

Group therapy or treatment must be provided in groups of two to eight. Services provided as part of a regular classroom activity are not reimbursable. When regularly scheduled attention is provided to one beneficiary who is part of the class currently in session, the service is not reimbursable.
Supplies or equipment utilized in service delivery are included as part of the service and are not reimbursed separately. Art, music and recreation therapies are not covered services.

Medicaid is required to follow the procedure code definition from the Current Procedural Terminology (CPT) and Healthcare Common Procedure Coding System (HCPCS) manuals. Procedure codes referencing office or outpatient facility include the medical services provided in the school setting. Procedure codes that do not specify a unit of time are to be billed per session. Group therapy is billed per beneficiary.

Certain CPT/HCPCS code descriptions include a specified unit of service time. Service times are based on the time it generally takes to provide the service. If the procedure code specifies "up to 15 minutes of service", the service may be billed in a unit of time from 1-15 minutes. If the procedure code specifies a unit of time "each 15 minutes", the code may be billed when the service time equals the specified unit of time. Any additional time cannot be billed unless the full time specified is reached.

Consultation or consultative services are an integral part or an extension of a direct medical service and are not separately reimbursable.

### 1.7 Treatment Plan

| Requirements | If an evaluation indicates that Medicaid-covered services are required, the qualified staff must develop and maintain a treatment plan for the beneficiary. The beneficiary's IEP/IFSP form may suffice as the treatment plan as long as the IEP/IFSP contains the required components described below. Only qualified staff may initiate, develop or change the beneficiary's treatment plan. The treatment plan must be signed, titled and dated by the qualified staff prior to billing Medicaid for services and must be retained in the beneficiary's school clinical record. (Refer to the Covered Services Section of this chapter for definitions of qualified staff.) |
| Components | The treatment plan, which is an immediate result of the evaluation, must consist of the following components: |
| | - Beneficiary’s name; |
| | - Description of the beneficiary’s qualifying diagnosis and medical condition; |
| | - Time-related goals that are measurable and significant to the beneficiary’s function and/or mobility; |
| | - Long-term goals that identify specific functional achievement to serve as indicators that the service is no longer needed; |
| | - Anticipated frequency and duration of treatment required to meet the time-related goals; |
| | - Plan for reaching the functional goals and outcomes in the IEP/IFSP; |
| | - A statement detailing coordination of services with other providers (e.g., medical and educational); and |
| | - All services are provided with the expectation that the beneficiary’s primary care provider and, if applicable, the beneficiary’s case manager are informed on a regular basis. |
The treatment plan must be reviewed and updated at least annually as part of the IEP/IFSP multi-disciplinary team assessment process, or more frequently if the beneficiary’s condition changes or alternative treatments are recommended.

1.8 EVALUATIONS

Evaluations for medical services are covered when:

- Performed as part of the IDEA Assessment.
- The beneficiary left and is re-entering special education.
- An initial development, review or revision of the student’s IEP/IFSP treatment plan will occur.
- A change or decrease in function occurs.

1.8.A. EVALUATIONS PERFORMED FOR DMEPOS MEDICAL SUPPLIERS

If an ISD physical therapist, occupational therapist, speech pathologist or audiologist performs assessments for DMEPOS that are billed by a Medicaid medical supplier, the clinician must comply with all prior authorization policies and procedures regarding that DMEPOS item. For example, a physician must order the assessment. The clinician must comply with all requirements for the assessments specified in the Medical Supplier Chapter of this manual. For example, the clinician must perform and write his/her own evaluation and may not sign evaluations completed by a medical supplier. Three appropriate economical alternatives must be ruled out for some items. (Refer to the Medical Supplier Chapter of this manual for details.) If the child is also receiving physical therapy, occupational therapy, speech pathology or audiology services in another outpatient setting, it may be more appropriate for the outpatient clinician to perform the assessment. The ISD clinician must coordinate with all clinicians in other settings.
### 2.1 Individuals with Disabilities Education Act Assessment and IEP/IFSP Development, Review and Revision

**Definition**

The Individuals with Disabilities Education Act (IDEA) Assessment is a formal evaluation that includes assessments, evaluations, tests and all related activities performed to determine if a beneficiary is eligible under provisions of the IDEA of 1990, as amended in 2004, and are related to the evaluation and functioning of the beneficiary. These services are reimbursable only after they result in the implementation of an IEP/IFSP treatment plan. If an IEP/IFSP treatment plan is not implemented within one year of the date of service, then none of the services provided are covered.

**Provider Qualifications**

Qualified staff can bill for assessments, tests, and evaluations performed for the IDEA Assessment. To be covered by Medicaid, the staff must have the following Michigan current credentials:

- A licensed occupational therapist (OT)
- A certified orientation and mobility specialist (O&M)
- A licensed physical therapist (PT)
- A fully licensed speech-language pathologist (SLP)
- A licensed audiologist
- A fully licensed psychologist
- A limited-licensed psychologist (under the supervision of a licensed psychologist)
- A licensed professional counselor
- A limited-licensed counselor (under the supervision of a licensed professional counselor)
- A licensed master’s social worker
- A limited-licensed master’s social worker (under the supervision of a licensed master’s social worker)
- A licensed physician or psychiatrist (MD or DO)
- A registered nurse (RN)
### Procedure Codes

Qualified staff can bill for three distinct types of assessments/evaluations/tests. All activities, such as meetings and written reports related to the assessment/evaluation/test, are an integral part or extension of the service and are not separately reimbursable. For a complete listing of procedure codes, refer to the School Based Services CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)

- **The HT modifier** is used with the procedure code when billing for an assessment/evaluation/test performed for the IDEA Assessment. Each qualified staff bills using the appropriate procedure code below followed by the modifier HT (multi-disciplinary team). The date of service is the date of determination of eligibility for special education or early-on services. The determination date must be included in the assessment/evaluation/test.

- **The TL modifier** is used with the appropriate procedure codes to identify when a re-evaluation of existing data (REED) was used in the determination of the child's eligibility for special education services.

- **The TM modifier** is used with the procedure code when billing for the multi-disciplinary team assessment to develop, review and revise an IEP/IFSP treatment plan. Each qualified staff bills using the appropriate procedure code below with the modifier TM (Individualized Education Program [IEP]). The date of service is the date of the multi-disciplinary team assessment.

- **52 Modifier (Reduced Services)** - The 52 modifier is used to describe circumstances in which services provided were reduced in comparison to the full description of the service.

- No modifier is used when assessments/evaluations/tests are provided not related to the IDEA Assessment or the IEP/IFSP treatment plan development, review and revision. Each qualified staff bills for these activities using the appropriate procedure code below with no modifier. The date of service is the date the assessment/evaluation/test is completed.

### 2.2 Occupational Therapy (Includes Orientation and Mobility Services and Assistive Technology Device Services)

#### 2.2.A. Occupational Therapy Services

<table>
<thead>
<tr>
<th>Definition</th>
<th>Occupational Therapy:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Occupational therapy (OT) must be rehabilitative, active or restorative and designed to correct or compensate for a medical problem interfering with age-appropriate functional performance. Occupational therapy services must require the skills, knowledge, and education of a licensed occupational therapist, licensed occupational therapy assistant, or Orientation and Mobility specialist.</td>
</tr>
</tbody>
</table>

<p>| Prescription | Occupational therapy services must be prescribed by a physician and updated annually. A stamped physician signature is not acceptable. Services supported by an Individualized Education Program can precede the signed prescription by up to 90 days; however, the active period of the prescription cannot be longer than one year. |</p>
<table>
<thead>
<tr>
<th><strong>Provider Qualifications</strong></th>
<th>OT services may be reimbursed when provided by:</th>

<tr>
<td></td>
<td>• The beneficiary's current functional status (functional baseline);</td>
</tr>
<tr>
<td></td>
<td>• The standardized and other evaluation tools used to establish the baseline and to document progress;</td>
</tr>
<tr>
<td></td>
<td>• Assessment of the beneficiary's performance components (strength, dexterity, range of motion, sensation, perception) directly affecting the beneficiary's ability to function;</td>
</tr>
<tr>
<td></td>
<td>• Assessment of the beneficiary's cognitive skill level (e.g., ability to follow directions, including auditory and visual, comprehension); and</td>
</tr>
<tr>
<td></td>
<td>• Evaluation of the needs related to assistive technology device services, including a functional evaluation of the beneficiary.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th><strong>Assessments for Durable Medical Equipment</strong></th>
<th>If an ISD occupational therapist performs assessments for DMEPOS that are billed by a Medicaid medical supplier, the clinician must comply with all prior authorization policies and procedures regarding that DMEPOS item. For example, a physician must order the assessment. The clinician must comply with all requirements for the assessments specified in the Medical Supplier Chapter of this manual. For example, the clinician must perform and write his/her own evaluation and may not sign evaluations completed by a medical supplier. Three appropriate economical alternatives must be ruled out for some items. (Refer to the Medical Supplier Chapter of this manual for details.) If the child is also receiving physical therapy, occupational therapy, speech pathology or audiology services in another outpatient setting, it may be more appropriate for the outpatient clinician to perform the assessment. The ISD clinician must coordinate with all clinicians in other settings.</th>
</tr>
</thead>
</table>
Occupational therapy services include:
- Group therapy provided in a group of two to eight beneficiaries;
- Manual therapy techniques (e.g., mobilization/manipulation, manual lymphatic drainage, manual traction), one or more regions;
- Wheelchair management/propulsion training;
- Independent living skills training;
- Coordinating and using other therapies, interventions, or services with the ATD;
- Training or technical assistance for the beneficiary or, if appropriate, the beneficiary’s parent/guardian;
- Training or technical assistance for professionals providing other education or rehabilitation services to the beneficiary receiving ATD services;
- Neuromuscular re-education of movement, balance, coordination, kinesthetic sense, posture, and/or proprioception for sitting and/or standing activities;
- Evaluating the needs of the beneficiary, including a functional evaluation of the beneficiary. ATD services are intended to directly assist a beneficiary with a disability in the selection, coordination of acquisition, or use of an ATD; or
- Selecting, providing for the acquisition of the device, designing, fitting, customizing, adapting, applying, retaining, or replacing the ATD, including orthotics.

For a complete listing of procedure codes, refer to the School Based Services CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)

2.2.B. ORIENTATION AND MOBILITY SERVICES

**Definition**
Orientation and mobility services are services provided to blind or visually impaired students by qualified personnel to enable those students to attain systematic orientation to and safe movement within their environment in the school, home and community. Services are based on the individual student’s needs for assistance in compensatory skill development, visual efficiency, utilization of low vision aids/devices and technology, etc.

Spatial and environmental concepts and use of information received by the senses (such as sound, temperature and vibration) to establish, maintain, or regain orientation and line of travel (for example, using sound at a traffic light to cross the street); to use the long cane, as appropriate, to supplement visual travel skills or as a tool for safely negotiating the environment for students with no available travel vision; and to understand and use remaining vision and distance low vision aids/devices, as appropriate.

**Prescription**
Orientation and mobility services must be prescribed by a physician and updated annually. A stamped physician signature is not acceptable.

Services supported by an Individualized Education Program can precede the signed prescription by up to 90 days; however, the active period of the prescription cannot be longer than one year.
**Provider Qualifications**

Orientation and mobility services may be reimbursed when provided by:

- A certified orientation and mobility specialist with current certification from the Academy for Certification of Vision Rehabilitation and Education Professionals (ACVREP); or
- A licensed occupational therapist.

**Evaluations**

Evaluations are formalized testing and reports for the development of the beneficiary’s treatment plan. They may be completed by an Orientation and Mobility Specialist (O&M) or a licensed occupational therapist.

An evaluation for Orientation and Mobility services includes:

- The treatment diagnosis and the medical diagnosis, if different from the treatment diagnosis;
- Medical history as it relates to the current course of therapy;
- The beneficiary’s current functional status (functional baseline);
- The standardized and other evaluation tools used to establish the baseline and to document progress;
- Assessment of the beneficiary’s performance components (status of sensory skills, proficiency of use of travel tools, current age-appropriate independence, complexity or introduction of new environment, caregiver input, assessment in the home/living environment, assessment in the school environment, assessment in the residential/neighborhood environment, assessment in the commercial environment, and assessment in the public transportation environment);
- Assessment of the beneficiary’s cognitive skill level (e.g., ability to follow directions, including auditory and visual comprehension); and
- Evaluation of the needs related to assistive technology device services, including a functional evaluation of the beneficiary.

**Services**

Orientation and mobility services include:

- Providing assistance in the development of skills and knowledge that enable the child to travel independently to the highest degree possible, based on assessed needs and the IEP;
- Training the child to travel with proficiency, safety and confidence in familiar and unfamiliar environments;
- Preparing and using equipment and material, such as tactile maps, models, distance low vision aids/devices, and long canes, for the development of orientation and mobility skills;
- Evaluation and training performed to correct or alleviate movement deficiencies created by a loss or lack of vision;
- Communication skills training (teaching Braille is not a covered benefit);
- Systematic orientation training to allow safe movement within their environments in school, home and community;
- Spatial and environmental concept training and training in the use of information received by the senses (such as sound, temperature and vibration) to establish, maintain, or regain orientation;
- Visual training to understand and use the remaining vision for those with low vision;
- Training necessary to activate visual motor abilities;
- Training to use distance low vision aids/devices; and
- Independent living skills training.

**Procedure Codes**

For a complete listing of procedure codes, refer to the School Based Services CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)

---

**2.2.C. ASSISTIVE TECHNOLOGY DEVICE SERVICES**

<table>
<thead>
<tr>
<th>Definition</th>
<th>Assistive Technology Device Services General Description: Utilizing the description in Section 602(2) of the Individuals with Disabilities Education Act (IDEA), the term 'assistive technology device' means any item, piece of equipment, or product system, whether acquired commercially off the shelf, modified, or customized, that is used to increase, maintain, or improve functional capabilities of a child with a disability. Therapists should restrict their evaluations and services to those within the scope of their practice and consistent with their education and training.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prescription</td>
<td>Assistive technology device services must be prescribed by a physician and updated annually. A stamped physician signature is not acceptable.</td>
</tr>
</tbody>
</table>
| Provider Qualifications | Assistive technology device services may be reimbursed when provided by:
- A licensed occupational therapist (OT); or
- A licensed occupational therapy assistant (OTA). |
| Evaluations for Assistive Technology Devices | Evaluations are formalized testing and reports for the development of the beneficiary's treatment plan. They may be completed by a licensed occupational therapist. An evaluation includes:
- The treatment diagnosis and the medical diagnosis, if different from the treatment diagnosis;
- Current therapy being provided to the beneficiary in this and other settings;
- Medical history as it relates to the current course of therapy;
- The beneficiary’s current functional status (functional baseline);
- The standardized and other evaluation tools used to establish the baseline and to document progress;
- Assessment of the beneficiary’s performance components (strength, dexterity, range of motion, sensation, perception) directly affecting the beneficiary’s ability to function;
- Assessment of the beneficiary’s cognitive skill level (e.g., ability to follow directions, including auditory and visual, comprehension); and
- Evaluation of the needs related to assistive technology device services, including a functional evaluation of the beneficiary in the school environment and home. |
### Assessments for Durable Medical Equipment
If an ISD occupational therapist performs assessments for DMEPOS that are billed by a Medicaid medical supplier, the clinician must comply with all prior authorization policies and procedures regarding that DMEPOS item. For example, a physician must order the assessment. The clinician must comply with all requirements for the assessments specified in the Medical Supplier Chapter of this manual. For example, the clinician must perform and write his/her own evaluation and may not sign evaluations completed by a medical supplier. Three appropriate economical alternatives must be ruled out for some items. (Refer to the Medical Supplier Chapter of this manual for details.) If the child is also receiving physical therapy, occupational therapy, speech pathology or audiology services in another outpatient setting, it may be more appropriate for the outpatient clinician to perform the assessment. The ISD clinician must coordinate with all clinicians in other settings.

### Services
ATD services are intended to directly assist a beneficiary with a disability in the selection, coordination of acquisition, or use of an ATD. The direct acquisition of medical equipment, such as wheelchairs etc., is not a covered benefit of the SBS program; this service must be billed under the Medical Supplier program coverage. The direct acquisition of medical equipment is covered under the Medical Supplier Medicaid benefit.

Assistive Technology Device Services include:

- Coordinating and using other therapies, interventions, or services with the ATD.
- Training or technical assistance for the beneficiary or, if appropriate, the beneficiary’s parent/guardian.
- Training or technical assistance for professionals providing other education or rehabilitation services to the beneficiary receiving ATD services.
- Neuromuscular re-education of movement, balance, coordination, kinesthetic sense, posture, and/or proprioception for sitting and/or standing activities.
- Evaluating the needs of the beneficiary, including a functional evaluation of the beneficiary. ATD services are intended to directly assist a beneficiary with a disability in the selection, coordination of acquisition, or use of an ATD.
- Selecting, providing for the acquisition of the device, designing, fitting customizing, adapting, applying, retaining or replacing the ATD, including orthotics.
- Wheelchair assessment, fitting, training. If the wheelchair assessment is for equipment billed by a Medicaid medical supplier, all prior authorization and coverage policies and procedures in the Medical Supplier Chapter of this manual must be adhered to by school based providers.

### Procedure Codes
For a complete listing of procedure codes, refer to the School Based Services CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)
## 2.3 Physical Therapy Services (Includes Assistive Technology Device Services)

### 2.3.A. Physical Therapy Services

<table>
<thead>
<tr>
<th>Definition</th>
<th>Physical therapy (PT) must be rehabilitative, active or restorative and designed to correct or compensate for a medical problem. Physical therapy services must require the skills, knowledge and education of a PT or PTA to provide therapy. Treatment is performed through the use of therapeutic exercises and rehabilitative procedures.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prescription</td>
<td>Physical therapy services must be prescribed by a physician and updated annually. A stamped physician signature is not acceptable.</td>
</tr>
</tbody>
</table>
| Provider Qualifications | PT services may be reimbursed when provided by:  
- A licensed physical therapist (PT); or  
- A licensed physical therapy assistant (PTA) under the direction of a licensed physical therapist (PT) (i.e., the PT supervises and monitors the PTA’s performance with continuous assessment of the beneficiary’s progress). All documentation must be reviewed and signed by the supervising PT. |
| Evaluations for Physical Therapies | Evaluations are formalized testing and reports to determine a beneficiary’s need for services and recommend a course of treatment. They may be completed by a PT. Evaluations include:  
- The treatment diagnosis and the medical diagnosis, if different than the treatment diagnosis;  
- Current therapy being provided to the beneficiary in this and other settings;  
- Medical history as it relates to the current course of therapy;  
- The beneficiary’s current functional status (i.e., functional baseline);  
- The standardized and other evaluation tools used to establish the baseline and to document progress;  
- Assessment of the beneficiary’s performance components (e.g., strength, dexterity, range of motion) directly affecting the beneficiary’s ability to function;  
- Assessment of the beneficiary’s cognitive skill level (e.g., ability to follow directions, including auditory and visual, comprehension); and  
- Evaluation of the needs related to assistive technology device services, including a functional evaluation of the beneficiary. |
### Assessments for Durable Medical Equipment

If an ISD physical therapist performs assessments for DMEPOS that are billed by a Medicaid medical supplier, the clinician must comply with all prior authorization policies and procedures regarding that DMEPOS item. For example, a physician must order the assessment. The clinician must comply with all requirements for the assessments specified in the Medical Supplier Chapter of this manual. For example, the clinician must perform and write his/her own evaluation and may not sign evaluations completed by a medical supplier. Three appropriate economical alternatives must be ruled out for some items. (Refer to the Medical Supplier Chapter of this manual for details.) If the child is also receiving physical therapy, occupational therapy, speech pathology or audiology services in another outpatient setting, it may be more appropriate for the outpatient clinician to perform the assessment. The ISD clinician must coordinate with all clinicians in other settings.

### Services

Physical therapy services include:
- Group therapy provided in a group of two to eight beneficiaries;
- Gait training;
- Training in functional mobility skills (e.g., ambulation, transfers, and wheelchair mobility);
- Stretching for improved flexibility; and
- Modalities to allow gains of function, strength or mobility.

### Procedure Codes

For a complete listing of procedure codes, refer to the School Based Services CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)

### Evaluations for Assistive Technology Devices

Evaluations are formalized testing and reports for the development of the beneficiary’s treatment plan. They may be completed by a PT.

An evaluation includes:

- The treatment diagnosis and the medical diagnosis, if different from the treatment diagnosis;
- Current therapy being provided to the beneficiary in this and other settings;
- Medical history as it relates to the current course of therapy;
- The beneficiary’s current functional status (functional baseline);
- The standardized and other evaluation tools used to establish the baseline and to document progress;
- Assessment of the beneficiary’s performance components (strength, dexterity, range of motion, sensation, perception) directly affecting the beneficiary’s ability to function;
- Assessment of the beneficiary’s cognitive skill level (e.g., ability to follow directions, including auditory and visual, comprehension); and
- Evaluation of the needs related to assistive technology device services, including a functional evaluation of the beneficiary in the school environment and home.

### Assessments for Durable Medical Equipment

If an ISD physical therapist performs assessments for DMEPOS that are billed by a Medicaid medical supplier, the clinician must comply with all prior authorization policies and procedures regarding that DMEPOS item. For example, a physician must order the assessment. The clinician must comply with all requirements for the assessments specified in the Medical Supplier Chapter of this manual. For example, the clinician must perform and write his/her own evaluation and may not sign evaluations completed by a medical supplier. Three appropriate economical alternatives must be ruled out for some items. (Refer to the Medical Supplier Chapter of this manual for details.) If the child is also receiving physical therapy, occupational therapy, speech pathology or audiology services in another outpatient setting, it may be more appropriate for the outpatient clinician to perform the assessment. The ISD clinician must coordinate with all clinicians in other settings.
Services

ATD services are intended to directly assist a beneficiary with a disability in the selection, coordination of acquisition, or use of an ATD. The direct acquisition of medical equipment, such as wheelchairs, etc., is not a covered benefit of the SBS program; this service must be billed under the Medical Supplier program coverage. The direct acquisition of medical equipment is covered under the Medical Supplier Medicaid benefit.

Assistive Technology Device Services include:

- Coordinating and using other therapies, interventions, or services with the ATD.
- Training or technical assistance for the beneficiary or, if appropriate, the beneficiary’s parent/guardian.
- Training or technical assistance for professionals providing other education or rehabilitation services to the beneficiary receiving ATD services.
- Evaluating the needs of the beneficiary, including a functional evaluation of the beneficiary. ATD services are intended to directly assist a beneficiary with a disability in the selection, coordination of acquisition, or use of an ATD.
- Selecting, providing for the acquisition of the device, designing, fitting customizing, adapting, applying, retaining or replacing the ATD, including orthotics.
- Wheelchair assessment, fitting, training. If the wheelchair assessment is for equipment billed by a Medical Supplier, all prior authorization and coverage policies and procedures in the Medical Supplier Chapter of this manual must be adhered to by school based providers.

Procedure Codes

For a complete listing of procedure codes, refer to the School Based Services CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)

2.4 SPEECH, LANGUAGE AND HEARING THERAPY (INCLUDES ASSISTIVE TECHNOLOGY DEVICE SERVICES)

2.4.A. SPEECH, LANGUAGE AND HEARING THERAPY

Definition

Speech, language and hearing therapy must be a diagnostic or corrective service to teach compensatory skills for deficits that directly result from a medical condition. This service is provided to beneficiaries with a diagnosed speech, language or hearing disorder adversely affecting the functioning of the beneficiary. Speech, language and hearing therapy must require the skills, knowledge and education of a fully licensed speech-language pathologist or audiologist to provide the therapy.

Prescription

Speech, language and hearing services require an annual referral from a physician. A stamped physician signature is not acceptable.

Services supported by an Individualized Education Program can precede the signed referral by up to 90 days; however, the active period of the referral cannot be longer than one year.
### Provider Qualifications

Speech, language and hearing services may be reimbursed when provided by:

- A fully licensed speech-language pathologist (SLP);
- A licensed audiologist in Michigan;
- A speech-language pathologist (SLP) and/or audiology candidate (i.e., in his clinical fellowship year or having completed all requirements but has not obtained a license), under the direction of a qualified SLP or audiologist. All documentation must be reviewed and signed by the appropriately licensed SLP or licensed audiologist; or
- A limited licensed speech language pathologist, under the direction of a fully licensed SLP or audiologist. All documentation must be reviewed and signed by the appropriately licensed supervising SLP or licensed audiologist.

### Evaluations for Speech Pathology Services

Evaluations are formalized testing and reports conducted to determine the need for services and recommendation for a course of treatment. They may be completed by a licensed SLP or audiologist.

Evaluations include:

- The treatment diagnosis and the medical diagnosis, if different from the treatment diagnosis;
- Current therapy being provided to the beneficiary in this and other settings;
- Medical history as it relates to the current course of therapy;
- The beneficiary’s current communication status (functional baseline);
- The standardized and other evaluation tools used to establish the baseline and to document progress; and
- Evaluation of the needs related to assistive technology device services, including a functional evaluation of the beneficiary.

Evaluations may also include, but are not limited to:

- Articulation - standardized tests that measure receptive and expressive language, mental age, oral motor skills, articulation skills, current diet level (including difficulties with any food consistencies), current means of communication, and a medical diagnosis.
- Language - standardized tests that measure receptive and expressive language, mental age, oral motor skills, current and previous means of communication, and medical diagnosis(es).
- Rhythm - standardized tests that measure receptive and expressive language, mental age, oral motor skills, and measurable assessment of dysfluency, current means of communication, and a medical diagnosis.
- Swallowing - copy of the video fluoroscopy or documentation that objectively addresses the laryngeal and pharyngeal stages, oral motor assessment that measures consistencies that have been attempted and the results, voice quality (i.e., pre- and post-feeding and natural voice), articulation assessment, and a standardized cognitive assessment.
- Voice - copy of the physician’s medical assessment of the beneficiary’s voice mechanism and the medical diagnosis.
Speech Assessments for Durable Medical Equipment

If an ISD speech pathologist or audiologist performs assessments for DMEPOS that are billed by a Medicaid medical supplier, the clinician must comply with all prior authorization policies and procedures regarding that DMEPOS item. For example, a physician must order the assessment. The clinician must comply with all requirements for the assessments specified in the Medical Supplier Chapter of this manual. For example, the clinician must perform and write his/her own evaluation and may not sign evaluations completed by a medical supplier. Three appropriate economical alternatives must be ruled out for some items. (Refer to the Medical Supplier Chapter of this manual for details.) If the child is also receiving physical therapy, occupational therapy, speech pathology or audiology services in another outpatient setting, it may be more appropriate for the outpatient clinician to perform the assessment. The ISD clinician must coordinate with all clinicians in other settings.

### Evaluations for Assistive Technology Devices

Evaluations are formalized testing and reports for the development of the beneficiary's treatment plan. They may be completed by an audiologist or SLP.

An evaluation includes:

- The treatment diagnosis and the medical diagnosis, if different from the treatment diagnosis;
- Current therapy being provided to the beneficiary in this and other settings;
- Medical history as it relates to the current course of therapy;
- The beneficiary's current functional status (functional baseline);
- The standardized and other evaluation tools used to establish the baseline and to document progress;
- Assessment of the beneficiary's performance components (strength, dexterity, range of motion, sensation, perception) directly affecting the beneficiary's ability to function;
- Assessment of the beneficiary's cognitive skill level (e.g., ability to follow directions, including auditory and visual, comprehension); and
- Evaluation of the needs related to assistive technology device services, including a functional evaluation of the beneficiary in the school environment and home.

### Assessments for Durable Medical Equipment

If an ISD audiologist or speech-language pathologist performs assessments for DMEPOS that are billed by a Medicaid medical supplier, the clinician must comply with all prior authorization policies and procedures regarding that DMEPOS item. For example, a physician must order the assessment. The clinician must comply with all requirements for the assessments specified in the Medical Supplier Chapter of this manual. For example, the clinician must perform and write his/her own evaluation and may not sign evaluations completed by a medical supplier. Three appropriate economical alternatives must be ruled out for some items. (Refer to the Medical Supplier Chapter of this manual for details.) If the child is also receiving physical therapy, occupational therapy, speech pathology or audiology services in another outpatient setting, it may be more appropriate for the outpatient clinician to perform the assessment. The ISD clinician must coordinate with all clinicians in other settings.

### Services

ATD services are intended to directly assist a beneficiary with a disability in the selection, coordination of acquisition, or use of an ATD. The direct acquisition of medical equipment, such as wheelchairs, etc., is not a covered benefit of the SBS program; this service must be billed under the Medical Supplier program coverage. The direct acquisition of medical equipment is covered under the Medicaid Medical Supplier benefit.

Assistive Technology Device Services include:

- Coordinating and using other therapies, interventions, or services with the ATD.
- Training or technical assistance for the beneficiary or, if appropriate, the beneficiary's parent/guardian.
- Training or technical assistance for professionals providing other education or rehabilitation services to the beneficiary receiving ATD services.
- Evaluating the needs of the beneficiary, including a functional evaluation of the beneficiary. ATD services are intended to directly assist a beneficiary with a disability in the selection, coordination of acquisition, or use of an ATD.
### Procedure Codes

For a complete listing of procedure codes, refer to the School Based Services CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)

---

(Subsection 2.4.C. Telepractice for Speech, Language and Hearing Services was deleted per bulletins MSA 20-09, MSA 21-24, MMP 23-10 and the development of the Telemedicine Chapter.)

#### 2.5 Psychological, Counseling and Social Work Services

**Definitions**

Psychological, counseling and social work services include planning, managing and providing a program of face-to-face services for beneficiaries with diagnosed psychological conditions. Psychological, counseling and social work services must require the skills, knowledge and education of a psychologist, counselor or licensed social worker to provide treatment.

Psychotherapy is the treatment of a mental disorder or behavioral disturbance for which the clinician provides services through definitive therapeutic communication, attempts to alleviate the emotional disturbances, reverses or changes maladaptive patterns of behavior, and encourages personality growth and development. The codes for reporting psychotherapy are divided into two broad categories: Interactive Psychotherapy, and Insight-Oriented, Behavior-Modifying and/or Supportive Psychotherapy.

- Interactive psychotherapy refers to the use of physical aids and nonverbal communication to overcome barriers to therapeutic interaction between the clinician and a beneficiary who has not yet developed, or has lost, either the expressive language communication skills to explain their symptoms and response to treatment, or the receptive communication skills to understand the clinician if they would use ordinary adult language for communication.

- Insight-oriented, behavior-modifying and/or supportive psychotherapy refers to the development of insight or affective understanding, the use of behavior modification techniques, the use of supportive interactions, and the use of cognitive discussion of reality or any combination of the above to provide therapeutic change.
**Provider Qualifications**

Psychological, counseling and social work services may be reimbursed when provided by:
- A licensed physician or psychiatrist in Michigan;
- A fully licensed psychologist in Michigan;
- A limited-licensed psychologist under the supervision of a licensed psychologist;
- A temporary limited-licensed psychologist under the supervision of a licensed psychologist;
- A licensed master's social worker in Michigan;
- A limited licensed master's social worker under the supervision of a licensed master's social worker;
- A licensed professional counselor in Michigan; or
- A limited licensed counselor under the supervision of a licensed professional counselor.

**Evaluations**

Evaluations or assessments include tests, interviews and behavioral evaluations that appraise cognitive, emotional, social functioning and self-concept. These may also include interpretations of information about a beneficiary's behavior and conditions relating to functioning. A qualified psychologist, counselor or licensed social worker must complete them.

**Psychological Testing**

Psychological testing includes tests, interviews, evaluations and recommendations for treatment. This may also include interpretations of information about a beneficiary's behavior and conditions relating to functioning. A fully licensed psychologist or a limited-licensed psychologist may perform psychological testing. Medicaid covers psychological testing that is reasonable and necessary for diagnosing the beneficiary's condition. Medicaid does not cover the time that a beneficiary spends alone in testing. The beneficiary’s clinical record must be signed and dated by the staff that administered the tests, and include the actual tests administered and completed reports. The protocols for testing must be available for review. Psychological testing may be billed per hour with a five-hour maximum per year, and a report must be generated from the results of the tests. In accordance with CPT guidelines, the service includes testing time only; it does not include writing a report. Writing the report is considered a part of the testing process and is a requirement for billing.

The psychological testing report must include all of the following:
- Beneficiary name and birth date;
- Psychological tests administered;
- Summary of testing results;
- Treatment recommendations; and
- Psychologist name and dated signature.

**Procedure Codes**

For a complete listing of procedure codes, refer to the School Based Services CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)
**Crisis Intervention**

Crisis intervention services are unscheduled activities performed for the purpose of resolving an immediate crisis situation. Activities include crisis response, assessment, referral and direct therapy. Since these services are unscheduled activities, they are not listed in the beneficiary's IEP/IFSP treatment plan.

Crisis intervention must be billed using the following procedure code:

- **S9484** – Crisis intervention mental health services, per hour.

*(Subsection 2.5.A. Telemedicine for Behavioral Health Services was deleted per bulletins MSA 20-09, MSA 21-24, MMP 23-10 and the development of the Telemedicine Chapter.)*

### 2.6 Developmental Testing

**Definition**

Developmental testing is medically related testing (not performed for educational purposes) provided to determine if motor, speech, language and psychological problems exist or to detect the presence of any developmental delays. Testing is accomplished by the combination of several testing procedures and includes the evaluation of the beneficiary's history and observation. Whenever possible and when age-appropriate, standardized objective measurements are to be used (e.g., Denver II) for children under the age of six. Administering the tests must generate material that is formulated into a report. Developmental testing done for educational purposes cannot be billed to Medicaid.

**Documentation**

The developmental testing report must include all of the following:

- Beneficiary name and birth date;
- Tests administered;
- A completed quarterly claim breakdown, produced by the claims development software;
- Treatment recommendations; and
- The dated signature, address and phone number of the person administering the tests.

**Provider Qualifications**

Developmental testing services may be reimbursed when provided by the following qualified staff in accordance with their professional credentials:

- A fully-licensed psychologist in the State of Michigan;
- A limited-licensed psychologist under the supervision of a licensed psychologist;
- A licensed master’s social worker in Michigan;
- A limited licensed master’s social worker under the supervision of a licensed master’s social worker; or
- A licensed physician or psychiatrist in Michigan.
### 2.7 Nursing Services

**Definition**

Nursing services are professional services relevant to the medical needs of the beneficiary provided through direct intervention. Direct service interventions must be medically based services that are within the scope of the professional practice of the Registered Nurse (RN) and Licensed Practical Nurse (LPN), provided during a face-to-face encounter, and provided on a one-to-one basis.

Services include:
- Catheterizations or Catheter care
- Maintenance of tracheotomies
- Medication administration
- Oxygen administration
- Tube feeding
- Suctioning
- Ventilator care

Services considered observation or stand-by in nature are not covered.

LPN services can only be billed if performed under the supervision of an RN or physician.

**Prescription**

Direct service interventions require a physician’s written order when the initial need for services is determined. Direct service interventions must be reviewed and revised annually or as medically necessary by the beneficiary’s attending physician. The nurse is responsible for notifying the attending physician of any change in the beneficiary’s condition which may result in a change or modification to the care plan.

**Provider Qualifications**

Nursing services may be reimbursed when provided by:
- A licensed Registered Nurse (RN) in Michigan; or
- A Licensed Practical Nurse (LPN) in Michigan.

**Evaluations**

A RN must complete the evaluations/assessments and prepare a nursing care plan. An evaluation/assessment may be performed when a change in the beneficiary’s medical condition occurs. LPNs cannot bill for evaluations/assessments.

**Procedure Codes**

For a complete listing of procedure codes, refer to the School Based Services CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)
### 2.8 Physician and Psychiatrist Services

**Definition**

Physician and psychiatrist services are services provided with the intent to diagnose, identify or determine the nature and extent of a beneficiary's medical or other health-related condition. Physician/psychiatrist services include:

- Evaluation and consultation with providers of covered services for diagnostic and prescriptive services; includes participation in multi-disciplinary team assessment.
- Record review for diagnostic and prescriptive services.

Only the services provided by a physician or psychiatrist (MD or DO) through SBS may be billed and reimbursed through the enrolled ISD.

Other physician or psychiatrist services, including those which may be delivered through other Medicaid-enrolled providers, are to be billed separately and may not be billed through the enrolled ISD.

<table>
<thead>
<tr>
<th>Provider Qualifications</th>
<th>A licensed physician or psychiatrist (MD or DO) in Michigan.</th>
</tr>
</thead>
</table>

**Procedure Codes**

For a complete listing of procedure codes, refer to the School Based Services CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)

Procedure codes that replicate the services of other billed codes, either in part or in total, will not be reimbursed for the same date of service.

If a physician order/referral is written as a result of a physician medical conference, the order/referral is considered to be a part of that service and is not separately reimbursable.
### 2.9 PERSONAL CARE SERVICES

**Definition**

Personal Care Services are a range of human assistance services provided to persons with disabilities and chronic conditions which enables them to accomplish tasks that they would normally do for themselves if they did not have a disability. Assistance may be in the form of hands-on assistance or cueing so that the person performs the task by him/herself.

Personal Care Services may be provided when:

- The service is medically necessary.

Personal Care Services are not covered if they are:

- Provided by a family member. A family member is described by the Centers for Medicare & Medicaid Services (CMS) to be "legally responsible relatives"; thus, spouses of beneficiaries and parents of minor beneficiaries (including stepparents who are legally responsible for minor children).

- Not documented in the IEP/IFSP.

- Educational in focus, such as tutoring, preparation of educational materials or Braille interpretation.

- Performed as a group service; however, one or more students may be served one-at-a-time sequentially.

Personal Care Services may include, but are not limited to, assisting with the following:

- Eating/feeding
- Respiratory assistance
- Toileting
- Grooming
- Dressing
- Transferring
- Ambulation
- Personal hygiene
- Mobility/Positioning
- Meal preparation
- Skin care
- Bathing
- Maintaining continence
- Assistance with self-administered medications
- Redirection and intervention for behavior
- Health related functions through hands-on assistance, supervision and cueing
### Personal Care Paraprofessional Provider Qualifications

The personal care paraprofessional personnel are employed in the Special Education Program and shall be qualified under the requirements established by their respective ISD plan. Providers must be trained in the skills needed to perform covered services, and must be under the direction of a qualified professional as designated in the IEP/IFSP. Paraprofessional personnel include:

- Teacher Aides
- Health Care Aides
- Instructional Aides
- Bilingual Aides
- Program Assistants
- Trainable Aides

### Prescription

In accordance with 42 CFR 440.167, authorization for Personal Care Services (PCS) may be done by a physician or "other licensed practitioner" operating within the scope of their practice. The State definition of "other licensed practitioner" consists of Registered Nurse (RN), Licensed Occupational Therapist, Licensed Physical Therapist (PT), Master of Social Work (MSW), or fully licensed Speech Language Pathologist (SLP). It is expected that personal care services will be authorized by the appropriate practitioner.

### Documentation

Personal care services must be medically necessary and the need for the service must be documented in the student’s IEP/IFSP. Each child’s school clinical record must contain a completed, signed and dated monthly activity checklist. Service categories (i.e., toileting, feeding, transferring, etc.), times and frequencies must be documented either in the IEP/IFSP, in an attached document, or in the child’s treatment authorization.

### Procedure Codes

For a complete listing of procedure codes, refer to the School Based Services CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)

### 2.10 Targeted Case Management Services

**Definition**

Targeted case management (TCM) services are services furnished to assist individuals in gaining access to needed medical, social, educational or other services.

Targeted case management services include the following assistance:

- A comprehensive assessment and periodic reassessment of an individual to determine the need for medical, social, educational or other services. These assessment activities include:
  - Taking client history;
  - Identifying the individual’s needs and completing related documentation; and
- Gathering information from other sources, such as family members, medical providers, social workers, and educators (if necessary), to form a complete assessment of the individual.

- Development (and periodic revision) of a specific care plan that:
  - Is based on the information collected through the assessment;
  - Specifies the goals and actions to address the medical, social, educational or other services needed by the individual;
  - Includes activities such as ensuring the active participation of the eligible individual, and working with the individual (or the individual’s authorized health care decision maker) and others to develop those goals; and
  - Identifies a course of action to respond to the assessed needs of the eligible individual.

- Referral and related activities:
  - To help an eligible individual obtain needed services, including activities that help link an individual with medical, social, educational providers or other programs and services that are capable of providing needed services, such as making referrals to providers for needed services and scheduling appointments for the individual;
  - Monitoring and follow-up activities;
  - Activities and contacts that are necessary to ensure the care plan is implemented and adequately addresses the individual’s needs, and which may be with the individual, family members, providers, or other entities or individuals, and conducted as frequently as necessary, including at least one annual monitoring, to determine whether the following conditions are met:
    - Services are being furnished in accordance with the individual’s care plan;
    - Services in the care plan are adequate.

If there are changes in the needs or status of the individual, necessary adjustments are made to the care plan and service arrangements.

TCM services may be reimbursed when provided by a Designated Case Manager.

Providers must maintain case records that document, for all individuals receiving case management, the following: the name of the individual, the dates of the case management services, the person providing the case management services, and the nature, content, and units of case management services received. The case record must also reflect whether the goals specified in the care plan have been achieved, whether the individual has declined services in the care plan, the need for and occurrences of coordination with other case managers, the timeline for obtaining needed services, and a timeline for re-evaluation of the plan.
The Designated Case Manager is the person responsible for the implementation of the plan of care/treatment plan. The Designated Case Manager must be an individual who meets one of the following criteria:

- A licensed RN in Michigan;
- A bachelor's degree with a major in a specific special education area;
- Has earned credit in coursework equivalent to that required for a major in a specific special education area; or
- Has a minimum of three years' personal experience in the direct care of an individual with special needs.

In addition to meeting at least one of the above, the Designated Case Manager must also demonstrate knowledge and understanding of all of the following:

- Services for infants and toddlers who are eligible under the IDEA law as appropriate;
- Part C of the IDEA law and the associated regulations;
- The nature and scope of services covered under IDEA, as well as systems of payments for services and other pertinent information;
- Provisions of direct care services to individuals with special needs; and
- Provisions of culturally competent services within the community being served.

Targeted Case Management services include:

- Assuring that standard re-examination and follow-up of the beneficiary are conducted on a periodic basis to ensure that the beneficiary receives needed diagnosis and treatment;
- Assisting families in identifying and choosing the most appropriate providers of care and services, scheduling appointments, and helping families to maintain contact with providers;
- Follow-up to ensure that the beneficiary receives needed diagnostic and treatment services;
- Assuring that case records are maintained and indicate all contacts with, or on behalf of, a beneficiary in the same manner as other covered services;
- Coordinating school based services and treatment with parents and the child;
- Monitoring and recommending a plan of action;
- Coordinating performance of evaluations, assessments and other services that the beneficiary needs;
- Facilitating and participating in the development, review, modification and evaluation of the multi-disciplinary team treatment plan;
- Activities that support linking and coordinating needed health services for the beneficiary;
- Providing a summary of provider, parent and student health and behavioral consultation; and
- Coordinating with staff/health professionals to establish continuum of health and behavioral services in the school setting.
### 2.11 Special Education Transportation

**Definition**

Special education specialized transportation services include transport to and from the beneficiary's pick-up and drop-off site where Medicaid services are provided. It includes no more than two one-way trips on a date of service.

The need for special education transportation must be specified in the beneficiary's IEP/IFSP treatment plan. Medicaid may reimburse for special education transportation when a beneficiary receives a Medicaid-covered service on the same day.

Medicaid does not reimburse for transportation provided in a regular or general education school bus. There is no additional payment for an attendant.

**Documentation**

Federal requirements include documentation for transportation service claims that must be maintained for purposes of an audit trail, such as an ongoing trip log maintained by the provider of the special education transportation. Ridership must be documented for each one-way trip.

**Procedure Codes**

For a complete listing of procedure codes, refer to the School Based Services CPT code database on the MDHHS website. (Refer to the Directory Appendix for website information.)

**Taxi and Private Vehicle Transportation**

For a taxi or family vehicle transportation expense to be reimbursed, the following documentation must be on file at the local education agency (LEA) or intermediate school district (ISD):

- Specialized transportation must be included in the Individualized Education Program (IEP).
- A Medicaid covered medical service must be provided on the same day as the transportation.
- Dates and times of each trip must be listed on the LEA’s or ISD’s trip log.
- Documentation from the beneficiary's physician or a school provider treating the student, stating the reason taxi or family transportation is required must be retained in the student’s file.
- For transportation by taxi, an additional statement justifying the need for a taxi and the reason other less costly means of transportation cannot be used must be retained in the student’s file.
- For ongoing transportation needs, documentation is only required once per student per school year.
- For one-time or occasional use transportation, documentation is required for each trip, or trip period per beneficiary.
- The total number of trips claimed for taxi and family transportation must be included in the Special Education trip count on the Medicaid Allowable Expenditure Report (MAER).
Taxi and family vehicle cost reimbursement will be retroactive to July 1, 2012 if the proper documentation has been retained, and a claim for the trip has been approved through the Community Health Automated Medicaid Processing System (CHAMPS). Claims must be filed within one year from the date of service according to Medicaid timely filing requirements.

Transportation by stretcher car is not covered. The term "stretcher car" is defined as a vehicle capable of transporting a patient (student) in a prone or supine position (e.g., Ambucab).
3.1 Quality Assurance

SBS providers must have a written quality assurance plan on file. SBS costs will be reviewed/audited by MDHHS for determination of medical necessity and to verify that all services were billed and paid appropriately. The purpose of the quality assurance plan is to establish and maintain a process for monitoring and evaluating the quality and documentation of covered services, and the impact of Medicaid enrollment on the school environment.

An acceptable quality assurance plan must address each of the following quality assurance standards:

- Covered services are medically necessary, as determined and documented through appropriate and objective testing, evaluation and diagnosis.
- The IEP/IFSP treatment plan identifies which covered services are to be provided and the service frequency, duration, goals and objectives.
- A monitoring program exists to ensure that services are appropriate, effective and delivered in a cost effective manner consistent with the reduction of physical or mental disabilities and assisting the beneficiary to benefit from special education.
- Billings are reviewed for accuracy.
- Staff qualifications meet current license, certification and program requirements.
- Established coordination and collaboration exists to develop plans of care with all other providers, (i.e., Public Health, MDHHS, Community Mental Health Services Programs (CMHSPs), Medicaid Health Plans (MHPs), Hearing Centers, Outpatient Hospitals, etc.).
- Parent/guardian and beneficiary participation exists outside of the IEP/IFSP team process in evaluating the impact of the SBS program on the educational setting, service quality and outcomes.

3.2 Service Coordination and Collaboration

Children with special needs have access to services available in both outpatient and school-based treatment settings. If treatment is provided in both settings, the goals and purpose for the two must be distinct. School based services are provided to assist a child with a disability to benefit from special education. Outpatient services are provided to optimize the child’s functional performance in relation to needs in the home or community setting and must not duplicate those provided in the school setting. Collaboration between the school and the community providers is mandated to coordinate treatment and to prevent duplication of services. This collaboration may take the form of phone calls, written communication logs, or participation in team meetings such as the IEP/IFSP meeting.

3.3 ISD Responsibilities

Each ISD must establish an implementation plan that includes explicit quality control review mechanisms to ensure full staff training and compliance, accuracy and completeness of the RMTS sample frame (designated employees), adherence to MDHHS-published methodology, editing of all moments for completeness and consistency, and accurate financial and staffing reports. Claiming entities must also fully cooperate with any review requested by the U.S. Department of Health & Human Services (HHS),
maintaining all necessary records for a minimum of seven (7) years after submission of each quarterly claim.

3.3.A. SANCTIONS

It is the intent of the State to pursue, when necessary, remedial action or implement a Corrective Plan if the ISDs or their vendors are not in compliance with Medicaid policy and procedures. If these actions are not successful, a payment freeze will be implemented and sanctions put in place until the matter is resolved. ISDs are responsible for the actions of their vendors.

The following are examples of causes for sanctions. The list is not all-inclusive.

- Repeated errors in completing the RMTS forms or filing of the claims.
- Providing insufficient data or incomplete reports to the State Contractor.
- Failure to use the claims development software.
- Failure to submit requested information, reports, or data to the State Contractor, CMS, MDHHS, MDE, or failure to cooperate with representatives of these agencies during site visits, reviews or audits.
- Failure to comply with the federal mandate to submit procedure-specific claims through the Community Health Automated Medicaid Processing System (CHAMPS).
SECTION 4 – PROVIDER ENROLLMENT

4.1 ENROLLMENT

The 56 Michigan Intermediate School Districts (ISDs), Detroit Public Schools Community District, and Michigan School for the Deaf are the only providers eligible to bill Medicaid for School Based Services. Providers must be enrolled and/or revalidated via the CHAMPS Provider Enrollment subsystem. Any applications or updates must be made through the CHAMPS system.

4.2 CERTIFICATION OF QUALIFIED STAFF

The Michigan Department of Education (MDE) must provide MDHHS with documentation that enrolled ISDs meet the regulatory requirements set forth for all staff providing services in the school setting.

Enrollment as a provider is predicated on certification to MDE that the educational and experiential requirements and credentials of all staff (i.e., licensure, certification, registration, etc.) who may be performing claimable activities have been met and are current. The MDE will assist any school district in this certification process and verify the status of its certification in writing, along with recommendations, with a copy sent to MDHHS.

4.3 MEDICAID ELIGIBILITY RATE

Michigan’s RMTS activity codes are designed to reflect the actual direct medical services activities that occur in a school on any given day. Because these activities and services are provided for students who are both Medicaid and non-Medicaid eligible, it is necessary to develop and apply a formula that properly allocates which students are being supported and what activities and services are being provided. This is referred to as the "IEP Medicaid Eligibility Rate (MER)" for the direct medical services program.

IEP MER is determined by calculating the ratio of Medicaid eligible recipients with health-related services indicated on their IEP/IFSPs to the total number of special education population with health-related services indicated on their IEP/IFSPs.
SECTION 5 – FINANCIAL DATA REQUIREMENTS AND UNALLOWABLE COSTS

5.1 FINANCIAL DATA

The financial data reported for the Direct Medical Services (salaries, benefits, supplies, etc.) must be based on actual detailed expenditure reports obtained directly from the participating ISD’s financial accounting system. The financial accounting system data is applied using generally accepted governmental accounting standards and principles or applicable administrative rules. The expenditures accumulated for calculating the Direct Medical Services allowable costs are to include actual non-federal expenditures incurred during the claiming period, except for the summer quarter. These allowable expenditures include such things as salaries, wages, fringe benefits and medically related supplies, purchased services and materials.

5.2 UNALLOWABLE COSTS

Providers are not allowed to report any costs that are federal funds, State flow-through funds, or non-federal funds that have been committed as local match for other federal or State funds or programs.

Claims for approved Medicaid School Based Service functions may not include expenditures of:

- Federal funds received by the ISD/LEA directly
- Federal funds that have been passed through a State or local agency
- Non-Federal funds that have been committed as local match for other Federal or State funds or programs

Funds received by an ISD for school based direct medical services are not Federal funds. They are reimbursement for prior expenditures and become, upon receipt, local funds.
SECTION 6 – SCHOOL BASED SERVICES REIMBURSEMENT

6.1 METHOD OF REIMBURSEMENT FOR DIRECT MEDICAL SERVICES, PERSONAL CARE SERVICES AND TARGETED CASE MANAGEMENT

Payment for Michigan’s school based services program is a cost-based, provider specific, annually reconciled and cost settled reimbursement methodology.

The Centers for Medicare & Medicaid Services (CMS) also requires Michigan SBS providers to submit procedure specific direct medical services claims for all Medicaid allowable services. These claims do not generate a payment but are required by CMS in order to monitor the services provided, the eligibility of the recipient, and provide an audit trail. Interim monthly payments are tied to the submission of the direct medical services claims. If claim volume decreases significantly or drops to zero in any two consecutive months, all interim payments will be held until the provider is contacted and the issue resolved. MDHHS will monitor provider claim volume to make sure that this mandate is followed.

Claims are submitted and processed through the Community Health Automated Medicaid Processing System (CHAMPS); however, the procedure code fee screens are set to pay zero. SBS providers receive their cash flow from the interim monthly payment process described below.

The interim monthly payments are based on prior year actual costs and reconciled on an annual basis to the current year costs. Cost reporting and reconciliation are based on the school fiscal year which is July 1 through June 30 of each year.

The reimbursement process for the direct medical services is comprised of the following parts:

- The SBS direct medical services procedure code specific billing process;
- The random moment time study (RMTS) component;
- The interim payment process; and,
- The cost reconciliation and cost settlement process.

6.1.A. DIRECT MEDICAL SERVICES PROCEDURE CODE SPECIFIC BILLING

Providers must continue to submit procedure specific claims in addition to the expenditure reports. The procedure specific process is described in the Covered Services Section of this chapter.

Claim documentation must be sufficient to identify the patient clearly, justify the diagnosis and treatment, and document the results accurately. Documentation must be adequate enough to demonstrate that the service was provided and that the service followed the "approved plan of treatment" (for school-based services, the service must be identified in the child’s IEP/IFSP).

The ISD may either purchase software for the claims submission function or it may utilize the services of a billing agent. The cost of this process is the responsibility of the ISD.
6.1.B. RANDOM MOMENT TIME STUDY

For the Random Moment Time Study, all ISDs will be required to utilize the services of the State Contractor who will conduct the statewide time studies.

The quarterly RMTS sampling results are produced by the State Contractor who converts them to percentages. This percentage is applied to program costs to determine reimbursement. Once complete, the time study results are provided to MDHHS where they are uploaded into the cost settlement program.

Costs are reported for direct medical services and specialized transportation services on the Medicaid Allowable Expenditure Report (MAER) and collected via financial worksheets for Personal Care Services and Targeted Case Management.

Electronic Data Systems (EDS) combines all cost information and the RMTS results, the indirect cost rate, and the Medicaid eligibility rate to calculate the total allowable costs. The MDHHS Hospital and Health Plan Reimbursement section performs the reconciliation and cost settlement process.

The ISD and/or State Contractor must comply with all conditions set forth by MDHHS as SBS policy.

The cost for the State Contractor is charged back to providers based on the State Contractor's projected cost per ISD (after federal match).

For detailed description and instructions regarding the Random Moment Time Study, refer to the School Based Services Random Moment Time Study chapter of this manual.

Summer Quarter Process

The summer quarter months are July, August and September. There is a break period between the end of one regular school year and the beginning of the next regular school year during which only a few staff are working. The majority of school staff work during the school year and do not work for part of the summer quarter (9-month staff). However, there are some 9-month staff that opt to receive their pay over a 12-month period. Therefore, different factors must be applied to the summer formula in order to accurately reflect the activities that are performed by the staff.

The summer quarter will be divided into two parts. The first part of the quarter will extend from July 1 to the date the students return to school. The second part of the quarter will be from the date the students return to school through September 30.

The RMTS will still be performed in the summer quarter, but will take place only after the staff start back to work and will only be applied to the costs for the second part of the summer quarter. To accurately reflect the work efforts being performed when all staff have returned to work, the RMTS will be performed during a shorter time period.
6.1.C. INTERIM PAYMENT PROCESS

Interim payments are calculated based on an estimated monthly cost formula. The monthly cost formula utilizes prior year costs plus any inflation or program changes to calculate a monthly interim reimbursement amount. After the final cost reports have been reviewed and reported to MDHHS, reconciliation will be performed and settlements will be made to make the providers whole.

Interim payments are issued on the first pay cycle of each month based on prior year costs.

To justify an increase in the interim payment, providers must submit written documentation of significant changes in coverage, service utilization or staff costs.

Providers may request an increase or decrease in their interim payment amount at any time throughout the year. Instructions and contact information will be included with the MAER. Any written inquiries should be addressed to the MDHHS Hospital and Clinic Reimbursement Division (HCRD). (Refer to the Directory Appendix for contact information.)

All payments and adjustments are issued by the MDHHS Hospital and Clinic Reimbursement Division. Once the payments are issued to the SBS providers (ISDs), how the interim payment revenue is distributed to the respective LEAs and how the initial and final settlements are handled is up to the discretion of the ISD.

6.1.D. COST RECONCILIATION AND SETTLEMENT

Allowable cost will be based on the following components:

- Costs from the MAER
- Targeted Case Management and Personal Care Services Financial Worksheets
- MDE Indirect Cost Rate
- Random Moment Time Study Percentage
- Health Related IEP Medicaid Eligibility Rate (IEP MER)
- Federal Medical Assistance Percentage (FMAP)

\[
\text{Allowable costs} \times \text{Indirect Cost Rate} \times \text{Annual average \% time claimable to Medicaid from the time studies} \times \text{Discounted by the Medicaid eligibility percentage} \times % \text{Federal Medical Assistance Percentage (FMAP)} = \text{Medicaid reimbursement amount}
\]

The Medicaid Allowable Expenditure Report (MAER) (modeled after the MDE SE-4096 cost report) is utilized to collect allowable costs for the medical professional staff. Costs for the staff providing targeted case management services and personal care services
that are not included in the direct medical costs are obtained from the participating ISD’s financial accounting system via financial worksheets sent out by the State Contractor.

To report direct service-related costs, providers will utilize the Medicaid Allowable Expenditure Report. This cost report template may be obtained from the School Based Services Provider Specific webpage. (Refer to the Directory Appendix for website information.) An Excel printable version of the cost report is also available on the website for those providers in need of a paper version. Cost reports from the Local Educational Agencies will be submitted to their Intermediate School District for summation utilizing the Michigan Medicaid Forms (MMF) summary software (available to providers via the File Transfer Service). Providers must register and have access to the secure MILogin in order to utilize the MMF summary software. MILogin registration instructions are also available on the School Based Services Provider Specific webpage.

The filed cost data is used to calculate an initial settlement within 90 days after the receipt of the initial cost report data. The initial settlement may result in either an over or under adjustment to the provider interim payment.

Within six months after the close of the school fiscal year, School Based Services providers will review, certify, and finalize the MAER and transmit the report to the MDHHS Behavioral and Physical Health and Aging Services Administration (BPHASA) for reconciliation. The final settlement process will begin within 12-18 months after the close of the school fiscal year. Settlements may take several months for completion.

ISDs/LEAs may submit revisions to the MAER until the final settlements are processed. Instructions for completing revisions are attached to the MAER.

### 6.2 METHOD OF REIMBURSEMENT FOR SPECIALIZED TRANSPORTATION

#### 6.2.A. REIMBURSEMENT

Specialized transportation costs reported on the Michigan Department of Education Transportation Expenditure Report (form SE-4094) are only the costs associated with the special education buses, taxis or private vehicles used for the specific purpose of transporting only special education children. This report does not include any federal dollars.

Medicaid-allowable specialized transportation costs include the following costs from the SE-4094:

- Salaries [Sec. 52 & Sec. 53a]
  - Bus Drivers
  - Aides
  - Employee Benefits (Bus Drivers and Aides only)
- Purchased Services – Staff (Bus Drivers and Aides only)
Purchased Services – Vehicle Related Costs [Sec. 52 & Sec. 53a]
- Pupil Transportation by Carrier
- Pupil Transportation by Carrier (b/y)
- Family Vehicle K Cost
- Contracted Taxis
- Pupil Transportation Fleet Insurance
- Contracted/Leased Buses

Supplies [Sec. 52 & Sec. 53a]
- Gasoline/Fuel
- Oil/Grease
- Tires/Batteries
- Other Expense/Adjustments, only the costs associated with adjustments to allowable costs
- Bus Amortization

For reimbursement purposes, Bus Aides are defined as aides who ride on the bus providing care to those students being transported, assisting with the specific health concerns documented in the student’s Individualized Education Program (IEP).

6.2.B. SPECIALIZED TRANSPORTATION RECONCILIATION AND SETTLEMENT

On an annual basis, the cost per trip is calculated by dividing the total Medicaid allowable costs (including indirect cost) by the total ISD-reported special education (specialized) one-way transportation trips. The cost per trip is multiplied by the quantity of Medicaid "allowable" one-way trips gleaned from CHAMPS to arrive at the Medicaid allowable cost.

An "allowable" one-way trip is one that is provided to a Medicaid beneficiary and fulfills all of the following requirements:

- Documentation of ridership is on file;
- The need for the specialized transportation service is identified in the Individualized Education Program (IEP)/Individualized Family Service Plan (IFSP); and
- A Medicaid-covered service (other than transportation) is provided on the same date of service. The Medicaid covered service must also be documented in the IEP/IFSP.

The cost settlement is accomplished by comparing the interim monthly payment totals to the annual Medicaid allowable specialized transportation cost. The cost settlement amount for the specialized transportation is combined with the cost settlement amounts for the Direct Medical Services, Targeted Case Management, and Personal Care Services; any over/under adjustments are processed as one transaction.
SECTION 7 – INDIRECT COST RATE (ICR)

7.1 INDIRECT COSTS

The ISD/LEA unrestricted indirect cost rate is calculated using the Federal Office of Management and Budget (OMB) Title 2 CFR Part 200. The methodology used to determine the indirect cost rate specific to each district is approved by the Federal cognizant agency. The indirect cost rates are updated annually by the Michigan Department of Education.
SECTION 8 – COST CERTIFICATION

8.1 COST CERTIFICATION

Once all cost reports and financial worksheets have been received by MDHHS, the summary worksheet of the Medicaid Allowable Expenditure Report (MAER) will be completed. The summary report will combine the allowable cost data submitted by the ISDs for each LEA for all four cost pools (Direct Medical, Specialized Transportation, Personal Care and Targeted Case Management). The total will be entered into the cost certification form as the "Total Computable Expenditure". The ISD is responsible for annually certifying that the total amount of expenditures for covered services has been expended and that none of the expenditures have been used as match for other programs or services.
SECTION 9 – COST ALLOCATION FACTORS

9.1 FEDERAL MEDICAL ASSISTANCE PERCENTAGE RATE

Federal regulations allow for payments to States on the basis of a Federal medical assistance percentage for part of their expenditures for services under an approved State plan. The formula for calculating this annual percentage is described in section 1905(b) of the Social Security Act. Under the formula, if a State’s per capita income is equal to the national average per capita income, the Federal share is 55%. If a State’s per capita income exceeds the national average, the Federal share is lower, with a statutory minimum of 50%. If a State’s per capita income is lower than the national average, the Federal share is increased, with a statutory maximum of 83%.

9.2 DISCOUNTED HEALTH-RELATED MEDICAID ELIGIBILITY RATE (MER)

The discounted health-related Medicaid Eligibility Rate (MER) percentage is determined by the percentage of the special education student population that is Medicaid eligible in each ISD with a health-related support service code indicated on their December 1 Student Count Report. Support service codes are gleaned from Fields 43 and 57 of the December 1 Student Count Report. Only those codes that relate to covered school based health services are to be utilized.

<table>
<thead>
<tr>
<th>Field 43</th>
<th>290, 310, 320, 360, 370, 400, 450, 460, 470</th>
</tr>
</thead>
<tbody>
<tr>
<td>Field 57</td>
<td>801, 804, 805, 807, 808, 809, 812, 814, 816, 818</td>
</tr>
</tbody>
</table>

MDHHS receives the file of special education children with health-related support services indicated on their IEPs and matches the names and birthdates of those with health-related support services against the Medicaid eligibility file to identify the percentage that are Medicaid eligible. The eligibility rate is determined once each year utilizing the December 1 Student Count Report. The calculation for the eligibility rate is as follows:

\[
\frac{\text{Medicaid special education students with a health-related support service in their IEP}}{\text{Total special education students with a health-related support service in their IEP}}
\]

9.3 ALLOCATION OF SALARIES AND BENEFITS OF PERSONNEL PROVIDING DIRECT CARE SERVICES

Actual expenditures for salaries and benefits of all personnel are to be obtained from each participating ISD’s financial accounting system. Expenditures related to the performance of approved Medicaid contracted service providers (e.g., occupational therapists, physical therapists) who also provide direct care services must also be obtained from each participating ISD’s financial accounting system.
SECTION 10 – DOCUMENTATION

10.1 DIRECT MEDICAL SERVICES DOCUMENTATION

For covered services, the school clinical record must include all of the following:

- Beneficiary name and birth date;
- Date of service/treatment;
- Type (modality) of service/treatment;
- The response to the service/treatment; and
- The name and title of the person providing the service/treatment and a dated signature.

For services that have time-specific procedure codes, the provider must indicate the actual begin and end times of the service in the school clinical record. The record must indicate the specific findings or results of the diagnostic or therapeutic procedures. The student’s school clinical record should include documentation of the implementation and coordination of services for the special education student.

Progress notes must be written monthly, or more frequently as appropriate, and must include:

- Evaluation of progress;
- Changes in medical or mental status; and
- Changes in treatment with rationale for change.

(Refer to the General Information for Providers Chapter of this manual for additional information regarding clinical record requirements.)

10.2 RMTS DOCUMENTATION

Each participating LEA must maintain a separate audit file for each quarter billed. The following minimum documentation is required:

- Financial data used to establish cost pools and factors.
- A copy of the quarterly sample results produced by the State Contractor.
- A copy of the warrant, remittance advice or Electronic Funds Transfer (EFT) documentation verifying that payment from MDHHS was received.

ISDs/LEAs must cooperate fully with any review requested by MDHHS and CMS, and maintain all necessary records for a minimum of seven (7) years.

Any changes in Federal regulations related to claims for administrative expenditures are incorporated by reference into this document.
SECTION 11 – AUDIT AND RECOVERY PROCEDURES

11.1 DIRECT SERVICE/TRANSPORTATION PROGRAM AUDIT ACTIVITIES TO BE PERFORMED BY MDHHS OFFICE OF AUDIT STAFF

MDHHS audit review of selected ISD/DPS and MSD cost reports for the Direct Service/Transportation Program may include the following activities:

- Verification that the Medicaid Allowable Expenditure Report (MAER) accurately reports the allowable costs incurred for the appropriate period.
- Verification that the salaries listed for employees/positions included in the RMTS staff pool match the payroll records for the same period as the time study.
- A review of the salaries of employees who changed positions during the time study period.
- If a replacement was hired/transferred, the auditor will verify that only the salary earned while working in a position on the MAER staff pool list was reported, and that salaries for both the original and replacement employees were not duplicated on the report for the same time period.
- Confirmation that none of the direct costs reported were also claimed as an indirect cost, that the proper indirect cost rate was used, and the rate was applied only to costs in the base. The employees in non-standard job categories are the most likely to be considered indirect type employees; therefore, documentation will be reviewed for these individuals.
- Verification that no federal funds were claimed on MAER cost reports and that MAER costs were not accepted for cost-sharing.
- A standard review of other areas, such as confirmation that reported costs were actually paid, support documentation was maintained as required, and costs were properly charged to the correct accounts should also be expected.
- Any other area deemed necessary.

The ISD/DPS/MSD should be prepared to direct the auditor to any document used to support and identify the reported MAER costs.

11.2 STUDENT CLAIMS AUDIT ACTIVITIES TO BE PERFORMED BY MDHHS OFFICE OF AUDIT STAFF

MDHHS audit review of selected ISD/DPS and MSD for approved SBS student claims may include the following activities:

- Verification that appropriate prescriptions/referrals/authorizations are updated annually and ordered by the appropriate individual.
- Verification that occupational, physical, and speech, language and hearing therapy address a beneficiary’s medical need that affects his/her ability to learn in the classroom environment.
- Confirmation that services requiring the student to be in attendance have support documentation (i.e., attendance records) on file.
- Confirmation that the providers performing the service have the required licensure/certification.
- Verification that the providers requiring supervision both "under the direction of" and "under the supervision of" have the necessary support documentation on file.
- Verification that the beneficiary receiving special education transportation also received a Medicaid-covered service on the same day. In addition, the support documentation for specialized transportation includes an ongoing trip log maintained by the provider of the special education transportation.

- Confirmation that support documentation for personal care services includes a completed, signed and dated monthly activity checklist.

- Verification that group therapy or treatment was provided in groups of two to eight.

- A standard review of the Individualized Education Program (IEP)/Individualized Family Service Plan (IFSP) treatment plan areas, such as the inclusion of a description of the beneficiary’s qualifying diagnosis and medical condition, time-related goals that are measurable and significant to the beneficiary’s function and/or mobility, and anticipated frequency and duration of treatment required to meet the time-related goals.

- Any other area deemed necessary.

The ISD/DPS/MSD should be prepared to direct the auditor to any document used to support and identify the reported student claims.

11.3 Audit Activities to be Performed by MDHHS Office of Audit Staff

MDHHS audit review of selected ISD/DPS cost reports for the Administrative Outreach Program may include the following activities:

- Verification that the salaries listed for employees/positions included in the Random Moment Time Study (RMTS) staff pool match the payroll records for the same period as the time study.

- A review of the salaries of employees who changed positions during the time study period.

- If a replacement was hired/transferred, the auditor will verify that only the salary earned while working in a position on the AOP staff pool list was reported, and that salaries for both the original and replacement employees were not duplicated on the report for the same time period.

- Verification that any other salaries and costs for supplies, etc., are of direct benefit to the employees on the staff pool list, and therefore, allocable to the AOP in the same percentage as the AOP-eligible employees.

- Confirmation that none of the direct costs reported were also claimed as an indirect cost, that the proper indirect cost rate was used, and the rate was applied only to costs in the base. The employees in non-standard job categories are the most likely to be considered indirect type employees; therefore, documentation will be reviewed for these individuals.

- Verification that no federal funds were claimed on AOP cost reports and that AOP costs were not accepted for cost sharing.

- A standard review of other areas, such as confirmation that reported costs were actually paid, support documentation was maintained as required, and costs were properly charged to the correct accounts should also be expected.

- Any other area deemed necessary.

The ISD/DPS should be prepared to direct the auditor to any document used to support and identify the reported AOP costs.
11.4 **Audit Findings and Resolution**

Audit findings and resolution will include the following:

- Identified overstatement of expenditures on the MAER will require the revision of the MAER and a revised final settlement for all specifically identified overstatements.

- For claim error rates in excess of the materiality threshold percentage, as established by MDHHS, the recovery will be any excess percentage greater than materiality threshold multiplied by total Medicaid paid to the ISD during the period covered by the audit.

Recoveries and re-filings are limited to fiscal years considered within three years from the last date of payment for that period.

SECTION 1 - CLAIMS DEVELOPMENT OVERVIEW

Using the State of Michigan’s competitive bid process, MDHHS will select one Contractor to implement and administer the random moment time study. The Contractor will also provide the ISDs/DPS the option of performing certain time study responsibilities and claims development activities on behalf of those ISDs/DPS that choose to participate in this portion of the State contract and pay for these services.

1.1 CLAIMS DEVELOPMENT ENROLLED PROVIDERS

All ISDs/DPS will be required to utilize the services of the State's RMTS and Claims Development Contractor, who will conduct the statewide time studies and develop and submit claims on their behalf each quarter.

The State Claims Development Contractor will develop an implementation plan on behalf of its ISDs/DPS to conduct the statewide time studies each quarter, utilizing the claims development software, as well as complete all other key functions required for valid claim development.

The cost for the Contractor will be charged back to providers who participate in this option based on the Contractor's projected cost per ISD/DPS (after federal match).

1.2 OVERVIEW OF CLAIMS DEVELOPMENT PROCESS

Based on federal and state statutes and regulations, below is a partial list of specific functions and tasks that must be accomplished for reimbursement of Medicaid Administrative Outreach Program services. Additional details appear in subsequent sections of this chapter.

Claims will be developed by the State’s Claims Development Contractor utilizing the claims development software following these basic steps:

- The quarterly RMTS sampling results are produced by the State’s RMTS and Claims Development Contractor, who converts them to percentages. The percentages are applied to program costs to determine reimbursement.
- The cost/claim generation component of the claims development software uses ISD/DPS costs and other claim factors to calculate and produce the claim.
- The claim is submitted to MDHHS with verification of claim validity from each ISD/DPS.
- The ISD/DPS and/or Contractor must comply with all conditions set forth by MDHHS as SBS policy.

1.3 IMPLEMENTATION PLAN

Each ISD/DPS must submit an Implementation Plan that reflects the details of their SBS Administrative Outreach Program operation for review and approval by MDHHS and by CMS. Any subsequent changes must also be reported and receive approval.

Claims may not be submitted to MDHHS for reimbursement until MDHHS has approved the Implementation Plan that will be utilized based on this published policy.
SECTION 2 - CLAIM CALCULATIONS

2.1 IMPLEMENTATION PLAN

Each ISD/DPS must submit an implementation plan that reflects the details of their SBS Administrative Outreach Program for review and approval by MDHHS and CMS. Any subsequent changes must also receive approval.

Each implementation plan must include explicit quality control review mechanisms to ensure full staff training and compliance, accuracy and completeness of the sample frame (designated employees), adherence to the MDHHS-published methodology, editing of all moments for completeness and consistency, and accurate financial and staffing reports. Claiming entities must also fully cooperate with any review requested by the U.S. Department of Health & Human Services (HHS), maintaining all necessary records for a minimum of seven (7) years after submission of each quarterly claim.

2.2 SANCTIONS

It is the intent of the State to pursue, when necessary, remedial action or implement a Corrective Plan if the State-selected contractors, the ISD/DPS, or their vendors are not in compliance with the new SBS Administrative Outreach published policy. If this is not successful, a contract payment freeze will be implemented and sanctions put in place until the matter is resolved. Those independent ISDs/DPS not participating in the State’s claims development contract will be held accountable for their vendor’s actions.

The following are examples of causes for implementation of sanctions for all districts. The list is not all-inclusive.

- Repeated errors in completing the RMTS forms or filing of the claims.
- Providing insufficient data or incomplete reports to the Contractors.
- Failure to use the CLAIMS DEVELOPMENT software.
- Failure to cooperate with, or submit requested information, reports, or data to the Special Monitoring Contractor, CMS, MDHHS, MDE, and other staff involved during site visits, reviews or audits.

2.3 FACTORS FOR CLAIMS DEVELOPMENT

MDHHS will submit quarterly claims on behalf of all participating school districts to the CMS. Each claim will be based on the following factors: The cost pool, percentage of time claimable to Medicaid Outreach Program administration, the Federal Financial Participation (FFP) rate, and the discounted Medicaid eligibility percentage rate for that district. The factors for the summer quarter are described above.

2.3.A. COST POOL

This consists of the actual costs incurred for the quarter being claimed, such as salaries, overhead, etc. Each participating ISD/DPS must certify that the claim they submit to MDHHS contains sufficient non-Federal (State, county, or local) funds to match requirements and that the claim only includes actual costs.
2.3.B. **FEDERAL FINANCIAL PARTICIPATION RATE**

Federal regulations allow for a reimbursement rate of 50% for Medicaid administrative activities.

2.3.C. **DISCOUNTED MEDICAID ELIGIBILITY PERCENTAGE**

The discounted Medicaid eligibility percentage is determined by the percentage of the student population in each ISD/DPS who are actually Medicaid beneficiaries. The discounted Medicaid eligibility rates will be determined twice each year and applied to certain activities in the claim calculation formula. To calculate the discounted Medicaid eligibility rates, the claiming entity will obtain the September and February fourth Wednesday pupil count report list from the Center for Educational Performance and Information (CEPI). The pupil count list will include the student name and date of birth. MDHHS will provide a method for using the list to verify the number of Medicaid-eligible students. This number will be used in a calculation with the total pupil count to determine the discounted percentage of Medicaid-eligible students in the ISD/DPS. The September pupil count list will be used to determine discounted Medicaid eligibility rates for time studies conducted in the Fall and Winter quarters, and the February pupil count will be used for time studies conducted in the Spring and Summer quarters.

Based on the above factors, the claim that is sent to Medicaid is calculated as follows:

### Fall, Winter and Spring Quarter Formulas for Calculating Administrative Outreach Claims

<table>
<thead>
<tr>
<th>Cost pools (salaries, overhead, etc.)</th>
<th>% time claimable to Medicaid Outreach Administration from time studies</th>
<th>Discounted by the Medicaid eligibility percentage</th>
<th>% Federal Financial Participation (FFP) rate</th>
<th>The amount of the claim submitted for Medicaid reimbursement</th>
</tr>
</thead>
</table>

### Summer Quarter Formulas

The summer quarter will be divided into two parts. The sum of both parts will be submitted to Medicaid for reimbursement. There will be two workbooks created for the summer quarter, one for each part.

#### Part I - Summer Quarter Formulas from July 1 to the Date Students Return to School

<table>
<thead>
<tr>
<th>Cost pool (only the 9-month salaries and related costs that are paid during this time period)</th>
<th>Average % of time claimable to Medicaid Outreach Administration from the previous three quarters</th>
<th>Discounted by the Medicaid eligibility percentage</th>
<th>Percent of FFP rate</th>
<th>The amount of the partial claim for Part I of the Summer Quarter</th>
</tr>
</thead>
</table>
Salary and related costs for 9-month staff that were earned during the school year, but are paid during the summer break, will be collected in a separate cost pool. Salaries paid during this period for 12-month staff are not included in the cost pool.

The cost pool containing the salaries and related costs of 9-month staff who are paid over 12 months will be claimed based on the average time study results and Medicaid Eligibility (MAE) rate from the previous three quarters.

Part II - Remainder of the Summer Quarter – Begins on the Date Students Return to School through September 30

<table>
<thead>
<tr>
<th>Cost pools (include all allowable salaries, overhead, etc.)</th>
<th>% of time claimable to Medicaid Outreach from the Summer Quarter time study</th>
<th>Discounted by the Medicaid eligibility percentage</th>
<th>Percent of FFP rate</th>
<th>The amount of the claim for Part II of Summer Quarter</th>
</tr>
</thead>
</table>

Salary and related costs of all staff eligible for the time study are included in the cost pool, along with other allowable overhead.

An RMTS is performed and applied to determine the percent of time claimable for Outreach during Part II of the summer quarter.

The claims development software will add the Summer Quarter Part I and Part II claim amounts together to reach the dollar amount of the total Summer Quarter claim submitted to MDHHS for reimbursement.

2.4 Financial Data

The financial data reported (salaries, benefits, supplies, etc.) must be based on actual detailed expenditure reports obtained directly from the participating ISDs/DPS’ financial accounting system. The financial accounting system data is applied using generally accepted governmental accounting standards and principles or applicable administrative rules. The expenditures accumulated for calculating the Administrative Outreach claim are to include only actual expenditures incurred during the claiming period, except for the summer quarter.

2.5 Allocation of Salaries and Benefits of Personnel Providing Direct Care Services

Actual expenditures for salaries and benefits of all personnel included in an Administrative Outreach claim are to be obtained from each participating ISD/DPS financial accounting system. Expenditures related to the performance of approved Medicaid Administrative Outreach functions by contracted service providers (e.g., occupational therapists, physical therapists) who also provide direct care services must also be obtained from each participating ISD/DPS financial accounting system.
2.6 RMTS DOCUMENTATION AND RECORDKEEPING/AUDIT FILE REQUIREMENTS

Each participating school district will maintain a separate audit file for each quarter billed. The following minimum documentation will be required:

- Financial data used to establish cost pools and factors.
- A copy of the quarterly sample results produced by the State’s RMTS and Claims Development Contractor.
- A completed quarterly claim produced by the claims development software and signed by the Chief Financial Officer of the ISD/DPS.
- A copy of the warrant, remittance advice or Electronic Funds Transfer (EFT) documentation, verifying that payment from MDHHS was received.

Districts must cooperate fully with any review requested by MDHHS and CMS, and maintain all necessary records for a minimum of seven (7) years after submission of each quarterly claim.

Any changes in Federal regulations related to claims for administrative expenditures are incorporated by reference into this document.

2.7 NON-STUDENT SPECIFIC/PRE-MEDICAID ELIGIBILITY DETERMINATION

There are some Administrative Outreach activities and expenditures that are approved by Medicaid that have not been addressed thus far. They are:

- Provided to the entire "at-risk" population,
- Not identifiable to individual students, and
- Provided before Medicaid eligibility is determined.

These activities are to be allocated to the approved Medicaid administrative outreach claim based on the results of the time study conducted during the claiming period.

2.8 STUDENT-SPECIFIC ADMINISTRATIVE FUNCTIONS EXPENDITURES

There are some Administrative Outreach functions that are identifiable to individual students after Medicaid eligibility has been determined. These functions are to be allocated in the administrative claim based on both the time study results conducted during the claiming period and the applicable discounted Medicaid eligibility rate.

2.9 NON-SALARY EXPENDITURES

Expenditures for materials and supplies related to the approved Medicaid administrative outreach activities may be included in the claim if they can be attributed directly to individuals who are claimed. The principles for claiming expenditures and cost allocation, including correct depreciation of assets as published in the Federal Office of Management and Budget (OMB) Title 2 CFR Part 200, must be followed. Examples include conference fees, registration fees, mileage, pagers, printing fees (i.e., for business cards), furniture, equipment, copy machine expenses, etc. Such expenditures are to be based on actual detailed departmental expenditure reports obtained directly from the participating ISD/DPS.
financial accounting system. These expenditures may not include items identified as indirect costs, such as central business office operations, general building maintenance and repair costs, or any other costs classified as an indirect cost.

2.10 INDIRECT COSTS

Allocable indirect costs are the product of the school district aggregate, calculated, approved Medicaid administrative outreach claim amount, multiplied by the ISD/LEA unrestricted indirect cost rate, as approved annually by the Michigan State Board of Education (MSBE). The ISD/LEA unrestricted indirect cost rate is calculated using the Federal Office of Management and Budget (OMB) Title 2 CFR Part 200. The methodology used to determine the indirect cost rate specific to each district has been approved by the Federal cognizant agency. The indirect cost rates are updated annually by the Michigan Department of Education.

2.11 CLAIM CERTIFICATION

The accuracy of the submitted claims must be certified by the chief financial officer, the superintendent of the district, or the consortium’s lead ISD/DPSCD designee. Such certification is accomplished when the annual cost report is submitted in CHAMPS and meets the requirements of 42 CFR 433.51. Detailed claim analyses and supporting documentation will be maintained by the ISD/DPS for audit or future reference purposes according to the terms identified in the interagency agreement between the district and MDHHS.

Reimbursement will be paid after the claim has been submitted to, reviewed by, and determined to be acceptable and accurate by MDHHS and CMS.

2.12 ANNUAL RECONCILIATION

At the end of the district’s fiscal year, and after its annual financial audit is completed, a reconciliation of the filed administrative outreach claims, with the financial accounting records and supporting documentation, must be performed. Adjustments to future administrative claims must be made based on the results of the reconciliation analyses to consider any year-end adjustments to accounting entries of any items which might have impacted the claim amounts.

2.13 FISCAL PROVISIONS

School districts must use an appropriate Revenue Code to identify the Medicaid SBS Administrative Outreach Program funds within their accounting records.

2.14 SUBMISSION OF CLAIMS

All claims must be developed and submitted using the reporting format (structured spreadsheet template) and approved certification forms.

The claim package consists of completed Excel workbooks for each individual ISD/DPS and are combined and consolidated into one claim that is submitted to MDHHS.

All claims are to be submitted in accordance with the reporting requirements established by MDHHS. It is imperative that districts work closely with the Claims Development Contractor to provide pertinent
financial, enrollment and personnel data and meet their deadlines and any other technical specifications. Claims not submitted on time must be submitted the following quarter as an adjustment to the prior missed quarter and will be processed for that following quarter. Claims not conforming to reporting requirements will not be accepted or processed.

2.15 PERIODICITY OF REPORTING

Districts must submit claims for expenditures related to approved Medicaid administrative outreach activities to MDHHS on a quarterly basis. The claim is due to MDHHS on or before 120 calendar days after the end of the reporting quarter.

SECTION 1 – GENERAL TIME STUDY INFORMATION

This chapter describes the random moment time study process for the School Based Services (SBS) direct medical services program.

In accordance with the Centers for Medicare & Medicaid Services (CMS) reimbursement policy, some activities performed by medical professionals and Intermediate School District (ISD) staff in a school-based setting are eligible for federal matching funds. These activities may be performed by staff with multiple responsibilities. CMS reimbursement requirements include the use of a random moment time study (RMTS) as a component of the Medicaid reimbursement methodology. The time study results are used to determine the amount of staff time spent on Medicaid-allowable activities. One statewide time study per staff pool is performed each quarter.

1.1 ADMINISTRATIVE OUTREACH PROGRAM ACTIVITIES

The School Based Services Administrative Outreach Program (AOP) offers reimbursement for the cost of administrative activities that support efforts to identify and enroll potentially eligible persons into Medicaid and that are in support of the state Medicaid plan.

The activities fall into several categories:

- Medicaid Outreach
- Facilitating Medicaid Eligibility Determinations
- Health-related Referral Activities
- Medical Service Program Planning, Policy Development, and Interagency Coordination
- Programmatic Monitoring and Coordination of Medical Services
- Transportation and Translation Services

1.2 DIRECT MEDICAL SERVICES

Medicaid covered services that are medically necessary and specified in the beneficiary’s Individualized Education Program (IEP) or Individualized Family Service Plan (IFSP) include:

- Occupational Therapy Services
- Orientation and Mobility Services
- Physical Therapy Services
- Assistive Technology Device Services
- Speech, Language and Hearing Services
- Psychological, Counseling and Social Work Services
- Developmental Testing Services
- Nursing Services
- Physician and Psychiatric Services
1.3 STAFF POOLS AND CONFIDENCE LEVELS

The RMTS is carried out utilizing customized claims development software that automates aspects of the school district time study process. The claims development software is comprised of three components: sampling/staff pool lists, training, and cost/claim generation. All ISDs are required to utilize the services of the State’s RMTS and Claims Development Contractor (hereafter referred to as the Contractor). The Contractor conducts the statewide time studies, produces the implementation plans and reports, and develops and submits the claims on behalf of the 56 ISDs, Detroit Public Schools Community District and Michigan School for the Deaf (hereafter referred to as the ISDs).

Time studies will be carried out over the following staff pools:

- **AOP Only Staff** – This staff pool consists of individuals who perform only administrative outreach activities. They do not perform any direct medical activities.
- **AOP & Direct Medical Staff** – This staff pool consists of individuals who perform both Direct Medical activities and AOP activities.
- **Personal Care Services Staff** – This direct medical only staff pool consists of individuals who perform direct care Personal Care Services.
- **Targeted Case Management Services Staff** – This direct medical only staff pool consists of individuals who perform Targeted Case Management (TCM) Services.

The RMTS results identifying the percentage of claimable time are applied to the allowable correlating cost pool. All staff pools are mutually exclusive.

The sample size of each cost pool ensures a quarterly level of precision of +/- 2% (two percent) with at least a 95% (ninety-five percent) confidence level and an annual level of precision of +/- 2% (two percent) with at least a 95% (ninety-five percent) confidence level.

Valid moments are completed moments that have been received by the Contractor and determined to be complete and accurate. Invalid moments are moments that are assigned to staff who are no longer in the position as selected, moments that are outside of paid work hours, and moments not returned for any other reason.

As long as the completed observation rate meets or exceeds 85%, missing observations will be dropped from all calculations. Should the completion rate fall below 85%, missing observations will be included as non-matchable.
SECTION 2 – CENTRALIZED CODING

The Contractor is responsible for coding the time study moments. MDHHS oversees the Contractor and ISDs participating to assure their compliance with all aspects of program policy and federal regulations.
SECTION 3 – TIME STUDY METHODOLOGY

3.1 RANDOM MOMENT TIME STUDY OVERVIEW

The time study design logs only what the participant is doing at one moment in time. A random moment consists of one minute of work done by one employee, both chosen at random, from among all such minutes of work that have been scheduled for all designated staff statewide.

The RMTS measures the work effort of each group of approved staff involved in the time study process by sampling and analyzing the work efforts of a randomly-selected cross-section of each staff pool. The RMTS methodology employs a technique of polling employees at random moments over a given time period and tallying the results of the polling over that period. The method provides a statistically valid means of determining the work effort being accomplished in each program of services. The sampling period is defined as the three-month period comprising each federal quarter of the year, except for the abbreviated sample period used in the summer quarter (July through September).

The Contractor will use the claims development software to conduct the statewide time studies each quarter. This software produces random moments concurrent with the entire reporting period which are then paired with randomly selected members of the designated staff pool population. The sampling is constructed to provide each staff person in the pool with an equal opportunity or chance to be included in each sample moment. Sampling occurs with replacement so that after a staff person and a moment are selected, the staff person is returned to the potential sampling universe. Therefore, each staff person has the same chance as any other person to be selected for each moment, which ensures true independence of sample moments.

Once the random sample of staff moments has been generated, the sample is printed in the form of master and location control lists for sample administration purposes, and as time study forms for collecting the moment data. Each sampled moment is identified on its respective control list in chronological order by the name of the staff person to be sampled and the date and time at which the recording should take place.

3.1.A. LONG-TERM SUBSTITUTES

Long-term substitute staff replacing permanent staff on leave may be added to the staff pool lists. The following criteria apply when long-term substitutes are utilized:

- A long-term substitute staff must be employed by the ISD/Local Educational Agency (LEA) for at least 30 calendar days within the quarter.
- The ISD/LEA may report the name of the long-term substitute staff any time after the sampling moments are distributed.
- The long-term substitute staff must meet all of the program requirements and provider qualifications necessary to participate in the Medicaid school based services program staff pool.
- If listed on the staff pool list, the substitute staff must complete the time study moment.
- The cost reflected should be the sum of the cost of the regular staff on leave and the long-term substitute staff.
All audit liability for the financial data reported and the tracking of the moments is the responsibility of the ISD/LEA reporting entity.

All staff whose costs are included in the cost pool, including long-term substitutes, must be included in the sample universe for the time study.

### 3.2 Random Moment Time Study Form Completion

There are two steps to completing a time study form:

- In the first step, for the designated moment, the time study participant provides the answers to the questions. These questions relate to their activities at the time of their randomly selected moment.
- In the second step, the time study forms are collected from the participants, and the Contractor assigns the appropriate activity code for that moment based on the answers to the study questions.

The Contractor conducts the statewide time studies each quarter for all ISDs and produces a report detailing the results. This involves importing clinician information from the ISDs to compile the statewide pool of all eligible time study participants for each staff pool list. There are four separate staff pools sampled for the RMTS each quarter: 1) the AOP only staff pool, 2) the AOP and Direct Medical Services staff pool, 3) the Personal Care Services staff pool, and 4) the Targeted Case Management Services staff pool. All staff pools have 800 moments randomly selected for the summer quarter (July-September). For the remaining three quarters, the Direct Medical Services and the Targeted Case Management Services staff pools have 3,000 moments randomly selected per quarter, and the Personal Care Services staff pool has 3,200 moments randomly selected per quarter. The person’s name that is associated with each moment is placed on a time study form. The Contractor distributes the control lists of their selected staff and the time study forms to the ISDs prior to the beginning of the reporting period. The Contractor is also responsible for the collection of all time study forms for the ISDs.

The Contractor monitors the status of each time study form so that appropriate follow-up calls are made for delinquent moments or missing data. The ISD is responsible for ensuring that a copy of the time study form and instructions are distributed to staff just prior to the assigned moment. The completed time study forms are returned to the Contractor, generally on a weekly basis, for data entry and tabulation.

At the end of the sampling period after all data has been collected and tabulated, program precision tables will be produced by the Contractor. These tables will verify that a sufficient number of personnel were sampled to ensure time study results that have a confidence level of at least 95% quarterly with a precision level of +/- 2% annually.

### 3.3 Time Study Staff Pools

To preserve the integrity of the RMTS process and to allow for timely process flow, school staff are given four weeks to review and return the staff pool lists and financials to the Contractor for those staff eligible to participate in each time study group. The staff pool lists must be returned as a complete file with all updates reflected. No partial staff pool list files will be accepted by the Contractor.
If staff pool lists and/or financials for the Personal Care Services, the Targeted Case Management, or the Administrative Outreach Program (AOP) time studies are not returned to the Contractor on or before the published deadline, the LEA staff pool lists and correlating financials will be removed from the time study and claim calculation for the affected quarter. ISD coordinators and LEA financial contact staff will be notified.

When providing the staff pool list of those eligible to participate in the time studies, school districts must certify the list of participants and activities to be claimed to ensure that all appropriate personnel are submitted and that appropriate credentials are in place for billing Medicaid.

### 3.3.A. AOP ONLY STAFF POOL

AOP Only Staff Pool:

- Administrators
- Counselors
- Early Identification/Intervention Personnel
- Physician Assistants
- Teacher Consultants
- School Psychologists (certified by the Michigan Department of Education but without Michigan licensure)
- Limited Licensed Speech Language Pathologists (without their American Speech-Language-Hearing Association Certificate of Clinical Competence)
- School Social Workers (certified by the Michigan Department of Education but without Michigan licensure)

### 3.3.B. AOP & DIRECT MEDICAL SERVICES STAFF POOL

AOP & Direct Medical Services Staff Pool:

- Fully Licensed Speech Language Pathologists
- Audiologists
- Counselors
- Licensed Practical Nurses
- Occupational Therapists
- Occupational Therapist Assistants
- Orientation and Mobility Specialists
- Physical Therapists
- Physical Therapist Assistants
- Physician and Psychiatrists
- Psychologists (not School Psychologists)
- Registered Nurses
- Social Workers
3.3.C. **PERSONAL CARE SERVICES STAFF POOL**

The following staff may be appropriate for inclusion in time studies if they are involved in Personal Care activities in the school setting:

- Bilingual Aides
- Health Aides
- Instructional Aides
- Paraprofessionals
- Program Assistants
- Teacher Aides
- Trainable Aides

3.3.D. **TARGETED CASE MANAGEMENT SERVICES STAFF POOL**

Staff with the following credentials may be appropriate for inclusion in time studies if they are involved in Targeted Case Management activities in the school setting:

- A bachelor's degree with a major in a specific special education area.
- Coursework credit equivalent to a major in a specific special education area.
- Minimum of three years' personal experience in the direct care of an individual with special needs.
- A licensed Registered Nurse (RN) in Michigan.

Targeted case managers must also demonstrate knowledge and understanding of all of the following:

- Services for infants and toddlers who are eligible under the IDEA law as appropriate;
- Part C of the IDEA law and the associated regulations;
- The nature and scope of services covered under IDEA, as well as systems of payments for services and other pertinent information;
- Provision of direct care services to individuals with special needs; and
- Provision of culturally competent services within the community being served.
SECTION 4 – ADMINISTRATIVE OUTREACH AND DIRECT MEDICAL ACTIVITY CODE SUMMARY

This section summarizes the code categories utilized for the random moment time study and indicates whether they are claimable for reimbursement under the AOP only, the AOP & Direct Medical program (including Personal Care Services and Targeted Case Management Services), allocated across all programs, or "unallowable" (not claimable). The "unallowable" activities are those that are purely educational in nature.

These codes represent activities that may be performed by any time study participants during a typical workday. Some of these activities may be claimed under Medicaid and some may not. In the following section, examples and clarifications of each code are provided to assist with the appropriate coding of the activities.

4.1 ACTIVITY CODES

Staff Activity and Codes – the indicators below, which follow each code, provide the application of the Federal Financial Participation (FFP) rate, the allowability or non-allowability designation, and the proportional Medicaid share status of the code. In order to maintain coding objectivity by time study participants, time study sheets used by employees should not include references to rates of FFP, proportional or total Medicaid, or whether such codes are allowable or unallowable under Medicaid.

<table>
<thead>
<tr>
<th>Application of FFP Rate</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>50 percent</td>
<td>Refers to an activity that is allowable as administration under the Medicaid program and claimable at the 50 percent non-enhanced FFP rate.</td>
</tr>
<tr>
<td>75 percent</td>
<td>Refers to an activity that is allowable as administration under the Medicaid program and claimable at the 75 percent enhanced FFP rate.</td>
</tr>
</tbody>
</table>

Unallowable Activities

| U                               | Refers to an activity that is unallowable as administration under the Medicaid program. This is regardless of whether or not the population served includes Medicaid eligible individuals. |

<table>
<thead>
<tr>
<th>Application of Medicaid Share</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>TM (Total Medicaid)</td>
<td>(Total Medicaid) Refers to an activity that is 100 percent allowable as administration under the Medicaid program.</td>
</tr>
<tr>
<td>PM (Proportional Medicaid)</td>
<td>(Proportional Medicaid) Refers to an activity which is allowable as administration under the Medicaid program, but for which the allowable share of costs must be determined by the application of the proportional Medicaid share (the Medicaid eligibility rate [MER] or the IEP Ratio). The Medicaid share is then determined by applying the MER or the IEP Ratio to the appropriate student populations.</td>
</tr>
</tbody>
</table>
### Reallocated Activities

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>R</td>
<td>Refers to those general administrative activities performed by time study participants which must be reallocated across the other activity codes on a pro rata basis. These reallocated activities are reported under Code 10 - General Administration. Note that certain functions, such as payroll, maintaining inventories, developing budgets, executive direction, etc., are considered overhead and, therefore, are only allowable through the application of an approved unrestricted indirect cost rate.</td>
</tr>
</tbody>
</table>

### 4.2 Uniform Codes

Staff should document time spent on each of the following coded activities:

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.a.</td>
<td>Non-Medicaid Outreach – U</td>
</tr>
<tr>
<td>1.b.</td>
<td>Medicaid Outreach – TM/50 Percent FFP</td>
</tr>
<tr>
<td>2.a.</td>
<td>Facilitating Application for Non-Medicaid Programs - U</td>
</tr>
<tr>
<td>2.b.</td>
<td>Facilitating Medicaid Eligibility Determination – TM/50 Percent FFP</td>
</tr>
<tr>
<td>3.</td>
<td>School Related and Educational Activities – U</td>
</tr>
<tr>
<td>4.a.</td>
<td>Direct Medical Services – Not Covered on a Medical Plan of Care (FFS – Non-IEP) - U</td>
</tr>
<tr>
<td>4.b.</td>
<td>Direct Medical Services – Covered as IDEA/IEP Services (FFS- IEP) - IEP Ratio</td>
</tr>
<tr>
<td>4.c.</td>
<td>Direct Medical Services – Covered on a Medical Plan of Care, Not Covered as IDEA/IEP Service – Medical Plan Ratio</td>
</tr>
<tr>
<td>5.a.</td>
<td>Transportation for Non-Medicaid Services – U</td>
</tr>
<tr>
<td>5.b.</td>
<td>Transportation-Related Activities in Support of Medicaid Covered Services – PM/50 Percent FFP</td>
</tr>
<tr>
<td>6.a.</td>
<td>Non-Medicaid Translation – U</td>
</tr>
<tr>
<td>6.b.</td>
<td>Translation Related to Medicaid Services – PM/75 Percent FFP</td>
</tr>
<tr>

<td>Program Planning, Policy Development, and Interagency Coordination Related to Non-Medical Services – U</td>
</tr>
<tr>
<td>7.b.</td>
<td>Program Planning, Policy Development and Interagency Coordination Related to Medical/Medicaid Services – PM/50 Percent FFP</td>
</tr>
<tr>
<td>8.a.</td>
<td>Non-Medical/Medicaid Training – U</td>
</tr>
<tr>
<td>8.b.</td>
<td>Medical/Medicaid Related Training – PM/50 Percent FFP</td>
</tr>
<tr>
<td>9.a.</td>
<td>Referral, Coordination, and Monitoring of Non-Medicaid Services – U</td>
</tr>
</tbody>
</table>
4.2.A. CODE 1.A. - NON-MEDICAID OUTREACH – U

This code should be used by all LEA staff when performing activities that inform individuals about non-Medicaid social, vocational and educational programs (including special education) and how to access them; describing the range of benefits covered under these non-Medicaid social, vocational and educational programs and how to obtain them. Both written and oral methods may be used. Includes related paperwork, clerical activities or staff travel required to perform these activities.

- Informing families about wellness programs and how to access these programs.
- Scheduling and promoting activities that educate individuals about the benefits of healthy lifestyles and practices.
- Conducting general health education programs or campaigns that address lifestyle changes in the general population (e.g. dental prevention, anti-smoking, alcohol reduction, etc.).
- Conducting outreach campaigns that encourage persons to access social, educational, legal or other services not covered by Medicaid.
- Assisting in early identification of children with special medical/dental/mental health needs through various child find activities.
- Outreach activities in support of programs that are 100 percent funded by state general revenue.
- Developing outreach materials such as brochures or handbooks for these programs.
- Distributing outreach materials regarding the benefits and availability of these programs.

4.2.B. CODE 1.B. - MEDICAID OUTREACH – TM/50 PERCENT FFP

LEA staff should use this code when performing activities that inform eligible or potentially eligible individuals about Medicaid and how to access it. Activities include bringing potentially eligible individuals into the Medicaid system for the purpose of determining eligibility and arranging for the provision of Medicaid services. LEAs may only conduct outreach for the populations served by their affiliated schools, i.e., students and their parents or guardians. Examples include:

- Informing Medicaid eligible and potentially Medicaid eligible children and families about the benefits and availability of services provided by Medicaid (including preventive treatment and screening), including services provided through the EPSDT program.
- Developing and/or compiling materials to inform individuals about the Medicaid program (including EPSDT) and how and where to obtain those benefits. Note: This activity
should not be used when Medicaid-related materials are already available to the schools (such as through the Medicaid agency). As appropriate, school-developed outreach materials should have prior approval of the Medicaid agency.

- Distributing literature about the benefits, eligibility requirements, and availability of the Medicaid program, including EPSDT.
- Assisting the Medicaid agency to fulfill the outreach objectives of the Medicaid program by informing individuals, students and their families about health resources available through the Medicaid program.
- Providing information about Medicaid EPSDT screening (e.g. dental, vision) in schools that will help identify medical conditions that can be corrected or improved by services offered through the Medicaid program.
- Contacting pregnant and parenting teenagers about the availability of Medicaid prenatal and well baby care programs and services.
- Providing information regarding Medicaid managed care programs and health plans to individuals and families and how to access that system.
- Encouraging families to access medical/dental/mental health services provided by the Medicaid program.

Activities which are not considered Medicaid outreach under any circumstances are: (1) general preventive health education programs or campaigns addressing lifestyle changes, and (2) outreach campaigns directed toward encouraging persons to access social, educational, legal or other services not covered by Medicaid.

4.2.C. CODE 2.A. - FACILITATING APPLICATION FOR NON-MEDICAID PROGRAMS – U

LEA staff should use this code when informing an individual or family about programs such as Temporary Assistance for Needy Families (TANF), Food Stamps, Women, Infants, and Children (WIC), day care, legal aid and other social or educational programs and referring them to the appropriate agency to make application. The following are examples:

- Explaining the eligibility process for non-Medicaid programs, including IDEA.
- Assisting the individual or family in collecting/gathering information and documents for the non-Medicaid program application.
- Assisting the individual or family in completing the application, including necessary translation activities.
- Developing and verifying initial and continuing eligibility for the Free and Reduced Lunch Program.
- Developing and verifying initial and continuing eligibility for non-Medicaid programs.
- Providing necessary forms and packaging all forms in preparation for the non-Medicaid eligibility determination.
4.2.D. **CODE 2.B. - FACILITATING MEDICAID ELIGIBILITY DETERMINATION - TM/50 PERCENT FFP**

LEA staff should use this code when assisting an individual in becoming eligible for Medicaid. Includes related paperwork, clerical activities or staff travel required to perform these activities. This activity does not include the actual determination of Medicaid eligibility. Examples include:

- Verifying an individual’s current Medicaid eligibility status for purposes of the Medicaid eligibility process.
- Explaining Medicaid eligibility rules and the Medicaid eligibility process to prospective applicants.
- Assisting individuals or families in completing a Medicaid eligibility application.
- Gathering information related to the application and eligibility determination for an individual, including resource information and third party liability (TPL) information, as a prelude to submitting a formal Medicaid application.
- Providing necessary forms and packaging all forms in preparation for the Medicaid eligibility determination.
- Referring an individual or family to the local assistance office to make application for Medicaid benefits.
- Assisting the individual or family in collecting/gathering required information and documents for the Medicaid application.
- Participating as a Medicaid eligibility outreach outstation (does not include determining eligibility).

4.2.E. **CODE 3. - SCHOOL RELATED AND EDUCATIONAL ACTIVITIES – U**

This code should be used for any other school related activities that are not health related, such as social services, educational services and teaching services; employment and job training. These activities include the development, coordination and monitoring of a student’s education plan. Includes related paperwork, clerical activities or staff travel required to perform these activities. Examples include:

- Providing classroom instruction (including lesson planning).
- Testing, correcting papers.
- Developing, coordinating, and monitoring the academic portion of the Individualized Education Program (IEP) for a student, which includes ensuring annual reviews of the IEP are conducted, parental sign-offs are obtained, and the academic portion of the actual IEP meetings with the parents. (If appropriate, this would also refer to the same activities performed in support of an Individualized Family Service Plan [IFSP].)
- Compiling attendance reports.
- Performing activities that are specific to instructional, curriculum, and student-focused areas.
- Reviewing the education record for students who are new to the school district.
- Providing general supervision of students (e.g. playground, lunchroom).
- Monitoring student academic achievement.
- Providing individualized instruction (e.g. math concepts) to a special education student.
- Conducting external relations related to school educational issues/matters.
- Compiling report cards.
- Carrying out discipline.
- Performing clerical activities specific to instructional or curriculum areas.
- Activities related to the educational aspects of meeting immunization requirements for school attendance.
- Compiling, preparing, and reviewing reports on textbooks or attendance.
- Enrolling new students or obtaining registration information.
- Conferring with students or parents about discipline, academic matters or other school related issues.
- Evaluating curriculum and instructional services, policies, and procedures.
- Participating in or presenting training related to curriculum or instruction (e.g. language arts workshop, computer instruction).
- Translating an academic test for a student.

4.2.F. CODE 4.A. - DIRECT MEDICAL SERVICES – NOT COVERED ON A MEDICAL PLAN OF CARE (FFS – NON IEP) - U

This code should be selected when LEA staff members (employees or contracted staff) are providing direct client care services for which medical necessity has not been determined. This code includes pre- and post-activities associated with the actual delivery of the direct client care services, e.g. paperwork or staff travel required to perform these services.

Examples of activities reported under this code:

- All non-IDEA and/or non-IEP direct client care services as follows:
  - Providing health/mental health services.
  - Conducting medical/health assessments/evaluations and diagnostic testing and preparing related reports.
  - Performing developmental assessments.
  - Administering first aid.

This code should be selected when LEA staff members (employees or contracted staff) provide direct client services as covered services delivered by LEAs under the FFS
Program for students with an IEP/IFSP. These direct client services may be delivered to an individual and/or group in order to ameliorate a specific condition and are performed in the presence of the student(s). This code includes the provision of all IDEA/IEP medical (i.e. health-related) services. It also includes functions performed pre- and post-actual direct client services (when the student may not be present); for example: paperwork, or staff travel directly related to the direct client services.

Examples of activities reported under this code:

**4.2.G.1. ALL IDEA/IEP DIRECT CLIENT SERVICES WITH THE STUDENT/CLIENT PRESENT**

Includes:

- Providing health/mental health services as covered in the student’s IEP.
- Conducting medical/health assessments/evaluations and diagnostic testing and preparing related reports as covered in the student’s IEP.

**4.2.G.2. DIRECT MEDICAL SERVICES COST POOL**

The list of services corresponds to all of the services outlined in the State Plan. This includes:

- Audiologist services, including evaluation and therapy services (only if included in the student’s IEP/IFSP).
- Physical Therapy services and evaluations (only if included in the student’s IEP/IFSP).
- Occupational Therapy services and evaluations (only if included in the student’s IEP/IFSP).
- Speech Language Therapy services and evaluations (only if included in the student’s IEP/IFSP).
- Psychological, Counseling and Social Work services, including therapy services (only if included in the student’s IEP/IFSP).
- Orientation and Mobility services and evaluations (only if included in the student’s IEP/IFSP).
- Nursing services and evaluations (only if included in the student’s IEP/IFSP), including skilled nursing services on the IEP/IFSP and time spent administering/monitoring medication only if it is included as part of an IEP/IFSP and documented in the IEP/IFSP).
- Physician and Psychiatrist services (only if included in the student’s IEP/IFSP).
- Assistive Technology Device Services.

**4.2.G.3. PERSONAL CARE SERVICES**

This code is used for providing a range of human assistance services to persons with disabilities and chronic conditions which enable them to accomplish tasks that they would normally do for themselves if they did not have a disability or chronic condition.
Assistance may be in the form of hands-on assistance or cueing so that the person performs the task by him/herself. The need for services must be documented in the child’s IEP/IFSP. Services are not covered when provided by a family member or if they are educational in nature.

Personal care services include related paperwork, clerical activities, or staff travel required to perform the following activities:

- Eating/feeding
- Respiratory assistance
- Toileting
- Grooming
- Dressing
- Transferring
- Ambulation
- Intervention for seizure disorder
- Personal hygiene
- Mobility/Positioning
- Meal preparation
- Skin care
- Muscle strengthening
- Bathing
- Maintaining continence
- Medical equipment maintenance
- Assistance with self-administered medications
- Re-direction and intervention for behavior
- Health-related functions through hands-on assistance, supervision and cueing

4.2.G.4. TARGETED CASE MANAGEMENT SERVICES

This code is used for providing services which are a part of the IEP/IFSP treatment plan. These services identify and address special health problems and needs that affect the student’s ability to learn and assist the student to gain and coordinate access to a broad range of medically-necessary services covered under the Medicaid program.

Targeted Case Management Services include related paperwork, clerical activities, or staff travel required to perform the following activities:

- Assure that standard re-examination/follow-up of the student is periodically conducted to ensure the student receives needed diagnosis and treatment.
• Assist families in identifying/choosing appropriate care providers and services.
• Maintain case records and indicate all contact for student in the same manner as other covered services.
• Coordinate performance evaluations/assessments and other service needs for the student.
• Prevention of duplicate services.
• Facilitation/participation in development, review and evaluation of the multi-disciplinary assessment.
• Supporting activities that link or coordinate needed health services for the student.
• Meeting with teachers and other professional staff to discuss testing, planning, treatment, coordinating effective interventions, and student progress.
• Coordinating school based services and treatment with parents and student.
• Monitoring and recommending a plan of action.
• Providing modifications to the multi-disciplinary, patient-centered treatment plan.
• Coordinating with staff/health professionals to establish continuum of health and behavioral services in the school setting.
• Provide summary of provider, parent and student consultation.

This code also includes pre- and post-time directly related to providing direct client care services when the student/client is not present. Examples of pre- and post-time activities when the student/client is not present include: time to complete all paperwork related to the specific direct client care service, such as preparation of progress notes, translation of session notes, review of evaluation testing/observation, planning activities for the therapy session, travel to/from the therapy session, or completion of billing activities.

General examples that are considered pre- and post-time:

• Pre- and post-activities associated with physical therapy services; for example: time to build a customized standing frame for a student or time to modify a student’s wheelchair desk for improved freedom of movement for the client.
• Pre- and post-activities associated with speech language pathology services; for example: preparing lessons for a client to use with an augmentative communicative device or preparing worksheets for use in group therapy sessions.
• Updating the medical/health-related service goals and objectives of the IEP.
• Travel to the direct service/therapy.
• Paperwork associated with the delivery of the direct care service, as long as the student/client is not present. Such paperwork could include the preparation of progress notes, translation of session notes, or completion of billing activities.
• Interpretation of the evaluation results and/or preparation of written evaluations when student/client is not present. (Assessment services are billed for testing time when the
student is present, for interpretation time when the student is not present, and for report
writing when the student is not present.)

4.2.H. CODE 4.c. - DIRECT MEDICAL SERVICES – COVERED ON A MEDICAL PLAN OF CARE, NOT
COVERED AS IDEA/IEP SERVICE – MEDICAL PLAN RATIO

This code should be selected when LEA staff members (employees or contracted staff)
provide direct client services as covered services delivered by LEAs under the FFS
program when documented on a medical plan other than an IEP/IFSP or for services in
which medical necessity has been determined. These direct client services may be
delivered to an individual and/or group in order to ameliorate a specific condition and are
performed in the presence of the student(s). This code includes the provision of medical
(i.e., health-related) services outlined on a medical plan other than an IEP/IFSP or for
which medical necessity has been determined. It also includes functions performed pre-
and post-actual direct client services (when the student may not be present); for
example: paperwork, or staff travel directly related to the direct client services.

Examples of activities reported under this code:

4.2.H.1. ALL MEDICAL PLAN DIRECT CLIENT SERVICES WITH THE
STUDENT/CLIENT PRESENT

Includes:

- Providing health/mental health services as covered in the student’s medical plan other
  than an IEP/IFSP.
- Conducting medical/health assessments/evaluations and diagnostic testing and preparing
  related reports as covered in the student’s medical plan other than an IEP/IFSP.
- Services for which medical necessity has been determined.

The list of services corresponds to all of the services outlined in the State Plan. This
includes:

- Audiologist services, including evaluation and therapy services (only if included in the
  student’s medical plan).
- Physical Therapy services and evaluations (only if included in the student’s medical plan).
- Occupational Therapy services and evaluations (only if included in the student’s medical
  plan).
- Speech Language Therapy services and evaluations (only if included in the student’s
  medical plan).
- Counseling services, including therapy services (only if included in the student’s medical
  plan or when medical necessity has been determined).
- Orientation and Mobility services and evaluations (only if included in the student’s
  medical plan).
• Nursing services and evaluations (only if medical necessity has been determined including skilled nursing services on the medical plan, and time spent administering/monitoring medication only if it is included as part of a medical plan of care and documented in the plan of care).

• Nutrition services include the management and counseling for students on special diets for genetic metabolic disorders, prolonged illness, deficiency disorders or other complicated medical problems. Nutritional support through assessment and monitoring of the nutritional status and teaching related to the dietary regimen.

• All EPSDT covered services, such as screenings, immunizations, etc. or services in which medical necessity has been determined.

This code also includes pre- and post-time directly related to providing direct client care services when the student/client is not present. Examples of pre- and post-time activities when the student/client is not present include: time to complete all paperwork related to the specific direct client care service such as preparation of progress notes, translation of session notes, review of evaluation testing/observation, planning activities for the therapy session, travel to/from the therapy session, or completion of billing activities.

General examples that are considered pre- and post-time:

• Pre- and post-activities associated with physical therapy services; for example: time to build a customized standing frame for a student or time to modify a student’s wheelchair desk for improved freedom of movement for the client.

• Pre- and post-activities associated with speech language pathology services; for example: preparing lessons for a client to use with an augmentative communicative device or preparing worksheets for use in group therapy sessions.

• Updating the medical/health-related service goals and objectives of the medical plan of care.

• Travel to the direct service/therapy.

• Paperwork associated with the delivery of the direct care service as long as the student/client is not present. Such paperwork could include the preparation of progress notes, translation of session notes, or completion of billing activities.

• Interpretation of the evaluation results and/or preparation of written evaluations when student/client is not present. (Assessment services are billed for testing time when the student is present, for interpretation time when the student is not present, and for report writing when the student is not present.)

LEA staff should use this code when assisting an individual to obtain transportation to services not covered by Medicaid or accompanying the individual to services not covered by Medicaid. Includes related paperwork, clerical activities or staff travel required to perform this activity:

- Scheduling or arranging transportation to social, vocational, and/or educational programs and activities.

LEA staff should use this code when assisting an individual to obtain transportation to services covered by Medicaid. This does not include the provision of the actual transportation service or the direct cost of the transportation, but rather the administrative activities involved in providing transportation. Includes related paperwork, clerical activities or staff travel required to perform these activities. An example is:

- Scheduling or arranging transportation to Medicaid covered services.

Note: Staff that may arrange transportation that may be included in the RMTS include, but are not limited to, Program Administrators, Special Education Support or other staff at the district who are responsible for arranging specialized transportation for students to receive medical services; however, job titles of staff that provide these types of services vary by district.

LEA staff should use this code when providing translation services related to social, vocational or educational programs and activities as an activity separate from the activities referenced in other codes. Includes related paperwork, clerical activities or staff travel required to perform these activities. Examples include:

- Arranging for or providing translation services (oral or signing services) that assist the individual to access and understand social, educational, and vocational services.
- Arranging for or providing translation services (oral or signing services) that assist the individual to access and understand state education or state-mandated health screenings (e.g. vision, hearing, and scoliosis) and general health education outreach campaigns intended for the student population.
- Developing translation materials that assist individuals to access and understand social, educational, and vocational services.

4.2.L. Code 6.B. - Translation Related to Medicaid Services - PM/75 Percent FFP

Translation may be allowable as an administrative activity if it is not included and paid for as part of a medical assistance service. However, it must be provided by separate units.
or separate employees performing solely translation functions for the LEA and it must facilitate access to Medicaid covered services.

This code should be used by LEA employees who provide translation services related to Medicaid covered services as an activity separate from the activities referenced in other codes. Includes related paperwork, clerical activities or staff travel required to perform these activities. Examples include:

- Arranging for or providing translation services (oral and signing) that assist the individual to access and understand necessary care or treatment covered by Medicaid.
- Developing translation materials that assist individuals to access and understand necessary care or treatment covered by Medicaid.
- Providing translation services (oral and signing) that assist the individual to access and understand necessary care or treatment covered by Medicaid.
- Developing translated materials, including Braille transcriptions, that assist individuals to access and understand necessary care or treatment covered by Medicaid.
- Translation while the school nurse provides covered services to a student whose primary language is not English.
- Sign language interpretation during provision of covered services to a deaf child.
- Transcribing into Braille the fact sheet school nurses use to explain/practice steps/proper technique for using an inhaler.
- Translation to help a school psychologist follow up with a student's non-English speaking parent on a mental health referral.

**4.2.M. CODE 7.A. - PROGRAM PLANNING, POLICY DEVELOPMENT AND INTERAGENCY COORDINATION RELATED TO NON-MEDICAL SERVICES – U**

LEA staff should use this code when performing activities associated with the development of strategies to improve the coordination and delivery of non-medical/non-mental health services to school age children and when performing collaborative activities with other agencies. Non-medical services may include social, educational and vocational services. Only employees whose position descriptions include program planning, policy development and interagency coordination should use this code. Includes related paperwork, clerical activities or staff travel required to perform these activities. Examples include:

- Identifying gaps or duplication of non-medical services (e.g. social, vocational, educational and state-mandated general health care programs) to school age children and developing strategies to improve the delivery and coordination of these services.
- Developing strategies to assess or increase the capacity of non-medical school programs.
- Monitoring the non-medical delivery systems in schools.
- Developing procedures for tracking families’ requests for assistance with non-medical services and the providers of such services.
• Evaluating the need for non-medical services in relation to specific populations or geographic areas.
• Analyzing non-medical data related to a specific program, population, or geographic area.
• Working with other agencies providing non-medical services to improve the coordination and delivery of services and to improve collaboration around the early identification of non-medical problems.
• Defining the relationship of each agency’s non-medical services to one another.
• Developing advisory or work groups of professionals to provide consultation and advice regarding the delivery of non-medical services and state-mandated health screenings to the school populations.
• Developing non-medical referral sources.
• Coordinating with interagency committees to identify, promote and develop non-medical services in the school system.

4.2.N. CODE 7.b. - PROGRAM PLANNING, POLICY DEVELOPMENT AND INTERAGENCY COORDINATION RELATED TO MEDICAL/MEDICAID SERVICES - PM/50 PERCENT FFP

This code should be used by LEA staff when performing activities associated with the development of strategies to improve the coordination and delivery of medical/dental/mental health services to school age children, and when performing collaborative activities with other agencies and/or providers. Employees whose position descriptions include program planning, policy development and interagency coordination may use this code. However, it is a state option whether or not the position descriptions need to be explicit with respect to these specific functions. This code refers to activities such as planning and developing procedures to track requests for services; the actual tracking of requests for Medicaid services would be coded under Code 9.b. - Referral, Coordination and Monitoring of Medicaid Services. Includes related paperwork, clerical activities or staff travel required to perform these activities. Examples include:

• Identifying gaps or duplication of medical/dental/mental health services to school age children and developing strategies to improve the delivery and coordination of these services.
• Developing strategies to assess or increase the capacity of school medical/dental/mental health programs.
• Monitoring the medical/dental/mental health delivery systems in schools.
• Developing procedures for tracking families’ requests for assistance with medical/dental/mental health services and providers, including Medicaid. (This does not include the actual tracking of requests for Medicaid services.)
• Evaluating the need for medical/dental/mental health services in relation to specific populations or geographic areas.
• Analyzing Medicaid data related to a specific program, population, or geographic area.
• Working with other agencies and/or providers that provide medical/dental/mental health services to improve the coordination and delivery of services, to expand access to
specific populations of Medicaid eligible, and to increase provider participation and improve provider relations.

- Working with other agencies and/or providers to improve collaboration around the early identification of medical/dental/mental health problems.
- Developing strategies to assess or increase the cost effectiveness of school medical/dental/mental health programs.
- Defining the relationship of each agency’s Medicaid services to one another.
- Working with Medicaid resources, such as the Medicaid agency and Medicaid managed care plans, to make good faith efforts to locate and develop EPSDT health services referral relationships.
- Developing advisory or work groups of health professionals to provide consultation and advice regarding the delivery of health care services to the school populations.
- Working with the Medicaid agency to identify, recruit and promote the enrollment of potential Medicaid providers.
- Developing medical referral sources, such as directories of Medicaid providers and managed care plans, which will provide services to targeted population groups, e.g. EPSDT children.
- Coordinating with interagency committees to identify, promote and develop EPSDT services in the school system.

**4.2.O. CODE 8.A. - NON-MEDICAL/MEDICAID TRAINING – U**

This code should be used by LEA staff when coordinating, conducting or participating in training events and seminars for school-based services staff regarding the benefit of the programs other than the Medicaid program such as educational programs; for example: how to assist families to access the services of the relevant programs and how to more effectively refer students for those services. Includes related paperwork, clerical activities or staff travel required to perform these activities. Examples include:

- Participating in or coordinating training that improves the delivery of services for programs other than Medicaid.
- Participating in or coordinating training that enhances IDEA child find programs.

**4.2.P. CODE 8.B. - MEDICAL/MEDICAID RELATED TRAINING – PM/50 PERCENT FFP**

This code should be used by LEA staff when coordinating, conducting or participating in training events and seminars for Michigan Direct Medical Service and AOP staff regarding the benefits of the Medicaid program, how to assist families in accessing Medicaid services, and how to more effectively refer students for services. Includes related paperwork, clerical activities or staff travel required to perform these activities. Examples include:

- Participating in or coordinating training that improves the delivery of medical/Medicaid related services.
Participating in or coordinating training that enhances early identification, intervention, and screening of students with special health needs to such services (e.g. Medicaid EPSDT services). (This is distinguished from IDEA child find programs.)

LEA staff should use this code when making referrals for coordinating and/or monitoring the delivery of non-medical, such as educational, services. Includes related paperwork, clerical activities or staff travel required to perform these activities. Examples include:

- Making referrals for and coordinating access to social and educational services such as child care, employment, job training, and housing.
- Making referrals for, coordinating, and/or monitoring the delivery of state education agency mandated child health screens (e.g. vision, hearing, and scoliosis).
- Making referrals for, coordinating, and monitoring the delivery of scholastic, vocational, and other non-health related examinations.
- Gathering any information that may be required in advance of these non-Medicaid related referrals.
- Participating in a meeting/discussion to coordinate or review a student’s need for scholastic, vocational, and non-health related services not covered by Medicaid.
- Monitoring and evaluating the non-medical components of the individualized plan as appropriate.

Case Management: Note that case management as an administrative activity involves the facilitation of access and coordination of program services. Such activities may be provided under the term Case Management or may also be referred to as Referral, Coordination, and Monitoring of Non-Medicaid Services.

Case management may also be provided as an integral part of the service and would be included in the service cost. School staff should use this code when making referrals for, coordinating, and/or monitoring the delivery of non-Medicaid covered services.

4.2.R. CODE 9.B. - REFERRAL, COORDINATION AND MONITORING OF MEDICAID SERVICES – PM/50 PERCENT FFP

School staff should use this code when making referrals for, coordinating, and/or monitoring the delivery of medical (Medicaid covered) services. Referral, coordination and monitoring activities related to services in an IEP are reported in this code. Activities that are part of a direct service are not claimable as an administrative activity. Furthermore, activities that are an integral part of or an extension of a medical service (e.g. patient follow-up, patient assessment, patient counseling, patient education, patient consultation, billing activities) should be reported under Code 4.a. - Direct Medical Services - Not Covered on a Medical Plan of Care (FFS – Non-IEP); 4.b. - Direct Medical Services - Covered as IDEA/IEP Services (FFS – IEP); or 4.c. - Direct Medical Services – Covered on a Medical Plan of Care, Not Covered as IDEA/IEP Service. Examples include:
Identification and referring adolescents who may be in need of Medicaid family planning services.

Making referrals for and/or coordinating medical or physical examinations and necessary medical/dental/mental health evaluations.

Making referrals for and/or scheduling EPSDT screens, interperiodic screens, and appropriate immunization, but NOT to include the state-mandated health services.

Referring students for necessary medical health, mental health, or substance abuse services covered by Medicaid.

Arranging for any Medicaid covered medical/dental/mental health diagnostic or treatment services that may be required as the result of a specifically identified medical/dental/mental health condition.

Gathering any information that may be required in advance of medical/dental/mental health referrals.

Participating in a meeting/discussion to coordinate or review a student’s needs for health-related services covered by Medicaid.

Developing, coordinating, and monitoring the medical portion of the Individualized Education Program (IEP) for a student which includes the medical portion of the actual IEP meetings with the parents, time spent developing the medical services plan on the IEP, and writing of the medical service goals of the IEP. (If appropriate, this would also refer to the same activities performed in support of an Individualized Family Service Plan (IFSP) or other medical plan.)

Providing follow-up contact to ensure that a child has received the prescribed medical/dental/mental health services covered by Medicaid.

Coordinating the delivery of community based medical/dental/mental health services for a child with special/severe health care needs.

Coordinating the completion of the prescribed services, termination of services, and the referral of the child to other Medicaid service providers as may be required to provide continuity of care.

Providing information to other staff on the child’s related medical/dental/mental health services and plans.

Monitoring and evaluating the Medicaid service components of the IEP and/or medical plan as appropriate.

Coordinating medical/dental/mental health service provision with managed care plans as appropriate.

Note: A “referral” is considered appropriate when made to a provider who can provide the required service, will accept the student as a patient, and will accept the student’s source of payment for services.

Case Management: Note that case management as an administrative activity involves the facilitation of access and coordination of program services. Such activities may be provided under the term Case Management or may also be referred to as Referral, Coordination, and Monitoring of Non-Medicaid Services.
Case management may also be provided as an integral part of the service and would be included in the service cost. School staff should use this code when making referrals for, coordinating, and/or monitoring the delivery of non-Medicaid covered services.

4.2.S. Code 10. - General Administration – R

Time study participants, when performing activities that are not directly assignable to program activities, should use this code. Includes related paperwork, clerical activities or staff travel required to perform these activities. Note that certain functions such as payroll, maintaining inventories, developing budgets, executive direction, etc. are considered overhead and, therefore, are only allowable through the application of an approved indirect cost rate.

Below are typical examples of general administrative activities but they are not all inclusive.

- Taking lunch, breaks, leave, or other paid time not at work.
- Establishing goals and objectives of health-related programs as part of the school’s annual or multi-year plan.
- Reviewing school or district procedures and rules.
- Attending or facilitating school or unit staff meetings, training, or board meetings.
- Performing administrative or clerical activities related to general building or district functions or operations.
- Providing general supervision of staff, including supervision of student teachers or classroom volunteers, and evaluation of employee performance.
- Reviewing technical literature and research articles.
- Other general administrative activities of a similar nature as listed above that cannot be specifically identified under other activity codes.

4.2.T. Code 11. - Not Scheduled to Work – Not Included in the Distribution or Invalid

This code should be used if the random moment occurs at a time when a part-time, temporary or contracted employee is not scheduled to be at work. Note: Full-time school staff should not use this code.
**SECTION 5 – CONFIDENTIALITY**

Aggregate time study data may occasionally be useful for other administrative tasks (i.e., planning) and may be used in that way. However, any individually identifiable information must be protected as required by all applicable state and federal statutes and regulations to ensure confidentiality and protection of privacy.
SECTION 6 – TIME STUDY TRAINING

6.1 TRAINING

The approved training methods, materials, information, and instructions are tailored to each group involved in the time studies.

The Contractor, along with MDHHS, is responsible for developing training programs and materials and, along with the ISD coordinator, providing follow-up assistance as needed. For training, there are some services the Contractor will provide statewide and other services that will be provided to the individual ISDs.

6.1.A. LOCAL ISD COORDINATOR TRAINING

All ISDs have an ISD Coordinator/representative who receives training that ensures a thorough understanding of their coordinator responsibilities, the approved time study and cost reporting activities. These individuals must understand their role as the liaison between the Medicaid Program, the Contractor, and other staff. They must understand and be able to convey to others the basic purpose of the program, assist the Contractor with follow-up as needed, and serve as a facilitator for the Contractor to "navigate" the district as necessary.

6.1.B. TIME STUDY PARTICIPANT TRAINING

For time study participants, it is essential that these individuals understand the purpose of the time studies, that time is of the essence related to completion of the form, and that their role is crucial to the success of the time study. The Contractor develops and provides detailed written information and instructions for completing the time study forms as a coversheet attached to each time study form. The coversheet provides a "tutorial" with the aforementioned basics of the program as well as information about the Medicaid covered services provided in the school setting.
SECTION 7—SUMMARY OF TIME STUDY STEPS

The Contractor duties are to:

- Import eligible school district staff information to create the RMTS staff pools.
- Randomly select staff/moments to be sampled.
- Generate printed or electronic RMTS forms for each moment.
- Generate and distribute a master list of selected moments to the ISD Coordinators as a local control list.
- Generate mailing labels addressed to randomly selected staff.
- Code the time study responses.
- Calculate activity percentages for each of the activity codes.
- Scan completed and coded time study forms.
- Transfer raw data from scanned forms to the claims development software to calculate activity percentages for each of the activity codes.
- Produce quarterly reports summarizing the results of the random moment time studies (RMTS) and RMTS compliance reporting. (Both reports are forwarded to the MDHHS Program Policy Division for posting on the MDHHS website. Refer to the Directory Appendix for website information.)
- Produce periodic and special RMTS reports that provide data and information sorted by LEA and ISD that are provided to the CMS, MDHHS, MDE, ISDs and their auditors.
- Create and verify the eligible staff pools for time studies from the quarterly information provided by the ISDs.
- Distribute time study forms and collect completed time study forms.
- Code the activity forms received from the ISDs.
- Initiate and complete the ISD claim workbooks by obtaining the financial data from each LEA and compiling data to complete the workbook.
SECTION 8 – SUMMER QUARTER TIME STUDY METHODOLOGY

8.1 AOP QUARTERLY CLAIM (OTHER THAN SUMMER QUARTER)

The claim consists of the results of the quarterly RMTS of the approved staff pool for the quarter and the correlating allowable costs applied to the reimbursement methodology.

8.2 AOP SUMMER QUARTER FORMULA AND RANDOM MOMENT TIME STUDY

The summer quarter months are July, August and September. There is a break period between the end of one regular school year and the beginning of the next regular school year during which only a few staff are working. The majority of school staff work during the school year and do not work for part of the summer quarter (9-month staff). However, there are some 9-month staff that opt to receive their pay over a 12-month period. Therefore, different factors must be applied to the summer formula in order to accurately reflect the activities that are performed by the staff.

The summer quarter is divided into two parts producing two partial claims. For the AOP process, the sum of both claims is submitted to Medicaid for reimbursement for the summer quarter. The first part of the quarter is from July 1 to the date students return to school. The second part of the quarter is from the date students return to school through September 30.

The summer time study of 800 moments is performed after students return to school and is only applied to the staff pool costs for the second part of the summer quarter (Fall staff pool costs). The RMTS is performed during a shorter time period to accurately reflect the work efforts being performed when all staff have returned to work.

The sums of Part I and Part II are utilized to calculate the claim submitted to Medicaid for reimbursement.

8.2.A. PART I - JULY 1 TO THE INDIVIDUAL ISD DATE THAT STUDENTS RETURN TO SCHOOL

Part I of the summer quarter is comprised of the following elements:

- Staff Pool – those eligible staff in the April through June staff pool
- Costs – April through June allowable staff pool costs
- A weighted average of the October-December, January-March, April-June, and the summer time study results.

8.2.B. PART II – DATE STUDENTS RETURN TO SCHOOL THROUGH SEPTEMBER 30

Part II of the summer quarter is comprised of the following elements:

- Staff Pool – the eligible new Fall staff returning to work
- Costs – the allowable cost associated with the new Fall staff pool
- RMTS – the time study for Part II is performed for a shortened period of time from the day students return to school through September 30. The start date will vary by ISD depending on the date the students return to school.
8.3 DIRECT MEDICAL SUMMER QUARTER FORMULA AND RANDOM MOMENT TIME STUDY

A weighted average of the four time study results for the staff pool periods listed below is applied to the Medicaid Allowable Expenditure Report (MAER) total costs. The MAER costs include the annual costs associated with the direct medical services, personal care services and targeted case management services.

The direct medical services time study application is comprised of the following elements:

- Staff Pools – Those individuals eligible to participate in the following four staff pool periods:
  - October through December
  - January through March
  - April through June
  - Date students return to school through September 30 (summer time study)

- Cost Pool – The costs from the annual Medicaid Allowable Expenditure Report (direct medical services, targeted case management and personal care services).

- RMTS – A weighted average of the October–December, January–March, April–June and the summer time study results as described above.

8.4 FINANCIAL REPORTING COMPLIANCE REQUIREMENTS

The financial data reported (salaries, benefits, supplies, purchased services, and other expenditures) must be based on actual detailed expenditures from LEA payroll and financial systems. Payroll and financial system data must be applied using generally accepted governmental accounting standards and principles or applicable administrative rules. The expenditures accumulated must correlate to the claiming period.
SECTION 9 – AUDIT AND QUALITY ASSURANCE

9.1 AUDIT

9.1 A. ACTIVITIES TO BE PERFORMED BY MDHHS OFFICE OF AUDIT STAFF

MDHHS audit staff review of selected ISD cost reports includes the following activities:

- Verification that the salaries listed for employees/positions included in the Random Moment Time Study (RMTS) staff pool match the payroll records for the same period as the time study.
- A review of the salaries of employees who changed positions during the time study period.
- If a replacement was hired/transferred, the auditor will verify that only the salary earned while working in a position on the staff pool list was reported, and that salaries for both the original and replacement employees were not duplicated on the report for the same time period.
- Verification that any other salaries and costs for supplies, etc., are of direct benefit to the employees on the relevant staff pool list and, therefore, allocable to that staff pool cost. For the Direct Medical program, all supplies and materials must be medically related.
- Confirmation that none of the direct costs reported were also claimed as an indirect cost, that the proper indirect cost rate was used, and the rate was applied only to costs in the base. The employees in non-standard job categories are the most likely to be considered indirect type employees; therefore, documentation will be reviewed for these individuals.
- Verification that no federal funds were claimed on the cost reports and that costs were not accepted for cost sharing.
- A standard review of other areas, such as confirmation that reported costs were actually paid, support documentation was maintained as required, and costs were properly charged to the correct accounts.
- Verification of recipient eligibility, documentation of services in the IEP/IFSP, and provider credentials.

The ISD must be prepared to direct the auditor to any document used to support and identify the reported RMTS costs.

9.1.B. SSAE 16 AUDIT REQUIREMENTS

The Contractor is required to have a Type II Statement on Standards for Attestation Engagements (SSAE) 16 audit to provide the necessary assurances that the claiming process (e.g., methodology, time studies, cost allocations, etc.) have been properly applied.

In a SSAE 16 Type II engagement, the service auditor expresses an opinion on whether the description of the service organization’s system is fairly presented, whether the controls included in the description are suitably designed, whether the controls were
operating effectively, and provides a description of the service auditor’s tests of operating effectiveness and the results of those tests.

The Contractor must undergo a SSAE 16 audit annually. The SSAE 16 audit must be submitted within 90 days after the end of the examination period.

Three (3) copies of the audit should be forwarded to the MDHHS Program Policy Section. (Refer to the Directory Appendix for contact information.)

9.2 QUALITY ASSURANCE, OVERSIGHT AND MONITORING

Quality assurance, oversight and monitoring activities include:

9.2.A. MDHHS PROGRAM POLICY – OVERSIGHT OF ADMINISTRATION AND OPERATIONS

MDHHS policy staff responsibilities are:

- Review quarterly time study results against historical benchmarks according to:
  - Overall results and matchable percentages
  - Benchmarks by activity code and by staff category
- Detailed investigation of anomalies in results.
- Determination of policy or procedure changes based on results of anomaly review.
- Overall statistical requirements in terms of confidence and precision levels on a quarterly basis and an annual basis.
- Sampling to review coding activities performed by the Contractor.
- Disseminate CMS guidance.
- Monitor ISDs processing of claims for compliance with State and Federal regulations and program guidelines.
- Assure that billing entities have the processes in place to correct any claims paid in error.
- Provide information and training to billing entities as needed for program compliance.
- Provide operational oversight and technical assistance.
- Assist the ISDs with quality assurance and compliance monitoring.
- Provide oversight of the ISDs quality assurance and compliance plans to ensure that they provide oversight and monitoring of such things as documentation, provider credentials, record retention, parental consent, and confidentiality.
9.2.B. MDHHS OFFICE OF INSPECTOR GENERAL – POST PAYMENT REVIEW AND COMPLIANCE

MDHHS Office of Inspector General staff responsibilities are:

- Post payment review for the purpose of adherence to provider policy, provider credentials and appropriate billing practices.
- Post payment review for the purpose of reported fraud or abuse.

For more detailed information regarding the Fraud and Abuse and Post Payment Review, refer to the Post Payment Review and Fraud/Abuse Section of the General Information for Providers Chapter.

9.2.C. MDHHS RATE REVIEW SECTION – COST SETTLEMENT REVIEW

MDHHS Rate Review Section staff responsibilities are:

- Import and create a database of the cost report data submitted by the ISDs.
- Perform reviews of the data for accuracy and completeness.
- Summarize the data and forward to the ISDs for final approval.
- Compile cost settlement summaries and prepare over/under adjustments.

9.2.D. CONTRACTOR OVERSIGHT AND QUALITY ASSURANCE

There are several levels of quality assurance and validation built into the RMTS process.

- In terms of coding, the Contractor has a coding process in place in which centralized coders code all moments, and then a second coder reviews all moments coded as matchable for verification of accurate and consistent application of activity codes. The second coder also reviews a random sample of 10% of all non-matchable moments for quality assurance purposes.
- Quality assurance and validation includes the quarterly review which includes the Contractor meeting with MDHHS staff specifically to review time study results and other procedural issues. Each quarter, the team reviews detailed reports which outline the current quarter time study results benchmarked against past quarter results. The results are reviewed by activity code as well as by matchable/non-matchable categories. Comparisons are made of the variances in the overall quarterly results from the same quarter in the previous year, as well as variances of the current quarter against the average of the past four quarters. Results are reviewed and discussed in terms of results by staff category. Any anomalies identified are pursued through a detailed investigation of the moments which produced the anomaly. The Contractor, in conjunction with MDHHS, then determines how to handle any issues in terms of additional communication or training for RMTS participants, policy or procedural changes, etc.
- ISDs utilizing the web-based input process may view compliance reporting online.
- ISDs utilizing the paper methodology are sent compliance reporting on a weekly basis.
9.2.E. ISD OVERSIGHT

ISD responsibilities are to:

- have systems in place to monitor service delivery, claim documentation, claim billing, and payments received.
- verify that the credentials of all clinicians are current and appropriate for Medicaid billing and that services rendered are within the scope of the clinician's practice.

SECTION 1 – GENERAL INFORMATION

This chapter applies to all providers.

The Michigan Department of Health and Human Services (MDHHS) administers the Medicaid Program, Children’s Special Health Care Services (CSHCS), Maternity Outpatient Medical Services (MOMS) and other special programs described elsewhere in this manual. In addition to these traditional programs, MDHHS administers many other programs/coverages to meet the healthcare needs of Michigan’s medically indigent population. Programs vary in scope and eligibility requirements and are funded through various sources, including federal, state, and/or private. Some of the programs offer comprehensive or reduced Medicaid benefits as indicated. Additional information regarding these programs may be available on the MDHHS website.

Contact information for the various programs is listed in the Directory Appendix.
SECTION 2 – PROGRAMS THAT TARGET SPECIFIC MEDICAL CONDITIONS

2.1 BREAST AND CERVICAL CANCER CONTROL PROGRAM

2.1.A. ELIGIBLE BENEFICIARIES

The Breast and Cervical Cancer Control Program (BCCCP) covers uninsured low-income women of all ages especially, but not limited to, women aged 40-64. Certain income restrictions do apply. Enrollees in the Breast and Cervical Cancer Control Program (BCCCP) are exempt from co-pays.

- Insured women may apply if certain insurance, age, and income requirements are met.
- Women who are enrolled in a managed care program, health maintenance organization (HMO) or have Medicare Part B are not eligible.

2.1.B. COVERED SERVICES

Covered services include:

- Clinical breast exams
- Pap smears
- Pelvic exams
- Screening mammogram, and
- Appropriate referral to community providers for follow-up of abnormalities.

Breast biopsy, colposcopy-directed services, colposcopy service, diagnostic mammograms, and loop electrosurgical excision procedure (LEEP) may be provided based upon medical needs, financial and insurance status, and availability of federal grant funds or Michigan tobacco tax dollars.
SECTION 3 — GENERAL COVERAGE PROGRAMS

3.1 MEDICARE SAVINGS PROGRAM

3.1.A. ELIGIBLE BENEFICIARIES

Low income Medicare beneficiaries and those individuals who are eligible for Medicare but do not enroll due to the cost may participate in the Medicare Savings Program (MSP). Financial and nonfinancial requirements and restrictions do apply.

3.1.B. COVERED SERVICES

The MSP pays Medicare coinsurance, deductible, and premiums.

3.2 SPECIAL N SUPPORT

3.2.A. ELIGIBLE BENEFICIARIES

Families that received the low-income families (LIF) Medicaid but are no longer eligible due to an increase in child support may qualify for Special N Support. Most of the health coverage is provided by Medicaid Health Plans (MHPs), and the majority of the beneficiaries are already enrolled in a MHP.

3.2.B. COVERED SERVICES

Special N Support beneficiaries receive regular Medicaid coverage for four months.

3.3 FREEDOM TO WORK

3.3.A. ELIGIBLE BENEFICIARIES

Medicaid-eligible disabled adults aged 16 through 64 years old with earned income may be eligible. SSI beneficiaries whose SSI eligibility may end due to financial factors are among those eligible to be considered for this program.

To be eligible, the beneficiary must be employed on a regular and continuing basis. There may be temporary breaks in employment up to 24 months if they are the result of involuntary layoff or are determined to be medically necessary.

For a married beneficiary, the spouse’s income and assets are not considered when determining eligibility for this Medicaid category. The beneficiary’s total countable unearned income cannot exceed 250 percent of the Federal Poverty Level (FPL) for ongoing eligibility. The beneficiary’s countable assets are limited to $75,000. In addition, the beneficiary is allowed to have IRS-recognized retirement accounts (including IRAs and 401Ks) of unlimited value.

3.3.B. COVERED SERVICES

Freedom To Work beneficiaries receive regular Medicaid coverage.
3.3.C. PREMIUMS

If the beneficiary’s Modified Adjusted Gross Income (MAGI) is below 138 percent of the FPL, there is no premium required for coverage. If the beneficiary’s MAGI is between 138 percent of the FPL and $75,000 per year, the premium is 2.5 percent of MAGI. If the total countable earned income exceeds $75,000 per year, the beneficiary must pay a premium equal to 100 percent of the cost of Medicaid coverage.

3.4 MEDICAID FOR SUPPLEMENTAL SECURITY INCOME BENEFICIARIES

3.4.A. ELIGIBLE BENEFICIARIES

Supplemental Security Income (SSI) covers disabled children whose families have low income, and low-income adults who are aged, disabled or blind. The Social Security Administration determines eligibility and awards monthly SSI payments based on income and assets requirements. Beneficiaries awarded SSI are automatically eligible for regular Medicaid coverage.

3.4.B. COVERED SERVICES

SSI beneficiaries are eligible for regular Medicaid. In some cases, Medicare premiums are paid by Medicaid based upon certain individual situations and previous work histories.

3.5 TRANSITIONAL MEDICAL ASSISTANCE

3.5.A. ELIGIBLE BENEFICIARIES

Transitional Medical Assistance (TMA) covers families who are U.S. citizens that are no longer eligible for the low-income family (LIF) Medicaid because the parent(s) has too much income from employment. The family must have received low-income family Medicaid for at least three months of the previous six months to be eligible for TMA. Most of the health coverage is provided by HMOs contracted by MDHHS. The majority of the beneficiaries are already enrolled in a MHP. A renewal of the application to TMA is not necessary.

3.5.B. COVERED SERVICES

TMA provides regular Medicaid coverage, or a comprehensive health care package that includes vision, dental and mental health services, if the beneficiary has been enrolled in a MHP for 12 months.
SECTION 4 – COMMUNITY-BASED LONG TERM CARE

4.1 MI CHOICE WAIVER (HOME AND COMMUNITY-BASED WAIVER FOR THE ELDERLY AND DISABLED)

The MI Choice Waiver provides services to aged and physically disabled individuals 18 years old and over who are eligible for full Medicaid and want to stay in their homes or another residential setting but, without the provision of waiver services, would require the level of care only available in a nursing facility. Income and assets requirements and restrictions apply. Applicants must also meet the Michigan Medicaid Nursing Facility Level of Care Determination criteria. Individuals must be currently Medicaid approved or be Medicaid eligible if they were to enter a nursing facility. MDHHS contracts with local agencies to administer this program. (Refer to the MI Choice Waiver Chapter for additional information.)

4.2 PROGRAM OF ALL-INCLUSIVE CARE FOR THE ELDERLY (PACE)

PACE is a comprehensive service delivery system for frail, elderly individuals who meet the Michigan Medicaid Nursing Facility Level of Care criteria. Refer to the PACE Chapter of this manual for additional information.
SECTION 5 – MICHILD

5.1 ELIGIBLE BENEFICIARIES

The MICHILD Medicaid program provides health care coverage for children who:

- Are age 0 through 18
- Have income at or below 212% of the Federal Poverty Level under the Modified Adjusted Gross Income (MAGI) methodology
- Do not have other comprehensive medical insurance (this includes insurance that covers inpatient and outpatient hospital services, laboratory, x-ray, pharmacy and physician services)
- Do not qualify for other MAGI related Medicaid programs
- Are residents of the State of Michigan

The child's eligibility for MICHILD is determined through the MAGI methodology. All criteria for MAGI eligibility must be met to be eligible for MICHILD.

Families enrolled in the MICHILD program are required to pay a premium of $10 per month per family to maintain coverage for their children. Children enrolled in MICHILD are exempt from copay for services.

5.2 COVERED SERVICES

Children enrolled in MICHILD are considered Medicaid beneficiaries and are entitled to all Medicaid covered services.
SECTION 6 – CHILD AND ADOLESCENT HEALTH CENTERS AND PROGRAMS

Under an agreement with MDHHS, Child and Adolescent Health Centers and Programs (CAHCPs) provide medical services and outreach on behalf of the Medicaid Health Plans (MHPs) to school-aged children. (Refer to the Medicaid Health Plan Chapter of this manual for additional information.)
SECTION 7 - FLINT FAMILY SUPPORTS COORDINATION SERVICES

Family Supports Coordination services are part of a comprehensive health benefit available to pregnant women and children who were served by the Flint water system who meet the Medicaid eligibility requirements.

Family Supports Coordination services assist individuals in gaining access to appropriate medical, educational, social, and/or other services. Family Supports Coordination services include assessments, planning, linkage, advocacy, care coordination, referral, monitoring, and follow-up activities.

In addition to Family Supports Coordination services, eligible beneficiaries will receive the full array of Medicaid-covered benefits. This includes the provision of Early and Periodic Screening, Diagnosis and Treatment (EPSDT) services for children up to age 21, Non-Emergency Medical Transportation (NEMT), and Maternal Infant Health Program (MIHP) services.

7.1 ELIGIBILITY

Providers may verify beneficiary eligibility for Family Supports Coordination services through a Community Health Automated Medicaid Processing System (CHAMPS) online eligibility inquiry or via a Health Insurance Portability and Accountability Act (HIPAA) 270 transaction. The CHAMPS or 271 eligibility response for beneficiaries eligible for Family Supports Coordination services will show:

- a current MAGI category beginning with “F”; and
- a current benefit plan of “TCMF” in addition to their assigned Medicaid or Children’s Health Insurance Program (CHIP)-related benefit plans.

7.2 CORE ELEMENTS OF FAMILY SUPPORTS COORDINATION [CHANGE MADE 7/1/23]

The purpose of Family Supports Coordination services is to provide a comprehensive array of services that are appropriate to the conditions of the individual. At a minimum, Family Supports Coordination services must include:

- a comprehensive assessment, (revised per bulletin MMP 23-20) history, re-assessments, and identification of a course of action to determine the specific needs of the beneficiary and to develop an individual Plan of Care;
- planning, linking, coordinating, follow-up, and monitoring to assist the beneficiary in gaining access to services;
- coordination with the beneficiary’s primary care provider (PCP), other providers, and Medicaid Health Plan (MHP), as applicable; and
- any other service approved by MDHHS.

7.2.A. INITIAL/ ANNUAL COMPREHENSIVE ASSESSMENT VISIT [CHANGE MADE 7/1/23]

All comprehensive assessment visits, including the initial in-person comprehensive assessment visit, must be conducted by a qualified licensed nurse or social worker with the beneficiary in the beneficiary’s home or primary place of residence. The purpose of the comprehensive assessment visit is to gather sufficient information to develop an
individualized Plan of Care for the beneficiary and to ensure that all other eligible individuals in the household are identified for further screening. Initial comprehensive assessments must be conducted in person while re-assessments may be conducted face-to-face.

It is expected that face-to-face re-assessments are performed annually; however, the frequency should be based on the needs and circumstances of the beneficiary and/or family. Active participation by the beneficiary and/or parent(s)/legal guardian(s) is necessary. Comprehensive assessment activities include: (revised per bulletin MMP 23-20)

- obtaining client history;
- identifying the beneficiary’s needs and completing related documentation; and
- gathering information from other sources, such as family members, medical providers, social workers, and educators (if necessary), to form a complete assessment of the beneficiary.

At a minimum, the comprehensive assessment visit shall assess:

- the growth and development of beneficiaries up to age 21;
- the behavioral profile of beneficiaries up to the age of 21, including the notation of aggressive or hyperactive behavior;
- the beneficiary’s access to a PCP and other health care providers;
- whether the beneficiary’s PCP has conducted a developmental and social-emotional screen(s) utilizing a standardized and validated tool, such as the Ages & Stages Questionnaire: Social-Emotional (ASQ:SE) or the Pediatric Symptom Checklist (PSC) as indicated by the American Academy of Pediatrics (AAP) Periodicity Schedule, and documenting the results of any screenings performed;
- whether the beneficiary’s PCP has assessed the beneficiary for sources of toxic stress and for sources of strength using nationally recognized tools, such as the Adverse Childhood Experiences (ACEs) and Resiliency questionnaires, and documenting the results of any screenings performed;
- the beneficiary’s access to prenatal care, potential for pregnancy complications, pica activities, and intent to breastfeed (pregnant beneficiaries);
- the beneficiary’s educational and nutritional needs, including participation in the Women, Infants and Children (WIC) program and/or the Food Assistance Program (FAP);
- the beneficiary’s environment and typical family practices that may pose a lead risk;
- lead hazards within the family’s dwelling; and
- access to NEMT.

7.2.B. DEVELOPMENT OF THE PLAN OF CARE AND DOCUMENTATION [CHANGE MADE 7/1/23]

During or immediately following the initial (revised per bulletin MMP 23-20) comprehensive assessment visit, a Plan of Care must be developed for beneficiaries who agree to participate in Family Supports Coordination services, with the active participation of the
parent(s)/legal guardian(s) when applicable. The development (and periodic revision) of a specific Plan of Care that is based on the information collected through the comprehensive assessment must specify the goals and actions to address the medical, educational, social, and/or other services needed by the beneficiary. The supports coordinator must ensure the active participation of the beneficiary, and work with the beneficiary (or the beneficiary’s parent[s]/legal guardian[s]) and others to develop those goals, and to identify a course of action to respond to the assessed needs of the beneficiary. The Plan of Care is to be shared with the beneficiary’s MHP and PCP, if applicable. Beneficiaries must consent to share the Plan of Care with the MHP and other providers identified in the Plan of Care. At a minimum, the Plan of Care must:

- identify a course of action to respond to the assessed needs of the beneficiary (e.g., plan for the testing of family members at risk for lead hazard exposure);
- provide education and information regarding lead hazards, including the impact of lead exposure on the developing fetus of pregnant beneficiaries; and
- facilitate blood lead testing and follow-up testing and treatment as recommended by the PCP.

Family Supports Coordination providers are required to document the following information for all beneficiaries receiving Family Supports Coordination services:

- the name of the beneficiary;
- the dates of the supports coordination services;
- the name of the Family Supports Coordination provider and the qualified professional (i.e., licensed nurse or social worker) providing the supports coordination services;
- the nature and content of the supports coordination visits received, and whether goals specified in the Plan of Care have been achieved;
- whether the beneficiary has declined services within the Plan of Care;
- the need for, and occurrences of, coordination with other providers;
- a timeline for obtaining needed services;
- a timeline for re-evaluation of the Plan of Care; and
- the beneficiary’s consent to share information.

7.2.C. REFERRALS AND RELATED ACTIVITIES

In collaboration with the PCP and the MHP, it is expected that the supports coordinator will facilitate and coordinate referral and related activities to assist the beneficiary in obtaining needed services. Activities such as scheduling appointments or linking the beneficiary with medical, educational, social, and/or other programs and services to address identified needs and achieve goals specified in the Plan of Care are primary components of Family Supports Coordination services. Referral activities include, but are not limited to, the coordination of age-appropriate services such as:

- health care related services, including physical and specialty behavioral health services;
 nutritional services, such as coordinating referrals to the Special Supplemental Nutrition Program, WIC program, or FAP;
 educational services, such as age-appropriate referrals to Early On, Great Start Readiness Programs, Head Start, and school-based services;
 additional social supports (including home visiting programs) to assist the beneficiary in obtaining other assistance, such as financial, housing, and transportation assistance, and lead assessment and abatement resources; and
 blood lead testing and re-testing for family members at risk for lead exposure, and education regarding lead hazards including the impact of lead exposure on young children and the developing fetus.

7.2.D. MONITORING AND FOLLOW-UP ACTIVITIES

Monitoring and follow-up activities include activities and contacts that are necessary to ensure the Plan of Care is implemented and adequately addresses the eligible beneficiary’s needs, and which may be conducted with the beneficiary, family members, service providers, or other entities or individuals. Monitoring and follow-up activities are conducted as frequently as necessary by the supports coordinator.

A maximum of five (5) face-to-face monitoring visits are billable per year for each eligible beneficiary. To be reimbursed, the visit must be face-to-face. Additional monitoring and follow-up activities are likely between face-to-face visits but are not reimbursable. At least one annual face-to-face monitoring visit should be conducted to determine whether the following conditions are met:

 services are being furnished in accordance with the beneficiary’s Plan of Care;
 services in the Plan of Care are adequate; and
 changes in the needs or status of the beneficiary are reflected in the Plan of Care.

Monitoring and follow-up activities include making necessary adjustments in the Plan of Care and service arrangements with providers.

7.3 ACCESSING SERVICES

Accessing Family Supports Coordination services may occur a number of ways. If the beneficiary is an MHP member, the MHP may initiate the initial contact with the beneficiary and identify those beneficiaries that may benefit from Family Supports Coordination services. Fee-for-Service (FFS) and MHP beneficiaries may also access Family Supports Coordination services either through a referral from their PCP or through a self-referral.

7.4 COVERED SUPPORTS AND SERVICES [CHANGE MADE 7/1/23]

A maximum of six (6) visits (revised per bulletin MMP 23-20) per year will be reimbursed for each eligible beneficiary as follows:

 one (1) visit for the initial/annual comprehensive assessment.
a maximum of five (5) visits for monitoring and follow-up.

For additional visits, MDHHS requires the provider to obtain prior authorization before the service is rendered. (Refer to the Directory Appendix for contact information regarding prior authorizations.)

Reimbursement for assessment and monitoring visits is inclusive of all related care coordination and monitoring activities. MDHHS does not reimburse for missed appointments/visits. A beneficiary may not be billed for a missed appointment/visit.

Medicaid reimbursement for Family Supports Coordination services may not duplicate payments made to public agencies or private entities under other program authorities for the same purpose.

Supports coordination includes contacts with non-eligible beneficiaries when the contact is:

- directly related to identifying the eligible beneficiary’s needs and care for the purpose of assisting the beneficiary in accessing services;
- identifying needs and supports to assist the beneficiary in obtaining services;
- providing supports coordinators with useful feedback; and
- alerting supports coordinators to changes in the beneficiary’s needs.

Family supports coordination does not include activities that constitute the direct delivery of underlying medical, educational, social, and/or other services to which an eligible beneficiary has been referred, including foster care programs and services such as, but not limited to, the following:

- research gathering and completion of documentation required by the foster care program;
- assessing adoption placements;
- recruiting or interviewing potential foster care parents;
- serving legal papers;
- home investigations;
- providing transportation;
- administering foster care subsidies; and
- making placement arrangements.

### 7.5 Transfer of Care/Records

During the course of care, the beneficiary may require services from a different supports coordinator due to relocation of the beneficiary’s primary residence or due to a request of the beneficiary to change supports coordinators. When there is a planned change of the supports coordinator, information about the new supports coordinator (e.g., contact information) should be provided to the beneficiary. The referring supports coordinator must consult with the new supports coordinator about the case and transfer all applicable information and records, including all completed assessment visits and the updated Plan of Care, to the new supports coordinator in compliance with the privacy and security requirements of federal and state laws and regulations including, but not limited to, the HIPAA and the Michigan Mental Health Code.
7.6 FAMILY SUPPORTS COORDINATION CLOSURE [CHANGE MADE 7/1/23]

Family Supports Coordination services are available to all eligible beneficiaries up to age 21, or for pregnant women up to and through 12 months post-delivery. (revised per bulletin MMP 23-15) Family Supports Coordination services will be discontinued:

- if the beneficiary is no longer eligible;
- when the beneficiary parent(s) or guardian(s) refuses the service; or
- if CMS does not extend the Flint, Michigan Section 1115 Demonstration Waiver.

When services are refused, Family Supports Coordination services may be resumed at any point during the defined period of eligibility. A discharge summary, including the services provided, outcomes, current status, and ongoing needs of the beneficiary, must be completed and provided to the PCP when the Family Supports Coordination case is closed.

7.7 PROVIDER QUALIFICATIONS

Genesee Health System, the local community mental health (CMH) serving Genesee County, serves as the Designated Provider Organization (DPO) for Family Supports Coordination services. The DPO:

- has a sufficient number of qualified staff to meet the service needs of the target population and has the administrative capacity to ensure the provision of quality services in accordance with state and federal requirements;
- has experience in the coordination and linkage of community services;
- has the willingness and capabilities to coordinate with the beneficiary’s PCP and MHP as applicable; and
- must seek approval by MDHHS of all subcontractors for the provision of Family Supports Coordination services.

The DPO will provide Family Supports Coordination services primarily through the use of a supports coordinator. The supports coordinator must meet one of the following professional qualifications:

- licensure as a registered nurse by the Michigan Department of Licensing and Regulatory Affairs (LARA), and at least one year of experience providing community health, pediatric or maternal infant health nursing services; or
- licensure as a social worker by LARA, and at least one year of experience providing social work services to families.

7.8 CLAIMS SUBMISSION AND PAYMENT

All claims submitted and accepted are processed through CHAMPS. Claims must be submitted on the ASC X12N 837 5010 professional format when submitting electronic claims or on the CMS 1500 claim form for paper claims. (Refer to the Billing & Reimbursement for Professionals Chapter for additional billing information.)
7.8.A. INITIAL/ANNUAL ASSESSMENTS [CHANGES MADE 7/1/23]

Assessment (revised per bulletin MMP 23-20) visits are to be billed using HCPCS code T2024 for an individual or family. This includes reimbursement for the development of a Plan of Care for one individual. HCPCS code T2024 with modifier TT (additional patient) should be billed for each additional individual Plan of Care that is developed from the assessment visit. For informational/reporting purposes, use modifier UN (two patients served), UP (three patients served), UQ (four patients served), UR (five patients served), or US (six or more patients served).

Assessment visits must be in the home or “home-like” environment. One initial/annual (revised per bulletin MMP 23-20) assessment visit per year per family/household is allowed. Additional assessment visits beyond one per year per family/household require prior authorization.

7.8.B. FOLLOW-UP/MONITORING

Face-to-face follow-up/monitoring visits are to be billed using HCPCS code T1017 for an individual or family. For informational/reporting purposes, use modifier UN (two patients served), UP (three patients served), UQ (four patients served), UR (five patients served), or US (six or more patients served), and enter the Medicaid beneficiary ID numbers of the family members served during the follow-up visit in the claim notes.

Follow-up visits must last at least 30 minutes and ideally take place in the home or “home-like” environment but may be performed in the office. A maximum of five face-to-face follow-up/monitoring visits per year per family/household is allowed. Additional follow-up visits beyond five per year per beneficiary require prior authorization.
SECTION 8 – PEDIATRIC OUTPATIENT INTENSIVE FEEDING PROGRAM SERVICES

Pediatric Outpatient Intensive Feeding Program services are for beneficiaries with significant feeding and swallowing difficulties and are part of the Early and Periodic Screening, Diagnosis and Treatment (EPSDT) benefit. (Refer to the Early and Periodic Screening, Diagnosis and Treatment Chapter for additional information.)

Pediatric Outpatient Intensive Feeding Program services may be reimbursed through Medicaid Fee-for-Service (FFS). Covered services that are carved out of the Medicaid Health Plan (MHP) delivery system will be reimbursed through FFS consistent with applicable Medicaid policy.

8.1 GENERAL INFORMATION

Pediatric feeding disorders are a complex set of feeding and swallowing problems that disrupt the acquisition of functional age-appropriate feeding habits. To resolve complex pediatric feeding issues, clinical evidence indicates that both medical and behavioral interventions are needed. Failure to address feeding issues in young children can be severe and include growth failure, susceptibility to chronic illness, and/or death.

A Pediatric Outpatient Intensive Feeding Program is an onsite day program that is delivered by a team of medical, behavioral health and other professionals who address complex feeding issues through integrated, individualized care.

8.2 PROGRAM SERVICES

Medicaid covers medically necessary Pediatric Outpatient Intensive Feeding Program services for eligible beneficiaries. Pediatric Outpatient Intensive Feeding Program services primarily focus on children who have been diagnosed by a medical professional to have significant feeding difficulties that have not been resolved or treated adequately through less intensive therapies. Pediatric Outpatient Intensive Feeding Program services utilize a multi-disciplinary team to assist the beneficiary and his/her parents/guardians in improving the beneficiary’s ability to eat and swallow and improve nutritional outcomes. Pediatric Outpatient Intensive Feeding Program services include an initial comprehensive assessment, individualized plan of care (POC), on-going monitoring, and incorporate appropriate behavioral modification techniques and parent/guardian education/training. Pediatric Outpatient Intensive Feeding Program services offer an intensive focus on oral-motor skill development with attention to nutritional markers for the most therapeutic outcome.

Medicaid covers medically necessary Pediatric Outpatient Intensive Feeding Program services for eligible beneficiaries. Pediatric Outpatient Intensive Feeding Program services:

- Primarily focus on children who have been diagnosed by a medical professional to have significant feeding difficulties that have not been resolved or treated adequately through less intensive therapies;
- Utilize a multi-disciplinary team to assist the beneficiary and his/her parents/guardians in improving the beneficiary’s ability to eat and swallow and improve nutritional outcomes;
- Include an initial comprehensive assessment, individualized POC, ongoing monitoring, and incorporate appropriate behavioral modification techniques and parent/guardian education/training; and
Offer an intensive focus on oral-motor skill development with attention to nutritional markers for the most therapeutic outcome.

Pediatric Outpatient Intensive Feeding Program services are designed to evaluate, diagnose and treat beneficiaries with significant feeding and swallowing difficulties. The initial comprehensive evaluation is performed by a multi-disciplinary team who meets with the beneficiary and his/her parents/guardians to assess the beneficiary's current status and potential for improvement. The initial comprehensive evaluation should include:

- Assessment of medical history and physical exam;
- Nutritional history and evaluation of growth and nutritional parameters;
- Psychological assessment of developmental, cognitive, emotional and behavioral function;
- Psychosocial evaluation;
- Evaluation of oral-motor function (may include videofluoroscopy swallow study, Fiberoptic Endoscopic Evaluation of Swallowing (FEES), clinical swallowing evaluation, and sensory evaluation);
- Standardized tests and/or objective functional baseline measures to assist with planning short- and long-term goals and to document progress;
- Observation of a simulated meal/snack time; and
- Development of an individualized POC.

Following the initial comprehensive evaluation, the beneficiary and his/her parents/guardians commit to an outpatient program which may typically be held five days per week, six to eight hours per day, for a period up to six weeks. The goals of Pediatric Outpatient Intensive Feeding Program services are to:

- Promote consistent mealtime acceptance;
- Promote good nutrition;
- Increase the variety of foods the beneficiary will eat;
- Promote development of oral-motor skills for feeding;
- Promote developmental feeding skills, such as cup drinking and self-feeding;
- Transition from tube to oral feeding; and
- Assist the beneficiary and/or parents/guardians in acquiring feeding skills through education/training.

Beneficiaries should be routinely monitored, and one-on-one consultations and/or conferences with team members should be routinely scheduled to discuss progress. Supportive services provided during this time may include speech therapy, occupational therapy, physical therapy and/or social work. Progress is assessed regularly and the POC is updated, if continuation is necessary.

8.3 Indications for Services

Pediatric Outpatient Intensive Feeding Program services may be considered medically necessary for individuals with anatomical, physiological, congenital, or cognitive conditions and/or complications of
severe illness who experience significant feeding difficulties. Eligible beneficiaries must meet all the following criteria:

- Significant oral-motor problems and/or chronic medical condition exist;
- Normal feeding milestones have not been met through previous therapies and treatment;
- Suboptimal nutritional status has been determined; and
- Inadequate responsiveness to less intensive treatment has been clinically documented.

Examples of feeding disorders treated in these programs include, but are not limited to:

- Oral-motor dysfunction (including swallowing, oral and/or pharyngeal dysphagia);
- Severe pathology in the perception of, or response to, sensory input to the extent that it significantly limits the ability to function;
- Gastrointestinal disorders; and
- Feeding tube dependency.

Pediatric Outpatient Intensive Feeding Program services are not covered for individuals with specific eating disorders (e.g., binge eating, bulimia, anorexia or obesity-related disorders).

**8.4 PROVIDER QUALIFICATIONS**

Pediatric Outpatient Intensive Feeding Programs are provided under the delegation and supervision of a Medical Director and delivered by a multi-disciplinary team of medical, behavioral health and other professionals who are licensed, certified and/or registered to provide health-related services within the scope of practice for their discipline. The multi-disciplinary team should integrate and coordinate an individualized, comprehensive POC to address complex feeding issues. Each Pediatric Outpatient Intensive Feeding Program must have the following staff actively involved in the assessment process and/or development/implemention of the POC.

<table>
<thead>
<tr>
<th>Provider Type</th>
<th>Required Qualifications</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pediatrician</td>
<td>A Medicaid-enrolled and CSHCS-approved physician who possesses or is eligible for Pediatric Specialty Board Certification. Physicians are expected to remain familiar with current developments and standards of treatment in their respective fields. May serve in the required role as Medical Director.</td>
</tr>
<tr>
<td>Subspecialist</td>
<td>A Medicaid-enrolled and CSHCS-approved physician who possesses or is eligible for Pediatric Subspecialty Board Certification, including physicians with special training and demonstrated clinical experience related to pediatric feeding clinic issues. Physicians are expected to remain familiar with current developments and standards of treatment in their respective fields. May serve in the required role as Medical Director.</td>
</tr>
<tr>
<td>Licensed Behavioral Health Professional</td>
<td>A Licensed Behavioral Health Professional, such as a licensed psychologist or licensed Master’s Social Worker, with at least two years of professional experience in providing services to children/youth and their families.</td>
</tr>
<tr>
<td>Occupational Therapist</td>
<td>A Licensed Occupational Therapist with at least one year of professional pediatric experience.</td>
</tr>
<tr>
<td>Registered Dietitian (RD) or Registered Dietitian Nutritionist (RDN)</td>
<td>An RD or RDN in possession of a Master’s degree in human nutrition, public health, or a health-related field with an emphasis on nutrition, and one year of pediatric nutrition experience in providing nutrition assessment, education and counseling.</td>
</tr>
</tbody>
</table>
Provider Type | Required Qualifications
--- | ---
Speech-Language Pathologist | A Licensed Speech-Language Pathologist in possession of a Master’s degree, and at least one year of professional pediatric experience.
Other staff | Other staff may include registered nurses, physical therapists, etc.
Parent/Guardian and/or Beneficiary | The parent/guardian and/or the beneficiary must be an active, participating team member in the development of the beneficiary’s comprehensive POC.

### 8.5 Service Provider Enrollment

CSHCS-approved, Medicaid-enrolled program sites must be certified by the Michigan Department of Health and Human Services (MDHHS). MDHHS certification will be based upon adherence to the following requirements:

- Existence of a program schedule of services and supports.
- Assessment and POC services must be delivered by professional staff, as identified.
- If an aide under professional supervision delivers direct services, that supervision must be documented in the beneficiary’s medical record.

Certification of new program sites will be contingent upon submission of acceptable enrollment information to MDHHS or upon a site visit by MDHHS.

### 8.6 Prior Authorization

Pediatric Outpatient Intensive Feeding Program services require prior authorization. Requests for prior authorization must be submitted utilizing form MSA-6544-B (Practitioner Special Services Prior Approval – Request/Authorization) and include documentation to support medical necessity such as height/weight measurements and previously attempted therapeutic interventions. (Refer to the Prior Authorization subsection of the Practitioner Chapter for additional information.) Medicaid forms can be accessed on the MDHHS website. (Refer to the Directory Appendix for website information.)

A copy of the prior authorization must be retained in the beneficiary’s medical record.

Pediatric Outpatient Intensive Feeding Program services must request prior authorization to continue intensive treatment services beyond the current authorization period, even if a beneficiary changes providers. A copy of the latest re-evaluation must be submitted with the prior authorization request.

Requests for continued treatment must be supported by all of the following:

- Summary of previous treatment period (not to exceed 90 days prior to that time period for which prior authorization is being requested), including measurable progress on each short- and long-term goal, rate of progress, statement of the beneficiary’s response to treatment, and any factors that have affected progress during the therapy period. Do not send daily treatment notes.
- Revised goals and justification for any change in the treatment plan for the requested period of treatment.
- Statement detailing any parent/guardian education and training.
8.7 BILLING AND REIMBURSEMENT

Reimbursement for Pediatric Outpatient Intensive Feeding Program services is a bundled payment rate based on the covered services provided by a multi-disciplinary team. This service is reimbursed as a daily rate comprised of all costs associated with the services provided within the day program, including: facility-related costs; medical care services provided by the physician and other licensed practitioners; services provided by clinical staff working under the delegation and supervision of a licensed medical practitioner; and diagnostic, screening and rehabilitative services. Services are billed as FFS claims through the Community Health Automated Medicaid Processing System (CHAMPS) regardless of beneficiary health plan status. Providers are to bill using Healthcare Common Procedure Coding System (HCPCS) code S0317 (disease management; per diem).

SECTION 1 – GENERAL TELEMEDICINE POLICY

1.1 GENERAL INFORMATION

Telemedicine is the use of telecommunication technology to connect a beneficiary with a Medicaid enrolled health care professional in a different location. The Michigan Department of Health and Human Services (MDHHS) covers both synchronous (real-time interactions) and asynchronous (over separate periods of time) telemedicine services. MDHHS requires that all telemedicine policy provisions within this policy and other current policy are established and maintained within all telemedicine services.

Along with general telemedicine policy, specific program considerations (as listed within this chapter) must be upheld during all telemedicine visits unless otherwise stated. The specific program section provides additional requirements and offers further clarification as needed. These should always be considered in combination with all general telemedicine policy.

1.2 MDHHS DEFINITION OF TELEMEDICINE

MDHHS aligns the definition of telemedicine with Section 3476 of the Insurance Code of 1956, 1956 PA 218 MCL 500.3476, as updated on December 20, 2017. Therefore, "Telemedicine" means the use of an electronic media to link beneficiaries with health care professionals in different locations. To be considered telemedicine under this section, the health care professional must be able to examine the beneficiary via a real-time, interactive audio or video (or both) telecommunications system, and the beneficiary must be able to interact with the off-site health care professional at the time the services are provided.

1.3 AUTHORIZED PROVIDERS

In compliance with the Michigan Insurance Code of 1956 (Act 218 of 1956), telemedicine services must be provided by a provider who is licensed, registered, or otherwise authorized to engage in his or her health care profession in the state where the beneficiary is located. The provider at the distant site who is licensed under State law to furnish a covered telemedicine service (as described in the Allowable Services subsection) may bill, and receive payment for, the service when it is delivered via a telecommunications system.

If providing services through the Prepaid Inpatient Health Plan (PIHP)/Community Mental Health Services Program (CMHSP), the provider must have a contract with or be authorized by the appropriate entity. To be reimbursed for services, providers must be enrolled in Michigan Medicaid.

1.4 PRINCIPLES OF TELEMEDICINE

Recognizing that telemedicine can never fully replace in-person care, MDHHS has established the following principles to be used by MDHHS-enrolled providers during the provision of telemedicine services:

- Effectual services – a service provided via telemedicine should be as effective as its in-person equivalent, ensuring convenient and high-quality care.
• Improved and appropriate access – the right visit, for the right beneficiary, at the right time by minimizing the impact of barriers to care, such as transportation needs or availability of specialty providers in rural areas.

• Appropriate beneficiary choice – the beneficiary is an active participant in the decision for telemedicine as a means for service delivery as appropriate (e.g., Does the beneficiary prefer telemedicine to an in-person visit? What is the optimal combination of ongoing service delivery for the individual? etc.).

• Appropriate utilization – ensure providers are utilizing telemedicine appropriately and that items listed above are taken into consideration when offering these services.

• Value considerations – telemedicine visits should yield the desired outcomes and quality measures; health outcomes should be improving and remain consistent with in-person care at a minimum.

• Privacy and security measures – providers must ensure the privacy of the beneficiary and the security of any information shared via telemedicine in accordance with the Health Insurance Portability and Accountability Act of 1996 (HIPAA) and other privacy/security regulations as applicable.

1.5 DETERMINATION OF APPROPRIATENESS/DOCUMENTATION

Telemedicine must only be utilized when there is a clinical benefit to the beneficiary. Examples of clinical benefit include:

• Ability to diagnose a medical condition in a beneficiary population without access to clinically appropriate in-person diagnostic services.

• Treatment option for a beneficiary population without access to clinically appropriate in-person treatment options.

• Decreased rate of subsequent diagnostic or therapeutic interventions (for example, due to reduced rate of recurrence of the disease process).

• Decreased number of future hospitalizations or physician visits.

• More rapid beneficial resolution of the disease process treatment.

• Decreased pain, bleeding, or another quantifiable symptom.

Furthermore, telemedicine must only be utilized when the beneficiary’s goals for the visit can be adequately accomplished, there exists reasonable certainty of the beneficiary’s ability to effectively utilize the technology, and the beneficiary’s comfort with the nature of the visit is ensured. Telemedicine must be used as appropriate regarding the best interests/preferences of the beneficiary and not merely for provider ease. Appropriate guidance must be provided to the beneficiary to ensure they are prepared and understand all steps to effectively utilize the technology prior to the first visit. Beneficiary consent must be obtained prior to service provision (see policy for “Consent for Telemedicine Services” for further information).

As standard practice, in-person visits are the preferred method of service delivery; however, in cases where this option is not available or in-person services are not ideal or are challenging for the beneficiary, telemedicine may be used as a complement to in-person services. Telemedicine services cannot be continued indefinitely for a given beneficiary without reasonably frequent and periodic in-person
evaluations of the beneficiary by the provider to personally reassess and update the beneficiary’s medical treatment/history, effectiveness of treatment modalities, and current medical/behavioral condition and/or treatment plan. Applicable beneficiary records must contain documentation regarding the reason for the use of telemedicine and the steps taken to ensure the beneficiary was provided utilization guidance in an appropriate manner.

In special situations, depending upon the needs of the beneficiary, providers may opt to deliver the majority of services via telemedicine. If this situation occurs, it must be documented in the beneficiary’s record or in their individual plan of service (IPOS). This situation should be the exception, not the norm. (Refer to the program-specific subsections of this policy for specific guidance regarding this benefit.)

All services provided via telemedicine must meet all the quality and specifications as would be if performed in-person. Furthermore, if while participating in the visit the desired goals of the beneficiary and/or the provider are not being accomplished, either party must be provided the opportunity to stop the visit and schedule an in-person visit instead (refer to “Contingency Planning” for such instances). This follow-up visit must be provided within a reasonable time and be as easy as possible to schedule.

1.6 CONSENT FOR TELEMEDICINE SERVICES

MDHHS requires either direct or indirect beneficiary consent for all services provided via telemedicine. This consent must be properly documented in the beneficiary’s medical record in accordance with applicable standards of practice. This requirement aligns with Section 16284 of State of Michigan Public Act No. 359, effective March 29, 2017.

1.7 PRIVACY AND SECURITY REQUIREMENTS

MDHHS requires a HIPAA compliant real-time interactive system at both the originating and distant sites, allowing instantaneous interaction between the beneficiary and provider via the telecommunication system. When providing services via telemedicine, sufficient privacy and security measures must be in place and documented to ensure confidentiality and integrity of beneficiary-identifiable information. This includes, but is not limited to, ensuring any tracking technologies used by websites, mobile applications, or any other technology used comply with applicable law regarding use or disclosure of beneficiary-identifiable information. Transactions, including beneficiary email, prescriptions, and laboratory results, must be secure within existing technology (i.e., password protected, encrypted electronic prescriptions, or other reliable authentication techniques). All beneficiary-provider email, as well as other beneficiary-related electronic communications, should be stored and filed in the beneficiary’s medical record consistent with transitional recordkeeping policies and procedures.

1.8 CONTINGENCY PLANNING

A contingency plan, including referral to an acute care facility or Emergency Room (ER) for treatment as necessary for the safety of the beneficiary, is required when utilizing telemedicine technologies. This plan must include a formal protocol appropriate to the services being rendered.

1.9 PRIOR AUTHORIZATION REQUIREMENTS

There are no prior authorization (PA) requirements when providing services via telemedicine for Fee-for-Service (FFS) beneficiaries or for those accessing Behavioral Health Services through PIHPs/CMHSPs unless the equivalent in-person service requires PA. Authorization requirements for beneficiaries enrolled
in Medicaid Health Plans (MHPs) may vary. Providers must refer to individual MHPs for any authorization or coverage requirement.

1.10 FACE-TO-FACE DEFINITION

When referenced within MDHHS Telemedicine Policy, face-to-face refers to either an in-person visit or a visit performed via simultaneous audio/visual technology.

1.11 ORIGINATING SITE

Originating site is defined as the location of the eligible beneficiary at the time of the telemedicine service.

Authorized originating sites include:

- County mental health clinic or publicly funded mental health facility
- Federally Qualified Health Center (FQHC)
- Hospital (inpatient, outpatient, or critical access hospital)
- Office of a physician or other provider (including medical clinics)
- Hospital-based or Critical Access Hospital (CAH)-based Renal Dialysis Centers (including satellites)
- Rural Health Clinic (RHC)
- Skilled nursing facility
- Tribal Health Center (THC)
- Local Health Department (LHD) as defined in Sections 333.2413, 333.2415 and 333.2421 of the Michigan Public Health Code (PA 368 of 1978 as amended)
- Home, as defined as a location, other than a hospital or other facility, where the beneficiary receives care in a private residence
- Other established site considered appropriate by the provider (in accordance with clinical judgement)

1.12 DISTANT SITE

Distant site is defined as the location of the provider providing the professional service at the time of the telemedicine visit. This definition encompasses the provider’s office, or any established site considered appropriate by the provider, so long as the privacy of the beneficiary and security of the information shared during the telemedicine visit are maintained.

1.13 AUDIO-ONLY TELEMEDICINE

MDHHS supports the use of simultaneous audio/visual telemedicine service delivery as a primary method of telemedicine service; however, in situations where the beneficiary cannot access services via a simultaneous audio/visual platform, either due to technology constraints or other concerns, MDHHS will allow the provision of audio-only services for a specific set of procedure codes.
Additional guidelines for audio-only service include:

- Visits that include an assessment tool -- the tool must be made available to the beneficiary and the provider must ensure the beneficiary can access the tool.
- When a treatment technique or evidence-based practice requires visualization of the beneficiary, it must be performed via simultaneous audio/visual technology.
- Audio-only must be performed at the preference of the beneficiary, not the provider's convenience.
- Privacy and security of beneficiary information must always be established and maintained during an audio-only visit.

To effectuate this in perpetuity, MDHHS will publish audio-only databases that will include all codes MDHHS is permitting via audio-only. These databases will be created for both FFS/MHP providers and for those providers within the PIHP/CMHSP system and will be maintained on the MDHHS website. (Refer to the Directory Appendix for website information.) MDHHS will, on a regular and ongoing basis, assess the audio-only databases and will add/remove codes as needed. Some of the criteria used to determine addition/removal from the audio-only database include provider/stakeholder feedback, new coding guidelines, utilization data and quality reports.

1.14 ASYNCHRONOUS TELEMEDICINE SERVICES

Asynchronous telemedicine services include the transmission of a beneficiary’s medical or other personally identifiable information through a secure, HIPAA-compliant, electronic communications system to a provider, often a specialist, at a distant site without the beneficiary present. Such communications, including store and forward services, interprofessional telephone/Internet/electronic health record consultations, and remote patient monitoring (RPM) services, involve contact between two parties (beneficiary to provider or provider to provider) in a way that does not require real-time interaction. Services must be medically necessary or essential for behavioral health and part of a provider-directed treatment plan.

Asynchronous telemedicine services must be performed under the general or direct supervision of a Medicaid-enrolled physician or practitioner who has an active role in the management of the beneficiary’s physical and/or behavioral health. The analysis and interpretation of the beneficiary’s data must contribute to the development and/or monitoring of the beneficiary’s treatment plan. Asynchronous telemedicine services do not include telephone calls, images transmitted via facsimile machines, and text messages without visualization of the beneficiary. Photographs visualized by a telecommunications system must be specific to the beneficiary’s physical and/or behavioral health condition and adequate for furnishing or confirming a diagnosis and/or treatment plan.

Asynchronous telemedicine services generally may not be separately reported on the same day the beneficiary presents for an evaluation and management (E/M) or other related service to the same provider. These services are typically considered part of the E/M or other related service and are not separately reimbursed. Activities performed in the facility setting under the general or direct supervision of the provider are bundled with the facility services on the UB-04 claim form and cannot be reported on the CMS 1500 claim form or billed under the provider’s National Provider Identifier (NPI). Refer to the Medicaid Code and Rate Reference tool in the Community Health Automated Medicaid Processing System (CHAMPS) for service code parameters and limits.
In accordance with Section 16284 of Public Act No. 359 of 2016, telemedicine services, including asynchronous telemedicine, must be provided only with direct or indirect beneficiary consent and this consent must be properly documented in the beneficiary’s medical record in accordance with applicable standards of practice.

1.14.A. STORE AND FORWARD SERVICES

Store and forward services are asynchronous electronic transmissions of physical and/or behavioral health information from the beneficiary to a Medicaid-enrolled physician or practitioner at the distant site when video or face-to-face contact is not necessary. Information transmitted to the provider is analyzed and used in the diagnosis, development, or maintenance of an individualized treatment plan. Information may include, but is not limited to, digital images, documents, video clips, still images, x-rays, magnetic resonance images (MRIs), electrocardiograms (EKGs) and electroencephalograms (EEGs), and audio clips.

Store and forward services include interpretation and follow-up with the beneficiary. Services must not originate from or result in a related E/M service.

1.14.B. INTERPROFESSIONAL TELEPHONE/INTERNET/ELECTRONIC HEALTH RECORD CONSULTATIONS

Interprofessional telephone/Internet/electronic health record consultations, including e-Consults, are a type of asynchronous telemedicine service in which the beneficiary’s Medicaid-enrolled treating physician (e.g., attending or primary) or practitioner requests the opinion and/or treatment advice of a Medicaid enrolled physician or practitioner with the specialty expertise to assist in the diagnosis of a condition and/or management of the beneficiary’s condition without beneficiary face-to-face contact with the consultant. The service concludes with a written report from the consultant to the treating/requesting physician/practitioner.

The beneficiary for whom the service is requested may be either a new patient to the consulting provider or an established patient with a new problem. Service time is based on the total review and interprofessional communication time. The review of beneficiary information, including but not limited to medical records, laboratory studies, imaging studies, medications, and pathology specimens, is included in the service and should not be separately reported. The written or verbal request for the consult must be documented in the beneficiary’s medical record by the treating/requesting physician/practitioner. Providers must consult with the American Medical Association (AMA) coding guidelines to ensure appropriate reporting of these services. Providers should not report interprofessional telephone/Internet/electronic health record consultations when the sole purpose of the communication is to arrange a transfer of care or other face-to-face service.

1.14.C. REMOTE PATIENT MONITORING (RPM)

Remote Patient Monitoring (RPM) is a covered service under Michigan Compiled Law (MCL) 400.105g. RPM means using digital technology to collect medical and other forms of health data from an individual in one location and electronically transmit that
information via a secure, HIPAA-compliant system to a provider in a different location for assessment and recommendations. RPM is covered for both acute and chronic conditions.

RPM devices include (1) non-invasive remote monitoring devices that measure or detect common physiological parameters and (2) non-invasive monitoring devices that wirelessly transmit the beneficiary’s medical information to their health care provider or other monitoring entity. The device must be reliable and valid, and the beneficiary must be trained or sufficiently knowledgeable in the proper use/wearing of the device to ensure appropriate recording of medical information. Medical information may include, but is not limited to, blood pressure and heart rate and rhythm monitoring.

All RPM devices, including mobile medical applications, must meet the U.S. Food & Drug Administration (FDA) definition of a medical device. Personal tablets, computers, cell phones, software intended for administrative support or support of healthy lifestyles/general wellness, and electronic health records are not medical devices or durable medical equipment and are not covered as part of RPM services.

Reimbursement for the device used for remote monitoring, and programming of the device, is generally included in the reimbursement of RPM services and not separately reimbursable. For items or devices separately reimbursed to a medical supplier, such as personal use continuous glucose monitoring systems (CGMs), refer to the Medical Supplier chapter of this Manual.

1.15 Telemedicine Reimbursement Rate

The reimbursement rate for allowable telemedicine services will be the same (also known as “at parity”) as in-person services. This means that all providers will be paid the equivalent amount, no matter the physical location of the beneficiary during the visit. To effectuate this policy, the provider must report the place of service as they would if they were providing the service in-person. See the “Telemedicine Billing Requirements” section of this policy for further details.

1.16 Telemedicine Billing Requirements

All telemedicine visits are required to ascribe to correct coding requirements equivalent to in-person services, including ensuring that all aspects of the code billed are performed during the visit.

1.16.A. Allowable Services

Allowable telemedicine services for synchronous telemedicine are listed on the telemedicine fee schedules which can be accessed on the MDHHS website.

Asynchronous telemedicine service codes are listed on the corresponding provider-specific fee schedules. Additional program-specific coverage will be represented on individual program fee schedules and will be indicated in the program-specific sections below as indicated.

Where in-person visits are required (such as End Stage Renal Disease [ESRD] and nursing facility-related services), the telemedicine service may be used in addition to the
required in-person visit but cannot be used as a substitute. There must be at least one in-person hands-on visit (i.e., not via telemedicine) by a provider per month to examine the vascular site for ESRD services.

For PIHP/CMHSP service providers where in-person visits are required, the telemedicine service may be used in addition to the required in-person visit but cannot be used as a substitute. Refer to the MDHHS Bureau of Specialty Behavioral Health Services Telemedicine Database for services allowed via telemedicine. (Refer to the Directory Appendix for website information.)

1.16.B. TELEHEALTH FACILITY FEE

Allowable originating sites are permitted to submit claims for the telehealth facility fee. This fee is intended to reimburse the provider for the expense of hosting the beneficiary at their location. To submit this code, the originating site must ensure the technology is functioning, the privacy of the beneficiary is secured, and that the information is shared confidentially.

Telemedicine services where “home” or another “established site considered appropriate by the provider” are utilized as the originating site are not eligible to receive the telehealth facility fee. Distant site providers in these situations are instructed to bill the appropriate Current Procedural Terminology (CPT)/Healthcare Common Procedure Coding System (HCPCS) code (as represented by the Telemedicine database) for the service(s) provided.

Neither the originating site nor the distant site is permitted to bill both the telehealth facility fee and the code for the professional service for the same beneficiary at the same time.

1.16.C. PLACE OF SERVICE (POS), MODIFIER 95 AND MODIFIER 93

All audio/visual telemedicine services, as allowable on the Telemedicine fee schedule and submitted on the professional invoice, must be reported with the Place of Service (POS) code that would be reported as if the beneficiary were in-person for the visit along with modifier 95—“Synchronous Telemedicine Service rendered via a real-time interactive audio and video telecommunications system”.

All audio-only telemedicine services, as represented on the audio-only telemedicine fee schedule and submitted on the professional invoice, must be reported with the POS code that would be reported as if the beneficiary were in-person for the visit along with modifier 93 - “Synchronous Telemedicine Service rendered via telephone or other real-time interactive audio-only telecommunications system”.

For services submitted on the institutional invoice, the appropriate National Uniform Billing Committee (NUBC) revenue code, along with the appropriate telemedicine CPT/HCPCS procedure code and modifier 95 or modifier 93, must be used.

PIHP/CMHSP providers must submit encounters for audio/visual telemedicine with POS 02 or 10 (as applicable) and for audio-only POS 02 or 10 (as applicable) and Modifier 93.
Covered asynchronous telemedicine services must be billed with applicable POS and modifiers as standard practice.

For PIHP/CMHSP service providers, refer to the MDHHS Bureau of Specialty Behavioral Health Services Telemedicine Database and the Audio-Only Telemedicine Database on the MDHHS website for services allowed via both audio/visual and audio-only telemedicine.

This information should be used in conjunction with the Billing & Reimbursement for Professionals and the Billing & Reimbursement for Institutional Providers Chapters as well as the Medicaid Code and Rate Reference tool and other related procedure databases/fee schedules located on the MDHHS website.
SECTION 2 – SPECIFIC PROGRAM/SERVICE SITE CONSIDERATIONS

2.1 OUTPATIENT HOSPITAL

When the outpatient facility provides administrative support for a telemedicine service, the outpatient hospital facility may bill the hospital outpatient clinic visit on the institutional claim with modifier 95 or modifier 93 and the appropriate revenue code.

2.2 BEHAVIORAL HEALTH

2.2.A. PIHP/CMHSP

The MDHHS Bureau of Specialty Behavioral Health Services requires all the requirements of Telemedicine policy are attained and maintained during all beneficiary visits. In addition to the Determination of Appropriateness/Documentation section of this policy, the Bureau of Specialty Behavioral Health Services would like to reiterate that services delivered to the beneficiary via telemedicine be done at the convenience of the beneficiary, not the convenience of the provider. In addition, these services must be a part of the person-centered plan of service and available as a choice, not a requirement, to the beneficiary.

If the individual (beneficiary) is not able to communicate effectively or independently, they must be provided appropriate on-site support from natural supports or staff. This includes the appropriate support necessary to participate in assessments, services, and treatment.

The PIHP/CMHSP must guarantee the individual is not being influenced or prompted by others when utilizing telemedicine.

Use of telemedicine should ensure and promote community integration and prevent isolation of the beneficiary. Evidence-based practice policies must be followed as appropriate for all services. For services within the community, in-person interactions must be prioritized.

2.2.A.1. REQUIREMENTS FOR VISIT

Telemedicine is allowed for all services indicated in the Bureau of Specialty Behavioral Health Services Telemedicine Database. The features of what will be counted as a telemedicine visit need to align with the same standards of an in-person visit. Any phone call or web platform used to schedule, obtain basic information or miscellaneous work that would have been billed as a non-face-to-face and therefore non-billable contact, will remain non-billable. Telemedicine visits must include service provision as indicated in the IPOS and should reflect work towards or review of goals and objectives indicated forthwith.
2.2.A.2. POPULATIONS

This policy applies to all populations served within PIHPs/CMHSPs and does not supersede any federal regulations that must be followed for substance use disorder (SUD) treatment.

2.2.B. OUTPATIENT MENTAL HEALTH SERVICES PROVIDERS

Medicaid beneficiaries whose needs do not render them eligible for specialty services and supports through the PIHPs/CMHSPs may receive outpatient mental health services through Medicaid FFS or MHPs as applicable. These FFS/MHP enrolled non-physician behavioral health services may be provided via telemedicine when performed by Medicaid-enrolled psychologists, social workers, counselors, and marriage and family therapists. Services are covered when performed in a non-facility setting or outpatient hospital clinic. All applicable services are listed in the telemedicine audio/visual and audio-only fee schedules.

2.3 PHYSICAL THERAPY, OCCUPATIONAL THERAPY, AND SPEECH THERAPY SERVICES

MDHHS will allow select therapy services to be provided via telemedicine when performed by Medicaid-enrolled private practice and outpatient hospital physical therapy (PT), occupational therapy (OT) and speech therapy (ST) providers. PT, OT and ST services allowed via telemedicine will be represented by applicable CPT/HCPCS codes on the telemedicine fee schedule. Therapy services provided via telemedicine are intended to be an additional treatment tool and complement in-person services where clinically appropriate for the individual beneficiary.

Documentation re-evaluation, performance, and treatment elements that typically require hands-on contact for measurement or assessment must include a thorough description of how the assessment or performance findings were established via telemedicine. This includes, but is not limited to, such elements as standardized tests, strength, range of motion, and muscle tone.

Initial PT and OT evaluations and oral motor/swallowing services are not allowed via telemedicine and should be provided in-person.

Services that require utilization of equipment during treatment and/or physical hands-on interaction with the beneficiary cannot be provided via telemedicine.

Therapy re-evaluations performed via telemedicine must be provided by a therapist whose facility/clinic has previously evaluated and/or treated the beneficiary in-person.

Durable Medical Equipment (DME) re-assessments performed via telemedicine must be provided by a therapist who has previously evaluated and/or treated the beneficiary in-person, otherwise an in-person visit is required.

This policy supplements existing PT, OT, and ST services policy. All current therapy referral, PA, documentation requirements, standards of care, and limitations remain in effect regardless of whether the service is provided through telemedicine. All telemedicine therapy services will count toward the beneficiary’s therapy service limits. (Refer to the Therapy Services chapter for additional information.)
2.3.A. BILLING CONSIDERATIONS
Modifier 95 should be used in addition to the required modifiers for therapy services as outlined in therapy policy.

2.3.B. SCHOOL SERVICES PROGRAM CONSIDERATIONS
School Services Program (SSP) PT and OT services, as outlined in this policy, will also be allowed via telemedicine. These services must meet all other telemedicine policies as outlined.

2.4 AUDIOLOGY SERVICES
MDHHS will allow speech therapy, auditory rehabilitation, select hearing device adjustments, programming, device performance evaluations, and education or counseling to be performed via telemedicine (simultaneous audio/visual). Remote device programming must be provided in compliance with current U.S. Food and Drug Administration (FDA) guidelines. Auditory brainstem response (ABR) and auditory evoked potential (AEP) testing may also be conducted via telemedicine when performed using remote technology located at a coordinating clinical site with appropriately trained staff (i.e., mobile unit, office/clinic, or hospital).

Reimbursable procedure codes are limited to the specific set of audiology codes listed in the telemedicine fee schedule. Audiology services provided via telemedicine are intended to be an additional treatment tool and complement in-person services where clinically appropriate.

Audiological diagnostic tests (other than those mentioned above), hearing aid examinations, surgical device candidacy evaluations, and other audiology and hearing aid services conducted via telemedicine are not reimbursable by Michigan Medicaid and should be provided in-person.

This policy supplements the existing audiology, hearing aid dealer and speech therapy services policies. All current referral, PA, documentation requirements, standards of care, and limitations remain in effect regardless of whether the service is provided through telemedicine. Providers should refer to the Hearing Services chapter of this Manual for complete information.

2.5 DENTISTRY
MDHHS will allow dentists to provide the limited oral evaluation (Current Dental Terminology [CDT] code D0140) via telemedicine (simultaneous audio/visual) technology so long as all other telemedicine policy is followed. D9995 teledentistry - synchronous; real-time encounter, must be reported in addition to the applicable CDT code.

All requirements of the general telemedicine policy must be followed when providing the limited oral evaluation via telemedicine, including scope of practice requirements, contingency plan, and the use of both audio/visual service delivery unless otherwise indicated by federal guidance.

Services delivered to the beneficiary via telemedicine must be done for the convenience of the beneficiary, not the convenience of the provider. Services must be performed using simultaneous audio/visual capabilities. All services using telemedicine must be documented in the beneficiary’s record, including the date, time, and duration of the encounter, and any pertinent clinical documentation.
required per CDT code description. The provider is responsible for ensuring the safety and quality of services provided with telemedicine technologies.

Billing instructions depend upon the claim format used:

- American Dental Association (ADA) Claim Format: Use POS 02 or POS 10; report D9995 with the procedure code.
- Institutional Claim Format: POS 02 and POS 10 are not required; Use modifier 95; report D9995 with the procedure code.

2.6 VISION

Telemedicine vision services can be provided through a Medicaid-enrolled provider who can report E/M services as listed in the telemedicine fee schedules.

An intermediate ophthalmological exam can be provided via telemedicine for an established patient with a known diagnosis. The provider must have a previous in-person encounter with the beneficiary to ensure the provider is knowledgeable of the beneficiary’s current medical history and condition. For cases in which the provider must refer the beneficiary to another provider, a consulting provider is not required to have a pre-existing provider-patient relationship if the referring provider shares medical history, past eye examinations, and any related beneficiary diagnosis with the consulting provider. Intermediate ophthalmological exam codes should not be used to diagnose eye health conditions (an initial diagnosis). When medically necessary, providers must refer beneficiaries for an in-person encounter to receive a diagnosis and/or care. Telemedicine cannot act as a replacement for recommended in-person interactions.

2.7 SCHOOL SERVICES PROGRAM (SSP)

Because of the unique circumstances regarding the delivery of services within the School Services Program (SSP), telemedicine may be the primary delivery modality for some beneficiaries; however, the decision to use telemedicine should be based on the needs or convenience of the beneficiary, and not those of the provider.

In cases where the beneficiary is unable to use telemedicine equipment without assistance, an attendant must be provided by the provider. The attendant must be trained in the use of the telemedicine equipment to the point where they can provide adequate assistance. The attendant must also be available for the entire telemedicine session; however, they should also ensure the beneficiary’s privacy to the greatest extent possible. When the originating site for the service is the student’s home, any cost for an attendant is not reimbursable.

Billing and reimbursement for telemedicine services are accomplished using the same methodology as other services; however, the service must be billed using POS 03—school and modifier 95 or modifier 93. Telemedicine claims for SSP are paid according to the Centers for Medicare & Medicaid Services (CMS) approved cost-based methodology used for other services provided within the program and not the information provided previously in this policy. SSP providers are not eligible for the facility fee as the facility is an integral part of the service provided and is covered under the service claim. A database of allowable telemedicine services for SSP can be found on the MDHHS website. (Refer to the Directory Appendix for website information.)
2.8 DURABLE MEDICAL EQUIPMENT (DME) PROVIDERS

All DME providers must reference the Medical Supplier chapter of this Manual for specific requirements in the provision of services via telemedicine.

2.9 FQHCs and RHCs

2.9.A. GENERAL INFORMATION

All current Medicaid policy for telemedicine services, including definitions, requirements and parameters of telemedicine, apply to FQHCs and RHCs. FQHCs and RHCs are responsible for ensuring compliance with all telemedicine policy.

2.9.B. DISTANT SITE PROVIDERS

Distant site services provided by qualified Medicaid enrolled providers may be covered when the qualified provider is employed by the clinic or working under the terms of a contractual agreement with the clinic. FQHCs and RHCs must maintain all practitioner contracts and provide them to MDHHS upon request.

2.9.C. BILLING, REIMBURSEMENT, AND PROSPECTIVE PAYMENT SYSTEM (PPS)

Claims for telemedicine services must be submitted using the ASC X 12N 837 5010 form using the appropriate telemedicine HCPCS or CPT code. All telemedicine claims must include the corresponding modifier 95- "Synchronous Telemedicine Service rendered via a real-time interactive audio and video telecommunications system” or 93 - "Synchronous Telemedicine Service rendered via telephone or other real-time interactive audio-only telecommunications system” and the appropriate revenue code.

During the Medicaid provider enrollment process, contracted providers must associate to the FQHC or RHC billing NPI. Refer to the Billing & Reimbursement for Institutional Providers chapter of this Manual for further information.

The telehealth facility fee does not qualify as a face-to-face visit and does not generate the PPS payment. Telemedicine service(s) provided at the distant site that qualify as a face-to-face visit may generate the PPS payment. All current PPS rules and encounter criteria apply to telemedicine visits. Refer to the Federally Qualified Health Centers and the Rural Health Clinics chapters of this Manual and the FQHC and RHC reimbursement lists on the MDHHS website for further information. (Refer to the Directory Appendix for website information.)
PPS is reimbursed according to the billing rules described below.

<table>
<thead>
<tr>
<th>Originating Site</th>
<th>Distant Site</th>
<th>Billing Rules</th>
<th>PPS for Qualifying Visit</th>
</tr>
</thead>
<tbody>
<tr>
<td>FQHC #1/RHC #1</td>
<td>FQHC #2/RHC #2</td>
<td>FQHC #1/RHC #1 bills the telehealth facility fee (for tracking purposes only) and FQHC #2/RHC #2 bills for professional services provided at their site.</td>
<td>FQHC #2/RHC #2</td>
</tr>
<tr>
<td>FQHC/RHC</td>
<td>Provider is employed by/contracted with the originating site FQHC/RHC</td>
<td>Originating site bills for the distant site provider's services per the contract.</td>
<td>Originating site FQHC/RHC</td>
</tr>
<tr>
<td>FQHC/RHC</td>
<td>Provider is not located at an FQHC/RHC site and is not employed by/contracted with the originating site FQHC/RHC</td>
<td>Each provider bills for services provided at their site.</td>
<td>No PPS</td>
</tr>
<tr>
<td>Site is not an FQHC/RHC</td>
<td>FQHC/RHC</td>
<td>Each provider bills for services provided at their site.</td>
<td>FQHC/RHC</td>
</tr>
</tbody>
</table>

If both the originating and distant sites submit identical procedure code(s) for a telemedicine visit for the same beneficiary on the same date of service, it is considered duplicate billing. MDHHS will recover payment from the appropriate FQHC, RHC, or contracted provider. Recovery will be based on the terms specified in the contract.

### 2.9.D. Audio-Only Services

MDHHS will allow FQHCs and RHCs to be reimbursed for identified audio-only services (those represented on the audio-only database and that are identified as qualifying visits) to generate the PPS. Clinics will be permitted to submit for reimbursement allowable audio-only service codes, as indicated above, if appropriate for the interaction with the beneficiary. Medicaid clinic billing and reimbursement requirements apply. The provider must be employed by or contracted with the FQHC or RHC, and the procedure code billed must appear on the clinic reimbursement list as a qualifying visit. The clinic reimbursement list is located on the MDHHS website.

SECTION 1 – GENERAL INFORMATION

This chapter applies to enrolled Private Practice, Outpatient, Nursing Facility, and Home Health Agency therapy providers.

The term Medicaid throughout this chapter refers to all programs administered by MDHHS unless specifically stated otherwise. The primary objective of Medicaid is to ensure that essential health care services are made available to those individuals who would not otherwise have the financial resources to purchase them. Policies are aimed at maximizing medically necessary health care services available to eligible Medicaid beneficiaries.

The primary objective of the Children’s Special Health Care Services (CSHCS) Program is to ensure that CSHCS beneficiaries receive medically necessary services related to a CSHCS qualifying diagnosis as recommended by a CSHCS authorized subspecialist. Providers should refer to the Children’s Special Health Care Services chapter of this manual for information specific to CSHCS only beneficiaries.

1.1 SERVICE PROVISION

Therapy may be provided by Medicaid-enrolled providers when performed by properly credentialed/licensed or appropriately supervised professionals in the following settings:

- Occupational Therapy (OT) and Physical Therapy (PT)
  - Outpatient Hospital
  - Comprehensive Outpatient Rehabilitation Facility (CORF)
  - Outpatient Rehabilitation Agency (Rehab Agencies)
  - Commission on Accreditation of Rehabilitation Facilities (CARF)-Accredited Outpatient Medical Rehabilitation Program
  - Physical Therapist or Occupational Therapist in Private Practice
  - Physician's Office/Clinic
  - Optometrist’s Office
  - Nursing Facility
  - Home Health Agency

- Speech-Language Therapy (ST)
  - Outpatient Hospital
  - Comprehensive Outpatient Rehabilitation Facility (CORF)
  - Outpatient Rehabilitation Agency (Rehab Agencies)
  - CARF-Accredited Outpatient Medical Rehabilitation Program
  - Council on Academic Accreditation (CAA)-Accredited University Graduate Education Program
  - Speech-Language Pathologist in Private Practice
Medicaid covers medically necessary rehabilitative therapy services for beneficiaries of all ages. Rehabilitative services include teaching or training someone to perform or develop a level of reasonable functional proficiency of tasks or skills that were previously learned, with or without compensatory strategies. Examples may include, but are not limited to:

- PT to regain functional ambulation using a cane following a stroke, or to advance from ambulation with an assistive device/physical assistance to ambulation without an assistive device or physical assistance;
- OT to achieve independent dressing following a spinal cord injury, or to develop dressing independence without an assistive device or physical assistance;
- Speech-Language Pathology (SLP) to improve articulation and fluency following an acquired or traumatic brain injury or develop communication skills utilizing an augmentative communication strategy.

Medicaid beneficiaries under 21 years of age and Healthy Michigan Plan beneficiaries may be eligible for medically necessary habilitative therapy services. Habilitation therapy includes teaching/training someone to perform/develop a level of reasonable functional proficiency of a task that was not previously learned/achieved at a typically expected age or without compensatory techniques or processes. Examples may include, but are not limited to:

- PT for a child who is not walking at a typically expected age.
- OT teaching normal dressing skills beyond the typically expected age of learning.
- SLP for communication skills including articulation errors beyond the typically expected age of learning or syntax and semantics for a person with significant hearing impairment.

Documentation must objectively support the request for rehabilitative and/or habilitative therapy.

1.2 THERAPY DATABASE

For specifics regarding Medicaid coverage of the Healthcare Common Procedure Coding System (HCPCS), refer to the MDHHS Therapies Database on the MDHHS website or the Medicaid Code and Rate Reference tool in the Community Health Automated Medicaid Processing System (CHAMPS). (Refer to the Directory Appendix for website information.) The database includes covered private practice, outpatient, nursing facility, and home health therapy codes, applicable limits, and prior authorization requirements.

1.3 DOCUMENTATION IN BENEFICIARY MEDICAL RECORD

Therapy providers must retain all applicable documentation in the beneficiary’s medical record for seven years. For audit purposes, the beneficiary’s medical record must substantiate the medical necessity of the service performed. Documentation must also include the treatment time of the services performed.
1.4 Practitioner Signatures

In all documentation requiring a signature, the signature must be hand written by the practitioner or submitted electronically. A stamped signature, second party signature, or statement of “signature on file” will not be accepted. NOTE: An electronic signature must specifically identify and authenticate the individual practitioner. This applies to signatures for ordering, referring, and treating practitioners.

1.5 Modifiers

Therapy claims must be submitted using the appropriate procedure code and therapy modifier to distinguish the plan of care under which the service is delivered. To differentiate between habilitative and rehabilitative therapy, when services are habilitative report with the appropriate modifier that represents the nature of the therapy being performed. Only Medicaid beneficiaries under 21 years of age and Healthy Michigan Plan beneficiaries may be eligible for medically necessary habilitative therapy services. In addition to these modifiers, maintenance therapy services should be billed with the MDHHS identified modifier to categorize the service as maintenance related. Therapy services submitted without these modifiers may be denied.

Outpatient hospital facility providers must also report the appropriate therapy assistant modifier when services are furnished in whole or in part by a physical therapy or occupational therapy assistant. In cases where both a physical or occupational therapist and a physical or occupational therapist assistant (PTA/OTA) provide a portion of the same untimed service or 15-minute timed unit of service, Medicaid will utilize Medicare’s de minimis standard in determining if the service/unit is considered to be furnished in whole or in part by a PTA or OTA.

Refer to the Billing and Reimbursement chapters in this manual for additional modifier information.

1.6 Reimbursement

Reimbursement structure is based on the provider’s enrollment type. Reimbursement methodologies include the MDHHS Outpatient Prospective Payment System or the Medicaid fee screens. (Refer to the Medicaid Code and Rate Reference tool in CHAMPS or the MDHHS Therapies Database on the MDHHS website.) For Not Otherwise Classified codes or covered codes without established fee screens, the authorized reimbursement amount is indicated on the approved prior authorization request.
SECTION 2 – PROVIDER REQUIREMENTS

2.1 OUTPATIENT HOSPITALS

Outpatient OT, PT and ST services may be provided to beneficiaries of all ages in the outpatient hospital.

2.2 COMPREHENSIVE OUTPATIENT REHABILITATION FACILITIES AND OUTPATIENT REHABILITATION AGENCIES

Comprehensive Outpatient Rehabilitation Facilities (CORFs) and rehab agencies may enroll with Medicaid for reimbursement of outpatient OT, PT and ST services provided by qualified professionals. All CORFs and rehab agencies must provide proof of Medicare certification when enrolling in Medicaid.

2.3 COMMISSION ON ACCREDITATION OF REHABILITATION FACILITIES-ACCREDITED OUTPATIENT MEDICAL REHABILITATION PROGRAMS

Commission on Accreditation of Rehabilitation Facilities (CARF)-accredited outpatient medical rehabilitation programs may enroll with Medicaid for reimbursement of outpatient OT, PT and ST services provided by qualified professionals. The program must not be part of, or owned by, a hospital, CORF or rehab agency. All CARF-accredited outpatient medical rehabilitation programs must provide proof of their current CARF accreditation when enrolling in Medicaid.

2.4 NURSING FACILITY

A Medicaid-certified nursing facility (NF) is defined as a nursing home, county medical care facility, or hospital long term care unit with Medicaid certification. Nursing facilities must provide or obtain specialized rehabilitative services if required by the beneficiary’s plan of care.

In situations where the therapist is not an employee of the facility, the facility must establish a valid contract with a therapist/speech-language pathologist who meets applicable licensure/certification/accreditation requirements. A valid contract allows the facility to retain professional and administrative control over the services provided. Therefore, an agreement that stipulates only the use of facility space does not constitute a valid contract.

2.5 HOME HEALTH AGENCY

A Home Health Agency (HHA) is an organization that provides home care services, such as skilled nursing care, OT, PT, ST and home health aide services. The HHA must be Medicare certified to enroll as a Medicaid provider and must comply with the Medicare/Medicaid Conditions of Participation.

OT, PT, and ST services may be provided by an HHA if Medicare/Medicaid Conditions of Participation, including medical necessity, are met. A therapist in the home health setting may be responsible for supervision of the home health aide. Refer to the Home Health chapter for additional information.

2.6 UNIVERSITY AFFILIATED SPEECH-LANGUAGE PATHOLOGY GRADUATE EDUCATION PROGRAMS

University graduate education programs accredited by the American Speech-Language-Hearing Association’s (ASHA) Council on Academic Accreditation (CAA) in Audiology and Speech-Language Pathology may enroll with Medicaid for reimbursement of outpatient speech-language therapy provided
by qualified professionals. The university program must be freestanding and not part of, or owned by, a hospital, CORF or rehab agency. All university programs must provide proof of their current ASHA-CAA when enrolling in Medicaid.

2.7 PHYSICAL THERAPISTS, OCCUPATIONAL THERAPISTS, AND SPEECH-LANGUAGE PATHOLOGISTS’ PRIVATE PRACTICE

PT, OT, and ST services may be provided to beneficiaries of all ages when provided by a Medicaid enrolled physical therapist, occupational therapist, or speech-language pathologist employed by an individual/sole, partnership, or group practice. These providers are eligible for direct reimbursement.

2.8 PHYSICIAN’S OFFICE OR CLINIC

PT, OT, and ST services may be provided to beneficiaries of all ages in a physician's office or one of the following clinics: Federally Qualified Health Center, Rural Health Clinic, Tribal Health Center, or Local Health Department.
SECTION 3 — PRIOR AUTHORIZATION REQUESTS

Prior authorization is required for certain therapy services before the services are rendered. To determine which therapy services require prior authorization, refer to the Standards of Coverage and Service Limitations Section of this chapter, the Medicaid Code and Rate Reference tool in CHAMPS, or the MDHHS Therapies Database on the MDHHS website. (Refer to the Directory Appendix for website information.)

Prior authorization (PA) is not required for the initiation of home health therapy services for up to a maximum of 24 visits within the first 60 consecutive days if:

- the beneficiary has not received home health therapy services within the calendar year, and
- services do not exceed the maximum.

If a beneficiary has previously received home health therapy services at the maximum 24 visits within the first 60 consecutive days of service for each calendar year, PA is needed.

PA is needed when therapy limits are exceeded regardless of diagnosis.

PA may be authorized for a period not to exceed six months for outpatient and private practice therapy providers and outpatient hospitals, or two months for home health agencies and nursing facilities.

Nursing facilities participating in Medicare are not required to obtain prior authorization for the deductible and/or coinsurance amounts when Medicare approves the services.

If a beneficiary is approved for ventilator care and requires therapy, prior authorization for the therapy must be obtained under the Ventilator Dependent Care Unit (VDCU) National Provider Identification (NPI).

Prior authorization requests must be submitted on the Occupational Therapy-Physical Therapy-Speech Therapy Prior Approval Request/Authorization form (MSA-115). (Refer to the Forms Appendix or the MDHHS website for a copy of the form.) Required medical documentation must accompany the form.

The information on the MSA-115 must be:

- Typed – All information must be clearly typed in the designated boxes of the form.
- Thorough – Complete information, including the appropriate HCPCS procedure codes, must be provided on the form. The form and all documentation must include the beneficiary’s name and mihealth card ID number, provider name and address, and the provider’s NPI number.

Whenever a beneficiary is admitted to a nursing facility directly from a general hospital or from another nursing facility where the beneficiary was receiving reimbursable therapy services, the name of that facility and the date of discharge from that facility should be included on the prior authorization request.

Prior authorization requests should be submitted with the appropriate therapy modifier to distinguish the discipline under which the service is being requested. When the therapy is habilitative, a modifier that represents the nature of the therapy being requested must also be reported. Requests for maintenance therapy services should also contain the appropriate maintenance modifier. Refer to the Billing & Reimbursement Chapters for additional modifier information.
For all Medicaid Fee-for-Service (FFS) beneficiaries, the MSA-115 must be mailed or faxed to the MDHHS Program Review Division. Providers can check the status of a prior authorization request in CHAMPS or by contacting the MDHHS Program Review Division via telephone. (Refer to the Directory Appendix for website and contact information.)

Prior authorization requests may also be submitted electronically via FFS Direct Data Entry (DDE) in CHAMPS. (Refer to the General Information for Providers chapter of this manual for additional information.) A copy of the MSA-115 must be attached to each electronic prior authorization request.

A copy of the prior authorization determination letter must be retained in the beneficiary’s medical record.

### 3.1 Emergency/Verbal Prior Authorization

A provider may contact MDHHS to obtain a verbal prior authorization when the prescribing practitioner (practicing within their scope of practice as defined by state law) has indicated that it is medically necessary to provide therapy services without delay. If a therapy service is required during MDHHS nonworking hours, providers must contact the Program Review Division the next working day.

To obtain verbal prior authorization, providers may call or fax a request to the Program Review Division. (Refer to the Directory Appendix for contact information. Refer to the Forms Appendix for a copy of form MSA-115 and completion instructions.) If the provider faxes a request, the request must state “verbal prior authorization required.”

The following steps must be completed before a prior authorization number is issued for billing purposes:

- The verbal authorization date must be entered on the MSA-115 or electronically in CHAMPS via FFS DDE.
- The MSA-115 or FFS DDE prior authorization request must be submitted to the Program Review Division within 30 days of the verbal authorization.
- Supporting documentation must be submitted with the prior authorization request.

The verbal authorization does not guarantee reimbursement for the services if:

- The beneficiary was not eligible for Medicaid when the therapy service was provided.
- The Program Review Division does not receive the completed MSA-115 and documentation within 30 days of the verbal authorization.
- The prescription is dated after the date the verbal authorization was requested.

### 3.2 Retroactive Prior Authorization

Therapy services provided before prior authorization is requested will not be covered unless the beneficiary was not eligible on the date of service and a subsequent eligibility determination was made retroactive to the date of service. If the MDHHS eligibility file does not show that retroactive eligibility was approved, then the request for retroactive prior authorization will be denied.
Exception for nursing facilities: When a beneficiary is admitted to a nursing facility directly from a general hospital or from another nursing facility where the beneficiary was receiving reimbursable therapy services, retroactive authorization may be requested to ensure continuity of a treatment regimen if the request is filed within ten days following admission. Retroactive authorization may be granted when the service is rendered within Program guidelines for coverage (e.g., is restorative in nature).

3.3 BENEFICIARY ELIGIBILITY

Approval of a therapy service on the prior authorization request confirms that the service is authorized for the beneficiary. Approval of a prior authorization request does not guarantee beneficiary eligibility or payment. It is the provider’s responsibility to verify the beneficiary’s eligibility prior to rendering the service.

3.4 BILLING AUTHORIZED SERVICES

After prior authorization is issued, the information (e.g., prior authorization number, HCPCS/ CPT procedure code, modifier, and quantity) that was approved on the prior authorization must match the information on the claim form.

Therapy rendered to a nursing facility beneficiary must be billed by the nursing facility.

Refer to the Billing & Reimbursement Chapters of this manual for complete billing instructions.
SECTION 4 – STANDARDS OF COVERAGE AND SERVICE LIMITATIONS

4.1 OCCUPATIONAL THERAPY

MDHHS uses the terms Occupational Therapy, OT, and therapy interchangeably. OT is covered when furnished by a Medicaid-enrolled therapy provider and the documentation is signed by the treating therapist. Medicaid reimburses for occupational therapy services when provided by any of the following:

- A licensed occupational therapist.
- A licensed occupational therapy assistant under the supervision of an occupational therapist (i.e., the occupational therapy assistant services must follow the evaluation and treatment plan developed by the occupational therapist, and the occupational therapist must supervise and monitor the occupational therapy assistant’s performance with continuous assessment of the beneficiary’s progress). All documentation must be reviewed and co-signed by the supervising occupational therapist.
- A student completing their clinical affiliation under the direct supervision of (i.e., in the presence of) an occupational therapist. All documentation must be reviewed and co-signed by the supervising occupational therapist.

OT is considered an all-inclusive charge. Medicaid does not reimburse for a clinic room charge in addition to therapy services unless the room charges are unrelated. MDHHS expects occupational therapists and occupational therapy assistants to utilize the most ethically appropriate therapy within their scope of practice as defined by state law or the appropriate national professional association. OT must be medically necessary, reasonable and required to achieve one or more of the following:

- Return the beneficiary to the functional level prior to illness or disability;
- Return the beneficiary to a functional level that is appropriate to a stable medical status;
- Prevent a reduction in medical or functional status had the therapy not been provided.

Therapies provided to nursing facility beneficiaries outside the nursing facility premises must be provided in the outpatient department of a general hospital or medical care facility.

Therapies provided to county medical care facility, hospital long term care unit, or hospital swing bed beneficiaries outside their respective facilities must be provided in the outpatient department of a general hospital.

Medicaid standard coverage allows the following:

<table>
<thead>
<tr>
<th>Outpatient/Private Practice Occupational Therapy</th>
<th>Nursing Facility Occupational Therapy</th>
<th>Home Health Occupational Therapy</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Up to 144 units of OT per calendar year period. • Prior authorization is required. • Prior authorization (PA) is required for treatment that exceeds this unit limitation.</td>
<td>• Prior authorization is required.</td>
<td>• Up to 24 visits of OT in a 60-consecutive day period. • Prior authorization (PA) is required for treatment that exceeds this visit limitation or for continued treatment beyond the initial 60 days.</td>
</tr>
</tbody>
</table>
OT is expected to result in measurable improvement that is significant to the beneficiary’s ability to perform daily living tasks appropriate to his/her chronological, developmental, or functional status. Functional improvements must be achieved in a reasonable, and generally predictable, amount of time as specified in the short- and long-term goals identified on the evaluation/re-evaluation and treatment plan. Functional improvements must be maintainable. Medicaid does not cover therapy if the beneficiary’s maximum functional potential has been realized, the beneficiary has plateaued, or the therapy has no impact on the beneficiary’s ability to perform age-appropriate tasks. However, medically necessary habilitative therapy services may be covered under Early and Periodic Screening, Diagnosis and Treatment (EPSDT) or Healthy Michigan Plan.

Medicaid only covers OT services that require the skills, knowledge, and education of an occupational therapist. Medicaid does not cover interventions provided by another practitioner or caregiver (e.g., registered nurse, physical therapist, family member, teacher, etc.).

---

**Occupational therapy may be covered for one or more of the following:**

- Therapeutic use of everyday life activities/occupations*.
- Adaptation of environments and processes to enhance functional performance in occupations*.
- Graded tasks (performance components) in activities as prerequisites to an engagement in occupations*.
- Oral function (including swallowing, oral and/or pharyngeal dysphagia, and increasing nutrition/hydration).
- Design, fabrication, application, or training in the use of assistive technology or orthotic/prosthetic devices.
- Skilled services that are designed to develop, train, monitor, and modify a maintenance program to be carried out by family or caregivers.
- Severe pathology in the perception of, or response to, sensory input to the extent that it significantly limits the ability to function.
- Federal EPSDT regulations require coverage of medically necessary treatment for beneficiaries under 21 years of age, including medically necessary habilitative therapy services. (Refer to the Early and Periodic Screening, Diagnosis and Treatment chapter for additional information.)

*Covered occupations include:

- Activities of daily living (self-care activities).
- Instrumental activities of daily living (multistep activities to care for self and others, such as household management and childcare).
## Occupational Therapy Services

<table>
<thead>
<tr>
<th>Occupational therapy is not covered for the following:</th>
</tr>
</thead>
<tbody>
<tr>
<td>• If provided solely for educational, vocational, or recreational purposes.</td>
</tr>
<tr>
<td>• If therapy services are required to be provided by another public agency (e.g., community mental health services provider, school-based services, etc.).</td>
</tr>
<tr>
<td>• If a therapy service requires prior authorization and the service is rendered before prior authorization is approved.</td>
</tr>
<tr>
<td>• Habilitative therapy designed to facilitate the normal progression of development without compensatory techniques or processes. (Refer to the Early and Periodic Screening, Diagnosis and Treatment and the Healthy Michigan Plan chapters for coverage exceptions.)</td>
</tr>
<tr>
<td>• If therapy is rote practice of achieved skills.</td>
</tr>
<tr>
<td>• Development of perceptual motor skills and sensory integrative functions to follow a normal sequence. (Refer to the Early and Periodic Screening, Diagnosis and Treatment and the Healthy Michigan Plan chapters for coverage exceptions.)</td>
</tr>
<tr>
<td>• If therapy is designed to facilitate the normal progression of development without compensatory techniques or processes. (Refer to the Early and Periodic Screening, Diagnosis and Treatment and the Healthy Michigan Plan chapters for coverage exceptions.)</td>
</tr>
<tr>
<td>• Non-diagnostic, non-therapeutic, routine, or repetitive tasks without skilled feedback (e.g., sitting with a beneficiary needing prompting to swallow or take small bites which does not require the skills of a therapist, etc.)</td>
</tr>
<tr>
<td>• Feeding for a beneficiary whose status is nothing per oral cavity (NPO), with physician orders to continue NPO.</td>
</tr>
<tr>
<td>• Feeding for a beneficiary who does not demonstrate the potential to improve oral and/or pharyngeal phases of swallowing (i.e., pleasure eating).</td>
</tr>
<tr>
<td>• Continuation of therapy that is maintenance in nature, except as described under Maintenance Visits in the Prescription Requirements subsection (below).</td>
</tr>
<tr>
<td>• If Medicare determines the service is not medically necessary.</td>
</tr>
<tr>
<td>• Additionally for nursing facility beneficiaries:</td>
</tr>
<tr>
<td>- Therapy provided by a physician (MD or DO).</td>
</tr>
<tr>
<td>- Services covered by the facility’s per diem rate, including diversional OT, reality orientation, restorative nursing functions, routine maintenance, or the development of the therapy and treatment plan.</td>
</tr>
</tbody>
</table>

### 4.1.A. Duplication of Services

Medicaid does not cover two disciplines working concurrently on similar goals/areas (e.g., dysphagia, assistive technology, sitting and standing balance/tolerance, etc.). Collaboration between treating therapists is required to coordinate therapy and prevent duplication of services. Documentation of the collaboration must be retained in the beneficiary’s medical record for audit purposes.
4.1.B. ACCESS TO SERVICES FOR SCHOOL-AGED BENEFICIARIES [CHANGES MADE 7/1/23]

School based therapy services are covered by Medicaid when they assist a child/youth with a disability to benefit from special education. This includes beneficiaries up to the age of 21 who are eligible under the provisions of the Individuals with Disabilities Education Act (IDEA) of 1990 as amended, and those enrolled in programs that require an Individualized Education Program (IEP) or an Individualized Family Service Plan (IFSP). Therapy provided solely for educational purposes (e.g., pre-academic goals such as improved attention span, catching/throwing/kicking balls, etc.) is not covered by Medicaid.

Beneficiaries receiving school-based therapy may also receive medically-based therapy services in an outpatient setting, nursing facility, or through a home health agency. Medically-based therapy services are provided to optimize the child’s/youth’s maximum functional performance in relation to needs in the home or community setting and must not directly duplicate those provided in the school setting. Medicaid does not require a school-aged beneficiary to be referred to or access therapy services through the school-based services (SBS) benefit prior to, or in lieu of, accessing medically based therapy in the community. Participation in therapy in one setting is not intended to replace services in the other setting.

If therapy is provided in more than one setting, the goals and purpose for each must be distinct. Collaboration between the school and community providers is required to coordinate therapy and prevent direct duplication of services. Documentation of the collaboration must be retained in the beneficiary’s medical record for audit purposes. (text revised 7/1/23)

Beneficiaries receiving school-based therapy services with medically-related goals may be eligible for the continuation of services in an outpatient setting during the summer months to maintain function. Prior authorization is required if standard coverage limitations have been exceeded. (Refer to the Requirements of Continued Therapy under the Prescription Requirements subsection below for additional information.)

4.1.C. AQUATIC THERAPY

Medicaid does not cover aquatic therapy as a separately reimbursable treatment or modality. A covered therapeutic procedure performed in a pool may be reimbursed when billed using the HCPCS code describing the covered procedure if the service meets all Medicaid coverage requirements.

4.1.D. GROUP THERAPY

OT is not covered by Medicaid when provided concurrently to a group of two or more individuals by the same therapist. Covered therapeutic procedures require direct (one-to-one) contact between the beneficiary and the therapist.

4.1.E. CO-TREATMENT THERAPY

Co-treatment is a single treatment session in which two therapists from different disciplines work together as a team to address a beneficiary’s condition and meet their
treatment goals. Medicaid covers outpatient and nursing facility co-treatment therapy when medically necessary for the beneficiary to receive multi-disciplinary therapy during the same treatment session. The two therapists must not work on duplicate treatment goals. Standards of coverage and service limitations for each discipline participating in the co-treatment are identical to those applicable to therapy provided on an individual basis.

The decision to co-treat should be made on a case-by-case basis and be provided solely for the medical benefit of the beneficiary. Co-treatment therapy is not covered when provided for convenience purposes or when the assistance of an additional therapist is requested solely for safety reasons.

4.1.E.1. PRIOR AUTHORIZATION

Co-treatment therapy must be prior authorized (PA). Each therapist requesting co-treatment must submit a separate PA to MDHHS; however, both requests should be submitted at the same time. If a PA request includes both individual and co-treatment therapy, the therapist must designate which procedure code, units, frequency, or service dates will be utilized in the co-treatment intervention. Documentation of the beneficiary’s evaluation/re-evaluation, individualized treatment plan and short- and long-term goals, and progress should be submitted with each of the therapist’s PA requests. In addition, the documentation must:

- Support the clinical need and appropriateness of the co-treatment services;
- Demonstrate how the co-treatment will help achieve the therapist’s goals more effectively than separate, individual treatment sessions;
- Identify the co-treating discipline; and
- Indicate the anticipated length of time (in sessions or weeks/months) that the beneficiary will require co-treatment rather than individual sessions.

4.1.E.2. BILLING REQUIREMENTS [Change Made 7/1/23]

Refer to the Billing & Reimbursement chapters of this manual for specific billing guidelines related to co-treatment therapy. (revised 7/1/23)

4.1.F. SERIAL CASTING

Serial casting is a process in which a joint(s) that lacks full range of motion is immobilized with a rigid or semi-rigid cast. During this procedure, the affected joint(s) is gradually and progressively set in a more anatomically correct alignment to improve joint alignment, increase muscle length, or to achieve a decrease in abnormal tone, resulting in an increase in the range of motion.

Casts are applied and removed in succession, usually every week, until full range of motion, flexibility, or plateau is reached. Upon removal of each cast, the limb is stretched, and a new cast is applied to hold the limb in place.
Serial casting is a covered benefit when performed by, or under the direct supervision of, a qualified therapist and defined in a treatment plan as a medically necessary therapy service for improving range of motion or reducing abnormal tone. The referral for therapy services must specifically indicate that the beneficiary is being referred for serial casting, or the referring provider must provide written concurrence, via signature, of any treatment plan that includes serial casting.

### 4.1.G. PRESCRIPTION REQUIREMENTS [CHANGES MADE 7/1/23]

Outpatient and private practice therapy requires a prescription from a physician or other licensed practitioner practicing within their scope of practice as defined in State law for occupational therapy. Nursing facility therapy requires a prescription from a physician for occupational therapy. Home Health requires a prescription from a physician, physician assistant, nurse practitioner, or clinical nurse specialist for occupational therapy. *(text revised and added per bulletin MMP 23-06)*

A treatment plan meeting all the requirements below is considered a prescription. The prescription/treatment plan must contain all the following:

- Beneficiary’s name;
- Beneficiary’s date of birth;
- Prescribing practitioner’s name, address, and telephone number;
- Prescribing practitioner’s signature;
- The date the prescription was written;
- The frequency and duration of the therapy services;
- Diagnosis; and
- For swallowing or oral motor evaluation/treatment, the documentation must clearly specify allowance of trial feeds and/or oral intake during therapy. All documentation, including the prescription, current plan of care, and prior authorization, must consistently substantiate this allowance.

A copy of the prescription must be retained in the beneficiary’s medical record. A prescription is valid for 90 days from the date that the prescription was written unless the termination date is otherwise stated by the authorized prescribing practitioner on the prescription.

If the beneficiary has another insurance plan (e.g. Medicare or commercial insurance) and the service is a covered benefit, the provider must follow the requirements of the other insurance plan(s), including but not limited to, prescription, prior authorization, and provider qualifications. (Refer to the Coordination of Benefits chapter for more information.)
### Evaluations/Re-evaluations

An evaluation is formalized testing at the initiation of the beneficiary’s treatment plan. Evaluations may be provided up to two times in a 365-day period. Evaluations of swallowing function may be provided up to four times in a 365-day period. Objective and periodic re-evaluations and reports are utilized to determine the measurable functional change resulting from the treatment plan. Re-evaluations may be provided up to two times in a 365-day period. Prior authorization is required if an evaluation or re-evaluation is needed more frequently. An evaluation/re-evaluation is required for the initiation of therapy and continued therapy.

OT evaluations/re-evaluations must be completed and signed by the occupational therapist and include all the following:

- Standardized tests and/or objective functional baseline measures to establish short- and long-term goals and to document progress;
- Corresponding baseline measures for all short- and long-term goals;
- Treatment diagnosis(es);
- Medical diagnosis(es), if different from treatment diagnosis;
- Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable;
- Medical history as it relates to the current course of therapy;
- The beneficiary’s current functional status (functional baseline);
- Assessment of the beneficiary’s performance components (e.g., strength, dexterity, range of motion, sensation, perception, muscle tone, etc.) directly affecting the beneficiary’s ability to function or make progress toward goals; and
- Assessment of the beneficiary’s cognitive skill level (e.g., ability to follow directions, including auditory and visual comprehension).

Oral function/swallowing evaluations must also include:

- Presence/absence of coughing;
- History of recent respiratory illness;
- Current diet, documenting difficulties with food consistencies;
- Aversion/sensitivity during eating;
- Objective oral motor assessment addressing labial, glossal, laryngeal, and pharyngeal stages;
- Report or copy of a video fluoroscopy and any other formal testing, if available; and
- Voice quality (i.e., pre- and post-feeding and natural voice), if applicable.
| Treatment Plan/Plan of Care | The OT treatment plan that results from the evaluation must be medically necessary, signed by the occupational therapist, and include all the following:  
- Time-related short-term goals that are measurable, functional, and significant to the beneficiary’s function or mobility;  
- Long-term goals that are measurable, functional, and identify specific maximum functional achievement for the requested authorization period;  
- Functional outcome measures specific to maximum functional achievement for the current course of therapy (up to 12 consecutive months);  
- Anticipated type, frequency and duration of therapy required to meet short- and long-term goals;  
- Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable;  
- Plan for discharge from service; and  
- Signature of the prescribing practitioner confirming agreement with the treatment plan.  
A treatment plan, including all the criteria established above, must be submitted with the prior authorization request. |
| Initiation of Services | OT may be initiated upon completion of the evaluation (current within 12 months) and development of a treatment plan that is medically necessary as documented in the beneficiary’s medical record. The initiation of therapy services may begin if all the following have been met:  
- The beneficiary is Medicaid-eligible;  
- A copy of the signed and dated (no more than 90 days prior to the initiation of services) prescription for occupational therapy is retained in the beneficiary’s medical record;  
- The standard coverage limitations have not been exceeded;  
- Therapy is provided by the evaluating discipline (e.g., a speech-language pathologist may not provide treatment under an occupational therapist’s evaluation); and  
- There is a change in medical status resulting in decreased activities of daily living skills, oral motor skills, or functional ability. |
### Requirements of Continued Therapy

The occupational therapist must request prior authorization to continue therapy beyond standard coverage limitations, even if the beneficiary changes providers. A copy of the latest evaluation/re-evaluation (completed no more than 12 months prior to the prior authorization request) must be submitted with the prior authorization request.

Requests for continued therapy must be supported by all the following:

- Summary of previous treatment period (not to exceed the 90 days prior to that period for which prior authorization is being requested), including measurable progress on each short- and long-term goal, rate of progress, a statement of the beneficiary’s response to treatment, and any factors that have affected progress during the therapy period. Do not send daily treatment notes.
- Revised goals and justification for any change in the treatment plan for the requested period of therapy.
- Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable.
- Statement detailing any family/caregiver services being provided in a maintenance program, if appropriate.
- A copy of the prescription indicating the date range of the requested treatment period must be provided with each prior authorization request. The prescription must meet all the requirements established under this subsection. A treatment plan meeting all the prescription requirements is considered a prescription.
- The anticipated plan of discharge for the current course of therapy (up to 12 consecutive months). If more than 12 months of therapy is anticipated, a new course of therapy with a new evaluation/re-evaluation and treatment plan is required.
**Maintenance Visits**

The skills of an occupational therapist may be required for training, review of previously achieved skills, monitoring of a maintenance program being carried out by family or caregivers, or continued follow-up for the fit and function of orthotic, prosthetic, or assistive technology devices. Maintenance visits in an outpatient or nursing facility setting may be provided up to four times per 90-consecutive day period. If more than four maintenance visits are required in a 90-consecutive day period, the therapist must request prior authorization. Maintenance visits in a home setting may be provided up to four times per 60-consecutive day period. If more than four maintenance visits are required in a 60-consecutive day period, the therapist must request prior authorization.

The occupational therapist must complete the MSA-115 or FFS DDE plus MSA-115 prior authorization request, and include all the following:

- Summary of previous treatment period, including measurable progress on each short- and long-term goal. This must include the treating occupational therapist’s analysis of the therapy, rate of progress, and justification for any change in the treatment plan. Documentation must relate to the 90-day period immediately prior to that period for which prior authorization is being requested.
- A statement of the beneficiary’s response to treatment, including factors that have affected progress during the therapy period.
- A copy or description of the maintenance program.
- A statement detailing the reason(s) additional maintenance visits are medically necessary.
- Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable.
- The anticipated frequency and duration of maintenance visits.
- The anticipated plan of discharge for the current course of therapy (up to 12 months).
- A treatment plan signed by the prescribing practitioner that includes all the criteria established under Treatment Plan/Plan of Care above.

### 4.1.H. DISCHARGE SUMMARY

MDHHS requires the occupational therapist to document a discharge summary to identify the completion of OT services and the discharge status. The discharge summary must be retained in the beneficiary’s medical record and include all the following:

- Dates of service (i.e., initial and discharge dates);
- Description of therapy services provided;
- Functional status at discharge related to treatment areas/goals/maximum functional achievement over the course of therapy;
- Analysis of the effectiveness of the therapy program, including reasons for goals not met or changes in the treatment plan necessitated by changes in medical status;
- A copy or description of the maintenance program, if appropriate;
▪ Identification of assistive technology devices (e.g., walker) and its current utilization, if appropriate; and

▪ Recommendations/referral to other services, if appropriate.

4.1.1. Supplies and Equipment

MDHHS does not allow separate reimbursement for supplies and equipment used as part of a therapy treatment or for trials/training in the use of complex durable medical equipment when required to establish competency for a prior authorization request. The cost of supplies and equipment used are included in the reimbursement for the therapy.

4.2 Physical Therapy

MDHHS uses the terms Physical Therapy, PT, and therapy interchangeably. PT is covered when furnished by a Medicaid-enrolled therapy provider and the documentation is signed by the treating therapist. Medicaid reimburses for physical therapy services when provided by any of the following:

▪ A licensed physical therapist.

▪ A licensed physical therapy assistant under the supervision of a physical therapist (i.e., the physical therapy assistant services must follow the evaluation and treatment plan developed by the physical therapist, and the physical therapist must supervise and monitor the physical therapy assistant’s performance with continuous assessment of the beneficiary’s progress). All documentation must be reviewed and co-signed by the supervising physical therapist.

▪ A student completing their clinical affiliation under the direct supervision of (i.e., in the presence of) a physical therapist. All documentation must be reviewed and co-signed by the supervising physical therapist.

PT is considered an all-inclusive charge. Medicaid does not reimburse for a clinic room charge in addition to therapy services unless the room charges are unrelated. MDHHS expects physical therapists and physical therapy assistants to utilize the most ethically appropriate therapy within their scope of practice as defined by state law or the appropriate national professional association. PT must be medically necessary, reasonable and required to achieve one or more of the following:

▪ Return the beneficiary to the functional level prior to illness or disability;

▪ Return the beneficiary to a functional level that is appropriate to a stable medical status;

▪ Prevent a reduction in medical or functional status had the therapy not been provided.

Therapies provided to nursing facility beneficiaries outside the nursing facility premises must be provided in the outpatient department of a general hospital or medical care facility.

Therapies provided to county medical care facility, hospital long term care unit or hospital swing bed beneficiaries outside their respective facilities must be provided in the outpatient department of a general hospital.
Medicaid standard coverage allows the following:

<table>
<thead>
<tr>
<th>Outpatient/Private Practice Physical Therapy</th>
<th>Nursing Facility Physical Therapy</th>
<th>Home Health Physical Therapy</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Up to 144 units of PT per calendar year period.</td>
<td>• Prior authorization is required.</td>
<td>• Up to 24 visits of PT in a 60-consecutive day period.</td>
</tr>
<tr>
<td>• Prior authorization is required for treatment that exceeds this unit limitation.</td>
<td></td>
<td>• Prior authorization (PA) is required for treatment that exceeds this visit limitation or for continued treatment beyond the initial 60 days.</td>
</tr>
</tbody>
</table>

PT is expected to result in measurable improvement that is significant to the beneficiary’s ability to perform mobility skills appropriate to his/her chronological, developmental, or functional status. Functional improvements must be achieved in a reasonable, and generally predictable, amount of time as specified in the short- and long-term goals identified on the evaluation/re-evaluation and treatment plan. Functional improvements must be maintainable. Medicaid does not cover therapy if the beneficiary’s maximum functional potential has been realized, the beneficiary has plateaued, or the therapy has no impact on the beneficiary’s ability to perform age-appropriate tasks. However, medically necessary habilitative therapy services may be covered under EPSDT or Healthy Michigan Plan.

Medicaid only covers PT services that require the skills, knowledge, and education of a physical therapist. Medicaid does not cover interventions provided by another practitioner or caregiver (e.g., registered nurse, licensed occupational therapist, family member, teacher, etc.).

<table>
<thead>
<tr>
<th>Physical therapy may be covered for one or more of the following:</th>
<th>If expected to result in the restoration or amelioration of the anatomical or physical basis for the restriction in performing age-appropriate functional mobility skills.</th>
</tr>
</thead>
<tbody>
<tr>
<td>• If expected to result in the restoration or amelioration of the anatomical or physical basis for the restriction in performing age-appropriate functional mobility skills.</td>
<td>• PT service that is diagnostic.</td>
</tr>
<tr>
<td>• For a temporary condition that creates decreased mobility and/or function.</td>
<td>• Training in functional mobility skills (e.g., ambulation, transfers, floor mobility, transitions, wheelchair mobility, etc.).</td>
</tr>
<tr>
<td>• Stretching for improved flexibility.</td>
<td>• Modalities to allow gains of function, strength, or mobility.</td>
</tr>
<tr>
<td>• Training in the use of orthotic/prosthetic devices and assistive technology devices.</td>
<td>• Severe pathology in the perception of, or response to, sensory input to the extent that it significantly limits the ability to function.</td>
</tr>
<tr>
<td>• Skilled services that are designed to develop, train, monitor, and modify a maintenance program to be carried out by family or caregivers.</td>
<td>• Federal EPSDT regulations require coverage of medically necessary treatment for beneficiaries under 21 years of age, including medically necessary habilitative therapy services. (Refer to the Early and Periodic Screening, Diagnosis and Treatment chapter for additional information.)</td>
</tr>
</tbody>
</table>

Version:  Therapy Services  
Date:  July 1, 2023
Physical therapy is not covered for the following:

- If provided solely for educational, vocational, or recreational purposes.
- If therapy services are required to be provided by another public agency (e.g., community mental health services provider, school-based services, etc.).
- If a therapy service requires prior authorization and the service is rendered before prior authorization is approved.
- Habilitative therapy designed to facilitate the normal progression of development without compensatory techniques or processes. (Refer to the Early and Periodic Screening, Diagnosis and Treatment and the Healthy Michigan Plan chapters for coverage exceptions.)
- If therapy is rote practice of achieved skills.
- Development of perceptual motor skills and sensory integrative functions to follow a normal sequence. (Refer to the Early and Periodic Screening, Diagnosis and Treatment and the Healthy Michigan Plan chapters for coverage exceptions.)
- Continuation of therapy that is maintenance in nature, except as described under Maintenance Visits in the Prescription Requirements subsection below.
- If Medicare determines the service is not medically necessary.
- Additionally for nursing facility beneficiaries:
  - Therapy provided by a physician (MD or DO);
  - Services covered by the facility’s per diem rate, including routine maintenance and the development of the therapy and treatment.

4.2.A. DUPLICATION OF SERVICES

Medicaid does not cover two disciplines working concurrently on similar goals/areas (e.g., assistive technology, hand therapy, sitting and standing balance/tolerance, transfers, etc.). Collaboration between treating therapists is required to coordinate therapy and prevent duplication of services. Documentation of the collaboration must be retained in the beneficiary’s medical record for audit purposes.

4.2.B. ACCESS TO SERVICES FOR SCHOOL-AGED BENEFICIARIES [CHANGES MADE 7/1/23]

School-based therapy services are covered by Medicaid when they assist a child/youth with a disability to benefit from special education. This includes beneficiaries up to the age of 21 who are eligible under the provisions of the Individuals with Disabilities Education Act (IDEA) of 1990 as amended, and those enrolled in programs that require an Individualized Education Program (IEP) or an Individualized Family Service Plan (IFSP). Therapy provided solely for educational purposes (e.g., pre-academic goals such as improved attention span, catching/throwing/kicking balls, etc.) is not covered by Medicaid.

Beneficiaries receiving school-based therapy may also receive medically-based therapy services in an outpatient setting, nursing facility, or through a home health agency. Medically-based therapy services are provided to optimize the child/youth’s maximum functional performance in relation to needs in the home or community setting and must not directly duplicate those provided in the school setting. Medicaid does not require a
school-aged beneficiary to be referred to or access therapy services through the school-based services (SBS) benefit prior to, or in lieu of, accessing medically based therapy in the community. Participation in therapy in one setting is not intended to replace services in the other setting.

If therapy is provided in more than one setting, the goals and purpose for each must be distinct. Collaboration between the school and community providers is required to coordinate therapy and prevent direct duplication of services. Documentation of the collaboration must be retained in the beneficiary’s medical record for audit purposes. *(text revised 7/1/23)*

Beneficiaries receiving school-based therapy services with medically-related goals may be eligible for the continuation of services in an outpatient setting during the summer months to maintain function. Prior authorization is required if standard coverage limitations have been exceeded. *(Refer to Requirements of Continued Therapy under the Prescription Requirements subsection below for additional information.)*

4.2.C. AQUATIC THERAPY

Medicaid does not cover aquatic therapy as a separately reimbursable treatment or modality. A covered therapeutic procedure performed in a pool may be reimbursed when billed using the HCPCS code describing the covered procedure if the service meets all Medicaid coverage requirements.

4.2.D. GROUP THERAPY

PT is not covered by Medicaid when provided concurrently to a group of two or more individuals by the same therapist. Covered therapeutic procedures require direct (one-to-one) contact between the beneficiary and the therapist.

4.2.E. CO-TREATMENT THERAPY

Co-treatment is a single treatment session in which two therapists from different disciplines work together as a team to address a beneficiary’s condition and meet their treatment goals. Medicaid covers outpatient and nursing facility co-treatment therapy when medically necessary for the beneficiary to receive multi-disciplinary therapy during the same treatment session. The two therapists must not work on duplicate treatment goals. Standards of coverage and service limitations for each discipline participating in the co-treatment are identical to those applicable to therapy provided on an individual basis.

The decision to co-treat should be made on a case-by-case basis and be provided solely for the medical benefit of the beneficiary. Co-treatment therapy is not covered when provided for convenience purposes or when the assistance of an additional therapist is requested solely for safety reasons.

4.2.E.1. PRIOR AUTHORIZATION

Co-treatment therapy must be prior authorized (PA). Each therapist requesting co-treatment must submit a separate PA to MDHHS; however, both requests should be
submitted at the same time. If a PA request includes both individual and co-treatment therapy, the therapist must designate which procedure code, units, frequency, or service dates will be utilized in the co-treatment intervention. Documentation of the beneficiary’s evaluation/re-evaluation, individualized treatment plan and short- and long-term goals, and progress should be submitted with each of the therapist’s PA requests. In addition, the documentation must:

- Support the clinical need and appropriateness of the co-treatment services;
- Demonstrate how the co-treatment will help achieve the therapist’s goals more effectively than separate, individual treatment sessions;
- Identify the co-treating discipline; and
- Indicate the anticipated length of time (in sessions or weeks/months) that the beneficiary will require co-treatment rather than individual sessions.

**4.2.E.2. BILLING REQUIREMENTS [Change Made 7/1/23]**

Refer to the Billing & Reimbursement chapters of this manual for specific billing guidelines related to co-treatment therapy. *(text revised 7/1/23)*

**4.2.F. SERIAL CASTING**

Serial casting is a process in which a joint(s) which lacks full range of motion is immobilized with a rigid or semi-rigid cast. During this procedure, the affected joint(s) is gradually and progressively set in a more anatomically correct alignment to improve joint alignment, increase muscle length, or to achieve a decrease in abnormal tone, resulting in an increase in the range of motion.

Casts are applied and removed in succession, usually every week, until full range of motion, flexibility, or plateau is reached. Upon removal of each cast, the limb is stretched, and a new cast is applied to hold the limb in place.

Serial casting is a covered benefit when performed by, or under the direct supervision of, a qualified therapist and defined in a treatment plan as a medically necessary therapy service for improving range of motion or reducing abnormal tone. The referral for therapy services must specifically indicate that the beneficiary is being referred for serial casting, or the prescribing provider must provide written concurrence, via signature, of any treatment plan that includes serial casting.
4.2.G. PRESCRIPTION REQUIREMENTS [CHANGES MADE 7/1/23]

Outpatient and private practice therapy requires a prescription from a physician or other licensed practitioner practicing within their scope of practice as defined in State law for physical therapy. Nursing facility therapy requires a prescription from a physician for physical therapy. Home Health requires a prescription from a physician, physician assistant, nurse practitioner, or clinical nurse specialist for physical therapy. (text revised and added per bulletin MMP 23-06)

A treatment plan meeting all of the requirements below is considered a prescription. The prescription/treatment plan must contain all the following:

- Beneficiary's name;
- Beneficiary's date of birth;
- Prescribing practitioner’s name, address, and telephone number;
- Prescribing practitioner’s signature;
- The date the prescription was written;
- The frequency and duration of the therapy services; and
- Diagnosis.

A copy of the prescription must be retained in the beneficiary’s medical record. A prescription is valid for 90 days from the date that the prescription was written unless the termination date is otherwise stated by the authorized prescribing practitioner on the prescription.

If the beneficiary has another insurance plan (e.g. Medicare or commercial insurance) and the service is a covered benefit, the provider must follow the requirements of the other insurance plan(s), including but not limited to, prescription, prior authorization, and provider qualifications. (Refer to the Coordination of Benefits chapter for more information.)
### Evaluations/Re-evaluations

An evaluation is formalized testing at the initiation of the beneficiary’s treatment plan. Evaluations may be provided up to two times in a 365-day period. Objective and periodic re-evaluations and reports are utilized to determine the measurable functional change resulting from the treatment plan. Re-evaluations may be provided up to two times in a 365-day period. Prior authorization is required if an evaluation or re-evaluation is needed more frequently. An evaluation/re-evaluation is required for the initiation of therapy and continued therapy.

PT evaluations/re-evaluations must be completed and signed by the physical therapist and include all the following:

- Standardized tests and/or objective functional baseline measures to establish short- and long-term goals and to document progress;
- Corresponding baseline measures for all short-and long-term goals;
- Treatment diagnosis(es);
- Medical diagnosis(es), if different from treatment diagnosis;
- Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable;
- Medical history as it relates to the current course of therapy;
- The beneficiary’s current functional status (functional baseline);
- Assessment of the beneficiary’s performance components (e.g., strength, dexterity, range of motion, sensation, perception, muscle tone, etc.) directly affecting the beneficiary’s ability to function or make progress toward goals; and
- Assessment of the beneficiary’s cognitive skill level (e.g., ability to follow directions, including auditory and visual comprehension).

### Treatment Plan/Plan of Care

The PT treatment plan that results from the evaluation must be medically necessary, signed by the physical therapist, and include all the following:

- Time-related short-term goals that are measurable, functional, and significant to the beneficiary’s function or mobility;
- Long-term goals that are measurable, functional, and identify specific maximum functional achievement for the requested authorization period;
- Functional outcome measures specific to maximum functional achievement for the current course of therapy (up to 12 consecutive months);
- Anticipated type, frequency, and duration of therapy required to meet short- and long-term goals;
- Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable;
- Plan for discharge from service; and
- Signature of the prescribing practitioner confirming agreement with the treatment plan.

A treatment plan, including all the criteria established above, must be submitted with the prior authorization request.
### Initiation of Services

PT may be initiated upon completion of the evaluation (current within 12 months) and development of a treatment plan that is medically necessary as documented in the beneficiary’s medical record. The initiation of therapy services may begin if all the following have been met:

- The beneficiary is Medicaid-eligible;
- A copy of the signed and dated (no more than 90 days prior to the initiation of services) prescription for physical therapy is retained in the beneficiary's medical record;
- The standard coverage limitations have not been exceeded;
- Therapy is provided by the evaluating discipline (e.g., occupational therapist cannot provide treatment under a physical therapist’s evaluation); and
- There is a change in medical status resulting in decreased mobility skills or functional ability.

### Requirements of Continued Therapy

The physical therapist must request prior authorization to continue therapy beyond standard coverage limitations, even if the beneficiary changes providers. A copy of the latest evaluation/re-evaluation (completed no more than 12 months prior to the authorization request) must be submitted with the prior authorization request.

Requests for continued therapy must be supported by all the following:

- Summary of previous treatment period (not to exceed the 90 days prior to that period for which prior authorization is being requested), including measurable progress on each short- and long-term goal, rate of progress, a statement of the beneficiary’s response to treatment, and any factors that have affected progress during the therapy period. Do not send daily treatment notes;
- Revised goals and justification for any change in the treatment plan for the requested period of therapy;
- Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable;
- Statement detailing any family/caregiver services being provided in a maintenance program, if appropriate;
- A copy of the prescription indicating the date range of the requested treatment period must be provided with each prior authorization request. The prescription must meet all the requirements established in this subsection. A treatment plan meeting all the prescription requirements is considered a prescription; and
- The anticipated plan of discharge for the current course of therapy (up to 12 months). If more than 12 months of therapy is anticipated, a new course of therapy with a new evaluation/re-evaluation and treatment plan is required.
## Maintenance Visits

The skills of a physical therapist may be required for training, review of previously achieved skills, monitoring of a maintenance program being carried out by family or caregivers, or continued follow-up for the fit and function of orthotic, prosthetic, or assistive technology devices. Maintenance visits in an outpatient or nursing facility setting may be provided up to four times per 90-consecutive day period. If more than four maintenance visits are required in a 90-consecutive day period, the therapist must request prior authorization. Maintenance visits in a home setting may be provided up to four times per 60-consecutive day period. If more than four maintenance visits are required in a 60-consecutive day period, the therapist must request prior authorization.

The physical therapist must complete the MSA-115 or FFS DDE plus MSA-115 prior authorization request, and include all the following:

- Summary of previous treatment period, including measurable progress on each short- and long-term goal. This must include the treating physical therapist's analysis of the therapy, rate of progress, and justification for any change in the treatment plan. Documentation must relate to the 90-day period immediately prior to that period for which prior authorization is being requested;
- A statement of the beneficiary’s response to treatment, including factors that have affected progress during the therapy period;
- A copy or description of the maintenance program;
- A statement detailing the reason(s) additional maintenance visits are medically necessary;
- Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable;
- The anticipated frequency and duration of the maintenance visits;
- The anticipated plan of discharge for the current course of therapy (up to 12 consecutive months);
- A treatment plan signed by the prescribing practitioner that includes all the criteria established under Treatment Plan/Plan of Care (above).

### 4.2.H. Discharge Summary

MDHHS requires the physical therapist to document a discharge summary to identify the completion of PT services and the discharge status. The discharge summary must be retained in the beneficiary’s medical record and include all the following:

- Dates of service (i.e., initial and discharge dates);
- Description of therapy services provided;
- Functional status at discharge related to treatment areas/goals/maximum functional potential over the course of therapy;
- Analysis of the effectiveness of the therapy program, including reasons for goals not met or changes in the treatment plan necessitated by changes in medical status;
- A copy or description of the maintenance program, if appropriate;
- Identification of assistive technology devices (e.g., walker) and its current utilization, if appropriate; and
- Recommendations/referral to other services, if appropriate.

### 4.2.1. Supplies and Equipment

MDHHS does not allow separate reimbursement for supplies and equipment used as part of a therapy treatment or for trials/training in the use of complex durable medical equipment when required to establish competency for a prior authorization request. The cost of supplies and equipment used are included in the reimbursement for the therapy.

### 4.3 Speech-Language Therapy

MDHHS uses the terms speech therapy, SLP, speech-language pathology, speech-language therapy (ST), and therapy to mean speech and language services and speech-language therapy. Speech-language therapy is covered when furnished by a Medicaid-enrolled therapy provider and the documentation is signed by the treating therapist. Medicaid reimburses services for speech-language therapy when provided by any of the following:

- A speech-language pathologist with a current license and who is authorized by ASHA to use Certificate of Clinical Competence in Speech-Language Pathology (CCC-SLP) credentials.
- An appropriately supervised speech-language pathologist candidate (i.e., in their clinical fellowship year) or having completed all requirements but has not obtained a license. All documentation must be reviewed and co-signed by the appropriately credentialed supervising speech-language pathologist.
- A student completing their clinical affiliation under the direct supervision of (i.e., in the presence of) a licensed speech-language pathologist. All documentation must be reviewed and co-signed by the appropriately credentialed supervising speech-language pathologist.

ST is considered an all-inclusive charge. Medicaid does not reimburse for a clinic room charge in addition to therapy services unless the room charges are unrelated. MDHHS expects speech-language pathologists to utilize the most ethically appropriate therapy within their scope of practice as defined by state law or the appropriate national professional association. ST must be medically necessary, related to a medical diagnosis, reasonable, and required to achieve one or more of the following:

- Return the beneficiary to the functional level prior to illness or disability;
- Return the beneficiary to a functional level that is appropriate to a stable medical status; and
- Prevent a reduction in medical or functional status had the therapy not been provided.

Speech-Language therapy is limited to services for:

- Articulation
- Language
- Fluency
- Oral function (including swallowing, oral and/or pharyngeal dysphagia, and increasing nutrition/hydration)
- Training in the use of a speech-generating device (SGD)/Augmentative and Alternative Communication (AAC) device/Augmentative Communication Device (ACD)
- Evaluation and instruction in the use of an oral-pharyngeal prosthesis
- Voice
- Rehabilitation of executive skills function status post neurological insult (examples may include reasoning, decision making, judgement, and language)
- Audiologic/Aural Rehabilitation

Speech-Language Therapies (ST) provided to nursing facility beneficiaries outside the nursing facility premises must be provided in the outpatient department of a general hospital or medical care facility.

Therapies provided to county medical care facility, hospital long term care unit, or hospital swing bed beneficiaries outside their respective facilities must be provided in the outpatient department of a general hospital.

Medicaid standard coverage allows the following:

<table>
<thead>
<tr>
<th>Outpatient/Private Practice Speech-Language Therapy</th>
<th>Nursing Facility Speech-Language Therapy</th>
<th>Home Health Speech-Language Therapy</th>
</tr>
</thead>
</table>
| • Up to 36 visits of ST per calendar year period.  
  • Prior authorization is required for treatment that exceeds this unit limitation. | • Prior authorization is required. | • Home Health ST is covered for CSHCS beneficiaries only.  
  • Prior authorization is required. |

ST is expected to result in a measurable improvement that is significant to the beneficiary’s ability to demonstrate communication and/or oral motor function appropriate to his/her chronological, developmental, cognitive, or functional status. Functional improvements must be achieved in a reasonable, and generally predictable, amount of time as specified in the short- and long-term goals identified on the evaluation/re-evaluation and treatment plan. Functional improvements must be maintainable. Medicaid does not cover therapy if the beneficiary's maximum functional potential has been realized, the beneficiary has plateaued, or the therapy has no impact on the beneficiary's ability to perform age-appropriate tasks. However, medically necessary habilitative therapy services may be covered under EPSDT or Healthy Michigan Plan.

Medicaid only covers ST services that require the skills, knowledge, and education of a speech-language pathologist. MDHHS does not cover interventions provided by another practitioner or caregiver (e.g., registered nurse, licensed physical therapist, family member, teacher, etc.).
Speech-Language therapy that is related to a medical diagnosis may be covered for one or more of the following:

- It is expected to result in the restoration or amelioration of the beneficiary’s ability to communicate wants, needs, and desires to their previous level of function following illness or injury.
- A temporary condition that results in decreased comprehension and expression, fluency, and/or oral function.
- Training to improve articulation.
- Training to improve receptive and expressive language.
- Training to improve fluency.
- Training to improve oral and/or pharyngeal phases of swallowing.
- Training in the use of a SGD/AAC/ACD device.
- Training in the use of an oral-pharyngeal prosthesis.
- Training in voice disorders.
- Training in the use of compensatory communication strategies.
- Training in restoration of executive skill functions.
- Skilled services that are designed to develop, train, monitor, and modify a maintenance program to be carried out by family or caregivers.
- Federal EPSDT regulations require coverage of medically necessary treatment for beneficiaries under 21 years of age, including medically necessary habilitative therapy services. (Refer to the Early and Periodic Screening, Diagnosis and Treatment chapter for additional information.)
Speech-Language therapy is not covered for the following:

- If provided solely for educational, vocational, social/emotional, or recreational purposes.
- If therapy services are required to be provided by another public agency (e.g., community mental health services provider, school-based services, etc.).
- If a therapy service requires prior authorization and the service is rendered before prior authorization is approved.
- Habilitative therapy designed to facilitate the normal progression of development without compensatory techniques or processes. (Refer to the Early and Periodic Screening, Diagnosis and Treatment and the Healthy Michigan Plan chapters for coverage exceptions.).
- If therapy is rote practice of achieved skills.
- Feeding for a beneficiary whose status is NPO, with physician orders to continue NPO.
- Feeding for a beneficiary who does not demonstrate the potential to improve oral and/or pharyngeal phases of swallowing (i.e., pleasure eating).
- Non-diagnostic, non-therapeutic, routine, or repetitive tasks without skilled feedback (e.g., sitting with a beneficiary needing prompting to swallow or take small bites which does not require the skills of a therapist, etc.).
- Continuation of therapy that is maintenance in nature, except as described under Maintenance Visits in the Prescription Requirements subsection (below).
- If Medicare determines the service is not medically necessary.
- Additionally for nursing facility beneficiaries:
  - Therapy provided by a physician (MD or DO) is not a covered benefit for beneficiaries in a nursing facility.
  - Services covered by the facility’s per diem rate, including routine maintenance and the development of the therapy and treatment.

### 4.3.A. DUPLICATION OF SERVICES

Medicaid does not cover two disciplines working concurrently on similar goals/areas (e.g., dysphagia, assistive technology, etc.). Collaboration between treating therapists is required to coordinate therapy and prevent duplication of services. Documentation of the collaboration must be retained in the beneficiary’s medical record for audit purposes.

### 4.3.B. ACCESS TO SERVICES FOR SCHOOL-AGED BENEFICIARIES [Changes Made 7/1/23]

School-based therapy services are covered by Medicaid when they assist a child/youth with a disability to benefit from special education. This includes beneficiaries up to the age of 21 who are eligible under the provisions of the Individuals with Disabilities Education Act (IDEA) of 1990 as amended, and those enrolled in programs that require an Individualized Education Program (IEP) or an Individualized Family Service Plan (IFSP). Therapy provided solely for educational purposes (e.g., pre-academic goals such as improved attention span, catching/throwing/kicking balls, etc.) is not covered by Medicaid.
Beneficiaries receiving school-based therapy may also receive medically-based therapy services in an outpatient setting, nursing facility, or through a home health agency. Medically-based therapy services are provided to optimize the child’s/youth’s maximum functional performance in relation to needs in the home or community setting and must not directly duplicate those provided in the school setting. Medicaid does not require a school-aged beneficiary to be referred to or access therapy services through the school-based services (SBS) benefit prior to, or in lieu of, accessing medically based therapy in the community. Participation in therapy in one setting is not intended to replace services in the other setting.

If therapy is provided in more than one setting, the goals and purpose for each must be distinct. Collaboration between the school and community providers is required to coordinate therapy and prevent direct duplication of services. Documentation of the collaboration must be retained in the beneficiary’s medical record for audit purposes. (text revised 7/1/23)

Beneficiaries receiving school-based therapy services with medically-related goals may be eligible for the continuation of services in an outpatient setting during the summer months to maintain function. Prior authorization is required if standard coverage limitations have been exceeded. (Refer to Requirements of Continued Therapy under the Prescription Requirements subsection below for additional information.)

4.3.C. GROUP THERAPY

Group therapy requires documentation justifying the benefit of group therapy in addition to, or in place of, individual therapy. No more than one session of individual speech-language therapy and one session of group speech-language therapy may be provided on the same date of service. Group therapy is not covered in the home setting.

4.3.D. CO-TREATMENT THERAPY

Co-treatment is a single treatment session in which two therapists from different disciplines work together as a team to address a beneficiary’s condition and meet their treatment goals. Medicaid covers outpatient and nursing facility co-treatment therapy when medically necessary for the beneficiary to receive multi-disciplinary therapy during the same treatment session. The two therapists must not work on duplicate treatment goals. Standards of coverage and service limitations for each discipline participating in the co-treatment are identical to those applicable to therapy provided on an individual basis.

The decision to co-treat should be made on a case-by-case basis and be provided solely for the medical benefit of the beneficiary. Co-treatment therapy is not covered when provided for convenience purposes or when the assistance of an additional therapist is requested solely for safety reasons.

4.3.D.1. PRIOR AUTHORIZATION

Co-treatment therapy must be prior authorized (PA). Each therapist requesting co-treatment must submit a separate PA to MDHHS; however, both requests should be submitted at the same time. If a PA request includes both individual and co-treatment
therapy, the therapist must designate which procedure code, units, frequency, or service
dates will be utilized in the co-treatment intervention. Documentation of the
beneficiary’s evaluation/re-evaluation, individualized treatment plan and short- and long-
term goals, and progress should be submitted with each of the therapist’s PA requests.
In addition, the documentation must:

- Support the clinical need and appropriateness of the co-treatment services;
- Demonstrate how the co-treatment will help achieve the therapist’s goals more
effectively than separate, individual treatment sessions;
- Identify the co-treating discipline; and
- Indicate the anticipated length of time (in sessions or weeks/months) that the beneficiary
will require co-treatment rather than individual sessions.

4.3.D.2. BILLING REQUIREMENTS [CHANGE MADE 7/1/23]

Refer to the Billing & Reimbursement chapters of this manual for specific billing
guidelines related to co-treatment therapy. (text revised 7/1/23)

4.3.E. PRESCRIPTION REQUIREMENTS

Outpatient and private practice therapy requires a prescription from a physician or other
licensed practitioner practicing within their scope of practice as defined in State law for
speech-language therapy. Home health and nursing facility therapy require a
prescription from a physician for speech-language therapy.

A treatment plan meeting all the requirements below is considered a prescription. The
prescription/treatment plan must contain all the following:

- Beneficiary’s name;
- Beneficiary’s date of birth;
- Prescribing practitioner’s name, address, and telephone number;
- Prescribing practitioner’s signature;
- The date the prescription was written;
- The frequency and duration of the therapy services;
- Diagnosis; and
- For swallowing or oral motor evaluation/treatment, the documentation must clearly
specify allowance of trial feeds and/or oral intake during therapy. All documentation,
including the prescription, current plan of care, and prior authorization, must consistently
substantiate this allowance.

A copy of the prescription must be retained in the beneficiary’s medical record. A
prescription is valid for 90 days from the date that the prescription was written unless
the termination date is otherwise stated by the authorized prescribing practitioner on the
prescription.
If the beneficiary has another insurance plan (e.g. Medicare or commercial insurance) and the service is a covered benefit, the provider must follow the requirements of the other insurance plan(s), including but not limited to, prescription, prior authorization, and provider qualifications. (Refer to the Coordination of Benefits chapter for more information.)

### Evaluations/Re-evaluations

An evaluation is formalized testing at the initiation of the beneficiary’s treatment plan. Evaluations may be provided up to two times in a 365-day period. Oral function or swallowing evaluations may be provided up to four times in a 365-day period. Objective and periodic re-evaluations and reports are utilized to determine the measurable functional change resulting from the treatment plan. Re-evaluations may be provided up to two times in a 365-day period. Prior authorization is required if an evaluation or re-evaluation is needed more frequently. An evaluation/re-evaluation is required for the initiation of therapy and continued therapy.

Speech-Language therapy evaluations/re-evaluations must be completed and signed by the speech-language pathologist and include all the following:

- Standardized tests and/or objective functional baseline measures used to establish short- and long-term goals and to document progress;
- Corresponding baseline measures for all short- and long-term goals;
- Treatment diagnosis(es);
- Medical diagnosis(es), if different from treatment diagnosis;
- Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable;
- Medical history as it relates to the current course of therapy;
- Assessment of the beneficiary’s performance components (e.g., functional communication, receptive, expressive, articulation, fluency, voice, oral function, muscle tone, etc.) directly affecting the beneficiary’s ability to function or make progress toward goals;
- Assessment of the beneficiary’s cognitive skill level (e.g., ability to follow directions, including auditory and visual comprehension).

Oral function/swallowing evaluations must also include:

- Presence/absence of coughing;
- History of recent respiratory illness;
- Current diet, documenting difficulties with food consistencies;
- Aversion/sensitivity during eating;
- Report or copy of a video fluoroscopy and any other formal testing, if available;
- Objective oral motor assessment addressing labial, glossal, laryngeal, and pharyngeal stages;
- Voice quality (i.e., pre- and post-feeding and natural voice), if applicable.
| Treatment Plan/Plan of Care | The ST treatment plan that results from the evaluation must be medically necessary, signed by the speech-language pathologist, and include all the following:  
- Time-related short-term goals that are measurable, functional, and significant to the beneficiary's communication needs;  
- Long-term goals that are measurable, functional, and identify specific maximum functional achievement for the requested authorization period;  
- Functional outcome measures specific to maximum functional achievement for the current course of therapy (up to 12 consecutive months);  
- Anticipated type, frequency and duration of therapy required to meet short- and long-term goals;  
- Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable;  
- Plan for discharge from service; and  
- Signature of the prescribing practitioner confirming agreement with the treatment plan.  
A treatment plan, including all the criteria established above, must be submitted with the prior authorization request. |
| Initiation of Services | Speech-Language therapy may be initiated upon completion of the evaluation (current within 12 months) and development of a treatment plan that is medically necessary as documented in the beneficiary’s medical record. The initiation of therapy services may begin if all the following have been met:  
- The beneficiary is Medicaid eligible;  
- A copy of the signed and dated (no more than 90 days prior to the initiation of services) prescription for speech-language therapy is retained in the beneficiary’s medical record;  
- The standard coverage limitations have not been exceeded;  
- Therapy is provided by the evaluating discipline (e.g., an occupational therapist cannot provide treatment under a speech-language pathologist’s evaluation); and  
- If there is a change in medical status resulting in decreased communication skills, oral motor skills, or functional ability. |
The speech-language pathologist must request prior authorization to continue therapy beyond standard coverage limitations, even if the beneficiary changes providers. A copy of the latest evaluation/re-evaluation (completed no more than 12 months prior to the prior authorization request) must be submitted with the prior authorization request.

Requests for continued therapy must be supported by all the following:

- Summary of previous treatment period (not to exceed the 90 days prior to that period for which prior authorization is being requested), including measurable progress on each short- and long-term goal, rate of progress, a statement of the beneficiary’s response to treatment, and any factors that have affected progress during the therapy period. Do not send daily treatment notes.
- Revised goals and justification for any change in the treatment plan for the requested period of therapy.
- Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable.
- Statement detailing any family/caregiver services being provided in a maintenance program, if appropriate.
- A copy of the prescription indicating the date range of the requested treatment period must be submitted with each prior authorization request. The prescription must meet all the requirements established under this subsection. A treatment plan meeting all the prescription requirements is considered a prescription.
- The anticipated plan of discharge for the current course of therapy (up to 12 months). If more than 12 months of therapy is anticipated, a new course of therapy with a new evaluation/re-evaluation and treatment plan is required.

</tbody>
</table>
Maintenance Visits

The skills of a speech-language pathologist may be required for training, review of previously achieved skills, monitoring of a maintenance program being carried out by family or caregivers, or continued follow-up for the fit and function of orthotic, prosthetic, or assistive technology devices. Maintenance visits in an outpatient or nursing facility setting may be provided up to four times per 90-consecutive day period. If more than four maintenance visits are required in a 90-consecutive day period, the speech-language pathologist must request prior authorization. Maintenance visits in a home setting may be provided up to four times per 60-consecutive day period. If more than four maintenance visits are required in a 60-consecutive day period, the speech-language pathologist must request prior authorization.

The speech-language pathologist must complete the MSA-115 or FFS DDE plus MSA-115 prior authorization request, and include all the following:

- Summary of previous treatment period, including measurable progress on each short- and long-term goal. The summary must include the treating speech-language pathologist’s analysis of the therapy, rate of progress, and justification for any change in the treatment plan. Documentation must relate to the 90-consecutive day period immediately prior to that period for which prior authorization is being requested.
- A statement of the beneficiary’s response to treatment, including factors that have affected progress during the therapy period.
- A copy or description of the maintenance program.
- A statement detailing the reason(s) additional maintenance visits are medically necessary.
- Documentation of collaboration between all therapy providers actively treating the beneficiary, if applicable.
- The anticipated frequency and duration of the maintenance visits.
- The anticipated discharge plan for the current course of therapy (up to 12 consecutive months).
- A treatment plan signed by the prescribing practitioner that includes all the criteria established under Treatment Plan/Plan of Care (above).

4.3.F. DISCHARGE SUMMARY

MDHHS requires the speech-language pathologist to document a discharge summary to identify the completion of speech-language therapy services and the discharge status. The discharge summary must be retained in the beneficiary’s medical record and include all the following:

- Dates of service (i.e., initial and discharge dates);
- Description of therapy services provided;
- Functional status at discharge related to treatment areas/goals/maximum functional achievement over course of therapy;
- Analysis of the effectiveness of the therapy program, including reasons for goals not met or changes in the treatment plan necessitated by changes in medical status;
- A copy or description of the maintenance program, if appropriate;
• Identification of assistive technology devices provided (e.g., SGD/AAC, switches) and its current utilization, if appropriate; and
• Recommendations/referrals to other services, if appropriate.

4.3.G. SUPPLIES AND EQUIPMENT

MDHHS does not allow separate reimbursement for supplies and equipment used as part of a therapy treatment or for trials/training in the use of complex durable medical equipment when required to establish competency for a prior authorization request. The cost of supplies and equipment used are included in the reimbursement for the therapy. Refer to the Speech Generating Devices subsection of the Medical Supplier Chapter for additional information regarding SGDs, including trial periods.

4.3.H. EVALUATIONS AND FOLLOW-UP FOR SPEECH-GENERATING DEVICES/VOICE PROSTHESES

An evaluation by the speech-language pathologist for recommendation of a SGD may be billed once in three years. Prior authorization is required for evaluations exceeding standard coverage limitations. The results of this evaluation must be shared with the provider submitting the SGD prior authorization request.

SGD set-up, programming, and modification services that require the skills of a speech-language pathologist (beyond those provided by the SGD vendor) are covered as part of the beneficiary’s ST benefit and may be billed up to 36 visits per calendar year.

Prior authorization is required for all SGDs. The Special Services Prior Approval-Request/Authorization form (MSA-1653-B) must be submitted for all original, replacement, upgrade, or repair of SGDs. (Refer to the Forms Appendix for additional information.)

Refer to the Speech Generating Devices subsection of the Medical Supplier Chapter for additional information regarding SGDs.

An evaluation for the use and/or fitting of a voice prosthetic device to supplement oral speech may be billed only if the evaluation was done to determine the need for an electro-larynx. The evaluation may be provided once in three years.

SECTION 1 – GENERAL INFORMATION

Under the Indian Self-Determination and Education Assistance Act (Public Law 93-638), tribal facilities, including Tribal Health Centers (THCs), are those owned and operated by American Indian/Alaska Native tribes and tribal organizations under contract or compact with the Indian Health Service (IHS).

The Michigan Department of Health and Human Services (MDHHS), which administers the State Medicaid Agency (SMA), has the authority to enter into reimbursement agreements with THCs to establish a payment mechanism for Medicaid beneficiaries receiving outpatient services through a THC.

Under the Michigan Medicaid State Plan, THCs have the option of choosing from one of four reimbursement mechanisms. The THC may elect to be reimbursed under only one of the options listed below, and the selected option applies to all beneficiaries receiving services at the THC. The options are:

- A THC may choose to be certified as an IHS facility and receive the IHS outpatient all-inclusive rate (AIR) for eligible encounters. The AIR applies to encounters for both native and non-native Medicaid beneficiaries. THCs are reimbursed at the AIR unless the THC chooses a different payment option and informs MDHHS of this choice in writing.
- If a THC chooses to be reimbursed as a FQHC, the entity would be required to adhere to the same requirements specified in the Federally Qualified Health Centers Chapter.
- A Tribal facility may choose to enroll as a Tribal FQHC and be reimbursed for outpatient face-to-face visits within the FQHC scope of services provided to Medicaid beneficiaries, including telemedicine and services provided by contracted employees. Tribal FQHCs are eligible to receive the IHS outpatient AIR for eligible encounters.
- A THC may be reimbursed as a fee-for-service provider. THCs choosing this option receive payment for covered services. No additional reimbursement or settlement is made.

In addition, eligible prescriptions dispensed by THC and Tribal FQHC pharmacies constitute a separate encounter per prescription and are reimbursed the IHS outpatient AIR. The AIR applies to prescriptions for both native and non-native Medicaid beneficiaries.

Upon federal approval by the Health Resources and Services Administration, THCs may be reimbursed as a Federally Qualified Health Center (FQHC) by signing the FQHC Memorandum of Understanding (MOU). THCs choosing this option will receive the FQHC encounter rate set by the State in accordance with the Michigan Medicaid State Plan and federal regulations. The FQHC encounter rate applies to encounters for both native and non-native Medicaid beneficiaries. A THC electing to be reimbursed as an FQHC is not required to have a contract with the managed care entity.
SECTION 2 – MEDICAID ENROLLMENT

2.1 PROVIDER ENROLLMENT [CHANGE MADE 4/1/23]

MDHHS requires all THCs to have a **Type 2 (Organization) (revised 4/1/23)** National Provider Identification (NPI) number in order to receive the enhanced THC reimbursement. For THCs with multiple locations and multiple rates, an NPI number for each location may be necessary so that the proper reimbursement rate of all encounters can be determined. If the THC fails to obtain and/or use the correct NPI number, the THC reimbursement will be determined under fee for service rules. The NPI number must be reported to MDHHS before billing Medicaid services.

Individual providers (doctors, dentists, optometrists, etc.) are required to obtain a Provider (Type 1 - Individual) NPI number and report the number to MDHHS.

In accordance with 42 CFR 455.104 and the Provider Ownership and Control Disclosures subsection of the General Information for Providers chapter of this Manual, clinics are required to disclose ownership information to MDHHS within 35 days of a change of ownership. Failure to notify MDHHS of any change in identification information may result in the loss of Medicaid enrollment, lapse of provider eligibility, or nonpayment of services.

2.1.A. NON-PHYSICIAN BEHAVIORAL HEALTH SERVICES

Licensed psychologists (Master’s Limited or Doctoral level), social workers (Master’s level), professional counselors (Master’s or Doctoral level), and marriage and family therapists who serve Medicaid beneficiaries are required to enroll as Medicaid providers. Services must be billed using the appropriate evaluation and management (E/M) codes listed in the American Medical Association’s Current Procedural Terminology (CPT) Book or Healthcare Common Procedure Coding System (HCPCS) codes. Providers should refer to the Non-Physician Behavioral Health provider database on the MDHHS website for the current list of covered procedure codes. The list of allowable services is reviewed annually and updated as applicable. Refer to the Additional Code/Coverage Resource Materials Section of the General Information for Providers Chapter for additional information regarding coverage parameters.

2.2 NONENROLLED PROVIDERS

Professional services performed by limited licensed psychologists (except as noted in Section 333.18223 of the Public Health Code), social workers, professional counselors, marriage and family therapists or student interns must be performed under the supervision of an enrolled, fully-licensed provider of the same profession. Since MDHHS does not directly enroll these providers, claims for their services must be billed using the NPI of the supervising provider responsible for ensuring the medical necessity and appropriateness of the services. Claims submitted with the non-enrolled provider’s NPI in the rendering provider field will reject.
SECTION 3 – BENEFITS

3.1 COVERED SERVICES [CHANGE MADE 7/1/23]

THC services are reimbursed at the current Medicaid fee screens and reconciled annually, if applicable, for services provided to Medicaid fee-for-service (FFS) or managed care beneficiaries. THC Medicaid services include:

- Physician (MD, DO) services
- Podiatrist (DPM) services
- Chiropractor (DC) services
- Optometrist (OD) services
- Dental (DDS, DT, RDH) services
- Advanced practice registered nurse (APRN) services
- Physician assistant (PA) services
- Services and supplies incident to the services rendered by the provider:
  - Pharmacy services administered by the provider and billed under the provider’s NPI number
  - Laboratory services billed under the provider’s NPI number
  - Diagnostic services billed under the provider’s NPI number
- Therapies (i.e., Occupational, Physical, and Speech, Hearing, and Language Evaluation and Therapy) rendered under the physician’s NPI number

The services listed may be modified in accordance with benefits covered under the Medicaid State Plan. MDHHS notifies providers of changes (additions/deletions) in Medicaid covered services through the Medicaid bulletin process. Providers should refer to these documents to verify that benefits are covered prior to rendering services.

For clarification of covered services:

</tr>
</tbody>
</table>
**Maternal Infant Health Program (MIHP)**

THCs providing Maternal Infant Health Program (MIHP) services must be certified through MDHHS. Information specific to the coverages and limitations for MIHP services are detailed in the Maternal Infant Health Program Chapter of this manual. MIHP related services rendered to fee-for-service beneficiaries must be billed on the ASC X12N 837 5010 professional format. Refer to the Billing & Reimbursement for Professionals Chapter of this manual for specific billing guidelines.

If the THC subcontracts any MIHP services, no duplicate billing is permitted.

**Physician’s Assistant**

Physician’s assistant services must comply with coverages and limitations published in the Practitioner Chapter of this manual and in MDHHS Bulletins.

**Advanced Practice Registered Nurse (APRN)**

APRN services must comply with the coverages and limitations published in the Practitioner Chapter of this manual and in MDHHS Bulletins.

**Pharmacy Services**

Pharmacy services billed under the practitioner NPI number are included in the encounter rate but do not constitute a separate encounter as they are considered part of the office visit.

Practitioner pharmacy services do not include drugs provided by a pharmacy. THCs with enrolled pharmacy providers may continue to bill prescription claims to the MDHHS Pharmacy Benefits Manager (PBM).

Medication Therapy Management (MTM) services are face-to-face consultations provided by pharmacists to optimize drug therapy and improve therapeutic outcomes for beneficiaries. MTM services provided according to Medicaid policy may be eligible to receive the encounter rate. (Refer to the Pharmacy Chapter of this manual for additional information.)

MDHHS contracts with a PBM for processing of all fee-for-service (FFS) pharmacy claims for Medicaid. (Refer to the Pharmacy Chapter of this manual for an explanation of coverages and limitations.)

**Laboratory Services**

The Laboratory Chapter of this manual explains the coverages and limitations of the Medicaid laboratory benefit. Laboratory services billed under the practitioner's NPI number are included in the THC encounter rate but do not constitute a separate encounter for reimbursement purposes as they are considered part of the office visit.

THCs cannot bill for any services rendered by an outside laboratory provider or for an outside laboratory’s employees performing tests.

**Diagnostic Services**

Diagnostic testing performed as part of an office visit must be directly related to the presenting condition and substantiated in the medical records. (Refer to the Billing & Reimbursement for Professionals Chapter of this manual for billing information.)

Diagnostic testing services do not constitute a separate encounter. These services are regarded as part of the office visit and are included in the encounter reimbursement. Examples of diagnostic tests are allergy testing, audiologic function tests, x-rays, and EKGs.
Telemedicine

A THC can be either an originating or distant site for telemedicine services. Refer to the Billing & Reimbursement for Institutional Providers Chapter for specific billing instructions. Refer to the Telemedicine Chapter for additional information regarding telemedicine services. *(revised per bulletins MSA 20-09, MSA 21-24, MMP 23-10)*

Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.

Therapies

Physical therapy, speech therapy, and occupational therapy are covered when performed at the THCs. Refer to the appropriate chapter of this manual and MDHHS Bulletins for an explanation of current coverages and limitations. The Billing & Reimbursement for Professionals Chapter of this manual describes the billing requirements for services provided. Therapies provided on the same date of service as a physician visit are included in the encounter reimbursement.

### 3.2 Dental Coverages and Limitations

THC dental services are covered if provided in the THC and must comply with coverages and limitations for dental services as specified in the Dental Chapter of this manual. Dental benefits covered for beneficiaries under the age of 21 differ from those covered for beneficiaries age 21 and over.

Information for billing dental services is published in the Billing & Reimbursement for Dental Providers Chapter of this manual.

MDHHS contracts with Dental Health Plans (DHPs) for the administration of dental services for *Healthy Kids Dental* (HKD) beneficiaries. Claims for services provided to beneficiaries enrolled in the HKD program should be submitted to the beneficiary’s DHP. Payment is made based on the DHP fee schedule. No additional reimbursement is made by MDHHS.

(Refer to the Directory Appendix for DHP contact information.)

### 3.3 Vision Coverages and Limitations

Vision services are covered if provided at the THC. Vision providers are ophthalmologists and optometrists. The vision services provided by an ophthalmologist or optometrist must comply with coverages and limitations published in the Vision Chapter of this manual.

MDHHS contracts for the volume purchase of frames and lenses from an optical house. Frames and lenses covered by the program must be ordered through the contractor and are listed in the Vision Chapter of this manual.

Some vision services require prior authorization (PA) before they can be rendered. The Vision Services Approval/Order Form (DCH-0893) is used to obtain PA. (Refer to the Vision Chapter for information on services that require PA and to the Forms Appendix for a copy of the form.)

### 3.4 Services Provided to Medicaid Health Plan Enrollees

For Medicaid-covered services provided to Medicaid beneficiaries enrolled in a Medicaid Health Plan (MHP), THCs receive payment from the MHP based on an agreement or contract with the MHP. In the absence of an agreement or contract, payment is based on the Medicaid fee-for-service (FFS) rates in
effect on the date of service (DOS). Approved services provided to MHP enrollees are then recognized as encounters.

### 3.5 Medicare and Medicaid Beneficiaries

For dually eligible Medicare and Medicaid beneficiaries, Medicaid reimburses coinsurance and deductible amounts on Medicare-approved claims up to Medicare’s IHS encounter rate.
SECTION 4 – SUBSTANCE ABUSE

Outpatient substance abuse services provided by physicians, clinical social workers, clinical psychologists, and substance abuse treatment specialists are reimbursed. These services may include:

- Initial complete physical
- Medical history
- Social history
- Psychiatric history
- Individual, family, and group counseling
- Outpatient substance abuse treatment
- Intensive outpatient counseling
- Therapies (i.e., Psychiatric occupational/recreational therapy) in a Tribal-operated substance abuse treatment center are covered services provided they are active, restorative, and designed to prevent, correct, or compensate for a specific medical problem.
- Methadone

4.1 REQUIREMENTS FOR PARTICIPATION

All programs must meet the following criteria to bill Medicaid for services:

- Accredited as an alcohol and/or drug abuse program by one of the five national accreditation bodies:
  - The Joint Commission
  - Commission on Accreditation of Rehabilitation Facilities (CARF)
  - American Osteopathic Association (AOA)
  - Council on Accreditation of Services for Families and Children (CASFC)
  - National Committee on Quality Assurance (NCQA)

4.2 AUTHORIZATION

Services provided at the THC to American Indian and Alaska Native beneficiaries do not require the authorization of the regional Prepaid Inpatient Health Plan (PIHP).

4.3 AMERICAN INDIAN AND ALASKA NATIVE SERVICES

American Indians and Alaska Natives who are Medicaid beneficiaries can obtain substance abuse services directly from the THC. These services are not included in the MDHHS §1915(b) Managed Specialty Services and Supports Waiver for PIHPs and substance use disorder services. THCs should contact their regional PIHP to determine the appropriate process for accessing other funding sources or other service providers for those individuals requiring substance abuse services not covered by the THC.
4.4 SERVICES PROVIDED TO NON-AMERICAN INDIANS AND ALASKA NATIVES

The MDHHS Prepaid Inpatient Health Plan (PIHP) for Specialty Developmental Disabilities, Mental Health and Substance Abuse services assumes responsibility for certifying admission/continuing stays and reimbursing claims for the specialized substance abuse services of non-American Indians and Alaska Natives. Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter of this manual for further information on PIHPs, Mental Health and Substance Abuse Services. Substance abuse services for non-American Indians and Alaska Natives must not be billed under CPT and HCPCS codes.

4.5 SERVICE LIMITS

THCs may exceed the substance abuse treatment limits for American Indian and Alaska Native beneficiaries as long as the medical record and plan of care documents the medical necessity.

4.6 NONCOVERED SERVICES

The following substance abuse services are not covered when provided through THCs:

- Emergency and non-emergency transportation
- Initial emergency screening and medical stabilization
- Acute medical detoxification services
- Medications prescribed in the management or treatment of methadone
- Room and Board
SECTION 5 – MENTAL HEALTH

Outpatient mental health services provided by physicians, clinical social workers, and clinical psychologists are covered. These services may include:

- Health assessment
- Psychiatric evaluation
- Psychological testing
- All other assessments and testing
- Case management
- Child therapy
- Crisis interventions
- Crisis residential services
- Intensive crisis stabilization services
- Individual psychotherapy
- Family psychotherapy
- Group psychotherapy
- Interpretation or explanation of data to family
- Medication administration
- Medication review
- Therapies (i.e., psychiatric occupational/recreational therapy) in a mental health treatment center are a covered service provided they are active, restorative, and designed to prevent, correct, or compensate for a specific medical problem.

5.1 NONENROLLED PROVIDERS

Professional services provided by limited licensed psychologists (except as noted in Section 333.18223 of the Public Health Code), social workers, professional counselors, marriage and family therapists or student interns are covered but must be performed under the supervision of an enrolled, fully-licensed provider of the same profession. Individuals who meet Michigan licensure/certification requirements for social workers and psychologists may provide services.

5.2 AUTHORIZATION

Mental health services provided at the THC to American Indian and Alaska Native beneficiaries do not require the authorization of PIHPs/CMHSPs.
5.3 **American Indian and Alaska Native Services**

American Indians and Alaska Natives who are Medicaid beneficiaries can obtain mental health services directly from the THC. THC services are not included in the MDHHS §1915(b) Managed Specialty Services and Supports Waiver for PIHPs and substance use disorder services. THCs may refer tribal members to the PIHP/CMHSP for mental health services not provided at the THC.

5.4 **Non-American Indian Services**

PIHPs/CMHSPs assume responsibility for community-based mental health and developmental disability services covered through Medicaid for non-American Indians. Refer to the Behavioral Health and Intellectual and Developmental Disability Supports and Services Chapter of this manual for policies and procedures. Non-American Indian mental health services must not be billed under CPT or HCPCS codes.

5.5 **Noncovered Services**

Mental Health services that are **not** the responsibility of the THC are as follows:

- Home-based mental health services
- Nursing facility (NF) mental health monitoring
- Emergency and non-emergency transportation
SECTION 6 – ENCOUNTERS

THCs are eligible to receive an encounter (per visit) rate as reimbursement for Medicaid covered services provided at the THC for native and non-native Medicaid beneficiaries.

The IHS outpatient all-inclusive rate (AIR) is determined by the Centers for Medicare & Medicaid Services (CMS) and is published in the Federal Register. The FQHC encounter rate under the FQHC MOU is an alternative methodology that was based on the prospective payment system (PPS) outlined in section 1902(bb) of the Social Security Act.

6.1 DEFINITION

An encounter is a face-to-face visit between a Medicaid beneficiary and the THC provider of health care services who exercises independent judgment in the provision of Medicaid-covered services. The THC provider may be credited with no more than one face-to-face encounter with a given beneficiary per day, except when the beneficiary, after the first encounter, suffers a separate or different illness or injury requiring additional diagnosis or treatment.

For a service to be defined as an encounter, the Medicaid-covered service must be recorded in the patient’s record.

6.2 SERVICES BUNDLED IN THE ENCOUNTER

Ancillary Medicaid services (e.g., labs, x-rays, injections, etc.) are included in the per visit encounter. These ancillary services are described as being provided incident to the office visit. For example, lab services billed under the physician’s NPI number would not be considered a separate encounter.

Ancillary services provided at another facility are not bundled under the office visit encounter. For example, services provided by the local hospital are not included in the encounter.
SECTION 7 — BILLING [CHANGES MADE 4/1/23]

The Type 2 (Organization) (revised 4/1/23) NPI number must be used as the billing provider on all electronic and paper claims submitted to Medicaid. Do not use Provider (Type 1 - Individual) as the billing provider. The billing provider loop or field is mandatory to complete.

The NPI (Type 1 – Individual) number of the practitioner overseeing the beneficiary’s care must be entered as the attending provider. The attending provider field is mandatory to complete. The following providers may be reported in the attending provider field:

- Physicians (includes dentists, podiatrists, optometrists, and chiropractors)
- Nurse Practitioners
- Physician Assistants
- Certified Nurse Midwives
- Clinical Psychologists
- Clinical Social Workers
- Clinical Nurse Specialists
- Licensed Psychologists (Doctoral Level)
- Social Workers (Master’s Level)
- Professional Counselors (Master’s or Doctoral levels)
- Marriage and Family Therapists
- Limited Licensed Psychologists (Master’s or Doctoral Level)

Additionally, the NPI (Type 1 – Individual) number of the practitioner who performed the service should be entered as the rendering provider. Do not enter a Type 2 (Organization) (revised 4/1/23) NPI number as the attending or rendering provider.

MDHHS will use the billing provider NPI field (Type 2 - Organization) to determine the number of encounters and calculate the settlement for the year-end reconciliation.

7.1 CLINICAL TRIALS [CHANGE MADE 4/1/23]

The program covers routine patient costs furnished in connection with participation in a qualifying clinical trial. Refer to the Practitioner Chapter for additional coverage information.

All THC claims for routine patient costs associated with participation in a clinical trial must adhere to the inpatient hospital claim guidelines for reporting covered services using the CMS UB04/8371 institutional claim format. In addition, THC claims must include:

- A completed and signed Attestation to the Appropriateness of the Qualified Clinical Trial form (BPHASA-2210). (Refer to the Forms Appendix to review the form and to the Directory Appendix for form access on the MDHHS website.) (added per bulletin MMP 22-42)
Michigan Department of Health and Human Services

Medicaid Provider Manual

- Clinical trial and non-clinical trial services on separate line items when claims are submitted for both types of services on the same claim.

- Each line identified with the appropriate Healthcare Common Procedure Coding System (HCPCS) Modifier Q0 or Q1.
  - HCPCS Modifier Q0 - **investigational clinical service** provided in a clinical research study that is in an approved clinical research study.
  - HCPCS Modifier Q1 – **routine clinical service** provided in a clinical research study that is in an approved clinical research study.

7.1.A. REPORTING NON-COVERED SERVICES

Generally, services, investigational drugs, or items that are part of the clinical trial and considered experimental or investigational should not be reported on a claim. In instances when claims processing edits require non-covered services be billed with their associated procedures, or when it is necessary for a provider to show the items and services provided free-of-charge to receive payment for the covered routine costs, providers are instructed to report non-covered services with the appropriate modifier and a charge of $0.

7.2 OTHER INSURANCE

Billing instructions related to coordination of benefits are published in the Coordination of Benefits Chapter of this manual. Other insurance and all other payments received for services rendered to a Medicaid beneficiary must be reported. If payment received from other insurance exceeds the amount Medicaid would have paid, the THC must still submit a claim to Medicaid with the appropriate procedure code in order for the visit to be counted as an encounter.

7.3 MEDICARE AND MEDICAID CLAIMS

Refer to the Billing & Reimbursement Chapters of this manual for specific instructions regarding Medicare and Medicaid claims. If the Medicare payment exceeds the Medicaid fee screen, the appropriate procedure code should still be billed to Medicaid for encounter and reconciliation purposes.

7.4 PAYER OF LAST RESORT

The IHS is the payer of last resort for persons defined as eligible for contract health services under the regulations in 42 CFR, Part 36a, Subpart G, Section 36.61, notwithstanding any State or local law or regulation to the contrary.

7.5 COPAYMENTS

Medicaid copayments for chiropractic, dental, physician, podiatry and vision services are waived under the THC benefit as part of the reconciliation. (Refer to the General Information for Providers chapter for a list of services requiring copayments.)

Refer to the Billing Beneficiaries Section of the General Information for Providers Chapter of this manual for additional information regarding copayment requirements. Beneficiaries may not be denied care or services based on inability to pay a copayment, except as outlined in that section.
7.6 TIMELY FILING BILLING LIMITATION

The same timely filing billing limitations explained in the General Information for Providers Chapter of this manual pertain to encounters as well as claim submission.

7.7 PLACE OF SERVICE

Place of service codes are not applicable to institutional billing. However, if the THC performs a service that must be billed on the professional claim form within the clinic, THCs must use place of service (POS) code 07. For services provided outside the THC, bill with the appropriate POS code noted in the Billing & Reimbursement for Professionals Chapter of this manual.

THC services provided to beneficiaries at the THC are reconciled annually, if applicable.

The THC may bill for covered services that are not provided at the THC. These services must be billed with the appropriate Place of Service (POS) code in compliance with the coverages and limitations specified in the Practitioner Chapter of this manual. A complete list of POS codes can be found in the Billing & Reimbursement for Professionals Chapter of this manual.

Services billed to Medicaid are subject to audit and verifications.
SECTION 8 – MEDICAID PAYMENTS, ANNUAL RECONCILIATION AND APPEALS

8.1 QUARTERLY PAYMENTS

Quarterly payments are made to the THC at the beginning of each quarter. The payment is based on an estimate of the difference between the amount the THC receives for Medicaid services from FFS claims, managed care encounters, and other third party payments (including Medicare) during the year and the amount due the center based on the THC encounter rate. This quarterly amount may be adjusted periodically by MDHHS to account for changes in the payment limits, cost, utilization, and other factors that affect Medicaid reimbursement to THCs. The THC may request a change in the quarterly payment through the MDHHS HCRD.

8.2 INITIAL RECONCILIATION AND SETTLEMENT

An annual reconciliation, if applicable, ensures that reimbursement is made according to the payment option selected by the THC. The initial reconciliation and settlement is calculated approximately six months after the THC’s fiscal year end. The number of encounters is determined from Medicaid fee-for-service (FFS) and managed care approved claims. Any difference between the THC rate and the amount paid to the THC from FFS and managed care payments, other insurance and quarterly payments is paid to or recovered from the THC. Future quarterly payments are adjusted based on the information in the initial reconciliation.

8.3 FINAL RECONCILIATION AND SETTLEMENT

A final reconciliation and settlement is calculated approximately one year after the THC’s fiscal year end. This will allow time for all claims to clear the payment system.

8.4 APPEALS

A Medicaid provider has the right to appeal any adverse action taken by MDHHS unless that adverse action resulted from an action over which MDHHS had no control (e.g., Medicare termination, license revocation). The appeals process is outlined in MDHHS Medicaid Provider Reviews and Hearings rules, Michigan Administrative Code R400.3402 through R400.3425, amended, and filed with the Secretary of State on May 19, 2016. Any questions regarding this appeal process should be directed to the Michigan Office of Administrative Hearings and Rules (MOAHR). (Refer to the Directory Appendix for contact information.)
SECTION 9 – ALTERNATIVE PAYMENT METHODOLOGY FOR PRESCRIPTIONS

All prescriptions will be reimbursed at the IHS per visit outpatient AIR determined annually by CMS and published in the Federal Register. Reimbursement at the AIR will be allowed for each prescription provided to Medicaid and Healthy Michigan Plan beneficiaries served at a THC or Tribal FQHC pharmacy. The AIR applies to encounters for both native and non-native beneficiaries.

9.1 ENCOUNTERS

There is no limit on the number of prescription encounters that may be reimbursed in a single day, and each prescription constitutes a separate encounter. The encounter rate includes dispensing services and drug costs. All THC and Tribal FQHC pharmacies are paid the encounter rate by Michigan Medicaid regardless of their method of purchasing. All drugs on the Michigan Pharmaceutical Product List (MPPL) and drugs with Medicaid prior authorization will be reimbursed the AIR. No drugs will be excluded from the AIR except for drugs on the Children’s Special Health Care Services (CSHCS) drug list. All THCs and Tribal FQHC pharmacies must have a mechanism to dispense all necessary medications and, if a medication is not available, pharmacies must coordinate and transfer the prescription to a local pharmacy that carries the drug to minimize any disruption to the beneficiary. All other existing Medicaid policies and coverage limitations apply.

9.2 QUARTERLY PAYMENTS

MDHHS will adjudicate and reimburse the AIR for Medicaid FFS claims and cost-settle Medicaid Health Plan (MHP) and Integrated Care Organization (ICO) prescription encounters at an agreed upon frequency. A cost settlement payment is based on an estimate of the difference between (1) the AIR and (2) the amount the Tribal 638 facility receives for managed care encounters and third-party payments (including Medicare Part B covered drugs). Medicare Part D covered drugs will be excluded from AIR reimbursement. (Refer to the Coordination of Benefits Chapter for information on Medicare Part D coverage.)

When payment determination is made, correspondence will be sent to the THC or Tribal FQHC with overall reimbursement and the non-federal match due. If the THC or Tribal FQHC disagrees with the amount, the facility may request reconsideration within 14 calendar days of the date of the correspondence. Requests must be supported with sufficient details and examples for MDHHS to render a determination. (Refer to the Appeals subsection of this chapter for information on appealing an adverse action.)
URGENT CARE CENTERS

TABLE OF CONTENTS

Section 1 – General Information........................................................................................................ 1
  1.1 Staff Credentials ..................................................................................................................... 1
  1.2 Hours of Operation.................................................................................................................. 1
Section 2 - Covered Services............................................................................................................. 2
Section 3 – Provider Enrollment [Changes Made 4/1/23] .............................................................. 3
  3.1 NPI Edits ................................................................................................................................ 3
Section 4 – Billing & Reimbursement ............................................................................................... 4
  4.1 Copay Requirements ............................................................................................................... 4
SECTION 1 – GENERAL INFORMATION

An Urgent Care Center (UCC) is a medical clinic or office, not located in a hospital emergency department, whose purpose is to provide unscheduled diagnosis and treatment of illnesses for ambulatory beneficiaries requiring immediate medical attention for non-life-threatening conditions. It is expected that UCCs will provide access to a place of service (POS) more appropriate than a hospital emergency department for addressing non-emergency medical needs when a beneficiary’s primary care provider (PCP) is not available.

1.1 STAFF CREDENTIALS

The UCC medical director must be a Michigan-licensed physician. The UCC medical director is responsible for the medical management of the UCC. All Medicaid-covered physician services must be performed by the physician, the physician’s employee, or an employee of the same legal entity that employs the physician under the physician’s delegation and supervision. Only persons currently licensed/certified in an appropriate health occupation/profession (e.g., physician assistant, nurse practitioner), as authorized by Public Act 368 of 1978 as amended, may provide direct patient care under the delegation and supervision of a physician when the physician is not physically present on the premises.

1.2 HOURS OF OPERATION

UCCs must be open seven days a week, and include evening hours, weekends and holidays. Hours of operation must be posted in the facility. UCCs must accept walk-in patients of all ages during all hours the facility is open to see patients.
SECTION 2 - COVERED SERVICES

Unscheduled, non-emergency, medically necessary services that are a non-life threatening condition or injury or illness that can be treated appropriately in a UCC are Medicaid covered services.

Michigan Department of Health and Human Services (MDHHS) covered services are based on the level of care that can be appropriately rendered in an urgent care place of service.

MDHHS will not cover separate facility charges.

Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.

All facilities must provide clinical documentation for services rendered and complete a discharge summary which must be sent to the appropriate PCP. If a beneficiary does not have a PCP, the facility must document assistance with arranging a medical home for follow-up care.
SECTION 3 – PROVIDER ENROLLMENT [CHANGES MADE 4/1/23]

Providers must be enrolled with Medicaid and have a valid Type 2 (Organization) (revised 4/1/23) National Provider Identifier (NPI) for MDHHS claim adjudication.

Claims must also include the appropriate Type 1 (Individual) NPI of the specific provider performing the service(s) as the rendering provider. A valid MDHHS-enrolled rendering provider number is required for claim adjudication. Providers must not enter a Type 2 (Organization) NPI as the rendering provider. The Organization (revised 4/1/23) NPI must be reported as the billing provider.

3.1 NPI Edits

MDHHS NPI claim editing will be applied to attending, billing, referring, rendering and supervising providers, as applicable. A claim cannot be paid if the NPI is missing or the reported NPI is invalid as it does not check digit and/or correctly crosswalk to the Provider Enrollment files for these provider loops or fields.
SECTION 4 — BILLING & REIMBURSEMENT

UCC providers must follow uniform billing guidelines using the professional CMS-1500 claim format or electronic Health Care Claim Professional (837) ASC X12N Version 5010 information. All providers are encouraged to bill electronically. Refer to the Billing & Reimbursement for Professionals chapter for additional CMS-1500 or 837P Professional claims submission and billing information.

If ancillary services are provided by UCC staff using hospital-owned equipment (i.e., done in the same building where urgent care is located), the hospital may bill that service on the institutional claim format for the technical service.

Reimbursement is based on the practitioner fee schedule. Services performed in a UCC are reimbursed at the non-facility rate based on the non-facility relative value unit (RVU). MDHHS utilizes the Medicaid National Correct Coding Initiative (NCCI) coding policies and edits as developed by the Centers for Medicare & Medicaid Services (CMS) to promote national correct coding methodologies. To avoid duplicate payments, UCC providers must submit only one non-facility service claim per beneficiary per DOS. Separate physician service claims should not be submitted.

4.1 COPAY REQUIREMENTS

A copayment may be required for office evaluation and management (E&M) visits for beneficiaries age 21 years and older.

Refer to the General Information for Providers Chapter for information about copayments. Current copayment amounts are listed on the MDHHS website. (Refer to the Directory Appendix for website information.)

 3.9 Prosthetic Eyes ....................................................................................... 15
SECTION 1 – GENERAL GUIDELINES AND REQUIREMENTS

The Michigan Department of Health and Human Services (MDHHS) contracts for the volume purchase of frames and lenses from an optical laboratory, referred to in this chapter as the contractor.

Vision providers (e.g., opticians, dispensing ophthalmologists, optometrists) must order frames and lenses from the contractor. A list of lenses is available in the MDHHS Vision Services Fee Schedule located on the MDHHS website. A list of available frames is available from the contractor, currently Classic Optical Laboratories. (Refer to the Directory Appendix for contact information.)

Orders placed with the contractor must be postmarked no later than 30 days after the date of order. If orders are placed beyond the 30 days, the contractor returns the order to the provider, who must explain to Medicaid why submission was delayed and request an exception from the time limit.

Procurement of contact lenses, low vision aids, and prosthetic eyes must be obtained from the vision provider's own source and are subject to prior authorization (PA) requirements as described in this chapter.

1.1 BENEFICIARY ELIGIBILITY AND COPAYMENTS

Providers must verify beneficiary eligibility prior to rendering services or ordering materials. If a beneficiary’s eligibility expires prior to the date the material is delivered, reimbursement is made only if the beneficiary was eligible on the date the material was ordered by the vision provider and the date of order is used when billing. (Refer to the Beneficiary Eligibility Chapter of this manual for additional information.)

A copayment may be required for Medicaid beneficiaries age 21 and older for each separately reimbursable:

- Ophthalmological service performed by an optometrist or ophthalmologist; and
- Dispensing service for glasses or contact lenses billed by dispensing ophthalmologists or optometrists.

Refer to the General Information for Providers Chapter for information about copayments. Current copayment amounts are listed on the MDHHS website. (Refer to the Directory Appendix for website information.)

1.2 PRIOR AUTHORIZATION

Some vision services and materials require PA before they can be rendered. Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.

The Vision Services Approval/Order Form (DCH-0893) is used to obtain PA. A copy of the DCH-0893 and completion instructions can be found in the Forms Appendix of this manual. Complete and mail or fax the DCH-0893 to the MDHHS Program Review Division. (Refer to the Directory Appendix for contact information.) PA requests must be postmarked no later than 30 calendar days after the date of order. If
beyond the 30 days, the provider must include a detailed explanation of why the submission was delayed.

When requesting prior approval, providers should make a photocopy of the completed form for the beneficiary file. Upon completion of the PA process, MDHHS returns one copy of the DCH-0893 to the provider.

An electronic copy of the DCH-0893 is available on the MDHHS website. (Refer to the Directory Appendix for website information.)

**1.3 CODING OF SERVICES**

The American Medical Association’s (AMA) Current Procedural Terminology (CPT) is the national coding standard for health care professional services. Vision providers must use CPT codes in effect on the date of service to describe and identify the services and procedures performed. Optometrists must be Therapeutic Pharmaceutical Agent certified in order to use many of these codes. All prescriptions or prescription orders must comply with state and federal laws. (Refer to the Pharmacy Chapter of this manual for additional information.)

Providers must use the International Classification of Diseases (ICD) for diagnostic coding of diseases, injuries, and conditions. Codes must be used at the highest level of specificity.

Healthcare Common Procedure Coding System (HCPCS) is a system developed by the Centers for Medicare & Medicaid Services (CMS) to report materials, supplies, and certain services not covered by the CPT codes. HCPCS codes are to be used when applicable.

**1.4 MEDICARE**

All vision services are subject to editing for Medicare coverage. MDHHS reimburses vision providers for coinsurance and deductible amounts on Medicare-approved claims up to Medicaid’s reimbursement limit.

If a service requires PA by Medicaid and is covered by Medicare, vision providers do not have to obtain PA, nor does the vision provider have to obtain lenses or frames through the volume purchase program.

(Refer to the Billing & Reimbursement for Professionals Chapter of this manual for additional information.)

**1.5 CONTRACTOR GUARANTEE**

Frames and lenses furnished by the contractor are guaranteed for 90 days. If any material is found to be unsatisfactory due to contractor error or defective workmanship or materials, the materials and work order form should be returned to the contractor. The contractor is required to correct, adjust, or replace the materials.

If the vision provider supplies the contractor with incorrect specifications that results in eyeglasses being fabricated which the beneficiary cannot use, the vision provider is responsible for payment to the contractor for the remake. The contractor may not charge the vision provider more than what they would charge MDHHS for the remake. MDHHS does not pay for the remake (e.g., eyeglasses, lenses, or frames) due to vision provider error.
1.6 Complaint Process

To resolve problems (such as an overdue shipment, error in an order, or defective workmanship), vision providers should first contact the contractor.

If the lenses and/or frames are not received from the contractor within 21 days from the date they were ordered, vision providers are responsible for contacting the contractor to determine the cause of the delay.

If difficulties are encountered with the contractor in resolving a problem, vision providers should call the Vision Contract Manager. (Refer to the Directory Appendix for contact information.) Vision providers must be prepared to report the beneficiary’s name and Medicaid ID number, and a detailed explanation of the problem(s) they have experienced.

MDHHS reviews the complaint, takes necessary action to correct the problem, and notifies the vision provider of the resolution.
SECTION 2 – DIOPTER CRITERIA

2.1 INITIAL LENSES

Initial lenses are considered to be the first prescription lenses ever worn by a person regardless of how they were obtained (e.g., through Medicaid, other insurance, or private pay). Initial lenses are a Medicaid benefit and do not require PA if the following minimum diopter criteria are met:

<table>
<thead>
<tr>
<th>Age Group 42 Years and Younger</th>
<th>Age Group 43 Years and Older</th>
</tr>
</thead>
<tbody>
<tr>
<td>- 0.50D myopia</td>
<td>- 0.75D anisometropia</td>
</tr>
<tr>
<td>- 0.50D astigmatism</td>
<td>- 0.75D hyperopia</td>
</tr>
</tbody>
</table>

2.2 SUBSEQUENT LENSES

Regardless of age group, subsequent lenses are medically necessary lenses that are provided after initial lenses. Subsequent lenses are a Medicaid benefit and do not require PA if there is a change in the refractive error of 0.75D or more in the meridian of greatest change, or a change in the cylinder axis of at least 10 degrees for cylinders of 1.00D or more. These lenses must also meet minimum dioptic criteria as specified above. The change need only be present in one eye.

The following example illustrates how this requirement is assessed for a new correction (+2.75-0.75 ax 092) and a previous correction (+2.25-0.25 ax 090). The dioptic power in each meridian can be portrayed in the form of cross diagrams.

```
<table>
<thead>
<tr>
<th>New Correction:</th>
<th>Previous Correction:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sphere Power</td>
<td>Sphere Power</td>

</tr>
<tr>
<td>+2.00</td>
<td>+2.50</td>
</tr>
</tbody>
</table>

This is an example of where the change in dioptic power for subsequent lenses has not been met. Note that the resultant powers in the vertical meridians of the "new" and "previous" correction are +2.75 and +2.25 respectively. There is only a 0.50D change in the vertical meridian and no change in the horizontal.

For periods greater than 24 months from the date of the previous prescription, subsequent lenses may be ordered for diopter changes less than those specified above.
SECTION 3 – SERVICES

This section provides information on both Medicaid covered and noncovered services.

3.1 DIAGNOSTIC SERVICES

In providing services, it is the responsibility of the optometrist or ophthalmologist to determine that the services are medically necessary, appropriate, and within the scope of current medical practice and Medicaid limitations. The prescribing optometrist or ophthalmologist is held responsible if he orders excessive or unnecessary services, regardless of who actually renders the services. The prescribing optometrist or ophthalmologist may be subject to corrective action related to these services, including recovery of funds.

Documentation Guidelines for Evaluation and Management Services, as described in the latest version developed jointly by CMS and the AMA, must be adhered to when using the CPT/HCPCS procedure codes.

<table>
<thead>
<tr>
<th>Eye Examinations</th>
</tr>
</thead>
<tbody>
<tr>
<td>▪ A routine eye examination once every two years is a Medicaid benefit and does not require PA. Examinations include, but are not limited to, case history, determination of visual acuity (each eye), ophthalmoscopy, biomicroscopy, ocular motility, tonometry, refraction, diagnosis, treatment program and disposition. (Use appropriate CPT/HCPCS procedure codes for routine eye exam and applicable ICD diagnosis codes.)</td>
</tr>
<tr>
<td>▪ Nonroutine eye examinations are a Medicaid benefit for the purpose of evaluation and treatment of chronic, acute, or sudden onset of abnormal ocular conditions. (Use appropriate CPT/HCPCS procedure codes.)</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Glaucoma Screenings</th>
</tr>
</thead>
<tbody>
<tr>
<td>Glaucoma screenings are covered without PA on an annual basis for beneficiaries who:</td>
</tr>
<tr>
<td>▪ Have no ocular complaints or prior history of glaucoma and who have diabetes;</td>
</tr>
<tr>
<td>▪ Have a family history of glaucoma; or</td>
</tr>
<tr>
<td>▪ Are African-American, age 50 or older.</td>
</tr>
<tr>
<td>This screening entails a dilated eye examination, tonometry, and direct ophthalmoscopy or slit lamp examination. If this screening is provided as part of another billable service, separate reimbursement for this screening is not allowed. Use the appropriate CPT/HCPCS procedure code for glaucoma screening and the applicable ICD diagnosis code.</td>
</tr>
<tr>
<td>If the beneficiary presents with a visual or ocular complaint, the glaucoma screening code should not be used. The procedure code which best describes the visit should be selected from the CPT Evaluation and Management (E/M) codes or General Ophthalmological procedure codes.</td>
</tr>
</tbody>
</table>
3.2 DISPENSING SERVICES

Dispensing services are a Medicaid benefit and do not require PA. Vision providers may bill a dispensing fee for dispensing prescription lenses, prescription lenses with frames, or replacing a complete frame.

Reimbursement for the dispensing service includes the vision provider’s services in selecting, ordering, verifying, and aligning/fitting of eyeglasses as described above. Routine follow-up and post-prescription visits (e.g., for minor adjustments) are considered part of the dispensing service and are not separately reimbursable.

3.3 NURSING FACILITY BENEFICIARIES

Covered and noncovered vision services, as well as PA requirements, apply to vision services provided to beneficiaries residing in a nursing facility (NF).

Performance of vision services (except replacement of a frame part for eyeglass repair) must be upon the written request of the beneficiary, a member of the beneficiary’s family, or other beneficiary representative and upon the written order of the beneficiary’s attending physician (MD, DO) prior to the date of the vision provider’s visit.

If service is provided in the NF, a copy of the request and written order must be retained by the facility as part of the beneficiary’s record.

Vision services are not considered a part of the facility’s per diem rate. The vision provider or contractor must bill MDHHS for vision services rendered.

No additional payments are made to vision providers for a visit(s) to the NF. Appropriate procedure codes must be utilized.

3.4 OPHTHALMIC FRAMES AND LENSES

A complete pair of eyeglasses is a Medicaid benefit and does not require PA when:

- The eyeglasses being prescribed are the beneficiary’s first pair of eyeglasses ever worn. These eyeglasses are considered to be initial eyeglasses and must meet minimum diopter criteria for initial lenses.
- The beneficiary’s correction meets diopter criteria for subsequent lenses and the frames are unusable.
- A previously used frame requires oversized lenses. (Oversized lenses are not a Medicaid benefit, therefore, a complete pair of eyeglasses must be ordered.)
- Prescription lenses remain usable, but the original frame is broken beyond repair and the original frame is not a Medicaid benefit.
- The beneficiary’s correction meets diopter criteria for subsequent lenses and the frames remain usable, but the vision provider or beneficiary elects not to send the frames to the contractor or the contractor feels that the previously used frames will break or otherwise be damaged during lens insertion.
The beneficiary’s eyeglasses have been lost, stolen, or broken beyond repair and the number of replacements have not exceeded Medicaid limits which are:

- For beneficiaries age 21 and over, one pair of replacement eyeglasses per year.
- For beneficiaries under age 21, two pair of replacement eyeglasses per year.

One year is defined as 365 days from the date the first pair of eyeglasses (initial or subsequent) was ordered.

The DCH-0893 must be used when ordering frames and/or lenses. A copy of the form and instructions for completing the form are available in the Forms Appendix of this manual and on the MDHHS website. (Refer to the Directory Appendix for website information.) These orders must be sent directly to the contractor. Orders may be mailed, faxed, or entered directly online at the contractor's website. (Refer to the Directory Appendix for contact information. The contractor must be contacted directly to register for on-line access.) The contractor fills the vision provider's order in accordance with the lens and frame specifications indicated on the DCH-0893. The order form is returned to the provider if the eligibility information is not completed.

Procedures identified as requiring PA must first receive approval from the MDHHS Program Review Division. (Refer to the Prior Authorization subsection in this chapter for instructions on obtaining PA.)

The contractor monitors orders to assure that Medicaid replacement limitations, diopter criteria, and PA requirements are being maintained. The contractor returns an order if the order exceeds the replacement limits, does not meet diopter criteria, or requires PA.

The contractor bills MDHHS for the frames and/or lenses ordered by vision providers. Vision providers subsequently bill for a dispensing service for dispensing the frames and/or lenses.

If the beneficiary has other insurance that covers frames and/or lenses, the material may still be obtained through the contractor. (Refer to the Billing & Reimbursement for Professionals and the Coordination of Benefits Chapters of this manual when billing for the dispensing service if other insurance is involved.)

### 3.4.A. LENSES

Lenses must conform to the latest edition of the *American National Standard Recommendations for Prescription Ophthalmic Lenses*.

Plastic and glass lenses are a Medicaid benefit. Refer to the Additional Code/Coverage Resource Materials subsection of the General Information for Providers Chapter for additional information regarding coverage parameters.

- Plastic and glass bifocals are available in Round 22, FT-28, FT-35, and Executive style.
- Plastic and glass trifocals are available in FT-7x28 segments.
Photochromic, Tinted and Dyed Lenses

PA is required for these lens features. Appropriate documentation of medical necessity must be attached to the DCH-0893 when submitted to the MDHHS Program Review Division.

Polycarbonate Lenses

For beneficiaries under age 21, polycarbonate lenses may be inserted into any covered Medicaid frame and do not require PA. For beneficiaries 21 and over, polycarbonate lenses are a Medicaid benefit when lenses are inserted into a safety frame marked "Z 87" or "Z 87-2" or if prior authorized.

Oversized lenses, no-line, or progressive style multi-focals are not Medicaid benefits.

### 3.4.B. OPHTHALMIC FRAMES

Frames must conform to the latest edition of the *American National Standard Requirements for the Dress Ophthalmic Frames*.

Ophthalmic frame styles that are a Medicaid benefit are available from the contractor. Vision providers may order sample frames directly from the contractor, and a list of available frames is available from the contractor. (Refer to the Directory Appendix for contact information.) The vision provider is charged for sample frames at the same price stated in the current contract. Neither the provider nor the contractor may charge Medicaid for sample frames.

Vision providers must offer a beneficiary the opportunity to select a frame from a minimum of 100 authorized frame samples. Additionally, a vision provider must offer beneficiaries the contractor's brochure of frames which includes all available styles so beneficiaries can select from more than the vision provider's inventory of sample frames. A vision provider who fails to comply with these requirements is subject to termination of enrollment in Medicaid.

If a frame manufacturer discontinues production of a frame that is listed as a benefit, vision providers may utilize the discontinued frame from their sample kit. If lenses are required, they must be ordered from the contractor. Submit the DCH-0893 to the MDHHS Program Review Division for approval. (Refer to the Directory Appendix for contact information.)

Safety Frames

Safety frames are a Medicaid benefit. A list of authorized safety frame styles is available from the contractor. These frames conform to ANSI Z87.1-2003 standards, and samples can be purchased from the contractor at contract prices. Only polycarbonate lenses of 2 millimeter minimum thickness shall be used in frames marked "Z 87" or "Z 87-2".

Frame Repairs

Frame repairs (e.g., aligning temples, insertion of screws, adjusting frames) are not a separately reimbursable service and cannot be billed.
3.4.C. **SUBSEQUENT LENSES PLACED IN PREVIOUSLY USED FRAMES**

Subsequent lenses that are to be placed in a beneficiary’s previously used frame are a Medicaid benefit and do not require PA. Previously used frames are defined as ophthalmic frames in which the beneficiary has had previous corrective lenses incorporated and which were previously worn.

---

**All noncontract previously used frames require PA.**

To order subsequent lenses for insertion into a previously used frame, vision providers must complete the DCH-0893, indicating all information necessary for proper fabrication. Vision providers have the option of having the contractor insert the lenses, in which case the provider must supply the previously used frame to the contractor, or inserting the newly fabricated lenses into the frames in their office.

If the previously used frames are sent to the contractor for lens insertion, the contractor is required to fabricate the lenses and mail the frames and lenses to the vision provider within nine working days after receiving the frames. If a special prescription requires more than nine working days to complete, the contractor must notify the vision provider. If the provider does not receive the materials within three weeks from the date the order was sent, he should contact the contractor.

If the vision provider or beneficiary elects not to send the previously used frames as might be requested by the contractor, or if the contractor feels that the previously used frames may break or otherwise be damaged during lens insertion, the vision provider is requested to order a complete pair of eyeglasses.

If frames are sent to the contractor, either at the contractor’s request or the vision provider’s preference, the vision provider is responsible for paying the postage necessary to ship the frames. Also, vision providers are responsible for paying for frames lost or damaged in transit.

---

**If a previously used frame requires lenses that are not a Medicaid benefit (e.g., oversize lenses), a complete pair of eyeglasses that are a benefit must be ordered.**
### 3.4.D. Replacement or Repair

| Eyeglasses | Eyeglass repairs are a separately reimbursed service when the repair is considered major (e.g., reinsertion of a lens, repair of a sheared screw, shortening or replacing temples, etc.) and when the glasses are deemed repairable. Minor repairs (e.g., insertion of screw, adjustments of nose pads or temples, etc.) that occur as a result of the beneficiary’s typical wear patterns are not separately reimbursed. The appropriate HCPCS code(s) must be reported for the component part that is being replaced. The reason for the repair must be documented in the beneficiary’s file and made available upon request.

If a provider determines that eyeglasses are repairable, the provider must guarantee the repair for a minimum of 30 days. Subsequent repair for the same issue within 30 days is the responsibility of the provider. If replacement eyeglasses are needed within the 30 day time frame following a repair, the provider must return the reimbursement received for the repair to MDHHS.

Eyeglasses that are broken beyond repair may be eligible for replacement by the contractor. Eyeglass replacement requires prior authorization if replacement limits have been exceeded. |
|---|---|
| Lenses Only | Replacement of a corrective lens(es), without frames, for one that is damaged or broken is a benefit if that lens(es) is covered by Medicaid and the replacement limits have not been exceeded. A replacement lens(es) must be an identical copy of the damaged or broken lens. It does not require PA. Vision providers must order the lens(es) directly from the contractor.

For periods greater than 24 months from the date of the previous prescription when ordering subsequent lenses or complete eyeglasses, see Subsequent Lenses subsection above for appropriate diopter criteria. |
| Frames Only | Replacement of a complete frame (front and temples) is a Medicaid benefit only when the original frame is broken beyond repair, the prescription lenses remain usable, and the replacement limits have not been exceeded. The replacement frame must be an identical replacement. If an identical frame is not listed as a Medicaid benefit, the beneficiary must select a frame that is a covered benefit.

The contractor bills Medicaid for the complete frame. The vision provider inserts the lenses into the frame and bills Medicaid for the dispensing service. |

### 3.4.E. Two Pairs of Eyeglasses

Two pairs of single vision eyeglasses (one for near visual tasks and the other for distance visual tasks) are a Medicaid benefit in either of the following instances:

- When the beneficiary has clearly demonstrated the inability to adjust to bifocals after a reasonable trial period.
- When the beneficiary's physical condition does not allow bifocal usage.

PA is required when requesting two pairs of eyeglasses. Appropriate documentation must be attached to the DCH-0893 and submitted to the MDHHS Program Review Division.
Providing both multi-focal and single vision eyeglasses for interchangeable usage is not a Medicaid benefit.

### 3.4.F. NONDELIVERABLE EYEGLASSES

If a beneficiary fails to return to the vision provider for dispensing of eyeglasses, the vision provider should make every effort to locate the beneficiary, including contacting the local MDHHS office in the beneficiary’s area.

If the beneficiary still cannot be located, the eyeglasses should be sent to the local MDHHS office (or local nonprofit agency if the MDHHS office refuses to accept them) in the beneficiary’s area within 90 days of placing the order with the contractor. Do not send the nondelivered lenses and/or frames to MDHHS unless requested to do so by MDHHS.

To bill for dispensing, the provider must use the date of order for the lenses and/or frames.

Medicaid does not reimburse vision providers for postage and handling.

### 3.4.G. EYEGLASS CASE

One eyeglass case for every complete pair of eyeglasses ordered is a Medicaid benefit and must be provided by the contractor. Vision providers cannot bill for eyeglass cases.

### 3.5 LOW VISION SERVICES

<table>
<thead>
<tr>
<th>Evaluation</th>
</tr>
</thead>
<tbody>
<tr>
<td>A low vision evaluation is a benefit when the beneficiary presents with moderate visual impairment, severe visual impairment, or profound visual impairment. Under these conditions, a low vision evaluation does not require PA. This evaluation includes, but is not limited to, a detailed case history, effectiveness of any low vision aids in use, visual acuity in each eye with best spectacle correction, steadiness of fixation, assessment of aids required for distance vision and near vision, evaluation of any supplemental aids, evaluation of therapeutic filters, development of treatment, counseling of beneficiary, and advice to family (if appropriate). The CPT E/M or General Ophthalmological procedure code which best describes this service should be utilized.</td>
</tr>
</tbody>
</table>
Aids

High add bifocals do not require PA. For high add bifocals, complete the DCH-0893 and submit to the contractor.

The prescription and fitting of low vision optical aids (such as telescopes, microscopes, and certain other low vision aids) require PA. Only basic and essential low vision aids are a Medicaid benefit.

The Provision of Low Vision Services and Aids Support Documentation (MSA-0891) form outlines the information required when requesting PA for low vision services and aids. A sample of this form is provided in the Forms Appendix. It can also be obtained through the MDHHS website. (Refer to the Directory Appendix for website information.)

This form must be attached to DCH-0893 and submitted as part of the PA process. (Refer to the Prior Authorization subsection above.)

Reimbursement for a low vision aid is based on the manufacturer’s charge for the aid plus a professional fee. Procurement of the low vision aid is done through the vision provider’s own source. The professional fee includes procurement, verification, and fitting of the aid.

Only an enrolled optometrist or a dispensing ophthalmologist can bill for a low vision aid.

Rehabilitative Services

Low vision rehabilitative services include instructions, training, and assistance to the beneficiary in the most effective use of the low vision aid. Documentation for these services should be included when requesting the low vision aid.

3.6 CONTACT LENSES

3.6.A. EVALUATION

A comprehensive contact lens evaluation is a Medicaid benefit when the beneficiary presents with one of the following conditions (use appropriate HCPCS comprehensive contact lens evaluation code):

- Aniridia
- Anisometropia or Antimetropia (of two diopters or greater that results in Aniseikonia)
- Aphakia
- Irregular cornea
- Keratoconus (if vision cannot be improved to 20/40 or better with eyeglasses)
- Other conditions which have no alternative treatment (e.g., Aniseikonia with documentation and severe Keratoconjunctivitis sicca)

3.6.B. PRESCRIPTION AND FITTING

The prescription and fitting of contact lenses is a Medicaid benefit and requires PA, except for beneficiaries who are under six years of age with a diagnosis of aphakia.
3.6.B.1. PRESCRIPTION

The prescription for contact lenses requires the complete description of contact lens specifications. The following must be included on a prescription for contact lenses:

- complete description of the contact lens(es) parameters
- material of the contact lens(es)
- manufacturer of the contact lens(es)
- material discard and replacement schedule
- number of lenses required to provide a one-year supply
- prescription expiration date

3.6.B.2. FITTING

The fitting of the contact lens(es) must include:

- determination of appropriate initial contact lens parameters based on clinical observation, and measurements of the eye with or without a trial (sample) contact lens.
- a trial or adaption period of one to three months, including a fitting warranty that provides for adjustments in the contact lens parameters either by exchange or by modification of existing materials.

**Note:** Certain custom contact lens designs may not be warranted by the manufacturer. This type of custom contact lens design will be considered on a case-by-case basis. The provider must provide a detailed explanation of need, initial cost, and potential re-fitting cost.

- instruction of proper insertion, removal, disinfection, and care of the contact lens(es).
- initial supply of contact lenses, storage case, and solutions sufficient to last until the fitting is complete.

3.6.C. REPLACEMENT AND SUPPLIES

Procurement of contact lenses is to be done through the vision provider’s own source.

The Documentation of Medical Necessity for the Provision of Contact Lenses form (MSA-0892) outlines the information required when requesting contact lens PA. A sample of this form is provided in the Forms Appendix and can also be obtained through the MDHHS website. (Refer to the Directory Appendix for website information.)

This form must be attached to the Vision Services Approval/Order form (DCH-0893) and submitted to MDHHS as part of the PA process. (Refer to the Prior Authorization subsection in this chapter for additional information.)

Requests for contact lens replacements due to loss or damage will require PA and will be reviewed on an individual basis.
Except as previously indicated, contact lens supplies (e.g., wetting and cleaning solutions, carrying cases) are not Medicaid benefits.

### 3.7 Strabismus and Amblyopia Examination

Strabismus and amblyopia examinations (sensorimotor examination) are Medicaid benefits and do not require PA.

### 3.8 Orthoptics and Pleoptics Training

<table>
<thead>
<tr>
<th>Orthoptics and Pleoptics Training</th>
</tr>
</thead>
<tbody>
<tr>
<td>Orthoptics and Pleoptics (O &amp; P) training is a Medicaid benefit only when there is a diagnosis of one of the following conditions:</td>
</tr>
<tr>
<td>▪ Amblyopia</td>
</tr>
<tr>
<td>▪ Esotropia</td>
</tr>
<tr>
<td>▪ Exotropia</td>
</tr>
<tr>
<td>▪ Heterotropia</td>
</tr>
<tr>
<td>▪ Strabismus</td>
</tr>
<tr>
<td>▪ Ocular Motor and Fusion Dysfunction</td>
</tr>
<tr>
<td>PA is not required for O &amp; P training for beneficiaries under age 21. PA is required for beneficiaries age 21 and older for O &amp; P training.</td>
</tr>
</tbody>
</table>

When requesting PA, the following documentation must be attached to the DCH-0893 and submitted to the Program Review Division:

- Visual acuity, each eye, with best spectacle correction;
- Magnitude and direction of the subjective and objective angle of strabismus at distance and near;
- Refractive error of each eye;
- Degree of fusion;
- History of strabismus, including onset, duration, prior treatment; and
- Other relevant information.

In addition to the above documentation, a detailed plan indicating the training procedures and equipment to be employed, frequency of office visits, home training aids, and prognosis must be attached to the DCH-0893. This training plan may be authorized for a period of up to three calendar months.

O & P training is limited to a maximum of 13 visits within the first three calendar months of therapy without PA. PA will be required for additional necessary visits.

If continued training beyond the period that was authorized is necessary, a new request for PA must be submitted with the following information:

- Update of the above-listed items;
- Report of the results of previous training; and
- Indication for further treatment with a detailed plan.
**Orthoptic Training Aids**

Orthoptic training aids are a Medicaid benefit when incorporated in an orthoptics or pleoptics training plan (as described above) and require PA. The following documentation must be included with the vision provider's detailed plan when requesting the purchase of an aid:

- How the aid is to be used;
- Complete description of the aid;
- Name of the manufacturer; and
- Manufacturer’s charge.

Reimbursement for a training aid is based on the manufacturer's charge to the vision provider plus a professional fee. The professional fee includes procurement, instruction in use, and fitting when applicable. Procurement of the training aid is done through the vision provider’s own source.

Purchase of orthoptic training aids must be billed only by an enrolled optometrist or dispensing ophthalmologist.

### 3.9 PROSTHETIC EYES

A prosthetic eye (plastic/custom) or shell is a Medicaid benefit and does not require PA.

For an enlargement or reduction of an ocular prosthesis, PA is required. PA is also required when requesting a prosthesis other than a plastic/custom eye. When requesting PA, the DCH-0893 should be completed, with documentation attached, and submitted to the MDHHS Program Review Division. Procurement of the prosthesis should be obtained from the provider’s own source.

Reimbursement for a prosthesis is made on a per case basis which includes, but is not limited to:

- Trial fitting
- Supply of prosthesis
- Solutions
- Training in insertion and removal
- Instruction in care
- Subsequent office visits to achieve maximum wearing time and optimal cosmetic fit
- Any necessary modification during the adaptation period of six months

DIRECTORY APPENDIX

This directory provides contact information referenced in the various chapters of the Medicaid Provider Manual, and is divided into the following topic areas:

- Provider Assistance
- Beneficiary Assistance
- Eligibility Verification
- Prior Authorization
- Billing Resources
- Claim Submission/Payment
- Policy/Forms/Publications
- Appeals
- Health Plan Information
- Healthy Michigan Plan
- Provider Resources
- Brain Injury Services
- Community Transition Services
- Doula Services Resources
- Home Help
- Hospice Resources
- Maternal-Child Educational Resources
- Maternal Infant Health Program Resources
- MH/SA Resources
- MI Choice Waiver Resources
- MI Health Link
- Non-Emergency Medical Transportation
- Nursing Facility Level of Care Determination
- Nursing Facility Resources
- Pharmacy Resources
- Private Duty Nursing Resources
- School Based Services
- Telemedicine
- Vision Services Resources
- Reporting Fraud, Abuse, or Misuse of Services
- Other Health Care Resources/Programs
- Miscellaneous Contact Information

**GLOSSARY APPENDIX**

<table>
<thead>
<tr>
<th>Glossary Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Acquisition Costs</strong></td>
<td>The manufacturer’s invoice price, minus primary discount, plus a percentage over cost, plus actual shipping costs. Acquisition cost does not include handling fees. (For the specific percentage over cost, refer to the archived policy bulletin MSA 09-62 posted on the MDHHS website.)</td>
</tr>
<tr>
<td><strong>Ambulatory Payment Classification (APC)</strong></td>
<td>The Outpatient Prospective Payment System (OPPS) Ambulatory Payment Classification (APC) is a reimbursement method representing groups of outpatient visits according to clinical characteristics and costs associated with the diagnoses and the procedures rendered known as APCs.</td>
</tr>
<tr>
<td><strong>Borderland</strong></td>
<td>A county that is contiguous to the Michigan border and includes several major cities beyond the contiguous county lines.</td>
</tr>
<tr>
<td><strong>Durable Medical Equipment (DME)</strong></td>
<td>Equipment that can withstand repeated use, is reusable or removable, is suitable for use in any non-institutional setting in which normal life activities take place, is primarily and customarily used to serve a medical purpose and is generally not useful to an individual in the absence of illness, injury or disability.</td>
</tr>
<tr>
<td><strong>The Emergency Medical Treatment and Active Labor Act (EMTALA)</strong></td>
<td>42 USC 1395dd, that requires a Hospital to perform a medical screening examination of any individual presenting in its emergency department to determine if an emergency medical condition exists and to stabilize the individual’s medical condition.</td>
</tr>
<tr>
<td><strong>Encounter</strong></td>
<td>A face-to-face contact between a patient and the provider of health care services who exercises independent judgment in the provision of health care services.</td>
</tr>
<tr>
<td><strong>Face-to-Face</strong></td>
<td>An encounter that can be either in person or using telehealth (simultaneous audio and visual technology). <em>(added per bulletin MMP 23-20)</em></td>
</tr>
<tr>
<td><strong>Hospital</strong></td>
<td>Hospital means the licensed entity that executed the Hospital Access Agreement, which has the inpatient capacity necessary to provide covered services.</td>
</tr>
<tr>
<td><strong>Hospital Based Provider (HBP)</strong></td>
<td>A hospital-employed MD, DO, Certified Registered Nurse Anesthetist (CRNA), dentist, podiatrist, optometrist, or nurse-midwife.</td>
</tr>
<tr>
<td><strong>In-Person</strong></td>
<td>An encounter that must be completed with beneficiary and provider physically together in the same location and is not allowed through telehealth. <em>(added per bulletin MMP 23-20)</em></td>
</tr>
<tr>
<td><strong>Medicaid Deductible</strong></td>
<td>Beneficiary must incur medical expenses each month equal to, or in excess of, an amount determined by the local MDHHS worker to qualify for Medicaid. Previously referred to as Medicaid Spend-down.</td>
</tr>
<tr>
<td>Glossary Term</td>
<td>Definition</td>
</tr>
<tr>
<td>---------------------------------------------------</td>
<td>----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Medicaid Health Plan (MHP)</td>
<td>A Medicaid managed care plan that provides medical assistance through the delivery of Covered Services to Beneficiaries and that holds a Comprehensive Health Care Program Medicaid Contract with the State of Michigan.</td>
</tr>
<tr>
<td>Medical Supplies</td>
<td>Health care related items that are required to address an individual’s illness, injury or disability; are consumable, disposable or have a limited life expectancy, cannot withstand repeated use, and are suitable for use in an non-institutional setting in which normal life activities take place. Examples are: hypodermic syringes/needles, ostomy supplies, and dressings necessary for the medical management of the beneficiary.</td>
</tr>
<tr>
<td>Mobility Related Activities of Daily Living (MRADL)</td>
<td>Daily activities (e.g., grooming, dressing, etc.) the beneficiary is capable of performing with the aid of mobility equipment.</td>
</tr>
<tr>
<td>Noncompliance</td>
<td>Failure or refusal to follow instructions related to improving or stabilizing a condition.</td>
</tr>
<tr>
<td>Noncovered Service</td>
<td>A medical or health care service that is:</td>
</tr>
<tr>
<td></td>
<td>- Not covered by Medicaid;</td>
</tr>
<tr>
<td></td>
<td>- Not medically necessary;</td>
</tr>
<tr>
<td></td>
<td>- Not described in a MHP’s Certificate of Coverage;</td>
</tr>
<tr>
<td></td>
<td>- Provided before or after a beneficiary is an Enrollee in a MHP; or</td>
</tr>
<tr>
<td></td>
<td>- Non-emergency services for which the Hospital did not secure PA.</td>
</tr>
<tr>
<td>Nursing Facility</td>
<td>A nursing home, county medical care facility, State Veterans’ Home, or hospital long-term care unit, with Medicaid certification.</td>
</tr>
<tr>
<td>Orthotics</td>
<td>Orthotics assist in correcting or strengthening a congenital or acquired physical anomaly, or malfunctioning portion of the body.</td>
</tr>
<tr>
<td>Outpatient Hospital</td>
<td>A portion of a hospital, which provides diagnostic, therapeutic (both surgical and non-surgical), and rehabilitation services to sick or injured persons who do not require inpatient hospitalization or institutionalization.</td>
</tr>
<tr>
<td>Outpatient Prospective Payment System (OPPS)</td>
<td>A Prospective Payment System (PPS) is a method of reimbursement in which Medicare payment is made based on a predetermined, fixed amount. The payment amount for a particular service is derived based on the classification system of that service (i.e., DRGs for inpatient hospital services, APCs for outpatient hospital services). All services paid under the PPS are classified into groups called Ambulatory Payment Classifications (or APCs). Services in each APC are similar clinically and in terms of the resources they require. A payment rate is established for each APC.</td>
</tr>
<tr>
<td>Physician (MD or DO)</td>
<td>An individual licensed under the Michigan Public Health Code (P.A. 368 of 1978) to engage in the practice of medicine or osteopathic medicine and surgery.</td>
</tr>
<tr>
<td>Glossary Term</td>
<td>Definition</td>
</tr>
<tr>
<td>---------------------------</td>
<td>-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Prosthetics</td>
<td>Prosthetics artificially replace a portion of the body to prevent or correct a physical anomaly or malfunctioning portion of the body.</td>
</tr>
<tr>
<td>Provider</td>
<td>An individual, firm, corporation, association, agency, institution, or other legal entity which is providing, has formerly provided, or has been approved to provide medical assistance to a beneficiary pursuant to the medical assistance program.</td>
</tr>
<tr>
<td>Public Facility</td>
<td>A public facility is defined at one of the following sections of the Michigan Public Health Code (PA 368 of 1978, as amended): Section 333.2413, Section 333.2415, or Section 333.2421.</td>
</tr>
<tr>
<td>Rapid Dispute Resolution Process</td>
<td>The process implemented by MDHHS to administer and resolve claim disputes.</td>
</tr>
<tr>
<td>Readmission</td>
<td>Any admission/hospitalization of a beneficiary within 15 days of a previous discharge, whether the readmission is to the same or different hospital.</td>
</tr>
<tr>
<td>Reference Laboratory</td>
<td>An enrolled laboratory that receives a specimen from another referring laboratory for testing and that actually performs the test.</td>
</tr>
<tr>
<td>Referring Laboratory</td>
<td>A laboratory that receives a specimen to be tested and that refers the specimen to another laboratory for performance of the laboratory test.</td>
</tr>
<tr>
<td>Sanctioned Provider</td>
<td>A provider who has been suspended, terminated or excluded from furnishing, ordering, or prescribing items or services to Medicaid beneficiaries.</td>
</tr>
<tr>
<td>Spend-down</td>
<td>See Medicaid Deductible.</td>
</tr>
<tr>
<td>Sterilization</td>
<td>Any medical procedure, treatment, or operation for the sole purpose of rendering an individual (male or female) permanently incapable of reproducing.</td>
</tr>
<tr>
<td>Third Party Liability</td>
<td>A payment resource available from both private and public insurance and other liable third parties that can be applied toward the beneficiary’s health care expense.</td>
</tr>
<tr>
<td>Transfer Trauma</td>
<td>Any adverse psychological and/or physical effects occasioned by the transfer of a nursing home patient who would be materially detrimental to the physical or mental health of the patient.</td>
</tr>
<tr>
<td>Glossary Term</td>
<td>Definition</td>
</tr>
<tr>
<td>----------------</td>
<td>-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>U &amp; C Charge</td>
<td>The usual and customary charge to the general public. Customary charge means the amount the provider charges another third party payer or the general public (except in cases where the general public receives free or reduced charges) for the same or a similar service. This definition does not include negotiated or contracted payment rates. If the provider renders a covered service to a beneficiary that the provider offers for free or for a reduced fee to the general public, the provider may only bill Medicaid up to that customary charge as long as all other Medicaid requirements are met.</td>
</tr>

FORMS APPENDIX

INTRODUCTION

The Forms Appendix contains all MDHHS forms referenced within the Michigan Medicaid Provider Manual. Detailed instructions are provided for forms that are not self-explanatory (refer to the table below). The bookmarks link to each form. The Forms field in the table below also links to the appropriate forms. Hold the cursor over form number (the hand cursor will turn into a pointing finger). Double click the cursor to access the form directly from the table. Use the navigation arrows to move from page to page and form to appendix.

All forms are also available on the MDHHS website (refer to the Directory Appendix for website information). Most forms are available in PDF format as well as in a downloadable Word-enabled format.

ACKNOWLEDGMENT OF RECEIPT OF HYSTERECTOMY INFORMATION
Michigan Department of Health and Human Services

RECIPIENT STATEMENT:

I, _______________________________________________________, was told before the hysterectomy was done that after the hysterectomy I would not be able to become pregnant.

___________________________________________________          _________________
(Recipient or Representative Signature) (Date)

___________________________________________________          _________________
(Interpreter Signature, if required to inform the recipient of the above information) (Date)

PHYSICIAN STATEMENT:

The hysterectomy for the above named recipient is solely for medical indications. This hysterectomy is not primarily or secondarily for family planning reasons, to render the above named recipient permanently incapable of reproducing, i.e. sterilization. It was explained to the above named recipient prior to the hysterectomy that the hysterectomy will render her permanently incapable of reproducing.

___________________________________________________          _________________
(Physician Signature) (Date)

Authority: Title XIX of the Social Security Act Completion: Is Voluntary, but is required if Medical Assistance program payment is desired.

The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person’s eligibility.
Note: If you need help to complete this application, please indicate what kind of help you need.
☐ Bilingual Interpreter ☐ Sign-language interpreter for the deaf
☐ Other (specify)

FOR DEPARTMENTAL USE ONLY

1. Case Name 2. Log Number 3. Recipient ID Number
4. County 5. Date
6. Worker 7. Worker Phone Number

CLIENT INFORMATION

8. Full Name of Person Needing or Requesting Services
9. Date of Birth (MM/DD/YYYY) 10. Social Security Number
11. Address (Number, Street, City, State, Zip Code)
12. Phone or Cell Number 13. TTY Number (Teletype for the deaf)

SECTION A – DEPARTMENT PROGRAMS: Below is a brief description of the services provided by the Department. Check the box or boxes which describe the services you need or problems where you desire help.

1. ☐ Home Help
   Services to help pay for someone to assist with personal care and housekeeping.

2. ☐ Adult Community Placement
   Services for adults who can no longer remain in their own homes. Includes help finding an adult foster home or home for the aged and services for people living in these settings.

3. ☐ Other Services
   Nonpayment services to help adults stay safe in their own homes. Services may include information and referral to other community resources.

IF YOU OR SOMEONE YOU KNOW IS IN NEED OF PROTECTIVE SERVICES, CONTACT CENTRALIZED INTAKE FOR ABUSE OR NEGLECT AT 855-444-3911.

SECTION B – CURRENT SITUATION: Check all boxes that apply to you.

1. Your Status as a Recipient
   a. ☐ Medicaid (MA) recipient
   b. ☐ Medicaid application pending
   c. ☐ Supplemental Security Income (SSI) recipient
   d. ☐ MI Choice Waiver recipient
   e. ☐ PACE recipient
   f. ☐ MI Health Link recipient
g. □ Community Mental Health (CMH) recipient
h. □ Food Assistance recipient
i. □ Family Independence Program (FIP) recipient
j. □ State Disability Assistance (SDA) recipient
k. □ Veteran Affairs recipient
l. □ Other

2. Living Arrangement (Check all boxes that apply to you and answer related questions)
a. □ Alone
b. □ With spouse (If married answer questions below.)
   Is spouse disabled? □ Yes □ No
   Is spouse working? □ Yes □ No
   Full name of spouse ___________________________ Date of Birth ______
c. □ With children under age 18. How many? ______
d. □ With others (relatives and non-relatives) How many? ______
e. □ Live in adult foster care facility, home for the aged.
f. □ Is client in a hospital or nursing home? □ Yes □ No
g. □ Does the recipient have a guardian? □ Yes □ No
   Name of guardian ___________________________
h. □ Is a caregiver/provider already identified? □ Yes □ No

Read the following statement, sign, and date the application.

I wish to apply for one of the adult services programs. I certify that the information I have given is correct. By signing, I acknowledge that I have read and agree to the rights, responsibilities, and important things to know described in Section C of this application.

Signature of Client or Authorized Representative ___________________________ Date ______

______________________________________________
SECTION C – SERVICES APPLICATION RIGHTS, RESPONSIBILITIES, AND IMPORTANT THINGS TO KNOW

Instructions:
• Be sure to read this information. It describes your rights and responsibilities.
• Keep this copy for your records.
• If you have any questions regarding your rights and responsibilities or any information provided in this section, contact the adult services worker.

1. YOU HAVE THE FOLLOWING RIGHTS:

   Application: You have the right to apply for adult services programs at any time. Your application must be approved or denied within 45 days from the day your referral is received by MDHHS. When applying for Medicaid funded programs such as Home Help, you will not be approved until you have active Medicaid. If you need financial or medical assistance, another application is needed. You have the right to be notified in writing of the approval or denial of services and to be treated fairly and with dignity in all dealings with the department.

   Non-discrimination: If you believe you have been discriminated against because of race, sex, religion, age, national origin, color, height, weight, marital status, gender identification or expression, sexual orientation, partisan considerations, or disability or genetic information that is unrelated to the person's eligibility, you have the right to file a complaint with the following:
   • Michigan Department of Civil Rights: 800-482-3604
   • U.S. Department of Health and Human Services: 202-619-0403

   Hearings: If you believe you have been treated unfairly or a mistake has been made concerning your case, you have a right to request an administrative hearing with the Michigan Office of Administrative Hearings and Rules (MOAHR) within 90 days of the action. You will be given the opportunity to explain your case to an impartial administrative law judge. You may request a hearing in any written form or you may submit the DCH-0092, Request for Hearing form, which is available online at https://www.michigan.gov/mdhhs/0,5885,7-339-71547_4860_78446_78448-16825--,00.html. All requests must be signed and dated by you or your authorized representative.

   Voter Registration: If you are not registered to vote, you have the right to register.

Explanation About the Food Assistance Program (FAP):
• You may be eligible to receive food benefits.
• You may apply for the Food Assistance Program at your local MDHHS office. If you have questions, contact the Eligibility Specialist assigned to your Medicaid case.

2. YOU HAVE THE FOLLOWING RESPONSIBILITIES:

• You must provide MDHHS with correct and complete information about your situation. The information you give may need to be verified.

• You must report any changes regarding your case to your adult services worker within ten business days of the change. This includes, but is not limited to, changes in your medical condition or care needs, living arrangements, marital status, change in providers, hospitalizations or nursing home stays (services cannot be paid while you are in the hospital or nursing home) or any other change which may affect your eligibility or the amount of benefits.

• If you neglect or refuse to report required changes, or make false or misleading statements, you can be prosecuted for fraud. If you have any doubt about whether you should report a change, contact your adult services worker at the local MDHHS office.
Repayment of Benefits: I understand that if benefits are overpaid for any reason, the overpayment amount received will have to be repaid. In addition, if intentional misrepresentation or concealment of material information caused the overpayment, the responsible party/parties, including the provider of care, may be prosecuted for fraud.

Release of Information: I authorize the MDHHS to provide notice to my care provider(s) when Home Help services or Adult Community Placement has been authorized, when there are changes in the authorization amount previously given to the provider or when my case is closed.

3. IMPORTANT THINGS TO KNOW:

a. Home Help and Adult Community Placement are Medicaid funded programs. As a Home Help recipient, I am responsible for any costs not paid by MDHHS, including benefits which may have been authorized but for which I no longer qualify due to Medicaid ineligibility. Adult Foster Care/Home for the Aged providers are responsible for returning supplemental payments they receive when a client is not eligible.

b. I am not eligible for Home Help services prior to being certified by a Medicaid medical professional. Certification of need is provided on the DHS-54A, Medical Needs form.

c. I understand that my Home Help provider must be enrolled in the Community Health Automated Medicaid Processing System (CHAMPS) and undergo a criminal history screening. Payment will only be made to the provider who is enrolled and approved by MDHHS to provide services for me. Adult Foster Care/Homes for the Aged providers must register in the Statewide Integrated Governmental Management Application (SIGMA) and enrolled in the Bridges system to receive payment.

d. Payment for Home Help services cannot be approved prior to (1) the medical professional’s signature date on the DHS-54A and (2) the provider enrollment and approval date.

e. I understand that my Home Help or Adult Community Placement case will be reviewed every six months to determine if I continue to qualify for services.

f. I have the right to choose my Home Help provider. I understand that my provider is not employed by the State of Michigan or MDHHS. I am considered the employer and have the right to hire or fire my provider.

g. I understand that Home Help services and Adult Community Placement are benefits to me and earnings to my provider. Home Help checks may be addressed to both the client and provider (dual party). I am responsible to endorse the check and give it to my provider. If I hire an agency or reside in an adult foster care home, checks will be sent directly to the agency on my behalf.

h. I understand that payments cannot be approved for periods of time that I am in a hospital, nursing home or rehabilitation facility as this is considered duplication of Medicaid services. Payment can be approved for services provided on the day I am discharged from the hospital, nursing home or rehabilitation facility but not the day I am admitted.

i. If a reported change results in a reduction or termination of benefits, I will be notified in writing of the negative action.

j. I understand that my individual Home Help provider must record the tasks they provide for me electronically in CHAMPS. An exception may be granted for my provider to submit a paper services verification if they meet certain criteria.

k. I understand that my individual Home Help provider must submit an electronic or paper services verification before they can be paid. The Adult Foster Care/Homes for the Aged provider must submit a monthly claim electronically in the Adult Services Authorized Payment system.

The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person’s eligibility.

Further, MDHHS:

- Provides free aids and services to people with disabilities to communicate with us, such as:
  - Qualified sign language interpreters
  - Written information in other formats (large print, audio, accessible electronic formats, other formats); and
- Provides free language services to people whose primary language is not English, such as:
  - Qualified interpreters
  - Information written in other languages

If you need these services, contact the Section 1557 Coordinator. The contact information is found below.

If you believe that MDHHS has not provided the above services, or discriminated in another way, you can file a grievance with the Section 1557 Coordinator. You can file a grievance in person or by mail, fax, or email. If you need help filing a grievance, the Section 1557 Coordinator is available to help you.

MDHHS is an equal opportunity provider.
Attestation to the Appropriateness of the Qualified Clinical Trial
Instructions for BPHASA-2210

General Information

BPHASA-2210 is a mandatory attestation form on the appropriateness of a qualified clinical trial in which a Medicaid beneficiary is participating. This form is required for coverage of routine patient costs for items and services furnished in connection with the beneficiary’s participation in a clinical trial.

The completed BPHASA-2210 must be submitted with:

- Claims - Submit via CHAMPS, Document Management Portal, with claims for routine patient costs furnished in connection with a qualifying clinical trial (Refer to the Billing & Reimbursement for Professionals Chapter of the MDHHS Medicaid Provider manual for additional information)
- Prior Authorization (PA) Requests - Submit via CHAMPS direct data entry with PA requests for items and services provided in connection with a qualifying clinical trial that require PA (Refer to the General Information for Providers Chapter of the MDHHS Medicaid Provider Manual for additional information)

For additional information on how to submit documentation with claims or requests for prior authorization, refer to Community Health Automated Medicaid Processing System (CHAMPS) (michigan.gov)

Completion Instructions

BPHASA-2210 must be signed by both:
- Principal investigator of the specified clinical trial, AND
- Health care provider
  - May also be the principal investigator,
  - Qualified health care providers include licensed providers that are part of the beneficiary’s health care team such as, but not limited to, the beneficiary’s primary care, specialty, treating, referring, or ordering provider.

Questions should be directed to Provider Support at ProviderSupport@michigan.gov

PRA Disclosure Statement - This information is being collected to assist the Centers for Medicare & Medicaid Services in implementing Section 210 of the Consolidated Appropriations Act of 2021 amending section 1905(a) of the Social Security Act (the Act), by adding a new mandatory benefit at section 1905(a)(30). Section 210 mandates coverage of routine patient services and costs furnished in connection with participation by Medicaid beneficiaries in qualifying clinical trials effective January 1, 2022. Section 210 also amended sections 1902(a)(10)(A) and 1937(b)(5) of the Act to make coverage of this new benefit mandatory under the state plan and any benchmark or benchmark equivalent coverage (also referred to as alternative benefit plans, or ABPs). Under the Privacy Act of 1974 any personally identifying information obtained will be kept private to the extent of the law. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. The OMB control number for this project is 0938-0193. Public burden for all of the collection of information requirements under this control number is estimated to take about 56 hours per response. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to CMS, 7500 Security Boulevard, Attn: Paperwork Reduction Act Reports Clearance Officer, Mail Stop C4-26-05, Baltimore, Maryland 21244-1850.

AUTHORITY: Title XIX of the Social Security Act
COMPLETION: Is Voluntary, but is required if payment from applicable program is sought.

The Department of Health and Human Services is an equal opportunity employer, services and programs provider.

The Michigan Department of Health and Human Services (MDHHS) does not discriminate against any individual or group because of race, religion, age, national origin, color, height, weight, marital status, political beliefs or disability.

**SECTION 5 – Drugs Subject to Abuse**

MDHHS must authorize all prescribers of drugs subject to abuse for BMP-enrolled beneficiaries. Do you anticipate a need for the referred provider to prescribe medications in these classes?

- [ ] YES
- [ ] NO
- [ ] Unable to determine

Include the beneficiary’s current medication list with form submission.

**SECTION 6 – Additional Information/Comments (including diagnoses)**

Provider Signature

Date of Authorization
General Instructions

This form should ONLY be used for beneficiaries enrolled in the Benefits Monitoring Program (BMP). Enrollment may be verified through the CHAMPS Eligibility Inquiry response as additional information. The form is to be completed by the beneficiary’s BMP Authorized Provider(s). For additional program information, refer to the Michigan Medicaid Provider Manual (Beneficiary Eligibility Chapter, Benefits Monitoring Program Section) available on the MDHHS website.

MDHHS requests that the MSA-1302 be typewritten to facilitate processing.

Form Completion

| Section 1 | Check the appropriate box to communicate purpose of the submission. |
| Section 2 | Beneficiary Information. |
| Section 3 | Referring (or Primary Care) Provider Information. |
| Section 4 | Referred Provider Information. Note: This section may be left blank when making a PCP designation only. |
| Section 5 | Check the appropriate box to communicate the anticipated need for MDHHS to authorize the referred provider to write prescriptions for drugs subject to abuse for this beneficiary. Include the beneficiary’s current list of medications with form submission. |
| Section 6 | Fill in the reason for referral, including diagnosis. Include any additional information that would assist in MDHHS review. When using this form to communicate a discharge from practice, include a copy of the communication from your office to the patient for MDHHS records. |

Copy Distribution

- Original – Referring Provider File
- Copy – Referred Provider
- Copy – Michigan Department of Health and Human Services (MDHHS), Behavioral and Physical Health and Aging Services Administration,
  Benefits Monitoring Program

Form Submission

The MSA-1302 and any supplemental information (e.g. medication list, medical records, forged prescriptions, etc.) must be mailed or faxed to:

MDHHS – Behavioral and Physical Health and Aging Services Administration
Benefits Monitoring Program
PO Box 30170
Lansing, MI 48909

Fax Number: (517) 335-0075

The MDHHS Program Review Division may be reached via telephone at (800) 622-0276.

AUTHORITY: Title XIX of the Social Security Act.
COMPLETION: Is Voluntary, but is required if Medical Assistance program payment is desired.

The Michigan Department of Health and Human Services (MDHHS) does not discriminate against any individual or group on the basis of race, national origin, color, sex, disability, religion, age, height, weight, familial status, partisan considerations, or genetic information. Sex-based discrimination includes, but is not limited to, discrimination based on sexual orientation, gender identity, gender expression, sex characteristics, and pregnancy.
I understand that Medicaid, Healthy Michigan Plan, or MIChild only covers payment for elective abortions under limited circumstances.

These are:

- Elective abortion to terminate a pregnancy to save the life of the mother,
- Elective abortion to terminate a pregnancy that was the result of rape, or
- Elective abortion to terminate a pregnancy that was the result of incest.

I certify that I am eligible for Medicaid, Healthy Michigan Plan, or MIChild coverage for an elective abortion based upon the circumstance that I have checked above. I understand that if I have given false information to obtain coverage for an elective abortion I can be prosecuted for fraud. I also understand that a copy of this verification will be sent to the local Michigan Department of Health and Human Services (MDHHS) office or to a police agency when appropriate.

</tr>
</tbody>
</table>

**Authority:** Title XIX and Title XXI of the Social Security Act.

**Completion:** Is Voluntary, but is required if payment from the Medicaid, Healthy Michigan Plan, or MIChild programs is sought.

The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person’s eligibility.
CERTIFICATION FOR INDUCED ABORTION
Michigan Department of Health and Human Services
Behavioral and Physical Health and Aging Services Administration

Medicaid, Healthy Michigan Plan, or MIChild payments for abortion services are limited to cases in which the life of the mother would be endangered if the pregnancy were continued or cases in which the pregnancy was the result of rape or incest. To receive payment for abortion services, a physician must determine and certify that the abortion is necessary to save the life of the mother or is to terminate a pregnancy that resulted from rape or incest.

INSTRUCTIONS:

• TYPE or PRINT ALL Information below.
• The Physician completing this form is responsible for providing a copy of the completed form to any other provider assisting in this procedure (e.g., hospital, anesthesiologist, laboratory) for billing purposes.
• Send a copy of the completed form with the claim. (Refer to the Medicaid Provider Manual, Directory Appendix, Claim Submission/Payment.)

Any questions regarding this form should be referred to Provider Inquiry at 800-292-2550 or e-mail ProviderSupport@michigan.gov.

<table>
<thead>
<tr>
<th>Beneficiary Name</th>
<th>mihealth Number</th>
<th>Date of Service</th>
</tr>
</thead>
<tbody>
<tr>
<td>Beneficiary Address (no. &amp; street, apt./lot #, etc.)</td>
<td>City</td>
<td>State</td>
</tr>
</tbody>
</table>

Appropriate box must be checked for payment to be made.

By signing below, I certify that:

☐ the life of the mother would be endangered if the pregnancy were continued. (List the medical condition(s) that exists.)

☐ the pregnancy terminated through this procedure was the result of rape or incest. Information included in the medical record supports this claim.

In cases of rape or incest, was a police report filed?
☐ YES ☐ NO (If NO, explain)

If appropriate, was a report filed with the local MDHHS office?
☐ YES ☐ NO (If NO, explain)

NOTE Payment for service is not dependent upon a report being filed with the police or the local MDHHS office.

Authority: Title XIX of the Social Security Act
Completion: Completion is required for Medicaid reimbursement.

The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person’s eligibility.

MSA-1576 (1/2022) - Previous editions are obsolete.
Michigan Department of Health and Human Services

Complex Seating and Mobility Device Prior Approval - Request/Authorization
Completion Instructions

The MSA-1653-D must be used by Medicaid enrolled DME Providers. Note: Requests for new complex seating or mobility devices submit with a completed Evaluation and Medical Justification for Complex Seating Systems and Mobility Devices” form (MSA-1656).

MDHHS requests that the MSA-1653-D be typewritten to facilitate processing. A Word fill-in enabled version of this form can be downloaded from the MDHHS website www.michigan.gov/medicaidproviders >> Policy, Letters & Forms. The form is generally self-explanatory. For complete information on required modifiers, documentation, and appropriate quantity amounts, refer to the following documents:

- Standards of Coverage portion of the provider-specific chapters of the Medicaid Provider Manual.
- Billing & Reimbursement for Professionals Chapter of the Medicaid Provider Manual.
- Provider-specific databases on the MDHHS website. www.michigan.gov/medicaidproviders >> Billing and Reimbursement >> Provider Specific Information.

Completion of this form is as follows:

<table>
<thead>
<tr>
<th>Box 1</th>
<th>MDHHS Use Only</th>
</tr>
</thead>
<tbody>
<tr>
<td>Box 11</td>
<td>Beneficiary address. If beneficiary resides in Nursing Facility include the Nursing Facility name, address and phone number.</td>
</tr>
</tbody>
</table>
| Box 17 | Complete this box ONLY for wheelchair requests.  
- For repairs or parts, complete MSA-1653-D. (Do not include MSA-1656.)  
- For new or replacement (due to a change in beneficiary basic medical functional status requests), stop at this point and complete MSA-1656. Both forms must be submitted for Prior Authorization consideration. |
| Box 20 | Enter brand name, model catalog or part number. DME, orthotics and prosthetics, must provide the brand name, model, and catalog or part number. |
| Box 21 | Enter a complete description of the item requested. |
| Box 22 | Enter the HCPCS Procedure Code. |
| Box 23 | Enter the applicable HCPCS Modifier. |
| Box 28 | Enter the beneficiary’s primary and secondary diagnoses or the CSHCS qualifying diagnosis (list both the code and description). DME/POS providers must submit the prescription/CMN with this form. |
| Box 29 | Any additional remarks regarding the request should be listed in this box such as verbal authorization date, retroactive date of service if being requested. Provide other insurance coverage for services requested. |
| Box 31 | Must be completed for all requests. |

Form Submission

PA request forms and required documentation for all eligible Medicaid beneficiaries must be mailed or faxed to:

MDHHS – Behavioral and Physical Health and Aging Services Administration  
Program Review Division  
P.O. Box 30170  
Lansing, Michigan 48909

Fax Number: (517) 335-0075

To check the status of a PA request, contact the MDHHS – Behavioral and Physical Health and Aging Services Administration, Program Review Division via telephone at 1-800-622-0276.
The provider is responsible for eligibility verification. Approval does not guarantee beneficiary eligibility or payment.

CONSENT FOR STERILIZATION
Michigan Department of Health and Human Services

NOTICE: YOUR DECISION AT ANY TIME NOT TO BE STERILIZED WILL NOT RESULT IN THE WITHDRAWAL OR WITHHOLDING OF ANY BENEFITS PROVIDED BY PROGRAMS OR PROJECTS RECEIVING FEDERAL FUNDS.

CONSENT TO STERILIZATION

I have asked for and received information about sterilization from ______________________________________. When I first asked for the information, I was told that the decision to be sterilized is completely up to me. I was told that I could decide not to be sterilized. If I decide not to be sterilized, my decision will not affect my right to future care or treatment.

I was told about those temporary methods of birth control that are available and could be provided to me which will allow me to bear or father a child in the future. I have rejected these alternatives and chosen to be sterilized.

I understand that I will be sterilized by an operation known as ___________________________________________. The discomforts, risks and benefits associated with the operation have been explained to me. All my questions have been answered to my satisfaction.

I understand that the operation will not be done until at least thirty days after I sign this form. I understand that I can change my mind at any time and that my decision at any time not to be sterilized will not result in the withholding of any benefits or medical services provided by federally funded programs.

I am at least 21 years of age and was born on ___________________________ (Month / Day / Year).

I, _________________________________________ (Name of Individual Being Sterilized) hereby consent of my own free will to be sterilized by ____________________________________________ ,

by a method called ___________________________________________.

My consent expires 180 days from the date of my signature below.

I also consent to the release of this form and other medical records about the operation to:

Representatives of the Department of Health and Human Services OR Employees of programs or projects funded by that Department but only for determining if Federal laws were observed. I have received a copy of this form.

_____________________________ (Signature of Person Giving Consent) ___________________________ Date: ______________ (Month / Day / Year)

You are requested to supply the following information, but it is not required: Ethnicity and race designation (please check)

Ethnicity:
- [ ] Hispanic or Latino
- [ ] Not Hispanic or Latino
- [ ] American Indian or Alaska Native
- [ ] Asian
- [ ] Black or African American
- [ ] Native Hawaiian or Other Pacific Islander
- [ ] White

PHYSICIAN’S STATEMENT

Shortly before I performed a sterilization operation upon _________________________________________, I explained to him/her the nature of the sterilization operation ____________________________ , the fact that it is intended to be a final and irreversible procedure and the discomforts, risks and benefits associated with it.

I counseled the individual to be sterilized that alternative methods of birth control are available which are temporary. I explained that sterilization is different because it is permanent.

I informed the individual to be sterilized that his/her consent can be withdrawn at any time and that he/she will not lose any health services or any benefits provided by Federal funds.

To the best of my knowledge and belief the individual to be sterilized is at least 21 years old and appears mentally competent. He/she knowingly and voluntarily requested to be sterilized and appears to understand the nature and consequences of the procedure.

_____________________________ (Signature of Person Giving Consent) ___________________________ Date: ______________ (Month / Day / Year)

_____________________________ (Signature of person obtaining consent) ___________________________ Date: ______________ (Month / Day / Year)
INSTRUCTIONS TO COMPLETE CONSENT FOR STERILIZATION FORM

1. Name of the physician or clinic giving information to the beneficiary. The "M.D." or "D.O." designation must be included.

2. Name of the sterilization procedure to be performed (e.g., Tubal Ligation or Vasectomy).

3. Beneficiary's complete birth date (month, day, and year). The beneficiary must be 21 years of age at the time they sign the form.

4. Beneficiary's full name. If a name change is indicated on the Medicaid card by the time surgery is performed, both names must be indicated.

5. Name of physician performing the sterilization. If the physician is unknown, "doctor on call" may be indicated.

6. Name of surgery to be performed (e.g., Tubal Ligation or Vasectomy).

7. Beneficiary's handwritten signature. A beneficiary who cannot write should sign with an "X." The "X" signature must be witnessed. The witness' handwritten signature must appear below item 7.

8. Date the consent form was signed (month, day and year). This date must be more than 30 days and less than 180 days before the date the sterilization is performed. If it is less than 30 days, see instructions for "alternative final paragraphs."

9. Race and ethnicity designation is optional.

10. Interpreter's Statement. This information is only required if the beneficiary is unable to understand English. The language used for interpretation must be specified (e.g., Spanish). The interpreter's handwritten signature and date must appear. The date must be the same date the beneficiary signed the form.

11. Name of beneficiary.

12. Name of sterilization procedure (e.g., Tubal Ligation or Vasectomy).

13. The handwritten signature of the person obtaining consent.

14. Date consent is taken (month, day and year). This date must be before the date sterilization is performed (#18).

15. Name of provider or clinic (e.g., office of John Doe, M.D., doctor's office, ABC Clinic, XYZ Hospital).

16. Street address, city, state, and zip code. No P.O. boxes allowed.

17. Beneficiary's full name.

18. Date of sterilization (month, day, and year). The surgery date must be the same as indicated on the claim.

19. Name of sterilization procedure (e.g., Tubal Ligation, Vasectomy).

20. Instructions for use of alternative final paragraphs.

21. If at least 30 days have passed since the date the beneficiary signed the consent form and the date of sterilization, paragraph "1" applies and paragraph "2" should be crossed out.

22. If the date the sterilization was performed is less than 30 days and more than 72 hours of the beneficiary signing the consent form, paragraph "2" applies and paragraph "1" should be crossed out. The applicable box should be checked.

23. For premature delivery, the expected date of delivery must be given.

24. Physician's signature. This can be a stamped signature if counter initialed.

25. Date physician signed the consent form. This date must be on or after the date of surgery. This can be typed or stamped.

If abdominal surgery was performed, the circumstances must be explained and operative notes submitted with the claim.

AUTHORITY: Title XIX of the Social Security Act
COMPLETION: Is Voluntary, but is required if Medical Assistance program payment is desired.

The Michigan Department of Health and Human Services is an equal opportunity employer, services and programs provider.

The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person's eligibility.
Application for Payment of Health Insurance Premiums

Please complete as many fields as possible in the application. In addition, a complete application will include:

☐ Copy of the billing statement from the insurance carrier or a statement from the employer verifying the cost of the insurance premium.
☐ Copies of Explanation of Benefit (EOB) statements or expenditure summaries from the private health insurance carrier or Medicare.
☐ Copy of the completed COBRA election form if health insurance coverage is to be maintained under the provisions of COBRA.
☐ Pharmacy report documenting the cost of the prescriptions and the amount paid by the private health insurance carrier or Medicare if the coverage includes a prescription benefit.

MDHHS is an equal opportunity provider.
The Dental Prior Approval Authorization Request form (MSA-1680-B) must be used by dental practices and community-based dental clinics (e.g., local health departments, Federally Qualified Health Centers) to request prior authorization (PA) for individuals enrolled in Medicaid Fee-for-Service and/or Children's Special Health Care Services (CSHCS). For beneficiaries enrolled in Healthy Kids Dental, Medicaid Health Plans, or Integrated Care Organizations, providers must contact the assigned plan for authorization requirements.

The status of a PA request may be reviewed in CHAMPS. Additionally, providers will receive a PA determination letter. Approved services must be completed before the PA period ends. To request an extension, the provider must submit a copy of the determination letter and required documentation within 15 days prior to the end date of the current authorization. If the original PA is over one year old, a new PA request must be submitted.

For complete information on covered services, PA and documentation requirements, refer to the Dental chapter of the MDHHS Medicaid Provider Manual, and Michigan Medicaid Approved Policy Bulletins located at www.michigan.gov/medicaidproviders.

Form Completion: MDHHS requires that the MSA-1680-B be typewritten.

Form Submission:
PA request forms for all eligible Medicaid and CSHCS beneficiaries must be submitted via direct data entry, faxed, or mailed to:

Michigan Department of Health and Human Services, Dental Prior Authorization
P.O. Box 30154
Lansing, MI 48909
Fax: (517) 335-0075

If submitting electronically, the completed MSA-1680-B must be uploaded along with the supporting clinical documentation required and diagnostic dental images/radiographs if required by policy.

The status of a PA request can be checked via the CHAMPS Provider Portal located at https://milogintp.michigan.gov. Questions regarding PA should be directed to the Program Review Division at 1-800-622-0276.
The provider is responsible for eligibility verification. Authorization does not guarantee beneficiary eligibility or payment.

NOTE: IF SUBMITTING VIA CHAMPS DIRECT DATA ENTRY, SKIP TO BOX #6

1. Requesting Provider Name (Organization/Group) If not applicable, enter Individual.
2. Organization NPI (previously known as Group) If not applicable, enter Individual.

For CSHCS Requests Only

Additionally Indicate:

- E = Erupted
- PE = Partially Erupted
- U = Unerupted

Document Presence of Supernumerary Teeth:

- I = Impacted
- M = Molar/incisor pattern

15. Are diagnostic images (if required by policy) attached? Yes No Date Taken: / /

Indicate the specific tooth number(s) for crowns, dental implants, impacted teeth, bridges, and teeth extracted since images taken.

16. Required current comprehensive periodontal charting attached? Yes No

Periodontal charting must include 6 measurements per tooth and all of the following applicable: probing depths ≥ 4mm, BOP and/or gingival inflammation, attachment loss, furcation, mobility.

Completion of boxes #16 – 17 satisfies requirement for inclusion of clinical record.

17. Periodontal diagnosis (Refer to American Academy of Periodontology (AAP) guidelines for periodontal diagnosis and classification):

- Stage (I, II, III, IV): Localized Generalized Molar/incisor pattern
- Grade (A, B, C): Address the 1 year prognosis of teeth in each quadrant being requested.

18. Other Pertinent Dental or Medical History:

19. Additional Provider Comments:

The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person’s eligibility.
Michigan Department of Health and Human Services

Genetic and Molecular Laboratory Test Authorization Request - Completion Instructions

The MSA-2081 is used by Medicaid-enrolled medical practitioners and laboratory providers to request genetic and molecular laboratory testing services that require MDHHS approval. Authorization must be requested within 30 days of the specimen collection date. Specimen processing should not be completed until after the authorization has been approved.

Authorization requests will be reviewed for medical necessity based on the genetic and molecular testing standards of coverage available in the Laboratory chapter of the MDHHS Medicaid Provider Manual. Authorization requests require medical documentation from the beneficiary’s Medicaid-enrolled treating provider. Medical necessity letters or test request forms created by the performing laboratory and signed by the treating provider will not be accepted as a substitute for clinical documentation or completion of the MSA-2081.

The completed MSA-2081 and/or clinical records from the treating provider must document the following:

- Indication for the test. This should be beneficiary-specific and medical in nature.
- Beneficiary’s related signs and symptoms and/or family history relevant to the requested test.
- Other related testing or clinical findings of the beneficiary or family member relevant to the requested test.
- How the test results will be utilized to significantly alter the medical management or treatment of the disease.

For complete information on coverage, documentation, claims completion, and reimbursement, refer to the following documents:

- Laboratory Chapter of the MDHHS Medicaid Provider Manual.
- Billing & Reimbursement for Professionals chapter of the MDHHS Medicaid Provider Manual.
- Laboratory databases on the MDHHS website: [www.michigan.gov/medicaidproviders](http://www.michigan.gov/medicaidproviders) >> Billing and Reimbursement >> Provider Specific Information.

The MSA-2081 must be typewritten to facilitate processing. A Word fill-in enabled version of this form can be downloaded from the MDHHS website [www.michigan.gov/medicaidproviders](http://www.michigan.gov/medicaidproviders) >> Policy, Letters & Forms.

Completion of this form is as follows:

<table>
<thead>
<tr>
<th>Box 1</th>
<th>MDHHS Use Only</th>
</tr>
</thead>
<tbody>
<tr>
<td>Box 2</td>
<td>Enter the laboratory name.</td>
</tr>
<tr>
<td>Box 3</td>
<td>Enter the laboratory NPI number.</td>
</tr>
<tr>
<td>Box 19</td>
<td>Enter the date of service. This should be the date the specimen was collected.</td>
</tr>
<tr>

<td>Enter the HCPCS/CPT Procedure Code.</td>
</tr>
<tr>
<td>Box 26</td>
<td>Enter the beneficiary’s primary and secondary diagnoses or the CSHCS qualifying diagnosis (list both the code and description) necessitating the requested test.</td>
</tr>
<tr>
<td>Box 29</td>
<td>The definitive treatment or action plan should be specific to the beneficiary.</td>
</tr>
<tr>
<td>Box 30</td>
<td>List other insurance coverage available for services requested and additional remarks pertinent to the request.</td>
</tr>
<tr>
<td>Box 31</td>
<td>Must be completed for all requests.</td>
</tr>
</tbody>
</table>

**Form Submission**

This form and required documentation must be submitted electronically utilizing the CHAMPS Prior Authorization Request List page. Providers unable to submit electronically may submit the form and documentation via fax or mail to:

MDHHS
Program Review Division
P.O. Box 30170, Lansing, Michigan 48909

Fax Number: (517) 335-0075

Providers may check the status of an authorization request on the CHAMPS Prior Authorization Request List page or by contacting the MDHHS, Program Review Division via telephone at 1-800-622-0276.
The provider is responsible for eligibility verification. Approval does not guarantee beneficiary eligibility or payment.

This completed form and clinical records included with the form must document the following:

- Beneficiary-specific medical indication(s) for the requested test.
- Beneficiary’s signs and symptoms, relevant family history, and other testing or clinical findings of the beneficiary or family member relevant to the requested test.
- How the test results will be utilized to significantly alter the medical management or treatment of the condition/disease.

DATE / /
Home Health Aide Prior Approval Request/Authorization

General Instructions

The MSA-181 must be used by Medicaid enrolled and home health agencies to request Prior Authorization (PA) for home health aide services. MDHHS requires that the MSA-181 be typewritten; handwritten forms will not be accepted. A Word fill-in enabled version of this form can be downloaded from the MDHHS website www.michigan.gov/medicaidproviders >> Policy, Letters & Forms >> Forms.

This form must be used to request Prior Authorization (PA) for home health aide services for beneficiaries with Medicaid. A request to begin services may be submitted by a person other than the home health agency such as the hospital Discharge Planner or physician. When this is the case, the person submitting the request must do so in consultation with the beneficiary (parent or guardian if applicable), and home health agency who will be assuming responsibility for the care of the beneficiary.

PA may be authorized for a period not to exceed ninety days. If need for home health aide services are medically necessary, a subsequent request for PA must be submitted. The provider should retain a copy of the PA form until the approval or denial is returned.

Refer to the Medicaid Provider Manual, Home Health Chapter, Prior Authorization Subsection, for the listing of required documentation to accompany each request.

Completion of this form is as follows:

<table>
<thead>
<tr>
<th>Item#</th>
<th>Instructions</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Prior Authorization Number. MDHHS use only.</td>
</tr>
<tr>
<td>2</td>
<td>The Home Health Agency Provider Name.</td>
</tr>
<tr>
<td>3</td>
<td>The Medicaid enrolled provider’s name and National Provider Identifier (NPI).</td>
</tr>
<tr>
<td>4-9</td>
<td>The Home Health Agency provider’s telephone number (including area code), address and fax number (including area code).</td>
</tr>
<tr>
<td>10</td>
<td>Initial: The authorization request is the initial prior authorization request for the beneficiary under this treatment plan. Continuing: The treatment authorization request is to continue treatment for additional calendar month(s) of service under this treatment plan.</td>
</tr>
<tr>
<td>11-19</td>
<td>Beneficiary information. Provide complete name, sex, mi health card number, date of birth, complete address (including city, state, and zip code), and phone number.</td>
</tr>
<tr>
<td>20-21</td>
<td>Enter the beneficiary's diagnosis(es) code(s) and and onset date that relate to the service being requested.</td>
</tr>
<tr>
<td>22</td>
<td>The beneficiary's most recent hospital discharge date for the requesting prior authorization period.</td>
</tr>
<tr>
<td>23-25</td>
<td>Hospital information including complete address and phone number, anticipated discharge date, and name and contact information of Discharge Planner, if beneficiary is currently hospitalized.</td>
</tr>
<tr>
<td>26</td>
<td>The start date of the last approved authorization period.</td>
</tr>
<tr>
<td>27</td>
<td>The previous total number of home health aide visits rendered (since services were first started).</td>
</tr>
<tr>
<td>28</td>
<td>The date home health services were first started.</td>
</tr>
<tr>
<td>29</td>
<td>For this current request being submitted, indicate requested start and end dates, total quantity of procedure code G0156 (i.e. visits) requested, and the planned visit frequency during the requested authorization period.</td>
</tr>
<tr>
<td>30</td>
<td>Indicate if the current authorization request is an increase or decrease from previous authorization, or if a change is being requested for the currently approved authorization period.</td>
</tr>
<tr>
<td>31</td>
<td>List the beneficiary’s current medications relevant to the medical diagnosis.</td>
</tr>
<tr>
<td>32</td>
<td>Documentation of the beneficiary’s cognitive status.</td>
</tr>
<tr>
<td>33</td>
<td>Identify the beneficiary’s ability to complete range of motion for upper and lower extremities.</td>
</tr>
</tbody>
</table>
Evaluation includes OASIS coding of the beneficiary.

### OASIS Coding

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>06</td>
<td>Independent – Patient completes the activity by him/herself with no assistance from a helper.</td>
</tr>
<tr>
<td>05</td>
<td>Setup or clean-up assistance – Helper SETS UP or CLEANS UP; patient completes activity. Helper assists only prior to or following the activity.</td>
</tr>
<tr>
<td>04</td>
<td>Supervision or touching assistance – Helper providers VERBAL CUES or TOUCHING/STEADYING assistance as patient completes activity. Assistance may be provided throughout the activity or intermittently.</td>
</tr>
<tr>
<td>03</td>
<td>Partial/moderate assistance – Helper does LESS THAN HALF the effort. Helper lifts, holds or supports trunk or limbs, but provides less than half the effort.</td>
</tr>
<tr>
<td>02</td>
<td>Substantial/maximal assistance – Helper does MORE THAN HALF the effort. Helper lifts or holds trunk or limbs and provides more than half the effort.</td>
</tr>
<tr>
<td>01</td>
<td>Dependent – Helper does ALL the effort. Patient does none of the effort to complete the activity. Or, the assistance of 2 or more helpers is required for the patient to complete the activity.</td>
</tr>
</tbody>
</table>

**If activity was not attempted, code reason:**

- 07 Patient refused
- 09 Not applicable
- 88 Not attempted due to medical condition or safety concerns

### Indicate the service and frequency of the service for this authorization request.

#### Identify the medical need for additional services.
Service request must be specific, include supportive documentation of the beneficiary’s current level of function and the medical necessity of requested service(s).

#### List all other services in the home. Must include the frequency of the service(s) and payer(s). Failure to disclose all services in the home may result in recoupment of Medicaid dollars for home health aide reimbursement.

#### Signature certifies that Parent/Guardian of beneficiary attests that information provided on this form is accurate and complete to the best of their ability. All unsigned requests will be returned for signature.

#### The physician, nurse practitioner, clinical nurse specialist, or physician assistant’s signature certifies that (1) the Home Health agency requesting the services understands the medical necessity for obtaining prior authorization for Home Health services and; (2) the information provided on this form is accurate and complete. All unsigned requests will be returned for signature.

#### The licensed supervising professional’s signature certifies that (1) the licensed, registered nurse, physical therapist, occupational therapist, or speech/language therapist provides supervision of the home health aide; (2) the services are medically necessary for obtaining prior authorization for Home Health aide services and; (3) the information provided on this form is accurate and complete. All unsigned requests will be returned for signature.

### RETURN COMPLETED FORM AND REQUIRED DOCUMENTATION TO:

MDHHS  
Program Review Division  
PO Box 30170  
Lansing, MI  48909  

OR  
Fax to:  517-335-0075

Questions should be directed to MDHHS – Behavioral and Physical Health and Aging Services Administration,  
Program Review Division via telephone at 1-800-622-0276.

### Authority: Title XIX of the Social Security Act.  
Completion: Is voluntary but is required if payment from applicable programs is sought.

The Michigan Department of Health and Human Services (MDHHS) does not discriminate against any individual or group on the basis of race, national origin, color, sex, disability, religion, age, height, weight, familial status, partisan considerations, or genetic information. Sex-based discrimination includes, but is not limited to, discrimination based on sexual orientation, gender identity, gender expression, sex characteristics, and pregnancy.

38. PATIENT (PARENT / GUARDIAN IF APPLICABLE) CERTIFICATION
I, the patient (parent/guardian) named above, understand the necessity to request prior authorization for the medically necessary services indicated. I understand that services requested herein require prior authorization and, if approved and submitted by the agency on the appropriate invoice, payment of authorized services will be from general and/or state funds. I understand that any false claims, statements or documents, or concealment of a material fact may lead to prosecution under applicable federal and/or state law. I hereby attest that information provided on this form is accurate and complete to the best of my ability.

39. PRACTITIONER CERTIFICATION
I certify that I have examined the patient named above and have determined that home health aide services are medically necessary, as supervised by a licensed, registered nurse or other authorized licensed professional. I understand that home health aide services require prior authorization to validate that such services are deemed medically necessary in accordance with Michigan Medicaid Provider Manual policy. I understand that any false claims, statements or documents, or concealment of a material fact may lead to prosecution under applicable federal and/or state law. I hereby attest that information provided on this form is accurate and complete to the best of my ability.

HOME HELP AGENCY CAREGIVER ENROLLMENT AUTHORIZATION

This form must be used to document an agency caregiver’s consent to be enrolled in the Community Health Automated Medicaid Processing System (CHAMPS). The form is needed only when the agency caregiver will be absent during the submission of their CHAMPS enrollment application.

To protect client safety, the agency caregiver must not provide Home Help services until their CHAMPS enrollment application has been approved and the agency caregiver has associated to the agency provider in CHAMPS. A failure to comply with these requirements may result in recoupment of payments for services the agency caregiver provides.

COMPLETION INSTRUCTIONS:

The agency caregiver has the sole authority to submit their CHAMPS enrollment application. If they choose to delegate that authority to the agency provider, the following steps are required:

1. The agency provider completes Section 1 of the form.

2. The agency caregiver completes Sections 2 through 5 of the form and returns it to the agency provider. The agency caregiver’s signatures in Sections 3 and 5 must be handwritten. The agency provider must not enroll the agency caregiver in CHAMPS before this step is completed.

3. The agency provider creates a unique MILogin user ID and password for the agency caregiver and enters the agency caregiver’s responses from Section 4 of the form into CHAMPS. The agency provider must not use the MILogin user ID and password for any purpose other than to enroll the agency caregiver.

4. The agency provider enters the agency caregiver’s MILogin user ID and password and CHAMPS provider ID into Section 6 of the form and gives a copy of the completed form to the agency caregiver. The form should be returned promptly to the agency caregiver to ensure they have the information needed to manage their MILogin account and CHAMPS enrollment. If the agency caregiver’s CHAMPS enrollment is not approved, the agency provider should still provide the agency caregiver with their MILogin user ID and password.

5. The agency provider retains the signed form in a secure environment for seven years after the agency caregiver’s last date of service. The form should only be submitted to MDHHS if requested by MDHHS staff. Failure to retain or provide MDHHS with the form during an investigation or audit may result in recoupment.

The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person’s eligibility.

**AUTHORITY:** Title XIX of the Social Security Act and Administrative Rule 400.1104(a)

**COMPLETION:** Is voluntary, but is required if Medical Assistance program payment is desired.

**SECTION 3 – CONSENT TO BE ENROLLED IN CHAMPS**

Home Help is a Medicaid-funded program. Only Medicaid-approved providers may work with Home Help clients. MDHHS uses CHAMPS to enroll and approve Medicaid providers. **You must be enrolled in CHAMPS as a Medicaid-approved provider before you work with Home Help clients.**

You will enter CHAMPS through the MIlogin website. With MIlogin, you only need one user ID and password to enter many State of Michigan websites.

You have chosen to have the agency provider in Section 1 of this form create your MIlogin user ID and enroll you in CHAMPS. The agency provider may use your MIlogin user ID to check on your CHAMPS enrollment application. The agency provider will give you your MIlogin user ID. If your CHAMPS enrollment application is approved, the agency provider will also give you your CHAMPS Provider ID.

You **will own your MIlogin account and CHAMPS enrollment. As the owner, you will be responsible for any actions taken with your MIlogin account and CHAMPS enrollment. You must not share your MIlogin user ID and password and your CHAMPS Provider ID.**

You should protect your MIlogin account and CHAMPS enrollment by changing your MIlogin password. If you need help changing your password, call Provider Support at 1-800-979-4662.

By signing below, I agree to have the agency provider create my MIlogin user ID and enroll me in CHAMPS. I know the agency provider may need to use my MIlogin user ID to check on my CHAMPS enrollment application. I know I am responsible for actions taken with my MIlogin account and CHAMPS enrollment. Once I receive my MIlogin user ID and password and my CHAMPS Provider ID, I agree not to share them. I know I am responsible for protecting this information by changing my MIlogin password.

SECTION 4 – FINAL ADVERSE LEGAL ACTIONS/CONVICTIONS

1. Have you ever been convicted of a felony or misdemeanor crime? If yes, please explain. □ Yes □ No

2. Have you ever been removed from or told you cannot participate in a state or federally funded program? If yes, please tell us what program and why. □ Yes □ No

SECTION 5 – HOME HELP PROGRAM TERMS AND CONDITIONS

By signing below, I agree that I have read the following statements and agree to follow all federal, state and MDHHS rules.

1. I know I work for the agency provider. I am not employed by MDHHS or the State of Michigan.

2. I know MDHHS will use my CHAMPS enrollment to run criminal history screenings. The results of these screenings may prevent me from working as a Medicaid-approved provider. The results will be shared when needed with MDHHS staff, agency provider staff and Home Help clients.

3. I agree to keep my CHAMPS enrollment current. I will update my CHAMPS enrollment within 10 days of any change in my information. This includes but is not limited to a change in my address, phone number or email.

4. I agree to provide the services to the Home Help client that the agency provider assigns to me. I know the hours of services I provide to the Home Help client may not go over the total approved hours listed on the Home Help client’s Time and Task.

5. I know I can only receive wages from the agency provider for the services I provide. I will not seek or accept payments from the Home Help client or any other source.
6. I agree to give the agency provider all records needed to show the services I provided to Home Help clients. I know that listing services I did not provide is fraud and could result in criminal charges.

7. I agree to cooperate with MDHHS and/or the agency provider on any audits, investigations or requests for information about Home Help services provided.

8. I know I must tell the agency provider if I am arrested or convicted of a crime.

9. I agree to let the agency provider know of any changes with the Home Help client. This includes but is not limited to the Home Help client being admitted to a hospital, staying in a nursing home or ending Home Help services.

10. I agree to follow the laws on the use and sharing of the Home Help client’s protected health information (PHI). This includes the privacy rules in the Health Insurance Portability and Accountability Act of 1996 (HIPAA) and Public Acts 104-191 (45 CFR Parts 106 and 164, Subparts A, C, and E).

Instructions for Completing the Home Help Agency Invoice

NOTE: Total time billed must not exceed the agency provider’s approved Time and Task amount. Authorized payments will not include billed time in excess of the approved amount.

1. The agency provider completes the following sections of the Home Help Agency Invoice to document the provision of personal care services for each day in the month and year indicated.

A. BILLING INFORMATION

1. AGENCY NAME: Enter the complete name of the agency provider.
2. AGENCY PROVIDER NUMBER: Enter the CHAMPS ID number of the agency provider.
3. AGENCY PHONE NUMBER: Enter the phone number where the agency representative can be reached.
4. CONTACT PERSON: Enter the first and last name of the agency representative.
5. BILLING PERIOD: Enter the Billing Month and Year (MM/YYYY).
6. DATE SUBMITTED: Enter the date the invoice is submitted to the client’s local county MDHHS office (MM/DD/YYYY).
7. HOURLY RATE: Enter the agency provider's MDHHS-approved hourly rate for the client.
8. CLIENT NAME: Enter the first and last name of the client.
9. CLIENT MEDICAID ID NUMBER: Enter the client’s Medicaid Identification Number.
10. BILL TO: Enter the name of the client’s local county MDHHS office.
11. ATTENTION: Enter the name of the client’s adult services worker.

B. VERIFICATION OF SERVICES AND HOSPITAL/NURSING FACILITY STAYS

1. For each day of the billing month, check all the approved tasks completed.
2. If the client stayed in a hospital or nursing facility, check the day(s) the client was admitted, the day(s) the client stayed in the facility and the day(s) the client was discharged.
3. When Laundry is checked and was completed at a laundry facility, check Travel Time for Laundry. When Shopping is checked and required travel to one or more stores, check Travel Time for Shopping. NOTE: The frequency of travel must not exceed the agency provider’s approved Time and Task amount.
4. Enter total hours and minutes of service provision in the Total Time for Services Above field.

C. VERIFICATION OF COMPLEX CARE TASKS: For each day of the billing month, check all the approved tasks completed. Enter total hours and minutes of service provision in the Total Time for Services Above field. NOTE: Complete only if complex care tasks were provided.

D. TOTAL TIME FOR BILLING PERIOD: Add together the times in the Total Time for Services Above and the Total Time from the Previous Page fields. Record the total time in hours and minutes. NOTE: Complete only if complex care tasks were provided.

E. SIGNATURE OF AUTHORIZED REPRESENTATIVE / DATE: Sign and date the invoice to certify provision of the approved tasks. NOTE: If complex care tasks were provided, sign and date both pages of the invoice.

2. The agency provider sends the completed Home Help Agency Invoice to the client’s local county MDHHS office – Attention: Adult Services Unit. The invoice should not be submitted before the last day of the services billing period. The invoice must be submitted to the Adult Services Unit of the client’s local county MDHHS office no later than 365 days from the service date. Failure to submit the invoice within 365 days of the service date will result in non-payment.

Michigan Department of Health and Human Services
HOME HELP AGENCY INVOICE

NOTE: Total time billed must not exceed the agency provider’s approved Time and Task amount. Authorized payments will not include billed time in excess of the approved amount.

1. The agency provider completes the following sections of the Home Help Agency Invoice to document the provision of personal care services for each day in the month and year indicated.

A. BILLING INFORMATION

1. AGENCY NAME: Enter the complete name of the agency provider.
2. AGENCY PROVIDER NUMBER: Enter the CHAMPS ID number of the agency provider.
3. AGENCY PHONE NUMBER: Enter the phone number where the agency representative can be reached.
4. CONTACT PERSON: Enter the first and last name of the agency representative.
5. BILLING PERIOD: Enter the Billing Month and Year (MM/YYYY).
6. DATE SUBMITTED: Enter the date the invoice is submitted to the client’s local county MDHHS office (MM/DD/YYYY).
7. HOURLY RATE: Enter the agency provider's MDHHS-approved hourly rate for the client.
8. CLIENT NAME: Enter the first and last name of the client.
9. CLIENT MEDICAID ID NUMBER: Enter the client’s Medicaid Identification Number.
10. BILL TO: Enter the name of the client’s local county MDHHS office.
11. ATTENTION: Enter the name of the client’s adult services worker.

B. VERIFICATION OF SERVICES AND HOSPITAL/NURSING FACILITY STAYS

1. For each day of the billing month, check all the approved tasks completed.
2. If the client stayed in a hospital or nursing facility, check the day(s) the client was admitted, the day(s) the client stayed in the facility and the day(s) the client was discharged.
3. When Laundry is checked and was completed at a laundry facility, check Travel Time for Laundry. When Shopping is checked and required travel to one or more stores, check Travel Time for Shopping. NOTE: The frequency of travel must not exceed the agency provider’s approved Time and Task amount.
4. Enter total hours and minutes of service provision in the Total Time for Services Above field.

C. VERIFICATION OF COMPLEX CARE TASKS: For each day of the billing month, check all the approved tasks completed. Enter total hours and minutes of service provision in the Total Time for Services Above field. NOTE: Complete only if complex care tasks were provided.

D. TOTAL TIME FOR BILLING PERIOD: Add together the times in the Total Time for Services Above and the Total Time from the Previous Page fields. Record the total time in hours and minutes. NOTE: Complete only if complex care tasks were provided.

E. SIGNATURE OF AUTHORIZED REPRESENTATIVE / DATE: Sign and date the invoice to certify provision of the approved tasks. NOTE: If complex care tasks were provided, sign and date both pages of the invoice.

2. The agency provider sends the completed Home Help Agency Invoice to the client’s local county MDHHS office – Attention: Adult Services Unit. The invoice should not be submitted before the last day of the services billing period. The invoice must be submitted to the Adult Services Unit of the client’s local county MDHHS office no later than 365 days from the service date. Failure to submit the invoice within 365 days of the service date will result in non-payment.
APPROVED PERSONAL CARE TASKS

NOTE: Approved time for items 1 through 13 is for hands-on care only.

1. **Eating/Feeding** – helping with use of utensils, cup/glass, getting food/drink to mouth, cutting up/manipulating food on plate, cleaning face and hands, as needed after a meal.
2. **Toileting** – helping on/off toilet, commode/bed pan, emptying commode/bed pan, managing clothing, wiping and cleaning body after toileting, cleaning ostomy and/or catheter tubes/receptacles, applying diapers and disposable pads; may include doing catheter, ostomy or bowel programs.
3. **Bathing** – helping with cleaning the body or parts of the body, shampooing hair, using tub or shower, sponge bathing, including getting a basin of water, managing faucets, soaping, rinsing and drying.
4. **Grooming** – helping to maintain personal hygiene and neat appearance, including hair combing, brushing, oral hygiene, shaving, fingernail and toe nail care (unless a physician advises not to do so).
5. **Dressing** – helping with putting on/taking off, fastening/unfastening garments/undergarments, special devices such as back/leg braces, corsets, artificial limbs or splints.
6. **Transferring** – helping to move from one position to another, such as from a bed to a wheelchair or sofa, to come to a standing position and/or repositioning to prevent skin breakdown.
7. **Mobility** – helping with walking or moving around inside the living area, changing locations in a room, moving from room to room or climbing stairs.
8. **Medication** – helping with administering prescribed or over-the-counter medication.
9. **Meal Preparation** – helping with planning menus, washing, peeling, slicing, opening packages, cans and bags, mixing ingredients, lifting pots/pans, reheating food, cooking, operating stove/microwave, setting the table, serving the meal, washing/drying dishes and putting them away.
10. **Shopping** – helping to compile a list identifying needed items, picking up items at the store, managing cart/baskets, transferring items to home and storing them away.
11. **Laundry** – helping by getting laundry to machines, sorting, handling soap containers, placing laundry into machines, operating machine controls, handling wet laundry, drying, folding and storing laundry.
12. **Light Housework** – helping with sweeping, vacuuming, washing floors, washing kitchen counters and sinks, cleaning the bathroom, changing bed linen, taking out trash, dusting and picking up, bringing in fuel for heating/cooking purposes if necessary.
13. **Complex Care tasks** – require special techniques/knowledge; may replace most or all 1-9 tasks when approved by specialist. Complex care tasks include bowel program, catheter or leg bags, colostomy care, eating or feeding assistance, peritoneal dialysis, range of motion exercises, specialized skin care, suctioning and wound care.

**INSTRUCTIONS FOR ADULT SERVICES WORKER**

1. When the invoice is returned, review for accuracy. If invoice is correct, authorize payment.
2. Resolve inaccuracies immediately. Once invoice is corrected, authorize payment.
3. Maintain the invoice in the client’s case record.

The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person’s eligibility.

**AUTHORITY:** Title XIX of the Social Security Act and Administrative rule 400.1104(a)

**COMPLETION:** Is Voluntary, but is required if Medical Assistance program payment is desired.

HOME HELP AGENCY PROVIDER EMPLOYMENT REQUIREMENTS
Michigan Department of Health and Human Services

The purpose of this form is to help agency applicants understand and comply with Home Help employment policies. The form contains a subset of the policies that an approved agency provider must follow. For a full list of Home Help policies, see the Home Help chapter in the Michigan Department of Health and Human Services (MDHHS) Medicaid Provider Manual.

Instructions for Completing this Form

SECTION 1: Enter the agency’s full legal name and Employer Identification Number and the first and last name of the person completing the form. The form must be completed by an agency owner or managing employee. For definitions of these terms, see the Common Terms Section of the Home Help chapter in the MDHHS Medicaid Provider Manual.

SECTION 2: Review the policies and sign and date this section to affirm the agency’s understanding of and agreement to comply with the policies. The signature must be handwritten. If the agency has questions about the policies, contact the MDHHS Home Help Policy Section at MDHHS-HHProviderQuestions@michigan.gov.

SECTION 3: Complete this section only if the agency currently employs at least two directly hired agency caregivers other than the agency owner who will provide Home Help services. All the agency’s directly hired agency caregivers should be listed. Do not include the agency owner(s). If additional space is needed, submit a separate document listing the additional agency caregiver names and provider ID numbers (if available). If the agency does not employ a minimum of two directly hired agency caregivers, skip to Section 4.

SECTION 4: Complete this section only if the agency is unable to complete Section 3. In the space provided, briefly summarize the agency’s plan for recruiting and directly hiring at least two agency caregivers other than the agency owner.

SUBMISSION INSTRUCTIONS: The completed form should be emailed with agency application documents to MDHHS-HHProviderQuestions@michigan.gov.

DOCUMENT RETENTION REQUIREMENTS: Retain a copy of the completed form in a secure location for seven years after the signature date in Section 2 of the form.

SECTION 2 – ACKNOWLEDGEMENT OF AGENCY PROVIDER EMPLOYMENT POLICIES

By signing below, I affirm I understand and agree to ensure full agency compliance with the following agency provider employment policies:

- Agency caregivers who provide Home Help services must be enrolled in the Community Health Automated Medicaid Processing System (CHAMPS) as atypical individual providers and associated to the agency prior to providing Home Help services. The date of association must not be earlier than the date the criminal history check was completed.
- An agency caregiver who provides Home Help services must be present during the submission of their CHAMPS enrollment application or complete the MSA-204 Home Help Agency Caregiver Enrollment Authorization form prior to the agency provider enrolling them in CHAMPS.
- Agency employees who have access to client information for the purposes of billing, answering phone calls, or assisting with setting up services for the client must be listed in the agency provider’s CHAMPS enrollment in “Step 9: Provider Controlling Interest/Ownership Details” prior to accessing the information.
- The agency provider must directly employ all agency caregivers and agency employees who work with Home Help clients. Agency caregivers and agency employees may not subcontract services to persons who are not directly employed by the agency provider. Medicaid will not reimburse an agency provider for services that were provided by a contracted agency caregiver.
- The agency provider must directly employ a minimum of two agency caregivers, not including the owner, who provide services through the Home Help program and regularly receive a monthly paycheck.
- The agency owner(s) must ensure all agency caregivers and agency employees who work with Home Help clients know and comply with Home Help policy.
- When MDHHS determines it paid for services provided by one or more agency caregivers and/or agency employees who were not in compliance with Home Help policy, MDHHS will recoup the overpayments from the agency provider.

Date Signed

HASA-2104 (Rev 3/22)
SECTION 3 – CURRENT AGENCY CAREGIVERS
Complete this section only if the agency currently employs at least two directly hired agency caregivers other than the agency owner who will provide Home Help services. If the agency does not meet this staffing level, skip to Section 4. See the instructions page for more guidance on completing this section.

<table>

SECTION 4 – AGENCY CAREGIVER RECRUITMENT PLAN
Complete this section only if the agency is unable to list directly hired agency caregivers in Section 3 of this form. See the instructions page for more guidance on completing this section.

The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person’s eligibility.

**AUTHORITY:** Title XIX of the Social Security Act and Administrative Rule 400.1104(a)

**COMPLETION:** Is voluntary, but is required if Medical Assistance program payment is desired.
A Home Help provider may be paid for services on the day the Home Help client was admitted to a hospital if:

- The services were provided on or after February 1, 2023.
- The services were provided before the time the Home Help client was admitted to the hospital.
- The services were provided in the Home Help client’s home or workplace. **NOTE:** Laundry and shopping authorized to be done outside the Home Help client’s home may be eligible for payment if completed before the time the Home Help client was admitted to the hospital.
- The Home Help client has active Medicaid.
- The provider logs the tasks they provided on the service verification. Individual caregivers must log the tasks on the Electronic Service Verification (ESV) or Paper Service Verification (PSV). Agency providers must log the tasks on the MSA-1904 Home Help Agency Invoice.
- The provider fills out, signs and dates this form and sends it to the Home Help client’s adult services worker or local MDHHS office within 365 days of the date of service.

**How to Complete and Submit this Form**

**SECTION 1:** Fill in the Home Help client’s first and last name. Fill in the Home Help client’s Medicaid identification (ID) number if available.

**SECTION 2:** Fill in the Home Help provider’s information. An individual caregiver fills in their first and last name and provider ID number. A Home Help agency provider fills in:

- The name of the agency.
- The agency’s provider ID number.
- The first and last name of the agency caregiver who provided services to the Home Help client on the hospital admission date.
- The agency caregiver’s provider ID number.

**SECTION 3:** Fill in the date and time the services were provided, including:

- The date the Home Help client was admitted to the hospital.
- The time Home Help services began and the time Home Help services ended. Times must be recorded in an hh:mm format. “AM” or “PM” must be checked.

**SECTION 4:** This section must only be signed by an individual caregiver employed by the Home Help client or an authorized Home Help agency representative. An authorized Home Help agency representative is a person who is authorized to act on behalf of the agency owner. The signature must be handwritten.

**HOW TO SUBMIT THIS FORM:** Email, mail, fax, or drop off the form to the Home Help client’s adult services worker or local MDHHS office. To be eligible for payment, the form must be submitted within 365 days of the Home Help client’s hospital admission date.

**HOW TO RETAIN THIS FORM:** Keep a copy of the completed form in a secure place for seven years after the signature date in Section 4 of the form.

**NOTE:** TO BE ELIGIBLE FOR PAYMENT, THE SERVICES PROVIDED ON THIS DATE MUST BE LOGGED ON THE HOME HELP PROVIDER’S SERVICE VERIFICATION.

**SECTION 4 – Attestation**

By signing below, I affirm that:

- The information above and on the service verification is correct and true. The provider listed in Section 2 of this form provided the services before the time the Home Help client was admitted to the hospital.
- I know that billing for services that were not provided is fraud. I know it could result in provider termination or suspension from Medicaid programs; recoupment of the funds paid for the services; and criminal conviction. A criminal conviction could result in a fine up to $50,000 and a prison sentence of four to ten years for each count.

**AUTHORITY:** Title XIX of the Social Security Act and Administrative Rule 400.1104(a)
The MSA-2565-C serves as notice of birth of a newborn for the purposes of obtaining a Medicaid ID number. It must be completed only if the hospital is unable to submit notice of the birth through the Michigan Electronic Birth Certificate system.

- The hospital must retain THE ORIGINAL of the Hospital Newborn Notice in the beneficiary's file. A copy MUST be sent to the local MDHHS office.
- A copy of the MSA-2565-C will be returned to the hospital, noting the eligibility status of the newborn.
- Item 6 must state the name of the mother.
- A copy of the CHAMPS Eligibility Inquiry or HIPAA 271 transaction response with the mother's Benefit Plan ID information should be attached to the form; or the form must contain the county, district, unit, worker, and case number data from the eligibility response separated by slashes (e.g., 33/01/01/08/1234567890).

The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person's eligibility.

Instructions for MSA-1755

The Medicaid Enrolled Birthing Hospital Agreement for Elective, Non-Medically Indicated Delivery Prior to 39 Weeks Completed Gestation form (MSA-1755) is to be completed by all Medicaid enrolled birthing hospitals in the State of Michigan.

The purpose of this form is to serve as an attestation that each Medicaid enrolled birthing hospital utilizes evidence-based guidelines (EBGs) to address elective, non-medically indicated delivery prior to 39 weeks completed gestation for Medicaid beneficiaries.

To complete the form, hospitals must indicate whether they have elective delivery EBGs in place. If the hospital utilizes guidelines that are not listed on the form, hospitals may use the space provided on the form to explain. Hospitals may also submit copies of their elective delivery policies.

The form must be signed by both the Chief Executive Officer (CEO) and the Chief Medical Officer (CMO) of the facility.

The completed MSA-1755 must be mailed or faxed to:

Attn: Inpatient Hospital Policy
Michigan Department of Health and Human Services
Behavioral and Physical Health and Aging Services Administration, Program Policy Division
PO Box 30479
Lansing, Michigan 48909-7979
Fax: (517) 335-5136

Questions should be directed to Provider Support at ProviderSupport@michigan.gov.
The purpose of this agreement is to certify that Medicaid enrolled birthing hospitals utilize evidence-based guidelines (EBGs) to address elective, non-medically indicated delivery prior to 39 weeks completed gestation for Medicaid beneficiaries.

**NOTE:** This agreement must be signed by both the Chief Executive Officer (CEO) and the Chief Medical Officer (CMO) of the facility.

Complete the following:

**Hospital Name**

**National Provider Identifier**

---

**attests that the following elective delivery EBGs are utilized:**

- **Yes** □ **No** □ Medical indications for elective, non-medically indicated delivery prior to 39 weeks completed gestation are defined in hospital policy.
- □ □ Hospital staff is not authorized to schedule an elective, non-medically indicated delivery prior to 39 weeks completed gestation.
- □ □ Providers are required to obtain permission from physician leadership (e.g., the head of the obstetrics department) before performing an elective, non-medically indicated delivery prior to 39 weeks completed gestation.
- □ □ Provider education materials are used to educate providers on the risks of elective, non-medically indicated delivery prior to 39 weeks completed gestation.
- □ □ Patient education materials are used to educate patients on the risks of elective, non-medically indicated delivery prior to 39 weeks completed gestation.
- □ □ Hospital involvement in an initiative that addresses elective, non-medically indicated delivery prior to 39 weeks completed gestation (e.g., Michigan Health & Hospital Association [MHA] Keystone Center’s initiative in obstetrics, Trinity Health System’s Perinatal Patient Safety Initiative [PPSI], Ascension Health System’s Handling All Neonatal Deliveries Safely [HANDS]).
- □ □ Other. Explain in the space provided below. If more space is needed, attach explanation on a separate document.

Along with this completed agreement, MDHHS will also accept a copy of each facility’s elective delivery policy.

I certify that the responses in this attestation agreement are accurate, complete and current as of the date signed.

CSHCS MEDICAL ELIGIBILITY REPORT

Instructions for Form MSA-4114

Purpose:
This form is used to determine if an individual is medically eligible for the Children’s Special Health Care Services (CSHCS) program. The condition must require the services of a medical and/or surgical sub-specialist at least annually, as opposed to being managed exclusively by a primary care physician. A current list of covered diagnoses is maintained on the MDHHS website at www.michigan.gov/mdhhs. In addition, some diagnoses must meet severity or chronicity criteria (e.g. asthma).

This form should be completed for the following persons:
- Anyone UNDER 21 years of age with a potentially eligible condition. Psychiatric, emotional and behavioral disorders, attention deficit disorder, developmental delay, intellectual disability, autism, or other mental health diagnoses are not conditions covered by the CSHCS program.
- Anyone, regardless of age, with cystic fibrosis or hereditary coagulation defects commonly known as hemophilia.

Completion Instructions:
- Read this instruction page thoroughly. Then separate attached forms.
- TYPE or PRINT clearly in INK.
- The Physician’s Signature (or the Attending Physician if a Hospital) and the Date Signed are REQUIRED.
- Attach supporting medical documentation.
- If desired, make a photocopy for your records.
- FAX the completed form to the CSHCS Division at 517-335-9491.

Other Information:
- If this request is approved, the client is medically eligible for the CSHCS program.
- For actual program coverage, the client or the client’s family MUST APPLY to join the CSHCS program by completing form MSA-0737, APPLICATION FOR CHILDREN’S SPECIAL HEALTH CARE SERVICES.
- If the family does NOT receive an application after notification of approval, call 1-800-359-3722.

AUTHORITY: Title V of the Social Security Act
COMPLETION: Completion is voluntary, but is required if coverage under the Children’s Special Health Care Services program is desired.

The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person’s eligibility.

☑ YES, but with limitations (Specify below) ☐ NO (How long):

Can Patient work at any job? ☐ YES ☐ NO

☑ YES, but with limitations (Specify below) ☐ NO (How long):

☐ K Other (Explain)

☐ L Is the spouse or parent of the above disabled individual needed in the home to provide care?

☐ YES ☐ NO

Spouse or parent cannot engage in work due to the extent of care required. ☐ YES ☐ NO

How long:

Date patient was last seen

☐ Are you a Medicaid enrolled provider? ☐ YES ☐ NO

Name and title (Print or type)

☐ MA enrolled Provider Signature

National Provider Identifier (NPI) Number

☐ Signature Date ☐ Telephone Number

AUTHORITY: Federal 45 CFR of 233.20, CFR 440.10 and CFR 440.20

COMPLETION: Voluntary

PENALTY: Benefits may be affected.

Medical Provider:
We would appreciate your cooperation in completing the spaces checked below. In addition to a physician, Box A may be completed by a physician’s assistant, certified nurse-midwife, ob-gyn nurse practitioner or ob-gyn clinical nurse specialist. Providers must be Medicaid enrolled. An addressed, prepaid envelope is enclosed for your convenience.

You are hereby authorized to release the information requested below to the Michigan Department of Health and Human Services.

DHS-54A (Rev. 6-15) Previous edition may be used. MS Word
SECTION 1 - INSTRUCTIONS

- Must be completed, signed, and dated by a nurse practitioner, physician’s assistant, or physician.
- The patient being screened shall require a comprehensive LEVEL II evaluation UNLESS any of the exemption criteria below is met and certified by a physician’s assistant, nurse practitioner or physician. Indicate which exemption applies.

SECTION 2 – GENERAL INFORMATION

SECTION 3 – EXEMPTION CRITERIA

☐ COMA
Yes, I certify the patient under consideration is in a coma/persistent vegetative state.

☐ DEMENTIA
Yes, I certify the patient under consideration has dementia as established by clinical examination and evidence of meeting ALL 5 criteria below.

Yes, I certify the patient under consideration does not have another primary psychiatric diagnosis of a serious mental illness.

Yes, I certify the patient under consideration does not have an intellectual disability, developmental disability, or a related condition.

Specify the type of dementia

1. Has demonstrable evidence of impairment in short-term or long-term memory as indicated by the inability to learn new information or remember three objects after five minutes, and the inability to remember past personal information or facts of common knowledge.

2. Exhibits at least one of the following:
   - Impairment of abstract thinking, as indicated by the inability to find similarities and differences between related words; has difficulty defining words, concepts, and similar tasks.
   - Impaired judgment, as indicated by inability to make reasonable plans to deal with interpersonal, family, and job-related issues.
   - Other disturbances of higher cortical function, i.e., aphasia, apraxia, and constructional difficulty.
   - Personality change: altered or accentuated premorbid traits.
3. Disturbances in items 1 or 2 above significantly interfere with work, usual activities, or relationships with others.

4. The disturbance has NOT occurred exclusively during the course of delirium.

5. EITHER
   a. Medical history, physical exam and/or lab tests show evidence of a specific organic factor judged to be etiologically related to the disturbance, OR
   b. An etiologic organic factor is presumed in the absence of such evidence if the disturbance cannot be accounted for by any non-organic mental disorder.

☐ HOSPITAL EXEMPTED DISCHARGE
   Yes, I certify that the patient under consideration:
   1. is being admitted after an inpatient medical hospital stay, AND
   2. requires nursing facility services for the condition for which he/she received hospital care, AND
   3. is likely to require less than 30 days of nursing services.

Physician/Physician Assistant/Nurse Practitioner Signature and Credentials    Date

Name (Typed or Printed)    Telephone Number

The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person’s eligibility.

AUTHORITY: Title XIX of the Social Security Act
COMPLETION: Is voluntary, however, if NOT completed, Medicaid will not reimburse the nursing facility.

COPY DISTRIBUTION:
ORIGINAL- Nursing Facility retains in patient file
COPY - Attach to form DCH-3877 and send to Local Community Mental Health Services Program (CMHSP)
COPY - Patient Copy or Legal Representative
INSTRUCTIONS FOR COMPLETING LEVEL II SCREENING

The DCH-3878 is to be used ONLY when the individual identified on a DCH-3877, Preadmission Screening (PAS)/Annual Resident Review (ARR) as needing a LEVEL II evaluation meets one of the specified exemptions from LEVEL II screening. If the individual under consideration meets one of the following exemptions, he/she may be admitted or retained at a nursing facility without additional evaluation. However, a completed copy of the DCH-3878 must be attached to the DCH-3877 and sent to the local Community Mental Health Services Program (CMHSP).

Must be completed, signed, and dated by a nurse practitioner, physician’s assistant, or physician.

Complete the following information to match the DCH-3877: Patient Name, DOB, and Referring Agency (including agency address and telephone number).

Use an "X" to indicate which exemption applies to the individual under consideration.

DEMENTIA:

- Review the 5 criteria listed under the dementia exemption category. Do NOT check this exemption unless the individual meets all 5 criteria. Any individual who meets some, but not all 5 criteria will be subject to a LEVEL II evaluation. If the individual under consideration meets this exemption category, specify the type of dementia.

- Do not mark the Dementia Exemption if there is a primary diagnosis of a serious mental illness. Do not mark Dementia Exemption if there is a diagnosis of intellectual disability, developmental disability, or a related condition.

Dementia diagnoses include the following:

1. Dementia of the Alzheimer’s Type
2. Vascular Dementia
3. Dementia due to Other General Medical Conditions
4. Substance - Induced Persisting Dementia
5. Dementia Not Otherwise Specified
6. Lewy Body Dementia
Evaluation and Medical Justification for Complex Seating Systems and Mobility Devices
Completion Instructions

This form should be completed for NEW or REPLACEMENT mobility device(s) and seating systems. It must be submitted with the Complex Seating and Mobility Device Prior Approval - Request/Authorization (MSA-1653-D). The evaluation and justification must be submitted within 90 days of the date the evaluation was completed.

The appropriate Addendum(s) must accompany the MSA-1656 & MSA-1653-D.

BENEFICIARY INFORMATION: Complete beneficiary name, date of birth, sex, mihealth number, ordering physician and physician specialty. The beneficiary name and mihealth number must be entered at the top of each subsequent page.

SECTIONS 1 THROUGH SECTION 11 MUST BE COMPLETED BY A LICENSED/CERTIFIED MEDICAL PROFESSIONAL.

NOTE: A licensed/certified medical professional means an occupational or physical therapist, a physiatrist or rehabilitation RN who has at least two years' experience in rehabilitation seating; and is not an employee of, or affiliated in any way with, the Medical Supplier with the exception of hospitals with integrated delivery models that include the supplier of the equipment and the provider of the clinical evaluation. A PTA or OTA may not evaluate for, complete or sign this document.

| 8 | Check all items that apply for mobility goals. Section is to be used if evaluator has any other comments to establish medical need, functional goals, etc. |

| 9 | Evaluator should list all equipment the beneficiary currently owns or uses. Include brand, model, serial number, description and date of purchase/rental. |

| 10 | To be completed if beneficiary is in a nursing facility. This section should be completed and signed by the Director of Nursing, Facility Administrator or Ordering/referring Physician. This page must accompany the MSA-1653-D and appropriate Addendum(s) when submitting to the MDHHS Program Review Division. |

| 11 | To be completed by the evaluator and, if applicable, all team members involved in the evaluation. Enter date of evaluation, evaluator’s name, title, telephone number, place of employment and address. If team evaluation, in Section 11, list all participants and titles (attach additional pages if necessary). The attestation page must accompany the MSA-1653-D and appropriate Addendum(s) when submitting to the Michigan Department of Health and Human Services (MDHHS) Program Review Division. |

| Notes | The applicable addendums must accompany the MSA-1656 & MSA-1653-D when requesting the authorization. Failure to include the appropriate addendum(s) may cause a delay in the authorization process. |

| Addendum A: | To be completed when requesting new or replacement manual wheelchairs with accessories, power mobility devices, and/or seating systems. |

| Addendum B: | To be completed when requesting new or replacement strollers, standers, gait trainers and children’s positioning chairs. |

| Note: | For beneficiaries residing in a nursing facility, return the completed MSA-1656, addendum(s) and MSA-1653-D to the requesting nursing facility. For beneficiaries in the community, the MSA-1656, addendum(s) and MSA-1653-D are forwarded to the ordering physician for their review. |

Michigan Department of Health and Human Services
Program Review Division
PO Box 30170
Lansing, Michigan 48909
Fax: (517) 335-0075
SECTION 1: BENEFICIARY INFORMATION

Beneficiary Name: ___________________________  mHealth Number: ___________________________
Ordering/Referring Physician: ___________________________  NPI: ___________________________
Physician Specialty: ___________________________

SECTION 2: MEDICAL HISTORY

Primary Diagnosis: ___________________________  Secondary Diagnosis: ___________________________
Onset date: ___________________________  Onset date: ___________________________
If spinal cord injury or spina bifida indicate the level of injury/impairment:
Relevant past and future surgeries:
Bowel Mgmt:  □ Continent  □ Incontinent  □ Colostomy (Indicate type):
Bladder Mgmt:  □ Continent  □ Incontinent  □ Catheter (Indicate type):
Cardio Status:  □ WFL  □ Impaired
Neuro Status:  □ Seizures  □ YES  □ NO
If YES, Frequency/Duration: ___________________________
Respiratory Status:  □ WFL  □ Impaired
Baclofen pump present?:  □ YES  □ NO  If YES, date Implanted: ___________________________
Botox?:  □ YES  □ NO  If YES, date of last injection: ___________________________
Other explain:
Height: _______  Weight: _______  Explain recent changes or trends in weight:
List medication(s) currently prescribed:
How does the management or severity of the above conditions/impairments affect the need for the equipment requested?

SECTION 3: HOME ENVIRONMENT

Beneficiary resides in:  □ House  □ Condo/town home  □ Apartment  □ Assisted Living/AFC/Group Home  □ Nursing Facility
Does beneficiary live alone?  □ YES  □ NO  If NO, does beneficiary have a caregiver?  □ YES  □ NO
If YES, who provides the care?  □ Family member  □ RN  □ LPN  □ Other (explain)
How many hours per day are provided by the caregiver?

SECTION 4: COMMUNITY ADL (Transportation)

What is the beneficiary's mode of transportation? (Check all that apply.)
□ Car  □ Van/SUV  □ Van w Lift  □ Truck  □ Taxi Cab  □ Bus  □ School Bus  □ Ambulance  □ Other
Does the beneficiary attend school or work?  □ YES  □ NO
Is the beneficiary transported in the current or requested wheelchair?  □ YES  □ NO  If NO, explain why the beneficiary cannot be transported in the current or requested chair?
Explain:

SECTION 5: SENSATION AND SKIN ISSUES

Sensation  □ Intact  □ Impaired  □ Absent  □ Hypersensitive
Pressure Relief  □ Dependent  □ Independent  □ Type of assistance needed
How does the beneficiary perform pressure relief?
Does beneficiary have a history of skin decubiti and/or flap surgery?  □ YES  □ NO
If YES, indicate location:
Does beneficiary have a current decubiti?  □ YES  □ NO
If YES, describe:
Does beneficiary have other skin issues?  □ YES  □ NO
If YES, describe:
SECTION 6: MOBILITY ASSESSMENT (Mandatory for all requests)

**Functional Ability Without Mobility Device(s)**

**Sitting:**
- WFL
- Uses UE for balance
- Contact guard assist
- Standby assist
- Minimum assist
- Moderate assist
- Maximum assist
- Dependent/unable

**Standing:**
- WFL
- Uses UE for balance
- Contact guard assist
- Standby assist
- Minimum assist
- Moderate assist
- Maximum assist
- Dependent/unable

**Transfers:**
- Independent
- Type of assistance needed:
- How does beneficiary transfer:
  - Pivot
  - Sliding
  - Mechanical Lift
  - Other: (Explain)

<table>

</tbody>
</table>

**Ambulation within 1 minute:**
- Independent > or = 150 ft.
- Ambulates with assist > or = 150 ft.
- Unable to ambulate
- Limited due to endurance - Explain:

**Complete only if power mobility item is requested (e.g., power wheelchair, scooter, power assisted wheels, etc.)**

**Visual perception:** Has visual acuity and perception that permits safe and independent operation of the equipment requested.
- YES
- NO

**Problem solving:** Has problem solving skills appropriate to operate requested power mobility item.
- YES
- NO

**If beneficiary is unable, who will complete? Explain:**

**Comprehension:** Understands and is able to follow directions and conversations that are complex or abstract; understands either spoken or written language.
- YES
- NO

**If NO, explain:**

**SECTION 7: MODIFIED ASHWORTH SCALE AND MANUAL MUSCLE EVALUATION INFORMATION**

*See Form Completion Instructions for Modified Ashworth Scale and Manual Muscle Evaluation.*

**Width at the:**
- Head: ___
- Neck: ___
- Shoulder: ___
- Trunk: ___
- Hips: ___
- Feet: ___

**Height:**
- Crown: ___ ___
- Occiput: ___ ___
- Shoulder: ___ ___
- Axilla: ___ ___
- Elbow: ___ ___
- Seat Depth: ___ ___
- Leg Length: ___ ___
- Foot Length: ___ ___

**Primitive reflexes present:**
- Asymmetrical Tonic Neck Reflex
- Symmetrical Tonic Neck Reflex
- Startle Reflex
- Other; Explain:

**Explain how this relates to equipment ordered:**
Head & Neck

- Maintains upright without support
- Maintains upright with support
- Laterally Flexed
- Flexed
- Cervical Hyperextension
- Extended
- Absent head control

Interim reimbursement request data is used to establish the amount of per diem add-on reimbursement to be included in the Medicaid Program per diem payment rate. The total amount of add-on reimbursement for the nurse aide training and testing program during the fiscal year will be adjusted through the annual settlement determination of the training and testing costs apportioned to Medicaid inpatient days.

Information included in this request may reflect estimated costs and projections for the time period indicated.

CERTIFICATION STATEMENT: To be Signed by Provider and/or Authorized Representative

I certify that this claim for adjustment is true, accurate, and prepared with my knowledge and consent, and does not contain untrue, misleading or deceptive information. In the event the actual allowable costs do not support the increased rate, the provider will reimburse the State for excess amounts received. I further agree that retrospective cost settlements will be made in accordance with the State Plan, as applicable.

PURPOSE

This form is for the provider to obtain Medicaid Program reimbursement outside the routine nursing care rate per diem for OBRA nurse aide training and testing programs. The form must be completed in order to receive interim reimbursement for those providers that have been determined to be a lockout facility, or for those facilities incurring costs in excess of interim reimbursement. Costs will be retrospectively settled to reflect the Medicaid Program’s appropriate share of actual allowable training and testing costs.

Training and testing program costs claimed for services and supplies furnished to or purchased by the facility from organizations related to the provider by common ownership or control must adhere to the related party allowable cost principles. Expenses for such transactions should not exceed expenses for like items or services in an arms-length transaction with other non-related organizations, or the cost to the related organization.

Administrative overhead costs and space costs in nursing facilities conducting in-house training are not considered training and testing program costs. The costs reported must be specifically incurred in conducting the approved nurse aide training and testing program.

Supporting accounting records such as class attendance rosters or training participation logs, purchase orders, vendor invoices, contracts, documentation verifying amounts reimbursed to employees for approved training program expenses incurred by the employee prior to employment at the facility (e.g., canceled check, training program receipt) must be maintained for audit purposes. Supporting materials should be readily identifiable as training related cost documentation and must indicate the type of training involved.

Training Program Approval Requirement - Only costs incurred relative to a Department of Licensing And Regulatory Affairs (LARA) Bureau of Community and Health Systems approved Nurse Aide Training Program may be claimed on this schedule. An approved program may be conducted by the provider's facility or by a separate entity from the provider. The provider must not report and make a claim for Medicaid Program reimbursement on this schedule for any costs incurred and associated with providing training by the lockout facility during the lockout time period. Allowable nurse aide training program costs lockout time period are limited to the costs incurred in obtaining training and testing outside the facility from an approved nurse aide training program.

Note: If the facility maintains separate cost center reporting for the training program, enter the appropriate costs as identified.

ITEM EXPLANATION

1. Provider's Cost Reporting Period
   Enter the fiscal period coinciding with the provider’s cost reporting period.

2. Mode of Training
   It is possible that providers may utilize both in-house staff and outside contractors. If a chain organization or group home ownership uses an approved central training program, indicate the training as “in-house” and check “centralized training.” If multiple outside contractors are used, indicate each contractor and the time periods utilized.

6. Lockout Facility
   A facility identified by the LARA Bureau of Community and Health Systems as a “lockout facility” cannot conduct a training and testing program, cannot be a training/clinical practice site for another approved program, and cannot conduct clinical skills testing. The facility is notified of the lockout determination action by the LARA Bureau of Community and Health Systems.

8. Estimated Total Inpatient Days for the Period
   Indicate the appropriate number of LTC total inpatient days of care estimated to be rendered during the time period reported on this form.

13. Name of Facility
   Enter the provider name under which Medicaid payments are issued to the provider.

15. County Number
   Enter the two-digit county number.

14-16. Provider Location
   Enter street address, city (village and/or township) and zip code of the facility’s physical location.

17. Provider NPI Number
   Enter the Nursing Facility's ten-digit provider NPI number.

18. Provider's License Number
   Enter the three-digit license number.
Facility Training Staff
Payroll-related costs for facility employees incurred by the approved program's direct training time or the nurse aide training program’s preparation time.

Nurse Aide Training Consultants
Costs incurred for non-facility staff engaged to provide instruction or consultation for the facility’s approved nurse aide training program.

Nurse Aide Student Staff
Payroll costs for facility employees incurred while the student is engaged in the approved training program or traveling to and from the off-site approved training location, or is engaged in off-site testing or traveling to and from the off-site testing location.

Training Program Supplies
Cost incurred for supplies and materials used in conducting an approved training program.

Training Program Transportation
Travel or transportation costs incurred by facility staff conducting the approved training program activity and testing, or for off-site nurse aide training and testing. Identify costs separately for training staff and student staff.

Outside Contracted Approved Nurse Aide Training Program
Paid Directly By Facility - Costs incurred to obtain nurse aide training through an outside entity approved training program. Payment for subject training is made directly from the nursing facility to the training entity and the nurse aide trainees are employed by the nursing facility.
Reimbursed To Employee Staff - Costs incurred to reimburse a facility employee who had personally paid for an approved nurse aide training program prior to becoming an employee at the facility. Reasonable and necessary expenses incurred by the employee through participation and completion of a Bureau of Community and Health Systems approved training program for which the aide has made payment are eligible for remuneration. Only the cost of tuition and books are reimbursed. The aide must be hired by a facility within 12 months after incurring this expense. The facility must obtain receipts and retain documentation from the employee to verify the expense.

Nurse Aide Testing Fees
Paid Directly By Facility - Costs incurred for State-run testing. Payment for testing fees is made directly from the nursing facility to the testing authority for aides employed at the facility.
Reimbursed To Employee Staff - Costs incurred to reimburse a facility employee who had personally paid for State-run testing prior to becoming an employee at the facility. The aide must be hired by a facility within 12 months after paying the testing fee. The facility must obtain receipts and retain documentation from the employee to verify the expense.

Other Training Program Costs
Costs incurred that are not classified in the identified cost categories 1-7.

Rental costs for space located off-site of the facility are reimbursable under training and testing only if the space is used solely for the training and testing program. Space costs not meeting this requirement are reimbursable within the plant cost component of Michigan’s prospective reimbursement system. Reasonable rental expense for training equipment necessary to the approved training program is an eligible cost.

Enter the detail and cost of these individual expenses in the yellow shaded cells. The total of these items will be automatically calculated by use of the F9 key.

Total Training Program Cost Before Equipment Allowance
Subtotal of Lines 1 through 8b costs. This total will be automatically calculated by use of the F9 key.

Training Program Equipment Use Allowance
An annual cost allowance is made for equipment purchased specifically for the Bureau of Community and Health Systems approved nurse aide training program. Such equipment purchases are not included in the plant asset costs of the facility for routine nursing care. An annual allowance of 15 percent of the equipment purchase price is reported as a cost of the training program for as long as the equipment is used in the program, but cannot exceed seven years.

The use allowance is an annual percentage adjustment made to the 15 percent amount if the cost report period differs from 12 months. Line 10.a. and Line 10.b. will automatically be calculated.

Enter Line 10.c. the cost of the equipment purchased as required in the yellow shaded cells.
General Instructions

The MSA-115 must be used by Medicaid-enrolled outpatient hospitals, outpatient therapy providers, nursing facilities and home health agencies to request prior authorization (PA) for therapy services. MDHHS requires that the MSA-115 be typewritten, handwritten forms will not be accepted. Fill-in enabled copies of this form can be downloaded from the Michigan Department of Health and Human Services (MDHHS) website www.michigan.gov/medicaidproviders >> Policy, Letters & Forms. The PA request must be complete and of adequate clarity to permit a determination of the appropriateness of the service without examination of the beneficiary.

PA may be authorized for a period not to exceed six months for outpatient therapy providers and outpatient hospitals, or two months for home health agencies and nursing facilities. If continued treatment is necessary, a subsequent request for PA must be submitted. The provider should retain a copy of the PA form until the approval or denial is determination is received.

For complete information on covered services, PA, and documentation requirements, refer to the Therapy Services Chapter of the Michigan Medicaid Provider Manual located at the MDHHS website www.michigan.gov/medicaidproviders >> Policy, Letters & Forms >> Medicaid Provider Manual.

Attachments/Additional Documentation

All additional attachments/documentation submitted with the request must contain the beneficiary name and mihealth card number, provider name and address, and the provider’s National Provider Identifier (NPI) number.

When requesting the initial PA, the provider must attach a copy of the initial evaluation and treatment plan to the PA request.

Form Completion

**Form Submission:**

PA request forms for all eligible Medicaid beneficiaries must be submitted electronically*, mailed or faxed to:

MDHHS – Program Review Division  
P.O. Box 30170  
Lansing, Michigan 48909  
Fax Number: (517) 335-0075

If submitting electronically, the completed MSA-115 must be uploaded along with the supporting clinical documentation required.

To check the status of a PA request, contact the Program Review Division via telephone at **1-800-622-0276** or electronically via the [CHAMPS Provider Portal](https://milogintp.michigan.gov) located at [https://milogintp.michigan.gov](https://milogintp.michigan.gov).

**Authority:** Title XIX of the Social Security Act.  
**Completion:** Is voluntary but is required if payment from applicable programs is sought.

The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person's eligibility.
The provider is responsible for eligibility verification. Approval does not guarantee beneficiary eligibility or payment. All fields must be completed and typewritten.

31. THERAPIST CERTIFICATION

The patient named above (parent or guardian if applicable) understands the necessity to request prior approval for the services indicated. I understand that services requested herein require prior approval and, if approved and submitted on the appropriate invoice, payment and satisfaction of approved services will be from Federal and State funds. I understand that any false claims, statements or documents or concealment of a material fact may lead to prosecution under applicable Federal or State law.

33. CONSULTANT REMARKS

☐ See CHAMPS

35. CONSULTANT SIGNATURE  DATE
The MSA-6544-B must be used by Medicaid enrolled providers to request provider services that require prior authorization (PA) (e.g. out-of-state care).

MDHHS requests that the MSA-6544-B be typewritten to facilitate processing. A Word fill-in enabled version of this form can be downloaded from the MDHHS website [www.michigan.gov/medicaidproviders >> Policy, Letters & Forms. For information on required procedure codes, modifiers, documentation, and appropriate quantity amounts, refer to the following documents:

- Standards of Coverage portion of the provider-specific chapters of the Medicaid Provider Manual.
- Billing & Reimbursement for Professionals Chapter of the Medicaid Provider Manual.
- Provider-specific databases on the MDHHS website. [www.michigan.gov/medicaidproviders >> Billing and Reimbursement >> Provider Specific Information.]
- CHAMPS Medicaid Code and Rate Reference Tool available in CHAMPS via the External Links menu.

Completion of this form is as follows:

| Box 1 | MDHHS Use Only |
| Box 22 | Indicate whether this is the first request for services or if this is a renewal request for ongoing services. |
| Box 24 | Enter a complete description of the services, procedures, etc. requested. |
| Box 25 | Enter the HCPCS Procedure Code. |
| Box 26 | Enter the applicable HCPCS Modifier. |
| Box 27 | Enter the quantity of the services requested. If an injectable drug is requested, indicate the number of billing units requested. |
| Box 28 | Enter the dates for which the requested procedure or service will take place. Include the dates of travel, if travel assistance will be needed. |
| Box 29 | Enter the beneficiary’s primary and secondary diagnoses or the CSHCS qualifying diagnosis (list both the code and description). |
| Box 30 | Any additional remarks regarding the request should be listed in this box such as verbal authorization date, retroactive date of service if being requested. Provide other insurance coverage for services requested. |
| Box 31 | Check each box that corresponds to documentation included in the request. No request should leave all boxes unchecked. |
| Box 32 | Must be completed for all requests. |

**Form Submission**

PA request forms and required documentation for all eligible Medicaid beneficiaries must be mailed or faxed to:

**MDHHS – Behavioral and Physical Health and Aging Services Administration**
Program Review Division
P.O. Box 30170
Lansing, Michigan 48909

Fax Number: (517) 335-0075

The status of a PA request may be reviewed in CHAMPS. For additional questions, contact the MDHHS – Behavioral and Physical Health and Aging Services Administration, Program Review Division via telephone at **1-800-622-0276**.

<tr>
<th>Patient Name (First, MI, Last)</th>
<th>Date of Birth (MM/DD/YY)</th>
<th>Gender</th>
</tr>
</thead>
<tbody>
<tr>
<td>Address (number, street, apt., or lot #)</td>
<td>City</td>
<td>State</td>
</tr>
</tbody>
</table>

| County of Residence | Social Security Number | Medicaid Beneficiary ID Number | Medicare ID Number |

Does this patient have a court-appointed guardian or other legal representative?  
- [ ] No  
- [ ] Yes  

If yes, give Name of Legal Representative  

County in which the legal representative was appointed  

| Address (number, street, apt., or lot #) | City | State | Zip Code |

| Referring Agency Name | Telephone Number | Admission Date (actual or proposed) |

| Nursing Facility Name (proposed or actual) | County Name |

| Nursing Facility Address (number and street) | City | State | Zip Code |

Sections 3 and 4 of this form must be completed by a registered nurse, licensed bachelor, or master social worker, licensed professional counselor, psychologist, physician's assistant, nurse practitioner or a physician.

## SECTION 3 – SCREENING CRITERIA (All 6 items must be completed.)

1. The person has a current diagnosis of [ ] Mental Illness or [ ] Dementia  
2. The person has received treatment for [ ] Mental Illness or [ ] Dementia (within the past 24 months)  
3. The person has routinely received one or more prescribed antipsychotic or antidepressant medications within the last 14 days.  
4. There is presenting evidence of mental illness or dementia, including significant disturbances in thought, conduct, emotions, or judgment. Presenting evidence may include, but is not limited to, suicidal ideations, hallucinations, delusions, serious difficulty completing tasks, or serious difficulty interacting with others.
5. The person has a diagnosis of an intellectual/developmental disability or a related condition including, but not limited to, epilepsy, autism, or cerebral palsy and this diagnosis manifested before the age of 22. □ No □ Yes

6. There is presenting evidence of deficits in intellectual functioning or adaptive behavior which suggests that the person may have an intellectual/developmental disability or a related condition. These deficits appear to have manifested before the age of 22. □ No □ Yes

Note: If you checked “Yes” to items 1 and/or 2, checked the word “Mental Illness” and/or “Dementia.”

If yes, please explain

Note: The person screened shall be determined to require a comprehensive Level II OBRA evaluation if any of the above items are "Yes" UNLESS a physician, nurse practitioner or physician’s assistant certifies on form DCH-3878 that the person meets at least one of the exemption criteria.

SECTION 4 - CLINICIAN’S STATEMENT: I certify to the best of my knowledge that the above information is accurate.

<table>
<thead>
<tr>
<th>Clinician Signature</th>
<th>Date</th>
<th>Name (type or print)</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>Degree/License</th>
<th>Telephone Number</th>
</tr>
</thead>

The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person’s eligibility.

AUTHORITY: Title XIX of the Social Security Act

COMPLETION: Is voluntary, however, if NOT completed, Medicaid will not reimburse the nursing facility.

DISTRIBUTION: If any answer to items 1 – 6 in SECTION 3 is "Yes", send ONE copy to the local Community Mental Health Services Program (CMHSP), with a copy of form DCH-3878 if an exemption is requested. The nursing facility must retain the original in the patient record and provide a copy to the patient or legal representative.
This form is used to identify prospective and current nursing facility residents who meet the criteria for possible mental illness or intellectual/developmental disability, or a related condition and who may be in need of mental health services.

Sections II and III must be completed by a registered nurse, licensed bachelor, or master social worker, licensed professional counselor, psychologist, physician's assistant, nurse practitioner or physician.

Preadmission Screening or Hospital Exempted Discharge: The referral source completing the Level I Screening (DCH-3877), must complete and provide a copy to the proposed nursing facility prior to admission. Check the appropriate box in the upper right-hand corner.

Annual Resident Review or Change in Condition: This form must be completed by the nursing facility. Check the appropriate box in the upper right-hand corner.

Section II – Screening Criteria – All 6 items in this section must be completed. The following provides additional explanation of the items.

1. **Mental Illness:** A current primary diagnosis of a mental disorder as defined in the American Psychiatric Association Diagnostic and Statistical Manual of Mental Disorders.
   - **Current Diagnosis** means that a clinician has established a diagnosis of a mental disorder within the past 24 months. Do NOT mark “Yes” for an individual cited as having a diagnosis "by history" only.

2. **Receipt of treatment for mental illness or dementia within the past 24 months** means any of the following: inpatient psychiatric hospitalization; outpatient services such as psychotherapy, day program, or mental health case management; or referral for psychiatric consultation, evaluation, or prescription of psychopharmacological medications.

3. **Antidepressant and antipsychotic medications** mean any currently prescribed medication classified as an antidepressant or antipsychotic, plus Lithium Carbonate and Lithium Citrate.

4. **Presenting evidence** means the individual currently manifests symptoms of mental illness or dementia, which suggests the need for further evaluation to establish causal factors, diagnosis, and treatment recommendations. Further evaluation may need to be completed if evidence of suicidal ideation, hallucinations, delusion, serious difficulty completing tasks or serious difficulty interacting with others.

5. **Intellectual/Developmental Disability/Related Condition:** An individual is considered to have a severe, chronic disability that meets ALL 4 of the following conditions:
   a. It is manifested before the person reaches age 22.
   b. It is likely to continue indefinitely.
   c. It results in substantial functional limitations in 3 or more of the following areas of major life activity: self-care, understanding and use of language, learning, mobility, self-direction, and capacity for independent living.
   d. It is attributable to:
      - Intellectual/Developmental Disability such that the person has significant subaverage general intellectual functioning existing concurrently with deficits in adaptive behavior and manifested during the developmental period;
      - cerebral palsy, epilepsy, autism; or
• any condition other than mental illness found to be closely related to Intellectual/Developmental Disability because this condition results in impairment in general intellectual functioning OR adaptive behavior similar to that of persons with Intellectual/Developmental Disability and requires treatment or services similar to those required for these persons.

6. **Presenting evidence** means the individual manifests deficits in intellectual functioning or adaptive behavior, which suggests the need for further evaluation to determine the presence of a developmental disability, causal factors, and treatment recommendations. These deficits appear to have manifested before the age of 22.

**Note:** When there are one or more "Yes" answers to items 1 – 6 under SECTION II, complete form DCH-3878, Mental Illness/Intellectual/Developmental Disability/Related Condition Exemption Criteria Certification only if the referring agency is seeking to establish exemption criteria for a dementia, state of coma, or hospital exempted discharge.
Michigan Department of Health and Human Services
Completion Instructions for MSA-0732
Private Duty Nursing Prior Authorization – Request for Services

The MSA-0732 form (page 2) must be submitted every time services are requested, i.e., before services can begin and for each specified authorization period thereafter, no less than 15 days prior to the end of the current authorization period. MDHHS requests that the MSA-0732 be typewritten to facilitate processing.

This form must be used to request Prior Authorization (PA) for Private Duty Nursing (PDN) services for beneficiaries with Medicaid coverage under 21 years of age. Private Duty Nursing is not a benefit under Children’s Special Health Care Services (CSHCS). Beneficiaries with CSHCS coverage may be eligible for PDN under Medicaid. A request to begin services may be submitted by a person other than the PDN such as the hospital Discharge Planner, CSHCS case manager, physician, or physician’s staff person. When this is the case, the person submitting the request must do so in consultation with the PDN who will be assuming responsibility for the care of the beneficiary. If services are being requested for more than one beneficiary in the home, a separate form must be completed for each beneficiary.

Refer to the Medicaid Provider Manual, Private Duty Nursing Chapter, Prior Authorization Subsection, for the listing of required documentation to accompany each request.

Completion of this form is as follows:

<table>
<thead>
<tr>
<th>Item#</th>
<th>Instructions</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Prior Authorization Number. MDHHS use only.</td>
</tr>
<tr>
<td>2</td>
<td>Check specific box as to whether this is an initial or renewal request. If a renewal, check the INCREASE UNITS or DECREASE UNITS box only if this request demonstrates an increase or decrease in time from the previous authorization period. Time is authorized and billed in 15-minute incremental units (1 unit = 15 minutes).</td>
</tr>
<tr>
<td>3 - 7</td>
<td>PDN provider information. Provide complete agency name, or name of individual (last, first, and middle initial). Designate whether RN or LPN. Include NPI number, phone number, address, and fax number.</td>
</tr>
<tr>
<td>8 - 14</td>
<td>Beneficiary information. Provide complete name and birth date (month, day, and year), sex, midearth card number, complete address, county, and primary diagnosis using the appropriate ICD code only.</td>
</tr>
<tr>
<td>15 - 18</td>
<td>Other insurance information if applicable, including name of company and beneficiary’s group/policy and certificate/contract numbers.</td>
</tr>
<tr>
<td>19 - 25</td>
<td>Hospital information including complete address and phone number, anticipated discharge date, and name and contact information of Discharge Planner if beneficiary is currently hospitalized.</td>
</tr>
<tr>
<td>26 - 30</td>
<td>Ordering physician information. Provide complete name (including MD or DO), NPI number, phone number, address, and fax number.</td>
</tr>
<tr>
<td>31 - 35</td>
<td>Description of the service(s) to be provided utilizing HCPCS code T1000 and modifier TD for RN or TE for LPN. Use modifier TT if caring for more than one beneficiary. Include the number of total units per month required to provide the service(s) with the start date and end date, if known.</td>
</tr>
<tr>
<td>36 - 49</td>
<td>Home environment information. Include number of siblings residing in the home (include step and foster children) if applicable and if they receive PDN. Include child’s name and midearth card number if receiving PDN. Also provide the number of other individuals in the home requiring care (e.g., elderly parent, grandparent, disabled spouse, sibling), name(s) and number of caregivers for the beneficiary for whom services are being requested, and whether the caregiver(s) either work and/or attend school outside of the home. If so, how many hours are spent working and/or attending school. (Additional pages may be required.)</td>
</tr>
<tr>
<td>41 - 42</td>
<td>Current school information if child is or will be attending school during the authorization period when PDN services are being provided. Include number of hours per day and per week, including travel time.</td>
</tr>
<tr>
<td>50 - 56</td>
<td>If more than one PDN or PDN agency is involved, their name(s), NPI, phone number(s), fax number(s), and which PDN will be managing the care plan (i.e., the provider named in items 3 – 7, or the provider named in this space).</td>
</tr>
<tr>
<td>57</td>
<td>List all other services in the home. Failure to disclose all services in the home may result in recoupment of Medicaid dollars for PDN reimbursement.</td>
</tr>
<tr>
<td>58</td>
<td>The Provider’s signature certifies that (1) the individual PDN or agency requesting the services understands the necessity for obtaining prior authorization for PDN and; (2) the information provided on this form is accurate and complete.</td>
</tr>
<tr>
<td>59</td>
<td>Signature certifies that Parent/Guardian of beneficiary attests that information provided on this form is accurate and complete to the best of their ability.</td>
</tr>
</tbody>
</table>

Form Submission

The completed MSA-0732 (page 2) and required documentation must be mailed or faxed to:

Michigan Department of Health and Human Services
Program Review Division
P.O. Box 30170
Lansing, MI 48909

Fax: (517) 241-7813

Questions should be directed to MDHHS – Behavioral and Physical Health and Aging Services Administration, Program Review Division via telephone at 1-800-622-0276.

Authority: Title XIX of the Social Security Act

COMPLETION: Is voluntary, but is required if payment from applicable programs is sought.

The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person’s eligibility.

MSA-0732 (6/2022) Previous editions are obsolete.
### Private Duty Nursing

**Prior Authorization – Request for Services**

1. **Prior Authorization Number (MDHHS Use Only)**

The provider is responsible for eligibility verification. Authorization does not guarantee beneficiary eligibility or payment.

The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person’s eligibility.

AUTHORITY: Title V and Title XIX of the Social Security Act  
COMPLETION: Is voluntary.
COMPLETE INSTRUCTIONS FOR DCH-0078, REQUEST TO ADD, TERMINATE OR CHANGE OTHER INSURANCE

DCH-0078 is a formal request for change in other insurance status and must be submitted by the Medicaid provider, Medicaid Health Plan, Local Health Department or the Michigan Department of Health and Human Services caseworker to add, terminate, or change beneficiary insurance information other than Medicaid.

INSTRUCTIONS:

To add, terminate or change other insurance on-line, visit https://www.Michigan.gov/ReportTPL to access the form and instructions.

To submit the form via fax or mail:
- PRINT or TYPE to complete the form
- Place a check mark in the appropriate "Add," "Terminate," or "Change" field
- Sections denoted by * are mandatory to be completed
- Attach clear copy of insurance card (front and back) when adding insurance (if available)
- Retain a COPY in beneficiary file
- Submit form and applicable attachments
  via: Fax Number: 517-346-9817

Mail to:
  Michigan Department of Health and Human Services
  Third Party Liability Division
  Bureau of Medicaid Policy, Operations & Actuarial Services
  PO Box 30479
  Lansing MI 48909

Allow 7-10 business days for the request to be completed. To verify the request has been completed, view the beneficiary eligibility information in the Community Health Automated Medicaid Processing System (CHAMPS).

The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person’s eligibility.

AUTHORITY: Title V and Title XIX of the Social Security Act

COMPLETION: Is voluntary.
SAMPLE NOTICE OF NON-COVERAGE

(Hospital Letterhead)

(Name of Patient) (Date of Notice)
(Address)
(City, State, Zip)

(Medical Record Number)
(Beneficiary Number)
(Attending Physician’s Name)
(Admission Date)

Dear (Name of Patient)

SUBJECT: CONTINUED STAY NOTICE OF NON-COVERAGE

As a Medicaid beneficiary, it is important for you to understand that there are circumstances when Medicaid does not pay for hospital care or certain services provided in the hospital. Medicaid pays for hospital care when the services are medically necessary and delivered in the most appropriate setting.

The Utilization Review Committee of (Name of Hospital) has reviewed the medical services you have received for (Specify services or condition) from (Date of Admission) to (Date of Notice). The Review Committee has determined that your continued stay in an acute care hospital is not medically necessary, and the medical services you are receiving for (Specify services or condition) could be safely rendered in another less costly setting. You should discuss with your attending physician the arrangements for the health care you may require.

You will not be responsible for payment of the services which are rendered by this hospital from (Date of Admission) through the date you receive this notice, except for payment of deductible, coinsurance, or any convenience services or items not covered by Medicaid. If you decide to stay in the hospital, you will be responsible for payment of all services provided to you by this hospital beginning the day after you receive this notice.

For example: If you receive this notice on _______ you will be responsible for payment of services provided beginning________.

IMPROve Health is the review organization authorized by the Medicaid Program to review on behalf of the patient or his/her physician any hospital care denied to Medicaid patients in the State of Michigan.

If you disagree with this decision and you remain in the hospital, you or your representative may request an immediate review by IMPROve Health. You may request this by calling:

IMPROve Health (Formerly known as MPRO)
Attention: Medicaid PACER Program
625 Kenmore Ave., SE, Ste. 350
PMB 47995
Grand Rapids, MI 49546-2395
"SAMPLE"
NOTICE OF NON-COVERAGE

(Hospital Letterhead)

(Name of Patient)  (Date of Notice)
(Address)  
(City, State, Zip)

(Medical Record Number)
(Beneficiary Medicaid Number)
(Attending Physician’s Name)
(Admission Date – if applicable)

Subject:  NOTICE OF NON-COVERAGE FOR
INPATIENT HOSPITAL ADMISSION

Dear (Name of Patient):

As a Medicaid beneficiary, it is important for you to understand that there are circumstances when Medicaid does not pay for hospital care or inpatient services provided in the hospital. Medicaid pays for hospital care when the services are medically necessary and delivered in the most appropriate setting.

NOTICE OF NON-COVERAGE
(Name of Hospital) Utilization Review (UR) Committee has reviewed your physician’s request for your hospital admission. The request has been denied. The hospital’s UR Committee has determined that your admission to (Name of Hospital) for treatment of (Specify services or condition) is either: 1) not medically necessary, or 2) that the medical services you may require for the treatment of your condition can be safely rendered in another less costly setting. You should discuss arrangements for any health care treatment you may require with your physician.

APPEAL RIGHTS
IMPROve Health is the review organization authorized by the Medicaid Program to review on behalf of the patient or his/her physician any hospital care denied to Medicaid patients in the State of Michigan.

If you disagree with this decision, you or your representative must request an immediate review by IMPROve Health. You must request this review by calling:

IMPROve Health (Formerly known as MPRO)
Attention: Medicaid PACER Program
625 Kenmore Ave., SE, Ste. 350
PMB 47995
Grand Rapids, MI 49546-2395

If IMPROve Health confirms the hospital’s initial decision, you will be notified in writing of its decision. If you decide to proceed with the admission to the hospital, you will be responsible for the payment of all services provided to you by the hospital beginning with the date of admission.

If IMPROve Health overturns the hospital’s decision, you will also be notified in writing of IMPROve Health’s decision. The hospital will contact your physician and make arrangements for your admission to the hospital. Medicaid will cover the cost of your hospital stay except for the payment of any deductible, coinsurance, or convenience services or items not covered by Medicaid.
Maternal Infant Health Program Provider and Medicaid Health Plan Care Coordination Agreement

This agreement is made and entered into this _____ day of _____, in the year _____ by and between _________________________________ (Medicaid Health Plan) and _________________________________ (Maternal Infant Health Program provider).

A. Legal Basis

Whereas, in order to expand enrollment, the Michigan Department of Health and Human Services (MDHHS) has established a competitive bid process that has resulted in contracts with Medicaid Health Plans (MHPs) that are deemed to be qualified to provide specified health care services to Medicaid beneficiaries; and

Whereas, Medicaid-covered maternal and infant health services will be provided through arrangements between MDHHS, MDHHS contracted MHPs, and selected Maternal Infant Health Program (MIHP) providers.

Now, therefore, the MHP and the MIHP provider agree as follows:

B. Terms of Agreement

This agreement will be effective ________ in the year ________. This agreement will be subject to amendment due to changes in the contract between MDHHS and the MHP or changes to the MIHP Medicaid policy certification requirements.

This agreement is effective upon execution and will continue for the length of MHP and MDHHS contract period. Either party may cancel this agreement for cause upon 30 days written notice. Reasons for cause include: breach of duty or obligation; fraud or abuse; federal or state sanctions; and failure to comply with state law or rules the Medicaid Provider Manual, or the MIHP Operations Guide. The terminating party is required to notify MDHHS at least 30 days prior to termination. This agreement will automatically terminate when an MIHP provider fails to maintain the certification requirements of MDHHS.

Once a signed agreement is obtained from both parties, the provisions of this agreement will be extended for a timeframe consistent with the MHP and MDHHS contract period, and the MIHP provider maintaining certification with MDHHS. Either party may cancel this agreement upon 30 days written notice. MDHHS must be notified of the termination of this agreement.
C. Purpose, Administration and Point of Authority

MIHP services are home-visiting preventive services provided to pregnant women, mothers, and their infants to promote healthy pregnancies, positive birth outcomes, and healthy infant growth and development. These support services are to be provided by a multidisciplinary team of health care professionals consisting of a qualified licensed registered nurse, licensed social worker and, if available, a registered dietitian and/or infant mental health specialist.

MIHP services are intended to supplement regular prenatal/infant care and to assist physicians (MD, DO), certified nurse midwives (CNMs), and nurse practitioners (NPs) contracted with MHPs. In compliance with MIHP and MHP guidelines, MIHP providers are to coordinate care with medical care providers, mental health providers, and the MHPs, as well as assist in the coordination of transportation services as needed for health care, support services and pregnancy-related appointments.

MDHHS/MHP Contracts and MHP/MIHP Care Coordination Agreements will be available for review upon request by MDHHS. The intent of the Care Coordination Agreement is to explicitly describe the services to be coordinated and the essential aspects of collaboration between the MHP and the MIHP provider.

The MHP shall designate in writing to the MIHP provider the person who has authority to administer this agreement. The MIHP provider shall designate in writing to the MHP the person who has authority to administer this agreement.

D. Areas of Responsibility

Mutually Served Consumers

Mutually served consumers refers to MHP beneficiaries who also qualify for MIHP services. All pregnant and infant Medicaid beneficiaries may qualify for MIHP services. The intent of establishing written procedures between the MHP and the MIHP provider is to assure service coordination and continuity of care for persons receiving services from both entities.

Services to be Provided by the MHP

The MHP will provide Medicaid covered services to Medicaid beneficiaries as required by the MHP contract with MDHHS. MIHP services are voluntary. Beneficiaries may refuse MIHP services at any time.

The MHP will notify all Medicaid beneficiaries enrolled in the MHP of the availability of MIHP services at the time of enrollment. The MHP shall provide a referral for MIHP services for those pregnant and infant Medicaid beneficiaries who are not currently receiving MIHP services or receiving equivalent maternal or infant support services from an evidence-based home visiting program. Referrals can be made in person, by letter, email, fax, or telephone.
Services to be Provided by the MIHP Provider

The MIHP provider will provide the following services:

- Psychosocial and nutritional screening and assessment;
- Plan of care development;
- Professional intervention services by a multidisciplinary team consisting of a qualified licensed registered nurse and licensed social worker and, when available, a registered dietitian and/or an infant mental health specialist;
- Coordination with the MHP for transportation services as needed for health care, substance use disorder treatment, support services, oral health services, and/or pregnancy-related appointments.
- Referral to community services (e.g. mental health, substance use disorder);
- Referral to or provision of childbirth or parenting education classes;
- Coordination with medical care providers; and
- Coordination with the MHP.

MIHP providers will bill and receive reimbursement for MIHP services provided to MHP members as noted in the provider contract established with the applicable MHP.

E. Medical Coordination

Both parties agree to establish a process for clinical staff to communicate on a regular basis to review the care coordination plans and status of mutually served beneficiaries in accordance with applicable privacy laws such as HIPAA, the Mental Health Code and 42 CFR Part 2. This may involve the sharing of written documents and verbal reports. Both parties will collaborate on development of referral procedures and effective means of communicating the need for individual referrals. The MIHP provider will provide the MHP with names of MHP beneficiaries receiving MIHP services on a regular basis, utilizing a standardized form. Communication may include assessment/screening results, the plan of care, and discharge summaries upon request.

The MIHP and MHP will accept and use the MDHHS behavioral health consent form (Consent to Share Behavioral Health Information form [MDHHS-5515]) to disclose medical information protected under the Mental Health Code or substance use disorder information under 42 CFR Part 2.

F. Grievance and Appeals

MIHP providers and MHPs are required to establish internal processes for resolution of grievances and appeals from Medicaid beneficiaries. Medicaid beneficiaries may file a grievance or appeal on any aspect of service provided to them by the MIHP or the MHP in accordance with MIHP and MHP grievance and appeal policies.
The MIHP provider is required to direct beneficiaries to the MHP’s grievance and appeal process as appropriate. The MHP is required to direct beneficiaries to the MIHP provider’s grievance and appeal process as appropriate.

Both parties will participate in grievance and appeal policies and shall cooperate in identifying, processing, and promptly resolving all grievances and appeals. Both parties are responsible for informing the other about their grievance and appeal process.

G. Dispute Resolution

Both parties agree to participate in a dispute resolution process in the event that the MHP or the MIHP provider contests a decision or action by the other party related to the terms of this agreement.

The dispute resolution process should include:

- Request to the other party for reconsideration of the disputed decision or action.
- Appeal to MDHHS regarding a disputed decision by an MHP, or for a disputed decision by an MIHP provider.

H. Transportation

The MHP and the MIHP provider each have specific requirements for coordinating transportation services for Medicaid beneficiaries. These responsibilities are outlined in the MHP contract with MDHHS, the contract between the MIHP and the MHP and in the Maternal Infant Health Program Chapter of the Medicaid Provider Manual.

The MIHP provider may coordinate transportation in accordance with the established MIHP/MHP provider agreement or refer the Medicaid beneficiary to utilize the MHP transportation benefit to access MHP covered services, substance use disorder treatment, oral health services, support services and/or pregnancy-related appointments.

Transportation must be arranged and provided within a reasonable timeframe to meet the needs of the beneficiary. The provision or arrangement of transportation may not be delayed due to disagreements between the MIHP and MHP regarding financial responsibility for transportation. Disputes as to payment of transportation services may be handled through the dispute resolution process.

I. Quality Improvement

Both parties agree to have mechanisms in place to conduct Quality Improvement activities to monitor the coordination of services. The MIHP provider and the MHP shall participate in quality improvement programs and shall cooperate in conducting reviews and audits of care.
## J. Governing Laws

Both parties agree that performance under this agreement will be conducted in compliance with all federal, state and local laws, regulations, guidelines, and directives.

Special Services Prior Approval - Request/Authorization
Completion Instructions

The MSA-1653-B must be used by Medicaid enrolled DME, Medical Suppliers, Orthotists, Prosthetists, Hearing Aid Dealers, Audiologists and Cochlear Manufacturers.

MDHHS requests that the MSA-1653-B be typewritten to facilitate processing. A Word fill-in enabled version of this form can be downloaded from the MDHHS website www.michigan.gov/medicaidproviders >> Policy, Letters & Forms. The form is generally self-explanatory. For information on required modifiers, documentation, and appropriate quantity amounts, refer to the following documents:

- Standards of Coverage portion of the provider-specific chapters of the Medicaid Provider Manual.
- Billing & Reimbursement for Professionals Chapter of the Medicaid Provider Manual.
- Provider-specific databases on the MDHHS website. www.michigan.gov/medicaidproviders >> Billing and Reimbursement >> Provider Specific Information.

Completion of this form is as follows:

<table>
<thead>
<tr>
<th>Box</th>
<th>Description</th>

Form Submission

PA request forms and required documentation for all eligible Medicaid beneficiaries must be mailed or faxed to:

MDHHS – Behavioral and Physical Health and Aging Services Administration
Program Review Division
P.O. Box 30170
Lansing, Michigan 48909

Fax Number: (517) 335-0075

To check the status of a PA request, contact the MDHHS – Behavioral and Physical Health and Aging Services Administration, Program Review Division via telephone at 1-800-622-0276.

AUTHORITY: Title XIX of the Social Security Act
COMPLETION: Is voluntary, but is required if payment from applicable programs is sought.

The Michigan Department of Health and Human Services is an equal opportunity employer, services and programs provider.

The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person's eligibility.
The provider is responsible for eligibility verification. Approval does not guarantee beneficiary eligibility or payment.

The Michigan Department of Health and Human Services will not exclude from participation in, deny benefits of, or discriminate against any individual or group because of race, sex, religion, age, national origin, color, height, weight, marital status, partisan considerations, or a disability or genetic information that is unrelated to the person’s eligibility.
DCH-0893, VISION SERVICES APPROVAL/ORDER INSTRUCTIONS

GENERAL INSTRUCTIONS
The DCH-0893 must be used by Medicaid enrolled vision providers to request Prior Approval (PA) and/or order optical hardware for vision services. MDHHS requests that the DCH-0893 be typewritten to facilitate processing. A fill-in enabled copy of this form can be downloaded from the MDHHS website www.michigan.gov/medicaidproviders >> Policy, Letters & Forms. The request for PA must be complete and of adequate clarity to permit a determination of the appropriateness of the service without examination of the beneficiary. The form is generally self-explanatory. The following instructions are to assist in completing the DCH-0893.

Note
• If prior authorization is required, attach documentation of medical necessity and the detailed training plan (if applicable) pursuant to the Medicaid Provider Manual.
• If applicable, complete and attach form MSA-0891, Provision of Low Vision Services and Aids Support Documentation.
• If applicable, complete and attach form MSA-0892, Documentation of Medical Necessity for the Provision of Contact Lenses.

Specifications from the beneficiary’s previous lens(es). This is applicable for diopter changes or replacements, as well as when requesting frames only. **Note:** The only time this item is left blank is for initial spectacles.

**28 – 29** MDHHS use only.

**SUBMISSION INSTRUCTIONS**

**Prior Approvals** (PA) requests should be received by the MDHHS Vision Contract Manager no more than 30 calendar days from the date of order. If received beyond 30 days, the provider must include a detailed explanation of why the form submission was delayed.

The provider should retain a copy of the completed form for their file and mail or fax the DCH-0893 to:

**MDHHS Vision Contract Manager**
**Program Review Division**
**PO Box 30170**
**Lansing, MI 48909**
**Fax: 517-335-0075**

Upon completion of the PA process, a copy of the DCH-0893 is returned to the provider.

**Optical Hardware Order** - Orders placed with the vision contractor must be received no more than 30 calendar days after the date of order. If beyond the 30 days, the contractor will return the order to the provider who must explain to the Medicaid Program Review Division why the form submission was delayed and request an exception from the time limit.

When placing an order with the contractor, the provider should retain a copy of the completed form for their file and submit the DCH-0893 to:

**Classic Optical Laboratories**
**3710 Belmont Avenue**
**PO Box 1341**
**Youngstown, OH 44501-1341**

**Telephone: 888-522-2020**
**Fax: 888-522-2022**

**Online Address:** [http://www.classicoptical.com](http://www.classicoptical.com)

**Note:** Optical hardware orders may also be submitted through an online process with the vision contractor. To utilize on-line submission, contact Classic Optical Laboratories for additional information.
